Subject Re: Honouliuli celebration, March 2nd?

Hello Rod,

I just wanted to let you know that we are locking in 3/31 for Secretary Jewell for an event in Hawaii to celebrate the monument designation. I understand that the Congressman will not be available; we would be happy to have a representative of your staff participate. I don't have any more details about the event yet, although it will likely be mid-morning. But I will be happy to share more details as I get them.

Thanks,

Jeremy

Aloha Jeremy,

Thank you so much for the follow up email. Unfortunately, as of now, my boss may be out of town that week. He will be in Hawaii the 2nd week of the recess, April 6-10. However, we would completely understand if that does not work for the rest of the group and we would just ask if we could send a representative.

Thank you again,

Rod

Subject Re: Honouliuli celebration, March 2nd?

Hello Rod,

Sorry to keep coming back to the well on this, but since it looks like much of the delegation would have a hard time making March 2nd work, I wanted to see if March 31/April 1 would be more feasible, as it's during recess?

Thanks,

Jeremy

Subject Honouliuli celebration, March 2nd?

Hello Rod,

Please keep this request internal to your office for the time being, but would your boss be available in Hawaii on March 2nd if Secretary Jewell were in the state to celebrate the designation of Honouliuli as a national monument?

Thanks,
Jeremy

DOI in the News:

SECRETARY JEWELL SIGNS SHOSHONE-PAIUTE WATER RIGHTS AGREEMENT. The [AP](#) (3/1) reports that Interior Secretary Sally Jewell has "signed an agreement to end longstanding water disputes between the federal government and the Shoshone-Paiute Tribes of the Duck Valley Indian Reservation on the Nevada-Idaho border." The agreement signed Friday "guarantees water rights for the tribes while providing certainty for upstream water users of the East Fork of the Owyhee River." The settlement also "authorizes millions in funding for tribal water development projects, including rehabilitation of the federal Bureau of Indian Affairs irrigation project serving the reservation."

Also reporting on the story are the [Idaho Statesman](#) (2/27, 196K), the [Las Vegas Review-Journal](#) (3/1, 398K), and the [Law 360](#) (3/1, 9K).

Coverage by the AP was also picked up by the [Navajo Times \(AZ\)](#) (3/2, 66K), [KTVN-TV](#) Reno, NV (3/2, 2K), [KHQ-TV](#) Spokane, WA (3/1, 77K) and [KOLO-TV](#) Reno, NV (3/1, 3K).

ADVOCATES RAMP UP EFFORTS FOR NATIONAL MONUMENTS IN CALIFORNIA. The [AP](#) (3/1) reports that "California lawmakers and advocacy groups are ramping up efforts to win national monument designation for four scenic vistas in the state, from vast stretches of the Mojave Desert to redwood stands along the Pacific Coast Highway to canyons and mountains near the state's famous wine country." Supporters of the proposed monuments in California are pressing both Congress and President Obama. Interior Department spokeswoman Jessica Kershaw "declined to directly answer whether Jewell has recommended that the president use his executive authority on any of the four California projects." However, "she said Jewell regularly briefs the president on her travels and has talked to him about 'the local vision for conservation around the Berryessa Snow Mountain Region.'"

Coverage by the AP was also picked up by the [Fresno \(CA\) Bee](#) (2/28, 323K), the [Quincy \(IL\) Herald-Whig](#) (3/1, 77K), the [Denver Post](#) (3/1, Freking, 804K), the [Houston Chronicle](#) (3/1, Freking, 2 28M), the [Lake Tahoe \(CA\) News](#) (3/1), the [Daily Mail \(UK\)](#) (3/1, 4.78M), [Fox News](#) (3/1, 8.25M), and [Yahoo! News](#) (3/1, Freking, 5 81M).

Additional Coverage Of Three Newest National Monuments. Additional coverage of Pullman National Monument in Chicago, Honouliuli National Monument in Hawaii and Browns Canyon National Monument in Colorado was provided by [USA Today](#) (2/26, 10 32M) and [Fox News](#) (3/1, 8.25M).

Support Urged For Boulder-White Clouds National Monument. For the "Congress Blog" of [The Hill](#) (3/1, Former Rep. Larry Larocco (d-Ida.), 224K), former Rep. Larry Larocco writes that "the congressional efforts to save Central Idaho's Boulder-White Clouds, the largest unprotected roadless area in the US outside of Alaska, are dangerously stalled."

INTERIOR OFFICIALS TO TESTIFY AT BUDGET HEARINGS. [Bloomberg BNA](#) (2/28, 8K) reports that "on March 4, the Senate Appropriations Subcommittee on the Interior will hold a hearing on the Interior Department budget request." Interior Secretary Sally Jewell and Deputy Secretary Mike Connor are scheduled to testify. Jewell also is "scheduled to testify March 5 on Interior's budget request before the House Natural Resources Committee."

Also reporting on the story is the [National Journal](#) (3/2, Subscription Publication, 111K).

DOJ FIGHTING TO KEEP SECRETARY JEWELL TESTIFYING ABOUT MANAGEMENT OF NATIVE AMERICAN ASSETS. The [National Law Journal](#) (3/1) reports that "the US Department of Justice is fighting to keep Interior Secretary Sally Jewell from having to answer questions about the government's alleged mismanagement of Native American assets since the early 20th century."

BILL WOULD PERMANENTLY FUND PILT PROGRAM. The [Farmington \(NM\) Daily Times](#) (3/1, 49K) reports that "New Mexico's US senators are among a bipartisan group of congressional members who plan to introduce a bill that would provide long-term funding" for the PILT program. Sens. Tom Udall and Martin Heinrich "worked successfully with other lawmakers to fund PILT on a single-year basis for 2014 and 2015, and they've advocated for long-term funding."

CEDAR MESA COULD BECOME PART OF NATIONAL CONSERVATION AREA. The [Durango \(CO\) Herald](#) (3/1, 28K) reports that "all eyes are on the Utah Public Lands Initiative, led by U.S. Reps. Rob Bishop and Jason Chaffetz." The article notes that "on the larger scale, the initiative includes 18 million acres of federal lands in seven counties," and "on a smaller scale, it potentially could create a National Conservation Area for Cedar Mesa."

LACK OF GLOBAL SEA LEVEL DATA HINDERING EFFORTS TO ESTIMATE SEA LEVEL CHANGE. The [Wall Street Journal](#) (2/28, Mcginty, Subscription Publication, 5.67M) reports that the absence of global data on sea levels is preventing scientists from accurately estimating sea level changes. The Journal notes that while over 100 years of records on sea level exist for parts of Europe and North America, a lack of records in other parts of the world is creating challenges for estimating both past and future increases in sea level.

CSC MAKES CLOUD DEAL IN MIDST OF BUYOUT TALK. [Washington Technology](#) (2/27, Wakeman, 118K) reports in its "Editors Notebook" blog on CSC's announcement that it acquired the Autonomic Resources company in order to bolster its position in completing FedRAMP. Washington Technology comments that CSC's acquisition demonstrates it is "staying focused on continuing to shape and update its offerings" by strengthening its cloud computing capabilities and the article says that will pay off whether or not rumors

that CSC will split its government and commercial business are accurate.

ADDITIONAL COVERAGE SECRETARY JEWELL MEETS WITH HAWAII GOV. IGE. Additional coverage that Hawaii Gov. David Ige met with Interior Secretary Sally Jewell was provided by the [Honolulu Star-Advertiser](#) (3/1, 360K).

FORMER SECRETARY SALAZAR SUPPORTS EDUCATING ALL AMERICANS ABOUT ENERGY ISSUES. For the "Congress Blog" of [The Hill](#) (3/1, Salazar, 224K), former Interior Secretary Ken Salazar writes that he is "looking forward to joining other minority leaders and key stakeholders at the 2015 Energy Policy Summit being hosted by the American Association of Blacks in Energy and Hispanics in Energy in Washington, D.C. this week to discuss the energy policies impacting minority communities." Salazar says that "through forums like these, minority stakeholder organizations can become better informed about the energy policies that have a real impact on their lives, and ensure our view is heard by policymakers at a national and state level." Salazar concludes that "the best way to ensure a bright energy future for all Americans" is to educate "all constituencies about our America's evolving energy and environmental policies."

US URGED TO CUT OIL CONSUMPTION. For "The Blog" of the [Huffington Post](#) (2/27, Negin, 281K), Elliott Negin, Senior Writer, Union of Concerned Scientists, writes that "attempting to make good on its 'all of the above' energy strategy, the Obama administration recently floated proposals for oil development that have infuriated members of Congress on both coasts, but for very different reasons." Instead, Negin proposes, "given oil's considerable drawbacks, wouldn't it make more sense to focus national attention on consuming less?" He concludes that this strategy "won't require is drilling in the Arctic Refuge, Arctic Ocean or along the Eastern seaboard."

America's Great Outdoors:

National Park Service:

FIRST PEOPLES BUFFALO JUMP STATE PARK CLOSER TO LANDMARK DESIGNATION. The [Great Falls \(MT\) Tribune](#) (2/27, 76K) reports that "First Peoples Buffalo Jump State Park is moving closer to receiving National Historic Landmark designation." Earlier this month, the National Historic Landmark Review Committee "approved and forwarded the nomination to the next level, which is the National Park Service's National Landmark Advisory Committee."

VARIOUS GROUPS OPPOSE YELLOWSTONE PADDLING BILL. The [AP](#) (3/1) reports that "the Greater Yellowstone Coalition is among various groups opposing proposed legislation that would open up more rivers and streams to paddling in Yellowstone and Grand Teton national parks." Caroline Byrd, who directs the environmental advocacy group, said, "It is a blunt approach that fails to consider the existing recreational activities and natural values provided by waters in some of the world's most iconic places – Yellowstone and Grand Teton national parks."

Also reporting on the story is the [Bozeman \(MT\) Daily Chronicle](#) (3/1, 54K).

GRAFFITI ARTIST MAY HAVE VANDALIZED JOSHUA TREE NATIONAL PARK. The [Take Part](#) (3/1, 217K) reports that Paris-based street artist André Saraiva, "better known as André, this week posted an image of a defaced boulder that appears to be inside the Joshua Tree National Park on his now private Instagram account." Joshua Tree National Park hasn't "confirmed whether Saraiva broke the law."

DAVID HALL HOUSE ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [Chicago Tribune](#) (2/27, 2.42M) reports that the David Hall House has been added to the National Register of Historic Places.

ILLINOIS BUDGET CUTS HURT CAHOKIA MOUNDS HISTORIC SITE. The [St. Louis Post-Dispatch](#) (3/1, 889K) reports that the Cahokia Mounds State Historic Site has "been so hurt by Illinois funding cuts that a nonprofit society has turned to the public to pay for brochures for visitors." According to the article, "on Jan. 30, the Cahokia Mounds Museum Society set up a plea on the fund-raising site, [gofundme.org](#), to raise \$7,500," and "by Wednesday, it had surpassed its goal; by Friday, it had raised \$8,716, from 543 people." Meanwhile, "the private Heartlands Conservancy is seeking to have Congress place the mounds under the auspices of the National Park Service."

WINTER CARETAKER OF YELLOWSTONE NATIONAL PARK PROFILED. [CBS News](#) (3/1, 8.2M) reports on Steve Fuller, the Winter Caretaker of Yellowstone National Park. According to the story, "he's stuck out the solitary existence of the position for 42 years, ever since the winter of 1973."

ADDITIONAL COVERAGE NPS SITES RECORD NUMBER OF VISITORS IN 2014. Additional coverage that the NPS, "which is preparing to celebrate its centennial next year, set a record for guests in 2014 with 292.8 million visits," was provided by the [Columbus \(OH\) Dispatch](#) (3/1, 605K).

ADDITIONAL COVERAGE NPS MAPS NOISE LEVELS THROUGHOUT US. coverage of the NPS' work to map noise levels throughout the US was provided by the [Chicago Tribune](#) (2/27, 2.42M), the [Atlanta Journal-Constitution](#) (3/1, 988K), and [WBBM-TV](#) Chicago (2/27, 127K).

ADDITIONAL COVERAGE APOSTLE ISLANDS ICE CAVES OPEN. Additional coverage of the opening of the Apostle Islands ice caves was provided by the [Chicago Tribune](#) (2/27, 2.42M), the [Minneapolis Star Tribune](#) (3/1, Louwagie, 1.37M), and [KBJR-TV](#) Duluth, MN (3/1, 2K).

Bureau of Land Management:

JUDGE TO HEAR ARGUMENTS ON WILD HORSE ROUND-UP LAWSUIT. The [AP](#) (3/1) reports that "arguments in a federal lawsuit contesting the roundup of hundreds of wild horses in western Wyoming last fall will focus on a federal law that carries different rules for private and federal land." According to the article, "the 1,263 horses gathered in late September and early October roamed both types of land in a vast area of sagebrush desert featuring square-mile sections of private land interspersed with equal-sized sections of federal land." US District Judge Nancy Freudenthal will consider in Laramie on Monday whether the BLM "violated the Wild Free-Roaming Horses and Burros Act with the roundup in the Checkerboard area east and south of Rock Springs."

Coverage by the AP was also picked up by the [Gillette \(WY\) News Record](#) (3/1, 19K).

Also reporting on the story is the [County 10](#) (2/28).

BLM SEEKS COMMENTS ON RED DESERT COMPLEX WILD HORSE GATHER. The [Casper \(WY\) Star-Tribune](#) (3/1, 90K) reports that the BLM is "accepting public comments in preparation for a wild horse gather in the Red Desert Herd Management Area." According to Kirsten Lenhardt, BLM Wyoming spokeswoman, "the agency expects the Red Desert gather to be much smaller than the Checkerboard gather conducted in late 2014." Lenhardt, said, "The number of horses has yet to be identified as that will come out of the analysis in the Environmental Assessment. The BLM is currently in the scoping phase."

Also reporting on the story is the [County 10](#) (3/1).

AROUND 370 WILD HORSES ESTIMATED TO BE ON JOINT LANDS IN FOUR CORNERS. The [AP](#) (3/1) reports that "federal authorities estimate that around 370 wild horses are roaming on lands jointly managed by the US Bureau of Land Management and the US Forest Service in the Four Corners." According to the article, "the herds of wild horses roam the Jicarilla Joint Management Area." The BLM Resource Advisory Council is "looking at possible solutions to control the population."

ENVIRONMENTALISTS PAN NEW RESOURCE MANAGEMENT PLAN. The [Durango \(CO\) Herald](#) (2/27, 28K) reports that "environmental organizations were quick to pounce on a new resource management plan released Friday by the Bureau of Land Management, calling it flawed, woefully inadequate and a missed opportunity to properly manage development and recreation on public land." The document, "which replaces a resource-management plan that dates to 1983, covers 503,000 surface acres and 300,000 acres of mineral estate beneath nonfederal land in La Plata, Archuleta, Montezuma, San Juan, Dolores, San Miguel, Hinsdale and Montrose counties." The bureau's "chosen plan, one of four options, struck a middle ground in handling environmental, recreational and commercial issues."

Also reporting on the story is the [Colorado Public Radio](#) (3/1).

BLM SEEKS INPUT ON RESOURCE MANAGEMENT PLAN IN NEVADA. The [Las Vegas Sun](#) (3/1, 155K) reports that the BLM is seeking "input on a new plan that governs how 3.1 million acres of federal lands in Southern Nevada are used." The article notes that "the potential impact of the plan to reshape how public lands are used and accessed has drawn a strong response, as many Nevadans already chafe at the BLM's presence," and "one of the loudest critics has been Cliven Bundy, the rancher who ignited a tense standoff last year with the BLM over the use of federal lands for grazing in rural Clark County."

NEW MEXICO MULLS FEDERAL LAND TRANSFER. The [Taos \(NM\) News](#) (3/1, 31K) reports that "sportsman are deeply concerned that efforts at the state legislature to shift control of public lands are being pushed by outside interests and could jeopardize the future of that legacy." If successful, "New Mexico would join several Western states that have expressed frustration with federal management and undertaken exhaustive studies to see if state agencies could take over the reins." The article notes that "in a place like

Taos County, which is about half federal lands, the impact would be substantial."

Effort To Transfer Federal Lands Criticized. In an op-ed for the [Daily Inter Lake \(MT\)](#) (3/1, 52K), Riley McClelland writes that "national forests and Bureau of Land Management lands belong to all of us." McClelland argues that "these federal lands are much too important to be managed by state agencies guided by politicians." McClelland concludes that "transferring federal lands to the states would be a mistake that future generations would rue."

BLM APPROVES ATV TRAIL IN SAN JUAN COUNTY. The [AP](#) (3/2) reports that the BLM has "given final approval to plans for a new ATV trail in San Juan County." The move "allows for construction and maintenance of 6.4 miles of ATV trails that will connect designated routes in the Lockhart Basin area to similar routes in the Bridger Jack Mesa area."

BLM PROPOSES MOSQUITO FLATS MINING AND ATV BAN. The [Fairbanks \(AK\) News-Miner](#) (3/1, 39K) reports that the BLM is "considering blocking mining and summer ATV travel in a 30,000 acre block of Fortymile River country." The bureau has "formally proposed creating a protected area called an Area of Critical Environmental Concern in the Mosquito Flats, about 20 miles west of the Taylor Highway between Tok and Chicken." Public comment for the proposal closes Tuesday.

AUTOPSY REPORT REVEALS DETAILS OF FATAL SHOOTING BY BLM OFFICERS. [KTNV-TV](#) Las Vegas (3/1, 29K) reports that "more than a year after 20-year-old D'Andre Berghardt was shot and killed by Bureau of Land Management officers at Red Rock Canyon, his family still doesn't have any answers as to why." According to a recently obtained autopsy report, "D'Andre Berghardt's body had 7 bullet holes, 3 broken ribs, a shattered pelvis, and a broken arm when he was examined by the Clark County Coroner after being shot dead by BLM officers after an apparent altercation with BLM and Nevada Highway Patrol troopers."

WATCHDOG SAYS TEST RANGE EXPANSION NEEDS FULL REVIEW. The [Ogden \(UT\) Standard-Examiner](#) (2/28, 81K) reports that "a longtime watchdog of military activity in Utah's west desert says a proposal to expand the Department of Defense's training range is missing one, very key element: a proper public review process." Steve Erickson, "who works with the Utah Audubon Council and the Great Basin Water Network, says an Air Force proposal to expand the Utah Test and Training Range by nearly 700,000 acres in the rural areas of Box Elder, Juab and Tooele counties is proceeding without proper federal insight and a lack of public input."

Fish and Wildlife Service:

CROP HERBICIDES PLAY A ROLE IN DECLINE OF MONARCH POPULATION. The [AP](#) (3/1) reports that "a butterfly being considered for federal protection is emblematic of the plight that pollinating insects face in part because farmers, enticed by ethanol mandates, are growing more herbicide-resistant crops, which has stripped millions of acres of crucial plant habitat." Herbicide makers claim "they're committed to helping the black-and-orange insects, whose numbers have plummeted by more than 90 percent in the past two decades." Meanwhile, "environmentalists seeking protection for monarchs under the Endangered Species Act said restoring milkweed habitat would help other pollinating insects, too, such as honey bees, whose numbers of managed colonies have dropped by more than 4 million beehives since 1947." The FWS is "taking comments and data about monarchs through March 2, and a decision on whether to list the monarch as threatened is due in December."

Coverage by the AP was also picked up by the [St. Louis Post-Dispatch](#) (3/1, 889K), the [Houston Chronicle](#) (3/1, Hollingsworth, 2 28M), the [Washington Post](#) (3/1, 5.17M), the [Allentown \(PA\) Morning Call](#) (2/28, 343K), the [Sioux City \(IA\) Journal](#) (3/1, 27K), the [US News & World Report](#) (2/28, 685K), the [Daily Mail \(UK\)](#) (3/1, 4.78M), and [WJBK-TV](#) Detroit (3/1, 253K).

Group Files Lawsuit Against EPA Over Drop In Monarch Butterflies. The [National Monitor](#) (2/28) reports that "the National Resources Defense Council (NRDC), a non-governmental environmental group, has filed suit against the Environmental Protection Agency (EPA) in an effort to force the agency's hand on protection of the Monarch butterfly." According to a statement by the organization, "EPA's failure to respond to an urgent petition that sought to limit the use of a pesticide that's been destroying monarch habitat, filed more than a year ago by NRDC, has resulted in significant ongoing harm to the vulnerable butterfly population."

Also reporting on the story is [Reuters](#) (2/27).

OBAMA ADMINISTRATION, TWO STATES FIGHT RENEWED LEGAL PROTECTION FOR GREAT LAKES WOLVES. The [AP](#) (2/27) reports that "the Obama administration and two states have given notice of plans to appeal a federal judge's order that restored legal protection to gray wolves in the western Great Lakes region." Michigan "filed an appeal document Friday with the US Circuit Court of Appeals in Washington, D.C., a day after Wisconsin did so." The FWS "filed notices earlier this month, although a spokeswoman said a final decision on whether to pursue the case would be made by the Department of Justice."

Also reporting on the story are the [Duluth \(MN\) News Tribune](#) (3/1, 129K), the [Chicago Tribune](#) (2/27, 2.42M), and [WBUP-TV](#) Marquette, MI (3/1).

FWS SENS CONFISCATED ANIMAL PARTS TO NATIONAL WILDLIFE PROPERTY REPOSITORY. [Newsweek](#) (3/1, 118K) reports on the National Wildlife Property Repository near Denver, where confiscated animal parts are sent by the FWS. The article notes that "only about 200 special agents and wildlife inspectors handle wildlife crime in the US" On February 11, the Interior Department, Justice Department and State Department "released a plan for the 'National Strategy to Combat Wildlife Trafficking,' in light of the profitable enterprise's continued growth and its role in breeding organized crime and corruption among government officials."

AUTHORITIES SAY RECENT UTILITY WORK IS NOT A THREAT TO MANASSAS BALD EAGLES. The [Washington Post](#) (2/27, Barnes, 5.17M) reports that "admirers of a pair of bald eagles that live near Manassas Regional Airport raised alarms recently about the birds' safety after noticing a real estate sign and utility work on property in the vicinity of the eagles' nest." According to the article, "concern about the eagles' welfare spread quickly through social media and drew the attention of federal, state and local authorities, who responded to fears that the eagles' habitat might be threatened." But "after visiting the site, officials said they were satisfied that the eagles — which are protected under federal law — are not in jeopardy."

OCEANFRONT DEVELOPMENT AT SUNSET BEACH MOVING FORWARD DESPITE BRUNSWICK COUNTY BOARD RULING. The [Wilmington \(NC\) Star News](#) (2/28, 109K) reports that "Sunset Beach West LLC is moving forward with plans to develop oceanfront property at the west end of Sunset Beach although the Brunswick County Board of Commissioners rescinded a plan to provide water and sewer service to the area." The article notes that "the board's reversal of its September adoption of the policy came after Sunset Beach Mayor Ron Watts received a letter in January from the US Department of Interior stating that the land proposed for development is regulated by the Coastal Barrier Resources Act, or CBRA."

BILL WOULD ALLOW KILLING OF PROTECTED BUZZARDS IN TENNESSEE. The [Knoxville \(TN\) News Sentinel](#) (3/1, 371K) reports that "a state Senate committee has voted to legalize the killing of black buzzards in Tennessee even though they are protected under federal law." The article notes that "approval of SB204 by the Senate Energy, Agriculture and Natural Resources Committee came after Charles Hord, executive vice president of the Tennessee Cattlemen's Association, described how the vultures are killing newborn calves across the state and Sen. Paul Bailey displayed photographs showing buzzard damage at his Jackson County home."

TO CURB BEAR POPULATION, FLORIDA IMPLEMENTS HUNTING SEASON. [NPR](#) (2/28, 1.58M) reports that "for the first time in two decades, Florida officials have scheduled a bear hunting season." The article notes that "it's a response to a rise in bear attacks — but it has some environmentalists upset."

NORTH CAROLINA WILDLIFE OFFICIALS CRITICIZED OVER RED WOLF. The [Raleigh \(NC\) News & Observer](#) (2/28, 395K) editorializes that "in 1987 the US Fish and Wildlife Service sought to bring the red wolf back from the edge of extinction by reintroducing about 100 of the animals into five rural counties on a peninsula in northeastern North Carolina." But "now, on the state level, North Carolina's Wildlife Resources Commission is trying to do the opposite by urging the world's only wild population of endangered red wolves into oblivion." The paper argues that "the Wildlife Resources Commission would betray its mission if it pushes for the red wolf's extinction."

US Geological Survey:

USGS, OKLAHOMA EARTHQUAKE NUMBERS DIFFER. The [Tulsa \(OK\) World](#) (3/1, 395K) reports that "due to differences in calculating earthquake magnitudes, the Oklahoma Geological Survey reported half as many magnitude 4 and higher earthquakes in Oklahoma last year as the United States Geological Survey reported, records show." According to the article, "while OGS reports six earthquakes of magnitude 4.0 and higher last year, the USGS reports the state experienced 14 earthquakes in that range." The article

Securing America's Energy Future:

Renewable Energy:

BLM REVIEWING COMMENTS ON DESERT RENEWABLE ENERGY CONSERVATION PLAN. The [Environment & Energy Publishing](#) (3/1, Subscription Publication, 705) reports that the BLM has "received at least 12,000 public comments" on the Desert Renewable Energy Conservation Plan, "including notable critiques from the renewable industry and US EPA." According to public comments on the draft plan, "it needs a lot of work." The article notes that "while many comments submitted over the last four months commend the Obama administration's efforts to properly site renewables projects, they also raise serious concerns about impacts to air quality, sensitive wildlife habitat and migratory birds."

BOEM PREPARES FOR NEW JERSEY OFFSHORE WIND LEASE SALE. The [Recharge News](#) (3/1, 633) reports that the BOEM is "moving ahead with a competitive wind lease sale off the coast of New Jersey, even though the state has failed since 2011 to enact a market mechanism to incentivize the sector as required by law."

Onshore Energy Development:

RESEARCHERS LOOKING FOR MIDDLE GROUND IN EARTHQUAKE-FRACKING DEBATE IN TEXAS. The [Dallas Morning News](#) (3/1, Kuchment, 1.13M) details how some researchers are "looking for middle ground" in the Earthquake-fracking "debate" in Texas. Specifically, experts "are investigating ways to prevent wells from causing damaging earthquakes without hindering most oil and gas operations."

FRACKING CHEMICAL DISCLOSURE WEBSITE ANNOUNCES IMPROVEMENTS. [NPR](#) (2/27, Cusick, 1.58M) reported, "The groups managing the national fracking chemical disclosure website FracFocus say they are planning improvements to make information more transparent." The Ground Water Protection Council and Interstate Oil and Gas Compact Commission are reportedly responding to criticism from environmental groups and open government groups. Pennsylvania is one of 14 states that requires gas drillers to use the website as part of its chemical disclosure laws. The way information is reported "makes it difficult for researchers to analyze," NPR reported. The groups promised more transparency and an easier reading experience regarding chemicals used in fracking.

COLORADO FRACKING TASK FORCE PROPOSES RULES TO GOVERNOR. [NPR](#) (2/27, Boyce, 1.58M) reported that following months of deliberations, Colorado Gov. John Hickenlooper's task force came out with recommendations to the governor. "Task force member and vice president of operations at Anadarko Petroleum, Brad Holly, says the majority of Coloradans are satisfied with most of the state's drilling," NPR reported. The task force's nine recommendations now await approval from the governor and, in some cases, the state legislature, the article reported.

Offshore Energy Development:

CONTINUING COVERAGE OF OFFSHORE DRILLING PROPOSAL. In continuing coverage of the Obama Administration's offshore drilling proposal, [Roll Call](#) (3/1, Subscription Publication, 102K) reports that Interior Secretary Sally Jewell "emphasized at a recent hearing that the draft proposed plan is just the first of several steps taken before Interior issues a final five-year drilling strategy, with or without an Atlantic option." From there, the Interior Department will "narrow down even further which areas in the approved drilling blocks will actually be offered for leasing." Jewel Isaid, "This is like the top of the funnel, if you will. Only things that are included there could possibly happen during that five-year period."

[Roll Call](#) (2/27, Gardner, Subscription Publication, 102K) reports that "the Obama administration's recent proposal to lease oil and gas drilling in a swath of the Atlantic Ocean generated the expected mix of cheers and jeers on Capitol Hill, but local reaction was mostly divided along state borders rather than party affiliations." The article notes that "Marylanders are reluctant, while Virginians appear to want to charge ahead, especially if it might mean more cash in their state coffers."

GULF STATES CRITICIZE PROPOSAL TO SHARE OIL ROYALTIES. [The Hill](#) (3/1, Cama, 224K) reports that "Gulf Coast lawmakers are up in arms over an Obama administration proposal to reduce the money that their states receive for offshore oil and gas drilling in the Gulf of Mexico." President Obama "proposed in his budget early in February to roll back a 2006 law that, beginning in 2017, would give the Gulf states up to \$375 million a year out of the earnings federal government collects from drillers." Sen. Bill Cassidy "used a Feb. 24 budget hearing to tear into Interior Secretary Sally Jewell for trying to take away money for which he and other lawmakers in the region had fought hard."

DREDGING PROJECT AIMS TO PROTECT VIRGINIA SHORELINE. The [Marine Technology](#) (3/1) reports that the BOEM and Naval Air Station Oceana at Dam Neck, Virginia "expect to begin a shore protection project at the Dam Neck annex within the next month." BOEM Director Abigail Ross Hopper said, "BOEM recognizes the important defense mission NAS Oceana carries out for the nation, and is pleased to contribute to the protection of its valuable assets with sand from federal waters. Other benefits include maintaining coastal resilience, protecting the environment, and enabling the regional economy."

APPEALS PANEL PULLS FALSE CLAIMS ACT CASE FROM HOUSTON FEDERAL JUDGE. The [Houston Chronicle](#) (2/27, George, 2.28M) reports that "a Houston federal judge who has been accused of unfairly stalling a federal whistle-blower lawsuit for years has been removed from the case by the 5th US Circuit Court of Appeals for ignoring its instructions." A three-judge panel determined that the case, which was filed by two government auditors who accused Shell Exploration of fraud under the False Claims Act, "should be assigned to a jurist other than US District Judge Lynn Hughes."

Tackling America's Water Challenges:

SOME CALIFORNIA FARMERS TO GO ANOTHER YEAR WITHOUT FEDERAL WATER. The [AP](#) (2/27) reports that "for a second straight year, the federal government said Friday it won't send any of its reservoir water to the Central Valley, forcing farmers in California's agricultural heartland to again scramble for other sources or leave fields unplanted." The article notes that "many farmers had been bracing for the US Bureau of Reclamation's announcement as California's drought enters its fourth year." However, "many farmers are running out of short-term options such as uprooting orchards and tapping groundwater wells to deal with water shortages."

The [Salem \(OR\) Capital Press](#) (2/27, 113K) reports that BOR Mid-Pacific Regional Director Davis Murillo said, "The rain events in December were encouraging, but the persistently dry weather (since then) underscores our need to plan for another critical year of drought."

Coverage by the AP was also picked up by the [New York Times](#) (2/27, Subscription Publication, 9.97M), the [Atlanta Journal-Constitution](#) (3/1, 988K), the [Bristol \(TN/VA\) Herald Courier](#) (3/1, 85K), the [Houston Chronicle](#) (2/27, Nirappil, 2.28M), the [Daily Mail \(UK\)](#) (3/1, 4.78M), [Fox News](#) (2/28, 8.25M), the [US News & World Report](#) (2/27, 685K), and [WJBK-TV](#) Detroit (3/1, 253K).

Also reporting on the story are the [Wall Street Journal](#) (2/27, Carlton, Subscription Publication, 5.67M), [NPR](#) (3/1, 1.58M), [TIME](#) (3/1, 19.19M), [Reuters](#) (2/27), the [Los Angeles Times](#) (2/27, Boxall, Pierson, 3.49M), the [My Mother Lode \(CA\)](#) (3/1, 1K), [KFSN-TV](#) Fresno, CA (3/1, 2K), [KGPE-TV](#) Fresno, CA (3/1, 46), [KBFX-TV](#) Bakersfield, CA (3/1, 2K), [KXJZ-FM](#) Sacramento, CA (2/27, 1K), [KCET-TV](#) Los Angeles (3/1, 15K), [KXTV-TV](#) Sacramento, CA (2/27, 45K), [KQED-FM](#) San Francisco (2/27, 17K), and [KERO-TV](#) Bakersfield, CA (3/1, 2K).

NEW CALIFORNIA WATER LEGISLATION UNDER WORKS. The [McClatchy](#) (2/27, Subscription Publication, 17K) reports that "California water legislation is starting to trickle across Capitol Hill." The article notes that "one newly introduced bill would speed approval of Sites Reservoir in the Sacramento Valley. Another would help restore San Francisco Bay habitat," and "ore targeted bills are coming."

CENTRAL VALLEY, DELTA WATER RIGHTS UNDER SCRUTINY. The [Sacramento \(CA\) Bee](#) (3/2, 547K) reports that "hundreds of property owners across California's Central Valley and the Sacramento-San Joaquin Delta are scrambling to prove they have a right to divert water from the region's streams, the result of a state order that comes due in just four days." The article notes that "the dispute stems from a complaint filed in July by the California Department of Water Resources and the US Bureau of Reclamation, which operate the massive water diversion systems in the Delta as well as major upstream reservoirs." According to the article, "the two agencies suspect water released from their reservoirs is being inappropriately diverted by property owners in the Delta as it flows past their land."

BOR EXPANDING WINTER AQUIFER RECHARGE IN UPPER SNAKE RIVER SYSTEM. The [Salem \(OR\) Capital Press](#) (2/27, 113K) reports that the BOR is "expanding winter aquifer recharge in the Upper Snake River system, though the watershed's once strong snowpack has dropped to near normal levels due to continued dry weather in February."

NEW MEMBERS JOIN LAKE BERRYESSA ADVISORY GROUP. The [Napa Valley \(CA\) Register](#) (3/1, 46K) reports that "new members are joining a group that advises the US Bureau of Reclamation on its efforts to renovate the Lake Berryessa recreation experience." The BOR is "amid a multi-year, controversial effort to remake the resorts along the lake's federally owned shoreline." The bureau "announced the latest configuration of the group after requesting nominations."

SOUTHWEST FACES WATER ISSUES. The [Arizona Republic](#) (2/28, 1.14M) editorializes that "a Colorado River diminished by climate change impacts all of the Southwest, urban and rural alike." It notes that "late last year, Arizona's supplier of Colorado River water, the Central Arizona Project, entered into an agreement with the Bureau of Reclamation, Nevada and California to 'bank' water in Lake Mead to keep it from receding to a level that could prove disastrous to all three states."

Additional coverage of water issues in the Southwest was provided by the [Arizona Republic](#) (2/27, 1.14M) and the [Arizona Republic](#) (2/27, 1.14M).

SEN. GARDNER PRESSES FOR ARKANSAS VALLEY CONDUIT FUNDING. The [Pueblo \(CO\) Chieftain](#) (3/1, 79K) editorializes that Sen. Cory Gardner "pressed Interior Secretary Sally Jewell and Deputy Secretary Mike Connor last week about a disturbing lack of federal funds for the Arkansas Valley Conduit." Gardner asserted that "the conduit must remain a priority with the Bureau of Reclamation." The editorial "couldn't agree more, and thank the senator for taking such a strong stance on our behalf."

Empowering Native American Communities:

ASSISTANT SECRETARY WASHBURN TESTIFIES AT SENATE HEARING ON FEDERAL BUDGET. The [Indian Country Today Media Network](#) (3/1, 49K) reports that Sen. John Barrasso, chairman of the Senate Committee on Indian Affairs "pointed out the fact that the United States faces a continued federal deficit and tight budgets, before acknowledging the federal government's important responsibilities to Indian people," during a hearing on President Barack Obama's FY2016 Budget Request for Indian Programs. Assistant Secretary – Indian Affairs Kevin K. Washburn "expanded on the President's budget, stating it seeks increases across more than 20 Federal departments and agencies serving Indian country totaling some \$20.8 billion, a \$1.5 billion or 8 percent increase over 2015's budget." Washburn said, "These increases support improved access to federal programs and resources, particularly focused on youth through the Administration's newly established Generation Indigenous initiative. Investments like these will provide real and sustainable improvements in Indian country."

HOUSE APPROVES REP. NOLAN'S AMENDMENT FOR TRIBAL SCHOOLS. The [Brainerd \(MN\) Daily Dispatch](#) (3/1, 2K) reports that "the US House of Representatives Thursday approved US Rep. Rick Nolan's amendment to H.R. 5 – the Student Success Act – putting Congress on record that Indian children will not have to attend school in buildings that are dilapidated and dangerous." In his remarks on the House Floor, Nolan "invoked the plight of Minnesota's Bug O'Nay Ge Shig School on the Leech Lake reservation." Nolan said, "This amendment puts the Congress of the United States on the record with its commitment to ensure that Indian children do not have to attend schools that are falling apart. However, the Student Success Act is strongly opposed among teachers and the academic community, and would need significant improvement before I could lend my full support to the measure."

Also reporting on the story is [KBJR-TV](#), Duluth, MN (3/1, 2K).

In an editorial, the [Minneapolis Star Tribune](#) (3/2, 1.37M) urges support for the proposals by a working group of American Indian leaders and educators to improve tribal schools.

CHEROKEE NATION WELCOMES BIA'S INDIAN CHILD WELFARE ACT GUIDELINE REVISION. The [Cherokee Nation \(OK\)](#) (2/27, 1K) reports that Assistant Secretary Kevin Washburn "addressed tribal leaders, including Cherokee Nation Deputy Chief S. Joe Crittenden, on the revision of Indian Child Welfare Act guidelines for state courts." Cherokee Nation Principal Chief Bill John Baker said, "The Cherokee Nation applauds Mr. Washburn and his staff for taking the time to listen to the concerns of tribes and Indian families. The Cherokee Nation, along with many other tribes and Indian organizations, submitted comments to the BIA on the need for updated guidelines following the case of Adoptive Couple v. Baby Girl."

LOWER BRULE SIOUX TRIBE CHAIRMAN JANDREAU DISMISSES ALLEGATIONS IN HUMAN RIGHTS WATCH REPORT. The [AP](#) (2/28) reports that "amid calls for more transparency, Lower Brule Sioux Tribe Chairman Michael Jandreau is pushing back against allegations from a nonprofit group that leaders on the reservation misdirected millions of dollars in federal funding intending to help impoverished tribal members." Jandreau said that "he denies any wrongdoing related to the Human Rights Watch investigation, which accuses him and others of diverting money and concealing financial activity by withholding government documents from the public." Jandreau said "the report is based on the views of his political opponents and that he's worked throughout his career to make life on the reservation better."

INDIAN GAMBLING COMPACT MOVE FORWARD IN NEW MEXICO. The [Las Cruces \(NM\) Sun-News](#) (3/1, 39K) reports that "after a near nine-hour hearing, a legislative committee voted overwhelmingly to recommend a proposed gambling compact with five New Mexico Indian tribes." According to the article, "the new compact, which now goes to the state Senate for approval, would reduce regulatory fees for tribes but raise the percentage of revenue sharing that gambling tribes pay to the state."

The piece also appears at the [Taos \(NM\) News](#) (3/1, 31K).

NATIVE AMERICAN TRIBES GATHER TO DISCUSS LEGALIZING MARIJUANA. The [AP](#) (2/28, Johnson) reports "Tribal representatives from around the country are converging in Washington state to discuss the risks and rewards of marijuana legalization." The AP says that dozens of tribes will be attending the conference at the Tulalip Indian Tribe's resort in the Seattle area and that a variety of marijuana-related topics will be discussed.

INDIAN TRIBES RAISE REVENUES THROUGH HIGH-INTEREST LOANS. The [Washington Post](#) (3/2, Harlan, 5.17M) reports on its front page that high-interest online loans, with annualized interest rates as high as 780 percent, are being sold online by Indian tribes "in what they describe as a last-ditch attempt to earn revenue and provide decent lives for their members." With "some two-dozen tribes now offering installment and payday loans, Native Americans have found themselves wrestling with the merits of this lifeline." Tribes "capitalize on their right to govern themselves in an otherwise tightly regulated industry," but in this case, "revenue is earned from borrowers who are charged interest rates that sometimes are double what they'd find in a brick-and-mortar payday store."

CHUKCHANSI GROUP MEETS BIA'S RULING FOR NAMING COUNCIL. The [Fresno \(CA\) Bee](#) (2/27, 323K) reports that "the Picayune Rancheria of Chukchansi Indians seated a tribal council Thursday that mirrors the 2010 elected council." The article notes that "in so doing, the tribe followed a directive" by the BIA

ADDITIONAL COVERAGE OF CASINO PLANS OF LITTLE RIVER BAND OF OTTAWA INDIANS. Additional coverage that the Little River Band of Ottawa Indians "proposes to build a \$180 million casino, hotel and retail development" was provided by the [MLive](#) (3/1, 525K).

TRIBES COULD SEEK SELF-REGULATION STATUS. In a piece for the [Indian Country Today Media Network](#) (3/1, 49K), attorney Joseph H. Webster writes that "when Congress enacted the Indian Gaming Regulatory Act in 1988 (IGRA), it included an important provision to allow for self-regulation of Class II gaming by tribal governments that established a record of successful gaming regulation." Webster says that "each tribe will need to decide for itself whether to seek self-regulation status." However, he concludes that "the new Part 518 finally makes self-regulation a viable option for tribes that would like to assert greater autonomy over the regulation of their Class II gaming operations."

[Top National News:](#)

KERRY MOVES TO LOWER POLITICAL TENSION AROUND NETANYAHU SPEECH TO CONGRESS. Israeli Prime Minister Benjamin Netanyahu's upcoming speech to Congress dominated discussion on the Sunday morning political shows, with officials breaking largely along party lines in their assessment of whether his trip helps or hinders the prospects for peace in the region. [AFP](#) (3/2, Revise), for example, refers to an "infuriated" White House, with "Netanyahu's allies in Congress...as outspoken as ever, insisting that Obama...was to blame for the recent discord." The controversy surrounding the speech, notes [USA Today](#) (3/2, Welch, 10.32M), has "American Jewish leaders and activists...worried about widening political divisions between Israel and the White House" after the "strident objections" to the speech by President Obama, who, according to the [AP](#) (3/2, Pace, Lee), has been on "on a collision course" with Netanyahu for six years. Further illustrating the polarization of the debate, [Bloomberg Politics](#) (3/1, Weigel, 169K) notes the Prime Minister's trip coincides with this year's AIPAC conference, and quotes the group's chairman, Howard Kohr, as saying, "Thank goodness for Congress!"

In what print reports later cast as an Administration attempt to lower the rhetoric surrounding the speech, Secretary of State Kerry touted the US-Israeli relationship on [ABC's This Week](#) – even as he continued to complain that the Administration had been kept in the dark about the Prime Minister's plans. Kerry "tried to lower the temperature," says the [New York Times](#) (3/1, Cooper, Gordon, Subscription Publication, 9.97M), noting that he also "spoke by phone with.. Netanyahu on Saturday." In a similar analysis, the [Los Angeles Times](#) (3/2, Mascaro, 3.49M) says the Secretary "sought...to tamp down the controversy," and the [AP](#) (3/2, Klapper) casts him as seeking "to calm tensions" and taking "a step back from some of the sharp rhetoric between the allies in recent weeks."

A number of reports, including the ones by [Politico](#) (3/1, Munsil, 669K) and [Reuters](#) (3/2, Spetalnick, Williams), contrast Kerry's remarks with those of National Security Adviser Susan Rice last week, when she called the Prime Minister's planned speech "destructive to the fabric of US-Israeli ties." [The Hill](#) (3/2, Hensch, 224K) reports, for example, the Secretary "contradicted" those remarks yesterday. Kerry told [ABC's This Week](#) (3/1, Raddatz, 2.73M), "The Prime Minister of Israel is welcome to speak in the United States, obviously. We have a closer relationship with Israel right now, in terms of security, than at any time in history. ... I talk to the Prime Minister regularly. We don't want to see this turned into some great political football. Obviously, it was odd, if not unique, that we learned of [Netanyahu's speech] from the Speaker of the House. The Administration was not included in this process. But the Administration is not seeking to politicize this. We want to recognize the main goal here is to prevent Iran from getting a nuclear weapon. On that, Israel and the United States agree."

Speaker Boehner said on [CBS' Face The Nation](#) (3/1, Dickerson, 2.64M), "Why does the White House feel threatened because Congress wants to support Israel and wants to hear what a trusted ally has to say? It has been, frankly, remarkable to me the extent to which the White House has attacked the Prime Minister and me over the last five or six weeks. ... The animosity between the White House and the Prime Minister is no secret here in this town. ... The Administration has certainly made it worse over the last five or six weeks. ... Iran is a threat to the region, a threat to the United States, and a threat to the rest of the world. This is a serious issue. We're not going to resolve this issue by sticking our heads in the sand. The Prime Minister can talk about this threat, I believe, better than anyone. The United States Congress wants to hear from him and so do the American people."

The [Christian Science Monitor](#) (3/1, Knickerbocker, 380K) says Boehner's invitation to Netanyahu was "widely seen as a snub to the Democratic White House.. at a time when" his "position was threatened by a growing insurgency within his own caucus." Moreover, the invitation "had the added benefit of putting congressional Democrats in the difficult position of being players in the Republican effort to weaken the White House while cheering a nation seen to have a uniquely close and politically powerful relationship with the US." [NBC Nightly News](#) (3/1, story 6, 1:35, Alexander, 7.86M) noted that "nearly 30 Democratic lawmakers plan to boycott Netanyahu's...speech before Congress, as well as Vice President Biden."

The [CBS Evening News](#) (3/1, story 5, 0:30, Glor, 5 08M) noted last night that Netanyahu had arrived in Washington ahead of his speech to Congress on Tuesday, during which "he will make his case against the deal on Iran's nuclear program." Jeff Glor added that Kerry left for Switzerland on Sunday "for more talks on Iran." As he left Israel for DC, the [AP](#) (3/2, Heller) reports, Netanyahu said yesterday, "I feel deep and genuine concern for the security of all the people of Israel," and "will do everything in my ability to secure our future." The Prime Minister "called the trip a 'fateful and even historic mission' and said he feels like 'an emissary' of the Jewish people." In Israel, [Politico](#) (3/1, Dovere, Crowley, 669K) reported, Netanyahu's "throwdown with America is a top news story every day of the week," with "his opponents, who've been trying to focus the election on social and domestic issues," attacking him "for trying to turn his bad relationship with Obama into a bad relationship between Israel and America." The [Huffington Post](#) (3/1, Wilkie, 281K) similarly reported that "for many in Washington and Tel Aviv...Netanyahu's upcoming speech is...overtly political," offering "Republicans a chance to jab the president by putting one of Obama's most powerful critics on a major podium" and giving Netanyahu "a ready-made campaign ad."

Isaac Herzog, chairman of the Israeli Labor Party and a member of the Knesset, said on [CNN's Fareed Zakaria GPS](#) (3/1, 410K), "Let me make it clear to the American public: There is no difference in Israel as to the strategic threat that emanates from the Iranian nuclear program. Clearly, no Israeli leader will ever accept a nuclear Iran. However, the way to deal with it, in my mind, should be different. I think Netanyahu's speech in Congress is a mistake. We need to work together intimately with those negotiating with the international agreement with Iran and make sure that this agreement is ironclad on delivery – namely, so that there will never be an Iranian nuclear bomb. When arguments emanate, such as the arguments surrounding the speech of Netanyahu in Congress, there are questions that are raised. There is daylight between us and the Administration and that's not good."

Former Israeli Ambassador to the US Michael Oren, who is running against Netanyahu as a candidate with the Israeli Kulanu party, said on [CNN's State Of The Union](#) (3/1, Bash, 420K), "Netanyahu and I have a lot of differences in housing, economy, even on the peace process. Yes, I did say publicly that the Prime Minister could speak somewhere else and, perhaps, not intercede between the White House and the Congress or between Democrats and Republicans. ... On the issue of Iran there is no daylight between Prime Minister Netanyahu and myself and others. We all see Iran with nuclear arms as an existential threat against Israel. ... This is not a country that anybody wants to see have the ability, even in the future, to create a nuclear weapon."

The [Washington Post](#) (3/2, Eglash, Booth, 5.17M) notes concerns about the speech from Israeli war veterans, noting "a group of 180 retired Israeli generals and former top security officials warned that" it "will cause more harm than good." The organization, Commanders for Israel's Security, "claims to be apolitical," and "was created last year to push Netanyahu forward on a regional peace agreement aimed at ending the conflict with the Palestinians." Under the headline "Retired Israeli Generals Denounce Planned Netanyahu Speech," the [Wall Street Journal](#) (3/2, A1, Casey, Mitnick, Subscription Publication, 5 67M) also reports on the commanders' concerns in a front-page story.

Jackson Diehl writes in the [Washington Post](#) (3/2, 5.17M) that "Netanyahu's gambit supposes that Obama's Mideast policies have so alienated Israelis that he will be rewarded rather than punished in the March 17 election for a frontal attack on the White House." But "by some measures, the wager looks risky," because while Israelis "oppose Obama's policies," they also place a high value on the US-Israel relationship, with only the Israeli army outranking "ties to the United States in importance when Israelis are asked what guarantees their safety." Alon Gratch, an Israeli-American author, clinical psychologist and "organizational consultant," argues in [USA Today](#) (3/2, 10 32M) that while politics and animus between Netanyahu and Obama may be at play in the controversy, "there is something else at work here: how the Jewish state has processed, or failed to process, the trauma of the Holocaust," which "has become the central building block of the national identity of many Israelis." That "national preoccupation" involves "twin emotions of anxiety and rage, along with the refusal or inability to tolerate any feelings of helplessness."

The [Washington Times](#) (3/2, Klimas, 644K) reports that "tickets for non-members" of Congress "to get in to see" Netanyahu "are proving to be a very hot item." Said GOP Rep. Tim Walberg, "I could scalp that ticket, there are so many people who want it." [USA Today](#) (3/2, Korte, 10.32M) says "Netanyahu's address to Congress is not the only high-stakes speech this week." The Administration "is sending two officials," Rice and Ambassador to the United Nations Samantha Power, to the AIPAC conference. They are "the lowest-ranking officials Obama has ever sent to the pro-Israel lobbying conference."

Feinstein Will Attend Speech, But Says Netanyahu "Doesn't Speak For Me." Senate Intelligence Committee ranking member Dianne Feinstein said on [CNN's State Of The Union](#) (3/1, Bash, 420K), "I intend to go [to Netanyahu's speech] and I'll listen respectfully. I don't intend to jump up and down. I hope he'll speak about what happens if there isn't an agreement. I hope he'll speak about what happens if the United States isn't part of the agreement. ... I happen to believe Israel is a lot safer with an agreement that includes all of the big powers." Feinstein said on [CBS' Face The Nation](#) (3/1, Dickerson, 2.64M), "I am very concerned by that speech. I went to the speech in 2011. I didn't believe it was helpful then and I don't believe it's going to be helpful now." Feinstein, notes the [Washington Times](#) (3/2, Miller, 644K), also called Netanyahu "arrogant" for saying he would represent the "entire Jewish people" when he warns Congress about the nuclear deal being brokered with Iran." Added Feinstein, "He doesn't speak for me."

The [Daily Caller](#) (3/1, Griswold, 318K) noted that on NBC's "Meet the Press," former Sen. Joe Lieberman "attacked Democrats refusing to attend...Netanyahu's speech," saying "they were the ones 'making it partisan.'"

The [New York Times](#) (3/2, Weisman, Subscription Publication, 9 97M) reports that throughout recent history, "Jews in Congress – and to a large extent, Jews in the United States – have spoken in a near-monolithic voice, always in support of the government of Israel." However, the "Boehner-Netanyahu alliance has done something that larger foreign policy crises have not: It has led to the open distinction between support for the State of Israel and allegiance to politicians who lead it."

Schumer: "I Don't Trust These Iranians." [The Hill](#) (3/1, Byrnes, 224K) reported that in an interview with John Catsimatidis on AM 970's "The Cats Roundtable," Sen. Chuck Schumer said Sunday that "regardless of controversy over...Netanyahu's address," the US "must make sure Iran doesn't get a nuclear weapon." Said Schumer, "My view is that it has to be a really tough inspection regime, because I don't trust these Iranians."

Perry, Huckabee Defend Netanyahu, Criticize Administration. Former Texas Gov. Rick Perry stated on [CNN's State Of The Union](#) (3/1, Bash, 420K), "The real issue here is that our Administration is not working with and not sending a clear message that we respect our ally and we're going to be standing with them. Israel feels very vulnerable at this particular point in time because of the feckless foreign policy we've seen out of this Administration. ... Obviously, there are continuing negotiations with Iran. So I totally understand why Prime Minister Netanyahu feels it's important for him to come and to express his concerns about what's going on in front of the United States Congress. I'm glad he is."

Former Arkansas Gov. Mike Huckabee said on [CBS' Face The Nation](#) (3/1, Dickerson, 2.64M), "Israel is the canary in the coal mine. If something happens to Israel, that's not the end of it. That is the beginning. ... We need to recognize that valuable strategic role that Israel plays in our own safety. This isn't just about Israel. This is about the safety of the United States."

Poll: US Public Disapproves Of Boehner's Invitation By 48%-30% Margin. [The Hill](#) (3/1, Hensch, 224K) noted that according to a new NBC News/WSJournal poll, 48% "said Boehner should have notified...Obama of his invitation" to Netanyahu, while 30% believe "Boehner's gesture was appropriate" and "another 22 percent did not feel informed enough to answer." The poll also found that "66 percent of Democrats dislike" Netanyahu's "appearance, while only 28 percent of Republicans responded that way." As the [Wall Street Journal](#) (3/2, Ballhaus, 5.67M) reports, 47% of Republicans approve of Boehner's invitation, while only 12% of Democrats do.

In Remarks To AIPAC, Graham Threatens To Cut UN Funding. The [Huffington Post](#) (3/1, Schulberg, 281K) reports that in remarks to AIPAC yesterday morning, Sen. Lindsey Graham "threatened to cut funding to the United Nations, who he believes is alienating Israel in the international community and tolerating anti-Semitism in Europe." Graham's "promise was met with applause and a standing ovation by the nearly 15,000 AIPAC members in attendance."

Kuwaiti Paper: Obama Threatened To Shoot Down Israeli Planes If They Attacked Iranian Nuclear Facilities. In a story that was prominently displayed on the [Druide Report](#) most of the day Sunday, [Israel National News](#) (3/1, Apple, 10K) noted that "the Bethlehem-based news agency Ma'an has cited" the Kuwaiti newspaper Al-Jarida reporting Saturday that Obama "thwarted an Israeli military attack against Iran's nuclear facilities in 2014 by threatening to shoot down Israeli jets before they could reach their targets in Iran." Obama's threat reportedly "forced" Netanyahu "to abort the planned Iran attack." The [Washington Times](#) (3/2, Shapiro, 644K) says the Al-Jarida report cites "well placed" sources confirming that "an unnamed Israeli minister disclosed the plan to...Kerry," who passed it on to Obama. The [Daily Caller](#) (3/1, Griswold, 318K) called the story "shocking," though it added that "at least some are skeptical of Al-Jarida's report," adding that "one reporter for the conservative Jewish Press notes the story 'appears at first glance to be an invention of an imaginative editor.'"

WPost A1: Netanyahu Would See Clinton As Improvement Over Obama. Citing former Ambassador Oren – among others – as its source, the [Washington Post](#) (3/2, A1, Gearan, 5.17M) recounts on its front page a 45-minute phone conversation between Hillary Clinton and Netanyahu, in which the then-secretary of State "lectured the Israeli leader, accusing him of trying to do an end run around American opposition to settlement-building and embarrassing Vice President Biden during a visit to Israel." Oren says, "The word 'humiliation' appeared very prominently. ... As in 'You have humiliated the United States of America.'" The Post adds that "should Clinton win the presidency in 2016, her long and complicated history with Netanyahu will enter a new phase," and old issues "will almost certainly still fester." While "from Netanyahu's perspective, Clinton would be an improvement over...Obama...there is also little doubt that Netanyahu would prefer a more hawkish Republican in the White House."

NYTimes A1: Kerry's "Relentless Negotiating Style" Encourages Backers, Concerns Opponents. With Kerry in Switzerland to continue his talks with Iranian Foreign Minister Mohammad Javad Zarif, the [New York Times](#) (3/2, A1, Gordon, Subscription Publication, 9.97M) reports on its front page that the Secretary, with a "laserlike focus on getting an accord" that "has unnerved Israel and prompted concerns in Saudi Arabia and other Arab foes of Tehran," has become "a driving force behind the complicated, seven-nation talks to limit Iran's nuclear program," and his "relentless negotiating style and determination to engage with Mr. Zarif have be

AP-CA: National monument supporters in California get antsy

WASHINGTON — California lawmakers and advocacy groups are ramping up efforts to win a national monument designation for four scenic vistas in the state, from vast stretches of the Mojave Desert to redwood stands along the Pacific Coast Highway to canyons and mountains near the state's famous wine country.

The designation typically takes lands already owned by the government and walls them off from new mining, roads and power lines. Recreational activities such as hunting, fishing, hiking and horseback riding are commonly allowed, though each national monument has its own dos and don'ts.

Supporters of the proposed monuments in California are pursuing two paths. The first is through legislation. Many Republicans are wary, though. So, supporters are also placing greater emphasis on Plan B: Executive action from President Barack Obama. The narrowing window for that option is adding urgency to their efforts.

Presidents have the authority to designate new national monuments through the Antiquities Act, and Obama has approved 16 so far, including three more last week. California groups took notice.

"We think that's exciting, and we merit the same consideration in the near term," said Bob Schneider, senior policy director for Tuleyome, a conservation group that seeks to preserve 360,000 acres in northern California as a national monument.

The group has worked with Democratic U.S. Rep. Mike Thompson, who has filed bills in three consecutive congressional sessions calling for what would be named the Berryessa Snow Mountain National Monument. In December, he brought in Interior Secretary Sally Jewell for a tour and to hear from local residents.

"The majority party is not willing to participate in the debate," Thompson said. "If the president is willing, I'm all for him protecting the land through an executive order."

Many of the communities in Thompson's district support his efforts. One local chamber of commerce projected that a national monument designation would generate an additional \$50 million in economic activity in the subsequent five years through increased visitors. But another local chamber has fretted that a national monument designation could impose additional requirements on already overburdened agencies with no guarantee of additional resources.

Any national monuments legislation moving through the House would likely have to go first through a subcommittee chaired by Republican U.S. Rep. Tom McClintock of California. He's clearly skeptical.

"The Republicans want to preserve and enhance the public's right to enjoy the public's land. Democrats are seeking to further restrict public access," McClintock said. "That's the fundamental, core issue."

Like Thompson, Sen. Dianne Feinstein also is getting restless. She first proposed legislation in 2009 calling for two new national monuments in the Mojave and Sonoran deserts and reintroduced a version of the bill in early February. Feinstein favors legislative action, but she said in an emailed statement that executive action may be necessary if the bill stalls.

Feinstein, a Democrat, said she would prefer the legislative route because an executive order would simply create two new national monuments while her legislation includes more land for national

parks, wilderness and off-highway recreation. Numerous compromises crafted over the years would be lost.

The Wildlands Conservancy helped the federal government acquire large segments of both proposed monuments in Feinstein's bill through donations of money and land. The group was delighted when Jewell visited the proposed Sand to Snow National Monument last year and a vehicle in her security detail had to stop to let a bighorn sheep cross the road.

"You can't beat that," said David Myers, the organization's executive director.

Interior Department spokeswoman Jessica Kershaw declined to directly answer whether Jewell has recommended that the president use his executive authority on any of the four California projects. But she said Jewell regularly briefs the president on her travels and has talked to him about "the local vision for conservation around the Berryessa Snow Mountain Region."

Kershaw also noted that the Obama administration has testified in favor of Feinstein's legislation back in 2010 and Thompson's legislation in 2013.

McClintock says an executive order creating any monuments in California would be "a complete overreach" by the president and an abuse of the Antiquities Act, which was designed to protect small archaeological sites from looting.

The newest and smallest of the proposed national monuments is in Silicon Valley's backyard, near Santa Cruz. The 5,800 acres were acquired by various foundations and donated to the U.S. Bureau of Land Management just last year.

At a public rally two weeks ago, nearly 1,500 people showed up, stunning organizers who called the event the launch of their campaign, not the conclusion.

Bruce Babbitt, the former Interior secretary under President Bill Clinton, was the guest speaker.

"Half the town was there," Babbitt said. "It seemed to me an excellent statement to President Obama of community support. Congress has a chance to act. If it doesn't, all the more reason for President Obama to step in."

Team: as a nice way to end a very busy week, here is our final update of statements from external stakeholders and elected officials around all four announcements made in Chicago last week! A very big thank you to Maria and Steven for doing all the heavy lifting to pull these responses together!!

The new statements that we've received since my last update are listed below in the body of this email. The complete compilation (70 pages!!) is attached as a word document.

Please let me know if you have any questions. Many thanks! jb

Representative Raúl M. Grijalva (D-AZ.) NEW

Natural Resources Ranking Member Grijalva Statement on President Obama's Designation of Three New National Monuments

Tucson, Ariz. – House Natural Resources Committee Ranking Member Rep. Raúl M. Grijalva (D-Ariz.) released the following statement on today's presidential designation of three new national monuments.

"Conserving our public lands and recognizing milestones in our nation's history are among every president's greatest responsibilities and proudest achievements. President Obama acted in the best spirit of that tradition today when he designated Pullman Historic Chicago District, Browns Canyon, and Honouliuli Internment Camp national monuments.

"Our wide open spaces and our historic sites need just as much protection today as they did the day the Antiquities Act was signed into law in 1906. President Obama, no less than President Roosevelt, understands the great public service presidents perform when they conserve those open spaces and those historic sites for the future. No fewer than nineteen presidents, both Democrats and Republicans, have used the Antiquities Act to protect the national treasures found on our federal lands, and many more will do so in the future. The American people demand nothing less.

"Despite the best efforts of an anti-conservation congressional majority, the American people still see more than dollars and cents when they look across the prairie, or into the Mountain West, or back into the pages of our shared history. They see the same beauty that our forefathers saw – a beauty that we dare not throw away in the name of today's bottom line. We cannot sustain an economy based on taking everything, leaving nothing and demanding that taxpayers foot the bill for private profits. I share the American people's vision of protected landscapes, well-preserved historical sites and monuments, and a thriving federal lands system accessible to every American who comes to enjoy rather than exploit. So does President Obama. Today I'm proud to stand with him in welcoming these additions to our public lands and look forward to hearing the many success stories they have ahead of them."

Representative Rob Bishop (UT-01) NEW

Chairman Bishop Reacts to Obama Administration's Plans to Unilaterally Proclaim Three New National Monuments

WASHINGTON, D.C., February 18, 2015 - House Committee on Natural Resources Chairman Rob Bishop (UT-01) released the following statement after President Obama announced his intentions to unilaterally proclaim three new national monuments using the Antiquities Act of 1906.

"President Obama has sidelined the American public and bulldozed transparency by proclaiming three new national monuments through executive fiat. The Obama Administration claims these designations have public support, but we know that is a complete stretch of the truth. The cost to taxpayers is anyone's guess and the impacts upon local communities are unknown. Congress has demonstrated that it can work in a collaborative fashion to fully vet and approve designations that have support from the public and their elected representatives. This White House has shown once again its utter and complete disdain for the public process, Congress, and the communities most impacted by these unilateral, unchecked land designations."

The President's designations include Pullman Historic District in Chicago, Illinois, Browns Canyon in Salida, Colorado, and the site of a World War II-era internment camp in Honouliuli, Hawaii, and will be formally announced on Thursday, February 19, 2015.

###

-

City Council, City of Chicago - Anthony Beale, Alderman, Ninth Ward NEW

"Steeped in the history of American industry, labor, urban planning and the African-American civil rights movement, few locations preserve these stories as evocatively as the Pullman community. Pullman's narrative is America's story. In addition, a national park would create the opportunity to access much needed federal investment in transportation and business growth, shops, stores and restaurants for visitors and residents alike. Once there is a national park at Pullman you're going to see more great things happening in the Roseland and Pullman communities."

###

-

External Stakeholders

-

Historic Pullman Foundation | Michael A. Shymanski, AIA, President NEW

"The designation of Pullman as a national monument culminates a five decade grassroots effort of the Pullman Civic Organization and the Historic Pullman Foundation to preserve and restore the community's place in American history and to attract the national and international attention that this important landmark deserves. We are thrilled that President Obama will designate Pullman as part of the National Park System and we look forward to working with the National Park Service and others in creating a great urban national park in Chicago."

###

-

Illinois Labor History Society - Larry Spivak, President NEW

"President Obama's historic action in authorizing national monument status for the Pullman District comes at a time when honoring the struggles of all working people to keep a vibrant middle class is needed more than ever. The history of the Pullman Porters, the workers who built the Pullman Palace cars and the courageous actions taken to improve their working conditions for themselves, their families and their community will now be honored as part of our national heritage. Thank you Mr. President for helping us remember."

###

-

Chicago Neighborhood Initiatives - David Doig, President NEW

“Designating Pullman a national park will be a huge boost for the economy of the neighborhood. It will bring tourism spending, the opportunity to access federal infrastructure dollars, and private investment, all of which are much needed here. A lot of work is already underway including new investment in retail, industrial and residential development. The national park will build on this progress and further bolster and encourage new investment.”

###

-

The Association for the Study of African American Life and History (ASALH) - Sylvia Cyrus, Executive Director NEW

“The recognition of the Pullman National Monument is another important step in honoring the lives those diverse groups of working people, labor unions, and political activists who fought diligently to demonstrate that there is dignity of work. In doing such their legacies have strengthened the narrative of our national history. The Association for the Study of African American Life and History applauds President Obama on the creation of this monument. Its presence will insure that the stories of people like A. Philip Randolph, Milton P. Webster, the men and women of Brotherhood of Sleeping Car Porters and its auxiliaries, and the countless others who worked tirelessly to integrate the missions of the labor and civil rights movements of so many years ago will now have an opportunity to forever remain part of our national discourse on race and political activism in the 20th century.

###

-

PullmanArts - Ann Alspaugh, Chair NEW

Thank you President Obama for bringing the National Park Service to Pullman and your support of the important work many residents have been doing for decades. We in the community have worked countless hours to restore Pullman's unique architecture, to educate the public, and to enhance and develop community assets such as the landscape gardens, arts programming and pride of place look forward to sharing this rich history with all the new visitors when Pullman becomes a national monument.”

###

Pullman Civic Organization - Tom McMahon, President NEW

“The Pullman Civic Organization and its members are elated over the news that Pullman will become a National Park. This represents the hard work of number of community residents, local and national political leaders and many other organizations who see the development and preservation of this location as an important facet of our history.”

###

Pullman Wheelworks Residents - Marie Robinson, President NEW

“Thanks to President Obama, the stories of our Pullman community will be shared with the world in a way they haven't been before. Pullman as a national park will be important because it will bring revenue to the area and job opportunities for the people of the community, and this could be life-changing for many of our neighbors. I'm excited to see a Pullman National Monument because of the new-found pride that people will have in their neighborhood.”

###

-

National Parks Conservation Association - Lynn McClure, Midwest Senior Director NEW

“The people who are part of the Pullman legacy helped to shape America as we know it today. Pullman workers fought for fair labor conditions in the late 19th century and the Pullman porters helped advance America's Civil Rights movement. The designation of Pullman as a national monument will further showcase the commitment of President Obama to diversify our national parks and preserve the places that define who we

national parks each year.”

###

-

National Trust for Historic Preservation - Stephanie Meeks, President and CEO NEW

"We applaud President Obama for this decisive action on behalf of one of America's most important historic places. From industrialization to the labor and civil rights movements, Pullman played a significant role in American history during the late 19th and early 20th centuries."

Healing Waters Family Center - Joseito Velasquez, Pastor NEW

“Colorado’s clean water, wildlife habitat, cultural treasures and public lands are entrusted to us to be protected and preserved for the next generation. It is our moral responsibility to care for our land, water, and wildlife. The support of Browns Canyon demonstrates just how important stewardship of our outdoor and cultural heritage is to the Latino community.”

###

-

Conservation Colorado - Pete Maysmith, Executive Director NEW

"We thank President Obama for acting now to protect Browns Canyon, and honoring the work of so many to protect this striking place. This new national monument is a culmination of former Senator Mark Udall's work and so many others to protect this gem of the Arkansas River," said Pete Maysmith, Conservation Colorado's Executive Director. "All Coloradans can be proud of what we have accomplished together."

###

-

Sierra Club - David Scott, President, and John Stansfield, Volunteer, Sierra Club Rocky Mountain Chapter NEW

"We applaud President Obama for using his authority to protect this national treasure. The unique combination of water, wild landscape and lower elevation ridges at Browns Canyon provide four-season opportunities for people to get outside, as well as important wildlife habitat. Browns Canyon is a wonderful addition to our nation's conservation legacy; we look forward to President Obama's continued work to secure our outdoor heritage.

###

-

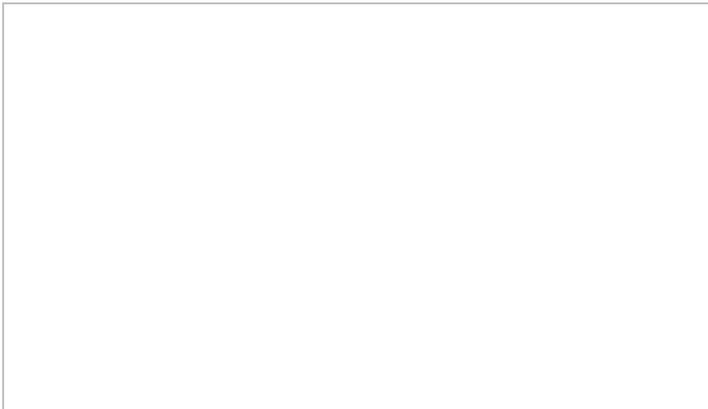

John Gale, Director, backcountry Hunters & Anglers Conservation NEW

"Backcountry Hunters & Anglers tip our hats to the administration for recognizing the incredible backcountry values of Browns Canyon by designating it a national monument. We likewise appreciate the efforts of former Senator Mark Udall to ensure that his proposal for Browns Canyon incorporated local input from all stakeholders so that traditional land uses like hunting, fishing and ranching would be elevated and maintained. Their foresighted actions will benefit not just Coloradans but all Americans who come to Browns Canyon to hunt, fish, boat and make cherished outdoor memories with their families."

Environment America NEW

Environment Colorado lauds protecting fishing, rafting in Browns Canyon

Browns Canyon, a popular spot for trout fishing and whitewater rafting here in central Colorado, will gain permanent protection tomorrow as a

National Monument, following decades of campaigning by outdoor enthusiasts, the tourism industry, and some of the state's most prominent political leaders.

President Obama's expected action, revealed this morning in the *Denver Post*, will preserve more than 20,000 rugged canyon acres surrounding the Arkansas River, a beloved area home to gold medal trout, black bears, and stunning vistas. Kim Stevens, Environment Colorado issued the following statement in response:

"Places like Browns Canyon are a big part of what makes Colorado so special. That's why tens of thousands of Coloradans from all walks of life called for the permanent protection of this incredible landscape. That's why we're thrilled future generations will have the chance for the same spectacular views and opportunities to raft, hike, and fish that we enjoy [in the canyon] today.

"President Obama, former Senator Mark Udall and Senator Michael Bennet all get credit for safeguarding this special place. Everyone who signed a petition, attended a meeting, or made a phone call to protect Browns Canyon has a lot to be proud of, too.

"Environment Colorado looks forward to continuing to work with the administration and Congress to keep pristine public lands off limits to development, mining, drilling, and pollution. Future generations of Americans and the wildlife that depend on these ecosystems deserve nothing less."

Kim Stevens, Campaign Director, Environment Colorado

Japanese American Citizens League (JACL) NEW

JACL Applauds the Inclusion of Honouliuli into the National Park System

Washington D.C. – The Japanese American Citizens League (JACL) applauds [President Barack Obama’s designation of Honouliuli as a National Historic Monument](#). The site, located in a gulch in central Oahu, was used during World War II to imprison Japanese community leaders and their families. The monument will preserve a forgotten but important part of American history about the treatment of thousands of Americans living in Hawaii.

“I am delighted to learn that the Honouliuli incarceration site has been added to the National Park System as a National Historic Monument. We are grateful to the National Park Service for recognizing the significance of the site as a component of World War II and as the site related to the forcible imprisonment of Japanese and other Americans. As the longest operating World War II Japanese American confinement site in Hawaii, Honouliuli represents a unique chapter in American history and a very important lesson in civil liberties and the U.S. Constitution. This inclusion in the National Park System will ensure that the story of what happened to Japanese Americans during World War II will continue to be told and

remembered," said JAACL National President David Lin.

"Today, the President opened the windows so healing winds can blow on a place that was once called 'hell valley.' Years ago, droves of innocent men were rounded up and placed in prison centers by the military because they were Japanese priests, teachers, and community leaders. Their incarceration remained a secret because of the unwarranted shame they bore for a crime they did not commit. On the 73rd anniversary of the signing of the Executive Order authorizing the internment, the government has acknowledged this story by creating a learning place where discussions about tolerance and diversity can be elevated," stated JAACL Executive Director Priscilla Ouchida.

Located approximately 25 miles northwest of Honolulu, Honouliuli is the site of the largest and longest used World War II confinement site in Hawaii. Those of Japanese ancestry made up over a third of the population of Hawaii in 1941. In contrast to the mass incarceration taking place on the mainland, Japanese American community leaders and those with close cultural or economic ties to Japan were selectively targeted and detained throughout Hawaii.

The detentions began immediately following the strike on Pearl Harbor, with estimates of over 350 Issei and Nisei being arrested in the first 48 hours following the attack, and over 2,200 imprisoned by the end of the war. These people were detained at a number of sites across the Hawaiian Islands, with Honouliuli becoming the largest.

Honouliuli was opened in March of 1943 to hold U.S. Citizens and resident aliens of Japanese, German, and Italian descent, as well as Japanese prisoners of war. The area housed over 150 buildings, guard towers, and tents on the 160 acre site, in addition to approximately 320 internees. Many of these people were detained for the duration of the war – a period of more than 3 years – and none were ever charged with a crime.

Honouliuli was closed in 1946 following the last of the prisoner of war repatriations and the site was sold as farmland. The site and its history were largely forgotten until the Japanese Cultural Center of Hawaii (JCCH) began to research and document Honouliuli's history in the 1990's, leading to the re-discovery of the site in 2002. Since then, a number of organizations, including the JAACL Honolulu Chapter, JCCH, the University of Hawaii, and Monsanto Hawaii, have worked to preserve and interpret the site in an effort to educate the public about a largely unknown chapter of Hawaiian and American history.

In 2009, Congress authorized the National Park Service to conduct a special resource study to review Honouliuli for possible inclusion to the National Park System. In 2011, JAACL passed a national resolution supporting these efforts and began meeting with members of Congress and other government officials to inform them of the historic and cultural significance of the site and to garner their support for National Park status. In December 2014, a group of staffers from the JCCH and Honolulu JAACL visited officials in Washington D.C. to deliver petitions with over 6,000 signatures supporting the inclusion of Honouliuli into the National Park System.

JAACL is dedicated to securing the civil and human rights of all Americans and preserving the historical and cultural legacy of the Japanese American community. The preservation and interpretation of the Japanese American World War II confinement sites ensures that their important and distinct place in American history will continue to educate future generations against repeating injustices of the past.

Every Kid in a Park

-

External Stakeholders

-

National Wild Turkey Federation - George Thornton, CEO NEW

"There are so many distractions in our world today stealing the attention of our youth, but we [the NWTF] have a duty to our communities to provide options to help get kids outdoors. We are proud to play a key role in promoting outdoor activities to our youth as they are the generation that we will rely on to help save the future of our wildlife and habitat."

###

-

Natural Resources Defense Council - Robert Friedman, Campaigner NEW

"This program couldn't come at a more important time, especially as technology is [driving more and more young people indoors](#), away from the opportunities presented by the natural world. Think of all of these 4th graders seeing the Grand Canyon for the first time, or crocodiles in the Everglades or Half Dome in Yosemite, and the sense of wonder they will feel by seeing such natural magnificence. These experiences will show them what is at stake in our fight to preserve these amazing places, and will make them advocates for a more just and more sustainable future. Every Kid in a Park has the potential to change the landscape of activism in this country in a moment it is desperately needed."

###

-

American Hiking Society - Gregory Miller, President NEW

"So many children are spending more time indoors these days, often in front of screens, and if we don't act, there will be severe consequences as they become adults. Getting kids outside will help improve health outcomes, academic success, and also ensure that America's public lands will still have champions when their generation becomes the stewards of these incredible parks and forests."

###

-

The Audubon Society - Mike Daulton, VP for Government Relations NEW

"Children and families are inspired by the natural world, and that inspiration has lifelong benefits. We all need clean water, clean air, and healthy natural spaces. Getting kids and families into nature illuminates the connections we share with each other and with the great outdoors. A new generation of conservationists is waiting to emerge as they discover birds, other wildlife, and America's great natural resources. We're glad the White House agrees, and we support this new initiative."

###

-

Children & Nature Network - Richard Louv, Co-Founder NEW

"The President's announcement and new initiative may well be a turning point. The initiative will help support the people who have worked so hard, many of them for decades, to connect children to nature. It will encourage new actions by local government, education, religious organizations, the health care professions, and, crucially, by our business communities. The greatest change must happen beyond government, in the daily decisions that all of us, as individuals and members of families, take in our daily lives. Ultimately, only we can make sure that every child receives the gifts of the natural world."

###

-

The Student Conservation Association NEW

"The Student Conservation Association applauds this commitment to connect more young people with our national parks. As the national leader in youth conservation service, SCA has proven that exposure to the great outdoors has a transformative impact on young people, instilling lifelong conservation values and creating healthier, happier kids."

###

-

Wilderness Inquiry NEW

"Wilderness Inquiry is thrilled to support this innovative new program that facilitates full participation in nature. Outdoor exploration is a birthright all children share, regardless of any perceived physical, cultural, or socio-economic barriers. We will continue to do our part to connect thousands of children and their families to educational and inspirational adventures in our national parks, forests, and wilderness areas. Many of our partners including National Park Service, US Forest Service, Department of the Interior, and the Outdoors Alliance for Kids also support this effort, and we will work with them to get Every Kid in a Park!"

###

-

HECHO NEW

HECHO Statement on President's Kids in Parks Initiative

Las Vegas, NM – Hispanics Enjoying Camping, Hunting, and the Outdoors (HECHO) Outreach Coordinator Max Trujillo released this statement on the President's new Kid in a Park initiative:

"Latino families and our communities have been using and enjoying America's public lands for generations. Increasing access to healthy watersheds, clean air, robust wildlife habitats, and open spaces for our nation's 4th-graders and their families would truly benefit our nation's young Latinos by providing opportunities to connect with and learn about their cultural past and traditional uses of the land. Ensuring that our young Latinos are able to experience and understand this nation's public lands heritage will be an invaluable asset for us all."

-

The City Project NEW

President Obama Every Kid in a Park, Transit to Trails, Honouliuli, Pullman, Browns Canyon National Monuments

Since President Barack Obama designated the San Gabriel Mountains Monument in October 2014, the White House has demonstrated a renewed commitment to [environmental and green justice](#).

Every child has the right to the simple joy of playing in the park. Under President Obama's Every Kid in a Park initiative, the National Park Service will give all fourth graders and their families free admission to national parks and other federal lands for a full year. The President also designated new national monuments.

President Obama recognizes that too many children, especially children of color, don't have access to parks where they can play, breathe fresh air, experience nature, and learn about their environment. This is an issue of social justice, health, and economic vitality for all. It's not enough to have awesome natural wonders. You have to be able to access them. Green justice is about working with communities to open up parks and our heritage to everybody — young and old, Latino, Asian, Native American, black, white — to make sure everybody can enjoy these rights. Every Kid in a Park will award transportation grants for school children to visit parks, public lands and waters, focusing on schools with the greatest need.

Transit to Trails provides opportunities for park-poor, income-poor communities to learn about water, land, wildlife and cultural history, and engage in healthy physical activity. Transit to Trails increases access to national parks, monuments, and other park lands. Underserved communities lack close-to-home green space, monuments, transportation, and opportunities to reach recreation and natural resources. [Transit to Trails is a best practice to get people to the parks now, and prepare young people to be the stewards of our natural heritage tomorrow. Transit to](#)

[providing accessible public transportation](#). President Obama agrees with the National Park Service, the California Parks Forward Commission, the Southern California Association of Governments (SCAG), and the US Army Corps of Engineers on transit: The Transit to Trails program by Anahuak Youth Sports Association, The City Project, and Mountains Recreation and Conservation Authority (MRCA) is a best practice for taking inner city youth and their families and friends on fun, educational, and healthy park, river, beach, and mountain trips.

jewell aysa

Secretary of the Interior Sally Jewell with children from Anahuak Youth Sports Association and The City Project

We celebrate President Obama designating three new monuments that honor the diverse history of our nation, and promote access to healthy, outdoor recreation for all: Honouliuli, Pullman, and the Browns Canyon landscape and river corridor.

Honouliuli commemorates the fragility of civil rights, and the incarceration of innocent Japanese Americans for three years during World War II. The designation on February 19 comes 73 years to the day after President Franklin D. Roosevelt signed executive order 9066. The order authorized the evacuation of over 100,000 men, women, and children of Japanese ancestry, including U.S. citizens, to isolated, fenced, and guarded internment camps. The United States Supreme Court upheld this intentional discrimination against Japanese Americans in *Korematsu v United States*. A federal district court threw out Fred Korematsu's conviction 40 years later, concluding that "[today the decision in Korematsu lies overruled in the court of history](#)."

Pullman, on Chicago's Far South Side, honors the formation of the first African-American labor union, development of the first "company town," and the role of railroads in the nation's industrial past.

Honouliuli and Pullman, like Manzanar National Monument, are best practice examples to [celebrate the nation's diversity faithfully, completely, and accurately, and to stimulate and provoke a greater understanding of, and dialogue on, civil rights, democracy, and freedom](#).

The City Project has been working for 15 years to broaden access to parks and open space for inner-city residents and to fight childhood obesity by guaranteeing that students get enough physical education. We are profoundly grateful to President Barack Obama and the National Park Service for Kid in a Park, and for diversifying national monuments.

—Robert García, Founding Director and Counsel, The City Project

Pullman National Monument, IL

Elected Officials

Senator Mark Kirk (R-IL)

Statement on Pullman

"As Chicago's first national park, Pullman's 135 years of civil rights and industrial history will be protected and enjoyed for generations to come," Kirk said in a statement. "This new national park will breathe new economic life into this community, bringing up to 30,000 visitors and more than \$40 million each year." ([Star Tribune](#))

###

Senator Dick Durbin (D-IL), Senator Mark Kirk (R-IL), Congressman Robin Kelly (D-IL)

Durbin, Kirk, Kelly Applaud President Obama's Announcement That Pullman Historical District Will Become Part Of The National Park System

[CHICAGO, IL] — U.S. Senators Dick Durbin (D-IL) and Mark Kirk (R-IL) and U.S. Representative Robin Kelly (D-IL) today applauded President Obama's announcement that a portion of Chicago's Pullman Historic District will be designated as a National Monument, making it a unit of the National Park System. Durbin, Kirk, and Kelly have worked to secure national park status for the architecturally unique neighborhood which played important roles in America's railroad, industrial and labor history.

"The future of America's next great urban national landmark lies in the Pullman community's storied past. As an Illinoisan, I am proud to represent this community, which has come together to share its proud legacy of labor and civil rights. And as an American, I look forward to joining visitors from across the country in exploring a new monument to this critical chapter in our national history," **Durbin** said. "I thank Senator Kirk and Representative Kelly for being my partners in this effort, and congratulate the many members of this community who have worked so hard to restore and preserve this unique landmark."

"I fought for this designation with Senator Durbin and Rep. Kelly because regardless of party, it was the right thing to do for our state. As Chicago's first national monument, the Pullman District will bring thousands of tourists to Chicagoland every year, which will help to breathe new life into our local economies," **Kirk** said. "Today I am proud that America's first industrial town founded by George Pullman is receiving the recognition it deserves as a national monument."

"Pullman National Monument will be a crown jewel of the community, a remarkable achievement made possible only through the cooperation and collaboration of leaders from the public and private sectors and the residents of the neighborhood. Thanks to the hard work and dedication of many, the history and legacy of Pullman will endure for generations to come and people from all over the country will be

encouraged to visit and learn more about the vital role Pullman played in our nation’s labor and civil rights history,” said **Kelly**.

Under this announcement, the Pullman Historic District will become a national monument bounded by 103rd Street to the north, 115th Street to the south, Cottage Grove Avenue to the west, and the Norfolk & Western Rail Line to the east. Initially, the National Park Service (NPS), which administers national parks and monuments, will own the Pullman Factory Complex and the land on which it sits, with the option of acquiring additional property or assets should they be made available. Establishing Pullman as a part of the National Park System will allow for greater coordination of preservation and protection efforts by federal, state and local agencies.

In August, Durbin wrote President Obama urging him to use his authority to designate a portion of Chicago’s Pullman Historic District as a unit of the National Park System. Earlier last year, Durbin, Kirk and Kelly introduced legislation to create the Pullman National Historical Park in the neighborhood’s historical district, an architecturally unique neighborhood which played important roles in America’s railroad, industrial and labor history.

In 2014, the NPS released a study which found that Pullman was “conclusively nationally significant” as a historical site. More than 100 different organizations have endorsed the creation of a national park in Pullman, including city, county and state parks officials; preservationist groups; labor organizations; and tourism advocates. The creation of the national park site will increase jobs and boost Pullman’s economy as a result of added tourism dollars: in 2012, national park visitors contributed more than \$30 billion to local economies and supported more than 250,000 jobs. Studies show that every dollar invested in national park operations generates ten dollars of local economic activity.

The Pullman site was originally developed by industrialist George Pullman in 1880 and was the first American industrial town. The Pullman site served as the catalyst for the first industry-wide strike in the United States and played an important role in African American and early Civil Rights history through the legacy of the Pullman Porters as well as the development of the Brotherhood of Sleeping Car Porters, the first black union. Labor Day was established as a federal holiday following the 1894 Pullman labor strike. The neighborhood is also a well-preserved example of 19th century urban planning and architecture, especially the work of Solon Spencer Beman. The area has been designated as a registered National Historic Landmark District, an Illinois State Landmark, and a City of Chicago Landmark District.

Representative Raúl M. Grijalva (D-AZ.) NEW

Natural Resources Ranking Member Grijalva Statement on President Obama’s Designation of Three New National Monuments

Tucson, Ariz. – House Natural Resources Committee Ranking Member Rep. Raúl M. Grijalva (D-Ariz.) released the following statement on today’s presidential designation of three new national monuments.

“Conserving our public lands and recognizing milestones in our nation’s history are among every president’s greatest responsibilities and proudest achievements. President Obama acted in the best spirit of that tradition today when he designated Pullman Historic Chicago District, Browns Canyon, and Honouliuli Internment Camp national monuments.

“Our wide open spaces and our historic sites need just as much protection today as they did the day the Antiquities Act was signed into law in 1906. President Obama, no less than President Roosevelt, understands the great public service presidents perform when they conserve those open spaces and those historic sites for the future. No fewer than nineteen presidents, both Democrats and Republicans, have used the Antiquities Act to protect the national treasures found on our federal lands, and many more will do so in the future. The American people demand nothing less.

“Despite the best efforts of an anti-conservation congressional majority, the American people still see more than dollars and cents when they look across the prairie, or into the Mountain West, or back into the pages of our shared history. They see the same beauty that our forefathers saw – a beauty that we dare not throw away in the name of today’s bottom line. We cannot sustain an economy based on taking everything, leaving nothing and demanding that taxpayers foot the bill for private profits. I share the American people’s vision of protected landscapes, well-preserved historical sites and monuments, and a thriving federal lands system accessible to every American who comes to enjoy rather than exploit. So does President Obama. Today I’m proud to stand with him in welcoming these additions to our public lands and look forward to hearing the many success stories they have ahead of them.”

Representative Rob Bishop (UT-01) NEW

Chairman Bishop Reacts to Obama Administration’s Plans to Unilaterally Proclaim Three New National Monuments

WASHINGTON, D.C., February 18, 2015 - House Committee on Natural Resources Chairman Rob Bishop (UT-01) released the following statement after President Obama announced his intentions to unilaterally proclaim three new national monuments using the Antiquities Act of 1906.

“President Obama has sidelined the American public and bulldozed transparency by proclaiming three new national monuments through executive fiat. The Obama Administration claims these designations have public support, but we know that is a complete stretch of the truth. The cost to taxpayers is anyone’s guess and the impacts upon local communities are unknown. Congress has demonstrated that it can work in a collaborative fashion to fully vet and approve designations that have support from the public and their elected representatives. This White House has shown once again its utter and complete disdain for the public process, Congress, and the communities most impacted by these unilateral, unchecked land designations.”

The President's designations include Pullman Historic District in Chicago, Illinois, Browns Canyon in Salida, Colorado, and the site of a World War II-era internment camp in Honouliuli, Hawaii, and will be formally announced on Thursday, February 19, 2015.

<http://naturalresources.house.gov/news/documentsingle.aspx?DocumentID=398049>

###

City Council, City of Chicago - Anthony Beale, Alderman, Ninth Ward NEW

“Steeped in the history of American industry, labor, urban planning and the African-American civil rights movement, few locations preserve these stories as evocatively as the Pullman community. Pullman’s narrative is America’s story. In addition, a national park would create the opportunity to access much needed federal investment in transportation and business growth, shops, stores and restaurants for visitors and residents alike. Once there is a national park at Pullman you’re going to see more great things happening in the Roseland and Pullman communities.”

###

External Stakeholders

Historic Pullman Foundation | Michael A. Shymanski, AIA, President NEW

“The designation of Pullman as a national monument culminates a five decade grassroots effort of the Pullman Civic Organization and the Historic Pullman Foundation to preserve and restore the community’s place in American history and to attract the national and international attention that this important landmark deserves. We are thrilled that President Obama will designate Pullman as part of the National Park System and we look forward to working with the National Park Service and others in creating a great urban national park in Chicago.”

###

Illinois Labor History Society - Larry Spivak, President NEW

“President Obama’s historic action in authorizing national monument status for the Pullman District comes at a time when honoring the struggles of all working people to keep a vibrant middle class is needed more than ever. The history of the Pullman Porters, the workers who built the Pullman Palace cars and the courageous actions taken to improve their working conditions for themselves, their families and their community will now be honored as part of our national heritage. Thank you Mr. President for helping us remember.”

###

Chicago Neighborhood Initiatives - David Doig, President NEW

“Designating Pullman a national park will be a huge boost for the economy of the neighborhood. It will bring tourism spending, the opportunity to access federal infrastructure dollars, and private investment,

all of which are much needed here. A lot of work is already underway including new investment in retail, industrial and residential development. The national park will build on this progress and further bolster and encourage new investment.”

###

The Association for the Study of African American Life and History (ASALH) - Sylvia Cyrus, Executive Director NEW

“The recognition of the Pullman National Monument is another important step in honoring the lives those diverse groups of working people, labor unions, and political activists who fought diligently to demonstrate that there is dignity of work. In doing such their legacies have strengthened the narrative of our national history. The Association for the Study of African American Life and History applauds President Obama on the creation of this monument. Its presence will insure that the stories of people like A. Philip Randolph, Milton P. Webster, the men and women of Brotherhood of Sleeping Car Porters and its auxiliaries, and the countless others who worked tirelessly to integrate the missions of the labor and civil rights movements of so many years ago will now have an opportunity to forever remain part of our national discourse on race and political activism in the 20th century.

###

PullmanArts - Ann Alspaugh, Chair NEW

Thank you President Obama for bringing the National Park Service to Pullman and your support of the important work many residents have been doing for decades. We in the community have worked countless hours to restore Pullman's unique architecture, to educate the public, and to enhance and develop community assets such as the landscape gardens, arts programming and pride of place look forward to sharing this rich history with all the new visitors when Pullman becomes a national monument.”

###

Pullman Civic Organization - Tom McMahon, President NEW

“The Pullman Civic Organization and its members are elated over the news that Pullman will become a National Park. This represents the hard work of number of community residents, local and national political leaders and many other organizations who see the development and preservation of this location as an important facet of our history.”

###

Pullman Wheelworks Residents - Marie Robinson, President NEW

“Thanks to President Obama, the stories of our Pullman community will be shared with the world in a way they haven’t been before. Pullman as a national park will be important because it will bring revenue to the area and job opportunities for the people of the community, and this could be life-changing for

many of our neighbors. I'm excited to see a Pullman National Monument because of the new-found pride that people will have in their neighborhood."

###

National Parks Conservation Association - Lynn McClure, Midwest Senior Director NEW

"The people who are part of the Pullman legacy helped to shape America as we know it today. Pullman workers fought for fair labor conditions in the late 19th century and the Pullman porters helped advance America's Civil Rights movement. The designation of Pullman as a national monument will further showcase the commitment of President Obama to diversify our national parks and preserve the places that define who we are as a nation. Thanks to the President, Pullman's story will soon be remembered and recounted for the millions of people that visit America's national parks each year."

###

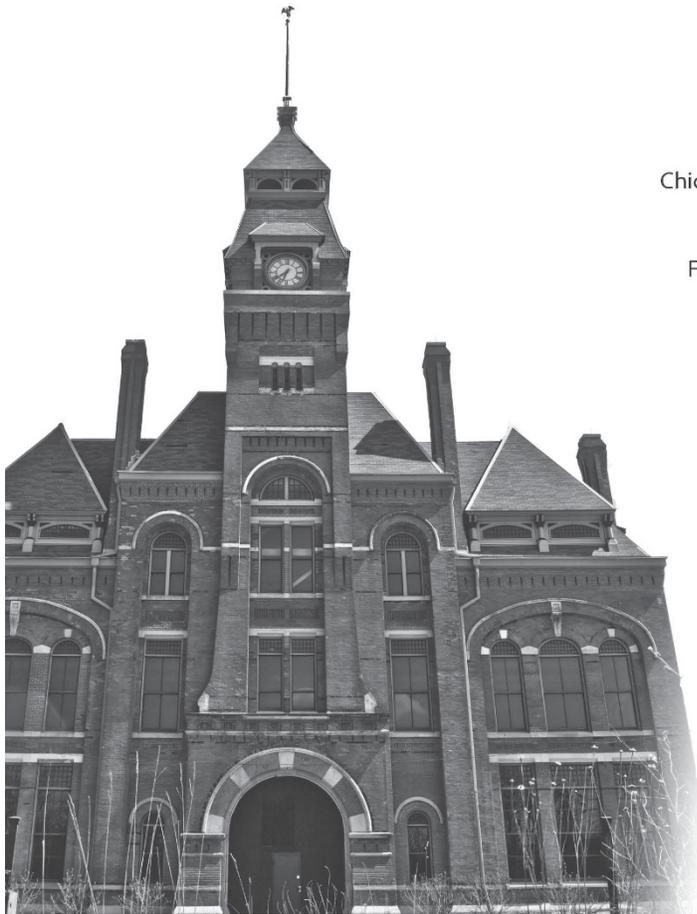

National Trust for Historic Preservation - Stephanie Meeks, President and CEO NEW

"We applaud President Obama for this decisive action on behalf of one of America's most important historic places. From industrialization to the labor and civil rights movements, Pullman played a significant role in American history during the late 19th and early 20th centuries."

###

**Thank you President Obama
Secretary Jewell and Director Jarvis
for protecting our American history at Pullman**

The Pullman National Monument will boost our local economy and provide permanent protection for an irreplaceable part of our cultural heritage. Thanks to your efforts, the important Civil Rights, labor, and industrial history of Pullman will continue to inspire the children and grandchildren of Chicago and the nation.

Conservation Lands Foundation

**President Obama's Browns Canyon National Monument designation applauded
*President's action will expand our National Conservation Lands***

Durango, CO (February 18, 2015) – The Conservation Lands Foundation praised the announcement that President Obama would use his authority to permanently protect Browns Canyon in Colorado, along with the Honouliuli Internment Camp in Hawaii and Chicago's historic Pullman neighborhood as national

monuments. These national monuments will permanently protect a diversity of lands and waters that honor our country's history and conserve open space important for hunting, fishing and outdoor recreation for future generations.

"Today's action builds on steps the Administration has taken over the last six years to expand access to our public lands for outdoor recreation by permanently protecting areas significant to our nation's rich history and America's outdoor heritage," said **Ryan Bidwell, Campaign Director with the Conservation Lands Foundation**. "There are places among America's public lands that represent vital parts of our country's history, and places that provide opportunities for our kids and grandkids to explore and experience the outdoors."

Browns Canyon, located two hours from Denver, Colorado will become part of our nation's National Conservation Lands. The national monument will protect wildlife habitat and attract new generations of visitors to enjoy the hunting, fishing and whitewater rafting that define Colorado's outdoor lifestyle. The rugged granite cliffs and backcountry provide high quality wildlife habitat for a variety of birds and animals including golden eagles, bighorn sheep and elk.

The stretch of the Arkansas River that runs through Browns Canyon is an outstanding wild trout fishery as well as one of the most popular whitewater rafting destinations in the country. Commercial rafting on the Arkansas River which runs through Browns Canyon brings in \$60 million to the local economy. The permanent protection of this area will support the economic vitality of the region, supporting local businesses, river outfitters and surrounding communities.

For more than 10 years, efforts to protect Browns Canyon have been championed by members of both political parties. The designation is based on recent legislation developed as result of extensive community involvement, including public meetings and thousands of public comments.

Honouliuli and Pullman both represent distinct and important aspects of our country's history. The Honouliuli Internment Camp, located on the island of O'ahu was Hawai'i's largest and longest operating World War II prison camp. Nearly 4,000 individuals were incarcerated there solely on the basis of ancestry or country of origin.

Chicago's historic Pullman neighborhood is closely linked to the history of the American labor movement. Pullman was the site of one of the bloodiest labor battles in American history – the Pullman Strike of 1894 –in which many workers were wounded or lost their lives at the hands of federal and state troops. Shortly after the deadly strike, Congress passed legislation creating a national Labor Day holiday.

With each of these designations, there was strong recognition among elected officials, local business, veterans, sportsmen, youth groups and Hispanic, African American and Japanese American leaders that some places are so important to our shared culture and heritage that they deserve to be protected for all time.

“These monument designations protect important historic and natural sites. They are a profound way to recognize our diverse national mosaic by honoring our American heritage and broadening public appeal to our public lands to an increasingly diverse American public,” stated said **Brian O’Donnell, Executive Director of the Conservation Lands Foundation**. “We look forward to President Obama’s continued leadership in protecting our nation’s most significant natural treasures, and protecting the laws that have allowed sixteen Presidents—eight from each party—to enact these important protections when Congress is unable to do so.”

###

Creation Justice Ministries

The Antiquities Act Used To Create Three National Monuments

Diverse Faith Community Applauds Diversity of Protected Places

Washington, DC – President Obama is set to designate three new national monuments Thursday, and Christian communities are applauding this act of stewardship. Pullman in Chicago, Browns Canyon in Colorado, and Honouliuli in Hawaii, will all be protected as monuments upon the President’s announcement in Chicago.

“Pullman Historic Site in Chicago is home to the first African American union in the country,” stated Tricia Bruckbauer, Program Director for Creation Justice Ministries. “As a Christian community that represents the stewardship policies of many historically African American churches, we are pleased with the President’s use of the Antiquities Act to preserve important stories of all Americans.”

Browns Canyon is widely lauded for its trout fishing and outdoor recreation and provides a vital habitat for many of God’s creatures. Honouliuli is the site of a World War II internment camp, and will be preserved as an important reminder of American struggles with civil liberties in times of conflict.

“As Americans, we have a stewardship tool that is able to preserve wonderful pieces of God’s creation as well as important artifacts of history and stories of our diverse nation,” Bruckbauer continued. “The Antiquities Act has been a blessing to many communities looking to safeguard their national treasures for future generations and for the benefit of Americans everywhere. We look forward to working with decision-makers to protect more of the places in which we pray and play.”

The Antiquities Act was established by President Theodore Roosevelt in 1906 and has been used to protect places that are significant naturally, historically, or culturally. It has been used by 16 presidents.

###

League of Conservation Voters

LCV Statement on Reports that President Obama Will Create Three New National Monuments

WASHINGTON, DC – League of Conservation Voters (LCV) President Gene Karpinski released this statement on reports that President Obama will protect Chicago's Pullman Historic District, Hawaii's Honouliuli Internment Camp, and Colorado's Browns Canyon as national monuments:

"We are thrilled that the president continues to take steps to protect America's treasured historic, cultural and natural resources for future generations. The designation of Hawaii's Honouliuli Internment Camp and Chicago's Pullman Historic District add to the president's strong record of ensuring that our parks and monuments tell the stories of our increasingly diverse nation. And after over a decade of local support, the new Browns Canyon National Monument will bolster Colorado's outdoor recreation economy for years to come. President Obama continues to take bold steps to protect America's special places and we can't wait to see what's next."

Natural Resources Defense Council (NRDC)

Praising Pullman: NRDC Supports New National Monument Designations

CHICAGO (February 18, 2015) – President Obama will be in Chicago tomorrow to sign an order designating the city's Pullman District as a national monument. He is also expected to announce two other new monuments, Browns Canyon in Colorado and Hawaii's Honouliuli Internment Camp.

Following is reaction from NRDC Executive Director Peter Lehner:

"The rich history of the Pullman District makes for a significant national monument; memorializing a moment in history that remains rich with meaning around race relations, the labor movement, technological innovation and urban planning. The Pullman story represents the struggle for a better life and should be preserved for generations to come.

"We appreciate the President's continued investment in developing national monuments that memorialize not only our most important wild places, but also essential historical sites that illuminate the American experience. Certainly Pullman, Brown's Canyon in Colorado and the Honouliuli Internment Camp site in Hawaii represent the amazingly diverse breadth of special places that require protection and interpretation."

NRDC Midwest Director Henry Henderson blogged on the importance of the Pullman District national monument designation at:

Sierra Club

Sierra Club Praises National Monument Designations

Wednesday, February 18, 2015

WASHINGTON, D.C.-- President Obama Thursday is expected to designate three new national monuments-- Pullman Historic Site in Illinois, birthplace of the first African-American union in America; Honouliuli Internment Camp in Hawai'i, the largest prisoner-of-war camp and longest-used World War II internment camp in Hawai'i; and Browns Canyon in Colorado, a premier trout fishing and outdoor recreation destination.

In expectation, Sierra Club Executive Director Michael Brune issued the following statement.

"We applaud President Obama for taking steps to expand our nation's outdoor heritage by ensuring our public lands and national monuments tell the full story of the country's rich cultural and natural history.

"These monuments embody the span of historic, cultural, and natural wonders that make up our nation's outdoor legacy. President Obama's action is both recognition of their importance and assurance that they will remain as places of remembrance, historic contributions, and inspiration for our children.

"It's heartening to see President Obama once again help local communities protect valuable pieces of America. We look forward to more progress in making America's public lands better serve the diversity and interests of the American people."

The Wilderness Society

The Wilderness Society Statement on the Creation of Browns Canyon, Honouliuli and Pullman National Monuments

Antiquities Act preserves a storied neighborhood, World War II internment site and a premier river canyon

WASHINGTON, D.C. (February 18, 2015) — The Wilderness Society issued the following statement today regarding President Obama's plans this week to designate Browns Canyon National Monument in Colorado, Honouliuli National Monument in Hawaii and Pullman National Monument in Chicago.

"These proclamations remind us that the spaces commemorating our nation's heritage come in a rich variety of shapes and sizes," **said Matt Keller, national monuments campaign director with The Wilderness Society.** "They include sites where people stood up for their rights for freedom and fair wages, places where thousands experienced the injustices of war, and landscapes that provide habitat for wildlife and heart-stopping adventure on whitewater rivers. We are proud of the Administration for

listening to local communities and using the Antiquities Act to preserve these irreplaceable sites for all Americans to visit.”

Browns Canyon is a scenic 22,000-acre stretch of public lands along the Arkansas River in Chaffee County, between Buena Vista and Salida, Colorado. These lands are managed by the U.S. Forest Service and Bureau of Land Management. The Wilderness Society has been working to protect the natural values of the Browns Canyon landscape since the early 1970s.

The Honouliuli camp on the island of O'ahu was the last, largest and longest operating internment camp during World War II. By acknowledging past injustices, this site honors the experiences of those interned and allows us to enlighten future generations.

The historic Pullman district in Chicago honors a unique, shared legacy that is integrally connected to the push for fair labor conditions and civil rights. The community represents the first model industrial town in America.

President Theodore Roosevelt pushed for passage of the Antiquities Act, which has since been used by 16 presidents –eight Republicans and eight Democrats – to protect many of America’s most treasured places from Alaska to the Florida Keys, including the Grand Canyon, Acadia, Muir Woods, Grand Teton and Olympic national parks.

For more on the history and bipartisan use of the Antiquities Act, click [here](#).

Browns Canyon National Monument, CO

Elected Officials

Senator Michael Bennet (D-CO)

Statement on Browns Canyon

"Coloradans have been very clear they wanted this protection, along with assurances that existing uses will be protected. We're glad the administration heard those voices and provided those assurances," ([Star Tribune](#))

###

Joel Benson, Mayor of Buena Vista, President, BV Roastery & Bongo Billy's Coffees

"Browns Canyon is intricately connected to the fabric of our communities and is key to our quality of life. The Browns Canyon National Monument will also boost local economic vitality via increased visitation and awareness of Buena Vista and Chaffee County. As a father and a business owner, I welcome this monument designation because it ensures that this irreplaceable location will be permanently protected for the well-being of our community, our local economy, and our children."

###

Thomas Yerkey, Salida City Council Member

"For over a decade, local citizens and lawmakers from both parties have worked tirelessly to protect this unique and untrammled landscape. Although legislation has been introduced with the support of multiple diverse groups, including Chaffee County Commissioners, Arkansas River Outfitters Association, Backcountry Hunters and Anglers, roughly 150 local businesses, and 150 more from throughout the state, this area still remains one of the state's most appreciated yet unprotected areas."

###

Eric Gibb, MD, Town of Buena Vista Trustee and business owner

"Protecting Browns Canyon is important to the local and state economy. The Browns Canyon National Monument will also protect wildlife habitat, outdoor recreation opportunities and opportunities that define Colorado's outdoor legacy today and for future generations. Because of these reasons, I strongly support the designation of the Browns Canyon National Monument."

###

Joel Hefley, former U.S. Representative (Represented Colorado's 5th Congressional District, which includes Chaffee County, from 1987 to 2007)

“The people of Chaffee County have been working together for many years to protect this scenic landscape and the important river corridor that runs through Browns Canyon. This new National Monument will mean a lot to Chaffee County and also for future generations as they enjoy this special place. I am thrilled that after all these years it is finally happening.”

###

Representative Dough Lamborn (CO-5)

Statement on Browns Canyon

Today, Congressman Doug Lamborn released a statement following President Obama's decision to designate Browns Canyon as a National Monument.

“I am outraged; this is the type of executive order that upsets Americans. This is a top-down, big government land grab by the President that disenfranchises the concerned citizens in the Browns Canyon region. I’ve heard from multitudes of local citizens whose concerns about grazing rights, water rights, outdoor recreation, and the inability of first responders to manage and fight wildfires in the area have never been addressed. It is also important for people to note that national monuments created by Presidential executive order under the Antiquities Act almost always become underfunded, neglected properties. This is because they are created without normal Congressional and local consensus, robbing the people of a fair and open process that stifles the input of the community. And they become orphans once the Administration changes. Does Browns Canyon really deserve this kind of second-class status?”

###

Representative Ken Buck (CO-4)

Statement to the Washington Times

“He is not king. No more acting like King Barack,” Mr. Buck said. “That is not how we do things in the U.S. Actions like this lead the American people to view Mr. Obama’s presidency as an imperial presidency.”

<http://www.washingtontimes.com/news/2015/feb/18/colo-gop-blasts-obamas-latest-national-monument/#ixzz3S8NoLBXB>

###

Senator Cory Gardner (R-CO)

Gardner Statement on Browns Canyon Designation

Washington, D.C. – Senator Cory Gardner (R-CO) released the following statement on President Obama’s planned designation of Browns Canyon as a National Monument:

“Browns Canyon is a national treasure with a long history of bipartisan support in Colorado. Senator Udall in particular was a champion of this beautiful site, and his legacy of protecting Colorado’s landscapes is to be commended. This monument will stand in lasting tribute to his public service. My preference is always to work through the legislative process, and in the coming days I will be introducing legislation to ensure that Colorado’s state and local interests have a seat at the table in discussions about Browns Canyon.”

###

Representative Raúl M. Grijalva (D-AZ.) NEW

Natural Resources Ranking Member Grijalva Statement on President Obama’s Designation of Three New National Monuments

Tucson, Ariz. – House Natural Resources Committee Ranking Member Rep. Raúl M. Grijalva (D-Ariz.) released the following statement on today’s presidential designation of three new national monuments.

“Conserving our public lands and recognizing milestones in our nation’s history are among every president’s greatest responsibilities and proudest achievements. President Obama acted in the best spirit of that tradition today when he designated Pullman Historic Chicago District, Browns Canyon, and Honouliuli Internment Camp national monuments.

“Our wide open spaces and our historic sites need just as much protection today as they did the day the Antiquities Act was signed into law in 1906. President Obama, no less than President Roosevelt, understands the great public service presidents perform when they conserve those open spaces and those historic sites for the future. No fewer than nineteen presidents, both Democrats and Republicans, have used the Antiquities Act to protect the national treasures found on our federal lands, and many more will do so in the future. The American people demand nothing less.

“Despite the best efforts of an anti-conservation congressional majority, the American people still see more than dollars and cents when they look across the prairie, or into the Mountain West, or back into the pages of our shared history. They see the same beauty that our forefathers saw – a beauty that we dare not throw away in the name of today’s bottom line. We cannot sustain an economy based on taking everything, leaving nothing and demanding that taxpayers foot the bill for private profits. I share the American people’s vision of protected landscapes, well-preserved historical sites and monuments, and a thriving federal lands system accessible to every American who comes to enjoy rather than exploit. So does President Obama. Today I’m proud to stand with him in welcoming these additions to our public lands and look forward to hearing the many success stories they have ahead of them.”

###

Representative Rob Bishop (UT-01) NEW

Chairman Bishop Reacts to Obama Administration's Plans to Unilaterally Proclaim Three New National Monuments

WASHINGTON, D.C., February 18, 2015 - House Committee on Natural Resources Chairman Rob Bishop (UT-01) released the following statement after President Obama announced his intentions to unilaterally proclaim three new national monuments using the Antiquities Act of 1906.

"President Obama has sidelined the American public and bulldozed transparency by proclaiming three new national monuments through executive fiat. The Obama Administration claims these designations have public support, but we know that is a complete stretch of the truth. The cost to taxpayers is anyone's guess and the impacts upon local communities are unknown. Congress has demonstrated that it can work in a collaborative fashion to fully vet and approve designations that have support from the public and their elected representatives. This White House has shown once again its utter and complete disdain for the public process, Congress, and the communities most impacted by these unilateral, unchecked land designations."

The President's designations include Pullman Historic District in Chicago, Illinois, Browns Canyon in Salida, Colorado, and the site of a World War II-era internment camp in Honouliuli, Hawaii, and will be formally announced on Thursday, February 19, 2015.

<http://naturalresources.house.gov/news/documentsingle.aspx?DocumentID=398049>

###

External Stakeholders

Healing Waters Family Center - Joseito Velasquez, Pastor NEW

"Colorado's clean water, wildlife habitat, cultural treasures and public lands are entrusted to us to be protected and preserved for the next generation. It is our moral responsibility to care for our land, water, and wildlife. The support of Browns Canyon demonstrates just how important stewardship of our outdoor and cultural heritage is to the Latino community."

###

Conservation Colorado - Pete Maysmith, Executive Director NEW

"We thank President Obama for acting now to protect Browns Canyon, and honoring the work of so many to protect this striking place. This new national monument is a culmination of former Senator Mark Udall's work and so many others to protect this gem of the Arkansas River," said Pete Maysmith, Conservation Colorado's Executive Director. "All Coloradans can be proud of what we have accomplished together."

###

Sierra Club - David Scott, President, and John Stansfield, Volunteer, Sierra Club Rocky Mountain Chapter **NEW**

"We applaud President Obama for using his authority to protect this national treasure. The unique combination of water, wild landscape and lower elevation ridges at Browns Canyon provide four-season opportunities for people to get outside, as well as important wildlife habitat. Browns Canyon is a wonderful addition to our nation's conservation legacy; we look forward to President Obama's continued work to secure our outdoor heritage.

###

Center for Western Priorities

DENVER-- The Denver Post reported this morning that President Barack Obama will designate Colorado's Browns Canyon as a new national monument. But two members of Colorado's Congressional delegation immediately criticized the decision and distorted the facts about the monument designation.

Jessica Goad, Advocacy Director at the Center for Western Priorities, issued the following statement in response:

"Today's comments by Congressmen Lamborn and Buck are hypocritical, offensive, and out of touch with Coloradans. This monument designation was discussed and refined extensively, and enjoyed support from both Republicans and Democrats over the years. But Congress has failed to take action for over two decades. Instead of playing politics, these representatives should join in Colorado's bipartisan tradition of protecting lands. If Congress won't take action protect these deserving public lands, then the president should."

Here are three ways that Rep. Lamborn and Rep. Buck misfired in their statements:

1) Rep. Lamborn has supported the designation of national monuments during previous presidential terms.

Lamborn stated that he was "outraged" by the Browns Canyon monument, but in 2007, when President George W. Bush was in office, Rep. Lamborn called for the creation of a Pikes Peak National Monument. "It would promote tourism," Lamborn said at the time. "There are people who love to go around and visit the national monuments around the country and the national parks."

2) Rep. Lamborn has had every opportunity to pass a bill in Congress.

While Rep. Lamborn today criticized the president for a "top-down, big-government land grab," bipartisan legislation to protect Browns Canyon has been promoted by the local community but has languished in Congress since 1991. Rep. Lamborn's predecessor—Representative Joel Hefley (R-CO)—and Senator Wayne Allard (R-CO) both called for the protection of the area. In fact, Rep. Hefley this morning said, "the people of Chaffee County have been working together for many years to protect this scenic landscape."

3) Rep. Buck's comments about the president—calling him “King Barack”—are offensive and wrong.

Rep. Buck's inappropriate comments today of “no more acting like King Barack” also fail to note that 16 presidents have used the Antiquities Act, including Republican President George W. Bush. Notably, Rep. Buck did not refer to President Bush as “King George” when Bush designated national monuments.

###

Colorado Sportsmen Group

Trout Unlimited

Backcountry Hunters and Anglers

National Wildlife Federation

Sportsmen groups praise creation of Browns Canyon national monument

Call monument designation ‘historic victory’ for Colorado conservation

SALIDA (Feb. 18)—Colorado sportsmen today praised President Obama's designation of Browns Canyon as a new national monument, the culmination of years of effort to protect a Colorado backcountry treasure beloved by generations of anglers, hunters, rafters, and hikers.

Gov. John Hickenlooper and Sen. Michael Bennet recently asked President Obama to use his authority under the Antiquities Act to establish the 22,000-acre Browns Canyon National Monument, after legislation sponsored by Sen. Mark Udall stalled in Congress despite broad local support.

Sportsmen and wildlife enthusiasts called the monument action a historic victory for Colorado conservation.

“I'm thrilled,” said Jim Impara, vice president of the Collegiate Peaks Chapter of Trout Unlimited in Salida. “Browns Canyon is one of those special places that draws rafters, hunters and anglers from all over the world. This action ensures that Browns' wildness and rare beauty will be there for our children and grandchildren to enjoy.”

“Browns is one of the most popular whitewater rafting destinations in the country,” said Bill Dvorak, rafting guide and public lands organizer for the National Wildlife Federation. “It's also a great hunting and fishing area and the foundation of our local recreation-based economy. With this designation, Coloradans can be confident that the wildlife and economic benefits that Browns Canyon provides will be around for a long time to come.”

“This is a great day for Colorado and for sportsmen,” said Tim Brass, Southern Rockies Coordinator for Backcountry Hunters and Anglers. “Browns Canyon is the gold standard for backcountry hunting and fishing habitat. Protecting this last bastion of wild country along the Arkansas River ensures that herds of

elk and deer have high-quality winter range and anglers can pursue wily trout in an outstanding Gold Medal fishery.”

For years, sportsmen’s groups have been pushing for monument status for Browns Canyon. TU, NWF and BHA organized local hunters and anglers to voice their support and attend numerous local meetings and public forums. The groups cited Brown’s important fish and wildlife habitat, as well as its role as an economic driver for Colorado’s \$1.2 billion fishing economy and \$500 million hunting economy. Browns Canyon is also the single largest contributor to Colorado’s \$140 million whitewater rafting industry.

“Sportsmen can be proud that they helped deliver this victory for Browns,” said David Nickum, executive director of Colorado Trout Unlimited. “Our local roots and deep knowledge of these places carry weight with lawmakers and federal officials. Hunters and anglers understand the value of our public lands and wild backcountry, and we’re committed to protecting these magnificent resources and our outdoor way of life.”

He added, “We especially thank Sen. Udall for his dedication and persistence in pushing for a Browns Canyon monument. He has been a valued voice for sportsmen and for commonsense conservation.”

For more information about Browns, go to www.sportsmenforbrowns.com.

###

Conservation Lands Foundation

President Obama’s Browns Canyon National Monument designation applauded ***President’s action will expand our National Conservation Lands***

Durango, CO (February 18, 2015) – The Conservation Lands Foundation praised the announcement that President Obama would use his authority to permanently protect Browns Canyon in Colorado, along with the Honouliuli Internment Camp in Hawaii and Chicago’s historic Pullman neighborhood as national monuments. These national monuments will permanently protect a diversity of lands and waters that honor our country’s history and conserve open space important for hunting, fishing and outdoor recreation for future generations.

“Today’s action builds on steps the Administration has taken over the last six years to expand access to our public lands for outdoor recreation by permanently protecting areas significant to our nation’s rich history and America’s outdoor heritage,” said **Ryan Bidwell, Campaign Director with the Conservation Lands Foundation**. “There are places among America’s public lands that represent vital parts of our country’s history, and places that provide opportunities for our kids and grandkids to explore and experience the outdoors.”

Browns Canyon, located two hours from Denver, Colorado will become part of our nation’s National Conservation Lands. The national monument will protect wildlife habitat and attract new generations of visitors to enjoy the hunting, fishing and whitewater rafting that define Colorado’s outdoor lifestyle. The

rugged granite cliffs and backcountry provide high quality wildlife habitat for a variety of birds and animals including golden eagles, bighorn sheep and elk.

The stretch of the Arkansas River that runs through Browns Canyon is an outstanding wild trout fishery as well as one of the most popular whitewater rafting destinations in the country. Commercial rafting on the Arkansas River which runs through Browns Canyon brings in \$60 million to the local economy. The permanent protection of this area will support the economic vitality of the region, supporting local businesses, river outfitters and surrounding communities.

For more than 10 years, efforts to protect Browns Canyon have been championed by members of both political parties. The designation is based on recent legislation developed as result of extensive community involvement, including public meetings and thousands of public comments.

Honouliuli and Pullman both represent distinct and important aspects of our country's history. The Honouliuli Internment Camp, located on the island of O'ahu was Hawai'i's largest and longest operating World War II prison camp. Nearly 4,000 individuals were incarcerated there solely on the basis of ancestry or country of origin.

Chicago's historic Pullman neighborhood is closely linked to the history of the American labor movement. Pullman was the site of one of the bloodiest labor battles in American history – the Pullman Strike of 1894 –in which many workers were wounded or lost their lives at the hands of federal and state troops. Shortly after the deadly strike, Congress passed legislation creating a national Labor Day holiday.

With each of these designations, there was strong recognition among elected officials, local business, veterans, sportsmen, youth groups and Hispanic, African American and Japanese American leaders that some places are so important to our shared culture and heritage that they deserve to be protected for all time.

“These monument designations protect important historic and natural sites. They are a profound way to recognize our diverse national mosaic by honoring our American heritage and broadening public appeal to our public lands to an increasingly diverse American public,” stated said **Brian O'Donnell, Executive Director of the Conservation Lands Foundation**. “We look forward to President Obama's continued leadership in protecting our nation's most significant natural treasures, and protecting the laws that have allowed sixteen Presidents—eight from each party—to enact these important protections when Congress is unable to do so.”

###

Creation Justice Ministries

The Antiquities Act Used To Create Three National Monuments

Diverse Faith Community Applauds Diversity of Protected Places

Washington, DC – President Obama is set to designate three new national monuments Thursday, and Christian communities are applauding this act of stewardship. Pullman in Chicago, Browns Canyon in Colorado, and Honouliuli in Hawaii, will all be protected as monuments upon the President’s announcement in Chicago.

“Pullman Historic Site in Chicago is home to the first African American union in the country,” stated Tricia Bruckbauer, Program Director for Creation Justice Ministries. “As a Christian community that represents the stewardship policies of many historically African American churches, we are pleased with the President’s use of the Antiquities Act to preserve important stories of all Americans.”

Browns Canyon is widely lauded for its trout fishing and outdoor recreation and provides a vital habitat for many of God’s creatures. Honouliuli is the site of a World War II internment camp, and will be preserved as an important reminder of American struggles with civil liberties in times of conflict.

“As Americans, we have a stewardship tool that is able to preserve wonderful pieces of God’s creation as well as important artifacts of history and stories of our diverse nation,” Bruckbauer continued. “The Antiquities Act has been a blessing to many communities looking to safeguard their national treasures for future generations and for the benefit of Americans everywhere. We look forward to working with decision-makers to protect more of the places in which we pray and play.”

The Antiquities Act was established by President Theodore Roosevelt in 1906 and has been used to protect places that are significant naturally, historically, or culturally. It has been used by 16 presidents.

###

Environmental Learning for Kids

Inner City Kids Group Praises Browns Canyon National Monument Status

Environmental Learning for Kids depends on protected lands to take urban kids outdoors

DENVER – Today President Obama announced that Browns Canyon will become a national monument – and Environmental Learning for Kids is singing his praises.

“Environmental Learning for Kids depends on protected places like Browns Canyon to introduce urban kids to the majestic beauty and solitude of Colorado’s wild lands – places none of them have ever visited before,” said Amy Wright, Education Coordinator at Environmental Learning for Kids. “On behalf of Denver’s inner city youth, we want to thank the President for his leadership on making Browns Canyon a national monument.”

Browns Canyon’s ruggedness and lower elevation provides excellent habitat for birds of prey, bighorn sheep, elk and other wildlife, as well as offers high quality hiking, camping, fishing and climbing

opportunities. Environmental Learning for Kids depends on Browns Canyon and other public lands to introduce multicultural, low-income youth and their families to the great outdoors in Colorado.

“I feel so lucky I was able to visit Browns Canyon. It was my first trip out of the city,” said Melissa Sotelo of Environmental Learning for Kids. “And I really like knowing that now it’s a protected area so other urban kids can come and experience it like I did.”

Congress has considered multiple bipartisan bills to designate Browns Canyon as national monument over two decades but failed to pass one.

ELK (Environmental Learning for Kids) is an inclusive non-profit organization that develops inspired and responsible leaders through science education and outdoor experiences for underserved, urban youth ages 5-25.

###

Friends of Brown Canyon

Colorado leaders, sportsmen, businesses applaud Browns Canyon National Monument announcement

Salida, CO (February 18, 2015) – The Friends of Browns Canyon and community leaders applauded the news that President Obama plans to designate the Browns Canyon National Monument in Colorado on Thursday.

“This designation will provide permanent protection that is long overdue for this incredible area. Residents and visitors to Chaffee County have always understood that Browns Canyon is a national treasure,” commented Keith Baker, Executive Director of Friends of Browns Canyon. “The national monument designation is supported by hunters and anglers, businesses and conservation groups, veterans and youth groups.”

A broad cross-section of local groups and businesses have supported the national monument designation for Browns Canyon, including the Colorado and Arkansas River Outfitters Associations, Chaffee County Visitors Bureau, the Salida Business Alliance, sportsmen, youth, faith, veterans and Hispanic groups, local businesses and county commissioners. Recent polling from the Colorado College showed that 96% of Coloradans support the protection and conservation of natural areas.

“Browns Canyon is intricately connected to the fabric of our communities and is key to our quality of life. The Browns Canyon National Monument will also boost local economic vitality via increased visitation and awareness of Buena Vista and Chaffee County,” stated Joel Benson, Mayor of Buena Vista. “As a father and a business owner, I welcome this monument designation because it ensures that this irreplaceable location will be permanently protected for the well-being of our community, our local economy, and our children.”

“The people of Chaffee County have been working together for many years to protect this scenic landscape and the important river corridor that runs through Browns Canyon,” stated former U.S.

Representative Joel Hefley, who represented Colorado's 5th Congressional District, which includes Chaffee County, from 1987 to 2007. "This new National Monument will mean a lot to Chaffee County and also for future generations as they enjoy this special place. I am thrilled that after all these years it is finally happening."

"As a retired Air Force Officer, outdoor business owner and dedicated backcountry enthusiast, I've long felt that Browns Canyon is one area that's clearly worth protecting," stated Eric Lynn, owner of Mountain Ridge Gear in Payton, CO. "Whether you're casting on the gold medal waters of the Arkansas during the Caddis hatch, or hiking the rugged ridges in pursuit of mule deer, it is landscapes like Browns Canyon that I've fought for and more than anything, it's an area that I am glad to be able to pass down to my kids."

Browns Canyon is the most popular whitewater rafting destination in the country. According to the Colorado River Outfitters Association (CROA), commercial rafting on the Arkansas River which runs through Browns Canyon brings in roughly \$60 million to the economy. The stretch of the Arkansas River that runs through Browns Canyon was awarded "Gold Medal" status for having the highest quality cold-water fish habitats accessible to the public and great potential for trophy trout fishing.

"Browns Canyon is a stunning and rugged stretch of the Arkansas River which supports a multi-million dollar local outdoor industry. The monument designation guarantees that the backcountry, fishing, wildlife and economic benefits that Browns Canyon provides will be around for a long time to come," said Bill Dvorak, owner of Dvorak Expeditions and President of the Friends of Browns Canyon. "This is why we appreciate the leadership of the President and Senators Bennet and Udall for working with our community to finally give Browns Canyon the recognition it deserves."

###

Hispanic Access Foundation

Latinos Applaud Browns Canyon National Monument Designation

Wednesday, February 18, 2015

This week, President Barack Obama will protect the national public lands of Browns Canyon by designating it as the nation's newest national monument. Latinos, which account for more than 21 percent of the state's population, celebrated the decision that will help preserve and increase access to the Colorado treasure, safeguard critical clean water supplies for southern Colorado families and protect wildlife habitat prized by generations of hunters.

"Browns Canyon is significant to people across many cultures and communities," said Maite Arce, president and CEO of Hispanic Access Foundation. "Protecting these public lands will strengthen the diverse social fabric of the region and unite our hopes that future generations will be able to experience Browns Canyon as we do today."

While Hispano settlers helped develop the Sante Fe Trail trading corridor in the 19th century spawning settlements from the lower Arkansas Valley to San Luis Valley and beyond, Browns Canyon has continued to be a destination for Latinos. In August 2014, Hispanic Access Foundation led a Browns Canyon rafting and hiking trip with 60 Latino youth from Denver's Healing Waters Family Center and New Hope Christian Fellowship in Greeley.

"Colorado's clean water, wildlife habitat, cultural treasures and public lands are entrusted to us to be protected and preserved for the next generation. It is our moral responsibility to care for our land, water, and wildlife," said Joseito Velasquez, a pastor with Healing Waters Family Center. "The support of Browns Canyon demonstrates just how important stewardship of our outdoor and cultural heritage is to the Latino community."

Latinos played a visible and vocal role in the effort to protect Browns Canyon. For example, several Latino youth from St. Cajetan Catholic Church traveled to Salida, Colo. to share their support for a national monument. In 2012, youth from the church held their own weekend rafting and camping trip in Browns Canyon. These youth then raised money to travel to Washington, D.C. to share their experience with Sens. Mark Udall and Michael Bennet, the director of the National Park Service, representatives from Department of Interior and the White House Council for Environmental Quality.

"Whitewater rafting the Arkansas River through Browns Canyon was the best experience of my life," said Paola Soto, a Community College of Denver student who spoke at the public meeting in Salida. "Protecting this area will make sure that everyone has this opportunity. A Browns Canyon National Monument is good for our economy, our environment and our community. I can't wait to return."

The national monument designation will help permanently protect watersheds and water quality, conserve fish and wildlife, enhance air quality and increase access to healthy outdoor recreation. Additionally, areas surrounding national monuments often experience an economic boost from increased tourism.

"There is a misperception that Latinos are solely focused on only a few issues, like immigration reform or the economy," said Arce. "As we've seen from the Colorado Latino community's active support for Browns Canyon, environmental issues, such as public lands protection, are equally important to our community. Latinos are making their voices heard as a community that enjoys spending time in the outdoors and enthusiastically support protecting public lands for future generations."

"We appreciate the leadership of Department of Interior Secretary Sally Jewel, Bureau of Land Management Director Neil Kornze and U.S. Forest Service Chief Thomas Tidwell, and their efforts to listen to the concerns of the Latino community," said Arce.

League of Conservation Voters

LCV Statement on Reports that President Obama Will Create Three New National Monuments

WASHINGTON, DC – League of Conservation Voters (LCV) President Gene Karpinski released this statement on reports that President Obama will protect Chicago's Pullman Historic District, Hawaii's Honouliuli Internment Camp, and Colorado's Browns Canyon as national monuments:

"We are thrilled that the president continues to take steps to protect America's treasured historic, cultural and natural resources for future generations. The designation of Hawaii's Honouliuli Internment Camp and Chicago's Pullman Historic District add to the president's strong record of ensuring that our parks and monuments tell the stories of our increasingly diverse nation. And after over a decade of local support, the new Browns Canyon National Monument will bolster Colorado's outdoor recreation economy for years to come. President Obama continues to take bold steps to protect America's special places and we can't wait to see what's next."

###

National Wildlife Federation

NWF celebrates a new national monument: Colorado's Browns Canyon

DENVER (Feb. 28, 2015) – President Barack Obama's plan to declare Colorado's Browns Canyon a national monument means sportsmen and outdoor enthusiasts will be able to enjoy its spectacular landscapes, world-class whitewater rafting and hunting and fishing for generations to come.

"Browns Canyon is widely revered for its rafting, fishing, hunting, hiking, wildlife watching, and rugged backcountry," said Collin O'Mara, the National Wildlife Federation's CEO and president, "This is why folks from all walks of life, lawmakers from both parties, and conservation leaders across Colorado, including our state affiliate the Colorado Wildlife Federation, have worked for more than two decades to protect it. On behalf of the entire National Wildlife Federation, we are grateful to the president for supporting wildlife and amazing outdoor experiences by permanently protecting this conservation jewel."

[Browns Canyon](#), about 140 miles southwest of Denver, is known nationwide for whitewater rafting on the Arkansas River. The Colorado River Outfitters Association said recreation on the river generated nearly \$56 million in economic benefits in 2013. The area's gulches, rocky cliffs, forests and meadows provide habitat for mule deer, elk, black bears, bighorn sheep, mountain lions, eagles and falcons. A 102-mile stretch of the Arkansas is classified as Gold Medal trout waters, based on the quality and quantity of fish. Hikers in Browns have great views of some of Colorado's most dramatic Fourteeners – mountains more than 14,000 feet in elevation.

"We've been waiting a long time for this. Making Browns Canyon a national monument has overwhelming support from the public, especially from people who live the closest to it. We know what

we have and we don't want to lose it," said Bill Dvorak, NWF's public lands organizer in Colorado and a longtime rafting and fishing guide on the Arkansas River.

News that Obama will proclaim Browns Canyon a national monument this week follows a recent public meeting in Salida that drew about 700 people. Former Sen. Mark Udall hosted the meeting in December so federal officials could gauge support for protecting Browns. Udall, Sen. Michael Bennet and Gov. John Hickenlooper asked Obama to use his executive authority after Udall's bill to establish a monument stalled in Congress.

"Presidents since Teddy Roosevelt have used the Antiquities Act to conserve some of our country's most stunning landscapes and important ecosystems. The Grand Canyon, Chaco Canyon and Muir Woods are just a few of the places set aside by presidents. We can add Browns Canyon to the list of American treasures that showcase the best of the natural resources that make us the envy of other countries around the world," said Kent Ingram, Colorado Wildlife Federation president.

<http://www.nwf.org/News-and-Magazines/Media-Center/News-by-Topic/Wildlife/2015/02-18-15-NWF-celebrates-a-new-national-monument-Colorados-Browns-Canyon.aspx>

Natural Resources Defense Council (NRDC)

Praising Pullman: NRDC Supports New National Monument Designations

CHICAGO (February 18, 2015) – President Obama will be in Chicago tomorrow to sign an order designating the city's Pullman District as a national monument. He is also expected to announce two other new monuments, Browns Canyon in Colorado and Hawaii's Honouliuli Internment Camp.

Following is reaction from NRDC Executive Director Peter Lehner:

"The rich history of the Pullman District makes for a significant national monument; memorializing a moment in history that remains rich with meaning around race relations, the labor movement, technological innovation and urban planning. The Pullman story represents the struggle for a better life and should be preserved for generations to come.

"We appreciate the President's continued investment in developing national monuments that memorialize not only our most important wild places, but also essential historical sites that illuminate the American experience. Certainly Pullman, Brown's Canyon in Colorado and the Honouliuli Internment Camp site in Hawaii represent the amazingly diverse breadth of special places that require protection and interpretation."

NRDC Midwest Director Henry Henderson blogged on the importance of the Pullman District national monument designation at

http://switchboard.nrdc.org/blogs/hhenderson/pullman_national_monument_a_re.html

###

PEW

Pew Applauds Expected Browns Canyon National Monument Designation

Washington, DC—The Pew Charitable Trusts today applauded the expected designation of the Browns Canyon National Monument in Colorado.

Mike Matz, Pew’s director of U.S. public lands, issued the following statement:

“Browns Canyon and the stretch of the Arkansas River that runs through it are economic powerhouses in central Colorado, drawing people from all over the country for outdoor recreation. For years, visitors have enjoyed the river’s white waters and the canyon’s wild features. Those destinations now have a well-deserved monument designation.

“In addition to being one of the most popular rafting destinations in the country, the area that is now Browns Canyon National Monument attracts visitors for hiking, hunting, fishing, horseback riding, skiing, and bird-watching. The rugged cliffs and spectacular backcountry are home to a variety of wildlife, including bighorn sheep, peregrine falcons, and golden eagles. And the Arkansas River has an outstanding wild-trout fishery.

“This designation was made possible by the Antiquities Act of 1906, which gives the president the power to conserve for future generations natural, historical, and cultural treasures. The act is one of our nation’s most critical preservation tools. Republican and Democratic presidents alike—Theodore Roosevelt, Harry Truman, George W. Bush, and Barack Obama, to name a few—have relied on it to safeguard our nation’s heritage.

“The protection of Browns Canyon gives 2015 a rousing start for conservation as we look to preserve more lands, such as Boulder-White Clouds in Idaho and the Birthplace of Rivers in West Virginia.”

Last year, congressional and presidential actions were taken to conserve a number of America’s wild places, including Sleeping Bear Dunes in Michigan, Organ Mountains-Desert Peaks in New Mexico, and Nevada’s Pine Forest Range.

Sierra Club

Sierra Club Praises National Monument Designations

Wednesday, February 18, 2015

WASHINGTON, D.C.-- President Obama Thursday is expected to designate three new national monuments-- Pullman Historic Site in Illinois, birthplace of the first African-American union in America; Honouliuli Internment Camp in Hawai'i, the largest prisoner-of-war camp and longest-used World War II internment camp in Hawai'i; and Browns Canyon in Colorado, a premier trout fishing and outdoor recreation destination.

In expectation, Sierra Club Executive Director Michael Brune issued the following statement.

"We applaud President Obama for taking steps to expand our nation's outdoor heritage by ensuring our public lands and national monuments tell the full story of the country's rich cultural and natural history.

"These monuments embody the span of historic, cultural, and natural wonders that make up our nation's outdoor legacy. President Obama's action is both recognition of their importance and assurance that they will remain as places of remembrance, historic contributions, and inspiration for our children.

"It's heartening to see President Obama once again help local communities protect valuable pieces of America. We look forward to more progress in making America's public lands better serve the diversity and interests of the American people."

###

The Wilderness Society

The Wilderness Society Statement on the Creation of Browns Canyon, Honouliuli and Pullman National Monuments

Antiquities Act preserves a storied neighborhood, World War II internment site and a premier river canyon

WASHINGTON, D.C. (February 18, 2015) — The Wilderness Society issued the following statement today regarding President Obama's plans this week to designate Browns Canyon National Monument in Colorado, Honouliuli National Monument in Hawaii and Pullman National Monument in Chicago.

"These proclamations remind us that the spaces commemorating our nation's heritage come in a rich variety of shapes and sizes," said **Matt Keller, national monuments campaign director with The Wilderness Society**. "They include sites where people stood up for their rights for freedom and fair wages, places where thousands experienced the injustices of war, and landscapes that provide habitat for wildlife and heart-stopping adventure on whitewater rivers. We are proud of the Administration for listening to local communities and using the Antiquities Act to preserve these irreplaceable sites for all Americans to visit."

Browns Canyon is a scenic 22,000-acre stretch of public lands along the Arkansas River in Chaffee County, between Buena Vista and Salida, Colorado. These lands are managed by the U.S. Forest Service and Bureau of Land Management. The Wilderness Society has been working to protect the natural values of the Browns Canyon landscape since the early 1970s.

The Honouliuli camp on the island of O'ahu was the last, largest and longest operating internment camp during World War II. By acknowledging past injustices, this site honors the experiences of those interned and allows us to enlighten future generations.

The historic Pullman district in Chicago honors a unique, shared legacy that is integrally connected to the push for fair labor conditions and civil rights. The community represents the first model industrial town in America.

President Theodore Roosevelt pushed for passage of the Antiquities Act, which has since been used by 16 presidents –eight Republicans and eight Democrats – to protect many of America’s most treasured places from Alaska to the Florida Keys, including the Grand Canyon, Acadia, Muir Woods, Grand Teton and Olympic national parks.

For more on the history and bipartisan use of the Antiquities Act, click [here](#).

###

Joe Greiner, Owner of Wilderness Aware Rafting, Buena Vista, CO

“I take tourists and residents whitewater rafting and fishing through Browns Canyon, exposing them to the natural beauty that is at the heart of Colorado’s outdoor heritage. A lot of people put national monuments on their bucket list. This national monument designation will put Browns Canyon on the map and have an even bigger impact on our local economy.”

###

Bill Dvorak, Owner of Dvorak Raft, Kayak & Fishing Expeditions

“I’ve been guiding river trips through Browns Canyon since the early ‘80s and it’s undeniably one of the top whitewater destinations in the country, supporting a multi-million dollar local outdoor industry. The monument designation guarantees that the backcountry, fishing, wildlife and economic benefits that Browns Canyon provides will be around for a long time to come. This is why we appreciate the leadership of the President and Senators Bennet and Udall for working with our community to finally give Browns Canyon the recognition it deserves.”

###

Eric Lynn, Owner of Mountain Ridge Gear, Peyton, CO

"As a retired Air Force Officer, outdoor business owner and dedicated backcountry enthusiast, I've long felt that Browns Canyon is one area that's clearly worth protecting. Whether you're casting on the gold medal waters of the Arkansas during the Caddis hatch, or hiking the rugged ridges in pursuit of mule deer, it is landscapes like Browns Canyon that I've fought for and more than anything, it's an area that I want to pass down to my kids. I'm encouraged by the prospect that Browns Canyon will be protected as it currently is."

###

Dick Ziminski, Owner San Isabel Bed & Breakfast, Army veteran, Colorado Springs, CO

“My wife and I moved to Colorado because we enjoy the outdoors and like to experience all that Colorado has to offer. The same is true of the guests who stay with us from around the country. A Browns Canyon National Monument will provide an opportunity to enhance our regional economy by

offering Americans a unique landscape surrounded by magnificent views preserved for wildlife and outdoor activities – hunting, fishing, rafting and wildlife viewing.”

###

Nick Morgan, US Army OIF veteran and local business owner

“Just as millions of Veterans like me have committed to defending our country for future generations, Congress and the President have a duty to protect our most cherished places for all the Americans that they are expected to represent. Being in Browns Canyon not only helped me to heal emotionally, but also reconnected me with the land I swore an oath to protect.”

###

Garrett Reppenhagen, Army veteran and Rocky Mountain West coordinator for the Vet Voice Foundation

"Browns Canyon is located near several U.S. military bases, including Fort Carson and the U.S. Air Force Academy. Its protection as a national monument would ensure that service members and veterans could have access to the outdoors, can heal from the trauma of war, and reconnect with family. This is why Vet Voice Foundation strongly supports President Obama using his authority to make this protection a reality through use of the Antiquities Act."

###

Alfonso Abeyta, Abeyta Ranch, Alamosa, Colorado

“As a third-generation rancher and farmer who grazes livestock on public lands in southern Colorado, I have an almost daily appreciation for the importance of our public lands to our way of life here. In part, that's why I support a national monument for Browns Canyon. It would better protect the area and ensure continued sustainable grazing.”

###

Rich Kaup, Troublesome Creek Farm, Golden Colorado

“I am all in favor of protecting our public lands, wildlife and the sustainable use of our shared natural resources in Colorado. As such, I believe the Browns Canyon National Monument will be great not only for natural resources, wildlife and multiple uses, but for the rural economies.”

###

Connie Harvey, Harvey Ranch, Aspen, Colorado

“The national monument designation for Browns Canyon will protect the area against threats while continuing multiple uses like grazing, hunting and recreation. I believe a national monument for Chaffee County would be a win-win for all involved - generating needed tourism revenues for local economies and conserving water, lands and wildlife for future generations.”

###

Bill Eikenberry, Eikenberry Ranch, Lakewood, Colorado

“As a lifelong rancher, I fully support the national monument designation for Browns Canyon. I count on strong protections for our public lands in Colorado for grazing my cattle, hunting and fishing, and for outfitting. The Browns Canyon National Monument will ensure the continued multiple uses of this special place for many generations to come.”

###

Vets Voice Foundation

Veterans: Thank you for Making Browns Canyon a National Monument

Vet Voice Foundation values national monument for veterans’ reintegration

DENVER – Colorado veterans today expressed gratitude for President Obama’s protection of Browns Canyon as a national monument via the Antiquities Act, and asserted the importance of the site to America’s veterans and military families.

“Spending time in Browns Canyon and other public lands was a critical part of my transition back to civilian life after the stress of serving in Iraq,” said Garrett Reppenhagen, a former U.S. Army sniper and Rocky Mountain Coordinator for Vet Voice Foundation. “Veterans in central Colorado depend on Browns Canyon for the solitude and experiences that help us recover from what we endured abroad and reintegrate into our lives at home.”

Since it is located near several U.S. military bases, including Ft. Carson and the U.S. Air Force Academy, permanently protecting Browns Canyon as a National Monument ensures that service members and veterans have access to the outdoors, can heal from the trauma of war, and reconnect with family. The area is a national treasure, providing critical wildlife habitat, premiere trout fishing and year-round opportunities for outdoor recreation.

“Today the president fulfilled his duty to protect our most cherished places for all the Americans, just as millions of veterans like me fulfilled our duty to defending our country,” said Lee Hunnicutt, a Chaffee County veteran. “We are grateful that President Obama heard local veterans and other community members advocating for national monument status for Browns Canyon, an important place of healing and growth.”

Legislation to protect Browns Canyon on the Arkansas River had been introduced in Congress by members of both political parties for more than a decade but failed to move despite extensive community involvement, including public meetings and thousands of public comments from a broad cross-section of veteran groups, local businesses, elected officials, outdoor outfitters and sportsmen.

The Vet Voice Foundation sent emails and contacted elected officials to express their support for the proposal to make the designation.

"I am proud to see the President respond directly to our local elected leaders, vets, and other community leaders who have been calling for action to protect Browns Canyon for years," said Reppenhagen. "Ideologues in Congress would have preferred to stall the conservation of our heritage for another decade – but local veterans, sportsmen, small business owners and our families would have paid the price."

Founded in 2009, the mission of Vet Voice Foundation is to mobilize veterans to become leaders in our nation's democracy through participation in the civic and democratic process. VVF seeks to harness the energy and drive of the dedicated men and women who have fought for their country, and put it to work at home and in their communities on the important issues they face, such as health care, jobs, the environment, and housing.

###

Outdoor Recreation Supports Browns Canyon National Monument

Statements from Outdoor Recreation member groups and industry leaders

"For thousands of Americans, Browns Canyon of the Arkansas River is a special place to experience whitewater for the first time and for many years after. Whether its on a commercial raft with the whole family, or in a kayak class learning how to control your own boat, the experience of paddling through the canyon and taking in the beauty of the landscape, wildlife, and the quality whitewater rapids, sticks in peoples minds forever and keeps them coming back for more. That's why we need the canyon protected, so that future generations can experience it as we have, and become stewards of the Canyon."

- **American Whitewater**/Nathan Fey

"The Colorado Mountain Club is pleased to finally see protection for the incredible natural resources and recreational opportunities in the newly designated Browns Canyon National Monument. CMC members have been traveling to Chaffee County for decades to enjoy the rugged hiking and the incredible scenery in Browns Canyon. We are grateful for the volunteers, congressional delegates and the White House who have worked to ensure this landscape will remain intact for generations of Coloradans to enjoy in the future."

- **Colorado Mountain Club**/Heather MacSclarrow, CMC Lands Director/Scott Robson, CMC CEO.

"We are delighted with the designation of Browns Canyon, and grateful that the administration thoughtfully incorporated local perspectives and sensibilities as to the best way to protect it. It's a place that's meaningful to many people, and it's an exciting gateway to our public lands and the experiences they offer."

- **Outdoor Alliance**/Adam Cramer, Executive Director

“Browns Canyon is among the most popular whitewater rafting destinations in the US. With this proclamation, President Obama continues his legacy of protecting special wild places with designations that enjoy strong local support.”

The Conservation Alliance/John Sterling, Executive Director

“OIA and the outdoor industry looks forward to working with Congress and the administration to help implement the president’s vision for outdoor recreation and to highlight the importance of the outdoors at the national level. Please join us in exploring these newly protected parks and monuments, as well as other parks, forests, rivers and urban green spaces, in the coming year. Better yet – bring a young person so they too can grow up enjoying what we know as America’s Great Outdoors.”

- Outdoor Industry Association

###

American Whitewater

President Obama Designates Browns Canyon National Monument – Colorado

Salida, CO – On February 19th, President Obama used his authority under the US Antiquities Act to protect over 21,000 acres of public lands surrounding Colorado’s Browns Canyon of the Arkansas River. American Whitewater and community leaders applaud the news that President Obama plans to designate the Browns Canyon National Monument on Thursday.

“We thank President Obama for acting today, and honoring the decades of work so many of Coloradoans have invested to protect Browns Canyon”, said Nathan Fey, Regional Director at American Whitewater. “If it were up to Coloradoans we would have protected Browns Canyon years ago, so we should all be proud that the president has acted when congress couldn’t”

Recent polling from the Colorado College showed that 96% of Coloradans support the protection and conservation of natural areas. Along with American Whitewater and our members, local groups and businesses have supported the national monument designation for Browns Canyon, including the Colorado and Arkansas River Outfitters Associations, Chaffee County Visitors Bureau, the Salida Business Alliance, sportsmen, youth, faith, veterans and Hispanic groups, and county commissioners. .

Browns Canyon is the most popular whitewater rafting destination in the country. According to the Colorado River Outfitters Association (CROA), commercial rafting on the Arkansas River which runs through Browns Canyon brings in roughly \$60 million to the economy. The stretch of the Arkansas River that runs through Browns Canyon was awarded “Gold Medal” status for having the highest quality cold-water fish habitats accessible to the public and great potential for trophy trout fishing.

The president is using his authority under the Antiquities Act to protect Browns Canyon and two other new national monuments in Illinois and Hawaii this week. The Antiquities Act has been used to protect other landscapes important to paddlers, like the Grand Canyon and Dinosaur National Monument, but

under the monument proposal introduced by former Senator Mark Udall, Browns Canyon will not be managed by the National Parks Service and paddling will continue to be managed by the Colorado State Parks as it is today. The president's proclamation of Browns Canyon National Monument honors the spirit of Udall's legislation that followed a multi-year process of input from local residents, paddlers, ranchers, and businesses.

Today, after years of work, you can join us in thanking President Obama and Colorado's leaders, for Protecting Browns Canyon!

<http://www.americanwhitewater.org/content/Article/view/articleid/32185/>

###

The Conservation Alliance

Introducing Browns Canyon National Monument

On February 19, President Obama used his authority under the Antiquities Act to designate Browns Canyon National Monument near Salida, CO. This proclamation preserves 22,000 acres of Forest Service and BLM land in Colorado and provides outstanding opportunities for fishing, whitewater boating, hiking and many other outdoor activities. It is one of the most popular whitewater destinations in the country; attracting roughly 150,000 visitors annually who contribute \$60 million to the local economy. The area provides critical habitat for bighorn sheep, elk, mule deer and mountain lions.

The Conservation Alliance funded two organizations working to protect Browns Canyon: Conservation Colorado and Conservation Lands Foundation. We funded Conservation Colorado in 2006 for their effort to designate Browns Canyon as wilderness. After more than fifteen years of attempts to protect Browns Canyon via legislation, the strategy shifted to a national monument campaign. Conservation Lands Foundation, a 2014 grantee, worked with the Obama Administration to bring this national monument campaign across the finish line.

Senator Mark Udall introduced legislation last year to designate Browns Canyon as a National Monument, but Congress failed to move the bill. Udall's legislation specified that paddling on the Arkansas would continue to be managed by the Colorado State Parks as it is today. The president's proclamation of Browns Canyon National Monument honors the spirit of Udall's legislation, which followed a multi-year process of input from local residents, paddlers, ranchers, and businesses.

The Conservation Alliance applauds President Obama for designating the Browns Canyon National Monument. With this proclamation, President Obama continues his legacy of protecting special wild places with designations that enjoy strong local support. We thank President Obama for recognizing this special place, and protecting Browns Canyon forever.

100% of our membership dues support conservation opportunities like Browns Canyon. Together, we are making a measurable impact toward protecting threatened wild places in North America.

<http://www.conservationalliance.com/introducing-browns-canyon-national-monument/>

###

HECHO

Public Process Leads to Browns Canyon National Monument Designation

HECHO joins many grateful organizations and communities in thanking President Obama for taking action to designate Browns Canyon as the newest National Monument in Colorado.

Latino families and our communities have been using and enjoying the Browns Canyon area for generations. For too long, we have witnessed extractive industries such as oil, gas, and mineral development, as well as urban growth, mar the landscapes, pollute watersheds and affect the wildlife that have sustained us for generations.

The lands and waters in Browns Canyon are part of our heritage and are as treasured to us as are the Grand Canyon of the Colorado River, the Rio Grande del Norte in New Mexico and other areas throughout the West. Its permanent protection will be a great addition to our National Monument system and will be a place that we can continue to fish, hunt, camp, and hike. As in the Rio Grande del Norte National Monument, traditional uses will continue and will remain part of the fabric of our culture and traditions.

This designation under the 1906 Antiquities Act is especially fulfilling for the communities that have been engaged in the extensive public input process involving diverse stakeholders such as local businesses and communities, sportsmen, faith communities, youth groups, and elected officials. Although bipartisan legislative attempts to add greater protections to the area had been unsuccessful, strong and consistent public support in partnership with the President's executive action has resulted in greater protection for the region, which is valued for its wildlife, natural beauty, and recreational opportunities on the Arkansas River.

"It was exciting to see that the final public hearing drew hundreds of people, including a large number of Latinos from Denver," said Rod Torrez of HECHO. Browns Canyon is within easy reach of large communities along the Front Range, and as a national monument, will provide continued access for outdoor recreation, as well as protect the natural surroundings that we all enjoy.

###

Small Business Majority

Designation of New Monument at Browns Canyon Good for Colorado Small Businesses, Economy

Statement by Tim Gaudette, Colorado Outreach Manager for Small Business Majority, on President Obama's designation of Browns Canyon in the Arkansas River Valley as a national monument, which can provide increased opportunities for entrepreneurs and local economies

President Obama will announce today that he'll be designating a new national monument at Browns Canyon in the Arkansas River Valley. This is great news for small businesses, because entrepreneurs know protecting our natural assets is one way we can enhance the financial success of small businesses and local economies. In fact, two-thirds of Colorado small businesses supported a proposal to designate Browns Canyon as a national monument. Small business owners in Colorado strongly believe the designation of additional national parks and monuments enhances local jobs and the economy.

Public lands are not only important to businesses associated with the outdoor or the tourist trade. Small Business Majority's opinion polling found a majority of non-recreation businesses point to parks and public lands as a key reason for relocating to the area. What's more, nearly two-thirds of Colorado entrepreneurs choose to live and do business in the state because of opportunities tied to public lands.

America's parks and public lands matter to local economies and small businesses. Protecting our national heritage is important to our economic sustainability, and our legacy to future generations. The president's designation of Browns Canyon as a national monument is a step forward to supporting public lands, small businesses and the economy.

###

Trout Unlimited

Trout Unlimited praises creation of Browns Canyon National Monument

Calls monument designation 'historic victory' for Colorado conservation

SALIDA (Feb. 18)—Trout Unlimited today praised President Obama's designation of Browns Canyon as a new national monument, the culmination of years of effort to protect a Colorado backcountry treasure beloved by generations of anglers, hunters, rafters, and other recreational users.

Gov. John Hickenlooper and Sen. Michael Bennet recently asked President Obama to use his authority under the Antiquities Act to establish the 22,000-acre Browns Canyon National Monument, after legislation sponsored by Sen. Mark Udall stalled in Congress despite broad local support.

Trout Unlimited leaders called the monument action a "historic victory" for public lands conservation.

"TU members are proud to have played a leading role in protecting this Colorado crown jewel and preserving fishing and hunting opportunity for future generations," said Chris Wood, CEO and president of Trout Unlimited. "This is a big bipartisan win for our outdoors heritage, and it sends a strong and clear message that hunters and anglers want to keep our public lands public."

“I’m thrilled,” said Jim Impara, vice president of the Collegiate Peaks Chapter of Trout Unlimited in Salida. “Browns Canyon is one of those special places that draws rafters, hunters and anglers from all over the world. This action ensures that Browns’ wildness and rare beauty will be there for our children and grandchildren to enjoy.”

For years, sportsmen’s groups have been pushing for monument status for Browns Canyon, which includes prime backcountry habitat for mule deer, elk, bighorn sheep as well as miles of outstanding Gold Medal wild trout waters in the Arkansas River.

TU and other sportsmen’s groups, including the National Wildlife Federation and Backcountry Hunters and Anglers, organized local anglers and hunters to voice their support and attend numerous local meetings and public forums. The groups cited Brown’s important fish and wildlife habitat, as well as its role as an economic driver for Colorado’s \$1.2 billion fishing economy and \$500 million hunting economy. Browns Canyon is also the single largest contributor to Colorado’s \$140 million whitewater rafting industry.

“Sportsmen helped deliver this victory for Browns,” said David Nickum, executive director of Colorado Trout Unlimited. “Our local roots and deep knowledge of this place carried weight with lawmakers and federal officials. Hunters and anglers understand the value of our public lands and wild backcountry, and we’re committed to protecting these magnificent resources and our outdoor way of life.”

He added, “We especially thank Sen. Udall for his dedication and persistence in pushing for a Browns Canyon monument. He has been a valued voice for sportsmen and for commonsense conservation.”

For more information about Browns, go to www.sportsmenforbrowns.com.

###

John Gale, Director, backcountry Hunters & Anglers Conservation NEW

“Backcountry Hunters & Anglers tip our hats to the administration for recognizing the incredible backcountry values of Browns Canyon by designating it a national monument. We likewise appreciate the efforts of former Senator Mark Udall to ensure that his proposal for Browns Canyon incorporated local input from all stakeholders so that traditional land uses like hunting, fishing and ranching would be elevated and maintained. Their foresighted actions will benefit not just Coloradans but all Americans who come to Browns Canyon to hunt, fish, boat and make cherished outdoor memories with their families.”

Environment America **NEW**

Environment Colorado lauds protecting fishing, rafting in Browns Canyon

Browns Canyon, a popular spot for trout fishing and whitewater rafting here in central Colorado, will gain permanent protection tomorrow as a National Monument, following decades of campaigning by outdoor enthusiasts, the tourism industry, and some of the state's most prominent political leaders.

President Obama's expected action, revealed this morning in the *Denver Post*, will preserve more than 20,000 rugged canyon acres surrounding the Arkansas River, a beloved area home to gold medal trout, black bears, and stunning vistas. Kim Stevens, Environment Colorado issued the following statement in response:

"Places like Browns Canyon are a big part of what makes Colorado so special. That's why tens of thousands of Coloradans from all walks of life called for the permanent protection of this incredible landscape. That's why we're thrilled future generations will have the chance for the same spectacular views and opportunities to raft, hike, and fish that we enjoy [in the canyon] today.

"President Obama, former Senator Mark Udall and Senator Michael Bennet all get credit for safeguarding this special place. Everyone who signed a petition, attended a meeting, or made a phone call to protect Browns Canyon has a lot to be proud of, too.

“Environment Colorado looks forward to continuing to work with the administration and Congress to keep pristine public lands off limits to development, mining, drilling, and pollution. Future generations of Americans and the wildlife that depend on these ecosystems deserve nothing less.”

Kim Stevens, Campaign Director, Environment Colorado

Honouliuli National Monument, HI

Elected Officials

Senator Brian Schatz (D-HI)

Honouliuli Internment Camp Designated As National Historic Monument

Wednesday, February 18, 2015

Honolulu, HI – Today, U.S. Senator Brian Schatz (D-Hawai'i) praised President Obama's announcement that he intends to designate the Honouliuli Internment Camp as a National Historic Monument. This designation will put Honouliuli under the management of the National Park Service (NPS) and help preserve the history of the site where hundreds of Japanese-Americans were wrongly interned during World War II.

"Honouliuli represents a dark period in our history when thousands of Japanese-Americans in Hawai'i and across the country were forced into internment camps during World War II," said Senator Schatz. "This historic site will memorialize the strength and bravery of the many Japanese-Americans who faced discrimination and serve as a reminder to ourselves and future generations that we cannot repeat the mistakes of the past. Our deep gratitude goes to the Japanese Cultural Center of Hawai'i, the Japanese American Citizens League and others who worked tirelessly for this achievement. It is meaningful and right that Honouliuli has finally received the historic recognition it deserves."

Senator Schatz worked to help facilitate Honouliuli's historic designation. In 2013, Senator Schatz met with NPS Director Jonathan B. Jarvis to discuss the need to complete the special resource study, which was authorized by Congress in 2009 to review the site for potential inclusion in the National Park System. Following the meeting, Senator Schatz sent Director Jarvis a letter to reiterate his support for the Honouliuli Internment Camp's inclusion in the National Park System.

Last December, Senator Schatz joined Carole Hayashino, the President and Executive Director of the Japanese Cultural Center of Hawai'i, and Jace Mikulanec, President of the Honolulu Japanese American Citizens League, to present Interior Department Secretary Sally Jewell with petitions from more than 6,000 Americans requesting the historic designation of Honouliuli.

In 1943, the Honouliuli Internment Camp was constructed on Oahu to intern citizens, resident aliens, and prisoners of war. The camp held approximately 320 internees and 4,000 prisoners of war. Honouliuli was the largest and longest-used World War II internment camp in Hawai'i.

###

Senator Mazie K. Hirono, Rep. Tulsi Gabbard and Rep. Mark Takai

HIRONO, GABBARD, TAKAI: DESIGNATING HONOULIULI INTERNMENT CAMP AS NATIONAL MONUMENT IS AN IMPORTANT STEP IN PROTECTING HONOULIULI & STORIES OF THOSE WHO WERE DETAINED

Hirono, Gabbard, Takai, Japanese Cultural Center Of Hawaii, Honolulu Japanese American Citizens League Commend President Obama's Designation Of Honouliuli Internment Camp As National Monument

Wednesday, February 18, 2015

Washington, D.C. – Today Senator Mazie Hirono, Rep. Tulsi Gabbard and Rep. Mark Takai commended President Barack Obama’s designation of the Honouliuli Internment Camp site in Kunia, Oahu.

“The detention of more than 1,000 innocent Hawaii civilians during World War II remains a dark chapter in Hawaii and our nation’s history. The stories of those detained at Honouliuli and internment sites like it across the country are sobering reminders of how even leaders of the greatest nation on Earth can succumb to fear and mistrust and perpetuate great injustice,” said Senator Hirono. “The President's executive action is an important step in protecting Honouliuli and the stories of those who were detained in our state and across the nation, highlighting an important but often forgotten piece of our national history. Preserving the site has long been a priority for our Hawaii delegation -- from Senators Inouye and Akaka to our current delegation. I will continue to work closely with the administration, state and local leaders as well as my delegation colleagues to ensure federal resources are delivered for this important project.”

“The designation of the Honouliuli camp as a National Monument serves as a solemn reminder that in our nation’s history bedrock civil rights have been disregarded in times of conflict as a result of unfounded fear and panic,” said Congresswoman Tulsi Gabbard. “Honouliuli was a central piece of the brutal and discriminatory internment system created during World War II; today, the structure remains as a memorial that will educate future generations about the precariousness of freedom in wartime. Mahalo to President Obama and Secretary of the Interior Jewell for recognizing the history of Honouliuli and for making this designation a priority.”

“The internment of Japanese American citizens during World War II is a tragic example of what happens when we allow fear and hatred to take the place of rational and just actions,” said Congressman Mark Takai. “Honouliuli will serve as a place where we will be able to educate the coming generations about the importance of civil liberties for all people. Now more than ever, we must learn from the mistakes of the past, and the designation of Honouliuli as a national monument will give Hawaii a chance to shine light on this serious issue. I would like to extend a warm mahalo to President Obama for taking the initiative to preserve this historically significant piece of land.”

Honouliuli Internment Camp’s designation as a national monument comes after years of hard work and collaborative efforts by the public and private community partners including the Japanese Cultural Center of Hawaii and Honolulu Japanese American Citizens League, who also praised the designation.

“The designation of Honouliuli as a national monument will ensure its future preservation for generations to come. The Japanese Cultural Center of Hawai’i applauds President Obama for recognizing the historic significance of the Honouliuli Internment Camp. We thank the President, Interior Secretary Sally Jewell and our own congressional delegation for helping us protect Honouliuli as a historic site and as a place to teach the lessons of civil rights, the Constitution and U.S. democracy,” said Carole Hayashino, President and Executive Director of the Japanese Cultural Center of Hawaii.

“By using his power under the Antiquities Act to designate Honouliuli as a national park, President Obama honors the thousands of men and women whose civil rights were violated, and is helping to ensure that the Japanese American wartime experience will never be forgotten,” said Jace Mikulanec, President of the Honolulu Japanese American Citizens League.

Senator Daniel K. Inouye included a provision in the Interior Appropriations bill in 2009, requesting the special resource study. A stand-alone bill, (S. 871) the Honouliuli Internment Camp Special Resources

Study Act of 2009, was also introduced by Senator Inouye in the 111th Congress, with then-Congresswoman Hirono introducing the companion bill (H.R. 2079) in the House of Representatives. Senator Daniel Akaka and Congressman Neil Abercrombie were cosponsors of the respective the bills.

The Honouliuli national monument on Oahu permanently protects a site where Japanese American citizens, resident immigrants, and prisoners of war were held captive during World War II. The monument will help tell the story of the internment camp's impact on the Japanese American community and the injustices that occurred there. The Honouliuli Internment Camp was the largest and longest-used confinement site for Japanese and European Americans and resident immigrants in Hawaii, eventually holding 400 civilian internees and 4,000 prisoners of war.

###

Governor David Ige

“President Obama’s action ensures that generations to come will be able to visit the Honouliuli Internment Camp and learn about the experiences of persons of Japanese ancestry who were forced to stay there during the war. The monument will remind all who visit of the terrible injustice these families endured, even while many of their husbands, sons and brothers were fighting for the United States.”

Honolulu Mayor Kirk Caldwell

“The preservation of the Honouliuli Internment Camp as a National Monument is a proud moment for Honolulu, but also a bittersweet one. World War II internment camps are a dark segment of our nation’s history, and the Honouliuli camp still holds memories for Honolulu residents during wartime, life in the camp, and the courage and bravery that internees displayed even as their loyalty to our country was being challenged. It is an important part of history that should always be remembered and learned from, and I want to thank the President for making this possible. As a National Monument, Honouliuli’s significance will be forever honored.”

###

Representative Raúl M. Grijalva (D-AZ.) **NEW**

Natural Resources Ranking Member Grijalva Statement on President Obama’s Designation of Three New National Monuments

Tucson, Ariz. – House Natural Resources Committee Ranking Member Rep. Raúl M. Grijalva (D-Ariz.) released the following statement on today’s presidential designation of three new national monuments.

“Conserving our public lands and recognizing milestones in our nation’s history are among every president’s greatest responsibilities and proudest achievements. President Obama acted in the best spirit of that tradition today when he designated Pullman Historic Chicago District, Browns Canyon, and Honouliuli Internment Camp national monuments.

“Our wide open spaces and our historic sites need just as much protection today as they did the day the Antiquities Act was signed into law in 1906. President Obama, no less than President Roosevelt, understands the great public service presidents perform when they conserve those open spaces and those historic sites for the future. No fewer than nineteen presidents, both Democrats and

Republicans, have used the Antiquities Act to protect the national treasures found on our federal lands, and many more will do so in the future. The American people demand nothing less.

“Despite the best efforts of an anti-conservation congressional majority, the American people still see more than dollars and cents when they look across the prairie, or into the Mountain West, or back into the pages of our shared history. They see the same beauty that our forefathers saw – a beauty that we dare not throw away in the name of today’s bottom line. We cannot sustain an economy based on taking everything, leaving nothing and demanding that taxpayers foot the bill for private profits. I share the American people’s vision of protected landscapes, well-preserved historical sites and monuments, and a thriving federal lands system accessible to every American who comes to enjoy rather than exploit. So does President Obama. Today I’m proud to stand with him in welcoming these additions to our public lands and look forward to hearing the many success stories they have ahead of them.”

###

Representative Rob Bishop (UT-01) NEW

Chairman Bishop Reacts to Obama Administration’s Plans to Unilaterally Proclaim Three New National Monuments

WASHINGTON, D.C., February 18, 2015 - House Committee on Natural Resources Chairman Rob Bishop (UT-01) released the following statement after President Obama announced his intentions to unilaterally proclaim three new national monuments using the Antiquities Act of 1906.

“President Obama has sidelined the American public and bulldozed transparency by proclaiming three new national monuments through executive fiat. The Obama Administration claims these designations have public support, but we know that is a complete stretch of the truth. The cost to taxpayers is anyone’s guess and the impacts upon local communities are unknown. Congress has demonstrated that it can work in a collaborative fashion to fully vet and approve designations that have support from the public and their elected representatives. This White House has shown once again its utter and complete disdain for the public process, Congress, and the communities most impacted by these unilateral, unchecked land designations.”

The President’s designations include Pullman Historic District in Chicago, Illinois, Browns Canyon in Salida, Colorado, and the site of a World War II-era internment camp in Honouliuli, Hawaii, and will be formally announced on Thursday, February 19, 2015.

External Stakeholders

Conservation Lands Foundation

President Obama's Browns Canyon National Monument designation applauded

President's action will expand our National Conservation Lands

Durango, CO (February 18, 2015) – The Conservation Lands Foundation praised the announcement that President Obama would use his authority to permanently protect Browns Canyon in Colorado, along with the Honouliuli Internment Camp in Hawaii and Chicago's historic Pullman neighborhood as national monuments. These national monuments will permanently protect a diversity of lands and waters that honor our country's history and conserve open space important for hunting, fishing and outdoor recreation for future generations.

"Today's action builds on steps the Administration has taken over the last six years to expand access to our public lands for outdoor recreation by permanently protecting areas significant to our nation's rich history and America's outdoor heritage," said **Ryan Bidwell, Campaign Director with the Conservation Lands Foundation**. "There are places among America's public lands that represent vital parts of our country's history, and places that provide opportunities for our kids and grandkids to explore and experience the outdoors."

Browns Canyon, located two hours from Denver, Colorado will become part of our nation's National Conservation Lands. The national monument will protect wildlife habitat and attract new generations of visitors to enjoy the hunting, fishing and whitewater rafting that define Colorado's outdoor lifestyle. The rugged granite cliffs and backcountry provide high quality wildlife habitat for a variety of birds and animals including golden eagles, bighorn sheep and elk.

The stretch of the Arkansas River that runs through Browns Canyon is an outstanding wild trout fishery as well as one of the most popular whitewater rafting destinations in the country. Commercial rafting on the Arkansas River which runs through Browns Canyon brings in \$60 million to the local economy. The permanent protection of this area will support the economic vitality of the region, supporting local businesses, river outfitters and surrounding communities.

For more than 10 years, efforts to protect Browns Canyon have been championed by members of both political parties. The designation is based on recent legislation developed as result of extensive community involvement, including public meetings and thousands of public comments.

Honouliuli and Pullman both represent distinct and important aspects of our country's history. The Honouliuli Internment Camp, located on the island of O'ahu was Hawai'i's largest and longest operating World War II prison camp. Nearly 4,000 individuals were incarcerated there solely on the basis of ancestry or country of origin.

Chicago's historic Pullman neighborhood is closely linked to the history of the American labor movement. Pullman was the site of one of the bloodiest labor battles in American history – the Pullman Strike of 1894 –in which many workers were wounded or lost their lives at the hands of federal and

state troops. Shortly after the deadly strike, Congress passed legislation creating a national Labor Day holiday.

With each of these designations, there was strong recognition among elected officials, local business, veterans, sportsmen, youth groups and Hispanic, African American and Japanese American leaders that some places are so important to our shared culture and heritage that they deserve to be protected for all time.

“These monument designations protect important historic and natural sites. They are a profound way to recognize our diverse national mosaic by honoring our American heritage and broadening public appeal to our public lands to an increasingly diverse American public,” stated said **Brian O’Donnell, Executive Director of the Conservation Lands Foundation**. “We look forward to President Obama’s continued leadership in protecting our nation’s most significant natural treasures, and protecting the laws that have allowed sixteen Presidents—eight from each party—to enact these important protections when Congress is unable to do so.”

###

Creation Justice Ministries

The Antiquities Act Used To Create Three National Monuments

Diverse Faith Community Applauds Diversity of Protected Places

Washington, DC – President Obama is set to designate three new national monuments Thursday, and Christian communities are applauding this act of stewardship. Pullman in Chicago, Browns Canyon in Colorado, and Honouliuli in Hawaii, will all be protected as monuments upon the President’s announcement in Chicago.

“Pullman Historic Site in Chicago is home to the first African American union in the country,” stated Tricia Bruckbauer, Program Director for Creation Justice Ministries. “As a Christian community that represents the stewardship policies of many historically African American churches, we are pleased with the President’s use of the Antiquities Act to preserve important stories of all Americans.”

Browns Canyon is widely lauded for its trout fishing and outdoor recreation and provides a vital habitat for many of God’s creatures. Honouliuli is the site of a World War II internment camp, and will be preserved as an important reminder of American struggles with civil liberties in times of conflict.

“As Americans, we have a stewardship tool that is able to preserve wonderful pieces of God’s creation as well as important artifacts of history and stories of our diverse nation,” Bruckbauer continued. “The Antiquities Act has been a blessing to many communities looking to safeguard their national treasures for future generations and for the benefit of Americans everywhere. We look forward to working with decision-makers to protect more of the places in which we pray and play.”

The Antiquities Act was established by President Theodore Roosevelt in 1906 and has been used to protect places that are significant naturally, historically, or culturally. It has been used by 16 presidents.

###

The Japanese Cultural Center of Hawai'i (JCCH) and The Japanese American Citizens League

Japanese American Leaders Applaud Announcement that Former Honouliuli Internment Camp will become a National Monument

Announcement comes on the 73rd anniversary of the executive order enabling mass internment of Americans

Honolulu, HI – Today, leading Japanese American organizations praised the news that President Obama intends to designate the former Honouliuli Internment Camp site on O'ahu as a national monument, ensuring its future preservation. Opened on March 1, 1943, Honouliuli was the longest operating and largest World War II internment and POW camp in Hawai'i. Built on 160 acres in west O'ahu, the camp site was hidden from view in a deep gulch that the internees called *jigoku dani*, or "hell valley." Honouliuli Internment Camp was constructed on O'ahu to intern citizens, resident aliens, and prisoners of war. The camp held approximately 320 internees, mostly second-generation Japanese Americans but also Japanese, German and Italian permanent residents who were living in Hawai'i. Honouliuli was also the largest prisoner of war camp in Hawai'i, incarcerating nearly 4,000 individuals. In total, during World War II, over 2,300 Japanese American men and women from Hawai'i were incarcerated, including many prominent community leaders, teachers, journalists, religious leaders, local politicians and World War I veterans.

"As a new national monument, Honouliuli will be a great gift to our state and nation. On behalf of the Japanese American internees and their families, I want to thank President Obama for vindicating the honor of those who were incarcerated and for recognizing the historic site as a lesson in injustice and forgiveness for all Americans and for future generations," said **Carole Hayashino, the President and Executive Director of the Japanese Cultural Center of Hawai'i**.

Support for the coming designation grew over the spring and summer, when the National Park Service held a series of community meetings throughout Hawai'i to present their initial findings of a federally-funded study of the site, and invited attendees to offer comments and ask questions.

In December, Hayashino, Jace Mikulanec, President of the Honolulu Chapter of the Japanese American Citizens League, and Hawai'i's congressional leaders including U.S. Senator Brian Schatz [presented](#) petitions to Interior Department Secretary Sally Jewell with signatures of more than 6,000 Americans supporting the inclusion of the Honouliuli Internment Camp in the national park system.

The Japanese Cultural Center of Hawai'i (JCCH) is a non-profit organization that strives to share the history, heritage and culture of the Japanese American experience in Hawai'i. The JCCH has researched and documented the internment of Japanese Americans in Hawai'i since 1998 and rediscovered the

location of Honouliuli in 2002. For more information, please contact Denise Park at park@jcch.com or visit www.jcch.com.

The Japanese American Citizens League is the nation's oldest and largest Asian American civil rights organization and was established to challenge racism and bigotry directed against Japanese Americans. Discrimination and intolerance remain the focus of the JACL today and extends to the greater Asian American community and others who are victimized by injustice and prejudice. For more information, please visit www.jaclhonolulu.org.

###

League of Conservation Voters

LCV Statement on Reports that President Obama Will Create Three New National Monuments

WASHINGTON, DC – League of Conservation Voters (LCV) President Gene Karpinski released this statement on reports that President Obama will protect Chicago's Pullman Historic District, Hawaii's Honouliuli Internment Camp, and Colorado's Browns Canyon as national monuments:

"We are thrilled that the president continues to take steps to protect America's treasured historic, cultural and natural resources for future generations. The designation of Hawaii's Honouliuli Internment Camp and Chicago's Pullman Historic District add to the president's strong record of ensuring that our parks and monuments tell the stories of our increasingly diverse nation. And after over a decade of local support, the new Browns Canyon National Monument will bolster Colorado's outdoor recreation economy for years to come. President Obama continues to take bold steps to protect America's special places and we can't wait to see what's next."

<http://www.lcv.org/media/press-releases/LCV-Statement-on-Reports-that-President-Obama-Will-Create-Three-New-National-Monuments.html>

###

National Parks Conservation Association

Telling Our Stories: President Obama Designates Honouliuli National Monument in Hawai'i

Statement by Ron Sundergill, Pacific Region Senior Director, National Parks Conservation Association

"On behalf of our more than one million members and supporters across the country, the National Parks Conservation Association (NPCA) thanks President Obama for announcing his plans today to designate the Honouliuli National Monument as a new national park site."

"As our country's premiere storyteller and leader in historic preservation, the National Park Service helps millions of Americans and international visitors understand our country's history – both our brightest moments and those like Honouliuli Gulch, with a troubled past for its role as a World War II internment camp. With today's announcement of the Honouliuli National Monument, the National Park

Service will at long last have the opportunity to protect the site's resources as well as share its significance with local and international visitors."

"NPCA has long-supported efforts to share this important piece of our American story within the National Park Service. Last summer, in response to the park service's study of the site, thousands of NPCA supporters joined us in voicing support for preserving Honouliuli under National Park Service management. We are proud to see our support for this national park idea become reality."

"As the National Park Service approaches its centennial celebration in 2016, designation of the Honouliuli National Monument takes our country's 'best idea' a step closer to telling the full story of our shared history."

Background:

Located on the island of Oahu, the Honouliuli internment camp was one of five internment camps in Hawai'i used during World War II. The Honouliuli Internment Camp opened in 1943 and was the last, largest, and longest-used World War II confinement site in Hawaii. The Honouliuli internment camp was one of 10 camps where Japanese American citizens and resident Japanese aliens were interned during World War II.

<http://www.npca.org/news/media-center/press-releases/2015/telling-our-stories.html>

National Trust for Historic Preservation

National Trust Applauds President Obama's Designation of Hawaii's Honouliuli Internment Camp as a National Monument

Washington (February 18, 2015) –The National Trust for Historic Preservation commends President Obama's designation of Hawaii's Honouliuli Internment Camp as a National Monument. The following is a statement from Stephanie Meeks, president and chief executive officer of the National Trust for Historic Preservation.

"As the place where over 300 people, including Japanese-Americans, Japanese, German and Italian Nationals, were incarcerated during World War II, Honouliuli is an enduring reminder of our nation's complex history associated with civil rights," said Stephanie Meeks, president and CEO of the National Trust for Historic Preservation. "President Obama's designation of this hallowed ground will ensure that these important lessons will be accessible to a wider audience of visitors."

In 2007, the National Trust provided a grant to the Japanese Cultural Center of Hawai'i to help conduct an archaeological survey of the 122.5 acre Honouliuli Gulch site. The survey documented 130 features related to the incarceration of American civilians, legal resident aliens and prisoners of war at Honouliuli. The results of the survey were used to prepare the successful nomination and inclusion of Honouliuli Internment Camp to the National Register of Historic Places in February 2012.

The Honouliuli camp opened in 1943 and was the last, largest and longest-used World War II confinement site in Hawai'i. It housed nearly 4,000 individuals including 320 Japanese-Americans, Japanese, German and Italian Nationals. Unlike the internment of Japanese-Americans and Japanese on the American mainland, which was authorized by Executive Order 9066, the internment of American civilians in Hawai'i was authorized by martial law. Now that Honouliuli has been named a unit of the National Park Service, the history of this camp will be accessible to a wider audience of visitors.

Natural Resources Defense Council (NRDC)

Praising Pullman: NRDC Supports New National Monument Designations

CHICAGO (February 18, 2015) – President Obama will be in Chicago tomorrow to sign an order designating the city's Pullman District as a national monument. He is also expected to announce two other new monuments, Browns Canyon in Colorado and Hawaii's Honouliuli Internment Camp.

Following is reaction from NRDC Executive Director Peter Lehner:

"The rich history of the Pullman District makes for a significant national monument; memorializing a moment in history that remains rich with meaning around race relations, the labor movement, technological innovation and urban planning. The Pullman story represents the struggle for a better life and should be preserved for generations to come.

"We appreciate the President's continued investment in developing national monuments that memorialize not only our most important wild places, but also essential historical sites that illuminate the American experience. Certainly Pullman, Brown's Canyon in Colorado and the Honouliuli Internment Camp site in Hawaii represent the amazingly diverse breadth of special places that require protection and interpretation."

NRDC Midwest Director Henry Henderson blogged on the importance of the Pullman District national monument designation at

http://switchboard.nrdc.org/blogs/hhenderson/pullman_national_monument_a_re.html

###

Sierra Club

Wednesday, February 18, 2015

Sierra Club Praises National Monument Designations

WASHINGTON, D.C.-- President Obama Thursday is expected to designate three new national monuments-- Pullman Historic Site in Illinois, birthplace of the first African-American union in America; Honouliuli Internment Camp in Hawai'i, the largest prisoner-of-war camp and longest-used World War II internment camp in Hawai'i; and Browns Canyon in Colorado, a premier trout fishing and outdoor recreation destination.

In expectation, Sierra Club Executive Director Michael Brune issued the following statement.

"We applaud President Obama for taking steps to expand our nation's outdoor heritage by ensuring our public lands and national monuments tell the full story of the country's rich cultural and natural history.

"These monuments embody the span of historic, cultural, and natural wonders that make up our nation's outdoor legacy. President Obama's action is both recognition of their importance and assurance that they will remain as places of remembrance, historic contributions, and inspiration for our children.

"It's heartening to see President Obama once again help local communities protect valuable pieces of America. We look forward to more progress in making America's public lands better serve the diversity and interests of the American people."

###

The Wilderness Society

The Wilderness Society Statement on the Creation of Browns Canyon, Honouliuli and Pullman National Monuments

Antiquities Act preserves a storied neighborhood, World War II internment site and a premier river canyon

WASHINGTON, D.C. (February 18, 2015) — The Wilderness Society issued the following statement today regarding President Obama's plans this week to designate Browns Canyon National Monument in Colorado, Honouliuli National Monument in Hawaii and Pullman National Monument in Chicago.

"These proclamations remind us that the spaces commemorating our nation's heritage come in a rich variety of shapes and sizes," said **Matt Keller, national monuments campaign director with The Wilderness Society**. "They include sites where people stood up for their rights for freedom and fair wages, places where thousands experienced the injustices of war, and landscapes that provide habitat for wildlife and heart-stopping adventure on whitewater rivers. We are proud of the Administration for listening to local communities and using the Antiquities Act to preserve these irreplaceable sites for all Americans to visit."

Browns Canyon is a scenic 22,000-acre stretch of public lands along the Arkansas River in Chaffee County, between Buena Vista and Salida, Colorado. These lands are managed by the U.S. Forest Service and Bureau of Land Management. The Wilderness Society has been working to protect the natural values of the Browns Canyon landscape since the early 1970s.

The Honouliuli camp on the island of O'ahu was the last, largest and longest operating internment camp during World War II. By acknowledging past injustices, this site honors the experiences of those interned and allows us to enlighten future generations.

The historic Pullman district in Chicago honors a unique, shared legacy that is integrally connected to the push for fair labor conditions and civil rights. The community represents the first model industrial town in America.

President Theodore Roosevelt pushed for passage of the Antiquities Act, which has since been used by 16 presidents – eight Republicans and eight Democrats – to protect many of America's most treasured places from Alaska to the Florida Keys, including the Grand Canyon, Acadia, Muir Woods, Grand Teton and Olympic national parks.

For more on the history and bipartisan use of the Antiquities Act, click [here](#).

###

Japanese American Citizens League (JACL) NEW

JACL Applauds the Inclusion of Honouliuli into the National Park System

Washington D.C. – The Japanese American Citizens League (JACL) applauds [President Barack Obama's designation of Honouliuli as a National Historic Monument](#). The site, located in a gulch in central Oahu, was used during World War II to imprison Japanese community leaders and their families. The monument will preserve a forgotten but important part of American history about the treatment of thousands of Americans living in Hawaii.

"I am delighted to learn that the Honouliuli incarceration site has been added to the National Park System as a National Historic Monument. We are grateful to the National Park Service for recognizing the significance of the site as a component of World War II and as the site related to the forcible imprisonment of Japanese and other Americans. As the longest operating World War II Japanese American confinement site in Hawaii, Honouliuli represents a unique chapter in American history and a very important lesson in civil liberties and the U.S. Constitution. This inclusion in the National Park System will ensure that the story of what happened to Japanese Americans during World War II will continue to be told and remembered," said JACL National President David Lin.

"Today, the President opened the windows so healing winds can blow on a place that was once called 'hell valley.' Years ago, droves of innocent men were rounded up and placed in prison centers by the military because they were Japanese priests, teachers, and community leaders. Their incarceration remained a secret because of the unwarranted shame they bore for a crime they did not commit. On the

73rd anniversary of the signing of the Executive Order authorizing the internment, the government has acknowledged this story by creating a learning place where discussions about tolerance and diversity can be elevated,” stated JACL Executive Director Priscilla Ouchida.

Located approximately 25 miles northwest of Honolulu, Honouliuli is the site of the largest and longest used World War II confinement site in Hawaii. Those of Japanese ancestry made up over a third of the population of Hawaii in 1941. In contrast to the mass incarceration taking place on the mainland, Japanese American community leaders and those with close cultural or economic ties to Japan were selectively targeted and detained throughout Hawaii.

The detentions began immediately following the strike on Pearl Harbor, with estimates of over 350 Issei and Nisei being arrested in the first 48 hours following the attack, and over 2,200 imprisoned by the end of the war. These people were detained at a number of sites across the Hawaiian Islands, with Honouliuli becoming the largest.

Honouliuli was opened in March of 1943 to hold U.S. Citizens and resident aliens of Japanese, German, and Italian descent, as well as Japanese prisoners of war. The area housed over 150 buildings, guard towers, and tents on the 160 acre site, in addition to approximately 320 internees. Many of these people were detained for the duration of the war – a period of more than 3 years – and none were ever charged with a crime.

Honouliuli was closed in 1946 following the last of the prisoner of war repatriations and the site was sold as farmland. The site and its history were largely forgotten until the Japanese Cultural Center of Hawaii (JCCH) began to research and document Honouliuli’s history in the 1990’s, leading to the re-discovery of the site in 2002. Since then, a number of organizations, including the JACL Honolulu Chapter, JCCH, the University of Hawaii, and Monsanto Hawaii, have worked to preserve and interpret the site in an effort to educate the public about a largely unknown chapter of Hawaiian and American history.

In 2009, Congress authorized the National Park Service to conduct a special resource study to review Honouliuli for possible inclusion to the National Park System. In 2011, JACL passed a national resolution supporting these efforts and began meeting with members of Congress and other government officials to inform them of the historic and cultural significance of the site and to garner their support for National Park status. In December 2014, a group of staffers from the JCCH and Honolulu JACL visited officials in Washington D.C. to deliver petitions with over 6,000 signatures supporting the inclusion of Honouliuli into the National Park System.

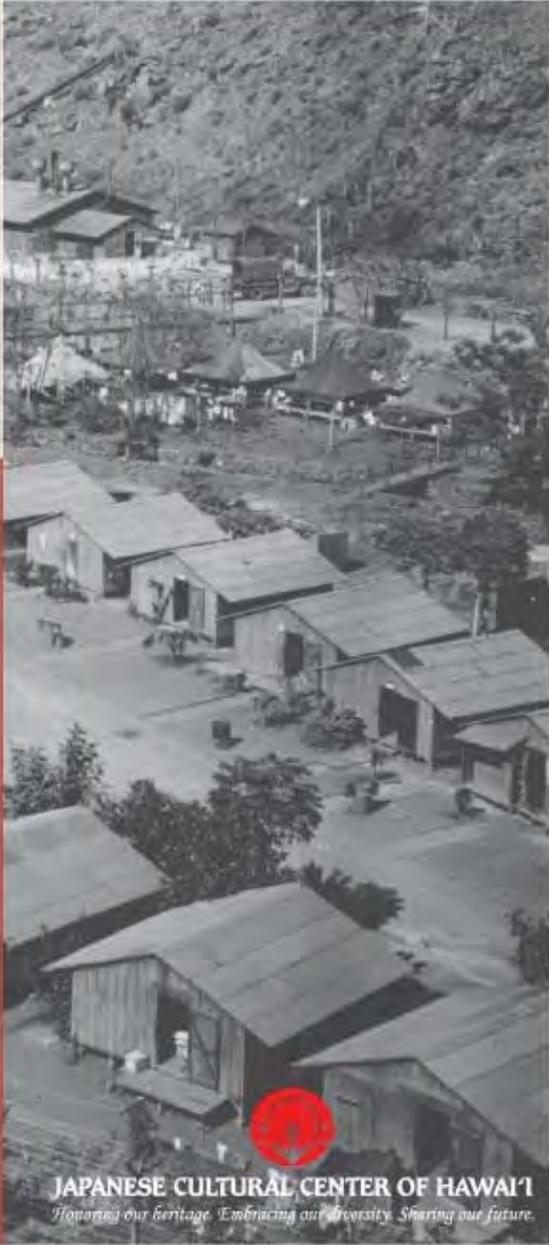

JACL is dedicated to securing the civil and human rights of all Americans and preserving the historical and cultural legacy of the Japanese American community. The preservation and interpretation of the Japanese American World War II confinement sites ensures that their important and distinct place in American history will continue to educate future generations against repeating injustices of the past.

Every Kid in a Park

External Stakeholders

National Wild Turkey Federation - George Thornton, CEO NEW

"There are so many distractions in our world today stealing the attention of our youth, but we [the NWTf] have a duty to our communities to provide options to help get kids outdoors. We are proud to play a key role in promoting outdoor activities to our youth as they are the generation that we will rely on to help save the future of our wildlife and habitat."

###

Natural Resources Defense Council - Robert Friedman, Campaigner NEW

"This program couldn't come at a more important time, especially as technology is driving more and more young people indoors, away from the opportunities presented by the natural world. Think of all of these 4th graders seeing the Grand Canyon for the first time, or crocodiles in the Everglades or Half Dome in Yosemite, and the sense of wonder they will feel by seeing such natural magnificence. These experiences will show them what is at stake in our fight to preserve these amazing places, and will make them advocates for a more just and more sustainable future. Every Kid in a Park has the potential to change the landscape of activism in this country in a moment it is desperately needed."

###

American Hiking Society - Gregory Miller, President NEW

"So many children are spending more time indoors these days, often in front of screens, and if we don't act, there will be severe consequences as they become adults. Getting kids outside will help improve health outcomes, academic success, and also ensure that America's public lands will still have champions when their generation becomes the stewards of these incredible parks and forests."

###

The Audubon Society - Mike Daulton, VP for Government Relations NEW

"Children and families are inspired by the natural world, and that inspiration has lifelong benefits. We all need clean water, clean air, and healthy natural spaces. Getting kids and families into nature illuminates the connections we share with each other and with the great outdoors. A new generation of conservationists is waiting to emerge as they discover birds, other wildlife, and America's great natural resources. We're glad the White House agrees, and we support this new initiative."

###

Children & Nature Network - Richard Louv, Co-Founder NEW

“The President's announcement and new initiative may well be a turning point. The initiative will help support the people who have worked so hard, many of them for decades, to connect children to nature. It will encourage new actions by local government, education, religious organizations, the health care professions, and, crucially, by our business communities. The greatest change must happen beyond government, in the daily decisions that all of us, as individuals and members of families, take in our daily lives. Ultimately, only we can make sure that every child receives the gifts of the natural world.”

###

The Student Conservation Association NEW

“The Student Conservation Association applauds this commitment to connect more young people with our national parks. As the national leader in youth conservation service, SCA has proven that exposure to the great outdoors has a transformative impact on young people, instilling lifelong conservation values and creating healthier, happier kids.”

###

Wilderness Inquiry NEW

“Wilderness Inquiry is thrilled to support this innovative new program that facilitates full participation in nature. Outdoor exploration is a birthright all children share, regardless of any perceived physical, cultural, or socio-economic barriers. We will continue to do our part to connect thousands of children and their families to educational and inspirational adventures in our national parks, forests, and wilderness areas. Many of our partners including National Park Service, US Forest Service, Department of the Interior, and the Outdoors Alliance for Kids also support this effort, and we will work with them to get Every Kid in a Park!”

###

HECHO NEW

HECHO Statement on President’s Kids in Parks Initiative

Las Vegas, NM – Hispanics Enjoying Camping, Hunting, and the Outdoors (HECHO) Outreach Coordinator Max Trujillo released this statement on the President’s new Kid in a Park initiative:

“Latino families and our communities have been using and enjoying America's public lands for generations. Increasing access to healthy watersheds, clean air, robust wildlife habitats, and open spaces for our nation’s 4th-graders and their families would truly benefit our nation’s young Latinos by providing opportunities to connect with and learn about their cultural past and traditional uses of the land. Ensuring that our young Latinos are able to experience and understand this nation’s public lands heritage will be an invaluable asset for us all.”

###

The City Project NEW

President Obama Every Kid in a Park, Transit to Trails, Honouliuli, Pullman, Browns Canyon National Monuments

Since President Barack Obama designated the San Gabriel Mountains Monument in October 2014, the White House has demonstrated a renewed commitment to [environmental and green justice](#).

Every child has the right to the simple joy of playing in the park. Under President Obama’s Every Kid in a Park initiative, the National Park Service will give all fourth graders and their families free admission to national parks and other federal lands for a full year. The President also designated new national monuments.

President Obama recognizes that too many children, especially children of color, don’t have access to parks where they can play, breathe fresh air, experience nature, and learn about their environment. This is an issue of social justice, health, and economic vitality for all. It’s not enough to have awesome natural wonders. You have to be able to access them. Green justice is about working with communities to open up parks and our heritage to everybody — young and old, Latino, Asian, Native American, black, white — to make sure everybody can enjoy these rights. Every Kid in a Park will award transportation grants for school children to visit parks, public lands and waters, focusing on schools with the greatest need.

Transit to Trails provides opportunities for park-poor, income-poor communities to learn about water, land, wildlife and cultural history, and engage in healthy physical activity. Transit to Trails increases access to national parks, monuments, and other park lands. Underserved communities lack close-to-home green space, monuments, transportation, and opportunities to reach recreation and natural resources. [Transit to Trails is a best practice to get people to the parks now, and prepare young people to be the stewards of our natural heritage tomorrow. Transit to Trails helps reduce traffic congestion and parking problems, improve air quality, and reduce polluted water run-off into rivers and the ocean by providing accessible public transportation.](#) President Obama agrees with the National Park Service, the California Parks Forward Commission, the Southern California Association of Governments (SCAG), and the US Army Corps of Engineers on transit: The Transit to Trails program by Anahuak Youth Sports Association, The City Project, and Mountains Recreation and Conservation Authority (MRCA) is a best practice for taking inner city youth and their families and friends on fun, educational, and healthy park, river, beach, and mountain trips.

Secretary of the Interior Sally Jewell with children from Anahuak Youth Sports Association and The City Project

We celebrate President Obama designating three new monuments that honor the diverse history of our nation, and promote access to healthy, outdoor recreation for all: Honouliuli, Pullman, and the Browns Canyon landscape and river corridor.

Honouliuli commemorates the fragility of civil rights, and the incarceration of innocent Japanese Americans for three years during World War II. The designation on February 19 comes 73 years to the day after President Franklin D. Roosevelt signed executive order 9066. The order authorized the evacuation of over 100,000 men, women, and children of Japanese ancestry, including U.S. citizens, to isolated, fenced, and guarded internment camps. The United States Supreme Court upheld this intentional discrimination against Japanese Americans in *Korematsu v United States*. A federal district court threw out Fred Korematsu's conviction 40 years later, concluding that ["today the decision in *Korematsu* lies overruled in the court of history."](#)

Pullman, on Chicago's Far South Side, honors the formation of the first African-American labor union, development of the first "company town," and the role of railroads in the nation's industrial past.

Honouliuli and Pullman, like Manzanar National Monument, are best practice examples to [celebrate the nation's diversity faithfully, completely, and accurately, and to stimulate and provoke a greater understanding of, and dialogue on, civil rights, democracy, and freedom.](#)

The City Project has been working for 15 years to broaden access to parks and open space for inner-city residents and to fight childhood obesity by guaranteeing that students get enough physical education. We are profoundly grateful to President Barack Obama and the National Park Service for Kid in a Park, and for diversifying national monuments.

—Robert García, Founding Director and Counsel, The City Project

###

Outdoor Industry Association

President's Announcement on "Every Kid in a Park" and New National Monument Designations Support Outdoor Recreation Economy

Boulder, Colo., February 19, 2015 – Outdoor Industry Association® (OIA) applauds President Barack Obama's announcement today promoting the new "Every Kid in a Park" initiative, which recognizes the importance of ensuring that every fourth grader in America spends time outdoors. This announcement comes in advance of the National Park Service Centennial, which will be celebrated in 2016, inspiring people from around the world to visit what has been called America's "best idea," our national parks.

OIA, the Outdoor Foundation and our member companies have been working hard to share our love of the outdoors with the next generation. America's youth are now spending less time outside than ever before, averaging seven hours in front of a screen, but only minutes of outdoor play per day.

We are thrilled by the president's call to action that will provide meaningful outdoor experiences – from the backyard to the backcountry – for our next generation. With resources behind "Every Kid in a Park," including free admission on federal lands for all fourth graders and their families for the next year, as well as transportation funding to national parks for fourth graders in Title 1 schools, the outdoor industry is eager to support this endeavor.

"We are all born with the innate desire to explore the outdoors. For the millions of professionals in the outdoor industry, it's what has shaped our careers. We know that outdoor recreation creates healthy lifestyles, thriving communities and a strong economy, but for those of us in the outdoor industry, it is also a business imperative," said Steve Barker, Interim Executive Director of OIA. "We accept the president's challenge to help future generations flourish by getting every fourth grader outside in celebration of the Centennial. I personally helped establish a conservancy in California that helps 500 fourth-graders annually to discover science through outdoor activity. From the Escondido Creek Conservancy in San Diego to Fortune 500 companies in the outdoor industry, we applaud the president for making our children's interaction with the outdoors a national priority."

In addition to this announcement, the president also dedicated our country's newest national monuments - Browns Canyon in Colorado, one of the best whitewater rafting and angler destinations in the country; a plot of land in Oahu, Hawaii, where Japanese-Americans were held in the Honouliuli Internment Camp; and the Pullman Historic District in Chicago, birthplace of the first African-American labor union.

Known for its excellent recreation opportunities including hiking, fishing, kayaking, hunting, and rafting, the Browns Canyon monument designation will include protections for existing access and water rights to the Arkansas River. The Colorado River Outfitters Association (CROA) estimates a \$60 million annual contribution to the local economy via commercial rafting on the Arkansas River. Most recently, former Senator Mark Udall and Senator Michael Bennet worked hard to pass legislation that would have

preserved Browns Canyon for its multiple benefits including boosting the local recreation economy. Although the legislation failed to move in the Senate, both were instrumental in helping with today's designation.

OIA and the outdoor industry look forward to working with Congress and the Obama administration to help implement the president's vision for outdoor recreation and for the opportunity to highlight the importance of the outdoors throughout the nation. We hope all Americans will join us in exploring these newly protected parks and monuments, as well as other parks, forests, rivers and urban green spaces, in the coming year. Better yet – bring a young person so they too can grow up enjoying what we know as America's Great Outdoors.

###

OAK Praises "Every Kid in a Park" Initiative

President Obama to get 4th graders across America outdoors

Washington, DC—President Obama today announced a major new effort to connect children with parks and public lands. The "Every Kid in a Park" initiative will open the doors for fourth graders and their families to visit America's outdoor treasures and historic sites where they'll have opportunities to play, laugh, learn and get active in nature.

For many children, spending time outdoors isn't always easy or safe. Today's youth spend 50 per cent less time outdoors in natural settings than the generation that preceded them. Park deserts, a lack of transportation, stranger danger, screen time and overscheduled families are all factors contributing to an increasingly indoor and sedentary American lifestyle. Lack of physical activity is a factor in the rising rates of childhood type II diabetes, poor cardiovascular health, and obesity. The President's initiative will begin to break down some of these barriers and ensure that kids across America have the opportunity to visit one of our national treasures.

In response to the President's initiative, members of the Outdoors Alliance for Kids issued the following statements:

"Every child deserves the opportunity to get outside, regardless of where they live. We welcome the President's commitment to connect more children with America's public lands and look forward to helping make his vision a reality as part of our ongoing work to make sure everyone has a chance to experience the wonder of nature." - **Michael Brune, Executive Director, Sierra Club**

"President Obama's announcement of the Every Kid in a Park initiative supports our work to advance opportunities for children, youth and families to experience and learn from the outdoors. At The North Face, we believe that consistent and frequent exposure to the outdoors early in a child's life is not only great for their physical health, but is vital in developing character, confidence, a sense of adventure and respect for the environment into adulthood. Together with the Outdoors Alliance for Kids and the Every Kid in a Park initiative, we can help every child enjoy our parks and public lands. We're glad the

importance of this issue has been escalated by President Obama in national interest.” - **Todd Spaletto, President, The North Face**

“We enthusiastically support the White House initiative to connect all 4th graders to our public lands. Connecting children to nature is critically important to their health and well-being, and to the future of our public lands. We commend the efforts within this initiative to provide transportation support, one of the factors limiting too many children's opportunities to benefit from nature in their everyday lives.” - **Sarah Milligan-Toffler, Executive Director, Children & Nature Network**

“Connecting every fourth grader with a chance to learn about and explore America’s public lands will improve health, well-being, and academic achievement. Children at that pivotal age are combining their love of nature with the budding wisdom to become future outdoor enthusiasts and public land stewards.”

"This is a bold challenge by the President to America’s parents, educators and child care providers to give America’s 4th graders, year after year, an opportunity to experience our national parks, forests and refuges, we can see a future in which public lands and wildlife are a part of every child’s life experience."

- **Collin O’Mara President and CEO, National Wildlife Federation**

“The need to connect children to nature and outdoor recreation has never been more critical. Helping children and families become active on America’s public lands is itself an important goal. It is also the first step in raising awareness about the value of conserving our nation’s natural resources.” - **Scott Kovarovics, Executive Director, Izaak Walton League of America**

“The National Recreation and Park Association applauds the Obama Administration for their efforts to connect every fourth grader to a park in 2015. Our members stand ready to welcome young students in communities across the country to explore the many close-to-home public parks and recreation opportunities, and encourage all children regardless of age, race or background to discover all of our nations parks!” - **Barbara Tulipane, President and CEO, National Recreation and Park Association**

"We applaud the Administration's commitment to the health of American citizens and the health of the American landscape through this initiative, which builds on the work already initiated through support for the 21st Century Conservation Service Corps." - **Harry Bruell, Chair, Public Land's Service Coalition**

“Outdoor experiences are an essential element in Girl Scouts and provide opportunities for girls to discover, connect, and take action out-of-doors in ways that build courage, confidence, and character. According to our research, through an outdoor experience in Girl Scouts, nearly three-quarters of girls improved a skill, and half helped other girls do an outdoor activity. These experiences increase girls’ understanding and curiosity about the natural world, and shape girl leaders who are conscientious with regard to the world around them.” - **Anna Maria Chàvez, CEO, Girl Scouts of the USA**

###

National Wildlife Foundation

Collin O'Mara in response to President Obama's announcement of a new goal to have every 4th grader in America visit a public land park, forest or refuge:

"We can see a future in which public lands and wildlife are a part of every child's life experience."

Boy at OverlookThe National Wildlife Federation and its 49 state affiliated organizations enthusiastically support the goal put forth by President Obama today to have every 4th grader in America visit a public land park, forest or wildlife refuge in the coming year. Our public lands are an important part of the American story and children receive immense benefit from learning about and directly experiencing nature, wildlife, the outdoors and public land areas.

The need for such a goal has never been higher as America's children now spend so much of their time staying indoors staring at the screens of electronic devices, watching television and playing electronic games. Research shows that the average child today spends a daily eight hours connected to such devices and spends a small fraction of their time engaged in outdoor play and nature study. This results in a lost affinity for nature, our public lands and this unique aspect of American heritage.

"This is a bold challenge by the President to America's parents, educators and child care providers to give America's 4th graders, year after year, an opportunity to experience our national parks, forests and refuges," says Collin O'Mara, NWF's President and CEO, "we can see a future in which public lands and wildlife are a part of every child's life experience."

The National Wildlife Federation provides programming to one third of all of America's 4th graders through its Ranger Rick publications, its Eco Schools USA and Schoolyard Wildlife Habitats, parent education programs and partnerships with park and wildlife agencies—all of which will directly support the President's new goal.

The National Wildlife Federation working with its partner organizations, the Outdoor Alliance for Kids, the National Recreation and Park Association, the American Recreation Coalition, the Federal Interagency Council for Outdoor Recreation (FICOR), and our 49 state and territorial affiliates has developed nature and outdoor programs that offer 5 million children opportunities for weekly and daily nature play. Having this new presidential goal of planning for every fourth grader in America to visit a public land park, forest or refuge will support and expand on our success in reconnecting kids and families with nature and will help children at an impressionable age to actually experience some of our most beautiful and compelling natural and scenic places.

<http://www.nwf.org/News-and-Magazines/Media-Center/News-by-Topic/Get-Outside/2015/02-19-15-Collin-OMara-in-response-to-President-announcement-to-have-every-4th-grader-in-America.aspx>

###

Brian O'Donnell, Executive Director of the Conservation Lands Foundation

"The sense of wonder and discovery is never more visible in my daughter's eyes than when she is outside experiencing nature," O'Donnell said. "Nature is the best teacher, and our parks provide an ideal classroom for learning and inspiration. This is a fantastic initiative that will have lasting benefits for America's children." – WaPo Story: <http://www.washingtonpost.com/news/energy-environment/wp/2015/02/19/obama-launches-every-kid-in-a-park-initiative/>

RENEWABLE ENERGY:

EPA, industry assail development plan for vast swath of Calif. desert

Scott Streater, E&E reporter

Published: Friday, February 27, 2015

The Bureau of Land Management has received at least 12,000 public comments on a sweeping renewable energy development plan for millions of acres of Southern California desert, including notable critiques from the renewable industry and U.S. EPA.

The public comment period ended this week for the multi-volume, 8,000-page draft Desert Renewable Energy Conservation Plan (DRECP) designed to guide development across 22.5 million acres of public and private lands in the Mojave and Colorado deserts.

The [draft plan](#) unveiled last fall by Interior Secretary Sally Jewell calls for establishing 2 million acres of "development focus areas" within the planning area where utility-scale renewables development or transmission line projects would be deemed suitable.

The plan would also establish conservation and recreation designations across an additional 8.5 million acres of federal land where BLM wouldn't accept applications, except for some geothermal activity in the recreation areas as long as there is no surface occupancy ([E&ENews PM](#), Sept. 23, 2014).

The plan's goal evaluated in a draft environmental impact statement/environmental impact report (EIS/EIR) is to guide renewables development over the next three decades to suitable spots where solar, wind and geothermal resources are plentiful but natural resource values are low. The goal remains to issue a final plan by the end of the year, said Dana Wilson, a BLM spokeswoman in Sacramento, Calif.

But according to public comments on the draft plan -- developed by BLM, the Fish and Wildlife Service, the California Energy Commission, and the California Department of Fish and Wildlife -- it needs a lot of work.

While many comments submitted over the last four months commend the Obama administration's efforts to properly site renewables projects, they also raise serious concerns about impacts to air quality, sensitive wildlife habitat and migratory birds.

Some of the most pointed criticisms come from EPA, which gave the draft EIS/EIR a low rating, citing "concerns regarding a range of issues" that include potential air quality impacts due to fugitive dust emissions creating particulate pollution, wrote Kathleen Martyn Goforth, Environmental Review Office manager for EPA Region 9 in San Francisco.

Goforth, in a brief summary of the agency's concerns that accompanied the formal comments, raised doubts about "the ability of the BLM and its federal and state partners to sufficiently monitor and address the impacts that could result from the operation and maintenance of renewable energy facilities" across 22.5 million acres. And she encouraged the agencies "to identify disturbed sites" that are suitable for commercial-scale renewable energy development, instead of undeveloped sites.

Overall, EPA gave the draft EIS/EIR document an EC-2 rating, which stands for "environmental concerns -- insufficient information."

In its formal comments, EPA also questioned estimates in the draft plan that the DRECP planning area could support projects capable of producing 20,000 megawatts of electricity, noting that the "sharp decline in the cost of rooftop solar-powered electricity" may lessen the need for commercial-scale development. The agency also noted that the federal production tax credit for solar projects is set to drop significantly in 2017, lessening a major financial incentive for the industry.

"For this reason, the financial viability of future utility-scale renewable energy projects in the Plan Area is far from certain," EPA writes.

But the agency is most concerned about air pollution from desert soils disturbed during construction and operation of renewable energy power plants. The disturbed soils would easily be kicked up and dispersed into the air by the wind, and the agency requested BLM and the CEC include an air quality analysis in the final plan "to reflect additional air quality improvements that would result from adopting specific air quality measures."

The agency notes that the draft plan's "preferred alternative" estimates that the development focus areas -- where projects will be concentrated -- contain "516,000 acres of soils with moderate-to-high wind erosion potential."

"Inhalation of dust particles can lead to a number of respiratory problems, including asthma and Valley fever," the comment letter says. "The EPA supports minimizing disturbance to the natural landscape as much as possible, so that the need for measures to reduce wind erosion and fugitive dust emissions is minimized or eliminated."

Concerns about fugitive dust emissions are serious enough that large solar, wind and geothermal projects in the planning area may qualify as

construction," the EPA comment letter says.

Could plan 'undermine' renewables?

The draft plan has also come under fire from some renewable energy developers.

Among the industry critics is Iberdrola Renewables LLC, which wrote in formal comments submitted this week that if the plan "is approved in its current form, it will hinder California's push toward a clean energy future and undermine U.S. Department of Interior and Bureau of Land Management efforts to help promote and expedite prudent renewable energy development on Federal lands."

That is, in part, because the draft plan "limits development to unsubstantiated and overly-restrictive go/no-go areas in lieu of a more appropriate criteria-based methodology" that takes into account "on-the-ground data and/or changes to technology over time" that could allow projects in areas outside the development focus areas, wrote Jesse Gronner, Iberdrola Renewables' managing director of business development.

Iberdrola Renewables is currently embroiled in a fight with BLM over the agency's rejection of the company's application for a variance that would have allowed it to build a 200-MW photovoltaic solar power plant on 1,600 acres of federal land near Death Valley National Park. The company and its subsidiary, Aurora Solar LLC, have appealed the decision to the Interior Board of Land Appeals ([Greenwire](#), Jan. 9).

But other comment letters submitted by the wind power industry voice similar concerns.

Christian Marsh, a San Francisco-based attorney representing the Desert Wind Energy Association, submitted a comment letter this week that says the association "is disappointed in the DRECP planning effort," particularly the draft plan's "severe restrictions on wind energy development in California's desert region."

And in a separate comment letter, an attorney representing the California Wind Energy Association (CalWEA) wrote that DRECP planners ignored information provided by the industry on wind power's "limited terrestrial footprint" and failed to provide necessary siting flexibility for wind farms in the planning area.

"This was a missed opportunity for the lead agencies to hold constructive dialogue with the wind industry and other interested stakeholders to develop a workable plan for tapping California's most valuable wind energy resources," wrote Clark Morrison, a San Francisco-based attorney representing CalWEA.

Bird, bat concerns

Commenters also raised significant concerns about the possible impacts of commercial-scale solar and wind projects on birds and bats in the planning area.

The American Bird Conservancy, the nation's largest bird conservation group, requested in comments submitted this week that the draft plan "be withdrawn and revised in order to provide a broader range of alternatives" that include "additional protective measures to address potential wind and solar energy development's impacts on federally-protected bird species."

Steve Holmer, ABC's senior policy adviser, wrote, "The draft reveals significant impacts to bird species of conservation concern and their habitats, and reflects what appears to be a general lack of concern and adequate conservation measures for migratory birds which are protected under the Migratory Bird Treaty Act."

ABC, Holmer wrote, is also concerned about a growing body of research indicating that photovoltaic solar panels can fool birds into thinking they are water bodies and that intense heat from solar mirrors can singe birds' feathers, rendering them incapable of flight.

A study last year conducted by researchers with the Fish and Wildlife Service's forensics laboratory analyzed 233 bird carcasses found at three Southern California solar plants. The study showed that traumas caused mostly by impacts with solar equipment were the leading cause of death, along with solar flux -- a phenomenon in which intense radiant heat from mirrors burns the birds' feathers ([E&ENews PM](#), April 9, 2014).

"Recent studies and field tests indicate a large number of birds will be incinerated or fatally disabled as a result of crashing into the solar arrays (which they perceive as bodies of water) or flying through the extreme heat generated by solar reflectors," Holmer wrote.

This also concerns EPA, which wrote in its formal comments on the draft plan that "occurrences of avian mortality at utility scale solar sites was still emerging as an issue during the scoping and preparation" of the draft plan.

"Since then, the number of solar sites (both solar thermal facilities, as well as solar photovoltaic) reporting deaths of avian species has increased dramatically," EPA wrote.

While EPA notes in the comments that the draft plan "includes conservation and management actions" to address this issue, the "sheer size of the Plan Area ... and the numerous utility-scale solar installations that could be subject to the provisions of the DRECP, portends avian mortality as a concern" that "warrants the development of strong on-site monitoring for all renewable energy projects developed within the Plan Area."

David Lamfrom, California desert associate director for the National Parks Conservation Association, said it was "encouraging to see the EPA take a strong stance on the draft plan."

NPCA has also submitted comments that, in part, raise concerns about impacts to birds. The association has asked that development not take place in the Eagle Mountain region adjacent to Joshua Tree National Park, which contains important golden eagle habitat.

But Lamfrom cautioned that the negative comments are not meant to tear down the DRECP.

"Our concerns reflect opportunities for the Interior Department to improve the DRECP to protect and value the most precious places in the desert," he said.

Marilyn Chung/The Desert Sun

The Whitewater Preserve is protected by The Wildlands Conservancy and has been transformed from a trout farm to a park.

The Coachella Valley is surrounded by protected wilderness. We have the Santa Rosa and San Jacinto Mountains National Monument to the south, Joshua Tree National Park to the north and several pristine areas in between, such as the Coachella Valley National Wildlife Refuge and the Whitewater Preserve.

U.S. Sen. [Dianne Feinstein](#) visited the Whitewater Preserve on Thursday to celebrate the 20th anniversary of the signing of the California Desert Protection Act, which turned the Joshua Tree and Death Valley national monuments into national parks. The act also created the Mojave National Preserve.

She released the draft of a bill to expand the act and create two new national monuments: Sand to Snow, which would stretch from Mount San Gorgonio almost to Joshua Tree National Park, and Mojave Trails, between Joshua Tree and the Mojave Preserve. She will introduce the bill in January.

Attending the celebration was Jim Kenna, California director for the U.S. Bureau of Land Management, who is conducting hearings on the draft of the Desert Renewable Energy Conservation Plan. The plan would map out 22.5 million acres of the Colorado, Sonoran and Mojave deserts for large-scale renewable energy projects and conservation and recreation areas.

Known as DRECP, the plan has been in the works since 2008. U.S. Interior Secretary [Sally Jewell](#) released the draft in September, standing amid windmills in North Palm Springs.

The Desert Sun supports both of these efforts.

Feinstein's proposal would not only protect pristine land for future generations, it also would boost ecotourism, which has become a large part of the region's economy. The DRECP is a smart approach to locating renewable energy projects to help California reach its goals in reducing carbon emissions.

Sand to Snow

The Desert Sun endorsed the Sand to Snow National Monument soon after Feinstein first proposed it in 2009. Mount San Gorgonio rises to 11,503 feet above sea level. It is the seventh-highest mountain in the continental United States. The monument would cover 134,000 acres stretching to the desert oases of Big Morongo Canyon and the Whitewater Preserve.

Sand to Snow would help complete the circle of protected wilderness around the Coachella Valley.

Overall, Feinstein's California Desert Conservation and Recreation Act would protect more than 1 million acres of California desert. It would designate four off-highway vehicle recreation areas. And it would order the Department of the Interior to swap 370,000 acres of federal land for state land that could be developed as renewable energy projects.

The DRECP

The proposed national monuments would include areas covered by the DRECP, which ranges from the Mexican border along the Arizona border to Owens Valley, wrapping around the eastern edge of the Coachella Valley.

"The holy grail of this would be to have alignment with local government, state government and federal government," Kenna told The Desert Sun. "All of that fits together in terms of energy generation and transmission systems, and the conservation design."

"The Coachella Valley has a habitat conservation plan and a natural communities conservation plan integrated with a BLM land-use plan," he said. "And you have some of the physical attributes. In the Banning Pass, you have wind development that is feeding into the populated areas to the west. And in close proximity to that, in Big Morongo and up in Whitewater Canyon, you have very important conservation areas.

"It's about fitting the pieces together in very logical ways."

The DRECP is a super-sized version of the Coachella Valley Multispecies Habitat Conservation Plan, which balances development with protection of endangered species.

The California Energy Commission has provided grants to counties to help map out their part of the DRECP, said Commissioner Karen Douglas. The commission has been working with counties for several years.

"These grants support the counties to engage in their own land-use planning, whether it's developing policies or amendments to their planning documents," she said.

Some opposition

In a hearing in Imperial County, farmers objected to plans for placing renewable energy projects on what is now productive farmland. Kenna explained that when water rights are transferred to San Diego County after 2017, some of that land will be fallowed, which is ideal for renewable energy.

Some wind energy advocates were disappointed in a decision to ban windmills between the Salton Sea and the Chocolate Mountains. That area is used heavily for training of military pilots, he said. Jets and windmills don't mix.

The Salton Sea

Douglas said she believes the DRECP can help develop renewable resources to create a revenue stream to revitalize the Salton Sea.

"The hope I think we all have is that renewable energy around the Salton Sea can be part of revitalizing that area," she said. The geothermal resources there are some of the best in the world and there's tremendous opportunity for solar power.

The big picture

With the new Republican majority in the Senate, it may be more of a challenge for Feinstein, a prominent Democrat, to revise the Desert Protection Act. But it's not really a political question. After all, one of Republican Mary Bono's finest accomplishments in Congress was the creation of the Santa Rosa and San Jacinto Mountains National Monument.

Also, protecting wilderness areas can boost the economy. Since Joshua Tree became a national park in 1994 as part of the Desert Protection Act, visitors have increased year after year. In 2013, nearly 1.4 million visitors spent nearly \$63 million in the surrounding communities, according to an economic benefit [report](#) by the U.S. National Park Service.

Developing renewable resources also is an economic driver for the Coachella Valley. The DRECP is a wise approach for reaching compromises between competing interests in California's vast desert. The Desert Sun hopes it will set a standard for the rest of the nation.

Idaho Statesman: Simpson, Risch both introduce identical Boulder-White Clouds wilderness bills

Posted by Rocky Barker on February 26, 2015 Updated 21 hours ago

GOP Rep. Mike Simpson talks with Eric Schultz and Amanda Walton on the Murdock wheel-chair-access trail into the Boulder Mountains he got funding for in his efforts to pass a wilderness bill. **ROCKY BARKER** — rbarker@idahostatesman.com

A bill to protect portions of the Boulder-White Clouds as wilderness was introduced in both the House and the Senate Thursday by U.S. Rep. Mike Simpson and Sen. Jim Risch, both Idaho Republicans.

The bill would protect 275,665 acres in three separate wilderness areas that leaves all of the existing motorized trails open, includes small land transfers that help Custer County and the city of Stanley and access to funding for the county already approved by Congress. It is an alternative to a national monument designation pushed by Idaho conservation, sportsmen and outdoor business groups and under study by the Obama administration.

[Read more about the revised bill here.](#)

An Obama administration official acknowledged last week that the White House gave Simpson six months to try to pass the Central Idaho Economic Development and Recreation Act, which he has already tried to get through Congress for 13 years. In 2010, Risch was the stumbling block as motorized groups complained about the closing of several routes through the area that includes both land in the Sawtooth National Recreation Area and public lands managed by the Bureau of Land Management.

The changes in the new bill have motorized groups appeased, but many preservationists and mountain bikers have thrown their support behind the national monument championed by former Gov. Cecil Andrus.

Simpson took out several thousand acres of wilderness proposed that snowmobilers used on the east side of the Boulder Mountains in exchange for extra land in the Wood River Valley. A large swath used by the Sun Valley Heli-skiing outfitter also was taken out, including areas where the helicopters land.

The final version put back into wilderness a trail in Murdock Creek behind the SNRA headquarters that provides access to the wilderness for people in wheelchairs.

The next step for the bill in both chambers is to get committee hearings.

DOI in the News:

SECRETARY JEWELL MEETS WITH HAWAII GOV IGE. The [AP](#) (2/27) reports that "Hawaii Gov. David Ige said Thursday that he met with several of members of President Barack Obama's cabinet during his latest trip to Washington and talked about transportation funding, airports and Native Hawaiian sovereignty, among other topics." Notably, Ige met with Interior Secretary Sally Jewell, "who said the department is working on sorting out legal issues regarding whether Native Hawaiians could be federally recognized." Ige said, "I had expressed to her that I believe that it's very important that the Native Hawaiian community be given the time to determine what the nature of their sovereign nation should be."

Also providing coverage are [KITV-TV](#) Honolulu (2/27, 21K) and [KHON-TV](#) Honolulu (2/26, 73K).

SECRETARY JEWELL TO SIGN SHOSHONE-PAIUTE WATER RIGHTS AGREEMENT. The [National Native News](#) (2/27) reports that tribal and federal officials are set to sign a water rights agreement. The agreement guarantees water rights for the Shoshone-Paiute tribe. Interior Secretary Sally Jewell will sign the agreement. She said that water development projects are "important for many reasons, including economic development."

OBAMA ADMINISTRATION OFFICIALS SUPPORT CHANGING WILDFIRE FUNDING. The [Bend \(OR\) Bulletin](#) (2/27, 94K) reports that Obama Administration officials "gave full-throated support for treating the largest wildfires as natural disasters as they defended the White House's budget on Capitol Hill this week." According to the article, "in separate appearances before the Senate Energy and Natural Resources Committee, U.S. Forest Service Chief Tom Tidwell and Interior Secretary Sally Jewell said the administration would like to revise the framework the federal government uses to pay for fighting wildfires." On Tuesday, Jewell said "the framework envisioned by" Sen. Ron Wyden's "legislation and embraced in the administration's budget would provide budget certainty." Jewell said, "That would enable us to work with tribes, work with land management agencies to do the important fire prevention and restoration work to prevent wildfires from getting out of control. By not doing that, as has been the case for a number of years, we've spent more and more on suppression and less and less on hazardous fuel removal."

DEPUTY SECRETARY CONNOR DELIVERS BLEAK FORECAST FOR LAKE MEAD. The [Las Vegas Review-Journal](#) (2/27, 398K) reports that Nevada faces "significant possibilities" of water shortages if drought on the Colorado River persists into the next two years, according to Michael Connor, deputy secretary of the Interior Department. Connor said there a 20 percent chance of shortages in Nevada and Arizona in 2016 if levels of Lake Mead and Lake Powell continue to drop, "and it goes up to almost 50 percent after that." He said, "It's a serious situation. The drought in the Colorado River system is every bit as bad as in the Central Valley of California."

REP. STEWART THANKS SECRETARY JEWELL ON PRAIRIE DOG MANAGEMENT. The [St. George \(UT\) News](#) (2/26, 3K) reports that "a plan for management of Utah prairie dogs located on nonfederal lands in southwestern Utah is, according to a statement issued by the state's Division of Wildlife Resources Tuesday, ready for review after several weeks of work." Congressman Chris Stewart "expressly thanked" the Interior Department "while addressing Interior Secretary Sally Jewell during an Appropriations Interior Subcommittee hearing Wednesday." Stewart said, "We've made more progress in eight months than we have in 20 years, and we hope to have a conclusion to that; and we're grateful for the consolidated effort that we've had in moving that forward."

BOULDER-WHITE CLOUDS WILDERNESS BILLS INTRODUCED. The [Idaho Statesman](#) (2/26, 196K) reports that "a bill to protect portions of the Boulder-White Clouds as wilderness was introduced in both the House and the Senate Thursday by US Rep. Mike Simpson and Sen. Jim Risch, both Idaho Republicans." The legislation would "protect 275,665 acres in three separate wilderness areas that leaves all of the existing motorized trails open, includes small land transfers that help Custer County and the city of Stanley and access to funding for the county already approved by Congress." The bill is "an alternative to a national monument designation pushed by Idaho conservation, sportsmen and outdoor business groups and under study by the Obama administration."

FEDERAL WORKERS WARNED AGAINST SMOKING MARIJUANA. The [Washington Post](#) (2/26, Hicks, 5.17M) reports in its "Federal Eye" blog that although marijuana became legal in DC on Thursday, "federal-workforce rules remain unchanged for the roughly half million US government employees and military personnel who live in the area." Since 12 01 am on Thursday, "local authorities have allowed anyone 21 and older to possess up to 2 ounces of pot, although the drug is still prohibited on federally administered properties such as the National Mall, Rock Creek Park and even public housing," but despite the new policy, the Federal government "still considers marijuana to be an illegal drug and expects its civilian and military personnel to abide by federal guidelines."

ADDITIONAL COVERAGE OF PROPOSED ARCTIC DRILLING RULES. Additional coverage of the Interior Department's new Arctic drilling rules was provided by the [Huffington Post](#) (2/27, Profeta, 281K), the [Alaska Journal of Commerce](#) (2/27, 14K), and the [National Geographic](#) (2/26, Profeta, 32.58M).

ADDITIONAL COVERAGE OF INTERIOR'S RECENT DECISIONS AFFECTING ALASKA. Additional coverage of the recent decisions impacting Alaska was provided by the [Alaska Journal of Commerce](#) (2/27, 14K) and [Alaska's Political Pipeline](#) (2/27).

ADDITIONAL COVERAGE SECRETARY JEWELL ASKING CONGRESS TO INCREASE NPS FUNDING. Additional coverage that Interior Secretary Sally Jewell is "asking for a funding increase for the National Park Service of more than \$400 million" was provided by [KJZZ-FM](#) Phoenix (2/27, 7K).

ADDITIONAL COVERAGE SEN. GARDNER WANTS FUNDING FOR ARKANSAS VALLEY CONDUIT. Additional coverage that Sen. Cory Gardner wants the BOR to fund the Arkansas Valley Conduit was provided by the [Pueblo \(CO\) Chieftain](#) (2/27, 79K).

ADDITIONAL COVERAGE TINY ALASKA VILLAGE TO BE RELOCATED DUE TO CLIMATE CHANGE. Additional coverage of the impact of climate change on Kivalina was provided by the [Tech Times](#) (2/26) and the [Cato Institute](#) (2/27, 10K).

SIERRA CLUB CRITICIZES EFFORT BY ARIZONA LEGISLATORS TO TAKE OVER FEDERAL LAND. In an op-ed for the [Arizona Republic](#) (2/26, 1.14M), Sandy Bahr, director of the Sierra Club's Grand Canyon Chapter, criticizes an effort by some Arizona legislators who are "promoting an extreme agenda to seek control of America's public lands." she argues that "the idea that the state could actually afford to manage millions of acres of public land is a stretch; it cannot even properly manage the 9.2 million acres of state trust lands entrusted to it on behalf of this and future generations of school children."

America's Great Outdoors:

National Park Service:

WORLD'S MOST POPULAR NATIONAL PARKS HIGHLIGHTED. [CNN](#) (2/26, 14 35M) highlights "the most popular national parks and preserves on the six most populous continents." In North America, the article notes that Golden Gate National Recreation Area gets 14.4 million visits/year and Lake Mead National Recreational Area gets 7.8 million visits/year.

SEALASKA HERITAGE INSTITUTE TO PARTNER WITH NPS ON MOVE TO NEW BUILDING. The [Alaska Native News](#) (2/27, 245) reports that "Sealaska Heritage Institute will partner with Sitka National Historical Park to move its collection of objects into the new Walter Soboleff Building in Juneau." The article notes that "a little-known clause in the Alaska National Interest Lands Conservation Act (ANILCA) authorizes the National Park Service as part of the Department of Interior to offer advice, support and technical expertise to ANCSA corporations and Native groups in the preservation, management, display and interpretation of cultural resources." Through the service, "known as the Statewide Cultural Assistance Program, a curator with the Sitka National Historical Park will travel to Juneau for a week to help professional staff at Sealaska Heritage move ethnographic, art and archaeological objects from Sealaska to the Walter Soboleff Building downtown."

MEDWAY LEADERS TO ENDORSE NATIONAL PARK PLAN. The [Bangor \(ME\) Daily News](#) (2/26, 166K) reports that Medway "leaders will draft a letter to Maine's congressional delegation endorsing the 150,000-acre North Woods national park and recreation area proposed by Lucas St. Clair." The Board of Selectmen "voted 4-0 on Monday to draft the endorsement letter, saying that the park would be a tonic for the struggling Katahdin region economy." The article notes that "Medway is the third Katahdin region town looking to write a letter since Millinocket officials said on Feb. 7 that US Sen. Angus King, I-Maine, had asked them to draft a letter of their requirements of a park should a federal bill be written proposing one."

DELAWARE WATER GAP RECREATION, NPS PLAN FOR MILESTONES. The [New Jersey Local News](#) (2/27, 772K) reports that "Delaware Water Gap National Recreation Area is celebrating its 50th anniversary this year and the National Park Service (NPS) will commemorate its 100th anniversary in 2016." Superintendent John J. Donahue said, "We're very excited to be commemorating these big events over the next two years. These anniversaries will provide occasions to celebrate all that our national parks have to offer and an opportunity to plan strategically for the next century."

TWO MEN SUSPECTED OF VANDALIZING HISTORIC MILITARY STRUCTURE RESCUED AFTER BEING STRANDED ON CLIFF. The [AP](#) (2/27) reports that "two men suspected of vandalizing a historic military structure at a national park north of San Francisco had to be rescued by authorities after they were stranded on a steep cliff while trying to escape Thursday, authorities said." According to park service spokeswoman Alexandra Picavet, "the men got stuck on a cliff at the waterfront of Fort Baker in Golden Gate National Recreation Area."

Also reporting on the story is the [San Francisco Chronicle](#) (2/27, 2.21M).

FEES INCREASING AT MAMMOTH CAVE NATIONAL PARK. The [Louisville \(KY\) Courier-Journal](#) (2/26, 379K) reports that "Mammoth Cave National Park cave tours will increase by \$1 to \$2, except the Wild Cave tour, which will increase by \$5, effective March 14, the National Park Service announced this morning." Park officials said that "the cost of operating the park continues to increase along with the need to complete improvement projects on aging park infrastructure." In total, officials "expect the fee increase revenue by \$350,000 this year."

DEATH VALLEY COULD HAVE WILDFLOWER SUPER-BLOOM THIS YEAR. [KSJR-FM](#) Collegeville, MN (2/27, 62K) reports that "this could be a good year for widespread wildflower blooms in Death Valley National Park" and "it may even be a rare super-bloom year."

GRAND OLE OPRY HOUSE ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. [USA Today](#) (2/27, 10.32M) reports that the Grand Ole Opry House has been added to the National Register of Historic Places.

ADDITIONAL COVERAGE CONGRESS PASSED BILL ESTABLISHING GRAND CANYON NATIONAL PARK ON FEBRUARY 26, 1919. Additional coverage of the Grand Canyon's 96th birthday was provided by the [Arizona Republic](#) (2/26, 1.14M).

ADDITIONAL COVERAGE APOSTLE ISLANDS ICE CAVES TO OPEN SATURDAY. Additional coverage that the Apostle Islands "ice caves are set to open to the public Saturday if conditions don't change" was provided by the [AP](#) (2/26).

ADDITIONAL COVERAGE NPS APPROVES SHARPSHOOTING OF DEER IN CUYAHOGA VALLEY NATIONAL PARK. Additional coverage that the NPS "announced Wednesday its approval of the population management plan at Cuyahoga Valley National Park" was provided by the [AP](#) (2/27).

Bureau of Land Management:

BLM'S FARMINGTON OFFICE AMENDING RESOURCE MANAGEMENT PLAN. The [Farmington \(NM\) Daily Times](#) (2/27, 49K) reports that "more than a decade after drafting its Resource Management Plan, the Bureau of Land Management's Farmington Field Office is amending the plan to address changes in technology." According to the article, "in a meeting on Thursday at the Farmington BLM office, project manager Peggy Deaton spoke to the Resource Advisory Council about the agency's process of creating the amendment." Deaton said that the Resource Management Plan amendment will serve as a "blueprint for how we are going to be doing our jobs in the area for the foreseeable future."

GRAND COUNTY COUNCIL RETRACTS LETTER REGARDING BLM MASTER LEASING PLAN. The [Moab \(UT\) Times-Independent](#) (2/27) reports that "by a 4-3 vote on Feb. 17, the Grand County Council formally retracted an endorsement made by the previous council regarding the Bureau of Land Management's (BLM) Moab Master Leasing Plan (MLP)." The article notes that "the previous council endorsed the BLM's 'No Action' Alternative A, which maintains the status quo for resource management on BLM lands." But "in the Feb. 17 meeting, council member Chris Baird said the council's position on the MLP Alternatives might have changed since the election, therefore warranting a formal retraction."

BLM APPROVES NEW RESOURCE-MANAGEMENT PLAN FOR COLORADO COUNTIES. The [Durango \(CO\) Herald](#) (2/26, 28K) reports that the BLM has "approved a new resource-management plan that covers all or part of eight counties in Southwest Colorado." The article notes that "about 503,000 surface acres and 300,000 acres of mineral estate beneath non-federal land in La Plata, Archuleta, Montezuma, San Juan, Dolores, San Miguel, Hinsdale and Montrose counties are covered in the plan."

BLM APPROVES LONE TREE MINE PLAN OF OPERATIONS AMENDMENT. The [Reno \(NV\) Gazette-Journal](#) (2/26, 168K) reports that the BLM Winnemucca District Humboldt River field office has "issued a decision to approve the plan of operations amendment for the Lone Tree mine." The action "authorizes construction of the Brooks Project, located about 27 miles southeast of Winnemucca, and about 61/2 miles west of Valmy in Humboldt County."

BLM SEEKING COMMENTS ON TWO PROPOSED CARBON DIOXIDE WELLS. The [Pueblo \(CO\) Chieftain](#) (2/27, 79K) reports that the BLM is "seeking public comment on two proposed carbon dioxide wells to be located 6 miles south of here." OXY USA, "the operator of the existing Sheep Mountain CO2 production unit, proposes to drill two new wells within its existing operation."

BLM SEEKS PUBLIC COMMENTS ON PROPOSED RED DESERT WILD HORSE GATHER. The [County 10](#) (2/26) reports that the BLM's Rawlins and Lander Field offices are "accepting public comments prior to preparing an Environmental Assessment (EA) on a proposed wild horse gather in the Red Desert Herd Management (HMA) and surrounding area to be placed on the national schedule."

MILL MANAGER RECEIVES 6 MONTHS IN PRISON IN POLLUTION CASE. The [AP](#) (2/26) reports that "a Northern California man has been sentenced to six months in prison and ordered to pay \$107,000 in restitution after pleading guilty to polluting federal property in Shasta County." The US Attorney's office in Sacramento said that "Kiedock Kim admitted to depredation of US property and negligent discharge of a pollutant into US water between 2006 and 2007."

MAN SENTENCED TO FEDERAL PRISON FOR SHASTA COUNTY GOLD MINE'S ILLEGAL DUMPING. The [Chico \(CA\) Enterprise-Record](#) (2/26, 92K) reports that "a Biggs man was sentenced Thursday to serve six months in federal prison for the illegal discharge of pollutants at a Shasta County gold mine." Kiedock Kim was "sentenced in the US District Court for the Eastern District of California on counts of depredation of federal property and of negligent discharge of a pollutant to a waterway, according to a press release from US Attorney Benjamin Wagner."

Fish and Wildlife Service:

AGENCIES PLAN TO RESTORE GRIZZLIES IN WASHINGTON. The [AP](#) (2/27, Nile) reports that the NPS and the FWS are "working with other agencies on a plan to bring grizzly bears back to" a "part of their natural range" in Washington. Next month, "the state and federal agencies involved are holding a series of public meetings in six cities around

elsewhere into the North Cascades to reproduce, explore other ways of returning the animals to the area or take no action."

The [Salem \(OR\) Capital Press](#) (2/26, 113K) editorializes that "a proposal by the US Department of the Interior to promote and rebuild the population of grizzly bears in Washington state should be rejected." It argues that "in Washington state, with 7 million people, there's just not enough room for grizzly bears, too."

Coverage by the AP was also picked up by the [Everett \(WA\) Herald](#) (2/26, 127K), the [Daily News \(WA\)](#) (2/27, 63K), [KOMO-TV](#) Seattle (2/27, 217K), [KHQ-TV](#) Spokane, WA (2/27, 77K), [KXLY-TV](#) Spokane, WA (2/27, 30K), and [KIMA-TV](#) Yakima, WA (2/27, 1K).

FWS ANNOUNCES RULES TO PROTECT MANATEES IN FLORIDA SPRINGS. The [AP](#) (2/26) reports that the FWS announced Thursday that it was "implementing some interim protective measures proposed late last year" to give manatees more space at the Three Sisters Springs in the Crystal River National Wildlife Refuge. According to the article, "for the rest of this manatee season, the springs will be closed to people when temperatures drop and the number of manatees increases." Also, "other measures restrict some use of kayaks and flash photography in the springs."

Also reporting on the story are [Reuters](#) (2/27, Stein) and [WTVT-TV](#) Tampa, FL (2/27, 50K).

FWS ANNOUNCES PLANS FOR TIMBER POINT SECTION OF RACHEL CARSON REFUGE. The [Portland \(ME\) Press Herald](#) (2/26, 159K) reports that the FWS "announced plans Thursday to preserve historic buildings and add a walking trail on Timber Point at the Rachel Carson National Wildlife Refuge in Biddeford." According to the article, "under the plan selected by the wildlife service, buildings that are eligible for the historic register will be repaired and preserved." Also, "trails on the property will be expanded and a self-guided tour about master architect Charles Ewing, who built the main cottage and other buildings on the property, and the habitat on the peninsula would be added to the exterior of buildings he designed and built."

Also providing coverage is the [Central Maine](#) (2/26).

DESERT TORTOISE COULD BE PLACED ON ENDANGERED SPECIES LIST. The [Cronkite News](#) (2/27) reports that "Arizona developers could face some obstacles if federal officials place the Sonoran Desert Tortoise on the endangered species list." According to Bill Boyd, legislative policy administrator at the Arizona State Land Department, "the designation poses a potential problem for developers because the tortoise has historically lived in the southern half of Arizona, which includes the Phoenix metro area." Vanessa Hickman, program head of the land ownership initiative, said that "if the government adds the tortoise to its endangered species list, that could reduce the availability of land and drive up costs," and "it also could affect agriculture and grazing in the state."

DETROIT RIVER INTERNATIONAL WILDLIFE REFUGE HOLDING VOLUNTEER OUTREACH. The [Southgate \(MI\) News Herald](#) (2/26, 63K) reports that "the Detroit River International Wildlife Refuge is hosting a volunteer outreach from 6 to 7:30 p.m. March 18 at the Westfield Activities Center." The article notes that "during the volunteer outreach, staff will be discussing involvement opportunities and provide further information about the benefits of the Refuge."

LUMBER LIQUIDATORS COULD FACE CRIMINAL CHARGES FOR IMPORTING WOOD FROM RUSSIAN FORESTS. The [Quartz](#) (2/27, 482K) reports that Lumber Liquidators "disclosed this week that it could face criminal charges of importing wood sourced illegally from the far eastern Russian forests that are home to endangered Siberian tigers, of which there are only a few hundred left." The article notes that "in 2013, the US Immigration and Customs Enforcement's Homeland Security Investigations unit, along with the US Fish and Wildlife Service and the Justice Department, raided Lumber Liquidators' US headquarters, looking for violations of the Lacey Act, an American statute that prohibits importing wood if it violates state or foreign law."

SURVEY FINDS MEXICAN WOLF THRIVING. In an op-ed for the [Arizona Republic](#) (2/26, 1.14M), Robert Mansell, chairman of the Arizona Game and Fish Commission, writes that "with the recent announcement that the Arizona-New Mexico wolf population grew by 31 percent last year, isn't it time for naysayers and everyone interested in Mexican wolf recovery to recognize the program's success?" He notes that "the latest population survey shows at least 109 Mexican wolves in the wild and a record 38 pups that survived through year's end."

Securing America's Energy Future:

Renewable Energy:

AMERICAN BIRD CONSERVANCY CALLS FOR NEW REGULATIONS TO PREVENT BIRD DEATHS FROM WIND ENERGY PROJECTS. The [Huron County \(MI\) View](#) (2/26) reports that "the American Bird Conservancy has released its projection of bird deaths due to wind energy projects and is calling on the US Department of the Interior to write new regulations." The group has "filed a formal petition with the US Department of the Interior calling for the agency to establish new regulations governing the impacts of wind energy projects on migratory birds." The petition would have the FWS "establish a permitting process that would significantly improve the protection of birds covered by the Migratory Bird Treaty Act and would afford the wind industry a degree of regulatory and legal certainty that cannot be provided in the absence of such a process."

Onshore Energy Development:

BLM AWARDS CONTRACT FOR NPR-A LEGACY WELL CLEANUP. The [Alaska Journal of Commerce](#) (2/27, 14K) reports that the BLM has "let a \$10 million contract to Marsh Creek LLC to remediate abandoned oil wells drilled decades ago at Umiat in the National Petroleum Reserve-Alaska." BLM's Alaska manager, Bud Cribley noted that "this is the first phase of what will be a \$50-million program to clean old well sites in the federal reserve." The bureau is "tapping \$50 million made available through efforts by Alaska US Sen. Lisa Murkowski."

BLM TAKES STEPS THAT COULD OPEN LAND IN UTAH TO LEASING. The [Natural Gas Intelligence](#) (2/27) reports that the BLM "took preliminary steps Wednesday that could lead to the leasing of heretofore untouched federal forest lands in south-central Utah for possible oil and natural gas exploration." BLM's Utah office has "decided to adopt the final environmental impact statement (EIS) and record of decision (ROD) by the USFS for oil/gas leasing on lands administered by the Fishlake National Forest." But "before BLM can proceed, it must obtain consent from the US Forest Service (USFS) for specific pieces of acreage in the Fishlake National Forest," according to an official in a Salt Lake City BLM office.

Offshore Energy Development:

BOEM TO HOLD MEETING IN SAVANNAH. [WTOG-TV](#) Savannah, GA (2/27, 18K) reports that the BOEM has "scheduled a public meeting in Savannah on March 24 to address the government's proposal to open up sections of the Eastern seaboard to oil and gas drilling." The article notes that "it's one of a series of public meetings planned to educate East Coast communities about the recently released draft of a five year program to allow oil and gas exploration and drilling in the outer continental shelf of the Atlantic coast."

Also providing coverage is [WTVM-TV](#) Columbus, GA (2/27, 7K).

Tackling America's Water Challenges:

BOR TO FLUCTUATE NORTH PLATTE RIVER FLOWS TO HELP TROUT. The [AP](#) (2/27) reports that the BOR has "scheduled a series of fluctuating flows in the North Platte River downstream of Gray Reef Dam." The move is "being done at the request of the Wyoming Game and Fish Department to improve trout reproduction in the river." According to Game and Fish Chief of Fisheries Mark Fowden, "the fluctuations will clean the gravel at the river's bottom," and "the result will be more and bigger trout."

BOR TO MAKE ANNOUNCEMENT ON WATER FOR CENTRAL CALIFORNIA FARMERS. The [AP](#) (2/27) reports that "farmers in parts of California's Central Valley say that for a second year running they anticipate receiving no irrigation water from a federally operated system of canals and reservoirs." The BOR is "expected to announce Friday how much water it will release for farming."

Empowering Native American Communities:

BIA RELEASES NEW INDIAN CHILD WELFARE ACT GUIDELINES. The [Indian Country Today Media Network](#) (2/26, 49K) reports that on Tuesday, Assistant Secretary – Indian Affairs Kevin K. Washburn announced that the BIA has "published revised, sweeping new guidelines to ensure the rights and protections of Native families and children under the Indian Child Welfare Act (ICWA)." Speaking at "the winter session of the National Congress of American Indians, Washburn said that updating Guidelines for State Courts and Agencies in Indian Child Custody Proceedings in the Federal Register had become necessary due to the continued misapplication and noncompliance of ICWA in state and federal courts since it was first published in 1979." Washburn said, "Consistent with the direction of the President in creating the White House Council on Native American Affairs, we are taking an 'all-of-government' approach to ICWA. Recently, the Department of Justice advised tribes that it wishes to be notified of cases in state courts to consider participating in by filing amicus briefs in support of ICWA. Both the Department of the Interior and Department of Justice have been meeting with the Administration for

Children and Families at Health and Human Services to consider ways in which their programs, such as the IV-E funding program, can be used to help insure ICWA compliance in states as well as strengthen tribal capacity in child welfare. We are developing strategies to work together to protect Indian children."

NCAI'S EXECUTIVE COUNCIL WINTER SESSION WRAPS UP. The [Indian Country Today Media Network](#) (2/26, 49K) reports that "tribal leaders and representatives are in Washington, D.C. this week to attend the National Congress of American Indians 2015 Executive Council Winter Session that wraps up today, February 26." BIE representatives were scheduled to "meet with tribal leadership to provide an update on the BIE's transformation implementation plan, and answer any questions tribal leadership may have in regards to Indian education."

BIA WANTS CAYUGA NATION TO SETTLE LEADERSHIP DISPUTE ON ITS OWN. The [Auburn \(NY\) Citizen](#) (2/27, 27K) reports that "two representatives from the BIA and one from the US Department of Justice met with reporters Thursday in a conference set up by Cayuga County Sheriff David Gould to discuss the BIA's recent decision regarding a federal representative for the nation." The decision "recognized Clint Halftown as the federal representative on an interim basis, but only for the purposes of accessing community services contracts between the BIA and Cayuga Nation." However, "BIA officials said on Thursday that they haven't declare a leader for the tribe and do not intend to." They made "it clear: The Cayuga Nation must solve its leadership dispute on its own."

Additional coverage was provided by the [Syracuse \(NY\) Post-Standard](#) (2/27, 438K) and [WTVH-TV](#) Syracuse, NY (2/27).

INDIAN COUNTRY LOOKS TO CAPITALIZE ON MARIJUANA. [McClatchy](#) (2/27, Hotakainen, Subscription Publication, 17K) reports that "after making hundreds of billions of dollars running casinos, American Indian tribes are getting a good whiff of another potential moneymaker: marijuana." The first Tribal Marijuana Conference is scheduled "for Friday on the Tulalip Indian Reservation in Washington state as Indian Country gets ready to capitalize on the nation's expanding pot industry." According to organizers, "representatives from more than 50 tribes in at least 20 states have registered, with total attendance expected to surpass 300."

ADDITIONAL COVERAGE OF CASINO PLANS OF LITTLE RIVER BAND OF OTTAWA INDIANS. Additional coverage of the plans by the Little River Band of Ottawa Indians to "take 60 acres of land into trust for the \$180 million casino and economic development project" was provided by the [AP](#) (2/27).

BUDGET PROPOSAL PRAISED FOR INCLUDING BOOST FOR TRIBAL SOVEREIGNTY. In a piece for the [Indian Country Today Media Network](#) (2/26, 49K), Donna Ennis, the Community Center Manager for Fond du Lac Reservation, writes that "as part of President Obama's budget request to Congress, federal funding for tribal contract support costs (CSC) for three years beginning in 2017 will be moved from the 'discretionary' to 'mandatory non-discretionary' category within the federal budget." She calls this "a huge step in recognizing self-governance efforts by tribes and recognition of the government-to-government relationship based on a trust relationship."

Office of Insular Affairs:

SECRETARY JEWELL DISCUSSES ISSUES WITH GUAM'S CALVO. The [Marianas Variety](#) (2/27) reports that "Gov. Eddie Calvo is in the nation's capital discussing Compact-Impact reimbursement, the stalled China visa waiver program, the military buildup and other issues impacting the island." Calvo said "he has already spoke to Secretary of the Interior Sally Jewell, Homeland Security Secretary Jeh Johnson, US Environmental Protection Agency Administrator Gina McCarthy, Secretary of Agriculture Tom Vilsack and he has made a friend in Sen. Mazie Hirono of Hawaii." With Jewell, Calvo "spoke of the need to address climate change, workforce development, tourism and Compact-Impact issues."

Top National News:

OBAMA PROMOTES TRADE AGENDA IN SERIES OF LOCAL TV INTERVIEWS. In what national media reports cast as an attempt to boost Democratic support for "a rare spot of common ground with Republicans," as the [AP](#) (2/27, Kuhnenn) puts it this morning, President Obama yesterday promoted his trade agenda in interviews with several local TV stations. The President, adds the AP, spoke to stations from "states represented by some of the handful of Democratic senators who may be willing to side with" him on upcoming trade battles. [USA Today](#) (2/27, Korte, 10.32M) notes "the local television reporters were given a 'behind the scenes' tour of the West Wing, access to White House officials and were allowed to pet the First Family's dogs." White House press secretary Josh Earnest said, "That sort of ground-level advocacy is something that I do think will persuade Democrats and Republicans, frankly, to take a close look at some of the trade agreements that the president is trying to broker."

[KOMO-TV](#) Seattle (2/26, 6:33 p.m. PST, 217K) reported that "the President and his staff were most eager to talk about trade," and "specifically, the Trans-Pacific Partnership, a sweeping free-trade agreement with 10 countries in the Asia's Pacific region." Obama was shown saying, "If we don't do this trade deal, China will be writing the rules and they'll reinforce rules that are already disadvantaging us today." KOMO added that "for successful trade in our state, the ports have to go full speed. Labor Secretary Thomas Perez helped negotiate and an end to the port slow down. I asked him if the new deal is on firm ground." Perez was shown saying, "I'm very confident that the members of the union, when they review the agreement will...vote for it. The executive committee that was the negotiating committee consisted of roughly 25 to 30 members of the union," and "the recommendation was unanimous."

[KMBC-TV](#) Kansas City, MO (2/26, 6:02 p.m. CST, 49K) said "this was certainly a day all about jobs in Missouri and Kansas, and what it will take to create even more selling 'Made in America' overseas." The President "came armed with numbers." Obama was shown saying, "If you look at Kansas and Missouri combined, you are looking at over 140,000 jobs that are created by exports." KMBC added, "The thinking is that the emerging middle classes in places like China would be interested in Missouri and Kansas ag products, F-150 pickups, and maybe even new planes."

[KGW-TV](#) Portland, OR (2/26, 6:00 p.m. PST, 111K) described Obama as "making a full-court press to pass the Trans-Pacific Partnership through Congress. It's a proposed trade agreement with 12 Pacific Rim countries. We reached out to the entire Oregon congressional delegation and they have mixed opinions on it. For example, Sen. Wyden is working hard on labor and environmental protections in case the deal passes, but Peter DeFazio, our Congressman, is dead set against it. We will continue to follow this issue." On its website, [KGW-TV](#) Portland, OR (2/27, 111K) reported that Obama "praised...Wyden for his work on making sure the TPP includes tough protections for labor rights and the environment."

[WDAY-TV](#) Fargo, ND (2/26, 6:00 p.m. CST, 1K) reported that the Administration wanted to "talk trade and the importance of exports when it comes to creating jobs and maintaining a strong economy. Both North Dakota and Minnesota were showcased, having record numbers when it comes to exports." The Administration "is highlighting those numbers as it works on new trade agreements." WDAY added that the Administration "also touted its 'Made in Rural America' initiative, giving people and businesses in areas like North Dakota and Minnesota the tools for success in our digital economy." On its website, [WDAZ-TV](#) Grand Forks, ND (2/27, Lenzmeier, 1K) noted that it was also among "a handful of stations in the country invited for an exclusive day inside the White House, and a one-on-one with...Obama."

The [Washington Post](#) (2/27, Nakamura, 5.17M) reports the Administration "has argued that the Trans-Pacific Partnership (TPP) deal would boost US exports in fast-growing Asian markets at a time when the country is facing increased economic competition from China, whose labor and environmental standards are lower." GOP leaders had "called on Obama to more aggressively pitch his plans to skeptical Democrats, whose support will be necessary to complete the 12-nation TPP agreement." Also yesterday, the [AP](#) (2/27, Kuhnenn) reports, the Administration "released data promoting the role of exports in the economic recovery," noting "exports supported about 11.3 million jobs in 2013, an increase of 1.6 million over 2009."

In addition to the President's interviews, senior officials were also at hand to promote the Administration's trade priorities. The [Minneapolis Star Tribune](#) (2/27, Spencer, 1.37M) notes "in a meeting with regional reporters," US Trade Representative Froman "said the administration is working to line up bipartisan support for a trade promotion authority bill," and that "successfully negotiating the TPP and TTIP and getting congressional approval of both could give American businesses 'unfettered access' to two-thirds of the world's economy." Perez, "called TPP 'a renegotiation' of...NAFTA," assuring reporters that "TPP and TTIP will 'bake in' enforcement mechanisms that were missing from earlier trade deals." Commerce Secretary Pritzker, meanwhile, said free trade agreements are "an opportunity to produce here and sell there." [Bloomberg Politics](#) (2/27, Keane, Dougherty, 169K) quotes Cecilia Munoz, director of Obama's Domestic Policy Council, telling reporters, "This is a major priority for the administration. ... The goal here is to make sure that this is a well-informed debate."

Analysis: Obama-Ryan Trade Partnership "Rare Ray Of Bipartisan Sunlight." David D. Haynes, in a post for the [Milwaukee Journal Sentinel](#) (2/27, 699K), says Obama "has an unlikely ally" in Rep. Paul Ryan "as he nears the home stretch of a marathon trade negotiation aimed at opening markets in the Pacific Rim." Their cooperation on this issue is a "rare ray of bipartisan sunlight before the 2016 presidential election darkens the mood in Washington."

Chrostowski: Obama Would Need To Pull Off An "Upset" To Pass Treaty. Keith Chrostowski, Business Editor of the [Kansas City \(MO\) Star](#) (2/27, 637K), writes that while the deal is "still under wraps, enough is known about it to stoke a fiery opposition that is splitting both political parties and creating unusual allies. For the deal: President Barack Obama and most Republicans. Against it: Many Democrats and tea party conservatives." However, "for our region, big agriculture hopes the TPP will boost exports of crops and meat." Chrostowski concludes that "unless the president can pull off the upset, the treaty will die."

MEDIA ANALYSES HOUSE GOP IN RETREAT, PREPARING SHORT-TERM DHS FUNDING EXTENSION. Print media reports this morning indicate House Republicans are

Republicans and a win for the President. The [AP](#) (2/27, Espo, Werner), for example, speaks of a GOP "retreat," adding that "it appeared Obama was closing in on a triumph." The [New York Times](#) (2/27, Parker, Subscription Publication, 9.97M) says the House GOP "plan simply pushes the fight into next month," creating "the very situation that Republicans had hoped to avoid after the November elections," namely "lurching from crisis to crisis, with little to show in the form of major legislation." Rep. Peter King said of the proposal, "It says a lot about the party. ... It means trouble. How many times can we go over the cliff and survive?"

Other reports continue to note the apparent disunity and unrest within GOP ranks, with "Tea Party conservatives," [The Hill](#) (2/27, Wong, 224K) reported, "threatening to try" to oust Speaker Boehner if he "caves in the fight against...Obama's immigration actions." The Hill noted that "there's not a coordinated effort yet," but "chatter" of a "coup attempt has grown louder." On its website, [Roll Call](#) (2/26, Fuller, Subscription Publication, 102K) also mentioned "the prospect of a conservative mutiny," and in a [separate story](#) noted "speculation that...Boehner's speakership somehow hangs in the balance." [Politico](#) (2/27, Everett, Sherman, 669K), however, said "House Republicans were confident coming out of their closed meeting," with "a number of conservatives," including Reps. John Carter, Jeb Hensarling and Ted Yoho, expressing "support for leadership's plans."

Under the proposed course of action, says the [AP](#) (2/27, Espo, Werner), DHS "would receive funds with no strings attached for perhaps three weeks," and the House "would also approve a separate measure to allow normal agency operations through the end of the budget year on Sept. 30, but only in exchange for immigration-related concessions from the White House." The [Washington Post](#) (2/27, Sullivan, 5.17M), meanwhile, indicates that the House GOP plan "faces an uncertain outlook, as House Democratic leadership decided to marshal support against it." [Politico](#) (2/26, Everett, Sherman, 669K) cautioned that the new plan "could set up another confrontation with Senate Democrats, who have warned they will not accept anything that includes any immigration riders." Senate Minority Leader Reid said yesterday, "If they send over a bill with all the riders in it, they've shut down the government. We're not going to play games."

In an earlier, online version of the story, the [Washington Post](#) (2/27, Sullivan, 5.17M) noted that Reid also shot down the idea of a House-Senate conference, saying, "t is a waste of time. We will not allow a conference to take place." [Reuters](#) (2/27, Lawder, Cowan) notes that House Minority Leader Pelosi, who appeared with Reid, described the GOP's performance during the standoff as "a comedy of errors" and "major amateur hour." The [Wall Street Journal](#) (2/27, Peterson, Hughes, Subscription Publication, 5.67M) quotes Rep. Dennis Ross, a member of the GOP whip team, weighing in on the politics of the situation and saying, "If we open up any window of vulnerability with a Homeland Security shutdown, that changes the dynamics where the president will take advantage of that, for political reasons if nothing else."

The [Washington Times](#) (2/27, Miller, 644K) reports that "several Republican lawmakers" insist that talk of a shutdown "is a bluff by Democrats, because nearly 90 percent of the department's employees are deemed 'essential personnel' who would work during a shutdown and eventually get paid." Rep. Matt Salmon, for example, is quoted in the [Wall Street Journal](#) (2/27, Peterson, Hughes, Subscription Publication, 5.67M) lamenting the plan, and saying, "If I truly believe that what the president did was unconstitutional, and I do, and I believe the next two years are going to be fraught with this kind of stuff time and time again, there has to be a line in the sand somewhere."

Earlier in the day, [USA Today](#) (2/27, Kelly, 10.32M) reports, with no official indication of how House Republicans planned to move forward, Boehner "blew kisses to the assembled press" as reporters pressed him on the issue, and "dismissed any suggestion that he is in danger of losing his job as... speaker." Said Boehner of that possibility, "No, heaven's sake, no." The [Washington Times](#) (2/27, Miller, 644K), meanwhile, says Boehner "refused to back down," and notes that "tension remained high on Capitol Hill," while [McClatchy](#) (2/27, Douglas, Subscription Publication, 17K) quotes the Speaker as telling reporters, "It is not a fight amongst Republicans. ... All Republicans agree that we want to fund the Department of Homeland Security and we want to stop the president's executive actions with regard to immigration."

In the Senate, the [Huffington Post](#) (2/27, Foley, 281K) reported, Sen. Jeff Sessions, "one of the most adamant opponents of...Obama's executive actions on immigration," said yesterday "he is not planning to hold up a vote on a DHS bill that doesn't include measures to end the president's policies, even though he opposes the plan." In fact, said [The Hill](#) (2/26, Shabad, 224K), the Senate "could have a final vote as early as Friday."

Kirk Criticizes GOP Strategy, Dismisses House's Concerns. [The Hill](#) (2/26, Shabad, 224K) reported that GOP Sen. Mark Kirk criticized his party's strategy, saying, "I think this is a battle that Republicans should have never fought – junking up a DHS bill, especially when we get a threat against the Mall of America. ... We really, as a governing party, we've got to fund DHS and say to the House, 'Here's a straw so you can suck it up.'"

Hoyer Calls McCarthy A "Coward." [Politico](#) (2/26, French, 669K) reported that during the DHS debate in the House, "tensions boiled over Thursday evening when Minority Whip Steny Hoyer called a leading Republican a "coward," something for which he later apologized. Hoyer and Majority Leader Kevin McCarthy "were debating the weekend schedule on the House floor." When McCarthy "promised the House would recess Friday evening," Hoyer retorted, "You coward."

ON PARTY-LINE VOTE, FCC APPROVES TOUGH NET NEUTRALITY RULES. The FCC voted 3-2 on Thursday to approve strong net neutrality rules that include regulating both wireless and landline broadband providers as public utilities for the first time. The vote was split along party lines, with all three Democrats backing the rules and both Republicans opposing them, and that partisan division is a common theme in reporting. The media coverage is portraying the outcome as a historic win for Internet activists and a blow for Internet Service Providers. In addition, the President is also seen as a winner, as the FCC's rules, crafted by Chairman Tom Wheeler, are in line with what Obama has called for.

[NBC Nightly News](#) (2/26, story 6, 1:40, Holt, 7.86M) reported that supporters say net neutrality "will ensure open access to the web for everyone" while opponents "say it amounts to government control over the Internet." NBC (Costello) reviews the basics of the issue and adds, "Expected now, a vigorous legal challenge to this new law of the web."

The [CBS Evening News](#) (2/26, story 6, 0 25, Pelley, 5.08M) called the vote one for "historic change," with the FCC making "the Internet subject to Federal supervision. The result: big broadcasters, like Comcast and Verizon, will not be able to sell content providers like Netflix and Twitter faster data delivery service than everyone else. Lawsuits are next."

[ABC World News](#) (2/26, story 11, 0 25, Muir, 5.84M) said the vote "will make Internet service providers subject to regulation. The decision is drawing sharp criticism from Republicans, including House Speaker John Boehner, who warned it could hurt the US economy, saying, 'Overzealous government bureaucrats should keep their hands off the Internet.' Tonight, that battle far from over."

The [AP](#) (2/27, Flaherty) reports that with the vote, "internet activists declared victory over the nation's big cable companies." The vote "ushered in a new era of government oversight for an industry that has seen relatively little" and "represents the biggest regulatory shake-up to telecommunications providers in almost two decades."

[Politico](#) (2/26, Byers, Boliek, 669K) reported that Wheeler said, "The Internet is the most powerful and pervasive platform on the planet. It's simply too important to be left without rules and without a referee on the field." However, Republicans "see the rules as drastic over-regulation and a federal government power grab." GOP Commissioner Ajit Pai said, "The commission's decision to adopt President Obama's plan marks a monumental shift toward government control of the Internet." The [Washington Times](#) (2/27, Boyer, 644K) reports that backers "say the rules will give the government new power to prevent companies from blocking or slowing data" but FCC Republicans "said the move will lead to new utility-style taxes and inhibit competition."

The [New York Times](#) (2/27, Ruiz, Lohr, Subscription Publication, 9.97M) says that the "impact of the new rules will largely hinge partly on details that are not yet known," as the rules won't be published "for at least a couple of days, and will not take effect for probably at least a couple of months." In addition, lawsuits are "widely expected." [Reuters](#) (2/27, Selyukh) says that the telecom industry is expected to file suit, arguing that the regulations will reduce investment and crush innovation.

[USA Today](#) (2/27, Yu, Snider, 10.32M) reports that the vote "triggered jubilation among open Internet enthusiasts, but the powerful telecom industry is poised for a legal challenge to the new rules." In addition, congressional Republicans are "pushing legislation that would supersede the FCC's approach." In a front-page story, the [Washington Post](#) (2/27, A1, Fung, 5.17M) covers the basics and says that if a Republican should win the White House in 2016, "analysts and industry lobbyists say, a GOP-led FCC could decide to reverse any regulations passed by Wheeler's commission on Thursday."

The [Daily Caller](#) (2/27, Macri, 318K) says that the vote is "a victory for content creators like Google YouTube, Amazon, and Netflix, the latter of which brokered higher-paying deals with both Verizon and AT&T earlier this year to continue transmitting its traffic to customers at acceptable speeds."

The [Wall Street Journal](#) (2/27, Gryta, Subscription Publication, 5.67M) says that despite all the controversy, little change is likely in the near future for consumers. Wheeler reiterated on Thursday that he was invoking Title II only to give the FCC the authority to enforce net neutrality, particularly since previous efforts had fell in court, and vowed to avoid enforcing its broadest provisions, such as price regulation.

The [Huffington Post](#) (2/27, Liebelson, 281K) says that "a few months ago" such tough rules were "considered a pipe dream of net neutrality activists," but the President "came out in support of Title II and tough net neutrality rules in November, and Wheeler had to contend with that position as well as millions of comments from the general public in support of net neutrality." The [Christian Science Monitor](#) (2/26, Bruinius, 380K) focused on the role of HBO comedian John Oliver, who made calls for net neutrality a regular feature of his program.

President Hails Vote. The [AP](#) (2/27, Flaherty) reports that the President wrote, "Today's FCC decision will protect innovation and create a level playing field for the next generation of entrepreneurs," adding thanks to those who lobbied for the rules, "it wouldn't have happened without Americans like you." [USA Today](#) (2/27, Korte, 10.32M) adds

quotes the President, "I ran for office because I believed that nothing can stand in the way of millions of voices calling for change. That's the backbone of our democracy and you've proven that this timeless principle is alive and well in our digital age."

Similar Dutch Law Not "Internet Armageddon." The [New York Times](#) (2/27, Scott, Subscription Publication, 9.97M) reports that the Netherlands imposed rules two years ago "demanding that Internet providers treat all traffic equally, the same sort of rules that the United States adopted on Thursday." The law "was not the Internet Armageddon that many Dutch telecommunications companies, industry lobbyists and some lawmakers had predicted."

More Commentary. In an editorial, [USA Today](#) (2/27, 10 32M) endorses the move, saying that the new rules are not "a federal takeover, or government censorship or, as some critics put it, Obamacare for the Internet." However, the "trick now will be for the FCC not to overregulate," as it has "given itself broad powers." USA Today says that there is "reason for concern that future commissioners might be tempted to be drawn into these areas over time, as regulators are wont to do."

In an opposing op-ed in [USA Today](#) (2/27, 10 32M), former FCC Commissioner Robert McDowell writes that the vote "marked the largest government intervention into the Internet ecosphere in American history." He adds that the FCC's "power grab" has discarded "the bipartisan light-touch regulatory framework laid out during the Clinton administration." McDowell says that history suggests that "utility-style regulation raises costs to consumers, reduces investment and innovation, and creates uncertainty due to the politics-driven nature" of Federal oversight.

In an editorial, the [Wall Street Journal](#) (2/27, Subscription Publication, 5.67M), which has consistently criticized the rules, says that the vote was a low point for US innovation and economic freedom, arguing that the FCC is seizing political control of a market that has thrived without interference.

OBAMA SAYS KEYSTONE PIPELINE HAS BEEN "HYPED" BY OIL INDUSTRY. During an interview yesterday, [KMBC-TV](#) Kansas City, MO (2/26, 6 02 p.m. CST, 49K) asked the President a question from a viewer about his veto of the Keystone XL pipeline bill. President Obama: "Unfortunately, the Keystone pipeline has been hyped a lot by the oil industry but the fact of the matter is this is Canadian oil being shipped through the United States and creates approximately 250-300 permanent jobs. Now, 250-300 permanent jobs is important, but we could be creating millions of jobs all across the country if we were building American infrastructure."

[WDAY-TV](#) Fargo, ND (2/26, 6:00 p.m. CST, 1K) also asked the President about his veto. President Obama: "Part of the reason North Dakota has done so well is because we have been very much promoting domestic, US energy use. I've already said I'm happy to look at how we can increase pipeline production for US oil, but Keystone is for Canadian oil, to send that down to the Gulf. It bypasses the US, is estimated to create a little over 250 maybe 300 permanent jobs. We should be focusing more broadly on American infrastructure for American jobs for American producers, and that's something we very much support."

Editorial Wrap-Up:

NEW YORK TIMES. "Wisconsin, Workers And The 2016 Election." In an editorial, the [New York Times](#) (2/27, Subscription Publication, 9.97M), noting the advance of right-to-work legislation in Wisconsin, says that in "a nation where the long decline in unions has led to a pervasive slump in wages, Republicans' support for anti-union legislation is at odds with their professed commitments to helping the middle class." The Times suggests that the issue, and similar others nationwide, could play a role in the 2016 elections.

"North Korea's Nuclear Expansion." In an editorial, the [New York Times](#) (2/27, Board, Subscription Publication, 9.97M) warns that North Korea "could be on track to have an arsenal of 100 nuclear weapons by 2020, according to a new research report." The prediction, it says, "goes well beyond past estimates and should force renewed attention on a threat that has been eclipsed by other crises."

"Food Waste Grows With The Middle Class." The [New York Times](#) (2/27, Subscription Publication, 9.97M) says in an editorial that "massive food waste" is "now being measured as a serious threat to the global environment and economy." The Times argues that "antiwaste programs" should be used to reduce food waste by "20 percent to 50 percent" that could also "save an estimated \$120 billion to \$300 billion a year."

"Community Colleges That Work." In an editorial, the [New York Times](#) (2/27, Subscription Publication, 9.97M) notes that when the President Obama called last month for making community college tuition-free for millions of students, "he pointed out that graduation rates would have to improve" and noted that the City University of New York system "had already shown the way." A recent study "said the benefits of CUNY's approach...were more impressive than those of any other community college...and called it a 'highly promising strategy' for raising graduation rates among educationally and economically disadvantaged groups."

WASHINGTON POST. "Fighting MERS In Saudi Arabia." In an editorial, the [Washington Post](#) (2/27, 5.17M) says MERS "is surging anew in Saudi Arabia and raising familiar questions" about the virus' origins and "how it is spreading." The Post adds that "a 'breach' in Saudi Arabia is of concern to the whole world."

"Republicans And Common Core." In an editorial, the [Washington Post](#) (2/27, 5.17M) criticizes New Jersey Gov. Christie, among other GOP 2016 hopefuls, for turning against Common Core standards. The Post says that what makes Christie's "born-again criticism of Common Core so rich is how ferociously he promoted New Jersey's adoption of Common Core in twice going after Race to the Top funds."

"Puerto Rico's Debt Crisis." In an editorial, the [Washington Post](#) (2/27, 5.17M) says that Puerto Rico is struggling with a "\$72.6 billion debt burden, sluggish growth and a recent downgrading of its credit ratings to junk level," and the situation could grow worse. The Post says that legislation introduced in Congress would allow its "entities and municipalities to declare bankruptcy," and encourages Congress to pass it.

WALL STREET JOURNAL. "Welcome To The Obamanet." In an editorial, the [Wall Street Journal](#) (2/27, Subscription Publication, 5.67M), which has consistently criticized net neutrality rules, says that the vote was a low point for US innovation and economic freedom, arguing that the FCC is seizing political control of a market that has thrived without interference.

"Andrew Cuomo's East Berlin." In an editorial, the [Wall Street Journal](#) (2/27, Subscription Publication, 5.67M) reports a ban on fracking has led to 15 towns in New York declaring they want to secede from the state and join Pennsylvania.

"Speech Of The Year." In an editorial, the [Wall Street Journal](#) (2/27, Subscription Publication, 5.67M) credits the Obama Administration with turning what could have been a routine appearance by a foreign official into a major political event. To the Journal, the Administration is motivated by animus toward Netanyahu, and aims to scare Israeli voters into replacing him as prime minister.

"Modi's Make-Or-Break Budget." In an editorial, the [Wall Street Journal](#) (2/27, Subscription Publication, 5.67M) says Indian Prime Minister Narendra Modi must use his first budget, to be unveiled on Saturday, to show he is capable of transforming India and seeking reform.

NY Times Editorial: Monuments to America's Past, and Future

A mural in the Pullman neighborhood of Chicago.

By THE EDITORIAL BOARD
FEBRUARY 26, 2015

A historic industrial district in Illinois, a weed-choked gulch in Hawaii and a stretch of riverine Colorado wilderness, home to eagles and bears. These three dissimilar American places are the newest national monuments, established this month by President Obama, to be protected forever by the federal government from development and destructive neglect.

The best-known is the [Pullman National Monument](#) in the Chicago neighborhood built by the Pullman Company, whose railroad-car employees helped build the African-American middle class and laid the foundations of the Civil Rights Movement. The [Honouliuli National Monument](#), outside Honolulu, protects the site of a vanished, nearly forgotten internment camp that held Japanese-American civilians, along with thousands of foreign prisoners, during World War II. The [Browns Canyon National Monument](#) lies along a rocky stretch of the Arkansas River Valley rich in wildlife and popular for rafting, hiking and fishing.

Presidents from Theodore Roosevelt to Mr. Obama have used their authority under the Antiquities Act to set aside places like these. Many of the earliest monuments, established soon after the law was enacted in 1906, protected ancient American Indian settlements in the Southwest that would otherwise have been looted and returned to dust.

Through those places and more recently protected ones — like Pullman, Honouliuli and the [African Burial Ground National Monument](#), created in 2006 on the site of an office tower in Lower Manhattan — the American public gains a richer understanding of a history that is too

often overlooked, distorted or misremembered. Other monuments in fragile wilderness areas and vast, mostly pristine expanses of ocean, protect the American future.

DOI in the News:

SECRETARY JEWELL, SEN. MURKOWSKI FACE OFF IN BUDGET HEARING. [The Hill](#) (2/25, Cama, 224K) reports that Senate Republicans "sharply criticized Interior Secretary Sally Jewell Tuesday for her budget request and other actions that they say are hurting energy development and the economy." Sen. Lisa Murkowski, chairwoman of the Energy and Commerce Committee, has "repeatedly clashed with Jewell over how the administration treats Alaska, and kept up the pressure at Tuesday's hearing." Murkowski told Jewell, "I don't want to make this personal, but the decisions from Interior have lacked balance, and instead of recognizing the many opportunities Alaska has with regard to resource production, you have enabled an unprecedented attack on our ability to responsibly bring these resources to market."

[Bloomberg News](#) (2/24, Drajem, 2.94M) reports that Murkowski said "the Obama administration's restrictions on oil production in her state threatens to dry up supplies that could flow through the trans-Alaska pipeline." Murkowski said to Jewell, "The actions of this administration seem destined to shut down our trans-Alaska pipeline, weaken our economy, forcing our state to make steep budget cuts and really violating the promises that were made to us at statehood and since then."

The [Natural Gas Intelligence](#) (2/25) reports that Murkowski said, "I'm frustrated, I'm very frustrated with the delays, the denials, the restrictions that we continue to see from the Department of Interior."

The [Alaska Public Radio Network](#) (2/24, 2K) reports that Jewell said, "I am fully committed to supporting the efforts in the North Slope of Alaska to keep the trans-Alaska pipeline full. As you know I worked on that pipeline as a college student. As a petroleum engineer I understand how fields peak, and Prudhoe Bay oil field and related oil fields have been passed their peak production for some time, I'm aware of that."

The [Alaska Public Radio Network](#) (2/24, 2K) reports that Jewell added, "And we have recently approved ConocoPhillips' preferred proposal for drilling in the National Petroleum Reserve. Offshore, 90 percent of the estimated recoverable oil and gas will be available for leasing in the Beaufort and Chukchi seas."

The [Talk Radio News Service](#) (2/24) reports that "during her testimony Jewell focused on the positives of the budget, calling it balanced and 'forward-looking.'" Jewell said it "provides targeted investments to grow our domestic energy portfolio to revitalize our national parks as they approach the 100th anniversary."

The [Environment & Energy Publishing](#) (2/25, Subscription Publication, 705) reports that "Jewell found an ally in ranking member Maria Cantwell (D-Wash.), who called her budget 'a balanced and forward-leaning proposal that creates jobs and long-term economic opportunity.'" Cantwell also "praised Obama and Jewell's decision to recommend new wilderness in the Arctic National Wildlife Refuge."

Also providing coverage is the [Environment & Energy Publishing](#) (2/25, Subscription Publication, 705).

Sen. Cassidy Criticizes Revenue Sharing Proposal. The [New Orleans Times-Picayune](#) (2/24, 621K) reports that Sen. Bill Cassidy "used a budget hearing by the Senate Energy and Natural Resources Committee to castigate Interior Secretary Sally Jewell over the Obama administration's budget proposal to reverse Landrieu's 2006 legislation providing revenue sharing to Louisiana and three other Gulf states for off-shore oil and gas production." Cassidy said, "I am incredibly – I cannot put enough hyperbole in front of this – opposed to the department's budget proposal to deprive the Gulf Coast states of revenue promised under the Gulf of Mexico Security Act." Jewell responded that "the administration's proposal to 'revisit' the revenue sharing legislation reflects the 'balancing of assets (off-shore oil and gas) of all Americans' for communities throughout the nation impacted by serious environmental challenges."

Sen. Franken Pushes For Federal Funding For Leech Lake Band Of Ojibwe School. [WDIO-TV](#) Duluth, MN (2/25, 1K) reports that "six months after federal officials visited a school on the Leech Lake Band of Ojibwe Reservation, Sen. Al Franken says their efforts to improve the facilities are appreciated – but not enough." On Tuesday, Franken asked Jewell what "she planned to do to improve the facilities." In response, Jewell said, "It's in bad shape, and it needs to be replaced. I will tell you that I've seen other schools that are in equally bad shape, and it just breaks my heart that around the country this is what we do in supporting Indian education."

Sen. Wyden Talks Oregon Priorities With Secretary Jewell. The [Portland \(OR\) Go Local PDX](#) (2/25) reports that "on Tuesday, Senator Ron Wyden discussed Oregon priorities with US Department of Interior Secretary Sally Jewell at an Energy and Natural Resource Committee budget meeting." Wyden "stressed the importance of getting mandatory funding back for P LT, Jewell's continued support for the Upper Klamath Basin Agreement and funding for wildfire prevention."

Sen. Gardner Wants Funding For Arkansas Valley Conduit. The [Pueblo \(CO\) Chieftain](#) (2/25, 79K) reports that Sen. Cory Gardner wants the BOR to fund the Arkansas Valley Conduit. Gardner "questioned Department of Interior Secretary Sally Jewell and Deputy Secretary Mike Connor Tuesday about insufficient conduit funding in an energy and natural resources committee hearing."

HONOULIULI INTERNMENT CAMP DESIGNATED NATIONAL MONUMENT. [KHON-TV](#) Honolulu (2/24, 73K) reports that "President Barack Obama officially designated Honouliuli Internment Camp as a national monument during a signing ceremony at the White House Tuesday." The article notes that "Gov. David Ige and Hawaii's Congressional delegation were present for the signing, as were Carole Hayashino, president and executive director of the Japanese Cultural Center of Hawaii, and Jacec Mikulanec, president of the Honolulu Japanese American Citizens League."

Also reporting on the story are [NBC News](#) (2/25, 2.71M) and the [Honolulu Civil Beat](#) (2/25, 41).

Designation Of National Monuments Lauded. For the "Congress Blog" of [The Hill](#) (2/25, Pfund, Baruch, 224K), Nancy Pfund and Tom Baruch, co-chairs of the Conservation for Economic Growth Coalition, write that their group "believes that the recently designated monuments are prime examples of the expansion of cultural and recreational opportunities so important to the growth and culture of entrepreneurial, job-creating companies in the United States." They argue that "public lands are important to entrepreneurial companies not only because they help recruit and keep talented employees," but because they are "enablers of these companies' cultures."

For the "Congress Blog" of [The Hill](#) (2/25, Scott, 224K), David Scott, president of the Sierra Club, writes that "the new monuments, including the birthplace of the first African-American union in America, the largest prisoner-of-war camp and longest used World War II internment camp, and a premier trout fishing and outdoor recreation destination, represent the span of what our country's public lands should represent – our full American story." He adds that "these monuments embody the historic, cultural, and natural wonders that make up our nation's outdoor legacy." Scott says that through "Obama's action, they will now be permanently protected as places of remembrance, historic contribution and inspiration for future generations."

REP. BISHOP HOPES TO WORK WITH SECRETARY JEWELL. [The Hill](#) (2/25, Cama, 224K) reports that "the new chairman of the House Natural Resources Committee sees the Interior Department's budget as a way to inject creative thinking into issues like oil drilling on federal land and offshore." Rep. Rob Bishop will "hear next week from Interior Secretary Sally Jewell on her agency's budget request for 2016, and he's optimistic that he and his colleagues can come up with a better plan than the Obama administration on energy and other priorities." Bishop said, "We're going to welcome Sally Jewell, because I think she's a different kind of Interior secretary. She has a different background, she thinks differently than some who have come around before, and I'm excited to try and work with her."

SECRETARY JEWELL: FEDERAL REGULATIONS WON'T TRUMP TOUGHER STATE FRACKING REGULATIONS. [FuelFix](#) (2/24, 7K) reports that "coming government mandates for hydraulic fracturing on federal and Indian lands will not trump the rules in states that already have tougher regulations in place, Interior Secretary Sally Jewell said Tuesday." Jewell said, "These are minimal standards on federal and tribal lands. If the state has a higher standard, the state standard will be adopted within that state."

WHITE HOUSE ANNOUNCES GEN-I NATIVE YOUTH CHALLENGE. The [Indian Country Today Media Network](#) (2/24, 49K) reports that President Obama "announced the Gen-I Native Youth Challenge at the 2014 White House Tribal Nations Conference to tribal leaders and youth in attendance, but at the launch of the program Native youth learned how to become actively involved." The article notes that "Cabinet Secretaries will be participating in a listening tour throughout 2015 – which kicked off February 10 with US Interior Secretary Sally Jewell in Phoenix, Arizona." Jewell said in an Interior video released February 20, "My colleagues that serve in the Obama administration will host similar listening sessions with Native Youth across the country. I look forward to joining them, and continuing my own travels too, as we work to lift up the voices of an often forgotten community and we work to create a path for real opportunity."

TINY ALASKA VILLAGE TO BE RELOCATED DUE TO CLIMATE CHANGE. The [Washington Post](#) (2/24, Mooney, 5.17M) reports that the 400 residents of the "tiny and isolated" Alaska town of Kivalina will have to be relocated because the ice around the island on which it lies has become too thin in recent years to allow the Eskimo residents to continue to hunt bowhead whales. The Federal government says that soon, because of climate change, it "may be too dangerous to live here at all, with less sea ice to protect the barrier island from powerful waves that wash across the village."

CONSERVATION GROUPS UNITE TO OPPOSE ATTEMPTS TO TAKEOVER FEDERAL LAND. The [Denver Post](#) (2/25, Willoughby, 804K) reports that a coalition representing more than 30 sportsmen's conservation groups and outdoor industry leaders will gather on Wednesday to protest attempts by some Western states to take over federally managed public lands. Kate Zimmerman, NWF's public lands policy director, said, "Once again, a survey of public sentiment underlines just how off-track state and congressional lawmakers are when they push to take public lands out of public hands. Voters get it: These are America's public lands. They belong to all of us, and we all have an obligation to take care of them and ensure our children, grandchildren and beyond enjoy the same opportunity to experience America's great outdoor legacy."

Utah Urged To Back Off Public Land Grab. In a piece for the [High Country \(CO\) News](#) (2/25, 74K), Hillary Hoffmann, a law professor at Vermont Law School's Environmental Law Center, advises Utah to back off its Transfer of Public Lands Act. She argues that "the only viable path forward is to pass transfer legislation through Congress and obtain the president's signature – an approach that isn't going anywhere." Hoffmann concludes that "it's time for the backers of this doomed land grab to admit defeat and leave America's public lands alone."

In an editorial, the [Salt Lake \(UT\) Tribune](#) (2/25, 405K) says that Utah politicians are fighting a "lost battle."

Wyoming's Proposed Land Grab Criticized. In an op-ed for the [Casper \(WY\) Star-Tribune](#) (2/25, 90K), Erik Molvar, the Sagebrush Sea Campaign Director for WildEarth Guardians criticizes Wyoming's House Bill 209, which "requires the federal government to relinquish public lands across the state by 2017 and transfer them to the State of Wyoming so they can be sold off." He argues that "this is an act of startling hubris that, if implemented, will irreparably harm every Wyoming resident."

FEDERAL EMPLOYEE FIRINGS HIT RECORD LOW IN 2014. The [Federal Times](#) (2/24, 119K) reports that "even as lawmakers press for greater accountability within government, agencies have fired fewer employees than at any time in the last 10 years, according to data from the Office of Personnel Management." According to the data, "agencies fired 9,537 federal employees for discipline or performance issues in fiscal 2014, down from 9,634 in 2013 and down from a high of 11,770 in fiscal 2010." The article notes that the Interior Department, "which fired 220 employees in 2014 — up from 206 in 2013," was among the "agencies that saw smaller increases in firings."

GWICH'IN PEOPLE WELCOME ARCTIC NATIONAL WILDLIFE REFUGE RECOMMENDATION. In an op-ed for the [Anchorage \(AK\) Dispatch News](#) (2/24, 146K), Julian Roberts, chief of the Native Village of Venetie tribal government, writes that "many here in Alaska welcomed President Barack Obama's announcement that the federal government's final Comprehensive Conservation Plan would recommend that Congress designate the coastal plain and other areas of" the Arctic National Wildlife Refuge as "wilderness – the highest level of protection for public lands." Roberts notes that the Gwich'in Nation was "directed by our elders in 1988 to seek permanent protection because it is the primary birthplace and nursery of the Porcupine herd." The Gwich'in are "truly thankful this administration has heard us and is upholding the subsistence rights of the Gwich'in Nation with its call for wilderness."

America's Great Outdoors:

National Park Service:

RED ROCKS, CONSERVATION CORPS CAMP NOMINATED FOR NATIONAL HISTORIC LANDMARK STATUS. The [Denver Post](#) (2/25, Klemaier, 804K) reports that Red Rocks Park and Amphitheatre and a Civilian Conservation Corps camp in Morrison have nominated to become National Historic Landmarks. NPS historian Christy Dickinson said, "It highlights the workers who built the amphitheater — the craftsmanship, the workmanship. It helps tell a more complete story of the park, where young men lived and worked during the (Great) Depression."

YOSEMITE PREPARES FOR TWO MILESTONE CELEBRATIONS. The [My Mother Lode \(CA\)](#) (2/25, 1K) reports that "ahead of National Park Service (NPS) plans to celebrate its centennial next summer, Yosemite National Park officials announce an itinerary of ten signature projects they are undertaking to enhance visitor experience, restore critical ecological and wildlife habitats and engage the next generation of park stewards." Yosemite National Park Superintendent Don Neubacher said, "These ten signature centennial projects will continue the legacy of the National Park Service and celebrate the past 100 years of preservation and enjoyment of national parks across the country." The article notes that "the park will also commemorate its own milestone 125th anniversary on Oct. 1 with a number of events."

NATIONAL PARK STRAW POLL SET FOR EAST MILLINOCKET RESIDENTS. [WCSH-TV](#) Portland, ME (2/24, 30K) reports that "East Millinocket is giving the town's residents another chance to vote on creating a national park on 75,000 acres of nearby forested land owned by Roxanne Quimby and her son Lucas St. Clair."

[WABI-TV](#) Bangor, ME (2/24, 17K) reports that "the Board of Selectmen agreed at a meeting Monday night to take an opinion poll on June 11th."

20 STAFF AND UNIVERSITY STUDENTS RESCUED BY HELICOPTER FROM GRAND CANYON. The [AP](#) (2/25) reports that "twenty Northern Arizona University students and staff who were stranded in the snow near the Grand Canyon's North Rim have been rescued." According to Coconino County sheriff's spokesman Gerry Blair, "the 16 students, two instructors and aides were flown out three at a time in a helicopter." Blair says "they're in good health."

Coverage by the AP was also picked up by the [Houston Chronicle](#) (2/25, 2.28M), the [Washington Post](#) (2/24, 5.17M), and the [US News & World Report](#) (2/24, 685K).

Also reporting on the story are the [Arizona Republic](#) (2/24, 1.14M), [USA Today](#) (2/24, Mitchell, 10 32M), and [Reuters](#) (2/25).

CARLSBAD CAVERNS NATIONAL PARK REOPENS. The [Carlsbad \(NM\) Current-Argus](#) (2/25, 18K) reports that "after closing its doors all day yesterday due to icy roads, the Carlsbad Caverns National Park reopened today." The park is "now operating under normal winter hours."

ADDITIONAL COVERAGE OF DUO'S DAWN WALL CLIMB. The [Denver Post](#) (2/25, Blevins, 804K) reports on Tommy Caldwell and Kevin Jorgeson's climb of El Capitan's Dawn Wall in Yosemite National Park.

Bureau of Land Management:

REPORT FINDS BLM MISSING OUT ON RECREATIONAL FEES. The [Bend \(OR\) Bulletin](#) (2/25, 94K) reports that the BLM is "missing out on potential revenue by not charging fees at some public camping sites and below-market prices at others, according to a report released Tuesday by the Department of the Interior's inspector general." The report states, "BLM does not maximize its opportunities to charge fees in a way that will generate revenue and protect resources. At a time when Federal agencies face continually decreasing appropriations, taking advantage of this (fees) program demonstrates BLM understands the need for additional funding."

BLM TO PARTICIPATE IN TESTING OF RECOVER SYSTEM. [Government Computer News](#) (2/24, 2K) reports that "to help coordinate data and wildfire response among a variety of agencies, the Rehabilitation Capacity Convergence for Ecosystem Recovery (RECOVER) cloud-based decision support system will assist teams create a post-fire rehabilitation plan." The article notes that "partner agencies using the program for Phase 1 testing include Department of Interior, Bureau of Land Management and the Idaho Department of Lands."

BLM TO ROUND UP WILD HORSES IN UTAH. The [AP](#) (2/25) reports that the BLM will "round up and remove wild horses in central Utah near the Nevada border Wednesday." BLM authorities say "they will be removing the wild horses near Utah State Highway 21 that are causing concerns about public health and safety."

INTERIOR DISPUTES WYOMING'S WILD HORSE MANAGEMENT CLAIMS. The [Law 360](#) (2/25, 9K) reports that the Interior Department "asked a Wyoming federal court Monday to dismiss a petition from the state calling for a review of the Bureau of Land Management's refusal to comply with a request that the agency reduce the state's wild horse population under the Wild Free-Roaming Horses and Burros Act." According to the memorandum supporting the motion to dismiss, the BLM is "entitled to broad discretion in its management of wild horse populations in designated Herd Management Areas, or HMAs."

Fish and Wildlife Service:

LAWSUIT FILED OVER RIO GRANDE LEVEE PROJECT. The [AP](#) (2/24) reports that "an environmental group that has been pushing the federal government to let the Rio Grande flow freely is taking aim at a levee project along the river." WildEarth Guardians on Tuesday filed a lawsuit against the Army Corps of Engineers and the FWS. The organization "claims the construction of dozens of miles of levees from the San Acacia Dam south to Elephant Butte Reservoir would have a negative effect on the Rio Grande silvery minnow and other endangered species."

Also reporting on the story is the [Las Cruces \(NM\) Sun-News](#) (2/25, 39K).

GROUPS CALL FOR RESTORATION OF RED WOLF TO WILD. The [AP](#) (2/24) reports that "several animal welfare advocacy groups have signed a letter to federal wildlife officials supporting efforts to restore the endangered red wolf to the wild." The letter dated Tuesday to the FWS "asks federal officials to oppose recent resolutions from the North Carolina Wildlife Resources Commission."

WHITE-NOSE SYNDROME CAUSES DECLINE IN BAT POPULATIONS. The [Louisville \(KY\) Courier-Journal](#) (2/24, 379K) reports that "some bat populations across Kentucky have fallen by up to 90 percent as the full force of the deadly white-nose syndrome settles in, three years after it really took hold in the state, according to the latest scientific surveys." Mammoth Cave National Park scientists said "this week they have completed their winter bat counts in six of the caves they use to track bat numbers, and for three species — little brown, tricolor and Indiana — the preliminary results are grim." Meanwhile, "Kentucky wildlife officials wrapping up winter surveys of more than 70 caves in 21 counties are seeing the same thing for tricolored and little brown bats, which not had been among the most common bats in the commonwealth."

DEAD BALD EAGLE FOUND IN GULF STATE PARK The [Alabama Live](#) (2/25, 502K) reports that "officials at Gulf State Park responded Sunday to reports of a dead bald eagle found near a picnic area at Lake Shelby, not far from the park's two-year-old zip line course." The FWS "currently has the remains, where special agent Donnie Grace will conduct an analysis later this week to try to determine cause of death."

19 MANATEES RESCUED FROM CENTRAL FLORIDA DRAIN PIPE. [WFOR-TV](#) Miami (2/24, 57K) reports that "an unusual rescue in Central Florida has saved the lives of 19 manatees." The manatees became "lodged in a large drainage pipe near Cape Canaveral." According to the article, "a manatee-rescue team from the Florida Fish and Wildlife Conservation Commission, along with police and firefighters, brought heavy earth-moving equipment to the Satellite Beach neighborhood, located on a barrier island along the Atlantic Ocean," and "one by one, each manatee was carefully pulled to safety."

US Geological Survey:

LAKE OKEECHOBEE PROJECT COULD TAINT DRINKING WATER. The [South Florida Sun Sentinel](#) (2/24, 660K) reports that "costly work to strengthen Lake Okeechobee's troubled dike may unintentionally pose a risk to drinking water supplies near the lake, according to new federal findings." The article notes that "a wall built to reduce the amount of lake water leaking through the southeast portion of the dike also appears to have allowed more saltwater from deep below ground to mix with a freshwater aquifer." According to the USGS, "that spike in salt levels could affect wells near the dike as well as farmland in western Palm Beach County."

USGS TO CONDUCT STUDY FISH OF THE SANTA ANA RIVER. The [Highland \(CA\) Community News](#) (2/25, 38K) reports that "San Bernardino Valley Municipal Water District (Valley District) and the Upper Santa Ana River Habitat Conservation Plan (HCP) Partners have contracted the US Geological Survey (USGS) to conduct the most extensive research that's ever been done involving native fishes in the Santa Ana River." The study will "examine the current population of Santa Ana sucker and Arroyo chub in approximately seven miles of the river as well as factors that create the best habitats for these threatened fish and other native species."

Securing America's Energy Future:

Renewable Energy:

BIRD CONSERVATION GROUP WANTS TIGHTER REGULATIONS ON WIND ENERGY OPERATORS. [KCET-TV](#) Los Angeles (2/25, 15K) reports that "a national bird protection group is calling on the federal government to require wind energy operators to get permits to kill birds that are protected under one of the nation's oldest environmental laws." The American Bird Conservancy, "which projects more than 1.4 million annual bird deaths in coming years from wind turbines and their associated transmission lines, petitioned the US Fish and Wildlife Service this month to require owners of wind power facilities to apply for permits under the Migratory Bird Treaty Act of 1918 before being allowed to build their projects." The FWS has been "asking wind companies to follow voluntary bird-protection guidelines when siting and designing their projects, but American Bird Conservancy claims in its petition that the voluntary approach has been roundly ineffective at protecting birds from wind turbines."

DESERT RENEWABLE ENERGY CONSERVATION PLAN RECEIVES 12,000 COMMENTS. The [Palm Springs \(CA\) Desert Sun](#) (2/24, 85K) reports that "more than 12,000 people submitted comments on the Desert Renewable Energy Conservation Plan before this week's deadline, many of them urging policymakers to protect specific parts of the desert from development." The article notes that "major environmental groups have largely supported the idea of balancing large-scale renewable energy development and conservation, but local activists have called the plan an existential threat to the desert's iconic landscapes and delicate ecosystems."

OKLAHOMA BILL PLACES RESTRICTIONS ON WIND INDUSTRY. The [AP](#) (2/25) reports that legislation "to place new restrictions on the growing wind industry in Oklahoma has passed a House Committee." On Tuesday, "the House Energy and Natural Resources Committee voted 11-2...for the bill to restrict how close giant wind turbines can be built near airports and schools, and to require wind energy producers notify nearby property owners before construction." In addition, the bill "requires a public hearing to be held."

SIMMONS, LOFTHOUSE DISPARAGE FEDERAL WIND SUBSIDIES AS UNNECESSARY. Writing for the "Contributors" blog in [The Hill](#) (2/25, Simmons, Lofthouse, 224K), Director of the Institute for Political Economy Randy Simmons, PhD and Utah State University political economy professor Jordan Lofthouse asked, "What do we have to show" for 23 years of Federal Production Tax Credit subsidies to wind power? The answer, they said, is that only "1.6 percent of total U.S. energy in 2014" came from wind power, but "now the Department of Energy wants to reach a ridiculous goal of 20 percent wind energy by 2030." In the opinion of the authors, continuing government subsidies for wind power to help the "fledgling" sector reach this goal is "crony capitalism."

Onshore Energy Development:

IN OSAGE COUNTY, OIL PRODUCERS BLAME BIA FOR ECONOMIC WOES. The [Tulsa \(OK\) World](#) (2/25, 395K) reports that "drilling has come to a virtual standstill in Osage County, and the problem started last summer when the price per barrel was still over \$100, long before production began slipping anywhere else." The article notes that "producers still have more than 600 pending applications to drill in Osage County." According to producers, "the bigger problem" is the BIA, "which is responsible for processing those permit applications, since the mineral rights belong to the Osage tribe."

COLORADO'S OIL AND GAS TASK FORCE FORWARDS NINE PROPOSALS TO HICKENLOOPER. The [Denver Post](#) (2/25, Jaffe, 804K) reports that Colorado's 21-member oil and gas task force, started by Gov. John Hickenlooper, is supporting increased community input at the local level on large oil and gas projects. At the same time, the task force did not endorse giving local governments increased authority on drilling projects and land use. The state's Department of Natural Resources Executive Director Mike King supported the task force's nine recommendations, which will be sent along to Hickenlooper.

Offshore Energy Development:

NOAA PROPOSES EXPANSION OF CRITICAL HABITAT AREA FOR NORTH ATLANTIC RIGHT WHALES. [McClatchy](#) (2/25, Cockerham, Subscription Publication, 17K) reports that "oil and gas companies hoping to drill in the Atlantic Ocean will have to contend with a new federal proposal to declare waters off the Carolinas and Georgia as critical for endangered whales." The National Oceanic and Atmospheric Administration is "proposing a huge expansion in the critical habitat area for endangered North Atlantic right whales." According to the article, "if the habitat proposal is finalized, companies that want to explore for energy must show that the activities wouldn't harm the critical habitat or the whales." The BOEM would then have "to consult with NOAA to see whether its scientists agree."

In his column for the [Florida Times-Union](#) (2/24, 269K) Ron Littlepage criticizes seismic testing in the Atlantic Ocean. He notes that "the extremely rare North Atlantic Right Whales, which are familiar to our coast, would be in danger." Also, "fisheries that are commercially important would likely be impacted."

SEVEN GOVERNORS AGREE ON LEGISLATIVE STRATEGY FOR REVENUE SHARING FROM OFFSHORE ENERGY. [Bloomberg BNA](#) (2/25, 8K) reports that "seven coastal

governors agreed Feb. 20 to push Congress for a bill to set a multi-state strategy for revenue sharing from federal offshore energy development, North Carolina Gov. Pat McCrory (R) said after the governors' meeting." The article notes that "the governors have not yet settled on a model for the sharing of federal revenues with states—whether it should follow the established pattern of the Gulf Coast region or another approach, he said." According to McCrory, "the governors would prefer to see either one system of sharing revenues or at least regional approaches rather than state-by-state approaches."

Also reporting on the story is the [Anchorage \(AK\) Dispatch News](#) (2/24, 146K).

US, MEXICO TRANSBOUNDARY HYDROCARBONS AGREEMENT TAKES FORM. The [E&P Magazine](#) (2/25) reports that as special assistant to the chief for the BOEM's Office of Strategic Resources, Robert Sebastian is "fielding questions and sharing information about the transboundary agreement between Mexico and the US concerning oil and gas operations in the Gulf of Mexico." At Rice University's Baker Institute, Sebastian said, "Implementation is still ongoing. It is really just beginning. The agreement is really, to me, just a framework. It's a very good one, but there are many details, processes and procedures to work out." The article notes that "among these are developing the model utilization agreements that will be used, putting in place Joint Commission rules of procedure and establishing dispute settlement mechanisms such as mediation, arbitration and expert determination if the parties cannot reach agreements, he said."

BSEE ISSUES ALERT ON DP SYSTEM FAILURE. The [Marine Link](#) (2/25, 1K) reports that the BSEE has "issued a Joint Safety Alert addressing a dynamic positioning (DP) incident involving an offshore supply vessel (OSV) which resulted in a loss of position while conducting a critical Outer Continental Shelf (OCS) activity."

Also providing coverage are the [Maritime Executive](#) (2/25, 21) and the [Marine Log](#) (2/25, 249).

OBAMA ADMINISTRATION URGED PURSUE ENERGY EXPLORATION. In an op-ed for [Roll Call](#) (2/25, Subscription Publication, 102K), Rep. Renee Ellmers writes that "in order to unleash our true energy potential, we must explore all options — including exploration on federal lands. It is time to have a long-term energy policy for America." Ellmers views the recent Mid- and South-Atlantic offshore plan as "one step forward and two steps back because" it "has removed millions of acres of potentially resource-rich land from exploration." Ellmers urges the Obama Administration to "yes to energy; it is time to open the 87 percent of federal land currently prohibited from potential energy exploration."

In an op-ed for the [Richmond \(VA\) Times-Dispatch](#) (2/25, 322K), Michael Whatley, the executive vice president of the Consumer Energy Alliance, writes that "the Obama administration took a commendable first step forward recently when it announced that it would consider — with public input — opportunities to lease offshore oil and natural gas fields in designated areas of US coastal waters — including along the southeastern coastline, from Virginia to Georgia." He argues that "increases in offshore production will spur high-wage job growth all across our economy, increase tax revenue and supply revenue needed to fund badly needed infrastructure improvements throughout the US and especially in Virginia and its adjacent Atlantic states."

Tackling America's Water Challenges:

CONTINUING DROUGHT COULD LEAD TO DRAINING OF LAKE TULLOCH. The [Calaveras \(CA\) Enterprise](#) (2/25, 18K) reports that "as the drought continues in California, fears that Lake Tulloch Reservoir might be drained for irrigation and fish flow may become a reality." Oakdale Irrigation District General Manager Steve Knell has "released a statement outlining a plan to deal with the district's fifth year of drought conditions," and "the plan included the draining of Tulloch Reservoir by July or August of this year."

Empowering Native American Communities:

DEADLINE APPROACHING FOR LAND PURCHASE OFFERS ON PINE RIDGE. The [AP](#) (2/24) reports that "the deadline is approaching for owners of parcels on the Pine Ridge Indian Reservation to accept land buyback offers from the federal government." The Interior Department says "owners of fractional interests have until April 20 to accept the purchase offer."

Also providing coverage are the [Rapid City \(SD\) Journal](#) (2/25, 101K), the [Franklin \(IN\) Daily Journal](#) (2/25, 51K), the [Navajo Times \(AZ\)](#) (2/25, 66K), the [Nation Sun News](#) (2/24), and the [Native News Online](#) (2/25).

PROPOSED MUSKEGON COUNTY CASINO MOVES AHEAD. The [MLive](#) (2/25, 525K) reports that "the tribal casino proposed for the former Great Lakes Downs racetrack took a step forward on Monday." The Little River Band of Ottawa Indians on Monday "filed its application at the Bureau of Indian Affairs' regional office to take land into trust for a proposed casino and retail development project to be located on 60 acres in Fruitport Township." Little River Band Tribal Ogema Larry Romanelli said, "For the past seven years, we have worked with the Muskegon region to bring viable economic development to both of our communities. This project would jumpstart the local economy and help provide support for expanded tribal government services for our tribal members."

Also reporting on the story are the [MLive](#) (2/25, 525K), the [Shoreline Media Group \(MI\)](#) (2/25), [WZZM-TV](#) Grand Rapids, MI (2/24, 43K), and [WWTV-TV](#) Cadillac, MI (2/25, 24K).

LEGISLATORS DISCUSS PROPOSED NEW MEXICO GAMBLING COMPACT. The [AP](#) (2/24) reports that "casinos run by some American Indian tribes in New Mexico would get to stay open around the clock and offer complimentary food and lodging under a revamped gambling compact negotiated by Gov. Susana Martinez's office and the tribes." According to the article, "a special committee of lawmakers met Tuesday to discuss the latest version, which would also clear the way for the casinos to extend credit to some high-rolling patrons." The article notes that "the Legislature is under pressure to act this session because the current compact with the Navajo Nation and some other tribes expires in June."

Office of Insular Affairs:

INTERAGENCY GROUP MEETS ON INSULAR AREAS. The [St. Croix Source](#) (2/25) reports that "Tuesday in Washington, D.C., Delegate Stacey Plaskett pressed federal officials to remember insular territories' tourism industries while opening to Cuba, and Gov. Kenneth Mapp asked US Customs Officials to take away newly imposed hurdles to importing." According to the article, "Mapp, Plaskett and their counterparts in American Samoa, Guam and the Commonwealth of the Northern Mariana Islands, met with officials from the US Departments of Interior, Health and Human Services among others at the 2015 Senior Plenary Session of the Interagency Group on Insular Areas to discuss issues of critical importance." Interior Secretary Sally Jewell "opened the meeting, but left shortly after for Congressional budget hearings, leaving White House Intergovernmental Affairs Director Jerry Abramson and Assistant Secretary Esther Kia'aina to run the meeting."

ASSISTANT SECRETARY KIA'AINA DEFENDS FOCUS ON CLIMATE CHANGE. The [Pacific \(GUM\) Daily News](#) (2/25, 61K) reports that "Guam Delegate Madeleine Bordallo questioned the Department of the Interior's priorities, in light of its increasing focus on climate change," at a meeting in Washington, D.C. Bordallo said "the impact of the exodus of migrants from the remote Micronesian islands to Guam and Hawaii, is more urgent than climate change as far as the host governments are concerned." Interior Assistant Secretary Esther Kia'aina "responded that climate change is a priority for President Obama and that her agency was following the White House's 'marching orders.'"

Top National News:

MEDIA ANALYSES KEYSTONE VETO A SIGNAL TO GOP MAJORITIES. The President's veto of legislation authorizing construction of the Keystone XL pipeline generated extensive print coverage, as well as brief mentions on all three network newscasts. Reports cast the veto as a win for environmentalists, while noting that the President, in his [veto statement](#), did not rule out approving construction of the pipeline once he is assured that it will have no harmful effects on the environment. Because of that fact, some commentators downplayed the importance of the veto, which had been widely expected. For example, in an editorial, the [Washington Post](#) (2/25, 5.17M) bemoans the "attention slathered on this overblown issue," which should be dispatched "to the footnote it deserved in the first place." The main theme in today's media coverage, however, is the idea that yesterday's veto marks the launch of a new strategic phase in the Obama presidency as he grapples with GOP majorities in both the House and Senate who are intent on undoing his agenda.

To the [Los Angeles Times](#) (2/25, Parsons, Hennesey, 3.49M), for example, Obama "unceremoniously opened a fourth chapter of his presidency Tuesday — the veto era." While "Obama's first two years were built around legislative victories... the final two years... will almost certainly be dominated by defense as he fends off Republican efforts to undo his policies." The [AP](#) (2/25, Lederman) says the President "sought to reassert his authority" while "rebuffing GOP lawmakers," and [USA Today](#) (2/24, Korte, 10.32M) notes the White House "has already issued 13 formal veto threats so far this year — the most ever at this point in a new Congress since President Reagan first started issuing written veto threats in 1985." [Politico](#) (2/25, Lerner, 669K) ran a similar analysis under the headline "Keystone Veto Will Be First Of Many For President Obama," while the [New York Times](#) (2/25, Davenport, Shear, Subscription Publication, 9.97M) describes the veto as "a demonstration of political strength directed at Republicans."

The veto "is expected to usher in a new era of hostile confrontation between the president and the Republican Congress," says the [National Journal](#) (2/25, Subscription Publication, 111K). The [Wall Street Journal](#) (2/25, Nelson, Subscription Publication, 5.67M), on the other hand, says that it will test whether Obama and the GOP Congress can clash on certain issues and still work together on others down the line. In an editorial, the [Wall Street Journal](#) (2/25, Subscription Publication, 5.67M) also notes the theme of a

Last night, Lester Holt noted in a brief [NBC Nightly News](#) (2/24, story 9, 0 25, Holt, 7.86M) report that yesterday's was "just the third veto of" Obama's presidency, while Scott Pelley reported on the [CBS Evening News](#) (2/24, story 9, 0:25, Pelley, 5.08M) that the President "said he's still considering the environmental impact" of the pipeline. [Bloomberg News](#) (2/25, Keane, 2 94M) notes Obama "has repeatedly said a State Department review of the TransCanada Corp. project.. should proceed before a decision is made."

On that issue, the [Los Angeles Times](#) (2/25, Parsons, 3.49M) notes that a recent EPA report to the State Department found that "the pipeline would add as much carbon dioxide to the air each year as 6 million passenger vehicles," but White House press secretary Josh Earnest "said the EPA assessment doesn't necessarily decide the question." In fact, the [New York Times](#) (2/25, Davenport, Shear, Subscription Publication, 9.97M) says the review found "the pipeline was unlikely to contribute to a significant increase of planet-warming greenhouse gases because the fuel was likely to be extracted from the oil sands and sold with or without construction of the pipeline," though "this month, environmentalists pointed to a different" EPA "review.. that they said proved the pipeline could add to greenhouse gases." Tim McDonnell, in an online piece for [Mother Jones](#) (2/25, 719K), says that according to the EPA, "a green-light for the pipeline would lead to greater greenhouse gas emissions than if it were not approved." Bret Baier, on [Fox News' Special Report](#) (2/24, 1 53M), indicated the veto came "despite the State Department's conclusion that it would have no adverse effect on the environment."

The [Washington Post](#) (2/25, Eilperin, Zezima, 5.17M) notes Earnest said of an eventual presidential approval, following the review, "it certainly is possible," and Nicholas Confessore of the New York Times said on [MSNBC's Now](#) (2/24, 213K), "I'm not entirely convinced he eventually doesn't approve this," adding that it is possible that "all the approvals come in, that the studies say 'yes, we should do this,' and then he eventually signs off on it." The [Wall Street Journal](#) (2/25, Harder, Lee, Subscription Publication, 5.67M), likewise, emphasizes that Obama vetoed the legislation, but that does not preclude the eventual construction of the pipeline. The [Los Angeles Times](#) (2/25, Parsons, 3.49M) notes that "the project's backers.. have become increasingly gloomy about ever receiving a green light from Obama."

On [ABC World News](#) (2/24, story 11, 0 25, Muir, 5.84M), David Muir said that Republicans "are expected to come up short on the votes needed to override the veto." Likewise, [USA Today](#) (2/24, Korte, 10.32M) calls an override "unlikely," but [AFP](#) (2/25, Beatty) reports, nonetheless, that "a Senate aide said the chamber will hold an override vote before March 4." Moreover, according to [McClatchy](#) (2/25, Cockerham, Subscription Publication, 17K), "pipeline backers are talking about other tactics to pressure Obama on the issue, such as attaching pipeline approval to bills that fund federal agencies."

The [Washington Post](#) (2/25, Eilperin, Zezima, 5.17M) quotes Speaker Boehner as calling the veto "a national embarrassment," adding that "it's embarrassing when Russia and China are plowing ahead on two massive pipelines and we can't get this one no-brainer of a project off the ground. The president is just too close to environmental extremists." RNC chair Reince Priebus, meanwhile, "said the veto shows that Obama is 'out of step' with Americans."

Republicans, said the [Daily Caller](#) (2/24, Bastasch, 318K), "have hit Obama for shutting down a project that would make the US less dependent on oil from OPEC, Russia and other unfriendly nations." A.B. Stoddard of TheHill.com said on [Fox News' Special Report](#) (2/24, 1 53M) that the pipeline is "still a very good issue for Republicans who have had a very rough two months in their new majority in the Senate and expanded majority in the House."

Also on [Fox News' Special Report](#) (2/24, 1 53M), Steve Hayes of The Weekly Standard argued that it is "time for Republicans to move on. Republicans have used the Keystone pipeline. They have talked about it ad nauseam. They have used it, I think, as a replacement for a real agenda. It is time for a real agenda." Chris Hayes said on [MSNBC's All In](#) (2/24, 251K), "I think there is a massive gulf in how much Republicans think people are following the Keystone fight, and the broad political appeal, and how much it actually has." David Francis, writing for [Foreign Policy](#) (2/24, 325K), says the pipeline has "become more about politics than the limited energy benefits it would provide." The [Christian Science Monitor](#) (2/24, Gilmour, 380K) similarly reported that "ultimately, Keystone XL, with a planned capacity of 830,000 barrels per day, would represent less than ten percent of the roughly 12 million barrels of oil the US produces each day and the roughly 19 million barrels it consumes."

The [Washington Post](#) (2/25, Eilperin, Zezima, 5.17M) notes Sierra Club Executive Director Michael Brune "said that Obama 'kept his word' and rejected the bill." Sen. Bernie Sanders "also praised Obama," saying, "This veto tells the world that our nation takes seriously the planetary crisis of global warming and that we will not support legislation that would let a Canadian oil company ship some of the dirtiest oil on the planet across the United States." The [Huffington Post](#) (2/24, Sheppard, 281K) quotes Rhea Suh, president of the Natural Resources Defense Council, as saying, "This misguided Keystone XL bill, pushed by the fossil fuel industry, has met its just and expected doom. ... The president got exactly right by vetoing it." Suh, in a [USA Today](#) (2/24, Suh, 10 32M) op-ed, urges Obama "to kill this project once and for all," because "it's not a plan to help our country," but rather "it's about big profits for big oil – and big pollution for the rest of us." [Roll Call](#) (2/25, Dennis, Subscription Publication, 102K) and [The Hill](#) (2/24, Barron-Lopez, 224K) run similar reports this morning.

On [MSNBC's The Ed Show](#) (2/24, 444K), Ed Schultz called the veto a "huge win" for "Nebraska landowners who still have imminent domain issues," adding that environmentalists "are going to be applauding the President." Rebecca Leber, writing for the [New Republic](#) (2/25, 165K), asked of the environmentalists' reaction, "But what are they celebrating? This wasn't an outright rejection of TransCanada's permit to build the pipeline" and "the veto wasn't even a surprise," which "didn't stop Keystone opponents from overreacting."

[USA Today](#) (2/24, Board, 10 32M) editorializes that "Congress ought to end this drama by overriding Obama's veto," and "if the votes can't be mustered on Capitol Hill, the president has more than enough information to bring down the curtain. It is long past time to just say yes."

Charles Krauthammer said on [Fox News' Special Report](#) (2/24, 1 53M), "The President's statement in the veto is astonishing. He gives two reasons why he had to exercise the veto. Number one, it conflicts with the established executive branch procedures. This is a man who, about a month ago, signed with a pen the legalization of five million illegal aliens in contradiction to the statute, to the law, and to what he, himself, Obama had said at least a dozen times was unconstitutional and illegal. ... The other argument: He says he exercised the veto because the thing that they passed in Congress cut short thorough consideration of the issues. This is after 2,300 days of considering the issue. This is after five State Department reviews. You could have reviewed the Bible 11 times and done it in a shorter period of time."

Canadians Confident Pipeline Will Be Built. [Politico](#) (2/25, Schor, 669K) reported "the Canadian government put on a brave face, predicting that Keystone will eventually be built." Canadian Natural Resources Minister Greg Rickford said in a statement, "It is not a question of if this project will be approved; it is a matter of when."

MEDIA ANALYSES MCCONNELL BLINKS IN DHS FUNDING STANDOFF. Media reports cast Senate Majority Leader Mitch McConnell's proposal to avoid a DHS shutdown as something akin to a capitulation in the partisan standoff over funding the agency. [Politico](#) (2/25, Everett, Kim, 669K), for example, described McConnell as "bending to Democratic demands," with [USA Today](#) (2/24, Kelly, Davis, 10 32M) saying he was "bowing to political realities" and [McClatchy](#) (2/24, Memoli, Subscription Publication, 17K) stating that he acted out of eagerness "to spare his party political blame for a.. shutdown." The [Washington Times](#) (2/24, Miller, 644K) describes McConnell as "flailing for an exit strategy," while on its website, [Roll Call](#) (2/24, Subscription Publication, 102K) headlined its report "McConnell Throws in Towel On DHS Fight." Neil Munro, reporting for the conservative [Daily Caller](#) (2/25, Munro, 318K), called McConnell's proposal "a strategic victory for" the President and Senate Minority Leader Reid.

Moreover, analysts predict a tough road ahead for McConnell's plan, which has not yet won the Democrats' endorsement and could encounter serious headwinds from House Republicans and Senate conservatives. McConnell, [USA Today](#) (2/24, Kelly, Davis, 10.32M) reports, "would allow a vote on a Homeland Security funding bill without any immigration provisions attached," and then "seek a separate Friday vote that would allow senators to go on record in support or opposition to...Obama's executive actions on immigration." [McClatchy](#) (2/24, Memoli, Subscription Publication, 17K), however, says the plan "faces an uncertain path with just days before a midnight Friday deadline," because while "conservatives quickly expressed reservations at what they considered another cave-in by Republican leadership," Democrats "would not commit to cooperating unless" Speaker Boehner "guaranteed a vote in the House." [Politico](#) (2/25, Everett, Kim, 669K) noted that Reid said, "Unless Boehner's in on the deal, it won't happen." [Politico](#) (2/25, Everett, Kim, 669K) noted that Senate Minority Leader Harry Reid said, "Unless Boehner's in on the deal, it won't happen." Dana Milbank, in his [Washington Post](#) (2/25, Milbank, 5.17M) column, writes that for Reid and his caucus, "revenge is a dish best served bold." At this point, he adds, "Democrats don't have a lot of incentive to take yes for an answer just yet."

Underscoring Democratic mistrust for McConnell's intentions, [The Blaze](#) (2/24, Kasperowicz, 2.17M) cites unnamed Senate "aides" who said McConnell is simply "trying to test whether a handful of Senate Democrats might support a stand-alone bill to defund Obama's action." Moreover, while "many interpreted McConnell's move as a sign that a separate vote would be allowed on a 'clean' DHS spending bill," he "made no promises on Monday that this would happen." Reid spokesman Adam Jentleson said yesterday, "In other words, all.. McConnell's move tonight allows him to do is force an initial procedural vote on Friday morning on a bill that doesn't fund DHS, with DHS funding set to run out Friday night."

On its website, [Roll Call](#) (2/24, Subscription Publication, 102K) reported that Boehner spokesman Michael Steel last night did not indicate his boss' stance on the plan, and the [Huffington Post](#) (2/24, Foley, 281K) and [Bloomberg Politics](#) (2/24, Przybyla, 169K) note House Republicans will meet this morning to review their strategy. [Reuters](#) (2/24, Cornwell), meanwhile, reports that a letter written by a group of conservative House members, including Reps. Jeff Duncan, Steve King, Louis Gohmert, Jim Jordan, Matt Salmon, and Mick Mulvaney urged Boehner to reject the deal.

Moreover, notes the [AP](#) (2/25, Espo, Werner), "even in the Senate, McConnell's plan had its GOP critics" yesterday. The [National Journal](#) (2/25, Fox, Mimms, Subscription Publication, 111K) reports that Sen. Jeff Flake said that when McConnell "announced the decision at a conference luncheon," it "had drawn ire from more-conservative members who believe" he "was giving in to Democratic demands without holding the president accountable." In fact, "multiple Republicans in the meeting said there was still broad disagreement as to whether a caving to Democrats demands for a clean funding bill was the best course forward." Citinq "four senators at the lunch session " [Politico](#) (2/25 Raiu

Sen. Kelly Ayotte, "who could face a tough reelection next year, sharply countered that McConnell's plan was the only option to not hamper law enforcement agencies that rely on money from" DHS. On its website, meanwhile, the [National Review](#) (2/25, Gehrke, 633K) quotes an unnamed GOP lawmaker describing McConnell's plan as "cave, cave, cave."

If McConnell's proposal fails to pass, the [Christian Science Monitor](#) (2/24, Kiefer, 380K) reported, "another option would be to buy more time...by passing a short-term 'continuing resolution' that temporarily extends DHS funds based on last year's budget." The [Wall Street Journal](#) (2/25, Peterson, Subscription Publication, 5.67M) notes that Sen. Bob Corker yesterday predicted that will be the endgame, "My guess is that ultimately that's where we end up. ... I think short-term extensions are a lousy way of running government, but on the other hand you'd rather be fully funded than not have it."

The [Washington Post](#) (2/25, Nakamura, Sullivan, 5.17M) reports that Obama, meanwhile, "prepared to inject himself more forcefully into the debate with a town hall-style forum planned for Wednesday in Miami," but both he "and his aides have limited their dealings with Capitol Hill," believing "that there is little the president can do." An unnamed White House official tells the Post, "This is not a battle with the White House. This is a battle taking place on Capitol Hill. ... What you're going to see from the administration on DHS is up until Friday continuing to call attention publicly to the potential impact of shutting down DHS." The [Miami Herald](#) (2/25, Mazzei, 694K) notes that, at the event, which "will later air nationally on Miami-based Telemundo and sister network MSNBC," Obama "is expected to take questions Wednesday directly from undocumented immigrants," and "will also likely address the Homeland Security Department budget."

Former Pennsylvania Gov. Ed Rendell said on [MSNBC's Andrea Mitchell Reports](#) (2/24, 487K) that if DHS is not funded, Republicans "will get significant share of the blame, the majority share of the blame," adding, "The courts have done what the Republicans want. It has basically stopped the President from enforcing his own policy. It will be appealed. That's the place to decide this issue, not by putting the conditions on something so essential as funding homeland security."

Luke Russert said on [MSNBC The Reid Report](#) (2/24), "In light of those threats that the United States has received from the Somali terrorist group al-Shabab about possibly attacking shopping malls, from operatives I spoke to within congressional Republican circles, there is a real worry if, heaven forbid, anything were to happen with a lapse of DHS funding an attack on a mall, it could stain the GOP brand on national security for a long, long time."

Juan Williams said on [Fox News' The Five](#) (2/24, 408K), "You know who has heartburn? It's Mitch McConnell. ... This is pure politics and that's why the American people are going to punish Republicans." Josh Hicks of the Washington Post noted on [Fox News' Shepard Smith Reporting](#) (2/24, 925K) that after Republican won control of the Senate in the midterm elections, McConnell "said there aren't going to be anymore shutdowns so he has to live up to that at this point. He's put in the good fight and he's had a few...attempts to try to overcome this Democratic filibuster in the Senate. It hasn't happened. Now it makes sense for him to divide this legislation up and try to pass these two measures separately."

Republican strategist Hogan Gidley said on [MSNBC's The Reid Report](#) (2/24) that Republicans "have a problem here. Constitutionally, if McConnell passes a funding bill for DHS from the Senate, we don't know if that is legal constitutionally because...pending bills are supposed to originate in the House." In addition, if the bill "does go back to the House...Tea Party Republicans are going to say we got re-elected or elected for the first time on getting rid of this executive amnesty. If you take this out of the bill, we have no leverage to argue with the President on anything else. So right now it is a stalemate and I have no idea where this is going to go."

Also on [MSNBC's The Reid Report](#) (2/24), Jonathan Capehart of the Washington Post noted that "the common denominator between the two congresses, whether Republicans are in the majority or Democrats in the majority in the Senate, [is] Mitch McConnell," who is again "saving Speaker Boehner from his caucus and from himself." Capehart added that while spending bills are supposed to originate in the House, if "Boehner is smart and can grab a hold of his caucus at least little bit, he will say to them, let's pass the identical bill, send it back to the Senate and let's get this done with."

Johnson Weighs In On Shutdown's Effects On Potential Security Threats. The [Minneapolis Star Tribune](#) (2/25, Sherry, 1.37M) reports that while DHS Secretary Johnson "stopped short Tuesday of saying potential terrorist targets like Bloomberg's Mall of America would be more vulnerable to attack," if his agency's funding is allowed to expire at the end of the week, he "noted he needs resources to keep the nation safe." Asked if the nation would be "more vulnerable during a shutdown, Johnson said, 'A shutdown of the Department of Homeland Security has real consequences to homeland security and public safety. Period. End of sentence.'"

Obama Defends Immigration Actions Delayed By "Partisan Lawsuit." In an op-ed that ran on [The Hill](#) (2/24, Obama, 224K) yesterday, the President defended his immigration measures and notes Judge Andrew Hanen's ruling "in response to a partisan lawsuit that delays" his "lawful, common-sense steps." Added Obama, "But make no mistake, I disagree with this judge's ruling." Obama also welcomes "the opportunity to work with anyone who wants to build on the improvements we've put in place, and fix our broken immigration system once and for all." Josh Gerstein reported in an online story for [Politico](#) (2/25, 669K) that Hanen "signaled Tuesday that he isn't inclined to rush a decision on the Obama Administration's request to lift the injunction he imposed last week." Hanen said "he'll give the states suing the federal government another week to respond," but "the issue of a possible stay in the case will likely be taken up by a federal appeals court before he rules one way or another."

Former Attorney General Alberto R. Gonzales and David N. Strange, partner at Whittenburg Strange & Walker, write in [USA Today](#) (2/24, Gonzales, Strange, 10.32M) that Republicans should not seek to defund DHS, which would put them "in the crosshairs of critics and concerned Americans because of IS L and other growing threats around the world." Critics of Obama's orders, they argue, "have been handed a gift by...Hanen," and "now have the opportunity to take the initiative on meaningful immigration reform that enhances our national security and our economy."

USCIS Moves To Implement Part Of Obama's Immigration Action. The [Washington Times](#) (2/25, Boyer, 644K) reports that despite a Federal judge's order halting the President's temporary deportation amnesty, the Administration "moved Tuesday to carry out portions of President Obama's executive action on immigration." USCIS "announced it is extending eligibility to dependent spouses of H1-B visa holders to obtain work permits as part of Mr. Obama's immigration action." The [New York Times](#) (2/25, Preston, Subscription Publication, 9.97M) reports that the rule change has been "long sought by technology companies and other businesses."

GAO Praises Johnson's Leadership, DHS Improvements. The [Washington Post](#) (2/24, Markon, 5.17M) reported on its website that according to GAO, DHS "has made significant progress in fixing its numerous management challenges, and Secretary Jeh Johnson has shown 'exemplary commitment' in improving the agency charged with safeguarding Americans." GAO said DHS "has improved since its 2013 report in key areas such as financial management, IT acquisitions and senior leadership," and though it "remains on the high-risk list, GAO said it has 'fully addressed' nine of 30 high-risk areas and made progress toward addressing the other 21."

THUNE BACKS OFF EFFORT TO PUSH NET NEUTRALITY LEGISLATION. The [New York Times](#) (2/24, A1, Weisman, Subscription Publication, 9.97M) says in a front-page story that the push for net neutrality has been "the longest, most sustained campaign of internet activism in history," and one "that the little guys appear to have won." The Times adds that on Tuesday, Sen. John Thune (R) "all but surrendered on efforts to overturn" the ruling, expected to be passed by the FCC on Thursday. Thune cited ongoing opposition from Democrats to even discussing bipartisan legislation on the issue until after the FCC had acted.

In a similar theme, the [Washington Post](#) (2/24, Fung, 5.17M) says in its "The Switch" blog that the expected passage "marks a key achievement for tech firms after a months-long campaign against some of the communications industry's most sophisticated lobbying operations." The Post adds that it is "easy to point to the coming FCC's vote as another indication Silicon Valley's time has come in Washington" but the "reality" is that the industry "has already arrived, and in a major way."

Democratic Commissioner Reportedly Seeking Late Changes To Proposed Rules. However, in a potential late wrinkle, [The Hill](#) (2/25, Hattem, 224K) reported that Mignon Clyburn, one of the three Democrats on the FCC, "wants to narrow the scope" of the rules. Clyburn has asked Chairman Tom Wheeler "to roll back some of the restrictions before the full commission votes on them, FCC officials said," though Wheeler has yet to respond. The move puts Wheeler in "the awkward position of having to either roll back his proposals, or defend the tough rules and convince Clyburn to back down." Wheeler needs Clyburn's vote to enact the rules, as the Democrats have only a 3-2 majority on the commission and both Republicans oppose the rules.

Meanwhile, in an editorial, the [Wall Street Journal](#) (2/25, Editorial, Subscription Publication, 5.67M) says that while net neutrality is drawing most of the scrutiny right now, Wheeler also is seeking to override state authority to regulate municipal broadband networks. The Journal bemoans his desire to preempt state laws that bar or limit municipal broadband.

Editorial Wrap-Up:

NEW YORK TIMES. "An Emerging Nuclear Deal With Iran." In an editorial, the [New York Times](#) (2/25, Board, Subscription Publication, 9.97M) says the "quicken pace of talks suggests that negotiators...might be able to complete a framework by the end of March," but "this isn't certain." The Times says if the two sides are able to reach a deal, they "may be able to tackle other differences, including Iran's missile program and its growing involvement in regional conflicts," so "even if the deal is not perfect, the greater risk could well be walking away and allowing Iran to continue its nuclear activities unfettered."

"Four Months To Get It Right On Greece." The [New York Times](#) (2/25, Subscription Publication, 9.97M) says in an editorial that EU leaders "avoided a potential catastrophe," but "did not...resolve any of the big problems that have grounded the economies of Greece and other eurozone countries." It argues that "it is in the interest of the rest of the eurozone... to strike a new kind of deal with Greece," or face the possibility that it "defaults on its debts and abandons the euro."

"Is That Really A Five-Star Nursing Home?" In an editorial, the [New York Times](#) (2/25, Subscription Publication, 9.97M) welcomes a "revised system" to be put into effect on Friday by the Federal government that it says will provide consumers with "more accurate ratings of nursing homes." The Times says the move is "a step toward ensuring that a five-star rating really means that the home provides exemplary service and is not simply inflating its scores by lying about its performance."

WASHINGTON POST. ***"An 'Invitation' For Mr. Putin."*** The [Washington Post](#) (2/25, 5.17M) editorializes that "by withholding military aid from Ukraine and declining to punish the Debaltseve attack," President Obama "is risking the destructio

ESTABLISHMENT OF THE HONOULIULI NATIONAL MONUMENT

- - - - -

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

The Honouliuli Internment Camp (Honouliuli) serves as a powerful reminder of the need to protect civil liberties in times of conflict, and the effects of martial law on civil society. Honouliuli is nationally significant for its central role during World War II as an internment site for a population that included American citizens, resident immigrants, other civilians, enemy soldiers, and labor conscripts co-located by the U.S. military for internment or detention. While the treatment of Japanese Americans in Hawai'i differed from the treatment of Japanese Americans on the U.S. mainland in ways that are detailed below, the legacy of racial prejudice, wartime hysteria, and failure of political leadership during this period is common to the history of both Hawai'i and the mainland United States.

Early on December 7, 1941, Japanese air and naval forces attacked Pearl Harbor and other military installations on O'ahu. Before martial law was invoked, government officials began selectively rounding up Hawai'i residents on suspicion of disloyalty. They were confined at local jails, courthouses, and other facilities on six of the main Hawaiian Islands before being transported to the U.S. Immigration Station and Sand Island Detention Camp on O'ahu. Nearly all of the internees were of Japanese descent, including leaders in the Japanese American community who were educated, were teachers or priests, or were distinguished by virtue of their access to means of communication with Japan or to transportation from Hawai'i. Most would be sent to the mainland to be held for the duration of the war in Department of Justice and War Relocation Authority camps. Despite the government's allegations of disloyalty, none of the Japanese American internees from Hawai'i was ever found guilty of sabotage, espionage, or overt acts against the United States, and all later received formal apologies and many received redress compensation from the United States.

On the Island of O'ahu, the U.S. War Department sought a place removed from the active combat areas of Pearl Harbor for internment of individuals. The War Department chose Honouliuli Gulch, the bottom of which was hidden from view by the gulch's steep walls. The Honouliuli Internment Camp opened on March 2, 1943, with the transfer of internees from Sand Island and rapidly swelled in population with the influx of prisoners of war. Managed by the U.S. Army, it was the largest and longest used confinement site in Hawai'i.

Honouliuli is significant for having been used as both a civilian internment camp and a prisoner of war camp, with a population of approximately 400 civilian internees and 4,000 prisoners of war over the course of its use. Honouliuli was divided into seven compounds: one compound for administration and guards, one for civilian internees, and eventually five compounds for prisoners of war. The civilian compound was further divided into sections for male civilian internees of Japanese ancestry, female civilian internees of Japanese ancestry, and civilian internees of European ancestry. Historic documents indicate there were 175 buildings, 14 guard towers, and over 400 tents among the 7 compounds on 160 acres. Many internees referred to Honouliuli as *Jigoku-Dani* (Hell Valley) because its secluded location at the bottom of a deep gulch trapped heat and moisture and reinforced the internees' sense of isolation and unjust confinement.

The majority of Honouliuli's civilian internees were American citizens or permanent resident aliens -- predominantly Japanese Americans who were citizens by birth -- interned on suspicion of disloyalty. The remaining group comprised predominantly German Americans, though there were also Americans and aliens of Italian, Irish, Russian, and Scandinavian descent. Honouliuli also held women and children who were Japanese civilians displaced from the Pacific.

The 4,000 prisoners of war in Honouliuli included enemy soldiers and labor conscripts from Japan, Korea, Okinawa, Taiwan, and Italy. The prisoner of war compounds were guarded by an African American infantry unit as well as units of Japanese Americans from the mainland.

Honouliuli closed in 1945 for civilian internees and in 1946 for prisoners of war. With the closing of the camp, fast-growing vegetation quickly took over the site. Honouliuli was forgotten as Americans celebrated the victories of World War II and focused attention on the valor displayed by Americans at Pearl Harbor and abroad.

While both mainland and Hawaiian internment camps are sobering examples of wartime prejudice and injustice, Honouliuli reminds us of the differences in the way that forced removal was approached in Hawai'i and on the mainland.

The primary difference between the Japanese American experience on the mainland and on Hawai'i is that the internment in Hawai'i targeted a relatively small percentage of the ethnic Japanese population on the islands. Less than one percent of Hawai'i's ethnic Japanese population was interned in Hawai'i. This contrasts with the mass exclusion of all 120,000 Japanese Americans on the West Coast of the mainland. In Hawai'i, the Japanese American citizenry and immigrant population were over one third of the territory's total population. Without their participation in the labor force, the economy of the territory could not have been sustained and the war effort in the islands would have been crippled. Both the policies in Hawai'i and those on the mainland devastated Japanese Americans and their families and created a social stigma that was borne by Japanese Americans during and after the war. The selective nature of the internment in Hawai'i also sowed division within the Japanese American community in Hawai'i, leading to ostracism and other

backlash against the targeted individuals and their families that would last their lifetimes.

The declaration of martial law served as the basis to authorize internment in Hawai'i, as opposed to the mainland where mass exclusion was authorized by Executive Order 9066. During the period of martial law from December 7, 1941, to October 24, 1944, the U.S. Army issued hundreds of military orders, some of which were applicable only to persons of Japanese ancestry and enemy aliens. For example, people of Japanese ancestry were restricted from residing in certain areas of O'ahu and were forcibly removed from their properties. These types of discriminatory policies created an atmosphere of fear and suspicion.

Finally, Honouliuli is significant because of the comparatively lower level of public understanding and awareness of the history of internment of civilians in Hawai'i during World War II. On the mainland during World War II, mass exclusion was well known. In contrast, the internment in Hawai'i was largely kept secret during World War II, and has only recently become the subject of scholarship and awareness campaigns. It was not until 1998 that information about Honouliuli resurfaced. After 4 years of research and exploration, the site was uncovered in 2002. In 2008, an archeological research survey was conducted at the site. Honouliuli remains an object of archeological interest.

Honouliuli serves to remind every American about the critical importance of safeguarding civil liberties and maintaining our values during times of crisis. It is important to recognize Honouliuli as a part of our shared national heritage and national consciousness. It is a place to reflect on wartime experiences and recommit ourselves to the pursuit of freedom and justice.

WHEREAS section 320301 of title 54, United States Code (known as the "Antiquities Act"), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Federal Government to be national monuments, and to reserve as a part thereof parcels of land, the limits of which shall be confined to the smallest area compatible with the proper care and management of the objects to be protected;

WHEREAS Honouliuli's objects of historic interest were listed in the National Register of Historic Places in 2012 as nationally significant for their association with events that have made a significant contribution to the broad patterns of our history;

WHEREAS, for the purpose of establishing a national monument to be administered by the National Park Service, the Monsanto Company has donated certain lands at Honouliuli to the United States, and the University of Hawai'i-West O'ahu has agreed to provide access across its property to those lands;

WHEREAS it is in the public interest to preserve and protect the historic objects at Honouliuli;

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by the authority vested in me by section 320301 of title 54, United States Code, hereby proclaim the objects identified above that are situated upon lands and interests in lands owned or controlled by the Federal Government to be the Honouliuli National Monument (monument) and, for the purpose of protecting those objects, reserve as a part thereof all lands and interests in lands owned or controlled by the Federal Government within the boundaries described on the accompanying map entitled, "Honouliuli National Monument," which is attached to and forms a part of this proclamation. The reserved Federal lands and interests in lands encompass approximately 123.0 acres, together with appurtenant easements for all necessary purposes. The boundaries described on the accompanying map are confined to the smallest area compatible with the proper care and management of the objects to be protected.

All Federal lands and interests in lands within the boundaries described on the accompanying map are hereby appropriated and withdrawn from all forms of entry, location, selection, sale, leasing or other disposition under the public land laws, from location, entry, and patent under the mining laws, and from disposition under all laws relating to mineral and geothermal leasing.

The establishment of the monument is subject to valid existing rights. Lands and interests in lands not owned or controlled by the Federal Government within the boundaries described on the accompanying map shall be reserved as a part of the monument, and objects identified above that are situated upon those lands and interests in lands shall be part of the monument, upon acquisition of ownership or control by the Federal Government.

The Secretary of the Interior (Secretary) shall manage the monument through the National Park Service, pursuant to applicable legal authorities, consistent with the purposes and provisions of this proclamation. The Secretary shall prepare a management plan for the monument, with full public involvement, within 3 years of the date of this proclamation. The management plan shall ensure that the monument fulfills the following purposes for the benefit of present and future generations: (1) to preserve and protect the objects of historic interest associated with Honouliuli Internment Camp, and (2) to study and interpret the history of World War II internment and detention in Hawai'i. The management plan shall set forth the desired relationship of the monument to other related resources, programs, and organizations associated with World War II internment, detention, and exclusion.

The National Park Service shall use available authorities, as appropriate, to enter into agreements to provide for access to the monument. The National Park Service shall also use available authorities, as appropriate, to enter into agreements with governmental and nongovernmental organizations to provide for research, preservation, interpretation, and education at Honouliuli and additional sites associated with World War II internment in Hawai'i and exclusion elsewhere. The National Park Service shall also coordinate management with World War II Valor in the Pacific National Monument, which commemorates the

broader story of the war in the Pacific and its impacts on Hawai'i.

Nothing in this proclamation shall be deemed to revoke any existing withdrawal, reservation, or appropriation; however, the monument shall be the dominant reservation.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy, or remove any feature of this monument and not to locate or settle upon any of the lands thereof.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-fourth day of February, in the year of our Lord two thousand fifteen, and of the Independence of the United States of America the two hundred and thirty-ninth.

BARACK OBAMA

Subject: Greenwire: Obama flexes muscles on resources with eye on legacy

Hi all,

We wanted to make sure everyone had a chance to see this piece from today's Greenwire.

Thanks,

Emily

1. WHITE HOUSE:

Obama flexes muscles on resources with eye on legacy

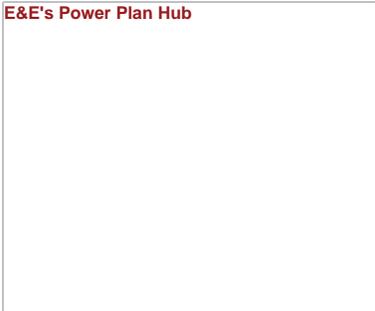

Phil Taylor, E&E reporter

Advertisement

E&E's Power Plan Hub

President Obama has quickly built a hefty portfolio on natural resource issues.

In the last two years, Obama has designated or expanded a dozen national monuments, preserved more than 1.1 million acres in the West and moved to permanently ban drilling in the oil-rich Arctic National Wildlife Refuge.

And in the last month he's proposed the biggest expansion of offshore oil and gas exploration in a generation, paving the way for drilling rigs to plumb mostly virgin waters from Virginia to Georgia, while permitting the first oil production in the nation's largest petroleum reserve. Last Friday, his administration unveiled major rules governing Arctic oil exploration.

While Obama still has nearly two years left in the White House, his allies and critics are already sizing up his record on resources -- and thinking about what's to come.

If history is any indication, Obama's pace of executive actions on lands and waters could accelerate.

Consider that President Clinton in his last year in office designated or expanded 18 of his 19 national monuments, permanently setting aside more than 3.3 million acres, according to National Park Service [data](#).

Obama last week designated three new monuments covering 22,000 acres in Illinois, Colorado and Hawaii, calling parks, monuments and waters the "birthright of all Americans."

Other major land and energy decisions are fast approaching:

- The administration will decide in coming months whether to permit Royal Dutch Shell PLC to drill in the relatively pristine Chukchi Sea off Alaska's North Slope, where there are an estimated 15 billion barrels of oil.
- The Bureau of Land Management will write or finalize major rules governing hydraulic fracturing, methane venting and flaring, and royalties.
- And BLM will finalize unprecedented new protections for sage grouse across tens of millions of acres of Western rangelands, an effort some conservationists are comparing to Clinton's sweeping 2001 roadless rule.

"What Obama is doing is setting a platform for action over the next two years," said Bill Meadows, former president of the Wilderness Society. "There's so much more that can be done, and I think he's enjoying it."

Not enjoying Obama's action: Republican lawmakers.

"This White House has shown once again its utter and complete disdain for the public process, Congress and the communities most impacted by these unilateral, unchecked land designations," House Natural Resources Chairman Rob Bishop (R-Utah) said after Obama's monuments announcement last week. "Obama has sidelined the American public and bulldozed transparency."

While Republicans accuse Obama of flouting Congress and putting a regulatory muzzle on the nation's energy renaissance, they appear powerless to stop him.

The 1906 Antiquities Act gives presidents almost unchecked powers to ban oil drilling, mining and logging across enormous swaths of the American West. Clinton

coal deposit and enraging lawmakers in the Beehive State.

Obama has so far used the law more diplomatically, designating monuments only where there is broad political support and, incidentally, only in states that voted for him in 2012.

He's used the act 16 times, setting aside land at a faster clip than Clinton, but with fewer acres. But it's tough to draw comparisons, since every acre conserved is not equal.

A big test will be whether Obama will protect landscapes in hostile territory -- such as the half-million-acre Boulder-White Clouds in central Idaho and nearly 2 million acres surrounding Canyonlands National Park in Utah. Republican lawmakers in those states are urging Obama to stand down as they seek legislative protections.

But top Obama aides say the president has plenty of ink in his pen for creating monuments if Congress fails to act.

Green groups are also seeking protections of 1.7 million acres surrounding the Grand Canyon, more than 1 million acres in the Southern California desert and 350,000 acres of Nevada's Gold Butte, a vast desert of multihued rocks, petroglyphs and slot canyons.

Obama getting 'the hang of it'

Conservationists say Obama has gone from timid to bold on resource issues.

They point to Obama's proposal last month to designate some 12 million acres of the Arctic National Wildlife Refuge as wilderness -- barring access to an estimated 10 billion barrels of oil that Alaskan officials badly want to supply the depleted Trans-Alaskan Pipeline System.

The move was symbolic, since only Congress can decide whether the refuge is opened to drilling. But it reversed a Reagan administration plan seeking full oil and gas development in the 1.5-million-acre coastal plain -- a major policy stamp for the next 15 years.

And in contrast with the Fish and Wildlife Service's draft ANWR wilderness proposal -- which was quietly unveiled in August 2011, barely getting noticed in the media -- Obama and his advisers touted the final wilderness plan with gusto. Interior Secretary Sally Jewell and Chief of Staff Tommy Beaudreau stopped by the Washington, D.C., headquarters of the Alaska Wilderness League to celebrate the proposal.

It was a poke in the eye to the Alaska congressional delegation, including Senate Energy and Natural Resources Chairwoman Lisa Murkowski (R-Alaska).

"He's growing more comfortable using the administrative powers at his disposal," said Mike Matz, director of U.S. public lands for the Pew Charitable Trusts. "His administration has gotten ... the hang of it."

Matz credited John Podesta, the president's senior counselor on global warming, who founded the liberal Center for American Progress, for prodding Obama to act. Podesta in summer 2012, while at CAP, called monument designations "good politics," arguing they could burnish Obama's re-election bid in key Western battleground states. The ANWR announcement came at a politically advantageous time, given that gasoline prices were plunging as domestic oil production in the Lower 48 soared.

Former Interior Secretary Bruce Babbitt played a similar role with Clinton by challenging the 42nd president to match the conservation achievements of past commanders in chief, Matz said.

"In Obama, you had another insider in John Podesta," Matz said. "You need someone who can make the administration comfortable up and down the ranks."

Green groups question whether Obama will keep up the momentum as key staffers depart and the administration heads for the home stretch.

Podesta left the White House this month to join Hillary Clinton's political team as she considers jumping into the 2016 presidential race. And Mike Boots, the acting chairman of the White House Council on Environmental Quality, who is viewed as another champion for land protections, plans to leave the administration in March.

In addition, Obama is already laying claim to protecting more land and waters than any other president. The claim is true if you count the president's decision last September to expand the Pacific Remote Islands Marine National Monument to more than 490,000 square miles.

Some conservationists fear he'll rest on his laurels. But others see new allies arriving at the White House.

A fresh arrival hailed by green groups is Christy Goldfuss, a former National Park Service political appointee who worked under Podesta at CAP, who is being groomed to take the helm at CEQ, sources said.

Environmentalists are also enthusiastic about Michael Degnan, a former Sierra Club representative, and Angela Barranco, who are both at CEQ, as well as Jewell's Deputy Chief of Staff Nikki Buffa, BLM Director Neil Kornze, and Agriculture Department Undersecretary for Natural Resources and Environment Robert Bonnie.

Last Wednesday, Interior Deputy Secretary Michael Connor attended a public meeting in Las Vegas with Senate Minority Leader Harry Reid (D-Nev.) and Rep. Dina Titus (D-Nev.) to discuss their proposals to protect more than 1 million acres at Gold Butte and at Garden and Coal valleys, which include remote archaeological sites and a massive public art project.

Connor's attendance suggests the administration could be considering the area for a future monument. Jewell and Bonnie in December also visited Northern California's Berryessa Snow Mountain region, where conservationists are clamoring for a 350,000-acre monument designation.

'Not a love fest'

Douglas Brinkley, a history professor at Rice University who has written extensively on land conservation, said Obama must act with more pluck to rival Clinton's conservation legacy.

Neither president will rival the achievements of Theodore Roosevelt, Franklin Roosevelt, John Kennedy, Lyndon Johnson or Jimmy Carter, who make up the "Mount Rushmore" of land conservation, according to Brinkley.

But Obama, who has already earned the title of "the climate change president," faces few political risks in pushing the conservation envelope, Brinkley said.

"The political atmosphere couldn't be better for the president to be brave in using the Antiquities Act."

The administration has put its stamp on public lands in more subtle ways, too, by implementing controversial oil and gas leasing reforms in 2010 that were followed by a steep drop in BLM lands leased for drilling, and by yanking 77 George W. Bush-era oil and gas leases that former Interior Secretary Ken Salazar argued were too close to national parks in Utah.

BLM issued 1,157 oil and gas leases in fiscal 2014, a 20 percent drop from the previous year and the lowest amount in at least a quarter-century, according to agency statistics released last month. Over the past five years, the agency has leased an average of 1.5 million acres annually, down significantly from the 4 million acres the George W. Bush administration leased annually during its final five years in office.

Oil production has grown steadily on Western federal lands, but nowhere near as fast as on private tracts overlying shale plays in states like North Dakota and Texas. The administration's critics blame BLM red tape, while others attribute the discrepancy to geology.

Natural gas production has dropped steadily on federal lands -- even as it has soared elsewhere -- and oil production has fallen under Obama's watch in the Gulf of Mexico, though some of the drop can be attributed to the halt in drilling following the 2010 Deepwater Horizon spill.

"[For] people pushing for more government control and less extraction on federal lands, Obama is their savior," said Dan Kish, senior vice president for the Institute for Energy Research, a free-market advocacy group. "He's basically given them all they want and more."

Oil backers offered tempered praise for Obama's decision last month to open the Atlantic Ocean to future leasing, though they blasted his decision to ban

The leasing proposal "slams the door on industry and on new jobs, increased economic activity, added revenue and strengthened energy security," said Randall Luthi, president of the National Ocean Industries Association.

But Meadows, the Wilderness Society former president, said Obama is far from a conservative lap dog.

Obama's "all of the above" energy platform has included a heavy emphasis on natural gas drilling, coal leasing in Wyoming and drilling in the Arctic Ocean, Meadows said.

"This is not a love fest by any means," he said.

'Very pragmatic'

According to Paul Bledsoe, a former Clinton Interior official, Obama has been "bullish" on the future of oil and gas development.

The administration has implemented unprecedented safety reforms in the Gulf of Mexico and is preparing two major rules governing hydraulic fracturing and the venting and flaring of methane -- moves that should facilitate continued development of federal minerals, he said.

"The Obama administration has reformed and improved the safety and environmental sustainability of oil and gas development on public lands and waters more profoundly than any other recent president," Bledsoe said. "This administration, in my view, has been very pro-oil and gas development, even while protecting pristine landscapes from development and creating a record area of new national monuments."

Bledsoe said it is politically remarkable that less than five years after the BP PLC oil spill in the Gulf of Mexico, the administration is poised to open the Atlantic.

Moreover, the administration has taken a flexible approach to conserving the greater sage grouse, Bledsoe said, by taking lessons from the northern spotted owl, whose protection under the Endangered Species Act in the early 1990s led to dramatic reductions in logging.

"They're very pragmatic," Bledsoe said. "It's a window into the adaptability of the Obama administration's view of conservation broadly."

Subject: Obama's National Monument Designations

Just as a data point, I counted 16 NMs proclaimed by Obama:

Obama National Monuments

16. Pullman National Monument in Illinois [2/19/15—NPS]
15. Brown's Canyon National Monument in Colorado [2/19/15 – BLM and FWS]
14. Honouliuli National Monument in Hawaii [2/19/15 – NPS]

13. San Gabriel Mountains National Monument in California [10/10/14 – USFS]
12. Pacific Remote Islands Marine National Monument (expansion) [9/25/14 -- FWS]
11. Organ Mountains-Desert Peaks National Monument in New Mexico [5/21/14 -- BLM]
10. Point Arena-Stornetta Public Lands enlargement of California Coastal National Monument [3/11/14 --BLM]
9. Charles Young Buffalo Soldiers National Monument in Ohio [3/25/13 -- NPS]
8. First State National Monument in Delaware [3/25/13 -- NPS]
7. Harriet Tubman Underground Railroad National Monument in Maryland [3/25/13 -- NPS]
6. Rio Grande del Norte National Monument in New Mexico [3/25/13 -- BLM]
5. San Juan Islands National Monument in Washington [3/25/13 -- BLM]
4. The César E. Chávez National Monument in Keene, California [10/8/12 -- NPS]
3. Chimney Rock National Monument in Colorado [9/21/12 -- USFS]
2. Fort Ord National Monument in California [1/20/12 -- BLM]
1. Fort Monroe a National Monument in Virginia [11/1/11 -- NPS]

Santa Cruz Sentinel: Editorial: Monumental designation

--
Jessica Kershaw
Press Secretary, U.S. Dept of the Interior
8COMMENTS@DOIPressSec
O: 202-208-6416
C: 202-669-0968

POSTED: 02/21/15, 2:00 PM PST |

The rollout was certainly something to see.

An estimated 1,500 people turned out at the Kaiser Permanente Arena last week to kick off the campaign to turn a swath of wilderness along Santa Cruz County's North Coast into something much more — the Santa Cruz Redwoods National Monument.

Backers of the plan for the 5,800-acre Coast Dairies property trotted out 100 local elementary students to sing "This Land is Your Land."

A leader of the Amah Mutsun Tribal Band opened the event with a Native American blessing of the land.

Former U.S. Interior Secretary Bruce Babbitt urged the community to rally behind the plan.

State Secretary for Natural Resources John Laird, Santa Cruz's own, told the crowd Gov. Jerry Brown was backing the proposal.

Congresswoman Anna Eshoo, speaking via videocast, announced legislation she was launching to create the national monument. She will lead the effort in Congress, which has the power to establish national monuments, while others will lobby President Obama to make the designation through powers he holds through the federal Antiquities Act.

So, yes, plan backers certainly flexed some serious political muscle. But does that make the plan worth backing? That answer is complicated.

Bay Area conservation groups say they want to raise the land's profile, which was preserved in 1998 when environmentalists purchased the six-mile stretch of property with \$40 million from the Trust for Public Land.

But let's be clear. Raising the profile really means figuring out how to get the cash to manage the property, and this is clearly what this effort is all about. The Bureau of Land

We support the idea of actually granting the public access to protected spaces rather than just acquiring land and locking the gates, as can be the case with public land acquisition — but doing so to the extent this monument proposal would do comes with significant challenges.

The concerns from property neighbors in Davenport and Bonny Doon about traffic and strains on local public safety resources are legitimate and will need addressing. Picture the drive up Highway 1 to Davenport, especially when you're stuck behind a slow-moving RV whose driver seems oblivious to the dozens of cars stacked up behind him. Now picture thousands more people on the road. Where exactly will people access the land? Where will they park? Where will that visitor center go? What other facilities would be needed and built? No one is offering exact estimates on visitors, but Fort Ord in Monterey County, a recently designated national monument, saw 400,000 people last year.

We also have to ask: This is a grand piece of property, but what exactly qualifies it as a national monument? It's an expansive stretch of undeveloped coast in a part of the world where that is getting more and more rare, but the property also surrounds a polluted old cement plant.

The monument, meanwhile, would have redwoods in the name, but the majority of the land has none. Big Basin Redwoods State Park to the north, The Forest of Nisene Marks State Park to the south and Henry Cowell Redwoods State Park to the east could each arguably claim more impressive stands.

And is it correct for the president to designate the area a monument just because he can? Use of the Antiquities Act to create these open-space monuments is a loophole, and this local push is likely happening now because of concerns a Republican-controlled Congress would close it. Obama has so far established 13 national monuments, and more are coming. Last week Obama designated a Chicago neighborhood where African-American railroad workers won a historic labor agreement as a national monument. The Honouliuli National Monument, site of an internment camp in Hawaii where Japanese-American citizens and prisoners of war were held during World War II, will come next, then the Brown's Canyon National Monument in Colorado, a popular whitewater rafting site.

Backers of the local project know the drill, and are saying and doing all the right things — they'll engage the public, seek community buy-in and address concerns.

We hope they do that. The proposal could transform the county's North Coast. It could speed transformation of the cement plant. It could be an economic boost to the entire region. But first myriad issues need to be addressed.

INTERIOR UNVEILS ARCTIC OFFSHORE DRILLING SAFETY RULES. The [National Journal](#) (2/22, Subscription Publication, 111K) reports that the Interior Department "unveiled draft rules Friday aimed at preventing and containing oil spills in harsh Arctic waters off Alaska's shores, where big energy companies including Royal Dutch Shell hope to tap potentially huge petroleum deposits." Interior officials say "the tough Arctic climate, the limited port infrastructure in the region, and the subsistence hunting needs of native communities warrant special rules to govern offshore drilling in the Beaufort and Chukchi seas off Alaska's northern coast." BSEE Director Brian Salerno said, "Energy exploration in the Arctic is unique. It is conducted in a very sensitive and challenging environment, where extreme weather, frigid waters, and sea ice are common, and where supporting infrastructure and logistical support capabilities are lacking."

The [FuelFix](#) (2/20, 7K) reports that BOEM Director Abigail Ross Hopper said, "The Arctic outer continental shelf isn't like the Gulf of Mexico, where generally mild weather conditions and an established industry presence have created an extensive infrastructure and logistical support and allow for nearly year-round operations. Instead, the Chukchi Sea and Beaufort Sea . . . are incredibly remote, vastly underdeveloped and subject to extreme geophysical conditions."

[The Hill](#) (2/22, Cama, 224K) reports that "regulators are likely to consider a requirement that drillers keep a relief rig nearby while drilling, seasonal limits on drilling during winter ice and that drillers demonstrate that they could contain spills mechanically with the equipment they have on site, according to an analysis Shell prepared for the Interior Department last year, which the agency released publicly." [Bloomberg News](#) (2/21, 2.94M) reports that Hopper said, "Until now these requirements were applied as part of Shell's exploration plan. The proposed regulation takes those requirements and codifies them."

The [Washington Post](#) (2/21, Warrick, 5.17M) reports that "the proposed rules drew a mixed reaction from both the energy industry and environmentalists, as well as from elected officials." Rep. Raúl M. Grijalva, the ranking member of the House Natural Resources Committee, said "regulators should not take steps to encourage further energy development in the Arctic."

[The Hill](#) (2/22, Cama, 224K) reports that "industry groups are blasting the Obama administration's plan to crack down offshore oil and gas drilling in the Arctic Ocean, arguing that the proposal includes costly and unnecessary restrictions." The [Wall Street Journal](#) (2/20, Harder, Subscription Publication, 5.67M) reports that Shell spokesman Curtis Smith said, "Of paramount concern in all of our operations is safety and environmental protection. We support regulations that further these imperatives in the Arctic, provided they are clear, consistent and well-reasoned."

The [Anchorage \(AK\) Dispatch News](#) (2/20, 146K) reports that Erik Milioto, upstream director for the American Petroleum Institute, said "standby rigs are not needed." He said, "Other equipment and methods, such as a capping stack, can be used to achieve the same-season relief with equal or higher levels of safety and environmental protection. For this reason, it is unnecessarily burdensome to effectively require two rigs to drill a single well."

The [Guardian \(UK\)](#) (2/20, 2.74M) reports that "environmental groups praised the administration's recognition of the extreme Arctic conditions, where the nearest coast guard and deep water port lies some 1,000 miles away." However, "they said the new rules were not enough to protect the Arctic – and it would be premature to open up the area to drilling."

Coverage by the AP was also picked up by [Newsday](#) (2/22, 1.41M).

Also reporting on the story are the [AP](#) (2/20), the [Chicago Tribune](#) (2/20, 2.42M), [The Hill](#) (2/21, Cama, 224K), the [Washington Examiner](#) (2/23, 315K), the [Alaska Journal of Commerce](#) (2/23, 14K), the [Alaska Public Radio Network](#) (2/20, 2K), the [Huffington Post](#) (2/20, Sheppard, 281K), [Reuters](#) (2/20), [Reuters \(UK\)](#) (2/20, 5K), the [International Business Times](#) (2/22, 1.19M), the [E&P Magazine](#) (2/22), [Platts](#) (2/22, 3K), the [Offshore Engineer](#) (2/22), the [Maritime Executive](#) (2/23, 21), the [Law 360](#) (2/23, 9K), [KTVA-TV](#) Anchorage, AK (2/23, 1K), and [KTUU-TV](#) Anchorage, AK (2/22, 56K).

SECRETARY JEWELL TO APPEAR BEFORE SENATE ENERGY AND NATURAL RESOURCES COMMITTEE. The [AP](#) (2/20) reports that Interior Secretary Sally Jewell will testify Tuesday "about the president's budget proposal before the Senate Energy and Natural Resources Committee."

CONSERVATION GROUPS HOPE TO WORK WITH REP. BISHOP. The [Huffington Post](#) (2/20, Sheppard, 281K) reports that as the new chair of the House Natural Resources Committee, Rep. Rob Bishop is "setting a different tone from that of his predecessor, encouraging conservation advocates to think they may be able to find common ground this Congress." Bishop took over the chairmanship in January from retiring Rep. Doc Hastings who had "an openly hostile relationship with environmental groups, recording a 3 percent lifetime score from the League of Conservation Voters and prompting one environmental lobbyist to declare 'good riddance' when he announced his retirement." The article notes that "some of Bishop's early moves have raised environmental hackles, including some personnel changes that suggest the committee will take a more aggressive oversight role." However, "many in the conservation world say they are optimistic about working with Bishop."

REPUBLICANS PUSHING CHANGES TO LWCF. The [Washington Examiner](#) (2/23, 315K) reports that "Republicans are signaling the changes they want to a landmark federal conservation program that must be reauthorized before the year ends." They want "states to get more control of the Land and Water Conservation Fund, a 50-year-old program that is funded by offshore oil-and-gas drilling royalties."

CONTINUING COVERAGE OF RECENT ARCTIC DECISIONS. In an op-ed for the [Anchorage \(AK\) Dispatch News](#) (2/22, 146K), Barae Hirsch, a student at West High School, writes that "when Interior Secretary Sally Jewell attended the Alaska Federation of Natives' winter retreat in Kotzebue on Feb. 17, she was faced by many state politicians, including Gov. Bill Walker, nine state lawmakers and the Alaska congressional delegation." Hirsch is "immensely grateful that Alaska lawmakers are devoted to furthering the best interests of our state to ensure Alaska's stability and prosperity," but says that "Alaska youth have an alternative perspective on Alaska's best interests."

In an op-ed for the [Anchorage \(AK\) Dispatch News](#) (2/21, 146K), Paul Jenkins, editor of the AnchorageDailyPlanet, writes that "an angry Sen. Lisa Murkowski finally has Interior Secretary Sally Jewell's attention – and all it took was a not-so-veiled threat to bite a chunk out of Jewell's department budget." According to Jenkins, "that is bad news for Jewell, notoriously tone deaf about all things Alaska, because Murkowski chairs the Senate Energy and Natural Resources Committee, which oversees Interior's budget." Jenkins argues that "Murkowski's growing frustration is justified" because "the Obama administration's affronts to Alaska are boundless."

Additional coverage of the visit by Interior Secretary Sally Jewell to Kotzebue in Alaska was provided by the [Alaska Public Radio Network](#) (2/20, 2K).

ADDITIONAL COVERAGE PRESIDENT OBAMA DECLARES NEW NATIONAL MONUMENTS IN COLORADO, HAWAII, ILLINOIS. Additional coverage of the new national monuments in Colorado, Hawaii, and Illinois were provided by [Politico](#) (2/20, 683K), the [Washington Examiner](#) (2/23, 315K), the [Chicago Tribune](#) (2/22, 2.42M), the [Chicago Sun-Times](#) (2/23, 1.11M), the [Marianas Variety](#) (2/23), the [Fort Collins \(CO\) Coloradoan](#) (2/20, 59K), the [Asahi Shimbun \(JAP\)](#) (2/20, 33K), the [Japan News](#) (2/22), the [Environment News Service](#) (2/22, 149), [NDTV \(IND\)](#) (2/22, 286K), [WGMB-TV](#) Baton Rouge, LA (2/23), and [KMGH-TV](#) Denver (2/22, 136K).

ADDITIONAL COVERAGE PRESIDENT OBAMA LAUNCHES "EVERY KID IN A PARK" INITIATIVE. The [Washington Post](#) (2/19, Eilperin, 5.17M) reports that President Obama "is launching an 'Every Kid in a Park' initiative Thursday, White House officials said, an effort that aims to get every fourth-grader to visit a national park in the years ahead." The new campaign "will offer all fourth-grade students and their families free admission to national parks and other federal lands and waters for a full year."

For "The Blog" of the [Huffington Post](#) (2/20, Ostfeld, 281K), Jackie Ostfeld, Nearby Nature Director, Sierra Club and Co-Founding Chair, Outdoors Alliance for Kids, praises the "Every Kid in a Park" initiative. She writes that "this initiative matters, because not every kid has a forest in her backyard."

Additional coverage of the "Every Kid in a Park" initiative was provided by [Money](#) (2/22), the [Weekly Standard](#) (2/23, 315K), the [Santa Clarita Valley \(CA\) News](#) (2/20, 431), and the [Syracuse \(NY\) Post-Standard](#) (2/23, 438K).

ADDITIONAL COVERAGE OF ASSISTANCE FOR CENTRAL VALLEY WATER PROJECT. Additional coverage that Interior Secretary Sally Jewell has "announced \$27.5 million in assistance for the Central Valley Water Project" was provided by the [Sacramento \(CA\) Bee](#) (2/23, 547K). The story also appears at the [Modesto \(CA\) Bee](#) (2/23, 163K).

ADDITIONAL COVERAGE \$8 MILLION ALLOCATED FOR ADAPTING TO CLIMATE CHANGE. Additional coverage that "Interior Secretary Sally Jewell said Feb. 17 that \$8 million has been made available this year to fund projects to promote tribal climate change adaptation and ocean and coastal management planning" was provided by the [Cordova \(AK\) Times](#) (2/23, 2K).

ADDITIONAL COVERAGE WRIGHT BUILDINGS NOMINATED FOR WORLD HERITAGE SITES LIST. Additional coverage that the Interior Department has nominated 10 Wright buildings for the World Heritage Sites list was provided by the [Pittsburgh Tribune-Review](#) (2/21, 672K).

SANTA CRUZ REDWOODS NATIONAL MONUMENT FACES CHALLENGES. The [Santa Cruz \(CA\) Sentinel](#) (2/21, 70K) editorializes that "an estimated 1,500 people turned out at the Kaiser Permanente Arena last week to kick off the campaign to turn a swath of wilderness along Santa Cruz County's North Coast into something much more — the Santa Cruz Redwoods National Monument." However, the paper says that the BLM, "which now controls the inland portion of the land, simply doesn't have the money to manage it." The editorial supports "the idea of actually granting the public access to protected spaces rather than just acquiring land and locking the gates, as can be the case with public land acquisition — but doing so to the extent this monument proposal would do comes with significant challenges."

SUPPORT FOR SPORTSMEN'S ACT OF 2015 URGED. In a piece for the [Erie \(PA\) Times-News](#) (2/23, 159K), Mike Bleech writes that the Sportsmen's Act of 2015 "enumerates nine regulatory reforms and five sections devoted to habitat conservation." He argues that "opening more opportunities for outdoor recreation will have a positive effect on the economy." According to Bleech, "this act is the most important piece of legislation from the perspective of sportsmen that we have seen since, well, the last time nearly identical legislation has been proposed."

America's Great Outdoors:

National Park Service:

NATIONAL PARK ADVOCATES SEND LETTER TO MAINE DELEGATION. The [Bangor \(ME\) Daily News](#) (2/21, 166K) reports that "a mix of Katahdin-region business owners and local leaders hope to pitch the 150,000-acre North Woods national park proposal to the state's federal delegation." According to the article, "their two-page letter was sent Friday to Rep. Bruce Poliquin, R-Maine, and Sens. Susan Collins, R-Maine, and Angus King, I-Maine." Its signers hope "to meet the trio and ask them to 'take a fresh look at an innovative, unique-to-Maine proposal that we believe will help to revitalize and diversify the economy in northern Maine.'"

THEODORE ROOSEVELT NATIONAL PARK BEGINS CAMPGROUND RESERVATION SYSTEM IN MARCH. The [AP](#) (2/23) reports that "Theodore Roosevelt National Park plans to offer online camping reservations for the first time this year." The system will go online on March 2.

WRITERS DISCOVERS NPS' B-ROLL ARCHIVE. In a piece for the [Motherboard](#) (2/23, 10K), Becky Ferreira writes on NPS' B-roll archive. According to Ferreira, "the site's comfortably generic clips of America's most dramatic vistas are like a vicarious shot of outdoor splendor, perfect for shaking off the dust of this extended hibernation."

WASHINGTON MONUMENT CELEBRATING 230TH BIRTHDAY. The [Constitution Daily](#) (2/10) provides "10 Fascinating Facts About The Washington Monument" in honor of the monument's 230th birthday.

ADDITIONAL COVERAGE OF NATIONAL PARK ATTENDANCE. Additional coverage of the "record-breaking year for national parks nationwide" was provided by the [Houston Chronicle](#) (2/20, 2.28M), the [Las Vegas Review-Journal](#) (2/23, 398K), the [Jackson Hole \(WY\) News & Guide](#) (2/23, 1K), and [Yahoo! News](#) (2/20, Oskin, 5.81M).

ADDITIONAL COVERAGE NPS MAPS NOISE LEVELS THROUGHOUT US. Additional coverage of the NPS' work to map noise levels throughout the US was provided by [NPR](#) (2/22, 1.58M), [Discover Magazine](#) (2/23, 6.75M), and the [Business Insider](#) (2/23, 2.26M).

ADDITIONAL COVERAGE OF RACIALLY SEGREGATED WAR MEMORIAL PLAQUES. Additional coverage of the controversy surrounding the proposal to replace Greenwood's war memorial plaques was provided by the [Los Angeles Times](#) (2/20, 3.49M).

ADDITIONAL COVERAGE LAND OWNER CLOSES OFF ACCESS TO ANNIVERSARY HARBORS NEAR LAKE MEAD. Additional coverage of the controversy surrounding the proposal to close off access to anniversary harbors near Lake Mead was provided by the [Las Vegas Review-Journal](#) (2/23, 398K).

access to a popular trail near Lake Mead was provided by the [Las Vegas Review-Journal](#) (2/23, 398K).

ADDITIONAL COVERAGE OF YELLOWSTONE BISON SLAUGHTER. Additional coverage of the capture of Yellowstone bison for slaughter was provided by the [Billings \(MT\) Gazette](#) (2/23, 165K).

Bureau of Land Management:

BLM HOLDS OFF ON PLAN TO RETURN 186 WILD HORSES TO RANGE IN NEVADA AFTER APPEAL FILED. The [AP](#) (2/23, Griffith) reports that the BLM is "holding off on plans to return 186 wild horses to the range in central Nevada pending the review of an appeal filed by a rancher and rural county opposed to the move." The bureau "originally had planned to return 104 mares treated with a fertility control vaccine and 82 studs to the sprawling Fish Creek Herd Management Area (HMA) near Eureka on Friday." The BLM has asked the Interior Board of Land Appeals "for an expedited review of the appeal and hopes to be able to reach a decision on the fate of the 186 horses on Monday or Tuesday."

Coverage by the AP was also picked up by the [Cache Valley \(UT\) Daily](#) (2/23, 639), the [Deseret \(UT\) News](#) (2/23, 538K), and the [Columbus \(IN\) Republic](#) (2/23, 81K).

BIOLOGISTS WONDER WHY SAGE GROUSE ARE EATING DIRT IN WYOMING. The [Casper \(WY\) Star-Tribune](#) (2/23, 90K) reports that BLM biologists Josh Hemenway and Dale Woolwine at the BLM's Pinedale office are pondering the significance of a ritual by sage grouse. The sage grouse was found to be eating "very specific dirt" such that "the birds seem to flock from miles away to peck at golf ball-sized holes in the ground."

Additional coverage was provided by the [Casper \(WY\) Star-Tribune](#) (2/23, 90K).

BLM TO CHARGE OVERNIGHT CAMPING FEE AT SWASEY'S CAMPGROUND. The [Deseret \(UT\) News](#) (2/23, 538K) reports that "beginning Feb. 26, the Bureau of Land Management will charge a \$10 overnight camping fee at Swasey's Campground along the Green River."

REP. STEWART SEEKS SOLUTION TO WILD HORSE ISSUE. In an op-ed for the [St. George & Southern Utah Independent](#) (2/23), Rep. Chris Stewart writes that he "introduced The Wild Horse Oversight Act of 2014, which would give states and local tribes the option to manage the herds within their jurisdiction." Stewart states that he "will continue to use my position as a member of the Interior Appropriations Subcommittee to work with multiple stakeholders to create a viable solution to this problem." He concludes that "by working with the BLM, Ranchers, and wild-horse advocates, we ultimately hope to create an effective solution – taking the politics and the emotion out of the issue to produce a humane, economic and ecologically sound solution."

Fish and Wildlife Service:

FWS RAISES CONCERNS OVER PROPOSAL TO EXPAND SAVANNAH RIVERWALK. The [Macon \(GA\) Telegraph](#) (2/21, 156K) reports that "a proposed \$14 million extension of Savannah's Riverwalk could degrade fish habitat, the US Fish and Wildlife Service said in a recent filing." According to Bill Wikoff, a member of the FWS' ecological services division, "adding a 1,100-foot extension to the Riverwalk could create shading that degrades habitat for fish and impedes their foraging." The article notes that "rather than building the Riverwalk extension over the water, Wikoff suggested it could be constructed on land next to the water."

HARRIS NECK DESCENDANTS SEEK LEASE OF REFUGE LAND. The [Savannah \(GA\) Morning News](#) (2/21, 145K) reports that "descendants of an African-American community forced off their McIntosh County property during World War II are trying to lease back a portion of that land at the Harris Neck National Wildlife Refuge." The Harris Neck Land Trust filed an application with the FWS "for a general special use permit earlier this month."

DEER FLAT NATIONAL WILDLIFE REFUGE RELEASES MANAGEMENT PLAN. [KTVB-TV](#) Boise, ID (2/22, 126K) reports that Deer Flat National Wildlife Refuge has "released a management plan for Lake Lowell that would still allow waterskiing but restrict the areas where speedboats can operate."

INVESTIGATORS LOOKING FOR PELICAN SLASHER. The [Miami Herald](#) (2/23, 694K) reports that "federal investigators have joined the hunt for the person or people mutilating pelicans in the Keys, mainly in the lower part of the county." According to the article, agents with the FWS are "heavily involved in the investigation."

BALD EAGLES NESTING NEAR PROPOSED RAIL PROJECT. The [La Crosse \(WI\) Tribune](#) (2/23, 87K) reports that "BNSF's plans to add a second set of tracks through the La Crosse River marsh might face one additional obstacle: a pair of bald eagles nesting near the tracks." According to the article, "Alan Stankevitz, a wildlife photographer and member of Citizens Acting for Rail Safety, reported the nest to the US Fish and Wildlife Service after noticing the eagles in the nest in early February." Mags Rheude, "a wildlife biologist and pre-permit coordinator with the Fish and Wildlife Service, said she is working with the railroad's environmental consultant to get an exact location of the nest."

GROUP RELEASES SPECIES PROTECTION LIST. [Reuters](#) (2/20, Liston) reports that two darter fish and a mussel, all southeastern US aquatic species, have been chosen by the Center for Biological Diversity as 2015 priorities for endangered species protection under the terms of a four-year-old settlement with the federal government.

WILDLIFE OFFICERS CATCH THREE ILLEGAL HUNTERS. The [Arkansas Democrat Gazette](#) (2/22, 319K) reports that wildlife officers with the Arkansas Game and Fish Commission and the FWS nabbed three people illegally hunting ducks and deer prior to the season opening.

ADDITIONAL COVERAGE FWS REINSTATES PROTECTIONS FOR GRAY WOLF. Additional coverage of the reinstatement of protections for gray wolves in western Great Lakes states and Wyoming was provided by [Reuters](#) (2/20, Murphy), the [Summit County \(CO\) Citizens Voice](#) (2/21, 506), the [Detroit News](#) (2/20, 577K), the [Maine News](#) (2/23), [WWJ-TV](#) Detroit (2/20, 34K), and [WDIV-TV](#) Detroit (2/23, 219K).

ADDITIONAL COVERAGE OREGON CHUB TAKEN OFF ENDANGERED LIST. Additional coverage of the removal of the Oregon chub from the federal list of endangered and threatened animals was provided by [TIME](#) (2/23, 19.19M), the [National Monitor](#) (2/22), and the [Watchdog](#) (2/23, 4K).

RUBINOFF OTHER SPECIES NEED HELP MORE THAN MONARCH BUTTERFLY. In a piece for the [Washington Post](#) (2/20, Rubinoff, 5.17M), Daniel Rubinoff notes that despite protections by numerous government agencies for the monarch butterfly, including FHWA, a group of organization has "gone too far" by requesting the Interior Department to list the insect under the Endangered Species Act. Rubinoff states that the while the butterfly is not endangered, its "winter congregation...in Mexico are an 'endangered phenomenon,'" which has helped placed unwarranted attention on the butterfly's situation. Rubnoff argues that ESA listing "should be reserved for animals much closer to the brink" and that our "limited resources" should be used to protect other species.

Additional coverage of the effort to help protect the monarch was provided by the [Houston Chronicle](#) (2/20, 2.28M).

US Geological Survey:

USGS SCIENTISTS CREATE COMPUTER SIMULATION ON MOUNT BAKER ERUPTION. The [Tacoma \(WA\) News Tribune](#) (2/22, 228K) reports that "a computer simulation delves 6,600 years into the past to show where volcanic ash would go if Mount Baker blew today." Scientists from the USGS' Cascades Volcano Observatory "created the animation to show the distribution and thickness of ash from a Mount Baker eruption."

USGS ANALYZES IDAHO GROUNDWATER DATA TO OPTIMIZE FUTURE AQUIFER MONITORING. The [WaterWorld](#) (2/23, 96) reports that USGS scientists have "released analyses of more than 30 years of water-quality data collected at the US Department of Energy's Idaho National Laboratory (INL) Site." According to the article, "the data reveals long-term trends toward improved groundwater quality in the eastern Snake River Plain aquifer." Roy Bartholomay, manager of the USGS NL Project Office, said, "The Idaho Cleanup Project at the INL Site is having a positive effect on the water quality of the eastern Snake River Plain aquifer. The trend data from this study confirm that and will help us to refine our monitoring efforts going forward."

ADDITIONAL COVERAGE USGS URGES GREATER TRANSPARENCY, DATA SHARING ON QUAKES LINKED TO OIL, GAS PRODUCTION. Additional coverage that the USGS "urged greater transparency and data collection between industry and regulators as it highlighted new research Thursday on earthquakes linked to oil and natural gas production" was provided by the [Fort Smith \(AR\) Times Record](#) (2/23, 105K), the [Inland News Today \(CA\)](#) (2/23, 102), [KGOU-FM](#) Norman, OK (2/23), [KRMG-AM](#) Tulsa, OK (2/23, 1K), [KSWO-TV](#) Lawton, OK (2/23, 2K), and [KFOR-TV](#) Oklahoma City (2/21, 193K).

Securing America's Energy Future:

Renewable Energy:

LEADERS WANT DEEPER RENEWABLE ENERGY CONSERVATION PLAN TO PRIORITIZE CONSERVATION. The [Wall Street Journal](#) (2/23, 1.1M) reports that "the Biden administration is expected to release a plan to conserve energy that would focus on reducing energy consumption in homes and businesses, rather than on expanding production of renewable energy sources like wind and solar."

letter signed by a cross-section of 40 desert community leaders and sent last week to Secretary of the Interior Sally Jewell calls for a successful Desert Renewable Energy Conservation Plan that prioritizes conservation, minimizes the impact on neighborhoods and maintains recreation opportunities." Also, "another group has proposed an alternative overlooked in those offered by officials."

EAGLE MOUNTAIN HYDROPOWER PROPOSAL REMAINS UNRESOLVED. The [Palm Springs \(CA\) Desert Sun](#) (2/20, 85K) reports that "there's still no resolution in sight for the old Eagle Mountain iron mine, eight months after federal regulators approved plans to build a hydroelectric power plant at the site, in the shadow of Joshua Tree National Park." The Federal Energy Regulatory Commission "approved the 1,300-megawatt hydropower plant in June, over the fierce objections of the National Park Service, which has said the project would drain precious groundwater and harm desert ecosystems." According to the article, "while the Federal Energy Regulatory Commission signed off on the project in June, documents filed with the commission this week make clear that the proposal is still far from becoming a reality."

ADDITIONAL COVERAGE OF DESERT SUNLIGHT SOLAR FARM. Additional coverage of the "inauguration of the Desert Sunlight solar farm" was provided by the [Daily Signal](#) (2/20).

SODA MOUNTAIN SOLAR PROJECT CRITICIZED. In an op-ed in The [Inland Valley \(CA\) Daily Bulletin](#) (2/20, Silliman, 96K) G. Sidney Silliman, Ph.D., professor emeritus at Cal Poly Pomona, bases his opposition to the Soda Mountain Solar project in the claim that "green energy projects, if not responsibly sited, can cause more harm than good by destroying the very places and species renewable energy could protect." He writes that "giant projects, some larger than a small city" have been part of the state and federal government's "aggressive" push toward a clean energy future. Silliman concludes that there must be a better way to protect the environment while pursuing clean energy.

Onshore Energy Development:

EXTENSION OF PUBLIC COMMENT PERIOD ON COAL RULE CHANGE SOUGHT. The [Sheridan \(WY\) Press](#) (2/23) reports that "coal companies are turning to local residents for help in another battle with federal rules and regulations." According to the article, "officials from Cloud Peak Energy, a Gillette-based mining company operating three surface mines in the Powder River Basin, are asking for a 60-day extension of the public comment period for a rule change proposed by the US Office of Natural Resources Revenue, a division of the Department of the Interior."

OSMRE TAKING MINING RECLAMATION NOMINATIONS. The [Charleston \(WV\) State Journal](#) (2/23, 1K) reports that the Office of Surface Mining Reclamation and Enforcement is "accepting nominations for awards to recognize outstanding efforts to reclaim active and abandoned coal mines." The agency "offers two programs honoring high-quality reclamation projects, including the Excellence in Surface Coal Mining Reclamation Awards and the Abandoned Mine Land Reclamation Awards."

NORTH DAKOTA SEEKS TO DEFEND INTERIOR'S COAL LEASING PROGRAM. The [Law 360](#) (2/23, 9K) reports that "North Dakota sought to intervene Thursday in a D.C. federal suit aiming to force the US Department of the Interior to re-examine a federal coal leasing program in light of potential climate change impacts, backing the DOI's bid to dismiss the complaint."

COMPANY PLANS TO RESUME WORK AT ARIZONA URANIUM MINE. The [AP](#) (2/22) reports that "when Arizona's only active uranium mine shuts down this spring, the company running it plans to restart another mine south of Grand Canyon National Park." The decision by Energy Fuels Resources Inc. "comes amid a lawsuit challenging the Canyon Mine on national forest land about six miles southeast of Tusayan."

EXXON APPEALS YELLOW STONE SPILL \$1 MILLION PENALTY. The [AP](#) (2/20) reports Exxon Mobil Corp. has appealed the Federal regulators' decision to impose a \$1 million penalty against the oil giant over a 63,000-gallon crude spill into Montana's Yellowstone River. Exxon asked the Department of Transportation to remove three safety violations out of four and for the amount of the penalty be reduced.

REPORT SAYS BLM REGULATIONS HURTING ENERGY PRODUCTION. The [Daily Signal](#) (2/22) reports that "current government regulations imposed by the Bureau of Land Management are harming energy production and holding back the US economy, a new study reveals." The Heritage Foundation's Katie Tubb and Nicolas Loris wrote, "While federally owned lands are also full of energy potential, a bureaucratic regulatory regime has mismanaged land use for decades." The report "focuses on the Federal Lands Freedom Act, introduced by Rep. Diane Black, R-Tenn., and Sen. James Inhofe, R-Okla."

GROUP CLAIMS OIL FIRMS CAN LEASE FEDERAL LAND FOR LESS THAN THE PRICE OF A BIG MAC. The [Tampa Bay \(FL\) Times](#) (2/23, 60K) analyzes the claim by the conservation group Center for Western Priorities that "oil companies can obtain an acre of public land for less than the price of a Big Mac." PunditFact rates the claim "Mostly True."

Offshore Energy Development:

GOVERNORS MEET TO DISCUSS SEISMIC TESTING IN ATLANTIC OCEAN. [McClatchy](#) (2/20, Schoof, Subscription Publication, 17K) reports that the Outer Continental Shelf Governors Coalition announced on Friday that in 18 months seismic testing in the Atlantic Ocean could begin and "plans already are under way about whether coastal states will need more roads, refineries and other infrastructure for offshore oil and gas production."

GULF COAST LAWMAKERS VOW TO FIGHT PLAN TO REDIRECT OFFSHORE OIL REVENUE. The [Alexandria \(LA\) Town Talk](#) (2/20, 74K) reports that "Gulf Coast lawmakers are vowing to fight President Barack Obama's proposal to 'redirect' millions of dollars in oil and gas revenue the region is expecting to receive under a 2006 law." According to the article, "Louisiana and Mississippi lawmakers are discussing plans to send a joint letter to Obama opposing the plan." Gulf Coast legislators "argue the region deserves a greater share of royalties and fees from oil and gas drilling off their shores."

Also reporting on the story is the [Jackson \(MS\) Clarion Ledger](#) (2/21, 222K).

BOEM TO HOLD HEARING ON OIL DRILLING IN NEW JERSEY. The [Asbury Park \(NJ\) Press](#) (2/20, 371K) reports that "New Jerseyans will have a chance to sound off on the Obama administration's proposal to open the Atlantic Coast to oil and gas drilling." The BOEM "agreed to hold a public hearing in New Jersey on the proposal, according to a release from Sens. Robert Menendez and Cory Booker, and Rep. Frank Pallone Jr., all New Jersey Democrats." Menendez said, "I thank the Bureau of Ocean Energy Management for accepting our request, and look forward to the opportunity for local residents, business owners, fishermen and community leaders who would be most impacted by offshore drilling to have their voices heard."

Also providing coverage are the [Press of Atlantic City \(NJ\)](#) (2/23, 190K), the [New Jersey Local News](#) (2/23, 772K), and the [New Jersey Newsroom](#) (2/23, 3K).

BOEM TO HOLD HEARING ON NEW LEASES FOR GULF OIL EXPLORATION. The [Panama City \(FL\) News Herald](#) (2/23, 93K) reports that the BOEM "plans to lease out an additional 657,905 acres of underwater property off the Gulf Coast of Florida for oil and natural gas exploration and possible drilling." According to the article, "the public is invited to attend a meeting at 4 p.m. Tuesday at the Wyndham Bay Point Resort, 4114 Jan Cooley Drive, in Panama City Beach to give its input about the plan." The article notes that "the public hearing is one of several scheduled by the federal Bureau of Ocean Energy Management (BOEM) in Florida, Louisiana, Alabama and Mississippi to solicit comment that will be used to prepare the 'Final Supplemental Environmental Impact Statement' on the leasing proposal."

OFFSHORE DRILLING PLAN CRITICIZED. In an op-ed for the [Janesville \(WI\) Gazette](#) (2/19, 58K), Michael Kraft, professor emeritus of political science and public and environmental affairs at UW-Green Bay, argues that the Obama Administration's new offshore oil and gas drilling plan "does little to wean the nation from dependence on fossil fuels, conflicts with other presidential initiatives, and puts coastal waters at serious risk from oil spills." The piece also appears at the [Charlotte \(NC\) Observer](#) (2/20, 584K),

Tackling America's Water Challenges:

BOR WORKING TO AVOID SPILL. The [Pueblo \(CO\) Chieftain](#) (2/23, 79K) reports that "water users are playing the annual guessing game of how much water will be in Lake Pueblo when it comes time to ensure enough space is left for flood protection." According to the article, "while there could be a slight chance for a spill, the Bureau of Reclamation is working with other water interests to reduce the odds." Roy Vaughan, BOR's local manager for the Frypan-Arkansas Project., said, "The long-term forecast for this spring is for cooler temps and increased precipitation."

Empowering Native American Communities:

MINE OPPONENTS PROTEST TURNOVER OF LAND TO COMPANY. The [Arizona Daily Star](#) (2/23, 212K) reports that "for more than two weeks, protesters have made camp at Oak Flat, the site of a planned copper mine that will result in a massive crater on the sacred site's surface." Mine opponents "want a repeal of the legislation that turned over 2,400 acres of Tonto National Forest to a mining giant, before conducting environmental studies and having formal consultations with concerned tribal governments."

but for now has stepped in to name Clint Halftown as the Nation's interim federal representative and the Nation's 2006 Council as its last undisputed leader." In a decision on Friday, the bureau "ruled that Halftown will be the Nation's representative for the purpose of accessing disbursement of funds from the BIA to the Nation for a community services contract." The BIA also "recognized a six-member council from 2006 as the last undisputed leadership of the nation."

NATIVE AMERICAN TRIBES CONSIDERING MARIJUANA AS A REVENUE SOURCE. The [Milwaukee Journal Sentinel](#) (2/21, Spivak, 699K) reported that the Menominee tribe is considering growing marijuana on its reservation near Shawno, Wisconsin. Craig Corn, a tribal legislator, tweeted, "Now we embark on a new economic endeavor, it is time to progress forward. We are gonna fast track an effort to legalize marijuana."

The [AP](#) (2/21) reports that selling marijuana is just one possible scenario that leaders of the Poarch tribe in northern Alabama say is possible in a high-stakes stand-off with Florida Gov. Rick Scott and the Florida Legislature in order to force the state to take "them seriously and approve a compact with the tribe that would allow a casino" in northwest Florida. The AP says the Poarch tribe "stakes its claim to negotiate a far-reaching gambling deal on a one-acre tract of land it owns in Escambia County and is just a few miles from a casino operated by the tribe near the state line in Atmore, Alabama."

LAW ENFORCEMENT OVERWHELMED BY DRUG EXPLOSION ON NORTH DAKOTA INDIAN RESERVATION. The [Los Angeles Times](#) (2/22, 3.49M) reports that "driven by the new wealth of the Bakken oil fields, drug dealing has spread across the reservation, tearing apart families and destroying the fabric of this once-isolated community." According to the article, "the reservation has about 20 officers and a handful of criminal investigators to police about 1,500 square miles — roughly three times the size of Los Angeles."

DEAL WOULD INCREASE NUMBER OF GAMBLING MACHINES IN WASHINGTON. The [Indian Country Today Media Network](#) (2/20, 49K) reports that "the number of gambling machines in Washington state tribal casinos is set to increase by several thousand and rise automatically in the future under a compact recently approved by state legislators and the state Gambling Commission." According to the article, "the compact between 27 of the state's 29 tribes would allow a 10 percent bump to the state's 28,000 slot-style machines and make future adjustments based on gambling demands." Gov. Jay Inslee is "expected to sign the compact, and send it to the US Department of Interior for final approval."

AFRICAN AMERICAN EDUCATORS SHARE THEIR EXPERIENCE IN TRIBAL SCHOOLS. The [Albuquerque \(NM\) Journal](#) (2/23, 238K) reports that "in recognition of Black History Month, the Indian Pueblo Cultural Center and the African American Museum & Cultural Center of New Mexico will explore an often overlooked chapter of our state's history, the experience of African American teachers in Indian Schools." According to the article, "three African American educators who taught in the Indian Service — Lenton Malry, Tommie Jewell Sr. and Alice Pegues — will be in conversation with Mable Orndorff-Plunkett at 5:30 p.m. Wednesday, Feb. 25 at the PCC, 2401 12th NW."

MAN SAYS HE WILL PLEAD GUILTY IN ASSAULT ON BIA OFFICER. The [AP](#) (2/23) reports that "a North Dakota man says he will plead guilty in a fight with a Bureau of Indian Affairs officer on the Standing Rock Reservation." Chris White Twin is "charged in federal court with assault on a federal officer."

NAVAJO COURT REJECTS NEW PRIMARY PRESIDENTIAL ELECTION. The [AP](#) (2/20) reports that "the Navajo Nation Supreme Court struck down legislation Friday that would have allowed a do-over of last year's presidential primary election for the nation's largest American Indian reservation." According to the article, "the high court said in its order that it was rejecting the Navajo Nation Council's 'feeble attempt' to confound the election process." The court stated in its opinion, "Because of the self-interested actions of the Board and the Council to disregard Navajo laws, the presidential election is now more than three months late. The initial effort of this Court to have the election by Jan. 31, 2015 has been further delayed by the Council's most recent grab for power."

Also reporting on the story is the [Indian Country Today Media Network](#) (2/22, 49K).

REP. KLINE'S CALL FOR ACTION ON TRIBAL SCHOOL CONSTRUCTION SUPPORTED. The [Minneapolis Star Tribune](#) (2/23, 1.37M) editorializes that "it shouldn't take more than a decade to rebuild Minnesota's deteriorating Bug-O-Nay-Ge-Shig High School" and "nor should children in Bureau of Indian Education (BIE) schools elsewhere attend class in falling down buildings while faraway bureaucrats fail to act." According to the paper, "fortunately, the estimated 49,000 students who attend BIE schools now have a welcome new champion in Minnesota Republican US Rep. John Kline."

Office of Insular Affairs:

INTERIOR RELEASES \$2.4 MILLION FOR HEALTH AND EDUCATION PROJECTS. The [Marianas Variety](#) (2/23) reports that Interior Assistant Secretary for Insular Areas Esther Kia'aina has "approved and released a total of \$2.4 million in funding under the Office of Insular Affairs Technical Assistance program for fiscal year 2015 to support health, education and social service projects for the US territories and Freely Associated States." The article notes that "these grants include \$1.3 million for the Four Atolls' Section 177 Health Care Program in the Republic of the Marshall Islands to help address the medical needs of residents; \$1.1 million for the Close Up Foundation to support civic education programs for Insular Area students; and \$75,000 to the Partners in Development Foundation for a non-governmental initiative to help mitigate the impacts in US jurisdictions of migrants from the Freely Associated States of Micronesia, the Marshall Islands and Palau."

Top National News:

JOHNSON URGES VIGILANCE, FUNDING FOR DHS IN WAKE OF TERROR THREAT TO MINNESOTA MALL. Coverage of a video message in which al-Shabab called for attacks on the Mall of America in suburban Minneapolis was featured on the two network newscasts that aired last night. The story also generated extensive print reporting, and dominated the discussion on the Sunday morning political shows — five of which interviewed DHS Secretary Johnson. Beyond addressing the specific threat, the coverage noted the current Congressional impasse over DHS funding and immigration, which was cast as having the potential to leave the agency in a precarious position at a particularly inopportune time. As [Bloomberg News](#) (2/23, Miller, 2.94M) reports, "Johnson's interviews...aired five days before funding for DHS "is set to lapse," triggering "a shutdown of non-essential agency operations." In fact, [USA Today](#) (2/23, Kelly, Davis, 10.32M) says the reason Johnson "went on five Sunday shows" was "to warn that national security will be at risk unless Congress agrees to fund the department."

The [Los Angeles Times](#) (2/23, Parsons, 3.49M) refers this morning to "the dangers of cutting off funding for DHS at a crucial moment for American national security," and notes some Republicans yesterday called for a quick resolution to the standoff. Sen. Bob Corker said on CBS, "We do not need to leave our nation in a situation with the type of threats that we have with an agency that's not working at full steam. So it needs to be resolved and I think it will be." Sen. Lindsey Graham, on [ABC's This Week](#) (2/22, Stephanopoulos, 2.73M), similarly stated, "I'm willing and ready to pass a DHS funding bill and let" the immigration aspects of the funding "play out in court. The worst possible outcome for this nation is to defund the Department of Homeland Security, given the multiple threats we face to our homeland. I won't be part of that." The [AP](#) (2/23, Braun) reports Sen. John McCain also said on Sunday that he would oppose linking DHS funding to the ongoing immigration disagreement. On [CBS' Face The Nation](#), McCain said of the courts should resolve the impasse, "I think that's the best way that we can resolve this."

However, another [AP](#) (2/22, Peoples, Colvin) story notes that "several Republican governors are urging GOP congressional leaders to stand firm next week in opposing legislation funding" DHS that "doesn't also overturn...Obama's executive action on immigration." Among the governors cited in the story are Indiana's Mike Pence, Oklahoma's Mary Fallin, Wisconsin's Scott Walker and Utah's Gary Herbert. Pence said on [Fox News Sunday](#) (2/22, Roberts), "My bottom line is that we need to protect the homeland. We also need to protect the Constitution. And I think that the Congress using the power of the purse is all together appropriate." Herbert said on [Fox News Sunday Morning Futures with Maria Bartiromo](#) (2/22), "Nobody wants Homeland Security shut down. It's a dangerous world we live in right now," but "Congress is concerned about the President going around them and using executive privilege in probably ways that are not constitutional. That's the debate." Also yesterday, Texas Gov. Greg Abbott said on [CBS' Face The Nation](#) (2/22, Schieffer, 2.64M), "What we have here is a situation where the President has violated the rule of law."

[Politico](#) (2/23, Bresnahan, Everett, 683K) reported that Senate Majority Leader McConnell, "known for keeping even his inner circle in the dark about his thinking, isn't tipping his hand so far on what he'll do," and "no announcements are expected before Tuesday afternoon, when Senate Republicans and Democrats will huddle behind closed doors at their regularly scheduled policy luncheons."

Johnson said on [NBC's Meet the Press](#) (2/22, Todd, 3.08M), "We need Congress to fund the Department of Homeland Security. We have got four working days in Congress and I'm talking every member of Congress who will listen to me about the importance of doing this." On [CNN's State Of The Union](#) (2/22, Boger, 420K), Johnson added that "if, by the end of the week, Congress has not funded the Department of Homeland Security, we will have to furlough some 30,000 people, mostly at headquarters — people on the front lines, aviation security, and maritime security will be forced to come to work without a paycheck." Beyond the current terror threat, "FEMA, in the midst of this very harsh winter right now, will have to furlough something like 80% of its permanent appropriated workers." On [CBS' Face The Nation](#) (2/22, Schieffer, 2.64M), Johnson remarked, "I remain optimistic. We've got good people in Congress who appreciate the importance of a fully-funded Department of Homeland Security."

The [AP](#) (2/22) notes that in its video, al-Shabab "urged Muslims to attack shopping malls," and "specifically" named "the Mall of America in the Minneapolis suburb of Bloomington, as well as the West Edmonton Mall in Canada and the Westfield mall in Stratford, England." The video, says the [Washington Post](#) (2/23, Holley, 5.17M), "threatened to replicate al-Shabab's 2013 attack on the upscale Westgate mall in Nairobi, which left more than 60 people dead." The [Christian Science Monitor](#) (2/22, Knickerbocker, 380K) notes al-

2:14, Llamas, 5 84M) reported "US authorities are particularly concerned because al-Shabab has been especially effective recruiting dozens of young men from Minneapolis to join its ranks in Somalia." However, in the lead story for [NBC Nightly News](#) (2/22, lead story, 3 06, Quintanilla, 7.86M), Kristen Welker noted that according to a senior Administration official, al-Shabab "has not shown an ability to launch major operations outside east Africa," and law enforcement experts say the group "is hoping to inspire lone wolf attackers."

The [Wall Street Journal](#) (2/23, Radnofsky, Madigan, Subscription Publication, 5.67M) notes DHS and the FBI issued a joint statement on the threat, "In recent months, the FBI and DHS have worked closely with our state and local public safety counterparts and members of the private sector, to include mall owners and operators, to prevent and mitigate these types of threats." The [New York Times](#) (2/23, Landler, Subscription Publication, 9.97M) reports DHS spokeswoman Marsha Catron later added, "We are not aware of any specific, credible plot against the Mall of America or any other domestic commercial shopping center." The [St. Paul \(MN\) Pioneer Press](#) (2/23, Kather, 524K) reports the Bloomington Police Department released a statement Sunday afternoon "about what it called the 'propaganda video' released" by the group, also saying, "At this time, there is no credible threat associated with Mall of America."

At any rate, says the [Minneapolis Star Tribune](#) (2/23, Walsh, 1.37M), "all appeared to be business as usual Sunday" at the mall, with "drivers...jostling for spots in the parking ramp and the mall's four levels...crowded with shoppers and store clerks said it was a typical Sunday." The [St. Paul \(MN\) Pioneer Press](#) (2/23, Kather, 524K) similarly reports that "people packed the Mall of America on Sunday afternoon despite warnings from Homeland Security urging visitors to be 'particularly careful.'" [USA Today](#) (2/23, Bacon, Jackson, 10 32M) notes "the Mall of America, among the largest shopping malls in the world, employs more than 12,000 people at more than 500 stores and 50 restaurants." It is "the world's busiest mall, bringing in more than 40 million visitors annually."

Johnson stated on [CNN's State Of The Union](#) (2/22, Borger, 420K), "This latest statement from al-Shabab reflects the new phase in the global terrorist threat, where groups such as al-Shabab and ISIL publicly call for independent actors to carry out attacks. We're beyond the phase now where these groups would send foreign operatives into countries after being trained someplace. We're now at a stage where it is all the more important in our counterterrorism efforts that we have a whole new government approach. We have a military response in place, using an international coalition, but there's also a law enforcement and homeland security component that is necessary to countering violent extremism in our communities." Johnson added on [CNN's State Of The Union](#) (2/22, Boger, 420K), "I am very concerned about the serious potential threat of independent actors here in the United States," adding that "any time they call for an attack against a specific place, we've got to take that seriously."

On [NBC's Meet the Press](#) (2/22, Todd, 3 08M), Johnson said, "The public needs to be particularly vigilant. ... We have seen this a number of times now where a group will call for an attack on a country, on a specific location. So we got to be vigilant. We ramp up security. I'm sure that security at this particular mall will be enhanced in ways visible and not visible. But the response also involves public vigilance and public awareness. If you see something, say something. It has to be more than a slogan. ... I'm not telling people to not go to the mall. I think there needs to be an awareness, there needs to be vigilance." Johnson said on [CBS' Face The Nation](#) (2/22, Schieffer, 2 64M), "I am confident that there will be enhanced security at the mall in Minneapolis. ... Doing things here in the homeland has become critical to dealing with this new global terrorist threat that we face." The [Minneapolis Star Tribune](#) (2/23, Walsh, 1 37M) notes that "following up to Johnson's message to Mall of America visitors, another department official wanted to make clear that the secretary was not urging people to stay away from the mall." Assistant Secretary Tanya Bradsher told CNN, "Secretary Johnson didn't say that they should not go to the mall. ... He told shoppers to be extra vigilant and that security was increased."

On [Fox News Sunday](#) (2/22, Borger), Johnson said that "because of the foreign fighter phenomenon, the number of foreign fighters they have in their force and because of their use of the Internet, use of social media to recruit and to recruit for specific terrorist attacks, we need to be involved in the relevant communities in this country to thwart their recruitment efforts and help build the counter-narrative to the one being put out by IS L right now. I view that as critically important, given the phase to which we have involved in our counterterrorism efforts." Johnson said on [ABC's This Week](#) (2/22, Stephanopoulos, 2.73M), "The profile of a so-called foreign fighter is a little difficult to discern," and that makes it "all the more important that we work with our international counterterrorism partners overseas to build systems to track the travel of individuals of suspicion. We have come a long way in that regard. But there's more to do." [Politico](#) (2/23, Emma, 683K), [Reuters](#) (2/22, Yukhananov, Dunham), the [Daily Intelligence \(NY\)](#) (2/23, Bankoff, 710K), [TME](#) (2/23, Worland, 19.19M), [The Hill](#) (2/22, Sullivan, 224K) and [Washington Times](#) (2/22, Wolfgang, 644K), among other news outlets, also note Johnson's remarks yesterday.

Former Homeland Security Secretary Tom Ridge said on [CNN's State Of The Union](#) (2/22, Borger, 420K), "I appreciate Jeh's reminder to the general public that law enforcement and the military are the tip of the spear. We encourage awareness, not just in the Mall of America, but generally. That's, unfortunately, the world we live in, it might be a permanent condition. ... I happen to have enormous sympathy for Secretary Johnson."

Rep. Keith Ellison said on [ABC's This Week](#) (2/22, Stephanopoulos, 2.73M), "We have to continue to reach out to the Muslim community. But we have to be wary of something. There's a cautionary tale here, too. We cannot not mix up surveillance and law enforcement with outreach."

In an editorial, meanwhile, the [Wall Street Journal](#) (2/23, Subscription Publication, 5 67M) argues that the current threat on the Mall of America shows the folly in recent comments by national security adviser Susan Rice, who said that terrorism doesn't present an "existential" threat to the US.

DEBATE CONTINUES ON WHETHER TO LABEL TERROR GROUPS AS "ISLAMIC." In their discussions on the terrorist threat, media reports and analyses also addressed the broader political debate about Administration policies and its decision not to label the extremists as "Islamic," which Republicans cast as counterproductive to US efforts to protect itself from terrorism. Mario Trujillo reports in a post for [The Hill](#) (2/23, Trujillo, 224K) that DHS Secretary Johnson said on [Fox News Sunday](#) that "he does not want to give the Islamic State in Iraq and Syria (ISIS) more 'dignity than it deserves' by classifying it as a Muslim ideology." Said Johnson, "It seems to me that to refer to ISIL as occupying any part of the Islamic theology is playing on a battlefield that they would like us to be on." Johnson made the same argument on [ABC's This Week](#) (2/22, Stephanopoulos, 2.73M), "The true Islamic faith has nothing to do with what ISIL represents. To start labeling them as Islam or Islamic state in any respect gives them far more dignity than they deserve."

Senate Foreign Relations Committee Chairman Bob Corker said on [NBC's Meet the Press](#) (2/22, Todd, 3.08M), "They're Islamic extremists. ... They are Islamic. No question. They are extreme in what they're doing. And they are a threat to our country. And we need to deal with that appropriately." House Homeland Security Committee Chairman Michael McCaul said on [Fox News Sunday Morning Futures with Maria Bartiromo](#) (2/22), "I think we have to define the enemy for who they are in order to defeat them. ... I think the correct term is 'Islamist,' which means a political organization taking a religion and advancing that for a political agenda. That's who these terrorists are, but we have to say it's a terrorist movement. Radical Islamic extremism is a terrorist movement. To completely ignore that fact I think is just not being very honest with the American people."

Rep. Darrell Issa said on [CNN's State Of The Union](#) (2/22, Borger, 420K), "[President Obama] needs to call it Islamic terrorism. He can't be looking at everything through the vision that somehow if you treat people better, if we're more democratic you're not going to have terrorism, and then have his own Secretary telling people they have to be vigilant if they go to a mall in Minnesota. The reality is that we are losing the war against Islamic fundamentalists around the world. It is about religion. These people hate us for who we are and who we're not, and if we don't get on board with allies and root out these terrorist organizations, then America will not be safe."

Former Deputy Secretary of Defense Paul Wolfowitz said on [CNN's State Of The Union](#) (2/22, Borger, 420K), "I have a little bit of sympathy for what [Obama] is wrestling with. He doesn't want to give Islamic extremists, which is what they are, a monopoly on that word." But "I think to pretend that Islam has nothing to do with the problem is a mistake. What we're dealing with is a totalitarian ideology that exploits Islam and many of our best friends and allies in the fights against that ideology are going to be Muslims themselves."

Indiana Gov. Mike Pence said on [Fox News Sunday](#) (2/22, Roberts), "I think the American people are understandably frustrated with a president who lectures us on the Crusades but is unwilling to call Islamic extremism by name. Part of leadership is not only identifying the objective. In matters of war and statecraft, leadership is about identifying the enemy. ... It is clear that we are confronting a growing threat around the world. I think it is extremely important for the President of the United States to articulate that clearly, to marshal the resources and energy of the United States of America and our allies to confront that."

On [CNN's Fareed Zakaria GPS](#) (2/22, 410K), Atlantic columnist Graeme Wood, author of "[What ISIS Really Wants](#)," said: "I think many aspects of Obama's approach are exactly what I would take. However, knowing the enemy is very important. If we understand how the organization of ISIS conceives itself, then we have some sense of what its plans are, how it motivates possible recruits, and how it presents itself. To deny that it has any Islamic character whatsoever is really to suggest something that simply isn't true and leads us to misguided approaches."

The [Daily Caller](#) (2/22, Thomas, 318K) reports that Stephen Coughlin, "a leading expert on national security and author of the soon-to-be-published book, 'Catastrophic Failure: Blindfolding America in the Face of Jihad,'" says "government bureaucrats have become so focused on fighting 'narratives' consistent with a post-modern, politically correct worldview, rather than the facts on the ground, that America's war on terrorism has become a catastrophic failure." Said Coughlin, "This country is in serious trouble. ... The people who hate us – and it's not just radical Islam, it's the Chinese, it's the Russians, it's the Iranians – they know that our leaders don't know what they're doing, because they've been kicking the tires."

Kasich: "We're Not Going To Solve This Problem Just By Bombing." Ohio Gov. John Kasich said on [CNN's State Of The Union](#) (2/22, Borger, 420K), "Foreign policy does matter. ... America seems to be in retreat. ... A lot of our friends, allies and even our enemies are wondering: Where is America? What's happening to it? We are a moral force in the world. When we decide to leave or double talk or paint red lines and walk away from them, we develop credibility problems. The Western world needs to be united... and we do need to develop a plan. We're not going to solve this problem just by bombing."

President Obama loves his country, generated some commentary on the Sunday morning political shows. This morning, in the [Wall Street Journal](#) (2/23, Giuliani, Subscription Publication, 5 67M), Giuliani argues that he never intended to question Obama's motives, but rather how his actions and rhetoric have had a negative effect on US security and morale. Giuliani praises the national security of Presidents Kennedy, Reagan and Clinton, and notes past Obama comments about US exceptionalism. In conclusion, Giuliani calls for a national debate about positive, optimistic leadership, and calls on Obama to change both policies and rhetorical choices. [Politico](#) (2/23, Eischen, 683K) noted that in his op-ed, Giuliani also "accused Obama of 'criticizing his country more than other presidents have done.'"

The [AP](#) (2/22) reports that DHS Secretary Johnson, on CNN's "State of the Union," criticized Giuliani's comments, calling them "very regrettable."

[USA Today](#) (2/22, Camia, 10.32M) reports this morning that "for a second week, the question of whether...Obama loves America continues to be asked of the Republicans with their eye on the White House." The [Washington Times](#) (2/23, Wolfgang, 644K) notes that Sen. Lindsey Graham, on ABC's "This Week," "distanced himself Sunday from other Republican presidential candidates who say they don't know if...Obama loves America," saying, "I have no doubt that he loves his country. I have no doubt that he's a patriot. But his primary job as president of the United States is to defend this country."

Hello Otto,

Don Hellman with NPS Congressional Affairs passed on to me your request for information about the scope of yesterday's Pullman national monument designation.

I apologize for my delay in responding.

I've attached a map of the newly designated area. The state of Illinois donated .23 acres to the federal government as part of the designation, which is 203 acres. I understand the majority of land within that boundary is private, and owned by the museum.

Please let me know if I can get you any additional information.

Thanks,
Jeremy

11.21.16 Governor Brown letter to Jewell re Cascade Siskiyou.pdf
2427K

KATE BROWN
Governor

November 21, 2016

The Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street NW
Washington, D.C. 20240

Dear Secretary Jewell:

Thank you for your steadfast support for America's iconic landscapes. I appreciate your agency's continued interest in one of Oregon's natural icons – the Cascade-Siskiyou National Monument – and the effort made in convening a community discussion around expansion. As Oregon's Governor, I lend my support to your efforts and want to convey my desire to enhance this Oregon wonder through a thoughtful expansion of its boundaries.

Since President Clinton's dedication of the Cascade-Siskiyou National Monument in 2000, community leaders and interested parties have worked diligently to protect and enhance the monument's diverse natural, geological, and historic resources; which include a spectacular variety of rare plants and animals. This work must continue as the unique and vibrant ecological wonders of Cascade-Siskiyou face increasing challenges from a changing climate. Expansion is critical to continued ecological integrity, which has made the monument a destination.

When opportunities like a prudent Cascade-Siskiyou National Monument expansion present themselves, we owe it to future generations to embrace them for history shows they are fleeting. The unfortunate reality of Congressional obstruction and inaction has indefinitely stalled many worthy and broadly supported public land protection bills. Prime examples in Oregon include the Devil's Staircase wilderness bill (2009) and the Wild Rogue wilderness expansion (2011). Despite strong local support, these proposals and others have languished since their introduction.

Expanding the Cascade-Siskiyou National Monument meets many of the factors I consider important in public land discussions. While state governors do not have a dispositive role in federal land decisions, I appreciate the Obama Administration's dedication to soliciting local input. It is important to consider proposed expansions and new designations in the context of their specific circumstances. Among the reasons I support a thoughtful Cascade-Siskiyou expansion:

- It augments an existing public land designation. The Cascade-Siskiyou National Monument has been successful in attracting community and federal support, demonstrating its value locally and among the national monument network.

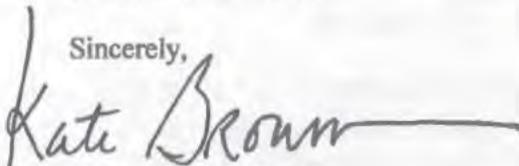

- The identified need informed by scientific analysis of current and future landscape-level ecosystem health. The formation of the original monument set out why the unique values found at the intersection of the Cascade, Siskiyou, and Klamath mountain ranges needed greater protections. Analysis from 2011 onward highlights the scientific support for increased monument resilience amid considerable pressures.
- The level of public engagement and evidence of an inclusive process. Local community conversations about expanding the monument have been on-going for many years, culminating with robust local meetings in recent months.
- The degree of private ownership within the proposal and private landowner support. The proposed expansion map minimizes the impact to private inholdings. Many private landowners in the expansion have been included in expansion discussions and expressed their support.

This combination of factors strongly supports the proposed expansion. However, key issues remain to be addressed should the monument be expanded. Primary among them is the issue of local access, a common refrain at the recent community meetings. If the monument is expanded, I will follow the public process on access closely and advocate for reasonable resolution to accustomed uses. In addition to access, I will also be invested in the discussions regarding fire management, grazing, and timber harvest issues in an expanded monument management plan. Finally, the monument has long lacked a dedicated manager and sufficient staff and resources to enhance the ecological values as well as visitor and recreational opportunities. With the inclusion of many more miles of the Pacific Crest Trail, it is even more incumbent that adequate staff and resources be allocated to the monument to build on existing outdoor recreation opportunities for the benefit of local communities and businesses. I will continue to urge the administration address these concerns, and for our congressional delegation to advocate for sufficient funding.

Time is of particular importance as we enter the final weeks of the Obama administration. My office and state agency staff stand ready to assist our federal partners as they evaluate the proposal. I am confident there is sufficient time and determination to complete this expansion for the benefit of Oregon, the region, and the nation. As a champion of preserving our most iconic public lands, I am excited about the opportunity to enhance the unique and valuable wonders of Cascade-Siskiyou National Monument.

Sincerely,

Governor Kate Brown

EVENT MEMORANDUM FOR THE SECRETARY

V2 CELEBRATE THE PURCHASE OF THE ANTELOPE FLATS PARCEL IN GRAND TETON NATIONAL PARK

DATE: Friday, December 16, 2016
LOCATION: Grand Teton National Park; Dornan's Pizza & Pasta, Moose, Wyoming
TIME: 8:00AM – 2:30PM MT
FROM: David Vela, Superintendent, Grand Teton National Park

I. PURPOSE

The purpose of this event is to celebrate the successful acquisition of the 640-acre Antelope Flats parcel of Wyoming school trust lands within Grand Teton National Park, and to thank the boards, staff, members, and donors of the National Park Foundation and Grand Teton National Park Foundation who contributed \$23 million to the purchase. Also attending will be elected officials from Teton County and the state of Wyoming. Along with Wyoming Governor Matt Mead, you will have an opportunity to address the attendees and provide your perspectives on the importance of this acquisition for the park. You will have an opportunity to speak to the group, and one-on-one to individuals, as well as to the media.

II. PARTICIPANTS

- You
- Matthew Mead, Governor of Wyoming
- Cynthia Cloud, Wyoming State Auditor
- Mark Gordon, Wyoming State Treasurer
- Bridget Hill, Wyoming Director of the Office of State Lands and Investments
- David Vela, NPS Superintendent, Grand Teton National Park
- Leslie Mattson, President, Grand Teton National Park Foundation
- King Laughlin, Vice President, National Park Foundation
- Susan Thomas, wife of the late Senator Craig Thomas
- Clay Hanna, Laurance S. Rockefeller Preserve Supervisor, Grand Teton NP
- Vickie Mates, Chief of Interpretation, Grand Teton NP
- Cynthia Lummis, U.S. Representative (WY-At Large)
- Board members, donors, staff, and supporters (see attachment)

This event is public and open to the media.

III. AGENDA

Please refer to your trip schedule for specific timing. Should changes to the agenda occur, your advance staff will update you on the ground.

8:30AM Greet Superintendent

- 8:45AM Phone Call with Senators Wyden and Merkley (20 minutes)
Note: Call re: Cascade Siskiyou
- 9:30AM Snowshoe Hike Moose-Wilson Road (90 minutes)
- 11:15AM Freshen Up//Change for Event (40 minutes)
- 12:00PM Lunch Buffet (45 minutes)
Note: ~100 Local stakeholders will be present
- 12:45PM Grand Teton National Park Speaking Program (40 minutes)
 - David Vela offers welcome remarks; introduces short film
 - Short film (Kelly School Students)
 - David Vela introduces you
 - You offer remarks; introduce Gov. Mead
 - Gov. Mead offers remarks; introduces Leslie Mattson
 - Leslie offers remarks; concludes event
- 1:25PM Press Time (15 minutes)
- 1:40PM Mix and Mingle (50 minutes)
- 2:30PM Depart en route Jackson Hole Airport

IV. KEY FACTS/HOT TOPICS

- In the Wyoming Statehood Act of 1890, the United States granted certain lands to the new state in order to provide revenue for its schools.
- Among the lands granted to Wyoming were three parcels that were later included within the boundaries of Grand Teton National Park when it was expanded by Congress in 1950.
- Efforts to purchase these lands from Wyoming date back to the 1950s but had been unsuccessful. However, in late 2012, the National Park Service purchased the 86-acre Snake River parcel for \$16 million using funds made available through the Land and Water Conservation Fund.
- Following acquisition of the Snake River parcel, the Department sought to acquire the 640-acre Antelope Flats parcel through a land exchange in accordance with the Grand Teton National Park Land Exchange Act of 2003. In 2015, the exchange was determined to be infeasible.
- The National Park Foundation and the Grand Teton National Park Foundation agreed to partner with the NPS and raise half of the \$46 million purchase price for the Antelope Flats parcel. Fundraising was successfully accomplished over an 8-month period ending

in November 2016.

- Transfer of the land to the United States is scheduled to occur on December 12, just ahead of a December 31 statutory deadline established for the transfer by the Wyoming legislature.
- The transaction is a win-win for both NPS and Wyoming: NPS is able to effectively protect important natural resources in the park and Wyoming is able to add significantly to its public education trust fund.

V. TALKING POINTS/REMARKS

Talking Points provided by NPS:

Thank You to the Grand Teton National Park Foundation (GTNPF) and the National Park Foundation (NPF) for their extraordinary accomplishment of raising \$23 million in 8 months to match the federal funding for acquisition of Antelope Flats.

Specific thanks to GTNPF President Leslie Mattson, GTNPF Board Chair Hugh O'Halloran, and the entire GTNPF Board of Directors and staff.

Thank you to the National Park Foundation, with acknowledgement to Will Shafroth and Dan Sakura, and King Laughlin (representing NPF at the event)

Thank you to all of the many individuals and organizations who generously donated to both NPF and GTNPF – with your help we have achieved a great victory for conservation.

Thank you to the local community and elected officials for their support of the acquisition, including

- the Teton County Board of County Commissioners
- the Town of Jackson.
- Any members of the Wyoming Congressional delegation - Senator John Barrasso, Senator Mike Enzi, Representative Cynthia Lummis - invited and may be in attendance.

Thanks to the late Senator Craig Thomas (R-WY) who was a champion for acquiring the state school trust lands within the park and sponsored the Grand Teton National Park Land Exchange Act of 2003. His widow, Susan Thomas, may be in attendance.

Philanthropy continues to play an important role at Grand Teton National Park.

The public-private partnership to acquire the Antelope Flats parcel continues the tradition of generosity begun by John D. Rockefeller, Jr. in acquiring lands in order to protect them from development and in helping to establish the park.

The GTNPF has an almost two-decade record of significant achievements, including the Craig Thomas Discovery and Visitor Center, the Jenny Lake Renewal project, and supporting the park in many other ways.

The Antelope Flats parcel is of great importance to preserving the scenic and ecological integrity of the landscape in this area.

The 640-acre parcel provides habitat and connectivity for elk, moose, deer, pronghorn, bison, wolves, grizzly and black bears, sage grouse, and other wildlife.

It is an important migratory corridor and will continue to serve that purpose in perpetuity.

The acquisition and protection of these lands are really all about the next generation of Americans - the kids who appeared in the video.

TWS Third Assessment of the State of the National Conservation Lands

1 message

Nada Culver <nada_culver@tws.org>

Wed, Oct 21, 2015 at 11:48 AM

To: "janice_schneider@ios.doi.gov" <janice_schneider@ios.doi.gov>, "Lyons, James" <james_lyons@ios.doi.gov>

Hi Janice and Jim – We wanted to share with you The Wilderness Society's report 2015 State of the National Conservation Lands: A Third Assessment, which we released today - on the 45th anniversary of the designation of King Range NCA in California, BLM's first conservation area. We're very excited to be able to keep working on this issue and supporting the BLM's management of these amazing places.

Here's a link to our web feature, which includes a link to the report <https://wilderness.org/report-national-conservation-lands-chronically-underfunded>

I've also pasted our press release below:

Report Shows BLM's Prized Conservation Lands Struggle without Adequate Funding

Wilderness Society Issues Third Assessment of National Conservation Lands at its 15-Year Milestone

Contacts:

Nada Culver, Senior Counsel and Director, BLM Action Center, 303-225-4635, Nada_Culver@tws.org

Michael Reinemer, Deputy Director, Communications, 202-429-3949, michael_reinemer@tws.org

WASHINGTON, DC (October 21, 2015) — In a [new report](#), the third in a series, The Wilderness Society recommends that Congress and the Administration take stronger measures to protect America's National Conservation Lands. Managed by the U.S. Bureau of Land Management (BLM), National Conservation Lands were established in 2000 to conserve, protect and restore nationally significant lands recognized for their outstanding cultural, ecological and scientific values.

The 30 million acres of National Conservation Lands are natural and cultural treasures, and include National Monuments, National Conservation Areas, [Wilderness Areas](#), Wilderness Study Areas, Wild and Scenic Rivers, National Scenic and Historic Trails and other protected places.

The Wilderness Society's Third Assessment found improvements in planning, protection of wild lands and visitor management over the past five years and over the 15 years since the creation of the system and the corresponding evaluations by The Wilderness Society. Now, nearly all designated Conservation Lands are better known and appreciated by the public. However, the lack of adequate funding for National Conservation Lands continues to hamper BLM's ability to improve leadership, increase law enforcement, restore ecosystem health and protect cultural resources.

For example, fragile archaeological sites and rock art around both the Red Rock Canyon National Conservation Area in Nevada and the Sonoran Desert National Monument in Arizona are continually vandalized due to a lack of law enforcement and poorly managed off-road vehicle uses near these cultural sites. Although designated almost 20 years ago, the Grand Staircase-Escalante National Monument in southern Utah still does not have a grazing management plan, forcing the agency to rely on management plans from the early 1980s. Other problems in these areas include lack of consistent leadership and persistent habitat fragmentation by roads, as well as inadequate inventories of cultural resources, special status species or non-native, invasive species. These consistent problems keep BLM from coming up with needed protective management strategies.

"Our BLM conservation lands face continuous threats – ranging from underfunding to complete defunding to threats of undoing the system altogether, as well as development of backcountry areas and damage to our shared heritage of cultural resources," said **Nada Culver, Director of the BLM Action Center at The Wilderness Society**. "It's high time our elected leaders start listening to the American people, who want to protect the cultural treasures, wildlife and clean air and water that make our public lands the premier destinations for visitors from around the world."

Examples of National Conservation Lands managed by BLM include:

- The **Iditarod Trail** in Alaska, used by thousands of winter recreation enthusiasts, subsistence hunters, inter-village travelers and long-distance winter races.
- The **Canyons of the Ancients National Monument** in southwest Colorado near Mesa Verde National Park, which contains the greatest known density of archaeological sites in the United States.
- The **Bisti/De-Na-Zin Wilderness Area** in New Mexico, a landscape of visually stunning badlands and hoodoos.
- The **Upper Missouri River Breaks National Monument** in Montana, a living museum of the historic Lewis and Clark expedition across the Northwest.

In The Wilderness Society's "[Third Assessment Report](#)," the group urges Congress and the Administration to improve management for the National Conservation Lands by:

- Prioritizing landscape restoration and fostering ecosystem and species health, along with reducing the impact of roads and development on wildlife habitat and wildness.
- Increasing BLM's budget to improve law enforcement, leadership and actual management across all National Conservation Lands.
- Expanding the National Conservation Lands to include all important and still unprotected BLM managed landscapes and waterbodies across the West.

"There are some in Congress, such as House Natural Resources Committee Chairman Rob Bishop, who believe the National Conservation Lands to be 'unnecessary' and have proposed to defund the System entirely," said **Culver**. "This report shows the need for the opposite. We need more funding and better management of our BLM conservation lands to provide the American people with more access to hunting, fishing, camping, research, restoration and for cleaner air and water throughout the West."

The Wilderness Society is the leading conservation organization working to protect wilderness and inspire Americans to care for our wild places. Founded in 1935, and now with more than 700,000 members and supporters, The Wilderness Society has led the effort to permanently protect 109 million acres of wilderness and to ensure sound management of our shared national lands. www.wilderness.org.

Quotations from Local Advocates

Cascade-Siskiyou National Monument, Oregon

The Soda Mountain Wilderness Council's Dave Willis spearheaded the multi-group campaign to establish southwestern Oregon's Cascade-Siskiyou National Monument 15 years ago and has monitored the area for more than 30 years. Willis

says the problems with National Conservation Lands can't just be blamed on a slim budget. "The 2015 Conservation Lands Assessment rates BLM's management of the Cascade-Siskiyou National Monument as mostly mediocre," he says. "BLM has done a good job of acquiring Monument in-holdings from willing sellers here via the Land and Water Conservation Fund. We hope Congress will restore that important program. And BLM has repaired land damaged by old jeep trails in the congressionally designated wilderness of the Monument's southern backcountry where motor vehicles are illegal. But beyond those good things, BLM's conservation deficiency here is generally a sad fact."

"Cascade-Siskiyou is the only national monument explicitly established to protect biodiversity. Yet the Monument manager's passion seems to be commercial logging – not permitted in the Monument itself – on BLM lands outside the Monument for which he is also field manager. And the Monument's staff ecologist was not re-hired after he produced a study showing cattle grazing impacts to be incompatible with Monument protection – a study BLM has functionally ignored. This is tragic because Cascade-Siskiyou is not 'just' outstandingly biodiverse – its public lands also hold together by a thread the ecologically strategic biological connectivity between the globally significant Siskiyou Mountains and southern Cascade Range.

Cascade-Siskiyou needs not only better conservation management by BLM but – according to many dozens of scientists concerned about the effects of climate change here – bigger boundaries to safeguard and make more resilient the 'spectacular diversity' of species and important biological corridor the Monument was established to protect. Whether BLM as an agency is up to the job – or, despite some very dedicated and conservation-minded BLM staff, whether the local Medford BLM office even wants to be up to the protection job here – is still up for grabs. After 15 years, local BLM managers still suffer from a Cascade-Siskiyou conservation vision/priority deficit."

Southwest Utah

"Like most of the West, southwestern Utah has been going through many changes over the past decades. This report shows that conservation on BLM-managed lands has been a possible but challenging concept over the past 15 years. For example, there is currently pressure to build a four-lane highway through the Red Cliffs National Conservation Area, which is anathema to the purpose of the NCA. How BLM responds will show if it can meet the mission of the National Conservation Lands to conserve, protect and restore these important landscapes."

CONTACT: Susan Crook, Land Program Manager/ [SUNCLF Director](#), [Citizens for Dixie's Future](#)

susan@citizensfordixie.org, 435-773-7920

Grand Staircase-Escalante National Monument, Utah

"As this report points out, the Grand Staircase-Escalante National Monument still does not have a plan in place for grazing management and is relying on management plans from the early 1980s. Even though there were criticisms and concerns expressed during the scoping process, it is essential to finalize the grazing management plan based on National Conservation Lands policies and the current physical, climatic, social and resource conditions. If this is done, BLM can be on the right track to providing a model for conservation and grazing management agency-wide."

CONTACT, Noel Poe, Executive Director, [Grand Staircase Escalante Partners](#)

noel@gsenm.org, 435-644-1307 office, 435-899-0467 cell

Upper Missouri River Breaks National Monument

"The new maps, posters and branding of the National Conservation Lands and the manuals for managing them are all steps in the right direction.

"But the Breaks got an "F" in the area of protecting the Monument's wild character. We're concerned that BLM hasn't taken the first steps in inventorying the wild lands they have. They can't manage the Breaks to protect what they have if they don't know what's out there. And BLM is turning even well-intentioned people into scofflaws by not issuing a clear map of open roads in the Monument.

"We get that BLM is working under fairly extreme budget cuts and staff shortages. All we ask is that the agency prioritize protection, and work with partners who can help them protect the Monument – our group of course, but also groups like the University of Montana's Wilderness Institute, which just worked with BLM to do the first-ever survey of the Monument's Wilderness Study Areas."

Cascade-Siskiyou: 4-10-2016, Medford Mail Tribune -- Draft EA Monument Transportation Management Plan op-eds

1 message

Dave Willis <sodamtn@mind.net>
To: james_lyons@ios.doi.gov

Thu, Apr 14, 2016 at 12:17 AM

Hi, Jim –

Good to see you recently. Thanks for making time for Mark and me.

The *Medford Mail Tribune* ran a side-by-side "Two Views" pair of op-eds last Sunday re: BLM's Draft EA for their Cascade-Siskiyou National Monument Transportation Management Plan.

Links to and text of each op-ed are below.

You can judge which of the two pieces are likely to be more persuasive with the public...

Come out for a horseback ride!

The morning had begun at 4 a.m. and now, 14 hours later, the old green Peterbilt logging truck was rambling out of the woods with its freshly loaded stack of six logs. This would be the third trip today past Pilot Rock to the mill to dump the load.

My father had been hauling logs throughout Southern Oregon and Northern California for as long as I can remember and there was a good possibility I was sitting alongside him with BB gun in hand, waiting for a load check so that I might chase after some nearby squirrels. I can still remember as my father explained how logging done correctly was much like raising corn: you would cut the timber as it matured and replant for a future cut, the same as you would do a corn stalk.

The Bureau of Land Management managed much of the land that my father would have logged. BLM records indicate they managed 16.3 million acres with 738 employees in 1965. Their expenditures on forest development, wildfire and misc other charges amounted to just over \$26 million. As recently as 2014, controlled acreage remained virtually the same, but according to BLM records, over 1,600 employees were required. The same records show expenditures exceeded \$256 million.

In June 2000, after the environmentalists had totally devastated the logging industry with the spotted owl and other environmental concerns, the Clinton administration decided to create the Cascade-Siskiyou National Monument, which now totals 62,000 acres. As a point of comparison, the average annual Oregon harvest of timber from World War II through 1989 was 7 billion to 9 billion board feet, which sent \$1.5 billion of O&C money to local counties and schools. In 2013 only 4.2 million board feet were harvested, and today less than \$40 million is being used as a Band-Aid through Congress.

The BLM now carries an inflated number of employees, expenditures have skyrocketed and logging has decreased. The need for BLM in its current condition is suspect at best. So now the BLM pushes for removal of 165 miles of roadway, maybe in an effort to justify its numbers. Removing those roads does not come without cost. Perhaps an estimate of what costs are involved to close 165 miles of road and turning them back to nature should be given to the public.

History proves that where timber is *not* logged, fires will eventually arrive. The Transportation Management Plan document even admits "limiting vehicular access ... increases the chance of wildfire ... increasing the fire suppression costs." Roads that are closed will have to be rebuilt to access those fires; the taxpayer bill increases.

As a 58-year resident of Oregon, I have paid my share of taxes to this state. I have been an avid hunter and fisherman, bought licenses and tags and hunted every corner of the current monument for over 45 years. Now that I am older and walking is harder, it seems that I am the one being discriminated against by the closure of all of these roads.

Many of the areas that I have hunted have already been gated up or "recontoured." With much of the land now being bought up by private parties I find it harder and harder every year to even get on land that I can enjoy. I find it interesting that the only public meeting that the BLM has is in

Ashland, a town known for the environmentalists, many of whom do not even live in this state. Perhaps we should have a meeting that includes the Jackson County commissioners, who are actually supporting the citizens by saying no to these road closures.

The old green Peterbilt has since been decommissioned and my father passed away, but I would hope that people could remember those loggers were the ones that helped protect and make these woods available to all of us. In my opinion it would be a great disrespect to those who in the past and present have logged the woods of Southern Oregon by denying their children and grandchildren the same opportunities that they once enjoyed.

Closing any roads and denying the access of any part of the forest is not acceptable. My children and theirs should not be locked out of any public lands. It seems to me what the BLM is proposing would be the same as showing a young child a new playground and then only letting a select few go into the playground while the others are left looking in.

Gary Reed lives in Phoenix.

Recreation — including hunting — is a definite benefit of the Cascade-Siskiyou National Monument. I am a hunter. We are truly blessed to have such a national amenity in our local backyard — even if it is still a work in progress. But neither hunting nor any type of recreation is the monument's purpose.

The purpose of the monument, according to its designating language, is to protect the native species and natural features of this outstandingly biodiverse and ecologically strategic biological corridor. These species, features and function are what make this Cascade-Siskiyou area such a

special place and why a small part of it became a national monument. (I am also a carpenter — but, with many scientists, I think the monument should be bigger.)

I live on 20 acres of my own land just inside the monument boundary. I have hunted the monument area each year for more than two decades. I treasure my hunting experiences here — especially backcountry hunting away from roads.

Getting away from roads lets me experience quiet and see animals and things I don't usually see from a road. The exercise is good for me and I can breathe clean mountain air away from noise and exhaust. Hunters are legally required to be 1,500 feet from a road before firing a gun. (How often do you think that regulation is respected?) In wet weather, road hunters often damage muddy back roads.

I'm glad to see the Bureau of Land Management finally getting around to the monument's Transportation Management Plan mandated 16 years ago. What took BLM so long?

BLM's draft plan keeps talking about "access, access, access" — as though motor vehicles are the only way to "access" the monument. We drive to the monument. But the more we walk when we get there, the better it is for us and for the monument. BLM seems to forget that walking and horseback riding are far more "traditional" forms of "access" than driving.

Too many roads slice up Southern Oregon backcountry. There are thousands of miles of roads — including hundreds of miles in the monument built for commercial logging that ended when the monument began. The monument's road density is so extreme from obsolete logging roads that things are way out of whack from a hydrology and wildlife biology perspective.

Backcountry roads fragment habitat. Roads are prime vectors for noxious weeds. Roads cause erosion and can trigger damaging landslides and debris flows that degrade streams and fish habitat.

I have volunteered with the Greensprings Fire and Rescue District since it began. People talk about the benefit of roads for fire suppression. But backcountry roads are also prime vectors for human-caused fires, the most common source of wildland fire.

BLM's draft plan seems to mostly just consider closing dead-ends and spurs — many of which are already overgrown and not driveable now. Most, if not all, primary roads seem to be left open. I bet most people won't even notice which roads are closed.

BLM's plan doesn't seem to be creating any new roadless areas — and for those of us who care about fish, wildlife, and quality hunting experiences, that's too bad. Unfragmented habitat is a dwindling and precious commodity we keep squandering. Let's get some back!

I've heard talk about the handicapped and elderly needing roads to experience monument backcountry. That ignores the fact that disabled and able-bodied people of all ages are on both sides of whether to protect or further degrade wildlands. In most of the world, degradation keeps winning. The monument is supposed to be different.

A primary monument wildlands advocate lost most of both feet 40 years ago. He's 63 years old. Another monument wildlands advocate is a double-amputee just below each knee. She's no spring chicken. One of the best conservationists in Southern Oregon is a polio victim. She, too, qualifies for a senior citizen's discount. And an early and strong advocate for protecting wildlands here was a now-deceased city councilman confined to a wheelchair at an early age.

I hope to become a senior citizen myself someday. When I do — and even if I suffer disability along the way — I don't want my age or affliction to be used to further injure wildlands with roads in the monument or elsewhere. We should thank BLM for their legally required plan to close some monument roads — and ask them to do their job and close more.

Matt Flotho is a carpenter who has lived in the Greensprings/Tyler Creek area for 20 years. He hunts in the Cascade-Siskiyou National Monument area and elsewhere.

Obama should honor on-the-ground solutions in Oregon's wildest places: Editorial

The Owyhee Wild and Scenic River, managed by the U.S. Bureau of Land Management, in southeast Oregon, flows north to connect with the Snake River. (Courtesy the Bureau of Land Management)

By The Oregonian Editorial Board

[Print](#) [Email](#)

[Email the author](#) | [Follow on Twitter](#)

on December 03, 2016 at 3:00 PM

Two separate fights to protect two extraordinary patches of Oregon have in recent months escalated as President Barack Obama's term comes to a close. That's because he could, by the authority Congress granted to him in a far less populous time, singularly issue sweeping protections to the Owyhee Canyonlands in southeastern Oregon and the Cascade-Siskiyou Mountains in southwestern Oregon and northern California.

The drive to limit development and resource use in both areas makes sense but for different reasons. Oregonians will never get back the lightless skies at night or the lonely beauty of ancient, eroded terrain cut through by wild rivers in the Owyhee if given over to mining or highway-building. Separately, Oregonians risk losing some of the site-specific, mind-bending biodiversity that makes the forested Cascade-Siskiyou realm a delicate universe requiring limits on use.

But Obama should say no to designating national monument status to the 2.5-million acre Owyhee Canyonlands. And he should say yes to doubling the already successful Cascade-Siskiyou National Monument.

Selective wilderness designations, river protections and broad prohibitions on mining would be strategic, consequential steps Congress could take to protect the Owyhee Canyonlands, the largest undeveloped expanse of land in the lower 48 states. Significantly, doing so would ensure that an economically vital and long-established ranching culture goes unthreatened by monument designation.

A scene from the Cascade-Siskiyou National Monument in Southern

Oregon. Courtesy the Bureau of Land Management

By contrast, in the more populated realm anchored by Ashland and Medford, the fish-bearing waterways and exotic flora that make the Siskiyous distinct face potential threat from fragmented lands and warmer temperatures from climate change. Immediate monument expansion would connect fragmented lands within and outside the monument, offering lifelines to potentially marooned species, and help preserve what the 2000 presidential decree called an "ecological wonder ... of rare and beautiful species of plants and animals, whose continued survival ... depends upon its continued ecological integrity."

Oregon's public lands conform to contemporary uses while honoring the communities rooted in them.

Few dispute that President-elect Donald Trump might bring to the nation a different ethic about development and land use, and it remains true that roughly half of Oregon is owned by the federal government and run by agencies such as the U.S. Bureau of Land Management and the U.S. Forest Service. While most folks in rural Harney

County and surrounding areas objected to the armed takeover of the Malheur National Wildlife Refuge, simmering resentments across the American West about public lands management came to the fore. So Oregon must have a voice in deciding what's right for the extraordinary landscape that Oregonians call home. That means the Owyhee and the Siskiyous warrant bolstered protections only by actions that honor on-the-ground sentiment, essential to declaring shared destiny and preserving democracy.

Years ago Idaho withstood fears that its Owyhee lands would win monument designation and dodged it by creating 518,000 acres of protected wilderness. It has worked well, among other things limiting mechanized uses of sensitive lands.

But
Oregon

Oregonian editorials

Senators Ron Wyden and Jeff Merkley in June proposed legislation that would shield more than 2 million acres of the Owyhee Canyonlands from mineral exploitation, including oil and gas drilling. It was a clear call to leave the ground the way it is and do so in such a way that supports farmers and ranchers who work in an environmentally sustainable fashion. They should press Congress to approve the legislation while citing a report released just last month from the Oregon Department of Geology and Mineral Industries showing plenty of untapped riches beneath the surface in southeastern Oregon.

Both senators, meanwhile, have deferred to Obama on monument designation, preferring to make known the Oregon sentiments on all sides of the issue. Yet both have been supportive of expansion of the Cascade-Siskiyou National Monument, even as some logging- and ranching-based voices in the region claim they are unheard.

Presidents are twitchy in their monument designations, which can sharply limit access while altering ecologies and firefighting techniques. Bill Clinton created eight monuments in his last three days of office. Obama has made several already. His interior secretary and former REI chief, Sally Jewell, has advocated wise stewardship of public lands, and her counsel will count in the weeks ahead. But any presidential decree affecting Oregon must reflect this modern reality: Oregon's public lands conform to contemporary uses while honoring the communities rooted in them. Owyhee needs wilderness, river protection and mining-prohibition legislation -- but no monument decree. The Cascade-Siskiyou National Monument, meanwhile, should build upon its success with expansion that will ensure its vitality.

OREGON STATE SENATE

October 30, 2016

ENDORING CASCADE-SISKIYOU NATIONAL MONUMENT EXPANSION

To Whom It May Concern:

Although I regret the tragic circumstances that have me succeeding the late Senator Alan Bates in representing Senate District 3, I do not hesitate to continue the on-the-record support for expansion of the Cascade-Siskiyou National Monument. The unique biodiversity of the area was formally recognized and some of it protected as the original Monument in June of 2000. Sixteen years later, the Monument has proved to be an economic and ecological gift that keeps on giving.

In endorsing expansion, I join 85 scientists (and counting), Oregon's U.S. Senators Ron Wyden and Jeff Merkley, the Ashland and Talent Chamber of Commerce boards, the Ashland and Talent City Councils and their respective mayors, as well as my colleague representative Peter Buckley, whose Oregon legislative district also includes the Cascade-Siskiyou National Monument.

I am convinced the Monument plays a key role in protecting our region's distinctive biodiversity and important biological connectivity between the globally significant Siskiyou Mountains and southern Cascade Range. Scientists report the current Monument boundaries are inadequate to safeguard long-term what the Monument was established to protect. The expansion could correct this and preserve the original intent of the Monument and the efforts made thus far.

The Ashland and Talent City Councils and Chamber of Commerce boards have expressed that the Monument contributes to our region's economic diversity – that "green is gold." The Cascade-Siskiyou National Monument fits thematically with our south valley's primary tourism and higher-education based economy, with southwestern Oregon's growing reputation for natural values, and also with our region's urgent need for economic diversification.

In drawing any expanded Cascade-Siskiyou National Monument boundaries, I urge federal decision-makers to consider the best ecological criteria possible as well as scenic resources and provision for traditional quiet recreation. I feel this will protect the unique natural resources and support our rural economy.

I ask you, please expand the Cascade-Siskiyou National Monument. Thank you for your time and consideration.

Sincerely,

Senator Kevin S. Talbert
District 3, Oregon State Senate

Dr. Alan Bates

OREGON STATE LEGISLATURE

August 3, 2015

ENDORING CASCADE-SISKIYOU NATIONAL MONUMENT EXPANSION

To Whom It May Concern:

Living and fishing in southern Oregon, I know firsthand the significance of the wilderness areas in the region. It is one of the many reasons I am proud to represent Senate District 3. The unique biodiversity was formally recognized and protected in June of 2000, with the formation of the Cascade-Siskiyou National Monument. Fifteen years later, it has proved to be an ecological and economic gift that keeps on giving. Today, I write to endorse expanding the Monument.

In endorsing the expansion, I join 85 scientists (and counting), the Ashland Chamber of Commerce board, the City of Ashland, and my colleague Representative Peter Buckley, whose Oregon legislative district also includes the Cascade-Siskiyou National Monument.

I am convinced the Monument plays a key role in protecting our region's distinctive biodiversity and important biological connectivity between the globally significant Siskiyou Mountains and southern Cascade Range. Scientists report the current Monument boundaries are inadequate to safeguard long-term what the Monument was established to protect. The expansion could correct this and preserve the original intent of the Monument and the efforts made thus far.

The Ashland City Council and Chamber of Commerce have expressed that the Monument contributes to our region's economic diversity – that "green is gold." The Cascade-Siskiyou National Monument fits thematically with Ashland's tourism and higher-education based economy, with our region's growing reputation for natural values, and also with our region's urgent need for continued economic diversification.

In drawing any expanded Cascade-Siskiyou National Monument boundaries, I urge federal decision-makers to consider the best ecological criteria possible as well as protection of scenic resources and provision for traditional quiet recreation. I feel this will protect the unique natural resources and support our rural economy.

I ask you, please expand the Cascade-Siskiyou National Monument. Thank you for your time and consideration.

In Health,

State Senator Alan C. Bates, D.O.

HOUSE OF REPRESENTATIVES

July 6, 2015

SUPPORT FOR EXPANDING THE CASCADE-SISKIYOU NATIONAL MONUMENT

To Whom It May Concern:

With enthusiasm, I endorse expansion of the Cascade-Siskiyou National Monument, all of which is in my district.

Many scientists, the board of the Ashland Chamber of Commerce, and the City of Ashland have collectively noted the ecological, recreational, scenic, and economic benefits of the Cascade-Siskiyou National Monument. My local district is privileged to be home to such a national resource.

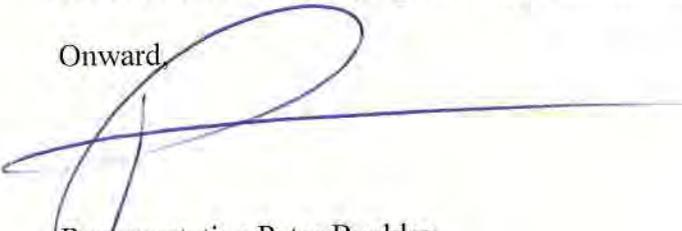

The same scientists have noted the ecological need to expand the Monument due to habitats fragmented by the Monument's currently constrained boundaries, the need for adaptive resilience in the face of climate change, and increased commodity and development pressures in the Monument's surrounding area.

In their own Monument expansion recommendations, the Ashland Chamber of Commerce board and Ashland City Council have noted the significant economic and quality-of-life contributions the Monument's recreational and scenic resources make to the area's citizens and visitors.

As former city administrator Brian Almquist wrote the Ashland mayor and city council on May 28 in his own letter urging Monument expansion, "Ashland is blessed to have a national amenity in its municipal backyard – even if it is still a work in progress..."

I encourage federal decision-makers to expand the Cascade-Siskiyou National Monument with "eco-logical" boundaries attuned to best science that also benefit my district's and the region's quiet recreational and scenic resources. An expanded Monument is right in step with the "State of Jefferson's" diversifying economy and will contribute to the well-being of my constituents.

Onward,

Representative Peter Buckley
House Co-Chair
Joint Committee on Ways & Means
Oregon House of Representatives

COUNCIL CORNER

The monument should grow

By Pam Marsh

We all know we live in a special place. Sometimes it takes an act of good government to help us realize the truly unusual nature of our landscape.

In June 2000, with the authority Congress gave presidents starting with Teddy Roosevelt, President Bill Clinton issued a proclamation establishing the Cascade-Siskiyou National Monument, and placed 53,000 acres of publicly owned land to the south and east of Ashland within its boundaries.

With monument status, the forest around my home in the Greensprings took on new meaning. We'd always appreciated these woods, but monument designation gave us a different vocabulary and a new understanding of our surroundings. The presidential proclamation described the monument as "an ecological wonder" created by the "interface of the Cascade, Klamath and Siskiyou ecoregions, in an area of unique geology, biology, climate and topography."

"Unique" is often over-used, but I soon learned it applies in this case. Cascade-Siskiyou is the only national monument established to protect biodiversity. It turns out that the intersection of multiple mountain ranges here produces a very rich flora and fauna. This spectacular variety of plant and animal species and close association of ecological communities is found nowhere else. It is also home to treasured natural landmarks, including Pilot Rock and Soda Mountain.

In the 16 years since designation, the monument has become a hiking mecca and a living laboratory for school children. It has also become a focus of significant biological study that has affirmed the area's special qualities — and its vulnerability.

A diverse group of scientists with experience in monument fieldwork has been warning that existing boundaries are insufficient to protect monument biodiversity, particularly in the face of climate change. The group has proposed an expansion into adjacent and nearby public lands that will allow critters and plants to move to different habitats and higher elevations in order to adjust to rising temperatures, changing rainfall patterns and general climate shifts.

Proposed expansion areas could extend as far northwest as Grizzly Peak, south to lower elevations below Pilot Rock and Soda Mountain and northeast to cold headwater streams of Jenny Creek. Ideally, specific acreage would be determined by ecosystem needs, and not by artificial political boundaries.

Here in Ashland, we appreciate the intrinsic, aesthetic value of our local wild areas. We are also beginning to understand the potential recreational and economic opportunities offered by an expanded monument.

The Bureau of Land Management manages the Cascade-Siskiyou National Monument with the overriding goal of protecting and restoring the area's ecological values. Privately held lands within outer monument boundaries are unaffected by the

designation and continue to be governed by county land-use rules. But the protected, federally owned acreage remains, as it should, open to the public for varied users including hikers, nature-lovers, hunters and horseback riders.

Expansion could protect our viewshed, grow our outdoor recreation opportunities and give us yet another means to entice visitors to come to town, and then stay awhile longer. A community that can boast of both a Shakespeare festival and a national monument has something for everyone.

Recognizing the need to protect the ecological sensitivity of our region as well as the potential recreational and economic benefits, Ashland's City Council and Chamber of Commerce board, as well as Talent's City Council and Chamber board, have all unanimously endorsed monument expansion.

Now we need President Obama to step up. Just as the original monument came through presidential proclamation, expansion would likely require executive action. Sixteen presidents, beginning with TR and including the current officeholder, have used the federal Antiquities Act as a powerful conservation tool to protect historical sites and scientifically important areas as national monuments.

President Obama still has five more months in office. A science-based expansion of the Cascade-Siskiyou National Monument could be one of his last, best acts.

— Pam Marsh is a member of the Ashland City Council.

June 11, 2015

Mayor John Stromberg and the Ashland City Council
20 East Main
Ashland, OR 97520

Dear Mayor and Council Members:

The Ashland Chamber of Commerce Board of Directors voted unanimously at the June 11, 2015 Board meeting to support the City resolution for the expansion of the Cascade-Siskiyou National Monument.

We appreciate the leadership of the Ashland City Council since 1985 in support of the protection of land in the Cascade-Siskiyou Monument area and believe a further expansion of these boundaries to be in the best interest of our citizens and visitors. The Monument provides unique recreational opportunities as well as scenic vistas for our community.

The Chamber appreciates the scientific evidence and analysis that will occur when designating the new boundaries. We believe quality of life afforded to our residents and businesses are further enhanced by the expansion of this area.

Thank you for your leadership and I encourage you on behalf of the Ashland Chamber Board of Directors to formally support this expansion through the resolution.

Sincerely,

Cindy Bernard, President

Ashland Chamber of Commerce and Visitor & Convention Bureau

Dave Willes

Brian L. Almquist
155 Susan Lane
Ashland, Oregon

May 28, 2015

Mayor John Stromberg and the Ashland City Council
20 East Main Street
Ashland, OR 97520

Dear Mayor and Council Members:

I wholeheartedly urge you to support expansion of the Cascade-Siskiyou National Monument.

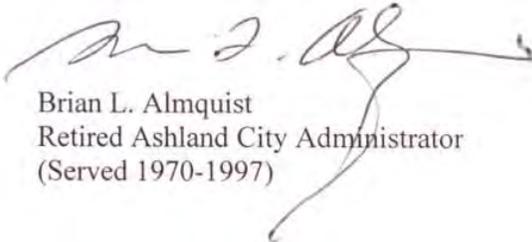

It's been my pleasure to witness and participate in the City of Ashland's consistent support for protecting lands south and east of Ashland several times, since the city council first supported designation of the Soda Mountain Wilderness Council's proposal to congressionally designate well over 30,000 acres of Wilderness in 1985. Though the California portion of the Wilderness proposal has not yet been designated, further familiarity with the area after 1985 revealed ecological values on lands not suitable for Wilderness outside the Wilderness proposal that led to the June 2000 establishment of the 53,000 acre Cascade-Siskiyou National Monument. The Monument is now over 62,000 acres due to BLM acquisitions of private timberland in-holdings from willing sellers. In 2009, about 24,000 acres of the Monument's backcountry became the Soda Mountain Wilderness. I believe both the Monument and its backcountry Wilderness are significant Ashland assets.

I'm familiar with the local scientists' April 2011 report recommending Monument expansion. But one does not need scientific expertise to note the "un-ecological" shape of the current boundaries of our country's only national monument established to protect biodiversity. Nor is scientific expertise needed to perceive the advantages of an expanded Monument for protecting Ashland's viewshed; providing increased recreational opportunities for our citizens and visitors; and enhancing our city's economy and quality of life. We are indeed blessed to have such a national amenity in our municipal backyard – even if it is still a work in progress, which the council can again assist with their continued support.

A real opportunity to expand the boundaries of the Cascade-Siskiyou National Monument does not present itself often. Having our Ashland elected officials endorse the protection of more of the mountains and foothills around Ashland, would be of great benefit in securing approval of an expanded boundary. Such a move would provide a lasting legacy, and enhance the benefits it provides to our city and the region.

Again, I urge you to formally support the expansion of the Cascade-Siskiyou Nat'l. Monument.

Sincerely,

Brian L. Almquist
Retired Ashland City Administrator
(Served 1970-1997)

June 29, 2016

Secretary Sally Jewell
Department of the Interior
1849 "C" Street, NW
Washington, DC 20240

Dear Secretary Jewell,

I write to ask your timely support for expanding the Cascade-Siskiyou National Monument – and to offer my assistance toward that end.

Because of increasing development pressures and the effects of climate change, scientists recommend that the Cascade-Siskiyou National Monument be expanded to safeguard into the future the outstanding biodiversity the Monument was established to protect. Last year the Ashland City Council unanimously passed a resolution endorsing Monument expansion that urged *“national and elected officials to use the best ecological criteria in considering the Monument’s present and future needs – as well as considering recreational and scenic resources – as they determine appropriate expanded boundaries for the Cascade-Siskiyou National Monument”* (Resolution No. 2015-22, attached).

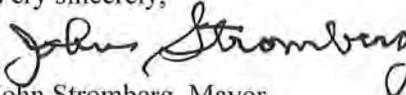

The economic and ecological benefits of the Monument to our city and region’s quality of life are why the Ashland Chamber of Commerce Board of Directors unanimously asked us to support Monument expansion in their June 11 (2015) letter to myself and the Council – and why our local state legislators, Representative Peter Buckley and Senator Alan Bates, are also on record supporting Monument expansion. Our recent resolution is consistent with the City of Ashland’s support for protection of national public lands in the Monument area since 1985 as noted in our Resolution 2001-19 (also attached). These resolutions underscore strong local support for protecting the Monument and its economic contribution to our economy.

As our former long-time city administrator, Brian Almquist, wrote us about the Cascade-Siskiyou National Monument last May, *“We are indeed blessed to have such a national amenity in our municipal backyard – even if it is still a work in progress which the council can again assist with their continued support.”*

As the current national administration draws to a close, so does the current window of opportunity for Cascade-Siskiyou Monument expansion. I urge you to not let this opportunity slip away. If a public meeting to consider Monument expansion becomes a possibility, please know that I am willing to host such a meeting myself at a mutually workable time and/or make city facilities available for such a gathering.

Again, Ashland’s local business leaders, elected officials, and (I am sure) the vast majority of our local citizens value and treasure our local public lands. We urge you to support expansion of the Cascade-Siskiyou National Monument using the best available ecological criteria, while also considering recreational opportunities and scenic resources. Current and succeeding generations will only thank you more and more with time.

Very sincerely,

John Stromberg, Mayor

RESOLUTION NO. 2015-02

**A RESOLUTION ENDORSING
CASCADE-SISKIYOU NATIONAL MONUMENT EXPANSION**

RECITALS:

- A. The Ashland City Council has, since 1985, consistently supported protection of land in the Cascade-Siskiyou National Monument area.
- B. In 2001, the Ashland City Council unanimously resolved to affirm the June 9, 2000 Cascade-Siskiyou National Monument proclamation as written, request the immediate release of the Medford BLM Draft Management Plan for the Monument, and request that funding be made available for the final plan.
- C. The Council found in its 2001 resolution that the Monument contributes substantially to Ashland's economy, enjoys broad support from Ashland citizens, businesses, and area residents and provides "richness of recreational opportunities and scenic vistas for the citizens of Ashland."
- D. In April 2011, a diverse group of scientists recommended expansion of Monument boundaries to safeguard the area's unique biological values. The scientists found current Monument boundaries to be inadequate because of: fragmented habitats (including incomplete watersheds); the need for more complete environmental gradients to increase resilience in the face of significant climatic change; and increasing development and land use pressures on adjoining lands that, if unabated, could undermine long-term persistence of the Monument's biological resources. In 2015 many other professional scientists (locally and nationally) have also endorsed the ecological need to expand Monument boundaries.

THE CITY OF ASHLAND RESOLVES AS FOLLOWS:

SECTION 1. The boundaries of the Cascade-Siskiyou National Monument should be expanded.

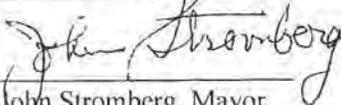

SECTION 2. We urge national elected officials to use the best available ecological criteria in considering the Monument's present and future needs – as well as considering recreational opportunities and scenic resources – as they determine appropriate expanded boundaries for the Cascade-Siskiyou National Monument.

This resolution was duly PASSED and ADOPTED this 16 day of June, 2015, and takes effect upon signing by the Mayor.

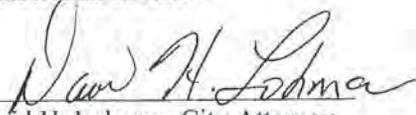

Barbara Christensen, City Recorder

SIGNED and APPROVED this 18 day of June, 2015.

John Stromberg, Mayor

Reviewed as to form:

David H. Lohman, City Attorney

RESOLUTION NO. 2001- 19

A RESOLUTION ENDORSING CASCADE-SISKIYOU NATIONAL MONUMENT

RECITALS

- A. The Ashland City Council has exhibited consistent support for the protection of land in the Cascade-Siskiyou National Monument by voting unanimously to write letters endorsing protection of the lands in the Soda Mountain Wilderness Area proposal, to support a land swap in the proposal area between BLM and Boise Cascade to prevent a clearcut, and to request that a power line not be installed across the area (June and December 1985, September 1993 and January 1994);
- B. Conservative calculations suggest that the impact of the Cascade-Siskiyou National Monument will enrich Ashland's economy by up to \$5,200,000 a year;
- C. 121 Ashland area businesses and thousands of citizens signed on to a Medford Mail Tribune April 8, 2001 full-page advertisement showing appreciation for the Cascade-Siskiyou National Monument;
- D. A poll conducted by the Ashland Daily Tidings from May 18-25, 2001 showed 89% of the responding readers favored either expanding or maintaining the current Cascade-Siskiyou National Monument as it currently is configured;
- E. The Cascade-Siskiyou National Monument will ensure an ongoing richness of recreational opportunities and scenic vistas for the citizens of Ashland,

THE CITY COUNCIL OF THE CITY OF ASHLAND RESOLVES AS FOLLOWS:

SECTION 1. We endorse the June 9, 2000 proclamation as written for the Cascade-Siskiyou National Monument.

SECTION 2. We request the immediate release of the Medford BLM Draft Management Plan and that funding be made available to implement the final plan.

This resolution was read by title only in accordance with the Ashland Municipal Code 2.04.090 duly PASSED and ADOPTED this 19th day of JUNE, 2001.

~~Barbara Christensen~~, City Recorder
MICHELLE COLE, ASSISTANT TO THE RECORDER

SIGNED and APPROVED this 20th day of JUNE, 2001

Secretary Sally Jewell
Department of the Interior
1849 "C" Street, NW
Washington, DC 20240

Dear Secretary Jewell,

I write to ask your timely support for expanding the Cascade-Siskiyou National Monument – and encourage you or your staff to come to Oregon soon to hold a public meeting toward that end.

Because of increasing development pressures and the effects of climate change, scientists recommend that the Cascade-Siskiyou National Monument be expanded to safeguard into the future the outstanding biodiversity the Monument was established to protect. This month the Talent City Council unanimously passed a resolution endorsing Monument expansion that urged *"national elected officials to use the best ecological criteria in considering the Monument's present and future needs – as well as considering quiet recreational opportunities and scenic resources – as they determine appropriate expanded boundaries for the Monument"* (Resolution No. 16-949-R, attached).

The economic and ecological benefits of the Monument to our city and region's quality of life are why the City Council and myself, as Mayor are joining the Talent Chamber Board of Directors in unanimous support of the Monument expansion as in the Chamber board's August 1 (2016) letter to us (attached) – and why neighboring Ashland's City Council, Mayor, Chamber board, and our local Oregon state legislators, Representative Peter Buckley and Senator Alan Bates (the latter of whom died unexpectedly on August 5, 2016), are also on record supporting Monument expansion. The Talent Chamber board wrote us that that they *"...believe a further science-based expansion of the Monument boundaries to be in the best interest of our environment, our citizens, and our visitors. The Monument provides unique recreational and educational opportunities as well as scenic vistas which will benefit our business climate, economy, and quality of life here in talent, and all of Southern Oregon."*

As the current national administration draws to a close, so does the current window of opportunity for Cascade-Siskiyou Monument expansion. I urge you to not let this opportunity slip away. Oregon's U.S. Senators Ron Wyden and Jeff Merkley have recently written you with encouragement to *"...come to Oregon and hold a public meeting and consider expanding the*

"If you're looking for Talent, you've come to the right place"

boundaries of the Monument." I affirm their invitation. It is critical to us that you come to Oregon to hold a public meeting considering Cascade-Siskiyou National Monument boundary expansion before this window closes. Southern Oregon University likely has the most appropriate venue for such a meeting closest to the Monument itself.

Talent's local business leaders, elected officials, and (I am sure) the vast majority of our local citizen's value and treasure our local public lands. We urge you to support expansion of the Cascade-Siskiyou National Monument using the best available ecological criteria, while also considering recreational opportunities and scenic resources. Current and succeeding generations will only thank you more and more with time. I hope to see you or your staff here soon.

Very gratefully,

A handwritten signature in blue ink that reads "Darby Stricker". The signature is fluid and cursive, with a long horizontal flourish at the end.

Darby Stricker, Mayor

"If you're looking for Talent, you've come to the right place"

RESOLUTION NO. 16-949-R

**A RESOLUTION ENDORSING EXPANSION OF
THE CASCADE-SISKIYOU NATIONAL MONUMENT**

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF TALENT, OREGON.

WHEREAS, the City of Talent supports environmental quality of life concerns and actions in and near its environs locally and regionally; and

WHEREAS, in April 2011 and May 2015, a diverse group of scientists recommended expansion of Cascade-Siskiyou National Monument boundaries to safeguard the area's unique biological values, finding the current boundaries of the Monument to be inadequate because of: fragmented habitats (including incomplete watersheds), the need for more complete environmental gradients to increase resilience in the face of significant climate change, and increasing pressures from development on adjoining lands that, if unabated, could undermine long term persistence of the Monument's biological resources; and

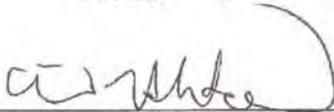

WHEREAS, the Talent Chamber Board of Directors voted unanimously at their July 21, 2016 board meeting that Cascade-Siskiyou National Monument expansion would be in the best interest of our environment, our citizens, and our visitors by benefitting our business climate, economy, and quality of life, and requested in an August 1 letter that the Mayor and Council of the City of Talent adopt a resolution supporting science-based Monument expansion.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF TALENT THAT:

The City of Talent supports expansion of the boundaries of the Cascade-Siskiyou National Monument and urges national elected officials to use the best ecological criteria in considering the Monument's present and future needs – as well as considering quiet recreational opportunities and scenic resources – as they determine appropriate expanded boundaries for the Monument.

Duly enacted by the City Council in open session on August 17, 2016 by the following vote:

AYES: 6 NAYS: 0 ABSTAIN: 0 ABSENT: 0

Melissa Huhtala/City Recorder and Custodian of City records

August 01, 2016

Mayor Darby Stricker,
110 E Main Street
Talent, OR 97540

Dear Mayor and Council Members:

The Talent Chamber Board of Directors voted unanimously at the July 21, 2016 Board meeting to request the City of Talent to adopt a resolution for the expansion of the Cascade-Siskiyou National Monument.

We appreciate the leadership role of the Talent City Council and request a resolution that stands in alignment with conservations efforts in our region. We believe a further science-based expansion of the Monument boundaries to be in the best interest of our environment, our citizens and our visitors. The Monument provides unique recreational and educational opportunities as well as scenic vistas which will benefit our business climate, economy and quality of life here in Talent, and all of Southern Oregon.

The Chamber appreciates the scientific evidence and analysis that already exists and the increased opportunity for research and sustainability that will occur when designating the new boundaries.

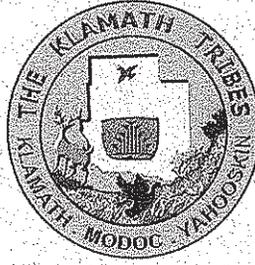

Thank you for your consideration and I encourage you on behalf of the Talent Chamber Board of Directors to formally support this expansion through the resolution.

Sincerely,

Gretchen Hartrick
President

Talent Chamber

November 17, 2016

The Klamath Tribes

Senator Jeff Merkley
PO Box 14172
Portland, OR 97293

Dear Senator Merkley:

This letter is to provide the Klamath Tribes' formal support for the proposed Cascade-Siskiyou National Monument Expansion. As you are aware, I provided verbal support at recent hearings in Ashland and Klamath Falls, Oregon.

The current and proposed expanded area of the Cascade-Siskiyou National Monument lies entirely within the recognized aboriginal territory of the Klamath Tribes (Klamath, Modoc and Yahooskin Paiute). Our people have significant historic and current ties to and of uses this area. It is the position of the Klamath Tribes that the proposed expansion would better provide for and protect our current traditional, religious, cultural uses, values and interests. In addition, expanding the Monument as proposed is critical to provide for more appropriate watershed scale management necessary to maintaining and enhancing the unique, diverse ecological values of the area as was originally intended through the initial National Monument designation.

As you know, the Klamath Tribes is very interested in and committed to restoring anadromous fish to the Upper Klamath River Basin, and to protecting and restoring resident species. Maintaining and improving the health and water quality of tributary streams to the Klamath River, such as Jenny Creek, is vital to future anadromous fish restoration efforts and to provide for future viability of the unique species that currently inhabit the streams. Species of particular concern are the Jenny Creek redband trout and Jenny Creek suckers.

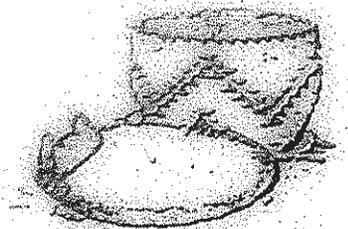

It is our understanding that management emphasis of the expanded area will be of the same intent and purpose of the current Monument area, and that there will be appropriate revision of the current management plan to address the expansion and other management issues. To ensure that interests of the Klamath and affected Indian Tribes are appropriately considered and addressed in the plan revision process, and during future management policy and project planning and development, it will be important that affected tribes are consulted and policies and procedures providing for appropriate tribal consultation and decision making are developed and incorporated into the plan.

We thank you very much for the opportunity to provide comment and support for expansion of the Cascade-Siskiyou National Monument, and commend you for your proposal to take this bold and needed action to protect and provide for the diverse ecological values and uses of this unique and important area.

Respectfully,

Don Gentry, Chairman
The Klamath Tribes

501 Chiloquin Blvd. - P.O. Box 436 - Chiloquin, Oregon 97624

KATE BROWN
Governor

November 21, 2016

The Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street NW
Washington, D.C. 20240

Dear Secretary Jewell:

Thank you for your steadfast support for America's iconic landscapes. I appreciate your agency's continued interest in one of Oregon's natural icons – the Cascade-Siskiyou National Monument – and the effort made in convening a community discussion around expansion. As Oregon's Governor, I lend my support to your efforts and want to convey my desire to enhance this Oregon wonder through a thoughtful expansion of its boundaries.

Since President Clinton's dedication of the Cascade-Siskiyou National Monument in 2000, community leaders and interested parties have worked diligently to protect and enhance the monument's diverse natural, geological, and historic resources; which include a spectacular variety of rare plants and animals. This work must continue as the unique and vibrant ecological wonders of Cascade-Siskiyou face increasing challenges from a changing climate. Expansion is critical to continued ecological integrity, which has made the monument a destination.

When opportunities like a prudent Cascade-Siskiyou National Monument expansion present themselves, we owe it to future generations to embrace them for history shows they are fleeting. The unfortunate reality of Congressional obstruction and inaction has indefinitely stalled many worthy and broadly supported public land protection bills. Prime examples in Oregon include the Devil's Staircase wilderness bill (2009) and the Wild Rogue wilderness expansion (2011). Despite strong local support, these proposals and others have languished since their introduction.

Expanding the Cascade-Siskiyou National Monument meets many of the factors I consider important in public land discussions. While state governors do not have a dispositive role in federal land decisions, I appreciate the Obama Administration's dedication to soliciting local input. It is important to consider proposed expansions and new designations in the context of their specific circumstances. Among the reasons I support a thoughtful Cascade-Siskiyou expansion:

- It augments an existing public land designation. The Cascade-Siskiyou National Monument has been successful in attracting community and federal support, demonstrating its value locally and among the national monument network.

- The identified need informed by scientific analysis of current and future landscape-level ecosystem health. The formation of the original monument set out why the unique values found at the intersection of the Cascade, Siskiyou, and Klamath mountain ranges needed greater protections. Analysis from 2011 onward highlights the scientific support for increased monument resilience amid considerable pressures.
- The level of public engagement and evidence of an inclusive process. Local community conversations about expanding the monument have been on-going for many years, culminating with robust local meetings in recent months.
- The degree of private ownership within the proposal and private landowner support. The proposed expansion map minimizes the impact to private inholdings. Many private landowners in the expansion have been included in expansion discussions and expressed their support.

This combination of factors strongly supports the proposed expansion. However, key issues remain to be addressed should the monument be expanded. Primary among them is the issue of local access, a common refrain at the recent community meetings. If the monument is expanded, I will follow the public process on access closely and advocate for reasonable resolution to accustomed uses. In addition to access, I will also be invested in the discussions regarding fire management, grazing, and timber harvest issues in an expanded monument management plan. Finally, the monument has long lacked a dedicated manager and sufficient staff and resources to enhance the ecological values as well as visitor and recreational opportunities. With the inclusion of many more miles of the Pacific Crest Trail, it is even more incumbent that adequate staff and resources be allocated to the monument to build on existing outdoor recreation opportunities for the benefit of local communities and businesses. I will continue to urge the administration address these concerns, and for our congressional delegation to advocate for sufficient funding.

Time is of particular importance as we enter the final weeks of the Obama administration. My office and state agency staff stand ready to assist our federal partners as they evaluate the proposal. I am confident there is sufficient time and determination to complete this expansion for the benefit of Oregon, the region, and the nation. As a champion of preserving our most iconic public lands, I am excited about the opportunity to enhance the unique and valuable wonders of Cascade-Siskiyou National Monument.

Sincerely,

Governor Kate Brown

Obama should honor on-the-ground solutions in Oregon's wildest places: Editorial

The Owyhee Wild and Scenic River, managed by the U.S. Bureau of Land Management, in southeast Oregon, flows north to connect with the Snake River. (Courtesy the Bureau of Land Management)

By [The Oregonian Editorial Board](#)

on December 03, 2016 at 3:00 PM

Two separate fights to protect two extraordinary patches of Oregon have in recent months escalated as President Barack Obama's term comes to a close. That's because he could, by the authority Congress granted to him in a far less populous time, singularly issue sweeping protections to the

Owyhee Canyonlands in southeastern Oregon and the Cascade-Siskiyou Mountains in southwestern Oregon and northern California.

The drive to limit development and resource use in both areas makes sense but for different reasons. Oregonians will never get back the lightless skies at night or the lonely beauty of ancient, eroded terrain cut through by wild rivers in the Owyhee if given over to mining or highway-building. Separately, Oregonians risk losing some of the site-specific, mind-bending biodiversity that makes the forested Cascade-Siskiyou realm a delicate universe requiring limits on use.

But Obama should say no to designating national monument status to the 2.5-million acre Owyhee Canyonlands. And he should say yes to doubling the already successful Cascade-Siskiyou National Monument.

Selective wilderness designations, river protections and broad prohibitions on mining would be strategic, consequential steps Congress could take to protect the Owyhee Canyonlands, the largest undeveloped expanse of land in the lower 48 states. Significantly, doing so would ensure that an economically vital and long-established ranching culture goes unthreatened by monument designation.

A scene from the Cascade-Siskiyou National Monument in Southern Oregon. *Courtesy the Bureau of Land Management*

By contrast, in the more populated realm anchored by Ashland and Medford, the fish-bearing waterways and exotic flora that make the Siskiyous distinct face potential threat from fragmented lands and warmer temperatures from climate change. Immediate monument expansion would connect fragmented lands within and outside the monument, offering lifelines to potentially marooned species, and help preserve what the 2000 presidential decree called an "ecological wonder ... of rare and beautiful species of plants and animals, whose continued survival ... depends upon its continued ecological integrity."

**on's public lands conform to contemporary uses while
ring the communities rooted in them.**

Few dispute that President-elect Donald Trump might bring to the nation a different ethic about development and land use, and it remains true that roughly half of Oregon is owned by the federal government and run by agencies such as the U.S. Bureau of Land Management and the U.S.

Forest Service. While most folks in rural Harney County and surrounding areas objected to the armed takeover of the Malheur National Wildlife Refuge, simmering resentments across the American West about public lands management came to the fore. So Oregon must have a voice in deciding what's right for the extraordinary landscape that Oregonians call home. That means the Owyhee and the Siskiyou warrant bolstered protections only by actions that honor on-the-ground sentiment, essential to declaring shared destiny and preserving democracy.

Years ago Idaho withstood fears that its Owyhee lands would win monument designation and dodged it by creating 518,000 acres of protected wilderness. It has worked well, among other things limiting mechanized uses of sensitive lands.

But

Oregon Senators Ron Wyden and Jeff Merkley in June proposed legislation that would shield more than 2 million acres of the Owyhee Canyonlands from mineral exploitation, including oil and gas drilling. It was a clear call to leave the ground the way it is and do so in such a way that supports farmers and ranchers who work in an environmentally sustainable fashion. They should press Congress to approve the legislation while citing a report released just last month from the Oregon Department of Geology and Mineral Industries showing plenty of untapped riches beneath the surface in southeastern Oregon.

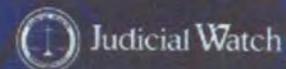

Both senators, meanwhile, have deferred to Obama on monument designation, preferring to make known the Oregon sentiments on all sides of the issue. Yet both have been supportive of expansion of the Cascade-Siskiyou National Monument, even as some logging- and ranching-based voices in the region claim they are unheard.

Presidents are twitchy in their monument designations, which can sharply limit access while altering ecologies and firefighting techniques. Bill Clinton created eight monuments in his last three days of office. Obama has made several already. His interior secretary and former REI chief, Sally Jewell, has advocated wise stewardship of public lands, and her counsel will count in the weeks ahead. But any presidential decree affecting Oregon must reflect this modern reality: Oregon's public lands conform to contemporary uses while honoring the communities rooted in them. Owyhee needs wilderness, river protection and mining-prohibition legislation -- but no monument decree. The Cascade-Siskiyou National Monument, meanwhile, should build upon its success with expansion that will ensure its vitality.

Expand the monument

Obama should add protection to Cascade-Siskiyou

NOV. 11, 2016

156

Donald Trump's victory in Tuesday's presidential election adds urgency to a piece of unfinished business left over from the administrations of Bill Clinton and George W. Bush: the expansion of the Cascade-Siskiyou National Monument in Southern Oregon. In his remaining weeks in office, President Obama should approve the expansion to ensure that the purposes for which the monument was created are met.

The Cascade-Siskiyou monument, designated by Clinton in 2000 and implemented under Bush, is the only one of the United States' 124 national monuments created for the specific purpose of protecting biological diversity. That unique status stems from its unique character: The monument lies where the Cascade range, the Siskiyou mountains and the Klamath River country meet, creating a geological, botanical and zoological mashup with characteristics of all three regions. To cite just one feature, the monument hosts 138 species of butterfly and is one of four butterfly hot spots in North America.

Both of Oregon's U.S. senators, Ron Wyden and Jeff Merkley, propose roughly doubling the monument's size by adding about 66,500 acres to it, which would broaden its range of elevations and bring important fish-bearing streams under protection. Owners of private inholdings within the monument support expansion, as did former Gov. John Kitzhaber. The city councils and chambers of commerce in Ashland and Talent, the communities closest to the monument, support the expansion.

The Jackson County Board of Commissioners is opposed, fearing reductions in timber harvests and grazing. Those fears are not misplaced, though they can easily be exaggerated. National monument designations are highly flexible, and can allow livestock and logging. Only a portion of the existing monument has been set aside as wilderness, and no further wilderness designations are proposed. The Cascade-Siskiyou monument, unlike most, is managed by the resource-oriented Bureau of Land Management rather than the preservation-oriented National Park Service.

Grazing has been a concern on monument land from the start. Clinton's proclamation directed the BLM to study the effects of livestock on the monument's biological systems, and to withdraw leases in areas where those effects are found to be damaging. A 2008 BLM study identified damaging effects in most areas, but no leases have been withdrawn. The 2009 legislation that designated part of the monument as wilderness directed the agency to retire leases that are donated to the BLM. Since then, grazing leases on 65,000 acres have been purchased with private donations, given to the BLM and retired.

These private purchases negate the economic harm to ranchers as a result of reduced grazing on monument land. They also show that people and organizations that recognize the value of the monument are willing to put their money where their mouths are. In Ashland and Talent, the monument is seen as an economic asset.

The Antiquities Act of 1906 gives President Obama the authority to expand the monument without consulting Congress. President Trump is unlikely to exercise this authority. Instead, he's expected to act in ways that make the expansion more vital.

Trump rejects the scientific evidence supporting a human role in climate change, and is expected to rescind most or all of Obama's executive orders reducing fossil fuel emissions. Climate change is a threat to the monument — as temperatures rise, some species' ability to migrate from one ecological region to another is being disrupted. An expansion would help preserve connections among those regions, enhancing the resilience of the biological systems whose uniqueness led to the monument being created in the first place.

An expansion would be controversial, but Obama isn't facing re-election. And 50 or 100 years from now, it's a safe bet that no one will be wishing the Cascade-Siskiyou National Monument were smaller. Instead, an expanded monument would be a valued part of Obama's legacy.

GUEST OPINION

Monument boundaries are inadequate

By Pepper Trail

"... the Cascade Siskiyou National Monument is an ecological wonder, with biological diversity unmatched in the Cascade Range ... a biological crossroads the interface of the Cascade, Klamath, and Siskiyou ecoregions, in an area of unique geology, biology, climate, and topography."

— From the first words of the June 9, 2000, Proclamation establishing the Cascade-Siskiyou National Monument

The establishment of the Cascade Siskiyou National Monument was a landmark in the preservation of our region's remarkable wealth of habitats and species. But are the current boundaries constricted within a relatively narrow band of elevations and arbitrarily truncated at the Oregon-California border adequate for the long-term protection of this "ecological wonder"?

This is a question that

has been discussed for the past five years by a diverse group of scientists with much research experience in Southern Oregon. These discussions, involving ecologists, botanists and experts in fish, mammals and birds, culminated in a letter signed by 85 scientists in 2015 that concluded "... it is our professional opinion that expansion of the monument is necessary for the area's extraordinary values to be sustained over the long term."

Biological diversity is not a static count of number of species. It is a dynamic web of ecological connections, dependent on reliable pathways for movement of individuals and populations, continuous flows of water and energy, and a resilient network of habitats allowing adaptation to changing conditions. As scientists learn more about these complex networks, we are able to pinpoint areas in critical need of protection.

The extraordinary variety of species and habitats that the Cascade Siskiyou National Monument was established to protect today faces mounting threats from encroaching development and climate change. These threats weren't adequately anticipated back in 2000. Any drive along Highway 66 or Dead Indian Memorial Road these days will reveal many large properties for sale. As private lands are developed, the public lands adjacent to but not currently within the monument are increasingly vital as biological connections.

The threat posed by climate change is particularly worthy of attention. When the monument was established in 2000, alarm about climate change was limited mostly to scientists, and its implications were not considered when boundaries were drawn. Less excusably, the term is not mentioned even once in the BLM's 2008 Monument Management Plan, completed

when climate change had emerged as a prime concern of land managers and policy makers. Clearly, well-documented regional trends for reduced snowpack, higher summer temperatures, and more frequent fires must be factored into plans to protect the monument's unique biological values.

With this in mind, the expansion areas prioritized by scientists extend both into higher and lower elevations, significantly increasing the monument's total elevation range and topographic diversity. These sites and their surrounding landscapes fill gaps in protection for Jenny Creek and several other vital watersheds, improving the ability of these aquatic ecosystems to recover and maintain their integrity. They reach out to enclose populations of species at their range limits, critical "first responders" to climate change. And they do all this in an expanded monument that is still a

relatively small area of federal land to set aside for the protection of such an "area of unique geology, biology, climate, and topography."

Much of the public land near the monument but outside current boundaries has already been recognized with special designations such as Areas of Critical Environmental Concern and Special Management Areas. At present, however, they are disconnected and therefore unlikely to sustain their remarkable biological values in the face of increasing threats. In order to function as part of an ecologically integrated landscape, these sites need to be connected and incorporated into an expanded Cascade Siskiyou National Monument.

Administrative designations and legislative proposals have independently highlighted ecological and other non-commodity values on public lands near the existing monument. Both BLM's new

Western Oregon Plan Revision and Sen. Ron Wyden's and Sen. Jeff Merkley's proposed Senate Bill 132 include many conservation and/or recreation designations over much BLM land near the monument in Oregon. Most of the relatively small area of public land on the California side of the current monument boundary has long been allocated to conservation purposes (with varying degrees of management success).

Building on a foundation of solid science, now is the time for expansion of the Cascade Siskiyou National Monument to enable spatially comprehensive, cohesive and consistent protection of this biologically unique and valuable landscape. Such an opportunity may not come again.

Pepper Trail, Ph.D., of Ashland is an ornithologist and conservation co-chair of the Rogue Valley Audubon Society.

ENVIRONMENT

Monument expansion

Proposal seeks to grow the boundaries of Cascade-Siskiyou National Monument

By Mark Freeman
Mail Tribune

ASHLAND — A group of scientists, local leaders and Oregon's two U.S. senators are calling for an expansion of the Cascade-Siskiyou National Monument, saying the borders drawn during its creation 16 years ago fail to protect its unique biological diversity — particularly in the face of climate change.

The current borders around the monument don't take into account full watersheds, fail to protect the headwaters of Jenny Creek and other streams and don't include high-elevation public lands needed for the monument's unique flora and fauna as

they react to climate change, the group says.

Supporters claim that not doing so threatens the so-called "spectacular biological diversity" and the rare plants, animals and other "objects of interest" cited in the presidential proclamation that created the now-66,000-acre monument in 2000.

"The borders now don't do the job that the proclamation intends," says Dave Willis, chairman of the Soda Mountain

SEE MONUMENT, A2

Pilot Rock is in the Cascade-Siskiyou National Monument, which scientists and government officials hope to expand to protect its biological diversity. MAIL TRIBUNE FILE PHOTO

MONUMENT

From Page A1

Wilderness Council and one of the original leaders of the effort to establish the monument.

"It's to protect the biological diversity and connectivity and make it more resilient to climate change," Willis says.

The group has offered no specific recommended boundaries, but they say it should grow in most directions, including into California. Willis says an expansion could increase the monument by as little as 50 percent or possibly double its size.

They cite a 2011 study by several local scientists since endorsed by dozens of others as outlining the reasons and general locations for possible expansion.

Democratic Sens. Ron Wyden and Jeff Merkley this past week formally requested that U.S. Interior Secretary Sally Jewell come to Southern Oregon and hold a public meeting to gather input on potential expansion.

Willis says the monument needed expansion for these same reasons shortly after it was created, "so it would be good to do it sooner than later."

"The boundaries may have looked good in 2000," Willis says. "In 2011, (supporting scientists) said that doesn't do the job."

Supporters also believe they like their chances under the soon-to-be-ending Obama administration, which has supported public lands protections.

"This could be one of his last, best acts," says Pam Marsh, an Ashland City Council member and expansion supporter.

The monument's outer boundaries have not changed since President Bill Clinton exercised powers under the Antiquities Act to designate the monument in 2000. Originally it was about 53,000 acres within a roughly 85,000-acre footprint, with the remaining lands islands of private holdings.

Since then, willing sellers paid largely through the federal Land and Water Conservation Fund have sold about 13,000 more acres within that same footprint.

Scientists consider the monument area to be one of the most biologically diverse locations in North America, in part because it is a land bridge where four distinct ecoregions meet.

The 2011 study looked at three main areas for expansion:

The Rogue Valley Foothills to Plateau, which would extend north in the Cascades to include Grizzly Peak and portions of the Dead Indian Plateau; the Klamath River Ridges to the south; and the Johnson Prairie-Fall Creek expansion extending east in the Klamath Mountains.

Expansion in these areas would protect habitats such as headwaters that contribute water to the monument as well as habitat used by wintering black-tailed deer and water supporting rare foothill yellow-legged frogs.

"Complete watersheds were not protected," says Rogue Valley Audubon ornithologist Pepper Trail, who took part in the 2011 study. "It abruptly stops at the Oregon/California border. Obviously, that's not a biological border."

One example is Jenny Creek, which meanders in and out of

the monument on the Oregon side while the falls that isolates the creek's population of native redband trout also is outside the monument.

Expansion into these areas would "better recognize the ecological systems" supporting what's already in the monument, says Jack Williams, a Medford resident and senior scientist for Trout Unlimited.

"The more of the watershed that could be included in the monument boundary would benefit these fish in the long run," Williams says.

While no exact boundaries are in the recommendation, Willis says any expansion likely would include the same ratio of public and private lands within its new footprint. As with current rules, private lands within the monument's borders are not subject to rules governing federally designated monuments, Willis says.

Monument lands are open to hikers, hunters, anglers and others for exploration and recreation, Willis says.

The proposal also has the formal support of the Ashland and Talent city councils as well as their chambers of commerce.

Marsh says the Ashland City Council endorsed the concept last year as a way of helping grow its tourism-based economy.

"A monument expansion that pushes the monument west and toward the shoulders of Ashland would be a good thing for us," Marsh says.

OUR VIEW

Environment should drive monument debate

Backers of a proposed expansion of the Cascade-Siskiyou National Monument east of Ashland have a good case to make when it comes to the environmental benefits of protecting the unique landscape and the flora and fauna it harbors. But the notion that expanding the boundaries would lead to a measurable boost in tourism is a stretch at best.

President Bill Clinton created the existing 53,000-acre monument in 2000, after months of strenuous debate and stiff opposition from ranchers, timber interests and others. The borders have not changed since, although owners of private land within the monument have willingly sold about 13,000 acres to the federal government.

The Bureau of Land Management is in charge of administering the monument, the first time the agency has been given that task. The monument designation means commercial logging is prohibited unless it enhances the ecology, mining banned and off-road vehicle use is not allowed. Other

forms of recreation — hunting, fishing, hiking, horseback riding and mushroom gathering — continue to be permitted.

The monument is unique in that it is the intersection of four distinct bioregions, a land bridge linking the Cascade and Siskiyou mountain ranges and their plant and animal species, including some that exist nowhere else on earth. That is good reason to protect it, and we supported the monument's initial creation.

It may well be a good thing to expand the monument to include entire watersheds — something it does not do now — and to follow bird and animal habitat boundaries rather than arbitrary ones such as the California border. That's a debate worth having.

But a decision to expand should be made based on what's best for the environment, not on some hypothetical increase in tourism dollars based on wishful thinking. The monument is not a tourist destination in the same sense that, say, the Oregon Caves National Monument is, nor is it likely to become one.

Hikers, birders and anglers may visit the monument, and those who come to the region for Shakespeare, rafting or other pursuits may well add a side trip to hike or fish in the monument. But it's unlikely to be the primary reason they came here in the first place.

Environmental preservation activists have long argued that "eco-tourism" can replace revenue once derived from logging, but there is little evidence the dollars are comparable.

Beyond that, this expansion proposal comes late in President Obama's term in office, and proponents are clearly hoping he can be convinced to use his power under the Antiquities Act to approve it on his way out the door, just as Bill Clinton did in 2000.

But the initial monument designation was heavily debated for months, with considerable public input. The expansion has not had the same exposure to public, and it should.

Protection of public land can be beneficial, but it is also permanent, and it deserves a full airing.

Position Specification

DECEMBER 2016 • CONFIDENTIAL

Conservation
Lands
Foundation
Protecting America's Heritage

Executive Director
Durango, CO

POSITION TITLE: Executive Director

REPORTING TO: Board of Directors

LOCATION: Durango, CO

THE COMPANY: *The Conservation Lands Foundation*

The Conservation Lands Foundation (CLF) is a national non-profit organization headquartered in Durango, Colorado with offices in San Francisco, Albuquerque, Bozeman, Las Cruces, Joshua Tree, and Washington, DC. The Conservation Lands Foundation was established in 2007 to protect the premier lands and waters under the Bureau of Land Management's (BLM's) jurisdiction – specifically the 34+ million acres and 2,400 miles of National Monuments and National Conservation Areas, Wilderness and Wilderness Study Areas, Wild and Scenic Rivers and National Scenic and Historic Trails that make up our National Conservation Lands. Our mission is to protect, restore and expand the National Conservation Lands through education, advocacy and partnerships.

The Conservation Lands Foundation has become one of the nation's most effective land conservation organizations, protecting millions of acres of lands and building a vibrant grassroots network.

CLF has developed strong relationships with leaders in the Executive Branch, Congress, the Department of the Interior, the conservation community, the media, and western communities.

CLF seeks an experienced and visionary leader who will guide our team in advancing our mission in the critical next phase of our organization. Our new leader will have the opportunity to accomplish major, tangible conservation outcomes for the National Conservation Lands.

SCOPE AND RESPONSIBILITIES:

Reporting to the Board of Directors, the Executive Director (ED) will have overall strategic and operational responsibility for the Conservation Lands Foundation staff, programs, budget, and execution of its mission.

Responsibilities include, but are not limited to:

Setting the organization's strategic direction and providing the leadership to successfully implement it:

- The ED will work with CLF's board and staff to develop a new strategic plan for the organization.
- The ED will be responsible for developing, altering or aligning programs, budgets and staffing to ensure successful implementation of the strategic plan.
- The ED will be responsible for evaluating the success of programs and ensuring that goals are met and the organization maintains the focus necessary to fulfill its mission.

Fundraising:

- The ED will ensure the financial health of the organization through effective fundraising.
- The ED will meet with individual donors and foundations, develop and maintain strong relationships with donors, and enhance CLF's fundraising network.
- The ED will review key grant proposals.

Budgeting and Financial Oversight:

- The ED will work with Senior Finance Director and program leads to develop overall organizational budget and individual program budgets.
- The ED will ensure organizational financial transparency, compliance and accountability.
- The ED will maintain CLF's financial health and superior ratings with charity rating organizations.

Board Engagement:

- The ED will work with Board of Directors and Board committees to develop a new multi-year strategic plan for CLF.
- The ED will interact with and update the board regularly, and maintain excellent communications and working relationships between the board and staff.

Equity, Inclusion and Diversity:

- ED will play a leading role in CLF's Equity, Inclusion and Diversity committee and ensure that CLF's equity, inclusion and diversity plan is implemented and benchmarks are achieved.
- Staff/Organizational Management
- The ED will directly supervise staff members, including the Sr. VP of Programs, Sr. Director of Conservation, Vice President of Development, Senior Finance Director and Associate Director of Operations.
- The ED will help fill staff vacancies, mentor and coach staff, and provide opportunities for staff advancement and leadership development.

Programs:

- The ED will engage in CLF's program work (expansion, policy, communications, field, restoration) as appropriate and as identified in the strategic plan. Program work may entail but not be limited to:
 - Working with coalitions on campaign strategy development.
 - Building and maintaining strong relationships with leaders in the Administration, the Department of the Interior, Congress and partner groups.
 - Assisting with communications strategy and implementation and serving as a spokesperson for CLF.
 - Ensuring campaigns are adequately resourced.

KEY SELECTION CRITERIA:

The successful candidate will be thoroughly committed to the Conservation Lands Foundation mission, will have proven leadership, fundraising, strategic planning and management experience as well as demonstrated knowledge of public lands policy. Other qualifications include:

- Excellence in organizational management with the ability to supervise and mentor staff, manage, and develop high-performance teams, set and achieve strategic objectives, and manage a budget.
- Strategic thinker with a compelling vision for CLF's future and the future of the National Conservation Lands.
- Commitment to building and empowering a grassroots constituency for the National Conservation Lands.

Position Specification
Executive Director

- Commitment to building effective partnerships and collaborations with a wide range of stakeholders.
- Ability to make hard decisions in a timely manner.
- Commitment to advancing equity, inclusion and diversity within the organization and in the environmental movement.
- Familiarity with, or strong commitment to learn about the National Conservation Lands and federal land management policies.
- Proven success working with a Board of Directors with the ability to cultivate new and existing board member relationships.
- Strong fundraising experience with the ability to engage and inspire a wide range of stakeholders.
- A persuasive and effective communicator with excellent written and verbal communication skills.
- Action-oriented, entrepreneurial, adaptable, and innovative approach to long term planning.
- Passion, idealism, integrity, positive attitude, mission-driven, and self-directed.
- Ability to travel frequently.

COMPENSATION:

- Salary based on qualifications.
- 401(k) plan; health/dental/vision insurance; health and dependent care Flex Spending program.

NATIONAL CONSERVATION LANDS

2016 POLICY HANDBOOK

THE SEARCH FOR A VISION COMES DOWN TO THIS - the landowners, the American people, want their lands held and managed for clean water, the protection of endangered species, for abundant wildlife, for productive fisheries, for open space, for the protection of our heritage and God's creation. If we manage our lands primarily for these purposes we will have public support, if not we will neither have nor deserve their support.

The new Bureau of Land Management must have at its core a system of specially protected and managed conservation units, including landscape monuments and National Conservation Areas. It is a system that both protects our own crown jewels and interprets them to the public. It is a system that stands proudly alongside parks and refuges as part of our national heritage.

SECRETARY OF INTERIOR BRUCE BABBITT

SPEECH TO BLM

2000

NATIONAL CONSERVATION LANDS POLICY HANDBOOK FEBRUARY 2016

The original Policy Handbook was developed in 2010 in consultation with The Wilderness Society, National Trust for Historic Preservation and the Conservation Lands Foundation. The handbook has been updated to include National Conservation Land's policy advancements over the last six years. King Range National Conservation Area, CA

INTRODUCTION

Picture stunning petroglyphs carved on steep red rock. Bighorn sheep climbing canyon walls formed by the swift river below. And, old growth trees so close they almost touch the Pacific Ocean. These are the images that make up the National Conservation Lands - 31 million acres of lands protected and managed so Americans can experience our nation's beauty and history. These lands are not as well known as our National Parks, but they are just as special.

Over the last several years, the National Conservation Lands have grown significantly. From the vast open valleys in the Basin and Range National Monument to the deep gorge created by the Arkansas River flowing through Browns Canyon National Monument the system has grown both in size and stature. As the National Conservation Lands continue to grow, the policies that direct their long-term management and the resources to implement and protect these lands becomes increasingly important.

The Department of the Interior and Bureau of Land Management (BLM) have made great strides in setting strong policy guidance for the National Conservation Lands. However, more is needed to ensure the long-term protection of these spectacular lands.

THE PROTECTION, RESTORATION AND EXPANSION OF THE NATIONAL CONSERVATION LANDS IS THIS CENTURY'S GREATEST CONSERVATION OPPORTUNITY.

The 2016 Policy Handbook provides an overview of the policies that govern how the National Conservation Lands are to be managed and protected. It also outlines policy initiatives that are needed to ensure these lands are protected into the future. In addition, this Handbook contains important background information and resources pertaining to the National Conservation Lands. Please use this Handbook as a resource in your efforts to help protect, restore and expand our nation's treasured lands.

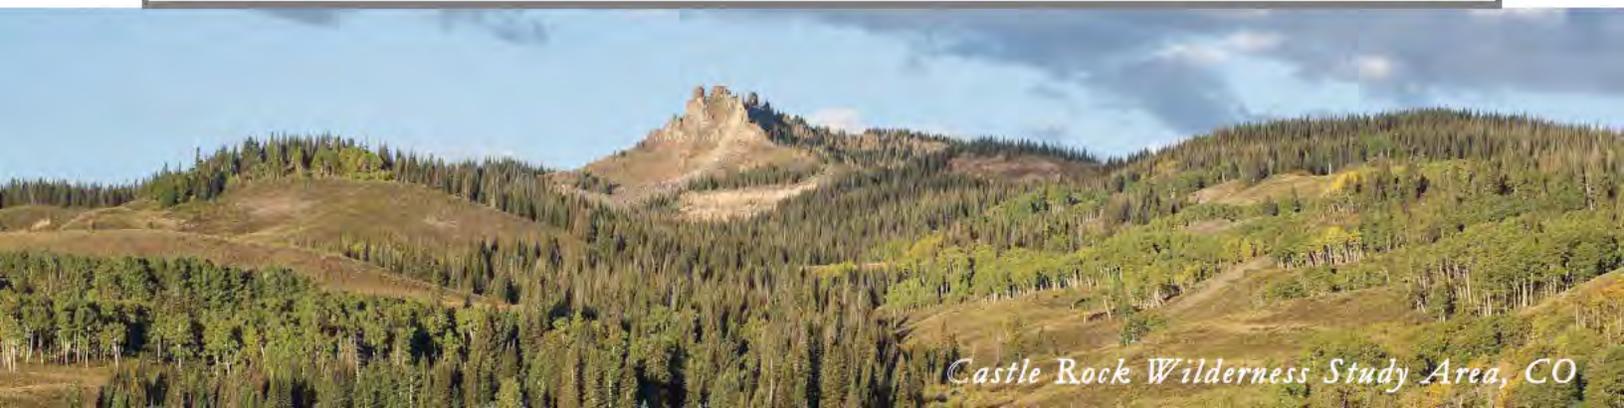

AT A GLANCE

The National Conservation Lands are our nation’s newest collection of protected lands and waterways - standing proudly alongside our National Parks, National Forests and National Wildlife Refuges as treasured places belonging to every American.

From the rivers first charted by Lewis and Clark to ancient redwood forests, Native American settlements, from slot canyons to remote mountains, from redwood forest to endless deserts, the National Conservation Lands are living links to the past and our promise to coming generations.

The National Conservation Lands are composed of National Monuments and National Conservation Areas, Wilderness and Wilderness Study Areas, Wild and Scenic Rivers, National Scenic and Historic Trails and more. They encompass 31 million acres of public land, over 2,400 river miles and approximately 6,000 miles of trails.

Castle Rock Wilderness Study Area, CO

HISTORY OF THE NATIONAL CONSERVATION LANDS

1906	Congress passes the Antiquities Act giving the President the authority to designate national monuments.
1964	Congress enacts the Wilderness Act.
1968	Congress enacts the National Trails System Act and the Wild and Scenic Rivers Act. Designated trails and rivers will eventually become part of the National Conservation Lands.
1970	Congress passes the King Range Act, designating the King Range National Conservation Area (NCA) in California, the first NCA that will later become part of the Conservation Lands.
1976	Congress enacts the Federal Land Policy and Management Act (FLPMA), which sets in motion the designation of hundreds of wilderness study areas.
1976	Congress establishes the California Desert Conservation Area.
1980	Congress establishes the Klamath Wild and Scenic River and the Steese Mountain NCA in Alaska. Congress establishes the Yaquina Head Lighthouse and the surrounding area in Oregon as an “outstanding natural area.”
1987	Congress establishes El Malpais NCA in New Mexico.
1988	Congress establishes the San Pedro Riparian NCA in Arizona and the North Fork Owyhee Wild and Scenic River in Oregon.
1989	Congress establishes the Gila Box Riparian NCA in Arizona and the Red Rock Canyon NCA in Nevada.
1993	Congress establishes the Snake River Birds of Prey NCA in Idaho.
1994	Congress passed the California Desert Protection Act, which protects 3.5million acres of BLM Wilderness Areas.
1996	President Clinton designates Grand Staircase- Escalante National Monument in Utah, the first national monument to be managed by the BLM.
1996	In the twenty years since the enactment of FLPMA, Congress designates 135 BLM wilderness areas.
1999	Congress establishes the Headwaters Forest Reserve in California and the Gunnison Gorge National Conservation Area in Colorado.
2000	President Clinton designates eight additional BLM national monuments. Congress establishes Santa Rosa and San Jacinto Mountains National Monument, Las Cienegas NCA, Colorado Canyons NCA (later renamed McInnis Canyons NCA), Black Rock Desert-High Rock Canyon Emigrant Trail NCA in Nevada, Steens Mountain Cooperative Management Protection Area in Oregon, and the Kiger Creek and Wildhorse Creek Wild and Scenic Rivers in Oregon.
2000	Interior Secretary Bruce Babbitt signs an administrative order creating the National Landscape Conservation System in order to “conserve, protect, and restore these nationally significant landscapes that have outstanding cultural, ecological, and scientific values for the benefit of current and future generations.”

2001	President Clinton designates Carrizo Plain, Pompeys Pillar, Upper Missouri River Breaks, Sonoran Desert and Kasha-Katuwe Tent Rocks national monuments.
2002	Congress establishes the Sloan Canyon NCA in Nevada.
2006	Congress establishes the bi-partisan National Landscape Conservation System Congressional Caucus.
2007	Congress introduces a bill, which would permanently establish the National Landscape Conservation System.
2008	The House of Representatives passes the National Landscape Conservation System Act. Congress establishes the Jupiter Inlet Lighthouse and surrounding area in Florida and the Piedras Blancas Lightstation and surrounding area in California as outstanding natural areas.
2009	President Obama signs the Omnibus Public Land Management Act of 2009, which includes a bill to permanently establish the National Conservation Lands. Additionally, the legislation adds 30 wilderness areas, four NCAs and one national monument to the National Conservation Lands.
2010	Secretary Salazar issues Order No. 3308 which places an emphasis on conservation management of the National Conservation Lands and establishes a new BLM directorate: National Landscape Conservation System and Community Partnerships.
2011	The BLM releases a 15-Year Strategic Plan for the National Conservation Lands. The 15-Year plan is a strong reflection of Sec. Order 3308 with a focus on conservation as the primary consideration in planning and management of the Conservation Lands.
2012	President Obama designates Fort Ord National Monument near Monterey, California.
2012	The BLM releases Policy Manuals for the National Conservation Lands. The Manuals direct BLM employees in day-to-day management decisions.
2013	President Obama designates two National Monuments as part of the National Conservation Lands: San Juan Islands National Monument in Washington and Rio Grande del Norte National Monument in New Mexico.
2014	The BLM releases Instruction Memorandum No. 2013-076 authorizing use of the abbreviated name “National Conservation Lands” and introducing a new wordmark for the system. In addition, the IM discouraged the use of the acronym “NLCS.”
2014	President Obama designates Organ Mountains-Desert Peaks National Monument in New Mexico.
2015	President Obama designates three new National Monuments; Browns Canyon in Colorado, Berryessa Snow Mountain in California and Basin and Range in Nevada. The National Conservation Lands increase in size to almost 31 million acres.

FRIENDS GRASSROOTS NETWORK

GOOD STEWARDS & STRONG ADVOCATES

COMMUNICATIONS & BRANDING THE NATIONAL CONSERVATION LANDS

Consistent messages and a compelling brand are extremely important for the future success of the National Conservation Lands. Over the past two years, BLM has recognized the importance of these communications efforts in raising public awareness for the system. In 2013, the BLM issued Instruction Memorandum 2013-076, which authorized the use of “National Conservation Lands” both internally within BLM and in external communications. In addition, the IM announced the new National Conservation Lands wordmark, a unique logo using the name of the system. (see IM below).

In 2016, BLM is continuing to implementing the new look or “brand” for materials associated with units of the National Conservation Lands- installing new signs for all major units of the system. The new look is clean and compelling. Over time, visitors to the National Conservation Lands will recognize specific units are part of a larger system of protected lands.

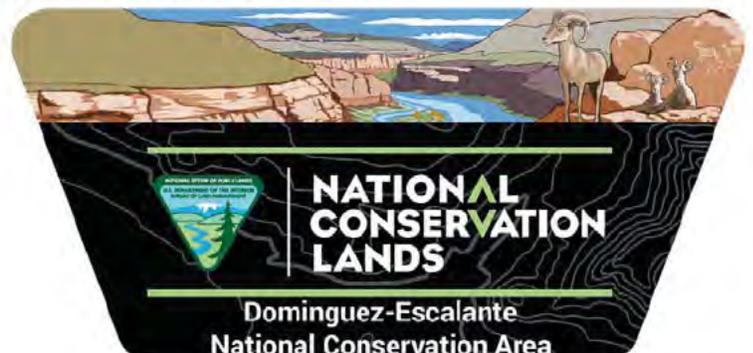

INSTRUCTION MEMORANDUM 2013-076

Purpose: This Instruction Memorandum (IM) authorizes use of the new "National Conservation Lands" abbreviated name and wordmark. This IM also issues the National Conservation Lands Communication Plan (Attachment 1), to guide BLM efforts at raising public awareness of the value and benefits of the National Conservation Lands externally and to improve communications regarding the National Conservation Lands internally.

Policy/Action: This directive authorizes BLM staff to use the "National Conservation Lands" abbreviated name when referring to the BLM's National Landscape Conservation System in correspondence, communication and outreach material, and BLM signage.

Per the Omnibus Public Land Management Act of 2009 [P.L. 111-11], the official name of this network of lands remains the National Landscape Conservation System. In all official correspondence, BLM staff should use the official name upon first reference to the system, followed by the abbreviated name in parenthesis. Thereafter, the abbreviated name should be used. **Use of the acronym "NCL" is not allowed. Use of the "NLCS" acronym is discouraged, but not disallowed.**

NEW SIGNS USING the WORDMARK and NEW BRAND

DEVELOPMENTS IN CONSERVATION POLICY FOR THE NATIONAL CONSERVATION LANDS

2000-2009: No system wide guidance for the BLM employees. Confusion about managing National Conservation Lands and BLM's long standing Multiple-Use Mission.

On the Ground Implementation

2009 Congress Passes the **OMINBUS PUBLIC LANDS BILL** (Pub.L. 111-11)

- Codifies and makes permanent the National Conservation Lands- a system of public lands protected for conservation.

2010 Salazar Issues **SECRETARIAL ORDER 3308**. Manage National Conservation Lands to “conserve, protect and restore.”

- Establishes overarching conservation principles for the National Conservation Lands. (see pg 14)

2011 BLM Director's Office Issues **15-YEAR STRATEGIC PLAN** for the National Conservation Lands.

- Sets a conservation vision for the future of the National Conservation Lands with specific goals for how to achieve the “conserve, protect & restore” mandate. (see pg 16)

National Policy

2012 BLM Releases **POLICY MANUALS** for the National Conservation Lands.

- Interprets national policy and directs BLM employees in day-to-day decisions and on the ground management of the National Conservation Lands. (see pg 18)

Santa Rosa San Jacinto Mountains National Monument, CA

NEXT STEPS AND IMPLEMENTATION IN 2016

The Department of the Interior and BLM have made great strides in setting strong policy guidance for the National Conservation Lands. **But more is needed to ensure the long-term protection of these spectacular lands.**

ADEQUATE STAFFING FOR THE NATIONAL CONSERVATION LANDS- Over the past several years, members of the Friends Grassroots Network have noticed a downward trend in the number of BLM staff focused on management of the National Conservation Lands. One of the goals in BLM's 15-Year Strategy for the National Conservation Lands recognizes the importance of adequate staffing for the system.

“Identify a manager with decision-making and supervisory authority for each National Monument and NCA whose primary and major duty is to manage the monument or conservation area.”

Unfortunately, since the release of the 15-Year Strategy, 4 years ago, the number of dedicated managers has drastically decreased. The majority of National Monuments and National Conservation Areas **do not** have dedicated managers. Instead, manager responsibilities are allocated to Field Managers or District Managers. Field and District Managers are already responsible for managing a workforce focused on renewable resources, minerals and realty management, rangeland management, fire and aviation and other uses and programs. For practical purposes little time and attention is dedicated to the units of the National Conservation Lands.

While BLM has experienced recent budget cuts and sequestration, the National Conservation Lands have faced a disproportionate cut in resources, compared to the agency as a whole. BLM must make the staffing and management of the National Conservation Lands a priority, by allocating more funding to the system.

ADEQUATE BUDGET FOR THE NATIONAL CONSERVATION LANDS- One of the key reasons the National Conservation Lands remain vulnerable is due to lack of funding and neglect. Currently, the National Conservation Lands account for over 12 percent of land managed by the BLM. Yet they only receive 6 percent of total BLM funding. At \$2.23 per acre (compared to the National Park Systems \$30 per acre), the funding for the system is wholly inadequate. BLM does not have the resources to conduct the necessary planning, hire rangers and staff to deter looting or illegal uses or to actively manage for the long-term conservation of these lands. If the National Conservation Lands are going to truly protect and conserve some of the west most spectacular lands, they must receive additional resources.

ROADS- Illegal and redundant roads threaten the long-term protection of the National Conservation Lands – wildlife habitat is fragmented, air, water and noise pollution diminishes the visitor experience and fragile cultural and historical resources are destroyed. The 15-Year Strategic Plan states “Facilities, including roads, will only be developed on [National Conservation] lands if required for public safety, necessary for the exercise of valid existing rights, minimizing impacts to fragile resources, or further the purposes for which an area was designated.”

Unfortunately, the current BLM roads policy includes ambiguous language that allows for a number of interpretations including allowing illegally made and excessive road systems. Roads should allow for the access and enjoyment of visitors to experience the scenic views, open space and historical treasures which make this system so unique. However, the current policy has led to a diminished visitor experience and the destruction of cultural and historic resources. BLM needs to establish a policy that protects the National Conservation Lands from the consequences of redundant and illegal roads.

PRINCIPLES OF THE NATIONAL CONSERVATION LANDS

In his order creating the National Conservation Lands, Interior Secretary Bruce Babbitt outlined a clear vision for how the Conservation Lands should be managed. Additionally he articulated how they are different from other protected lands systems and how the Bureau of Land Management could evolve into an agency recognized for its conservation management. (Bruce Babbitt, Secretary of Interior, Remarks at a BLM Interactive Town Hall Meeting (Mar. 24, 2000)). The following defining principles of the National Conservation Lands are drawn from Secretary Babbitt's overall vision, as well as from the collective input of many organizations that foster that vision.

VISION STATEMENT:

Conservation, protection and restoration of ecological resources and the protection of cultural resources is of paramount importance. Inclusion of lands within the National Conservation Lands will guarantee these protections.

PRINCIPLES:

The National Conservation Lands are a **permanent, innovative and distinctive system of protected public lands and waters** that stands proudly alongside the National Park System and the National Wildlife Refuge System as part of our national heritage.

The National Conservation Lands protect the **largest tracts of natural landscapes practicable and includes entire ecosystems and archeological districts** rather than small, isolated artifacts or parcels.

Lands within the National Conservation Lands **remain undeveloped**. Visitor services, including visitor center facilities, lodging and other accommodations are located in the communities adjacent to Conservation Lands.

The conservation and protection of the National Conservation Lands **is a top priority within the Bureau of Land Management**.

The National Conservation Lands are managed to ensure **ecological connectivity in context with surrounding landscapes** to maintain biodiversity. The BLM integrates habitat connectivity, the migratory needs of wildlife, and the anticipated impacts of climate change in its management plans and decisions.

The National Conservation Lands include **natural landscapes, native biodiversity, and nationally significant historic and cultural resources**.

Visitors to the National Conservation Lands enjoy a **unique, self-directed experience** with minimal on-site developed interpretation.

The National Conservation Lands are an outdoor laboratory, where scientific research and the application of science to land stewardship and restoration is emphasized, encouraged and supported.

THE SECRETARY OF THE INTERIOR
WASHINGTON

ORDER NO. 3308

Subject: Management of the National Landscape Conservation System

Sec. 1 Purpose. This Secretary's Order (Order) seeks to further the purposes of the *Omnibus Public Land Management Act of 2009 (Act)*, which established the National Landscape Conservation System (NLCS) under the jurisdiction of the Bureau of Land Management (BLM) in order to conserve, protect, and restore nationally significant landscapes that have outstanding cultural, ecological, and scientific values for the benefit of current and future generations, and the President's initiative on America's Great Outdoors.

Sec. 2 Background. The BLM is the steward of many great American landscapes. As the population in the West continues to grow, there is an ever increasing need to conserve the open spaces that are a unique and priceless part of America's heritage. America's evolving land use needs resulted in the bipartisan passage of the Act. The Act permanently established the NLCS as an integral part of the BLM. The NLCS contains many of our Nation's most treasured landscapes, including scientific, historic and cultural resources, wilderness and wilderness study areas, wild and scenic rivers, national monuments, national conservation areas, and scenic and historic trails, among others.

The BLM has the challenging mission of balancing the myriad competing land and resource uses, and remains committed to making the public lands and resources available for a wide variety of uses. This Order recognizes that conservation of this Nation's rich natural and cultural heritage is an equally important land management objective, and an integral part of the BLM's multiple-use mission. Conservation is a long-term investment that provides quality of life and economic benefits for current and future generations.

Sec. 3 Authority. This Order is issued in accordance with the authorities contained in: Reorganization Plan No. 3 of 1950, as amended, 5 U.S.C. § 301, 43 U.S.C. §§ 1451, 1453; Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1701 *et seq.*; and the Omnibus Public Land Management Act of 2009.

Sec. 4 Policy.

a. The BLM shall ensure that the components of the NLCS are managed to protect the values for which they were designated, including, where appropriate, prohibiting uses that are in conflict with those values. If consistent with such protection, appropriate multiple uses may be allowed, consistent with the applicable law and the relevant designations under which the components were established.

b. The NLCS components shall be managed as an integral part of the larger landscape, in collaboration with the neighboring land owners and surrounding communities, to maintain biodiversity, and promote ecological connectivity and resilience in the face of climate change.

c. Components of the NLCS shall be managed to offer visitors the adventure of experiencing natural, cultural and historic landscapes through self-directed discovery.

d. Science shall be integrated into management decisions concerning NLCS components in order to enhance land and resource stewardship and promote greater understanding of lands and resources through research and education.

e. The NLCS shall serve as a place to build and sustain diverse communities of partners and volunteers dedicated to conserving, protecting, restoring, and interpreting our natural and cultural heritage.

f. The NLCS shall recognize the importance of a diversity of viewpoints when considering management options. Accordingly, the NLCS shall be managed from an interdisciplinary perspective. In so doing, the NLCS shall draw upon the expertise of specialists throughout the BLM, in coordination with the tribes, other Federal, state, and local government agencies, interested local landowners, adjacent communities, and other public and private interests. When seeking these viewpoints, the NLCS must consider the requirements of the Federal Advisory Committee Act, and any other applicable laws and regulations.

g. The NLCS shall endeavor to inspire the next generation of natural resource and public land stewards by engaging youth through education, interpretation, partnerships, and job opportunities.

Sec. 5 Organizational Changes. The BLM shall establish a new directorate, called the National Landscape Conservation System and Community Partnerships, to replace the Office of the National Landscape Conservation System and Community Partnerships. The BLM shall initiate the process to establish this directorate within 120 days of the date of this Order.

Sec. 6 Implementation. The Director of the BLM is responsible for ensuring implementation of this Order.

Sec. 7 Expiration Date. This Order is effective immediately and will remain in effect until its provisions are converted to the Departmental Manual or until it is amended, superseded, or revoked, whichever occurs first.

Secretary of the Interior

Date: NOV 15 2010

OVERVIEW OF BLM'S NATIONAL CONSERVATION LANDS 15-YEAR STRATEGIC PLAN *and* PROGRESS

The BLM released its 15-Year Strategic Plan for the National Conservation Lands in November 2011. The Plan was a huge step forward for conservation of these outstanding lands. In 2012, BLM began implementation of the plan including trainings of BLM employees and development of State Strategic Plans. To date, eight states have released State Strategic Plans. Although BLM is making great progress, conservationists need to work to ensure these goals are reflected in the day-to-day management of the National Conservation Lands. Below is an overview of how the 15-Year Strategic Plan is structured and its contents.

The National 15-Year Strategic Plan is organized into four themes:

THEME 1- ENSURING THE CONSERVATION, PROTECTION, AND RESTORATION OF NATIONAL CONSERVATION LANDS VALUES. Primacy of conservation within the Conservation Lands, how science serves to further conservation, and to provide for compatible use that protect resources and values.

THEME 2- COLLABORATIVELY MANAGING THE NATIONAL CONSERVATION LANDS AS PART OF THE LARGER LANDSCAPE. Building a better conservation model through collaborative management.

THEME 3- RAISING AWARENESS OF THE VALUE AND BENEFITS OF THE BLM'S CONSERVATION LANDS. Raise public awareness and understanding of the Conservation Lands, cultivate relationships, promote community stewardship of BLM-managed public land, and provide for use and enjoyment of present and future generations.

THEME 4- BUILDING UPON BLM'S COMMITMENT TO CONSERVATION. Promote a model of conservation excellence internally, through improved understanding and fully integrating the National Conservation Lands within the BLM.

Rafting in Bear Trap Wilderness, MT

15-YEAR STRATEGIC PLAN CONTINUED

Within the themes are goals and actions to achieve those themes. Although we cannot list every goal, below are the highlights:

- **FOCUS ON CONSERVATION MANAGEMENT-** “The [National Conservation] lands are designated by Congress or the President to conserve, protect, and restore their unique values for the benefit of current and future generations. As such, there is an overarching and explicit commitment to conservation and resource protection as the primary objective.”
- **LANGUAGE WHICH LIMITS ROAD NETWORKS-** “Facilities, including roads, will only be developed on [National Conservation] lands if required for public safety, necessary for the exercise of valid existing rights, minimizing impacts to fragile resources, or further the purposes for which an area was designated.”
- **EMPHASIS ON ECOSYSTEM BASED APPROACHES-** “Maintain or increase habitat connectivity with other important habitat areas to provide for sustainable populations of native species. Manage cultural resources within the context of the cultural landscape and adjoining lands to provide the greatest conservation benefit.
- **LIMIT DISCRETIONARY USES-** “Do not authorize discretionary uses that cannot be managed in a manner compatible with the designating proclamation or legislation.”
- **INSTITUTE STATEWIDE STRATEGIES-** “Each State Office will develop a statewide strategy for [National Conservation Land] areas that is tiered to the national strategy, which will guide development of implementation plans and strategies for individual units.”
- **DISCUSSION OF THE LEGAL DISTINCTION BETWEEN BLM’S NEW CONSERVATION MANDATE AND THE MULTIPLE USE MANDATE-** “The authors of FLPMA included an astute exception: management activities must abide by those [FLPMA] principles, except ‘...where a tract of such public land has been dedicated to specific uses according to any other provision of law it shall be managed in accordance with such law.’”
- **PROVIDE CLEAR GUIDANCE FOR BLM EMPLOYEES-** “Provide clear, consistent policy and guidance that affirms the primacy of the designating legislation or proclamation for all parts of the [National Conservation Lands] in planning and management.”
- **PROVIDE SCIENTIFIC FOUNDATION FOR DECISION-MAKING-** “Promote a better understanding of the importance and value of science in decision-making and ensure that research results are readily available to BLM managers, staff, and the public.”

To see the entire 15-Year Strategic Plan, please go to: <http://tinyurl.com/15YearPlan>

BLM POLICY MANUALS- GUIDING DAILY MANAGEMENT

In 2012, BLM released several Policy Manuals for the National Conservation Lands. These Policy Manuals will guide BLM employees in their day-to-day decisions and effect on the ground management of these spectacular lands. Park Service and Wildlife Refuge System employees rely on similar “policy manuals” to guide their day-to-day management.

BLM released **MANUAL 6100- NATIONAL LANDSCAPE CONSERVATION SYSTEM MANAGEMENT-** which provides policy for all units of the National Conservation Lands; and **MANUAL 6220- NATIONAL MONUMENTS, CONSERVATION AREAS, AND SIMILAR DESIGNATIONS.**

Although we cannot list all the policies stated in the Manuals, here are the highlights:

- Reinforces managing the National Conservation Lands in order to “conserve, protect, and restore nationally significant landscapes.”
- Primacy of Presidential or Congressional Designations. As a General Rule, **if the Act of Congress or Presidential Proclamation that designates a National Conservation Lands unit conflicts with FLPMA’s multiple use mandate, the designating language will apply.**”
- Activities and uses must be consistent with designating language and National BLM policy. “Ensure that all activities...are consistent with the relevant legislation or proclamation, national and state office policies and guidance for Monuments and NCA’s and approved land use plan decisions.”
- Reinforces the importance of gateway communities. “[T]he BLM will generally develop, or encourage the development of facilities within nearby communities to enhance local economic vitality and quality of life and to minimize disturbance within units.”
- Strong “**Rights of Way**” Guidance. “Avoid designating or authorizing use of transportation or utility corridors within units of the National Conservation Lands.”
- The Manuals also provide management policy for: Stewardship, Science, Cultural Resources, Energy and Minerals, Facilities, Lands and Realty, Livestock Grazing, Paleontological Resources, Recreation & Wildlife and Native Plants.

In addition, BLM released guidance for Historic Trails, Wilderness and Wilderness Study Areas and Wild and Scenic Rivers. All Manuals can be found on **BLM’s Website.**

BLM LAND USE DESIGNATIONS- HOW DO THEY DIFFER?

The BLM manages many different types of ecosystems and resources under a slew of different names and designations. Each type of designation is different and comes with its own set of management standards and restrictions.

National Monuments and National Conservation Areas are the most well known and recognized of the National Conservation Lands. Although different in name, the management of these two designated areas is typically very similar— both are managed with a focus on conservation of the resources they were designated to protect. The chart below outlines the similarities and the differences.

TYPES OF DESIGNATIONS	NATIONAL MONUMENTS	NATIONAL CONSERVATION AREAS
# OF UNITS IN THE SYSTEM	23	16
HOW IS IT DESIGNATED?	Congress through Legislation or the President through the Antiquities Act	Only Congress through Legislation
WHAT LAND CAN BE PROTECTED?	Public land Currently Managed by the Federal Government	Public land Currently Manged by the Federal Government
LEGAL LANGUAGE	Congress finds that the federal public lands in x be protected and enhanced for the benefit and enjoyment of future genreations. OR I (the President) hereby proclaim that there is hereby set apart and reserved as the X National Monument, for the purpose of protection of the objects identified [in the proclamation language].	Congress finds that the federal public lands in x be protected and enhanced for the benefit and enjoyment of future genreations.
MINIMUM # OF ACRES?	NO	NO
DOCUMENT WHICH GOVERNS DAY-TO-DAY MANAGEMENT	Unit Specific Resource Management Plan- Developed by BLM w/ Public Input	Unit Specific Resource Mangment Plan- Developed by BLM w/ Public Input
EXAMPLES	Sonoran Desert National Monument (AZ), Carrizo Plain National Monument (CA)	Red Rock Canyon National Conservation Area (NV), Gunnison Gorge National Conservation Area(CO)

STANDARDS FOR RESOURCE MANAGEMENT PLANS

Congress, Secretarial Order 3308 and the recent 15-Year Strategic Plan direct the BLM to manage the National Conservation Lands “in a manner that protects the values for which the components of the system were designated.” (16 U.S.C. § 7202(c)(2)). In order to uphold the purposes of the National Conservation Lands, fulfill congressional intent and implement the Secretarial Order, BLM should adhere to the following principles during the development of National Conservation Lands resource management plans (RMPs):

A) PRIORITIZE THE PROTECTION OF THE NATIONAL CONSERVATION LANDS OBJECTS AND VALUES OVER OTHER USES.

In 2009, BLM issued Instruction Memorandum 2009-215 on Resource Management Planning for the National Conservation Lands, clarifying that the designating language for a unit of the Conservation Lands “supersedes conflicting direction by the Federal Land Policy and Management Act (FLPMA).” When developing RMPs for the National Conservation Lands, BLM must recognize that if a conflict exists between the protection mandate of a presidential proclamation or act of Congress and the “multiple use” mandate of FLPMA, the proclamation or act of Congress must take priority. (see BLM IM 2009-215) Available at: <http://tinyurl.com/IM2009-215>

Examples:

Grand Staircase-Escalante National Monument (GSENM) RMP and Record of Decision (ROD) (2000).

“The Proclamation, which is the principal direction for management of the Monument, clearly dictates that the BLM manage the Monument for ‘the purpose of protecting the objects identified.’ All other considerations are secondary to that edict.” GSENM RMP at 3.

B) IDENTIFY AND INVENTORY OBJECTS AND VALUES DURING THE PLANNING PROCESS.

During the planning process for RMPs, BLM must identify and inventory objects and values and incorporate the results of that inventory into the RMP. (BLM IM 2009-215 & BLM IM 2009-226) When BLM is unable to fully inventory one or more objects or values during the planning process (e.g., cultural resources), then BLM should include in the RMP a strategy for completing such an inventory.

Example:

Agua Fria National Monument (AFNM) and Bradshaw-Harquahala Planning Area Proposed Resources Management Plans (2008).

“Agua Fria National Monument was established to preserve and protect, for present and future generations, its exceptional scientific and historic resources. These resources are defined in the monument's proclamation (Appendix A) as the objects to be protected:

- Archaeological remnants of prehistoric villages, rock art, agricultural systems, and other sites that composed one of the few remaining systems of prehistoric pueblo communities in central Arizona during the period A.D. 1250 to 1450.
- A cultural landscape that encompasses several hundred archaeological sites of diverse types within an undeveloped setting. These resources provide outstanding opportunities for scientists to study the interrelationships among prehistoric communities in their social and environmental contexts.
- Historic sites that reveal the progression of ranching and mining in a rugged area that posed environmental challenges to early settlers.
- A diverse set of topographic features that support an expansive mosaic of semi-desert grassland, transected by ribbons of rare and valuable riparian forest.
- A diversity of vegetation communities and water sources that provide habitat for a wide array of wildlife species.” AFNM Proposed RMP at 37.

C) RMPs FOR THE NATIONAL CONSERVATION LANDS MUST IMPLEMENT THE SPECIFIC REQUIREMENTS OF THE PRESIDENTIAL PROCLAMATIONS AND ACTS OF CONGRESS.

Many of the presidential proclamations and acts of Congress for units of the National Conservation Lands contain specific requirements for managing certain activities and uses in order to protect objects and values, such as prohibiting “off-road” vehicle use and closing the unit to oil and gas leasing. Thus, in addition to complying with the general requirement of protecting the National Conservation Lands’ objects and values, **BLM must also ensure that National Conservation Lands RMPs comply with the specific protection requirements of the presidential proclamations and acts of Congress.**

D) RMPs FOR THE NATIONAL CONSERVATION LANDS MUST INCLUDE MEASURES FOR MANAGEMENT AT THE LANDSCAPE LEVEL.

BLM must include management standards in RMPs for the National Conservation Lands that protect not only individual objects and values, but also the surrounding landscape and natural ecosystem (16 U.S.C. § 7202(a)). Protecting large, intact and healthy landscapes is the principal focus of many of the presidential proclamations and organic acts for National Conservation Land units, which frequently include natural and/or cultural landscapes in the recitation of protected objects and values.

Example:

AFNM and Bradshaw-Harquahala Planning Area Proposed RMPs (2008).

“Natural and cultural resources and associated values are protected, restored, and maintained in good condition and managed within the broader context of ecosystems and cultural landscapes. The protection of cultural, biological, and physical resources, which the monument was created for, receives the highest priority in project planning and the management of resources and land uses.”

AFNM Proposed RMP at 38.

E) ALL MANAGEMENT ALTERNATIVES MUST PROTECT THE CONSERVATION LANDS’ OBJECTS AND VALUES.

BLM is required under NEPA to develop and evaluate a “reasonable range” of management alternatives for National Conservation Land RMPs. However, this range of management alternatives is constrained by the requirement that any alternative ultimately selected by BLM must protect the unit’s objects and values. For this reason, BLM should only develop and evaluate management alternatives that ultimately provide protection for the National Conservation Land’s objects and values.

Example:

Canyons of the Ancients National Monument Proposed RMP (2009).

“Alternative development in the [Draft RMP/EIS] occurred to address the needs of present and future generations while, at the same time, adhering to the Proclamation requirement that Monument objects be protected. This approach resulted in a reasonable range of alternatives though a more narrow range than that found in most BLM plans.” CANM Proposed RMP at 21.

F) ALL MANAGEMENT DECISIONS FOR CONSERVATION LANDS SHOULD FACILITATE A SELF-GUIDED VISITOR EXPERIENCE.

The Conservation System differs from other protective designations, like national parks, by encouraging self-discovery of the landscapes. There are generally less developed trails and facilities. In fact, the system generally aims for visitor services to be located outside the units and in gateway communities.

Example:

CANM Proposed RMP (2009).

The Canyons of the Ancients National Monument plan permits visitors to learn about the cultural history of the area through an “outdoor museum concept for self-discovery of cultural and natural resources” that directs visitors to some sites but also allows visitors to discover other sites without direction.

G) SCIENTIFIC RESEARCH SHOULD BE INTEGRATED INTO MANAGEMENT DECISIONS FOR CONSERVATION LANDS.

As part of the mission for the Conservation Lands, emphasizing the scientific values of these units, monument and NCA management plans can specifically provide for ways to promote scientific inquiry, both in the context of making management decisions and in providing for new research. The issuance of the Conservation System Science Strategy (through Instruction Memorandum 2007-116) sets out a commitment for the Conservation System “to promote and foster both basic and applied science.” Further, Secretarial Order 3308 and the 15-Year Strategy state that science shall be integrated into management decisions for Conservation Lands.

Example:

Carrizo Plain National Monument RMP (2010).

Authorize and encourage on-Monument research in the following order of priority:

- **Research that has direct implications for improving management and protection of objects of the Monument Proclamation as identified as objectives in the RMP and the Conservation Target Table (Attachment 5).**
- **Research that furthers scientific understanding of Monument resources.**
- **Research that has scientific value, but may have only indirect benefits for understanding or management of Monument resources.**

H) MANAGEMENT DIRECTION FOR SPECIFIC USES AND RESOURCES WITHIN THE NATIONAL CONSERVATION LANDS.

The following management recommendations are for specific resources and uses within units of the National Conservation Lands. Each recommendation is intended to provide BLM with the authority necessary to provide the National Conservation Lands with the level of protection necessary to fulfill conservation mandates prescribed in the unit’s establishing document.

1) CULTURAL RESOURCES

Require development of a cultural resources management plan that, at a minimum, should prioritize areas for cultural resources inventories based on data gaps and the potential for surface disturbance, provide timetables for completing cultural resources inventories and includes strategies and trigger points for protecting cultural resources from authorized and unauthorized activities. Cultural resources should also be managed within the context of the broader cultural landscape rather than site-by-site.

2) GRAZING

Require an evaluation of whether grazing practices are harming the objects and values for which Congress or the president designated the unit, a determination of whether grazing is compatible with the protection mandate and, if so, how grazing can take place without harming the unit’s objects and values and a decision as to whether changes in current grazing practices are necessary to protect the objects and values.

3) LANDS AND REALTY

- Establish priorities for land acquisition with a focus on acquiring: (1) parcels with known objects and values; and (2) interests whose development could harm the unit’s objects and values.
- Work with existing right of way (ROW) holders to relocate outside the unit if possible rather than permitting renewal or expansion of ROWs in existence at time the unit was created.
- Only permit renewal or expansion of existing ROWs if there is no feasible alternative, if activities can be conducted without harming objects and values and if additional protective measures are imposed as necessary.

4) MINERALS

- Close the unit to oil and gas leasing or, at minimum, open limited areas to leasing subject to the maximum protective stipulation(s) (e.g., no surface occupancy) necessary to protect the unit’s objects

and values from the direct, indirect and cumulative impacts of oil and gas development.

- Retain express authority to deny applications for permit to drill if a drilling proposal will directly, indirectly or cumulatively harm the unit's objects and values or their surrounding landscape.
- Recommend the unit for a mineral withdrawal.
- Perform validity determinations before approving plans of operation for hardrock mining.

5) RECREATION

- Establish recreation management areas emphasizing primitive and backcountry experiences consistent with the overall purpose of the unit and National Conservation Lands.
- Disallow recreational activities, such as target shooting, motorized and mechanized recreation and rock climbing, in areas where harm may occur to the unit's objects and values.
- Directs visitor use to an intensive visitor use zones and away from areas where there are potential conflicts with sensitive resources and/or primitive backcountry experience.
- Develop clear standards for issuing special recreation permits, including managing group size, that are tied to protecting the unit's objects and values.

6) TRANSPORTATION

- Include a legal definition of the term "road" and prohibit use of motorized or mechanized vehicles anywhere but on roads meeting this legal definition.
- Prohibit the construction of new roads except for emergency and essential administrative purposes.
- Develop a minimal route network for national monuments and national conservation areas that are based on providing the maximum level of protection to the unit's objects and values.
- Perform a route density analysis of the inventoried transportation network to inform management of important and sensitive resources that may be impacted by a dense route network.
- Perform cultural resource surveys along routes proposed for designation or defer such designations until cultural resources surveys are complete.

7) VISUAL RESOURCE MANAGEMENT (VRM)

- Manage lands to VRM Class I or II levels throughout the unit in order to preserve the existing character of the natural and cultural landscape.
- Allow for VRM Class III or IV levels in limited, narrowly-defined circumstances when no harm will occur to the unit's objects and values or their surrounding landscapes.

8) RENEWABLE ENERGY

- Notwithstanding any other provisions regarding ROWs, no renewable energy development will be permitted within the unit.

9) TRANSMISSION

- No new transmission rights-of-way shall be issued.
- Existing transmission ROWs, shall be managed in accordance with the provisions regarding rights-of-way set out in BLM Manual 6220- National Monuments, Conservation Areas, and Similar Designations.

10) CLIMATE CHANGE

- Manage the Conservation Lands as an integral part of the larger landscape, in collaboration with the neighboring land owners and surrounding communities, to maintain biodiversity, and promote ecological connectivity and resilience in the face of climate change.
- Use large-scale assessments, such as BLM's Rapid Ecoregional Assessments, to identify areas where the Conservation Lands are important for resource protection and conservation within a broader landscape context and protectively manage and facilitate scientific study of those areas to inform management options in the face of climate change.

STANDARD LEGISLATIVE LANGUAGE FOR ADDITIONS TO THE NATIONAL CONSERVATION LANDS

The following language provides a set of conservation standards for creating a new legislative unit within the National Conservation Lands. Additions to the National Conservation Lands should have conservation as their primary purpose and this should be expressed both in the title of the legislation as well as in the legislative text. This consistency in naming, i.e. national monuments and national conservation areas, is needed to reinforce that conservation is the purpose and unifying factor for the National Conservation Lands.

Off-Highway Vehicle Recreation Areas and other Recreation areas managed by the BLM shall not be included or managed as part of the National Conservation Lands.

All new legislated additions to the National Conservation Lands should include the following:

A) A STRONG PURPOSES SECTION:

Example:

Purpose- The purpose of this section is to conserve, protect, and enhance the ecological, scenic, wildlife, riparian, wilderness, non-motorized recreational, geological, cultural, historical, natural, educational, and scientific resources of ...

Additional specificity regarding protecting site specific ecological and cultural resources should also be included whenever possible. (See Public Law 101-628 Nov. 28 1990 Sec. 201 (a) The Gila Box Riparian NCA purposes section included aquatic species and protection of riparian areas in the purposes section). Purposes such as protecting rangeland, providing future energy rights of way, protecting non-native species and non-natural landscapes are not appropriate purposes for National Conservation Area designation and should NOT be included within the Purpose section.

B) REQUIREMENT FOR A MANAGEMENT PLAN WITH SPECIFIC PROVISIONS FOR PROTECTING THE UNITS OBJECTS AND VALUES:

Example:

Management Plan- IN GENERAL- Not later than 3 years after the date of enactment of this Act, the Secretary shall develop a comprehensive plan for the long-term management of the National Conservation Area in order to fulfill the purposes for which the conservation area is established. The management plan shall include:

(1) provisions designed to assure protection of the resources, values and purposes for which the conservation area was created; and

(2) a proposal for minimal administrative and public facilities to be developed or improved at a level compatible with achieving the resources objectives for the National Conservation Area and with other proposed management activities to accommodate visitors and researchers to the National Conservation Area. (See Proposed Bill H.R. 4192 Sec. 2 8(d)(3)(c) (2)).

Prior to completion of the RMP, the national conservation area should be managed to protect and preserve the features for which the unit was created at a no net loss effect. Please see pg 21 of this Handbook for appropriate Resource Management Plan Language.

C) A USES CLAUSE THAT ENSURES THAT PERMITTED USES OF THE AREA ARE CONSISTENT WITH THE PURPOSES FOR WHICH IT WAS ESTABLISHED

Example:

IN GENERAL- The Secretary shall allow only such uses of the National Conservation Area as will further the purposes for which the National Conservation Area is established. (Public Law 106-538 Dec. 6, 2000 Sec. 5(b) or 114 Stat. 2565)

D) LANGUAGE RESTRICTING OFFROAD VEHICLES TO DESIGNATED ROADS

Example:

IN GENERAL- For the purpose of protection the objects identified in the Purpose Section, all motorized and mechanized vehicle use off road will be prohibited, except for emergency or authorized administrative purposes. Motorized use is permitted only on designated roads; mechanized use is permitted on designated roads and trails. The Secretary of the Interior shall prepare a transportation plan that addresses the actions, including road closures or travel restrictions, necessary to protect the objects identified in this legislation. (Proclamation No. 7317, 65 Fed. Reg. 37, 243 (June 9, 2000), modified)

E) WITHDRAW LANGUAGE

Example:

Withdrawals- Subject to valid existing rights, all Federal surface and subsurface land within the National Conservation Area and all land and interests in the land that are acquired by the United States after the date of enactment of this Act for inclusion in the Conservation Area, are withdrawn from--

- (1) all forms of entry, appropriation, or disposal under the general land laws;
- (2) location, entry, and patent under the mining laws; and
- (3) operation under the mineral leasing and geothermal leasing laws. (Public Law 111-11 Mar. 30, 2009 sec. 2203 Management (b) (1-3) or 123 Stat. 1100).

F) LANGUAGE INCORPORATING ACQUIRED LANDS

Example:

Incorporation of Acquired Land and Interests- Any land or interest in land that is located in the National Conservation Area that is acquired by the United States shall become part of the National Conservation Area and be managed in accordance with this Act and the management plan.

G) LANGUAGE ADDING THE AREA TO THE NATIONAL CONSERVATION LANDS

Example:

NATIONAL CONSERVATION LANDS- The Monument/National Conservation Area shall be managed as a component of the National Landscape Conservation System.

Hi folks - attached is the Status report for Dec 19, 2015 through Jan 6, 2017.

Have a wonderful evening!

Todd M. Curtis

Advisor to the Director's Office (Detail)
Bureau of Land Management
1849 C St. NW Rm. 5641
Washington, DC
Office: 202-208-3759
Mobile: 971-337-5689

BLM-ASLM Agenda
December 16, 2016
Internal Working Document

I. Executive Travel: December 19 to January 6, 2016

BLM Director Neil Kornze will be out of the office December 19 - December 30. Deputy Director Linda Lance will be out of the office beginning the afternoon of December 22 - December 30. Acting Deputy Director Jenna Whitlock will be traveling December 27 (avail by email), but otherwise in the office during the holiday season. The week of January 1, Neil Kornze, Linda Lance and Jenna Whitlock will all be in Washington, D.C., attending regularly scheduled meetings.

II. Agenda Items

- Coal Scoping Report
- Onshore Order 1
- Mitigation Policy
- Withdrawals
- OIG/GAO
- Admin Records
- Projects
 - Chokecherry and Sierra Madre
 - Gateway West
 - Boardman to Hemingway

• Priority Packages

Items with ASLM:

- Onshore Order 1 - Final Rule
- QFRs - 9/22 SENR Hearing - Neil Kornze (BLM0009094)
- SO 3339 Under-Resourced Youth – Implementation Report (BLM0009086)
- Draft Administrative Proposal - BLM Concession Authority BLM0009092

Items incoming to ASLM:

- Chokecherry and Sierra Madre Wind Energy Decision Package (BLM0009327)
- Notice: Identifying Lands Subject to Secretarial Order of Restoration - Red Lake Band of the Chippewa Indians in Minnesota (BLM0009221)
- Eastern Interior RMP/FEIS for Alaska (BLM0008731)
- Request to Close Rec 1 OIL AND GAS RESOURCES: Actions Needed for Interior to Better Ensure a Fair Return (GAO-14-50)
- Presumed to Conform List FRN (BLMR000766)

Priority Withdrawals Schedule:

- | |
|---|
| <ul style="list-style-type: none">○ DRECP (BLML000141) amended withdrawal petition – to ALSM for review Dec 16, sign by Dec 20, publish FR Dec 23○ Sagebrush Focal Areas (BLML000106) withdrawal petition – sent to ASLM on Dec 14; ASLM to sign Dec 20○ (continued on page 2) |
|---|

- **SW Oregon** (BLML000139) PLO for withdrawal/in placed when signed – 90 day comment period ends Dec 29. Withdrawal supports pending legislation; send to ASLM Dec 20, ASLM sign Dec 30 (end of current Congress, considering holiday).
- **Methow Valley** (BLMR001356) FS withdrawal petition/just need to clear FR notice – withdrawal in part supports pending legislation, Package to ASLM Dec 20, ASLM clear by Dec 30 (end of the current congress considering holiday);

II. Weekly Report:

December 18, 2016 – January 6, 2017.

The BLM is expected to announce the Decision Record for Phase 1 of the WY Chokecherry-Sierra Madre Wind Project the week of December 19, giving approval for the first 500 wind turbines. This project is the largest proposed onshore wind energy facility in North America. The entire project will open up 1,200 jobs at peak construction and generate up to 3,000 megawatts of clean, renewable power, enough to power nearly one million homes. In addition, the Record of Decision for the Beaver Dam Wash and Red Cliffs National Conservation Areas (NCA), the Proposed Amendment for the St. George RMP (UT) and associated Final EIS are expected to be signed. The key elements of the proposed plans for the NCAs include: protection for diverse threatened and endangered plant and animal species and critical habitats including the Mojave Desert Tortoise, Southwestern Willow Flycatcher, and native fish of the Virgin River System; management actions to reduce the threat of wildfires and restore fire-damaged landscapes; development of trails and other facilities to provide for sustainable recreations experiences; and protection for the Old Spanish National Historic Trail. Additionally, the BLM will finalize efforts to streamline oil and gas drilling permitting by adopting the e-filing of Applications for Permit to Drill. With the final revision to Onshore Order 1, the agency makes online filing of Applications for Permit to Drill (APD) the default method of filing, moving away from old-fashioned paper applications. On December 30, the BLM plans to release the draft EIS for the Sagebrush Focal Area Mineral Withdrawal. On December 30 and early in the new year, two mineral withdrawal notices, located in Oregon/Washington, will publish in the Federal Register. The first withdrawal, publishing on Dec 30, is for 101,021.71 acres in SW Oregon around the Salmon River. The second is for approximately 340,079 acres of Forest System lands located in the Methow Valley, WA. Lastly, BLM UT will conduct the first coal sale of 2017 on January 4. The Competitive Coal Lease Sale is for a tract of Federal coal in Sanpete and Sevier Counties, Utah.

Week Ahead Announcements- Presidential and Department/Agency Priorities – Dec 17, 2016 - Jan 6, 2017

Week of December 17: The final rule for Onshore Order 1 is expected to publish. The final rule will require the agency to adopt the online filing of Applications for Permit to Drill (APD) as the default method of filing, moving away from old-fashioned paper applications.

On or before December 17: The publication of the final Competitive Solar and Wind rule is expected.

Week of December 19: An ASLM decision on the BLM Decision Record for the BLM-WY Chokecherry-Sierra Madre Wind Project is anticipated.

Week of December 19: The BLM-UT Price Field Office will release the San Rafael Desert Master Leasing Plan preliminary alternatives for public comment. This MLP focuses on approximately 525,000 acres of public lands in Emery and Wayne counties in Utah and could amend resource management plans for the Price and Richfield Offices.

Week of December 19: The BLM-UT Moab FO public comment period begins for the Tidewater EA, which analyzes a proposal to issue three Applications for Permit to Drill. The three wells are located in Grand County, Utah.

December 20: The new BLM-CA Ukiah Field Manager will meet with Congressman Mike Thompson (CA-05-D) for a meet and greet.

December 21 (TBD): BLM-UT plans to release the ROD for the Beaver Dam/Red Cliffs NCAs and St. George ROD. The Notice of Availability (NOA) was published in the Federal Register on September 2, 2016, initiating a 30-day protest period. The ROD for the Red Cliffs NCA has a court-ordered completion date of December 31, 2016.

December 22: The public comment period ends for the BLM-ESO Draft EIS for the Mountain Valley Project and Equitrans Expansion Project, a pipeline that would run through Virginia and West Virginia. The Federal Energy Regulatory Commission is the lead agency for developing the Draft EIS.

Before December 31: The Final Colorado Solar Regional Mitigation Strategy (SRMS) release is expected. The SRMS is designed to improve the mitigation process, account for potential impacts in the landscape context and facilitate solar energy development in Solar Energy Zones. The strategy will use the information, maps and tools provided by the Landscape Assessment.

Late December: The BLM-UT Monticello Field Office plans to issue a decision on the proposed Indian Creek ATV route.

Late December or early January: The BLM-UT Moab FO will release for public comment an EA for the Needles and Anticline Overlook (Canyon Rims) Road Improvement Project.

Late December: Four IMs addressing issues other than the Coal PEIS noted in the SO (transparency, processing leasing actions under the leasing pause, waste mine methane, and surface owner consent) are expected to publish.

December 30: The BLM plans to release the draft EIS for the Sagebrush Focal Area Mineral Withdrawal. As part of ROD implementation, the BLM and the U.S. Forest Service are recommending the withdrawal of lands within Sagebrush Focal Areas from locations with mining claims, subject to valid existing rights. As part of the withdrawal process the lands covered by the proposal have been temporarily segregated for a period of up to two years. During this period, the agencies are undertaking environmental and other analyses to determine if the lands should be formally withdrawn to protect sage-grouse habitat from adverse effects of future locatable exploration and mining.

Early January: The BLM expects to release a Coal PEIS scoping report. The report will describe the process, summarize issues raised by commenters, and discuss alternatives that may be evaluated in the Coal PEIS.

December 30: A Notice of Proposed Withdrawal will be published in the *Federal Register* that will begin a 2-year segregation period for the withdrawal of approximately 340,079 acres of Forest System lands located in the Methow Valley, WA. The proposed withdrawal would close USFS managed lands for 20 years. The purpose of the proposed withdrawal is to aid legislation introduced in Senate Bill 2991, known as the Methow Headwaters Protection Act of 2016.

January 2: The BLM and U.S. Forest Service have filed an application requesting to withdraw 101,021.71 acres in SW Oregon around the Salmon River (5,216.18 of BLM Revested O&C lands and 95,805.53 of National Forest System Lands). The comment period on the proposed 20-year withdrawal

closes on December 29th at which point the Secretary would be able to make a decision on the application. Because the withdrawal is in part to support pending legislation, a decision on the PLO needs to be made before the end of the current Congress, which is December 30, 2016.

January 4: BLM-UT will conduct a Competitive Coal Lease Sale for a tract of Federal coal in Sanpete and Sevier Counties, Utah. The Federal coal tract, known as the Greens Hollow Tract, is located in the Wasatch Plateau Known Recoverable Coal Resource Area. The 6,175-acre tract contains approximately 55.7 million tons of recoverable coal adjacent to and northwest of the existing SUFCO Mine, which is operated by Canyon Fuels, LLC, a subsidiary of Bowie Resource Partners, LLC.

January 5-8: The Western Association of Fish and Wildlife Agencies' 2017 Mid-Winter meeting will be held at the Wigwam in Litchfield Park, AZ. The agenda is available at: http://www.wafwa.org/events/2017_mid-winter_meeting/program/ and includes the Sage Grouse Executive Oversight Committee Meeting on Friday morning, January 6. The BLM will send a small delegation.

January 6: BLM-CO plans to release the FRN for the Dominguez-Escalante ROD on January 6, 2016. The PRMP/FEIS NOA was published in the Federal Register on Thursday, June 30, 2016, initiating the protest period, which closed on Monday, August 1, 2016. Seven protests were received and are currently being evaluated.

Media

Trans Alaska Pipeline inquiry: In response to the media coverage of the protests regarding the Dakota Access Pipeline, Dan Springer, the Seattle-based correspondent for *Fox News*, called the BLM-AK Branch of Pipeline Monitoring on December 2 asking whether any spills from the TAPS had impacted drinking water. Springer was directed to contact the Alaska Department of Environmental Conservation and Alyeska Pipeline Service Company. The tone of the story is expected to be neutral and the air date is unknown.

Alaska Public Media inquiry on Planning 2.0, Regional Mitigation Strategy, and Legacy Well program: On December 2, BLM-AK staff was interviewed by Alaska Public Media Energy Desk reporter Elizabeth Harball regarding three subjects that will result in three separate stories. Stacie McIntosh, Arctic Office Manager; Serena Sweet, Planning and NEPA lead for BLM Alaska; and Lesli Ellis-Wouters, Communications Chief participated. For the first story, focusing on the release of Planning 2.0, Sweet discussed three areas of change – more public involvement, adaptive management and landscape level planning. McIntosh provided a status on the Regional Mitigation Strategy for the Northeast NPR-A and a request for public comment by Dec. 29. The last story was an update on the Legacy Well program and clarification on work done last summer. The tone of the stories was positive and the stories are expected to be neutral. The air date is unknown.

Moab Times Independent query on Flaring: Reporter Rose Egelhoff requested general background on the impacts of the new flaring regulations and the expected ruling from the state on Wesco's operations in the Big Flat area. UT PA explained that both the state and the BLM have flaring rules, that they coordinate closely with each other and oil and gas operators in the area to ensure they are meeting federal and state requirements. They also noted that Wesco purchased Fidelity's holdings in the Big Flat area and currently flare and that reducing flaring was one of the key reasons for approving the Dead Horse Lateral Pipeline, as well as more responsible use of gas resources by providing a mechanism to get the gas to market. Rose has also requested to speak with a petroleum engineer on background to discuss flaring and venting and the BLM's role in regulating them for local operators. UT PA is arranging a backgrounder with Eric Jones, a petroleum engineer that can explain technical information in laymen's terms.

Deseret News Query on Planning 2.0: Reporter Amy Joi O'Donoghue requested comment on Utah and county leader concerns that under the final rule the importance of state and local government opinion is diminished. They are concerned that such a "landscape" scale approach to land use planning that does not have to adhere to district boundaries necessarily "subsumes" that voice. UT PA is working this request.

NPR Fresno request for interview on Temperance Flat Dam: Reporter Ezra David Romero requested to speak with the Bakersfield Field Manager regarding the possible impacts of a proposed Temperance Flat Dam. The BLM manages the San Joaquin River Gorge about 35 miles east of Fresno. The stretch of the river managed by the BLM, about 10 miles that includes hiking trails, campgrounds and a visitor center, would be inundated if the dam were built. The analysis in the 2015 Bakersfield Resource Management Plan found the portion of the river managed by the BLM qualifies for Wild and Scenic status. The reporter plans to also interview BOR, landowners and visit the Millerton Caves (BLM). CA PA is working this request.

HBO-Vice News request for interview on Western Monuments: Producer Alyse Shoreland is working on a story about the designation of western lands as monuments by the President. She is focusing on the Cascade-Siskiyou expansion and Owyhee Canyonlands in OR, and Gold Butte, NV, and is requesting interviews with officials on the ground who can speak about the lands and monument status if/when a designation is made. WO PA is on standby until if/when a designation is made.

30-60 Day Look Ahead

Early January: The BLM expects to release a Coal PEIS scoping report. The report will describe the process, summarize issues raised by commenters, and discuss alternatives that may be evaluated in the Coal PEIS.

No later than January 20: The BLM plans to publish the Oil Shale Rule. When finalized, the proposed rule would clarify specific provisions of oil shale royalty regulations, ensure that the royalty rate provides a fair return to the American taxpayer while encouraging the development of Federal oil shale resources, and include adequate measures to protect the environment.

January: BLM-AK Eastern Interior (EI) RODs/Approved RMPs: The Director's Response Letter to the Governor's Appeal has been approved by the Director's Office. The protest resolution report is complete and being finalized for publication/posting on the BLM website on or a day or two prior the ROD signature date.

January: BLM-NV plans to issue the final Dixie Meadows Geothermal Project EA and FONSI. The project area consists of approximately 22,021 acres of public land. The proponent (Ormat) is seeking approval to drill temperature gradient wells, and to drill and test observation wells and production wells at up to 20 specific locations.

January: The BLM-CA Arcata and Redding field offices published a Notice of Intent to begin public scoping for the development of a new RMP for public lands overseen by both offices on November 7. A series of seven public meetings will be held across the region in January and public comments will be accepted until the completion of the meetings.

January: BLM-CA plans to release for public comment the draft RMP Amendment and draft EIS that will address oil and gas leasing and development on 793,000 acres of federal mineral estate administered by the Central Coast Field Office. The amendment is in response to public concerns about oil and gas leasing and development, in particular hydraulic fracturing and related well stimulation techniques.

January 9: The BLM-ID Challis Field Office will begin bait trapping wild horses within the Challis HMA and treat mares with the fertility control PZP-22. The process is expected to be completed by March 14, 2017.

January 12: The BLM plans to release its final mitigation manual and handbook that will help the agency carry out consistent, effective, and transparent mitigation to address impacts to resources from public land uses.

January 13: BLM-ESO will transfer approximately 60,000 acres of land to the Red Lake Band of Chippewa Indians. The lands were ceded to the United States in the late 1800's and early 1900's, and originally identified for restoration in a 1945 Secretarial Order.

January 15-17: The North American Intergovernmental Committee on Cooperation for Wilderness and Protected Areas (NAWPA) will hold their annual agency heads meeting in Whitehorse, Yukon Territory.

January 17 and 24: The Nevada Cattlemen's Association, Nevada Department of Agriculture, USFS, Nevada Department of Wildlife and the BLM will host a series of Livestock Grazing Permittee workshops throughout Nevada. At these workshops, the BLM will present how the BLM's Greater Sage-Grouse Plan Amendment's objectives will affect the livestock grazing program in Nevada and address questions.

Mid-January: BLM-ID plans to sign the Gateway West Transmission ROD. The BLM published the FSEIS for the final two sections on October 7, 2016. The protest period will end November 7, 2016. The protest resolution and Governor's Consistency Review is scheduled to be completed January 13, allowing for publication of the ROD prior to January 20. The preferred routes avoid to the greatest extent possible private land, Greater Sage-Grouse habitat and the Morley Nelson Snake River Birds of Prey NCA.

Mid-January: BLM is attempting to accelerate the signing of the Boardman to Hemingway ROD. Oregon Plan amendments are being handled concurrently and that decision will be issued simultaneously with the ROD for the EIS and Approval to issue a grant.

January 29-Feb: The Society for Rangeland Management Annual Meeting will be held in St. George, UT. BLM employees from various offices are planning to attend.

January 30: The BLM and Forest Service will announce the annual adjusted grazing fee for public lands.

Early FY2017: The finalized implementation plan for Wilderness 2020 Vision is expected to be issued.

February 7-8: The Wildlife and Hunting Heritage Conservation Council meeting will be held at the DOI MIB.

February 25-March 1: The National Association of Counties Legislative Conference will be held in Washington, D.C.

March 4-11: the North American Wildlife and Natural Resources Conference will be held in Spokane, Washington. BLM staff will attend.

N/A

IV. Major Federal Register Notices and Approval Packages:

Title	Current Status
Notice of Proposed Withdrawal Extension and Opportunity for Public Meeting; Miller Lake Recreational Area, Oregon.	Will publish in the Federal Register on 12/16/16. (DTS 1289).
Notice of Availability of the Record of Decision for the TransWest Express Transmission Project in Wyoming, Colorado, Utah and Nevada	Will publish in the Federal Register on 12/16/16. (DTS 1319)
Notice of Availability of the Record of Decision for the Energy Gateway South Transmission Project and Approved Land-use Plan Amendments	Will publish in the Federal Register on 12/16/16. (DTS 1331)

V. Congressional Activities:

Congressional Meetings

Rep. Stewart / Wild Horse & Burro: On December 20, Kristin Bail, Assistant Director for Resources and Planning; Dean Bolstad, Division Chief, Wild Horse and Burro Program; and Linda Smith, BLM Budget Officer plan to meet with staff of Rep. Stewart (R-UT-2) at their request to discuss the BLM's Wild Horse and Burro program.

Congressional Visits in the Field

Courtesy Visits / Rep. Thompson (D-CA-5): On Dec. 20, BLM Ukiah California Field Manager, Amanda James plans to conduct a courtesy visit with Rep. Thompson (D-CA-5).

WH&B Corral Visit / Sen. Risch's Staff (R-ID): On Jan 4, staff from Senator Risch's office will tour the BLM's Boise Idaho corral and meet with BLM ID wild horse and burro program staff.

State Legislature Hearings / Meetings

Wyoming State Legislature / Forestry: The BLM in Wyoming has a received a request from the Wyoming State Legislature's Joint Agriculture Committee to provide an update on BLM forestry activities on Jan. 17 in Cheyenne. Details TBD.

VI. Pending Packages in ASLM:

Packages with ASLM 12/15/2016:

1. Surname – Sec Jewell Response to 2 Gov. Sandoval letters, Proposed Mineral Withdrawal in Sagebrush Focal Area (BLM0007183)
2. Signature – Response to Letter Re: Appeal of the BLM's decision to declare Lia Shapiro's mine claim Abandoned (LM00000009)
3. Surname - Bureau of Land Management's Implementation of Secretarial Order 3339 Report Fiscal Year 2016 BLM0009086
4. Surname - Draft Administrative Proposal - BLM Concession Authority BLM0009092

5. Surname – Letter from Senators Udall & Heinrich about Upper Rio Grande Watershed wildlife corridors BLM0008739
6. Request to Close Recommendation 9 in the Office of Inspector General's report entitled, Bureau of Land Management's Renewable Energy Program: A Critical Point in Renewable Energy Development (Report No. CR-EV-BLM-0004-2010) (BLM0008379)
7. Surname – 90 Day List (January - March) BLMR001344
8. Signature - Request to amend the application for the Greater Sage-Grouse withdrawal to add 400K acres in Nevada and the NOA for the DEIS. BLML000106
9. Surname – Farmington (NM) RAC
10. Surname – Albuquerque (NM) RAC
11. Surname – Southeast Oregon RAC
12. Surname – California Desert District RAC

Packages with BLM:

1. Surname/Signature – MOU between BLM and DOD on Wind Energy BLM0006219 **WO-301 Resolving AL Comments and preparing Hardcopy for Signature.**
2. Surname – SNPLMA Annual Report for FY 2014 & 2015. **NV has circulated a new version to 300/100 and Kelly is reviewing. Current goal is to get new hard copy to ASLM by Friday, 12/16 or Monday, 12/19**
3. Surname/Signature - Transfer of Jurisdiction of Public Lands to Chocolate Mountain Aerial Gunnery Range/CACA 056671 BLML000120 **WO-350 – Lands and Realty is addressing Kelleher comments on PLO, the ASLM Info Memo, and the Transmittal Memo**
4. Surname – 620 DM 1-7 Wildland Fire Program Policy BLM0009488 / ESO-00073486 – **Solicitor Review**

VI. Packages Going to ASLM Next Week:

1. Chokecherry and Sierra Madre Wind Energy Decision Package (BLM0009327)
2. Notice: Identifying Lands Subject to Secretarial Order of Restoration - Red Lake Band of the Chippewa Indians in Minnesota (BLM0009221)
3. Eastern Interior RMP/FEIS for Alaska (BLM0008731)
4. Request to Close Rec 1 OIL AND GAS RESOURCES: Actions Needed for Interior to Better Ensure a Fair Return (GAO-14-50)
5. Presumed to Conform List FRN (BLMR000766)

VIII. Weekly Audit Report:

BLM-ASLM Agenda
December 16, 2016
Internal Working Document

I. Executive Travel: December 19 to January 6, 2016

BLM Director Neil Kornze will be out of the office December 19 - December 30. Deputy Director Linda Lance will be out of the office beginning the afternoon of December 22 - December 30. Acting Deputy Director Jenna Whitlock will be traveling December 27 (avail by email), but otherwise in the office during the holiday season. The week of January 1, Neil Kornze, Linda Lance and Jenna Whitlock will all be in Washington, D.C., attending regularly scheduled meetings.

II. Agenda Items

- Coal Scoping Report
- Onshore Order 1
- Mitigation Policy
- Withdrawals
- OIG/GAO
- Admin Records
- Projects
 - Chokecherry and Sierra Madre
 - Gateway West
 - Boardman to Hemingway

• Priority Packages

Items with ASLM:

- Onshore Order 1 - Final Rule
- QFRs - 9/22 SENR Hearing - Neil Kornze (BLM0009094)
- SO 3339 Under-Resourced Youth – Implementation Report (BLM0009086)
- Draft Administrative Proposal - BLM Concession Authority BLM0009092

Items incoming to ASLM:

- Chokecherry and Sierra Madre Wind Energy Decision Package (BLM0009327)
- Notice: Identifying Lands Subject to Secretarial Order of Restoration - Red Lake Band of the Chippewa Indians in Minnesota (BLM0009221)
- Eastern Interior RMP/FEIS for Alaska (BLM0008731)

- **SW Oregon** (BLML000139) PLO for withdrawal/in placed when signed – 90 day comment period ends Dec 29. Withdrawal supports pending legislation; send to ASLM Dec 20, ASLM sign Dec 30 (end of current Congress, considering holiday).
- **Methow Valley** (BLMR001356) FS withdrawal petition/just need to clear FR notice – withdrawal in part supports pending legislation, Package to ASLM Dec 20, ASLM clear by Dec 30 (end of the current congress considering holiday);

II. Weekly Report:

December 18, 2016 – January 6, 2017.

The BLM is expected to announce the Decision Record for Phase 1 of the WY Chokecherry-Sierra Madre Wind Project the week of December 19, giving approval for the first 500 wind turbines. This project is the largest proposed onshore wind energy facility in North America. The entire project will open up 1,200 jobs at peak construction and generate up to 3,000 megawatts of clean, renewable power, enough to power nearly one million homes. In addition, the Record of Decision for the Beaver Dam Wash and Red Cliffs National Conservation Areas (NCA), the Proposed Amendment for the St. George RMP (UT) and associated Final EIS are expected to be signed. The key elements of the proposed plans for the NCAs include: protection for diverse threatened and endangered plant and animal species and critical habitats including the Mojave Desert Tortoise, Southwestern Willow Flycatcher, and native fish of the Virgin River System; management actions to reduce the threat of wildfires and restore fire-damaged landscapes; development of trails and other facilities to provide for sustainable recreations experiences; and protection for the Old Spanish National Historic Trail. Additionally, the BLM will finalize efforts to streamline oil and gas drilling permitting by adopting the e-filing of Applications for Permit to Drill. With the final revision to Onshore Order 1, the agency makes online filing of Applications for Permit to Drill (APD) the default method of filing, moving away from old-fashioned paper applications. On December 30, the BLM plans to release the draft EIS for the Sagebrush Focal Area Mineral Withdrawal. On December 30 and early in the new year, two mineral withdrawal notices, located in Oregon/Washington, will publish in the Federal Register. The first withdrawal, publishing on Dec 30, is for 101,021.71 acres in SW Oregon around the Salmon River. The second is for approximately 340,079 acres of Forest System lands located in the Methow Valley, WA. Lastly, BLM UT will conduct the first coal sale of 2017 on January 4. The Competitive Coal Lease Sale is for a tract of Federal coal in Sanpete and Sevier Counties, Utah.

Week Ahead Announcements- Presidential and Department/Agency Priorities – Dec 17, 2016 - Jan 6, 2017

Week of December 17: The final rule for Onshore Order 1 is expected to publish. The final rule will require the agency to adopt the online filing of Applications for Permit to Drill (APD) as the default method of filing, moving away from old-fashioned paper applications.

On or before December 17: The publication of the final Competitive Solar and Wind rule is expected.

Week of December 19: An ASLM decision on the BLM Decision Record for the BLM-WY Chokecherry-Sierra Madre Wind Project is anticipated.

Week of December 19: The BLM-UT Price Field Office will release the San Rafael Desert Master Leasing Plan preliminary alternatives for public comment. This MLP focuses on approximately 525,000 acres of public lands in Emery and Wayne counties in Utah and could amend resource management plans for the Price and Richfield Offices.

Week of December 19: The BLM-UT Moab FO public comment period begins for the Tidewater EA, which analyzes a proposal to issue three Applications for Permit to Drill. The three wells are located in Grand County, Utah.

December 20: The new BLM-CA Ukiah Field Manager will meet with Congressman Mike Thompson (CA-05-D) for a meet and greet.

December 21 (TBD): BLM-UT plans to release the ROD for the Beaver Dam/Red Cliffs NCAs and St. George ROD. The Notice of Availability (NOA) was published in the Federal Register on September 2, 2016, initiating a 30-day protest period. The ROD for the Red Cliffs NCA has a court-ordered completion date of December 31, 2016.

December 22: The public comment period ends for the BLM-ESO Draft EIS for the Mountain Valley Project and Equitrans Expansion Project, a pipeline that would run through Virginia and West Virginia. The Federal Energy Regulatory Commission is the lead agency for developing the Draft EIS.

Before December 31: The Final Colorado Solar Regional Mitigation Strategy (SRMS) release is expected. The SRMS is designed to improve the mitigation process, account for potential impacts in the landscape context and facilitate solar energy development in Solar Energy Zones. The strategy will use the information, maps and tools provided by the Landscape Assessment.

Late December: The BLM-UT Monticello Field Office plans to issue a decision on the proposed Indian Creek ATV route.

Late December or early January: The BLM-UT Moab FO will release for public comment an EA for the Needles and Anticline Overlook (Canyon Rims) Road Improvement Project.

Late December: Four IMs addressing issues other than the Coal PEIS noted in the SO (transparency, processing leasing actions under the leasing pause, waste mine methane, and surface owner consent) are expected to publish.

December 30: The BLM plans to release the draft EIS for the Sagebrush Focal Area Mineral Withdrawal. As part of ROD implementation, the BLM and the U.S. Forest Service are recommending the withdrawal of lands within Sagebrush Focal Areas from locations with mining claims, subject to valid existing rights. As part of the withdrawal process the lands covered by the proposal have been temporarily segregated for a period of up to two years. During this period, the agencies are undertaking environmental and other analyses to determine if the lands should be formally withdrawn to protect sage-grouse habitat from adverse effects of future locatable exploration and mining.

Early January: The BLM expects to release a Coal PEIS scoping report. The report will describe the process, summarize issues raised by commenters, and discuss alternatives that may be evaluated in the Coal PEIS.

December 30: A Notice of Proposed Withdrawal will be published in the *Federal Register* that will begin a 2-year segregation period for the withdrawal of approximately 340,079 acres of Forest System lands located in the Methow Valley, WA. The proposed withdrawal would close USFS managed lands for 20 years. The purpose of the proposed withdrawal is to aid legislation introduced in Senate Bill 2991, known as the Methow Headwaters Protection Act of 2016.

January 2: The BLM and U.S. Forest Service have filed an application requesting to withdraw 101,021.71 acres in SW Oregon around the Salmon River (5,216.18 of BLM Revested O&C lands and 95,805.53 of National Forest System Lands). The comment period on the proposed 20-year withdrawal

closes on December 29th at which point the Secretary would be able to make a decision on the application. Because the withdrawal is in part to support pending legislation, a decision on the PLO needs to be made before the end of the current Congress, which is December 30, 2016.

January 4: BLM-UT will conduct a Competitive Coal Lease Sale for a tract of Federal coal in Sanpete and Sevier Counties, Utah. The Federal coal tract, known as the Greens Hollow Tract, is located in the Wasatch Plateau Known Recoverable Coal Resource Area. The 6,175-acre tract contains approximately 55.7 million tons of recoverable coal adjacent to and northwest of the existing SUFCO Mine, which is operated by Canyon Fuels, LLC, a subsidiary of Bowie Resource Partners, LLC.

January 5-8: The Western Association of Fish and Wildlife Agencies' 2017 Mid-Winter meeting will be held at the Wigwam in Litchfield Park, AZ. The agenda is available at: http://www.wafwa.org/events/2017_mid-winter_meeting/program/ and includes the Sage Grouse Executive Oversight Committee Meeting on Friday morning, January 6. The BLM will send a small delegation.

January 6: BLM-CO plans to release the FRN for the Dominguez-Escalante ROD on January 6, 2016. The PRMP/FEIS NOA was published in the Federal Register on Thursday, June 30, 2016, initiating the protest period, which closed on Monday, August 1, 2016. Seven protests were received and are currently being evaluated.

Media

Trans Alaska Pipeline inquiry: In response to the media coverage of the protests regarding the Dakota Access Pipeline, Dan Springer, the Seattle-based correspondent for *Fox News*, called the BLM-AK Branch of Pipeline Monitoring on December 2 asking whether any spills from the TAPS had impacted drinking water. Springer was directed to contact the Alaska Department of Environmental Conservation and Alyeska Pipeline Service Company. The tone of the story is expected to be neutral and the air date is unknown.

Alaska Public Media inquiry on Planning 2.0, Regional Mitigation Strategy, and Legacy Well program: On December 2, BLM-AK staff was interviewed by Alaska Public Media Energy Desk reporter Elizabeth Harball regarding three subjects that will result in three separate stories. Stacie McIntosh, Arctic Office Manager; Serena Sweet, Planning and NEPA lead for BLM Alaska; and Lesli Ellis-Wouters, Communications Chief participated. For the first story, focusing on the release of Planning 2.0, Sweet discussed three areas of change – more public involvement, adaptive management and landscape level planning. McIntosh provided a status on the Regional Mitigation Strategy for the Northeast NPR-A and a request for public comment by Dec. 29. The last story was an update on the Legacy Well program and clarification on work done last summer. The tone of the stories was positive and the stories are expected to be neutral. The air date is unknown.

Moab Times Independent query on Flaring: Reporter Rose Egelhoff requested general background on the impacts of the new flaring regulations and the expected ruling from the state on Wesco's operations in the Big Flat area. UT PA explained that both the state and the BLM have flaring rules, that they coordinate closely with each other and oil and gas operators in the area to ensure they are meeting federal and state requirements. They also noted that Wesco purchased Fidelity's holdings in the Big Flat area and currently flare and that reducing flaring was one of the key reasons for approving the Dead Horse Lateral Pipeline, as well as more responsible use of gas resources by providing a mechanism to get the gas to market. Rose has also requested to speak with a petroleum engineer on background to discuss flaring and venting and the BLM's role in regulating them for local operators. UT PA is arranging a backgrounder with Eric Jones, a petroleum engineer that can explain technical information in laymen's terms.

Deseret News Query on Planning 2.0: Reporter Amy Joi O'Donoghue requested comment on Utah and county leader concerns that under the final rule the importance of state and local government opinion is diminished. They are concerned that such a "landscape" scale approach to land use planning that does not have to adhere to district boundaries necessarily "subsumes" that voice. UT PA is working this request.

NPR Fresno request for interview on Temperance Flat Dam: Reporter Ezra David Romero requested to speak with the Bakersfield Field Manager regarding the possible impacts of a proposed Temperance Flat Dam. The BLM manages the San Joaquin River Gorge about 35 miles east of Fresno. The stretch of the river managed by the BLM, about 10 miles that includes hiking trails, campgrounds and a visitor center, would be inundated if the dam were built. The analysis in the 2015 Bakersfield Resource Management Plan found the portion of the river managed by the BLM qualifies for Wild and Scenic status. The reporter plans to also interview BOR, landowners and visit the Millerton Caves (BLM). CA PA is working this request.

HBO-Vice News request for interview on Western Monuments: Producer Alyse Shoreland is working on a story about the designation of western lands as monuments by the President. She is focusing on the Cascade-Siskiyou expansion and Owyhee Canyonlands in OR, and Gold Butte, NV, and is requesting interviews with officials on the ground who can speak about the lands and monument status if/when a designation is made. WO PA is on standby until if/when a designation is made.

30-60 Day Look Ahead

Early January: The BLM expects to release a Coal PEIS scoping report. The report will describe the process, summarize issues raised by commenters, and discuss alternatives that may be evaluated in the Coal PEIS.

No later than January 20: The BLM plans to publish the Oil Shale Rule. When finalized, the proposed rule would clarify specific provisions of oil shale royalty regulations, ensure that the royalty rate provides a fair return to the American taxpayer while encouraging the development of Federal oil shale resources, and include adequate measures to protect the environment.

January: BLM-AK Eastern Interior (EI) RODs/Approved RMPs: The Director's Response Letter to the Governor's Appeal has been approved by the Director's Office. The protest resolution report is complete and being finalized for publication/posting on the BLM website on or a day or two prior the ROD signature date.

January: BLM-NV plans to issue the final Dixie Meadows Geothermal Project EA and FONSI. The project area consists of approximately 22,021 acres of public land. The proponent (Ormat) is seeking approval to drill temperature gradient wells, and to drill and test observation wells and production wells at up to 20 specific locations.

January: The BLM-CA Arcata and Redding field offices published a Notice of Intent to begin public scoping for the development of a new RMP for public lands overseen by both offices on November 7. A series of seven public meetings will be held across the region in January and public comments will be accepted until the completion of the meetings.

January: BLM-CA plans to release for public comment the draft RMP Amendment and draft EIS that will address oil and gas leasing and development on 793,000 acres of federal mineral estate administered by the Central Coast Field Office. The amendment is in response to public concerns about oil and gas leasing and development, in particular hydraulic fracturing and related well stimulation techniques.

January 9: The BLM-ID Challis Field Office will begin bait trapping wild horses within the Challis HMA and treat mares with the fertility control PZP-22. The process is expected to be completed by March 14, 2017.

January 12: The BLM plans to release its final mitigation manual and handbook that will help the agency carry out consistent, effective, and transparent mitigation to address impacts to resources from public land uses.

January 13: BLM-ESO will transfer approximately 60,000 acres of land to the Red Lake Band of Chippewa Indians. The lands were ceded to the United States in the late 1800's and early 1900's, and originally identified for restoration in a 1945 Secretarial Order.

January 15-17: The North American Intergovernmental Committee on Cooperation for Wilderness and Protected Areas (NAWPA) will hold their annual agency heads meeting in Whitehorse, Yukon Territory.

January 17 and 24: The Nevada Cattlemen's Association, Nevada Department of Agriculture, USFS, Nevada Department of Wildlife and the BLM will host a series of Livestock Grazing Permittee workshops throughout Nevada. At these workshops, the BLM will present how the BLM's Greater Sage-Grouse Plan Amendment's objectives will affect the livestock grazing program in Nevada and address questions.

Mid-January: BLM-ID plans to sign the Gateway West Transmission ROD. The BLM published the FSEIS for the final two sections on October 7, 2016. The protest period will end November 7, 2016. The protest resolution and Governor's Consistency Review is scheduled to be completed January 13, allowing for publication of the ROD prior to January 20. The preferred routes avoid to the greatest extent possible private land, Greater Sage-Grouse habitat and the Morley Nelson Snake River Birds of Prey NCA.

Mid-January: BLM is attempting to accelerate the signing of the Boardman to Hemingway ROD. Oregon Plan amendments are being handled concurrently and that decision will be issued simultaneously with the ROD for the EIS and Approval to issue a grant.

January 29-Feb: The Society for Rangeland Management Annual Meeting will be held in St. George, UT. BLM employees from various offices are planning to attend.

January 30: The BLM and Forest Service will announce the annual adjusted grazing fee for public lands.

Early FY2017: The finalized implementation plan for Wilderness 2020 Vision is expected to be issued.

February 7-8: The Wildlife and Hunting Heritage Conservation Council meeting will be held at the DOI MIB.

February 25-March 1: The National Association of Counties Legislative Conference will be held in Washington, D.C.

March 4-11: the North American Wildlife and Natural Resources Conference will be held in Spokane, Washington. BLM staff will attend.

IV. Major Federal Register Notices and Approval Packages:

Title	Current Status
Notice of Proposed Withdrawal Extension and Opportunity for Public Meeting; Miller Lake Recreational Area, Oregon.	Will publish in the Federal Register on 12/16/16. (DTS 1289).
Notice of Availability of the Record of Decision for the TransWest Express Transmission Project in Wyoming, Colorado, Utah and Nevada	Will publish in the Federal Register on 12/16/16. (DTS 1319)
Notice of Availability of the Record of Decision for the Energy Gateway South Transmission Project and Approved Land-use Plan Amendments	Will publish in the Federal Register on 12/16/16. (DTS 1331)

V. Congressional Activities:

Congressional Meetings

Rep. Stewart / Wild Horse & Burro: On December 20, Kristin Bail, Assistant Director for Resources and Planning; Dean Bolstad, Division Chief, Wild Horse and Burro Program; and Linda Smith, BLM Budget Officer plan to meet with staff of Rep. Stewart (R-UT-2) at their request to discuss the BLM's Wild Horse and Burro program.

Congressional Visits in the Field

Courtesy Visits / Rep. Thompson (D-CA-5): On Dec. 20, BLM Ukiah California Field Manager, Amanda James plans to conduct a courtesy visit with Rep. Thompson (D-CA-5).

WH&B Corral Visit / Sen. Risch's Staff (R-ID): On Jan 4, staff from Senator Risch's office will tour the BLM's Boise Idaho corral and meet with BLM ID wild horse and burro program staff.

State Legislature Hearings / Meetings

Wyoming State Legislature / Forestry: The BLM in Wyoming has a received a request from the Wyoming State Legislature's Joint Agriculture Committee to provide an update on BLM forestry activities on Jan. 17 in Cheyenne. Details TBD.

VI. Pending Packages in ASLM:

Packages with ASLM 12/15/2016:

1. Surname – Sec Jewell Response to 2 Gov. Sandoval letters, Proposed Mineral Withdrawal in Sagebrush Focal Area (BLM0007183)
2. Signature – Response to Letter Re: Appeal of the BLM's decision to declare Lia Shapiro's mine claim Abandoned (LM00000009)
3. Surname - Bureau of Land Management's Implementation of Secretarial Order 3339 Report Fiscal Year 2016 BLM0009086
4. Surname - Draft Administrative Proposal - BLM Concession Authority BLM0009092

5. Surname – Letter from Senators Udall & Heinrich about Upper Rio Grande Watershed wildlife corridors BLM0008739
6. Request to Close Recommendation 9 in the Office of Inspector General's report entitled, Bureau of Land Management's Renewable Energy Program: A Critical Point in Renewable Energy Development (Report No. CR-EV-BLM-0004-2010) (BLM0008379)
7. Surname – 90 Day List (January - March) BLMR001344
8. Signature - Request to amend the application for the Greater Sage-Grouse withdrawal to add 400K acres in Nevada and the NOA for the DEIS. BLML000106
9. Surname – Farmington (NM) RAC
10. Surname – Albuquerque (NM) RAC
11. Surname – Southeast Oregon RAC
12. Surname – California Desert District RAC

Packages with BLM:

1. Surname/Signature – MOU between BLM and DOD on Wind Energy BLM0006219 **WO-301 Resolving AL Comments and preparing Hardcopy for Signature.**
2. Surname – SNPLMA Annual Report for FY 2014 & 2015. **NV has circulated a new version to 300/100 and Kelly is reviewing. Current goal is to get new hard copy to ASLM by Friday, 12/16 or Monday, 12/19**
3. Surname/Signature - Transfer of Jurisdiction of Public Lands to Chocolate Mountain Aerial Gunnery Range/CACA 056671 BLML000120 **WO-350 – Lands and Realty is addressing Kelleher comments on PLO, the ASLM Info Memo, and the Transmittal Memo**
4. Surname – 620 DM 1-7 Wildland Fire Program Policy BLM0009488 / ESO-00073486 – **Solicitor Review**

VI. Packages Going to ASLM Next Week:

1. Chokecherry and Sierra Madre Wind Energy Decision Package (BLM0009327)
2. Notice: Identifying Lands Subject to Secretarial Order of Restoration - Red Lake Band of the Chippewa Indians in Minnesota (BLM0009221)
3. Eastern Interior RMP/FEIS for Alaska (BLM0008731)
4. Request to Close Rec 1 OIL AND GAS RESOURCES: Actions Needed for Interior to Better Ensure a Fair Return (GAO-14-50)
5. Presumed to Conform List FRN (BLMR000766)

Subject: Cascade-Siskiyou: 1/13/2017 Undark Magazine article on Monument's biological diversity/connectivity
To: Dave Willis <sodamtn@mind.net>

Probably the best article so far to explain the two "meta-objects" of the Cascade-Siskiyou Monument area: biological diversity and connectivity. dw

<http://undark.org/article/obama-cascade-siskiyou-biodiversity-connectivity/>

Hi Jim,

in one of the DTS things you surnamed yesterday (cascade siskyou) you uploaded the wrong letter (forest products). Can you find and send to me the letter called: BLM0008197 Letter.docx

This is the one with your edits on cascade & I can get it uploaded to DTS.

thank

Karen

The Honorable John Stromberg
Mayor
City of Ashland
20 East Main Street
Ashland, Oregon 97520

Dear Mayor Stromberg:

Thank you for your letter dated June 29, 2016, regarding potential expansion of the Cascade-Siskiyou National Monument in Southwestern Oregon. I appreciate that you took the time to share your views and send a copy of the City of Ashland's resolution endorsing the expansion.

These lands contain resources cherished by Oregonians and Americans from across the country, and the Department of the Interior welcomes robust public discussion regarding conservation of this remarkable landscape. This Administration has demonstrated a commitment to working with the public and Members of Congress in making Federal land management decisions. We recognize the importance of a transparent process and value public and congressional input in considering protections for our natural, historic, and cultural treasures. We constantly strive to take into account the interests of a wide range of stakeholders to both protect America's public lands and provide for economic development in accordance with applicable laws and sound public policy.

Consistent with that commitment, I look forward to continuing to work with you and your colleagues as we seek balanced solutions for managing our public lands. Thank you again for your interest in the protection of the public lands.

Sincerely,

Sally Jewell

DOI in the News:

OBAMA TO DESIGNATE NATIONAL HISTORIC CIVIL RIGHTS AREA IN BIRMINGHAM. The [Birmingham \(AL\) News](#) (11/28, 157K) reports that President Obama will "sign a public proclamation in January designating portions of the Civil Rights District in downtown Birmingham as a national historic monument, according to informed sources." The article says that "the footprint of the historic area will include the A.G. Gaston Motel, the Birmingham Civil Rights Institute, 16th Street Baptist Church, Masonic Temple, Bethel Baptist Church, Kelly Ingram Park, and the 4th Avenue business district."

TEXAN WHITE IN RUNNING FOR INTERIOR POSITION. The [McClatchy](#) (11/28, 74K) reports that Kathleen Hartnett White, "a director of energy policy at a conservative Texas think-tank and a Donald Trump energy adviser during the campaign, met with the president-elect Monday afternoon." White serves as the director of the Armstrong Center for Energy and the Environment at the Texas Public Policy Foundation. Previously, she "led the Texas Commission on Environmental Quality, a state agency with the goal of 'clean air, clean water, and the safe management of waste.'"

Additional coverage was provided by the [Lexington \(KY\) Herald-Leader](#) (11/28, 306K), the [Miami \(FL\) Herald](#) (11/28, 856K), the [Olympian \(WA\)](#) (11/28, 74K), and the [Sacramento \(CA\) Bee](#) (11/28, Daugherty, 74K).

Alaskan Gillam Wants Interior Job. [Politico Pro](#) (11/28) reports that Robert B. Gillam, “Alaska’s richest man, is tossing his hat in the ring for Interior Secretary in President-elect Donald Trump’s administration, according to the Alaska Dispatch News.” Gillam said in a personal statement, “I am not looking to use this job as a means to an end or a place to go and trade for another. I am looking at this job as a place to end my career and to provide a return to all of those wonderful people who help me along my journey of life.”

Additional coverage was provided by [Politico Morning Energy](#) (11/28, 12K).

Additional Coverage. Additional coverage of the speculation over the Interior job was provided by the [Denver Westword](#) (11/28, 271K), the [Spokane \(WA\) Spokesman-Review](#) (11/28, 170K), the [Sonoran News \(AZ\)](#) (11/28, 437), the [Pacific Standard](#) (11/28, 14K), the [Huffington Post](#) (11/28, 237K), and [OpenSecrets](#) (11/28, 12K).

TRUMP MIGHT TRY TO REVOKE NATIONAL MONUMENT

DESIGNATIONS. The [Honolulu Civil Beat \(HI\)](#) (11/28, 41) reports that “with Republican Donald Trump’s surprise upset of Democrat Hillary Clinton, attention is turning to what Trump plans to do when he takes office in January and whether he will seek to undo or at least modify the national monuments that Obama created.” According to the article, “it’s mostly speculation at this point as to what Trump will do but groups on both sides of the issue are keeping a watchful eye on things.”

Additional Coverage: Backers Of Katahdin Woods And Waters National Monument Don’t Believe Trump Will Undo Designation. Additional coverage that the backers of the Katahdin Woods and Waters National Monument “don’t believe Donald Trump will undo president Obama’s designation” was provided by [WABI-TV](#) Bangor, ME (11/28, 3K).

Additional Coverage. Additional coverage of speculation over Trump’s public land policies was provided by [Outside](#) (11/28, 17.02M), the [Treehugger](#) (11/28, 61K), the [Ogden \(UT\) Standard-Examiner](#) (11/28, 100K), the [Bonner County \(ID\) Daily Bee](#) (11/28, 1K), the [Scientific American](#) (11/28, 1.88M), [The Hill](#) (11/28, Reicher, Contributor, 1.25M), the [Huffington Post](#) (11/29, 237K), the [Morning Consult](#), the [Orange County \(CA\) Register](#) (11/27, 690K), [Motherboard](#) (11/28, 10K), [Oil Price](#) (11/28, 8K), and [CleanTechnica](#) (11/28, 14K).

FEDERAL AGENCIES PUSH FINAL REGULATIONS BEFORE OBAMA

LEAVES OFFICE. [Politico Pro](#) (11/29) reports that the White House is “reviewing as many as 98 final regulations that could be implemented before Donald Trump takes office.” Among the actions are “final updated rules governing almost 1,700 oil and gas wells inside national wildlife refuges” and the BLM’s “major rule on leases for wind and solar projects on federal land.” Meanwhile, “a long-in-the-works Interior Department effort to update the so-

called stream protection rule,” has faced vociferous Republican opposition, so “fears of it being overturned through the Congressional Review Act may keep it from ever being released.”

Additional coverage was provided by the [Daily Caller](#) (11/28, Datoc, 898K), the [Christian Science Monitor](#) (11/27, 387K), and [Yahoo! News](#) (11/27, Porter, 387K).

GOP Lawmakers Fending Off Obama’s “Midnight” Energy Regulations. The [Washington Examiner](#) (11/28, Westwood, 400K) reports Republican in Congress are “in a race to fight off any last-minute attempts by Democrats to push through any more of President Obama’s climate priorities before he leaves office.” GOP lawmakers passed a bill recently “that would give them the power to target multiple regulations under the Congressional Review Act, which grants them the power to pass resolutions of disapproval through a simple majority in order to repeal regulations.” Sen. John Barrasso, the incoming chairman of the Environment and Public Works Committee, “vowed to make use of the review act to scuttle the Interior Department’s November final rule on controlling methane emissions from fracking,” while the oil industry has threatened to challenge the rule in court.

SUPREME COURT REQUESTS DOJ FILE BRIEF IN GOLD KING MINE LAWSUIT. [Morning Consult](#) (11/28) reports that “the U.S. Supreme Court requested Monday that the Department of Justice file a brief in the lawsuit between New Mexico and Colorado over the 2015 Gold King Mine accident.” The court “called on the U.S. solicitor general to weigh in on the case between the two states.” It has “not yet agreed to take the case” and “it’s unclear if the Obama administration or the incoming Trump administration will respond to the request for a brief.”

SECRETARY JEWELL TO SPEAK ON CLIMATE CHANGE FOR “EXIT INTERVIEW” SERIES. [Roll Call](#) (11/29, Gangitano, 63K) reports that “the Georgetown Institute of Politics and Public Service’s ‘Exit Interview’ series continues with a moderated conversation on climate change with Interior Secretary Sally Jewell and senior White House adviser Brian Deese. 6:30 p.m. at Georgetown’s Edward B. Bunn Intercultural Center auditorium (37th and O Streets Northwest).”

MEDIA ORGANIZATIONS WANT JURORS’ NAMES RELEASED IN MALHEUR STANDOFF CASE. The [AP](#) (11/28, 1.91M) reports that three media organizations, the Associated Press, Oregonian/OregonLive and Oregon Public Broadcasting, have “filed a motion asking a federal judge to unseal the identities of the jurors who acquitted all seven defendants involved in the armed occupation of a national wildlife refuge in rural southeastern Oregon.” According to the article, “the motion filed Monday in U.S. District Court in Portland seeks to modify a protective order that was in place during the trial of brother Ammon and Ryan Bundy and five others.” The motion says “there’s no longer a threat to jurors because the case is over.”

FEDERAL WORKERS FEAR TRUMP’S CALL TO “DRAIN THE

SWAMP” WILL IMPACT THEM. The [AP](#) (11/28) reports that while President-elect Trump’s allies say his call to “drain the swamp” in Washington “was directed at lobbyists, donors and political cronies,” there is fear among federal workers that “he means a broader group.” National Federation of Federal Employees President Bill Dougan “said that after the initial shock of Trump’s victory, many federal workers are adopting a wait-and-see attitude.” He “suspects federal workers’ fate will depend largely on whether Trump’s inner circle is populated by establishment Republicans...or wild cards like Newt Gingrich, who engineered a government shutdown as speaker of the House, and Steve Bannon, the Trump adviser Dougan says embodies an ethos to ‘do everything he can to blow things up.’”

ADDITIONAL COVERAGE: OBJECTS AND REMAINS FOUND IN SPIRIT CAVE RETURNED TO FALLON PAIUTE SHOSHONE INDIAN TRIBE. Additional coverage of the transfer of control of “human remains and funerary objects found in Spirit Cave, Nevada to the Fallon Paiute Shoshone Indian Tribe” was provided by the [Native American Times](#) (11/28, 337).

RELIGIOUS ARGUMENT MADE FOR EXPANSION OF CASCADE-SISKIYOU MONUMENT. In an op-ed for the [Oregonian](#) (11/28, 894K), Rt. Rev. Staccatto Powell and Rev. Dr. Walter John Boris make the religious argument for the expansion of the Cascade-Siskiyou National Monument. They argue that Christians must “restore a right relationship with God’s creation by swiftly taking conservation action.” They urge Sens. Jeff Merkley and Ron Wyden, and President Obama to act with urgency to “care for God’s creation with the reverence it merits, and expand the Cascade-Siskiyou National Monument this year.”

SUPPORT URGED FOR GRAND CANYON HERITAGE NATIONAL MONUMENT. In an op-ed for the [Arizona Daily Star](#) (11/28, 270K), Mel Sheldon Jr., chairman of the Tulalip Tribes, supports the creation of the Greater Grand Canyon Heritage National Monument. The proposal would “protect precious water resources, sacred sites and areas of cultural interest, traditional uses, and recognize tribal sovereignty, plus allow for continued hunting and cattle grazing.”

CITIZENS URGED TO BECOME INVOLVED IN PROTECTION OF PUBLIC LANDS. For “The Blog” of the [Huffington Post](#) (11/28, 237K), Audrey Peterman urges readers to visits “our treasures in the National Parks and public lands system.” According to Peterman, “with an incoming administration that has shown indifference to our environment, it will be vital for all citizens to become intimately involved in cherishing nature and particularly the lands and waters set aside for the enjoyment and benefit of this and future generations.” She writes, “As a member of the Next100 Coalition which is working assiduously to achieve this goal, I’m ecstatic to see how well citizen involvement is working.”

EDITORIAL: NATIONAL MONUMENTS SHOULDN’T HINGE ON DECISION OF ONE PERSON. In an editorial, the [Albuquerque \(NM\) Journal](#) (11/28, 234K) argues that national monuments shouldn’t depend on the actions of just one person. The paper says that the public deserves better than “one person

designating or declassifying a monument.”

America’s Great Outdoors:

National Park Service:

NPS ANNOUNCES 2017 FEE FREE DAYS. The [Mother Nature Network](#) (11/28, 68K) reports that “in 2017, there will be 10 days when you can enjoy a fee-free vacation to a national park.” The dates are Jan. 16: Martin Luther King Jr. Day; Feb. 20: Presidents Day; April 15-16 and April 22-23: National Park Week Weekends; Aug. 25: National Park Service Birthday; Sept. 30: National Public Lands Day; and Nov. 11-12: Veterans Day Weekend.

NATIONAL PARKS PROGRAM PROVIDES EDUCATIONAL OPPORTUNITY. [PBS NewsHour](#) (11/22, Cardoza, 255K) reports on a visit by students at Pennycook Elementary School in Oakland to the Muir Woods National Park. The report says that “the National Park Service’s educational programs serve approximately seven million children every year.” PBS explains that “rangers conduct teacher workshops, go on classroom visits, and, perhaps most importantly, create curriculum for these trips based on state standards.” According to Grace Lee, Executive Director, National Park Trust, “If we don’t engage young people of color right now with our parks, then, 100 years from now, we are very concerned that there won’t be the celebration of the 200th anniversary of the National Park Service.” NPS Director Jonathan Jarvis also said “the National Park Service is a contributor to American education, both for students, but for lifelong learning as well.”

BILL NYE HOSTING ONLINE FUNDRAISER FOR NATIONAL PARKS. [AdWeek](#) (11/28, 398K) reports that on Giving Tuesday this week, Bill Nye is “partnering with Mashable to host a ‘view-a-thon’ fundraiser on Facebook Live to raise awareness about the nation’s parks and why it’s important to visit and preserve them.” The event starts “at 7:15 p.m. Eastern Time and will last 30 minutes.” Proceeds go to the National Park Foundation. Nye said in an interview, “Millennials get their news from their phones, from their handheld devices. So if we can raise awareness of national parks through this media, we think it will be better for the national parks and for all human kind. Millennials are going to be running the show here in another 10 years or so, so this effort is just to engage people where they’re already engaged.”

WILDFIRE SPREADS IN THE SMOKIES. The [Charlotte \(NC\) Observer](#) (11/28, Miller, Washburn, 656K) reports that “a wildfire fed by strong gusts forced the closure of U.S. 441 on the North Carolina-Tennessee border Monday as the first significant rainfall in more than 50 days bore down on the drought-stricken mountains.” Great Smoky Mountains National Park officials “ordered the temporary closure of the road between Cherokee and Gatlinburg, Tenn., not far from Clingmans Dome, because of heavy smoke and the danger of falling trees from the fire, estimated at 500 acres and growing.”

Additional coverage was provided by [Reuters](#) (11/29), [CBS News](#) (11/28, 4.4M), [CNN](#) (11/28, Johnston, Grisham, 29.79M), [USA Today](#) (11/28, Dorman, Ahillen,

5.28M), the [Atlanta \(GA\) Journal-Constitution](#) (11/28, 1.41M), the [Chicago \(IL\) Tribune](#) (11/28, 2.54M), the [Johnson City \(TN\) Press](#) (11/28, 74K), the [Knoxville \(TN\) News Sentinel](#) (11/28, Dorman, Ahillen, 245K), [RT](#) (11/29, 213K), [WFMY-TV Greensboro \(NC\)](#) Greensboro, NC (11/29, 53K), [WLS-TV Chicago \(IL\)](#) Chicago (11/28, 346K), [WRC-TV Washington \(DC\)](#) Washington (11/28, 453K), [WREG-TV Memphis \(TN\)](#) Memphis, TN (11/28, 103K), [WTVF-TV Nashville \(TN\)](#) Nashville, TN (11/28, 134K), [WTVR-TV Richmond \(VA\)](#) Richmond, VA (11/28, 141K), [WUSA-TV Washington \(DC\)](#) Washington (11/28, 70K), [WJBF-TV](#) Augusta, GA (11/28, 28K) and [WKRN-TV](#) Nashville, TN (11/28, 57K).

NPS BEGINS RESTORATION OF C&O CANAL’S FIRST MILE. The [AP](#) (11/28, 1.91M) reports that the National Park Service is “beginning a restoration of the C&O Canal’s first mile in the Georgetown neighborhood of Washington, D.C.” The NPS “says in a statement that work began Monday on the \$10 million project to preserve the structure and bring back mule-drawn boat rides to the popular stretch of the Chesapeake and Ohio Canal National Historical Park.” According to the agency, “the first phase will take 18 months.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (11/28, 272K), the [Washington \(DC\) Post](#) (11/28, Press, 11.43M), [Georgetown \(DC\) Patch](#) (11/28, 1K), and [WTTG-TV Washington \(DC\)](#) Washington (11/28, 67K).

SEVEN NATIONAL PARKS PROMOTING DRUNKEN-DRIVING PREVENTION. The [AP](#) (11/28, Press, 11.43M) reports that the Chesapeake and Ohio Canal National Historical Park is “among seven national parks joining a campaign to prevent drunken driving.” The NPS and Mothers Against Drunk Driving say “C&O Canal visitors can pick up red ribbons through the end of the year, marking the 30th anniversary of the group’s designated-driver campaign.” The slogan of the campaign is, “Tie one on for safety.”

FORT PICKENS CLOSED DUE TO STORMS. The [Pensacola \(FL\) News Journal](#) (11/28, 158K) reports that “the National Weather service issued high wind and surf advisories for beaches in Escambia and Santa Rosa counties on Monday as an upper-level weather system began to move through the area.” Gulf Islands National Seashore “closed Fort Pickens on Monday afternoon in anticipation of intense wind and surf causing sand and water to cover the low-lying road.” The National Park service “ordered a mandatory evacuation of campers in the Fort Pickens and Perdido Key areas and said Fort Pickens road would remain closed to all incoming traffic and use until further notice.”

PARK MULLS CELLULAR SERVICE PROPOSALS AT MOUNT RAINIER. The [AP](#) (11/28, 1.91M) reports that “two cellphone carriers have applied for permits to install telecommunications equipment on the main visitor building at Mount Rainier National Park.” According to park officials, “Verizon Wireless and T-Mobile are proposing to co-locate antennas on the outside of Jackson Visitor Center, located at the Paradise area of the park.” Park spokeswoman Karen Thompson “says the antennas will be mounted below the roof of the building and behind a fiberglass panel that would match the exterior wood siding.”

RESERVATIONS WILL BE REQUIRED FOR HALEAKALA NATIONAL PARK SUNRISE VIEWERS. [KHON-TV](#) Honolulu (11/28, 54K) reports that “starting Feb. 1, 2017, anyone wanting to drive up to Haleakala National Park to see the sunrise will need to make a reservation ahead of time.” The NPS “says the reservation system will go live this Thursday, Dec. 1.” According to officials, “the change was implemented for safety concerns, and to protect natural and cultural resources.” Polly Angelakis, chief of interpretation and education at Haleakala National Park, said, “We’ve had lots of overcrowding at the summit. We’ve had safety concerns. We’ve had damage to endangered species and their habitats. All of these resources get damaged when people park in the wrong place or people wander off the designated trails.”

NEW SOUTHERN WEST VIRGINIA PARKS CHIEF NAMED. The [AP](#) (11/29) reports that Lizzie Watts has been “named superintendent overseeing three national parks in southern West Virginia.” The NPS “announced Watts’ selection Monday to oversee the New River Gorge National River, the Gauley River National Recreation Area and Bluestone National Scenic River.” Watts, who has “spent her 25-year career with the Park Service in five different regions,” currently serves as superintendent of the Andrew Johnson National Historic Site and Andrew Johnson National Cemetery.

NPS NAMES NEW MONOCACY BATTLEFIELD SUPERINTENDENT. The [AP](#) (11/28, 1.91M) reports that the National Park Service announced Monday that Chris Stubbs will be the new superintendent at the Monocacy National Battlefield. Stubbs is currently chief of resources management at the Chesapeake and Ohio Canal National Historical Park. Stubbs takes over from Rick Slade, “who was promoted in April to superintendent of Catoctin Mountain Park.”

Additional coverage was provided by the [San Francisco \(CA\) Chronicle](#) (11/28, 2.2M), the [Washington \(DC\) Post](#) (11/28, Press, 11.43M), the [Washington \(DC\) Times](#) (11/28, 272K), and [WJZ-TV Baltimore \(MD\)](#) Baltimore (11/28, 74K).

MISSING ARIZONA HIKER FOUND DEAD IN SEQUOIA NATIONAL PARK. The [AP](#) (11/28) reports that “authorities say the body of a missing hiker from Arizona has been found in central California’s Sequoia National Park.” According to the National Park Service, Vince Scalise, 41, “of Phoenix was found dead by searchers Monday near the junction of Panther Creek and the Middle Fork of the Kaweah River.”

CONTINUING COVERAGE OF NPS CENTENNIAL. Continuing coverage of the NPS Centennial was provided by the [Arizona Daily Sun](#) (11/26, 49K).

ADDITIONAL COVERAGE: NPS BACKS MUSIC ROW PRESERVATION. Additional coverage that the NPS is backing the preservation of Nashville’s Music Row was provided by [The Boot](#) (11/28, 36K).

NPS CENTENNIAL CELEBRATED. In an op-ed for the [Delaware State News](#) (11/27, 729), Dr. Samuel B. Hoff, a professor at Delaware State University, thanks the NPS “for a century of conservation, preservation, and promotion of America’s natural and cultural resources and wildlife.” Hoff acknowledges that

“there are challenges for the NPS as it embarks of the second century of service,” but he points out that “there are a number of successes for which the NPS should be commended.” He concludes that “there is every reason to be optimistic for the next hundred years.”

Fish and Wildlife Service:

FWS PROJECT ON SEN. LANKFORD’S “FEDERAL FUMBLES”

REPORT. The [Daily Mail](#) (11/28, Schwab, [Dailymail.com](#), 4.59M) reports that “for the second year in a row, the office of Sen. James Lankford, a Republican from Oklahoma, produced a report documenting the most egregious wastes of taxpayer dollars.” According to the article, “called, ‘Federal Fumbles: 100 ways the government dropped the ball,’ the 154-page” report “accounts for \$247 billion in ‘wasteful and inefficient’ federal spending.” Among the “the biggest offenders” highlighted in the reports is a sea duck census. The FWS “wanted to spend \$180,000 on a new way to tag sea ducks as the current method is ineffective and tagged ducks have a 20 to 70 percent higher change of mortality.”

GREAT LAKES PIPING PLOVERS HAVE BANNER YEAR. The [AP](#) (11/28, 1.91M) reports that “three decades after the Great Lakes piping plover was declared an endangered species, the small (and very cute) shorebirds had a banner year in 2016: a record number of plover chicks left their nests and the oldest known plover — at 15 years — was spotted this fall in its winter habitat in South Carolina.” Vince Cavalieri, a wildlife biologist and Great Lakes piping plover recovery coordinator for the U.S. Fish and Wildlife Service, said, “Clearly the more chicks we can produce, the better chance the birds have to build up their numbers. We’ve seen a drop-off in the adult population due to predation and the best way to counteract that is to make sure we’re producing even more chicks. That keeps the population going in the right direction.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (11/28, Dixon, 272K) and the [Charlottesville \(VA\) Daily Progress](#) (11/28, 157K).

THREE MEN PLEAD GUILTY TO TRAFFICKING EELS. The [Charleston \(SC\) Post and Courier](#) (11/28, Petersen, 300K) reports that “three men admitted Monday to illegally netting the tiny juvenile eels from the Cooper River and arranging their sale.” According to the article, “the haul was more than 400 pounds; the value was estimated at nearly \$740,000 by the U.S. attorney.” Harry E. Wertan Jr., Mark A. Weihe and Jay Warren James “pleaded guilty to selling or transporting elvers in interstate commerce.”

Additional coverage was provided by [WYFF-TV Greenville \(SC\)](#) Greenville, SC (11/28, 184K) and [WFMY-TV Greensboro \(NC\)](#) Greensboro, NC (11/28, 53K).

DELISTING OF GRIZZLY BEAR OPPOSED. In an op-ed for the [Missoulian \(MT\)](#) (11/28, 114K), Rick Bass, a board member of the Yaak Valley Forest Council, writes that “in Montana, Wyoming and Idaho there is a move to remove – ‘de-list’ – endangered species protection for grizzly bears in what’s called the Greater Yellowstone Ecosystem.” According to Bass, “de-listing is a terrible idea, motivated more by politics than science.” He claims that the U.S. Fish and

Wildlife Service is “seeking a splashy ‘mission accomplished’ victory by ‘saving’ an important endangered species.”

Bureau of Land Management:

DRAFT PLAN RELEASED FOR TWO CENTRAL IDAHO WILDERNESS AREAS. The [AP](#) (11/28, Ridler, Press, 1.91M) reports that “a draft management plan for two recently created central Idaho wilderness areas prohibits campfires at high elevations to protect whitebark pine and eliminates horses and other recreational stock in some areas to protect alpine soils.” The U.S. Bureau of Land Management and U.S. Forest Service “announced Monday the availability of the 67-page document intended to guide management of the 138-square-mile Hemingway-Boulders Wilderness and the 142-square-mile White Clouds Wilderness.” According to the agencies, “the goal is to manage the areas for recreation and other activities while preserving wilderness character.”

Additional coverage was provided by the [Tacoma \(WA\) News Tribune](#) (11/28, 215K), the [Washington \(DC\) Times](#) (11/28, Ridler, 272K), [KBOI-TV Boise \(ID\)](#) Boise, ID (11/28, 80K), and [KTVB-TV Boise \(ID\)](#) Boise, ID (11/28, 108K).

PROJECT PROPOSED TO REMOVE JUNIPER TREES IN IDAHO. The [AP](#) (11/27, 6K) reports that “federal officials are proposing one of the largest ever projects to remove juniper trees to protect habitat for imperiled sage grouse and might also benefit cattle ranchers.” The BLM “on Monday announced it’s taking public comments through Jan. 3 on the plan to eliminate the trees from 940 square miles in Owyhee County in southwest Idaho.”

Additional coverage was provided by [KLIX-AM](#) Twin Falls, ID (11/28, 492).

VISITOR CENTER AT LITTLE SAHARA RECREATION AREA CLOSED UNTIL FEBRUARY 2017. The [Deseret \(UT\) News](#) (11/28, 362K) reports that “the visitor center at the Bureau of Land Management’s Utah Little Sahara Recreation Area is closed through Feb. 19, 2017.”

US Geological Survey:

USGS, FWS TO STUDY GREATER SAGE-GROUSE IN GREAT BASIN NATIONAL PARK. [KXJZ-FM](#) Sacramento, CA (11/28, 7K) reports that “the federal government is planning to study 500,000 acres of the Great Basin National Park from southeastern Oregon across Nevada and into Utah.” The U.S. Geological Survey and the U.S. Fish and Wildlife Service are looking “to acquire more information that will help them preserve sagebrush and the bird that relies on it — the greater sage-grouse.” Steve Hanser, a sagebrush ecosystem specialist for the USGS, “says that much of the focus of the study will be on the removal of invasive species, like cheat grass.”

Securing America’s Energy Future:

Onshore Energy Development:

ARMY CORPS: “NO PLANS FOR FORCIBLE REMOVAL” OF DAKOTA ACCESS PROTESTERS. The [Los Angeles Times](#) (11/28, Yardley, 4.52M) reports Col. John Henderson, the commander of the US Army Corps of Engineers’ Omaha district, said Sunday that while the corps issued a notice on Friday called for the eviction of the protesters at the Dakota Access pipeline campsite, it has “no plans for forcible removal” and “is seeking a peaceful and orderly transition to a safer location.” He added, “Unfortunately, it is apparent that more dangerous groups have joined this protest and are provoking conflict in spite of the public pleas from tribal leaders. We are working to transition those engaged in peaceful protest from this area and enable law enforcement authorities to address violent or illegal acts as appropriate to protect public safety.”

Sioux Increasingly Frustrated With White Protesters At Campsite. The [Washington Times](#) (11/28, Richardson, 272K) reports the Standing Rock Sioux leading the protest to the Dakota Access pipeline are increasingly complaining “about outside activists trashing the camps, mooching off donations, and treating the anti-pipeline demonstration like a Burning Man-style festival for hippies.” In a recent interview with Vice, David Archambault II, the chairman of the tribe, “raised concerns about sanitation...saying activists are ‘digging pits out there for their human waste,’” which threatens to contaminate the Cannonball River, adding, “What’s going to happen when people leave? Who has to clean it up? Who has to refurbish it? It’s going to be us, the people who live here.”

Neil Young Urges Obama To End Violence At Standing Rock. The [Huffington Post](#) (11/28, Strachan, 237K) reports Neil Young and his girlfriend, actress Daryl Hannah, issued an open letter on Monday urging President Obama “to step in and end the violence against the peaceful water protectors at Standing Rock immediately.” Young added that he recently met with protesters who were “committed to peaceful resistance” and refused to allow weapons, alcohol, and drugs.

CHALLENGERS TO BLM METHANE RULE WANT COURT TO BLOCK REGULATION FROM TAKING EFFECT. [E&E Publishing](#) (11/28, Subscription Publication, 705) reports that “challengers of the Obama administration’s latest methane rule raised the stakes last week by asking a federal court to block the regulation from taking effect.” According to the article, “in a legal maneuver just before the Thanksgiving holiday, the Independent Petroleum Association of America and the Western Energy Alliance urged the U.S. District Court for the District of Wyoming to issue a preliminary injunction preventing the administration from enforcing the rule.” In the injunction request, the groups claim “that the Bureau of Land Management rule — which aims to slash methane emissions from venting and flaring at oil and gas operations on public and tribal lands — is costly, duplicative and beyond BLM’s authority.”

THREE ENERGY TRADE ASSOCIATIONS ALLOWED TO INTERVENE IN LEASING LAWSUIT. [Natural Gas Intelligence](#) (11/28, Subscription Publication) reports that “a federal judge said three energy trade associations will be allowed to intervene in a lawsuit filed last summer by two environmental groups over the Department of Interior’s (DOI) decision to approve nearly 400 oil and gas leases” in Colorado, Utah and Wyoming. According to the article, “the

three energy trade associations – the American Petroleum Institute (API), the Western Energy Alliance (WEA) and the Petroleum Association of Wyoming (PAW) – filed two separate motions to intervene in the case earlier this month.” The article says that “although the plaintiffs were not opposed to the trade associations intervening, they argued that their participation should be limited.” However, “in a ruling last Wednesday, U.S. District Court Judge Rudolph Contreras disagreed.”

COAL COUNTRY PUTS FAITH IN TRUMP DESPITE RESERVATIONS.

The [New York Times](#) (11/28, Stolberg, Subscription Publication, 13.9M) profiles Bo Copley, an unemployed mine maintenance planner who asked Hillary Clinton “how, having dismissed coal’s future in language that came back to haunt her, she could ‘come in here and tell us you’re going to be our friend.’” The Times describes the “paradox of the Bible Belt” which put faith in “a trash-talking, thrice-married Manhattan real estate mogul as a savior for coal country.” The Times reports “It is difficult for outsiders to fathom how deeply faith and work are intertwined here, or the economic and psychological depression that sets in when an entire region loses the only livelihood many of its people have ever known.”

ADDITIONAL COVERAGE OF CANCELLATION OF 25 OIL AND GAS LEASES IN WHITE RIVER NATIONAL FOREST.

Additional coverage of the cancellation of 25 oil and gas leases in the White River National Forest was provided by the [Denver Post](#) (11/27, 778K) and the [Glenwood Springs \(CO\) Post Independent](#) (11/28, 32K).

ADDITIONAL COVERAGE OF FINAL METHANE AND WASTE PREVENTION RULE.

Additional coverage of the final Methane and Waste Prevention Rule was provided by the [National Law Review](#) (11/28).

OP-ED: OIL’S PRICE LED TO CANCELLATION OF BADGER-TWO MEDICINE LEASES.

In a cynical piece for the [Moscow-Pullman \(ID\) Daily News](#) (11/29, 26K), Todd J. Broadman writes, “When I initially heard Interior Secretary Sally Jewell’s speech last week given to the Blackfoot tribe, in it there seemed a tinge of remorse; she was apologizing to Native Americans for a government that had misappropriated some of those amber waves and purple majesties.” He continues: “There is no shortage of heroes in this saga. Devon Energy received over \$200,000 as refund for their existing Badger-Two oil leases and walked away as gallant pilgrims doing right by their Indian brothers.” Broadman points to “oil at a market price of under \$50 a barrel” as the underlying reason for the decision.

Renewable Energy:

ENVIRONMENTAL IMPACTS OF THE BLOCK ISLAND WIND FARM BEING ASSESSED.

[Connecticut Public Radio](#) (11/28) reports that “fishermen and scientists are trying to understand how the Block Island Wind Farm may affect fish in Rhode Island waters.” According to the article, “several state and federal agencies and private firms are monitoring what impacts the Block Island Wind Farm may have on wildlife and marine habitats.” Notably, University of

Rhode Island professors “worked with the U.S. Bureau of Ocean Energy Management and other partners to measure the construction noise and vibrations.”

SOLAR, WIND FIRMS HOPE COURTING REPUBLICANS HELPS UNDER TRUMP. [Reuters](#) (11/28, Groom) reports that “wind and solar companies gave more money to Republicans than Democrats during the 2016 election cycle” for the first time, “part of a years-long effort to expand renewable energy’s appeal beyond liberal environmentalists.” The industry is hoping its strategy “will pay off in the form of Congressional support” as Donald Trump takes the White House in January. Recipients this year included 34 House Republicans and 19 Senate Republicans. “It is reassuring that we have those relationships already developed, and we have a really strong business case for the policies that have been implemented,” said Isaac Brown of 38 North Solutions.

Empowering Native American Communities:

INTERIOR EXTENDS LAND BUY BACK OFFERS TO BLACKFEET NATION LANDOWNERS. The [Nation Sun News](#) (11/28) reports that “landowners on the Blackfeet Nation are seeing more than \$273 million in offers as part of the Land Buy-Back Program for Tribal Nations.” The offers were sent “to nearly 7,000 landowners on the reservation in Montana.” Deputy Secretary Michael Connor Deputy Secretary Michael Connor said, “We are proud to work alongside the Blackfeet Nation to take these lasting and substantial steps toward fulfilling President Obama’s goal of strengthening and investing in tribal communities. We must continue our government-to-government collaboration to ensure that landowners have the information they need to take advantage of this historic opportunity.”

Additional coverage was provided by [KTVH-TV](#) Helena, MT (11/28, 279).

COLVILLE TRIBES TO DISTRIBUTE SETTLEMENT TO MEMBERS. The [Wenatchee \(WA\) World](#) (11/28, 60K) reports that the Confederated Tribes of the Colville Reservation will “distribute its portion of a \$940 million settlement with the U.S. Department of the Interior to members next Monday.” According to a news release from the Colville Business Council, “the Colville Tribes will receive \$13.4 million, and each enrolled member of the tribe is expected to receive \$1,410.”

NORTHERN ARAPAHO TRIBE ARGUES BIA ILLEGALLY IMPOSED COURT. [Law360](#) (11/28, 23K) reports that the Northern Arapaho Tribe “again urged a Montana federal court on Wednesday to prevent the Bureau of Indian Affairs from interfering with the operation of its tribal court, claiming that the agency has illegally substituted another court without the tribe’s consent amid the Arapahos’ conflict with the tribe that shares their reservation.”

JUDGE HOLDS BIA CAN’T BE SUED OVER \$65M FIRE FINE YET. [Law360](#) (11/28, 23K) reports that “a Washington county utility jumped the gun when it sued the Bureau of Indian Affairs over a \$65 million penalty demand stemming from a 2013 forest fire that destroyed trees on the Yakama Indian Reservation, a federal judge has ruled, saying the utility has to take its issues up

with the agency first.” U.S. District Judge Rosanna Malouf Peterson “dismissed the suit filed by Public Utility District No. 1 of Klickitat County, Washington, in an order dated Nov. 23.”

MAN PLEADS GUILTY TO ASSAULTING BIA OFFICER. The [Farmington \(NM\) Daily Times](#) (11/28, 44K) reports that “a Toadlena man pleaded guilty today in federal court to assaulting a federal officer near a mobile home in Shiprock, according to a U.S. Department of Justice press release.” Larry Lee Emerson Jr., “36, was arrested in August on allegations he assaulted a Bureau of Indian Affairs officer on July 6, the release states.” Emerson “faces a maximum penalty of 20 years in federal prison, the release states.”

LAWSUIT CHALLENGES WHO IS AN INDIAN ARTIST. In an analysis for the [Indian Country Today Media Network](#) (11/28, 33K) Steve Russell writes that the Pacific Legal Foundation has “filed a lawsuit to challenge an Oklahoma law, the American Indian Arts and Crafts Sales Act.” Russell says that “one claim is that the artist PLF represents, Peggy Fontenot, is denied her right to free speech under the First Amendment if Oklahoma says she cannot call her art ‘Indian.’” however, “this is not persuasive because it begs the question whether she is in fact an Indian artist” and “the First Amendment does not protect falsehoods in commercial speech.” Russell also suggests that “once it becomes a question of race, the Fourteenth Amendment equal protection clause—’reverse discrimination’—can do its work” and “then she will be able to claim her work is Indian.”

Office of Insular Affairs:

ASSISTANT SECRETARY KIA’AINA REFLECTS ON TRANSITION, CHANGE. The [Virgin Islands Daily News](#) (11/26, 333) reports that Esther Kia’aina, the outgoing assistant secretary of the Interior for Insular Areas, “says her office and the whole of the Interior Department ‘were preparing transition memos so that soon after the election, whatever the outcome, we would be able to brief the landing teams’ dispatched by the incoming administration.” Kia’aina said Interior Secretary Sally Jewell wants “to make sure there is a smooth transition.” Kia’aina added, “I have been deeply touched by the people, and the issues you are facing. It warms my heart that I was given an opportunity to serve the people of the Virgin Islands.”

REPORT SHOWS WHY MICRONESIANS MIGRATING TO HAWAII. The [Hawaii Free Press](#) (11/28) reports that “a new report by Neil Mellen, Grassroot Institute of Hawaii Scholar uncovers the reasons so many Micronesians choose to migrate to Hawaii.” Mellen “shows why politics in the Pacific has taken power away from Micronesians, and how Micronesians can get their power back.” The report also “details solutions at the federal and state level which would help return power to Micronesians in Hawaii.”

Tackling America’s Water Challenges:

ABERDEEN-SPRINGFIELD CANAL COMPANY INSTALLS PLASTIC LINER. The [Salem \(OR\) Capital Press](#) (11/28, 113K) reports that “the Aberdeen-

Springfield Canal Co. has installed a buried, plastic liner along a leaky, mile-long reach of its main canal in the Moreland area.” General Manager Steve Howser “said the project, completed Nov. 15, lies within the second leakiest reach of the main canal.” According to Howser, “the project cost \$420,000, but the company received a \$178,000 U.S. Bureau of Reclamation WaterSMART grant. “

Top National News:

WHITE HOUSE: CHANCES TRUMP WILL “TERMINATE” CUBAN DÉTENTE “RATHER REMOTE.” President-elect Trump yesterday took to [Twitter](#) to warn, “If Cuba is unwilling to make a better deal for the Cuban people, the Cuban/American people and the US as a whole, I will terminate deal.” The President-elect’s comment appeared to be a reference to the US-Cuba détente under President Obama. While the major networks covered the aftermath of Fidel Castro’s death for a combined 10 minutes, the Trump angle was mentioned only briefly on two newscasts: At the tail end of its report on Cuba, [NBC Nightly News](#) (11/28, story 4, 2:50, Holt, 16.61M) noted that “Trump tweeted that he may reverse the plan to open Cuba,” while the [CBS Evening News](#) (11/28, story 6, 1:40, O'Donnell, 11.17M) devoted the first sentence of a story on potential Trump personnel announcements to the Cuba tweet. Print and online reports, meanwhile, note that the White House yesterday cast strong doubt on the likelihood that Trump would be able to undo Obama’s actions toward Cuba – in what news analyses say would amount to a serious blow to his legacy.

Reports also describe Trump’s position as vague. The [Los Angeles Times](#) (11/28, Wilkinson, 4.52M), for example, says “it was not clear what Trump meant by a ‘better deal,’” and that “an email seeking clarification from his transition team was not answered.” [USA Today](#) (11/28, Jackson, 5.28M) says Trump “has not specified how he might roll back” Obama’s Cuba initiatives, and the [New York Times](#) (11/28, Davis, Subscription Publication, 13.9M) states Trump “gave no details.” [Foreign Policy](#) (11/28, Gramer, 359K), meanwhile, said Trump “took to the Twittersverse” only “to partially clarify his stance,” and the [Daily Intelligencer \(NY\)](#) (11/28, Levitz, 795K) remarked that “it appears that American diplomacy will no longer be conducted around negotiating tables but, rather, over Twitter (perhaps, to discuss especially sensitive matters, Raul Castro can slide into Trump’s DMs).”

At any rate, [Roll Call](#) (11/28, Bennett, 63K) reported, White House press secretary Josh Earnest yesterday “described the likelihood of Trump nixing the Obama administration’s deal with the Cuban government as ‘rather remote,’ also citing popular support at home for closer ties between the countries.” [Reuters](#) (11/28) notes that Earnest also said that “any move to unwind the normalizing relations between the United States and Cuba over the past two years ‘would deal a significant economic blow’ to Cuban citizens.” The [Miami Herald](#) (11/28, Mazzei, 856K), meanwhile, quotes Earnest as further indicating that “dismantling the policies of the last two years is ‘just not as simple as one tweet might make it seem.’” Earlier yesterday, Trump spokesman Jason Miller told reporters, “Clearly, Cuba is a very complex topic, and the president-elect is aware of the nuances and complexities regarding the challenges that the island and the Cuban people face. ... Our priorities are the release of political prisoners, return of

fugitives from American law, and also political and religious freedoms for all Cubans living in oppression.”

[The Hill](#) (11/28, Fabian, 1.25M) said that while “distancing the US from Cuba would fulfill a campaign pledge and satisfy many of Trump’s Republican supporters...it would be a major blow to Obama, whose administration worked for years to restore diplomatic relations with Cuba.” The [Daily Intelligencer \(NY\)](#) (11/28, Levitz, 795K) said that “before this weekend, one Obama legacy item that appeared (relatively) safe was his decision to open up diplomatic relations with Cuba,” a policy that “consistently garnered majority support in public-opinion polls. In fact, most Americans think Obama hasn’t gone far enough.”

However, [NPR](#) (11/28, Kelemen, 1.92M) said that while “supporters of the Obama...policy were hoping that by now, they would have enough broad-based support” for their approach, John Kavulich of the US-Cuba Trade and Economic Council “says Cuba hasn’t made that easy.” Said Kavulich, “This is a two-way relationship. ... The Cuban government has not done what it could have done to provide that landscape. ... The Obama administration allowed US companies to directly export to 200 categories of independent businesses in Cuba. ... The Cuban government has not permitted that to happen...and there are companies that want to have offices in Cuba and the Cuban government has not allowed that to happen.” The [Los Angeles Times](#) (11/28, Wilkinson, 4.52M) reports Raul Castro “has not enacted significant political reforms, and the death Friday of his brother...is not likely to usher in quick change.” The Times adds that “previously...Trump has spoken of the release of political prisoners and more open space for free expression of opinions and dissent,” which are “the same elements the Obama administration has been demanding...while choosing not to delay economic progress while awaiting political change.”

The [New York Times](#) (11/28, Davis, Subscription Publication, 13.9M) reports that Trump “has already installed Maurico Claver-Carone, a Cuban-American who has been a harsh critic of Mr. Obama’s opening, on his transition team for the Treasury Department, which has issued several rounds of regulations to remove impediments for United States companies and individuals seeking to do business with Cuba and travel there.” The Times adds Trump “could...order the State Department to review its decision last year to remove Cuba from the list of state sponsors of terrorism, or suspend diplomatic relations that were resumed last summer.” However, “unraveling the complex set of regulations that tore down obstacles to trade and commerce with Cuba could take longer and be more challenging.”

[Reuters](#) (11/28) says the Cuban government “has stayed mostly quiet on Trump, waiting to see whether the president-elect converts his harsh rhetoric into a real policy change.” Noting yesterday’s tweet, the [Havana Times](#) (11/28, Thureau) reported that Trump had gone “from supporting Obama’s approach at the beginning of his campaign to threatening to reverse it in the run-up to the election.” To the Cuban outlet, Trump is acting under pressure from “anti-Castro sectors in Miami, which contributed to his victory in Florida.” [Bloomberg Politics](#) (11/28, Talev, 201K), however, points out that Trump has “for months...said he could reverse Obama’s actions if the Caribbean nation doesn’t allow more

political and religious freedoms.” To the [New York Daily News](#) (11/28, Joseph, 4.45M), likewise, Trump’s tweet was just his team’s “latest hardline stance towards the island nation.”

Writing in the [Washington Post](#) (11/28, 11.43M), Eugene Robinson argues that with Fidel’s death, “the oppressive system he installed in Cuba can wither and die, too – unless...Trump reverts to Cold War policies and gives Cuba’s failing dictatorship new life.” To Robinson, “if Trump goes back to a posture of implacable US hostility, he will disappoint and discourage millions of Cubans while strengthening the hand of only one: Raúl Castro, who will be all too happy to play David to Trump’s Goliath.”

US-Cuba Flights Resume For First Time In More Than 50 years. While the Cuban people “are lining up to pay their respects,” [ABC World News Tonight](#) (11/28, story 11, 2:00, Muir, 14.63M) reports that many Cubans are also “looking to the future.” ABC said the thaw in relations with the US has already begun, with “the first commercial flight from Havana to Miami in decades” boarding Monday morning. The [CBS Evening News](#) (11/28, story 4, 0:20, Rose, 11.17M) also reported commercial flights from New York to Havana have begun for “the first time in more than half a century.” According to [Fox News’ Special Report](#) (11/28, 1.53M), passengers “erupted into applause when the inaugural flight landed” in Havana. [USA Today](#) (11/28, Gomez, 5.28M) calls the flights’ timing an “eerie coincidence,” noting they came “in time for the first day of formal mourning for the man responsible who played a major role” in their suspension. The [AP](#) (11/28), among other news outlets, also reports the story.

Following Criticism, Earnest Says There’s “No Whitewashing” Castro’s Rights Record. [USA Today](#) (11/28, Korte, 5.28M) reports the White House “condemned...Castro’s human rights record on Monday.” Earnest used “language was markedly stronger than the value-neutral statement...Obama issued after Castro’s death last week, which said only that ‘history will record and judge the enormous impact of this singular figure on the people and world around him.’” On [Fox News’ Special Report](#) (11/28, 1.53M), correspondent Kevin Corke, after saying that Obama’s statement on Castro’s death was met with criticism, noted that Earnest responded on Monday by saying, “To issue some sort of blistering statement and engage in the kind of mutual recriminations that are tied to the past – that doesn’t advance freedom or democracy on the island nation of Cuba.” However, as the [Washington Times](#) (11/28, Boyer, 272K) reports, the White House press secretary also said that “there certainly is no whitewashing the kinds of activities that” Castro “ordered and that his government presided over that go against the very values that our country has long defended.”

[Politico](#) (11/28, Nelson, 2.46M) reports that “Republican members of Congress from Florida panned...Obama’s response to” Fidel’s death, “attacking it as an inadequate response to the demise of a dictator who victimized so many of their constituents.” Rep. Carlos Cubelo told MSNBC’s “Morning Joe,” “Look, it’s just a reflection of the way he views the world. It’s a very lukewarm approach. It’s why so many people in this country are frustrated and voted for a change candidate in this last election because they see and listen to politicians like the president in this case who are unwilling to state a simple truth that Fidel Castro

was a dictator, a murderer, an enemy of the United States.”

Cohen: Foreign Policy “Obama Doctrine” Is “A Shrug Of The Shoulders.”

Under the headline “What’s The Obama Doctrine? A Shrug Of The Shoulders,” Richard Cohen writes in the [Washington Post](#) (11/28, 11.43M), “We finally have an Obama Doctrine. It is the 223 words of the White House statement on the death of Fidel,” which is “blank of moral judgment, empty of indignation, blind to injustice, dismissive of history and indifferent to injury. A dictator has died, and Barack Obama sent him off with lazy weasel words: ‘History will record and judge the enormous impact of this singular figure on the people and world around him.’” To Cohen, “history will also record Obama’s failure to condemn,” because “in not recognizing why that relationship has been so bad in the past – in not even acknowledging the vast crimes of Fidel Castro – Obama let the Cuban people know that the future can be just as bad. It’s the Obama Doctrine in a nutshell: Do what you want.”

[Roll Call](#) (11/28, Flom, 63K) reported Trump and Obama “struck different tones on Saturday after Castro’s passing,” and that “Obama’s statement stressed progress and looked toward the future.” [Breitbart](#) (11/28, Spiering, 2.02M) similarly indicated that “Trump reacted to the death of Fidel Castro by calling him a ‘brutal dictator,’ while Obama’s statement was more diplomatic and offered ‘condolences’ to the Castro family.”

White House Says Obama And Biden Won’t Attend Funeral, But Doesn’t Rule Out Kerry Going.

The [CBS Evening News](#) (11/28, story 5, 1:50, Rose, 11.17M) reported last night that the White House announced neither President Obama nor Vice President Biden will attend Castro’s funeral. [Politico](#) (11/28, Nelson, 2.46M) indicated, however, that Earnest “pointedly refused to rule out that Secretary of State John Kerry would attend, but would not confirm his attendance, either.” Said Earnest, “I don’t want to lead you to conclude that the secretary of state is considering attending. ... What I want to lead you to conclude is that we’ll have an announcement as soon as we can get one out about a delegation, if there is one.”

[The Hill](#) (11/28, Fabian, 1.25M) noted that “top Republicans have urged Obama not to attend the ceremony for Castro,” and former House Speaker Newt Gingrich “tweeted Saturday that Obama, Biden and Secretary of State John Kerry should ‘under no circumstance’ go to Cuba for Castro’s funeral.”

Trudeau, Putin Won’t Attend Funeral Either. [AFP](#) (11/28) reports Canada’s Justin Trudeau “will not attend...Castro’s funeral...after he was rebuked for calling the late Cuban strongman and family friend a ‘remarkable leader.’” Instead, “Governor General David Johnston will represent Canada.” [Fox News’ Special Report](#) (11/28, 1.53M), meanwhile, said “it’s not clear if European leaders will come,” and even Vladimir Putin, president of “Cuba’s close ally” Russia, said he is too busy to attend.

Cubans Mourn Fidel In Havana; Exiles Ready Pro-Democracy March In Miami.

The [CBS Evening News](#) (11/28, story 3, 2:15, O’Donnell, 11.17M) reported “hundreds of thousands of people” lined up Monday in Havana’s Revolutionary Square to pay their final respects to “the man who ruled this

country for nearly 50 years.” [NBC Nightly News](#) (11/28, story 4, 2:50, Holt, 16.61M) reported people waited in lines that went “as far as you can see” to “sign a pledge of loyalty to the ideals of...Castro.” [AFP](#) (11/28) recounted that “in hundreds of schools, hospitals and public buildings, Cubans signed a ‘solemn oath’ on Monday to defend the revolution,” a fact also noted in the [AP](#) (11/28, Weissenstein, Orsi) dispatch. The [Washington Post](#) (11/28, Miroff, 11.43M) reports that “if Cubans’ true feelings and emotions about the man who ruled this country for 49 years are complex and conflicted, this was not the place to express them,” and “the public response to his death on Friday night at age 90 has been one of emotional uniformity, at least at the surface.”

That stands “in contrast to the scene in Miami’s Little Havana,” according to [CBS Evening News](#) (11/28, story 5, 1:50, Rose, 11.17M), where Cuban exiles are “planning what’s being called massive pro-democracy rally” on Wednesday.

[Reuters](#) (11/28, Acosta, Martinez) notes Castro “was cremated on Saturday and his ashes will be carried in a cortege to a final resting place in Santiago de Cuba, the city in eastern Cuba where he launched the revolution.”

Sierra Club President Says Castro Has “More Honor” Than Trump. The [Washington Times](#) (11/28, Richardson, 272K) reports that Sierra Club President Aaron Mair “marked the Friday death of Fidel...by declaring that the Cuban dictator had ‘more honor’ than...Trump.” In “a Saturday post on Twitter, which has since been removed,” Mair “pushed back after the real-estate mogul hailed the death of the Communist strongman by tweeting, ‘Fidel Castro is dead!’” Tweeted Mair, “He fought for his country! Still more honor than TRUMP!” The [Daily Caller](#) (11/28, 898K) also reported the story.

Trump’s Stance May Face Opposition From GOP Senators. The [AP](#) (11/28, Lardner) reports Sen. Jeff Flake, “a frequent critic of Trump during the presidential campaign, cautioned in a statement against returning to a ‘get tough’ policy that isolates Havana and restricts travel and business activities,” arguing that “such an approach...will hurt the Cuban people and make the US government ‘a convenient scapegoat for failed socialist policies.’” Another Republican, Sen. John Boozman, “has pushed for expanded trade with Cuba and in June backed an amendment to a government spending bill that would lift the ban on private banks and companies offering credit for the export of agricultural commodities to Cuba.” Sen. Jerry Moran, meanwhile, “has argued for easing US restrictions that prohibit American farmers and ranchers from selling their products to Cuba,” though his “office did not immediately respond to a request for comment on Trump’s tweet.”

WPost Urges Trump To Link Good Relations, Human Rights In The Cases Of Egypt, Turkey, Russia. In an editorial, the [Washington Post](#) (11/28, 11.43M) writes that “it’s refreshing to see the incoming president link good relations with the United States to progress on human rights.” However, “it would be perverse to apply that precept only to Cuba,” as Trump “has appeared willing, even eager, to excuse repression by other autocratic regimes, including in Egypt, Turkey and Russia. Cubans are not the only people who deserve US solidarity with their struggles for basic rights.”

OHIO STATE RAMPAGE BEING INVESTIGATED AS POSSIBLE TERRORIST ATTACK. Monday's attack at Ohio State University led all three network news broadcasts Monday evening and receives heavy print and online coverage this morning. The coverage almost universally indicates the incident is being investigated as a possible act of terror. Most reports say that 18-year-old suspect Abdul Razak Ali Artan recently complained about the portrayal of Muslims in the US.

[NBC Nightly News](#) (11/28, story 2, 1:30, Holt, 16.61M) said Artan, who "was a lawful, permanent US resident," appeared to have posted a "rant" on Facebook in which he reportedly said attacks on Muslims around the world "led to a boiling point. I can't take it anymore." According to the [CBS Evening News](#) (11/28, story 2, 1:40, O'Donnell, 11.17M), Artan also "complained about what he believed was the media's negative portrayal of Muslims" to the school newspaper on his first day on campus in August. He was a new student at the school, having come to the US in 2014 "after fleeing Somalia and spending seven years in a refugee camp in Pakistan."

The [CBS Evening News](#) (11/28, lead story, 2:35, O'Donnell, 11.17M) reported that the incident "is being investigated as an act of terror," as did the website of Columbus, Ohio television station [WLWT-TV Cincinnati](#) (11/28, 161K). Meanwhile, [Fox News' Special Report](#) (11/28, 1.53M) quoted House Intelligence Committee Ranking Member Adam Schiff as saying the attack "bears all of the hallmarks of a terror attack carried out by someone who may have been self-radicalized." On its website, [ABC News](#) (11/28, 3.09M) quoted Schiff as saying, "Here in the United States, our most immediate threat still comes from lone attackers that are not only capable of unleashing great harm, but are also extremely difficult, and in some cases, virtually impossible to identify or interdict." The [AP](#) (11/29) also highlighted Schiff's comments.

Terrorism expert Paul Cruickshank said on [CNN's Situation Room](#) (11/28, 554K) that ISIL sent a message only two weeks ago calling "for exactly the kind of attack we saw play out today" – using a car to ram pedestrians. In addition, [Fox News' The O'Reilly Factor](#) (11/28, 767K) said ISIL put out a video in French on Saturday "calling for attacks on Westerners," while another ISIL message last month called "for knife attacks on westerners."

Brian Ross reported on [ABC World News](#) (11/28, story 2, 2:10, Muir, 14.63M) that police and the FBI investigate Artan, "the picture emerging of him is that of a Somali immigrant who...seemed to be living the American dream until he turned on his adopted country, becoming radicalized based on what he read and heard online." [ABC World News Tonight](#) (11/28, lead story, 3:50, Muir, 14.63M) reported in its lead story that as authorities continue to investigate the "terrifying" crime scene, they now believe Artan was the sole perpetrator. The [Wall Street Journal](#) (11/28, Korn, Maher, Shallwani, Subscription Publication, 6.37M) reports that officials say the camera system on campus enabled them to track the car before the incident and they could confirm Artan was alone.

Despite reports of an active shooter on campus, [NBC Nightly News](#) (11/28, lead story, 2:50, Holt, 16.61M) said that the only gunfire came from responding officer

Alan Horujko when he shot and killed the “Somali-born” Artan. [USA Today](#) (11/28, Madhani, 5.28M) reports that according to Ohio State Police Chief Craig Stone, “police were still trying to determine the motive of the attack.” The [Washington Post](#) (11/28, Gray, 11.43M) quotes Stone as saying that while it is “too early to say” whether it was a terrorist attack, “it was clear ‘this was done on purpose.’”

The [Columbus \(OH\) Dispatch](#) (11/28, 529K) reports that all 11 of those injured in the attack “are expected to survive.” The [Washington Times](#) (11/28, 272K) also reports on the incident.

TRUMP BLASTS CNN’S ZELENY, REFERS TO

“#CORRUPTHILLARY.” [Politico](#) (11/28, Lima, 2.46M) reported that President-elect Trump “lashed out on Twitter Monday night over a CNN report refuting his unsubstantiated claims of mass voter fraud on Election Day.” CNN correspondent Jeff Zeleny’s report on “Anderson Cooper 360” Monday evening “dismissed Trump’s assertion that he ‘won the popular vote if you deduct the millions of people who voted illegally’ as ‘blatant and baseless’ and accused Trump of acting as a ‘sore winner.’” Trump “fired off a series of tweets aimed at CNN and Zeleny.” In one, Trump wrote, “CNN is so embarrassed by their total (100%) support of Hillary Clinton, and yet her loss in a landslide, that they don’t know what to do.” In another [tweet](#), Trump resurrected the “#CorruptHillary” hashtag, writing, “@sdcritic: @HighonHillcrest @jeffzeleny @CNN There is NO QUESTION THAT #voterfraud did take place, and in favor of #CorruptHillary !”

Stone: Clinton Prosecution More Likely Due To Support For Recount. [Politico](#) (11/28, Conway, 2.46M) reported that Trump “campaign confidant” Roger Stone “suggested Monday without evidence that Hillary Clinton is more likely to face prosecution under the president-elect’s administration because her campaign is cooperating with Jill Stein’s recount effort.” In an interview with Steve Malzberg, Stone, “again offering no evidence,” said that “we have to presume” that “the money funding the Stein campaign’s call for a recount is from billionaire donor George Soros or from Clinton.” Stone concluded, “Now Hillary, I think, increases her chances of prosecution by acting this way.”

States Reject Trump Claim That “Millions” Voted Illegally. [Politico](#) (11/28, McCaskill, 2.46M) reported that election officials in New Hampshire, Virginia, and California, where Trump “alleged there was ‘serious voter fraud’ during the Nov. 8 election have all unequivocally rejected the president-elect’s allegations.” In a tweet Sunday, Trump claimed “without evidence that he actually won the popular vote ‘if you deduct the millions of people who voted illegally,’” and hours later “accus[ed] the media of ‘serious bias’ for failing to report ‘serious voter fraud in Virginia, New Hampshire and California.’” The President-elect “offered no evidence to support his accusation,” and elections officials in all three states “have rebutted Trump’s allegations.”

Lester Holt said on [NBC Nightly News](#) (11/28, story 3, 2:20, Holt, 16.61M) that Trump is “pushing baseless claims that millions voted illegally in the election, costing him the popular vote. There’s no evidence of that.” Hallie Jackson added that Trump’s transition team on Monday provided “5 pages of documents they say

backs up voter fraud claims, citations debunked after analysis by the NBC News political unit and other independent fact checkers.” On [ABC World News](#) (11/28, story 3, 2:40, Muir, 14.63M), David Wright called Trump’s claims “astonishing,” and said they “outraged” elections officials across the country.

The [New York Times](#) (11/28, Nagourney, Subscription Publication, 13.9M) says Trump’s claim prompted a “furious reaction” from California Secretary of State Alex Padilla, who “asserted that there was no evidence for the claim by the president-elect, and denounced Mr. Trump for what he said was unpresidential behavior.” Padilla tweeted, “His unsubstantiated allegations of voter fraud in California and elsewhere are absurd. ... His reckless tweets are inappropriate and unbecoming of a president-elect.”

The White House also weighed-in on Trump’s allegations, saying Monday that there is no evidence of widespread election fraud in the presidential race, [Reuters](#) (11/28) reports. White House press secretary Josh Earnest “deferred comments on Trump’s specific tweets to the president-elect’s team, but added: ‘What I can say, as an objective fact, is that there has been no evidence produced to substantiate a claim like that.’”

The [Huffington Post](#) (11/28, Liebelson, Walsh, 237K) said that the “strangest thing” about Trump’s claim the millions of people voted illegally “isn’t that there is zero evidence to support it – it’s that Trump, who has turned away daily intelligence briefings since winning the election, took time out of his day to repeat a rumor that initially spread because of one guy on Twitter.” On Nov. 13, Gregg Phillips, a board member of the conservative anti-voter fraud group True the Vote, tweeted that he had “verified more than three million votes cast by non-citizens,” but “has not released any data to back up his claims.” While Trump’s campaign “did not say where Trump came by the idea that ‘millions of people’ voted illegally,” the Post said that Trump “has repeatedly boosted unfounded conspiracy theories from the dark corners of the internet.”

A [New York Times](#) (11/28, Subscription Publication, 13.9M) editorial calls Trump’s claim that “millions of people” voted illegally “a lie” that is “part of Mr. Trump’s pattern, stretching back many years, of disregard for indisputable facts.” The Times argues that Trump “feels threatened by Mrs. Clinton’s popular-vote lead,” adding that he “senses the fundamental unfairness of awarding the presidency to the loser of the popular vote.” In an editorial, the [Washington Post](#) (11/28, 11.43M) calls Trump’s claim “corrosive” and “incendiary” and argues that his “overreaction suggests he is not prepared for the responsibilities of the presidency or the scrutiny that comes with it.”

In his [Washington Post](#) (11/28, 11.43M) column, Dana Milbank address Trump’s question about why the media isn’t reporting on the alleged voter fraud, writing that the media “wasn’t reporting on this because it’s a load of hooey.” Milbank adds that Alex Jones’ Infowars, “the radio and Internet home of the grassy-knoll crowd,” had been reporting the “groundless accusations” and says Jones’ “rants would be funny if the soon-to-be most powerful man in the world didn’t rely so heavily on them.”

In his “Talking Points Memo” segment on [Fox News’ The O’Reilly Factor](#) (11/28, 767K), Bill O’Reilly took a different view, saying that California and 11 other states give “illegal aliens license to drive. And once you have a valid drivers license in California, Connecticut, Oregon, Vermont, and West Virginia, you’re automatically registered to vote. ... So it’s not inconceivable that millions of illegal aliens did vote on November 8.”

Editorial Wrap-Up:

NEW YORK TIMES. *“Donald Trump’s Lies About The Popular Vote.”* A [New York Times](#) (11/28, Subscription Publication, 13.9M) editorial calls President-elect Trump’s claim that “millions of people” voted illegally “a lie” that is “part of Mr. Trump’s pattern, stretching back many years, of disregard for indisputable facts.” The Times argues that Trump “feels threatened by [Hillary] Clinton’s popular-vote lead,” adding that he “senses the fundamental unfairness of awarding the presidency to the loser of the popular vote.”

“Threatening Cuba Will Backfire.” A [New York Times](#) (11/29, Subscription Publication, 13.9M) editorial criticizes President-elect Trump’s “vague ultimatum to the Cuban government on Monday,” saying any move to roll back the Obama Administration’s policy of engagement with Havana “would be extremely shortsighted.” The Times concedes that while President Obama’s opening with Havana “hasn’t been an instant catalyst of democracy, freedom and prosperity,” it has “helped establish conditions for ordinary Cubans to have greater autonomy” and “also enabled Cuban-Americans to play a larger role in shaping the nation’s future.” The Times argues that instead, Trump “could build on Mr. Obama’s approach by pressing lawmakers to do away with the senseless embargo.”

WASHINGTON POST. *“Trump’s Preoccupation With Phantom Voting Fraud Endangers Our Democracy.”* In an editorial, the [Washington Post](#) (11/28, 11.43M) calls President-elect Trump’s claim that “millions of people” voted illegally “corrosive” and “incendiary” and argues that his “overreaction suggests he is not prepared for the responsibilities of the presidency or the scrutiny that comes with it.”

“Fidel Castro’s Demise Can’t Guarantee Freedom For The People Of Cuba.” In an editorial, the [Washington Post](#) (11/28, 11.43M) writes that “it’s refreshing to see the incoming president link good relations with the United States to progress on human rights.” However, “it would be perverse to apply that precept only to Cuba,” as President-elect Trump “has appeared willing, even eager, to excuse repression by other autocratic regimes, including in Egypt, Turkey and Russia. Cubans are not the only people who deserve US solidarity with their struggles for basic rights.”

“The District Owes This Whistleblower Money, An Apology, And A Job.” The [Washington Post](#) (11/28, 11.43M) editorializes that a federal jury has found that Eric W. Payne was wrongfully terminated from his government job in the District of Columbia “because he blew the whistle on misconduct in city contracting.” The Post says that while “money cannot make up for the shameful way city officials treated Mr. Payne,” or “erase the damaging message the city sent to

honest workers,” the District should pay Payne what he is owed. The District should pay Payne back pay, legal fees, the \$1.7 million in compensatory damages ordered by the jury; it should apologize to him; and should offer Payne his job back, if he wants it, the Post concludes.

WALL STREET JOURNAL. “Trump Trains, Trump Air, Trump Roads...”

The [Wall Street Journal](#) (11/28, Subscription Publication, 6.37M) editorializes that President-elect Donald Trump and his advisers will have to grapple with several difficult realities if they actually want to deliver on campaign promises of financing a large-scale public works program. The Journal applauds Trump’s plan for relying heavily on private investment, but warns that programs such as road construction are not the greatest creators of jobs. Additionally, Trump must expect a great deal of wasteful spending if he wants his infrastructure proposals to become reality. The Journal hopes that Trump will bring his well-known skill for finishing projects ahead of schedule and under budget to any infrastructure plan once in office.

“The Banking Non-Apprentice.” The [Wall Street Journal](#) (11/28, Subscription Publication, 6.37M) writes approvingly of John A. Allison IV in an editorial, saying he could be a big help to President-elect Trump in revising financial sector regulations.

“France’s New Center-Right.” The [Wall Street Journal](#) (11/28, Subscription Publication, 6.37M) editorializes that François Fillon’s victory in the French conservative presidential primary on Sunday could be an important moment for the center-right in France and Europe. Fillon is hoping to counter the message of the National Front with a case for economic dynamism coupled with a self-assured but inclusive nationalism. Fillon wants 50 billion euros in tax cuts and a streamlined labor law. The Journal says that unlike National Front leader Marine Le Pen, Fillon’s nationalism is based on culture and values, rather than ethnic background. The French presidential election will be consequential in France and abroad, the Journal says. The Journal hopes that French Republicans can win voters by expressing a more optimistic message than the National Front.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "But the big story right now is still President-elect Donald Trump.

He has been busy tweeting again. He went on Twitter yesterday to claim that he actually won the popular vote if you deduct the millions of illegal voters and that any recount will change nothing. Speaking of nothing changing, Trump won and still says the election was rigged.”

Jimmy Fallon: “I read that the Secret Service protecting Donald Trump might have to rent two floors of Trump Tower, forcing taxpayers to pay \$3 million in rent back to Trump’s company. Trump said that is absolutely not true and the rent is \$4 million.”

Jimmy Fallon: “Yesterday, Trump was seen wearing a hat that says ‘45’ on the side, signifying that he will be the 45th President. Or the total number of days before he quits being President.”

Zinke escapes confirmation hearing relatively unscathed

Secretary of Interior nominee Rep. Ryan Zinke (R-Mont.) performed a high-wire act January 17 - alternately promising to open public lands to increased development while being a good steward of the lands.

At a Senate Energy Committee hearing on his nomination Zinke walked the wire and sort of laid out the development case. "I fully recognize and appreciate that there are lands that deserve special recognition and are better managed under the John Muir model of wilderness, where man is more of an observer than an active participant," he began.

Then he added, "I also recognize that the preponderance of our federal holdings are better suited to be managed under the Pinchot model of multiple use using best practices, sustainable policies, and objective science."

Zinke made the conservation case explicitly, repeating his support for retention of public lands in the federal domain and for making the Land and Water Conservation Fund (LWCF) permanent. When Sen. Maria Cantwell (D-Wash.) asked if he supported a permanent LWCF, Zinke said, "I do. I think land and water conservation has been important to Montana, certainly in many states. I think we should look at it . . . Lastly, I do think the states and local communities should have a say where those funds go."

As for retention of federal lands when Sen. Bernie Sanders (I-Vt.) asked his opinion on privatization of the National Park System, Zinke said, "I want to be clear on this point. I am absolutely against the transfer or sale of the public lands."

It became clear at the hearing that Zinke's nomination is assured. One fly in the ointment is a concern that Zinke was charged with travel fraud while serving in the U.S. Navy as an officer in SEAL Team Six. But his service in the Navy was scarcely mentioned in the four-hour hearing, let alone the travel charges.

In those charges Zinke allegedly billed the military for official travel when he was actually going home to renovate his house. The Navy didn't bring charges because the Navy SEALs have a tradition of avoiding scandal, according to the reports. The infractions allegedly occurred in 1998, 1999 and the early 2000s.

Environmentalists who at first appeared to be concentrating their fire on other Trump nominees, are now attacking Zinke. WildEarth Guardians told its members January 16 in a fund-raising pitch, "Even though Zinke's says he supports public lands, he just voted to allow the House of Representatives to support public lands transfers without considering the cost to the American people."

That refers to a January 3 House vote that would make it easier for future legislation to transfer federal lands to states or local governments. The House action would exempt legislation to make such transfers from Congressional pay-as-you-go limits. (*See separate article page 10.*)

But sportsmen are sticking with Zinke. Backcountry Hunters and Anglers President Land Tawney said that Zinke would likely protect federal lands and backcountry hunting and fishing opportunities.

"Backcountry Hunters & Anglers believes that he can be an effective and positive leader for the Interior Department, and we will continue to work closely with him with that objective in mind," said Tawney.

The powered recreation industry agreed. "The Outdoor Recreation Industry Roundtable supports Secretary-designate Zinke and looks forward to working with him and his team at the Department of the Interior to advance the outdoor recreation sector, grow jobs in the U.S. and ensure that all Americans have access to healthy, active outdoor fun on their public lands and waters," said Derrick Crandall, president of the American Recreation Coalition.

Commodity users of the public lands, such as the livestock industry, have lined up in support of the Montanan. Said Tracy Brunner, president of the National Cattlemen's Beef Association, "During his tenure in the U.S. House of Representatives, Rep. Zinke has consistently advocated for our western communities, economies, and ranchers. He has demanded transparency and the inclusion of stakeholders when it comes to land management decisions, and has a strong understanding of the challenges that come with stewarding the West."

The Western Energy Alliance concurred. "Western oil and natural gas producers with reasonable access to federal public lands can help create hundreds of thousands of high-paying, blue-collar jobs," said Kathleen Sgamma, president at the alliance.

"Congressman Zinke is the right person to enact this vision while protecting the landscapes that all Westerners love and cherish."

It is understood that Zinke will attempt to flatten the federal bureaucracy, i.e. transfer employees out of headquarters and regional offices into the field, according to people who have talked with the Trump transition team.

Zinke hinted at that in his testimony saying one of his three top priorities is "to ensure the professionals on the front line, our rangers and field managers, have the right tools, right resources, and flexibility to make the right decisions that give a voice to the people they serve."

His two other top priorities are to restore trust in federal land management agencies and to reduce a Park Service maintenance backlog.

Cantwell aggressively questioned Zinke on the development of coal on the public lands. When she asked him if he agreed with a coal-leasing moratorium launched by former secretary of Interior Sally Jewell on Jan. 15, 2016, he said, "I think a review is good."

On the policy front, as we have reported, Zinke has generally supported commodity development of the public lands, while demanding retention of the public lands in federal ownership.

For instance of commodity development Zinke objected to a Nov. 15, 2016, BLM rule to regulate methane emission. He said at the time the bureau "has issued a duplicative and unnecessary rule against responsible oil and gas development in Montana and on sovereign Tribal lands. This rule is a stark reminder that we need to invest in infrastructure projects like the Keystone pipeline, so we don't need to flare excess gas."

Although sportsmen/conservationists have praised Zinke some environmentalists have dug in their heels, such as WildEarth Guardians. However, groups such as the Sierra Club appear to be concentrating more of their fire on the nominations of Oklahoma Attorney General Scott Pruitt to head EPA, Exxon executive Rex Tillerson as Secretary of State and Sen. Jeff Sessions (R-Alabama) as attorney general.

Support on the right for Zinke is not universal. Property rights advocates such as the American Land Rights Association last month mounted a campaign against his nomination, asking its members to contact the Trump transition team. The association objects to Zinke's past support for the Land and Water Conservation Fund.

Judge won't block BLM methane venting rule, for now

A federal judge in Wyoming [refused](#) January 16 to halt implementation of a new BLM methane emissions rule.

For the time being at least U.S. District Court Judge Scott W. Skavdahl rejected the argument of oil and gas producing states and industry that BLM has no authority to regulate air quality; only EPA does.

He accepted BLM's argument that the rule is designed to prevent waste, i.e. methane venting, not assume EPA's clean air responsibility.

At first in his ruling Skavdahl suggested that North Dakota, Wyoming, Montana and industry had a case, noting, "Portions of BLM's stated rationale for the Rule undermine Respondents' insistence that the Rule is foremost a waste prevention regulation that simply has incidental benefits to air quality." The plaintiffs

argued that only EPA has authority to regulate air quality.

But Skavdahl went on, "Nevertheless, at this point, the Court cannot conclude that the provisions of the Rule which overlap with EPA/state air quality regulations promulgated under CAA (Clean Air Act) authority lack a legitimate, independent waste prevention purpose or are otherwise so inconsistent with the CAA as to exceed BLM's authority and usurp that of the EPA, states, and tribes. Thus, Petitioners have not shown a clear and unequivocal right to relief."

One of the plaintiffs, the Western Energy Alliance, has not given up. "Even though Judge Skavdahl did not grant a preliminary injunction, we're confident about our chances during the proceedings on the full merits of the case," said Kathleen Sgamma, president at the Alliance. "The venting and flaring rule oversteps BLM's mandate from Congress by usurping Clean Air Act authority that resides only with the Environmental Protection Agency and the states."

Skavdahl is the same judge who on Sept. 29, 2015, blocked a hydraulic fracturing regulation from BLM. He said at that time the bureau has no authority from Congress to regulate hydraulic fracturing, period.

That is, the judge said BLM erred in inferring that the broad authority Congress granted it to regulate oil and gas development on public lands automatically granted specific authority to regulate new hydraulic fracturing technology.

The methane rule, published Nov. 15, 2016, is one of the Obama administration's most prominent energy regulations. It is also expected to be a target of the Republican Congress and the incoming Trump administration as they attempt to revoke such regulations.

Indeed, the House Republican leadership intends to move legislation shortly to kill the regulation. The GOP plans to include the rule in a resolution under the Congressional Review Act) that includes several environmental and other regulations. (*See separate article page 10.*)

Although the methane rule technically went into effect January 17, it would not begin phasing in required reductions in methane until 2018. By that time the Trump administration will be firmly in charge. The rule requires producers to use available technology to cut flaring in half and to inspect their operations regularly for leaks.

EPA is also attempting to reduce methane emissions. It completed a rule May 12, 2016, that governs methane emissions from *future* operations and said it was also in the process of gathering information about a possible new rule governing *existing* operations. In the May 12, 2016, rule EPA not only set emission limits from methane but also required operators to find and repair leaks.

In a request to Skavdahl for an injunction against the BLM rule the State of Wyoming said, "The fatal flaw, however, is that, for the first time in the Department of the Interior's existence and without congressional authorization, the Rule poses a comprehensive air quality regulatory scheme on all oil and gas facilities on federal and Indian leases. This scheme includes requirements to control emissions, inspect and replace equipment, and it extends to *existing facilities*, which the (EPA) itself has not even done."

But the Justice Department said, "Contrary to petitioners' assertions, the Waste Prevention Rule is not a pollution control rule and does not improperly infringe on (EPA's) authority under the Clean Air Act. It sets no emissions standards for particular pollutants and contains no air quality monitoring requirements."

Intervening on behalf of the rule - and to insure the federal government defends it vigorously - are the States of California and New Mexico and several environmental groups.

Said California and New Mexico in their request to intervene, "Implementation of the Rule will benefit the States of California and New Mexico by generating more annual royalty revenue compared to that generated under current regulations, which allow considerable amounts of natural resources to be wasted royalty-free."

The House last year tried to block the EPA rule. It approved a fiscal year 2017 appropriations bill (HR 5538) July 14, 2016, that would forbid EPA from spending any money to implement the May 12, 2016, methane rule. Congress has yet to complete that appropriations bill.

Skavdahl's order on the coal be methane rule is available at:
https://cdn.westernenergyalliance.org/sites/default/files/VentingFlaringPIOrder_011617.pdf.

Five new national monuments; Grand Canyon left out

President Obama January 12 designated land in five areas of the country as national monuments, including a 48,000-acre expansion of the Cascade-Siskiyou National Monument in southern Oregon.

The formerly 66,000-acre Cascade-Siskiyou monument, managed by BLM, now totals 114,000 acres.

In increasing the number of national monuments he has designated - 34, a record - Obama added 6,200 acres to a California Coastal National Monument (BLM manages the monument) and designated three civil rights sites in the South.

The three civil rights sites, to be managed by the National Park Service, include a Birmingham Civil Rights National Monument in Birmingham, Ala.; a Freedom Riders National Monument in Anniston, Ala.; and a Reconstruction Era National Monument in Beaufort County, S.C.

The designations drew praise from conservationists and local legislators. In Oregon Sens. Jeff Merkley and Ron Wyden, both Democrats, applauded the Cascade-Siskiyou expansion. Said Merkley, who led the charge for an expansion, "The Cascade-Siskiyou area, where three mountain ranges converge creating a unique and spectacular landscape seen nowhere else in the world, merits the recognition and expanded protection that President Obama gave it today."

But commercial users of the Cascade area, including timber interests and ranching interests, were not applauding. Said the Healthy Forests, Healthy Communities Coalition, "It is extremely disappointing to those who support multiple use management of our federal lands. By making this unilateral decision, the Obama Administration ignored citizens who are concerned about how this expansion will affect private property, public access, local economy and businesses, mitigation against catastrophic wildfire, drought and other impacts."

Not all monuments advocates are pleased. The Obama administration has rejected the recommendation of Rep. Raúl Grijalva (D-Ariz.) that the President designate a 1.7 million-acre national monument adjacent to Grand Canyon National Park.

Grijalva was perturbed because Obama has designated some 34 national monuments, including major ones last month in Utah and Nevada, but not the Grand Canyon monument in his State of Arizona.

"I can only express my profound disappointment," Grijalva said January 6. "The Grand Canyon is one of the world's most iconic and popular natural places, not just for its beauty but for its importance to tribal culture and history. Instead of building on former Secretary Salazar's work, the Interior and Agriculture departments are apparently willing to leave the future of the Grand Canyon and the health of Arizona tribes up to Donald Trump. I am not."

To that end Grijalva, ranking Democrat on the House Natural Resources Committee, last week reintroduced legislation (HR 360) that would establish a Greater Grand Canyon Heritage National Monument in Arizona. The monument would be located north and south of Grand Canyon National Park and would protect the park's watershed as well as lands held sacred by Native American tribes.

Meanwhile, western Republicans are stepping up their campaign to prevent the unilateral designation of national monuments by future presidents. Twenty-five senators joined Senate Energy Committee Chairman Lisa Murkowski (R-Alaska) in introducing legislation (S 33) that would require Congressional *and* state approval of any monument.

Although the bill would do nothing to redress the Obama designations, Murkowski criticized the administration. "(Obama's) unilateral withdrawals have routinely come with complete disregard for local concerns and opposition, threatening energy, mining, fishing, ranching, recreation, and other reasonable uses of public land and waters," she said. "At this point, we have no choice but to reform the Antiquities Act to ensure that the people being impacted by these designations are heard and respected."

While Murkowski is concerned about future designations, her House counterpart House Natural Resources Committee Chairman Rob Bishop (R-Utah), suggests he will attempt to persuade President-elect Trump to revoke Obama's recent monuments, and perhaps some from President Clinton.

Bishop recommended to the Trump transition team December 5 that the President-elect roll back objectionable national monument designations.

After meeting with the Trump transition team Bishop said, "Any monument designation that lacks local support, is excessive, or violates the terms of the Antiquities Act will be scrutinized and is easier to abolish. Today's discussions with the transition team examined options for the incoming administration. The talks were positive and encouraging."

But some scholars believe a President would have limited authority under the Antiquities Act. Indeed, the Congressional Research Service (CRS) in a [report](#) it prepared last month on the act questioned whether reversals would be legal.

"No President has ever abolished or revoked a national monument proclamation, so the existence or scope of any such authority has not been tested in courts," said CRS. "However, some legal analyses since at least the 1930s have concluded that the Antiquities Act, by its terms, does not authorize the President to repeal proclamations, and that the President also lacks implied authority to do so."

The main object of Bishop's ire is the December 28 designation by Obama of a 1.35 million-acre Bears Ears monument in southern Utah. Late last year Bishop attempted without success to move legislation to protect Bears Ears with fewer limits on commercial activities than in an Obama monument.

Also on December 28 Obama designated a 300,000-acre Gold Butte monument adjacent to the Bundy Ranch in Nevada. Cliven Bundy is the Nevada rancher who is often described as a national leader of protests against BLM and Forest Service land managers.

California Desert: Sen. Dianne Feinstein (D-Calif.) followed through January 5 on her promise to introduce legislation to complement President Obama's recent designation of 1.8 million acres of national monuments in the California Desert.

In one of his most ambitious uses of the Antiquities Act of 1906, Obama on Feb. 12, 2016, designated more than 1.8 million acres of California Desert as parts of three national monuments. BLM will oversee the areas.

Her new bill (S 32) would designate 230,000 acres of wilderness, 77 miles of wild and scenic rivers, and 142,000 acres for off-highway vehicle use. And it would address renewable energy by directing BLM to plan for thousands of acres of land exchanges with the State of California.

Said Feinstein, "While I supported President Obama's decision to create three national monuments in the Mojave Desert, his authority under the Antiquities Act did not allow him to include the many other valuable provisions in the original legislation."

The 921,000-acre Mojave Trails National Monument, 135,000-acre Sand to Snow National Monument and 8,000-acre Castle Mountains National Monument will combine with existing national parks and wilderness areas in the desert to protect nearly 10 million acres.

Democratic senators hit back at fed land transfers

They didn't succeed but six Democratic senators last week introduced a budget amendment that would have forbid the sale of public lands to reduce the federal deficit.

The amendment (SA 110), proposed January 10 under the lead of Sen. Martin Heinrich (D-N.M.), did not come to a vote in the Senate.

The House is going in the opposite direction. It approved a procedure January 3 to make it easier for future legislation to transfer federal lands to states or local governments. The House action would exempt such legislation from Congressional pay-as-you-go limits.

Under old House rules sponsors of legislation to transfer federal lands to states would have had to come up with budgetary offsets to balance against the value of lost federal oil, gas, coal, minerals, timber, rangelands, etc. Those offsets could include either new revenues (taxes) or spending reductions.

But the package of new rules (H Res 5) the House approved 233-to-190 says "a conveyance of Federal land to a State, local government, or tribal entity shall not be considered as providing new budget authority, decreasing revenues, increasing mandatory spending or increasing outlays."

Of note, Rep. Ryan Zinke (R-Mont.) voted for the House provision. Zinke, President Trump's nominee for secretary of Interior, has repeatedly said in the past he opposes the widespread transfer of federal lands to state and local governments. As Trump himself has asserted.

In Zinke's confirmation hearing January 17 before the Senate Energy Committee he was repeatedly asked about his position opposing federal land transfers and his January 3 vote that would make such transfers easier to approve in Congress.

He told Sen. Bernie Sanders (I-Vt.), "I want to be clear on this point. I am absolutely against the transfer or sale of the public lands." (*See related article page one on Zinke's confirmation hearing.*)

The House approval of the land transfer provision in H Res 5 does not mean Congress is about to immediately ship federal lands to states. Congress would still have to move individual land transfer bills against immense opposition. And Senate rules still require offsets.

But H Res 5 would make it slightly easier for the House to at least approve legislation to transfer federal land to states, local governments or tribes. And that reflects the Republican Party Platform that supports conveyance of unspecified federal lands out of the public domain.

The Republican platform proposes to unload unspecified federal lands. That has sometimes been interpreted in the media to mean all federal lands, including national parks. However, the platform's plank on disposing of federal lands refers only to "certain" lands.

Besides, Republican candidate Trump has more than once said he personally opposes the disposal of not only national parks but all federal lands. As he told *Field & Stream* magazine in January, "I don't like the idea because I want to keep the lands great, and you don't know what the state is going to do."

In addition Rep. Zinke has been outspoken in opposition to the transfer of federal lands to the states. On June 15, 2015, in a House Natural Resources Committee mark-up he voted against a bill (reintroduced January 3 as HR 232) that would authorize the transfer of up to 2 million acres per state of national forest to a state.

Said Zinke of the bill introduced by senior Republican Don Young (R-Alaska), "I'm starting to wonder how many times I have to tell these guys in leadership I'm not going to allow Montana's public lands to be sold or given away."

Obama coal report targets royalties, climate impact

A landmark [analysis](#) of BLM's public lands coal program concludes that the federal government should consider increased royalties and fees on the climate impacts of coal mining.

But the report, commissioned by former Secretary of Interior Sally Jewell a year ago and published January 11, does not make any specific recommendations. Thus it will be up to the incoming Trump administration to implement any policy changes, and Trump is not likely to climb on board.

In fact, President-elect Trump has said a top priority for him is to terminate a partial moratorium on coal leasing former Secretary of Interior Sally Jewell implemented last year. Trump said repeatedly he favors greatly increased coal development in the United States. More than 40 percent of the coal produced in this country comes from the public lands.

Still, Jewell laid down a marker for the Trump administration, and Trump nominee for secretary of Interior, Rep. Ryan Zinke (R-Mont.)

"We have a responsibility to ensure the public - including state governments - get a fair return from the sale of America's coal, operate the program efficiently and in a way that meets the needs of our neighbors in coal communities, and minimize the impact coal production has on the planet that our children and grandchildren will inherit," she said. "The only responsible next step is to undertake further review and implement these commonsense measures."

At a confirmation hearing January 17 in the Senate Energy Committee Sen. Maria Cantwell (D-Wash.) aggressively questioned Zinke on the development of coal on the

public lands. When she asked him if he agreed with the coal-leasing moratorium launched by former Jewell on Jan. 15, 2016, he said, "I think a review is good."

When she asked his opinion of the practice of self-bonding by coal companies, Zinke said, "I think bonding is important . . . Some of the reclamation problems we have and we face in the West are still not repaired . . . I think we need to have the courage today to look 100 years forward and look back and say 'we did it right.'"

The Obama administration analysis, in the form of an EIS scoping report, makes these suggestions:

Royalty: The report does not identify a specific change to the existing 12.5 percent royalty paid by federal coal lessees. It just recommends that the Trump administration consider a higher royalty.

Says the report, "The BLM would identify the most appropriate metric and corresponding royalty rate for Federal coal, reflecting on analysis already conducted by other groups such as the Council of Economic Advisers."

Climate: The EIS scoping report suggests that BLM require compensation for damage to the climate caused by coal mining, with those revenues used to limit carbon damage. "The BLM would require lessees to carry out or fund activities that proportionally offset climate-related impacts, including through investment in a fund managed by an entity that takes on the liability to proportionally offset those greenhouse gas emissions and climate-related impacts," says the EIS scoping report.

The money would then be used "for activities including, but not limited to, carbon offsets, carbon sequestration, climate adaptation, and community resilience," the report says.

Leasing: The EIS scoping report suggests a complete shake-up in the leasing-by-application system now that usually leads to one bidder per application. The EIS would have BLM plan for and then hold inter-tract bidding.

"The BLM would determine a maximum tonnage of coal or maximum number of Btus to be leased consistent with projected demands," says the EIS scoping report. "Under a modified inter-tract leasing process, all interested companies would bid among themselves for the right to produce a specified quantity of coal in the location of their choice, assuming it is suitable for mining and consistent with the approved land use plan and strategic leasing plan."

The National Mining Association took sharp issue with the suggestion that federal coal lessees were not paying their fair share to the federal government. The association said the 12.5 percent royalty is only part of the story, that lessees also pay huge bonus bids and significant taxes.

Said the association, "Detailed [analyses](#) by Norwest Corp. show Federal royalty rates are 30-65 percent higher than prevailing rates for private coal, where bonus bids are seldom paid as they always are on federal coal. In the major federal coal leasing region, the combination of fees and taxes amounts to *an effective tax rate of 39 percent.*" (Emphasis in the original.)

The mining association charged that the Interior Department report kowtows to environmentalist demands for an end to fossil fuels leasing from the public lands, the Keep-It-in-the-Ground movement.

The Earthjustice environmental law firm was not shy about promoting the no-leasing program. Said Abigail Dillen, Earthjustice Vice President of Litigation for Climate and Energy, "After an intensive review, the Interior Department has come to

the necessary conclusion that we have to seriously consider an end to federal coal leasing. That recognition is crucial, and we will do everything in our power to compel the next administration to act on it."

Ranking Senate Energy Committee Democrat Cantwell, a leading critic of the mining industry, said, "It's the Interior Department's legal responsibility to review royalty rates and leasing policy. The incoming Administration shouldn't drop the ball and shortchange taxpayers."

As has been well documented the nation's coal industry has been devastated by bankruptcies caused by either competition from cheaper energy sources or overregulation, or both, take your choice.

Further, Earthjustice and other national environmental groups have, with the support of some senators and House members, mounted a vigorous campaign against any further leasing of coal, called Keep-it-in-the-Ground.

The Keep-it-in-the-Ground campaign last year persuaded several House and Senate Democrats to introduce legislation (S 2238, HR 4535) to ban new leasing on federal lands not only of coal, but also of oil, gas and oil shale. Rep. Jared Huffman (D-Calif.) introduced the House bill and Sen. Jeff Merkley (D-Ore.) the Senate bill.

The EIS scoping analysis is available at: <https://eplanning.blm.gov/epl-front-office/eplanning/planAndProjectSite.do?methodName=dispatchToPatternPage¤tPageId=93180>.

Methane emissions rule a top target of House GOP

House leaders intend to move legislation as early as next week that would revoke a Nov. 15, 2016, oil and gas methane emissions rule published by BLM.

The Republicans plan to include the methane regulation in a comprehensive resolution that would reverse several Obama administration regulations. The strategy would base the resolution on a Congressional Review Act (CRA) that authorizes Congress to kill regulations dating from May 30, 2016.

Said House Majority Leader Kevin McCarthy (R-Calif.) on the House floor last week, "I expect to start with swift action on at least on the Stream Protection Rule and methane emissions standards, both of which are limits to our energy production."

The House strategy may be needed because a federal judge January 16 refused to issue an injunction against the BLM rule. (*See related article page 3.*)

McCarthy and the House have support from the powerful conservative operation of the Koch brothers and Koch Industries, Inc. An organization that they support, Freedom Partners, last week met with House Republican leaders and urged them to reverse the methane regulations under the CRA within 100 days. That law theoretically allows the House and Senate to revoke regulations with a majority vote, thus in the Senate avoiding a filibuster.

Freedom Partners has put together an action plan for Congress and the first 100 days of a Trump administration, although the conservatives admitted revocation of environmental and other rules will not be a piece of cake.

"Repealing existing federal regulations is not a simple task. Based on where a regulation is in the finalization process, different rules will need to be addressed through different policy remedies and legal avenues," said the group. "In order to successfully roll back the myriad of regulations proposed and finalized

over the past eight years, Congress and the Trump Administration will need to pursue several methods of repeal and reform."

In addition to Congressional revocation of the methane rule, Freedom Partners is recommending that a Trump administration revoke a Jan. 15, 2016, order from Secretary of Interior Sally Jewell establishing a coal-leasing moratorium.

In a separate, but related action the House January 11 voted to require detailed economic impact assessments of Forest Service and BLM *plans* prepared under the Federal Land Policy and Management Act. Agencies already must prepare the analyses for *regulations* projected to cost more than \$100 million.

Rep. Raúl Grijalva (D-Ariz.) offered an amendment to exempt BLM and Forest Service land management plans from the lower threshold, but the House rejected it by a vote of 185-to-236. The vote came during consideration of a regulatory accountability bill (HR 5), which the House then passed.

Said Grijalva, ranking Democrat on the House Natural Resources Committee, "If this bill becomes law, the agencies that oversee our public lands won't be able to make important decisions in a timely way, and that's the last thing the American people want."

But Rep. Steve Chabot (R-Ohio) said the economic reviews are necessary to protect small businesses. "Given the potentially significant consequences to small businesses that rely on public lands and small communities that border those lands, the Forest Service and the Bureau of Land Management should assess the impacts of their plans on these small entities," said Chabot, chairman of the House Small Business Committee. "That is all this does."

There is big pushback from Democrats against all Congressional attempts to revoke Obama regulations. Grijalva wrote his House Democratic colleagues January 9 and urged them to stand united against a comprehensive CRA resolution.

Grijalva wrote that the methane rule is absolutely necessary. "The (rule) would result in the savings and productive use of up to 41 billion cubic feet annually - an amount of gas that could supply roughly 740,000 households each year," he said. "This level of waste is unconscionable, and companies should be required to make the investments necessary to capture that natural gas and pay the American people their fair share."

While the action on regulatory reversals right now is in the House, the Senate would likely prove a greater hurdle. That's because the GOP holds only a two-vote majority (52-to-48) and a switch of only two or three votes could defeat a resolution.

Obama sets oil shale royalties, environmental standards

The Obama administration January 10 established a new royalty system for oil shale development on the public lands, if there ever is any development. Like the Bush administration the Obama rule would begin royalties at five percent.

But the Obama administration would give the secretary of Interior authority to impose a higher royalty, depending on conditions surrounding a lease. The Bush rule would have increased the royalty at one percent per year after production began, with a cap of 12.5 percent.

Said BLM, "(The Bush) system required commercial operations to pay royalties of five percent per year for the first five years of production, increasing by one percent per year beginning in year six, to a maximum rate of 12.5 percent in year

13. The final rule modifies the regulations to establish the five and 12.5 percent levels as minima. Specifically, the modified provision keeps the annual escalator clause for years six through twelve but allows the Secretary to set the initial royalty rate applicable in years one through five on a lease-by-lease basis."

BLM said it established a flexible royalty system because the oil shale industry has not grown beyond the research and development phase. "Until there is a domestic commercial oil shale industry, we can only speculate about what royalty rates those factors would support," the bureau said.

At the same time that it established the new royalty system, BLM also imposed new environmental protection standards for oil shale operations.

Said BLM, "The new requirements are a watershed protection plan for surface and groundwater resources; an airshed review of reasonably available scientific data or modeling to predict probable air quality effects of operations; an integrated waste management plan; and an environmental protection plan that includes minimization of adverse effects on air, water, wildlife, native plants, and productivity of soils, as well as monitoring, adaptive management, and mitigation of adverse effects."

The January 10 rules are the last piece of the puzzle assembled by the Obama administration governing both research and development of oil shale and production.

On March 22, 2013, the administration placed significant new limits on development by reducing acreage available for lease sale.

The 2013 plan/record of decision set aside 678,000 acres for possible future oil shale research and development leasing in Colorado, Utah and Wyoming compared to 2,017,741 acres set aside by the Bush administration in November 2008. The plan/decision reduces acreage available for tar sands development in Utah from 430,687 acres to 132,220 acres.

Although western Republicans blasted the steps at the time, commercial development is years if not decades away. To be resolved are enormous hurdles such as identifying the amount of water commercial production would soak up and how much energy would be required to produce oil from shale.

Commercial leasing would be carried out under the new regulations that BLM posted last week. That rule would establish a royalty system for commercial leases and environmental regulations for commercial leases.

The existing R&D program: The Bush administration on Jan. 1, 2007, issued five, 160-acre R&D leases in Colorado and on July 1, 2007, approved one lease of that size in Utah. The Obama administration issued two additional R&D leases in Colorado on Dec. 1, 2012.

BLM wrote the new plan/ROD and regulations to settle a lawsuit brought by a dozen of so environmental groups. Under the agreement BLM said it would consider a new royalty system and would require an environmental review before awarding commercial leases.

On January 16, 2009, 13 local and national environmental groups brought a National Environmental Policy Act lawsuit against the regulations. The suit, filed by the environmental law firm Earthjustice, says BLM's regulations didn't adequately consider the environmental implications of development, in part because BLM won't know what those impacts will be until the R&D program is further along. The suit was filed in U.S. District Court in Colorado.

FS drafts 'science synthesis' to revise NW Forest Plan

The Forest Service has begun laying the scientific groundwork for the revision of 17 national forest plans that make up a Northwest Forest Plan.

Not everyone agrees that the playing field is level. The Association of O&C Counties for one says a draft science [synthesis](#) does not give sufficient weight to timber sales in Oregon, Washington and California forests.

"The socioeconomic section seems to have abandoned President Clinton's promise of predictable and sustainable supply of timber. It does not delve into the science as to how sustained yield forestry can achieve both economic and ecological goals to address the most significant failure of the NWFP," said Rocky McVay, the association's executive director.

In 1994 the Clinton administration completed a Northwest Forest Plan that governs national forests and forested BLM lands in the Pacific Northwest. Until the plan was instituted annual national forest and BLM timber sales usually exceeded 12 billion board feet per year. After the plan was executed those sales decreased to around 3 billion board feet per year.

Now the Forest Service's Region 6 (Oregon and Washington) and Region 5 (California) have asked the Forest Service's Pacific Northwest and Pacific Southwest Research Stations to prepare a scientific synthesis as a base for revising the Northwest Forest Plan.

The Ecological Society of America is coordinating the effort, which led to a draft report now undergoing public review. The comment period ended today (January 20). The Forest Service emphasizes this is not a National Environmental Policy Act process, but is guided by Office of Management and Budget research procedures.

Although the synthesis is supposed to produce an independent analysis the use of the data will be up to the incoming Trump administration, and it is expected to be more sympathetic to timber companies than the Obama administration. And less sympathetic to conservationists.

With the decrease in timber sales from public lands has come a concomitant decrease in the amount of sale revenues distributed to public lands counties. That decrease is now approaching a crisis, according to western politicians.

To compensate the counties Congress has since 2000 put up federal money under a Secure Rural Schools (SRS) program. However, in December western elected officials failed to persuade their colleagues to extend the program for another year, perhaps costing public lands counties more than \$300 million.

The program was last authorized in fiscal year 2015, with \$300 million in payments allocated in March of 2016. Oregon Sens. Ron Wyden (D-Ore.) and Jeff Merkley (D-Ore.) are criticizing the Senate leadership for not taking up legislation to extend SRS.

It was only symbolic but Wyden and Merkley last week introduced an amendment to a Senate budget resolution (S Con Res 3) to make room for an extension of the SRS program. The amendment didn't reach the floor.

The draft scientific synthesis is available at:
<https://www.fs.fed.us/pnw/research/science-synthesis/chapter-listing.shtml>.

O&C timber payments: BLM does hold timber sales on the 2.4 million acres of Oregon and California lands that it manages in western Oregon. As we reported in

the Dec. 12, 2016, issue of *PLN* the Association of O&C Counties complained of a delay in the distribution of shared receipts from the timber sales.

BLM announced January 10 that it was distributing more than \$19 million to the 18 O&C Counties.

Alaska leaders hope to shake up public lands management

The Alaska governor and the Alaska Congressional delegation are going all-out to revise public land management in their state.

Their immediate target is a new [plan](#) released by BLM January 6 that covers 6.5 million acres of eastern interior Alaska. Among other things the plan designates 1 million acres of the region as areas of critical environmental concern that will limit mining and other uses.

Senate Energy Committee Chairman Lisa Murkowski (R-Alaska) suggested that she would ask Congress and the Trump administration to undo the plan, approved in five records of decisions. In a press release Murkowski's office said the senator "will work with the incoming administration to overturn many of the midnight rules and directives released in the final days of the Obama administration."

But BLM said the plan would balance development with other uses such as subsistence hunting and fishing. Said Geoff Beyersdorf, district manager of the BLM Fairbanks District Office, "With approval of these plans, we can move forward with management of these public lands in a way that balances use, development, and conservation."

ANWR: The Eastern Interior Plan is just the tip of the iceberg. On January 5 Sens. Murkowski and Dan Sullivan (R-Alaska) introduced legislation (S 49) to open the coastal plan of the Arctic National Wildlife Refuge (ANWR) to oil and gas development.

Alaskan officials have been attempting for 30 years to open the coastal plain without success. Although they will now have a pro-development President in the White House, they still may have to round up 60 votes in the Senate, where over the years several Republicans have sided with Democrats to block legislation to open the 1.4 million-acre coastal plain to leasing.

The Obama administration made their job more difficult on April 3, 2015, by recommending the designation of 12.28 million acres of ANWR as wilderness. That includes the coastal plain. Seven million acres of ANWR are already Congressionally-designated wilderness. Although only Congress has the authority to designate wilderness, the administration recommendation effectively means almost all of ANWR will be managed as wilderness, at least until a new administration decides otherwise or Congress overrides the decision.

King Cove: On January 11 Murkowski, Sullivan and Rep. Don Young (R-Alaska) introduced legislation (S 131, HR 513) to authorize a land exchange leading to the construction of a road corridor through a wildlife refuge to the community of King Cove.

The Obama administration refused to allow the construction of a road through the Izembek National Wilderness Refuge to provide access to emergency health care for the citizens of King Cove.

Secretary of Interior Sally Jewell on Dec. 23, 2013, denied authority to construct the road because she didn't want to set the precedent of harming a wilderness area.

State land claims: In the last issue of *PLN* we reported that BLM intended to help the State of Alaska by expediting the state's claims to 40 million acres. But the state is not at all sure that is a good thing.

BLM said December 19 it was adopting new technology that will allow the state to lay claim to 40 million acres of land under the Alaska Statehood Act in half the time and half the cost as the existing program would require. The state has already received 60 million acres.

BLM said the new technology will use satellite navigation to identify state-claimed lands and their boundaries. Under the old system survey teams were shipped to the field for long periods. The teams then struggled through the backcountry to set monuments in the ground at regular, two-mile intervals.

BLM said that instead of taking 20 years to accomplish the task at a cost of \$120 million, it will be done in 10 years at a cost of \$60 million.

But the Alaska Department of Natural Resources says the technology is unproven and the state may get stuck with the bill.

The director of the Alaska Division of Mining, Land & Water, Brent Goodrum, told us, "The transfer of future cost obligations for the survey (and physical monumentation) of lands granted to the State of Alaska in our Statehood Act is hardly a favor, nor does it accelerate the time frame in which the State may ultimately receive its full land entitlement... something in excess of 105.8 Million acres." Goodrum is also currently president of the Western States Land Commissioners' Association.

The Eastern Interior Plan is available at:

<https://www.blm.gov/programs/planning-and-nepa/plans-in-development/alaska/eastern-interior-rmp>

IBLA decisions

(We post current Interior Board of Land Appeals decisions at our website, <http://www.plnfpr.com/ibla.htm>. IBLA may be contacted at: Interior Board of Land Appeals, 801 North Quincy St., MS 300-QC, Arlington, VA 22203. Phone (703) 235-3750.)

Subject: Oil and gas lease sale.

BLM decision: BLM will reject competitive lease offers after a sale is held to protect other resources.

Appellant lessee: BLM has no authority under the Mineral Leasing Act to reject lease offers after bid payments have been made.

IBLA decision: Affirmed BLM decision.

Case identification: *Hawkwood Energy Agent Corp., Venture Energy, LLC, et al. 189 IBLA 164.* Decided January 4, 2017. Sixteen pages. Appeal from decisions of the Deputy State Director of the Nevada State Office of BLM, who rejected appellants' lease offers for Federal oil and gas lease parcels in Garden Valley, Nevada. DOI-BLM-NV-L000-2013-0004-EA.

IBLA argument: IBLA Administrative Judge Amy B. Sosin affirmed a BLM decision to reject competitive oil and gas lease offers, even after BLM had approved tracts for sale and accepted full payment. The appellants argued that the Mineral Leasing Act (MLA) effectively requires BLM to approve a lease after certifying tracts for sale and accepting winning bids. But Judge Sosin argued that the provisions of the MLA making winning lease offers mandatory bind only the bidders/lessees and not BLM. She said the lessees point to this provision of the MLA: "A bid shall not be withdrawn and shall constitute a legally binding commitment to execute the lease bid form and accept a lease Execution by the high bidder of a competitive lease bid form approved by the Director . . . shall constitute a binding lease offer" But, Sosin argued, "This regulation, however, binds the potential lessee, not BLM. The plain language of the regulation informs bidders that a bid constitutes a binding offer to BLM, and places a limit on bidders' actions once a bid is submitted. Nothing in the regulation limits the Secretary's discretion to accept or reject a lease offer up until lease issuance."

Notes: Public Lands News

Sage-grouse limits bill back. Eleven House Republicans reintroduced legislation (HR 527) January 13 that would effectively overturn an Obama administration's greater sage-grouse policy. The bill would reverse the three pillars of the policy. First, it would forbid implementation of BLM and Forest Service plans to protect the sage-grouse if states had management plans in place. Almost all of them do. Second, it would forbid listing of the greater sage-grouse under the Endangered Species Act. The Obama administration did defer listing in favor of the BLM and Forest Service plans. Finally, the bill would forbid the withdrawal of 10 million acres from hard rock mining, as begun by the administration. House Natural Resources Committee Chairman Rob Bishop (R-Utah) is the chief sponsor. Variations of the sage-grouse limits legislation made their way into House and Senate versions of fiscal year 2017 appropriations bills last year, but those bills have not been enacted.

BLM sets interim leadership. With the conclusion of the Obama administration today (January 20) BLM Director Neil Kornze stepped down from that position. The bureau's Kristin Bail will serve as acting director for the time being. Bail served most recently as assistant director for resources and planning. The Trump administration has not yet announced its nominee for the post. The one name that has circulated most prominently is Utah House Rules Committee Chairman Michael E. Noel (R). He is a champion of the campaign in Utah to have 31 million acres of federal land transferred to the state.

Major oil and gas hit in NPRA. ConocoPhillips announced January 13 that it has made a significant oil and gas discovery in the northeastern corner of the National Petroleum Reserve Alaska (NPRA). The find is in the Greater Mooses Tooth Unit and the two drilled wells are called the Willow Discovery. The two wells are about four miles apart. BLM and the Corps of Engineers took years to complete permitting for the landmark lease. On Feb. 13, 2015, BLM did give ConocoPhillips Alaska the go-ahead on Greater Mooses Tooth. Of the new discovery Joe Marushack, president of ConocoPhillips Alaska, said, "This discovery is tremendously exciting not only for ConocoPhillips, but also for the state of Alaska. Willow's proximity to existing infrastructure improves the economic viability of the discovery. Development of Willow, a potential multi-billion-dollar investment, could provide thousands of jobs during construction and could generate substantial revenue for the federal government, state, North Slope Borough, and communities in the NPRA." Alaska Gov. Bill Walker (I) congratulated ConocoPhillips and said, "We believe that continued hydrocarbon development in NPRA will benefit our state in terms of revenue, employment opportunities, and maintaining TAPS throughput." TAPS is the Trans Alaska Pipeline System. The State of Alaska has suffered a devastating economic blow in recent years because of diminished oil and gas development. TAPS has been delivering an ever-dwindling amount of oil. The NPRA discovery may help. Some 1.5 million acres of the 23 million-acre NPRA are under lease. A December 14 sale in NPRA yielded bids on 67 tracts on 613,000 for a total of \$18.8 million. ConocoPhillips bid on 65 of the 67 sold tracts.

Panel criticizes EPA mine bond rule. A federal small business advisory group is criticizing an EPA proposal to require hard rock miners to obtain bonds when carrying out projects under the Superfund law. The Small Business Advocacy Review Panel concludes in comments submitted to EPA, "Advocacy believes that the current approach could unnecessarily threaten the viability of small mines." Hard rock miners jumped on the report. "This report demonstrates what EPA has been told by industry, citizens, members of Congress and Western Governors all along: the rule is unnecessary and harmful to small business. EPA must do the right thing, stop wasting taxpayer funds and end this nonsense," said Laura Skaer, American Exploration & Mining Association Executive Director. EPA proposed the rule December 2 and is taking public comments until February 2, so the Trump administration will have the final say. However, the Trump administration may have to publish some sort

of rule because the U.S. Circuit Court of Appeals for the District of Columbia on Jan. 29, 2016, ordered EPA to complete regulations by Dec. 1, 2017.

Wyoming wolf delisting bill back. Rep. Lynn Cheney (R-Wyo.) and 14 of her colleagues introduced legislation (HR 424) January 10 to delist the northern gray wolf in Wyoming under the Endangered Species Act. The House approved a predecessor bill on Feb. 26, 2016, but it was not enacted. The wolf in Wyoming was originally delisted by the Fish and Wildlife Service (FWS) in August 2012, but a federal judge in September 2014 ordered it relisted. U.S. District Court Judge Amy Berman Jackson in U.S. District Court in Washington, D.C., said a State of Wyoming rule that led to the delisting failed. She said in a Sept. 23, 2014, decision that a state plan didn't guarantee a baseline of 10 breeding pairs and 100 wolves in the state. But, Rep. Cheney said, "Wyoming should be able to manage the gray wolf without outside interference. This bill will stop the 'management by litigation' culture that has done so much damage to our state."

Juen to head Public Lands Foundation. Jesse Juen, a former BLM state director in New Mexico, will serve as president of the Public Lands Foundation, which represents BLM retirees. He replaces Ed Shepard, himself a former BLM state director in Oregon. Juen lives in Albuquerque.

Conference Calendar

JANUARY

26-27. **Advanced Public Land Law Institute** in Santa Fe, N.M. Contact: Rocky Mountain Mineral Law Foundation, 9191 Sheridan Blvd., #203, Westminster, CO 80031. (303) 321-8100. <https://www.rmmlf.org>.

Jan. 28-Feb 2. **National Association of Conservation Districts Annual Meeting** in Denver. Contact: National Association of Conservation Districts, 509 Capitol Court, N.E., Washington, D.C. 20002. (202) 547-6233. <http://www.nacdnet.org>.

Jan. 29-Feb. 2. **Society for Range Management Annual Meeting and Trade Show** in St. George, Utah. Contact: Society for Range Management, 30 W 27th Ave., Wheat Ridge, CO 80215-6601. (303) 986-3309. <http://www.rangelands.org>.

FEBRUARY

1-3. **Cattle Industry Convention & NCBA Trade Show** in Nashville, Tenn. Contact: National Cattlemen's Beef Association Convention & Meetings Department, 9110 East Nichols Avenue, Suite 300, Centennial, CO 80112. <http://www.beef.org>.

12-16. **Public Lands Alliance Convention and Trade Show** in Arlington, Va. Contact: Association of Partners for Public Lands, 2401 Blueridge Ave, Suite 303, Wheaton, MD 20902. (301) 946-9475. <http://www.appl.org>

19-22. **119th National Western Mining Conference** at the Colorado Convention Center in Denver. Contact: www.coloradomining.org

19-22. **Society for Mining, Metallurgy and Exploration Annual Meeting** in Denver. Contact: <http://www.smenet.org>.

25-March 1. **National Association of Counties Legislative Conference** in Washington, D.C. Contact: National Association of Counties, 440 First St., N.W., 8th Floor, Washington, D.C. 20001. (202) 393-6226. FAX (202) 393-2630. <http://www.naco.org>.

MARCH

4-11. **North American Wildlife and Natural Resources Conference** in Spokane, Wash. Contact: Wildlife Management Institute, 1146 19th Street, NW, Suite 700, Washington, DC 20036. (202) 371-1808. <http://www.wildlifemanagementinstitute.org>.

Federal Parks & Rec

addendum to Public Lands News

January 20, 2017

- * *Grijalva keeps up pressure for permanent LWCF*
- * *Jarvis's policies complete; critic eases off a bit*
- * *Yosemite has escaped flooding, thus far*
- * *Zinke survives confirmation hearing (See Public Lands News article)*
- * *Obama designates five new monuments (See Public Lands News article)*
- * *Dems hit back against land shifts (See Public Lands News article)*

Campaign to make LWCF permanent cranked up in House

The politics are complicated but Rep. Raúl Grijalva (D-Ariz.) took a first step January 12 toward permanent authorization of the Land and Water Conservation Fund (LWCF). He reintroduced legislation (HR 502) to make the program permanent.

The law is presently authorized through September 30, 2018.

LWCF got a significant boost from Rep. Ryan Zinke (D-Mont.) January 17 at his Senate Energy Committee confirmation hearing for secretary of Interior.

When Sen. Maria Cantwell (D-Wash.) asked if he supported making the LWCF program permanent, Zinke said, "I do. I think land and water conservation has been important to Montana, certainly in many states. I think we should look at it . . . Lastly, I do think the states and local communities should have a say where those funds go."

Legislation to make LWCF permanent almost made it over the finish line in December in an omnibus energy bill. But differences of opinion between the House and Senate on a host of provisions did the bill in.

The lead sponsor of the energy bill, Senate Energy Committee Chairman Lisa Murkowski (R-Alaska), has said she wants to renew her campaign to move the measure early in this Congress.

However, her counterpart as chairman of the House Natural Resources Committee, Rep. Rob Bishop (R-Utah), has been hesitant to give carte blanche to a permanent LWCF.

Last summer Bishop did introduce a "discussion draft" bill that would have extended LWCF for seven years and substantially realigned program priorities.

Bishop's draft would have slashed funding for the federal side of LWCF but given greater support to the state side. States traditionally receive a small fraction of the total LWCF pie; the draft Bishop bill would have guaranteed them 45 percent. In addition Bishop would have allocated five percent of LWCF to an urban recreation fund, sort of a follow-on to an Urban Parks and Recreation Recovery program. He would have allocated just 3.5 percent to federal land acquisition.

The Grijalva bill is simpler. It simply makes LWCF permanent and allocates at least 1.5 percent of the annual LWCF appropriation for sportsmen's access to public lands.

In its version of an omnibus energy bill the Senate last year would not only

have made LWCF permanent, it would also have set aside \$150 million each year for Park Service maintenance from offshore royalties, but in a separate fund from LWCF.

The Senate provision also would have allotted at least 1.5 percent of LWCF to sportsmen's access, and allotted 40 percent to federal land acquisition and 40 percent to a group of programs, including state grants.

The House-passed version of the energy bill contained none of those provisions. Indeed the House rejected an amendment on the House floor May 25, 2016, that would have directed House conferees to accept the Senate LWCF provision. The House said no in a close 205-to-212 vote.

As a first order of business the Grijalva permanent LWCF bill would require the support of President-elect Trump and his nominee for secretary of Interior, Zinke. In the last Congress Zinke cosponsored Grijalva's bill, along with 25 other Republicans.

However, some conservative groups, such as the American Land Rights Association, are critics of LWCF and have faulted Zinke for cosponsoring the Grijalva bill.

To put pressure on Bishop Grijalva sent a letter asking for hearings and immediate action on his bill.

Said Grijalva, "The brinkmanship over LWCF in the last Congress was a disservice to the American people, who overwhelmingly support the program. By moving quickly to pass this bill, we can avoid a similar situation this time around and show that Congress can, in fact, get something done. Voters across the political spectrum understand the value of LWCF in their communities. There is no room for ideology here."

In an ideal world LWCF advocates would prefer legislation that Sen. Maria Cantwell (D-Wash.) introduced in the last Congress that would not only have made LWCF permanent, but also have guaranteed \$900 million per year for the program without further appropriations. Cantwell is the ranking Democrat on the Senate Energy Committee.

NPS finishes off Jarvis policy; PEER eases criticism

The Park Service completed January 18 a third and final leg of former director Jonathan B. Jarvis's overarching policy for the agency - a system plan that envisions the future of the parks.

NPS described the system plan this way: "The purpose of a System Plan is to provide 'a framework for the proactive direction for the future of the national park system, identifying gaps in the nation's protected natural and cultural areas, and establishing a collaborative conservation system that fully reflects our nation's cultural and natural heritage.'"

The other two legs of the stool are a Director's Order #100 that would have NPS tilt toward protection when the impacts of an activity were uncertain and a Director's Order #21 that governs partnerships and philanthropy.

One of the severest critics of former National Park Service Director Jonathan B. Jarvis's policy on philanthropic donations and partnerships is backing off, a little.

The environmental group Public Employees for Environmental Responsibility (PEER) said it still objects to key provisions of the December 28 Jarvis order.

(Jarvis stepped down January 3.)

PEER faulted such things as corporate labeling within parks and NPS involvement with alcoholic beverage companies.

But PEER said Jarvis eased off some on corporate logos and agency employee fundraising. "The original sweeping plan suffered from sloppy drafting and poorly thought-out concepts," said PEER Executive Director Jeff Ruch. "We are pleased the Park Service edged away from its complete corporate embrace."

Throughout last fall Ruch called for Jarvis to resign because of charges of sexual misconduct in several field offices, among other things.

Before leaving office Jarvis put in place two major policy orders - the partnership Order #21 and on December 20 an Order #100 that insures that protection of the resource is a first priority for the agency, at least for a little while.

Order #100: Jarvis signed the protection Order #100 in the face of criticism from Republican Congressional policy makers.

At the heart of the white paper lies a "Precautionary Principle" strategy. It would establish protection as a priority even if a threat were not clear and imminent.

Order #100 describes the policy this way: "The Precautionary Principle requires that, when an action, activity, or emerging condition raises plausible or probable threats of harm to park resources and/or human health, management should take anticipatory action even when there is uncertainty. When such uncertainty exists, NPS managers will take actions that err on the side of caution to protect resources in accordance with existing authorities, including NPS obligations to prevent resource impairment . . ."

The order is a prime candidate for a reversal or a rewrite by the Trump administration, but that may take time. NPS devoted four years to writing the Jarvis proposal.

Order #21: The partnership order, Director's Order #21, is designed to make it easier for partners to contribute to the National Park System, and for park employees to accept those contributions. At the same time Jarvis said the order would guard against commercialization of the parks.

The final order does include several provisions that critics have complained would lead to increased commercialization of the parks and would compromise agency employees.

One such provision would allow NPS leaders to accept donations of up to \$5 million, including associate/assistant directors, regional directors and superintendents.

A second controversial provision would outright allow partnerships with companies that produce and sell alcohol.

Says the order, "After the effective date of this Order and under its provisions and standards, the NPS may permit - after thorough review and approval by the Director - philanthropic partnerships with, and accept donations from, corporations that produce or distribute alcohol."

The final Order #21 is available at:

https://www.nps.gov/policy/DOrders/DO_21.htm.

Director's Order #100 is available at: https://www.nps.gov/policy/DOrders/DO_100.htm.

The system plan is available at: <https://parkplanning.nps.gov/files/NationalParkServiceSystemPlan2017.pdf>.

Yosemite Valley has escaped devastating floods, so far

Yosemite Valley is threatened by flooding reminiscent of a 1997 flood that cost an estimated \$250 million to clean up.

Thus far, park officials say the 2017 West Coast Pineapple Express - a series of major rain and snow storms - have not done nearly as much damage.

The park has suffered some disruptions, though. Park officials have betimes been forced to close Yosemite to the public. And more storms are forecast for next week.

On January 9 the Merced River at Pohono Bridge reached almost three feet above flood stage of 10 feet. NPS said, "The park is currently assessing the impacts and will address any repair needs in the coming days and weeks."

But the park subsequently said that the January 9 flooding was well below the 17-foot mark that it anticipated. And, while the park and campgrounds were messy, the park is pretty much "intact," as Yosemite spokesman Scott Gediman told the local press.

Although the park was closed for several days around January 9, it is now mostly open for business. Indeed the central and northern California area has had a relatively quiet week.

If the Pineapple Express cranks up again, as is forecast, Yosemite officials hope they are ready. The repairs the park made following the 1997 flood are designed to minimize damages from future floods, such as raised roads, raised buildings and relocation of facilities.

While some repairs were made immediately after the 1997 flood, Yosemite was not able to complete a land management plan for Yosemite Valley until Feb. 14, 2014. Environmentalist litigation slowed the planning. And the park's biggest critic - Rep. Tom McClintock (R-Calif.) - strenuously objected to limitations on commercial uses in various early iterations of a plan.

But on publication of the final plan McClintock said, "I am particularly gratified that the final report has rejected radical proposals to close many traditional tourist amenities at the park, including swimming pools, raft and bike rentals, horseback riding stables, and ice skating and lodging facilities. The plan retains the historic Sugar Pine Bridge, maintains retail services to accommodate park visitors and minimizes the loss of campsites and parking - all significant improvements from the draft report."

He added, "Although I remain concerned about some aspects of the plan, my first reaction is one of relief. Yosemite Valley belongs to the American people for the express purpose of 'public use, resort and recreation.'"

The plan took a long and torturous path. NPS published a first edition in August 2000. Friends of Yosemite Valley and Mariposans for the Environment and Responsible Government took the plan to court and, in 2003, the Ninth U.S. Circuit Court of Appeals held that the plan failed because it did not consider user capacities.

Notes: Federal Parks & Rec

Major ORV settlement in Utah. The Bureau of Land Management (BLM) struck a deal January 13 with conservationists and off-road vehicle (ORV) advocates to end eight years of litigation over travel management plans on 10 million acres of public lands in Utah. Under the settlement, which has been submitted to federal court, BLM will (1) update some site-specific travel management plans, (2) conduct additional cultural surveys and (3) update an air resource strategy. In return the conservation groups including the Southern Utah Wilderness Alliance will dismiss lawsuits against six travel management plans and a November 2014 oil and gas lease sale. Several intervenors said they would accept the settlement including the Utah School and Institutional Trust Lands Administration and a number of oil and gas companies. The settlement is available here: [https://www.blm.gov/sites/blm.gov/files/documents/files/APPELLATE-%23349183-v2-SUWA - Final Settlement Agreement Signed with Maps.pdf/](https://www.blm.gov/sites/blm.gov/files/documents/files/APPELLATE-%23349183-v2-SUWA%20-%20Final%20Settlement%20Agreement%20Signed%20with%20Maps.pdf/).

GAO analyzes NPS maintenance. The Government Accountability Office (GAO) offered a mixed [report](#) January 13 on the efforts of the Park Service and Congress to catch up with a \$11 billion maintenance backlog. On the upside GAO said that NPS in fiscal year 2015 spent about one-third of its budget on maintenance - \$1.16 billion out of a total appropriation of \$3.3 billion. In addition GAO said NPS has begun deploying a new program called a Capital Investment Strategy to prioritize projects. On the downside GAO said NPS has not developed a system to determine whether the strategy is working. Said GAO, "Evaluating the strategy may help the Park Service determine if the strategy is achieving intended outcomes or if changes need to be made." Sens. Lisa Murkowski (R-Alaska) and Mike Enzi (R-Wyo.) requested the report. Said Murkowski, who chairs the Senate Energy Committee, "The longer our parks go without the attention they need, the more costly it will become for taxpayers to properly steward and restore these historical and cultural gems. I am encouraged that NPS agrees with GAO's recommendations and look forward to seeing them implemented." The report is available at: <http://www.gao.gov/products/GAO-17-136>.

Park Service workplace rating low. Out of 305 federal agencies surveyed for employee satisfaction, the Park Service comes in near the bottom, 262nd. Other federal land management agencies did a little better with the Forest Service coming in 225th and the Bureau of Land Management 240th. The Fish and Wildlife Service scored in the top third at 99th. The rating was compiled by the Partnership for Public Service, a largely nonpartisan group. Tom Bernstein, president of the Chelsea Piers, is chairman of the group. The organization asked three questions of federal employees: "I recommend my organization as a good place to work. Considering everything, how satisfied are you with your job? Considering everything, how satisfied are you with your organization?" The report is available at: <https://ourpublicservice.org/>.

Alaska sues Obama hunting regs. The State of Alaska said January 13 that it has filed a lawsuit against a Fish and Wildlife Service (FWS) rule that limits predator hunting in refuges. The state argues that it has sole authority to regulate hunting in refuges and national parks in Alaska and that its "intensive predator management" policy should stand. FWS issued the regulation on Aug. 3, 2016. Former Fish and Wildlife Service (FWS) Director Dan Ashe detonated the controversy when he published a blog attacking the Alaska policy. "For example, over the past several years, the Alaska Board of Game has unleashed a withering attack on bears and wolves that is wholly at odds with America's long tradition of ethical, sportsmanlike, fair-chase hunting, in something they call 'intensive predator management,'" he said. But Alaska Attorney General Jahna Lindemuth said, "These regulations are about the federal government trying to control Alaskans' way of life and how Alaskans conduct their business. This is contrary to state and federal law."

Federal Parks & Recreation addendum..... Page 18

GOP priorities include rule revocations; Zinke stumbles

The Republican Congress hit the deck running this week as it launched its campaign to reverse eight years of Obama administration public lands policy.

As an initial matter House and Senate Republican leaders began gearing up to use a Congressional Review Act to revoke Obama regulations posted during the last half of 2016.

To get the ball rolling the House January 4 approved a budget measure (HR 21) that would amend the Congressional Review Act to allow the House and Senate to bundle a number of Obama regulations into one legislative document. That would avoid having to repeal regulations one-by-one.

High on the list of possible revocations are a BLM rule governing methane emissions, an EPA rule on methane emissions, a National Park Service rule governing oil and gas development, and a Fish and Wildlife Service rule governing oil and gas development.

Further on the park and recreation front, former National Park Service Director Jonathan B. Jarvis on December 20 established a new policy that would give highest protection of the parks highest priority. House and Senate committee leaders complained about the policy when it was first proposed because it could limit other uses in the parks. So it could be a target for Congressional Republicans.

To slow national monument designations Republicans are expected to introduce variations on legislation from the last Congress that would curb a President's authority to designate monuments under the Antiquities Act.

The most sweeping bill last year came from Senate Energy Committee Chairman Lisa Murkowski (R-Alaska). Her bill would have required the approval of both Congress and a state governor before a President could designate a national monument anywhere in the country.

And President-elect Trump could chip in by terminating a Jan. 15, 2015, order from secretary of Interior Sally Jewell establishing a partial moratorium on the leasing of federal coal while a programmatic EIS is prepared.

Zinke problem: Meanwhile, Trump's announced selection of Rep. Ryan Zinke (R-Mont.) as its nominee for the next secretary of Interior has hit a speed bump. Both *eenews.net* and *The Intercept* have reported that while serving in the military as an officer of SEAL Team Six Zinke was accused of travel fraud.

That is, he allegedly billed the military for official travel when he was actually going home to renovate his house. The Navy didn't bring charges because the Navy SEALs have a tradition of avoiding scandal, according to the reports. The infractions allegedly occurred in 1998, 1999 and the early 2000s. Whether that will serve to scrub Zinke's nomination remains to be seen.

Support on the right for Zinke is not universal. Property rights advocates such as the American Land Rights Association (ALRA) last month mounted a campaign against his nomination, asking its members to contact the Trump transition team.

ALRA is most disturbed by Zinke's position on the Land and Water Conservation Fund (LWCF). The Congressman has consistently supported full funding of \$900 million per year for LWCF as well as permanent authority for the program.

"Forward this message to anyone on the Trump Transition Team," ALRA told its members in a bulletin. "Critical that you call anyone you know on Trump Transition Team listed below to oppose Rep. Ryan Zinke for Interior. Rep. McMorris Rodgers is far better choice." Rep. Cathy McMorris Rodgers (R-Wash.) was reportedly the Trump administration's first choice for the job, but she was replaced by Zinke.

From the left environmentalists praised Zinke on public land retention but not on public lands policy in bulk. Earthjustice called his record "awful."

Said Drew Caputo, Earthjustice Vice President of Lands, Oceans and Wildlife, "He has supported measures to increase production of dirty and climate-heating fossil fuels, reduce or eliminate public involvement in management of public lands, and eliminate protections for endangered species."

On the policy front, as we have reported, Zinke has generally supported commodity development of the public lands, while demanding retention of the public lands in federal ownership.

Most famously in January 2015 Zinke told the Montana State legislature, "I will not tolerate selling our public lands."

On the other hand Zinke has backed commodity development. Of a final Nov. 15, 2016, BLM rule to regulate methane emissions he said the bureau "has issued a duplicative and unnecessary rule against responsible oil and gas development in Montana and on sovereign Tribal lands. This rule is a stark reminder that we need to invest in infrastructure projects like the Keystone pipeline, so we don't need to flare excess gas."

Well into mid-December Rep. McMorris Rodgers had been considered the frontrunner for the Interior position but President-elect Donald Trump's son Donald Jr. reportedly preferred Zinke. President-elect Trump and his son have consistently advocated retention of the public lands, despite a Republican Party Platform that proposes divestiture. (*See related article page 6.*)

Regulatory reversal: Meanwhile, the Trump administration and its Republican allies continue to gear up to reverse regulations and executive orders from the Obama administration. House and Senate Republican leaders are preparing to use a Congressional Review Act that authorizes the House and Senate to revoke with a simple majority vote any rule enacted within the last 60 "legislative" days.

Thus, on January 4 the House approved the budget measure that would allow Congress to bundle several Obama regulations into one legislative document, and then reverse the whole package. That would avoid having to repeal regulations piecemeal.

According to an [analysis](#) prepared by the Congressional Research Service (CRS) after the election, the act may apply to any regulation issued as early as May 30 of this year.

Revocation of those regulations is child's play compared to a recommendation House Natural Resources Committee Chairman Rob Bishop (R-Utah) reportedly forwarded to the Trump transition team December 5. Bishop said that President Trump should roll back noxious national monument designations (*see following article.*)

His immediate target is a December 28 designation by President Obama of a Bears Ears National Monument in southern Utah. But he also told the Utah press that Trump could by executive order reverse the 1996 designation of a 1.7 million-acre Grand Staircase-Escalante National Monument in Utah by then President Clinton.

But some scholars believe a President would have no such reversal authority under the Antiquities Act of 1906. The Congressional Research Service said in a report:

"No President has ever abolished or revoked a national monument proclamation, so the existence or scope of any such authority has not been tested in courts. However, some legal analyses since at least the 1930s have concluded that the Antiquities Act, by its terms, does not authorize the President to repeal proclamations, and that the President also lacks implied authority to do so."

Cattlemen set an agenda: The livestock industry, as represented by the Public Lands Council, for one has laid out a most ambitious agenda that asks President-elect Trump in his first 100 days to "bring an immediate halt to the Sage Grouse Resource Management Plans, repeal the sprawling monument designations made through abuse of the Antiquities Act, address the critical habitat designations imposing stifling restrictions on landowners, and immediately withdraw EPA's 'waters of the United States' rule and the Bureau of Land Management's planning 2.0 rule."

Dave Eliason, president of the Public Lands Council, said January 4, "While

the Bureau of Land Management has a clear directive to manage BLM lands for multiple use and sustained yield, instead focus has shifted toward 'conservation' without responsible management. The priorities laid out by the associations are necessary to restore balance to federal land management and set an agenda that will ensure that ranchers can continue their tradition of stewardship well into the future."

Obama designates big Utah, Nevada monuments; GOP upset

As expected President Obama designated December 28 a Bears Ears National Monument and a Gold Butte National Monument, setting the stage this year for a titanic battle as western Republicans attempt to overturn the designations. The legal authority for such reversals is much in question.

For now Obama has outraged the Utah Congressional delegation by designating a 1.35 million-acres Bears Ears monument in southern Utah, although that is significantly less than the 1.9 million acres advocates had recommended.

And with the support of Sen. Harry Reid (D-Nev.) he has designated a 300,000-acres Gold Butte monument adjacent to the Bundy Ranch in Nevada. Cliven Bundy is the Nevada rancher who is often described as a national leader of protests against BLM and Forest Service land managers.

Both areas are on Bureau of Land Management (BLM) property, but in an unusual twist Obama established a Bears Ears Commission of tribal leaders to advise on management.

Said Obama, "Today, I am designating two new national monuments in the desert landscapes of southeastern Utah and southern Nevada to protect some of our country's most important cultural treasures, including abundant rock art, archeological sites, and lands considered sacred by Native American tribes."

Sen. Reid was effusive in his praise of Obama, saying, "This is personal for me. I still remember the wonder I felt traveling from dusty Searchlight to stunning Piute Springs as a child - it seemed like the entire world had opened up to me. Everything I've done for the environment since has stemmed from those early experiences, and today's designation is a wonderful capstone to a career of fighting to protect Nevada's pristine landscapes."

But Rep. Rob Bishop (R-Utah) led a chorus of complaints against the Bears Ears designation. Among other things he said the President had no authority to establish a Bears Ears Commission of tribal leaders, a strategy Bishop himself was attempting to implement in a bill (HR 5780) he had devised to protect Bears Ears.

"This is a diversion," he said. "The Utah delegation wants to give management authority to Native Americans; the administration can't. Only Congress can legally do so. This administration over promised, failed to deliver, and is now trying to hide its ineptitude."

Nevada Sen. Dean Heller (R-Nev.) objected to the Gold Butte designation, saying Congress should do the job (although there was only a snowball's chance that the Republican Congress would set aside so much public land.)

Still, Heller introduced a bill (S 22) January 3 that would forbid the designation of national monuments in Nevada without Congressional approval.

The livestock industry as represented by the Public Lands Council agreed with Heller. "Designating a monument in this manner - under the cloak of darkness and without even the decency of notifying the local communities, the states, or the congressional delegations of Utah or Nevada - speaks volumes about the disregard

this administration has for local input," said council president Dave Eliason, who is also a rancher in Utah.

Five Indian tribes located near the Bears Ears area - Ute Mountain Ute, Zuni, Hopi, Navajo, and Ute Tribe of the Uintah - led the campaign for a 1.9 million-acre national monument, along with environmental groups.

The president of the Navajo Nation, Russell Begaye, said protection of the Bears Ears area was essential to the heritage of the tribes. "Bears Ears National Monument is sacred not only to the Dinépeople, but also our Hopi, Ute, and Zuni neighbors," he said. "These tribes came together in an unprecedented show of unity to conserve these lands for future generations of all Americans."

The Southern Utah Wilderness Alliance (SUWA) partnered with the Indians for years in working for the monument and urged Congress to go along. Said SUWA's Executive Director Scott Groene, "We urge the Utah congressional delegation to show leadership in coming down on the right side of history, by respecting the Tribes and supporting the Monument."

The designation of the two monuments marks the 28th and 29th times Obama has used his authority under the Antiquities Act of 1906 to designate national monuments on federal lands, usually on BLM-managed land. In recent major actions on July 9, 2015, he designated a 704,000-acre Basin and Range National Monument in Nevada and on May 21, 2014, he established a 500,000-acre Organ Mountains-Desert Peaks National Monument in New Mexico.

Obama is expected to designate still more monuments in his last days from these candidates - Greater Grand Canyon Heritage National Monument in northwestern Arizona, Owyhee Canyonlands monument in Oregon and expansion of the Cascade-Siskiyou National Monument in Oregon. That is by no means an exclusive list.

A lead advocate of a 1.7 million-acre Greater Grand Canyon Heritage National Monument, Rep. Raúl Grijalva (D-Ariz.), was let down when Obama didn't include it in his December 28 actions. "While I'm disappointed that the was left out, I remain hopeful and optimistic that President Obama will uphold his promise to tribal communities and designate the monument before he leaves office," he said.

Legal situation: House Natural Resources Committee Chairman Bishop recommended to the Trump transition team December 5 that the President-elect roll back objectionable national monument designations.

After meeting with the Trump transition team Bishop said, "Any monument designation that lacks local support, is excessive, or violates the terms of the Antiquities Act will be scrutinized and is easier to abolish. Today's discussions with the transition team examined options for the incoming administration. The talks were positive and encouraging."

A Bishop press release adds that the Antiquities Act of 1906 "does not prohibit a president from abolishing or modifying the terms of a previously declared monument which has not been ratified by Congress."

But some scholars believe a President would have limited authority under the Antiquities Act. Indeed, the Congressional Research Service (CRS) in a [report](#) it prepared last month on the act questioned whether reversals would be legal.

"No President has ever abolished or revoked a national monument proclamation, so the existence or scope of any such authority has not been tested in courts," said CRS. "However, some legal analyses since at least the 1930s have concluded that the Antiquities Act, by its terms, does not authorize the President to repeal proclamations, and that the President also lacks implied authority to do so."

The legal analysis CRS referred to was a 1938 opinion written by then-Attorney General Homer Cummings ruling out the undesignation of a national monument by a President.

House rule would exempt conveyances from budget offsets

The House made it easier January 3 for future legislation to transfer federal lands to states or local governments. The House action would exempt legislation to make such transfers from Congressional pay-as-you-go limits.

Under old House rules sponsors of legislation to transfer federal lands to states would have had to come up with budgetary offsets to balance against the value of lost federal oil, gas, coal, minerals, timber, rangelands, etc. Those offsets could include either new revenues (taxes) or spending reductions.

But the package of new rules (H Res 5) the House approved 233-to-190 says "a conveyance of Federal land to a State, local government, or tribal entity shall not be considered as providing new budget authority, decreasing revenues, increasing mandatory spending or increasing outlays."

That does not mean Congress is about to immediately transfer federal lands to states. Congress would still have to move individual land transfer bills against immense opposition. And Senate rules still require offsets.

Besides, leading Republicans say they oppose such transfers, beginning with President-elect Donald Trump and his choice for secretary of Interior, Rep. Ryan Zinke (D-Mont.)

Still H Res 5 would make it slightly easier for the House at least to approve legislation to transfer federal land to states, local governments or tribes. And that reflects the Republican Party Platform that supports conveyance of unspecified federal lands out of the public domain.

House Natural Resources Committee Chairman Rob Bishop (R-Utah) reportedly sponsored the provision.

Ranking committee Democrat Raúl M. Grijalva (D-Ariz.) attacked. "The House Republican plan to give away America's public lands for free is outrageous and absurd," Grijalva said. "This proposed rule change would make it easier to implement this plan by allowing the Congress to give away every single piece of property we own, for free, and pretend we have lost nothing of any value."

Environmentalists also objected. "Right out of the gate, Congressional Republicans are declaring open season on federal lands," said Alan Rowsome, senior government relations director for The Wilderness Society. "We're not even a day into this new Congress and House Republicans are voting to give away our nation's parks, forests and refuges disguised in a budget rulemaking procedure."

The Republican Party Platform proposes to unload unspecified federal lands. That has sometimes been interpreted in the media to mean all federal lands, including national parks. However, the platform's plank on disposing of federal lands refers only to "certain" lands.

Besides, Republican candidate Trump has more than once said he personally opposes the disposal of not only national parks but all federal lands. As he told *Field & Stream* magazine in January, "I don't like the idea because I want to keep the lands great, and you don't know what the state is going to do."

In addition Rep. Zinke has been outspoken in opposition to the transfer of

federal lands to the states. Most famously in January 2015 he told the Montana State legislature, "I will not tolerate selling our public lands."

More recently on June 15, 2015, in a House Natural Resources Committee mark-up he voted against a bill (reintroduced January 3 as HR 232) that would authorize the transfer of up to 2 million acres per state of national forest to a state.

Said Zinke of the bill introduced by senior Republican Don Young (R-Alaska), "I'm starting to wonder how many times I have to tell these guys in leadership I'm not going to allow Montana's public lands to be sold or given away."

Obama team keeps cancelling contentious O&G leases

The Obama administration took a major step last month toward cancelling the sale of 39,490 acres of oil and gas leases in the Wyoming Range of the Bridger-Teton National Forest in Wyoming.

Under Secretary Of Agriculture for Natural Resources Robert Bonnie approved a draft record of [decision](#) that would forbid the issuance of leases on 30 parcels sold in 2006. He is expected to sign a final decision by mid-January, just before the Trump administration takes office.

That would mark the fourth time in the last two months the Obama administration had cancelled oil and gas lease in the Rockies. Two previous actions came in Colorado and one in Montana.

The oil and gas industry is perturbed, charging that the cancellations are not legal. "This latest retroactive cancellation of leases joins two other such actions in the White River National Forest of Colorado and the Badger-Two Medicine area of Montana," said Kathleen Sgamma, president of the Western Energy Alliance. "All these involve leases, which are property rights, sold a decade or more ago. Retroactively denying property rights long after those rights were granted is contrary to basic American jurisprudence."

In each of the four instances the Obama administration has asserted that other values in the neighborhood of the cancelled leases were more important than energy development.

As Bonnie said in the draft Wyoming Range decision, "Comments from the citizens of Wyoming and local communities, even those that make their living directly or indirectly from the energy sector, provided significant rationale and affirmation of the analysis to justify choosing (a no leasing alternative.) Many stated that the cumulative negative effects on the historical culture, the recreational benefits, the lifestyle that draws people to live here, and the associated economic benefit stemming from these values, outweigh the economic benefit that would result from the oil and gas development associated with this project."

The Obama administration is clearing the deck of long-standing, troubled oil and gas lease approvals.

In Montana the administration said just before Thanksgiving that Devon Energy Corporation will return to the federal government 15 oil and gas leases just outside Glacier National Park in the Badger-Two Medicine area of Montana.

On November 30 BLM posted a final [decision](#) that calls for the cancellation of 25 oil and gas leases in the White River National Forest in Colorado.

In a third move in Colorado BLM issued a record of [decision](#) November 28 to settle eight years of disputes over oil and gas development on the Roan Plateau.

The plan would cancel almost all leases on the top of the plateau and return \$47.6 million to the lessees.

Whether the actions can be reversed by Congress or by the Trump administration is unclear. Certainly in the Glacier situation the lessee Devon agreed to return the leases and, if it were to ask the Trump administration to reverse course, environmentalists might tie the leases up in the courts in perpetuity.

And in the Roan situation the Interior Department reached agreement with lessee Bill Barrett Corporation and environmental groups on the lease cancellations.

Said the Wyoming Outdoor Council of the Wyoming Range decision, "This decision approaches what we hope will be the end of a long chapter of uncertainty. Unfortunately, because the decision comes so close to the change in presidential administrations, it is still unclear whether it will persist."

Forest Service documentation, including the draft Bonnie decision, is available at: <https://www.fs.usda.gov/project/?project=48737>.

BLM locks in Moab O&G plan; what can Trump do about it?

The Obama administration took a major step December 30 toward implementing new master plans for oil and gas development across the West.

The step consisted of a [master plan](#) published by BLM in the *Federal Register* that supposedly balances oil and gas development in 785,000 acres in the Moab and Monticello Field Offices in Utah with protection of conservation lands. The plan responds in part to hotly-debated Bush administration lease sales there in 2008.

The Moab plan is intended to serve as a prototype for a dozen other such plans being developed in Wyoming, Colorado and Utah. However, the incoming Trump administration may have different ideas because it sympathizes with the oil and gas companies that have criticized the Moab plan.

When the Moab plan was first proposed in August 2015, Fidelity Exploration and Production Co., which holds several federal leases in the area totaling as many as 120,000 acres, was not pleased. Although the plan addresses future leasing, the company said it would have serious impacts on existing projects in that it would prevent adding new leases to the projects.

Three months later in November 2015 Fidelity closed down much of its Rocky Mountain operations, including a Denver headquarters and nine field offices in Utah, Montana, Texas and Wyoming.

Secretary of Interior Sally Jewell had a more positive take. "This plan takes a landscape-level approach to balancing the protection of the iconic scenery in and around Moab with access to the rich energy resources found there," she said. "As the first Master Leasing Plan in Utah, the collaborative process is a model for how communities can work together to support thoughtful development while protecting world-class environmental, cultural and recreational resources."

The Southern Utah Wilderness Alliance said the plan strikes the proper balance between development and protection. "The Moab Master Leasing Plan gives BLM the right tools to guide future oil, gas and potash development in the heart of Utah's red rock country," said Stephen Bloch, legal director for alliance. "The MLP gives industry certainty where leasing and ultimately development can take place and also makes plain the terms and conditions for those activities."

In that it took BLM four years to write the Moab plan the Trump administration

might need years to reverse it. However, the Trump team could prevent implementation of a number of other plans BLM has been working on.

BLM laid out proposed alternatives for one of those other plans - a San Rafael Desert plan - the same day it completed the Moab plan - December 15. The San Rafael area is immediately west of the Moab area in Utah.

On Dec. 19, 2008, the Bush administration BLM sold 116 parcels in a State of Utah oil and gas lease sale that drew national interest. Environmentalists immediately filed a lawsuit charging that many of the parcels were too close to wild public lands with wilderness potential.

In the face of protests from an array of interests BLM had pulled more than 110 tracts from the sale but still offered 131 parcels extending over 163,714 acres. BLM sold 89 percent of the 131 parcels covering 148,598 acres and received \$7,473,768.50 in bids, rental and administrative fees.

Subsequently, a federal judge on Jan. 16, 2009, blocked the issuance of 100,000 acres of the leases and suggested the environmentalist litigants would probably succeed in a lawsuit against BLM. At that point former Secretary of Interior Ken Salazar in February 2009 withdrew 77 parcels that had been sold, touching off litigation from the oil and gas industry.

About that time the Obama administration began to revise the oil and gas leasing and permitting system from top to bottom, eventually adding another layer of environmental reviews prior to leasing.

As part of the administration's revision to the system BLM began to write its master leasing plans, with the Moab plan the first to surface. It would apply to almost 1 million acres of land, counting both split estate land where BLM managed the subsurface minerals and surface federal land.

The Moab plan is available at: <http://go.usa.gov/xksyS>.

Western govts list consultation grievances with Obama

The Western Governors' Association last month gave the incoming Trump administration notice that they expect early, substantial consultation on public lands policy.

The governors approved seven resolutions demanding consultation, saying "states should be granted the maximum administrative discretion possible and should be treated as co-regulators." A Democrat, Montana Gov. Steve Bullock (D), is serving as chairman of the association.

The roles of the federal government and state governments in managing public lands are spelled out variously in the U.S. Constitution, a web of laws and an Aug 10, 1999, executive order from President Bill Clinton.

In practice western governors said the Obama administration has failed to consult with them adequately. As Exhibit A the governors in a resolution [2017-2](#) complain that the administration is developing new coal and oil and gas regulations, including imposing a moratorium on coal leasing, without talking to them.

Said the governors, "Despite the states' substantial interest in the revenues associated with these programs and agreements, the federal government has often limited the states from participating in the decisions affecting these revenues. For example, in rulemaking related to oil and gas and in the federal coal program, previous avenues for state involvement were eliminated and prospective state

involvement has been limited to participation as a general stakeholder."

Similarly the Western Governors' Association in resolution [2017-03](#) asked for limits on landscape-level planning. BLM in particular in a new planning rule of December 12 emphasized landscape planning, which some states say is designed to take input away from localities near BLM field offices.

"Federal landscape-level planning presents new issues for Governors to consider as they attempt to ensure consistency between state and federal requirements," said the resolution. "Agencies should provide Governors sufficient time to ensure a full and complete state review."

The governors said coordinated planning is particularly important under the Endangered Species Act (ESA). The Obama administration's Fish and Wildlife Service (FWS) did tilt toward the states Sept. 27, 2016, when it said petitions for the listing of species under the ESA must first alert each state where the species lives.

That will give the states an opportunity to submit data on the species directly to FWS or the National Marine Fisheries Administration.

On the other hand 18 states filed a lawsuit Nov. 29, 2016, against a separate FWS rule on critical habitat that the states said would give FWS authority to designate critical habitat for a species whether that habitat is used by a species or not. FWS published the rule on Feb. 11, 2016.

The western governors said their resolutions in part are aimed at the incoming Trump administration. "The inauguration of a new Administration presents an unusual opportunity to realign the state-federal relationship," the governors said. "Western Governors are eager to work in true partnership with the federal government and call upon the Administration to engage them in the development and execution of policy that impacts state authority."

The governors also revived an old complaint about the use of two percent of the state share of energy royalties to pay for federal administration of royalty collection programs.

"These agreements and programs are not proper subjects for cutbacks and sequestration," said the governors in resolution 2017-02. "For example, royalty payments owed to states are not federal expenditures. Federal land management agencies simply administer the distribution of those revenues to states. The federal government has no discretion over this money. Payment to the states is the only authorized use for these revenues."

Congress ordered the two percent deduction; federal agencies did not take the action on their own.

DoI does Alaska a big favor - speeds state land claims

Lost in the turmoil over an Obama administration ban on offshore oil and gas development in northern Alaska last month was a new BLM initiative to help the state's economy.

BLM said December 19 it was adopting new technology that will allow the state to lay claim to 40 million acres of land under the Alaska Statehood Act in half the time and half the cost as the existing program would require. The state has already received 60 million acres.

BLM said the new technology will use satellite navigation to identify state-claimed lands and their boundaries. Under the old system survey teams were shipped

to the filed for long periods. The teams then struggled through the backcountry to set monuments in the ground at regular, two-mile intervals.

BLM said that instead of taking 20 years to accomplish the task at a cost of \$120 million, it will be done in 10 years at a cost of \$60 million.

Said BLM Director Neil Kornze January 19, "I asked the BLM team in Alaska if we could come up with a more efficient way to complete the land transfers that are owed to the state. The innovations the team brought forward - that we're implementing today - ensure that the BLM is surveying land in ways that are faster, more accurate, and more cost-effective."

That initiative should help the state obtain use of the full 100 million acres it was entitled to under the Alaska Statehood Act of 1959. But the Alaska Congressional delegation and Gov. Bill Walker (I-Alaska) are concentrating their fire on other issues, such as offshore oil and gas development and a road to the community of King Cove.

The delegation was particularly upset about the Obama administration's December 20 announcement that it was placing 115 million acres of the Chukchi Sea and Beaufort Sea off limits to oil and gas leasing. However, the Trump administration reportedly intends to open much of that territory back up to leasing, if it can legally.

The delegation also continues to be upset with the Obama administration's refusal to authorize a land exchange to allow the construction of a road corridor through a wildlife refuge to the community of King Cove. The road through the Izembek National Wilderness Refuge would provide access to emergency health care for the citizens of King Cove.

Secretary of Interior Sally Jewell on Dec. 23, 2013, denied authority to construct the road because she didn't want to set the precedent of harming a wilderness area.

Just before the third anniversary of that decision last month Sen. Lisa Murkowski (R-Alaska) said the Alaska delegation would go all out to reverse Jewell's decision.

"The best news for the people of King Cove and much of the rest of Alaska is that the Obama administration is almost over," she said. "Along with Sen. (Dan) Sullivan (R-Alaska) and Congressman (Don) Young (R-Alaska), I will do everything I can to work with our new president to end the years of suffering and injustice that King Cove has faced at the hands of our own federal government."

Young said last month that he has already discussed the issue with the Trump administration's choice to be secretary of Interior, Rep. Ryan Zinke (R-Mont.)

Greens single out 10 species for help; ranchers scoff

A coalition of conservationists last month recommended that the Obama administration give priority to the protection of 10 species, including two found largely on public lands - the greater sage-grouse and the gray wolf.

Said Leda Huta, executive director of the Endangered Species Coalition, "We hope the next administration takes seriously its responsibility to protect endangered species and habitat. The fate of species is in their hands. Their actions could dictate whether species such as the vaquita, the red wolf, and others, become extinct in the wild."

However, if President-elect Trump follows the lead of western Republicans, as he is expected to do, he will become a critic of the Endangered Species Act (ESA), rather than a protection advocate.

Indeed the Public Lands Council and the National Cattlemen's Beef Association said the government should let ranchers be the stewards of imperiled species. "If the Endangered Species Coalition really wants to prioritize the continued survival of the sage grouse and the other species on its list, it should support true conservationist like America's ranchers," industry said in a press release.

The Endangered Species Coalition laid down its endangered species marker in a [report](#) calling on the Trump administration to be a protector. "Today, we need a conservationist president for a new generation," says the report. "We urge the Trump administration to pick up the mantle of protector." The coalition is composed of such groups as Defenders of Wildlife and the Natural Resources Defense Council.

High on the coalition's priority list of species is the sage-grouse. Implementation of the Endangered Species Act has become a surpassing issue in the West, particularly for the greater sage-grouse and other species of sage-grouse.

The Obama administration on Sept. 22, 2015, reached final decisions on greater-sage grouse policy, deciding NOT to list the bird as imperiled under the Endangered Species Act. Instead BLM and the Forest Service published 98 records of decisions to implement protection plans for the bird.

The State of Idaho, the hard rock mining industry and the oil and gas industry all filed lawsuits against the plans, arguing largely that state plans would protect the sage-grouse. Four environmental groups under lead plaintiff Western Watersheds Project filed their own lawsuit Feb. 25, 2016, that said the plans would allow more grazing, hard rock mining, and oil and gas development than "available science" says is wise.

Congress is getting into the act of criticizing the Obama plan. On July 15, 2016, the House approved a fiscal year 2017 Interior appropriations bill (HR 5538) that would not only forbid FWS from listing the greater sage-grouse, it would forbid implementation of BLM and Forest Service plans if states had plans in place, and almost all do. The spending measure would also forbid the Interior Department from completing the proposed 10 million-acre withdrawal.

The Senate Appropriations Committee June 16, 2016, approved a counterpart appropriations bill (S 3086) with the listing restriction, but the Senate would neither limit the implementation of plans nor forbid the 10 million-acre withdrawal. Congress has yet to complete a fiscal 2017 spending bill, preferring to extend fiscal 2016 spending levels and policies through April 28 of 2017.

The Endangered Species Coalition had this recommendation for the Trump administration on sage-grouse policy:

"A Note to the President: The new administration must be willing to fully implement and, where necessary, strengthen the federal sage-grouse conservation plans. The sage-grouse is an umbrella species for the Sagebrush Sea; more than 350 other sagebrush-dependent species will also suffer if the sage-grouse isn't well protected. The new administration must also vigorously oppose any congressional attempts to discard the federal conservation plans in favor of weaker state strategies."

The coalition's report, *Top 10 SPECIES PRIORITIES FOR A NEW ADMINISTRATION*, is available at:

<http://www.endangered.org/campaigns/annual-top-ten-report/removing-the-walls-to-recovery/>.

BLM switching to online O&G APDs, as well as leasing

BLM will publish a final rule shortly that will require all applications for permits to drill (APDs) for oil and gas to be submitted online. The online requirement will also apply to Notices of Staking (NOs).

Although BLM says it is moving to a 100 percent online filing system, it will establish a waiver process for applicants who have difficulty using electronics, such as access to the Internet or other technical problems. To obtain a waiver an applicant must describe plans for complying with the order.

In that BLM has already approved 200 drilling permits using its online system and has another 1,300 applications in the pipeline, the bureau says it is well on its way to a 100 percent system.

BLM says that the system may cut the processing time for APDs in half, from an average of 220 days now to 115 days for 90 percent of applications.

BLM announced the rule - also known as Onshore Order 1 - on December 21. It will go into effect 30 days after publication in the *Federal Register* of the formal, final rule.

The move to online APD processing is not nearly as controversial as BLM's complementary rule to move oil and gas lease sales online. Environmentalists charge that BLM is moving to online sales to avoid protests against fossil fuel development on the public lands.

Last fall BLM moved four oil and gas lease sales online to December. It shifted a sale in Colorado, the site of particularly vigorous protests, from Nov. 10, 2016, to December 8. It moved a Montana sale from Oct. 18, 2016, to December 8, a Utah sale from Nov. 15, 2016, to December 13 and an Eastern States sale from December 8 to December 13.

Environmentalists said the move to online leasing is designed to thwart protests from their Keep-it-in-the-Ground movement. But BLM said online sales are more productive and cheaper to conduct than live sales. "Online sales have the potential to generate greater competition and higher bonus bids by making participation easier, because bidders do not have to travel to a central location," BLM said at the time. "Online sales also provide an opportunity to reduce administrative costs associated with lease sale activities and to provide greater transparency to the public."

Environmentalists such as Taylor McKinnon with the Center for Biological Diversity said BLM is just trying to avoid demonstrations at live auctions. "The fact that they're now exercising discretion to conduct online auctions with rulemaking - in the face of the rise of the Keep it in the Ground movement and growing public protests at their auctions - is no coincidence at all," he said.

"They're moving auctions online to avoid climate protests, but that controversy and those protests will continue to grow. People can and will protest online auctions too."

The online APD processing rule Onshore Order No 1 is not to be confused with three other oil and gas production orders BLM posted on Oct. 17, 2016, that riled industry.

Onshore Order 3, Onshore Order 4 and Onshore Order 5 set standards for measuring onshore oil and gas production and for verifying the measurements. The Independent Petroleum Association of America (IPAA) immediately complained that the

new Onshore Order 3, Onshore Order 4 and Onshore Order 5 were overly prescriptive and would cost industry money.

"While we understand the need for modernizing some of these rules, the federal government's rulemaking approach has been inherently prescriptive," said IPAA Senior Vice President of Government Relations and Political Affairs Dan Naatz. "It would lock in costly technologies that will likely become obsolete in a few short years, while the industry continues to advance and technology improves."

As for the processing of APDs, industry and its Congressional supporters have long complained of excessive bureaucratic delays in gaining BLM approvals.

BLM said it used to receive about 5,000 APDs per year, but in fiscal year 2016 that ended in September 2016, it received about 1,600. In the future the bureau anticipates receiving 3,000 per year, depending on industry interest in obtaining the 10-year leases.

A final version of the soon to be final Onshore Order 1 is available at: <https://on.doi.gov/2hUckLW>.

IBLA decisions

(We post current Interior Board of Land Appeals decisions at our website, <http://www.plnfpr.com/ibla.htm>. IBLA may be contacted at: Interior Board of Land Appeals, 801 North Quincy St., MS 300-QC, Arlington, VA 22203. Phone (703) 235-3750.)

Subject: Oil and gas APD.

BLM decision: BLM will approve exploratory oil wells after preparing an environmental assessment (EA).

Appellant environmentalists: BLM failed to consider the impacts of production in the EA and IBLA should stay production.

IBLA decision: Affirmed BLM decision and denied stay.

Case identification: *Center for Biological Diversity, 189 IBLA 117*. Decided December 19, 2016. Twenty-four pages. Appeal of a BLM decision approving applications for permits to drill two new oil and gas wells within the Poso Creek Oil Field, near Bakersfield, Calif. DOI-BLM-CA-C060-2013-0257-EA.

IBLA argument: IBLA Administrative Judge Amy B. Sosin offered two holdings in this decision concerning the approval by BLM of applications for permit to drill (APDs) exploratory oil and gas leases. First, she upheld BLM's decision approving the APDs, rejecting a contention from the appellant environmental group that an underlying EA was inadequate because it didn't assess potential production from the wells. The appellant argued that the National Environmental Policy Act requires BLM to assess the environmental connectivity between an exploration project and subsequent production. Sosin held that BLM did that adequately. Second, Sosin rejected a request of a stay of production because of the connectivity issue. She held that production would require a separate action by BLM that is not now before the board.

Subject: Oil and gas unit agreement.

BLM decision: BLM will reject a noncompetitive oil and gas lease offer because the lessee did not join a unit agreement in a timely manner.

Appellant lessee: BLM erred because lessee never received BLM notice.

IBLA decision: Reversed BLM.

Case identification: *Liberty Petroleum Corporation, 189 IBLA 144*. Decided December 29, 2016. Fifteen pages. Appeal from a decision of the Utah State Office of BLM, rejecting noncompetitive oil and gas lease offer. UTU-76858.

IBLA argument: IBLA Administrative James F. Roberts said BLM erred in rejecting a noncompetitive oil and gas lease offer in Utah. BLM argued that it gave the appellant lessee 30 days to respond to a notice requiring the lessee to join a unit agreement, and the appellant failed to respond. But the appellant said - and Roberts concurred - that BLM did not prove that the appellant received the notice in the mail. The appellant said it first became aware of the notice when it examined BLM's case file. Roberts held that whether BLM or the Post Office erred, the bureau offered no proof that the appellant received the BLM notice. Said Roberts, "Here, we have no evidence either that the April 29 letter was

claimed by Liberty or that the letter was returned to BLM as unclaimed. Either a signed certified mail, return receipt card or the returned letter should be found in the record, unless some calamity befell the letter. However, whether USPS failed to follow its own procedures, in the course of obtaining Liberty's signature on the return receipt card or returning the letter, or some other calamity occurred, it is BLM, not Liberty, that must bear the consequences. It is well established that when an official communication is entrusted to USPS, USPS is BLM's agent for purposes of delivering the letter."

Notes

(Editors Note: For the time being we are combining Notes for both Public Lands News and Federal Park & Recreation into one place, here.)

FS tilts in favor of coal leasing. In the face of a lawsuit threat from environmentalists, the Forest Service last month reinstated a coal mining exception to a roadless area rule governing national forests in Colorado. The December 19 decision does not give a go-ahead to mine; it just makes clear the roadless rule does not forbid mining. The mine proponent would have to make further application to obtain a permit to mine. The coal mining exception was included in a July 3, 2012, Colorado-specific roadless area rule that in turn exempts national forests in the state from a 2001 Clinton administration roadless rule. The Colorado rule protects about 4.19 million acres of the 14.5 million acres the Forest Service manages in the state. The rule exempted 19,100 acres of coalmines in the North Fork area of the state. However, in September 2014 Judge R. Brooke Jackson in the U.S. District Court for Colorado ruled that an EIS covering the coalmine expansion was inadequate because it failed to assess the impacts of coal development *and* coal burning on climate change. Now the Forest Service has completed a supplemental EIS to meet Jackson's demands and in so doing has taken an initial step toward opening the North Fork Coal Mining Area to development by the Arch Coal Co. Environmentalists threatened to go back to court. "The loophole the Obama administration continues to push will open the door to bulldozing hundreds of drill pads and 67 miles of new road in undisturbed habitat for black bear, elk and the imperiled lynx," said Ted Zukoski, lead attorney for the environmentalist litigants from the Earthjustice law firm.

<https://www.fs.usda.gov/roadmain/roadless/coloradoroadlessrules>

BLM posts Calif. Desert withdrawal. The Bureau of Land Management (BLM) December 28 temporarily withdrew 1.3 million acres of the California Desert from hard rock mining as part of a comprehensive renewable energy plan. BLM says it will also prepare an EIS in anticipation of withdrawing the land for 20 years. Of course the Trump administration may be unwilling to carry out the 20-year withdrawal. BLM issued a decision on a Desert Renewable Energy Conservation Plan on Sept. 14, 2016, that begins an interim two-year withdrawal. The plan allows renewable energy companies to apply for projects on 388,000 acres of public lands. The Phase I plan applies only to public lands in the desert. Still to come is a Phase II plan that would include renewable energy recommendations from the State of California and seven counties in the area, in association with federal agencies. Before the state and counties do their thing BLM laid out its renewable energy plan for 10.8 million acres of the 22 million-acre California Desert. That theoretically gives the state and counties a base to work from. More information is available at: <https://www.blm.gov/node/8297>

BLM rearranges sage-grouse withdrawal. BLM December 30 shuffled its temporary 10 million-acre withdrawal to protect the greater sage-grouse in six states - Idaho, Montana, Nevada, Oregon, Utah, and Wyoming. The big change came in Nevada where, at the request of the state, BLM released 488,000 acres and substituted 388,000 acres. BLM said that would allow some development the state said was needed on the 388,000 acres. BLM made the original two-year segregation from mining on Sept. 24, 2015, to protect the greater sage-grouse. The bureau is now working on an EIS that would extend the withdrawal for 20 years. More information at: <https://www.blm.gov/press->

[release/blm-releases-draft-eis-proposed-withdrawal-crucial-sage-grouse-habitat.](#)

BLM filling management positions. With a new administration due in town in two weeks the Obama administration is filling numerous top posts. On January 3 the bureau named Jamie Connell as director of the agency's Oregon/Washington State Office. She is currently director of the BLM Montana State Office. The same day the bureau named Christopher J. McAlear as head of the National Conservation Lands Directorate. McAlear previously was district manager for the BLM Carson City District Office in Nevada. Finally, the bureau on January 3 named Howard M. Cantor to head its National Operations Center in Lakewood, Colo. Cantor has been serving as director of EPA's National Environment Investigations Center in Denver.

Wild horse board members sought. The newly-controversial BLM Wild Horse and Burro Advisory Board is seeking nominations from the public to fill three positions - public interest, research and natural resource management. The wild horse board has a huge workload and has in the past had a major impact on policy because of the overpopulation of wild horses on public lands in the West. In September the board created a national stir, to put it mildly, when it recommended BLM euthanize tens of thousands of unadoptable wild horses. The board said BLM should sell off as many of the 46,000 excess wild horses as it could that the bureau has corralled in the West. Then it recommended BLM euthanize the unadoptable animals. BLM annually sells only about 2,000-to-2,500 wild horses, so we are talking about euthanizing more than 40,000 animals. All told nearly 70,000 wild horses and burros roam the public range, or three times what BLM considers the appropriate management level of 27,000 wild horses and burros. Submit nominations by February 10 by e-mail to dboothe@blm.gov.

Public Land Law Institute. We don't often single out conferences but this one January 26-27 in Santa Fe, N.M., may be special. The Rocky Mountain Mineral Law Foundation will hold a conference on the complex web of public lands law just as the Trump administration takes over. Among the scheduled speakers are former Montana Gov. Dave Freudenthal (D) and former Interior Department Solicitor John Leshy. The Foundation charges various rates to attend ranging from \$75 for students to \$885 for non-foundation members. Contact: Rocky Mountain Mineral Law Foundation, 9191 Sheridan Blvd., #203, Westminster, CO 80031. (303) 321-8100. <https://www.rmmlf.org>.

Boxscore of Legislation

Fiscal year 2017 appropriations (until December 9)

HR 5325 (Graves). President Obama signed into law September 29 as PL 114-223. Extends funding at fiscal 2016 levels through December 9.

Fiscal year 2017 appropriations (full year)

HR 5538 (Calvert), S 3068 (Murkowski). House approved July 14. Senate committee approved June 16. Both would increase wildfire, PILT appropriations. Critics say numerous riders cripple bills.

Arctic National Wildlife Refuge (development)

HR 339 (Young), S 494 (Murkowski). Young introduced January 15, 2015. Murkowski introduced February 13, 2015. Would open coastal plain to O&G development.

Arctic National Wildlife Refuge (wilderness)

HR 238 (Huffman), S 2341 (Bennet). Huffman introduced January 8, 2015. Bennet introduced December 2, 2015. Would designate the coastal plain of the refuge as wilderness.

O&C Timber bill

S 132 (Wyden). Senate hearing July 16, 2015. Would insure timber sales of 400 million board feet each year from O&C counties.

Emergency fire spending

HR 167 (Simpson), S 235 (Wyden), S 508 (McCain), HR 2647 (Westerman). Simpson introduced January 6, 2015. Wyden introduced January 22, 2015. McCain introduced February 12, 2015. House approved HR 2647 July 9, 2015. Senate hearing November 17, 2015. All would shift emergency fire fighting costs out of line appropriations and into disaster spending. McCain, Westerman would also increase timber harvests. Appropriators did not include provision in fiscal 2016 spending bill above, but did approve more money for wildfires.

Energy omnibus

S 2012 (Murkowski). Senate approved April 20. House approved its version May 12. Conference began September 8. Senate would test expedited oil and gas APDs, revise geothermal leasing, accelerate critical mineral permits. House added hazardous fuels and other bills to S 2012.

Monument restrictions

HR 330 (Young), HR 488 (Amodei), S 437 (Murkowski), HR 900 (Labrador), S 228 (Crapo). Young introduced January 13, 2015. Amodei introduced January 22, 2015. Murkowski introduced February 10, 2015. Labrador introduced February 11, 2015. Crapo introduced January 21, 2015. All would require Congressional or state approval of national monuments.

County assistance

S 517 (Wyden), HR 2 (Burgess), S 1925 (Heinrich). Wyden introduced February 12. Heinrich introduced August 4, 2015. President signed HR 2 into law (PL 114-10) April 16, 2015. Wyden and Heinrich would guarantee money for the payments-in-lieu of taxes program and extend Secure Rural Schools at \$360 million per year for three years.

Hard rock mining revision

HR 963 (Grijalva), S 2254 (Udall). Grijalva introduced February 13, 2015. Udall introduced November 5, 2015. Grijalva would set an eight percent royalty on new mines, establish tougher reclamation standards and strengthen BLM right to veto a mining plan. Udall would establish a royalty between two and five percent on new mines.

Critical minerals

S 883 (Murkowski), HR 1937 (Amodei), S 2012 (Murkowski). Senate approved July 30, 2015, in omnibus energy bill (S 2012). House approved HR 1937 in its version of S 2012. House would have federal land managers establish time lines for acting on all mineral permits.

Land and Water Conservation Fund

S 338 (Burr), S 890 (Cantwell), HR 1814 (Grijalva), S 2012 (Murkowski), S 1925 (Heinrich), S 2165 (Cantwell), unnumbered draft (Bishop), HR 4151 (Simpson), HR 2029 (Dent). Fiscal 2016 appropriations bill extends program as is for three years. Grijalva introduced April 15, 2015. Senate approved Murkowski bill April 20. Bishop posted draft November 5, 2015. Simpson introduced December 1, 2015. All but Bishop would extend program at \$900 million per year in perpetuity. Bishop would extend for seven years. S 890, HR 1814 and S 1925 would guarantee the money each year. Simpson would change allocation to 40 percent federal, 40 percent state and related initiatives and 20 percent flexible.

NPS Centennial

HR 3556 (Grijalva), S 2257 (Cantwell), HR 4680 (Bishop). House committee reported Bishop bill May 19. Senate approved placeholder legislation (S 2012) April 20. S 3556 and S 2557 are administration bills that would have Congress put up an additional \$800 million for the Park Service Centennial in 2016. Fiscal 2016 spending bill includes extra \$100 million for program. HR 4680 includes little new money but several important program authorizations.

Federal Parks & Rec

addendum to Public Lands News

January 6, 2017

- * *Jarvis retires after posting new policies*
- * *NPS carries out controversial philanthropy initiative*
- * *GOP gears up; Is Zinke in trouble? (See Public Lands News article)*
- * *Obama establishes Bears Ears Monument (See Public Lands News article)*
- * *House smooths way for land transfers (See Public Lands News article)*

Jarvis steps down early as his policy agenda evolves

Park Service Director Jonathan B. Jarvis did not wait for the conclusion of the Obama administration on January 19 to retire. He called it a day on January 3.

In a note he sent to NPS employees just before Christmas he strongly defended his sometimes problematic seven-year term of office.

"The National Park Service is not perfect, but it is strong, resilient and beloved by the American people," he told service employees. "The NPS fearlessly addresses some of the most complex issues of our society from climate change to civil rights and stands as a beacon to those who work to achieve the highest aspirations of the nation."

He quoted Dr. Martin Luther King, Jr., who said "the arc of the universe bends toward justice." Added Jarvis, "The collective weight of the National Park Service pulls that bend closer to environmental and social justice for all those who call this planet home. Keep pulling, be safe and I will see you in the parks."

On the upside Jarvis was in charge of a Centennial of the Park Service in 2016 that saw almost 325 million people troop to the national parks, a record. He also helped persuade Congress to significantly increase appropriations for the parks and partners of all stripes to contribute to the National Park System.

On the other hand Jarvis was attacked for permitting a hostile workplace to develop in the field, complete with several charges of sexual harassment. The House Oversight Committee in particular has in a bipartisan way criticized the agency for a series of reports charging an abusive workplace.

Jarvis's most persistent critic, the environmental group Public Employees for Environmental Responsibility (PEER), was glad to see him go.

"By almost any measure, Jon Jarvis is the worst Park Service Director within living memory," said PEER Executive Director Jeff Ruch, arguing that national parks were far better protected during the Clinton and both Bush administrations. "In a misguided quest for 'relevancy,' Jarvis repeatedly sold out the very values and resources at the core of the Park Service mission."

In its bill of particulars PEER complained that Jarvis did not attempt to block the use of lead-based ammunition in the park, allowed destructive uses in the parks and gave corporate donors expanded authority within the parks.

To add fuel to PEER's fire Jarvis on December 28 signed a Director's Order #11 on philanthropic partnerships that would allow the director and deputy directors to solicit contributions from businesses. That, said critics such as PEER, could give

businesses undue influence over park management. Also controversial, the order would outright allow partnerships with companies that produce and sell alcohol. (See *following article*.)

More to PEER's way of thinking, on December 20 Jarvis signed off on a separate landmark order that insures that protection of the resource is a first priority for the agency, at least for a little while.

In the face of criticism from Republican Congressional policy makers Jarvis signed Director's Order #100 that would have NPS tilt toward protection if the impacts of an activity were uncertain. At the heart of the white paper lies a "Precautionary Principle" strategy. It would establish protection as a priority in the National Park System even if a threat were not clear and imminent.

Order #100 describes the policy this way: "The Precautionary Principle requires that, when an action, activity, or emerging condition raises plausible or probable threats of harm to park resources and/or human health, management should take anticipatory action even when there is uncertainty. When such uncertainty exists, NPS managers will take actions that err on the side of caution to protect resources in accordance with existing authorities, including NPS obligations to prevent resource impairment . . ."

The order is a prime candidate for a reversal or a rewrite by the Trump administration, but that may take time. NPS devoted four years to writing the Jarvis proposal.

Director's Order #100 is one of two major policies that Jarvis was working on in the last days of his watch that would guide the National Park System over the next decades. The other is a "system" plan that assesses the needs of the parks.

An agency spokesman said last week that NPS is "on course to finish the park system plan before the end of the current administration." That ends January 19.

NPS described the system plan this way: "The purpose of a System Plan is to provide 'a framework for the proactive direction for the future of the national park system, identifying gaps in the nation's protected natural and cultural areas, and establishing a collaborative conservation system that fully reflects our nation's cultural and natural heritage.'"

Meanwhile, visitation to the parks this year has set repeated records. At the end of 2016 NPS had recorded a 5.6 percent increase in 2016 over 2015, which itself was a record year. Through December 324,516,065 people entered the national parks, compared to 307,247,252 at this time last year.

Jarvis philanthropy policy still includes controversies

National Park Service Director Jonathan B. Jarvis added another plank to his legacy December 28, signing an [order](#) that establishes a new policy on philanthropic donations and partnerships.

The Director's Order #21 is designed to make it easier for partners to contribute to the National Park System, and for park employees to accept those contributions. At the same time Jarvis said the order would guard against commercialization of the parks. Jarvis retired as director of the Park Service January 3 (*see previous article*).

The final order does include several provisions that critics have complained would lead to increased commercialization of the parks and would compromise agency employees.

One such provision would allow NPS leaders to accept donations of up to \$5 million, including associate/assistant directors, regional directors and superintendents.

Said Jarvis, "While there will continue to be opportunities for limited donor recognition in parks, no one is going to commercialize national parks and park superintendents still won't be allowed to solicit donations. We have federal law to back us up on that."

Said Kristen Strader, campaign coordinator for Public Citizen's Commercial Alert Program, "It is disgraceful that the parks service plans to sell our national parks to the highest bidder despite overwhelming public opposition to increased commercialism in our national parks. More than 215,000 petition signers and hundreds of commenters opposed this policy."

A second controversial provision would allow partnerships with companies that produce and sell alcohol.

Says the order, "After the effective date of this Order and under its provisions and standards, the NPS may permit - after thorough review and approval by the Director - philanthropic partnerships with, and accept donations from, corporations that produce or distribute alcohol."

An association of NPS retirees, marching as the Coalition to Protect America's National Parks, urged NPS to use caution in associating the agency with alcoholic beverages. "If NPS is, in fact, going to accept donations from 'from corporations that produce or distribute alcohol,' then NPS must establish a much better defined criteria for determining when to accept (or not accept) such donations AND what the donations would be used for," said the coalition.

The final Order #21 is available at:

https://www.nps.gov/policy/DOrders/DO_21.htm.

Order #21 is the second major policy that Jarvis approved last month. On December 20 he issued an order that insures that protection of the resource is a first priority for the agency, at least for a little while.

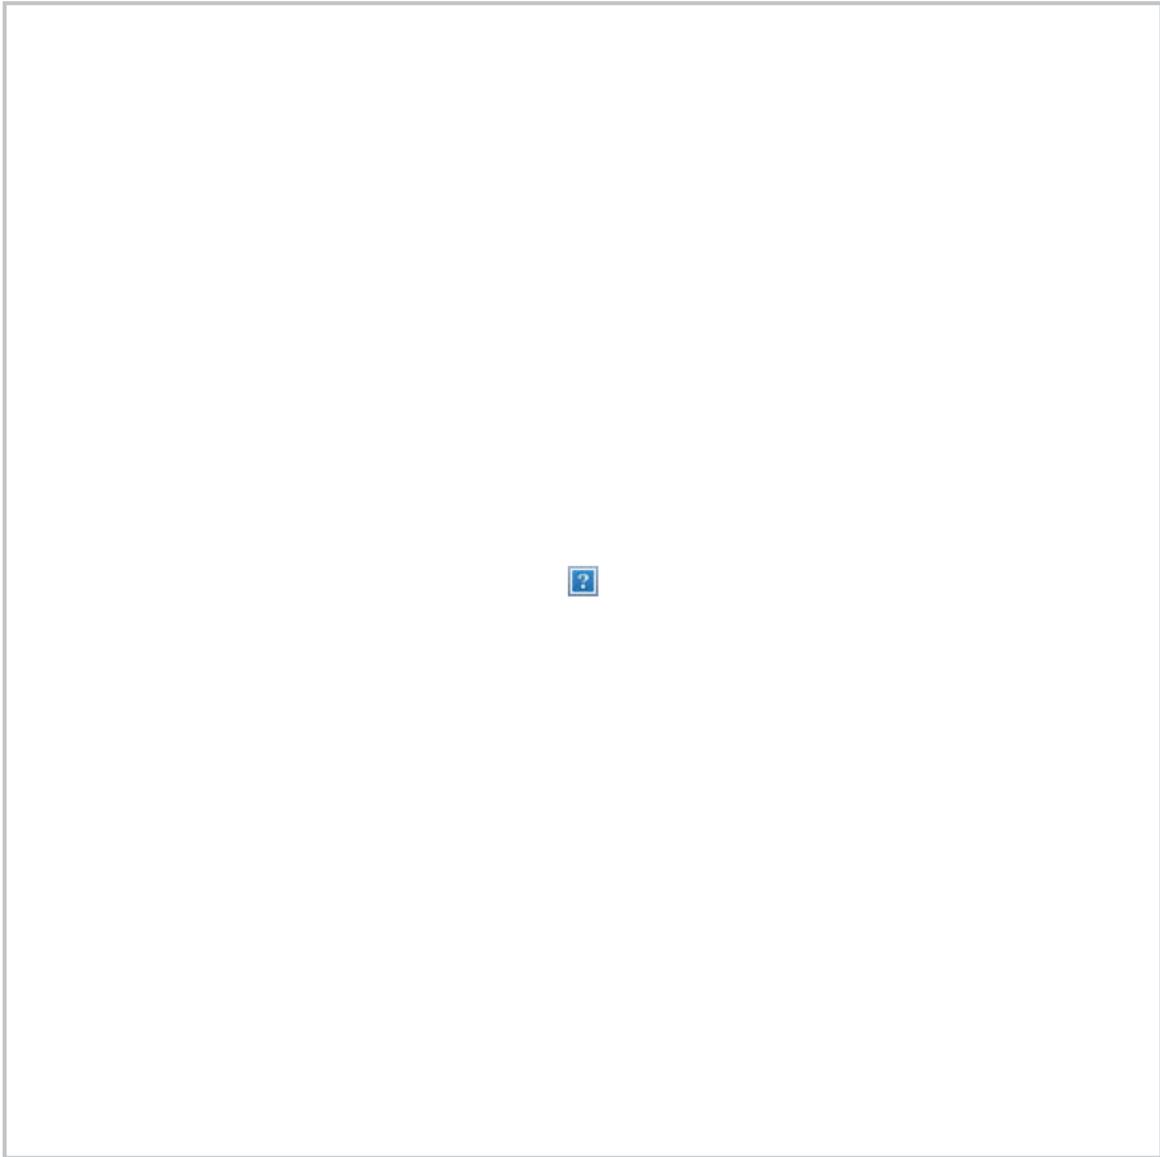

Jarvis signed the order in the face of criticism from Republican Congressional policy makers. At the heart of the white paper lies a "Precautionary Principle" strategy. It would establish protection as a priority even if a threat were not clear and imminent.

The order is a prime candidate for a reversal or a rewrite by the Trump administration, but that may take time. NPS devoted four years to writing the Jarvis proposal.

Finally, still in the works is a third plank called a system plan that would assess the needs of the parks over the next decades. An agency spokesman said last week that NPS is "on course to finish the park system plan before the end of the current administration." That ends January 19.

NPS described the system plan this way: "The purpose of a System Plan is to provide 'a framework for the proactive direction for the future of the national park system, identifying gaps in the nation's protected natural and cultural areas, and establishing a collaborative conservation system that fully reflects our nation's cultural and natural heritage.'"

Director's Order #100 is available at: https://www.nps.gov/policy/DOrders/DO_100.htm.

Following up with new Monument expansion support letters:

- The Klamath Tribes to Sen. Merkley – November 17, 2016
 - Governor Kate Brown to Secretary Sally Jewell – November 21, 2016
-

From: Dave Willis [<mailto:sodamtn@mind.net>]

Sent: Friday, November 11, 2016 2:22 PM

This is the last chance to protect public land in Oregon (and elsewhere) for a perilously long time. Indeed, public lands in Oregon (and elsewhere) look to very soon be under heavy siege. I believe the way the red/blue state map shook out means Cascade-Siskiyou should still be a very live option.

Attached please find some local support for Cascade-Siskiyou Monument expansion...

- 10/30/16 support letter from local Oregon state Sen. Kevin Talbert
- 8/3/15 support letter from local Oregon state Sen. Alan Bates (deceased August 2016)
- 7/6/15 support letter from local Oregon state Rep. Peter Buckley
- 8/23/16 published support statement by local Oregon state Rep-elect Pam Marsh
- 7/11/15 unanimous support letter from Ashland Chamber of Commerce board
- 5/28/2015 support letter from retired Ashland City Administrator Brian Almquist
- City of Ashland support...
 - 6/29/16 letter from Mayor Stromberg to Sec'y Jewell
 - 6/16/15 unanimous City Council resolution supporting expansion
 - 6/20/01 unanimous City Council resolution supporting existing Monument (vs. Bush/Cheney & Jackson County Commissioners' efforts against)
- 8/1/16 unanimous Talent Chamber of Commerce board letter supporting expansion
- City of Talent support...
 - 8/31/16 letter from Mayor Stricker to Sec'y Jewell
 - 8/17/16 unanimous City Council resolution supporting expansion

NOTE: Ashland and Talent are the two closest towns to the Monument.

For a bigger, wilder Monument –

II. Weekly Report:

Week Ahead Announcements- Presidential and Department/Agency Priorities – January 22-28, 2017

January 22: The deadline for public comments on the BLM-NV draft Pine Nut Mountains HMA Plan, a ten-year management plan for wild horses in the Pine Nut Mountains.

Week of January 23: Rep. Grijalva (D-AZ) plans to visit the BLM-NM Organ Mountains-Desert Peaks National Monument. Date and BLM participation TBD.

Between January 23 and March 8: The BLM-AK Central Yukon Field Office will hold public meetings in 11 communities in the planning area, as well as in Anchorage and Fairbanks, to prepare a range of alternatives for the Draft Central Yukon RMP.

January 23: The BLM-WY Rock Springs FO will hold a public open house on the Sweetwater Solar Energy Project to solicit comments regarding issues, concerns and potential alternatives. The proposed photovoltaic solar project would encompass approximately 703 acres of which 638 acres would be located on public land. While the project is not within greater sage-grouse core areas, it may impact nesting and/or breeding habitat.

January 23: BLM-WY River/Bighorn Basin District fire program staff will attend a meeting with partners in Lander to discuss planning and preparation for the 2017 solar eclipse. A public meeting will be held on January 24 in Thermopolis and the BLM will attend.

January 24-25: The BLM MT/DKs Miles City FO has scheduled public scoping meetings regarding the Spring Creek Coal EIS on January 24 in Sheridan, WY, and January 25 in Colstrip, MT. The BLM is the lead agency.

January 25 and 26: The BLM will attend the Fort Berthold Federal Partners Meeting to be held in West Denver, Colorado at a BIA Office. The meeting will address issues associated with Bakken development of oil and gas on the Fort Berthold Indian Reservation and is not open to the public.

January 25: The BLM-WY Casper FO will meet with Wyoming Game and Fish Department (WGFD) to work toward the completion of the transfer of between 1,200 to 1,600 acres of land around Table Mountain from the BLM to the WGFD.

January 25: BLM New Mexico State Office will hold their first online Oil and Gas lease sale with 4 parcels covering 842 acres in Sandoval and Rio Arriba counties (NM). Parcels are available for viewing on the Energynet website - <https://www.energynet.com>.

January 26-27: BLM-OR will meet with a group of five Korean Nationals who are interested in local conservation efforts.

January 26-28: BLM-OR/WA will host public meetings for the Yaquina Head Recreation Area Management Plan on January 26 in Salem and January 27 and 28 at the Yaquina Head Outstanding Natural Area in Newport. A draft management plan is expected late summer 2017.

January 28: The BLM-AK State Director and BLM Arctic Office Manager will meet with the North Slope Borough Mayor in Utqiagvik to discuss projects involving the North Slope Borough and the NPR-A, including the Regional Mitigation Strategy, development of the Greater Mooses Tooth 2 oil and gas project, and the Legacy Wells program.

Media

Multiple Outlets- Oil & Gas Leases near Zion National Park (UT): Reporter Scott Streater (E&E), Brian Maffly (Salt Lake Tribune) and David DeMille (The Spectrum) requested comment on a press release issued by the Southern Utah Wilderness Alliance and the National Parks Conservation Association regarding two nominated oil and gas lease parcels located two miles from Zion National Park. UT PA Ryan Sutherland explained that there are no active BLM leases or wells in Washington County, UT and that the next lease sale is scheduled for June 15.

AP- Sweetwater Solar Energy Project (WY): Associated Press reporter Mead Gruver wanted to know whether the Sweetwater project would be Wyoming's first commercial solar facility in WY, and what particular issues could come up with permitting PV solar projects on BLM lands? (Sweetwater Solar, LLC submitted a proposal for a right-of-way grant to develop a 702-acre solar panel project area) BLM Rock Springs FM Kimberlee explained the process and that this would be the first commercial solar facility in WY. She also explained that the only safety issues were the 3-buried oil pipelines and power lines that were in the area, and that none of the solar panels would interfere with the oil pipelines or the power lines where the solar panels would be installed.

San Francisco Chronicle- CA Coastal NM Expansion (CA): Reporter Curtis Alexander is working on a story about the California Coastal National Monument expansion. He was on-site at the Coast Dairies property with a photographer and had general questions about management, public access and what monument designation means for Coast Dairies. CA PA provided him with general information.

Mail Tribune- Cascade-Siskiyou NM (WO): Reporter Mark Freeman requested information on the origination of the proclamation and map for the C-S NM. He wanted to know who determined the exact boundaries and wrote the actual document. WO PA is working this query.

Houston Chronicle- National Monuments (WO): Reporter James Osborne requested information on the amount of national conservation lands before and after the recent designations. He also requested a backgrounder on how the Bears Ears designation will affect leases in the area. WO PA is working this query.

Oregon Public Radio- Cascade-Siskiyou NM (WO/OR): Reporter Jeff Mapes requested information on whether there were recent solicitor opinions that stated it was ok for the President to designate lands in areas of timber harvests. He stated that the timber industry claimed prior DOI solicitor opinions stated areas of timber harvest could not have a NM designation. OR PA and WO PA are working this query.

A reporter from *The World Newspaper* in Coos Bay interviewed BLM-OR/WA about the timber receipts payment distribution. The reporter inquired about historical and current payments. She also asked questions regarding the future of the Coos Bay District timber program. The article is expected to be fair towards the BLM.

30-60 Day Look Ahead

Mid to late January: BLM plans to sign the Boardman to Hemingway ROD. Oregon Plan amendments are being handled concurrently and that decision will be issued simultaneously with the ROD for the EIS and Approval to issue a grant.

Mid to late January: The BLM-UT Moab FO will release for public review an EA for the Needles and Anticline Overlook (Canyon Rims) Road Improvement Project to improve public access and safety. The area is near the Bears Ears National Monument.

Late January TBD: Ed Roberson, BLM Utah State Director, plans to meet with Sen. Hatch. Location, time, and date TBD.

January 29: The Society for Rangeland Management Annual Meeting will be held in St. George, UT. BLM employees from various offices are planning to attend.

January 29 (tentative): BLM-NV plans to gather up to 135 wild horses from the Reveille HMA and surrounding Reveille Allotment. Eighty wild horses will be removed and transported to a BLM adoption facility while approximately 55 horses will be released back to the HMA and treated with fertility control for a post-gather population of 93.

January 30: The BLM and Forest Service will announce the annual adjusted grazing fee for public lands.

January 30: The BLM will meet with representatives from 22 countries to discuss climate change related mitigation measures and clean energy at the Main Interior building.

Late January: The BLM-UT Price Field Office will release for public review an EA analyzing a recreation management plan for the Joe's Valley Bouldering Area.

Late January: The BLM-CO Uncompahgre FO and the Grand Mesa, Uncompahgre and Gunnison National Forests will announce a public scoping on a natural gas development proposal about 12 miles north of Paonia, Colorado.

Early FY2017: The finalized implementation plan for Wilderness 2020 Vision is expected to be issued.

First Week of February: The BLM-ID Challis Field Office plans to capture up to 150 wild horses through bait trapping and remove up to 50 within the Challis HMA to reach the AML of 185-253. The current population estimate is 285. The gather is expected to be completed by mid-March.

February 3: The deadline for public comments on the EA for the competitive oil and gas lease sale scheduled for June 13, 2017 in the BLM-NV Battle Mountain District. The BLM received nominations for 106 parcels of public land to offer for leasing, totaling approximately 195,732 acres.

February 3-11: The 2017 King of the Hammers Ultra Race will be held at the Johnson Valley OHV Area in San Bernardino County. This event, authorized under a BLM special recreation permit, draws thousands of participants and spectators and has received national and international attention for its unique OHV and rock crawling competitions.

February 7: BLM-WY will hold an in-person Oil and Gas lease sale, offering 283 parcels totaling 184,784.25 acres located in Campbell, Carbon, Converse, Crook, Fremont, Johnson, Natrona, Niobrara, Sheridan, and Weston counties. Forty-one of the parcels are located within PHMA and the remaining parcels are within sage-grouse GHMA. Three protests have been received. The Powder River Basin Resource Council is protesting because some parcels or portions of parcels are within the Fortification Creek Planning Area, and they assert the EA fails to address potential impacts to the Fortification Creek area, including the Fortification Creek elk herd. WildEarth Guardians has concerns that the BLM fails to adequately disclose potential greenhouse gas emissions and analyze climate change. Davis Graham & Stubbs, LLP is protesting a single parcel due to concerns related to unleased lands within Communitization Agreements.

February 7-8: The Wildlife and Hunting Heritage Conservation Council meeting will be held at DOI-MIB.

February 8 (approximate): BLM-UT will begin helicopter gather operations in the Cedar Mountain HMA to gather 700 wild horses, remove 300, treat 150 with fertility control and release treated mares with remaining stallions back to the HMA.

February 9: The 60-day public scoping period ends for the BLM-MT/DKs Missoula RMP.

February 11: Deadline for public comments on the Preliminary EA for the Blue Wing Complex Gather Plan in the BLM-NV Winnemucca District.

February 12-15: The Corps Network will hold its annual conference in Washington. BLM staff will attend.

February 13-16: National Native Seed Conference will be held in Washington, D.C. The conference connects Research, Industry, Land Management, and Restoration professionals, providing the premier opportunity to develop relationships and share information about the collection, research and development, production, and use of native plant materials.

Feb 13-25: The Mineral resources report of the Sagebrush Focal Areas of Idaho, Montana, Nevada, Oregon, Utah, and Wyoming will be available the sage-brush focal areas. BLM WO received 600 copies from the USGS. These reports will be distributed at the planned public meeting in February and will be sent out to the state and field offices. Public meetings will be held for the proposed SFA Withdrawal EIS at 8 locations: Malta, MT; Salt Lake City, UT; Rock Springs, WY; Idaho Falls, ID; Reno, NV; Lake View, OR; Elko, NV, and Boise, ID from 2/13-2/16 and 2/21-2/24.

February 13-14: PV Solar America East (Boston, MA)

February 14-17: The BLM Executive Leadership Team will meet in Washington, D.C.

February 15-19: The 41st Annual National Wild Turkey Federation Convention & Sport Show will be held in Nashville, TN. The event includes a National Technical Committee meeting and partner awards ceremony. BLM, USFS, and state agency partners will participate.

February 15: BLM-OR/WA will hold the Blue Mule Timber Sale including 5,500 MBF of thinning harvest on 324 acres. The BLM will also hold the Quarry 5 Timber Sale including 7,358 MBF of regeneration and thinning harvest on 283 acres.

February 16-19: The 2017 Western Hunting and Conservation Expo will be held in Salt Lake City, UT. This annual gathering is sponsored by the Mule Deer Foundation and Sportsmen for Fish and Wildlife. Scheduled events include a WAFWA Mule Deer Working Group meeting on February 15 and partner Awards Breakfast on February 18. BLM, USFS, and state agency partners will participate.

February 17: BLM-OR/WA will hold the Six One Timber Sale consisting of 68 acres of regeneration harvest and one acre of right-of-way clearing. This project is expected to be controversial as it is a regeneration harvest.

February 25-March 1: The National Association of Counties Legislative Conference will be held in Washington, D.C.

February 25: Northern Nevada Correctional Center Wild Horse Adoption. Fifteen-20 wild horses will be offered for adoption.

February 28: A Lands with Wilderness Characteristics Inventory and Monitoring Indefinite Delivery and Indefinite Quantity Contract is being developed for review and posting by the NOC.

Late February: BLM-NV plans to issue the final Dixie Meadows Geothermal Project EA and FONSI. The project area consists of approximately 22,021 acres of public land. The proponent (Ormat) is seeking approval to drill temperature gradient wells, and to drill and test observation wells and production wells at up to 20 specific locations.

March 2-4: The Rocky Mountain Elk Foundation National Convention will be held in Nashville, TN. The agenda includes a Conservation Partners Meeting with a sage-grouse panel discussion on Thursday, March 2. BLM, USFS, NRCS, and state agency partners will participate.

March 4-11: The North American Wildlife and Natural Resources Conference will be held in Spokane, Washington. This year's BLM Partners meeting will be held on of March 7. BLM staff will attend.

March 7: The Great Alaska Sportsman Show will be held in Anchorage, Alaska.

March 9: BLM-CO is scheduled to hold an on-line oil and gas lease sale.

March 14: BLM-NV and MT are scheduled to hold an on-line oil and gas lease sale. BLM-NV will offer 67 parcels totaling almost 116,000 acres in the Elko District.

March 16: On January 12, the BLM-ESO announced the application to withdraw ecologically significant lands within the Superior National Forest in northern Minnesota from new mining claims by segregating the lands for two years. On March 16, the Superior National Forest is scheduled to hold a public meeting in Duluth, Minnesota.

March 19-22: The American Indian Higher Education Consortium Student Conference will be held in Rapid City, South Dakota.

March 23: BLM-ESO and UT are scheduled to hold an on-line oil and gas lease sale.

March-25-26: The Arizona Outdoor Expo will be held in Phoenix, Arizona.

March 27-28: The Public Lands Council/ National Cattleman's Beef Association Legislative Conference will be held in Washington, D.C.

April 22: Earth Day

April 23: National Volunteer Week

April 24-26: The Utility Solar Conference will be held in Tucson, Arizona.

January 25 and 26: The BLM will attend the Fort Berthold Federal Partners Meeting to be held in West Denver, Colorado at a BIA Office. The meeting will address issues associated with Bakken development of oil and gas on the Fort Berthold Indian Reservation and is not open to the public.

January 25: The BLM-WY Casper FO will meet with Wyoming Game and Fish Department (WGFD) to work toward the completion of the transfer of between 1,200 to 1,600 acres of land around Table Mountain from the BLM to the WGFD.

January 25: BLM New Mexico State Office will hold their first online Oil and Gas lease sale with 4 parcels covering 842 acres in Sandoval and Rio Arriba counties (NM). Parcels are available for viewing on the Energynet website - <https://www.energynet.com>.

January 26-27: BLM-OR will meet with a group of five Korean Nationals who are interested in local conservation efforts.

January 26-28: BLM-OR/WA will host public meetings for the Yaquina Head Recreation Area Management Plan on January 26 in Salem and January 27 and 28 at the Yaquina Head Outstanding Natural Area in Newport. A draft management plan is expected late summer 2017.

January 28: The BLM-AK State Director and BLM Arctic Office Manager will meet with the North Slope Borough Mayor in Utqiagvik to discuss projects involving the North Slope Borough and the NPR-A, including the Regional Mitigation Strategy, development of the Greater Mooses Tooth 2 oil and gas project, and the Legacy Wells program.

Media

Multiple Outlets- Oil & Gas Leases near Zion National Park (UT): Reporter Scott Streater (E&E), Brian Maffly (Salt Lake Tribune) and David DeMille (The Spectrum) requested comment on a press release issued by the Southern Utah Wilderness Alliance and the National Parks Conservation Association regarding two nominated oil and gas lease parcels located two miles from Zion National Park. UT PA Ryan Sutherland explained that there are no active BLM leases or wells in Washington County, UT and that the next lease sale is scheduled for June 15.

AP- Sweetwater Solar Energy Project (WY): Associated Press reporter Mead Gruver wanted to know whether the Sweetwater project would be Wyoming's first commercial solar facility in WY, and what particular issues could come up with permitting PV solar projects on BLM lands? (Sweetwater Solar, LLC submitted a proposal for a right-of-way grant to develop a 702-acre solar panel project area) BLM Rock Springs FM Kimberlee explained the process and that this would be the first commercial solar facility in WY. She also explained that the only safety issues were the 3-buried oil pipelines and power lines that were in the area, and that none of the solar panels would interfere with the oil pipelines or the power lines where the solar panels would be installed.

San Francisco Chronicle- CA Coastal NM Expansion (CA): Reporter Curtis Alexander is working on a story about the California Coastal National Monument expansion. He was on-site at the Coast Dairies property with a photographer and had general questions about management, public access and what monument designation means for Coast Dairies. CA PA provided him with general information.

Mail Tribune- Cascade-Siskiyou NM (WO): Reporter Mark Freeman requested information on the origination of the proclamation and map for the C-S NM. He wanted to know who determined the exact boundaries and wrote the actual document. WO PA is working this query.

Houston Chronicle- National Monuments (WO): Reporter James Osborne requested information on the amount of national conservation lands before and after the recent designations. He also requested a backgrounder on how the Bears Ears designation will affect leases in the area. WO PA is working this query.

Oregon Public Radio- Cascade-Siskiyou NM (WO/OR): Reporter Jeff Mapes requested information on whether there were recent solicitor opinions that stated it was ok for the President to designate lands in areas of timber harvests. He stated that the timber industry claimed prior DOI solicitor opinions stated areas of timber harvest could not have a NM designation. OR PA and WO PA are working this query.

A reporter from *The World Newspaper* in Coos Bay interviewed BLM-OR/WA about the timber receipts payment distribution. The reporter inquired about historical and current payments. She also asked questions regarding the future of the Coos Bay District timber program. The article is expected to be fair towards the BLM.

30-60 Day Look Ahead

Mid to late January: BLM plans to sign the Boardman to Hemingway ROD. Oregon Plan amendments are being handled concurrently and that decision will be issued simultaneously with the ROD for the EIS and Approval to issue a grant.

Mid to late January: The BLM-UT Moab FO will release for public review an EA for the Needles and Anticline Overlook (Canyon Rims) Road Improvement Project to improve public access and safety. The area is near the Bears Ears National Monument.

Late January TBD: Ed Roberson, BLM Utah State Director, plans to meet with Sen. Hatch. Location, time, and date TBD.

January 29: The Society for Rangeland Management Annual Meeting will be held in St. George, UT. BLM employees from various offices are planning to attend.

January 29 (tentative): BLM-NV plans to gather up to 135 wild horses from the Reveille HMA and surrounding Reveille Allotment. Eighty wild horses will be removed and transported to a BLM adoption facility while approximately 55 horses will be released back to the HMA and treated with fertility control for a post-gather population of 93.

January 30: The BLM and Forest Service will announce the annual adjusted grazing fee for public lands.

January 30: The BLM will meet with representatives from 22 countries to discuss climate change related mitigation measures and clean energy at the Main Interior building.

Late January: The BLM-UT Price Field Office will release for public review an EA analyzing a recreation management plan for the Joe's Valley Bouldering Area.

Late January: The BLM-CO Uncompahgre FO and the Grand Mesa, Uncompahgre and Gunnison National Forests will announce a public scoping on a natural gas development proposal about 12 miles north of Paonia, Colorado.

Early FY2017: The finalized implementation plan for Wilderness 2020 Vision is expected to be issued.

First Week of February: The BLM-ID Challis Field Office plans to capture up to 150 wild horses through bait trapping and remove up to 50 within the Challis HMA to reach the AML of 185-253. The current population estimate is 285. The gather is expected to be completed by mid-March.

February 3: The deadline for public comments on the EA for the competitive oil and gas lease sale scheduled for June 13, 2017 in the BLM-NV Battle Mountain District. The BLM received nominations for 106 parcels of public land to offer for leasing, totaling approximately 195,732 acres.

February 3-11: The 2017 King of the Hammers Ultra Race will be held at the Johnson Valley OHV Area in San Bernardino County. This event, authorized under a BLM special recreation permit, draws thousands of participants and spectators and has received national and international attention for its unique OHV and rock crawling competitions.

February 7: BLM-WY will hold an in-person Oil and Gas lease sale, offering 283 parcels totaling 184,784.25 acres located in Campbell, Carbon, Converse, Crook, Fremont, Johnson, Natrona, Niobrara, Sheridan, and Weston counties. Forty-one of the parcels are located within PHMA and the remaining parcels are within sage-grouse GHMA. Three protests have been received. The Powder River Basin Resource Council is protesting because some parcels or portions of parcels are within the Fortification Creek Planning Area, and they assert the EA fails to address potential impacts to the Fortification Creek area, including the Fortification Creek elk herd. WildEarth Guardians has concerns that the BLM fails to adequately disclose potential greenhouse gas emissions and analyze climate change. Davis Graham & Stubbs, LLP is protesting a single parcel due to concerns related to unleased lands within Communitization Agreements.

February 7-8: The Wildlife and Hunting Heritage Conservation Council meeting will be held at DOI-MIB.

February 8 (approximate): BLM-UT will begin helicopter gather operations in the Cedar Mountain HMA to gather 700 wild horses, remove 300, treat 150 with fertility control and release treated mares with remaining stallions back to the HMA.

February 9: The 60-day public scoping period ends for the BLM-MT/DKs Missoula RMP.

February 11: Deadline for public comments on the Preliminary EA for the Blue Wing Complex Gather Plan in the BLM-NV Winnemucca District.

February 12-15: The Corps Network will hold its annual conference in Washington. BLM staff will attend.

February 13-16: National Native Seed Conference will be held in Washington, D.C. The conference connects Research, Industry, Land Management, and Restoration professionals, providing the premier opportunity to develop relationships and share information about the collection, research and development, production, and use of native plant materials.

Feb 13-25: The Mineral resources report of the Sagebrush Focal Areas of Idaho, Montana, Nevada, Oregon, Utah, and Wyoming will be available the sage-brush focal areas. BLM WO received 600 copies from the USGS. These reports will be distributed at the planned public meeting in February and will be sent out to the state and field offices. Public meetings will be held for the proposed SFA Withdrawal EIS at 8 locations: Malta, MT; Salt Lake City, UT; Rock Springs, WY; Idaho Falls, ID; Reno, NV; Lake View, OR; Elko, NV, and Boise, ID from 2/13-2/16 and 2/21-2/24.

February 13-14: PV Solar America East (Boston, MA)

February 14-17: The BLM Executive Leadership Team will meet in Washington, D.C.

February 15-19: The 41st Annual National Wild Turkey Federation Convention & Sport Show will be held in Nashville, TN. The event includes a National Technical Committee meeting and partner awards ceremony. BLM, USFS, and state agency partners will participate.

February 15: BLM-OR/WA will hold the Blue Mule Timber Sale including 5,500 MBF of thinning harvest on 324 acres. The BLM will also hold the Quarry 5 Timber Sale including 7,358 MBF of regeneration and thinning harvest on 283 acres.

February 16-19: The 2017 Western Hunting and Conservation Expo will be held in Salt Lake City, UT. This annual gathering is sponsored by the Mule Deer Foundation and Sportsmen for Fish and Wildlife. Scheduled events include a WAFWA Mule Deer Working Group meeting on February 15 and partner Awards Breakfast on February 18. BLM, USFS, and state agency partners will participate.

February 17: BLM-OR/WA will hold the Six One Timber Sale consisting of 68 acres of regeneration harvest and one acre of right-of-way clearing. This project is expected to be controversial as it is a regeneration harvest.

February 25-March 1: The National Association of Counties Legislative Conference will be held in Washington, D.C.

February 25: Northern Nevada Correctional Center Wild Horse Adoption. Fifteen-20 wild horses will be offered for adoption.

February 28: A Lands with Wilderness Characteristics Inventory and Monitoring Indefinite Delivery and Indefinite Quantity Contract is being developed for review and posting by the NOC.

Late February: BLM-NV plans to issue the final Dixie Meadows Geothermal Project EA and FONSI. The project area consists of approximately 22,021 acres of public land. The proponent (Ormat) is seeking approval to drill temperature gradient wells, and to drill and test observation wells and production wells at up to 20 specific locations.

March 2-4: The Rocky Mountain Elk Foundation National Convention will be held in Nashville, TN. The agenda includes a Conservation Partners Meeting with a sage-grouse panel discussion on Thursday, March 2. BLM, USFS, NRCS, and state agency partners will participate.

March 4-11: The North American Wildlife and Natural Resources Conference will be held in Spokane, Washington. This year's BLM Partners meeting will be held on of March 7. BLM staff will attend.

March 7: The Great Alaska Sportsman Show will be held in Anchorage, Alaska.

March 9: BLM-CO is scheduled to hold an on-line oil and gas lease sale.

March 14: BLM-NV and MT are scheduled to hold an on-line oil and gas lease sale. BLM-NV will offer 67 parcels totaling almost 116,000 acres in the Elko District.

March 16: On January 12, the BLM-ESO announced the application to withdraw ecologically significant lands within the Superior National Forest in northern Minnesota from new mining claims by segregating the lands for two years. On March 16, the Superior National Forest is scheduled to hold a public meeting in Duluth, Minnesota.

March 19-22: The American Indian Higher Education Consortium Student Conference will be held in Rapid City, South Dakota.

March 23: BLM-ESO and UT are scheduled to hold an on-line oil and gas lease sale.

March-25-26: The Arizona Outdoor Expo will be held in Phoenix, Arizona.

March 27-28: The Public Lands Council/ National Cattleman's Beef Association Legislative Conference will be held in Washington, D.C.

April 22: Earth Day

April 23: National Volunteer Week

April 24-26: The Utility Solar Conference will be held in Tucson, Arizona.

BLM-ASLM Agenda
November 18, 2016
Internal Working Document

I. Executive Travel: November 21-25, 2016

BLM Director Neil Kornze, Deputy Director Linda Lance and Special Assistant Jenna Whitlock will be in the office all week attending regularly scheduled meetings.

II. Agenda Items – No Meeting this Week, Friday is Veteran’s Day

- Basin and Range/LACMA Easement
- Onshore Order 1
- Planning 2.0 Rollout
- Coal Scoping Report
- SNPLMA 16B
- Admin Records
- RMPs Review Schedule
- Red Lake Band of Chippewa Indians

- Projects
 - Gateway West
 - Transwest
 - Gateway South
 - Boardman to Hemingway
 - Chokecherry

- Priority Packages

Items with ASLM:

- P 2.0 Preamble, CX, Economic Analysis
- Basin and Range National Monument Conservation Easement (BLM0008835)
- Correspondence – Response to Tester - Solenex lease in Badger-Two Medicine area. (BLM0008986) ** See related correspondence below in **Incoming**.
- SNPLMA Round 16B (BLM0009071)
- QFRs -7/7 HNR Hearing on Planning 2.0, Jim Lyons (BLM0009091)
- SO 3339 Under-Resourced Youth – Implementation Report (BLM0009086)
- Extension of Public Land Order 7233 –USFS Rogue River, OR (BLML000127)
- Presumed to Conform List FRN (BLMR000766)

Items incoming to ASLM:

- Onshore Order 1 Package
- Correspondence – Response to Tester - Encourages administrative withdrawal of leases north of Yellowstone National Park (BLM0009234)
- QFRs - 9/22 SENR Hearing - Neil Kornze (BLM0009094)
- Transfer of Jurisdiction of Public Lands to Chocolate Mountain Airel Gunnery Range/CACA 056671 (BLML000120) – Responding to ASLM review comments

III. Weekly Report:

November 20-26, 2016

The CA Berryessa Snow Mountain National Monument Interagency Team, comprised of BLM and FS staff, will meet on November 21 and 29 to discuss monument planning and developing an interagency agreement.

Week Ahead Announcements- Presidential and Department/Agency Priorities

November 21: The BLM-CA Berryessa Snow Mountain National Monument Interagency Team, comprised of staff from the Mendocino National Forest and the BLM Central California District and Ukiah Field Offices, will meet on November 21 and 29 to discuss monument planning and developing an interagency agreement.

November 22: The BLM-NM Albuquerque District Manager will meet with the San Felipe Pueblo Governor regarding issues relating to the Ball Ranch Area of Critical Environmental Concern that is adjacent to San Felipe Pueblo.

Media

Matt Jancer, a reporter with *Audubon* Magazine, is writing an article on the checkerboard land ownership patterns found in certain areas of the West. His questions focused on the history of checkerboard land ownership as well as present day access issues caused by checker boarding. BLM Spokesperson Kimberly Brubeck is working with the reporter. Jancer's article is anticipated to publish in early 2017.

Sarah Childress, a reporter with *Frontline*, the PBS series is working on a project about the rise of the Patriot movement, and the federal government's response to this particular threat. Given that the Bureau of Land Management and its employees have become targets for these groups in Oregon and elsewhere, they feel the BLM's perspective is especially critical to the film. Childress is hoping to speak with someone who can help the viewers better understand how militia activity has impacted BLM operations and employees, and how the Bureau is responding and plans to address such threats going forward. BLM Spokesperson Kimberly Brubeck is working with the reporter.

30-60 Day Look Ahead

November 1-30: The BLM-NV Winnemucca and Elko Districts began helicopter gather operations in the Owyhee Complex. The gather covers three HMAs in the Owyhee Sagebrush Focal Area. The estimated wild horse population of the three HMAs is 2,417. As of November 15, a total of 770 horses have been gathered and removed. The goal is to gather 1,600, remove 1,100, and fertility treat 250 horses. 500 will be returned to the HMA.

Week of November 28: The BLM-MT/DKs State Director plans to conduct courtesy visits with members and staff of the Montana, North Dakota, and South Dakota congressional delegations.

November 29: The BLM Planning 2.0 Final Rule will be announced.

November 29-Dec. 1: A collaborative process workshop for federal and state land management executives and economic stakeholders in sagebrush focal areas will be held in Reno, Nevada.

November 30: The BLM plans to hold an initial meeting with Cooperating Agencies for the Coal PEIS. The meeting may be held in Denver, CO.

November 30: A BLM-NV will hold a Southern Nevada Public Land Management Act (SNPLMA) land sale at the Clark County Government Center. The BLM plans to offer 183 acres available in 16 parcels within the Las Vegas Valley and the SNPLMA boundary.

November 30: The BLM will release to the field the Tribal Relations Manual and Handbook. The Manual and Handbook provides a roadmap to Tribal consultation and outlines the laws that pertain to BLM programs.

Late November/Early December: BLM-WY is expected to finalize the Chokecherry-Sierra Madre Wind Project EA and FONSI. In March 2016, the BLM released the EA examining the potential, site-specific impacts of constructing 500 wind turbines on mixed ownership land in the first phase of the Chokecherry and Sierra Madre (CCSM) Wind Energy Project in southern Wyoming. The BLM is working with the FWS to address public comments and ensure consistency between the FWS FEIS and the BLM EA.

December TBD: The BLM plans to transmit the Oil Shale Rule to OIRA. When finalized, the proposed rule would clarify specific provisions of oil shale royalty regulations, ensure that the royalty rate provides a fair return to the American taxpayer while encouraging the development of Federal oil shale resources, and include adequate measures to protect the environment.

December TBD: BLM-AK is preparing the final surveys of the Alatna Project. The survey is the first to use the new Direct Point Positioning Survey (DPPS) method, which is based on the global positioning system (GPS). The new survey method is expected to save the BLM time and money in its conveyance work.

December 1: The Southern Nevada Public Land Management Act (SNPLMA) Round 16B funding package is expected to be ready for the Secretary's approval and signature. The complete package recommends approval of \$79.2 million to support projects in 6 different categories of work: Parks Trails and Natural Areas; Capital Improvements; Conservation Initiatives; Environmentally Sensitive Land Acquisitions; Eastern Nevada Landscape Restoration Project; and Multi-Species Habitat Conservation Plan. A signing event for December is being considered.

December 1: The EPA intends to sign a notice of proposed CERCLA 108(b) rulemaking for the hardrock mining industry. Since May, the BLM has been involved with the Small Business Advocacy Review Panel which was convened as a requirement of the Regulatory Flexibility Act, as amended by the Small Business Regulatory Enforcement Fairness Act.

December 1: BLM-CA managers will meet to coordinate State Historic Preservation Office consultation requirements and processes for cultural resources for a major transmission upgrade project.

December 2: The USGS will hold a stakeholder event around the carbon/greenhouse gas emissions on federal lands project at the USGS National Headquarters Auditorium in Reston, VA. BLM attendees include Alexandra Teitz, Tim Spisak, and Kit Muller.

December 5: The public comment period ends for the sale of three parcels of public land totaling 166 acres near Hiko and Alamo, Nevada. The sale will be conducted in accordance with the Lincoln County Conservation, Recreation, and Development Act of 2004, complies with the FLPMA, and is in conformance with the 2008 Ely RMP.

December 6: BLM-WY plans to sign the ROD for the TransWest Transmission project. The project would provide transmission infrastructure and capacity to deliver approximately 3,000 megawatts of electric power from renewable and other energy resources in south-central WY to a substation hub in

southern NV. The proposed project includes an approximately 730-mile-long, 600-kilovolt, direct current transmission line.

December 8: BLM-CO and BLM-MT will hold online oil and gas lease sales. BLM-CO will offer 31 parcels totaling 20,135 acres in the Royal Gorge, Grand Junction and Colorado River Valley Field Offices. BLM-MT will offer 88 parcels containing 19,940 Federal mineral. None of the parcels being offered in CO or MT are in sage-grouse habitat.

December 9: BLM-ESO will transfer approximately 60,000 acres of land to the Red Lake Band of Chippewa Indians. The lands were ceded to the United States in the late 1800's and early 1900's, and originally identified for restoration in a 1945 Secretarial Order.

December 9: BLM-WY plans to sign the Gateway South (Wyoming/Colorado/Utah) ROD. The protest period ended on June 13, 2016. Five protests were received (from The Wilderness Society, Defenders of Wildlife and Sierra Club, Cross Mountain Ranch, Friends of Northwest Colorado, and Wild Earth Guardians) and are currently being evaluated.

December 13: BLM-UT and BLM-Eastern States Office will hold online oil and gas lease sales. BLM-UT is offering 26 parcels totaling 12,070 acres of Federal lands located in the Green River District. Three parcels totaling 137 acres are in the General Habitat Management Area and located in units adjacent to existing leases held by production. Although none are within the 3.1 lek buffer, 38 other parcels were deferred for sage grouse habitat reasons. The BLM-ESO will offer 35 parcels totaling 1,678 acres in Arkansas (1 parcel, 35.57 acres), Mississippi (1 parcel, 40.03 acres), and Ohio (33 parcels, 1,600.69 acres). This will include Federal minerals within the Marietta unit of the Wayne National Forest, Ohio. The ESO sale has attracted congressional and public attention over concerns about hydraulic fracturing in the Wayne NF. BLM-ES has received no protests on any of the parcels.

December 13: Tentative release date for the Report to the Sage-Grouse Task Force on the Greater Sage-Grouse Compensatory Mitigation.

December 13: The State/Federal Sage-Grouse Task Force meeting will be held in San Diego, California.

December 14: BLM National Petroleum Reserve in Alaska (NPR-A) oil & gas lease sale will be held. The sale is being held concurrently with the State of Alaska's oil and gas lease sale.

December 20: The BLM plans to release its final mitigation manual and handbook that will help the agency carry out consistent, effective, and transparent mitigation to address impacts to resources from public land uses.

December 21: BLM-UT will sign the Moab MLP ROD. The Moab MLP/PRMPA NOA was published in the Federal Register on Friday, July 22, 2016, initiating the protest period, which closed on August 22, 2016. Six protests have been received and are being evaluated.

December 21: BLM-UT plans to sign the ROD for the Beaver Dam/Red Cliffs NCAs and St. George ROD. The Notice of Availability (NOA) was published in the Federal Register on September 2, 2016, initiating a 30-day protest period. The Record of Decision for the Red Cliffs NCA has a court-ordered completion date of December 31, 2016.

December 22: The public comment period ends for the BLM-ESO Draft EIS for the Mountain Valley Project and Equitrans Expansion Project, a pipeline that would run through Virginia and West Virginia. The Federal Energy Regulatory Commission is the lead agency for developing the Draft EIS.

December 29: BLM-NV plans to issue the final Dixie Meadows Geothermal Project EA and FONSI. The project area consists of approximately 22,021 acres of public land. The proponent (Ormat) is seeking approval to drill temperature gradient wells and to drill and test observation wells and production wells at up to 20 specific locations.

December 30: BLM-AK plans to sign the Eastern Interior Alaska ROD. Nine protests were received and are being reviewed.

December 30: BLM-ID plans to sign the Gateway West Transmission ROD. The BLM published the FSEIS for the final two sections on October 7, 2016. The protest period will end November 7, 2016. The preferred routes avoid to the greatest extent possible private land, Greater sage-grouse habitat and the Morley Nelson Snake River Birds of Prey National Conservation Area.

December 30: The BLM plans to release the draft EIS for the Sagebrush Focal Area Mineral Withdrawal. As part of ROD implementation, the BLM and the U.S. Forest Service are recommending the withdrawal of lands within Sagebrush Focal Areas from locations with mining claims, subject to valid existing rights. As part of the withdrawal process the lands covered by the proposal have been temporarily segregated for a period of up to two years. During this period, the agencies are undertaking environmental and other analyses to determine if the lands should be formally withdrawn to protect sage-grouse habitat from adverse effects of future locatable exploration and mining.

December 31: The U.S. Forest Service has filed an application with the BLM requesting that the Secretary of the Interior extend the duration of Public Land Order (PLO) No. 7233 (the Rogue River Withdrawal in OR) for an additional 20-year term. PLO No. 7233 withdrew approximately 2,090 acres of National Forest Systems Lands in the Rogue River-Siskiyou National Forest from mining for 20 years to protect the Rabbit Ears-Falcon Wildlife Area; Rogue River Wild and Scenic Corridor; Union Creek Historic District; Abbot Creek and Mill Creek Recreation Sites; and the Prospect Ranger Station Administrative Site. The withdrawal created by Public Land Order No. 7233 will expire on January 1, 2017, unless extended.

January 3: The BLM and U.S. Forest Service have filed an application requesting to withdraw 101,021.71 acres in SW Oregon around the Salmon River (5,216.18 of BLM Revested O&C lands and 95,805.53 of National Forest System Lands). The comment period on the proposed 20-year withdrawal closes on December 31st at which point the Secretary would be able to make a decision on the application.

January 4: The BLM expects to release a Coal PEIS scoping report. The report will describe the process, summarize issues raised by commenters, and discuss alternatives that may be evaluated in the Coal PEIS.

January 5-8: The Western Association of Fish and Wildlife Agencies 2017 Mid-Winter meeting will be held in Litchfield Park, Arizona. The agenda is not currently posted, but is expected to include discussions on Greater Sage-Grouse.

January 6: The NOA is expected to publish for the Sonoran Desert National Monument Target Shooting RMP Amendment and Draft EIS. The U.S. District Court in Arizona has ordered the BLM to temporarily close 2.1 percent -- 10,600 acres -- of the Sonoran Desert National Monument to recreational target shooting. During the closure, the BLM will conduct a court-ordered analysis of the impacts of such shooting on the Monument. Licensed hunting continues to be allowed; all state regulations apply. Approximately 95 percent of the 12.2 million acres of public land managed by BLM in Arizona remain open to recreational target shooting. The court-ordered deadline for this RMP is September 30, 2017.

January 9: BLM-CO plans to sign the Dominguez Escalante ROD. The PRMP/FEIS NOA was published in the Federal Register on Thursday, June 30, 2016, initiating the protest period, which closed on Monday, August 1, 2016. Seven protests were received; these submissions are currently being evaluated.

January 17: BLM-ID is scheduled to sign the Boardman to Hemingway ROD. The PRMP for this 305 mile (88 miles BLM) transmission line (500 kV AC) in Idaho and Oregon is expected to publish in mid-November 2017.

Jan. 17 and 24: The Nevada Cattlemen's Association, Nevada Department of Agriculture, USFS, Nevada Department of Wildlife and the BLM will host a series of Livestock Grazing Permittee workshops throughout Nevada. At these workshops, the BLM will present how the BLM's Greater Sage-Grouse Plan Amendment's objectives will affect the livestock grazing program in Nevada and address questions.

IV. Major Federal Register Notices and Approval Packages:

Title	Current Status
Notice of Availability of the Final Environmental Impact Statement and Proposed Land-use Plan Amendments for the Boardman to Hemingway Transmission Line Project, Oregon	11/15/16 Cleared the DOI, waiting for publication date. (DTS 1311)

V. Congressional Activities:

Hearings

Legislative Hearing: The week of Nov. 28, the House Natural Resources Subcommittee on Federal Lands may hold a legislative hearing. Date and bills TBD.

BLM State Director Courtesy Visits

Courtesy Visits / Montana & Dakotas Congressional Delegations: During the week of Nov. 28, BLM Montana/Dakotas State Director Jamie Connell plans to conduct courtesy visits with members and staff of the Montana, North Dakota, and South Dakota congressional delegations.

VI. Pending Packages in ASLM:

Packages with ASLM:

1. Surname – Sec Jewell Response to 2 Gov. Sandoval letters, Proposed Mineral Withdrawal in Sagebrush Focal Area (BLM0007183)
2. Signature – Response to Letter Re: Appeal of the BLM's decision to declare Lia Shapiro's mine claim Abandoned (LM00000009)
3. Surname/Signature – MOU between BLM and DOD on Wind Energy BLM0006219
4. Surname - Notice of Availability of the BLM Draft Presumed to Conform List of Actions Under General Conformity; Upper Green River Basin, Wyoming BLMR000766
5. Signature - Basin and Range National Monument Conservation Easement BLM0008835
6. Surname – Planning 2.0 **Starting review but Waiting for Executive Summary from Linda L**

7. Signature – Extension of Public Land Order 7233 –USFS Rogue River, OR BLM000127
8. Surname - Bureau of Land Management's Implementation of Secretarial Order 3339 Report Fiscal Year 2016 BLM0009086
9. Signature – Proposed Withdrawal Extension, Sweet Grass Hills, MT PLO 7254, 19,686 acres BLM000126
10. Surname – DM Chapter on Sagebrush Biome
11. Surname - Southern Nevada Public Land Management Act (SNPLMA)–Round 16B, Project funding proposals (BLM0009071)
12. Surname - QFRs -7/7 HNR Hearing on Planning 2.0, Jim Lyons BLM0009091
13. Surname – NW Colorado RAC
14. Surname – Correspondence – Response to Tester - Solenex lease in Badger-Two Medicine area. (BLM0008986)
15. Surname - Notice of Intent to Prepare an Environmental Impact Statement for the Proposed Tri-state Fuel Breaks Project, Owyhee County, Idaho and Malheur County, Oregon BLMR001209
16. Surname – SNPLMA Annual Report for FY 2014 & 2015

Packages with BLM:

1. Surname/Signature - Transfer of Jurisdiction of Public Lands to Chocolate Mountain Aerial Gunnery Range/CACA 056671 BLM000120 *Returned to BLM in DTS to address comments/questions*

VI. Packages Going to ASLM Next Week:

1. Onshore Order 1 Package
2. Correspondence – Response to Tester - Encourages administrative withdrawal of leases north of Yellowstone National Park (BLM0009234)
3. QFRs - 9/22 SENR Hearing - Neil Kornze (BLM0009094)
4. Transfer of Jurisdiction of Public Lands to Chocolate Mountain Aerial Gunnery Range/CACA 056671 (BLM000120) – Responding to ASLM review comments

VIII. Weekly Audit Report:

DTS#	Report Title	Comments	WO100 Review	ASLM Review	Due PFM	Due GAO, OIG, Congress
9181	Management Advisory – The Bureau of Land Management’s Wild Horse and Burro Program Is Not Maximizing Efficiencies or Complying With Federal Regulations (2016-WR-027) Link to the Advisory: N/A	A request to extend the response due date has been requested to respond to the management advisory. Subject: ASLM/BLM Weekly Report
Date: Thursday, December 15, 2016 4:46:13 PM
Attachments: [283.0 BLM-ASLM AGENDA FOR 20161612.docx](#)

Hi folks - attached is the Status report for Dec 19, 2015 through Jan 6, 2017.

Have a wonderful evening!

Todd M. Curtis

Advisor to the Director's Office (Detail)
Bureau of Land Management
1849 C St. NW Rm. 5641
Washington, DC
Office: 202-208-3759
Mobile: 971-337-5689

BLM-ASLM Agenda
December 16, 2016
Internal Working Document

I. Executive Travel: December 19 to January 6, 2016

BLM Director Neil Kornze will be out of the office December 19 - December 30. Deputy Director Linda Lance will be out of the office beginning the afternoon of December 22 - December 30. Acting Deputy Director Jenna Whitlock will be traveling December 27 (avail by email), but otherwise in the office during the holiday season. The week of January 1, Neil Kornze, Linda Lance and Jenna Whitlock will all be in Washington, D.C., attending regularly scheduled meetings.

II. Agenda Items

- Coal Scoping Report
- Onshore Order 1
- Mitigation Policy
- Withdrawals
- OIG/GAO
- Admin Records
- Projects
 - Chokecherry and Sierra Madre
 - Gateway West
 - Boardman to Hemingway

• Priority Packages

Items with ASLM:

- Onshore Order 1 - Final Rule
- QFRs - 9/22 SENR Hearing - Neil Kornze (BLM0009094)
- SO 3339 Under-Resourced Youth – Implementation Report (BLM0009086)
- Draft Administrative Proposal - BLM Concession Authority BLM0009092

Items incoming to ASLM:

- Chokecherry and Sierra Madre Wind Energy Decision Package (BLM0009327)
- Notice: Identifying Lands Subject to Secretarial Order of Restoration - Red Lake Band of the Chippewa Indians in Minnesota (BLM0009221)
- Eastern Interior RMP/FEIS for Alaska (BLM0008731)
- Request to Close Rec 1 OIL AND GAS RESOURCES: Actions Needed for Interior to Better Ensure a Fair Return (GAO-14-50)
- Presumed to Conform List FRN (BLMR000766)

Priority Withdrawals Schedule:

- **DRECP** (BLML000141) amended withdrawal petition – to ALSM for review Dec 16, sign by Dec 20, publish FR Dec 23
- **Sagebrush Focal Areas** (BLML000106) withdrawal petition – sent to ASLM on Dec 14; ASLM to sign Dec 20
- **(continued on page 2)**

- **SW Oregon** (BLML000139) PLO for withdrawal/in placed when signed – 90 day comment period ends Dec 29. Withdrawal supports pending legislation; send to ASLM Dec 20, ASLM sign Dec 30 (end of current Congress, considering holiday).
- **Methow Valley** (BLMR001356) FS withdrawal petition/just need to clear FR notice – withdrawal in part supports pending legislation, Package to ASLM Dec 20, ASLM clear by Dec 30 (end of the current congress considering holiday);

II. Weekly Report:

December 18, 2016 – January 6, 2017.

The BLM is expected to announce the Decision Record for Phase 1 of the WY Chokecherry-Sierra Madre Wind Project the week of December 19, giving approval for the first 500 wind turbines. This project is the largest proposed onshore wind energy facility in North America. The entire project will open up 1,200 jobs at peak construction and generate up to 3,000 megawatts of clean, renewable power, enough to power nearly one million homes. In addition, the Record of Decision for the Beaver Dam Wash and Red Cliffs National Conservation Areas (NCA), the Proposed Amendment for the St. George RMP (UT) and associated Final EIS are expected to be signed. The key elements of the proposed plans for the NCAs include: protection for diverse threatened and endangered plant and animal species and critical habitats including the Mojave Desert Tortoise, Southwestern Willow Flycatcher, and native fish of the Virgin River System; management actions to reduce the threat of wildfires and restore fire-damaged landscapes; development of trails and other facilities to provide for sustainable recreations experiences; and protection for the Old Spanish National Historic Trail. Additionally, the BLM will finalize efforts to streamline oil and gas drilling permitting by adopting the e-filing of Applications for Permit to Drill. With the final revision to Onshore Order 1, the agency makes online filing of Applications for Permit to Drill (APD) the default method of filing, moving away from old-fashioned paper applications. On December 30, the BLM plans to release the draft EIS for the Sagebrush Focal Area Mineral Withdrawal. On December 30 and early in the new year, two mineral withdrawal notices, located in Oregon/Washington, will publish in the Federal Register. The first withdrawal, publishing on Dec 30, is for 101,021.71 acres in SW Oregon around the Salmon River. The second is for approximately 340,079 acres of Forest System lands located in the Methow Valley, WA. Lastly, BLM UT will conduct the first coal sale of 2017 on January 4. The Competitive Coal Lease Sale is for a tract of Federal coal in Sanpete and Sevier Counties, Utah.

Week Ahead Announcements- Presidential and Department/Agency Priorities – Dec 17, 2016 - Jan 6, 2017

Week of December 17: The final rule for Onshore Order 1 is expected to publish. The final rule will require the agency to adopt the online filing of Applications for Permit to Drill (APD) as the default method of filing, moving away from old-fashioned paper applications.

On or before December 17: The publication of the final Competitive Solar and Wind rule is expected.

Week of December 19: An ASLM decision on the BLM Decision Record for the BLM-WY Chokecherry-Sierra Madre Wind Project is anticipated.

Week of December 19: The BLM-UT Price Field Office will release the San Rafael Desert Master Leasing Plan preliminary alternatives for public comment. This MLP focuses on approximately 525,000 acres of public lands in Emery and Wayne counties in Utah and could amend resource management plans for the Price and Richfield Offices.

Week of December 19: The BLM-UT Moab FO public comment period begins for the Tidewater EA, which analyzes a proposal to issue three Applications for Permit to Drill. The three wells are located in Grand County, Utah.

December 20: The new BLM-CA Ukiah Field Manager will meet with Congressman Mike Thompson (CA-05-D) for a meet and greet.

December 21 (TBD): BLM-UT plans to release the ROD for the Beaver Dam/Red Cliffs NCAs and St. George ROD. The Notice of Availability (NOA) was published in the Federal Register on September 2, 2016, initiating a 30-day protest period. The ROD for the Red Cliffs NCA has a court-ordered completion date of December 31, 2016.

December 22: The public comment period ends for the BLM-ESO Draft EIS for the Mountain Valley Project and Equitrans Expansion Project, a pipeline that would run through Virginia and West Virginia. The Federal Energy Regulatory Commission is the lead agency for developing the Draft EIS.

Before December 31: The Final Colorado Solar Regional Mitigation Strategy (SRMS) release is expected. The SRMS is designed to improve the mitigation process, account for potential impacts in the landscape context and facilitate solar energy development in Solar Energy Zones. The strategy will use the information, maps and tools provided by the Landscape Assessment.

Late December: The BLM-UT Monticello Field Office plans to issue a decision on the proposed Indian Creek ATV route.

Late December or early January: The BLM-UT Moab FO will release for public comment an EA for the Needles and Anticline Overlook (Canyon Rims) Road Improvement Project.

Late December: Four IMs addressing issues other than the Coal PEIS noted in the SO (transparency, processing leasing actions under the leasing pause, waste mine methane, and surface owner consent) are expected to publish.

December 30: The BLM plans to release the draft EIS for the Sagebrush Focal Area Mineral Withdrawal. As part of ROD implementation, the BLM and the U.S. Forest Service are recommending the withdrawal of lands within Sagebrush Focal Areas from locations with mining claims, subject to valid existing rights. As part of the withdrawal process the lands covered by the proposal have been temporarily segregated for a period of up to two years. During this period, the agencies are undertaking environmental and other analyses to determine if the lands should be formally withdrawn to protect sage-grouse habitat from adverse effects of future locatable exploration and mining.

Early January: The BLM expects to release a Coal PEIS scoping report. The report will describe the process, summarize issues raised by commenters, and discuss alternatives that may be evaluated in the Coal PEIS.

December 30: A Notice of Proposed Withdrawal will be published in the *Federal Register* that will begin a 2-year segregation period for the withdrawal of approximately 340,079 acres of Forest System lands located in the Methow Valley, WA. The proposed withdrawal would close USFS managed lands for 20 years. The purpose of the proposed withdrawal is to aid legislation introduced in Senate Bill 2991, known as the Methow Headwaters Protection Act of 2016.

January 2: The BLM and U.S. Forest Service have filed an application requesting to withdraw 101,021.71 acres in SW Oregon around the Salmon River (5,216.18 of BLM Revested O&C lands and 95,805.53 of National Forest System Lands). The comment period on the proposed 20-year withdrawal

closes on December 29th at which point the Secretary would be able to make a decision on the application. Because the withdrawal is in part to support pending legislation, a decision on the PLO needs to be made before the end of the current Congress, which is December 30, 2016.

January 4: BLM-UT will conduct a Competitive Coal Lease Sale for a tract of Federal coal in Sanpete and Sevier Counties, Utah. The Federal coal tract, known as the Greens Hollow Tract, is located in the Wasatch Plateau Known Recoverable Coal Resource Area. The 6,175-acre tract contains approximately 55.7 million tons of recoverable coal adjacent to and northwest of the existing SUFCO Mine, which is operated by Canyon Fuels, LLC, a subsidiary of Bowie Resource Partners, LLC.

January 5-8: The Western Association of Fish and Wildlife Agencies' 2017 Mid-Winter meeting will be held at the Wigwam in Litchfield Park, AZ. The agenda is available at: http://www.wafwa.org/events/2017_mid-winter_meeting/program/ and includes the Sage Grouse Executive Oversight Committee Meeting on Friday morning, January 6. The BLM will send a small delegation.

January 6: BLM-CO plans to release the FRN for the Dominguez-Escalante ROD on January 6, 2016. The PRMP/FEIS NOA was published in the Federal Register on Thursday, June 30, 2016, initiating the protest period, which closed on Monday, August 1, 2016. Seven protests were received and are currently being evaluated.

Media

Trans Alaska Pipeline inquiry: In response to the media coverage of the protests regarding the Dakota Access Pipeline, Dan Springer, the Seattle-based correspondent for *Fox News*, called the BLM-AK Branch of Pipeline Monitoring on December 2 asking whether any spills from the TAPS had impacted drinking water. Springer was directed to contact the Alaska Department of Environmental Conservation and Alyeska Pipeline Service Company. The tone of the story is expected to be neutral and the air date is unknown.

Alaska Public Media inquiry on Planning 2.0, Regional Mitigation Strategy, and Legacy Well program: On December 2, BLM-AK staff was interviewed by Alaska Public Media Energy Desk reporter Elizabeth Harball regarding three subjects that will result in three separate stories. Stacie McIntosh, Arctic Office Manager; Serena Sweet, Planning and NEPA lead for BLM Alaska; and Lesli Ellis-Wouters, Communications Chief participated. For the first story, focusing on the release of Planning 2.0, Sweet discussed three areas of change – more public involvement, adaptive management and landscape level planning. McIntosh provided a status on the Regional Mitigation Strategy for the Northeast NPR-A and a request for public comment by Dec. 29. The last story was an update on the Legacy Well program and clarification on work done last summer. The tone of the stories was positive and the stories are expected to be neutral. The air date is unknown.

Moab Times Independent query on Flaring: Reporter Rose Egelhoff requested general background on the impacts of the new flaring regulations and the expected ruling from the state on Wesco's operations in the Big Flat area. UT PA explained that both the state and the BLM have flaring rules, that they coordinate closely with each other and oil and gas operators in the area to ensure they are meeting federal and state requirements. They also noted that Wesco purchased Fidelity's holdings in the Big Flat area and currently flare and that reducing flaring was one of the key reasons for approving the Dead Horse Lateral Pipeline, as well as more responsible use of gas resources by providing a mechanism to get the gas to market. Rose has also requested to speak with a petroleum engineer on background to discuss flaring and venting and the BLM's role in regulating them for local operators. UT PA is arranging a backgrounder with Eric Jones, a petroleum engineer that can explain technical information in laymen's terms.

Deseret News Query on Planning 2.0: Reporter Amy Joi O'Donoghue requested comment on Utah and county leader concerns that under the final rule the importance of state and local government opinion is diminished. They are concerned that such a "landscape" scale approach to land use planning that does not have to adhere to district boundaries necessarily "subsumes" that voice. UT PA is working this request.

NPR Fresno request for interview on Temperance Flat Dam: Reporter Ezra David Romero requested to speak with the Bakersfield Field Manager regarding the possible impacts of a proposed Temperance Flat Dam. The BLM manages the San Joaquin River Gorge about 35 miles east of Fresno. The stretch of the river managed by the BLM, about 10 miles that includes hiking trails, campgrounds and a visitor center, would be inundated if the dam were built. The analysis in the 2015 Bakersfield Resource Management Plan found the portion of the river managed by the BLM qualifies for Wild and Scenic status. The reporter plans to also interview BOR, landowners and visit the Millerton Caves (BLM). CA PA is working this request.

HBO-Vice News request for interview on Western Monuments: Producer Alyse Shoreland is working on a story about the designation of western lands as monuments by the President. She is focusing on the Cascade-Siskiyou expansion and Owyhee Canyonlands in OR, and Gold Butte, NV, and is requesting interviews with officials on the ground who can speak about the lands and monument status if/when a designation is made. WO PA is on standby until if/when a designation is made.

30-60 Day Look Ahead

Early January: The BLM expects to release a Coal PEIS scoping report. The report will describe the process, summarize issues raised by commenters, and discuss alternatives that may be evaluated in the Coal PEIS.

No later than January 20: The BLM plans to publish the Oil Shale Rule. When finalized, the proposed rule would clarify specific provisions of oil shale royalty regulations, ensure that the royalty rate provides a fair return to the American taxpayer while encouraging the development of Federal oil shale resources, and include adequate measures to protect the environment.

January: BLM-AK Eastern Interior (EI) RODs/Approved RMPs: The Director's Response Letter to the Governor's Appeal has been approved by the Director's Office. The protest resolution report is complete and being finalized for publication/posting on the BLM website on or a day or two prior the ROD signature date.

January: BLM-NV plans to issue the final Dixie Meadows Geothermal Project EA and FONSI. The project area consists of approximately 22,021 acres of public land. The proponent (Ormat) is seeking approval to drill temperature gradient wells, and to drill and test observation wells and production wells at up to 20 specific locations.

January: The BLM-CA Arcata and Redding field offices published a Notice of Intent to begin public scoping for the development of a new RMP for public lands overseen by both offices on November 7. A series of seven public meetings will be held across the region in January and public comments will be accepted until the completion of the meetings.

January: BLM-CA plans to release for public comment the draft RMP Amendment and draft EIS that will address oil and gas leasing and development on 793,000 acres of federal mineral estate administered by the Central Coast Field Office. The amendment is in response to public concerns about oil and gas leasing and development, in particular hydraulic fracturing and related well stimulation techniques.

January 9: The BLM-ID Challis Field Office will begin bait trapping wild horses within the Challis HMA and treat mares with the fertility control PZP-22. The process is expected to be completed by March 14, 2017.

January 12: The BLM plans to release its final mitigation manual and handbook that will help the agency carry out consistent, effective, and transparent mitigation to address impacts to resources from public land uses.

January 13: BLM-ESO will transfer approximately 60,000 acres of land to the Red Lake Band of Chippewa Indians. The lands were ceded to the United States in the late 1800's and early 1900's, and originally identified for restoration in a 1945 Secretarial Order.

January 15-17: The North American Intergovernmental Committee on Cooperation for Wilderness and Protected Areas (NAWPA) will hold their annual agency heads meeting in Whitehorse, Yukon Territory.

January 17 and 24: The Nevada Cattlemen's Association, Nevada Department of Agriculture, USFS, Nevada Department of Wildlife and the BLM will host a series of Livestock Grazing Permittee workshops throughout Nevada. At these workshops, the BLM will present how the BLM's Greater Sage-Grouse Plan Amendment's objectives will affect the livestock grazing program in Nevada and address questions.

Mid-January: BLM-ID plans to sign the Gateway West Transmission ROD. The BLM published the FSEIS for the final two sections on October 7, 2016. The protest period will end November 7, 2016. The protest resolution and Governor's Consistency Review is scheduled to be completed January 13, allowing for publication of the ROD prior to January 20. The preferred routes avoid to the greatest extent possible private land, Greater Sage-Grouse habitat and the Morley Nelson Snake River Birds of Prey NCA.

Mid-January: BLM is attempting to accelerate the signing of the Boardman to Hemingway ROD. Oregon Plan amendments are being handled concurrently and that decision will be issued simultaneously with the ROD for the EIS and Approval to issue a grant.

January 29-Feb: The Society for Rangeland Management Annual Meeting will be held in St. George, UT. BLM employees from various offices are planning to attend.

January 30: The BLM and Forest Service will announce the annual adjusted grazing fee for public lands.

Early FY2017: The finalized implementation plan for Wilderness 2020 Vision is expected to be issued.

February 7-8: The Wildlife and Hunting Heritage Conservation Council meeting will be held at the DOI MIB.

February 25-March 1: The National Association of Counties Legislative Conference will be held in Washington, D.C.

March 4-11: the North American Wildlife and Natural Resources Conference will be held in Spokane, Washington. BLM staff will attend.

IV. Major Federal Register Notices and Approval Packages:

Title	Current Status
Notice of Proposed Withdrawal Extension and Opportunity for Public Meeting; Miller Lake Recreational Area, Oregon.	Will publish in the Federal Register on 12/16/16. (DTS 1289).
Notice of Availability of the Record of Decision for the TransWest Express Transmission Project in Wyoming, Colorado, Utah and Nevada	Will publish in the Federal Register on 12/16/16. (DTS 1319)
Notice of Availability of the Record of Decision for the Energy Gateway South Transmission Project and Approved Land-use Plan Amendments	Will publish in the Federal Register on 12/16/16. (DTS 1331)

V. Congressional Activities:

Congressional Meetings

Rep. Stewart / Wild Horse & Burro: On December 20, Kristin Bail, Assistant Director for Resources and Planning; Dean Bolstad, Division Chief, Wild Horse and Burro Program; and Linda Smith, BLM Budget Officer plan to meet with staff of Rep. Stewart (R-UT-2) at their request to discuss the BLM's Wild Horse and Burro program.

Congressional Visits in the Field

Courtesy Visits / Rep. Thompson (D-CA-5): On Dec. 20, BLM Ukiah California Field Manager, Amanda James plans to conduct a courtesy visit with Rep. Thompson (D-CA-5).

WH&B Corral Visit / Sen. Risch's Staff (R-ID): On Jan 4, staff from Senator Risch's office will tour the BLM's Boise Idaho corral and meet with BLM ID wild horse and burro program staff.

State Legislature Hearings / Meetings

Wyoming State Legislature / Forestry: The BLM in Wyoming has a received a request from the Wyoming State Legislature's Joint Agriculture Committee to provide an update on BLM forestry activities on Jan. 17 in Cheyenne. Details TBD.

VI. Pending Packages in ASLM:

Packages with ASLM 12/15/2016:

1. Surname – Sec Jewell Response to 2 Gov. Sandoval letters, Proposed Mineral Withdrawal in Sagebrush Focal Area (BLM0007183)
2. Signature – Response to Letter Re: Appeal of the BLM's decision to declare Lia Shapiro's mine claim Abandoned (LM00000009)
3. Surname - Bureau of Land Management's Implementation of Secretarial Order 3339 Report Fiscal Year 2016 BLM0009086
4. Surname - Draft Administrative Proposal - BLM Concession Authority BLM0009092

5. Surname – Letter from Senators Udall & Heinrich about Upper Rio Grande Watershed wildlife corridors BLM0008739
6. Request to Close Recommendation 9 in the Office of Inspector General's report entitled, Bureau of Land Management's Renewable Energy Program: A Critical Point in Renewable Energy Development (Report No. CR-EV-BLM-0004-2010) (BLM0008379)
7. Surname – 90 Day List (January - March) BLMR001344
8. Signature - Request to amend the application for the Greater Sage-Grouse withdrawal to add 400K acres in Nevada and the NOA for the DEIS. BLML000106
9. Surname – Farmington (NM) RAC
10. Surname – Albuquerque (NM) RAC
11. Surname – Southeast Oregon RAC
12. Surname – California Desert District RAC

Packages with BLM:

1. Surname/Signature – MOU between BLM and DOD on Wind Energy BLM0006219 **WO-301 Resolving AL Comments and preparing Hardcopy for Signature.**
2. Surname – SNPLMA Annual Report for FY 2014 & 2015. **NV has circulated a new version to 300/100 and Kelly is reviewing. Current goal is to get new hard copy to ASLM by Friday, 12/16 or Monday, 12/19**
3. Surname/Signature - Transfer of Jurisdiction of Public Lands to Chocolate Mountain Aerial Gunnery Range/CACA 056671 BLML000120 **WO-350 – Lands and Realty is addressing Kelleher comments on PLO, the ASLM Info Memo, and the Transmittal Memo**
4. Surname – 620 DM 1-7 Wildland Fire Program Policy BLM0009488 / ESO-00073486 – **Solicitor Review**

VI. Packages Going to ASLM Next Week:

1. Chokecherry and Sierra Madre Wind Energy Decision Package (BLM0009327)
2. Notice: Identifying Lands Subject to Secretarial Order of Restoration - Red Lake Band of the Chippewa Indians in Minnesota (BLM0009221)
3. Eastern Interior RMP/FEIS for Alaska (BLM0008731)
4. Request to Close Rec 1 OIL AND GAS RESOURCES: Actions Needed for Interior to Better Ensure a Fair Return (GAO-14-50)
5. Presumed to Conform List FRN (BLMR000766)

VIII. Weekly Audit Report:

Hi folks - attached is the Status report for Dec 19, 2015 through Jan 6, 2017.

Have a wonderful evening!

Todd M. Curtis

Advisor to the Director's Office (Detail)
Bureau of Land Management
1849 C St. NW Rm. 5641
Washington, DC
Office: 202-208-3759
Mobile: 971-337-5689

BLM-ASLM Agenda
December 16, 2016
Internal Working Document

I. Executive Travel: December 19 to January 6, 2016

BLM Director Neil Kornze will be out of the office December 19 - December 30. Deputy Director Linda Lance will be out of the office beginning the afternoon of December 22 - December 30. Acting Deputy Director Jenna Whitlock will be traveling December 27 (avail by email), but otherwise in the office during the holiday season. The week of January 1, Neil Kornze, Linda Lance and Jenna Whitlock will all be in Washington, D.C., attending regularly scheduled meetings.

II. Agenda Items

- Coal Scoping Report
- Onshore Order 1
- Mitigation Policy
- Withdrawals
- OIG/GAO
- Admin Records
- Projects
 - Chokecherry and Sierra Madre
 - Gateway West
 - Boardman to Hemingway

• Priority Packages

Items with ASLM:

- Onshore Order 1 - Final Rule
- QFRs - 9/22 SENR Hearing - Neil Kornze (BLM0009094)
- SO 3339 Under-Resourced Youth – Implementation Report (BLM0009086)
- Draft Administrative Proposal - BLM Concession Authority BLM0009092

Items incoming to ASLM:

- Chokecherry and Sierra Madre Wind Energy Decision Package (BLM0009327)
- Notice: Identifying Lands Subject to Secretarial Order of Restoration - Red Lake Band of the Chippewa Indians in Minnesota (BLM0009221)
- Eastern Interior RMP/FEIS for Alaska (BLM0008731)
- Request to Close Rec 1 OIL AND GAS RESOURCES: Actions Needed for Interior to Better Ensure a Fair Return (GAO-14-50)
- Presumed to Conform List FRN (BLMR000766)

Priority Withdrawals Schedule:

- **DRECP** (BLML000141) amended withdrawal petition – to ALSM for review Dec 16, sign by Dec 20, publish FR Dec 23
- **Sagebrush Focal Areas** (BLML000106) withdrawal petition – sent to ASLM on Dec 14; ASLM to sign Dec 20
- **(continued on page 2)**

- **SW Oregon** (BLML000139) PLO for withdrawal/in placed when signed – 90 day comment period ends Dec 29. Withdrawal supports pending legislation; send to ASLM Dec 20, ASLM sign Dec 30 (end of current Congress, considering holiday).
- **Methow Valley** (BLMR001356) FS withdrawal petition/just need to clear FR notice – withdrawal in part supports pending legislation, Package to ASLM Dec 20, ASLM clear by Dec 30 (end of the current congress considering holiday);

II. Weekly Report:

December 18, 2016 – January 6, 2017.

The BLM is expected to announce the Decision Record for Phase 1 of the WY Chokecherry-Sierra Madre Wind Project the week of December 19, giving approval for the first 500 wind turbines. This project is the largest proposed onshore wind energy facility in North America. The entire project will open up 1,200 jobs at peak construction and generate up to 3,000 megawatts of clean, renewable power, enough to power nearly one million homes. In addition, the Record of Decision for the Beaver Dam Wash and Red Cliffs National Conservation Areas (NCA), the Proposed Amendment for the St. George RMP (UT) and associated Final EIS are expected to be signed. The key elements of the proposed plans for the NCAs include: protection for diverse threatened and endangered plant and animal species and critical habitats including the Mojave Desert Tortoise, Southwestern Willow Flycatcher, and native fish of the Virgin River System; management actions to reduce the threat of wildfires and restore fire-damaged landscapes; development of trails and other facilities to provide for sustainable recreations experiences; and protection for the Old Spanish National Historic Trail. Additionally, the BLM will finalize efforts to streamline oil and gas drilling permitting by adopting the e-filing of Applications for Permit to Drill. With the final revision to Onshore Order 1, the agency makes online filing of Applications for Permit to Drill (APD) the default method of filing, moving away from old-fashioned paper applications. On December 30, the BLM plans to release the draft EIS for the Sagebrush Focal Area Mineral Withdrawal. On December 30 and early in the new year, two mineral withdrawal notices, located in Oregon/Washington, will publish in the Federal Register. The first withdrawal, publishing on Dec 30, is for 101,021.71 acres in SW Oregon around the Salmon River. The second is for approximately 340,079 acres of Forest System lands located in the Methow Valley, WA. Lastly, BLM UT will conduct the first coal sale of 2017 on January 4. The Competitive Coal Lease Sale is for a tract of Federal coal in Sanpete and Sevier Counties, Utah.

Week Ahead Announcements- Presidential and Department/Agency Priorities – Dec 17, 2016 - Jan 6, 2017

Week of December 17: The final rule for Onshore Order 1 is expected to publish. The final rule will require the agency to adopt the online filing of Applications for Permit to Drill (APD) as the default method of filing, moving away from old-fashioned paper applications.

On or before December 17: The publication of the final Competitive Solar and Wind rule is expected.

Week of December 19: An ASLM decision on the BLM Decision Record for the BLM-WY Chokecherry-Sierra Madre Wind Project is anticipated.

Week of December 19: The BLM-UT Price Field Office will release the San Rafael Desert Master Leasing Plan preliminary alternatives for public comment. This MLP focuses on approximately 525,000 acres of public lands in Emery and Wayne counties in Utah and could amend resource management plans for the Price and Richfield Offices.

Week of December 19: The BLM-UT Moab FO public comment period begins for the Tidewater EA, which analyzes a proposal to issue three Applications for Permit to Drill. The three wells are located in Grand County, Utah.

December 20: The new BLM-CA Ukiah Field Manager will meet with Congressman Mike Thompson (CA-05-D) for a meet and greet.

December 21 (TBD): BLM-UT plans to release the ROD for the Beaver Dam/Red Cliffs NCAs and St. George ROD. The Notice of Availability (NOA) was published in the Federal Register on September 2, 2016, initiating a 30-day protest period. The ROD for the Red Cliffs NCA has a court-ordered completion date of December 31, 2016.

December 22: The public comment period ends for the BLM-ESO Draft EIS for the Mountain Valley Project and Equitrans Expansion Project, a pipeline that would run through Virginia and West Virginia. The Federal Energy Regulatory Commission is the lead agency for developing the Draft EIS.

Before December 31: The Final Colorado Solar Regional Mitigation Strategy (SRMS) release is expected. The SRMS is designed to improve the mitigation process, account for potential impacts in the landscape context and facilitate solar energy development in Solar Energy Zones. The strategy will use the information, maps and tools provided by the Landscape Assessment.

Late December: The BLM-UT Monticello Field Office plans to issue a decision on the proposed Indian Creek ATV route.

Late December or early January: The BLM-UT Moab FO will release for public comment an EA for the Needles and Anticline Overlook (Canyon Rims) Road Improvement Project.

Late December: Four IMs addressing issues other than the Coal PEIS noted in the SO (transparency, processing leasing actions under the leasing pause, waste mine methane, and surface owner consent) are expected to publish.

December 30: The BLM plans to release the draft EIS for the Sagebrush Focal Area Mineral Withdrawal. As part of ROD implementation, the BLM and the U.S. Forest Service are recommending the withdrawal of lands within Sagebrush Focal Areas from locations with mining claims, subject to valid existing rights. As part of the withdrawal process the lands covered by the proposal have been temporarily segregated for a period of up to two years. During this period, the agencies are undertaking environmental and other analyses to determine if the lands should be formally withdrawn to protect sage-grouse habitat from adverse effects of future locatable exploration and mining.

Early January: The BLM expects to release a Coal PEIS scoping report. The report will describe the process, summarize issues raised by commenters, and discuss alternatives that may be evaluated in the Coal PEIS.

December 30: A Notice of Proposed Withdrawal will be published in the *Federal Register* that will begin a 2-year segregation period for the withdrawal of approximately 340,079 acres of Forest System lands located in the Methow Valley, WA. The proposed withdrawal would close USFS managed lands for 20 years. The purpose of the proposed withdrawal is to aid legislation introduced in Senate Bill 2991, known as the Methow Headwaters Protection Act of 2016.

January 2: The BLM and U.S. Forest Service have filed an application requesting to withdraw 101,021.71 acres in SW Oregon around the Salmon River (5,216.18 of BLM Revested O&C lands and 95,805.53 of National Forest System Lands). The comment period on the proposed 20-year withdrawal

closes on December 29th at which point the Secretary would be able to make a decision on the application. Because the withdrawal is in part to support pending legislation, a decision on the PLO needs to be made before the end of the current Congress, which is December 30, 2016.

January 4: BLM-UT will conduct a Competitive Coal Lease Sale for a tract of Federal coal in Sanpete and Sevier Counties, Utah. The Federal coal tract, known as the Greens Hollow Tract, is located in the Wasatch Plateau Known Recoverable Coal Resource Area. The 6,175-acre tract contains approximately 55.7 million tons of recoverable coal adjacent to and northwest of the existing SUFCO Mine, which is operated by Canyon Fuels, LLC, a subsidiary of Bowie Resource Partners, LLC.

January 5-8: The Western Association of Fish and Wildlife Agencies' 2017 Mid-Winter meeting will be held at the Wigwam in Litchfield Park, AZ. The agenda is available at: http://www.wafwa.org/events/2017_mid-winter_meeting/program/ and includes the Sage Grouse Executive Oversight Committee Meeting on Friday morning, January 6. The BLM will send a small delegation.

January 6: BLM-CO plans to release the FRN for the Dominguez-Escalante ROD on January 6, 2016. The PRMP/FEIS NOA was published in the Federal Register on Thursday, June 30, 2016, initiating the protest period, which closed on Monday, August 1, 2016. Seven protests were received and are currently being evaluated.

Media

Trans Alaska Pipeline inquiry: In response to the media coverage of the protests regarding the Dakota Access Pipeline, Dan Springer, the Seattle-based correspondent for *Fox News*, called the BLM-AK Branch of Pipeline Monitoring on December 2 asking whether any spills from the TAPS had impacted drinking water. Springer was directed to contact the Alaska Department of Environmental Conservation and Alyeska Pipeline Service Company. The tone of the story is expected to be neutral and the air date is unknown.

Alaska Public Media inquiry on Planning 2.0, Regional Mitigation Strategy, and Legacy Well program: On December 2, BLM-AK staff was interviewed by Alaska Public Media Energy Desk reporter Elizabeth Harball regarding three subjects that will result in three separate stories. Stacie McIntosh, Arctic Office Manager; Serena Sweet, Planning and NEPA lead for BLM Alaska; and Lesli Ellis-Wouters, Communications Chief participated. For the first story, focusing on the release of Planning 2.0, Sweet discussed three areas of change – more public involvement, adaptive management and landscape level planning. McIntosh provided a status on the Regional Mitigation Strategy for the Northeast NPR-A and a request for public comment by Dec. 29. The last story was an update on the Legacy Well program and clarification on work done last summer. The tone of the stories was positive and the stories are expected to be neutral. The air date is unknown.

Moab Times Independent query on Flaring: Reporter Rose Egelhoff requested general background on the impacts of the new flaring regulations and the expected ruling from the state on Wesco's operations in the Big Flat area. UT PA explained that both the state and the BLM have flaring rules, that they coordinate closely with each other and oil and gas operators in the area to ensure they are meeting federal and state requirements. They also noted that Wesco purchased Fidelity's holdings in the Big Flat area and currently flare and that reducing flaring was one of the key reasons for approving the Dead Horse Lateral Pipeline, as well as more responsible use of gas resources by providing a mechanism to get the gas to market. Rose has also requested to speak with a petroleum engineer on background to discuss flaring and venting and the BLM's role in regulating them for local operators. UT PA is arranging a backgrounder with Eric Jones, a petroleum engineer that can explain technical information in laymen's terms.

Deseret News Query on Planning 2.0: Reporter Amy Joi O'Donoghue requested comment on Utah and county leader concerns that under the final rule the importance of state and local government opinion is diminished. They are concerned that such a "landscape" scale approach to land use planning that does not have to adhere to district boundaries necessarily "subsumes" that voice. UT PA is working this request.

NPR Fresno request for interview on Temperance Flat Dam: Reporter Ezra David Romero requested to speak with the Bakersfield Field Manager regarding the possible impacts of a proposed Temperance Flat Dam. The BLM manages the San Joaquin River Gorge about 35 miles east of Fresno. The stretch of the river managed by the BLM, about 10 miles that includes hiking trails, campgrounds and a visitor center, would be inundated if the dam were built. The analysis in the 2015 Bakersfield Resource Management Plan found the portion of the river managed by the BLM qualifies for Wild and Scenic status. The reporter plans to also interview BOR, landowners and visit the Millerton Caves (BLM). CA PA is working this request.

HBO-Vice News request for interview on Western Monuments: Producer Alyse Shoreland is working on a story about the designation of western lands as monuments by the President. She is focusing on the Cascade-Siskiyou expansion and Owyhee Canyonlands in OR, and Gold Butte, NV, and is requesting interviews with officials on the ground who can speak about the lands and monument status if/when a designation is made. WO PA is on standby until if/when a designation is made.

30-60 Day Look Ahead

Early January: The BLM expects to release a Coal PEIS scoping report. The report will describe the process, summarize issues raised by commenters, and discuss alternatives that may be evaluated in the Coal PEIS.

No later than January 20: The BLM plans to publish the Oil Shale Rule. When finalized, the proposed rule would clarify specific provisions of oil shale royalty regulations, ensure that the royalty rate provides a fair return to the American taxpayer while encouraging the development of Federal oil shale resources, and include adequate measures to protect the environment.

January: BLM-AK Eastern Interior (EI) RODs/Approved RMPs: The Director's Response Letter to the Governor's Appeal has been approved by the Director's Office. The protest resolution report is complete and being finalized for publication/posting on the BLM website on or a day or two prior the ROD signature date.

January: BLM-NV plans to issue the final Dixie Meadows Geothermal Project EA and FONSI. The project area consists of approximately 22,021 acres of public land. The proponent (Ormat) is seeking approval to drill temperature gradient wells, and to drill and test observation wells and production wells at up to 20 specific locations.

January: The BLM-CA Arcata and Redding field offices published a Notice of Intent to begin public scoping for the development of a new RMP for public lands overseen by both offices on November 7. A series of seven public meetings will be held across the region in January and public comments will be accepted until the completion of the meetings.

January: BLM-CA plans to release for public comment the draft RMP Amendment and draft EIS that will address oil and gas leasing and development on 793,000 acres of federal mineral estate administered by the Central Coast Field Office. The amendment is in response to public concerns about oil and gas leasing and development, in particular hydraulic fracturing and related well stimulation techniques.

January 9: The BLM-ID Challis Field Office will begin bait trapping wild horses within the Challis HMA and treat mares with the fertility control PZP-22. The process is expected to be completed by March 14, 2017.

January 12: The BLM plans to release its final mitigation manual and handbook that will help the agency carry out consistent, effective, and transparent mitigation to address impacts to resources from public land uses.

January 13: BLM-ESO will transfer approximately 60,000 acres of land to the Red Lake Band of Chippewa Indians. The lands were ceded to the United States in the late 1800's and early 1900's, and originally identified for restoration in a 1945 Secretarial Order.

January 15-17: The North American Intergovernmental Committee on Cooperation for Wilderness and Protected Areas (NAWPA) will hold their annual agency heads meeting in Whitehorse, Yukon Territory.

January 17 and 24: The Nevada Cattlemen's Association, Nevada Department of Agriculture, USFS, Nevada Department of Wildlife and the BLM will host a series of Livestock Grazing Permittee workshops throughout Nevada. At these workshops, the BLM will present how the BLM's Greater Sage-Grouse Plan Amendment's objectives will affect the livestock grazing program in Nevada and address questions.

Mid-January: BLM-ID plans to sign the Gateway West Transmission ROD. The BLM published the FSEIS for the final two sections on October 7, 2016. The protest period will end November 7, 2016. The protest resolution and Governor's Consistency Review is scheduled to be completed January 13, allowing for publication of the ROD prior to January 20. The preferred routes avoid to the greatest extent possible private land, Greater Sage-Grouse habitat and the Morley Nelson Snake River Birds of Prey NCA.

Mid-January: BLM is attempting to accelerate the signing of the Boardman to Hemingway ROD. Oregon Plan amendments are being handled concurrently and that decision will be issued simultaneously with the ROD for the EIS and Approval to issue a grant.

January 29-Feb: The Society for Rangeland Management Annual Meeting will be held in St. George, UT. BLM employees from various offices are planning to attend.

January 30: The BLM and Forest Service will announce the annual adjusted grazing fee for public lands.

Early FY2017: The finalized implementation plan for Wilderness 2020 Vision is expected to be issued.

February 7-8: The Wildlife and Hunting Heritage Conservation Council meeting will be held at the DOI MIB.

February 25-March 1: The National Association of Counties Legislative Conference will be held in Washington, D.C.

March 4-11: the North American Wildlife and Natural Resources Conference will be held in Spokane, Washington. BLM staff will attend.

N/A

IV. Major Federal Register Notices and Approval Packages:

Title	Current Status
Notice of Proposed Withdrawal Extension and Opportunity for Public Meeting; Miller Lake Recreational Area, Oregon.	Will publish in the Federal Register on 12/16/16. (DTS 1289).
Notice of Availability of the Record of Decision for the TransWest Express Transmission Project in Wyoming, Colorado, Utah and Nevada	Will publish in the Federal Register on 12/16/16. (DTS 1319)
Notice of Availability of the Record of Decision for the Energy Gateway South Transmission Project and Approved Land-use Plan Amendments	Will publish in the Federal Register on 12/16/16. (DTS 1331)

V. Congressional Activities:

Congressional Meetings

Rep. Stewart / Wild Horse & Burro: On December 20, Kristin Bail, Assistant Director for Resources and Planning; Dean Bolstad, Division Chief, Wild Horse and Burro Program; and Linda Smith, BLM Budget Officer plan to meet with staff of Rep. Stewart (R-UT-2) at their request to discuss the BLM's Wild Horse and Burro program.

Congressional Visits in the Field

Courtesy Visits / Rep. Thompson (D-CA-5): On Dec. 20, BLM Ukiah California Field Manager, Amanda James plans to conduct a courtesy visit with Rep. Thompson (D-CA-5).

WH&B Corral Visit / Sen. Risch's Staff (R-ID): On Jan 4, staff from Senator Risch's office will tour the BLM's Boise Idaho corral and meet with BLM ID wild horse and burro program staff.

State Legislature Hearings / Meetings

Wyoming State Legislature / Forestry: The BLM in Wyoming has a received a request from the Wyoming State Legislature's Joint Agriculture Committee to provide an update on BLM forestry activities on Jan. 17 in Cheyenne. Details TBD.

VI. Pending Packages in ASLM:

Packages with ASLM 12/15/2016:

1. Surname – Sec Jewell Response to 2 Gov. Sandoval letters, Proposed Mineral Withdrawal in Sagebrush Focal Area (BLM0007183)
2. Signature – Response to Letter Re: Appeal of the BLM's decision to declare Lia Shapiro's mine claim Abandoned (LM00000009)
3. Surname - Bureau of Land Management's Implementation of Secretarial Order 3339 Report Fiscal Year 2016 BLM0009086
4. Surname - Draft Administrative Proposal - BLM Concession Authority BLM0009092

5. Surname – Letter from Senators Udall & Heinrich about Upper Rio Grande Watershed wildlife corridors BLM0008739
6. Request to Close Recommendation 9 in the Office of Inspector General's report entitled, Bureau of Land Management's Renewable Energy Program: A Critical Point in Renewable Energy Development (Report No. CR-EV-BLM-0004-2010) (BLM0008379)
7. Surname – 90 Day List (January - March) BLMR001344
8. Signature - Request to amend the application for the Greater Sage-Grouse withdrawal to add 400K acres in Nevada and the NOA for the DEIS. BLML000106
9. Surname – Farmington (NM) RAC
10. Surname – Albuquerque (NM) RAC
11. Surname – Southeast Oregon RAC
12. Surname – California Desert District RAC

Packages with BLM:

1. Surname/Signature – MOU between BLM and DOD on Wind Energy BLM0006219 **WO-301 Resolving AL Comments and preparing Hardcopy for Signature.**
2. Surname – SNPLMA Annual Report for FY 2014 & 2015. **NV has circulated a new version to 300/100 and Kelly is reviewing. Current goal is to get new hard copy to ASLM by Friday, 12/16 or Monday, 12/19**
3. Surname/Signature - Transfer of Jurisdiction of Public Lands to Chocolate Mountain Aerial Gunnery Range/CACA 056671 BLML000120 **WO-350 – Lands and Realty is addressing Kelleher comments on PLO, the ASLM Info Memo, and the Transmittal Memo**
4. Surname – 620 DM 1-7 Wildland Fire Program Policy BLM0009488 / ESO-00073486 – **Solicitor Review**

VI. Packages Going to ASLM Next Week:

1. Chokecherry and Sierra Madre Wind Energy Decision Package (BLM0009327)
2. Notice: Identifying Lands Subject to Secretarial Order of Restoration - Red Lake Band of the Chippewa Indians in Minnesota (BLM0009221)
3. Eastern Interior RMP/FEIS for Alaska (BLM0008731)
4. Request to Close Rec 1 OIL AND GAS RESOURCES: Actions Needed for Interior to Better Ensure a Fair Return (GAO-14-50)
5. Presumed to Conform List FRN (BLMR000766)

VIII. Weekly Audit Report:

BLM-ASLM Agenda
November 18, 2016
Internal Working Document

I. Executive Travel: November 21-25, 2016

BLM Director Neil Kornze, Deputy Director Linda Lance and Special Assistant Jenna Whitlock will be in the office all week attending regularly scheduled meetings.

II. Agenda Items – No Meeting this Week, Friday is Veteran’s Day

- Basin and Range/LACMA Easement
- Onshore Order 1
- Planning 2.0 Rollout
- Coal Scoping Report
- SNPLMA 16B
- Admin Records
- RMPs Review Schedule
- Red Lake Band of Chippewa Indians

- Projects
 - Gateway West
 - Transwest
 - Gateway South
 - Boardman to Hemingway
 - Chokecherry

- Priority Packages

Items with ASLM:

- P 2.0 Preamble, CX, Economic Analysis
- Basin and Range National Monument Conservation Easement (BLM0008835)
- Correspondence – Response to Tester - Solenex lease in Badger-Two Medicine area. (BLM0008986) ** See related correspondence below in **Incoming**.
- SNPLMA Round 16B (BLM0009071)
- QFRs -7/7 HNR Hearing on Planning 2.0, Jim Lyons (BLM0009091)
- SO 3339 Under-Resourced Youth – Implementation Report (BLM0009086)
- Extension of Public Land Order 7233 –USFS Rogue River, OR (BLML000127)
- Presumed to Conform List FRN (BLMR000766)

Items incoming to ASLM:

- Onshore Order 1 Package
- Correspondence – Response to Tester - Encourages administrative withdrawal of leases north of Yellowstone National Park (BLM0009234)
- QFRs - 9/22 SENR Hearing - Neil Kornze (BLM0009094)
- Transfer of Jurisdiction of Public Lands to Chocolate Mountain Airel Gunnery Range/CACA 056671 (BLML000120) – Responding to ASLM review comments

III. Weekly Report:

November 20-26, 2016

The CA Berryessa Snow Mountain National Monument Interagency Team, comprised of BLM and FS staff, will meet on November 21 and 29 to discuss monument planning and developing an interagency agreement.

Week Ahead Announcements- Presidential and Department/Agency Priorities

November 21: The BLM-CA Berryessa Snow Mountain National Monument Interagency Team, comprised of staff from the Mendocino National Forest and the BLM Central California District and Ukiah Field Offices, will meet on November 21 and 29 to discuss monument planning and developing an interagency agreement.

November 22: The BLM-NM Albuquerque District Manager will meet with the San Felipe Pueblo Governor regarding issues relating to the Ball Ranch Area of Critical Environmental Concern that is adjacent to San Felipe Pueblo.

Media

Matt Jancer, a reporter with *Audubon* Magazine, is writing an article on the checkerboard land ownership patterns found in certain areas of the West. His questions focused on the history of checkerboard land ownership as well as present day access issues caused by checker boarding. BLM Spokesperson Kimberly Brubeck is working with the reporter. Jancer's article is anticipated to publish in early 2017.

Sarah Childress, a reporter with *Frontline*, the PBS series is working on a project about the rise of the Patriot movement, and the federal government's response to this particular threat. Given that the Bureau of Land Management and its employees have become targets for these groups in Oregon and elsewhere, they feel the BLM's perspective is especially critical to the film. Childress is hoping to speak with someone who can help the viewers better understand how militia activity has impacted BLM operations and employees, and how the Bureau is responding and plans to address such threats going forward. BLM Spokesperson Kimberly Brubeck is working with the reporter.

30-60 Day Look Ahead

November 1-30: The BLM-NV Winnemucca and Elko Districts began helicopter gather operations in the Owyhee Complex. The gather covers three HMAs in the Owyhee Sagebrush Focal Area. The estimated wild horse population of the three HMAs is 2,417. As of November 15, a total of 770 horses have been gathered and removed. The goal is to gather 1,600, remove 1,100, and fertility treat 250 horses. 500 will be returned to the HMA.

Week of November 28: The BLM-MT/DKs State Director plans to conduct courtesy visits with members and staff of the Montana, North Dakota, and South Dakota congressional delegations.

November 29: The BLM Planning 2.0 Final Rule will be announced.

November 29-Dec. 1: A collaborative process workshop for federal and state land management executives and economic stakeholders in sagebrush focal areas will be held in Reno, Nevada.

November 30: The BLM plans to hold an initial meeting with Cooperating Agencies for the Coal PEIS. The meeting may be held in Denver, CO.

November 30: A BLM-NV will hold a Southern Nevada Public Land Management Act (SNPLMA) land sale at the Clark County Government Center. The BLM plans to offer 183 acres available in 16 parcels within the Las Vegas Valley and the SNPLMA boundary.

November 30: The BLM will release to the field the Tribal Relations Manual and Handbook. The Manual and Handbook provides a roadmap to Tribal consultation and outlines the laws that pertain to BLM programs.

Late November/Early December: BLM-WY is expected to finalize the Chokecherry-Sierra Madre Wind Project EA and FONSI. In March 2016, the BLM released the EA examining the potential, site-specific impacts of constructing 500 wind turbines on mixed ownership land in the first phase of the Chokecherry and Sierra Madre (CCSM) Wind Energy Project in southern Wyoming. The BLM is working with the FWS to address public comments and ensure consistency between the FWS FEIS and the BLM EA.

December TBD: The BLM plans to transmit the Oil Shale Rule to OIRA. When finalized, the proposed rule would clarify specific provisions of oil shale royalty regulations, ensure that the royalty rate provides a fair return to the American taxpayer while encouraging the development of Federal oil shale resources, and include adequate measures to protect the environment.

December TBD: BLM-AK is preparing the final surveys of the Alatna Project. The survey is the first to use the new Direct Point Positioning Survey (DPPS) method, which is based on the global positioning system (GPS). The new survey method is expected to save the BLM time and money in its conveyance work.

December 1: The Southern Nevada Public Land Management Act (SNPLMA) Round 16B funding package is expected to be ready for the Secretary's approval and signature. The complete package recommends approval of \$79.2 million to support projects in 6 different categories of work: Parks Trails and Natural Areas; Capital Improvements; Conservation Initiatives; Environmentally Sensitive Land Acquisitions; Eastern Nevada Landscape Restoration Project; and Multi-Species Habitat Conservation Plan. A signing event for December is being considered.

December 1: The EPA intends to sign a notice of proposed CERCLA 108(b) rulemaking for the hardrock mining industry. Since May, the BLM has been involved with the Small Business Advocacy Review Panel which was convened as a requirement of the Regulatory Flexibility Act, as amended by the Small Business Regulatory Enforcement Fairness Act.

December 1: BLM-CA managers will meet to coordinate State Historic Preservation Office consultation requirements and processes for cultural resources for a major transmission upgrade project.

December 2: The USGS will hold a stakeholder event around the carbon/greenhouse gas emissions on federal lands project at the USGS National Headquarters Auditorium in Reston, VA. BLM attendees include Alexandra Teitz, Tim Spisak, and Kit Muller.

December 5: The public comment period ends for the sale of three parcels of public land totaling 166 acres near Hiko and Alamo, Nevada. The sale will be conducted in accordance with the Lincoln County Conservation, Recreation, and Development Act of 2004, complies with the FLPMA, and is in conformance with the 2008 Ely RMP.

December 6: BLM-WY plans to sign the ROD for the TransWest Transmission project. The project would provide transmission infrastructure and capacity to deliver approximately 3,000 megawatts of electric power from renewable and other energy resources in south-central WY to a substation hub in

southern NV. The proposed project includes an approximately 730-mile-long, 600-kilovolt, direct current transmission line.

December 8: BLM-CO and BLM-MT will hold online oil and gas lease sales. BLM-CO will offer 31 parcels totaling 20,135 acres in the Royal Gorge, Grand Junction and Colorado River Valley Field Offices. BLM-MT will offer 88 parcels containing 19,940 Federal mineral. None of the parcels being offered in CO or MT are in sage-grouse habitat.

December 9: BLM-ESO will transfer approximately 60,000 acres of land to the Red Lake Band of Chippewa Indians. The lands were ceded to the United States in the late 1800's and early 1900's, and originally identified for restoration in a 1945 Secretarial Order.

December 9: BLM-WY plans to sign the Gateway South (Wyoming/Colorado/Utah) ROD. The protest period ended on June 13, 2016. Five protests were received (from The Wilderness Society, Defenders of Wildlife and Sierra Club, Cross Mountain Ranch, Friends of Northwest Colorado, and Wild Earth Guardians) and are currently being evaluated.

December 13: BLM-UT and BLM-Eastern States Office will hold online oil and gas lease sales. BLM-UT is offering 26 parcels totaling 12,070 acres of Federal lands located in the Green River District. Three parcels totaling 137 acres are in the General Habitat Management Area and located in units adjacent to existing leases held by production. Although none are within the 3.1 lek buffer, 38 other parcels were deferred for sage grouse habitat reasons. The BLM-ESO will offer 35 parcels totaling 1,678 acres in Arkansas (1 parcel, 35.57 acres), Mississippi (1 parcel, 40.03 acres), and Ohio (33 parcels, 1,600.69 acres). This will include Federal minerals within the Marietta unit of the Wayne National Forest, Ohio. The ESO sale has attracted congressional and public attention over concerns about hydraulic fracturing in the Wayne NF. BLM-ES has received no protests on any of the parcels.

December 13: Tentative release date for the Report to the Sage-Grouse Task Force on the Greater Sage-Grouse Compensatory Mitigation.

December 13: The State/Federal Sage-Grouse Task Force meeting will be held in San Diego, California.

December 14: BLM National Petroleum Reserve in Alaska (NPR-A) oil & gas lease sale will be held. The sale is being held concurrently with the State of Alaska's oil and gas lease sale.

December 20: The BLM plans to release its final mitigation manual and handbook that will help the agency carry out consistent, effective, and transparent mitigation to address impacts to resources from public land uses.

December 21: BLM-UT will sign the Moab MLP ROD. The Moab MLP/PRMPA NOA was published in the Federal Register on Friday, July 22, 2016, initiating the protest period, which closed on August 22, 2016. Six protests have been received and are being evaluated.

December 21: BLM-UT plans to sign the ROD for the Beaver Dam/Red Cliffs NCAs and St. George ROD. The Notice of Availability (NOA) was published in the Federal Register on September 2, 2016, initiating a 30-day protest period. The Record of Decision for the Red Cliffs NCA has a court-ordered completion date of December 31, 2016.

December 22: The public comment period ends for the BLM-ESO Draft EIS for the Mountain Valley Project and Equitrans Expansion Project, a pipeline that would run through Virginia and West Virginia. The Federal Energy Regulatory Commission is the lead agency for developing the Draft EIS.

December 29: BLM-NV plans to issue the final Dixie Meadows Geothermal Project EA and FONSI. The project area consists of approximately 22,021 acres of public land. The proponent (Ormat) is seeking approval to drill temperature gradient wells and to drill and test observation wells and production wells at up to 20 specific locations.

December 30: BLM-AK plans to sign the Eastern Interior Alaska ROD. Nine protests were received and are being reviewed.

December 30: BLM-ID plans to sign the Gateway West Transmission ROD. The BLM published the FSEIS for the final two sections on October 7, 2016. The protest period will end November 7, 2016. The preferred routes avoid to the greatest extent possible private land, Greater sage-grouse habitat and the Morley Nelson Snake River Birds of Prey National Conservation Area.

December 30: The BLM plans to release the draft EIS for the Sagebrush Focal Area Mineral Withdrawal. As part of ROD implementation, the BLM and the U.S. Forest Service are recommending the withdrawal of lands within Sagebrush Focal Areas from locations with mining claims, subject to valid existing rights. As part of the withdrawal process the lands covered by the proposal have been temporarily segregated for a period of up to two years. During this period, the agencies are undertaking environmental and other analyses to determine if the lands should be formally withdrawn to protect sage-grouse habitat from adverse effects of future locatable exploration and mining.

December 31: The U.S. Forest Service has filed an application with the BLM requesting that the Secretary of the Interior extend the duration of Public Land Order (PLO) No. 7233 (the Rogue River Withdrawal in OR) for an additional 20-year term. PLO No. 7233 withdrew approximately 2,090 acres of National Forest Systems Lands in the Rogue River-Siskiyou National Forest from mining for 20 years to protect the Rabbit Ears-Falcon Wildlife Area; Rogue River Wild and Scenic Corridor; Union Creek Historic District; Abbot Creek and Mill Creek Recreation Sites; and the Prospect Ranger Station Administrative Site. The withdrawal created by Public Land Order No. 7233 will expire on January 1, 2017, unless extended.

January 3: The BLM and U.S. Forest Service have filed an application requesting to withdraw 101,021.71 acres in SW Oregon around the Salmon River (5,216.18 of BLM Revested O&C lands and 95,805.53 of National Forest System Lands). The comment period on the proposed 20-year withdrawal closes on December 31st at which point the Secretary would be able to make a decision on the application.

January 4: The BLM expects to release a Coal PEIS scoping report. The report will describe the process, summarize issues raised by commenters, and discuss alternatives that may be evaluated in the Coal PEIS.

January 5-8: The Western Association of Fish and Wildlife Agencies 2017 Mid-Winter meeting will be held in Litchfield Park, Arizona. The agenda is not currently posted, but is expected to include discussions on Greater Sage-Grouse.

January 6: The NOA is expected to publish for the Sonoran Desert National Monument Target Shooting RMP Amendment and Draft EIS. The U.S. District Court in Arizona has ordered the BLM to temporarily close 2.1 percent -- 10,600 acres -- of the Sonoran Desert National Monument to recreational target shooting. During the closure, the BLM will conduct a court-ordered analysis of the impacts of such shooting on the Monument. Licensed hunting continues to be allowed; all state regulations apply. Approximately 95 percent of the 12.2 million acres of public land managed by BLM in Arizona remain open to recreational target shooting. The court-ordered deadline for this RMP is September 30, 2017.

January 9: BLM-CO plans to sign the Dominguez Escalante ROD. The PRMP/FEIS NOA was published in the Federal Register on Thursday, June 30, 2016, initiating the protest period, which closed on Monday, August 1, 2016. Seven protests were received; these submissions are currently being evaluated.

January 17: BLM-ID is scheduled to sign the Boardman to Hemingway ROD. The PRMP for this 305 mile (88 miles BLM) transmission line (500 kV AC) in Idaho and Oregon is expected to publish in mid-November 2017.

Jan. 17 and 24: The Nevada Cattlemen's Association, Nevada Department of Agriculture, USFS, Nevada Department of Wildlife and the BLM will host a series of Livestock Grazing Permittee workshops throughout Nevada. At these workshops, the BLM will present how the BLM's Greater Sage-Grouse Plan Amendment's objectives will affect the livestock grazing program in Nevada and address questions.

IV. Major Federal Register Notices and Approval Packages:

Title	Current Status
Notice of Availability of the Final Environmental Impact Statement and Proposed Land-use Plan Amendments for the Boardman to Hemingway Transmission Line Project, Oregon	11/15/16 Cleared the DOI, waiting for publication date. (DTS 1311)

V. Congressional Activities:

Hearings

Legislative Hearing: The week of Nov. 28, the House Natural Resources Subcommittee on Federal Lands may hold a legislative hearing. Date and bills TBD.

BLM State Director Courtesy Visits

Courtesy Visits / Montana & Dakotas Congressional Delegations: During the week of Nov. 28, BLM Montana/Dakotas State Director Jamie Connell plans to conduct courtesy visits with members and staff of the Montana, North Dakota, and South Dakota congressional delegations.

VI. Pending Packages in ASLM:

Packages with ASLM:

1. Surname – Sec Jewell Response to 2 Gov. Sandoval letters, Proposed Mineral Withdrawal in Sagebrush Focal Area (BLM0007183)
2. Signature – Response to Letter Re: Appeal of the BLM's decision to declare Lia Shapiro's mine claim Abandoned (LM00000009)
3. Surname/Signature – MOU between BLM and DOD on Wind Energy BLM0006219
4. Surname - Notice of Availability of the BLM Draft Presumed to Conform List of Actions Under General Conformity; Upper Green River Basin, Wyoming BLMR000766
5. Signature - Basin and Range National Monument Conservation Easement BLM0008835
6. Surname – Planning 2.0 **Starting review but Waiting for Executive Summary from Linda L**

7. Signature – Extension of Public Land Order 7233 –USFS Rogue River, OR BLM000127
8. Surname - Bureau of Land Management's Implementation of Secretarial Order 3339 Report Fiscal Year 2016 BLM0009086
9. Signature – Proposed Withdrawal Extension, Sweet Grass Hills, MT PLO 7254, 19,686 acres BLM000126
10. Surname – DM Chapter on Sagebrush Biome
11. Surname - Southern Nevada Public Land Management Act (SNPLMA)–Round 16B, Project funding proposals (BLM0009071)
12. Surname - QFRs -7/7 HNR Hearing on Planning 2.0, Jim Lyons BLM0009091
13. Surname – NW Colorado RAC
14. Surname – Correspondence – Response to Tester - Solenex lease in Badger-Two Medicine area. (BLM0008986)
15. Surname - Notice of Intent to Prepare an Environmental Impact Statement for the Proposed Tri-state Fuel Breaks Project, Owyhee County, Idaho and Malheur County, Oregon BLMR001209
16. Surname – SNPLMA Annual Report for FY 2014 & 2015

Packages with BLM:

1. Surname/Signature - Transfer of Jurisdiction of Public Lands to Chocolate Mountain Aerial Gunnery Range/CACA 056671 BLM000120 *Returned to BLM in DTS to address comments/questions*

VI. Packages Going to ASLM Next Week:

1. Onshore Order 1 Package
2. Correspondence – Response to Tester - Encourages administrative withdrawal of leases north of Yellowstone National Park (BLM0009234)
3. QFRs - 9/22 SENR Hearing - Neil Kornze (BLM0009094)
4. Transfer of Jurisdiction of Public Lands to Chocolate Mountain Aerial Gunnery Range/CACA 056671 (BLM000120) – Responding to ASLM review comments

DATE: October 13, 2016
SUBJECT: Colorado Division of Reclamation Mining and Safety: Approval of Tri-State Generation & Transmission Association Inc.'s Parent Corporation Guarantor of Colowyo Coal Company, L.P.'s Colowyo Mine Self-Bond

INTRODUCTION

The Office of Surface Mining Reclamation and Enforcement (OSMRE) has completed its review of the Tri-State Generation and Transmission Association Inc.'s (Tri-State) eligibility to continue to act as a parent corporation guarantor (corporate guarantor) for self-bond reclamation obligations at the Colowyo Mine. OSMRE completed this evaluation in conjunction with the August 9, 2016, OSMRE Policy Advisory for Self-Bonding.

BACKGROUND

The Colorado Division of Reclamation Mining & Safety (DRMS) evaluated Tri-State's 1st quarter 2016 financial data to determine if the company was eligible to continue to act as the corporate guarantor of the Colowyo Mine self-bond. In its review of that financial information, DRMS determined that Tri-State continued to satisfy the regulatory requirements to act as a corporate guarantor for the Colowyo Mine as it met the requirements of Colorado Surface Mining Rule 3.02.4.

The original self-bond application, which authorized Tri-State to act as the corporate guarantor of the Colowyo Mine, was initially approved by DRMS on April 9, 2014, following receipt, review and acceptance of the self-bond agreement, self-bond indemnity agreement, and self-bond corporate guarantee. These bonding instruments had been executed March 12, 2014.

DRMS rules allow for the acceptance of a self-bond based on 3.02.4(1)(2)(e)(i), which states "The Division may accept a self-bond from an applicant for a permit if all of the following conditions are met by the applicant or its corporation guarantor...". This language is identical to OSMRE's rules 30 CFR 800.23(b) which state, "The regulatory authority may accept a self-bond from an applicant for a permit if all of the following conditions are met by the applicant or its parent corporation guarantor:..."

ANALYSIS

DRMS determined it could accept a self-bond from the applicant because the requirements of Colorado's Rule 3.02.4(2)(e)(i)(A) and (B) had been met.

Additionally, Colorado's Rule 3.02.4 requires that specific financial tests be performed to assure that a guarantor of any self-bond is qualified, having met all requirements of Rule 3.02.4.

Within that Rule, Rule 3.02.4(2)(e)(i)(C) has three financial tests. At least one of the following three tests must be met:

- i) The applicant for the self-bond has a current rating for its most recent bond issuance of

- "A" or higher from either Standard and Poor's or Moody's credit rating service;
- ii) The applicant for the self-bond has a tangible net worth of at least \$10 million, a total liabilities to net worth of 2.5 times or less, and a ratio of current assets to current liabilities of 1.2 times or greater; or
- iii) The applicant for the self-bond must have fixed assets in the U.S. that total at least \$20 million, a ratio of total liabilities to net worth of 2.5 times or less, and a ratio of current assets to current liabilities of 1.2 times or greater.

For the first financial test under Rule 3.02.4(2)(e)(i)(C), On April 29, 2016, DRMS received a letter, from Tri-State, which included a copy of the Standard and Poor's (S&P) report dated April 28, 2016. The report showed Tri-State's continued "A" Long Term Rating and provided verification to DRMS that Tri-State continued to meet the requirements of Rule 3.02.4(2)(e)(i)(C)(I) as it had maintained its "A" rating as required. Tri-State MET this criterion.

From S&P Global Ratings, dated April 28, 2016, *"Standard and Poor's Rating Services has revised its outlook to stable from negative and reaffirmed its [Tri-State] "A" rating..."*

OSMRE independently verified the Tri-State "A" rating in its August 23, 2016, review using the Standard and Poor's rating service, affirming that Colorado had followed its rules when evaluating the corporate guarantor for the Colowyo Mine's self-bond, with respect to the requirement of Rule 3.02.4(2)(e)(i)(C)(I). Additionally, OSMRE independently verified Tri-State's rating using the Standard and Poor's rating service. As of today, October 13, 2106, Tri-State continues to maintain its "A" long-term issuer rating with a "stable" outlook with the Standard and Poor's rating service.

For the second financial test under Rule 3.02.4(2)(e)(i)(C), the 1st quarter 2016 financials, for the period ending March 31, 2016, were utilized with proprietary accounting information to determine that the total amount of tangible net worth was \$1,055,107,000.00 (criterion MET, as it was above \$10,000,000.00), and the ratio of total liabilities to net worth was 3.56 times (criterion FAILED, as it exceeded 2.5 times), and the ratio of current assets to current liabilities was 1.56 times (criterion MET, as it was 1.2 times or greater). Overall, this financial test FAILED, as the total liabilities to net worth ratio was not met.

For the third financial test under Rule 3.02.4(2)(e)(i)(C), again the 1st quarter 2016 financials were utilized, along with the proprietary accounting information, to determine that the total amount of the U.S. fixed assets was \$3,622,772,000.00 (criterion MET, as it exceeded \$20,000,000.00), and the ratio of total liabilities to net worth was 3.56 times (criterion FAILED, as it exceeded 2.5 times), and the ratio of current assets to current liabilities was 1.56 times (criterion MET, as it was 1.2 times or greater). Overall, this financial test also FAILED, as the total liabilities to net worth ratio was not met.

Tri-State successfully met the first criterion required by Rule 3.02.4(2)(e)(i)(C), demonstrating an "A" rating from the Standard and Poor's credit rating service, as determined initially by the state, and verified by OSMRE.

Additionally, Rule 3.02.4(2)(e)(i)(D)(1) requires a recent audited financial report be provided to DRMS. The most recent audited financials were provided to DRMS following the close of the 4th quarter 2015. The December 31, 2015, 10K was filed by Tri-State with the U.S. Securities and Exchange Commission (SEC) on March 14, 2016, then submitted to and used by DRMS to provide the financial information necessary to evaluate Tri-State's ongoing eligibility as corporate guarantor for the Colowyo Mine following the close of that 4th quarter of 2015. That report was audited by Ernst & Young LLP, and included the following statement:

"In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Tri-State Generation and Transmission Association, Inc. at December 31, 2015, and 2014, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2015, in conformity with U.S. generally accepted accounting principles."

As required by Colorado's Rule 3.02.4, one final financial test is necessary. Rule 3.02.4(2)(e)(iv) requires the total amount of the outstanding and proposed self-bonds for surface coal mining and reclamation operations to be less than 25% of the Guarantor's tangible net worth in the U.S. In evaluating this final financial test, DRMS found Tri-State's ratio of the value of all of its coal mine self-bonds to its tangible net worth to be less than 25%. In their 1st quarter 2016 evaluation, DRMS found that the total amount of coal mining self-bonds held at that time was \$109,667,829.00. This was compared to its tangible net worth of \$1,047,136,000.00. That ratio of all self-bonds to tangible net worth is about 11% (10.47%), thus the criterion that it be no more than 25% was MET. For the 1st quarter 2016 financial review, OSMRE was able to verify the percentage of self-bonds to tangible net worth was 11%, less than the 25% maximum specified by the State's rule.

CONCLUSIONS

Following the 1st quarter review in 2016, Tri-State continued to be eligible to act as a self-bond corporate guarantor for the Colowyo Mine as its "A" credit rating issued by Standard and Poor's ratings service met the minimum requirement of Rule 3.02.4(2)(e)(i)(C)(I). OSMRE concurs with DRMS's findings that Tri-State satisfied regulatory requirements to act as self-bond corporate guarantor for the Colowyo Mine through its financial credit rating issued by Standard and Poor's ratings service as specified by Colorado Rule 3.02.4(2)(e)(i)(C)(I).

Tri-State also met the criteria of Rule 3.02.4(2)(e)(iv), demonstrating a percentage of all self-bonds to tangible net worth of 11%, which was less than the maximum 25% required by this rule. OSMRE concurs with DRMS's findings that Tri-State satisfied the regulatory requirement to act as a self-bond corporate guarantor for the Colowyo Mine through its financial evaluation of the percentage of all self-bonds to tangible net worth at 11%, much less than the maximum allowable of 25%.

October 25, 2016

INFORMATION MEMORANDUM FOR THE ASSISTANT SECRETARY—LAND AND MINERALS MANAGEMENT

FROM: David Berry, Western Region Director, Office of Surface Mining Reclamation and Enforcement

CC: Joe G. Pizarchik, OSMRE Director
Glenda Owens, OSMRE Deputy Director

SUBJECT: Office of Surface Mining Reclamation and Enforcement's recommendation to approve the mining plan modification for Colowyo Coal Mine's Federal coal leases COC-0123475 01 and COC-68590, Colorado.

INTRODUCTION

In compliance with 30 CFR 746.13, the Office of Surface Mining Reclamation and Enforcement (OSMRE) has prepared a Mining Plan Decision Document (MPDD) that recommends approval of the mining plan modification for Colowyo Coal Mine's Federal coal leases COC-0123475 01 and COC-68590, in Moffat and Rio Blanco Counties, Colorado; pursuant to its responsibilities under the Mineral Leasing Act of 1929 (MLA) and the Surface Mining Control and Reclamation Act of 1977 (SMCRA) and implementing regulations. The Assistant Secretary for Land and Minerals Management (ASLM) will need to approve, disapprove or approve with conditions the proposed mining plan modification.

BACKGROUND

Federal coal lease COC-0123475 01 was issued by the Bureau of Land Management (BLM) in May of 1982, and Federal coal lease COC-68590 was issued in July of 2007. Federal coal lease COC-68590 was modified in August of 2016. In March of 2015, Colowyo Coal Company L.P. submitted Permit Revision No. 04 (PR-4) to the Colorado Division of Reclamation Mining and Safety (CDRMS) for Permit No. C-1981-019. PR-4 was approved in September of 2016.

The mining of Federal coal leases COC-0123475 01 and COC-68590 would expand existing operations at the Colowyo Coal Mine into the Collom Permit Expansion Area. Colowyo Coal Company L.P. (Colowyo), operator of the Colowyo Coal Mine, is a limited partnership, which is indirectly owned by Elk Ridge Mining and Reclamation. Elk Ridge Mining and Reclamation is owned by Tri-State Generation & Transmission Association, Inc. Colowyo currently is mining in Federal coal leases COC-29225 and COC-29226, producing coal from the South Taylor Pit. Coal has been mined on a commercial scale in the Colowyo Coal Mine area for over 100 years. Coal was mined by underground mining techniques continuously until 1974 when the underground mines closed. In 1977, Colowyo initiated its first surface mining operation at the Colowyo Coal Mine, to access thinner coal seams located closer to the surface than the seams historically developed through underground mining.

The Colowyo Coal Mine uses a combination of dragline and truck shovel mining methods. The amount of remaining recoverable Federal coal authorized for removal within the currently approved federal mining plan is approximately 9.3 million tons (Mt). Approval of the mining plan modification would authorize the addition of approximately 3,517 acres and 79.1 Mt of Federal coal to the approved Federal mining plan. The current average production rate is 4 million tons per year (Mtpy) and the current maximum permitted production rate is 9 Mtpy. It is reasonably foreseeable that the mine would operate at an average production rate of 2.3 mtpy and would not exceed 5 mtpy. Colowyo started operation in 1977, and the mine will continue to operate until 2019 under the currently approved mining plan. The mining plan modification approval would extend the life of the mine by 16-34 years.

DISCUSSION

The MPDD includes an EA prepared by OSMRE, in coordination with the BLM, which analyzes impacts of mining within the Collom Permit Expansion Area under three alternatives, including the no action alternative. OSMRE and BLM solicited comments from the public and stakeholders for 30 days in order to identify issues and concerns regarding the mining plan modification. OSMRE and BLM also published the “draft” EA for review and comment for 30 days resulting in 9,761 comments that were received, reviewed and considered by OSMRE and BLM. The EA considers the direct, indirect and cumulative effects of the lease modification to Federal coal lease COC-0123475 01, and the mining plan modification for Federal coal leases COC-0123475 01 and COC-68590, including climate change.

OSMRE and BLM complied with the requirements of the National Environmental Policy Act (NEPA) of 1969, as amended, and fully complied with public participation requirements defined by NEPA, the Council on Environmental Quality, and the Department’s procedures for implementing NEPA. As a result of the EA process, the BLM issued a finding of no significant impact (FONSI) on June 27, 2016, and approved the lease modification for Federal coal lease COC-0123475 01 on June 30, 2016. OSMRE has also determined there are no significant environmental impacts and has prepared a FONSI for the mining plan modification recommendation.

CDRMS determined that a reclamation performance bond in the amount of \$175,362,550, made payable to both the State of Colorado and the United States, is adequate for Permit No. C-1981-019 and this mining plan modification. The State and OSMRE currently hold a parent corporation guarantor self-bond in the amount of \$80,517,829. Tri-State Generation & Transmission Association Inc. is the parent corporation guarantor of the self-bond. Prior to Colowyo disturbing additional lands in the PR-4 area, an additional \$94,844,721 of reclamation performance bond must be submitted to, and approved by the State.

There are is no current litigation associated with the Colowyo Mine Collum Permit Expansion.

NEXT STEPS

OSMRE Western Region mailed the MPDD, including the EA and FONSI, recommending approval with no additional conditions to OSMRE Headquarters on October 18, 2016, to begin surname processing. OSMRE Western Region is requesting a decision from the ASLM on the mining plan modification for Federal coal leases COC-0123475 01 and COC-68590 at the Colowyo Coal Mine, on or before November 31, 2016. Upon approval, OSMRE will:

- Post a “Spotlight” announcing the decision on the OSMRE Western Region website;
- Post the EA, FONSI and Mine Plan Approval on the OSMRE Western Region Website;
- Post a “Spotlight” announcing the decision on the OSMRE National website; and
- Post an OSMRE “Tweet” announcing the decision

Attachment

BLM-ASLM Agenda
November 18, 2016
Internal Working Document

I. Executive Travel: November 21-25, 2016

BLM Director Neil Kornze, Deputy Director Linda Lance and Special Assistant Jenna Whitlock will be in the office all week attending regularly scheduled meetings.

II. Agenda Items – No Meeting this Week, Friday is Veteran’s Day

- Basin and Range/LACMA Easement
- Onshore Order 1
- Planning 2.0 Rollout
- Coal Scoping Report
- SNPLMA 16B
- Admin Records
- RMPs Review Schedule
- Red Lake Band of Chippewa Indians

- Projects
 - Gateway West
 - Transwest
 - Gateway South
 - Boardman to Hemingway
 - Chokecherry

- Priority Packages

Items with ASLM:

- P 2.0 Preamble, CX, Economic Analysis
- Basin and Range National Monument Conservation Easement (BLM0008835)
- Correspondence – Response to Tester - Solenex lease in Badger-Two Medicine area. (BLM0008986) ** See related correspondence below in **Incoming**.
- SNPLMA Round 16B (BLM0009071)
- QFRs -7/7 HNR Hearing on Planning 2.0, Jim Lyons (BLM0009091)
- SO 3339 Under-Resourced Youth – Implementation Report (BLM0009086)
- Extension of Public Land Order 7233 –USFS Rogue River, OR (BLML000127)
- Presumed to Conform List FRN (BLMR000766)

Items incoming to ASLM:

- Onshore Order 1 Package
- Correspondence – Response to Tester - Encourages administrative withdrawal of leases north of Yellowstone National Park (BLM0009234)
- QFRs - 9/22 SENR Hearing - Neil Kornze (BLM0009094)
- Transfer of Jurisdiction of Public Lands to Chocolate Mountain Airel Gunnery Range/CACA 056671 (BLML000120) – Responding to ASLM review comments

III. Weekly Report:

November 20-26, 2016

The CA Berryessa Snow Mountain National Monument Interagency Team, comprised of BLM and FS staff, will meet on November 21 and 29 to discuss monument planning and developing an interagency agreement.

Week Ahead Announcements- Presidential and Department/Agency Priorities

November 21: The BLM-CA Berryessa Snow Mountain National Monument Interagency Team, comprised of staff from the Mendocino National Forest and the BLM Central California District and Ukiah Field Offices, will meet on November 21 and 29 to discuss monument planning and developing an interagency agreement.

November 22: The BLM-NM Albuquerque District Manager will meet with the San Felipe Pueblo Governor regarding issues relating to the Ball Ranch Area of Critical Environmental Concern that is adjacent to San Felipe Pueblo.

Media

Matt Jancer, a reporter with *Audubon* Magazine, is writing an article on the checkerboard land ownership patterns found in certain areas of the West. His questions focused on the history of checkerboard land ownership as well as present day access issues caused by checker boarding. BLM Spokesperson Kimberly Brubeck is working with the reporter. Jancer's article is anticipated to publish in early 2017.

Sarah Childress, a reporter with *Frontline*, the PBS series is working on a project about the rise of the Patriot movement, and the federal government's response to this particular threat. Given that the Bureau of Land Management and its employees have become targets for these groups in Oregon and elsewhere, they feel the BLM's perspective is especially critical to the film. Childress is hoping to speak with someone who can help the viewers better understand how militia activity has impacted BLM operations and employees, and how the Bureau is responding and plans to address such threats going forward. BLM Spokesperson Kimberly Brubeck is working with the reporter.

30-60 Day Look Ahead

November 1-30: The BLM-NV Winnemucca and Elko Districts began helicopter gather operations in the Owyhee Complex. The gather covers three HMAs in the Owyhee Sagebrush Focal Area. The estimated wild horse population of the three HMAs is 2,417. As of November 15, a total of 770 horses have been gathered and removed. The goal is to gather 1,600, remove 1,100, and fertility treat 250 horses. 500 will be returned to the HMA.

Week of November 28: The BLM-MT/DKs State Director plans to conduct courtesy visits with members and staff of the Montana, North Dakota, and South Dakota congressional delegations.

November 29: The BLM Planning 2.0 Final Rule will be announced.

November 29-Dec. 1: A collaborative process workshop for federal and state land management executives and economic stakeholders in sagebrush focal areas will be held in Reno, Nevada.

November 30: The BLM plans to hold an initial meeting with Cooperating Agencies for the Coal PEIS. The meeting may be held in Denver, CO.

November 30: A BLM-NV will hold a Southern Nevada Public Land Management Act (SNPLMA) land sale at the Clark County Government Center. The BLM plans to offer 183 acres available in 16 parcels within the Las Vegas Valley and the SNPLMA boundary.

November 30: The BLM will release to the field the Tribal Relations Manual and Handbook. The Manual and Handbook provides a roadmap to Tribal consultation and outlines the laws that pertain to BLM programs.

Late November/Early December: BLM-WY is expected to finalize the Chokecherry-Sierra Madre Wind Project EA and FONSI. In March 2016, the BLM released the EA examining the potential, site-specific impacts of constructing 500 wind turbines on mixed ownership land in the first phase of the Chokecherry and Sierra Madre (CCSM) Wind Energy Project in southern Wyoming. The BLM is working with the FWS to address public comments and ensure consistency between the FWS FEIS and the BLM EA.

December TBD: The BLM plans to transmit the Oil Shale Rule to OIRA. When finalized, the proposed rule would clarify specific provisions of oil shale royalty regulations, ensure that the royalty rate provides a fair return to the American taxpayer while encouraging the development of Federal oil shale resources, and include adequate measures to protect the environment.

December TBD: BLM-AK is preparing the final surveys of the Alatna Project. The survey is the first to use the new Direct Point Positioning Survey (DPPS) method, which is based on the global positioning system (GPS). The new survey method is expected to save the BLM time and money in its conveyance work.

December 1: The Southern Nevada Public Land Management Act (SNPLMA) Round 16B funding package is expected to be ready for the Secretary's approval and signature. The complete package recommends approval of \$79.2 million to support projects in 6 different categories of work: Parks Trails and Natural Areas; Capital Improvements; Conservation Initiatives; Environmentally Sensitive Land Acquisitions; Eastern Nevada Landscape Restoration Project; and Multi-Species Habitat Conservation Plan. A signing event for December is being considered.

December 1: The EPA intends to sign a notice of proposed CERCLA 108(b) rulemaking for the hardrock mining industry. Since May, the BLM has been involved with the Small Business Advocacy Review Panel which was convened as a requirement of the Regulatory Flexibility Act, as amended by the Small Business Regulatory Enforcement Fairness Act.

December 1: BLM-CA managers will meet to coordinate State Historic Preservation Office consultation requirements and processes for cultural resources for a major transmission upgrade project.

December 2: The USGS will hold a stakeholder event around the carbon/greenhouse gas emissions on federal lands project at the USGS National Headquarters Auditorium in Reston, VA. BLM attendees include Alexandra Teitz, Tim Spisak, and Kit Muller.

December 5: The public comment period ends for the sale of three parcels of public land totaling 166 acres near Hiko and Alamo, Nevada. The sale will be conducted in accordance with the Lincoln County Conservation, Recreation, and Development Act of 2004, complies with the FLPMA, and is in conformance with the 2008 Ely RMP.

December 6: BLM-WY plans to sign the ROD for the TransWest Transmission project. The project would provide transmission infrastructure and capacity to deliver approximately 3,000 megawatts of electric power from renewable and other energy resources in south-central WY to a substation hub in

southern NV. The proposed project includes an approximately 730-mile-long, 600-kilovolt, direct current transmission line.

December 8: BLM-CO and BLM-MT will hold online oil and gas lease sales. BLM-CO will offer 31 parcels totaling 20,135 acres in the Royal Gorge, Grand Junction and Colorado River Valley Field Offices. BLM-MT will offer 88 parcels containing 19,940 Federal mineral. None of the parcels being offered in CO or MT are in sage-grouse habitat.

December 9: BLM-ESO will transfer approximately 60,000 acres of land to the Red Lake Band of Chippewa Indians. The lands were ceded to the United States in the late 1800's and early 1900's, and originally identified for restoration in a 1945 Secretarial Order.

December 9: BLM-WY plans to sign the Gateway South (Wyoming/Colorado/Utah) ROD. The protest period ended on June 13, 2016. Five protests were received (from The Wilderness Society, Defenders of Wildlife and Sierra Club, Cross Mountain Ranch, Friends of Northwest Colorado, and Wild Earth Guardians) and are currently being evaluated.

December 13: BLM-UT and BLM-Eastern States Office will hold online oil and gas lease sales. BLM-UT is offering 26 parcels totaling 12,070 acres of Federal lands located in the Green River District. Three parcels totaling 137 acres are in the General Habitat Management Area and located in units adjacent to existing leases held by production. Although none are within the 3.1 lek buffer, 38 other parcels were deferred for sage grouse habitat reasons. The BLM-ESO will offer 35 parcels totaling 1,678 acres in Arkansas (1 parcel, 35.57 acres), Mississippi (1 parcel, 40.03 acres), and Ohio (33 parcels, 1,600.69 acres). This will include Federal minerals within the Marietta unit of the Wayne National Forest, Ohio. The ESO sale has attracted congressional and public attention over concerns about hydraulic fracturing in the Wayne NF. BLM-ES has received no protests on any of the parcels.

December 13: Tentative release date for the Report to the Sage-Grouse Task Force on the Greater Sage-Grouse Compensatory Mitigation.

December 13: The State/Federal Sage-Grouse Task Force meeting will be held in San Diego, California.

December 14: BLM National Petroleum Reserve in Alaska (NPR-A) oil & gas lease sale will be held. The sale is being held concurrently with the State of Alaska's oil and gas lease sale.

December 20: The BLM plans to release its final mitigation manual and handbook that will help the agency carry out consistent, effective, and transparent mitigation to address impacts to resources from public land uses.

December 21: BLM-UT will sign the Moab MLP ROD. The Moab MLP/PRMPA NOA was published in the Federal Register on Friday, July 22, 2016, initiating the protest period, which closed on August 22, 2016. Six protests have been received and are being evaluated.

December 21: BLM-UT plans to sign the ROD for the Beaver Dam/Red Cliffs NCAs and St. George ROD. The Notice of Availability (NOA) was published in the Federal Register on September 2, 2016, initiating a 30-day protest period. The Record of Decision for the Red Cliffs NCA has a court-ordered completion date of December 31, 2016.

December 22: The public comment period ends for the BLM-ESO Draft EIS for the Mountain Valley Project and Equitrans Expansion Project, a pipeline that would run through Virginia and West Virginia. The Federal Energy Regulatory Commission is the lead agency for developing the Draft EIS.

December 29: BLM-NV plans to issue the final Dixie Meadows Geothermal Project EA and FONSI. The project area consists of approximately 22,021 acres of public land. The proponent (Ormat) is seeking approval to drill temperature gradient wells and to drill and test observation wells and production wells at up to 20 specific locations.

December 30: BLM-AK plans to sign the Eastern Interior Alaska ROD. Nine protests were received and are being reviewed.

December 30: BLM-ID plans to sign the Gateway West Transmission ROD. The BLM published the FSEIS for the final two sections on October 7, 2016. The protest period will end November 7, 2016. The preferred routes avoid to the greatest extent possible private land, Greater sage-grouse habitat and the Morley Nelson Snake River Birds of Prey National Conservation Area.

December 30: The BLM plans to release the draft EIS for the Sagebrush Focal Area Mineral Withdrawal. As part of ROD implementation, the BLM and the U.S. Forest Service are recommending the withdrawal of lands within Sagebrush Focal Areas from locations with mining claims, subject to valid existing rights. As part of the withdrawal process the lands covered by the proposal have been temporarily segregated for a period of up to two years. During this period, the agencies are undertaking environmental and other analyses to determine if the lands should be formally withdrawn to protect sage-grouse habitat from adverse effects of future locatable exploration and mining.

December 31: The U.S. Forest Service has filed an application with the BLM requesting that the Secretary of the Interior extend the duration of Public Land Order (PLO) No. 7233 (the Rogue River Withdrawal in OR) for an additional 20-year term. PLO No. 7233 withdrew approximately 2,090 acres of National Forest Systems Lands in the Rogue River-Siskiyou National Forest from mining for 20 years to protect the Rabbit Ears-Falcon Wildlife Area; Rogue River Wild and Scenic Corridor; Union Creek Historic District; Abbot Creek and Mill Creek Recreation Sites; and the Prospect Ranger Station Administrative Site. The withdrawal created by Public Land Order No. 7233 will expire on January 1, 2017, unless extended.

January 3: The BLM and U.S. Forest Service have filed an application requesting to withdraw 101,021.71 acres in SW Oregon around the Salmon River (5,216.18 of BLM Revested O&C lands and 95,805.53 of National Forest System Lands). The comment period on the proposed 20-year withdrawal closes on December 31st at which point the Secretary would be able to make a decision on the application.

January 4: The BLM expects to release a Coal PEIS scoping report. The report will describe the process, summarize issues raised by commenters, and discuss alternatives that may be evaluated in the Coal PEIS.

January 5-8: The Western Association of Fish and Wildlife Agencies 2017 Mid-Winter meeting will be held in Litchfield Park, Arizona. The agenda is not currently posted, but is expected to include discussions on Greater Sage-Grouse.

January 6: The NOA is expected to publish for the Sonoran Desert National Monument Target Shooting RMP Amendment and Draft EIS. The U.S. District Court in Arizona has ordered the BLM to temporarily close 2.1 percent -- 10,600 acres -- of the Sonoran Desert National Monument to recreational target shooting. During the closure, the BLM will conduct a court-ordered analysis of the impacts of such shooting on the Monument. Licensed hunting continues to be allowed; all state regulations apply. Approximately 95 percent of the 12.2 million acres of public land managed by BLM in Arizona remain open to recreational target shooting. The court-ordered deadline for this RMP is September 30, 2017.

January 9: BLM-CO plans to sign the Dominguez Escalante ROD. The PRMP/FEIS NOA was published in the Federal Register on Thursday, June 30, 2016, initiating the protest period, which closed on Monday, August 1, 2016. Seven protests were received; these submissions are currently being evaluated.

January 17: BLM-ID is scheduled to sign the Boardman to Hemingway ROD. The PRMP for this 305 mile (88 miles BLM) transmission line (500 kV AC) in Idaho and Oregon is expected to publish in mid-November 2017.

Jan. 17 and 24: The Nevada Cattlemen's Association, Nevada Department of Agriculture, USFS, Nevada Department of Wildlife and the BLM will host a series of Livestock Grazing Permittee workshops throughout Nevada. At these workshops, the BLM will present how the BLM's Greater Sage-Grouse Plan Amendment's objectives will affect the livestock grazing program in Nevada and address questions.

IV. Major Federal Register Notices and Approval Packages:

Title	Current Status
Notice of Availability of the Final Environmental Impact Statement and Proposed Land-use Plan Amendments for the Boardman to Hemingway Transmission Line Project, Oregon	11/15/16 Cleared the DOI, waiting for publication date. (DTS 1311)

V. Congressional Activities:

Hearings

Legislative Hearing: The week of Nov. 28, the House Natural Resources Subcommittee on Federal Lands may hold a legislative hearing. Date and bills TBD.

BLM State Director Courtesy Visits

Courtesy Visits / Montana & Dakotas Congressional Delegations: During the week of Nov. 28, BLM Montana/Dakotas State Director Jamie Connell plans to conduct courtesy visits with members and staff of the Montana, North Dakota, and South Dakota congressional delegations.

VI. Pending Packages in ASLM:

Packages with ASLM:

1. Surname – Sec Jewell Response to 2 Gov. Sandoval letters, Proposed Mineral Withdrawal in Sagebrush Focal Area (BLM0007183)
2. Signature – Response to Letter Re: Appeal of the BLM's decision to declare Lia Shapiro's mine claim Abandoned (LM00000009)
3. Surname/Signature – MOU between BLM and DOD on Wind Energy BLM0006219
4. Surname - Notice of Availability of the BLM Draft Presumed to Conform List of Actions Under General Conformity; Upper Green River Basin, Wyoming BLMR000766
5. Signature - Basin and Range National Monument Conservation Easement BLM0008835
6. Surname – Planning 2.0 **Starting review but Waiting for Executive Summary from Linda L**

7. Signature – Extension of Public Land Order 7233 –USFS Rogue River, OR BLM000127
8. Surname - Bureau of Land Management's Implementation of Secretarial Order 3339 Report Fiscal Year 2016 BLM0009086
9. Signature – Proposed Withdrawal Extension, Sweet Grass Hills, MT PLO 7254, 19,686 acres BLM000126
10. Surname – DM Chapter on Sagebrush Biome
11. Surname - Southern Nevada Public Land Management Act (SNPLMA)–Round 16B, Project funding proposals (BLM0009071)
12. Surname - QFRs -7/7 HNR Hearing on Planning 2.0, Jim Lyons BLM0009091
13. Surname – NW Colorado RAC
14. Surname – Correspondence – Response to Tester - Solenex lease in Badger-Two Medicine area. (BLM0008986)
15. Surname - Notice of Intent to Prepare an Environmental Impact Statement for the Proposed Tri-state Fuel Breaks Project, Owyhee County, Idaho and Malheur County, Oregon BLMR001209
16. Surname – SNPLMA Annual Report for FY 2014 & 2015

Packages with BLM:

1. Surname/Signature - Transfer of Jurisdiction of Public Lands to Chocolate Mountain Aerial Gunnery Range/CACA 056671 BLM000120 **Returned to BLM in DTS to address comments/questions**

VI. Packages Going to ASLM Next Week:

1. Onshore Order 1 Package
2. Correspondence – Response to Tester - Encourages administrative withdrawal of leases north of Yellowstone National Park (BLM0009234)
3. QFRs - 9/22 SENR Hearing - Neil Kornze (BLM0009094)
4. Transfer of Jurisdiction of Public Lands to Chocolate Mountain Aerial Gunnery Range/CACA 056671 (BLM000120) – Responding to ASLM review comments

November 18, 2016

BSEE/ASLM Weekly Senior Staff Meeting

Primary Topics

- **Director's Schedule/Travel:**
 - **None in November**
- **BSEE Leadership Offsite**
- **Environmental Defense Center and Center for Biological Diversity Lawsuits**
- **Renewables Planning**
- **Packages with ASLM**
 - **None**

Recent and Proposed Activities

1. Executive Travel and Speeches:

- a. Director Salerno is hosting the BSEE Leadership offsite meeting in Sterling, VA, this week. The BSEE awards ceremony will be on November 17.

2. Rules, Plans and NTL Updates:

- a. The Pipeline Decommissioning Final Rule, the Cost Recovery Rule, and the Civil Penalties Fee Adjustment Notice were cleared by the Executive Secretariat for publication in the *Federal Register*.

3. Environmental Defense Center (EDC) Lawsuit:

- a. On November 11, 2016, EDC filed a complaint for declaratory and injunctive relief regarding compliance with the National Environmental Policy Act (NEPA) and Endangered Species Act (ESA) for offshore well stimulation treatments (WST) in the Pacific. "Plaintiffs bring this case seeking declaratory relief that BSEE's and BOEM's decision to authorize the use of WSTs offshore California in reliance upon the P[rogrammatic]E[nvironmental]A[ssessment] and FONSI is unlawful under NEPA, and that Defendants' failure to conduct consultation and/or their finding of no effect on threatened and endangered species is unlawful under the ESA. Plaintiffs seek to enjoin the use of WSTs until Defendants prepare an EIS in compliance with NEPA and its regulations, and conduct a lawful consultation process under the ESA and its regulation."
- b. On November 15, CBD filed a lawsuit making similar claims and accusing the administration of violating NEPA. It also says Interior failed to consider the effect of development on artifacts of the Chumash people, who are native to California's coast and have lived in the area for thousands of years.

4. Media Interests:

- a. Bloomberg BNA has requested an interview on the Well Control Rule. The interview will be with Doug Morris this week.
- b. BSEE Public Affairs posted a news brief on November 15 to announce the Pipeline Decommissioning Rule.

5. Diversity Initiatives Update: November is National Native American Heritage Month. The Gulf Of Mexico Region Special Emphasis Program Committee will sponsor a program on Thursday, November 17, 2016. The featured film will be "Taking Alcatraz". On November 20, 1969, a group of Native Americans landed on Alcatraz Island and claimed it as their own. The government fought to stop them from moving in. After centuries of seeing their land stolen from them, Native Americans seized the rocky island and held on to it. Alcatraz became a symbol of hope, inspiration and change for the Indian people everywhere.

6. Upcoming Meetings:

- a. **BSEE Senior Leadership Conference:** The next BSEE Senior Leadership Conference is scheduled for November 14-17 in Sterling, VA.

- b. Presentation of BSEE Director's Awards:** Director Salerno is scheduled to present BSEE Gold, Silver, and Bronze Awards to individuals and teams at a ceremony in Sterling, VA on November 17.
- c. Meeting with Marine Well Containment Company (MWCC):** Director Salerno is scheduled to receive an update on MWCC's capabilities on December 1 at MIB.
- d. Meeting with Ocean Energy Safety Institute (OESI):** Director Salerno is scheduled to meet with officials from OESI on December 2 at MIB. The purpose of the meeting is to receive a briefing on completed and upcoming activities.

7. Looking Further Ahead

- a. BSEE Region and District Visits:** Director Salerno is tentatively scheduled to visit the Gulf of Mexico Region and District offices the week of December 5, 2016.
 - b. BSEE Investigator Training:** Director Salerno is scheduled to deliver prerecorded remarks via video on December 9 to the BSEE Investigator's Course in Charleston, SC. This will be the fifth offering of the course, which is held at the Federal Law Enforcement Training Center.
 - c. Center for Offshore Safety:** Director Salerno is scheduled to attend a meeting of the Center for Offshore Safety External Stakeholders Group in Washington, DC on December 12, 2016.
 - d. Pipeline and Hazardous Materials Safety Administration (PHMSA) Forum:** Director Salerno is scheduled to participate in a forum on Safety Management Systems and Safety Culture with representatives from the U.S. and Canada on December 12, 2016 in Washington, DC.
 - e. Annual North American Regulators Meeting on Safety Culture:** Director Salerno is scheduled to participate in the Annual North American Regulators Meeting on Safety Culture on December 13-14, 2016. The meeting is being hosted by Department of Transportation in Washington, DC.
 - f. BSEE New Employee Orientation:** Director Salerno is scheduled to deliver remarks at a BSEE new employee orientation in Sterling, VA on December 15.
 - g. Meeting with Helix Well Containment Group (HWCG):** Director Salerno is scheduled to meet with representatives from HWCG on December 16 at MIB to receive an update on their capabilities.
 - h. High Reliability Organizations Roundtable:** BSEE is scheduled to host the next meeting of the High Reliability Organizations Roundtable on December 19 at MIB.
 - i. Visit to Pacific and Alaska Regions:** Director Salerno is tentatively scheduled to visit the BSEE Pacific and Alaska Region offices to conduct all hands meetings during the week of January 3, 2017.
 - j. BSEE/US Coast Guard (USCG) Quarterly Meeting:** The next quarterly meeting of BSEE and USCG leadership is scheduled for January 10, 2017 at MIB.
- 8. Federal Register Notices:** The Pipeline Decommissioning Final Rule, Cost Recovery Rule, and Civil Penalties Fee Adjustment notice have all been submitted to the *Federal Register*. The Pipeline Decommissioning Final Rule will publish on November 16 and the Civil Penalties Rule is scheduled to publish on November 17.

- 9. Congressional Contact:** On October 20, BSEE Office of Congressional and International Affairs (OCIA) received a request for information from Senator Bill Cassidy (R-LA) regarding BOEM NTL 2016-N01 related to decommissioning bond requirements. The Senator is requesting information on how BSEE interfaces with BOEM to help BOEM set bond and supplemental bond surety requirements. OCIA is coordinating with BOEM on separate responses that outline each bureau's role in bonding determinations.
- 10. BSEE Packages with ASLM:** None

GAO and OIG Activity

Update: GAO 100736 (General Management Review of Interior's Oversight of Offshore Oil and Gas Activities). This engagement commenced on March 22, 2016. The entrance conference was held on April 4, 2016. GAO released the Statement of Facts on November 1, 2016. *An exit conference was held on November 8, 2016 to discuss the SOF. BSEE anticipates submitting written SOF comments to GAO the week of November 14, 2016. GAO indicated the draft report will likely be released for comment in early January 2017.*

Update: GAO 361632 (Interior's Human Capital Challenges). This engagement commenced on March 16, 2015. The entrance conference was held on April 10, 2015. The draft report was released on August 12, 2016. *The final report was publicly released on October 31, 2016, after a 30-day requester hold. The report makes 5 recommendations for PMB and ASLM. The 60-day response letter is due to GAO and Congress by December 31, 2016.*

Update: GAO 100927 (BSEE Practices Related to Obtaining Access to Helicopter Fuel). The engagement commenced on June 22, 2016. The entrance conference was held on July 5, 2016. *GAO briefed the Congressional requesters on the information they found from document/data requests and interviews with BSEE staff. The briefing was descriptive and not evaluative. GAO next steps are pending requester directions.*

OIG 2016-EAU-063 (Idle Iron). The engagement commenced on August 9, 2016. The entrance conference was held on October 12, 2016 in New Orleans LA. A second site visit to GOMR has been scheduled and staff interviews will be conducted November 15-17, 2016.

Update: GAO 101203 (BLM's Oil and Gas Inspection and Enforcement). This engagement commenced on October 27, 2016. *The entrance conference was held on November 8, 2016. GAO indicated they will likely contact BSEE in the future to discuss BLM's allocation of funding, enforcement authority and enforcement actions compare to our inspection and enforcement programs?*

Update: OIG 2017-EAU-001 (Energy Policy Act of 2005 Evaluation). This engagement commenced on October 28, 2016. *The entrance conference was held on November 8, 2016. The OIG will be evaluating the Department's management and oversight of the Energy Policy Act of 2005 (EPACT) to determine the status of energy-specific requirements as it relates to DOI.*

The OIG has identified 35 energy specific sections of the EPACT that will be covered during the evaluation. BSEE may be impacted by the following sections:

- *357 – Comprehensive Inventory of OCS Oil and Natural Gas Resources*
- *362 – Management of Federal oil and gas leasing programs*
- *965 – Oil and Gas Research Programs*

Update: Audit Recommendations and Other

- *OPAA is responding to FOIA Request No. BSEE-2017-00001 (All correspondence, emails, and other communication between any BSEE official or employee and any other BOEM or Department of Interior official or employee concerning the GAO report number GAO-16-40 [Actions Needed to Better Protect Against Billions of Dollars in Federal Exposure to Decommissioning Liabilities])*
- *The FY16 Q4 Audit Report has been submitted to ALSM for review and approval.*
- *BSEE's FY17 goal base is 13. Work is ongoing to close four recommendations in FY17 Q1.*
 - *Incident Investigations Rec 2 (Review 64 New Horizon Report Recommendations)*
 - *GAO-14-205 Rec 1 (Expand Use of 3R Incentives and Assess Effectiveness)*
 - *GAO-14-205 Rec 2 (Analyze Hiring Data to Expedite Hiring Process)*
 - *GAO-16-40 Rec 2 (Ensure that BSEE collects relevant data associated with decommissioning from lessees).*

Sage Grouse Implementation Check in with Exec. (1-866-685-9441 passcode 9305835#)

3-4 PM ET, 5653 MIB

November 18, 2016

Proposed Agenda:

Transition update (Kate)

SGTF coordination (ASLM/ FWS/ USGS/ BLM)

NPT meeting (Winter WAFWA)

Solicitors update

Withdrawal update

FY 17 GRSG budget—next steps

Round Robin

GB/ RM/ NIFC/ NOC/ WO

WO Update 2020 Status review,
December 6th PEIS--SLC
POW meeting December 7th and 8th --SLC
DSD meeting December 14th and 15th--Reno
MOU with NRCS and FS on collaborative conservation
Mitigation metrics and mitigation document to SGTF

Great Basin Restoration meeting?

BLM-ASLM Agenda
January 18, 2017
Internal Working Document

I. Executive Travel: January 22-28, 2017

BLM Acting Director Kristin Bail and Acting Deputy Director Jerry Perez will be in the office attending regularly scheduled meetings.

II. Agenda Items

- COOP for Friday
- Correspondence (See list below.)
- Admin Records
- Coal IMs
- Transition for next 30 days (e.g., BLM/ASLM interface, pending packages, other?)
- Projects
 - Chokecherry and Sierra Madre
 - Gateway West
- Priority Packages

Items with ASLM:

- Chokecherry and Sierra Madre Wind Energy Decision Package (BLM0009327)
- Proposed Withdrawal, Limestone Caves and Crooks Creek Fisheries Areas, Oregon (BLML000137)
- Notice of Intent to Prepare a Supplement to the Draft RMP for the Southern Nevada District Planning Area--Las Vegas and Pahrump Field Offices and Gold Butte Nation (BLMR001397)

Items incoming to ASLM:

- Request to Close Rec 1 OIL AND GAS RESOURCES: Actions Needed for Interior to Better Ensure a Fair Return (GAO-14-50)
- Notice to Prepare Two Great-Basin-Wide Programmatic Environmental Impact Statements to Support Sage Grouse Habitat Improvement (BLMR001407)

CORRESPONDENCE

DTS #	Name	Status
9292	WY GSG Mitigation Framework	With Jim Lyons
9038	O&G Chaco Landscape	Sent to Janice to review 1/17
8248	Admin procedures & IM 2013-177	With Linda Lance for review (may or may not proceed with response)
8526	Proposed venting and flaring rule	Janice to sign 1/17
8901	Colorado Twentymile Mine	Janice to sign 1/18
8987	Colorado Twentymile Mine (same response as 8901)	Janice to sign 1/18
9197	UT wild horse and burro population	Janice to sign 1/17
9375	Revocation of PLO withdrawals	Reassigned for Neil's signature

II. Weekly Report:

Week Ahead Announcements- Presidential and Department/Agency Priorities – January 22-28, 2017

January 22: The deadline for public comments on the BLM-NV draft Pine Nut Mountains HMA Plan, a ten-year management plan for wild horses in the Pine Nut Mountains.

Week of January 23: Rep. Grijalva (D-AZ) plans to visit the BLM-NM Organ Mountains-Desert Peaks National Monument. Date and BLM participation TBD.

Between January 23 and March 8: The BLM-AK Central Yukon Field Office will hold public meetings in 11 communities in the planning area, as well as in Anchorage and Fairbanks, to prepare a range of alternatives for the Draft Central Yukon RMP.

January 23: The BLM-WY Rock Springs FO will hold a public open house on the Sweetwater Solar Energy Project to solicit comments regarding issues, concerns and potential alternatives. The proposed photovoltaic solar project would encompass approximately 703 acres of which 638 acres would be located on public land. While the project is not within greater sage-grouse core areas, it may impact nesting and/or breeding habitat.

January 23: BLM-WY River/Bighorn Basin District fire program staff will attend a meeting with partners in Lander to discuss planning and preparation for the 2017 solar eclipse. A public meeting will be held on January 24 in Thermopolis and the BLM will attend.

January 24-25: The BLM MT/DKs Miles City FO has scheduled public scoping meetings regarding the Spring Creek Coal EIS on January 24 in Sheridan, WY, and January 25 in Colstrip, MT. The BLM is the lead agency.

January 25 and 26: The BLM will attend the Fort Berthold Federal Partners Meeting to be held in West Denver, Colorado at a BIA Office. The meeting will address issues associated with Bakken development of oil and gas on the Fort Berthold Indian Reservation and is not open to the public.

January 25: The BLM-WY Casper FO will meet with Wyoming Game and Fish Department (WGFD) to work toward the completion of the transfer of between 1,200 to 1,600 acres of land around Table Mountain from the BLM to the WGFD.

January 25: BLM New Mexico State Office will hold their first online Oil and Gas lease sale with 4 parcels covering 842 acres in Sandoval and Rio Arriba counties (NM). Parcels are available for viewing on the Energynet website - <https://www.energynet.com>.

January 26-27: BLM-OR will meet with a group of five Korean Nationals who are interested in local conservation efforts.

January 26-28: BLM-OR/WA will host public meetings for the Yaquina Head Recreation Area Management Plan on January 26 in Salem and January 27 and 28 at the Yaquina Head Outstanding Natural Area in Newport. A draft management plan is expected late summer 2017.

January 28: The BLM-AK State Director and BLM Arctic Office Manager will meet with the North Slope Borough Mayor in Utqiagvik to discuss projects involving the North Slope Borough and the NPR-A, including the Regional Mitigation Strategy, development of the Greater Mooses Tooth 2 oil and gas project, and the Legacy Wells program.

Media

Multiple Outlets- Oil & Gas Leases near Zion National Park (UT): Reporter Scott Streater (E&E), Brian Maffly (Salt Lake Tribune) and David DeMille (The Spectrum) requested comment on a press release issued by the Southern Utah Wilderness Alliance and the National Parks Conservation Association regarding two nominated oil and gas lease parcels located two miles from Zion National Park. UT PA Ryan Sutherland explained that there are no active BLM leases or wells in Washington County, UT and that the next lease sale is scheduled for June 15.

AP- Sweetwater Solar Energy Project (WY): Associated Press reporter Mead Gruver wanted to know whether the Sweetwater project would be Wyoming's first commercial solar facility in WY, and what particular issues could come up with permitting PV solar projects on BLM lands? (Sweetwater Solar, LLC submitted a proposal for a right-of-way grant to develop a 702-acre solar panel project area) BLM Rock Springs FM Kimberlee explained the process and that this would be the first commercial solar facility in WY. She also explained that the only safety issues were the 3-buried oil pipelines and power lines that were in the area, and that none of the solar panels would interfere with the oil pipelines or the power lines where the solar panels would be installed.

San Francisco Chronicle- CA Coastal NM Expansion (CA): Reporter Curtis Alexander is working on a story about the California Coastal National Monument expansion. He was on-site at the Coast Dairies property with a photographer and had general questions about management, public access and what monument designation means for Coast Dairies. CA PA provided him with general information.

Mail Tribune- Cascade-Siskiyou NM (WO): Reporter Mark Freeman requested information on the origination of the proclamation and map for the C-S NM. He wanted to know who determined the exact boundaries and wrote the actual document. WO PA is working this query.

Houston Chronicle- National Monuments (WO): Reporter James Osborne requested information on the amount of national conservation lands before and after the recent designations. He also requested a backgrounder on how the Bears Ears designation will affect leases in the area. WO PA is working this query.

Oregon Public Radio- Cascade-Siskiyou NM (WO/OR): Reporter Jeff Mapes requested information on whether there were recent solicitor opinions that stated it was ok for the President to designate lands in areas of timber harvests. He stated that the timber industry claimed prior DOI solicitor opinions stated areas of timber harvest could not have a NM designation. OR PA and WO PA are working this query.

A reporter from *The World Newspaper* in Coos Bay interviewed BLM-OR/WA about the timber receipts payment distribution. The reporter inquired about historical and current payments. She also asked questions regarding the future of the Coos Bay District timber program. The article is expected to be fair towards the BLM.

30-60 Day Look Ahead

Mid to late January: BLM plans to sign the Boardman to Hemingway ROD. Oregon Plan amendments are being handled concurrently and that decision will be issued simultaneously with the ROD for the EIS and Approval to issue a grant.

Mid to late January: The BLM-UT Moab FO will release for public review an EA for the Needles and Anticline Overlook (Canyon Rims) Road Improvement Project to improve public access and safety. The area is near the Bears Ears National Monument.

Late January TBD: Ed Roberson, BLM Utah State Director, plans to meet with Sen. Hatch. Location, time, and date TBD.

January 29: The Society for Rangeland Management Annual Meeting will be held in St. George, UT. BLM employees from various offices are planning to attend.

January 29 (tentative): BLM-NV plans to gather up to 135 wild horses from the Reveille HMA and surrounding Reveille Allotment. Eighty wild horses will be removed and transported to a BLM adoption facility while approximately 55 horses will be released back to the HMA and treated with fertility control for a post-gather population of 93.

January 30: The BLM and Forest Service will announce the annual adjusted grazing fee for public lands.

January 30: The BLM will meet with representatives from 22 countries to discuss climate change related mitigation measures and clean energy at the Main Interior building.

Late January: The BLM-UT Price Field Office will release for public review an EA analyzing a recreation management plan for the Joe's Valley Bouldering Area.

Late January: The BLM-CO Uncompahgre FO and the Grand Mesa, Uncompahgre and Gunnison National Forests will announce a public scoping on a natural gas development proposal about 12 miles north of Paonia, Colorado.

Early FY2017: The finalized implementation plan for Wilderness 2020 Vision is expected to be issued.

First Week of February: The BLM-ID Challis Field Office plans to capture up to 150 wild horses through bait trapping and remove up to 50 within the Challis HMA to reach the AML of 185-253. The current population estimate is 285. The gather is expected to be completed by mid-March.

February 3: The deadline for public comments on the EA for the competitive oil and gas lease sale scheduled for June 13, 2017 in the BLM-NV Battle Mountain District. The BLM received nominations for 106 parcels of public land to offer for leasing, totaling approximately 195,732 acres.

February 3-11: The 2017 King of the Hammers Ultra Race will be held at the Johnson Valley OHV Area in San Bernardino County. This event, authorized under a BLM special recreation permit, draws thousands of participants and spectators and has received national and international attention for its unique OHV and rock crawling competitions.

February 7: BLM-WY will hold an in-person Oil and Gas lease sale, offering 283 parcels totaling 184,784.25 acres located in Campbell, Carbon, Converse, Crook, Fremont, Johnson, Natrona, Niobrara, Sheridan, and Weston counties. Forty-one of the parcels are located within PHMA and the remaining parcels are within sage-grouse GHMA. Three protests have been received. The Powder River Basin Resource Council is protesting because some parcels or portions of parcels are within the Fortification Creek Planning Area, and they assert the EA fails to address potential impacts to the Fortification Creek area, including the Fortification Creek elk herd. WildEarth Guardians has concerns that the BLM fails to adequately disclose potential greenhouse gas emissions and analyze climate change. Davis Graham & Stubbs, LLP is protesting a single parcel due to concerns related to unleased lands within Communitization Agreements.

February 7-8: The Wildlife and Hunting Heritage Conservation Council meeting will be held at DOI-MIB.

February 8 (approximate): BLM-UT will begin helicopter gather operations in the Cedar Mountain HMA to gather 700 wild horses, remove 300, treat 150 with fertility control and release treated mares with remaining stallions back to the HMA.

February 9: The 60-day public scoping period ends for the BLM-MT/DKs Missoula RMP.

February 11: Deadline for public comments on the Preliminary EA for the Blue Wing Complex Gather Plan in the BLM-NV Winnemucca District.

February 12-15: The Corps Network will hold its annual conference in Washington. BLM staff will attend.

February 13-16: National Native Seed Conference will be held in Washington, D.C. The conference connects Research, Industry, Land Management, and Restoration professionals, providing the premier opportunity to develop relationships and share information about the collection, research and development, production, and use of native plant materials.

Feb 13-25: The Mineral resources report of the Sagebrush Focal Areas of Idaho, Montana, Nevada, Oregon, Utah, and Wyoming will be available the sage-brush focal areas. BLM WO received 600 copies from the USGS. These reports will be distributed at the planned public meeting in February and will be sent out to the state and field offices. Public meetings will be held for the proposed SFA Withdrawal EIS at 8 locations: Malta, MT; Salt Lake City, UT; Rock Springs, WY; Idaho Falls, ID; Reno, NV; Lake View, OR; Elko, NV, and Boise, ID from 2/13-2/16 and 2/21-2/24.

February 13-14: PV Solar America East (Boston, MA)

February 14-17: The BLM Executive Leadership Team will meet in Washington, D.C.

February 15-19: The 41st Annual National Wild Turkey Federation Convention & Sport Show will be held in Nashville, TN. The event includes a National Technical Committee meeting and partner awards ceremony. BLM, USFS, and state agency partners will participate.

February 15: BLM-OR/WA will hold the Blue Mule Timber Sale including 5,500 MBF of thinning harvest on 324 acres. The BLM will also hold the Quarry 5 Timber Sale including 7,358 MBF of regeneration and thinning harvest on 283 acres.

February 16-19: The 2017 Western Hunting and Conservation Expo will be held in Salt Lake City, UT. This annual gathering is sponsored by the Mule Deer Foundation and Sportsmen for Fish and Wildlife. Scheduled events include a WAFWA Mule Deer Working Group meeting on February 15 and partner Awards Breakfast on February 18. BLM, USFS, and state agency partners will participate.

February 17: BLM-OR/WA will hold the Six One Timber Sale consisting of 68 acres of regeneration harvest and one acre of right-of-way clearing. This project is expected to be controversial as it is a regeneration harvest.

February 25-March 1: The National Association of Counties Legislative Conference will be held in Washington, D.C.

February 25: Northern Nevada Correctional Center Wild Horse Adoption. Fifteen-20 wild horses will be offered for adoption.

February 28: A Lands with Wilderness Characteristics Inventory and Monitoring Indefinite Delivery and Indefinite Quantity Contract is being developed for review and posting by the NOC.

Late February: BLM-NV plans to issue the final Dixie Meadows Geothermal Project EA and FONSI. The project area consists of approximately 22,021 acres of public land. The proponent (Ormat) is seeking approval to drill temperature gradient wells, and to drill and test observation wells and production wells at up to 20 specific locations.

March 2-4: The Rocky Mountain Elk Foundation National Convention will be held in Nashville, TN. The agenda includes a Conservation Partners Meeting with a sage-grouse panel discussion on Thursday, March 2. BLM, USFS, NRCS, and state agency partners will participate.

March 4-11: The North American Wildlife and Natural Resources Conference will be held in Spokane, Washington. This year's BLM Partners meeting will be held on of March 7. BLM staff will attend.

March 7: The Great Alaska Sportsman Show will be held in Anchorage, Alaska.

March 9: BLM-CO is scheduled to hold an on-line oil and gas lease sale.

March 14: BLM-NV and MT are scheduled to hold an on-line oil and gas lease sale. BLM-NV will offer 67 parcels totaling almost 116,000 acres in the Elko District.

March 16: On January 12, the BLM-ESO announced the application to withdraw ecologically significant lands within the Superior National Forest in northern Minnesota from new mining claims by segregating the lands for two years. On March 16, the Superior National Forest is scheduled to hold a public meeting in Duluth, Minnesota.

March 19-22: The American Indian Higher Education Consortium Student Conference will be held in Rapid City, South Dakota.

March 23: BLM-ESO and UT are scheduled to hold an on-line oil and gas lease sale.

March-25-26: The Arizona Outdoor Expo will be held in Phoenix, Arizona.

March 27-28: The Public Lands Council/ National Cattleman's Beef Association Legislative Conference will be held in Washington, D.C.

April 22: Earth Day

April 23: National Volunteer Week

April 24-26: The Utility Solar Conference will be held in Tucson, Arizona.

BLM-ASLM Agenda
January 18, 2017
Internal Working Document

I. Executive Travel: January 22-28, 2017

BLM Acting Director Kristin Bail and Acting Deputy Director Jerry Perez will be in the office attending regularly scheduled meetings.

II. Agenda Items

- COOP for Friday
- Correspondence (See list below.)
- Admin Records
- Coal IMs
- Transition for next 30 days (e.g., BLM/ASLM interface, pending packages, other?)
- Projects
 - Chokecherry and Sierra Madre
 - Gateway West
- Priority Packages

Items with ASLM:

- Chokecherry and Sierra Madre Wind Energy Decision Package (BLM0009327)
- Proposed Withdrawal, Limestone Caves and Crooks Creek Fisheries Areas, Oregon (BLML000137)
- Notice of Intent to Prepare a Supplement to the Draft RMP for the Southern Nevada District Planning Area--Las Vegas and Pahrump Field Offices and Gold Butte Nation (BLMR001397)

Items incoming to ASLM:

- Request to Close Rec 1 OIL AND GAS RESOURCES: Actions Needed for Interior to Better Ensure a Fair Return (GAO-14-50)
- Notice to Prepare Two Great-Basin-Wide Programmatic Environmental Impact Statements to Support Sage Grouse Habitat Improvement (BLMR001407)

CORRESPONDENCE

DTS #	Name	Status
9292	WY GSG Mitigation Framework	With Jim Lyons
9038	O&G Chaco Landscape	Sent to Janice to review 1/17
8248	Admin procedures & IM 2013-177	With Linda Lance for review (may or may not proceed with response)
8526	Proposed venting and flaring rule	Janice to sign 1/17
8901	Colorado Twentymile Mine	Janice to sign 1/18
8987	Colorado Twentymile Mine (same response as 8901)	Janice to sign 1/18
9197	UT wild horse and burro population	Janice to sign 1/17
9375	Revocation of PLO withdrawals	Reassigned for Neil's signature

II. Weekly Report:

Week Ahead Announcements- Presidential and Department/Agency Priorities – January 22-28, 2017

January 22: The deadline for public comments on the BLM-NV draft Pine Nut Mountains HMA Plan, a ten-year management plan for wild horses in the Pine Nut Mountains.

Week of January 23: Rep. Grijalva (D-AZ) plans to visit the BLM-NM Organ Mountains-Desert Peaks National Monument. Date and BLM participation TBD.

Between January 23 and March 8: The BLM-AK Central Yukon Field Office will hold public meetings in 11 communities in the planning area, as well as in Anchorage and Fairbanks, to prepare a range of alternatives for the Draft Central Yukon RMP.

January 23: The BLM-WY Rock Springs FO will hold a public open house on the Sweetwater Solar Energy Project to solicit comments regarding issues, concerns and potential alternatives. The proposed photovoltaic solar project would encompass approximately 703 acres of which 638 acres would be located on public land. While the project is not within greater sage-grouse core areas, it may impact nesting and/or breeding habitat.

January 23: BLM-WY River/Bighorn Basin District fire program staff will attend a meeting with partners in Lander to discuss planning and preparation for the 2017 solar eclipse. A public meeting will be held on January 24 in Thermopolis and the BLM will attend.

January 24-25: The BLM MT/DKs Miles City FO has scheduled public scoping meetings regarding the Spring Creek Coal EIS on January 24 in Sheridan, WY, and January 25 in Colstrip, MT. The BLM is the lead agency.

January 25 and 26: The BLM will attend the Fort Berthold Federal Partners Meeting to be held in West Denver, Colorado at a BIA Office. The meeting will address issues associated with Bakken development of oil and gas on the Fort Berthold Indian Reservation and is not open to the public.

January 25: The BLM-WY Casper FO will meet with Wyoming Game and Fish Department (WGFD) to work toward the completion of the transfer of between 1,200 to 1,600 acres of land around Table Mountain from the BLM to the WGFD.

January 25: BLM New Mexico State Office will hold their first online Oil and Gas lease sale with 4 parcels covering 842 acres in Sandoval and Rio Arriba counties (NM). Parcels are available for viewing on the Energynet website - <https://www.energynet.com>.

January 26-27: BLM-OR will meet with a group of five Korean Nationals who are interested in local conservation efforts.

January 26-28: BLM-OR/WA will host public meetings for the Yaquina Head Recreation Area Management Plan on January 26 in Salem and January 27 and 28 at the Yaquina Head Outstanding Natural Area in Newport. A draft management plan is expected late summer 2017.

January 28: The BLM-AK State Director and BLM Arctic Office Manager will meet with the North Slope Borough Mayor in Utqiagvik to discuss projects involving the North Slope Borough and the NPR-A, including the Regional Mitigation Strategy, development of the Greater Mooses Tooth 2 oil and gas project, and the Legacy Wells program.

Media

Multiple Outlets- Oil & Gas Leases near Zion National Park (UT): Reporter Scott Streater (E&E), Brian Maffly (Salt Lake Tribune) and David DeMille (The Spectrum) requested comment on a press release issued by the Southern Utah Wilderness Alliance and the National Parks Conservation Association regarding two nominated oil and gas lease parcels located two miles from Zion National Park. UT PA Ryan Sutherland explained that there are no active BLM leases or wells in Washington County, UT and that the next lease sale is scheduled for June 15.

AP- Sweetwater Solar Energy Project (WY): Associated Press reporter Mead Gruver wanted to know whether the Sweetwater project would be Wyoming's first commercial solar facility in WY, and what particular issues could come up with permitting PV solar projects on BLM lands? (Sweetwater Solar, LLC submitted a proposal for a right-of-way grant to develop a 702-acre solar panel project area) BLM Rock Springs FM Kimberlee explained the process and that this would be the first commercial solar facility in WY. She also explained that the only safety issues were the 3-buried oil pipelines and power lines that were in the area, and that none of the solar panels would interfere with the oil pipelines or the power lines where the solar panels would be installed.

San Francisco Chronicle- CA Coastal NM Expansion (CA): Reporter Curtis Alexander is working on a story about the California Coastal National Monument expansion. He was on-site at the Coast Dairies property with a photographer and had general questions about management, public access and what monument designation means for Coast Dairies. CA PA provided him with general information.

Mail Tribune- Cascade-Siskiyou NM (WO): Reporter Mark Freeman requested information on the origination of the proclamation and map for the C-S NM. He wanted to know who determined the exact boundaries and wrote the actual document. WO PA is working this query.

Houston Chronicle- National Monuments (WO): Reporter James Osborne requested information on the amount of national conservation lands before and after the recent designations. He also requested a backgrounder on how the Bears Ears designation will affect leases in the area. WO PA is working this query.

Oregon Public Radio- Cascade-Siskiyou NM (WO/OR): Reporter Jeff Mapes requested information on whether there were recent solicitor opinions that stated it was ok for the President to designate lands in areas of timber harvests. He stated that the timber industry claimed prior DOI solicitor opinions stated areas of timber harvest could not have a NM designation. OR PA and WO PA are working this query.

A reporter from *The World Newspaper* in Coos Bay interviewed BLM-OR/WA about the timber receipts payment distribution. The reporter inquired about historical and current payments. She also asked questions regarding the future of the Coos Bay District timber program. The article is expected to be fair towards the BLM.

30-60 Day Look Ahead

Mid to late January: BLM plans to sign the Boardman to Hemingway ROD. Oregon Plan amendments are being handled concurrently and that decision will be issued simultaneously with the ROD for the EIS and Approval to issue a grant.

Mid to late January: The BLM-UT Moab FO will release for public review an EA for the Needles and Anticline Overlook (Canyon Rims) Road Improvement Project to improve public access and safety. The area is near the Bears Ears National Monument.

Late January TBD: Ed Roberson, BLM Utah State Director, plans to meet with Sen. Hatch. Location, time, and date TBD.

January 29: The Society for Rangeland Management Annual Meeting will be held in St. George, UT. BLM employees from various offices are planning to attend.

January 29 (tentative): BLM-NV plans to gather up to 135 wild horses from the Reveille HMA and surrounding Reveille Allotment. Eighty wild horses will be removed and transported to a BLM adoption facility while approximately 55 horses will be released back to the HMA and treated with fertility control for a post-gather population of 93.

January 30: The BLM and Forest Service will announce the annual adjusted grazing fee for public lands.

January 30: The BLM will meet with representatives from 22 countries to discuss climate change related mitigation measures and clean energy at the Main Interior building.

Late January: The BLM-UT Price Field Office will release for public review an EA analyzing a recreation management plan for the Joe's Valley Bouldering Area.

Late January: The BLM-CO Uncompahgre FO and the Grand Mesa, Uncompahgre and Gunnison National Forests will announce a public scoping on a natural gas development proposal about 12 miles north of Paonia, Colorado.

Early FY2017: The finalized implementation plan for Wilderness 2020 Vision is expected to be issued.

First Week of February: The BLM-ID Challis Field Office plans to capture up to 150 wild horses through bait trapping and remove up to 50 within the Challis HMA to reach the AML of 185-253. The current population estimate is 285. The gather is expected to be completed by mid-March.

February 3: The deadline for public comments on the EA for the competitive oil and gas lease sale scheduled for June 13, 2017 in the BLM-NV Battle Mountain District. The BLM received nominations for 106 parcels of public land to offer for leasing, totaling approximately 195,732 acres.

February 3-11: The 2017 King of the Hammers Ultra Race will be held at the Johnson Valley OHV Area in San Bernardino County. This event, authorized under a BLM special recreation permit, draws thousands of participants and spectators and has received national and international attention for its unique OHV and rock crawling competitions.

February 7: BLM-WY will hold an in-person Oil and Gas lease sale, offering 283 parcels totaling 184,784.25 acres located in Campbell, Carbon, Converse, Crook, Fremont, Johnson, Natrona, Niobrara, Sheridan, and Weston counties. Forty-one of the parcels are located within PHMA and the remaining parcels are within sage-grouse GHMA. Three protests have been received. The Powder River Basin Resource Council is protesting because some parcels or portions of parcels are within the Fortification Creek Planning Area, and they assert the EA fails to address potential impacts to the Fortification Creek area, including the Fortification Creek elk herd. WildEarth Guardians has concerns that the BLM fails to adequately disclose potential greenhouse gas emissions and analyze climate change. Davis Graham & Stubbs, LLP is protesting a single parcel due to concerns related to unleased lands within Communitization Agreements.

February 7-8: The Wildlife and Hunting Heritage Conservation Council meeting will be held at DOI-MIB.

February 8 (approximate): BLM-UT will begin helicopter gather operations in the Cedar Mountain HMA to gather 700 wild horses, remove 300, treat 150 with fertility control and release treated mares with remaining stallions back to the HMA.

February 9: The 60-day public scoping period ends for the BLM-MT/DKs Missoula RMP.

February 11: Deadline for public comments on the Preliminary EA for the Blue Wing Complex Gather Plan in the BLM-NV Winnemucca District.

February 12-15: The Corps Network will hold its annual conference in Washington. BLM staff will attend.

February 13-16: National Native Seed Conference will be held in Washington, D.C. The conference connects Research, Industry, Land Management, and Restoration professionals, providing the premier opportunity to develop relationships and share information about the collection, research and development, production, and use of native plant materials.

Feb 13-25: The Mineral resources report of the Sagebrush Focal Areas of Idaho, Montana, Nevada, Oregon, Utah, and Wyoming will be available the sage-brush focal areas. BLM WO received 600 copies from the USGS. These reports will be distributed at the planned public meeting in February and will be sent out to the state and field offices. Public meetings will be held for the proposed SFA Withdrawal EIS at 8 locations: Malta, MT; Salt Lake City, UT; Rock Springs, WY; Idaho Falls, ID; Reno, NV; Lake View, OR; Elko, NV, and Boise, ID from 2/13-2/16 and 2/21-2/24.

February 13-14: PV Solar America East (Boston, MA)

February 14-17: The BLM Executive Leadership Team will meet in Washington, D.C.

February 15-19: The 41st Annual National Wild Turkey Federation Convention & Sport Show will be held in Nashville, TN. The event includes a National Technical Committee meeting and partner awards ceremony. BLM, USFS, and state agency partners will participate.

February 15: BLM-OR/WA will hold the Blue Mule Timber Sale including 5,500 MBF of thinning harvest on 324 acres. The BLM will also hold the Quarry 5 Timber Sale including 7,358 MBF of regeneration and thinning harvest on 283 acres.

February 16-19: The 2017 Western Hunting and Conservation Expo will be held in Salt Lake City, UT. This annual gathering is sponsored by the Mule Deer Foundation and Sportsmen for Fish and Wildlife. Scheduled events include a WAFWA Mule Deer Working Group meeting on February 15 and partner Awards Breakfast on February 18. BLM, USFS, and state agency partners will participate.

February 17: BLM-OR/WA will hold the Six One Timber Sale consisting of 68 acres of regeneration harvest and one acre of right-of-way clearing. This project is expected to be controversial as it is a regeneration harvest.

February 25-March 1: The National Association of Counties Legislative Conference will be held in Washington, D.C.

February 25: Northern Nevada Correctional Center Wild Horse Adoption. Fifteen-20 wild horses will be offered for adoption.

February 28: A Lands with Wilderness Characteristics Inventory and Monitoring Indefinite Delivery and Indefinite Quantity Contract is being developed for review and posting by the NOC.

Late February: BLM-NV plans to issue the final Dixie Meadows Geothermal Project EA and FONSI. The project area consists of approximately 22,021 acres of public land. The proponent (Ormat) is seeking approval to drill temperature gradient wells, and to drill and test observation wells and production wells at up to 20 specific locations.

March 2-4: The Rocky Mountain Elk Foundation National Convention will be held in Nashville, TN. The agenda includes a Conservation Partners Meeting with a sage-grouse panel discussion on Thursday, March 2. BLM, USFS, NRCS, and state agency partners will participate.

March 4-11: The North American Wildlife and Natural Resources Conference will be held in Spokane, Washington. This year's BLM Partners meeting will be held on of March 7. BLM staff will attend.

March 7: The Great Alaska Sportsman Show will be held in Anchorage, Alaska.

March 9: BLM-CO is scheduled to hold an on-line oil and gas lease sale.

March 14: BLM-NV and MT are scheduled to hold an on-line oil and gas lease sale. BLM-NV will offer 67 parcels totaling almost 116,000 acres in the Elko District.

March 16: On January 12, the BLM-ESO announced the application to withdraw ecologically significant lands within the Superior National Forest in northern Minnesota from new mining claims by segregating the lands for two years. On March 16, the Superior National Forest is scheduled to hold a public meeting in Duluth, Minnesota.

March 19-22: The American Indian Higher Education Consortium Student Conference will be held in Rapid City, South Dakota.

March 23: BLM-ESO and UT are scheduled to hold an on-line oil and gas lease sale.

March-25-26: The Arizona Outdoor Expo will be held in Phoenix, Arizona.

March 27-28: The Public Lands Council/ National Cattleman's Beef Association Legislative Conference will be held in Washington, D.C.

April 22: Earth Day

April 23: National Volunteer Week

April 24-26: The Utility Solar Conference will be held in Tucson, Arizona.

II. Weekly Report:

Week Ahead Announcements- Presidential and Department/Agency Priorities – January 22-28, 2017

January 22: The deadline for public comments on the BLM-NV draft Pine Nut Mountains HMA Plan, a ten-year management plan for wild horses in the Pine Nut Mountains.

Week of January 23: Rep. Grijalva (D-AZ) plans to visit the BLM-NM Organ Mountains-Desert Peaks National Monument. Date and BLM participation TBD.

Between January 23 and March 8: The BLM-AK Central Yukon Field Office will hold public meetings in 11 communities in the planning area, as well as in Anchorage and Fairbanks, to prepare a range of alternatives for the Draft Central Yukon RMP.

January 23: The BLM-WY Rock Springs FO will hold a public open house on the Sweetwater Solar Energy Project to solicit comments regarding issues, concerns and potential alternatives. The proposed photovoltaic solar project would encompass approximately 703 acres of which 638 acres would be located on public land. While the project is not within greater sage-grouse core areas, it may impact nesting and/or breeding habitat.

January 23: BLM-WY River/Bighorn Basin District fire program staff will attend a meeting with partners in Lander to discuss planning and preparation for the 2017 solar eclipse. A public meeting will be held on January 24 in Thermopolis and the BLM will attend.

January 24-25: The BLM MT/DKs Miles City FO has scheduled public scoping meetings regarding the Spring Creek Coal EIS on January 24 in Sheridan, WY, and January 25 in Colstrip, MT. The BLM is the lead agency.

January 25 and 26: The BLM will attend the Fort Berthold Federal Partners Meeting to be held in West Denver, Colorado at a BIA Office. The meeting will address issues associated with Bakken development of oil and gas on the Fort Berthold Indian Reservation and is not open to the public.

January 25: The BLM-WY Casper FO will meet with Wyoming Game and Fish Department (WGFD) to work toward the completion of the transfer of between 1,200 to 1,600 acres of land around Table Mountain from the BLM to the WGFD.

January 25: BLM New Mexico State Office will hold their first online Oil and Gas lease sale with 4 parcels covering 842 acres in Sandoval and Rio Arriba counties (NM). Parcels are available for viewing on the Energynet website - <https://www.energynet.com>.

January 26-27: BLM-OR will meet with a group of five Korean Nationals who are interested in local conservation efforts.

January 26-28: BLM-OR/WA will host public meetings for the Yaquina Head Recreation Area Management Plan on January 26 in Salem and January 27 and 28 at the Yaquina Head Outstanding Natural Area in Newport. A draft management plan is expected late summer 2017.

January 28: The BLM-AK State Director and BLM Arctic Office Manager will meet with the North Slope Borough Mayor in Utqiagvik to discuss projects involving the North Slope Borough and the NPR-A, including the Regional Mitigation Strategy, development of the Greater Mooses Tooth 2 oil and gas project, and the Legacy Wells program.

Media

Multiple Outlets- Oil & Gas Leases near Zion National Park (UT): Reporter Scott Streater (E&E), Brian Maffly (Salt Lake Tribune) and David DeMille (The Spectrum) requested comment on a press release issued by the Southern Utah Wilderness Alliance and the National Parks Conservation Association regarding two nominated oil and gas lease parcels located two miles from Zion National Park. UT PA Ryan Sutherland explained that there are no active BLM leases or wells in Washington County, UT and that the next lease sale is scheduled for June 15.

AP- Sweetwater Solar Energy Project (WY): Associated Press reporter Mead Gruver wanted to know whether the Sweetwater project would be Wyoming's first commercial solar facility in WY, and what particular issues could come up with permitting PV solar projects on BLM lands? (Sweetwater Solar, LLC submitted a proposal for a right-of-way grant to develop a 702-acre solar panel project area) BLM Rock Springs FM Kimberlee explained the process and that this would be the first commercial solar facility in WY. She also explained that the only safety issues were the 3-buried oil pipelines and power lines that were in the area, and that none of the solar panels would interfere with the oil pipelines or the power lines where the solar panels would be installed.

San Francisco Chronicle- CA Coastal NM Expansion (CA): Reporter Curtis Alexander is working on a story about the California Coastal National Monument expansion. He was on-site at the Coast Dairies property with a photographer and had general questions about management, public access and what monument designation means for Coast Dairies. CA PA provided him with general information.

Mail Tribune- Cascade-Siskiyou NM (WO): Reporter Mark Freeman requested information on the origination of the proclamation and map for the C-S NM. He wanted to know who determined the exact boundaries and wrote the actual document. WO PA is working this query.

Houston Chronicle- National Monuments (WO): Reporter James Osborne requested information on the amount of national conservation lands before and after the recent designations. He also requested a backgrounder on how the Bears Ears designation will affect leases in the area. WO PA is working this query.

Oregon Public Radio- Cascade-Siskiyou NM (WO/OR): Reporter Jeff Mapes requested information on whether there were recent solicitor opinions that stated it was ok for the President to designate lands in areas of timber harvests. He stated that the timber industry claimed prior DOI solicitor opinions stated areas of timber harvest could not have a NM designation. OR PA and WO PA are working this query.

A reporter from *The World Newspaper* in Coos Bay interviewed BLM-OR/WA about the timber receipts payment distribution. The reporter inquired about historical and current payments. She also asked questions regarding the future of the Coos Bay District timber program. The article is expected to be fair towards the BLM.

30-60 Day Look Ahead

Mid to late January: BLM plans to sign the Boardman to Hemingway ROD. Oregon Plan amendments are being handled concurrently and that decision will be issued simultaneously with the ROD for the EIS and Approval to issue a grant.

Mid to late January: The BLM-UT Moab FO will release for public review an EA for the Needles and Anticline Overlook (Canyon Rims) Road Improvement Project to improve public access and safety. The area is near the Bears Ears National Monument.

Late January TBD: Ed Roberson, BLM Utah State Director, plans to meet with Sen. Hatch. Location, time, and date TBD.

January 29: The Society for Rangeland Management Annual Meeting will be held in St. George, UT. BLM employees from various offices are planning to attend.

January 29 (tentative): BLM-NV plans to gather up to 135 wild horses from the Reveille HMA and surrounding Reveille Allotment. Eighty wild horses will be removed and transported to a BLM adoption facility while approximately 55 horses will be released back to the HMA and treated with fertility control for a post-gather population of 93.

January 30: The BLM and Forest Service will announce the annual adjusted grazing fee for public lands.

January 30: The BLM will meet with representatives from 22 countries to discuss climate change related mitigation measures and clean energy at the Main Interior building.

Late January: The BLM-UT Price Field Office will release for public review an EA analyzing a recreation management plan for the Joe's Valley Bouldering Area.

Late January: The BLM-CO Uncompahgre FO and the Grand Mesa, Uncompahgre and Gunnison National Forests will announce a public scoping on a natural gas development proposal about 12 miles north of Paonia, Colorado.

Early FY2017: The finalized implementation plan for Wilderness 2020 Vision is expected to be issued.

First Week of February: The BLM-ID Challis Field Office plans to capture up to 150 wild horses through bait trapping and remove up to 50 within the Challis HMA to reach the AML of 185-253. The current population estimate is 285. The gather is expected to be completed by mid-March.

February 3: The deadline for public comments on the EA for the competitive oil and gas lease sale scheduled for June 13, 2017 in the BLM-NV Battle Mountain District. The BLM received nominations for 106 parcels of public land to offer for leasing, totaling approximately 195,732 acres.

February 3-11: The 2017 King of the Hammers Ultra Race will be held at the Johnson Valley OHV Area in San Bernardino County. This event, authorized under a BLM special recreation permit, draws thousands of participants and spectators and has received national and international attention for its unique OHV and rock crawling competitions.

February 7: BLM-WY will hold an in-person Oil and Gas lease sale, offering 283 parcels totaling 184,784.25 acres located in Campbell, Carbon, Converse, Crook, Fremont, Johnson, Natrona, Niobrara, Sheridan, and Weston counties. Forty-one of the parcels are located within PHMA and the remaining parcels are within sage-grouse GHMA. Three protests have been received. The Powder River Basin Resource Council is protesting because some parcels or portions of parcels are within the Fortification Creek Planning Area, and they assert the EA fails to address potential impacts to the Fortification Creek area, including the Fortification Creek elk herd. WildEarth Guardians has concerns that the BLM fails to adequately disclose potential greenhouse gas emissions and analyze climate change. Davis Graham & Stubbs, LLP is protesting a single parcel due to concerns related to unleased lands within Communitization Agreements.

February 7-8: The Wildlife and Hunting Heritage Conservation Council meeting will be held at DOI-MIB.

February 8 (approximate): BLM-UT will begin helicopter gather operations in the Cedar Mountain HMA to gather 700 wild horses, remove 300, treat 150 with fertility control and release treated mares with remaining stallions back to the HMA.

February 9: The 60-day public scoping period ends for the BLM-MT/DKs Missoula RMP.

February 11: Deadline for public comments on the Preliminary EA for the Blue Wing Complex Gather Plan in the BLM-NV Winnemucca District.

February 12-15: The Corps Network will hold its annual conference in Washington. BLM staff will attend.

February 13-16: National Native Seed Conference will be held in Washington, D.C. The conference connects Research, Industry, Land Management, and Restoration professionals, providing the premier opportunity to develop relationships and share information about the collection, research and development, production, and use of native plant materials.

Feb 13-25: The Mineral resources report of the Sagebrush Focal Areas of Idaho, Montana, Nevada, Oregon, Utah, and Wyoming will be available the sage-brush focal areas. BLM WO received 600 copies from the USGS. These reports will be distributed at the planned public meeting in February and will be sent out to the state and field offices. Public meetings will be held for the proposed SFA Withdrawal EIS at 8 locations: Malta, MT; Salt Lake City, UT; Rock Springs, WY; Idaho Falls, ID; Reno, NV; Lake View, OR; Elko, NV, and Boise, ID from 2/13-2/16 and 2/21-2/24.

February 13-14: PV Solar America East (Boston, MA)

February 14-17: The BLM Executive Leadership Team will meet in Washington, D.C.

February 15-19: The 41st Annual National Wild Turkey Federation Convention & Sport Show will be held in Nashville, TN. The event includes a National Technical Committee meeting and partner awards ceremony. BLM, USFS, and state agency partners will participate.

February 15: BLM-OR/WA will hold the Blue Mule Timber Sale including 5,500 MBF of thinning harvest on 324 acres. The BLM will also hold the Quarry 5 Timber Sale including 7,358 MBF of regeneration and thinning harvest on 283 acres.

February 16-19: The 2017 Western Hunting and Conservation Expo will be held in Salt Lake City, UT. This annual gathering is sponsored by the Mule Deer Foundation and Sportsmen for Fish and Wildlife. Scheduled events include a WAFWA Mule Deer Working Group meeting on February 15 and partner Awards Breakfast on February 18. BLM, USFS, and state agency partners will participate.

February 17: BLM-OR/WA will hold the Six One Timber Sale consisting of 68 acres of regeneration harvest and one acre of right-of-way clearing. This project is expected to be controversial as it is a regeneration harvest.

February 25-March 1: The National Association of Counties Legislative Conference will be held in Washington, D.C.

February 25: Northern Nevada Correctional Center Wild Horse Adoption. Fifteen-20 wild horses will be offered for adoption.

February 28: A Lands with Wilderness Characteristics Inventory and Monitoring Indefinite Delivery and Indefinite Quantity Contract is being developed for review and posting by the NOC.

Late February: BLM-NV plans to issue the final Dixie Meadows Geothermal Project EA and FONSI. The project area consists of approximately 22,021 acres of public land. The proponent (Ormat) is seeking approval to drill temperature gradient wells, and to drill and test observation wells and production wells at up to 20 specific locations.

March 2-4: The Rocky Mountain Elk Foundation National Convention will be held in Nashville, TN. The agenda includes a Conservation Partners Meeting with a sage-grouse panel discussion on Thursday, March 2. BLM, USFS, NRCS, and state agency partners will participate.

March 4-11: The North American Wildlife and Natural Resources Conference will be held in Spokane, Washington. This year's BLM Partners meeting will be held on of March 7. BLM staff will attend.

March 7: The Great Alaska Sportsman Show will be held in Anchorage, Alaska.

March 9: BLM-CO is scheduled to hold an on-line oil and gas lease sale.

March 14: BLM-NV and MT are scheduled to hold an on-line oil and gas lease sale. BLM-NV will offer 67 parcels totaling almost 116,000 acres in the Elko District.

March 16: On January 12, the BLM-ESO announced the application to withdraw ecologically significant lands within the Superior National Forest in northern Minnesota from new mining claims by segregating the lands for two years. On March 16, the Superior National Forest is scheduled to hold a public meeting in Duluth, Minnesota.

March 19-22: The American Indian Higher Education Consortium Student Conference will be held in Rapid City, South Dakota.

March 23: BLM-ESO and UT are scheduled to hold an on-line oil and gas lease sale.

March-25-26: The Arizona Outdoor Expo will be held in Phoenix, Arizona.

March 27-28: The Public Lands Council/ National Cattleman's Beef Association Legislative Conference will be held in Washington, D.C.

April 22: Earth Day

April 23: National Volunteer Week

April 24-26: The Utility Solar Conference will be held in Tucson, Arizona.

Medford Mail Tribune: Our View: Monument expansion strikes a balance

Sunday

Posted

Jan 15, 2017 at 12:01 AM

Supporters of a larger Cascade-Siskiyou National Monument got some of what they wanted when President Barack Obama designated 47,624 acres as new monument land. Opponents, including the timber industry and the Jackson County commissioners, were disappointed, but the move is unlikely to bring the negative consequences they fear.

In one of his last official acts as president, Obama used his power under the Antiquities Act to expand the monument, just as President Bill Clinton did to create it in 2000, just before he left office. Presidents of both parties have used the Antiquities Act to set aside unique features for protection since the act was passed under President Theodore Roosevelt.

Supporters of the Cascade-Siskiyou expansion had sought 66,500 acres, and Oregon Sens. Ron Wyden and Jeff Merkley actively supported and worked for the larger designation.

The monument protects the intersection of the Cascade and Siskiyou mountain ranges, a unique bioregion that is home to plant and animal species found nowhere else on the planet. The goal of expansion supporters was to extend monument protection to the headwaters of streams that run through the monument and to connect migration corridors used by wildlife. The expansion also extends the monument into California, crossing the arbitrary boundary of the state line.

Opponents argued that the expansion would remove timber land from potential harvest. The American Forest Resource Institute says President Franklin Roosevelt's Interior Department advised 80 years ago that former Oregon & California Railroad lands designated for timber production could not legally be withdrawn under the Antiquities Act because that conflicted with the O&C Act.

That was one opinion, not a court ruling. O&C lands were included in President Clinton's original monument designation, but no court challenge has been mounted in the intervening 16 years. In any case, some of the O&C land in the monument is designated as reserves, already set aside from timber production.

Monument opponents also argue that a presidential decree is not the best way to protect land because it prevents Congress from having a say and limits public involvement. That view has some merit, although

two public hearings were held last fall on the expansion proposal, and Jackson County commissioners sent Interior Secretary Sally Jewell 750 pages of written material and a 178-page transcript of their public hearing. Commissioner Colleen Roberts acknowledged that the expansion is smaller than originally proposed, indicating that opponents' concerns were heard.

Most activities now permitted will continue to be allowed under monument rules, despite fears to the contrary. Hunting, fishing, camping and hiking are all permitted, and motorized vehicle use is allowed as well on established roads. Livestock grazing can continue as well, although public land managers will likely encourage ranchers to retire grazing allotments over time.

The expansion enjoyed support from Oregon's two senators, as well as the city councils of Ashland and Talent, and a substantial number of public comments favored the proposal.

We argued last fall that the decision should be based on science and environmental considerations rather than any hoped-for boost in tourism dollars, which are more ephemeral. It appears the expansion as proposed did that, and is a reasonable middle ground.

National Mining Group Blasts Latest Obama Withdrawals

Last Minute Land Grab in OR & MN Kills Jobs and Harms Public Education

This week, the Obama administration has undertaken more land withdrawals in the waning hours of its administration. The Cascade-Siskiyou National Monument will add 42,000 acres of public land in Oregon and 5,000 acres in California.

The Administration also published a withdrawal action removing 230,000 acres of federal land in northeast Minnesota. This action does not provide additional environmental protection for the area as mining is already prohibited within the boundaries and surrounding federal buffer zones of the Boundary Waters Canoe Area and Voyageurs National Park. The waters of the region are already protected by strict state and federal environmental standards. This action robs Minnesota schools from billions of potential dollars in much needed funding to public schools.

"These actions are not only disappointing but a desperate last minute action taken without Congress or citizen input at a huge cost to American manufacturing and local economic activity," said Matthew Ellsworth, AEMA Governmental Affairs. ***"The members of Congress from both parties who have publicly opposed this specific action need to do the right thing and reverse these actions of a single president."***

President Obama has used his powers under the Antiquities Act to protect more lands and waters than any other president without the consent of Congress or the states most affected. AEMA is working with members of Congress and the new administration aggressively to overturn these, and other land actions of the Obama administration.

Supporters of a larger Cascade-Siskiyou National Monument got some of what they wanted when President Barack Obama designated 47,624 acres as new monument land. Opponents, including the timber industry and the Jackson County commissioners, were disappointed, but the move is unlikely to bring the negative consequences they fear.

In one of his last official acts as president, Obama used his power under the Antiquities Act to expand the monument, just as President Bill Clinton did to create it in 2000, just before he left office. Presidents of both parties have used the Antiquities Act to set aside

unique features for protection since the act was passed under President Theodore Roosevelt.

Supporters of the Cascade-Siskiyou expansion had sought 66,500 acres, and Oregon Sens. Ron Wyden and Jeff Merkley actively supported and worked for the larger designation.

The monument protects the intersection of the Cascade and Siskiyou mountain ranges, a unique bioregion that is home to plant and animal species found nowhere else on the planet. The goal of expansion supporters was to extend monument protection to the headwaters of streams that run through the monument and to connect migration corridors used by wildlife. The expansion

also extends the monument into California, crossing the arbitrary boundary of the state line.

Opponents argued that the expansion would remove timber land from potential harvest. The American Forest Resource Institute says President Franklin Roosevelt's Interior Department advised 80 years ago that former Oregon & California Railroad lands designated for timber production could not legally be withdrawn under the Antiquities Act because that conflicted with the O&C Act.

That was one opinion, not a court ruling. O&C lands were included in President Clinton's original monument designation, but no court challenge has been mounted in the intervening 16 years. In any case, some of the O&C land in the monument is designated as reserves, already set aside from timber production.

Monument opponents also argue that a presidential decree is not the best way to protect

land because it prevents Congress from having a say and limits public involvement. That view has some merit, although two public hearings were held last fall on the expansion proposal, and Jackson County commissioners sent Interior Secretary Sally Jewell 750 pages of written material and a 178-page transcript of their public hearing. Commissioner Colleen Roberts acknowledged that the expansion is smaller than originally proposed, indicating that opponents' concerns were heard.

Most activities now permitted will continue to be allowed under monument rules, despite fears to the contrary. Hunting, fishing, camping and hiking are all permitted, and motorized vehicle use is allowed as well on established roads. Livestock grazing can continue as well, although public land managers will likely encourage ranchers to retire grazing allotments over time.

The expansion enjoyed support from Oregon's two senators, as

well as the city councils of Ashland and Talent, and a substantial number of public comments favored the proposal.

We argued last fall that the decision should be based on science and environmental considerations rather than any hoped-for boost in tourism dollars, which are more ephemeral. It appears the expansion as proposed did that, and is a reasonable middle ground.

An expanded monument

Obama ensures designation's purpose is fulfilled

JAN. 14, 2017

On Mon, Jan 16, 2017 at 12:20 AM, Neil Kornze <nkornze@blm.gov> wrote:

As the clock ticks down on President Obama's time in office, concern began to grow that he would overlook a proposal to enlarge the Cascade-Siskiyou National Monument in Southern Oregon. The monument is small, remote and already in existence, having been designated by President Clinton in 2000. It would have been easy to focus on other matters, including additional monument designations.

Instead, on Thursday the president added 48,000 acres to the 65,000-acre monument, ensuring that the purpose for which it was created — protecting the area's biological diversity — would be fulfilled. Without the expansion, development pressure and climate change would have threatened to degrade the integrity of unique habitats formed in the jumbled confluence of the Klamath River country and the Cascade and Siskiyou mountain ranges.

Rep. Greg Walden, the Republican who represents the area in Congress, opposes the expansion and said he would ask the incoming Trump administration to reverse it. Whether one president can nullify another's monument designation under the Antiquities Act of 1906 is not known — Donald Trump would be the first since Woodrow Wilson to try. Previous presidents have respected their predecessors' decisions, and have been guided by a 1938 attorney general's opinion holding that monument designations are irreversible.

Walden complained that landowners and local government leaders were not consulted in drawing the larger monument's boundaries. But the expansion was scaled back by about 25 percent, a fact that a Jackson County commissioner who opposes Obama's action welcomed as evidence that local objections had been taken into account.

There's further evidence that the Obama administration hasn't used the Antiquities Act as a steamroller. Conspicuously absent from the list of new and expanded monuments is one covering the Owyhee canyonlands in southeastern Oregon. The administration held back because of local opposition. The Cascade-Siskiyou expansion has strong, though far from unanimous, local support — a fact that should help make it secure even after the White House transition.

Subject: Oregonian Editorial on Monument Expansion

Sunday editorial from the Oregonian's Editorial Board. The say that the Owyhees need protection but not monument designation, and argue that the Cascade-Siskiyou National Monument has been a success and should be expanded. This is pretty big for us. We had a very good meeting with the Editorial Board and it appears to have paid off. --Jack

The Oregonian, December 4, 2016

Obama should honor on-the-ground solutions in Oregon's wildest places: Editorial

The Owyhee Wild and Scenic River, managed by the U.S. Bureau of Land Management, in southeast Oregon, flows north to connect with the Snake River. (Courtesy the Bureau of Land Management)

Two separate fights to protect two extraordinary patches of Oregon have in recent months escalated as President Barack Obama's term comes to a close. That's because he could, by the authority Congress granted to him in a far less populous time, singularly issue sweeping protections to the Owyhee Canyonlands in southeastern Oregon and the Cascade-Siskiyou Mountains in southwestern Oregon and northern California.

The drive to limit development and resource use in both areas makes sense but for different reasons. Oregonians will never get back the lightless skies at night or the lonely beauty of ancient, eroded terrain cut through by wild rivers in the Owyhee if given over to mining or highway-building. Separately, Oregonians risk losing some of the site-specific, mind-bending biodiversity that makes the forested Cascade-Siskiyou realm a delicate universe requiring limits on use.

But Obama should say no to designating national monument status to the 2.5-million acre Owyhee Canyonlands. And he should say yes to doubling the already successful Cascade-Siskiyou National Monument.

Selective wilderness designations, river protections and broad prohibitions on mining would be strategic, consequential steps Congress could take to protect the Owyhee Canyonlands, the largest undeveloped expanse of land in the lower 48 states. Significantly, doing so would ensure that an economically vital and long-established ranching culture goes unthreatened by monument designation.

A scene from the Cascade-Siskiyou National Monument in Southern Oregon. Courtesy the Bureau of Land Management

By contrast, in the more populated realm anchored by Ashland and Medford, the fish-bearing waterways and exotic flora that make the Siskiyous distinct face potential threat from fragmented lands and warmer temperatures from climate change. Immediate monument expansion would connect fragmented lands within and outside the monument, offering lifelines to potentially marooned species, and help preserve what the 2000 presidential decree called an "ecological wonder ... of rare and beautiful species of plants and animals, whose continued survival ... depends upon its continued ecological integrity."

Oregon's public lands conform to contemporary uses while honoring the communities rooted in them.

Few dispute that President-elect Donald Trump might bring to the nation a different ethic about development and land use, and it remains true that roughly half of Oregon is owned by the federal government and run by agencies such as the U.S. Bureau of Land Management and the U.S. Forest Service. While most folks in rural Harney County and surrounding areas objected to the armed takeover of the Malheur National Wildlife Refuge, simmering resentments across the American West about public lands management came to the fore. So Oregon must have a voice in deciding what's right for the extraordinary landscape that Oregonians call home. That means the Owyhee and the Siskiyous warrant bolstered protections only by actions that honor on-the-ground sentiment, essential to declaring shared destiny and preserving democracy.

Years ago Idaho withstood fears that its Owyhee lands would win monument designation and dodged it by creating 518,000 acres of protected wilderness. It has worked well, among other things limiting mechanized uses of sensitive lands.

But Oregon Senators Ron Wyden and Jeff Merkley in June proposed legislation that would shield more than 2 million acres of the Owyhee Canyonlands from mineral exploitation, including oil and gas drilling. It was a clear call to leave the ground the way it is and do so in such a way that supports farmers and ranchers who work in an environmentally sustainable fashion. They should press Congress to approve the legislation while citing a report released just last month from the Oregon Department of Geology and Mineral Industries showing plenty of untapped riches beneath the surface in southeastern Oregon.

Both senators, meanwhile, have deferred to Obama on monument designation, preferring to make known the Oregon sentiments on all sides of the issue. Yet both have been supportive of expansion of the Cascade-Siskiyou National

Presidents are twitchy in their monument designations, which can sharply limit access while altering ecologies and firefighting techniques. Bill Clinton created eight monuments in his last three days of office. Obama has made several already. His interior secretary and former REI chief, Sally Jewell, has advocated wise stewardship of public lands, and her counsel will count in the weeks ahead. But any presidential decree affecting Oregon must reflect this modern reality: Oregon's public lands conform to contemporary uses while honoring the communities rooted in them. Owyhee needs wilderness, river protection and mining-prohibition legislation -- but no monument decree. The Cascade-Siskiyou National Monument, meanwhile, should build upon its success with expansion that will ensure its vitality.

Obama should honor on-the-ground solutions in Oregon's wildest places: Editorial

The Owyhee Wild and Scenic River, managed by the U.S. Bureau of Land Management, in southeast Oregon, flows north to connect with the Snake River. (Courtesy the Bureau of Land Management)

Two separate fights to protect two extraordinary patches of Oregon have in recent months escalated as President Barack Obama's term comes to a close. That's because he could, by the authority Congress granted to him in a far less populous time, singularly issue sweeping protections to the Owyhee Canyonlands in southeastern Oregon and the Cascade-Siskiyou Mountains in southwestern Oregon and northern California.

The drive to limit development and resource use in both areas makes sense but for different reasons. Oregonians will never get back the lightless skies at night or the lonely beauty of ancient, eroded terrain cut through by wild rivers in the Owyhee if given over to mining or highway-building. Separately, Oregonians risk losing some of the site-specific, mind-bending biodiversity that makes the forested Cascade-Siskiyou realm a delicate universe requiring limits on use.

But Obama should say no to designating national monument status to the 2.5-million acre Owyhee Canyonlands. And he should say yes to doubling the already successful Cascade-Siskiyou National Monument.

Selective wilderness designations, river protections and broad prohibitions on mining would be strategic, consequential steps Congress could take to protect the Owyhee Canyonlands, the largest undeveloped expanse of land in the lower 48 states. Significantly, doing so would ensure that an economically vital and long-established ranching culture goes unthreatened by monument designation.

A scene from the Cascade-Siskiyou National Monument in Southern

Oregon. Courtesy the Bureau of Land Management

By contrast, in the more populated realm anchored by Ashland and Medford, the fish-bearing waterways and exotic flora that make the Siskiyous distinct face potential

threat from fragmented lands and warmer temperatures from climate change. Immediate monument expansion would connect fragmented lands within and outside the monument, offering lifelines to potentially marooned species, and help preserve what the 2000 presidential decree called an "ecological wonder ... of rare and beautiful species of plants and animals, whose continued survival ... depends upon its continued ecological integrity."

Oregon's public lands conform to contemporary uses while honoring the communities rooted in them.

Few dispute that President-elect Donald Trump might bring to the nation a different ethic about development and land use, and it remains true that roughly half of Oregon is owned by the federal government and run by agencies such as the U.S. Bureau of Land Management and the U.S. Forest Service. While most folks in rural Harney County and surrounding areas objected to the armed takeover of the Malheur National Wildlife Refuge, simmering resentments across the American West about public lands management came to the fore. So Oregon must have a voice in deciding what's right for the extraordinary landscape that Oregonians call home. That means the Owyhee and the Siskiyous warrant bolstered protections only by actions that honor on-the-ground sentiment, essential to declaring shared destiny and preserving democracy.

Years ago Idaho withstood fears that its Owyhee lands would win monument designation and dodged it by creating 518,000 acres of protected wilderness. It has worked well, among other things limiting mechanized uses of sensitive lands.

But

Oregon Senators Ron Wyden and Jeff Merkley in June proposed legislation that

would shield more than 2 million acres of the Owyhee Canyonlands from mineral exploitation, including oil and gas drilling. It was a clear call to leave the ground the way it is and do so in such a way that supports farmers and ranchers who work in an environmentally sustainable fashion. They should press Congress to approve the legislation while citing a report released just last month from the Oregon Department of Geology and Mineral Industries showing plenty of untapped riches beneath the surface in southeastern Oregon.

Both senators, meanwhile, have deferred to Obama on monument designation, preferring to make known the Oregon sentiments on all sides of the issue. Yet both have been supportive of expansion of the Cascade-Siskiyou National Monument, even as some logging- and ranching-based voices in the region claim they are unheard.

Presidents are twitchy in their monument designations, which can sharply limit access while altering ecologies and firefighting techniques. Bill Clinton created eight monuments in his last three days of office. Obama has made several already. His interior secretary and former REI chief, Sally Jewell, has advocated wise stewardship of public lands, and her counsel will count in the weeks ahead. But any presidential decree affecting Oregon must reflect this modern reality: Oregon's public lands conform to contemporary uses while honoring the communities rooted in them. Owyhee needs wilderness, river protection and mining-prohibition legislation -- but no monument decree. The Cascade-Siskiyou National Monument, meanwhile, should build upon its success with expansion that will ensure its vitality.

Thank you for your note. I am out of the office today. If your matter is time sensitive, please feel free to call 202-208-3801.

Neil

KATE BROWN
Governor

November 21, 2016

The Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street NW
Washington, D.C. 20240

Dear Secretary Jewell:

Thank you for your steadfast support for America's iconic landscapes. I appreciate your agency's continued interest in one of Oregon's natural icons – the Cascade-Siskiyou National Monument – and the effort made in convening a community discussion around expansion. As Oregon's Governor, I lend my support to your efforts and want to convey my desire to enhance this Oregon wonder through a thoughtful expansion of its boundaries.

Since President Clinton's dedication of the Cascade-Siskiyou National Monument in 2000, community leaders and interested parties have worked diligently to protect and enhance the monument's diverse natural, geological, and historic resources; which include a spectacular variety of rare plants and animals. This work must continue as the unique and vibrant ecological wonders of Cascade-Siskiyou face increasing challenges from a changing climate. Expansion is critical to continued ecological integrity, which has made the monument a destination.

When opportunities like a prudent Cascade-Siskiyou National Monument expansion present themselves, we owe it to future generations to embrace them for history shows they are fleeting. The unfortunate reality of Congressional obstruction and inaction has indefinitely stalled many worthy and broadly supported public land protection bills. Prime examples in Oregon include the Devil's Staircase wilderness bill (2009) and the Wild Rogue wilderness expansion (2011). Despite strong local support, these proposals and others have languished since their introduction.

Expanding the Cascade-Siskiyou National Monument meets many of the factors I consider important in public land discussions. While state governors do not have a dispositive role in federal land decisions, I appreciate the Obama Administration's dedication to soliciting local input. It is important to consider proposed expansions and new designations in the context of their specific circumstances. Among the reasons I support a thoughtful Cascade-Siskiyou expansion:

- It augments an existing public land designation. The Cascade-Siskiyou National Monument has been successful in attracting community and federal support, demonstrating its value locally and among the national monument network.

The Honorable Sally Jewell

November 21, 2016

Page 2

- The identified need informed by scientific analysis of current and future landscape-level ecosystem health. The formation of the original monument set out why the unique values found at the intersection of the Cascade, Siskiyou, and Klamath mountain ranges needed greater protections. Analysis from 2011 onward highlights the scientific support for increased monument resilience amid considerable pressures.
- The level of public engagement and evidence of an inclusive process. Local community conversations about expanding the monument have been on-going for many years, culminating with robust local meetings in recent months.
- The degree of private ownership within the proposal and private landowner support. The proposed expansion map minimizes the impact to private inholdings. Many private landowners in the expansion have been included in expansion discussions and expressed their support.

This combination of factors strongly supports the proposed expansion. However, key issues remain to be addressed should the monument be expanded. Primary among them is the issue of local access, a common refrain at the recent community meetings. If the monument is expanded, I will follow the public process on access closely and advocate for reasonable resolution to accustomed uses. In addition to access, I will also be invested in the discussions regarding fire management, grazing, and timber harvest issues in an expanded monument management plan. Finally, the monument has long lacked a dedicated manager and sufficient staff and resources to enhance the ecological values as well as visitor and recreational opportunities. With the inclusion of many more miles of the Pacific Crest Trail, it is even more incumbent that adequate staff and resources be allocated to the monument to build on existing outdoor recreation opportunities for the benefit of local communities and businesses. I will continue to urge the administration address these concerns, and for our congressional delegation to advocate for sufficient funding.

Time is of particular importance as we enter the final weeks of the Obama administration. My office and state agency staff stand ready to assist our federal partners as they evaluate the proposal. I am confident there is sufficient time and determination to complete this expansion for the benefit of Oregon, the region, and the nation. As a champion of preserving our most iconic public lands, I am excited about the opportunity to enhance the unique and valuable wonders of Cascade-Siskiyou National Monument.

Sincerely,

Governor Kate Brown

Cascade-Siskiyou: Siskiyou County Supervisors' hearing a nothing-burger

1 message

Dave Willis <sodamtn@mind.net>
To: Dave Willis <sodamtn@mind.net>

Thu, Nov 17, 2016 at 11:47 PM

As last-minute advertised in their November 14 press release below, the Siskiyou County Board of Supervisors held a public hearing in Yreka (CA) today, November 17, on the proposed Cascade-Siskiyou National Monument expansion. The meeting was a non-event.

- Nine members of the public (only one from Siskiyou County) spoke in favor of Monument expansion.
- Twelve members of the public (only one *not* from Siskiyou County) spoke against expansion.
- There was no applause for any speaker during this quiet, no-big-deal meeting. Nor were there any antics either inside or outside the meeting room.
- No elected officials spoke from the audience

Scheduled to last from 4 p.m. to 7 p.m., 30 people were in the audience of the ~200-chair Miner's Inn ballroom when the meeting began. With latecomers, the meeting never had more than 45 attendees. The planned three-hour meeting ended after an hour-plus at ~5:10 p.m. with Chair Grace Bennett getting no more takers for her repeated invitations for additional audience members to speak – and allowing two previous speakers to speak again, one woman informing us that the United Nations ran the national parks.

Siskiyou County Supervisor Bennett had previously gone on record for Siskiyou County opposing expansion at Senator Merkley's October 14 Ashland hearing, the Jackson County Commissioners' October 27 Medford hearing, and the Klamath County Commissioners' November 1 Klamath Falls hearing. The Siskiyou County Board of Supervisors had already sent a November 2 letter to DOI Sec'y Sally Jewell opposing Monument expansion over two weeks before today's November 17 public hearing.

Oregon's U.S. senators mapped ~5,000 acres of California BLM land for addition to the Monument in a 10-4-16 proposed Monument expansion that is mostly in Oregon. Very little private land (~400 acres?) is included inside the outer boundaries of the expansion proposal's California side. That private land stays private if the Monument is expanded. A bit less than 5,000 acres of California Department of Fish and Wildlife land is included inside the outer Monument expansion proposal boundaries. That state land stays state land if the Monument is expanded.

The attendance, demeanor, and outcome of this Yreka meeting was refreshingly and surprisingly underwhelming.

Many thanks to those who spoke in favor with me: Anne Marsh, Sarah Means, Maia Black, Dan Roper, Steve Jessup, Michael Parker, Michael Dotson, and Jeff Gilmore. We thought we were going into the lions' den. It was just a short, boring meeting.

For a bigger, wilder Monument –

Dave

Dave Willis, Soda Mountain Wilderness Council

Subject: inquiry - Nov 17 public meeting

Dear Ms. Nielsen,

Regarding the scheduled public meeting announced below for November 17, I am writing to inquire if comment is being accepted from residents of Siskiyou County only or is it open to residents of adjacent counties as well?

Thank you for responding to my inquiry.

PRESS RELEASE – NOVEMBER 14, 2016

**SISKIYOU COUNTY SUPERVISORS HOLD PUBLIC MEETING REGARDING
CASCADE-SISKIYOU MONUMENT EXPANSION**

The Siskiyou County Supervisors along with the Siskiyou County Department of Natural Resources will hold a **public meeting on Thursday, November 17th, 2016, at the Miner's Inn in Yreka from 4:00-7:00pm.** The public meeting will inform attendees about the Department of the Interior's proposal to expand the Cascade-Siskiyou National Monument and ask for public input regarding the expansion. Recently, Oregon Senators Jeff Merkley

and Ron Wyden asked the U.S. Department of the Interior to expand the monument's border by 64,000 acres, which would result in total coverage of the Monument being 130,000 acres, 10,000 of which would be in Siskiyou County, north and northwest of Iron Gate Reservoir.

The Supervisors encourage Siskiyou County's citizens and landowners to provide their input regarding the proposed expansion and its potential impacts to the County. If you wish to make a public statement or provide written documentation on the proposed expansion and its impacts, please plan to attend. Siskiyou County will submit comments to the U.S. Department of the Interior after the public meeting.

In addition, if you cannot attend the meeting or wish to provide comments yourself, they should be submitted to the following by November 20, 2016: Submit comments to the Secretary of the Interior at <https://www.doi.gov/feedback> or by calling 202-208-3100. Submit comments to the President of the United States at <https://www.whitehouse.gov/contact> or by phone at 202-456-1111

You may also contact Elizabeth Nielsen, Siskiyou County Natural Resource Policy Specialist at enielsen@co.siskiyou.ca.us or (530) 842-8012.

Just an FYI -- here's the note I sent back to John. As I'm sure most of you recall, John was a voice of reason during the Malheur occupation.

"Hi John - good to see you too. I appreciate you taking the time to send in some additional thoughts. I'll make sure to circulate these views as appropriate. As always, thanks for your thoughtful and constructive engagement on issues of concern.

Mike"

Mike

It was good to see you in Ashland, I was sorry I did not get a chance to say hi. I wanted to give you some additional input as of course one minute does not allow for thoughtful discussion of these complex issues.

Chads comments are in regard to the report from the panel that recommended the expansion.

C-S comments

The process appears to be loaded in favor of pro-monument activity. The Talent City council debated the issue in early July. Jackson and Klamath County commission only recently learned of the effort. Pro-monument landowners have been in monument discussions, large acre timber land holders have just learned of the effort.

An observation, due to the disjointed nature of the map, this looks like an intermediate step, not a completed effort, we should stop this overreach now.

If we are to address these habitats at a landscape level we must develop working land models to do so. In much of the west that is already going on, if after 100 years we need to keep these lands in their present condition it would seem continued current management would be very appropriate. Again, this can be done at no cost to the taxpayer, creation of a monument will be very expensive and divert money away from needed programs.

Proponents say that it is science based, yet very little time is left to do an adequate review of the science. The science appears to be somewhat soft, a group of scientist determine that in the presence of climate change the monument should be bigger, no modeling has been done to show how the identified threats would cause a loss of biodiversity. A stronger case could be made that in an altered fire regime, and with the presence of exotic plants active management will be necessary to prevent loss of diversity in the area of the monument.

This effort assumes that federal land management will produce a good result, that is not always the case. In the Warner Wetlands the federal property is chocked with pepperweed, in the private holdings the native meadows are still intact.

An admittedly limited review of BLM grazing documents shows riparian areas to be trending positive, yet not meeting the temperature standard, in some cases these standards are unattainable under any condition, in the presence of a positive trend we need to consider the value of grazing in preventing catastrophic wildfire, one of the major threats to biodiversity in the area.

Federal management is very expensive to the taxpayers, working private lands take care of weeds and fuel levels at no cost to the taxpayer. Often with better result, see above.

The current monument has somewhat of a let burn policy, this is not alright, neighboring properties should not be subject to this risk, these landscapes are not large enough for a let burn policy, and it is absolutely not fair to the neighbors, or the regional economy to try to make these large enough for a let burn policy.

These lands have been grazed for 100 years plus, and are still in good condition, today we understand better than ever how to graze these native systems without negative results. Before anything is changed a study of the land currently managed as a monument should be done, I would expect fuel loads on this ground put the entire region at risk of large intense fire events.

Designations under the Antiquities Act are politically driven, not subject to NEPA, stakeholder input has not been balanced to this point. These designations effect some stakeholder's livelihoods greatly, while giving other stakeholders somewhere to go if they feel like it. This is not an appropriate vehicle to initiate large scale land management.

Comments from Chad Boyd Phd Range Eastern Oregon Agricultural Research Center

* The first thing that struck me about the document is that there doesn't seem to be any overall model of how this system functions. In other words, when I work with a group on management planning, step one is to get to a common understanding of the factors that influence changes in the ecosystem and the specific changes that they promote. For example, in a sagebrush system we might put together a state and transition model that spells out how plant communities change and the management and non-management factors that drive that change. Once that's done we can think about where we are at now, with respect to plant community composition across the landscape, where we want to be in the future, and the management factors that might move us in that direction. In the document I reviewed there is no such discussion. In fact, they pretty much skip right to notion of "bigger is better" without really developing a common understanding of how the ecosystem works to begin with. Also not discussed is any evidence that critical areas outside the current monument boundaries are not functioning as they should be.

* An assumption that seems pervasive throughout the document is the need for "protection". This is where a lack of an overall model for how this system works becomes problematic. As written, the argument for expansion seems to be that specific ongoing actions are causing or will cause undesirable changes that need to be mitigated by curtailing such actions. What those changes are and how those changes are tied to current or future management remains elusive. This is particularly apparent with statements such as those contained in the 5th bullet on page 5. Here the authors list a wide variety of land uses and then suggest that these uses will "create habitat fragmentation, disturb wildlife populations, threaten water quality, adversely affect native vegetation, and encourage the spread of non-native weeds". Again, where is the model that demonstrates the implied effects. Also, there were no references associated with this text.

* There is no discussion of potential active management actions (e.g. vegetation manipulations) that may need to be undertaken to maintain biodiversity over time. As above, there is an implicit assumption that placing a larger area under protective designation will somehow inherently overcome impediments to diversity. This seems naïve, especially when the climate future is uncertain.

* On the subject of climate, the authors imply that larger areas will be needed to create conditions in which the ecosystem can be resilient to a future climate. There are a couple of problems with that. First off they don't really describe or defend their vision of what constitutes a "resilient" ecosystem, which seems somewhat critical if the whole idea is to expand the current monument designation to increase said resiliency. Second, about the only thing we know for sure regarding climate is that it's going to change. Exactly what it changes to, when that happens, and the

ecological implications of such changes are fairly uncertain at this point. So, in a nutshell, the authors are suggesting monument expansion to promote an undefined resilient ecosystem in response to an uncertain climate future.

* Obviously this document was written in support of monument expansion and I get that. What really troubles me the most though is that there are just enough references interspersed to suggest that there is some level of scientific certainty that the proposed expansion will garner expected results. Completely missing from the document is any form of adaptive management in which results are tracked through time and management adjusted as needed, as dictated by the results. It bothers me because the only way to realistically manage complex ecosystem problems over time is to employ an adaptive management design. Science can help tell us where to start the process, but after that, we have to use active feedback from the management process to adjust course over time.

* The one part of the document that I thought made a lot of sense was the notion of management of entire watersheds. I think we know enough about the interconnected nature of watersheds to suggest that only managing a portion of a watershed for biodiversity is not likely to produce positive results over time.

Lead editorial (NOT op-ed) from today's 11/11/2016 Eugene *Register-Guard*. Eugene is Oregon's second largest city.

<http://registerguard.com/rg/opinion/34974906-78/expand-the-monument.html.csp#>

Expand the monument

Obama should add protection to Cascade-Siskiyou

Donald Trump's victory in Tuesday's presidential election adds urgency to a piece of unfinished business left over from the administrations of Bill Clinton and George W. Bush: the expansion of the Cascade-Siskiyou National Monument in Southern Oregon. In his remaining weeks in office, President Obama should approve the expansion to ensure that the purposes for which the monument was created are met.

The Cascade-Siskiyou monument, designated by Clinton in 2000 and implemented under Bush, is the only one of the United States' 124 national monuments created for the specific purpose of protecting biological diversity. That unique status stems from its unique character: The monument lies where the Cascade range, the Siskiyou mountains and the Klamath River country meet, creating a geological, botanical and zoological mashup with characteristics of all three regions. To cite just one feature, the monument hosts 138 species of butterfly and is one of four butterfly hot spots in North America.

Both of Oregon's U.S. senators, Ron Wyden and Jeff Merkley, propose roughly doubling the monument's size by adding about 66,500 acres to it, which would broaden its range of elevations and bring important fish-bearing streams under protection. Owners of private inholdings within the monument support expansion, as did former Gov. John Kitzhaber. The city councils and chambers of commerce in Ashland and Talent, the communities closest to the monument, support the expansion.

The Jackson County Board of Commissioners is opposed, fearing reductions in timber harvests and grazing. Those fears are not misplaced, though they can easily be exaggerated. National monument designations are highly flexible, and can allow livestock and logging. Only a portion of the existing monument has been set aside as wilderness, and no further wilderness designations are proposed. The Cascade-Siskiyou monument, unlike most, is managed by the resource-oriented Bureau of Land Management rather than the preservation-oriented National Park Service.

Grazing has been a concern on monument land from the start. Clinton's proclamation directed the BLM to study the effects of livestock on the monument's biological systems, and to withdraw leases in areas where those effects are found to be damaging. A 2008 BLM study identified damaging effects in most areas, but no leases have been withdrawn. The 2009 legislation that designated part of the monument as wilderness directed the agency to retire leases that are donated to the BLM. Since then, grazing leases on 65,000 acres have been purchased with private donations, given to the BLM and retired.

These private purchases negate the economic harm to ranchers as a result of reduced grazing on monument land. They also show that people and organizations that recognize the value of the monument are willing to put their money where their mouths are. In Ashland and Talent, the monument is seen as an economic asset.

The Antiquities Act of 1906 gives President Obama the authority to expand the monument without consulting Congress. President Trump is unlikely to exercise this authority. Instead, he's expected to act in ways that make the expansion more vital.

Trump rejects the scientific evidence supporting a human role in climate change, and is expected to rescind most or all of Obama's executive orders reducing fossil fuel emissions. Climate change is a threat to the monument — as

temperatures rise, some species' ability to migrate from one ecological region to another is being disrupted. An expansion would help preserve connections among those regions, enhancing the resilience of the biological systems whose uniqueness led to the monument being created in the first place.

An expansion would be controversial, but Obama isn't facing re-election. And 50 or 100 years from now, it's a safe bet that no one will be wishing the Cascade-Siskiyou National Monument were smaller. Instead, an expanded monument would be a valued part of Obama's legacy.

Today's Cascade-Siskiyou National Monument Public Meeting

3 messages

Laura (Liz) Pardue <lpardue@blm.gov>

Fri, Oct 14, 2016 at 8:57 PM

To: Tommy Beaudreau <tommy_beaudreau@ios.doi.gov>, John Blair <john_blair@ios.doi.gov>, Sarah Neimeyer <sarah_Neimeyer@ios.doi.gov>, Kate P Kelly <Kate_Kelly@ios.doi.gov>, Jessica Kershaw <jessica_kershaw@ios.doi.gov>, Blake Androff <Blake_Androff@ios.doi.gov>, Benjamin Milakofsky <benjamin_milakofsky@ios.doi.gov>, Neil Kornze <nkornze@blm.gov>, amanda_degroff@ios.doi.gov, libby_marking@ios.doi.gov, kathleen_oleary@ios.doi.gov, nicole_buffa@ios.doi.gov

The public meeting went really well! The crowd of around 450 ppl was about 80% supporters, and we heard from more than 100 people (~70 in support, ~30 opposed). I'll have final numbers from Merkley's office - we had to get to the airport. Below are notes from today's activities and the meeting for those who want more details!

Site visit

This morning we did a tour of part of the monument and proposed expansion. On the short hike we saw a *golden eagle* overhead! (Also deer and some crazy tree lichen.) You could really see the different ecosystems with the elevation changes and mountain ranges coming together.

Tribal meeting

Before the public meeting, we had a great meeting with the chairmen of the Klamath and Karuk tribes. The tribes are supportive of the expansion and grateful we are talking to them now, as that apparently didn't happen with the original designation. Consultation is very important to them.

They spoke largely about the benefits to the watershed (especially when it comes to restoring salmon fisheries), and also emphasized protection of cultural resources and religious uses.

Public meeting

Standing room only crowd. We started off with brief statements from Sen Merkley, Mike, the mayors of Ashland and Talent (all at the dais), and Sen Wyden's staff.

Then we heard from a local scientist about the biodiversity of the monument and need for expansion, the State Rep in support, a Jackson County Commissioner opposed, a Klamath County Commissioner opposed, Chairman of the Klamath Tribe in support, and the Siskiyou County Supervisor (CA) opposed.

250 people signed up to speak, and we went for 3.5 hours total (about 3 hrs of public comment). We heard from more than 100, around 70-30 support to oppose because we alternated between oppose and support and mostly ran out of opponents a couple hours into the meeting. At the meeting overall, supporters outnumbered opponents five to one according to the sign-in sheets.

Proponents included scientists, local business, some private property owners within the boundary, conservation groups, and other private citizens from the area. They spoke about the necessity of the expansion to protect biodiversity, science-based decision making, the quality of life improvement and increased tourism, protecting the land from logging damage, and the importance of preserving the land for future generations.

Opponents complained about lack of transparency/notice, expressed concern about losing grazing and about fire management, worried about losing access to recreation and timber and losing O&C lands, and many dislike the antiquities act overall. Most opponents were from more rural areas in Jackson and Klamath counties.

We left at around 5:30 so we could get to our flights and I believe Merkley is taking a few more comments before he has to go. Overall a really smooth meeting where lots of voices were heard. Merkley went out of his way to give opponents time to speak. Some pictures attached hopefully!

Cc: Travis Joseph <tjoseph@amforest.org>
Subject: Cascade Siskiyou National Monument Proposal - Letter from AFRC

Jim, Michael, and Neil:

Hope all is well. I wanted to make sure the Administration had a copy of AFRC's letter to Senators Wyden and Merkley regarding the proposed Cascade Siskiyou National Monument. I understand the Administration has likely received many comments in support, but this remains a very controversial issue in Southwest Oregon and Northern California. As the Deputy Secretary will likely hear this afternoon at the public meeting in Ashland, there is broad opposition from community leaders, county commissioners, recreational users, grazers, farmers, private land owners, and the forest products industry – not to mention the general public who are still learning about the proposal.

We tried to take a balanced approach in this letter highlighting our substantive concerns (my members are very upset and feel their input has not been considered) but also underscoring our willingness to work with the senators and Administration on a vetted, thoughtful, comprehensive legislative approach. Thanks for your consideration.

Sincerely,
Travis Joseph
President, AFRC

Thanks. This is why we have public meetings... To shake this stuff out into the open. We should talk to these guys soon, I think. I will reach out.

[Quoted text hidden]

<Letter to OR Delegation, Cascade Siskiyou National Monument Expansion 10....pdf>

October 13, 2016

The Honorable Ron Wyden
United States Senate
911 N.E. 11th Ave, Suite 630
Portland, OR 97232

The Honorable Jeff Merkley
United States Senate
121 SW Salmon Street, Suite 1400
Portland, OR 97204

Dear Senator Wyden and Senator Merkley:

I write in advance of the October 14, 2016 public meeting in Ashland, Oregon with U.S. Department of the Interior Deputy Secretary Michael Conner on the proposal to expand the Cascade-Siskiyou National Monument. AFRC and its members – some of whom own lands inside and adjacent to the proposed monument expansion – received word of the public meeting and the map on October 7, making it impossible to offer a thorough analysis of the potential impacts ahead of the meeting. However, I do want to highlight serious concerns with the monument expansion and respectfully urge you to advise President Obama not to designate the area and to work with the public and impacted stakeholders on comprehensive legislation instead.

AFRC and its members care deeply about the health and sustainability of public forestlands. In fact, the business model and future success of AFRC members is *dependent* upon the responsible management, ecological health, and long-term sustainability of our national forests and Bureau of Land Management (BLM) lands. No one appreciates the uniqueness of Southwest Oregon's forests more than our local members and the need to protect them for future generations.

AFRC's members are also a key part of the fabric of the rural communities in which they work, live, and recreate. Beyond the tens of thousands of jobs and millions in economic activity our members generate, they are also heavily invested in these communities through charitable contributions, volunteer hours, scholarships, and sponsorships. These communities have been devastated by years of broken federal forest policies and are in dire need of a balanced solution to the O&C Lands and rural economic crisis in Western Oregon. We strongly believe the most serious public land management challenge facing Southwest Oregon – and thus the highest priority for Congressional action – is the exposure of our public lands and forests to climate change, catastrophic wildfire, disease, bug infestation, and drought.

AFRC and its members believe science-based, proactive management is not only the best way respond to these pressing challenges but the best way to grow local, rural economies, put Oregonians back to work, and provide sustainable raw materials that will be locally manufactured to produce local wood products every Oregonian uses, every day.

Unfortunately, a national monument expansion would have the opposite effect by preventing federal agencies from maintaining and protecting these unique public lands for future generations. Many of the lands within the proposed monument expansion are in need of forest thinning and restoration activities to reduce the risk of catastrophic wildfire. In a 2014 environmental assessment (EA) for the Howard Forest Management Project surrounding nearby Howard Prairie Lake, the BLM found these forests to be at “moderate to high risk of losing key ecosystem components due to altered fire regimes causing increased fire risk.” The BLM determined that without active management these forests would suffer further deterioration into even higher risk fire regimes. The EA found that “the implementation of thinning would promote increased fire-resilient forest stands by removing suppressed trees while retaining larger trees within treated stands.” Unfortunately, this needed forest restoration will not occur if these areas are included in an expanded Cascade-Siskiyou National Monument.

In the face of a warmer, dryer climate and denser forests resulting from decades of fire suppression and a lack of forest management, there is widespread recognition about the need for active forest restoration across this part of Southwest Oregon. In fact, a 2014 paper titled *A new approach to evaluate forest structure restoration needs across Oregon and Washington, USA* published in *Forest Ecology and Management* by the Nature Conservancy and others, identified most of the lands proposed for inclusion into the National Monument as having “moderate to high active restoration needs.” The authors of this paper determined that these “forest restoration needs were dominated by the need for thinning” and that “disturbance alone cannot restore forest structure.” Far from “protecting” these areas, an expanded national monument will most likely result in the loss of these unique lands to stand-replacing catastrophic wildfire.

Neighboring private lands, local communities, and the local forest products industry infrastructure will also be put at risk by an expansion of the Cascade-Siskiyou National Monument. Private forest lands included in – and adjacent to – the expanded national monument will face an elevated risk of catastrophic wildfire, disease, and insect infestations coming from unmanaged neighboring federal lands. Nearby homes and communities in the wildland urban interface (WUI) will also face increased wildfire risk as fuel loads continue to increase and forest health deteriorates. An already dwindling local forest products industry infrastructure – sawmills, loggers, and truckers – will face a further reduction in the amount of land available for sustainable, responsible management.

The proposed monument expansion includes a significant amount of private land within its boundaries – much of it in a checkboard pattern with BLM lands. Road access to these lands is often dependent on reciprocal right-of-way agreements between private landowners and the BLM. Maintaining road access across an expanded national monument to privately owned and managed forestland will be made more difficult and expensive. There will be public pressure to close privately constructed and maintained roads, to acquire “inholdings” within the expansion, and increased user-conflicts as ownership boundaries become blurred on-the-ground.

The proposed designation also comes just months after a major revision to BLM’s Resource Management Plans (RMPs) that govern management decisions on more than two million acres of statutorily unique O&C Lands. The RMPs administratively remove 74 percent of the BLM lands in these drier forest types out of ongoing, sustainable forest management and place them into reserves. With less than 26 percent of Southwest Oregon BLM forests designated for ongoing management, we will continue to witness declines in active forest management and the resulting timber harvests.

The new RMPs reduce allowable harvest levels by 40 percent versus the Clinton Northwest Forest Plan, which already slashed historical harvest levels on these BLM forests. A national monument expansion only increases the risk to the remaining local industry any effort to restore the health of our forests.

Finally, while we do not question Congressional authority to change land management plans and statutes through legislative action, we do have serious concerns about the precedent of administratively withdrawing productive forestlands from the mandates of the O&C Act of 1937. Less than three years after passage of the O&C Act, the President proposed withdrawing a portion of O&C Lands and to include those lands as part of an existing national monument (Oregon Caves). In a letter to the Secretary of the Interior, the Solicitor explained “the President does not have such authority” pointing out that “Congress has set aside the lands for the specified purposes” of timber production and “administration of the lands for national monument purposes would be inconsistent with the utilization of the O. & C. lands as directed by Congress.”

Subsequent opinions from Department of the Interior solicitors dating from the 1940s to 1970s concluded the O&C Lands could not be used for 1) mining; 2) could not be withdrawn for a state park; 3) and could not be included within wilderness study areas otherwise required as part of the Federal Land Policy Management Act.¹

While AFRC cannot support the administrative designation of a national monument in Southwest Oregon under the Antiquities Act at this time – especially one that includes O&C Lands – we remain committed to working with you and the rest of the Oregon delegation to find workable, balanced solutions to the challenges facing our forests and rural communities. AFRC does believe that unique lands in Southwest Oregon can and should be preserved. But those proposals should be fully vetted by the public with ample time to understand the proposal and its impacts; be comprehensive and include both conservation and economic objectives in order to sustain rural economies and the remaining infrastructure; and be reviewed and passed by Congress.

Thank you for this opportunity to comment. We look forward to reviewing more details about this proposal, offering our constructive feedback, and partnering with you to achieve common goals for our state: healthy forests and vibrant, safe communities.

Sincerely,

Travis Joseph
President

Cascade Siskiyou National Monument Proposal - Letter from AFRC

1 message

Travis Joseph <tjoseph@amforest.org>

Fri, Oct 14, 2016 at 4:50 PM

To: "michael_connor@ios.doi.gov" <michael_connor@ios.doi.gov>, "nkornze@blm.gov" <nkornze@blm.gov>, "james_lyons@ios.doi.gov" <james_lyons@ios.doi.gov>

Cc: Travis Joseph <tjoseph@amforest.org>

Jim, Michael, and Neil:

Hope all is well. I wanted to make sure the Administration had a copy of AFRC's letter to Senators Wyden and Merkley regarding the proposed Cascade Siskiyou National Monument. I understand the Administration has likely received many comments in support, but this remains a very controversial issue in Southwest Oregon and Northern California. As the Deputy Secretary will likely hear this afternoon at the public meeting in Ashland, there is broad opposition from community leaders, county commissioners, recreational users, grazers, farmers, private land owners, and the forest products industry – not to mention the general public who are still learning about the proposal.

We tried to take a balanced approach in this letter highlighting our substantive concerns (my members are very upset and feel their input has not been considered) but also underscoring our willingness to work with the senators and Administration on a vetted, thoughtful, comprehensive legislative approach. Thanks for your consideration.

Sincerely,
Travis Joseph
President, AFRC

Letter to OR Delegation, Cascade Siskiyou National Monument Expansion 10....pdf
1709K

October 13, 2016

The Honorable Ron Wyden
United States Senate
911 N.E. 11th Ave, Suite 630
Portland, OR 97232

The Honorable Jeff Merkley
United States Senate
121 SW Salmon Street, Suite 1400
Portland, OR 97204

Dear Senator Wyden and Senator Merkley:

I write in advance of the October 14, 2016 public meeting in Ashland, Oregon with U.S. Department of the Interior Deputy Secretary Michael Conner on the proposal to expand the Cascade-Siskiyou National Monument. AFRC and its members – some of whom own lands inside and adjacent to the proposed monument expansion – received word of the public meeting and the map on October 7, making it impossible to offer a thorough analysis of the potential impacts ahead of the meeting. However, I do want to highlight serious concerns with the monument expansion and respectfully urge you to advise President Obama not to designate the area and to work with the public and impacted stakeholders on comprehensive legislation instead.

AFRC and its members care deeply about the health and sustainability of public forestlands. In fact, the business model and future success of AFRC members is *dependent* upon the responsible management, ecological health, and long-term sustainability of our national forests and Bureau of Land Management (BLM) lands. No one appreciates the uniqueness of Southwest Oregon's forests more than our local members and the need to protect them for future generations.

AFRC's members are also a key part of the fabric of the rural communities in which they work, live, and recreate. Beyond the tens of thousands of jobs and millions in economic activity our members generate, they are also heavily invested in these communities through charitable contributions, volunteer hours, scholarships, and sponsorships. These communities have been devastated by years of broken federal forest policies and are in dire need of a balanced solution to the O&C Lands and rural economic crisis in Western Oregon. We strongly believe the most serious public land management challenge facing Southwest Oregon – and thus the highest priority for Congressional action – is the exposure of our public lands and forests to climate change, catastrophic wildfire, disease, bug infestation, and drought.

AFRC and its members believe science-based, proactive management is not only the best way respond to these pressing challenges but the best way to grow local, rural economies, put Oregonians back to work, and provide sustainable raw materials that will be locally manufactured to produce local wood products every Oregonian uses, every day.

Unfortunately, a national monument expansion would have the opposite effect by preventing federal agencies from maintaining and protecting these unique public lands for future generations. Many of the lands within the proposed monument expansion are in need of forest thinning and restoration activities to reduce the risk of catastrophic wildfire. In a 2014 environmental assessment (EA) for the Howard Forest Management Project surrounding nearby Howard Prairie Lake, the BLM found these forests to be at “moderate to high risk of losing key ecosystem components due to altered fire regimes causing increased fire risk.” The BLM determined that without active management these forests would suffer further deterioration into even higher risk fire regimes. The EA found that “the implementation of thinning would promote increased fire-resilient forest stands by removing suppressed trees while retaining larger trees within treated stands.” Unfortunately, this needed forest restoration will not occur if these areas are included in an expanded Cascade-Siskiyou National Monument.

In the face of a warmer, dryer climate and denser forests resulting from decades of fire suppression and a lack of forest management, there is widespread recognition about the need for active forest restoration across this part of Southwest Oregon. In fact, a 2014 paper titled *A new approach to evaluate forest structure restoration needs across Oregon and Washington, USA* published in *Forest Ecology and Management* by the Nature Conservancy and others, identified most of the lands proposed for inclusion into the National Monument as having “moderate to high active restoration needs.” The authors of this paper determined that these “forest restoration needs were dominated by the need for thinning” and that “disturbance alone cannot restore forest structure.” Far from “protecting” these areas, an expanded national monument will most likely result in the loss of these unique lands to stand-replacing catastrophic wildfire.

Neighboring private lands, local communities, and the local forest products industry infrastructure will also be put at risk by an expansion of the Cascade-Siskiyou National Monument. Private forest lands included in – and adjacent to – the expanded national monument will face an elevated risk of catastrophic wildfire, disease, and insect infestations coming from unmanaged neighboring federal lands. Nearby homes and communities in the wildland urban interface (WUI) will also face increased wildfire risk as fuel loads continue to increase and forest health deteriorates. An already dwindling local forest products industry infrastructure – sawmills, loggers, and truckers – will face a further reduction in the amount of land available for sustainable, responsible management.

The proposed monument expansion includes a significant amount of private land within its boundaries – much of it in a checkboard pattern with BLM lands. Road access to these lands is often dependent on reciprocal right-of-way agreements between private landowners and the BLM. Maintaining road access across an expanded national monument to privately owned and managed forestland will be made more difficult and expensive. There will be public pressure to close privately constructed and maintained roads, to acquire “inholdings” within the expansion, and increased user-conflicts as ownership boundaries become blurred on-the-ground.

The proposed designation also comes just months after a major revision to BLM’s Resource Management Plans (RMPs) that govern management decisions on more than two million acres of statutorily unique O&C Lands. The RMPs administratively remove 74 percent of the BLM lands in these drier forest types out of ongoing, sustainable forest management and place them into reserves. With less than 26 percent of Southwest Oregon BLM forests designated for ongoing management, we will continue to witness declines in active forest management and the resulting timber harvests.

The new RMPs reduce allowable harvest levels by 40 percent versus the Clinton Northwest Forest Plan, which already slashed historical harvest levels on these BLM forests. A national monument expansion only increases the risk to the remaining local industry any effort to restore the health of our forests.

Finally, while we do not question Congressional authority to change land management plans and statutes through legislative action, we do have serious concerns about the precedent of administratively withdrawing productive forestlands from the mandates of the O&C Act of 1937. Less than three years after passage of the O&C Act, the President proposed withdrawing a portion of O&C Lands and to include those lands as part of an existing national monument (Oregon Caves). In a letter to the Secretary of the Interior, the Solicitor explained “the President does not have such authority” pointing out that “Congress has set aside the lands for the specified purposes” of timber production and “administration of the lands for national monument purposes would be inconsistent with the utilization of the O. & C. lands as directed by Congress.”

Subsequent opinions from Department of the Interior solicitors dating from the 1940s to 1970s concluded the O&C Lands could not be used for 1) mining; 2) could not be withdrawn for a state park; 3) and could not be included within wilderness study areas otherwise required as part of the Federal Land Policy Management Act.¹

While AFRC cannot support the administrative designation of a national monument in Southwest Oregon under the Antiquities Act at this time – especially one that includes O&C Lands – we remain committed to working with you and the rest of the Oregon delegation to find workable, balanced solutions to the challenges facing our forests and rural communities. AFRC does believe that unique lands in Southwest Oregon can and should be preserved. But those proposals should be fully vetted by the public with ample time to understand the proposal and its impacts; be comprehensive and include both conservation and economic objectives in order to sustain rural economies and the remaining infrastructure; and be reviewed and passed by Congress.

Thank you for this opportunity to comment. We look forward to reviewing more details about this proposal, offering our constructive feedback, and partnering with you to achieve common goals for our state: healthy forests and vibrant, safe communities.

United States Senate

WASHINGTON, DC 20510

October 4, 2016

Secretary Jewell
Department of the Interior
1849 C Street, N.W.
Washington, DC 20240

Dear Secretary Jewell,

We are writing to request you or your designee's participation in a public meeting in the Ashland area to discuss potential expansion of the Cascade-Siskiyou National Monument. The meeting is scheduled to take place on October 14th in Ashland, the closest town to the Monument.

As you may recall, the Oregon Senators sent a letter to your office in August highlighting the unique biological diversity of the region and urging you to visit the area and speak with local citizens. The Cascade-Siskiyou National Monument has protected some of the most biodiverse public land in the United States. It is an ecological crossroads in an area of unique geology, biology, climate, and iconic American landscapes – the place where the volcanoes of the Cascade Range, the ridges and valleys of the Basin and Range Province, and the world-renowned biodiversity of the Klamath-Siskiyou mountain block come together. The monument also benefits small towns in the area by boosting recreation and tourism that assist the local economy.

However, mounting pressures on adjacent and nearby public lands, combined with the increasing effects of climate change, have convinced scientists that the original June 2000 boundaries are no longer adequate to protect the native species and habitats the monument was established to protect – and they urge expansion of the monument's boundaries.

This meeting will provide an opportunity for the public to learn more about the potential expansion of the Monument should the President choose to do so. Most importantly, the meeting will allow people to express support for or concerns about expanding the monument, and to comment on the specifics of how it might be expanded.

To help promote dialogue in the meeting we have attached a map showing some of the public lands scientists recommend for expanding the monument, as well as conservation designations proposed in legislation introduced by the Oregon Senators. These proposals intend to better provide protections to critical watersheds, and terrestrial habitats, and also to a wider range of elevations that are especially important as species seek to adapt to climate change.

The vast majority of the approximately 50,000-acre expansion proposed by scientists is on BLM land in Oregon, which has strong backing from elected officials, citizens, chambers of commerce, conservationists, and local landowners. About 5,000 acres of BLM land in California has additionally been recommended for inclusion – much of it already dedicated to wildlife protection in some fashion. And, as you know, only Federal public land inside expanded monument boundaries would become monument land. As with the existing monument, private land inside outer monument boundaries stays private.

Thank you for considering our request. We look forward to working with you toward an expanded Cascade-Siskiyou National Monument.

Sincerely,

Hi Mike - As we briefly talked about on Monday, we're hoping you'd be willing to participate in a public meeting sponsored by Senator Wyden on the cascade-siskiyou national monument expansion proposal.

Although we shouldn't confirm your participation until we receive the formal invite and confirmation that the senator will be there too, the senator's office is asking if you are available on October 12. Do you think that could work? If not, are there other dates that are better?

Many thanks,
Nikki

Hi all

I talked to Mike and he is happy to participate in a meeting sponsored by the Senator.

Mike has committed to be in Yakima on October 12-13 for a ribbon cutting for a new bridge and a meeting with leadership and Yakima Basin stakeholders.

If there is any flexibility on an event, we can do that week but would hope to avoid the 12-13. October 11 or 14 would work well.

Nikki -- do you want to check back with the Senator's office?

Thanks!

The Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street NW
Washington, D.C. 20240

Dear Secretary Jewell:

Thank you for your steadfast support for America's iconic landscapes. I appreciate your agency's continued interest in one of Oregon's natural icons – the Cascade-Siskiyou National Monument – and the effort made in convening a community discussion around expansion. As Oregon's Governor, I lend my support to your efforts and want to convey my desire to enhance this Oregon wonder through a thoughtful expansion of its boundaries.

Since President Clinton's dedication of the Cascade-Siskiyou National Monument in 2000, community leaders and interested parties have worked diligently to protect and enhance the monument's diverse natural, geological, and historic resources; which include a spectacular variety of rare plants and animals. This work must continue as the unique and vibrant ecological wonders of Cascade-Siskiyou face increasing challenges from a changing climate. Expansion is critical to continued ecological integrity, which has made the monument a destination.

When opportunities like a prudent Cascade-Siskiyou National Monument expansion present themselves, we owe it to future generations to embrace them for history shows they are fleeting. The unfortunate reality of Congressional obstruction and inaction has indefinitely stalled many worthy and broadly supported public land protection bills. Prime examples in Oregon include the Devil's Staircase wilderness bill (2009) and the Wild Rogue wilderness expansion (2011). Despite strong local support, these proposals and others have languished since their introduction.

Expanding the Cascade-Siskiyou National Monument meets many of the factors I consider important in public land discussions. While state governors do not have a dispositive role in federal land decisions, I appreciate the Obama Administration's dedication to soliciting local input. It is important to consider proposed expansions and new designations in the context of their specific circumstances. Among the reasons I support a thoughtful Cascade-Siskiyou expansion:

- It augments an existing public land designation. The Cascade-Siskiyou National Monument has been successful in attracting community and federal support, demonstrating its value locally and among the national monument network.

- The identified need informed by scientific analysis of current and future landscape-level ecosystem health. The formation of the original monument set out why the unique values found at the intersection of the Cascade, Siskiyou, and Klamath mountain ranges needed greater protections. Analysis from 2011 onward highlights the scientific support for increased monument resilience amid considerable pressures.
- The level of public engagement and evidence of an inclusive process. Local community conversations about expanding the monument have been on-going for many years, culminating with robust local meetings in recent months.
- The degree of private ownership within the proposal and private landowner support. The proposed expansion map minimizes the impact to private inholdings. Many private landowners in the expansion have been included in expansion discussions and expressed their support.

This combination of factors strongly supports the proposed expansion. However, key issues remain to be addressed should the monument be expanded. Primary among them is the issue of local access, a common refrain at the recent community meetings. If the monument is expanded, I will follow the public process on access closely and advocate for reasonable resolution to accustomed uses. In addition to access, I will also be invested in the discussions regarding fire management, grazing, and timber harvest issues in an expanded monument management plan. Finally, the monument has long lacked a dedicated manager and sufficient staff and resources to enhance the ecological values as well as visitor and recreational opportunities. With the inclusion of many more miles of the Pacific Crest Trail, it is even more incumbent that adequate staff and resources be allocated to the monument to build on existing outdoor recreation opportunities for the benefit of local communities and businesses. I will continue to urge the administration address these concerns, and for our congressional delegation to advocate for sufficient funding.

Time is of particular importance as we enter the final weeks of the Obama administration. My office and state agency staff stand ready to assist our federal partners as they evaluate the proposal. I am confident there is sufficient time and determination to complete this expansion for the benefit of Oregon, the region, and the nation. As a champion of preserving our most iconic public lands, I am excited about the opportunity to enhance the unique and valuable wonders of Cascade-Siskiyou National Monument.

Sincerely,

Governor Kate Brown

I, the Chief of Staff for the BLM located in Washington Office, do hereby certify the following to BLM FOIA Specialist Maritiza Harris, in her capacity as the FOIA Contact tasked with coordinating searches for records responsive to FOIA # OS-2017-00178.

Check ALL that apply:

- 1. I have reason to believe that the documents transmitted with this certification constitute all documents within the possession or control of the staff in the office.
- 2. I have determined none of the records that have been produced are sensitive.
- 3. I have determined that some or all of the records that have been produced are sensitive.

Y/N Records are marked as sensitive.

Y/N Records are sensitive due to a Solicitor sending, receiving, or reviewing the document(s).

- 4. I have reason to believe that there are no responsive documents within the possession or control of the staff in the office, and accordingly, am not provided any documents.

Information about the search (add lines as needed):

Name/Program Office	Search Terms Used	Search Location (e.g., paper files; email; share drive)
Neil Koinze	Cascade OR Siskiyou OR CSMN	email
Laurie Sedinger	Cascade OR Siskiyou OR CSMN	email

Information about individuals performing work (add lines as needed):

Name/Program Office	Grade	Hours to Search	Hours of Review

Sherwood, OR 97140

Dear Mr. Nick Smith:

This letter is in response to your Freedom of Information Act (FOIA) request with the Office of the Secretary OS-2017-00178 dated January 6, 2017. Your request was referred to our office. In your request, you asked for the following:

- "1) All documents or communications relating to Cascade-Siskiyou National Monument sent by, received by, or in the possession of Neil Kornze, Director, Bureau of Land Management.
- 2) All documents or communications relating to Cascade-Siskiyou National Monument sent by, received by, or in the possession of Laurie Sedlmayr-Cumming, Advisor, Director's Staff, Bureau of Land Management."

In search for responsive documents, we have located the enclosed material. We are providing 107 pages being released in its entirety.

As part of the 2007 FOIA amendments, the Office of Government Information Services (OGIS) was created to offer mediation services to resolve disputes between FOIA requesters and Federal agencies as a non-exclusive alternative to litigation. Using OGIS services does not affect your right to pursue litigation. You may contact OGIS in any of the following ways:

Office of Government Information Services
National Archives and Records Administration; Room 2510
8601 Adelphi Road
College Park, MD 20740-6001
E-mail: ogis@nara.gov
Telephone: 301-837-1996
Facsimile: 301-837-0348
Toll-free: 1-877-684-6448

Please note that using OGIS services does not affect the timing of filing an appeal with the Department's FOIA & Privacy Act Appeals Officer.

You also may seek dispute resolution services from our FOIA Public Liaison, Ryan Witt at (202) 912-7562.

For your information, Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA. See 5 U.S.C. § 552(c) (2006 & Supp. IV (2010)). This response is limited to those records that are subject to the requirements of the FOIA. This is a standard notification that is given to all our requesters and should not be taken as an indication that excluded records do, or do not, exist.

If you have any questions regarding this request, please contact Maritiza Harris, BLM WO FOIA Specialist, at (202) 912-7650 or via email at BLM_WO_FOIA@blm.gov.

Sincerely,

Good Afternoon,

Please see the attached FOIA coordination coming from DOI/OS. Please create a DAD form and we can discuss how this can be processed. We do not need to enter this into EFTS.

Thank you
