

Unit 23 / Hunting

(See Unit 23 Kotzebue Sound map)

Unit 23 consists of Kotzebue Sound, Chukchi Sea, and Arctic Ocean drainages from (and including) the Goodhope River drainage to Cape Lisburne.

Special Provisions

- The **Noatak Controlled Use Area** is closed for the period August 15 - September 30 to the use of aircraft in any manner either for hunting of an ungulate, bear, wolf, or wolverine, or for transportation of hunters or harvested species. This does not apply to the transportation of hunters or parts of ungulate, bear, wolf, or wolverine by regularly scheduled flights to communities by carriers that normally provide scheduled air service. The Noatak Controlled Use Area consists of that portion of Unit 23 in a corridor extending five miles on either side of the Noatak River beginning at the mouth of the Noatak River, and extending upstream to the mouth of Sapun Creek.
- **You may not use aircraft** in any manner for brown bear hunting, including transportation of hunters, bears, or parts of bears; however, this does not apply to transportation of bear hunters or bear parts by regularly scheduled flights to and between communities by carriers that normally provided scheduled service to this area, nor does it apply to transportation of aircraft to or between publicly owned airports. See pages 19-20 for bear sealing requirements.
- Caribou may be taken from a boat moving under power in Unit 23.
- Swimming caribou may be taken with a firearm using rimfire cartridges.
- For the Baird and DeLong Mountain sheep hunts—A Federally qualified subsistence user (recipient) may designate another Federally qualified subsistence user (designated hunter) to take sheep on their behalf, unless the recipient is a member of a community operating under a community harvest system. The designated hunter must get a designated hunter permit and must return a completed harvest report. The designated hunter may hunt for only one recipient in the course of a season and may have no more than two harvest limits in their possession at any one time.
- A snowmachine may be used to position a hunter to select individual caribou for harvest provided that the animals are not shot from a moving snowmachine.
- A Federally qualified subsistence user (recipient) may designate another Federally qualified subsistence user (designated hunter) to take muskoxen on their behalf, unless the recipient is a member of a community operating under a community harvest system. The designated hunter must get a designated hunter permit, and must return a completed harvest report. The designated hunter may hunt for any number of recipients, but have no more than two harvest limits in their possession at any one time.
- **National Park Service (NPS)** areas—For subsistence use, national parks and monuments are open only to NPS qualified subsistence users. Subsistence users must be local rural residents of NPS areas. For more information, contact the NPS office in Anchorage at (907) 644-3509.
