

Financial Management

PROJECT MANAGEMENT SERVICE AND SUPPORT

Project planning, requirements management, schedule management, system test management, pre-acquisition support, risk management, and more.

OUR SERVICES

Project management efficiency and strong communication strategies are pivotal to achieving success in complex or high-visibility projects, particularly in alignment with federal government priorities such as cost efficiency and workforce optimization. These strategies are essential for supporting the Department of the Interior's mission to manage public lands and resources responsibly while advancing initiatives like environmental stewardship, digital transformation, and evidence-based decision-making.

IBC provides an objective, professional approach to managing projects and programs, ensuring alignment with goals of transparency, accountability, and resilience. We employ proven practices across a range of project types including system implementations, business transformation, IT systems modernization, regulatory compliance, and other critical business and technology challenges.

IBC's experienced federal team delivers project management as a service throughout your organization's project life cycle, adhering to the principles outlined in recent Executive Orders focused on government efficiency and preparedness. By employing stringent project controls, discipline, and leadership, we break down functional silos, engage stakeholders, and ensure initiatives are completed within scope, schedule, and budget, while minimizing risk, improving stakeholder satisfaction, and fostering collaboration across agencies.

IBC will help your organization establish the structure necessary to ensure effective communication flows and robust collaboration across every functional area. Our methods are designed to meet the evolving needs of federal agencies, ensuring compliance with regulatory requirements and advancing the Administration's goals for a more efficient and resilient government.

WHAT WE OFFER

- Application of the Federal Acquisition Institute (FAI), the Project Management Institute's (PMI) Project Management Body of Knowledge (PMBOK), and other standardized practices to manage the triple constraints of a project - scope, time, and cost.
- Support throughout all project phases: initiation, planning, execution, monitoring and controlling, and closeout.

PROFESSIONAL CREDENTIALS

Our project management staff are trained or certified with the following:

- Project Management Professional (PMP)
- Federal Acquisition Certification for Program and Project Managers (FAC-P/PM)
- Federal Acquisition Certification for Contract Officer Representatives (FAC-COR)
- Information Technology Infrastructure Library (ITIL)
- SCRUM Alliance SCRUM Master (CSM)
- SCRUM Alliance SCRUM Product Owner (CSPO)
- Lean Six Sigma Trained

IBC is an OMB-designated federal shared services provider offering financial management services, including accounting, eTravel services, financial systems implementation and support, project management, COR services, contract audit and indirect cost services.
