¹ Locations that received multiple rounds of implementation will have sales data reported in multiple rows that correspond to each round of implementation as designated by the year in which implementation began.

²The total number of individuals (by location and for all locations) is the unique number of individuals the Program issued offers to. Therefore, the totals do not equal the sum of the number of individuals per location. For example, if an individual owns land and receives an offer at two locations or during multiple rounds of implementation at a single location, he or she is counted only once in the totals.

³This figure is calculated based on the dollar value of offers. If an individual receives two offers (e.g., one for \$200 and another for \$100) and decides to sell the fractional interests in the \$100 offer, the Program tracks \$300 in offers made and \$100 in amount accepted. Initial and return implementations may not sum to reported totals due to duplicate offers.

⁴This figure is calculated by dividing the number of individuals who accepted offers by the total number of individuals.

⁵This figure is calculated by dividing the dollar amount accepted by the dollar amount offered.

⁶Under the contingent offer approach, the Program requires additional time to process returned offer packages while it determines the availability of funding, meaning the Bureau of Indian Affairs Acquisition Center will generally start approving offers 46 days after the cover letter date. As a result, locations mailed after October 2020 might not reflect approved offer data until that time.

♦ Data included in aggregate totals, individual data not shown here as sales were only for a few individual landowners.

Note: The Program is currently processing offers for locations in bold italics. All figures include offers generated for Whereabouts Unknown (WAUs).
