This is more focused on hoped-for system sorting than codes - we can use whatever is simplest for classifying the comments once they are sorted, including 1-2-3 etc. Will send some thoughts on that tomorrow and welcome your ideas - particularly since you have done this before!

I did a quick check of comments a minute ago, and the terms I have still seem to capture most. We are over 80,000 overall and 38,+++ for Bears Ears

DRAFT SORTING OF PUBLIC COMMENTS

FIRST, to the maximum extent possible within the capabilities of the system, sort out and count
