Federal Subsistence Board Opens a Portion of Unit 7-Remainder for the Harvest of Moose by Federally Qualified Subsistence Users

The Federal Subsistence Board recently approved a special action request to open the portion of Unit 7-remainder that includes the drainages of Resurrection Creek downstream from Rimrock and Highland creeks including Palmer Creek from August 10 – September 20 for the harvest of moose by Federally qualified subsistence users. This action increases the opportunity for Federally qualified subsistence users to harvest moose in this area, which is likely to have minimal effect on the moose population based on past harvest rates.

Under Federal subsistence regulations, only residents of Hope and Cooper Landing are eligible to hunt moose in Unit 7 remainder. Residents of Hope and Cooper Landing can obtain permits by contacting Jeff Bryden at (907) 440-5174, Jason Stancil at (907) 440-5176, or Robert Stovall at (907) 288-7707 or (907) 743-9474. Sealing of all harvested moose is required in order to track the number of bull moose taken.

For additional information, contact U.S. Forest Service Wildlife Biologist Milo Burcham at (907) 424-4759 or (907) 429-4628.

Information on the Federal Subsistence Management Program can be found at <http://alaska.fws.gov/asm/home.html>.
