STATE OF UTAH

GARY R. HERBERT
GOVERNOR

OFFICE OF THE GOVERNOR
SALT LAKE CITY, UTAH
84114-2220

SPENCER J. COX
LIEUTENANT GOVERNOR

January 22, 2014

The Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street, N.W., Room 6151
Washington, D.C. 20240

Re: Request for a 60-day Extension for the Public Comment Period for the Utah Greater Sage Grouse Draft Land Use Plan Amendments/Draft Environmental Impact Statement

Dear Secretary Jewell:

I respectfully request the Bureau of Land Management grant a 60-day extension of the public comment period for the Utah Greater Sage Grouse Draft Plan Amendments/Draft Environmental Impact Statement (DEIS).

Utah is a public lands state, and decisions on land use made by our federal agency affect our state, residents, and economy significantly. The DEIS contains many proposed changes, with multiple options for each change, and affects the management of millions of acres in Utah. Many of these changes are complicated and technical, necessitating careful review.

Utah has already devoted time and resources to prepare an aggressive Sage Grouse Conservation Plan, which we have been implementing over the last year. Many of the same state and local agencies implementing the plan have been involved reviewing the hundreds of pages of information and numerous maps contained in the DEIS. Despite the great effort we have made, we have not had adequate time to complete the thorough review necessitated by these monumental changes, thus resulting in this request.

Thank you for your consideration of this request. If you have questions about this request, please contact Kathleen Clarke, director of the Governor's Public Lands Policy Coordination Office, at (801) 537-9083.

Sincerely,

A handwritten signature in black ink that reads "Gary R. Herbert".

FEB 18 2014

The Honorable Gary R. Herbert
Governor
State of Utah
Salt Lake City, Utah 84114

Dear Governor Herbert:

Thank you for your letter dated January 22, 2014, to Secretary of the Interior Sally Jewell requesting an extension of the comment period for the Bureau of Land Management's (BLM) Utah Greater Sage-Grouse Draft Land Use Plan Amendment(LUP)/Draft Environmental Impact Statement (DEIS). Secretary Jewell asked the BLM to respond to your letter.

Since the BLM announced the National Greater Sage-Grouse Planning Strategy in 2011, we have experienced unprecedented levels of state-Federal cooperation on planning efforts and landscape-level strategies to conserve the Greater Sage-Grouse and sagebrush habitat across the West. However, work remains in advance of the U.S. Fish and Wildlife Service's September 2015 court-ordered deadline to determine if the species warrants protection under the Endangered Species Act.

The BLM anticipates that the draft changes to the resource management plans covering the 68 Greater Sage-Grouse planning areas will be finalized in late 2014. Unfortunately, the existing court-ordered deadline does not allow for the flexibility to extend the comment period for the Utah Greater Sage-Grouse LUP/DEIS. In the coming months, the BLM will continue to address the volume and scope of comments we will be receiving on the LUP/DEIS, working closely with cooperating agencies, the state, other Federal agencies, Tribes and other stakeholders. The proposed plan and Final EIS needs to be released in time to allow for the Governor's consistency review, protest period, and protest resolution in order to issue a Record of Decision by Fall 2014.

Thank you for your interest in the BLM's planning efforts for the Greater-Sage Grouse and BLM public lands.

Sincerely,

Neil Kornze

Honorable Sally Jewell
Secretary
United States Department of Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Secretary Jewell:

Thank you for briefing Western Governors last month on your recently finalized Secretarial Order 3330: *Improving Mitigation Policies and Practices of the Department of the Interior*. Though Secretarial Order 3330 went final last week, this letter communicates our initial views, and the attachment propounds questions regarding the Order.

The landscape-based approach envisioned in Secretarial Order 3330 – and increasingly embodied in new federal regulations from the Department of Interior (DOI) and other federal land management agencies – presents certain legal and regulatory complexities. Such a management philosophy must be implemented in a way that clearly recognizes the legal rights and responsibilities of states and private landowners adjacent to federal lands or within shared watersheds and air sheds.

Western Governors share the responsibility – with each other, with federal partners and with private landowners – of managing land within their state's borders. The Governors agree that mitigation for impacts to natural resources is an appropriate element of project development and land use plans.

Governors, however, also bear the responsibility to manage state property interests and preserve private property rights within state boundaries. DOI mitigation requirements and processes that may affect state and private land should be:

- Developed in cooperation with the Governors in whose states DOI lands are situated; and
- Be clearly defined and predictably implemented so proper and reasonable mitigation can be included in project planning.

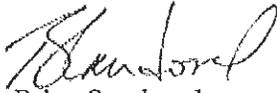

Honorable Sally Jewell
January 21, 2014
Page 2

While individual governors are likely to provide their own comments, attached please find our initial joint comments and questions concerning Order 3330. Western Governors are committed to the protection of Western landscapes. We welcome the opportunity to continue to partner with DOI and other federal land management agencies to ensure effective and conscientious land management and project impact mitigation strategies in the West.

To that end, we respectfully request that DOI share with Western Governors feedback it received from BLM field offices in anticipation of the Jan. 17, 2014 deadline set forth in the Instruction Memorandum appurtenant to the Regional Mitigation Manual and provide Western Governors with an opportunity to comment on the recently finalized Mitigation Policy.

Sincerely,

John Hickenlooper
Governor, State of Colorado
WGA Chairman

Brian Sandoval
Governor, State of Nevada
WGA Vice Chairman

Western Governors' Association – Version 2
Initial Questions and Comments on Secretarial Order 3330
January 21, 2014

While the below list is not intended to represent the entirety of the Western states' input, Secretarial Order 3330 and the accompanying Draft Regional Mitigation Manual Section 1794 (hereafter "Mitigation Policy") leave a number of critical questions unresolved. Among them:

Science:

- The Mitigation Policy indicates it is being developed based on science-based methodologies. By whom are these methodologies being developed? Has state-generated data been taken into account? Will those methodologies be shared with states?
- What is the relationship and interaction between the National Environmental Policy Act (NEPA) and this Mitigation Policy? Will NEPA reviews occur at the landscape, resource management plan and/or specific project levels? How will NEPA be implicated where mitigation occurs off-site?
- The Mitigation Policy calls for DOI to incorporate climate change strategies into mitigation plans. What type or types of climate change modelling will DOI use to estimate the potential future effects of climate change in determining its acceptable form or level of mitigation?
- Under Secretarial Order 3330, the DOI's Energy and Climate Change Task Force is tasked with reviewing existing mitigation practices. Will state strategies inform this review?
- When DOI's Energy and Climate Change Task Force assesses the role of Landscape Conservation Cooperatives (LCCs), how will DOI ensure that the LCCs' role is limited to providing scientific and technical expertise, as distinct from discharging management responsibilities?

Landscape Planning – Cooperation:

- How will DOI coordinate and integrate this planning effort with other federal land management departments/agencies?
- As BLM elevates the role of landscape-scale planning in its mitigation-related decisions, will the agency engage state and private stakeholders early in the planning process?

- What role will states have in determining the location and breadth of specific off-site mitigation?
- Will BLM seek to participate in state-run mitigation programs and, if so, to what extent?
- How will BLM ensure consistency and transparency of mitigation decisions?
- How will this Mitigation Policy be implemented in the field, where BLM field managers exert substantial autonomy? Will staff be trained on how to implement the proposed mitigation strategies? Will local field managers be held accountable for enforcing approved mitigation plans?

Project-Level Application:

- The Mitigation Policy appears to authorize BLM to approve or deny project permit applications based on whether mitigation measures could take place on state-owned or privately-owned lands. Is that a feasible outcome of the Policy?
- In the event a state or private landowner refuses to consent to mitigation plans acceptable to BLM, will project plans still be conditionally approved?
- Large-scale projects and linear development projects such as energy transmission lines are likely to impact a wide array of lands and resources. For such projects, are there any institutional mechanisms to assist in project planning and does BLM plan to take into account state-generated data and research?
- How will this Mitigation Policy be informed by, and reconciled with, President Obama's various Presidential Memoranda and Executive Orders seeking to modernize and streamline federal infrastructure reviews, siting and permitting regulations, policies and procedures?
- In what ways will project proponents be required to incorporate into mitigation proposals requirements of federal land management and environmental statutes including, but not limited to, the Clean Water Act (CWA), the Endangered Species Act, and the Federal Land Management and Policy Act? Will project proponents be provided with specific federal requirements to be taken into account in mitigation proposals?
- Consistency and predictability are essential for project planning and development, particularly with respect to large-scale, long-term projects such as electric transmission lines. How will this effort improve regulatory certainty and minimize financial risks in order to encourage project proponents to pursue important energy infrastructure projects?

- Section 4(a) of the Order states that the DOI Energy and Climate Change Task Force will focus on offsetting the impact of "large development projects." How will the Task Force define what constitutes a "large development project" and identify the types of projects that are excluded? Will "large development projects" include non-energy-related infrastructure? If so, what kinds?

Water

- How will the Mitigation Policy apply to existing facilities and existing rights-of-way on BLM land that are needed to exercise state-issued water rights? How will it apply to efforts to repair, maintain or enlarge existing water facilities on BLM land? How will it apply to efforts to renew or amend an existing right-of-way?
- How will the Mitigation Policy ensure that it does not impair the reasonable exercise of state-issued water rights?
- With specific regard to the CWA, will a project proponent be required to identify a "point source" at the project pre-planning stage and if so, with what level of specificity?

THE SECRETARY OF THE INTERIOR

WASHINGTON

MAR 26 2014

The Honorable John Hickenlooper
Chairman, Western Governors' Association
1600 Broadway, Suite 1700
Denver, Colorado 80202

Dear Governor Hickenlooper:

Thank you for your letter of January 21, 2014, regarding my Secretarial Order (SO) 3330: *Improving Mitigation Policies and Practices of the Department of the Interior*. Effective engagement with state government is critical to the work of the Department of the Interior (Department), and I appreciate your personal interest, as well as that of the other Western Governors.

As you note in your letter, protection of Western landscapes is a goal we all share and one that demands strong partnerships and collaborative land management. Large landscape impacts such as wildland fire, invasive species, transmission lines, and highways do not stop at state borders, and Governors from across the West have partnered to address these common challenges. For example, our experience permitting solar development in the desert Southwest has shown that planning and close coordination among states and Federal agencies can produce faster and smarter permitting that result in more efficient energy development and better environmental outcomes. The Western Governors' Association (WGA) is also leading in this regard with development of its Critical Habitat Assessment Tool, a key aggregator of state wildlife data that Federal managers currently use.

This approach is not without challenges, and my team and I are committed to working closely with Governors, tribes, local officials, and other stakeholders to craft solutions that can achieve broad and durable results. As part of SO 3330, I commissioned a task force to examine the Department's existing mitigation practices and to develop a science-based strategy for landscape-scale planning. The task force is to identify new or revised policies or practices, including any regulatory changes that would be needed, and draft a strategy for how we should address them. I anticipate that report will be completed in the near future. I also have directed my staff to reach out to the staff at WGA to discuss the issues raised in your letter in depth, including your inquiry about the Bureau of Land Management's Regional Mitigation Manual. I understand that productive discussions have already taken place. Our outreach will continue as our work in this area progresses, both with WGA and with individual Governors and state agencies.

I value the strong working relationship the Department has with WGA, and I personally appreciate my partnership with you and your fellow Governors. Should your staff have additional questions, please do not hesitate to contact Letty Belin, Counselor to the Deputy Secretary (202-208-6291), Jim Lyons, Counselor to the Assistant Secretary for Land and Minerals Management (202-208-6734), or Neil Kornze, Principal Deputy Director of the Bureau of Land Management (202-208-3801). A similar letter is being sent to Governor Brian Sandoval.

Sincerely,

A handwritten signature in cursive script that reads "Sally Jewell".

Sally Jewell

THE SECRETARY OF THE INTERIOR
WASHINGTON

MAR 26 2014

The Honorable Brian Sandoval
Vice Chairman, Western Governors' Association
1600 Broadway, Suite 1700
Denver, Colorado 80202

Dear Governor Sandoval:

Thank you for your letter of January 21, 2014, regarding my Secretarial Order (SO) 3330: Improving Mitigation Policies and Practices of the Department of the Interior. Effective engagement with state government is critical to the work of the Department of the Interior (Department), and I appreciate your personal interest, as well as that of the other Western Governors.

As you note in your letter, protection of Western landscapes is a goal we all share and one that demands strong partnerships and collaborative land management. Large landscape impacts such as wildland fire, invasive species, transmission lines, and highways do not stop at state borders, and Governors from across the West have partnered to address these common challenges. For example, our experience permitting solar development in the desert Southwest has shown that planning and close coordination among states and Federal agencies can produce faster and smarter permitting that result in more efficient energy development and better environmental outcomes. The Western Governors' Association (WGA) is also leading in this regard with development of its Critical Habitat Assessment Tool, a key aggregator of state wildlife data that Federal managers currently use.

This approach is not without challenges, and my team and I are committed to working closely with Governors, tribes, local officials, and other stakeholders to craft solutions that can achieve broad and durable results. As part of SO 3330, I commissioned a task force to examine the Department's existing mitigation practices and to develop a science-based strategy for landscape-scale planning. The task force is to identify new or revised policies or practices, including any regulatory changes that would be needed, and draft a strategy for how we should address them. ***Re: Request for extension of Public Comment Period for the Nevada and
Northeastern California Sub-region Greater Sage-grouse Draft Land Use
Plan Amendments/Draft Environmental Impact Statement***

Dear Secretary Jewell:

I respectfully request that the Bureau of Land Management grant a 60-day extension of the public comment period for the Nevada and Northeastern California Sub-region Greater Sage-grouse Draft Land Use Plan Amendments/Draft Environmental Impact Statement (DEIS).

Land management decisions made under the final version of this document will have significant impacts on our economy, custom and culture for decades. The highly-technical DEIS is more than 1,600 pages, including appendices. It is critical to our collective success that all parties – private citizens, local governments, non-governmental organizations, industry and states – have sufficient time to review and provide meaningful comments on this substantial document.

As you know, Nevada and many other states have been working fervently to address the critical issues presented by the potential listing of the Greater Sage-grouse under the Endangered Species Act. Nevada has undertaken substantial initiatives to protect the Greater Sage-grouse and the sagebrush ecosystem, including efforts that are outlined in the State's alternative submittal (Alternative E) as part of the BLM's planning process for the DEIS. We continue to develop and review comments in consultation with our Sagebrush Ecosystem Council, state agencies, the scientific community, and stakeholders across the state.

2014 FEB 18 PM 2:22

FEB 19 2014

The Honorable Brian Sandoval
Governor
State of Nevada
Carson City, Nevada 89701

Dear Governor Sandoval:

Thank you for your letter dated January 17, 2014, to Secretary of the Interior Sally Jewell requesting an extension of the comment period for the Bureau of Land Management's (BLM) Nevada and Northeastern California Sub-region Greater Sage-Grouse Draft Land Use Plan Amendments/Draft Environmental Impact Statement (DEIS). Secretary Jewell asked the BLM to respond to your letter.

Since the BLM announced the National Greater Sage-Grouse Planning Strategy in 2011, we have experienced unprecedented levels of state-Federal cooperation on planning efforts and landscape-level strategies to conserve the Greater Sage-Grouse and sagebrush habitat across the West. However, work remains in advance of the U.S. Fish and Wildlife Service's September 2015 court-ordered deadline to determine if the species warrants protection under the Endangered Species Act. The BLM anticipates that the draft resource management plans covering the 68 Greater Sage-Grouse planning areas will be finalized in late 2014.

Unfortunately, the existing court-ordered deadline does not allow for the flexibility to extend the comment period for the Nevada and Northeastern California Sub-region Greater Sage-Grouse Draft Land Use Plan Amendments/DEIS. In the coming months, the BLM will be addressing comments on the Draft Land Use Plan/DEIS, working closely with cooperating agencies, the state, other Federal agencies, Tribes and other stakeholders. The proposed plan and Final EIS needs to be released in time to allow for the Governor's consistency review, protest period, and protest resolution in order to issue a Record of Decision by fall 2014.

Thank you for your interest in the BLM's planning efforts for the Greater-Sage Grouse and BLM public lands.

Sincerely,

Steve Ellis
Deputy Director for Operations

GREAT OUTDOORS MONTH, 2014

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

On windswept coastlines, in lush forests, and atop striking mountain peaks, Americans take in sights that have inspired generations. Our natural landscapes provide refuge for those seeking solitude. They attract tourism, create jobs, and honor our history and cultural heritage. They are family campgrounds, arenas for recreation, and backdrops for countless adventures. During Great Outdoors Month, we celebrate the rugged beauty that echoes the independence at the heart of the American spirit, and we rededicate ourselves to protecting these open spaces for tomorrow's explorers, athletes, and lovers of nature.

America's conservation legacy is rooted not only in its forward-thinking leaders like Presidents Thomas Jefferson, Abraham Lincoln, and Theodore Roosevelt -- but also in all the Americans who did their part to safeguard a small slice of the land they love. It falls to each of us to advance their legacy in our time. That is why I have permanently protected more than 3 million acres of public land -- including 11 new National Monuments established through the Antiquities Act and new wilderness areas in nine States across the country -- and designated more than a thousand miles of wild and scenic rivers. In my first term, I was proud to launch the America's Great Outdoors Initiative, which increases access to public lands and empowers Americans to better care for the parks, waterways, and natural treasures in their own communities.

My Administration remains committed to developing the next generation of environmental stewards. We created the 21st Century Conservation Service Corps, which provides quality jobs, career pathways, and service opportunities for young people and veterans. We are working to bring public lands into the classroom and to extend educational opportunities to millions of children. And through First Lady Michelle Obama's *Let's Move Outside!* initiative, we are encouraging children to get active while getting to know the great outdoors.

This month, as we enjoy the natural splendor of our Nation, let us stay true to a uniquely American idea -- that each of us has an equal stake in the land around us, and an equal responsibility to protect it. Together, let us ensure our children and grandchildren will be able to look upon our lands with the same sense of wonder as all the generations that came before.

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim June 2014 as Great Outdoors Month. I urge all Americans to explore the great outdoors and to uphold our Nation's legacy of conserving our lands and waters.

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of May, in the year of our Lord two thousand fourteen, and of the Independence of the United States of America the two hundred and thirty-eighth.

BARACK OBAMA

STATE OF ALASKA

Executive Proclamation by *Governor Sean Parnell*

WHEREAS, Alaska is blessed with outstanding opportunities for safe and healthy fun in the great outdoors. Every summer, residents and visitors alike enjoy time spent outside in our state's spectacular wilderness; and

WHEREAS, biking, swimming, hiking, climbing, fishing, paddling, hunting, boating, and many more activities help us experience the physical and mental health benefits of outdoor recreation; and

WHEREAS, Great Outdoors Month is an opportunity to celebrate Alaska's natural treasures and cherish the memorable experiences of being outdoors with family and friends; and

WHEREAS, Alaskans play an important role in caring for and utilizing our natural spaces. Across our state, Alaskans have demonstrated dedication to maintaining our wilderness spaces for future generations, using our natural resources in a responsible manner, and educating our youth on the amazing wonders that surround us; and

WHEREAS, outdoor recreation is vital to Alaska's economy, with annual spending on outdoor recreation at \$9.5 billion, creating 92,000 Alaska jobs; and

WHEREAS, Great Outdoors Month is an opportunity to recognize the importance of Alaska's majestic mountains, pristine waters, and vast landscapes as Alaskans enjoy the opportunities that abound.

NOW, THEREFORE, I, Sean Parnell, Governor of the State of Alaska, do hereby proclaim June 2013 as:

Great Outdoors Month

in Alaska, and encourage all Alaskans to take advantage of opportunities to enjoy the great outdoor activities provided by Alaska's majestic wilderness.

Dated: May 30, 2014

A handwritten signature in blue ink that reads "Sean Parnell".

Sean Parnell, Governor
who has also authorized the
seal of the State of Alaska to
be affixed to this proclamation.

Janice K. Brewer
Governor

Office of the Governor

*** GREAT OUTDOORS MONTH ***

WHEREAS, Arizona is blessed with outstanding opportunities for safe and healthy fun in the Great Outdoors enjoying our natural splendors in the company of family and friends; and

WHEREAS, through biking, swimming, hiking, climbing, paddling, fishing, hunting, boating, OHV riding and many other activities, we are able to enjoy the physically and mentally healthful benefits of outdoor recreation; and

WHEREAS, enjoyment of the Great Outdoors allows us to celebrate the commitment of our state to conserve and protect our air, water, wildlife and lands and contribute to conservation efforts through various licenses, taxes and fees; and

WHEREAS, recreationists are among the most active volunteers in Arizona, working on trails and in visitor centers and campgrounds, on ski slopes and removing invasive species, organizing outdoor programs and events and restoring habitat; and

WHEREAS, Great Outdoors Month connects all of us to the outdoors, and especially our children, through diverse events including National Trails Day, National Fishing and Boating Week, National Marina Day, National Get Outdoors Day, the Great American Backyard Campout and more; and

WHEREAS, the economic impact of outdoor recreation is both large and growing nationally, exceeding \$850 billion in annual expenditures; and

WHEREAS, many of our important cultural and historic events and traditions are linked to places in Arizona which are parts of national, state and local park systems; and

WHEREAS, Great Outdoors Month allows us to celebrate the partnership of federal, state and local agencies, the recreation and tourism industries and recreationists which make outdoor recreation opportunities available, and add new and needed features such as improved trails through the Recreational Trails Program and the Land and Water Conservation Fund.

NOW, THEREFORE, I, Janice K. Brewer, Governor of the State of Arizona, do hereby proclaim June 2014 as

*** GREAT OUTDOORS MONTH ***

and, I further urge all citizens and visitors from other states and other lands to explore and enjoy, protect and conserve Arizona's Great Outdoors.

IN WITNESS WHEREOF, I have hereunto set my hand and caused to be affixed the Great Seal of the State of Arizona

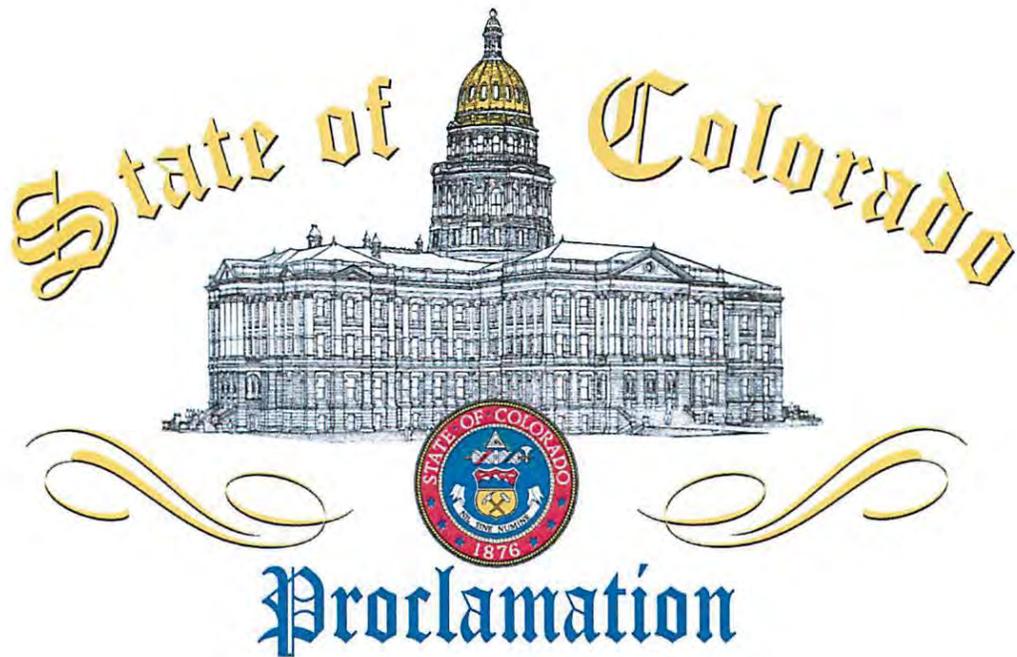

Janice K. Brewer
GOVERNOR

DONE at the Capitol in Phoenix on this eighth day of April in the year Two Thousand and Fourteen, and of the Independence of the United States of America the Two Hundred and Thirty-eighth.

ATTEST:

Kim Blumh
Secretary of State

WHEREAS, Colorado boasts a multitude of natural wonders, including our Rocky Mountains, the Colorado River, the Great Sand Dunes, many state parks throughout the state; and

WHEREAS, the abundance of opportunities to swim, fish, hike, bike, ski, run, kayak, and explore Colorado presents visitors and residents the chance to enjoy the environment and experience our vast outdoors; and

WHEREAS, those who take advantage of the opportunities afforded them in the outdoors generally live longer, healthier, fuller lives than those who do not; and

WHEREAS, Colorado receives over 300 days of sunlight, making almost any day a perfect day to be outdoors; and

WHEREAS, the State of Colorado encourages its citizens and visitors to take advantage of the beauty and cleanliness of our state by participating in outdoor activities and leading healthier, fuller lives;

Therefore, I, John W. Hickenlooper, Governor of the State of Colorado, do hereby proclaim June, 2014,

GREAT OUTDOORS MONTH

in the State of Colorado.

GIVEN under my hand and the Executive Seal of the State of Colorado, this first day of June, 2014

John W. Hickenlooper
John W. Hickenlooper
Governor

Proclamation *Presented*

In Recognition of Great Outdoors Month

WHEREAS, Great Outdoors Month reminds us that Hawai'i provides outstanding opportunities to enjoy the Great Outdoors and experience unique landscapes, ocean waters, and flora and fauna existing nowhere else in the world; and

WHEREAS, Great Outdoors Month highlights that year-round outdoor recreation such as swimming, hiking, biking, paddling, surfing, fishing, hunting, boating and jogging provide physical and mental health benefits for our people; and

WHEREAS, Great Outdoors Month allows us to celebrate the commitment of our state to conserve and protect our 'aina, including the water, air, and wildlife; and

WHEREAS, Great Outdoors Month celebrates those recreational users who are among the most active volunteers in Hawai'i, maintaining trails, restoring native forests and wildlife habitat, revitalizing near shore reef habitat and marine life, caring for our cultural and historical sites, and organizing programs to share the Great Outdoors; and

WHEREAS, Great Outdoors Month recognizes the economic impact in Hawai'i where it is estimated that we spend \$8.5 billion on outdoor recreation which supports 65,000 jobs; and

WHEREAS, Great Outdoors Month celebrates the partnership of federal, state and local agencies, and the recreation and tourism industries to promote recreational opportunities and make them available to all residents and visitors;

NOW, THEREFORE, I, NEIL ABERCROMBIE, Governor, and I, SHAN S. TSUTSUI, Lieutenant Governor of the State of Hawai'i, do hereby proclaim June, 2014, as

"GREAT OUTDOORS MONTH"

in Hawai'i and ask the people of the Aloha State to join us in recognizing our State's commitments to protecting our outdoor spaces and celebrating all that they have to offer.

DONE at the State Capitol, in the Executive Chambers, Honolulu, State of Hawai'i, this thirtieth day of May, 2013.

NEIL ABERCROMBIE
Governor, State of Hawai'i

SHAN S. TSUTSUI
Lt. Governor, State of Hawai'i

Executive Department
State of Idaho

The Office of the Governor

State Capitol

Proclamation

Boise

WHEREAS, Idaho is blessed with outstanding opportunities for safe and healthy fun in the great outdoors, enjoying our natural splendors in the company of family and friends old and new; and

WHEREAS, biking, swimming, hiking, climbing, paddling, fishing, hunting, boating and many more activities help us enjoy the physically and mentally healthful benefits of outdoor recreation; and

WHEREAS, enjoyment of the great outdoors enables us to celebrate the commitment of our state to conserving and protecting our air, water, wildlife and lands, and contributing to conservation efforts through various licenses, taxes and fees; and

WHEREAS, recreationists are among the most active volunteers in Idaho, working on trails and in visitor centers and campgrounds, on ski slopes and removing invasive species, organizing outdoor programs and events and restoring habitat; and

WHEREAS, Great Outdoors Month includes diverse events designed to connect all of us to the outdoors, and especially our children and youth, including National Trails Day, National Fishing and Boating Week, Welcome to the Water on National Marina Day, National Get Outdoors Day, the Great American Backyard Campout and more; and

WHEREAS, the economic impact of outdoor recreation is large and growing, exceeding \$650 billion in annual expenditures nationally and estimated at \$6.3 billion in Idaho, supporting some 65,000 jobs here; and

WHEREAS, many of our important cultural and historic events and traditions are linked to places in our state which are parts of national, state and local park systems; and

WHEREAS, Great Outdoors Month allows us to celebrate the partnership of federal, state and local agencies, the recreation and tourism industries and recreationists making outdoor recreation opportunities available, and adds such new and needed features as improved trails through the Recreational Trails Program and the Land and Water Conservation Fund;

NOW, THEREFORE, I, C.L. "BUTCH" OTTER, Governor of the State of Idaho, do hereby proclaim June 2014 to be

GREAT OUTDOORS MONTH

in Idaho, and urge all citizens and visitors from other states and other lands to explore and enjoy, protect and conserve Idaho's great outdoors.

IN WITNESS WHEREOF, I have hereunto set my hand and caused to be affixed the Great Seal of the State of Idaho at the Capitol in Boise on this 1st day of June in the year of our Lord two thousand and fourteen and of the Independence of the United States of America the two hundred thirty-eight and of the Statehood of Idaho the one hundred twenty-fourth.

Washington DC 20005

Dear Friends:

I am pleased to recognize June 2014 as "Great Outdoors Month" and June 14th as "National Get Outdoors Day" in the State of Montana.

I support your efforts to educate the public about the value and importance of outdoor recreation and preserving our natural surroundings.

Montana's outdoor heritage is an important part of our cultural legacy. Many Montanans volunteer their time and energy to preserving and protecting our natural surroundings and this builds stronger communities and healthier citizens. As Governor, I am proud of the efforts we have made to protect our clean air and water for future generations.

I encourage Montanans to acknowledge June 2014 as "Great Outdoors Month" and to plan a trip to one of our national forests, state parks, or other public lands on June 14th for "National Get Outdoors Day."

Sincerely,

A handwritten signature in black ink, appearing to be "Steve Bullock".

STEVE BULLOCK
Governor

A Proclamation by the Governor

WHEREAS, Nevada is blessed with outstanding opportunities for safe and healthy fun in the great outdoors enjoying our natural splendors in the company of family and in the company of old and new friends; and

WHEREAS, biking, swimming, hiking, climbing, paddling, fishing, hunting, boating and many more activities help us enjoy the physical and mental benefits of outdoor recreation; and

WHEREAS, enjoyment of the great outdoors allows us to celebrate the commitment of our state to conserve and protect our air, our water, our wildlife and our lands and contribute to conservation efforts through various licenses, taxes and fees; and

WHEREAS, recreationists are among the most active volunteers in Nevada, working on trails and in visitor centers and campgrounds, on ski slopes and removing invasive species, organizing outdoor programs and events and restoring habitat; and

WHEREAS, Great Outdoors Month includes diverse events designed to connect all of us to the outdoors, and especially our children and youth, including National Trails Day, National Fishing and Boating Week, Welcome to the Water on National Marina Day, National Get Outdoors Day, the Great American Backyard Campout and more; and

WHEREAS, the economic impact of outdoor recreation is both large and growing nationally, exceeding \$650 billion in annual expenditures; and

WHEREAS, many of our important cultural and historic events and traditions are linked to places in our state which are parts of national, state and local park systems; and

WHEREAS, Great Outdoors Month allows us to celebrate the partnership of federal, state and local agencies, the recreation and tourism industries and recreationists which makes outdoor recreation opportunities available, and adds new and needed features such as improved trails through the Recreational Trails Program and the Land and Water Conservation Fund;

NOW, THEREFORE, I, BRIAN SANDOVAL, GOVERNOR OF THE STATE OF NEVADA, do hereby proclaim June 2014 as

GREAT OUTDOORS MONTH IN NEVADA

In Witness Whereof, I have hereunto set my hand and caused the Great Seal of the State of Nevada to be affixed at the State Capitol in Carson City, this 30th day of April, 2014.

By the Governor:

Governor

Brian Sandoval

Secretary of State

By _____

Deputy

STATE OF NEW MEXICO EXECUTIVE OFFICE SANTA FE, NEW MEXICO

Proclamation

WHEREAS, NEW MEXICO IS BLESSED WITH OUTSTANDING OPPORTUNITIES FOR SAFE AND HEALTHY FUN IN THE GREAT OUTDOORS, SUCH AS ENJOYING OUR NATURAL SPLENDORS IN THE COMPANY OF FAMILY FRIENDS; AND

WHEREAS, BIKING, SWIMMING, HIKING, CLIMBING, PADDLING, FISHING, HUNTING, BOATING, AND MANY MORE ACTIVITIES HELP US ENJOY THE PHYSICAL AND MENTAL HEALTH BENEFITS OF OUTDOOR RECREATION; AND

WHEREAS, ENJOYMENT OF THE GREAT OUTDOORS ALLOWS US TO CELEBRATE THE COMMITMENT OF OUR STATE TO CONSERVE AND PROTECT OUR AIR, WATER, WILDLIFE, AND LANDS, AND CONTRIBUTE TO CONSERVATION EFFORTS; AND

WHEREAS, RECREATIONISTS ARE AMONG THE MOST ACTIVE VOLUNTEERS IN NEW MEXICO, WORKING ON TRAILS, IN VISITOR CENTERS, CAMPGROUNDS, AND SKI SLOPES, REMOVING INVASIVE SPECIES, ORGANIZING OUTDOOR PROGRAMS AND EVENTS, AND RESTORING HABITAT; AND

WHEREAS, GREAT OUTDOORS MONTH CONNECTS ALL OF US TO THE OUTDOORS THROUGH DIVERSE EVENTS, INCLUDING NATIONAL TRAILS DAY, NATIONAL FISHING AND BOATING WEEK, NATIONAL MARINA DAY, NATIONAL GET OUTDOORS DAY, THE GREAT AMERICAN BACKYARD CAMPOUT, AND MORE; AND

WHEREAS, THE ECONOMIC IMPACT OF OUTDOOR RECREATION IS LARGE, EXCEEDING \$650 BILLION NATIONALLY, AND IN NEW MEXICO, IT IS ESTIMATED AT \$8 BILLION, SUPPORTING NEARLY 100,000 IN JOBS; AND

WHEREAS, MANY OF OUR IMPORTANT CULTURAL AND HISTORIC EVENTS AND TRADITIONS ARE LINKED TO PLACES IN OUR STATE WHICH ARE PARTS OF NATIONAL, STATE, AND LOCAL PARK SYSTEMS; AND

WHEREAS, GREAT OUTDOORS MONTH ALLOWS US TO CELEBRATE THE PARTNERSHIP OF FEDERAL, STATE, AND LOCAL AGENCIES, THE RECREATION AND TOURISM INDUSTRIES, AND RECREATIONISTS WHO MAKE OUTDOOR RECREATION OPPORTUNITIES AVAILABLE, AND ADDS NEW AND NEEDED FEATURES SUCH AS IMPROVED TRAILS THROUGH THE RECREATIONAL TRAILS PROGRAM AND THE LAND AND WATER CONSERVATION FUND;

NOW, THEREFORE I, SUSANA MARTINEZ, GOVERNOR OF THE STATE OF NEW MEXICO, DO HEREBY PROCLAIM THE MONTH OF JUNE, 2014 AS

“GREAT OUTDOORS MONTH”

THROUGHOUT THE STATE OF NEW MEXICO, AND I URGE ALL NEW MEXICANS AND VISITORS TO EXPLORE, ENJOY, PROTECT, AND CONSERVE NEW MEXICO’S GREAT OUTDOORS.

SIGNED AT THE EXECUTIVE OFFICE
THIS 28TH DAY OF APRIL 2014.

WITNESS MY HAND AND THE GREAT
SEAL OF THE STATE OF NEW MEXICO

Susana Martinez
SUSANA MARTINEZ
GOVERNOR

ATTEST:

Dianna J. Duran
DIANNA J. DURAN
SECRETARY OF STATE

STATE OF OREGON

PROCLAMATION

OFFICE OF THE GOVERNOR

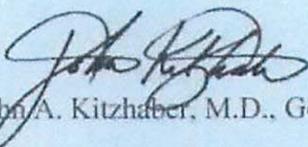

- WHEREAS:** Our great Northwest provides numerous opportunities for fun outdoor activities through shared resources of our parks, forests, refuges, and other public lands and waters; and
- WHEREAS:** June is an especially active time for recreation and many summertime activities that range from enjoyment of wildlife viewing to adventure sports like rock climbing; and
- WHEREAS:** Outdoor recreation is enjoyed by nearly every one and plays an important positive role in providing numerous mental, physical, economic and social benefits; and
- WHEREAS:** Countless citizens volunteer their time and talents to protect our natural resources to help ensure that great outdoor places remain where families and friends can learn, exercise, and create meaningful memories; and
- WHEREAS:** Recreation is a valuable means for education to reach America's youth with the message that outdoor recreation is a fun, healthy use of leisure time.
- NOW,**
THEREFORE: I, John A. Kitzhaber, M.D., Governor of the State of Oregon, hereby proclaim **June 2014** to be

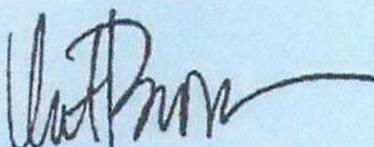

GREAT OUTDOORS MONTH

in Oregon and encourage all Oregonians to join in this observance.

IN WITNESS WHEREOF, I hereunto set my hand and cause the Great Seal of the State of Oregon to be affixed. Done at the Capitol in the City of Salem in the State of Oregon on this day, April 16, 2014.

John A. Kitzhaber, M.D., Governor

Kate Brown, Secretary of State

Gary Richard Herbert

Governor

Declaration

Whereas, Utah provides outstanding adventures for families and individuals in the great outdoors amid the natural splendors of our Mighty 5th national parks, national monuments and forests, 43 state parks, and other public lands;

Whereas, hiking, biking, climbing, skiing, horseback riding, ATV driving, hunting, fishing, camping, swimming, boating, river running, and many other activities and sports allow Utah residents and visitors to enjoy the physical and mental benefits of outdoor recreation;

Whereas, enjoyment of the great outdoors not only lets us acclaim Utah's commitment to conserve and protect our air, water, wildlife, landscapes, and lands, but also contributes significantly to conservation efforts through the collection of user fees, licenses, and taxes;

Whereas, recreational users of the great outdoors are among the most active volunteers in Utah, removing invasive species and restoring habitat along waterways, trails, and ski slopes, staffing visitors centers and campgrounds, and organizing outdoor programs and events;

Whereas, many of Utah's important cultural and historic events and traditions are linked to places that belong to national, state, and local park systems, and Great Outdoors Month connects all of us, particularly our children, to the outdoors through diverse events, including National Trails Day, National Fishing and Boating Week, National Marina Day, National Get Outdoors Day, and the Great American Backyard Campout;

Whereas, the economic impact of the outdoor recreation industry is significant and is growing both locally—being an estimated \$7 billion a year and supporting about 124,000 jobs in Utah—and nationally, exceeding \$650 billion in annual expenditures; and

Whereas, we wish to recognize the partnership of federal, state, and local agencies, as well as Utah's recreation and tourism industries, which make outdoor recreation opportunities in our state available for all to enjoy;

Now, therefore, I, Gary R. Herbert, Governor of the State of Utah, do hereby declare June 2014 as

Great Outdoors Month in Utah

A handwritten signature in black ink that reads "Gary R. Herbert".
Governor

The State of Washington

Proclamation

WHEREAS, Washington State residents have a proud tradition of both safeguarding the environment and enjoying the outdoors; and

WHEREAS, a clean and sustainable environment contributes to our quality of life; and

WHEREAS, outdoor recreation promotes health, fitness, and environmental awareness; and

WHEREAS, outdoor recreation is an ideal way to exercise, appreciate nature, and enjoy memorable experiences with family and friends; and

WHEREAS, it is up to all of us to maintain and enhance our legacy of environmental stewardship and appreciation of the great outdoors; and

WHEREAS, it is our duty to leave a well-tended legacy to those who will follow;

NOW, THEREFORE, I, Jay Inslee, Governor of the state of Washington, do hereby proclaim June 2014 as

Great Outdoors Month

in Washington, and I urge all people to take the time to enjoy our state's various outdoor activities, to share them with family and friends, and to make outdoor activities a regular part of their lives.

Signed this 1st day of April, 2014

A blue ink signature of Jay Inslee, the Governor of Washington, written in a cursive style.

Governor Jay Inslee

GOVERNOR'S PROCLAMATION

WHEREAS, Great Outdoors Month celebrates open spaces; and

WHEREAS, Wyoming residents stay healthy and enjoy the outdoors in a variety of ways including biking and hiking, paddling and swimming, fishing and hunting; and

WHEREAS, volunteers help others enjoy the outdoors by organizing recreational programs and events, restoring habitat and through work on trails and ski slopes and in visitor centers and campgrounds; and

WHEREAS, one link to Wyoming's outdoor culture, history and traditions is the national, state and local park system; and

WHEREAS, "WY Outside," a coalition of public, private and nonprofit organizations, was established to encourage children and families to enjoy the outdoors throughout the year; and

WHEREAS, the Wyoming Department of State Parks will hold its 6th annual "Summer Outdoor Slam" at Curt Gowdy State Park on June 7 in honor of National Great Outdoors Day, offering a variety of recreational opportunities for children and families; and

WHEREAS, other events such as National Trails Day, National Fishing and Boating Week, National Marina Day and the Great American Backyard Campout also encourage people to get outside; and

WHEREAS, all of those who work and volunteer to make outdoor activities available hope that everyone can enjoy the outdoors.

NOW THEREFORE, I, MATTHEW H. MEAD, Governor of the State of Wyoming, do hereby proclaim June, 2014 as

GREAT OUTDOORS MONTH

in Wyoming.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Executive Seal of the Governor of Wyoming to be affixed this 22 day of May, 2014.

Matthew H. Mead
Governor

DOI in the News:

INTERIOR TO WITHDRAW LISTING FOR BISTATE SAGE GROUSE. The [AP](#) (4/22, Sonner) reports that Interior Secretary Sally Jewell "reversed the government's proposed federal protection for a type of sage grouse specific to California and Nevada on Tuesday, and said it shows it's still possible to head off a bigger, looming listing decision for the greater sage grouse across 11 western states." Jewell "joined Nevada Gov. Brian Sandoval and others in announcing she's withdrawing the government's 2013 proposal to declare the bistate, Mono Basin sage grouse a threatened species along the California-Nevada line." Jewell said, "What this has shown is that despite the stresses we feel on the landscape here — particularly around drought and wildfire and other stresses that impact this part of the world — we can still create and find habitat that supports sage grouse."

The [Summit County \(CO\) Citizens Voice](#) (4/21, 506) reports that "the decision is another step in piece-mealing greater sage-grouse toward extinction, according to conservation advocates and biologists." They claim that "the voluntary conservation measures touted by the federal agency won't do much to protect the so-called bi-state greater sage-grouse population from threats like hardrock mining, exurban development and livestock grazing."

The [Environment & Energy Publishing](#) (4/21, Subscription Publication, 705) reports that "the Fish and Wildlife Service's decision to withdraw its October 2013 proposal to list the bi-state population of greater sage grouse as "threatened" signals that the Obama administration may be able to reach a similar species-listing determination in September for the greater sage grouse, which roams 11 Western states."

Additional coverage provided by [The New York Times](#) (4/22, Press, Subscription Publication, 9.97M), [KHQ](#) Spokane, WA (4/22, 77K), [KOLO](#) Reno, NV (4/22, 3K), [WSB-TV Atlanta \(GA\)](#) Atlanta (4/22, 167K), [KTVN-TV Reno \(NV\)](#) Reno, NV (4/22, 2K), [KRNVT-TV Reno \(NV\)](#) Reno, NV (4/22, 2K), [KOLO-TV Reno \(NV\)](#) Reno, NV (4/22, 3K), [KTVZ-TV Bend \(OR\)](#) Bend, OR (4/22, 4K), and [KRNVT](#) Reno, NV (4/22, 2K).

Earlier coverage was provided by the [San Francisco Chronicle](#) (4/22, 2.21M), [Kitsap Sun](#) (4/22, 61K), [The Montana Standard](#) (4/21, 39K), [WAFS](#) (4/22), and [Fox Business](#) (4/20, 408K).

EIGHT CITIES AWARDED FEDERAL PARK GRANTS. The [E&E Daily](#) (4/21) reports that "the Obama administration today announced the awarding of \$3 million in federal grants to eight cities to help establish or restore parks and other outdoor recreation facilities in largely low-income, disadvantaged neighborhoods nationwide." The article notes that "the grants, awarded under the Outdoor Recreation Legacy Partnership established last year, are possible due to royalties collected from offshore oil and gas exploration through the Land and Water Conservation Fund (LWCF)."

The [Neighbor Newspapers Atlanta](#) (4/22) reports that cities receiving grants are Alata, Geo.' Mobile, Ala.; Denver; Bridgeport, Conn.; Detroit; Minneapolis, Minn.; Portland, Ore.; and Madison, Wis. Jewell said, "These eight projects are models of what we have been able to accomplish through the Land and Water Conservation Fund over the past half century. We are reinvesting revenues from offshore oil and gas development into parks and open spaces, giving back a portion of what we have taken from our lands and waters. These investments will bring badly needed outdoor spaces and recreational opportunities to urban areas where people — especially young people — will benefit from improved places for healthy outdoor activities."

Coverage was also provided by the [Connecticut Post](#) (4/22, 299K), [The San Francisco Chronicle](#) (4/22, 2 21M), [Crain's Detroit Business](#) (4/21, 2K), [Fox 28](#) South Bend, IN (4/22, 3K), and [Click on Detroit](#) Detroit (4/22, 219K).

Also providing coverage are the [Alabama Live](#) (4/22, 502K), the [Connecticut News](#) (4/21), the [Minneapolis Star Tribune](#) (4/22, Brandt, 1.37M), the [Minneapolis \(MN\) Star Tribune](#) (4/22, Brandt, 1.37M), the [Minneapolis \(MN\) Star Tribune](#) (4/22, Brandt, 1.37M), the [Madison \(WI\) Capital Times](#) (4/22, 160K), the [Wisconsin State Journal](#) (4/22, 264K), the [Denver \(CO\) Post](#) (4/22, Finley, 804K), [Crain's Detroit \(MI\) Business](#) (4/21, 2K), the [Houston \(TX\) Chronicle](#) (4/22, 2.28M), the [Oregonian](#) (4/22, 950K), [My Central Oregon](#) (4/21), the [Oregonian](#) (4/22, 950K), [WCCO-AM](#) Minneapolis (4/21, 70K), [WXYZ-TV Detroit \(MI\)](#) Detroit (4/22, 101K), [WCCO-AM Minneapolis \(MN\)](#) Minneapolis (4/21, 70K), [WTOL-TV Toledo \(OH\)](#) Toledo, OH (4/22, 453), [WBRC-TV Birmingham \(AL\)](#) Birmingham, AL (4/22, 42K), [WSFA-TV Montgomery \(AL\)](#) Montgomery, AL (4/22, 30K), [WDIV-TV Detroit \(MI\)](#) Detroit (4/22, 219K), [KMGH-TV Denver \(CO\)](#) Denver (4/22, 136K), [WVIT-TV New Haven \(CT\)](#) New Haven, CT (4/22, 56K), and [WKOW-TV](#) Madison, WI (4/21, 3K).

OBAMA ADMINISTRATION ANNOUNCES RESILIENT LANDS AND WATERS INITIATIVE. The [E&E Daily](#) (4/21) reports that "the Obama administration announced plans today to boost federal cooperation with local partners to prepare four major landscapes for sea-level rise, drought, wildfires, invasive species and other effects of climate

change." The article notes that "the focus regions – southwest Florida, Hawaii, Washington's Puget Sound watershed and the Great Lakes – are areas where the federal government already has major environmental efforts underway." The new Resilient Lands and Waters Initiative will "have federal agencies working with state, local and tribal partners 'to develop more explicit strategies and maps' relating to changes related to climate change, the administration said."

[KGMB-TV](#) Honolulu (4/22, 63K) reports that Interior Secretary Sally Jewell said, "Climate change is impacting every corner of the nation – from the Everglades to the Arctic – which has ramifications for our natural and cultural heritage, public health and economic activity. Through increased collaboration, we can pool resources and bring the best available science to bear as we take a landscape-level approach to make these treasured lands and waters more resilient to the impacts of climate change."

Also reporting on the story are the [Cleveland Plain Dealer](#) (4/22, 1.01M), the [Seattle \(WA\) Times](#) (4/22, 1.05M), the [Toledo \(OH\) Blade](#) (4/22, 253K), (4/21) the [Big Island \(HI\) Video News](#) (4/21), [Southeast AgNet](#) (4/21), and [KMGH-TV](#) Denver (4/22, 136K).

CONTINUING COVERAGE OF IHS CERAWEEK CONFERENCE. The [E&E Daily](#) (4/21) reports that "thousands of executives have gathered in Houston for the IHS CERAWEEK conference, founded by Cambridge Energy Research Associates."

[Splash 24/7](#) (4/22) reports that Interior Secretary Sally Jewell "suggested on Monday that the administration's five-year plan for offshore oil and gas exploration could be scaled back." Speaking at the annual IHS CERAWEEK energy industry conference in Houston as it opened, Jewell said "the plan may change before it is proposed and finalized by 2016, but those changes would only be reductions in lease sales, not increases." Additional coverage of the offshore plan was provided by [Bloomberg BNA](#) (4/22, 8K).

The [Houston Chronicle](#) (4/22, 2.28M) reports that "the CEO of ConocoPhillips and the U.S. interior secretary offer different views on the role of government in regulating drilling on public lands."

Additional coverage was provided by [FuelFix](#) (4/21, 7K).

ADDITIONAL COVERAGE OF NEWEST NATIONAL LANDMARKS. Additional coverage of the newest National Historic Landmarks was provided by the [Indianapolis Star](#) (4/21, 593K).

ADDITIONAL COVERAGE INTERIOR CONSIDERS HIKE IN OIL AND GAS ROYALTY RATES. Additional coverage that "the Department of Interior is considering updating rules governing royalties and other costs companies pay for producing oil and gas on federal lands that have not been changed in decades" was provided by the [High Country \(CO\) News](#) (4/22, 74K).

ADDITIONAL COVERAGE OF STATE EFFORTS TO TAKE CONTROL OF FEDERAL LANDS. Additional coverage of state efforts to take control of federal lands was provided by the [Las Vegas Review-Journal](#) (4/22, 398K).

INTERIOR ACCUSED OF CONTRIBUTING TO POLLUTION PROBLEM. In an op-ed for the [Panam Post](#) (4/21), Nick Zaiac, a public-policy researcher, writes that "the US federal government is one of the largest, if not the largest, polluter on the planet." As an example, he points to the Interior Department, "an agency designed to manage federal lands, which has provoked regular environmental scandals for more than 100 years." Zaiac claims that "the agency has long been protected by little other the fact that it appears to be one of the most dull, uninteresting parts of the federal bureaucracy."

POLICY ANALYST SAYS OBAMA ADMINISTRATION PLANNING TO CREATE MASSIVE "CLIMATE CHANGE INDUSTRY." Paul Driessen, senior policy analyst for the Committee For A Constructive Tomorrow, writes in a [Washington Times](#) (4/22, 644K) op-ed that the Obama Administration "plans to make the climate crisis industry so enormous that no one will be able to dismantle it, even as computer models and disaster claims totally lose credibility," even if the GOP controls both Congress and the presidency after President Obama leaves office. The White House is "pursuing this agenda even though global warming is dead-last in the latest Gallup poll of 15 issues" and is rooted in "deceitful claims [that] are consistently contradicted by real-world data." Driessen calls for congressional hearings on agency expenditures and actions regarding climate science.

[America's Great Outdoors:](#)

National Park Service:

OBAMA TO TRAVEL TO EVERGLADES TO TALK CLIMATE CHANGE. [The Hill](#) (4/22, Cama, Henry, 224K) reports President Obama will travel today "to the Everglades in Florida to deliver a speech about Earth Day." He is expected "to speak extensively about national parks and other valuable land assets and the threats that climate change poses to them." During his weekly address, Obama said, "Climate change can no longer be denied or ignored. ... The world is looking to the United States, to us, to lead. And that's what we're doing."

The [AP](#) (4/22, 2 28M) reports that "Everglades National Park will be closing its main road and some buildings near its main entrance because President Barack Obama is visiting."

[The Hill](#) (4/22, Cama, 224K) reports President Obama was "sharply criticized" by Florida Gov. Rick Scott "for a backlog in federal funding for restoration of the Everglades." The governor's statement yesterday "came a day before Obama plans to use the Everglades as a backdrop for an Earth Day speech where he'll highlight the impact that he says climate change has on national parks and the economy." Scott said, "President Obama needs to live up to his commitment on the Everglades and find a way to fund the \$58 million in backlog funding Everglades National Park hasn't received from the federal government."

The "Inside The Beltway" column of the [Washington Times](#) (4/22, Harper, 644K) reports, "President Obama will journey aboard Air Force to visit the Everglades on Wednesday, burning jet fuel and taxpayer funds as he goes. Well, at least it's not as far as Tokyo, which was his Earth Day destination last year." That trip "prompted the London Daily Mail to do the math and reveal that magnificent but pricey aircraft consumes 5 gallons of jet fuel for every mile it flies — emitting over 21 pounds of dreaded CO₂ per gallon."

Additional coverage of President Obama's planned trip to the Everglades on Earth Day was provided by the [Grist](#) (4/22, 9K).

MAMMOTH SITE NEARS FEDERAL ADOPTION AFTER COUNCIL RESOLUTION. The [Waco \(TX\) Tribune-Herald](#) (4/22, 111K) reports that "the Waco City Council unanimously agreed Tuesday to relinquish the core of the Waco Mammoth Site to the federal government, contingent on President Barack Obama making it a national monument." The measure "grants the 5-acre dig site and all excavated bones to the National Park Service and allows an adjacent 108 acres to be part of the national park system while remaining under city ownership."

SENATORS WANT NATIONAL PARK PASSES TO BE SOLD ONLINE. The [AP](#) (4/22, 2.28M) reports that "Sens. Angus King and Susan Collins are urging federal officials to make it possible for National Park passes to be purchased online or through a phone app." In a letter to the Interior Department and the NPS on Tuesday, King and Collins "suggest that a pilot program could be set up at Maine's Acadia National Park to test the electronic sale of passes."

SEN. THUNE TO INTRODUCE BILL ON PRESCRIBED BURNS. The [Rapid City \(SD\) Journal](#) (4/22, 101K) reports that Sen. John Thune said Monday that "he will introduce a bill to establish new standards for prescribed burns like the one that escaped this month at Wind Cave National Park." Thune's office said the legislation was "still being worked on and could be introduced Wednesday." Thune said, "We're not trying to impede their ability to do prescribed burns. Obviously, they can work as a tool in some circumstances. But when they go about it this way, they're just asking for trouble. So we think there ought to be at least some conditions that they have to give consideration to before they do it."

APOSTLE ISLANDS NATIONAL LAKESHORE OFFICIALS CALL VISITOR FEE A SUCCESS. The [AP](#) (4/21, Press, 5.17M) reports that "the Apostle Islands National Lakeshore plans to use thousands of dollars generated through a new fee for visiting the ice caves this winter to cover the cost of additional staff and equipment." The article notes that "officials are calling the fee sustainable after it brought \$140,000 in revenue, a portion of which was shared with the National Park Service." However, "the Apostle Islands were left with \$134,700 and will use the money to hire temporary employees to prepare for next season and for other visitor services."

Also providing coverage is the [Minneapolis Star Tribune](#) (4/22, Louwagie, 1.37M).

STUDENTS HONORED WITH NPS' HARTZOG VOLUNTEER YOUTH GROUP AWARD. The [Ventura County \(CA\) Star](#) (4/22, 203K) reports that "students in Buena High School's Environmental Club and their advisers were honored today with the National Park Service's Hartzog Volunteer Youth Group Award." The article notes that "for more than 17 years, the 1,000 Ventura students and teachers have volunteered to restore native plant communities on Anacapa Island." Yvonne Menard, spokeswoman for

Channel Islands National Park, said, "These teachers and student volunteers have consistently and enthusiastically traveled to the island by boat one day a month, month after month, to work to remove nonnative iceplant and plant native plants on Anacapa Island."

Additional coverage was provided by [KEYT-TV](#) Santa Barbara, CA (4/22, 2K).

CAPITOL REEF NATIONAL PARK RECOGNIZED FOR DARK SKIES. The [AP](#) (4/22, 2.28M) reports that "Capitol Reef National Park has joined a handful of sites designated as having the highest quality night skies." The international Dark Skies Association has named Capitol Reef a Gold Tier International Dark Sky Park.

CONSERVATORS RESTORE GRAFFITI-SCARRED BARKER DAM IN JOSHUA TREE NATIONAL PARK. The [AP](#) (4/22, 2.28M) reports that "painstaking work by conservators has restored the appearance of Joshua Tree National Park's historic Barker Dam, which became scarred with scratched graffiti as California's drought caused water levels to fall." The NPS says "conservators from the University of New Mexico spent a year and a half developing a process to deal with the scratches and then worked last month to conceal the graffiti."

RESEARCHERS SAY ARTIFACT SHOWS PREHISTORIC ALASKA, ASIA TRADE. The [AP](#) (4/22, 2.28M) reports that "researchers at the Bering Land Bridge National Preserve have confirmed a second piece of evidence in four years that points to Northwest Alaska's trade with Asia dating back 1,000 years." According to the article, "University of Colorado researchers have spent the last year tracing a flake of obsidian found at the site to the Chukotka peninsula in Russia." NPS archaeologist Jeff Rasco said "the thumbnail-sized piece of rock is likely the remnant of a tool that was sharpened at the site hundreds of years ago."

PUBLIC HEARING HELD ON HOG FARM'S REQUEST TO MODIFY OPERATING PERMIT. The [Baxter \(AR\) Bulletin](#) (4/21, 28K) reports that "a request to modify C&H Hog Farm's permit drew about 50 people to the Jasper School Cafeterium for a public hearing by the Arkansas Department of Environmental Quality." According to the article, "there were comments opposing the request as well as asking ADEQ to allow the modification." The article notes that "no action was taken on the request at Monday night's hearing, and Ryan Benefield, ADEQ deputy director, said it will be a few weeks before the agency announces a decision."

DEAD HUMPBACK WHALE WASHES ONTO EAST END OF FIRE ISLAND. [Newsday](#) (4/22, 1.41M) reports that "a dead humpback whale washed up Tuesday afternoon near the east end of Fire Island, according to the Fire Island National Seashore." According to seashore park ranger Elizabeth Rogers, "the Riverhead Foundation for Marine Research & Preservation was working with the National Park Service to respond."

PEARL HARBOR CENTER SUPERINTENDENT LEAVING FOR NEW JOB IN MASSACHUSETTS. The [AP](#) (4/22) reports that the NPS superintendent "who was at the helm of the Pearl Harbor visitors' center when four companies allegedly sold tickets to the site is taking a job in Massachusetts." Paul DePrey said Tuesday "he will leave Hawaii in June to be superintendent of the Salem Maritime Center and Saugus Ironworks national historic sites."

NEW SUPERINTENDENT ANNOUNCED FOR COLONIAL NATIONAL HISTORICAL PARK. The [Virginia Gazette](#) (4/22, 43K) reports that NPS Northeast Regional Director Mike Caldwell announced Monday that Kym Hall has been named the new superintendent of Colonial National Historical Park. Caldwell said, "We're very excited about the tremendous experience and leadership skills that Kym brings to Colonial National Historical Park. Her extensive background and passion for working collaboratively will serve her well as she energizes and expands the park's partnerships. At Glacier, she successfully tackled a wide range of issues; from highway and road operations, to concessions and partner management. As acting superintendent, she also spent considerable time working with park staff, leading planning efforts, and building teamwork and organizational effectiveness."

MAN PLEADS GUILTY TO POT FARM IN SEQUOIA NATIONAL PARK. The [AP](#) (4/22, 2.28M) reports that "a 29-year-old Mexican man has pleaded guilty to charges connected with an elaborate marijuana growing operation at Sequoia National Park that caused significant damage to the park's spring wildflower display." Toribio Cruz-Galvan "entered guilty pleas Monday to conspiring to grow and sell the product." The article notes that "investigators found more than 1,000 marijuana plants — more than 50 pounds worth — growing in the Yucca Mountain area of the park."

PARK LOOP ROAD AT ACADIA NATIONAL PARK OPENS TO VEHICLES. The [AP](#) (4/21, Press, 5.17M) reports that the NPS says that "all vehicles are now welcome back on Park Loop Road in Acadia National Park."

ADDITIONAL COVERAGE OF "FIND YOUR PARK" CAMPAIGN. Additional coverage of the "Find Your Park" campaign was provided by the [ActionHub](#) (4/21), [KOCO-TV Oklahoma City \(OK\)](#) Oklahoma City (4/22, 114K), and [AM New York](#) (4/22, 719K).

ADDITIONAL COVERAGE OF LINCOLN'S FUNERAL TRAIN. Additional coverage of the Lincoln funeral train was provided by [WBUR-FM](#) Boston (4/21, 95K).

TSONGAS SAYS NPS MODEL CAN BE FOLLOWED IN COMBATING CLIMATE CHANGE. Rep. Niki Tsongas (D-MA), ranking Democrat on the Natural Resources Subcommittee on Federal Lands, writes in a [Roll Call](#) (4/22, Tsongas, Subscription Publication, 102K) op-ed that the National Park Service "is falling behind," with its budget reduced by 22% over the past decade, resulting in "a burgeoning backlog of maintenance projects." These reductions "are exacerbated by dramatic changes in our climate, which are having a visible impact on iconic national parks." Tsongas links the NPS to the climate crisis, writing, "When it was created, the NPS was called 'America's best idea.' As we look to the future, we need to apply a similar visionary approach to address the emerging threats of a changing climate."

Bureau of Land Management:

JUDGE DISMISSES WYOMING LAWSUIT SEEKING MORE HORSE ROUNDUPS. The [AP](#) (4/22, Gruver) reports that "a federal judge Tuesday dismissed a lawsuit filed by Wyoming officials that sought to compel the U.S. Bureau of Land Management to promptly round up several overpopulated wild horse herds in the western part of the state." The bureau isn't "required by law to round up horses merely because it has determined the animals are overpopulated, U.S. District Judge Nancy Freudenthal ruled in granting requests to dismiss filed by the Interior Department and wild horse advocacy groups."

RANCHERS SEEKS ELIMINATION OF WILD MUSTANGS IN UTAH. The [Daily Beast](#) (4/21, 937K) reports that "earlier this month, U.S. District Court Judge Dee Benson ruled that a case brought by the ranchers seeking to eliminate around 1,350 protected wild mustangs, which they claim have become a nuisance, can go forward." They claim that the BLM hasn't "properly kept the population under control." According to the article, "should the suit prevail, the animals will face an uncertain future."

BLM TAKING PUBLIC INPUT ON WESTERN WYOMING GAS PLANT. The [AP](#) (4/22, 2.28M) reports that "federal officials are taking public comments on a proposed gas processing plant near LaBarge in western Wyoming." The QEP Resources, Inc., facility would "process gas from 10 nearby gas wells." The BLM is taking public comments until May 20.

NEW DOG LEASH POLICY AT FORT ORD TRAILS PROTESTED. [KSBW-TV](#) Monterey, CA (4/22, 32K) reports that "a new dog leash law at Fort Ord National Monument has pet owners upset and taking action." The BLM "put an emergency interim leash requirement in effect on April 8 and posted signs alerting the public." But "a grassroots movement to get Fort Ord back to being leash-free popped up online with a petition soon after."

Additional coverage was provided by [KION-TV](#) Monterey, CA (4/22).

FURTHER FUTURE FESTIVAL REJECTED BY FEDERAL AGENCIES. The [Las Vegas Review-Journal](#) (4/22, 398K) reports that organizers of the Further Future music festival have dropped plans to hold their inaugural event at an old mine near Lake Mead. Early this month, the NPS and the BLM denied the festival a commercial use permit. Now, the festival will be held May 1-3 on the Moapa River Indian Reservation.

BILL BACKED BY BUNDY FALLS IN NEVADA LEGISLATURE. The [AP](#) (4/22, 2.28M) reports that "Nevada lawmakers have rejected a public lands bill championed by southern Nevada rancher Cliven Bundy." Assembly members voted 8-34 to reject AB 408 on Tuesday night.

Fish and Wildlife Service:

FWS ANNOUNCES \$1 MILLION FOR PORTLAND AREA WILDLIFE REFUGES. The [Oregonian](#) (4/22, 950K) reports that "four Portland area national wildlife refuges will split \$1 million this year to teach city kids about nature." The FWS announced the grant money Tuesday. The article notes that "the Portland area Tualatin River, Ridgefield, Steigerwald Lake and Wapato Lake refuges competed for the cash against other refuges nationwide."

FWS Director Ashe Interviewed At Tualatin River National Wildlife Refuge. [KATU-TV](#) Portland, OR (4/22, 192K) reports that FWS Director Dan Ashe was interviewed at the Tualatin River National Wildlife Refuge "to discuss the importance of connecting an urban audience to their natural environment; particularly through their Urban Refuges (like Tualatin River NWR)." Ashe "spoke about the changing demographics of our society and the implications for a public that doesn't connect or value the natural world. He explained that the Service wants natural resources, wildlife and their habitats to remain, gain and retain relevance for the benefit of the American people and the environment we share with wildlife." He "also announced exciting news that the U.S. Fish and Wildlife Service is making a commitment of \$1 million to the Tualatin River National Wildlife

Refuge this year and for years to come.”

LEGISLATION WOULD BAR LISTING OF GREATER SAGE GROUSE. The [Denver Post](#) (4/22, Finley, 804K) reports that Sen. Cory Gardner will introduce legislation in Congress on Wednesday that would block the federal government from listing greater sage grouse as endangered and give western states six more years to revive grouse populations on their own. Gardner said, “When it comes to the environment in our own backyard, we understand it far better than anybody in Washington D.C. This would give us the ability to manage our most important resources at the local level.” He added, “We have an obligation to future generations to conserve and recover this species. But we can do it on our terms. Let’s put Coloradans in charge, let’s put Westerners in charge of the West.”

INTELLIGENCE AGENCIES HELP BUST WILDLIFE TRAFFICKING RINGS. [NBC News](#) (4/21, Roach, 2.71M) reports that “the top spy agencies in the U.S. are sharing intelligence and personnel to bust international wildlife trafficking rings, which rake in more than \$20 billion a year in the trade of everything from elephant ivory and rhino horn to the bladders of a Mexican fish.” Edward Grace, the deputy chief of law enforcement for the FWS, said, “We didn’t have the same resources to fight this trade that other agencies had. That is a gap we are filling in now.” The move “comes with a top-down executive order from the Obama administration that frames wildlife trafficking as a threat to national security and calls for a coordinated, whole-government approach to thwart it.”

FWS WILL HUNT INVASIVE CARIBOU ON KAGALASKA ISLAND. The [Daily Mail \(UK\)](#) (4/22, 4.78M) reports that “hunters from a federal agency will travel to a remote island in the Aleutians to kill caribou, an invasive species that threatens wilderness vegetation.” The FWS is “moving forward with plans to protect Kagalaska Island, part of the Alaska Maritime National Wildlife Refuge.”

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (4/22, Joling, 2.28M), the [New York \(NY\) Times](#) (4/22, Press, Subscription Publication, 9.97M), the [Washington \(DC\) Post](#) (4/21, Dan Joling |, Ap, 5.17M), and the [US News & World Report](#) (4/21, 685K).

MOUNTAIN BOGS NATIONAL WILDLIFE REFUGE TO RECEIVE FIRST ACREAGE ON EARTH DAY. The [Charlotte \(NC\) Observer](#) (4/22, 584K) reports that “Mountain Bogs National Wildlife Refuge will get its first acreage this Earth Day.” The Nature Conservancy will “formally donate an easement Wednesday to 39-acre Ida’s Bog in Ashe County.”

ARIZONA FILES MOTIONS TO PROTECT INTEREST IN MEXICAN WOLF RECOVERY. The [Grand Canyon News](#) (4/22) reports that “the state of Arizona, on behalf of the Arizona Game and Fish Department, filed two motions, April 15, aimed at protecting the state’s interest in the Mexican wolf reintroduction program and recovery of the endangered wolf in east-central Arizona and New Mexico.” Arizona filed a motion to intervene in a lawsuit “which concerns the recently-revised 10(j) rule that governs the management of Mexican wolves in Arizona and New Mexico.”

NATIONAL ZOO TRANSPORTS FROZEN GIANT PANDA SEMEN FROM CHINA TO IAD. [WRC-TV](#) Washington (4/22, Lylo, 613K) reports online that the National Zoo has “transported frozen giant panda semen from China to” Washington, DC “for breeding.” Smithsonian Conservation Biology Institute (SCBI) research scientist Caitlin Burrell arrived at Dulles International Airport on Monday with the semen sample. WRC notes that the “frozen semen the flew from Chengdu, China” to IAD “at minus 196 degrees Celsius in liquid nitrogen.”

ADDITIONAL COVERAGE GROUPS SUE TO BLOCK PLANS TO KILL CORMORANTS TO SAVE SALMON. Additional coverage of the lawsuit to stop the killing of cormorants to save salmon was provided by [Reuters](#) (4/21).

US Geological Survey:

USGS SAYS WASTEWATER DISPOSAL LEADING TO MORE OKLAHOMA EARTHQUAKES. [CNBC](#) (4/21, Brennan, 2.42M) reports on its website that the US Geological Survey says Oklahoma has gone from two magnitude 3.0 earthquakes per year to two per day as oil production has more than doubled. The USGS “sees a connection: specifically, a link to underground disposal of wastewater generated by oil and gas production.”

The [AP](#) (4/22, Talley) reports the Oklahoma Geological Survey said Tuesday that it is “‘very likely’ that most of the state’s recent earthquakes were triggered by the subsurface injection of wastewater from oil and natural gas drilling operations.” The [Wall Street Journal](#) (4/22, Molinski, Subscription Publication, 5.67M) reports Gov. Mary Fallin (R) said the findings were significant. She said in a statement, “State agencies are already taking action to address this issue and protect homeowners.”

USGS CELEBRATES EARTH DAY. The [Water Technology Online](#) (4/22) reports that the USGS is “joining the global celebration of Earth Day on April 22.” According to the article, “to build environmental awareness, USGS has outlined some of the significant challenges facing the world and various science projects underway to help address these issues.”

USGS UPDATES FRAMEWORK FOR HYDROGEOLOGY OF FLORIDA AQUIFER. The [WaterWorld](#) (4/22, 96) reports that scientists at the USGS have “updated the hydrogeologic framework for the Floridan aquifer system that underlies the state of Florida and parts of Georgia, Alabama and South Carolina.” According to the article, “by describing the hydrologic and geologic setting of an aquifer, a hydrogeologic framework enables appropriate authorities and resource managers to monitor an aquifer more accurately, improving their ability to protect these critical resources and determine the near- and long-term availability of groundwater.”

Securing America’s Energy Future:

Renewable Energy:

OFFSHORE WIND, OIL AND GAS LEASES ON THE HORIZON FOR NORTH CAROLINA. The [Greensboro-Winston-Salem \(NC\) Business Journal](#) (4/22, Downey, Subscription Publication, 20K) reports that “as many as three offshore wind-power lease sites will be approved for North Carolina next year, Abby Hopper, director of the Bureau of Ocean Energy Management, told a conference in Raleigh on Tuesday.” However, “she says most of the offshore interest in North Carolina has been generated by the possibility of an offshore oil and gas lease by 2021.” Hopper was the keynote speaker for the 2015 State Energy Conference hosted by N.C. State University and its N.C. Clean Energy Center at the McKimmon Center.

Onshore Energy Development:

BILL REINTRODUCED TO STOP FRACKING ON PUBLIC LAND. The [E&E Daily](#) (4/21) reports that “two Democratic House members want to stop hydraulic fracturing and some other drilling activities on federal land.” Reps. Jan Schakowsky of Illinois and Mark Pocan of Wisconsin are “holding a press conference tomorrow to introduce a bill to ban fracking on future leases.”

BLACKFEET TRIBAL LEADERS SEEK CANCELLATION OF LEASES IN BADGER-TWO MEDICINE. The [Missoulian \(MT\)](#) (4/22, 113K) reports that “Blackfeet tribal leaders are asking the Obama administration to intervene in canceling the last remaining energy leases in the Badger-Two Medicine country they consider sacred.” According to the article, “a panel of Blackfeet leaders will gather Wednesday to demand protection for the 165,588-acre territory bounded by the Blackfeet Indian Reservation, Glacier National Park, the Bob Marshall Wilderness Complex and the Rocky Mountain Front.”

STUDY LINKS TEXAS EARTHQUAKES TO NATURAL GAS DRILLING. The [AP](#) (4/21, 777K) reports “scientists have linked a swarm of small earthquakes west of Fort Worth, Texas, to nearby natural gas wells and wastewater injection.” Scientists with the US Geological Survey and Southern Methodist University monitored 27 earthquakes of magnitude 2.0 or higher near Azle, Texas between November 2013 and January 2014. The area “had no recorded quakes for 150 years on faults that “have been inactive for hundreds of millions of years,” said SMU geophysicist Matthew Hornbach.”

The [Dallas Morning News](#) (4/22, Kuchment, 1.13M) says “experts have not yet determined what’s causing the shaking,” and “the new findings contradict statements by the Railroad Commission of Texas that there are no definitive links between oil and gas activity and earthquakes in the state.”

The [Houston Chronicle](#) (4/22, Borenstein, 2.28M) says that “unlike other research that linked quakes to the injection of wastewater, the SMU study also sees a secondary link in another part of the drilling process, when massive amounts of brine is taken out of the ground with the gas.” [Reuters](#) (4/22, Richter) also has a report.

OKLAHOMA RECOGNIZES DRILLING CONTRIBUTING TO QUAKES. The [New York Times](#) (4/22, Wines, Subscription Publication, 9.97M) reports that “abandoning years of official skepticism,” Oklahoma’s energy and environment cabinet “embraced a scientific consensus that earthquakes rocking the state are largely caused by the underground disposal of billions of barrels of wastewater from oil and gas wells.” The government “introduced a website detailing the evidence behind that conclusion Tuesday, including links to expert studies of Oklahoma’s quakes.”

GREEN GROUPS STUDY ARGUES CUTTING METHANE COULD BE COST-EFFECTIVE. The [New York Times](#) (4/22, Schwartz, Subscription Publication, 9.97M) reports

that a study commissioned by the Environmental Defense Fund argues that reducing methane leaks “from oil and gas operations around the world could provide a relatively inexpensive way to fight climate change.” The report, written by the Rhodium Group, found that in 2012, 3.6 billion cubic feet of gas escaped worldwide and “would have been worth \$30 million on the market.”

SMITH CONDEMNNS “MISINFORMATION” CAMPAIGN AGAINST FRACKING. House Science, Space, and Technology Chairman Lamar Smith (R-TX) writes in a [Roll Call](#) (4/22, Smith, Subscription Publication, 102K) op-ed that “natural gas provides affordable, clean and abundant energy,” and the US “is now the world’s largest oil and natural gas producer.” But as Earth Day approaches, we are “unlikely to hear from the vocal minority who refuse to acknowledge this great success story.” Smith says hydraulic fracturing has been hit with “unfounded attacks, misinformation and biased media coverage” rooted in “fringe environmental politics instead of fact-based evidence.”

Offshore Energy Development:

ACTIVISTS SEEK STRICTER OFFSHORE DRILLING REGULATIONS FIVE YEARS AFTER DEEPWATER HORIZON. [TIME](#) (4/21, Worland, 19.19M) reports on its website that five years after the Deepwater Horizon explosion, “offshore oil drilling is more frequent and is done to even greater depth.” Since that time, the Federal government “has approved more than 20 ultra-deepwater drilling expeditions,” though the government has also tightened “standards for the design and casing of deep-sea oil wells and nearly doubling the number of inspectors.” Still, environmental activists “say the changes aren’t enough,” since “the number of offshore incidents including fires, oil spills and explosions, among other things, has remained high over the past five years.”

The [AP](#) (4/20, Amy, McConnaughey) reports Federal and state officials overseeing the \$1 billion provided by BP for recovery projects “said Monday that they’re proposing another 10 projects totaling \$134 million.” If approved, \$832 million of the money would have been used.

Charlie Williams of the “industry-led” Center for Offshore Safety writes in [The Hill](#) (4/22, Williams, 224K) “Congress Blog” that following the Deepwater Horizon incident, “industry and regulators have worked relentlessly to improve the safety of offshore oil and natural gas development,” and since 2012, “the industry has stepped up to address” concerns.

BSEE Director Salerno To Testify Before House Committee. [The Hill](#) (4/22, Cama, Henry, 224K) reports that on Wednesday, the House Natural Resources Committee will hold “a hearing on safety changes since the 2010 Deepwater Horizon oil disaster at BP’s well in the Gulf of Mexico.” BSEE Director Brian Salerno will testify.

Commentary. A [New York Times](#) (4/22, Subscription Publication, 9.97M) editorial says that five years after the BP oil blowout in the Gulf of Mexico, “BP has been suggesting in its reports and advertising that recovery of the entire ecosystem is just around the corner,” but “it is not.” The Times says that while BP “has already shelled out just over \$30 billion.. more will be arriving,” and the “task for federal and state officials will be to make sure that these funds are applied to replenishment of beaches, dunes, wetlands, oyster beds and the like, and not diverted to politically inspired development projects that have little connection to environmental needs.”

Additional Coverage. Additional coverage of the spill was provided by [CNN](#) (4/21, Crandall, 2 05M).

BOEM DIRECTOR HOPPER DEFENDS 50-MILE OFFSHORE BUFFER. The [Raleigh \(NC\) News & Observer](#) (4/22, 395K) reports that “North Carolina’s annual State Energy Conference kicked off Tuesday with a federal official’s defense of a controversial proposal not to allow offshore drilling closer than 50 nautical miles of the state’s coastline.” BOEM Director Abigail Ross Hopper “expounded on her agency’s proposed safety buffer just a week after Gov. Pat McCrory warned a congressional committee in Washington, D.C., that such a distance ‘unnecessarily puts much of North Carolina’s most accessible undiscovered resources under lock and key.’” Hopper said that “the proposed drilling buffer for the Southeast – which is equivalent to 57.5 standard miles – would be by far the widest off-limits exclusion zone in the country.”

ROCKVILLE JOINS COASTAL TOWNS OPPOSING OFFSHORE DRILLING. The [AP](#) Savannah, GA (4/22, 19K) reports that “the small coastal hamlet of Rockville in Charleston County is the latest coastal community in the Carolinas to go on record opposing offshore drilling.” The town council on Monday passed “a resolution saying that offshore drilling would threaten the economy of coastal communities as well as fish and marine mammals.” The article notes that “Rockville is the 21st community in the Carolinas to go on record opposed to offshore drilling or exploration for fossil fuels.”

FLORIDA NELSON WANTS DATA REGARDING 11-YEAR-OLD OIL LEAK. The [New Orleans Times-Picayune](#) (4/22, 621K) reports that US Sen. Bill Nelson has asked DHS to release “all videos and photographs” of what he terms “an 11-year-old leak from a Taylor Energy Co. platform downed by Hurricane Ivan in 2004.” The Times-Picayune cites AP reporting from last week saying “the leak is 20 times more substantial than previously reported.” Nelson is quoted saying, “oil infrastructure in the gulf – this is just unbelievable – operated by the Taylor Energy Company continues to leak crude oil since one of the hurricanes years ago.” An Interior Department official is cited saying “a United Command is operating daily overflights of the oil sheen” and the department “is working to garner a response to Sen. Nelson’s report.”

Tackling America’s Water Challenges:

BOR RESPONDS TO WORSENING YAKIMA BASIN DROUGHT. The [AP](#) (4/22, 2.28M) reports that the BOR has “had to start using stored reservoir water to supplement natural flows early because of a worsening drought in central Washington’s Yakima Basin.” According to the BOR, “some Yakima Basin water users may only get 54 percent of their supply.” Chuck Garner, the BOR’s Yakima Project River Operations supervisor, said that “weather conditions forced them to use stored reservoir water starting April 15.”

Additional coverage was provided by the [Yakima \(WA\) Herald-Republic](#) (4/22, 86K), the [Salem \(OR\) Capital Press](#) (4/21, 113K), the [Salem \(OR\) Capital Press](#) (4/21, 113K), the [Tri-City Herald \(WA\)](#) (4/21, 100K), and the [Ellensburg \(WA\) Daily Record](#) (4/22, 16K).

LAKE MEAD’S WATER LEVEL DROPS TO NEAR-RECORD LOW. [KLAS-TV](#) Las Vegas (4/22, 114K) reports that “Lake Mead has nearly set a new record when its water level measured at 1081.10 feet, according to the Bureau of Reclamation.” The article notes that “it’s the lowest level since the lake was filled in the 1930s and 148 feet below capacity.” According to the article, “it’s predicted the lake will hit 1075 feet on May 31 and then begin to fill back up in September when there are water releases.”

Additional coverage of Lake Mead was provided by the [Arizona State University Cronkite News](#) (4/22).

CONTINUING COMMENTARY ON BAY DELTA CONSERVATION PLAN. The [Fresno \(CA\) Bee](#) (4/20, 323K) editorializes that “as Gov. Jerry Brown tries to salvage the \$25 billion project to build twin tunnels through the Sacramento-San Joaquin River Delta, he should keep in mind that it won’t be acceptable to give up its environmental goals.” The paper notes that “restoring the delta has been a critical selling point to many Northern Californians, who helped defeat a 1982 plan to build a peripheral canal there.” The editorial concludes that “it should be a non-starter to proceed with the tunnels and expect environmental restoration to come at some later date.”

The [Modesto \(CA\) Bee](#) (4/22, 163K) editorializes that “if the governor truly wants to save the Delta, he should prioritize that portion of the plan and drop the part about ‘more reliable’ water deliveries until he knows how much water will be required to save the Delta.”

Additional commentary was provided by the [San Francisco Chronicle](#) (4/22, 2.21M).

TORRES SAYS REST OF US SHOULD TAKE CLIMATE WARNING FROM CALIFORNIA. Rep. Norma Torres (D-CA) writes in a [Roll Call](#) (4/22, Torres, Subscription Publication, 102K) op-ed that her state, suffering through a long-term drought, “is already facing the effects of climate change,” but the rest of the country should be concerned as well. She writes, “In California, we allowed this problem to reach a critical point, but the rest of the country should learn from our mistakes and begin taking the necessary steps to prepare for the effects of environmental changes.”

Empowering Native American Communities:

FEDERAL AGENCIES MEET WITH TRIBES AT PORTLAND CONFERENCE ON INDIAN CHILD WELFARE. The [Oregon Public Broadcasting](#) (4/22, 3K) reports that “three federal agencies met Tuesday with tribes at a Portland conference on Native American child welfare.” The Interior, Justice, and Health and Human Services departments are hearing testimony on rules to implement the Indian Child Welfare Act. BIA Director Kevin Washburn said, “Places like Oregon, and Minnesota, and Washington state say, ‘Oh, we’re progressive, this can’t be a problem here.. But actually it is, it’s a problem anywhere there are large numbers of Indian communities, honestly, and anywhere there’s Indian poverty.’”

CONFEDERATED SALISH AND KOOTENAI TRIBES WATER COMPACT FACES HURDLES. The [Flathead \(MT\) Beacon](#) (4/21, 15K) reports that “after hours of debate, the state House of Representatives on April 15 endorsed the water-rights compact between Montana and the Confederated Salish and Kootenai Tribes, and the next day gave final approval to Senate Bill 262, the only water compact involving a Montana reservation that remains un-ratified.” The article notes that “it’s been at the center of a tumultuous and hard-won political battle over a complex issue, the intricacies of which were further drawn out by a House rules tug-of-war narrowly won by a ‘working majority’ of legislators, including all 41 Democrats and a dozen moderate Republicans.” That battle, “which occurred in committees and on the House floor, mirrored the political

maneuvering that ushered Medicaid expansion through the state Legislature, and while it offered a revealing glimpse at the bare-knuckle brand of politics that has characterized the session, it cleared the way for a future beset with other complicated delays and potential stumbling blocks.”

QUICK VOTE URGED ON BLACKFEET WATER COMPACT. The [Great Falls \(MT\) Tribune](#) (4/21, 76K) reports that Rep. Ryan Zinke is “urging the Obama administration to implement procedural changes meant to expedite a final congressional vote on the pending Blackfeet Water Compact.” In a letter to Attorney General Eric Holder and Interior Secretary Sally Jewell, “Zinke called on the agencies to work together to advance the compact.”

TRIBAL BUSINESSMAN UPSETS FORMER NAVAJO PRESIDENT IN ELECTION. The [Washington Post](#) (4/21, Felicia Fonseca |, Ap, 5.17M) reports that “Russell Begaye easily beat a former two-term Navajo Nation president Tuesday for the top post on the country’s largest American Indian reservation, ending a tumultuous election season that was extended by nearly five months amid a heated court fight over a candidate’s ability to speak fluent Navajo.” according to unofficial results, “Begaye led Joe Shirley Jr. by about 10,000 votes with all precincts reporting.”

Top National News:

OBAMA DEFENDS TPP AS GOOD FOR MIDDLE CLASS, SAYS DEMOCRATIC CRITICS ARE WRONG. Coverage of the President’s defense of his trade policies on MSNBC largely cast him in a favorable light, taking on leading members of his own party – including Sen. Elizabeth Warren – as he touted what he claimed would be a boost to the US economy and its middle class. While the story was not mentioned on the network newscasts, it is receiving widespread attention in print and online media, much of which highlights the challenges the President faces to enact his agenda in the face of Democratic opposition.

The [New York Times](#) (4/22, B3, Weisman, Shear, Subscription Publication, 9.97M), for example, refers to “an energetic case for free trade” by the President, while the [AP](#) (4/21, Babington) highlights his “blunt words,” which “came as liberals, labor unions and others stepped up efforts to block his trade proposals.” More negative was the analysis in the [Huffington Post](#) (4/21, Levine, 281K), which stated that “while Obama criticized Warren for being wrong on the facts of the deal, it’s difficult to know exactly what the deal contains because his administration has deemed the negotiations to be classified.”

During the roundtable discussion, which aired on [MSNBC’s Hardball with Chris Matthews](#) (4/21, 713K), the President was asked about criticism of the TPP from Democrats, including Warren. The President said, “I love Elizabeth. We’re allies on a whole host of issues, but she’s wrong on this.” The President said that “ultimately I would not be putting this forward if I was not absolutely certain that this was going to be good for American workers,” adding that critics should “wait and see what we actually have in this deal before you make those judgments.”

[Later](#) in the discussion, the President said, “I’ve spent the last six and a half years yanking this economy out of the worst recession since the great depression. Every single thing I’ve done from the Affordable Care Act to pushing to raise the minimum wage, to making sure that young people can go to college and get good job training, to what we’re pushing now in terms of sick paid leave, everything I do has been focused on how do we make sure the middle class is getting a fair deal. Now, I would not be doing this trade deal if I did not think it was good for the middle class, and when you hear folks make a lot of suggestions about how bad this trade deal is when you dig into the facts, they are wrong.”

On its front page, meanwhile, the [Washington Post](#) (4/22, A1, Nakamura, Gearan, 5.17M) reports that “top Democrats began feuding over...Obama’s trade initiative Tuesday as his bid for a major late-term win began tearing at the party’s unity and threatened to expose old divisions ahead of the 2016 presidential election.” [Politico](#) (4/21, Nather, 669K) notes that Warren “has been challenging the proposed Trans-Pacific Partnership that’s at the heart of Obama’s trade agenda, saying it would ‘help the rich get richer and leave everyone else behind.’” Warren “has also said the trade deal would give special protections to multinational corporations.”

At the White House, noted [The Hill](#) (4/21, Fabian, 224K) on its website yesterday, press secretary Josh Earnest said “the measure is ‘the most progressive, far-reaching trade promotion authority bill in history,’” adding, “It has enforceable labor provisions, enforceable environmental provisions, and it includes provisions related to human rights. ... I don’t think it is common for trade promotion bills to even include references to human rights.”

[USA Today](#) (4/22, Jackson, 4.95M) notes Obama “and his aides are also lobbying for Democratic congressional votes in favor of Trade Promotion Authority,” which “would enable the administration to put together a final agreement for an up-or-down vote in Congress with no amendments.” The [Washington Post](#) (4/21, Nakamura, 5.17M) reported on its website that “big business and organized labor squared off Tuesday over...Obama’s trade agenda, as a key Senate committee prepared to vote” on TPA legislation. The AFL-CIO’s Richard Trumka told the Senate Finance Committee, “The livelihoods of workers are at stake here. ... We need a different deal.” Thomas Donohue, president of the US Chamber of Commerce, disagreed, imploring “lawmakers to support the fast-track bill.”

[Politico](#) (4/21, Behsudi, Palmer, 669K) notes that “so far, only 13 Democrats have indicated they could support the legislation, well short of the 66 who voted for trade deals with South Korea and Panama in 2011 or even the 31 who backed the Colombia pact.” Meanwhile, “a solid 14 Democrats in the House have confirmed they are voting against the measure, while another 119 seem unlikely to support it based on previous statements.” The White House “is targeting more than 40 Democrats who voted for at least the South Korea and Panama agreements in 2011, as well as a dozen or so newer members of Congress who come from districts that depend on trade for economic growth. Those include Texas Rep. Joaquin Castro, whose twin brother, Julian, serves in the Obama administration.”

Obama: China Can’t Be Allowed To Set Trade Rules For Asia-Pacific Region. The President also argued on [MSNBC’s Hardball with Chris Matthews](#) (4/21, 713K) that the “big 800-pound gorilla” in the Asia-Pacific region is China, and while it is “not a signatory to this deal” its “gravitational pull in that region is powerful. They don’t play by the same rules. They are coercing a lot of these smaller countries to enter into trade deals that exclude or disadvantage US companies, exclude or disadvantage US workers that take our intellectual property. They don’t have high standards in terms of labor or environmental protections, and if we don’t get this done, if we’re not the ones engaged out there writing the rules and China’s writing the rules in the fastest growing market, the most populace region of the world, we’re going to be locked out.”

Lew: Enforceable Currency Provisions Would Endanger Trade Deal. [Reuters](#) (4/22, Lange) reports that Treasury Secretary Lew yesterday told members of Congress that the Administration will oppose requiring enforceable currency provisions as part of trade deals. Wrote Lew, “Our partners fear that a trade agreement with an enforceable currency discipline could constrain the ability of their monetary authorities to conduct appropriate macroeconomic policies, and that is a risk they are unwilling to take.”

The [AP](#) (4/22, 405K) reports that Sen. Charles Schumer “said the administration must press China to stop manipulating its currency, even though China isn’t a party to the Pacific-rim negotiations.” Said Schumer, speaking at a Senate Finance Committee hearing, “We need to do more against China.”

In an editorial, meanwhile, the [Wall Street Journal](#) (4/22, Subscription Publication, 5.67M) denounces the focus on currency manipulation as a cover for protectionists who would oppose the TPP at any rate.

Japanese Ambassador: Trade Deal With US Could Be Announced Next Week. [Bloomberg News](#) (4/21, Keane, 2.94M) reports that Japan’s ambassador to the US, Kenichiro Sasae, appeared yesterday at the Center for Strategic and International Studies in Washington, where he announced that Obama and Japanese Prime Minister Shinzo Abe “may be able to declare next week that the US and Japan have all but completed their part of negotiations on a Trans-Pacific Partnership agreement.” Said Sasae, “All the gaps are substantially narrowed. ... We are in the final stage.” [Reuters](#) (4/22, Stephenson), meanwhile, notes that Secretary of State Kerry will host Abe in Boston on the 26th of this month.

Reid On Fast Track: “I’m Not Only No, I’m Hell No.” The [AP](#) (4/21, Babington) reports that asked about his stance on the fast-track debate, Senate Minority Leader Harry Reid told reporters yesterday, “I’m not only no, I’m hell no.” [Roll Call](#) (4/21, Dennis, Lesniewski, Subscription Publication, 102K) noted that Reid added, “Ron Wyden knows how I feel. Everyone in my caucus knows how I feel, and the president knows how I feel. That’s why we didn’t bring it up last Congress.” The [Daily Caller](#) (4/21, Ross, 318K) recounted that Schumer, “who...stood next to Reid as he fielded reporters’ questions,” retorted, “How do you really feel?”

Other Democrats expressed their concerns about fast-track legislation in less emphatic manners. Sen. Debbie Stabenow said on [MSNBC’s Hardball with Chris Matthews](#) (4/21, 713K) that the “language in fast track just isn’t strong enough and I should start by saying we know we’re in a global economy. I want to make sure we’re exporting products, not jobs, and when you talk about currency manipulation, right now we’ve seen when Japan was manipulating their currency that the Japanese auto companies actually were making more profit by that artificial discount in their price than they were on anything else. They sell to us, we can’t sell to them. They manipulated their currency, so we’re going to have to do fast track authority on trade then we better have tough enforcement to make sure we can’t have countries manipulating their currency.”

Sens. Paul Ryan and Ted Cruz come out in favor of fast-track legislation in an op-ed for the [Wall Street Journal](#) (4/22, Subscription Publication, 5.67M), while Rep. Steve King links his support for it to Obama’s immigration actions. King writes in the [Washington Times](#) (4/22, 644K), “It must be said, free trade agreements are not the avenue for the president to complete his objective to ‘fundamentally transform America,’” as “trade deals should be about trade, not avenues to change American domestic, let alone foreign, policy.” In the debate over fast track, adds King, Obama “can demonstrate a willingness to act within his own constitutional boundaries by agreeing to defund his illegal and unconstitutional actions on immigration.” In fact, “both transparency and humility are required steps for this president as Congress considers fast track.”

OFA Email Defends Fast Track. [The Intercept](#) (4/21) reports that in an email to members last Friday, OFA addressed the Trade Promotion Authority bill. OFA "did not ask members to take action supporting fast track; instead, it appears to be an attempt to mollify them enough so they don't take action opposing it." The Intercept went on to state "the email is filled with assertions clearly crafted to mislead OFA members," such as this assertion, "The good news is that this bill ensures that the entire process is transparent." To The Intercept, "this is perhaps the most deceptive sentence of the email."

Nelson "Pretty Sure" He'll Back TPP. The [Tampa Bay \(FL\) Times](#) (4/22, Leary, 828K) reported on its website that "Sen. Bill Nelson is likely to support a Trans-Pacific trade deal President Obama wants over objections from fellow Democrats." A spokesman told the Times, "Pretty sure he's going to support it."

Clinton Sidesteps Question On Whether She'll Back Obama's Trans-Pacific Deal. [Bloomberg Politics](#) (4/21, Epstein, 169K) reports Hillary Clinton "wouldn't say Tuesday whether she supports the trade measure working its way through Congress but did offer some criteria she'd use to judge it." Bloomberg adds that "Clinton and her team have in recent weeks been cautious in weighing in on TPP, aware that they're balancing the competing views of business and labor."

Yesterday, says [Politico](#) (4/21, Debenedetti, 669K), Clinton "walked the tightrope of praising...Obama, while distancing herself from his all-out push for a Trans-Pacific trade deal." Said Clinton, "Any trade deal has to produce jobs and raise wages and increase prosperity and protect our security." Clinton, however, "has not come out against the deal, unlike her potential primary challengers includ

SECRETARY JEWELL ATTENDS IHS CERAWEEK CONFERENCE. [Politico Pro](#) (4/21, Subscription Publication) reports that Interior Secretary Sally Jewell has "delicately stepped into enemy territory at a conference attended by many critics of her department's policies — even if she didn't quite see it that way." Jewell didn't consider the IHS CERAWeek conference "a lion's den," although she is "still trying to sell herself as someone who knows the energy industry well, even though more people may think of her as a longtime conservationist and as the former CEO of outdoor retailer REI than as the first Interior secretary to have actually fracked an oil well." She told reporters, "If there's one thing I want to express, [it] is that I understand this industry. I came from this industry. I'm an engineer by training. I've worked in oil and gas. I've worked in finance of oil and gas and natural resources. I'm also a person that appreciates the planet that we've been given and that what we need to do is strike the right balance on areas that we can and should develop and areas that are too special to develop."

The [FuelFix](#) (4/20, 7K) reports that Jewell is "going before a crowd of wary energy industry executives Monday afternoon to make the case that federal regulations are essential to reassure people worried about environmental damage from oil and gas development." Jewell noted, "Even here in Texas you have had a community that has banned fracking — in the state of Texas where the oil and gas industry has been so prevalent for so long. And that's because people are afraid. We felt it was our job as a federal regulator to reassure the public we were putting rules in place that are consistent with the common standards." Jewell said she is seeking "to reassure folks here that the oil and gas industry is a very important part of our future."

[Platts](#) (4/21, 3K) reports that Jewell "indicated Monday that the Obama administration's five-year plan for offshore oil and gas leasing could include fewer lease sales and fewer offshore plays before it is finalized, despite an industry push for the plan to include more sales in additional offshore areas." The article notes that "the plan, which Interior unveiled in January, calls for 14 potential lease sales in eight of the 26 possible offshore planning areas from 2017 to 2022, including a possible sale off the US East Coast." According to the article, "during a news conference at the annual IHS CERAWeek conference in Houston, Jewell indicated the plan may change before it is proposed and finalized by 2016, but those changes would only be reductions in lease sales."

[Reuters](#) (4/20) reports that the Interior Department will assess whether it should take a more flexible approach to establishing the rates for royalties it collects from oil and natural gas wells on federal land, Jewell said. She said, "We don't have any flexibility onshore, so this is an opportunity for us to take a look at that. We do find circumstances where there are pioneering (shale) plays where there should be royalty relief."

[Bloomberg News](#) (4/20, Weber, 2 94M) reports that "Royal Dutch Shell Plc learned 'some very painful and expensive lessons about contractors' from its mishaps drilling in the Arctic in 2012, U.S. Interior Secretary Sally Jewell said." She told reporters that "Shell learned how to better manage companies it relies on for critical aspects of its offshore drilling programs." Jewell added that "the U.S. government has 'raised the bar' on safety in terms of offshore drilling in recent years."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (4/21, Tomlinson, 2.28M), the [FuelFix](#) (4/20, 7K), and [Bloomberg News](#) (4/20, Davis, 2 94M).

SECRETARY JEWELL TO ANNOUNCE DECISION FOR NEVADA, CALIFORNIA SAGE GROUSE ON TUESDAY. The [AP](#) (4/21, 39K) reports that Interior Secretary Sally Jewell "plans to announce Tuesday whether she will move forward with the U.S. Fish and Wildlife Service's earlier proposal to order federal protection for a type of sage grouse found only in California and Nevada." Jewell "plans a formal announcement on a listing decision for the bistate sage grouse in Reno on Tuesday afternoon."

Additional coverage was provided by the [Minneapolis \(MN\) Star Tribune](#) (4/21, Press, 1.37M), the [Nevada Appeal](#) (4/21, 49K), the [Elko \(NV\) Daily Free Press](#) (4/21, 22K), the [Houston \(TX\) Chronicle](#) (4/21, 2.28M), the [Porterville \(CA\) Recorder](#) (4/21, 26K), the [Washington \(DC\) Post](#) (4/20, Press, 5.17M), the [Daily Mail \(UK\)](#) (4/21, 4.78M), and the [Huffington Post](#) (4/20, 281K).

ECONOMIC BENEFITS OF OUTDOOR RECREATION TOUTED AT CENTER FOR AMERICAN PROGRESS EVENT. [Inside Tucson Business \(AZ\)](#) (4/21, 12K) reports that "consumers spend \$646 billion annually on outdoor recreation, said advocates, who called on the government Thursday to do a better job tracking the worth of what they called an undervalued industry." In addition, speakers at the Center for American Progress event said that the figures "demonstrated the value of the nation's parks and open spaces, which the outdoor industry depends on." Interior Secretary Sally Jewell said, "These are legitimate jobs." She added that "national parks saw more visitors last year than ever before."

INTERIOR SOLICITOR TOMPKINS VISITS UNM LAW SCHOOL. [UNM School of Law News](#) (4/21) reports that "during a two-day visit to the UNM Law School, Solicitor Hillary Tompkins was interviewed by consultant and former journalist Conroy Chino." Tompkins was "invited by the Law and Indigenous Peoples Program to return to the Law school, where she taught as an adjunct professor before being appointed Solicitor." She also "met with students for a lunch and learn on one day and met with high school students from the Native American Community Academy (NACA) the next day."

ADDITIONAL COVERAGE SECRETARY JEWELL DEFENDS NEW RULES FOR FRACKING ON PUBLIC LANDS. Additional coverage of Interior Secretary's defense of fracking rules on public lands in comments Thursday to the Center for American Progress was provided by the [AllGov](#) (4/21, 1K).

ADDITIONAL COVERAGE OBAMA ADMINISTRATION CONSIDERS DRILLING FEE HIKE ON FEDERAL LANDS. Additional coverage that "the federal government wants to update rules governing oil and gas royalty rates" was provided by [The Hill](#) (4/21, Devaney, 224K) and the [Summit County \(CO\) Citizens Voice](#) (4/20, 506).

ADDITIONAL COVERAGE OF EARTH DAY CELEBRATION AT THE NATIONAL MALL. Additional coverage of Global Citizen 2015 Earth Day on the National Mall was provided by the [Environment News Service](#) (4/20, 149) and the [Marquette \(MI\) Mining Journal](#) (4/21, 1K).

ADDITIONAL COVERAGE OF NEWEST NATIONAL HISTORICAL LANDMARKS. Additional coverage that the Powder Works Bridge is now a national historical landmark was provided by the [Watsonville \(CA\) Patch](#) (4/21, 1K).

America's Great Outdoors:

National Park Service:

OBAMA TO HIGHLIGHT CLIMATE CHANGE THREAT TO EVERGLADES ON EARTH DAY. The [Washington Post](#) (4/21, Nakamura, 5.17M) reports in its "Post Politics" blog that the President will travel to the Everglades on Wednesday to "tout his administration's efforts to protect the environment," as "the White House presses its go-it-alone

climate-change agenda." The Earth Day trip is "aimed at highlighting a region that the administration said is threatened by global warming." In the White House blog, Obama senior adviser Brian Deese wrote, "The Everglades are flat, and they border a rising ocean. As the sea levels rise, the shorelines erode, and that salty water travels inland, threatening the aquifers supplying fresh drinking water to Floridians."

[The Hill](#) (4/21, Cama, 224K) reports Deese wrote in a public email, "This Earth Day, we're far beyond a debate about climate change's existence. ... We're focused on mitigating its very real effects here at home, preparing our communities where its impacts are already being felt, and leading an international effort for action."

[USA Today](#) (4/21, Jackson, 4.95M) predicts "push back from Republicans who say...Obama's climate change and pollution control plans are expensive, unnecessary, and harmful to businesses, especially in the energy industry."

On "The Insiders" blog of the [Washington Post](#) (4/20, 5.17M) Ed Rogers writes "President Obama is living in a world of denial" and that "he uses global warming as a distraction to dodge the real problems we face and avoid critiques of his performance. If he did face reality, there is a lot he could do to try and juice economic growth." Meanwhile, Chris Mooney of the [Washington Post](#) (4/21, Mooney, 5.17M) says the president's visit to Everglades National Park "could take on new significance as a politically potent case study of how global warming directly impacts people living" in the US.

NPS PROPOSES TO ALLOW TRIBES TO GATHER PLANTS IN NATIONAL PARKS. The [AP](#) (4/20, 28K) reports that the NPS on Monday "proposed allowing Native American tribes around the country to collect and remove plants from national parks, such as Mesa Verde National Park, for traditional uses." Under the proposal, "tribal members would have to prove a traditional association to the land and describe the plants they want to take and how the material will be used." Park officials would "then conduct an environmental assessment before granting a permit, generally within three to six months."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (4/21, Fonseca, 2.28M), the [US News & World Report](#) (4/20, 685K), the [Washington \(DC\) Post](#) (4/20, Felicia Fonseca |, Ap, 5.17M), and the [Harrisburg \(PA\) Patriot-News](#) (4/21, 301K).

OLDEST ACTIVE PARK RANGER TO BE FEATURED ON "TODAY" SHOW. The [Contra Costa \(CA\) Times](#) (4/21, Group, 310K) reports that "Betty Reid Soskin, at 93 a well-known figure as the oldest active ranger with the National Park Service, will get national attention in a profile that was taped last week for the 'Today' show on NBC." The segment is set "to air during the 8 to 9 a.m. period on April 26." According to the article, "last week, Soskin spent a day being trailed by an NBC crew as she conducted her monthly interpretive bus tour that takes visitors to see a Victory ship that was built in the Richmond yards; the Rosie the Riveter monument; Atchison Village, built to house workers; and the former Ford Assembly plant."

COUNCIL SET TO CEDE FIVE ACRES OF MAMMOTH SITE TO FEDERAL GOVERNMENT FOR MONUMENT. The [Waco \(TX\) Tribune-Herald](#) (4/21, 111K) reports that "the Waco City Council on Tuesday is set to pave the way for a Waco Mammoth Site national monument by relinquishing five acres of the site along with all excavated remains to the federal government." The article notes that "as part of the transfer, the city is also spending \$17,602 for a survey, updated environmental study and closing costs."

SECRET SERVICE SUCCESSFULLY INTERCEPTS WHITE HOUSE FENCE JUMPER. The [CBS Evening News](#) (4/20, story 4, 0:25, Pelley, 5 08M) reported, "Well, this time the Secret Service got their man. A fence-climber at the White House was intercepted last night shortly after he dropped to the lawn. Today, a judge ordered 54-year-old Jerome Hunt of California to stay away from the White House. He pleaded not guilty to unlawful entry. He has to wear an electronic monitor."

MARIJUANA ACTIVISTS LIGHT UP ON THE NATIONAL MALL. The [Washington Post](#) (4/21, Stein, 5.17M) reports that "D.C. marijuana activists decided to possess and smoke marijuana on the National Mall" at 4:20 p.m. Monday afternoon. The article notes that "despite the conspicuously illegal acts, no one was arrested or reprimanded by U.S. Park Police." NPS spokesman Mike Litterst said, "United States Park Police report that no smoking took place when they were present, and that they received no complaints about any such activity."

THE GRAND CANYON COULD BE GETTING A MALL AND CONFERENCE ROOMS. The [Independent \(UK\)](#) (4/21, Hooton, 853K) reports that the Grand Canyon "could soon be getting a \$1 billion entertainment complex encompassing a mall, hotel, restaurants, meeting rooms and an IMAX cinema." The Grand Canyon Escalade would be "built on the east rim and take visitors down to an elevated riverwalk on the Canyon floor via a gondola tramway." The article notes that "the proposal has some support from members of the Navajo tribe, albeit ones tied up in corruption and judicial misconduct charges, but a tide of people opposing it."

SCIENTIST SAYS FLORIDA PYTHON HUNT DIDN'T HELP CONTROL THREAT. The [AP](#) (4/21, Kay, 2.28M) reports that "as Florida prepares to unleash the public in another hunt for Burmese pythons in the Everglades, an analysis of data from the first Python Challenge shows that the 2013 spectacle didn't do anything to curb the invasive snake's population in the wetlands, a scientist said Monday." According to F rank Mazzotti, a University of Florida scientist, "the contest gave them incentives to capture more pythons in a month than any previous study, but it did nothing to control Florida's python population." Mazzotti "presented his findings at an invasive species workshop opening the annual Greater Everglades Ecosystem Restoration conference in Coral Springs."

MEDWAY RESIDENTS TO VOTE ON MAINE NATIONAL PARK PLAN. The [Bangor \(ME\) Daily News](#) (4/20, 166K) reports that "residents will decide whether they support a proposed 150,000-acre national park and recreation area in a nonbinding referendum on June 23, officials said Monday." According to town Administrative Assistant Kathy Lee, "the question on the ballot, which has yet to be written, will be something simple, such as 'Do you favor the national park and recreation area?'"

GROUP WANTS HATTERAS TO SHRINK BUFFER ON BEACH. The [Hampton Roads \(VA\) Virginian-Pilot](#) (4/21, 405K) reports that "a buffer from the beach to the sound is protecting Hatteras Island's first oystercatcher nest of the season, blocking traffic to Cape Point, one of the best fishing spots on the East Coast." But "if beach driving advocates get their way, that won't be the case much longer." According to the article, "an alliance of groups sent a letter last week to Cape Hatteras National Seashore Superintendent Dave Hallac saying park staff must shrink the area surrounding sea turtle and shorebird nests and shorten the buffer's duration."

CHARLES TOWN'S JOHN BROWN TOURS TO RESUME MAY 23. The [AP](#) (4/21, 2.28M) reports that "guided tours of Charles Town sites related to abolitionist John Brown will resume in May with an increased effort to attract youths." The tours are conducted by NPS rangers from Harpers Ferry National Historical Park. They will resume on May 23 and will be offered on weekends until June 7.

NPS TO CELEBRATE JUNIOR RANGER DAY. The [Clarksville \(TN\) Leaf Chronicle](#) (4/20, 43K) reports that "Fort Donelson National Battlefield will celebrate the National Junior Ranger Day with children's activities, stream cleanups and other environmental programs on Saturday."

ADDITIONAL COVERAGE NPS PREPARES FOR CENTENNIAL. Additional coverage of the preparations for the NPS centennial was provided by the [Beaumont \(TX\) Enterprise](#) (4/21, 168K), [KECI-TV](#), Missoula, MT (4/21, 744), and [WLUC-TV](#), Marquette, MI (4/21, 4K).

ADDITIONAL COVERAGE OF DEATH OF ELKS AT POINT REYES NATIONAL SEASHORE. Additional coverage of the deaths of elks at Point Reyes National Seashore was provided by [Reuters](#) (4/20).

ADDITIONAL COVERAGE OF P-22 MOUNTAIN LION. Additional coverage of the mountain lion known as P-22 was provided by the [New Yorker](#) (4/21, 4.4M).

PRESCRIBED BURN AT WIND CAVE NATIONAL PARK CRITICIZED. The [Bismarck \(ND\) Tribune](#) (4/21, 32K) editorializes that "it is hard to understand why Wind Cave National Park officials gave the green light last week to igniting a prescribed burn in an area that is about as combustible as a match tip." The paper says it "seems disingenuous...to lay the blame on Mother Nature." It adds that "while we understand that prescribed burns can be useful tools in suppressing fires and that risk is inherent in the process, it does not excuse the poor judgment in this case." The editorial concludes that "the superintendent and the Park Service deserve to feel the heat for starting a fire in tinderbox conditions that puts firefighters at risk, threatens private property and will no doubt cost taxpayers tens of thousands of dollars."

Bureau of Land Management:

BLM PUBLISHES FINAL PLAN FOR SOUTHWEST IDAHO WILDERNESS AREAS. The [AP](#) (4/21, Ridler, 2.28M) reports that "federal authorities have made public the final management plan for six wilderness areas and 16 wild and scenic river segments in southwestern Idaho, starting a 30-day appeals process." The BLM "on Monday published on the Federal Register the Owyhee Canyonlands Wilderness and Wild & Scenic Rivers Management Plan." MJ Byrne, spokeswoman for the BLM's Boise District, said, "The purpose is not to have improvements. The purpose is to keep its wild, wilderness character."

NAME OF PROPOSED NATIONAL MONUMENT IN COAST DAIRIES UNDER DEBATE. The [Santa Cruz \(CA\) Sentinel](#) (4/20, 70K) reports that "Coast Dairies, the oceanfront property near Davenport that could become a national monument, is a 5,843-acre expanse with a long list of bucolic features, including rolling hills, sensitive streams, scenic trails, unique wildlife and stands of redwood." However, "redwood forest only makes up about 500 acres, about 8 percent, of the property, leaving some scratching their heads as to why Santa Cruz Redwoods National Monument is the proposed name for the land and why its name would even change." According to the article, "many North Coast residents have said that a name referencing California's iconic trees doesn't fit prompting Santa Cruz County Supervisor Ryan Coonerty to suggest calling

it something different but familiar: Coast Dairies National Monument.”

JUDGE REFUSES TO BLOCK WILD-HORSE LAWSUIT. The [Houston Chronicle](#) (4/21, Whitehurst, 2.28M) reports that “a federal judge in Utah has refused to block a lawsuit filed by a group of ranchers demanding the U.S. government remove wild horses from land they say is overpopulated.” U.S. District Judge Dee Benson held “earlier this month that the ranchers can move forward with their claim that the Bureau of Land Management hasn’t kept the number of mustangs under control in south-central Utah.”

SENATE APPROVES PUBLIC LAND TASK FORCE. The [Great Falls \(MT\) Tribune](#) (4/20, 76K) reports that “the Senate on Monday narrowly approved a task force that would study federal land management in Montana.” According to the article, “a separate six-person task force to study public land management would be created, and focus on Forest Service and Bureau of Land Management land.”

Sale Of Public Lands Criticized. For the “Pundits” blog of [The Hill](#) (4/21, Molvar, Contributor, 224K), Erik Molvar, the Sagebrush Sea Campaign Director for WildEarth Guardians, writes that “from Western state legislatures to the halls of the U.S. Senate, there is a movement afoot to sell off our Western public lands.” Molvar argues that “state governments are in no position to manage such vast quantities of real estate.” He claims that “most lack laws and regulations that require public input, the weighing of environmentally responsible alternatives or a ‘look before you leap’ approach that is graven in federal law.”

BLM REVIEWING PLAN TO CLOSE POPULAR CENTRAL OREGON ROAD. The [Oregonian](#) (4/21, 950K) reports that “a granddaughter of Oregon tire magnate Les Schwab proposes to close a gravel road that central Oregon hunters have used for decades to get to elk hunting grounds described as some of the best in the West.” The BLM has “provided access to Teaters Road for decades, said Lisa Clark, a spokeswoman.” The BLM rejected Julie “Waibel’s request a year ago that it close the road, saying that wouldn’t be in the public interest, Clark said.” However, “she said, a representative for Waibel recently found that the agency’s right of way didn’t cover the entire length of the private road, so Waibel could move forward on her own to close the road.” The bureau “still wants to see the road open, and its workers will review archives this week to see whether they support Waibel’s position, she said.”

BLM POSTS STUNNING NIGHT-SKY IMAGES FROM DESERT. The [LiveScience](#) (4/21, 396K) reports that “some of the most beautiful night skies in the United States can be found on public lands managed by the U.S. Bureau of Land Management (BLM), a division of the U.S. Department of the Interior.” The article notes that “in honor of International Dark Sky Week, BLM posted this stunning series of images captured on our public lands by their photographer, Bob Wick.”

ADDITIONAL COVERAGE OF SUGAR PINE MINE DISPUTE. Additional coverage of the Sugar Pine Mine dispute was provided by [Reuters](#) (4/21).

Fish and Wildlife Service:

ILLEGAL TRADE IN ENDANGERED WILDLIFE THRIVES ONLINE. [Yale University \(CT\) Environment 360](#) (4/21, 3K) reports that “illegal online trafficking in imperiled wildlife is rampant, and attempted controls are few and largely ineffective.” The article notes that “ivory products are the most popular wildlife items on Internet markets, despite a global ban on ivory sales imposed by the 180-nation Convention on International Trade in Endangered Species (CITES).” According to the article, “the world’s largest online marketplace by far, eBay, is one of the few that makes a serious effort to control wildlife smuggling by deleting ads for illegal products — but only the few it notices or hears about.”

COURT CLEARS TOLL ROAD THROUGH ROCKY FLATS WILDLIFE REFUGE. The [Courthouse News](#) (4/20, 7K) reports that “despite objections from environmentalists, the 10th Circuit on Friday cleared construction of a parkway along the Rocky Flats National Wildlife Refuge.” The court found that “the proposed Jefferson Parkway does not violate the Rocky Flats National Wildlife Act, the National Environment Policy Act, or the Endangered Species Act.”

GROUPS SUE TO BLOCK PLANS TO KILL CORMORANTS TO SAVE SALMON. The [AP](#) (4/21, 2.28M) reports that “conservation groups have filed a lawsuit to stop plans to shoot more than 10,000 double-crested cormorants in the Columbia River Estuary.” Bob Salinger of Audubon Society of Portland claim “killing the birds to stop them from eating millions of baby salmon is a diversion from the real threat — the hydroelectric dams that kill adult fish on their way to spawning grounds, and juveniles migrating to the ocean.”

Also reporting on the story is the [Chinook \(WA\) Observer](#) (4/20, 19K).

WYOMING WOLF PACK IS LARGEST IN THE WEST. The [AP](#) (4/21, 2.28M) reports that “the West’s largest known wolf pack roams in northwest Wyoming, federal wildlife officials say.” The article notes that “the 24 wolves in the Lava Mountain Pack is nine more than any other pack surveyed this year in Wyoming, Montana, Idaho, Washington or Oregon, state and federal reports indicate.” Mike Jimenez, the FWS’ Northern Rocky Mountain wolf coordinator, said, “That’s a very large pack. They actually had a double litter a year ago, and that’s uncommon.”

ONE OF KAUAI’S OLDEST NENE DEAD AFTER BEING HIT BY VEHICLE. The [AP](#) (4/21, 2.28M) reports that “one of Kauai’s oldest nene has died after being struck by a vehicle.” According to the article, “the nene named Black XL was brought to the island in 2000 as part of a re-population effort for the endangered Hawaiian geese.” Kim Uyehara, biologist for the Kauai National Wildlife Complex, said, “She was an older bird and a successful breeder for many years.”

PROJECT STREAMS SAGE GROUSE STRUT DANCE ONLINE. [KTVZ-TV](#) Bend, OR (4/21, 4K) reports that a “new live-streaming video project supported by the U.S. Fish and Wildlife Service and The Nature Conservancy is offering the public a chance to see” the greater sage- grouse’s strutting dance

ADDITIONAL COVERAGE OF LAWSUIT OVER RHINO TROPHY PERMITS. Additional coverage of the lawsuit filed over the granting of permits by the FWS allowing hunters to import “carcasses of black rhinoceroses killed in Africa” was provided by the [Courthouse News](#) (4/20, 7K).

ALASKA NATIVE SCIENCE & ENGINEERING PROGRAM TOUTED. In a piece for the [Scientific American](#) (4/20, 2.83M), Dr. Herb Schroeder, Vice Provost and Founder of the Alaska Native Science & Engineering Program (ANSEP) and Professor of Engineering at the University of Alaska Anchorage, and Beth Spangler, an ichthyologist and the National Partnership Director for the Alaska Native Science & Engineering Program (ANSEP), write about the Alaska Native Science & Engineering Program. They say that “the objective of the ANSEP Summer Bridge is to provide recent high school graduates with real-world professional experiences doing science and engineering projects with practicing professionals.” The authors focus on the work of ANSEP Summer Bridge student Randall Friendly, who is “getting hands-on field experience working with the U.S. Fish and Wildlife Service as a brown bear researcher on Kodiak Island.”

Securing America’s Energy Future:

Renewable Energy:

COALITION URGES BLM TO REJECT SODA MOUNTAIN SOLAR PROJECT. The [Environment & Energy Publishing](#) (4/21, Subscription Publication, 705) reports that “a group of former Interior Department officials, conservationists, scientists, and local business and government leaders is asking the Bureau of Land Management to reject a controversial proposed solar power project near the Mojave National Preserve in the Southern California desert.” According to the article, “instead, the diverse group wrote in a petition letter delivered late Friday to Interior Secretary Sally Jewell that they want BLM to permanently protect the area where the agency is considering approval of the 358-megawatt Soda Mountain Solar Project, which would sit on 2,500 acres of federal land in San Bernardino County.” The letter “asks that BLM designate the proposed site of the solar plant, as well as additional areas among the North and South Soda Mountains, as a formal area of critical environmental concern (ACEC).”

Onshore Energy Development:

ADDITIONAL COVERAGE POLICYMAKERS USE COMPANY’S LANGUAGE IN LETTERS TO INTERIOR. Additional coverage that “coal mining company Cloudpeak Energy ghost wrote protest letters to the U.S. Department of Interior (DOI) on behalf of allied policymakers and business groups” was provided by the [Huffington Post](#) (4/21, Horn, 281K).

OFFICIALS TOO SOON TO LINK LOWER NUMBER OF QUAKES TO FRACKING LIMITS. The [AP](#) (4/21) reports, “Earthquakes appear to be striking Kansas less frequently but officials say it’s too early to say whether new rules are the reason.” According to the Hutchinson News, the Kansas Corporation Commission on March 20 capped the daily amount of waste saltwater injection in Harper and Sumner counties and limited disposal levels in five specific areas of “seismic concern.”

Offshore Energy Development:

AFTER FIVE YEARS, DEEPWATER HORIZON DAMAGE LINGERS. [NBC Nightly News](#) (4/20, story 7, 2:15, Holt, 7.86M) reported that Monday marked the five-year anniversary of the Deepwater Horizon explosion, “one of the worst environmental disasters” in the US. NBC (Thompson) reports that some industries that were impacted haven’t recovered, focusing on an oyster business that has seen its harvests decline sharply. BP America’s Geoff Morrell was shown saying, “Is the Gulf entirely back? We

have never said so, but we believe the Gulf has made a strong recovery.”

Fifth Anniversary Of Deepwater Horizon Disaster Marked. The [New Orleans Times-Picayune](#) (4/21, 621K) reports that “remembrances of those who lost their lives, an advertisement from a liberal advocacy group warning that oil and gas development is still dangerous and a discussion on possible new federal regulations are marking the 5th anniversary of the Deepwater Horizon disaster.” Sen. Bill Cassidy “gave an emotional speech on the Senate floor.” Cassidy said, “We pray their families find peace in the memory of their sons, husbands and fathers. The Macondo oil spill was the worst in our nation’s history. While the consequences of this spill are still seen, it is our task to live forward and in so doing honor the memory of these men and provide a better future for their families.”

Oil Spill Effects Linger Five Years After Explosion. [NPR](#) (4/20, Elliott, 1 58M) reports on the effects of BP’s Gulf of Mexico explosion. The effects of the spill are still seen on the beaches in the form of tar balls and mats, wildlife die-offs affecting dolphins and other species. In addition, “Louisiana was already losing land at an alarming rate, but scientists confirm that the oil spill accelerated the pace,” the article reports. BP senior VP Geoff Morrell says, “The Gulf has not been damaged anywhere near the degree some people feared it would have in the midst of the spill.” But local business owners disagree. “Our business is still struggling here at Bon Secour Fisheries because of the lack of oyster production,” Oysterman Chris Nelson says. “BP has done a lot to bring us back. But again the commitment by both the Administration and by BP was to get us back better than we were before. I don’t think we’re better than we were before.”

[Reuters](#) (4/20, Kaminsky) also reports on the continued struggle of oystermen following the oil spill.

Oil Spills Still Occurring Daily. The [Earth Island Journal](#) (4/21, 213) reports that “five years after the BP Deepwater Horizon blowout in the Gulf of Mexico sparked national outrage, oil spills remain a routine occurrence across the United States.” According to the article, “oil spills and pipeline ruptures occur daily – as they have nearly every day since the Deepwater Horizon exploded on April 20, 2010.”

Some Gulf Oystermen Are Losing Hope. [Business Insider](#) (4/21, 2.26M) reports that five years after the largest oil spill in U.S. history spewed millions of gallons of crude into the Gulf of Mexico, many Louisiana oystermen are losing hope that the population of the mollusks may never recover. The decline began after the spill, but its cause is unclear. Additional coverage was provided by the [Columbus \(OH\) Dispatch](#) (4/19, 605K) and the [Gulf Times](#) (4/21, 2K).

[NPR](#) (4/20, Kaplan-Levenson, 1.58M) reports in its “The Salt” food blog that seafood restaurants are facing a supply issue and need to pull dishes from menus “when orders fall through.” Many fishermen agree with the positive messages spouted by the Louisiana Seafood and Marketing Board and believe “oysters and crab populations are dwindling” likely due to the aftermath of the BP oil well spill in the Gulf of Mexico. Al Sunseri, owner of the 135-year old P+J Oyster Co. in New Orleans’ French Quarter said the downturn is attributed “all to the Deepwater Horizon oil disaster, and I’ll never say it’s anything but a disaster.” The Louisiana Department of Wildlife and Fisheries said in 2009, a year prior to the spill, “the average commercial blue crab landings in Louisiana totaled 53.1 million pounds. In 2013, the average landings were 38.8 million pounds.”

BP Oil Spill To Leave Mark On Law. The [New Orleans Times-Picayune](#) (4/20, Larino, 621K) reports that some aspects of the litigation that followed the BP Deepwater Horizon spill will forever affect the law. “In November 2012, BP agreed to pay the federal government a record \$4.5 billion in criminal penalties over the spill,” the article reports, adding that the agreement included \$525 million to settle SEC penalties. The federal government’s civil case against BP Exploration & Production was split into three phases, amounting to \$13.7 billion in environmental fines for the company. BP then appealed the ruling but lost, while Halliburton Energy Services in September 2014 agreed to pay \$1.1 billion to settle claims with local businesses and property owners. BP also had to pay for medical expenses incurred by cleanup crews after they became ill following their exposure to oil and cleaning chemicals. More claims await and BP is expected to pay as much as \$20 billion to pay for environmental damage it has caused.

Oil Spills Still Occurring Daily. The [Earth Island Journal](#) (4/21, 213) reports that “five years after the BP Deepwater Horizon blowout in the Gulf of Mexico sparked national outrage, oil spills remain a routine occurrence across the United States.” According to the article, “oil spills and pipeline ruptures occur daily – as they have nearly every day since the Deepwater Horizon exploded on April 20, 2010.”

Post-BP Spill Drilling Regulations Discussed. The [Los Angeles Times](#) (4/20, Muskal, 3.49M) reports, while many say offshore drilling has become safer since the Deepwater Horizon Explosion five years ago, there is still debate over whether the practice should be expanded. “The Obama Administration has proposed a series of regulations to prevent a repeat of the disaster, or at least to mitigate the worst of the effects,” the article reports, those measures include “improved technology to better seal well ruptures” and “added safety tests by more inspectors” at the tune of 92 instead of just 55 before. “Our goal will always be zero accidents and zero spills,” said Charlie Williams, Center for Offshore Safety’s executive director. Environmentalists still don’t think it’s enough. “Yes there have been improvements that Obama and others have put in place, but we still see spills,” said Raleigh Hoke, communications director for the Gulf Restoration Network. “For those living in Alaska and want to see what lies ahead, take a serious look at what is happening in the gulf.”

Ex-NOAA Director Calls For New Spill Contingency Plan. The [New Orleans Times-Picayune](#) (4/20, Schleifstein, 621K) reports, “Five years after the BP oil spill, the National Contingency Plan used by federal agencies to respond to major environmental threats still needs to be revamped to adjust to the lessons from the 2010 Gulf of Mexico disaster, said Jane Lubchenco, a marine biologist who ran the National Oceanic and Atmospheric Administration during the spill.” She called for a new plan to fight oil spills based on the takeaway from the 2010 disaster, noting that the response strategy used to deal with the Deepwater Horizon oil spill was conceived after the 1989 Exxon Valdez spill in Alaska, a plan that Federal officials found to be “outdated” as it only aimed to “fight a limited source of oil, rather than the seemingly never-ending flow of oil from the Macondo well, Lubchenco said,” according to the article. She urged for a thorough study into “the impacts of dispersants,” adding that “going forward, we need more information.”

Deepwater Horizon Oil Spill Victims Remembered. The [AP](#) (4/20, Breed) gives a detailed overview of the 11 men who died in the Deepwater Horizon oil explosion, with background information about them and their surviving families as they commemorate the fifth anniversary of the blowout.

Commentary. The [Aiken \(SC\) Standard](#) (4/20, 42K) editorializes that “near the time of the fifth anniversary of the Deepwater Horizon oil spill, President Barack Obama and his administration have wisely proposed new regulations aimed at strengthening oversight of offshore oil drilling equipment and ensuring that out-of-control wells can be sealed in an emergency.” The paper argues that “although industry officials anticipate the new regulations are estimated to cost about \$880 million over 10 years, strengthening blowout preventers just make sense.” It concludes that “tight regulations related to offshore drilling should be a deal breaker for any effort to move forward with exploration off South Carolina’s coast.”

Environmental Attorney Stuart H. Smith writes for The [Los Angeles Times](#) (4/20, Smith, 3.49M) that a recent fire at an oil rig operated by Mexico’s Pemex oil in the Gulf of Mexico, which did not result in an oil spill, was a reminder of the five-year-old BP Deepwater Horizon rig explosion. He adds that while the Obama Administration “has been a lot more aggressive about awarding new leases than developing stricter regulations for blowout preventers similar to the one that failed aboard the Deepwater Horizon,” it wasn’t until this month that new rules were proposed to “upgrade oil-rig technology.” But environmentalists don’t think those new rules are enough as “lax government standards for highly toxic dispersants are yet another problem,” which causes significant health damage to the wildlife, the article reports.

Additional Coverage. Additional coverage was provided by the [Associated Press](#) (4/21), the [New York \(NY\) Times](#) (4/21, Press, Subscription Publication, 9.97M), the [New Orleans \(LA\) Times-Picayune](#) (4/21, 621K), the [New Orleans \(LA\) Times-Picayune](#) (4/21, 621K), the [Baton Rouge \(LA\) Advocate](#) (4/21, 38K), the [Hattiesburg \(MS\) American](#) (4/20, 35K), the [Tri-City Herald \(WA\)](#) (4/19, 100K), the [Anderson \(SC\) Independent-Mail](#) (4/21, 90K), the [Amsterdam \(NY\) Recorder](#) (4/21), the [San Francisco \(CA\) Chronicle](#) (4/21, 2.21M), [Al Jazeera America](#) (4/21, 189K), [Reuters](#) (4/20, Kaminsky), [ABC News](#) (4/21, 3.41M), the [Huffington Post](#) (4/21, Cavnar, 281K), [USA Today](#) (4/20, StickneyThe (shreveportLa.), Times, 4.95M), [Government Executive](#) (4/21, 4K), [Business Insider](#) (4/21, 2.26M), [Newsweek](#) (4/21, 118K), [International Business Times](#) (4/21, 1.19M), the [National Geographic](#) (4/21, 32.58M), [WWNO-FM New Orleans \(LA\)](#) New Orleans (4/21, 5K), [WLOX-TV Biloxi \(MS\)](#) Biloxi, MS (4/21, 53K), [KLFY-TV Lafayette \(LA\)](#) Lafayette, LA (4/20, 2K), [WVKG-TV Mobile \(AL\)](#) Mobile, AL (4/21, 61K), [WTSP-TV St. Petersburg \(FL\)](#) St. Petersburg, FL (4/20, 69K), [WWL-TV New Orleans \(LA\)](#) New Orleans (4/20, 107K), [WWL-TV New Orleans \(LA\)](#) New Orleans (4/20, 107K), [WVUE-TV New Orleans \(LA\)](#) New Orleans (4/21, 32K), [KNOE-TV Monroe \(LA\)](#) Monroe, LA (4/21, 2K), and [WCTV-TV Tallahassee \(FL\)](#) Tallahassee, FL (4/21, 96K).

TWO DEMOCRATIC LAWMAKERS AIM TO BAN OFFSHORE DRILLING IN ATLANTIC OCEAN. [The Hill](#) (4/21, Cama, 224K) reports two Democratic legislators from New Jersey, Sen. Robert Menendez and Rep. Frank Pallone Jr., “said Monday they would sponsor legislation to ban offshore oil and natural gas drilling in the Atlantic Ocean.” The lawmakers “timed their announcement for the fifth anniversary of the Deepwater Horizon oil spill at a BP well in the Gulf of Mexico.” The announcement “comes as the Obama administration is considering auctioning some drilling rights in the Atlantic, somewhere between Virginia and Georgia.” In a statement Menendez said, “I am looking forward to re-introducing this Senate bill to ban Atlantic offshore drilling in an effort to not only protect the Garden State’s economy, but to guarantee a healthier and happier future for all East Coast citizens.”

The [Camden \(NJ\) Courier Post](#) (4/20, 133K) reports that Menendez said, “We cannot stand by and allow our coastline and our marine life to be endangered in order to inflate Big Oil’s already inflated profits.” Pallone said “the Deepwater Horizon spill is a reminder of the lasting environmental and economic damage that oil spills can cause.”

OFFSHORE DRILLING’S CYBERSECURITY CONCERNS DISCUSSED. [Reuters](#) (4/20) notes that April 20 marked the fifth anniversary of the Deepwater Horizon disaster, and adds that off-shore drilling comes with new potential cybersecurity concerns on top of environmental risks. A report last year from Willis Group said that too much of the energy sector is uninsured against major cyber attacks which may threaten “a major energy catastrophe — on the same scale — as” Exxon Valdez or Deepwater Horizon.

DHS data is cited saying 32 percent of critical national infrastructure attacks targeted energy firms in fiscal year 2014, which Willis Group views as a "time bomb."

Tackling America's Water Challenges:

CALIFORNIA COURT STRIKES DOWN CITY'S WATER PRICING PLAN. The [Los Angeles Times](#) (4/21, Stevens, 3.49M) reports that a California appeals court on Monday, in a decision that has "major implications for California's water conservation campaign," ruled "that a tiered water rate structure used by the city of San Juan Capistrano to encourage conservation was unconstitutional." The city "used a rate structure that charged customers who used small amounts of water a lower rate than customers who used larger amounts," but the 4th District Court of Appeal "struck down San Juan Capistrano's fee plan, saying it violated voter-approved Proposition 218, which prohibits government agencies from charging more for a service than it costs to provide it. 'We do hold that above-cost-of-service pricing for tiers of water service is not allowed by Proposition 218 and in this case, [the city] did not carry its burden of proving its higher tiers reflected its costs of service,' the court said in its ruling."

The [New York Times](#) (4/21, Nagourney, Subscription Publication, 9.97M) reports that the ruling "dealt a setback" to "one of the main tools drought regulators want to use to force reductions in urban water use." The court "said that San Juan Capistrano had failed to show a connection between the cost it was charging consumers and how much it paid to obtain and distribute the water," but the court also "sent the case back to the Orange County Superior Court judge, saying that this kind of pricing structure – known as conservation pricing – was acceptable if the water agency can show such a connection."

GROUPS BLAST PLAN TO CUT HABITAT AID FROM DELTA TUNNEL PROJECT. The [San Francisco Chronicle](#) (4/21, 2.21M) reports that "environmental groups Monday blasted a proposal by the state to jettison the habitat restoration portion of the massive delta water tunnel project as an ill-conceived "bait and switch" that will only make California's water woes worse." The article notes that "the idea of separating habitat restoration and tunnel construction came about because one of the primary tenets of the plan over the past eight years — 50-year water guarantees to the contractors paying for the project — appears to be falling apart."

Gov. Brown Urged To Set Aside Tunnel Project. The [San Jose \(CA\) Mercury News](#) (4/21, 936K) editorializes that "California needs Gov. Jerry Brown's leadership to deal with the worst drought in state history." It notes that "the state has to reset its water priorities to match both current and worst-case long-term needs," and argues that "Brown can't make that happen as long as he clings to his \$25 billion, twin-tunnel proposal to carry Delta water south." According to the paper, "with the tunnels set aside, Brown could focus his political clout on developing and implementing cheaper, quicker, more efficient ways to conserve water – that's the main thing now – and offer long-term solutions to water-starved Central Valley farmers and urban Southern California areas."

AGENCIES HOST EMERGENCY DRILL ON SNAKE RIVER OIL SPILL. The [Salem \(OR\) Capital Press](#) (4/20, 113K) reports on an April 16 training exercise, "which simulated how agencies would tackle a hypothetical Snake River oil spill." The drill, "hosted at the Red Lion Hotel by the Bureau of Reclamation and the Bureau of Homeland Security, involved six federal agencies, three regional hazardous materials teams, nine state agencies, a tribal nation and four county entities." Also, "from the private sector, Union Pacific Railroad, Idaho Power and three irrigation districts participated."

BOR TO PROVIDE UPDATE ON YAKIMA BASIN WATER FORECAST. The [Salem \(OR\) Capital Press](#) (4/20, 113K) reports that "with the drought outlook worsening, the U.S. Bureau of Reclamation is expected Tuesday to update two weeks earlier than scheduled its forecast for Yakima Basin water supplies."

Empowering Native American Communities:

OBAMA ADMINISTRATION NEARS ANNOUNCEMENT OF NEW TRIBAL RECOGNITION RULES. The [Connecticut Mirror](#) (4/20) reports that "the Obama administration is on the brink of making new federal tribal recognition rules – a move that could be a boon to several Connecticut tribes — and opponents are making 11th-hour attempts to stop or slow the process." The BIA said "late Monday that its long rule-making process is nearly over." According to the article, "the new regulations are on their way to the Office of Management and Budget's Office of Information and Regulatory Affairs for final review 'after...numerous tribal consultations and as part of President Obama's commitment to strengthen the nation-to-nation relationship with Native Americans.'" BIA spokeswoman Nedra Darling said, "This rule is the culmination of a multi-year effort by the department to reform the federal government's tribal recognition process by making that process more transparent, efficient, timely, and flexible, while at the same time maintaining the integrity of the acknowledgement process."

In an op-ed for the [Hartford \(CT\) Courant](#) (4/20, 557K) , Robert Steele, who was a Republican U.S. congressman from eastern Connecticut from 1970 to 1974, and State Sen. Tony Hwang criticize proposals that "could dramatically expand legalized gambling in Connecticut."

Additional coverage of federal recognition efforts was provided by [WTVF-AM](#) Blacksburg, VA (4/21).

INTERIOR, NAVAJOS PARTNER FOR LAND BUY-BACK PROGRAM. The [AP](#) (4/21) reports that "the Navajo Nation is partnering with the federal government to educate tribal members about the U.S. Interior Department's land buy-back program". The department and tribe "entered a cooperative agreement Monday." The agreement "outlines the resources that will be provided to the tribe to reach out to the owners of fractionated interested in reservation land."

Also providing coverage is the [Washington \(DC\) Times](#) (4/21, 644K).

FLATHEAD WATER COMPACT'S ROAD STILL FACES HURDLES. The [Missoulian \(MT\)](#) (4/19, 113K) reports that "after more than 30 years of negotiations, and two contentious battles in back-to-back Montana legislative sessions, it may feel like the Flathead water rights compact reached the finish line Thursday when the Montana House gave final approval to Senate Bill 262." But "in reality, it was more of a starting point in a state and federal legislative process that could drag out many more years." The article notes that "the compact with the Confederated Salish and Kootenai Tribes must also gain congressional approval, and there are no guarantees about what may happen to it when the compact moves on to Washington, D.C."

Top National News:

MEDIA ANALYSES ADDITIONAL US SHIPS ON YEMENI COAST A WARNING TO IRAN. The Administration's announcement that it is sending the aircraft carrier USS Theodore Roosevelt and a guided missile cruiser to the waters off Yemen is being cast as a show force amid fears that Iran is sending arms to Houthi rebels. The move was reported on two of last night's network news broadcasts and is widely reported this morning on print media. [ABC World News](#) (4/20, story 6, 0:15, Muir, 5.84M) called the move a "show of force," and the [Wall Street Journal](#) (4/21, Nissenbaum, Subscription Publication, 5 67M) says it is meant to serve as a deterrent to Iran.

According to [NBC Nightly News](#) (4/20, story 2, 1:55, Holt, 7 86M), the US ships are "positioned to intercept a convoy of Iranian freighters suspected of carrying weapons bound for Yemen. ... Senior defense officials tell NBC News that a convoy of freighters suspected of carrying weapons" appears to be headed from Iran to Yemen, and, "in addition to the US, a coalition of war ships from Egypt, Saudi Arabia and United Arab Emirates have a blockade in place to interdict any arms shipments." NBC warned that "a military confrontation between the US and Iran could not come at a worse time," but US officials "suspect, or at least hope, the Iranians are playing game of cat and mouse."

In a report titled "Warning Iran, US Sends Two More Ships To Yemen," the [New York Times](#) (4/21, Shear, Rosenberg, Subscription Publication, 9 97M) says the deployment of US ships serves as "a warning to Iran about its shipments of weapons" to Houthi rebels. While the Administration "cast the deployment primarily as a show of force," it "acknowledged that the flotilla could be used to interdict" any arms shipments. An unnamed US official is quoted as saying, "This is really about sending a message. It is a message to our partners that we are in this and willing to support. It is a message to the Iranians that we're watching."

[USA Today](#) (4/21, Brook, 4.95M) similarly reports that US defense officials said the Roosevelt is "tracking a convoy of Iranian ships headed to the Gulf of Aden," carrying suspected arms for the Houthis, but Kevin Corke reported on [Fox News' Special Report](#) (4/20, 1 53M) that the Defense Department has confirmed the Roosevelt was sent "to intercept any ships that may be carrying weapons to assist the Houthi rebels." [Reuters](#) (4/21, Alexander, Stewart), however, reports Pentagon spokesman Army Col. Steve Warren denied that the ships were deployed to intercept Iranian arms shipments to the Houthis. Additionally, [AFP](#) (4/21) quotes an unnamed official as saying, "To speculate on boardings would be premature." The [Washington Times](#) (4/21, Klimas, 644K), [Newsweek](#) (4/20, Mosendz, 118K), and [The Hill](#) (4/20, Wong, 224K) also report the Pentagon's denial that the ships plan to intercept the Iranian convoy, while Jim Sciutto reported on [CNN's Situation Room](#) (4/20, 554K) that the US ships are there to "keep the Straits [of Hormuz] open," because the US is worried the Houthis may close off the strategic waterway.

The [AP](#) (4/21, Baldor) reports White House spokesman Josh Earnest "would not comment specifically on any Navy movements in Yemeni waters, but said the US has concerns" about what he called Iran's "continued support for the Houthis." Said Earnest, "We have seen evidence that the Iranians are supplying weapons and other armed support to the Houthis in Yemen. That support will only contribute to greater violence in that country. These are exactly the kind of destabilizing activities that we have in mind when we raise concerns about Iran's destabilizing activities in the Middle East."

On [CNN's Situation Room](#) (4/20, 554K), Sen. John McCain said the Roosevelt's presence to potentially intercept Iranian warships is "a bit ominous," describing it as "a very serious, serious situation," and [Voice of America](#) (4/20, Seldin, 70K) says the "rising tensions" over Yemen "appear to be pitting the United States against Iran in a sensitive

showdown in the Gulf of Aden." The [Daily Caller](#) (4/20, Wenig, 318K) notes that "US officials have expressed concern over Iran covertly supplying Houthi rebels with weaponry, saying it could ignite direct conflict with Saudi Arabia."

Meanwhile, according to a report by the [Huffington Post](#) (4/20, Watkins, 281K), Iranian "representatives discouraged Houthi rebels from taking" Sana'a last year, US officials say. The "newly disclosed information," it says, "casts further doubt on claims that the rebels are a proxy group fighting on behalf of Iran, suggesting that the link between" Tehran and the Houthis may not be as strong as some have asserted.

The announcement of the deployment came as Iranian Foreign Minister Mohammad Javad Zarif wrote in an op-ed in Monday's [New York Times](#) that a nuclear deal between Tehran and the West could lead to regional cooperation, beginning with the crisis in Yemen. Asked about Zarif's proposal, [Reuters](#) (4/21, Mohammed) reports the State Department said Monday that it could consider talking with Iran about regional stability, but made a distinction between talking with Iran and working with it. Spokeswoman Marie Harf said, "We've always said we won't be coordinating or working with the Iranians, and there's a difference between discussing and working with." At the White House, [AFP](#) (4/21) reports, Earnest said it was "a little ironic" for Zarif to be calling for a diplomatic resolution in Yemen "while at the same time his country continues to supply arms to one party." The [Washington Times](#) (4/21, Taylor, 644K) also reports on Zarif's op-ed.

Michael Crowley writes for [Politico](#) (4/20, Crowley, 669K) that the crisis in Yemen has "emerged as a surprise complication for US-Iranian relations" as the Administration seeks to conclude a nuclear deal with Tehran. But "for now, administration officials and outside experts say, tensions over Yemen don't threaten to derail a nuclear deal."

More Than Two Dozen Killed In Airstrike On Yemeni Capital. In what "appeared to be the deadliest airstrike in Sana'a since a military alliance led by Saudi Arabia began its air campaign" against the Shiite Houthi rebels more than three weeks ago, the [Washington Post](#) (4/21, Al-Mujahed, Naylor, 5.17M) reports that at least 25 people were killed and more than 250 were wounded Monday in a strike on the Yemeni capital. The airstrike, which "targeted a weapons depot," came "a day after rebel leader Abdul-Malek al-Houthi pledged to press ahead with his campaign despite the coalition strikes." [Reuters](#) (4/21) posted a similar report on the airstrike.

The [New York Times](#) (4/21, Kalford, Fahim, Subscription Publication, 9.97M) reports that the airstrike "set off a huge explosion...flattening homes close to the site and shaking buildings as far away as the outskirts of the city." While the residents of Sana'a "have been caught in the rhythms of an insistent and repetitive war," Monday's explosion "was different, dealing a new psychological blow as its shock wave knocked residents from their chairs and beds and shattered windows more than a mile away."

Obama, UAE Crown Prince Discuss Regional Security. The [AP](#) (4/21) reports that regional insecurity and the Iran nuclear talks "topped the agenda" during the President's meeting Monday with UAE Crown Prince Mohammed bin Zayed Al Nahyan, the White House said. The two did not make any public remarks after the meeting, but [Reuters](#) (4/21, Rampton) quotes a White House statement as saying they "reaffirmed their mutual commitment to close defense and security cooperation." Reuters also notes that the President will meet with the leaders of the Gulf Cooperation Council at the White House next month.

Moniz: Inspectors Need Full Access. [Bloomberg News](#) (4/21, Snyder, Lakshmanan, 2.94M) reports that in an interview Monday with Bloomberg TV, Energy Secretary Moniz said inspectors will need full access as part of any nuclear deal with Tehran. "We expect to have anywhere, anytime access," Moniz said. Inspections, he added, would be part of "a well-defined process with a well-defined end time for access to places that are suspected of out-of-bounds activities." According to Bloomberg News, Moniz "said he thought it would take Iran at least six months to meet the terms of a deal sufficient to warrant relief from the sanctions."

Iran Charges Washington Post Reporter With Espionage. On [NBC Nightly News](#) (4/20, story 8, 2:00, Holt, 7.86M), Lester Holt reported that Iran has charged Washington Post reporter Jason Rezaian "with espionage and writing stories critical of the government." White House press secretary Josh Earnest called the charges "absurd," and called for them to be "immediately dismissed." Nancy Cordes added that "Secretary of State John Kerry raised Rezaian's case with Iranian leaders during their last round of nuclear negotiations. And it is sure to come up again...when those talks resume in Vienna tomorrow."

The [Washington Post](#) (4/21, Morello, 5.17M) reports that according to Rezaian's lawyer, an indictment alleges that he gathered information "about internal and foreign policy" and provided it to "individuals with hostile intent," but included "no evidence to justify the accusations." The [New York Times](#) (4/21, Gladstone, Erdbrink, Subscription Publication, 9.97M) notes that "one of the counts...accused Mr. Rezaian of having broken the law by writing a letter to President Obama." Earnest said that while the Administration has not seen the actual charges, "if the reports are true these charges are absurd, should be immediately dismissed, and Jason should be freed immediately."

According to [USA Today](#) (4/21, Yu, 4.95M), Rezaian was informed of his charges after his lawyer "visited him Monday for 90 minutes, his first consultation with a lawyer since the arrest" on July 22. [The Hill](#) (4/20, Carney, 224K), meanwhile, reports in its "Floor Action" blog that Sens. Marco Rubio and Mark Kirk "doubled down Monday on a push to get President Obama to tie" Rezaian's release to the ongoing Iran nuclear talks, calling the charges against him "the latest example of the true nature of the Iran regime."

OBAMA SIGNALS HE IS OPEN TO SUPPORTING MEDICAL MARIJUANA. [The Hill](#) (4/21, Fabian, 224K) reports that President Obama "signaled he is open to supporting medical marijuana, saying 'we should follow the science as opposed to ideology' on the issue." In an interview with CNN that aired on Sunday, Dr. Sanjay Gupta "asked the president whether he would support a Senate bill that would roll back federal restrictions on medical marijuana." Obama "stopped short of backing the legislation," but "he said: 'I think carefully prescribed medical use of marijuana may in fact be appropriate and we should follow the science as opposed to ideology on this issue.'" The president "has long faced pressure from marijuana legalization advocates to remove it from the federal government's list of most dangerous drugs, a step that could lead to sweeping changes to the nation's drug laws," but he has "not endorsed such a move."

Legalized DC Pot Adds Potential Spice To White House Correspondents Dinner. The [Washington Post](#) (4/21, 5.17M) reports in its "Reliable Source" blog that as "the various celebrities who will be decorating the ballroom of the Washington Hilton on Saturday" for the White House Correspondents Dinner "descend on the city, entourages in tow, they'll have another option to add to their lists of party favors." Kimball Stroud, "a consultant who's known as one of the city's most experienced 'celebrity wranglers,'" says "she 'expects the availability of legal weed' in DC 'to add a little something to the weekend's festivities.' 'D.C.'s new law is well known, and the new environment should make for interesting interactions on outdoor patios and terraces at private parties,' she says." DC-area marijuana activist Adam Eiding "notes that it would be perfectly fine to carry less than two ounces into the dinner itself," and he said the Secret Service "shouldn't hassle your stash."

Marijuana Enthusiasts In Colorado Celebrate Unofficial "Pot Holiday." [USA Today](#) (4/21, Hughes, 4.95M) reports from Denver that the "smell of marijuana hung heavy over the city this weekend as partiers began celebrating the '4/20' pot holiday." April 20 "has long been an important date within the marijuana community, and Denver for several years has hosted a massive marijuana festival to mark the day." USA notes that "marijuana enthusiasts often use the '420' phrase as a signal to others, a code born largely from a community used to operating in secret." On Monday, "smokers" were "expected to gather at 4:20 p.m. MT downtown to light up publicly as a show of civil disobedience on what some jokingly call their 'high holiday.'" USA adds that while "marijuana possession and use is legal in Colorado, public use is not."

MEDIA ANALYSIS CLINTON "ON THE DEFENSIVE" OVER FOREIGN DONATIONS TO FOUNDATION. On [ABC World News](#) (4/20, story 11, 1:25, Muir, 5.84M), Cecilia Vega reported that Hillary Clinton, making her first visit to New Hampshire since announcing her 2016 White House run, on Monday "was on the defensive about a bombshell new book" that "accuses the former secretary of state of handing out favors to foreign donors who gave big money to the Clinton Foundation and to Bill Clinton." Vega added that she asked Hillary Clinton, "Did foreign entities receive any special treatment for making any kind of donations to the foundation of your husband?" Hillary Clinton was shown responding, "Well, we're back into the political season and therefore we will be subjected to all kinds of distraction and attacks and I'm ready for that."

On [NBC Nightly News](#) (4/20, story 6, 1:50, Holt, 7.86M), Andrea Mitchell reported that Clinton "ran into a political storm" on Monday over "questions about foreign donations to the Clinton Foundation in a new book, 'Clinton Cash,' by a conservative author." Mitchell noted that the New York Times on Monday reported on Peter Schweizer's upcoming book claiming foreign entities hired Bill Clinton to speak and donated to the family foundation to get favorable treatment from Hillary Clinton's State Department. In New Hampshire, "Hillary Clinton 'tried to brush it off.'"

The [AP](#) (4/21, Lerer) reports that Clinton "pushed back against" the claims in Schweizer's book, saying, "We will be subjected to all kinds of distractions and attacks. I'm ready for that. I know that that comes, unfortunately, with the territory." The AP adds that Team Clinton "moved quickly to discredit Schweizer," portraying "him as a Republican operative working to defeat her. Schweizer is president of the Government Accountability Institute, a conservative organization, and has advised Republican politicians on foreign policy."

White House Dismisses Questions On Donations. The [Washington Times](#) (4/21, Wolfgang, 644K) reports that the White House on Monday "refused to even acknowledge accusations that donors to the Clinton Foundation received preferential treatment from the Obama administration" during Clinton's tenure as secretary of state. White House press secretary Josh Earnest said that "the proper steps were taken to ensure all ethical guidelines were followed with regard to Mrs. Clinton and her family foundation." The Times misquotes Earnest as saying, "There have been a lot of accusations that have been lobbed in the context of a just-starting presidential campaign and those accusations have been accompanied by much evidence. I'm not going to stand here and respond to accusations."

However, on its website, [CNN](#) (4/20, Jaffe, Merica, 2.05M) accurately quoted Earnest as saying that "while there have been 'a lot of accusations made about this,' there's 'not a lot of evidence.'"

Clinton Indicates She Wants To Tighten Rules On Wall Street Traders. Meanwhile [Bloomberg Poli](#)

Mr. **NOLAN**, Mr. **FITZPATRICK**, Mr. **RIGELL**, and Mr. **FATTAH**):

~~—H. Res. 207. A resolution expressing the sense of the House of Representatives regarding establishing a National Strategic Agenda; to the Committee on Energy and Commerce, and in addition to the Committees on Ways and Means, Education and the Workforce, and the Budget, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.~~

The Department has been Invited to the Following Hearings:

Wed., Apr. 22 Oil Spill Safety Improvements

House Natural Resources Committee (Bishop)

Full Committee oversight hearing on Innovations in Safety Since the 2010 Macondo Incident

9:30 a.m.; Room 1324 Longworth

Notice Received 4.13.15

Witness: Brian Salerno, Director, Bureau of Safety and Environmental Enforcement

(Testimony Received)

Wed., Apr. 22 Land and Water Conservation Fund

Senate Energy and Natural Resources Committee (Murkowski)

Full Committee oversight hearing on The Reauthorization of and Potential Reforms to the Land and Water Conservation Fund (LWCF)

10:00 a.m.; Room SD-366 Dirksen

Hearing Noticed 4.6.15

Witness: Mike Connor, Deputy Secretary

(Testimony Received)

Wed., Apr. 22 Transportation and Indian Issues

Senate Indian Affairs Committee (Barrasso)

Full Committee oversight hearing on Tribal Transportation: Pathways to Safer Roads in Indian Country

2:30 p.m.; Room SD-628 Dirksen

Notice Not Yet Received

Witness: Mike Black, Director, Bureau of Indian Affairs

(Testimony Received)

Wed., Apr. 22 Poaching National Security Issues

House Foreign Affairs S/C on Terrorism, Nonproliferation, and Trade (Poe)
 Subcommittee oversight hearing on *Poaching and Terrorism: A National Security Challenge*

3:00 p.m.; Room 2172 Rayburn

Invitation Received 4.17.15

Witness: *Robert Dreher, Associate Director, U.S. Fish and Wildlife Service*
(Testimony Received)

Wed., Apr. 22 Interior Tribal Recognition Process Issues

House Natural Resources S/C on Indian, Insular and Alaska Native Affairs
 (Young)

Subcommittee oversight hearing on *The Obama Administration's Part 83 Revisions and How They May Allow the Interior Department to Create Tribes, Not Recognize Them*

4:00 p.m.; Room 1324 Longworth

Hearing Noticed 4.14.15

Witness: *Kevin Washburn, Assistant Secretary – Indian Affairs*
 (Testimony Received)

.....
 Thurs., Apr. 30 Hydraulic Fracturing Rule
 (Rescheduled)

Senate Energy and Natural Resources S/C on Public Lands, Forests and
 Mining (Barrasso)

Subcommittee oversight hearing on *the Bureau of Land Management's Final Hydraulic Fracturing Rule*

2:30 p.m.; Room SD-366 Dirksen

Hearing Noticed 3.27.15

Witness: *Neil Kornze, Director, Bureau of Land Management*

Tentative Hearings:

Wed., May 6 BIE Blueprint

**Senate Committee on Indian Affairs (Barrasso)
Full Committee oversight hearing on BIE Blueprint for
Reform/Reorganization**

Time: 2:30 p.m.

Potential Witness: Charles Roessel, Director, Bureau of Indian Education

POSTPONEMENTS

.....

Hearings of Interest:

Tues., Apr. 21 Surface Transportation Reauthorization

Senate Banking, Housing and Urban Affairs Committee (Shelby)

Full Committee oversight hearing on Surface Transportation Reauthorization: Building on the Successes of MAP-21 to Deliver Safe, Efficient and Effective Public Transportation Services and Projects

10:00 a.m.; Room SD-538 Dirksen
No request for DOI witness

Wed., Apr. 22 Weather Impact on Commerce and Safety

Senate Commerce, Science and Transportation Committee (Thune)

Full Committee hearing on Weathering the Storm: How Can We Better Communicate Weather to Enhance Commerce and Safety?

10:00 a.m.; Room SR-253 Russell
No request for DOI witness

Wed., Apr. 22 Native American Schools

House Education and the Workforce S/C on Early Childhood, Elementary and Secondary Education (Rokita)

Subcommittee oversight hearing on Examining the Challenges Facing Native American Schools

10:00 a.m.; Room 2175 Rayburn
No request for DOI witness

Wed., Apr. 22 Excess Uranium Management

House Oversight and Government Reform S/C on Interior (Lummis)

Subcommittee oversight hearing on Examining the Department of Energy's Excess Uranium Management Plan

10:00 a.m.; Room 2154 Rayburn
No request for DOI witness

Wed., Apr. 22 Cybersecurity and Small Business

Full Committee Hearing (Chabot)

Full Committee oversight hearing on Small Business, Big Threat: Protecting Small Businesses from Cyber Attacks

11:00 a.m.; Room 2360 Rayburn
No request for DOI witness

~~Committee on Oversight and Government Reform; Oversight Plans for all House Committees (H. Rept. 414-82).~~

The Department has been Invited to the Following Hearings:

Wed., Apr. 22 Oil Spill Safety Improvements

House Natural Resources Committee (Bishop)

Full Committee oversight hearing on Innovations in Safety Since the 2010 Macondo Incident

9:30 a.m.; Room 1324 Longworth

Notice Received 4.13.15

Witness: Brian Salerno, Director, Bureau of Safety and Environmental Enforcement

(Testimony Received)

Wed., Apr. 22 Land and Water Conservation Fund

Senate Energy and Natural Resources Committee (Murkowski)

Full Committee oversight hearing on The Reauthorization of and Potential Reforms to the Land and Water Conservation Fund (LWCF)

10:00 a.m.; Room SD-366 Dirksen

Hearing Noticed 4.6.15

Witness: Mike Connor, Deputy Secretary

(Testimony Received)

Wed., Apr. 22 Transportation and Indian Issues

Senate Indian Affairs Committee (Barrasso)

Full Committee oversight hearing on Tribal Transportation: Pathways to Safer Roads in Indian Country

2:30 p.m.; Room SD-628 Dirksen

Notice Not Yet Received

Witness: Mike Black, Director, Bureau of Indian Affairs

(Testimony Received)

Wed., Apr. 22 Poaching National Security Issues

House Foreign Affairs S/C on Terrorism, Nonproliferation, and Trade (Poe)

Subcommittee oversight hearing on Poaching and Terrorism: A National Security Challenge

3:00 p.m.; Room 2172 Rayburn

Notice Not Yet Received

Witness: Robert Dreher, Associate Director, U.S. Fish and Wildlife Service

Wed., Apr. 22 Interior Tribal Recognition Process Issues

**House Natural Resources S/C on Indian, Insular and Alaska Native Affairs
(Young)**

***Subcommittee oversight hearing on The Obama Administration's Part 83
Revisions and How They May Allow the Interior Department to Create
Tribes, Not Recognize Them***

4:00 p.m.; Room 1324 Longworth

Hearing Noticed 4.14.15

***Witness: Kevin Washburn, Assistant Secretary – Indian Affairs
(Testimony Received)***

Thurs., Apr. 30 Hydraulic Fracturing Rule
(Rescheduled)

**Senate Energy and Natural Resources S/C on Public Lands, Forests and
Mining (Barrasso)**

***Subcommittee oversight hearing on the Bureau of Land Management's Final
Hydraulic Fracturing Rule***

2:30 p.m.; Room SD-366 Dirksen

Hearing Noticed 3.27.15

Witness: Neil Kornze, Director, Bureau of Land Management

Tentative Hearings:

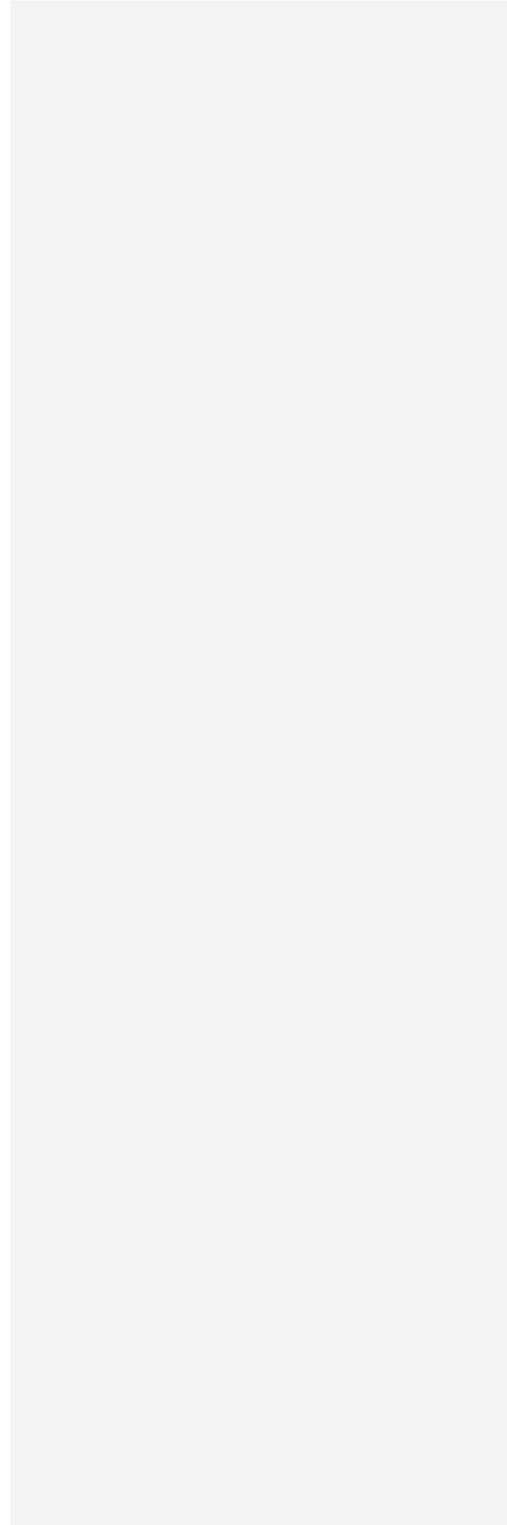

Wed., May 6 BIE Blueprint

***Senate Committee on Indian Affairs (Barrasso)*
***Full Committee oversight hearing on BIE Blueprint for
Reform/Reorganization*****

Time: 2:30 p.m.

Potential Witness: Charles Roessel, Director, Bureau of Indian Education

POSTPONEMENTS

Hearings of Interest:**Tues., Apr. 21 Surface Transportation Reauthorization****Senate Banking, Housing and Urban Affairs Committee (Shelby)**

Full Committee oversight hearing on Surface Transportation Reauthorization: Building on the Successes of MAP-21 to Deliver Safe, Efficient and Effective Public Transportation Services and Projects

10:00 a.m.; Room SD-538 Dirksen
No request for DOI witness

Wed., Apr. 22 Weather Impact on Commerce and Safety**Senate Commerce, Science and Transportation Committee (Thune)**

Full Committee hearing on Weathering the Storm: How Can We Better Communicate Weather to Enhance Commerce and Safety?

10:00 a.m.; Room SR-253 Russell
No request for DOI witness

Wed., Apr. 22 Native American Schools**House Education and the Workforce S/C on Early Childhood, Elementary and Secondary Education (Rokita)**

Subcommittee oversight hearing on Examining the Challenges Facing Native American Schools

10:00 a.m.; Room 2175 Rayburn
No request for DOI witness

Wed., Apr. 22 Cybersecurity and Small Business**Full Committee Hearing (Chabot)**

Full Committee oversight hearing on Small Business, Big Threat: Protecting Small Businesses from Cyber Attacks

11:00 a.m.; Room 2360 Rayburn
No request for DOI witness

Wed., Apr. 22 Human Trafficking Issues**House Foreign Affairs S/C on Africa, Global Health, Global Human Rights and International Organizations (Smith)**

Subcommittee oversight hearing on Accountability and Transformation: Tier Rankings in the Fight Against Human Trafficking

1:30 p.m.; Room 2200 Rayburn
No request for DOI witness

Tues., Apr. 28 Quadrennial Energy Review**Senate Energy and Natural Resources Committee (Murkowski)**

Full Committee oversight hearing on the Administration's Quadrennial Energy Review

9:30 a.m.; Room SD-366 Dirksen

No request for DOI witness

Thurs., Apr. 30 Energy Efficiency Legislation**Senate Energy and Natural Resources Committee (Murkowski)**

Full Committee hearing on

S. 703 (Coons), Weatherization Enhancement and Local Energy Efficiency Investment and Accountability Act**S. 720 (Portman)**, Energy Savings and Industrial Competitiveness Act of 2015**S. 858 (Gardner)**, A bill to amend the National Energy Conservation Policy Act to encourage the increased use of performance contracting in Federal facilities

10:00 a.m.; Room SD-366 Dirksen

DOI in the News:

SECRETARY JEWELL TO PARTICIPATE IN NATIONAL PARKS DISCUSSION ON TWITTER. The [National Geographic](#) (4/14, 32.58M) announces that Interior Secretary Sally Jewell will participate in a Twitter chat on April 17 about national parks.

SECRETARY JEWELL, FROMAN TO BRIEF HOUSE DEMOCRATS ON TRANS-PACIFIC PARTNERSHIP. The [Politico](#) (4/15, 669K) reports that "U.S. Trade Representative Michael Froman will continue a series of briefings for House Democrats on the Trans-Pacific Partnership." According to the article, "Wednesday's 9 a.m. meeting with Froman and Interior Secretary Sally Jewell will focus on the pact's environmental provisions."

INTERIOR FACES TOUGH CHALLENGE IN MEETING CLIMATE CHANGE DIRECTIVE. In a piece for the [New Republic](#) (4/15, 165K), Rebecca Leber writes that no other agency in the Obama Administration "will have a tougher time meeting" President Barack Obama's order "to cut greenhouse gas emissions over the next decade by 40 percent from their 2008 levels" than the Interior Department. Leber notes that "the fossil fuel energy that's developed" on federal lands "could be responsible for as much as 24 percent of the U.S.'s climate change emissions; the lands account for 40 percent of the nation's coal production (concentrated in the Wyoming and Montana's Powder River Basin), and 23 percent and 16 percent of oil and natural gas respectively." According to Leber, "this makes the Department of Interior crucial to the future of climate change action, but the agency—the BLM in particular—only haphazardly considers climate change in its everyday decisions."

NRDC President Sets Sights On Climate Change. [The Hill](#) (4/15, Cama, 224K) reports that former Interior Department official Rhea Suh is now tackling climate change as president of the Natural Resources Defense Council. Suh said, "It's one of our biggest priorities, if not the biggest, to ensure that the single most important thing the U.S. federal government can do on climate is done." Suh said her "Interior work is helping her in her new position, even if ethics rules limit her ability to lobby the administration." The article notes that Suh had gone in front of the Senate Energy and Natural Resources Committee three times for nomination hearings for the Interior Department assistant secretary position, possibly "a record for having the most Senate confirmation hearings" without ever receiving a full Senate vote. GOP members "hammered Suh repeatedly" for having done work at various environmental groups. Pushing back against this criticism, Suh believes that the position to which she has been nominated, the Assistant Secretary for fish, wildlife and parks, is all about conservation, perhaps even "the most important conservation job in the federal government."

Interior Retrofit Headquarters Building. The [Energy Manager Today](#) (4/15) reports that the Department has "awarded Ameresco an Energy Savings Performance Contract (ESPC) valued at \$77 million over its 20-year term to provide for the implementation of water conservation and energy efficiency measures and ongoing energy management services to the DOI headquarters building in Washington, DC." The article notes that "the energy efficiency project is expected to reduce electricity consumption by 31 percent and to reduce steam utilization by 12 percent."

INTERIOR, AGRICULTURE DEPARTMENTS HOLD MYAMERICA HACKATHON. The [FedScoop](#) (4/15) reports on the hackathon held by the Interior and Agriculture departments. According to the article, "the myAmerica hackathon comes after several groups criticized the government for not doing enough to promote the use of open data in its plans for Recreation.gov, a site that holds booking information on about 90,000 federal lands reservable sites." The article notes that "when agencies announced the event, they also debuted a new API, or application programming interface, that allows the public to access planning and booking-related recreation data."

Additional coverage was provided by [Wired](#) (4/14, 4.24M).

HOUSE REPUBLICANS UNVEIL BILL FOR ENERGY, WATER PROGRAMS. The [E&E Daily](#) (4/14) reports that "House Republicans today released a spending bill for energy and water programs that would block the Obama administration's controversial water rule for a year while boosting funding for fossil energy programs and a long-stalled effort to reopen the Yucca Mountain nuclear waste repository site." The legislation, "which would provide fiscal 2016 funding for the Department of Energy, Army Corps of Engineers and other agencies, is scheduled to be marked up tomorrow by the House Energy and Water Development and Related Agencies Appropriations Subcommittee." The bill will "likely be on the House floor in the coming weeks and is expected to pass the lower chamber by the beginning of next month, House Majority Leader Kevin McCarthy (R-Calif.) told GOP members last week."

CONSERVATION GROUPS PUSH BACK ON FEDERAL LANDS TRANSFER IDEA. The [AP](#) (4/15, Neary, 1.37M) reports that "stung by a recent vote in Congress, national conservation groups are mustering opposition to the increasing call from many western states to transfer federal lands to state control." The U.S. Senate "last month narrowly approved a budget amendment sponsored by Sen. Lisa Murkowski, R-Alaska, that could set the stage for future legislation to sell or transfer federal lands to state or local governments." Kate Zimmerman, "public lands policy director for the National Wildlife Federation in Colorado, said she believes most of the conservation community is concerned about the language in the Murkowski amendment, and that fact the Senate passed it by one vote."

Additional coverage of the push for state takeover of federal lands was provided by the [Summit County \(CO\) Citizens Voice](#) (4/14, 506).

INDONESIAN PARK MANAGERS TOUR SITES IN US. The [Outer Banks \(NC\) Sentinel](#) (4/15, 25K) reports that "a program co-sponsored by the Department of the Interior and USAID, for the purpose of promoting friendship and strengthening the land and wildlife management of Indonesian National Parks, recently brought a group of Indonesian national park managers and staff to the U.S." According to the article, "they exchanged habitat and wildlife information as they visited a variety of National Parks and Wildlife Refuges."

ADDITIONAL COVERAGE ANNIVERSARY OF BORDER OPENING CELEBRATED. Additional coverage of the anniversary of opening of the crossing that links Big Bend National Park in Texas to Boquillas del Carmen, Coahuila was provided by [KNPR-FM Las Vegas](#) (4/15, 3K).

ADDITIONAL COVERAGE OF ANNIVERSARY EVENTS OF LINCOLN'S ASSASSINATION. Additional coverage of the events marking Lincoln's assassination was provided by [PBS](#) (4/15, 1.03M), [CNN](#) (4/13, 2.05M), and the [Washington \(DC\) Post](#) (4/14, Wheeler, 5.17M).

ADDITIONAL COVERAGE OF HONOLULI NATIONAL MONUMENT DEDICATION. Additional coverage of the Honoluli National Monument dedication was provided by the [Rafu Shimpo \(CA\)](#) (4/15, 131K).

SUPPORT URGED FOR WILDFIRE DISASTER FUNDING ACT . The [Arizona Republic](#) (4/14, 1.14M) editorializes that "the Wildfire Disaster Funding Act would treat wildfire-fighting funds the same way FEMA uses hurricane disaster funds" The paper asserts that "lawmakers must come to grips with the fact that their votes on behalf of this act literally may make the difference between the continued fragile existence of the great Western forests and their demise." It concludes that "without predictable funds for

America's Great Outdoors:

National Park Service:

NPS PREPARES FOR CENTENNIAL. The [Juneau \(AK\) Empire](#) (4/15, 14K) reports that the NPS is "asking for an additional \$2.4 million for Alaska in its 2016 fiscal year budget proposal to increase operational capacity as part of its Centennial Initiative." The celebration "dovetails with President Barack Obama's push to encourage younger park visitors." The article notes that "in February, the White House unveiled its 'Every Kid in a Park' initiative, a plan to get kids to national, state or local parks across the country."

NPS SUGGESTS ADDING 270 SQUARE MILES TO SANTA MONICA MOUNTAINS NATIONAL RECREATION AREA . The [Houston Chronicle](#) (4/15, Jablon, 2 28M) reports that the NPS "on Tuesday recommended adding 270 square miles of land around Los Angeles to the Santa Monica Mountains National Recreation Area in order to protect the vast web of wilderness and recreation areas that lie in the midst of millions of people." The report said "the region contains national historic landmarks, a rich ecosystem and a treasure trove of geological and archaeological resources." However, "the various landscapes are currently isolated from each other and crisscrossed by roads and housing tracts." The study "examined various alternatives and concluded that it wouldn't be feasible to create a new national park — something that critics had dubbed a land-grab and charged was the real purpose behind the study."

Additional coverage was provided by the [Washington \(DC\) Times](#) (4/15, Jablon, 644K), [KCAL-TV Los Angeles \(CA\)](#) Los Angeles (4/14, 163K), and [KFMB-TV San Diego \(CA\)](#) San Diego (4/15, 37K).

NPS DENIES IT IS PLANNING TO CLOSE PARTS OF ROCKY MOUNTAIN. The [E&E Daily](#) (4/14) reports that the NPS is "pushing back on recent news stories that claimed it was considering closing parts of Rocky Mountain National Park due to overcrowding." NPS spokesman Kyle Patterson said, "It appears there is some significant misinformation about a recent interview that was conducted pertaining to Rocky Mountain National Park." She said, "Unfortunately, when the information from the original article was condensed in other news outlets, the information was taken out of context. We do not have plans to close areas of Rocky Mountain National Park."

MOUNTAIN LION HIDES UNDER LOS ANGELES HOME. The [AP](#) (4/15, 777K) reports that "a celebrity mountain lion transformed a wealthy hillside neighborhood into a paparazzi-like scene of scrambling photographers before eluding everyone Tuesday and quietly slipping away." On Monday, "a worker installing a home security system at James Archinaco's house found the animal," known as P-22, "lounging in a crawl space." Wildlife officials threw "beanbags and tennis balls" at the animal, "trying to flush him out as TV news photographers jockeyed for position." The lion, meanwhile, "remained indifferent until everyone eventually gave up and left," and "then he did, too."

The [Los Angeles Times](#) (4/15, Board, 3.49M) editorializes that "the resilience and mystique of P-22 is a reminder that one of the unique and wonderful things about living in Los Angeles is its proximity to what remains of the wild." The paper argues that "we should try to protect those creatures by building wildlife crossings and, as much as possible, letting them be."

Additional coverage was provided by the [Washington \(DC\) Post](#) (4/14, Izadi, 5.17M), the [Columbus \(GA\) Ledger-Enquirer](#) (4/14, 114K), the [Houston \(TX\) Chronicle](#) (4/15, Dillon, Rogers, 2.28M), the [San Francisco \(CA\) Chronicle](#) (4/15, 2.21M), the [Detroit \(MI\) Free Press](#) (4/14, 987K), the [New York \(NY\) Daily News](#) (4/15, 3.79M), [NPR](#) (4/14, 1.58M), [TIME](#) (4/15, 19.19M), [USA Today](#) (4/14, Bowerman, Network, 4.95M), [US News & World Report](#) (4/14, 685K), [Gizmodo](#) (4/15, 1.04M), [Yahoo! News](#) (4/15, Dillon, Rogers, 5.81M), and [WJAX-TV Jacksonville \(FL\)](#) Jacksonville, FL (4/15).

PRESCRIBED BURN AT WIND CAVE NATIONAL PARK TURNS INTO WILDFIRE. The [AP](#) (4/15, Burbach) reports that "a prescribed burn in the southern portion of Wind Cave National Park that turned into a wildfire had burned more than 7 square miles within the park as of midday Tuesday, park officials said." According to Chief Interpreter Tom Farrell, of the NPS, "more than 100 crew members were fighting the 4,500-acre blaze that began Monday afternoon after strong winds carried some embers across Highway 385 in the park." The article notes that "local, state and federal crews had established a line around 80 percent of the fire by Tuesday morning, but Farrell said officially none of the blaze had been contained."

Additional coverage was provided by the [Pierre \(SD\) Capital Journal](#) (4/15, 620) and the [Seattle \(WA\) Post-Intelligencer](#) (4/15, 612K).

NPS PARTNERS WITH PENN STATE ALTOONA TO RESTORE FOREST AT FLIGHT 93 MEMORIAL. [Penn State Altoona](#) (4/15) reports that "students and faculty from Penn State Altoona will participate in forest restoration at the Flight 93 Memorial on Thursday, April 16, and Friday, April 17." The article notes that "this is the fourth year that Penn State Altoona has partnered with the National Park Service to help 'heal' the landscape and restore the forest on the abandoned strip mine where Flight 93 crashed on September 11, 2001."

JUDSON RECORD HOUSE ENTERED IN NATIONAL REGISTER OF HISTORIC PLACES. The [Lewiston \(ME\) Sun Journal](#) (4/15, 20K) reports that "the Judson Record House, now Maine's Paper & Heritage Museum, has been entered in the National Register of Historic Places, according to the director of the Maine Historic Preservation Commission."

ADDITIONAL COVERAGE OF "FIND YOUR PARK" CAMPAIGN. Additional coverage of the "Find Your Park" campaign was provided by [Patch](#) (4/15).

ADDITIONAL COVERAGE OF ANNIVERSARY OF CIVIL WAR'S END. Additional coverage of the anniversary of the end of the Civil War was provided by [Reuters](#) (4/14).

Bureau of Land Management:

TENSION BETWEEN BLM AND MINING OPERATION RISES IN OREGON. The [Raw Story](#) (4/14, 679K) reports that "militia groups are gathering in southern Oregon to back gold miners embroiled in a Bundy-style dispute with the Bureau of Land Management." Federal authorities said "they had notified the miners earlier this month that they were out of compliance with BLM regulations and ordered them and their equipment off the land by April 25." According to the article, "the owners of the Sugar Pine Mining Claim reached out to the Oath Keepers of Josephine County for help, and the pro-gun group issued a nationwide call for assistance that was picked up by websites such as Infowars and Before It's News."

Also providing coverage are [The Inquisitr](#) (4/15, 753K) and [KDRV-TV Medford \(OR\)](#) Medford, OR (4/15, 671).

CONTINUING COVERAGE OF BUNDY STANDOFF ANNIVERSARY. In a piece for [Forbes](#) (4/14, 6.54M), JJ MacNab writes that it has been one year since "Cliven Bundy sought help in his stand against the federal government." According to MacNab, "the legal repercussions for these acts now depend on the political will of the Department of Justice, an agency that has historically dealt with Bundy-related threats and harassment with all of the backbone and resolve of an over-cooked noodle, leaving twenty years of confrontations and threats against land management employees unpunished." She writes that "if the DOJ acts responsibly, the Bundy standoff should ultimately result in a very long list of criminal indictments," but "if the agency shrugs, as it has too many times in the past twenty years, future confrontations involving the militias, sovereign citizens, and other anti-government extremist groups won't be as 'peaceful' as what happened at Bundy Ranch."

For the "Opinion Blog" of the [Dallas Morning News](#) (4/15, 1.13M), Tod Robberson warns that "the brazen he and his supporters become, the more empowered they are to try other plays."

Additional coverage was provided by [NPR](#) (4/14, 1.58M) and [HotAir](#) (4/14, 86K).

BLM PLANS SUMMER ROUNDUP FOR HORSE RANGE IN PRYOR MOUNTAINS. The [AP](#) (4/15, 2.28M) reports that "federal land managers plan a summer roundup of wild horses from Montana's Pryor Mountain Wild Horse Range to curb the size of its herd." The BLM said "the majority of the 170 horses on the range near the Wyoming border would be captured." The bureau's "goal is to remove 30 animals between the ages of 1 and 3 from the population."

ISLAMIC STATE SAID TO BE CONDUCTING RECONNAISSANCE OF BLM LANDS. The [Washington Times](#) (4/15, Chasmar, 644K) reports that "the Islamic State terror group is operating a camp in the northern Mexican state of Chihuahua, just eight miles from the U.S. border, Judicial Watch reported Tuesday." Judicial Watch reported, "The sources also say that ISIS has 'spotters' located in the East Potrillo Mountains of New Mexico (largely managed by the Bureau of Land Management) to assist with terrorist border crossing operations. ISIS is conducting reconnaissance of regional universities; the White Sands Missile Range; government facilities in Alamogordo, NM; Ft. Bliss; and the electrical power facilities near Anapra and Chaparral, NM."

HYUNDAI HELPS DAUGHTER SEND MESSAGE TO ASTRONAUT DAD. [Fox News](#) (4/14, 8.25M) reports that Hyundai "had the daughter of one of the astronauts on the International Space Station (ISS) handwrite a message to her father and then used a fleet of cars to almost perfectly replicate it with tire marks on Delamar Dry Lake in

remnants of the message remain.”

Fish and Wildlife Service:

INTERNAL FWS EMAILS REIGNITE DEBATE OVER SWIMMING WITH MANATEES AT THREE SISTER SPRINGS. The [E&E Daily](#) (4/14) reports that emails about manatees at Florida’s Three Sister Springs have “become a pawn in the debate over whether FWS should continue to allow swimming in the springs.” Public Employees for Environmental Responsibility (PEER) has released the emails “in its latest bid to end swimming in the springs during the winter months.”

BILL INTRODUCED TO PROTECT DELAWARE RIVER. [The Hill](#) (4/15, Henry, 224K) reports that “Democratic senators from New Jersey, Delaware, New York and Pennsylvania and a bipartisan collection of House lawmakers from the region introduced a bill Tuesday that would create a ‘Delaware River Basin Restoration Program’ in the U.S. Fish and Wildlife Service.” According to the article, “the program would be charged with identifying and overseeing federal and local efforts to protect the Delaware River basin, similar to programs for the Chesapeake Bay and the Long Island Sound.” The legislation would “also create a grant program to fund up to \$5 million in restoration projects for the river annually.”

Also reporting on the story is the [New Jersey Local News](#) (4/15, 772K).

NEVADA LAWMAKERS TAKE AIM AT RAVENS. The [AP](#) (4/15, Rindels, 2.28M) reports that “Nevada lawmakers hope to prevent sage grouse from landing on the Endangered Species List by taking aim at ravens, which are notorious egg-snatchers.” The Senate Natural Resources Committee “held a meeting Tuesday to discuss AJR2, which would urge Congress to remove or alter protections that the common raven enjoys under the Migratory Bird Treaty Act of 1918.” The resolution reads, “A known cause of decline in the sage grouse population is egg depredation by the common raven, and research conducted at Idaho State University has suggested that reductions in the raven population significantly increase sage grouse nest success.”

Also reporting on the story is the [Reno \(NV\) Gazette-Journal](#) (4/14, 168K).

GROUP PLANS LAWSUIT OVER PETRELS. [Reuters](#) (4/14, Liston) reports that the Center for Biological Diversity on Monday announced that it will sue for protection of the black-capped petrel.

FWS OBJECTS TO KENAI RIVER ROAD ACCESS PROPOSAL. The [AP](#) (4/15, 2.28M) reports that “federal wildlife authorities are criticizing a city of Kenai proposal for a road aimed at upgrading access to the southern mouth of the Kenai River.” The FWS is “criticizing the proposed route through a wetland.” The service says “a road in the location would encroach on a rich, ecologically sensitive, wetland that hosts spring and fall migrations of geese, ducks and many species of shorebirds.”

ST. LOUIS ZOO AWAITING APPROVAL BY FWS FOR POLAR BEAR’S TRANSFER. The [AP](#) (4/15, 2.28M) reports that “the St. Louis Zoo is putting the finishing touches on its new Arctic exhibit while it awaits the federal government to greenlight the transfer of an orphaned Alaskan polar bear from the Buffalo Zoo in New York.” According to the article, “construction is nearly finished on the zoo’s new 40,000-square-foot, \$16 million polar bear habitat.” The article notes that “it’s expected to be the new home of Kali the polar bear, but the zoo is still waiting for the U.S. Fish & Wildlife Service to approve his move.”

Also reporting on the story is [WGRZ-TV](#) Buffalo, NY (4/14, 33K).

DUCK AT BOSQUE DEL APACHE NATIONAL WILDLIFE REFUGE TESTS POSITIVE FOR BIRD FLU. The [AP](#) (4/15, Bryan, 2.28M) reports that “a duck at the Bosque del Apache National Wildlife Refuge in southern New Mexico, one of the nation’s premier birding spots, has tested positive for a highly virulent strain of bird flu, state officials said Tuesday.” The article notes that “the case is the latest in a growing outbreak of bird flu, especially the highly contagious H5N2 strain affecting poultry in multiple states.” According to the article, “the positive test results for the cinnamon teal duck from the wildlife refuge marks the first instance of the strain in New Mexico.”

FALCON, OSPREY EGGS WILL HATCH ON WEBCAMS IN BALTIMORE. The [Baltimore Sun](#) (4/14, 810K) reports that “two bird nests — that of an osprey in South Baltimore and a falcon downtown — featured on live web cameras welcomed new tenants this past weekend.” According to the article, “a family of ospreys whose nest is in Masonville Cove in South Baltimore laid their first egg, which was caught on the ‘Osprey Cam,’ operated by the U.S. Fish & Wildlife Service’s Chesapeake Bay Field Office.” The service said “the mother hatched the egg between 3 and 5 p.m. Saturday.”

MAN PLEADS GUILTY TO ILLEGALLY SELLING ENDANGERED BIRDS. The [Los Angeles Times](#) (4/15, Perry, 3.49M) reports that “a Vista man was fined \$1,000 and put on a year’s probation after pleading guilty to attempting to sell three protected birds: two Bali Mynas and a Philippine Buff Banded Rail.” Christopher Estep was “charged after attempting to sell the birds to an undercover agent of the U.S. Fish and Wildlife Service.” U.S. Magistrate Judge Nita L. Stormes also “ordered Estep to pay \$1,800 restitution to the wildlife service.”

Also reporting on the story are [KSWB-TV San Diego \(CA\)](#) San Diego (4/14, 52K) and [KGTV-TV San Diego \(CA\)](#) San Diego (4/15, 68K).

LISTING OF NORTHERN LONG-EARED BAT CRITICIZED. In an op-ed for the [Pittsburgh Post-Gazette](#) (4/15, 588K), Barry Russell, President and CEO of Independent Petroleum Association of America, writes that the FWS’ decision to list the northern long-eared bat as threatened under the Endangered Species Act “imposes unnecessary and burdensome costs on myriad U.S. businesses, including natural gas development in Pennsylvania.” He claims that “the real threat to the northern long-eared is a fungal disease known as white-nose syndrome — and a listing does absolutely nothing to address this underlying problem.” Russell argues that the FWS “should avoid implementing restrictions that would stifle this economic growth and should instead work to find a solution to this unfortunate disease.”

US Geological Survey:

GEOLOGISTS RELEASE DATA ON GEYSERS. The [Scientific American](#) (4/15, 2.83M) reports that geologists have released the “most detailed data set yet on the explosive choreography between water and steam.” Steven Ingebritsen, a researcher at the USGS, is “intrigued by what this more complete picture of geysers can tell geologists about other geothermal phenomena, such as volcanoes, which operate primarily underground and are incredibly challenging to probe—instruments would melt, for starters.”

Securing America’s Energy Future:

Renewable Energy:

ADAMS TOWNSHIP RESIDENTS OBJECT TO PROPOSED WIND FARM SITE. [WBUP-TV](#) Marquette, MI (4/15) reports that “residents in Adams Township are taking a stand against a proposed wind farm.” At a public meeting, they “packed the township hall to hear a presentation by representatives from Farm Wind Energy and the U.S. Fish and Wildlife Service.” The article notes that “at issue was a request by Farm Wind Energy developer Dave Hokens to amend a local ordinance that prohibits wind turbines from being closer than 3,000 feet from any adjacent property lines, roads or houses.”

Onshore Energy Development:

TRIBES URGED OBAMA ADMINISTRATION TO REJECT KEYSTONE. [The Hill](#) (4/14, Cama, Wilson, 224K) reports that “Native Americans are pressuring the Obama administration to reject the Keystone XL pipeline, warning the project could infringe on their water rights, harm sacred land and violate America’s treaty obligations.” They “sent more than 100 pages of letters to the Interior Department earlier this year raising concerns about the project, which would carry oil sands from Canada to refineries on the Gulf Coast.” The article notes that “the pleas arrived in the two weeks before the Interior Department was slated to file comments on the proposed pipeline to the State Department, which is currently determining whether Keystone is in the national interest.” Jessica Kershaw, a spokeswoman for Interior, said that the agency “encouraged the State Department to give appropriate consideration to comments previously submitted during the Keystone XL permit review process as well as concerns expressed by some tribes in Indian Country about the project.”

GROUPS INTEND TO SUE OVER OVERSIGHT OF MOUNTAINTOP REMOVAL. The [Coal Valley News](#) (4/15, 336) reports that “seven local, regional and national groups filed a formal notice of intent to sue the U.S. Office of Surface Mining for failing to intervene on West Virginia’s lax oversight of mountaintop removal and other destructive surface coal mining.” According to the notice, “a state program has, for decades, allowed the coal industry to ravage the environment, putting people at risk and destroying local communities.” Vernon Haltom, executive director of Coal River Mountain Watch, said, “The state’s chronically poor oversight has included a persistent failure to conduct inspections meant to protect people and the environment from coal companies that operate outside the law. Out-of-control mountaintop removal coal mining is linked to epidemics of cancer, cardiovascular disease and birth defects in affected communities. West Virginia has also failed to undertake required assessments to ensure lakes, rivers and drinking-water wells aren’t harmed by mountaintop-removal mining and other destructive surface coal-mining practices.”

Tester "sent a letter to Tom Vilsack, Secretary of Agriculture and Sally Jewell, Secretary of Interior." In the letter, Tester asked the secretaries to "cancel the remaining oil and gas leases pending in the Badger-Two Medicine area." Tester "cites a previous letter sent to the secretaries by the Blackfeet Tribe in which the Blackfeet claim that leases have been canceled 'on Colorado's White River National Forest due to fundamental NEPA (National Environmental Protection Act) violations.'"

Offshore Energy Development:

HOUSE PANEL TO HOLD HEARING ON OFFSHORE DRILLING PLAN. [The Hill](#) (4/15, Cama, Henry, 224K) reports that "a subcommittee of the House Natural Resources Committee will hold a hearing Wednesday to discuss the Obama administration's draft five-year plan for offshore oil and natural gas drilling." Lawmakers will hear from BOEM Director Abigail Hopper, North Carolina Gov. Pat McCrory (R) and various private and local representatives.

ADDITIONAL COVERAGE OF NEW OFFSHORE DRILLING RULES. Additional coverage of the new offshore drilling rules was provided by the [Jackson \(MS\) Free Press](#) (4/14, 303), the [Christian Science Monitor](#) (4/14, 380K), [UPI](#) (4/14, Graeber), the [Oil and Gas Journal](#) (4/15, 1K), [Rigzone](#) (4/15, 11K), the [Marine Link](#) (4/15, 1K), [Think Progress](#) (4/14, 331K), [Breaking Energy](#) (4/14), [KXNT-AM Las Vegas \(NV\)](#) Las Vegas (4/14, 1K), and [WWJ-TV Detroit \(MI\)](#) Detroit (4/14, 34K).

Tackling America's Water Challenges:

HOUSE REPUBLICANS BLAST BOR COMMISSIONER LÓPEZ FOR SKIPPING HEARING. [The Hill](#) (4/15, Cama, 224K) reports that "House Republicans are accusing the Obama administration of skipping out on a Tuesday hearing by not sending an agency official." The House Natural Resources Committee had invited the BOR "to a hearing and expected Estevan López, the agency's commissioner, to testify at the hearing of the Subcommittee on Water, Power and Oceans." However, "the regulation on which Republicans asked López to testify — the proposed Waters of the United States rule — is being developed by the Environmental Protection Agency (EPA) and the Army Corps of Engineers, not Reclamation." The BOR and Democrats said Republicans "had no reason to ask an official to testify." But "that didn't stop Republicans from hitting the administration for skipping the hearing."

CLIMATE CHANGE LINKED TO CALIFORNIA DROUGHT. For the "At The Edge" blog of the [US News & World Report](#) (4/14, 685K), Jeff Nesbit writes that "climate change is linked to California's drought by two mechanisms: rising temperatures and changing atmospheric patterns conducive to diminishing rains." He notes that "one of the hallmarks of climate change is that, on average, wet regions are getting wetter and dry regions are getting drier. The southwestern United States is one such dry region, and the Colorado River (which provides much of the water used in Southern California), is experiencing drought conditions 'nearly unrivaled in 1,250 years.'" In conclusion, Nesbit hopes that climate change "will start to become part of the ongoing narrative" on the drought.

Water 'Too Cheap' In California. In a piece for the [Wall Street Journal](#) (4/15, Jenkins, Jr., Subscription Publication, 5 67M), Holman W. Jenkins, Jr., argues that Californians would reduce their water use if they were charged realistic prices for water but that this solution is not being discussed due to California's water politics.

Writing for [Forbes](#) (4/14, 6 54M), contributor Michael Kanellos says Brown's cutback plan has been criticized because "it doesn't apply to agriculture," the reductions are "virtually impossible to enforce," and "water is too cheap." He details his family's experience dropped water consumption by 33 percent and only seeing a savings of \$12.99 for the month. Writes Kanellos, "It's not going to encourage savings. Instead, California will need a massive upgrade infrastructure upgrade focused on efficiency, reuse and, possibly, the more expensive option of desalination."

Op-Ed: Response To Drought Should Be Rooted On Fact, Not Spin. In an op-ed for the [Sacramento \(CA\) Bee](#) (4/14, 547K), radio host Bruce Maiman writes about misrepresentations "on all sides" portraying at times farmers, environmentalists or fracking as the culprit for the current drought in California. "Fracking operations across the state used 105 million gallons of water last year, figures show. Nestle used 80 million gallons. On average, the state gets 65 trillion gallons of water a year. Nestle and fracking operations are troubling, but halting them solves nothing." Maiman urges all sides to put their "pet peeves" in perspective. "Otherwise, we'll never be able to ask the hard questions about accountability, who should make hard sacrifices and how much."

Empowering Native American Communities:

OBAMA ADMINISTRATION TO UPDATE 1988 MODEL INDIAN JUVENILE CODE. The [Lake County \(MT\) Leader & Advertiser](#) (4/15, 11K) reports that Interior Assistant Secretary – Indian Affairs Kevin K. Washburn and Department of Justice Office of Juvenile Justice and Delinquency Prevention (OJJDP) Administrator Robert L. Listenbee have "announced that the Bureau of Indian Affairs (BIA) and the Department of Justice are seeking to update the 1988 Model Indian Juvenile Code designed to assist federally recognized tribes in creating individual codes focused on juvenile matters and specifically addressing issues affecting Indian youth arrested for alcohol and/or drug-related offenses in Indian Country." Washburn said, "Like the BIA's guidelines and regulations for state courts and agencies that implement the Indian Child Welfare Act, the Bureau's Model Indian Juvenile Code has long needed updating. Tribes know best what will work in their communities, but the model will be updated to provide better federal guidance to tribes in an effort to insure proper respect for the rights and responsibilities of Indian juveniles arrested for alcohol or drug-related offenses and those of their parents, guardians or custodians. It also will provide tribes and their court systems greater clarity and flexibility in dealing with such cases."

HEARING HELD ON PROPOSED CASINO PROJECT BY POKAGON BAND OF POTAWATOMI. The [South Bend \(IN\) Tribune](#) (4/15, 186K) reports that the BIA "hosted a public meeting at Century Center Tuesday to gather input on" the proposed casino project by the Pokagon Band of Potawatomi. According to the article, "opponents of a proposed tribal village and casino warned of dire consequences Tuesday if the casino portion of the project is allowed to move forward." But supporters "stressed the potential economic benefits of the project in terms of jobs and community investment."

Also reporting on the story are [WSBT-TV South Bend \(IN\)](#) South Bend, IN (4/15, 21K) and [WNDU-TV South Bend \(IN\)](#) South Bend, IN (4/15, 77K).

DESCENDANTS OF TRIBES MASSACRED IN 1864 SEEK ACCOUNTING OF REPARATIONS. The [Law 360](#) (4/15, 9K) reports that "the descendants of tribes of Native Americans massacred by federal troops in Colorado in 1864 urged the Tenth Circuit on Monday to overturn a lower court ruling denying an accounting of reparation funds they say they are owed, claiming the Bureau of Indian Affairs shirked its trust obligations and stole the money." According to the article, "Homer Flute and other descendants of bands of Arapaho and Cheyenne tribes whose members were killed in the Sand Creek Massacre asked the court to reverse a Colorado federal court's ruling."

Office of Insular Affairs:

UPDATE PROVIDED ON STATUS OF 2014 CNMI PREVAILING WAGE WORKFORCE ASSESSMENT STUDY. The [Marianas Variety](#) (4/15) provides an update on the status of the 2014 CNMI Prevailing Wage Workforce Assessment Study. According to Department of Commerce's Central Statistics Division, "the operation in the field for Saipan, Tinian, and Rota data collection has been completed with a 97 percent response rate in March." The article notes that the "survey is made possible through funding from the Office of Insular Affairs."

Top National News:

AMID STRONG CONGRESSIONAL SUPPORT, WHITE HOUSE DROPS OBJECTIONS TO IRAN BILL. After the Senate Foreign Relations Committee on Tuesday unanimously approved a bill giving Congress a say on a nuclear deal with Iran, the White House announced that the President would sign the bill. As a result, the [Los Angeles Times](#) (4/15, Richter, 3.49M) reports, Congress "is now likely to gain an important role in judging" a potential final deal. Media analyses are casting the development as a retreat by the President, who had previously threatened to veto the measure. In fact, reports note that until just hours before the vote, the Administration continued to press lawmakers not to advance the legislation, with Secretary of State Kerry meeting with members of the Senate. The [AP](#) (4/15, Riechmann, Kellman), for example, says the President "bow[ed] to pressure from Republicans and his own party." House Speaker Boehner, meanwhile, said the White House "saw the handwriting on the wall." The story was not noted on any of the network newscasts Monday night, but it is receiving heavy wire, print, and cable coverage.

The [New York Times](#) (4/15, Weisman, Baker, Subscription Publication, 9.97M) reports that White House press secretary Josh Earnest said that while the President was not "particularly thrilled" with the bill, he viewed the compromise as acceptable. In a front-page story, the [Wall Street Journal](#) (4/15, A1, Peterson, Subscription Publication, 5 67M) says that by accepting the compromise, the President avoids the potential embarrassment of the Senate overriding a veto of the bill, which appeared to have more than the 67 votes needed to override a veto. [Bloomberg Politics](#) (4/15, Lerman, Miller, 169K) also says the "turnaround" by the White House "reflected acquiescence in the reality that the legislation could win enough bipartisan support to override a veto."

[Reuters](#) (4/15) notes that Earnest insisted that "the proper role for Congress in this effort is the consideration of the sanctions that Congress put in place themselves," and that "it would not be an up or down vote on the deal." The [Washington Post](#) (4/15, A1, Debonis, 5.17M) also says that the White House "maintained its insistence that Congress has no power to approve or disapprove" the deal. The Post says the "compromise at least kicks the issue down the road, and spares the administration the possibility of a congressional vote against the deal." The measure passed by the panel shortened the review period "from 60 days to 30 days after full details of an agreement are submitted

a United States person anywhere in the world" every 90 days after a deal is ratified.

The [Huffington Post](#) (4/14, Stein, 281K) notes that with the full Senate now expected to take up the measure, "it remains to be seen if the final language will remain intact," but according to a report in [Roll Call](#) (4/14, Lesniewski, Subscription Publication, 102K), the House GOP leadership "is warning the Senate against making any changes."

Sen. Bob Corker said on [Fox News' The O'Reilly Factor](#) (4/14, 767K) that "Secretary Kerry, in a classified setting, was pushing back strongly against this legislation," but the Administration soon "realized what was getting ready to happen. This was a run away train. We had significant support. They released their veto threat once they saw that we were way beyond the number of people it would take override a veto."

[Politico](#) (4/14, Everett, 669K) says that "after months of lobbying against the bill, the administration acknowledged Tuesday it couldn't stop it," while the [Washington Times](#) (4/15, Boyer, Dinan, 644K) calls the White House "chastened." Jim Sciutto reported on [CNN's Situation Room](#) (4/14, 554K) that "after months of the White House fighting to keep lawmakers out of the Iran nuclear negotiations, today Congress forc[ed] its way in." In an editorial, the [New York Times](#) (4/15, Subscription Publication, 9.97M) says Congress has "formally muscled its way" into negotiations with Iran, and "has wrongly and inappropriately diminished the president's power to conduct the nation's foreign policy as he was elected to do."

In an analysis piece, the [Christian Science Monitor](#) (4/14, Murphy, 380K) notes efforts to attach additional demands to a possible deal, such as that Iran "must first be deemed to no longer sponsor terrorism, as many Senate Republicans insist." Such moves, the Monitor says, indicate that "hawkish US lawmakers appear ready to torpedo any deal." But a [Wall Street Journal](#) (4/15, Subscription Publication, 5.67M) editorial says that while the measure guarantees debate and a vote in Congress on a deal, ultimately the President can do what he wants.

The [Washington Times](#) (4/15, Taylor, 644K), however, reports that "there's still a big chance Iranian hard-liners will pressure Supreme Leader Ayatollah Ali Khamenei to reject the accord." Jim Sciutto reported on [CNN's Situation Room](#) (4/14, 554K) that a "senior Iranian diplomat" reacted to the Senate panel's vote yesterday by saying, "We only deal with the Administration and expect it to deliver by any method it deems appropriate."

Iran Says It Is Ready To Take "Irreversible Steps" On Nuclear Program If Matched By West. [AFP](#) (4/15, Cuenca) reports Iranian Foreign Minister Mohammad Javad Zarif said Tuesday that Tehran will resume talks with world powers on a final nuclear agreement on April 21 and is ready to take "irreversible steps" if the West does the same. "My team, the assistant to (EU foreign policy chief Federica) Mogherini and the other representatives of the 5+1 will meet next Tuesday to begin drafting the text," he said, but did not indicate where the talks would take place. He added, "This is the framework under which we will operate with the 5+1 group: (there will be) irreversible steps on the Iranian side as long as their side takes irreversible steps. It is a very balanced approach."

Mukasey, Carroll Criticize Brennan's Comments On Deal. Former Attorney General Michael Mukasey and Kevin Carroll, senior counsel to the House Homeland Security Committee, write in the [Wall Street Journal](#) (4/15, Subscription Publication, 5.67M) that CIA Director Brennan's claim last week that those saying the framework deal "provides a pathway for Iran to a bomb" are "wholly disingenuous" make it harder for CIA analysts to report their assessments of Iran's nuclear capabilities without fear of retribution and say Congress should ask for outside assessments of the intelligence.

Johns Hopkins' Nasr Urges Saudi, Gulf Leaders To Welcome Deal. Vali R. Nasr of the Johns Hopkins School of Advanced International Studies writes in the [New York Times](#) (4/15, Nasr, Subscription Publication, 9.97M) that Saudi Arabia and its Gulf neighbors should welcome the framework deal reached with Iran, arguing that it is "much likelier to make the Arab world more secure for a decade or more, by preventing Iran from getting near a 'breakout.'" While it won't "eliminate Iran's nuclear program," it "would allow the rest of the Middle East an opportunity to fortify itself with a new political order."

Russian Decision To Sell Missile System To Iran Criticized By Germany, Israel. [Reuters](#) (4/15, Martin) reports German Foreign Minister Frank-Walter Steinmeier on Tuesday criticized Russia's decision to deliver missile systems to Iran. Israeli Prime Minister Benjamin Netanyahu, the [New York Times](#) (4/15, Kershner, Subscription Publication, 9.97M) reports, spoke with Russian President Vladimir Putin yesterday to express Israel's "grave concerns" about Russia's decision. Netanyahu said he had told Putin that the sale of the S-300 missile system to Iran "will only encourage Iranian aggression in the region and further undermine the stability of the Middle East."

However, Putin, [USA Today](#) (4/15, Lackey, 4.95M) reports, told Netanyahu that the system is "purely defensive" and won't threaten the region. Iran, meanwhile, said Tuesday, that it would be "at least six months" before Russia will be able to deliver the missile system, the [AP](#) (4/15, Berry) reports. The Kremlin, however, "confirmed that a barter deal to supply Russian goods in exchange for Iranian oil was already being implemented."

Meanwhile, at the White House on Tuesday, the [Washington Times](#) (4/15, Boyer, 644K) reports press secretary Josh Earnest said the move by Russia isn't likely to impact nuclear talks with Iran. "All of that is separate from the nuclear agreement," Earnest said. "That's precisely why we're trying to reach a diplomatic agreement" on the nuclear program.

Zarif: Rezaian Faces "Very Serious" Charges. [AFP](#) (4/15) reports Iranian Foreign Minister Mohammad Javad Zarif said Tuesday that Washington Post reporter Jason Rezaian faces "very serious" charges, but denied reports that he is being mistreated. Earlier on Tuesday, the [AP](#) (4/15, Schreck) reports, the Washington Post said Rezaian has had an "unacceptable lack of access to legal counsel" while jailed for the past nine months. The [New York Times](#) (4/15, Gladstone, Subscription Publication, 9.97M) reports Post executive editor Martin Baron said Rezaian has been subjected to "Kafkaesque restrictions" that include "only one hour of pretrial time with a defense lawyer – and that meeting has not yet happened."

CLINTON MAKES FIRST CAMPAIGN VISIT TO IOWA. Hillary Clinton made her first campaign stop in Iowa on Tuesday, visiting a community college in Monticello and a coffee shop in Davenport. Media reports pay particular attention to the contrast between Clinton's current campaign launch and the start of her 2008 presidential bid. For example, Lester Holt reported on [NBC Nightly News](#) (4/14, story 7, 2:10, Holt, 7.86M) that this has been "a low key kickoff compared to her last run," and Andrea Mitchell added that Clinton "is sounding more like a populist than the New York senator who used to represent Wall Street."

Likewise, on [ABC World News](#) (4/14, story 9, 1:40, Muir, 5.84M), Cecilia Vega described Clinton as "Hillary Clinton 2.0," noting that "eight years ago, she choppered around Iowa and held her first rally before a crowd of 1,500," but this time "she drove to a community college auto body shop to meet just seven people," and [Politico](#) (4/14, Karni, 669K) reported that Tuesday's event "stood in stark contrast to her first visit to the Hawkeye State in 2007 – an impersonal 1,500-person rally in Des Moines, with 1,000 people crowding into an overflow area," noting that on Tuesday, the "optics...were carefully choreographed to show Iowa voters that her celebrity status and lack of serious primary challengers won't deprive them of the one-on-one interactions with candidates that they have come to expect."

The [Washington Post](#) (4/15, Gearan, Rucker, 5.17M) describes Clinton's "transformation from international jet-setter to American everywoman," noting that there were "no big speeches or rallies, and local organizers were told to keep throngs of supporters away," but, noting the "frenzy" of media attention Clinton attracted, the [New York Times](#) (4/15, Chozick, Gabriel, Subscription Publication, 9.97M) says the event "called to mind a head-on collision between a celebrity candidate who desperately wants to present an everywoman's approachability and a news media desperate to cover every aspect of that candidacy exactly as it unfolds."

The [Washington Times](#) (4/15, Miller, 644K) reports that in a "staged-managed" stop at Jones Street Coffee Shop in Davenport, Iowa, Clinton "made the first stop for retail politicking on her newly launched presidential campaign." Clinton spoke "briefly with a couple nearby customers and then join[ed] a table of three for a conversation."

Nancy Cordes reported on the [CBS Evening News](#) (4/14, story 5, 2:05, Pelley, 5.08M) that Clinton "began to lay out a platform, or what she called the four big fights she would take on as president," which the [AP](#) (4/15, Thomas, Lerer) says are "the need to build 'the economy of tomorrow, not yesterday,' strengthen families and communities, fix dysfunctional government while addressing ways of getting 'unaccountable money out of the system,' and protect national security."

The [Wall Street Journal](#) (4/15, Nicholas, Subscription Publication, 5.67M) says Clinton sounded a populist tone, that will likely appeal to the liberal Democratic base, saying the "deck is still stacked in favor of those already at the top" and noting that CEOs earn 300 times more than the average worker, however, an editorial in the [Wall Street Journal](#) (4/15, Subscription Publication, 5.67M) takes issue with Clinton's claim that she is a champion for everyday Americans and her recent email to supporters in which she decied the pay differentials between CEOs and the average worker, citing the fees, amenities, and expenses she receives for delivering speeches.

A [New York Times](#) (4/15, Healy, Subscription Publication, 9.97M) analysis says "the emergence of folksy Hillary and the ready-to-lead Republicans clearly signals the start of the Perception Primary, during which candidates seek to erase their deficits and persuade voters to see them differently," but adds that the candidates face the danger that "they will ultimately be seen as phony, given that voters have plenty of experience sniffing out the truth about politicians."

Several commentary pieces this morning consider the challengers Clinton will face in her 2016 bid, and offer her advice on how to conduct her campaign. In his [Washington Post](#) (4/15, 5.17M) column, David Ignatius calls Clinton's campaign launch video "empty – but in a way that invites the political definition to come: What does Clinton stand for? How does she plan to change an America in which, as she says in the ad, 'the deck is still stacked in favor of those at the top?'" Ignatius argues that the "slow-rolling,

Kathleen Parker writes in her column for the [Washington Post](#) (4/15, Parker, 5.17M) that Clinton "must persuade voters to ignore her association with a time gone by," adding that the "juxtaposition of yesterday and tomorrow was vividly on display as both Clinton and Sen. Marco Rubio (R-Fla.) announced their candidacies for president this week." Rubio's "relative youth," Parker adds, "underscores Hillary's yesterdayness."

In her [Washington Post](#) (4/15, 5.17M) column, Ruth Marcus seeks to dispel two myths surrounding Clinton's campaign. First, Marcus takes issue with the idea that Clinton needs a primary challenge to prepare her for the general election, arguing that a primary challenge "would pull Clinton to the left," which is "not where Clinton wants to be in a general-election contest." Marcus also questions the belief that Clinton should focus on motivating the Democratic base, arguing that "the leftiest elements of the Democratic base" and "other traditional Democrats, will turn out for Clinton in November 2016 – if not from overflowing enthusiasm, then out of fear of her Republican opponent." Marcus adds that Clinton must avoid "defensively lashing out" and "running for Obama's third term."

CSMonitor Analysis Considers A Clinton-Castro Ticket. A [Christian Science Monitor](#) (4/14, Feldmann, 380K) analysis reported on the prospect of Clinton selecting HUD Secretary Castro as her running mate. According to the Monitor, since Castro's nomination to run HUD, "the move was framed as an effort to position him for the next Democratic ticket," and Clinton "has long had her eye on Castro." The Monitor added that by selecting Castro, Clinton "could address the generational issue that Rubio raised in his announcement speech on Monday."

Issa Asked Clinton About Private Emails In 2012. The [New York Times](#) (4/15, Schmidt, Subscription Publication, 9.97M) reports that congressional investigators asked Clinton in December 2012 if she had used a private email account while she was Secretary of State, but she "did not reply to the letter," and "when the State Department answered in March 2013, nearly two months after she left office, it ignored the question and provided no response for it." In a letter to Clinton in December 2012, Rep. Darrell Issa, who was "leading an investigation into how the Obama administration handled its officials' use of personal email," asked, "Have you or any senior agency official ever used a personal email account to conduct official business?" Clinton, who left the Department seven weeks after the letter was sent, did not respond.

De Blasio Defends Decision Not To Endorse Clinton. The [New York Times](#) (4/15, Flegenheimer, Subscription Publication, 9.97M) reports that New York City Mayor Bill de Blasio praised Clinton on Tuesday but defended "his decision not to bless her presidential candidacy just yet." De Blasio called Clinton "an incredibly capable leader," who has done "some very profoundly progressive things," but "emphasized that withholding his endorsement was a 'normal' impulse, casting it as a function of the campaign calendar – with the election still more than 18 months away – and not about his feelings toward Mrs. Clinton."

Clinton's Father's Gravestone Overturned. The [Chicago Tribune](#) (4/15, Reports, 2.32M) reports that according to police, the gravestone of Clinton's father, Hugh Rodham, was found toppled over in Scranton, Pennsylvania's Washburn Street Cemetery. Police Chief Carl Graziano said "someone at the cemetery reported the stone was tipped over Tuesday, two days after Clinton announced she's running for president." Graziano said it is "unknown how it tipped over but it may have been vandals."

WHITE HOUSE SAYS ADVISERS WOULD RECOMMEND VETO OF ESTATE TAX BILL. [Reuters](#) (4/14) reports that the White House said on Tuesday that the President's advisers would recommend that he veto House legislation that would repeal the estate tax. In a piece titled "Republicans Push \$269 Billion Handout For Millionaire Heirs And Heiresses," the [Huffington Post](#) (4/14, Carter, 281K) reports that the House will vote this week to repeal the estate tax, which currently applies to "individual fortunes worth over \$5.43 million," an amount that "doubles to \$10.86 million for wealthy couples."

In a "Fact Check" piece, the [AP](#) (4/15, Ohlemacher) says that the estate tax "inspires a lot of heated political rhetoric for a tax that very few people actually pay." The AP says that the estate tax "is 40 percent, but big exemptions limit the share of estates that pay it to fewer than 1 percent."

In his column for the [Washington Post](#) (4/15, 5.17M), Dana Milbank writes that Republicans have "discovered, belatedly, that income inequality is a problem, and they're no longer proposing to give tax breaks to the wealthiest 2 percent of Americans." Instead, they are "proposing to give tax breaks to the wealthiest two-tenths of 1 percent of Americans."

Editorial Wrap-Up:

NEW YORK TIMES. "*A Reckless Act In The Senate On Iran.*" In an editorial, the [New York Times](#) (4/15, Subscription Publication, 9.97M) says Congress has "formally muscled its way" into negotiations with Iran, and "has wrongly and inappropriately diminished the president's power to conduct the nation's foreign policy as he was elected to do."

"Justice For Blackwater Victims." The [New York Times](#) (4/15, Subscription Publication, 9.97M) editorializes that for years, "it seemed inconceivable to Iraqis that the American justice system would ever punish the private security contractors who wantonly opened fire in a busy Baghdad traffic circle in September 2007, killing 17 civilians," and yet on Monday, US District Judge Royce Lamberth in Washington, DC "imposed lengthy sentences on four former employees of the notorious security firm then known as Blackwater." The men, "who came to embody the American government's often heavy-handed and at times careless conduct during the Iraq war, asked for leniency but were defiant in asserting their innocence." The Times adds that the "Nisour Square massacre was among the most abominable abuses committed by Americans during the Iraq war," and that by "bringing some of the Blackwater gunmen to justice, the American government has taken an important, if belated, step toward making amends."

"Senator Jeff Sessions, Straight Up." A [New York Times](#) (4/15, Subscription Publication, 9.97M) editorial criticizes an op-ed in the Washington Post last week by Sen. Jeff Sessions, who "argued the case for letting in fewer foreigners." Sessions, the Times, argues "ignores the truth, proved over centuries, that immigration over all is good for the American economy," and argues that if he really wants to help low-income Americans, "he would be better off supporting labor unions and women's rights, higher minimum wages, tougher wage-and-hour enforcement, more access to child-care and reproductive rights."

WASHINGTON POST. "*Rewarding Egypt's Repression.*" In an editorial, the [Washington Post](#) (4/15, 5.17M) writes that "just 11 days after President Obama resumed US military aid to Egypt, Mohamed Soltan, a 27-year-old American, was sentenced to life in prison on trumped-up charges." The Post calls Egypt's verdict on Saturday as the "latest of multiple slaps in the face of the Obama administration by the regime of Abdel Fatah al-Sisi." The Post slams Obama for resuming military aid to Egypt without waiting for the release of American political prisoners "or the fulfillment of any of the other human rights criteria for Egypt set by Congress."

"The Outrageous Death Of A Fairfax County Jail Inmate." In an editorial, the [Washington Post](#) (4/15, 5.17M) decries the death of Natasha McKenna, a "mentally ill woman" who died at Fairfax County, Virginia jail in February after "a lieutenant shot her four times with a Taser, at point-blank range, even as her hands and feet were in restraints." Investigators "are awaiting a ruling on Ms. McKenna's death from the medical examiner. In the meantime, the silence is deafening." The Post calls on local officials to "peak out about what was clearly a bungled intervention by sheriff's deputies that led to an unnecessary death and about the sheriff's unacceptable non-response."

"A 'Free Range' Debacle." The [Washington Post](#) (4/15, 5.17M) runs an editorial on the case of the Montgomery County, Maryland "free-range parents" whose children have twice been picked up by police for being in public unescorted. The Post is skeptical of their parenting style, but writes, "The children were held for 5 1/2 hours, including two hours in the police cruiser, before Child Protective Services returned them to their parents. Why did the agency take so long to decide what steps to take? Why did its officials tell police not to contact the parents, and why did they wait two hours" before telling them "the whereabouts of their children?" Since the agency does not comment on cases, "we are left to wonder whether incompetence or a desire to teach the parents a lesson was responsible for the delay."

WALL STREET JOURNAL. "*Obama's One-Man Nuclear Deal.*" A [Wall Street Journal](#) (4/15, Subscription Publication, 5.67M) editorial says that while the bill requiring a vote on the Iran nuclear deal guarantees debate and a vote in Congress on a deal, ultimately the President can do what he wants.

"The Hillary Pay Ratio." In an editorial, the [Wall Street Journal](#) (4/15, Subscription Publication, 5.67M) criticizes Clinton's claim that she is a champion for everyday Americans and her recent email to supporters in which she decried the pay differentials between CEOs and the average worker, citing the fees, amenities, and expenses she receives for delivering speeches and noting that because those funds are routed through the Clintons' family foundation, they are untaxed.

"Another Gift For Castro." In an editorial, the [Wall Street Journal](#) (4/15, Subscription Publication, 5.67M) says there was never any doubt the President would remove Cuba from the list since Castro made it a condition for restoring normal diplomatic ties. The Journal cites the decision as another example of the President granting Castro's demands and getting nothing in return.

"Fear And Loathing In Hungary." In an editorial, the [Wall Street Journal](#) (4/15, Subscription Publication, 5.67M) writes that political extremism is rising in Hungary with the latest development being the election of a candidate from the far-right Jobbik party in a special vote. The Journal characterizes Jobbik as anti-Semitic, warning against the strategic dangers of a party that the paper says has aligned itself with the policies of Russia and Iran.

DOI in the News:

INTERIOR TIGHTENS OFFSHORE DRILLING RULES. The [Washington Post](#) (4/14, Warrick, 5.17M) reports that five years after the BP spill, the Obama Administration on Monday moved to "tighten regulations for offshore oil rigs, saying the new measures would help prevent oil-well blowouts and minimize environmental damage from future leaks." The Interior Department announced proposals that would "substantially overhaul the technical guidelines for drilling on the U.S. continental shelf, adding dozens of new requirements aimed mostly at stopping high-pressure undersea wells from blowing their tops."

[McClatchy](#) (4/13, Cockerham, Subscription Publication, 17K) reports the rule "calls for tighter requirements on blowout preventers," among other things. Interior Secretary Sally Jewell said, "These proposed measures are designed to further build on critical lessons learned from the Deepwater Horizon tragedy to ensure that offshore operations are safe."

The [New York Times](#) (4/14, Davenport, Baker, Subscription Publication, 9.97M) reports that officials said the new regulations were "developed after consulting industry representatives, environmentalists, academics and others interested in the issue" and Interior estimated that they "would cost about 90 companies a total of \$883 million over 10 years, but officials said many firms were already moving toward compliance on their own and predicted \$656 million in net benefits over the next decade."

Additional coverage was provided by the [Associated Press](#) (4/14, Freking), the [Wall Street Journal](#) (4/14, Harder, Gilbert, Subscription Publication, 5.67M), [Bloomberg News](#) (4/13, Drajem, 2.94M), the [Huffington Post](#) (4/14, Cohen, 281K), [The Hill](#) (4/14, Cama, 224K), [The Hill](#) (4/14, Cama, 224K), the [Houston \(TX\) Chronicle](#) (4/14, Freking, 2.28M), the [Houston \(TX\) Chronicle](#) (4/14, 2.28M), the [Baton Rouge \(LA\) Advocate](#) (4/14, 38K), the [Anchorage \(AK\) Dispatch News](#) (4/13, 146K), the [New Orleans \(LA\) Times-Picayune](#) (4/14, 621K), the [Pittsburgh \(PA\) Tribune-Review](#) (4/14, 672K), the [Atlanta \(GA\) Journal-Constitution](#) (4/14, 988K), the [San Antonio \(TX\) Express-News](#) (4/14, 674K), [US News & World Report](#) (4/13, 685K), the [Daily Mail \(UK\)](#) (4/14, 4.78M), the [Huffington Post](#) (4/14, J, Freking, 281K), [PBS](#) (4/14, 1.03M), [FuelFix](#) (4/13, 7K), the [International Business Times](#) (4/14, 1.19M), [Marine Link](#) (4/14, 1K), [Offshore Engineer](#) (4/14), [Natural Gas Intelligence](#) (4/14), [Law 360](#) (4/14, 9K), [Rigzone](#) (4/14, 11K), [MSNBC](#) (4/14, 656K), [Government Security News](#) (4/14, 104K), [Yahoo! News](#) (4/14, Freking, 5.81M), [Yahoo! Finance](#) (4/14, 4.04M), [WJBL-TV Detroit \(MI\)](#) Detroit (4/14, 253K), [WLOX-TV Biloxi \(MS\)](#) Biloxi, MS (4/14, 53K), and [WWL-TV New Orleans \(LA\)](#) New Orleans (4/13, 107K).

SECRETARY JEWELL PLANS OUT SECOND HALF OF TERM. The [Environment & Energy Publishing](#) (4/14, Subscription Publication, 705) reports that "two years into her tenure," Interior Secretary Sally Jewell "says she's 'conversant' in Interior's portfolio of wildlife protection, energy development, recreation and historical preservation on roughly one-fifth of the nation's land, in addition to improving the quality of life for American Indians." Looking ahead to next two years, Jewell, said "she hopes to make Interior's mission more relevant to young people and connect more Americans with the outdoors." Jewell "plans to implement 'more thoughtful planning, more thoughtful regulation' of energy development on the nation's lands and waters." She said, "I feel really great about where I am right now, and I feel great about what I think we can get accomplished in the coming two years. I feel like I'm beyond the halfway point."

Advice Offered To Secretary Jewell. In the "Congress" blog of [The Hill](#) (4/13, Spivak, 224K), Randi Spivak, public lands program director for the Center for Biological Diversity, writes that Jewell "can begin righting her legacy and our public lands future with four crucial steps." Spivak says Jewell should "keep our remaining federal fossil fuels in the ground," establish "new national wildlife refuges and wildlife corridors to protect declining species before protection under the Endangered Species Act is necessary," restore "the primacy of science in decision-making for endangered wildlife. America's efforts to return wolves to some of their historic homes have been a success," and "protect Native American cultural and other important areas from mineral exploitation."

WASHINGTON MARKS 150 YEARS SINCE LINCOLN'S ASSASSINATION. The [Washington Post](#) (4/13, Ruane, 5.17M) reports that "timeless symbols of a fallen leader, the trappings of loss marked the start of Washington's 48-hour commemoration of the assassination of President Abraham Lincoln, 150 years ago Tuesday." On Wednesday, "a period-music tribute is scheduled to be held outside the Petersen House." The article notes that "at 7:22 a. m. Taps will be sounded, followed by a wreath laying and remarks by Interior Secretary Sally Jewell."

Additional coverage was provided by the [Washington \(DC\) Post](#) (4/14, Press, 5.17M), the [Houston \(TX\) Chronicle](#) (4/14, 2.28M), and [WJLA-TV Washington \(DC\)](#) Washington (4/14, 12K).

the [Houston \(TX\) Chronicle](#) (4/14, Ruane, 2.28M) and the [Examiner](#) (4/14, 1.01M).

NPS Announces Details Of "Lincoln's Journey Home." The [Springfield \(IL\) State Journal-Register](#) (4/13, 129K) reports that "as part of the 150th anniversary of Lincoln's funeral and burial in Springfield, the National Park Service on Monday announced details of 23 Lincoln's Journey Home ceremonies planned in each of the major cities from Washington to Springfield where funerals were held in 1865."

Also providing coverage are the [Lincoln \(IL\) Courier](#) (4/13, 14K), [Broadway World](#) (4/14, 99K), and [Playbill](#) (4/14, 18K).

SECRETARY JEWELL TO SPEAK AT EARTH DAY RALLY ON NATIONAL MALL. The [AP](#) (4/14, 2.28M) reports that Interior Secretary Sally Jewell will be among the speakers at an Earth Day rally and concert on the National Mall on Saturday.

Additional coverage was provided by the [Rock Hill \(SC\) Herald](#) (4/14, 83K), the [Washington \(DC\) Post](#) (4/13, Press, 5.17M), the [Daily Mail \(UK\)](#) (4/14, 4.78M), and [WTTG-TV Washington \(DC\)](#) Washington (4/14, 169K).

GOV. DUCEY VETOES PROPOSALS TO TRANSFER ARIZONA'S FEDERAL LANDS TO STATE BY 2022. The [AP](#) (4/14, 81K) reports that Gov. Doug Ducey "vetoed two bills by fellow Republicans on Monday that asked the federal government turn over public lands to the state." The Republican "lawmakers said they wanted to use Arizona's federal public lands as a new stream of revenue for the state." Ducey said "he shared Republican lawmakers' concerns about Arizona's federal lands, but vetoed the bills anyway." Instead, Ducey "signed House Bill 2658 to establish a study committee to look into the transfer of public lands to the state."

America's Great Outdoors:

National Park Service:

CONTINUING COVERAGE OF NPS' MAINTENANCE BACKLOG. The [Environment & Energy Publishing](#) (4/14, Subscription Publication, 705) reports that "thanks to the military spending bill signed into law in December 2014, Pershing Park in Washington, D.C., is set to get a major makeover." According to the article, "to advocates of the National Park Service, which is in charge of managing the site, it is a microcosm of the broader funding challenges facing the agency: Congress has grand plans for the revamped memorial but promises no new funding." Meanwhile, "the decaying park is another line item in NPS's yawning \$11.5 billion deferred maintenance backlog."

FEDERAL OFFICIALS TO TOUR HANFORD SITES. The [Tri-City Herald \(WA\)](#) (4/13, 100K) reports that NPS staff will get their first in-depth look at Hanford this week as part of the planning to make historical areas at Hanford part of the new Manhattan Project National Historical Park. "DOE and park service officials already have toured Oak Ridge historic sites and will tour Los Alamos sites in a few weeks."

NEW WELCOME CENTER TO OPEN AT PATERSON GREAT FALLS NATIONAL PARK. The [North Jersey \(NJ\) Media Group](#) (4/14, 69K) reports that "officials next week will hold a ribbon-cutting for the newly renovated Welcome Center at Paterson Great Falls National Historical Park." The article notes that "the 1,000-square-foot center at 65 McBride Avenue will feature exhibits and displays about the Great Falls as well as a gift shop offering specialty items that highlight the history of the Silk City, officials said." The ribbon-cutting is scheduled for 11 am on April 21.

ROCK CREEK PARKWAY VOLUNTEER PLAYERS OPPOSITE NEW POLICY WTOP FUNDING (4/14, 100K) ...

National Park Service has quietly instituted a permit and play process that puts an end to decades of free play on a national park." Under the new policy, "there is nonrefundable fee of \$30 for a two-hour period of use." Mike Litterst, spokesman with the Park Service, for the National Mall and Memorial Parks, said, "The new reservation fees will pay for regular maintenance, new sand, new nets, and trash pickup." He added, "We will also bring in monitors for the permits. Under the old rules there were often abuses with the open courts being monopolized by organized groups or leagues."

Also reporting on the story are [WTTG-TV Washington \(DC\)](#) Washington (4/14, 169K) and [WRC-TV Washington \(DC\)](#) Washington (4/14, 613K).

'CITIZEN SCIENTISTS' HELP STUDY MOJAVE DESERT CLIMATE CHANGE. [USA Today](#) (4/14, James, 4.95M) reports that volunteer "citizen scientists" signed up through the Earthwatch Institute to support a week of scientific research of Mojave Desert reptiles. Volunteers conducted scientific surveys of plants and animals "as part of research on the effects of climate change" in Joshua Tree National Park.

ADDITIONAL COVERAGE OF "FIND YOUR PARK" CAMPAIGN. Additional coverage of the "Find Your Park" campaign was provided by the [Independent Press \(NJ\)](#) (4/14, 6K).

ADDITIONAL COVERAGE OF DC CHERRY BLOSSOMS. Additional coverage of the cherry blossoms in DC was provided by the [Washington \(DC\) Post](#) (4/13, Samenow, 5.17M).

ADDITIONAL COVERAGE OF TRIBAL HISTORIC PRESERVATION GRANTS. Additional coverage of the grants awarded to tribes for historic preservation efforts was provided by the [Casper \(WY\) Star-Tribune](#) (4/14, 90K), the [Houston \(TX\) Chronicle](#) (4/14, 2 28M), the [Madison \(WI\) Capital Times](#) (4/14, 160K), and the [Washington \(DC\) Times](#) (4/14, 644K).

Bureau of Land Management:

RANCHER BUNDY CELEBRATES ANNIVERSARY OF STANDOFF. [NPR](#) (4/14, 1.58M) reports that "it's been a year since Nevada rancher Cliven Bundy and his militia supporters stood down federal agents with the Bureau of Land Management outside Las Vegas." Bundy "owes more than a million dollars in delinquent cattle grazing fees and penalties, but the BLM has stayed quiet in the year since the showdown, and Bundy's supporters marked the anniversary by throwing a party." According to the article, "the event was billed as a 'Liberty Celebration,' with a barbecue featuring Bundy-raised beef, patriotic music, cowboy poetry, off-roading and shooting."

LEGISLATION WOULD FORM TASK FORCE TO STUDY FEDERAL LAND MANAGEMENT IN MONTANA. The [Helena \(MT\) Independent Record](#) (4/14, 38K) reports that Rep. Kerry White "brought House Bill 496 before the Senate Natural Resources Committee on Monday." The legislation "appropriates \$35,000 to form a task force to study management of U.S. Forest Service and Bureau of Land Management administered lands in the state, including economic analysis and identification of pilot projects for state or local assistance in federal projects."

Also reporting on the story is the [Great Falls \(MT\) Tribune](#) (4/13, 76K).

MAN ADMITS DEATH THREAT TO BLM RANGER IN BUNDY STANDOFF. The [Allentown \(PA\) Morning Call](#) (4/13, 343K) reports that Will Michael "pleaded guilty Monday in Philadelphia before U.S. District Judge Mitchell S. Goldberg to threatening a federal law enforcement officer and interstate communication of threats." A "profanity-laden death threat that Michael left on" Chief Ranger Mike Roop's "office voice mail a year ago will now echo in the 24-year-old's future as a federal felony arrest record."

BLM WORKING ON SAGE-GROUSE EFFORTS. [KOLO-TV](#) Reno, NV (4/14, 3K) reports that the BLM is "conducting training missions this week near Pyramid Lake so employees can look at different ways to ensure the preservation of our land during this drought season." The bureau said "by saving the sage-grouse could be good for the environment as well as the development of Nevada." The article notes that "one solution the agency is working on is to ask ranchers with grazing permits to have their livestock feed more on the cheatgrass."

BLM NAMES THREE TO WILD HORSE ADVISORY BOARD. The [Deseret \(UT\) News](#) (4/14, 538K) reports that the BLM announced will three selections for positions on its nine-member National Wild Horse and Burro Advisory Board. June Sewing has been re-appointed for the category of wild horse and burro advocacy. The board also will welcome Jennifer Sall for public interest; and Julie M. Weikel for veterinary medicine.

BLM TO REOPEN CLOSED TRAILS IN DURANGO. The [Durango \(CO\) Herald](#) (4/13, 28K) reports that the BLM "on Wednesday will reopen several areas around Durango that have been closed to provide winter range for deer and elk that is untraveled by humans." The article notes that "all trails in the Twin Buttes, Grandview Ridge and Animas City Mountain areas will be available again for public use."

BLM IMPLEMENTS FIRE RESTRICTIONS IN THREE WYOMING COUNTIES. The [AP](#) (4/14, 90K) reports that the BLM has "imposed partial fire restrictions in Weston, Crook and Niobrara counties due to dry conditions and high fire danger."

PROPOSED GRAND CANYON WATERSHED NATIONAL MONUMENT OPPOSED. In an op-ed for the [Arizona Republic](#) (4/13, 1.14M), Jim Unmacht, of Arizona Sportsmen for Wildlife Conservation, writes that "the proposed Grand Canyon Watershed National Monument is a solution searching for problems." According to Unmacht, "this proposed monument goes too far, adding more rules and regulations to 1.7 million acres that are unnecessary."

Fish and Wildlife Service:

FWS EXTENDS DEADLINE ON PACIFIC FISHER DECISION. [The Hill](#) (4/14, Wheeler, 224K) reports that the FWS is "delaying its decision to list the West Coast population of Fisher as a threatened species." The agency said "it's extending the deadline for its final determination by 6 months, reopening the public comment period on the proposed rule for an additional 30 days."

Additional coverage was provided by the [Chico \(CA\) Enterprise-Record](#) (4/13, 92K), the [Houston \(TX\) Chronicle](#) (4/14, 2.28M), [KGW-TV Portland \(OR\)](#) Portland, OR (4/13, 111K), and [KBKW-AM Aberdeen \(WA\)](#) Aberdeen, WA (4/14).

FWS REVIEWING WESTERN POND TURTLES FOR POSSIBLE PROTECTION UNDER ENDANGERED SPECIES ACT. The [Oregonian](#) (4/14, 950K) reports that "the western pond turtle, one of two nonmarine turtle species native to Oregon, will undergo a one-year review by the U.S. Fish and Wildlife Service to determine whether the species should be given protection under the Endangered Species Act." The agency "announced April 9 that it would review the species' status in response to a petition submitted in 2012 by the Center for Biological Diversity and several scientists, who are seeking to have the turtle listed under the species act."

Also reporting on the story is the [Houston \(TX\) Chronicle](#) (4/14, 2.28M).

FWS TO REVIEW STATUS OF SPOTTED OWL. The [Siskiyou \(CA\) Daily News](#) (4/13, 16K) reports that the FWS has "agreed to initiate a status review of the northern spotted owl based on a 2012 petition from the Environmental Protection Information Center." The group, "in its petition, states that it believes the protections afforded the owl since its listing have not resulted in improved populations, but instead, it appears to have had an accelerated decrease."

Additional coverage was provided by the [Redwood \(CA\) Times](#) (4/13, 57K).

ADDITIONAL COVERAGE OF EFFORT TO SAVE MONARCH BUTTERFLIES. Additional coverage of the effort to save monarch butterflies was provided by the [Charlotte \(NC\) Observer](#) (4/14, 584K).

US Geological Survey:

USGS HIGHLIGHTS GROWING WILDFIRE RISK IN WYOMING. [Fierce Homeland Security](#) (4/14) reports that "scientists predict climate change will make southwestern Wyoming increasingly vulnerable to wildfire and directly impact plant and animal life in the region, finds a new study by the United States Geological Survey." The article notes that "the projections are based on forecasts for warmer temperatures and an increase in winter precipitation falling as rainfall, versus snow."

Securing America's Energy Future:

Renewable Energy:

"Dong will have until January 2016 to submit a Site Assessment Plan to the US Bureau of Ocean Energy Management, outlining its plans for assessing the zone's wind resources." Then, "upon approval, Dong would then have four and a half years to submit a Construction and Operations Plan." According to Stromsta, "such things should be all but routine for Dong, although inevitably there will be challenges to working within an entirely new – and still inchoate – system."

Onshore Energy Development:

BLOG STATES AHEAD OF FEDS IN FRACKING REGULATIONS. Kathleen Sgamma, VP of Government and Public Affairs at Western Energy Alliance, writes for [The Hill](#) (4/14, Sgamma, 224K) in its "Congress Blog" that the Department of the Interior's recent announcement about upgrading fracking rules to provide states with an example to follow is useless as "states have not been waiting for the Federal government." She points out that many states have enacted rules to protect the environment and regulate fracking, which Colorado started doing more than a decade ago. Sgamma writes that Colorado and Wyoming are among the strictest states, while North Dakota, Texas, and "all western states with sizable oil and natural gas development.. updated their rules well before the Federal government jumped in." She adds that in addition to belated regulations, "Federal government... inefficiencies have already discouraged development on Federal lands."

Offshore Energy Development:

ADDITIONAL COVERAGE BOEM BEGINS REVIEW OF SHELL'S PLANS IN CHUKCHI SEA. Additional coverage that BOEM has begun its review of Shell's plans in the Chuckchi Sea was provided by the [Offshore Engineer](#) (4/14), [Yahoo! Finance](#) (4/14, 4.04M), [UPI](#) (4/13), and [Vice](#) (4/14, 1.28M).

SHELL GRANTED TEMPORARY RESTRAINING ORDER AGAINST GREENPEACE. [FuelFix](#) (4/13, Dlouhy, 7K) reports that Shell won a temporary restraining order blocking Greenpeace activists from "boarding, barricading or interfering with the movement of the drillship Noble Discoverer," which members of the group scaled on April 6. The ruling, however, "stopped short of granting Shell Oil Co.'s request for a broader temporary restraining order that also would bar Greenpeace from encroaching on other support vessels that make up the company's large Arctic drilling fleet."

Tackling America's Water Challenges:

REPUBLICANS FIGHT AGAINST BROWN'S WATER-USE RESTRICTIONS. The [Washington Times](#) (4/14, Richardson, 644K) reports that Republicans have begun to push back against California Gov. Jerry Brown's strong water-use restrictions. Republicans argue "the time has come to focus on the real culprit: a state and federal regulatory framework, fueled by environmental litigation, that requires a certain aquatic environment for at-risk fish while making it nearly impossible to build dams and other water-storage projects." Still, "so far," Republicans, farmers and business interests "have been unable to drum up much outrage over the situation, but that may change" as the restrictions take effect.

Empowering Native American Communities:

SEN. KAINE OPTIMISTIC ABOUT MONACAN RECOGNITION. The [Lynchburg \(VA\) News & Advance](#) (4/14, 77K) reports that "the bid to get federal recognition for the Monacan Indians and other Virginia tribes has enough votes to pass the Senate, provided it can make it to the floor for a vote, said U.S. Sen. Tim Kaine, a sponsor of the bill." Kaine said, "If I can get it on the floor for a vote, it's going to pass. I won't lose any Democratic votes on this, and I have a lot of Republicans who will vote for it, and did vote for it in committee."

GOV. MARTINEZ SIGNS NEW STATE-TRIBAL GAMBLING COMPACTS. The [Albuquerque \(NM\) Journal](#) (4/14, 238K) reports that "Gov. Susana Martinez today signed a new, 22-year gambling compact between the state and Indian tribes that was approved last month by the Legislature." "It now goes to the U.S. Department of Interior, which must approve it before it can take effect."

SOUTH BEND COUNCIL VOTES TO SUPPORT POKAGON DEVELOPMENT WITH CASINO. [WSJV-TV](#) South Bend, IN (4/13, 3K) reports that the South Bend council has "voted 7-0 to welcome the Pokagon tribe development." The article notes that "it does not tie the council or the city to any negotiations with that development."

Also reporting on the story is [WSBT-TV](#) South Bend, IN (4/14, 21K).

BIA To Hold Meeting Tuesday On Proposed South Bend Casino. [WSJV-TV](#) South Bend, IN (4/13, 3K) reports that the BIA will "hold a public meeting this Tuesday on the proposed casino coming to South Bend." According to the article, "the meeting is set to give feedback on a draft environmental impact statement on the proposed 480 million dollar tribal village and casino."

HASKELL MAKES PROGRESS. In an editorial, the [Lawrence \(KS\) Journal World](#) (4/14, 37K) says that "Haskell Indian Nations University has faced a number of challenges since it was last accredited in 2005," and "not all of those issues have been resolved, but hopefully the accreditation team from the Higher Learning Commission that arrived on campus Monday will be impressed by recent efforts to identify and address both problems and goals at the American Indian school." It notes that "funding is a big issue for Haskell, one of two colleges in the country operated by the federal Bureau of Indian Education." According to the paper, "being operated by a federal agency also creates extra problems for the school."

Top National News:

ADMINISTRATION LOBBIES FOR IRAN DEAL AS CORKER BILL APPEARS TO GAIN SUPPORT. The Administration made its case for a nuclear deal with Iran on Monday to members of the House. The classified briefing by top Administration officials came as the Senate Foreign Relations Committee debated a bill that would give Congress a say in a possible final deal. None of the networks covered the story, which received extensive wire and print coverage. Reports cast the White House as continuing its push for support for the framework deal earlier this month as lawmakers move closer to approving legislation that could undermine the ongoing talks.

As the White House defended the deal, the [New York Times](#) (4/14, Weisman, Shear, Subscription Publication, 9 97M) reports, leaders of the Senate Foreign Relations Committee "negotiated into the night on Monday to soften language and possibly shorten a congressional review period" in a proposed measure that would give Congress a say in a possible nuclear deal with Iran. The measure is expected to "formally go before the committee on Tuesday afternoon." Before that time, Sens. Bob Corker and Ben Cardin are "focused on watering down two provisions" – one that would "require the president to certify every 90 days that Iran is not supporting terrorist attacks against Americans," and another that would "prevent the president from waiving any sanctions until the expiration of a 60-day congressional review period."

The [Washington Post](#) (4/14, Mufson, Jaffe, 5.17M) says today's debate presents "a new test" of the President's "quest to get a deal with Iran." Earnest, however, said Monday that Obama would veto a bill that requires him to send an Iran accord to Congress for approval and require Tehran to renounce terrorism. But Corker, the [Huffington Post](#) (4/13, Schulberg, 281K) reports, "said Monday he's confident" the bill "can survive a threatened presidential veto." Said Corker, "Look, I don't ever want to overcommit and under-deliver," but "we are moving in a very positive direction, and we've worked through some issues that I think have given me a lot of hope." [Politico](#) (4/13, Everett, Bresnahan, 669K) similarly reports Corker's comments.

House Majority Leader McCarthy, [Politico](#) (4/13, Sherman, 669K) reports, also "signaled Monday that" the Senate bill "would have a veto-proof majority in the House" and vowed to "move expeditiously to pass the measure" if it passes in the Senate. The [Huffington Post](#) (4/13, Barron-Lopez, 281K) quotes McCarthy as saying, "If he [Corker] is able to get his agreement and get it out of the Senate, it is my intention to bring it to the floor of the House and move it." The [Washington Times](#) (4/14, Howell, 644K) similarly reports McCarthy's remarks.

Dana Milbank writes in his [Washington Post](#) (4/14, 5.17M) column that while there are "plenty of good reasons to be suspicious" about the deal, the "criticism coming from Republicans and from Benjamin Netanyahu's government in Israel is tangled by inconsistencies and logic discrepancies. The one constant: They are opposed to what Obama is doing – whatever it is."

The [New York Times](#) (4/14, Weisman, Shear, Subscription Publication, 9 97M) reports the President "spent several hours...pitching the nuclear agreement in two private White House meetings as his aides began a furious, two-day lobbying effort on Capitol Hill aimed at heading off what they view as congressional interference." Secretary of State Kerry, Energy Secretary Moniz, and Treasury Secretary Lew briefed House members in a classified session on Monday, and they are scheduled to hold a similar briefing for senators this morning. The three officials, [Reuters](#) (4/14, Mohammed, Zengerle) reports, were expected to lobby lawmakers to not act until negotiators reach a final deal. "The president wants Congress to ensure that our negotiators have the time and space that they need to reach an agreement by the end of June," White House spokesman Josh Earnest said.

Kerry, the [AP](#) (4/14, Riechmann) reports, told reporters, "There have been a lot of representations, misrepresentations" about what's contained in the framework agreement.

will listen carefully and ask the questions that it wants to, but also give us the space and time to be able to complete a very difficult task which has high stakes for our country.”

The White House, [Fox News' Special Report](#) (4/13, 1.53M) reported, is “putting tremendous pressure on opponents” of the deal. Kerry was shown saying: “It’s good to have an opportunity to really be able to discuss with people what is really contained within the parameters.” The President, [McClatchy](#) (4/14, Clark, Douglas, Subscription Publication, 17K) reports, “ramp[ed] up efforts to stop” lawmakers from passing legislation “he said would scuttle the deal.” White House officials have “placed more than 130 phone calls to lawmakers to make their case, Earnest said.”

But [Bloomberg Politics](#) (4/14, Sink, Lerman, House, 169K) reports that “skeptical” lawmakers “said.. Kerry’s plea for more time to complete an agreement did little to dissuade them from insisting that Congress must review any final plan.” Republican Rep. Chris Stewart of Utah, a member of the House Intelligence Committee, “said the briefing didn’t resolve differences between the US and Iran’s interpretations of the framework.” [Voice of America](#) (4/13, Bowman, 70K) similarly says the Administration’s “pleas” for a delay “appear to be falling on mostly deaf ears in the Republican-led Congress.” After Monday’s briefing, Republican Rep. Chris Stewart said, “It serves our security better when Congress is involved, and if they are involved now, I think that is helpful.” Republican Rep. Dana Rohrabacher “was even more outspoken,” saying “what is needed in Iran is ‘regime change’ – a possibility he said the Administration is ‘writing off’ by pursuing nuclear talks.”

National Security Adviser Susan Rice, [USA Today](#) (4/14, Jackson, 4.95M) reports, met Monday with Jewish leaders at the White House about the proposed deal. Earnest said, “We are at the beginning of the process of helping members of Congress understand exactly what commitments Iran has made so far, and how those commitments we hope will be finalized over the course of the next two and a half months.” The [Washington Post](#) (4/14, Mufson, 5.17M) reports the President also attended the meeting with Jewish American leaders, as did “Vice President Biden’s national security adviser, Colin Kahl; and three other senior officials.” One person who attended the meeting called the session “positive” and said Obama was “heartfelt about his connection to Israel. Very moving.” Asked before the meeting whether Obama would ask Jewish leaders to lobby lawmakers, Earnest said, “We certainly would welcome any public expression of support from anybody – certainly these individuals.” And, he added, “we would welcome the expression of that support directly to members of Congress.” The [Washington Times](#) (4/14, Boyer, 644K) and [The Hill](#) (4/14, Fabian, 224K) also have similar reports on the President’s meeting Monday.

Gerald F. Seib, in his [Wall Street Journal](#) (4/14, Subscription Publication, 5.67M) column, criticizes the framework deal, which he says is based on a hope that the character of Iran will change.

Amir Taheri writes in the [New York Post](#) (4/13, 3.27M) that “Obama’s zeal to make a deal, any deal, may have rendered an agreement more difficult, if not impossible.” Taheri argues that the talks “have focused on how much of the uranium that Iran does not need for peaceful purposes it could enrich,” which he says is “like demanding a bald man be allowed no more than a dozen combs.”

Former assistant secretary of state Kim R. Holmes writes in the [Washington Times](#) (4/14, Holmes, 644K) that the deal is similar to one reached with North Korea in 1994 and argues that “a tougher sanctions approach offers a far better chance of stopping a future Iranian bomb than the current agreement. It also has a better chance of stopping war.”

Walter Pincus, meanwhile, writes in his [Washington Post](#) (4/14, 5.17M) column that it’s important to “remember there is still a long way to go before any final deal is reached on what is a complicated subject.”

Marc Thiessen writes in his [Washington Post](#) (4/14, 5.17M) column that the President appears to be applying the “Gruber Doctrine” – a “lack of transparency” and “basic exploitation of the lack of...understanding of the American voter” that was used to pass healthcare reform – to his foreign policy on Iran and Cuba. With the Iran deal, Thiessen argues he is “once again relying on a ‘lack of transparency’ to ram through its nuclear deal.” On Cuba, he is “also counting on exploiting the ‘lack of understanding of the American voter’ when it comes to his normalization of relations.” Obama and his foreign policy team, he argues, believe they “know what is good for us. And if we’re too ‘stupid’ to catch the deception, that’s our problem, not theirs.”

Cotton: Deal May Lead To Nuclear War. In an interview with Jeffrey Goldberg of [The Atlantic](#) (4/13, 2.09M), Sen. Tom Cotton said the deal with Iran “is not a deal at all, but instead simply a ‘list of concessions.’” Cotton also warned, “If we agreed to the kind of proposal the Obama administration has made, then military confrontation may be further off, but it might also be nuclear.” [Salon](#) (4/13, Newell, 688K) also reports Cotton’s remarks to [The Atlantic](#).

Despite Possible Deal, Many States Expected To Keep Sanctions. [Reuters](#) (4/14, Torbati) reports that even if a nuclear deal is reached with Tehran, many US states are expected to maintain their own sanctions on Iran. In fact, Kansas and Mississippi are even considering new sanctions.

Catholic Bishops Back Deal. The [Religion News Service](#) (4/14, Gibson, 5K) reports that the US Catholic bishops have “welcomed” the framework deal, and “their top spokesman on international affairs bluntly warned Congress against doing anything to undermine it.” The bishops “oppose efforts that seek to undermine the negotiation process or make a responsible multi-party agreement more difficult to achieve and implement,” Bishop Oscar Cantu, chairman of the bishops’ Committee on International Justice and Peace Committee, wrote to House and Senate lawmakers on Monday. “The alternative to an agreement leads toward armed conflict, an outcome of profound concern to the Church,” said Cantu.

Poll: Iowans Support Deal More Than Obama. The [Quad-City \(IA\) Times](#) (4/14, Lynch, 197K) reports that according to a Quinnipiac University Swing State Poll released Monday, Iowa votes, by a 64 percent to 25 percent margin, favor a deal with Iran “in which some sanctions against Iran are lifted if Iran restricts its nuclear program.” While voters are “ambivalent about any proposed nuclear deal with Iran,” Peter Brown, assistant director of the Quinnipiac poll, said “two-thirds like the idea of an agreement that would restrict Iran’s ability to develop nuclear weapons in exchange for lifting some sanctions.” Meanwhile, Obama’s approval rating has fallen to 40 percent among Iowans.

Russia Lifts Embargo On Sale Of Surface-To-Air Missiles To Iran. [Fox News' Special Report](#) (4/13, 1.53M) reported that Russian Foreign Minister Sergey Lavrov announced that “Russia is lifting its embargo on the sale of its highly-sophisticated S-300 surface-to-air missiles to Iran,” a move that caught the Administration “off guard.” The [Wall Street Journal](#) (4/14, A1, Sonne, Solomon, Subscription Publication, 5.67M), in a front-page story, quotes Lavrov as saying, “At this stage, we believe the need for this kind of embargo, and a separate voluntary Russian embargo, has completely disappeared.” He added that the missile system “is exclusively of a defensive nature” and “doesn’t threaten the security of any governments in the region, including, of course, Israel.”

Jim Sciutto reported on [CNN's Situation Room](#) (4/13, 554K) that Secretary of State Kerry raised the issue to Lavrov during a phone call Monday, adding that White House press secretary Josh Earnest said that if the arms sale “were to move forward, it would raise serious concerns and even could potentially raise sanctions concerns.”

Russia’s move, the [Washington Post](#) (4/14, Demirjian, 5.17M) reports, “suggested a significant policy shift by Moscow,” but the State Department insisted Monday that it “will not upset” ongoing nuclear talks with Tehran. “We see this as separate from the negotiations, and we don’t think this will have an impact on our unity,” spokeswoman Marie Harf said. The [Washington Times](#) (4/14, Taylor, 644K), however, reports that the move by Russia brings “new political peril for President Obama’s prospective nuclear deal with Tehran.” The [New York Times](#) (4/14, Macfarquhar, Subscription Publication, 9.97M) too says the move could “undermine the Obama administration’s efforts to sell Congress and foreign allies on the nuclear deal,” and “also reduce the United States’ leverage in the talks by making it much harder for the United States or Israel to mount airstrikes against Iran’s nuclear infrastructure if the country ignored such an agreement.”

The [AP](#) (4/14, Isachenkov) calls the move “a game changer” that would “significantly bolster” Iran’s “military capability and fuel Israel’s concerns.” Iran, however, “hailed” the decision, [AFP](#) (4/14) reports, as a step towards “lasting security” in the region. Similar reports on the move are offered by [Bloomberg News](#) (4/13, Halpin, Sink, 2.94M), [Reuters](#) (4/14, Baczynska), [USA Today](#) (4/14, Dorell, Today, 4.95M), and the [Christian Science Monitor](#) (4/13, Holtz, 380K), among other outlets.

In an editorial, the [Wall Street Journal](#) (4/14, Subscription Publication, 5.67M) says the move by Russia is a sign of what’s to come if a final nuclear deal with Iran is reached.

Miller: Administration Unlikely To Seek Mideast Peace Deal Next. Aaron David Miller writes for the [Daily Beast](#) (4/13, 937K) that with “Obama’s apparent success with Iran,” the Administration could “push full steam ahead” on seeking a Mideast peace deal. But, Miller says, the “odds that the Obama Administration will be able to build on an Iran deal and get to two states are pretty long ones,” noting the deteriorating relations between the President and Prime Minister Benjamin Netanyahu.

WPost Reporter Likely To Be Put On Trial For Spying. The [New York Times](#) (4/14, Gladstone, Erdbrink, Subscription Publication, 9.97M) reports an Iranian news report that suggests imprisoned Washington Post reporter Jason Rezaian “is a spy who furnished economic and industrial data” to the CIA “was viewed by friends on Monday as a sign that a trial might be held soon.” In an editorial, the [Washington Post](#) (4/14, 5.17M) calls the report “disturbing” and says it is “not a coincidence” that it comes just after Tehran accepted a framework nuclear deal. The Post asks if Iran cannot stop the persecution of Rezaian, “can they be counted on to deliver on the commitments they made in the nuclear talks?”

Iran Suspends Pilgrimages To Mecca Amid Tensions With Saudi Arabia. The [New York Times](#) (4/14, Erdbrink, Subscription Publication, 9.97M) reports that amid

flights transporting pilgrims from Iran to Jeddah have been denied permission to land, Iranian news agencies reported. Culture Minister Ali Jannati told reporters, "Until these guilty people are put on trial and punished, the umrah will be stopped and Iranian flights will be suspended."

OBAMA PROMOTES TAX PLAN IN SERIES OF LOCAL TV INTERVIEWS. On Monday, the President began an effort to highlight his proposed tax cuts, while also contrasting them with the proposals from Congressional Republicans. [USA Today](#) (4/14, Jackson, 4.95M) reports that President is holding a series of events this week to highlight "his proposals for tax breaks devoted to child care, education, and working families, while arguing that a GOP plan to eliminate the estate tax will benefit only wealthy Americans." In contrast, Republicans are portraying the estate tax as "punitive levy that targets farms, ranches, and businesses." As part of the White House effort, on Monday, the Administration released a report "on the impacts of the two tax plans, including state-by-state breakdowns."

The [AP](#) (4/14) reports that the on Monday, the President took his message to different parts of the country with interviews with TV stations "from Pennsylvania, Wisconsin, South Dakota, Ohio and Maine." On Tuesday, the President will hold a White House event "promoting equal pay," followed by a trip to Charlotte on Wednesday to "meet with women about budget policies to support families." Finally, on Thursday, the President "plans a White House event on family-friendly workplace policies."

[WMTV-TV](#) Madison, WI (4/13, 6 09 p.m. CDT, 3K) reported that the President discussed "how his tax plan would affect people in the state of Wisconsin," saying that "44 million families a year would save an average of \$600 in tax cuts." WMTV added that the White House is trying to convince Rep. Paul Ryan "to get on their side when it comes to middle class tax relief."

[WGAL-TV](#) Lancaster, PA (4/13, 6 00 p.m. EDT, 98K) reported that President is "calling out Republican tax plans, saying they come at the expense of the middle class." WGAL added that the President highlighted his "middle class economics agenda and tax cuts and to point out how it differs from Republican tax plans." Obama: "There are values involved that have to be examined. I think that the people of Pennsylvania everybody should do their fair share, and nobody is asking for a free lunch, but middle class families need help and that is what we're going to focus on." WGAL added that the President said "his middle class economics agenda would give tax cuts to 44 million middle income families, many of them in Pennsylvania. He would do so through larger tax credits for college costs, child care, two wage-earner families, and low wage workers."

[WCSH-TV](#) Portland, ME (4/13, 6:00 p.m. EDT, 30K) reported that the President highlighted "his tax plan and really contrast it with what the Republicans are proposing," adding, "This is a story that we have heard before, that the Republicans want to help the very wealthy whereas the President's plan would benefit the middle class." WCSH added that the President "wants to expand the Earned Income Tax Credit for workers who don't have children living at home. This would benefit 63,000 Mainers. That is in addition to the 53,000 who already get this. The President's Second Earner Credit for two earner families would give a tax cut up to \$500 to 120 working families in Maine. ... The President's proposal is to triple the maximum childcare credit for young children to \$3,000 per child. ... The President says this would benefit 100,000 households in Maine and that pretty much any household making less than \$200,000 a year would see some benefit."

Obama Discusses His Legacy. [WBNS-TV](#) Columbus, OH (4/13, 6:00 p.m. EDT, 151K) reported asked the President what he wants his legacy to be. Obama: "I hope that when folks look back, and it may require a little historic distance, that they will say I came into office committed to making the economy work better for ordinary families, that we took the worst economic crisis since the Great Depression and we were able to right the ship, that we made the economy a little fairer, more inclusive, giving people more opportunity, providing healthcare for folks who didn't have to it before, bringing troops home so they can be with their families after having served us so valiantly." WBNS added that the President said that "if a child has a better chance now than it did when he came into office, he will consider his presidency a success."

RUBIO ENTERS GOP PRESIDENTIAL RACE WITH MIAMI RALLY. Sen. Marco Rubio entered the race for the Republican presidential nomination Monday evening at a Miami rally that emphasized his origin as the son of working-class Cuban immigrants, as well as his youth and energy, in a campaign in which several leading candidates are well into their sixties and are members of political families that have held the presidency in the past. Coverage of the event, which includes reports on all three network newscasts, focuses on Rubio's efforts to contrast himself with Jeb Bush and Hillary Clinton, and concludes that while Rubio has seen low polling numbers so far, he is expected to emerge as a top GOP contender.

[NBC Nightly News](#) (4/13, story 2, 2:30, Holt, 7.86M) reported that Rubio "made it official in front of a pumped-up hometown crowd." NBC (O'Donnell) added, "Candidates rarely make their announcements in the evening, but Marco Rubio did. He came here at the precise time of 6:03 p.m. to make sure that cable networks like the conservative home of Fox News would carry it live for a friendly audience, and the location was also intentional: the landmark, Miami's Freedom Tower, the Ellis Island for Cuban refugees who fled Fidel Castro's regime a generation ago." The [CBS Evening News](#) (4/13, story 6, 1:40, Pelley, 5 08M) reported that "the son of Cuban immigrants...vowed to protect the American dreams they sought." Rubio: "I live in an exceptional country where the son of a bartender and maid can have the same dreams and the same future as those who come from power and privilege."

The [AP](#) (4/14, Elliott, Farrington) says that "hoping to turn his relative youth into a benefit," Rubio promised "to move politics beyond the past, a job at both Democratic favorite" Clinton, and Bush, "his one-time Republican mentor." The [New York Times](#) (4/14, Parker, Subscription Publication, 9.97M) also says "the youngest candidate" in the race "is expected to cast himself as a forward-looking, next-generation leader – and an implicit contrast" with Bush and Clinton. [ABC World News](#) (4/13, story 3, 2:25, Muir, 5.84M) reported that in an interview with George Stephanopoulos just before his announcement, Rubio was asked about Bush. He said, "Jeb is my friend. I have tremendous admiration for him ... I am not running against Jeb Bush. We are competing for the same job."

On [NBC Nightly News](#) (4/13, story 3, 1:25, Holt, 7.86M), Chuck Todd said Clinton is "a Baby Boomer," and Bush, "Rubio's chief primary opponent," is "another Baby Boomer. So he's able to make that point quite a bit, that he's about the future. Five of the last six presidential elections have been won by the younger candidate. Voters instinctively respond to the future sometimes by going with the younger candidate."

Susan Page of [USA Today](#) (4/14, 4.95M) writes that "the conventional wisdom used to be" that if Bush decided to seek the 2016 nomination, Rubio "would demur and wait his turn." But not only did Rubio's entry "prove that assumption wrong," the "generational message the freshman Florida senator delivered and the iconic setting he chose underscores the advantages he has over Bush."

[Bloomberg News](#) (4/13, Bender, 2.94M) says Rubio "enters the race with high expectations, and perhaps even higher hurdles." His political skills "are on par with any Republican in or expected to get into the field," and he is expected to perform well both as a speaker and in retail politicking. But "without help from a key billionaire or two, financial support for his campaign remains questionable," and he may not get much help from Florida Republicans "as long as he's overshadowed" by Bush.

[Reuters](#) (4/14, Holland) says Rubio remains low in early primary polling, but his campaign team expects his numbers to improve as he becomes better known. The [Washington Post](#) (4/14, O'Keefe, Roig-Franzia, 5.17M) says the "dramatic announcement is expected to launch Rubio near the top of a crowded field." Despite his low polling numbers, many analysts have listed Rubio in the GOP top tier.

[Politico](#) (4/14, Isenstadt, 669K) says the "soaring rhetoric and the venue he chose.. underscore the intensely personal nature" of his campaign. But his "decision to emphasize his family's immigrant roots, and therefore immigration, could be a significant drag for him in the GOP primary." The [Miami Herald](#) (4/14, Mazzei, Sherman, 694K) says Rubio "rose from the obscure West Miami City Commission to the US Senate in a mere dozen years."

The [Washington Times](#) (4/14, Sherfinski, 644K) and [The Hill](#) (4/13, Kamisar, 224K) also report on Rubio's announcement.

Cruz Says Rubio Will "Elevate The Debate For All Of Us." [USA Today](#) (4/14, Camia, 4.95M) reports that Sen. Ted Cruz, another Cuban-American Tea Party-backed contender, "welcomed Rubio into the race." Cruz said, "Marco is a friend and colleague whom I greatly respect. He is a strong addition to the Republican field, and he will undoubtedly elevate the debate for all of us."

The [Wall Street Journal](#) (4/14, O'Connor, Subscription Publication, 5.67M) says that while Rubio faces challenges from both Cruz and Sen. Rand Paul, another first-term Tea Party favorite, Bush is likely to be the bigger obstacle.

WPost Says Rubio's Record "Less Clear-Cut" Than Campaign Themes. The [Washington Post](#) (4/14, 5.17M) says in an editorial that while Rubio is running on "an inspiring personal story and a promise to muscularly advance American values," his record "is less clear-cut than those themes. ... In some cases, Mr. Rubio has pushed his party toward better policy," such as when "he championed a bipartisan compromise immigration bill in 2013." But he has occasionally "ducked when political courage has been needed," such as his Foreign Affairs Committee vote against President Obama's plan to bomb Syria. Still, "his status as a fresh face, relatively unknown to most voters, gives him a chance to define himself with greater focus and clarity."

WSJournal Has Mixed Praise For Rubio. The [Wall Street Journal](#) (4/14, Subscription Publication, 5.67M) says in an editorial that though Rubio was seen as a presidential prospect from the day of his Senate election, he has been a serious legislator, particularly on foreign policy. The Journal also praises his poverty plan as innovative. But the newspaper criticizes Rubio's tax plan as too timid on both corporate and individual marginal tax rates.

Atwater," but his announcement Saturday that he will not run has changed the race. Rep. Tom Rooney, who said two weeks ago that "the race wasn't even on his radar," is now considering a run. Other GOP prospects include Lt. Gov. Carlos López-Cantera, ex-state House Speaker Will Weatherford, and several other sitting House members including Reps. Vern Buchanan, Ron DeSantis, David Jolly, and Dennis Ross. Democrats are rallying around Rep. Patrick Murray, meaning the GOP may face a long primary season that the Democrats avoid.

Editorial Wrap-Up:

NEW YORK TIMES. *"Iraq's Cycles Of Revenge."* The [New York Times](#) (4/14, Subscription Publication, 9.97M), in an editorial, writes that while Iraq and the US have hailed a recent operation to regain control of Tikrit from ISIL, the "picture of what has happened in the wake of American bombing to dislodge ISIS fighters from predominantly Sunni urban areas is hazy and in dispute." According to the Times, "there's growing evidence that Shiite militiamen who operate in concert with Iraqi troops have carried out summary executions, lynchings and widespread looting" in a sign that they are "taking revenge on Sunnis."

"Women Still Earn A Lot Less Than Men." In honor of Equal Pay Day, the [New York Times](#) (4/14, Subscription Publication, 9.97M) editorializes that "while that seems like steady if painfully slow progress, closer inspection shows that progress in closing the gender pay gap has basically stalled over the past decade." Noting that in "2010, 2012 and 2014, congressional Republicans blocked consideration of the Paycheck Fairness Act," the Times argues that this "obstructionism has only made the problem worse, and an even more pressing one for the presidential candidates to address."

"New York's Leaky Public Pension Funds." In an editorial, the [New York Times](#) (4/14, Subscription Publication, 9.97M) reacts to a report from NYC comptroller Scott Stringer, which found that fees and bad decisions by Wall Street firms cost the city's public pension funds \$2.5 billion over the last ten years. The Times says that Stringer needs to keep his promise to expose those firms responsible for the poor returns. The Times adds that the city "should drive a harder bargain with Wall Street, and cultivate in-house investing expertise over high-priced outside management."

WASHINGTON POST. *"Iran's Absurd Persecution Of Post Reporter Jason Rezaian."* In an editorial, the [Washington Post](#) (4/14, 5.17M) calls an Iranian news report that imprisoned Washington Post reporter Jason Rezaian is facing an espionage charge "disturbing" and says it is "not a coincidence" that it comes just after Tehran accepted a framework nuclear deal. The Post asks if Iran cannot stop the persecution of Rezaian, "can they be counted on to deliver on the commitments they made in the nuclear talks?"

"Congress Should Put Trade Atop Its To-Do List." A [Washington Post](#) (4/14, 5.17M) editorial urges Congress to pass trade promotion authority legislation, calling it the most important item on the congressional agenda. Noting that Japanese Prime Minister Shinzo Abe, who supports the TPP, "arrives in Washington for a state visit on April 28," the Post argues that this should be Congress's target date for passing the measure.

"Mr. Rubio's Idealism." The [Washington Post](#) (4/14, 5.17M) says in an editorial that while Sen. Marco Rubio is running on "an inspiring personal story and a promise to muscularly advance American values," his record "is less clear-cut than those themes. ... In some cases, Mr. Rubio has pushed his party toward better policy," such as when "he championed a bipartisan compromise immigration bill in 2013." But he has occasionally "ducked when political courage has been needed," such as his Foreign Affairs Committee vote against President Obama's plan to bomb Syria. Still, "his status as a fresh face, relatively unknown to most voters, gives him a chance to define himself with greater focus and clarity."

WALL STREET JOURNAL. *"The Rubio Run."* The [Wall Street Journal](#) (4/14, Subscription Publication, 5.67M) says in an editorial that though Sen. Marco Rubio was seen as a presidential prospect from the day of his Senate election, he has been a serious legislator, particularly on foreign policy. The Journal also praises his poverty plan as innovative. But the newspaper criticizes Rubio's tax plan as too timid on both corporate and individual marginal tax rates.

"Do Two Half-Victims Make A Whole Case?" The [Wall Street Journal](#) (4/14, Journal, Subscription Publication, 5.67M) editorializes that the Consumer Financial Protection Bureau (CFPB), more than a year after extracting a \$80 million settlement from Ally Bank for discriminatory treatment of borrowers, has not yet distributed any of those funds to the aggrieved borrowers. The Journal argues that such discrimination charges are manufactured by Federal bureaucrats based on certain assumptions about minority status.

"Russian Missiles For The Ayatollah." In an editorial, the [Wall Street Journal](#) (4/14, Subscription Publication, 5.67M) says Russia's decision to lift the embargo on the sale of surface-to-air missiles to Iran is a sign of what's to come if a final nuclear deal with Iran is reached.

"Snowden And Beijing's Cannon." In an editorial, the [Wall Street Journal](#) (4/14, Subscription Publication, 5.67M) says Edward Snowden may have given China the information it needed to create the so-called Great Cannon, which it can use to censor Internet content around the world. The Journal notes similarities between the Great Cannon and Quantum, a US-developed tool to track potential terrorists and criminals, the existence of which Snowden revealed in 2013.

"Ed Milliband's Old Labour Manifesto." In an editorial, the [Wall Street Journal](#) (4/14, Subscription Publication, 5.67M) slams the proposed tax policies of Britain's Labour Party leader, Ed Milliband, which includes allocating billions of pounds toward the National Health Service, cutting university tuition costs and increasing the UK's minimum wage. The Journal criticizes Labour's plans to increase corporate taxes, saying its overall economic platform is representative of the failure of all British politicians running in this campaign, including the Tories, adding that there is no economic growth agenda provided by either party.

INTERIOR:

Now 'conversant' in portfolio, Jewell plans out 2nd half of term

Phil Taylor, E&E reporter

Published: Monday, April 13, 2015

When Sally Jewell was sworn in as secretary of the Interior on April 12, 2013, the Beltway outsider needed daily crash courses in how to run the nation's largest land management agency with its conflicting goals of resource development and conservation.

"It was like studying for a final every night," Jewell said.

But two years into her tenure, Jewell says she's "conversant" in Interior's portfolio of wildlife protection, energy development, recreation and historical preservation on roughly one-fifth of the nation's land, in addition to improving the quality of life for American Indians.

In the next two years, Jewell, 59, said she hopes to make Interior's mission more relevant to young people and connect more Americans with the outdoors. She plans to implement "more thoughtful planning, more thoughtful regulation" of energy development on the nation's lands and waters.

"I feel really great about where I am right now, and I feel great about what I think we can get accomplished in the coming two years," Jewell said in an interview with *Greenwire*. "I feel like I'm beyond the halfway point."

Jewell has a full policy agenda for the remainder of President Obama's second term. She'll be overseeing a Bureau of Land Management rule to reduce methane pollution from oil and gas wells on public lands and making tough decisions on whether to allow future offshore drilling, particularly in the Arctic.

She'll also play a major role in whether the Fish and Wildlife Service deems the greater sage grouse, the bird that has been the subject of much controversy, worthy of federal protections in late September, a decision that could have important ramifications for land use in the West and is almost certain to be challenged in court.

Jewell will also be Obama's emissary to the West as the White House considers which lands to set aside as national monuments.

Since replacing Ken Salazar, Jewell has seen dozens of sage grouse and has watched polar bears meander across a beach in Kaktovik, Alaska, a battleground in Jewell's support of wilderness protections in the oil-rich Arctic National Wildlife Refuge. She has overseen the creation of a handful of new national monuments; crafted and finalized new rules for oil and gas exploration on public lands and in the Arctic; and led a major federal-state partnership to preserve sage grouse.

She has also implemented controversial decisions to protect two iconic wildlife refuges in Alaska and cordon off sensitive Arctic waters from future oil and gas drilling -- taking fire from an Alaska senator with outsized control over Interior's programs and budget.

When Jewell inherited Interior, its finances, like those of other federal agencies, were in disarray.

Congress had failed to reach a deficit deal, which triggered across-the-board sequestration cuts to every Interior program, including operation of its more than 400 national park units and approval of oil and gas leases in the West. Jewell, the former CEO of outdoor retailer REI, said then that "you would never run a business this way."

It got worse several months later, in October, when the government shut down for 16 days, shuttering national parks and placing most of Interior's 70,000 employees on an unwelcome furlough.

"Anything from there is up," Jewell said last month.

Things did improve in late 2013 when then-budget chiefs Rep. Paul Ryan (R-Wis.) and Sen. Patty Murray (D-Wash.) struck a deal to lift the sequester in 2014 and 2015, helping restore Interior services, Jewell said.

But the sequester is slated to return in fiscal 2016 now that Republicans have taken control of both chambers of Congress, and Jewell is worried.

Barring a deal, Interior's \$13.2 billion request -- which includes Jewell's policy goals to increase conservation funding, boost youth employment and accelerate restoration of sage grouse lands, among others -- is "wishful thinking," according to Sen. Lisa Murkowski (R-Alaska), who controls the agency's budget.

"I'm hopeful Congress will get past sequestration," Jewell said. "For critics and supporters, no one can argue that our economy is in much better shape and that things like the stimulus actually worked."

Fiscal hawks in Congress want to slash Interior's budget, but privately they "also want something from me that costs money from the Interior's budget," Jewell said. "So the irony is palpable."

Achievements and embarrassments

Jewell said she's proud of the Obama administration's work in Indian Country. She touted Obama's visit last June to the Standing Rock Indian Reservation in North Dakota, the creation in summer 2013 of the White House Council on Native American Affairs, and Interior's work on improving the Indian education system.

"We are moving beyond random acts of kindness in disparate parts of the budget to Indian Country, and moving to something that's more focused on supporting what the tribes say they need," Jewell said.

Jewell also touted the Park Service's efforts to "tell the story of America through our assets" as it seeks to become more relevant to youth and minorities in the run-up to its 2016 centennial.

"We're really lining ourselves up well to create an environment where a new generation is going to find the national parks more relevant to them in the future than they have in the past," she said.

Jewell was speaking by telephone from Hawaii, where she had joined Gov. David Ige (D) and Hawaii Democratic Sens. Brian Schatz and Mazie Hirono to dedicate Honouliuli National Monument, which Obama designated in February to preserve and interpret Hawaii's largest and longest-used confinement camp for Japanese Americans, immigrants and prisoners of war during World War II.

Jewell's Park Service has elevated the stories of other historically marginalized Americans.

It announced a study last May to identify sites of importance to the civil rights struggle of lesbian, gay, bisexual and transgender Americans. In February, Obama created a national monument protecting Chicago's Pullman historic district, a site of significance for the nation's labor and civil rights movements that became the first Park Service site in the Windy City.

Obama will continue to use the Antiquities Act in his final years in office, Jewell said.

"We're making progress where Congress has not been able to," Jewell said. "The president has used his pen judiciously but effectively."

When Congress has passed legislation, it has not always been to Jewell's liking.

Jewell last December said she was "profoundly" upset that Congress had tucked a provision into a massive public lands package to facilitate a copper mine in Arizona, which Jewell called an affront to American Indians. Jewell later blasted Congress' decision to block Endangered Species Act protections for sage grouse, assailing members for "political posturing."

Jewell has since brokered major agreements with states, landowners and businesses to preserve the greater sage grouse's 165 million acres of Western habitat and raised awareness of how disappearing sagebrush will affect hundreds of other species.

The job has offered plenty of time in the field, where Jewell, an avid outdoorswoman, feels at home.

Jewell in late March accompanied Oregon Gov. Kate Brown (D) on a pre-dawn visit to a sage grouse breeding ground in central Oregon to view the bird's flamboyant mating ritual. Jewell said she counted 26 grouse.

But Jewell, who has climbed Antarctica's Vinson Massif and made seven successful summits of Mount Rainier in her home state of Washington, said she has "hardly climbed anything" since taking office.

Her tallest conquests were 4,800-foot Mai box Peak, outside her Seattle-area home, during a holiday and Shenandoah National Park's Old Rag Mountain. She said she also takes personal visits to Catoctin Mountain Park in north-central Maryland and hikes around Harper's Ferry National Historic Park, about an hour's drive from Washington, D.C.

"I'm not looking for vertical at this point," she said. "I'm just looking for out -- outside."

She will be camping in a national park later this month with her husband, Warren, but wouldn't say where, "because I don't want company."

Jewell recalled some embarrassing moments while adjusting to the D.C. spotlight.

In April 2013, a couple of weeks into her tenure and "thinking I was less visible than I actually was," a sweaty Jewell hopped on a Metro train in shorts and a T-shirt, "looking like a real grunge," after moving furniture at her new apartment. She was picking up a pair of glasses and a party purse for that night's White House Correspondents' Dinner but was quickly recognized by a man who said he was taking photographs for the Canadian Embassy.

"I learned that in these jobs, you're more on display than you think you are," she said.

Later that day, Jewell was lifting a sofa up the stairs at her apartment with her hair only half done when someone rang her doorbell. It was Rahm Emanuel, the mayor of Chicago and Obama's former chief of staff. He had arrived 30 minutes early.

Cheers and jeers

Interior watchers say Jewell deserves a mixture of praise and criticism for her first two years in office.

"Her grade would be pretty much incomplete at this point, and that's not a bad thing," said Whit Fosburgh, CEO of the Theodore Roosevelt Conservation Partnership, a sportsmen's conservation group.

Fosburgh praised Jewell for advancing protections for sage grouse, modernizing BLM's land-use planning, expanding the use of landscape-scale mitigation, and reforming oil and gas lease sales.

"These are things that are moving in the right direction and could represent a fundamental change in how our public lands are managed," he said. "But they're not across the finish line yet."

Jewell has also done a commendable job marshaling Interior's 70,000 employees around the Obama agenda, prodding some career employees who have been resistant to change, Fosburgh said.

"She's done a nice job keeping various factions within the department moving in the right direction on sage grouse," Fosburgh said. "She's been to a large degree the adult in the room making sure everyone moves toward a common goal."

Jewell has been less successful in nurturing relationships on Capitol Hill, Fosburgh said. Salazar, by contrast, was a seasoned politician and

"Sally by nature is more of an introvert," Fosburgh said.

Jewell has had a particularly rough relationship with Murkowski, who has hounded Jewell ever since the secretary rejected a proposed road through the Izembek National Wildlife Refuge that Alaskans wanted to improve public safety.

But what Jewell has lacked in political chops, she has made up for with her policy expertise, said Brian Rutledge, vice president of the National Audubon Society.

Rutledge praised Jewell's depth of understanding of sagebrush habitats in the West and said she's done an impressive job keeping states at the bargaining table.

"She didn't just go for a hike with us in the sagebrush," Rutledge said. "She listens, studies and understands the importance."

Others wonder whether Jewell's work is enough to save the sage grouse.

"Interior's sage grouse framework is woefully inadequate to the task of preventing extinction, much less [promoting] recovery, of this icon of the West," said John Horning, executive director of WildEarth Guardians.

Jewell has come up short on climate change by failing to curb extraction of oil, gas and coal from Interior lands, which, when burned, are a major source of domestic global warming emissions, Horning said.

"If Secretary Jewell wanted a real climate legacy -- one to match EPA's -- she'd commit today to keeping some significant percentage of fossil fuels in the ground," Horning said. "Then she'd have the respect of climate activists and the gratitude of countless future generations."

But if she keeps too much of those minerals in the ground, Jewell risks a backlash from fossil fuel groups.

Rebecca Watson, who was Interior assistant secretary for land and minerals management during the George W. Bush administration, said commodities industries -- grazing and oil and gas, in particular -- will "pay the price" for Interior's efforts to conserve BLM lands for sage grouse.

"Secretary Jewell wants to paint a picture of federal and state cooperation to head off a listing by Interior's [Fish and Wildlife Service]," she said. "But meanwhile, BLM is moving ahead without the states, according to the schedule set by the victorious environmental hard-liners in litigation."

DATE MONDAY, APRIL 13, 2015 7 00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS

- + Interior To Announce New Regulation On Offshore Drilling.
- + U.S., Mexico Officials Sign Conservation Agreement.
- + Secretary Jewell Has Made Water Management In The West A Priority.
- + Fight Over King Cove Road Continues.
- + Interior's Principle Deputy CIO Leaving.
- + Additional Coverage: Secretary Jewell Visits Chattahoochee River National Recreation Area.
- + Additional Coverage Of Sentinel Landscapes Designations.
- + Op-Ed: Cedar Mesa Needs Protections.

AMERICA'S GREAT OUTDOORS

National Park Service:

- + Schumer Urges NPS To Move Forward In Establishing Harriet Tubman Park In Auburn.
- + Rocky Mountain National Park Considering Crowd Measures.
- + Cherry Blossoms Hit Peak Bloom Ahead Of Parade, Festival.
- + First Anacostia River Festival Celebrated.
- + NPS Awards Grants To Tribes For Historic Preservation Efforts.
- + Hunter Asks High Court To Limit NPS' Power.
- + NPS Holds Public Meeting On Future Of Delaware Water Gap National Recreation Area.
- + Olympic National Park, Library Partner For Poetry Walks.
- + NPS Police On Lookout For "Trashers" At Fort Mason .
- + Olive Shrubs Threatening Flight 93 Memorial Park.
- + Man Charged With Robert Gould Shaw Memorial Vandalism.
- + Grizzly Bear Trapping Planned In Remote Areas Of Yellowstone.
- + NPS Awards Funds For Data Gathering At Rocky Mountain National Park.
- + NPS Accepting Public Requests For Yellowstone Firewood Collection Permits.
- + Additional Coverage Of "Find Your Park" Campaign.
- + Additional Coverage Of Civil War Anniversary.
- + Additional Coverage Of 150th Anniversary of Lincoln Assassination.
- + Additional Coverage Of Complaint By Federal Contract Workers.
- + More Study Of Craters Of The Moon National Park Proposal Urged.

Bureau of Land Management:

- + Bundy, Supporters Mark Standoff Anniversary.
- + BLM Officers Cleared In Death Of Man Outside Vegas.
- + BLM To Hold Meeting On Sage-grouse.
- + Despite Protests, BLM Returns Wild Horses To Range.
- + Colorado Supreme Court Upholds San Miguel River Instream Flows.
- + Input Sought On Management Of Trinidad Head Lighthouse.
- + BLM, Trails Association Celebrate Completion Of Mountain Bike Trail Network.

Fish and Wildlife Service:

- + Federal Review Of Canada Lynx To Take Longer Than Expected.
- + FWS Faces Decision On Sage Grouse.
- + Arkansas Forestry Association Won't Oppose Bat Rule.
- + FWS Proposes Measures to Facilitate Recovery of Endangered Black-footed Ferrets in Wyoming.
- + FWS Considering Regulations For Migratory Game Birds.
- + Provo River Delta Restoration Project Would Help Endangered Utah Fish.
- + Neosho Hatchery Joins Effort To Save Topeka Shiners.
- + FWS Working To Conserve Lamprey Population.
- + Study Recommends Protections For Ozark Cavefish.
- + FWS Considering Protections For Two West Virginia Crayfish Species.
- + Conservation Group Questions Accuracy Of Idaho Wolf Numbers.
- + Continuing Coverage Of Effort To Save Monarch Butterfly.
- + Additional Coverage: FWS Considering Protections For Yellow Cedar, Clear Lake Hitch.

US Geological Survey:

- + USGS Study Says Climate Change Poses New Risk To Sage Grouse In Wyoming.
- + App Could Help Predict Earthquakes.
- + Study Says Permafrost Carbon Release Will Be Gradual.

SECURING AMERICA'S ENERGY FUTURE

Renewable Energy:

- + FWS Says Lacks Private Wind Farm Jurisdiction.

Onshore Energy Development:

- + Federal Judge Blocks Mining In Navajo Mine Expansion Area.
- + New Fracking Rule Criticized.
- + Oil Industry Criticized For Complaining About Sage Grouse Science.
- + Rules To Cut Methane Releases Supported.
- + BLM Urged To Do Master Leasing Plan.

Offshore Energy Development:

- + Obama Administration Moves To Full Review Of Shell's Arctic Drilling Plan.
- + Hearing Held On Seismic Testing.
- + Greenpeace Activists Leave Shell Arctic Drill Rig.

TACKLING AMERICA'S WATER CHALLENGES

- + Major Changes To Environmental Restoration Could Endanger Bay Delta Conservation Plan.
- + Water From California Delta's Mysteriously Disappearing.
- + Ocean Desalination Plants Being Studied, Built By Many California Coastal Cities.
- + Irrigation Districts Announce Stanislaus River Deal.
- + North Dakota Officials Expect Northwest Area Water Supply Legal Battle To Drag On.

EMPOWERING NATIVE AMERICAN COMMUNITIES

- + Standing Rock Landowners Sent Buy-back Offers.
- + Interior Transfers More Than \$12 Million To Cobell Education Scholarship Fund.
- + Interior Agencies To Hold Forum On Native Trust Lands.
- + Water Compact Discussed At Confederated Salish And Kootenai Tribes Quarterly Meeting.

TOP NATIONAL NEWS

- + Kerry Makes Case For Iran Framework, Urges Congressional Critics To "Hold Their Fire."
- + Regional Leaders Give Obama Credit For Castro Meeting, But May Want More.
- + Media Analyses: Clinton Runaway Favorite For Democratic Nod, But Faces Challenges.

EDITORIAL WRAP-UP

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

BIG PICTURE

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE

- + Today's Events In Washington.

LAST LAUGHS

- + Late Night Political Humor.

DOI in the News:

INTERIOR TO ANNOUNCE NEW REGULATION ON OFFSHORE DRILLING. The [New York Times](#) (4/11, Davenport, Subscription Publication, 9.97M) reports the Interior Department is planning to announce a new regulation on offshore oil and gas drilling as early as Monday. The new rule "is expected to tighten safety requirements on blowout preventers," which "are the last line of protection to stop explosions in undersea oil and gas wells." The move is intended to "prevent the kind of explosions that caused the catastrophic BP oil spill in the Gulf of Mexico," Obama Administration officials said Friday.

Additional coverage was provided by [The Hill](#) (4/11, Cama, 224K), the [Wall Street Journal](#) (4/12, Harder, Gold, Subscription Publication, 5.67M), [Reuters](#) (4/11), the [Washington \(DC\) Examiner](#) (4/12, 315K), the [International Business Times](#) (4/12, 1.19M), the [Longview \(TX\) News-Journal](#) (4/12, 64K), and [E&P Magazine](#) (4/12).

U.S., MEXICO OFFICIALS SIGN CONSERVATION AGREEMENT. The [Houston Chronicle](#) (4/10, Aguilar, 2.28M) reports that on Friday, U.S. and Mexican officials "celebrated the cooperation it took to get the crossing" from Big Bend National Park to Boquillas del Carmen, Mexico "back open." Interior Secretary Sally Jewell and her Mexican counterpart, Juan José Guerra Abud, Mexico's secretary of the environment and natural resources, "flew in for twin ceremonies on both sides of the border." The article notes that "in addition to improving conditions in Boquillas, the two governments are collaborating on environmental issues in Big Bend and Mexico's adjacent Rio Bravo region." Jewell said, "We have the opportunity with Boquillas to encourage thoughtful ecological tourism."

Additional coverage was provided by [KWES-TV Odessa \(TX\)](#) Odessa, TX (4/12, 5K) and [KWES-TV Odessa \(TX\)](#) Odessa, TX (4/12, 5K).

SECRETARY JEWELL HAS MADE WATER MANAGEMENT IN THE WEST A PRIORITY. The [New York Times](#) (4/13, A1, Wines, Subscription Publication, 9.97M) reports that "from Texas to Arizona to Colorado, the entire West is under siege by changing weather patterns that have shrunk snowpacks, raised temperatures, spurred evaporation and reduced reservoirs to record lows." The article notes that "since coming to office two years ago, Interior Secretary Sally Jewell has elevated water management in the West to an agency priority". Michael Connor, the deputy secretary of the interior, said in an interview, "The challenge is systemic and persistent across the West. We need better infrastructure, better operation arrangements, better ways to share water and move water."

Op-Eds Call Attention To Water Issue. In an op-ed for the [Arizona Republic](#) (4/10, 1.14M), author Melissa Seigny argues that the conversation over water should be framed "as an excess of demand, not a shortage of supply." She notes that "even setting aside the stresses of long-term drought and changing weather patterns, quite simply, westerners have divvied up more water than the Colorado River actually carries in normal years."

In an op-ed for the [Denver Post](#) (4/13, Hawes, 804K), Taylor Hawes, Colorado River Program Director for The Nature Conservancy, calls for better water management.

FIGHT OVER KING COVE ROAD CONTINUES. The [Anchorage \(AK\) Dispatch News](#) (4/11, 146K) reports that "while the Aleutians East Borough tries again to sell a mothballed hovercraft, a court fight continues over whether a one-lane road through about 10 miles of the Izembek National Wildlife Refuge or a boat trip is the best way to connect the remote towns of King Cove and Cold Bay, 600 miles southwest of Anchorage." The article notes that "the access battle has become one of the perennial flashpoints between the state and the federal government and it threatens to remain so."

INTERIOR'S PRINCIPLE DEPUTY CIO LEAVING. The [Federal News Radio](#) (4/13, 11K) reports that Larry Gross is moving on from the Interior Department. According to the article, "after spending the last almost five years as the principle deputy CIO at Interior, Gross said he'll become the Agriculture Department's Farm Service Agency's top IT guy on April 20."

ADDITIONAL COVERAGE SECRETARY JEWELL VISITS CHATTAHOOCHEE RIVER NATIONAL RECREATION AREA. Additional coverage of Interior Secretary Sally Jewell's visit to Chattahoochee River National Recreation Area was provided by the [Neighbor Newspapers Atlanta](#) (4/12).

ADDITIONAL COVERAGE OF SENTINEL LANDSCAPES DESIGNATIONS. Additional coverage of the Sentinel Landscapes designations was provided by the [Sierra Vista \(AZ\) Herald](#) (4/8, 3K).

OP-ED CEDAR MESA NEEDS PROTECTIONS. In an op-ed for the [New York Times](#) (4/12, Roberts, Subscription Publication, 9.97M), David Roberts writes that "administered by the woefully understaffed federal Bureau of Land Management," Cedar Mesa is "hammered every year by rampant looting that a small number of rangers are powerless to stop." He notes that "more ominously, perhaps, the Utah State Legislature has its eye on the roughly 500,000 acres of pinyon and juniper forests and its twisting sandstone canyons." Roberts urges President Obama to "use his authority to set aside Cedar Mesa as a national monument."

National Park Service:

SCHUMER URGES NPS TO MOVE FORWARD IN ESTABLISHING HARRIET TUBMAN PARK IN AUBURN. The [Auburn \(NY\) Citizen](#) (4/12, 27K) reports that Sen. Chuck Schumer "doesn't want federal government bureaucracy to hold up the formal establishment of the Harriet Tubman National Historical Park." At a news conference Friday in Auburn, Schumer, urged the NPS "to finalize land agreements needed to officially establish the Tubman park." He said, "The authorization of the park took us years. We can't wait years again. That's the bottom line. We cannot let the Park Service drag its feet... NPS has to find a way to come to an agreement with local advocates. So I'm here today to tell the Park Service prioritize all of its resources and personnel necessary to get this done in a quick, timely manner in the spirit of Harriet Tubman."

Additional coverage was provided by the [New York \(NY\) Daily News](#) (4/12, Friedman, 3.79M) and the [Syracuse \(NY\) Post-Standard](#) (4/12, 438K).

ROCKY MOUNTAIN NATIONAL PARK CONSIDERING CROWD MEASURES. The [AP](#) (4/12, 2.28M) reports that "officials at Rocky Mountain National Park are considering closing certain areas of the park on the busiest days if those areas get overcrowded, saying too many people and vehicles are putting a burden on trails, roads and wildlife." The article notes that "the park had a record 3.4 million visitors last year, and officials have begun talking about ways to protect park resources." According to Rick Fedorchak, chief of interpretation and education, "too many people in the park can affect the trails, roads and wildlife, but they also can hinder the natural experience park users are seeking with crowds and noise."

Additional coverage was provided by the [Denver \(CO\) Post](#) (4/12, Reporter-Herald, 804K), the [Denver \(CO\) Post](#) (4/12, 804K), the [Colorado Springs \(CO\) Gazette](#) (4/12, 140K), and the [Washington \(DC\) Post](#) (4/11, Press, 5.17M).

CHERRY BLOSSOMS HIT PEAK BLOOM AHEAD OF PARADE, FESTIVAL. The [AP](#) (4/12, 2.28M) reports that "Washington's famous cherry blossoms have hit peak bloom ahead of this weekend's National Cherry Blossom Festival." The NPS says "the trees reached peak bloom Friday afternoon, a day ahead of what had been forecast. Saturday marks the culmination of the festival, which includes an annual parade and Japanese street festival."

Additional coverage was provided by [NPR](#) (4/13, 1.58M) and the [Washington Post](#) (4/9, Heim, 5.17M).

FIRST ANACOSTIA RIVER FESTIVAL CELEBRATED. [WJLA-TV](#) Washington (4/13, 12K) reports that "thousands packed Anacostia Park on Sunday afternoon for the first Anacostia River Festival." Jenny Anzelmo-Sarles, the spokesperson for the NPS, said, "We've put in a temporary dock where folks can try canoeing or kayaking or dragon boats. We have a fishing workshop for people if they want to learn to fish." She added, "Where we're standing is just steps away from the future 11th Street Bridge Park - it's a perfect location for all of our partners to get together right across from the Navy Yard on the other side of the river and bring these communities together."

NPS AWARDS GRANTS TO TRIBES FOR HISTORIC PRESERVATION EFFORTS. The [Riverton \(WY\) Ranger](#) (4/13, 167) reports that the NPS has "announced that \$8.78 million in grants will be allocated to 154 American Indian tribes to 'support their historic preservation offices in order to carry out national historic preservation program responsibilities on tribal lands.'" NPS Director Jonathan B. Jarvis said, "Engaging American Indian tribes in our national historic preservation program is essential to our nationwide effort to preserve significant tribal places, as well as tribal culture and tradition. For many tribes, languages and traditions are threatened with extinction and sacred places are endangered. This grant program provides much needed funding to protect the cultures of America's first people."

HUNTER ASKS HIGH COURT TO LIMIT NPS' POWER. The [Law 360](#) (4/12, 9K) reports that "an Alaska moose hunter has urged the U.S. Supreme Court to review a Ninth Circuit decision permitting the National Park Service to apply federal laws to non-federal lands inside parks, saying the appeals court misinterpreted a statute meant to restrict federal power to actually increase regulation on tribal, state and private lands." John Sturgeon argued that the NPS "wrongly barred him from using a hovercraft to hunt moose within the Yukon-Charley Rivers National Preserve in Alaska."

NPS HOLDS PUBLIC MEETING ON FUTURE OF DELAWARE WATER GAP NATIONAL RECREATION AREA. The [Pocono \(PA\) Record](#) (4/12, Writer, 43K) reports that the NPS will "have to sort through some conflicting public priorities as the agency's future visitor use management plan for the Delaware Water Gap National Recreation Area takes shape." The agency held a second public meeting Thursday on the plan at the Holiday Inn in Parsippany, New Jersey.

OLYMPIC NATIONAL PARK, LIBRARY PARTNER FOR POETRY WALKS. The [The Olympian \(WA\)](#) (4/11, 76K) reports that "the North Olympic Library System is teaming up with Olympic National Park this spring to offer a second season of poetry walks." According to the article, "this year's program will run through June 14, featuring poetry placed along four trails in the park."

NPS POLICE ON LOOKOUT FOR "TRASHERS" AT FORT MASON . [KGO-TV](#) San Francisco (4/12, 4K) reports that the NPS "police have added extra patrols at San Francisco's Fort Mason this weekend to keep people from trashing the area." The article notes that "the move comes after piles of trash were left strewn across the park during the warm weekend weather last month."

OLIVE SHRUBS THREATENING FLIGHT 93 MEMORIAL PARK. [KDKA-TV](#) Pittsburgh (4/11, 90K) reports that "after a destructive fire wiped out part of the Flight 93 Memorial in Shanksville, another threat looms over the park: Autumn Olive shrubs." The NPS says "the non-native shrubs are taking over the memorial park and threatening thousands of trees planted there." According to the article, "next week 35 volunteers, with the help of exotic plant management specialists, will remove the plants."

MAN CHARGED WITH ROBERT GOULD SHAW MEMORIAL VANDALISM. The [Boston Globe](#) (4/10, 1.03M) reports that "a 40-year-old Charlestown man was charged with vandalizing the Shaw Memorial on Boston Common on Friday morning, police said." Delvin Dixon "pleaded not guilty to a charge of malicious destruction to a memorial at his arraignment in Boston Municipal Court, Suffolk district attorney's office said."

GRIZZLY BEAR TRAPPING PLANNED IN REMOTE AREAS OF YELLOWSTONE. The [AP](#) (4/10, 2.28M) reports that "wildlife officials say bear researchers will be trapping grizzlies in Yellowstone National Park over the next several months." According to the article, "members of an inter-agency study team will bait and trap the bears at remote sites in the park."

NPS AWARDS FUNDS FOR DATA GATHERING AT ROCKY MOUNTAIN NATIONAL PARK. The [Loveland \(CO\) Reporter-Herald](#) (4/13, 51K) reports that the NPS "announced this week it intends to award a \$236,000 cooperative agreement to Colorado State University for an intermountain west data warehouse."

NPS ACCEPTING PUBLIC REQUESTS FOR YELLOWSTONE FIREWOOD COLLECTION PERMITS. The [AP](#) (4/12, 31K) reports that the NPS will be accepting public requests for firewood collection permits to be issued this year at Yellowstone National Park.

ADDITIONAL COVERAGE OF "FIND YOUR PARK" CAMPAIGN. Additional coverage of the "Find Your Park" campaign was provided by [Fox News](#) (4/10, 8.25M), the [Lakeland \(FL\) Ledger](#) (4/11, 145K), the [Superior \(WI\) Telegram](#) (4/12, 1K), and [EDGE Boston](#) (4/12, 1K).

ADDITIONAL COVERAGE OF CIVIL WAR ANNIVERSARY. Additional coverage of the events marking the end of the Civil War was provided by [NPR](#) (4/12, 1.58M).

ADDITIONAL COVERAGE OF 150TH ANNIVERSARY OF LINCOLN ASSASSINATION. Additional coverage of the 150th anniversary of assassination of Lincoln was provided by the [Washington \(DC\) Post](#) (4/10, Ruane, 5.17M), [Forbes](#) (4/10, 6.54M), and the [Los Angeles \(CA\) Times](#) (4/12, 3.49M).

ADDITIONAL COVERAGE OF COMPLAINT BY FEDERAL CONTRACT WORKERS. Additional coverage of the complaint by federal contract workers was provided by the [National Journal](#) (4/12, Subscription Publication, 111K) and the [Washington \(DC\) Post](#) (4/10, Depillis, 5.17M).

MORE STUDY OF CRATERS OF THE MOON NATIONAL PARK PROPOSAL URGED. In an op-ed for the [Idaho Press Tribune](#) (4/12, 6K), Frank Priestley, president of the Idaho Farm Bureau, calls for "a more thorough investigation of the proposal" to "change the name of Craters of the Moon National Monument to National Park." Priestley questions whether "swapping the word 'Monument' for the word 'Park' on a sign really changes anything."

Bureau of Land Management:

BUNDY, SUPPORTERS MARK STANDOFF ANNIVERSARY. The [AP](#) (4/10, Ritter, 2.28M) reports that "a year since a tense standoff between a Nevada rancher's armed supporters and federal land managers, Cliven Bundy's cattle still roam public lands, more than \$1.1 million worth of grazing fees have yet to be paid and Bundy has become a tea party celebrity in the West." On Friday, "campers arrived in motor homes and tents for a three-day event on and around the Bundy melon farm and cattle ranch outside Bunkerville" to mark the anniversary. BLM spokeswoman Celia Boddington released a statement Friday saying "the agency 'remains resolute' in its goal to resolve the Bundy cattle dispute administratively and judicially."

Ap, 5.17M), the [Washington \(DC\) Times](#) (4/10, Ritter, 644K), the [Denver \(CO\) Post](#) (4/12, Ritter, 804K), the [Los Angeles \(CA\) Times](#) (4/12, Glionna, 3.49M), the [Las Vegas \(NV\) Review-Journal](#) (4/12, 398K), the [Portland \(ME\) Press Herald](#) (4/12, 159K), the [Government Executive](#) (4/12, 4K), [WSEE-TV Erie \(PA\)](#) Erie, PA (4/12, 1K), [WJBK-TV Detroit \(MI\)](#) Detroit (4/12, 253K), [KSTU-TV Salt Lake City \(UT\)](#) Salt Lake City (4/10, 166K), and [WGHP-TV High Point \(NC\)](#) High Point, NC (4/10, 389K).

BLM OFFICERS CLEARED IN DEATH OF MAN OUTSIDE VEGAS. The [AP](#) (4/10, 2.28M) reports that two BLM officers have been “cleared in the shooting death of a man who entered a state trooper’s patrol cruiser during a highway confrontation outside Las Vegas in February 2014.” Clark County District Attorney Steve Wolfson said in a statement Friday that “the actions taken by BLM Ranger Meagen Martin and Agent Brian Loftin in the slaying of D’Andre Berghardt Jr. were reasonable and legally justified.”

Additional coverage was provided by the [Las Vegas \(NV\) Sun](#) (4/10, 155K).

BLM TO HOLD MEETING ON SAGE-GROUSE. The [Jackson Hole \(WY\) News & Guide](#) (4/12, 1K) reports that the BLM “wants people who are interested in sage grouse to pack a lunch and bring their best ideas for future sage-grouse mitigations on the Pinedale Anticline, due to 2014 counts that reflect a drop in the number of leks or the number of birds returning to those mating areas.” The article notes that “the number of active leks — areas where birds gather during mating season — has dropped below expected thresholds in the Duke’s Triangle complex, according to the BLM.”

DESPITE PROTESTS, BLM RETURNS WILD HORSES TO RANGE. The [AP](#) (4/13, 22K) reports that “despite the protests of a rural county and rancher, the U.S. Bureau of Land Management has returned some 160 wild horses to the range in central Nevada.” The bureau “returned the horses to the Fish Creek Herd Management Area near Eureka on Tuesday after being cleared to do so by the Interior Board of Land Appeals.” The agency “originally had planned to return some 100 mares treated with a fertility control vaccine and 80 studs to the HMA on Feb. 20.”

Additional coverage was provided by the [KTVN-TV Reno \(NV\)](#) Reno, NV (4/13, 2K), [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (4/13, 1.07M), and [KOLO-TV Reno \(NV\)](#) Reno, NV (4/13, 3K).

COLORADO SUPREME COURT UPHOLDS SAN MIGUEL RIVER INSTREAM FLOWS. The [Telluride \(CO\) Daily Planet](#) (4/12, 11K) reports that “the Colorado Supreme Court this week ruled in favor of a Colorado Water Conservation Board decision to protect a minimum instream flow in the San Miguel River in order to ensure the survival of three sensitive fish species as well as to preserve what the agency called “globally imperiled riparian communities.”” Officials at the BLM and the Colorado Department of Wildlife “requested the instream flow protections in 2008.”

INPUT SOUGHT ON MANAGEMENT OF TRINIDAD HEAD LIGHTHOUSE. The [Eureka \(CA\) Times Standard](#) (4/11, 56K) reports that the BLM “now has the final say on how the Trinidad Head lighthouse.” The U.S. Coast Guard “transferred the 144-year-old lighthouse to public ownership in 2014, with the BLM charged with managing the facility and the surrounding 13 acres.” the article notes that “the comment period for BLM’s management plan opens Wednesday and continues through May 31.”

BLM, TRAILS ASSOCIATION CELEBRATE COMPLETION OF MOUNTAIN BIKE TRAIL NETWORK. The [St. George \(UT\) News](#) (4/12, 3K) reports that “crowds of mountain bikers gathered on Saturday at the upper parking lot for the JEM trail just off state Route 59 near Hurricane to celebrate the completion of new single track trails in the Hurricane Cliffs trail network.” The article notes that “the trail completions represent a two-year (and ongoing) collaboration between the Bureau of Land Management St. George Field Office and the Dixie Mountain Bike Trails Association – the Southern Utah chapter of the International Mountain Bicycling Association, whose mission is to create, enhance and preserve trails for mountain bikers around the world.”

Fish and Wildlife Service:

FEDERAL REVIEW OF CANADA LYNX TO TAKE LONGER THAN EXPECTED. The [AP](#) (4/12, Sharp, 1.37M) reports that the FWS is “applying a new threat assessment for federally protected Canada lynx from Maine to Washington State, delaying completion of the first five-year review.” The article notes that “the structured threat assessment will involve several other agencies, at least 15 states and more than 20 Native American tribes.” According to Jim Zelenak of the FWS in Montana, “the resulting assessment will serve as the basis of a streamlined five-year review, and a recovery plan if one is necessary.”

Additional coverage was provided by the [Valley News \(VT\)](#) (4/12, 11K), the [Houston \(TX\) Chronicle](#) (4/12, Sharp, 2.28M), and the [Montana Kairmin](#) (4/12, 11K).

FWS FACES DECISION ON SAGE GROUSE. The [Denver Post](#) (4/12, Finley, 804K) reports that the FWS faces a September 30 deadline on its sage grouse decision. Noreen Walsh, regional director of the FWS, said, “We need to avoid things that carve up habitat. Sage grouse are sensitive to disturbances and fragmentation. We have to have strong and certain measures to show that those biggest threats are reduced.”

Additional coverage of the effort to save the sage grouse was provided by the [Denver Post](#) (4/12, Matthews, 804K) and [Audubon Magazine](#) (4/12, 1.51M).

ARKANSAS FORESTRY ASSOCIATION WON’T OPPOSE BAT RULE. The [Hope \(AR\) Star](#) (4/11, 9K) reports that “the Arkansas Forestry Association says it can live with a recent U.S. Fish and Wildlife Service decision to list the northern long-eared bat as a threatened species while allowing most forest management practices to continue unabated.” Max Braswell, executive vice president of the Arkansas Forestry Association, said, “From our perspective a threatened listing is obviously more palatable than an endangered listing. We don’t think (the listing) will have a significant impact on us, but we will continue to be vigilant.”

Also reporting on the story is the [Arkansas News](#) (4/12, 781).

Additional coverage was provided by [NPR](#) (4/11, 1.58M) and [KPLU-FM Tacoma \(WA\)](#) Tacoma, WA (4/12, 15K).

FWS PROPOSES MEASURES TO FACILITATE RECOVERY OF ENDANGERED BLACK-FOOTED FERRETS IN WYOMING. The [AP](#) (4/10, Gruver, 2.28M) reports that “federal officials have a new plan to encourage more landowners in Wyoming to allow reintroduction of black-footed ferrets on their property.” According to the article, “under the program, people who host black-footed ferrets on their land anywhere in Wyoming would not be held responsible if they ever inadvertently harmed any ferrets.” The FWS is “taking comments on the plan until June 9.”

FWS CONSIDERING REGULATIONS FOR MIGRATORY GAME BIRDS. [The Hill](#) (4/10, Wheeler, 224K) reports that the FWS is “considering a rule that would establish annual regulations for certain migratory game birds for the 2015-2016 hunting season.” The article notes that “the rule-making applies to ducks, sea ducks, mergansers, Canadian geese, white-fronted geese, brant, snow and Ross’s geese, swans, sandhill cranes, coots, moorhens and gallinules, rails, snipe, woodcock, band-tailed pigeons, doves and falconry.”

PROVO RIVER DELTA RESTORATION PROJECT WOULD HELP ENDANGERED UTAH FISH. The [AP](#) (4/13, 51K) reports that “the habitat for an endangered fish species found naturally only in Utah Lake and the Provo River would be improved under a plan endorsed by state and federal officials.” According to the article, “the final environmental impact statement for the Provo River Delta Restoration Project, released Friday, evaluates three alternatives for restoring the lower river and creating suitable habitat for the June sucker.” The article notes that “the preferred alternative by the U.S. Interior Department, Central Utah Water Conservancy District and Utah Reclamation Mitigation and Conservation Commission would minimize the amount of private agricultural land acquired by the government while “providing adequate space for a naturally functioning river delta and sufficient habitat enhancement” to save the fish, according to the document.”

NEOSHO HATCHERY JOINS EFFORT TO SAVE TOPEKA SHINERS. The [AP](#) (4/10, Hinga, 2.28M) reports that in the next couple of months, Topeka shiners are “expected to start spawning” at the Neosho National Fish Hatchery. The article notes that “the fish are newcomers.. brought in as part of a partnership among agencies to help build the population of the endangered species back up and help stock the fish to a sustainable level in the wild.” According to the article, “about adult 200 Topeka shiners arrived last month at the Neosho hatchery and were placed in their new habitat.”

FWS WORKING TO CONSERVE LAMPREY POPULATION. The [New York Times](#) (4/13, Brown, Subscription Publication, 9.97M) reports that “once bountiful, the lamprey population has declined significantly throughout Northern California, with the fish now gone from about 55 percent of their original habitat, said Damon H. Goodman, a fish biologist with the federal Fish and Wildlife Service who is working to conserve them.” The article notes that “impassable dams that also affect water levels are a major cause, he said, including six on the main stem of the Klamath.”

STUDY RECOMMENDS PROTECTIONS FOR OZARK CAVEFISH. The [Northwest Arkansas Online](#) (4/12) reports that “a new study says the endangered Ozark cavefish and residential development can co-exist in the Cave Springs area if steps are taken to protect water flowing underground where the fish live.” According to the article, “the new study recommends local cities enact regulations to allow development and protect the spring and cavefish.”

FWS CONSIDERING PROTECTIONS FOR TWO WEST VIRGINIA CRAYFISH SPECIES. The [Charleston \(WV\) Daily Mail](#) (4/12, 53K) reports that the FWS is “considering

River in Wyoming County.”

CONSERVATION GROUP QUESTIONS ACCURACY OF IDAHO WOLF NUMBERS. The [AP](#) (4/12, Ridler, 2.28M) reports that “Idaho officials are overestimating the number of wolves in the state for a number reasons including relying on sightings by hunters rather than using only trained professionals, a conservation group said.” Andrea Santarsiere, an attorney with the Center for Biological Diversity, said, “Since 2009 more than 1,300 wolves have been hunted or trapped in Idaho, and another nearly 500 have been lethally removed from Idaho’s landscape. In the face of these astounding numbers, it’s no wonder that Idaho may have experienced a nearly 50 percent drop in breeding pairs.”

CONTINUING COVERAGE OF EFFORT TO SAVE MONARCH BUTTERFLY. The [New Yorker](#) (4/12, 4.4M) reports that “back in February, the Obama Administration committed \$3.2 million toward saving the monarch butterfly.” Also, “last week, the agrochemical giant Monsanto pledged four million dollars to monarch-saving efforts, most of it going to the National Fish and Wildlife Foundation.” The article also notes that “the totemic orange-and-black North American butterfly is the cause célèbre of Barbara Kingsolver’s 2012 novel, ‘Flight Behavior,’ which happens to feature a tall, thin, Harvard-educated, African-American scientist named Ovid Byron, who bears a striking resemblance to the President, down to his inverted initials.”

ADDITIONAL COVERAGE FWS CONSIDERING PROTECTIONS FOR YELLOW CEDAR, CLEAR LAKE HITCH. Additional coverage that the FWS is considering protections for the yellow cedar and the Clear Lake hitch was provided by the [Los Angeles Times](#) (4/10, Ganga, 3.49M) and the [Santa Rosa \(CA\) Press Democrat](#) (4/12, 168K).

US Geological Survey:

USGS STUDY SAYS CLIMATE CHANGE POSES NEW RISK TO SAGE GROUSE IN WYOMING. The [AP](#) (4/13) reports that “government scientists say a warming climate could significantly reduce the amount of greater sage grouse habitat in portions of Wyoming, a key stronghold for the troubled bird species.” USGS scientists said “a warming climate could become an even greater risk, reducing nesting habitat by 12 percent by 2050.”

Additional coverage was provided by the [Columbus \(IN\) Republic](#) (4/13, 81K) and the [Houston \(TX\) Chronicle](#) (4/13, 2 28M).

APP COULD HELP PREDICT EARTHQUAKES. The [Daily Mail \(UK\)](#) (4/12, 4.78M) reports that “researchers have created an app that uses hundreds of mobile phones to predict earthquakes.” The USGS “hopes to create new types of crowdsourced early warning systems using the technology.” According to the article, “the team tested the system using data from previous earthquakes, and found that it only took a few thousand people in a major city running the app to give accurate predictions.”

Additional coverage was provided by [Reuters](#) (4/10), the [Christian Science Monitor](#) (4/10, 380K), and the [Los Angeles \(CA\) Times](#) (4/11, Netburn, 3.49M).

STUDY SAYS PERMAFROST CARBON RELEASE WILL BE GRADUAL. The [AP](#) (4/10, Joling) says a report in the journal Nature has found that “frozen Arctic and sub-Arctic soil that thaws from global warming will add substantial amounts of carbon to the atmosphere in the form of greenhouse gases, accelerating climate change the rest of the century,” but “it won’t come in a sudden burst.” A review by experts “concludes that harmful carbon dioxide and methane generated by microbes digesting thawed plant and animal material will instead enter the atmosphere gradually.” But according to USGS researcher Dave McGuire, it is a source of carbon source that should not be ignored. McGuire said, “The estimates that we came up in this synthesis suggest that throughout the rest of this century, it could be on the order of the magnitude of what tropical deforestation currently affects the global carbon cycle.”

Securing America’s Energy Future:

Renewable Energy:

FWS SAYS LACKS PRIVATE WIND FARM JURISDICTION. [Reuters](#) (4/10) reports that the FWS is claiming it has no authority to regulate a wind farm in Michigan, which a homeowner group argues in a federal lawsuit will kill vulnerable birds and bats. The agency on April 3 asked the U.S. District Court for Western Michigan to dismiss the agency from the lawsuit.

Onshore Energy Development:

FEDERAL JUDGE BLOCKS MINING IN NAVAJO MINE EXPANSION AREA. The [AP](#) (4/12, 81K) reports that “a federal judge has blocked efforts by a Navajo Nation coal mine to expand operations within its permitted area in northwestern New Mexico.” Navajo Transitional Energy Co. LLC is “seeking an emergency stay on the ruling by U.S. District Court Judge John Kane in Colorado.” The firm says “the ruling will not affect supply to the Four Corners Power Plant in the immediate future but jeopardizes its long-term sustainability.”

Additional coverage was provided by the [Durango \(CO\) Herald](#) (4/8, 28K), the [Farmington \(NM\) Daily Times](#) (4/12, 49K), the [Albuquerque \(NM\) Journal](#) (4/12, 238K), the [Houston \(TX\) Chronicle](#) (4/10, Fonseca, 2.28M), and [KOLD-TV Tucson \(AZ\)](#) Tucson, AZ (4/12, 21K).

NEW FRACKING RULE CRITICIZED. In an op-ed for the [Casper \(WY\) Star-Tribune](#) (4/13, 90K), Gov. Matt Mead writes that the new fracking rule proposed by the Interior Department not “late, it adopts a one-size-fits-all approach.” He argues that “such an approach coming from Washington, D.C. – thousands of miles from the activity taking place here – does not work for Wyoming.” Mead suggests that “a better course would be for the federal government to defer to states like Wyoming that have assumed leadership and work with those states that might need to strengthen and update rules and regulations.”

Additional coverage of the new fracking rule was provided by the [Oil and Gas Online](#) (4/12) and [Public Radio International](#) (4/12, 3K).

OIL INDUSTRY CRITICIZED FOR COMPLAINING ABOUT SAGE GROUSE SCIENCE. For the “Pundits” blog of [The Hill](#) (4/11, Molvar, Contributor, 224K), Erik Molvar, who directs the Sagebrush Sea Campaign for WildEarth Guardians, writes that “in the latest salvo in a war against science, the Western Energy Alliance joined other oil industry interests and a smattering of county governments to launch three complaints against scientific reports on sage grouse, claiming they don’t meet scientific standards.” However, “the scientific results are in, and it’s unanimous: Traditional oil and gas development is incompatible with the survival of sage grouse populations.” He says that “now that an overwhelming avalanche of science has demonstrated that the oil and gas industry lies at the root of an ecological collapse across the Rockies (with the sage grouse as Exhibit A), federal laws have been triggered requiring conservation efforts to be based on science, and something has to change.”

RULES TO CUT METHANE RELEASES SUPPORTED. In an op-ed for the [Albuquerque \(NM\) Journal](#) (4/12, 238K), Thomas Singer, Senior Policy Adviser, Western Environmental Law Center, writes that “oil and gas operations are responsible for the lion’s share of methane in the Four Corners.” He supports “rules to require the oil and gas industry to remedy leaks in old equipment, use state-of-the-art technologies in new operations and end sloppy practices.” Singer argues that “these new rules will make sure that all oil and gas companies take sensible action to reduce methane waste and pollution.”

BLM URGED TO DO MASTER LEASING PLAN. In an op-ed for the [Durango \(CO\) Herald](#) (4/12, 28K), Shelley Silbert, executive director, Great Old Broads for Wilderness, writes that she was “encouraged to learn that Connie Clementson, Bureau of Land Management’s Tres Rios Field Office manager, recently committed to putting a Master Leasing Plan back on the table for southwest Colorado.” According to Silbert, “if done right, an MLP allows for an in-depth review before issuing new oil and gas leases and stipulations, and leases could be deferred in areas within the MLP boundaries at least until the review is complete.”

Offshore Energy Development:

OBAMA ADMINISTRATION MOVES TO FULL REVIEW OF SHELL’S ARCTIC DRILLING PLAN. On Friday, “the Obama administration formally kicked off its full review” of “Shell’s application to restart oil and natural gas drilling in the Arctic Ocean,” [The Hill](#) (4/11, Cama, 224K) reported. The company “hopes to drill an exploratory well this summer in the Chukchi Sea north of Alaska, and it has a lease on the area’s drilling rights.” On Friday, the Interior Department’s Bureau of Ocean Energy Management (BOEM) revealed “that it completed its preliminary review of Shell’s March 31 application and determined that it can move on to full review.”

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (4/10, Thiessen, 2 28M), the [Washington \(DC\) Post](#) (4/10, Mark Thiessen |, Ap, 5.17M), the [Sarasota \(FL\) Herald-Tribune](#) (4/12, 157K), the [Seattle \(WA\) Post-Intelligencer](#) (4/10), the [Anchorage \(AK\) Dispatch News](#) (4/10, 146K), the [Juneau \(AK\) Empire](#) (4/12, 14K), the [FuelFix](#) (4/10, 7K), the [Maritime Executive](#) (4/12, 21), the [Natural Gas Intelligence](#) (4/12), [Oil and Gas Journal](#) (4/12, 1K), [Reuters](#) (4/10), and [KTUU-TV Anchorage \(AK\)](#) Anchorage, AK (4/12, 56K).

HEARING HELD ON SEISMIC TESTING. The [Carteret County \(NC\) News-Times](#) (4/12, 28K) reports that “the N.C. Department of Environment and Natural Resources has

Civic Center to get comments on the proposals to survey filed by Spectrum Geo Inc., GX Technology, CGG Services and TGS." The article notes that "most of the 19 speakers at the hearing were opposed to surveys off the coast, particularly environmentalists, marine scientists and coastal residents."

The [Myrtle Beach \(SC\) Online](#) (4/12, 24K) editorializes that "the cities of Myrtle Beach and North Myrtle Beach, the towns of Surfside Beach and Atlantic Beach and Horry County government should have joined 20 communities in the Carolinas, including Charleston, and gone on record against offshore oil production." According to the paper, "it's perfectly obvious to many people that pumping crude oil offshore in the Atlantic Ocean is not a good match for a tourism economy so it's troubling that local governments did not speak out for the environment – and the area economic mainstay – when they had an opportunity." The editorial argues that "potable water and clean electricity from offshore winds, in addition to many valid environmental concerns, should trump discussion of offshore oil."

Additional coverage of offshore drilling was provided by the [Charleston \(SC\) Moultrie News](#) (4/10).

GREENPEACE ACTIVISTS LEAVE SHELL ARCTIC DRILL RIG. The [AP](#) (4/13, Johnson) reported that on Saturday Greenpeace said the six activists who boarded a Shell drilling rig bound for Seattle abandoned it after six days due to rough seas. The protestors first climbed aboard the Transocean-owned Polar Pioneer on Monday about 750 miles to the northwest of Hawaii. The protestors' decision to leave the vessel came as US District Court Judge Sharon Gleason granted Shell a restraining order against them on Saturday. [Reuters](#) (4/12, Dobuzinskis) also covered the story.

Tackling America's Water Challenges:

MAJOR CHANGES TO ENVIRONMENTAL RESTORATION COULD ENDANGER BAY DELTA CONSERVATION PLAN. The [Contra Costa \(CA\) Times](#) (4/12, By Paul Rogers Progers@mercurynews.com ©, 2015, Group, 310K) reports that "Gov. Jerry Brown has billed his \$25 billion plan to build two massive tunnels under the Delta as a way to not just make it easier to move water from north to south, but also increase the reliability of water supplies and bring back salmon and other endangered species." However, "now the Brown administration is proposing a major and politically risky change: dropping a 50-year guarantee to restore the Sacramento-San Joaquin River Delta's environment." The article notes that "the dramatic course correction, whose details have not yet been made public, comes after biologists at the U.S. Fish and Wildlife Service and other federal agencies told the state they won't issue permits for the environmental plan."

Additional coverage was provided by the [San Francisco \(CA\) Chronicle](#) (4/13, 2.21M), the [Houston \(TX\) Chronicle](#) (4/13, 2.28M), and the [San Jose \(CA\) Mercury News](#) (4/13, Press, 936K).

WATER FROM CALIFORNIA DELTA'S MYSTERIOUSLY DISAPPEARING. The [AP](#) (4/12, Smith, 2.28M) reports that "as California struggles with a devastating drought, huge amounts of water are mysteriously vanishing from the Sacramento-San Joaquin Delta — and the prime suspects are farmers whose families have tilled fertile soil there for generations." According to the article, "a state investigation was launched following complaints from two large agencies that supply water to arid farmland in the Central Valley and to millions of residents as far south as San Diego."

WSJournal: Farmers Receiving Unfair Blame For California's Water Crisis. In an editorial, the [Wall Street Journal](#) (4/11, Subscription Publication, 5.67M) says farmers are unfairly blamed for using too much of California's water supply. According to the Journal, the state's farmers have already been forced to cutback on water use.

OCEAN DESALINATION PLANTS BEING STUDIED, BUILT BY MANY CALIFORNIA COASTAL CITIES. The [New York Times](#) (4/12, Gillis, Subscription Publication, 9.97M) reports on the new push in California for water desalination plants as part of the solution to the state's extreme water drought. The story says a \$1 billion desalination on San Diego County is under construction and due to open as early as Nov. 2015, "providing a major test of whether California cities will be able to resort" to the Pacific Ocean to relieve their water woes. The Times adds that other small ocean desalination plants are already running in a handful of California municipalities and others are planned, including a large plant in Orange County and a possible re-opening of a mothballed plant in Santa Barbara. The story says "more than a dozen communities along the California coast are studying the issue."

IRRIGATION DISTRICTS ANNOUNCE STANISLAUS RIVER DEAL. The [Calaveras \(CA\) Enterprise](#) (4/12, 18K) reports that "the South San Joaquin and Oakdale irrigation districts Thursday afternoon announced they had reached a possible deal with federal and state authorities for managing the remaining water in New Melones Reservoir through the summer." According to the districts, "the deal would set a target of keeping 150,000 acre feet of water in New Melones when the irrigation season ends on Sept. 30."

NORTH DAKOTA OFFICIALS EXPECT NORTHWEST AREA WATER SUPPLY LEGAL BATTLE TO DRAG ON. The [AP](#) (4/10, Nicholson, 2.28M) reports that "North Dakota officials believe a federal study of a large Missouri River water project in the state has adequately addressed fears of environmental harm in the state of Missouri and the Canadian province of Manitoba." However, "they're still resigned to the likely continuation of a drawn-out legal fight that has already delayed the Northwest Area Water Supply project for more than a decade." The final environmental report released by the BOR "this week calls for the addition of filtration to previously recommended river water treatment methods of chlorination and ultraviolet disinfection." It also "concludes NAWS would use less than 1 percent of the storage capacity in the Missouri River basin, and that potential effects of climate change on the river would more than offset project water withdrawals."

Empowering Native American Communities:

STANDING ROCK LANDOWNERS SENT BUY-BACK OFFERS. The [Rapid City \(SD\) Journal](#) (4/12, 101K) reports that "more than 16,000 landowners with fractional interests in land at the Standing Rock Indian Reservation in North Dakota and South Dakota are receiving buy-back offers." The Interior Department says that "nearly \$200 million in purchase offers are in the mail."

Also providing coverage are the [Nation Sun News](#) (4/12) and the [Native News Online](#) (4/12).

INTERIOR TRANSFERS MORE THAN \$12 MILLION TO COBELL EDUCATION SCHOLARSHIP FUND. The [Native News Today](#) (4/3) reports that the Interior Department announced it has transferred more than \$12 million to the Cobell Education Scholarship Fund.

Also providing coverage are [NPR](#) (4/12, 1.58M) and the [Cherokee \(OK\) Phoenix](#) (4/12, 442).

INTERIOR AGENCIES TO HOLD FORUM ON NATIVE TRUST LANDS. The [Missoulian \(MT\)](#) (4/7, 113K) reports that the Interior Department officials, including representatives from the Office of Natural Resources Revenue, the Bureau of Indian Affairs, the Bureau of Land Management and the Office of the Special Trustee for American Indians, will hold a forum on Thursday, April 16, at the Payne Family Native American Center on the campus of the University of Montana for Native American land owners. According to the article, "the forum is for individual Native Americans property owners whose land is held in trust by the federal government, and is open to anyone who falls into that category, regardless of what tribe they belong to or where their allotment is located."

WATER COMPACT DISCUSSED AT CONFEDERATED SALISH AND KOOTENAI TRIBES QUARTERLY MEETING. The [Ronan Valley \(MT\) Journal](#) (4/12, 22K) reports that "the Water Compact and methamphetamine abuse cropped up many times at the Confederated Salish and Kootenai Tribes quarterly meeting on April 3." CSKT attorney Rhonda Swaney "updated the membership on the progress of the Water Compact." She said that "it has passed through the Montana Senate and is now in the Montana House of Representatives Judiciary committee."

Top National News:

KERRY MAKES CASE FOR IRAN FRAMEWORK, URGES CONGRESSIONAL CRITICS TO "HOLD THEIR FIRE." Secretary of State Kerry appeared on three Sunday morning talk shows, primarily to discuss the Iran nuclear framework. The 2016 presidential race dominated most of the shows – CNN's State Of The Union, for example, dedicated its entire broadcast to the presidential contest – but Iran was the main foreign policy topic Sunday morning. On [CBS' Face The Nation](#) (4/12, Schieffer, 2.64M), Kerry said he will brief lawmakers this week on the details of the framework, but stressed, "Everything I have laid out is a fact, and I will stand by them. In the end, it is really the final agreement that will determine it. ... It is also important to note that we have two-and-a-half more months to negotiate, so this is not finalized." Kerry similarly said on [NBC's Meet The Press](#) (4/12, Todd, 3.08M), "What we're looking for is not to have Congress interfere with our ability, inappropriately, by stepping on the prerogatives...of the President, and putting in place conditions and terms that are going to get in the way of the implementation of a plan."

Asked on [ABC's This Week](#) (4/12, Stephanopoulos, 2.73M) about discrepancies in public statements by the Administration and Tehran about the framework, Kerry said, "Yesterday, the Russians issued a statement saying... the facts, as expressed by the United States, are reliable and accurate information. You can go back to the interim agreement. We had the same kind of dueling narratives," but "when it came time to implement the agreement, the agreement that was implemented was the agreement we had articulated and it was the agreement that was kept. Iran has lived up to and lived by every requirement in the agreement. I'll let the facts speak for themselves."

The [AP](#) (4/13) reports Kerry is urging congressional opponents of the deal "to 'hold their fire' until they see a final agreement." Kerry will hold private meetings with House members on Monday and senators on Tuesday. [Reuters](#) (4/13, Cornwell) reports that Kerry defended the framework and said sanctions would not be lifted all at once despite Iranian demands. [Politico](#) (4/12, Warmbrodt, 669K) reports Kerry also responded to Sen. John McCain calling him "delusional" about Iran, saying on ABC, "I think President Obama spoke very, very powerfully to Sen. McCain yesterday, and I'll let the President's words stand."

The [Wall Street Journal](#) (4/13, Subscription Publication, 5.67M) says in an editorial that the President showed annoyance by his reaction to McCain's remarks, continuing a trend toward unilateral action by the White House in setting foreign policy and a tendency to call critics warmongers.

Jackson Diehl writes in his [Washington Post](#) (4/13, 5.17M) column, "The weakest point in President Obama's defense of his deal with Iran is his claim that 'it is a good deal even if Iran doesn't change at all.' ... By Obama's own account, in 13 or 14 years Iran will reemerge as a threshold nuclear state with a breakout time 'almost down to zero.' It will still seek domination of the Middle East and the elimination of Israel, but with far greater resources and the capability to build a nuclear weapon at any time of its choosing."

Charles Lane said on [Fox News Sunday](#) (4/12, Wallace, 628K), "You can't trust them. The Administration's response is, 'Don't worry, he is a liar. He doesn't really mean what he just said.' And I think the serious point here is that when the Ayatollah does this, what he does is he moves the goal posts back a little bit and he's trying to leverage further concessions from the Administration just to get the Administration back to the point where it thought it already was at the end of the talks in Switzerland."

Peggy Noonan said on [CBS' Face The Nation](#) (4/12, Schieffer, 2.64M), "All of this is the result of the trust that never developed over six years between the President and the Congress. This is yet another playing out of 'we think we have a good possible deal, frankly we are skeptical of you. We don't think you do good deals, and if they are not good, we feel you would not tell us.' It is the divide that has run for more than six years playing out again."

George Will said on [Fox News Sunday](#) (4/12, Wallace, 628K), "If the Ayatollah means what he says, then the framework agreement is 98% framework and two percent agreement, because the sanctions and the inspections are the heart of the ongoing negotiations between now and the end of June."

Fareed Zakaria said on [CNN's Fareed Zakaria GPS](#) (4/12, 410K) that the framework "appears to strike a balance for Iran. There's no guarantee that the Supreme Leader will accept the trade-offs, as his recent tweets remind us, but it forces him to make a rational calculation and live with the consequences."

Moniz Says Agreement "Built For The Long Term." Energy Secretary Moniz writes in a [Washington Post](#) (4/13, 5.17M) op-ed that the "key parameters" for the framework "provide a technically sound path for certifying Iran's nuclear program as peaceful, quickly determining if it is not and providing the breathing room needed to respond appropriately." Moniz says the agreement "is not for 10, 15 or 20 years; it is a phased agreement built for the long term. And if Iran earns the international community's confidence in its peaceful objectives over this extended period, then the constraints will ease in phases."

Corker Bill Expected To Advance This Week. The [New York Times](#) (4/13, Weisman, Steinhauer, Subscription Publication, 9.97M) reports the Senate Foreign Relations Committee is expected to advance Chairman Bob Corker's legislation to require congressional approval of a final Iran agreement this week. The Times says the Obama Administration, "at the very least, wants Congress to hold off on any legislative action" until the June deadline for a final accord. Committee members "talked throughout the weekend in search of a midpoint between congressional prerogative and executive branch desires for them to stand down, without fundamentally altering the bill."

[Politico](#) (4/12, Everett, 669K) says that while the Corker bill has significant support, it does not seem to have quite enough to overcome a likely Obama veto, so Corker "may make a deal" with Foreign Policy ranking Democrat Sen. Ben Cardin on amendments. Politico says Corker, "who has a penchant for seeking deals across the aisle, must balance Democratic concerns that the bill usurps presidential prerogatives" with GOP demands for a strong bill.

Sen. Robert Menendez said on [Fox News Sunday](#) (4/12, Wallace, 628K), "I do believe that...Congress [has] a rightful role...to have a say on whatever a final agreement is." He later added, "This is simply a review process. ... There may or may not be a vote. But at least, after 2 1/2 years of negotiation, Congress should have 60 days to be able to review probably the most significant nuclear nonproliferation agreement of our times."

Sen. Rand Paul said on [CBS' Face The Nation](#) (4/12, Schieffer, 2.64M), "The biggest problem we have right now is that every time there is a hint of an agreement the Iranian foreign minister tweets out... that the agreement doesn't mean what our government says it means," which "is very, very damaging to the American public." Asked if he wants a deal, Paul said, "I want a good deal." On [NBC's Meet The Press](#) (4/12, Todd, 3.08M), Paul said, "I think there are good things in it. I'm not one of the Republicans who will say, oh, because the President is a Democrat, I'm never going to say he can't do anything good. But I also realize that negotiations have to be from a position of strength."

Netanyahu Says Sanctions Must Remain In Place. The [AP](#) (4/13) reports Israeli Prime Minister Benjamin Netanyahu said Sunday that sanctions against Iran must remain in place, and that a better nuclear deal "would tie the lifting of all sanctions 'to an end of Iran's aggression in the region, its worldwide terrorism and its threats to annihilate Israel.'"

Iranian Media Says American Reporter Accused Of "Espionage." The [AP](#) (4/13, Dareini) reports Washington Post reporter Jason Rezaian, who has been held in Iran since last July, "is accused of 'espionage' and 'acting against national security,' the semiofficial Fars news agency reported Sunday." The report "did not elaborate on the source of the information." Tehran has said previously that Rezaian "is facing 'security' charges and that he will stand trial before the Revolutionary Court – which mainly hears sensitive cases involving national security."

The [Washington Post](#) (4/13, Morello, 5.17M) reports that its executive editor Martin Baron "called the espionage allegation 'absurd.'" Baron said, "Any charges of that sort would be absurd, the product of fertile and twisted imaginations. We are left to repeat our call on the Iranian government to release Jason and, in the meantime, we are counting on his lawyer to mount a vigorous defense."

Saudis Call On Iran To Stop Aiding Houthis In Yemen. The [New York Times](#) (4/13, Fahim, Subscription Publication, 9.97M) reports Saudi Arabian Foreign Minister Prince Saud al-Faisal accused Iran "of meddling in Yemen" on Sunday and "pointedly dismissed Iranian appeals for the Saudis to end their bombing campaign." [AFP](#) (4/13, Timberlake, 5.81M) reports al-Faisal "urged Tehran not to 'assist the criminal activities'" of Houthi rebels but "insisted 'we are not at war with Iran.'"

Meanwhile, the [Wall Street Journal](#) (4/13, Nissenbaum, Subscription Publication, 5.67M) reports that crew of the USS Sterett boarded the freighter Saisaban in the Red Sea on April 1. The ship was suspected of delivering Iranian weapons to the Houthis, but none were found. US naval officials said such boardings will continue.

REGIONAL LEADERS GIVE OBAMA CREDIT FOR CASTRO MEETING, BUT MAY WANT MORE. [ABC World News](#) (4/12, story 5, 2:10, Llamas, 5.84M) reported that "the first face-to-face meeting between a US president and Cuba's leader in more than 50 years" took place Saturday when President Obama greeted Cuba's Raúl Castro at the Summit of the Americas in Panama. ABC (Avila) added that the "historic handshake" is "sparking reaction from Washington to Miami to Havana," and the Cuban foreign minister is now asking Obama "to bypass Congress and use executive action to lift parts of the embargo and to quickly announce Cuba's removal from the state sponsors of terror list." Cuban Foreign Minister Bruno Rodriguez: "It was unfair. I'm confident that President Obama will take the right and just decision."

Secretary of State Kerry, who appeared on three Sunday morning shows, was asked about the diplomatic thaw. On [ABC's This Week](#) (4/12, Stephanopoulos, 2.73M), Kerry said, "The purpose of changing the policy is in fact to encourage change and transformation. We have had this policy in place since the late 1950s," and "it hasn't had the impact that people wanted." The President, he added, "has courageously decided to change a policy that hasn't worked, and to move us down a different path. It will begin slowly. The first thing is diplomatic relations. Then a process of normalization."

On [NBC's Meet The Press](#) (4/12, 3.08M), Chuck Todd asked Kerry about reports from "anonymous sources" that indicate he has recommended taking Cuba off the state sponsor of terrorism list. Kerry answered, "I don't discuss publicly whatever advice or recommendations I make to the President. So the President will make his decision at an appropriate time. We have forwarded the recommendation of the State Department and now is in the inter-agency process. And he will make the decision." Asked on [CBS' Face The Nation](#) (4/12, Schieffer, 2.64M) whether he supports removing Cuba from the list, Kerry said, "I will allow the President the latitude.. to be able to make his decision based on the recommendation we made. ... He will make his decision in the next days."

[Reuters](#) (4/13, Trotta, Spetalnick) says Obama and Castro met for about an hour Saturday. Obama said, "The Cold War is over. I think there is a strong majority both in the United States and in Cuba that says our ability to engage, to open up commerce and travel and people-to-people exchanges is ultimately going to be good for the Cuban people." The [Wall Street Journal](#) (4/13, Lee, Subscription Publication, 5.67M) said the meeting was primarily symbolic in nature, but signaled a willingness to continue discussions on a further opening of relations and on issues like human rights.

The [Christian Science Monitor](#) (4/12, Sappenfield, 380K) writes that with the handshake, Obama "was reaching out to more than one man and one nation. He was reaching out to all Latin America." The US has become concerned that its "influence in Latin America has appeared to wane," and "countries that once did as the United States wished

Even so, the [New York Times](#) (4/13, Archibold, Davis, Subscription Publication, 9 97M) reports that Obama “walked away with more salutes than swipes from a regional Summit of the Americas where the United States usually takes a drubbing,” and “the question now is whether Mr. Obama and his successors can capitalize on the new credibility Washington has earned, primarily through his reconciliation with Havana.” The Times notes that in addition to his well-publicized session with Castro, Obama “briefly chatted with President Nicolás Maduro of Venezuela,” a leading hemispheric US critic.

Asked if easing sanctions will lead to change in Cuba, former State Department official Anne-Marie Slaughter said on [CNN's Fareed Zakaria GPS](#) (4/12, 410K), “I don't think that's what we're betting on. This is not a way of opening to Cuba so we have regime change, this is Obama's initial strategy of engagement. In his inaugural address, he said we will extend our hand if you will unclench your fist. We will not change the regime through the embargo. What we are doing is shooting ourselves in both feet in the world and particularly in Latin America.”

Senators Address Thaw In US-Cuban Relations. A number of lawmakers also weighed in Sunday on US relations with Cuba. Sen. Robert Menendez, for example, said on [Fox News Sunday](#) (4/12, Wallace, 628K), “I think there's a fundamental problem in this process. Number one, if you're going to give the Cubans just about everything they want – international recognition, take them off the list of state sponsors of terrorism and infuse their economy with money at a time in which Venezuela could no longer continue to carry them as the patron and for which there was a real opportunity to create change inside of Cuba – then you should have gotten something significant in return and we got nothing in terms of people of Cuba, in terms of human rights and democracy.”

Sen. Johnny Isakson said on [Fox News Sunday Morning Futures](#) (4/12, Bartiromo), “This Administration seemed to be negotiating what the other side wants first and then waiting to see what we need. That's true with the Iranians.. and I think it's true with the Cubans. Whether they should stay on the terrorist watch list or not depends on what.. they're doing in spying and terrorism and things of that nature. ... Cuba needs to right itself before we make it right by some diplomatic move.”

However, Sen. Amy Klobuchar said on

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinintelligence.com.

DATE FRIDAY, APRIL 10, 2015 7 00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS

- + Federal Land Management Discussed.
- + Interior's Most Popular Tweet Highlighted.
- + Additional Coverage Of Sentinel Landscapes Designations.
- + Designation Of Honouliuli Internment Camp Lauded.
- + Obama Administrations Arctic Decisions Criticized.

AMERICA'S GREAT OUTDOORS

National Park Service:

- + Anniversary Of End Of Civil War Commemorated.
- + Federal Contract Workers Fight To Get Back Wages.
- + Cherry Blossoms Hitting Peak Bloom This Weekend.
- + Bayou Teche Receives National Water Trail Designation.
- + Mississippi National River & Recreation Area Seeks To Build Public Awareness.
- + Stains On The Gateway Arch Won't Be Cleaned.
- + Yellowstone To See More Fire, Less Snow.
- + Comments Receives On Future Of Delaware Water Gap Recreation Area.
- + Four Of Utah's National Parks See Increase In Visitors.
- + Darkness At Death Valley National Park Receives Recognition.
- + Shenandoah Park Plans Prescribed Burn At Big Meadows.
- + Additional Coverage Of "Find Your Park" Campaign.
- + Additional Coverage Of Anniversary Of Lincoln's Assassination.

Bureau of Land Management:

- + Group Wants To Court To Order BLM To Release Bundy Standoff Docs.
- + BLM Implements Safety Measures At Fort Ord Monument.

Fish and Wildlife Service:

- + FWS Considering Protections For 10 Species.
- + Final Federal Plan For Deer Flat National Wildlife Refuge Receives Praise.
- + Monitoring For Mosquitoes At Bandon Marsh National Wildlife Refuge Set To Begin.
- + Federal Agencies Participating In Bird Study.

US Geological Survey:

- + Researchers Say Risk Of Permafrost "Carbon Bomb" May Be Overstated.
- + USGS Announces More Than 18 Million US Topo Quadrangles And Historic Topographic Maps Have Been Downloaded.

SECURING AMERICA'S ENERGY FUTURE

Onshore Energy Development:

- + Shell's Purchase Of BG Includes Interests In National Petroleum Reserve.
- + Fracking Could Release Radon, Study Says.

Offshore Energy Development:

- + Obama Administration Ready To Issue New Well Control And Blowout Preventer Mandates.
- + BOEM Holds Open House To Discuss Seismic Exploration Off Atlantic Coast.

TACKLING AMERICA'S WATER CHALLENGES

- + Teams Show Off Technology In Desalination Competition.
- + Annual Operating Plan For Middle Rio Grande Released.
- + Natrona County Settles Fraud Lawsuit With Former Alcova Superintendent.
- + Climatologist Says California Facing "Dust-Bowl"-Type Conditions.

EMPOWERING NATIVE AMERICAN COMMUNITIES

- + Construction Funding Sought For Bug-O-Nay-Ge-Shig School.
- + Florida Adoption Council Raises Concerns With New Indian Child Welfare Act Guidelines.

TOP NATIONAL NEWS

- + Iranian Leaders: Sanctions Must Be Immediately Lifted As Part Of Final Nuclear Deal.
- + Obama Says State Department Has Completed Review Of Cuba's Terrorism Status.
- + Dashcam Video Shows Traffic Stop Before Scott Shooting.

EDITORIAL WRAP-UP

- + New York Times.
- + Washington Post.

LAST LAUGHS

+ [Late Night Political Humor.](#)

DOI in the News:

FEDERAL LAND MANAGEMENT DISCUSSED. In separate letters to the [Wall Street Journal](#) (4/10, Subscription Publication, 5 67M), William Perry Pendley, President, Mountain States Legal Foundation, Prof. Thomas J. Straka, Clemson University, Jeff Ruch, Executive Director, Public Employees for Environmental Responsibility, and Will Coggin, Environmental Policy Alliance, discuss federal management of public lands, the topic of Shawn Regan's [op-ed](#) (4/3, Regan, Subscription Publication, 5 67M) on April 3, titled "The U.S. Department of Land-Hogging." Pendley says that Sagebrush Rebellion has returned because of the Obama Administration's policies and cites Interior Secretary Sally Jewell threatening westerners as one example.

Additional coverage of the debate over the management of federal lands was provided by the [Missoula \(MT\) Independent](#) (4/10, 65K) and the [Reno \(NV\) News & Review](#) (4/10, 75K).

INTERIOR'S MOST POPULAR TWEET HIGHLIGHTED. In its "The Fix" blog, the [Washington Post](#) (4/10, Bump, 5.17M) highlights the Interior Department's most popular tweet. On August 21, 2014, the department tweeted: "Monday is @NatlParkService 98th birthday & all entrance fees will be waived. Retweet to spread the word!"

ADDITIONAL COVERAGE OF SENTINEL LANDSCAPES DESIGNATIONS. Additional coverage of the Sentinel Landscapes designations was provided by the [Wilmington \(DE\) News Journal](#) (4/9, 319K).

DESIGNATION OF HONOULIULI INTERNMENT CAMP LAUDED. The [Deming \(NM\) Headlight](#) (4/10, 10K), Stephanie Healani Ho is "grateful that President Obama recently used his authority under the Antiquities Act to designate the Honouliuli Internment Camp in Hawaii as a national monument." Ho says that it is important to remember this "dark chapter of American history." She concludes that "we owe it to those who came before us to preserve these kinds of historic places and share the hard lessons from Japanese-American interment, including the racism and discrimination of that time, with our children and grandchildren."

OBAMA ADMINISTRATIONS ARCTIC DECISIONS CRITICIZED. In an op-ed for [Roll Call](#) (4/10, 102K), Frank McQueary, vice chair of the Alaska Republican Party, writes that "Alaskans want more access to our federal lands, fewer regulations on small businesses and a strong, secure Arctic, teeming with opportunity." However, "the president and his functionaries seem to want less of all these things." He notes that "all told, the Obama administration has taken 22 million energy-rich acres off the table — 10 million acres in the shallow shelf of the Chukchi and Beaufort Seas and 12 million acres in the Arctic National Wildlife Refuge." McQueary wants the Obama Administration to "allow Alaska to responsibly develop the energy resources far beneath the surface of our vast wilderness."

America's Great Outdoors:

National Park Service:

ANNIVERSARY OF END OF CIVIL WAR COMMEMORATED. The [AP](#) (4/10, Szkotak, 2.28M) reports that "the surrender of Confederate Gen. Robert E. Lee to Union Lt. Gen. Ulysses S. Grant 150 years ago Thursday effectively ended the Civil War." The article provides "a rolling account of commemorative events that include a re-enactment of Lee's last clash with Grant's troops, and of the Confederate surrender in a Virginia farmhouse on April 9, 1865."

The [New York Times](#) (4/10, Shane, Subscription Publication, 9.97M) reports that "atop the highest hill in Arlington National Cemetery, about 100 people gathered on a chilly spring day to observe the 150th anniversary of the end of the Civil War." And "at Appomattox, Va., where the April 9 surrender took place, on other battlefields, at museums and in history classrooms, the country on Thursday pondered the meaning of the end of the Civil War." The article notes that "the events were the culmination of countless re-enactments to commemorate the sesquicentennial of the war." In response to a call from the NPS, "bells were rung at a number of locations for four minutes, reflecting the four years of the war, at exactly 3:15 p.m."

Additional coverage was provided by the [Boston \(MA\) Globe](#) (4/9, 1.03M), the [Bristol \(TN/VA\) Herald Courier](#) (4/10, 85K), the [Houston \(TX\) Chronicle](#) (4/10, Baddour, 2.28M), the [US News & World Report](#) (4/9, 685K), the [Chicago \(IL\) Tribune](#) (4/9, Rodriguez, 2.32M), [CBS News](#) (4/10, 8.2M), [CBS News](#) (4/10, 8.2M), the [Chicago \(IL\) Tribune](#) (4/9, Beckman, 2.32M), the [Hagerstown \(MD\) Herald-Mail Media](#) (4/10), the [Daily Mail \(UK\)](#) (4/10, 4.78M), and [WJBK-TV Detroit \(MI\)](#) Detroit (4/10, 253K).

Civil War Commemoration Signs Stolen From Capitol Square. The [AP](#) (4/10, 2.28M) reports that "Capitol Police say someone stole two signs commemorating the Civil War's sesquicentennial that were posted in Capitol Square." According to the article, "the thefts occurred on April 4 during the 'Future of Richmond's Past' event."

Also providing coverage is the [Washington \(DC\) Post](#) (4/9, Press, 5.17M).

Appomattox Program Honoring Hannah Reynolds Delayed By Day. The [AP](#) (4/10, Press, 5.17M) reports that "a program commemorating the death of the lone civilian casualty at the Battle of Appomattox Court House has been pushed back to Saturday." According to the article, "a funeral in honor of Hannah Reynolds had been scheduled Friday at Appomattox Court House National Historical Park as part of the 150th commemoration of Confederate Gen. Robert E. Lee's surrender of his Army of Northern Virginia." But "in delaying the program by one day, the National Park Service cited a forecast of wet weather."

FEDERAL CONTRACT WORKERS FIGHT TO GET BACK WAGES. [The Hill](#) (4/10, Wheeler, 224K) reports that "federally contracted employees in the Department of Education, National Park Service and National Zoo announced plans Thursday to file a complaint over low wages with the Department of Labor." Good Jobs Nation, "which is advocating for the low-wage workers, said these federally contracted employees have been deprived of over \$1.58 million in unpaid wages and benefits." In its report, "The Return of Federal Sweatshops, How America's Broken Contract Wage Laws Fail Workers," the labor group "urged Obama to issue an executive order that would give preference in federal contracting to 'model employers' that pay their workers a living wage of at least \$15 an hour, offer decent benefits and respect their right to bargain collectively."

Also providing coverage are [Fortune](#) (4/9, 2.92M), [CNN Money](#) (4/9, 1.76M), [KSPR-TV Springfield \(MO\)](#) Springfield, MO (4/10, 27K), and [WTVR-TV Richmond \(VA\)](#) Richmond, VA (4/9, 47K).

CHERRY BLOSSOMS HITTING PEAK BLOOM THIS WEEKEND. The [AP](#) (4/9, Press, 5.17M) reports that "Washington's famous cherry blossoms are set to hit peak bloom this weekend as the National Cherry Blossom Festival draws big crowds for its annual parade and Japanese street festival." The NPS says "the trees are predicted to be in peak bloom Saturday through Tuesday." The article notes that "with most trees in bloom this weekend, organizers expect big crowds around the Tidal Basin and National Mall."

Additional coverage was provided by the [Washington \(DC\) Post](#) (4/9, 5.17M), the [Washington \(DC\) Post](#) (4/9, Thomson, 5.17M), the [Washington \(DC\) Post](#) (4/10, 5.17M), and [WRC-TV Washington \(DC\)](#) Washington (4/10, 613K).

BAYOU TECHE RECEIVES NATIONAL WATER TRAIL DESIGNATION. The [Baton Rouge \(LA\) Advocate](#) (4/10, 38K) reports that community leaders and elected officials "gathered Thursday in Breaux Bridge to celebrate the National Park Service's selection of" the Bayou Teche as a National Water Trail, "a designation that comes amid efforts to make the bayou just as important to the region as it was decades ago." The article notes that "it is the first waterway in Louisiana to receive the distinction and one of only 18 in the U.S. since the Park Service launched the water trail system in 2012."

MISSISSIPPI NATIONAL RIVER & RECREATION AREA SEEKS TO BUILD PUBLIC AWARENESS. The [Minneapolis Star Tribune](#) (4/10, McCormick, 1.37M) reports that John Anfinson, the superintendent of the Mississippi National River & Recreation Area, is on a mission to educate the public about the area. Anfinson said, "The number one issue we have is getting people to know we actually exist. It's my goal to change that in the coming year before our centennial in 2016." Anfinson noted that "the recreation area's biggest issue is a lack of ownership." He said, "If we owned and managed the approximately 89 state, regional and local parks in our corridor, and each one

STAINS ON THE GATEWAY ARCH WON'T BE CLEANED. The [St. Louis Post-Dispatch](#) (4/10, 889K) reports that "mysterious stains on the surface of the Gateway Arch are caused from the monument's original construction, residue accumulation and graffiti, according to an engineering report released on Thursday." However, "the dirt and stains on the unofficial symbol of St. Louis" won't "be swept away". A NPS official said on Thursday "an overall cleaning of the monument is 'not feasible.'"

YELLOWSTONE TO SEE MORE FIRE, LESS SNOW. [Reuters](#) (4/10, Zuckerman) reports that more than 20 scientists contributed to a report suggesting that Yellowstone National Park will experience significant wildfires, snow melts, and threats to animal and plant species due to climate change. Such dry conditions, the report finds, have not been seen in the Yellowstone area in 10,000 years.

COMMENTS RECEIVES ON FUTURE OF DELAWARE WATER GAP RECREATION AREA. The [Pocono \(PA\) Record](#) (4/9, Writer, 43K) reports that "dozens of interests were represented at a kickoff forum Tuesday night on visitor-use priorities in the Delaware Water Gap National Recreation Area for the next 50 years." According to the article, "the public meeting at Stroudsmoor Country Inn produced support for everything from hiking, to canoeing and other river sports, better maintenance and use of historic structures, better forest management and more closely engaging the public in park activities and decisions." The NPS "listening session" is "part of a two-year process to encourage access and target limited funding, while protecting the park's natural and cultural resources."

FOUR OF UTAH'S NATIONAL PARKS SEE INCREASE IN VISITORS. The [AP](#) (4/10, 2.28M) reports that "warm weather and a new Utah national parks tourism campaign may be driving a jump in visitors at four of Utah's five national parks this year." The article notes that "Zion National Park has seen about 475,000 more visitors from January through March, up 28 percent from the same months last year." Also, "Bryce Canyon National Park registered a 33 percent increase; Arches National Park a 23 percent increase; and Capitol Reef National Park a 16 percent increase." Meanwhile, "Canyonlands was the only park to receive a drop in visitors, with a 22 percent decrease." However, "Canyonlands acting chief ranger Kevin Moore says that's inaccurate. He says they just found out one traffic counting machine drastically over counted in 2014."

DARKNESS AT DEATH VALLEY NATIONAL PARK RECEIVES RECOGNITION. [KCET-TV](#) Los Angeles (4/10, 15K) reports that "this week, the management team of Death Valley National Park were given the Department of Interior Environmental Award for all their hard work." The article notes that in 2013, "the park was designated by the IDSA as a 'Gold Tier' Dark Sky Park."

SHENANDOAH PARK PLANS PRESCRIBED BURN AT BIG MEADOWS. The [AP](#) (4/10, 2.28M) reports that "Shenandoah National Park says a 35-acre section of Big Meadows will be burned to prevent trees and shrubs from encroaching on the area."

ADDITIONAL COVERAGE OF "FIND YOUR PARK" CAMPAIGN. Additional coverage of the "Find Your Park" campaign was provided by the [Chicago \(IL\) Tribune](#) (4/9, Ogintz, Agency, 2.32M), the [Topanga \(CA\) Messenger](#) (4/10) and the [Big Island \(HI\) Now](#) (4/9).

ADDITIONAL COVERAGE OF ANNIVERSARY OF LINCOLN'S ASSASSINATION. Additional coverage of the events marking the anniversary of Lincoln's assassination was provided by the [Washington \(DC\) Post](#) (4/9, Hahn, 5.17M) and the [Washington \(DC\) Post](#) (4/9, Dingfelder, 5.17M).

Bureau of Land Management:

GROUP WANTS TO COURT TO ORDER BLM TO RELEASE BUNDY STANDOFF DOCS. The [Environment & Energy Publishing](#) (4/10, Subscription Publication, 705) reports that "a government watchdog group is ramping up its ongoing efforts to compel the Bureau of Land Management to release documents related to its failed roundup of cows owned by Nevada rancher Cliven Bundy." Public Employees for Environmental Responsibility on Thursday "filed a motion for summary judgment in its lawsuit against BLM asking U.S. District Judge Richard Leon to order the agency to turn over documents to the group regarding the April 2014 roundup of cattle illegally grazing on federal lands that was called off after an armed standoff with protesters." PEER Executive Director Jeff Ruch said that the bureau, "after telling the group's legal counsel that a release of the requested documents was imminent, has yet to hand over any of the records the group requested." However, Celia Boddington, a BLM spokeswoman, said that "the agency submitted to PEER the information the group had requested."

Bundy Celebrating Anniversary Of Standoff. Meanwhile, the [Las Vegas Review-Journal](#) (4/10, 398K) reports that the Bundy family is extending an invitation for a three-day party this weekend to celebrate the anniversary of their standoff with the federal government. Beginning Friday, the Liberty Celebration will feature live music, cowboy poetry and speeches from the Bundys' sovereign-state supporters.

Panel Passes Gutted Version Of Public Lands Bill Backed By Bundy. The [AP](#) (4/10, Rindels, 2.28M) reports that "a Nevada Assembly committee voted Thursday to pass a gutted version of a public lands bill that was supported by southern Nevada rancher Cliven Bundy but was considered unconstitutional by the Legislature's staff lawyers." According to the article, "the original version of AB408 prohibited the federal government from owning water rights and wide swaths of public land within the state's borders, and it would have allowed county commissions to parcel out the land for commercial use." The article notes that "the rewritten bill clarifies the commonly accepted idea that sheriffs are the primary law enforcement officers in unincorporated areas of counties."

Additional coverage was provided by the [Reno \(NV\) Gazette-Journal](#) (4/9, 168K) and the [San Francisco \(CA\) Chronicle](#) (4/10, 2.21M).

BLM IMPLEMENTS SAFETY MEASURES AT FORT ORD MONUMENT. The [Salinas Californian](#) (4/9, 27K) reports that the BLM is "adding safety protocols to protect people on the Ford Ord National Monument during Army munitions cleanup." The article notes that "the new measures are effective immediately, including an interim dog leash requirement."

Fish and Wildlife Service:

FWS CONSIDERING PROTECTIONS FOR 10 SPECIES. [The Hill](#) (4/10, Wheeler, 224K) reports that the FWS said "it's found reason to review whether 10 species should be listed as threatened or endangered under the Endangered Species Act." The agency said "it has petitions to list the Clear Lake hitch — a large minnow found in Northern California, the Egyptian tortoise, the long-tailed chinchilla, the Mojave shoulderband snail, the relic dace — a tiny fish native to Ruby Lake National Wildlife Refuge, the San Joaquin Valley giant flower-loving fly, the western pond turtle and the yellow-cedar." The service said "its also considering whether to delist the endangered golden parakeet and reclassify the Northern spotted owl."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (4/10, Joling, 2.28M), the [Washington \(DC\) Post](#) (4/9, Dan Joling |, Ap, 5.17M), the [Bellingham \(WA\) Herald](#) (4/9, 89K), the [Anchorage \(AK\) Dispatch News](#) (4/9, 146K), the [Huffington Post](#) (4/10, |, Joling, 281K), [Fox News](#) (4/9, 8.25M), the [Daily Mail \(UK\)](#) (4/10, 4.78M), and [KCET-TV Los Angeles \(CA\)](#) Los Angeles (4/10, 15K).

FINAL FEDERAL PLAN FOR DEER FLAT NATIONAL WILDLIFE REFUGE RECEIVES PRAISE. The [AP](#) (4/10, 56K) reports that a management plan for Deer Flat National Wildlife Refuge "that's more accommodating for wave-generating boats used by water skiers is being praised as a good compromise." Refuge manager Annette de Knijf said "the plan took into account local input." She said, "Our final management plan reflects what we heard from you, the public. It reflects our responsibility to protect wildlife with the many recreational activities that we all enjoy here."

MONITORING FOR MOSQUITOES AT BANDON MARSH NATIONAL WILDLIFE REFUGE SET TO BEGIN. The [Bandon \(OR\) Western World](#) (4/10) reports that "monitoring for mosquito larvae on Bandon Marsh National Wildlife Refuge will begin this month and will continue until October, according to the U.S. Fish and Wildlife Service." The refuge will also "monitor the effectiveness of the 80,000 linear feet of new tidal channels that were excavated in 2014 to drain mosquito breeding pools that had been inadvertently created during a previous marsh restoration project." The FWS "again provided funding to Coos Health and Wellness and its public health division to monitor larvae and apply larvicide as needed on Bandon Marsh Refuge in 2015."

FEDERAL AGENCIES PARTICIPATING IN BIRD STUDY. The [Delmarva \(MD\) Daily Times](#) (4/9, 3K) reports that the USGS, FWS, BOEM and other non-profit and academic organizations have been "working together to chart the course of migrating diving birds for more than three years now." The article notes that "the goal is to learn about the paths red-throated loons, northern gannets and sea scoters travel, hopefully to better inform the placement of wind farms or other uses off the coast." According to the article, "by tagging birds on Delmarva, the biologists are able to track their movements from the Outer Banks to New England."

US Geological Survey:

RESEARCHERS SAY RISK OF PERMAFROST "CARBON BOMB" MAY BE OVERSTATED. [The Guardian \(UK\)](#) (4/9, 2.74M) reports that "the 'carbon bomb' stored in the thawing Arctic permafrost may be released in a slow leak as global warming takes hold, rather than an eruption, according to new research." Scientists at the USGS "found previous predictions of a catastrophic release of carbon dioxide and methane into the atmosphere as permafrost thaws may have been overstated." However, "the impact on the climate of future permafrost emissions remained significant." The article notes that "more than 1,000 bn tonnes of carbon are stored in the soils beneath the Arctic tundra, double humanity's emissions since the industrial revolution."

[Computer News](#) (4/10, 2K) reports that the USGS, "through the National Geospatial Program, announced that more than 18 million US Topo quadrangles and Historic Topographic Maps have been downloaded in the past six years from the USGS Store or The National Map Viewer." The article notes that "the most popular HTMC map is the Half Dome, Calif., quadrangle, which has been downloaded 4,257 times." Also, "the most viewed and downloaded US Topo map is the Washington West, DC, quadrangle, having been downloaded 2,785 times, according to USGS."

Securing America's Energy Future:

Onshore Energy Development:

SHELL'S PURCHASE OF BG INCLUDES INTERESTS IN NATIONAL PETROLEUM RESERVE. The [Anchorage \(AK\) Dispatch News](#) (4/9, 146K) reports that "Shell's \$69.7 billion acquisition of the BG Group" includes "leases covering a large amount of territory on the North Slope." The article notes that "in the National Petroleum Reserve, BG has interests in active leases covering 566,234 acres, according to data from the Bureau of Land Management, which manages that federal territory."

FRACKING COULD RELEASE RADON, STUDY SAYS. [USA Today](#) (4/9, Szabo, Rice, 4.95M) reports, "Levels of cancer-causing radon gas in Pennsylvania homes have increased as the fracking industry has expanded, a new study shows." The study "doesn't conclusively prove that fracking releases radon from the ground," but "the findings are concerning, says Joan Casey, a researcher at the University of California-Berkeley and University of California-San Francisco." Pennsylvania's "high radon levels stem from the type of bedrock that runs through much of the state, which contains radioactive materials such as uranium and radium, which degrade into radon, an invisible gas, Casey says."

The Marcellus Shale Coalition, Pennsylvania's leading natural gas organization, criticized anti-shale activists' claims regarding fracking, issuing a statement saying, "Thankfully, however, these suggestive scare tactics veiled as 'research' are easily refuted with readily available unbiased, fact-based data and independent scientific findings."

[NPR](#) (4/9, Hurdle, Phillips, 1.58M) also reports on the study, quoting study leader Dr. Brian Schwartz, a professor in the Department of Environmental Health Sciences at the Johns Hopkins Bloomberg School of Public Health. "One plausible explanation for elevated radon levels in people's homes is the development of thousands of unconventional natural gas wells in Pennsylvania over the past 10 years," he said. NPR also reports Casey issued a statement warning, "By drilling 7,000 holes in the ground, the fracking industry may have changed the geology and created new pathways for radon to rise to the surface."

[NBC News](#) (4/9, Fox, Naggiar, 2.71M) and [CNBC](#) (4/9, Fox, Naggiar, 2.42M), [The Hill](#) (4/10, Cama, 224K), [The Baltimore Sun](#) (4/8, 810K) and [The Washington Post](#) (4/9, Cha, 5.17M) also provide coverage.

Offshore Energy Development:

OBAMA ADMINISTRATION READY TO ISSUE NEW WELL CONTROL AND BLOWOUT PREVENTER MANDATES. The [FuelFix](#) (4/9, 7K) reports that "the Obama administration is poised to detail new requirements for controlling offshore wells, nearly five years after the Gulf of Mexico oil spill vividly illustrated the damage that can be unleashed when they are not kept in check." On Thursday, "the leaders of three major industry trade groups touted the safety improvements the sector has voluntarily made since the spill, with at least one going so far as to endorse more regulation that helps keep oil companies and drilling contractors at the top of their game." According to the article, "the measure expected to be formally unveiled by the Interior Department's Bureau of Safety and Environmental Enforcement later this month aims to boost the reliability of blowout preventers, which are generally the last line of defense in preventing gas and oil from surging uncontrolled out of a well." Also, it is "set to propose new requirements for ensuring oil companies stay within even slim drilling margins — the difference between the hydrostatic pore pressure exerted by oil, gas and other fluids in the underground formation and the amount of force it can withstand before cracking open." The story also appears at the [Houston Chronicle](#) (4/10, 2.28M).

The [Washington Examiner](#) (4/10, 315K) reports that "the oil and gas industry came out in force Thursday with a message of 'zero accidents and zero spills' ahead of the five-year anniversary of the world's worst offshore oil spill in the Gulf of Mexico that resulted in several deaths." American Petroleum Institute CEO Jack Gerard said, "Our daily commitment is one of constant improvement until that goal becomes reality. The millions of men and women who work in our industry — and all Americans whose lives are powered by oil and natural gas — deserve no less." The article notes that "the second message Gerard and other industry executives attempted to convey is the need for a tempered approach toward new regulation." Gerard noted that "the offshore industry is safer than ever through its own efforts to improve the 'ethic of our industry' of 'safety and responsibility.'"

BOEM HOLDS OPEN HOUSE TO DISCUSS SEISMIC EXPLORATION OFF ATLANTIC COAST. The [Savannah \(GA\) Morning News](#) (4/9, 145K) reports that "in an effort to mitigate public concerns about the use of seismic exploration off the Atlantic coast in the search for oil and gas, the Bureau of Ocean Energy Management held a pair of open house sessions in Savannah Thursday." According to the article, "subject matter experts on hand took questions from concerned residents about seismic exploration, specifically the use of airguns to produce images of what lies beneath the ocean floor, and the BOEM's permitting process." Michael Celata, the BOEM's region deputy director, said, "We are going to make these decisions based on the best available science. It's a long process. I'm not going to speculate on when permits could be issued. The decisions are being made in collaboration with several federal and state agencies." He added, "We want people to comment; we want input on this process, that helps us to make the most informed decision."

Also providing coverage is [WJCL-TV Savannah \(GA\)](#), Savannah, GA (4/9, 2K).

Marine Scientists Oppose Seismic Testing In The Atlantic. The [Hampton Roads \(VA\) Daily Press](#) (4/9, Subscription Publication, 201K) reports that "as the Obama administration considers allowing offshore drilling in the Atlantic from Virginia to Florida, 75 marine scientists issued a letter of concern this week over the possible use of controversial seismic air guns to search for underwater oil and gas reserves." They wrote, "Airgun surveys have an enormous environmental footprint. Opening the U.S. east coast to seismic airgun exploration poses an unacceptable risk of serious harm to marine life at the species and population levels, the full extent of which will not be understood until long after the harm occurs."

Tackling America's Water Challenges:

TEAMS SHOW OFF TECHNOLOGY IN DESALINATION COMPETITION. The [AP](#) (4/10, 644K) reports that "with clean water supplies dwindling, federal officials put out a call around the world in hopes of finding innovative technology that could turn brackish water into potable water." According to the article, "five finalist teams will be showing off their desalination systems as part of the international competition beginning Thursday in Alamogordo." The BOR says "the finalists were culled from a list of 68 teams from 29 countries."

Also reporting on the story is [NBC News](#) (4/10, 2.71M).

ANNUAL OPERATING PLAN FOR MIDDLE RIO GRANDE RELEASED. The [AP](#) (4/10, 39K) reports that "cities and farmers that depend on water from the Rio Grande could be in for another tough year." The article notes that "snowpack from the mountains that feed the waterway is halfway gone, and there has been little to no precipitation in the last month," so "that means federal officials will be managing the river for drought for a fifth consecutive year." The BOR and the U.S. Army Corps of Engineers "released the annual operating plan Thursday for the Middle Rio Grande." The BOR said "it is negotiating water leases to supplement river flows through at least June 15," and "after that, the agency can let small stretches of the river south of Albuquerque and above Elephant Butte to run dry, spokeswoman Mary Carlson said."

NATRONA COUNTY SETTLES FRAUD LAWSUIT WITH FORMER ALCOVA SUPERINTENDENT. The [Casper \(WY\) Star-Tribune](#) (4/10, 90K) reports that "Natrona County paid \$8,500 to settle a lawsuit brought by a former Alcova Reservoir manager who said he was fired for uncovering that the county was defrauding the federal government." According to the article, "Charles Loraas' suit claimed the county submitted false expenses and revenues at Pathfinder, Alcova and Gray Reef reservoirs, repeatedly accepted grant money for projects it should have paid for and used equipment for work other than reservoir maintenance." The article notes that "the county has operated the three reservoirs on behalf of the Bureau of Reclamation since 1991."

CLIMATOLOGIST SAYS CALIFORNIA FACING "DUST-BOWL"-TYPE CONDITIONS. The [Los Angeles Times](#) (4/10, Megerian, 3.49M) reports that on Thursday, California state climatologist Michael Anderson laid out a "slew of statistics" on the state drought and said, "You're looking on numbers that are right on par with what was the Dust Bowl."

The [Huffington Post](#) (4/10, Gerken, 281K) reports that according to a study that examined the drought between 2012 and 2014, California's current situation is "the most severe in at least 1,200 years." The piece looks at a variety of ways in which individuals, businesses and government officials are responding to the crisis.

Empowering Native American Communities:

CONSTRUCTION FUNDING SOUGHT FOR BUG-O-NAY-GE-SHIG SCHOOL. [KBJR-TV](#) Duluth, MN (4/10, 2K) reports that “Congressmen Rick Nolan, Todd Rokita and John Kline are calling for major changes after touring the Bug-O-Nay-Ge-Shig High School on the Leech Lake Reservation.” They “toured the school on Wednesday and said they wouldn’t wish these harsh conditions on their own families.” The lawmakers are “asking congress to increase funding for Bureau of Indian Education (B E) schools by approximately \$60-million.”

The [Minneapolis Star Tribune](#) (4/10, Board, 1.37M) editorializes that “the representatives’ visit to the remote northern Minnesota school on the Leech Lake Indian Reservation speaks volumes about their strong commitment to education.” According to the paper, “that the push for new BIE school buildings is now bipartisan is encouraging.” It urges state lawmakers “to continue their strong advocacy for the Bug school, too.”

FLORIDA ADOPTION COUNCIL RAISES CONCERNS WITH NEW INDIAN CHILD WELFARE ACT GUIDELINES. The [Saint Peters \(FL\) Blog](#) (4/10) reports that “a statewide adoption advocacy group says they are disappointed with a new set of expanded federal guidelines for the Indian Child Welfare Act.” On Thursday, the Florida Adoption Council “released a statement expressing ‘grave concerns’ over amended guidelines of the ICWA from the U.S. Department of Interior Bureau of Indian Affairs (BIA).” According to the article, “while the BIA focuses on expanding the reach of the ICWA, the council says parts of the newly published guidelines entirely disregard the best interest of children.”

Top National News:

IRANIAN LEADERS SANCTIONS MUST BE IMMEDIATELY LIFTED AS PART OF FINAL NUCLEAR DEAL. Both Iranian President Hassan Rouhani and Supreme Leader Ayatollah Ali Khamenei publicly said Thursday that economic sanctions against Iran must be immediately lifted upon the implementation of a final nuclear agreement, a demand that could put negotiations in jeopardy. But media analyses differ over whether the comments are an actual statement of an immovable position or part of a domestic campaign to keep hard-liners in Tehran from rebelling against efforts to reach an accord. However, in the US, reports say the Iranians’ remarks are providing new ammunition for Republican opponents of the framework.

A 20-second [ABC World News](#) (4/9, story 7, 0:20, 5.84M) report was the only mention of Iran on the three broadcast network newscasts. David Muir reported that Rouhani says Iran “will not sign any agreement unless all economic sanctions are lifted on day one of the new deal.” Kevin Corke reported on [Fox News’ Special Report](#) (4/9, 1.53M) that Rouhani’s “unflinching declaration” was a “shot at the White House plan to gradually lift sanctions and part of an increasingly aggressive tone taken by the Iranians.” Corke added that Rouhani’s comments are “renewing calls on Capitol Hill for more sanctions.”

Iran, the [AP](#) (4/10, Karimi, Schreck) says, “is staking out a tough bargaining stance for the final phase of nuclear negotiations,” with both Khamenei and the “moderate” Rouhani saying “any deal must include an immediate lifting of withering sanctions.” That position, says the AP, “might be popular domestically,” but “could be setting the bar too high” for what negotiators can achieve.

[Reuters](#) (4/10, Hafezi) reports Khamenei said in a televised speech, “I neither support nor oppose the deal. Everything is in the details, it may be that the deceptive other side wants to restrict us in the details.” The [Washington Post](#) (4/10, Branigin, Deane, 5.17M) reports that while Khamenei “said he had faith” in Iran’s negotiators, he “expressed suspicion of Washington, warning about its ‘devilish’ intentions.” The Post notes that as he spoke, “a crowd chanted, ‘Death to America.’”

The [New York Times](#) (4/10, A1, Erdbrink, Subscription Publication, 9.97M) says Khamenei’s comments “could be tactical, intended to give both the negotiators and himself some political space to get hard-liners and others slowly accustomed to the framework,” but they also “illustrated the difficult hurdles that lie ahead.” The [Los Angeles Times](#) (4/10, Mostaghim, 3.49M) says that while some analysts “took Khamenei’s harsh comments as a danger sign for the talks,” others said Khamenei “was again laying down tough terms in hopes of helping Iranian negotiators gain ground in the bargaining.” The [Wall Street Journal](#) (4/10, Fitch, Subscription Publication, 5.67M) says the P5+1 group is closely monitoring the reaction among Iranian leaders, and says that while Khamenei’s words were strong, they seemed to be carefully chosen.

The [AP](#) (4/10, Klapper, Lee) says “at present, there’s no firm agreement to how or when to lift the sanctions,” leaving “a major issue that still must be worked out.” [AFP](#) (4/10, Julien) called both leaders’ comments “setback[s] for the deal” that quickly “drew a rebuke” from the US and UK, which said sanction relief will be gradual. [USA Today](#) (4/10, Onyanga-Omara, Welch, 4.95M) quotes State Department spokesman Jeff Rathke saying, “The process of sanctions suspension or relief will only begin after Iran has completed its major nuclear steps and the breakout time has been increased to at least a year.”

[Politico](#) (4/9, Everett, 669K) reports Republican critics of the framework seized on the remarks. Sen. Mark Kirk said, “it’s increasingly clear that Iran, in fact, failed to reach agreement with the United States and its partners on a political framework that addresses all parameters of a comprehensive agreement.” And Sen. Tom Cotton posted a series of tweets highlighting “conflicting messages from Iran and the United States” over how closely Iran’s nuclear program would be monitored. [USA Today](#) (4/10, Page, 4.95M) reports Cotton again said Thursday “that US military strikes on Iran could cripple its nuclear capabilities without leading to a full-scale war.” [Politico](#) (4/10, Gass, 669K) also reports that in an appearance on Hugh Hewitt’s radio show Thursday, Sen. John McCain called Secretary of State Kerry “delusional” and said, “I think you’re going to find out that they had never agreed to the things that John Kerry claimed that they had. So in a way, I can’t blame the Ayatollah, because I don’t think they ever agreed to it, and I think John Kerry tried to come back and sell a bill of goods, hoping maybe that the Iranians wouldn’t say much about it.”

Charles Krauthammer writes in his [Washington Post](#) (4/10, 5.17M) column, “The inspection promises are a farce. We haven’t even held the Iranians to their current obligation to come clean with the International Atomic Energy Agency on their previous nuclear activities.” Krauthammer also says “there’s no way sanctions will be re-imposed once they have been lifted. It took a decade to weave China, Russia and the Europeans into the current sanctions infrastructure. Once gone, it doesn’t snap back.”

Ilan Berman of the American Foreign Policy Council writes in [USA Today](#) (4/10, 4.95M) that the idea of “snap back” is “likely to be little more than a political fiction” because of the difficulties of re-implementation. Berman says “the devil is in the details,” and it is clear that the P5+1 and Iran have very different ideas about the speed of sanctions relief. However, in his [Washington Post](#) (4/10, 5.17M) column, Fareed Zakaria writes that while “there is no guarantee” that Khamenei “will accept the trade-offs” in the framework, “the offer forces him to make a rational calculation and live with the consequences.” The [Washington Times](#) (4/10, Taylor, 644K) also has a report on the Iranian leaders’ comments.

Boxer Urges Corker To Postpone Action On Bill. The [Huffington Post](#) (4/9, Schulberg, 281K) reports Sen. Barbara Boxer has asked Senate Foreign Relations Chairman Bob Corker to postpone markup of his “controversial Iran legislation,” scheduled for Tuesday, until a final agreement with Iran is reached. In a letter to Corker, Boxer writes, “To force Congress to weigh in now on the Iran nuclear talks before a final deal has been completed would be a reckless rush to judgment. It would undermine negotiations at a critical moment and could derail a once-in-a-lifetime opportunity to deal with this looming threat.”

The [AP](#) (4/10, Kellman, Riechmann) has a feature on Foreign Relations Committee ranking Democrat Sen. Ben Cardin’s long career and his role in bridging the divide between the Obama Administration and the Senate on Iran. Kimberley Strassel writes in her [Wall Street Journal](#) (4/10, Subscription Publication, 5.67M) column that the debate over the Corker bill is forcing Democrats to choose sides, noting that about a dozen members of the Senate Democratic caucus have vocally opposed the negotiations over the past year, but are now undecided about how they will vote on the Corker legislation. [Politico](#) (4/10, Everett, Cheney, 669K) says the American Security Initiative PAC has launched a \$650,000 ad campaign to push senators to vote for the bill.

Graham Now Backs 2013 Joint Plan Of Action. [The Hill](#) (4/9, Fabian, 224K) reports that Sen. Lindsey Graham “wants to keep in place an interim nuclear deal with Iran that he harshly criticized when it was unveiled in 2013.” Appearing on CBS last Sunday, Graham said, “That is one way of looking at this program, keeping the interim deal in place that’s been fairly successful and have a new crack at it with a new president that doesn’t have the baggage of Obama.” Two years ago, Graham criticized the interim Joint Plan of Action.

OBAMA SAYS STATE DEPARTMENT HAS COMPLETED REVIEW OF CUBA’S TERRORISM STATUS. Following a meeting with Jamaican Prime Minister Portia Simpson-Miller in Kingston on Thursday, the President said the State Department’s review of “whether to remove Cuba from its list of nations that sponsor terrorism” is complete, but he has not yet received a final recommendation, the [New York Times](#) (4/10, Davis, Subscription Publication, 9.97M) reports. The President said the Department’s determination is “going through an interagency review that has not yet been finished.”

While [AFP](#) (4/10, Thomet) reports that the President would not disclose whether the State Department recommended removing Cuba from the list, the [Christian Science Monitor](#) (4/10, Holtz, 380K) noted that two unnamed Administration officials told CNN this week that “the State Department report gives the all clear,” and [Politico](#) (4/9, Toosi, 669K) reported that the President is “expected to announce this week that he will remove the communist-led country from the administration’s list of state sponsors of terrorism.” It’s “widely anticipated that Obama will take Cuba off the terrorist list,” [Politico](#) said. Chris Jansing similarly reported on [NBC Nightly News](#) (4/9, story 5, 1:25, Holt,

The [AP](#) (4/10, Kuhnhehn), meanwhile, notes that the President's decision "could come as soon as this week, when Obama and Cuban President Raúl Castro are both in Panama to attend the Summit of the Americas." [The Hill](#) (4/9, Fabian, 224K) said that the President and Castro are expected to meet at the summit on Friday or Saturday. According to deputy national security adviser Ben Rhodes, the President and Castro will not "have a formal one-on-one meeting but would likely interact" at the summit events and as the leaders gather on the margins of those events." The [Washington Post](#) (4/10, Deyoung, 5.17M) reports that while Administration aides "have strongly hinted that Obama and Castro will meet at the summit," they have not "specified the nature of the encounter."

A separate story from the [AP](#) (4/10, Lederman) describes the President's assessment as "optimistic," adding that he "sought to set the tone for the US and Cuba to come closer to closing the book on more than a half-century of estrangement," when he and Castro meet at the summit. Chris Jansing reported on [NBC Nightly News](#) (4/9, story 5, 1:25, Holt, 7.86M) that Obama and Castro "coming face to face to talk détente after decades of Cold War era animosity will be the most watched part of the summit."

The [Wall Street Journal](#) (4/10, Lee, Subscription Publication, 5.67M) says taking Cuba off the list would remove a major hurdle that has confronted the US and Cuba since the announcement last December that they will normalize relations. [Xinhua](#) (4/10, 10K), meanwhile, reports that ahead of the summit, there are "promising signs for the two nations to normalize ties," but notes that "there has been more talk than walk in normalizing the bilateral relations, as no concrete achievement has been made yet." In addition to Cuba remaining on the terrorism list, the "longstanding trade embargo against the island country" remains in place and "has been impeding a normal relationship in various fields such as telecommunications, which the two sides have been trying to improve."

The [Miami Herald](#) (4/10, Torres, 694K) quotes Abel Prieto, Cuba's former minister of culture and adviser to Raúl Castro, as saying, "It's a lengthy process [negotiations with the US] it is complex and on the basis of principles that, as we have reiterated, are non-negotiable. Another topic is, we support Venezuela. The fact that they get close to Cuba and say, 'We're going to have diplomatic relations' doesn't mean that the voice of Cuba is going to be silenced. We don't accept interference, we don't accept imperialistic positions. They want to dictate our institutionalism and we're not going to allow it."

In an editorial, the [Wall Street Journal](#) (4/10, Subscription Publication, 5.67M) says the President's push to normalize relations with Cuba is an effort to burnish his legacy. The Journal argues that the President is offering Cuba the opportunity for economic improvement and diplomatic recognition but is asking nothing in return, and in response Raúl Castro is demanding more.

Pro-Castro Demonstrators Disrupt Meeting Of Activists Ahead Of Summit. The [AP](#) (4/10, Goodman, Rodriguez) reports that a group of Castro supporters disrupted "a closed-door meeting of grassroots activists" in Panama City on Thursday. The activists were meeting to put together "proposals to present to US President Barack Obama, Cuba's Raúl Castro and some 30 other leaders at the summit starting Friday on topics ranging from protection of the environment to support for democracy in the region," when "some 40 Castro supporters stormed a hotel conference room to protest what they said was the exclusion of government-backed groups from Cuba and the presence of Cuban dissidents they called 'mercenaries' and 'terrorists.'"

[USA Today](#) (4/10, Jervis, 4.95M) reports on Cuban protesters at the summit, noting that in "the most talked-about incident, a group of anti-Castro Cuban demonstrators on Wednesday planned to lay flowers at a bust of Cuban patriarch José Martí near the Cuban embassy...when they were confronted by a group of pro-Castro activists." The incident was denounced by event organizers and the State Department. State Department spokeswoman Marie Harf said in a statement, "We are deeply concerned by reports of attacks targeting civil society representatives in Panama for the Summit of the Americas exercising freedom of speech and harassment of those participating" in the forum," adding, "We condemn those who use violence against peaceful protesters."

DASHCAM VIDEO SHOWS TRAFFIC STOP BEFORE SCOTT SHOOTING. While print coverage of the shooting of Walter Scott by North Charleston, South Carolina police officer Michael Slager is somewhat lighter this morning, the story continued to dominate last night's network news broadcasts. All three networks led with the story and spent more than 16 minutes covering it. Much of the coverage focuses on dashcam footage released Thursday by the South Carolina Law Enforcement Division. Reporting on it, the [New York Times](#) (4/10, Blinder, Subscription Publication, 9.97M) says that "in its initial minutes," the encounter "appeared professional and routine," and Steve Osunsami reported in the lead story for [ABC World News](#) (4/9, lead story, 3:45, Muir, 5.84M) that Slager is seen pulling over the vehicle Scott was driving for a broken tail light. Scott "tries to get out" and seconds later "he runs from the car." In the lead story for the [CBS Evening News](#) (4/9, lead story, 2:40, Pelley, 5.08M), Scott Pelley played the dashcam video in its entirety, while Gabe Gutierrez reported in the lead story for [NBC Nightly News](#) (4/9, lead story, 3:55, Holt, 7.86M) that the footage "fills in some of the gaps, but doesn't answer the central question: why the shooting?"

The [Washington Post](#) (4/10, Berman, 5.17M) reports that while the video provides "a new glimpse of the brief moments" before the shooting, it "does not provide another direct view of the shooting," and [USA Today](#) (4/10, Bacon, Welch, 4.95M) says that according to South Carolina Law Enforcement Division spokesman Thom Barry, "none of the cameras mounted on any of the police vehicles that responded to the scene captured the dramatic moments recorded by a passerby with his cellphone." Barry added that "officials are reviewing 'potentially hours of video,' because video from all the cars that responded is being reviewed."

A number of reports continue to focus on the cell phone video of the shooting, with most focusing on whether it agrees with the incident report, and whether what is seen in the video would justify Slager shooting the fleeing suspect. For example, the [New York Times](#) (4/10, Fernandez, Subscription Publication, 9.97M) discusses the factors that must be present for an officer to be justified in shooting a fleeing suspect and notes that law professors, former prosecutors, and police officers who watched Santana's video "said that based on what they saw," Slager "was not legally justified in opening fire," and in a story on the [CBS Evening News](#) (4/9, story 3, 2:45, Pelley, 5.08M), Ron Hosko, former head of the FBI's criminal investigative division, said, "In this piece of video, I don't see the threat. I see a man trying to flee the scene, running away. And if that's the case, to shoot this victim in the back multiple times while he's merely trying to flee from a non-violent crime is deeply troubling, and I think is likely to result in a conviction of the police officer."

Gutierrez also reported in the lead story for [NBC Nightly News](#) (4/9, lead story, 3:55, Holt, 7.86M) that while the incident report on the shooting says that "multiple officers witnessed other officers providing first aid," and one "describes applying pressure to the gunshot wound," while another "assisted with first aid and CPR to the driver and a third reports seeing someone administering chest compressions," in the cell phone video, "officers are seen attending to Scott, but he remains on his stomach and no chest compressions are seen," and it is "unclear how soon that happened after the shooting because of a break in the recording."

Likewise, Osunsami also reported on [ABC World News](#) (4/9, lead story, 3:45, Muir, 5.84M) that Santana told ABC's "Nightline" that "the account Officer Slager gave over the radio – that Scott tried to grab his stun gun – is not what he saw happened," and the [Columbia \(SC\) State](#) (4/10, Monk, 291K) reports on Santana's decision to give the video, which "contradicted official police versions of the shooting," to Scott's family after he "heard that the police version of events was that Slager had fired in self-defense and that was why he shot Scott." Santana's attorney, Rep. Todd Rutherford, said Santana "remains fearful," noting, "He is extremely concerned about his safety. ... There are a number of people out there including those police officers who lied when they said they gave him (Scott) CPR when they did not and the video reveals they did not – there are people who are affected by this negatively that may seek retribution on him."

In his [Washington Post](#) (4/10, 5.17M) column, Eugene Robinson stresses the importance of Santana's video to the investigation, noting that without it, investigators "would have had the word of a police officer against that of a corpse." Thanks to the video, he writes, "justice has a chance," and in a piece on [TIME's](#) (4/10, 19.19M) website, David Von Drehle wrote that the video "has already put an exclamation point on the assertion made by protesters across the country that the dead are not always to blame," and when "things go wrong – as they do with distressing frequency when white cops stop black suspects – sometimes it is the officer's fault."

Slager Had A Previous Excessive Force Complaint Against Him. The [Washington Post](#) (4/10, Lowery, Berman, 5.17M) reports on an earlier accusation of excessive force against Slager. The complaint, which was filed by "another black man," says Slager "used a stun gun on a man while responding to a reported burglary in 2013." Slager was ultimately exonerated.

Scott's Family Plans To Sue North Charleston Police Department. Vicente Arenas reported on the [CBS Evening News](#) (4/9, story 2, 0:50, Pelley, 5.08M) that Scott's family says "the reason he ran is because he had a warrant out for his arrest, owed child support, and didn't want to go to jail again," and in a separate story, on [NBC Nightly News](#) (4/9, story 2, 2:20, Holt, 7.86M), Craig Melvin reported that Scott's family "announced that they plan to file a civil lawsuit against the North Charleston Police Department."

North Charleston Residents Say Police Have Been Harassing, Racially Profiling For Years. The [New York Times](#) (4/10, Blinder, Fernandez, Subscription Publication, 9.97M) reports that North Charleston "has seen an era of stepped-up enforcement under former Police Chief Jon R. Zumalt, and an effort to improve relations between the police and residents under the current chief, Eddie Driggers." According to "black residents, merchants and former residents" police "have been harassing and racially profiling African-Americans in North Charleston for years, though some of their reports could not be independently verified."

While city officials deny the allegations and "have defended their efforts to lower crime," the [Los Angeles Times](#) (4/10, Zucchino, Queally, 3.49M) says that according to data from the South Carolina Department of Public Safety, from July 2007 to February 2015, "North Charleston police pulled over 128,838 black drivers without issuing a citation or recording an arrest." During the same time period and "under the same circumstances," they "pulled over 64,236 white motorists, nearly half as many." Moreover, from 2008

TIME Magazine Features Scott Shooting On Its Cover. The [Huffington Post](#) (4/9, Arana, 281K) reported that the cover of TIME magazine focuses on the Scott shooting, featuring "cell-phone footage of Slager shooting Scott as he flees below the words 'Black Lives Matter.'"

CSMonitor Analysis: Official Reaction To Shooting Shows How Much Has Changed Since Ferguson. The [Christian Science Monitor](#) (4/8, Brunius, 380K) said that while the "compelling nature of the video evidence led to Mr. Slager being arrested, quickly charged by prosecutors, and then fired from the force," the "reaction by local authorities also hints at how much has changed in the seven months since a white police officer fatally shot a black teenager in the streets of Ferguson." The Monitor added that "the wide latitude that society has long given police officers who say their lives are in danger is beginning to change" as the existence of video "is threatening the traditional deference given to police."

Editorial Wrap-Up:

NEW YORK TIMES. "Kansas Tries To Stamp Out Abortion." The [New York Times](#) (4/10, Subscription Publication, 9.97M) editorializes that Kansas' anti-abortion legislative efforts are meant "to make an abortion harder to get than at any time since before" Roe v. Wade. The impact is "especially" severe for "lower-income and other vulnerable women, who are often the first to be denied the choice they have under the Constitution."

"Global Threats To Net Neutrality." In an editorial, the [New York Times](#) (4/10, Board, Subscription Publication, 9.97M) writes that while the FCC "recently adopted strong net neutrality rules," policy makers "in other parts of the world, particularly in Europe and India, are considering very different kinds of rules that could hurt consumers and start-up Internet businesses." The Times argues that "one of the main reasons the Internet has been so successful is that people have generally been able to use it how they wish," and the "worst thing policy makers could do...would be to allow telecom companies to mess with that."

"No Firing Pins, Please, As The NRA Gathers." The [New York Times](#) (4/10, Board, Subscription Publication, 9.97M) writes in an editorial that participants at the NRA's annual convention, which opens today in Tennessee, must remove the firing pins from the weapons, a move it calls "the ultimate in hypocrisy."

WASHINGTON POST. "Passivity In Ukraine." In an editorial, the [Washington Post](#) (4/10, 5.17M) criticizes President Obama and European leaders for "ignoring the brazen cease-fire violations" of Russia in eastern Ukraine. The Post says that "by remaining passive now," Western leaders "make" an attack by Russia against Mariupol "more likely."

"How Progressives Are Pandering To The Elderly." In an editorial, the [Washington Post](#) (4/10, 5.17M) accuses Democrats of "pandering to the elderly," particularly with calls for boosts to Social Security benefits. The Post belittles such a strategy as untenable and says that Democrats should instead focus their efforts on reforming the Social Security Disability Insurance program, which is in danger of running out of money.

"Hogan Takes A Stand." In an editorial, the [Washington Post](#) (4/10, 5.17M) praises Maryland Gov. Larry Hogan for opposing a "raid" by state legislators "on annual contributions to the state's pension fund for current and future retired public workers." Hogan said, "Raiding the pension fund represents the kind of short-term thinking that has put Maryland in the precarious financial position we faced in January, and I simply cannot allow these actions to continue." The Post says that Democrats "may try to push back, but their argument is weak."

WALL STREET JOURNAL. "The State Electricity Revolt." In an editorial, the [Wall Street Journal](#) (4/10, Subscription Publication, 5.67M) says that the EPA doesn't have the authority to implement all the rules it is proposing to force states to cut carbon emissions, so it is pressuring states to adopt laws to enact them. The Journal says that the most effective way for states to counter the EPA's mandate is to slow-walk the process of complying.

"The Monarch Of Madison." The [Wall Street Journal](#) (4/10, Subscription Publication, 5.67M) editorializes that on Tuesday, Wisconsin voters approved an amendment to the state constitution that changes the way the state selects the chief justice of the Wisconsin Supreme Court. The position has historically been held by the longest service justice, currently Justice Shirley Abrahamson, but under the new method, the chief justice will be selected every two years by the court's sitting justices. Abrahamson has challenged the constitutional amendment in Federal court, claiming the provision "would deny her right to the office of chief justice, an office she intends to continue to hold in accordance with the terms of her most recent reelection until 2019." The Journal argues that a judge has no property right to office, and that Abrahamson's challenge should be dismissed.

"Summitting With Raul." In an editorial the [Wall Street Journal](#) (4/10, Subscription Publication, 5.67M) says the President's push to normalize relations with Cuba is an effort to burnish his legacy. The Journal argues that the President is offering Cuba the opportunity for economic improvement and diplomatic recognition but is asking nothing in return, and in response Raul Castro is demanding more.

"Russia's Next Target." The [Wall Street Journal](#) (4/10, Subscription Publication, 5.67M) editorializes that, unfortunately, the West is unlikely to provide more resistance to Russia aggression against Moldova than it has done in Ukraine.

"Drill, Britannia." In an editorial, the [Wall Street Journal](#) (4/10, Subscription Publication, 5.67M) says British politicians must decide whether to drill for oil in new locations and the decision is a matter of whether they place a greater emphasis on energy security and creating jobs or environmental concerns that result from scare tactics.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House

PRESIDENT OBAMA — The President attends the Summit of the Americas in Panama.

VICE PRESIDENT BIDEN — The Bidens travel to Oakland, California to visit a Pacific Gas & Electric center where he will discuss the importance of workforce development and investing in job-training programs across the country. While in California, Dr. Biden will visit De Anza College in Cupertino to highlight the Administration's "commitment to community colleges and their importance to America's future."

US Senate No Scheduled Events.

US House March 31 – April 10. — The House will be in a district work period until Monday, April 13. No votes are expected in the House during the recess.

CONGRESSIONAL INTERNET CAUCUS – CYBER THREAT SHARING — 12 p.m. – 1 p.m. The Congressional Internet Caucus Advisory Committee hosts a luncheon briefing on cybersecurity focusing on the sharing of information on threats and attacks. President Obama has made the public-private sharing of threat information one of the most pressing priorities in his push to protect the nation's cyber infrastructure and legislation on this issue will be first out of the gate this session of Congress. Location: 2226 Rayburn. Contacts: Tim Lordan (tlordan@netcaucus.org), 202-638-4370. Notes: RSVP. Seating limited. Check-in starts at 11:40 a.m.

Other **ASIL ANNUAL MEETING** — April 8 – 11. 109th American Society of International Law (ASIL) Annual meeting – Adapting to a Rapidly Changing World. [DOI in the News:](#)

SECRETARY JEWELL VISITING GEORGIA. [WSB-AM](#) Atlanta (4/7, 63K) reports that Interior Secretary Sally Jewell was scheduled to visit the Chattahoochee River National Recreation Area in Georgia on Monday. Jewell will visit Apptomattox Courthouse in Virginia Tuesday as she promotes the Land and Water Conservation Fund.

The [Neighbor Newspapers Atlanta](#) (4/7) reports that Jewell spoke at the Chattahoochee River National Recreation Area to highlight the benefits of the Land and Water Conservation Fund and to call on Congress to reauthorize and fully fund the measure.

Additional coverage was provided by [Northwest Georgia News](#) (4/7), the [Greenfield \(IN\) Daily Reporter](#) (4/7, 31K), [WDBJ-TV Roanoke \(VA\)](#) Roanoke, VA (4/7, 98K), and [WABE-FM Atlanta \(GA\)](#) Atlanta (4/7, 11K).

OBAMA ADMINISTRATION PROMOTES BEE POLICY AT WHITE HOUSE EASTER EGG ROLL. In its "Post Politics" blog, the [Washington Post](#) (4/6, Eilperin, 5.17M) reports that both President Obama and the First Lady have "made pollinators like bees, bats (which also made an appearance at the Egg Roll Monday), birds and butterflies, which have experienced serious declines in recent years a high priority in both national agricultural policy and the operation of the White House itself, which now boasts a beehive as well as a small pollinator's garden." The annual White House Easter Egg Roll "featured an interactive feature with four species of bats, as well as a parting gift of 'Burpee's Bee Garden' seeds, inviting children to 'join the national bee and butterfly brigade!'" The article notes that "the giveaway is part of a new partnership between the Interior Department, Agriculture Department and Burpee aimed at distributing seeds for 1 million bee and butterfly gardens this summer."

ALASKA LAWMAKERS PUSH BILL TO SEIZE FEDERAL LANDS. The [Alaska Public Radio Network](#) (4/6, 2K) reports that Alaska lawmakers are "moving legislation to seize" federal lands. According to the article, "if the bill becomes law, Alaska could lay claim to nearly 170 million acres of federal land within the state." However, "there may be a slight problem: The federal government may not feel legally obligated to comply with the bill."

Also reporting on the story are the [Anchorage \(AK\) Dispatch News](#) (4/6, 146K) and [KTVA-TV Anchorage \(AK\)](#) Anchorage, AK (4/7, 1K).

INTERIOR POSTS VIDEO SHOWING TWO BEARS WITH A BASKETBALL IN ALASKA. [USA Today](#) (4/7, 4.95M) highlights a video posted by the Interior Department showing that "two adorable bears tried to play basketball in Alaska."

OBAMA ADMINISTRATION'S CLIMATE CHANGE POLICY CRITICIZED. In an op-ed for [US News & World Report](#) (4/6, 685K), John Horning, executive director of WildEarth Guardians, writes that President Barack Obama's "latest pledge to reduce greenhouse gases seems poised to keep our nation moving backward." According to Horning, "while he committed to reducing greenhouse gases within the federal government by 40 percent over the next decade, he completely ignored one of the most significant sources of greenhouse gas emissions under his control: fossil fuel production from public lands owned by every American." He notes that "a report released by The Wilderness Society and the Center for American Progress on the same day the president issued his newest climate promise found that oil, gas and coal produced from federally managed public lands are responsible for a whopping 21 percent of all U.S. greenhouse gases."

[America's Great Outdoors:](#)

National Park Service:

CONTINUING COVERAGE OF "FIND MY PARK" CAMPAIGN. [My Print Resource](#) (4/7) reports that "the out of home (OOH) advertising industry has partnered with the National Park Foundation, the official charity of America's national parks, to help launch a nationwide public service campaign celebrating the centennial anniversary of the National Park Service (2016)." According to the article, "part of a multi-faceted two-year public awareness effort encouraging people of all backgrounds, particularly millennials, to discover and reconnect with their public lands, the OOH campaign will help drive awareness and understanding of parks and deepen public engagement." In June, the OOH industry will "launch Phase 2 with equally visually powerful executions that will juxtapose images of a well-known national park with lesser-known national parks and National Park Service programs, further pushing awareness and understanding of all that the National Park Service is and does." In 2016, Phase 3 OOH creative will focus on celebrating the centennial.

Also providing coverage is the [AV Network](#) (4/7).

NPS DIRECTOR JARVIS FAVORS RECOMMENDING NATIONAL MONUMENT STATUS FOR WACO MAMMOTH SITE. The [Waco \(TX\) Tribune-Herald](#) (4/7, 111K) reports that NPS Director Jon Jarvis said "he will recommend national monument status for the Waco Mammoth Site assuming he finds community support for it at a public meeting tonight." Jarvis "took an hour-long tour of the mammoth site Monday afternoon and planned to attend a public meeting on the federal designation Monday at 6:30 p.m. at the Mayborn Museum, 1300 University Parks Drive." Jarvis said, "The partnership that's already in place with the city and Baylor and the foundation has done a great job. The facilities are well-designed and efficient parking, access and signage. ... t looks like a park."

Additional coverage was provided by [KXXV-TV Waco \(TX\)](#) Waco, TX (4/7, 1K).

OLD SLAVE QUARTERS AT CLERMONT FARM RECEIVES FUNDING FOR RESTORATION. The [AP](#) (4/7, Press) reports that "a wooden building at Clermont Farm that once served as slave quarters is being restored." James K. Hare with the Virginia Department of Historic Resources said that "Clermont qualified for a \$165,000 grant from the National Park Service to rehabilitate the building."

USS ARIZONA MEMORIAL DEDICATED. The [Arizona Republic](#) (4/6, 1.14M) reports that "a new memorial has been dedicated in Bullhead City honoring those who died on the battleship USS Arizona." According to the article, "officials completed installation of a 7-foot long, 3-foot tall granite sign that now stands at the city's Arizona Veterans Memorial Park." The NPS and the U.S. Navy "refurbished the memorial site at Pearl Harbor, including getting a new granite sign."

BIGHORN SHEEP REINTRODUCED TO YOSEMITE. The [San Francisco Chronicle](#) (4/7, 2.21M) reports that the FWS is helping to reintroduce big horn sheep to Yosemite National Park. According to the article, "a herd of sheep was relocated from Inyo and Sequoia national parks to Yosemite." The article notes that "the effort involved moving the animals by helicopter into a remote range of Yosemite, where they were released in March."

NPS TO HOST EVENT AT PEARSON AIR MUSEUM. The [Battle Ground \(WA\) Reflector](#) (4/7) reports that the NPS at Fort Vancouver National Historic Site will "host an evening of events on Sat., April 11, 2015, at the Pearson Air Museum and Jack Murdock Aviation Center tied to the international Yuri's Night World Space Party event." According to the article, "Yuri's Night" will celebrate "the first person to orbit the earth in space: Soviet Cosmonaut Yuri Gagarin, who was launched into near earth orbit 54 years ago, on April 12, 1961."

ADDITIONAL COVERAGE OF EVENTS MARKING ANNIVERSARY OF END OF CIVIL WAR. Additional coverage of the events marking the end of the Civil War was provided by [Reuters](#) (4/6) and the [New Philadelphia \(OH\) Times-Reporter](#) (4/6, 54K).

ADDITIONAL COVERAGE OF MAINTENANCE BACKLOG AT NATIONAL PARKS. Additional coverage of the maintenance backlog at national parks was provided by

ADDITIONAL COVERAGE NPS TO MARK 150TH ANNIVERSARY OF LINCOLN FUNERAL TRAIN. Additional coverage that the NPS will mark the 150th anniversary of the Lincoln funeral train was provided by the [Washington \(DC\) Post](#) (4/6, Press, 5.17M), the [Freeport \(IL\) Journal-Standard](#) (4/6, 25K), the [Chicago \(IL\) Tribune](#) (4/6, Reports, 2.32M), the [Chicago \(IL\) Sun-Times](#) (4/7, 1.11M), and [Yahoo! News](#) (4/7, 5.81M).

SUPPORT URGED FOR CRATERS OF THE MOON NATIONAL PARK. In an editorial, the [Idaho Statesman](#) (4/6, 196K) wants to "see the original boundaries of Craters of the Moon National Monument get redesignated as a national park." The paper implores "the Idaho congressional delegation to get behind the idea."

Additional coverage was provided by the [Spokane \(WA\) Spokesman-Review](#) (4/6, 167K).

Bureau of Land Management:

SOCIAL MEDIA SUSPECTED IN CONTRIBUTING TO ROCK ART VANDALISM. [KSL-TV](#) Salt Lake City (4/7, 1.07M) reports on the "apparent spike in vandalism" at BLM lands in Utah. Artist Jonathan Bailey connects it to "the increase in blogs that provide descriptions of remote sites and the prevalence of social media posts that offer pictures of prehistoric artwork most people have never seen before."

COURT RULES AGAINST WILD HORSE ADVOCATES IN UTAH GRAZING SUIT. The [Law 360](#) (4/7, 9K) reports that "a Utah federal judge on Friday turned back efforts by nonprofit wild horse advocacy groups to derail a suit brought by Utah ranchers against the U.S. Bureau of Land Management over livestock grazing areas, ruling that the ranchers had met the necessary pleading requirements." U.S. District Judge Dee Benson held "in favor of a coalition of ranchers, local governments and small businesses accusing the BLM of failing to control wild horse populations in livestock grazing areas."

Fish and Wildlife Service:

STATES CONSIDER BANNING TRADE IN IVORY AND RHINO HORN. The [National Geographic](#) (4/7, 32.58M) reports that "25 states have considered or are now considering legislation to restrict ivory and rhino horn sales within their borders." According to the article, "the groundswell of state action shows that an issue long thought of as the responsibility of national governments and international organizations is becoming more grassroots and personal." FWS Director Dan Ashe said, "The ivory poaching and trafficking crisis is a complex problem that requires action on multiple levels to ensure that commercial trade doesn't contribute to the slaughter of elephants in the wild." He added, "As we work to make it harder for criminals to launder illegal ivory into international and interstate commercial trade, it's encouraging to see states taking action within their own borders."

ENDANGERED STATUS PROPOSED FOR CRAYFISH. [The Hill](#) (4/7, Devaney, 224K) reports that the FWS is "proposing new protections for certain crayfish." The agency "proposed Monday to list the Big Sandy crayfish found in Kentucky, Virginia and West Virginia as an endangered species." The service is "also looking to list the Guyandotte River crayfish found in West Virginia as endangered."

Additional coverage was provided by [McClatchy](#) (4/7, Cockerham, Subscription Publication, 17K), the [Charleston \(WV\) Gazette](#) (4/6, 13K), the [Houston \(TX\) Chronicle](#) (4/7, 2.28M), the [Washington \(DC\) Post](#) (4/6, Press, 5.17M), and the [Louisville \(KY\) Courier-Journal](#) (4/6, 379K).

FWS DECIDES AGAINST PROTECTION FOR COASTAL PACIFIC MARTEN. The [AP](#) (4/7, 2.28M) reports that "federal biologists have decided that no Endangered Species Act protections are warranted for coastal populations of the Pacific marten, a forest predator that is a relative of the weasel." The FWS said Monday that "it looked at the harmful effects of wildfire, climate change, logging, development, trapping and exposure to rat poisons at marijuana plantations, and none of those rose to the level individually, or cumulatively, of warranting a listing." The article notes that "conservation groups sought the listing and say that finding is not supported by the science."

Additional coverage was provided by the [Eureka \(CA\) Times Standard](#) (4/6, 56K) and the [North Coast Journal](#) (4/6).

ENVIRONMENTALISTS SUE OVER GRAND TETON GRIZZLY TAKE LIMIT. The [AP](#) (4/7, Gruver, 644K) reports that "two environmental groups have filed a lawsuit saying Grand Teton National Park and the U.S. Fish and Wildlife Service would allow too many grizzly bears to be killed in confrontations with elk hunters before officials would have to reassess their rules for elk hunting in the park." The Sierra Club and Western Watersheds Project filed suit Friday against the National Park Service and Fish and Wildlife in U.S. District Court in Washington, D.C. Their lawsuit "claims the higher take limit fails to account for cumulative threats to grizzlies throughout the region."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (4/7, Gruver, 2.28M), [Reuters \(UK\)](#) (4/6, 5K), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (4/7, 1.07M).

JUDGE INVALIDATES "TAKE" PERMITS FOR CALIFORNIA LOGGING PLAN. The [AP](#) (4/7, 2.28M) reports that "a federal judge in California says wildlife officials were wrong to grant a company permission to harm threatened species while logging private land." U.S. Magistrate Judge Nathanael Cousins "invalidated incidental take permits for the northern spotted owl and a population of coho salmon that federal officials granted to Fruit Growers Supply Company." Cousins said the FWS "wrongly factored conservation efforts by the U.S. Forest Service into Fruit Growers' plan to mitigate its impact on the spotted owl."

STATES SEEK TO AVOID SAGE GROUSE LISTING . The [Salem \(OR\) Capital Press](#) (4/6, 113K) reports that "with an endangered species decision on the horizon, Western landowners and public agencies seek collaborative ways to conserve or improve greater sage grouse habitat." According to the article, "if greater sage grouse are listed as threatened or endangered later this year, it won't be for lack of expensive conservation efforts in the 11 Western states where the bird lives." The article notes that "all across the West, landowners and management agencies are cutting intrusive conifer trees, marking fences to prevent in-flight collisions and doing other work to protect a bird whose potential Endangered Species Act listing has been described as the 'spotted owl on steroids.'"

AGREEMENT FINALIZED TO REOPEN WILLOW BEACH NATIONAL FISH HATCHERY. The [Arizona State University Cronkite News](#) (4/7) reports that the FWS and Arizona Game and Fish Department "finalized an agreement late last week to reopen Willow Beach National Fish Hatchery, a federal facility that stocked the river below the Hoover Dam." Sen. John McCain said that "the agreement between state and federal agencies will bring back tourism and fishing dollars."

TRIBES OPPOSE DELISTING OF YELLOWSTONE GRIZZLY. The [Indian Country Today Media Network](#) (4/6, 49K) reports that "the Pawnee Tribe of Oklahoma has joined the Shoshone-Bannock Tribes in opposing the delisting of the Yellowstone grizzly from endangered species status, in particular because such a move would allow trophy hunting, leaders say." Meanwhile, "on April 6 a group of conservationists and tribes sued over the hunting of grizzlies that interfere with the sanctioned elk hunt in nearby Grand Teton National Park."

ADDITIONAL COVERAGE OF LISTING OF NORTHERN LONG-EARED BAT. Additional coverage of the listing of the northern long-eared bat was provided by the [Huffington Post](#) (4/7, 281K), the [Bellingham \(WA\) Herald](#) (4/6, 89K), the [Houston \(TX\) Chronicle](#) (4/7, 2.28M), the [Raleigh \(NC\) News & Observer](#) (4/7, 395K), the [Allentown \(PA\) Morning Call](#) (4/6, 343K), and the [Courthouse News](#) (4/6, 7K).

Securing America's Energy Future:

Onshore Energy Development:

INTERIOR AGENCIES TO HOLD FORUM ON NATIVE TRUST LANDS. [The Missoulian \(MT\)](#) (4/7, 113K) reports that the Interior Department officials, including representatives from the Office of Natural Resources Revenue, the Bureau of Indian Affairs, the Bureau of Land Management and the Office of the Special Trustee for American Indians, will hold a forum on Thursday, April 16, at the Payne Family Native American Center on the campus of the University of Montana for Native American land owners. According to the article, "the forum is for individual Native Americans property owners whose land is held in trust by the federal government, and is open to anyone who falls into that category, regardless of what tribe they belong to or where their allotment is located."

The story also appears at the [Ravalli \(MT\) Republic](#) (4/7, 19K).

ONRR LAUNCHES INTERACTIVE WEBSITE TRACKING EXTRACTIVE REVENUE. [Government Computer News](#) (4/6, 2K) reports that "the Interior Department's Office of Natural Resources Revenue has launched an open data website tracking revenue the government makes from the coal, natural gas and oil that is extracted from public lands." According to the article, "the new USEITI portal compiles information on how revenue is generated from resources on federal lands and where that money goes." The article notes that "besides the high-level overview, the site also lets users filter and sort by time frame, location, commodity, company and revenue types."

NEW MEXICO OIL AND GAS GROUP TO LAUNCH MEDIA CAMPAIGN. The [AP](#) (4/6, 2.28M) reports that "the New Mexico Oil and Gas Association is hitting back at environmentalists with a new promotional campaign." According to the article, "the organization will debut a 30-second commercial May 1 to spotlight its importance to the state's economy." Spokesman Wally Draper said "the campaign is meant to counter environmental groups who recently got the federal Bureau of Land Management to

Additional coverage was provided by the [Midland \(TX\) Reporter-Telegram](#) (4/7, 43K) and the [San Francisco \(CA\) Chronicle](#) (4/7, 2.21M).

THOMPSON DIVIDE REGION OIL, GAS LEASES SWAP ENVISAGED. The [Denver Post](#) (4/6, Stroud, 804K) reports that energy companies SG Interests and Ursa Operating Co are proposing oil and gas leases in the Thompson Divide region in exchange for leases on public lands in other parts of western Colorado, in a bid to resolve a controversy over drilling in the area south of Glenwood Springs. The proposal calls on Colorado Sens. Michael Bennet and Cory Gardner and 3rd District US Rep. Scott Tipton to support a lease exchange. "Both SG and Ursa have approached us about signing a letter of support," Garfield County Commissioner Tom Jankovsky said, adding, "This could be a very positive step on both sides, and hopefully there will be room to negotiate and move this forward."

RECENT EARTHQUAKE ACTIVITY IN OKLAHOMA NOTED. The [CBS Evening News](#) (4/6, story 9, 2:40, Glor, 5.08M) broadcast that Oklahoma, which experienced five earthquakes yesterday, has felt 46 of them "in the past week, and more than 2,400 in the past year." According to CBS, a "2014 study posted online in Science connected thousands of small earthquakes to oil and gas production." However, noted CBS, "Kim Hatfield with the Oklahoma Independent Petroleum Association says the science to prove a definitive link simply isn't there."

ADDITIONAL COVERAGE OF NEW FRACKING REGULATIONS. Additional coverage of the new fracking rules was provided by the [Indian Country Today Media Network](#) (4/6, 49K) and [KXMC-TV Minot \(ND\)](#) Minot, ND (4/7, 1K).

Offshore Energy Development:

GREENPEACE ACTIVISTS BOARD SHELL DRILLING PLATFORM IN PACIFIC. [NBC News](#) (4/7, 2.71M) reports that "six Greenpeace activists boarded a Shell oil drilling ship Monday in the middle of the Pacific Ocean and vowed to stay there to protest the company's plans to drill above the Arctic Circle, the environmental organization said." Royal Dutch Shell "confirmed that the protesters 'illegally boarded the Polar Pioneer' about 750 miles northwest of Hawaii on Monday morning." The company "called the protest a 'stunt' that jeopardizes both the crew and the protesters themselves."

Additional coverage was provided by the [Seattle \(WA\) Post-Intelligencer](#) (4/6, 612K) and the [Seattle \(WA\) Stranger](#) (4/6, 162K).

SEISMIC TESTING PERMITS TO RECEIVE PUBLIC HEARING. The [Charleston \(SC\) Post and Courier](#) (4/6, 295K) reports that federal permits for nine companies that "want to use seismic guns to search for oil and natural gas off the South Carolina coast" are up for public hearing Wednesday. The article notes that "the hearing comes amid a swell of opposition that has been mounting since federal regulators last year gave a preliminary nod to the permits, opening an evaluation period by federal and state agencies."

PEMEX SEARCHING FOR THREE MISSING WORKERS AFTER GULF RIG FIRE. [BBC News](#) (4/6, 1.66M) reports that on Monday Pemex said it's still looking for three missing workers following last week's rig fire aboard the Abkatun A-Permanente oil platform in the Campeche Sound of the Gulf of Mexico. So far there have been four fatalities from the blaze, with more than 300 workers evacuated from the rig. Area production after the blaze fell from 650,000 bpd to 430,000 bpd.

[ABC News](#) (4/6, 3.41M) reports that Pemex is expecting to restore 80% of pre-fire production within the week, according to general director of exploration and production Gustavo Hernandez.

Tackling America's Water Challenges:

NBC NEWS ANALYSIS CALIFORNIA DROUGHT COULD "SPARK" DEVASTATING FIRE SEASON. [NBC Nightly News](#) (4/6, story 7, 2:20, Holt, 7.86M) reported that scientists are warning that the ongoing drought in California and the West "could spark a fire season even worse than last year's devastation reaching perhaps historic proportions." NBC (Almaguer) adds that "firefighters called it the year of the firestorm. 2014, millions of acres were destroyed as hundreds of homes across the west went up in flames. This year the outlook is even more dire. The forecast calling for bigger, more explosive fires fueled by conditions not seen in decades."

Rain Arrives In California, But Not Sufficient To Ease Drought. [ABC World News](#) (4/6, story 5, 1:10, Muir, 5.84M) reported that tonight, there is "some relief" for the drought in California, "but hardly enough," with the arrival of a "spring storm packing drenching rain, even snow." ABC (Zee) says the storm "is a help," but "we need a major pattern shift to make this drought go away and that's not going to help."

Fiorina: "Liberal Environmentalists" To Blame For California's "Man-Made" Drought. [Politico](#) (4/6, Breitman, 669K) reported that ex-Hewlett Packard CEO Carly Fiorina, who has said that she's likely to run for president next year, on Monday blamed "liberal environmentalists for what she" called "a 'man-made' drought in California." Commenting on the drought during an appearance on Blaze Radio, Fiorina said, "It is a man-made disaster," adding, "California is a classic case of liberals being willing to sacrifice other people's lives and livelihoods at the altar of their ideology." Fiorina went on to assert that "despite the fact that California has suffered from droughts for millennia, liberal environmentalists have prevented the building of a single new reservoir or a single new water conveyance system over decades during a period in which California's population has doubled."

Additional Coverage Of California Drought. Additional coverage of the drought in California was provided the [Durango \(CO\) Herald](#) (4/5, 28K).

BOR ANNOUNCES SOME IRRIGATORS IN YAKIMA RIVER BASIN WILL RECEIVE 60% OF NORMAL WATER. The [AP](#) (4/7, 2.28M) reports that the BOR announced Monday that holders of junior water rights in the Yakima River basin will "likely get just 60 percent of their normal water." The article notes that "that's significantly worse than the March estimate of 73 percent of normal."

Additional coverage was provided by the [Salem \(OR\) Capital Press](#) (4/6, 113K), the [Yakima \(WA\) Herald-Republic](#) (4/7, 86K), [KAPP-TV Yakima \(WA\)](#) Yakima, WA (4/6, 159), and [KVEW-TV Kennewick \(WA\)](#) Kennewick, WA (4/6, 283).

NEW DEPUTY POWER MANAGER AT GRAND COULEE DAM NAMED. The [Oregonian](#) (4/7, 950K) reports that the BOR's Pacific Northwest Region has selected Tim Koczur as the new deputy power manager at Grand Coulee Dam.

GROUP RELEASES LIST OF ENDANGERED RIVERS. The [Arizona Republic](#) (4/7, 1.14M) reports that "the Grand Canyon stretch of the Colorado tops American Rivers' list of endangered rivers this year because of cumulative threats to scenery and spring water from commercial and residential development plans, and from a push to restart major uranium mining." The article notes that "the designation marks the third year in a row that all or part of the drought-sapped river has been at or near the top of the advocacy group's 32nd annual watch list of rivers it feels face potentially harmful actions or decisions in the coming year."

Also providing coverage is the [National Geographic](#) (4/7, 32.58M).

Empowering Native American Communities:

STANDING ROCK LANDOWNERS SENT BUY-BACK OFFERS. The [Rapid City \(SD\) Journal](#) (4/7, 101K) reports that "more than 16,000 landowners with fractional interests in land at the Standing Rock Indian Reservation in North Dakota and South Dakota are receiving buy-back offers." The Interior Department says that "nearly \$200 million in purchase offers are in the mail."

INCREASED FUNDING FOR BUREAU OF INDIAN EDUCATION SCHOOLS SOUGHT. The [Wadena \(MN\) Pioneer Journal](#) (4/7, 11K) reports that "increasing funding for Bureau of Indian Education schools is a goal for U.S. Rep. John Kline, R-Minn." Kline, chairman of the House education committee, is "lobbying the Appropriations Committee to increase spending \$60 million." Kline said, "Significant health and safety hazards exist at America Indian education facilities across the country, including the Bug-O-Nay-Ge-Shig School of the Leech Lake Band of Ojibwe. The federal government has made a commitment to American Indian students and families to provide educational opportunities in a manner that preserves their culture, language and traditions. Unfortunately, we are failing to meet that commitment."

INTERIOR SEEKS TO HAVE CLAIMS TOSSED IN NAVAJO JUDICIAL FUNDING CASE. The [Law 360](#) (4/7, 9K) reports that the Interior Department "asked a Washington, D.C., federal judge on Friday to toss claims that it missed the deadline on a Navajo Nation \$17 million judicial funding request, saying the clock started later than alleged because of the 2013 government shutdown." The Interior Department "countered claims that the U.S. Bureau of Indian Affairs missed deadlines and therefore unlawfully denied a \$17 million funding request, more than 13 times its prior year's funding level, saying that its workers were furloughed by the 2013 government shutdown."

COURT TO HEAR NATIVE'S USDA WITNESS INTERFERENCE CLAIMS. The [Law 360](#) (4/7, 9K) reports that "the D.C. Circuit said Friday it would further consider an

MAN DIES IN CRASH ON UTE INDIAN RESERVATION. [KSL-TV](#) Salt Lake City (4/7, 1.07M) reports that “one person died and at least two others were hospitalized after the driver of a sport utility vehicle lost control and rolled while fleeing from a Bureau of Indian Affairs police officer Sunday, according to the Utah Highway Patrol.” BIA police are “handling the criminal investigation with assistance from the FBI because the crash happened within the boundaries of the Uintah and Ouray Indian Reservation and involved enrolled tribal members.”

Top National News:

OBAMA LINKING IRAN'S ISRAEL STANCE TO NUCLEAR TALKS “A FUNDAMENTAL MISJUDGMENT.” Coverage of the Iranian nuclear framework follows several tracks. Beyond the coverage of the Administration's ongoing campaign to win support for the agreement, coverage focuses on Capitol Hill dissension, where Senate Foreign Affairs Chairman Bob Corker's bill requiring the Administration to submit a final accord to Congress for consideration is nearing a 67-vote veto-proof majority in the Senate. Sen. Charles Schumer's endorsement of the bill Monday is portrayed as a blow to the Administration, albeit an expected one. The President's interview with NPR will not air until later this morning, but both CBS and NBC, as well as several newspapers, reported on the brief excerpts that have been made available so far. For the second night in a row, ABC was the only broadcast network to not cover the Iran story at all.

On its website, [NPR](#) (4/7, 1.58M) previews Steve Inskeep's interview with the President, who responded to Israeli Prime Minister Benjamin Netanyahu's argument that the agreement would put Israel at risk, saying, “The notion that we would condition Iran not getting nuclear weapons in a verifiable deal on Iran recognizing Israel is really akin to saying that we won't sign a deal unless the nature of the Iranian regime completely transforms. And that is, I think, a fundamental misjudgment. ... We want Iran not to have nuclear weapons precisely because we can't bank on the nature of the regime changing.”

In a brief report, the [CBS Evening News](#) (4/6, story 5, 1:00, Glor, 5.08M) said the President “kept up his efforts to win support” for the deal, using “strong words” in the NPR interview “to address concerns both here and in Israel.” [NBC Nightly News](#) (4/6, story 5, 2:05, Holt, 7.86M) also opened its Iran coverage with the interview, reporting that the President “said it would be a ‘fundamental misjudgment to try and force Iran to recognize Israel as part of a nuclear deal,’ as Israel is demanding.”

In a short item on the interview, the [AP](#) (4/7) reports the President said “it would be ‘a fundamental misjudgment’ to condition a nuclear deal with Iran on the country changing its hostile stance toward Israel,” saying he is “trying to stop Iran from developing nuclear weapons ‘precisely because we can't bank on the nature of the regime changing.’” [USA Today](#) (4/7, Jackson, 4.95M) also highlights that comment, noting that the interview “is part of an administration media campaign designed to win support for the idea of an Iranian nuclear agreement.”

[The Hill](#) (4/6, Wong, 224K) says the Administration has been “selling the merits of the deal to the public and skeptical members of Congress.” [TIME](#) (4/7, Rhodan, 19.19M) writes on its website that “the White House has been playing offense on the outline of the deal.” [Reuters](#) (4/7, Mason) and [Politico](#) (4/6, Breitman, 669K) also have brief items about the interview excerpts. In addition, the [Jerusalem Post](#) (4/6, Lazaroff, 31K) reports on the President's weekend interview with Thomas Friedman of the New York Times, writing that “in a calm and measured voice Obama explained that this deal is the best diplomatic option.”

The [Washington Times](#) (4/7, Wolfgang, 644K) reports White House Press Secretary Josh Earnest said Iran is insisting that all economic sanctions be lifted immediately after a final agreement is reached, but the US “will not accept such a scenario, Mr. Earnest said, and will only agree to a final deal if sanctions relief is ‘phased in’ over a period of months or years.” [Reuters](#) (4/7, Chiacu, Mason) reports Earnest said Iran will have to show compliance over time before sanctions are lifted.

[Politico](#) (4/6, Toosi, 669K) reports that “a group of 30 US specialists on nuclear security” endorsed the framework Monday, signing a letter urging US policymakers to back the plan. Signatories included former State Department Special Adviser for Nonproliferation and Arms Control Robert Einhorn and ex-UN Ambassador Thomas Pickering.

The [Washington Post](#) (4/7, 5.17M) says in an editorial that Obama's insistence that the framework is the “best bet” to keep Iran from obtaining a nuclear weapon may become “self-fulfilling.” The Post says that “by loudly insisting there is no alternative to the terms he has agreed to, Mr. Obama helps ensure that the option of maintaining sanctions while insisting that Iran agree to dismantle more of its nuclear infrastructure – as Israel and some in Congress advocate – is no longer a practical alternative.”

[USA Today](#) (4/7, 4.95M) contributor Jonah Goldberg writes, “Maybe Obama sees something no one else does. At home and abroad, Obama has an invincible confidence that he understands everyone's self-interest better than they do.” But “the players in the region don't think so.” Goldberg says Obama “has calculated that the bloodshed, chaos and frayed alliances are worth it if he can be remembered as the president who opened the door to Iran. Those benefits, if they ever arise, may come at the expense of losing a hell of a lot more.”

Eugene Robinson writes in his [Washington Post](#) (4/7, 5.17M) column, “I believe the change is clearly – perhaps historically – for the better.” Robinson concedes that “the regime in Tehran is an odious theocracy,” but writes that “like most governments it displays an interest in self-perpetuation. With its size, population and oil wealth, Iran does not need nuclear weapons to be a regional superpower.” But it does need “the economic development that will come as sanctions are lifted.”

Moniz Said Plan Based On Requirements, Not “Trust.” The [AP](#) (4/7, Lederman, Cass) reports the White House also “deployed Energy Secretary Ernest Moniz – a nuclear physicist – to offer a scientific defense” of the deal. Moniz said, “This is not built upon trust. This is built upon hard-nosed requirements in terms of limitations on what they do, at various timescales, and on the access and transparency.” [The Hill](#) (4/6, Fabian, 224K) reports that during his appearance before reporters in the White House Briefing Room, Moniz said, “it's not a fixed-year agreement; it's a forever agreement.”

On [NBC Nightly News](#) (4/6, story 5, 2:05, Holt, 7.86M), Chris Jansing called it a “surprise appearance” by Moniz, saying that his “hair made him an internet sensation, but he's a nuclear physicist who's taking the lead selling the science of the deal now embroiled in politics.”

Schumer Publicly Endorses Corker Bill, Which Is Closing In On 67 Senate Votes. [Politico](#) (4/6, Everett, 669K) reports Senate “Democratic leader-in-waiting” Schumer, “one of Capitol Hill's most influential voices in the Iran nuclear debate, is strongly endorsing passage” of legislation that would let Congress review a final Iran deal, illustrating “the enormity of the task ahead” for the White House. In an emailed statement, Schumer said, “This is a very serious issue that deserves careful consideration and I expect to have a classified briefing in the near future. I strongly believe Congress should have the right to disapprove any agreement and I support the Corker bill which would allow that to occur.” [Politico](#) notes Schumer signed on as a co-sponsor two weeks ago, so the statement was not a surprise, but he had so far not been vocal about his support.

[The Hill](#) (4/6, Carney, 224K) reports in its “Floor Action” blog that Sen. Ben Cardin, now the ranking Democrat on the Foreign Relations Committee, also said Monday that Congress should have the chance to vote on a deal. [McClatchy](#) (4/6, Wise, Subscription Publication, 17K) writes that Senate Republicans need 13 members of the Democratic caucus to back the bill if they hope to reach the 67 votes needed to overcome a presidential veto, and so far, nine have said they will. Three others have indicated they are likely to support it, which leaves undecided Sen. Claire McCaskill as a possible “pivotal vote.”

[Roll Call](#) (4/6, Lesniewski, Subscription Publication, 102K) reports Senate Majority Leader McConnell said Monday that the Senate will quickly move Senate Foreign Affairs Chairman Bob Corker's bill, and said, “Iran's support of Hezbollah, the Assad regime, Shia militias in Iraq, Houthi insurgents in Yemen – along with its ongoing nuclear ambitions – reveal an ongoing effort to both expand the Iranian sphere of influence throughout the greater Middle East and undermine America's standing and presence in the region.”

The [New York Times](#) (4/7, Parker, Baker, Subscription Publication, 9.97M) runs a sympathetic feature on Corker, saying that while “at the White House, nobody likes his bill,” the President and his advisers “see him as someone who might work with them to revise the legislation and ultimately make a deal.” The Times says Corker “often seems like a senator from another time, an era when reaching out to the other side was more the norm. He sees his mandate as criticizing the president for his failings but searching for a way to forge agreement.”

Israel Asks Tough Questions About Plan, Says Military Action “Still On The Table.” The [AP](#) (4/7, Bernstein) reports Israeli Minister for Strategic Affairs Yuval Steinitz, “a confidant of Prime Minister Benjamin Netanyahu,” warned Monday that Israel reserved the option of military action against Iran. He told reporters, “It was on the table. It's still on the table. It's going to remain on the table. Israel should be able to defend itself, by itself, against any threat. And it's our right and duty to decide how to defend ourselves, especially if our national security and even very existence is under threat.” [AFP](#) (4/7) also reports on Steinitz's comments.

The [Jerusalem Post](#) (4/6, Lazaroff, 31K) reports Deputy National Security Adviser Ben Rhodes made similar comments in an interview with Israeli television, saying, “Certainly if Iran violates the agreement all options are on the table related to Iran, including military options.” Steinitz and other Israeli officials offered a policy paper with 10 questions Israel feels must be answered. Among them: “Why are sanctions that took years to put in place being removed immediately (as the Iranians claim)?”; “What will be the fate of Iran's stockpile of enriched uranium?”; and “Why does the framework not address Iran's intercontinental ballistic missile program, whose sole purpose is to carry nuclear payloads?” The Israeli officials also ask how the framework differs from the nuclear agreement with North Korea, which has been ineffective.

"an end to all research and development activity on advanced centrifuges in Iran," a "significant reduction in the number of centrifuges" left open or able to be made operational quickly, and the ability "for inspectors charged with verifying the agreement to go 'anywhere, anytime' in Iran." The [Wall Street Journal](#) (4/7, Casey, Subscription Publication, 5.67M) says that Israel probably does not expect the P5+1 powers to press for all the demands, but rather to set a firm line for Israel's push against the deal.

The [Huffington Post](#) (4/6, Gordts, 281K) reports that former Mossad Director Efraim Halevy "harshly critiqued" Netanyahu's rejection of the agreement "in a scathing op-ed" Monday, writing, "For decades, Iran rejected the international community's demand to hold talks of any kind with respect to its nuclear program. The interim agreement reached in Lausanne proves that Tehran capitulated, by agreeing to conduct negotiations about its plans and the nuclear infrastructure it has built up for years, primarily in secret."

But columnist Ben-Dror Yemini of Israel's [YNET News](#) (4/6, 7K) takes a very different position and says comparing the agreement to the 1938 Munich meeting "lets Iran off lightly. Because Germany at the time, despite being a dark country, wasn't calling for 'Death to England' or 'Death to the Jews.' ... The Iran of today, however, has been singing its genocidal mantra for years." He writes that "just recently, Supreme Leader Ali Khamenei himself joined the masses in calling for 'Death to America,'" and that Tehran continues to back Hezbollah and other radical groups.

Saudi Arabia Offers "Cautious" Endorsement Of Framework. [Politico](#) (4/6, Lerner, 669K) reports Saudi Arabia "released a cautious statement" Monday endorsing the framework, saying, "The Council of Ministers expressed hope for attaining a binding and definitive agreement that would lead to the strengthening of security and stability in the region and the world." Politico says "the careful Saudi embrace of the Iran deal stands in contrast to that of Israel." In addition, the [Los Angeles Times](#) (4/7, Hennigan, 3.49M) reports Saudi Ambassador to the US Adel Jubeir, said Monday, "We hope there will be a deal based on the principles that the US government has articulated to us."

The [Christian Science Monitor](#) (4/6, Luck, 380K) writes that Saudi Arabia "has offered cautious praise" for the agreement, but that Riyadh remains concerned about its regional rival's "support for Shiite militant groups across the Middle East." Gerald F. Seib writes in his [Wall Street Journal](#) (4/7, Seib, Subscription Publication, 5.67M) column that Iran is the primary concern of Saudi Arabia and other Gulf states, and that it is not yet clear if their governments trust the US to shield them. Seib says a diplomatic failure could lead the Saudis to pursue their own nuclear weaponry.

Iran Making Investments In Cyberspace Capabilities. The [Washington Post](#) (4/7, Timberg, 5.17M) reports that while the world's focus is on Iran's nuclear program, Tehran "has been bolstering its ambitions in cyberspace." Iran has rolled out 3G and 4G cellular service and "inaugurated a new, high-capacity data link to Europe" in recent years, and has experienced a surge in new IP addresses. Experts "see little evidence that these steps are intended to bolster Iran's already formidable cyberwar capabilities," and instead seem aimed at improving "civilian technology that could help Iran build a more modern, open economy, especially if" sanctions are loosened or lifted.

Supreme Court Seeks DOJ Views On Appeal By Iranian Central Bank. [Reuters](#) (4/7, Hurley) reports the Supreme Court has asked the Justice Department to weigh in on whether the Court should hear the appeal filed by Bank Markazi, Iran's central bank, over whether the bank is liable for \$1.75 billion in payments to the families of US troops killed in the 1983 Beirut Marine Corps barracks bombing. The bank argues that a 2012 law addressing the funds violates the Constitution by telling a court how it must rule in a legal matter.

ADMINISTRATION WORRIED AL SHABAAB WILL STRIKE ON US SOIL. The [New York Times](#) (4/7, Gettleman, Subscription Publication, 9.97M) reports that al Shabaab operates "on a shoestring budget," but last week's attack in Kenya showed that the group has "become proficient in something terrible: mass murder on the cheap." The group has "slaughtered hundreds of people and shaken Kenya" with "just a few men and a handful of light weapons," and its fighters "are proving to be frighteningly resilient." The Times adds that the Administration is "deeply worried" that the group "might strike on American soil."

An editorial in the [Washington Post](#) (4/7, 5.17M) says the Kenya attack "highlights the limitations of President Obama's light-footprint counterterrorism model in weak states such as Somalia and Yemen." The Post argues that "missile strikes and small Special Operations advisory teams alone will not deliver security" to such places, adding that they "need more help with governance and development."

Kenya Launches Airstrikes Against Islamic Militants In Somalia. Bret Baier reported on [Fox News' Special Report](#) (4/6, 1.53M) that Kenya's president "has vowed harsh measures against al-Shabaab terrorists based in Somalia" in retaliation for last week's attack on a college campus, in which 148 students were killed, and David Muir reported on [ABC World News](#) (4/6, story 8, 0:20, Muir, 5.84M) that Kenya is "dropping bombs on two al-Shabaab camps in Somalia," while the [Washington Post](#) (4/7, Higgins, Branigin, 5.17M) says Kenyan warplanes bombed "al-Shabab positions on Sunday afternoon and Monday morning." Military spokesman Col. David Obonyo said the planes "pounded camps in Gondodowe and Ismail, both in the Gedo region bordering Kenya, news agencies reported."

The [AP](#) (4/7, Torchia, Odula) reports that Obonyo said that while the camps, "which were used to store arms and for logistical support, were destroyed," it was "not possible to determine the number of casualties because of poor visibility." Meanwhile, [Reuters](#) (4/7, Jorgic, Honan) says al Shabaab said none of its camps were destroyed and the fighter jets hit farmland.

On the [CBS Evening News](#) (4/6, story 6, 2:10, Glor, 5.08M), Debora Patta reported on the criticism of Kenya's immediate response to the attack, noting that the Interior Ministry "concede[s] that if they got there sooner, they could have saved lives, but it's complicated. The bomb disposal unit went by road. That's six hours. And the local military is not trained to deal with terror attacks."

Kenya Offers \$200,000 Reward For Attack Mastermind's Capture. Barbara Starr reported on [CNN's Situation Room](#) (4/6, 554K) that according to Kenyan authorities, Mohammed Mohamad, masterminded the Kenya university attack. Mohamad is "a regional commander in al-Shabaab," and "commands a militia along the border with Somalia." [USA Today](#) (4/7, Bacon, 4.95M) reports that the Kenyan government "is offering a \$220,000 reward" for his capture.

Kenyan Authorities Try To Trace Son Of Local Chief's Path To Terrorism. The [New York Times](#) (4/7, Kushkush, Gettleman, Subscription Publication, 9.97M) reports that Kenyan authorities are trying to determine how Abdirahim Abdullahi, the son of a local chief, who was one of the gunmen in the university attack, "went from the competitive University of Nairobi law school, where he impressed other students with his quick wit, to being the terrorist the authorities contend he was."

LAWMAKERS, STATE AGS, MUNICIPALITIES FILE BRIEFS BACKING PRESIDENT ON IMMIGRATION. [Roll Call](#) (4/6, Ruger, Subscription Publication, 102K) reported that on Monday, 181 House Democrats filed a brief with the 5th Circuit Court of Appeals, arguing that the executive branch "has the authority to make the policy changes that President Barack Obama announced in November." The brief adds that the White House is "often better positioned than Congress to determine how to adjust to laws like immigration."

Meanwhile, the [Washington Times](#) (4/7, Dinan, 644K) reports that "dozens" of municipalities on Monday filed a brief "demanding a court allow President Obama's deportation amnesty to go into effect immediately, saying they want the tax revenue they think the newly legalized workers would bring." The group, led by New York City Mayor Bill de Blasio and Los Angeles Mayor Eric Garcetti, argued for the court to "overturn the injunction and speed the amnesty into effect."

The [Washington Post](#) (4/7, Weiner, 5.17M) reports that Virginia Attorney General Mark Herring (D) "joined attorneys general for 14 other states and the District of Columbia in filing a brief with a federal appeals court Monday that contends the president's November orders are both legal and beneficial." In a statement, Herring said, "While we're waiting on Congress to enact long overdue comprehensive immigration reform, the President has offered lawful, reasonable steps that will boost our economy, keep families intact, and promote public safety."

Editorial Wrap-Up:

NEW YORK TIMES. "Cuban Expectations In A New Era." The [New York Times](#) (4/7, Subscription Publication, 9.97M), in an editorial, says that while change is likely to "unfold slowly" in Cuba, "one change is already clear: the Obama administration's gamble on engaging with Cuba has made it increasingly hard for its leaders to blame their economic problems and isolation on the United States." Noting that approval among Cuban-Americans of the President's move to re-establish ties with Havana is rising, the Times says the Castro government "will have to reckon with the fact that many of the dissidents' aspirations are shared by most Cubans."

"Greece Should Be Wary Of Mr. Putin." The [New York Times](#) (4/7, Subscription Publication, 9.97M) writes in an editorial that as Greece faces "a series of daunting challenges," it "might be tempting — though misguided — for Prime Minister Alexis Tsipras to seek financial or other support from President Vladimir Putin" during talks Wednesday. But while Putin "clearly wants to lock arms with any leader who appears at odds" with the EU, the Times says Tsipras "should be careful not to let himself be used to undermine European unity."

WASHINGTON POST. "Obama's Iran Tightrope." The [Washington Post](#) (4/7, 5.17M) says in an editorial that President Obama's insistence that the Iran nuclear agreement framework is the "best bet" to keep Iran from obtaining a nuclear weapon may become "self-fulfilling." The Post says that "by loudly insisting there is no alternative to the terms he has agreed to, Mr. Obama helps ensure that the notion of maintaining sanctions while insisting that Iran cease to dismantle more of its nuclear infrastructure — on legal and

"The Massacre In Kenya." An editorial in the [Washington Post](#) (4/7, 5.17M) says the Kenya attack "highlights the limitations of President Obama's light-footprint counterterrorism model in weak states such as Somalia and Yemen." The Post argues that "missile strikes and small Special Operations advisory teams alone will not deliver security" to such places, adding that they "need more help with governance and development."

"Starving Metro To Save It."

WALL STREET JOURNAL. **"Washington's Latest Bank Heist."** In an editorial, the [Wall Street Journal](#) (4/7, Journal, Subscription Publication, 5.67M) criticizes the Justice Department and the Consumer Financial Protection Bureau for looking to punish banks for backing loans by car dealers that offer different rates to individuals. The Journal says that the move is underway despite no evidence having been presented that minorities are receiving worse loan rates than whites.

"Harry Reid's Nuclear Taxpayer Waste." An editorial in the [Wall Street Journal](#) (4/7, Subscription Publication, 5.67M) says Senate Minority Leader Reid's choice to chair the NRC, Gregory Jaczko, has cost taxpayers billions of dollars as a result of his efforts to block the nuclear waste repository at Yucca Mountain. Those efforts, the Journal argues, caused the Federal government to be in violation of agreements to accept spent nuclear fuel, prompting lawsuits from utilities, which the Department of Energy has spent more than \$4 billion over the last four years to settle..

"The Libby Injustice." The [Wall Street Journal](#) (4/7, Subscription Publication, 5.67M) editorializes that former New York Times reporter Judith Miller's book proves that Lewis "Scooter" Libby's conviction was unjustified, and urges the next Republican president to pardon Libby, as it argues former President George W. Bush should have done.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House

PRESIDENT OBAMA — Hosts an Easter Prayer Breakfast; receives the Presidential Daily Briefing; meets the Vice President for lunch; participates in a roundtable discussing

VICE PRESIDENT BIDEN — Delivers remarks at a housing affordability conference hosted by Secretary Julian Castro and the US Department of Housing and Urban Development; meets the President for lunch.

FIRST LADY MICHELLE OBAMA — Attends the United States Postal Service's dedication of the Maya Angelou Forever stamp.

US Senate No scheduled events.

US House March 31 – April 10. — The House will be in a district work period until Monday, April 13. No votes are expected in the House during the recess.

Other U.S. CHAMBER – WORKPLACE WELLNESS — 8:30 a.m. – 12:30 p.m. The U.S. Chamber of Commerce will host an event titled, "Innovations in Workplace and Community Wellness: Bridging Personal and Population Health." Speakers: Randel K. Johnson, Senior Vice President of Labor, Immigration and Employee Benefits, U.S. Chamber of Commerce; Jonathan Ballard, MD, MPH, MPhil, Ambulatory Services Medical Director, Department of Family and Community Medicine, University of Kentucky College of Medicine; Mark Fendrick, MD, Director, University of Michigan Center for Value-Based Insurance Design; Ron Goetzel, Ph.D., Senior Scientist and Director, Institute for Health and Productivity Studies, Johns Hopkins Bloomberg School of Public Health; Vice President and Applied Research, Truven Health Analytics; Daniel Stein, MD, Director of Medical and Clinical Services, Walmart. The forum will also address technological advancements and generational perspectives on health. <https://www.uschamber.com/event/innovations-workplace-and-community-wellness-bridging-personal-and-population-health> Location: U.S. Chamber Headquarters, 1615 H St. NW.

REP. LEE – HIV/AIDS AWARENESS DAY — 1 p.m. Congresswoman Barbara Lee will host a press call to mark National Youth HIV/AIDS Awareness Day, which is commemorated on April 10th. Participants: Congresswoman Barbara Lee, co-chair of the Congressional HIV/AIDS Caucus; Dr. Nadia Dowshen, Director of Adolescent HIV Services at the Craig-Dalsimer Division of Adolescent Medicine at the Children's Hospital of Philadelphia; Anndrekia Maha, National Youth HIV/AIDS Awareness Day Youth Ambassador; Brandon King, National Youth HIV/AIDS Awareness Day Youth Ambassador. <https://docs.google.com/forms/d/10zzAM19rx5TO5wsHZF-xZSIzmyVRPLLRjUqLdRmKreg/viewform>

NYU – CANTOR, SEBELIUS — 6 p.m. Eric Cantor, former U.S. House majority leader, and Kathleen Sebelius, former secretary of the U.S. Department of Health and Human Services, will be featured panelists in "Perspectives on the Shifting U.S. Health Landscape," to be held at New York University's D.C. Academic Center. Location: Abramson Family Auditorium, 1307 L Street, NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "Of course it's the presidential race for 2016, which continues to heat up. And get this – in a recent interview, Robert De Niro actually said that he hoped Hillary Clinton would be the next president. He gave her a very strong endorsement. He was like, 'She's pretty good.'"

Jimmy Fallon: "But President Obama still has a couple more years left. He's been traveling a lot recently. In fact, I saw that he just made his first presidential trip to the state of Utah. Obama spent his time in Utah just like you'd expect, by telling people, 'Uh, no, I don't play for the Jazz.'"

Jimmy Fallon: "Actually, I read that President Obama has now visited every state in the US except for South Dakota. But he's visited Afghanistan four times. Which explains South Dakota's new tourism slogan, 'South Dakota: Not as fun as Afghanistan.'"

Jimmy Fallon: "Jeb Bush is facing criticism after it was revealed that he checked off his race as Hispanic on a voter registration form back in 2009. When asked if he regrets it now, Bush was like, 'Si.'"

Jimmy Fallon: "Former Florida Governor Jeb Bush classified his race as Hispanic on the voter form. And if you think that lie is embarrassing, current Florida Governor Rick Scott classified his race as humanoid."

Seth Meyers: "According to 'The New York Times,' Jeb Bush identified himself as Hispanic on his 2009 voter registration form. While Hillary Clinton identified herself as 'President.'"

Seth Meyers: "President Obama said that today's Easter Egg Roll is 'always one of our favorite events,' and then Republicans accused him of not supporting Israel."

Conan O'Brien: "Today was the annual Easter Egg Roll on the White House lawn. Usually when you see something rolling on the White House lawn, it's a drunk Secret Service agent."

Conan O'Brien: "Sort of an embarrassing revelation of Jeb Bush. It's been found out that he listed himself on his voter registration card as Hispanic. When asked why, Jeb said it was the only way he could vote for the Latin Grammys."

Conan O'Brien: "Tea Party Senator Rand Paul revealed that his presidential campaign slogan is 'Defeat the Washington machine, unleash the American Dream.' Let me introduce his speech writer, Eminem."

DOI in the News:

PRESIDENT OBAMA CALLS FOR WIDENING ARCTIC REFUGE PROTECTIONS. [Reuters](#) (4/5, Gardner) reported that President Obama recommended the expansion of protected areas of Alaska's Arctic National Wildlife Refuge, calling on Congress to ban oil and gas drilling in some 12 million acres. "This area is one of the most beautiful, undisturbed places in the world. It is a national treasure and should be permanently protected through legislation for future generations," Obama said in a letter to House Speaker John Boehner. The Interior Department made the same recommendation in January but faced instant resistance from Republicans. Republican Lisa Murkowski of Alaska, the head of the Senate Energy and Natural Resources Committee, said, "We will continue to fight against the administration's efforts to impose new restrictions on Alaska's lands and resources," adding, "A congressional designation of the Coastal Plain as wilderness will not happen on my watch." Environmental groups for their part hailed the President's move to protect the Arctic National Wildlife Refuge.

Additional coverage was provided by [The Hill](#) (4/5, Cama, 224K), the [Washington Times](#) (4/6, Boyer, 644K) the [Huffington Post](#) (4/3, 281K), the [Anchorage \(AK\) Dispatch News](#) (4/3, 146K), the [Seattle \(WA\) Post-Intelligencer](#) (4/3, 612K), the [Ketchikan \(AK\) SitNews](#) (4/5), and the [Voice of America](#) (4/5, 70K).

CONSERVATIVES RELIEVED THAT PRESIDENT DIDN'T ANNOUNCE NEW UTAH NATIONAL MONUMENT. The [Washington Times](#) (4/6, Boyer, 644K) reports that "property rights advocates and conservatives" are "breathing a sigh of relief" after the President finished his first trip to Utah last week without "turning vast chunks of the state into a new national monument." The Times says that Utah Gov. Gary Herbert (R) "took advantage of a 30-minute motorcade ride with Mr. Obama on Thursday night to lobby the president on the state's public lands initiative," which would give the state more say in land use.

Support Urged For National Monument Designations. In an op-ed for the [Palm Springs \(CA\) Desert Sun](#) (4/3, 85K), Pastor Jesse Villarreal writes that "President Obama has used the Antiquities Act several times, particularly to protect cultural resources that represent the diverse faces of our nation." As a pastor, he believes that "the national monument designations made by our current and previous presidents under the Antiquities Act protect beautiful landscapes and historic sites where we can connect with our past and our faith." Villarreal concludes that "Presidents have been using the Antiquities Act effectively for over 100 years, and it is without question that this authority must be defended as a tool for preserving America's remarkable story for all those who come after us."

In an op-ed for the [Santa Fe New Mexican](#) (4/5, 49K), Peter Ives, a member of the Santa Fe City Council, supports a Civilian Conservation Corps/Works Projects Administration National Monument at the Old Santa Fe Trail Building.

In an op-ed for the [Arizona Republic](#) (4/5, 1.14M), Thomas Hulen of Tempe, who serves on the boards of the Arizona Heritage Alliance, Friends of the Sonoran Desert and Sierra Club Grand Canyon chapter, supports the creation of the Grand Canyon Watershed National Monument.

Additional coverage was provided by the [Sacramento \(CA\) Bee](#) (4/5, 547K).

SECRETARY JEWELL TO VISIT GEORGIA AND VIRGINIA TO CELEBRATE LWCF. The [Houston Chronicle](#) (4/6, 2.28M) reports that Interior Secretary Sally Jewell is traveling to Virginia and Georgia to celebrate the Land and Water Conservation Fund. Jewell is "scheduled to visit Chattahoochee River National Recreation Area in Georgia on Monday and Appomattox Courthouse National Historical Park in Virginia on Tuesday."

Also providing coverage are the [Macon \(GA\) Telegraph](#) (4/6, 156K) and [WGCL-TV Atlanta \(GA\)](#) Atlanta (4/6, 84K).

PHOTOS FROM INTERIOR'S INSTAGRAM ACCOUNT HIGHLIGHTED. The [Country Living](#) (4/2, 11.41M) highlights "11 Photos That Perfectly Capture the Surreal Beauty of America's Parks" from the Interior Department's Instagram account.

[ABC News](#) (4/2, 3.41M) ran a slideshow of spring pictures from Interior's Instagram account. Additional coverage was provided by ABC News's [Facebook](#) (4/5) and [Twitter](#) (4/5), ABC World News Tonight with David Muir's [Facebook](#) (4/5) and [Twitter](#) (4/5), The View's [Facebook](#) (4/5), and Good Morning America's [Instagram](#) (4/5, 7.73M). Additional coverage was provided on [Facebook](#) (4/5) and [Twitter](#) (4/5).

The [Daily Mail \(UK\)](#) (3/29, 4.78M) notes that the account has reached 500,000 followers.

The [SB Nation](#) (4/5, 4.9M) features a photo from the Interior Department showing bears at Katmai National Park in Alaska playing with a basketball.

Additional coverage was provided by the [Huffington Post](#) (4/3, Visser, 281K).

CONGRESS MAKES PROGRESS ON WILDFIRE FUNDING REFORMS. The [Salem \(OR\) Statesman Journal](#) (4/4, 36K) reports that Congress is "making progress on two issues of special importance to the West: fighting wildfires and providing funding to counties with large chunks of federally owned land." On wildfires, Sens. Ron Wyden, D-Oregon, and Mike Crapo "joined before the recess to attach a provision to the Senate budget resolution that should ease the way for a new funding mechanism for fighting the most severe wildfires." According to the article, "under the new plan, funding for these fires would be treated the same as other disasters such as hurricanes."

REP. BISHOP PREPARING FOR HEARINGS ON CHALLENGES OF FEDERAL LAND OWNERSHIP. [KSL-TV](#) Salt Lake City (4/5, 1.07M) reports that Rep. Rob Bishop said "he wants to use his leadership of the House Committee on Natural Resources to convene a series of hearings this spring and summer on the challenges of federal land ownership in Western states." Bishop said "the idea is to better educate his East Coast colleagues and others on the plight that Western states face when it comes to control of public lands." Bishop is "readying draft legislation and a map that proposes to carve out land uses for some 18 million acres in eastern Utah, designations that would include new wilderness areas, so-called energy development zones and better protections for high-value recreation lands."

CLARIFICATION SOUGHT ON SHEEP GRAZING, MANAGEMENT. The [Agri-View](#) (4/5, 111K) reports that "a congressional letter regarding sheep grazing and bighorn sheep management will be sent to U.S. Department of Agriculture Secretary Tom Vilsack and Department of Interior Secretary Sally Jewell this month." The letter "requests that officials supply answers to questions asked by Congress last year that still require a response." In addition, "the industry is requesting that language reflecting the bighorn concerns be included in appropriations for the Department of Interior for fiscal year 2016 report and bill language."

ADDITIONAL COVERAGE OF HONOLULI NATIONAL MONUMENT CEREMONY. Additional coverage of the ceremony dedicating Honouliuli National Monument was provided by the [Honolulu Civil Beat](#) (4/5, 41).

STATE TAKEOVER OF PUBLIC LANDS CRITICIZED. In an op-ed for the [Bozeman \(MT\) Daily Chronicle](#) (4/4, 54K), Pete Strom writes that "public lands transfer poses a real threat to Montana's economy." He argues that "protecting our public lands is a value-based priority that crosses party lines, gender, demographics and economic boundaries."

America's Great Outdoors:

National Park Service:

NATIONAL PARKS LAUNCH "FIND YOUR PARK" CAMPAIGN. The [AP](#) (4/5, 28K) reports that "after nearly 100 years, the National Park Service holds some of the country's most beautiful and historic places, but it suffers from an \$11 billion backlog of unfunded maintenance and a visitor base that's aging and mostly white." Now, "with its centennial approaching in 2016, the park service launched a campaign last week to raise support and court a younger, more diverse visitor base," with the "Find Your Park" campaign. Meanwhile, "behind the scenes, officials are seeking to expand fundraising through the National Park Foundation and bolster congressional support to improve the parks."

Additional coverage of the campaign was provided by the [Maryville \(TN\) Daily Times](#) (4/5, 64K), the [Rapid City \(SD\) Journal](#) (4/6, 101K), the [Norwalk \(CT\) Hour](#) (4/5, 28K), the [Holland \(MI\) Sentinel](#) (4/5, 42K), the [Sioux City \(IA\) Journal](#) (4/5, 27K), the [Rocky Mount \(NC\) Telegram](#) (4/5, 38K), [Skift](#) (4/3), and [DigitalSignageToday](#) (4/5).

Subaru Of America Announces Support Of National Park Service Centennial. The [Auto Channel](#) (4/3, 5K) reports that Subaru of America, Inc. has "announced its continued commitment to the environment and America's national parks through a multi-year partnership with the National Park Foundation (NPF), the official charity of America's national parks." The article notes that "in addition to supporting the work of NPF and celebrating the 100 year milestone of the National Park Service, Subaru has donated Outback vehicles for use at four of America's national parks."

Glacier National Park Fees To Hold Steady This Summer. The [AP](#) (4/3, Press, 5.17M) reports that "Glacier National Park officials say the price for a park pass and other fees will hold steady this summer." The article notes that "those supporting the increases say they could help fund interpretive programs and trail maintenance that has been cut in recent years."

Also reporting on the story is [The Missoulian \(MT\)](#) (4/5, 113K).

Fee Increase May Not Help Grand Canyon Maintenance Backlog. The [Arizona Republic](#) (4/3, 1.14M) reports that "Grand Canyon National Park officials say even if a proposed visitor fee increase is approved next month, the park will still have a large backlog of maintenance projects totaling in the hundreds of millions of dollars." According to the article, "the money from the proposed increase will only amount to a drop in the bucket compared to the backlog of maintenance projects in the park, which are estimated to cost over \$300 million."

Fees May Rise At Morristown National Historical Park And Thomas Edison National Historical Park. The [North Jersey \(NJ\) Media Group](#) (4/5, 69K) reports that "two of the four New Jersey National Park Service properties are among those that have proposed to increase entry fees after a six-year moratorium." Morristown National Historical Park and Thomas Edison National Historical Park are "two of about a dozen park service sites in the Northeast region that have applied for fee hikes in 2015."

Additional Coverage Of Fee Increases, Maintenance Backlog. Additional coverage of fee increases and the maintenance backlog was provided by the [Albuquerque \(NM\) Journal](#) (4/5, 238K), the [Pensacola \(FL\) News Journal](#) (4/5, 119K), the [Houston \(TX\) Chronicle](#) (4/3, 2.28M), the [Marketplace](#) (4/5, 27K), the [Asheville \(NC\) Citizen-Times](#) (4/5, 25K), the [Augusta \(GA\) Chronicle](#) (4/4, 184K), and the [Paris \(TN\) Post-Intelligencer](#) (4/5, 25K).

WHITE HOUSE SEEKS FUNDING FOR CIVIL RIGHTS SITES. [USA Today](#) (4/4, Berry, Today, 4.95M) reports that "communities and historically black colleges that played a key role in the civil rights movement would get millions of dollars under an administration plan to upgrade and preserve the movement's most important sites." Officials "want to spend \$50 million on the initiative as the nation marks the 50th anniversary of key milestones in the civil rights movement." The article notes that "sites in the South, the heart of the civil rights movement, are the most likely candidates".

CIVIL WAR ANNIVERSARY REMEMBERED. The [Richmond \(VA\) Times-Dispatch](#) (4/5, 322K) reports that "a day that focused on freedom more than defeat, on promise more than loss, on blessings more than sorrows, brought an estimated 5,000 people to Capitol Square on Saturday for the 150th anniversary of the end of the Civil War and slavery." The article notes that "included were illuminated walking tours of the district that burned at the end of the war, real-time tours related to events 150 years ago, speakers, a pop-up interactive museum, living history interpreters, children's games, music, dance, and creation of a temporary heritage trail related to slavery in Shockoe Bottom."

Additional coverage was provided by the [AP](#) (4/5, Szkotak, 2.28M), the [Washington \(DC\) Post](#) (4/5, Press, 5.17M), the [Greeneville \(TN\) Sun](#) (4/5, 43K), and the [Huffington Post](#) (4/5, |, Szkotak, 281K).

NPS TO MARK 150 YEARS SINCE LINCOLN FUNERAL. The [AP](#) (4/6, 197K) reports that the NPS "plans to mark the 150th anniversary of Abraham Lincoln's funeral procession from Washington, D.C., to Springfield." According to the article, "commemorations starting this month will take place in cities along the looping route Lincoln's funeral train took to carry his body back to his home state, Illinois."

WILDFIRE IN SEQUOIA NATIONAL PARK FULLY CONTAINED. The [Los Angeles Times](#) (4/5, Gerber, 3.49M) reports that "the wildfire in Sequoia National Park that prompted the evacuation of some campgrounds in the afternoon had been fully contained by Saturday night." Park officials "initially said the blaze had burned 30 acres, but Mike Theune, fire information officer for Sequoia and Kings Canyon National Parks, said a closer inspection of the 'rugged terrain' pegged the damage at 20 acres."

Also reporting on the story is the [Houston \(TX\) Chronicle](#) (4/5, 2 28M).

LOW SNOWPACK BRINGS SWARM OF HIKERS TO WASHINGTON TRAILS. The [AP](#) (4/5, 2.28M) reports that "federal land managers have been caught unprepared for the rush of visitors after a low winter snowpack cleared Washington's mountain roads and trails weeks earlier than usual." According to the article, "national parks and forests in western Washington typically bring on hundreds of seasonal employees — many of them college students — to handle summer crowds," but "this year the seasonal crews are already needed, and many are still in school."

LOWELL DAM TO GET AUTOMATIC CRESTGATES. The [Nashua \(NH\) Telegraph](#) (4/5, 43K) reports that "after years of debate and legal wrangling that pitted historical accuracy against hydropower and flood control, the Pawtucket Dam in the Lowell National Historical Park will be topped by hydraulic gates similar to the ones placed atop Nashua's Jackson Dam last year." The conflict "ended with a Feb. 12 ruling by a U.S. Court of Appeals in a suit between the Federal Energy Regulatory Commission, which supported the addition of crest gates, and the Department of the Interior, which includes the National Park Service."

RESTORATION WORK ON BURNSIDE BRIDGE COULD BEGIN IN SUMMER. The [AP](#) (4/5, Greene, 2 28M) reports that "work to restore one of the most well-known bridges from the Civil War and a popular tourist attraction could begin as early as this summer, giving Burnside Bridge its first major restoration work since the 1950s." Antietam National Battlefield officials are "planning to repair long-term damage caused to the bridge by water and general wear and tear, battlefield Superintendent Susan Trail said." The project "which is expected to cost from \$1 million to \$1.5 million, could begin as early as this summer, depending on whether the design contracts and

PARTS OF FIRE ISLAND CLOSED TO FIGHT BEETLE INFESTATION. The [AP](#) (4/3, Press, 5.17M) reports that “more than 600 trees will be cut down on New York’s Fire Island to battle an infestation of southern pine beetles.” According to the article, “parts of Fire Island National Seashore will be closed for two weeks starting Monday.” Members of the NPS’ Arborist Incident Response Team will perform the work.

BENT’S OLD FORT NATIONAL HISTORIC SITE ACQUIRES TWO DONKEYS. The [La Junta \(CO\) Tribune-Democrat](#) (4/5, 341) reports that “Bent’s Old Fort National Historic Site recently welcomed two new ‘staff members’ when the site acquired two donkeys from the Great Escape Mustang Sanctuary in Deer Trail, Colorado.”

THREE BALD EAGLE NESTS SPOTTED IN DC. [WRC-TV](#) Washington (4/5, 613K) reports that “three bald eagle nests have been sighted in the District, indicating that eaglets are inside, or are about to hatch.” The NPS and FWS “conducted a helicopter survey Thursday along the Potomac and Anacostia rivers, although it had to be cut short due to wind.” According to the agencies, “all three of the nests sighted were active, with an adult either brooding (caring for young) or incubating.”

NPS, VILLAGE GREEN CLASH OVER LANDMARK STATUS. The [Southern Pines \(NC\) Pilot](#) (4/5, 2K) reports that the NPS “may have finally drawn a line in the sand, warning Pinehurst that further changes to Village Green could mean losing its designation as a National Historic Landmark.” Turkiya Lowe, the agency’s chief of the cultural resources, research and science branch of the Southeast Region, said “in a letter late last month to Historic Preservation Commission Chairman Jim Lewis that the landmark status ‘is now in a fragile state and future changes that adversely affect its integrity will push the landmark (NHL) to its tipping point.’”

CHAGUI’AN MASSACRE SITE DISPUTED. The [AP](#) (4/5, Cruz, 644K) reports that “the Guam Preservation Trust is determined to put the Chagui’an Massacre site in Yigo into the National Register of Historic Places.” However, “there’s disagreement about the exact location of the site.”

NEW SUPERINTENDENT AT LASSEN VOLCANIC NATIONAL PARK NAMED. The [Plumas County \(CA\) News](#) (4/5, 110) reports that Steve Gibbons has been chosen as the next superintendent at Lassen Volcanic National Park, “after serving as acting superintendent at the park for the past four months.” He will begin his new role in early May. Regional Director Chris Lehnertz said, “Steve has been outstanding as interim superintendent at Lassen Volcanic. Now with him moving into the superintendent position permanently, we all look forward to his continued strong leadership there.”

MAN WHO TOOK SOLO GRAND CANYON TRIP STILL MISSING. The [Arizona Republic](#) (4/3, 1.14M) reports “two months ago, 21-year-old Drake Kramer told his parents he was taking a solo trip to the South Rim of the Grand Canyon. He hasn’t been seen since.” According to the article, “three weeks ago, the family received word that someone spotted Drake.” Another search and rescue was launched but crews found nothing.

TRAPPED HIKER RESCUED AT JOSHUA TREE NATIONAL PARK. The [AP](#) (4/3, 2.28M) reports that “a 17-year-old hiker has been rescued with only minor scrapes and bruises after getting wedged between rocks while scrambling in Joshua Tree National Park.”

HIKERS RESCUED IN SMOKIES. The [Knoxville \(TN\) News Sentinel](#) (4/5, 371K) reports that “a father and son were rescued Saturday morning after becoming separated and stranded amid dangerous weather overnight in the Great Smoky Mountains National Park, officials said.”

PHOTOGRAPHERS INVITED FOR “PICTURE YOURSELF IN THEODORE ROOSEVELT NATIONAL PARK” CONTEST. The [Forum of Fargo-Moorhead \(ND\)](#) (4/5, 8K) reports that Theodore Roosevelt National Park “attracts thousands of photographers each year.” The article notes that “the annual ‘Picture Yourself in Theodore Roosevelt National Park’ photo contest invites photographers to show off their skills.”

RECOGNITION FOR RUSHMORE CARVER URGED. In an op-ed for the [Asheville \(NC\) Citizen-Times](#) (4/3, 25K), Douglas J. Gladstone calls for recognition of Luigi Del Bianco, the chief carver of the Mount Rushmore National Memorial from 1933 through 1940.

ROADWAYS CONNECTED NATIONAL PARKS FOR VISITORS. In a piece for the [Fort Collins \(CO\) Coloradoan](#) (4/5, 59K), Barbara Fleming recounts how “in 1920, the National Park-to Park Touring Association incorporated in Colorado, developing a route for visiting all 12 parks.”

Bureau of Land Management:

SUNDAY MARKS ANNIVERSARY OF BUNDY STANDOFF. The [Environment & Energy Publishing](#) (4/5, Subscription Publication, 705) reports that “Sunday will mark one year since the BLM and National Park Service began wrangling” Nevada rancher Cliven Bundy’s “bovines from Gold Butte’s expanse of Joshua trees and creosote bushes, where the animals had been grazing illegally for more than two decades.” According to the article, “so far, the folksy rancher has gotten off scot-free after brazenly flouting two federal court orders in 2013 to remove his cattle from federal lands and later mobilizing an armed militia that forced the government to release his cows back onto the lands.” His “cows are back on the southern Nevada range, fattening themselves on taxpayer-owned forage and threatening one of the most arid habitats in North America.”

Additional coverage of the dispute over grazing was provided by the [AP](#) (4/6, Rindels, 2.28M) and the [Las Vegas \(NV\) Sun](#) (4/6, 155K).

NEW BRIDGE OVER BUTTE CREEK CELEBRATED. [KRCR-TV](#) Redding, CA (4/4, 3K) reports that “families in rural areas of Butte County joined officials with the Bureau of Land Management Friday to celebrate the opening of a new bridge over Butte Creek, and the completion of three miles of road work on Doe Mill Road on both sides of the bridge.” The article notes that “the \$3.1 million project replaces the old bridge at Doe Mill Road, which was not sturdy enough to allow fire trucks to cross.”

BLM’S BILLINGS CURATION CENTER TO HOST ARTIFACT ROAD SHOW. The [Billings \(MT\) Gazette](#) (4/5, 165K) reports that the BLM’s Billings Curation Center will “host the fifth annual Artifact Road Show from 1 to 4 p.m. Thursday during the Montana Archaeological Society’s Archaeology Month.”

Fish and Wildlife Service:

SEN. MCCAIN LAUDS TROUT RESTORATION DEAL. The [Arizona State University Cronkite News](#) (4/5) reports that “an agreement formalized Friday to reopen a damaged federal fish hatchery that had stocked rainbow trout below Hoover Dam will bolster the economies of Mohave County and Nevada’s Clark County, U.S. Sen. John McCain said.” According to the article, “in August 2013, a pipeline feeding water to the Willow Beach National Fish Hatchery...clogged and cut off the supply to raceways used for rainbow trout, killing tens of thousands of fish,” and “a few months later, the pipe broke, killing more fish and leaving the hatchery unable to stock Lake Mohave with trout.” Under the deal “reached in March, the Arizona Game and Fish Department and U.S. Fish and Wildlife Service will split the nearly \$800,000 cost of repairing the pipeline.”

Also reporting on the story is the [Houston \(TX\) Chronicle](#) (4/3, 2.28M), the [Payson \(AZ\) Roundup](#) (4/5, 21K), and the [Mohave Valley \(AZ\) Daily News](#) (4/5, 23K).

WILDLIFE OFFICIALS BATTLE INVASIVE SPECIES. The [New York Times](#) (4/6, Haberman, Subscription Publication, 9.97M) reports that “the United States is awash in invasive species exacting a heavy toll on native wildlife and vegetation.” The article notes that “Florida draws much of the attention because its swamps and tropical climate provide splendid shelter for all sorts of creatures that are not supposed to call this country home.” In South Florida, “wildlife officials have struggled for years with tens of thousands” of Burmese pythons, “an interloper from Southeast Asia that has taken up what looks like permanent residence in Everglades National Park and other areas of the state.”

FWS REPORTS NORTHERN ROCKIES WOLF POPULATION NUMBERS. The [AP](#) (4/3, Brown, 2.28M) reports that “gray wolf numbers rose across most of the Northern Rockies last year but dropped in Montana after a concerted effort by officials there to drive down the population and curb livestock attacks.” The FWS “reported Friday that a minimum of 1,783 wolves in more than 300 packs roamed the six-state region at the end of last year.” The article notes that “that marks a 5 percent increase from 2013 and continues the dramatic expansion of the predator’s population since wolves were reintroduced to parts of Wyoming and Idaho in the mid-1990s.”

Also reporting on the story is the [Summit County \(CO\) Citizens Voice](#) (4/3, 506).

WYOMING’S SAGE GROUSE STRATEGY QUESTIONED. The [Casper \(WY\) Star-Tribune](#) (4/5, 90K) reports that “Wyoming’s sage grouse conservation strategy has long been based on a simple premise: protect nesting areas, protect the bird.” However, “a recent review of the state’s core area policy called for by Gov. Matt Mead has reignited a fierce debate over whether that strategy is adequate, with some biologists arguing protections should be extended to areas used by the bird during winter months.” The article notes that “the debate largely centers on a 141,000-acre expanse of sagebrush south of Pinedale known as the Normally Pressurized Lance, or NPL.”

EFFORT SEEKS TO BRING STURGEON TO RIVER IN NORTHWEST OHIO. The [AP](#) (4/5, 2.28M) reports that “work is underway to find spawning habitats for prehistoric fish thought to be all but gone from Lake Erie a few decades ago.” According to the article, “wildlife agencies and an organization dedicated to protecting the lake have started scouting out potential spawning spots for lake sturgeon on the Maumee River near Toledo.”

in October in Madera County." Ron Smith with the FWS says "until the species is fully identified, it will be difficult to predict its invasive potential."

ADDITIONAL COVERAGE OF BAT LISTING. Additional coverage of the listing of the Northern long-eared bat was provided by the [Pittsburgh \(PA\) Post-Gazette](#) (4/6, 588K), the [Marquette \(MI\) Mining Journal](#) (4/5, 1K), the [Houston \(TX\) Chronicle](#) (4/3, 2.28M), and the [Waterbury \(CT\) Republican-American](#) (4/5, 124K).

ADDITIONAL COVERAGE OF LAWSUIT FILED OVER WILDFLOWERS. Additional coverage of the lawsuit filed over the Graham's and White River beardtongue was provided by the [Summit County \(CO\) Citizens Voice](#) (4/4, 506), the [Houston \(TX\) Chronicle](#) (4/5, 2.28M), and the [Salt Lake \(UT\) Tribune](#) (4/5, 405K).

Securing America's Energy Future:

Onshore Energy Development:

CONTROVERSY SURROUNDING OKLAHOMA QUAKES, FRACKING MOUNTS. The [New York Times](#) (4/4, Opiel, Wines, Subscription Publication, 9.97M) reports on the controversy surrounding the "sharp and steady increase" of earthquakes over the past five years in Oklahoma, which "many scientists" attribute to fracking. While elected leaders in Oklahoma "have been slow to address the problem," regulators "have taken some protective measures." Despite concerns, some "say the political will is missing to confront an earthquake threat tied to Oklahoma's dominant industry."

CHANGE IN ROYALTY CALCULATION FRUSTRATES OIL AND GAS INDUSTRY. The [Farmington \(NM\) Daily Times](#) (4/6, 49K) reports that "the federal government is changing the way it calculates royalties owed by gas production companies to recoup lost royalties from previous years, a move that is giving industry officials heartburn." The new process is called "Unbundling Cost Allocations" and it is overseen by the Office of Natural Resources Revenue. The new regulations "seek to clarify what costs can be deducted before calculating the 12.5 percent in royalties that are paid to the federal government."

COMPANIES PROPOSE THOMPSON DIVIDE LEASE EXCHANGE. The [AP](#) (4/6) reports that "environmentalists are waiting to see the details after an exchange of oil and gas leases in the Thompson Divide region for leases on public lands elsewhere in western Colorado was offered as a solution to a longstanding dispute over drilling." The proposal is "being put forward by two energy companies, SG Interests and Ursa Operating Co., which together hold about two dozen undeveloped federal oil and gas leases in the Thompson Divide." The article notes that "those leases are currently being reviewed by the U.S. Bureau of Land Management as part of a larger analysis of 65 leases in the southern White River National Forest straddling Garfield, Pitkin and Mesa counties."

STATES ASK FOR MORE INPUT ON STREAM PROTECTION RULE. The [Gillette \(WY\) News Record](#) (4/5, 19K) reports that "officials from Wyoming and 10 other coal mining states have complained about a lack of input on the federal Office of Surface Mining Reclamation and Enforcement's update to a stream-protection rule for mining." The article notes that "Congressmen have taken the complaint a step further, requesting records about those states' involvement."

FRACKING RULES CRITICIZED. In an op-ed for the [Casper \(WY\) Star-Tribune](#) (4/6, 90K), Kathleen Sgamma, vice president of government and public affairs at Western Energy Alliance, criticizes the fracking regulations introduced by the Interior Department. She claims that the federal government is "leading from behind" because states have "long acted to strengthen their regulations and ensure fracking is done safely while protecting the environment." She argues that "despite the characterization from the federal government, there is simply no regulatory gap."

EDITORIAL OIL, GAS DRILLERS NEED TO PAY FOR OVERSIGHT. The [Salt Lake \(UT\) Tribune](#) (4/5, 405K) editorializes that Utah oil and gas drillers often inject fracking wastewater into wells, potentially contaminating water and air. "Making producers cover the cost of more oversight literally would be insignificant compared with their future revenues," according to the editorial.

EDITORIAL TENNESSEE'S SHOULD LEAVE REGULATION OF COAL MINING TO FEDERAL GOVERNMENT. The [Knoxville \(TN\) News Sentinel](#) (4/6, 371K) editorializes that "the state of Tennessee would seek to reassume responsibility for regulating coal mining after more than three decades of federal oversight under a bill advancing through the Legislature." It notes that "Tennessee is the only coal-producing state that has surrendered the regulation of coal mining to the U.S. Office of Surface Mining Reclamation and Enforcement." The paper argues that "the proposal is badly flawed" because "the problem with the industry appears to be more a shrinking market for the state's high-sulfur coal than regulatory sluggishness."

Offshore Energy Development:

SHELL EYES ARCTIC DRILLING. The [FuelFix](#) (4/3, 7K) reports that "Shell has successfully deployed its Arctic containment system in waters near Washington state as it prepares for potential drilling in the Chukchi Sea later this year." The firm "didn't officially need the test, which was conducted over several days in Puget Sound" because "its emergency containment system, carried and deployed from the Arctic Challenger barge, already won certification from the American Bureau of Shipping and the U.S. Coast Guard, years ago." However, "the exercises gave Shell Oil Co. a chance to demonstrate the equipment for Coast Guard officials and federal regulators at the Interior Department who will decide whether the company gets critical permits enabling a new round of Chukchi Sea oil exploration this summer."

The [Anchorage \(AK\) Dispatch News](#) (4/4, 146K) reports that "Shell, which spent over \$2 billion on Chukchi leases, has already spent about \$6 billion in total on its Alaska program and has ambitions for transforming the remote and undeveloped waters off Northwest Alaska into a major oil-producing region, still must clear several hurdles before it is given permission to sink a drill bit into hydrocarbons lying beneath the seafloor." The firm has "made a clear commitment to drill this year if it is allowed to do so."

Interior Proposes Arctic Drilling Regulations. The [Rigzone](#) (4/5, 11K) reports that "a list of regulations proposed by the US Department of the Interior for Arctic drilling could make exploration financially out of reach." According to the article, the regulations proposed by the BSEE and the BOEM "in February could increase the price tag of a potential discovery by tens, if not hundreds, of millions of dollars."

Commentary. For "The Blog" of the [Huffington Post](#) (4/5, Shogan, 281K), Cindy Shogan, Executive director, Alaska Wilderness League, writes that "on March 24, exactly one week prior to the Lease Sale 193 announcement, we recognized the anniversary of the Exxon Valdez oil spill, one of the worst environmental disasters in U.S. history." She asserts that "as we approach another landmark anniversary – April 20 marks the 5th anniversary of Deepwater Horizon – we must continue to stay vigilant and raise our voices alongside those that depend on the Arctic Ocean for their survival, and speak up for the Arctic wildlife that are already feeling the effects of climate change, and would be devastated by an oil spill."

Additional Coverage. Additional coverage was provided by the [Breaking Energy](#) (4/3), [Rigzone](#) (4/5, 11K) and [AllGov](#) (4/5, 1K).

OFFSHORE DRILLING DEBATE DISCUSSED. The [Houston Chronicle](#) (4/5, Dlouhy, 2.28M) reports on different views regarding offshore drilling, with activists and residents, mostly from Maryland or northern states, opposed to it, while politicians from the South call for drilling to be allowed, touting economic growth. "The Obama administration is on track to make a final decision next year, after it unveils a formal proposal and conducts environmental analysis," the article reports. Meanwhile, warring viewpoints continue with many coastal communities complaining that offshore drilling would damage their economies, which rely heavily on tourism, boating and fishing.

In an op-ed for the [Charleston \(SC\) Post and Courier](#) (4/6, 295K), Steve Gilbert, special projects manager for the South Carolina Wildlife Federation, opposes offshore drilling. He claims that "in practice, 'responsible' and 'safe' oil and gas exploration and development is oxymoronic." Gilbert asserts that "it is important to do everything in our power to prevent moving forward with the initial seismic testing phase of oil and gas development."

SEN. MURKOWSKI DEMANDS MORE INPUT FROM ALASKA ON OFFSHORE LEASING PROGRAM. The [Alaska Native News](#) (4/5, 245) reports that Sen. Lisa Murkowski "criticized the Obama administration's lack of consultation with Alaska in developing its draft 2017-2022 outer continental shelf (OCS) oil and natural gas leasing program (DPP) for Alaska in comments to the Bureau of Ocean Energy Management (BOEM)." Murkowski said, "The fact that the president's moratorium withdrawing some 9.8 million acres of waters off Alaska's coast, including the Hanna Shoal, identified in the draft program as a potential deferral, was released to the public the very same day as the DPP illustrates a willful disregard for the public process and undermines public trust in the process." Murkowski "highlighted the importance of energy activities to Alaska, asked BOEM to consider additional lease sales in Alaska, and stressed the importance of consultation with Alaskans in the development of the final leasing program."

MAN CONVICTED OF FRAUD IN COMPENSATION CLAIM FROM OIL SPILL. The [AP](#) (4/3) reports, "A Harrison County man will be sentenced May 14 for lying about his employment to receive \$36,000 in oil-spill recovery money." Gray claimed fraudulently that he lost income from his alleged work on a commercial oyster boat following the Deepwater Horizon oil spill of 2010.

The [New Orleans Times-Picayune](#) (4/5, 621K) ran the same AP story.

MEXICAN OIL PLATFORM FIRE DISCUSSED. The [Wall Street Journal](#) (4/5, 17M) reports that "a fire on a platform in the Gulf of Mexico killed two workers and destroyed a major oil production facility."

"presented a detailed timeline of their response to the massive fire that ignited in the early morning hours Wednesday and killed at least four people, injured 45 more, and forced the evacuation of more than 300," the article reports. They said their "response contained the blaze to one part of the shallow-water platform complex, prevented oil from spilling into the ocean and will allow production to return to pre-fire levels soon," the Post reports. "It will be possible to reach in the next week 80 percent of the production that there was before the accident," said Gustavo Hernandez, Pemex's director general of exploration and production.

[AFP](#) (4/6) also reports on the blaze, adding that Mexico's oil production dropped "from 650,000 barrels per day to 430,000 in the Campeche Sound region of the Gulf of Mexico."

ENVIRONMENTAL DEFENSE FUND TO MONITOR RESTORE ACT PROJECTS. [WWNO-FM](#) New Orleans (4/6, 5K) reports that "as the five-year anniversary approaches later this month of the BP oil spill, the Environmental Defense Fund is gearing up for monitoring how restoration money is used to repair damage."

[WWL-TV](#) New Orleans (4/1, 107K) reports that "what was once an archipelago of three lush mangrove islands in the entrance to Barataria Bay has been reduced to two lifeless sandbars five years after BP's killer oil spill."

Additional coverage was provided by [WWNO-FM](#) New Orleans (4/6, 5K) and the [Miami Herald](#) (4/6, 694K).

Tackling America's Water Challenges:

BROWN DEFENDS WATER USE LIMITATION PLAN. On [ABC's This Week](#) (4/5, Raddatz, 2.73M), California Gov. Jerry Brown talked about the historic drought impacting the state, saying: "[The 25% water reductions] should be a wake up call for everyone. This executive order is done under emergency power. It has the force of law. Very unusual. It's requiring action and changes in behavior from the Oregon border all the way to the Mexican border." In a piece based heavily on the Raddatz interview, [ABC World News](#) (4/5, story 3, 1:50, Llamas, 5.84M) reported that the "epic drought" in California is "turning more of the state into browned out acres." ABC (Gibson) adds that Brown warned that his state's problem may soon be one for other states as well. Brown said, "I can tell you from California, climate change is not a hoax. We're dealing with it, and it's damn serious."

The [Los Angeles Times](#) (4/6, Reyes, 3.49M) notes that on "This Week," Brown "defended his decision to largely target urban areas rather than agricultural users with his historic order to curb water use." Brown warned that cutting off water allocations to agriculture was not necessary and could displace "hundreds of thousands of people," at a time when "there are people in agriculture areas that are really suffering." The Times says that critics of the governor's move, which "focused on urban areas," argue that it is "ineffective to largely ignore agriculture – the biggest water user in the state."

The [CBS Evening News](#) (4/5, story 5, 1:55, Pelley, 5.08M) reported that when Brown announced the water restrictions, "people started making plans to remove their lawns but in some wealthy neighbors the grass is still green and growing." CBS (Villafranca) adds that a UCLA study "finds wealthy neighbors use three times more water than other Southern California cities." However, that is set to change in some areas, such as Beverly Hills, which is set to "cut private consumption through strict enforcement."

In a piece picked up by USA Today, the [Palm Springs \(CA\) Desert Sun](#) (4/6, James, 85K) reports that in desert communities like Palm Springs, the mandatory cut in water use "are putting growing pressures on resorts, homeowner associations and golf courses to pitch in and do their part to save more water." However, "doing that on a large scale" is "likely to be costly and challenging because many homeowners on the fringes of grassy landscapes aren't interested in seeing brown turf or dry lakes outside their windows."

Meanwhile, the [New York Times](#) (4/6, Gillis, Richtel, Subscription Publication, 9.97M) reports that California farmers have been keeping up crop yields by "drilling wells at a feverish pace and pumping billions of gallons of water from the ground, depleting a resource that was critically endangered even before the drought, now in its fourth year, began." Scientists "warn that improving its management of precious groundwater supplies will shape whether it can continue to supply more than half the nation's fruits and vegetables on a hotter planet."

Storm Expected To "Drench" California This Week. The [Los Angeles Times](#) (4/6, Hamilton, 3.49M) reports that forecasters predict that a "low-pressure storm system is expected to drench California through the first half of this week," bringing with it "much-needed rain." According to the National Weather Service, "the Central Coast and Central Valley will see up to 1 inch of rain, while Los Angeles and Ventura counties will see up to half an inch."

WSJournal Says State Policies Exacerbate Drought's Impact. In an editorial, the [Wall Street Journal](#) (4/6, Subscription Publication, 5.67M) argues that policies advanced by California's liberals have compounded the negative effects of the water shortage. The Journal says that instead of banking water during good years, California is using vast amounts for ecological purposes. In addition, the Journal says that the state has failed to develop sufficient water storage capacity to most effectively use available water, instead steering funds meant for water improvements into environmental projects.

AMID RECORD DROUGHT, CALIFORNIA ADAPTS TO WATER RESTRICTIONS. The [CBS Evening News](#) (4/4, story 4, 2:10, Axelrod, 5.08M) reported on "California's historic drought," noting that Gov. Jerry Brown "ordered the first mandatory water restrictions in the state's history" this past week. However, the "new rules do not apply to farmers." As a result, [NBC Nightly News](#) (4/4, story 4, 2:30, Alexander, 7.86M) reported that water agencies in southern California are "offering to buy water from farmers in the northern part of the state." The situation is presenting farmers "with a unique dilemma, should they keep growing their crops or cash in?"

In an editorial, the [New York Times](#) (4/5, Board, Subscription Publication, 9.97M) addresses the lack of regulations on farmers' water use, saying "innovation and efficiency will be required of agriculture businesses and of ordinary Californians" due to the state's drought. The Times suggests that "farmers can switch from flood irrigation or inefficient sprinklers to drip or microspray systems" and "invest in irrigation controllers."

The [Washington Post](#) (4/5, Fears, 5.17M) also reports on the water restrictions in California, noting that "Brown ordered California's 400 water agencies to cut their output by 25 percent or face fines of up to \$10,000 per month," a penalty that can be "passed to homeowners who fail to comply." Although surveys show that "Californians realize they are running out of water," the restrictions have "created a divide by targeting urban residents but not farmers, who use 80 percent of the state's water."

The [New York Times](#) (4/5, Nagourney, Healy, Schwartz, Subscription Publication, 9.97M) reports that the water restrictions raise "fundamental questions about what life in California will be like in the years ahead." Residents and officials are "wondering if the severity of this drought, now in its fourth year, is going to force a change in the way the state does business."

Additional Coverage. Additional coverage was provided by the [Washington \(DC\) Post](#) (4/5, Fears, 5.17M), the [Washington \(DC\) Post](#) (4/3, Brian Melley |, Ap, 5.17M), the [Washington \(DC\) Post](#) (4/3, Wilson, 5.17M), the [Washington \(DC\) Post](#) (4/4, Mooney, 5.17M), the [Los Angeles \(CA\) Times](#) (4/4, 3.49M), the [Napa Valley \(CA\) Register](#) (4/5, 46K), the [Houston \(TX\) Chronicle](#) (4/3, Elliott, 2.28M), the [Pueblo \(CO\) Chieftain](#) (4/5, 79K), the [Sacramento \(CA\) Bee](#) (4/5, 547K), the [Sacramento \(CA\) Bee](#) (4/5, 547K), the [Chico \(CA\) Enterprise-Record](#) (4/5, 92K), and [KCAL-TV Los Angeles \(CA\)](#) Los Angeles (4/4, 163K).

WPost: California Must Make Adjustments To Combat Current, Future Droughts. In an editorial, the [Washington Post](#) (4/4, Board, 5.17M) says California's "waste" of water, which was "enabled by the state, the federal government and consumer expectations," must stop. According to the Post, while "conservation efforts" are important, they "should be only the beginning" as "water storage" and "more effective transportation of water" is necessary.

BAY DELTA CONSERVATION PLAN TUNNEL PROJECT REEXAMINED. The [Los Angeles Times](#) (4/5, Boxall, 3.49M) reports that California Gov. Jerry Brown's administration is "overhauling its proposal for a controversial tunnel project in the Sacramento-San Joaquin delta in the wake of doubts about whether water exporters can meet stringent federal conditions for operating the system over a 50-year period." The article notes that a major goal of the Bay Delta Conservation Plan is "to gain a 50-year environmental permit for delta exports that would ease the endangered species restrictions that have cut delta deliveries to San Joaquin Valley growers and the urban Southland." However, "state water officials have concluded that the federal requirements for such long-term approvals are too onerous for the water exporters to meet."

QUESTIONS SURROUNDING LAKE NIGHTHORSE REMAIN . The [Durango \(CO\) Herald](#) (4/3, 28K) reports that "on paper, the boat dock, trails and other amenities that would fulfill common dreams for Lake Nighthorse have support from all the groups that govern the area." However, "questions about maintaining water quality and protecting archaeological sites remain to be solved."

PLANET RANCH ENVIRONMENTAL ASSESSMENT RELEASED. The [Havasup \(AZ\) News-Herald](#) (4/5, 27K) reports that "a proposed land and water transfer at Planet Ranch would maintain water flows into the Bill Williams River Wildlife Refuge and benefit restoration of native riparian habitat along the river, according to a draft environmental assessment released Wednesday." The article notes that "the assessment evaluated the deal negotiated between mining company Freeport Minerals and the Arizona and federal governments and codified into law last year." The agreement would "transfer just over 3,400 acres of Planet Ranch owned by Freeport to the Arizona

Empowering Native American Communities:

INTERIOR TRANSFERS MORE THAN \$12 MILLION TO COBELL EDUCATION SCHOLARSHIP FUND. The [Native American Times](#) (4/3, 337) reports that the Interior Department "announced it has transferred more than \$12 million to the Cobell Education Scholarship Fund, bringing the total amount transferred so far to \$17 million." Interior Deputy Secretary Michael L. Connor said, "With every transfer to the Scholarship Fund, we are making valuable investments in the training and education that Native students need to succeed in today's world. This program is a lasting tribute to Elouise Cobell, whose vision, leadership and concern for tribal students and their families has created a living legacy for future generations of tribal leaders."

Additional coverage was provided by the [Nation Sun News](#) (4/5), the [Law 360](#) (4/5, 9K), the [Indian Country Today Media Network](#) (4/3, 49K), and the [Rapid City \(SD\) Journal](#) (4/5, 101K).

NAVAJO NATION CONSIDERS LAND BUY-BACK PROGRAM. The [Arizona Daily Independent](#) (4/2) reports that the Interior Department "met with President Ben Shelly this week to discuss benefits of the Navajo Nation's participation in the Land Buy-Back Program for Tribal Nations." According to the article, "representatives from the Office of the President and Vice President, Navajo Land Department, Navajo Department of Justice, Bureau of Indian Affairs and Interior Department met at tribal headquarters for the two-hour presentation."

The [Navajo Post \(AZ\)](#) (3/29) reports that "the Naabik'iyáti' Committee received a report from federal officials with the Land Buy-Back Program, regarding a potential cooperative agreement between the U.S. Department of the Interior and the Navajo Nation." Land Buy-Back Program manager John H. McClanahan and Senior Advisor on Tribal Relations Santee Lewis, "presented to Naabik'iyáti' Committee members on Thursday."

The [Navajo Nation](#) (3/30) reports that President Shelly said, "The cooperative agreement is a product of significant planning and coordination with the Navajo Nation since 2013."

Also reporting on the story are the [Nation Sun News](#) (3/30)

WARM SPRINGS FIRES SUPPAH. The [Bend \(OR\) Bulletin](#) (4/5, 94K) reports that "the Confederated Tribes of Warm Springs has fired its secretary-treasurer, Jake Suppah." The tribes are "under federal investigation of alleged financial irregularities discovered by Suppah."

Also reporting on the story is [KTVZ-TV Bend \(OR\)](#) Bend, OR (4/5, 4K).

COURT UPHOLDS DECISION TO ESTABLISH COWLITZ INDIAN TRIBE RESERVATION. In a piece for the [Indian Country Today Media Network](#) (4/3, 49K), Christine Dupres writes that "on March 9, the Bureau of Indian Affairs Regional Director Stanley Speaks signed the final documents to establish the Cowlitz Indian Tribe's Reservation, to an audience of Cowlitz elders and tribal leaders." She notes that "a court decision issued by United States District Court Judge Barbara Rothstein on December 12, 2014 dismissed the appeal by the Cowlitz Indian Tribe's opponent's and reaffirmed the Federal Government's decision to take 152 acres in Clark County into trust for the Cowlitz Indian Tribe." According to Dupres, "this decision has positive implications for other tribes recognized by the federal government after 1934."

CASES ON TAXATION ON INDIAN COUNTRY EXAMINED. In a piece for the [Indian Country Today Media Network](#) (4/5, 49K), Jay Daniels writes that "recently, King County Superior Court Judge Mary Roberts ruled in favor of the city of Snoqualmie against the Washington Department of Revenue and repealed ESHB 1287 on March 4, 2015." The legislation would have "given property tax exemptions to tribes on non-reservation lands purchased before March 1, 2014, and subsequently shifted the tax burden to residents." He notes that "at issue before the Court was 'does the Payment in Lieu of tax, or P LT, violate the uniformity requirements in Article VII of the Washington Constitution' because it is not imposed at an equal tax rate and does not produce equality in valuing the property taxed." Daniels goes through the case law "applied by the Courts to make determinations on taxation."

Office of Insular Affairs:

NORTHERN MARIANA ISLANDS TO RECEIVE \$670,000 FROM INTERIOR. The [Marianas Variety](#) (4/5) reports that Interior Assistant Secretary for Insular Areas Esther Kia'aina on Friday "announced \$670,000 in Technical Assistance Program grant funding from the Office of Insular Affairs to the Government of the Northern Mariana Islands to support priority needs identified by Gov. Eloy Inos." Kia'aina said, "I am confident that these initial projects will provide timely and critical information, analyses, and data for CNMI decision-makers," said Assistant Secretary Esther Kia'aina. "These funds will help them make informed decisions on the proposed military activities, assess their economic development and self-sufficiency needs, and build capacity needed to strengthen governance and accountability."

Also reporting on the story is the [Saipan \(MNP\) Tribune](#) (4/6, 641).

Top National News:

OBAMA IRAN AGREEMENT A "ONCE IN A LIFETIME OPPORTUNITY." The Iranian nuclear framework was the main political topic on the Sunday morning talk shows. Israeli Prime Minister Netanyahu appeared on three of the five major shows and harshly criticized the agreement as potentially putting his country at risk, while Energy Secretary Moniz and Deputy National Security Adviser Benjamin Rhodes were the main Administration defenders of the deal. But coverage of their comments, and those of several members of Congress on both sides of the issue, is eclipsed by President Obama's Saturday interview with Thomas Friedman of the New York Times, which was devoted to Iran.

In addition to a news item on the interview, the Times gave Friedman more than 5,000 words for his column recounting the session. The [New York Times](#) (4/6, Baker, Subscription Publication, 9 97M) reports that in the interview, the President "strongly defended last week's preliminary agreement with Iran as a 'once in a lifetime opportunity,'" and assured critics "that he would keep all options available if Tehran ultimately cheated." The President said, "This is our best bet by far to make sure Iran doesn't get a nuclear weapon. What we will be doing even as we enter into this deal is sending a very clear message to the Iranians and to the entire region that if anybody messes with Israel, America will be there." Obama said sanctions would only be lifted after Iran meets its commitments. The [AP](#) (4/6, Pace) says that in the Saturday interview, Obama "insisted the US would stand by Israel if it were to come under attack, but acknowledged that his pursuit of diplomacy with Tehran has caused strain" with Israel.

Friedman writes in his [New York Times](#) (4/6, Subscription Publication, 9 97M) column that "what struck me most was what I'd call an 'Obama doctrine' embedded in the president's remarks," noting that Obama has broken "from longstanding United States policies isolating Burma, Cuba and now Iran." The President "said his view was that 'engagement,' combined with meeting core strategic needs, could serve American interests" better than isolation and sanctions. Regarding concerns about verification that Iran is not violating the emerging agreement, Obama said, "We're not just going to have a bunch of folks posted at two or three or five sites. We are going to be able to see what they're doing across the board, and in fact, if they now wanted to initiate a covert program that was designed to produce a nuclear weapon, they'd have to create a whole different supply chain."

The [Wall Street Journal](#) (4/6, Lee, Subscription Publication, 5.67M) says the next challenge for Obama is to neutralize opposition from both Republicans and some Democrats on Capitol Hill in order to achieve one of the cornerstones of his second-term foreign policy. The [Christian Science Monitor](#) (4/5, LaFranchi, 380K) notes that "nuclear security and nonproliferation" has been a key Obama agenda item since as early as 2010, when he convened a global nuclear security summit.

[Politico](#) (4/5, Shutt, 669K) calls Obama's outreach to such rogue states as "his 'let's try' philosophy." The [AP](#) (4/6, Perry) says in an analysis that beyond the central issue of Iranian nuclear capability, "a more immediate issue is the projection of Western power." The US is concerned about the ongoing Israeli-Palestinian conflict; the civil war in Syria; unrest in Iraq, Libya, and Yemen; a return to strongman rule in Egypt; and ISIL.

The two broadcast networks that aired newscasts Sunday evening both opened with the presidential interview and the Sunday show debate. On the [CBS Evening News](#) (4/5, lead story, 2:50, Pelley, 5.08M), Julianna Goldman reported that Netanyahu "said he's urging Congress to either change the nuclear deal with Iran or gut it." Netanyahu: "Iran will have billions of dollars flowing to its coffers, not for schools or hospitals or roads, but to pump up its worldwide terror machine and its military machine which is busy conquering the Middle East as we speak." Goldman also reported on Obama's remarks to Friedman, saying that Obama "said the deal is far from finished and cited political difficulties in Congress. The White House is furiously working behind the scenes to sell this deal to Congress."

[NBC Nightly News](#) (4/5, lead story, 3:15, Guthrie, 7.86M) opened by saying the President "is putting it on the line for that deal to halt Iran's nuclear ambitions in an interview published today calling it a once in a lifetime opportunity to resolve the issue peacefully. But if getting to an agreement was hard what is coming now may be harder." Obama

today came out swinging against the deal in a Sunday PR blitz.”

Administration Officials Defend Deal On TV Interviews. [USA Today](#) (4/6, Jackson, 4.95M) says that with an initial framework now agreed to, the Administration has launched a campaign to win over public and congressional support. But critics are doing the same. Both sides dominated the Sunday morning political talk shows. The [Washington Post](#) (4/6, Eilperin, Lee, 5.17M) reports top Administration officials “launched a major sales pitch Sunday aimed at marshaling public support for the new framework agreement,” while Israeli Prime Minister Netanyahu appeared on ABC, CNN, and NBC to voice his opposition.

The chief Administration spokesperson on the Sunday shows was Energy Secretary Moniz, who, along with Secretary of State Kerry, led the US delegation. [The Hill](#) (4/5, Hensch, 224K) reports in its “Blog Briefing Room” blog that Moniz “trumpeted the framework’s ‘unprecedented’ access and transparency towards Iran’s nuclear energy program. But he added that it did not resolve other concerns America had with Iranian leadership.”

When asked about Netanyahu’s stance on the nuclear deal, Moniz said on [CBS’ Face The Nation](#) (4/5, O’Donnell, 2.64M), “We certainly have very different view of the facts. First of all, today, the break-out time is two months. This deal will immediately get us over a year. It will get us there with almost instantaneous recognition of any attempts to evade the deal and it will give us plenty of time to respond diplomatically or otherwise. We have blocked all of these pathways to a bomb. We should also emphasize this is not a 10-year deal. This is a long-term arrangement.”

When asked about the discrepancies between “fact sheets” put out by the US and Iran, Moniz said on [CBS’ Face The Nation](#) (4/5, O’Donnell, 2.64M), “My understanding is that, in most dimensions, the Iranian fact sheet is consistent [with the US fact sheet], but it clearly emphasizes different parts of the agreement and tends to omit certain parts of the agreement.”

Regarding the concessions that the US made to secure the nuclear framework, Deputy National Security Adviser Rhodes said on [CNN’s Fareed Zakaria GPS](#) (4/5, 410K), “We’ve always said that Iran would be able to access peaceful nuclear energy. The question is: Can we design a program with the Iranians and the P5+1 that could meet our bottom lines? That’s what the program does. ... It meets our needs because there’s a robust inspections regime to verify they’re meeting commitments.”

Former National Security Adviser Samuel Berger writes in [Politico Magazine](#) (4/5) that “the notion of a better deal is unachievable” because “it is highly unlikely that even our allies in Europe would join us in further sanctions against Iran in the wake of a nuclear agreement they believe is sensible and positive,” and “if a deal falls through, it is likely that the existing multilateral sanctions regime will begin to crumble.”

Netanyahu Offers Strong Criticism Of Agreement. The [Huffington Post](#) (4/5, R

Subject: Find Your Park, polar bear diets and more -- This Week at Interior

This week, Secretary Jewell was in New York City to help launch the Find Your Park campaign -- a national effort to get Americans to celebrate and connect with our amazing public lands. The Secretary was also in Hawaii this week to dedicate the new Honouliuli National Monument. A new study by USGS finds that polar bears may be eating more land-based foods like berries, birds and eggs because sea-ice loss is making it harder to consume their traditional food source, ice seals. Plus more -- this week at Interior.

[Watch this week's episode.](#)

Subject: Honouliuli schedule & logistics

Hello,

I wanted to share with you the latest on the schedule and logistics for the Honouliuli event on 3/31 and the latest RSVPs from the delegation. If you have any corrections to your boss's attendance, please let me know.

In particular, I wanted to flag for you that due to space constraints on the shuttle bus and in the Honouliuli Gulch, the plan is for Members of Congress attending the Gulch ceremony to have one staffer accompany them, (ie., no staffers at the Gulch without their Member present). Please let me know if that is an issue for your boss.

9:15 am - Gather at Monsanto Assembly Zone

9:30 am - Last shuttle bus departs Monsanto

10:00-10:30am - Honouliuli Gulch Dedication Ceremony and Program.

Members attending: Senator Schatz, Senator Hirono

Event will be open press.

Participants will be asked to join in the blessing ceremony, which involves untying a bow and ribbon at the site.

There will be informal remarks by some participants (ie., Secretary Jewell will speak for approx. 2-3 minutes). Members may speak if they like.

10:30-11:00am - Tours of Honouliuli Gulch

11:05 - Shuttle buses depart en route Monsanto Assembly Zone

12:00-1:30pm - Welcome Reception and Celebration of the New Honouliuli National Monument

Location: Japanese Cultural Center of Hawaii, 2454 S Beretania Street, Honolulu, HI 96826

Members attending: Senator Schatz, Senator Hirono, Rep. Gabbard

Event will be open press.

There will be a 30 minute program and Members are welcome to speak.

I have copied my colleague, Erin Frautschy Barrows, on this email. She will be doing advance for the Secretary for this portion of the trip and will be our point of contact on the ground for any last minute issues that arise.

Please let me know if you have any questions.

Thanks,

Hello Ryan,

My colleague Jon Burpee at NPS said you were looking for more information about the 3/31 event in Hawaii with Secretary Jewell.

Below is some information about how we expect the day to go. Note that there are two opportunities for Sen. Schatz to speak if he wishes. The first is at the small group event in the Gulch at the memorial site. There will be a short commemorative ceremony where a ribbon is cut, and the Secretary will speak briefly (ie., about 2 minutes). Others may speak then if they like.

I am not as familiar with the program, but I do know that there will be an opportunity for Members to speak then, as well.

I have copied my colleague, Erin Frautschy Barrows, on this email. She is doing advance work for this trip and will be your best point of contact for any questions that arise the day of the event.

Please let me know if we can get you any additional information.

Thanks,
Jeremy Bratt

Hello,

I wanted to share with you the latest on the schedule and logistics for the Honouliuli event on 3/31 and the latest RSVPs from the delegation. If you have any corrections to your boss's attendance, please let me know.

In particular, I wanted to flag for you that due to space constraints on the shuttle bus and in the Honouliuli Gulch, the plan is for Members of Congress attending the Gulch ceremony to have one staffer accompany them, (ie., no staffers at the Gulch without their Member present). Please let me know if that is an issue for your boss.

9:15 am - Gather at Monsanto Assembly Zone

9:30 am - Last shuttle bus departs Monsanto

10:00-10:30am - Honouliuli Gulch Dedication Ceremony and Program.

Members attending: Senator Schatz, Senator Hirono

Event will be open press.

Participants will be asked to join in the blessing ceremony, which involves untying a bow and ribbon at the site.

There will be informal remarks by some participants (ie., Secretary Jewell will speak for approx. 2-3 minutes). Members may speak if they like.

10:30-11:00am - Tours of Honouliuli Gulch

11:05 - Shuttle buses depart en route Monsanto Assembly Zone

12:00-1:30pm - Welcome Reception and Celebration of the New Honouliuli National Monument

Location: Japanese Cultural Center of Hawaii, 2454 S Beretania Street, Honolulu, HI 96826

Members attending: Senator Schatz, Senator Hirono, Rep. Gabbard

Event will be open press.

There will be a 30 minute program and Members are welcome to speak.

Dear Jeremy,

Thanks so much – just to make sure everyone is connected, I am going to copy a few folks on this email. I believe they may have already been in touch with you, so I apologize for any overlap with this request.

We'll be sure to be in touch soon if it looks like the Senator would be interested in making remarks.

Hello,

I wanted to share with you the latest on the schedule and logistics for the Honouliuli event on 3/31 and the latest RSVPs from the delegation. If you have any corrections to your boss's attendance, please let me know.

In particular, I wanted to flag for you that due to space constraints on the shuttle bus and in the Honouliuli Gulch, the plan is for Members of Congress attending the Gulch ceremony to have one staffer accompany them, (ie., no staffers at the Gulch without their Member present). Please let me know if that is an issue for your boss.

9:15 am - Gather at Monsanto Assembly Zone

9:30 am - Last shuttle bus departs Monsanto

10:00-10:30am - Honouliuli Gulch Dedication Ceremony and Program.

Members attending: Senator Schatz, Senator Hirono

Event will be open press.

Participants will be asked to join in the blessing ceremony, which involves untying a bow and ribbon at the site.

There will be informal remarks by some participants (ie., Secretary Jewell will speak for approx. 2-3 minutes). Members may speak if they like.

10:30-11:00am - Tours of Honouliuli Gulch

11:05 - Shuttle buses depart en route Monsanto Assembly Zone

12:00-1:30pm - Welcome Reception and Celebration of the New Honouliuli National Monument

Location: Japanese Cultural Center of Hawaii, 2454 S Beretania Street, Honolulu, HI 96826

Members attending: Senator Schatz, Senator Hirono, Rep. Gabbard

Event will be open press.

There will be a 30 minute program and Members are welcome to speak.

I have copied my colleague, Erin Frautschy Barrows, on this email. She will be doing advance for the Secretary for this portion of the trip and will be our point of contact on the ground for any last minute issues that arise.

Please let me know if you have any questions.

Thanks,

Jeremy Bratt

DOI in the News:

INTERIOR AFFIRMS COMMITMENT TO ENERGY DEVELOPMENT. The [Penn Energy](#) (4/2, 128) reports that the Interior Department is "committed to developing federal oil and gas resources and wants to engage producers more aggressively to determine the best ways to do this, Asst. Sec. for Land and Minerals Management Janice Schneider said on Mar. 31." Speaking to the American Gas Association's Natural Gas Roundtable, Schneider said, "We're working hard to improve access with reforms like master leasing plans which help reduce post-sale conflicts." She also said that the Interior Department is "preparing a notice of possible rulemaking on modernizing outdated royalty and bonding regulations."

Geoscientist Discusses New Fracking Rules In Interview. [Science Magazine](#) (4/2, 390K) reports that "new federal rules aimed at making a controversial oil and gas drilling technique safer and more transparent reflect numerous suggestions from technical experts, says a geoscientist involved in the process." The article notes that the "ideas were among the many recommendations made in 2011 by a high-level advisory panel created by then-Secretary of Energy Steven Chu to examine whether the United States could develop its natural gas resources while protecting public health and the environment." One member of the panel was Mark Zoback, a professor of geophysics at Stanford University in California, who discussed "the background and implications of the new rules" in an interview.

States Urged To Focus On Safety. The [Casper \(WY\) Star-Tribune](#) (4/2, 90K), Gary Wilmot, the executive director of the Wyoming Outdoor Council, writes that "on the heels of last week's announcement of the Interior Department's new fracking rule, the state of Wyoming followed the lead of the Independent Petroleum Association of America and the Western Energy Alliance and filed a lawsuit opposing it." Wilmot says that the focus should not be on "federal overreach" but on "safeguarding public health and our shared natural resources." He notes that "Wyoming has been a leader in requiring that companies publicly disclose chemicals used in fracking," but "not all states share Wyoming's foresight on fracking."

The [Casper \(WY\) Star-Tribune](#) (4/2, 90K) editorializes that "the Obama administration is right to require companies to disclose the chemicals in hydraulic fracturing fluid when on federal land." According to the paper, "Wyoming has been fortunate to work with companies and interests in forming regulations that take into account development and public safety and were the model for the federal rule." Now, "other states must get in line" and "Wyoming should do its part to stay at the front."

INTERIOR GROUNDED T-HAWK DRONES AFTER FREQUENCY INTERFERENCE ISSUES WERE DISCOVERED. [Bloomberg BNA](#) (4/2, 8K) reports that "the Interior Department grounded for months 22 unmanned aircraft systems that were being used to research, monitor and inspect the environment, according to e-mails obtained by Bloomberg BNA through the Freedom of Information Act." The article notes that "the systems, which had been in use since late 2011, were grounded in February 2014 after it was discovered that the radios were set to the wrong frequency bands." According to Brad Koeckeritz, an unmanned aircraft system specialist for the Interior's Office of Aviation Services, "there was 'negligible' impact on the department's operations, and no penalties were imposed on Interior for the frequency issues."

PHOTOS FROM INTERIOR'S INSTAGRAM ACCOUNT HIGHLIGHTED. The [Country Living](#) (4/2, 11.41M) highlights "11 Photos That Perfectly Capture the Surreal Beauty of America's Parks" from the Interior Department's Instagram account.

[ABC News](#) (4/2, 3.41M) ran a slideshow of spring pictures from Interior's Instagram account.

The [Daily Mail \(UK\)](#) (3/29, 4.78M) notes that the account has reached 500,000 followers.

ADDITIONAL COVERAGE OF HONOLULI NATIONAL MONUMENT DEDICATION. Additional coverage of the dedication of Honouliuli National Monument was provided by [ABC News](#) (4/2, 3.41M), the [Washington \(DC\) Post](#) (4/1, Press, 5.17M), the [Maui \(HI\) Now](#) (4/1), and [Yahoo! News](#) (4/2, 5.81M).

CONGRESS URGED TO SUPPORT PUBLIC LANDS. In an op-ed for the [New York Times](#) (4/2, Rogers, Subscription Publication, 9.97M), Will Rogers, the president of the Trust for Public Land., urges Congress to reauthorize the Land and Water Conservation Fund. He notes that "public lands provide enormous economic benefits." Rogers argues that "rather than selling off the lands we all own, or looking for other uses for the money approved at the ballot box for conservation, our leaders should listen to voters and find ways to protect more of the places that make America special."

America's Great Outdoors:

National Park Service:

NPS LAUNCHES "FIND YOUR PARK" CAMPAIGN. The [AP](#) (4/2, 167K) reports that "with its centennial approaching in 2016," the NPS is "launching a campaign today to raise support and court a younger, more diverse visitor base." The article notes that "first lady Michelle Obama and former first lady Laura Bush will co-chair the campaign, calling on Americans to 'Find Your Park.'" Meanwhile, "behind the scenes, officials are seeking to expand fundraising through the National Park Foundation and bolster congressional support to improve the parks."

The [New York Daily News](#) (4/2, Confidential, 3.79M) reports that Interior Secretary Sally Jewell and NPS Director Jonathan Jarvis will "be at the kickoff at North Flatiron Plaza at 1:30 p.m."

Grey New York Launches Campaign For National Parks. The [AdWeek](#) (4/2, 231K) reports that as the NPS "prepares to celebrate its centennial in 2016," Grey New York is "using the milestone event to reacquaint Americans with the historical gems in their own backyards." In a new campaign, Grey "showcases sites like the Statue of Liberty, Alcatraz and Little Rock Central High School."

Also reporting on the story is the [AdWeek](#) (4/2, 231K).

ENTRANCE FEES INCREASING IN SOME NATIONAL PARKS. The [AP](#) (4/2, 4.78M) reports that "after a six-year moratorium, the federal government is increasing the price of admission at some of its public lands and raising the fees charged for camping, boating, cave tours and other activities." The NPS says "the money expected to be raised is just a fraction of the \$11.5 billion needed to repair and maintain roads, trails and park buildings." The article notes that "some members of Congress have expressed concern about the fee increases, but National Park Service Director Jonathan Jarvis said at a March congressional hearing that visitors are still getting an incredible deal when compared to other recreational pursuits."

[Francisco \(CA\) Chronicle](#) (4/2, 2.21M), the [Riverside \(CA\) Press Enterprise](#) (4/2, 391K), the [Redding \(CA\) Record-Searchlight](#) (4/2, 87K), the [US News & World Report](#) (4/1, 685K), the [Washington \(DC\) Post](#) (4/2, 5.17M), the [Arizona Republic](#) (4/1, 1.14M), [WJBK-TV Detroit \(MI\)](#) Detroit (4/2, 253K), and [KQVR-TV Sacramento \(CA\)](#) Sacramento, CA (4/1, 70K).

Additional coverage of the maintenance backlog at national parks was provided by the [Fort Myers \(FL\) News-Press](#) (4/1, 193K), the [Sioux Falls \(SD\) Argus Leader](#) (4/1, 116K), and the [Great Falls \(MT\) Tribune](#) (4/1, 76K).

NPS TO DISBURSE HISTORIC PRESERVATION GRANTS TO TRIBES. [KCBY-TV](#) Coos Bay, OR (4/2, 671) reports that the NPS “announced in March how they will disperse nearly \$9 million in historic preservation grants to American Indians tribes.” The article notes that “the Confederated Tribes were awarded nearly \$49,000, while the Coquille Tribe was given just over \$43,000.”

NPS DIRECTOR JARVIS TO VISIT WACO MAMMOTH SITE. The [Waco \(TX\) Tribune-Herald](#) (4/2, 111K) reports that NPS Director Jon Jarvis will visit the Waco Mammoth Site. Jarvis will “tour the site Monday, then attend a public meeting to gauge the community’s support for the federal designation.”

RESOLUTION CALLS FOR TURNING CRATERS OF THE MOON INTO NATIONAL PARK. The [Idaho Statesman](#) (4/1, 196K) reports that “the Idaho Senate has approved a resolution calling for turning the original Craters of the Moon National Monument into a national park without changing how it is managed.” The resolution “calls for turning the 54,000 acres of the national monument’s original area — created in 1924 by Calvin Coolidge — into a national park.”

NEW YORK LT. GOV. HOCHUL MEETS WITH NPS REPRESENTATIVES AT TUBMAN SITE. The [Auburn \(NY\) Citizen](#) (4/2, 27K) reports that New York Lt. Gov. Kathy Hochul “made a brief stop in Auburn Tuesday to tour the Harriet Tubman Home and meet with National Park Service representatives who were visiting the historic site.” Hochul said, “Harriet Tubman is a trailblazer and national icon who dedicated her life to helping others achieve the freedom they so desperately yearned. We remain committed to enriching this historical site so that future generations can learn about this true American hero and the lessons Harriet Tubman continues to teach us.”

BI-COUNTY PARKWAY OPPONENTS BELIEVE PROJECT WON’T BE BUILT. The [Washington Post](#) (4/2, Aratani, 5.17M) reports that “Northern Virginia legislators who have long opposed plans to build the Bi-County Parkway stood on the steps of the historic Sudley Church in Prince William County on Wednesday and expressed confidence that the controversial road project will not be built.” Del. Timothy D. Hugo referred “to a letter he received from state transportation officials saying they have put off plans to pursue an agreement with several federal agencies and the environmental approvals needed to move the project forward.” According to the article, “because the project cannot be built without those elements in place, Hugo told a crowd that he didn’t think the project would happen.”

VIRGINIA CIVIL WAR BATTLEFIELDS TO UNDERGO CONTROLLED BURNS. The [AP](#) (4/2, Press, 5.17M) reports that controlled burns are planned at two Richmond-area battlefields in the coming weeks. The NPS says “the burns are conducted every two to three years to maintain the landscape as it appeared when the opposing armies fought here during the summers of 1862 and 1864.” The article notes that “the burns will occur on 60 acres near Malvern Hill in Henrico County and 20 acres at Cold Harbor in Hanover County.”

NPS RELEASES NEW BROCHURE FOR HOMESTEAD NATIONAL MONUMENT OF AMERICA. [KNDY-FM](#) Marysville, KS (4/2) reports that “Homestead National Monument of America has developed a new brochure.” The brochure will be placed into use as part of the NPS’ “Find Your Park” Campaign.

NPS OPENS HURRICANE HOLE REGISTRATION. The [Virgin Islands Daily News](#) (4/2, 333) reports that the NPS has “announced procedures for mariners wishing to register their vessels for a mooring in Hurricane Hole on St. John for the 2015 hurricane season.”

ADDITIONAL COVERAGE OF EFFORT TO PUT WRIGLEY FIELD ON NATIONAL REGISTER OF HISTORIC PLACES. Additional coverage of the effort to add Wrigley Field to the National Register of Historic Places was provided by [Bloomberg News](#) (4/1, 2.94M).

Bureau of Land Management:

JUDGE REFUSES TO TOSS CHARGES IN ATV PROTEST RIDE CASE. The [Ogden \(UT\) Standard-Examiner](#) (4/1, 81K) reports that “four Utah men accused of riding ATVs through a closed southern Utah canyon to protest what they call federal government overreach are expected to ask a judge to toss criminal charges filed against them at a hearing Wednesday.” The four argue “in court documents the protest was legal because the U.S. Bureau of Land Management didn’t follow the proper steps to close Recapture Canyon back in 2007, and charging them with two misdemeanors violates their right to free speech.”

The [AP](#) reports that “following a 90-minute hearing, U.S. District Judge Robert Shelby ruled against the protest riders and scheduled the case for a jury trial later this month.”

Also providing coverage are the [Salt Lake \(UT\) Tribune](#) (4/2, 405K) and the [Cache Valley \(UT\) Daily](#) (4/2, 639).

CEMEX “DISAPPOINTED” IN BLM QUESTIONS ABOUT MINING PLAN. The [Santa Clarita Valley \(CA\) Signal](#) (4/2, 30K) reports that “two weeks after the Bureau of Land Management issued a letter declaring itself able to cancel Cemex mine contracts in Soledad Canyon, the mining firm released its own letter expressing bewilderment at the federal agency’s move.” The letter from a Cemex official dated March 27 stated, “It appears that the BLM, for reasons we cannot fathom, may now be intent on directly and materially damaging Cemex by negatively impacting its interests in the contracts and in the project.” Cliff Kirkmyer, the firm’s executive vice president of aggregates and mining resources, wrote that Cemex “was both surprised and disappointed” by the BLM letter.

Also reporting on the story is the [Santa Clarita Valley \(CA\) News](#) (4/1, 431).

BLM PLANNING MOVE FROM HOLLISTER TO MARINA. The [Monterey County \(CA\) Weekly](#) (4/2, 95K) reports that “a new regional headquarters for the Bureau of Land Management will also serve as the offices for the Fort Ord and California Coastal National Monuments.” The article notes that “the planned building will be bigger than both of those combined and will bring all of BLM’s local employees under one roof.” However, “plans have been slowed by a requirement district officials had been unaware of: a disabled access-compliant sidewalk to Imjin Parkway.”

BLM TO HOLD MEETING ON BURRO MANAGEMENT. The [Mohave Valley \(AZ\) Daily News](#) (4/2, 23K) reports that the BLM will “hold a public meeting tonight to discuss management of burros in what it calls the Black Mountain Herd Management Area.” According to the article, “the meeting will be 6 to 8 p.m. in the Suddenlink Community Center, 2380 Third St., Bullhead City.”

DAN BILZERIAN’S PSA RELEASED. [Business Insider](#) (4/2, 2.26M) reports that “as part of a deal cut with prosecutors for an explosives charge, Dan Bilzerian (aka the ‘King of Instagram’) had to film a PSA for the Bureau of Land Management about shooting guns responsibly.” Now, “six weeks later, the PSA has finally been released.”

ADDITIONAL COVERAGE OF STUDY ON FEDERAL LAND MANAGEMENT. Additional coverage of the study by the Property and Environment Research Center on federal land management was provided by the [Daily Caller](#) (4/2, Bastasch, 318K).

Fish and Wildlife Service:

FWS LISTS NORTHERN LONG-EARED BAT AS “THREATENED”. The [Environment & Energy Publishing](#) (4/2, Subscription Publication, 705) reports that the FWS announced Wednesday that “it will list the northern long-eared bat as ‘threatened’ under the Endangered Species Act, a lower level of protection than it originally proposed for the imperiled species.” The service also “approved a rule to provide flexibility for forest managers and landowners by allowing for the incidental killing or harming of long-eared bats during the course of forest management activities, known as a 4(d) rule.” The decision was “panned by environmentalists, who favored listing the bat as endangered and are likely to challenge the decision in court,” and “it received mixed reviews from industry groups.”

[The Hill](#) (4/2, Cama, 224K) reports that FWS Director Dan Ashe said in a statement, “Bats are a critical component of our nation’s ecology and economy, maintaining a fragile insect predator-prey balance; we lose them at our peril.” He added, “Without bats, insect populations can rise dramatically, with the potential for devastating losses for our crop farmers and foresters. The alternative to bats is greater pesticide use, which brings with it another set of ecological concerns.”

Also providing coverage are the [New York \(NY\) Times](#) (4/2, Press, Subscription Publication, 9.97M), [The Chattanooga \(TN\) Times Free Press](#) (4/1, 196K), the [Columbia \(MO\) Missourian](#) (4/2, 21K), the [Boston \(MA\) Herald](#) (4/2, 777K), the [Cape Cod \(MA\) Times](#) (4/1, 83K), the [Chattanooga \(TN\) Times Free Press](#) (4/1, 196K), the [Chicago \(IL\) Tribune](#) (4/1, Goodman, 2.32M), the [Quincy \(IL\) Herald-Whig](#) (4/2, 77K), the [Daily Mail \(UK\)](#) (4/2, 4.78M), the [Houston \(TX\) Chronicle](#) (4/2, Goodman, 2.28M), the [Duluth \(MN\) News Tribune](#) (4/2, 129K), the [Detroit \(MI\) Free Press](#) (4/1, 987K), the [Brainerd \(MN\) Daily Dispatch](#) (4/2, 2K), the [Lehigh Valley \(PA\) Express Times](#) (4/2, 223K), the [St. Paul \(MN\) Pioneer Press](#) (4/2, 524K), the [Portage \(WI\) Daily Register](#) (4/2, 14K), [IIS News & World Report](#) (4/1, 685K), [Fox Business](#) (4/1, 408K), the [Washington \(DC\) Post](#) (4/2, 5.17M), [Yahoo!](#)

Survey Shows Impact Of Disease On Bats In Smokies. The [Knoxville \(TN\) News Sentinel](#) (4/2, 371K) reports that "a fungal disease that has killed hibernating bats by the millions in the northeastern U.S. is having a deadly impact on the Great Smoky Mountains National Park." According to the article, "a survey of bat populations this winter revealed sharp declines in nearly all of the park's cave-dwelling bats, including some of the most common species found in the Smokies."

WESTERN GOVERNORS ASSOCIATION TOUTS SAGE GROUSE CONSERVATION EFFORTS. The [AP](#) (4/2) reports that "a group of Western-state governors has released a report on voluntary efforts in 11 states to conserve the habitat of sage grouse as part of an effort to avoid a federal listing of the bird under the federal Endangered Species Act." The "2014 Sage-Grouse Inventory" was released Thursday by the Western Governors' Association and "identifies conservation work during the year" as well "efforts since 2011." The Western Governors' Association said "a listing will reduce voluntary conservation work and harm states' economies."

FWS AWARDS TRIBAL WILDLIFE GRANTS. The [Alaska Native News](#) (4/2, 245) reports that the FWS has "awarded \$200,000 each for conservation work to the Native Village of Tyonek and Telida Village Council under the Tribal Wildlife Grant program." According to the article, "the Native Village of Tyonek, in partnership with Tyonek Tribal Conservation District, will be using funds to remove a barrier to fish passage on Old Tyonek Creek, opening up 8 miles of river to Chinook and coho salmon." Also, "the Telida Village Council will be checking for up to 24 metals in the moose of the upper Kuskokwim River, working with the Fish and Wildlife Service, Alaska Department of Fish and Game, and the communities of McGrath, Takotna, Nikolai and Telida."

FWS SETS HEARINGS ON UPPER MISSISSIPPI RIVER NATIONAL WILDLIFE AND FISH REFUGE. The [La Crosse \(WI\) Tribune](#) (4/2, 87K) reports that the FWS has "released for public review and comment on a draft Prospectus and Invitation for Applications to Conduct Commercial Waterfowl Hunting Guide Services on the Upper Mississippi River National Wildlife and Fish Refuge."

MAN FACES CHARGES FOR PICKING UP WOUNDED OWL. The [South Florida Sun Sentinel](#) (4/1, 660K) reports that "a 28-year-old West Palm Beach man will face federal charges for picking up an injured owl and taking it on a joy ride, officials said." Stevenson Benjamin has been "charged with violating the Migratory Bird Treaty Act for capturing, possessing and transporting the great horned owl — a federally protected species — on March 16."

REHABILITATED HAWAIIAN MONK SEALS RETURNED TO NORTHWESTERN HAWAIIAN ISLANDS. The [West Hawaii Today](#) (4/2, 32K) reports that "two critically endangered Hawaiian monk seals were recently returned to Papahānaumokuākea Marine National Monument after being rehabilitated at The Marine Mammal Center's Ke Kai Ola Hawaiian Monk Seal Hospital in Kailua-Kona." The seals were "rescued last year in an emaciated state, one on Kure Atoll and another on Laysan Island, during NOAA Fisheries Hawaiian Monk Seal Research Program's field camp season."

GENOA FISH HATCHERY BIOLOGIST RECOGNIZED. [WXOW-TV](#) LaCrosse, WI (4/1, 2K) reports that Rep. Ron Kind "presented a statement for the Congressional Record to honor mussel researcher and Genoa Fish Hatchery biologist Nathan Eckert Wednesday." Eckert "received the 2014 U.S. Fish and Wildlife Service Rachel Carson Individual Award." Kind said, "Nathan's dedication and leadership has proved critical to protecting and sustaining the rich biodiversity of the Mississippi River. I want to sincerely thank him and the Genoa Fish Hatchery for building a legacy of conservation for generations to come."

ADDITIONAL COVERAGE OF EFFORT TO SAVE MONARCH BUTTERFLIES. Additional coverage of the effort to save monarch butterflies was provided by the [Logan \(UT\) Herald Journal](#) (4/2, 47K).

US Geological Survey:

RESEARCHERS SAY POLAR BEARS WON'T THRIVE ON LAND FOOD. The [AP](#) (4/2, Joling, 2.28M) reports that "a group of researchers say polar bears forced off melting sea ice will not find enough food to replace their current diet of fat-laden marine mammals such as seals, a conclusion that contradicts studies indicating that bears may be benefiting from bird eggs, berries and other land food sources." The article notes that "few bears are using land food and what they find can't replace lipid-rich ringed or bearded seals, said Karyn Rode, a U.S. Geological Survey research wildlife biologist and lead author of the review paper published Wednesday in the journal, *Frontiers in Ecology and the Environment*." The paper is "aimed at recent research documenting bears feeding on land and suggestions that those foods are becoming more important for them, which could increase their chance for survival as summer sea ice recedes, preventing seal hunting."

Securing America's Energy Future:

Renewable Energy:

DELAY FOR DESERT RENEWABLE ENERGY CONSERVATION PLAN CRITICIZED. The [Los Angeles Times](#) (4/2, Board, 3.49M) editorializes that "federal and state officials have spent six years examining how best to allocate land in the Mojave Desert to satisfy two disparate environmental imperatives: renewable energy to reduce Californians' thirst for gas and oil, and conservation to preserve unique places and protect wildlife in the desert's fragile habitat." However, "while the officials were hammering out their 8,000-page Desert Renewable Energy Conservation Plan, they failed to consider how the seven counties of the Mojave would view all of this," and "as a result, the grand design for the desert has been delayed." The paper says that "the counties should have been fully involved in the planning from the get-go" and "the failure to include them has needlessly delayed matters."

SODA MOUNTAIN SOLAR PROJECT CRITICIZED. In an op-ed for the [Sacramento \(CA\) Bee](#) (4/2, 547K), Mark Butler, who recently retired as superintendent of Joshua Tree National Park, writes that "the Interior Department has made missteps in proposing and approving industrialized renewable energy development on some of California's most impressive desert landscapes, forever harming the same lands it is entrusted to protect." He asserts that "there is no clearer example of this than the proposed Soda Mountain Solar project, which would be built only a stone's throw from the Mojave National Preserve." Butler says that "the solution is simple: Move this misguided project to already identified areas without such varied and drastic conflicts."

Onshore Energy Development:

THINK TANK PROPOSES CARBON TAX ON COAL FROM PUBLIC LANDS. The [Penn Energy](#) (4/2, 128) reports that "a just-released discussion paper from Resources for the Future, a Washington, D.C. think tank, floats the idea of imposing a carbon charge on coal extracted on federally-managed lands." The authors says that "our legal analysis concludes that BLM has the statutory and regulatory authority to impose such a charge and that it would be best to add it to the royalty rate." However, "a large fee that would dramatically reduce revenues could invite legal challenges, the RFF report acknowledges." The paper "suggests that the best approach would be a 'comprehensive set of charges on royalties for all fossil fuels, irrespective of ownership.'"

Offshore Energy Development:

APPROVAL OF ARCTIC EXPLORATION REFLECTS PRESIDENT'S BALANCED APPROACH. [Reuters](#) (4/1, Gardner) reports that the Administration's decision to approve Royal Dutch Shell's return to Arctic oil and gas exploration reflects a strategy that balances progress in renewable energy with the economic benefits of the oil and gas boom. Reuters reports that oil and gas discoveries in the Arctic may offset eventual declines in supplies from shale sources.

Additional coverage of the decision on the Chukchi Sea petroleum lease was provided by the [Environment & Energy Publishing](#) (4/2, Subscription Publication, 705), the [Washington Examiner](#) (4/2, 315K), the [Houston \(TX\) Chronicle](#) (4/2, 2.28M), the [Fairbanks \(AK\) News-Miner](#) (4/2, 39K), the [Alaska Journal of Commerce](#) (4/2, 14K), the [Alaska Native News](#) (4/2, 245), [The Arctic Journal \(GRL\)](#) (4/2), the [Oil and Gas Journal](#) (4/2, 1K), [UPI](#) (4/1), [HotAir](#) (4/1, 86K), [Grist](#) (4/2, 9K), and [Common Dreams](#) (4/1, 10K).

Sen. Murkowski Demands Inclusion Of More Alaska Drilling Options. The [Law 360](#) (4/2, 9K) reports that Sen. Lisa Murkowski has "asked that more potential oil and natural gas reserves off the coast of Alaska be included in a five-year leasing plan, including one 9.8 million-acre area President Barack Obama has designated as off-limits for future drilling." In a Monday letter to the BOEM, Murkowski said that "the president's action undermined the public's trust in a process that was supposed to include robust public discourse."

BP INSISTS ALL IS WELL IN THE GULF. [The Guardian \(UK\)](#) (3/31, Moskowitz, 2.74M) reports that BP is increasing its PR effort to "convince consumers that life is returning to normal on the Gulf coast." Evidence however "is mounting that five years after millions of gallons of oil spilled into the Gulf of Mexico, wildlife is still struggling to rebound," the article reports. A National Wildlife Federation (NWF) report says that "over 20 species are still affected by the spill." "This report... shows that science is certain that this is a long-term problem," according to Ryan Fikes, a scientist with NWF. "But it's going to take even more time to understand the true magnitude of this." The US National Oceanic and Atmospheric Administration (NOAA) says that BP "misinterprets and misapplies" data to obscure the truth. Activists and locals "say that in addition to having to deal with economic hardships and environmental damage, BP's insistence that everything is getting better merely acts as salt on a not-yet-healed wound," according to the article.

2.28M), and [Think Progress](#) (3/30, 331K).

BP Says Oil Spill Fine Above \$2.3 Billion Would Be Detrimental To Business. The [New Orleans Times-Picayune](#) (4/2, Larino, 621K) reports, "BP says an oil spill fine any larger than \$2.3 billion would drain its US unit of cash and threaten its future operations in the Gulf of Mexico. BP faces up to \$13.7 billion in fines for pollution caused by the 2010 disaster." As BP seeks to reduce the fine it will face in court, the British oil giant "said its US unit, BP XP, is 'limited' in its ability to pay the fines. A larger fine would drain the subsidiary of cash for 2015 and push it to the brink of insolvency," the article reports. US District Judge Carl Barbier said during trial that a large fine could be paid out over time in the form of smaller payments.

CONTINUING COVERAGE OF OFFSHORE DRILLING PROPOSAL. The [Cape May County \(NJ\) Herald](#) (4/2, 6K) reports that "Assemblymen Vince Mazzeo and Bob Andrzejczak have introduced legislation opposing a proposal to open portions of Atlantic Coast for oil and natural gas drilling." Mazzeo said, "Offshore drilling threatens the economy and the environment of New Jersey and other coastal states." Andrzejczak added, "The administration should take into account lessons from disasters such as the BP Deepwater Horizon oil spill and take steps to protect people and the environment from the hazards associated with offshore drilling."

Meanwhile, the [Myrtle Beach \(SC\) Online](#) (4/1, 24K) reports that "Grand Strand elected officials at Wednesday's Coastal Alliance meeting said they think it's best to take a wait-and-see approach instead of immediately taking a position against seismic testing and offshore drilling." North Myrtle Beach Mayor Marilyn Hatley, Surfside Beach Mayor Doug Samples and Horry County Council Chairman Mark Lazarus said "they will continue to listen to the debate on seismic testing along the Atlantic coast."

In an editorial, the [Hampton Roads \(VA\) Virginian-Pilot](#) (4/2, 405K) urges Virginia Beach to join other communities in "opposing offshore drilling or seismic testing." The paper says "the risk of damage to the environment and to one of the city's greatest economic engines – tourism – in the event of a spill" outweigh the benefits.

FATALITIES REPORTED AFTER PEMEX GULF RIG BLAZE. The [AP](#) (4/2) reports that early Wednesday a fire erupted at a shallow water crude platform in the Gulf of Mexico. Pemex's Abkatun Permanete platform in the Campeche Sound had 300 workers aboard, who were evacuated.

[Bloomberg News](#) (4/2, Navarro, 2.94M) reports that two injured workers were said to be in serious condition, while Pemex reported four worker fatalities and 16 injuries.

[USA Today](#) (4/2, Stanglin, 4.95M) reports that in a statement, Pemex said eight firefighting vessels were helping to battle the fire.

[Reuters](#) (4/2, Martinez, Stargardter) reports that there may have been as many as 45 injured in the fire, and at least one worker was seriously injured. The blaze started in the dehydration and pumping section of the platform, though Pemex said it remained unclear what caused the fire.

The [Wall Street Journal](#) (4/2, Harrup, Subscription Publication, 5.67M) notes one worker who died was an employee of Pemex contractor Cotemar.

[The Guardian \(UK\)](#) (4/2, 2.74M) notes that the Abkatun platform has been used "to separate gas from crude oil and is not a drilling rig, so there is no open well or danger of a major ongoing oil leak," according to a Pemex spokeswoman.

Tackling America's Water Challenges:

CALIFORNIA GOVERNOR ANNOUNCES MANDATORY WATER RESTRICTIONS. Media coverage of Gov. Jerry Brown's announcement, which included reports on all three network newscasts, highlighted the seriousness of California's water crisis. [ABC World News](#) (4/1, story 4, 1:45, Marciano, 5.84M) showed Brown saying, "We're in a historic drought and that demands unprecedented action," and noted that he ordered "all cities and towns to cut water usage immediately by 25 percent. ... The new mandate could possibly see further restrictions on homeowners who were already urged to reduce water by 20 percent, facing fines for things like washing off sidewalks." [USA Today](#) (4/2, Cava, 4.95M) notes that other "measures Brown will have the California Water Resources Control Board oversee" include: "water reduction on the part of golf courses, cemeteries and other large landscaped spaces; the replacement of 50 million square feet of lawn statewide with drought-tolerant landscaping; a rebate program to encourage the purchase of water-saving appliances; and requiring new homes to use drip irrigation."

As he made the announcement, the [Los Angeles Times](#) (4/2, Megerian, Stevens, 3.49M) reports, Brown was "standing on a patch of brown grass in the Sierra Nevada that is usually covered with several feet of snow at this time of year." Said the governor, "it's a different world. ... We have to act differently." The [New York Times](#) (4/2, Nagourney, Subscription Publication, 9.97M), meanwhile, quotes Brown as saying, "This is the new normal. ... We will learn how to cope with this." The [CBS Evening News](#) (4/1, story 4, 2:10, Villafranca, 5.08M) reported that "several of the state's reservoirs are at a third of capacity, and the underground water supply is rapidly being depleted." In fact, "researchers say California will need 11 trillion gallons of water to recover." The [Washington Post](#) (4/2, Wilson, 5.17M), meanwhile, says "data suggests the drought will only get worse," spreading "across every western state."

[NBC Nightly News](#) (4/1, story 2, 3:05, Almaguer, 7.86M) featured footage from a "drone video documenting bone-dry record breaking conditions," and noted that "NASA says this epic drought now affects 64 million Americans across the west." Benjamin Cook of NASA's Goddard Institute for Space Studies was shown saying, "Very likely the single worst drought of the last 150 years and possibly approaching the worst drought of the last 500 to 1,000 years." [NBC Nightly News](#) (4/1, story 3, 1:15, Rascon, 7.86M) went on to report that "many California farmers are in crisis mode" and "losing billions of dollars every year that we have this drought." With "many of them... surviving thanks to groundwater...they're pumping so much of it so fast that the ground in some areas is literally sinking."

[Bloomberg News](#) (4/2, Marois, 2.94M) says "Brown's order isn't a burden for homebuilders who already face strict building codes that limit water use." Instead, "the bigger impact will be on older homes, especially the 7.5 million residences built before codes enacted after the 1970s drought." Yesterday's order "proposed a statewide consumer rebate program to replace old appliances with water-saving and energy-efficient models." "Conserving water in California isn't just a suggestion anymore," said the [Huffington Post](#) (4/2, O'Connor, 281K). The [Wall Street Journal](#) (4/2, Carlton, Subscription Publication, 5.67M), among other news outlets, also reports on Brown's order.

In an editorial, the [Sacramento \(CA\) Bee](#) (4/2, 547K) writes, "After three grinding years of drought, Brown has taken serious action. To which we say: Finally." While "Brown is to be commended for heeding the alarm bells...California's response to this slow-motion natural disaster has been nerve-rackingly tentative until now." The [Los Angeles Times](#) (4/2, 3.49M), meanwhile, editorializes that "in the short term...the most effective projects may come in the form of software to better manage home water use, landscape design to better capture rainwater, and a greater respect for the value of the state's most precious resource."

Additional coverage was provided by the [Seattle \(WA\) Times](#) (4/2, 1.05M), [KPBS-TV San Diego \(CA\)](#) San Diego (4/1, 6K), [WTTW-TV](#) (4/2) and [KUTV-TV](#) (4/2).

Scientists: Climate Change Aggravating Drought. The [New York Times](#) (4/2, Fountain, Subscription Publication, 9.97M) reports that according to scientists, "the severe California drought that has led the state to order cutbacks in water use may not have been set off by climate change...but global warming is making the situation worse." Princeton's Michael Oppenheimer, for example, said, "The drought is made of two components: not enough rain and too much heat. ... The rain deficit isn't clearly connected to climate change, but the planetary warming has made it more likely that the weather would be hotter in California."

California Rainy Season Ends. [Bloomberg News](#) (4/1, 2.94M) reports that "California is entering its fourth year of drought as its rainy season ends with blue skies and brown hillsides from San Francisco to Los Angeles, threatening crops and livestock in the most productive agricultural region." The article notes that "hopes for a wetter-than-usual winter to replenish reservoirs drained by three years of drought subsided with the end of March, as a dry spring left San Francisco with 89 percent of its usual rainfall and Los Angeles with 64 percent, according to the National Oceanic & Atmospheric Administration."

FORMER INTERIOR OFFICIAL SAYS DROUGHT WILL FORCE TOUGH CHOICES. The [Deseret \(UT\) News](#) (4/2, 538K) reports that at the annual spring runoff conference Wednesday at Utah State University, Anne Castle, a former assistant for water and science at the Interior Department, a featured speaker at the event, stressed that "in water-challenged times like these, tough decisions will have to be made." Castle said, "This is where the rubber meets the road. It would be easy if we had enough water to meet all the needs, but we don't, particularly now when we are experiencing climate change impacts. We have historic drought in the Colorado River system, California is undergoing unprecedented drought, so this is where we need to come up with policies that will guide us in balancing all those needs."

LEGISLATION WOULD MITIGATE IMPACT OF INCREASE IN UNIMPAIRED FLOWS FROM MERCED, STANISLAUS OR TUOLUMNE RIVERS. In an op-ed for the [Modesto \(CA\) Bee](#) (4/2, 163K), Assemblyman Adam Gray writes that "the state of California has proposed a staggering increase in the unimpaired flows from the Tuolumne, Merced and Stanislaus rivers." He has "introduced AB 1242, which would require the State Water Resources Control Board to fully mitigate the impact of any increase in unimpaired flows from the Merced, Stanislaus or Tuolumne rivers."

ADDITIONAL COVERAGE OF PARTNERSHIP WITH CROW TRIBE ON YELLOWTAIL AFTERBAY HYDROPOWER. Additional coverage of the plans to partner with the Crow Tribe on hydropower was provided by the [Indian Country Today Media Network](#) (4/1, 49K), the [Billings \(MT\) Gazette](#) (4/2, 165K), and the [Native American Times](#) (4/2,

Empowering Native American Communities:

PAMUNKEY INDIANS FACE MORE HURDLES TO RECOGNITION. The [Washington Post](#) (3/31, Heim, 5.17M) reports that Kevin Washburn, the Interior Department's assistant secretary for Indian affairs, says "he will not make a final decision on the Pamunkey case until the end of July, a delay that has given critics hope that they will succeed in derailing the Pamunkey application." According to the article, "the tribe's powerful foes, which include casino giant MGM and a growing number of lawmakers, have taken different, seemingly contradictory tacks." Kevin Brown, "the elected chief of the 208-member Pamunkey, rejected the latest blast of criticism."

CONFERENCE HELD ON VIOLENCE AGAINST WOMEN ACT. The [Rapid City \(SD\) Journal](#) (4/2, 101K) reports that a Rapid City conference on Tuesday reviewed the steps Native American tribes will have to take to apply the federal Violence Against Women Act, which was reauthorized in 2013." However, "Kevin Washburn, assistant secretary for Indian Affairs with the Department of Interior, acknowledged the act isn't going to be easy to put into practice." The article notes that "paying for the necessary legal system will be expensive because the act requires tribes to have courts with law-trained judges and attorneys."

BIA OFFICIAL WHO WAS STABBED RELEASED FROM HOSPITAL. The [Kansas City \(MO\) Star](#) (4/2, 637K) reports that BIA superintendent on the Crow Creek Indian Reservation "who was stabbed last week has been released from the hospital." According to Interior Department spokeswoman Nedra Darling, "Patrick Duffy was released Wednesday and is expected to fully recover."

EMAILS PROTEST TRIBAL TRUST MICCOSUKEE GOLF AND COUNTRY CLUB. The [Kendall \(FL\) Gazette](#) (4/2, 738) reports that "a massive email drive has begun in an effort to flood a U.S. Bureau of Indian Affairs office with Kendale Lakes residents' objections to a tribal trust designation for the Miccosukee Golf and Country Club." According to the article, "a group working with Miles Moss, former president of the Kendall Federation of Homeowner Associations, is circulating wording of two documents to protest an action indicated in a Jan. 15 letter sent to Miami-Dade Mayor Carlos Gimenez from Randall Trickey, acting director of the Bureau's Eastern Region in Nashville, TN."

TRIBES PREVAIL IN LANDMARK CHILD WELFARE CASE. The [Indian Country Today Media Network](#) (4/1, 49K) reports that "on Monday, March 30 a federal judge issued a landmark decision affirming that officials in South Dakota violated numerous provisions in the Indian Child Welfare Act (ICWA) and denied Indian parents their rights under the Due Process Clause of the Constitution." Judge Jeffrey Viken "issued a partial summary judgment in favor of the plaintiffs in Oglala Sioux Tribe v. Luann Van Hunnik on seven issues before the court regarding emergency removal hearings, also known as '48-hour hearings,' in Pennington County, South Dakota."

TRIBES CONSIDER IMPACT OF CLIMATE CHANGE. The [Indian Country Today Media Network](#) (4/1, 49K) reports that "Quinault Nation President Fawn Sharp appeared before the House Interior Appropriations Subcommittee in Washington, D.C. on March 24 to request federal funding to support the relocation of homes, public buildings and schools out of a tsunami zone in the coastal village of Taholah." The article notes that "Sharp's testimony came a week after the Affiliated Tribes of Northwest Indians, of which she is president, hosted a summit, 'Asserting Native Resilience – Protecting and Enhancing Tribal Resources and Sovereignty in the face of Climate Change.'"

Top National News:

WHITE HOUSE UNDER PRESSURE AS IRAN TALKS CONTINUE INTO THURSDAY. With few new details to report, coverage of the ongoing talks over Iran's nuclear program focuses on the extension of the talks through Thursday morning, and on remarks from several negotiators and governments that some preliminary agreement is expected to be reached. The three broadcast networks combined for less than two minutes of coverage, with NBC running a one-minute report and ABC and CBS just brief updates, none of them near the top of their broadcasts.

A number of analyses say the extension of the talks creates difficulties for the President, who is described as reticent to give up on a major part of his second term foreign policy agenda, but also as aware that the longer the talks continue after the deadline, the more difficult it will be for the Administration to hold off Congressional calls for additional sanctions.

The [AP](#) (4/2, Pace), for example, says that Obama's willingness to extend the talks "has laid bare the dilemma he faces." An exit "would strip" him "of a legacy-shaping deal, deeply complicate international efforts to stop Iran's suspected pursuit of a bomb, and perhaps raise the specter of U.S. military action against Tehran's nuclear installations," but by "blowing through self-imposed deadlines," the President could anger impatient lawmakers from both parties who seek a tougher line against Iran. The [Wall Street Journal](#) (4/2, Solomon, Norman, Switzerland, Lee, Subscription Publication, 5.67M) reports on its front page that the White House is now discussing options in the event that talks fail, with options including an extension of the current interim agreement, stiffer sanctions, and military action.

In a front-page analysis, the [Washington Post](#) (4/2, A1, Jaffe, 5.17M) writes that Obama's "desire to keep negotiating reflects both the importance he has placed on the talks and his particular view of how American leadership, persistence and engagement with determined enemies can change the world." The issue has also focused on diplomacy, not military action, and deals with nuclear proliferation, an issue "that has been a major focus for Obama since he first arrived in Washington" as a senator a decade ago. The Post says "the negotiations are also personal" for Obama, who "was dismissed as dangerously naive" in his 2008 campaign against then-Sen. Hillary Clinton for suggesting engagement with Iran, and has faced the same charge from Republicans and Israeli Prime Minister Benjamin Netanyahu.

[USA Today](#) (4/2, Dorell, 4.95M) says leaders of both parties "have pledged to push for a vote on two bills that would increase pressure on Iran," with Sens. Bob Corker and Robert Menendez pushing a measure that "would give a skeptical Congress authority to approve any deal," and the other setting an increase in sanctions to take effect after June 30 if no comprehensive agreement is reached by then. Obama has said he would veto both bills.

[The Hill](#) (4/1, Wong, 224K) reports Republican calls for sanctions "got louder Wednesday," with Reps. Bradley Byrne (R-AL) and Vicky Hartzler (R-MO) among those joining Sen. Tom Cotton in his call for an immediate vote. [Politico](#) (4/2, Everett, 669K) says GOP senators said Wednesday that any deal "will only get worse as negotiations drag on" past the original deadline. The [Daily Caller](#) (4/2, Griswold, 318K) reports that "even Howard Dean," the former Democratic National Committee chairman, while not calling for new sanctions, said the US should exit the talks. He said on MSNBC, "I think the United States is negotiating from a much stronger position than we were four years ago. And the reason for that is, these guys are desperate to get rid of the sanctions."

Cotton said on [CNN's Situation Room](#) (4/1, 554K), "Any kind of agreement, based on the reports we have seen out of Switzerland, is going to kick the can down the road on all the major details. Unfortunately, the Administration's already made very dangerous concessions. ... What I have supported in the United States Senate and what many Democrats as well as Republicans have supported is future prospective sanctions. Not immediate sanctions but sanctions that would go into effect if Iran walked away from the table."

Rep. Adam Schiff (D-CA) said on [CNN's Situation Room](#) (4/1, 554K), "The question is, is there going to be enough meat on the bones to justify going until June 30 and enough to hold off Congress from enacting sanctions? I think all of us are waiting to see what materializes in the next 24 hours." Asked if "a framework to continue the discussions," would be enough to keep lawmakers from imposing new sanctions, Schiff said, "I don't think so. I think they will have to produce something very tangible."

In a brief story on [ABC World News](#) (4/1, story 11, 0:20, 5.84M), David Muir reported that while the deadline has passed, Secretary of State Kerry said negotiators have "made enough progress to keep going forward," and James Rosen reported on [Fox News' Special Report](#) (4/1, Baier, 1.53M) that aides to Kerry "confirmed that he would be staying on" in Switzerland for more talks through Thursday morning. Meanwhile, White House Press Secretary Josh Earnest "sought to find firmness and the willingness of the US to walk away from the negotiating table...even as he admitted, for the first time that the Administration is willing to extend the talks beyond their hard deadline of June 30."

Lester Holt reported on [NBC Nightly News](#) (4/1, story 7, 1:00, 7.86M) that there is "still no deal tonight in the high stakes negotiations," and Ann Curry added that the "final roadblocks now are few but very tough to get around." Kerry "met repeatedly" with Iranian Foreign Minister Mohammad Javad Zarif throughout the day Wednesday. Scott Pelley reported in a brief story on the [CBS Evening News](#) (4/1, story 8, 0:25, 5.08M) that while the State Department "says progress has been made," one "sticking point" is that the Iranians "want crippling economic sanctions lifted now" while the US and other nations "want to keep some in place so the Iranians don't cheat."

The [AP](#) (4/2) says the negotiations "are heading into double overtime," with Kerry planning to stay until at least Thursday. The AP says "significant gaps" remain to be worked out, with officials now seeking "to produce a joint statement outlining general political commitments to resolving concerns" about Iran's nuclear program.

[Reuters](#) (4/2, Charbonneau) says French Foreign Minister Laurent Fabius left the talks early Wednesday, saying no "immediate deal" was likely, but [AFP](#) (4/2) reports that Germany's Frank-Walter Steinmeier said Fabius planned to return. Reuters said Russian and Iranian diplomats expressed confidence that an initial agreement was within sight. The [Washington Post](#) (4/2, Morello, 5.17M) reports negotiators from those two countries said a preliminary agreement could be coming "within hours."

The [New York Times](#) (4/2, Gordon, Subscription Publication, 9.97M) also says "an initial accord was potentially within reach" Wednesday, "but there was still much to work out." British Foreign Secretary Philip Hammond said, "I think we have a broad framework of understanding, but there are still some key issues that have to be worked through. Some of them are quite detailed and technical, so there is still quite a lot of work to do; but we are on it now and we'll keep going at it." The Times says the Obama

made. The talks continue to be productive.”

The [Wall Street Journal](#) (4/2, Norman, Solomon, Subscription Publication, 5.67M) also says there were indications of progress emerging from the talks, with negotiators saying proposals would be aired Wednesday night. Iranian Deputy Foreign Minister Abbas Araghchi said Tehran is no longer insisting that all sanctions be dropped immediately, though Iran’s demand that economic sanctions be lifted at once remained unchanged.

[Politico](#) (4/2, Wheaton, 669K) writes that the talks “haven’t collapsed yet, but the pre-emptive blame game has already begun.” Both the US and Iran “want to be very clear: If there’s a stalemate, it’s the other side’s fault.” The concern is not just political; both nations are also concerned that any “perception that they caused the breakdown could put them in a worse position on the world stage than they were in before the talks started 18 months ago.” Earnest said Wednesday, “What is clear is that Iran now, and over the course of talks that have lasted over a year, has had every opportunity to make the kinds of commitments that the international community expects.”

US, Israel Say Israeli Missile Shield Tests Successful. [Reuters](#) (4/2, Williams, Shalal) reports US and Israeli officials said the new David’s Sling air defense system, which the two countries are developing together, met all objectives in a series of recent tests and could be deployed by 2016. The missile shield shot down targets simulating missiles that could be fired from Syria or Lebanon.

Milbank: For Bolton, “War Is The Answer.” Dana Milbank writes in his [Washington Post](#) (4/2, Milbank, 5.17M) column that Bush Administration UN ambassador John Bolton, a “champion of the Iraq war,” has been calling for the “immediate bombing” of Iran. Milbank writes, “For the mustachioed man of war, force is the option of first resort. The military option isn’t just on the table – it’s the only thing on the menu.” Milbank concludes, “For Bolton, war is the answer.”

Commenting On Iran Talks, Bachmann Likens Obama To Germanwings Pilot. The [Daily Caller](#) (4/2, Pappas, 318K) reported that former Rep. Michele Bachmann “is comparing...Obama to the Germanwings co-pilot who officials believe killed 149 people by intentionally crashing his airliner into the French Alps last week.” Said Bachmann, “With his Iran deal, Barack Obama is for the 300 million souls of the United States what Andreas Lubitz was for the 150 souls on the Germanwings flight – a deranged pilot flying his entire nation into the rocks. ... After the fact, among the smoldering remains of American cities, the shocked survivors will ask, why did he do it?”

More Commentary. Nicholas Kristof argues in his [New York Times](#) (4/2, Kristof, Subscription Publication, 9.97M) column that “as the Iranian nuclear talks creep on into double overtime, let’s remember that this isn’t just about centrifuges but also about creating some chance over time of realigning the Middle East and bringing Iran out of the cold.” Kristof writes that with tougher sanctions or military action, “Iran probably ends up with a nuclear capability within a decade,” but with a policy that undermines Iran’s extreme and unpopular government, the US could set the stage for better future relations.

In his [Wall Street Journal](#) (4/2, Henninger, Subscription Publication, 5.67M) column, Daniel Henninger looks at the long history of international talks with North Korea over its nuclear program, saying Iran can take the lesson that without a credible threat of action, rogue nations can act with impunity.

Veteran US Middle East negotiator Dennis Ross writes in [Politico Magazine](#) (4/2, Ross) that while the framework that could emerge “would represent progress toward constraining the Iranian nuclear program,” the Obama Administration’s claim “that any eventual agreement will block all pathways toward an Iranian nuclear weapon.. is surely an overstatement.” A deal could “create impediments for the life of the agreement but offer little afterward. At that point, the administration and its successors would need to make clear that should Iran seek to break out to the production of weapons-grade enriched uranium – or the preparation of nuclear weapons – it would trigger the use of force by us.”

MENENDEZ INDICTED ON FRAUD, BRIBERY CHARGES. Media coverage of Sen. Bob Menendez’s [indictment](#), which includes reports on all three network newscasts, highlights both the seriousness of the charges and Menendez’s emphatic protestations of innocence. In print media, Menendez is being described as a leading lawmaker and an opponent of the President’s policies in Cuba and Iran, and some reports indicate he faces a daunting task in getting out from under the charges. [Politico](#) (4/1, Bresnahan, 669K), for example, reports that “privately, many Senate Democrats and their top aides are convinced Menendez is in serious legal jeopardy, including a potentially long prison sentence if convicted.”

[ABC World News](#) (4/1, story 10, 1 00, Wright, 5.84M) noted that Menendez was hit with “14 counts of corruption and bribery charges,” accused of accepting “hundreds of thousands of dollars in campaign funds and political perks from” Dr. Salomon Melgen, “a Florida ophthalmologist, in exchange for political favors.” The [National Journal](#) (4/2, Fox, Berman, Subscription Publication, 111K) reports that according to the DOJ report, “Menendez also aided Melgen with getting visas for ‘several of Melgen’s girlfriends.’” The [CBS Evening News](#) (4/1, story 3, 0:25, Pelley, 5.08M) briefly mentioned the story, noting that “Menendez, who often seems to relish a fight, says he’s innocent.”

The [Washington Post](#) (4/2, Kane, Debonis, 5.17M) reports Menendez was “defiant” last night “before a boisterous crowd of supporters, saying that Melgen’s gifts were a result of friendship dating to the early 1990s and not in exchange for political favors.” Said Menendez, “I’m angry and ready to fight.” The [Los Angeles Times](#) (4/2, Serrano, Phelps, Mascaro, 3.49M) notes Menendez also “dismissed the indictment as a political maneuver,” saying, “I’m outraged that prosecutors at the Justice Department were tricked into starting this investigation three years ago with false allegations by those who have a political motive to silence me, but I will not be silenced. ... I’m confident – at the end of the day – I will be vindicated and they will be exposed.”

[NBC Nightly News](#) (4/1, story 8, 1:25, Williams, 7.86M) reported that “Menendez says Melgen is a close friend, not just a political donor and a former Federal prosecutor says that may be a big issue.” Former Federal prosecutor Adam Lurie was shown saying, “It’s just not illegal for a friend to help a friend. It could be bad government, it could be a political issue, but that’s going to be a challenge for government here because this relationship, as I understand it, it goes back a long way.” The [Miami Herald](#) (4/2, Weaver, 694K), however, reports Assistant Attorney General Leslie Caldwell said in a statement, “Government corruption – at any level of elected office – corrodes the public trust and weakens our democratic system.”

Focusing on the policy implications of the indictment, [Politico](#) (4/2, Kim, 669K) reports that despite the indictment, Menendez’s office said last night the senator “plans to support [Loretta] Lynch’s confirmation when it comes to the Senate floor in the coming weeks.” [Politico](#) (4/1, Bresnahan, 669K) reports in a separate story that Menendez yesterday “wrote a letter to Senate Minority Leader Harry Reid...saying he is voluntarily stepping down from his post as top Democrat on the Foreign Relations Committee,” though he “will keep his seniority on the panel, and he will get his position back if he’s cleared of the charges.”

[Bloomberg News](#) (4/2, Voreacos, Wilber, Hunter, 2 94M) notes that Menendez has “emerged as a leading critic of...Obama’s efforts to forge a nuclear deal with Iran and restore relations with Cuba,” while the [New York Times](#) (4/1, Apuzzo, Subscription Publication, 9.97M) describes Menendez as “a crafty politician who...seems to relish a fight, whether with members of his own party in New Jersey or with” the President “over relations with Iran and Cuba.” [USA Today](#) (4/2, Gaudiano, Johnson, 4.95M) also reports that Menendez “has been a vocal critic of the Obama administration’s efforts to normalize relations with the Castro regime, saying the president struck a ‘bad deal for the Cuban people,’” and has “accused administration officials of using talking points ‘straight out of Tehran’ in their negotiations with Iran over the country’s nuclear program.” The [AP](#) (4/2, Tucker, Carlin) also says the senator “has played a leading role on Capitol Hill on” the Iran and Cuba issues.

[McClatchy](#) (4/2, Doyle, Subscription Publication, 17K) says the New Jersey lawmaker is “one of the least wealthy senators currently serving, with his most recent financial disclosure statement showing he is among the Senate’s relatively few non-millionaires.” [Reuters](#) (4/2, Edwards) describes the senator as one of the best known Hispanic officials in the country, and the [Washington Times](#) (4/2, Dinan, 644K) notes he is “the only Hispanic Democrat in the Senate” and “has made immigration a particular cause during his time in Washington.” The [Philadelphia Inquirer](#) (4/2, Tamari, 617K), [Huffington Post](#) (4/1, Reilly, 281K), [Roll Call](#) (4/1, Lesniewski, Subscription Publication, 102K), [The Hill](#) (4/1, McCabe, Kamisar, 224K), and the [Daily Caller](#) (4/2, Ross, 318K) run similar stories.

Reporting on the possibility that Menendez may be forced to leave his Senate seat, the [Asbury Park \(NJ\) Press](#) (4/2, Jordan, 371K) says that if it “becomes vacant, Republican Gov. Chris Christie is in charge of choosing a temporary replacement and scheduling a special election.” Potential replacements include former US Sen. Jeffrey Chiesa, Rep. Frank Pallone, Rep. Rush Holt, Lt. Gov. Kim Guadagno, and “the wildcard: Assemblywoman Alison Littell McHose.” Asked about Menendez’s future, and the possibility of a special election to replace him, the [Wall Street Journal](#) (4/2, Grossman, Dawsey, Subscription Publication, 5.67M) quotes Christie as saying, “Everybody deserves the presumption of innocence and there’s no reason for me or anybody else to get out ahead of themselves.”

[USA Today](#) (4/2, Gaudiano, 4.95M), meanwhile, reports that “New Jersey Democrats lined up behind...Menendez on Wednesday,” with “the state’s Democratic committee” releasing “statements from several New Jersey lawmakers and officials,” and starting “a Twitter account – @IStandWithBob – and an identical hashtag to highlight support for Menendez.”

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinintelligence.com.

DATE WEDNESDAY, APRIL 1, 2015 7 00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS

- + Interior Affirms Revised Review Of Chukchi Sea Lease.
- + Hawaii Internment Camp Dedicated As National Monument.
- + Interior Focusing On Saving Prime Sage Grouse Habitat.
- + Bishop Plans Public Lands Hearings On Federal Ownership.
- + Interior's Burns Recognized On List Of D.C.'s Top 50 Women In Tech 2015.
- + Interior Provides Guidance On "Bring Your Own Device" Policy.

AMERICA'S GREAT OUTDOORS

National Park Service:

- + NPS Begins Preparations For Centennial Celebration.
- + Concerns Raised Over Park Police Helicopter.
- + Officials Differ Over Future Of The Bi-County Parkway.
- + Yosemite National Park Braces For Dry Year.
- + Alcatraz Ferry Terminal Could Move To Fort Mason.
- + Joshua Tree Climbing Area Shut Down While Raptors Nest.
- + Woman Hurt In Fall At Icy Wall In Rocky Mountain National Park.

Bureau of Land Management:

- + Nevada Rancher Bundy, Supporters Rally For Nevada Land Bill.
- + Wildfire Prevention Sheep Return To Fort Ord.

Fish and Wildlife Service:

- + Great Lakes States Receive More Than \$10 Million From FWS.
- + FWS Withdraws \$300K Summer's End Marina Grant.
- + Federal Agencies Unveil Plan To Help Small Bird, Other Species.
- + Monsanto Pledges \$4 Million To Effort To Save Monarch Butterflies.
- + Federal Agencies Prevail In Lawsuit Filed By Environmental Group.
- + FWS Warehouse Stores Contraband From Illegal Wildlife Trade.
- + Minnesota Professor Charged With Smuggling Ivory, Rhinoceros Horns.
- + Reward Offered In Shooting Of Bald Eagle.
- + Obama Administration Fighting Animal Trafficking.

US Geological Survey:

- + West Coast Lawmakers Seek Funding For Earthquake Early Warning System.

SECURING AMERICA'S ENERGY FUTURE

Onshore Energy Development:

- + North Dakota To Join Wyoming Lawsuit Over New Fracking Rule.
- + Additional Coverage Of Proposed Drilling Rules In Colorado.

Offshore Energy Development:

- + Safety Regulations Updated For Newly Constructed Offshore Facilities.
- + Offshore Drilling Proposal Criticized.

TACKLING AMERICA'S WATER CHALLENGES

- + Interior Announces Plans to Partner with Crow Tribe on Yellowtail Afterbay Hydropower.

EMPOWERING NATIVE AMERICAN COMMUNITIES

- + North Stonington Leader Welcomes Call For Review Of Changes To Tribal Recognition Rules .
- + Man Charged In Stabbing Of BIA Official.
- + Judge Dismisses Duluth's Challenge To Casino Ruling.
- + Interior Panel Sides With BIA On Osage Mineral Rights Dispute.
- + Interior Panel Upholds BIA's Decision On Navajo Land Lease .

OFFICE OF INSULAR AFFAIRS

- + US Island Territories Are Said To Be Most Vulnerable To Climate Change.

TOP NATIONAL NEWS

- + Obama Pocket-Vetoes GOP Attempt To Overturn Union Rules.
- + Obama Releases Plan To Cut Emissions By 28% Over 10 Years.

DOI in the News:

INTERIOR AFFIRMS REVISED REVIEW OF CHUKCHI SEA LEASE. The [AP](#) (4/1, 3.41M) reports that the Interior Department said Tuesday that "it has affirmed corrections to an environmental analysis of a 2008 Arctic Ocean petroleum lease sale that brought in \$2.7 billion for the federal government." The article notes that "the expected decision regarding the lease in the Chukchi Sea off Alaska's northwest coast opens the door for the department to review a 2015 Chukchi exploration plan by Royal Dutch Shell PLC." Interior Secretary Sally Jewell said "in the announcement that the analysis was thorough with substantial opportunity for public comment."

The [FuelFix](#) (3/31, 7K) reports that Jewell stressed that the Arctic "is an important component of the administration's national energy strategy." She added, "We remain committed to taking a thoughtful and balanced approach to oil and gas leasing and exploration offshore Alaska. This unique, sensitive and often challenging environment requires effective oversight to ensure all activities are conducted safely and responsibly."

[The Hill](#) (4/1, Cama, 224K) reports that "the affirmation of the Bush administration's lease by the Interior Department came over the objection of environmentalists and wildlife advocates who say that any drilling in the delicate Arctic Ocean would hurt the environment and ecosystems." Susan Murray, a vice president at Oceana, said in a statement, "Today's announcement is both expected and disappointing. The Obama administration has steadfastly refused to fully and fairly evaluate the risks of selling leases in the Chukchi Sea and, instead, treats the leases sold in 2008 as if they're set in stone." Erik Grafe, an attorney with Earthjustice, said in a statement, "We are disappointed in Interior's rushed lease sale decision. Interior still has time to make a better decision when evaluating Shell's drilling plan, and we sincerely hope it says no to Shell's louder, bigger, and dirtier tactics, loaded with potential environmental harm."

Additional coverage was provided by the [Cordova \(AK\) Times](#) (4/1, 2K), the [Chippewa \(WI\) Herald](#) (4/1, 17K), the [St. Joseph \(MI\) Herald Palladium](#) (4/1, 43K), the [Washington \(DC\) Post](#) (3/31, Dan Joling I, Ap, 5.17M), the [Houston \(TX\) Chronicle](#) (4/1, Joling, 2.28M), the [Quincy \(IL\) Herald-Whig](#) (4/1, 77K), the [Seattle \(WA\) Post-Intelligencer](#) (3/31, 612K), the [Anchorage \(AK\) Dispatch News](#) (3/31, 146K), the [San Francisco \(CA\) Chronicle](#) (4/1, 2.21M), the [Salt Lake \(UT\) Tribune](#) (4/1, 405K), the [Seattle \(WA\) Stranger](#) (3/31, 162K), [The Telegraph \(UK\)](#) (4/1, 807K), the [Daily Mail \(UK\)](#) (4/1, 4.78M), [Alaska Public Radio Network](#) (3/31, 2K), [Reuters](#) (3/31), [Take Part](#) (3/31, 217K), [Yahoo! Finance](#) (4/1, 4.04M), [The Arctic Journal \(GRL\)](#) (4/1), [Natural Gas Intelligence](#) (4/1), and [Maritime Executive](#) (4/1, 21).

Gov. Inslee Opposes New Oil Leases In Arctic Waters. The [Seattle Post-Intelligencer](#) (3/31, 612K) reports that "Gov. Jay Inslee believes oil drilling in the Arctic is too risky and that the U.S. should not 'further entrench our use of fossil fuels,' views conveyed Tuesday in a letter to U.S. Interior Secretary Sally Jewell." Inslee asked Jewell to "withhold from issuing any further lease sales for drilling operations" along the Arctic coastline of Alaska.

HAWAII INTERNMENT CAMP DEDICATED AS NATIONAL MONUMENT. The [AP](#) (4/1) reports that Interior Secretary Sally Jewell "joined Hawaii Gov. David Ige, Hawaii's congressional delegation and other officials for a dedication ceremony Tuesday of the Honouliuli National Monument." Honolulu Mayor Kirk Caldwell said "preservation of the camp as a national monument is a proud but bittersweet moment." He added that "it's an important part of history that should be remembered and learned from."

[KGMB-TV](#) Honolulu (4/1, 63K) reports that "tears flowed as a new chapter began for the site of Hawaii's largest internment camp during World War II. Secretary of the Interior Sally Jewell joined local leaders at a dedication for the Honouliuli National Monument on Tuesday." Jewell said, "As I get emotional along with a few of you, it's because this story is so important and it's because the shame can be put to rest." She also said, "If we don't tell stories like the one that happened here in Honouliuli, we're going to repeat the mistakes of the past."

[KHON-TV](#) Honolulu (3/30, 73K) reports that Jewell said "as one of the newest units of the National Park System, Honouliuli National Monument speaks of a painful but important chapter in our involvement in World War II – the unjust internment of Japanese Americans and other citizens whose civil rights were trampled by the prejudice and fear of the time. I applaud President Obama for establishing this monument and all of those in Hawai'i who worked so hard to ensure this place is preserved and the story is told for future generations." She added, "I think for a land that probably felt for some as it was cursed, it is now blessed."

The [PharmiWeb](#) (4/1) notes that Monsanto "recently donated land used by the government for the Honouliuli Internment Camp Site."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (4/1, 2.28M), the [Washington \(DC\) Times](#) (4/1, 644K), [West Hawaii Today](#) (4/1, 32K), [KITV-TV Honolulu \(HI\)](#) Honolulu (4/1, 21K), [KFVE-TV Honolulu \(HI\)](#) Honolulu (4/1), [Honolulu \(HI\) Magazine](#) (4/1, 2K), and [Newsroom America](#) (4/1).

INTERIOR FOCUSING ON SAVING PRIME SAGE GROUSE HABITAT. The [Idaho Statesman](#) (3/31, 196K) reports that "after gathering scientists in Boise in November," Interior Secretary Sally Jewell "issued a secretarial order in January requiring Interior officials to make stopping fire in critical sagebrush habitat the top resource priority for the Bureau of Land Management." The order "requires the BLM to send firefighting money, equipment and personnel to 15 districts in five states that have 38 million acres of critical sagebrush habitat, even at the expense of other parts of BLM's 262 million acres in 11 states." Mike Courtney, who gave Jewell "a tutorial on sage grouse, cheatgrass and fire last October," is now "overseeing efforts" in the Twin Falls District.

BISHOP PLANS PUBLIC LANDS HEARINGS ON FEDERAL OWNERSHIP. The [Deseret \(UT\) News](#) (4/1, 538K) reports that Rep. Rob Bishop said "he wants to use his leadership of the House Committee on Natural Resources to convene a series of hearings this spring and summer on the challenges of federal land ownership in Western states." Bishop said "the idea is to better educate his East Coast colleagues and others on the plight that Western states face when it comes to control of public lands." Bishop is also "readying draft legislation and a map that proposes to carve out land uses for some 18 million acres in eastern Utah, designations that would include new wilderness areas, so-called energy development zones and better protections for high-value recreation lands."

INTERIOR'S BURNS RECOGNIZED ON LIST OF D.C.'S TOP 50 WOMEN IN TECH 2015. The [FedScoop](#) (4/1) picked Sylvia Burns, Chief Information Officer, Department of the Interior, to be on its list of D.C.'s Top 50 Women in Technology 2015. Burns "oversees the \$1 billion IT portfolio for the Interior Department and a range of its shared services, including email and telecommunications, for outside agencies." The article notes that "currently, one big project she's working on is consolidating Interior's internal data centers."

INTERIOR PROVIDES GUIDANCE ON "BRING YOUR OWN DEVICE" POLICY. The [Federal Times](#) (3/31, 119K) reports that "the Interior Department included brief guidance on the use of personally-owned equipment in its 2012 Telework Handbook." According to the article, "the handbook leaves it to the individual bureaus to decide whether to allow BYOD, telling employees to check with their respective IT helpdesks for authorization and instruction."

America's Great Outdoors:

National Park Service:

NPS BEGINS PREPARATIONS FOR CENTENNIAL CELEBRATION. The [Puget Sound \(WA\) Business Journal](#) (4/1, Parkhurst, Subscription Publication, 48K) reports that "Seattle outdoor retailer REI has begun a partnership with the National Park Service as part of the 100-year anniversary of the U.S. park system." The company will "be the 'Official Outdoor Retailer' of the National Park Centennial celebration and will expand its travel adventure series to include five new trips to National Parks."

The [Huffington Post](#) (4/1, Visser, 281K) reports that Bill Nye was "recently appointed as a centennial ambassador for the National Park Service ahead of the agency's 100th birthday next year in hopes of inspiring the next generation of park-goers to fall in love with the natural world." Nye, "often attached to his 'Science Guy' moniker, said an appreciation of nature and preservation goes hand in hand with scientific awareness, including politically charged issues like climate change."

Also providing coverage is the [Poughkeepsie \(NY\) Journal](#) (3/31, 116K).

secure airspace in the nation, helps lead presidential motorcades – should have been grounded two years ago, according to an internal study by the Park Police and the U.S. Department of Interior.” According to the article, “a 2012 analysis recommended replacing Park Police aircraft after 5,000 hours of operation.” However, “Eagle 2 has flown more than 9,300 hours and is about 26 years old.”

OFFICIALS DIFFER OVER FUTURE OF THE BI-COUNTY PARKWAY. The [Washington Post](#) (3/31, Aratani, 5.17M) reports that “Virginia’s Secretary of Transportation said Tuesday that plans to build the controversial Bi-County Parkway have not been shelved, despite assertions from a top official in Prince William County that the project is ‘all but dead.’” According to the article, “supporters say the highway would relieve congestion in Washington’s outer suburbs, while critics say it would increase suburban sprawl.” The article notes that “the road also includes another controversial caveat: Route 234 through the Manassas National Battlefield Park would also be closed.” NPS officials, “who must sign off on the project because of its proximity to the Manassas battlefield, have said that the popular cut-through for commuters from across the region must be shut down for the parkway to move forward.”

YOSEMITE NATIONAL PARK BRACES FOR DRY YEAR. The [AP](#) Detroit (4/1, 101K) reports that Yosemite National Park is “bracing for its driest year on record, with visitor bureaus downplaying the allure of the park’s most famous waterfall and instead touting the park as a destination for hiking, bicycling and photography.” The article notes that “with the drought enabling western pine bark beetles to kill large areas of forest, the park is preparing for a bad fire season.”

ALCATRAZ FERRY TERMINAL COULD MOVE TO FORT MASON. [KGO-TV](#) San Francisco (4/1, 4K) reports that “a public meeting was underway Tuesday in San Francisco to decide the future location of the Alcatraz ferry.” The article notes that “currently, the ferries take off from Pier 33 along the Embarcadero, but the National Park Service, which operates Alcatraz, has not been able to reach a new lease agreement with the Port of San Francisco.” The agency is “considering moving the ferry terminal to land it already owns at Fort Mason,” but “that has residents there worried about an invasion of tourists.”

Also reporting on the story is the [San Francisco Chronicle](#) (4/1, 2.21M).

JOSHUA TREE CLIMBING AREA SHUT DOWN WHILE RAPTORS NEST. The [Houston Chronicle](#) (4/1, 2.28M) reports that “a rock climbing area at Joshua Tree National Park has been temporarily closed because two nesting raptors have made it their home.” The “climbing area known as the ‘Towers of Uncertainty’ has been shut down and the closure may last until June.”

WOMAN HURT IN FALL AT ICY WALL IN ROCKY MOUNTAIN NATIONAL PARK. The [Denver Post](#) (4/1, Draper, 804K) reports that a woman was injured in a roped fall Tuesday morning on a climbing route called Deep Freeze above The Loch in Rocky Mountain National Park, rangers reported.

Bureau of Land Management:

NEVADA RANCHER BUNDY, SUPPORTERS RALLY FOR NEVADA LAND BILL. The [AP](#) (3/31, Rindels Riley Snyder |, Ap, 5.17M) reports that “Nevada rancher Cliven Bundy, who garnered national attention a year ago when he and armed supporters engaged in a showdown with federal authorities, came to Carson City Tuesday with scores of allies to rally behind a bill seeking to reclaim land from the federal government.” The legislation, Assembly Bill 408, is “sponsored by Republican Assemblywoman Michele Fiore and would require the federal government to obtain permission to use land within the state’s borders.” The measure “also strips the federal government of state water rights and would allow county commissions to parcel out state land for commercial use.”

Additional coverage was provided by [Reuters](#) (4/1), the [Las Vegas \(NV\) Review-Journal](#) (4/1, 398K), the [Los Angeles \(CA\) Times](#) (4/1, Glionna, 3.49M), the [Houston \(TX\) Chronicle](#) (4/1, Rindels, Snyder, 2.28M), the [San Francisco \(CA\) Chronicle](#) (4/1, 2.21M), the [Salt Lake \(UT\) Tribune](#) (4/1, 405K), the [US News & World Report](#) (3/31, 685K), the [Daily Mail \(UK\)](#) (4/1, 4.78M), [WJBK-TV Detroit \(MI\)](#) Detroit (4/1, 253K), and [WKRG-TV Mobile \(AL\)](#) Mobile, AL (4/1, 61K).

WILDFIRE PREVENTION SHEEP RETURN TO FORT ORD. The [Salinas Californian](#) (3/31, 27K) reports that “more than 1,300 ewes and their lambs are back at work on the Bureau of Land Management’s Fort Ord National Monument in Monterey County.” The animals have become “quite an attraction for many visitors to the Fort Ord National Monument, and the BLM is hosting a special event for sheep fans called ‘Sheep Appreciation Day.’” The article notes that “the grazing program is part of a cooperative strategy to improve rangeland conditions in this ecologically unique area.” Eric Morgan, BLM’s Fort Ord Monument manager, said, “The sheep grazing program at Fort Ord National Monument has a proven track record at reducing wildfire hazards and stimulating native plant regeneration. The sheep have also been effective in controlling invasive thistle populations.”

Also reporting on the story is [KION-TV Monterey \(CA\)](#) Monterey, CA (4/1).

Fish and Wildlife Service:

GREAT LAKES STATES RECEIVE MORE THAN \$10 MILLION FROM FWS. The [Great Lakes Echo](#) (4/1, 441) reports that “Great Lakes states received more than \$10 million in federal funding to protect species and habitats, according to the U.S. Fish and Wildlife Service.” They “received around 22 percent of the \$45 million given through the State Wildlife Grant Program.” FWS Director Dan Ashe said, “The State Wildlife Grant Program has made a significant impact by preventing the need to list species under the Endangered Species Act. The program identifies the highest priorities in each state to effectively conserve and protect species on a large landscape scale.”

FWS WITHDRAWS \$300K SUMMER’S END MARINA GRANT. The [Virgin Islands Daily News](#) (4/1, 333) reports that the FWS has “withdrawn grant funding earmarked for the Summer’s End 145-slip marina and additional facilities development in Coral Bay, St. John.” The agency “had awarded grant funding for the marina under the Boating Infrastructure Grant Program in December 2013.”

FEDERAL AGENCIES UNVEIL PLAN TO HELP SMALL BIRD, OTHER SPECIES. The [Deseret \(UT\) News](#) (4/1, 538K) reports that “two federal agencies unveiled a plan to further hone conservation efforts across six states by working with ranchers and other landowners to restore habitat for a small bird that nests along river corridors.” According to the article, “by taking an ecosystem-wide approach to help the southwestern willow flycatcher in Utah and surrounding states, the U.S. Department of Agriculture’s Natural Resources Conservation Service and the U.S. Fish and Wildlife Service will boost living conditions for 83 other species that occupy the same riparian system.” FWS Director Dan Ashe said, “These efforts will help ensure not only the long-term health of ecosystems and countless species vital to the West, but they will assist rural landowners and provide tangible benefits to local economies.”

MONSANTO PLEDGES \$4 MILLION TO EFFORT TO SAVE MONARCH BUTTERFLIES. The [AP](#) (4/1, Suhr, 2.28M) reports that Monsanto Co., “whose popular weed killer Roundup has been partly blamed by critics for knocking out monarch butterflies’ habitat, said Tuesday it is committing \$4 million to efforts to stem the worrisome decline of the black-and-orange insects.” The firm said that “of \$3.6 million it is donating to the National Fish and Wildlife Foundation’s Monarch Butterfly Conservation Fund, one-third of that money matches what the U.S. Fish and Wildlife Service is contributing.” The rest of the “funds will be set aside to mirror what other federal agencies plan to offer over the next three years.” Monsanto also “intends to contribute \$400,000 to experts and groups working on behalf of the butterfly, which is being considered for federal protection because its numbers have plunged by more than 90 percent in the past two decades.”

FEDERAL AGENCIES PREVAIL IN LAWSUIT FILED BY ENVIRONMENTAL GROUP. The [Helena \(MT\) Independent Record](#) (4/1, 38K) reports that “federal agencies won a pair of lawsuits filed by the Alliance for the Wild Rockies on Monday.” In February, the group sued the FWS and the Forest Service “over the 40,700-acre Blankenship Vegetation Treatment Project located in the Little Belt Mountains just east of Monarch.” U.S. District Judge Brian Morris dismissed the group’s “claims Monday, writing in part that lynx surveying was hampered by weather, but did ‘comply substantially’ with accepted protocols, and that no lynx were found.” The “decision further dismissed alleged violations for effects on wolverine, goshawk and mule deer.”

FWS WAREHOUSE STORES CONTRABAND FROM ILLEGAL WILDLIFE TRADE. The [Australian Broadcasting Corporation](#) (4/1, 46K) reports that the FWS “runs the Property Repository 30km outside Denver.” According to the article, “about 1.5 million animals, or parts of animals, are here — lions, tigers, rhinos and elephants.” Authorities “want the warehouse and its contents to stand as reminders of the vastness and vulgarness of the trade.”

MINNESOTA PROFESSOR CHARGED WITH SMUGGLING IVORY, RHINOCEROS HORNS. The [AP](#) (4/1, Baenen, 2.28M) reports that “a St. Cloud State University philosophy professor was arrested Tuesday on charges of conspiring to smuggle rhinoceros horns and elephant ivory out of the United States and into China.” Yiwei Zheng, “who appeared in U.S. District Court Tuesday, faces a federal indictment accusing him of conspiracy, smuggling and making a false statement to agents.” Zheng is also “charged with violating the federal Lacey Act, which bans trade in wildlife, fish and plants that have been illegally taken, transported or sold.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (3/31, Jeff Baenen |, Ap, 5.17M), the [Washington \(DC\) Times](#) (4/1, Baenen, 644K), the [Minneapolis \(MN\) Star Tribune](#) (4/1, Baenen, 1.37M), the [Minneapolis \(MN\) Star Tribune](#) (3/31, Mckenroe, 1.37M), [The Forum of Fargo-Moorhead \(ND\)](#) (4/1, 8K), and [WCCO-AM Minneapolis \(MN\)](#) Minneapolis (3/31, 70K).

Humane Society Wildlife Land Trust, and the FWS are "offering a reward of up to \$7,500 for information leading to a conviction of the person or persons responsible for the shooting, which is unlawful."

Additional coverage was provided by [KTAL-TV Shreveport \(LA\)](#) Shreveport, LA (4/1, 711), [KTAL-TV Shreveport \(LA\)](#) Shreveport, LA (4/1, 711), and [KTBS-TV Shreveport \(LA\)](#) Shreveport, LA (4/1, 67K).

OBAMA ADMINISTRATION FIGHTING ANIMAL TRAFFICKING. In an interview with the [Oregon Public Broadcasting](#) (4/1, 3K), Ken Goddard, the director of an animal forensics lab located in Ashland, Oregon, and Gary Young, Special Agent for the FWS, discusses the Obama Administration's "new initiative to stop illegal wildlife trafficking."

US Geological Survey:

WEST COAST LAWMAKERS SEEK FUNDING FOR EARTHQUAKE EARLY WARNING SYSTEM. The [Oregonian](#) (4/1, 950K) reports that "Democratic lawmakers from Oregon, Washington and California are asking their colleagues in the House of Representatives for cash to fund the region's earthquake early warning system."

Securing America's Energy Future:

Onshore Energy Development:

NORTH DAKOTA TO JOIN WYOMING LAWSUIT OVER NEW FRACKING RULE. The [Bismarck \(ND\) Tribune](#) (4/1, 32K) reports that North Dakota "officials took action Tuesday to pursue a lawsuit over new federal hydraulic fracturing rules being instituted by the U.S. Department of the Interior's Bureau of Land Management." Gov. Jack Dalrymple and Attorney General Wayne Stenehjem, "two of three members of the North Dakota Industrial Commission, voted to approve having the attorney general's office participate in a lawsuit filed last week against BLM by the state of Wyoming." The pair said "the fracking rules are an overreach into regulation already overseen by state agencies."

Also providing coverage are the [Minneapolis \(MN\) Star Tribune](#) (4/1, Macpherson, 1.37M), the [Houston \(TX\) Chronicle](#) (3/31, MacPherson), [The Olympian \(WA\)](#) (3/31, 76K), [The Forum of Fargo-Moorhead \(ND\)](#) (4/1, 8K), the [Washington \(DC\) Post](#) (3/31, James Macpherson |, Ap, 5.17M), the [Daily Mail \(UK\)](#) (4/1, 4.78M), the [Grand Forks \(ND\) Herald](#) (4/1, 82K), [KFYR-TV Bismarck \(ND\)](#) Bismarck, ND (4/1, 1K), and [WDAZ-TV Grand Forks \(ND\)](#) Grand Forks, ND (4/1, 1K).

BLM Director Kornze Questioned On Fracking Rule. The [Sidney \(MT\) Roundup](#) (4/1, 25K) reports that Committee on Natural Resources Vice Chairman Cynthia Lummis "questioned BLM Director Neil Kornze on how the memorandum of understanding (MOU) between BLM and the states will operate." Lummis asked, "Who will approve well bore integrity issues? Will you approve those? Who will do the inspections? Will [states] be brought in? Who is going to be brought in to inspect that – [states] or you?" Kornze responded, "Because the Bureau of Land Management manages such a scattered land pattern across the country, it's very important to work efficiently with state regulators, we can more or less cross-deputize state inspectors to do that work."

New Fracking Rule Called "Redundant." The [Bismarck \(ND\) Tribune](#) (4/1, 32K) editorializes that the new rule is "a classic example of federal overreach" because "states and industry has already figured out a way to monitor the process." The paper notes that "the rule requires companies drilling for oil and gas to use FracFocus.org to disclose chemicals used when hydraulic fracturing takes place on public land." But "the website is already being used by at least 16 oil and gas producing states."

ADDITIONAL COVERAGE OF PROPOSED DRILLING RULES IN COLORADO. Additional coverage of the proposed drilling rules in Colorado was provided by the [Denver Post](#) (4/1, Finley, 804K).

Offshore Energy Development:

SAFETY REGULATIONS UPDATED FOR NEWLY CONSTRUCTED OFFSHORE FACILITIES. The [Natural Gas Intelligence](#) (4/1) reports that "updated safety standards for newly constructed facilities that work on the Outer Continental Shelf (OCS), the result of a lengthy investigation into the aftermath of the Macondo well blowout five years ago, were unveiled Monday by the U.S. Coast Guard (USCG)." The rules, "published in the Federal Register, follow an investigation into the causes of the fire and explosion aboard the Deepwater Horizon production facility, which sank, killing 11 men."

OFFSHORE DRILLING PROPOSAL CRITICIZED. In an op-ed for the [Charleston \(SC\) Post and Courier](#) (3/31, 295K), Chip Campsen, who represents District 43 in the S.C. Senate, writes in opposition to "drilling for oil and gas off South Carolina's coast." He shares "the concern most often raised, namely the risk of damage to the environment and our vibrant tourism industry in the event of a spill." Furthermore, Campsen suspects "much of the support for offshore oil would fade away if citizens were confronted with the realities of the coastal industrialization necessary to support offshore oil."

In an editorial, the [Frederick \(MD\) News-Post](#) (4/1, 74K) warns "what an oil spill the scope of 2010's Deepwater Horizon could do to the fragile ecosystem of the Chesapeake Bay or to Eastern Shore tourism or delicate state treasures like Assateague Island. Imagine the devastation to the economy." For this reason, the paper is "opposed to the Obama administration's plan to open up the mid- and southern Atlantic coast to offshore oil and gas drilling."

Tackling America's Water Challenges:

INTERIOR ANNOUNCES PLANS TO PARTNER WITH CROW TRIBE ON YELLOWTAIL AFTERBAY HYDROPOWER. The [Hydroworld](#) (4/1, 151) reports that the Interior Department and the Crow Tribe have "announced an agreement to develop an 8 MW hydropower project at the Yellowtail Afterbay Dam on Montana's Bighorn River." Deputy Secretary Michael L. Connor said, "This is an excellent opportunity for development of new hydropower capacity on existing infrastructure. Working through the Bureau of Reclamation, Interior is pleased to assist the Crow Tribe on its Yellowtail Afterbay hydro development, resulting in clean, renewable energy, and creating vital jobs in the process."

Empowering Native American Communities:

NORTH STONINGTON LEADER WELCOMES CALL FOR REVIEW OF CHANGES TO TRIBAL RECOGNITION RULES . The [AP](#) (4/1, 2.28M) reports that "the first selectman of North Stonington says he is relieved to see several Congress members are calling for a review of the rule changes for federal recognition of American Indian tribes." The article notes that "five Congress members including chairman of the House Natural Resources Committee last week asked the U.S. Interior Department to slow down an overhaul that could make it easier for tribes to gain acknowledgment and qualify for new benefits." North Stonington First Selectman Nicholas Mullane II said that "few understand the magnitude of the new regulations."

MAN CHARGED IN STABBING OF BIA OFFICIAL. The [AP](#) (4/1, Nicholson, 2 28M) reports that "federal authorities have charged a man in the stabbing of the Bureau of Indian Affairs superintendent on the Crow Creek Indian Reservation in central South Dakota." Brian Iron Boulder is accused of stabbing "Patrick F. Duffy in the back with a knife on March 25, penetrating Duffy's chest wall."

JUDGE DISMISSES DULUTH'S CHALLENGE TO CASINO RULING. The [Duluth \(MN\) News Tribune](#) (4/1, 129K) reports that "a federal judge has dismissed the city of Duluth's challenge to a National Indian Gaming Commission ruling that declared the city's downtown casino profit-sharing agreement illegal." U.S. District Judge Colleen Kollar-Kotelly on Tuesday "upheld a 'notice of violation' issued by the NIGC in 2011."

INTERIOR PANEL SIDES WITH BIA ON OSAGE MINERAL RIGHTS DISPUTE. The [Law 360](#) (4/1, 9K) reports that "a U.S. Department of the Interior panel has upheld a Bureau of Indian Affairs decision denying a bid by Osage Nation members for an election to restore the tribe's former governing council in a dispute over mineral rights, ruling the BIA wasn't required to conduct the election." Charles O. Tillman and "six other tribe members who possess rights in oil, gas, coal and other minerals on the tribe's reservation land asked the panel to overturn a 2012 decision by the BIA's eastern Oklahoma acting regional director."

INTERIOR PANEL UPHOLDS BIA'S DECISION ON NAVAJO LAND LEASE . The [Law 360](#) (4/1, 9K) reports that "a U.S. Department of the Interior panel on Monday upheld a Bureau of Indian Affairs decision to cancel a businessman's lease on Navajo Nation trust land in New Mexico, ruling the agency didn't have to give him more time to pay rent to the nation or otherwise help fix the lease violations that led to the cancellation." Jimmie Garnenez Sr. "asked the panel to overturn a 2012 ruling by the agency's Navajo acting regional director to cancel the lease."

Office of Insular Affairs:

Gordon of Next Generation writes that Puerto Rico and 15 other US island territories, with more than four million people total, are particularly exposed to the effects of climate change on their infrastructure and industrial sectors.

Top National News:

OBAMA POCKET-VEToes GOP ATTEMPT TO OVERTURN UNION RULES. Media coverage of the President's second veto of the year notes labor unions' praise for the move and GOP derision of it, and puts the action in the context of what's expected to be a protracted fight between the White House and Hill Republicans on a variety of fronts. The [New York Times](#) (4/1, Baker, Subscription Publication, 9.97M), for example, refers to yesterday's pocket-veto as Obama's "latest confrontation with Congress," opening a "new front in the larger battle...over the scope of his executive power," while [USA Today](#) (4/1, Korte, 4.95M) predicts "more vetoes are sure to come," as "the White House has issued 17 specific veto threats."

With the media's attention firmly fixed on stories such as the Indiana controversy, the Iran talks, and the Germanwings crash, the President's action received no coverage from the network newscasts. Print and online coverage, meanwhile, generally reflected favorably on the President's veto, with [USA Today](#) (4/1, Korte, 4.95M), for instance, saying it will keep "in place procedures that will allow a more streamlined process for workers to vote to unionize," and the [AP](#) (4/1, Superville) reporting in its lead sentence that Obama said "government should not make it harder for workers to be heard in the workplace."

The vetoed measure, the [New York Times](#) (4/1, Baker, Subscription Publication, 9.97M) reports along similar lines, "would have reversed" NLRB "rules to speed up and streamline union elections." Republicans, however, "referred to it as the 'ambush election' rule and argued that it would be unfair to businesses." [The Blaze](#) (3/31, Karpetowicz, 2.17M) noted the rule "could force companies to allow union elections just 11 days after they're notified that an election was called," which the GOP considers "way too fast," arguing "that current rules already allow for reasonably quick votes." Republicans reacted to the veto by calling it "a political move that was a favor to Obama's political allies, at the expense of companies around the country."

In an editorial, the [Wall Street Journal](#) (4/1, Subscription Publication, 5.67M) criticizes the low volume of media coverage of the veto, and expresses outrage over what it considers an Obama favor to his labor allies. To the Journal, which says the NLRB only passed the rule in a 3-2 party-line vote, Republicans had justly attempted to overturn a regulation that is biased against businesses and essentially unfair.

[The Hill](#) (3/31, Fabian, 224K), however, notes that Obama "said that the Republican resolution would reverse 'common-sense, modest changes to streamline' the union voting process," adding, "I think that's a bad idea. ... One of the freedoms of folks who live in the United States is if they choose to join a union they should be able to do so. ... We shouldn't be making it impossible for that to happen." The [AP](#) (4/1, Superville) calls the veto "a victory for unions," and notes that AFL-CIO President Richard Trumka, "using language similar to Obama, has said that the board's 'modest but important reforms' will help reduce delays and make it easier for workers to vote on forming a union."

The [Wall Street Journal](#) (4/1, A4, Trotman, Subscription Publication, 5.67M) reports that in remarks yesterday, Obama also announced that he would hold a White House labor summit in the fall, focused "on increasing the voice" of US workers.

[Reuters](#) (4/1, Wiessner) notes, meanwhile, that the rule still faces legal challenges in Washington, DC and Texas.

OBAMA RELEASES PLAN TO CUT EMISSIONS BY 28% OVER 10 YEARS. The President's blueprint to fight climate change in the US was ignored by the network newscasts and received very little notice on the major cable news shows. Print and online coverage this morning, meanwhile, generally cast the plan in a favorable light, describing it as ambitious and wide-ranging and, as the [Christian Science Monitor](#) (3/31, Gilmour, 380K) puts it, "the latest in a series of executive-led efforts to bolster US climate policy ahead of this December's international talks in Paris – widely seen as a last-ditch opportunity to foster unified global action to curb.. emissions." Analysts also note the swift GOP criticism of the plan, and put the debate in the context of Obama's ongoing fight with Hill Republicans over his authority to act unilaterally.

The [New York Times](#) (4/1, Davenport, Subscription Publication, 9.97M), for example, reports that the blueprint's "reliance on executive" action "is an acknowledgment that any proposal to pass climate change legislation would be blocked by...Congress." [The Blaze](#) (3/31, Lucas, 2.17M), meanwhile, noted that the Administration "says it won't need Congress' help in its goals set for an international climate agreement," and the [St. Louis Post-Dispatch](#) (4/1, Raasch, 889K) indicates that "the politics in the climate debate are similar to ongoing battles between Obama and Senate Republicans over nuclear arms talks with Iran." In both matters, Obama "has said he has acted within clear legal and constitutional authority granted to presidents, while Senate Republicans say that any major agreements on issues like climate or nuclear arms require Senate approval."

The President, said the [Daily Intelligencer \(NY\)](#) (3/31, Fuller, 583K), "seems determined to make this happen, especially since environmental policy is one of the few arenas where he is able to act alone." The [Washington Times](#) (4/1, Wolfgang, 644K), meanwhile, reports that the Administration "has given no indication it will submit the plan to the Senate for formal approval, meaning the US plan will not be a binding international treaty and theoretically could be rolled back relatively easily by the next president." The Times adds that "leading Republicans say they expect the White House to seek a congressional green light," and "they're also stressing the plan, if submitted to Congress, will die on Capitol Hill."

[Politico](#) (3/31, Restuccia, 669K) notes that Senate Majority Leader McConnell "immediately warned international negotiators to 'proceed with caution' before trusting Obama's promise – the continuation of the GOP's attempt to undermine the administration's climate strategy at every turn." [The Hill](#) (3/31, Cama, 224K), meanwhile, reports that Sen. Jim Inhofe said Senate approval for a climate deal "will not happen in the current Senate." Said Inhofe, "As the Obama administration continues to pursue a radical agenda on global warming, it's clear Americans are beginning to question if the cost of billions of dollars to our economy and tens of thousands of lost job opportunities is really worth it for potentially no gain."

[US News & World Report](#) (3/31, Neuhauser, 685K) said "the plan the US submitted is not legally binding," adding that "partisan intransigence and GOP opposition" led Obama to make "robust use of his executive authority," and the [Christian Science Monitor](#) (3/31, Gilmour, 380K) cautioned that the partisan debate "leaves some in the international community wondering if they can rely on a ten-year commitment from an executive who will be in power for less than two of those years." On its website, the [New Republic](#) (3/31, Leber, 165K) similarly reported that a "successful" international "deal rests in part on how well the White House can assure the rest of the world that the Obama administration can overcome political (conservative) intransigence."

The plan, says [USA Today](#) (4/1, Jackson, 4.95M), would "cut US greenhouse gases by up to 28% over the next decade, a formal proposal to the United Nations designed to be part of a global agreement on climate change." White House senior adviser Brian Deese called "this submission...ambitious and achievable," and argued it "can be done 'using laws that are already on the books.'" [Bloomberg News](#) (3/31, Roston, 2.94M) notes that "just six governments have submitted plans so far: the US, Russia, the EU, Switzerland, Mexico, and Norway." While "ideally, all the policies together will add up to an agreement at talks in Paris at the end of the year to keep global warming below 2 degrees Celsius...the talks are likely to come nowhere near that figure."

The [Washington Post](#) (4/1, Warrick, 5.17M) notes "Administration officials said most of the reductions would come from regulations already approved or proposed, including tougher fuel-economy standards for vehicles and a proposed curb on carbon emissions from coal-fired power plants." The Post adds that "the details of the U.S. commitments come less than a week after Mexico vowed to cut its greenhouse gases by 22 percent, becoming the first emerging-market country to announce a commitment leading up to the Paris talks." The [AP](#) (4/1, Lederman), [Reuters](#) (4/1, Volcovic), and the [Wall Street Journal](#) (4/1, Mauldin, Subscription Publication, 5.67M) run similar reports this morning, while [Politico](#) (3/31, Restuccia, 669K) notes "Green groups praised the administration's move" and [TIME](#) (3/31, Worland, 19.19M), on its website, quoted Natural Resources Defense Council president Rhea Suh as saying that "she believes the plan can be 'met' and 'even exceeded.'"

[Mother Jones](#) (3/31, McDonnell, 719K) also said "environmental groups' immediate reactions to the US submission were mostly positive," but the [Huffington Post](#) (3/31, Sheppard, 281K) noted that some "were...critical of the submission, arguing that the US could make a more ambitious commitment." Greenpeace legislative representative Kyle Ash, for example, "said in a statement that the pledge 'begins to treat the wound, but does not stop the bleeding.'"

[Vice](#) (3/31, Dattaro, 1.28M) says the document submitted to the UN, "known as an Intended Nationally Determined Contribution (NDC), formalizes a commitment made by Obama in November as part of a joint US-China pledge to reduce greenhouse gas emissions." [The Hill](#) (3/31, Cama, 224K) notes, however, Deese "said the UN submission goes beyond the China deal by detailing how the United States would achieve the reduction." [The Blaze](#) (3/31, Lucas, 2.17M) quoted State Department special envoy for climate change Todd Stern as telling reporters, "This puts the US in a leadership position going into the climate negotiations."

The [National Journal](#) (3/31, Plautz, Subscription Publication, 111K) notes that "in a letter supporting the pledge, more than 100 Democrats from both chambers emphasized the country's 'responsibility to lead.'" Wrote the Democrats, "One of the three pillars of the Climate Action Plan is to lead international efforts to address global climate change. ... As we have seen time and time again, other countries will join us, if America leads the way."

In an editorial, the [Washington Post](#) (4/1, 5.17M) calls yesterday's blueprint "an important step that should prod other nations to follow suit." The Post adds that "there is plenty

Republican strategist Lisa Boothe said on [Fox News Your World with Neil Cavuto](#) (3/31, 1.04M), "This isn't what's in the best interests for the country. What this is about is...Obama looking to cement his legacy on climate change." China "is going to emit more emissions in one month than we're going to be reducing in an entire year, and what this is is hundreds of billions of dollars in regulation and we're going to send job overseas. It's a job killer."

In an editorial, [USA Today](#) (4/1, 4.95M) describes the GOP's "actions on climate change" as ranging "from oblivious to laughable to reckless." Inhofe, cited in the editorial for his snowball stunt earlier this year, responds in an [op-ed](#) (4/1, Inhofe, 4.95M) in which he argues that "the debate on man-driven climate change is not over," and that "alarmists are distracting Americans from the pain the Obama administration's regulations will inflict on our economy while failing to make a significant impact on climate change."

OBAMA COMMUTES SENTENCES OF 22 FEDERAL DRUG OFFENDERS. [USA Today](#) (4/1, Korte, 4.95M) reports that President Obama "commuted the sentences of 22 convicted federal prisoners" on Tuesday, "shortening their sentences for drug-related crimes." Eight of those prisoners were serving life sentences, and all but one of the 22 "will be released on July 28." The White House said President Obama "made the move in order to grant to older prisoners the same leniency that would be given to people convicted of the same crimes today. 'Had they been sentenced under current laws and policies, many of these individuals would have already served their time and paid their debt to society,' White House Counsel Neil Eggleston said in a statement. 'Because many were convicted under an outdated sentencing regime, they served years – in some cases more than a decade – longer than individuals convicted today of the same crime.'" USA notes that by issuing the commutations on Tuesday, Obama "has more than doubled the number he's granted in his presidency."

The [AP](#) (4/1, Superville) reports that the White House said the commutations continue the President's "push to make the justice system fairer by reducing harsh sentences that were handed down under outdated guidelines." In December, Obama "issued his first round of commutations under new guidelines that were put in place to cut costs by reducing the growing prison population and grant leniency to nonviolent drug offenders sentenced to yearslong terms of confinement away from society." Obama "has now approved a total of 43 commutations." Eggleston "noted that Obama's predecessor, George W. Bush, had commuted 11 sentences during his two terms."

The [Huffington Post](#) (3/31, Stein, 281K) reports that the "men and women granted the reprieves had been imprisoned under an 'outdated sentencing regime,' the administration concluded." Leading up to Tuesday's announcement, President Obama "has tried to revamp his administration's approach to clemency, telling The Huffington Post in a recent interview that he felt recipients should more broadly reflect the entire applicant pool and not lean toward well-connected white-collar criminals." Obama "sent a letter to each of the commutation recipients encouraging them to take advantage of their post-prison opportunity."

Editorial Wrap-Up:

NEW YORK TIMES. "*The French Surveillance State.*" In an editorial, the [New York Times](#) (4/1, Subscription Publication, 9.97M) criticizes the latest anti-terrorism bill sent to the French Parliament by Prime Minister Manuel Valls, writing that while "the French are understandably jittery after the Paris and Tunis attacks, and they are alarmed by the radicalization of some in France who have fallen prey to jihadist recruitment on the Internet," the government "has a duty to protect citizens' democratic rights from unduly expansive and intrusive government surveillance. French lawmakers should not approve the bill unless judges are given a proper role in authorizing government surveillance, vague definitions of what constitutes a terrorist threat are struck from the bill and freedom of the press is protected."

"*Saudi Arabia's Ominous Reach Into Yemen.*" The [New York Times](#) (4/1, Subscription Publication, 9.97M) says in an editorial that "the Saudi-led military intervention in Yemen threatens to turn what has been a civil war between competing branches of Islam into a wider regional struggle involving Iran. It could also destroy any hope of stability in Yemen. ... It would be a catastrophic mistake for Saudi Arabia and other Arab states to allow the Yemen civil war to become the catalyst for a larger sectarian Shiite-Sunni war with Iran." The Times urges President Obama to make this case to the Saudi government.

WASHINGTON POST. "*Egypt's 'Meaningless' Rule Of Law.*" The [Washington Post](#) (4/1, 5.17M) in an editorial is highly critical of the President's decision to lift the freeze on military aid to Egypt, describing the case of Shaimaa al-Sabbagh who in attempting to memorialize the dead of the 2011 protests in Cairo's Tahrir Square by laying flowers there, was killed, according to witnesses, by "masked police" who "fired birdshot into the group from behind at close range." Now prosecutors are charging fellow members of her political party, and witnesses, "with participating in an unauthorized protest." An unnamed policeman is also being charged with the shooting, but no date has been set for trial. The Post concludes by stating that the President did not say "what U.S. interest is served by backing a regime that engages in the brutal and lawless oppression of women."

"*An Official Emissions Plan.*" In an editorial, the [Washington Post](#) (4/1, 5.17M) calls the President's climate change blueprint "an important step that should prod other nations to follow suit." The Post adds that "there is plenty of room for responsible criticism of the president's plan," such as Sen. Lamar Alexander's complaint that "it puts too much emphasis on wind power and too little on nuclear." However, "Alexander properly did not counter with inaction as a viable plan," and "his fellow Republicans could learn something from his example."

"*Gas Station Law Need Fixing.*" The [Washington Post](#) (4/1, 5.17M) says in an editorial that District of Columbia Mayor Muriel Bowser should seek the repeal of a District law prohibiting the sale or conversion of land with a gas station on it "without prior approval from something called the Gas Station Advisory Board," saying that the measure, intended to protect local businesses, "creates a powerful web of restrictions on property rights for no clear public purpose."

WALL STREET JOURNAL. "*Hillary Obstructs Congress.*" In an editorial, the [Wall Street Journal](#) (4/1, Subscription Publication, 5.67M) says that if Hillary Clinton wiped her email server clean after the State Department asked her to return her public records to the Department, it was obstruction of Congress, and a violation of her promise to work with Congress on the Benghazi probe and make the process as "transparent as possible."

"*Obama's Quickie Union Favor.*" In an editorial, the [Wall Street Journal](#) (4/1, Subscription Publication, 5.67M) criticizes the low volume of media coverage of the President's veto of legislation to overturn an NLRB rule, and expresses outrage over what it considers an Obama favor to his labor allies. To the Journal, which says the NLRB only passed the rule in a 3-2 party-line vote, Republicans had justly attempted to overturn a regulation that is biased against businesses and essentially unfair.

"*Close Encounters Of The Medicaid Kind.*" An editorial in the [Wall Street Journal](#) (4/1, Subscription Publication, 5.67M) praises the Supreme Court's decision in *Armstrong v. Exceptional Child Care Center*, in which a group of in-home care companies sued the state of Idaho for setting Medicaid reimbursement rates too low. The Journal notes that the Medicaid law provides a remedy under which HHS can punish states that fail to comply with Federal standards, and with its decision, the Court declined to turn the entitlement into a private right.

"*Europe's Digital Single Mistake.*" The [Wall Street Journal](#) (4/1, Subscription Publication, 5.67M) editorializes on the European Commission's plan to develop a so-called digital single market (DSM), ostensibly in order to prevent companies from setting different prices for consumers in different regions, a practice known as "geo-blocking." The Journal says that while regulations can make online commerce difficult in Europe, the plan for a DSM is an attempt to over-regulate companies into forming a uniform market that it could not previously and will only hamper online commerce. The editorial adds that this could prevent those companies from organically creating such a market.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House

PRESIDENT OBAMA — Receives the Presidential Daily Briefing; meets the Vice President for lunch.

VICE PRESIDENT BIDEN — Receives the Presidential Daily Briefing; meets the President for lunch.

US Senate No scheduled events.

US House March 31 – April 10. — The House will be in a district work period until Monday, April 13. No votes are expected in the House during the recess.

Other GW – AMERICAN DIPLOMACY AT RISK — 10 a.m. – 11:30 a.m. Speakers: Ambassador Thomas Pickering, Chairman, American Academy of Diplomacy; Ambassador Marc Grossman, Vice Chairman, American Academy of Diplomacy. <http://elliott.gwu.edu/events-calendar?trumbaEmbedview%3Devent%26eventid%3D114140608> Location: Lindner Family Commons, Room 602, Elliott School of International Affairs, 1957 E Street, NW.

CSIS – TOMORROW'S ARMY — 10:30 a.m. – 11:30 a.m. Conversation with Under Secretary Carson to discuss the Army's vision for the role of landpower in future operations. Secretary Carson will also discuss the Army's approach to innovation, technological and otherwise. <http://csis.org/event/tomorrows-army> Location: Center for Strategic and International Studies, Room 212-A, 1616 Rhode Island Avenue, NW.

'COOL STAMPS' — 1 p.m. The US Postal Service kicks off National Card and Letter Writing Month with the First-Day-of-Issue stamp dedication ceremony for the From Me to You Forever stamps. The event is free and open to the public. With Rep. Eleanor Holmes Norton (D-DC); Sr. Dir., Scholastic Family and Community Group Dominique Young; US Postal Service Judicial Officer William Campbell; Founder and Chairman of the Board of Trustees, Friendship Public Charter Schools Donald Hense. Location: Friendship Public Charter Schools-Woodbridge Campus (Gymnasium), 2959 Carlton Ave., NE.

EESI – PREPARING FOR NATURAL DISASTERS — 2 p.m. – 3:30 p.m. White House Task Force Resiliency Recommendations on How Can the Federal Government Help Prepare Local Communities for Natural Disasters? Speakers: Dr. Jennifer Jurado, Director, Environmental Planning & Community Resilience, Broward County, FL; Sam Ricketts, Director, Washington DC Office of Governor Jay Inslee (D-WA); Carolyn Berndt, Program Director for Sustainability, Federal Advocacy, National League of Cities. RSVP at: www.eesi.org/briefings/view/040115resiliencersvp Location: 485 Russell.

SYSTEM OF A DOWN – ARMENIAN GENOCIDE — 2:30 p.m. The Grammy-winning alternative rock band System Of A Down will join Rep. Adam Schiff (D-California), Turkish historian Taner Akcam, and the Armenian National Committee of America in a telephone press call to discuss the upcoming 100 year anniversary of the Armenian Genocide and efforts to push the Obama Administration and the Turkish government to recognize the genocide. Dial-in Number: 785-424-1052 or 800-894-5910, Conference ID is "SOAD."

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "The White House just announced that President Obama will attend a summit in Kenya this July. When asked if he's ever been to Kenya, Obama was like, 'Of course, I was bor – I was bored.'"

Jimmy Fallon: "In fact, yesterday, former New Hampshire Governor John Sununu said that President Obama is just asking for criticism by going to Kenya. Then Obama was like 'Oh nunu you didn't.'"

when they go through the front, Biden always gets stuck in the revolving door.”

Seth Meyers: “There’s been a lot of talk about gay rights and gay issues this week, and Senator Rand Paul told BuzzFeed this week, ‘I don’t think I’ve ever used the phrase ‘gay rights.’ So, it sounds like he’s also never going to use the phrase, ‘I’m president.’”

Seth Meyers: “President Obama has announced new plans to cut greenhouse gas emissions by 28 percent. That plan, just so you know what that means, the plan would make it illegal to film anymore ‘Fast and the Furious’ movies.”

Conan O’Brien: “A lot of anger over Indiana’s law that many say discriminates against gay people. Earlier today, NASCAR’s chief communications officer said that NASCAR is disappointed in Indiana’s religious freedom law. So, do you hear that Indiana – you’re not progressive enough for NASCAR.”

Conan O’Brien: “Indiana’s Governor Mike Pence said the new law is not a license to discriminate against gays. He said think of it as more of a learner’s permit.”

Sec. Jewell, Gov. Ige, Senators Schatz and Hirono Join Community Dedication of Honouliuli National Monument

National Park Service will now undertake collaborative public planning process to establish, interpret monument site

O'AHU, HI – Secretary of the Interior Sally Jewell today joined Hawai'i Governor David Ige, U.S. Senators Brian Schatz and Mazie Hirono, Honolulu Mayor Kirk Caldwell, National Park Service (NPS) Deputy Director Peggy O'Dell, state and local officials, and community leaders to dedicate Honouliuli National Monument, the site of the largest and longest-used confinement site in Hawai'i for Japanese American citizens, resident immigrants and prisoners of war during World War II.

In February, [President Obama used the Antiquities Act to establish the new national monument](#), which is now the fifth site in the park system associated with the internment of Japanese Americans during World War II.

"As one of the newest units of the National Park System, Honouliuli National Monument speaks of a painful but important chapter in our involvement in World War II – the unjust internment of Japanese Americans and other citizens whose civil rights were trampled by the prejudice and fear of the time," Jewell said. "I applaud President Obama for establishing this monument and all of those in Hawai'i who worked so hard to ensure this place is preserved and the story is told for future generations."

The site is managed by the National Park Service, which will conduct a management planning process with full public involvement. The NPS in March signed a cooperative agreement with the Japanese Cultural Center of Hawai'i to help provide educational and interpretive opportunities of the site and to promote awareness of Japanese American internment experiences during the Pacific War.

"The National Park Service is proud to have Honouliuli National Monument among our sites that share important lessons from America's history," said National Park Service Director Jonathan B. Jarvis. "In dedicating this new national monument, we are recommitting ourselves to share the difficult stories of this place so that they are never forgotten and so future generations can learn from past mistakes."

"Today, we are proud to be among many friends and supporters to welcome U.S. Secretary of the Interior Sally Jewell to Honolulu and to thank her for supporting the preservation of the Honouliuli Internment Camp," said Carole Hayashino, president and executive director of the Japanese Cultural Center of Hawai'i. "This day honors our past – the memories of the former internees – and celebrates the future. The Honouliuli National Monument is a gift to future generations who will now have the opportunity to visit the former internment camp site and learn about the unique World War II experience of Japanese Americans in Hawai'i and lessons of civil liberties and the U.S. Constitution. Honouliuli was lost and forgotten for many years. The new Honouliuli National Monument will ensure that people will never forget."

Monsanto Company donated the land for the new monument. The University of Hawai'i - West O'ahu is actively involved in research and interpretation of the site and has signed an agreement with the NPS to assure public access over its lands adjacent to the site.

"We're honored to participate in the celebration of the new Honouliuli National Monument and reach this historic milestone in the community's efforts to preserve the Honouliuli Internment Camp as part of the U.S. National Park System," said Alan Takemoto, Monsanto's Community Affairs Manager for Hawaii.

collaboration, from donating 123 acres for establishment of the National Monument, to working on site preparations with distinctive organizations like the National Park Service, the Japanese Cultural Center of Hawaii, and the University of Hawaii.”

The 155-acre site, located at the bottom of a deep gulch not far from Pearl Harbor, opened in March 1943, and interned Japanese and European Americans and resident aliens, eventually holding 400 civilian internees and 4,000 prisoners of war. After the war, it was largely forgotten and overgrown with vegetation until it was identified in 2002.

Japanese American organizations and elected leaders in Hawai‘i have strongly supported preserving and interpreting the camp. In 2010, Congress authorized the Department of the Interior to conduct a study of the site for possible inclusion in the National Park System.

More information about the new monument is available at www.nps.gov/hono.

The Antiquities Act was first exercised by President Theodore Roosevelt in 1906 to designate Devils Tower National Monument in Wyoming. Since then, 16 presidents have used this authority to protect unique natural and historic features in America, such as the Grand Canyon, the Statue of Liberty, and Colorado's Canyons of the Ancients.

President Obama has used the Antiquities Act to establish or expand 16 national monuments. Altogether, he has protected more than 260 million acres of public lands and waters – more than any other President – as well as preserved sites that help tell the story of significant people or extraordinary events in American history, such as César E. Chávez National Monument in California, Harriet Tubman Underground Railroad National Monument in Maryland, and Charles Young Buffalo Soldiers National Monument in Ohio.

Attached is an updated press release for tomorrow. Please send edits directly to Emily Beyer. We are shooting to get this out around 4:00 PM EDT on Tuesday.

FYI -- This version has been approved by the Secretary. Losing wifi in a few minutes but will check when we land in Hawaii in 6+ hours.

NPS -- let me know if you want a Jarvis / O'Dell quote. If so, please send over and I'd be happy to include it. We are using quotes from Monsanto and JCCH so I tried to keep our voice with just the Secretary but happy to add another one if you would like.

Thanks!

Best,

Blake

Can we please add the following quote from Director Jarvis to the press release? Apologies for the late notice - I was just able to hear from the Director.

"The National Park Service is proud to have Honouliuli National Monument among our sites that share important lessons from America's history," said National Park Service Director Jonathan B. Jarvis. "In dedicating this new national monument, we are recommitting ourselves to share the difficult stories of this place so that they are never forgotten and so future generations can learn from past mistakes."

Sec. Jewell, Gov. Ige, Senators Schatz and Hirono Join Community Dedication of Honouliuli National Monument *National Park Service will now undertake collaborative public planning process to establish, interpret monument site*

O‘AHU, HI – Secretary of the Interior Sally Jewell today joined Hawai‘i Governor David Ige, U.S. Senators Brian Schatz and Mazie Hirono, National Park Service (NPS) Deputy Director Peggy O‘Dell, state and local officials, and community leaders to dedicate Honouliuli National Monument, the site of the largest and longest-used confinement site in Hawai‘i for Japanese American citizens, resident immigrants and prisoners of war during World War II.

In February, [President Obama used the Antiquities Act to establish the new national monument](#), which is now the fifth site in the park system associated with the internment of Japanese Americans during World War II.

“As one of the newest units of the National Park System, Honouliuli National Monument speaks of a painful but important chapter in our involvement in World War II – the unjust internment of Japanese Americans and other citizens whose civil rights were trampled by the prejudice and fear of the time,” Jewell said. “I applaud President Obama for establishing this monument and all of those in Hawai‘i who worked so hard to ensure this place is preserved and the story is told for future generations.”

The site is managed by the National Park Service, which will conduct a management planning process with full public involvement. The NPS in March signed a cooperative agreement with the Japanese Cultural Center of Hawai‘i to help provide educational and interpretive opportunities of the site and to promote awareness of Japanese American internment experiences during the Pacific War.

[quote from JCCH]

Monsanto Company donated the land for the new monument. The University of Hawai‘i -West O‘ahu is actively involved in research and interpretation of the site and has signed an agreement with the NPS to assure public access over its lands adjacent to the site.

“We’re honored to participate in the celebration of the new Honouliuli National Monument and reach this historic milestone in the community’s efforts to preserve the Honouliuli Internment Camp as part of the U.S. National Park System,” said Alan Takemoto, Monsanto’s Community Affairs Manager for Hawaii. “Transferring ownership of this land to the Federal Government is the result of years of planning and coordination. We’re very proud to be part of this collaboration, from donating 123 acres for establishment of the National Monument, to working on site preparations with distinctive organizations like the National Park Service, the Japanese Cultural Center of Hawaii, and the University of Hawaii.”

The 155-acre site, located at the bottom of a deep gulch not far from Pearl Harbor, opened in March 1943, and interned Japanese and European Americans and resident aliens, eventually holding 400 civilian internees and 4,000 prisoners of war. After the war, it was largely forgotten and overgrown with vegetation until it was identified in 2002.

Japanese American organizations and elected leaders in Hawai‘i have strongly supported preserving and interpreting the camp. In 2010, Congress authorized the Department of the Interior to conduct a study of the site for possible inclusion in the National Park System.

More information about the new monument is available at www.nps.gov/hono.

The Antiquities Act was first exercised by President Theodore Roosevelt in 1906 to designate Devils Tower National Monument in Wyoming. Since then, 16 presidents have used this authority to protect unique natural and historic features in America, such as the Grand Canyon, the Statue of Liberty, and Colorado's Canyons of the Ancients.

Sec. Jewell, Gov. Ige, Senators Schatz and Hirono Join Community Dedication of Honouliuli National Monument *National Park Service will now undertake collaborative public planning process to establish, interpret monument site*

O‘AHU, HI – Secretary of the Interior Sally Jewell today joined Hawai‘i Governor David Ige, U.S. Senators Brian Schatz and Mazie Hirono, Honolulu Mayor Kirk Caldwell, National Park Service (NPS) Deputy Director Peggy O‘Dell, state and local officials, and community leaders to dedicate Honouliuli National Monument, the site of the largest and longest-used confinement site in Hawai‘i for Japanese American citizens, resident immigrants and prisoners of war during World War II.

In February, [President Obama used the Antiquities Act to establish the new national monument](#), which is now the fifth site in the park system associated with the internment of Japanese Americans during World War II.

“As one of the newest units of the National Park System, Honouliuli National Monument speaks of a painful but important chapter in our involvement in World War II – the unjust internment of Japanese Americans and other citizens whose civil rights were trampled by the prejudice and fear of the time,” Jewell said. “I applaud President Obama for establishing this monument and all of those in Hawai‘i who worked so hard to ensure this place is preserved and the story is told for future generations.”

The site is managed by the National Park Service, which will conduct a management planning process with full public involvement. The NPS in March signed a cooperative agreement with the Japanese Cultural Center of Hawai‘i to help provide educational and interpretive opportunities of the site and to promote awareness of Japanese American internment experiences during the Pacific War.

"The National Park Service is proud to have Honouliuli National Monument among our sites that share important lessons from America's history," said National Park Service

Director Jonathan B. Jarvis. "In dedicating this new national monument, we are recommitting ourselves to share the difficult stories of this place so that they are never forgotten and so future generations can learn from past mistakes."

"Today, we are proud to be among many friends and supporters to welcome U.S. Secretary of the Interior Sally Jewell to Honolulu and to thank her for supporting the preservation of the Honouliuli Internment Camp," said Carole Hayashino, president and executive director of the Japanese Cultural Center of Hawai'i. "This day honors our past – the memories of the former internees – and celebrates the future. The Honouliuli National Monument is a gift to future generations who will now have the opportunity to visit the former internment camp site and learn about the unique World War II experience of Japanese Americans in Hawai'i and lessons of civil liberties and the U.S. Constitution. Honouliuli was lost and forgotten for many years. The new Honouliuli National Monument will ensure that people will never forget."

Monsanto Company donated the land for the new monument. The University of Hawai'i -West O'ahu is actively involved in research and interpretation of the site and has signed an agreement with the NPS to assure public access over its lands adjacent to the site.

"We're honored to participate in the celebration of the new Honouliuli National Monument and reach this historic milestone in the community's efforts to preserve the Honouliuli Internment Camp as part of the U.S. National Park System," said Alan Takemoto, Monsanto's Community Affairs Manager for Hawaii. DOI in the News:

INTERIOR OFFICIALS TO ATTEND CEREMONY DEDICATING HONOULIULI AS NATIONAL MONUMENT. [KHON-TV](#) Honolulu (3/30, 73K) reports that Interior Secretary Sally Jewell and Deputy Director of the NPS Peggy O'Dell will be in Hawaii on Tuesday for a private ceremony to dedicate Honouliuli National Monument. Meanwhile, Monsanto Hawaii is "working to donate an additional 22 acres to the site."

Additional coverage was provided by the [Pacific Business News](#) (3/31, Shimogawa, Subscription Publication, 45K) and [Garden News](#) (3/31).

SECRETARY JEWELL HEADLINES 2015 ALBRIGHT LECTURE. [UC Berkeley](#) (3/30) says that Interior Secretary Sally Jewell "appeared in conversation with UC President Janet Napolitano, historian and author Douglas Brinkley and UC Berkeley Chancellor Nicholas Dirks for the campus's 2015 Horace M. Albright Lecture in Conservation." The Albright Lecture was "one of the highlights of 'Parks for Science, Science for Parks: The Next Century,' a conference celebrating the National Parks' centennial, and UC Berkeley's role in the parks' establishment, on campus last week."

FEDERAL AGENCIES MOVING FORWARD WITH NEW HYDROPOWER RULES. [The Hill](#) (3/31, Devaney, 224K) reports the Obama Administration is "moving forward with new rules for conducting hydropower license hearings." The Department of Agriculture, Department of the Interior and Department of Commerce announced Monday that "they are issuing a joint rule that revises the procedures for holding expedited hearings to resolve disputes over hydropower licenses."

REPORTERS: FEDERAL OFFICIALS BECOMING INACCESSIBLE. In a piece running nearly 1,900 words, the [Washington Post](#) (3/31, Farhi, 5.17M) writes that reporters covering many Federal agencies are experiencing frustration with the lack of responsiveness from officials. They "recite tales with similar outlines: An agency spokesman – frequently a political appointee – rejects the reporter's request for interviews, offers partial or nonresponsive replies, or delays responding at all until after the journalist's deadline has passed." Those requests that are granted "are closely monitored, reporters say, with a press 'minder' sitting in," or are conducted via email so that officials can "carefully craft and vet their replies." A coalition of media organizations asked the White House to let Federal workers know they can and should answer media queries. The President "hasn't acted on the suggestion," but Press Secretary Josh Earnest "defended the president's record." Earnest wrote in reply, "While there is more work to do, the White House and federal agencies are far more accessible and accountable than ever before."

ADDITIONAL COVERAGE: SAGE GROUSE CONSERVATION DEAL WITH OREGON RANCHERS CELEBRATED. Additional coverage of the sage grouse conservation agreement with Oregon ranchers was provided by the [Twin Falls \(ID\) Times-News](#) (3/31, 56K),

the [Eugene \(OR\) Register-Guard](#) (3/31, 172K), and the [KLIX-AM Twin Falls \(ID\)](#) Twin Falls, ID (3/31, 492).

ADDITIONAL COVERAGE: AMERICAN EXPRESS PLEDGES \$5 MILLION TO BOOST VOLUNTEERISM ON PUBLIC LANDS.

Additional coverage that “the American Express Foundation has committed to donating \$5 million over the next three years to boost volunteerism on public lands” was provided by [Inside Philanthropy](#) (3/31).

RECREATION EXERTING POLITICAL CLOUT. In a piece for the [Idaho Statesman](#) (3/30, 196K), Roger Phillips writes that recreation’s political clout is increasing, according to a report in the Outdoor Alliance. The Alliance “points out that the appointment of Sally Jewell, former CEO of REI, as the Department of Interior Secretary, was a landmark shift in the clout of recreation at a federal level, and ‘like a snowball rolling downhill, a clear signal of gathering momentum for outdoor recreation.’”

HISTORY OF DINOSAUR SKELETON RECOUNTED. In his column for [The Robesonian \(NC\)](#) (3/31, 43K), Jaymie Baxley writes about “Sue,” the “largest, most complete Tyrannosaurus rex skeleton ever discovered.” The fossil was “found beneath a slice of Cheyenne River Indian Reservation owned by Maurice Williams, a member of the Sioux tribe,” but since the Interior Department “held the land in trust, Sue was considered property of the U.S. government.”

America’s Great Outdoors:

National Park Service:

YOSEMITE BIGHORN SHEEP RELOCATED. The [Fresno \(CA\) Bee](#) (3/30, 323K) reports that “the next chapter in the restoration of the iconic bighorn sheep was played out over the last several days as two herds were moved into Yosemite and Sequoia national parks, federal officials announced Monday.” According to the article, “twelve animals — nine females and three males — were moved from Inyo National Forest and Sequoia National Park into the Cathedral Range in Yosemite.” Also, “seven females were relocated in Sequoia to the Laurel Creek area.”

Additional coverage was provided by [ABC News](#) (3/31, 3.41M) and the [Miami \(FL\) Herald](#) (3/31, 694K).

SUPPORTERS OF PROPOSED NATIONAL PARK TO HOST TELEPHONE TOWN HALL EVENT. The [Bangor \(ME\) Daily News](#) (3/30, 166K) reports that “Lucas St. Clair and the president of the Katahdin Area Chamber of Commerce will hold a telephone town hall event on Wednesday showcasing the proposed national park and recreation area in the region, St. Clair’s spokesman said Monday.” David Farmer, a former spokesman for Gov. John Baldacci and St. Clair’s spokesman, said, “It could be a couple thousand people who call in. We see some momentum building, but there is some confusion about what the park and recreation area would and would not do that we want to clear up if we can.”

DIG PLANNED AT REVOLUTIONARY SITE IN NEW JERSEY. The [AP](#) (3/31) reports that “researchers are digging into the New Jersey site of a major Revolutionary War battle.” According to the article, “officials are planning an archaeological dig for June at the site now known as Red Bank Battlefield Park in the southern New Jersey town of National Park.” The NPS is “contributing \$46,000 in a grant to help fund the first such undertaking ever at the site.”

PLAN FOR METRO STATION AT POTOMAC YARD IN ALEXANDRIA ADVANCES. The [Washington Post](#) (3/30, Lazo, 5.17M) reports that “a new Metro station in Alexandria’s growing Potomac Yard community is a step closer to reality with the release of a federal environmental impact study that says the project would spur economic development and boost transit.” The report, “released last week by the Federal Transit Administration, details the station’s potential impact on the community, overall development, wetlands and views from the George Washington Memorial Parkway.” The article notes that “the proposal that some have called the preferred option would intrude on the parkway’s scenic easement and require the purchase of 0.16 acres of parkway property from the National Park Service, the report said.” However, “in a letter to the city, the Park Service says it would support the construction of the station pending a negotiation of a benefits agreement.”

NPS REVISES THOUGHTS ON TRANSMISSION OF DISEASE BY PACK ANIMAL IN ALASKA’S NATIONAL PARKS. The [Huffington Post](#) (3/31, News, 281K) reports that “in January, the National Park Service proposed a ban on domesticated sheep, goats, alpacas and llamas in Alaska’s national parks after someone tried to take a pet goat into Denali National Park’s Savage Alpine Trail, an area utilized by Dall sheep, according to Denali National Park and Preserve public affairs officer Kris Fister.” However, “in a Park Service compendium published in mid-March, officials wrote that the transmission of disease from llamas or alpacas to wild sheep or mountain goats has not been documented, and the likelihood is ‘probably low, although still possible.’” NPS regional communications officer John Quinley said the service “doesn’t have a ‘hard number’ on the amount of pack animals traveling through national parks, but it estimates ‘very few.’”

HUMORIST BOMBECK’S OHIO HOME ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [Columbus \(OH\) Dispatch](#) (3/30, 605K) reports that “the suburban ranch-style home where humor writer Erma Bombeck launched her nationally syndicated column has been added to the National Register of Historic Places.”

ADDITIONAL COVERAGE OF “FIND YOUR PARK” CAMPAIGN. Additional coverage of the “Find Your Park” campaign was provided by the [Washington \(DC\) Post](#) (3/30, Brett Zongker |, Ap, 5.17M), the [Houston \(TX\) Chronicle](#) (3/31, Zongker, 2.28M), the [Denver \(CO\) Post](#) (3/31, Press, 804K), the [Minneapolis \(MN\) Star Tribune](#) (3/31, Zongker, 1.37M), the [Lowell \(MA\) Sun](#) (3/31, 77K), the [Salt Lake \(UT\) Tribune](#) (3/31, 405K), the [Salt Lake \(UT\) Tribune](#) (3/31, Prettyman, 405K), the [Deseret \(UT\) News](#) (3/31, 538K), the [Baltimore \(MD\) Sun](#) (3/30, 810K), [Bloomberg](#) (3/31, 2.94M), [ABC News](#) (3/31, 3.41M), [Voice of America](#) (3/31, 70K), [WJLA-TV Washington \(DC\)](#) Washington (3/31, 12K), [KSBW-TV Monterey \(CA\)](#) Monterey, CA (3/31, 32K), and [KNXV-TV Phoenix \(AZ\)](#) Phoenix (3/31, 130K).

ADDITIONAL COVERAGE: BILL INTRODUCED TO ALLOW PADDLING ON NATIONAL PARK RIVERS. Additional coverage of H.R. 974, “a bill that would allow paddling on rivers in Yellowstone and Grand Teton national parks,” was provided by the [Indian Country Today Media Network](#) (3/30, 49K).

Bureau of Land Management:

PROPOSED GRAND CANYON WATERSHED NATIONAL MONUMENT DRAWS MIXED REACTION. The [Mohave Valley \(AZ\) Daily News](#) (3/31, 23K) reports that “a proposal to designate a vast, sparsely populated area surrounding the Grand Canyon as a national monument is getting mixed reactions.” According to the article, “about 100 people gathered in Flagstaff to weigh in on the proposed Grand Canyon Watershed National Monument” at a meeting hosted by Rep. Ann Kirkpatrick. Kirkpatrick “heard from environmental groups that want to protect the region’s water, large-diameter trees and wildlife corridors” as well as “from the Arizona Game and Fish Commission and sportsmen’s groups that oppose the effort to sidestep Congress and questioned the expense of running a national monument.”

BLM INVESTIGATING POSSIBLE VIOLATION AGAINST DEVELOPER JIM RHODES. [KSL-TV](#) Salt Lake City (3/31, 1.07M) reports that “a proposed land exchange in the Red Lake area between Las Vegas developer Jim Rhodes and the Bureau of Land Management may be in trouble.” The BLM is “investigating a possible trespassing violation against Rhodes.” The article notes that “while federal violations could throw a wrench in Rhodes’ proposed land exchange, officials say it won’t stop him from drilling more wells and plowing land being blamed for massive dust storms in Red Lake, Valle Vista and Golden Valley.”

BLM SEEKS TRAIL INVENTORY IN COLORADO. The [Aspen \(CO\) Times](#) (3/31, 1K) reports that the BLM “seeks the public’s help in reviewing its road and trail inventory for lands managed by the White River Field Office in northwestern Colorado.” White River Field Manager Kent Walter said, “If you use the roads and trails within the White River Field Office, we would like to hear from you.” According to the article, “over the next several years, the field office will undertake a comprehensive travel-management planning process looking at the roads and trails — collectively called routes — that it manages.”

NEVADA RANCHER BUNDY TO ATTEND HEARING ON FIGHT OVER FEDERAL LAND HEADS. [KNPR-FM](#) Las Vegas (3/31, 3K) reports that “nearly a year after the very public fight between Nevada rancher Cliven Bundy and the Bureau of Land Management, Bundy will be going to Carson City to talk to the Legislature about federal control of land in Nevada.” According to the article, “Bundy and his family are going to be at a hearing Tuesday concerning Assembly Bill 408, which would prohibit the federal government from owning or managing lands it did not acquire without the consent of the Legislature.”

FEDERAL LAND MANAGEMENT CRITICIZED. In commentary for the [Daily Signal](#) (3/30), Marshal Wilson, a member of the Young Leaders Program at The Heritage Foundation, writes that “the federal government is ill-suited to manage vast amounts of land in the West,” according to a study released by the Property and Environment Research Center. The study found that “the federal government loses money managing valuable natural resources on federal lands, while states generate significant financial returns from state trust lands.”

SUPPORT URGED FOR NORTH CAROLINA’S PLAN TO MIX MUSTANG POPULATIONS. In an op-ed for the [Wall Street Journal](#) (3/31, Ferguson, Subscription Publication, 5.67M), Russ Ferguson writes that development has separated Spanish Mustangs on the Outer Banks in North Carolina and they are now isolated in two different areas, and as a result, each population has become severely inbred. Ferguson criticizes the Interior Department for opposing a plan by North Carolina to mix the two populations.

Fish and Wildlife Service:

FEDERAL, STATE OFFICIALS HOPE TO SAVE GRIZZLIES IN NORTH CASCADES. The [Environment & Energy Publishing](#) (3/31, Subscription Publication, 705) reports that “federal and state agencies in Washington state’s rugged North Cascades are racing to save the iconic grizzly bear before the 600-pound behemoths disappear.” The NPS and FWS are “leading an effort that both agencies concede is long overdue to develop a formal plan to restore grizzlies in 9,800 square miles on the U.S. side of the North Cascades ecosystem.” The agencies “last month formally launched an environmental impact statement (EIS) to study a host of alternatives to restore grizzly populations across one of the largest contiguous swaths of undeveloped land in the Lower 48 states.”

ABUSED BEAR FINDS NEW HOME IN COLORADO. [NPR](#) (3/30, 1.58M) reports that “a badly abused Peruvian bear named Cholita is coming to a sanctuary in Colorado.” Animal Defenders International announced that the FWS “expedited the request and she will be on her way next month.”

WILDLIFE OFFICERS INVESTIGATING OSPREY NEST REMOVAL. The [Charleston \(SC\) Post and Courier](#) (3/30, 295K) reports that state and federal regulators are investigating whether an osprey nest with eggs has been disturbed. The nest had been removed for the Wando River bridge project. FWS spokeswoman Jennifer Koches “confirmed the investigation and said the S.C. Department of Natural Resources is handling it, but said she could not comment on an investigation underway.”

US Geological Survey:

RESEARCHERS LINK PYTHONS TO DECREASE IN MAMMALS IN EVERGLADES. The [AP](#) (3/30, 157K) reports that “researchers have linked invasive Burmese pythons to the severe drop in the population of small mammals in the Florida Everglades.” A University of Florida research team “outfitted 30 marsh rabbits with radio collars and set them free,” and “when they later tracked the signals they found mostly pythons.” USGS herpetologist Bob Reed says “the study is the first hard evidence of invader pythons causing mammal declines in Everglades National Park.”

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (3/31, 2.28M).

SURVEY FINDS BIRTH CONTROL PILLS AFFECT FISH. The [Washington Post](#) (3/30, Fears, 5.17M) reports that a recent survey by the USGS “found that fish exposed to a synthetic hormone called 17a-ethinylestradiol, or EE2, produced offspring that struggled to fertilize eggs.” Ramji Bhandari, a University of Missouri assistant research professor and a visiting scientist at USGS, said, “If those trends continued, the potential for declines in overall population numbers might be expected in future generations. These adverse outcomes, if shown in natural populations, could have negative impacts on fish inhabiting contaminated aquatic environments.” According to the article, the chemical is released “when some women simply pour unused” birth control pills “down the drain.”

USGS AWARDING GRANTS FOR EARTHQUAKE HAZARDS RESEARCH. The [Science 2.0](#) (3/31, 2K) reports that the USGS “wants

to award up to \$7 million in grants for earthquake hazards research in 2016, specifically for improving our understanding of earthquake processes, hazards and risks that will lead to reduced losses from earthquakes, more accurate and timely earthquake information and forecasts and better inform the public about earthquake safety.”

USGS STUDYING CHROMIUM 6 IN HINKLEY. The [Victorville \(CA\) Daily Press](#) (3/30, 2K) editorializes “chromium 6 remains an issue in Hinkley for many of the few remaining residents.” PG&E has “taken steps to clean up the chromium 6 still in the groundwater — enough that much of Hinkley’s water now has chromium 6 levels below the state limit.” However, “there is disagreement of how much of the remaining chromium was the result of PG&E’s practices and how much belongs to nature.” As a result, the USGS “recently embarked on a five-year, \$5.4 million study to settle the issue.”

Securing America’s Energy Future:

Renewable Energy:

ENVIRONMENTAL GROUPS RAISE CONCERNS OVER DESERT RENEWABLE ENERGY CONSERVATION PLAN. The [San Bernardino \(CA\) Sun](#) (3/30, 101K) reports that “leaders of several major environmental groups say they are uneasy about a decision this month to separate federal and state parts” of the Desert Renewable Energy Conservation Plan. They are concerned that the BLM will “feel pressured to take large-scale renewable energy projects on their properties.”

BLM Urged To Stick To Its Goals For Renewable Energy, Conservation. In an op-ed for the [Victorville \(CA\) Daily Press](#) (3/30, CASTRO, DASHIELL, 2K), Linda Castro, the DRECP organizer for the California Wilderness Coalition, and Stephanie Dashiell, the California Desert representative for Defenders of Wildlife, write that “the BLM recently announced that planning will proceed on our desert’s public lands, but the part of the DRECP that deals with privately-owned lands will be delayed.” The authors “do not want to see the BLM change its goals for either renewable energy development or conservation.” They write that “the BLM should not increase renewable energy development on public lands to ‘make up’ for the lack of private land designations, even in the short term,” and “similarly, conservation efforts on both public and private lands should proceed, whether or not they are part of the DRECP.”

Onshore Energy Development:

WASTEWATER INJECTION WELLS CREDITED WITH CAUSING SOME EARTHQUAKES. The [Wall Street Journal](#) (3/30, Gilbert, 5.67M) reports in its “short answer” blog that the possibility of causing an earthquake by such means has been known for about 50 years, and that the effect is related to the depth of the well and the pressure of the injection. Fracking itself is regarded as less likely to cause an earthquake because of the location of the shale, though an Ohio report found that fracking was probably responsible for some smaller earthquakes last year. It also points out that in the Bakken Shale there has not been a large increase in seismic activity.

Oklahoma Supreme Court Hears Case Alleging Oil And Gas Companies Caused Earthquake. The [Wall Street Journal](#) (3/31, Bustillo, Gilbert, Subscription Publication, 5.67M) reports on a suit being heard by Oklahoma’s supreme court alleging that oil and gas companies caused earthquakes by their wastewater injections. The oil and gas industry is said to be concerned about the possibility of liability suits in these cases though the earthquakes in question are generally quite small. Oklahoma and Kansas are developing regulations to lessen the possibility of earthquakes, while Arkansas and Ohio have prohibited injection wells in some areas. Some companies have settled cases. Some in the industry are skeptical that injection wells are to blame. Meanwhile, Oklahoma’s insurance commissioner John Doak is considering investigating insurance companies for denying earthquake claims.

Oklahoma Geological Survey Said To Be Pressured On Linking Fracking To Seismic Activity. [Bloomberg News](#) (3/30, Elgin, Philips, 2.94M) reports on what is interpreted as “pressure” applied to the Oklahoma Geological Survey to avoid coming to the conclusion that increased seismic activity in the state is due to fracking, specifically waste water injection wells. It describes a meeting called by University of Oklahoma president David Boren with Austin Holland, the state seismologist, an employee of the university, and Harold Hamm, founder of Continental Resources, a major oil and gas business and a major donor to the university. This is presented as part of “a steady stream of industry pressure” on OGS. All parties to the meeting deny that there was any “pressure” and Holland “bristles” at the suggestion that the OGS research was affected by it. Holland points out that “there have been large spikes of natural earthquakes in the past.” He has now concluded that much of the increased seismic activity in the state is due to waste water injection wells.

BILL WOULD BLOCK MOUNTAINTOP MINING RULE. [The Hill](#) (3/30, Cama, 224K) reports that Rep. Alex Mooney “introduced a bill Monday that would block the Obama administration’s efforts to restrict the controversial mountaintop removal coal mining process.” The Interior Department is “planning to propose soon a regulation to restrict mountaintop removal mining near streams in an effort to protect streams in Appalachia from the mining waste.” Mooney’s legislation would “stop Interior’s Office of Surface Mining from going forward with the rule for at least a year, stop it from using the Clean Water Act to justify the rule and require the agency to conduct a study into the industry impacts of the regulation.”

Also reporting on the story is the [Charleston \(WV\) State Journal](#) (3/31, 1K).

FORMER BLM EMPLOYEE IDENTIFIES OLD UNPLUGGED WELLS IN UTAH. The [Salt Lake \(UT\) Tribune](#) (3/31, 405K) reports that “in defiance of Bureau of Land Management policy, several Hot Rod wells remain unplugged and unreclaimed along with hundreds of other nonproducing wells on federal lands in Utah, according to a new analysis by a retired BLM official who conducted well inspections for the agency’s Vernal field office.” The article notes that “such ‘orphaned’ wells unnecessarily enlarge the oil and gas industry’s footprint on Utah’s landscape, according to Public Employees for Environmental Responsibility, which released the analysis Monday.” Stan Olmstead’s “analysis identified 557 unplugged wells that haven’t produced for the past 10 years.”

BLM UPDATES OIL AND GAS DRILLING PLAN FOR PICEANCE BASIN. The [Summit County \(CO\) Citizens Voice](#) (3/30, 506) reports that “a new master leasing plan proposed by the Bureau of Land Management for public lands surrounding northwestern Colorado’s Dinosaur National Monument aims to reduce oil and gas drilling impacts to wildlife, archaeological treasures and other resources in the region.” The plan “could work if it’s implemented effectively, according to some public land watchdog groups, but doesn’t do much to address the larger issue of trying to move away from fossil fuels.”

WPOST FACT CHECKER FAULTS BOTH WEA AND BLM ON ESTIMATING COST OF FRACKING REGS. The [Washington Post](#) (3/30, Lee, 5.17M) reports in its “Fact Checker” blog on Western Energy Alliance estimates that Interior Department rules for fracking on public lands could cost \$97,000 per well, in contrast to the department’s own estimate of \$11,400 to \$11,800 per well. The difference in estimate is attributed to the Bureau of Land Management’s belief that the new regulations incorporate current practice, and so do not expect much additional expense. The Fact Checker is unable to conclude which estimate is “more realistic,” says that neither the WEA nor the BLM “really know” and so assigns “Two Pinocchios” each.

Offshore Energy Development:

BOEM RECEIVES THOUSANDS OF COMMENTS ON OFFSHORE DRILLING. The [AP](#) (3/31, Smith) reports, “Thousands of opinions poured in Monday” which was the last day the Bureau of Ocean Energy Management was accepting public comment on “what should be studied in an environmental impact statement of offshore drilling.” Over 3,700 comments were submitted on Monday of a total of nearly 15,000. The [Houston Chronicle](#) (3/31, Dlouhy, 2.28M) reports on a “deluge of comments” received, explaining that those comments will be used “to shape the government’s schedule for selling drilling rights along the nation’s coastlines from 2017 to 2022.” The draft proposes one sale in the Atlantic “near Virginia, North Carolina, South Carolina and Georgia.” In their comments, “eight industry trade groups,” said that the draft was “overly conservative” in allowing just one Atlantic lease. They are hoping for a second Atlantic sale.

Also providing coverage are the [FuelFix](#) (3/30) and the [Houston \(TX\) Chronicle](#) (3/31, Smith, 2.28M).

Maryland AG Joins Opponents Of Offshore Oil Exploration. The [Baltimore Sun](#) (3/29, Wheeler, 810K) reports that Maryland State Attorney General Brian Frosh, has joined Maryland Sens. Barbara A. Mikulski and Ben Cardin, “in objecting to the Obama administration’s proposal” to allow oil exploration off the Atlantic coast. While the Administration is not proposing opening up the Maryland coast, Frosh argued that spills could have an impact on Maryland, noting that the Deepwater Horizon spill extended “hundreds of miles.”

Also providing coverage are the [Washington \(DC\) Post](#) (3/30, Press, 5.17M) and the [Houston \(TX\) Chronicle](#) (3/31, 2.28M).

Additional Coverage. Additional coverage was provided by the [FuelFix](#) (3/30, 7K), the [Longview \(TX\) News-Journal](#) (3/30, 64K), the [Lewes \(DE\) Cape Gazette](#) (3/31, 42K), and the [Charleston \(SC\) Post and Courier](#) (3/31, 295K).

PAPP: ROYAL DUTCH SHELL TO RESUME OFFSHORE DRILLING IN ALASKA. [Reuters](#) (3/30) reports that Royal Dutch Shell intends to resume offshore drilling in Alaska after operations were suspended for two years in the wake of rig grounding, according to Adm. Robert Papp, special US envoy to the Arctic. Papp is quoted saying in an interview that “clearly Shell and others will resume drilling and exploration up off the North Slope of Alaska,” though he gave no indication as to when. Papp added, “I think Shell is putting significant resources into this to make sure they have enough people, equipment, resources, redundancy. They should be OK.”

Additional coverage of Arctic drilling was provided by [Rigzone](#) (3/30, 11K) and [Vox](#) (3/31, 737K).

BP SAYS FINES COULD RENDER US BUSINESS UNPROFITABLE. The [Houston Chronicle](#) (3/31, Eaton, 2.28M) reports that BP in papers filed with the court on Friday argued that “even a fraction of the \$13.7 billion in fines it could face for the Deepwater Horizon disaster” might lead to bankruptcy for its US branch. Given current oil prices, BP estimates its US business is worth about \$5 billion and it may have about \$2.3 billion in “available cash” in 2015. US District Judge Carl Barbier could fine BP up to \$13.7 billion and over \$1 billion for Anadarko. BP argues that the money it has already spent “to stem the environmental impact” should reduce the penalty. BP contends that the legal liability extends only to its US subsidiary. Prosecutors argued that BP’s US branch would have access to funds from the BP group and that it could take time to pay the fines.

NWF REPORT WARNS SPECIES STILL SUFFERING FROM DEEPWATER HORIZON SPILL. The [New Orleans Times-Picayune](#) (3/30, Schleifstein, 621K) reports that the National Wildlife Federation released a report warning that oil spilled by the BP Deepwater Horizon well “continues to pose a significant threat to wildlife.” The report identifies 20 species as being of particular concern, but points out that it would be “decades” before any final estimate could be made of the effects of the spill. BP Senior Vice President Geoff Morrell said that the NWF report is “a work of political advocacy.” BP had issued a report March 17 finding that “wildlife and ecosystems in the Gulf were rebounding.” Others are cited suggesting the reports are “premature” given the lack of peer-reviewed research.

Tackling America’s Water Challenges:

DROUGHT IMPACTING LAKE POWELL. The [Washington Post](#) (3/30, Kirkpatrick, 5.17M) reports that “Lake Powell, one of the nation’s largest reservoirs, is now below 45 percent of its capacity.” Jonathan Waterman wrote in National Geographic, “Many climate scientists think the Southwest is again due for a megadrought. The Bureau of Reclamation’s analysis of over a hundred climate projections suggests the Colorado River Basin will be much drier by the end of this century than it was in the past one, with the median projection showing 45 percent less runoff into the river.”

Empowering Native American Communities:

NEW INDIAN CHILD WELFARE ACT GUIDELINES GENERATE CONTROVERSY. The [Indian Country Today Media Network](#) (3/30, 49K) reports that “last month, Assistant Secretary for the Bureau of Indian Affairs Kevin Washburn announced the release of new guidelines in the Federal Register to ensure that state and federal courts comply with the statutes set forth in the Indian Child Welfare Act.” On March 12, the American Academy of Adoption Attorneys (AAAA) “fired back with its own press release expressing its outrage that the BIA had published the guidelines without input from its membership.” The article notes that “many Indian child welfare advocates across the country, however, say that the organization’s emotionally-charged response was ill-considered, considering that the BIA went out of its way to seek input in meetings that were promoted and open to the public.”

In a piece for the [Indian Country Today Media Network](#) (3/30, 49K), Patricia Paul (Inupiaqis an appellate judge for the Confederated Tribes of Grand Ronde, writes about her experience being adopted.

TRIBAL LEADERS ATTEND CLIMATE CHANGE CONFERENCE. The [Indian Country Today Media Network](#) (3/30, 49K) reports that American Indian leaders “gathered, spoke and strategized at the Affiliated Tribes of Northwest Indians Tribal Leaders Summit on Climate Change on March 10 and 11 in Portland, Oregon.” The meeting was sponsored by the Institute for Tribal Government at Portland State University and the Department of Interior-Northwest Climate Science Center, and “brought together tribal, federal, regional and state agencies and leaders to discuss the climate change crisis facing our world.”

IRON BOULDER ACCUSED OF STABBING BIA’S DUFFY AT CROW CREEK. The [Pierre \(SD\) Capital Journal](#) (3/31, 620) reports that “federal prosecutors say Brian Iron Boulder stabbed Patrick Duffy in the back with a knife that penetrated his ‘chest wall,’ as the two were leaving the Bureau of Indian Affairs superintendent’s office in Fort Thompson on March 25.” Iron Boulder “appeared in federal court in Pierre on Friday on a charge of ‘assaulting, resisting and impeding a federal employee’ which carries a maximum penalty of 20 years in prison followed by three years of supervised probation.”

BUSINESSES IN PALM SPRINGS EVICTED ON SHORT NOTICE BY TRIBAL LAND OWNERS. [KESQ-TV](#) Palm Springs, CA (3/31, 2K) reports that last Friday, “nearly a dozen other tenants at Indian Canyon and Ramon Road were slapped with an eviction notice.” The property “sits on Indian land owned by members of various tribes.”

Top National News:

OBAMA URGES RETURN TO “CAMARADERIE AND COLLEGIALLY” IN US POLITICS. Coverage of the President’s [remarks](#) at the dedication of the new Edward M. Kennedy Institute for the United States Senate, which included reports on all three network newscasts, cast a very favorable light on the late senator’s legacy with a heavy focus on his outreach across the aisle, a point Obama took pains to highlight and set up as an antidote to today’s partisan acrimony. The President used “the dedication...to call for a new era of consensus-building,” says the [New York Times](#) (3/31, Davis, Subscription Publication, 9.97M), for example, noting that he “condemned the demise of bipartisan compromise in American politics.” The [Boston Globe](#) (3/31, Miller, 1.03M) reports that Obama “gave a speech anchored by a somber take on today’s politics, but optimistic that it can improve.” [USA Today](#) (3/31, Korte, 4.95M) quotes him as saying, “Ted understood the only point of running for office is getting something done. Not to posture. Not to sit there worried about the next election, or the polls. ... Ted grieved the loss of camaraderie and collegiality, the face-to-face interaction. I think he regretted the arguments made to cameras instead of colleagues, directed at a narrow base instead of the body politic as a whole.”

Obama, [ABC World News](#) (3/30, story 9, 0:25, Muir, 5.84M) reported, praised “Kennedy as someone who bridged the partisan divide over and over again,” while the [CBS Evening News](#) (3/30, story 9, 2:25, Reid, 5.08M) noted Kennedy was “one of the most productive senators in US history because he knew his bills wouldn’t pass without Republican support.” In fact, “some of his former Republican partners were” in Boston yesterday, “including John McCain and Trent Lott.” The [AP](#) (3/31, Espo, Pickler) reports that Obama also asked, “What if we carried ourselves more like Ted Kennedy? What if we were to follow his example a little bit harder? ... To his harshest critics who saw him as nothing more than a partisan lightning rod, that might sound foolish. ... But there are Republicans here for a reason.” [Reuters](#) (3/31, Valdmanis, 281K) also highlights those Obama comments, while the [Washington Post](#) (3/31, Eilperin, Kane, 5.17M) notes that “speaking of Kennedy’s long friendship and legislative partnership with Sen. Orrin G. Hatch,” Obama said, “The point is we can fight on almost everything. But we can come together on some things. And those ‘somethings’ can mean everything to a whole lot of people.”

[NBC Nightly News](#) (3/30, story 10, 0:25, Holt, 7.86M) briefly noted the event – and the President’s presence at the dedication – at the end of its broadcast, and the [Los Angeles Times](#) (3/31, Memoli, 3.49M), along the lines of much of the coverage, says yesterday’s tributes to Kennedy “often doubled as commentaries on...today’s broken political system.”

[The Blaze](#) (3/30, 2.17M) noted that in his remarks, Obama “invoked President John F. Kennedy’s words about negotiation,” just as the Administration works to finalize a nuclear agreement with Iran. Said the President, “As many of you know, John is in Europe with our allies and partners leading the negotiations with Iran and the world community and standing up for the principle that Ted and his brother, President Kennedy, believed in so strongly.”

[McClatchy](#) (3/30, Kumar, Subscription Publication, 17K) quotes McCain as saying, “I miss my friend. I miss him a lot. ... I knew I would when I said six years ago the Senate wouldn’t be the same without him. And it hasn’t been. That’s mostly for reasons unrelated to losing Ted, but I have no doubt the place would be a little more productive and a lot more fun if he were there.” [Bloomberg Politics](#) (3/30, Keane, 169K) reports that “other speakers included U.S. Senator Elizabeth Warren, a potential 2016 Democratic presidential candidate, Vice President Joe Biden and Patrick and Ted Kennedy Jr., two of the late senator’s sons.”

In fact, the [Boston Globe](#) (3/31, Miller, 1.03M) notes that “in one of the lighter moments of the day, Biden told the story of Kennedy taking him, as a new US senator, to the Senate gymnasium and introducing him to his colleagues – some of whom were in the nude. The audience roared.” [Politico](#) (3/30, Dove, 669K) notes that Biden said, “Oh God, was I embarrassed.”

[TIME](#) (3/30, Rhodan, 19.19M) reported on its website that Warren, “a champion of progressive policies to benefit the working and middle class, shared a story of how...Kennedy’s fight for bankruptcy reform inspired her to enter politics.” Said Warren, “Senator Kennedy changed my life. ... And he changed what I understood about public service.” Also reporting on yesterday’s event are, among other news outlets, [The Hill](#) (3/30, Kamisar, 224K), the [Washington Times](#) (3/31, Boyer, 644K), [Roll Call](#) (3/30, Lesniewski, Subscription Publication, 102K), and the conservative [Daily Caller](#) (3/30, Ross, 318K), which reported that the Kennedy Institute cost taxpayers “\$38 million.”

Obama Attends DNC Fundraiser In Boston. The [Boston Globe](#) (3/30, Annear, 1.03M) reports Obama “attended a fund-raiser at the” Area Four pizza restaurant “following the dedication of the Edward M. Kennedy Institute,” part of the DNC’s “‘roundtable’ fund-raiser at the restaurant, according to his White House schedule.” Obama “arrived just before 2 p.m., and left roughly an hour-and-a-half later,” after meeting with “thirty supporters who contributed up to \$33,400.”

INDIANA GOP LAWMAKERS SAYS THEY WILL AMEND CONTROVERSIAL LEGISLATION. The controversy over Indiana’s Religious Freedom Restoration Act continued to generate heated media attention, including reports on all three network newscasts and editorial pieces in the nation’s major dailies. Most stories describe the Indiana law as potentially making discrimination against gay Americans legal, and paints the picture of a wide-ranging coalition of activists and business leaders working to amend it. On Monday, Indiana officials – widely cast as acting under great pressure – appeared to move in the direction of the law’s critics. [ABC World News](#)

(3/30, story 4, 2:20, Benitez, 5.84M) reported that “Indiana’s Speaker of the House” is “saying a fix is on the way,” hopefully “this week.” Speaker Brian Bosma was shown saying, “It’s our intent to make crystal clear in language that that type of discrimination is not allowed.”

The [New York Times](#) (3/31, Pérez-Peña, Southall, Subscription Publication, 9.97M) notes that David C. Long, president pro tempore of the state Senate, said at a press conference with Bosma, “It is not the intent of the law to discriminate against anyone, and it will not be allowed to discriminate against anyone. ... We hope to have a fix very soon.” The [Wall Street Journal](#) (3/31, Peters, Subscription Publication, 5.67M) quotes Bosma as saying, “There is clearly unsettled waters right now, and that could have far-ranging impact. We determined we needed to step in and be sure that those waters are calm, and that the misconceptions about the bill are settled.” Bosma, writing in [USA Today](#) (3/31, 4.95M), says the bill “does not provide for discrimination. We will clarify this even further to assure the public that our state’s Religious Freedom Restoration Act (RFRA) is a protection rather than an infringement.”

The [Huffington Post](#) (3/30, Terkel, 281K) reported that while Bosma and Long “said they were shocked, confused and completely caught off-guard by the backlash to their new ‘religious freedom’ law,” their protestations are “hard to believe,” given the example of last year’s debate in Arizona and the fact that “there were...people in Indiana warning of the consequences before the legislation became law.”

Yesterday, the [Indianapolis Star](#) (3/31, Swiatek, Evans, 4.95M) reports, “a Who’s Who of central Indiana corporate leaders called on Gov. Mike Pence and legislative leaders to reform the newly passed Religious Freedom Restoration Act so it can’t be used to ‘justify discrimination based upon sexual orientation or gender identity.’” They did so in the form of a letter, “released Monday afternoon after being hand-delivered to Pence,” Bosma and Long, “all Republicans.” The [CBS Evening News](#) (3/30, story 3, 2:20, Diaz, 5.08M) similarly reported that “Indiana Republican leaders were in damage control mode...after a weekend of protests against the state’s religious freedom law.” The mayors of Seattle and San Francisco and the governor of Connecticut “have banned state employee business travel to Indiana,” while Apple CEO Tim Cook “called the law part of a dangerous trend.” In addition, “just days before the Final Four here, the Indianapolis-based NCAA said it’s concerned about how the law could affect student athletes.” In fact, [NBC Nightly News](#) (3/30, story 3, 2:25, Gutierrez, 7.86M) reported, NCAA president Mark Emmert “wants the law to be clarified ahead of the Final Four here this weekend.” Emmert was shown saying, “This bill is fundamentally at odds with some of the core principles of higher education and of intercollegiate athletics. So it’s very disappointing.”

The [Washington Times](#) (3/31, Richardson, 644K), meanwhile, notes that “Chicago Mayor Rahm Emanuel has engaged in some interstate payback by attempting to lure Indiana companies over the state’s newly signed religious-freedom bill, but what he doesn’t mention is that Illinois already has a similar law.” Also weighing in, the [Washington Post](#) (3/31, 5.17M) reports, was Virginia Gov. Terry McAuliffe, who “is putting out the welcome mat for Indiana business leaders who might be troubled by that state’s new ‘religious freedom’ law.”

Pence, in the [Wall Street Journal](#) (3/31, Subscription Publication, 5.67M), accuses critics of the law of mischaracterizing its contents and intent, and argues it will not serve to discriminate against anyone. [USA Today](#) (3/31, 4.95M) editorializes that Pence has “been doing more to undermine his case than to bolster it,” because, “appearing Sunday on ABC’s This Week,” he “couldn’t answer a basic question: Would the law allow businesses to invoke religious beliefs to discriminate against gays? If the governor can’t answer that question with a resolute ‘no,’ then the law has big problems.”

The [Washington Post](#) (3/31, 5.17M) editorializes, “We won’t pretend that it’s easy sorting out disputes between devout Christian bakers and the gay couple that is refused a wedding cake,” but “red states are capable of having a productive discussion about this.” For example, “Utah just granted anti-discrimination protections in employment and housing to its LGBT citizens. ... That’s a much better example than the one Indiana has set over the past week.” In an editorial, meanwhile, the [Wall Street Journal](#) (3/31, Subscription Publication, 5.67M) turns the debate around, arguing the Indiana law does not foster discrimination. Rather, says the Journal, opponents are in fact discriminating against religion and religious Americans.

The [New York Times](#) (3/31, Subscription Publication, 9.97M) says in an editorial, “It is true that the law does not, as some opponents claim, specifically permit businesses to refuse to serve gays and lesbians. ... But nobody is fooled as to the law’s underlying purpose. As its most prominent backers have said quite clearly, it is meant to protect ‘Christian businesses and churches from those supporting homosexual marriages.’ In other words, it should allow them to refuse service to gay couples.” The Times writes, “Religion should not be allowed to serve as a cover for discrimination in the public sphere.”

Stephen Prothero, an author and professor of religion at Boston University, asks in [USA Today](#) (3/31, Prothero, 4.95M), “Is it really necessary to pin a scarlet letter on those who believe the Bible prohibits gay marriage? Or might we learn to be satisfied with preserving liberty for ourselves without imposing our ideals (on sex or religion) on others? ... Let’s not let culture warriors, on either side, sacrifice our freedoms on the altar of the culture wars.”

The [New York Times](#) (3/31, Eckholm, Subscription Publication, 9.97M) reports that “when the federal government adopted a religious protection act in 1993, same-sex marriage was not on the horizon.” Back then, “an informal coalition of liberals and conservatives endorsed the Religious Freedom Restoration Act because it seemed to protect members of vulnerable religious minorities from punishment for the exercise of their beliefs.” However, “over time, court decisions and conservative legal initiatives started to change the meaning of those laws, according to liberal activists,” and “the state laws were not used to protect minorities, these critics say, but to allow some religious groups to undermine the rights of women, gays and lesbians or other groups.”

The [Washington Post](#) (3/31, A1, Somashekhar, Berman, 5.17M) similarly indicates that “the new laws are...fundamentally different.” While the Federal law “protects only individuals seeking relief from government intrusions on their religious beliefs,” the Indiana law “and others like it also apply to disputes between private parties.”

The [Washington Times](#) (3/31, Wetzstein, 644K) similarly reports that while “traditional values groups defended...the religious-freedom laws...gay-rights groups and their allies have recast” them “as ‘religious bigotry.’” [Reuters](#) (3/31, Ortiz) notes, however, that despite the controversy Arkansas lawmakers indicated yesterday they would move forward with a similar law, even as legislative efforts appeared to stall in Georgia and North Carolina.

[KTHV-TV](#) (3/31, 4.95M) reported on its website that “the Arkansas House Judiciary Committee concurred with the state Senate on amendments to its ‘religious freedom’ bill Monday, despite protests at the Capitol.” The bill “is now headed for the full House, where it

could be voted on Tuesday afternoon. If passed there, Gov. Asa Hutchinson has said he will sign it into law." On its front page, meanwhile, the [Washington Post](#) (3/31, A1, Somashekhar, Berman, 5.17M) reports that Georgia "lawmakers canceled a hearing set for Monday morning on their version of the bill."

According to "some Democrats and political analysts," says the [Christian Science Monitor](#) (3/30, Suhay, 380K), the push for such bills "is not originating with voters, but rather conservative 'bill mills' that finance state legislators to attend educational conferences that may provide both unified ideas and prefabricated bills to take home." The Monitor adds that "specifically, they see The American Legislative Exchange Council (ALEC) as the primary driver of conservative state laws."

Indianapolis Star Runs A1 Editorial Denouncing Law. In a front-page editorial this morning, titled "Gov. Pence, Fix 'Religious Freedom' Law Now," the [Indianapolis Star](#) (3/31, A1, 593K) writes, "We are at a critical moment in Indiana's history. And much is at stake. Our image. Our reputation as a state that embraces people of diverse backgrounds and makes them feel welcome." Gov. Mike Pence and the General Assembly "need to enact a state law to prohibit discrimination in employment, housing, education and public accommodations on the basis of a person's sexual orientation or gender identity," provisions which "can co-exist" with the religious rights law.

Wilco Cancels Indianapolis Concert. The [Chicago Tribune](#) (3/31, Firozi, 2.32M) reports "Chicago-based band Wilco canceled its upcoming concert in Indianapolis after Indiana enacted a controversial religious freedom law last week."

GOP Presidential Hopefuls Come To Pence's Defense. The [Washington Times](#) (3/31, Richardson, 644K) reports "a throng of likely Republican presidential contenders came to" Pence's defense Monday, including Jeb Bush, Ben Carson, Ted Cruz, Bobby Jindal, Marco Rubio and Rick Santorum.

ONE DEAD AFTER SHOOTING AT NSA COMPOUND. [ABC World News](#) (3/30, lead story, 1:50, Muir, 5.84M) reported on the "deadly scene playing outside the gates of one of the most heavily guarded sites in the country, the NSA." According to authorities, "this was no terrorism, but it was worrying and deadly." ABC (Avila) described the "wild scene, played out in broad daylight," as "two men driving this stolen dark-colored SUV approached the main NSA entrance" and drove "past the first gate." At the point "NSA police in a patrol truck opened fire, killing one of the men, and critically injuring the second." The two had apparently "been on a joyride after allegedly stealing a car following a night of partying." The [Washington Post](#) (3/31, A1, Hedgpeth, Horwitz, Nakashima, 5.17M) notes "an NSA police officer also was hurt in the incident."

The [New York Times](#) (3/31, Shane, Cooper, Subscription Publication, 9.97M) reports that "a law enforcement official said both men were dressed as women, and identified the survivor as Kevin Fleming of nearby Baltimore." [AFP](#) (3/31) quotes NSA's director for strategic communications Jonathan Freed as saying, "The incident was contained to the vehicle control point." Amy Thoreson, a spokeswoman for the FBI's Baltimore office, stated, "The shooting scene is contained and we do not believe it is related to terrorism." The [Washington Times](#) (3/31, Noble, 644K) notes Thoreson added that "the FBI is working with the US Attorney's Office in Maryland to determine whether federal charges may be filed."

[NBC Nightly News](#) (3/30, story 2, 1:40, Mikaszewski, 7.86M) noted that "any attack on the NSA puts everyone on high alert," because "it's America's top spy agency, eavesdropping on potential enemies around the world." Running similar accounts of the incident this morning, among other news outlets, are the [Los Angeles Times](#) (3/31, Mai-Duc, 3.49M), [Reuters](#) (3/31, Hosenball), [Wall Street Journal](#) (3/31, Calvert, Subscription Publication, 5.67M) and [Huffington Post](#) (3/30, Jauregui, 281K).

Editorial Wrap-Up:

NEW YORK TIMES. "*In Indiana, Using Religion As A Cover For Bigotry.*" The [New York Times](#) (3/31, Subscription Publication, 9.97M) says in an editorial, "It is true that the law does not, as some opponents claim, specifically permit businesses to refuse to serve gays and lesbians. ... But nobody is fooled as to the law's underlying purpose. As its most prominent backers have said quite clearly, it is meant to protect 'Christian businesses and churches from those supporting homosexual marriages.' In other words, it should allow them to refuse service to gay couples." The Times writes, "Religion should not be allowed to serve as a cover for discrimination in the public sphere."

"Missing From New York's Budget." The [New York Times](#) (3/31, Subscription Publication, 9.97M) says in an editorial that "a lot of important items were missing" from the New York budget framework agreed to by Gov. Andrew Cuomo (D) and legislative leaders, such as a higher minimum wage, immigration reform, mayoral control of New York City schools, and campaign finance reform.

WASHINGTON POST. "*An Arab Military Force.*" In an editorial, the [Washington Post](#) (3/31, 5.17M) writes that the new Arab military force initiative is "as likely to compound as resolve the region's wars, and they ultimately may undermine U.S. interests." The Post notes that the force is "problematic" due to the fact that "Arab states are currently backing opposite sides. Egypt and the United Arab Emirates are supporting one of Libya's rival governments, while Qatar and non-Arab Turkey aid the other." The Post further warns of a "a regional war between Iran and Saudi Arabia and their allies — a conflict that flourishes in the vacuum created by U.S. retreat."

"Making Discrimination Easier." The [Washington Post](#) (3/31, 5.17M) editorializes, "We won't pretend that it's easy sorting out disputes between devout Christian bakers and the gay couple that is refused a wedding cake," but "red states are capable of having a productive discussion about this." For example, "Utah just granted anti-discrimination protections in employment and housing to its LGBT citizens. ... That's a much better example than the one Indiana has set over the past week."

"Strengthening Ethics Reform." The [Washington Post](#) (3/31, 5.17M) says in an editorial that Virginia legislators should accept amendments offered by Gov. Terry McAuliffe (D) to weak ethics reform legislation passed last month. The Post says McAuliffe's changes "do not go as far as we — or, for that matter, he — would like," but they are better than what the General Assembly has so far approved.

WALL STREET JOURNAL. "*The New Intolerance.*" In an editorial, the [Wall Street Journal](#) (3/31, Subscription Publication, 5.67M) turns the debate around, arguing the Indiana law does not foster discrimination. Rather, says the Journal, opponents are in fact discriminating against religion and religious Americans.

“The Little Bank That Could.” The [Wall Street Journal](#) (3/31, Journal, Subscription Publication, 5.67M) says in an editorial that just one new bank has opened in the US since the Dodd-Frank law took effect five years ago, a small rural Pennsylvania bank that has one employee devoted entirely to compliance. The Journal says the costs of Dodd-Frank are killing the community banking sector, and are ironically creating less competition for major financial institutions.

“Checking The IRS Overseas.” In an editorial, the [Wall Street Journal](#) (3/31, Subscription Publication, 5.67M) backs Sen. Rand Paul's efforts to repeal the 2010 Foreign Account Tax Compliance Act, which was intended to root out tax evaders hiding assets abroad, but which has resulted in complications for the 7.5 million Americans who live abroad. The law is also facing a court challenge over its constitutionality.

“Erdogan's Assault On Freedom.” In an editorial, the [Wall Street Journal](#) (3/31, Subscription Publication, 5.67M) criticizes new restrictions on assembly and speech passed by Turkish lawmakers on Friday, which allow police greater freedom in firing on and detaining protesters. The Journal says that despite Turkey's claim that such laws are necessary to prevent violence, they are deliberately crafted to allow even nonviolent protesters to be targeted. The editorial says that the new law, as well as a proposed bill to block certain websites for political views, are evidence that Turkish President Tayyip Erdogan and his Justice and Development Party are running a country that is a democracy in name only.

Location: The University Club, 1135 16th Street NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "There are reports that President Obama and his family may move to New York City after his term is over. Unfortunately, the city is so expensive, he's looking for another ex-president to be roommates with."

Jimmy Fallon: "President Obama and his family may move to New York City after his term is over. Apparently, they chose New York because they've gotten so used to people trying to break into their house."

Jimmy Fallon: "I saw that last week, Chris Christie defended his stance against legalizing marijuana, saying that any tax revenue generated from pot sales would be 'blood money.' Then, businessmen in New Jersey were like, 'Yeah, and we can't have that sort of thing here in New Jersey.'"

Seth Meyers: "You guys – during a speech on Friday, Senator Ted Cruz said that if you walk up to someone and say, 'Joe Biden,' the person will crack up laughing. Which is the same reaction you get if you say, 'President Ted Cruz.'"

Seth Meyers: "Congress has officially started their two-week spring recess. So, in a couple weeks they'll be rested, relaxed and ready to suck."

David Letterman: "I'm told now that we are very close to having a deal with Iran on its nuclear program. Iran will give all their nuclear materials to Vladimir Putin for safekeeping. What could possibly go wrong?"

Conan O'Brien: "The ex-governor of Maryland, Martin O'Malley, said, quote, 'The presidency of the United States is not some crown to be passed between two families.' Jeb Bush said, 'That's true. It should really just belong to one family. I think we should just keep it.'"

Secretary Jewell, Governor Ige, Senators Schatz and Hirono to Dedicate Honouliuli National Monument

O‘AHU, HI – On Tuesday, March 31, U.S. Secretary of the Interior Sally Jewell will join Hawaii Governor David Ige, U.S. Senators Brian Schatz and Mazie Hirono, state and local officials, Monsanto representatives and community leaders to dedicate the Honouliuli National Monument, the site of the largest internment camp in Hawai‘i for Japanese and European Americans and others during World War II.

President Obama [established the new monument](#), now a part of the National Park System, in February. Secretary Jewell visited the area in September 2013 to see the confinement site firsthand. She also heard from members of the community about how the National Park Service could play a role in preserving this difficult chapter in our nation’s history and sharing the importance of protecting civil liberties.

The program will feature remarks, traditional blessings, and an opportunity for a media interviews.

Event #1 – Dedication Ceremony

WHO:

Sally Jewell, Secretary of the Interior
David Ige, Governor, State of Hawaii
Brian Schatz, U.S. Senator
Mazie Hirono, U.S. Senator
Peggy O’Dell, Deputy Director for Operations, National Park Service
Carole Hayashino, President & Executive Director, Japanese Cultural Center of Hawaii
John Purcell, Hawaii Business and Technology Lead and Vice President, Monsanto

WHAT:

Dedication of Honouliuli National Monument

WHERE:

Royal Kunia Park and Ride lot
94-640 Kupuohi St
Waipahu, HI 96797

WHEN:

Tuesday, March 31, 2015
9:00 a.m. HST – Reporter check-in
9:15 a.m. HST – Reporter shuttle departs
11:30 a.m. HST – Reporter shuttle returns

MEDIA:

Due to space limitations, credentialed members of the media are required to [RSVP HERE](#) no later than 4:00 p.m. HST on Monday, March 30, 2015, in order to secure a seat on the press shuttle bus.

Event #2 – Community Celebration

WHO:

Sally Jewell, Secretary of the Interior
David Ige, Governor of Hawaii
Brian Schatz, U.S. Senator for Hawaii
Mazie Hirono, U.S. Senator for Hawaii
Peggy O'Dell, Deputy Director, National Park Service
Carole Hayashino, President & Executive Director, Japanese Cultural Center of Hawaii
John Purcell, Hawaii Business and Technology Lead and Vice President, Monsanto
Local community members

WHAT:

Community Celebration of Honouliuli National Monument

WHERE:

Japanese Cultural Center of Hawaii
Manoa Grand Ballroom (5th floor)
2454 S. Beretania Street
Honolulu, HI 96826

WHEN:

Tuesday, March 31, 2015
11:45 a.m. HST – Reporter check-in
12:00 p.m. HST – Community celebration

MEDIA:

Credentialed members of the media are encouraged to [RSVP HERE](#) no later than 4:00 p.m. HST on Monday, March 30, 2015.

Secretary Jewell, Governor Ige, Senators Schatz and Hirono to Dedicate Honouliuli National Monument

O'AHU, HI – On Tuesday, March 31, U.S. Secretary of the Interior Sally Jewell will join Hawaii Governor David Ige,

U.S. Senators Brian Schatz and Mazie Hirono, state and local officials, Monsanto representatives and community leaders to dedicate the Honouliuli National Monument, the site of the largest internment camp in Hawai'i for Japanese and European Americans and others during World War II.

President Obama [established the new monument](#), now a part of the National Park System, in February. Secretary Jewell visited the area in September 2013 to see the confinement site firsthand. She also heard from members of the community about how the National Park Service could play a role in preserving this difficult chapter in our nation's history and sharing the importance of protecting civil liberties.

The program will feature remarks, traditional blessings, and an opportunity for a media interviews after the event.

Event #1 – Dedication Ceremony

Who: **Sally Jewell**, Secretary of the Interior
David Ige, Governor, State of Hawaii
Brian Schatz, U.S. Senator
Mazie Hirono, U.S. Senator

Peggy O'Dell, Deputy Director for Operations, National Park Service
Carole Hayashino, President & Executive Director, Japanese Cultural Center of Hawaii
John Purcell, Hawaii Business and Technology Lead and Vice President, Monsanto

What: Dedication of Honouliuli National Monument

When: Tuesday, March 31, 2015
9:00 a.m. HST – Reporter check-in
9:15 a.m. HST – Reporter shuttle departs
11:30 a.m. HST – Reporter shuttle returns

Where: Royal Kunia Park and Ride lot
94-640 Kupuohi St
Waipahu, HI 96797

Media: Due to space limitations, credentialed members of the media are required to [RSVP HERE](#) no later than 4:00 p.m. HST on Monday, March 30, 2015, in order to secure a seat on the press shuttle bus.

Event #2 – Community Celebration

Who: **Sally Jewell**, Secretary of the Interior
David Ige, Governor of Hawaii

Brian Schatz, U.S. Senator for Hawaii
Mazie Hirono, U.S. Senator for Hawaii
Peggy O'Dell, Deputy Director, National Park Service
Carole Hayashino, President & Executive Director, Japanese Cultural Center of Hawaii

Alan Takemoto, Monsanto
Local community members

What: Community Celebration of Honouliuli National Monument

When: Tuesday, March 31, 2015
11:45 a.m. HST – Reporter check-in
12:00 p.m. HST – Community celebration

Where: Japanese Cultural Center of Hawaii

Manoa Grand Ballroom (5th floor)
2454 S. Beretania Street
Honolulu, HI 96826

Media: Credentialed members of the media are encouraged to [RSVP HERE](#) no later than 9:00 a.m. HST on Tuesday, March 31, 2015.

DOI in the News:

SAGE GROUSE CONSERVATION DEAL WITH OREGON RANCHERS CELEBRATED. The [AP](#) (3/29) reports that "the Obama administration and Gov. Kate Brown joined with Oregon ranchers to celebrate agreements they all hope will help keep the sage grouse off the endangered species list." The deals "announced Friday in Bend, Oregon, give ranchers incentives to protect sage grouse and their habitat on 5,500 square miles of private land in central and southeastern Oregon." Interior Secretary Sally Jewell, the governor, and Agriculture Deputy Undersecretary Ann Mills "praised the spirit of cooperation the agreements represent, and expressed their hopes that both sage grouse and family ranches would thrive."

The [Summit County \(CO\) Citizens Voice](#) (3/29, 506) reports that Jewell said, "These voluntary agreements establish a collaborative

partnership to ensure the conservation of the greater sage-grouse and sustain working western rangelands. The agreements in Oregon are more evidence that we can work together to provide regulatory certainty for ranchers and other westerners who rely on sagebrush habitat for their livelihoods, and also take important steps to protect the hundreds of species that rely on these landscapes.” The [Bend \(OR\) Bulletin](#) (3/29, 94K) reports that Jewell said, “I want to thank Oregon for being a leader.”

Also providing coverage are the [Casper \(WY\) Star-Tribune](#) (3/29, 90K), the [Clark County \(WA\) Columbian](#) (3/27, 110K), the [Salem \(OR\) Statesman Journal](#) (3/27, 36K), the [Yakima \(WA\) Herald-Republic](#) (3/29, 86K), [Reuters](#) (3/27), [My Central Oregon](#) (3/27), the [EIN News](#) (3/29, 1K), and [KTVZ-TV](#) Bend, OR (3/29, 4K).

CONTINUING COVERAGE OF NEW FRACKING RULE. The [Environment & Energy Publishing](#) (3/29, Subscription Publication, 705) reports that “an anticipated cascade of litigation targeting the Obama administration’s new drilling rule gained speed yesterday as a Wyoming lawsuit became the second legal challenge on court dockets so far.” Wyoming’s suit accuses the BLM of “abusing its power in crafting new requirements for fracking and drilling on public and American Indian lands.” The action “joins an industry lawsuit filed minutes after the rule’s unveiling in kicking off what is likely to be a protracted legal battle over the controversial regulatory scheme.”

In an op-ed for the [Bismarck \(ND\) Tribune](#) (3/29, 32K), Jillian Melchior, an energy fellow at the Independent Women’s Forum, writes that the “redundant rules leave American Indians at a competitive disadvantage, quashing a huge opportunity for economic growth.” She claims that the “new fracking regulations make it harder for American Indians to compete and to have their shot at the American dream.”

The [Houston Chronicle](#) (3/27, Copyright 2015:, Chronicle, 2.28M) editorializes that “the real appeal is demonstrating to the greater public that fracking can and will be done safely.” BLM Director Neil Kornze has said that “these rules are intended to provide ‘greater confidence that we are, in fact, protecting groundwater.’” The paper asserts that “we have to make sure that confidence doesn’t end at our borders.”

Also providing coverage are [The Hill](#) (3/28, Cama, 224K), the [Fort Smith \(AR\) Times Record](#) (3/29, 105K) and the [Huffington Post](#) (3/27, |, Levitan, 281K)

SECRETARY JEWELL TO SPEAK ON NATIONAL PARKS AT BERKELEY. The [Imperial Valley \(CA\) News](#) (3/30, 1K) reports that “on Thursday, March 26, the Horace M. Albright Lecture on Conservation will feature U.S. Interior Secretary Sally Jewell, UC President Janet Napolitano, historian and author Douglas Brinkley and Berkeley Chancellor Nicholas Dirks.”

TESTER URGES CANCELLATION OF OIL, GAS LEASES NEAR BLACKFEET RESERVATION. The [Flathead \(MT\) Beacon](#) (3/29, 15K) reports that Sen. Jon Tester “joined the Blackfeet Nation Friday in calling on the federal government to protect the Badger-Two Medicine area from private industrialization, adding his voice to an unprecedented alliance of American Indian tribal nations urging the government to cancel existing oil and gas leases in the pristine region.” Tester “sent a letter to Interior Secretary Sally Jewell and Agriculture Secretary Tom Vilsack urging them to rescind the energy leases in the Badger-Two Medicine, which is sacred to the Blackfeet Tribe and one of the Montana’s most pristine outdoor areas.” He wrote, “This area has unique cultural, historical, spiritual, and recreational significance to the people of the Blackfeet Nation and Montana. I request that the remaining oil and gas leases in the Badger-Two Medicine be cancelled to prevent adverse effects to the land or the people of the region.”

Also reporting on the story is [The Missoulian \(MT\)](#) (3/29, 113K).

SENATE VOTES ON FEDERAL LAND TRANSFER AMENDMENT. The [Helena \(MT\) Independent Record](#) (3/29, 38K) reports that Sen. Steve Daines “came under fire from conservation groups and outdoor-related business interests Friday after his vote for an amendment critics say is a first step to federal land transfer or sale.” The amendment, brought by Sen. Lisa Murkowski, “to the U.S. Senate budget resolution, authorizes the Senate to create a fund relating to any legislative action that results in transfers, sales or exchanges of federal lands with states or local governments.”

INTERIOR’S INSTAGRAM PHOTOS HIGHLIGHTED. The [Daily Mail \(UK\)](#) (3/29, 4.78M) highlights photos shared by the Interior Department on Instagram.

ADDITIONAL COVERAGE OF HONOLULI NATIONAL MONUMENT DESIGNATION. Additional coverage of the designation of the Honouliuli National Monument was provided by the [Honolulu Star-Advertiser](#) (3/29, 360K) and the [4-Traders](#) (3/29, 6K).

ADDITIONAL COVERAGE OF SECRETARY’S JEWELL’S PENDING DECISION ON SHELL’S DRILLING IN ARCTIC. Additional coverage of Interior Secretary Sally Jewell’s pending decision on Shell’s drilling in the Arctic was provided by [The Telegraph \(UK\)](#) (3/29, 807K), the [Seattle Post-Intelligencer](#) (3/27, 612K), the [Arctic Journal \(GRL\)](#) (3/29), the [Seattle Stranger](#) (3/27, 162K) [Juneau \(AK\) Empire](#) (3/30, 14K), and the [Puget Sound \(WA\) Business Journal](#) (3/26, Aitchison, Subscription Publication, 48K).

ADDITIONAL COVERAGE: FEDERAL AGENCIES RENEW FIVE-YEAR PARTNERSHIP TO ADVANCE HYDROPOWER. Additional coverage that “the U.S. Department of Energy, U.S. Department of the Interior and U.S. Department of the Army for Civil Works...have extended their partnership to advance hydropower development for an additional five year” was provided by the [Breaking Energy](#) (3/27).

PROPOSAL TO REFORM COAL LEASING SUPPORTED. In an op-ed for the [Salt Lake \(UT\) Tribune](#) (3/29, 405K), Jack Thomas, mayor of Park City, writes that “Interior has put forth a proposal to address some of these loopholes and begin reforming the federal coal program.” He supports Interior Secretary Sally Jewell’s statement that “now is the ‘time for an honest and open conversation’ about reforming the federal coal program and ensuring the correct royalty rate is given to taxpayers.” Thomas writes that “mountain communities across the West are looking to the future with trepidation, yet Interior has the power to ease the economic and environmental burden facing towns like Park City.”

MONTANA’S SENATORS URGED TO SUPPORT LAND AND WATER CONSERVATION FUND . In an op-ed for the [Bozeman \(MT\) Daily Chronicle](#) (3/28, 54K), Becky Edwards urges Montana’s Senators to support the Land and Water Conservation Fund

NYTIMES: DENIAL OF CLIMATE CHANGE HAMPERS DISASTER PLANNING. In an editorial, the [New York Times](#) (3/29, Board,

Subscription Publication, 9.97M) says planning for natural disasters “is hampered by politicians who deny the every existence of changes in the climate.”

America’s Great Outdoors:

National Park Service:

NPS LAUNCHING “FIND YOUR PARK” CAMPAIGN. The [AP](#) (3/30, Zongker) reports “after nearly 100 years, the National Park Service holds some of the most beautiful and historic places in the country, though there’s also an \$11 billion backlog of unfunded maintenance and a visitor base that’s aging and mostly white.” Now, “with its centennial approaching in 2016, the park service will launch a major campaign Thursday in New York City to raise support and introduce a new, more diverse generation of millennials and children to ‘America’s best idea’ the national parks.” The article notes that “First lady Michelle Obama and former first lady Laura Bush will co-chair the campaign, calling on Americans to ‘Find Your Park’ to enjoy their public lands.”

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (3/30, Zongker, 2.28M), the [Daily Mail \(UK\)](#) (3/30, 4.78M), the [Washington \(DC\) Post](#) (3/30, Brett Zongker |, Ap, 5.17M), the [U-T San Diego \(CA\)](#) (3/30, 580K), the [US News & World Report](#) (3/30, 685K), the [Minneapolis \(MN\) Star Tribune](#) (3/30, Zongker, 1.37M), and [Yahoo! News](#) (3/30, Zongker, 5.81M).

GREATER NAPLES YMCA CREATES CAMP WYHOWAY WITH BIG CYPRESS NATIONAL PRESERVE. [WINK-TV](#) Fort Myers, FL (3/27, 4K) reports that “the Greater Naples YMCA is embracing a new youth program focused around Florida’s national parks.” YMCA has “partnered with the Big Cypress National Preserve to create Camp Wyhoway.” J.D. Lee with the Big Cypress National Preserve said, “Some of the activities that we offer are educational walks, canoeing, we offer swamp buggy rides, we offer airboat rides.”

Also reporting on the story is the [Naples Herald](#) (3/28).

SECRET SERVICE TESTING WHITE HOUSE FENCE MODIFICATIONS. The [New York Times](#) (3/29, Schmidt, Shear, Subscription Publication, 9.97M) reports on how recent security breaches at the White House have prompted the Secret Service to look for a fence that is relatively “foolproof,” yet retains “curb appeal.” The agency “has conducted dozens of tests on possible modifications to the White House fence.” The effort includes the recruitment of “some of the agency’s best athletes — including tall, short, hefty and thin volunteers — to serve as pretend fence jumpers at a rural training ground outside Washington.”

TULE SPRINGS FOSSIL BEDS NATIONAL MONUMENT TO BE TRANSFERRED TO NPS. The [Las Vegas Review-Journal](#) (3/29, 398K) reports that Tule Springs Fossil Beds National Monument’s first superintendent is Vincent Santucci, but his assignment is slated to last just 90 days. During that time, Santucci hopes to oversee the transfer of the property from the BLM to the NPS.

STUDY ANALYZES ECONOMIC IMPACT OF NEW NATIONAL PARK IN MAINE. The [Bangor \(ME\) Daily News](#) (3/27, 166K) reports that “Bangor has entered the debate over a new national park in Maine’s North Woods and, from the economic analyses, it’s a no-brainer for the city.” However, “the upside is not so clear for other cities and towns that don’t have Bangor’s economic base, rooted in growing health care employment.” The article notes that “in a review of past research from a range of Maine economists, a 2013 two-part study by Headwaters Economics, and commissioned by Roxanne Quimby’s land-holdings company Elliottsville Plantation Inc., posited the economic benefits of a national park, which it noted would come most immediately for Bangor.”

Millinocket Council Rejects Holding Public Vote On National Park. The [Bangor \(ME\) Daily News](#) (3/27, 166K) reports that Millinocket “voters won’t get the chance to tell the Town Council in June whether they support the proposed 150,000-acre North Woods national park and recreation area.” According to the article, “councilors on Thursday debated placing on a ballot for the annual school budget referendum in June a question asking voters whether they support Lucas St. Clair’s proposed gift to the National Park Service.” The council “voted 6-1 against the notion as suggested by Councilor Michael Madore, an outspoken park critic.”

EVENTS SET TO MARK THE 1865 FALL OF RICHMOND. The [AP](#) (3/28, Press, 5.17M) reports that “events are scheduled for April to commemorate the 1865 fall of Richmond.” According to officials, “the four-day commemoration beginning Wednesday will feature special illuminations, programs and tours of the city’s historic areas.” The article notes that “the events are being sponsored by a collaborative effort of historical societies, museums, national parks, tourism offices, commissions and cultural organizations.”

Additional coverage was provided by the [Richmond \(VA\) Times-Dispatch](#) (3/29, 322K), the [Richmond \(VA\) Times-Dispatch](#) (3/29, 322K), and the [Washington Post](#) (3/27, Kennicott, 5.17M).

YOSEMITE’S GLACIER POINT ROAD OPENS EARLY IN SEASON. The [AP](#) (3/29, 2.28M) reports that “a road leading to spectacular views of California’s Yosemite National Park opened to drivers on Saturday, marking the earliest date for the occasion in at least 20 years.” Glacier Point Road “takes drivers to a lookout perched at 3, 214 feet above the valley floor, where visitors can view spectacles such as the Half Dome rock, Yosemite Falls and Yosemite’s high country.” The article notes that “this year’s March 28 opening is the earliest listed in records dating back to 1995 published on the park’s website.”

The [Los Angeles \(CA\) Times](#) (3/29, Sahagun, 3.49M) reports that “Yosemite National Park is bracing for its driest year on record, with visitor bureaus downplaying the allure of the park’s most famous waterfall and instead touting the park as a destination for hiking, bicycling and photography.” According to park officials, “Yosemite Falls will probably go dry in June — two months earlier than usual.” The article also notes that “with the drought enabling western pine bark beetles to kill large swaths of forest, the park is preparing for a bad fire season.”

Also providing coverage are the [Los Angeles \(CA\) Times](#) (3/29, Forgione, 3.49M).

ROCKY MOUNTAIN NATIONAL PARK TO ALLOW MOUNTAIN BIKES. The [AP](#) (3/29, 2.28M) reports that “mountain biking in Rocky Mountain National Park is close to reality.” The NPS has “finalized a report that allows mountain biking on a 2-mile stretch of trail on the park’s west side near Grand Lake.”

Additional coverage was provided by the [Denver \(CO\) Post](#) (3/29, Press, 804K) and [The Greeley \(CO\) Tribune](#) (3/29, 76K).

NPS SURVEYS NASHVILLE TOLL BRIDGE. The [Tennessean](#) (3/28, 406K) reports that “continued interest in the history of the Nashville Toll Bridge, built in 1823, brought a team from the National Park Service to do a photographic survey, which was completed Saturday.” The article notes that “the bridge was recently designated as a certified site on the Trail of Tears National Historic Trail used by the Cherokee.” Also, there is “interest in the bridge’s relevance to early American engineering and bridge building and its designer Lewis Wernwag, known for a number of important bridges during the time period.”

NPS TO PLANT CHERRY TREES FOR ANACOSTIA FESTIVAL. The [Washington Post](#) (3/29, Polus, 5.17M) reports that “in keeping with this year’s theme of ‘celebrating the natural world,’ the National Cherry Blossom Festival is teaming with the National Park Service to host an event in Anacostia Park that will show off the park’s assets.” The NPS will “plant a small grove of cherry trees for the Anacostia festival, with the goal of extending the cherry blossoms farther beyond the Tidal Basin and raising awareness of a threatened but critical local waterway.” The article notes that “the river festival marks the official closing of this year’s Cherry Blossom Festival.”

JOSHUA TREE’S BARKER DAM RESTORED AFTER YEARS OF GRAFFITI. The [Palm Springs \(CA\) Desert Sun](#) (3/29, 85K) reports that “restoration experts from New Mexico and Vermont took paintbrushes to the concrete face of Barker Dam in Joshua Tree National Park last week, giving the historical landmark a facelift after years of vandalism.” The article notes that “their goal wasn’t to obliterate the scratched graffiti entirely” because “that would have involved damaging Barker Dam’s intricate texture, which still shows imprints of wood grain and corrugated metal from its construction, as well as old water lines.” Instead, according to the article, “the conservators settled on a different strategy: ‘inpainting,’ which involves dabbing the scratched areas with paint in an effort to recreate the natural color and texture of the dam.”

BILL WOULD RENAME WILDERNESS AREA IN LAKE CLARK NATIONAL PARK AND PRESERVE . The [AP](#) (3/27, 2.28M) reports that “Alaska’s U.S. senators have introduced legislation to rename a wilderness area after the late former Gov. Jay Hammond.” The legislation, from Sens. Lisa Murkowski and Dan Sullivan, would “name 2.6 million acres of wilderness in Lake Clark National Park and Preserve as the Jay S. Hammond Wilderness Area.”

RESTAURANT AT BIG ISLAND’S VOLCANO HOUSE TO REOPEN IN STAGES AFTER FIRE. The [Los Angeles Times](#) (3/27, Jones, 3.49M) reports that “the main restaurant at a historic Big Island hotel in Hawaii Volcanoes National Park is expected to reopen in stages after a fire Tuesday that injured an employee.”

YELLOWSTONE SPOKESMAN LEAVING AFTER NINE YEARS. The [Yellowstone \(WY\) Gate](#) (3/30) reports that “Al Nash has left the National Park Service after 9 years as the spokesman for Yellowstone National Park.” Nash, “the chief of public affairs for Yellowstone since 2006, reflected on nearly a decade in that role just before his last day on the job March 18.” The article notes that “the last nine years have seen sweeping changes in how the public finds and shares information about everything, including national parks.”

NEW YORK OFFICIALS MAKE RECOMMENDATIONS FOR NATIONAL REGISTER OF HISTORIC PLACES. The [New York Times](#) (3/30, Foderaro, Subscription Publication, 9.97M) reports that New York officials have recommended the addition of the Skinny House, “along with 21 other properties and districts, to the National Register of Historic Places.”

ADDITIONAL COVERAGE OF PROPOSAL TO DEPLOY BORDER COLLIES AT NATIONAL MALL. Additional coverage of the proposal to deploy Border collies at the National Mall was provided by the [National Review](#) (3/29, 633K).

ADDITIONAL COVERAGE OF PREPARATIONS FOR MANHATTAN PROJECT NATIONAL PARK. Additional coverage of the planning for the Manhattan Project National Park was provided by the [Oak Ridge \(TN\) Today](#) (3/27).

REPAIRS AT NATIONAL PARKS URGED. The [Arizona Republic](#) (3/27, 1.14M) editorializes that “there is a \$11.5 billion backlog of deferred maintenance at our parks.” The paper asserts that “we have a responsibility to take care of the parks so the next generation can also enjoy and be inspired by them.”

In an editorial, the [Loveland \(CO\) Reporter-Herald](#) (3/30, 51K) argues that “the national debt means we cannot merely borrow our way out of this problem.” It says that “a good chunk of the solution will have to come from users.”

NPS URGED TO LET ARIZONA HUNTERS DEAL WITH BISON PROBLEM. In an op-ed for the [Arizona Republic](#) (3/29, 1.14M), Sen. John McCain and Rep. Paul Gosar note that “nearly 600 unwanted bison have migrated into Grand Canyon National Park, causing environmental damage.” The NPS “plans to hire sharpshooters to cull the herd.” Instead, they argue that “Arizona hunters should be allowed to take bison and keep the meat.”

Bureau of Land Management:

KINGMAN FARMS OWNER FACING PROBE AMID BLM LAND SWAP DEAL. The [AP](#) (3/30) reports that “a proposed land exchange in the Red Lake area between Las Vegas developer Jim Rhodes and the Bureau of Land Management may be in trouble.” The BLM is “investigating a possible trespassing violation against Rhodes.”

DEADLINE FOR AGUA CALIENTE TRIBAL LAND SWAP COMMENTS APPROACHING. The [Palm Springs \(CA\) Desert Sun](#) (3/27, 85K) reports that the comments on a possible land exchange between the federal government and the Agua Caliente Band of Cahuilla Indians is will be accepted until the end of Sunday.

Fish and Wildlife Service:

TRIBES RECEIVE GRANTS FOR CONSERVATION WORK. The [AP](#) (3/29, 81K) reports that the FWS has “awarded \$4.2 million in grants to Native American tribes in 13 states for conservation projects.” The funds will “support 22 projects benefiting wildlife and habitat.” The article notes that “projects are in Alaska, Arizona, California, Colorado, Florida, Maine, Minnesota, New York, North Carolina, Oregon, South Dakota, Washington and Wisconsin.”

Also providing coverage are the [Franklin \(IN\) Daily Journal](#) (3/29, 51K), the [Houston \(TX\) Chronicle](#) (3/29, 2.28M), and the [Hendersonville \(NC\) Times-News](#) (3/27, 34K).

FEDERAL STUDY LISTS SPECIES TO BE IMPACTED BY CLIMATE CHANGE. The [AP](#) (3/30) reported that a Federal study concluded that some species of birds in northwest Alaska “could benefit from climate change but increased temperatures could harm populations of several mammals.”

FWS REVIEWING APPLICATION TO BRING RESCUED BEAR TO US. [NPR](#) (3/27, 1.58M) reports that Cholita, an Andean bespectacled bear, was “rescued from a circus in Peru after suffering from abuse. Animal Defenders International is now attempting to take Cholita to the U.S.” but “it is still waiting for approval from the U.S. Fish and Wildlife Service.” FWS authorities said that “they received the application and are processing it in order to expedite the request.”

PLANS TO STOCK ATLANTIC SALMON IN LAKE OAHE DELAYED. The [AP](#) (3/27, 2.28M) reports that “anglers will have to wait a little longer for a chance to catch Atlantic salmon in Lake Oahe.” South Dakota wildlife officials had “wanted to stock the first batch of the new species in the Missouri River reservoir in the Dakotas in the spring of 2016, but a deal to get eggs from a federal hatchery in New Hampshire has fallen through.” The FWS “facility in New Hampshire was working on a contract with an electric company that was restoring an Atlantic salmon population decimated by a hydroelectric dam, and that contract wasn’t renewed, said Will Saylor, administrator of the South Dakota Game, Fish and Parks Department’s fisheries program.”

FWS PLANS STURGEON SPAWNING SITES. The [New Jersey Herald](#) (3/29, 39K) reports that “since 2003, the federal government has spent \$10 million to create six sturgeon spawning sites in the Detroit and St. Clair rivers, and two more are planned.” The FWS has “taken the lead with help from the Ohio Department of Natural Resources, Toledo Zoo and nonprofit conservation organization Lake Erie Waterkeeper.”

MAN FACING TRIAL OVER CLAIM HE PULLED PISTOL ON FEDERAL AGENT. The [Sacramento \(CA\) Bee](#) (3/29, 547K) reports that Andrew Watkins has been “charged with assaulting a federal officer with a deadly weapon, a felony that could net him 20 years in prison and a fine of up to \$250,000.” The officer was FWS Special Agent Sean Mann, “who was investigating reports of vernal pool damage in violation of the federal Endangered Species Act.”

ADDITIONAL COVERAGE: FWS APPROVES APPLICATION TO IMPORT ENDANGERED RHINO’S HEAD. Additional coverage of the approval to import rhino trophies was provided by the [Houston Chronicle](#) (3/27, Copyright 2015., Chronicle, 2.28M) the [Dallas \(TX\) Morning News](#) (3/26, 1.13M), the [National Geographic](#) (3/29, 32.58M) , [US News & World Report](#) (3/27, 685K), [Yahoo! News](#) (3/27, 5.81M), [BBC News](#) (3/29, 1.66M), [The Guardian \(UK\)](#) (3/27, 2.74M), and [The Telegraph \(UK\)](#) (3/29, 807K)

MICHIGAN POLICYMAKERS CRITICIZED ON WOLF ISSUE. In an op-ed for the [Macomb County \(MI\) Advisor and Source Newspapers](#) (3/29, 155K), Jill Fritz, the director of Keep Michigan Wolves Protected, writes that “after being given a do-over on managing the state’s small wolf population, Michigan politicians and bureaucrats are following a familiar path of reckless behavior with their effort to restore trophy hunting of the now-endangered animals.” She offers “a pathway forward and a middle-ground on this controversial issue.” Fritz notes that “The Humane Society of the United States and 21 other animal protection and conservation groups, including the Detroit Zoo and Detroit Audubon Society, have petitioned the U.S. Fish and Wildlife Service to ‘downlist’ gray wolves from endangered to threatened.” According to Fritz, “this would retain federal protections for wolves, but also provide more flexible management so wildlife officials could kill or remove the occasional problem wolf.”

OP-ED TOUTS REMOVAL OF DAMS WEST FORK RIVER. In an op-ed for the [Clarksburg \(WV\) Exponent-Telegram](#) (3/29, 42K) , John Schmidt, a project leader with the FWS, and Frank Jernejcic, a retired fishery biologist with West Virginia Division of Natural Resources, write that “the Clarksburg Water Board’s approval Monday to remove three dams in the West Fork River is a decision that will benefit both people and wildlife in the river’s surrounding communities of Harrison County, West Virginia.” They write that “our goal in removing the dams is to preserve our national heritage and legacy of abundant fish and wildlife, with places for families to experience nature, enjoy waterways and go fishing.”

US Geological Survey:

RESEARCHERS EXAMINE STRESSES AT SAN ANDREAS FAULT. The [San Jose \(CA\) Mercury News](#) (3/29, 936K) reports that “by studying quartz samples collected a mile-and-a-half beneath the San Andreas Fault, a small team at Lawrence Berkeley Lab is examining earthquake-causing stresses at a nearly atomic level, allowing scientists a closer look at the process behind quakes than ever before.” The article notes that “the findings are of interest to the U.S. Geological Survey, which recently raised the odds of a 7.0 magnitude or higher quake hitting the Bay Area to 51 percent in the next 30 years, with San Andreas branches, the Hayward and Calaveras faults overdue for a major quake.” Pasadena USGS research geologist Kate Scharer said, “The hazard posed by the San Andreas is very high for the simple fact that it’s the fastest-moving fault we have, so it has the best odds of producing the next quake. The faults (cause) a magnitude 6.5 or higher earthquake every 100 or so years. We’ve come to the average interval.”

Securing America’s Energy Future:

Renewable Energy:

WIND POWER ADVOCATES QUESTION NEW JERSEY’S COMMITMENT TO WIND POWER. The [Washington Post](#) (3/30, A1, Warrick, 5.17M) reports that New Jersey’s lack of progress on wind energy development is “the subject of intense debate here.” According to the article, “some blame the governor, whose enthusiasm for wind energy appeared to flag around the time he began exploring a run for the Republican presidential nomination.” Political opponents claim “the turning point was a series of meetings in 2011 and 2012 with key Republican donors, including billionaire brothers Charles and David Koch, oil-industry magnates who have bankrolled campaigns against renewable energy.” Meanwhile, the Obama Administration has “aggressively promoted wind and solar energy as part of its larger effort to reduce carbon emissions.” Interior Secretary Sally Jewell said in an interview, “The technology is proven, and the economics will prove themselves over time.”

SMALL PILOT WIND PROJECTS TO IMPROVE ACCEPTANCE. Derrick Jackson wrote in his [Boston Globe](#) (3/28, Jackson, 1.03M) column that the failed Cape Wind project was “paralyzed by selfish and powerful people who feared the views from their seaside mansions would be ruined.” However, several nascent efforts are now underway to help offshore wind to gain broad-based acceptance. Deepwater Wind recently secured financing for a 5-turbine, 30-megawatt pilot project will allow people to “see it, feel it, touch it, and take offshore wind from theory to reality.” The Administration supports similarly sized pilot projects. Jackson is optimistic about recent cooperation between Massachusetts, Connecticut and Rhode Island.

Onshore Energy Development:

COLORADO DRILLING PLAN RELEASED. The [AP](#) (3/27, Elliott, 2.28M) reports that “a federal government plan for drilling in energy-rich northwestern Colorado released Friday includes stepped-up protections for public land near Dinosaur National Monument.” The article notes that “the proposal would also ease limits on what time of year drilling rigs can operate if energy companies consolidate well sites to minimize environmental disruptions.” The proposal “covers nearly 2,700 square miles of federal land in Rio Blanco County and parts of Moffat and Garfield counties” in the BLM’s White River district.

Also providing coverage are the [Denver Post](#) (3/29, Elliott, 804K) and the [Longview \(TX\) News-Journal](#) (3/29, 64K).

Offshore Energy Development:

CONTINUING COVERAGE OF OFFSHORE DRILLING PROPOSAL. The [Hampton Roads \(VA\) Virginian-Pilot](#) (3/29, 405K) reports that the Virginia Beach Restaurant Association has “come out against drilling for oil and gas off the coast, joining what appears to be a growing opposition in Atlantic coastal communities.” In a recent letter to the BOEM, it argued that “an oil spill could jeopardize the city’s tourism industry”.

In an op-ed for the [Hampton Roads \(VA\) Virginian-Pilot](#) (3/29, 405K), Cynthia Sarthou, executive director of the Gulf Restoration Network, warns about “the devastation a massive offshore oil spill can cause to coastal environments and communities.” She also writes that “while people on the Atlantic should be worried about a major catastrophe like the BP spill, the effects of drilling will be felt even if everything proceeds according to the oil and gas industry’s plans.” Sarthou adds that “residents of the Atlantic coast should likewise be aware of the industry’s terrible track record of cleanup and safety procedures.”

In an op-ed for the [Annapolis \(MD\) Capital Gazette](#) (3/29, 5K), Matt Rutherford, the founder and executive director of the Ocean Research Project, opposes offshore drilling. He argues that “moving forward with this plan would threaten our region’s natural beauty and marine life.” He also warns that “an oil spill off the coast of Virginia and near the mouth of the Chesapeake could potentially throw off the entire migration of these marine species, disturbing the balance of the bay.”

The [Carteret County \(NC\) News-Times](#) (3/30, 28K) editorializes that “offshore seismic testing for oil and gas, and if anything is found, possible drilling, is a scary prospect we should avoid.”

Additional coverage was provided by the [Columbia \(SC\) State](#) (3/29, 291K), the [Columbia \(SC\) State](#) (3/29, 291K), the [Surf City \(NJ\) Sandpaper](#) (3/29) and [Offshore Magazine](#) (3/29, 129K).

US URGED TO PURSUE ARCTIC DEVELOPMENT. The [Anchorage \(AK\) Dispatch News](#) (3/27, 146K) reports that “the United States should move swiftly to harness the tremendous oil and gas reserves locked under its Arctic waters while the industry improves the equipment used to drill wells and sop up spills, according to a government advisory committee report released Friday.” The report, “conducted by the National Petroleum Council at the request of Energy Secretary Ernest Moniz, makes the case for the United States to aggressively develop Arctic oil and gas that can help supply the country with energy long after production tails off from onshore fields.”

Also reporting on the story is the [Argus Media](#) (3/29).

Tackling America’s Water Challenges:

FEDERAL FUNDING LACKING FOR RURAL WATER PROJECTS. The [AP](#) (3/30, 988K) reports that “during the widespread drought, officials are struggling to finish large-scale water infrastructure projects while populations are growing, drinking water resources are dwindling, and federal dollars are diminishing.” The article notes that “the federal government is responsible for paying about \$3 billion to complete several rural water projects around the country,” but “the amount — expected to grow by the time the work is done — represents a fraction of the more than \$600 billion needed to address the nation’s water and wastewater needs over the next 20 years.” The BOR has “about \$36 million for rural water projects for the next fiscal year,” and “in its most recent analysis, the agency estimates the projects could be completed by 2029 with a total federal investment of about \$3 billion.”

The [AP](#) (3/30, 3.41M) reports that the BOR has “\$36 million to spend on projects during the next fiscal year — a fraction of the funds needed for the work.” The article provides “a look at the projects and current allocations.”

LAWMAKERS WANT MORE WATER TO NEW MELONES RESERVOIR. The [Turlock \(CA\) City News](#) (3/29) reports that “U.S. Representatives Jeff Denham (R-Turlock) and Tom McClintock (R-Elk Grove) released a letter to key regional federal regulators calling on them to revise plans and take actions to prevent water releases that threaten to leave New Melones reservoir dry this coming summer.” Recently, the BOR “announced initial 2015 water supply allocations for the Central Valley Project (CVP) based on a ‘conservative estimate’ of the amount of water that will be available for delivery to CVP water users; these allocations will be re-examined on a monthly basis, taking into consideration a variety of factors, according to the Bureau.” The article notes that “the letter regarding the matter from Denham and McClintock was addressed to senior officials at the U.S. Fish & Wildlife Service, the U.S. Bureau of Reclamation, and the National Oceanic & Atmospheric Administration, requested that the agencies meet immediately and enter emergency consultation proceedings.”

BOR PROVIDES UPDATED WATER SUPPLY INFORMATION. The [Red Bluff \(CA\) Daily News](#) (3/28, 578) reports that the BOR says

that, “due to continued dry conditions, the initial 2015 water supply allocation released on Feb. 27 for Central Valley Project agricultural contractors and municipal and industrial contractors remains unchanged.” Mid-Pacific Regional Director David Murillo said, “When we announced the initial allocation, we committed to providing regular water supply updates, recognizing the severe impacts of this fourth year of drought on our water users. We continue to work closely with our customers, contractors and federal and state partners to do everything possible to deliver the maximum amount of CVP water, including the 3.1 million acre-feet of CVP water already announced for allocation to our senior water contractors and urban water users last month.”

CALIFORNIA GOV. BROWN SIGNS \$1 BILLION EMERGENCY DROUGHT PACKAGE. [Reuters](#) (3/27) reports that California Governor Jerry Brown signed emergency legislation on Friday that fast-tracks over \$1 billion in funding for drought relief and water infrastructure. Brown said, “This funding is just one piece of a much larger effort to help those most impacted by the drought and prepare the state for an uncertain future. Rain is not in the forecast and every Californian must be doing their utmost to conserve water.”

DROUGHT THREATENS AMERICAN RIVER FISH. The [Sacramento \(CA\) Bee](#) (3/29, 547K) reports that “endangered steelhead about to hatch in the American River could soon be killed by low flows and warm temperatures caused by the drought, a sign of the ongoing struggle over scarce water supplies.” The BOR, “which operates Folsom and Nimbus dams on the American River, dropped water flows in the river to 500 cubic feet per second on Thursday.” BOR spokesman Louis Moore said, “That was primarily an effort to help conserve water based on the persistent drought conditions. Everything is being done to make sure the water supply we have is being used to the best of our ability, and we’re working with others to stretch it.”

BOR ACCEPTING LEASE LAND BIDS. The [Klamath Falls \(OR\) Herald And News](#) (3/29, 45K) reports that the BOR “announced that sealed bids for agricultural leasing of 24 parcels of federal lease lands, totaling 3,597 acres, can be received until 10 a.m. Wednesday, April 8, at the Klamath Basin Area Office.”

ADDITIONAL COVERAGE: FORMER BOR COMMISSIONER SUGGESTS ABOLISHMENT OF AGENCY . Additional coverage of former BOR’s commissioner Daniel Beard’s book “Deadbeat Dams: Why We Should Abolish the U.S. Bureau of Reclamation and Tear Down Glen Canyon Dam” was provided by the [Salt Lake \(UT\) Tribune](#) (3/29, 405K).

Empowering Native American Communities:

INTERIOR SENDS SECOND ROUND OF LAND BUY-BACK OFFERS ON ROSEBUD SIOUX RESERVATION. The [Nation Sun News](#) (3/29) reports that the Interior Department has “sent another \$34 million in offers to nearly 11,000 landowners on the Rosebud Sioux Reservation in South Dakota.” Michael Connor, the deputy secretary at Interior said, “The success of this program is a vital component of this Administration’s commitment to restoring tribal homelands and remedying the harms caused by the repudiated allotment policy. Consolidating and returning these lands to tribes in trust have enormous potential to improve tribal community resources by increasing home site locations, improving transportation routes, spurring tribal economic development, and preserving traditional cultural or ceremonial sites.”

Also reporting on the story are [KSFY-TV](#) Sioux Falls, SD (3/29, 3K) and the [Native American Times](#) (3/26, 337).

COBELL SCHOLARSHIPS BEING PREPARED. The [Indian Country Today Media Network](#) (3/24, 49K) (3/24, 49K) reports that the Interior Department has “transferred \$5 million to the Scholarship Fund for American Indian/Alaska Native students authorized by the Cobell settlement.” In an interview, Turk Cobell and Alex Pearl, members of the Board of Trustees for the Cobell Education Scholarship Fund, discussed “the status of the scholarship program recently.” Pearl said, “This is meant to be a perpetual fund so that Indian students can be going to college and receiving Cobell Scholarship Funds well after we’re long gone. It operates like any other Scholarship Funds where you restrict a portion of it so that the fund can continue for years and years and years.”

Also reporting on the story is the [Nation Sun News](#) (3/29).

INTERIOR HOSTS LAND BUY-BACK PROGRAM 2015 LISTENING SESSION AT GILA RIVER. The [Native News Online](#) (3/29) reports that “more than 150 tribal leaders and individual landowners joined Department of the Interior Deputy Secretary Michael Connor and Assistant Secretary-Indian Affairs Kevin Washburn at the Land Buy-Back Program for Tribal Nations (Buy-Back Program) 2015 Listening Session last Thursday.” The meeting, “held on the Gila River Indian Community, allowed Interior officials to share updates and hear directly from tribal communities about how the Program can best be implemented across Indian Country.” Connor said, “We must do all we can to give landowners a meaningful chance to participate in the Program and receive compensation for their fractional interests, many of which are simply unusable because of the degree of fractionation. We are focused on ensuring that landowners are aware of the Program and are given every opportunity to make informed decisions about the potential sale of their land at fair market value.”

PRESENTATION MADE ON LAND BUY BACK PROGRAM. [The Navajo Post \(AZ\)](#) (3/29) reports that “Land Buy-Back Program manager John H. McClanahan and Senior Advisor on Tribal Relations Santee Lewis, presented to Naabik’iyáti’ Committee members on Thursday.” The article notes that “on March 17, the Land Buy-Back Program issued a letter to President Ben Shelly formally offering the cooperative agreement which would provide funding to support land consolidation activities.”

INTERIOR TO HOLD MEETING ON MINERALS AND ROYALTIES. The [Riverton \(WY\) Ranger](#) (3/24, 167) reports that “the Department of the Interior’s Office of Natural Resources Revenue will hold a mineral and royalty question and answer session April 9 at the Bureau of Indian Affairs office in Fort Washakie.” The event will “help American Indian mineral interest owners with questions or concerns about minerals or royalty payments from oil, gas, sand or gravel production that occurs on their land.” The article notes that “a popular subject this year will be how the falling oil prices are affecting the royalties rendered to enrolled tribal members, said Thomas Piccirilli of the ONRR.”

DECISION DELAYED ON FEDERAL RECOGNITION FOR PAMUNKEY INDIANS. The [Washington Post](#) (3/27, Heim, 5.17M) reports that “the Pamunkey Indians — best known as the tribe of Pocahontas — will have to wait four more months to find out if its 35-year quest to become the first tribe in Virginia to be recognized by the federal government will be successful.” Kevin Brown, “the chief of the 208-member Pamunkeys, was notified of the delay in a letter sent to him on Friday by the Interior Department.” According to the article, “the letter said only that the office of the assistant secretary for Indian affairs needs additional time to issue a final determination.”

BIA SUPERINTENDENT WHO WAS STABBED NOW IN STABLE CONDITION. The [Black Hills \(SD\) Pioneer](#) (3/29, 11K) reports that the BIA superintendent who was “stabbed Wednesday is in stable condition.” According to Interior Department spokeswoman Nedra Darling, “Patrick F. Duffy is looking forward to a full recovery.”

SEN. BLUMENTHAL NOW OPPOSES FEDERAL RECOGNITION THIRD PARTY VETO. The [Indian Country Today Media Network](#) (3/27, 49K) reports that Sen. Richard Blumenthal “now says that a third party veto provision he helped insert into the Bureau of Indian Affairs’ proposed revisions of the federal recognition rules is unconstitutional.” Blumenthal said, “I’ve argued, and so have other parties, that [the third party veto] raises very severe constitutional questions.” He recommend “instead that ‘Congress should have sole authority to approve post-1934 tribal trust land requests.’”

EASTERN PEQUOT TRIBAL NATION CHAIRMAN WANTS ANSWERS ON PROPOSED CASINOS. The [Indian Country Today Media Network](#) (3/27, 49K) reports that “a proposal for one to two new casinos within the state of Connecticut has raised multiple questions for one tribal chairman.” The article posts a letter by Dennis Jenkins, chairman of the Eastern Pequot Tribal Nation, who “wants answers while also wondering where’s the outcry like his tribe saw in seeking federal recognition.”

PROPOSED SOUTH BEND CASINO COULD BE “GAME-CHANGER”. The [Times of Northwest Indiana](#) (3/29, 283K) reports that “the Pokagon Band of Potawatomi Indians’ plan to bring a Four Winds Casino and Hotel to South Bend could include a casino larger than Horseshoe in Hammond and a hotel with more rooms than Blue Chip’s tower in Michigan City.” The proposal, “which describes the largest development the Pokagon Band might pursue, is part of a draft Environmental Impact Statement issued by the federal Bureau of Indian Affairs earlier this month.” According to an industry analyst, “for Indiana’s existing commercial casinos, it would be a ‘game-changer’ that would have a ‘significant impact on all (casino) properties in the state.’”

BIE APPROVES CONVERSION OF ISLETA ELEMENTARY MOVES. The [Albuquerque \(NM\) Journal](#) (3/29, 238K) reports that “the U.S. Bureau of Indian Education has officially authorized the conversion of Isleta Elementary School from a BIE school – a government operation since the 1890s – into a tribally controlled Grant School effective July 1.” BIE administrator Casey Sovo “handed the approval notification to Isleta Pueblo Gov. E. Paul Torres last Thursday at Isleta Pueblo.”

NATIVE AMERICAN TRIBES SAY OREGON MAP OFFENSIVE. The [New York Times](#) (3/29, Pérez-Peña, Subscription Publication, 9.97M) reports on a controversy in Grant County, Oregon regarding names on a map that local Native American tribes call offensive and have asked to be changed. However, the Times says the “simple matter has turned into dispute” with white county leaders and has lasted for years and may not be resolved for several more years. The story asserts that “Oregon and many other states have learned the hard way that erasing objectionable place names is slow and difficult at best,” can open old wounds, and pit people along racial lines over “what is offensive and whose history the names should reflect.”

Top National News:

AS DEADLINE LOOMS, OUTCOME OF IRAN TALKS REMAINS UNCERTAIN. Coverage of the ongoing Iranian nuclear talks in Lausanne cast the parties as frantically seeking a deal before Thursday’s self-imposed deadline, but points to significant obstacles still standing in the path to an agreement. The [Washington Post](#) (3/30, Morello, Booth, 5.17M) notes that the negotiations “are growing more intensive, starting early in the morning and continuing until almost midnight,” and “a US official familiar with the negotiations said it would not be surprising if the talks come down to the wire, continuing through deadline day.” Said the unnamed official, “A lot of other pieces of the puzzle that sit on the table are not yet resolved. ... But they are the kind of puzzle pieces that most of us think will fall into place more likely than not if we get through some of these really tough, tough issues.” The [AP](#) (3/30, Jahn, Lee) says the “substantial differences between the sides may prove too difficult to bridge before Tuesday’s deadline for a preliminary agreement,” and cites Iranian push-back “on how long it must limit technology it could use to make atomic arms” as the most significant impediment to a deal.

Terry Moran reported on [ABC World News](#) (3/29, story 3, 1:55, Llamas, 5.84M) that the main “sticking points” are: “How fast will sanctions on Iran be lifted? And what kinds of nuclear programs will Iran be allowed after the deal?” According to unnamed “negotiators,” Iran “has agreed to tougher inspections,” but in exchange, “wants to keep a lot of their nuclear infrastructure intact.” The US “is saying no to that, for now.” [Bloomberg News](#) (3/29, Meyer, Foroohar, Tirone, 2.94M), meanwhile, sees “Iran’s insistence on an immediate lifting of United Nations sanctions” as the “main obstacle to securing a framework agreement.” As the [Washington Post](#) (3/30, Mufson, 5.17M) reports, “the Iranian economy is still a shadow of what it could be if international sanctions were lifted.”

White House spokesman Josh Earnest addressed the Iran nuclear negotiations on [ABC’s This Week](#) (3/29, Stephanopoulos, 2.73M), stating, “The President has been very clear that the best way for us to prevent Iran from developing nuclear weapons is by pursuing diplomacy to get Iran to take steps voluntarily to shut down the path to nuclear weapons. We want them to comply with stringent inspections. That is the best way for us to resolve our concerns about Iran’s nuclear program and to definitively prevent them from obtaining a nuclear weapon. At the same time, this requires Iran to make commitments. We have been negotiating about this for more than a year. The President believes we should be able to reach an agreement by the end of March, if one is doable. But there are still significant gaps that remain.”

[Politico](#) (3/29, Wheaton, Toosi, 669K) reports Earnest also “reiterated that the White House is not looking to extend beyond Tuesday the talks in...Lausanne, where both sides in recent days have suggested the other should soften its stance.” Another [Politico](#) (3/29, Crowley, 669K) story, however, says “there’s no practical reason the United States and its partners couldn’t keep negotiating” beyond Tuesday, as “the real deadline of concern for the Obama White House is April 13, when the Senate is scheduled to return from its Easter recess – and will likely take up legislation cracking down on Iran if a framework is not in hand.”

The [AP](#) (3/30, Jahn, Lee) reports that as the talks continue, Secretary of State Kerry “canceled plans Sunday to return to the United States for an event honoring the late US Sen. Edward Kennedy,” while “French Foreign Minister Laurent Fabius and Frank-Walter Steinmeier, his German counterpart, scratched planned trips to Kazakhstan.” [Politico](#) (3/29, Wheaton, Toosi, 669K) sees Kerry’s decision not to attend the Kennedy event as “a sign that the talks were intensifying,” while the [Washington Post](#) (3/30, Morello, Booth, 5.17M) notes “the British foreign secretary,” Philip Hammond, “was expected to arrive later Sunday, creating a joint front in the final push to settle unresolved issues.” [AFP](#) (3/30) notes that Hammond “said late Sunday he believed a nuclear deal with Iran could be reached, but insisted

it must put an atomic bomb 'beyond reach.'" [Bloomberg News](#) (3/29, Meyer, Foroohar, Tirone, 2.94M), meanwhile, reports "the Chinese foreign minister, Wang Yi," was also "expected to offer fresh proposals." On [NBC Nightly News](#) (3/29, story 6, 1:15, Quintanilla, 7.86M), Andrea Mitchell described the latest round of talks as "grueling," and cautioned that even if Kerry manages to get a deal, "Congress may try to scuttle it when he gets home."

[AFP](#) (3/30, Biddle), meanwhile, indicates that according to "diplomats...key parts of an outline had been tentatively agreed" for a "framework" accord, which is "meant to be fleshed out into a comprehensive agreement by June 30." The key tenets of the deal would include, "a 'one-year breakout time'; Iran slashing "the total number of its centrifuges by about two-thirds, to about 6,000"; "staggered" sanctions relief, "linked to certain 'milestones';" the "virtually impregnable underground Fordo facility near the holy city of Qom would cease uranium enrichment"; and "the US bottom line," which is that "Iran must agree to unprecedented inspections of both nuclear and production facilities as well as uranium mines and mills."

Asked if a deal will be reached, House Foreign Relations Committee Chairman Ed Royce said on [ABC's This Week](#) (3/29, Stephanopoulos, 2.73M), "A lot depends on whether Iran backs down on a couple of points. One is they want this deal lifted after ten years. They want the caps lifted after ten years. The second point, they don't want inspections of some of their military facilities where they have done this research. And, lastly, the international inspectors have a list of 12 questions they want Iran to answer on nuclear modeling and explosive tests. So far, Iran has only agreed to answer half of the first question. ... There are very real concerns about why Iran won't come clean with this evidence to the IAEA inspectors."

Senate Intelligence Committee Chairman Richard Burr said on [CBS' Face The Nation](#) (3/29, Schieffer, 2.64M) that he has "just got bits and pieces [about the negotiation process] from Administration and other sources that are familiar with the negotiations," and "it doesn't seem to be headed in the right direction. Clearly, with the deadline of Tuesday, I'm concerned with what we might give away. Iranians don't seem to want to conclude this. ... I would encourage the Administration to take more time."

Iran No Longer Willing To Ship Uranium Stockpiles Abroad. [The Hill](#) (3/29, Byrnes, 224K) quotes "Iran's lead negotiator," Abbas Araqchi, as saying yesterday, "Getting to an accord is doable. Solutions have been found for numerous questions. We are still working on two or three issues... The talks are in their final phase and are very difficult." [Reuters](#) (3/30, Charbonneau), however, notes that Araqchi also told reporters that the idea of sending stockpiles abroad is "not on Iran's agenda." That position, says the [New York Times](#) (3/30, Sanger, Gordon, Subscription Publication, 9.97M), marks a shift "from a critical element of a proposed nuclear agreement" and could create "a potential roadblock at a critical time in the talks." The Times adds that "for months, Iran tentatively agreed that it would send a large portion of its stockpile of uranium to Russia, where it would not be accessible for use in any future weapons program." While "Western officials confirmed that Iran was backing at shipping the fuel out," they "insisted that there were other ways of dealing with the material."

McConnell In Israel As Netanyahu Derides "Iran-Lausanne-Yemen Axis." The [AP](#) (3/30, Jahn, Lee) reports that Israel's Benjamin Netanyahu "renewed strong criticism of what he brands a bad deal," linking "Iran's alleged proxy grab for influence in the Middle East with what he sees as victory by Tehran at the negotiations in the Swiss city of Lausanne." Said Netanyahu, "The Iran-Lausanne-Yemen axis is very dangerous for humanity and must be stopped." The AP notes that Senate Majority Leader Mitch McConnell, "heading a delegation of American senators visiting Israel, said the lawmakers supported legislation to require Congress to approve any agreement on Iran's nuclear program, or to increase penalties against Iran if no deal is reached." The [Wall Street Journal](#) (3/30, Norman, Subscription Publication, 5.67M) notes that McConnell, appearing alongside Netanyahu, said yesterday that "if there's no deal, then the view of this group...is that ratcheting up sanctions might be the best direction to take." [Politico](#) (3/29, Everett, 669K) says McConnell's trip to Israel had not been "previously announced." Speaker John Boehner is also "set to visit Israel over the two-week Easter recess for Congress."

On [CNN's State Of The Union](#) (3/29, Bash, 420K) yesterday, Boehner defended his upcoming trip to Israel, which has been criticized as a "victory lap" after Netanyahu spoke before Congress, saying, "My visit there was planned months ago before the Prime Minister came to Washington and before his re-election, so it's not quite what I would describe as a 'victory lap.' There are serious issues and activities going on in the Middle East. I think it's critically important for members of Congress to hear from foreign leaders, other governments, and other parts of their government in order to get a real handle on the challenges we face there." Boehner also [stated](#) (3/29, Bash, 420K), "I think the animosity exhibited by our Administration toward the Prime Minister of Israel is reprehensible. I think that the pressure they've put on him over the last four or five years have, frankly, pushed him to the point where he had to speak up. I don't blame him at all for speaking up."

[AFP](#) (3/30) quotes Netanyahu as saying yesterday, "The dangerous accord which is being negotiated in Lausanne...confirms our concerns and even worse." Deputy Foreign Minister Tzahi Hanegbi, "who is close to Netanyahu," told "public radio that Israel 'will not be bound by an accord concluded by others and will know how to defend itself.'"

Saudi Ambassador Points To Kerry Assurances About Talks, Eventual Deal. Saudi Ambassador to the US Adel al-Jubeir said on [CBS' Face The Nation](#) (3/29, Schieffer, 2.64M), "I believe everybody wants a deal. But everybody wants a good deal. We have been assured by...Kerry that the United States intends to prevent Iran from acquiring an atomic bomb, close all paths leading to an atomic bomb, substantially limit Iran's ability to do research and enrich, and impose intrusive and continuous inspections on Iran. We hope this will be the case. But we really will not know until we see the details. I don't believe the details have been worked out yet. We expect there will be a framework agreement with the details to be negotiated over next two or three months. So the key will be in those details." In a report this morning, the [Los Angeles Times](#) (3/30, Hennigan, 3.49M) highlights that "Jubeir expressed hope that a deal would be reached that would ensure regional stability."

Former Obama Intel Official: Administration Showing "Willful Ignorance." The [Daily Caller](#) (3/29, Griswold, 318K) reported that "Obama's former director of the Defense Intelligence Agency Lt. Gen. Michael Flynn said on 'Fox News Sunday' he believes the White House is acting with 'willful ignorance'" in its dealings with Iran. Said Flynn, "To me, we have some major problems that we are dealing with and here we are talking to Iran about a nuclear deal with this almost complete breakdown of order in the Middle East. One of the things that we have to keep in mind on Iran is Iran is also a country with ballistic missiles, cyber capabilities, they are also still a state-sponsor of terrorism. And here we are dealing with them as though we're going to give them a carte blanche – I know it will be some number of years to have a nuclear capability. Give me a break!"

White House Steps Up Efforts To Build Support For Iran Nuclear Deal. A front-page story in the [Wall Street Journal](#) (3/30, A1, Lee, Solomon, Subscription Publication, 5.67M) reports that with the deadline for a nuclear deal with Iran looming, the White House is stepping up its efforts to build legislative and public support for an agreement. The Journal adds that White House officials have privately expressed an openness to accept legislation to give Congress some oversight should the talks yield the main outlines of a deal.

Kasich: For Obama To Sidestep Congress Would Be “A Bad, Bad Idea.” Ohio Gov. John Kasich said on [Fox News Sunday Morning Futures with Maria Bartiromo](#) (3/29), “Any agreement with Iran should be taken to Congress and should be closely reviewed. ... The idea that the President may go to the United Nations and skirt Congress is a bad, bad idea.”

Alfoneh, Gerecht Alarmed Over Possible North Korea-Iran Cooperation. Ali Alfoneh and Reuel Marc Gerecht, senior fellows at the Foundation for Defense of Democracies, write in the [Washington Post](#) (3/30, Alfoneh, Gerecht, 5.17M) that the Administration “has shied away from a potentially paralyzing issue: the ‘possible military dimensions’ – the PMDs – of the regime’s program,” with “one of the most important issues – probable North Korean nuclear cooperation with the Islamic Republic,” deserving “special scrutiny.” Such a “disturbing partnership casts serious doubt on the Obama administration’s hope that President Hassan Rouhani and his team have any intention of limiting Iran’s nuclear ambitions.” The authors go on to denounce contacts between the two nations and indicate that US intelligence doesn’t seem to know “how long...this nefarious partnership” continued and what came of it.

PENCE DEFENDS INDIANA LAW, SAYS OBAMA AND BILL CLINTON BACKED SIMILAR MEASURES. Media coverage of Indiana’s “Religious Freedom Restoration Act” generally cast it as a vehicle that could potentially lead to discrimination against gay Americans, and describes a growing chorus of opposition from the business community, hurting the state’s reputation. The [Indianapolis Star](#) (3/30, Mack, 593K), for example, notes that the bill has earned “national criticism from people who think the bill could lead to discrimination from business owners or religious leaders who don’t want to serve gays or same-sex customers.” The Star adds “business leaders also have criticized” it, “saying that it gives the state a bad image and will make it harder to recruit top talent to Indiana.” [USA Today](#) (3/30, Wolf, 4.95M) similarly describes Indiana as “facing a rising tide of criticism and business boycotts,” and [Bloomberg Politics](#) (3/29, Lerman, Schoenberger, 169K) reports that “Angie’s List Inc., the consumer-review website, on Saturday withdrew a proposal to expand its Indianapolis headquarters, a planned \$40 million investment, days before it was to break ground,” and that “technology-industry leaders including Apple Inc. Chief Executive Officer Tim Cook and Salesforce.com Inc. CEO Marc Benioff have also spoken out.”

Cook, in the [Washington Post](#) (3/30, Cook, 5.17M), warns that “a wave of legislation, introduced in more than two dozen states, would allow people to discriminate against their neighbors,” and says “America’s business community recognized a long time ago that discrimination, in all its forms, is bad for business.”

Gov. Mike Pence’s arguments in defense of the law were also given plenty of play in most reports. On [ABC’s This Week](#) (3/29, Stephanopoulos, 2.73M), Pence said “the Religious Freedom Restoration Act was signed into Federal law by Bill Clinton more than 20 years ago,” and “after that, some 19 states adopted it. After last year’s Hobby Lobby case, Indiana properly brought the same version that then-state Sen. Barack Obama voted for in Illinois,” and “I was proud to sign it into law last week.” Pence also derided the “tremendous amount of misinformation around this bill,” and pledged that Indiana is “not going to change” it, because it is “about protecting the liberty of every Hoosier of every faith.”

The [New York Times](#) (3/30, Southall, Subscription Publication, 9.97M) notes “critics, however, say the Indiana law includes different wording that could open the door to wider discrimination.” Moreover, “critics...note that in many of the states with similar laws, including Illinois, sexual orientation is protected under civil rights law. In Indiana, gays and lesbians are not a protected class.”

Hi Jeremy and Erin,

I apologize for the multiple emails from our office. I just returned from Tokyo and will be primary contact for this event.

Senator Schatz will be happy to give brief remarks at the Honouliuli Dedication Ceremony. He will also give brief remarks at the Reception (confirmed with Carole Hayashino from JCCH).

Please let me know if you need anything from us.

Best,

Malia

Malia Paul

Subject: (SENDER VALIDATION FAILED --- May not have originated from apparent sender) Honouliuli schedule & logistics

Hello,

I wanted to share with you the latest on the schedule and logistics for the Honouliuli event on 3/31 and the latest RSVPs from the delegation. If you have any corrections to your boss's attendance, please let me know.

In particular, I wanted to flag for you that due to space constraints on the shuttle bus and in the Honouliuli Gulch, the plan is for Members of Congress attending the Gulch ceremony to have one staffer accompany them, (ie., no staffers at the Gulch without their Member present). Please let me know if that is an issue for your boss.

9:15 am - Gather at Monsanto Assembly Zone

9:30 am - Last shuttle bus departs Monsanto

10:00-10:30am - Honouliuli Gulch Dedication Ceremony and Program.

Members attending: Senator Schatz, Senator Hirono

Event will be open press.

Participants will be asked to join in the blessing ceremony, which involves untying a bow and ribbon at the site.

There will be informal remarks by some participants (ie., Secretary Jewell will speak for approx. 2-3 minutes). Members may speak if they like.

10:30-11:00am - Tours of Honouliuli Gulch

11:05 - Shuttle buses depart en route Monsanto Assembly Zone

12:00-1:30pm - Welcome Reception and Celebration of the New Honouliuli National Monument

Location: Japanese Cultural Center of Hawaii, 2454 S Beretania Street, Honolulu, HI 96826

Members attending: Senator Schatz, Senator Hirono, Rep. Gabbard

Event will be open press.

There will be a 30 minute program and Members are welcome to speak.

I have copied my colleague, Erin Frautschy Barrows, on this email. She will be doing advance for the Secretary for this portion of the trip and will be our point of contact on the ground for any last minute issues that arise.

Please let me know if you have any questions.

Thanks,

Jeremy Bratt

Hi Malia,

Thank you for your e-mail and confirmation. I just got on the ground late Friday and advanced all of the locations yesterday, and got a briefing from our local team. I'm very sorry for the confusion, but due to some serious time constraints, we are going to request to limit remarks at the program at Honouliuli Gulch to just the Secretary and the Governor. We would, however, very much like the Senator to participate in both blessing ceremonies that are at the top of the program.

Again, I'm very sorry for the confusion, and please let me know if you have any concerns.

Thanks,
Erin

Include Congresswoman's name on Honouliuli invitation?

"Bratt, Jeremy" <jeremy_bratt@ios.doi.gov>

From: "Bratt, Jeremy" <jeremy_bratt@ios.doi.gov>
Sent: Tue Mar 24 2015 09:07:32 GMT-0600 (MDT)
To: "James, Rachel" <Rachel.James@mail.house.gov>
Subject: Include Congresswoman's name on Honouliuli invitation?

Hello Rachel,

We'd like to send out an invitation to interested stakeholders for the upcoming Honouliuli event and were wondering if it is ok to include the Congresswoman's name (please see below) as a confirmed attendee. We will most likely send this out around 3 p.m. this afternoon.

Thank you,
Jeremy

Dear Friends,

Please join U.S. Secretary of the Interior Sally Jewell, Deputy Director of the National Park Service Peggy O'Dell, Governor David Ige, MEMBERS OF CONGRESS, President of the Japanese Cultural Center of Hawaii Carole Hayashino, University of Hawaii President David Lassner other community leaders on Tuesday, March 31, 2015 at 10:00 a.m. at a dedication ceremony for the newly designated Honouliuli National Monument.

Tuesday, March 31, 2015

9:15 a.m. – Check-in for shuttle to dedication site
9:30am - Final shuttle leaves for dedication site
10:00 a.m. – Honouliuli Dedication Ceremony

Monsanto Parking Lot *
94-520 Kunia Road
Waipahu, HI 96759

*Access to the dedication site is only possible via shuttle service. Shuttles will depart the parking lot at 9:30 a.m.

We hope you are able to join us and ask that you RSVP at your earliest convenience by clicking [HERE](#) (link).

Please feel free to contact our office if you have any questions.

Subject: RE: Include Congresswoman's name on Honouliuli invitation?

Aloha Jeremy,

I thank you for checking first. Unfortunately, the Congresswoman will not be available to attend the site dedication at 10am. I hope that the information has not been sent out already, the time difference here can be so challenging with communication at times, I assume you meant 3pEST, not HST, right?

Are you all still planning on a community event hosted by the Japanese Cultural Center of Hawaii in Honolulu around noon? Thank you.

Rachel

Subject: Include Congresswoman's name on Honouliuli invitation?

Hello Rachel,

We'd like to send out an invitation to interested stakeholders for the upcoming Honouliuli event and were wondering if it is ok to include the Congresswoman's name (please see below) as a confirmed attendee. We will most likely send this out around 3 p.m. this afternoon.

Thank you,

Jeremy

Aloha Jeremy,

Yes, the Congresswoman can attend and deliver brief remarks/congratulations at noon. She will need to depart no later than 1230p however. Will that be possible given the schedule of events for the reception? If you have any guidance regarding the tentative schedule for the reception ad community event portion, it would be most helpful. We've been asked to confirm it on her calendar by COB (HST) today. The Congresswoman would like to participate, but has a short window of opportunity to do so. We are hopeful the schedule will allow her to participate. Thank you.

I just left a message, essentially we don't want to duplicate or overstep Secretary Jewel's ambitions for the community event and welcome reception. The Congresswoman would like to present the President's declaration and we wanted to see how that squared with Secretary Jewel's plans. I look forward to speaking with you. Aloha.

I don't think the Secretary has any plans to present the President's declaration to the group, so Rep. Gabbard should be fine to do so. I do want to flag, however, that the Japanese Cultural Center had representatives who attended the signing ceremony for the monument with President Obama, so I don't know if they may have already received a commemorative item of some sort from that ceremony.

I'm copying Erin Frautschy Barrows from our office, who will be doing advance on this trip, who can also be your point of contact for the day of the event.

Thanks,
Jeremy

I just left a message, essentially we don't want to duplicate or overstep Secretary Jewel's ambitions for the community event and welcome reception. The Congresswoman would like to present the President's declaration and we wanted to see how that squared with Secretary Jewel's plans. I look forward to speaking with you. Aloha.

Hello Rachel,

Thanks for your email. We did not include the Congresswoman's name on the invite, so no worries in that regard.

We are still planning a welcome reception and community event from 12-1:30 at the Japanese Cultural Center of Hawaii (2454 S Beretania Street, Honolulu). Will the Congresswoman be able to attend that portion of the day?

Thank you,

Jeremy

Subject: Include Congresswoman's name on Honouliuli invitation?

Hello Rachel,

We'd like to send out an invitation to interested stakeholders for the upcoming Honouliuli event and were wondering if it is ok to include the Congresswoman's name (please see below) as a confirmed attendee. We will most likely send this out around 3 p.m. this afternoon.

Thank you,

Jeremy

Dear Friends,

Please join U.S. Secretary of the Interior Sally Jewell, Deputy Director of the National Park Service Peggy O'Dell, Governor David Ige, MEMBERS OF CONGRESS, President of the Japanese Cultural Center of Hawaii Carole Hayashino, University of Hawaii President David Lassner other community leaders on Tuesday, March 31, 2015 at 10:00 a.m. at a dedication ceremony for the newly designated Honouliuli National Monument.

Tuesday, March 31, 2015

9:15 a.m. – Check-in for shuttle to dedication site

9:30am - Final shuttle leaves for dedication site

10:00 a.m. – Honouliuli Dedication Ceremony

Monsanto Parking Lot *

94-520 Kunia Road

Waipahu, HI 96759

*Access to the dedication site is only possible via shuttle service. Shuttles will depart the parking lot at 9:30 a.m.

We hope you are able to join us and ask that you RSVP at your earliest convenience by clicking [HERE](#) (link).

Please feel free to contact our office if you have any questions.

Subject: REMINDER: Join Secretary Sally Jewell on Tuesday, March 31 at a Dedication Ceremony for the Newly Designated Honouliuli National Monument

If you have not already done so, please RSVP using the [link](#) provided in the invitation below. Thank you.

Inline image 2

Dear Friends,

Please join U.S. Secretary of the Interior Sally Jewell, Deputy Director of the National Park Service Peggy O'Dell, Senators Brian Schatz and Mazie Hirono, Governor David Ige, President of the Japanese Cultural Center of Hawaii Carole Hayashino, the Monsanto Company, University of Hawaii President David Lassner and other community leaders on Tuesday, March 31, 2015 at 10:00 a.m. at a dedication ceremony for the newly designated Honouliuli National Monument.

Tuesday, March 31, 2015

9:15 a.m. – Check-in for shuttle to dedication site
9:30 a.m. – Final shuttle leaves for dedication site
10:00 a.m. – Honouliuli Dedication Ceremony

Monsanto Parking Lot *
94-520 Kunia Road
Waipahu, HI 96759

Directions to Monsanto Parking Lot: From Honolulu, head west on H-1 Freeway. Take Kunia Rd. off ramp (Exit 5b) and head north on Kunia Rd. In about 1 mile and after passing 3 intersections, take an immediate left onto a gravel road. You will see signs for turn. Follow the road to the parking lot.

*Access to the dedication site is only possible via shuttle service. Shuttles will depart the parking lot at 9:30 a.m.

We hope you are able to join us and ask that you RSVP by Friday, March 27 by clicking [HERE](#). This invitation is non-transferable. Casual attire is appropriate.

Please feel free to contact our office if you have any questions.

DOI in the News:

LAWMAKERS CRITICIZE NEW FEDERAL FRACKING RULES. The [AP](#) (3/27) reports that Republican and Democratic lawmakers in the House "have issues with the Obama administration's new regulations requiring companies that drill for oil and natural gas to disclose chemicals used in hydraulic fracturing." While Republicans oppose the new rules due to the delays they can incur in new drilling projects, Democrats say the regulations do not go far enough. "Rep. Raul Grijalva, D-Ariz., said the regulation was so lax it was like requiring the auto industry to ensure that every car has a steering wheel and a brake pedal," the article reports. But according to Rep. Doug Lamborn, R-Colo., delays caused by the new requirements could discourage energy companies from drilling on Federal lands, causing job losses and driving away revenue.

Coverage was also provided by the [FuelFix](#) (3/26, 7K), the [Houston \(TX\) Chronicle](#) (3/26, Fraking), the [Bismarck \(ND\) Tribune](#) (3/27, 32K), the [Minneapolis \(MN\) Star Tribune](#) (3/27, Fraking, 1.37M), the [Albuquerque \(NM\) Journal](#) (3/27, 238K), the [Beaumont \(TX\) Enterprise](#) (3/27, 168K), the [Seymour \(IN\) Times Tribune](#) (3/27, 29K), the [Washington \(DC\) Post](#) (3/26, Fraking, 5.17M), the [Atlanta \(GA\) Journal-Constitution](#) (3/27, 988K), the [Quincy \(IL\) Herald-Whig](#) (3/27, 77K), the [Daily Mail \(UK\)](#) (3/27, 4.78M), the [US News & World Report](#) (3/26, 685K), [Yahoo! \(CAN\)](#) (3/27, 85K), an [KATU-TV Portland \(OR\)](#) Portland, OR (3/27, 192K)

Wyoming Files Lawsuit Over Fracking Rules. The [Houston Chronicle](#) (3/27, Gruver, 2.28M) reports that "Wyoming filed a lawsuit Thursday contesting new federal rules for oil and gas drilling on public land, alleging in part that they interfere with Wyoming's state rules." The action also claims the BLM "overstepped its statutory jurisdiction with the rules and that they conflict with the Safe Drinking Water Act." Interior spokeswoman Jessica Kershaw "cited agency policy not to comment on pending litigation and declined to comment on the lawsuit," but she added that "states and tribes will be able to request variances from the rules, and Interior might grant them if they met or exceeded federal standards."

Coverage was also provided by the [Akron \(OH\) Beacon Journal](#) (3/27, 293K), the [Miami \(FL\) Herald](#) (3/27, 694K), the [Bismarck \(ND\) Tribune](#) (3/27, 32K), the [Casper \(WY\) Star-Tribune](#) (3/27, 90K), the [Washington \(DC\) Times](#) (3/27, Gruver, 644K), the [Natural Gas Intelligence](#) (3/27), the [Law 360](#) (3/27, 9K), Additional coverage was provided by the [A bany \(NY\) Times Union](#) (3/27, 379K) and the [Daily Signal](#) (3/26).

SAGE GROUSE PROTECTION AGREEMENT SIGNED IN NEVADA. The [AP](#) (3/27, Sonner) reports that "an unprecedented attempt to

protect sage grouse habitat across parts of more than 500 square miles of privately owned land in Nevada will begin under a deal Thursday involving the federal government, an environmental group and the world's largest gold mining company." The deal comes as the FWS "approaches a fall deadline for a decision on whether to protect the greater sage grouse, a bird roughly the size of a chicken that ranges across the West, under the Endangered Species Act." The agreement involves Barrick Gold Corp., The Nature Conservancy, the BLM, and FWS. The deal "establishes a 'conservation bank,' providing the mining firm credit for enhancing critical habitat, in exchange for flexibility in future operations."

[NPR](#) (3/26, 1.58M) reports that Interior Secretary Sally Jewell said, "This is the kind of creative, voluntary partnership that we need to help conserve the greater sage grouse, while sustaining important economic activities on western rangelands."

Coverage was also provided by the [New York \(NY\) Times](#) (3/27, Press, Subscription Publication, 9.97M), the [Oregonian](#) (3/27, 950K), the [Salem \(OR\) Statesman Journal](#) (3/26, 36K), the [Casper \(WY\) Star-Tribune](#) (3/27, 90K), the [Columbia \(SC\) State](#) (3/27, 291K), the [Seattle \(WA\) Post-Intelligencer](#) (3/27, 612K), the [Minneapolis \(MN\) Star Tribune](#) (3/27, Sonner, 1.37M), the [Washington \(DC\) Post](#) (3/26, Scott Sonner |, Ap, 5.17M), the [Nevada Appeal](#) (3/27, 49K), the [Daily Mail \(UK\)](#) (3/27, 4.78M), [Yahoo! News](#) (3/27, Sonner, Press, 5.81M), [ABC Otus News](#) (3/27), and [KOLO-TV Reno \(NV\)](#) Reno, NV (3/27, 3K).

SECRETARY JEWELL TO ANNOUNCE SAGE GROUSE CONSERVATION DEAL WITH OREGON RANCHERS. The [AP](#) (3/27) reports that "the Obama administration has reached an agreement with Oregon ranchers to protect sage grouse that the ranchers hope will help avoid having the bird listed by the federal government as an endangered species." Interior Secretary Sally Jewell and Gov. Kate Brown are "expected to be in Bend, Oregon, on Friday afternoon to announce the agreements covering 5,500 square miles of private land in central and southeastern Oregon." The FWS says "the agreements signed last week with soil and water conservation districts covering Crook, Deschutes, Lake, Union, Grant, Baker, Harney and Malheur counties are the first for such a wide area."

Also providing coverage are the [San Francisco \(CA\) Chronicle](#) (3/27, 2.21M), [The East Oregonian](#) (3/27, 24K), the [Franklin \(IN\) Daily Journal](#) (3/27, 51K), the [Houston \(TX\) Chronicle](#) (3/27, Barnard, 2.28M), and the [Seattle \(WA\) Post-Intelligencer](#) (3/27, 612K).

SECRETARY JEWELL TO ATTEND HONOULIULI DEDICATION. The [Honolulu Star-Advertiser](#) (3/27, 360K) reports that Interior Secretary Sally Jewell will be "in Hawaii next week to help dedicate the newly designated Honouliuli National Monument in Kunia." Jewell will be joined at the Tuesday ceremony by Deputy Director of the National Park Service Peggy O'Dell, U.S. Sens. Brian Schatz and Mazie Hirono, president of the Japanese Cultural Center of Hawaii Carole Hayashino, the Monsanto Company, University of Hawaii President David Lassner, and other community leaders."

FEDERAL AGENCIES RENEW COMMITMENT TO PROMOTE HYDROPOWER. [Argus Media](#) (3/26) reports that "the US Departments of Energy and the Interior and the US Army yesterday renewed a commitment to cooperate on supporting hydro development for another five-year term." The article notes that "the goals of the partnership include increasing power output of existing plants with better water flow measurement tools and testing superconducting technology that could make existing plants more efficient."

REPUBLICAN SENATORS OBJECT TO CLIMATE PLANNING DIRECTIVE FOR FEDERAL AGENCIES. [The Hill](#) (3/26, Cama, 224K) reports that "six Senate Republicans blasted the Obama administration's proposal to change how federal agencies consider climate change in environmental impact reviews." They "argued Thursday that the draft guidance from the White House is an illegal expansion of the National Environmental Policy Act (NEPA)" Urging the White House's Council on Environmental Quality to withdraw the proposal, they said, "We are deeply disappointed that the administration is continuing down a path that is both illegitimate and irresponsible."

SENATE COMMITTEE CALLS FOR NOMINATIONS OF IGS FOR 10 AGENCY VACANCIES. [Fierce Government](#) (3/27, 224) reports that "all 16 members of the Senate Homeland Security and Governmental Affairs Committee sent a letter Monday to President Obama urging him to nominate permanent inspectors general at the 10 agencies who currently have vacancies." The Interior Department is among the 10 vacant inspectors general positions. Sen. Ron Johnson noted that "the DOI has gone without a permanent IG for 2,216 days."

HEARING HELD ON SUPREME COURT BUDGET. On [C-SPAN](#) (3/27, 38K), coverage of the testimony on the Supreme Court fiscal year 2016 budget and the federal judiciary system included comments by Rep. Sanford Bishop Jr., who said, "I applaud the court's ability to find savings in its budget. Your total FY16 request with salaries and expenses and buildings and grounds does represent a discretionary decrease of 1.1% from FY 15. It looks like this is a combination of the construction work being completed and savings from nonrecurring costs that are associated with implementation of your new financial system. Are there program increases that you are delaying but you still feel would be beneficial at some point? And with regard to implementation of your new financial system, which I understand you're leveraging resources from the executive branch, probably the Interior, specifically in the area of payroll and financial tracking. And I understand that this move has reduced your reliance on contract employees. And it seems to be a great step towards efficiency. Do you find that you're getting the same level, an improved level of service? And would you recommend this to other agencies that are looking to reduce their costs?" Justice Anthony Kennedy responded, "Well, I'm not enough of an expert to recommend it to other agencies but our staff tells us it's working very, very well. They like it. They like it better than the outside contractors and it's much cheaper. We are in partnership with an agency in the department of interior. And it has some similarities to us. And it's been the source of most of the savings we've had over the last few years."

INTERIOR BETA TESTED PERISCOPE. Covering the app Periscope, [CNN Money](#) (3/26, 1.76M) notes that the Interior Department was a beta tester.

ADDITIONAL COVERAGE OF INITIATIVE TO INCREASE VOLUNTEERISM. Additional coverage of the initiative to increase volunteerism at public lands was provided by the [Customs Today \(PAK\)](#) (3/27).

ADDITIONAL COVERAGE OF INTERIOR'S NEW YOUTH INITIATIVE. Additional coverage of the Interior Department's new youth initiative was provided by [WABE-FM](#) Atlanta (3/27, 11K).

[America's Great Outdoors:](#)

National Park Service:

NPS DIRECTOR JARVIS DISCUSSES FUTURE OF NATIONAL PARKS. [KQED-FM](#) San Francisco (3/27, 40K) reports that in anticipation of the NPS' 100-year anniversary next summer, the agency has "set lofty goals for its future: increase the diversity of visitors to include more youth and people of color, partner with health providers and ramp up collaborations with scientists, which is the focus of a summit this week at UC Berkeley." NPS Director Jonathan Jarvis, "in town for the summit," discussed his agency's future.

MAINE BUSINESSES ENDORSE PROPOSED NATIONAL PARK. The [Bangor \(ME\) Daily News](#) (3/26, 166K) reports that "more than 200 businesses from around the state endorsed a proposed 150,000-acre national park and recreation area in the Katahdin region Thursday." The article notes that "the endorsement, which included a letter signed by all the businesses to Maine's congressional delegation urging the creation of the park, is the latest public approval of the controversial gift to the nation first proposed by entrepreneur Roxanne Quimby in 2011."

Additional coverage was provided by [WCSH-TV Portland \(ME\)](#) Portland, ME (3/26, 30K), [WCSH-TV Portland \(ME\)](#) Portland, ME (3/26, 30K), and [WCSH-TV Portland \(ME\)](#) Portland, ME (3/26, 30K).

NEW LIMITS ON DOGS AT GOLDEN GATE NATIONAL RECREATION AREA GENERATES OUTRAGE. The [San Francisco Chronicle](#) (3/26, 2.21M) reports that "Rep. Jackie Speier vowed Wednesday to unleash the forces of Washington against efforts to ban unleashed dogs from most of the Bay Area's string of federal parkland." According to the article, "the decadelong dogfight is reaching a crescendo as the National Park Service moves to issue a draft rule in the summer based on a 1,504-page Dog Management Plan that has canine fanciers howling." The proposal would "limit free-ranging dogs 'under voice control' to seven spots in the Golden Gate National Recreation Area, an 80,000-acre federal park that stretches from Tomales Bay in Marin County to Rancho Corral de Tierra in San Mateo County and attracts more than 15 million visitors a year."

CANYONLANDS NATIONAL PARK SEEKS COMMENTS ON PROPOSED PERMITS. The [Deseret \(UT\) News](#) (3/27, 538K) reports that the NPS is "seeking public comment on a proposal to require permits for all motor vehicle and bicycle day use on the White Rim and Elephant Hill roads in Canyonlands National Park." According to the agency, "requiring permits for day use on the roads will help the park better protect resources and the visitor experience."

MAN COMMITS SUICIDE IN GLACIER NATIONAL PARK. The [Ravalli \(MT\) Republic](#) (3/27, 19K) reports that "a Virginia man apparently shot himself to death on Going-to-the-Sun Road in Glacier National Park on Tuesday morning."

ADDITIONAL COVERAGE OF PLANNING FOR MANHATTAN PROJECT NATIONAL HISTORICAL PARK. Additional coverage of the planning for the Manhattan Project National Historical Park was provided by the [Knoxville \(TN\) News Sentinel](#) (3/27, Fowler, 371K).

SUPPORT URGED FOR NPS BUDGET REQUEST. The [Montana Standard](#) (3/27, 39K) reprints an editorial by The Missoulian, which urged support for President Obama's federal budget request. It notes that "the budget request contains a total of \$11.49 billion for the National Park Service to finally begin crossing items off its long list of deferred maintenance projects." The paper also notes that "next year – 2016 – marks the 100th anniversary of the National Park Service," so "the president's budget request is timely."

EDITORIAL: NATIONAL PARK VISITORS SHOULD PAY FOR MAINTENANCE. In an editorial, the [Denver Post](#) (3/27, Board, 804K) supports the increase in entrance fees proposed by the NPS. The paper argues that park visitors should shoulder more of the burden, rather than all taxpayers at large.

EDITORIAL: NPS MUST JUSTIFY ANY CHANGES TO PERRY'S MEMORIAL MANAGEMENT AT PUT-IN-BAY.. The [Cleveland Plain Dealer](#) (3/27, 1.01M) editorializes that "friends of Perry's Memorial and advocates for Put-in-Bay merchants are worried the National Park Service is preparing to give the site short shrift." The agency is "studying a possible consolidation of management between Perry's Memorial and the much newer, much-less-visited River Raisin National Battlefield Site in the marshy southeast corner of Michigan, where British forces and American Indians associated with Shawnee leader Tecumseh routed U.S. soldiers in bloody, merciless fighting during the War of 1812." It says that "the park service also needs to explain the thinking behind any decision to favor the River Raisin site, especially if a "shared" superintendent would be based there, and not at the Perry monument." The paper concludes that "downgrading the Perry monument, its oversight and upkeep is not an acceptable option."

NONPROFIT GROUP PREPARES STUDENTS FOR CAREERS IN OUTDOORS. In a piece for the [Richmond \(VA\) Times-Dispatch](#) (3/27, 322K), Tee Clarkson writes that Groundwork RVA, "a local nonprofit, has taken an unusual approach to teaching Richmond students about local ecology and urban conservation." Giles Harnsberger, executive director for Groundwork RVA, said, "We teach neighborhood ecology. We want students to treat their community as if it's as special as a national park." She notes that "the program is designed to teach students not only about conservation and ecology, but also to prepare them for jobs in the National Park Service, as landscape architects, or for work in urban ecology."

Bureau of Land Management:

"GRAND BARGAIN" BEING FINALIZED IN UTAH. The [Wall Street Journal](#) (3/27, Carlton, Subscription Publication, 5.67M) reports that under proposed legislation called the "Grand Bargain," San Juan and some other counties in Utah would agree to wilderness and other restrictions on public lands in return for getting other areas designated for energy and other uses. Rep. Jason Chaffetz, who is co-sponsoring the legislation with Rep. Rob Bishop, chairman of the House Committee on Natural Resources, said, "We're doing something of great significance and hopefully it will bring people's blood pressure down." After the draft legislation goes through more public vetting, a final bill is expected to be introduced in Congress by late spring.

BLM OFFICIAL GUILTY IN FRAUD CASE. The [AP](#) (3/27) reports that "a senior official in the U.S. Bureau of Land Management has been convicted on criminal charges that he covered up for an employee who left the agency for a job in Montana but kept drawing government pay." John Grimson Lyon of Clifton, Virginia, was "convicted of wire fraud, false claims and theft of government property following a three-day jury trial that ended Wednesday night in Great Falls." Lyon, the former state director for the BLM's 31-state Eastern

States Region, could face 30 years in prison, \$750,000 in fines and the forfeiture of \$112,000.

Additional coverage was provided by the [Minneapolis \(MN\) Star Tribune](#) (3/27, Brown, 1.37M), the [Washington \(DC\) Post](#) (3/26, Matthew Brown |, Ap, 5.17M), the [Houston \(TX\) Chronicle](#) (3/27, Brown, 2.28M), the [Flathead \(MT\) Beacon](#) (3/26, 15K), the [Quincy \(IL\) Herald-Whig](#) (3/27, 77K), the [Daily Mail \(UK\)](#) (3/27, 4.78M), [ABC Otus News](#) (3/27), [Yahoo! News](#) (3/27, Brown, 5.81M), [KRTV-TV Great Falls \(MT\)](#) Great Falls, MT (3/27, 1K), [KTVQ-TV Billings \(MT\)](#) Billings, MT (3/27, 4K), and [KBZK-TV Butte \(MT\)](#) Butte, MT (3/27, 785).

JUDGE UPHOLDS BLM'S OWNERSHIP OF WISTERIA REMAINS. The [Florida Keys Citizen](#) (3/27, 33K) reports that "development will not come to Wisteria Island soon, if ever, because a federal judge has dismissed F.E.B. Corp's lawsuit asking to be ruled the owner of the 22 acre island." Judge Jose E. Martinez "issued a ruling Wednesday in favor of the Bureau of Land Management, which claimed government ownership of the roughly 22-acre island in Key West Harbor in 2011."

BLM SEEKS PUBLIC'S HELP TO CURB VANDALISM. The [Billings \(MT\) Gazette](#) (3/27, 165K) reports that "vandalism to facilities managed by the Bureau of Land Management's Billings Field Office is mounting, and land managers are seeking the public's help to bring it to an end." The bureau "recently cited several people for vandalism at the Acton Recreation Area, 18 miles north of Billings," and "on top of that, what the agency calls 'nonstop vandalism' at the popular Shepherd Ah Nei Recreation Area has led the BLM to cancel any further plans to repair or replace vandalized property."

BLM SEEKS COMMENTS ON CHANGE TO BISON GRAZING AT ALLOTMENT. The [Great Falls \(MT\) Tribune](#) (3/26, 76K) reports that the American Prairie Reserve, "run by the not-for-profit American Prairie Foundation, has applied to change the class of livestock from cattle to indigenous bison on its permit to graze lands on the Flat Creek Allotment." The BLM still must approve the livestock change. The bureau announced Thursday that "it is seeking public input for an environmental analysis on the change in classification from cattle to indigenous bison."

RANCHERS ASSISTED BY PUBLIC SUBSIDIES. [Salon](#) (3/27, 688K) reports on the "welfare ranchers subsidized by US taxpayers." The article says that "the biggest welfare ranchers of all, grazing livestock on the hundreds of millions of acres of public grass and forest land, all assisted by public subsidies paid for by US taxpayers" are the "billionaires that populate Forbes rich lists."

Fish and Wildlife Service:

FWS APPROVES APPLICATION TO IMPORT ENDANGERED RHINO'S HEAD. The [Washington Post](#) (3/26, Fears, 5.17M) reports that "big game hunter Corey Knowlton's long wait to kill an endangered black rhinoceros in Africa is finally over." In a decision Thursday, the FWS "removed the last hurdle in the way of Knowlton's quest." According to the article, "more than a year after the wealthy Texan submitted the winning \$350,000 bid for a Namibian government permit at a Dallas auction to shoot the animal, the agency announced that it approved his application for a separate U.S. permit to import the animal's carcass back home as a trophy."

Additional coverage was provided by the [Dallas \(TX\) Observer](#) (3/27, 186K), the [Dallas \(TX\) Morning News](#) (3/26, 1.13M), the [AP](#) (3/26, Press), the [Houston \(TX\) Chronicle](#) (3/27, 2.28M), the [Daily Mail \(UK\)](#) (3/27, 4.78M), [Newsday](#) (3/27, 1.41M), [Reuters](#) (3/26), and [KTVT-TV Dallas \(TX\)](#) Dallas (3/26, 101K).

MEASURE WOULD PREVENT FWS FROM PROHIBITING TRADE OF ANTIQUE GUNS CONTAINING IVORY. [The Hill](#) (3/26, Devaney, 224K) reports that "Sens. Lamar Alexander (R-Tenn.) and Steve Daines (R-Mont.) are offering an amendment that would stop the Fish and Wildlife Service from cracking down on antique guns containing ivory." According to the article, "the federal government prohibits the trade of fresh ivory from endangered African elephants and rhinos, but the lawmakers argue that antique ivory used in handguns should be exempt from the rules."

LAWSUIT SEEKS TO PROTECT WILDFLOWERS THREATENED BY MINING. [KUSA-TV](#) Denver (3/26, 386K) reports that "conservation groups on Thursday filed a lawsuit against the U.S. Fish and Wildlife Service in the name of protecting two wildflowers whose habitat coincides with oil shale formations in Colorado and Utah." The service "last August denied Endangered Species Act protection to the two wildflowers — White River beardtongue and Graham beardtongue — one year after it proposed protecting the plants and nearly 76,000 acres of their habitat."

Also reporting on the story is the [Grand Junction \(CO\) Daily Sentinel](#) (3/27, 73K).

CO-OPS HOPEFUL THAT LISTING OF NORTHERN LONG-EARED BAT WILL INCLUDE MAINTENANCE, RIGHT OF WAY PROVISION. [Electric Co-op Today](#) (3/26, Cash) reports the US Fish & Wildlife Service plans to announce a protection plan for the northern long-eared bat, which has been plagued by the fungal disease white-nose syndrome, on April 2. The service has "proposed a provision that would enable co-ops to carry out right-of-way and maintenance work if it lists the bat as 'threatened' under the Endangered Species Act." NRECA CEO Jo Ann Emerson said, "We have been encouraged by the willingness of Fish and Wildlife Service staff to listen to our concerns. America's electric cooperatives need a final rule that will allow for hazardous tree removal in emergency situations and allow the expansion of existing rights of way needed to provide service to new members."

DESERT NATIONAL WILDLIFE REFUGE UNDERGOING ROAD WORK. The [Las Vegas Review-Journal](#) (3/27, 398K) reports that the Desert National Wildlife Refuge is undergoing road work. According to the article, a 4-mile stretch of Corn Creek Road is being paved from the highway to Desert's \$12 million visitor center that opened at the end of 2013. The project began March 18 and is scheduled for completion by the end of July.

CLEANUP OF NEASE CHEMICAL SITE PLANNED. [WYTV-TV](#) Youngstown, OH (3/26, 1K) reports that "the Ohio Environmental Protection Agency and the U.S. Fish and Wildlife Service are working on a plan to clean up the former Nease Chemical site on Route 14 in Salem." According to the article, "a meeting is scheduled for April 9 at 6 p.m. at the Salem Public Library to discuss how best to proceed with the cleanup." The article notes that "the restoration plan will address damaged natural resources from the release of hazardous substances from the now-closed facility."

NTSB RELEASES REPORT ON WEST BOYNTON, FLORIDA PLANE CRASH. The [South Florida Sun Sentinel](#) (3/26, Jacobson,

county reports that on Tuesday, the NTSB released a report on the Sunday plane crash in west Boynton, Florida. The plane crashed in the Arthur R. Marshall Loxahatchee National Wildlife Refuge, killing pilot David Whitney and student pilot William Mahn. Citing the NTSB's report, the Sun Sentinel notes that the plane flew over the refuge for roughly "25 minutes before it crashed, and there was no flight plan for the trip."

Securing America's Energy Future:

Onshore Energy Development:

USGS DATA SHOWS WATER USE FOR FRACKING HAS JUMPED IN THE LAST DECADE. The [National Geographic](#) (3/27, 32.58M) reports that "the evolution of hydraulic fracturing—and its demand on water supplies—can be seen in historical data covering nearly one million wells drilled over 63 years." An analysis from the USGS, "released in late January, notes that water-intensive horizontal or directional drilling increased dramatically between 2000 and 2010."

Offshore Energy Development:

SHELL CONDUCTS TESTING WITH ARCTIC OIL SPILL RESPONSE SYSTEM. The [FuelFix](#) (3/26, 7K) reports that "Shell's Arctic oil spill response system is undergoing drills in waters near Bellingham, Washington, with government officials observing the exercises." The company is "conducting the testing as it plans a new round of exploratory drilling in the Chukchi Sea north of Alaska later this year." BSEE Director Brian Salerno and Assistant Interior Secretary Janice Schneider are "among the officials set to watch as the containment system is deployed, at Shell's invitation."

Also providing coverage is the [Anchorage \(AK\) Dispatch News](#) (3/26, 146K).

NATIONAL PETROLEUM COUNCIL: DRILLING IN ARCTIC NEEDED NOW BECAUSE SHALE WON'T LAST. The [AP](#) (3/27, Fahey, 5.17M) reports the National Petroleum Council says in a study to be released today that the United States "should immediately begin a push to exploit its enormous trove of oil in the Arctic waters off of Alaska, or risk a renewed reliance on imported oil in the future." The US has dramatically "cut imports and transformed itself into the world's biggest producer of oil and natural gas by tapping huge reserves in shale rock formations" however "the government predicts that the shale boom won't last much beyond the next decade." An executive summary of a draft obtained by the AP says that "in order for the U.S. to keep domestic production high and imports low, oil companies should start probing the Arctic now because it takes 10 to 30 years of preparation and drilling to bring oil to market." The study was produced at Energy Secretary Ernest Moniz's request.

BILL TO PROPOSE USING OIL SPILL MONEY FOR LOUISIANA COLLEGES. The [AP](#) (3/26) reports that the Louisiana Board of Regents on Wednesday supported a proposal to steer money from the Gulf oil spill to public colleges. The bill would be sponsored by Rep. Walt Leger, D-New Orleans, who would call for placing extra moneys into a fund with interest being directed to help colleges. "Those dollars are separate from other civil penalties from violations of environmental laws, money that's required to be set aside for coastal restoration and protection projects," the article reports. The first \$1 billion in economic damages money has already been earmarked "to repay Louisiana's 'rainy day' fund and an elderly trust fund that have been used to plug budget gaps in recent years," the article reports. The proposal will be considered by lawmakers on April 13.

ADDITIONAL COVERAGE OF OFFSHORE DRILLING PROPOSAL. Additional coverage of the meetings being held on offshore drilling in the Atlantic was provided by the [South Strand News \(SC\)](#) (3/26) and the [Coastal \(GA\) Courier](#) (3/27, 16K)

Tackling America's Water Challenges:

BOR TO BEGIN NEW MELONES RESERVOIR RELEASES. The [Sonora \(CA\) Union Democrat](#) (3/27, 27K) reports that the BOR will "release more than 4 billion gallons of water from New Melones Reservoir into the Stanislaus River over the next couple of weeks for 'pulse flows' intended to push salmon smolts out to sea." According to BOR spokeswoman Erin Curtis, "the releases will reduce the amount of water stored in New Melones by about 15,000 acre-feet." According to Curtis, "the idea is to push the smolts into the Delta earlier because the river temperatures will likely warm to lethal levels prior to normal pulse flows in April."

BOR SEEKS NEW MANAGER FOR KLAMATH BASIN AREA OFFICE. The [Klamath Falls \(OR\) Herald And News](#) (3/27, 45K) reports that "a new manager for the Bureau of Reclamation (BOR) Klamath Basin Area Office is expected to arrive in May." According to acting area manager Brian Person, Sheryl Franklin is not returning. Franklin, "who joined the office in mid-May, was the KBAO area manager for seven months."

BOR AWARDS CONTRACT TO REPAIR COLORADO-BIG THOMPSON FLOOD DAMAGE. The [Sky-Hi Daily News \(CO\)](#) (3/27, 728) reports that the BOR has "awarded a contract totaling nearly \$1.5 million to Lillard and Clark Construction Company Inc., Denver, for repair to the Big Thompson Diversion Structure, an element of the Colorado-Big Thompson project that was damaged during the September 2013 flood." The work "to repair the Big Thompson Diversion Structure, located 8.5 miles west of Loveland, requires removal and restoration of flood-damaged concrete areas, installation of a precast concrete building, repair and replacement of electrical systems, gates, gear boxes, electric motors and other rehabilitation tasks." The project is expected to begin in April 2015.

Empowering Native American Communities:

LAWMAKERS WANT MORE STUDY OF TRIBAL RECOGNITION CHANGES. The [AP](#) (3/27, Melia) reports that "several congressional members called on the U.S. Interior Department Thursday to slow down an overhaul of the rules for granting federal recognition to American Indian tribes, saying more study is needed of problems that could result from lowering the bar for the coveted status." Rep. Rob Bishop "sent a letter with four other lawmakers outlining their concerns to Interior Secretary Sally Jewell." They wrote, "We are concerned that the Department's proposed rules fail to address many of the issues that have been identified and could create new problems that lead to unintended and unjustifiable outcomes."

Coverage was also provided by the [San Jose \(CA\) Mercury News](#) (3/27, Press, 500K), the [Houston \(TX\) Chronicle](#) (3/27, Media, 2.20M), the [Washington \(DC\) Post](#) (3/26, Michael Melia |, Ap, 5.17M), the [Minneapolis \(MN\) Star Tribune](#) (3/27, Media, 1.37M), the [New York \(NY\) Times](#) (3/27, Press, Subscription Publication, 9.97M), the [Columbus \(IN\) Republic](#) (3/27, 81K), the [Quincy \(IL\) Herald-Whig](#) (3/27, 77K), the [Daily Mail \(UK\)](#) (3/27, 4.78M), [Yahoo! News](#) (3/27, Media, 5.81M), and [WBNS-TV Columbus \(OH\)](#) Columbus, OH (3/26, 151K).

BIA SUPERINTENDENT WHO WAS STABBED IN STABLE CONDITION, SUSPECT IN CUSTODY. The [AP](#) (3/27) reports that the BIA superintendent who was “stabbed Wednesday is in stable condition.” According to Interior Department spokeswoman Nedra Darling, “Patrick F. Duffy is looking forward to a full recovery.” The BIA says “its Office of Justice Services is continuing to investigate the attack,” and. “it said on Wednesday evening a suspect was in custody.”

Coverage was also provided by the [Houston \(TX\) Chronicle](#) (3/27, 2.28M), the [Pierre \(SD\) Capital Journal](#) (3/27, 620), [KELO-TV Sioux Falls \(SD\)](#) Sioux Falls, SD (3/27, 18K), and [KSFY-TV Sioux Falls \(SD\)](#) Sioux Falls, SD (3/27, 3K).

JUDGE REJECTS CHALLENGE TO INTERIOR'S DECISION ON ONEIDAS. The [AP](#) (3/27, Virtanen) reports that “a federal judge on Thursday rejected a challenge to the U.S. Interior Department’s decision to put more than 13,000 acres in trust for the Oneida Indian Nation and exempt the property from state and local taxes.” Judge Lawrence Kahn held that “the decision in 2008 to put in trust most of roughly 17,000 acres proposed by the Oneida Indian Nation in Madison and Oneida counties didn’t exceed the department’s authority under the federal law intended to enable tribes to adapt to modern society.” Kahn “noted that the land around the Oneidas’ Turning Stone Casino, including gas stations and golf courses, were re-acquired by the tribe two centuries after they last possessed it.”

Additional coverage was also provided by the [Syracuse \(NY\) Post-Standard](#) (3/27, 438K), the [New York \(NY\) Law Journal](#) (3/27, 33K), the [Utica \(NY\) Observer Dispatch](#) (3/26, Cooper, 3K), the [San Antonio \(TX\) Express-News](#) (3/27, 674K), and [WNYW-TV New York \(NY\)](#) New York (3/27, 68K).

SYMPOSIUM TO DISCUSS SCHOOL-TO-PRISON PIPELINE IN INDIAN COUNTRY. The [Indian Country Today Media Network](#) (3/26, 49K) reports that “the Arizona State University Sandra Day O’Connor College of Law will hold a symposium and town hall meeting tomorrow, March 27, to discuss the ‘School-to-Prison Pipeline in Indian Country.’” The article notes that a “keynote address will be presented after lunch by Charles Roessel, director of the Bureau of Indian Education.”

WALL STREET JOURNAL SIDES WITH DEFENDANT IN EAGLE FEATHERS CASE . The [Indian Country Today Media Network](#) (3/26, 49K) reports that “after the federal government returned ceremonial eagle feathers earlier this month to pastor Robert Soto in the wake of a nine-year legal battle, the episode received scant media attention.” However, “the incident caught the eye of the editorial board of The Wall Street Journal, which saw fit to run an editorial on the absurdity of persecuting and prosecuting the longstanding spiritual practices of this member of the Lipan Apache Tribe of Texas and leader of the McAllen Grace Brethren Church.”

BIPARTISAN PUSH TO FIX INDIAN SCHOOLS LAUDED. In an editorial, the [Minneapolis Star Tribune](#) (3/27, Board, 1.37M) reports that this week in Washington, D.C., “bipartisan members of Minnesota’s congressional delegation wielded their collective clout on a critical education issue: obtaining adequate funding for the nation’s broken-down federally funded Bureau of Indian Education school system.” According to the paper, “with Congress in the midst of the 2016 appropriations process, this is an opportune time for Minnesota’s delegation, as well as other states’ representatives, to make it clear that years of declining or minimal funding for school construction must end.” It urges “follow-up work by all of them...to ensure that Congress acts.”

OPPOSITION TO PAMUNKEY’S RECOGNITION CRITICIZED. The [Richmond \(VA\) Times-Dispatch](#) (3/27, 322K) editorializes that “Virginia’s Pamunkey Indian tribe will soon learn whether it will receive federal recognition, which would make it eligible for various benefits.” The paper asserts that “there’s no doubt the tribe, which dates back centuries, deserves to be recognized.” But it notes that “outside interests want to deny the Pamunkey tribe what it rightfully deserves in order to continue lining their own pockets.”

[Office of Insular Affairs:](#)

GUAM'S CALVO, BORDALLO SEEK DETERMINATION OF POLITICAL STATUS. The [Marianas Variety](#) (3/27) reports that “Gov. Eddie Baza Calvo in February asked the Department of the Interior for a quarter of a million dollars to jumpstart the educational campaign to determine the island’s political status.” Also, “U.S. Congresswoman Madeleine Z. Bordallo last week said that the federal government had monies available for the education campaign regarding Guam’s political status, all island leaders needed to do was ask.”

[Top National News:](#)

OBAMA DEFENDS CFPB, PAYDAY LOAN REGULATIONS IN VISIT TO ALABAMA. Overshadowed by the Germanwings tragedy and the conflict in Yemen, the President’s trip to Alabama was not mentioned on the network newscasts, and was largely ignored by commentators on cable news shows. Local TV, print, and online coverage, meanwhile, cast a favorable light on plans to issue Federal payday loan rules, and put Obama’s comments – on both the regulations and the agency that will issue them, the CFPB – in the context of efforts to boost the middle class. By all appearances, that may have been the White House’s intention yesterday. In fact, [McClatchy](#) (3/27, Wise, Clark, Subscription Publication, 17K) notes that the bleachers at the Lawson State Community College gym where the President spoke “were festooned with a large blue sign reading, ‘Middle Class Economics.’” The [Birmingham \(AL\) Business Journal](#) (3/27, Phillips, Subscription Publication, 35K) says “the speech focused on progress made in making the American financial system stronger to prevent lending practices that caused the recession.” Obama also “focused on protecting families and students from shady borrowing practices, mentioning that four times as many payday loan establishments exist than McDonald’s restaurants.”

As [American Banker](#) (3/26, McKendry, Subscription Publication, 26K) puts it, “the creation of” the CFPB “has become a key part of” Obama’s “legacy,” and [USA Today](#) (3/26, Korte, 4.95M) notes that he denounced GOP “efforts to defund” it. [The Hill](#) (3/27, Fabian, 224K) quotes him as saying, “If Republicans in Congress send me a bill to unravel Wall Street reform, I will veto it.” In his remarks, says the [Montgomery \(AL\) Advertiser](#) (3/27, Taylor, 13K), Obama also tied the agency’s workings to his overall economic theme, saying, “I’m pushing for what I call middle-class economics – the idea that this country does best when everyone gets their fair shot, everyone does their fair share, and everyone plays by the same set of rules.” [WHNT-TV](#) Huntsville, AL (3/26, 5:36 p.m. CDT, 76K) showed Obama

saying, 'we've got to make sure working families feel more secure, that their paychecks can go a little further, that they are getting things like paid leave and child care not because they are luxuries, but because they support families.'

[Alabama Live](#) (3/27, Garrison, 502K) reports the Rev. Shannon Webster, pastor of First Presbyterian Church of Birmingham, has been "one of Alabama's most outspoken opponents of payday lenders," and Obama yesterday "praised" his "work and singled him out." Said the President, "Pastor Webster's one of the pastors leading the effort to protect consumers here in Alabama. ... At a public hearing a few years ago, he explained why he decided to work on this issue. 'When our people are trapped in debt,' he said, 'they cannot escape, and we're all hurt.' We're all hurt. And that's a simple statement but it captures so much of what it means to be an American." The [AP](#) (3/27, Pickler) notes that Obama also said, "You have some very conservative folks here in Alabama who...are reading their Bible, they're saying, 'Well, that ain't right.'"

[WSFA-TV](#) Montgomery, AL (3/26, 6:02 p.m. CDT, 30K) noted that the President "talked about a scenario where someone borrows \$500, but ends up, because of high interest rates, paying \$1000 in fees and interest." Obama was shown saying, "The idea is pretty common sense. If you lend out money you have to first make sure that the borrower can afford to pay it back. Don't lend somebody money if you know they can't pay it back. As Americans, we don't mind seeing folks make a profit, and if somebody lends you money, we expect you to charge interest on that loan, but if you're making that profit by trapping hard working Americans in a vicious cycle of debt, you've got to find a new business model."

[WPMI-TV](#) Mobile, AL (3/26, 5:05 p.m. CDT, 4K) also focused on the President's economic message, reporting that he spent "the majority of his speech focusing on White House policies he says will benefit the middle class in the final two years and beyond of his presidency." He also "took the opportunity to address the budget introduced this week by House Republicans." Obama was shown saying, "In Alabama, this new tax cut they're proposing, I have got to laugh because it would average \$2 million dollars per person in tax cuts, and it would apply to less than 50 people per year here in Alabama."

The [AP](#) (3/27, Pickler) reports that "before his remarks, Obama met with community leaders working on lending protections and later praised bipartisan efforts to address potentially catastrophic debt loads on families." During his visit, noted [WSFA-TV](#) Montgomery, AL (3/27, Robinson, 30K), the President also "supported the political efforts in Alabama to fight this predatory lending."

Around the rest of the country, local TV coverage of the CFPB's proposed rules and the President's endorsement of them was relatively light and most reports were brief. Typical of much of the local TV coverage were the stories on [WAND-TV](#) Champaign, IL (3/26, 5:25 p.m. CDT, 2K), [WSLS-TV](#) Roanoke, VA (3/26, 5:53 p.m. EDT, 17K), and [WCNC-TV](#) Charlotte, NC (3/26, 4:24 p.m. EDT, 77K).

On its website, the [New York Times](#) (3/27, Silver-Greenberg, Subscription Publication, 9.97M) reports the rules "could sharply reduce the number of unaffordable loans that lenders can make each year to Americans desperate for cash." Yesterday's "proposal covers a wide swath of credit, including certain loans backed by car titles and some installment loans that stretch longer than 45 days." CFPB Director Richard Cordray said in a statement, "We are taking an important step toward ending the debt traps that are so pervasive in both the short-term and longer-term credit markets." [Reuters](#) (3/27, Stephenson, Edwards) notes that following yesterday's announcement of a framework for the new regulations, a CFPB spokesman indicated the formal payday rules proposal will be unveiled later this year.

The [Philadelphia Inquirer](#) (3/27, Gelles, 617K) reports that "a White House fact sheet called" the agency's "rule-making plan 'an important first step toward writing rules to help prevent abuses in payday lending and protect consumers from getting trapped in expensive cycles of debt and fees.'" White House press secretary Josh Earnest told reporters in a conference call that the CFPB "is uniquely positioned to take this action," adding that "Republican efforts to undermine the CFPB are nothing more than attempts to undermine middle-class families all around the country."

In a blog post titled "Not Just Whistling Dixie," [US News & World Report](#) (3/27, Williams, 685K) reported that while studies find payday loans are particularly prevalent in the "Heart of Dixie," the profit "flows straight to Wall Street – one key reason industry lobbyists are continuing to fight the new regulations," including "defeating a cap on astronomical interest rates, described as the Holy Grail of consumer protection advocates." The [Wall Street Journal](#) (3/27, Nelson, Subscription Publication, 5.67M) notes that Dennis Shaul of the Community Financial Services Association of America (representing payday lenders) warned that the rules would curtail credit availability, and accused the CFPB of "listening to...critics" and producing research that is "neither extensive or thorough." The [AP](#) (3/27, Boak) quotes Shaul as saying, "The bureau is looking at things through the lens of one-size-fits-all."

SENATE CONSIDERS DOZENS OF AMENDMENTS ON WAY TO PASSING BUDGET PROPOSAL. In what is known as the "vote-a-rama," which accompanies the Senate's consideration of a budget, the upper chamber worked its way through dozens of amendments Thursday on the way to passing its budget blueprint. If Senators pass a plan on Friday, as expected, efforts to reconcile it with the proposal passed by the House earlier this week will begin when lawmakers return from a two-week recess. [The Hill](#) (3/26, Shabad, Carney, 224K) reported in its "Floor Action" blog that the amendment votes are expected to end Friday morning and Republican leaders are confident "their blueprint will be approved, though they have a tight margin." The [AP](#) (3/27, Espo, Werner) says Republicans "could afford three defections and still be assured a majority for the budget," but that "presented a challenge" as four Republican members "are likely or announced presidential contenders, and several more face potentially difficult 2016 re-election tests in swing states."

The [New York Times](#) (3/27, Weisman, Subscription Publication, 9.97M) describes the process as "one of those dubious traditions of Congress's upper chamber," in which the Senate opens "its well to an unlimited number of amendments to the budget blueprint for the coming fiscal year," adding that none of the amendments "are binding." However, the [AP](#) (3/27, Werner) says it is an "opportunity to score points or showcase one stance or another." For example, "likely GOP presidential candidates, Marco Rubio of Florida and Rand Paul of Kentucky, laid down markers with amendments boosting defense spending by \$76 billion in the budget," and the [Wall Street Journal](#) (3/27, Peterson, Subscription Publication, 5.67M) reports that Democrats offered amendments aimed at forcing Republicans into difficult votes that can be used against them in future campaigns.

The [Washington Times](#) (3/27, Dinan, 644K) reports that Democrats "walked away with dozens of votes they think can be used against the GOP in upcoming elections," while Republican leaders "said this year's budget includes instructions under a process known as 'budget reconciliation' that could pave the way for a major tax overhaul and, most politically charged, for a last major assault on Obamacare."

[Politico](#) (3/26, Raju, 669K) reported that the race for the 2016 Republican nomination was on display in the Senate Thursday as competition between Sens. Rubio, Paul, Ted Cruz and Lindsey Graham “was on vivid display as the Senate took up a Rubio plan to pump tens of billions of dollars more into the Pentagon budget.” Paul “blasted the idea because the new spending wasn’t offset by other cuts.” Cruz, “who’s pitching himself as a fiscal conservative who can appeal to the hawkish and libertarian wings of the GOP” was “caught in the middle,” but “ultimately sided with Rubio and Graham.”

Groups Push Pro-Gun Amendments. [The Hill](#) (3/26, Devaney, 224K) reported that Republicans and gun rights groups “are pushing for a number of amendments that would expand concealed-carry laws and block the Obama administration from issuing what opponents call a ‘backdoor’ ban on guns.” The Times reviews the various pro-gun amendments under consideration that “would expand concealed carry laws and block future gun control initiatives.”

AMERICAN COUSINS ACCUSED OF PLOTTING TERROR ATTACK, TRYING TO JOIN ISIL. Pierre Thomas reported on [ABC World News](#) (3/26, story 7, 1:25, Muir, 5.84M) that according to the FBI, “Army National Guardsman Hasan Edmonds had mass murder on his mind, hatching a sinister plot to kill his fellow soldiers. He was arrested at Chicago’s Midway Airport yesterday, allegedly en route to join and fight with ISIS.” The FBI also said that Edmonds “planned to give his cousin, Jonas Edmonds, his uniform...so he could wear it to get inside a nearby base. The likely target: Joliet Armory, where Hasan had trained. And the plan, to massacre soldiers there with a body count as high as 150.”

David Martin reported on the [CBS Evening News](#) (3/26, story 6, 1:50, Pelley, 5.08M) that “Hasan and Jonas wanted to join ISIS, taking the southern route to Syria through Egypt. If they couldn’t do that, Hasan told the informant, ‘I am content to fight and die here. Honestly, we would love to do something like the brothers in Paris did.’” The [New York Times](#) (3/27, Schmidt, Subscription Publication, 9.97M), however, reports the two sought to join ISIL in Libya, not Syria, which it says makes their case “unique compared with the others the Justice Department has brought against Americans accused of trying to join the Islamic State.” According to the Times, the cousins “planned to travel to Derna, Libya, a city that is controlled by” ISIL.

On [NBC Nightly News](#) (3/26, story 7, 0:30, Holt, 7.86M), Lester Holt reported briefly on the arrests as did Chris Wallace on [Fox News’ Special Report](#) (3/26, 1.53M). The [Chicago Tribune](#) (3/27, Meisner, 2.32M) reports that Lt. Col. Brad Leighton, a spokesman for the Illinois National Guard, said “Federal authorities recently informed the guard that Edmonds was under investigation, leading them to take ‘discrete but concrete steps’ to ensure he didn’t have access to equipment or computers.”

Editorial Wrap-Up:

NEW YORK TIMES. “A Dangerous Escalation In Iraq.” In an editorial, the [New York Times](#) (3/27, Subscription Publication, 9.97M) says President Obama “has escalated America’s involvement in the fight” against ISIL “without providing a shred of evidence showing how it could advance American interests, or what happens” when the airstrikes are done. The Times says if ISIL “is expelled from Tikrit, the Americans and Iraqis will need to bring security and govern in a way that respects the rights of all citizens.”

“Reducing Risks After the Germanwings Crash.” A [New York Times](#) (3/27, Subscription Publication, 9.97M) editorial says a requirement that two people must be in the cockpit “makes sense and all airlines should adopt it.” The Times says this is “a sensible step to reduce the risk that comes with leaving the lives of dozens or hundreds of people in the hands of just one pilot.”

“No Need To Prosecute Sgt. Bowe Bergdahl.” An editorial in the [New York Times](#) (3/27, Subscription Publication, 9.97M) that in prosecuting Bowe Bergdahl, military lawyers will have a difficult time “explaining why it’s worthwhile to prosecute a soldier the Army recruited despite significant concerns about his psychological state and who endured years of torture and privation during his captivity.” The Times adds that while “the American military has good reason to punish service members who desert.” it should “exercise discretion in extraordinary cases,” and “Bergdahl’s is certainly one.”

WASHINGTON POST. “The Mideast Breakdown.” In an editorial, the [Washington Post](#) (3/27, 5.17M) says while Israeli Prime Minister Benjamin Netanyahu “is hardly blameless for the Mideast impasse” it “makes no sense” for the Administration to “portray” him as “a single-handed spoiler.” The Post notes the “framework” for a Palestinian state “was also spurned by Palestinian leader Mahmoud Abbas” and the peace process has lacked momentum since that time. The Post says withdrawing US support for Israel in the Security Council “wouldn’t improve the regrettable status quo.”

“Protection From Gay Marriage.” The [Washington Post](#) (3/27, 5.17M) in an editorial says that while there may be “legitimate debate on the balance between religious liberty and laws intended to prohibit discrimination” with respect to same-sex marriage, state legislatures have been considering laws that “would go much further” even allowing “religious justification” for businesses’ “refusal to hire, employ or serve gay men or lesbians, or members of virtually any minority group.” The Post worries that some might use religion to justify discrimination against “lesbian, gay, bisexual or transgender people,” or “Jews or Muslims.” It is particularly concerned by state legislative efforts “to roll back local ordinances that prohibit discrimination based on sexual orientation,” urging governments to be “wary of embracing intolerance under the guise of protecting people of faith.”

“A ‘More Delightful’ Library.” In an editorial, the [Washington Post](#) (3/27, 5.17M) says that the question of “what to do with the Martin Luther King Jr. Memorial Library has vexed the District for a decade.” Now, there is an “exciting plan developed by library officials that we hope will have better success than the unrealized ideas of the past.” While “obstacles” to the remake “still exist,” library officials “seem to be well on their way, having hired architects and worked closely with the federal planning agency that will have to sign off on the design.”

WALL STREET JOURNAL. “Obama’s Mideast Vacuum.” The [Wall Street Journal](#) (3/27, Subscription Publication, 5.67M) editorializes that Saudi Arabia would not have engaged in its risky intervention in Yemen if it trusted that the US could remain a stabilizing force in the region. The Journal says the US must send a clear message about its willingness to help the Saudis.

“Tim Robbins, Capitalist Tool.” In an editorial, the [Wall Street Journal](#) (3/27, Subscription Publication, 5.67M) praises liberal actor Tim Robbins, who has come out against an effort by the Actors’ Equity Association to impose a minimum wage for smaller theater workers.

The Spitzer-Schneiderman Rules. The [Wall Street Journal](#) (3/27, Subscription Publication, 5.67M) in an editorial says that New York Attorney General Eric Schneiderman appears to have followed what it describes as the practice of former state AG Eliot Spitzer in disregarding or hiding evidence that would undermine the state's case against former AIG CEO Hank Greenberg. The paper argues that such was the case regarding testimony by Richard Napier, who served as a top witness for the state against Greenberg, and says that the US Justice Department had itself withheld notes regarding an interview with Napier at which staff from the New York AG's office were also present. The paper argues that the case against Greenberg should be dropped.

"Iran Keeps Its Nuclear Secrets." The [Wall Street Journal](#) (3/27, Subscription Publication, 5.67M) editorializes that Iran's refusal to cooperate with International Atomic Energy Agency (IAEA) inspectors should prevent any nuclear agreement from moving forward.

Hello Malia and Andrew,

We'd like to send out an invitation to interested stakeholders for the upcoming Honouliuli event and were wondering if it is ok to include Sen. Schatz's name (please see below) as a confirmed attendee.

We will most likely send this out around 3 p.m. this afternoon.

Thank you,
Jeremy

Dear Friends,

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinintelligence.com.

DATE: FRIDAY, MARCH 20, 2015 7:00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + Interior To Issue Federal Fracking Regulations Friday.
- + Secretary Jewell To Deliver Keynote Address At Leahy Center Environmental Summit.
- + Secretary Jewell Discusses Energy Policy.
- + Judge To Hear Arguments In King Cove Road Lawsuit.
- + UC Berkeley Alumni Have History Of Supporting National Parks.
- + Land Deal Appraised By Tax Assessor Barber Under Investigation.
- + Additional Coverage: Atlanta Selected For Interior Youth Initiative.
- + Measures Urged To Avoid Sage Grouse Listing.
- + Pullman Designation Lauded.

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + NPS Proposes Establishment Of Endowment.
- + NPS Faces Youth Challenge.
- + NPS Kicks Off Selma-to-Montgomery March.
- + Boston Still Trying To Get JEDD Payments From Cuyahoga Valley National Park Employees.
- + Bill Revived To Manage Grand Canyon Bison.
- + Zion National Park Confirms Employee Has Tuberculosis.
- + Grand Canyon Railroad Tracks To Be Sprayed With Herbicide.
- + Lost Family Of Tourists Found In Yosemite National Park.
- + Plans By Polygamist Group Raises Concerns.
- + NPS Urged To Release The Rim Of The Valley Report .
- + Protection Of Biscayne National Park Urged.

Bureau of Land Management:

- + Rep. McCollum Wants Nevada Rancher Bundy Brought To Justice.
- + BLM Working To Restore Gold Butte.
- + Bill Introduced To Spur Geothermal Energy.
- + BLM Sets Public Hearing For Carson City District Draft Resource Management Plan.

Fish and Wildlife Service:

- + GOP Lawmakers Says Protecting Coal Plants Will Help Manatees.
- + Alaska To Receive More Than \$2 Million In Grants For Wildlife.
- + Scientists Hunting For The Next Ebola Outbreak.
- + Experts Express Doubts About Bushmeat Guide.

US Geological Survey:

- + USGS Finds Drop In Seabird Population In North Pacific Waters.
- + USGS To Release New Earthquake Hazard Maps In Oklahoma.
- + Scientists Studying Deadliest US Landslide.

DOI in the News:

INTERIOR TO ISSUE FEDERAL FRACKING REGULATIONS FRIDAY. The [Wall Street Journal](#) (3/20, Harder, Subscription Publication, 5.67M) reports that the Obama Administration will issue new regulations aimed at creating a national standard for hydraulic fracturing on Friday. According to Interior Secretary Sally Jewell, the rules will set standards for the construction of wells and wastewater disposal, and require companies to disclose the chemicals they use. A government proposal from May 2013 estimated that the rules will cost the oil and gas industry between \$12 and \$20 million a year. In anticipation of the new regulations, Sen. James Inhofe (R-OK), chairman of the Senate Environment and Public Works Committee, introduced legislation on Thursday to prohibit federal regulation of fracking and instead give regulatory responsibility to states. According to the article, the bill has support from all Senate Republicans, but it not expected to become law.

[Politico](#) (3/19, 669K) reports the regulations will "offer oil and gas supporters new room to accuse President Barack Obama of seeking to throttle fossil-fuel production, despite his repeated boasts about the nation's booming energy supplies." The new regulations, Politico says, also "fall short of environmentalists' biggest demands for oversight of fracking operations — let alone some groups' calls for an all-out ban."

The [Houston Chronicle](#) (3/20, Dlouhy, 2.28M), the [FuelFix](#) (3/19, 7K), the [San Antonio Express-News](#) (3/20, 674K), and the [San Francisco \(CA\) Chronicle](#) (3/19, 2.21M) also provide coverage of this story.

SECRETARY JEWELL TO DELIVER KEYNOTE ADDRESS AT LEAHY CENTER ENVIRONMENTAL SUMMIT. The [AP](#) (3/20, 299K) reports that Interior Secretary Sally Jewell is "going to be in Vermont where she will speak at an environmental summit on the Lake Champlain waterfront in Burlington." She is "scheduled to give the keynote address Friday at the Leahy Center Environmental Summit."

Coverage by the AP was also picked up by the [Franklin \(IN\) Daily Journal](#) (3/20, 51K), the [Columbus \(IN\) Republic](#) (3/20, 81K), the [Houston Chronicle](#) (3/20, 2.28M), and the [Washington Times](#) (3/20, 644K).

SECRETARY JEWELL DISCUSSES ENERGY POLICY. On the [Diane Rehm Show](#) (3/19), Interior Secretary Sally Jewell talked “about the Obama administration’s energy priorities and why she wants tougher pollution rules for federal land, incentives for wind and solar and a focus on cutting carbon pollution.”

JUDGE TO HEAR ARGUMENTS IN KING COVE ROAD LAWSUIT. The [Alaska Journal of Commerce](#) (3/20, 14K) reports that Alaska’s “lawsuit to force Interior Secretary Sally Jewell to rethink her denial of a road out of King Cove is approaching its crescendo.” According to the article, “a motion for summary judgment and opposition to the state’s motion was filed March 9 by the Interior Department in the Alaska U.S. District Court on behalf of Jewell.”

UC BERKELEY ALUMNI HAVE HISTORY OF SUPPORTING NATIONAL PARKS. The [California Magazine](#) (3/19) reports that UC Berkeley alumni have had “a major influence on both launching and maintaining the National Park system,” according to Steven Beissinger, professor of wildlife ecology at Cal. The article notes that Berkeley alums “convened a conference at UC Berkeley on March 15, 1915, attended by 75 scientists, conservationists, politicians, park administrators and resource managers.” Now, “the university will commemorate this month’s centennial of the 1915 Berkeley conference on national parks with two events.” The article notes that “the spring 2015 Horace M. Albright Lecture in Conservation, America’s Two Best Ideas – Public Education and Public Lands, will be held on March 26, featuring a conversation with U.S. Secretary of the Interior Sally Jewell, University of California President Janet Napolitano, historian and author Douglas Brinkley, and UC Berkeley Chancellor Nicholas Dirks.”

LAND DEAL APPRAISED BY TAX ASSESSOR BARBER UNDER INVESTIGATION. The [Jackson \(MS\) Clarion Ledger](#) (3/19, 222K) reports that “federal authorities have been looking into Madison County Tax Assessor Gerald Barber and his role in a Louisiana land deal that scored almost \$3 million in profits for private citizens and a conservation group.” According to the article, “the lynchpin for the deal may have been an apparent inflated appraisal done by Barber’s firm, Barber & Mann Inc., that the U.S. inspector general called ‘noncompliant’ and unreasonably priced in an audit.” The article notes that “the appraisal of a tract of Louisiana swampland, which swiftly changed hands from two private owners to an environmental group to the government over the course of a few months in early 2011, is described as not complying with federal appraisal guidelines, misleading parish and government officials, and appearing ‘to contain an unreasonable price per acre.’”

ADDITIONAL COVERAGE: ATLANTA SELECTED FOR INTERIOR YOUTH INITIATIVE. Additional coverage that Atlanta is “among first 11 cities chosen for the Interior Department’s new youth initiative” was provided by the [Atlanta Daily World](#) (3/19, 1K) and the [South Dade \(FL\) News Leader](#) (3/20).

MEASURES URGED TO AVOID SAGE GROUSE LISTING. In an editorial, the [Eugene \(OR\) Register-Guard](#) (3/20, 172K) notes that “the Interior Department’s Bureau of Land Management and its U.S. Department of Agriculture counterpart, the U.S. Forest Service, manage most of the 67 million acres of sage grouse habitat,” and “these two agencies are preparing dozens of regional plans to protect the bird, supplemented by state-led efforts.” Averting a listing “depends on the strength of federal and state habitat conservation plans.” according to the editorial, “depending on the region, the sage grouse needs buffers around nesting sites, effective fire control strategies, limits on motorized vehicles during nesting and fire seasons, corridors to maintain or create contact among bird populations, siting rules for energy projects and campaigns to stop the spread of invasive species.”

In an editorial, the [Bend \(OR\) Bulletin](#) (3/20, 94K) welcomes measures to protect the sage grouse. It notes that FWS “officials from five soil and water conservation districts, including those in Crook and Deschutes counties, signed what are known as Candidate Conservation Agreements with Assurances on Wednesday in Juntura.” Also, “in Wyoming, Gov. Matt Mead and Dan Ashe, head of the U.S. Fish and Wildlife Service, have agreed to open the country’s first conservation bank for sage grouse.”

Additional Coverage: Wyoming Sage Grouse Conservation Bank System Announced. Additional coverage of the conservation bank for sage grouse established in Wyoming was provided by the [Natural Gas Intelligence](#) (3/20), the [North American Windpower](#) (3/20, 43K), the [Casper \(WY\) Star-Tribune](#) (3/20, 90K), the [Summit County \(CO\) Citizens Voice](#) (3/19, 506), the [Casper \(WY\) Journal](#) (3/20, 80K), and [Eagle Ford Texas](#) (3/20).

PULLMAN DESIGNATION LAUDED. For the “Congress Blog” of [The Hill](#) (3/20, Hunter, Sr., 224K), Bishop Louis Hunter, Sr. celebrates President Obama’s “recent protection of the historic Pullman neighborhood on the South Side of Chicago as a National Monument.” He says that “this is an appropriate commemoration of a site significant to our history and heritage, and demonstrates the president’s commitment to ensuring all of our children can find their history in our parks and monuments.” According to Hunter, “Pullman’s designation as a National Monument demonstrates President Obama’s commitment to protect places that tell the stories of all Americans.”

America’s Great Outdoors:

National Park Service:

NPS PROPOSES ESTABLISHMENT OF ENDOWMENT. The [Environment & Energy Publishing](#) (3/20, Subscription Publication, 705) reports that “lawmakers appear to be leaving the drafting of legislation to establish a National Park Service endowment up to the agency officials, according to interviews with House and Senate natural resources leaders yesterday.” House Natural Resources Chairman Rob Bishop said that “he hadn’t yet met personally” with NPS Director Jonathan Jarvis “since taking over the committee, which has jurisdiction over parks legislation, at the start of this year,” and noted that “it was probably more my fault than his.” The article notes that “in a House Appropriations subcommittee hearing earlier this week, Jarvis revealed that his nearly 100-year-old agency is planning to propose the establishment of an endowment that could raise money and help address some lingering problems as NPS enters its second century.”

NPS FACES YOUTH CHALLENGE. [CNN](#) (3/19, Bergeron, Redlitz, 2.05M) reports that “America’s national parks attracted a record-setting 292.8 million visits, but the typical visitor to the country’s biggest parks is edging closer to retirement age.” Also, “according to the

2016, which could lead to even more understaffing for the national parks.”

Also reporting on the story is [KDVR-TV Denver \(CO\)](#) Denver (3/19, 180K).

NPS KICKS OFF SELMA-TO-MONTGOMERY MARCH. The [Montgomery \(AL\) Advertiser](#) (3/19, 13K) reports that the NPS will “kick off its Selma-to-Montgomery march this evening at the Lowndes Interpretive Center at 8 p.m. with a talk from Stan Austin, the regional director of National Park Services and James Walker, the mayor of White Hall.” The article notes that “roughly 300 people coming from 26 different states went through the application process to take part in the march.”

BOSTON STILL TRYING TO GET JEDD PAYMENTS FROM CUYAHOGA VALLEY NATIONAL PARK EMPLOYEES. The [West Side \(OH\) Leader](#) (3/20, 33K) reports that “the Boston Township Board of Trustees discussed the income tax collection from Cuyahoga Valley National Park employees as part of the Boston-Peninsula Joint Economic Development District (JEDD) at the March 11 meeting.”

BILL REVIVED TO MANAGE GRAND CANYON BISON. The [AP](#) (3/20, Fonseca, 2.28M) reports that Sen. John McCain and “some of his colleagues in the Arizona delegation have revived a proposal to reduce the number of bison at the Grand Canyon and let authorized hunters keep the meat from the animals they kill.” The bill “comes as the Grand Canyon is developing a management plan for the bison that roam the northern reaches of Arizona, trampling vegetation, grazing in pristine meadows and polluting water resources.” If passed, “the legislation would require a management plan to be published within 180 days.”

ZION NATIONAL PARK CONFIRMS EMPLOYEE HAS TUBERCULOSIS. The [AP](#) (3/20, 2.28M) reports that “Zion National Park officials are telling the public not to worry after an employee there was diagnosed with tuberculosis.” In a statement, the park said “the employee worked in concessions and was diagnosed with the respiratory disease last week.” Spokesman David Eaker said “there was little, if any, risk to the public.”

Also reporting on the story are the [Salt Lake \(UT\) Tribune](#) (3/20, 405K) and the [Las Vegas \(NV\) Review-Journal](#) (3/20, 398K).

GRAND CANYON RAILROAD TRACKS TO BE SPRAYED WITH HERBICIDE. The [AP](#) (3/20, 2.28M) reports that “Grand Canyon rail officials say railroad tracks inside the park will be sprayed later this month to prevent the growth of invasive plant life.” The Grand Canyon Railway says it is working with the NPS “to apply herbicide March 25-26 along several tracks.” According to park officials, “the herbicide will inhibit growth of vegetation, lowering the risk of train wheels igniting a fire.”

LOST FAMILY OF TOURISTS FOUND IN YOSEMITE NATIONAL PARK. The [AP](#) (3/20, 547K) reports that “authorities say deputies found a family of four that spent nearly 24 hours lost in a forested area of Yosemite National Park thanks to their GPS and texted photographs of their location.” According to the Mariposa County Sheriff’s Department, “deputies and a U.S. park ranger tracked the family Wednesday afternoon to a dirt road in an area known as Chowchilla Mountain thanks to pings from their GPS and pictures of their location the family sent by text message.”

PLANS BY POLYGAMIST GROUP RAISES CONCERNS. The [AP](#) (3/19, Press, 5.17M) reports that “the brother of an imprisoned leader of a polygamist sect wants to double the amount of water available to the group’s compound in South Dakota, prompting concern by neighbors and law enforcement about a possible influx of members being displaced from an enclave on the Utah-Arizona border.” Seth Jeffs, “who originally sought to triple the amount of water the South Dakota ranch could draw, recently told the state he was scaling back his request to relieve the ‘fears and concerns’ of the U.S. Forest Service and the National Park Service.” William Hansen, chief of the Water Rights Branch of the NPS, said “its main concern is the effect an additional well, without stricter limitations on usage, could have on Wind Cave National Park, since the FLDS draws from the same aquifer that has been forming the cave for millennia.”

NPS URGED TO RELEASE THE RIM OF THE VALLEY REPORT . The [Los Angeles Daily News](#) (3/19, 317K) editorializes that Rep. Adam Schiff is “certainly not exaggerating when he terms ‘bureaucratic neglect’ the failure of the National Park Service to release a report, already delayed three times, on his proposal to create a Rim of the Valley National Recreation Area on wildlands stretching from the Santa Monica Mountains to the Angeles National Forest above Pasadena.” The paper also has “concerns about combining its management with the Santa Monica Mountains National Recreation Area, big enough already, and with including El Pueblo de Los Angeles, an urban area.”

The piece also appears at the [Long Beach \(CA\) Press-Telegram](#) (3/19, 163K).

PROTECTION OF BISCAYNE NATIONAL PARK URGED. For “The Blog” of the [Huffington Post](#) (3/20, Pierno, 281K), Theresa Pierno, Chief Operating Officer of the National Parks Conservation Association, writes that in recognition of World Water Day on March 22, Point Reyes National Seashore, “our first marine wilderness on the west coast at Drakes Estero, comes to mind along with opportunities that exist to protect invaluable national park resources across the country like Biscayne National Park along on the opposite coast in South Florida.” She says that “with great progress made at Point Reyes National Seashore with the recent marine wilderness designation, let’s do all we can now to protect Biscayne National Park by creating a marine reserve to protect its magnificent coral reefs, replenish native fish to the park, and bring Biscayne back to its historic status as a world class national park.”

Bureau of Land Management:

REP. MCCOLLUM WANTS NEVADA RANCHER BUNDY BROUGHT TO JUSTICE. The [Environment & Energy Publishing](#) (3/20, Subscription Publication, 705) reports that “Nevada rancher Cliven Bundy and his armed supporters who protested the Bureau of Land Management’s roundup of Bundy’s cattle last April broke the law and should be brought to justice, a Minnesota congresswoman said this morning.” Rep. Betty McCollum “pressed BLM Director Neil Kornze on what the government has done to deter illegal grazing on public lands and to protect agency employees who have been threatened by anti-government violence.” But the questioning “put Kornze in a bind, as Interior Department officials for several months have been deferring to the FBI and Justice Department to handle the government’s response to the Bundy standoff.”

BLM WORKING TO RESTORE GOLD BUTTE. The [St. George \(UT\) Spectrum](#) (3/19, 46K) reports that “JJ Smith, restoration project

species and plants at the Friends of Gold Butte Education Series Wednesday at the Community Theatre.” Smith said “he and his restoration crew do quite a few restoration projects in desert environments.” He added, “They’re very difficult and it takes a lot of time and money. The chances of success are sometimes very low. Mainly because there’s not much water, that makes restoration here more difficult than anywhere else I’ve worked. And because we have pre-major challenges like red brome grass.”

BILL INTRODUCED TO SPUR GEOTHERMAL ENERGY. [KTVZ-TV](#) Bend, OR (3/20, 4K) reports that Senators Ron Wyden and Jeff Merkley “introduced legislation Thursday to encourage geothermal energy production on public lands.” The Geothermal Production Expansion Act “prevents speculative bidders from driving up the price of leases for developers seeking to use the land for geothermal projects.” The legislation “streamlines the federal geothermal leasing program by allowing for the non-competitive leasing of a limited amount of federal land at fair market value to spur the expansion of geothermal energy on already identified ‘hot spots.’”

BLM SETS PUBLIC HEARING FOR CARSON CITY DISTRICT DRAFT RESOURCE MANAGEMENT PLAN. The [Reno \(NV\) Gazette-Journal](#) (3/19, 168K) reports that “after open houses were conducted around the district in January, the Bureau of Land Management Carson City District announced an upcoming public hearing on the Carson City District Draft Resource Management Plan concerning land issues.” The hearing will be held from 6 to 8:30 p.m. March 19 at the Churchill County Commission Chambers, 155 N. Taylor St. in Fallon.

Fish and Wildlife Service:

GOP LAWMAKERS SAYS PROTECTING COAL PLANTS WILL HELP MANATEES. [McClatchy](#) (3/20, Cockerham, Subscription Publication, 17K) reports that the fact that “some two-thirds of Florida’s endangered manatees rely on discharge waters from power plants for winter warmth” is being used by congressional Republicans “to challenge the centerpiece of President Barack Obama’s agenda to fight climate change, a plan to slash carbon emissions that could force large-scale closures of coal plants.” The chairman of the House Committee on Natural Resources confronted FWS Director Dan Ashe “on the issue at a budget hearing Thursday.” Rep. Rob Bishop said the FWS is “required to formally consult on any plan that could pose problems for an endangered species.” According to the article, “after Ashe acknowledged under questioning that the Fish and Wildlife Service did not consult with the EPA on the power plant rules, Bishop displayed in the committee room a photo of manatees in the Big Bend discharge canal, and he noted it is ‘considered a primary warm-water site for the manatees.’”

Coverage by McClatchy was also picked up by the [Miami Herald](#) (3/20, 694K).

ALASKA TO RECEIVE MORE THAN \$2 MILLION IN GRANTS FOR WILDLIFE. The [Alaska Native News](#) (3/20, 245) reports that the FWS “recently announced that more than \$2.0 million in new funding will be available to the State of Alaska through the State Wildlife Grant program in fiscal year 2015.” The grants “provide funds for conservation work across the state, including more than \$680,000 for work to reintroduce the endangered wood bison to Alaska after having been wiped out for more than a century.”

SCIENTISTS HUNTING FOR THE NEXT EBOLA OUTBREAK. The [Washington Post](#) (3/20, A1, Sieff, 5.17M) reports in a front-page article that a team of US-funded researchers is “hunting deep in a remote rain forest” in Congo, looking for an answer about where the Ebola virus hides between human epidemics. The paper notes that the answer appears to lie in the vast “African jungle where gorillas, bats and other animals suspected of spreading the virus share a shrinking ecosystem.” The article notes that if “scientists can pinpoint the carriers, and how Ebola is transmitted between them, future epidemics will be easier to anticipate, or even prevent.”

EXPERTS EXPRESS DOUBTS ABOUT BUSHMEAT GUIDE. The [AllAfrica](#) (3/20, 7K) reports that “conservation biologists studying the effects of bushmeat hunting in Africa have criticised a UN Food and Agriculture Organization (FAO) report for making unrealistic claims about the chances of protecting wildlife from commercial hunters.” The Bushmeat sourcebook, launched to mark World Wildlife Day on 3 March, “does little to create the “enlightened self-interest” among policymakers and the game industry that is vital to maintain a viable population of bushmeat species, including bats, monkeys and wild pigs,” according to experts. Responding to the online guide, Richard Ruggiero, head of international conservation at the FWS, says “he doubts it will lead to the tougher regulation needed to prevent commercial operations from taking over from subsistence hunting and wiping out the most valuable food sources.”

US Geological Survey:

USGS FINDS DROP IN SEABIRD POPULATION IN NORTH PACIFIC WATERS. The [AP](#) (3/20, Joling, 2.28M) reports that “the number of seabirds, including gulls, puffins and auklets, has dropped significantly in the Gulf of Alaska and northeast Bering Sea, a possible consequence of warmer waters, according to a preliminary federal analysis of nearly 40 years of surveys.” USGS experts “found the seabird population density declined 2 percent annually from 1975 to 2012 in the northeast North Pacific, said John Piatt, research wildlife biologist at the USGS Alaska Science Center.”

Coverage by the AP was also picked up by the [Washington Post](#) (3/19, Press, 5.17M), the [Anchorage \(AK\) Dispatch News](#) (3/19, 146K), and the [Kenai \(AK\) Peninsula Clarion](#) (3/19, 18K).

USGS TO RELEASE NEW EARTHQUAKE HAZARD MAPS IN OKLAHOMA. The [AP](#) (3/20, 81K) reports that the USGS is “expected to release a new hazard map for earthquakes in Oklahoma.” According to the article, “data collection has continued with the help of the Oklahoma Geological Survey after the state recorded more earthquakes of a magnitude of 3.0 and higher last year than California.” Dan McNamara, USGS research geophysicist and lead author of the paper, said in a news release, “By identifying the faults, we are providing some guidance about where major earthquakes can happen.”

SCIENTISTS STUDYING DEADLIEST US LANDSLIDE. The [AP](#) (3/20, 685K) reports that “the deadliest landslide in U.S. history,” is “significantly enhancing scientists’ understanding,” according to Jonathan Godt, coordinator for the USGS’ landslide hazard program. He said, “The key research goal is to identify the basic reasons of why the landslide traveled so far and so fast.” Godt said the USGS “hopes that over the next eight years it will be able to chart geologic hazards across the country using advanced technology, but the plan is only partially funded.”

Renewable Energy:

MEETING HELD ON SUNZIA PROJECT. The [El Defensor Chieftain \(NM\)](#) (3/19, 10K) reports that many questions surround the SunZia Transmission Line, and “more than 150 people attended a meeting March 11 with State Land Commissioner Aubrey Dunn, SunZia representatives, Bureau of Land Management (BLM) officials, the New Mexico Renewable Transmission Authority (RETA) and more.” For supporters, “it’s a way to create jobs, increase property tax revenue on the state trust lands and other designated plots, as well as increase renewable energy.” However, “for the opposition, it’s a threat to national security, Socorro County infrastructure, possible species’ migratory patterns, health and wellness and private land entitlement.”

Onshore Energy Development:

CONGRESSMEN RAISE QUESTIONS STREAM BUFFER ZONE RULE. The [Harlan \(KY\) Daily Enterprise](#) (3/20, 19K) reports that Rep. Harold “Hal” Rogers “continued questions on the Obama Administration’s anti-coal policies and job-killing regulations this week on Capitol Hill.” In a joint-letter to Interior Secretary Sally Jewell, Rogers and Rep. Evan Jenkins “expressed concerns about the Office of Surface Mining Reclamation and Enforcement’s (OSM) efforts to develop a sweeping and unnecessary revised stream buffer zone rule.” The letter cites “mismanagement within the agency and a lack of transparency with coal producing states during the stream buffer zone rulemaking process.”

The piece also appears at the [Middlesboro \(KY\) Daily News](#) (3/20, 433).

LAWSUIT TARGETS APPROVAL OF WISHBONE HILL COAL MINE PERMITS. The [Anchorage \(AK\) Dispatch News](#) (3/19, 146K) reports that “a coalition of environmental groups this week sued the federal Office of Surface Mining Reclamation and Enforcement, saying the agency erroneously supported invalid state permits for the Wishbone Hill coal mine near Sutton”. According to the article, “the Alaska Department of Natural Resources’ mining division last October approved Usibelli’s request for five-year permit renewals.” However, “the groups argue the permits actually expired in 1996 and the Office of Surface Mining violated federal laws by not forcing the state to require a new permit process.”

BLM ANNOUNCES RESULTS OF ELKO OIL, GAS LEASE SALE. The [Reno \(NV\) Gazette-Journal](#) (3/19, 168K) reports that the BLM “generated \$55,383 during its quarterly oil and gas competitive lease sale on March 10 in Reno, selling 13 parcels comprising about 15,244 acres in Elko and Eureka counties.” The bureau “offered 24 parcels totaling 25,882.47 acres.”

SEN. WYDEN ASKS BLM TO EXTEND COMMENT PERIOD FOR BOARDMAN-TO-HEMINGWAY POWER LINE. The [Baker City \(OR\) Herald](#) (3/20, 8K) reports that Sen. Ron Wyden has “asked the BLM to extend the comment period, which is scheduled to end today, for the proposed Boardman-to-Hemingway power line.” Wyden, “who had town hall meetings in several Eastern Oregon locations recently, including Baker City, wants the BLM to extend the comment period for 60 days.”

MCCONNELL URGES STATES TO OPPOSE OBAMA’S “WAR ON COAL.” The [New York Times](#) (3/19, Davenport, Subscription Publication, 9.97M) reports Senate Majority Leader McConnell has begun “an aggressive campaign to block President Obama’s climate change agenda in statehouses and courtrooms across the country, arenas far beyond Mr. McConnell’s official reach and authority.” His campaign is aimed at stopping a set of EPA regulations requiring states to reduce carbon pollution from coal-fired power plants, but since he is “limited in how he can use his role in the Senate to block regulations, he has taken the unusual step of reaching out to governors.”

US APPELLATE COURT RULES DOCTOR LACKS STANDING IN FRACKING DISCLOSURE CASE. [Reuters](#) (3/20, Rascoe) reports that an appellate court dismissed a case that challenges a Pennsylvania law limiting the disclosure of chemicals used in hydraulic fracturing by healthcare professionals. The court ruling is characterized as a victory for oil and gas companies.

The [Scranton \(PA\) Times Tribune](#) (3/20, 181K) reports that the dismissed lawsuit argued that a Pennsylvania doctor “had an ethical obligation to share information regarding fracking fluid ingredients with his patients, other medical professionals and the general public ‘to advance scientific knowledge.’” The appellate court concurred with a lower court’s ruling that Dr. Alfonso Rodriguez lacked legal standing to bring the lawsuit, noting that “federal law requires a plaintiff show he or she suffered an actual injury.”

Offshore Energy Development:

BOEM EXPECTS TO ISSUE KEY DECISION ON CHUKCHI SEA BY END OF MARCH. The [Alaska Journal of Commerce](#) (3/20, 14K) reports the BOEM “expects to issue a final decision by March 31 on a revised environmental impact statement of the Chukchi Sea 2008 Outer Continental Shelf lease sale that has been contested in court by environmental groups, the director of the agency said March 13.” BOEM Director Abigail Hopper also said that “Shell will likely not have to submit a revised oil spill containment and cleanup plan developed in 2012 and approved by the BOEM.”

BP CLASHES WITH STATES, FEDS OVER GULF OF MEXICO HEALTH. The [Washington Examiner](#) (3/20, 315K) reports that “sniping between BP and the governments affected by the oil giant’s Gulf of Mexico 2010 oil spill is reaching a fever pitch as the five-year anniversary of the largest spill in U.S. history approaches.” The article notes that “the latest episode in the fallout from the April 2010 incident revolves around a report BP released this week that said the data that has been collected ‘do not indicate a significant long-term impact to the population of any Gulf species.’” But “trustees for the Natural Resource Damage Assessment, a body established by a 1990 law to investigate the damage to natural resources from oil spills, slammed the report as being premature and disingenuous.”

ADDITIONAL COVERAGE OF GULF OF MEXICO LEASE SALE. Additional coverage of the latest central US Gulf of Mexico lease sale was provided by [Politico](#) (3/19, 669K), the [Houston Business Journal](#) (3/20, Blum, Subscription Publication, 65K), the [Energy Business Review](#) (3/20) the [Natural Gas Intelligence](#) (3/20), and [E&P Magazine](#) (3/20).

ADDITIONAL COVERAGE OF MEETINGS ON OFFSHORE DRILLING. Additional coverage of the meetings being held on offshore drilling was provided by the [Island Free Press \(NC\)](#) (3/20), the [Coastal \(GA\) Courier](#) (3/20, 16K), the [Vineland \(NJ\) Daily Journal](#) (3/19,

PUBLIC URGED TO COMMENT ON OFFSHORE DRILLING. In an editorial, the [Hilton Head \(SC\) Island Packet](#) (3/19, 81K) notes that “the Town of Hilton Head Island this week joined the parade of coastal South Carolina governments opposing offshore drilling for gas and oil, and the window for the public to take a stand is about to close.” The paper urges “everyone to ask questions, keep an open mind, form an opinion and take a stand.”

Tackling America’s Water Challenges:

FORMER BOR COMMISSIONER CALLS FOR AGENCY’S ABOLISHMENT. The [High Country \(CO\) News](#) (3/20, 74K) reports that “last month, Clinton-era Bureau of Reclamation Commissioner Daniel Beard published a book calling for the abolishment of his own former agency.” The article notes that “dam removal and the obliteration of a longstanding federal agency are only two of Beard’s many suggestions for dealing with persistent drought.” In an interview, Beard discussed “his book and how water policy should evolve in anticipation of climate change.”

GOV. BROWN ANNOUNCES \$1 BILLION EMERGENCY DROUGHT PLAN. The [Salem \(OR\) Capital Press](#) (3/19, 113K) reports that “farm groups offered tepid praise for a \$1 billion drought relief package Gov. Jerry Brown and top California lawmakers unveiled March 19 to speed up delivery of voter-approved bond money for such projects as flood control and securing safe drinking water.” The article notes that “the plan details conservation, water recycling, expanded storage and other efforts to secure California’s water future.”

PROJECT FOR LAKE CLE ELUM SOCKEYE AWAITS FUNDING. The [Yakima \(WA\) Herald-Republic](#) (3/19, 86K) reports that to improve passage for young sockeye salmon in Lake Cle Elum, the BOR “designed a first-of-its-kind \$100 million system to let fish swim downstream safely despite variations in the lake levels.” However, “the project, included in the Yakima Basin Integrated Plan for water management, awaits congressional authorization and funding.”

SUPPORT FOR BAY DELTA CONSERVATION PLAN URGED. In an op-ed for the [Woodland \(CA\) Daily Democrat](#) (3/19, 27K), Ron Miller, the executive secretary of the Los Angeles/Orange Counties Building and Construction Trades Council, writes that California’s “system of aging levees, aqueducts and pipes — that supplies water to 25 million Californians and 3 million acres of farmland — is outdated and at risk of collapse in the event of a major earthquake or flood.” Miller argues that the Bay Delta Conservation Plan would “address the most severe vulnerabilities of California’s water delivery system.” He claims that “the BDCP will improve the safety of our water system by fixing aging and outdated infrastructure, relying on the most innovative technologies and engineering practices.”

Empowering Native American Communities:

BIA PROPOSES NEW REGULATIONS TO IMPROVE CHILD WELFARE PRACTICES. [The Hill](#) (3/20, Devaney, 224K) reports that the BIA is “proposing new regulations to improve child welfare practices for Indian children.” The proposed regulations would “advise state courts on how to handle Indian child custody proceedings, such as providing notice to the parents involved, terminating parental rights and adoptions.” The rules would also “address how the courts should respond to requests to transfer the cases to tribal courts and placement preferences.”

BILL WOULD AMEND CARCIERI RULING. The [Indian Country Today Media Network](#) (3/19, 49K) reports that “on March 12, Sen. Jon Tester (D-MT) introduced S. 732, ‘A bill to amend the [Indian Reorganization] Act of June 18, 1934, to reaffirm the authority of the Secretary of the Interior to take land into trust for Indian tribes.’” The legislation “aims to repair the US Supreme Court’s ruling in *Carcieri v. Salazar*, an anti-Indian sovereignty decision that curbed the Interior Secretary’s authority to take land into trust for tribes recognized after 1934 when the Indian Reorganization Act (IRA) was passed.” According to the article, “Tester’s bill ‘cleanly’ fixes the Carcieri ruling by striking ‘any recognized Indian tribe now under Federal jurisdiction’ and inserting ‘any federally recognized Indian tribe’ – without conditions or exceptions.”

STANDING ROCK TRIBE CONSIDERS LAND BUY BACK. The [Aberdeen \(SD\) News](#) (3/20, 47K) reports that “because the landowner pool on American Indian reservations has grown diluted through the years, tribes are attempting to buy back swaths of property in an effort to enhance development opportunities.” Michelle LeBeau of the Standing Rock Sioux Tribe, who is a representative of the Land Buy-Back Program for Tribal Nations, “stopped in Aberdeen and other towns around the state on Tuesday to answer questions about the effort.” During a meeting Tuesday, LeBeau said, “There are a lot of people who don’t realize they have land. There are also people who are non-enrolled members who own land. What we’re trying to do is to combat fractionation, which is a big issue in tribal communities.”

NEW MEXICO HOUSE APPROVES GAMBLING COMPACT AS DEADLINE DRAWS NEAR. The [AP](#) (3/20) reports that “the New Mexico House of Representatives has approved a gambling compact negotiated by American Indian tribes and Gov. Susana Martinez’s office.” The compact still needs the approval of the Interior Department.

Also reporting on the story is the [A buquerque \(NM\) Journal](#) (3/20, 238K).

TRIBE WITHDRAWS FROM PROPOSED CASINO IN SOUTHEAST KANSAS. The [AP](#) (3/20, 299K) reports that “an American Indian tribe based in Oklahoma is pulling out of a partnership seeking to build a casino in southeast Kansas because of hostility from Gov. Sam Brownback’s administration, the tribe’s chairman said.” John Berrey, chairman of the Quapaw Tribe, said Wednesday that “the tribe will not be partners with developer Phil Ruffin in a proposed Emerald City Casino & Resort north of Pittsburg.” Berrey said “the withdrawal is in response to a federal lawsuit filed by Kansas Attorney General Derek Schmidt seeking to stop the tribe from expanding its Downstream Casino facility in Oklahoma onto land the tribe owns in Kansas.”

Office of Insular Affairs:

REP. TAKAI SEEKS \$185M SOUGHT FOR MIGRANTS. The [Pacific \(GUM\) Daily News](#) (3/20, 61K) reports that Rep. Mark Takai is “leading new efforts in Congress to increase annual funding for regional migrant costs from \$30 million to \$185 million.” Takai’s legislation states, “Insufficient sums have been appropriated to cover the costs incurred by Guam, the Commonwealth of the Northern Mariana

from the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.”

Top National News:

WHITE HOUSE DISMISSES NETANYAHU’S ATTEMPTS TO BACKTRACK ON PALESTINIAN STATEHOOD. Israeli Prime Minister Netanyahu’s comments yesterday on Palestinian statehood are being cast by media outlets as backtracking on statements he made ahead of Tuesday’s election. At the same time, reports universally say the White House dismissed the Israeli leader’s comments as it suggested that the US may no longer block a UN vote on Palestinian statehood. The developments were reported on all three network newscasts last night, which devoted a total of just over five-and-a-half minutes to the story, and are also generating front-page headlines this morning.

For example, [ABC World News](#) (3/19, story 8, 0:25, Robach, 5.84M) said Netanyahu seemed to backtrack on his “last-minute campaign promise,” while [NBC Nightly News](#) (3/19, lead story, 3:20, Holt, 7.86M) reports that just “days after his stunning 11th hour campaign declaration that there would not be a Palestinian state on his watch...Netanyahu did an equally stunning turn-about” during an interview with Andrea Mitchell. Netanyahu said in the interview, “I haven’t changed my policy. I don’t want a one-state solution. I want a sustainable peaceful two-state solution. But for that, circumstances have to change.” Mitchell said “the White House wasn’t buying his explanation.”

White House officials, says the [Los Angeles Times](#) (3/20, Lauter, 3.49M), “made it clear that the president is not forgetting Netanyahu’s” remarks earlier this week. “We take him at his word,” press secretary Josh Earnest said. The [CBS Evening News](#) (3/19, story 4, 1:55, Pelley, 5.08M) similarly said that despite Netanyahu’s assurance that his comment was purely “campaign rhetoric,” the Administration, “frustrated by Netanyahu’s decision to play politics with the peace process, remained wary.” The President called Netanyahu to congratulate him on his election victory, but he told Netanyahu “nothing he said today changed [his] mind about reassessing how to achieve a two-state solution.”

The [New York Times](#) (3/20, A1, Rudoren, Subscription Publication, 9.97M) says Netanyahu’s “new assertions appeared to do nothing to assuage an infuriated Obama administration.” According to “a White House official who spoke without authorization to detail the private conversation,” Obama told Netanyahu “directly that the United States would have to ‘re-assess our options’ after the prime minister’s ‘new positions and comments’ on the two-state solution.” The Times notes that the “formal White House account of the call made no mention of the criticism.” [Reuters](#) (3/20, Spetalnick, Chiacu) also reports the comments by the unnamed White House official.

On [CNN’s Situation Room](#) (3/19, 5:02 p.m. ET, 554K), Jim Acosta added, “Simply put, the White House is not buying what...Netanyahu is selling today.” In fact, White House officials “are suggesting they may allow votes at the United Nations in favor of a Palestinian state. As you know, that is a measure the US has blocked before.” [Fox News’ Special Report](#) (3/19, 6:00 p.m. ET, 1.53M) also noted the “speculation the US might try to pressure Israel into a peace deal with the Palestinians by reevaluating its support for the Jewish state at the United Nations.” Earnest is quoted as saying, “Because of his indication he’s prepared to withdrawal from previous commitments to a two-state solution that does and has prompted us to reevaluate our approach to that matter.”

Although Netanyahu, the [AP](#) (3/20, Deitch) reports, “backtracked,” Earnest “reiterated the White House view that Netanyahu’s pre-election comments...would mean the US would have to reconsider its approach to Israel,” but he “did not go into specifics.” [USA Today](#) (3/20, Chabin, 4.95M), however, quotes Earnest as saying, “I’m not suggesting that any policy decision has been made at this point.” The [Washington Post](#) (3/20, A1, Murphy, 5.17M) too says Netanyahu “backtracked,” but the “head-spinning pivot did not convince White House officials, who suggested Thursday that Netanyahu’s maneuvers could prompt a shift in US policy toward Israel, particularly in the United Nations.” In a “sign of the Obama administration’s extreme frustration,” Earnest “denounced Netanyahu’s actions as ‘cynical, divisive election-day tactics’ that are unworthy of the values” that the two nations share.

[McClatchy](#) (3/20, Greenberg, Subscription Publication, 17K) says yesterday marked “the second day in a row in which Earnest used intentionally undiplomatic wording to describe Netanyahu’s actions.”

The [Wall Street Journal](#) (3/20, A1, Casey, Lee, Subscription Publication, 5.67M) reports that Administration officials said yesterday that Netanyahu’s comments have made it difficult for the White House to accept Netanyahu’s attempt to clarify his remarks. “If he had consistently stated that he remained in favor of a two-state solution, we’d be having a different conversation,” State Department spokeswoman Jen Psaki said.

The [Huffington Post](#) (3/20, Spetalnick, Chiacu, 281K), under the banner “White House Not Buying It,” similarly reports on yesterday’s events, as does [Politico](#) (3/19, Wheaton, 669K), [AFP](#) (3/20, Biddle, Beatty, Ward), and [The Hill](#) (3/19, Fabian, 224K), among other outlets.

David Ignatius writes in his [Washington Post](#) (3/20, 5.17M) column that any moves by the Administration at the UN “would open a wide and potentially destabilizing breach between the two allies, and the administration’s consideration of them now is probably partly tactical.”

Charles Krauthammer, meanwhile, writes in his [Washington Post](#) (3/20, 5.17M) column that “of all the idiocies uttered in reaction to...Netanyahu’s stunning election victory, none is more ubiquitous than the idea that peace prospects are now dead because Netanyahu has declared that there will be no Palestinian state while he is Israel’s prime minister.” While Krauthammer says he “understand[s] the crushing disappointment of the Obama administration...blaming Netanyahu for banishing peace, however, is mindless.”

Fareed Zakaria writes in his [Washington Post](#) (3/20, 5.17M) column that Israel’s great vulnerability is its Arab population, not Iran, and says rejecting a two-state solution will not serve its best interests in the long run.

Erekat: Netanyahu Never Really Believed In Two-State Solution. Calling into [CNN’s Situation Room](#) (3/19, 7:09 p.m. ET, 554K), Palestinian chief negotiator Saeb Erekat said, “As Netanyahu is concerned – I don’t think he was ever a two-stater. I think it was one of the rare honest moments when he...was saying the truth. This man since he came to office in 1996 and 2009 to now he did nothing but undermine a two-state solution. I take this very, very seriously. I think his election is very, very dangerous. ... And he needs to be held accountable.”

that the leaders of Israel's "newly united, newly empowered Arab political faction," who won 13 seats in Tuesday's election, want "seats on the interior, finance, education, legal, employment and social-affairs committees" in the Knesset, and they "hope to gain influence over the curriculum in Arab-sector schools and increase the budgets for Arab towns."

McDonough To Address J Street Conference. [Politico](#) (3/20, Lerner, 669K) reports White House chief of staff Denis McDonough will deliver the keynote address at J Street's national conference on Monday. [The Hill](#) (3/19, Hensch, 224K) also reported on McDonough's speech.

Boehner To Visit Israel. [Ha'aretz](#) (3/20, Ravid, 235K) reports Speaker Boehner is expected to visit Israel "in about a week." According to the newspaper, the trip was arranged before this week's election in Israel, but it "is likely to be a 'victory celebration'" for Netanyahu and Boehner.

NYTimes A1 Analysis: Netanyahu's Reelection "Complicates Life" For Clinton. The [New York Times](#) (3/20, A1, Horowitz, Subscription Publication, 9.97M) reports on its front page that while Netanyahu's reelection "has reverberated through American politics...mostly it has complicated the life" of Hillary Clinton as she "moves closer to making her campaign for president official." Clinton, says the Times, "now faces a deepening polarization among Jewish Democrats" over Netanyahu and how the US "should deal with his government."

HOUSE, SENATE BUDGET COMMITTEES PASS GOP SPENDING PLAN. The House Budget Committee advanced the GOP 2016 budget on a party-line vote early Thursday morning, but internal sparring among Republicans over defense spending has complicated the situation. The Senate Budget Committee similarly passed its spending plan, with full Senate consideration to start next week.

The [AP](#) (3/20, Espo, Taylor) reports that on Thursday, Congressional Republicans "advanced balanced-budget plans bristling with cuts in Medicaid and other benefit programs," looking to "make good" on campaign promises to balance the budget. However, "last-minute maneuvering" to determine defense spending levels "consumed GOP lawmakers in both the House Budget Committee and the counterpart Senate panel."

The [New York Times](#) (3/20, Weisman, Subscription Publication, 9.97M) reports that the House Budget Committee "voted out an otherwise austere spending plan, promising to add \$2 billion in additional 'emergency' war funding to a budget that already raised combat funds by \$38 billion." Those funds "will be added Monday as the full House prepares to debate the tax-and-spending blueprint." Similarly, the Senate Budget Committee added \$38 billion in military spending for combat operations after a "revolt by defense advocates."

Boehner Says House To Consider Further Defense Increases Next Week. [Reuters](#) (3/20, Cowan, Lawder) reports that Speaker Boehner announced on Thursday that defense hawks will be allowed to push for further increases in defense funding next week, setting off a potential battle as the House sets its budget priorities. Boehner said, "There is overwhelming support in our conference for providing additional resources to protect our national security." [Politico](#) (3/19, Bresnahan, Sherman, 669K) reported that Boehner told reporters that the leadership "would add the additional \$20 billion in defense funding in Rules."

The [Wall Street Journal](#) (3/20, Peterson, Timiraos, Subscription Publication, 5.67M) says that Boehner's move comes after House GOP leaders failed to convince the House Budget Committee on Wednesday night to further increase defense spending, and is necessary to ensure sufficient defense hawk support for the overall budget. [The Hill](#) (3/19, Becker, Needham, Matishak, 224K) reported that Rep. Mike Turner, "who led a group of 70 House Republicans seeking more robust defense spending in the budget, signaled Thursday that he could back the latest compromise, and that the GOP had finally found the way out of its problem."

[Roll Call](#) (3/20, Dumain, Subscription Publication, 102K) covers the action, and says that going forward, the "whip operation to secure support for the budget" in the full House "will be a challenge, with Republican leaders well aware that they aren't going to get any Democrats to help make up for a big shortfall."

Meanwhile, the [Washington Times](#) (3/20, Howell, 644K) reports that House Minority Leader Pelosi "wondered aloud Thursday if the GOP had the votes to pass the 'same old warmed-over stew.'"

In a piece for the [Washington Post](#) (3/20, 5.17M), Brookings fellow and contributing columnist Robert Kagan writes that Republicans have been touting their "hawkishness" in recent months, but "have not been very clear about what they would do differently" than the Administration and have "not talked much about the possible costs of an alternative approach." He says that the ability of the GOP to provide sufficient defense funding will be a test to see if they can back up their talk.

Senate To Start Budget Work On Monday. [The Hill](#) (3/20, Carney, 224K) reports in its "Floor Action" blog that Senate Majority Leader McConnell said Thursday that the "full Senate will start its work on the Republican budget Monday," and that there will be at least one vote. Senate Republicans "released their budget Wednesday, and the resolution passed through the Senate Budget Committee on Thursday evening." Once the Senate passes a budget resolution, McConnell said that the chamber will return to the human trafficking legislation, which has been held up by a battle of abortion legislation.

OBAMA ORDERS CUTS IN FEDERAL GREENHOUSE EMISSIONS. The President's signing of an executive order Thursday reducing Federal greenhouse gas emissions by 40 percent was not covered on any of last night's network newscasts, but is generating reports in the nation's major dailies and wires. Reports note that the move represents the latest in a string of executive actions by the President and fulfills a commitment he made last year as part of a climate deal with China.

The executive order, the [New York Times](#) (3/20, Davis, Subscription Publication, 9.97M) reports, "set new goals for reducing the greenhouse gas emissions of federal agencies," but notes that the Federal government's "share of greenhouse gas emissions in the United States is minuscule — less than 1 percent in 2013." But the goals are "in line with a commitment" the US made as part of a climate deal with China.

The [AP](#) (3/20, Lederman) says that by reducing pollution "within the US government, Obama sought to increase political pressure on

for us to lead by example. These are ambitious goals, but we know they're achievable goals."

[USA Today](#) (3/20, Jackson, 4.95M) notes the executive order "also directed the government to increase its use of renewable resources to 30% of energy use," and the White House announced that "several major federal suppliers — including IBM, General Electric, Northrop Grumman and Honeywell — have committed to their own reductions in greenhouse gas emissions."

White House senior adviser Brian Deese, the [Washington Post](#) (3/19, Eilperin, 5.17M) reports, "estimated the new measures will save \$18 billion." [Reuters](#) (3/20, Walsh, Edwards) quotes Deese as saying that while the Federal government's share of greenhouse gas emissions is "modest," the "potential from this announcement, however, is significant both because we can drive substantial reductions across the entire federal footprint and because our efforts to do that leverage both innovation and investment in the private sector." [McClatchy](#) (3/20, Cockerham, Subscription Publication, 17K) also reports the remarks by Deese.

The [Detroit News](#) (3/20, Shepardson, 577K) notes the order includes reducing emissions from the Federal government's "655,000 vehicles by 30 percent by 2025." Also running similar reporting on the move this morning are [Vox](#) (3/20, Plumer, 737K), the [Washington Times](#) (3/20, Sherfinski, Wolfgang, Wolfgang, 644K), and [The Hill](#) (3/20, Cama, 224K), among others.

But [Bloomberg Politics](#) (3/20, Olorunnipa, 169K) reports Chris Warren, a spokesman for the Institute for Energy Research, said Obama's move "will have no impact on global temperatures," and accused the President of "trying to boost his climate credentials to appease the national environmental lobby, regardless of what it means for the average American."

McConnell Urges States To Help Resist Obama's "War On Coal." The [New York Times](#) (3/19, Davenport, Subscription Publication, 9.97M) reports on its front page that Senate Majority Leader McConnell has begun "an aggressive campaign to block President Obama's climate change agenda in statehouses and courtrooms across the country, arenas far beyond Mr. McConnell's official reach and authority." His campaign is aimed at stopping a set of EPA regulations requiring states to reduce carbon pollution from coal-fired power plants, but since he is "limited in how he can use his role in the Senate to block regulations, he has taken the unusual step of reaching out to governors."

Interior To Issue Fracking Regulations Today. The [Wall Street Journal](#) (3/20, Harder, Subscription Publication, 5.67M) reports that the Interior Department today is expected to announce long-awaited regulations for hydraulic fracturing in the oil and natural-gas industries. Interior Secretary Jewell said Tuesday, "The rule will include measures to protect our nation's groundwater—requiring operators to construct sound wells, to disclose the chemicals they use, and to safely recover and handle fluids used in the process."

Editorial Wrap-Up:

NEW YORK TIMES. "Bloodshed In Tunisia." In an editorial, the [New York Times](#) (3/20, Subscription Publication, 9.97M) says the attack on the National Bardo Museum in Tunis "lays bare the extent to which extremists...now threaten Tunisia, the only success story of the Arab Spring." According to the Times, the country "will need substantial international help" to remain "an example of sanity in a region consumed by chaos and dominated by authoritarian governments."

U.S. Allies, Lured By China's Bank. The [New York Times](#) (3/20, Board, Subscription Publication, 9.97M) editorializes that President Obama "has mishandled the issue" of the Asian Infrastructure Investment Bank. The Times says the Administration should have "worked with its allies to produce a set of common principles that could then be negotiated with the Chinese," but "Instead, it seems to have no coherent plan for dealing with the new bank."

The Schneiderman Remedy For Sleaze. In an editorial, the [New York Times](#) (3/20, Board, Subscription Publication, 9.97M) says New York state Attorney General Eric Schneiderman's "ethics proposals" are "a challenge to Gov. Andrew Cuomo's promised reforms." The Times says Schneiderman's "rare blast is a reminder to Mr. Cuomo that while legislatures are whining about having to change the status quo, others are pushing for a real cleanup of Albany."

WALL STREET JOURNAL. "An ObamaCare Plan Beats No Plan." In an editorial, the [Wall Street Journal](#) (3/20, Subscription Publication, 5.67M) says that if the Supreme Court strikes down ACA subsidies, the GOP needs to be ready with an alternative. The Journal predicts that Democrats will use the political crisis to call for restoring the subsidies, and having no response would lead to political defeat for Republicans.

"The IRS Gets Out The Vote." In an editorial, the [Wall Street Journal](#) (3/20, Subscription Publication, 5.67M) writes that the President wants to require mandatory voting, but it wouldn't counteract money in politics. The Journal suggests the President over-imposes legal mandates, linking the comments to the attempts to fine Hobby Lobby for violating the contraceptive mandate and the tax penalty for not having health insurance.

"China Trounces US 'Smart Power.'" In an editorial, the [Wall Street Journal](#) (3/20, Subscription Publication, 5.67M) says the success of China in enticing countries to join the Asian Infrastructure Investment Bank (AIIB) makes the Asia-Pacific trade agreement even more important.

"Islamic State Threatens Tunisia." The [Wall Street Journal](#) (3/20, Subscription Publication, 5.67M) editorializes that the US and France must follow through on vows to assist Tunisia's counter-terrorism efforts in order to ensure the country's status a success from the Arab Spring.

WASHINGTON POST. "An Electoral College Tilt." In an editorial, the [Washington Post](#) (3/20, 5.17M) criticizes "a Michigan Republican's proposal to apportion the state's electoral votes by congressional district." Using such a system would only increase the chances of candidates winning the popular vote but losing in the electoral college. The Post credits the plan to "raw partisanship," as "the only rationale for the new method" is its "persistent and significant pro-GOP bias."

"Avoiding A Budget Sinkhole." In an editorial, the [Washington Post](#) (3/20, 5.17M) calls on Maryland Gov. Larry Hogan to "keep a stiff

concludes that either budget cuts or new taxes will restore health to the fund and admonishes Hogan that his victories in addressing the state's long-term structural deficit "will be Pyrrhic" if the fund is raided again.

"Poisonous Interference."

Subject: for the weekly

Can you guys please let me know who will be at the HI event with SJ? This is all I have right now:

On March 31, Secretary Jewell will attend a dedication ceremony and community celebration for the newly established Honouliuli National Monument in Oahu, HI.

Although I don't think we have official RSVPs because we haven't extended official invites yet (Booch and EFB, correct me if I'm wrong about that), we have heard that Sens. Schatz and Hirono will be at both events and Rep. Gabbard will be at the public event at the cultural center.

Subject: Tentative plan for Honouliuli event 3/31

Hello Team Hawaii,

Below is a draft schedule for the Honouliuli event on 3/31 with Secretary Jewell. This is still tentative and subject to change as details get firmed up, but I wanted to share this with you as soon as I received it from the Secretary's scheduling team.

Please let me know if you have any questions and I will continue to share information as I get it.

Thanks,
Jeremy

it is in your mind as things progress: 1. Will there be a formal reception for Secretary Jewell in the first part of the hour (i.e. 12-1230?) followed by the community reception? 2. Are each of the Hawaii Delegates being asked to speak? If they are not present themselves, will their staff be asked to share the message on their behalf?

Just food for thought as be proceed. Thank you again, Jeremy. Take care

AMERICAN EXPRESS PROMISES \$5 MILLION TO INCREASE PARK VOLUNTEERS. The [E&E Daily](#) (3/12) reports that "American Express Co. today committed to spend \$5 million over the next two years supporting the Interior Department's youth initiative and its goal to triple the number of public lands volunteers." The funds "American Express has promised will be provided to local branches of the YMCA in 50 major cities across the country and fund the creation of community coordinator positions dedicated to increasing awareness, support and participation in outdoor programs." According to the article, "each coordinator is expected to engage between 10,000 and 20,000 volunteers in his or her city, with a special emphasis on attracting young adults and veterans." The article notes that "if the coordinators succeed in hitting the lower end of that range, they would help Interior reach at least half of the goal of 1 million volunteers Secretary Sally Jewell wants the agency to achieve by 2017, up from around 333,000 when the target was announced."

[The Hill](#) (3/13, Cama, 224K) reports that Jewell said, "Magnificent landscapes and our strong volunteer ethic are part of what make America so special and unique." She added, "This partnership with American Express will be a huge boost as we create a movement to foster the next generation of leaders and outdoor stewards while helping people connect to the public lands in their community — particularly in urban areas."

The [AM New York](#) (3/13, 719K) reports that Jewell said, "When we think back to our childhood, it's the outdoor places that are so special to us. Kids now seem to be disconnected to nature, so we will be reaching out to school groups and youth groups with a focus particularly on kids who might not have these opportunities otherwise."

The [Financial](#) (3/13, 11K) reports that Timothy J. McClimon, president, American Express Foundation, said, "Community service and historic preservation have had a long heritage at American Express. Since our founding more than 160 years ago, American Express has seen how America's parks and public lands contribute to our sense of national and local identity. We are proud to lead an effort to

Additional coverage was picked up by the [Business Wire](#) (3/13), the [MarketWatch](#) (3/13, 962K), the [Benzinga](#) (3/13, 9K), and the [Financial Content](#) (3/13, 7K).

“Work Camping” Offers Benefits For Volunteers In Parks. [Yahoo! Finance](#) (3/13, 4.04M) reports that there are “hundreds of volunteer opportunities that come with some sort of lodging via the National Park Service this year.” According to the article, “often referred to as ‘work camping,’ thousands of volunteer opportunities with amenities that you might find amenable also are available through federal agencies, including the Fish and Wildlife Service, Forest Service, Bureau of Land Management and the Army Corps of Engineers.”

SCIENTISTS QUESTION FEDERAL PLANS TO PROTECT GREATER SAGE GROUSE. The [Environment & Energy Publishing](#) (3/13, Subscription Publication, 705) reports that “leading experts on the greater sage grouse warned the Obama administration today that it must take stronger, more scientifically sound steps to protect the imperiled bird and avoid the need to place it on the endangered species list.” The letter from 11 scientists who have studied the sage grouse urged the BLM and Forest Service “to finalize amendments that would add grouse conservation measures to as many as 98 BLM resource management plans (RMPs) and Forest Service land-use plans covering millions of acres of public lands across the sage grouse’s 11-state Western range.” However, “the scientists cautioned that the 14 draft plans unveiled in late 2013, and the one completed RMP amendment finalized last year in Lander, Wyo., don’t adopt all the necessary sage grouse conservation measures highlighted by the best available science, particularly as it relates to allowable surface disturbance activity in sage grouse habitat.”

The [AP](#) (3/13, Gruver) reports that the letter addressed to Interior Secretary Sally Jewell and Agriculture Secretary Tom Vilsack said, “We strongly encourage you to direct federal planners to finalize conservation plans that prescribe objective, measureable and robust conservation measures based on the best available science.” Interior spokeswoman Jessica Kershaw said, “Interior believes strong protections in the BLM management plan are an important part of successful conservation of the greater sage grouse, and the Fish and Wildlife Service is working in close collaboration with them to ensure the best outcome for both the bird and the Western landscape it embodies.”

Coverage by the AP was also picked up by the [Columbus \(IN\) Republic](#) (3/13, 81K), the [Helena \(MT\) Independent Record](#) (3/13, 38K), the [Casper \(WY\) Star-Tribune](#) (3/13, 90K), [KOLO-TV](#) Reno, NV (3/13, 3K), and [KIFI-TV](#) Idaho Falls, ID (3/13, 1K).

Also reporting on the story is [The Oregonian](#) (3/13, 950K).

PEOPLE HAVE MIXED REACTIONS ABOUT PROPOSED GRAND CANYON WATERSHED NATIONAL MONUMENT. The [Deseret \(UT\) News](#) (3/13, 538K) reports that “a proposal to designate a vast, sparsely populated area surrounding the Grand Canyon as a national monument is getting mixed reactions.” According to the article, “about 100 people gathered in Flagstaff to weigh in on the proposed Grand Canyon Watershed National Monument.” Rep. Ann Kirkpatrick, “who hosted the meeting, has said she’s hopeful President Barack Obama will designate the 1.7-million-acre area as a national monument before he leaves office.”

PUBLIC LANDS COULD HELP IN FIGHT AGAINST IMPACT OF CLIMATE CHANGE. The [Scientific American](#) (3/12, 2.83M) reports on the importance of public lands in the fight against climate change. According to the article, public lands “protect forests, wildlife and biodiversity, as well as provide space for renewable energy development.”

INTERIOR LIVESTREAMS USING MEERKAT APP. [The Hill](#) (3/13, Cama, 224K) reports that the Interior Department “used the app Meerkat Thursday to briefly livestream footage from the roof of its headquarters building, including the view of the Washington Monument.” Tim Fullerton, director of digital strategy at Interior, noted “on Twitter that it was the first use of Meerkat by a federal agency.”

FEDERAL AGENCIES HOLDING HACKATHON. In an interview with the [Federal News Radio](#) (3/13, 11K), Tim Fullerton, the director of digital strategy at Interior, discussed the hackathon that will be hosted by the Interior Department and the Agriculture Department in April.

PROPOSAL TO ACQUIRE LAND FOR WILDLIFE IN SOUTH DAKOTA STALLED. The [Sioux Falls \(SD\) Argus Leader](#) (3/12, 116K) reports that “a proposal by two federal agencies to lease or purchase thousands of acres of southeastern South Dakota land for wildlife protection has drawn the ire of the state’s congressional delegation, county commissioners and some Missouri River conservationists.” If the FWS and NPS “agree to put the plan into action, the move to protect habitat would obtain 220 square miles of mostly agricultural land along the Missouri River from willing landowners, creating the Ponca Bluff and Niobrara conservation areas.” The article notes that “the federal agencies have seen serious pushback since the idea emerged in 2011, however, and the project has stalled since the public comment period ended last year.” In fact, “no money has been allocated for land acquisition, no plan has been finalized, and no landowners have been approached.”

PROTESTERS PUSH FLORIDA TO BUY US SUGAR LAND. The [Miami Herald](#) (3/13, 694K) reports that “a growing divide between environmentalists and scientists and the state’s politicians took center stage during a rowdy South Florida Water Management District meeting Thursday morning.” The issue was “whether the state should purchase thousands of acres of US Sugar land that’s part of a contract hammered out by former Gov. Charlie Crist and the district in 2010 and set to expire in October.” However, “despite heavy backing from environmentalists, including a petition submitted Thursday and signed by 207 scientists, the district board, lawmakers and Gov. Rick Scott have so far failed to act.” The article notes that “the petition included signatures from dozens of scientists, mostly from Florida universities, but also from Duke, Columbia, Penn State and Smith College as well as the US Geological Survey and National Park Service.”

2015 KIDS’ ICE FISHING DAY HELD. The [Havre \(MT\) Daily News](#) (3/12, 11K) reports that “bitter temperatures and numbing winds did not stop smiling students from enjoying a day on the ice during the annual Nelson Reservoir Kids’ Ice Fishing Day held Feb. 10.” According to the article, “students and teachers from Hays Lodgepole, Malta, Saco and Whitewater, joined members of the Malta Chapter of Walleyes Unlimited, Bureau of Land Management, US Fish and Wildlife Service and Montana Fish, Wildlife and Parks to learn how to fish on a frozen lake.” The article notes that “engaging youth in public land stewardship is one of Secretary of the Interior Sally Jewell’s and BLM Montana/Dakotas State Director Jamie Connell’s top initiatives.”

says he is heading to Washington, D.C. to meet with federal officials on issues of water, climate change and health care.” According to spokesman Evan Westrup, “Brown will meet with federal officials from the White House, the State Department, Department of Interior and Department of Health and Human Services.”

Also reporting on the story is the [Sacramento \(CA\) Bee](#) (3/13, 547K).

ANTARCTIC WEDDELL SEAL PUP'S KISS GOES VIRAL ON INSTAGRAM. [ABC News](#) (3/13, 3.41M) reports that “a photo of a Weddell seal pup kissing the cheek of its mom in Erebus Bay, Antarctica, is going viral on Instagram.” The article notes that “the baby seal’s smooch was caught by US Geological Survey scientist William Link, and the image was shared on the Instagram accounts of the USGS and the US Department of Interior.”

OBAMA ADMINISTRATION'S ENERGY POLICY CRITICIZED. In an op-ed for the [New Orleans Times-Picayune](#) (3/13, 621K), Charlotte Randolph, the president of Lafourche Parish writes that “if the Obama administration wishes to grow the economy, create jobs, and enhance national security in an environmentally friendly way, all it has to do is make decisions based on facts, not hyperbole.” But according to Randolph, “the president has not done this yet, evidenced by a recent executive order creating a steering committee on US arctic policy that suspiciously excludes state officials and natives of Alaska – those who are most involved and, therefore, will be most impacted.” Randolph urges Obama “to make a positive impact on the nation by authorizing policies that support domestic energy exploration and production.”

KERRY BLASTS CLIMATE CHANGE SKEPTICS. In what [Politico](#) (3/12, Guillén, 669K) called “the latest warning from the administration about the threat of carbon pollution from fossil fuels and the need to reach a strong long-term international pact to combat global warming at the upcoming UN summit in Paris in December,” Secretary of State Kerry on Thursday “railed against climate change skeptics...saying that ‘future generations will not and should not forgive those who ignore this moment, no matter their reasoning.’” In remarks to The Atlantic Council, Kerry said it is time for a “real cost accounting,” adding that “we can’t only factor in the price of immediate energy needs. We have to include the long-term cost of carbon pollution. We have to factor in the cost of survival. And if we do, we will find that pursuing clean energy now is far more affordable than paying for the consequences of climate change later.” Kerry did not indicate whether he would support the Keystone XL pipeline.

The [AP](#) (3/13, Capiello) reports that in a “not-so-subtle dig at Florida Gov. Rick Scott’s administration,” Kerry said that “elected officials who ban the words ‘climate change’ are unwilling to face the facts.” Kerry said that “we literally do not have the time to waste debating whether we can say ‘climate change,’” adding, “Because no matter how much people want to bury their heads in the sand, it will not alter the fact that 97 percent of peer-reviewed climate studies confirm that climate change is happening and that human activity is largely responsible.”

America’s Great Outdoors:

National Park Service:

LEGISLATION CALLS FOR EXPANSION OF CASA GRANDE RUINS NATIONAL MONUMENT. The [Casa Grande \(AZ\) Dispatch](#) (3/12, 24K) reports that Rep. Ann Kirkpatrick is “optimistic that her legislation calling for the expansion of Casa Grande Ruins National Monument will have more success than a similar bill she introduced in 2013.” Kirkpatrick “introduced HR 1077 to the House Committee on Natural Resources on March 4.” The measure would “expand the boundaries of the Casa Grande Ruins around the Great House and its Hohokam village, which would add about 10 acres to the monument, according to Jennifer Johnson, Kirkpatrick’s communications director.”

NPS PROVIDES FUNDING FOR HURRICANE SANDY-DAMAGED HISTORIC PROPERTIES. The [Staten Island \(NY\) Live](#) (3/13, 100K) reports that “almost \$5 million in federal grant money is available for Hurricane Sandy-damaged historic structures on Staten Island and in 12 other counties in New York state, Gov. Andrew Cuomo announced Thursday.” The article notes that “properties are eligible for grants if they are listed on – or eligible for listing on – the National Register of Historic Places, or contribute to a listed or eligible historic district.” The funds provided by the NPS are “available for nonprofit organizations, municipalities and state agencies, who must apply to the New York State Office of Parks, Recreation and Historic Preservation.”

INTERIOR SEEKS TO RECOVER COSTS INCURRED FROM FIRES AT INDIANA DUNES NATIONAL LAKESHORE. [Reuters](#) (3/13, Rascoe) reports that the Interior Department is seeking to recover costs it incurred from fires that burned 391 acres of the Indiana Dunes National Lakeshore. The US government has filed a lawsuit against an Indiana railroad, saying the company was responsible.

PREDICTIONS OFFERED FOR CHERRY BLOSSOM PEAK BLOOM. In its “Capital Weather Gang” blog, the [Washington Post](#) (3/12, Samenow, 5.17M) predicts a peak cherry blossom bloom forecast of April 9-13 this year. It notes that the prediction is “very similar to the National Park Service’s call for April 11-14.”

GREAT SMOKY MOUNTAINS NATIONAL PARK TEMPORARILY CLOSES LAUREL FALLS TRAIL. The [Knoxville \(TN\) News Sentinel](#) (3/12, 371K) reports that “the winter mix of wind, ice and rain has left its mark on area parks, especially those located on the Cumberland Plateau.” In Great Smoky Mountains National Park, “officials have temporarily closed the popular Laurel Falls Trail due to storm damage.” According to the article, “the park will announce an expected reopening date of the Laurel Falls Trail once trail crews assess the damage.”

STREET ARTIST MR. ANDRÉ THREATENS LAWSUIT OVER STORY ON JOSHUA TREE NATIONAL PARK VANDALISM. [KCET-TV](#) Los Angeles (3/13, 15K) reports that “in a celebrity-driven incident of vandalism in our national parks, the internet exploded with reports that famed French street artist Mr. André (born André Saraiva) defaced the geology of Joshua Tree.” Now, “Mr. André has threatened legal action against L.A.-based hiking blog Modern Hiker, who first reported the appearance of his potentially illegal art.”

In an editorial, the [Twentynine Palms \(CA\) The Desert Trail](#) (3/13, 10K) urges park visitors to report vandalism. It wants visitors to “take

ZION NATIONAL PARK ARCHAEOLOGISTS USING 3D LASER TECHNOLOGY TO MAP ARTIFACTS. [KSTU-TV](#) Salt Lake City (3/12, 166K) reports that “archeologists at Zion National Park use 3D laser technology to document artifacts found inside the park, and now they’re using it map one of the park’s largest artifacts.” According to the article, “the lasers will take a three dimensional picture of the mile-long Zion-Mount Carmel Tunnel.”

FORECASTERS PREDICT ANOTHER DOWN YEAR FOR LAKE MEAD. The [Las Vegas Review-Journal](#) (3/13, 398K) reports that Lake Mead is expected to drop to a new record low next month and also fall a total of about 20 feet through June 2016, according to the latest federal forecast released Wednesday.

METRO TO HOLD PUBLIC HEARINGS ON PROPOSED POTOMAC YARD STATION. [WRC-TV](#) Washington (3/13, Ward, 613K) reports online that Metro is considering four different sites for the proposed Potomac Yard station in Alexandria. The article says that the Washington Metropolitan Area Transit Authority board “agreed to hold public hearings about the proposals, which could start as early as late April.” According to WRC, the proposed Potomac Yard station would be located on the Yellow and Blue lines, “between the existing Braddock Road and Reagan National Airport stations.”

The [Washington Business Journal](#) (3/13, Hansen, Subscription Publication, 119K) reports that the draft environmental impact statement for the proposed station is “currently under review by” the FTA and the National Park Service, “which are partnering on the project.”

Bureau of Land Management:

JUDGE TOSSES NEVADA’S BID TO DISPOSE OF EXCESS MUSTANGS. The [AP](#) (3/13, Sonner) reports that “a federal judge has thrown out a lawsuit filed by a coalition of rural Nevada counties that wanted to force the government to sell or otherwise dispose of tens of thousands of mustangs in US holding facilities.” US District Judge Miranda Du held Thursday “in favor of wild horse advocates who said the effort backed by the Nevada Farm Bureau was led by ranchers who want a bigger share of forage for their livestock.” Du “dismissed the suit as a broad attack on the Bureau of Land Management’s overall wild horse policy in 10 western states.”

Coverage by the AP was also picked up by the [US News & World Report](#) (3/12, 685K), the [Houston Chronicle](#) (3/13, Sonner, 2.28M), the [Minneapolis Star Tribune](#) (3/13, Sonner, 1.37M), the [Washington Post](#) (3/12, 5.17M), and the [Daily Mail \(UK\)](#) (3/13, 4.78M).

BLM’S WILD HORSE GATHER AWAITS RULING. The [E ko \(NV\) Daily Free Press](#) (3/13, 22K) reports that “ranchers and horse advocates continue to await a judge’s decision whether 186 wild horses – which were penned amid a roundup that stirred tensions – are to be released back onto the range.” The BLM “gathered more than 420 horses last month from the Fish Creek Herd Management Area southwest of Eureka.”

MINERAL RIDGE TRAIL TO TEMPORARILY CLOSE FOR HAZARDOUS TREE REMOVAL. The [Spokane \(WA\) Spokesman-Review](#) (3/12, 167K) reports that “the Mineral Ridge Scenic Area off the northeast portion of Lake Coeur d’Alene, including the popular Mineral Ridge Trail, will be temporarily closed next week for hazardous tree removal, US Bureau of Land Management officials say.” The closure is scheduled for Monday, March 16, through Thursday, March 19.

Fish and Wildlife Service:

WILDLIFE CONFERENCE DISCUSSES PRESERVING SAGE-GROUSE HABITAT. The [Durango \(CO\) Herald](#) (3/12, 28K) reports that “one hundred years of conservation are being celebrated this week at a major wildlife conference in Nebraska, and Colorado successes are among the topics.” The article notes that preserving sage-grouse habitat is “a major topic at the event, as Colorado and the US Interior Department continue their plans to protect habitat on privately owned land as well as public land.”

RESEARCHERS FIND WISCONSIN STOCKED CHINOOK SALMON OUTPERFORM AVERAGE. The [Appleton \(WI\) Post-Crescent](#) (3/12, 92K) reports that “chinook salmon stocked by the Wisconsin Department of Natural Resources survive very well and contribute substantially to the state’s strong Lake Michigan fishery, new research from the US Fish and Wildlife Service and DNR shows.” According to the article, “the ongoing three-year cooperative research project shows Wisconsin stocked fish have an above average likelihood of surviving to harvest and are being caught in comparatively large numbers in an area stretching from Door to Kenosha counties.”

BUTTERFLY EXTINCTION ATTRIBUTED TO CLIMATE CHANGE. The [Indianapolis Star](#) (3/13, Sabalow, 593K) reports that researchers in Indiana have attributed the local extinction of a butterfly species to “man-made” climate change. The “fatal blow” may have been a single year of drought and serves as a “cautionary example” of which the Kameron blue butterfly “certainly won’t be the last.”

FWS OFFICIAL SPEAKS TO ROTARY. The [Troy \(NY\) Daily News](#) (3/13) reports that Donnie Knight of the FWS at the Newark Office of Private Lands Division “shared information on the programs and projects that private landowners across Ohio can use to improve wildlife and fish on their properties during Troy Rotary’s weekly meeting March 3.”

ASSISTANT HUNTING GUIDE SENTENCED FOR ROLE IN MAIMING MOUNTAIN LIONS, BOBCATS. [KSTU-TV](#) Salt Lake City (3/12, 166K) reports that “a man who was involved in a conspiracy to injure or trap bobcats and mountain lions in order to make them easier prey for hunters on guided trips has been sentenced for his role in the illegal acts, which included facilitating the transport of unlawfully killed animals across state lines.” According to a press release from the FWS, “Nicholaus Rodgers has been sentenced to six months of home confinement, a \$5,000 fine, 50 hours of community service and three years of probation for violations of the Lacey Act—a federal law protecting wildlife.”

Also reporting on the story is [KSL-TV](#) Salt Lake City (3/13, 1.07M).

ADDITIONAL COVERAGE: FWS TO CONSIDER REMOVING FOXES ON CALIFORNIA ISLANDS FROM ENDANGERED LIST. Additional coverage that Santa Catalina subspecies of Channel Islands fox may be removed from the list of endangered species was provided by the [Los Angeles Times](#) (3/13, Sahagun, Hubbard, 3.49M) and the [Christian Science Monitor](#) (3/12, 380K).

5.67M) editorializes on an operation by the US Fish and Wildlife Service in 2005-2006, which targeted Robert Soto and the Lipan Apache tribe for using eagle feathers in traditional Native American worship. The Journal outlines the legal trouble and bureaucratic difficulties faced by Soto as a result of the feathers, noting that although he won a civil suit against Interior Secretary Sally Jewell to reclaim the feathers, he still faces penalties for giving them to others. The editorial concludes by suggesting that there are better uses of time for Fish and Wildlife regulators than pursuing this case.

FEDERAL MANAGEMENT OF WOLVES SUPPORTED. In an op-ed for the [St. Cloud \(MN\) Times](#) (3/12, 66K), Christine Coughlin, the Minnesota director for The Humane Society of the United States, writes that “allowing the indiscriminate hunting of wolves actually leads to increased livestock depredation, according to a 25-year study from Washington State University.” Coughlin argues that “rather than backpedaling toward the same irresponsible state management programs that led to wolves needing to be listed in the first place, wolves should remain under federal oversight.” She concludes that “this balanced approach would keep much-needed protections for wolves, while allowing wildlife officials to responsibly manage problem wolves.”

US Geological Survey:

USGS REPORT NOTES IMPACT OF EXCESSIVE USE OF CHICKEN MANURE ON CHESAPEAKE WATERSHED. The [Baltimore Sun](#) (3/12, 810K) reports that “Eastern Shore rivers and the Chesapeake Bay are being degraded by spreading too much fertilizer and manure on the Delmarva Peninsula’s farm fields, a new federal report concludes.” The report, released Thursday by the USGS, says “the rural region’s soils get nearly twice as much bay-fouling nitrogen and phosphorus per square mile as other parts of the six-state Chesapeake watershed.” Also, “it notes in particular that the majority of phosphorus comes from overfertilizing farm crops with animal manure, mainly from the nearly 600 million chickens raised there annually.”

USGS REVIEWING REPORT ON SUSTAINABILITY OF SAN PEDRO NATIONAL CONSERVATION AREA, SIERRA VISTA SUB-WATERSHED. The [Sierra Vista \(AZ\) Herald](#) (3/11, 3K) reports that “a new report on the sustainability of the San Pedro National Conservation Area and Sierra Vista Sub-watershed has finally reached the review process within the US Geological Survey (USGS).” The report, “embargoed from public dissemination by USGS, will maintain the level of data achieved by the efforts of the various government agencies involved in the previously mandated 321 reports as ordered by the US Congress, said Bruce Gungle, USGS hydrologist.” Gungle “gave an overview of what he and other committee members set as possible goals during a meeting Wednesday with members of the Upper San Pedro Partnership’s technical committee.”

Securing America’s Energy Future:

Renewable Energy:

DOE REPORT: WIND ENERGY COULD SUPPLY ONE THIRD OF POWER IN US BY 2050. The [AP](#) (3/13, Martin, 1.03M) reports that a new study by the Energy Department has determined that “wind power will be cheaper than electricity generated by natural gas within a decade, even without a federal tax incentive.” Wind energy being increased “to 35 percent of US electricity supplies by 2050 will cause national power prices to decline 2.2 percent and result in \$400 billion in benefits related to reduced emissions of greenhouse gases.” Improvements in technology and cost reductions “will reduce the price of wind power to below that of fossil-fuel generation, even after a \$23 per megawatt-hour subsidy provided now to wind farm owners ends, according to a report released Thursday.”

The [Washington Post](#) (3/13, Warrick, 5.17M) reports the DOE analysis, called “Wind Vision: A New Era for Wind Power in the United States,” found “that consistent government policies were critical to avoiding ‘boom and bust’ cycles for investment in wind energy. Congress must keep wind-friendly tax policies in place to minimize market uncertainty about future returns on investments in wind turbines, Energy Department officials said.” Lynn Orr, DOE’s undersecretary for technology and energy, said, “With continued commitment, wind can be the cheapest, cleanest option in all 50 states by 2050.”

[USA Today](#) (3/13, Jackson, 4.95M) reports that in the Obama Administration said in a summary of the report, “Wind energy continues to be one of America’s best choices for low-cost, zero-pollution renewable energy, and in an increasing number of markets, may be the cheapest source of new energy available.” The report “replaces a 2008 document produced during the George W. Bush administration called ‘20% Wind Energy by 2030.’”

[The Hill](#) (3/13, Cama, 224K) says the report praises “the federal government’s efforts to deploy wind, saying the United States ranks first in the world in utility-scale wind, and notes wind power has tripled during the Obama administration.” Wind currently “accounts for 4.5 percent of the country’s electricity capacity.”

The [Washington Times](#) (3/13, 644K) notes that “much of the growth in the wind industry has been fueled by federal investments and tax credits that offer 2.3 cents for each kilowatt hour of power generated by wind. That tax credit recently expired and it is unclear whether it will be reinstated this year.”

[Bloomberg News](#) (3/13, Martin, Doom, 2.94M) reports Dan Utech, an adviser for energy and climate change to President Barack Obama, said, “Every year, wind becomes cost competitive in more states. ... As states design plans to reduce carbon pollution from power plants under the Environmental Protection Agency’s clean-power plan, wind energy is going to play an important role.”

The [Christian Science Monitor](#) (3/13, Gilmour, 380K), [FuelFix](#) (3/13, Holeywell, 7K) and [CBS News](#) (3/13, Casey, 8.2M) also provide coverage of this story.

Onshore Energy Development:

ALASKA ESTIMATES OPENING ARCTIC NATIONAL WILDLIFE REFUGE COULD BE WORTH \$150 BILLION. The [Alaska Journal of Commerce](#) (3/13, 14K) reports that “Alaska officials told legislators in February the revenue to the state treasury could total more than \$150 billion over 50 years” if the Arctic National Wildlife Refuge were to be opened. According to the article, “in mid-February, the House

to the committee on Feb. 12.

BLM ANNOUNCES NEW OIL AND GAS LEASES IN NPR-A. The [Delta \(AK\) News Web](#) (3/12) reports that the BLM is “announcing seven new oil and gas leases within the National Petroleum Reserve in Alaska (NPR-A).” The article notes that “the leases are the result of a Bureau of Land Management (BLM) oil and gas lease sale held Nov. 19 which generated \$658,978 in bids.”

ADDITIONAL COVERAGE: GROUPS SUE OVER DRILLING IN NORTHWEST NEW MEXICO. Additional coverage that “environmental groups including the Navajo organization Diné CARE filed suit against two federal agencies on March 11 in an attempt to keep fracking from harming the ancient astronomical site of Chaco Canyon” was provided by the [Indian Country Today Media Network](#) (3/12, 49K), the [Albuquerque \(NM\) Business First](#) (3/13, English), and [Reuters](#) (3/13, Rascoe).

Offshore Energy Development:

FORUM ON OFFSHORE DRILLING HELD IN NC. The [AP](#) (3/12, 584K) reports that the Southern Environmental Law Center and other conservation groups on March 12 held a forum on drilling for oil and gas off the North Carolina coast at the University of North Carolina at Chapel Hill. Scientific experts were invited and a discussion was held to discuss the impact of drilling. The Federal Bureau of Ocean and Energy Management is accepting public comments on oil and gas exploration off the NC state shore.

Additional Coverage Of Offshore Drilling Meetings. Additional coverage of the meetings held to discuss offshore drilling in the Atlantic was provided by the [Charleston \(SC\) Moultrie News](#) (3/12), the [South Strand News \(SC\)](#) (3/13), and the [Maryland Coast Dispatch](#) (3/12, 52K).

SHELL EXPECTS TO DRILL OFFSHORE ALASKA THIS YEAR. The [UPI](#) (3/12) reports that “drilling in the arctic waters of Alaska should proceed this year assuming timely approval from the US federal government, Royal Dutch Shell said Thursday.” Shell Chief Executive Ben van Beurden said “in an annual report, published Thursday, the Interior Department was reviewing a supplementary environmental impact statement on operations in the Chukchi and Beaufort seas.” He said in the report, “We anticipate that the Department of Interior will continue to work in accordance with their proposed timeline to complete the [impact statement] in sufficient time to allow us to pursue our plans to drill in 2015.”

ARCTIC EXPLORATION FACING HURDLES. [BBC News](#) (3/13, 1.66M) reports on the growing risk of Arctic investment due to rising costs and tensions with Russia. However, some oil and gas operators are continuing to forge ahead with planned exploration. DNV Oil and Gas director Liv Hovern suggested the area is diverse and includes places similar to those where drilling has already occurred. However, she noted oil spill and emergency evacuation plans are key to navigating challenging terrain in the area.

[Reuters](#) (3/13, Doyle) also reports speculation on the future of drilling in the Arctic due to lower oil prices.

COURT DISMISSES MANSLAUGHTER CHARGES AGAINST BP EMPLOYEES. [Reuters](#) (3/12, S kka, Kurane) reports that a Federal appeals court dropped manslaughter charges against the two highest-ranking BP supervisors on board the Deepwater Horizon rig in 2010. A district judge had already ruled in favor of Robert Kaluza and Donald Vidrine when he dismissed 11 counts of seaman’s manslaughter charges against them. A three-judge panel of the 5th U.S. Circuit Court of Appeals on March 11 upheld the 2013 ruling, saying their responsibilities on the rig did not constitute the “marine operations, maintenance, and navigation” of a ship and so the Federal law did not apply to them. Kaluza and Vidrine were accused of “negligent and grossly negligent” supervision of testing at the well in the run-up to the explosion.

SUPPORT FOR OFFSHORE DRILLING URGED. In [The Hill](#) (3/12, Luthi, 224K) “Congress Blog,” the president of the National Ocean Industries Association (NOIA), Randall Luthi, said the US should support “an all-of-the-above energy strategy.” Luthi said this includes “safely and responsibly explor[ing] our own offshore energy resources.”

In an op-ed for the [Charleston \(SC\) Moultrie News](#) (3/12), Brydon Ross, the Southeast Director of the Consumer Energy Alliance, writes that “the decision to open up parts of the Atlantic, coupled with the go-ahead to continue production in the Western and Central portions of the Gulf of Mexico, is expected to bring forth an avalanche of economic benefits for Americans, especially South Carolinians, 71 percent of which support offshore drilling.” He claims that “increases in offshore production will spur high-wage job growth all across our economy, increase tax revenue, and supply revenue needed to fund badly needed infrastructure improvements throughout the US and especially in South Carolina and its adjacent Atlantic states.”

In an op-ed for the [Charleston \(SC\) Post and Courier](#) (3/13, 295K), William Schachte Jr., South Carolina chairman for Vets4Energy, claims that “current and safe technology will permit extracting natural gas or oil in a manner which could not be seen from our coastal beaches.” He also notes that “BOEM has built into the plan a mandatory 50 mile barrier off the Atlantic.” Schachte argues that “expanded access to the potential resources off of our coasts is critical to ensuring that our new status as an energy superpower isn’t fleeting.”

Tackling America’s Water Challenges:

IMPROVEMENTS AT HORSETOOTH RESERVOIR ON THE WAY. The [Fort Collins \(CO\) Coloradoan](#) (3/12, 59K) reports on the new headquarters and information center that will “cap off a decade of improvements to Horsetooth Reservoir.” The article notes that “the improvements have been paid for with grants from the US Bureau of Reclamation, which owns the reservoir itself, the state lottery and Great Outdoors Colorado and fees from visitors.”

BOR SCHEDULES FLUSHING FLOW IN WIND/BIGHORN RIVER FLOW DOWNSTREAM OF BOYSEN DAM.. The [County 10](#) (3/12) reports that the BOR, “at the request of, and in collaboration with, the Wyoming Game and Fish Department (WGF), has scheduled a flushing flow in the Wind/Big Horn River downstream of Boysen Dam, according to Wyoming Area Manager, Carlie Ronca.” Ronca said, “The purpose of the flushing flow is to improve trout reproduction by flushing fine sediments from spawning gravels in the river. The flushing flow also improves insect production in the stream by opening up interstitial spaces between gravels and cobbles. The flushing

BOISE RIVER LEVELS TO INCREASE FRIDAY. The [Boise State \(ID\) Public Radio](#) (3/13) reports that “federal agencies will release more water to flow on the Boise River Friday.” The BOR and the Army Corps of Engineers will “increase flow from 240 cubic feet per second (cfs) to 750 cfs through the city of Boise.”

Empowering Native American Communities:

NATIVE AMERICAN STUDENTS LEARNING IN CRUMBLING BUILDINGS. The [Indian Country Today Media Network](#) (3/12, 49K) reports that “thousands of American Indian children” are going to school “in buildings that are an immediate and serious threat to their health and safety.” According to the article, “mold, structurally-unsound buildings, overflowing toilets in disgusting restrooms, unreliable water supplies, freezing or blazing hot temperatures and overcrowding are just some of the conditions these children must contend with every day.”

PLANS FOR SOUTH BEND CASINO MOVES FORWARD. The [Law 360](#) (3/13, 9K) reports that the BIA and the Pokagon Band of Potawatomi Indians are “moving forward with the preliminary environmental review process for a proposed casino and tribal housing project in South Bend, Indiana, according to a notice filed Thursday.” The bureau and tribe said “in a Federal Register notice that they intend to submit a draft environmental impact statement with the US Environmental Protection Agency, as part of the tribe’s application for a fee-to-trust transfer of land.”

Also reporting on the story are the [South Bend \(IN\) Tribune](#) (3/13, 186K), the [Franklin \(IN\) Daily Journal](#) (3/13, 51K), [WSJV-TV](#) South Bend, IN (3/12, 3K), [WNDU-TV](#) South Bend, IN (3/13, 77K), [WSJV-TV](#) South Bend, IN (3/12, 3K), and [WSBT-TV](#) South Bend, IN (3/13, 21K).

FORMER TRIBAL COUNCILMAN SAYS INTERIOR WRONGLY UPHELD HIS REMOVAL. The [Law 360](#) (3/13, 9K) reports that “a former councilman for the Picayune Rancheria of Chukchansi Indians hit the US Department of the Interior with a complaint in California federal court Wednesday, alleging the federal government unconstitutionally upheld his removal from the council amid a battle for control between factions of the tribe.” Patrick Hammond III, “who served on the tribal council from 2008 until his removal in June 2011, asked to be reinstated to that role.”

ALASKA LAWMAKERS WANT FEDERAL GOVERNMENT TO CLEAN UP CONTAMINATED SITES. The [Alaska Native News](#) (3/13, 245) reports that “the Alaska House of Representatives Wednesday unanimously approved a resolution calling on the federal government to pay for the cleanup of hundreds of contaminated sites its agencies left on lands conveyed through the Alaska Native Claims Settlement Act.” House Joint Resolution 6 “encourages the United States Congress to pass legislation holding the federal government responsible for the remediation of over 600 contaminated sites.” Also, “the resolution calls on the Department of the Interior to fully implement the six recommendations made in its 1998 report to the United States Congress.”

MEDFORD OFFICIALS CITE “CONFLICT OF INTEREST” IN CASINO STUDY. The [Medford \(OR\) Mail Tribune](#) (3/12, Mann, 65K) reports that “Medford officials fired off a 15-page letter this week to the US Bureau of Indian Affairs that claims a ‘conflict of interest’ in a federal process over the Coquille Indian Tribe’s proposed casino in south Medford.” The letter, written by Mayor Gary Wheeler, shares “concerns over the contractor hired by the BIA to conduct the environmental analysis.” the letter states, “It appears that the environmental contractor that the Department has selected and/or approved to prepare the EIS in this case is the same contractor that is used for virtually all gaming-related trust acquisitions and many other tribal projects — Analytical Environmental Services (‘AES’).”

ADDITIONAL COVERAGE: BIA SIGNS LAND INTO TRUST FOR COWLITZ. Additional coverage that the BIA has moved land into trust for the Cowlitz Indian Tribe was provided by the [Indian Country Today Media Network](#) (3/12, 49K) and [KOIN-TV](#) Portland, OR (3/12, 50K).

ADDITIONAL COVERAGE OF REVISED GUIDELINES FOR INDIAN CHILD WELFARE ACT. Additional coverage of the revised guidelines for the Indian Child Welfare Act was provided by the [Cherokee \(OK\) Phoenix](#) (3/13, 442).

Top National News:

HOLDER: “DAMN PUNK” RESPONSIBLE FOR “REPUGNANT” FERGUSON SHOOTINGS. Much of the print and online coverage of the shootings in Ferguson highlights Attorney General Holder’s use of strong language to denounce the latest violence in the St. Louis suburb. Yet while all three network newscasts led with the story last night, only the [CBS Evening News](#) report featured his comments. Overall, most news reports focus on the manhunt for the shooters and on efforts to keep the tense situation from sparking further violence. Most news analyses also avoid casting blame for last night’s near-tragedy while the investigation continues. Capturing the tone of concern in much of the coverage, for example, the [New York Times](#) (3/13, A1, Eligon, Yokley, Subscription Publication, 9.97M) reports in a front-page analysis that “just as Ferguson seemed to be moving past the stunning abuses detailed by the federal authorities, having shed its city manager, police chief, municipal judge and other officials accused of running a racially biased legal system, those four gunshots threatened to reopen the well of anger, unrest and racial tension.” The [Los Angeles Times](#) (3/13, Pearce, 3.49M) similarly indicates that “the largely African American city seemed poised for change” when “violence struck again.” Now, “officials are struggling to pull the community back from the precipice of social mayhem.” Online outlets, meanwhile, report some angry comments yesterday in response to the shootings, including remarks on Fox News by a St. Louis police union official and a tweet by the same Fox show which appeared to link the violence to actions by Holder’s DOJ.

The [CBS Evening News](#) (3/12, lead story, 3:30, Reynolds, 5.08M) noted “the family of Michael Brown, the teenager whose death at the hand of a white cop set off months of protests here, condemned this escalation of violence, and in Washington,” Holder “was blunt.” Holder was shown saying, “This was not someone trying to bring healing to Ferguson. This was a damn punk.” CBS also noted that President Obama “took to Twitter...to say, ‘Violence against police is unacceptable. Our prayers are with the officers in Missouri. Path to justice...is one all of us must travel.’” The [Blaze](#) (3/13, Kasperowicz, 2.17M) noted that “earlier in the day,” Holder “said in a press release that the shooting of the two police officers was ‘inexcusable and repugnant.’”

“the killing of an officer in Philadelphia last week while he was buying a game for his son” and “the tragic loss of a Deputy US Marshal in the line of duty in Louisiana earlier this week.” To the [Washington Post](#) (3/13, Berman, 5.17M), Holder’s characterization of “the attack as ‘cowardly’ is particularly noteworthy, because intentionally or not, it evokes language he gave in one of his first speeches in the position,” when he called the US “a ‘nation of cowards’ because of how it failed to appropriately reckon with the country’s problematic racial history.”

[Politico](#) (3/12, Gass, 669K) says “Holder echoed remarks from St. Louis County Police Chief Jon Belmar that the shooting was ‘an ambush,’ adding once again that the department stands ready to offer its full resources” to find the shooters. [USA Today](#) (3/13), [Reuters](#) (3/13), [Politico](#) (3/12, Gass, 669K), the [AP](#) (3/13), and the [Daily Caller](#) (3/13, Ross, 318K), among other news outlets, also run stories highlighting Holder’s comments.

[ABC World News](#) (3/12, lead story, 2:45, Perez, 5.84M) focused on “the all-out manhunt for the gunmen,” and noted that the officers’ “injuries were not life-threatening” and that “both...have been released from the hospital.” The [Huffington Post](#) (3/12, Reilly, 281K) noted that Holder yesterday “wished the officers ‘a full and speedy recovery’ and said the Justice Department would offer to help with the investigation.” [The Hill](#) (3/12, Kamisar, 224K) notes that Holder said, “The Department of Justice will never accept any threats or violence directed at those who served and protect our communities.”

[NBC Nightly News](#) (3/12, lead story, 3:20, Allen, 7.86M) showed Belmar saying, “We’re lucky, by God’s grace, we didn’t lose two officers last night.” NBC went on to report from Ferguson, “A lot of tension, a lot of emotion here. We’re hearing there will be a candle light vigil here in the next few hours. But a lot of people will join that gathering, no doubt with a lot of different agendas. We also understand the county police and Missouri Highway Patrol will be here in charge of security, the way it was during the states of emergency during the worst of times in Ferguson.” The [St. Louis Post-Dispatch](#) (3/13, 889K) notes that Ferguson police “will continue to handle routine policing services in the city.”

“Seven witnesses” told the [Los Angeles Times](#) (3/13, Pearce, 3.49M) that “the shots did not come from a group of several dozen demonstrators who were standing in parking lots near police headquarters,” but “from an unknown shooter or shooters on a hill overlooking the station where police had gathered.” While the area had seen many protests since last November, says the [Washington Post](#) (3/13, Lowery, Somashekhar, Fahrenthold, 5.17M), “witnesses” indicate Wednesday’s gathering was “different”: “the crowd was bigger, swelled by some out-of-town protesters who’d come after the news” of Police Chief Thomas Jackson’s resignation earlier in the day. In addition, “the police seemed more aggressive, and there was infighting between protesters.”

The [AP](#) (3/13, Salter) reports “authorities believe the shots came from a handgun fired about 120 yards away, a long distance for most pistols.” At the time of the shootings, “many officers were lined up outside the [police] building, meaning the shooter did not have to be particularly accurate to hit two of them.” Similar accounts of last night’s events appear in the [Christian Science Monitor](#) (3/13, Jonsson, 380K), [Huffington Post](#) (3/12, Reilly, 281K), [Wall Street Journal](#) (3/13, Peters, Kesling, Subscription Publication, 5.67M), [AFP](#) (3/13, Thomas), [Washington Times](#) (3/13, Richardson, 644K), [TIME](#) (3/13, Rayman, 19.19M), and [Reuters](#) (3/13, Munsch), among other news outlets.

Adolphus Pruitt, president of the St. Louis NAACP, was asked on [CNN – Wolf](#) (3/12) about the presence of outside agitators among the protesters. Pruitt said, “They’re here, we just need to recognize the fact that we need to be vigilant, make sure that we watch out for everybody’s best interest and not get caught up in what’s going on and let it derail the process going on here in Ferguson. At the end of the day, we still have to move the ball forward. We still have to create the changes that need to happen. And we’re not going to let anybody on the outside or inside derail us from that goal or mission.”

On [CNN’s Situation Room](#) (3/12, 554K), national NAACP President Cornell William Brooks said of Wednesday night’s shootings, “Certainly, this is a tragedy. But I cannot believe that one thuggish opportunist can set back a movement. We are concerned about these officers who have been shot while protecting a community, not their own, not as a part of their police department or force. ... They were going the extra mile, if you will, to protect these protesters and the Ferguson community. I cannot believe that one thug, one criminal opportunist can set back all of these young people who have been standing for social justice, standing for community policing.”

The [New York Times](#) (3/13, Eligon, Subscription Publication, 9.97M) reports that “community organizers extended sympathy to the officers who were shot, while trying to keep the focus on their own longstanding complaints.” The Rev. Traci Blackmon of Christ the King United Church of Christ “in nearby Florissant,” said, “As frequent victims of violence, we certainly understand the pain of these senseless acts.” National Urban League President Marc Morial said on [CNN’s Situation Room](#) (3/12, 554K) that “the underlying issue is that the Ferguson leadership still remains in denial, refuses to accept the idea that this Department needs to be changed. That’s why I think disbanding it and starting over or disbanding it and finding another law enforcement agency is, indeed, what is necessary.”

Trymaine Lee said on [MSNBC’s The Ed Show](#) (3/12, 444K) that activists and demonstrators say the protests are only beginning and, “One, two, three, four, five resignations does not shake up and shape the culture. They are asking for an entire reconstruction of local law enforcement, especially given the revelations in the Department of Justice’s report last week, such wide disparities in the way black folks are treated.” They say that “they are going to keep pushing until there is justice broadly in this community and that starts replacing the top with new folks.”

In an editorial, the [New York Times](#) (3/13, Subscription Publication, 9.97M) says “police officials should not use the shootings as an excuse to clamp down on legal, peaceful demonstrations,” a step that “would only inflame tensions, making the climate worse.” The Times also writes that “the illegal and discriminatory measures uncovered by” DOJ “are not limited to that troubled municipality.” Instead, “the evidence strongly suggests that Ferguson is not even the worst civil rights offender” in the area, and “cleaning up that one town won’t necessarily help its residents if they continue to be ensnared in the deplorable justice systems operating elsewhere in St. Louis County.”

[USA Today](#) (3/13, Hampson, Bello, Johnson, 4.95M) asked “past and present public officials...around the country” to weigh in on the road ahead for Ferguson. Ray Kelly, New York City police commissioner from 1992-94 and 2002-13, urges “a serious look at government consolidation,” which would produce “economies of scale, and...would address the racial disparities on the police department.” The new police chief, meanwhile, should “probably” be “someone of color.” Former Philadelphia mayor Ed Rendell would “add African Americans

Obama Decries Shootings, Says “Oppressive And Objectionable” Policing “Worthy Of Protest.” The [Chicago Tribune](#) (3/13, Finnegan, Decker, 2.42M) reports that appearing on “Jimmy Kimmel Live,” the President “called years of racial targeting in Ferguson...’oppressive and objectionable and worthy of protest’ but decried the gunfire that left two police officers injured there early Thursday.” Said Obama, “There was no excuse for criminal acts. ... And whoever fired those shots shouldn’t detract from the issue. They’re criminals. They need to be arrested. And then, what we need to do is to make sure that like-minded, good-spirited people on both sides – law enforcement who have a terrifically tough job and people who understandably don’t want to be stopped and harassed just because of their race – that we’re able to work together to try to come up with some good answers.”

The [New York Times](#) (3/13, Shear, Subscription Publication, 9.97M) notes that those comments “came at a serious moment in an appearance on the late-night comedy show that also included references to Area 51, Hillary Rodham Clinton’s email address and the question of whether Mr. Obama goes in search of late-night White House sandwiches in his underwear. (‘I could. I don’t,’ he said.)”

Clay, Cleaver Offer \$3,000 Reward For Information Leading To Shooters. [Politico](#) (3/12, French, 669K) reported Reps. Lacy Clay and Emanuel Cleaver “are offering a cash reward to anyone with information that leads to the arrest of those responsible for shooting two police officers in Ferguson.” Both [Politico](#) and [The Hill](#) (3/12, Lillis, 224K) note the lawmakers strongly condemned the shootings.

Fox & Friends Tweet: Shooting One Week After Holder Said He Wanted To “Dismantle The City’s PD.” Dylan Byers reported in a post for [Politico](#) (3/12, 669K) that “the Fox News morning program ‘Fox & Friends’ sought to link...Eric Holder to the recent shooting,” in “a move that seemed to reinforce critics’ worst suspicions about the network’s biases.” The show tweeted, “New #Ferguson violence comes just one week after AG Holder vowed to dismantle the city’s PD. Is this what he meant?” Erik Wemple, in his post for the [Washington Post](#) (3/13, 5.17M), lamented the “frequently slanted, cynical and downright awful reporting of ‘Fox & Friends.’”

St. Louis Police Union Official On Fox & Friends: Protesters Want “Dead Cops.” The [Washington Times](#) (3/13, Richardson, 644K) reports that appearing on “Fox & Friends” yesterday, Jeff Roorda, “business manager of the St. Louis Police Officers Association,” said “anti-police protesters aren’t satisfied with reform – what they want is ‘dead cops.’” Said Roorda, “That’s what they want. And let’s not pretend I like they wanted Tom Jackson’s resignation, or that they’re still mad because Mayor [James] Knowles is there. ... They want dead cops and that was their goal all along, and that was their goal last night.” He added, “We’re [sic] perpetuated one lie after another to mollify those who want to see cops dead.”

Roorda On CNN: “Very Upset” With Holder. Later Thursday, Roorda said on [CNN’s The Lead](#) (3/12, 320K), “Let’s acknowledge that there are two different groups of very different intent. There is peaceful protesters who are out here that have a message they are trying to share with the world, but then amongst them, there are folks that have some really violent intentions.” Roorda added that he is “very upset with...Holder, the way he rolled out the Department of Justice findings instead of putting this myth that Darren Wilson gunned down Michael Brown in cold blood as he was attempting to surrender to bed finally. He couldn’t quite bring himself to say that.” As a result, “we never really got the closure on the reason these protests began in the first place.”

Giuliani: Wilson Should Be “Commended” For Brown Shooting. The [Huffington Post](#) (3/12, Tani, 281K) reported that in an interview on Fox News, Rudy Giuliani said of former Officer Darren Wilson, “What happened in Ferguson is that a man committed a robbery, attempted to assault a police officer, and the police officer – to save his life – shot him. ... The police officer did his duty. The officer should be commended for what he did.”

[Politico](#) (3/13, Lerner, 669K) noted the former New York City mayor “spoke at length during the interview about his belief that Ferguson had been overtaken by an ‘atmosphere of unbalance’ since Brown’s shooting,” claiming “this atmosphere has been perpetuated by comments from members of the Obama administration, as well as the Justice Department’s scathing report on the Ferguson Police Department, released last week.”

O’Reilly: Shooting “A Calculated Ambush By Anarchists,” Not Protesters. Bill O’Reilly said in his opening monologue on [Fox News’ The O’Reilly Factor](#) (3/12, 767K), “I believe the protesters did not shoot the officers. This was a calculated ambush by anarchists.” The shootings, he added, were “an anti-American play, and it is the job of the press to expose the haters, not lump them in with legitimate protesters. Right now, that job is not being done.”

Missouri State Senator: White Supremacists, ISIL May Be Behind Shooting. The [Daily Caller](#) (3/13, Griswold, 318K) reported that “Democratic Missouri State Senator Jamilah Nasheed opined on MSNBC that the shooting of two Ferguson police officers could have been carried out [by] ISIS operatives or white supremacists who ‘infiltrated’ the ‘peaceful protest.’” Said Nasheed, “I truly believe that someone is trying to incite a race riot. ... We’ve heard throughout the months that the white supremacists were on the ground. We heard that ISIS was doing their recruiting. So who’s to say that is not the case?” The senator went on to call for “a thorough investigation.”

Fiorina, Limbaugh Blame Holder And Obama. [Politico](#) (3/12, Gass, 669K) reported on its website that “at least one Republican presidential hopeful weighed in on the recent developments in Ferguson.” Carly Fiorina said on Laura Ingraham’s radio show, “A very tense and tragic situation in Ferguson has been made far worse by the commentary and the incitement by the people who come into the situation and use it to their own advantage. ... I think, unfortunately...Holder and...Obama have demonstrated their willingness to jump to conclusions and make statements before the facts are known.”

On the [Rush Limbaugh Show](#) (3/13, Limbaugh, 98K), Limbaugh said yesterday, “Well, I guess congratulations are in order. President Obama, Al Sharpton, Attorney General Eric Holder, St. Louis is on fire again. ... The attorney general sends out this report: Ferguson police department filled with prejudice. What did they think was gonna happen? What in the world did they think was gonna happen?”

Fox Commentators Blame Media. Greg Gutfeld said on [Fox News’ The Five](#) (3/12, 408K), “Where is the silent majority of the people that love law enforcement, that respect law enforcement? It’s time for them to speak up and march for these people that are now bull’s eyes. ... We watched an entire nation of law enforcement get smeared over Ferguson. ... We should indict the salivating, race-crazed

Eric Bolling said on [Fox News' The Five](#) (3/12, 408K) that the shooting of police "keeps on happening, even after the Attorney General tells us that they found nothing wrong with Darren Wilson's behavior on the day that Michael Brown was killed. The media loves this stuff" and it is "great for business with people who are in the race business, the Al Sharptons of the world. You listen to Al Sharpton and you don't hear what he should be saying. He should be saying this is ridiculous, enough is enough. We have to stop. ... Is it too harsh to say there's two more cops with their blood on Sharpton's hands in addition to the other ones that happened in the aftermath of Al Sharpton's protest that he called for down here in New York?"

AMID PROBE OF SENIOR AGENTS, OBAMA STANDS BY SECRET SERVICE DIRECTOR. In the wake of the latest Secret Service controversy, the White House is expressing its "full confidence" in Director Joe Clancy. [Reuters](#) (3/13, Mason) notes that White House spokesman Eric Schultz said yesterday on Air Force One, en route to California, "Nobody has higher standards for the Secret Service than Director Clancy." [Politico](#) (3/12, Nather, 669K) reported that Schultz went on to add that Clancy "does have the full confidence of the president to not only institute the structural reforms he believes are needed at the Secret Service, but also the cultural changes that both Director Clancy believes are necessary and the president has talked about."

The [CBS Evening News](#) (3/12, story 2, 1:50, Garrett, 5.08M) said "top White House officials are irritated they learned about all this for the first time on Monday, four full days after the incident occurred." CBS also "learned that...Clancy...also first learned of this on Monday, a clear indication his agency has several problems to correct." In an editorial, the [Washington Post](#) (3/13, 5.17M) says "this is only the latest in a string of scandals," and "the need for deep change seems more urgent with each mortifying incident," with "the argument for an outside change agent" growing "more persuasive. Why, for example, did the Secret Service not even divulge the latest problem until The Post came calling?"

The [Washington Post](#) (3/13, Leonnig, Hermann, 5.17M), meanwhile, reports that "two senior agents" are under investigation from the DHS IG, "suspected of driving under the influence and striking a White House security barricade," and in doing so disrupting "an active bomb investigation." The two "may have driven over the suspicious package itself, according to current and former government officials familiar with the incident." According to the [Washington Times](#) (3/13, Boyer, 644K), "several Secret Service supervisors attended" a "party with heavy drinking" to honor retiring agency spokesman Ed Donovan. The gathering took place "at a bar several blocks from the White House."

[NBC Nightly News](#) (3/12, story 2, 3:15, Jansing, 7.86M) showed Rep. Jason Chaffetz saying, "Does it really need to be said that you can't show up drunk at work, especially when you're in the Secret Service?" Rep. Elijah Cummings, meanwhile, said, "There's absolutely no doubt that heads need to roll." Chaffetz "says he learned from...four whistleblowers" that "officers on duty wanted to arrest the agents and give them a sobriety test, but a supervisor said to send them home." The [New York Times](#) (3/13, Davis, Schmidt, Parker, Subscription Publication, 9.97M) reports that Chaffetz also "said he had spoken with Mr. Clancy on Wednesday," and remarked, "How he handles this is as important as the incident itself."

[ABC World News](#) (3/12, story 2, 2:20, Thomas, 5.84M), meanwhile, cited "sources" who "say one agent" out of the two involved in the incident is "a senior supervisor, and the other, Mark Connolly, is the 2nd ranking agent on the presidential detail" and "has been a constant presence at the President's side in recent years."

ECONOMISTS PREDICT US GROWTH TO SLOW ON STRONGER DOLLAR. The [Wall Street Journal](#) (3/13, Madigan, Subscription Publication, 5.67M) reports on the results of its March survey of economists, highlighting the general view that the strength of the dollar and international sluggishness will likely slow US growth through the first six months of the year or longer. The survey's 63 respondents predicts a 2.3% growth rate for this quarter and a 2.9% GDP growth for the year. In a front-page story, the [Wall Street Journal](#) (3/13, Jervell, Mesco, Chow, Subscription Publication, 5.67M) also reports American corporations could be hurt by the falling euro and rising dollar as they impact overseas competition.

Retail Sales Down For Third Straight Month. The [AP](#) (3/13) reports that Commerce Department announced yesterday that retail sales "fell 0.6 percent last month, a third straight retreat, including a 0.8 percent decline in January." However, "excluding the volatile categories of autos, gas, building materials and restaur

Politico: Jewell can't guarantee Atlantic lease sales

Inbox x

POLITICO Pro Energy Whiteboard 9:59 AM (14 minutes ago)

to me

3/5/15 10:00 AM EST

Interior Secretary Sally Jewell told lawmakers today that she can't promise that the Atlantic will see an oil and gas lease sale as part of the next five-year plan.

Asked by Rep. Doug Lamborn about offshore leases, Jewell noted that the administration's recently released draft proposed plan covering 2017-2022 included parts of the Atlantic outer continental shelf.

"So you guarantee that the Atlantic will be part of final version?" Lamborn asked during a hearing of the House Natural Resources Committee, which went on despite the snow falling on D.C.

"No, I can't guarantee anything," Jewell responded. "We are in the draft proposed plan phase and we are taking public comment as is required of us by law."

Interior is taking public comment on the draft through March 30.

WASHINGTON — Interior Secretary Sally Jewell pressed Senate appropriators Wednesday to approve the Obama administration's 2016 budget request of \$13.2 billion for the agency, including \$900 million for Land and Water Conservation Fund projects.

"This is, dollar for dollar, one of the most effective government programs we have," Jewell told members of the Appropriations Subcommittee on Interior, Environment, and Related Agencies, including Sen. Jeff Merkley, D-Ore.

First enacted in 1964, the Land and Water Conservation Fund uses gas and oil receipts from drilling on the outer continental shelf to conserve national parks, forests, wildlife refuges, wilderness and Civil War battlefields, and to develop and support state and local parks.

By law, the fund may receive \$900 million each year, but it rarely receives its full allotment, and \$17 billion has been allocated for other purposes over the last 50 years.

Legislation authorizing the fund to distribute money to various projects will expire at the end of September.

President Obama's 2016 budget calls for funding the program at its maximum of \$900 million, and includes money for several projects in Oregon.

The biggest project for Oregon is the Pathways to the Pacific, which would receive \$14 million to stabilize fish runs and improve public access with acquisitions in the Oregon National Historic Trail, the John Day Wild and Scenic River, the Columbia River Gorge National Scenic Area, John Day Fossil Beds National Monument, and Willapa and Ridgefield national wildlife refuges.

The Cascade-Siskiyou National Monument would receive a \$2.6 million grant to acquire almost 2,300 acres, with an additional \$3 million slated for land acquisition on Wassen Creek in Siuslaw National Forest.

Kelley Beamer, the executive director of the Coalition of Oregon Land Trusts said in a prepared statement that LWCF funding has helped preserve many places that Oregonians hold dear.

"It has helped protect working farms, forests and ranches, including most recently the Gilchrist Forest outside Bend. Without the Land and Water

Senators hope to extend Land and Water Conservation Fund

11/26/2014

Conservation Fund, Oregon would not be what it is today," Beamer said.

Late last year, Congress approved \$306 million for LWCF projects, meaning many projects that had been vetted and approved did not receive funding.

"Without full funding, some critical projects in Oregon like protecting the east moraine of Wallowa Lake, will never get completed and instead be lost to development or other threats," Beamer said.

In November, a bipartisan group of 40 senators, including Merkley and fellow Oregon Democrat Ron Wyden, wrote to Senate leadership, urging them to help pass a reauthorization of the Land and Water Conservation Act during the lame duck session. That didn't happen, and the program will expire at the end of September if Congress doesn't act.

Merkley said Wednesday that he will use his seat on the Appropriations Committee to keep fighting for full funding for LWCF.

"Oregon's outdoor spaces are a crucial part of our heritage and what makes our region unique. It's important that we preserve these special places for our children and grandchildren, and the Land and Water Conservation Fund is a critical tool for creating and preserving public lands," he said.

WASHINGTON — The Obama administration will decide soon whether to give in to [Shell's request for extra time to hunt for oil in Arctic waters](#). Interior Secretary Sally Jewell said Wednesday.

Without action, Shell's oil and gas leases in the Beaufort Sea will begin expiring in 2017, followed by its drilling rights in the neighboring Chukchi Sea two years later.

The same fate awaits Chukchi Sea leases sold in 2008 to Statoil and ConocoPhillips, which have made similar appeals for more time, citing regulatory uncertainty, legal challenges and other obstacles.

Read more: [Oil companies want more time for Arctic drilling](#)

"We are actively working with Shell and other leaseholders up there on their request for suspensions," Jewell said during a Senate Appropriations subcommittee hearing. "We will be resolving that relatively soon."

The companies' bids for "suspensions of operation" would effectively stop the clock ticking on their 10-year leases. The Bureau of Safety and Environmental Enforcement is actively considering the requests from Shell and Statoil that were filed in July 2014; it previously rejected ConocoPhillips' November 2013 bid for at least three more years. ConocoPhillips appealed the decision to an Interior Department appeals board, and settlement talks are now under way.

Neither Statoil nor ConocoPhillips has active plans to drill in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells that stopped short of penetrating potential oil-bearing zones.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. (Shell) needs to retain its existing lease portfolio to warrant this enormous investment."

Limited window

Murkowski cited the limited 75-day window for drilling in the Arctic, when waters are free of ice — as opposed to the year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have delayed work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those

Shell used the drillship Noble Discoverer for its 2012 drilling in the Chukchi Sea north of Alaska. (Jennifer A. Dlouhy / The Houston Chronicle)

legal delays.

Most recently, the Bureau of Ocean Energy Management [completed a new environmental analysis](#) of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. But the final decision on whether to affirm, modify or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

'Helping Shell'

Jewell stressed that Interior Department regulators were focused on completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," Jewell said.

Jewell also made a nod to the mishaps that marred Shell's 2012 Arctic operation, including the grounding of its non-propelled Kulluk drilling rig during an ill-fated tow across the Gulf of Alaska and the company's difficulty certifying and readying a unique emergency oil spill containment system so it could safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsively, and we want to be responsive to the companies."

'Special treatment'

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time amounts to unwarranted "special treatment" said Oceana Deputy Vice President Susan Murray in [a Feb. 27 letter to the safety bureau](#).

"Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging," Murray said. "Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases."

Extensions also could mean taxpayers — who own the oil at issue — are "no longer getting fair value," said Michael LeVine, Pacific senior counsel for the group. "The government sold the rights to public resources under a certain set of circumstances and terms and shouldn't then rule to change those terms."

In general, leases expire at the end of their terms unless operators are "conducting operations" on the lease, such as drilling, reworking wells or producing oil and gas.

"Suspension of operation" requests are relatively common in the Gulf of Mexico, where they often are filed right before leases are set to expire, unlike the Arctic requests now pending before the safety bureau.

Safety bureau spokesman Nicholas Pardi said the agency "evaluates suspension requests on a case-by-case basis."

Federal regulations give the agency relatively little authority to grant the suspensions, including to allow compliance with judicial decrees, when activities pose a threat of harm or damage, when they are needed to install safety equipment or conduct environmental analysis and to allow for "inordinate delays" in obtaining permits.

The oil companies' requests may lay the groundwork for bigger changes, including potential action by Congress and the Obama administration to rewrite the terms of oil and gas leases in isolated Arctic waters.

U.S. to decide soon on Shell request for extra time on Arctic leases

Jennifer A. Dlouhy | Houston Chronicle March 4, 2015

WASHINGTON -- The Obama administration will decide soon whether to sign off on Shell's request for extra time to hunt for oil in Arctic waters, Interior Secretary Sally Jewell said Wednesday.

Without action, Shell's oil and gas leases in the Beaufort Sea will begin expiring in 2017, followed by its drilling rights in the neighboring Chukchi Sea two years later.

The same fate awaits Chukchi Sea leases sold in 2008 to Statoil and ConocoPhillips, which have made similar appeals for more time, citing regulatory uncertainty, legal challenges and other obstacles.

"We are actively working with Shell and other leaseholders up there on their request for suspensions," Jewell said during a Senate Appropriations subcommittee hearing. "We will be resolving that relatively soon."

The companies' bids for "suspensions of operation" would effectively stop the clock ticking on their 10-year leases. The Bureau of Safety and Environmental Enforcement is considering requests from Shell and Statoil filed in July 2014; it previously rejected ConocoPhillips' November 2013 bid for at least three more years. ConocoPhillips appealed the decision to an Interior Department appeals board, and settlement talks are under way.

Neither Statoil nor ConocoPhillips is actively pursuing drilling in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. It needs to retain its existing lease portfolio to warrant this enormous investment."

She cited the limited 75-day window for drilling in the Arctic, when waters are free of ice, unlike year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have blocked work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those delays.

Most recently, the Bureau of Ocean Energy Management completed a new environmental analysis of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. The decision to affirm, change or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

Jewell stressed that Interior Department regulators are dedicated to completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," she said.

Jewell also made a nod to mishaps that marred Shell's 2012 Arctic operation, including the grounding of its Kulluk drilling rig and the company's difficulty readying an emergency oil spill containment system to safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsively, and we want to be responsive to the companies."

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time would be unwarranted "special treatment" said Oceana Deputy Vice President Susan Murray.

"Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging," Murray said. "Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases."

In general, offshore leases expire unless operators are "conducting operations" on them, such as drilling, reworking wells or producing oil and gas.

"Suspension of operation" requests are relatively common in the Gulf of Mexico, where they often are filed shortly before leases are set to expire.

Safety bureau spokesman Nicholas Pardi said the agency "evaluates suspension requests on a case-by-case basis."

Murkowski Seeks Lease Extensions for Shell

By Liz Ruskin, APRN | March 4, 2015

Last summer, Shell asked the government to extend its offshore drilling leases in the Arctic. Today, U.S. Sen. Lisa Murkowski pressed Shell's case to Interior Secretary Sally Jewell in a Senate hearing. Murkowski says Shell needs certainty to continue to invest billions of dollars in its Arctic operations.

Vm|P

"Because of this very short window, a 75-day Arctic drilling season, and the difficulties and the delays and the legal challenges that are all out there, that Shell has endured for the past decade, there really are not enough drilling seasons remaining for Shell to complete more than a handful of exploration wells before the Chukchi lease portfolio expires," Murkowski said.

Jewell says the clock on Shell's 10-year leases in the Chukchi Sea was stopped for a period when a court ruled the government had to redo its environmental impact statement. Jewell says her department is still considering Shell's request for a five-year suspension of the lease clock.

"We took our resources and focused them, as we were requested to do, on helping Shell move forward for this drilling season. I also know that we are actively working with them on suspensions and I think they can expect any answer in the relatively near future," Jewell said.

Oceana and other environmental groups oppose giving Shell more time on their leases. They say the reasons for Shell's lack of progress were known from outset, like the harsh conditions and the Native whaling season, or were of Shell's own making.

Jewell: No Plan Afoot to Declare ANWR Monument

By Liz Ruskin, APRN | March 4, 2015

President Obama infuriated Alaska's political leaders when he announced in January he would ask Congress to protect more land within the Arctic National Wildlife Refuge as wilderness, forever off-limits to oil drilling. Some, including Sen. Lisa Murkowski, predict Obama will act on his own to bar development, by using the Antiquities Act to declare ANWR a national monument. Interior Secretary Sally Jewell said today that's not in the works.

"There's no discussions in the Administration right now about monument status for the Arctic National Wildlife Refuge," she said. She then repeated it in response to a reporter's question: "There are no plans the Administration has for using the national monument designation or the Antiquities Act for the Arctic National Wildlife Refuge."

Jewell, though, does not agree that the "no more" clause of the Alaska National Interest Lands Conservation Act would prohibit the president from declaring new national monuments in Alaska.

"I'm not an expert on the legal status but I believe we could use the Antiquities Act," Jewell said. "But there are no plans to do so in Alaska at this time."

OIL AND GAS:

Murkowski accuses BLM of 'pay to play' in Alaska drilling

Phil Taylor, E&E reporter

GREENWIRE -- Register for trial access

The Bureau of Land Management's decision to charge an oil company \$8 million for the right to develop its leases in an Alaskan reserve is a slippery slope that could make other companies think twice about developing on federal lands, Alaska's senior senator said today.

Sen. Lisa Murkowski (R) grilled Interior Secretary Sally Jewell on whether her agency has the legal authority to require mitigation fees for energy projects that would otherwise be permissible on public lands.

The senator's concern stems from BLM's decision last month to approve ConocoPhillips Co.'s plan to become the first company to produce oil in the National Petroleum Reserve (NPR-A) in northwest Alaska. BLM is requiring the company to pony up \$8 million for a regional mitigation strategy that will protect lands of environmental, subsistence or cultural significance to local Native Alaskans and potentially remediate legacy wells drilled by other entities.

3/5/15 10:12 AM EST

Rep. Niki Tsongas urged Interior Secretary Sally Jewell today to drop consideration of an oil and gas lease sale for the Atlantic outer continental shelf in the next five-year plan.

"I take exception to that," said Tsongas, the top Democrat on the Natural Resources Committee's federal lands subcommittee.

The proposed draft plan, covering 2017-2022, included parts of the Atlantic off the coasts of Virginia and the Carolinas for potential lease sales.

"While the plan did not include areas off the coast of my home state, Massachusetts, we can be sure that a spill off the coast of Virginia or North Carolina would have serious consequences for our New England beaches and our commercial fishermen," Tsongas said at a hearing today. "I strongly urge you to seriously consider removing the proposed Atlantic lease sale from the final five-year plan."

POLITICO Pro Energy Whiteboard 9:59 AM (14 minutes ago)

to me

3/5/15 10:00 AM EST

Interior Secretary Sally Jewell told lawmakers today that she can't promise that the Atlantic will see an oil and gas lease sale as part of the next five-year plan.

Asked by Rep. Doug Lamborn about offshore leases, Jewell noted that the administration's recently released draft proposed plan covering 2017-2022 included parts of the Atlantic outer continental shelf.

"So you guarantee that the Atlantic will be part of final version?" Lamborn asked during a hearing of the House Natural Resources Committee, which went on despite the snow falling on D.C.

"No, I can't guarantee anything," Jewell responded. "We are in the draft proposed plan phase and we are taking public comment as is required of us by law."

Interior is taking public comment on the draft through March 30.

reworking wells or producing oil and gas.

"Suspension of operation" requests are relatively common in the Gulf of Mexico, where they often are filed right before leases are set to expire, unlike the Arctic requests now pending before the safety bureau.

Safety bureau spokesman Nicholas Pardi said the agency "evaluates suspension requests on a case-by-case basis."

Federal regulations give the agency relatively little authority to grant the suspensions, including to allow compliance with judicial decrees, when activities pose a threat of harm or damage, when they are needed to install safety equipment or conduct environmental analysis and to allow for "inordinate delays" in obtaining permits.

The oil companies' requests may lay the groundwork for bigger changes, including potential action by Congress and the Obama administration to rewrite the terms of oil and gas leases in isolated Arctic waters.

U.S. to decide soon on Shell request for extra time on Arctic leases

Jennifer A. Dlouhy | Houston Chronicle March 4, 2015

+A

WASHINGTON -- The Obama administration will decide soon whether to sign off on Shell's request for extra time to hunt for oil in Arctic waters, Interior Secretary Sally Jewell said Wednesday.

Without action, Shell's oil and gas leases in the Beaufort Sea will begin expiring in 2017, followed by its drilling rights in the neighboring Chukchi Sea two years later.

RELATED:

[Environmentalists sue Port of Seattle over Shell's Arctic drilling fleet](#)

[Interior agencies release proposed new Arctic Ocean drilling standards](#)

The same fate awaits Chukchi Sea leases sold in 2008 to Statoil and ConocoPhillips, which have made similar appeals for more time, citing regulatory uncertainty, legal challenges and other obstacles.

"We are actively working with Shell and other leaseholders up there on their request for suspensions," Jewell said during a Senate Appropriations subcommittee hearing. "We will be resolving that relatively soon."

The companies' bids for "suspensions of operation" would effectively stop the clock ticking on their 10-year leases. The Bureau of Safety and Environmental Enforcement is considering requests from Shell and Statoil filed in July 2014; it previously rejected ConocoPhillips' November 2013 bid for at least three more years. ConocoPhillips appealed the decision to an Interior Department appeals board, and settlement talks are under way.

Neither Statoil nor ConocoPhillips is actively pursuing drilling in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. It needs to retain its existing lease portfolio to warrant this enormous investment."

She cited the limited 75-day window for drilling in the Arctic, when waters are free of ice, unlike year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have blocked work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those delays.

Most recently, the Bureau of Ocean Energy Management completed a new environmental analysis of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. The decision to affirm, change or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

Jewell stressed that Interior Department regulators are dedicated to completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," she said.

Jewell also made a nod to mishaps that marred Shell's 2012 Arctic operation, including the grounding of its Kulluk drilling rig and the company's difficulty readying an emergency oil spill containment system to safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsibly, and we want to be responsive to the companies."

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time would be unwarranted "special treatment" said Oceana Deputy Vice President Susan Murray.

"Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging," Murray said. "Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases."

In general, offshore leases expire unless operators are "conducting operations" on them, such as drilling, reworking wells or producing oil and gas.

"Suspension of operation" requests are relatively common in the Gulf of Mexico, where they often are filed shortly before leases are set to expire.

Safety bureau spokesman Nicholas Pardi said the agency "evaluates suspension requests on a case-by-case basis."

Murkowski Seeks Lease Extensions for Shell

By [Liz Ruskin, APRN](#) | March 4, 2015

Last summer, Shell asked the government to extend its offshore drilling leases in the Arctic. Today, U.S. Sen. Lisa Murkowski pressed Shell's case to Interior Secretary Sally Jewell in a Senate hearing. Murkowski says Shell needs certainty to continue to invest billions of dollars in its Arctic operations.

Vm|P

"Because of this very short window, a 75-day Arctic drilling season, and the difficulties and the delays and the legal challenges that are all out there, that Shell has endured for the past decade, there really are not enough drilling seasons remaining for Shell to complete more than a handful of exploration wells before the Chukchi lease portfolio expires," Murkowski said.

Jewell says the clock on Shell's 10-year leases in the Chukchi Sea was stopped for a period when a court ruled the government had to redo its environmental impact statement. Jewell says her department is still considering Shell's request for a five-year suspension of the lease clock.

"We took our resources and focused them, as we were requested to do, on helping Shell move forward for this drilling season. I also know that we are actively working with them on suspensions and I think they can expect any answer in the relatively near future," Jewell said.

Oceana and other environmental groups oppose giving Shell more time on their leases. They say the reasons for Shell's lack of progress

were known from outset, like the harsh conditions and the Native whaling season, or were of Shell's own making.

Jewell: No Plan Afoot to Declare ANWR Monument

By Liz Ruskin, APRN | March 4, 2015

President Obama infuriated Alaska's political leaders when he announced in January he would ask Congress to protect more land within the Arctic National Wildlife Refuge as wilderness, forever off-limits to oil drilling. Some, including Sen. Lisa Murkowski, predict Obama will act on his own to bar development, by using the Antiquities Act to declare ANWR a national monument. Interior Secretary Sally Jewell said today that's not in the works.

"There's no discussions in the Administration right now about monument status for the Arctic National Wildlife Refuge," she said. She then repeated it in response to a reporter's question: "There are no plans the Administration has for using the national monument designation or the Antiquities Act for the Arctic National Wildlife Refuge."

Jewell, though, does not agree that the "no more" clause of the Alaska National Interest Lands Conservation Act would prohibit the president from declaring new national monuments in Alaska.

"I'm not an expert on the legal status but I believe we could use the Antiquities Act," Jewell said. "But there are no plans to do so in Alaska at this time."

GOP chairman slams 'underimpressive' Interior budget plan

By Timothy Cama - 03/05/15 12:32 PM EST

1

5

Rep. Rob Bishop (R-Utah) on Thursday blasted the Interior Department's budget request, arguing it avoided confronting major problems while creating expensive, unnecessary programs.

Bishop, chairman of the House Natural Resources Committee, said the plan was "really underimpressive" and that he "found no idea in there that I consider creative or different or unusual."

He criticized what he saw as "just the same old, same old, raise taxes, raise fees, write more regulations and then throw money at a problem" in the \$13.2 billion budget request, including money to acquire new federal land while current property needs maintenance.

Bishop made the comments at a hearing with Interior Secretary Sally Jewell. It was the sole hearing in the House on a day in which both chambers of Congress canceled their sessions because of a winter storm.

Rep. Raúl Grijalva (D-Ariz.) welcomed the budget, pointing out that Interior, which leases land to energy production, proposes to bring more money in than it will spend.

"If Congress simply enacted your budget, we could reduce the deficit by more than half a million dollars," he said. "Unfortunately, that's not likely to happen."

Jewell said the proposal is "is a forward-looking budget that provides targeted investments to grow our domestic energy portfolio, creating jobs here at home, building communities resilience and revitalizing our national parks as they approach their 100th anniversary."

While Republicans were highly critical of Interior policies such as those for endangered species and offshore oil and gas drilling, lawmakers said they were thankful to Jewell and Deputy Interior Secretary Mike Connor for venturing through the poor weather to come to the hearing.

"Secretary Jewell, thank you for being here today despite the fact that the federal government is shut down," said Del. Madeleine Bordallo (D-Guam). "I'm very impressed that our secretary is here."

1

Bishop asked that members of the panel submit any opening remarks for the hearing's record by 5 p.m. "or whenever this building crushes under a blanket of snow ... whichever occurs faster."

Rep. Don Young (R-Alaska) said he was thankful for the "Alaskan weather," and jokingly proposed moving Alaska's Iditarod Trail Sled Dog Race to the streets surrounding the Capitol, because a lack of snow has made planning for the race difficult.

3/5/15 10:12 AM EST

Rep. Niki Tsongas urged Interior Secretary Sally Jewell today to drop consideration of an oil and gas lease sale for the Atlantic outer continental shelf in the next five-year plan.

"I take exception to that," said Tsongas, the top Democrat on the Natural Resources Committee's federal lands subcommittee.

The proposed draft plan, covering 2017-2022, included parts of the Atlantic off the coasts of Virginia and the Carolinas for potential lease sales.

"While the plan did not include areas off the coast of my home state, Massachusetts, we can be sure that a spill off the coast of Virginia or North Carolina would have serious consequences for our New England beaches and our commercial fishermen," Tsongas said at a hearing today. "I strongly urge you to seriously consider removing the proposed Atlantic lease sale from the final five-year plan."

Interior Secretary Sally Jewell told lawmakers today that she can't promise that the Atlantic will see an oil and gas lease sale as part of the next five-year plan.

Asked by Rep. Doug Lamborn about offshore leases, Jewell noted that the administration's recently released draft proposed plan covering 2017-2022 included parts of the Atlantic outer continental shelf.

"So you guarantee that the Atlantic will be part of final version?" Lamborn asked during a hearing of the House Natural Resources Committee, which went on despite the snow falling on D.C.

"No, I can't guarantee anything," Jewell responded. "We are in the draft proposed plan phase and we are taking public comment as is required of us by law."

Interior is taking public comment on the draft through March 30.

Lawmakers asked to fund Land and Water Conservation Fund

Future of conservation program uncertain

By [Andrew Clevenger](#) / The Bulletin / @andclev

Published Mar 5, 2015 at 12:01AM

WASHINGTON — Interior Secretary Sally Jewell pressed Senate appropriators Wednesday to approve the Obama administration's 2016 budget request of \$13.2 billion for the agency, including \$900 million for Land and Water Conservation Fund projects.

"This is, dollar for dollar, one of the most effective government programs we have," Jewell told members of the Appropriations Subcommittee on Interior, Environment, and Related Agencies, including Sen. Jeff Merkley, D-Ore.

First enacted in 1964, the Land and Water Conservation Fund uses gas and oil receipts from drilling on the outer continental shelf to conserve national parks, forests, wildlife refuges, wilderness and Civil War battlefields, and to develop and support state and local parks.

Related articles:

Federal grants will boost Central Oregon parks, rec site

07/24/2014

Senators hope to extend

By law, the fund may receive \$900 million each year, but it rarely receives its full allotment, and \$17 billion has been allocated for other purposes over the last 50 years.

Legislation authorizing the fund to distribute money to various projects will expire at the end of September.

President Obama's 2016 budget calls for funding the program at its maximum of \$900 million, and includes money for several projects in Oregon.

The biggest project for Oregon is the Pathways to the Pacific, which would receive \$14 million to stabilize fish runs and improve public access with acquisitions in the Oregon National Historic Trail, the John Day Wild and Scenic River, the Columbia River Gorge National Scenic Area, John Day Fossil Beds National Monument, and Willapa and Ridgefield national wildlife refuges.

The Cascade-Siskiyou National Monument would receive a \$2.6 million grant to acquire almost 2,300 acres, with an additional \$3 million stated for land acquisition on Wassen Creek in Suislaw National Forest.

Kelley Beamer, the executive director of the Coalition of Oregon Land Trusts said in a prepared statement that LWCF funding has helped preserve many places that Oregonians hold dear.

"It has helped protect working farms, forests and ranches, including most recently the Gilchrist Forest outside Bend. Without the Land and Water Conservation Fund, Oregon would not be what it is today," Beamer said.

Late last year, Congress approved \$306 million for LWCF projects, meaning many projects that had been vetted and approved did not receive funding.

"Without full funding, some critical projects in Oregon like protecting the east moraine of Wallowa Lake, will never get completed and instead be lost to development or other threats," Beamer said.

In November, a bipartisan group of 40 senators, including Merkley and fellow Oregon Democrat Ron Wyden, wrote to Senate leadership, urging them to help pass a reauthorization of the Land and Water Conservation Act during the lame duck session. That didn't happen, and the program will expire at the end of September if Congress doesn't act.

Merkley said Wednesday that he will use his seat on the Appropriations Committee to keep fighting for full funding for LWCF.

"Oregon's outdoor spaces are a crucial part of our heritage and what makes our region unique. It's important that we preserve these special places for our children and grandchildren, and the Land and Water Conservation Fund is a critical tool for creating and preserving public lands," he said.

On Thu, Mar 5, 2015 at 6:45 AM, Jessica Kershaw <jessica_kershaw@ios.doi.gov> wrote:

Politico Morning Energy Tip Sheet; MURKOWSKI CHARGES 'PAY TO PLAY' ON ALASKAN PROJECT: Sen. Lisa Murkowski said an \$8 million mitigation payment ConocoPhillips will be required to make in order to move forward with its Greater Mooses Tooth project in Alaska's National Petroleum Reserve verges on "pay to play." Companies "that have deep pockets and pretty considerable investments" could be needed by the Interior Department into paying large sums for mitigation efforts in order to get a permit, Murkowski said yesterday. "Mitigation is not new," Interior Secretary Sally Jewell said, arguing that requiring off-site mitigation efforts allows for landscape-level planning — like with solar farms in the California desert that were required to pay for desert tortoise habitat preservation elsewhere. Jewell and her No. 2, Mike Connor, explained that Interior hashed out the figure with ConocoPhillips after reviewing the project's impacts on local subsistence resources. But Murkowski wasn't convinced. "The fear is that, rather than creating efficiencies, that what we may have developing here is additional unpredictability, lack of clarity in terms of where you're going with a project that deters investment that really can derail a project," she said.

Neither Statoil nor ConocoPhillips has active plans to drill in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells that stopped short of penetrating potential oil-bearing zones.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. (Shell) needs to retain its existing lease portfolio to warrant this enormous investment."

Limited window

Murkowski cited the limited 75-day window for drilling in the Arctic, when waters are free of ice — as opposed to the year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have delayed work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those legal delays.

Most recently, the Bureau of Ocean Energy Management [completed a new environmental analysis](#) of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. But the final decision on whether to affirm, modify or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

'Helping Shell'

Jewell stressed that Interior Department regulators were focused on completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," Jewell said.

Jewell also made a nod to the mishaps that marred Shell's 2012 Arctic operation, including the grounding of its non-propelled Kulluk drilling rig during an ill-fated tow across the Gulf of Alaska and the company's difficulty certifying and readying a unique emergency oil spill containment system so it could safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsibly, and we want to be responsive to the companies."

'Special treatment'

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time amounts to unwarranted "special treatment" said Oceana Deputy Vice President Susan Murray in [a Feb. 27 letter to the safety bureau](#).

"Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging," Murray said. "Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases."

Extensions also could mean taxpayers — who own the oil at issue — are "no longer getting fair value," said Michael LeVine, Pacific senior counsel for the group. "The government sold the rights to public resources under a certain set of circumstances and terms and shouldn't then rule to change those terms."

In general, leases expire at the end of their terms unless operators are "conducting operations" on the lease, such as drilling, reworking wells or producing oil and gas.

"Suspension of operation" requests are relatively common in the Gulf of Mexico, where they often are filed right before leases are set to expire, unlike the Arctic requests now pending before the safety bureau.

Safety bureau spokesman Nicholas Pardi said the agency "evaluates suspension requests on a case-by-case basis."

Federal regulations give the agency relatively little authority to grant the suspensions, including to allow compliance with judicial decrees, when activities pose a threat of harm or damage, when they are needed to install safety equipment or conduct environmental analysis and to allow for "inordinate delays" in obtaining permits.

The oil companies' requests may lay the groundwork for bigger changes, including potential action by Congress and the Obama administration to rewrite the terms of oil and gas leases in isolated Arctic waters.

WASHINGTON, March 5, 2015 - Interior Secretary Sally Jewell is standing by a proposal to de-list the gray wolf as an endangered species, but she stops short of endorsing legislation to overturn court orders that are keeping the animal under protection.

Jewell is coming under pressure from House Democrats to heed the courts and at least protect the wolf under a downgraded, threatened status.

The Fish and Wildlife Service proposed in 2013 to de-list the gray wolf in most of the continental United States but courts have blocked the action in Wyoming and the western Great Lakes region.

Legislation was recently introduced to finalize the de-listing. Under questioning by one of the bill's cosponsors, Rep. Dan Benishek, R-Mich., at a House Natural Resources Committee hearing Thursday, Jewell didn't endorse the measure ([HR 884](#)), but she said the administration would follow its directive if enacted.

"Clearly we will uphold whatever laws are passed by Congress," she told the committee. "My preference is certainly not to legislate the Endangered Species Act (ESA). But if Congress passed legislation certainly we will uphold the law."

But a letter to Jewell signed by 79 House members, mostly Democrats, and delivered to Jewell ahead of the hearing proposes to list the gray wolf as threatened, rather than endangered.

"Scientific experts have shown, and courts have confirmed, that the best available science does not justify the removal of all ESA protections for gray wolves at this time," the letter says, calling the de-listing bill an "extreme proposal."

Downgrading the wolf to threatened status would "allow states significantly increased certainty and flexibility" in managing the animals, the letter said. Jewell said the department would see "what we're permitted to do under the law."

At one point in the hearing, Rep. Don Young, D-Alaska, lashed out at the signers of the letter, which included the committee's top Democrat, Raul Grijalva of Arizona. The 79 lawmakers, Young said, "haven't got a damn wolf in their whole district."

Young, directing his remarks to the letter signers, went on, "I'd like to introduce them (gray wolves) in your district. If I introduced them in your district you wouldn't have a homeless problem anymore."

The Fish and Wildlife Services believes "their science was sound, but we want to work with the best available science, so I'm sure they will be taking a look at the recommendation," she said.

Rep. Collin Peterson, D-Minn., the ranking member of the House Agriculture Committee and another cosponsor of the delisting legislation, wrote to Jewell in January, asking her to appeal the court decision that reinstated protections for the wolf in his home state. Peterson said reversing the court ruling would return management of the animal back to the state and help farmers and rancher facing a difficult decision between protecting their livestock and complying with another difficult federal court decision.

On a separate issue, Jewell assured the committee the department would heed a policy rider in the fiscal 2015 omnibus spending bill that would prevent the Fish and Wildlife Service from finalizing rules to protect sage grouse habitat under the Endangered Species Act.

But she said the department would still meet a court-ordered deadline in September for determining whether the bird merits protection under the law. "The rider prevents us from writing any regulations .. however, it doesn't prevent the service from coming to a determination on a listing decision."

For example, the policy rider would prevent the service would specifically implementing rules worked out with farmers and ranchers for protecting habitat of the Gunnison sage grouse, she said.

Rep. Rob Bishop (R-Utah) on Thursday blasted the Interior Department's budget request, arguing it avoided confronting major problems while creating expensive, unnecessary programs.

Bishop, chairman of the House Natural Resources Committee, said the plan was "really underimpressive" and that he "found no idea in there that I consider creative or different or unusual."

He criticized what he saw as "just the same old, same old, raise taxes, raise fees, write more regulations and then throw money at a problem" in the \$13.2 billion budget request, including money to acquire new federal land while current property needs maintenance.

Bishop made the comments at a hearing with Interior Secretary Sally Jewell. It was the sole hearing in the House on a day in which both chambers of Congress canceled their sessions because of a winter storm.

Rep. Raúl Grijalva (D-Ariz.) welcomed the budget, pointing out that Interior, which leases land to energy production, proposes to bring more money in than it will spend.

"If Congress simply enacted your budget, we could reduce the deficit by more than half a million dollars," he said. "Unfortunately, that's not likely to happen."

Jewell said the proposal is "is a forward-looking budget that provides targeted investments to grow our domestic energy portfolio, creating jobs here at home, building communities resilience and revitalizing our national parks as they approach their 100th anniversary."

While Republicans were highly critical of Interior policies such as those for endangered species and offshore oil and gas drilling, lawmakers said they were thankful to Jewell and Deputy Interior Secretary Mike Connor for venturing through the poor weather to come to the hearing.

1

"Secretary Jewell, thank you for being here today despite the fact that the federal government is shut down," said Del. Madeleine Bordallo (D-Guam). "I'm very impressed that our secretary is here."

Bishop asked that members of the panel submit any opening remarks for the hearing's record by 5 p.m. "or whenever this building crushes under a blanket of snow ... whichever occurs faster."

Rep. Don Young (R-Alaska) said he was thankful for the "Alaskan weather," and jokingly proposed moving Alaska's Iditarod Trail Sled Dog Race to the streets surrounding the Capitol, because a lack of snow has made planning for the race difficult.

Rep. Niki Tsongas urged Interior Secretary Sally Jewell today to drop consideration of an oil and gas lease sale for the Atlantic outer continental shelf in the next five-year plan.

"I take exception to that," said Tsongas, the top Democrat on the Natural Resources Committee's federal lands subcommittee.

The proposed draft plan, covering 2017-2022, included parts of the Atlantic off the coasts of Virginia and the Carolinas for potential lease sales.

"While the plan did not include areas off the coast of my home state, Massachusetts, we can be sure that a spill off the coast of Virginia or North Carolina would have serious consequences for our New England beaches and our commercial fishermen," Tsongas said at a hearing today. "I strongly urge you to seriously consider removing the proposed Atlantic lease sale from the final five-year plan."

Interior Secretary Sally Jewell told lawmakers today that she can't promise that the Atlantic will see an oil and gas lease sale as part of the next five-year plan.

Asked by Rep. Doug Lamborn about offshore leases, Jewell noted that the administration's recently released draft proposed plan covering 2017-2022 included parts of the Atlantic outer continental shelf.

"So you guarantee that the Atlantic will be part of final version?" Lamborn asked during a hearing of the House Natural Resources Committee, which went on despite the snow falling on D.C.

"No, I can't guarantee anything," Jewell responded. "We are in the draft proposed plan phase and we are taking public comment as is required of us by law."

Interior is taking public comment on the draft through March 30.

Lawmakers asked to fund Land and Water Conservation Fund

Future of conservation program uncertain

By **Andrew Clevenger** / The Bulletin / @andclev

Published Mar 5, 2015 at 12:01AM

WASHINGTON — Interior Secretary Sally Jewell pressed Senate appropriators Wednesday to approve the Obama administration's 2016 budget request of \$13.2 billion for the agency, including \$900 million for Land and Water Conservation Fund projects.

"This is, dollar for dollar, one of the most effective government programs we have," Jewell told members of the Appropriations Subcommittee on Interior, Environment, and Related Agencies, including Sen. Jeff Merkley, D-Ore.

First enacted in 1964, the Land and Water Conservation Fund uses gas and oil receipts from drilling on

Related articles:

Federal grants will boost Central Oregon parks, rec site

the outer continental shelf to conserve national parks, forests, wildlife refuges, wilderness and Civil War battlefields, and to develop and support state and local parks.

07/24/2014

By law, the fund may receive \$900 million each year, but it rarely receives its full allotment, and \$17 billion has been allocated for other purposes over the last 50 years.

Legislation authorizing the fund to distribute money to various projects will expire at the end of September.

President Obama's 2016 budget calls for funding the program at its maximum of \$900 million, and includes money for several projects in Oregon.

11/26/2014

Senators hope to extend Land and Water Conservation Fund

The biggest project for Oregon is the Pathways to the Pacific, which would receive \$14 million to stabilize fish runs and improve public access with acquisitions in the Oregon National Historic Trail, the John Day Wild and Scenic River, the Columbia River Gorge National Scenic Area, John Day Fossil Beds National Monument, and Willapa and Ridgefield national wildlife refuges.

The Cascade-Siskiyou National Monument would receive a \$2.6 million grant to acquire almost 2,300 acres, with an additional \$3 million slated for land acquisition on Wassen Creek in Suislaw National Forest.

Kelley Beamer, the executive director of the Coalition of Oregon Land Trusts said in a prepared statement that LWCF funding has helped preserve many places that Oregonians hold dear.

"It has helped protect working farms, forests and ranches, including most recently the Gilchrist Forest outside Bend. Without the Land and Water Conservation Fund, Oregon would not be what it is today," Beamer said.

Late last year, Congress approved \$306 million for LWCF projects, meaning many projects that had been vetted and approved did not receive funding.

"Without full funding, some critical projects in Oregon like protecting the east moraine of Wallowa Lake, will never get completed and instead be lost to development or other threats," Beamer said.

In November, a bipartisan group of 40 senators, including Merkley and fellow Oregon Democrat Ron Wyden, wrote to Senate leadership, urging them to help pass a reauthorization of the Land and Water Conservation Act during the lame duck session. That didn't happen, and the program will expire at the end of September if Congress doesn't act.

Merkley said Wednesday that he will use his seat on the Appropriations Committee to keep fighting for full funding for LWCF.

"Oregon's outdoor spaces are a crucial part of our heritage and what makes our region unique. It's important that we preserve these special places for our children and grandchildren, and the Land and Water Conservation Fund is a critical tool for creating and preserving public lands," he said.

Politico Morning Energy Tip Sheet: MURKOWSKI CHARGES 'PAY TO PLAY' ON ALASKAN PROJECT: Sen. Lisa Murkowski said an \$8 million mitigation payment ConocoPhillips will be required to make in order to move forward with its Greater Mooses Tooth project in Alaska's National Petroleum Reserve verges on "pay to play." Companies "that have deep pockets and pretty considerable investments" could be needed by the Interior Department into paying large sums for mitigation efforts in order to get a permit, Murkowski said yesterday. "Mitigation is not new," Interior Secretary Sally Jewell said, arguing that requiring off-site mitigation efforts allows for landscape-level planning — like with solar farms in the California desert that were required to pay for desert tortoise habitat preservation elsewhere. Jewell and her No. 2, Mike Connor, explained that Interior hashed out the figure with ConocoPhillips after reviewing the project's impacts on local subsistence resources. But Murkowski wasn't convinced. "The fear is that, rather than creating efficiencies, that what we may have developing here is additional unpredictability, lack of clarity in terms of where you're going with a project that deters investment that really can derail a project," she said.

WASHINGTON — The

Obama administration will decide soon whether to give in to [Shell's request for extra time to hunt for oil in Arctic waters](#), Interior Secretary Sally Jewell said Wednesday.

Without action, Shell's oil and gas leases in the Beaufort Sea will begin expiring in 2017, followed by its drilling rights in the neighboring Chukchi Sea two years later.

The same fate awaits Chukchi Sea leases sold in 2008 to Statoil and ConocoPhillips, which have made similar appeals for more time, citing regulatory uncertainty, legal challenges and other obstacles.

Read more: [Oil companies want more time for Arctic drilling](#)

"We are actively working with Shell and other leaseholders up there on their request for suspensions," Jewell said during a Senate Appropriations subcommittee hearing. "We will be resolving that relatively soon."

Shell used the drillship Noble Discoverer for its 2012 drilling in the Chukchi Sea north of Alaska. (Jennifer A. Dlouhy / The Houston Chronicle)

The companies' bids for "suspensions of operation" would effectively stop the clock ticking on their 10-year leases. The Bureau of Safety and Environmental Enforcement is actively considering the requests from Shell and Statoil that were filed in July 2014; it previously rejected ConocoPhillips' November 2013 bid for at least three more years. ConocoPhillips appealed the decision to an Interior Department appeals board, and settlement talks are now under way.

Neither Statoil nor ConocoPhillips has active plans to drill in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells that stopped short of penetrating potential oil-bearing zones.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. (Shell) needs to retain its existing lease portfolio to warrant this enormous investment."

Limited window

Murkowski cited the limited 75-day window for drilling in the Arctic, when waters are free of ice — as opposed to the year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have delayed work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those legal delays.

Most recently, the Bureau of Ocean Energy Management [completed a new environmental analysis](#) of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. But the final decision on whether to affirm, modify or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

'Helping Shell'

Jewell stressed that Interior Department regulators were focused on completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," Jewell said.

Jewell also made a nod to the mishaps that marred Shell's 2012 Arctic operation, including the grounding of its non-propelled Kulluk drilling rig during an ill-fated tow across the Gulf of Alaska and the company's difficulty certifying and readying a unique emergency oil spill containment system so it could safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsively, and we want to be responsive to the companies."

'Special treatment'

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time amounts to unwarranted "special treatment" said Oceana Deputy Vice President Susan Murray in [a Feb. 27 letter to the safety bureau](#).

"Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging," Murray said. "Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases."

Extensions also could mean taxpayers — who own the oil at issue — are "no longer getting fair value," said Michael LeVine, Pacific senior counsel for the group. "The government sold the rights to public resources under a certain set of circumstances and terms and shouldn't then rule to change those terms."

In general, leases expire at the end of their terms unless operators are "conducting operations" on the lease, such as drilling, reworking wells or producing oil and gas.

"Suspension of operation" requests are relatively common in the Gulf of Mexico, where they often are filed right before leases are set to expire, unlike the Arctic requests now pending before the safety bureau.

Safety bureau spokesman Nicholas Pardi said the agency "evaluates suspension requests on a case-by-case basis."

Federal regulations give the agency relatively little authority to grant the suspensions, including to allow compliance with judicial decrees, when activities pose a threat of harm or damage, when they are needed to install safety equipment or conduct environmental analysis and to allow for "inordinate delays" in obtaining permits.

The oil companies' requests may lay the groundwork for bigger changes, including potential action by Congress and the Obama administration to rewrite the terms of oil and gas leases in isolated Arctic waters.

LUMMIS ESA MAKES A SUCKER OUT OF US Wyoming Rep. Cynthia Lummis took aim at a potentially anachronistic requirement of the Endangered Species Act this morning that has delayed a delisting. The law requires the Fish and Wildlife Service to place a notice in local newspapers that it is delisting a species, including the Modoc sucker, a small fish native to California and Oregon. But FWS failed to run the classified ad until recently, delaying the delisting of the fish. "This is just the latest example about how the ESA perpetuates form over substance, in this case doing nothing to benefit the Modoc sucker and only delaying relief for the people impacted by the listing," Lummis said at a Natural Resources Committee hearing. "It is as if the Endangered Species Act is stuck in 1973 while the rest of us have moved on." Greenwire wrote earlier this week about the classified ad mix-up: <http://bit.ly/1GnXc6F>

Interior Secretary Sally Jewell told lawmakers today that she can't promise that the Atlantic will see an oil and gas lease sale as part of the next five-year plan.

Asked by Rep. Doug Lamborn about offshore leases, Jewell noted that the administration's recently released draft proposed plan covering 2017-2022 included parts of the Atlantic outer continental shelf.

"So you guarantee that the Atlantic will be part of final version?" Lamborn asked during a hearing of the House Natural Resources Committee, which went on despite the snow falling on D.C.

"No, I can't guarantee anything," Jewell responded. "We are in the draft proposed plan phase and we are taking public comment as is required of us by law."

Interior is taking public comment on the draft through March 30.

Lawmakers asked to fund Land and Water Conservation Fund

Future of conservation program uncertain

By [Andrew Clevenger](#) / The Bulletin / @andclev

Published Mar 5, 2015 at 12:01AM

WASHINGTON — Interior Secretary Sally Jewell pressed Senate appropriators Wednesday to approve the Obama administration's 2016 budget request of \$13.2 billion for the agency, including \$900 million for Land and Water Conservation Fund projects.

"This is, dollar for dollar, one of the most effective government programs we have," Jewell told members of the Appropriations Subcommittee on Interior, Environment, and Related Agencies, including Sen. Jeff Merkley, D-Ore.

First enacted in 1964, the Land and Water Conservation Fund uses gas and oil receipts from drilling on the outer continental shelf to conserve national parks, forests, wildlife refuges, wilderness and Civil War battlefields, and to develop and support state and local parks.

By law, the fund may receive \$900 million each year, but it rarely receives its full allotment, and \$17 billion has been allocated for other purposes over the last 50 years.

Legislation authorizing the fund to distribute money to various projects will expire at the end of September.

President Obama's 2016 budget calls for funding the program at its maximum of \$900 million, and includes money for several projects in Oregon.

The biggest project for Oregon is the Pathways to the Pacific, which would receive \$14 million to stabilize fish runs and improve public access with acquisitions in the Oregon National Historic Trail, the John Day Wild and Scenic River, the Columbia River Gorge National Scenic Area, John Day Fossil Beds National Monument, and Willapa and Ridgefield national wildlife refuges.

The Cascade-Siskiyou National Monument would receive a \$2.6 million grant to acquire almost 2,300 acres, with an additional \$3 million slated for land acquisition on Wassen Creek in Siuslaw National Forest.

Kelley Beamer, the executive director of the Coalition of Oregon Land Trusts said in a prepared statement that LWCF funding has helped preserve many places that Oregonians hold dear.

"It has helped protect working farms, forests and ranches, including most recently the Gilchrist Forest outside Bend. Without the Land and Water Conservation Fund, Oregon would not be what it is today," Beamer said.

Late last year, Congress approved \$306 million for LWCF projects, meaning many projects that had been vetted and approved did not receive funding.

"Without full funding, some critical projects in Oregon like protecting the east moraine of Wallowa Lake, will never get completed and instead be lost to development or other threats," Beamer said.

In November, a bipartisan group of 40 senators, including Merkley and fellow Oregon Democrat Ron Wyden, wrote to Senate leadership, urging them to help pass a reauthorization of the Land and Water Conservation Act during the lame duck session. That didn't happen, and the program will expire at the end of September if Congress doesn't act.

Merkley said Wednesday that he will use his seat on the Appropriations Committee to keep fighting for full funding for LWCF.

"Oregon's outdoor spaces are a crucial part of our heritage and what makes our region unique. It's important that we preserve these special places for our children and grandchildren, and the Land and Water Conservation Fund is a critical tool for creating and preserving public lands," he said.

Politico Morning Energy Tip Sheet; MURKOWSKI CHARGES 'PAY TO PLAY' ON ALASKAN PROJECT: Sen. Lisa Murkowski said an \$8 million mitigation payment ConocoPhillips will be required to make in order to move forward with its Greater Mooses Tooth project in Alaska's National Petroleum Reserve verges on "pay to play." Companies "that have deep pockets and pretty considerable investments" could be needed by the Interior Department into paying large sums for mitigation efforts in order to get a permit, Murkowski said yesterday. "Mitigation is not new," Interior Secretary Sally Jewell said, arguing that requiring off-site mitigation efforts allows for landscape-level planning — like with solar farms in the California desert that were required to pay for desert tortoise habitat preservation elsewhere. Jewell and her No. 2, Mike Connor, explained that Interior hashed out the figure with ConocoPhillips after reviewing the project's impacts on local subsistence resources. But Murkowski wasn't convinced. "The fear is that, rather than creating efficiencies, that what we may have developing here is additional unpredictability, lack of clarity in terms of where you're going with a project that deters investment that really can derail a project," she said.

WASHINGTON _ The Obama administration will decide soon whether to give in to [Shell's request for extra time to hunt for oil in Arctic waters](#). Interior Secretary Sally Jewell said Wednesday.

Without action, Shell's oil and gas leases in the Beaufort Sea will begin expiring in 2017, followed by its drilling rights in the neighboring Chukchi Sea two years later.

The same fate awaits Chukchi Sea leases sold in 2008 to Statoil and ConocoPhillips, which have made similar appeals for more time, citing regulatory uncertainty, legal challenges and other obstacles.

Read more: [Oil companies want more time for Arctic drilling](#)

"We are actively working with Shell and other leaseholders up there on their request for suspensions," Jewell said during a Senate Appropriations subcommittee hearing. "We will be resolving that relatively soon."

The companies' bids for "suspensions of operation" would effectively stop the clock ticking on their 10-year leases. The Bureau of Safety and Environmental Enforcement is actively considering the requests from Shell and Statoil that were filed in July 2014; it previously rejected ConocoPhillips' November 2013 bid for at least three more years. ConocoPhillips appealed the decision to an Interior Department appeals board, and settlement talks are now under way.

Neither Statoil nor ConocoPhillips has active plans to drill in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells that stopped short of penetrating potential oil-bearing zones.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. (Shell) needs to retain its existing lease portfolio to warrant this enormous investment."

Limited window

Murkowski cited the limited 75-day window for drilling in the Arctic, when waters are free of ice — as opposed to the year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have delayed work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those legal delays.

Most recently, the Bureau of Ocean Energy Management [completed a new environmental analysis](#) of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. But the final decision on whether to affirm, modify or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

'Helping Shell'

Jewell stressed that Interior Department regulators were focused on completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," Jewell said.

Jewell also made a nod to the mishaps that marred Shell's 2012 Arctic operation, including the grounding of its non-propelled Kulluk drilling rig during an ill-fated tow across the Gulf of Alaska and the company's difficulty certifying and readying a unique emergency oil spill containment system so it could safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsibly,

Shell used the drillship Noble Discoverer for its 2012 drilling in the Chukchi Sea north of Alaska. (Jennifer A. Dlouhy / The Houston Chronicle)

and we want to be responsive to the companies.”

‘Special treatment’

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time amounts to unwarranted “special treatment” said Oceana Deputy Vice President Susan Murray in a [Feb. 27 letter to the safety bureau](#).

“Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging,” Murray said. “Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases.”

Extensions also could mean taxpayers — who own the oil at issue — are “no longer getting fair value,” said Michael LeVine, Pacific senior counsel for the group. “The government sold the rights to public resources under a certain set of circumstances and terms and shouldn’t then rule to change those terms.”

In general, leases expire at the end of their terms unless operators are “conducting operations” on the lease, such as drilling, reworking wells or producing oil and gas.

“Suspension of operation” requests are relatively common in the Gulf of Mexico, where they often are filed right before leases are set to expire, unlike the Arctic requests now pending before the safety bureau.

Safety bureau spokesman Nicholas Pardi said the agency “evaluates suspension requests on a case-by-case basis.”

Federal regulations give the agency relatively little authority to grant the suspensions, including to allow compliance with judicial decrees, when activities pose a threat of harm or damage, when they are needed to install safety equipment or conduct environmental analysis and to allow for “inordinate delays” in obtaining permits.

The oil companies’ requests may lay the groundwork for bigger changes, including potential action by Congress and the Obama administration to rewrite the terms of oil and gas leases in isolated Arctic waters.

PUBLIC LANDS:

Bishop proposes axing BLM conservation office

Phil Taylor and Manuel Quiñones, E&E reporters
Published: Thursday, March 5, 2015

RE RESIZE TEXT *EM* EMAIL *PR* PRINT

Congress should eliminate a Bureau of Land Management office that oversees national monuments, wilderness and conservation sites, according to House Natural Resources Chairman Rob Bishop.

The Utah Republican's recommendation is part of a committee policy briefing on President Obama's fiscal 2016 budget, which it submitted to the House Budget Committee, as required by House rules.

The [briefing](#), which was obtained by *E&ENews PM*, claims that BLM's National Landscape Conservation System is redundant and antithetical to BLM's multiple-use mission.

"As well as eroding the mission of BLM, NLCS has also become a duplicative office that imposes another layer of bureaucratic, centralized, and unnecessary management," the briefing says. "The committee recommends eliminating the office of the NLCS and restoring management of 'units' to BLM state offices."

It also recommends that the federal government convey lands "without strings" to state, local and tribal governments. It urges the Budget Committee to "eliminate barriers" for those conveyances in its budget resolution and build in \$50 million to offset potential losses to the U.S. Treasury.

The briefing makes a set of other Interior Department budget recommendations, including to redirect land acquisition funds to address park maintenance; eliminate funds that would be paid to environmental groups that successfully sue the government; find a solution to the "quagmire" of Forest Service wildfire funding; and address proposed changes to mine-land cleanup funding.

Bishop's proposal to ax BLM's conservation office drew fire from outdoor outfitters and conservationists.

NLCS includes more than 30 million acres of the nation's "most prized public lands," including more than 40 national monuments and national conservation areas and hundreds of wilderness areas, said the Conservation Lands Foundation, a national group based in Durango, Colo.

NLCS -- also known as BLM's National Conservation Lands -- is currently funded at \$31.8 million, but BLM's 2016 budget requests upping that to \$48.5 million.

"Gutting the budget for the National Conservation Lands would put local economies at risk, threaten nationally significant natural and cultural resources, and deny Americans access to their public lands," the Conservation Lands Foundation says.

The group warns that dozens of BLM-managed conservation areas -- such as the Red Rock Canyon National Conservation Area outside Las Vegas -- would have to close under Bishop's proposal.

But Bishop's camp said BLM will continue to manage the NLCS lands regardless of whether there is a separate conservation office. NLCS "does nothing to improve the recreation, conservation or wilderness value of these BLM lands," Bishop spokeswoman Julia Bell said. NLCS takes up a significant chunk of funding that would otherwise go to land management, she said.

"Our committee recommends eliminating the NLCS office -- not funding for public lands managed under NLCS -- so the claim that national monuments would have to close their doors is false," she said. "We recommend they be managed by state BLM offices like all other BLM lands rather than an unnecessary, bureaucratic, centralized NLCS office in Washington, D.C."

It's not the first time Bishop has proposed closing the office.

He made a similar proposal in 2011, calling NLCS a "double administration" that adds unnecessary costs and bureaucracy, but he eventually withdrew his proposal.

NLCS was sustained thanks in part to Democrats controlling the Senate. But Bishop is now working with like-minded GOP colleagues leading the upper chamber.

NLCS was established administratively by President Clinton and became law in March 2009 when President Obama signed a massive omnibus public lands package. Republicans have been highly critical of the system. A report from the Interior inspector general in 2009 found that NLCS managers had a too-cozy relationship with environmental groups ([Greenwire](#), Oct. 5, 2009).

Bishop critiques Obama mining policy

When it comes to mining and coal, Bishop is taking issue with the Office of Surface Mining Reclamation and Enforcement's continued spending on developing the forthcoming stream protection rule. It has been a target of Natural Resources panel Republicans for years.

They are now also questioning OSMRE's decision to develop regulations for strip mine blasting. The agency's actions follow a petition from the group WildEarth Guardians.

"OSM continues to be extorted by environmental special interest groups attempting to advance their war on coal," Bishop's briefing said.

The Obama administration proposed spending \$1 billion from an OSMRE-administered fund for reclaiming abandoned coal mines to help stimulate the economy in Appalachian communities hit by the mining downturn (*E&E Daily*, Feb. 3).

But Bishop warned the panel wouldn't support spending the money "to plant orchards on reclaimed coal mines." Instead, he called for funding priority cleanups.

The administration made only rough proposals for spending the \$1 billion. Lawmakers would have to work out the details by amending the Surface Mining Control and Reclamation Act. And states are already expressing concerns that changes will jeopardize a 2006 compromise.

Separately, Bishop expressed concerns about an Office of Natural Resources Revenue proposal on mineral valuations and complained that maintenance fee increases on non-coal mining claims had resulted in a loss of almost \$50,000 in claims and an \$8.3 million revenue drop between fiscal 2013 and 2014.

NATIONAL MONUMENTS:

Interior chief, House Republican clash over Colo. designation

Phil Taylor, E&E reporter

Published: Thursday, March 5, 2015

[RESIZE TEXT](#) [EM EMAIL](#) [PR PRINT](#)

Rep. Doug Lamborn (R-Colo.) was wrong to suggest that the Obama administration failed to seek public input before declaring a 21,000-acre national monument protecting Browns Canyon, according to a Colorado conservationist, a mayor and Interior Secretary Sally Jewell.

At a budget hearing today before the House Natural Resources Committee, Lamborn claimed President Obama last month designated the canyon in central Colorado without "any solicitation of public input."

The claim was patently false, Jewell said.

"There was public input, congressman, and we are committed to continuing to get public input," Jewell said. "I value public input."

In fact, Forest Service Chief Tom Tidwell and Bureau of Land Management Deputy Director Steve Ellis came to Salida, Colo., in early December to take the public's pulse on a monument. They heard strong support from residents, business owners and conservation groups (*Greenwire*, Dec. 8, 2014).

The meeting was hosted by then-Sen. Mark Udall (D-Colo.), whose bill -- on which the monument proclamation was based -- received a hearing last July before the Energy and Natural Resources Committee.

Keith Baker, who leads Friends of Browns Canyon, and Joel Benson, mayor of Buena Vista, Colo., which is north of the monument, also challenged Lamborn's claim.

"I am disappointed that Representative Lamborn continues to be out of touch with his district and insists on making false claims about the long history of community input into the Browns Canyon National Monument," Baker said in a statement. "Chaffee County residents have had dozens of public comment opportunities on Browns Canyon, including most recently in a public hearing in December, and have expressed overwhelming support time and time again."

Baker said the public has had ample opportunities to weigh in on the monument, as evidenced by a [timeline](#) of events compiled by *The Chaffee County Times*.

In addition, there was a 2012 meeting at Mount Princeton Hot Springs Resort that included elected and appointed officials, motorized recreationists, rafters, ranchers and hikers, and an April 2013 public hearing hosted by Udall and attended by Lamborn at Noah's Ark Whitewater Rafting in Nathrop, he said.

Buena Vista and Salida, which bookend the monument to the north and south, unanimously approved resolutions supporting the designation prior to its being declared.

Lamborn, whose 5th District encompasses the Browns Canyon area, warned last month that presidentially designated monuments don't receive adequate funding and are generally viewed as "orphans" in the nation's vast public lands system.

"This is because they are created outside the normal congressional process and without local consensus, robbing the people of fair and open input," Lamborn said then. "Browns Canyon does not deserve this kind of second-class status."

LUMMIS ESA MAKES A SUCKER OUT OF US Wyoming Rep. Cynthia Lummis took aim at a potentially anachronistic requirement of the Endangered Species Act this morning

that has delayed a delisting. The law requires the Fish and Wildlife Service to place a notice in local newspapers that it is delisting a species, including the Modoc sucker, a small fish native to California and Oregon. But FWS failed to run the classified ad until recently, delaying the delisting of the fish. "This is just the latest example about how the ESA perpetuates form over substance, in this case doing nothing to benefit the Modoc sucker and only delaying relief for the people impacted by the listing," Lummis said at a Natural Resources Committee hearing. "It is as if the Endangered Species Act is stuck in 1973 while the rest of us have moved on." Greenwire wrote earlier this week about the classified ad mix-up: <http://bit.ly/1GnXc6F>

WASHINGTON, March 5, 2015 - Interior Secretary Sally Jewell is standing by a proposal to de-list the gray wolf as an endangered species, but she stops short of endorsing legislation to overturn court orders that are keeping the animal under protection.

Jewell is coming under pressure from House Democrats to heed the courts and at least protect the wolf under a downgraded, threatened status.

The Fish and Wildlife Service proposed in 2013 to de-list the [gray wolf](#) in most of the continental United States but courts have blocked the action in Wyoming and the western Great Lakes region.

Legislation was recently introduced to finalize the de-listing. Under questioning by one of the bill's cosponsors, Rep. Dan Benishek, R-Mich., at a House Natural Resources Committee hearing Thursday, Jewell didn't endorse the measure ([HR 884](#)), but she said the administration would follow its directive if enacted.

"Clearly we will uphold whatever laws are passed by Congress," she told the committee. "My preference is certainly not to legislate the Endangered Species Act (ESA). But if Congress passed legislation certainly we will uphold the law."

But a letter to Jewell signed by 79 House members, mostly Democrats, and delivered to Jewell ahead of the hearing proposes to list the gray wolf as threatened, rather than endangered.

"Scientific experts have shown, and courts have confirmed, that the best available science does not justify the removal of all ESA protections for gray wolves at this time," the letter says, calling the de-listing bill an "extreme proposal."

Downgrading the wolf to threatened status would "allow states significantly increased certainty and flexibility" in managing the animals, the letter said. Jewell said the department would see "what we're permitted to do under the law."

At one point in the hearing, Rep. Don Young, D-Alaska, lashed out at the signers of the letter, which included the committee's top Democrat, Raul Grijalva of Arizona. The 79 lawmakers, Young said, "haven't got a damn wolf in their whole district."

Young, directing his remarks to the letter signers, went on, "I'd like to introduce them (gray wolves) in your district. If I introduced them in your district you wouldn't have a homeless problem anymore."

The Fish and Wildlife Services believes "their science was sound, but we want to work with the best available science, so I'm sure they will be taking a look at the recommendation," she said.

Rep. Collin Peterson, D-Minn., the ranking member of the House Agriculture Committee and another cosponsor of the delisting legislation, wrote to Jewell in January, asking her to appeal the court decision that reinstated protections for the wolf in his home state. Peterson said reversing the court ruling would return management of the animal back to the state and help farmers and rancher facing a difficult decision between protecting their livestock and complying with another difficult federal court decision.

On a separate issue, Jewell assured the committee the department would heed a policy rider in the fiscal 2015 omnibus spending bill that would prevent the Fish and Wildlife Service from finalizing rules to protect sage grouse habitat under the Endangered Species Act.

But she said the department would still meet a court-ordered deadline in September for determining whether the bird merits protection under the law. "The rider prevents us from writing any regulations. However, it doesn't prevent the service from coming to a determination on a listing decision."

For example, the policy rider would prevent the service from specifically implementing rules worked out with farmers and ranchers for protecting habitat of the Gunnison sage grouse, she said.

GOP chairman slams 'underimpressive' Interior budget plan

By Timothy Cama - 03/05/15 12:32 PM EST

1

5

Rep. Rob Bishop (R-Utah) on Thursday blasted the Interior Department's budget request, arguing it avoided confronting major problems while creating expensive, unnecessary programs.

Bishop, chairman of the House Natural Resources Committee, said the plan was "really underimpressive"

1

and that he "found no idea in there that I consider creative or different or unusual."

He criticized what he saw as "just the same old, same old, raise taxes, raise fees, write more regulations and then throw money at a problem" in the \$13.2 billion budget request, including money to acquire new federal land while current property needs maintenance.

Bishop made the comments at a hearing with Interior Secretary Sally Jewell. It was the sole hearing in the House on a day in which both chambers of Congress canceled their sessions because of a winter storm.

Rep. Raúl Grijalva (D-Ariz.) welcomed the budget, pointing out that Interior, which leases land to energy production, proposes to bring more money in than it will spend.

"If Congress simply enacted your budget, we could reduce the deficit by more than half a million dollars," he said. "Unfortunately, that's not likely to happen."

Jewell said the proposal is "is a forward-looking budget that provides targeted investments to grow our domestic energy portfolio, creating jobs here at home, building communities resilience and revitalizing our national parks as they approach their 100th anniversary."

While Republicans were highly critical of Interior policies such as those for endangered species and offshore oil and gas drilling, lawmakers said they were thankful to Jewell and Deputy Interior Secretary Mike Connor for venturing through the poor weather to come to the hearing.

"Secretary Jewell, thank you for being here today despite the fact that the federal government is shut down," said Del. Madeleine Bordallo (D-Guam). "I'm very impressed that our secretary is here."

Bishop asked that members of the panel submit any opening remarks for the hearing's record by 5 p.m. "or whenever this building crushes under a blanket of snow ... whichever occurs faster."

Rep. Don Young (R-Alaska) said he was thankful for the "Alaskan weather," and jokingly proposed moving Alaska's Iditarod Trail Sled Dog Race to the streets surrounding the Capitol, because a lack of snow has made planning for the race difficult.

Lawmakers asked to fund Land and Water Conservation Fund

Future of conservation program uncertain

By [Andrew Clevenger / The Bulletin / @andclev](#)

Published Mar 5, 2015 at 12:01AM

WASHINGTON — Interior Secretary Sally Jewell pressed Senate appropriators Wednesday to approve the Obama administration's 2016 budget request of \$13.2 billion for the agency, including \$900 million for Land and Water Conservation Fund projects.

"This is, dollar for dollar, one of the most effective government programs we have," Jewell told members of the Appropriations Subcommittee on Interior, Environment, and Related Agencies, including Sen. Jeff Merkley, D-Ore.

First enacted in 1964, the Land and Water Conservation Fund uses gas and oil receipts from drilling on the outer continental shelf to conserve national parks, forests, wildlife refuges, wilderness and Civil War battlefields, and to develop and support state and local parks.

By law, the fund may receive \$900 million each year, but it rarely receives its full allotment, and \$17 billion has been allocated for other purposes over the last 50 years.

Legislation authorizing the fund to distribute money to various projects will expire at the end of September.

President Obama's 2016 budget calls for funding the program at its maximum of \$900 million, and includes money for several projects in Oregon.

The biggest project for Oregon is the Pathways to the Pacific, which would receive \$14 million to stabilize fish runs and improve public access with acquisitions in the Oregon National Historic Trail, the John Day Wild and Scenic River, the Columbia River Gorge National Scenic Area, John Day Fossil Beds National Monument, and Willapa and Ridgefield national wildlife refuges.

The Cascade-Siskiyou National Monument would receive a \$2.6 million grant to acquire almost 2,300 acres, with an additional \$3 million slated for land acquisition on Wassen Creek in Suislaw National Forest.

Kelley Beamer, the executive director of the Coalition of Oregon Land Trusts said in a prepared statement that LWCF funding has helped preserve many places that Oregonians hold dear.

"It has helped protect working farms, forests and ranches, including most recently the Gilchrist Forest outside Bend. Without the Land and Water Conservation Fund, Oregon would not be what it is today," Beamer said.

Late last year, Congress approved \$306 million for LWCF projects, meaning many projects that had been vetted and approved did not receive funding.

"Without full funding, some critical projects in Oregon like protecting the east moraine of Wallowa Lake, will never get completed and instead be lost to development or other threats," Beamer said.

In November, a bipartisan group of 40 senators, including Merkley and fellow Oregon Democrat Ron Wyden, wrote to Senate leadership, urging them to help pass a reauthorization of the Land and Water Conservation Act during the lame duck session. That didn't happen, and the program will expire at the end of September if Congress doesn't act.

Merkley said Wednesday that he will use his seat on the Appropriations Committee to keep fighting for full funding for LWCF.

"Oregon's outdoor spaces are a crucial part of our heritage and what makes our region unique. It's important that we preserve these special places for our children and grandchildren, and the Land and Water Conservation Fund is a critical tool for creating and preserving public lands," he said.

Politico Morning Energy Tip Sheet; MURKOWSKI CHARGES 'PAY TO PLAY' ON ALASKAN PROJECT: Sen. Lisa Murkowski said an \$8 million mitigation payment ConocoPhillips will be required to make in order to move forward with its Greater Mooses Tooth project in Alaska's National Petroleum Reserve verges on "pay to play." Companies "that have deep pockets and pretty considerable investments" could be needed by the Interior Department into paying large sums for mitigation efforts in order to get a permit, Murkowski said yesterday. "Mitigation is not new," Interior Secretary Sally Jewell said, arguing that requiring off-site mitigation efforts allows for landscape-level planning — like with solar farms in the California desert that were required to pay for desert tortoise habitat preservation elsewhere. Jewell and her No. 2, Mike Connor, explained that Interior hashed out the figure with ConocoPhillips after reviewing the project's impacts on local subsistence resources. But Murkowski wasn't convinced. "The fear is that, rather than creating efficiencies, that what we may have developing here is additional unpredictability, lack of clarity in terms of where you're going with a project that deters investment that really can derail a project," she said.

WASHINGTON _ The Obama administration will decide soon whether to give in to [Shell's request for extra time to hunt for oil in Arctic waters](#). Interior Secretary Sally Jewell said Wednesday.

Without action, Shell's oil and gas leases in the Beaufort Sea will begin expiring in 2017, followed by its drilling rights in the neighboring Chukchi Sea two years later.

The same fate awaits Chukchi Sea leases sold in 2008 to Statoil and ConocoPhillips, which have made similar appeals for more time, citing regulatory uncertainty, legal challenges and other obstacles.

Read more: [Oil companies want more time for Arctic drilling](#)

"We are actively working with Shell and other leaseholders up there on their request for suspensions," Jewell said during a Senate Appropriations subcommittee hearing. "We will be resolving that relatively soon."

The companies' bids for "suspensions of operation" would effectively stop the clock ticking on their 10-year leases. The Bureau of Safety and Environmental Enforcement is actively considering the requests from Shell and Statoil that were filed in July 2014; it previously rejected ConocoPhillips' November 2013 bid for at least three more years. ConocoPhillips appealed the decision to an Interior Department appeals board, and settlement talks are now under way.

Neither Statoil nor ConocoPhillips has active plans to drill in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells that stopped short of penetrating potential oil-bearing zones.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. (Shell) needs to retain its existing lease portfolio to warrant this enormous investment."

Limited window

Murkowski cited the limited 75-day window for drilling in the Arctic, when waters are free of ice — as opposed to the year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have delayed work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those legal delays.

Most recently, the Bureau of Ocean Energy Management [completed a new environmental analysis](#) of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. But the final decision on whether to affirm, modify or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

'Helping Shell'

Jewell stressed that Interior Department regulators were focused on completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," Jewell said.

Jewell also made a nod to the mishaps that marred Shell's 2012 Arctic operation, including the grounding of its non-propelled Kulluk drilling rig during an ill-fated tow across the Gulf of Alaska and the company's difficulty certifying and readying a unique emergency oil spill containment system so it could safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsively, and we want to be responsive to the companies."

'Special treatment'

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time amounts to unwarranted "special treatment" said Oceana Deputy Vice President Susan Murray in [a Feb. 27 letter to the safety bureau](#).

"Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging," Murray said. "Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases."

Share

Shell used the drillship Noble Discoverer for its 2012 drilling in the Chukchi Sea north of Alaska. (Jennifer A. Dlouhy / The Houston Chronicle)

Extensions also could mean taxpayers — who own the oil at issue — are “no longer getting fair value,” said Michael LeVine, Pacific senior counsel for the group. “The government sold the rights to public resources under a certain set of circumstances and terms and shouldn’t then rule to change those terms.”

In general, leases expire at the end of their terms unless operators are “conducting operations” on the lease, such as drilling, reworking wells or producing oil and gas.

“Suspension of operation” requests are relatively common in the Gulf of Mexico, where they often are filed right before leases are set to expire, unlike the Arctic requests now pending before the safety bureau.

Safety bureau spokesman Nicholas Pardi said the agency “evaluates suspension requests on a case-by-case basis.”

Federal regulations give the agency relatively little authority to grant the suspensions, including to allow compliance with judicial decrees, when activities pose a threat of harm or damage, when they are needed to install safety equipment or conduct environmental analysis and to allow for “inordinate delays” in obtaining permits.

The oil companies’ requests may lay the groundwork for bigger changes, including potential action by Congress and the Obama administration to rewrite the terms of oil and gas leases in isolated Arctic waters.

Congress should eliminate a Bureau of Land Management office that oversees national monuments, wilderness and conservation sites, according to House Natural Resources Chairman Rob Bishop.

The Utah Republican's recommendation is part of a committee policy briefing on President Obama's fiscal 2016 budget, which it submitted to the House Budget Committee, as required by House rules.

The [briefing](#), which was obtained by *E&ENews PM*, claims that BLM's National Landscape Conservation System is redundant and

Rep. Don Young (R-Alaska) famous for his salty tongue and brusque demeanor, suggested Thursday that if he let loose wolves in some congressional districts, they "wouldn't have a homeless problem anymore." (House Committee on Natural Resources)

Alaska Republican Rep. Don Young, famous for his salty tongue and brusque demeanor, suggested Thursday that if he let loose wolves in some congressional districts, they "wouldn't have a homeless problem anymore."

The strange comment was made during a halting five-minute exchange with Interior Secretary Sally Jewell during a House Natural Resources Committee hearing on her agency's budget. He accused her and her department of making decisions without consulting the states they'd effect.

Young, who supports taking gray wolves off the endangered species list, mocked a letter 79 members of Congress sent urging Jewell to protect the gray wolf population. (In Alaska, for what it's worth, you can hunt wolves.)

"How many of you have got wolves in your district?" he asked. "None. None. Not one."

"They haven't got a damn wolf in their whole district," Young continued. "I'd like to introduce them in your district. If I introduced them in your district, you wouldn't have a homeless problem anymore."

We sought clarification to ensure we heard correctly. A spokesman for Young said the "analogy was purposely hyperbolic to stress the point that these predators pose serious threats to wildlife management and their listing has damaging impacts to local communities."

This post has been updated.

NLCS office -- not funding for public lands managed under NLCS -- so the claim that national monuments would have to close their doors is false," she said. "We recommend they be managed by state BLM offices like all other BLM lands rather than an unnecessary, bureaucratic, centralized NLCS office in Washington, D.C."

It's not the first time Bishop has proposed closing the office.

He made a similar proposal in 2011, calling NLCS a "double administration" that adds unnecessary costs and bureaucracy, but he eventually withdrew his proposal.

NLCS was sustained thanks in part to Democrats controlling the Senate. But Bishop is now working with like-minded GOP colleagues leading the upper chamber.

NLCS was established administratively by President Clinton and became law in March 2009 when President Obama signed a massive omnibus public lands package. Republicans have been highly critical of the system. A report from the Interior inspector general in 2009 found that NLCS managers had a too-cozy relationship with environmental groups ([Greenwire](#), Oct. 5, 2009).

antithetical to BLM's multiple-use mission.

"As well as eroding the mission of BLM, NLCS has also become a duplicative office that imposes another layer of bureaucratic, centralized, and unnecessary management," the briefing says. "The committee recommends eliminating the office of the NLCS and restoring management of 'units' to BLM state offices."

It also recommends that the federal government convey lands "without strings" to state, local and tribal governments. It urges the Budget Committee to "eliminate barriers" for those conveyances in its budget resolution and build in \$50 million to offset potential losses to the U.S. Treasury.

The briefing makes a set of other Interior Department budget recommendations, including to redirect land acquisition funds to address park maintenance; eliminate funds that would be paid to environmental groups that successfully sue the government; find a solution to the "quagmire" of Forest Service wildfire funding; and address proposed changes to mine-land cleanup funding.

Bishop's proposal to ax BLM's conservation office drew fire from outdoor outfitters and conservationists.

NLCS includes more than 30 million acres of the nation's "most prized public lands," including more than 40 national monuments and national conservation areas and hundreds of wilderness areas, said the Conservation Lands Foundation, a national group based in Durango, Colo.

NLCS -- also known as BLM's National Conservation Lands -- is currently funded at \$31.8 million, but BLM's 2016 budget requests upping that to \$48.5 million.

"Cutting the budget for the National Conservation Lands would put local economies at risk, threaten nationally significant natural and cultural resources, and deny Americans access to their public lands," the Conservation Lands Foundation says.

The group warns that dozens of BLM-managed conservation areas -- such as the Red Rock Canyon National Conservation Area outside Las Vegas -- would have to close under Bishop's proposal.

But Bishop's camp said BLM will continue to manage the NLCS lands regardless of whether there is a separate conservation office. NLCS "does nothing to improve the recreation, conservation or wilderness value of these BLM lands," Bishop spokeswoman Julia Bell said. NLCS takes up a significant chunk of funding that would otherwise go to land management, she said.

"Our committee recommends eliminating the

Bishop critiques Obama mining policy

When it comes to mining and coal, Bishop is taking issue with the Office of Surface Mining Reclamation and Enforcement's continued spending on developing the forthcoming stream protection rule. It has been a target of Natural Resources panel Republicans for years.

They are now also questioning OSMRE's decision to develop regulations for strip mine blasting. The agency's actions follow a petition from the group WildEarth Guardians.

"OSM continues to be extorted by environmental special interest groups attempting to advance their war on coal," Bishop's briefing said.

The Obama administration proposed spending \$1 billion from an OSMRE-administered fund for reclaiming abandoned coal mines to help stimulate the economy in Appalachian communities hit by the mining downturn ([E&E Daily](#), Feb. 3).

But Bishop warned the panel wouldn't support spending the money "to plant orchards on reclaimed coal mines." Instead, he called for funding priority cleanups.

The administration made only rough proposals for spending the \$1 billion. Lawmakers would have to work out the details by amending the Surface Mining Control and Reclamation Act. And states are already expressing concerns that changes will jeopardize a 2006 compromise.

Separately, Bishop expressed concerns about an Office of Natural Resources Revenue proposal on mineral valuations and complained that maintenance fee increases on non-coal mining claims had resulted in a loss of almost \$50,000 in claims and an \$8.3 million revenue drop between fiscal 2013 and 2014.

NATIONAL MONUMENTS:

Interior chief, House Republican clash over Colo. designation

Phil Taylor, E&E reporter

Published: Thursday, March 5, 2015

[RESIZE TEXT](#) [EMAIL](#) [PRINT](#)

Rep. Doug Lamborn (R-Colo.) was wrong to suggest that the Obama administration failed to seek public input before declaring a 21,000-acre national monument protecting Browns Canyon, according to a Colorado conservationist, a mayor and Interior Secretary Sally Jewell.

At a budget hearing today before the House Natural Resources Committee, Lamborn claimed President Obama last month designated the canyon in central Colorado without "any solicitation of public input."

The claim was patently false, Jewell said.

"There was public input, congressman, and we are committed to continuing to get public input," Jewell said. "I value public input."

In fact, Forest Service Chief Tom Tidwell and Bureau of Land Management Deputy Director Steve Ellis came to Salida, Colo., in early December to take the public's pulse on a monument. They heard strong support from residents, business owners and conservation groups ([Greenwire](#), Dec. 8, 2014).

The meeting was hosted by then-Sen. Mark Udall (D-Colo.), whose bill -- on which the monument proclamation was based -- received a hearing last July before the Energy and Natural Resources Committee.

Keith Baker, who leads Friends of Browns Canyon, and Joel Benson, mayor of Buena Vista, Colo., which is north of the monument, also challenged Lamborn's claim.

"I am disappointed that Representative Lamborn continues to be out of touch with his district and insists on making false claims about the long history of community input into the Browns Canyon National Monument," Baker said in a statement. "Chaffee County residents have had dozens of public comment opportunities on Browns Canyon, including most recently in a public hearing in December, and have expressed overwhelming support time and time again."

Baker said the public has had ample opportunities to weigh in on the monument, as evidenced by a [timeline](#) of events compiled by *The Chaffee County Times*.

In addition, there was a 2012 meeting at Mount Princeton Hot Springs Resort that included elected and appointed officials, motorized recreationists, rafters, ranchers and hikers, and an April 2013 public hearing hosted by Udall and attended by Lamborn at Noah's Ark Whitewater Rafting in Nathrop, he said.

Buena Vista and Salida, which bookend the monument to the north and south, unanimously approved resolutions supporting the designation prior to its being declared.

Lamborn, whose 5th District encompasses the Browns Canyon area, warned last month that presidentially designated monuments don't receive adequate funding and are generally viewed as "orphans" in the nation's vast public lands system.

"This is because they are created outside the normal congressional process and without local consensus, robbing the people of fair and open input," Lamborn said then. "Browns Canyon does not deserve this kind of second-class status."

WASHINGTON, March 5, 2015 - Interior Secretary Sally Jewell is standing by a proposal to de-list the gray wolf as an endangered species, but she stops short of endorsing legislation to overturn court orders that are keeping the animal under protection.

Jewell is coming under pressure from House Democrats to heed the courts and at least protect the wolf under a downgraded, threatened status.

The Fish and Wildlife Service proposed in 2013 to de-list the [gray wolf](#) in most of the continental United States but courts have blocked the action in Wyoming and the western Great Lakes region.

Legislation was recently introduced to finalize the de-listing. Under questioning by one of the bill's cosponsors, Rep. Dan Benishek, R-Mich., at a House Natural Resources Committee hearing Thursday, Jewell didn't endorse the measure ([HR 884](#)), but she said the administration would follow its directive if enacted.

"Clearly we will uphold whatever laws are passed by Congress," she told the committee. "My preference is certainly not to legislate the Endangered Species Act (ESA). But if Congress passed legislation certainly we will uphold the law."

But a letter to Jewell signed by 79 House members, mostly Democrats, and delivered to Jewell ahead of the hearing proposes to list the gray wolf as threatened, rather than endangered.

"Scientific experts have shown, and courts have confirmed, that the best available science does not justify the removal of all ESA protections for gray wolves at this time," the letter says, calling the de-listing bill an "extreme proposal."

Downgrading the wolf to threatened status would "allow states significantly increased certainty and flexibility" in managing the animals, the letter said. Jewell said the department would see "what we're permitted to do under the law."

At one point in the hearing, Rep. Don Young, D-Alaska, lashed out at the signers of the letter, which included the committee's top Democrat, Raul Grijalva of Arizona. The 79 lawmakers, Young said, "haven't got a damn wolf in their whole district."

Young, directing his remarks to the letter signers, went on, "I'd like to introduce them (gray wolves) in your district. If I introduced them in your district you wouldn't have a homeless problem anymore."

The Fish and Wildlife Services believes "their science was sound, but we want to work with the best available science, so I'm sure they will be taking a look at the recommendation," she said.

Rep. Collin Peterson, D-Minn., the ranking member of the House Agriculture Committee and another cosponsor of the delisting legislation, wrote to Jewel in January, asking her to appeal the court decision that reinstated protections for the wolf in his home state. Peterson said reversing the court ruling would return management of the animal back to the state and help farmers and rancher facing a difficult decision between protecting their livestock and complying with another difficult federal court decision.

On a separate issue, Jewell assured the committee the department would heed a policy rider in the fiscal 2015 omnibus spending bill that would prevent the Fish and Wildlife Service from finalizing rules to protect sage grouse habitat under the Endangered Species Act.

But she said the department would still meet a court-ordered deadline in September for determining whether the bird merits protection under the law. "The rider prevents us from writing any regulations .. however, it doesn't prevent the service from coming to a determination on a listing decision."

For example, the policy rider would prevent the service would specifically implementing rules worked out with farmers and ranchers for protecting habitat of the Gunnison sage grouse, she said.

GOP chairman slams 'underimpressive' Interior budget plan

By Timothy Cama - 03/05/15 12:32 PM EST

1

5

Rep. Rob Bishop (R-Utah) on Thursday blasted the Interior Department's budget request, arguing it avoided confronting major problems while creating expensive, unnecessary programs.

Bishop, chairman of the House Natural Resources Committee, said the plan was "really

1

underimpressive" and that he "found no idea in there that I consider creative or different or unusual."

He criticized what he saw as "just the same old, same old, raise taxes, raise fees, write more regulations and then throw money at a problem" in the \$13.2 billion budget request, including money to acquire new federal land while current property needs maintenance.

Bishop made the comments at a hearing with Interior Secretary Sally Jewell. It was the sole hearing in the House on a day in which both chambers of Congress canceled their sessions because of a winter storm.

Rep. Raúl Grijalva (D-Ariz.) welcomed the budget, pointing out that Interior, which leases land to energy production, proposes to bring more money in than it will spend.

"If Congress simply enacted your budget, we could reduce the deficit by more than half a million dollars," he said. "Unfortunately, that's not likely to happen."

Jewell said the proposal is "is a forward-looking budget that provides targeted investments to grow our domestic energy portfolio, creating jobs here at home, building communities resilience and revitalizing our national parks as they approach their 100th anniversary."

While Republicans were highly critical of Interior policies such as those for endangered species and offshore oil and gas drilling, lawmakers said they were thankful to Jewell and Deputy Interior Secretary Mike Connor for venturing through the poor weather to come to the hearing.

"Secretary Jewell, thank you for being here today despite the fact that the federal government is shut down," said Del. Madeleine Bordallo (D-Guam). "I'm very impressed that our secretary is here."

Bishop asked that members of the panel submit any opening remarks for the hearing's record by 5 p.m. "or whenever this building crushes under a blanket of snow ... whichever occurs faster."

Rep. Don Young (R-Alaska) said he was thankful for the "Alaskan weather," and jokingly proposed moving Alaska's Iditarod Trail Sled Dog Race to the streets surrounding the Capitol, because a lack of snow has made planning for the race difficult.

Lawmakers asked to fund Land and Water Conservation Fund

Future of conservation program uncertain

By **Andrew Clevenger / The Bulletin / @andclev**

Published Mar 5, 2015 at 12:01AM

WASHINGTON — Interior Secretary Sally Jewell pressed Senate appropriators Wednesday to approve the Obama administration's 2016 budget request of \$13.2 billion for the agency, including \$900 million for Land and Water Conservation Fund projects.

"This is, dollar for dollar, one of the most effective government programs we have," Jewell told members of the Appropriations Subcommittee on Interior, Environment, and Related Agencies, including Sen. Jeff Merkley, D-Ore.

First enacted in 1964, the Land and Water Conservation Fund uses gas and oil receipts from drilling on the outer continental shelf to conserve national parks, forests, wildlife refuges, wilderness and Civil War battlefields, and to develop and support state and local parks.

By law, the fund may receive \$900 million each year, but it rarely receives its full allotment, and \$17 billion has been allocated for other purposes over the last 50 years.

Legislation authorizing the fund to distribute money to various projects will expire at the end of September.

President Obama's 2016 budget calls for funding the program at its maximum of \$900 million, and includes money for several projects in Oregon.

The biggest project for Oregon is the Pathways to the Pacific, which would receive \$14 million to stabilize fish runs and improve public access with acquisitions in the Oregon National Historic Trail, the John Day Wild and Scenic River, the Columbia River Gorge National Scenic Area, John Day Fossil Beds National Monument, and Willapa and Ridgefield national wildlife refuges.

The Cascade-Siskiyou National Monument would receive a \$2.6 million grant to acquire almost 2,300 acres, with an additional \$3 million slated for land acquisition on Wassen Creek in Suislaw National Forest.

Kelley Beamer, the executive director of the Coalition of Oregon Land Trusts said in a prepared statement that LWCF funding has helped preserve many places that Oregonians hold dear.

"It has helped protect working farms, forests and ranches, including most recently the Gilchrist Forest outside Bend. Without the Land and Water Conservation Fund, Oregon would not be what it is today," Beamer said.

Late last year, Congress approved \$306 million for LWCF projects, meaning many projects that had been vetted and approved did not receive funding.

"Without full funding, some critical projects in Oregon like protecting the east moraine of Wallowa Lake, will never get completed and instead be lost to development or other threats," Beamer said.

In November, a bipartisan group of 40 senators, including Merkley and fellow Oregon Democrat Ron Wyden, wrote to Senate leadership, urging them to help pass a reauthorization of the Land and Water Conservation Act during the lame duck session. That didn't happen, and the program will expire at the end of September if Congress doesn't act.

Merkley said Wednesday that he will use his seat on the Appropriations Committee to keep fighting for full funding for LWCF.

"Oregon's outdoor spaces are a crucial part of our heritage and what makes our region unique. It's important that we preserve these special places for our children and grandchildren, and the Land and Water Conservation Fund is a critical tool for creating and preserving public lands," he said.

Politico Morning Energy Tip Sheet; MURKOWSKI CHARGES 'PAY TO PLAY' ON ALASKAN PROJECT: Sen. Lisa Murkowski said an \$8 million mitigation payment ConocoPhillips will be required to make in order to move forward with its Greater Mooses Tooth project in Alaska's National Petroleum Reserve verges on "pay to play." Companies "that have deep pockets and pretty considerable investments" could be needed by the Interior Department into paying large sums for mitigation efforts in order to get a permit, Murkowski said yesterday. "Mitigation is not new," Interior Secretary Sally Jewell said, arguing that requiring off-site mitigation efforts allows for landscape-level planning — like with solar farms in the California desert that were required to pay for desert tortoise habitat preservation elsewhere. Jewell and her No. 2, Mike Connor, explained that Interior hashed out the figure with ConocoPhillips after reviewing the project's impacts on local subsistence resources. But Murkowski wasn't convinced. "The fear is that, rather than creating efficiencies, that what we may have developing here is additional unpredictability, lack of clarity in terms of where you're going with a project that deters investment that really can derail a project," she said.

WASHINGTON _ The Obama administration will decide soon whether to give in to [Shell's request for extra time to hunt for oil in Arctic waters](#), Interior Secretary Sally Jewell said Wednesday.

Without action, Shell's oil and gas leases in the Beaufort Sea will begin expiring in 2017, followed by its drilling rights in the neighboring Chukchi Sea two years later.

The same fate awaits Chukchi Sea leases sold in 2008 to Statoil and ConocoPhillips, which have made similar appeals for more time, citing regulatory uncertainty, legal challenges and other obstacles.

Read more: [Oil companies want more time for Arctic drilling](#)

"We are actively working with Shell and other leaseholders up there on their request for suspensions," Jewell said during a Senate Appropriations subcommittee hearing. "We will be resolving that relatively soon."

The companies' bids for "suspensions of operation" would effectively stop the clock ticking on their 10-year leases. The Bureau of Safety and Environmental Enforcement is actively considering the requests from Shell and Statoil that were filed in July 2014; it previously rejected ConocoPhillips' November 2013 bid for at least three more years. ConocoPhillips appealed the decision to an Interior Department appeals board, and settlement talks are now under way.

Neither Statoil nor ConocoPhillips has active plans to drill in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells that stopped short of penetrating potential oil-bearing zones.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. (Shell) needs to retain its existing lease portfolio to warrant this enormous investment."

Limited window

Murkowski cited the limited 75-day window for drilling in the Arctic, when waters are free of ice — as opposed to the year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have delayed work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those legal delays.

Most recently, the Bureau of Ocean Energy Management [completed a new environmental analysis](#) of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. But the final decision on whether to affirm, modify or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

'Helping Shell'

Jewell stressed that Interior Department regulators were focused on completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," Jewell said.

Jewell also made a nod to the mishaps that marred Shell's 2012 Arctic operation, including the grounding of its non-propelled Kulluk drilling rig during an ill-fated tow across the Gulf of Alaska and the company's difficulty certifying and readying a unique emergency oil spill containment system so it could safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

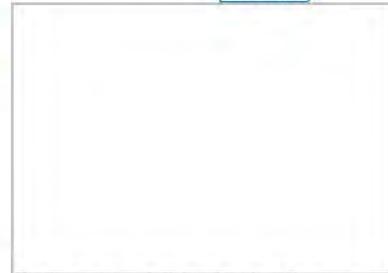

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsively, and we want to be responsive to the companies."

'Special treatment'

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time amounts to unwarranted "special treatment" said Oceana Deputy Vice President Susan Murray in [a Feb. 27 letter to the safety bureau](#).

"Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging," Murray said. "Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases."

Shell used the drillship Noble Discoverer for its 2012 drilling in the Chukchi Sea north of Alaska. (Jennifer A. Dlouhy / The Houston Chronicle)

Extensions also could mean taxpayers — who own the oil at issue — are “no longer getting fair value,” said Michael LeVine, Pacific senior counsel for the group. “The government sold the rights to public resources under a certain set of circumstances and terms and shouldn’t then rule to change those terms.”

In general, leases expire at the end of their terms unless operators are “conducting operations” on the lease, such as drilling, reworking wells or producing oil and gas.

“Suspension of operation” requests are relatively common in the Gulf of Mexico, where they often are filed right before leases are set to expire, unlike the Arctic requests now pending before the safety bureau.

Safety bureau spokesman Nicholas Pardi said the agency “evaluates suspension requests on a case-by-case basis.”

Federal regulations give the agency relatively little authority to grant the suspensions, including to allow compliance with judicial decrees, when activities pose a threat of harm or damage, when they are needed to install safety equipment or conduct environmental analysis and to allow for “inordinate delays” in obtaining permits.

The oil companies’ requests may lay the groundwork for bigger changes, including potential action by Congress and the Obama administration to rewrite the terms of oil and gas leases in isolated Arctic waters.

Alaska Rep. Don Young has settled on a novel solution to the problem of homelessness: wolves.

Young, a long-serving Republican with a history of odd commentary, discussed the idea during an exchange on Thursday with Interior Secretary Sally Jewell, who was testifying before the House Natural Resources Committee about her department’s budget.

Young has been pushing for the Interior Department to remove the gray wolf from the endangered species list, and during the hearing, he ridiculed a letter sent by 79 lawmakers to Jewell urging her to protect the gray wolf population.

"How many of you have got wolves in your district?" Young asked the other lawmakers on the panel. "None. Not one."

"They haven't got a damn wolf in their whole district," he added. "I'd like to introduce them in your district. If I introduced them in your district, you wouldn't have a homeless problem anymore."

Alaska Rep. Don Young apologizes for comments about suicide

Rep. Don Young (R-Alaska) suggested Thursday that the solution to homelessness is wolves.

Young made the comment during a House Natural Resources Committee hearing during an exchange with Interior Secretary Sally Jewell. He was arguing that gray wolves should be taken off the endangered species list, criticizing the National Park Service and his congressional colleagues who seek to protect the animals.

"How many of you have got wolves in your district? None. None. Not one," Young said, calling the gray wolf "a predator."

"We've got 79 congressmen sending you a letter, they haven't got a damn wolf in their whole district," Young added. "I'd like to introduce them in your district. If I introduced them in your district, you wouldn't have a homeless problem anymore."

Watch Young make the comments above.

A spokesman for Young told [The Washington Post](#) that the statement was meant to emphasize that "these predators pose serious threats to wildlife management and their listing has damaging impacts to local communities."

Young is no stranger to controversial statements. In October 2014, he used profane language and made highly insensitive remarks about [gay marriage and suicide](#) at a high school. One of the school's students had taken his own life days before Young made the remarks.

Young also reportedly "[freaked out](#)" on his 2014 Democratic challenger ahead of a debate that same month.

PUBLIC LANDS:
Bishop proposes axing BLM conservation office

Phil Taylor and Manuel Quiñones, E&E reporters
Published: Thursday, March 5, 2015

[RF](#) [RESIZE TEXT](#) [FN](#) [EMAIL](#) [PR](#)

Congress should eliminate a Bureau of Land Management office that oversees national monuments, wilderness and conservation sites, according to House Natural Resources Chairman Rob Bishop.

The Utah Republican's recommendation is part of a committee policy briefing on President Obama's fiscal 2016 budget, which it submitted to the House Budget Committee, as required by House rules.

The **briefing**, which was obtained by *E&ENews PM*, claims that BLM's National Landscape Conservation System is redundant and antithetical to BLM's multiple-use mission.

"As well as eroding the mission of BLM, NLCS has also become a duplicative office that imposes another layer of bureaucratic, centralized, and unnecessary management," the briefing says. "The committee recommends eliminating the office of the NLCS and restoring management of 'units' to BLM state offices."

It also recommends that the federal government convey lands "without strings" to state, local and tribal governments. It urges the Budget Committee to "eliminate barriers" for those conveyances in its budget resolution and build in \$50 million to offset potential losses to the U.S. Treasury.

The briefing makes a set of other Interior Department budget recommendations, including to redirect land acquisition funds to address park maintenance; eliminate funds that would be paid to environmental groups that successfully sue the government; find a solution to the "quagmire" of Forest Service wildfire funding; and address proposed changes to mine-land cleanup funding.

Bishop's proposal to ax BLM's conservation office drew fire from outdoor outfitters and conservationists.

NLCS includes more than 30 million acres of the nation's "most prized public lands," including more than 40 national monuments and national conservation areas and hundreds of wilderness areas, said the Conservation Lands Foundation, a national group based in Durango, Colo.

NLCS -- also known as BLM's National Conservation Lands -- is currently funded at \$31.8 million, but BLM's 2016 budget requests upping that to \$48.5 million.

"Gutting the budget for the National Conservation Lands would put local economies at risk, threaten nationally significant natural and cultural resources, and deny Americans access to their public lands," the Conservation Lands Foundation says.

The group warns that dozens of BLM-managed conservation areas -- such as the Red Rock Canyon National Conservation Area outside Las Vegas -- would have to close under Bishop's proposal.

But Bishop's camp said BLM will continue to manage the NLCS lands regardless of whether there is a separate conservation office. NLCS "does nothing to improve the recreation, conservation or wilderness value of these BLM lands," Bishop spokeswoman Julia Bell said. NLCS takes up a significant chunk of funding that would otherwise go to land management,

Rep. Don Young (R-Alaska) famous for his salty tongue and brusque demeanor, suggested Thursday that if he let loose wolves in some congressional districts, they "wouldn't have a homeless problem anymore." (House Committee on Natural Resources)

Alaska Republican Rep. Don Young, famous for his salty tongue and brusque demeanor, suggested Thursday that if he let loose wolves in some congressional districts, they "wouldn't have a homeless problem anymore."

The strange comment was made during a halting five-minute exchange with Interior Secretary Sally Jewell during a House Natural Resources Committee hearing on her agency's budget. He accused her and her department of making decisions without consulting the states they'd effect.

Young, who supports taking gray wolves off the endangered species list, mocked a letter 79 members of Congress sent urging Jewell to protect the gray wolf population. (In Alaska, for what it's worth, you can hunt wolves.)

"How many of you have got wolves in your district?" he asked. "None. None. Not one."

"They haven't got a damn wolf in their whole district," Young continued. "I'd like to introduce them in your district. If I introduced them in your district, you wouldn't have a homeless problem anymore."

We sought clarification to ensure we heard correctly. A spokesman for Young said the "analogy was purposely hyperbolic to stress the point that these predators pose serious threats to wildlife management and their listing has damaging impacts to local communities."

This post has been updated.

she said.

"Our committee recommends eliminating the NLCS office -- not funding for public lands managed under NLCS -- so the claim that national monuments would have to close their doors is false," she said. "We recommend they be managed by state BLM offices like all other BLM lands rather than an unnecessary, bureaucratic, centralized NLCS office in Washington, D.C."

It's not the first time Bishop has proposed closing the office.

He made a similar proposal in 2011, calling NLCS a "double administration" that adds unnecessary costs and bureaucracy, but he eventually withdrew his proposal.

NLCS was sustained thanks in part to Democrats controlling the Senate. But Bishop is now working with like-minded GOP colleagues leading the upper chamber.

NLCS was established administratively by President Clinton and became law in March 2009 when President Obama signed a massive omnibus public lands package. Republicans have been highly critical of the system. A report from the Interior inspector general in 2009 found that NLCS managers had a too-cozy relationship with environmental groups ([Greenwire](#), Oct. 5, 2009).

Bishop critiques Obama mining policy

When it comes to mining and coal, Bishop is taking issue with the Office of Surface Mining Reclamation and Enforcement's continued spending on developing the forthcoming stream protection rule. It has been a target of Natural Resources panel Republicans for years.

They are now also questioning OSMRE's decision to develop regulations for strip mine blasting. The agency's actions follow a petition from the group WildEarth Guardians.

"OSM continues to be extorted by environmental special interest groups attempting to advance their war on coal," Bishop's briefing said.

The Obama administration proposed spending \$1 billion from an OSMRE-administered fund for reclaiming abandoned coal mines to help stimulate the economy in Appalachian communities hit by the mining downturn ([E&E Daily](#), Feb. 3).

But Bishop warned the panel wouldn't support spending the money "to plant orchards on reclaimed coal mines." Instead, he called for funding priority cleanups.

The administration made only rough proposals for spending the \$1 billion. Lawmakers would have to work out the details by amending the Surface Mining Control and Reclamation Act. And states are already expressing concerns that changes will jeopardize a 2006 compromise.

Separately, Bishop expressed concerns about an Office of Natural Resources Revenue proposal on mineral valuations and complained that maintenance fee increases on non-coal mining claims had resulted in a loss of almost \$50,000 in claims and an \$8.3 million revenue drop between fiscal 2013 and 2014.

NATIONAL MONUMENTS:

Interior chief, House Republican clash over Colo. designation

Phil Taylor, E&E reporter

Published: Thursday, March 5, 2015

[RESIZE TEXT](#) [EM](#) [EMAIL](#) [PR](#) [PRINT](#)

Rep. Doug Lamborn (R-Colo.) was wrong to suggest that the Obama administration failed to seek public input before declaring a 21,000-acre national monument protecting Browns Canyon, according to a Colorado conservationist, a mayor and Interior Secretary Sally Jewell.

At a budget hearing today before the House Natural Resources Committee, Lamborn claimed President Obama last month designated the canyon in central Colorado without "any solicitation of public input."

The claim was patently false, Jewell said.

"There was public input, congressman, and we are committed to continuing to get public input," Jewell said. "I value public input."

In fact, Forest Service Chief Tom Tidwell and Bureau of Land Management Deputy Director Steve Ellis came to Salida, Colo., in early December to take the public's pulse on a monument. They heard strong support from residents, business owners and conservation groups ([Greenwire](#), Dec. 8, 2014).

The meeting was hosted by then-Sen. Mark Udall (D-Colo.), whose bill -- on which the monument proclamation was based -- received a hearing last July before the Energy and Natural Resources Committee.

Keith Baker, who leads Friends of Browns Canyon, and Joel Benson, mayor of Buena Vista, Colo., which is north of the monument, also challenged Lamborn's claim.

"I am disappointed that Representative Lamborn continues to be out of touch with his district and insists on making false claims about the long history of community input into the Browns Canyon National Monument," Baker said in a statement. "Chaffee County residents have had dozens of public comment opportunities on Browns Canyon, including most recently in a public hearing in December, and have expressed overwhelming support time and time again."

Baker said the public has had ample opportunities to weigh in on the monument, as evidenced by a [timeline](#) of events compiled by *The Chaffee County Times*.

In addition, there was a 2012 meeting at Mount Princeton Hot Springs Resort that included elected and appointed officials, motorized recreationists, rafters, ranchers and hikers, and an April 2013 public hearing hosted by Udall and attended by Lamborn at Noah's Ark Whitewater Rafting in Nathrop, he said.

Buena Vista and Salida, which bookend the monument to the north and south, unanimously approved resolutions supporting the designation prior to its being declared.

Lamborn, whose 5th District encompasses the Browns Canyon area, warned last month that presidentially designated monuments don't receive adequate funding and are generally viewed as "orphans" in the nation's vast public lands system.

"This is because they are created outside the normal congressional process and without local consensus, robbing the people of fair and open input," Lamborn said then. "Browns Canyon does not deserve this kind of second-class status."

DEM PRESSES JEWELL TO DROP ATLANTIC LEASE SALE Rep. Niki Tsongas urged Interior Secretary Sally Jewell today to drop consideration of an oil and gas lease sale for the Atlantic outer continental shelf in the next five-year plan. "While the plan did not include areas off the coast of my home state, Massachusetts, we can be sure that a spill off the coast of Virginia or North Carolina would have serious consequences for our New England beaches and our commercial fishermen," Tsongas said at a hearing today. "I strongly urge you to seriously consider removing the proposed Atlantic lease sale from the final five-year plan." <http://politico.pro/1aN7iRT>

— **No guarantee** Jewell told lawmakers today that she can't promise that the Atlantic will see an oil and gas lease sale as part of the next five-year plan. Asked by Rep. Doug Lamborn about offshore leases, Jewell noted that the administration's recently released draft proposed plan covering 2017-2022 included parts of the Atlantic outer continental shelf. <http://politico.pro/1EicEQJ>

LUMMIS ESA MAKES A SUCKER OUT OF US Wyoming Rep. Cynthia Lummis took aim at a potentially anachronistic requirement of the Endangered Species Act this morning that has delayed a delisting. The law requires the Fish and Wildlife Service to place a notice in local newspapers that it is delisting a species, including the Modoc sucker, a small fish native to California and Oregon. But FWS failed to run the classified ad until recently, delaying the delisting of the fish. "This is just the latest example about how the ESA perpetuates form over substance, in this case doing nothing to benefit the Modoc sucker and only delaying relief for the people impacted by the listing," Lummis said at a Natural Resources Committee hearing. "It is as if the Endangered Species Act is stuck in 1973 while the rest of us have moved on." Greenwire wrote earlier this week about the classified ad mix-up: <http://bit.ly/1GnXc6F>

WASHINGTON, March 5, 2015 - Interior Secretary Sally Jewell is standing by a proposal to de-list the gray wolf as an endangered species, but she stops short of endorsing legislation to overturn court orders that are keeping the animal under protection.

Jewell is coming under pressure from House Democrats to heed the courts and at least protect the wolf under a downgraded, threatened status.

The Fish and Wildlife Service proposed in 2013 to de-list the [gray wolf](#) in most of the continental United States but courts have blocked the action in Wyoming and the western Great Lakes region.

Legislation was recently introduced to finalize the de-listing. Under questioning by one of the bill's cosponsors, Rep. Dan Benishek, R-Mich., at a House Natural Resources Committee hearing Thursday, Jewell didn't endorse the measure ([HR 884](#)), but she said the administration would follow its directive if enacted.

"Clearly we will uphold whatever laws are passed by Congress," she told the committee. "My preference is certainly not to legislate the Endangered Species Act (ESA). But if Congress passed legislation certainly we will uphold the law."

But a letter to Jewell signed by 79 House members, mostly Democrats, and delivered to Jewell ahead of the hearing proposes to list the gray wolf as threatened, rather than endangered.

"Scientific experts have shown, and courts have confirmed, that the best available science does not justify the removal of all ESA protections for gray wolves at this time," the letter says, calling the de-listing bill an "extreme proposal."

Downgrading the wolf to threatened status would "allow states significantly increased certainty and flexibility" in managing the animals, the letter said. Jewell said the department would see "what we're permitted to do under the law."

At one point in the hearing, Rep. Don Young, D-Alaska, lashed out at the signers of the letter, which included the committee's top Democrat, Raul Grijalva of Arizona. The 79 lawmakers, Young said, "haven't got a damn wolf in their whole district."

Young, directing his remarks to the letter signers, went on, "I'd like to introduce them (gray wolves) in your district. If I introduced them in your district you wouldn't have a homeless problem anymore."

The Fish and Wildlife Services believes "their science was sound, but we want to work with the best available science, so I'm sure they will be taking a look at the recommendation," she said.

Rep. Collin Peterson, D-Minn., the ranking member of the House Agriculture Committee and another cosponsor of the delisting legislation, wrote to Jewell in January, asking her to appeal the court decision that reinstated protections for the wolf in his home state. Peterson said reversing the court ruling would return management of the animal back to the state and help farmers and rancher facing a difficult decision between protecting their livestock and complying with another difficult federal court decision.

On a separate issue, Jewell assured the committee the department would heed a policy rider in the fiscal 2015 omnibus spending bill that would prevent the Fish and Wildlife Service from finalizing rules to protect sage grouse habitat under the Endangered Species Act.

But she said the department would still meet a court-ordered deadline in September for determining whether the bird merits protection under the law. "The rider prevents us from writing any regulations .. however, it doesn't prevent the service from coming to a determination on a listing decision."

For example, the policy rider would prevent the service would specifically implementing rules worked out with farmers and ranchers for protecting habitat of the Gunnison sage grouse, she said.

GOP chairman slams 'underimpressive' Interior budget plan

By Timothy Cama - 03/05/15 12:32 PM EST

1

5

Rep. Rob Bishop (R-Utah) on Thursday blasted the Interior Department's budget request, arguing it avoided confronting major problems while creating expensive, unnecessary programs.

Bishop, chairman of the House Natural Resources Committee, said the plan was "really underimpressive" and that he "found no idea in there that I consider creative or different or unusual."

He criticized what he saw as "just the same old, same old, raise taxes, raise fees, write more regulations and then throw money at a problem" in the \$13.2 billion budget request, including money to acquire new federal land while current property needs maintenance.

Bishop made the comments at a hearing with Interior Secretary Sally Jewell. It was the sole hearing in the House on a day in which both chambers of Congress canceled their sessions because of a winter storm.

Rep. Raúl Grijalva (D-Ariz) welcomed the budget, pointing out that Interior, which leases land to energy production, proposes to bring more money in than it will spend.

"If Congress simply enacted your budget, we could reduce the deficit by more than half a million dollars," he said. "Unfortunately, that's not likely to happen."

Jewell said the proposal is "is a forward-looking budget that provides targeted investments to grow our domestic energy portfolio, creating jobs here at home, building communities resilience and revitalizing our national parks as they approach their 100th anniversary."

While Republicans were highly critical of Interior policies such as those for endangered species and offshore oil and gas drilling, lawmakers said they were thankful to Jewell and Deputy Interior Secretary Mike Connor for venturing through the poor weather to come to the hearing.

"Secretary Jewell, thank you for being here today despite the fact that the federal government is shut down," said Del. Madeleine Bordallo (D-Guam). "I'm very impressed that our secretary is here."

Bishop asked that members of the panel submit any opening remarks for the hearing's record by 5 p.m. "or whenever this building crushes under a blanket of snow ... whichever occurs faster."

Rep. Don Young (R-Alaska) said he was thankful for the "Alaskan weather," and jokingly proposed moving Alaska's Iditarod Trail Sled Dog Race to the streets surrounding the Capitol, because a lack of snow has made planning for the race difficult.

Interior Secretary Sally Jewell told lawmakers today that she can't promise that the Atlantic will see an oil and gas lease sale as part of the next five-year plan.

Asked by Rep. Doug Lamborn about offshore leases, Jewell noted that the administration's recently released draft proposed plan covering 2017-2022 included parts of the Atlantic outer continental shelf.

"So you guarantee that the Atlantic will be part of final version?" Lamborn asked during a hearing of the House Natural Resources Committee, which went on despite the snow falling on D.C.

"No, I can't guarantee anything," Jewell responded. "We are in the draft proposed plan phase and we are taking public comment as is required of us by law."

Interior is taking public comment on the draft through March 30.

Lawmakers asked to fund Land and Water Conservation Fund

Future of conservation program uncertain

By [Andrew Clevenger](#) / [The Bulletin](#) / [@andclev](#)

Published Mar 5, 2015 at 12:01AM

WASHINGTON — Interior Secretary Sally Jewell pressed Senate appropriators Wednesday to approve the Obama administration's 2016 budget request of \$13.2 billion for the agency, including \$900 million for Land and Water Conservation Fund projects.

"This is, dollar for dollar, one of the most effective government programs we have," Jewell told members of the Appropriations Subcommittee on Interior, Environment, and Related Agencies, including Sen. Jeff Merkley, D-Ore.

First enacted in 1964, the Land and Water Conservation Fund uses gas and oil receipts from drilling on the outer continental shelf to conserve national parks, forests, wildlife refuges, wilderness and Civil War battlefields, and to develop and support state and local parks.

By law, the fund may receive \$900 million each year, but it rarely receives its full allotment, and \$17 billion has been allocated for other purposes over the last 50 years.

Legislation authorizing the fund to distribute money to various projects will expire at the end of September.

President Obama's 2016 budget calls for funding the program at its maximum of \$900 million, and includes money for several projects in Oregon.

The biggest project for Oregon is the Pathways to the Pacific, which would receive \$14 million to stabilize fish runs and improve public access with acquisitions in the Oregon National Historic Trail, the John Day Wild and Scenic River, the Columbia River Gorge National Scenic Area, John Day Fossil Beds National Monument, and Willapa and Ridgefield national wildlife refuges.

The Cascade-Siskiyou National Monument would receive a \$2.6 million grant to acquire almost 2,300 acres, with an additional \$3 million slated for land acquisition on Wassen Creek in Suislaw National Forest.

Kelley Beamer, the executive director of the Coalition of Oregon Land Trusts said in a prepared statement that LWCF funding has helped preserve many places that Oregonians hold dear.

"It has helped protect working farms, forests and ranches, including most recently the Gilchrist Forest outside Bend. Without the Land and Water Conservation Fund, Oregon would not be what it is today," Beamer said.

Late last year, Congress approved \$306 million for LWCF projects, meaning many projects that had been vetted and approved did not receive funding.

"Without full funding, some critical projects in Oregon like protecting the east moraine of Wallowa Lake, will never get completed and instead be lost to development or other threats," Beamer said.

In November, a bipartisan group of 40 senators, including Merkley and fellow Oregon Democrat Ron Wyden, wrote to Senate leadership, urging them to help pass a reauthorization of the Land and Water Conservation Act during the lame duck session. That didn't happen, and the program will expire at the end of September if Congress doesn't act.

Merkley said Wednesday that he will use his seat on the Appropriations Committee to keep fighting for full funding for LWCF.

"Oregon's outdoor spaces are a crucial part of our heritage and what makes our region unique. It's important that we preserve these special places for our children and grandchildren, and the Land and Water Conservation Fund is a critical tool for creating and preserving public lands," he said.

Rep. Rob Bishop, R-Utah, former speaker of the house, calls the Utah House of Representatives to order for the start of the 2015 legislative session at the Utah State Capitol Monday, Jan. 26, 2015, in Salt Lake City. Utah lawmakers kick off their legislative session on Monday as they prepared to devote the first week to preliminary budget meetings. Among the items they'll need to consider is a plan to relocate a state prison in Draper, whether or not they'll expand eligibility for Medicaid and a package of reforms to Utah's criminal justice system. (AP Photo/Rick Bowmer)

IMAGE 1 OF 4

House Natural Resources Committee Chairman Rob Bishop says he wants to be part of a "paradigm shift."

WASHINGTON - For decades, county commissioners and conservationists in Utah have been battling over land in the eastern part of the state, squaring off over potential protections, oil drilling and potash mining in the territory.

It's almost been a "100 years war," observed Mike Matz, director of public lands for Pew Charitable Trusts.

Enter Republican Rep. Rob Bishop, a seven-term lawmaker who nearly three years ago set out to bring the warring interests together and hammer out a massive land management deal. Through hundreds of meetings with thousands of stakeholders, Bishop has steered the group closer to a plan for divvying up millions of acres - with some land poised to garner new wilderness protections and other tracts set to be earmarked for energy development.

Bishop has urged county commissioners to view potential wilderness designations as a kind of "currency" with value that can be traded for "some specific, tangible benefit," such as special zones for oil drilling and rights of way for roads. Depending on who you ask, it's either a cynical approach to conservation or a pragmatic strategy for dealing with a complex, controversial issue.

It's one indication of how Bishop may approach his new congressional role as chairman of the House Natural Resources Committee.

Bishop sees the chairmanship as a chance to shake up the way the United States manages federal and Indian lands, from protecting treasured areas to permitting drilling in others.

"We haven't had a change in the way people look at the stewardship of the federal government and land in 50 or 60 years," Bishop said. "We are timed for a paradigm

ENERGY

Energy company IDs shippers for planned natural gas pipeline

Report says incentives make going green easier for commercial

shift, and I want to be part of that."

For Bishop, who convenes his first panel hearing Thursday with Interior Secretary Sally Jewell, that means giving local, state and tribal governments greater control of federal lands.

It also means undoing legal constraints, including litigation under the Endangered Species Act and the National Environmental Policy Act.

Bishop, a schoolteacher-turned-congressman, is clearly frustrated with the approaches of the past, whether policymakers have been bound by statute, legal precedent or simply decades of "this is how we do things" thinking.

"We have tended to try and find solutions based on the precedents that have been established in the past - especially with interest groups - and that just doesn't work anymore," Bishop said.

"We have to think differently," he added. "The solutions are out there. If you push the envelope, you really can accomplish things that people - especially the trained professionals who have been around here a long time - don't think you can."

In a 40-minute interview, Bishop referenced "solutions" and the importance of thinking "creatively" nearly two dozen times, as he repeatedly stressed his goal is meaningful action.

Bishop tangles with the White House on energy development. He says the oil and gas revolution has unfolded mostly on private and state land - not the territory under the Interior Department's control.

"There has to be an overall approach to increasing production on federal property," Bishop said. "This administration is either slow walking or just stopping that, and that harms the entire country."

More opportunities for oil and gas drilling on federal lands and waters - and speedier permitting - are essential for the United States to expand its role as a global energy leader, break OPEC's domination and spur domestic jobs, Bishop insisted.

It's personal for Bishop, who sees the potential for Utah to direct revenue from oil, gas and other natural resource development to schools.

"People have to realize that the way we handle federal lands has an impact not only on education for us but our energy future and for our leadership in global affairs," he said.

Bishop will continue taking a skeptical view of national monument designations, such as President Barack Obama's decision last month to use his Antiquities Act powers to protect Browns Canyon in Salida, Colo., as well as sites in Chicago and Honolulu. Bishop blasted the move, saying the White House was showing "utter and complete disdain for the public process, Congress and the communities most impacted."

Conservationists in Colorado who have been working for decades to protect Browns Canyon said the characterization was off base. Bill Dvorak, a public lands organizer for the National Wildlife Federation, recalled hundreds of people coming to a recent public meeting to support safeguarding the site.

The campaign for protections nearly made it through Congress after winning support from then-Rep. Wayne Allard, R-Colo., in the 1990s.

But as more time passed, "anglers, hunters, rafters, hikers, mountain bikers and veterans alike who were really eager to protect Browns Canyon had run out of patience," said former Sen. Mark Udall, D-Colo.

"There was a slow walk that had arguably been occurring recently and over the last 20 plus years."

Oil patch won't flash victory sign for a while

Student teams rev their engines for Shell event in Motor City

Senate fails to override Obama's veto of Keystone XL legislation

Decision 'soon' on Shell plans for Arctic

Udall said he couldn't square Bishop's criticism _ which sounded like "boilerplate talking points to please special interests" _ with the lawmaker's desire for locally driven approaches to conservation, such as his public lands initiative in Utah.

Bishop has been driving a local approach to the issue with his lands initiative in Utah, in the process telling both conservationists and development-minded counties they can't get everything they want.

"Rather than just taking a stand or stating a position," Matz said, "I think he really is interested in rolling up his sleeves and figuring out what it's going to take to put something together where not everyone gets everything they want, but where everybody gets something they want."

Alaska Rep. Don Young has settled on a novel solution to the problem of homelessness: wolves.

Young, a long-serving Republican with a history of odd commentary, discussed the idea during an exchange on Thursday with Interior Secretary Sally Jewell, who was testifying before the House Natural Resources Committee about her department's budget.

Young has been pushing for the Interior Department to remove the gray wolf from the endangered species list, and during the hearing, he ridiculed a letter sent by 79 lawmakers to Jewell urging her to protect the gray wolf population.

"How many of you have got wolves in your district?" Young asked the other lawmakers on the panel. "None. Not one."

"They haven't got a damn wolf in their whole district," he added. "I'd like to introduce them in your district. If I introduced them in your district, you wouldn't have a homeless problem anymore."

Play VIDEO

Alaska Rep. Don Young apologizes for comments about suicide

It's not clear whether Young was suggesting the wolves could eat the homeless population -- perhaps he expects the homeless to make tents out of wolf hides.

Young has a reputation for off-color remarks. Last October, he **told students at an Alaska high school that some suicides are due to a lack of support from friends and family**. The remark, which came just days after a student at the school took his own life, was met with outrage from students and faculty, and Young was quickly forced to apologize.

And in 2013, **Young reminisced in a radio interview about the "50 to 60 wetbacks" who picked tomatoes at his father's ranch** when he was younger. He apologized for that remark as well, saying the term was "commonly used" during his childhood and that he "meant no disrespect."

Rep. Don Young (R-Alaska) suggested Thursday that the solution to homelessness is wolves.

Young made the comment during a House Natural Resources Committee hearing during an exchange with Interior Secretary Sally Jewell. He was arguing that gray wolves should be taken off the endangered species list, criticizing the National Park Service and his congressional colleagues who seek to protect the animals.

"How many of you have got wolves in your district? None. None. Not one," Young said, calling the gray wolf "a predator."

"We've got 79 congressmen sending you a letter, they haven't got a damn wolf in their whole district," Young added. "I'd like to introduce them in your district. If I introduced them in your district, you wouldn't have a homeless problem anymore."

Watch Young make the comments above.

A spokesman for Young told [The Washington Post](#) that the statement was meant to emphasize that "these predators pose serious threats to wildlife management and their listing has damaging impacts to local communities."

Young is no stranger to controversial statements. In October 2014, he used profane language and made highly insensitive remarks about [gay marriage and suicide](#) at a high school. One of the school's students had taken his own life days before Young made the remarks.

Young also reportedly "[freaked out](#)" on his 2014 Democratic challenger ahead of a debate that same month.

Congress should eliminate a Bureau of Land Management office that oversees national monuments, wilderness and conservation sites, according to House Natural Resources Chairman Rob Bishop.

The Utah Republican's recommendation is part of a committee policy briefing on President Obama's fiscal 2016 budget, which it submitted to the House Budget Committee, as required by House rules.

The [briefing](#), which was obtained by *E&ENews PM*, claims that BLM's National Landscape Conservation System is redundant

Rep. Don Young (R-Alaska) famous for his salty tongue and brusque demeanor, suggested Thursday that if he let loose wolves in some congressional districts, they "wouldn't have a homeless problem anymore." (House Committee on Natural Resources)

Alaska Republican Rep. Don Young, famous for his salty tongue and brusque demeanor, suggested Thursday that if he let loose wolves in some congressional districts, they "wouldn't have a homeless problem anymore."

The strange comment was made during a halting five-minute exchange with Interior Secretary Sally Jewell during a House Natural Resources Committee hearing on her agency's budget. He accused her and her department of making decisions without consulting the states they'd effect.

Young, who supports taking gray wolves off the endangered species list, mocked a letter 79 members of Congress sent urging Jewell to protect the gray wolf population. (In Alaska, for what it's worth, you can hunt wolves.)

"How many of you have got wolves in your district?" he asked. "None. None. Not one."

"They haven't got a damn wolf in their whole district," Young continued. "I'd like to introduce them in your district. If I introduced them in your district, you wouldn't have a homeless problem anymore."

We sought clarification to ensure we heard correctly. A spokesman for Young said the "analogy was purposely hyperbolic to stress the point that these predators pose serious threats to wildlife management and their listing has damaging impacts to local communities."

This post has been updated.

she said.

"Our committee recommends eliminating the NLCS office -- not funding for public lands managed under NLCS -- so the claim that national monuments would have to close their doors is false," she said. "We recommend they be managed by state BLM offices like all other BLM lands rather than an unnecessary, bureaucratic, centralized NLCS office in Washington, D.C."

It's not the first time Bishop has proposed closing the office.

He made a similar proposal in 2011, calling NLCS a "double administration" that adds unnecessary costs and bureaucracy, but he eventually withdrew his proposal.

NLCS was sustained thanks in part to Democrats controlling the Senate. But Bishop is now working with like-minded GOP colleagues leading the upper chamber.

NLCS was established administratively by President Clinton and became law in March 2009 when President Obama signed a massive omnibus public lands package. Republicans have been highly critical of the system. A report from the Interior inspector general in 2009

and antithetical to BLM's multiple-use mission.

"As well as eroding the mission of BLM, NLCS has also become a duplicative office that imposes another layer of bureaucratic, centralized, and unnecessary management," the briefing says. "The committee recommends eliminating the office of the NLCS and restoring management of 'units' to BLM state offices."

It also recommends that the federal government convey lands "without strings" to state, local and tribal governments. It urges the Budget Committee to "eliminate barriers" for those conveyances in its budget resolution and build in \$50 million to offset potential losses to the U.S. Treasury.

The briefing makes a set of other Interior Department budget recommendations, including to redirect land acquisition funds to address park maintenance; eliminate funds that would be paid to environmental groups that successfully sue the government; find a solution to the "quagmire" of Forest Service wildfire funding; and address proposed changes to mine-land cleanup funding.

Bishop's proposal to ax BLM's conservation office drew fire from outdoor outfitters and conservationists.

NLCS includes more than 30 million acres of the nation's "most prized public lands," including more than 40 national monuments and national conservation areas and hundreds of wilderness areas, said the Conservation Lands Foundation, a national group based in Durango, Colo.

NLCS -- also known as BLM's National Conservation Lands -- is currently funded at \$31.8 million, but BLM's 2016 budget requests upping that to \$48.5 million.

"Gutting the budget for the National Conservation Lands would put local economies at risk, threaten nationally significant natural and cultural resources, and deny Americans access to their public lands," the Conservation Lands Foundation says.

The group warns that dozens of BLM-managed conservation areas -- such as the Red Rock Canyon National Conservation Area outside Las Vegas -- would have to close under Bishop's proposal.

But Bishop's camp said BLM will continue to manage the NLCS lands regardless of whether there is a separate conservation office. NLCS "does nothing to improve the recreation, conservation or wilderness value of these BLM lands," Bishop spokeswoman Julia Bell said. NLCS takes up a significant chunk of funding that would otherwise go to land management,

found that NLCS managers had a too-cozy relationship with environmental groups ([Greenwire](#), Oct. 5, 2009).

Bishop critiques Obama mining policy

When it comes to mining and coal, Bishop is taking issue with the Office of Surface Mining Reclamation and Enforcement's continued spending on developing the forthcoming stream protection rule. It has been a target of Natural Resources panel Republicans for years.

They are now also questioning OSMRE's decision to develop regulations for strip mine blasting. The agency's actions follow a petition from the group WildEarth Guardians.

"OSM continues to be extorted by environmental special interest groups attempting to advance their war on coal," Bishop's briefing said.

The Obama administration proposed spending \$1 billion from an OSMRE-administered fund for reclaiming abandoned coal mines to help stimulate the economy in Appalachian communities hit by the mining downturn ([E&E Daily](#), Feb. 3).

But Bishop warned the panel wouldn't support spending the money "to plant orchards on reclaimed coal mines." Instead, he called for funding priority cleanups.

The administration made only rough proposals for spending the \$1 billion. Lawmakers would have to work out the details by amending the Surface Mining Control and Reclamation Act. And states are already expressing concerns that changes will jeopardize a 2006 compromise.

Separately, Bishop expressed concerns about an Office of Natural Resources Revenue proposal on mineral valuations and complained that maintenance fee increases on non-coal mining claims had resulted in a loss of almost \$50,000 in claims and an \$8.3 million revenue drop between fiscal 2013 and 2014.

NATIONAL MONUMENTS:

Interior chief, House Republican clash over Colo. designation

Phil Taylor, E&E reporter

Published: Thursday, March 5, 2015

[REFRESH TEXT](#) [FM EMAIL](#) [PR PRINT](#)

Rep. Doug Lamborn (R-Colo.) was wrong to suggest that the Obama administration failed to seek public input before declaring a 21,000-acre national monument protecting Browns Canyon, according to a Colorado conservationist, a mayor and Interior Secretary Sally Jewell.

At a budget hearing today before the House Natural Resources Committee, Lamborn claimed President Obama last month designated the canyon in central Colorado without "any solicitation of public input."

The claim was patently false, Jewell said.

"There was public input, congressman, and we are committed to continuing to get public input," Jewell said. "I value public input."

In fact, Forest Service Chief Tom Tidwell and Bureau of Land Management Deputy Director Steve Ellis came to Salida, Colo., in early December to take the public's pulse on a monument. They heard strong support from residents, business owners and conservation groups ([Greenwire](#), Dec. 8, 2014).

The meeting was hosted by then-Sen. Mark Udall (D-Colo.), whose bill -- on which the monument proclamation was based -- received a hearing last July before the Energy and Natural Resources Committee.

Keith Baker, who leads Friends of Browns Canyon, and Joel Benson, mayor of Buena Vista, Colo., which is north of the monument, also challenged Lamborn's claim.

"I am disappointed that Representative Lamborn continues to be out of touch with his district and insists on making false claims about the long history of community input into the Browns Canyon National Monument," Baker said in a statement. "Chaffee County residents have had dozens of public comment opportunities on Browns Canyon, including most recently in a public hearing in December, and have expressed overwhelming support time and time again."

Baker said the public has had ample opportunities to weigh in on the monument, as evidenced by a [timeline](#) of events compiled by *The Chaffee County Times*.

In addition, there was a 2012 meeting at Mount Princeton Hot Springs Resort that included elected and appointed officials, motorized recreationists, rafters, ranchers and hikers, and an April 2013 public hearing hosted by Udall and attended by Lamborn at Noah's Ark Whitewater Rafting in Nathrop, he said.

Buena Vista and Salida, which bookend the monument to the north and south, unanimously approved resolutions supporting the designation prior to its being declared.

Lamborn, whose 5th District encompasses the Browns Canyon area, warned last month that presidentially designated monuments don't receive adequate funding and are generally viewed as "orphans" in the nation's vast public lands system.

"This is because they are created outside the normal congressional process and without local consensus, robbing the people of fair and open input," Lamborn said then. "Browns Canyon does not deserve this kind of second-class status."

Alaska Public Radio: Rep. Don Young's Homeless Comments Draw Public Ire

By [Liz Ruskin](#), [APRN](#) | March 5, 2015

On the other side of the Capitol, Alaska Congressman Don Young attended the only other congressional hearing on this snowy day in Washington, and he created a stir with a comment about homeless people.

Interior Secretary Sally Jewell was defending her budget to the House Natural Resources Committee. Young is no fan of Jewell, but he actually supported her department's 2011 decision to delist the grey wolf from the endangered species list. Instead, Young turned his ire on Congress members who asked Jewell not to delist.

"The grey wolf in fact is a predator that's killing the cloven hoof animals. And we've got 79 Congressmen sending you a letter," Young said. "Haven't got a damn wolf in their whole district. I'd like to introduce them to your district. I introduce them in your district, you wouldn't have a homeless problem any more. I yield back."

In a written statement afterward, Young said he was employing analogy and hyperbole to point out that wolves are a problem for communities that have them. "If you misunderstood my comments," Young said in the statement is office put out, "just imagine the impact a healthy wolf population would have on your own town, community, or congressional district."

Responses were quick following a statement Thursday from Rep. Doug Lamborn regarding Browns Canyon.

"Contrary to Secretary (of the Interior Sally) Jewell's claims, there was not a sufficient amount of public input before the president unilaterally claimed it as a national monument," Lamborn (R-Colorado Springs) wrote in a press release.

Friends of Browns Canyon Executive Director Keith Baker said he was "disappointed that Rep. Lamborn continues to be out of touch with his district and insists on making false claims about the long history of community input into the Browns Canyon National Monument."

Baker pointed out that Chaffee County residents expressed "overwhelming" support during "dozens" of public comment opportunities, including a public hearing in December.

In addition Baker credited The Chaffee County Times with compiling and publishing a timeline documenting the lengthy road taken to national monument designation.

"Each major milestone and event reflects numerous coordination meetings and communications for both preparation and follow-up," Baker said.

Baker said that even the Times timeline missed an early 2012 meeting at Mount Princeton Hot Springs Resort and an April 2013 public hearing hosted by then-Sen. Mark Udall and attended by Lamborn.

He also noted the Grand Junction Sentinel stated the process had been open and included numerous public forums.

"Friends of Browns Canyon are hopeful, as citizens, patriots and stewards of this land we love, that Rep. Lamborn will adhere to facts in the future. Civil, useful and productive dialogue relies on nothing less," Baker concluded.

Buena Vista Mayor Joel Benson also responded, saying that Lamborn's assertion that there was no public comment prior to designation is "flat wrong."

"The town of Buena Vista and the town of Salida unanimously approved resolutions supporting the designation," Benson said.

"Local communities have been working to protect Browns Canyon over the last two decades," Benson said, "which has included many public meetings and at least one attended by (Lamborn) and another in December about the use of the Antiquities Act."

In addition to his comment about public input, Lamborn stated, "When properties are created in this manner, they often become underfunded, neglected properties.

"This is because they are created without normal Congressional and local consensus, robbing the people of a fair and open process that stifles the input of the community. Then, when the next administration arrives, they become orphans.

"Does Browns Canyon really deserve this kind of second-class status?"

IMAGE 1 OF 4

House Natural Resources Committee Chairman Rob Bishop says he wants to be part of a "paradigm shift."

WASHINGTON - For decades, county commissioners and conservationists in Utah have been battling over land in the eastern part of the state, squaring off over potential protections, oil drilling and potash mining in the territory.

It's almost been a "100 years war," observed Mike Matz, director of public lands for Pew Charitable Trusts.

Enter Republican Rep. Rob Bishop, a seven-term lawmaker who nearly three years ago set out to bring the warring interests together and hammer out a massive land management deal. Through hundreds of meetings with thousands of stakeholders, Bishop has steered the group closer to a plan for divvying up millions of acres - with some land poised to garner new wilderness protections and other tracts set to be earmarked for energy development.

Bishop has urged county commissioners to view potential wilderness designations as a kind of "currency" with value that can be traded for "some specific, tangible benefit," such as special zones for oil drilling and rights of way for roads. Depending on who you ask, it's either a cynical approach to conservation or a pragmatic strategy for dealing with a complex, controversial issue.

It's one indication of how Bishop may approach his new congressional role as chairman of the House Natural Resources Committee.

Bishop sees the chairmanship as a chance to shake up the way the United States manages federal and Indian lands, from protecting treasured areas to permitting drilling in others.

"We haven't had a change in the way people look at the stewardship of the federal government and land in 50 or 60 years," Bishop said. "We are timed for a paradigm

ENERGY

Energy company IDs shippers for planned natural gas pipeline

Report says incentives make going green easier for commercial

shift, and I want to be part of that."

For Bishop, who convenes his first panel hearing Thursday with Interior Secretary Sally Jewell, that means giving local, state and tribal governments greater control of federal lands.

It also means undoing legal constraints, including litigation under the Endangered Species Act and the National Environmental Policy Act.

Bishop, a schoolteacher-turned-congressman, is clearly frustrated with the approaches of the past, whether policymakers have been bound by statute, legal precedent or simply decades of "this is how we do things" thinking.

"We have tended to try and find solutions based on the precedents that have been established in the past - especially with interest groups - and that just doesn't work anymore," Bishop said.

"We have to think differently," he added. "The solutions are out there. If you push the envelope, you really can accomplish things that people - especially the trained professionals who have been around here a long time - don't think you can."

In a 40-minute interview, Bishop referenced "solutions" and the importance of thinking "creatively" nearly two dozen times, as he repeatedly stressed his goal is meaningful action.

Bishop tangles with the White House on energy development. He says the oil and gas revolution has unfolded mostly on private and state land - not the territory under the Interior Department's control.

"There has to be an overall approach to increasing production on federal property," Bishop said. "This administration is either slow walking or just stopping that, and that harms the entire country."

More opportunities for oil and gas drilling on federal lands and waters - and speedier permitting - are essential for the United States to expand its role as a global energy leader, break OPEC's domination and spur domestic jobs, Bishop insisted.

It's personal for Bishop, who sees the potential for Utah to direct revenue from oil, gas and other natural resource development to schools.

"People have to realize that the way we handle federal lands has an impact not only on education for us but our energy future and for our leadership in global affairs," he said.

Bishop will continue taking a skeptical view of national monument designations, such as President Barack Obama's decision last month to use his Antiquities Act powers to protect Browns Canyon in Salida, Colo., as well as sites in Chicago and Honolulu. Bishop blasted the move, saying the White House was showing "utter and complete disdain for the public process, Congress and the communities most impacted."

Conservationists in Colorado who have been working for decades to protect Browns Canyon said the characterization was off base. Bill Dvorak, a public lands organizer for the National Wildlife Federation, recalled hundreds of people coming to a recent public meeting to support safeguarding the site.

The campaign for protections nearly made it through Congress after winning support from then-Rep. Wayne Allard, R-Colo., in the 1990s.

But as more time passed, "anglers, hunters, rafters, hikers, mountain bikers and veterans alike who were really eager to protect Browns Canyon had run out of patience," said former Sen. Mark Udall, D-Colo.

"There was a slow walk that had arguably been occurring recently and over the last 20 plus years."

Oil patch won't flash victory sign for a while

Student teams rev their engines for Shell event in Motor City

Senate fails to override Obama's veto of Keystone XL legislation

Decision 'soon' on Shell plans for Arctic

Udall said he couldn't square Bishop's criticism _ which sounded like "boilerplate talking points to please special interests" _ with the lawmaker's desire for locally driven approaches to conservation, such as his public lands initiative in Utah.

Bishop has been driving a local approach to the issue with his lands initiative in Utah, in the process telling both conservationists and development-minded counties they can't get everything they want.

"Rather than just taking a stand or stating a position," Matz said, "I think he really is interested in rolling up his sleeves and figuring out what it's going to take to put something together where not everyone gets everything they want, but where everybody gets something they want."

Alaska Rep. Don Young has settled on a novel solution to the problem of homelessness: wolves.

Young, a long-serving Republican with a history of odd commentary, discussed the idea during an exchange on Thursday with Interior Secretary Sally Jewell, who was testifying before the House Natural Resources Committee about her department's budget.

Young has been pushing for the Interior Department to remove the gray wolf from the endangered species list, and during the hearing, he ridiculed a letter sent by 79 lawmakers to Jewell urging her to protect the gray wolf population.

"How many of you have got wolves in your district?" Young asked the other lawmakers on the panel. "None. Not one."

"They haven't got a damn wolf in their whole district," he added. "I'd like to introduce them in your district. If I introduced them in your district, you wouldn't have a homeless problem anymore."

□ **Alaska Rep. Don Young apologizes for comments about suicide**

Play VIDEO

It's not clear whether Young was suggesting the wolves could eat the homeless population -- perhaps he expects the homeless to make tents out of wolf hides.

Young has a reputation for off-color remarks. Last October, he **told students at an Alaska high school that some suicides are due to a lack of support from friends and family**. The remark, which came just days after a student at the school took his own life, was met with outrage from students and faculty, and Young was quickly forced to apologize.

And in 2013, **Young reminisced in a radio interview about the "50 to 60 wetbacks" who picked tomatoes at his father's ranch** when he was younger. He apologized for that remark as well, saying the term was "commonly used" during his childhood and that he "meant no disrespect."

Huffington Post: Don Young Suggests Wolves Could Help Get Rid Of Homeless People

Rep. Don Young (R-Alaska) suggested Thursday that the solution to homelessness is wolves.

Young made the comment during a House Natural Resources Committee hearing during an exchange with Interior Secretary Sally Jewell. He was arguing that gray wolves should be taken off the endangered species list, criticizing the National Park Service and his congressional colleagues who seek to protect the animals.

"How many of you have got wolves in your district? None. None. Not one," Young said, calling the gray wolf "a predator."

"We've got 79 congressmen sending you a letter, they haven't got a damn wolf in their whole district," Young added. "I'd like to introduce them in your district. If I introduced them in your district, you wouldn't have a homeless problem anymore."

Watch Young make the comments above.

A spokesman for Young told [The Washington Post](#) that the statement was meant to emphasize that "these predators pose serious threats to wildlife management and their listing has damaging impacts to local communities."

Young is no stranger to controversial statements. In October 2014, he used profane language and made highly insensitive remarks about [gay marriage and suicide](#) at a high school. One of the school's students had taken his own life days before Young made the remarks.

Young also reportedly "[freaked out](#)" on his 2014 Democratic challenger ahead of a debate that same month.

Congress should eliminate a Bureau of Land Management office that oversees national monuments, wilderness and conservation sites, according to House Natural Resources Chairman Rob Bishop.

The Utah Republican's recommendation is part of a committee policy briefing on President Obama's fiscal 2016 budget, which it submitted to the House Budget Committee, as required by House rules.

The [briefing](#), which was obtained by [E&ENews PM](#), claims that BLM's

Rep. Don Young (R-Alaska) famous for his salty tongue and brusque demeanor, suggested Thursday that if he let loose wolves in some congressional districts, they "wouldn't have a homeless problem anymore." (House Committee on Natural Resources)

Alaska Republican Rep. Don Young, famous for his salty tongue and brusque demeanor, suggested Thursday that if he let loose wolves in some congressional districts, they "wouldn't have a homeless problem anymore."

The strange comment was made during a halting five-minute exchange with Interior Secretary Sally Jewell during a House Natural Resources Committee hearing on her agency's budget. He accused her and her department of making decisions without consulting the states they'd effect.

Young, who supports taking gray wolves off the endangered species list, mocked a letter 79 members of Congress sent urging Jewell to protect the gray wolf population. (In Alaska, for what it's worth, you can hunt wolves.)

"How many of you have got wolves in your district?" he asked. "None. None. Not one."

"They haven't got a damn wolf in their whole district," Young continued. "I'd like to introduce them in your district. If I introduced them in your district, you wouldn't have a homeless problem anymore."

We sought clarification to ensure we heard correctly. A spokesman for Young said the "analogy was purposely hyperbolic to stress the point that these predators pose serious threats to wildlife management and their listing has damaging impacts to local communities."

This post has been updated.

Julia Bell said. NLCS takes up a significant chunk of funding that would

National Landscape Conservation System is redundant and antithetical to BLM's multiple-use mission.

"As well as eroding the mission of BLM, NLCS has also become a duplicative office that imposes another layer of bureaucratic, centralized, and unnecessary management," the briefing says. "The committee recommends eliminating the office of the NLCS and restoring management of 'units' to BLM state offices."

It also recommends that the federal government convey lands "without strings" to state, local and tribal governments. It urges the Budget Committee to "eliminate barriers" for those conveyances in its budget resolution and build in \$50 million to offset potential losses to the U.S. Treasury.

The briefing makes a set of other Interior Department budget recommendations, including to redirect land acquisition funds to address park maintenance; eliminate funds that would be paid to environmental groups that successfully sue the government; find a solution to the "quagmire" of Forest Service wildfire funding; and address proposed changes to mine-land cleanup funding.

Bishop's proposal to ax BLM's conservation office drew fire from outdoor outfitters and conservationists.

NLCS includes more than 30 million acres of the nation's "most prized public lands," including more than 40 national monuments and national conservation areas and hundreds of wilderness areas, said the Conservation Lands Foundation, a national group based in Durango, Colo.

NLCS -- also known as BLM's National Conservation Lands -- is currently funded at \$31.8 million, but BLM's 2016 budget requests upping that to \$48.5 million.

"Gutting the budget for the National Conservation Lands would put local economies at risk, threaten nationally significant natural and cultural resources, and deny Americans access to their public lands," the Conservation Lands Foundation says.

The group warns that dozens of BLM-managed conservation areas -- such as the Red Rock Canyon National Conservation Area outside Las Vegas -- would have to close under Bishop's proposal.

But Bishop's camp said BLM will continue to manage the NLCS lands regardless of whether there is a separate conservation office. NLCS "does nothing to improve the recreation, conservation or wilderness value of these BLM lands," Bishop spokeswoman

HOUSE:

Bishop brings 'humor and candor' to rancorous resources debate

Phil Taylor, E&E reporter

Advertisement

E&E's Power Plan Hub

At the end of last week's House Natural Resources Committee hearing on the Interior Department's 2016 budget, Chairman Rob Bishop offered Secretary Sally Jewell a sincere apology.

"In all fairness to you, you've had a lot of times when I've cut you off," the Utah Republican said. "I will give you the right of having the last five minutes if you'd like ... to respond to us."

"Why, thank you," said a startled Jewell, who had been in the hot seat for more than three hours. "I was not expecting that ..."

Bishop interjected, "And it may never happen again!"

The audience in the Longworth House Office Building hearing room laughed, then Bishop sat back and let Jewell continue.

Since taking the Natural Resources gavel two months ago, Bishop, 63, has brought a sense of humor and even humility to a committee that has fought bitter battles with the Obama administration and had more than its share of intramural brawls.

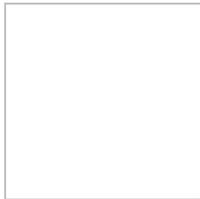

Former Chairman Doc Hastings (R-Wash.) issued a number of subpoenas and accused Interior officials of "stonewalling" his committee's investigations into allegations of misconduct. Another former chairman, Rep. Don Young (R-Alaska), berated his Democratic colleagues last week for supporting protections for wolves and proposed using wolves to clean up their "homeless problem."

Bishop, at times, has been merciless, too. A year ago, he criticized a National Park Service official for delivering some of the "dumbest testimony I've ever heard" about a bill to rename a peak in Yosemite National Park.

But while Bishop is likely to fight much -- if not most -- of the administration's energy and resource agenda, his adversaries credit him for opening lines of communication that were all but cemented shut over the past four years of GOP rule.

A constructive dialogue with the administration and its green allies is key if Bishop hopes to advance his policy agenda in the 114th Congress, including his signature public lands initiative in eastern Utah, which seeks to designate new wilderness and open new lands for development ([Greenwire](#), Oct. 22, 2013).

SPECIAL REPORT

News and information about key committees and subcommittees and their members in the 114th Congress. [Click here](#) to view the report.

"Bishop has brought a more personable approach to interactions that his Natural Resources Committee has with top administration officials," said David Hayes, who served four years as Interior deputy secretary and testified several times before the committee. "Making a human connection is a key first step in finding common ground. I hope that his humor and candor rubs off on some of the other members of the committee."

Bishop's views on national monuments, conservation funding, wilderness and endangered species contrast sharply with his Democratic colleagues and conservationists. But even green officials admit that despite Bishop's rhetoric, they really like the guy.

"We're not going to agree with him on everything, or even most things, but we can at least talk to him," said Athan Manuel, director of public lands protection for the Sierra Club in Washington, D.C. "He takes the process seriously, but he doesn't take himself too seriously."

Bishop said he wants the committee to be creative in tackling policy problems.

His plate is full: His committee will be responsible for renewing expired programs that are key to rural counties and conservation interests, including Secure Rural Schools, payment in lieu of taxes (PILT), the Land and Water Conservation Fund, and the Federal Lands Recreation Enhancement Act, in addition to conducting rigorous oversight of federal land management.

Baseball talk -- and oddball jokes

The seven-term congressman and former history teacher is seen as affable, approachable and, at times, self-mocking. He insists that some non-members of Congress, including the press, call him "Rob."

Bishop loves talking baseball. He has a painting of New York Yankees legend Mickey Mantle and dirt from the pitcher's mound of the original Yankee Stadium in his Cannon building office. But those who know him say his first allegiance is to the Chicago Cubs. He's also a season-ticket holder to the Salt Lake Bees, a Triple A team, and has coached in multiple leagues, according to his official biography.

Before coming to Congress in 2003, Bishop was active in community theater, which is where he met his wife, Jeralynn Hansen Bishop, with whom he has five kids and six grandkids. Bishop was the prince and Jeralynn the princess in a musical.

"Yes, I sing," Bishop said.

He is said to be well-liked by his personal staff, many of whom have since left to fill higher positions on Capitol Hill and in state government. Bishop participated in the wedding of his former public lands staffer, Fred Ferguson, who is now chief of staff for Rep. Jason Chaffetz (R-Utah).

Bishop approaches natural resources issues with intensity, but his dry wit creeps into the hearing room.

In a tense exchange Thursday, Rep. Paul Gosar (R-Ariz.) grilled Jewell on what she knew about a Fish and Wildlife Service employee Gosar said had violated the Hatch Act by publicly lobbying against a bill in Congress.

"There also is an act," Bishop said as he prepared to turn the questioning over to another member, "that said any criticisms of the budget that is conducted when it is snowing, those criticisms are automatically true -- it's there in statute."

The hearing happened as snow shuttered the federal government and left most of Capitol Hill bereft of people. Bishop asked panel members to submit their written opening statements by 5 p.m., "or whenever this building crushes under a blanket of snow ... whichever occurs faster."

Unlike other committee chairmen, Bishop often departs his prepared opening remarks.

He opened last week's hearing without a gavel: "Assume it's been hit," he said.

And in an improvised statement, he offered a "mea culpa" for criticizing Jewell's nomination as secretary two years ago.

"I repent of that, because you have been very fair and open and friendly with us, and I appreciate that very much," he said. "Your agency is still making dumb decisions, but at least you talk to us before you make those dumb decisions."

His humor can be abstruse.

As Bishop prepared to hand the microphone to committee Vice Chairwoman Cynthia Lummis (R-Wyo.), he said, "Miss Jewell is salaried, she deals with services, and we'll start our questioning with Dorothy Kilgallen."

It was a reference to the opening line of a popular 1950s and '60s television game show called "What's My Line," where host John Charles Daly tasked a celebrity panel, including newspaper columnist Kilgallen and actress Arlene Francis, to guess a contestant's occupation.

But the hearing room was silent -- the joke was likely lost on anyone born after the Kennedy administration.

"I'm sorry, I had to say that," Bishop said. "And anyone who's old enough to know that reference, I feel even more sorry for you."

'A little outlandish'

While Bishop does not hide his displeasure with Interior's management of public lands -- which represent roughly two-thirds of his Beehive State -- former Obama administration officials say Bishop, unlike other committee members, was a fair interrogator and didn't appear to be trying to garner sound bites.

"What you see in the committee room is the same person you see behind closed doors," said former Bureau of Land Management Director Bob Abbey, who faced fire from committee members on numerous occasions from 2009 to 2012. "I never perceived Congressman Bishop as being a bully."

Abbey said Bishop treated him "fairly" and was well-versed in public lands issues, in contrast with some committee members. Bishop's rhetoric "may be a little outlandish," but his work product as a congressman reflects balance and pragmatism, Abbey said.

"He certainly understands the issues and the concerns of the constituencies he represents," Abbey said. "At the same time, he tries to be fair in giving the witness before him an opportunity to respond to the questions he raises."

In the past two sessions of Congress, Bishop was deferential to then-Chairman Hastings, and the committee majority was "always in full attack mode," said Hayes, who often testified alongside then-Secretary Ken Salazar.

"Rob Bishop was a willing participant in that highly negative atmosphere," Hayes said.

But Hayes recalled one meeting that he and Salazar had with Bishop to clear the air on a contentious issue.

"I was impressed then with how personable Rob Bishop was during that meeting," Hayes said. "Afterward, he was publicly complimentary of the openness and candor that we had taken in the meeting. As I recall, he told the press that we were 'good guys' or something to that effect."

Alaska Public Radio: Rep. Don Young's Homeless Comments Draw Public Ire

By Liz Ruskin, APRN | March 5, 2015

On the other side of the Capitol, Alaska Congressman Don Young attended the only other congressional hearing on this snowy day in Washington, and he created a stir with a comment about homeless people.

Interior Secretary Sally Jewell was defending her budget to the House Natural Resources Committee. Young is no fan of Jewell, but he actually supported her department's 2011 decision to delist the grey wolf from the endangered species list. Instead, Young turned his ire on Congress members who asked Jewell not to delist.

"The grey wolf in fact is a predator that's killing the cloven hoof animals. And we've got 79 Congressmen sending you a letter," Young said. "Haven't got a damn wolf in their whole district. I'd like to introduce them to your district. I introduce them in your district, you wouldn't have a homeless problem any more. I yield back."

In a written statement afterward, Young said he was employing analogy and hyperbole to point out that wolves are a problem for communities that have them. "If you misunderstood my comments," Young said in the statement is office put out, "just imagine the impact a healthy wolf population would have on your own town, community, or congressional district."

The Mountain Mail: Friends, BV mayor respond to Lamborn comment

Story Comments

Paul Goetz Managing Editor | 0 comments

Responses were quick following a statement Thursday from Rep. Doug Lamborn regarding Browns Canyon.

"Contrary to Secretary (of the Interior Sally) Jewell's claims, there was not a sufficient amount of public input before the president unilaterally claimed it as a national monument," Lamborn (R-Colorado Springs) wrote in a press release.

Friends of Browns Canyon Executive Director Keith Baker said he was "disappointed that Rep. Lamborn continues to be out of touch with his district and insists on making false claims about the long history of community input into the Browns Canyon National Monument."

Baker pointed out that Chaffee County residents expressed "overwhelming" support during "dozens" of public comment opportunities, including a public hearing in December.

In addition Baker credited The Chaffee County Times with compiling and publishing a timeline documenting the lengthy road taken to national monument designation.

"Each major milestone and event reflects numerous coordination meetings and communications for both preparation and follow-up," Baker said.

Baker said that even the Times timeline missed an early 2012 meeting at Mount Princeton Hot Springs Resort and an April 2013 public hearing hosted by then-Sen. Mark Udall and attended by Lamborn.

He also noted the Grand Junction Sentinel stated the process had been open and included numerous public forums.

"Friends of Browns Canyon are hopeful, as citizens, patriots and stewards of this land we love, that Rep. Lamborn will adhere to facts in the future. Civil, useful and productive dialogue relies on nothing less," Baker concluded.

Buena Vista Mayor Joel Benson also responded, saying that Lamborn's assertion that there was no public comment prior to designation is "flat wrong."

"The town of Buena Vista and the town of Salida unanimously approved resolutions supporting the designation," Benson said.

"Local communities have been working to protect Browns Canyon over the last two decades," Benson said, "which has included many public meetings and at least one attended by (Lamborn) and another in December about the use of the Antiquities Act."

In addition to his comment about public input, Lamborn stated, "When properties are created in this manner, they often become underfunded, neglected properties.

"This is because they are created without normal Congressional and local consensus, robbing the people of a fair and open process that stifles the input of the community. Then, when the next administration arrives, they become orphans.

"Does Browns Canyon really deserve this kind of second-class status?"

House Natural Resources Committee Chairman Rob Bishop says he wants to be part of a "paradigm shift."

WASHINGTON - For decades, county commissioners and conservationists in Utah have been battling over land in the eastern part of the state, squaring off over potential protections, oil drilling and potash mining in the territory.

It's almost been a "100 years war," observed Mike Matz, director of public lands for Pew Charitable Trusts.

Enter Republican Rep. Rob Bishop, a seven-term lawmaker who nearly three years ago set out to bring the warring interests together and hammer out a massive land management deal. Through hundreds of meetings with thousands of stakeholders, Bishop has steered the group closer to a plan for divvying up millions of acres - with some land poised to garner new wilderness protections and other tracts set to be earmarked for energy development.

Bishop has urged county commissioners to view potential wilderness designations as a kind of "currency" with value that can be traded for "some specific, tangible benefit," such as special zones for oil drilling and rights of way for roads. Depending on who you ask, it's either a cynical approach to conservation or a pragmatic strategy for dealing with a complex, controversial issue.

It's one indication of how Bishop may approach his new congressional role as chairman of the House Natural Resources Committee.

Bishop sees the chairmanship as a chance to shake up the way the United States manages federal and Indian lands, from protecting treasured areas to permitting drilling in others.

"We haven't had a change in the way people look at the stewardship of the federal government and land in 50 or 60 years," Bishop said. "We are timed for a paradigm shift, and I want to be part of that."

For Bishop, who convenes his first panel hearing Thursday with Interior Secretary Sally Jewell, that means giving local, state and tribal governments greater control of federal lands.

It also means undoing legal constraints, including litigation under the Endangered Species Act and the National Environmental Policy Act.

Bishop, a schoolteacher-turned-congressman, is clearly frustrated with the approaches of the past, whether policymakers have been bound by statute, legal precedent or simply decades of "this is how we do things" thinking.

"We have tended to try and find solutions based on the precedents that have been established in the past - especially with interest groups - and that just doesn't work anymore," Bishop said.

"We have to think differently," he added. "The solutions are out there. If you push the

envelope, you really can accomplish things that people - especially the trained professionals who have been around here a long time - don't think you can."

In a 40-minute interview, Bishop referenced "solutions" and the importance of thinking "creatively" nearly two dozen times, as he repeatedly stressed his goal is meaningful action.

Bishop tangles with the White House on energy development. He says the oil and gas revolution has unfolded mostly on private and state land - not the territory under the Interior Department's control.

"There has to be an overall approach to increasing production on federal property," Bishop said. "This administration is either slow walking or just stopping that, and that harms the entire country."

More opportunities for oil and gas drilling on federal lands and waters - and speedier permitting - are essential for the United States to expand its role as a global energy leader, break OPEC's domination and spur domestic jobs, Bishop insisted.

It's personal for Bishop, who sees the potential for Utah to direct revenue from oil, gas and other natural resource development to schools.

"People have to realize that the way we handle federal lands has an impact not only on education for us but our energy future and for our leadership in global affairs," he said.

Bishop will continue taking a skeptical view of national monument designations, such as President Barack Obama's decision last month to use his Antiquities Act powers to protect Browns Canyon in Salida, Colo., as well as sites in Chicago and Honolulu. Bishop blasted the move, saying the White House was showing "utter and complete disdain for the public process, Congress and the communities most impacted."

Conservationists in Colorado who have been working for decades to protect Browns Canyon said the characterization was off base. Bill Dvorak, a public lands organizer for the National Wildlife Federation, recalled hundreds of people coming to a recent public meeting to support safeguarding the site.

The campaign for protections nearly made it through Congress after winning support from then-Rep. Wayne Allard, R-Colo., in the 1990s.

But as more time passed, "anglers, hunters, rafters, hikers, mountain bikers and veterans alike who were really eager to protect Browns Canyon had run out of patience," said former Sen. Mark Udall, D-Colo. "There was a slow walk that had arguably been occurring recently and over the last 20 plus years."

Udall said he couldn't square Bishop's criticism - which sounded like "boilerplate talking points to please special interests" - with the lawmaker's desire for locally driven approaches to conservation, such as his public lands initiative in Utah.

Bishop has been driving a local approach to the issue with his lands initiative in Utah, in the process telling both conservationists and development-minded counties they can't get everything they want.

"Rather than just taking a stand or stating a position," Matz said, "I think he really is interested in rolling up his sleeves and figuring out what it's going to take to put something together where not everyone gets everything they want, but where everybody gets something they want."

CBS News: Rep. Don Young's solution for the "homeless problem": wolves

3 Comments Shares 2 Tweets Stumble Email

More +

Alaska Rep. Don Young has settled on a novel solution to the problem of homelessness: wolves.

Young, a long-serving Republican with a history of odd commentary, discussed the idea during an exchange on Thursday with Interior Secretary Sally Jewell, who was testifying before the House Natural Resources Committee about her department's budget.

Young has been pushing for the Interior Department to remove the gray wolf from the endangered species list, and during the hearing, he ridiculed a letter sent by 79 lawmakers to Jewell urging her to protect the gray wolf population.

"How many of you have got wolves in your district?" Young asked the other lawmakers on the panel. "None. Not one."

"They haven't got a damn wolf in their whole district," he added. "I'd like to introduce them in your district. If I introduced them in your district, you wouldn't have a homeless problem anymore."

▫

Alaska Rep. Don Young apologizes for comments about suicide

Play VIDEO

It's not clear whether Young was suggesting the wolves could eat the homeless population -- perhaps he expects the homeless to make tents out of wolf hides.

Young has a reputation for off-color remarks. Last October, he **told students at an Alaska high school that some suicides are due to a lack of support from friends and family**. The remark, which came just days after a student at the school took his own life, was met with outrage from students and faculty, and Young was quickly forced to apologize.

And in 2013, **Young reminisced in a radio interview about the "50 to 60 wetbacks" who picked tomatoes at his father's ranch** when he was younger. He apologized for that remark as well, saying the term was "commonly used" during his childhood and that he "meant no disrespect."

Huffington Post: Don Young Suggests Wolves Could Help Get Rid Of Homeless People

Rep. Don Young (R-Alaska) suggested Thursday that the solution to homelessness is wolves.

Young made the comment during a House Natural Resources Committee hearing during an exchange with Interior Secretary Sally Jewell. He was arguing that gray wolves should be taken off the endangered species list, criticizing the National Park Service and his congressional colleagues who seek to protect the animals.

"How many of you have got wolves in your district? None. None. Not one," Young said, calling the gray wolf "a predator."

"We've got 79 congressmen sending you a

letter, they haven't got a damn wolf in their whole district," Young added. "I'd like to introduce them in your district. If I introduced them in your district, you wouldn't have a homeless problem anymore."

Watch Young make the comments above.

A spokesman for Young told [The Washington Post](#) that the statement was meant to emphasize that "these predators pose serious threats to wildlife management

United States Senate

WASHINGTON, DC 20510

March 10, 2015

The Honorable Barack Obama
President of the United States
The White House
1600 Pennsylvania Ave., NW
Washington, DC 20500

Dear Mr. President:

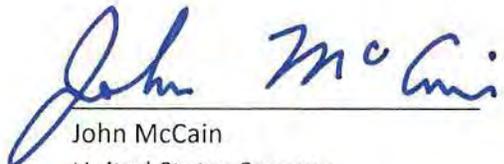

We write in opposition to any unilateral executive action to designate more national monuments in Arizona, and we specifically oppose recent requests that you designate a “Grand Canyon Watershed National Monument” in northern Arizona. Such proposals, without the necessary support from state leaders, congressional delegation, and proper reviews should not advance. This proposal, in particular, extends far afield from the intent of the Antiquities Act by seeking to lock away 1.7 million acres of land in Arizona—an area larger than the State of Delaware—from hunting, livestock, wildfire prevention, mining, and certain forms of outdoor recreation and tourism. What’s more, as noted by Supreme Court precedent, such a designation could also have grave consequences for surface and groundwater rights in Arizona.

Aside from federal overreach, the greatest threat to the watershed of the Grand Canyon is the ongoing 15-year drought in the Southwest. A national monument designation does nothing to address the historically low snowmelt or surface water levels that feed the Colorado River and its tributaries. Arguably, the creation of a new monument might worsen watershed health if land managers and private property owners are restricted from thinning the area’s overgrown forests or if hunters are barred from culling overpopulated wildlife. Arizona cannot afford to have its hands tied when it comes to controlling wildlife populations, enhancing its water supplies, and preventing wildfires.

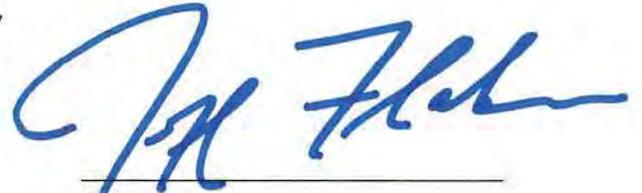

This monument proposal would also further unravel a longstanding agreement made by a number of environmental organizations and relevant stakeholders in support of a multiple-use philosophy across much of this area. As part of a locally driven collaborative process that included local miners and cattle growers, Congress passed the Arizona Wilderness Act of 1984 with the full understanding and intention that federally regulated mining and grazing would continue on much of the Arizona Strip and the Kaibab National Forest.

We of course support preserving the Grand Canyon for the enjoyment of future generations—the existing national park does just that. The Park’s powerful, awe-inspiring landscape attracts over 5 million visitors from across the United States and abroad each year. Ensuring the protection of this crown jewel is the civic duty of every Arizonan and American, and we appreciate the heartfelt motivation by those in Congress who initially backed this concept. However, the current monument proposal is ill-conceived, single-minded, and impractical to implement, and we respectfully urge you to disregard it.

Sincerely,

John McCain
United States Senator

Jeff Flake
United States Senator

SECRETARY JEWELL DOESN'T USE PERSONAL EMAIL FOR OFFICIAL BUSINESS. [TIME](#) (3/7, Rogers, 19.19M) reports that "ten sitting Cabinet members in the Obama administration say that they do not exclusively use a personal email account for official business, as former Secretary of State Hillary Clinton did." Jessica Kershaw, a spokesperson for the Interior Department., said, "The Secretary [Sally Jewell] uses a government email address to conduct official business."

FEDERAL, STATE GOVERNMENTS CONTINUE EFFORTS TO PROTECT SAGE GROUSE. The [High Country \(CO\) News](#) (3/8, 74K) reports that with "a rider to this year's massive spending bill that bars the FWS from issuing any grouse-related rules," states are "using the extra time to prove that their plans provide sufficient protection to the grouse (the spending bill also gives the BLM \$15 million to support those state plans)." The article notes that "last week, Idaho announced a major push to protect sage grouse," and earlier this month Utah Gov. Gary Herbert "directed agencies to implement a conservation plan that would protect 10,000 acres of sage grouse habitat yearly, via incentive-based programs, increase total habitat by 50,000 acres, and would aim to keep a breeding population of at least 4,100 males." Meanwhile, Interior Secretary Jewell is "addressing another threat to sage grouse— wildfire." Earlier this year, Jewell "issued a secretarial order calling for a comprehensive strategy to reduce the size and intensity of range fires, improve response to fires, and control cheatgrass and other flammable exotics."

REP. HARDY ASSERTS "EQUAL FOOTING DOCTRINE" OF PUBLIC LANDS. The [Las Vegas Review-Journal](#) (3/9, 398K) reports that at a hearing of the House Natural Resources Committee on Thursday. Rep. Crescent Hardy told Interior Secretary Sally Jewell what he thinks of federal ownership of public land in the state. Hardy said, "Some would have you believe that these public lands are federal lands, and they are at this time. But I believe they are state public lands." Hardy told her Jewell was an supporter of the "equal footing doctrine."

INTERIOR SHARES PHOTO OF MOONRISE OVER YELLOWSTONE. The [Indian Country Today Media Network](#) (3/8, 49K) highlights "breathtaking photos" taken by Jacob Frank in Yellowstone National Park "a good two nights before the moon went full." The pictures were shared by the Interior Department on its Tumblr page, America's Great Outdoors.

The [County 10](#) (3/8) also highlights the photo.

ADDITIONAL COVERAGE OF NEWEST NATIONAL MONUMENTS. Additional coverage of the three newest national monuments was provided by the [Examiner](#) (3/8, 1.01M).

ADDITIONAL COVERAGE REP. YOUNG CRITICIZES PROTECTION OF WOLVES. Additional coverage of Rep. Don Young's comments on wolves and homelessness during a House Natural Resources Committee hearing on the Interior Department's budget was provided by [CNN](#) (3/6, Jaffe, 14.35M), the [US News & World Report](#) (3/6, 685K), the [Huffington Post](#) (3/6, 281K), the [Washington Times](#) (3/6, Howell, 644K), the [Syracuse \(NY\) Post-Standard](#) (3/8, 438K), the [New York Daily News](#) (3/8, 3.79M), the [Alaska Native News](#) (3/8, 245), the [Daily Mail \(UK\)](#) (3/8, 4.78M), [Outside](#) (3/8, 385K), [The Inquisitr](#) (3/8, 753K), [KTOO-FM](#) Juneau, AK (3/8), and [KXLF-TV](#) Butte, MT (3/8, 2K).

America's Great Outdoors:

National Park Service:

OBAMA SAYS "MARCH IS NOT YET FINISHED" DESPITE CIVIL RIGHTS PROGRESS. President Obama joined about 40,000 other people in commemorating the 50-year anniversary of "Bloody Sunday" in Selma, Alabama.

[ABC World News](#) (3/7, lead story, 2:45, Vega, 5.84M) reported Obama "stood" where "more than 80 demonstrators fighting for black voting rights were crushed by the cruel batons of Alabama in 1965," and the [Washington Post](#) (3/8, Holley, Eilperin, 5.17M) notes his speech came "with the nation embroiled in a fresh debate about race." In his speech, Obama said, "There are places, and moments in America where this nation's destiny has been decided" and "Selma is such a place."

On [NBC Nightly News](#) (3/7, lead story, 3:50, Alexander, 7.86M), Kristen Walker reported that "the energy was electric here today" as Obama "retraced those steps" taken by "alongside dozens of others, including former President George W. Bush." Welker said Obama "took a moment to look back and forward enlisting a new generation into the fight."

The [New York Times](#) (3/8, Baker, Fausset, Subscription Publication, 9.97M) reports Obama "rejected the notion that race relations have not improved since" the events of 50 years ago. Obama said, "What happened in Ferguson may not be unique, but it's no longer endemic. It's no longer sanctioned by law or custom, and before the civil rights movement, it most surely was."

The [CBS Evening News](#) (3/7, lead story, 3:15, Axelrod, 5.08M) reported Rep. John Lewis, "one of those attacked" in 1965, introduced Obama and said, "If someone had told me.. that one day I would be back here introducing the first African-American president, I would have said you're crazy."

Despite the noted improvements, Obama called for further change and progress. [USA Today](#) (3/8, Madhani, Jackson, Today, 10 32M) reports Obama said, "Fifty years from Bloody Sunday, our march is not yet finished," adding, "But we are getting closer. Two hundred-and thirty-nine years after this nation's founding, our union is not yet perfect. But we are getting closer." Obama also said, according to the [Washington Times](#) (3/8, Boyer, 644K), that it's a "common mistake" for Americans to feel that "racism is banished." Citing the Justice Department's report of racial bias in Ferguson, Obama said, "We just need to open our eyes, and ears, and hearts, to know that this nation's racial history still casts its long shadow upon us."

Against the backdrop of the anniversary, Obama called for the renewal of the Voting Rights Act. [Politico](#) (3/7, Dove, 669K) reported the President indicated that renewing the law is a way to pay the "solemn debt we owe" to the sacrifices of civil rights leaders, meanwhile, [The Hill](#) (3/7, Byrnes, Lillis, 224K) said Obama "called on the dozens of members of Congress in attendance to return to Washington and rally support among their colleagues." [McClatchy](#) (3/8, Parsons, Subscription Publication, 17K) notes that Obama highlighted that "One hundred members of Congress have come here today...If we want to honor this day, let these hundred go back to Washington" and convince others to "pledge to make it their mission to restore the law this year."

The [Wall Street Journal](#) (3/8, Campo-Flores, Subscription Publication, 5 67M) reports Obama criticized efforts to weaken voting rights, including efforts by state legislature to pass legislation requiring photo identification to vote. Obama, according to the [Los Angeles Times](#) (3/8, Parsons, 3.49M), said the Voting Rights Act, "the culmination of so much blood and sweat and tears...stands weakened, its future subject to partisan rancor." Obama asked, "How can that be?" noting the legislation "was one of the crowning achievements of our democracy, the result of Republican and Democratic efforts."

Only One Congressional GOP Leader Attends Commemoration. [Bloomberg Politics](#) (3/7, John, 169K) reports "only one member" of the Congressional GOP "leadership team, Majority Leader Kevin McCarthy, is in Alabama to mark" the anniversary. Rep. Steve King "declined to say whether it was a mistake for leading Republicans to skip" the event, but indicated that "cultural friction" exists. While being interviewed at the Iowa Agricultural Summit, King said, "If I walk into the Congressional Black Caucus—which I have done by mistake, by the way—and I look around there and, I have friends in there and people I like, but I also know that I'm not welcome in the Congressional Black Caucus." When asked why he would not be welcome, King said, "Well, because I'm not an African American and that's really, that's it."

Krotoszynski: Federal Courts Would Likely Now Bar Selma-Scale Protest. In a [Los Angeles Times](#) (3/8, Krotoszynski, 3.49M) op-ed, Ronald J. Krotoszynski Jr. of the University of Alabama School of Law, says that protesters would probably not be able to recreate the 1965 march from Selma 52 miles to Montgomery. After a four day hearing, US District Judge Frank M. Johnson Jr. ruled that the marchers were exercising their constitutional rights of free assembly, petition, and speech. However, starting in the 1970s, Federal courts rolled back these freedoms through the public forum doctrine, "which lets a city, state or the federal government decide whether public property can be used for 1st Amendment activities." Krotoszynski concludes, "As we remember the epic marches in Selma and the legal reform they accomplished, we should also acknowledge how the courts have since hobbled our right to stage a protest of such magnitude."

Wofford: King Decision To Obey Injunction Set Stage For Successful Third March. In a [Politico](#) (3/7, Wofford, 669K) magazine piece, former Sen. Harris Wofford notes that after the initial attempt to cross the Edmund Pettus Bridge led by John Lewis was met with violence, the Rev. Martin Luther King Jr. decided to obey Judge Johnson's injunction against the march to Montgomery days later at the start of an abbreviated second attempt. At the time, King "knew that if he obeyed the injunction and postponed the march, Judge Johnson could ultimately provide federal protection for a future march." But he also "understood that if we did not march right away, he risked losing control of the impassioned civil rights supporters who had gathered from across the country and were demanding a response to Bloody Sunday's brutality at the bridge." King "skillfully" used the "element of surprise in turning the marchers back" and "succeeded in achieving the hard balance of symbolically protesting while not violating a reasonable federal order."

Selma Participants Nostalgic For Solidarity Of Era. The [Los Angeles Times](#) (3/8, Zeitchik, 3.49M) reports that many black Selma residents look back on the 50th anniversary of the marches with sadness over the brutality of the period but also a sense of wistfulness about the solidarity they felt at the time. Now, even "those who agree that race relations have improved note that discrimination comes in more subtle forms – especially via a larger sense of economic disenfranchisement."

NPS Selling Merchandise Related To Anniversary. [WBMA-TV](#) Birmingham, AL (3/8, 69K) reports that the NPS will "sell merchandise related to the 50th anniversary of the voting rights march on Saturday and Sunday, officials said."

Additional Coverage. Additional coverage of the anniversary was provided by [USA Today](#) (3/7, Madhani, 10 32M).

HOMESTEAD NATIONAL MONUMENT OF AMERICA SUPERINTENDENT TOUTS IMPACT ON LOCAL ECONOMY. The [Lincoln \(NE\) Journal Star](#) (3/8, 291K) reports that "the Homestead National Monument of America has a monumental impact on the regional economy." Homestead Park Superintendent Mark Engler, "upwards of 70,000 guests visit the Homestead each year, with landmark years – such as the Homestead Act's 150th anniversary in 2012 – clearing 100,000." Engler said, "I think that there is a true economic impact directly tied to the Monument, from our spending and from our employees' spending, but as well there's an economic benefit tied to the visitors. That's a good thing for our economic well-being."

NPS EYES USE RENOVATED WEST VIRGINIA CAMP AS EDUCATIONAL FACILITY. The [AP](#) (3/8) reports that the NPS is "hoping to turn a renovated Camp Brookside in Brooks in a future education institute." The agency "hopes to turn the site into a facility to address community and higher education needs such as a base camp for field research."

Coverage by the AP was also picked up by the [Charleston \(WV\) Gazette](#) (3/6, 13K) and [WOWK-TV](#) Charleston, WV (3/8, 9K).

NPS FLOATS PLAN TO MOVE ALCATRAZ FERRY TO FT. MASON. The [San Francisco Chronicle](#) (3/9, 2.21M) reports that "a federal plan that could move the Alcatraz ferry — and its projected 1.7 million annual passengers — from its longtime home on the Embarcadero to Fort Mason is drawing howls of outrage from Marina residents."

NPS CONSIDERING FORT PULASKI BRIDGE CHANGE. The [Savannah \(GA\) Morning News](#) (3/8, Quimby, 145K) reports that the NPS is "seeking comments from the public on a proposal to replace the Fort Pulaski Bridge with a new, two-lane bridge upstream." The service on "Wednesday opened a monthlong public comment period on a recently completed environmental assessment for the project."

ALL GREAT SMOKY MOUNTAINS NATIONAL PARK STREAMS NOW OPEN TO FISHING. The [Knoxville \(TN\) News Sentinel](#) (3/8, 371K) reports that "as of this week all the streams in the Great Smoky Mountains National Park are open to fishing for the first time since the park was established in 1934." The article notes that "the milestone is the result of the park's reopening of 8.5 miles of Lynn Camp Prong, near Tremont, where for the past six years biologists have worked to remove nonnative rainbow trout and re-establish brook trout, the only trout species native to the Southern Appalachians."

NEW NPS DIRECTOR OF PUBLIC HEALTH NAMED. The [Cleveland Jewish News](#) (3/8, 34K) reports that "Public Health Service Capt. Sara B. Newman, a Cleveland native, has been selected as director of the US National Park Service Office of Public Health, effective March 1."

GLEN CARBON SCHOOL ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [Edwardsville \(L\) Intelligencer](#) (3/8, 14K) reports that the Glen Carbon School has joined to the National Register of Historic Places.

ADDITIONAL COVERAGE STUDY FINDS RARE EVERGLADES PLANTS THREATENED. Additional coverage that "a landmark report — 10 years in the making — looked at critically imperiled plants at Everglades National Park and found that 16 of them may already have vanished from there" was provided by the [Tampa Bay \(FL\) Times](#) (3/8, 828K).

Bureau of Land Management:

BLM'S UTAH CHIEF RETIRING. The [Salt Lake \(UT\) Tribune](#) (3/8, 405K) reports that "after five years overseeing nearly 40 percent of Utah's land, Juan Palma retires Friday as the state director for the Bureau of Land Management." Palma is described as "an easygoing leader who was able to navigate the fraught politics of public lands management in Utah," and is "respected by environmentalists and oil and gas developers alike." Rep. Chris Stewart told Interior Secretary Sally Jewell recently, "He has been excellent. He understands the people. He understands the culture. He understands the issues." Stewart added, "I hope your replacement will be nearly as good." The article notes that "Deputy BLM state director Jenna Whitlock will fill Palma's shoes on an acting basis while national BLM Director Neil Kornze finds a permanent replacement for what promises to be one of the toughest jobs in government."

BLM, SEALASKA CELEBRATE LAND TRANSFER. The [Juneau \(AK\) Empire](#) (3/7, 14K) reports that "Sealaska received 70,000 acres of the Tongass National Forest in a land transfer Friday, culminating decades of negotiations." Bud Cribley, director of the Alaska division of the BLM, "attended the ceremony that finalized a 375,000-acre entitlement under the 1971 Alaska Native Claims Settlement Act." Cribley said, "This is important from a historic standpoint of the significance of that act."

Also reporting on the story is [KTOO-FM](#) Juneau, AK (3/8).

ENVIRONMENTALISTS WANT ACTION ON NEVADA RANCHER BUNDY. The [High Country \(CO\) News](#) (3/8, 74K) provides an update on "rancher scofflaw Cliven Bundy." In the year since his confrontation with the BLM, "Bundy has gone from being just a rancher who wouldn't pay his fees, to a lasting political figure that the far-right anti-federal government set continues to coalesce around." The article notes that "by all accounts, Bundy still has not been charged for the trespassing cattle or the unpaid fines." It adds that "every day that passes without a federal government move to prosecute Bundy is a day that he and his followers are emboldened."

EXPERTS EXPECT TOUGH WILDFIRE SEASON IN OREGON. The [AP](#) (3/8) reports that "fire bosses in Southern Oregon are bracing for a season that could start earlier, last longer and burn hotter than usual in a part of the world known for major summer fires." Allen Mitchell, fire management officer for the Medford District of the BLM, said, "It seems inevitable. It will depend on lightning." The article also notes that "the snowpack in the mountains is at a record low in the southern part of the Cascade Range and the Siskiyou Mountains, and the region is in the second year of drought."

SCENIC DESIGNATION SOUGHT FOR CROOKED RIVER ROAD. The [AP](#) (3/8, Estes) reports that "leaders in Prineville have submitted applications for portions of state Highway 27, which runs through the Crooked River Canyon, to be listed as an Oregon scenic bikeway and scenic driving route." Greg Currie, a land use planner with the BLM and one of the projects' leaders, said, "You look at the scenic bikeway map, and there's a hole in the middle where Prineville and Crook County are. Part of the (reason) for doing this is that a lot of people use (the state's scenic bikeways and scenic byways) when they're exploring. The Crooked River and Highway 27 are incredibly scenic and really fit into that concept."

Also reporting on the story is the [Eugene \(OR\) Register-Guard](#) (3/8, 172K).

PINYON TRAIL SET TO OPEN IN NEVADA. The [Reno \(NV\) Gazette-Journal](#) (3/7, 168K) reports that "the grand opening is just days away for the newly built Pinyon Trail near Gardnerville." In an announcement, the BLM said, "The Pinyon Trail is a hand-constructed, non-motorized single track trail open to hikers, mountain bikers, equestrians and dogs." The BLM said that the Pinyon Trail set to officially open March 14.

IDAHO SENATE COMMITTEE APPROVES PLAN TO EXCLUDE FEDERAL MINERAL RIGHTS. The [AP](#) (3/8) reports that "an Idaho Senate committee has sent to the full Senate a bill giving state officials the option of excluding the federal government's mineral rights from areas that contain natural gas and oil." The Senate Resources and Environment Committee on Friday passed "the industry-backed bill that has already passed in the House." According to the article, "if it becomes law it will give the five-member Idaho Oil and Gas Conservation Commission the option to exclude federal mineral rights if the federal government fails to grant leases." Supporters "say the state needs that option because the US Bureau of Land Management is halting development by failing to offer leases in western Idaho where the nascent industry is moving forward."

ADDITIONAL COVERAGE ARCHAEOLOGISTS DISCOVER ANCIENT STONE TOOL IN OREGON. Additional coverage of the tool discovered by archaeologists in Oregon was provided by the [Washington Post](#) (3/6, Larimer, 5.17M), the [Dalles \(OR\) Chronicle](#) (3/7, 14K), and the [Daily Mail \(UK\)](#) (3/8, 4.78M).

Fish and Wildlife Service:

FWS BAN IMPORTS OF FOUR SNAKE SPECIES. The [AP](#) (3/8) reports that "four large constrictor snakes will be illegal to import or move across state lines, the federal government said Friday, while stopping short of including the popular boa constrictor among the banned." The FWS "announced the 'injurious wildlife' status of three species of anacondas and one type of python it fears could one day take hold in the Everglades, where giant non-native snakes have overwhelmed the ecosystem, killing and swallowing whole animals as large as deer and alligators. t piggybacks on similar action three years ago for four other types of big snakes." FWS Director Dan Ash said, "We're taking that preventative step to keep another ecological disaster from happening."

[The Hill](#) (3/8, Cama, 224K) reports that Ashe said, "Large constrictor snakes are costing the American public millions of dollars in damage and placing at risk 41 federally and state-listed threatened or endangered species in Florida alone."

The [New York Times](#) (3/6, 9.97M) reports that "the Center for Biological Diversity, a conservation group, expressed disappointment with the decision to drop the boa from the list." Collette Adkins, an attorney and biologist at the center focusing on the protection of reptiles and amphibians, said, "Unfortunately, it appears that the agency caved to pressure from snake breeders in its decision not to restrict trade in the boa constrictor — a snake that is clearly damaging to US wildlife."

Coverage by the AP was also picked up by the [Houston Chronicle](#) (3/6, Sedensky, 2 28M) and the [Washington Post](#) (3/6, 5.17M).

Also reporting on the story are the [Miami Herald](#) (3/8, 694K), the [Palm Beach \(FL\) Post](#) (3/8, 397K), the [Florida Today](#) (3/6, 178K), [Bloomberg](#) (3/8, 2.94M), the [National Monitor](#) (3/8), the [International Business Times](#) (3/8, 1.19M), and the [Tech Times](#) (3/7).

OKANOGAN COUNTY MAY SUE TO STOP GRIZZLY RESTORATION. The [Salem \(OR\) Capital Press](#) (3/6, 113K) reports that "Okanogan County commissioners are exploring the possibility of a lawsuit to prevent the US Department of Interior from restoring grizzly bears to the North Cascades." According to the article, "the county was talking to state legislators in Olympia about its options after the National Park Service and US Fish and Wildlife Service held open houses in Winthrop on March 3 and in Okanogan on March 4 to help them determine whether to take an active role in grizzly restoration." Commissioners "strongly oppose restoration and say a majority of county residents do."

DETROIT RIVER INTERNATIONAL WILDLIFE REFUGE EXPANDING. The [AP](#) (3/7) reports that the Tishkof Tract in Berlin Township in Monroe County is "becoming part of the Detroit River International Wildlife Refuge." According to the article, "the property is adjacent to the refuge's Brancheau Unit and was among land deemed highest priority for conservation and inclusion in the refuge." The article notes that "it contains southern hardwood swamp habitat, mixed wet prairie and shrub habitat as well as Great Lakes marsh habitat."

NATIONAL YOUTH SCIENCE FOUNDATION RECEIVES APPROVAL TO ACQUIRE FACILITY. The [AP](#) (3/8) reports that "the National Youth Science Foundation has received federal approval to acquire a research and education center in Tucker County." The FWS also had "proposed acquiring the facility."

FIVE NATIONAL FORESTS IN MONTANA MOVE TO MANAGE HABITAT FOR DELISTED GRIZZLIES. The [Helena \(MT\) Independent Record](#) (3/8, 38K) reports that "to deal with that growing population and territory, as well as the potential that grizzlies could soon be removed from the federal endangered species list," five national forests in the Northern Continental Divide Ecosystem are "considering a single habitat management plan that would keep all the US Forest Service folks on the same page, bear-wise." On Friday, officials from the Flathead, Lolo, Bitterroot, Lewis and Clark and Helena National forests "released a draft forest plan amendment that would guide all their staffs on grizzly bear habitat issues."

WYOMING UNDERTAKING NEW STUDIES OF WOLVERINES, BOREAL TOADS. The [AP](#) (3/8) reports that "wildlife species in Wyoming that aren't the target of hunters and anglers will be getting a closer look from researchers, ranging from a wolverine mapping project to a study of grazing impacts on boreal toads." According to the article, "a \$158,000 grant that will go to the Wolverine Initiative will allow biologists to research the distribution of female wolverines in Wyoming." Also, "another \$160,000 will go toward research headed by a University of Wyoming master's student who will be studying boreal toad habitat selection and survival in relation to grazing intensity."

UTAH APPROVES MANAGEMENT PLAN FOR UTAH PRAIRIE DOG. The [Salt Lake \(UT\) Tribune](#) (3/8, 405K) reports that "the Utah Wildlife Board approved the first management plan for the Utah Prairie Dog this week." According to the article, "under pressure from southern Utah towns and a federal court judge, the Utah Division of Wildlife Resources was forced to come up with a management plan for dogs found on non-federal lands." Under the plan, "wildlife managers would be able to 'take' or kill a maximum of 6,000 Utah prairie dogs annually to protect 'human safety, development and agricultural/rangelands conflicts.'"

INLAND EMPIRE WATER AGENCIES HOPE TO SAVE SANTA ANA SUCKER. The [San Bernardino \(CA\) Sun](#) (3/7, 101K) reports on a mission to save the Santa Ana Sucker in order to "help Inland Empire water agencies more easily get federal permits to get water to their customers." According to the article, "the 10 partners in the project, primarily water utilities in San Bernardino and Riverside counties, have teamed up for what is being called the Upper Santa Ana River Habitat Conservation Plan, a strategy to protect threatened species so the water needs of people can be met."

ADDITIONAL COVERAGE REHABILITATED MANATEE RELEASED. Additional coverage of the release of the rehabilitated manatee named Trinidad was provided by the [Washington Post](#) (3/8, 5.17M).

DEBATE OVER GRAY WOLVES CONTINUES. In an op-ed for the [Milwaukee Journal Sentinel](#) (3/8, 699K), Elizabeth Huntley, a member of the Sierra Club John Muir Chapter's Protecting Native Forests & Wildlife Subcommittee, writes that "within hours of US Fish & Wildlife's decision to delist the gray wolf from the Endangered Species Act in Wisconsin, legislators and Gov. Scott Walker signed off on one of the most extreme wolf hunting bills ever created by any state, Wisconsin Act 169." She claims that "any congressional rider or bill that promotes the legislative delisting of wolves will place not only wolves, but also the entire Endangered Species Act in jeopardy." Huntley concludes that "this legislation, if passed, would be disastrous for wolves — and betray the American public, which placed its faith on the science-based principles of the Endangered Species Act."

In an op-ed for the [Milwaukee Journal Sentinel](#) (3/8, 699K), Rep. Reid Ribble writes that "allowing trained professionals to make decisions based on years of research is the best path forward in achieving that goal, and my legislation, HR 884, would do just that."

PROTECTION OF BAT SPECIES URGED. The [Detroit Free Press](#) (3/7, 987K), Amy L. Russell, an associate professor of biology at Grand Valley State University, Allen Kurta, a professor of biology at Eastern Michigan University, Philip Myers, professor emeritus of ecology and evolutionary biology at the University of Michigan, and Maarten Vonhof, an associate professor of biological sciences and environmental and sustainability studies at Western Michigan University, write that "few species in the United States are facing greater extinction pressure than northern long-eared bats." They say that "after an exhaustive review of the facts, the US Fish and Wildlife Service wisely decided last October to propose designating the northern long-eared bat as endangered." But "following intense criticism from logging and mining industries and state natural resource agencies, the service hit the pause button, postponing until April its final decision on protecting the species."

Securing America's Energy Future:

Renewable Energy:

NORTH CAROLINA WANT WIND FARMS FARTHER OFFSHORE. The [Charlotte \(NC\) Observer](#) (3/8, Henderson, 584K) reports that "North Carolina's environment secretary has urged a federal agency not to sell wind energy leases within 24 miles of the state's coast, a limit that advocates say would largely block wind farms." The Sierra Club

"circulated the Feb. 23 comments of N.C. Department of Environment and Natural Resources Secretary Donald van der Vaart to the federal Bureau of Ocean Energy Management." Brian O'Hara of the Southeastern Wind Coalition said, "The practical effect would be that North Carolina would not see any offshore wind development for quite a while."

Also providing coverage are the [Columbia \(SC\) State](#) (3/7, 291K) and the [Raleigh \(NC\) News & Observer](#) (3/8, 395K).

OPPOSITION AGAINST SODA MOUNTAIN SOLAR PROJECT BUILDS. [KCET-TV](#) Los Angeles (3/8, 15K) reports that "a proposed solar power plant that some opponents are calling 'the worst renewable energy project currently under consideration' in California just found itself some significant opposition, as a public committee charged with advising the Bureau of Land Management on desert issues agreed to oppose the project." The article notes that "in a nearly unanimous vote with just one member abstaining, the BLM's Desert District Advisory Committee agreed at its February 28 meeting to recommend that the BLM say no to the proposed 350-megawatt Soda Mountain Solar project, which would occupy almost 4,200 acres of land adjacent to the Mojave National Preserve near Baker."

EXPERTS SAY HURON TURBINES COULD KILL THOUSANDS OF BATS. The [Huron \(MI\) Daily Tribune](#) (3/8, 19K) reports that "to clear the air on what some county officials called a 'wishy-washy' stance, US Fish and Wildlife biologists visited Huron County on Wednesday to affirm that wind turbines should not be sited within three miles of Great Lakes shorelines." Jeff Gosse and Scott Hicks of the FWS "presented results of a Huron County study funded by the Great Lakes Restoration Initiative, conducted in 2011 and 2012, to county commissioners and planners in two separate meetings on Wednesday." According to Gosse, "two theories could be contributing to bat kills at wind parks: direct contact with turbine blades and barotrauma — a pressure drop near the tip of a blade that causes ruptured lungs."

CONTINUING COVERAGE OF DESERT RENEWABLE ENERGY CONSERVATION PLAN. In an editorial, the [Palm Springs \(CA\) Desert Sun](#) (3/7, 85K) urges state and federal officials working on the Desert Renewable Energy Conservation Plan "to take their time to get it right." According to the paper, "reaction to the draft has been such that the prudent course would be for the state and federal officials charged with creating such a grand plan to step back and reassess what has been done so they get it right."

In an op-ed for the [Palm Springs \(CA\) Desert Sun](#) (3/7, 85K), David Lamfrom, associate director of the California Desert for the National Parks Conservation Association, writes that many of the comments received on the draft plan reflect "the universal agreement that the plan needs improvement and demonstrates the ever-increasing understanding and appreciation of our deserts." He concludes that "now that the public comment period has closed, the opportunity to produce a plan that honors the desert and protects its legacy now rests squarely on the shoulders of the Interior Department and California Energy Commission."

Onshore Energy Development:

OBAMA CRITICIZES KEYSTONE XL, CANADIAN OIL SANDS. [The Hill](#) (3/7, Byrnes, 224K) reports in its "Briefing Room" blog that President Obama "on Friday ratcheted up his criticism of the Keystone XL oil pipeline, days after the Senate failed to override his veto of legislation approving the project." At his town hall meeting at Benedict College in Columbia, South Carolina, Obama said, "The truth is it's Canadian oil that's then going to go to the world market. It will probably create about a couple thousand construction jobs for a year or two, but only create about 300 permanent jobs." The President added environmentalists are concerned about the pipeline because "the way that you get the oil out in Canada is an extraordinarily dirty way of extracting oil. And, obviously, there are always risks in piping a lot of oil through Nebraska farmland and other parts of the country."

[Reuters](#) (3/7, Edwards) reports Obama said he has not yet "made a final determination on it, but what I've said is, 'We're not going to authorize a pipeline that benefits largely a foreign company if it can't be shown that it is safe and if it can't be shown that overall it would not contribute to climate change.'"

Tanker Car Accidents Raising Questions About Safety Of Model. The [AP](#) (3/7) reports that after a BNSF train hauling Bakken crude had 21 of its 105 tanker cars derail with five cars bursting into flames, new questions are being asked about the safety of a newer model of tanker car known as the 1232. The AP says while no one was hurt in Thursday's derailment near Galena, Illinois, the "accident was the latest in a series of failures for the safer tank-car model that has led some people calling for even tougher requirements." The accident comes on the heels of a huge explosion from a derailed oil train in West Virginia in February which also had the upgraded tanker cars. Two other tanker train accidents have happened in 2015 involving the 1232 model cars that have split open.

WSJournal: Keystone Veto Vote Represented Bipartisan Opposition To Obama's Policy. In an editorial, the [Wall Street Journal](#) (3/7, Subscription Publication, 5 67M) characterizes the Senate's failed attempt to override President Obama's veto of legislation authorizing the Keystone XL pipeline as a bipartisan criticism of the President.

ADDITIONAL COVERAGE INTERIOR ORDERED TO REVIEW APPROVAL OF NAVAJO MINE EXPANSION. Additional coverage that "A federal judge in Colorado said the environmental impacts of coal combustion should have been more thoroughly explored in a proposal to expand strip mining at the Navajo Mine" was provided by the [Farmington \(NM\) Daily Times](#) (3/8, 49K) and the [Native American Times](#) (3/8, 337).

Offshore Energy Development:

BIOLOGISTS EXAMINE SAND SHOALS' ROLE IN THE ECOLOGY. [Florida Today](#) (3/9, Waymer, 178K) reports how biologists are examining "how a variety of wildlife — invertebrates to large fish — use offshore sand shoals and how the ecological functions of those shoals might change after dredging." While Bureau of Ocean Energy Management funds research off Cape Canaveral, the article notes that the Kennedy Space Center funding similar research "within KSC's boundaries." Douglas Scheidt, KSC's lead aquatic biologist, was mentioned in the article for his role in the studies.

FORMER USGS SCIENTIST AT CENTER OF URANIUM CONTROVERSY. The [Sioux Falls \(SD\) Argus Leader](#) (3/7, 116K) reports on a presentation by Ray Johnson, a scientist with the USGS "who had been studying the Dewey-Burdock site on behalf of the Environmental Protection Agency." According to the article, "Johnson's half-hour presentation left mining opponents questioning whether he and the federal government were on the side of Powertech." Johnson "left the federal government shortly after his study of the Dewey-Burdock site was finished. He now works as a scientist for a company in the uranium industry."

CONTINUING COVERAGE OF OFFSHORE DRILLING PROPOSAL. The [Houma \(LA\) Courier](#) (3/6, 39K) reports that "local and national groups are coming together to support the expansion of the lease sales in the Gulf of Mexico." The groups are submitting public comments on the 2017-2022 proposed Outer Continental Shelf Oil and Gas Leasing Program. The article notes that "the South Central Industrial Association, National Ocean Industries Association and the Louisiana Mid-Continent Oil and Gas Association have submitted letters and are calling for other letters of support by March 30 when the public comment period ends."

On the other hand, the [Delmarva \(MD\) Daily Times](#) (3/6, 3K) reports that "with the proposed plan allowing one offshore oil and gas drilling lease in the Atlantic, a local group is taking the chance to protest and get out the message 'Don't BP my Assateague.'" Assateague Coastal Trust is "concerned with the impacts of a potential large oil spill, as well as many other problems it says are associated with offshore drilling, such as damage to marine wildlife from seismic airgun testing, which is used to detect wells, trash from oil rigs and small oil spills."

The [Charleston \(SC\) Post and Courier](#) (3/7, 295K), Rep. Jeff Duncan, Bob Coble, the former mayor of Columbia, and James Knapp, Ph.D., a professor of Earth & Ocean sciences at the University of South Carolina, write that "offshore energy exploration and production could be an economic game changer for South Carolina, providing our citizens with the jobs and state revenue we need to prosper and succeed into the future." They say that "South Carolina needs jobs and increased tax revenue to pay for education, infrastructure, and conservation needs."

LAWMAKERS URGE OBAMA ADMINISTRATION TO DROP GULF OF MEXICO ENERGY SECURITY ACT PROPOSAL. The [Opelousas \(LA\) Daily World](#) (3/6, 26K) reports that "Louisiana Sens. David Vitter and Bill Cassidy wrote to President Barack Obama this week urging him not to pursue a plan to steer millions in oil and gas revenue away from Gulf Coast states." In their March 4 letter, Vitter and Cassidy said, "We not only oppose and reject your budget proposal eroding the revenue sharing provisions in GOMESA, but will actively pursue efforts to minimize the disparity by bringing equal treatment in revenue sharing among energy-producing states." Sens. Roger Wicker of Mississippi, Lisa Murkowski of Alaska, Jeff Sessions of Alabama and John Cornyn and Ted Cruz of Texas, all Republicans, also signed the letter.

Also providing coverage are the [Shreveport \(LA\) Times](#) (3/6, 110K) and the [Jackson \(MS\) Clarion Ledger](#) (3/6, 222K).

BP HALTS EFFORTS TO OUST DEEPWATER HORIZON SPILL CLAIMS ADMINISTRATOR. The [AP](#) (3/9) reported that on Friday in a filing with the 5th US Circuit Court of Appeals, BP said it has ended its efforts to oust embattled Deepwater Horizon spill claims administrator Patrick Juneau. BP had in court previously alleged that Juneau mismanaged claims and said he "failed to disclose an alleged conflict of interest prior to taking the administrator job."

[Bloomberg News](#) (3/6, Barrett, 2.94M) suggested BP's switch of "legal strategies" in the Deepwater Horizon case is an effort "in part, to mollify a federal judge in New Orleans who could sock BP with an enormous judgment in an environmental suit filed by the U.S. government."

The [Houston Chronicle](#) (3/6, Eaton, 2.28M) noted comment from BP America chair John Mingé, who in a statement said, "This marks the beginning of a new and more productive relationship between BP and the claims program. We appreciate the work that has been done to develop and implement improved processes to, among other things, detect and prevent the payment of fraudulent claims." Mingé added, "We agree with Mr. Juneau and the claims facility the goal of compensating the people and businesses of the Gulf under

the terms of the settlement agreement." [Reuters](#) (3/6, Stempel) and the [New Orleans \(LA\) Times-Picayune](#) (3/8, Larino, 621K) also covered the story.

ADDITIONAL COVERAGE MARINE SCIENTISTS WARN ABOUT SEISMIC TESTING. Additional coverage that "proposed seismic testing for oil and gas beneath the Atlantic Ocean floor is likely to have significant, long-lasting, and widespread impacts on the reproduction and survival of fish and marine mammals, scientists warned last week in a letter to President Barack Obama" was provided by the [Summit County \(CO\) Citizens Voice](#) (3/8, 506) and [Salon](#) (3/6, 688K).

ADDITIONAL COVERAGE OF ARCTIC DRILLING ANALYSIS. Additional coverage of the Interior Department's analysis of Arctic drilling released in February was provided by [Salon](#) (3/8, 688K).

[Tackling America's Water Challenges:](#)

NEBRASKA, KANSAS AND COLORADO SIGN WATER AGREEMENT. The [McCook \(NE\) Daily Gazette](#) (3/8, 18K) reports that Colorado, Kansas and Nebraska, along with the BOR, "have reached an agreement that will ensure more certainty to the basin's water users in both Nebraska and Kansas." According to the article, "the agreement, signed through the Republican River Compact Administration (RRCA), was achieved through collaborative negotiations that began in January 2015 and will provide timely access to water for the 2015 irrigation season."

CONTINUING COVERAGE OF CALIFORNIA WATER MANAGEMENT. The [Fresno \(CA\) Bee](#) (3/7, 323K) reports that "in the withering California drought, 15 water districts will deliver precious irrigation supplies to Kern County growers while 15,000 farmers face summer without their Millerton Lake allotments — a confusing repeat of last year." The article notes that "the Kern growers buy from the State Water Project" while "the east-siders and west-siders buy from the federal Central Valley Project."

[Empowering Native American Communities:](#)

INTERIOR TO HOLD LISTENING SESSION ON BUY BACK PROGRAM IN ARIZONA. The [Nation Sun News](#) (3/3) reports that the Interior Department will "hold a listening session this month on the Land Buy-Back Program for Tribal Nations." Deputy Secretary Michael Connor will lead the session, which will take "place March 19 at the Vee Quiva Hotel on the Gila River Indian Community in Arizona." Connor said, "The department is collaborating with tribes through nation-to-nation partnerships built on mutual trust and respect, and that uphold the sovereignty of tribal nations. The Buy-Back Program is an exceptional opportunity that cannot be taken for granted. Together with tribal leaders, we are seeking to constantly improve the program. And, importantly, we are focused on ensuring that landowners are aware of the program and are given every opportunity to make informed decisions about the potential sale of their land at fair market value."

Also providing coverage is a clip on [YouTube](#) (3/8, 46 32M).

TRIBES APPROVE PAY INCREASE FOR LAND BUY BACK PROGRAM. The [Fort Peck \(MT\) Journal](#) (3/4) reports that "the Tribal Executive Board approved of increasing the pay significantly for the Land Buy Back Program." Under a resolution, the council "authorized Human Resources Director Yvonne Bushay to write a prepared resolution that will exempt the temporary Outreach workers from the Tribal Classification System based on the fact that Outreach workers, Lead Outreach worker, and the Outreach Director are temporary one-year employees and the funding for these positions must be spent within a year."

BILL ADDRESSES INDIAN COUNTRY'S AGING IRRIGATION PROJECTS. The [Indian Country Today Media Network](#) (3/6, 49K) reports that "water projects that have, for too long, lacked adequate funding from the federal government are receiving attention in a bi-partisan bill addressed in a hearing by the Senate Committee on Indian Affairs on March 4." The Irrigation Rehabilitation and Renovation for Indian Tribal Governments and Their Economies Act (the RRRIGATE Act), S.438, would "hold the federal government accountable for addressing the growing maintenance backlog of aging Indian irrigation projects originally initiated by the government in the late 1800s and early 1900s throughout the west."

[Office of Insular Affairs:](#)

ASSISTANT SECRETARY KIA'AINA TO MAKE FIRST OFFICIAL VISIT TO MARSHALLS. The [Marianas Variety](#) (3/8) reports that Interior Assistant Secretary for Insular Areas Esther Kia'aina will "visit the Republic of the Marshall Islands or RMI from March 10 to 13, 2015, to meet with Marshall Islands President Christopher Loeak, cabinet ministers and other government officials, including the mayors of the four nuclear-affected atolls: Bikini, Rongelap, Enewetak, and Utrik." Kia'aina said, "The Republic of the Marshall Islands is one of the United States' closest allies. The bond we share with the Marshall Islands is demonstrated by the Compact of Free Association and our shared democratic values. We also share commitments to improve effectiveness of Compact health and education grant funding and to address immediate threats from climate change as well as from non-communicable diseases, among other issues."

FUNDS RELEASED FROM OFFICE OF INSULAR AFFAIRS CAPITAL IMPROVEMENT PROJECT PROGRAM. The [Marianas Variety](#) (3/8) reports that Interior Assistant Secretary for Insular Areas Esther Kia'aina "released last week over \$12 million in grant funding under the Office of Insular Affairs capital improvement project program for completion of the power plant oil pipeline and Puerto Rico dump closure infrastructure projects in the Commonwealth of the Northern Mariana Islands." Kia'aina said, "These funds will help the CNMI address federal environmental and public health compliance issues for two important projects while improving quality of life for the people of the Northern Marianas. Both projects have received prior year monies and we are very pleased that this final round of grants bring both to completion."

[Top National News:](#)

OBAMA US WILL "WALK AWAY" IF IRAN DEAL LACKS ADEQUATE VERIFICATION. Coverage of President Obama's interview on [CBS' Face The Nation](#) generally cast it in the context of his disagreement over Iran with Israel's Benjamin Netanyahu — who in fact followed Obama on the CBS broadcast. Reports featured comments from lawmakers from both parties — though mainly Republicans — who continued to take issue with a potential nuclear deal with Iran and said Congress must have a voice in approving or rejecting it. As the [New York Times](#) (3/9, Baker, Subscription Publication, 9,97M) puts it this morning, "many Republicans and some Democrats share Mr. Netanyahu's concerns and have been crafting legislation intended to give Congress a say in whether an agreement would be satisfactory." ABC World News, the only network newscast that aired last night, did not touch on the story.

In what [CBS' Face The Nation](#) (3/8, Plante, 2.64M) host described as "his clearest language yet" on the Iran talks, the President said of the talks, "We've made progress in narrowing the gaps, but the gaps still exist. And I would say that over the next month or so we're going to be able to determine whether or not their system is able to accept what would be an extraordinarily reasonable deal if, in fact as they say, they are only interested in peaceful nuclear programs, and if we had unprecedented transparency in that system, if we are able to verify that, in fact, they are not, then there's a deal to be had. But that's going to require them to accept the kind of verification and constraints on their program that so far have not been willing to say yes to." Asked if he's "willing to walk away" if there is no deal, the President said, "Absolutely. No deal, then we walk away."

Appearing on [CBS' Face The Nation](#) (3/8, Schieffer, 2.64M) immediately after the interview with the President was aired, Netanyahu said, "I respect President Obama. ... We share the same goal of preventing Iran from getting a nuclear weapon, but disagree how to do it." Asked if he trusts the President "to make the right decision," Netanyahu said, "I think this is not an issue, a personal issue, not one of trust. It's a matter of survival, really. ... I think there's a better deal. The better deal is to increase the break out time and limit Iran's infrastructure. Secondly, to condition the lifting of restrictions on Iran's nuclear program in the future, to change in Iran's behavior, to have it stopped worldwide terrorism. I think that is a better deal." Netanyahu, the [Washington Times](#) (3/9, Richardson, 644K) reports, also said "that 'troubling questions' are raised if reports are accurate that the White House is offering Arab states a 'nuclear umbrella' to protect them from Iran."

Israeli Ambassador to the US Ron Dermer, meanwhile, said on [CNN's State Of The Union](#) (3/8, Smerconish, 420K), "We're not in the negotiating room. ... What [Netanyahu] was telling the leading powers of the world" is "the deal that's currently on the table is a very bad deal. In order to make that deal a better deal, you have to extend the break, which is to leave Iran with less infrastructure. The second thing is you have to link the removal of restrictions on Iran's nuclear program to a change in Iran's behavior. They have to stop their aggression in the region, stop terrorism around the world and stop trying to destroy Israel. If you link that together then we can be sure that when those restrictions are removed Iran is a different country and won't be the same country as today."

The [AP](#) (3/9) reports "big gaps remain to bridge if the sides are to reach a deal by the end of [the] March deadline set by negotiators," with "the next round of talks" scheduled for March 15. GOP lawmakers, as well as a couple of significant Democrats, continued to call for a role for Congress in approving or rejecting the eventual agreement. Sen. Chuck Schumer said on [CBS' Face The Nation](#) (3/8, Schieffer, 2.64M), "Before there is an agreement, if there is an agreement...Congress has right to weigh in. I support it." Sen. Bill Nelson said on [Fox News Sunday](#) (3/8, Wallace, 788K) that he supports a congressional vote on a possible deal, but stressed that whether or not he will "vote to override depends on the context of the whole deal, which we don't know until...the Administration...announce[s] if their negotiations are successful or not." But Nelson stressed that the "key" of a potential deal will be what he called "intrusive and unannounced inspections. ... The only way you're going to make sure that they are not developing a bomb, is the intrusive and unexpected inspections. That's what's going to be key."

Senate Majority Leader McConnell said on [CBS' Face The Nation](#) (3/8, Schieffer, 2.64M), "The fact that the President doesn't want Congress to participate in this underscores

what a bad deal it is. He's afraid that we might not approve it. So I'm very worried about it. And I hope that the President will not make the bad deal that we anticipate he's going to make." [USA Today](#) (3/9, Kelly, 10 32M) notes McConnell also "said he is working to put together a veto-proof majority to support a measure giving Congress the authority to approve or disapprove of any deal." Said [McConnell](#) (3/8, Schieffer, 2.64M), "The Chairman of the Foreign Relations Committee has propos[ed]...for the deal to come before Congress for approval. The President has threatened to veto. He doesn't want us to have any role to play in this. I'm hoping we get 67 senators to assert the historic role of the Senate and the Congress in looking at matters of this magnitude." [Reuters](#) (3/9) notes that McConnell also said Obama "cannot work around Congress forever."

Sen. Lindsey Graham said on [NBC's Meet the Press](#) (3/8, Todd, 3 08M), "When they say they're not trying to build a bomb, I think they're lying. So I much rather not have a deal than lock in place what would be a eventually a North Korean outcome. So a bad deal is off the table, no deal is better than a bad deal." Graham added, "The Iranians are a regime that cannot be trusted and at the end of the day, Congress should approve any deal...and I believe there is growing bipartisan support that sanctions should not be lifted unless Congress agrees."

Running similar accounts of yesterday's Obama interview and highlighting the comments by Netanyahu, McConnell, and Graham were [Bloomberg News](#) (3/8, Keane, Sink, 2.94M), [New York Times](#) (3/9, Baker, Subscription Publication, 9.97M), [AP](#) (3/9), [Reuters](#) (3/9), [Huffington Post](#) (3/8, Delaney, 281K), [The Hill](#) (3/8, Byrnes, 224K), [Christian Science Monitor](#) (3/8, 380K), and [New York Daily News](#) (3/8, Delman, 3.79M), among other news outlets.

Also appearing on television yesterday was Sen. Ron Johnson, who told [Fox News Sunday](#) (3/8, Wallace, 788K) that he hopes Congress will get to vote on any possible deal with Iran. Johnson said, "The Iranian parliament will get to say yes or no on this deal. I think the United States Congress should have that same input into the process." Johnson went on to say that "this deal, as it's being described, with a sunset provision doesn't stop nuclear proliferation. It will probably hasten it. ... So this is a bad deal. I agree with Prime Minister Netanyahu."

Sen. John Barrasso said on [Fox News Sunday Morning Futures](#) (3/8, Bartiromo), "I think people all around the world know that a world where Iran has a nuclear weapon is a world that is less safe, less stable and less secure. My concern is the President is so eager for any deal that he will go with a bad deal." He added that if negotiators fail to reach a deal by the March 24 deadline, "We need to put sanctions back. ... Sanctions are what brought Iran to the table in the first place. They need the money for their economy and also for their appetite. They're funding efforts in Yemen, Hezbollah, Hamas. Anything we can do to hold their money I think holds their feet to the fire."

Netanyahu Defends Address To Congress; Feinstein Calls It "Humiliating" And "Very Arrogant." Appearing on [CBS' Face The Nation](#) (3/8, Schieffer, 2.64M), Netanyahu defended his decision to address Congress, saying, "I knew it would be difficult," but I "certainly didn't mean any disrespect to the President or anyone else. But I came because, as prime minister of Israel, I felt obligation to speak before Congress, which may have important role in this deal before the deal is signed. To alert them to what I think are enormous dangers to Israel and the region and to the world with the impending deal."

The [New York Times](#) (3/9, Baker, Subscription Publication, 9.97M) reports "Netanyahu's outspokenness continued to divide Washington." Sen. Dianne Feinstein said on [NBC's Meet the Press](#) (3/8, 3.08M), "I think that [what].. Netanyahu did here was something that no ally of the United States would have done. I find it humiliating, embarrassing and very arrogant, because this agreement is not yet finished, to trash it before you have the final period on it, before you know what it is, I think it is a huge error in judgment for our number one ally in that area."

Asked if he wished he had informed the White House of the invitation to Prime Minister Netanyahu, Israeli Ambassador to the US, Ron Dermer said on [CNN's State Of The Union](#) (3/8, Smerconish, 420K), "Hindsight is 20/20. We regret partisanship before the speech. That was the last thing we wanted to do was inject Israel into.. partisan debate." Asked if the invitation was Speaker Boehner's idea or his, Dermer said, "Speaker Boehner called me and I assumed that he was going to inform the White House. ... I hope that now we can get beyond the protocol, beyond the politics, and we can talk a little bit about the substance because it's a serious issue."

Senate Majority Leader McConnell said on [CBS' Face The Nation](#) (3/8, Schieffer, 2.64M), "I'm glad the Prime Minister came. We needed to hear from somebody to point out the problems with the deal that we anticipate will be made and also point out shouldn't ignore all Iran's other behavior unrelated to the nuclear program. ... This is a very, very dangerous regime."

Fareed Zakaria said on [CNN's Fareed Zakaria GPS](#) (3/8, 410K) that Netanyahu's speech "was eloquent, moving, and intelligent in identifying the problems with the potential nuclear deal with Iran, but when describing the alternative to it, he entered never-never land, painting a scenario utterly divorced from reality. Congress joined him on his fantasy ride." Zakaria argued that "the key to any agreement with Iran is to keep the cost of breakout high and the benefits low. This is the most realistic path to keeping Iran from becoming a nuclear weapons state."

USA Today Analysis: Like Israel, "Vital" Arab Allies Concerned About US Policies Toward Iran. [USA Today](#) (3/9, Michaels, 10.32M) reports that "Israel is not the only vital American ally in the Middle East increasingly alarmed that the US is working too closely with Iran. So are America's most important Arab partners," including "Saudi Arabia and other moderate Arab states who play vital roles as bulwarks against radical Islamists in the region." USA adds "that mistrust is already complicating Pentagon efforts to develop a moderate opposition in Syria to oust the Islamic State from Syria," and that "may inadvertently help keep Iranian-backed Syrian President Bashar Assad in power."

Kaine: Iran Already Using "Sanctions Relief" To Boost Its Regional Goals. The [Washington Times](#) (3/9, Scarborough, 644K) reports that in addition to being "on the verge" of a nuclear deal, "Iran is.. becoming a dominant military player in Iraq, rescuing the "Assad regime," "bringing down a US ally in Yemen and building its surrogate Hezbollah terrorist army into a political force." The nuclear deal, meanwhile, would lead to "sanctions relief, creating hard cash to fund its military and the foreign exploits of the Revolutionary Guard Corps' Quds Force." According to Sen. Tim Kaine, "Teheran already is capitalizing on limited sanctions relief by the Obama administration that has freed up more than \$2 billion in Iranian assets." Said Kaine, "They use dollars to carry out adventurism. Just from what I've heard, some of the sanctions relief already may have enabled them to invest more heavily in running Syria as a puppet state or invest more heavily in the Quds Force, or other agents that are destabilizing governments outside of their own borders."

ON 50TH ANNIVERSARY OF "BLOODY SUNDAY" MARCH, HOLDER CALLS FOR NEW VOTING RIGHTS ACT. Attorney General Holder used the 50th anniversary of the "Bloody Sunday" march in Selma to issue a call for a new Voting Rights Act. Coverage of the event this morning and on ABC World News, the one network news broadcast that aired Sunday evening, is universally positive. Print media analyses this morning, meanwhile, indicate Republicans are highly unlikely to agree to calls to update the Voting Rights Act. Moreover, as the [Washington Times](#) (3/9, Hallow, 644K) reports, no "high-profile potential Republican presidential contender" attended Sunday's events in Selma. While Sen. Rand Paul remained in his home state of Kentucky, "Jeb Bush, Chris Christie, Ted Cruz, Marco Rubio, Rick Perry, Mike Huckabee, Lindsey Graham and Scott Walker congregated in Iowa for the Agricultural Summit in Des Moines." The Times says Paul's absence "is particularly noteworthy because he differs in some basic ways from his potential nomination rivals in his approach to race and ethnic voters."

In an op-ed posted on [Alabama Live](#) (3/8, 502K) Sunday morning, Holder wrote that while the Act "has served as a vital protection for the sacred and unique American right to vote," the Supreme Court two years ago "delivered a major blow to these traditional efforts, and to voting protections generally, when it handed down a closely divided and deeply flawed decision that undermined Section 5 of the Voting Rights Act." Holder argued that since the ruling, his Department has "used the remaining provisions of the Voting Rights Act to fight back against voting restrictions in states throughout the country," but added that nation must honor the sacrifices of those who marched at Selma 50 years ago "by staying true to the principles for which they fought and by passing into law a new, reconstituted Voting Rights Act."

The [Los Angeles Times](#) (3/9, A1, Simmons, 3.49M) reports in a front-page story that during a memorial service on Sunday at Brown Chapel A.M.E. Church in Selma, Alabama to mark the 50th anniversary of the "Bloody Sunday" march, Holder "criticized voting restrictions pursued by conservative lawmakers and what he called the 'profoundly flawed' Supreme Court decision in 2013 regarding the Voting Rights Act," and "urged state legislatures to lift restrictions that currently disenfranchise millions of citizens convicted of felonies." [Alabama Live](#) (3/9, Edgemon, 502K) reported that during his remarks, Holder "said the civil rights activists 50 years ago were 'spurred by the murder of Jimmie Lee Jackson — an unarmed young black man,'" repeating "those words 'unarmed black man,' seemingly referring to 18-year-old black man, Michael Brown, who was gunned down by a white police officer in Ferguson, Mo. last year, which spurred protests and calls for change."

A brief report early in the broadcast on [ABC World News](#) (3/8, story 2, 0 25, Llamas, 5.84M) mentioned the weekend's events, and in the final report on the [ABC World News](#) (3/8, story 10, 1:55, Llamas, 5.84M) broadcast, Holder was shown saying, "Still, even now it is clear that we have more work to do, that our beloved community has not yet been formed and that our society is not yet at a just peace. We are no less determined and we will march on." Steve Osunsami reported that Holder was "preaching about the issue that led to that bloody Sunday in 1965. The obstacles that keep black voters from the polls."

[Reuters](#) (3/8) reports that a reenactment of the 1965 march was held on Sunday and some marchers planned to march to Montgomery on Monday along the route taken by Dr. Martin Luther King, Jr. and his followers in the wake of the "Bloody Sunday" march, and [USA Today](#) (3/9, Madhani, Jackson, 10.32M) reports that many who gathered to commemorate the march said much remains to be done because a number states "have passed more stringent voter ID rules" in the wake of the 2013 Supreme Court decision. Martin Luther King III told the crowd at Brown Chapel, "I am concerned because our voting rights have been decimated. ... We are a better nation than we are demonstrating."

The [New York Times](#) (3/9, Fausset, Subscription Publication, 9.97M) reports that during his visit to Selma on Saturday, the President said the Voting Rights Act, which was "the culmination of so much blood and sweat and tears, the product of so much sacrifice in the face of wanton violence," now stands "weakened, its future subject to partisan rancor," and called on Congress to "pledge to make it their mission to restore that law this year." A pair of opinion pieces praise the President's speech at Selma. In a piece for [Politico](#)

offered a warm rush of nostalgia for a movement whose teachability only grows as it becomes folded into the big American tent." In his column for the [New York Times](#) (3/9, Subscription Publication, 9.97M), Charles Blow writes that with his remarks in Selma, the President had to "balance celebration and solemnity, to honor the heroes of the past but also to motivate the activists of the moment, to acknowledge how much work had been done but to remind the nation that that work was not complete," and to "a large degree, he accomplished that goal."

However, [The Hill](#) (3/8, Lillis, 224K) reported in its "Floor Action" blog that President "probably shouldn't hold his breath" for Republicans to heed his call, as Republican leaders "have opposed new legislation updating the Voting Rights Act (VRA) in the wake of a Supreme Court ruling that gutted central provisions of the 1965 law." The Hill added that Republicans who attended the events on Selma over the weekend "showed no indication that the silver anniversary festivities had changed their minds."

[Politico](#) (3/8, Dove, 669K) reported that Democrats accused Republicans of hypocrisy on the issue, saying Republicans who went to Selma for the ceremony but "aren't prioritizing action back in Washington are frauds," and Republicans who did not attend the ceremony "like House Speaker John Boehner and most of the rest of the GOP congressional leadership — should be ashamed for not even making the effort." While many Democrats who attended the event "said they were hopeful that new voting legislation might have a chance, that Republicans might feel differently after attending the weekend's events," House Majority Leader Kevin McCarthy, who was the only House GOP leader to attend, "said that he didn't see acting on the VRA as the right way to move forward from Selma."

Senate Majority Leader McConnell was asked on [CBS' Face The Nation](#) (3/8, Schieffer, 2.64M) if Congress will restore the Voting

SECRETARY JEWELL APPEARS BEFORE HOUSE NATURAL RESOURCES COMMITTEE. [The Hill](#) (3/6, Cama, 224K) reports that during hearing with Interior Secretary Sally Jewell, Rep. Rob Bishop "on Thursday blasted the Interior Department's budget request, arguing it avoided confronting major problems while creating expensive, unnecessary programs." Bishop, chairman of the House Natural Resources Committee, said "the plan was 'really underimpressive' and that he 'found no idea in there that I consider creative or different or unusual.'" Bishop "criticized what he saw as 'just the same old, same old, raise taxes, raise fees, write more regulations and then throw money at a problem' in the \$13.2 billion budget request, including money to acquire new federal land while current property needs maintenance." On the other hand, Rep. Raúl Grijalva "welcomed the budget, pointing out that Interior, which leases land to energy production, proposes to bring more money in than it will spend."

Additional coverage was provided by [The Hill](#) (3/6, Kamisar, 224K).

Secretary Jewell Questioned On Wolf Protection. The [Agri-Pulse](#) (3/6) reports that Interior Secretary Sally Jewell is "standing by a proposal to de-list the gray wolf as an endangered species, but she stops short of endorsing legislation to overturn court orders that are keeping the animal under protection." The article notes that "legislation was recently introduced to finalize the de-listing." According to the article, "under questioning by one of the bill's cosponsors, Rep. Dan Benishek at a House Natural Resources Committee hearing Thursday, Jewell didn't endorse the measure (HR 884), but she said the administration would follow its directive if enacted." Jewell said, "Clearly we will uphold whatever laws are passed by Congress. My preference is certainly not to legislate the Endangered Species Act (ESA). But if Congress passed legislation certainly we will uphold the law."

Rep. Young Criticizes Protection Of Wolves. In its "In The Loop Blog," the [Washington Post](#) (3/5, tkowitz, 5.17M) reports that "Alaska Republican Rep. Don Young, famous for his salty tongue and brusque demeanor, suggested Thursday that if he let loose wolves in some congressional districts, they 'wouldn't have a homeless problem anymore.'" The article notes that "the strange comment was made during a halting five-minute exchange with Interior Secretary Sally Jewell during a House Natural Resources Committee hearing on her agency's budget." Young "accused her and her department of making decisions without consulting the states they'd affect."

The [Alaska Public Radio Network](#) (3/5, 2K) reports that "in a written statement afterward, Young said he was employing analogy and hyperbole to point out that wolves are a problem for communities that have them."

Also reporting on the story are the [Washington Post](#) (3/5, Kamen, Itkowitz, 5.17M), [CBS News](#) (3/6, 8.2M), the [Huffington Post](#) (3/6, Lavender, 281K), and the [Bayou Buzz](#) (LA) (3/6, 4K).

Secretary Jewell Questioned On Interior's Priorities. [KUAM-TV](#) Dededo, GUM (3/6, 171) reports that "as she did last week during the Interagency Group on Insular Areas Working Group, Congresswoman Madeleine Bordallo today during a House Committee on Natural Resources hearing questioned the Department of the Interior's priorities." Bordallo said, "Can you elaborate why the budget adds \$3 million for technical assistance grants and \$7 million for climate change funding yet decreases compact impact discretionary by nearly \$1.5 million over last years enacted level. Would you agree that we should perhaps all take a second look at this?" Jewell responded, "I agree that the relatively small amount in the discretionary part of the budget does not address the challenge but we have also heard from regions in the Pacific that they are really struggling with a number of other issues, struggling with how to deal with climate change, coastal erosion, invasive species so our budget reflects tough choices. And we welcome working with this body and you certainly as the budget goes through the process to assess what other opportunities there might be to address this issue."

CONTINUING COVERAGE SECRETARY JEWELL APPEARS BEFORE INTERIOR AND APPROPRIATIONS SUBCOMMITTEE. The [Alaska Native News](#) (3/6, 245) reports that Sen. Lisa Murkowski, Chairman of the Interior Appropriations subcommittee, "criticized the Interior Department's \$12.1 billion budget proposal for programs within the subcommittee's jurisdiction— including the over \$1 billion increase — for ignoring the statutory caps placed on Congress by the Budget Control Act." Murkowski also "pressed Interior Secretary Sally Jewell on a number of issues important to Alaska: Arctic infrastructure, offshore oil development, revenue sharing, tribal courts and the administration's commitment to Alaska's coastal communities."

Additional Coverage: Secretary Jewell: Decision Close On Shell Lease Suspension Request. Additional coverage that the Obama Administration will "decide soon whether to grant Royal Dutch Shell's request for extra time to hunt for oil in Arctic waters" was provided by [Seeking Alpha](#) (3/6, 573K) and the [Petro Global News](#) (3/6).

BROWNS CANYON NATIONAL MONUMENT DESIGNATION COMMEMORATED. The [Chaffee County \(CO\) Times](#) (3/6, 9K) reports that Friends of Browns Canyon met with White House officials in celebration last week to recognize the recent designation of Brown Canyon National Monument.

Meanwhile, the [Chaffee County \(CO\) Times](#) (3/6, 9K) reports that "responses were quick following a statement Thursday from Rep. Doug Lamborn regarding Browns Canyon." Lamborn said, "Contrary to Secretary (of the Interior Sally) Jewell's claims, there was not a sufficient amount of public input before the president unilaterally claimed it as a national monument." Friends of Browns Canyon Executive Director Keith Baker said he was "disappointed that Rep. Lamborn continues to be out of touch with his district and insists on making false claims about the long history of community input into the Browns Canyon National Monument."

Also reporting on the story is the [Mountain Mail](#) (3/6, 17K).

Browns Canyon Designation Lauded. For the "Ballot Box" blog of [The Hill](#) (3/6, Miller, 224K), Steve Miller, the owner-operator of New Wave Rafting, lauds the designation of Browns Canyon as a National Monument. He says that "protecting Browns Canyon is also good for business, not only for Colorado, but for outdoor outfitters and guide companies throughout the West, including here in northern New Mexico."

Additional Coverage Of Honouliuli Designation. Additional coverage of the Honouliuli designation was provided by [Hawaii Magazine](#) (3/6, 152K).

SEN. WYDEN CONTINUES PUSH FOR KLAMATH WATER SETTLEMENT. The [Klamath Falls \(OR\) Herald And News](#) (3/6, 45K) reports that Sen. Ron Wyden is "continuing to reinforce his commitment to the Klamath water settlements and has asked top resource managers to pledge theirs." During a Senate Energy and Natural Resources Committee hearing on February 25, Wyden "pointed out that resolution to Klamath Basin water conflicts is still a priority for Oregonians." Wyden asked Interior Secretary Sally Jewell, "We'll have to figure out how to ensure fair treatment for the Tribes. The Tribes have really stepped up on this issue. Can we count on your support and continued interest in this?" Jewell responded: "You certainly can. I want to compliment you and members of the Oregon delegation, as well as the unprecedented cooperation between the Tribes and the ranchers and interests that had been on different sides of the table coming together on the Klamath agreements. It would be a real shame if this does not get approved through Congress and done."

SENATE HOLDS HEARING ON OPPORTUNITIES IN US ARCTIC. The "Post Politics" blog of the [Washington Post](#) (3/6, Debonis, 5.17M) reports that on a snowy day in Washington, DC on Thursday, Sen. Lisa Murkowski held a hearing for the Senate Energy and Natural Resources Committee on "opportunities for the United States to build on its status as an Arctic nation." Much of the hearing focused "on 'resource development' in the Arctic – including the new opportunities for commerce created by historic low levels of sea ice in the Arctic Ocean and the Bering Sea." Murkowski said, "We can debate here in the Congress on the pro and cons of offshore development in the Arctic. ... But even if you suggest that we take that off the table, the reality is these activities in the Arctic will continue with or without the United States' involvement." Sen. Al Franken "questioned the wisdom of hailing new oil exploration opportunities while questioning the professor, Cecilia Bitz, a University of Washington atmospheric science researcher who testified about what she described as an alarming decline in the extent of Arctic sea ice."

INTERIOR HOSTING "HACKATHON" FOR DEVELOPMENT OF APPS FOR TRAVELERS. In its "Federal Eye" blog, the [Washington Post](#) (3/5, Rein, 5.17M) reports that "with spring and summer vacation season around the corner, the Obama administration is announcing a digital initiative for tourists Friday: An app to guide them to parks, forests, campsites, rivers and other federal property they may not know about." The Interior Department, "working with the Department of Agriculture, will host a 'Hackathon' on April 11 and 12 for web developers and other entrepreneurs outside government to design user-friendly, mobile apps for travelers." The objective is "to improve access to the vast empire of federally-managed land that's open to the public, by using a trove of data the agencies has compiled and made public." Tim Fullerton, Interior's director of digital strategy, said, "Honestly, the sky is the limit. We could see a situation where someone develops an app that can help someone near Las Vegas, say, plan a trip to a public land near there."

RELM WIRELESS RECEIVES INTERIOR ORDERS. The [Orlando \(FL\) Business Journal](#) (3/6, Barth, Subscription Publication, 28K) reports that Relm Wireless Corp. has "received orders totaling \$1.5 million from the US Department of the Interior for its mobile and portable radios with accessories."

ADDITIONAL COVERAGE OF KIVALINA. Additional coverage of Kivalina, which is threatened by climate change, was provided by the [Washington Post](#) (3/5, Mooney, 5.17M).

RECENT DECISIONS AFFECTING ALASKA CRITICIZED. In an op-ed for the [Washington Examiner](#) (3/6, 315K), Cathy Giessel, a Republican in the Alaska State Senate, writes that "on a Sunday morning last month, President Obama showed once again his determination to stunt our state's development when he designated as a wilderness area the coastal plain of the Arctic National Wildlife Refuge." She observes that "this comes after his executive actions to close energy leasing in Bristol Bay and the Chukchi and Beaufort Seas." Giessel notes that "these decisions were all made without the support of Congress or Alaskan officials." Giessel claims that "this is not just an overreach, it is a slap in the face."

OFFICE OF HAWAIIAN AFFAIRS TRUSTEE SAYS AGENCY PURSUES NATIVE HAWAIIAN SELF-DETERMINATION INITIATIVES. In a piece for the [Honolulu Civil Beat](#) (3/6, 41), Peter Apo, a sitting trustee of the Office of Hawaiian Affairs, provides a history of the Office of Hawaiian Affairs, and its role as a state agency, and its mission on behalf of Native Hawaiians. He notes that "one of OHA's highest program priorities is to vigorously pursue Native Hawaiian self-determination initiatives by intensifying its political advocacy at the highest levels of the state and federal governments."

America's Great Outdoors:

National Park Service:

OFFICIALS COMING TO OAK RIDGE ON MANHATTAN PROJECT PARK MISSION. The [Oak Ridger \(TN\)](#) (3/5, 15K) reports that "the Manhattan Project National Historical Park is another step closer to reality, according to information from Oak Ridge Council member Chuck Hope." During Tuesday night's City Council work session, Hope, "who recently attended an Energy Communities Alliance meeting in Washington D.C., told fellow Council members that some of his time in D.C. was used to meet with National Park Service and Department of Interior representatives about the park." Hope said "about 15 representatives from those agencies will be in Oak Ridge March 25 and 26."

MAN FOUND DEAD IN OLYMPIC NATIONAL PARK WAS SHOT IN HEAD WITH ARROW. The [AP](#) (3/6) reports that "a man found dead at a campground in Olympic National Park in Washington state was shot in the head with an arrow from a crossbow, and authorities are trying to determine how it happened." According to Mark Nichols, the Clallam County prosecutor and coroner, "there's no obvious evidence of a crime, but the death of Christopher E. Boysen remains under investigation."

Coverage by the AP was also picked up by [ABC News](#) (3/6, 3.41M), the [Denver Post](#) (3/6, 804K), the [Houston Chronicle](#) (3/6, 2.28M), and the [Washington Post](#) (3/5, 5.17M).

Also reporting on the story are the [Daily Mail \(UK\)](#) (3/6, 4.78M) and [KOMO-TV](#) Seattle (3/6, 217K).

WARM TEMPERATURES IMPACTING GLACIER NATIONAL PARK. [KULR-TV](#) Billings, MT (3/6, 2K) reports that "rising temperatures could spell bad news for Glacier National Park." Rangers and scientists at the park spoke about "how this warm weather is affecting the crown of the continent." The article notes that "an increase in winter temperatures here at Glacier National Park could lead to an increase in winter tourism, but it also means in the long run the Crown of the Continent could be losing some of its jewels."

The piece also appears at [KWYB-TV](#) Butte, MT (3/6).

NPS RELEASES SECOND REPORT ON DELAWARE WATER GAP NATIONAL RECREATION AREA. The [Pocono \(PA\) Record](#) (3/5, 43K) reports that the NPS has "released a second report focusing on a new, streamlined vision for maintaining and promoting the Delaware Water Gap National Recreation Area." According to the article, "Vision 2030 — completed last fall — and a 'foundation document' released last week both address how to move away from a park designed in 1965 around a dam and 37-mile-long reservoir that were never built." The article notes that "both reports call for a long-term strategy to protect and promote the recreation area's scenic, environmental and historic properties and sites, during an era of diminishing funding."

NPS SURVEYS EDNA E. LOCKWOOD. The [Easton \(MD\) Star Democrat](#) (3/6, 49K) reports that "Chesapeake Bay Maritime Museum Boatshop Manager Michael Gorman, along with his apprentices and volunteers, have hauled out the 1889 nine-log bottom bugeye Edna E. Lockwood this winter to make room for the National Park Service to laser scan and photograph the historic boat's log hull." The article notes that "the information is being put together by NPS's Heritage Documentation Programs to document the different parts of the hull and how they come together as a greater whole."

SEARCH FOR LONE WOLF IN VOYAGEURS NATIONAL PARK COMES UP EMPTY. The [Duluth \(MN\) News Tribune](#) (3/6, 129K) reports that "a lone wolf seen following snowmobiles in Voyageurs National Park may have left the area, park officials said Thursday." No visitors have reported seeing the wolf since Sunday. Voyageurs Superintendent Mike Ward said that "officials will continue to monitor the area for the wolf into this weekend."

PHOTOS PROVIDE CLOSE SHOTS OF SANTA MONICA MOUNTAIN LION AND HER TWO KITTENS. [KDVR-TV](#) Denver (3/5, 180K) reports that "new photos released Wednesday show a mountain lion in the Santa Monica Mountains known as P-19 and her two nearly-grown kittens, P-32 and P-33." The pictures were "posted on the Facebook page of the Santa Monica Mountains National Recreation Area."

Also reporting on the story is the [Daily Mail \(UK\)](#) (3/6, 4.78M).

GROUP SHOOTS STUNNING VIDEO OF JOSHUA TREE NATIONAL PARK. [KESQ-TV](#) Palm Springs, CA (3/6, 2K) reports that More Than Just Parks has shot a "beautiful 5 minute video utilizing ultra HD 4k video" of the "stunning landscapes, unique rock formations, and beautiful desert vistas" at Joshua Tree National Park. The group says the purpose of the project is "to raise a greater awareness of America's most treasured possessions – our national parks."

RANGERS LOOKING FOR MAN REPORTED MISSING AT LAKE MOHAVE. The [Las Vegas Review-Journal](#) (3/6, 398K) reports that NPS said rangers are looking for a 31-year-old Las Vegas man who disappeared on Lake Mohave nearly a week ago.

HISTORY OF MEGA-CONCERTS ON NATIONAL MALL PROVIDED. In its "Style Blog," the [Washington Post](#) (3/5, Ramanathan, 5.17M) provides an overview of the "memorable, free performances" that have been held on the National Mall.

Bureau of Land Management:

BLM SEEKS PROPOSALS TO KEEP WILD HORSES IN PASTURES. The [AP](#) (3/6, Gruver) reports that the BLM is "seeking additional homes for potentially thousands of wild horses rounded up from Western rangelands by asking landowners in a dozen states to submit proposals to rent out pastures for the animals." The bureau "currently has contracts with landowners to keep 31,000 wild horses on about 20 off-range pastures in Iowa, Kansas, Montana, Nebraska, Oklahoma and South Dakota," but "the problem with wild horses on the range is they keep proliferating. They can double their numbers every four years." The BLM is "seeking additional off-range pastures in any of a dozen states: Arkansas, Colorado, Iowa, Kansas, Missouri, Montana, Nebraska, North Dakota, Oklahoma, South Dakota, Texas and Wyoming."

Coverage by the AP was also picked up by [Fox News](#) (3/5, 8.25M), the [Houston Chronicle](#) (3/6, Gruver, 2.28M), the [Washington Post](#) (3/5, 5.17M), the [Daily Mail \(UK\)](#) (3/6, 4.78M), and [Yahoo! News](#) (3/6, Gruver, 5.81M).

OREGON ARCHAEOLOGISTS DISCOVER ANCIENT STONE TOOL. The [AP](#) (3/6, Barnard) reports that "archaeologists have uncovered a stone tool at an ancient rock shelter in the high desert of eastern Oregon that could turn out to be older than any known site of human occupation in western North America." The discovery was announced Thursday by the BLM, "which controls the land on which the site was found." According to University of Oregon archaeologist Patrick O'Grady, "the tool, a hand-held scraper chipped from a piece of orange agate not normally found in eastern Oregon, was found about 8 inches below a layer of volcanic ash from an eruption of Mount St. Helens that has been dated to 15,800 years ago." BLM archaeologist Scott Thomas said that "if the age of the site holds up to scrutiny, it would be the oldest west of the Rockies, and another pre-dating the so-called Clovis culture, once generally believed to be the first people to migrate from Asia into North America."

Coverage by the AP was also picked up by the [U-T San Diego](#) (3/5, 580K), the [Washington Post](#) (3/5, 5.17M), the [US News & World Report](#) (3/5, 685K), [NBC News](#) (3/6, 2.71M), the [Daily Mail \(UK\)](#) (3/6, 4.78M), and [Yahoo! News](#) (3/6, Barnard, 5.81M).

Also reporting on the story are the [Oregon Public Broadcasting](#) (3/6, 3K) and [KTVZ-TV](#) Bend, OR (3/6, 4K).

REP. HARDY SEEKS MORE TIME FOR COMMENT ON BLM'S NEW RESOURCE MANAGEMENT PLAN. The [Las Vegas Review-Journal](#) (3/6, 398K) reports that Rep. Crescent Hardy on Thursday asked Interior Secretary Sally Jewell that Nevadans be given more time to comment on a new resource management plan for 3.1 million acres of federal land in Southern Nevada.

BLM Threatened By Bundy Family Member. The [St. George \(UT\) Spectrum](#) (3/5, 46K) reports that "after being re-invited to give a presentation in Mesquite, Bureau of Land Management representatives received threats from Ryan Bundy, son of Cliven Bundy, who said the BLM needs to 'stay gone and the people won't allow them to come back.'" According to the article, "BLM representatives came to discuss how to give comments on the Resource Management Plan Draft but were instead drilled with public comments mostly about the Gold Butte area." Ryan said, "BLM does not have authority of these lands. The people will not allow roads to be closed. We've had a peaceful year without you running around out there, so stay gone."

VVWD Staff To Discuss Water Rights With BLM. The [St. George \(UT\) Spectrum](#) (3/5, 46K) reports that "the VVWD Board at its regular Tuesday meeting directed staff to provide comments to the Bureau of Land Management regarding the draft resource management plan." According to the article, the "Board questioned why VVWD is not considered a 'cooperating agency' with the BLM, while the Moapa Valley Water District is."

GOV. MEAD WELCOMES FEDERAL WILD HORSE RULING. The [County 10](#) (3/5) reports that Gov. Matt Mead was "pleased with US District Judge Nancy Freudenthal's decision to allow the Bureau of Land Management (BLM) to remove more than 1200 wild horses from checkerboard lands in southwestern Wyoming." Mead said, "The decision is a victory for the State of Wyoming. The BLM used the appropriate tool to remove wild horses from private lands and this decision supports that. However, the BLM has demonstrated they don't have the resources necessary to effectively manage wild horses. We will continue to insist that they develop a strategy that works for Wyoming."

MINE COMPANY ADDRESSES DEER MIGRATION COMPLAINT. The [Elko \(NV\) Daily Free Press](#) (3/6, 22K) reports that "a mine representative expects to see an agreeable solution for a pit expansion proposal that drew concerns from outdoorsmen and conservationists due to its potential impact to deer herds." Barrick Gold Corp.'s Bald Mountain Mine is "in the permitting stages of an expansion at its site." According to according to Bill Upton, Barrick's permitting director, "in response to concerns that the expansion would interfere with deer migration, the mine and agencies are tinkering with the plans."

BLM TO OFFER TOUR OF OFF-RANGE HORSE CORRAL. The [Lahontan Valley \(NV\) News](#) (3/6, 11K) reports that the BLM has announced "it is offering a public tour of the Indian Lakes Off-Range Corral northeast of Fallon on Saturday."

BLM URGED TO USE "BEST AVAILABLE SCIENCE" TO COMPLETE SAGE-GROUSE PLANS. In an op-ed for the [Reno \(NV\) Gazette-Journal](#) (3/5, 168K), Terry Riley, PhD, a certified wildlife biologist, writes that the BLM "must use the best available science to complete its 14 remaining land use plans that aim to conserve sage-grouse habitat while balancing the need for multiple uses of our federal public lands." Riley argues that "delaying these actions will prolong the uncertainty over how to effectively manage this species and the ecologically-important sagebrush ecosystem in which it lives." Riley concludes that "the health of our interior West depends" on an effort to "balance conservation with responsible use of our public lands."

Fish and Wildlife Service:

FWS DIRECTOR ASHE TO ANNOUNCES NEW RESTRICTIONS ON SNAKES. The [Miami Herald](#) (3/6, 694K) reports that on Friday, FWS Director Dan Ashe is "expected to announce new restrictions on the popular boa constrictor and four other large exotic constrictor snakes, making it illegal to import or sell them across state lines." The article notes that "the move comes three years after federal officials enacted the same ban on the Burmese, the voracious, fast-growing snake that got loose in South Florida and quickly gobbled its way across the Everglades." FWS spokesman Ken Warren said, "The overall goal is to limit the spread of these nonnative invasive species. We've already seen with the Burmese how they can get established and almost single-handedly wreck an ecosystem."

The piece also appears at the [Bradenton \(FL\) Herald](#) (3/5, 136K).

RHODE ISLAND AWARDED \$459,000 WILDLIFE GRANT. The [Providence \(RI\) Business News](#) (3/6, 22K) reports that the FWS has "awarded Rhode Island a \$459,840 state wildlife grant to preserve the state's wildlife and their habitats." Sen. Jack F. Reed said, "From our coastlines to our forests, protecting and preserving our diverse natural landscape is a smart investment in the health of our environment and our economy."

HOUSE REPUBLICANS WANT MORE INFORMATION ON POSSIBLE FEDERAL PROTECTIONS FOR BAT SPECIES. [The Hill](#) (3/6, Cama, 224K) reports that "the House Natural Resources Committee wants more information from the federal government before it decides whether to designate the northern long-eared bat as an endangered species." According to the article, "the panel's Republicans, led by Chairman Rob Bishop (R-Utah), wrote in a letter that they are worried that an endangered listing or even a lesser 'threatened' designation, could 'impose unnecessary regulatory burdens on economic development, forestry, wind power generation, energy development, agriculture, and conservation projects.'" The legislators "sent the letter to the Fish and Wildlife Service, which proposed in 2013 to list the bat either as endangered or threatened, which could come with new regulations designed to protect it or its habitat."

Also reporting on the story is the [Newton County \(AR\) Times](#) (3/6, 7K).

COURT ORDERS FWS TO CREATE CONSERVATION PLANS FOR LOWER KLAMATH, TULE LAKE WILDLIFE REFUGES. [The Oregonian](#) (3/6, 950K) reports that "federal fish and wildlife managers must complete a plan to ensure commercial activities at two Northwest federal wildlife refuges do not harm wildlife, a US District Court judge has ruled." According to the article, "Magistrate Judge Mark Clark's preliminary ruling Thursday calls upon the US Fish and Wildlife Service to complete a Comprehensive Conservation Plan for the Lower Klamath and Tule Lake refuges, both of which are near the Oregon-California border."

Also reporting on the story is the [Eureka \(CA\) Times Standard](#) (3/5, 56K).

BEGINNING NEXT SEASON, LOUISIANA HUNTERS WILL KNOW DUCK DATES NEARLY YEAR IN ADVANCE. The [New Orleans Times-Picayune](#) (3/6, 621K) reports that "beginning next year, Louisiana's duck hunters will know the coming season dates nearly a year in advance, according to a presentation state waterfowl study leader Larry Reynolds made to the Louisiana Wildlife and Fisheries Commission at its regular monthly meeting Thursday." The FWS has "changed the entire framework for setting seasons because it has run into timing issues in recent years with getting the process completed before seasons open in more northern states, Reynolds explained."

TRAIN WITH CRUDE OIL DERAILS IN ILLINOIS. The [AP](#) (3/5) reports that "a BNSF Railway freight train loaded with crude oil derailed Thursday near the northern Illinois city of Galena and erupted into flames, authorities said."

[WRIC-TV](#) Richmond, VA (3/5, 13K) reports that the FWS said that "fire crews were pulled away from the fire because of the danger."

FWS, NATIONAL WILDLIFE FEDERATION PARTNERING ON MONARCH BUTTERFLIES. The [Scranton \(PA\) Times Tribune](#) (3/6, 181K), Dan Ashe, Director of the FWS, and Collin O'Mara, President and CEO of the National Wildlife Federation, write that the FWS and the National Wildlife Federation are "joining to take action" against the decline of monarch butterflies. The FWS will "make key investments in monarch conservation totaling more than \$3.2 million this year," and "working with partners," it will "restore and enhance more than 200,000 acres of habitat for monarchs on public lands, along highway rights-of-way and on other public and private lands this year, while supporting more than 750 schoolyard habitat projects and pollinator gardens nationwide."

US Geological Survey:

USGS BEGINS STUDY IN HINKLEY TO DETERMINE HOW MUCH CHROMIUM-6 WAS NATURAL. The [San Bernardino \(CA\) Sun](#) (3/5, Steinberg, 101K) reports that the USGS

much was put there by nature." The article notes that "the findings of this pioneering scientific effort that will span five years could add or subtract multiple millions of dollars from the ultimate environmental cleanup cost in this High Desert community."

Securing America's Energy Future:

Renewable Energy:

EPA RAISES QUESTIONS ABOUT DRAFT DESERT RENEWABLE ENERGY CONSERVATION PLAN. The [Barstow \(CA\) Desert Dispatch](#) (3/5, BRODEUR, 55) reports that the EPA has "filed 14 pages of comments on the Draft Desert Renewable Energy Conservation Plan, raising questions about air and water quality." The agency also "called on the Renewable Energy Action Team agencies — the Bureau of Land Management, US Fish and Wildlife Service, California Department of Fish and Wildlife and California Energy Commission — to rethink the amount of 'renewable energy that may need to be produced in the plan area.'"

Onshore Energy Development:

STATOIL AGREES TO PAY \$2 MILLION FOR ILLEGAL WELL IN NORTH DAKOTA. The [AP](#) (3/6) reports that "a Norwegian oil company that illegally operated a well on federal property in North Dakota has agreed to pay a nearly \$2 million settlement to avoid legal action, federal prosecutors announced Thursday." According to authorities, "the well was drilled about two weeks after Statoil Oil & Gas Services Inc. acquired Brigham Oil & Gas L.P., which had originally planned the facility," and "the company later discovered that the well drilled into unleased federally owned minerals." Timothy Purdon, US Attorney for North Dakota, "credited Statoil for its willingness to settle the case without forcing the government to file a civil suit."

Coverage by the AP was also picked up by the [Long Beach \(CA\) Press-Telegram](#) (3/5, 163K), [ABC News](#) (3/6, 3.41M), and [Yahoo! News](#) (3/6, Kolpack, 5.81M).

Also reporting on the story is the [Dickinson \(ND\) Press](#) (3/6, 3K).

BLM TO AUCTION LAND NEAR PAYETTE FOR OIL, GAS LEASES. The [Boise \(ID\) Weekly](#) (3/5, 103K) reports that "as controversy continues over oil and gas exploration in Payette County, the Bureau of Land Management is putting five parcels of land six miles east of the city of Payette up for auction." The article notes that "the parcels, which range in size from 560 acres to more than 1,700 acres, carry two stipulations: no activity can take place either above or below the surface of the land," until "the Four Rivers Resource Management Plan—which brings together three separate western Idaho land use plans—is completed." According to Tate Fischer, field manager for the Four Rivers Field Office, the plan should be complete by 2016.

LINK BETWEEN SEISMIC ACTIVITY, FRACKING DISCUSSED. [USA Today](#) (3/5, Hughes, 10 32M) reports, "Oklahoma had at least 5,415 earthquakes, with 585 of them of magnitude-3 or greater. In comparison, the state had 109 magnitude-3 quakes in 2013, according to the Oklahoma Geologic Survey." State geologists refuse to pin all seismic activity on water from fracking, but Federal scientist contend, "Large areas of the United States that used to experience few or no earthquakes have, in recent years, experienced a remarkable increase in earthquake activity." They said, "This rise in seismic activity... is not the result of natural processes. Deep injection of wastewater is the primary cause of the dramatic rise in detected earthquakes." USGS seismologist Bill Ellsworth says that while injection wells have been used for decades, what may have changed is the volume and pressure of the water being pumped into them, or perhaps they're starting to have a cumulative effect. Current injection well regulations focus on protecting drinking-water aquifers rather than preventing quakes, he said.

ADDITIONAL COVERAGE INTERIOR ORDERED TO REVIEW APPROVAL OF NAVAJO MINE EXPANSION. Additional coverage that "a federal judge determined that regulators did not adequately assess the environmental impact from a proposed expansion of the Navajo Mine in New Mexico" was provided by the [Durango \(CO\) Herald](#) (3/5, 28K), the [Cortez \(CO\) Journal](#) (3/5, 646), the [Arizona Daily Star](#) (3/6, 212K), the [Farmington \(NM\) Daily Times](#) (3/6, 49K), the [Columbus \(IN\) Republic](#) (3/6, 81K), [KWES-TV](#) Odessa, TX (3/6, 5K), and [KOLD-TV](#) Tucson, AZ (3/6, 21K).

OBAMA SHOULD BAN FRACKING, BLOG SAYS. Lois Marie Gibbs, director of the Center for Health, Environment and Justice in Falls Church, Virginia, writes for [The Hill](#) (3/5, Gibbs, 224K) in its "Congress Blog" praising New York Gov. Andrew Cuomo's decision to ban fracking in his state and calling on President Obama to follow in his footsteps. She writes, "Obama and his Administration... have consistently failed the American people on this issue by ignoring and minimizing the science on fracking." She continues, "Obama's half-measure — a methane reduction plan for inherently dirty fuel, extracted through a destructive and dangerous process — is inadequate." She calls for a halt in investments in fossil fuels and says, "Leadership on climate change requires departing from these energy sources, not minor fixes around the edges that maintain them." Gibbs cites several statistics from a Physicians Scientists & Engineers for Healthy Energy (PSE) analysis about the impact of fracking and shale gas development on health and the environment.

Offshore Energy Development:

CONTINUING COVERAGE OF OFFSHORE DRILLING PLAN. The [North Jersey \(NJ\) Media Group](#) (3/6, 69K) reports that Sens. Bob Menendez and Cory Booker and Rep. Frank Pallone "oppose the drilling proposal because they believe a major spill could be carried to the Jersey Shore." They are "urging state residents, business owners, fishermen and community leaders to make their views known."

Also reporting on the story are the [Asbury Park \(NJ\) Press](#) (3/5, 371K) and the [Sputnik News](#) (3/6).

Additional Coverage Of Opposition. The [Coastal Observer \(SC\)](#) (3/6) reports that "foes of oil and gas production off the coast of South Carolina are mobilizing to present their arguments against seismic testing and exploration to government officials this month." According to the article, "members of the Winyah Chapter of Sierra Club made plans to attend a meeting of the Bureau of Ocean Energy Management next Wednesday in Mount Pleasant and to write the state Department of Health and Environmental Control to argue against approving seismic testing in the ocean." Also, "a second group organized by Goffinet McLaren and Terry Munson met at the Waccamaw Library to represent Litchfield Beach and Pawleys Island in efforts to oppose oil and gas drilling in the Atlantic."

The [Maryland Coast Dispatch](#) (3/5, 52K) reports that "Assateague Coastal Trust (ACT) announced last month its opposition to the Bureau of Ocean Energy Management's (BOEM) proposed offshore oil and gas exploration and drilling leases for the Mid-Atlantic coast." Kathy Phillips, ACT Executive Director and Assateague Coastkeeper, said, "ACT stands firm in its commitment to encourage solar and offshore wind energy development for our region, with less dependency on fossil fuel technologies. If these lease proposals are approved by BOEM, it would put the Delmarva coastline in the crosshairs of a future BP-style disaster, essentially destroying the Eastern Shore's nearly \$2 billion tourism economy, nearly \$1 billion commercial and recreational fishing industry, and our priceless coastal ecosystem. Even a small spill could have devastating effects on a region so reliant on clean water and beaches."

The [Cape May County \(NJ\) Herald](#) (3/6, 6K) reports that at Middle Township Committee's March 2 meeting, "a resolution expressing opposition to the Department of the Interior's inclusion of the Atlantic Ocean in its five-year program for outer continental shelf oil and gas leasing was approved."

The [Cape May County \(NJ\) Herald](#) (3/6, 6K) reports that "Stone Harbor joined other county municipalities in expressing opposition to the proposed inclusion of a portion of the southern Atlantic Ocean in the US Department of the Interior's program that would allow offshore drilling."

Marine Scientists Warn About Seismic Testing. The [AP](#) (3/6) reports that "marine scientists are raising concerns about the Obama administration's decision to move ahead on use of seismic air guns in the Atlantic Ocean for oil and gas exploration." According to the article, "seventy-five scientists from around the globe on Thursday sent a letter to President Barack Obama saying the use of the guns, which create canonlike air blasts underwater, represents a 'significant threat to marine life throughout the region.'"

Coverage by the AP was also picked up by the [Washington Post](#) (3/5, 5.17M), [ABC News](#) (3/6, 3.41M), the [Daily Mail \(UK\)](#) (3/6, 4.78M), and [WITN-TV](#) Washington, NC (3/6, 102K).

Also reporting on the story are [NBC News](#) (3/6, 2.71M), the [Maritime Executive](#) (3/6, 21), and the [Science 2.0](#) (3/6, 2K).

Former Secretary Salazar Interviewed. Former Interior Secretary Ken Salazar was interviewed on [E&E TV](#) (3/6), where he discussed oil and gas development. On the topic of the recently released offshore drilling plan, Salazar said: "Well, I think that if you watch what this administration has done from the beginning, the all-of-the-above energy strategy has included oil and gas, and so the critics of the administration that have said that it was not supporting oil and gas need to look at the reality of the facts in terms of the decisions that the administration has made, including opening up parts of the Arctic and in the more recent decisions that were announced by the administration, looking at the Atlantic in terms of finding out what is there. And so there is — oil and gas are a significant portion of the energy portfolio of the United States of America, and it is, indeed, a part of why we're having the economic resurgence, the best of times that we've had for a long time, and again addressing the fundamental issue of energy security has, I think, been one of the major achievements of the last six, seven years."

Commentary. For the "Ocean Views" blog of the [National Geographic](#) (3/5, 32.58M), Brett Garling asks if it is "really a smart idea to drill 50 miles from the coasts of Virginia,

North Carolina, South Carolina and Georgia after what happened to Louisiana, Mississippi, Alabama and Florida" with the Deepwater Horizon blowout? He also adds that "even if the drilling is successful — that short-term success only contributes to our long-term problem."

ADDITIONAL COVERAGE OF ARCTIC DRILLING. Additional coverage of Arctic drilling was provided by the [Pacific Standard](#) (3/6).

Tackling America's Water Challenges:

NEW YAKIMA FILED MANAGER NAMED. The [Ellensburg \(WA\) Daily Record](#) (3/6, 16K) reports that "Chad Stuart, formerly a manager for the US Army Corps of Engineers in California, has begun work as the new Yakima field manager for US Bureau of Reclamation operations in Kittitas, Yakima and Benton counties." Stuart also will "assist the bureau's Columbia-Cascades area manager in carrying out the overall responsibilities related to conservation of land, water and natural and energy resources within the three-county Yakima Project area."

THREE TRIBES BEGIN MEDIATION PROCESS ON KLAMATH BASIN RESTORATION AGREEMENT. The [Klamath Falls \(OR\) Herald And News](#) (3/6, 45K) reports that "three Basin tribes have begun a mediation process that could end in termination of the Klamath Basin Restoration Agreement (KBRA)." The Klamath Tribes, the Karuk Tribe, and the Yurok Tribe have "each filed dispute initiation notices, which is the first step in the resolution process outlined in the KBRA."

CENTRAL VALLEY PROJECT WATER TRANSFER DOCUMENTS RELEASED FOR PUBLIC REVIEW. The [Red Bluff \(CA\) Daily News](#) (3/5, 578) reports that the BOR and the Tehama-Colusa Canal Authority have "released for a 20-day public review an Environmental Assessment and Initial Study and draft Mitigated Negative Declaration on the effects of proposed water transfers from willing sellers to buyers in the Sacramento Valley."

Empowering Native American Communities:

BIA, BIE REQUEST \$2.9 BILLION. [KBJR-TV](#) Duluth, MN (3/6, 2K) reports that the BIA and the B E are "requesting \$2.9 billion from President Obama's budget proposal for 2016, which is a 12% increase compared to what was received for 2015." The article notes that "the tribal organizations are asking for \$323.5 million more for 2016 than they received in the President's Fiscal Year 2015 budget." BIA Director of Public Affairs, Nedra Darling, said, "We've asked for more this year for the first time in a long time." According to the article, "the BIA's budget has been cut down, so that is a major reason why they are requesting more money for tribal self-determination and to strengthen Native communities."

SLOW PROGRESS SEEN ON RETURN OF TRIBAL REMAINS, OBJECTS. The [Environment & Energy Publishing](#) (3/6, Subscription Publication, 705) reports that "for 25 years, federal agencies have sifted through dusty storage rooms to comply with a congressional mandate to return Native American remains and sacred objects — the spoils of massacres, wars and 20th-century development — to tribes," but "progress has been slow." According to the article, "stymied by poorly curated collections, long-lost records and limited operating budgets, agencies have taken mere baby steps toward meeting the requirements of the Native American Graves Protection and Repatriation Act, or NAGPRA, according to many American Indian, Alaska Native and Native Hawaiian groups." According to the National NAGPRA Program, "74 percent of federal collections ready for repatriation are now back with tribes," but that figure "represents less than 10 percent of all Native American remains in museum and federal collections, including potentially thousands left in limbo as federal officials and museums squabble over responsibility."

WOMAN PLEADS GUILTY TO BITING BIA OFFICER ON ARM. The [AP](#) (3/6) reports that "a North Dakota woman has pleaded guilty in federal court to biting a Bureau of Indian Affairs officer on the arm." Jessie Grant is "charged with assaulting a federal officer" and "faces a maximum penalty of eight years in prison."

Top National News:

KERRY MEETS WITH GULF OFFICIALS AS SOME SAUDI MEDIA SHOWS SUPPORT FOR NETANYAHU. The ongoing debate over the Administration's nuclear talks with Iran was not mentioned on the network newscasts last night, but continued to generate print and online coverage, as well as cable stories. Some reports note this morning that as Secretary of State Kerry moves to ease concerns about the deal from key Persian Gulf allies, Wednesday's speech before Congress by Israel's Benjamin Netanyahu is receiving support — or "tacit support," as the [AP](#) (3/6, Batrawy) puts it — from Saudi Arabia. The Saudis, adds the AP, view Iran as "a regional rival that is perhaps even more menacing than Israel," and "that was clear in a string of columns this week published in Saudi state-linked media, which is widely seen as reflecting official views and mainstream thought in the kingdom." In an example that illustrates the Saudis' "acute" concern, said [The Blaze](#) (3/6, Schwartz, 2.17M), the "pro-government" daily Al-Jazirah ran a piece by columnist Ahmad Al-Faraj Monday in which he said, "I believe that Netanyahu's conduct will serve our interests, the people of the Gulf, much more than the foolish behavior of one of the worst American presidents." [Reuters](#) (3/6, McDowall, Bakr), meanwhile, notes that Saudi King Salman, in recent meetings with leaders of Gulf nations as well as Jordan, Turkey, and Egypt, has called for a Sunni coalition to confront both Iran and IS L, something Reuters sees as reflecting — in part — concerns about US policies. [Al Arabiya](#) (3/6, 22K), for example, reported that Saudi Foreign Minister Saud al-Faisal, "in a strongly worded statement," expressed concerns yesterday "during a joint conference with Kerry in Riyadh that 'Iran is taking over Iraq.'"

Jennifer Griffin noted on [Fox News' Special Report](#) (3/5, 1.53M) that in Riyadh yesterday, Kerry "met the foreign ministers of UAE, Qatar, Bahrain, Oman and Saudi Arabia...all of them Sunni, all worried about Shiite Iran's real intent in Iraq and Syria." According to the [Wall Street Journal](#) (3/6, Omran, Schwartz, Subscription Publication, 5.67M), Kerry invited the group — who make up the Gulf Cooperation Council — to visit Washington in April for further discussions. The [New York Times](#) (3/6, Gordon, Subscription Publication, 9.97M) reports that the group's concern is that "lifting economic sanctions against Tehran — the quid pro quo for the nuclear limits Iran is being asked to accept — will not only help Iran's economy but also enhance its ability to send weapons and Quds paramilitary forces to support President Bashar al-Assad in Syria." The [Voice of America](#) (3/5, Dockins, 70K) casts the GCC as "unnerved by Shi'ite Iran's suspected pursuit of nuclear weapons and its increasing assertiveness throughout the region," while the [Saudi Gazette](#) (3/5, 51K) similarly describes them as "perturbed" over Iran's actions.

In its story on the talks, the [Kuwait News Agency](#) (3/6) says both Faisal and Kerry "expressed mutual views on most of the region's issues, along with their keenness to resume talks on resolving them," and notes Faisal "described the meeting in Riyadh as 'constructive' and being 'characterized by depth and transparency.'" Faisal also said, "Iran is a neighbor towards whom nobody bares any animosity. But if it continues to intervene in internal affairs (of other nations) it will position itself against Arab interests and international principles."

Kerry, says the [Washington Post](#) (3/6, Morello, 5.17M), "assured Arab allies" yesterday that the US "will work with them to counter Iranian influence in the region even if a deal is struck over Tehran's nuclear program." The Post adds that "the gulf states want a commitment from Washington that it will not soften its opposition to what they see as Iran's increasing aggressiveness in the region, including in Yemen, where rebels apparently backed by Tehran toppled the US-allied government in January." Kerry said yesterday, "The first step is to make sure they don't have nuclear weapons. ... Nothing else changes on the next day with respect to our joint commitment to stand up against any kind of interference or violation of international law or support for terrorism." The Post also reports that "senior State Department officials said Kerry sought to allay their concerns that Iran could build nuclear weapons at the end of a deal with a 10-year or longer time frame."

The [New York Times](#) (3/6, Gordon, Subscription Publication, 9.97M), meanwhile, quotes Kerry as saying, "We are not seeking a grand bargain. ... We will not take our eye off of Iran's other destabilizing actions." But "it was clear from" Faisal's remarks, adds the Times, "that Arab nations are acutely worried about Iran's effort to exercise influence in the region and the prospect that it could grow as economic sanctions are lifted as part of a nuclear deal." Later on Thursday, [AFP](#) (3/6, Biddle) reports State Department spokeswoman Marie Harf "insisted" that the nuclear talks "in no way represent 'a broader warming of ties, lessening of concerns on our part,'" adding, "This is not about a broader rapprochement in any way. This is about the nuclear issue and that's it."

Al-Hayat Newspaper: Kerry Offering GCC Nations US "Nuclear Umbrella" In Response To Iranian Threat. [Israel National News](#) (3/6, Eidelberg, 10K), meanwhile, reported that according to "the London-based Arabic language Al-Hayat" newspaper, "Western sources have reportedly revealed that...Kerry is offering Gulf States an American nuclear umbrella to deal with the Iranian nuclear threat."

As Controversy Over Nuclear Talks Continues, Iran Steps Up Role In Iraq. The [New York Times](#) (3/6, Cooper, Subscription Publication, 9.97M) reports that with Obama "under political pressure from congressional Republicans over negotiations to rein in Tehran's nuclear ambitions," there is "a startling paradox" in the fact that the President "is becoming increasingly dependent on Iranian fighters as he tries to contain" ISIL "without committing American ground troops." "While it may be "technically true" that the US "is not coordinating with Iran" in the fight for control of Tikrit, "American war planners have been closely monitoring Iran's parallel war against the Islamic State...through a range of channels, including conversations on radio frequencies that each side knows the other is monitoring."

The [AP](#) (3/6, Burns) says "Iran's growing influence in Iraq is setting off alarm bells," and presenting "both a political and military dilemma for the Obama administration." Adds the AP, "The battle for Tikrit raises the question: Who is really running this war? Iraq? The US? Iran?" [Politico](#) (3/6, Brietman, 669K) similarly reported that the battle for Tikrit "appears to represent a new level of Iranian engagement," and added that "top Pentagon officials have decided not to provide air support to the attack on Tikrit because Iran is backing the operation with special operations assistance, artillery support and other military help." The [Christian Science Monitor](#) (3/6, Mulrine, 380K), however, headlines its story "Why Iran's Latest Foray Into Iraq Doesn't Worry Pentagon," reporting that "top US military officials are actually sanguine, in many respects, about the presence of Iranian advisers. They know that they're there — and what's more, they add, these Iranian-backed forces might actually be able to help."

"Iran's powerful influence in Iraq has been on display" in the push for Tikrit, says the [New York Times](#) (3/6, Barnard, Subscription Publication, 9.97M) in a similar report, while in an editorial titled "A Naive US Welcome For Iran In Iraq," the [Washington Post](#) (3/6, 5.17M) argues that the Administration is "risking the undoing of all the work that has been done since last summer to prevent Iraq from fragmenting along sectarian lines – and it is allowing Iran to take another step toward replacing the terrorist regime with its own malevolent hegemony."

Davutoğlu: Iraq Risks Sectarian War By Allowing Shiites To Rescue Sunni Cities. [USA Today](#) (3/6, Michaels, 10.32M) reports Turkish Prime Minister Ahmet Davutoğlu "warned that sectarian war may ignite in Iraq because" Shiite militias "are helping to liberate Sunni areas" controlled by ISIL. Davutoğlu said the Sunni cities "should be liberated by the inhabitants of those cities. If Shiite militias come in, then there will be sectarian war."

Zarif: 10-Year Moratorium May Be Acceptable. [Reuters](#) (3/6, Charbonneau) reports that in an interview with CNN, Iranian Foreign Minister Mohammad Javad Zarif did not rule out accepting a 10-year moratorium on some parts of his country's nuclear program, "It depends on how you define it," he said, adding, "If we have an agreement, we are prepared to accept certain limitations for a certain period of time but I'm not prepared to negotiate on the air." Reuters notes that Zarif was quoted earlier this week as calling such a moratorium unacceptable.

McCconnell Relents, Postpones Vote On Corker-Menendez Bill. [McClatchy](#) (3/6, Douglas, Subscription Publication, 17K) reports that "faced with a likely Democratic filibuster," Senate Majority Leader McConnell yesterday "postponed a vote on a bill," sponsored by Sens. Bob Corker and Bob Menendez, "that would allow Congress to reject or approve any deal to curb Iran's nuclear program." The [AP](#) (3/6) notes that vote "had been scheduled for Tuesday."

[Politico](#) (3/6, Everett, Raju, 669K) noted that McConnell spokesman Don Stewart said, "It is clear that Senate Democrats will filibuster their own bill – a bill they rushed to introduce before the White House cut a deal with Iran. So, instead, the Senate will turn next to the anti-human-trafficking legislation while Democrats decide whether or not they believe they and Congress as a whole should be able to review and vote on any deal the President cuts with the leaders of Iran." [Reuters](#) (3/6, Zengerle) reports that Corker said in a statement, "I greatly appreciate the Majority Leader's commitment to getting the Iran Nuclear Agreement Review Act across the finish line by allowing the vote to occur at a time when we will more likely generate a veto-proof majority." [Defense News](#) (3/6, Bennett, 9K), the [Huffington Post](#) (3/6, Bendery, 281K), [The Blaze](#) (3/6, Kasperowicz, 2.17M), and [The Hill](#) (3/5, Carney, 224K), among other news outlets, run similar stories this morning.

In an editorial, [Bloomberg View](#) (3/6, 99K) criticizes the bill, arguing that while "of course Congress has the right (backed by ample historical precedents) to weigh in on the Iran negotiations," the President "doesn't need Congress's approval to conclude this deal, which is why the White House has rightly promised a veto." The [Wall Street Journal](#) (3/6, Subscription Publication, 5.67M), also in an editorial, criticizes Democrats for blocking the bill, and accuses the President of showing disdain for congressional oversight.

Michael Gerson, in the [Washington Post](#) (3/6, 5.17M), says "a sort of offer to Iran was always on the table, at least during the George W. Bush years, if the regime would: (1) abandon its nuclear ambitions, (2) respect human rights and (3) end support for terrorism. Iran, in essence, could be treated as a normal nation if it actually became a normal nation." But "Obama has now narrowed US demands entirely to the first category, the nuclear file," and under this approach he would "allow Iran to escape sanctions, rejoin the global community and even become a partner in defeating Sunni extremism. It is, presumably, an offer the Iranians can't refuse."

Obama Reportedly "Furious" Over Netanyahu's Speech. Ed Henry was asked on [Fox News' The O'Reilly Factor](#) (3/5, 767K) about reports that the President personally dislikes Netanyahu. Henry said, "They don't hate each other. I think it's exaggerated. There is absolutely no love lost between them. ... I think my read from people behind the scenes is they get a lot more business done in phone calls than you ever hear about publicly." But in "this recent situation with Netanyahu speaking before the US Congress," the President "was furious" and "his top aides were furious," which is "why you heard the President lash back at him. He felt like he was being disrespected."

Israeli Ambassador to the US Ron Dermer said on [CNN's Situation Room](#) (3/5, 554K) that Netanyahu's words "speak for themselves," adding that he said something he has "never said before. He said you should link removing the restrictions that are being placed on Iran's nuclear program as part of this deal, you should link the removal of those restrictions to a change in Iran's behavior." Asked if he has spoken to the White House since Netanyahu returned to Israel, Dermer said, "We have had a dialogue with the administration for well over a year. So they have heard a lot of our views," adding that "the problem is not that there is a breakdown in communication. The problem is we have a difference of policy. We want to prevent Iran not only from having a nuclear weapon today, we want to prevent it from having a nuclear weapon tomorrow."

Later in the interview, Dermer was asked to respond to a report in Haaretz, which quoted an Administration official as saying that the White House considered him persona non grata. Dermer said, "I serve at the pleasure of the Israeli government and I will continue to serve every day in order to advance Israel's interests and strengthen the relationship between the US and Israel. I believe that relationship is going to grow even stronger in the years ahead." Wolf Blitzer, meanwhile, reported on [CNN's Situation Room](#) (3/5, 554K) that in the wake of Israeli Prime Minister Benjamin Netanyahu's speech to Congress, Iran's Foreign Minister "is speaking out to CNN," accusing Netanyahu of "fearmongering."

Charles Krauthammer praises the speech in the [Washington Post](#) (3/6, 5.17M), calling it "Churchillian in its appeal to resist appeasement." Fareed Zakaria, also in the [Washington Post](#) (3/6, 5.17M), terms it "utterly divorced from reality," and says "Congress joined" Netanyahu "in his fantasy ride."

Eugene Robinson, in his [Washington Post](#) (3/6, Robinson, 5.17M) column, saw moments in which the Prime Minister "showed a more nuanced and realistic view of the Iran nuclear negotiations than his generally bombastic tone would suggest. But you had to listen carefully." For example, he "allowed that there is a potential agreement his nation 'could live' with. Among other things, he said, Iran should not have 'such a short breakout time.'"

Rezaian's Friends And Family To Appear At National Press Club Next Thursday. [USA Today](#) (3/6, Hinchliffe, 10.32M) reports that "next Thursday, friends and family of Jason Rezaian, the Washington Post reporter who has been jailed in Iran since July, will gather at the National Press Club in Washington to draw wider attention to Rezaian's plight." The family is particularly concerned about Iran's decision to give Rezaian the right to an attorney, "only it wasn't the one his family has been working with for months" but instead one picked by the case's "hard-line judge," a step "illegal under Iranian law."

AMID CONTINUING CONTROVERSY, CLINTON ASKS STATE DEPARTMENT TO RELEASE HER EMAILS. For the third consecutive day, the controversy surrounding Hillary Clinton's use of personal email while serving as secretary of state drew heavy media coverage, including Thursday evening reports on all three network newscasts. While some stories note that several leading Democrats on Thursday rallied to Clinton's defense, other analyses indicate that the controversy has some in the party worried about the impact the flap will have on her expected 2016 run for president. In addition, some reports indicate Clinton may have "violated" State Department policy on private email and security.

Lester Holt reported on [NBC Nightly News](#) (3/5, story 5, 2:05, Holt, 7.86M) that Clinton "has responded to the controversy" and is "now asking the State Department to release those emails, but that doesn't mean the public will see them anytime soon." Andrea Mitchell added that the State Department "said they will review them for release as soon as possible," but "officials say it could take months to decide what involves national security and what can be made public."

[Politico](#) (3/5, DeBenedetti, 669K) reported that on Wednesday night, via Twitter, Clinton said, "I want the public to see my email. I asked State to release them. They said they will review them for release as soon as possible." In brief reports, [USA Today](#) (3/5, Korte, Jackson, 10.32M) and the [Huffington Post](#) (3/5, Bobic, 281K) also reported on Clinton's Wednesday night tweet. [Bloomberg News](#) (3/6, Drajem, Lakshmanan, 2.94M), however, says that while Clinton "says she wants the public to see her e-mails... there are some that voters may never see: the ones she didn't give to the government. Clinton used a private server and e-mail address while" at the State Department, "and the law doesn't force her to release any of the e-mails that she hasn't turned over to the" agency.

Doug McKelway reported on [Fox News' Special Report](#) (3/5, 1.53M) that Clinton's tweet was her "first foray into damage control," adding that the House Select Committee on Benghazi was "unsatisfied by the tweet," responding, "The former Secretary is welcome to and should release all of her e-mails, but legitimate investigations do not consider partial records."

Nancy Cordes reported on the [CBS Evening News](#) (3/5, story 6, 1:50, Rose, 5.08M) that Clinton's tweet "prompted a scathing response" from Select Committee Chairman Trey Gowdy, who said in a statement, "The former Secretary's tweet does not answer questions about why this was not done when she left office." Gowdy's statement accused Clinton "of a 'scheme to conceal them.'" Cordes added that "the campaign arm of the Republican Party sent a letter to the State Department urging them to open an internal investigation into whether Clinton violated any policies there." [Politico](#) (3/5, French, 669K) reported that a spokesperson for Gowdy said in a statement, "The chairman has said the former secretary is welcome to and should release all of her emails, but legitimate investigations do not consider partial records. And that is the point of the subpoena issued yesterday by the Benghazi Committee."

[The Hill](#) (3/5, Wong, 224K) reported that Rep. Peter Roskam, who serves on the Benghazi panel, compared "Clinton to President Nixon for her use of private email accounts in office," saying in a statement, "The last time we saw a high government official seeking to edit their own responses was President Nixon, and at least then he enjoyed the benefit of executive privilege."

In his opening monologue on [Fox News' The O'Reilly Factor](#) (3/5, 767K), Bill O'Reilly said that if Clinton "did, indeed, hold back emails and investigators find them that will absolutely hurt her presidential run. If she held emails back on Benghazi, she might even be prosecuted." The [Wall Street Journal](#) (3/6, Tau, Subscription Publication, 5.67M) reports that the House Oversight panel and the Benghazi panel are preparing for what's expected to be lengthy probes of Clinton's use of private email while serving as secretary

of state.

Brianna Keilar reported on [CNN's Situation Room](#) (3/5, 554K) that the emails Clinton asked the State Department to release are emails that she and her team "had already turned over at their discretion from her server, from her private email account to the State Department when they were requested to do so in 2014." Keilar noted that the White House and State Department have been "peppered" with questions, adding that Secretary of State Kerry "brushed them off." Kerry: "I think we have all the ones that are state.gov, which are appropriate. Let me check on that when I have time to pay attention to such an important issue when I get home." Mitchell noted on [NBC Nightly News](#) (3/5, story 5, 2:05, Holt, 7.86M) that Kerry "sounded impatient about the fuss."

The [AP](#) (3/6, Braun) reports that the State Department's review of the emails "could take months, potentially a drawn-out distraction for Clinton and an unnerving development for the many Democrats who see her a

Politico: Jewell: Decision on Shell lease suspension request 'relatively soon'

POLITICO Pro Energy Whiteboard

10:48 AM (1 minute ago)

to me

3/4/15 10:47 AM EST

Shell and other Arctic leaseholders will hear about back about their requests to suspend their leases to stop them from expiring before major exploration can occur, Interior Secretary Sally Jewell says.

"We are actively working with Shell and other leaseholders up there on their requests for lease suspensions," Jewell told Senate appropriators today.

"They can expect an answer in the relatively near future," she added.

Sen. Lisa Murkowski, chairwoman of the Senate Interior appropriations subcommittee, pressed Jewell on whether eight months, the time since Shell asked Interior for a five-year suspension, is reasonable.

"I don't know what a reasonable time period is," Jewell replied, noting the difficulties in operating in the remote Arctic region.

The Interior Department is "very close" to issuing its final regulations governing fracking on federal lands, Interior Secretary Sally Jewell said on Wednesday.

"I don't control the timing on these things," she told reporters after testifying before Senate appropriators. "There are a number of steps that we have to go through. We're going through those steps methodically. We're very close to releasing the fracking rule, and then people will be able to comment on that as we work toward finalization."

Jewell [said](#) a month ago that the long-awaited final rule would be issued "in the coming weeks."

APPROPRIATIONS:

Murkowski promises markup for Interior-EPA bill

Phil Taylor, E&E reporter

Published: Wednesday, March 4, 2015

--- RESIZE TEXT --- EMAIL --- PRINT
Advertisement

The Senate's top lawmaker in charge of funding the Interior Department and U.S. EPA this morning promised that her panel this year will mark up a spending bill for the first time in at least half a decade, a pledge that she acknowledged will force debate over "horny" policy issues involving those agencies.

But lawmakers on the Interior, Environment and Related Agencies Appropriations Subcommittee also acknowledged that the spending limits set by the 2011 Budget Control Act will render much of President Obama's proposed fiscal 2016 budget -- which included significant spending hikes for Interior -- a moot point unless Congress reaches a new spending deal.

In its first hearing of the 114th Congress, the panel today reviewed Interior's \$13.2 billion request for 2016, about \$12.1 billion of which falls under the panel's jurisdiction.

In past years, GOP bids to block or curb Obama's signature air, water and lands policies as riders on the Interior-EPA spending bill prompted then-Democratic leaders not to bring a bill to a committee vote.

But that will change this year, said new Chairwoman Lisa Murkowski (R-Alaska).

"We will be marking up an Interior bill this year -- we're going to do it," Murkowski said. "We have some issues under our jurisdiction that perhaps are a little more thorny than in some of the other committees, but that should not keep us from advancing to a markup. It's our job to take up the tough issues and work together to produce legislation that reflects the collective will of the members."

But Murkowski also warned that it is "wishful thinking" for Interior Secretary Sally Jewell to believe Congress will approve a budget request that she calculated is \$1.4 billion above current spending levels. The budget assumes sequestration has already been lifted.

Obama's broader budget is \$74 billion, or 7 percent, above the discretionary spending limits set by the Budget Control Act for defense and nondefense programs. Decisions on whether Congress will break those spending limits -- providing room for some of Jewell's spending asks -- will occur mostly outside of Murkowski's panel.

"In all likelihood, we'll have roughly the same amount to spend this year as we did last year under the budget caps," Murkowski said. "So his committee is forced to make some very difficult choices in how to prioritize among the many programs in the bill."

Sen. Tom Udall (D-N.M.), the panel's new ranking member, called Jewell's budget a "bold vision" and praised its support for American Indian education, reform of wildfire funding with a disaster cap adjustment and full funding for the Land and Water Conservation Fund.

But unless sequestration is reversed, Interior's budget is "just a proposal," he warned.

"A freeze doesn't even cover the cost of ... basic fixed cost increases, let alone the new investments in this budget," Udall said. "We all need to ask ourselves, how is this Congress going to get serious about supporting important discretionary programs like these?"

Jewell was also grilled on a multitude of policy issues before her agency, which manages about one-fifth of the U.S. land mass and the vast majority of its oceans.

Murkowski, who has fiercely opposed Jewell's land management decisions in Alaska, today said she would be probing the agency's decision in January to propose that Congress protect more than 12 million acres of the Arctic National Wildlife Refuge as wilderness, a move that would place about 10 billion barrels of oil off limits.

Murkowski said she'll be asking for written responses to how the Fish and Wildlife Service crafted a new comprehensive conservation plan for ANWR that included the wilderness recommendation.

"I'll be inquiring about when they were initiated, how, who worked on them," Murkowski said. "I think it is important that folks understand how his plan came to be and the thinking behind it."

Murkowski also pressed Jewell to swiftly decide whether to honor Royal Dutch Shell PLC's request to extend billions of dollars' worth of oil and gas leases it holds in the Arctic Ocean. Shell and several other major Arctic leaseholders last year petitioned the Obama administration for more time to explore on their Alaska offshore lands ([EnergyWire](#), Oct. 28, 2014).

Murkowski said Shell has waited eight months for a response, far longer than companies wait in the Gulf of Mexico on lease suspension requests.

Jewell said that Interior is working "actively" on Shell's request but that much of its Arctic team has been busy crafting new drilling rules and updating an environmental impact statement for a past Arctic lease sale to clear the way for Shell to potentially drill in the Chukchi Sea this summer. Jewell said Shell's lease suspension request will be resolved "relatively soon."

Shell and other Arctic leaseholders will hear about back about their requests to suspend their leases to stop them from expiring before major exploration can occur, Interior Secretary Sally Jewell says.

"We are actively working with Shell and other leaseholders up there on their requests for lease suspensions," Jewell told Senate appropriators today.

"They can expect an answer in the relatively near future," she added.

Sen. Lisa Murkowski, chairwoman of the Senate Interior appropriations subcommittee, pressed Jewell on whether eight months, the time since Shell asked Interior for a five-year suspension, is reasonable.

"I don't know what a reasonable time period is," Jewell replied, noting the difficulties in operating in the remote Arctic region.

E&E's Power Plan Hub

The Senate's top lawmaker in charge of funding the Interior Department and U.S. EPA this morning promised that her panel this year will mark up a spending bill for the first time in at least half a decade, a pledge that she acknowledged will force debate over "thorny" policy issues involving those agencies.

But lawmakers on the Interior, Environment and Related Agencies Appropriations Subcommittee also acknowledged that the spending limits set by the 2011 Budget Control Act will render much of President Obama's proposed fiscal 2016 budget -- which included significant spending hikes for Interior -- a moot point unless Congress reaches a new spending deal.

In its first hearing of the 114th Congress, the panel today reviewed Interior's \$13.2 billion request for 2016, about \$12.1 billion of which falls under the panel's jurisdiction.

In past years, GOP bids to block or curb Obama's signature air, water and lands policies as riders on the Interior-EPA spending bill prompted then-Democratic leaders not to bring a bill to a committee vote.

But that will change this year, said new Chairwoman Lisa Murkowski (R-Alaska).

"We will be marking up an Interior bill this year -- we're going to do it," Murkowski said. "We have some issues under our jurisdiction that perhaps are a little more thorny than in some of the other committees, but that should not keep us from advancing to a markup. It's our job to take up the tough issues and work together to produce legislation that reflects the collective will of the members."

OIL AND GAS:

Murkowski accuses BLM of 'pay to play' in Alaska drilling

Phil Taylor, E&E reporter

Published: Wednesday, March 4, 2015

[RESIZE TEXT](#) [EMAIL](#) [DDIA PRINT](#)

Advertisement

GREENWIRE -- Register for trial access

The Bureau of Land Management's decision to charge an oil company \$8 million for the right to develop its leases in an Alaskan reserve is a slippery slope that could make other companies think twice about developing on federal lands, Alaska's senior senator said today.

Sen. Lisa Murkowski (R) grilled Interior Secretary Sally Jewell on whether her agency has the legal authority to require mitigation fees for energy projects that would otherwise be permissible on public lands.

The senator's concern stems from BLM's decision last month to approve ConocoPhillips Co.'s plan to become the first company to produce oil in the National Petroleum Reserve (NPR-A) in northwest Alaska. BLM is requiring the company to pony up \$8 million for a regional mitigation strategy that will protect lands of environmental, subsistence or cultural significance to local Native Alaskans and potentially remediate legacy wells drilled by other entities ([Greenwire](#), Feb. 16).

"We are perhaps moving in this direction of pay to play," Murkowski told Jewell during an Interior, Environment and Related Agencies Appropriations Subcommittee hearing on Interior's \$13.2 billion budget request for fiscal 2016. "The concern is 'What's the precedent of this going to be?'"

The ConocoPhillips project, known as Greater Mooses Tooth-1 (GMT1), is seen as a bellwether for how BLM will permit future exploration and production in the 22.5-million-acre Alaskan reserve, the nation's largest block of public lands and a key potential source of oil for the Trans-Alaskan Pipeline.

The size and scope of the mitigation package were major sticking points in BLM's negotiations with ConocoPhillips and drew significant criticism from Alaska lawmakers and Gov. Bill Walker (I). BLM last month said the mitigation fee does not establish a precedent for future projects.

The \$8 million represents less than 1 percent of the project's estimated \$890 million price tag.

But Murkowski warned that the mitigation policy appears subjective and sticks companies with "surprise requirements."

"It appears that companies that have deep pockets and pretty considerable investments face some requirements that may be tangentially related, maybe not even related at all, but requirements that could harm their operations as they impose a condition on permits," Murkowski said.

Jewell said the department's use of fees to offset the impacts of development is not new and has been used to mitigate the impacts of commercial-scale solar projects in the Southwest by setting aside desert tortoise habitat or buying conservation easements.

"What we're trying to do is say, 'Let's make sure that mitigation money is put into the projects that are most important to address the issues that this development impacts,'" she said.

In the case of GMT1, Jewell noted that BLM agreed to ConocoPhillips' request to build a road within a 3-mile protected area around Fish Creek, which could affect the ability of local Alaska Natives to hunt and feed themselves. The mitigation fee will allow the company to work with the Native village of Nuiqsut to ameliorate those impacts.

That's in addition to a host of other steps BLM is requiring to address air quality, wildlife, plant life and subsistence impacts that are outlined on Page 8 of the agency's [record of decision](#) for the GMT1 project.

Interior Deputy Secretary Michael Connor said ConocoPhillips balked at BLM's first mitigation proposal, but "we had a discussion and we came to an agreement with ConocoPhillips as to the level of compensatory mitigation."

"I think we have a good result, and that strategy will help us facilitate future projects as we move forward," he said.

ConocoPhillips has not said whether it intends to accept the mitigation package, nor whether it will move forward with GMT1.

An initial \$1 million payment is due in mid-April regardless of whether the project happens. Two subsequent \$3.5 million payments are due when the company installs the first gravel during the first ice road season and after completion of the drill pad, road and pipeline.

A regional mitigation strategy developed with the help of ConocoPhillips' payments "will serve as a road map for mitigating impacts from GMT1 and future projects enabled or assisted by the existence of GMT1," BLM said in February.

Compensatory mitigation fees are a key component in a separate BLM effort to incentivize commercial-scale solar development in "solar energy zones" in the Southwest.

Last summer, developers bid \$58 million for a chance to develop six parcels covering 3,083 acres in BLM's Dry Lake solar zone north of Las Vegas ([E&ENews PM](#), June 30, 2014).

BLM months earlier had finalized a [regional mitigation strategy](#) for Dry Lake that, among other things, established a \$1,836-per-acre mitigation fee for companies that develop projects in the zone, with the money going toward the restoration of lands in the nearby Gold Butte Area of Critical Environmental Concern or four other environmentally sensitive areas.

Both efforts -- Dry Lake and GMT1 -- are consistent with Jewell's October 2013 [secretarial order](#) that called for early integration of mitigation into the planning of energy projects on public lands as well as "transparency and consistency in mitigation decisions."

Conservationists have supported mitigation fees, noting that BLM lacks the budget to fund critical landscape restoration priorities. Energy industry officials say they could support them, too, as long as they are predictable and fair.

But in the case of ConocoPhillips, a regional mitigation strategy -- and a road map for predicting mitigation fees -- did not exist prior to it proposing GMT1.

Murkowski said Interior needs to be consistent on how mitigation requirements are set.

"It seems to me that there is the potential for a great deal of subjectivity here," Murkowski said. "Rather than creating efficiencies, what we may have developing here is additional unpredictability, lack of clarity ... that deters investment [and] that really can derail a project."

Shell and other Arctic leaseholders will hear about back about their requests to suspend their leases to stop them from expiring before major exploration can occur, Interior Secretary Sally Jewell says.

"We are actively working with Shell and other leaseholders up there on their requests for lease suspensions," Jewell told Senate appropriators today.

"They can expect an answer in the relatively near future," she added.

Sen. Lisa Murkowski, chairwoman of the Senate Interior appropriations subcommittee, pressed Jewell on whether eight months, the time since Shell asked Interior for a five-year suspension, is reasonable.

"I don't know what a reasonable time period is," Jewell replied, noting the difficulties in operating in the remote Arctic region.

Jewell: No Plan Afoot to Declare ANWR Monument

By [Liz Ruskin, APRN](#) | March 4, 2015

President Obama infuriated Alaska's political leaders when he announced in January he would ask Congress to protect more land within the Arctic National Wildlife Refuge as wilderness, forever off-limits to oil drilling. Some, including Sen. Lisa Murkowski, predict Obama will act on his own to bar development, by using the Antiquities Act to declare ANWR a national monument. Interior Secretary Sally Jewell said today that's not in the works.

"There's no discussions in the Administration right now about monument status for the Arctic National Wildlife Refuge," she said. She then repeated it in response to a reporter's question: "There are no plans the Administration has for using the national monument designation or the Antiquities Act for the Arctic National Wildlife Refuge."

Jewell, though, does not agree that the "no more" clause of the Alaska National Interest Lands Conservation Act would prohibit the president from declaring new national monuments in Alaska.

"I'm not an expert on the legal status but I believe we could use the Antiquities Act," Jewell said. "But there are no plans to do so in Alaska at this time."

OIL AND GAS:
Murkowski accuses BLM of 'pay to play' in Alaska drilling

Advertisement

GREENWIRE -- Register for trial access

The Bureau of Land Management's decision to charge an oil company \$8 million for the right to develop its leases in an Alaskan reserve is a slippery slope that could make other companies think twice about developing on federal lands, Alaska's senior senator said today.

Sen. Lisa Murkowski (R) grilled Interior Secretary Sally Jewell on whether her agency has the legal authority to require mitigation fees for energy projects that would otherwise be permissible on public lands.

The senator's concern stems from BLM's decision last month to approve ConocoPhillips Co.'s plan to become the first company to produce oil in the National Petroleum Reserve (NPR-A) in northwest Alaska. BLM is requiring the company to pony up \$8 million for a regional mitigation strategy that will protect lands of environmental, subsistence or cultural significance to local Native Alaskans and potentially remediate legacy wells drilled by other entities ([Greenwire](#), Feb. 16).

"We are perhaps moving in this direction of pay to play," Murkowski told Jewell during an Interior, Environment and Related Agencies Appropriations Subcommittee hearing on Interior's \$13.2 billion budget request for fiscal 2016. "The concern is 'What's the precedent of this going to be?'"

The ConocoPhillips project, known as Greater Mooses Tooth-1 (GMT1), is seen as a bellwether for how BLM will permit future exploration and production in the 22.5-million-acre Alaskan reserve, the nation's largest block of public lands and a key potential source of oil for the Trans-Alaskan Pipeline.

The size and scope of the mitigation package were major sticking points in BLM's negotiations with ConocoPhillips and drew significant criticism from Alaska lawmakers and Gov. Bill Walker (I). BLM last month said the mitigation fee does not establish a precedent for future projects.

The \$8 million represents less than 1 percent of the project's estimated \$890 million price tag.

But Murkowski warned that the mitigation policy appears subjective and sticks companies with "surprise requirements."

"It appears that companies that have deep pockets and pretty considerable investments face some requirements that may be tangentially related, maybe not even related at all, but requirements that could harm their operations as they impose a condition on permits," Murkowski said.

Jewell said the department's use of fees to offset the impacts of development is not new and has been used to mitigate the impacts of commercial-scale solar projects in the Southwest by setting aside desert tortoise habitat or buying conservation easements.

"What we're trying to do is say, 'Let's make sure that mitigation money is put into the projects that are most important to address the issues that this development impacts,'" she said.

In the case of GMT1, Jewell noted that BLM agreed to ConocoPhillips' request to build a road within a 3-mile protected area around Fish Creek, which could affect the ability of local Alaska Natives to hunt and feed themselves. The mitigation fee will allow the company to work with the Native village of Nuiqsut to ameliorate those impacts.

That's in addition to a host of other steps BLM is requiring to address air quality, wildlife, plant life and subsistence impacts that are outlined on Page 8 of the agency's [record of decision](#) for the GMT1 project.

Interior Deputy Secretary Michael Connor said ConocoPhillips balked at BLM's first mitigation proposal, but "we had a discussion and we came to an agreement with ConocoPhillips as to the level of compensatory mitigation."

"I think we have a good result, and that strategy will help us facilitate future projects as we move forward," he said.

ConocoPhillips has not said whether it intends to accept the mitigation package, nor whether it will move forward with GMT1.

An initial \$1 million payment is due in mid-April regardless of whether the project happens. Two subsequent \$3.5 million payments are due when the company installs the first gravel during the first ice road season and after completion of the drill pad, road and pipeline.

A regional mitigation strategy developed with the help of ConocoPhillips' payments "will serve as a road map for mitigating impacts from GMT1 and future projects enabled or assisted by the existence of GMT1," BLM said in February.

Compensatory mitigation fees are a key component in a separate BLM effort to incentivize commercial-scale solar development in "solar energy zones" in the Southwest.

Last summer, developers bid \$58 million for a chance to develop six parcels covering 3,083 acres in BLM's Dry Lake solar zone north of Las Vegas ([E&ENews PM](#), June 30, 2014).

BLM months earlier had finalized a [regional mitigation strategy](#) for Dry Lake that, among other things, established a \$1,836-per-acre mitigation fee for companies that develop projects in the zone, with the money going toward the restoration of lands in the nearby Gold Butte Area of Critical Environmental Concern or four other environmentally sensitive areas.

Both efforts -- Dry Lake and GMT1 -- are consistent with Jewell's October 2013 [secretarial order](#) that called for early integration of mitigation into the planning of energy projects on public lands as well as "transparency and consistency in mitigation decisions."

Conservationists have supported mitigation fees, noting that BLM lacks the budget to fund critical landscape restoration priorities. Energy industry officials say they could support them, too, as long as they are predictable and fair.

But in the case of ConocoPhillips, a regional mitigation strategy -- and a road map for predicting mitigation fees -- did not exist prior to it proposing GMT1.

Murkowski said Interior needs to be consistent on how mitigation requirements are set.

"It seems to me that there is the potential for a great deal of subjectivity here," Murkowski said. "Rather than creating efficiencies, what we may have developing here is additional unpredictability, lack of clarity ... that deters investment [and] that really can derail a project."

APPROPRIATIONS:

Murkowski promises markup for Interior-EPA bill

Phil Taylor, E&E reporter

Published: Wednesday, March 4, 2015

-- RESIZE TEXT -- EMAIL PRINT

Advertisement

E&E's Power Plan Hub

The Senate's top lawmaker in charge of funding the Interior Department and U.S. EPA this morning promised that her panel this year will mark up a spending bill for the first time in at least half a decade, a pledge that she acknowledged will force debate over "thorny" policy issues involving those agencies.

But lawmakers on the Interior, Environment and Related Agencies Appropriations Subcommittee also acknowledged that the spending limits set by the 2011 Budget Control Act will render much of President Obama's proposed fiscal 2016 budget -- which included significant spending hikes for Interior -- a moot point unless Congress reaches a new spending deal.

In its first hearing of the 114th Congress, the panel today reviewed Interior's \$13.2 billion request for 2016, about \$12.1 billion of which falls under the panel's jurisdiction.

In past years, GOP bids to block or curb Obama's signature air, water and lands policies as riders on the Interior-EPA spending bill prompted then-Democratic leaders not to bring a bill to a committee vote.

But that will change this year, said new Chairwoman Lisa Murkowski (R-Alaska).

"We will be marking up an Interior bill this year -- we're going to do it," Murkowski said. "We have some issues under our jurisdiction that perhaps are a little more thorny than in some of the other committees, but that should not keep us from advancing to a markup. It's our job to take up the tough issues and work together to produce legislation that reflects the collective will of the members."

But Murkowski also warned that it is "wishful thinking" for Interior Secretary Sally Jewell to believe Congress will approve a budget request that she calculated is \$1.4 billion above current spending levels. The budget assumes sequestration has already been lifted.

Obama's broader budget is \$74 billion, or 7 percent, above the discretionary spending limits set by the Budget Control Act for defense and nondefense programs. Decisions on whether Congress will break those spending limits -- providing room for some of Jewell's spending asks -- will occur mostly outside of Murkowski's panel.

"In all likelihood, we'll have roughly the same amount to spend this year as we did last year under the budget caps," Murkowski said. "So his committee is forced to make some very difficult choices in how to prioritize among the many programs in the bill."

Sen. Tom Udall (D-N.M.), the panel's new ranking member, called Jewell's budget a "bold vision" and praised its support for American Indian education, reform of wildfire funding with a disaster cap adjustment and full funding for the Land and Water Conservation Fund.

But unless sequestration is reversed, Interior's budget is "just a proposal," he warned.

"A freeze doesn't even cover the cost of ... basic fixed cost increases, let alone the new investments in this budget," Udall said. "We all need to ask ourselves, how is this Congress going to get serious about supporting important discretionary programs like these?"

Jewell was also grilled on a multitude of policy issues before her agency, which manages about one-fifth of the U.S. land mass and the vast majority of its oceans.

Murkowski, who has fiercely opposed Jewell's land management decisions in Alaska, today said she would be probing the agency's decision in January to propose that Congress protect more than 12 million acres of the Arctic National Wildlife Refuge as wilderness, a move that would place about 10 billion barrels of oil off limits.

Murkowski said she'll be asking for written responses to how the Fish and Wildlife Service crafted a new comprehensive conservation plan for ANWR that included the wilderness recommendation.

"I'll be inquiring about when they were initiated, how, who worked on them," Murkowski said. "I think it is important that folks understand how his plan came to be and the thinking behind it."

Murkowski also pressed Jewell to swiftly decide whether to honor Royal Dutch Shell PLC's request to extend billions of dollars' worth of oil and gas leases it holds in the Arctic Ocean. Shell and several other major Arctic leaseholders last year petitioned the Obama administration for more time to explore on their Alaska offshore lands ([EnergyWire](#), Oct. 28, 2014).

Murkowski said Shell has waited eight months for a response, far longer than companies wait in the Gulf of Mexico on lease suspension requests.

Jewell said that Interior is working "actively" on Shell's request but that much of its Arctic team has been busy crafting new drilling rules and updating an environmental impact statement for a past Arctic lease sale to clear the way for Shell to potentially drill in the Chukchi Sea this summer. Jewell said Shell's lease suspension request will be resolved "relatively soon."

U.S. to decide soon on Shell request for extra time on Arctic leases

Jennifer A. Dlouhy | Houston Chronicle March 4, 2015

ShEmail Print
on

+A

WASHINGTON -- The Obama administration will decide soon whether to sign off on Shell's request for extra time to hunt for oil in Arctic waters, Interior Secretary Sally Jewell said Wednesday.

Without action, Shell's oil and gas leases in the Beaufort Sea will begin expiring in 2017, followed by its drilling rights in the neighboring Chukchi Sea two years later.

RELATED:

[Environmentalists sue Port of Seattle over Shell's Arctic drilling fleet](#)

[Interior agencies release proposed new Arctic Ocean drilling standards](#)

The same fate awaits Chukchi Sea leases sold in 2008 to Statoil and ConocoPhillips, which have made similar appeals for more time, citing regulatory uncertainty, legal challenges and other obstacles.

"We are actively working with Shell and other leaseholders up there on their request for suspensions," Jewell said during a Senate Appropriations subcommittee hearing. "We will be resolving that relatively soon."

The companies' bids for "suspensions of operation" would effectively stop the clock ticking on their 10-year leases. The Bureau of Safety and Environmental Enforcement is considering requests from Shell and Statoil filed in July 2014; it previously rejected ConocoPhillips' November 2013 bid for at least three more years. ConocoPhillips appealed the decision to an Interior Department appeals board, and settlement talks are under way.

Neither Statoil nor ConocoPhillips is actively pursuing drilling in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. It needs to retain its existing lease portfolio to warrant this enormous investment."

She cited the limited 75-day window for drilling in the Arctic, when waters are free of ice, unlike year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have blocked work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those delays.

Most recently, the Bureau of Ocean Energy Management completed a new environmental analysis of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. The decision to affirm, change or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

Jewell stressed that Interior Department regulators are dedicated to completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," she said.

Jewell also made a nod to mishaps that marred Shell's 2012 Arctic operation, including the grounding of its Kulluk drilling rig and the company's difficulty readying an emergency oil spill containment system to safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsibly, and we want to be responsive to the companies."

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time would be unwarranted "special treatment" said Oceana Deputy Vice President Susan Murray.

"Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging," Murray said. "Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases."

In general, offshore leases expire unless operators are "conducting operations" on them, such as drilling, reworking wells or producing oil and gas.

"Suspension of operation" requests are relatively common in the Gulf of Mexico, where they often are filed shortly before leases are set to expire.

Safety bureau spokesman Nicholas Pardi said the agency "evaluates suspension requests on a case-by-case basis."

<http://www.alaskapublic.org/2015/03/04/murkowski-seeks-lease-extensions-for-shell/>

Murkowski Seeks Lease Extensions for Shell

By [Name] on [Date]

Last summer, Shell asked the government to extend its offshore drilling leases in the Arctic. Today, U.S. Sen. Lisa Murkowski pressed Shell's case to Interior Secretary Sally Jewell in a Senate hearing. Murkowski says Shell needs certainty to continue to invest billions of dollars in its Arctic operations.

VmIP

"Because of this very short window, a 75-day Arctic drilling season, and the difficulties and the delays and the legal challenges that are all out there, that Shell has endured for the past decade, there really are not enough drilling seasons remaining for Shell to complete more than a handful of exploration wells before the Chukchi lease portfolio expires," Murkowski said.

Jewell says the clock on Shell's 10-year leases in the Chukchi Sea was stopped for a period when a court ruled the government had to redo its environmental impact statement. Jewell says her department is still considering Shell's request for a five-year suspension of the lease clock.

"We took our resources and focused them, as we were requested to do, on helping Shell move forward for this drilling season. I also know that we are actively working with them on suspensions and I think they can expect any answer in the relatively near future," Jewell said.

Oceana and other environmental groups oppose giving Shell more time on their leases. They say the reasons for Shell's lack of progress were known from outset, like the harsh conditions and the Native whaling season, or were of Shell's own making.

GREENWIRE -- Register for trial access

The Bureau of Land Management's decision to charge an oil company \$8 million for the right to develop its leases in an Alaskan reserve is a slippery slope that could make other companies think twice about developing on federal lands, Alaska's senior senator said today.

Sen. Lisa Murkowski (R) grilled Interior Secretary Sally Jewell on whether her agency has the legal authority to require mitigation fees for energy projects that would otherwise be permissible on public lands.

The senator's concern stems from BLM's decision last month to approve ConocoPhillips Co.'s plan to become the first company to produce oil in the National Petroleum Reserve (NPR-A) in northwest Alaska. BLM is requiring the company to pony up \$8 million for a regional mitigation strategy that will protect lands of environmental, subsistence or cultural significance to local Native Alaskans and potentially remediate legacy wells drilled by other entities ([Greenwire](#), Feb. 16).

"We are perhaps moving in this direction of pay to play," Murkowski told Jewell during an Interior, Environment and Related Agencies Appropriations Subcommittee hearing on Interior's \$13.2 billion budget request for fiscal 2016. "The concern is 'What's the precedent of this going to be?'"

The ConocoPhillips project, known as Greater Mooses Tooth 1 (GMT1), is seen as a bellwether for how BLM will permit future exploration and production in the

22.5-million-acre Alaskan reserve, the nation's largest block of public lands and a key potential source of oil for the Trans-Alaskan Pipeline.

The size and scope of the mitigation package were major sticking points in BLM's negotiations with ConocoPhillips and drew significant criticism from Alaska lawmakers and Gov. Bill Walker (I). BLM last month said the mitigation fee does not establish a precedent for future projects.

The \$8 million represents less than 1 percent of the project's estimated \$890 million price tag.

But Murkowski warned that the mitigation policy appears subjective and sticks companies with "surprise requirements."

"It appears that companies that have deep pockets and pretty considerable investments face some requirements that may be tangentially related, maybe not even related at all, but requirements that could harm their operations as they impose a condition on permits," Murkowski said.

Jewell said the department's use of fees to offset the impacts of development is not new and has been used to mitigate the impacts of commercial-scale solar projects in the Southwest by setting aside desert tortoise habitat or buying conservation easements.

"What we're trying to do is say, 'Let's make sure that mitigation money is put into the projects that are most important to address the issues that this development impacts,'" she said.

In the case of GMT1, Jewell noted that BLM agreed to ConocoPhillips' request to build a road within a 3-mile protected area around Fish Creek, which could affect the ability of local Alaska Natives to hunt and feed themselves. The mitigation fee will allow the company to work with the Native village of Nuiqsut to ameliorate those impacts.

That's in addition to a host of other steps BLM is requiring to address air quality, wildlife, plant life and subsistence impacts that are outlined on Page 8 of the agency's [record of decision](#) for the GMT1 project.

Interior Deputy Secretary Michael Connor said ConocoPhillips balked at BLM's first mitigation proposal, but "we had a discussion and we came to an agreement with ConocoPhillips as to the level of compensatory mitigation."

"I think we have a good result, and that strategy will help us facilitate future projects as we move forward," he said.

ConocoPhillips has not said whether it intends to accept the mitigation package, nor whether it will move forward with GMT1.

An initial \$1 million payment is due in mid-April regardless of whether the project happens. Two subsequent \$3.5 million payments are due when the company installs the first gravel during the first ice road season and after completion of the drill pad, road and pipeline.

A regional mitigation strategy developed with the help of ConocoPhillips' payments "will serve as a road map for mitigating impacts from GMT1 and future projects enabled or assisted by the existence of GMT1," BLM said in February.

Compensatory mitigation fees are a key component in a separate BLM effort to incentivize commercial-scale solar development in "solar energy zones" in the Southwest.

Last summer, developers bid \$5.8 million for a chance to develop six parcels covering 3,083 acres in BLM's Dry Lake solar zone north of Las Vegas ([E&ENews PM](#), June 30, 2014).

BLM months earlier had finalized a [regional mitigation strategy](#) for Dry Lake that, among other things, established a \$1,836-per-acre mitigation fee for companies that develop projects in the zone, with the money going toward the restoration of lands in the nearby Gold Butte Area of Critical Environmental Concern or four other environmentally sensitive areas.

Both efforts -- Dry Lake and GMT1 -- are consistent with Jewell's October 2013 [secretarial order](#) that called for early integration of mitigation into the planning of energy projects on public lands as well as "transparency and consistency in mitigation decisions."

Conservationists have supported mitigation fees, noting that BLM lacks the budget to fund critical landscape restoration priorities. Energy industry officials say they could support them, too, as long as they are predictable and fair.

But in the case of ConocoPhillips, a regional mitigation strategy -- and a road map for predicting mitigation fees -- did not exist prior to it proposing GMT1.

Murkowski said Interior needs to be consistent on how mitigation requirements are set.

"It seems to me that there is the potential for a great deal of subjectivity here," Murkowski said. "Rather than creating efficiencies, what we may have developing here is additional unpredictability, lack of clarity ... that deters investment [and] that really can derail a project."

APPROPRIATIONS:

Murkowski promises markup for Interior-EPA bill

Phil Taylor, E&E reporter

Published: Wednesday, March 4, 2015

RESIZE TEXT EMAIL PRINT

Advertisement

The Senate's top lawmaker in charge of funding the Interior Department and U.S. EPA this morning promised that her panel this year will mark up a spending bill for the first time in at least half a decade, a pledge that she acknowledged will force debate over "horny" policy issues involving those agencies.

But lawmakers on the Interior, Environment and Related Agencies Appropriations Subcommittee also acknowledged that the spending limits set by the 2011 Budget Control Act will render much of President Obama's proposed fiscal 2016 budget -- which included significant spending hikes for Interior -- a moot point unless Congress reaches a new spending deal.

In its first hearing of the 114th Congress, the panel today reviewed Interior's \$13.2 billion request for 2016, about \$12.1 billion of which falls under the panel's jurisdiction.

In past years, GOP bids to block or curb Obama's signature air, water and lands policies as riders on the Interior-EPA spending bill prompted then-Democratic leaders not to bring a bill to a committee vote.

But that will change this year, said new Chairwoman Lisa Murkowski (R-Alaska).

"We will be marking up an Interior bill this year -- we're going to do it," Murkowski said. "We have some issues under our jurisdiction that perhaps are a little more thorny than in some of the other committees, but that should not keep us from advancing to a markup. It's our job to take up the tough issues and work together to produce legislation that reflects the collective will of the members."

But Murkowski also warned that it is "wishful thinking" for Interior Secretary Sally Jewell to believe Congress will approve a budget request that she calculated is \$1.4 billion above current spending levels. The budget assumes sequestration has already been lifted.

Obama's broader budget is \$74 billion, or 7 percent, above the discretionary spending limits set by the Budget Control Act for defense and nondefense programs. Decisions on whether Congress will break those spending limits -- providing room for some of Jewell's spending asks -- will occur mostly outside of Murkowski's panel.

"In all likelihood, we'll have roughly the same amount to spend this year as we did last year under the budget caps," Murkowski said. "So his committee is forced to make some very difficult choices in how to prioritize among the many programs in the bill."

Sen. Tom Udall (D-N.M.), the panel's new ranking member, called Jewell's budget a "bold vision" and praised its support for American Indian education, reform of wildfire funding with a disaster cap adjustment and full funding for the Land and Water Conservation Fund.

But unless sequestration is reversed, Interior's budget is "just a proposal," he warned.

"A freeze doesn't even cover the cost of ... basic fixed cost increases, let alone the new investments in this budget," Udall said. "We all need to ask ourselves, how is this Congress going to get serious about supporting important discretionary programs like these?"

Jewell was also grilled on a multitude of policy issues before her agency, which manages about one-fifth of the U.S. land mass and the vast majority of its oceans.

Murkowski, who has fiercely opposed Jewell's land management decisions in Alaska, today said she would be probing the agency's decision in January to propose that Congress protect more than 12 million acres of the Arctic National Wildlife Refuge as wilderness, a move that would place about 10 billion barrels of oil off limits.

Murkowski said she'll be asking for written responses to how the Fish and Wildlife Service crafted a new comprehensive conservation plan for ANWR that included the wilderness recommendation.

"I'll be inquiring about when they were initiated, how, who worked on them," Murkowski said. "I think it is important that folks understand how his plan came to be and the thinking behind it."

Murkowski also pressed Jewell to swiftly decide whether to honor Royal Dutch Shell PLC's request to extend billions of dollars' worth of oil and gas leases it holds in the Arctic Ocean. Shell and several other major Arctic leaseholders last year petitioned the Obama administration for more time to explore on their Alaska offshore lands ([EnergyWire](#), Oct. 28, 2014).

Murkowski said Shell has waited eight months for a response, far longer than companies wait in the Gulf of Mexico on lease suspension requests.

Jewell said that Interior is working "actively" on Shell's request but that much of its Arctic team has been busy crafting new drilling rules and updating an environmental impact statement for a past Arctic lease sale to clear the way for Shell to potentially drill in the Chukchi Sea this summer. Jewell said Shell's lease suspension request will be resolved "relatively soon."

WASHINGTON — The Obama administration will decide soon whether to give in to [Shell's request for extra time to hunt for oil in Arctic waters](#), Interior Secretary Sally Jewell said Wednesday.

Without action, Shell's oil and gas leases in the Beaufort Sea will begin expiring in 2017, followed by its drilling rights in the neighboring Chukchi Sea two years later.

The same fate awaits Chukchi Sea leases sold in 2008 to Statoil and ConocoPhillips, which have made similar appeals for more time, citing regulatory uncertainty, legal challenges and other obstacles.

Read more: [Oil companies want more time for Arctic drilling](#)

"We are actively working with Shell and other leaseholders up there on their request for suspensions," Jewell said during a Senate Appropriations subcommittee hearing. "We will be resolving that relatively soon."

The companies' bids for "suspensions of operation" would effectively stop the clock ticking on their 10-year leases. The Bureau of Safety and Environmental Enforcement is actively considering the requests from Shell and Statoil that were filed in July 2014; it previously rejected ConocoPhillips' November 2013 bid for at least three more years. ConocoPhillips appealed the decision to an Interior Department appeals board, and settlement talks are now under way.

Neither Statoil nor ConocoPhillips has active plans to drill in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells that stopped short of penetrating potential oil-bearing zones.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. (Shell) needs to retain its existing lease portfolio to warrant this enormous investment."

Limited window

Murkowski cited the limited 75-day window for drilling in the Arctic, when waters are free of ice — as opposed to the year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have delayed work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those legal delays.

Most recently, the Bureau of Ocean Energy Management [completed a new environmental analysis](#) of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. But the final decision on whether to affirm, modify or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

'Helping Shell'

Jewell stressed that Interior Department regulators were focused on completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," Jewell said.

Jewell also made a nod to the mishaps that marred Shell's 2012 Arctic operation, including the grounding of its non-propelled Kulluk drilling rig during an ill-fated tow across the Gulf of Alaska and the company's difficulty certifying and readying a unique emergency oil spill containment system so it could safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsively, and we want to be responsive to the companies."

'Special treatment'

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time amounts to unwarranted "special treatment" said Oceana Deputy Vice President Susan Murray in [a Feb. 27 letter to the safety bureau](#).

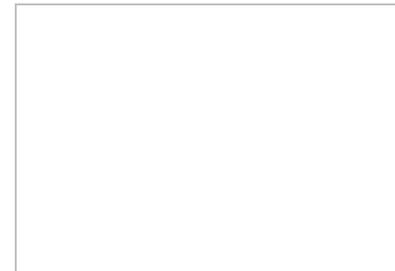

"Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging," Murray said. "Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases."

Extensions also could mean taxpayers — who own the oil at issue — are "no longer getting fair value," said Michael LeVine, Pacific senior counsel for the group. "The government sold the rights to public resources under a certain set of circumstances and terms and shouldn't then rule to change those terms."

In general, leases expire at the end of their terms unless operators are "conducting operations" on the lease, such as drilling, reworking wells or producing oil and gas.

"Suspension of operation" requests are relatively common in the Gulf of Mexico, where they often are filed right before leases are set to expire, unlike the Arctic requests now pending before the safety bureau.

Safety bureau spokesman Nicholas Pardi said the agency "evaluates suspension requests on a case-by-case basis."

Shell used the drillship Noble Discoverer for its 2012 drilling in the Chukchi Sea north of Alaska. (Jennifer A. Dlouhy / The Houston Chronicle)

Federal regulations give the agency relatively little authority to grant the suspensions, including to allow compliance with judicial decrees, when activities pose a threat of harm or damage, when they are needed to install safety equipment or conduct environmental analysis and to allow for "inordinate delays" in obtaining permits.

The oil companies' requests may lay the groundwork for bigger changes, including potential action by Congress and the Obama administration to rewrite the terms of oil and gas leases in isolated Arctic waters.

U.S. to decide soon on Shell request for extra time on Arctic leases

Jennifer A. Dlouhy | Houston Chronicle March 4, 2015

WASHINGTON – The Obama administration will decide soon whether to sign off on Shell's request for extra time to hunt for oil in Arctic waters, Interior Secretary Sally Jewell said Wednesday.

Without action, Shell's oil and gas leases in the Beaufort Sea will begin expiring in 2017, followed by its drilling rights in the neighboring Chukchi Sea two years later.

The same fate awaits Chukchi Sea leases sold in 2008 to Statoil and ConocoPhillips, which have made similar appeals for more time, citing regulatory uncertainty, legal challenges and other obstacles.

"We are actively working with Shell and other leaseholders up there on their request for suspensions," Jewell said during a Senate Appropriations subcommittee hearing. "We will be resolving that relatively soon."

The companies' bids for "suspensions of operation" would effectively stop the clock ticking on their 10-year leases. The Bureau of Safety and Environmental Enforcement is considering requests from Shell and Statoil filed in July 2014; it previously rejected ConocoPhillips' November 2013 bid for at least three more years. ConocoPhillips appealed the decision to an Interior Department appeals board, and settlement talks are under way.

Neither Statoil nor ConocoPhillips is actively pursuing drilling in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. It needs to retain its existing lease portfolio to warrant this enormous investment."

She cited the limited 75-day window for drilling in the Arctic, when waters are free of ice, unlike year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have blocked work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those delays.

Most recently, the Bureau of Ocean Energy Management completed a new environmental analysis of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. The decision to affirm, change or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

Jewell stressed that Interior Department regulators are dedicated to completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," she said.

Jewell also made a nod to mishaps that marred Shell's 2012 Arctic operation, including the grounding of its Kulluk drilling rig and the company's difficulty readying an emergency oil spill containment system to safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsively, and we want to be responsive to the companies."

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time would be unwarranted "special treatment" said Oceana Deputy Vice President Susan Murray.

"Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging," Murray said. "Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases."

In general, offshore leases expire unless operators are "conducting operations" on them, such as drilling, reworking wells or producing oil and gas.

"Suspension of operation" requests are relatively common in the Gulf of Mexico, where they often are filed shortly before leases are set to expire.

Safety bureau spokesman Nicholas Pardi said the agency "evaluates suspension requests on a case-by-case basis."

Murkowski Seeks Lease Extensions for Shell

By Liz Ruskin, APRN | March 4, 2015

Last summer, Shell asked the government to extend its offshore drilling leases in the Arctic. Today, U.S. Sen. Lisa Murkowski pressed Shell's case to Interior Secretary Sally Jewell in a Senate hearing. Murkowski says Shell needs certainty to continue to invest billions of dollars in its Arctic operations.

Vm|P

"Because of this very short window, a 75-day Arctic drilling season, and the difficulties and the delays and the legal challenges that are all out there, that Shell has endured for the past decade, there really are not enough drilling seasons remaining for Shell to complete more than a handful of exploration wells before the Chukchi lease portfolio expires," Murkowski said.

Jewell says the clock on Shell's 10-year leases in the Chukchi Sea was stopped for a period when a court ruled the government had to redo its environmental impact statement. Jewell says her department is still considering Shell's request for a five-year suspension of the lease clock.

"We took our resources and focused them, as we were requested to do, on helping Shell move forward for this drilling season. I also know that we are actively working with them on suspensions and I think they can expect any answer in the relatively near future," Jewell said.

Oceana and other environmental groups oppose giving Shell more time on their leases. They say the reasons for Shell's lack of progress were known from outset, like the harsh conditions and the Native whaling season, or were of Shell's own making.

Jewell: No Plan Afoot to Declare ANWR Monument

By Liz Ruskin, APRN | March 4, 2015

President Obama infuriated Alaska's political leaders when he announced in January he would ask Congress to protect more land within the Arctic National Wildlife Refuge as wilderness, forever off-limits to oil drilling. Some, including Sen. Lisa Murkowski, predict Obama will act on his own to bar development, by using the Antiquities Act to declare ANWR a national monument. Interior Secretary Sally Jewell said today that's not in the works.

"There's no discussions in the Administration right now about monument status for the Arctic National Wildlife Refuge," she said. She then repeated it in response to a reporter's question: "There are no plans the Administration has for using the national monument designation or the Antiquities Act for the Arctic National Wildlife Refuge."

Jewell, though, does not agree that the "no more" clause of the Alaska National Interest Lands Conservation Act would prohibit the president from declaring new national monuments in Alaska.

"I'm not an expert on the legal status but I believe we could use the Antiquities Act," Jewell said. "But there are no plans to do so in Alaska at this time."

OIL AND GAS:

Murkowski accuses BLM of 'pay to play' in Alaska drilling

Phil Taylor, E&E reporter

Published: Wednesday, March 4, 2015

RESIZE TEXT EMAIL PRINT

Advertisement

GREENWIRE -- Register for trial access

The Bureau of Land Management's decision to charge an oil company \$8 million for the right to develop its leases in an Alaskan reserve is a slippery slope that could make other companies think twice about developing on federal lands, Alaska's senior senator said today.

Sen. Lisa Murkowski (R) grilled Interior Secretary Sally Jewell on whether her agency has the legal authority to require mitigation fees for energy projects that would otherwise be permissible on public lands.

The senator's concern stems from BLM's decision last month to approve ConocoPhillips Co.'s plan to become the first company to produce oil in the National Petroleum Reserve (NPR-A) in northwest Alaska. BLM is requiring the company to pony up \$8 million for a regional mitigation strategy that will protect lands of environmental, subsistence or cultural significance to local Native Alaskans and potentially remediate legacy wells drilled by other entities ([Greenwire](#), Feb. 16).

"We are perhaps moving in this direction of pay to play," Murkowski told Jewell during an Interior, Environment and Related Agencies Appropriations Subcommittee hearing on Interior's \$13.2 billion budget request for fiscal 2016. "The concern is 'What's the precedent of this going to be?'"

The ConocoPhillips project, known as Greater Mooses Tooth-1 (GMT1), is seen as a bellwether for how BLM will permit future exploration and production in the 22.5-million-acre Alaskan reserve, the nation's largest block of public lands and a key potential source of oil for the Trans-Alaskan Pipeline.

The size and scope of the mitigation package were major sticking points in BLM's negotiations with ConocoPhillips and drew significant criticism from Alaska lawmakers and Gov. Bill Walker (I). BLM last month said the mitigation fee does not establish a precedent for future projects.

The \$8 million represents less than 1 percent of the project's estimated \$890 million price tag.

But Murkowski warned that the mitigation policy appears subjective and sticks companies with "surprise requirements."

"It appears that companies that have deep pockets and pretty considerable investments face some requirements that may be tangentially related, maybe not even related at all, but requirements that could harm their operations as they impose a condition on permits," Murkowski said.

Jewell said the department's use of fees to offset the impacts of development is not new and has been used to mitigate the impacts of commercial-scale solar projects in the Southwest by setting aside desert tortoise habitat or buying conservation easements.

"What we're trying to do is say, 'Let's make sure that mitigation money is put into the projects that are most important to address the issues that this development impacts,'" she said.

In the case of GMT1, Jewell noted that BLM agreed to ConocoPhillips' request to build a road within a 3-mile protected area around Fish Creek, which could affect the ability of local Alaska Natives to hunt and feed themselves. The mitigation fee will allow the company to work with the Native village of Nuiqsut to ameliorate those impacts.

That's in addition to a host of other steps BLM is requiring to address air quality, wildlife, plant life and subsistence impacts that are outlined on Page 8 of the agency's [record of decision](#) for the GMT1 project.

Interior Deputy Secretary Michael Connor said ConocoPhillips balked at BLM's first mitigation proposal, but "we had a discussion and we came to an agreement with ConocoPhillips as to the level of compensatory mitigation."

"I think we have a good result, and that strategy will help us facilitate future projects as we move forward," he said.

ConocoPhillips has not said whether it intends to accept the mitigation package, nor whether it will move forward with GMT1.

An initial \$1 million payment is due in mid-April regardless of whether the project happens. Two subsequent \$3.5 million payments are due when the company installs the first gravel during the first ice road season and after completion of the drill pad, road and pipeline.

A regional mitigation strategy developed with the help of ConocoPhillips' payments "will serve as a road map for mitigating impacts from GMT1 and future projects enabled or assisted by the existence of GMT1," BLM said in February.

Compensatory mitigation fees are a key component in a separate BLM effort to incentivize commercial-scale solar development in "solar energy zones" in the Southwest.

Last summer, developers bid \$58 million for a chance to develop six parcels covering 3,083 acres in BLM's Dry Lake solar zone north of Las Vegas ([E&ENews PM](#), June 30, 2014).

BLM months earlier had finalized a [regional mitigation strategy](#) for Dry Lake that, among other things, established a \$1,836-per-acre mitigation fee for companies that develop projects in the zone, with the money going toward the restoration of lands in the nearby Gold Butte Area of Critical Environmental Concern or four other environmentally sensitive areas.

Both efforts -- Dry Lake and GMT1 -- are consistent with Jewell's October 2013 [secretarial order](#) that called for early integration of mitigation into the planning of energy projects on public lands as well as "transparency and consistency in mitigation decisions."

Conservationists have supported mitigation fees, noting that BLM lacks the budget to fund critical landscape restoration priorities. Energy industry officials say they could support them, too, as long as they are predictable and fair.

But in the case of ConocoPhillips, a regional mitigation strategy – and a road map for predicting mitigation fees – did not exist prior to it proposing GMT1.

Murkowski said Interior needs to be consistent on how mitigation requirements are set.

"It seems to me that there is the potential for a great deal of subjectivity here," Murkowski said. "Rather than creating efficiencies, what we may have developing here is additional unpredictability, lack of clarity ... that deters investment [and] that really can derail a project."

WASHINGTON — The Obama administration will decide soon whether to give in to [Shell's request for extra time to hunt for oil in Arctic waters](#). Interior Secretary Sally Jewell said Wednesday.

Without action, Shell's oil and gas leases in the Beaufort Sea will begin expiring in 2017, followed by its drilling rights in the neighboring Chukchi Sea two years later.

The same fate awaits Chukchi Sea leases sold in 2008 to Statoil and ConocoPhillips, which have made similar appeals for more time, citing regulatory uncertainty, legal challenges and other obstacles.

Read more: [Oil companies want more time for Arctic drilling](#)

"We are actively working with Shell and other leaseholders up there on their request for suspensions," Jewell said during a Senate Appropriations subcommittee hearing. "We will be resolving that relatively soon."

The companies' bids for "suspensions of operation" would effectively stop the clock ticking on their 10-year leases. The Bureau of Safety and Environmental Enforcement is actively considering the requests from Shell and Statoil that were filed in July 2014; it previously rejected ConocoPhillips' November 2013 bid for at least three more years. ConocoPhillips appealed the decision to an Interior Department appeals board, and settlement talks are now under way.

Shell used the drillship Noble Discoverer for its 2012 drilling in the Chukchi Sea north of Alaska. (Jennifer A. Dlouhy / The Houston Chronicle)

Neither Statoil nor ConocoPhillips has active plans to drill in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells that stopped short of penetrating potential oil-bearing zones.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. (Shell) needs to retain its existing lease portfolio to warrant this enormous investment."

Limited window

Murkowski cited the limited 75-day window for drilling in the Arctic, when waters are free of ice — as opposed to the year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have delayed work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those legal delays.

Most recently, the Bureau of Ocean Energy Management [completed a new environmental analysis](#) of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. But the final decision on whether to affirm, modify or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

'Helping Shell'

Jewell stressed that Interior Department regulators were focused on completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," Jewell said.

Jewell also made a nod to the mishaps that marred Shell's 2012 Arctic operation, including the grounding of its non-propelled Kulluk drilling rig during an ill-fated tow across the Gulf of Alaska and the company's difficulty certifying and readying a unique emergency oil spill containment system so it could safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsively, and we want to be responsive to the companies."

'Special treatment'

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time amounts to unwarranted "special treatment" said Oceana Deputy Vice President Susan Murray in [a Feb. 27 letter to the safety bureau](#).

"Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging," Murray said. "Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases."

Extensions also could mean taxpayers — who own the oil at issue — are "no longer getting fair value," said Michael LeVine, Pacific senior counsel for the group. "The government sold the rights to public resources under a certain set of circumstances and terms and shouldn't then rule to change those terms."

In general, leases expire at the end of their terms unless operators are "conducting operations" on the lease, such as drilling, reworking wells or producing oil and gas.

"Suspension of operation" requests are relatively common in the Gulf of Mexico, where they often are filed right before leases are set to expire, unlike the Arctic requests now pending before the safety bureau.

Safety bureau spokesman Nicholas Pardi said the agency "evaluates suspension requests on a case-by-case basis."

Federal regulations give the agency relatively little authority to grant the suspensions, including to allow compliance with judicial decrees, when activities pose a threat of harm or damage, when they are needed to install safety equipment or conduct environmental analysis and to allow for "inordinate delays" in obtaining permits.

The oil companies' requests may lay the groundwork for bigger changes, including potential action by Congress and the Obama administration to rewrite the terms of oil and gas leases in isolated Arctic waters.

WASHINGTON -- The Obama administration will decide soon whether to sign off on Shell's request for extra time to hunt for oil in Arctic waters, Interior Secretary Sally Jewell said Wednesday.

Without action, Shell's oil and gas leases in the Beaufort Sea will begin expiring in 2017, followed by its drilling rights in the neighboring Chukchi Sea two years later.

The same fate awaits Chukchi Sea leases sold in 2008 to Statoil and ConocoPhillips, which have made similar appeals for more time, citing regulatory uncertainty, legal challenges and other obstacles.

"We are actively working with Shell and other leaseholders up there on their request for suspensions," Jewell said during a Senate Appropriations subcommittee hearing. "We will be resolving that relatively soon."

The companies' bids for "suspensions of operation" would effectively stop the clock ticking on their 10-year leases. The Bureau of Safety and Environmental Enforcement is considering requests from Shell and Statoil filed in July 2014; it previously rejected ConocoPhillips' November 2013 bid for at least three more years. ConocoPhillips appealed the decision to an Interior Department appeals board, and settlement talks are

under way.

Neither Statoil nor ConocoPhillips is actively pursuing drilling in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. It needs to retain its existing lease portfolio to warrant this enormous investment."

She cited the limited 75-day window for drilling in the Arctic, when waters are free of ice, unlike year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have blocked work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those delays.

Most recently, the Bureau of Ocean Energy Management completed a new environmental analysis of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. The decision to affirm, change or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

Jewell stressed that Interior Department regulators are dedicated to completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," she said.

Jewell also made a nod to mishaps that marred Shell's 2012 Arctic operation, including the grounding of its Kulluk drilling rig and the company's difficulty readying an emergency oil spill containment system to safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsibly, and we

want to be responsive to the companies.”

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time would be unwarranted “special treatment” said Oceana Deputy Vice President Susan Murray.

“Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging,” Murray said. “Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases.”

In general, offshore leases expire unless operators are “conducting operations” on them, such as drilling, reworking wells or producing oil and gas.

“Suspension of operation” requests are relatively common in the Gulf of Mexico, where they often are filed shortly before leases are set to expire.

Safety bureau spokesman Nicholas Pardi said the agency “evaluates suspension requests on a case-by-case basis.”

Murkowski Seeks Lease Extensions for Shell

By Liz Ruskin, APRN | March 4, 2015

Last summer, Shell asked the government to extend its offshore drilling leases in the Arctic. Today, U.S. Sen. Lisa Murkowski pressed Shell's case to Interior Secretary Sally Jewell in a Senate hearing. Murkowski says Shell needs certainty to continue to invest billions of dollars in its Arctic operations.

vm^lP

“Because of this very short window, a 75-day Arctic drilling season, and the difficulties and the delays and the legal challenges that are all out there, that Shell has endured for the past decade, there really are not enough drilling seasons remaining for Shell to complete more than a handful of exploration wells before the Chukchi lease portfolio expires,” Murkowski said.

Jewell says the clock on Shell's 10-year leases in the Chukchi Sea was stopped for a period when a court ruled the government had to redo its environmental impact statement. Jewell says her department is still considering Shell's request for a five-year suspension of the lease clock.

“We took our resources and focused them, as we were requested to do, on helping Shell move forward for this drilling season. I also know that we are actively working with them on suspensions and I think they can expect any answer in the relatively near future,” Jewell said.

Oceana and other environmental groups oppose giving Shell more time on their leases. They say the reasons for Shell's lack of progress were known from outset, like the harsh conditions and the Native whaling season, or were of Shell's own making.

Jewell: No Plan Afoot to Declare ANWR Monument

By Liz Ruskin, APRN | March 4, 2015

President Obama infuriated Alaska's political leaders when he announced in January he would ask Congress to protect more land within the Arctic National Wildlife Refuge as wilderness, forever off-limits to oil drilling. Some, including Sen. Lisa Murkowski, predict Obama will act on his own to bar development, by using the Antiquities Act to declare ANWR a national monument. Interior Secretary Sally Jewell said today that's not in the works.

“There's no discussions in the Administration right now about monument status for the Arctic National Wildlife Refuge,” she said. She then repeated it in response to a reporter's question: “There are no plans the Administration has for using the national monument designation or the Antiquities Act for the Arctic National Wildlife Refuge.”

Jewell, though, does not agree that the “no more” clause of the Alaska National Interest Lands Conservation Act would prohibit the president from declaring new national monuments in Alaska.

“I'm not an expert on the legal status but I believe we could use the Antiquities Act,” Jewell said. “But there are no plans to do so in Alaska at this time.”

OIL AND GAS:

Murkowski accuses BLM of 'pay to play' in Alaska drilling

Phil Taylor, E&E reporter

GREENWIRE -- Register for trial access

The Bureau of Land Management's decision to charge an oil company \$8 million for the right to develop its leases in an Alaskan reserve is a slippery slope that could make other companies think twice about developing on federal lands, Alaska's senior senator said today.

Sen. Lisa Murkowski (R) grilled Interior Secretary Sally Jewell on whether her agency has the legal authority to require mitigation fees for energy projects that would otherwise be permissible on public lands.

The senator's concern stems from BLM's decision last month to approve ConocoPhillips Co.'s plan to become the first company to produce oil in the National Petroleum Reserve (NPR-A) in northwest Alaska. BLM is requiring the company to pony up \$8 million for a regional mitigation strategy that will protect lands of environmental, subsistence or cultural significance to local Native Alaskans and potentially remediate legacy wells drilled by other entities ([Greenwire](#), Feb. 16).

"We are perhaps moving in this direction of pay to play," Murkowski told Jewell during an Interior, Environment and Related Agencies Appropriations Subcommittee hearing on Interior's \$13.2 billion budget request for fiscal 2016. "The concern is 'What's the precedent of this going to be?'"

The ConocoPhillips project, known as Greater Mooses Tooth-1 (GMT1), is seen as a bellwether for how BLM will permit future exploration and production in the 22.5-million-acre Alaskan reserve, the nation's largest block of public lands and a key potential source of oil for the Trans-Alaskan Pipeline.

The size and scope of the mitigation package were major sticking points in BLM's negotiations with ConocoPhillips and drew significant criticism from Alaska lawmakers and Gov. Bill Walker (I). BLM last month said the mitigation fee does not establish a precedent for future projects.

The \$8 million represents less than 1 percent of the project's estimated \$890 million price tag.

But Murkowski warned that the mitigation policy appears subjective and sticks companies with "surprise requirements."

"It appears that companies that have deep pockets and pretty considerable investments face some requirements that may be tangentially related, maybe not even related at all, but requirements that could harm their operations as they impose a condition on permits," Murkowski said.

Jewell said the department's use of fees to offset the impacts of development is not new and has been used to mitigate the impacts of commercial-scale solar projects in the Southwest by setting aside desert tortoise habitat or buying conservation easements.

"What we're trying to do is say, 'Let's make sure that mitigation money is put into the projects that are most important to address the issues that his development impacts,'" she said.

In the case of GMT1, Jewell noted that BLM agreed to ConocoPhillips' request to build a road within a 3-mile protected area around Fish Creek, which could affect the ability of local Alaska Natives to hunt and feed themselves. The mitigation fee will allow the company to work with the Native village of Nuiqsut to ameliorate those impacts.

That's in addition to a host of other steps BLM is requiring to address air quality, wildlife, plant life and subsistence impacts that are outlined on Page 8 of the agency's [record of decision](#) for the GMT1 project.

Interior Deputy Secretary Michael Connor said ConocoPhillips balked at BLM's first mitigation proposal, but "we had a discussion and we came to an agreement with ConocoPhillips as to the level of compensatory mitigation."

"I think we have a good result, and that strategy will help us facilitate future projects as we move forward," he said.

ConocoPhillips has not said whether it intends to accept the mitigation package, nor whether it will move forward with GMT1.

An initial \$1 million payment is due in mid-April regardless of whether the project happens. Two subsequent \$3.5 million payments are due when the company installs the first gravel during the first ice road season and after completion of the drill pad, road and pipeline.

A regional mitigation strategy developed with the help of ConocoPhillips' payments "will serve as a road map for mitigating impacts from GMT1 and future projects enabled or assisted by the existence of GMT1," BLM said in February.

Compensatory mitigation fees are a key component in a separate BLM effort to incentivize commercial-scale solar development in "solar energy zones" in the Southwest.

Last summer, developers bid \$5.8 million for a chance to develop six parcels covering 3,083 acres in BLM's Dry Lake solar zone north of Las Vegas ([E&ENews PM](#), June 30, 2014).

BLM months earlier had finalized a [regional mitigation strategy](#) for Dry Lake that, among other things, established a \$1,836-per-acre mitigation fee for companies that develop projects in the zone, with the money going toward the restoration of lands in the nearby Gold Butte Area of Critical Environmental Concern or four other environmentally sensitive areas.

Both efforts -- Dry Lake and GMT1 -- are consistent with Jewell's October 2013 [secretarial order](#) that called for early integration of mitigation into the planning of energy projects on public lands as well as "transparency and consistency in mitigation decisions."

Conservationists have supported mitigation fees, noting that BLM lacks the budget to fund critical landscape restoration priorities. Energy industry officials say they could support them, too, as long as they are predictable and fair.

But in the case of ConocoPhillips, a regional mitigation strategy -- and a road map for predicting mitigation fees -- did not exist prior to it proposing GMT1.

Murkowski said Interior needs to be consistent on how mitigation requirements are set.

"It seems to me that there is the potential for a great deal of subjectivity here," Murkowski said. "Rather than creating efficiencies, what we may have developing here is additional unpredictability, lack of clarity ... that deters investment [and] that really can derail a project."

Lawmakers asked to fund Land and Water Conservation Fund

Future of conservation program uncertain

By [Andrew Clevenger](#) / [The Bulletin](#) / [@andclev](#)

Published Mar 5, 2015 at 12:01AM

WASHINGTON — Interior Secretary Sally Jewell pressed Senate appropriators Wednesday to approve the Obama administration's 2016 budget request of \$13.2 billion for the agency, including \$900 million for Land and Water Conservation Fund projects.

"This is, dollar for dollar, one of the most effective government programs we have," Jewell told members of the Appropriations Subcommittee on Interior, Environment, and Related Agencies, including Sen. Jeff Merkley, D-Ore.

First enacted in 1964, the Land and Water Conservation Fund uses gas and oil receipts from drilling on the outer continental shelf to conserve national parks, forests, wildlife refuges, wilderness and Civil War battlefields, and to develop and support state and local parks.

By law, the fund may receive \$900 million each year, but it rarely receives its full allotment, and \$17 billion has been allocated for other purposes over the last 50 years.

Legislation authorizing the fund to distribute money to various projects will expire at the end of September.

President Obama's 2016 budget calls for funding the program at its maximum of \$900 million, and includes money for several projects in Oregon.

The biggest project for Oregon is the Pathways to the Pacific, which would receive \$14 million to stabilize fish runs and improve public access with acquisitions in the Oregon National Historic Trail, the John Day Wild and Scenic River, the Columbia River Gorge National Scenic Area, John Day Fossil Beds National Monument, and Willapa and Ridgefield national wildlife refuges.

The Cascade-Siskiyou National Monument would receive a \$2.6 million grant to acquire almost 2,300 acres, with an additional \$3 million slated for land acquisition on Wassen Creek in Siuslaw National Forest.

Kelley Beamer, the executive director of the Coalition of Oregon Land Trusts said in a prepared statement that LWCF funding has helped preserve many places that Oregonians hold dear.

"It has helped protect working farms, forests and ranches, including most recently the Gilchrist Forest outside Bend. Without the Land and Water Conservation Fund, Oregon would not be what it is today," Beamer said.

Late last year, Congress approved \$306 million for LWCF projects, meaning many projects that had been vetted and approved did not receive funding.

"Without full funding, some critical projects in Oregon like protecting the east moraine of Wallowa Lake, will never get completed and instead be lost to development or other threats," Beamer said.

In November, a bipartisan group of 40 senators, including Merkley and fellow Oregon Democrat Ron Wyden, wrote to Senate leadership, urging them to help pass a reauthorization of the Land and Water Conservation Act during the lame duck session. That didn't happen, and the program will expire at the end of September if Congress doesn't act.

Merkley said Wednesday that he will use his seat on the Appropriations Committee to keep fighting for full funding for LWCF.

"Oregon's outdoor spaces are a crucial part of our heritage and what makes our region unique. It's important that we preserve these special places for our children and grandchildren, and the Land and Water Conservation Fund is a critical tool for creating and preserving public lands," he said.

'Helping Shell'

Jewell stressed that Interior Department regulators were focused on completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," Jewell said.

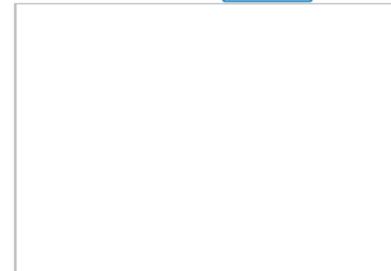

Jewell also made a nod to the mishaps that marred Shell's 2012 Arctic operation, including the grounding of its non-propelled Kulluk drilling rig during an ill-fated tow across the Gulf of Alaska and the company's difficulty certifying and readying a unique emergency oil spill containment system so it could safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsibly, and we want to be responsive to the companies."

'Special treatment'

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases

Shell used the drillship Noble Discoverer for its 2012 drilling in the Chukchi Sea north of Alaska. (Jennifer A. Dlouhy / The Houston Chronicle)

in 2008. Any Interior Department decision to give the company more time amounts to unwarranted "special treatment" said Oceana Deputy Vice President Susan Murray in [a Feb. 27 letter to the safety bureau](#).

"Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging," Murray said. "Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases."

Extensions also could mean taxpayers — who own the oil at issue — are "no longer getting fair value," said Michael LeVine, Pacific senior counsel for the group. "The government sold the rights to public resources under a certain set of circumstances and terms and shouldn't then rule to change those terms."

In general, leases expire at the end of their terms unless operators are "conducting operations" on the lease, such as drilling, reworking wells or producing oil and gas.

"Suspension of operation" requests are relatively common in the Gulf of Mexico, where they often are filed right before leases are set to expire, unlike the Arctic requests now pending before the safety bureau.

Safety bureau spokesman Nicholas Pardi said the agency "evaluates suspension requests on a case-by-case basis."

Federal regulations give the agency relatively little authority to grant the suspensions, including to allow compliance with judicial decrees, when activities pose a threat of harm or damage, when they are needed to install safety equipment or conduct environmental analysis and to allow for "inordinate delays" in obtaining permits.

The oil companies' requests may lay the groundwork for bigger changes, including potential action by Congress and the Obama administration to rewrite the terms of oil and gas leases in isolated Arctic waters.

U.S. to decide soon on Shell request for extra time on Arctic leases

Jennifer A. Dlouhy | Houston Chronicle March 4, 2015

+A

WASHINGTON -- The Obama administration will decide soon whether to sign off on Shell's request for extra time to hunt for oil in Arctic waters, Interior Secretary Sally Jewell said Wednesday.

Without action, Shell's oil and gas leases in the Beaufort Sea will begin expiring in 2017, followed by its drilling rights in the neighboring Chukchi Sea two years later.

RELATED:

[Environmentalists sue Port of Seattle over Shell's Arctic drilling fleet](#)

[Interior agencies release proposed new Arctic Ocean drilling standards](#)

The same fate awaits Chukchi Sea leases sold in 2008 to Statoil and ConocoPhillips, which have made similar appeals for more time, citing regulatory uncertainty, legal challenges and other obstacles.

"We are actively working with Shell and other leaseholders up there on their request for suspensions," Jewell said during a Senate Appropriations subcommittee hearing. "We will be resolving that relatively soon."

The companies' bids for "suspensions of operation" would effectively stop the clock ticking on their 10-year leases. The Bureau of Safety and Environmental Enforcement is considering requests from Shell and Statoil filed in July 2014; it previously rejected ConocoPhillips' November 2013 bid for at least three more years. ConocoPhillips appealed the decision to an Interior Department appeals board, and settlement talks are under way.

Neither Statoil nor ConocoPhillips is actively pursuing drilling in U.S. Arctic waters, but Shell is preparing to resume exploration in the Chukchi Sea this summer, three years after its last try in 2012 resulted in two half-completed wells.

"This is good news for us, particularly at a time when the price of oil is causing many companies to really scrutinize their investment decisions on very large-scale projects," said Sen. Lisa Murkowski, R-Alaska. "It makes it all the more important that Shell have the certainty it needs before it proceeds to spend even yet more billions of dollars. It needs to retain its existing lease portfolio to warrant this enormous investment."

She cited the limited 75-day window for drilling in the Arctic, when waters are free of ice, unlike year-round activity allowed in the Gulf of Mexico.

"There really are not enough drilling seasons (left) for Shell to complete more than a handful of exploration wells before the Chukchi Sea lease portfolio expires," Murkowski said.

Legal uncertainties surrounding the government's 2008 auction of Chukchi Sea oil leases have blocked work in the area, though the Interior Department has already granted Shell, Statoil and ConocoPhillips additional time to compensate for some of those delays.

Most recently, the Bureau of Ocean Energy Management completed a new environmental analysis of that seven-year-old sale in a bid to satisfy a 2014 federal court ruling that the first version was inadequate. The decision to affirm, change or vacate that sale rests with Jewell, who could issue a "record of decision" on the auction as soon as March 25.

In the meantime, the Chukchi Sea leases are under a suspension of operation tied to the ruling.

Jewell stressed that Interior Department regulators are dedicated to completing that essential environmental analysis. "We took our resources and focused them — as we were requested to do — on helping Shell move forward with this drilling season," she said.

Jewell also made a nod to mishaps that marred Shell's 2012 Arctic operation, including the grounding of its Kulluk drilling rig and the company's difficulty readying an emergency oil spill containment system to safeguard drilling. Shell halted its planned 2013 drilling in response, as it repaired one rig and searched for another to replace the Kulluk.

"We understand the circumstances that companies have," Jewell told Murkowski. "We also understand the circumstances that Shell had in 2012."

"We get that it's complicated to do work up there," she added. "We want to make sure it's done safely and responsibly, and we want to be responsive to the companies."

Conservationists argue that Shell and other oil companies knew what they were getting into when they bought Chukchi Sea leases in 2008. Any Interior Department decision to give the company more time would be unwarranted "special treatment" said Oceana Deputy Vice President Susan Murray.

"Operating in the Arctic Ocean is dangerous, controversial, and logistically challenging," Murray said. "Those facts, however, do not allow BSEE to bend its rules to grant Shell an unjustified extension of its leases."

In general, offshore leases expire unless operators are "conducting operations" on them, such as drilling, reworking wells or producing oil and gas.

"Suspension of operation" requests are relatively common in the Gulf of Mexico, where they often are filed shortly before leases are set to expire.

Safety bureau spokesman Nicholas Pardi said the agency "evaluates suspension requests on a case-by-case basis."

Murkowski Seeks Lease Extensions for Shell

By Liz Ruskin, APRN | March 4, 2015

Last summer, Shell asked the government to extend its offshore drilling leases in the Arctic. Today, U.S. Sen. Lisa Murkowski pressed Shell's case to Interior Secretary Sally Jewell in a Senate hearing. Murkowski says Shell needs certainty to continue to invest billions of dollars in its Arctic operations.

"Because of this very short window, a 75-day Arctic drilling season, and the difficulties and the delays and the legal challenges that are all out there, that Shell has endured for the past decade, there really are not enough drilling seasons remaining for Shell to complete more than a handful of exploration wells before the Chukchi lease portfolio expires," Murkowski said.

Jewell says the clock on Shell's 10-year leases in the Chukchi Sea was stopped for a period when a court ruled the government had to redo its

environmental impact statement. Jewell says her department is still considering Shell's request for a five-year suspension of the lease clock.

"We took our resources and focused them, as we were requested to do, on helping Shell move forward for this drilling season. I also know that we are actively working with them on suspensions and I think they can expect any answer in the relatively near future," Jewell said.

Oceana and other environmental groups oppose giving Shell more time on their leases. They say the reasons for Shell's lack of progress were known from outset, like the harsh conditions and the Native whaling season, or were of Shell's own making.

Jewell: No Plan Afoot to Declare ANWR Monument

By Liz Ruskin, APRN | March 4, 2015

President Obama infuriated Alaska's political leaders when he announced in January he would ask Congress to protect more land within the Arctic National Wildlife Refuge as wilderness, forever off-limits to oil drilling. Some, including Sen. Lisa Murkowski, predict Obama will act on his own to bar development, by using the Antiquities Act to declare ANWR a national monument. Interior Secretary Sally Jewell said today that's not in the works.

"There's no discussions in the Administration right now about monument status for the Arctic National Wildlife Refuge," she said. She then repeated it in response to a reporter's question: "There are no plans the Administration has for using the national monument designation or the Antiquities Act for the Arctic National Wildlife Refuge."

Jewell, though, does not agree that the "no more" clause of the Alaska National Interest Lands Conservation Act would prohibit the president from declaring new national monuments in Alaska.

"I'm not an expert on the legal status but I believe we could use the Antiquities Act," Jewell said. "But there are no plans to do so in Alaska at this time."

OIL AND GAS:

Murkowski accuses BLM of 'pay to play' in Alaska drilling

Phil Taylor, E&E reporter

GREENWIRE -- Register for trial access

The Bureau of Land Management's decision to charge an oil company \$8 million for the right to develop its leases in an Alaskan reserve is a slippery slope that could make other companies think twice about developing on federal lands, Alaska's senior senator said today.

Sen. Lisa Murkowski (R) grilled Interior Secretary Sally Jewell on whether her agency has the legal authority to require mitigation fees for energy projects that would otherwise be permissible on public lands.

The senator's concern stems from BLM's decision last month to approve ConocoPhillips Co.'s plan to become the first company to produce oil in the National Petroleum Reserve (NPR-A) in northwest Alaska. BLM is requiring the company to pony up \$8 million for a regional mitigation strategy that will protect lands of environmental, subsistence or cultural significance to local Native Alaskans and potentially remediate legacy wells drilled by other entities ([Greenwire](#), Feb. 16).

"We are perhaps moving in this direction of pay to play," Murkowski told Jewell during an Interior, Environment and Related Agencies Appropriations Subcommittee hearing on Interior's \$13.2 billion budget request for fiscal 2016. "The concern is 'What's the precedent of this going to be?'"

The ConocoPhillips project, known as Greater Mooses Tooth-1 (GMT1), is seen as a bellwether for how BLM will permit future exploration and production in the 22.5-million-acre Alaskan reserve, the nation's largest block of public lands and a key potential source of oil for the Trans-Alaskan Pipeline.

DOI in the News:

SECRETARY JEWELL APPEARS BEFORE SENATE PANEL. The [E&E Daily](#) (3/4) reports that that Sen. Lisa Murkowski, "the Senate's top lawmaker in charge of funding the Interior Department and US EPA this morning promised that her panel this year will mark up a spending bill for the first time in at least half a decade, a pledge that she acknowledged will force debate over 'thorny' policy issues involving those agencies." However, "lawmakers on the Interior, Environment and Related Agencies Appropriations Subcommittee also acknowledged that the spending limits set by the 2011 Budget Control Act will render much of President Obama's proposed fiscal 2016 budget – which included significant spending hikes for Interior – a moot point unless Congress reaches a new spending deal." Murkowski said, "We will be marking up an Interior bill this year – we're going to do it. We have some issues under our jurisdiction that perhaps are a little more thorny than in some of the other committees, but that should not keep us from advancing to a markup. It's our job to take up the tough issues and work together to produce legislation that reflects the collective will of the members."

The [Environment & Energy Publishing](#) (3/5, Subscription Publication, 705) reports that "as the new ranking member of the Interior, Environment and Related Agencies Appropriations Subcommittee, New Mexico's Tom Udall is the Democrats' first line of defense against expected bids to roll back US EPA clean air and water regulations and the Interior Department's protection of lands and wildlife." Udall, "who chaired the panel last year but is now ranking member on the panel that funds transportation, said he's up to the task." He said, "My No. 1 goal will be to do everything I can to get us back on regular budget order, where we're passing thoughtful appropriations bills on time that address the needs in communities across the country. The thing that holds us up there is the riders. If you have riders inserted that make big substantive changes to the law, it's very hard to get an appropriations bill passed."

Secretary Jewell: Decision Close On Shell Lease Suspension Request. [Politico](#) (3/4) reports that "Shell and other Arctic leaseholders will hear about back about their requests to suspend their leases to stop them from expiring before major exploration can occur, Interior Secretary Sally Jewell says." Jewell told Senate appropriators, "We are actively working with Shell and other leaseholders up there on their requests for lease suspensions." She added, "They can expect an answer in the relatively near future."

Also reporting on the story are [Politico Pro](#) (3/5, Subscription Publication), the [FuelFix](#) (3/4, 7K), the [Anchorage \(AK\) Dispatch News](#) (3/4, 146K) and the [Alaska Public Radio Network](#) (3/4, 2K).

Secretary Jewell: No Plan Afoot To Declare Arctic National Wildlife Refuge Monument. The [Alaska Public Radio Network](#) (3/4, 2K) reports that Jewell said that there's no plan to use the Antiquities Act to declare the Arctic National Wildlife Refuge a national monument. However, Jewell "does not agree that the 'no more' clause of the Alaska National Interest Lands Conservation Act would prohibit the president from declaring new national monuments in Alaska."

Also reporting on the story is [Politico Pro](#) (3/5, Subscription Publication).

Secretary Jewell Seeks Funding For Land And Water Conservation Fund. The [Bend \(OR\) Bulletin](#) (3/5, 94K) reports that Jewell "pressed Senate appropriators Wednesday to approve the Obama administration's 2016 budget request of \$13.2 billion for the agency, including \$900 million for Land and Water Conservation Fund projects." Jewell said, "This is, dollar for dollar, one of the most effective government programs we have."

Sen. Murkowski Grills Jewell On Alaska Drilling. [E&E Daily](#) (3/4) reports that the BLM's "decision to charge an oil company \$8 million for the right to develop its leases in an Alaskan reserve is a slippery slope that could make other companies think twice about developing on federal lands, Alaska's senior senator said today." Sen. Lisa Murkowski "grilled Interior Secretary Sally Jewell on whether her agency has the legal authority to require mitigation fees for energy projects that would otherwise be permissible on public lands." Murkowski's "concern stems from BLM's decision last month to approve ConocoPhillips Co.'s plan to become the first company to produce oil in the National Petroleum Reserve (NPR-A) in northwest Alaska."

Secretary Jewell: Interior "Very Close" On Fracking Rule. [Politico Pro](#) (3/5, Subscription Publication) reports that "the Interior Department is 'very close' to issuing its final regulations governing fracking on federal lands, Interior Secretary Sally Jewell said on Wednesday." Jewell said, "I don't control the timing on these things. There are a number of steps that we have to go through. We're going through those steps methodically. We're very close to releasing the fracking rule, and then people will be able to comment on that as we work toward finalization."

Secretary Jewell Questioned On Gateway Arch. The [JBK-Current-Events](#) (3/5) posted a video of Jewell being questioned by Sen. Roy Blunt on the Gateway Arch.

SECRETARY JEWELL TO APPEAR BEFORE HOUSE NATURAL RESOURCES COMMITTEE. [The Hill](#) (3/5, Barron-Lopez, Cama, 224K) reports that on Thursday, "the House Natural Resources Committee will host Interior Secretary Sally Jewell for a hearing on the Interior Department's budget request for fiscal 2016."

[Roll Call](#) (3/5, Subscription Publication, 102K) reports that the House's Natural Resources Committee is "going forward with its planned review of President Barack Obama's budget request for the Interior Department" despite a forecast of snow.

In an op-ed for [Roll Call](#) (3/5, Bishop, Subscription Publication, 102K), Rep. Rob Bishop writes that the Obama Administration's budget request "falls flat." He claims that "instead of addressing ongoing problems with our federal lands, water, oceans and energy resources in a meaningful way, this budget proposes throwing thousands of gallons of cash and miles of new regulatory red tape to address problems which swallow up the time and resources of agencies like a bottomless pit." Bishop writes that "our solutions will emerge from both the creative input of stakeholders and a new vision: 1) People come first in resource, energy and environmental policy, and stewardship is a shared responsibility; 2) Natural resources give our nation opportunity and security; 3) Public lands, waters, and oceans are meant to be enjoyed by people and serve our nation's needs; 4) Government should empower people who know and love the land, when possible; and finally 5) Government should be a problem-solver, not a problem-creator."

COMMUNITIES SEEK MONUMENT DESIGNATIONS. The [High Country \(CO\) News](#) (3/5, 74K) reports that "many conservationists in Western states see the Browns Canyon designation as an indication of Obama's willingness to declare new monuments." The article notes that "a few of the communities hoping to put their own stars on the map during the remainder of Obama's 23 months in office," including the Berryessa Snow Mountain region, the Boulder-White Cloud, the Bodie Hills of central-eastern California, and Bears Ears in eastern Utah.

Conservation Groups Oppose Boulder-White Clouds Wilderness Bill. The [Idaho Mountain Express](#) (3/5, 1K) reports that "a coalition of 18 conservation, recreation and outdoor-business groups has expressed opposition to a Boulder-White Clouds wilderness bill introduced in Congress last week by Rep. Mike Simpson and Sen. Jim Risch, both R-Idaho." The groups said, "Rep. Simpson's original legislation was built on a compromise between wilderness protection and motorized use. This new legislation veers away from that compromise and promotes more motorized routes in important wilderness quality areas."

DEADLINE FOR COMMENTS ON KENAI GILLNETS APPROACHING. The [Alaska Journal of Commerce](#) (3/5, 14K) reports that "it's been more than a month since the Federal Subsistence Board passed a proposal to allow a subsistence sockeye gillnet on the Kenai and Kaslof rivers on Jan. 21 and the public is on a tight deadline if it wants to reverse

the decision before the Kenai River summer glut of sport and personal use fishermen." According to the Interior Department, "under which the board operates, a request for reconsideration, or RFR, must be submitted within 60 days after a regulation takes effect or is published in the Federal Register, whichever comes first."

America's Great Outdoors:

National Park Service:

NPS URGED TO ACT ON RIM OF THE VALLEY STUDY. The [Los Angeles Times](#) (3/5, Kamal, 3.49M) reports that "saying a study of the Rim of the Valley Corridor's future is months overdue and stuck in 'bureaucratic limbo,' three local members of Congress are urging the National Park Service to release the report." Reps. Adam B. Schiff, Judy Chu and Ted Lieu "used a recent letter to express their 'strong concern over repeated and lengthy delays' in releasing the Rim of the Valley Corridor Special Resource Study and the failure of the park service 'to meet its own deadlines.'" The letter, addressed to NPS Director

NPS SETS UP COMMAND POST IN LOWNDES COUNTY FOR BLOODY SUNDAY ANNIVERSARY. [WSFA-TV](#) Montgomery, AL (3/5, 30K) reports that "tens of thousands of people are expected to be in Selma in less than 72 hours, to celebrate the 50th anniversary of Bloody Sunday and the Montgomery to Selma March." According to the article, "the big events are planned for Selma and Montgomery, but in between the two cities, Lowndes County is also playing a crucial role." The article notes that "the interpretive center there is serving as a National Park Service command post."

SURVEY FINDS RISING SEAS THREATEN RARE PLANTS IN EVERGLADES NATIONAL PARK. The [AP](#) (3/5) reports that "rising sea levels and invasive species increasingly threaten rare plants in Everglades National Park that have not yet recovered from damage caused by orchid collectors long ago or attempts to drain the swamps, according to a 10-year survey released Monday." The report by the Institute for Regional Conservation finds that "the unique plants native to South Florida may be lost despite multibillion-dollar efforts to restore the wetlands." According to researchers, "plant biodiversity needs to be prioritized as highly as natural water flows and controlling exotic animals such as Burmese pythons."

Also reporting on the story are the [Miami Herald](#) (3/5, 694K), the [Customs Today \(PAK\)](#) (3/5), the [Tech Times](#) (3/3), and the [China Topix](#) (3/4).

MAN BEHIND HILLARY CLINTON'S PERSONAL EMAIL LINKED TO CONTROVERSIES. [Politico](#) (3/5, 669K) reports that "the mystery man linked to Hillary Clinton's personal e-mail account appears to be a Washington, D.C. stockbroker and former aide to the Clintons who played a walk-on role in controversies that dogged the former first family soon after it left the White House in 2001." According to the article, "a Clinton aide named Eric Hothem was linked to a flap in 2001 about the Clintons' shipment of furniture and other items from the White House at the end of President Bill Clinton's second term." The article notes that "the White House Counsel's Office determined that some of the items were personal gifts to the first family, but the National Park Service said others belonged to the White House."

DOZENS PROTEST GOLDEN GATE NATIONAL RECREATION AREA PLAN. [KGO-TV](#) San Francisco (3/5, 4K) reports that "dozens of people demonstrated in downtown San Francisco Wednesday outside the offices of the National Park Service." They are upset the NPS "recently adopted a new general management plan for the Golden Gate National Recreation Area." The protestors "worry the plan will limit visitors to Ocean Beach, Muir Woods and restrict off-leash dogs at Fort Funston."

Also reporting on the story are the [San Francisco Examiner](#) (3/5, 412K) and [KPIX-TV](#) San Francisco (3/4, 143K).

ENVIRONMENTALISTS SEEK FUNDS FOR EVERGLADES. The [Christian Science Monitor](#) (3/4, 380K) reports that "last fall, voters in Florida approved Amendment 1, which designated one-third of real estate transaction taxes to the Land Acquisition Trust Fund" and "the money would ultimately fund conservation programs." Now, "as Florida Legislature's annual session begins this week, so does the debate over how that money will be spent." Environmental groups such as Everglades Trust, the Everglades Foundation and the Everglades Coalition are "advocating for the district and state to allocate the money to buying 46,800 acres of land from US Sugar Corp." They want to "use the land to build a reservoir in the agricultural region south of Lake Okeechobee that would replenish the drying Everglades National Park."

HUNTERS SEEK ENTRY TO GRAND CANYON NATIONAL PARK TO TARGET BUFFALO. [Fox News](#) (3/4, 8 25M) reports that "the growing bison herd occupying the northern reaches of Arizona's Grand Canyon National Park is decimating the area's ecosystem, and some conservationists are ready to call in the hunters." According to the article, "the 600-head herd rarely if ever strays from the 1,900-square-mile park, where hunting is banned," but "if they were to stampede into the adjacent Kaibab National Forest, they might find themselves in the crosshairs of hunters with permits to bag them, but inside the park they are safe – and free to wreak havoc."

TOWNS FINALIZING LIST OF NATIONAL PARK REQUIREMENTS IN MAINE. The [Bangor \(ME\) Daily News](#) (3/4, 166K) reports that "Medway's Board of Selectmen wants a proposed North Woods national park to be no larger than 150,000 acres and East Millinocket's leaders seek a voice in any park legislation, according to letters the towns are sending to the state's congressional delegation." According to officials, "acting in response to a request from US Sen. Angus King, selectmen in each town are finalizing letters regarding the park proposed by Lucas St. Clair that will be mailed next week."

VIRGIN ISLANDS NATIONAL PARK OPENS ARCHAEOLOGY LABORATORY. The [Virgin Islands Daily News](#) (3/5, 333) reports on the newly opened archaeological laboratory at Cinnamon Bay on St. John. The article notes that "the Educational Center and Archaeology Laboratory at Cinnamon Bay is filled with displays showcasing the artifacts found on St. John, St. Thomas and Hassel Island." Virgin Islands National Park Cultural Program Manager Ken Wild said, "It's all driven by archaeological finds. It tells the story of man's history on the islands."

LAKE SUPERIOR ICE CAVES TO REOPEN AFTER TEMPORARY CLOSURE. [KARE-TV](#) Minneapolis (3/4, 339K) reports that "the popular ice caves in northwestern Wisconsin are set to reopen after a temporary closure." According to Apostle Islands National Lakeshore Superintendent Bob Krumenaker, "the ice caves will reopen at 7 a.m. Thursday after being closed due to high winds."

Also reporting on the story is the [St. Paul \(MN\) Pioneer Press](#) (3/5, 524K).

ANDERSON-RIDLEY BARN & AMP RANCH JOINS NATIONAL REGISTER OF HISTORIC PLACES. The [Black Hills \(SD\) Pioneer](#) (3/5, 11K) reports that the Anderson-Ridley Barn and Ranch in the St. Onge vicinity of Lawrence County has been added to the National Register of Historic Places.

Bureau of Land Management:

JUDGE MOSTLY UPHOLDS BLM'S ROUNDUP OF WYOMING WILD HORSES. The [AP](#) (3/5) reports that "a judge mostly upheld a US Bureau of Land Management roundup of hundreds of wild horses in western Wyoming that horse advocates had claimed violated several laws." US District Judge Nancy Freudenthal held Tuesday that "the roundup was proper under a federal wild horse law and 34-year-old federal court order in which ranchers voluntarily agreed to allow wild horses to roam the area where the roundup occurred." Freudenthal wrote, "None of the arguments advanced by petitioners and nothing about BLM's horse management program inspire this court to change the approach sanctioned by the court in 1981." Freudenthal "ordered the Bureau of Land Management to go back and correct procedural deficiencies in planning the roundup, however."

Coverage by the AP was also picked up by the [Casper \(WY\) Star-Tribune](#) (3/5, 90K).

BLM TURNING TONGASS LAND OVER TO SEALASKA. [KTOO-FM](#) Juneau, AK (3/4) reports that the BLM will sign paperwork on Friday "turning over 70,000 acres of the Tongass National Forest" to Sealaska Corp. The BLM's Ramona Chinn says "the land must still be surveyed and patented." Chinn says, "It's a milestone for the land-transfer program. Sealaska is one of 12 regions and this would finalize their entitlement."

BLM SEEKS NOMINATIONS FOR RECLAMATION, SUSTAINABLE MINERAL DEVELOPMENT AWARDS. The [St. George \(UT\) News](#) (3/4, 3K) reports that the BLM is "seeking nominations for the 2015 Reclamation and Sustainable Mineral Development Awards." The deadline to submit nominations is April 22. Michael Nedd, BLM Assistant Director for Energy, Minerals and Realty Management, said, "The BLM awards program showcases sustainable development that meets the needs of the present generation without compromising the ability of future generations to meet their own needs."

BLM OFFERS ADOPTIONS OF EQUINES GATHERED FROM FISH CREEK HERD MANAGEMENT AREA. The [Elko \(NV\) Daily Free Press](#) (3/5, 22K) reports that the BLM is "providing a unique opportunity Saturday to adopt 12 yearlings and weanlings that were gathered from the Fish Creek Herd Management Area before they are shipped to the Palomino Valley National Adoption Center."

BLM MAKES PRESENTATION ON DRAFT LAS VEGAS AND PAHRUMP FIELD OFFICES RESOURCE MANAGEMENT PLAN REVISION. The [Mesquite \(NV\) Local News](#) (3/5, 16K) reports that "Tuesday's meetings with the Mesquite City Council and the Virgin Valley Water District had one thing in common: the Bureau of Land Management." According to the article, "after the regular Technical Review Meeting for the City Council, city staff and council met in a special meeting to hear a presentation by representatives from the Las Vegas BLM, Lee Kirk and Gayle Marrs-Smith, on the draft Las Vegas and Pahrump Field Offices Resource Management Plan Revision." The article notes that "with over 40 community members in attendance the presentation was a bit less than what council had expected."

BLM TRES RIOS FIELD OFFICE'S RESOURCE MANAGEMENT PLAN CRITICIZED. In an op-ed for the [Durango \(CO\) Herald](#) (3/4, 28K), Dan Olson, executive director of the San Juan Citizens Alliance, criticizes the BLM Tres Rios Field Office's Resource Management Plan. He argues that "the BLM TRFO RMP is a lowest common denominator planning document that fails to protect the resources our community values." According to Olson, "if the protection of Hermosa Creek was an example of community collaboration, this RMP is an example of bureaucracy disconnected from both its local community and the vision laid out by its own leadership." He adds that "the RMP – a plan that trades air quality, watershed health and the viability of endangered species for easy access to oil and gas – utterly fails to bolster the claim that the BLM is shedding its old skin."

Fish and Wildlife Service:

FWS ANNOUNCES \$45 MILLION TO PROTECT WILDLIFE. The [Gardnerville \(NV\) Record Courier](#) (3/5, 20K) reports that "state efforts to protect species and habitats in greatest need of conservation received a boost today as the US Fish and Wildlife Service announced over \$45 million in funding provided through the State Wildlife Grant program." FWS Director Dan Ashe said, "The State Wildlife Grant Program has made a significant impact by preventing the need to list species under the Endangered Species Act. The program identifies the highest priorities in each state to effectively conserve and protect species on a large landscape scale."

Also reporting on the story is the [HealthNewsDigest](#) (3/5, 163).

OFFICIALS CALL FOR STRONGER PENALTIES FOR WILDLIFE TRAFFICKING. [Reuters](#) (3/5, Rascoe) reports that stiffer penalties are needed to help deter criminals who engage in the illegal trade of wildlife items, federal officials said. At a briefing Tuesday, Edward Grace, deputy assistant director of law enforcement for FWS warned that organized crime groups have become more involved in animal trafficking in recent years.

WILLOW BEACH NATIONAL FISH HATCHERY TROUT DEAL FINALIZED. The [Mohave Valley \(AZ\) Daily News](#) (3/5, 23K) reports that "the Arizona Game and Fish Department, in cooperation with Mohave County and the U.S. Fish and Wildlife Service, succeeded on Wednesday in executing agreements to restore rainbow trout stocking at Willow Beach National Fish Hatchery along the Colorado River south of the Hoover Dam." Sen. John McCain, "who played a major role in getting the hatchery up and running," said "I am very pleased that the U.S. Fish and Wildlife Service and the Arizona Game and Fish Commission have finalized an agreement to begin restoring rainbow trout stocking operations at Willow Beach National Fish Hatchery in Mohave County, Arizona."

Also reporting on the story is the [Havasupai \(AZ\) News-Herald](#) (3/5, 27K).

REHABILITATED MANATEE RELEASED. The [Tampa \(FL\) Tribune](#) (3/4, 461K) reports that "a rehabilitated manatee from Tampa Bay who ended up in Texas is back in home waters after receiving care from SeaWorld, the theme park announced today." According to the article, "Trinidad was returned to Tampa Bay today with the help of SeaWorld Orlando's Animal Rescue Team, the US Fish and Wildlife Service, the Florida Fish and Wildlife Commission and the US Geological Survey."

Also reporting on the story is [WTSP-TV](#) St. Petersburg, FL (3/4, 69K).

MAN KILLED IN FLORIDA PLANE CRASH WAS AMERICAN AIRLINES PILOT. The [Palm Beach \(FL\) Post](#) (3/5, Milian, 397K) reports that on Wednesday, American Airlines confirmed that David Whitney, who was killed Monday in a plane crash in Florida, was "a long-time pilot for the airline." The article notes that the plane crashed in the Arthur R. Marshall Loxahatchee Wildlife Refuge. William Mann was also killed in the crash. The report mentions that the FAA and NTSB have not "released the type of plane involved in the crash" or indicated "who was piloting the aircraft." According to the Post, NTSB spokesman Terry Williams "said investigators will remain at the scene for the next few days and will continue to interview witnesses and document the wreckage."

MICHIGAN'S NEW WOLF PLAN QUESTIONS FWS' RELISTING AS ENDANGERED. The [Detroit Free Press](#) (3/4, 987K) reports that "the Michigan Department of Natural Resources took not-so-veiled shots at the US Fish and Wildlife Service's relisting of Great Lakes wolves as endangered last month, in the state's updated draft wolf management plan released Wednesday." Portions of the updated wolf plan states that "regardless of changes in legal status ... wolves in Michigan have surpassed State and Federal population recovery goals for 15 years" and says that "protection of Michigan wolves under the Federal Endangered Species Act is no longer warranted."

CONCERNS RAISED OVER DEER FLAT NATIONAL WILDLIFE REFUGE'S MANAGEMENT PLAN FOR LAKE LOWELL. The [Franklin \(IN\) Daily Journal](#) (3/5, 51K) reports that Sen. Mike Crapo and "the Canyon County commissioners say they want a recently released management plan for a southwest Idaho federal wildlife refuge changed to be more accommodating for water skiing." According to the article, "some area residents are angry after discovering the Deer Flat National Wildlife Refuge management plan for Lake Lowell released last month prohibits the use of motorized boats that have internal or external wake generating devices and ballasts."

ELKO COUNTY RAISES CONCERNS ABOUT SAGE GROUSE MEASURES. The [Elko \(NV\) Daily Free Press](#) (3/5, 22K) reports that "in response to a US Fish & Wildlife Service memo calling for stringent measures protecting sage grouse, county officials agreed to write to Gov. Brian Sandoval asking for the state to join in their disapproval." The article notes that "the county has taken a position questioning data used by the government supporting the need to protect sage grouse." Also, "commissioners have worried the restrictions will be onerous enough to kill projects, such as a proposed wind farm that was deferred a few years ago."

FALCONER PREVAILS AGAINST WILDLIFE OFFICIALS. The [Huffington Post](#) (3/5, Mcauliff, 281K) reports on Mike Dupuy, a master falconer in central Pennsylvania, who "wound up in a criminal court battle against the US Fish and Wildlife Service and the United States Attorney for the Middle District of Pennsylvania." After Dupuy "captured three young goshawks last year, he reported the 'takes' to local wildlife officials so the animals could be properly banded and applied to federal permits that allow him to hold up to four birds for falconry and breeding." He "won out in a daylong courtroom showdown late last month, with a federal judge failing to be convinced by either local or federal officials that Dupuy had done anything wrong."

GOLDEN EAGLE BEING EVALUATED AFTER STRUCK TWICE ON HIGHWAY. The [AP](#) (3/5) reports that "a golden eagle struck by two vehicles near Rapid City is being taken to a US Fish and Wildlife Service veterinarian in Pierre for further examination." The animal "survived being struck on Tuesday afternoon on state Highway 79."

Also reporting on the story is the [Rapid City \(SD\) Journal](#) (3/5, 101K).

KILAUEA POINT NATIONAL WILDLIFE REFUGE CONSIDERED TO BE AMONG BEST. The [Kaua'i \(HI\) Garden Island News](#) (3/5, 33K) reports that Kilauea Point National Wildlife Refuge is "on the short list to become one of USA Today's Reader's Choice 10 Best National Wildlife Refuges." Jennifer Waipa, supervisory park ranger said, "Aside from beautiful scenery, the wildlife — the fact that we have the seabirds, so many seabirds, in such a small area — is pretty incredible."

US Geological Survey:

USGS NOT ENOUGH DATA TO ESTABLISH FRACKING-POLLUTION LINK. The [AP](#) (3/4, Gruver, 804K) reports that a new study published in the American Geophysical Union journal Water Resources Research by the US Geological Survey says more data is needed to establish a link between fracking and water pollution. Researchers say long-term water quality trends can only be effectively evaluated in 16 percent of US watersheds with unconventional oil and gas resources due to inadequate data. Environmentalists meanwhile continue to blame fracking for polluting water.

Also reporting on the story is the [Casper \(WY\) Star-Tribune](#) (3/5, 90K) and the [Natural Gas Intelligence](#) (3/5).

Coverage by the AP was also picked up by [KKCO-TV](#) Grand Junction, CO (3/5, 1K) and [KMGH-TV](#) Denver (3/5, 136K).

SCIENTISTS ATTEMPT TO DETECT FRACKING-RELATED EARTHQUAKES SOONER. The [Business Insider](#) (3/4, Ferro, 2 26M) reports that "a new paper in Science suggests that we need to detect much smaller earthquakes" in order to "better predict when a big one is going to hit." For the same reason, the United States Geological Service is working with stakeholders to "develop a hazard model for induced earthquakes in the U.S. that can be updated frequently in response to changing trends in energy production."

Securing America's Energy Future:

Onshore Energy Development:

INTERIOR ORDERED TO REVIEW APPROVAL OF NAVAJO MINE EXPANSION. The [Law 360](#) (3/5, 9K) reports that "a Colorado federal judge has ruled that the US Department of the Interior must review its approval of a Navajo Nation-owned company's permit to expand a coal mine, saying the agency failed to adequately consider the environmental impact of the proposed project's coal combustion." US District Senior Judge John L. Kane held that the Office of Surface Mining, Reclamation and Enforcement "should have weighed the indirect effects on local wildlife from coal combustion at the Four Corners power plant."

Also reporting on the story is the [Summit County \(CO\) Citizens Voice](#) (3/4, 506).

BLM TO HOLD OIL, GAS LEASE SALE IN NEVADA The [Reno \(NV\) Gazette-Journal](#) (3/4, 168K) reports that the BLM is "holding a competitive oil and gas lease sales on Tuesday at the BLM Nevada State Office, 1340 Financial Blvd. in Reno." The article notes that "the oil and gas sale includes 24 parcels totaling 25,882 acres."

Offshore Energy Development:

BOEM REVIEW APPLICATIONS FROM COMPANIES SEEKING TO SURVEY ATLANTIC. The [Charleston \(SC\) Moultrie News](#) (3/4) reports that the BOEM has "begun evaluating applications from companies hoping to be the first in 30 years to survey waters off the Southeast coast for oil and gas exploration." The article notes that "of the seven applicants planning to survey off the coast of South Carolina, five intend on using seismic airgun arrays to determine what resources lie below, with two applicants specifying Charleston as one of their main ports." According to the article, "it's the use of these airguns that has many concerned, as some organizations, such as Oceana, claim the devices have a negative effect on marine life."

Marine Scientists Seek To Block Seismic Testing. The [Newsweek](#) (3/5, 1K) reports that "leading ocean scientists from the US and around the world today urged President Obama to halt a planned oil and gas exploration program off the Atlantic coast involving millions of underwater sound blasts that would have 'significant, long-lasting and widespread impacts on the reproduction and survival' of threatened whales and commercial fish populations." In the letter, "75 scientists from institutions such as Cornell, Duke, the New England Aquarium, Stanford, and the University of North Carolina say that the seismic blasts, from high-volume airguns that fire every 10-12 seconds, are nearly as loud as conventional explosives and have 'an enormous environmental footprint.'"

ADDITIONAL COVERAGE OF MEETINGS SCHEDULED TO DISCUSS OFFSHORE DRILLING PROPOSAL. Additional coverage of the meetings scheduled to discuss the federal government's offshore drilling proposal was provided by the [Hampton Roads \(VA\) Virginian-Pilot](#) (3/5, 405K), the [Outer Banks \(NC\) Sentinel](#) (3/5, 25K), the [Outer Banks \(NC\) Voice](#) (3/4), the [Island Free Press \(NC\)](#) (3/5), and [WITN-TV](#) Washington, NC (3/5, 102K).

Tackling America's Water Challenges:

CALIFORNIA WATER MANAGERS CRITICIZE CENTRAL VALLEY PROJECT. The [Courthouse News](#) (3/4, 7K) reports that "federal delivery of zero water to the Central Valley this year threatens the 'potential devastation (of) tens of thousands of acres,' state water authorities say." Water managers claim "the federal program designed to provide water to the Central Valley is broken." Friant Water Authority General Manager Ronald Jacobsma said, "Last year we had a zero allocation at Friant and scrambled to make some water available through some district programs, water purchases, groundwater banks and groundwater pumping, and we were able to keep most of the orchards alive. But this year we're going in with less by way of reserves both from a water supply perspective and from a financial perspective for many growers. We are looking at potential devastation to tens of thousands of acres, particularly citrus."

Additional coverage of the BOR's decision was provided by the [Courthouse News](#) (3/3, 7K).

LAKE POWELL FUNDING BILL PASSES HURDLE. The [St. George \(UT\) Spectrum](#) (3/4, 46K) reports that "pipeline proponents have cleared a hurdle in getting funding established for the controversial Lake Powell Pipeline." SB281, "Water Infrastructure Funding" was "moved from the Senate Rules Committee to the Senate Natural Resources, Agriculture & Environment Committee, for review this morning."

SUPPORT URGED FOR BAY DELTA CONSERVATION PLAN. The [Los Angeles Daily News](#) (3/4, 317K), Ron Miller, the executive secretary of the Los Angeles/Orange Counties Building and Construction Trades Council, writes that California needs "to fix this broken water distribution system now." He claims that "the Bay Delta Conservation Plan (BDCP) would address the most severe vulnerabilities of California's water delivery system." According to Miller, "the BDCP will improve the safety of our water system by fixing aging and outdated infrastructure, relying on the most innovative technologies and engineering practices."

Empowering Native American Communities:

CHEROKEE NATION WELCOMES BIA'S INDIAN CHILD WELFARE ACT GUIDELINE REVISION. The [Indian Country Today Media Network](#) (3/3, 49K) reports that "Assistant Secretary – Indian Affairs Kevin K. Washburn announced that the Bureau of Indian Affairs had published revised, sweeping new guidelines to ensure the rights and protections of Native families and children under the Indian Child Welfare Act as ICTMN reported." In a statement, Cherokee Nation Principal Chief Bill John Baker said, "The Cherokee Nation applauds Mr. Washburn and his staff for taking the time to listen to the concerns of tribes and Indian families. The Cherokee Nation, along with many other tribes and Indian organizations, submitted comments to the BIA on the need for updated guidelines following the case of *Adoptive Couple v. Baby Girl*."

HALFTOWN FACTION SEEKS FEDERAL MEDIATION. The [Finger Lakes \(NY\) Times](#) (3/5, 43K) reports that "Cayuga Nation Council members Clint Halftown, Tim Twoguns and Gary Wheeler said Tuesday that they have requested federal mediation to help resolve the nation's leadership dispute." However, "the other group involved in the dispute says they shouldn't have bothered." According to the article, "Chiefs Samuel George and William 'Chuck' Jacobs and Chester Isaac dismissed Halftown's request and reiterated their belief that they are the 'traditional and rightful leaders.'"

COMMUNITY FORUM HELD ON CONFEDERATED SALISH AND KOOTENAI TRIBES' WATER COMPACT. The [Daily Inter Lake \(MT\)](#) (3/5, 52K) reports that "tempers flared during a community forum Tuesday evening that was intended to answer questions from the public about the Confederated Salish and Kootenai Tribes' water compact." According to the article, "the three-hour policy discussion was interrupted frequently by members of the public who stood up to voice their discontent with the compact."

CHIPPEWA CREE COMMITTEE VOTES TO EXPEL TRIBAL CHAIRMAN FOR THIRD TIME. The [AP](#) (3/5) reports that "the executive body of the Rocky Boy's Chippewa Cree tribes in north-central Montana voted Monday to expel chairman Ken Blatt St. Marks for the third time." According to the article, "in an opinion issued Monday, the Chippewa Cree Business Committee said they found St. Marks has 'committed gross misconduct and neglected his duty.'"

MAN ARRESTED AFTER STRIKING BIA OFFICER, HIGH-SPEED CHASE. The [Bismarck \(ND\) Tribune](#) (3/5, 32K) reports that "William Joseph Schneider, 33, of Bismarck, has been named by the Bismarck Police Department who led police on chase that lasted for more than an hour on Tuesday." Schneider, "who was stopped in Fort Yates by a Bureau of Indian Affairs agent, allegedly injured the agent as he drove off, resulting in a chase that would include the North Dakota Highway Patrol, Morton County Sheriff's Department, Mandan Police Department, Bismarck Police Department and Burleigh County Sheriff's Department before ending at the intersection of Centennial Road and Saratoga Avenue on Tuesday afternoon."

Also reporting on the story are the [Dickinson \(ND\) Press](#) (3/5, 3K), [WDAZ-TV](#) Grand Forks, ND (3/5, 1K), and [KXMC-TV](#) Minot, ND (3/5, 1K).

Office of Insular Affairs:

END OF CW PROGRAM UNDER DISCUSSION. The [Marianas Variety](#) (3/5) reports that "acknowledging the significant role of foreign workers in the local economy, the Inos administration continues to have discussions with the federal government about the CW program while preparing for its end in 2019." Press Secretary Ivan Blanco said, "We are already taking steps to bolster and train our US-eligible workforce to meet the demands of our growing private sector through the work of our CNMI Department of Labor, the Office of Insular Affairs, the CNMI Department of Commerce, and our various educational institutions."

Top National News:

KERRY REACHES OUT TO PERSIAN GULF ALLIES AS IRANIAN OFFICIAL SAYS DEAL IS "VERY CLOSE." The day after Israeli Prime Minister Benjamin Netanyahu's speech before the US Congress to warn about a nuclear deal with Iran, the country's foreign minister, Mohammad Javad Zarif, told [NBC Nightly News](#) that the parties are "very close" to an agreement. While the [AP](#), among other news outlets, indicates that "US officials sought Wednesday to tamp down expectations," Zarif's comments generated a number of media analyses of what an agreement would entail, with reports casting Secretary of State Kerry's trip to the Persian Gulf as an effort to ease concerns about it among key US allies. Kerry's comments yesterday defending his approach to the talks, meanwhile, are seen as a continuation of the Administration's rebuttal of Netanyahu's arguments.

In his exclusive interview with NBC News, notes [Reuters](#) (3/5, Cooney), Zarif reiterated that his country has no intention to build a nuclear weapon, saying, "Once we reach that understanding, once this hysteria is out, once this fear-mongering is out, then we can have a deal, and a deal that is not going to hurt anybody." The [AP](#) (3/5, Jahn), which reports "the US and five other world powers appear to be narrowing differences with Iran on one potential bomb-making technology – uranium enrichment," notes the Administration "says it will not accept a pact unless it stretches to at least a year the time Iran would need to produce enough material for the fissile core of a nuclear weapon." The [Wall Street Journal](#) (3/5, Norman, Subscription Publication, 5.67M) runs a similar report under the headline "Iran Talks Closer On One-Year Nuclear 'Breakout' Demand," in which it quotes Kerry as saying talks remained "tough and intense."

[NRC Nightly News](#) (3/4 story 8 2 15 Holt 7.66M) also asked Zarif why Americans should trust Iran. He replied "We're not asking anybody to trust us and we are not going to

trust anybody for the time being. We take one step at a time. We're not asking for trust. We are asking for verification and we are accepting verification." Noting Zarif's assertion that "we are very close if the political decision can be made to get to yes, as President Obama said," [Politico](#) (3/4, Breitman, 669K) indicated the comments "suggest that Iran's volatile supreme leader, Ayatollah Ali Khamenei, is the chief barrier to the deal on the Iranian side." Khamenei "is widely understood to be Iran's final decision maker on major foreign policy issues."

The [AP](#) (3/5) reports that "the sides hope to have a progress report by late March allowing them to finesse details into a final pact by June." However, "a senior US official appeared to walk back from the significance of that first stage, describing it as only 'an understanding that's going to have to be filled out with lots of detail' by the June final target date." The AP says "the official's comments could be an attempt to stretch the interpretation of what should be achieved by March, allowing further negotiations even if nothing more is achieved than a vague declaration." That official also said the President "will make a call on whether to continue into June once he sees the March assessment from US negotiators."

Kerry, says the [Washington Post](#) (3/5, Morello, 5.17M), "directly rebutted critics" yesterday, echoing "statements from President Obama." Kerry said of the negotiations, "The first step is to prevent Iran from acquiring a nuclear weapon. ... And we know that absent a deal, Iran will have the ability to move ahead with its nuclear program. That we know for sure, because that's exactly what's happened to date." The [New York Times](#) (3/5, Gordon, Subscription Publication, 9.97M) similarly reports that in an apparent reference to what it terms Netanyahu's "harsh criticism of the emerging accord," Kerry said yesterday, "We are not going to be distracted by external factors. ... Simply demanding that Iran capitulate is not a plan." [AFP](#) (3/5, Biddle) reports that Kerry also said, "Any deal we reach would give us the intrusive access and verification measures necessary to confirm that Iran's nuclear facilities are indeed on a peaceful path. That would allow us to promptly detect any attempt to cheat or break out and then to respond appropriately." [Reuters](#) (3/5, Mohammed), however, notes that upon his return to Israel, Netanyahu claimed he had offered the US a "practical alternative" to the current course.

The [Washington Post](#) (3/5, Morello, 5.17M) reports that "the US delegation at the Wednesday talks included Energy Secretary Ernest Moniz, and the Iranian team included Ali Akbar Salehi, the atomic energy chief." The [New York Times](#) (3/5, Gordon, Subscription Publication, 9.97M), meanwhile, notes that following talks in Montreux, Kerry "flew to Saudi Arabia...to take on the challenge of explaining a potential deal...to the American-allied conservative monarchies of the gulf," which, "like Israel...see Iran as an opponent" and "are concerned about the terms of the deal, which would be limited in duration and would allow Iran to retain some of its nuclear infrastructure." Kerry "insisted that it was not yet clear whether an agreement would be reached with Iran," even as "he continued to lay the foundation for selling an agreement should one be reached." In Riyadh, notes the [Military Times](#) (3/4, Lee, 744K), Kerry "will see the new Saudi monarch, King Salman, and meet separately with the foreign ministers of the members of the Gulf Cooperation Council: Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and the United Arab Emirates."

Iranian President "Content" With Course Of Talks, Blasts Israel. [AFP](#) (3/5) reports Iranian President Hassan Rouhani yesterday "said Israel creates the 'greatest danger' in the region," and said of the ongoing talks, "The people of the world are content with the way negotiations with the P5+1 group are moving forward...but there is only this occupying regime that is enraged by these talks."

Reid Opposed To Taking Up Corker-Menendez Bill; Democrats Unveil Alternative. The [AP](#) (3/5, Werner) reports that in an interview, Senate Minority Leader Reid "announced" his "opposition Wednesday to fast action on a bill giving Congress final say on any nuclear deal with Iran." Said Reid, "I think we are better off on things relating to the Iran deal to wait until we see if there can be something negotiated. ... And if there is something negotiated which allows a deal, then we should all jump in with all the energy we have. But until then I think it takes away from the fact that we might get a deal that's a good deal." [Reuters](#) (3/5, Zengerle) notes that Senate Foreign Relations Committee Chairman Bob Corker, who sponsored the measure with Sen. Robert Menendez, said no committee votes have been scheduled on the legislation.

[Politico](#) (3/5, Everett, 669K) reported, however, that "shrugging off Democrats' filibuster threats, Senate Majority Leader Mitch McConnell is moving forward with a vote" on Iran legislation. Said McConnell, "It was surprising to see some members on the other side of the aisle threaten to filibuster their own bill, a bill that they rushed to introduce before the President's negotiations were complete. ... It is my sincere hope that the sponsors of this bill, who will have the opportunity to review and defend their bill in committee, will not filibuster." Politico adds that "there appears little hope of that." The [New York Times](#) (3/5, Davis, Subscription Publication, 9.97M) casts the developments as "a reprieve for...Obama."

[The Hill](#) (3/4, Wong, 224K), meanwhile, reported that Sen. Barbara Boxer, "a senior member of the Senate Foreign Relations Committee," yesterday "introduced a bill... that would require the White House to regularly update Congress on Iran's compliance with any nuclear deal." The measure, cosponsored by Sens. Sherrod Brown, Tom Carper, Dianne Feinstein, Al Franken, Martin Heinrich, and Brian Schatz, "could provide cover for Democrats who vote against the Corker-Menendez bill, or a tougher bill by Sen. Mark Kirk (R-Ill.) and Menendez – by offering an alternative measure allowing congressional oversight of a final deal." Boxer's bill "would require the president to report to Congress at least once every 90 days on a deal, along with a certification by the president in consultation with the Director of National Intelligence on Iran's compliance."

Psaki Sends Reporters Article Contradicting Netanyahu. The [Washington Post](#) (3/5, Morello, 5.17M) notes in the final paragraphs of its story on the talks that "Kerry spokeswoman Jen Psaki sent reporters a copy of an article published by [FactCheck.org](#) that said Netanyahu had misrepresented Kerry in one of the central points of his speech." Psaki's email "made no additional comments, beyond the subject line, 'Please share.'" The article indicated that "Netanyahu had taken Kerry out of context when he claimed that Kerry 'confirmed last week that Iran could legitimately possess' 190,000 centrifuges, used to enrich uranium, as part of the agreement." In fact, adds the Post, Kerry "spoke more generally in testimony he gave to the House Committee on Foreign Affairs on Feb. 25, saying that a 'civilian power plant that's producing power legitimately, and not a threat to proliferation, you could have as many as 190,000 or more centrifuges.'"

The [Fact Check](#) (3/4, Kiely, 5K) piece, titled "Netanyahu Takes Kerry Out Of Context," also includes a quote from State spokeswoman Marie Harf, who said, "Kerry was not speaking to what Iran could or would have under or after a deal – he wasn't talking specifically about Iran at all. ... He was arguing that ensuring the nuclear program is peaceful through measures like transparency and monitoring can be as important [as] the number of centrifuges, which can get quite high even in countries that peacefully enrich uranium only to produce electrical power."

Karl Rove, in today's [Wall Street Journal](#) (3/5, Rove, Subscription Publication, 5.67M), argues that by mounting a public relations push against Netanyahu's speech, the Administration raised the speech's profile and made it more relevant than it would have been otherwise.

NYTimes Analysis: Netanyahu Shifted Stance On "Zero" Capability. The [New York Times](#) (3/5, Baker, Subscription Publication, 9.97M) reports that lost in the coverage of Netanyahu's speech is "what he did not say...to describe his bottom line when it comes to an acceptable Iranian nuclear program – zero capability whatsoever." That "absence from Mr. Netanyahu's carefully prepared text was no accident, according to the Israeli camp, and it signaled a shift in position, however slight." Under this new stance, "rather than insist that Iran be left with no centrifuges and that it be barred from any enrichment of uranium, as he has in the past, Mr. Netanyahu signaled that he could live with a modest capability, just not one as robust as Mr. Obama would permit."

Polls Find Speech Gave Small Boost To Netanyahu. [Reuters](#) (3/5, Fisher- lan) reports that two opinion polls released Wednesday indicate Netanyahu appears to have received a small boost following his speech to Congress. A Channel 10 survey has Netanyahu's Likud Party gaining two seats, leaving him in a tie with Isaac Herzog's Zionist Union. A Channel 2 poll, meanwhile, found Likud was up one, just behind Herzog's list. The [Washington Post](#) (3/5, Booth, Eglash, 5.17M) says the polls show the speech "had only a modest influence on the Israeli electorate," while the [New York Times](#) (3/5, Kershner, Subscription Publication, 9.97M) notes that "the opposition in Israel says there is no difference between it and the government when it comes to the strategic threat that would be posed by a nuclear Iran," though Herzog "says that the way to counter it is not to antagonize the American administration but to build strong ties with it to reach joint understandings about what would constitute an acceptable deal with Iran."

E.J. Dionne writes in the [Washington Post](#) (3/5, 5.17M) that "It was disconcerting to watch Congress cheer wildly as a foreign leader.. trashed an American president's foreign policy," and "it was equally strange that the speaker of our House of Representatives interjected the US Congress into an Israeli political campaign."

Ross: Netanyahu Made "Strong Case," Obama Should Address His Concerns. Dennis Ross, "a key White House adviser to...Obama on Iran from 2009 to 2011 and Mideast peace envoy for two previous administrations," writes in [USA Today](#) (3/5, 10.32M) that Netanyahu "made a strong case to the Congress about why he thinks the potential agreement with Iran on its nuclear program is a 'very bad deal.'" Ross adds that the Administration "should address" Netanyahu's arguments, "spelling out different categories of violations" of the eventual deal "and the consequences for each – and then seek congressional authorization to empower this president and his successors to act on these consequences." Ross concludes that "if applied also to Iranian moves toward a nuclear weapon after the expiration of the deal, the administration would truly be answering the most significant of the concerns that Netanyahu raised." And "maybe then, this episode of US-Israeli tension would be overcome."

WSJournal Contrasts Pelosi's Reactions To Netanyahu, Assad. In an editorial, the [Wall Street Journal](#) (3/5, Subscription Publication, 5.67M) criticizes a statement by House Minority Leader Pelosi in which she accused Netanyahu of condescension and revealed she had been near tears during the Israeli leader's speech to Congress. The Journal contrasts that statement with one her office issued in 2007, when Pelosi visited Bashar al-Assad in Syria, "We were very pleased with the assurances we received from [Mr. Assad] that he was ready to resume the peace process."

Israel Raids Ship Filled With Rockets, Allegedly From Iran. The [Washington Times](#) (3/5, Ernst, 644K) reports "a ship filled with dozens of rockets allegedly supplied by Iran was raided Wednesday in the Red Sea by the Israeli navy." Israeli Defense Minister Moshe Yaalon said after the raid, "Iran trains, funds and arms terror groups in the region and around the world and its failed attempts to transfer the arms that were discovered this morning is more proof of that."

WSJournal Analysis: Iran Expanding Regional Influence. The [Wall Street Journal](#) (3/5, Spindle, Subscription Publication, 5 67M) reports the lessening of the secrecy surrounding Iranian Quds Force commander Qasem Soleimani and highlights how Iran is altering the way it interacts with the Middle East. The Journal says Iran is no longer seeking to only extend its influence in covert ways, but is making some of its efforts visible.

MEDIA ANALYSES SUPREME COURT LEANING TOWARD GOVERNMENT IN KING V. BURWELL. Much of the coverage of the Supreme Court's [oral arguments](#) in King v. Burwell focuses on Justice Anthony Kennedy, who is seen as the swing vote in the case. The network news broadcasts spent five minutes and 45 seconds on the story, and print coverage this morning is extensive. While some reports and commentary say the outcome of the case is difficult to predict, the consensus view in the coverage is that the Court is leaning toward upholding the ACA's subsidies for consumers who purchased health insurance on the Federal exchange. Many reports pay particular attention to Kennedy's claim that ruling in favor of the plaintiffs could send the law into a "death spiral."

For example, on [ABC World News](#) (3/4, story 8, 1:30, Muir, 5.84M) David Muir reported that Kennedy gave "a bit of a hint about which way the case might go." Jim Avila added that Kennedy, who is "a critical swing vote," told the plaintiffs' attorney that "ruling in their favor would send the entire Obamacare program into a death spiral," and an editorial in the [New York Times](#) (3/5, Subscription Publication, 9 97M) says that while the arguments "provided few solid clues to how the justices will rule," Kennedy's comments were "a small but encouraging sign that a majority of the court may be prepared to avoid a ruling that would essentially destroy Obamacare."

An editorial in [USA Today](#) (3/5, 10.32M) says the arguments "suggested that this latest challenge is even more flimsy than the one the court wisely rejected in 2012," and in his [Washington Post](#) (3/5, 5.17M) column, Charles Lane writes that "conservative hearts sink, as those on the right who had invested their hopes in Kennedy watch what may be their last best chance for a Supreme Court victory over Obamacare possibly slip away." Dana Milbank writes in his [Washington Post](#) (3/5, 5.17M) column that there were 90 minutes of "lopsided argument in favor of the Obama administration's defense," which "cast significant doubt on what had been a plausible challenge to Obamacare's legality."

Under the headline, "Obamacare On Life Support As Supreme Court Splits On Law's Fate," the [Washington Times](#) (3/5, Howell, 644K) says the Justices disagreed on "whether Obamacare's framers meant to offer insurance subsidies to every state," but [McClatchy](#) (3/5, Doyle, Subscription Publication, 17K) reports that the "tentative prognosis look[s] rather positive for the president's signature health care law."

Jan Crawford, meanwhile reported on the [CBS Evening News](#) (3/4, story 9, 1:55, Rose, 5.08M) that the "outcome is impossible to predict," and while Pete Williams reported on [NBC Nightly News](#) (3/4, story 4, 2:20, Holt, 7 86M) that although a prediction is "impossible," the Court "did not seem as hostile to Obamacare as the White House had feared," on [MSNBC's Andrea Mitchell Reports](#) (3/4, 487K) he said that the "bottom line" is that "you can't predict what's going to happen based on this argument." The [Huffington Post](#) (3/4, Cohn, 281K) also said it is "difficult to predict how the court will rule," and the [Wall Street Journal](#) (3/5, A1, Kendall, Bravin, Subscription Publication, 5 67M), which describes the Court as divided, says the outcome is difficult to predict.

A [Politico](#) (3/5, Nather, 669K) analysis says that while ACA supporters "were cheered Wednesday by Justice Anthony Kennedy's tough grilling of the lead attorney in the latest lawsuit — and the law's opponents came away nervous," there is "still enough uncertainty about the outcome of King v. Burwell to guarantee that the survival of Obamacare will be in doubt until the Supreme Court rules at the end of June."

[USA Today](#) (3/5, Wolf, Heath, 10.32M) describes the arguments as "heated" and notes that the Court "appeared closely divided." USA Today adds that while the Court's "most conservative members" seemed to be "pleased" by the argument that ACA's language allows for tax credits "only in states that set up their own health insurance exchanges," the Court's "four liberals sided with the government's assertion that the entire law — designed to provide health insurance protection to 'all Americans' — must be considered paramount to any literal interpretation of those four words." Likewise, [The Hill](#) (3/4, Ferris, 224K) reported that while the Court's conservative members "appeared favorable to the challengers' argument" for a "plain English" reading of the law, the liberal Justices "argued that the context was more important," leaving Chief Justice John Roberts and Kennedy as potential swing votes.

Most reports echo the sentiment expressed by [USA Today](#) (3/5, Wolf, 10.32M), which reports that the fate of the law "likely rests in the hands" of Chief Justice Roberts and Kennedy. For example, Jeffrey Toobin said on [CNN's The Lead](#) (3/4, 320K) that the "key to this case" are Roberts and Kennedy, and the [New York Times](#) (3/5, A1, Liptak, Subscription Publication, 9.97M) says the Administration "must almost certainly capture the vote of either Chief Justice John G. Roberts Jr. or Justice Anthony M. Kennedy to prevail."

[Bloomberg News](#) (3/5, Stohr, 2.94M) notes that Kennedy, who "asked questions of both sides," said that "limiting the tax credits to 16 states, as a group of challengers urge, would create a 'serious constitutional problem.'" Kennedy said the Court "might have to allow nationwide subsidies to avoid trammeling the rights of the states, which he said would face a choice between setting up their own exchanges or seeing their insurance markets collapse." However, he "indicated he saw the challengers' reading of the law as the more natural one."

[Politico](#) (3/4, Haberkorn, 669K) reported that while the Justices "gave few hints about how they'll determine the fate" of the law, Kennedy "suggested that ruling against the White House would be an implicit approval of the federal government putting a gun to the states' heads about insurance." The [Los Angeles Times](#) (3/5, Savage, Levey, 3.49M), meanwhile, says Roberts "was surprisingly quiet throughout the argument," noting that he "did not engage in a back-and-forth exchange with the lawyers."

[Salon](#) (3/5, Williams, 688K) reported that Kennedy's comment that he sees a "serious constitutional problem" with the claim that the law forced states to choose between establishing exchanges and surrendering subsidies, "could signal trouble for the plaintiffs," and the [Washington Post](#) (3/5, A1, Barnes, 5.17M), which calls Kennedy "a potential swing vote," notes that his comments could be "a reason for optimism for the Obama administration." However, while [Reuters](#) (3/5, Hurley) also describes Kennedy as a likely swing vote, it notes that while he indicated he could support the Administration's position, he did not commit to either side.

While some commentary indicates that the Court is leaning toward the Administration position, other commentary this morning argues that the Court should strike down the subsidies. For example, an editorial in the [Wall Street Journal](#) (3/5, Subscription Publication, 5.67M) argues that the ACA draws a clear distinction between the Federal and state exchanges and the Court should uphold the law as it is written. Likewise, in an op-ed in [USA Today](#) (3/5, 10.32M), Jonathan H. Adler, the Johan Verheij Memorial Professor of Law and director of the Center for Business Law and Regulation at the Case Western Reserve University School of Law, says this is "a straightforward case of statutory interpretation," and the statute is clear that the tax credits "are available in exchanges 'established by the state,' and the federal government is not a state." In an op-ed for the [Wall Street Journal](#) (3/5, Subscription Publication, 5.67M), Oklahoma Attorney General Scott Pruitt argues that states knew that the RS might not have authority to grant tax credits in states that did not create their own exchanges, adding that his state chose to give up the credits in order to free itself of the law's mandates.

Kennedy Comments Send Hospital Stocks Higher. [Bloomberg News](#) (3/5, Tracer, 2.94M) reports that hospital stocks climbed Wednesday in the wake of Kennedy's comments, rising "more than all other stocks on the Standard & Poor's 500 Index on Wednesday."

Healthcare, Insurance Industries Brace For Loss Of Subsidies. The [Christian Science Monitor](#) (3/4, Bruinius, 380K) reported that "many in the insurance and health-care industries are bracing for a possible logistical and financial tsunami," which could come if the Court rules that the subsidies are limited to the state exchanges. Experts say such a ruling "would instantly break the insurance plans' business model."

NYTimes Analysis: Many ACA Policies Will Remain Intact Regardless Of Court's Ruling. An analysis in the [New York Times](#) (3/5, Sanger-Katz, Subscription Publication, 9.97M) "Upshot" column says that while a ruling for the plaintiffs "would carry huge consequences in many states," according to an Urban Institute estimate, "15 million of the people estimated to get insurance under the law would still get it." The piece goes on to list a number of ACA policies that would remain intact should the Court find for the plaintiffs.

Barraso Says Republicans Have Not "Signed Off" On An ACA Alternative. [Roll Call](#) (3/4, Hess, Subscription Publication, 102K) reported that Sen. John Barraso said Republicans have not "signed off" on an alternative plan in case the court strikes down the subsidies. Barraso "said discussions were ongoing."

[USA Today](#) (3/5, Davis, 10.32M) reports that Republicans are "under renewed pressure to present a legislative alternative," adding that Barraso said, "We're meeting together on a regular basis. ... What we've been saying is Republicans are going to protect the people hurt by the law, but not protect the law." Barraso, along with Sens. Orrin Hatch and Lamar Alexander "are leading a Senate effort, outlined in a Washington Post op-ed, that they say would provide for a 'temporary transition' for Americans to keep their current health care if the court rules against the administration."

JUSTICE DEPARTMENT DECLINES TO CHARGE WILSON, BLASTS FERGUSON POLICE. In a pair of reports Wednesday, the Justice Department absolved former Ferguson, Missouri police officer Darren Wilson in the shooting death of Micheal Brown, but blasted the practices of the city's police, courts, and city government as biased against African Americans. Attorney General Holder said that while there was not sufficient evidence to bring charges against Wilson, the Department's findings explained why the city erupted in the wake of the shooting. The three network news broadcasts spent a combined total of nearly six-and-a-half minutes on the story and there is extensive print coverage this morning. Generally, the coverage casts the decision not to indict Wilson as unsurprising, and describes the DOJ report as a "damning" condemnation of Ferguson's practices, which vindicates the longstanding complaints of the city's African American residents.

defense and no credible evidence Brown had his hands up attempting to surrender," and the [Daily Caller](#) (3/5, Munro, 318K) says that Holder "admitted" that the "'Hands up, don't shoot' slogan used by Democrat activists since August 2013 is a complete falsehood," but he "declined to criticize the TV-media frenzy — and the claims by local African-American protesters — that spread the false claim that the dead youth, Michael Brown, had his hands up shortly before his was shot by police officer Darren Wilson."

The [St. Louis Post-Dispatch](#) (3/5, 889K) reports that investigators found that "physical evidence and 'credible' witnesses supported Wilson's version" of the shooting, and the [Washington Post](#) (3/5, Lowery, 5.17M) reports that while several eyewitnesses said Brown's hands were up at the time of the shooting, investigators "found that many of those witnesses were not credible," and concluded that Brown "likely did not have his hands up when Wilson shot and killed him."

The [New York Times](#) (3/5, Apuzzo, Eckholm, Subscription Publication, 9.97M) calls the DOJ report "the most definitive account yet of the shooting," adding that it "largely backed up Mr. Wilson's account and said there was no basis for criminal charges," and [USA Today](#) (3/5, Johnson, Alcindor, 10 32M) reports that Holder said the outcome of the shooting investigation represents "sound, considered and independent judgment of the expert career prosecutors within the Department of Justice," adding, "I concur with the investigative team's judgment and the determination about our inability to meet the required federal standard."

The [Wall Street Journal](#) (3/5, Barrett, Subscription Publication, 5.67M) reports that investigators cited the high legal standard in required for a Federal case, noting that prosecutors would have to prove that Wilson intended to violate Brown's rights and acted with unreasonable force that would not have been used by another officer in the same situation, and the [Huffington Post](#) (3/4, Reilly, 281K) noted that the DOJ report "does not attempt to establish whether Wilson was justified in

Hello Rod,
I just wanted to let you know that we are locking in 3/31 for Secretary Jewell for an event in Hawaii to celebrate the monument designation. I understand that the Congressman will not be available; we would be happy to have a representative of your staff participate. I don't have any more details about the event yet, although it will likely be mid-morning. But I will be happy to share more details as I get them.
Thanks,
Jeremy

Hello Rod,
I understand, and if this event happens we would be happy to have a representative from your office attend. I'll keep you in the loop!
Thanks,
Jeremy

Aloha Jeremy,

Thank you so much for the follow up email. Unfortunately, as of now, my boss may be out of town that week. He will be in Hawaii the 2nd week of the recess, April 6-10. However, we would completely understand if that does not work for the rest of the group and we would just ask if we could send a representative.

Thank you again,

Rod

Subject Re: Honouliuli celebration, March 2nd?

Hello Rod,

Sorry to keep coming back to the well on this, but since it looks like much of the delegation would have a hard time making March 2nd work,

I wanted to see if March 31/April 1 would be more feasible, as it's during recess?

Thanks,

Jeremy

Subject Honouliuli celebration, March 2nd?

Hello Rod,

Please keep this request internal to your office for the time being, but would your boss be available in Hawaii on March 2nd if Secretary Jewell were in the state to celebrate the designation of Honouliuli as a national monument?

Thanks,
Jeremy
