

# NFIP Substantial Damage....What is it?

September 17, 2017

The decision about a structure being “substantially damaged” is made at a local government level, generally by a building official or floodplain manager.

Substantial damage applies to a structure in a Special Flood Hazard Area (SFHA) – or 1-percent-annual-chance floodplain – for which the total cost of repairs is 50 percent or more of the structure’s market value before the disaster occurred, regardless of the cause of damage. This percentage could vary among jurisdictions, but must not be below NFIP standards.

For example, if a structure’s market value before the damage was \$200,000 and repairs are estimated to cost \$120,000, that structure is substantially damaged. Land value is excluded from the determination.

For communities that participate in the National Flood Insurance Program (NFIP), substantial damage determinations are required by local floodplain-management ordinances. These rules must be in place for residents of a community to purchase flood insurance through the NFIP.

FEMA does not make a determination of substantial damage and does not notify any property owner of a damage determination. FEMA damage assessment teams may be asked to respond to local requests to assess the extent of disaster-caused damage to some structures. The data is provided to local jurisdictions, which may make substantial damage determinations based on their own ordinances. That information helps property owners decide whether to, or how to, repair or replace a damaged dwelling, and whether additional work will be needed to comply with local codes and ordinances, such as elevating a structure in a SFHA.

If a building in a floodplain is determined by the local official to be substantially damaged, it must be brought into compliance with local floodplain management regulations.

Owners may decide to:

- Elevate their structures, or change them in some other way to comply with those local floodplain regulations and avoid future losses;
- Relocate or demolish the structure; or,
- Flood proof a non-residential structure.

All property owners should check with local building officials to determine which permits for repairs are required before beginning the work. Depending on local codes and ordinances, there can be serious consequences for not complying with the permitting process.

Property owners who have a flood insurance policy through the NFIP and a substantially damaged building (from flooding) in a SFHA may be able to use additional funds – known as Increased Cost of Compliance (ICC) - from their flood insurance policy (up to \$30,000) to help defray the costs of elevating, relocating, demolishing a structure, or flood proofing a non-residential structure.

For more information on ICC, contact your insurance agent.

In some cases, substantial damage determinations can lead to a buyout process, wherein a community may choose to offer to purchase and demolish properties. FEMA intends to implement buyouts for the Hurricane Harvey recovery, and is actively reviewing current laws and procedures to see if FEMA can provide expedited assistance directly to affected, multiple-loss, insured property owners.

For more information, contact your local floodplain administrator, the National Flood Insurance Program (800-427-4661) or your local insurance agent. If you use TTY, you can call the National Flood Insurance Program at 800-427-5593.
