YUKON AREA GILLNET CLOSURE IN DISTRICT 3 AND THE INNOKO RIVER

EMERGENCY SPECIAL ACTION

Under Authority of: 36 CFR 242.10 and .19
50 CFR 100.10 and .19

Emergency Special Action No: 2-KS-07-25

Issued at: Fairbanks, Alaska, June 13, 2025

Effective Date: Saturday, June 21, 2025, 8:00 p.m. for District 3;
Monday, June 23, 2025, 8:00 p.m. for the Innoko River
Expiration Date: Tuesday, July 8, 2025, 8:00 p.m. for District 3;
Thursday, July 10, 2025, 8:00 p.m. for the Innoko River, unless superseded by
subsequent special action

EXPLANATION:

This Emergency Special Action closes the Federal public waters of Yukon District 3 and the Innoko River to the use of gillnets of any size for a period when the bulk of the Chinook salmon run is projected to be in these sections of the river. All gillnets must be removed from the water during this gillnet closure period.

This Emergency Special Action adds an *additional gear restriction* to Temporary Special Action **2-KS-02-25** that closed the Yukon District 3 and the Innoko River to the subsistence harvest and retention of Chinook and summer chum salmon. When Emergency Special Action **2-KS-07-25** expires, fishing for nonsalmon only may resume with gillnets limited to 4-inch and smaller, 60 feet maximum length, operated as a set net near shore.

REGULATION:

Pursuant to **2-KS-02-25**, in Federal public waters of the following areas, subsistence salmon fishing is currently closed to all users, and gillnets of 4-inch and smaller may be used to target nonsalmon.

50 CFR 100.27(e)(3) Subsistence taking of fish—Yukon-Northern Area is further amended to read:

(ii) **In Federal public waters of the following areas:**

District 3:

Effective 8 p.m. Saturday, June 21 until 8 p.m. Tuesday, July 8, all gillnets must be removed from the water (all users). Fishing for non-salmon is still allowed during this period, but it is limited to non-lethal gears including hook and line with a rod or pole, dip net, beach seine, hand line, longline, fyke net, lead, and spear. Pink and sockeye salmon may be retained.

Chinook and chum salmon must be released alive.

Innoko River:

Effective 8 p.m. Monday, June 23 until 8 p.m. Thursday, July 10, all gillnets must be removed from the water (all users). Fishing for non-salmon is still allowed during this period, but it is limited to non-lethal gears including hook and line with a rod or pole, dip net, beach seine, hand line, longline, fyke net, lead, and spear. Pink and sockeye salmon may be retained. Chinook and chum salmon must be released alive.

JUSTIFICATION:

The drainage-wide Chinook salmon outlook is for a run size of about 72,000 fish, and the Canadian-origin Chinook salmon outlook is about 30,000 fish. Escapement goals are unlikely to be met for Chinook salmon and closures will likely be required for the duration of their migration. Pursuant to Section 816 of ANILCA, this Emergency Special Action (**2-KS-07-25**) closes all gillnet fishing in the Federal public waters of the Yukon River District 3 and the Innoko River based on recent average run timing for Chinook salmon due to concerns about the viability of the population. These gillnet closures will ensure no incidental harvest of this species in lethal gillnets will occur between the first quarter point and third quarter point of the run to protect the bulk of the migrating Chinook salmon. These closures will be implemented up river based on fish migration timing.

CONSULTATION AND OUTREACH:

The Yukon River salmon outlooks and management strategies were discussed at a public hearing; the Eastern Interior, Western Interior, and Yukon Kuskokwim Delta Regional Advisory Council meetings; the Yukon River Drainage Fisheries Association (YRDFFA) annual Preseason Fisheries Meeting; at the Yukon River Panel and at the Yukon River Intertribal Fish commission meeting. The Federal manager offered formal Government-to-Government Tribal Consultation meetings with Yukon River drainage Tribal Governments upon request. The Federal fishery outlook and management strategy was sent to all Yukon Tribal and City governments on May 23. Approximately 3,500 copies of the ADF&G and USFWS Preseason Outlook flier were mailed to Yukon River fishing households in May.

This action was taken following coordination with the ADF&G fishery managers. The fishing schedules and/or restrictions announced here match those issued concurrently by the ADF&G in state waters (Summer Fishery Advisory Announcement #9). The Federal Subsistence Regional Advisory Council Chairs for the Yukon-Kuskokwim Delta, Eastern Interior, Western Interior, and Seward Peninsula Regional Advisory Councils were notified as was the Chair and vice-chair of the Yukon River Intertribal Fish Commission. Review was provided by the Office of Subsistence Management.

See Below for Detailed Maps of Federal Public Waters in the Yukon River Drainage:

Communities and streams adjacent to the boundary of Federal lands are part of Federal waters, even on the opposite side of the river.

Yukon River Drainage Area -
Lower River Fishing Districts: Coastal, 1, 2, and 3 **— Fishing Districts**
■ Federal Public Waters Jurisdiction

In the Coastal area: Hooper Bay, Chevak and Scammon Bay communities are in Federal waters.

However, bays and coastal marine waters are State-managed. In District 2, all communities are in Federal waters. In District 3, only Russian Mission is in Federal waters. Holy Cross and Shageluk (in the Innoko Drainage) are in State waters.

DISTRIBUTION:

Anthony Christianson, Chair, Federal Subsistence Board

Sara Boario, Alaska Regional Director, USFWS

Jackie Cleveland, Chair, Yukon-Kuskokwim Delta Subsistence Regional Advisory Council

Jack Reakoff, Chair, Western Interior Subsistence Regional Advisory Council

Charlie Wright, Chair, Eastern Interior Subsistence Regional Advisory Council and chair of Yukon River Intertribal Fish Commission

Louis Green Jr, Chair, Seward Peninsula Subsistence Regional Advisory Council

Phet Souphanya, Assistant Special Agent in Charge, LE Division, USFWS

Crystal Leonetti, Director, Office of Subsistence Management

Scott Ayers, Deputy Director, Office of Subsistence Management

Justin Koller, Supervisory Regulations Specialist, Office of Subsistence Management

Vivian Korthius, Executive Director, Association of Village Council Presidents

Dorothea Adams, Executive Director, Council of Athabascan Tribal Governments

Bruce Thomas, Director, Natural Resources Council of Athabascan Tribal Governments

Ben Mulligan, Deputy-Commissioner, Alaska Department of Fish and Game

Mark Burch, Asst. Director, Wildlife Conservation, Alaska Department of Fish and Game

Jill Klein, Alaska Regional Subsistence Coordinator, USFWS

Boyd Blihovde, Refuge Supervisor, USFWS

Diloolo Erickson, Tanana Chiefs Conference

Deena Jallen, Summer Area Management Biologist, Alaska Department of Fish and Game

Mathew Olson, Fall Area Management Biologist, Alaska Department of Fish and Game

Eva Patton, Regional Subsistence Program Manager, National Park Service

Kevin Pendergast, State Director, Bureau of Land Management

Also distributed to Tribal and City Governments and any interested parties. If you didn't receive this directly and want to, please reach out to Holly Carroll.
