Good Accounting Obligation in Government Act Report

The Good Accounting Obligation in Government Act (GAO-IG Act, P.L. 115-414), enacted January 3, 2019, requires Agencies to report the status of each open audit recommendation issued more than one year prior to the submission of the Agency’s annual budget justification to Congress. The Act requires Agencies to include the current target completion date, implementation status, and any discrepancies on closure determinations. When final corrective actions addressing an audit recommendation are fully implemented, the audit recommendation is considered closed.

The Department of the Interior (Department) leadership takes audit follow-up very seriously and considers its external auditors, to include the Government Accountability Office (GAO) and the Office of Inspector General (OIG), valued partners in not only improving the Department’s management and compliance obligations but also enhancing its programmatic and administrative operations. As stewards of taxpayer resources, the Department applies cost-benefit analysis and enterprise risk management principles in recommendation implementation decisions.

The Department has established a formalized audit follow-up process which (1) provides the bureaus and offices with tools, technical support, and oversight to remediate internal and auditor-identified recommendations; (2) monitors and communicates remediation progress against target closure dates by maintaining an annual performance goal reported in the Agency Financial Report; and (3) includes review of proposed recommendation closures by senior staff with follow-on management concurrence. Moreover, management is held accountable for achieving an 85% rate of closing audit recommendations with current fiscal year due dates, barring any unforeseen events.

Following is the summary of the Department’s recommendations open for more than one year (i.e. all open audit recommendations except for those issued after February 2, 2025):

OIG and GAO Recommendation Summary			
Auditor	No Discrepancies	Discrepancies*	Total
GAO	112	13	125
OIG	177	6	183
Total	289	19	308

*Note: The Department’s conclusion regarding the implementation closure, or concurrence of GAO and OIG recommendations differ from the position of these audit entities.

There are 10 GAO and 6 OIG recommendations where the Department believes it has taken enough actions to implement them and considers them closed. There are 3 GAO recommendations in which the Department did not concur.
