FEBRUARY 3-4, 2015

PRICE SCHEDULE

Call 800-686-3035 or email amscreening@msn.com for your appointment

Package Deals

1	Save 32% for tests 1 - 8, plus any ONE test selected from 9-19, for a package price of \$245.00 (\$114 Savings)
2	Save 20% for tests 20 - 25 for a package price of \$199.00 (\$50 Savings)

Individual Blood Tests

Test	Name	Description of Test	Price
1	C-Reactive Protein	Sensitive marker of inflammation that can predict coronary artery disease	\$ 45
2	Homocysteine	High levels can cause arteriosclerosis, blood clots, and Alzheimer's	\$ 45
3	Thyroid Stimulating Hormone	Aids in the detection of an over-active or under-active thyroid gland	\$ 40
4	Fasting Blood Glucose	Predicts diabetes by measuring the body's use of sugar while fasting	\$ 35
5	Glomerular Filtration Rate	Screens for early signs of kidney disease by evaluating kidney function	\$ 35
6	Cholesterol Panel (full lipid panel)	Calculates the total cholesterol and the breakdown into HDL (good cholesterol,) LDL (bad cholesterol), and triglycerides	\$ 35
7	Complete Blood Count	Screens for anemia, infection, immune system status, and iron deficiency	\$ 35
8	Comprehensive Wellness Profile	Measures 50 chemical markers of kidney and liver function, electrolytes, minerals, and includes the lipid panel and complete blood count	\$ 54
9	Prostate Specific Antigen	(Men only) Aids in the detection of prostate cancer	\$ 35
10	Hemoglobin A1C	Indicates the average daily blood sugar over the prior 3 months	\$ 35
11	Rh group and blood type	Determines your blood type, including the Rh factor	\$ 35
12	Follicle Stimulating Hormone (FSH)	(Women only) Measures the level of the hormone FSH, known to be a predictor of the onset of menopause	\$ 35
13	Rheumatoid Arthritis Factor	Aids in the diagnosis of the auto-immune joint disease Rheumatoid Arthritis	\$ 35
14	Sickle Cell Anemia	Screening test for Sickle Cell Anemia	\$ 35
15	Vitamin B 12	Checks B12 levels in the blood. Deficiencies affect the nervous system	\$ 35
16	Vitamin D	Measures Vitamin D levels. Deficiencies affect bone and muscle formation	\$ 35
17	Lipoprotein A1 and B	Detects level of these important transporters of dietary fats that lower cholesterol and prevent atherosclerosis	\$ 35
18	Cortisol	Determines the level of the stress hormone Cortisol in your blood, which causes inflammation and contributes to excess body fat storage	\$ 35
19	Lead Level	Measures the level of lead in the blood. High lead levels often go undetected and cause nervous system dysfunction	\$ 35

Other Tests

20	Echocardiogram	Using Ultrasound, the performance of your heart valves, the motion of the walls of your heart and the size of the chambers of your heart is evaluated. The test also detects any clots, fluid, or tumors around the heart.	\$ 99
21	Stroke/ Carotid Artery Disease Test	Using Ultrasound and a Doppler, a painless instrument called a transducer is moved up and down along the sides of your neck, visualizing any build-up of plaque in the carotid arteries that could lead to stroke, the third leading cause of death in the United States.	\$ 35
22	Abdominal Aortic Aneurysm Test	Using Ultrasound, a painless instrument called a transducer will be passed back and forth over your abdomen to view the Aorta, checking for the existence of a thin walled bulging which can rupture, an incident with a 95 % mortality rate. (You must fast for 4 hours prior to the test)	\$ 35
23	Peripheral Arterial Disease Test	Using a Doppler and blood pressure cuffs placed on the arms and ankles, any sluggishness of the blood circulation through the arteries in your legs is detected.	\$ 35
24	Osteoporosis Detection Test	This test is conducted by placing the heel of your foot into a machine which passes sound waves through your heel bone, indicating the density of the bones in your body.	\$ 25
25	Body Composition Test	Using an electric current you cannot feel, this machine measures the percentage of fat, lean muscle, and water in your body. It also calculates your body mass index, your basal metabolic rate and your average daily calorie requirement. (Not recommended if a person has a pacemaker or is in the first trimester of pregnancy. You must fast 4 hours prior to this test)	\$ 20
