All, Here are some updates modified after yesterday's discussion. We did improve the contrast to help you see some of the topography better. We can send larger maps overnight when we have the information depicted satisfactorily.

The first is a map showing the three boundaries--Proclamation, Tribal Proposal and Utah PLI Proposal. This map is similar to the one I sent yesterday except it shows additional analysis of what PLI proposed. PLI proposed establishment of two NCAs, both of which would be withdrawn from mineral entry. The Indian Creek NCA on the north (434,354 acres) and the Bears Ears NCA on the south (857,603 acres). It also proposed Wilderness areas and released some WSA lands. The areas proposed for wilderness are marked in cross-hatches on the map. There were a few other questions you had about PLI that I will answer below.

The second is the map of the BENM Proclamation area with certain attributes identified in the proclamation. (b) (5) DPP

[REDACTED]

The third is a map of the UPLI boundary with those same attributes identified from the proclamation that were on map 2. (b) (5) DPP

[REDACTED]

The fourth is a map showing known paleo sites and potential for paleo resources. (b) (5) DPP

[REDACTED]

The BLM does not have any knowledge regarding why areas excluded under the PLI were included in the National Monument Proclamation. The two most notable differences between the PLI and the National Monument are 1) BLM-administered land north west of Natural Bridges (primarily between Highway 95 and Dark Canyon); and 2) National Forest System Land on the east side of the boundary. BLM does not have information on why areas managed by the National Forest were excluded.

The National Monument Boundary was drawn on a ridge line just south of Highway 95. The current Monument boundary includes areas within the view shed of Highway 95, which is part of the Trail of the Ancients National Scenic Byway. The Monument also includes White Canyon, which is a 45 mile long canyon between the Abajo Mountains and the Colorado River that passes through Natural Bridges National Monument. The area is managed by BLM for special recreation. The area includes a small area (59 acres) that was identified in 2013 as open for commercial oil shale tar sands development.

I can set up a call for tomorrow if you all would like to discuss this information and potential refinements. Also, we are working on maps for the Grand Staircase-Escalante which we are working to have drafts of tomorrow. I hope your weather improves tomorrow. It is 70 in Utah. ed

To: "Roberson, Edwin" <eroberso@blm.gov>
Subject: Re: Requested Maps

Ed,

Could you consolidate these maps <https://www.utahpli.com/maps> onto one document? I assume someone in the state prepared these. I will leave to you how best to convey this- just want to see in one place all that was proposed in PLI in one map, within the overall boundary. And then if you could put the BENM boundary on top of that (like you did on one of the first maps you sent).

Thanks.

All, Here are some updates modified after yesterday's discussion. We did improve the contrast to help you see some of the topography better. We can send larger maps overnight when we have the information depicted satisfactorily.

The first is a map showing the three boundaries--Proclamation, Tribal Proposal and Utah PLI Proposal. This map is similar to the one I sent yesterday except it shows additional analysis of what PLI proposed. PLI proposed establishment of two NCAs,

both of which would be withdrawn from mineral entry. The Indian Creek NCA on the north (434,354 acres) and the Bears Ears NCA on the south (857,603 acres). It also proposed Wilderness areas and released some WSA lands. The areas proposed for wilderness are marked in cross-hatches on the map. There were a few other questions you had about PLI that I will answer below.

The second is the map of the BENM Proclamation area with certain attributes identified in the proclamation. (b) (5) DPP

The third is a map of the UPLI boundary with those same attributes identified from the proclamation that were on map 2. (b) (5) DPP

The fourth is a map showing known paleo sites and potential for paleo resources. (b) (5) DPP

The BLM does not have any knowledge regarding why areas excluded under the PLI were included in the National Monument Proclamation. The two most notable differences between the PLI and the National Monument are 1) BLM-administered land north west of Natural Bridges (primarily between Highway 95 and Dark Canyon); and 2) National Forest System Land on the east side of the boundary. BLM does not have information on why areas managed by the National Forest were excluded.

The National Monument Boundary was drawn on a ridge line just south of Highway 95. The current Monument boundary includes areas within the view shed of Highway 95, which is part of the Trail of the Ancients National Scenic Byway. The Monument also includes White Canyon, which is a 45 mile long canyon between the Abajo Mountains and the Colorado River that passes through Natural Bridges National Monument. The area is managed by BLM for special recreation. The area includes a small area (59 acres) that was identified in 2013 as open for commercial oil shale tar sands development.

I can set up a call for tomorrow if you all would like to discuss this information and potential refinements. Also, we are working on maps for the Grand Staircase-Escalante which we are working to have drafts of tomorrow. I hope your weather improves tomorrow. It is 70 in Utah. ed

Downey,
I had checked the UPLI website and found those maps to be cumbersome. We are looking to see what can be done to pull pieces relevant to the two proposed NCAs. I will get back to you late today or first thing tomorrow. Ed

Ed,

Could you consolidate these maps <https://www.utahpli.com/maps> onto one document? I assume someone in the state prepared these. I will leave to you how best to convey this- just want to see in one place all that was proposed in PLI in one map, within the overall boundary. And then if you could put the BENM boundary on top of that (like you

did on one of the first maps you sent).

Thanks.

All, Here are some updates modified after yesterday's discussion. We did improve the contrast to help you see some of the topography better. We can send larger maps overnight when we have the information depicted satisfactorily.

The first is a map showing the three boundaries--Proclamation, Tribal Proposal and Utah PLI Proposal. This map is similar to the one I sent yesterday except it shows additional analysis of what PLI proposed. PLI proposed establishment of two NCAs, both of which would be withdrawn from mineral entry. The Indian Creek NCA on the north (434,354 acres) and the Bears Ears NCA on the south (857,603 acres). It also proposed Wilderness areas and released some WSA lands. The areas proposed for wilderness are marked in cross-hatches on the map. There were a few other questions you had about PLI that I will answer below.

The second is the map of the BENM Proclamation area with certain attributes identified in the proclamation. (b) (5) DPP

The third is a map of the UPLI boundary with those same attributes identified from the proclamation that were on map 2. (b) (5) DPP

The fourth is a map showing known paleo sites and potential for paleo resources. (b) (5) DPP

The BLM does not have any knowledge regarding why areas excluded under the PLI were included in the National Monument Proclamation. What I am looking for is a map that reflects PLI changes
