Anthony Christianson, Chair  
Federal Subsistence Board  
c/o Office of Subsistence Management  
1011 E. Tudor Road, MS 121  
Anchorage, Alaska 99503-6199

Dear Chairman Christianson:

The Kodiak/Aleutians Subsistence Regional Advisory Council (Council) appreciates the opportunity to submit its FY-2024 annual report to the Federal Subsistence Board (Board) under the provisions of Section 805(a)(3)(D) of the Alaska National Interest Lands Conservation Act (ANILCA). At its public meetings held on September 4– 5, 2024, the Council identified concerns and recommendations for this report. The Council approved this annual report at its March 6 – 7, 2025, public meeting. The Council shares this information to raise a number of concerns dealing with implementation of Title VIII of ANILCA and the continuation of subsistence uses in the Kodiak/Aleutians Region.

**1. Need for Online Access to Federal Subsistence Harvest Permits**

The Council previously shared concerns about the time and difficulty involved in obtaining Federal subsistence harvest permits in our region. We were happy to hear about plans to develop an online permit application system and stress the importance of implementing that system quickly (within two years) to improve accessibility and efficiency for our rural residents. The current system requires obtaining permits in person or by mail and poses challenges in our region, especially for our remote rural communities. We also stress the importance of ensuring the online interface works effectively for remote areas with limited internet connectivity and bandwidth, for example by minimizing the size of any downloaded files.

**2. Lack of Fisheries Research Monitoring Program (FRMP) Funding for Weir Projects**

The Council is grateful for the previous FRMP funding to support the McLees River and Buskin River weirs. However, the Council is deeply concerned about the loss of FRMP funding in 2024/2025, particularly for the McLees River weir. This lack of funding prevented the weir from operating and resulted in loss of essential salmon escapement data necessary for effective management of Unalaska salmon and subsistence opportunity for Unalaska residents. The Council emphasizes the need to improve communication about FRMP funding availability with

Councils, communities, and users. Furthermore, the Council urges the Board to advocate for greater Regional Advisory Council involvement in the FRMP application review and evaluation process. Currently, our Council's involvement occurs very late in the process and does not provide meaningful opportunity for input on projects during the scoring phase. Providing the Council with earlier and more meaningful involvement would help ensure the importance of community projects is effectively communicated and considered during the review process.

### **3. Dedicated Funding for Weirs**

In addition to our recommendations for the existing FRMP funding, the Council requests the Board create a separate funding pool for weir projects on a 5- or 10-year basis, whether using existing FRMP funding or a completely different funding source. While this pool might be funded by multiple sources and agencies, the Council proposes the Board take the lead on this request. Once the funding pool is set up, the Council suggests the Board evaluate each application (including costs), then prioritize these projects, similar to the FRMP process.

### **4. Lack of Law Enforcement Officers for Monitoring and Enforcing Subsistence, Sport, and Commercial Fishing Violations**

Our Council previously reported concerns about the lack of enforcement presence and operation in the Kodiak/Aleutian Region, including both Federal and State lands and waters. Our Council continues to receive increasing reports of concerning subsistence and sport activities, especially along the Unalaska, Alaska Peninsula, and Kodiak Road systems. Enforcement is vital for monitoring and enforcing sport, subsistence, and commercial fishing regulations. We believe a coordinated effort among State, Federal, local, and tribal entities is essential for effective enforcement and recommend dedicating a coordinator to facilitate collaboration and communication among these entities with the goal of increasing overall enforcement capacity and effectiveness. While enforcement is clearly outside the direct purview of the Board, because this issue is so important to continued access to subsistence, we ask that the Board take the lead on championing and coordinating this effort.

### **5. Challenges in Ensuring Subsistence Access to Resources Arising from Fragmented Management Approaches**

Our Council once again notes that State and Federal agencies often operate in silos, with very different management structures, perspectives, and mandates. For example, the fragmented jurisdiction over salmon management between the Federal Subsistence Board, State authorities, and National Marine Fisheries creates significant challenges. This makes it difficult to manage and ensure subsistence access to resources and creates very high frustration with subsistence users who navigate this fractured system. A coordinated approach is crucial for effective management and subsistence access. We strongly encourage the Board to look for opportunities to bridge these divisions and improve coordination whenever possible.

### **6. Importance of FRMP Funding for Statewide Salmon Research Projects**

The Council encourages the Board to facilitate and promote FRMP salmon research projects at a statewide level in addition to continuing to grant salmon research projects by region. Chinook Salmon stocks are struggling across the state, Chum Salmon are in crisis in the north, and Coho Salmon across the Gulf of Alaska are showing signs of trouble. The Council believes that focusing more resources on statewide salmon research would better reflect how salmon populations operate and align with the struggles we are all observing, rather than continuing to only consider and fund projects at a fragmented regional level.

**The remainder of this report is for informational purposes only and the Council does not require a response; however, the issues are significant, and the Board may benefit from this knowledge.**

#### **7. Eradication of Signal Crayfish in Buskin River System in Kodiak**

The Council notes the importance of identifying funding to eradicate invasive Signal Crayfish (*Pacifastacus leniusculus*) in the Buskin River system, specifically Buskin Lake. The Council is concerned that these crayfish prey on salmon eggs and fry in the Buskin River system. In addition, they feed on the salmon carcasses that might affect other components of the Buskin Lake's ecosystem, such as the sequestration of nitrogen. The Buskin River is a crucial source of Sockeye and Coho salmon for federally qualified subsistence users in Kodiak. The Alaska Department of Fish and Game has reported on studies from Europe and California indicating that Signal Crayfish invasions contribute to the decline of native fish populations through predation (ADFG.alaska.gov, Alaska Fish and Wildlife News, October 2018).

The Kodiak/Aleutians Subsistence Regional Advisory Council appreciates the Board's attention to these matters and the opportunity to assist the Federal Subsistence Management Program in meeting its charge of protecting subsistence resources and uses of these resources on Federal public lands and waters. The Council looks forward to continuing discussions about the issues and concerns of subsistence users in the Kodiak/Aleutians Region. If you have any questions regarding this report, please contact me via Lisa Hutchinson, Subsistence Council Coordinator, Office of Subsistence Management, at [lisa\\_hutchinson@ios.doi.gov](mailto:lisa_hutchinson@ios.doi.gov), or Katya Wessels, Supervisory Program Analyst, Council Coordination Division, at, [Katerina\\_Wesselsl@ios.doi.gov](mailto:Katerina_Wesselsl@ios.doi.gov), or phone 1-800-478-1456.

Sincerely,

Rebecca Skinner  
Chair
