This guide is also available on the web at <http://www.doi.gov/hawaiian>.

According to the 2005 American Community Survey released by the U.S. Census Bureau, Native Hawaiian families in Hawai'i are twice as likely to live below the poverty line than the rest of the State's population. It was noted that approximately one in seven Native Hawaiian families are living below the poverty line. Unfortunately, these numbers have not been getting better. From 2007 to 2011, the number of Native Hawaiians in poverty has increased by 60%. With the increase in poverty levels in the Native Hawaiian Community and austerity measures being implemented both in the private and public sectors, partnerships and the coordination of efforts to assist the Native Hawaiian community are becoming more important.

The Department of the Interior partnered with Papa Ola Lōkahi, the Council for Native Hawaiian Advancement, and the Native Hawaiian Education Council to better help the Native Hawaiian Community to access Federal programs that serve or have the potential to serve the members of the Community. The partnering Native Hawaiian organizations listed above have agreed to keep their sections updated and electronically housed on their home websites. The Department of the Interior will also continue to look for partners to expand our list of programs to other Federal agencies and bureaus. The work on this guide is not over but is only beginning.

Within this guide, individuals and organizations can find grant opportunities supporting various causes in four different areas: health, housing, education, and labor. Each section provides a brief overview of our partner in Hawaii followed by an extensive list of grant programs as well as the contact information for each.

SEARCHING FOR FEDERAL GRANTS

Grants administered by federal agencies differ by eligibility requirements, award amount, application process, and timing. Online resources can help you determine what types of funding are available and how to apply for that funding.

Grants.gov is the primary source of information and mode of submitting applications for federal grants and awards of financial assistance, administered through 1,000 programs and 26 federal grant-making agencies to recipients carrying out a public purpose of support or stimulation. In FY2009, Grants.gov received over 300,000 application submissions. Users must complete the Grants.gov registration process, which requires organizations to obtain a Data Universal Number System (DUNS) number and to register with the Central Contractor Registry (CCR). There is a user guide available, and for general questions, call: 1-800-518- 4726 or email support@grants.gov. Note: The registration process takes approximately three to five business days.

Catalog of Federal Domestic Assistance (CFDA) is a government-wide compendium of all federal programs available to state and local governments; domestic public, quasi-public, and private profit and nonprofit organizations and institutions; specialized groups; and individuals. Organizations may utilize the CFDA to identify programs and information on federal financial and nonfinancial assistance; however, only government agencies can apply for grants on the CFDA website directly. There is a user guide available, and individuals may purchase the CFDA by contacting the U.S. Superintendent of Documents at 1-866-512-1800 or the U.S. Government Printing Office's online bookstore. For assistance using the CFDA website, you may contact the Federal Service Desk or call 1-866-606- 8220.

The Federal Register is the official daily publication of the federal government and provides Notices of Funding Available (NOFA). The U.S. Government Printing Office's Federal Register database makes it easy to search for updates and information on the most recent grant and award opportunities.

Health: U.S. Department of Health and Human Services

U.S. Department of the Interior, Office of Native Hawaiian Relations and *Papa Ola Lōkahi*

In 1985, *E Ola Mau, The Native Hawaiian Needs Study*, reported on the disparate rates of death and illness due to chronic diseases, dental caries, mental health conditions, and the underrepresentation of Native Hawaiians in the health care professions.

These findings supported earlier concerns for the native health and well-being that were articulated in federal statute in 1921, and to which Hawaiian ali'i, nobles, earlier left legacies to attend: Queen Emma Trust/Queen's Medical Center (medical care), Lunalilo Trust (elderly care), Queen Lili'uokalani Trust (orphaned and indigent children), Queen Kapi'olani Women's & Children's Medical Center, and Ka'iulani Home for Girls.

To address the *E Ola Mau* findings, Congress passed the Native Hawaiian Health Care Act (Public Law 100-579) in 1988. It was re-authorized as the Native Hawaiian Health Care Improvement Act (NHHCIA) in 1992 (P.L. 102-396), and again re-authorized to the year 2020 within the body of the Indian Healthcare Improvement Act in the 2010 Patient Protection and Affordable Care Act (ACA) (P.L. 111-142).

The NHHCIA is codified in Title 42 – USC: The Public Health and Welfare; Chapter 122 – Native Hawaiian Health Care; Sections 11701-11714, and administered by the Health Resources & Services Administration (HRSA) within the U.S. Department of Health and Human Services (US DHHS).

With the charge to “to raise the health status of Native Hawaiians to the highest possible level” (42 USC 122; Section 11702), Papa Ola Lōkahi's program responsibilities spring from two sources: its kuleana (*responsibility, accountability*) in the Native Hawaiian community as a non-governmental organization, and its mandated responsibilities as a government designated organization to implement public policy. Both sources inform the development of program strategies that address

health and well-being. POL serves as the body with which federal agencies shall enter into consultation around issues of Hawaiian health policy and health care.

The three components of the NHHCIA are:

Papa Ola Lōkahi (POL). POL works with the NHHCSs and serves as a focal point for health policy, health research and training, traditional Hawaiian healing, advocacy, technical assistance, and health information and education. POL currently administers the Native Hawaiian Health Scholarship Program, 'Imi Hale - Native Hawaiian Cancer Network (funded by National Cancer Institute), Kupuna Councils, and the Native Hawaiian Census Information Center (designated by the Census Bureau).

Native Hawaiian Health Care Systems (NHHCSs). Five individual community-based organizations on each of the major islands address the health care needs defined by their respective communities. The NHHCSs offer health education and health promotion, enabling and support services, outreach, case management, enrollment, and healthy lifestyle classes. Most offer primary and behavioral health care, some offer oral health services or referrals.

Native Hawaiian Health Scholarship Program (NHHSP). Barely 4% of all licensed physicians in Hawai'i are Native Hawaiian. Representation is somewhat better in nursing and social work, but still a long way from parity in the health professions. The NHHSP has provided the funds to train more than 200 Native Hawaiians in 17 health professions. Modeled after the National Health Service Corps, scholars who complete their training are required to serve in underserved, rural communities in Hawai'i. The aim of the program is to build a health workforce that will make seeking health services by Native Hawaiians both accessible and acceptable.

To make the above possible, the Indian Arts and Crafts Act of 1990 (P.L. 101-644) and Public Health Services Act (Title IV, Section 401) were amended to establish health professions scholarships for Native Hawaiians. P.L. 107-116 and an amendment to Title 42 USC Chapter 122 in Section 11709 define the management of the NHHSP.

Among POL's partners are state agencies, private health care providers, and non-profit organizations, with which joint efforts assure Native Hawaiians a well-defined balance of physical, emotional and spiritual well-being.

Papa Ola Lōkahi has included within their *kuleana* (responsibility) the maintaining this section of the guide. POL also agreed to house this document on their website to allow the community easier access to these assistive programs.

Administration for Children and Families

Street Outreach Program

- **Purpose:** The Street Outreach Program (SOP) makes grants available to nonprofit agencies for the purpose of providing street-based services to runaway, homeless and street youth who have been subjected to, or are at risk of being subjected to sexual abuse, prostitution, or sexual exploitation.
- **Types of Projects:** The first of three Runaway & Homeless Youth Programs of the Family & Youth Services Bureau provides education and prevention services directly or through collaboration with other agencies to runaway, homeless and street youth that have been subjected to or are at risk of sexual exploitation or abuse. The goal and design of these efforts is to help young people leave the streets to build positive relationships.

Basic Center Grant

- **Purpose:** The purpose of the Basic Center Grant is to establish or strengthen locally controlled community-based programs that address the immediate needs of runaway and homeless youth and their families.
- **Types of Projects:** The second of three Runaway & Homeless Youth Programs of the Family & Youth Services Bureau provides temporary shelter and care for up to twenty

one days for children up to age 18. With this, necessities such as food and clothing are provided, as well as individual, group and family counseling. Assessments made during this stay in regard to what the most appropriate action for each child is to be after they leave temporary shelter. Aftercare referrals and arrangements are then made if deemed appropriate.

Transitional Living for Homeless Youth

- **Purpose:** The overall purpose of the Transitional Living Program (TLP) for homeless youth and the Maternity Group Homes (MGH) is to establish and operate transitional living projects for homeless youth, including pregnant and parenting youth. This program is structured to help older homeless youth achieve self-sufficiency and avoid long-term dependency on social services.

- **Types of Projects:** The final program of the three Runaway & Homeless Youth Programs of the Family & Youth Services Bureau provides a more permanent shelter along with skills training and support services to homeless youth ages 16 to less than 22. This extends their residential stay for homeless youth to 635 days or 21 months. Other services that are offered include, but are not limited to, transportation, family planning, and pregnancy prevention services.

Affordable Care Act (ACA) Health Profession Opportunity Grants

- **Purpose:** To provide education and training to Temporary Assistance for Needy Families (TANF) recipients and other low-income individuals for occupations in the health care field that pay well and are expected to either experience labor shortages or be in high demand.

- **Types of Projects:** The funds may be used to provide education and training to TANF recipients and other low-income individuals for occupations in the health care field that pay well and are expected to either experience labor shortages or be in high demand. Funds may be used for participant supportive services, including financial aid, child care, and case management.

Low-Income Home Energy Assistance

- **Purpose:** To make Low Income Home Energy Assistance Program (LIHEAP) grants available to States and other jurisdictions to assist eligible households to meet the costs of home energy.
- **Types of Projects:** The funds may: (1) extend to state and local planning and administration, (2) provide services through community-based nonprofit organizations to LIHEAP-eligible households to reduce their energy vulnerability, or (3) provide emergency contingency funds to be used to meet additional needs arising from a natural disaster or other emergencies.

Community Services Block Grant - Discretionary Awards

- **Purpose:** To provide assistance to States and local communities, working through a network of community action agencies and other neighborhood-based organizations, for the reduction of poverty, the revitalization of low-income communities, and the empowerment of low-income families and individuals in rural and urban areas to become fully self-sufficient.
- **Types of Projects:** Funds act to: (a) secure employment; (b) attain an adequate education; (c) make better use of available income; (d) obtain and maintain adequate housing and a suitable living environment; (e) obtain emergency assistance through loans or grants to meet immediate and urgent individual and family needs, including health services, nutritious food, housing, and employment-related assistance; (f) remove obstacles and solve problems which block the achievement of self-sufficiency; (g) achieve greater participation in the affairs of the community; and (h) make more effective use of other related programs.

Head Start

- **Purpose:** To promote school readiness by enhancing the social and cognitive development of low-income children, including children on federally recognized reservations and children of migratory farm workers.
- **Types of Projects:** Provision of comprehensive health, educational, nutritional, social and other services; and to involve parents in their children's learning and to help parents make progress toward their educational, literacy and employment goals. Head Start also emphasizes the significant involvement of parents in the administration of their local Head Start programs.

Native American Programs

- **Purpose:** The purpose of the Social and Economic Development Strategies (SEDS) program is to promote economic and social self-sufficiency for American Indians, Alaska Natives, Native Hawaiians, and Native American Pacific Islanders from American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands. The Administration for Native Americans (ANA) is interested in supporting community-driven projects designed to grow local economies, increase the capacity of tribal governments, strengthen families, preserve Native cultures, and increase self-sufficiency and community well-being. Funded SEDS projects will reflect specific, measurable, achievable, relevant, and time-bound outcomes and include specific strategies for reducing or eliminating community problems and achieving long-range community goals.
- **Types of Projects:** (1) Governance- which is defined as increasing the ability of tribal and Alaska Native village governments to exercise local control and decision-making, and to develop and enforce laws, regulations, codes, and policies that reflect and promote the interests of community members.; (2) Economic Development-Projects that promote the creation of a sustainable local economy.; (3) Strengthening Families-Incorporating culturally relevant strategies to strengthen families and promote family preservation, responsible parenting, and healthy relationship skills; and to foster the well-being of children and (4) Social Development- Projects that develop and implement culturally appropriate strategies to meet the social service needs of Native Americans.

Promote the Survival and Continuing Vitality of Native American Languages

- **Purpose:** To provide financial assistance to eligible applicants for the purpose of promoting the survival and continued vitality of native languages.
- **Types of Projects:** This program area is divided into two categories: (1) Native Language Preservation and Maintenance and (2) Esther Martinez Immersion. The

Language Preservation and Maintenance Grants are 12, 24 or 36-month projects that enable communities to conduct assessments of native languages, plan language programs and implement language projects that support the communities' long-term language preservation goals. The Esther Martinez Initiative Grants are 36-month projects that will be awarded to applicants that meet the statutory requirements for immersion projects with language nests, restoration programs or language survival schools in accordance with P.L. 109-394.

Abandoned Infants Assistance

- **Purpose:** To develop, implement and operate projects to demonstrate methods to prevent the abandonment of infants and young children.
- **Types of Projects:** Funds are utilized to: (1) provide services to members of the family for any condition that increases the probability of abandonment of an infant or young

child; (2) identify and address the needs of abandoned infants and young children; (3) assist abandoned infants and young children to reside with their natural families or in foster care, as appropriate; (4) recruit, train and retain foster families for abandoned infants and young children; (5) carry out residential care programs for abandoned infants and young children, who are unable to reside with their natural families or to be placed in foster care; (6) carry out programs of respite care for families and foster families of infants and young children; (7) recruit and train health and social services personnel to work with families, foster care families and residential care programs for abandoned infants and young children; and (8) prevent the abandonment of infants and young children, and to care for the infants and young children who have been abandoned, through model programs providing health, educational, and social services at a single site in a geographic area. This program also funds technical assistance, including training, with respect to the planning, development and operation of the projects described.

Racial and Ethnic Approaches to Community Health

- **Purpose:** The purpose of this program is to fund National Networks to fund, manage, support, and monitor sub-recipients and to implement evidence- and practice-based strategies that reduce racial and ethnic health disparities for population(s) experiencing high burden of disease or risk factors. The intervention population is the population within the selected geographic area that applicants will reach with proposed program activities. They are to contribute to the development and implementation of a community health action plan to address chronic disease health disparities and create social and physical environments that promote good health for all.
- **Types of Projects:** The project funds of this three-year initiative may be used for costs associated with planning, organizing, conducting, implementing, managing, and coordinating all requirements of the FOA. The funded projects are imposed to strengthen the nation's health and human services infrastructure and workforce, and to advance the health, safety, and well-being of the American people.

Health Systems Strengthening and HIV/AIDS Prevention, Care and Treatment under the President's Emergency Plan for AIDS Relief

Purpose: To fund lifesaving care and treatment programs and build and strengthen health systems in countries hit hardest by HIV/AIDS through the President's Emergency Plan for AIDS Relief (PEPFAR).

Types of Projects: Funds focus to achieve objectives such as: (1) Delivery of essential antiretroviral therapy for HIV infection, medications to prevent and treat common opportunistic infections such as tuberculosis, supportive care for orphans and vulnerable children, and other critical services. (2) Training and technical assistance to build and strengthen care programs and health systems, so that affected countries can maintain programs over time and deliver quality HIV/AIDS care; build infrastructures such as clinic monitoring, health information systems, and medical and nursing education. (3) Enhance models of medical, nursing and midwifery education. (4) Develop partnerships—between experts in the U.S. and people and institutions overseas—to build skills and prepare host countries so that they may better manage their own programs over the long term.

Health Professions Student Loans, Including Primary Care Loans/Loans for Disadvantaged Students

- **Purpose:** To increase educational opportunities by providing long-term, low-interest loans to students in need of financial assistance and in pursuit of a course of study in an approved health discipline.
- **Types of Projects:** Funds on deposit can only be used for loans to eligible students pursuing a full-time course of study.

Nurse Corps Scholarship Program

- **Purpose:** To increase the supply of registered nurses (RN) and nurse practitioners (NPs) in approved health care facilities with a critical shortage of nurses by providing service-obligated scholarships to nursing students.
- **Types of Projects:** Service-obligated scholarships are awarded to full-time and part-time students of nursing. Scholarships pay tuition and required fees to the school, a monthly stipend to students and a single annual payment to the student to assist with other reasonable educational expenses that include books, supplies, instruments, and uniforms. The program requires 1 year of service for each year of scholarship support, with a minimum 2-year service commitment.

Nurse Corps Loan Repayment Program

- **Purpose:** To assist in the recruitment and retention of professional registered nurses (RN) in: 1) approved critical shortage areas to increase access to quality health care by offering loan repayment in return for full-time service at an eligible health care facility with a critical shortage of nurses; and 2) accredited, eligible schools of nursing for RNs dedicated to serving as full-time faculty members.
- **Types of Projects:** The program offers RNs substantial economic assistance to repay their qualifying educational loans in exchange for full-time service at a health care facility with a critical shortage of nurses.

Nursing Student Loans

- **Purpose:** To increase educational opportunities by providing long-term, low-interest loans to students in need of financial assistance and in pursuit of a course of study in an approved nursing program.
- **Types of Projects:** Loans will be made to full and half-time nursing students enrolled after June 30, 2000 who are citizens, nationals, lawful permanent residents of the United States, the District of Columbia, the Commonwealths of Puerto Rico, the Mariana Islands, the Virgin Islands, Guam, the American Samoa, the Trust Territory of the Pacific Islands, the Republic of Palau, the Republic of the Marshall Islands, and the Federated States of Micronesia. Funds are made to schools of nursing to capitalize loan.

National Institutes of Health

National Institutes of Health (NIH) offers numerous grants for research in numerous areas of human health. These extremely specific grants are categorized by a broader area of research of which the specific grants contribute to advancing. The Catalog of Federal Domestic Assistance (CFDA) focuses on providing a catalog entry for the broader area of research, rather than the more specific. In order to find grants pertaining to a very particular area of research, following the link provided on the CFDA entry of the general research area will bring up a website of that research area. A link provided at the top or left side of these websites that will likely be listed as “grants”, “funding”, or something similar will bring up lists of grants supporting very specific areas of research.

The grants listed on these pages will be one of 8 grant types:

(1) Research project grants - provide support for clearly defined projects or a small group of related research activities, and when appropriate, support of research conferences.

(2) Program project and center grants - support large-scale, broad-based programs of research, usually interdisciplinary, consisting of several projects with a common focus.

(3) Exploratory/development and clinical exploratory/developmental grants - encourage the development of new research activities in categorical program areas.

(4) Cooperative agreements - support single or a group of related research activities with significant involvement of federal staff.

(5) Small grants - support newer, less experienced investigators; investigators at institutions without a well-developed research tradition and resources; the testing of new methods or techniques; small-scale exploratory and pilot studies, or exploration of an unusual research opportunity; small grants provide research support of up to \$50,000 direct costs per year for a period of up to 2 years.

(6) Research training grants including fellowships and institutional training grants, career development grants and loan repayment contracts.

(7) SBIR Phase I grants (of approximately 6-months' duration) - establish the technical merit and feasibility of proposed research or research and development efforts to determine the quality of performance of the small business grantees. Phase II grant then continue the research initiated in Phase I and that are likely to result in commercially viable products or processes. Only Phase I awardees are eligible to apply for Phase II support;

(8) STTR Phase I grants (normally of 1-year duration) - determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application and the quality of performance of the small business concerns. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of the Phase II application.

Family Smoking Prevention and Tobacco Control Act Regulatory Research

- **Purpose:** The Family Smoking Prevention and Tobacco Control Act (TCA) provides the authority to regulate tobacco product manufacturing, distribution and marketing. Regulatory research will provide the scientific evidence to guide the implementation of this authority.
- **Types of Projects:** This regulatory research will help understand tobacco and its ingredients and constituents, tobacco addiction, tobacco marketing and labeling, and childhood tobacco use. Research areas include (1) understanding the diversity of tobacco products, (2) reducing addiction to tobacco products, (3) reducing toxicity and carcinogenicity of tobacco products and smoke, (4) understanding the adverse health consequences of tobacco use, (5) understanding communications about tobacco products, (6) understanding tobacco product marketing, and (7) understanding how economics and policies affect tobacco product use.

Environmental Health

- **Purpose:** To foster understanding of human health effects of exposure to environmental agents in the hope that these studies will lead to: the identification of agents that pose a hazard and threat of disease, disorders and defects in humans; the development of effective public health or disease prevention strategies; the overall improvement of human health effects due to environmental agents; the development of products and technologies designed to better study or ameliorate the effects of environmental agents; and the successful training of research scientists in all areas of environmental health research.
- **Types of Projects:** Supported grant programs focus on the following areas: (1) Understanding biological responses to environmental agents by determining how chemical and physical agents cause pathological changes in molecules, cells, tissues, and organs, and become manifested as respiratory disease, neurological, behavioral and developmental abnormalities, cancer, and other disorders; (2) Determining the mechanisms of toxicity of ubiquitous agents like metals, natural and synthetic chemicals, pesticides, and materials such as nanoparticles, and natural toxic substances, and their effects of on various human organ systems, on metabolism, on the endocrine and immune systems, and on other biological functions; (3) Developing and integrating scientific knowledge about potentially toxic and hazardous chemicals by concentrating on toxicological research, testing, test development, validation and risk estimation; (4) Identifying interactions between environmental stressors and genetic susceptibility and understanding biologic mechanisms underlying these interactions, including the study of environmental influences on epigenomics and transcriptional regulation; (5) Conducting environmental public health research, including in areas of environmental justice and health disparities, that requires communities as active participants in all stages of research; (6) Expanding and improving the SBIR program; to increase private sector commercialization of innovations derived from Federal research and development; to increase small business participation in Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation; (7) Expanding and improving the STTR program to stimulate and foster scientific and technological innovation through cooperative research and development carried out between small business concerns and research institutions; to foster technology transfer between small business concerns and research institutions; to increase private sector commercialization of innovations derived from Federal research and development; and to foster and encourage participation of socially and economically disadvantaged small business concerns and women-owned small business concerns in technological innovation; (8) Providing support for broadly based

multi-disciplinary research and training programs in environmental health. These programs include the Environmental Health Sciences Core Centers, which serve as national focal points and resources for research and manpower development. The Centers for Neurodegenerative Science addresses the need for integrated research efforts involving basic and clinical scientists in a quest to discover the causes of and possible treatments for neurodegenerative diseases. The Breast Cancer and the Environment Research Program (co-funded with NCI) studies the impact of prenatal-to-adult environmental exposures that may predispose a woman to breast cancer. A special emphasis is on the impact of environmental factors on a girl's pubertal development, a known risk factor for breast cancer. Through these programs, NIEHS expects to achieve the long range goal of developing new clinical and public health applications to improve disease prevention, diagnosis, and therapy. Additional Centers programs developed in recent years, include the Centers for Oceans and Human Health (co-funded with NSF), Children's Environmental Health Centers (co-funded with US EPA) and the Autism Centers of Excellence (co-funded with other NIH Institutes) and the ; (9) Supporting research training programs which serve to increase the pool of trained research manpower with needed expertise in the Environmental Health Sciences through support of Individual and Institutional National Research Service Awards (NRSAs); (10) The Outstanding New Environmental Scientist Program which provides first time research grant funding to outstanding junior scientists in the formative stages of their career who are proposing to make a long term commitment to environmental health sciences research and to address the adverse effects on environmental exposures on human biology, human pathophysiology and human disease.

Oral Diseases and Disorders Research

- **Purpose:** To improve oral, dental and craniofacial health through research, research training, and the dissemination of health information.
- **Types of Projects:** The Developmental Biology and Genetics Program supports research on etiology, pathogenesis, epidemiology, prevention, diagnosis, and treatment of inherited craniofacial-oral-dental diseases and disorders (e.g., ectodermal dysplasia, cleft lip and palate, amelogenesis imperfecta, dentinogenesis imperfecta, osteogenesis

imperfecta, and other inherited diseases that have craniofacial-oral-dental manifestations) as well as on normal craniofacial-oral-dental development, and genome-wide association studies. 2. The Translational Genetics and Genomics program supports genetic/genomic research using epidemiologic and family-based methods, gene discovery using high throughput technologies, and gene-environment interactions. 3. The Microbiology Program supports basic and translational research on the role of oral microbes in health and disease including the etiology, pathogenesis, diagnosis, treatment, and prevention of oral infectious diseases. Areas of interest include biofilms and microbial ecology, microbial genomics and metagenomics, microbial virulence and disease pathogenesis, prevention and treatment. 4. The AIDS and Immunosuppression Program supports basic, translational and clinical research on HIV infection and AIDS to advance understanding of the underlying molecular, cellular, and genetic mechanisms that enable or prevent HIV infection and development of oral complications associated with AIDS and AIDS malignancies. 5. The Immunology and Immunotherapy Program supports basic and translational research on the immune aspects of oral diseases such as caries and periodontal diseases, including host responses to microbes, immunology of biofilms, oral inflammation, systemic diseases, immunotherapy, immunopathologies, and host susceptibility to infection. 6. The Epithelial Cell Regulation and Transformation Program supports basic and translational research on the molecular mechanisms of oral epithelial cell regulation as they relate to the development and progression of diseases of the oral mucosa, including head and neck cancer. The program also supports and encourages the application of genomic, proteomic, and imaging technologies through research on the early diagnosis, prevention, and treatment of head and neck cancers. 7. The Mineralized Tissue and Salivary Gland Physiology Program supports basic and translational research on craniofacial skeletal biology and pathobiology including the physiology of tooth, bone and cartilage, and associated disorders and diseases, saliva and salivary glands, and pharmacogenetics. The goal of the program is to promote interdisciplinary and multidisciplinary approaches to advance the understanding of normal and abnormal processes underlying oral, dental and craniofacial diseases and disorders. 8. The Molecular and Cellular Neuroscience Program supports basic and translational research on orofacial pain and neuropathies, temporomandibular joint and muscle disorders, development of biomarkers for diagnostics and prognostics and development of therapeutics. 9. The Tissue Engineering and Dental and Craniofacial Regenerative Medicine Program supports basic and translational research on the reconstruction, remodeling and repair of the oral and craniofacial tissues damaged as a result of disease or injury. The goal is to promote interdisciplinary and multidisciplinary approaches to engineering of biocompatible oral and craniofacial tissue constructs and their functional integration into the host tissue microenvironment. The program also supports efforts that employ bioengineering approaches for restoration, remodeling and regeneration of diseased and injured native host tissues. 10. The Dental and Biomaterials Program supports

basic and translational extramural research on dental materials and devices, dental implants, biocompatibility of dental restorative materials, and biomaterials for craniofacial reconstruction. 11. The Behavioral and Social Sciences Research Program supports basic and applied research to promote oral health, to prevent oral diseases and related disabilities, and to improve management of craniofacial conditions, disorders and injury. 12. The Center for Clinical Research supports clinical trials, dental practice based research networks, epidemiology research, and health disparities research.

Intramural Research Training Award

- **Purpose:** The National Institutes of Health (NIH) IRTA Traineeships are established for the principal benefit of the participants and to provide opportunities for developmental training and practical research experience in a variety of disciplines related to biomedical research, medical library research and related fields.
- **Types of Projects:** The IRTA components are: 1) technical IRTA - designed to produce a cadre of highly trained research support professionals capable of performing the latest advanced techniques in a laboratory by developing the trainees' skills in the conduct of basic and applied research; 2) student IRTA - designed to provide a developmental training experience to promising high school and undergraduate and graduate students who have expressed a strong interest in or are studying disciplines related to biomedical sciences. 3) post baccalaureate IRTA - designed to provide recent college graduates, particularly minorities, women, and persons with disabilities, an opportunity to postpone application to graduate or medical school and to provide a means to introduce individuals early in their careers to the research field, encourage their pursuit of professional careers in biomedical research, and allow additional time to pursue successful application to either graduate or medical school programs; 4) Predoctoral IRTA - is designed to provide practical research training and experience to students, by supplementing academic course work and/or encouraging pursuit of professional careers in biomedical research to students enrolled in doctoral degree programs in biomedical sciences; and 5) Postdoctoral IRTA - is designed to provide

advanced practical research experience to physicians and other doctoral researchers who are at the beginning stages of their professional research careers.

NIEHS Superfund Hazardous Substances: Basic Research and Education

- **Purpose:** To establish a unique program linking biomedical research with engineering, geoscience and ecological research. The goals of the Program are to establish and support an innovative program of basic research and training consisting of multi-project, interdisciplinary efforts and individual investigator projects.

- **Types of Projects:** Research grants are intended to support the direct costs of a project, in accordance with an approved budget, plus an appropriate amount for indirect costs. Areas of research may include: (1) methods and technologies to detect hazardous substances in the environment; (2) advance techniques for the detection, assessment, and evaluation of the effects of hazardous substances on humans; (3) methods to assess the risks to human health presented by hazardous substances; and (4) and basic biological, chemical, and physical methods to reduce the amount and toxicity of hazardous substances.

Research Related to Deafness and Communication Disorders

- **Purpose:** To investigate solutions to problems directly relevant to individuals with deafness or disorders of human communication in the areas of hearing, balance, smell, taste, voice, speech, and language.
- **Types of Projects:** The NIDCD supports: (1) Research into the evaluation of techniques and devices used in diagnosis, treatment, rehabilitation, and prevention of disorders of hearing and other communication processes; (2) research into prevention and early detection and diagnosis of hearing loss and speech, voice, and language disorders and research into preventing the effects of such disorders by means of appropriate referral and rehabilitation; (3) research into the detection, treatment, and prevention of disorders of hearing and other communication processes in the elderly population and its rehabilitation to ensure continued effective communication skills; and (4) research to expand knowledge of the effects of environmental agents that influence hearing or other communication processes.

Contraception and Infertility Research Loan Repayment Program

- **Purpose:** The CIR-LRP is designed to provide an incentive for health professionals to work in areas of reproductive research directly related to contraceptive development and/or infertility diagnosis and treatment by providing assistance in repaying educational loans for individuals.
- **Types of Projects:** The CIR-LRP will pay up to \$35,000 of the principal and interest of a participant's educational loans for each year of commitment not to exceed one-half of the remaining loan balance. In addition to the loan repayments, the CIR-LRP will pay participants up to 39 percent of the amount paid to lenders as partial payments on the increased income tax liability caused by the Program's loan repayments. In return for these loan repayments, applicants must agree to commit to a period of obligated service of not less than 2 years conducting research with respect to contraception and/or infertility.

Mental Health Research Grants

- **Purpose:** To support research and research training to understand the biological, psychological, and functional changes that are involved in the causes and course of mental illness.
- **Types of Projects:** Grants may be used to: (1) hasten the translation of science advances into innovations in clinical care; (2) to conduct studies of the risk factors for major psychiatric disorders; (3) to conduct clinical neuroscience studies to elucidate causes and functional effects of these disorders; (4) to conduct research on psychosocial, pharmacological, and somatic treatment development; (5) to support research and research training with the ultimate goal of preventing and curing mental disorders that originate in childhood and adolescence; (6) to conduct research across basic behavioral/psychological processes, environmental processes, brain development, genetics, developmental psychopathology, and therapeutic interventions; and (7) to translate knowledge from basic science to discover the developmental origins of mental disorders and effect their prevention and cure. These funds also look to provide support for research in areas of basic neuroscience, genetics, basic behavioral science, research training, resource development, technology development, drug discovery, and research dissemination, as well as to support studies that will generate relevant basic science knowledge which can then be utilized to improve diagnosis, treatment, and prevention of mental and behavioral disorders.

Discovery and Applied Research for Technological Innovations to Improve Human Health

- **Purpose:** To support hypothesis-, design-, technology-, or device-driven research related to the discovery, design, development, validation, and application of technologies for biomedical imaging and bioengineering.
- **Types of Projects:** Research Grant funds may be used for salaries, consultation, equipment, travel, and other usual costs subject to Federal regulations applicable to the grant. Individual National Research Service Awards (NRSAs) are made directly to individuals for research training in specified areas related to the mission of the National Institute of Biomedical Imaging and Bioengineering (NIBIB). Institutional NRSAs may be made to institutions to enable them to accept individuals for research training. Phase I grants are to determine the scientific, technical, and commercial merit and feasibility of the proposed cooperative effort that has potential for commercial application. Phase II funding is based on results of research initiated in Phase I and scientific and technical merit and commercial potential of the Phase II application.

Nursing Research

- **Purpose:** The National Institute of Nursing Research (NINR) supports clinical and basic research to develop the scientific foundation for clinical practice, prevent disease and disability, manage and eliminate symptoms, enhance palliative and end-of-life care, improve innovation, and train the next generation of scientists. In doing so, the Institute's scientific focus bridges multiple disciplines; uniting the biological and behavioral sciences to foster and improve the health of individuals, families, and communities across diverse populations and the lifespan in a variety of clinical settings.

- **Types of Projects:** NINR research seeks to advance the science of health by (a) enhancing health promotion and disease prevention in diverse groups through culturally-appropriate interventions designed to encourage health equity and eliminate health disparities; (b) engaging individuals as active participants in their own health and improving symptom management in those with acute and chronic illness; (c) improving quality of life for patients with advanced illness through evidence-based palliative and end-of-life care; (d) developing new technologies and innovative programs to improve health and reduce healthcare costs; and, (e) preparing the next generation of nurse scientists and clinicians to address current and future health challenges and contribute to an innovative, multidisciplinary, and diverse scientific workforce.

Cancer Cause and Prevention Research

- **Purpose:** To identify cancer risks and risk reduction strategies, to identify factors that cause cancer in man, and to discover and develop mechanisms for cancer prevention in man.
- **Types of Projects:** Research programs include: (1) epidemiology; (2) chemical, physical and molecular carcinogenesis; (3) early detection biomarkers; (4) nutrition and bioactive food components; (5) immunology and vaccines; (6) field studies and statistics; (7) chemoprevention; (8) agent development; and (9) organ site studies. The grants and cooperative agreements may be used for personnel, consultant costs, equipment, supplies, travel, patient costs, animals, alterations and renovations, miscellaneous items, and indirect costs.

Cancer Detection and Diagnosis Research

- **Purpose:** To improve screening and early detection strategies and to develop accurate diagnostic techniques and methods for predicting the course of disease in cancer patients.
- **Types of Projects:** Screening and Early Detection research includes development of strategies to decrease cancer mortality by finding tumors early when they are more amenable to treatment. Diagnosis research focuses on methods to determine the presence of a specific type of cancer; to predict its course and response to therapy, both a particular therapy or a class of agents; and to monitor the effect of the therapy and the appearance of disease recurrence. The grants and cooperative agreements may be used for personnel, consultant's costs, equipment, supplies, travel, patient costs, animals, alterations and renovations, miscellaneous items, and indirect costs.

Cancer Biology Research

- **Purpose:** To provide fundamental information on the cause and nature of cancer in people, with the expectation that this will result in better methods of prevention, detection and diagnosis, and treatment of neoplastic diseases.
- **Types of Projects:** Cancer Biology Research includes the following research programs: cancer cell biology, cancer etiology, structural biology and molecular applications, DNA and chromosomal aberrations, tumor biology and metastasis, and immunology and hematology. The grants and cooperative agreements may be used for personnel, consultant costs, equipment, supplies, travel, patient costs, animals, alterations and renovations, miscellaneous items, and Facilities and Administrative Costs (indirect costs).

Cancer Centers Support Grants

- **Purpose:** To provide an organizational focus and stimulus for the highest quality cancer research that effectively promotes interdisciplinary cancer research aimed toward the ultimate goal of reducing cancer incidence, mortality and morbidity.
- **Types of Projects:** The Cancer Center Support Grant (CCSG) provides the resources and infrastructure to facilitate the coordination of interdisciplinary programs across a broad spectrum of research from basic laboratory research to clinical investigation to population science. The CCSG supports salaries for scientific leadership of the Center, shared resources for funded center investigators, certain administrative costs, planning and evaluation, and developmental funds for new recruitments and feasibility studies.

Cancer Control

- **Purpose:** To reduce cancer risk, incidence, morbidity, and mortality and enhance quality of life in cancer survivors through an orderly sequence from research on interventions and their impact in defined populations to the broad, systematic application of the research results through dissemination and diffusion strategies. Primary emphasis is on the inclusion of cancer prevention and control intervention(s) in any proposed study.

- **Types of Projects:** Primary interests are in research on cancer control interventions in Phases 2 through 5, and on cancer prevention research in all phases. Cancer Prevention and Control programs include those in the following areas: (1) chemoprevention; (2) cancer communications; (3) nutrition, diet, and physical activity; (4) screening and early detection, including biomarker discovery, development and validation; (5) biobehavioral mechanisms; (6) tobacco control; (7) health disparities research; (8) supportive care and survivorship; (9) health services and outcomes research; and (10) surveillance research. The grants and cooperative agreements may be used for personnel, consultant costs, equipment, supplies, travel, patient costs, animals, alterations and renovations, miscellaneous items, and indirect costs.

Blood Diseases and Resources Research

- **Purpose:** To foster research and research training on the pathophysiology, diagnosis, treatment, and prevention of non-malignant blood diseases, including anemias, sickle cell disease, thalassemia; leukocyte biology, pre-malignant processes such as myelodysplasia and myeloproliferative disorders; hemophilia and other abnormalities of hemostasis and thrombosis; and immune dysfunction.
- **Types of Projects:** Funding encompasses a broad spectrum of hematologic inquiry, ranging from stem cell biology to medical management of blood diseases and to assuring the adequacy and safety of the nation's blood supply. Programs also support the development of novel cell-based therapies to bring the expertise of transfusion medicine and stem cell technology to the repair and regeneration of human tissues and organs. Grants may support stipends, research expenses, supplies, travel, and research training tuition as required to perform the research effort.

Arthritis, Musculoskeletal and Skin Diseases Research

- **Purpose:** To support research relevant to arthritis, musculoskeletal and skin diseases, the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS) supports research training and basic and clinical investigations including epidemiology and clinical trials in the areas of skin and rheumatic diseases and musculoskeletal diseases.
- **Types of Projects:** The Division of Skin and Rheumatic Diseases promotes and supports basic, epidemiological, and clinical studies of skin and rheumatic and related diseases. Studies range from determining the underlying basis and mechanisms of disease (including large genetic studies), to translational and clinical research aimed at the diagnosis, treatment, prediction, and/or prevention of disease. The skin program supports research in normal and diseased skin including keratinocyte biology and wound healing, and disorders such as psoriasis, atopic dermatitis and other chronic inflammatory skin disorders; the vesiculobullous diseases such as pemphigus, bullous pemphigoid, and epidermolysis bullosa; acne, alopecia areata, vitiligo, and skin neoplasia. The rheumatic disease program supports research in the systemic autoimmune diseases and arthritides, including systemic lupus erythematosus (SLE), systemic scleroderma, autoimmune myositis, rheumatoid arthritis, juvenile idiopathic arthritis, spondyloarthropathies, vasculitis, gout, Sjogren's syndrome, and fibromyalgia syndrome. In addition, the Division supports studies on the extracellular matrix, including research on Marfan syndrome, keloid formation, and pseudoxanthoma elasticum.
- The Division also supports biopsychosocial research related to rheumatic, musculoskeletal, or skin diseases. Topics include behavioral interventions, pain mechanisms, neuroendocrine and neuroimmune mechanisms, behavioral and social research, and epidemiology. The Division of Musculoskeletal Diseases supports studies of the skeleton and associated connective tissues. Broad areas of interest include skeletal development, metabolism, mechanical properties, and responses to injury. Among these diseases and skeletal disorders are osteoporosis; osteogenesis imperfecta; Paget's disease of bone; vitamin D refractory diseases; and rickets and osteochondrodysplasias.
- Other areas of interest include treatment of acute and chronic injuries, including carpal tunnel syndrome, repetitive stress injury, low back pain and clinical and epidemiological studies of osteoarthritis. In addition, bioengineering, sports medicine and musculoskeletal fitness are areas of special research emphasis.

Extramural Research Programs in the Neurosciences and Neurological Disorders

- **Purpose:** To support extramural research funded by the National Institute of Neurological Disorders and Stroke (NINDS) including: basic research that explores the fundamental structure and function of the brain and the nervous system; research to understand the causes and origins of pathological conditions of the nervous system with the goal of preventing these disorders; research on the natural course of neurological disorders; research on mechanisms associated with stroke and other cerebrovascular disorders, effects of trauma to the nervous system, neuroplasticity and regeneration, and tumors of neural tissues; improved methods of disease prevention;

new methods of diagnosis and treatment; clinical trials; drug development; development of neural prostheses for stroke and paraplegia; epidemiological research; and research training in clinical neuroscience.

- **Types of Projects:** The Institute supports research on topics including but not limited to stroke; traumatic injury to the brain, spinal cord and peripheral nervous system; neurodegenerative disorders; brain tumors; development of artificial prosthetic devices to restore function to the damaged nervous system; convulsive disorders; infectious disorders of the brain and nervous system; immune disorders of the brain and nervous system, including multiple sclerosis; disorders related to sleep; and pain. Programmatic areas also include neurodevelopment, repair and plasticity, channels synapses and circuits, neurogenetics, neurodegeneration, neural environment, and systems and cognitive neuroscience. Research grants may be used to provide salaries, equipment, supplies, travel and other expenses for research. The grantee institution is obliged to expend grant funds prudently for the purposes stated in the application and award document.

Biomedical Research and Research Training

- **Purpose:** The National Institute of General Medical Sciences (NIGMS) supports basic research that increases understanding of biological processes and lays the foundation for advances in disease diagnosis, treatment and prevention.
- **Types of Projects:** NIGMS-funded scientists investigate how living systems work at a range of levels, from molecules and cells to tissues, whole organisms and populations. The Institute also supports research in certain clinical areas, primarily those that affect

multiple organ systems. To assure the vitality and continued productivity of the research enterprise, NIGMS provides leadership in training the next generation of scientists, in enhancing the diversity of the scientific workforce, and in developing research capacities throughout the country. NIGMS is organized into divisions that support research and research training in a range of scientific fields: Division of Biomedical Technology, Bioinformatics, and Computational Biology; Division of Cell Biology and Biophysics; Division of Genetics and Developmental Biology, Division of Pharmacology, Physiology, and Biological Chemistry; and Division of Training, Workforce Development, and Diversity.

Child Health and Human Development Extramural Research

- **Purpose:** To ensure that every person is born healthy and wanted, that women suffer no harmful effects from reproductive processes, and that all children have the chance to achieve their full potential for healthy and productive lives, free from disease or disability, and to ensure the health, productivity, independence, and well-being of all people through optimal rehabilitation.
- **Types of Projects:** Laboratory research, clinical trials, and studies that examine growth and development, biologic and reproductive functions, behavior patterns, and population dynamics to protect and maintain the health of all people and discover the impact of disabilities, diseases, and defects on the lives of individuals. With this information, the NICHD hopes to restore, increase, and maximize the capabilities of people affected by disease and injury. NICHD also sponsors training programs for scientists, doctors, and researchers to ensure that research can continue.

Aging Research

- **Purpose:** To encourage biomedical, social, and behavioral research and research training directed toward greater understanding of the aging process and the diseases, special problems, and needs of people as they age.
- **Types of Projects:** The National Institute on Aging has established programs to pursue these goals that actively pursue relevant research. The Division of Aging Biology emphasizes understanding the basic biological processes of aging. The Division of Geriatrics and Clinical Gerontology support research to improve the abilities of health care practitioners to respond to the diseases and other clinical problems of older people. The Division of Behavioral and Social Research supports research that will lead to greater understanding of the social, cultural, economic and psychological factors that affect both the process of growing old and the place of older people in society. Lastly, the Division of Neuroscience fosters research concerned with the age-related changes in the nervous system as well as the related sensory, perceptual, and cognitive processes associated with aging and has a special emphasis on Alzheimer's disease.

Medical Library Assistance

- **Purpose:** To meet a growing need for investigators trained in biomedical informatics research and data science by training qualified pre- and post-doctoral candidates; to conduct research in biomedical informatics, bioinformatics and related computer and information sciences; to facilitate management of electronic health records and clinical research data; to prepare scholarly works in biomedicine and health; to advance biocomputing and bioinformatics through participation in Federal initiatives relating to biomedical informatics, bioinformatics and biomedical computing; to stimulate and foster scientific and technological innovation through cooperative research development carried out between small business concerns and research institutions, through Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) grants.
- **Types of Projects:** Research Grants are available for fundamental and applied research in biomedical informatics and bioinformatics. Areas of research interest include: representation, organization and retrieval of biomedical and biological knowledge, data and images; enhancement of human intellectual capacities through virtual reality, dynamic modeling, artificial intelligence, and machine learning; medical decision-making; linguistic analyses for natural language processing and understanding; informatics topics relevant to public health, consumer information and disaster information management.

Housing: U.S. Department of Housing & Urban Development and U.S. Department of Agriculture, Rural Development

U.S. Department of the Interior, Office of Native Hawaiian Relations and ***The Council for Native Hawaiian Advancement***

The Council for Native Hawaiian

Advancement (CNHA) is a statewide and national network of over 160 Native Hawaiian Organizations with a mission to enhance the cultural, political and community development of Native Hawaiians. In 2010, CNHA was certified as a Native Community Development Financial Institution (CDFI) by the U.S. Treasury. Their capital deployment targets underserved Hawaiian Homes Commission Act beneficiary homestead communities with energy efficiency improvements, housing and interim construction, and micro-enterprise loans. CNHA currently manages a loan portfolio of \$1.5 million with an impressive 4% delinquency ratio.

CNHA is also a HUD-certified housing counseling agency administering the Hawaii Family Finance Program that has served nearly 2500 families in the last three years. The program supported 337 new homeowners and prepared an additional 633 with mortgage loan pre-approvals. CNHA also leads an Individualized Development Account Program known as the Hawaii Individual Development Account (HIDA) Program that has supported 547 participants who saved a total of \$708,930. All savings accounts are used for down payment and closing costs for first time home purchases.

The Council for Native Hawaiian Advancement has included within their *kuleana* (responsibility) the maintaining this section of the guide.

Office of Community Planning and Developments

Self-Help Homeownership Opportunity Program

- **Purpose:** To facilitate and encourage innovative homeownership opportunities through the provision of self-help homeownership in which the homebuyer contributes a significant amount of sweat equity toward the development of the SHOP units.
- **Types of Projects:** Eligible expenses for program funds are land acquisition and infrastructure improvements. Additionally, up to 20 percent of the grant amount may be used for related planning, administrative and management costs.
- **Key Contact:**
 - o Name: Martha Murray

Capacity Building for Sustainable Communities

- **Purpose:** The Capacity Building for Sustainable Communities Program identifies consortia comprised of intermediary organizations that can provide capacity building support for communities engaged in planning efforts that support community involvement and integrate economic and workforce development, housing, land use, land cleanup and preparation for reuse, transportation, and infrastructure investments.
- **Types of Projects:** Eligible activities promote the overall capacity building outcomes of the Partnership for Sustainable Communities including, but not limited to, the following:
 - o a. Building the technical skills of Sustainable Communities Grantees to achieve their program objectives.
 - o b. Documenting model sustainability policies, codes, and standards for broad dissemination.

- c. Providing selected case management as designated by HUD.
 - d. Distributing models for governance and engagement.
 - e. Enabling peer exchange.
 - f. Facilitating conference and convening opportunities.
 - g. Developing appropriate monitoring and evaluation tools. Funds use is subject to statutory constraints. All awards are subject to the funding restrictions described in detail in Section IV, Subpart E of the General Section of the NOFA.

Supportive Housing Program

- **Purpose:** The Supportive Housing Program is designed to promote the development of supportive housing and supportive services to assist homeless individuals and families in the transition from homelessness and to enable them to live as independently as possible. Program funds may be used to provide: (i) transitional housing within a 24-month period as well as up to six months of follow-up services to former residents to assist their adjustment to independent living; (ii) permanent housing provided in conjunction with appropriate supportive services designed to maximize the ability of persons with disabilities to live as independently as possible; (iii) supportive housing that is, or is part of, a particularly innovative project for, or alternative method of, meeting the immediate and long-term needs of homeless individuals and families; (iv) supportive services for homeless individuals not provided in conjunction with supportive housing, (v) safe havens for homeless individuals with serious mental illness currently residing on the streets who may not yet be ready for supportive services; and (vi) Homeless Management Information Systems (HMIS) for developing management information systems to maintain data on beds, units and homeless individuals.

- **Types of Projects:** Eight types of assistance may be provided for Supportive Housing: acquisition of structures for use as supportive housing or in providing supportive services; rehabilitation of structures for use as supportive housing or in providing supportive services; new construction of buildings for use as supportive housing under limited circumstances; leasing of structures for use as supportive housing or in providing supportive services; operating costs of supportive housing; costs of providing supportive services to homeless persons; costs of implementing and operating HMIS; and administrative costs not to exceed five percent of the SHP grant.

Pay for Success Permanent Supportive Housing Demonstration

- **Purpose:** The purpose of the Department of Justice's (DOJ's) and Department of Housing and Urban Development's (HUD's) PFS Demonstration is to strengthen communities' ability to prevent and end homelessness and reduce avoidable incarceration by increasing the provision of Permanent Supportive Housing (PSH), a proven evidenced-based practice.
- **Types of Projects:** Funding seeks to equip communities with a new financing mechanism for funding PSH projects that will prevent returns to homelessness and reduce recidivism among the reentry population. The PFS Demonstration is also a valuable opportunity to test ways of achieving greater cost efficiency effectiveness in providing homelessness assistance while expanding communities' access to available funding for PSH.

Assisted Living Conversion for Eligible Multifamily Housing Projects

- **Purpose:** To preserve the current elderly housing stock by converting units with a grant into Assisted Living Facilities (ALFs) or Service-Enriched Housing (SEH) for the frail elderly aging in place, as defined in Section 232(B)(6) of the National Housing Act and 202(k). The program is expected to promote aging in place and prevent premature institutionalization of the target population.
- **Types of Projects:** Typical funding will cover basic physical conversion of existing project units, as well as related common and services space. The ALCP provides funding for the physical costs of converting some or all of the units of an eligible development into an ALF or SEH, including unit configuration, common and services space and any

necessary remodeling, consistent with HUD or the State's statute/regulations (whichever is more stringent). There must be sufficient community space to accommodate a central kitchen or dining facility, lounges, recreation and other multiple-areas available to all residents of the project, or office/staff spaces in the ALF or SEH.

Performance Based Contract Administrator Program

- **Purpose:** The purpose of HUD's PBCA program is to implement the policy of the United States, as established in section 2 of the 1937 Act, of assisting States and their political subdivisions (e.g., PHAs) for aiding lower income families in obtaining a decent place to live and of promoting economically mixed housing, assistance payments may be made with respect to existing housing in accordance with the provisions of the above reference section.
- **Types of Projects:** HUD is authorized to enter into an annual assistance contract (ACC) with a PHA for the administration of Section 8 housing assistance payment (HAP) contracts through the Performance-Based Contract Administrator (PBCA) program. Under the ACC, the PHA will provide ongoing contract administration services for units receiving project-based Section 8 housing assistance.

Office of Public and Indian Housing

Choice Neighborhoods Implementation Grants

- **Purpose:** Choice Neighborhoods Implementation Grants will employ a comprehensive approach to community development centered on housing transformation. The program aims to transform neighborhoods of poverty into viable mixed-income neighborhoods with access to economic activities by revitalizing severely distressed public and assisted housing and investing and leveraging investments in well-functioning services, effective schools, and education programs, public assets, public transportation, and improved access to jobs.
- **Types of Projects:** Choice Neighborhoods will fund competitive grants to transform neighborhoods of extreme poverty into sustainable mixed-income neighborhoods with well-functioning services, schools, public assets, transportation and access to jobs.

Jobs-Plus Pilot Initiative

- **Purpose:** Jobs Plus Pilot is a locally designed program implemented in a collaboration among local housing authorities, residents of public housing developments, local welfare agencies, local workforce development agencies, and other relevant partners. It is aimed at significantly increasing employment and income of public housing residents. The program provides intensive, employment-focused programs targeting every able-bodied, working-age welfare recipient at a public housing development. The place-based Jobs Plus Pilot program addresses entrenched poverty among public housing residents by saturating developments with job and career support, community building, and rent-based work incentives. This program helps residents of public housing increase their earnings through on-site employment-related services, financial incentives, and community support for work.

- **Types of Projects:** Grant funds may be used to pay the cost of implementing Jobs Plus start-up, planning, and programming activities (employment and incentives); and the salary and fringe benefits of program staff.

Rural Housing Site Loans

- **Purpose:** Rural Housing Site Loans are made to provide financing for the purchase and development of housing sites for low- and moderate-income families. Section 523 loans are made to acquire and develop sites only for housing to be constructed by the self-help method. Section 524 loans are made to acquire and develop sites for any low- or moderate-income family. Low income is defined as between 50 and 80 percent of the area median income (AMI); the upper limit for moderate income is \$5,500 above the low-income limit.

- **Types of Projects:** Section 523 loans are limited to private or public nonprofit organizations that will provide sites solely for self-help housing. Section 524 loans are made to private or public nonprofit organizations. Section 524 sites may be sold to low- or moderate-income families utilizing HCFP or any other mortgage financing program which serves the same eligible families.

Education: U.S. Department of Education and The National Science Foundation

U.S. Department of the Interior, Office of Native Hawaiian Relations and

The Native Hawaiian Education Council

The Native Hawaiian Education Council (NHEC) was established in 1988 under the Native Hawaiian Education Act, the statutory responsibilities of the NHEC are to coordinate, assess, report and make recommendations on the effectiveness of existing education programs for Native Hawaiians, the state of present Native Hawaiian education efforts, and improvements that may be made to existing programs, policies and procedures to improve the educational attainment of Native Hawaiians. The NHEC is made up of not more than 21 members--10 consumers, 10 providers and a representative from the Office of Hawaiian Affairs. To ensure adequate representation of island communities, the law established seven island councils for the following islands: Hawai`i, Maui, Lana`i, Moloka`i, Oahu, Kauai and Ni`ihau. Island Councils are made up of parents, students and other community stakeholders. The Native Hawaiian Education Council will maintain this section of the guide.

The Native Hawaiian Education Council's has included within their *kuleana* (responsibility) the maintaining this section of the guide.

Institute of Education Sciences

Education Research, Development and Dissemination

- **Purpose:** The central purpose of the Institute's research grant programs is to provide interested individuals and the general public with reliable and valid information about education practices that support learning and improve academic achievement and access to education opportunities for all students.
- **Types of Projects:** Grants support basic and applied research, development, dissemination, evaluations, and research training in education. Small Business Innovation Research (SBIR) contracts are awarded to qualified small businesses to conduct innovative research and development projects focused on education technology. Funds also support the What Works Clearinghouse, the Education Resources Information Center, the National Library of Education, and a variety of other dissemination and support activities that are supported by contracts.

The Public Service Loan Forgiveness Program

- **Purpose:** The PSLF Program is intended to encourage individuals to enter and continue to work full-time in public service jobs. Under this program, borrowers may qualify for forgiveness of the remaining balance of their Direct Loans after they have made 120 qualifying payments on those loans while employed full time by certain public service employers.
- **Types of Projects:** If you have **FFEL Program** or Perkins Loan Program loans, you may consolidate them into a **Direct Consolidation Loan** to take advantage of PSLF. However, only payments you make on the new Direct Consolidation Loan will count toward the required 120 qualifying payments for PSLF. Payments made on your FFEL Program or Perkins Loan Program loans before you consolidated them, even if they were made under a qualifying repayment plan, do not count as qualifying PSLF payments. In addition, if you made qualifying payments on a Direct Loan and then consolidate it into a Direct Consolidation Loan, you must make 120 qualifying payments on the Direct Consolidation Loan.

Fund for the Improvement of Education

- **Purpose:** To conduct nationally significant programs to improve the quality of education, assist all students to meet challenging State content standards, and contribute to the achievement of elementary and secondary students.
- .
- **Types of Projects:** The types of programs that may be supported include:
 - (1) Activities to promote systemic education reform at the state and local levels. This includes scientifically based research, development, and evaluation designed to improve student academic achievement at the state and local levels as well as strategies for effective parent and community involvement.
 - (2) Recognition programs, such as financial awards, to states, local education agencies (LEAs), and schools that have made the greatest progress in improving the academic achievement of economically disadvantaged students, students from major racial and ethnic minority groups, and of those groups of students farthest away from the proficient level on the academic assessments administered by the state.
 - (3) Scientifically based studies and evaluations of education reform strategies and innovations and the dissemination of information on the effectiveness of those strategies and innovations.

TRIO Upward Bound

- **Purpose:** To generate skills and motivation necessary for success in education beyond high school among low-income and potential first-generation college students and veterans. The goal of the program is to increase the academic performance and motivational levels of eligible enrollees so that such persons may complete secondary school and successfully pursue and complete a postsecondary educational program.
- **Types of Projects:** Projects must provide academic tutoring services, advice on and assistance in selecting secondary and college courses, assistance in preparing for college entrance exams and in completing college applications, information on student financial aid and assistance in completing financial aid applications, services designed to improve financial and economic literacy, and guidance and assistance in re-entering and completing secondary school.

Office of Special Education and Rehabilitative Services

Training Interpreters for Individual who are Deaf and Individuals who are Deaf-Blind

- **Purpose:** To support projects that increase the numbers and improve the skills of manual, oral, and cued speech interpreters providing services to individuals who are deaf and individuals who are deaf-blind.
- **Types of Projects:** Grants are awarded to eligible entities to provide training for manual, tactile, oral and cued speech interpreters. This training may include classroom instruction, workshops, seminars, and field placement.

Rehabilitation Long-Term Training

- **Purpose:** To support projects to provide academic training in areas of personnel shortages identified by the Secretary to increase the number of personnel trained in providing vocational rehabilitation services to individuals with disabilities.
- **Types of Projects:** Training grants are provided in fields directly related to the vocational rehabilitation and independent living of individuals with disabilities, such as rehabilitation counseling, independent living, rehabilitation medicine, physical and occupational therapy, prosthetics-orthotics, speech-language, pathology and audiology, rehabilitation of individuals who are blind and individuals who are deaf, and rehabilitation technology. A grantee must use at least 75 percent of the total award for scholarships.

Rehabilitation Services Demonstration and Training Programs

- **Purpose:** To provide financial assistance to projects and demonstrations for expanding and improving the provision of rehabilitation and other services authorized under the Act or that further the purposes of the Act, including related research and evaluation activities.

- **Types of Projects:** Projects may include demonstrations to increase client choice; technical assistance; systems change; special studies and evaluations; demonstrations of service delivery; model demonstrations; transition services; supportive employment; services to underserved populations and/or unserved or underserved areas; services to low-incidence disabilities; transportation; and other projects designated by the Secretary. Other authorized programs include Parent Information and Training and Braille training projects.

National Science Foundation

Engineering Grants

- **Purpose:** NSF's Directorate for Engineering (ENG) seeks to improve the quality of life and the economic strength of the Nation by fostering innovation, creativity, and excellence in engineering education and research.

- **Types of Projects:** Funds may be used for paying costs to conduct research, such as salaries and wages, equipment and supplies, travel, publication costs, other direct costs, and indirect costs. This promotes projects that (1) invest in the creation of new engineering knowledge and the development of human capital within disciplines and at their interfaces; (2) make critical investments to enable an intelligent, agile and adaptable physical infrastructure for engineering education and research; (3) improve the quality and effectiveness of engineering education and research through the integration of and systemic reform of these processes; and (4) enable knowledge transfer connections among diverse constituencies and communities.

To view NSF's specific funding opportunities for engineering, visit:

Mathematical and Physical Sciences

- **Purpose:** To promote the progress of the mathematical and physical sciences and thereby strengthen the Nation's scientific enterprise; to increase the store of scientific knowledge and enhance understanding of major problems confronting the Nation.
- **Types of Projects:** The program includes support of research project grants in the following disciplines: astronomical sciences, chemistry, materials research, mathematical sciences, physics, as well as support for symposia and conferences. Basic research in multidisciplinary areas related to these disciplines is especially encouraged. Support is also provided for state-of-the-art user facilities in astronomy, physics, and many areas of materials science, science and technology centers, institutes, undergraduate student research, faculty enhancement, curriculum development, instrumentation, laboratory improvement, and for research opportunities for women, minority, and disabled scientists and engineers.

Geosciences

- **Purpose:** To strengthen and enhance the national scientific enterprise through the expansion of fundamental knowledge and increased understanding of the integrated Earth system through the support of basic research in the atmospheric, earth, and ocean sciences, and in the polar regions.
- **Types of Projects:** Grant funds may be used for paying costs necessary to conduct research or studies such as salaries and wages, permanent equipment and supplies, computer services, travel, publication costs, and other direct and indirect costs. This will: (1) promote a better understanding of the physical, chemical, and biological character of the Earth and the processes that govern its evolution (2) increase insight into the world's oceans, their composition, structure, behavior, and tectonics and (3) allow for fundamental discovery regarding and enabled by the polar regions, in all disciplines supported by NSF. Support is also provided for undergraduate student research, graduate and postdoctoral fellowships, facility enhancement, instrumentation, and laboratory equipment, as well as for research opportunities for women, minority, and disabled scientists and engineers.

Biological Sciences

- **Purpose:** To promote the progress of the biological sciences and thereby strengthen the Nation's scientific enterprise; to increase scientific knowledge and enhance understanding of major problems confronting the Nation.
- **Types of Projects:** The program includes support of research project grants in the following disciplines: molecular and cellular biosciences, integrative organismal biology, environmental biology, biological infrastructure, and plant genome research. Support is also provided for the purchase of multi-user scientific equipment and instrument development, and for research workshops, symposia, and conferences. In addition, awards are made to improve the quality of doctoral dissertations in environmental biology and integrative organismal biology, for postdoctoral fellowships in biological informatics, and postdoctoral fellowships to minority scientists in all areas of research supported by the biological sciences. These grant funds may be used for paying costs necessary to conduct research or studies such as salaries and wages, permanent equipment, expendable materials and supplies, travel, publication costs, and other direct and indirect costs.

Social, Behavioral, and Economic Sciences

- **Purpose:** To contribute to the scientific strength and welfare of the Nation through the promotion of basic research and education in the social, behavioral and economic sciences and through monitoring and understanding the resources invested in science and engineering in the United States.
- **Types of Projects:** Supported activities include research and education in the following disciplines: Anthropological and geographic sciences, cognitive, psychological and language sciences, economics, decision risk and management sciences, sociology, political sciences, innovation and organizational change, measurement methods and statistics, law and social science, and science and society. Other SBE grants build infrastructure and develop methods, support science and technology centers including climate change and science of learning centers, and fund research workshops, symposia, and conferences. Educational activities include awards to improve the quality of doctoral dissertations in the behavioral and social sciences, grants for graduate traineeships and postdoctoral fellowships, and grants to promote K-12 education in the SBE sciences. Support is also provided for junior faculty and mid-career development opportunities, undergraduate student research, and for research opportunities for women, minorities, and the differentially abled.

Trans-NSF Recovery Act Research Support

- **Purpose:** To provide support for projects/initiatives funded under The American Recovery and Reinvestment Act of 2009 (ARRA). These projects will provide economic stimulus to the nation while furthering the NSF mission to promote the progress of science and to advance the national health, prosperity, and welfare by supporting research and education in all fields of science and engineering.
- **Types of Projects:** The projects/initiatives include support of research grants in the following disciplines: biological sciences, computer and information science and engineering, engineering, geosciences, math and physical sciences, social, behavioral and economic sciences, and education and human resources. Basic research in multidisciplinary areas related to these disciplines is especially encouraged. Support is also provided for state-of-the-art user facilities in the above disciplines, undergraduate student research, faculty enhancement, curriculum development, instrumentation, laboratory improvement, as well as support for research opportunities for women, minority, and disabled scientists and engineers.

Labor

U.S. Department of Labor

Employment Training Administration

Senior Community Service Employment Program

- **Purpose:** To foster individual economic self-sufficiency; provide training in meaningful part-time opportunities in community service activities for unemployed low-income persons who are age 55 years of age or older, particularly persons who have poor employment prospects; and to increase the number of older persons who may enjoy the benefits of unsubsidized employment in both the public and private sectors.
- **Types of Projects:** SCSEP participants gain work experience in a variety of community service activities at non-profit and public facilities, including schools, hospitals, day-care centers, and senior centers. The program provides over 40 million community service hours to public and non-profit agencies, allowing them to enhance and provide needed services. Participants work an average of 20 hours a week, and are paid the highest of federal, state or local minimum wage. This training serves as a bridge to unsubsidized employment opportunities for participants.

Trade Adjustment Assistance

- **Purpose:** To provide adjustment assistance to qualified workers adversely affected by foreign trade which will assist them to obtain suitable employment.
- **Types of Projects:** The Trade Adjustment Assistance (TAA) Program is a federal entitlement program that assists U.S. workers who have lost or may lose their jobs as a result of foreign trade. This program seeks to provide adversely affected workers with opportunities to obtain the skills, credentials, resources, and support necessary to become reemployed. Since 1975, the TAA program has served more than 2 million U.S. workers.¹

National Farmworker Jobs Program

- **Purpose:** To help individuals and their dependents who are primarily employed in agricultural labor that is characterized by chronic unemployment and underemployment find and retain stable employment. Grant organizations provide job training, other employment services and related assistance.
- **Types of Projects:** The program partners with community organizations and state agencies to counter the chronic unemployment and underemployment experienced by farmworkers who depend primarily on jobs in agricultural labor performed across the country. The NFJP is an integral part of the public workforce system and a partner in the nationwide network of One-Stop Career Centers. In addition, NFJP partners with state monitor advocates to provide services to farmworkers and their families working in agriculture employment.

Reintegration of Ex-Offenders

- **Purpose:** This program includes both Adult Reentry grants to serve adult returning offenders and Youthful Offender grants aimed at youth involved or at risk of involvement in crime and violence. The objectives of the Adult Reentry grants include increasing the employment rate, employment retention rate, and earnings of released prisoners, and decreasing their recidivism. By preventing in-school youth from dropping out of school and increasing the employment rate of out-of-school youth.
- **Types of Projects:** The REO program provides funding to develop guidance to the public workforce system on how best to serve this population within the guidelines of regulatory authority. Adult REO programs are designed to serve urban centers and areas of greatest need.

Program of Competitive Grants for Worker Training and Placement in High Growth and Emerging Industry Sectors

- **Purpose:** To preserve and create jobs and promote economic recovery, assist those most impacted by the recession, provide investments needed to increase economic efficiency by spurring technological advances in science and health, and invest in transportation, environmental protection, and other infrastructure that will provide long-term economic benefits.
- **Types of Projects:** The Recovery Act provided \$750,000,000 for a program of competitive grants for worker training and placement in high-growth and emerging industry sectors. Of the total, \$500,000,000 is intended for research, labor exchange, and job training projects that prepare workers for careers in energy efficiency and renewable energy industries. Priority for the remainder of the funds is for projects that prepare workers for careers in the health care sector.

Trade Adjustment Assistance Community College and Career Training (TAACCCT) Grants

- **Purpose:** To ensure that our nation's institutions of higher education are able to help the targeted population of those who have lost their jobs due to foreign trade to succeed in acquiring the skills, degrees, and credentials needed for high-wage, high-skill employment while also meeting the needs of employers for skilled workers.
- **Types of Projects:** The Trade Adjustment Assistance Community College and Career Training (TAACCCT) Grants Program provides community colleges and other eligible institutions of higher education with funds to expand and improve their ability to deliver education and career training programs that can be completed in two years or less, are suited for workers who are eligible for training under the Trade Adjustment Assistance for Workers program, and prepare program participants for employment in high-wage, high-skill occupations. Through these multi-year grants, the Department of Labor is helping to ensure that our nation's institutions of higher education are helping adults succeed in acquiring the skills, degrees, and credentials needed for high-wage, high-skill employment while also meeting the needs of employers for skilled workers.

Office of Disability Employment Policy

Disability Employment Policy Development

- **Purpose:** The Office of Disability Employment Policy (ODEP) provides national leadership on disability employment policy to the Department of Labor and other Federal agencies. ODEP develops and fosters the adoption and implementation of comprehensive and integrated disability employment policies and strategies throughout the workforce development system, in public and private workplaces, and in employment-related supports programs and services. Implementation of these effective policies and strategies increase employment opportunities, the recruitment of, and reduce barriers to the hiring, retention and promotion of people with disabilities. ODEP's response to the low labor force participation of people with disabilities is comprehensive and aggressive, and includes securing the active involvement of and cooperation among a number of stakeholders, including Federal, State and local government agencies, private and public employers, educational and training institutions, and the disability community.
- **Types of Projects:** Uses for funding are detailed in each solicitation for cooperative agreement or grant applications. All ODEP funds are discretionary.

Energy Employees Occupational Illness Compensation

- **Purpose:** This program provides lump-sum monetary payments to employees and former employees (or their eligible survivors) as compensation for occupational illnesses under Part B, and covered illnesses under Part E; medical expenses (including hospital care). Benefits are paid from a mandatory appropriation of Federal funds.
- **Types of Projects:** Part B provides lump-sum monetary payments and medical benefits to covered employees and, where applicable, to survivors of such employees of the Department of Energy (DOE), its predecessor agencies, and certain of its vendors, contractors and subcontractors. Part B also provides lump-sum payments and medical benefits to individuals found eligible by the Department of Justice (DOJ) under section 5 of the Radiation Exposure Compensation Act (RECA) and, where applicable, to their survivors. Part E of the Act provides variable lump-sum payments (based on a worker's permanent impairment and/or calendar years of qualifying wage-loss) and medical benefits for covered DOE contractor employees and, where applicable, provides variable lump-sum payments to survivors of such employees (based on a worker's death due to a covered illness and percentage of wages lost in a given year. Part E also provides these same payments and benefits to uranium miners, millers and ore transporters covered by section 5 of RECA and, where applicable, to survivors of such employees.
