NOTE: Future Year Phases to be submitted annually based on priority needs				

Project Description:

Cheyenne-Eagle Butte School serves 937 students in grades K-12 and is located in Eagle Butte, SD. This project replaces the current CEB campus, which consists of 12 permanent structures and site/grounds work. A need for 30 Staff Quarters has been identified. Existing quarters will be assessed to determine suitability for reuse. All new academic facilities will conform to the Federal Sustainable Building requirements and be designed using Leadership in Energy & Environmental Design (LEED) guidelines and green building products and will conserve water and energy resources to the greatest extent possible. Upon completion of the new facility, the existing school buildings will be demolished.

Scope of Project Benefits (SPB):

Project Selection Criteria / GAOA Strategy Alignment:

- 1.1 Restore & Protect High Visitation / Public Use Facilities
- 1.2 Improve ADA Accessibility
- 1.3 Expand Recreation Opportunities and Public Access
- 1.4 Remediate Poorest FCI Facilities
- 2.1 Reduce Deferred Maintenance
- 2.2 Leverage Funding / Pursue Partnering Opportunities
- 2.3 Reduce Annual Operating Costs

- 2.4 Replacement of Assets
- 3.1 Address Safety Issues
- 3.2 Protect Employees / Improve Retention
- 4.1 Modernize Infrastructure

Investment Strategy (IS):

- The entire project would be considered capital improvement.
- The current existing DMWO list, upon completion of the project, will be reduced to zero.
- New facility will reduce the Operations and Maintenance costs to those related to ongoing maintenance of new equipment, which will provide a net reduction in O&M funding from current levels.

Consequences of Failure to Act (CFA):

Without this project operation and maintenance costs will continue to increase due to increasingly poor system performance. Student performance will also continue to be impaired by inadequate facilities incapable of addressing modern educational requirements.

NOTE: Future Year Phases to be submitted annually based on priority needs

The project is receiving additional funding to complete the original scope of work due to significant increases in construction costs. Indian Affairs has awarded a construction contract for the majority of the school and dormitory construction.

Project Description:

Many Farms High School serves 465 students in grades 9-12 and is located 23 miles north of Chinle, AZ. This project consolidates current education programs housed in multiple buildings throughout the campus into a single facility. Enhancements to current facilities include renovation of main building entrance, improvements to current campus security systems, installation of new site perimeter fencing, expansion of parking lots, improvements to handicapped access to campus. Staff Quarters will also be assessed to determine need for renovation. The project also includes installation of a Building Management System (BMS) to allow maintenance personnel better control of mechanical systems, which will provide improved energy efficiency, as well as lower long-term operating costs. Demolition or transfer of excess facilities is also included in the project.

Scope of Benefits (SB):

Project Selection Criteria / GAOA Strategy Alignment:

- 1.1 Restore & Protect High Visitation / Public Use Facilities
- 1.2 Improve ADA Accessibility
- 1.3 Expand Recreation Opportunities and Public Access
- 1.4 Remediate Poorest FCI Facilities
- 2.1 Reduce Deferred Maintenance
- 2.2 Leverage Funding / Pursue Partnering Opportunities
- 2.3 Reduce Annual Operating Costs
- 2.4 Replacement of Assets
- 3.1 Address Safety Issues
- 3.2 Protect Employees / Improve Retention
- 4.1 Modernize Infrastructure

Investment Strategy (IS):

- When complete this project will address multiple Life/Health/Safety/Accessibility deficiencies, reduce the footprint of owned government assets, and modernize the remaining facilities to meet current educational program delivery requirements.
- Project will address all current Deferred Maintenance Work Orders, reducing the backlog.
- This project enables continued use of mission critical facilities, increases environmental policy compliance, and reduces operations and maintenance costs. This project is part of the long-term facility and asset management plan for Indian Affairs that is fulfilled through the Site Assessment and Capital Investment (SA-CI) Program. The SA-CI program is modeled on the Department of Defense Education Authority (DODEA) assessment as the Congress encouraged the Bureau to consider and improve upon pursuant to Public Law 114-113.

The Bureau of Indian Affairs proposes to fund portions of this project's scope with other legally available fund sources.

Consequences of Failure to Act (CFA):

- Without this project, operation and maintenance costs will continue to increase due to increasingly poor system performance. Student performance will also continue to be impaired by inadequate facilities, incapable of addressing modern educational requirements.

NOTE: Future Year Phases to be submitted annually based on priority needs				

Project Description:

This project will be a super-demo of multiple identified excess structures within the BIE school inventory. Indian Affairs (IA) will leverage the Great American Outdoors Act (GAOA) funding and donation authorities, combined with project management and acquisition vehicle process improvements, to greatly improve the safety and overall condition of Educational Facilities. GAOA funding will be utilized to reduce the Deferred Maintenance (DM) backlog, protect critical resources, eliminate attractive nuisances, improve school site safety, and provide environments conducive for student learning.

The DFMC Demolition program relieves the Bureau of unsafe and uninhabitable buildings and provides for safe campus environments. This program also removes federal assets from the Federal Inventory by transfer to Tribes after hazardous materials have been abated. This program resolves numerous safety and health hazards associated with abandoned buildings such as hazardous materials, unauthorized entry, vandalism, etc.

This project involves the demolition of 9,613 square feet of education buildings at three schools in the Southwest region.

Scope of Benefits (SB):

Project Selection Criteria / GAOA Strategy Alignment:

Disposal projects will be developed and funded on a regional level, with specific buildings to be demolished selected according to the IA-DFMC strategic 5-year disposal plan.

- 1.4 Remediate Poorest FCI Facilities
 - Removal of the identified buildings also removes the applied DMWO costs from the FCI calculations, thereby increasing the overall condition of the site.
- 2.1 Reduce or Eliminate Deferred Maintenance

- When an asset is disposed of, the DM amount associated with the asset is removed from the IA-FMS and the FCI calculation.
- 2.2 Leverage Funding / Pursue Partnering Opportunities
- GAOA disposal funding can be leveraged with other programs within DFMC, including the SACI site assessments and new school construction requiring the removal of old, excess school buildings.
- 2.3 Reduce Annual Operating Costs
 - Operation and maintenance costs currently being expended to address the excess buildings will be eliminated.
- 2.4 Remove, Replace, or Dispose of Assets
- 3.1 Address Safety Issues
 - Safety and Attractive Nuisance issues will be eliminated with the removal of the identified buildings coupled with site remediation as necessary.
- 3.2 Protect Employees / Improve Retention
 - Removal of visual-blight buildings will immediately improve the visual aspects of the school sites, providing an improved aesthetic atmosphere.

Investment Strategy (IS):

The demolition of the identified buildings will reduce deferred maintenance in the following ways;

- Deferred Maintenance Work Orders contained within the Maximo system will be removed for all buildings addressed in this GAOA super-demo project.
When an asset is disposed of, the asset and associated DM WO amounts will no longer be included current FCI calculations.
- Operations and Maintenance (O&M) applied to these buildings will also be eliminated.
- Total Deferred Maintenance Reduction of Project: **\$597,428**

Consequences of Failure to Act (CFA):

- Without this project, students will continue to be exposed to an educational environment containing derelict and potentially dangerous buildings, potentially jeopardizing safety and negatively impacting academic performance.

NOTE: Future Year Phases to be submitted annually based on priority needs				

Project Description:

This project will be a super-demo of multiple identified excess structures within the BIE school inventory. Indian Affairs (IA) will leverage the Great American Outdoors Act (GAOA) funding and donation authorities, combined with project management and acquisition vehicle process improvements, to greatly improve the safety and overall condition of Educational Facilities. GAOA funding will be utilized to reduce the Deferred Maintenance (DM) backlog, protect critical resources, eliminate attractive nuisances, improve school site safety, and provide environments conducive for student learning.

The IA-DFMC Demolition program relieves the Bureau of unsafe and uninhabitable buildings and provides for safe campus environments. This program also removes federal assets from the Federal Inventory by transfer to Tribes after hazardous materials have been abated. This program resolves numerous safety and health hazards associated with abandoned buildings such as hazardous materials, unauthorized entry, vandalism, etc.

This project involves the demolition of 266,058 square feet of education buildings at five schools in Navajo region.

Scope of Benefits (SB):

Project Selection Criteria / GAOA Strategy Alignment:

Disposal projects will be developed and funded on a regional level, with specific buildings to be demolished selected according to the IA-DFMC strategic 5-year disposal plan.

- 1.4 Remediate Poorest FCI Facilities
 - Removal of the identified buildings also removes the applied DMWO costs from the FCI calculations, thereby increasing the overall condition of the site.
- 2.1 Reduce or Eliminate Deferred Maintenance
 - When an asset is disposed of, the DM amount associated with the asset is removed from the IA-FMS and the FCI calculation.
- 2.2 Leverage Funding / Pursue Partnering Opportunities
- GAOA disposal funding can be leveraged with other programs within DFMC, including the SACI site assessments and new school construction requiring the removal of old, excess school buildings.
- 2.3 Reduce Annual Operating Costs
 - Operation and maintenance costs currently being expended to address the excess buildings will be eliminated.
- 2.4 Remove, Replace, or Dispose of Assets
- 3.1 Address Safety Issues
 - Safety and Attractive Nuisance issues will be eliminated with the removal of the identified buildings coupled with site remediation as necessary.
- 3.2 Protect Employees / Improve Retention
 - Removal of visual-blight buildings will immediately improve the visual aspects of the school sites, providing an improved aesthetic atmosphere.

Investment Strategy (IS):

The demolition of the identified buildings will reduce deferred maintenance in the following ways;

- Deferred Maintenance Work Orders contained within the Maximo system will be removed for all buildings addressed in this GAOA super-demo project.

- When an asset is disposed of, the asset and associated DM WO amounts will no longer be included current FCI calculations.
- Operations and Maintenance (O&M) applied to these buildings will also be eliminated.
- Total Deferred Maintenance Reduction of Project: **\$15,351,466**

Consequences of Failure to Act (CFA):

- Without this project, students will continue to be exposed to an educational environment containing derelict and potentially dangerous buildings, potentially jeopardizing safety and negatively impacting academic performance.

Project Description:

This project will be a super-demo of multiple identified excess structures within the BIE school inventory. Indian Affairs (IA) will leverage the Great American Outdoors Act (GAOA) funding and donation authorities, combined with project management and acquisition vehicle process improvements, to greatly improve the safety and overall condition of Educational Facilities. GAOA funding will be utilized to reduce the Deferred Maintenance (DM) backlog, protect critical resources, eliminate attractive nuisances, improve school site safety, and provide environments conducive for student learning.

The IA-DFMC Demolition program relieves the Bureau of unsafe and uninhabitable buildings and provides for safe campus environments. This program also removes federal assets from the Federal

Inventory by transfer to Tribes after hazardous materials have been abated. This program resolves numerous safety and health hazards associated with abandoned buildings such as hazardous materials, unauthorized entry, vandalism, etc.

This project involves the demolition of 150,165 square feet of education buildings at eight schools in Navajo region.

Scope of Benefits (SB):

Project Selection Criteria / GAOA Strategy Alignment:

Disposal projects will be developed and funded on a regional level, with specific buildings to be demolished selected according to the IA-DFMC strategic 5-year disposal plan.

- 1.4 Remediate Poorest FCI Facilities
 - Removal of the identified buildings also removes the applied DMWO costs from the FCI calculations, thereby increasing the overall condition of the site.
- 2.1 Reduce or Eliminate Deferred Maintenance
 - When an asset is disposed of, the DM amount associated with the asset is removed from the IA-FMS and the FCI calculation.
- 2.2 Leverage Funding / Pursue Partnering Opportunities
- GAOA disposal funding can be leveraged with other programs within DFMC, including the SACI site assessments and new school construction requiring the removal of old, excess school buildings.
- 2.3 Reduce Annual Operating Costs
 - Operation and maintenance costs currently being expended to address the excess buildings will be eliminated.
- 2.4 Remove, Replace, or Dispose of Assets
- 3.1 Address Safety Issues
 - Safety and Attractive Nuisance issues will be eliminated with the removal of the identified buildings coupled with site remediation as necessary.
- 3.2 Protect Employees / Improve Retention
 - Removal of visual-blight buildings will immediately improve the visual aspects of the school sites, providing an improved aesthetic atmosphere.

Investment Strategy (IS):

The demolition of the identified buildings will reduce deferred maintenance in the following ways;

- Deferred Maintenance Work Orders contained within the Maximo system will be removed for all buildings addressed in this GAOA super-demo project.
- When an asset is disposed of, the asset and associated DM WO amounts will no longer be included current FCI calculations.
- Operations and Maintenance (O&M) applied to these buildings will also be eliminated.
- Total Deferred Maintenance Reduction of Project: **\$7,672,278**

Consequences of Failure to Act (CFA):

- Without this project, students will continue to be exposed to an educational environment containing derelict and potentially dangerous buildings, potentially jeopardizing safety and negatively impacting academic performance.

Building Descope Details:

Considering a large group of interested stakeholders and feedback from the Navajo Nation Heritage and Historic Preservation Department (NNHHPD), it was determined that the 31 buildings at Wingate Elementary should be descoped from the project. The land at Wingate Elementary has changed hands many times and is of cultural and historical significance to Navajo Nation, the US Army, Indian Affairs, the New Mexico State Historic Preservation Office, the US Department of Agriculture, and civilian advocacy groups.

Project Description:

This project will be a super-demo of multiple identified excess structures within the BIE school inventory. Indian Affairs (IA) will leverage the Great American Outdoors Act (GAOA) funding and donation authorities, combined with project management and

acquisition vehicle process improvements, to greatly improve the safety and overall condition of Educational Facilities. GAOA funding will be utilized to reduce the Deferred Maintenance (DM) backlog, protect critical resources, eliminate attractive nuisances, improve school site safety, and provide environments conducive for student learning.

The IA-DFMC Demolition program relieves the Bureau of unsafe and uninhabitable buildings and provides for safe campus environments. This program also removes federal assets from the Federal Inventory by transfer to Tribes after hazardous materials have been abated. This program resolves numerous safety and health hazards associated with abandoned buildings such as hazardous materials, unauthorized entry, vandalism, etc.

This project involves the demolition of approximately 173,556 square feet of education buildings at approximately six schools in Navajo region.

Scope of Benefits (SB):

Project Selection Criteria / GAOA Strategy Alignment:

Disposal projects will be developed and funded on a regional level, with specific buildings to be demolished selected according to the IA-DFMC strategic 5-year disposal plan.

- 1.4 Remediate Poorest FCI Facilities
 - Removal of the identified buildings also removes the applied DMWO costs from the FCI calculations, thereby increasing the overall condition of the site.
- 2.1 Reduce or Eliminate Deferred Maintenance
 - When an asset is disposed of, the DM amount associated with the asset is removed from the IA-FMS and the FCI calculation.
- 2.2 Leverage Funding / Pursue Partnering Opportunities
 - GAOA disposal funding can be leveraged with other programs within DFMC, including the SACI site assessments and new school construction requiring the removal of old, excess school buildings.
- 2.3 Reduce Annual Operating Costs
 - Operation and maintenance costs currently being expended to address the excess buildings will be eliminated.
- 2.4 Remove, Replace, or Dispose of Assets
- 3.1 Address Safety Issues
 - Safety and Attractive Nuisance issues will be eliminated with the removal of the identified buildings coupled with site remediation as necessary.
- 3.2 Protect Employees / Improve Retention
 - Removal of visual-bligh buildings will immediately improve the visual aspects of the school sites, providing an improved aesthetic atmosphere.

Investment Strategy (IS):

The demolition of the identified buildings will reduce deferred maintenance in the following ways;

- Deferred Maintenance Work Orders contained within the Maximo system will be removed for all buildings addressed in this GAOA super-demo project.
- When an asset is disposed of, the asset and associated DM WO amounts will no longer be included current FCI calculations.
- Operations and Maintenance (O&M) applied to these buildings will also be eliminated.
- Total Deferred Maintenance Reduction of Project: **\$21,677,650**

Consequences of Failure to Act (CFA):

- Without this project, students will continue to be exposed to an educational environment containing derelict and potentially dangerous buildings, potentially jeopardizing safety and negatively impacting academic performance.

Building Descope Details:

After the GAOA demolition contract was awarded, Little Wound Day School (Tribally Controlled) had the need to move ahead with demolition for Pump House Building 320 sooner than the GAOA schedule allowed. The school hired a contractor and demolished the structure.

Project Description:

This project will be a super-demo of multiple identified excess structures within the BIE school inventory. Indian Affairs (IA) will leverage the Great American Outdoors Act (GAOA) funding and donation authorities, combined with project management and acquisition vehicle process improvements, to greatly improve the safety and overall condition of Educational Facilities. Project Description:

Shonto Preparatory School, located in Shonto, AZ, is a Navajo tribally controlled school serving 388 students in grades

K – 8. This project will replace the current Shonto campus, which consists of 7 major buildings and several smaller support structures. All new academic facilities will conform to the Federal Sustainable Building requirements and be designed using Leadership in Energy & Environmental Design (LEED) Silver guidelines and green building products and will conserve water and energy resources to the greatest extent possible. Upon completion of the new facilities, the existing school buildings will be disposed of.

This includes major site infrastructure activities such as: Replacement of the 60-year-old water distribution system with new water main piping which will create a looped network around the campus. Replacement of the 60-year-old sanitary sewer collection system. Application of a varied approach to pavement repair, i.e., replacing what is beyond salvaging and rehabilitating other pavements considered to be in serviceable condition. Significant improvements to the athletic field areas. Improvement to the overall site drainage and grading include removing debris piles that have accumulated along curb gutters.

Scope of Benefits (SB):

Project Selection Criteria / GAOA Strategy Alignment:

- 1.1 Restore & Protect High Visitation / Public Use Facilities
- 1.2 Improve ADA Accessibility
- 1.3 Expand Recreation Opportunities and Public Access
- 1.4 Remediate Poorest FCI Facilities
- 2.1 Reduce Deferred Maintenance
- 2.2 Leverage Funding / Pursue Partnering Opportunities
- 2.3 Reduce Annual Operating Costs
- 2.4 Replacement of Assets
- 3.1 Address Safety Issues
- 3.2 Protect Employees / Improve Retention
- 4.1 Modernize Infrastructure

Investment Strategy (IS):

- The entire project would be considered capital improvement.
- The current existing DMWO list, upon completion of the project, will be reduced to zero.
- New facility will reduce the Operations and Maintenance costs to those related to ongoing maintenance of new equipment, which will provide a net reduction in O&M funding from current levels.

Consequences of Failure to Act (CFA):

- Without this project operation and maintenance costs will continue to increase due to increasingly poor system performance. Student performance will also continue to be impaired by inadequate facilities incapable of addressing modern educational requirements.

Additional funding is being requested for the Wounded Knee School Replacement project to address increased funding needs stemming from significant construction cost increases. Currently, the project is in the Design phase, and Indian Affairs is receiving updated cost estimates for construction at each design submission. The estimates used at the project's outset were preliminary.

Project Description:

Wounded Knee District Schools serves 152 students in grades K – 8, is located in Manderson SD, and is affiliated with the Lakota Sioux Nation. This project will replace the current Wounded Knee campus, which consist of 6 major buildings and 3 minor support structures. All new academic facilities will conform to the Federal Sustainable Building requirements and be designed using leadership in Energy & Environmental Design (LEED) Silver guidelines and green building products and will conserve water and energy resources to the greatest extent possible. Upon completion of the new facilities the existing school buildings will be disposed of.

This includes replacement of major site infrastructure including: Replacement of the 60-year-old water distribution system with new water main piping which will create a looped network around the school building. Replacement of the 60-year-old sanitary sewer collection system. Reconstruction of all roads and construction of new paved parking lots including curb and gutter and sidewalk replacement. Improvement to the overall site drainage and grading include constructing a new stormwater conveyance system to provide points of positive drainage throughout the campus with priority given to alleviating water around the school building. Installation of security fencing around the school.

Scope of Benefits (SB):

Project Selection Criteria / GAOA Strategy Alignment:

- 1.1 Restore & Protect High Visitation / Public Use Facilities
- 1.2 Improve ADA Accessibility
- 1.3 Expand Recreation Opportunities and Public Access
- 1.4 Remediate Poorest FCI Facilities
- 2.1 Reduce Deferred Maintenance
- 2.2 Leverage Funding / Pursue Partnering Opportunities
- 2.3 Reduce Annual Operating Costs
- 2.4 Replacement of Assets
- 3.1 Address Safety Issues
- 3.2 Protect Employees / Improve Retention
- 4.1 Modernize Infrastructure

Investment Strategy (IS):

- When complete this project will address multiple Life/Health/Safety/Accessibility deficiencies, reduce the footprint of owned government assets, and modernize the remaining facilities to meet current educational program delivery requirements.
- The current existing deferred maintenance work order (DMWO) list, upon completion of the project, will be reduced to zero.
- New facility will reduce the Operations and Maintenance costs to those related to ongoing maintenance of new equipment, which will provide a net reduction in O&M funding from current levels.

The Bureau of Indian Affairs proposes to fund portions of this project's scope with other legally available fund sources.

Consequences of Failure to Act (CFA):

- Without this project operation and maintenance costs will continue to increase due to increasingly poor system performance. Student performance will also continue to be impaired by inadequate facilities incapable of addressing modern educational requirements.

Project Description:

Wounded Knee District Schools serves 152 students in grades K – 8, is located in Manderson SD, and is affiliated with the Lakota Sioux Nation. This project includes Replacement or Renovation of existing units, and new construction to provide 23 total quarters units and related utility infrastructure. Existing quarters will be assessed to determine suitability for reuse/renovation. Upon completion of the new facilities, access quarters units will be disposed of.

Scope of Benefits (SB):

Project Selection Criteria / GAOA Strategy Alignment:

- 1.1 Restore & Protect High Visitation / Public Use Facilities
- 1.2 Improve ADA Accessibility
- 1.3 Expand Recreation Opportunities and Public Access
- 1.4 Remediate Poorest FCI Facilities
- 2.1 Reduce Deferred Maintenance
- 2.2 Leverage Funding / Pursue Partnering Opportunities
- 2.3 Reduce Annual Operating Costs
- 2.4 Replacement of Assets
- 3.1 Address Safety Issues
- 3.2 Protect Employees / Improve Retention
- 4.1 Modernize Infrastructure

Investment Strategy (IS):

- The entire project would be considered capital improvement.
- The current existing DMWO list, upon completion of the project, will be reduced to zero.
- New or renovated Quarters Units will reduce costs related to ongoing maintenance, improve safety of occupants, and provide much needed residential options for school staff.

Consequences of Failure to Act (CFA):

- Without this project operation and maintenance costs will continue to increase due to increasingly poor system performance. Staff recruitment and retention will also continue to be impaired by inadequate facilities incapable of addressing residential needs.

Project Description:

Shonto Preparatory School, located in Shonto, AZ, is a Navajo tribally controlled school serving 388 students in grades K – 8. This project will replace the current Shonto campus, which consists of seven major buildings and several smaller support structures. All new academic facilities will conform to the Federal Sustainable Building requirements and be designed using Leadership in Energy & Environmental Design (LEED) Silver guidelines and green building products and will conserve water and energy resources to the greatest extent possible. Upon completion of the new facilities, the existing school buildings will be disposed.

This project includes major site infrastructure activities such as:

- Replacing the 60-year-old water distribution system with new watermain piping to create a looped network around the campus.

- Replacing the 60-year-old sanitary sewer collection system.
- Applying a varied approach to pavement repair (i.e., replacing what cannot be salvaged and rehabilitating pavement that is in serviceable condition).
- Improving the athletic field areas.
- Improving site drainage and grading, including the removal of debris piles that have accumulated along curb gutters.

Scope of Benefits (SB):

Project Selection Criteria / GAOA Strategy Alignment:

- 1.1 Restore & Protect High Visitation / Public Use Facilities
- 1.2 Improve ADA Accessibility
- 1.3 Expand Recreation Opportunities and Public Access
- 1.4 Remediate Poorest FCI Facilities
- 2.1 Reduce Deferred Maintenance
- 2.2 Leverage Funding / Pursue Partnering Opportunities
- 2.3 Reduce Annual Operating Costs
- 2.4 Replacement of Assets
- 3.1 Address Safety Issues
- 3.2 Protect Employees / Improve Retention
- 4.1 Modernize Infrastructure

Investment Strategy (IS):

- The project is a combination of Maintenance/Repair and Capital Improvement Work.
- Upon completion of the project, all deferred maintenance associated with these assets will be retired.
- The equipment at the new facility will have reduced operation and maintenance costs.

Consequences of Failure to Act (CFA):

Without this project operation and maintenance costs will continue to increase due to increasingly poor system performance. Student performance will also continue to be impaired by inadequate facilities incapable of addressing modern educational requirements.

- 1.4 Remediate Poorest FCI Facilities
- 2.1 Reduce Deferred Maintenance
- 2.2 Leverage Funding / Pursue Partnering Opportunities
- 2.3 Reduce Annual Operating Costs
- 2.4 Replacement of Assets
- 3.1 Address Safety Issues
- 3.2 Protect Employees / Improve Retention
- 4.1 Modernize Infrastructure

Investment Strategy (IS):

- The project is a combination of Maintenance/Repair and Capital Improvement Work.
- Upon completion of the project, all deferred maintenance associated with these assets will be retired.
- New or renovated quarters units will reduce recurring operation and maintenance costs, improve occupant safety, and provide a much needed residential housing option for school staff.

Consequences of Failure to Act (CFA):

Without this project operation and maintenance costs will continue to increase due to increasingly poor system performance. Staff recruitment and retention will also continue to be impaired by inadequate facilities incapable of addressing residential needs.

Project Description:

Shonto Preparatory School, located in Shonto, Arizona, is a Navajo tribally controlled school serving 388 students in grades K – 8. This project involves replacing or repairing approximately 64 of the existing 120 quarters units and related utility infrastructure. Existing quarters will be assessed to determine suitability for reuse/renovation. Additional investment in FY24 will be needed to fully fund this project. Upon completion of the new facilities, excess quarters units will be disposed.

Scope of Benefits (SB):

Project Selection Criteria / GAOA Strategy Alignment:

- 1.1 Restore & Protect High Visitation / Public Use Facilities
- 1.2 Improve ADA Accessibility
- 1.3 Expand Recreation Opportunities and Public Access
- 1.4 Remediate Poorest FCI Facilities
- 2.1 Reduce Deferred Maintenance
- 2.2 Leverage Funding / Pursue Partnering Opportunities
- 2.3 Reduce Annual Operating Costs
- 2.4 Replacement of Assets
- 3.1 Address Safety Issues
- 3.2 Protect Employees / Improve Retention
- 4.1 Modernize Infrastructure

Investment Strategy (IS):

- The project is a combination of Maintenance/Repair and Capital Improvement Work.
- Upon completion of the project, all deferred maintenance associated with these assets will be retired.
- New or renovated quarters units will reduce recurring operation and maintenance costs, improve occupant safety, and provide a much needed residential housing option for school staff.

Consequences of Failure to Act (CFA):

Without this project, operation and maintenance costs will continue to increase due to increasingly poor system performance. Staff recruitment and retention will also continue to be impaired by inadequate facilities incapable of addressing residential housing needs.

Congressional District: N/A
State: N/A

Project Justification

DOI Asset Code	FRPP Unique Id#	API:	FCI-Before:
N/A	N/A	N/A	N/A

Project Description:

This funding will be used to provide contingency funds for all Great American Outdoors Act (GAOA) National Parks and Public Land Legacy Restoration Fund (LRF) construction projects. Due to the nature of the construction process, projects must be prepared to address multiple risks that frequently increase costs. These include unforeseen/unanticipated site conditions that require adjustments to construction methods and timelines, adjustments to project scheduling when contending with unexpected environmental events, unpredictable fluctuations in prices for supplies and materials, and the remoteness of most Bureau of Indian Education (BIE) construction sites.

This funding will be used to ensure the bureau is able to address fluctuations in construction costs to accomplish the scope described in the project data sheets for individual projects. The bureau will not use this funding to add enhancements.

While typical construction projects include a certain percentage of contingency funding built into their individual requests, the volatility of current construction markets require the use of a different budget strategy for LRF projects. This contingency funding for LRF projects will be held in reserve and not allocated to specific projects until it is needed. This funding will be made available for past, current, and future LRF projects needing contingency funds to complete construction with original scope.

At the FY 2025 funding level, LRF Contingency will:

- Provide contingency funds to past, present, and future LRF projects to address cost increases, unforeseen site conditions, and adapt project methods and schedules during unexpected environmental events.
- Support successful completion of major LRF projects that encounter challenges, ensuring projects are not delayed or left unfinished while other funding is identified.
