

**Stipulation Regarding Early Restoration Project
for the Deepwater Horizon Oil Spill -
Wakulla Mashas Sands Park Improvements**

This Stipulation Regarding an Early Restoration Project for the Deepwater Horizon Oil Spill – Wakulla Mashas Sands Park Improvements (“Project Stipulation” or “Stipulation”), is made by and among BP Exploration & Production Inc. (“BPXP”), the State Trustees and Federal Trustees as defined herein (collectively, with the United States Department of Justice, the “Parties”) in accordance with the Framework for Early Restoration Addressing Injuries Resulting from the Deepwater Horizon Oil Spill (“Framework Agreement”) executed April 20, 2011. Except as set forth herein, this Project Stipulation is governed by the Framework Agreement and incorporates its terms by reference. This Project Stipulation will be effective when signed by an authorized representative of each of the Parties.

WHEREAS, for purposes of this Project Stipulation, the United States is acting on behalf of the following federal trustees of natural resources: the Secretary of the United States Department of the Interior (“DOI”), through its applicable bureaus, the Administrator of the National Oceanic and Atmospheric Administration (“NOAA”), the Administrator of the United States Environmental Protection Agency (“EPA”), and the Secretary of the United States Department of Agriculture (“USDA”) (collectively “Federal Trustees”); and

WHEREAS, for purposes of this Project Stipulation, the States of Alabama, Florida, Louisiana, Mississippi, and/or Texas (collectively, “States”) are acting through the following state trustees of natural resources: for the State of Alabama, the Alabama Department of Conservation and Natural Resources and the Geological Survey of Alabama; for the State of Florida, the Florida Department of Environmental Protection and the Florida Fish and Wildlife Conservation Commission; for the State of Louisiana, the Louisiana Coastal Protection and Restoration Authority, the Louisiana Oil Spill Coordinator’s Office, the Louisiana Department of Environmental Quality, the Louisiana Department of Wildlife and Fisheries, and the Louisiana Department of Natural Resources; for the State of Mississippi, the Mississippi Department of Environmental Quality; and for the State of Texas, the Texas Parks and Wildlife Department, the Texas General Land Office, and the Texas Commission on Environmental Quality (collectively, “State Trustees”); the State and Federal Trustees collectively are referred to as the “Trustees”); and

WHEREAS, on or about April 20, 2010, the mobile offshore drilling unit Deepwater Horizon experienced an explosion, fire and subsequent sinking in the Gulf of Mexico resulting in a release of oil into the Gulf of Mexico and response actions (“the Oil Spill”); and

WHEREAS, the Trustees are conducting a Natural Resource Damage Assessment (“NRDA”), as that term is defined in 15 C.F.R. § 990.30 and corresponding state law provisions, to determine Natural Resource Damages resulting from the Oil Spill in accordance with federal and state laws and authorities; and

WHEREAS, while the NRDA is continuing, the Trustees have approved the Deepwater Horizon Oil Spill Programmatic and Phase III Early Restoration Plan and Early Restoration Programmatic Environmental Impact Statement (the “Phase III Plan”), dated October 2, 2014, after public notice of the proposed plan, a reasonable opportunity

for public comments, and consideration of all comments received, which includes the project described herein (“Early Restoration Project”); and

WHEREAS, the Trustees have determined that the Early Restoration Project meets the criteria set forth in Paragraph 6 of the Framework Agreement and is consistent with section 1006 of the Oil Pollution Act, 33 U.S.C. § 2706, and the Oil Pollution Act Regulations (Natural Resource Damage Assessments), 15 C.F.R. §§ 990 et seq.; and

WHEREAS, all Parties agree that this Project Stipulation has been negotiated in good faith and that it is fair, reasonable, and in the public interest;

NOW, THEREFORE, in consideration of the promises exchanged herein, the Parties hereby agree and stipulate as follows:

I. RESTORATION PROJECT

- A. The Trustees have selected the Early Restoration Project set forth in Appendix A (including project description, estimated project cost, and location), attached hereto and incorporated by reference, as an appropriate restoration project to address natural resource injuries resulting from the Oil Spill. On December 6, 2013, the Trustees published for public notice and comment a Draft Programmatic and Phase III Early Restoration Plan and Draft Early Restoration Programmatic Environmental Impact Statement that included the Early Restoration Project. On October 2, 2014 after considering all public comments received on the draft plan, the Trustees adopted a final Phase III Plan that included the Early Restoration Project. The final Phase III Plan (along with supporting documentation) is available publicly as described in Appendix B.
- B. The Parties agree that the Early Restoration Project is consistent with section 1006 of the Oil Pollution Act, 33 U.S.C. § 2706, and the Oil Pollution Act Regulations (Natural Resource Damage Assessments), 15 C.F.R. §§ 990 et seq., is in the public interest and meets all of the following criteria:
 - i. contributes to making the environment and the public whole by restoring, rehabilitating, replacing, or acquiring the equivalent of natural resources or services injured as a result of the Oil Spill, or compensating for interim losses resulting from the Oil Spill;
 - ii. addresses one or more specific injuries to natural resources or services associated with the Oil Spill;
 - iii. seeks to restore natural resources, habitats or natural resource services of the same type, quality, and of comparable ecological and/or human use value to compensate for identified resource and service losses resulting from the Oil Spill;
 - iv. is not inconsistent with the anticipated long-term restoration needs and anticipated final restoration plan; and
 - v. is feasible and cost effective.
- C. The Early Restoration Project shall be implemented by the following Trustee(s): Florida Department of Environmental Protection (“Implementing Trustee(s)”).

D. Quarterly Reports: The Implementing Trustee(s) shall provide quarterly status reports on the Early Restoration Project to BPXP describing the progress on project implementation during each period (including a summary of costs expended during that quarter), until the conclusion of the calendar year in which the implementing Trustee(s) has completed construction of the project, or until the NRD case is concluded by a judicially approved consent decree or final judgment resolving BPXP's potential liability for natural resource damages resulting from the Oil Spill, whichever comes first. For purposes of this reporting, a year will be divided into the following four quarters: (1) January, February, March; (2) April, May, June; (3) July, August, September; (4) October, November, December. The first quarterly status report shall encompass all relevant information from the quarter in which the Project Stipulation was filed as well as the first subsequent quarter; therefore the first quarterly report may encompass a timeframe greater than three (3) months. Quarterly status reports will be due within sixty (60) days after the end of the applicable quarter.

Annual Reports: Once the Implementing Trustee(s) fulfills its obligations to submit quarterly reports for the Early Restoration Project, the implementing Trustee(s) shall provide annual status reports on the Early Restoration Project to BPXP describing the status of and any changes to the Early Restoration Project and/or project expenditures during each period. The Implementing Trustee(s) shall provide annual status reports until the applicable performance criteria, monitoring, and maintenance period has expired or until the NRD case is concluded by a judicially approved consent decree or final judgment resolving BPXP's potential liability for natural resource damages resulting from the Oil Spill, whichever comes first. For the purposes of the annual reporting, a reporting year will cover from January 1st to December 31st. The first annual report will cover the calendar year immediately following the calendar year in which the Implementing Trustee(s) has completed construction of the Early Restoration Project. Annual status reports will be due within sixty (60) days after the conclusion of that annual reporting year. The Trustees may group multiple Early Restoration Projects in a single report.

E. All Parties shall also have the right to observe or inspect the implementation of the Early Restoration Project to the greatest extent practicable based on the design of the project, site conditions, and any legal limitations on access controlled by third parties. In addition, BPXP shall have the further right to access and copy final design, permitting, oversight and monitoring data, and reports that are collected or generated for the Early Restoration Project. All such data and reports shall be available to BPXP, after applicable quality assurance/quality control, and may be incorporated into the Administrative Record for the Deepwater Horizon Natural Resource Damage Assessment at the discretion of the Trustees in accordance with the Oil Pollution Act, 33 U.S.C. §§ 2701 et seq., and the Oil Pollution Act Regulations (Natural Resource Damage Assessments), 15 C.F.R. §§ 990 et seq.

II. FUNDING FOR PROJECTS IMPLEMENTED BY ONE OR MORE TRUSTEES

- A. BPXP shall provide total funding in the amount of \$1,500,000.00 for the Early Restoration Project. All funds provided to any Trustee under this Stipulation shall be paid and deposited in accordance with the instructions provided by the Implementing Trustee(s) pursuant to Paragraph II.C. below.
- B. The Trustees shall use the funds paid under this Stipulation only for implementation of the Early Restoration Project, including oversight, monitoring, corrective actions, maintenance, and any agreed upon contingency, except as provided in Paragraphs II.D. and II.E. The estimated cost of the Early Restoration Project is set forth in Appendix A.
- C. Within fourteen (14) days after the filing of this Project Stipulation, BPXP shall cause the transfer of 100% of the funds specified in Paragraph II.A. from the Early Restoration Subaccount¹ to the account or accounts and in the manner designated in instructions provided by the Implementing Trustee(s).
- D. Any and all funds transferred pursuant to Paragraphs II.C. of this Project Stipulation, along with any accrued interest, that have not been spent and remain unobligated after the Trustee(s) has completed the Early Restoration Project (or Replacement Project(s), if applicable), including all performance monitoring and corrective actions, shall be retained by the Trustees. Such funds may only be used by the Implementing Trustee(s) for another restoration project agreed to by all Trustees, provided, however, that such funds may not be used for another project unless and until the Implementing Trustee(s) has confirmed in writing that the Early Restoration Project is complete. BPXP shall not be entitled to any additional NRD Offsets or other credits related to any additional restoration work performed with such retained funds.
- E. At any time after BPXP has made full payment pursuant to Paragraph II.C., the Trustees may for good cause elect not to implement the Early Restoration Project. If the Trustees elect not to implement the Early Restoration Project in substantially the same form as described in Appendix A, the Parties agree that the Trustees shall apply any unspent funds in accordance with the following provisions:
 1. The Implementing Trustee(s) for the Early Restoration Project or an affected trustee designated by the Implementing Trustee(s) shall retain the unspent funds paid by BPXP under this Project Stipulation;
 2. The Trustees shall apply the unspent funds to one or more replacement project(s) (“Replacement Project(s)”), which may include a modified version of the project described in Appendix A. Any Replacement Project(s) shall be designed to compensate for lost recreational use provided by natural resources injured in Florida;

¹ The Early Restoration Subaccount means the separate subaccount within the Deepwater Horizon Oil Spill Trust, the private trust previously established by BPXP that was created and holds the \$1 billion BPXP committed toward early restoration projects, as required by the terms of the Framework Agreement.

3. The Trustees' selection of Replacement Project(s) under these provisions shall be subject to the criteria set forth in Paragraph 6 of the Framework Agreement and in Paragraph I.B. of this Project Stipulation, except that the Replacement Project(s) shall not be subject to the approval by BPXP;
 4. The Trustees shall keep BPXP reasonably informed about the progress for selection of Replacement Project(s) under these provisions;
 5. BPXP shall not be required by this Project Stipulation to provide any funding for the Replacement Project(s) beyond the funding provided pursuant to Paragraph II.C. and Paragraph II.E.6. below;
 6. In addition to the project funding required under Paragraph II.C., BPXP shall provide funding for reasonable pre-implementation planning costs associated with identifying and selecting any Replacement Project(s). Such funding shall be in addition to the funds held in the Early Restoration Subaccount. BPXP shall not receive any additional NRD Offsets for planning costs funded pursuant to this paragraph.
 7. BPXP shall be entitled to all NRD Offsets as set forth in Section III below. The timing, selection and/or implementation of any Replacement Project(s) shall not modify the NRD Offsets as set forth in Section III below and Appendix C.
 8. If any Replacement Project is not implemented by the Trustees for good cause, the provisions of this Paragraph II.E shall apply to the selection of any new Replacement Project(s).
- F. Notwithstanding any provision of this Project Stipulation, if the cost of the Early Restoration Project (or Replacement Project(s), if applicable) exceeds the amount of funding stated in Paragraph II.A. above, the Parties may agree, in writing, to increase the amount of funding that BPXP will provide for the Early Restoration Project under this Project Stipulation from the Early Restoration Subaccount.

III. NRD OFFSETS

- A. The natural resources and/or services predicted to result from the Early Restoration Project ("NRD Offsets") are set forth in Appendix C, attached hereto and incorporated by reference. Trustee(s) whose resources are addressed in the Early Restoration Project, as designated by the Trustee Council in accordance with Paragraph 11 of the Framework Agreement, are also identified in Appendix C ("Affected Trustees"). NRD Offsets shall be applied only to the injuries within the boundaries of the state or states in which the Early Restoration Project is implemented, or as otherwise provided in Appendix C.
- B. Terms used in the NRD Offsets that are defined in OPA or in 15 C.F.R. Part 990 shall have the meaning set forth in the statute or regulations, except where a different definition is provided in Appendix C or in Appendix D (Glossary of Terms), attached hereto and incorporated by reference, in which case the meaning provided in the applicable Appendix shall control.
- C. Upon full payment of the amount specified in Paragraph II.A., BPXP shall be entitled to the NRD Offsets set forth in Appendix C.

- D. The Trustees agree that the NRD Offsets set forth in Appendix C shall apply to the NRDA even if the Early Restoration Project (or Replacement Project(s), if applicable) does not achieve the anticipated results.
- E. BPXP waives the right to claim that the Early Restoration Project (or Replacement Project(s), if applicable) provides benefits to natural resources or services beyond those identified in Appendix C, or provides benefits to Trustees other than those identified in Appendix C.
- F. Except as otherwise agreed to by the Parties, none of the terms of this Stipulation, including, without limitation, the amount of the NRD Offset and the methodology used to calculate the NRD Offset in this Project Stipulation, shall be used as precedent for any other restoration project. Furthermore, neither the amount of the NRD Offset nor the methodology used to calculate the NRD Offset shall be used as precedent for determining NRD Offsets or the benefits or effects of restoration in this or for any other case.
- G. (1) Any NRD Offsets set forth in Appendix C shall be applied to reduce the Trustees' assessment of natural resource damages resulting from the Oil Spill in any civil litigation or other proceeding brought by the Trustees, individually or collectively, seeking natural resource damages ("initial application").

(2) If the Court modifies the Trustees' assessment of natural resource damages resulting from the Oil Spill in a way that materially affects their initial application of the NRD Offsets, then the Trustees shall re-apply the NRD Offsets to reduce the natural resource damages determined by the Court, once the Court's determination is final and is not subject to further appeal. The Trustees shall provide BPXP notice of any proposed re-application of the NRD Offsets and an opportunity of no less than sixty (60) days to submit comments and any relevant information and supporting materials ("BPXP's submission"). After considering BPXP's submission, the Trustees shall issue their modified application of the NRD Offsets. Within thirty (30) days of receipt of the Trustees' modified application of the NRD Offsets, BPXP may seek judicial review of the Trustees' determination based solely on BPXP's submission, any response or explanation provided by the Trustees, and the record of the NRDA and the NRD litigation. Nothing in this Paragraph shall affect the quantity or definition of NRD Offsets as set forth in Appendix C, nor shall this Paragraph require application of the NRD Offsets beyond the limitations set forth in this Stipulation, including the limitations in Appendix C on Affected Trustees and on the type and/or geographic scope of the natural resources and/or services against which the Offsets may be applied.

(3) To the extent NRD Offsets have been applied as provided in this Stipulation, then BPXP is not entitled to any further application of the NRD Offsets in litigation nor other proceedings brought by the Trustees.

IV. EFFECT OF STIPULATION

- A. This Project Stipulation is binding upon the Parties and their successors and assigns.

- B. Except as provided herein, the Parties make no admission of fact or law by entering into this Project Stipulation.
- C. The Trustees agree to incorporate this Project Stipulation into the Administrative Record for the Deepwater Horizon NRDA.
- D. Within five (5) days of execution of this Project Stipulation, the United States, acting through the United States Department of Justice, counsel representing those State Trustees who are parties in the Deepwater Horizon Oil Spill Multi-District Litigation (“MDL”), and BPXP shall file a notice of this Project Stipulation, for informational purposes only, with the MDL Court. Such notice shall be substantially in the same form as the notices of Early Restoration Project Stipulations previously filed in the MDL. Any such notice may address multiple Project Stipulations.
- E. The Trustees hereby covenant not to sue BPXP for claims for damages or injuries to or losses of natural resources resulting from the activities of the Trustees in implementing the Early Restoration Project or, if applicable, Replacement Project(s).
- F. Any modification to this Project Stipulation shall be in writing signed by all Parties, except that (1) a non-material modification may be made in writing signed by the Affected Trustees, DOJ, and BPXP; and (2) the Implementing Trustee(s), DOJ, and BPXP may correct typographical or other non-substantive scrivener’s errors by substituting a corrected page for the page containing the error, with the Parties’ agreement to the correction(s) documented by exchange of e-mails or letters. Any modification that affects the amount of funding to be provided, the NRD Offsets to be attributed to the project, or the effect of the Project Stipulation on claims or liabilities shall be considered material. Notice of any modification, including corrections, shall be filed with the MDL Court for informational purposes only.

V. GENERAL PROVISIONS AND RESERVATIONS OF RIGHTS

- A. Except for the stipulated NRD Offsets and as set forth herein in Paragraph IV.E., this Project Stipulation shall not be construed to limit in any way the authority of the Trustees to perform assessments, engage in any restoration planning, or select and implement restoration projects; nor shall it require BPXP to fund any of these activities, except as required in Paragraph II.E.6.
- B. This Project Stipulation fully reserves and shall not limit the Trustees’ rights to recover costs for reasonable oversight costs related to assessments, restoration planning activities, selection and implementation of restoration projects, or other reasonable natural resource damage assessment costs as provided in 33 U.S.C. § 2706 including the Trustees’ costs associated with the selection of Early Restoration Projects, development of the Early Restoration Plan(s), and general non-project specific administration and monitoring of the early restoration process, and any reasonable pre-implementation planning costs associated with identifying and selecting any Replacement Project(s) not funded by BPXP under Paragraph II.E.6; provided, however, nothing in this Project Stipulation shall permit the Trustees to recover additional costs of implementation of the Early Restoration Project except in accordance with Paragraph II.F.

- C. Except for the stipulated NRD Offsets and as set forth herein in Paragraph IV.E., this Project Stipulation does not operate to release BPXP from any potential natural resource damage or other liability, and the Trustees reserve all other claims against BPXP and/or other parties related to natural resource damage liability or any other liability arising from the Oil Spill.
- D. Except for the stipulated NRD Offsets and as set forth herein in Paragraph IV.E., the Trustees reserve the right to use any appropriate methodologies for assessing natural resources injuries, for determining the natural resource damages and for planning and scaling restoration for the Oil Spill.
- E. Except with respect to the Early Restoration Project that BPXP has agreed to fund, any Replacement Project(s) selected in accordance with this Project Stipulation, and the agreed upon NRD Offsets under this Project Stipulation, BPXP reserves all legal and evidentiary defenses it may have against any claim asserted by any Trustee, including, without limitation, any defenses related to natural resource damages arising from the Oil Spill, any natural resource damages assessment associated with the Oil Spill, and any methodologies the Trustees use to assess natural resources injuries, determine the natural resource damages claims, and in planning and scaling restoration. BPXP reserves all claims, cross-claims or counterclaims it may have against any person or entity not a party to this Project Stipulation.
- F. Except for the stipulated NRD Offsets and as set forth herein in Paragraph IV.E., the Trustees expressly reserve all claims, demands, and causes of action, either judicial or administrative, past or future, in law or equity, against any person or entity not a party to this Project Stipulation for any matter arising out of or in any way relating to the Oil Spill.
- G. The undersigned representative of each Party certifies that he or she is fully authorized to enter into the terms and conditions of this Project Stipulation and to execute and legally bind such Party to this document. This Project Stipulation may be signed in counterparts.
- H. To the extent that there is any inconsistency between this Project Stipulation and the Framework Agreement, this Project Stipulation shall govern.

IN WITNESS WHEREOF, the undersigned Parties have executed and delivered this Project Stipulation, effective as of the date of execution by all Parties.

THE UNDERSIGNED PARTY enters into this Project Stipulation for the Wakulla Mashas Sands Park Improvements Project in the matter of *In re: Oil Spill by the Oil Rig "Deepwater Horizon" in the Gulf of Mexico, on April 20, 2010*, relating to the *Deepwater Horizon Oil Spill*.

APPENDIX A

EARLY RESTORATION PROJECT

Appendix A: Wakulla County Mashes Sands Park Improvements Project

1.0 INTRODUCTION

This document describes the Wakulla County Mashes Sands Park Improvements Project (the “Early Restoration Project”) to be implemented with funding provided by BPXP, resulting in the NRD Offsets identified in Appendix C. This document is part of the Project Stipulation executed by BPXP, the Trustees, and the United States Department of Justice.

2.0 PROJECT DESCRIPTION

The objective of the Early Restoration Project is to enhance and/or increase recreational boating and beach use opportunities by improving the recreational opportunities at the park. The Early Restoration Project will improve recreation areas at the Wakulla County Mashes Sands Park (See Figure 1 for general project location). The improvements include constructing observation platforms, boardwalks, and walking paths, improving the boat ramp area, and picnic areas, renovating the parking area, and the restroom facility, and constructing a canoe/kayak launch site.

Figure 1. Location of Wakulla County Mashes Sands Park Improvements Park.

3.0 PROJECT IMPLEMENTATION

3.1 Performance Criteria, Monitoring, and Maintenance

Project performance will be assessed as defined in Section 12.86.4 of the Programmatic and Phase III Early Restoration Plan and Early Restoration Programmatic Environmental Impact Statement (“Plan”).

Project implementation will commence upon the filing of the Notice of Stipulation with the MDL Court. Project implementation will be complete when the performance criteria consistent with Section 12.86.4 of the Plan have been met.

3.2 Estimated Project Cost

The total estimated cost to implement the Wakulla County Mashes Sands Park Improvements Project is \$1,500,000.00, consistent with Sections 12.86.4 and 12.86.6 of the Plan.

APPENDIX B

EARLY RESTORATION PLAN

The Early Restoration Project is included in the Deepwater Horizon Oil Spill Programmatic and Phase III Early Restoration Plan and Early Restoration Programmatic Environmental Impact Statement (“Plan”), available at www.doi.gov/deepwaterhorizon, which was adopted by the Trustees after public review and comment. Public comments received on the Plan are summarized in the Plan, and Trustees’ responses to the comments are included. All public comments received on the Plan are included in full in the NRDA Administrative Record for the Plan, which can be found at the same web address.

APPENDIX C

NRD OFFSETS

The NRD Offsets are \$3,000,000.00 expressed in present value 2013 dollars to be applied against the monetized value of lost recreational use provided by natural resources injured in Florida, which will be determined by the Trustees' assessment of lost recreational use for the Oil Spill.

For purposes of applying the NRD Offsets to the calculation of injury after the Trustees' assessment of lost recreational use for the Oil Spill, the Parties agree as follows:

- (1) The Parties agree to restate the NRD Offsets in the present value year used in the Trustees' assessment of lost recreational use for the Oil Spill.
- (2) The discount rate and method used to restate the present value of the NRD Offsets will be the same as that used to express the present value of damages.

For the purposes of Paragraph III.A. of this Project Stipulation, the Affected Trustees whose resources are addressed by the Wakulla County Mashes Sands Park Improvements Project are the Florida Department of Environmental Protection, the Florida Fish and Wildlife Conservation Commission, DOI, EPA, NOAA, and USDA.

APPENDIX D

GLOSSARY OF TERMS

There are no additional defined terms for this Early Restoration Project.
