INSPECTION

July 25, 2005

NUMBER: 05-01

DISTRIBUTION: DOI Aviation Management Approved Inspectors, DOI SEAT Managers, DOI SEAT Vendors

SUBJECT: Induction Air Filters

DISCUSSION: Recently, at least two M-18 Dromaders powered by a reciprocating engine have been found operating with improper and dirty induction air filters.

The proper filter assembly is a stack of seven (7) filter elements. The approved filter supplied by PZL to Dromader USA is part no. WA20-200.
