as Mr. Berry

I commend President Clinton's confession of guilt for US overthrow of a peaceful, abundant nation and his grace to apologize for the wrong doing... implied is the justifiable restoration of Hawaii to former Nation status and remonetization of its embassies. I support restoration ~~for~~ by executive decree, immediately.

I commend the Hawaiian people who have every right to shed blood defending their freedom - in the same fashion the US plays its military, but who's exemplary queen shouldered the path of non violence that dignifies them the more.

I am prepared to cooperate with both US & Hawaiian governments to reach mutually respected international exchange, be it through high taxes, affirmative actions, by international decolonization standards and on Hawaiian terms for Hawaii's Nation. Please make a forum for non-Hawaiian public next time.

I expect the US govt and congress to invest at least as many resources educating the US public about the true Hawaiian history as they've wasted on "smut in public office".

As an American rich in freedom, I can afford to go an extra mile to be sure US wealth is not gained by confiscating resources to which others are rightfully entitled.

Victoria Rutherford
