

**Beneficiary Relationship Development and Management (BRDM)  
Index of Changes**

<b>Process Name</b>	<b>Process Flow or Template Number</b>	<b>Section Number</b>	<b>Description of Changes</b>
Beneficiary Relationship Development and Management (BRDM)	All	9. Inter-Process Relationships	<p>There were 130 transactional changes made to the BRDM Templates for Version 6.5. Each of these changes reflects the addition or alteration of a process Predecessor or Successor, in Section 9 - Inter-Process Relationships.</p> <p>The changes are the result of the other “To-Be” business processes making an adjustment or clarifying the interactions between business processes.</p> <p>The effect of these changes is that the Predecessor and Successor business processes, for the BRDM business process, have been completely and correctly identified. As a result, the BRDM business process can now be implemented in concert with the correct Predecessor and Successors.</p>
