

USEITI Preliminary Scope with Comments

11a. Sectors/Commodities	Include	Exclude	TBD	Justification	Information/Action Needed for Decision
Oil	X				
Gas	X				
Coal	X				
Hard Rock/Locatable Minerals			X	International leadership.	Will need to discuss materiality at all levels to make sense of it. Need a formal list from BLM. Want to make sure Uranium is included.
Renewables (inc. geothermal)			X	Significant public policy debate.	Would require more discussion and more engagement with those industries, agencies, and unions.
Saleable (Sand and Gravel and others)			X	Significant receipts not just to DOI.	Would require more discussion and more engagement with those industries, agencies, and unions.
Timber			X	Significant receipts not just to DOI.	Would require more discussion and more engagement with those industries, agencies, and unions.
Fisheries		X			
11b. Lands	Include	Exclude	TBD	Justification	Information/Action Needed for Decision
Federal	X				
States			X		Transfers from Federal government and payments made directly to States? Constitutional and legal considerations. Practicality? Cost benefit analysis? Understanding state -by-state basis.
Tribal			X		Stakeholder engagement/Tribal consultation. Look at international examples and STRAC.
Private			X		Federally collected revenues? How would this be reconciled? Determine other receipts other than royalties.
11c. Revenue collected by Gov't type	Include	Exclude	TBD	Justification	Information/Action Needed for Decision
Federal					A clear exhaustive list of payments to be provided by gov't
rents, royalties, bonuses, fees	X				A list of those payment types and those revenues. A graph with more data points. List of payments, how the payment is reported, what form is used, is it a public payment that can be included in USEITI? Restrictions on disclosure?
income taxes or other taxes			X	Data point: EITI requirement 9d.	A list of those payment types and those revenues. A graph with more data points. List of payments, how the payment is reported, what form is used, is it a public payment that can be included in USEITI? Restrictions on disclosure?
taxes for downstream activities			X		What revenues go to the gov't from some of the other activities?
gas storage fees		X			
States					
rents, royalties, bonuses, fees			X		There may be other terms used for these payments. State collected revenues problems identified yesterday will be significant. No mechanism to compel States to respond unless voluntarily. Can check websites. Many States would have incomplete data. 28 different models, some commonality, no legal authority, might take legislation in the States. Take a look at what's already public. State data is a snapshot of today, but constantly changes. Defer judgment to the States as to how they want to participate? What is needed to make our application successful? Create a scoping justification for including them or not including them. Defer to International Secretariat on what to do if States don't engage. A list of payments (each State would be different).
transfers from the Federal gov't			X		
income taxes or other taxes			X		Resource considerations. Need for further clarification.
Tribal					
rents, royalties, bonuses, fees			X		Stakeholder engagement/Tribal consultation. Look at international examples and STRAC. Money that is collected by ONRR for Tribes should be treated as money collected by the Tribes. There may be other terms used for these payments. Tribes should be included in report in some fashion. See if we can get some information on EITI presence and what other countries have done. Look globally, i.e. Australia. Also think about the same conversations we have about States.
transfers from the Federal gov't			X		
income taxes or other taxes			X		
Taxes on downstream products			X
