

USEITI Multi-Stakeholder Group Goals for U.S. Implementation of EITI May 1, 2013

Civil Society

- Effective dissemination of information:
 - Usable
 - Policy Relevant
 - Accessible
- Leadership in implementation
- Adequate resources to do the job
- Effective engagement of stakeholders
- Assure disclosure of revenue/payments is accurate—gap assessment

Government

- Make revenue data more user-friendly and relevant for the American public.
- Promote open government and transparency in the United States.
- Lead by example internationally.
- Timely apply for candidacy and achieve EITI compliance.

Industry

- Setting a good example by successfully establishing and implementing a USEITI program expeditiously.
- Validating federal government revenues associated with the resource extraction industry.
- Enhancing public understanding of what the industry contributes to the federal government by improving domestic and global visibility, understanding and access to data that is publicly available.
- Minimizing administrative complexity and costs of the program.
- Constructive engagement to reach shared goals and enhance relationships among all of the sectors within the USEITI framework.

Shared

- Lead by example, in the U.S. and internationally
- Proceed in an efficient and practical manner that maintains momentum
- Conduct effective stakeholder and public engagement, to enhance understanding of industry contributions to the U.S. treasury and communities
- Provide accurate, reliable and verifiable data that is accessible and user-friendly

Other Goals

- Provide material information to investors
