Josh,

Time's up and I wanted you to have more information--some of this in an unfinished condition but I hope you find it helpful.

Attached are 4 documents:

The object highlights was provided through other ways but I'm not sure it found you; it is a summary of highlights and new finds within GSENM--many of it paleontological. I've updated with a code in front for where the resource is located GS (Grand Staircase), KP (Kaiparowits), EC (Escalante Canyons).

GSENM Wildlife Summary: A breakdown of where species occur on GSENM by area (GS/KP/EC) and classification (T&E, etc.).

3 Sections: is my attempt to get more of what's not covered in the other documents

I updated the List of Objects with another column named "Proposed Unit" and called out where that item would be found GS/KP/EC or OUT- based upon current understanding.

I can get you more plant info (T&E) on Tues, my GIS is out until then.

Feel free to contact me as needed over the weekend.
