The 2019 preseason forecast for the Stikine River is 8,250 large Chinook Salmon (greater than 28 inches total length). A run forecast of this size does not provide an Allowable Catch for either the U.S. or Canada as the forecast is below the lower end of the Escapement Goal Range of 14,000 to 28,000 fish. This action is necessary for Chinook Salmon conservation in the Stikine River and to meet obligations of the Pacific Salmon Treaty.
