

INVASIVE SPECIES ADVISORY COMMITTEE MEETING “The Changing Climate of Invasive Species”

March 7 – 8, 2013

Sheraton Pentagon City Hotel
 900 South Orme Street, Arlington, VA 22204

Introduction and Purpose of Meeting: *The Recent years have seen many changes in our approach to invasive species. Significant public awareness has been fostered through extensive media coverage, many states have passed legislation and undertaken new efforts, the economic impact of invasives is acknowledged by government, industry and individuals, and targeted outreach and education programs are influencing the behavior of ordinary individuals. At the same time, severe budget restrictions have created new funding difficulties, new invaders continue to become established and climate change and other environmental changes are complicating and already complex issue. The Spring 2013 ISAC Meeting will focus on a larger view of the issues at hand and impending changes across the nation.*
