HURRICANE SANDY FUNDING

(dollars in millions)

STATE SPECIFIC*

MULTI-STATE**

** State specific funding is for projects that take place only in the State identified. Funding levels for projects will be refined as planning and design gets underway and the sequestration reductions are applied.*

*** Multi-State funding is for projects that take place in two or more States. The amount in the Multi-State column represents the total amount of funding available, not the amount that will be given to the individual State. Individual States will only receive a portion of the amounts identified in the Multi-State column for project work in their State.*

****The National Park Service, Historic Preservation Fund has \$10 million to divide between 8 States that did not receive State Specific funding and the District of Columbia. The District of Columbia will only receive a portion of the \$10 million. Once NPS identifies which 8 States will receive a portion of the funding, this table will be updated.*
