Reconciliation Process

As of the Hawaiians of old, land has had been a big issue in the past.

Today the debate is on whether we are for or against giving back the land to the Native Hawaiians.

As of my opinion, I am for giving land back to Native Hawaiians for only one reason and its for their way of living their life-style. Because today, people pay rent-payments and not very many have the money to do so. Therefore, it brings to my mind that I would go against giving land to Native Hawaiians because these lands could be used for houses to be built on. Hawaii is actually a state, so therefore, it should look more like a state. Hospitals could be built on these lands or any health center. To see the beauty of Hawaii fall in place as its statehood grows mature. The Hawaiians that want land should know that they are not the only culture in the island in need of a source.

In conclusion, I am against giving land to the Native Hawaiians.
