The [Washington Post](#) (8/25, Denyer, 6.76M) reports that the "market slide continued Tuesday across Asia." [USA Today](#) (8/25, Toppo, 5.23M) reports that in early trading on Tuesday, Japan's Nikkei index fell "nearly 4%," while China's Shanghai Composite index declined 7.6%, and "is now below the psychologically important 3,000 level." Both indexes are building on substantial losses on Monday.

In its lead story, [ABC World News](#) (8/24, lead story, 2:15, Stephanopolous, 5.84M) reported that Wall Street had its "worst day in more than four years after the second worst on Friday." It was a "chain reaction that started in China." ABC (Jarvis) said that "even veteran traders" were "stunned by the drop." White House Press Secretary Josh Earnest said, "What I would encourage people to evaluate is the ongoing strength and resilience of the US economy." However, ABC added that "to many on Wall Street, with stocks up nearly 60 percent over the last five years, today's slide was long overdue."

In its lead story, The [CBS Evening News](#) (8/24, lead story, 2:15, O'Donnell, 5.08M) reported that the multi-day declines are "wiping out market gains back to February of last year." CBS (Mason) said it was a "breathtaking ride even for veteran traders." In a second piece, the [CBS Evening News](#) (8/24, story 2, 1:00, O'Donnell, 5.08M) gave advice for those with 401(k) plans. CBS (Schlesinger) said, "Sit tight and do nothing. Remember, I know it can be scary here, but let's say you had sold at the bottom of the bear market in 2009. The Dow is at 6,500. You would have missed that nearly tripling of the index to 18,000."

[NBC Nightly News](#) (8/24, lead story, 3:00, Holt, 7.86M) reported, "A lot of investment portfolios including retirement nest eggs shrank today when stocks took another stunning fall. And experts warn we may need a strong stomach because this up and down ride is likely not over." [NBC Nightly News](#) (8/24, story 2, 1:30, Holt, 7.86M) ran an interview with CNBC's Jim Cramer, who looks at how to respond for investors in various age brackets. Looking forward, Cramer suggests that the market downturn is likely to continue in the short term.

Administration Stresses US Economy Remains Strong. [Reuters](#) (8/24) reports that the White House said on Monday that the President had been briefed on developments in the financial markets. White House spokesman Josh Earnest stressed that the US economy remains strong and that US officials are continuing to press China to pursue financial reforms. The [Washington Times](#) (8/25, Sands, 344K) reports that Earnest also "said the market turmoil was another argument to avoid 'self-inflicted wounds' to the US economy, calling on Congress to reauthorize the Export-Import Bank and to ease spending caps on domestic investment programs."

Meanwhile, the [Washington Times](#) (8/25, Taylor, 344K) separately reports that the Administration "pleaded with Beijing to be more transparent about its economy to win back investor confidence." Earnest said, "A more transparent economy is one that will benefit not just the Chinese economy but the global economy."

[The Hill](#) (8/24, Schroeder, 471K) reports that the Treasury Department, "through a spokesman, downplayed the drama by saying it was closely moni

1. PUBLIC LANDS:

'Bears Ears' latest battleground in Utah monument fight

CEDAR MESA, Utah -- The fight over federal protections for this desert region has reached a critical stage. Republican lawmakers aim to roll out a bill soon, but President Obama could pre-empt them by creating a national monument. A recent proposal known as "Bears Ears" from dozens of local tribes has emerged as a major flashpoint in the debate.

LAST LAUGHS

- + Late Night Political Humor.

DOI in the News:

THREE FIREFIGHTERS KILLED WHILE BATTLING BLAZE IN WASHINGTON. The [Greenwire](#) (8/20, Subscription Publication) reports that "three firefighters were killed and four others injured yesterday as wildfires forced the evacuation of two towns in central Washington state." Washington Gov. Jay Inslee said "the firefighters were killed near Twisp, Wash." They "became trapped amid the flames when winds shifted."

[KIVI-TV](#) Boise, D (8/21, 861) reports that Interior Sally Jewell Thursday "honored the three firefighters killed in Washington Wednesday after their vehicle crashed during a wildfire."

The [Wenatchee \(WA\) World](#) (8/20, 60K) reports that in a statement, Jewell said, "My heart goes out to the families and fellow firefighters of these fallen heroes as we mourn their loss in service to others. I join the entire Interior Department family in honoring their courage and sacrifice and standing with their loved ones in their time of grief. This is a stark reminder of the dangers faced by our Nation's brave firefighters each day." She added, "As fires continue to burn across the West, we continue to ask that residents and communities do their part to support firefighters by making your homes fire-wise and having a wildfire action plan for your family."

Additional coverage was provided by the [Clark County \(WA\) Columbian](#) (8/20, 86K), [NBC News](#) (8/21, 3.73M), [USA Today](#) (8/21, Krem-Tv, 5 23M), [Environment News Service](#) (8/20, 230), and [ENews Park Forest](#) (8/21, 2K).

Continuing Coverage Of Wildfires. Continuing coverage of wildfires was provided by the [Houston \(TX\) Chronicle](#) (8/21), the [Casper \(WY\) Star-Tribune](#) (8/21, 115K), the [Las Vegas \(NV\) Review-Journal](#) (8/21, 378K), the [Spokane \(WA\) Spokesman-Review](#) (8/20, 183K), the [Bend \(OR\) Bulletin](#) (8/21, 94K), [The East Oregonian](#) (8/20, 24K), the [Blue Mountain \(OR\) Eagle](#) (8/20, 7K), the [Army Times](#) (8/20, 336K), [RTI](#) (8/21, 346K), and [KARNV-TV Reno \(NV\)](#) Reno, NV (8/21, 2K).

\$1.5 MILLION FROM LWCF TO BE GIVEN TO SIXTEEN OHIO COMMUNITIES. The [Clermont \(OH\) Sun](#) (8/20) reports that "the Ohio Department of Natural Resources (ODNR) has recommended projects from 16 Ohio communities for grant funding that will exceed \$1.5 million." The "funds are pending final approval by the National Park Service and are provided through a federal matching grant from the Land and Water Conservation Fund (LWCF)."

Congress Urged To Act On LWCF. In an editorial, the [Clark County \(WA\) Columbian](#) (8/20, 86K) urges Congress to tackle "a pressing issue when they return to work: renewal of the Land and Water Conservation Fund." The paper urges Rep. Jaime Herrera Beutler to "take a lead position in supporting a fund that reflects the interests of her constituents." According to the paper, the benefits of the LWCF are "logical" and "meshes with the ethos of the environmentally conscientious Northwest."

In an editorial, the [Toledo \(OH\) Blade](#) (8/20, 265K) also calls on Congress to save the LWCF.

Additional Coverage. Additional coverage of the LWCF was provided by the [Houghton \(MI\) Daily Mining Gazette](#) (8/21, 23K), [WSAU-AM Wausau \(WI\)](#) Wausau, WI (8/21, 988), [KOAM-TV](#) Pittsburg, KS (8/21, 1K), and [Think Progress](#) (8/20, 453K).

SHENANDOAH NATIONAL PARK ESTABLISHES SISTER PARK RELATIONSHIP WITH NATURE RESERVE IN CHINA. The [Augusta \(VA\) Free Press](#) (8/21, 280) reports that "Shenandoah National Park and Baihuashan National Nature Reserve in China formalized a sister park arrangement at an official ceremony on July 4 in Beijing." Interior Secretary Sally Jewell was "present to witness the signing of the arrangement by Shenandoah National Park Superintendent Jim Northup and, Baihuashan National Nature Reserve Director Liu Dong." The article notes that "this marks the eighth sister park arrangement between Chinese protected areas and the National Park Service as well as the second sister park arrangement for Shenandoah National Park."

ALASKA GOV. WALKER SENDS LIST OF PRIORITIES AHEAD OF PRESIDENT OBAMA'S VISIT. The [EnergyWire](#) (8/20, Subscription Publication) reports that "Alaska Gov. Bill Walker (I) recently sent President Obama a wish list of state priorities that the governor plans to raise during Obama's state visit in late August." Obama will "be in Anchorage on Aug. 31 to speak at a State Department climate change conference." Walker "reasserted the state's desire to open oil drilling in the Arctic National Wildlife Refuge and to build a road through the Izembek National Wildlife Refuge to provide emergency access to the remote village of King Cove."

Additional coverage was provided by the [Alaska Dispatch News](#) (8/19, 219K).

SEN. BENNET TO INTRODUCE WILDERNESS BILL. The [Greenwire](#) (8/20, Subscription Publication) reports that "politically vulnerable Sen. Michael Bennet (D-Colo.) announced yesterday that he intends to introduce a bill to preserve 58,000 acres of wilderness and recreation lands about 80 miles west of Denver." According to the article, "the decision was announced after Bennet met with local elected officials and community members to discuss a House bill dubbed the 'Continental Divide Wilderness and Recreation Act.'" Introduced by Rep. Jared Polis, H.R. 2554 "seeks to create new wilderness areas in the Williams Fork Mountains, Tenmile Range and Hoosier Ridge, as well as expand the existing Holy Cross, Eagles Nest and Ptarmigan Peak Wilderness areas." The measure would "also create an 11,500-acre Recreation Management Area south of the ski town of Breckenridge."

UTAH LAWMAKERS CRITICIZE REP BISHOP'S COMPROMISE PLAN FOR PUBLIC LANDS. The [Salt Lake \(UT\) Tribune](#) (8/21, 492K) reports that during a legislative briefing Thursday, "Republican state lawmakers openly derided Rep. Rob Bishop's 'grand bargain' as more of a raw deal for the state." According to the article, "critics of the public-lands process Bishop launched three years ago said it detracts from the campaign to transfer public lands to state management — the ultimate prize in the state's disputes with the federal government." However, "Bishop's legislative director, Casey Snider, argued a successful process would not only bring certainty to public lands management, but would also forestall a national monument designation that is expected to come in the waning days of Barack Obama's tenure as president."

ADDITIONAL COVERAGE INTERIOR UNVEILS NATIONAL SEED STRATEGY. Additional coverage of the Interior Department's new national seed strategy was provided by [Fierce Homeland Security](#) (8/21, Sarkar).

WHITE HOUSE URGED TO BAN NEW FOSSIL FUEL LEASES. For "The Blog" of the [Huffington Post](#) (8/21, Suckling, 164K), Kieran Suckling, Executive Director, Center for Biological Diversity, writes that "a new report released Wednesday finds that unleased fossil fuels on public lands and offshore areas — publicly owned fossil fuels controlled by federal agencies — hold up to 450 billion tons of greenhouse gases." Suckling warns that "if we allow that coal, oil and natural gas to be developed, we'll cripple America's ability to meet its obligation to cut carbon and avoid the worst effects of the global climate crisis." According to Suckling, "that's why it's never been more clear that President Obama — and whoever comes after him in the White House — needs to pledge to ban new fossil fuel leases on U.S. public lands and offshore coastal areas."

Empowering Native American Communities:

ASSISTANT SECRETARY WASHBURN ANNOUNCES BIA-OJS PURPOSE CODE X PROGRAM. The [Native American Times](#) (8/21, 337) reports that Assistant Secretary of Indian Affairs Kevin K. Washburn has "announced a new Bureau of Indian Affairs' Office of Justice Services (BIA-OJS) program to assist federally recognized tribal social services agencies seeking to place children in safe homes." Washburn said, "The BIA-OJS Purpose Code X Program will provide tribal social service agencies with the information they need to protect the children they place into care in emergency situations when parents are unable to provide for their welfare. This program provides BIA law enforcement personnel with the ability to provide our social service agency partners with much-needed information to help to make sure children requiring emergency placements will be placed

VIRGINIA LAWMAKERS PUSHING FOR MORE FEDERAL RECOGNITION OF TRIBES. [WTVF-AM](#) Blacksburg, VA (8/21) reports that "Virginia lawmakers are redoubling their efforts to attain federal recognition for six Virginia Native American tribes." The legislators are "more optimistic now that the Bureau of Indian Affairs granted federal recognition to the Pamunkey Tribe." However, "getting the six other tribes recognized won't be as easy as one might think." According to Sen. Tim Kaine, "a part of the reason is that the other tribes don't have their own reservation lands, which makes their struggle that much harder."

PROGRESS SLOW AFTER NATIVE AMERICAN GRAVES PROTECTION AND REPATRIATION ACT PASSED. The [Motherboard](#) (8/21, 10K) reports that "over the last two centuries, scientists and collectors have exhumed Indian graves and battlefields across the country, gathering at least 200,000 Native American skeletons for science or self-enrichment—stockpiles that indigenous peoples have demanded back ever since." The Native American Graves Protection and Repatriation Act was "passed in 1990 to establish an official process through which Native Americans could retrieve their ancestors' bones, but 25 years after going into effect, progress remains haltingly slow." The article notes that "tribes acknowledge that scientific attitudes toward their sacred histories are improving, but only about 10 percent of the stockpiled human remains have actually been physically returned amid never-ending battles over the past."

JUDGE TOSSES LAWSUIT BY FLATHEAD JOINT BOARD OF CONTROL. [Law 360](#) (8/21, 21K) reports that "a federal judge on Wednesday tossed the Flathead Joint Board of Control's lawsuit disputing the U.S. Bureau of Indian Affairs' control of a tribal irrigation project in Montana, concluding that congressional mandate gave the government discretion to determine when and how to cede control to local landowners."

Tackling America's Water Challenges:

OWNER OF COLORADO MINE SAYS HE TRIED TO PREVENT EPA ACCESS. The [Washington Times](#) (8/21, Richardson, 344K) reports that Todd Hennis, owner of the Gold King Mine in Silverton, Colorado, says he tried to prevent the EPA "from gaining access to his property" four years ago, "but that he relented after the agency threatened to pound him with ruinous fines if he refused." The Times says the EPA's leakage investigation on the property "triggered the Aug. 5 blowout that sent 3 million gallons of toxic orange wastewater down the Animas River."

Navajo Nation Officials Say EPA Delivered Water In Dirty Oil Tanks. The [Washington Times](#) (8/21, Richardson, 344K) also reports that while "the EPA spill...was bad enough," Navajo Nation officials are now "fuming after a delivery of water for livestock and crops arrived in dirty oil tanks." In a video posted online Wednesday, Navajo Nation President Russell Begaye ran his finger inside the "brown and oily" spigot of a water tank delivered by the EPA, and said, "This is totally unacceptable. How can anybody give water from a tank like this that was clearly an oil tank and expect us to drink it, our animals to drink it? And to contaminate our soil with this?"

BOR, TRIBES AGREE ON FISH-KILL PREVENTATIVE FLOWS. The [Eureka \(CA\) Times Standard](#) (8/20, 55K) reports that on Thursday, the BOR "agreed to release fish-kill preventative flows from a Trinity River dam starting this weekend in order to protect fish on the lower Klamath River from deadly pathogens caused by warm, low-flowing water conditions, tribal fisheries officials said." The article notes that "the decision comes just after the Yurok Tribe Fisheries Department found two Chinook salmon on the Klamath River's Blue Creek tributary with more severe infections of the parasite ich — the same responsible for the devastating fish kill of 2002 — than had been found in a survey conducted in mid-July." Hoopa Valley Tribal Fisheries Director Mike Orcutt said Thursday's agreement was "a lot better than it had been previous to today's discussions."

GROUPS FILE INJUNCTION TO STOP FISH BYPASS ON LOWER YELLOWSTONE. [KFYR-TV](#) Bismarck, ND (8/21, 1K) reports that "a legal battle might put" the future of the Lower Yellowstone Irrigation Project "in jeopardy." The Lower Yellowstone Irrigation Project, the Army Corps of Engineers and the BLM are "trying to create a fish bypass to help protect the pallid sturgeon." But "Montana's National Resources Defense Council and Defenders of Wildlife have filed an injunction to stop the passage from being built."

RESEARCHERS GLOBAL WARMING HAS INTENSIFIED CALIFORNIA DROUGHT. The [New York Times](#) (8/21, Gillis, Subscription Publication, 11.82M) reports that research published in *Geophysical Research Letters* this week concludes that "global warming caused by human emissions has most likely intensified the drought in California by roughly 15 to 20 percent." While the findings indicate the drought "s primarily a consequence of natural climate variability, the scientists added that the likelihood of any drought becoming acute is rising because of climate change."

Securing America's Energy Future:

Renewable Energy:

FEDERAL AGENCIES PARTICIPATE IN JOINT SAFETY TRAINING. The [Windpower Engineering & Development](#) (8/20) reports that "professionals from across the wind industry were joined by government agency experts this week at a Suzlon training facility near Chicago for a battery of drills to promote safety in the fast-growing industry." According to the article, "thirty-two safety professionals from two federal agencies — the Department of Labor's Occupational Safety and Health Administration (OSHA) and the Department of Interior's Bureau of Safety and Environmental Enforcement (BSEE) — were trained to climb a turbine, perform self-rescue and rescue scenarios in Elgin, Illinois."

Onshore Energy Development:

BLM HOLDS LISTENING SESSION ON FEDERAL COAL PROGRAM. [KRWG-FM](#) Las Cruces, NM (8/21, 1K) reports that "nearly one hundred New Mexicans representing over a dozen organizations gathered at a session hosted by the Bureau of Land Management to testify in support of reforming the outdated federal coal lease program." The article notes that "clean air advocates at the session highlighted the damaging health impacts of local coal mining and burning, and called for New Mexico taxpayers to receive a fair share of the profits made by coal companies by mining on public lands."

In an op-ed for the [Boulder \(CO\) Daily Camera](#) (8/21, 161K), Luis Toro, the director of Denver-based Colorado Ethics Watch, claims that "some coal companies have been using the alchemy of corporate restructuring to cheat taxpayers out of fair royalties for coal mined on public lands owned by the federal government." He argues that "they're also gaining an unfair advantage over their competitors who play by the rules." According to Toro, "the scheme is so obvious that officials in the Department of the Interior want to put a stop to it." He notes that "Interior officials were in Golden earlier this week to listen to members of the public on this issue."

Additional coverage of the public listening sessions being held by the BLM on the federal coal program was provided by the [Farmington \(NM\) Daily Times](#) (8/21, 44K), the [Colorado Independent](#) (8/21, 1K), [KFYR-TV](#) Bismarck, ND (8/21, 1K), and [KUNC-FM](#) Greeley, CO (8/21, 5K).

BLM SEEKS COMMENTS ON DRAFT MASTER LEASING PLAN FOR MOAB AREA. The [Moab \(UT\) Sun News](#) (8/21) reports that the BLM's "long-awaited draft Master Leasing Plan proposal for the greater Moab area is now available for public review." The bureau will "officially publish the draft plan in the Federal Register on Friday, Aug. 21, kicking off a 90-day public comment period."

STUDY STOP FOSSIL FUEL LEASES ON FEDERAL LANDS TO KEEP GREENHOUSE GASES OUT OF ATMOSPHERE. [Reuters](#) (8/20, Arsenault) reports that according to a study released Wednesday by the consultancy EcoShift on behalf of the Center for Biological Diversity and Friends of the Earth environmental groups, if federal lands were no longer leased to fossil fuel companies by the U.S. government it would keep up to 450 billion tonnes of greenhouse gases out of the earth's atmosphere. The study claims that the fossil fuels under federal lands could constitute up to half of potential emissions from remaining fossil fuels in the U.S.

GROUP SAYS REFORM NEEDED IN FEDERAL FOSSIL FUEL EXTRACTION PROGRAMS. [Grist](#) (8/21, 6K) reports that the Center for American Progress is "out with new evidence" that "reform is desperately needed" for federal resource-extraction programs. The "liberal think tank" has "released a report and scorecard detailing the extent to which different federal resource-extraction programs are ripping off the American taxpayer."

CHEAP NATURAL GAS CONTRIBUTING TO DECLINE IN COAL INDUSTRY. [Bloomberg News](#) (8/20, Loh, 2.66M) reports on the decline of the coal industry, due in part to China's slowing imports but in larger part to "the boom in cheap natural gas, which has taken market share from coal at power plants and will probably keep doing so." The article also examines the negative impact sliding coal prices and job cuts have had on Central Appalachia.

SCIENTISTS IN MARYLAND TO MONITOR SEISMIC ACTIVITY IN PREPARATION FOR FRACKING. Drawing on coverage from the Baltimore Sun, the [AP](#) (8/20) reports "scientists say they will begin monitoring seismic activity in western Maryland in preparation" for fracking. Maryland Geological Survey Director Richard Ort told the Sun that "his agency plans to install a seismometer somewhere in Garrett or Allegany county by next June." The state's moratorium on fracking "ends in October 2017." The seismometer "would measure underground rumblings like those attributed elsewhere to the disposal of wastewater from fracking."

Offshore Energy Development:

GULF OF MEXICO LEASE SALE GENERATES LOWEST NUMBER OF BIDS ON RECORD. The [EnergyWire](#) (8/20, Subscription Publication) reports that "a federal government sale of offshore drilling rights in the Gulf of Mexico received very low interest in another sign the oil and gas industry is shying away from spending in a low oil price

waters off the coast of Texas." The article notes that "five companies participated" and "proceeds amounted to a bit over \$22.7 million."

Additional coverage was provided by the [Australian Financial Review](#) (8/20, 274K), the [Sentinel Republic](#) (8/21), [China Post](#) (8/21, 1K), [UPI](#) (8/20), [Offshore Magazine](#) (8/21, 129K), and [WBRZ-TV Baton Rouge \(LA\)](#) Baton Rouge, LA (8/21, 4K).

VERMONT SENATORS SEEK INFORMATION ON ARCTIC DRILLING. The [Rutland \(VT\) Herald](#) (8/20, 38K) reports that "Vermont's U.S. senators are calling for greater scrutiny of proposed drilling for oil and natural gas in the Arctic Ocean." The Obama Administration "gave approval Monday to Royal Dutch Shell to sink exploratory wells into a section of the Arctic Ocean controlled by the United States — an area previously closed to drilling." Sen. Patrick Leahy and Sen. Bernie Sanders "sent a letter Wednesday to the Securities and Exchange Commission calling for greater information on the project for investors in the company."

Additional coverage of the Arctic drilling decision was provided by [Salon](#) (8/21, 1.08M).

CSMonitor Analysis: Obama Will Not Have Final Word On Arctic Drilling. In an analysis, the [Christian Science Monitor](#) (8/20, Gass, 455K) notes that while the President has given Shell "permission to drill for oil in the Alaskan Arctic," Democratic presidential hopefuls Hillary Clinton, Martin O'Malley, and Sen. Bernie Sanders have all voiced their opposition to Arctic drilling, which "could be significant," because the "executive powers that Obama is now wielding to open the Arctic to drilling could be used by the next president to reverse course," meaning "Obama's decision this week is hardly the final word." While that "gives environmentalists hope that drilling in the American Arctic might never come to pass," with "Republican presidential candidates favoring the move, it also makes next year's presidential election hugely important to the future of the plan."

SETTLEMENT IN OFFSHORE FRACKING CASE UNDER NEGOTIATION. The [EnergyWire](#) (8/20, Subscription Publication) reports that "the Obama administration is in settlement talks with an environmental group that opposes offshore hydraulic fracturing in the Pacific Ocean." According to court filings submitted this week, the Interior Department is "negotiating a potential settlement with the California-based Environmental Defense Center over a lawsuit that asks the U.S. District Court for the Central District of California to block permitting of fracking off the coast of California." The environmental group "alleged in a December lawsuit that Interior's Bureau of Ocean Energy Management and Bureau of Safety and Environmental Enforcement have been rubber-stamping permits for fracking and acid well stimulation from offshore platforms in the Santa Barbara Channel, failing to complete full environmental review." The lawsuit "challenges 51 permits that were permitted through categorical exclusions under the National Environmental Policy Act, instead of more in-depth environmental impact statements."

PROFESSOR WARNS AGAINST OFFSHORE DRILLING IN ATLANTIC. For "The Blog" of the [Huffington Post](#) (8/21, Peterson, 164K), Charles 'Pete' Peterson, Professor of Marine Sciences, Biology, and Ecology at the University of North Carolina at Chapel Hill, writes that "a decision looms now for the South Atlantic coast, where the Department of the Interior is deciding whether to open the seafloor from Virginia to Georgia to oil and gas leasing — a shift in federal and state policies." He argues that "oil drilling off North Carolina and the other Southeast states risks much for the many and gains little for a few." Peterson warns that "this decision by our federal government could forever alter the coast we know and love."

SOME BP SETTLEMENT MONEY WENT TO LOCAL GOVERNMENTS FAR FROM COAST. The [AP](#) (8/20, Kunzelman) reports it has obtained records that show "clusters of landlocked municipalities" more than "100 miles from the Gulf Coast have secured millions of dollars in BP money through settlements designed to compensate local governments for lost tourism dollars and other economic damage from the company's 2010 oil spill." BP, this week, "finished making approximately \$687.4 million in settlement payments to 383 local government entities in the five Gulf states." Almost "\$8 million of that money went to 32 government entities that are more than 100 miles from the coast, in places like the Mississippi Delta and suburbs of central Alabama, the records show."

[Bureau of Land Management:](#)

PENTAGON GIVES \$2M GRANT FOR SAGE GROUSE PRESERVATION. The [Greenwire](#) (8/20, Subscription Publication) reports that "the Pentagon has provided a \$2 million boost to a Nevada effort to protect greater sage grouse habitat while preserving naval air training." The grant from the Readiness and Environmental Protection Integration (REPI) program will "pump up the Nevada Department of Wildlife program being done with the Nature Conservancy, Nevada Land Trust, Nevada Conservation Districts Program and U.S. Bureau of Land Management." The article notes that "the Pentagon's investment will be matched by participants in order to help pay for conservation easements in more than 11,000 acres of grouse habitat under air space controlled by Naval Air Station Fallon."

Additional coverage was provided by the [Las Vegas \(NV\) Review-Journal](#) (8/21, 378K) and the [Fiscal Times](#) (8/20, 78K).

Moffat County Looks For Changes To BLM Sage Grouse Plan. The [Craig \(CO\) Daily Press](#) (8/20, 10K) reports that the proposed BLM "greater sage grouse plan — which will affect about 1,167,000 acres of federal surface land in Moffat County and 31,700 acres in Routt County — is nearing completion, and Moffat County Commissioners are hoping the final recorded plan will reflect some of the changes they requested." Moffat County Commissioners "sent a 17-page protest letter, dated June 29, detailing their problems with the proposed BLM and U.S. Forest Service Northwest Colorado Greater Sage-Grouse Final Environmental Impact Statement, released May 28." According to the article, "Moffat County's protests are based largely on assertions that the BLM does not comply with federal law in several aspects of the plan, and that it is not based on the best available science."

BLM WORKING TO CLEAR SALT CEDAR. The [AP](#) (8/21, 6.76M) reports on the effort to contain and treat salt cedar, or Tamarisk, trees. The article notes that "government agencies like the Bureau of Land Management in Arizona is currently working with communities like Buckeye to assist and fund salt cedar clearing, said Dolores Garcia, fire mitigation specialist at the Bureau of Land Management."

BLM'S CEASE-AND-DESIST ORDER COULD KILL RHODES' LAND SWAP. The [Kingman \(AZ\) Daily Miner](#) (8/21, 26K) reports that the BLM "issued a 'cease and desist' order to developer Jim Rhodes that finds him in violation of federal laws and could drive a stake through his proposed land swap of 21,000 acres in the Red Lake area." The bureau "found evidence that Rhodes trespassed on federal land earlier this year when he built roads and destroyed monument markers that had been in place for about 100 years." In a May 15 letter to Rhodes, Colorado River District Manager Roxie Trost wrote, "As a result of this unauthorized activity, at a minimum, you are liable for fair market value rent of the public lands, rehabilitation and stabilization of the lands damaged by your act, and administrative costs incurred by the BLM as a consequence of your act."

BUGS INFEST BURNING MAN. The [Los Angeles Weekly](#) (8/21, 52K) reports that bugs are invading Burning Man. Burning Man spokesman Jim Graham "confirmed that the playa has been invaded by various desert bugs, but he said it's not clear why they're so numerous this year." A spokesman for the BLM said "he didn't know anything about the bugs." He said, "it is out in the middle of nowhere."

[Fish and Wildlife Service:](#)

FWS PLEDGES \$20 MILLION TO MONARCH BUTTERFLY RESCUE EFFORT. The [Minneapolis Star Tribune](#) (8/21, Kennedy, 1.19M) reports that "monarch butterfly rescue efforts will get a \$20 million boost from the U.S. Fish and Wildlife Service under a new funding initiative announced Thursday in Bloomington by the agency's top executive." Accompanied by Sen. Amy Klobuchar, FWS Dan Ashe said "his agency has dedicated \$4 million a year over the next five years to support monarchs, an iconic species that may be on its way to the endangered species list." Ashe "visited a monarch conservation celebration at the Minnesota Valley National Wildlife Refuge and said in a news release that the money will be shared with partners to conserve monarch breeding and migration habitat in priority areas throughout the country, including Minnesota."

Additional coverage was provided by [KSJR-FM Collegeville \(MN\)](#) Collegeville, MN (8/20, 60K).

SAGE GROUSE POPULATION REBOUNDS TO NEARLY 425K. [Natural Gas Intelligence](#) (8/21, Subscription Publication) reports that "a conservation group that represents several Western states and provinces said the number of greater sage grouse observed in the field has increased over the past two springs and that the total population of the birds is close to 425,000. According to the Western Association of Fish and Wildlife Agencies, "the number of male birds counted on leks — a mating area in the field where males compete for visiting females — had increased from 43,397 in 2013 to 80,284 in 2015." The organization estimated that the minimum breeding population totaled 424,645, a figure that does not include grouse on unknown leks."

CALIFORNIA'S FIRST WOLF PACK IN DECADES CAUGHT ON CAMERA. The [AP](#) (8/21, 2.28M) reports that "California has its first wolf pack since the state's gray wolf population went extinct in 1924." State and federal authorities announced Thursday that "a remote camera captured photos earlier this month of two adults and five pups in southeastern Siskiyou County." They were named the Shasta pack for nearby Mount Shasta.

Additional coverage was provided by [Reuters](#) (8/20, Bernstein), [TME](#) (8/21, 19.55M), the [Huffington Post](#) (8/21, 164K), the [Los Angeles \(CA\) Times](#) (8/21, Cart, 4.07M), the [Ventura County \(CA\) Star](#) (8/21, 144K), [KERO-TV Bakersfield \(CA\)](#) Bakersfield, CA (8/21, 2K), and [KXJZ-FM Sacramento \(CA\)](#) Sacramento, CA (8/20, 6K).

GROUP RELEASES "STATE OF THE TROUT" REPORT. The [La Crosse \(WI\) Tribune](#) (8/20, 87K) reports that "America's native trout have declined dramatically over the last

century thanks to a number of threats ranging from hatchery fish stocking to logging and mining to poorly designed roads and livestock grazing practices," and "now a new suite of threats, from energy development to a changing climate, poses even greater challenges," according to a new Trout Unlimited report. The report titled "State of the Trout" said that "these threats are greater than ever, and they make for an uncertain future for coldwater fish if steps are not taken to protect and restore habitat, reconnect tributaries to mainstem rivers and keep native trout populations viable for the benefit of anglers and the country's riparian ecosystems."

POACHING DECIMATES ELEPHANT POPULATION IN TANZANIA. The [Greenwire](#) (8/20, Subscription Publication) reports that "safari guides at Tanzania's wildlife reserves say poachers are decimating the elephant population there with no government interference." The article notes that "the Selous ecosystem in southern Tanzania was once known as the 'elephant capital of the world.'" However, "last year, the journal *Science* named it Africa's poaching hot spot."

CONGRESS URGED TO STOP CATERING TO SPECIAL INTEREST TROPHY HUNTERS. For the "Congress" blog of [The Hill](#) (8/21, Markarian, 471K), Michael Markarian, the chief program and policy officer of The Humane Society of the United States, writes that "weeks after news first broke of the illegal killing of Cecil the lion by a Minnesota dentist, the American public is still outraged." He notes that "some members of Congress rightly leapt into action and urged the U.S. Fish and Wildlife Service to protect lions under the Endangered Species Act," but "other lawmakers are busy trying to push through dangerous provisions that would give a sweetheart deal to an elite group of trophy hunters just like Walter Palmer." Markarian argues that "Congress needs to stop catering to the special interest trophy hunters who have bullied our country into giving them whatever they want in the past." He urges Congress to "instead listen to the tremendous outpouring of concern Americans have shown over trophy hunting, and the desire to do what's right for wildlife protection and conservation in the wake of Cecil's death."

National Park Service:

VIRGINIA TRANSFERRING PORTIONS OF FORT MONROE TO NPS. The [Hampton Roads \(VA\) Daily Press](#) (8/20, Subscription Publication, 201K) reports that Virginia "plans to transfer more than 100 acres of Fort Monroe to the National Park Service, a decision that comes nearly four years after President Barack Obama designated portions of the property as a national monument." Gov. Terry McAuliffe is "expected to finalize the transfer in a ceremony Tuesday morning at the stone fort's main gate." According to the article, "the agreement will transfer 112 acres of the North Beach area as well as the Parade Grounds, Old Quarters 1, Lee's Quarters and Engineer's Quarters."

Also providing coverage is [WVEC-TV Hampton Roads \(VA\)](#) Hampton Roads, VA (8/20, 44K).

DRIVE LAUNCHED TO ADD CASCADE COTTAGES TO ROCKY MOUNTAIN NATIONAL PARK. The [AP](#) (8/21, 2.28M) reports that "nonprofit groups want to raise \$3.6 million to buy a privately owned parcel of land inside Rocky Mountain National Park and turn it over to the park." The Rocky Mountain Conservancy and the Trust for Public Land said Wednesday that "the owners of the 40-acre site of Cascade Cottages offered to sell it to the park before offering it for public sale." The article notes that "it's the largest remaining privately held property within the park."

CORONADO NATIONAL MEMORIAL HOSTING BIG BUG BLITZ. The [Sierra Vista \(AZ\) Herald](#) (8/21, 3K) reports that the NPS is "turning 99 years old on Aug. 25 and Coronado National Memorial is hosting a Big Bug Blitz to identify 99 different types of insects." The article notes that "in preparation for next year's big centennial celebration, the National Park Service is inviting everyone to Find Your Park."

Additional coverage of the anniversary was provided by the [Clark County \(WA\) Columbian](#) (8/20, 86K), the [St. Louis \(MO\) Post-Dispatch](#) (8/21, 968K), and [KCSG-TV St. George \(UT\)](#) St. George, UT (8/21, 43).

NATIVE AMERICANS DISPLEASED WITH NPS' PROPOSED RULE ON GATHERING PLANTS. The [Indian Country Today Media Network](#) (8/20, 32K) reports that the NPS' proposed rule that would allow Native Americans "to gather traditional and medicinal plants in national parks" are not being well received by Indian country. The article notes that "most who submitted comments had something to say about the authority vested in the park superintendents, the designated gatherers and limiting them to tribal members, and the disclosure of traditional information with no assurance that this information won't be made public (sharing these details with anyone outside of the tribe is not customary—period)." Jeffrey Olson, a NPS public affairs officer, said that "the comments on the proposed rule will be examined, analyzed, and addressed."

PLAGUE INFECTS ANOTHER YOSEMITE VISITOR. The [Greenwire](#) (8/20, Subscription Publication) reports that "another visitor to Yosemite National Park in California has been diagnosed with the plague, according to health officials." The article notes that "the victim is the second park visitor to be diagnosed with the illness and the latest of several cases in the western United States this year." According to the California Department of Public Health, "the visitor was on vacation from Georgia and also spent time in the Sierra National Forest."

Additional coverage was provided by the [Independent \(UK\)](#) (8/21, Walker, 999K).

NPS TO CLOSE EXIT FROM GEORGE WASHINGTON MEMORIAL PARKWAY TO KEY BRIDGE ON MONDAY. The [Arlington \(VA\) Patch](#) (8/21, 3K) reports that the NPS will "close the exit ramp from southbound George Washington Memorial Parkway to Key Bridge prior to morning rush hour on Monday, August 24, according to the Parkway Web site." The article notes that "the ramp will remain closed through Friday, August 28."

Top National News:

IRAN NUCLEAR DEAL GAINS MORE CONGRESSIONAL SUPPORT. The President moved closer Thursday to gaining the votes he needs to sustain a veto of legislation to block the Iran nuclear agreement with Sen. Claire McCaskill's announcement that she will support the deal. While the agreement received no coverage on the three network news broadcasts, print and online coverage is extensive. Coverage focuses on McCaskill's comments and the Administration's ongoing efforts to secure lawmakers' support for the deal — which is generally cast as likely to survive a vote in Congress — as well as IAEA Director General Yukiya Amano's reaction to an [AP report](#) which said Iran will be permitted to conduct its own inspections of the Parchin military site.

[Reuters](#) (8/21, Cowan) reports that McCaskill said she will back the deal despite the fact that it "isn't perfect and no one trusts Iran." McCaskill's announcement comes in the wake of Sen. Joe Donnelly's declaration of support on Wednesday, prompting the [AP](#) (8/21, Werner) to note that the deal is gaining "crucial support from swing-state Senate Democrats." With the addition of McCaskill and Donnelly, the total number of Senate Democrats backing the deal is now 26, including "10 of the 12 members on the Democratic side of the Senate Armed Services Committee."

On [Fox News' Special Report](#) (8/20, Baier, 1.53M), Kevin Corke called McCaskill's announcement a "major boost" for the Administration, and [Bloomberg Politics](#) (8/21, Miller, 247K) notes that her support "means Obama needs just eight more senators to sustain his promised veto if, as expected, the Republican-controlled Congress passes a resolution disapproving of the deal next month." [Politico](#) (8/20, Everett, Herb, 942K) says McCaskill is "the latest in a string of red-state and centrist Democrats to endorse" the deal "providing a surge of momentum" for the President ahead of the vote. Politico also noted the "swelling number of Democrats supporting the pact who are up for reelection in 2018 in red and purple states," adding that most "key undecided Democratic senators hail from Northeastern states with significant Jewish populations."

[Indiana Public Media](#) (8/20, Frazee, 3K) reports that during a speech in Odon, Indiana on Thursday, Donnelly defended his support of the deal, noting that his decision came "after many talks with the administration and military officials — but most importantly his constituents." The [Fort Wayne \(IN\) Journal-Gazette](#) (8/21, Francisco, 172K) notes that Donnelly "had been considered a possible swing vote," but "squelched that speculation with his four-paragraph statement," which said, in part, "With or without this deal, the day may come when we are left with no alternative but to take military action to prevent Iran from crossing the nuclear threshold."

In his [Washington Post](#) (8/21, Pincus, 6.76M) column, Walter Pincus criticizes an [op-ed](#) by Sen. Bob Corker which appeared in the Post early this week, noting that while he was clear that Congress should reject the deal, his "reasons for doing away with the agreement and what he would do instead" were not.

Pelosi: House Democrats Have Votes To Uphold Veto. The [AP](#) (8/21) reports House Minority Leader Pelosi said Wednesday that House Democrats "have the votes, if necessary, to uphold President Barack Obama's veto of a resolution against" the deal. Pelosi noted that "if such a vote were held today there would be enough support among House Democrats for Obama to prevail." The AP notes that upholding a veto "would take 146 House Democrats, and fewer than 60 have publicly declared their support so far." Pelosi "declined to disclose her private vote count but expressed confidence in the outcome."

Obama Defends Agreement In Menendez's Hometown Newspaper. [The Hill](#) (8/20, Fabian, 471K) reports in its "Blog Briefing Room" blog that the President is "pushing back against Sen. Bob Menendez (D-N.J.), who defied the White House by opposing the nuclear deal," with an [op-ed](#) in Menendez's hometown newspaper, the *Star-Ledger*. In the [op-ed](#), the President "urged Congress to back the agreement and dismissed critics who are calling for the US to go back to the negotiating table to extract more concessions from Tehran," writing, "The idea that we can get a better deal by talking tough or squeezing Iran into submission with more sanctions is simply not realistic. ... The international unity we spent years building — the unity that brought Iran to the negotiating table — would be destroyed if this deal is rejected."

Obama Letter To Lawmakers Says US Will Keep Pressure On Iran. The [New York Times](#) (8/21, Weisman, Subscription Publication, 11.82M) calls an Aug. 19 letter to Congress the President's "most comprehensive effort to assure wavering Democrats." While the letter is addressed to Rep. Jerrold Nadler (D-NY) it is "also aimed at other

Democrats with concerns about the deal." For the President, the letter "reflects steps the administration could take outside the agreement." In it, he said that the US "would unilaterally maintain economic pressure and deploy military options if needed to deter Iranian aggression, both during and beyond the proposed nuclear accord." The President wrote, "Should Iran seek to dash toward a nuclear weapon, all of the options available to the United States – including the military option – will remain available through the life of the deal and beyond."

Obama To Defend Deal In Webcast To North American Jewish Community. The [Jewish Telegraphic Agency](#) (8/20, 7K) reports that in a webcast scheduled for Aug. 28, the President "will speak directly to the North American Jewish community about the Iran nuclear deal." The webcast "is being co-sponsored by The Jewish Federations of North America and the Conference of Presidents of Major American Jewish Organizations," which "sponsored a similar webcast earlier this month on the deal with Israeli Prime Minister Benjamin Netanyahu."

Meanwhile, the [AP](#) (8/21, Perry, Federman) reports that while most Israelis "seem to agree that a better bargain could have been squeezed out of the Islamic Republic," many "are concluding that with the agreement all but wrapped up, it is time to give up the fight and adjust to the new reality, most critically by repairing a tattered relationship with the White House." The [Christian Science Monitor](#) (8/20, Mitnick, 455K) notes that many Israelis are "wary about the fight unfolding in Congress" over the agreement. The Monitor notes that many "say they consider the full-throated lobbying efforts by their government to be undermining ties with the country's most important ally." In a [Washington Post](#) (8/21, Kuttab, 6.76M) op-ed, Palestinian journalist Daoud Kuttab argues that in "a region as volatile as the Middle East, any agreement that ensures that nuclear proliferation is put in check must be welcomed."

Poll: Public Opposes Deal 56%-41%. A new poll indicates Americans are not on board with that argument, however. [The Hill](#) (8/20, Byrnes, 471K) reports in its "Blog Briefing Room" blog that a new CNN/ORC International poll found that 56% of Americans "want lawmakers to reject the deal," while 41% "say Congress should accept the deal."

WPost Analysis: Ads About Deal Running In At Least 23 States. A [Washington Post](#) (8/21, Ho, 6.76M) analysis has found that television ads about the deal "are being aired in at least 23 states" during Congress' August recess. According to the Post, "opponents of the deal are more heavily targeting House members while supporters are aiming their fire at both chambers," and most of the ads "opposing the deal are running in Florida, Texas, California and Pennsylvania, while most ads supporting the deal are running in Colorado, Michigan, Maryland and Pennsylvania."

IAEA Head Pushes Back Against AP Report On Parchin Inspections. The [Washington Times](#) (8/21, Sands, 344K) says Amano "pushed back strongly" against the AP report, saying in an "unusually pointed" statement Thursday, "I am disturbed by statements suggesting that the IAEA has given responsibility for nuclear inspections to Iran. ... Such statements misrepresent the way in which we will undertake this important verification work." On [CNN's Situation Room](#) (8/20, 554K), Jim Sciutto said questions of whether or not the IAEA will be on site when Iranian inspectors take samples "seems like a small difference, but potentially it could have some meaning." The [Wall Street Journal](#) (8/21, Norman, Subscription Publication, 5.95M) also reports on Amano's comments, noting that he took issue with suggestions he relinquished control over the inspections to Iran. The [Washington Post](#) (8/21, DeYoung, 6.76M) calls Amano's statement an "unusual rebuttal" and notes that he argued that critics of the deal "misrepresent" IAEA plans for verifying Iran's compliance. Corke noted on [Fox News' Special Report](#) (8/20, Baier, 1.53M) that verification with the Iranians "has been a problem in the past...as far back as 2004."

[Reuters](#) (8/21, Nasralla) reports that while the IAEA cited its legal obligation to keep its arrangements with Iran confidential, it did say that it is satisfied with the access it will be granted to the site. IAEA spokesman Serge Gas said, "The separate arrangements of the roadmap are consistent with the IAEA verification practice and they meet the IAEA requirements."

Rep. Adam Smith (D-WA) said on [CNN's Situation Room](#) (8/20, 554K) that he doesn't think the deal between the IAEA and Iran "is anywhere near as alarming as it's being presented," adding that "if you're looking at how do we stop Iran from getting a nuclear weapon, no one has really presented to this point a better approach than what is in this agreement." Smith noted that while he has "questions still to be answered," the IAEA agreement "isn't one of them." Rep. Darrell Issa (R-CA) said on [CNN's Situation Room](#) (8/20, 554K) that the agreement will "only limit the ability for those anywhere anytime inspections."

Meanwhile, the [Huffington Post](#) (8/20, 164K) reports that there are questions about the "underlying assertions" in the AP's report and "the accuracy of its claims." According to nonproliferation expert Jeffrey Lewis, "the AP deleted several paragraphs that contained the most damning allegations about the way in which inspections would occur." In addition, the revised version "scrubbed a paragraph that suggested IAEA inspectors would oversee Iranian scientists as they collected samples and photographs at Parchin." The Post noted that State Department spokesman John Kirby on Thursday "hedged towards an outright denial of the AP report, saying the IAEA would 'in no way' give the Iranians the authority to conduct their own inspections of Parchin."

The [AP](#) (8/21, Jahn) examines what the agreement between Iran and the IAEA "means for the larger deal," citing an "official" who said that "US intelligence officials do not consider the Parchin inspections a critical part of the broader deal" because the US "believes most weapons work occurred there in 2003...and the site has been thoroughly cleaned up since then." The AP also notes that the separate agreement "does not affect the broader deal signed in July," and "it doesn't appear yet that the revelation will change any votes in Congress for or against a resolution of disapproval."

Slaughter: Only Alternative To Agreement Is War With Iran. In a [USA Today](#) (8/21, 5.23M) op-ed, Anne Marie Slaughter, former director of policy planning at the State Department, argues that despite the claims of opponents of the deal, the only alternative is war with Iran. Slaughter urges Americans who "think that this deal, with all its flaws, is better than bombing," to "hold your nose and tell your representative to approve it."

Rabbi Faults Obama For Singling Out Israel. In a [Jerusalem Post \(ISR\)](#) (8/21, 34K) op-ed, author Rabbi Shmuley Boteach criticizes the President for "singling out" Israel with the claim that every nation in the world that has commented publicly, with the exception of the Israeli government, has expressed support. Boteach notes that the President "conveniently omitted the fact that most Sunni nations are very wary with regard to this deal," and argues that "his words easily lend themselves to damaging misinterpretation and perverse anti-Jewish archetypes."

British Embassy To Reopen In Tehran. The [Washington Post](#) (8/21, Murphy, 6.76M) cites a Reuters report which said Britain "plans to reopen its embassy in Tehran." According to Reuters, "a British diplomatic source, said the embassy would reopen 'this weekend.'" The [New York Times](#) (8/21, Erlanger, Subscription Publication, 11.82M) reports that British officials said the embassy will reopen "probably on Sunday." British Foreign Secretary Philip Hammond "is expected to travel to Iran this weekend with a small delegation of businesspeople, including representatives from Royal Dutch Shell, a British official said, speaking anonymously in accordance with diplomatic practice." The Times calls the development "a significant indication of warming Western relations with Iran" in the wake of the nuclear agreement.

JUDGE CLINTON EMAIL SYSTEM BROKE "GOVERNMENT POLICY." [Politico](#) (8/20, Gerstein, 942K) reports that US District Judge Emmet Sullivan on Thursday "indicated" that he thinks former Secretary of State Hillary Clinton "violated government policy by storing official emails on a private server" during her tenure at the State Department. Sullivan said yesterday during a hearing related to a Freedom of Information Act lawsuit brought by Judicial Watch that Clinton's email arrangement "had complicated the State Department's ability to respond to requests for the agency's records on various topics." In an apparent reference to Clinton, Sullivan said, "We wouldn't be here today if this employee had followed government policy."

The [New York Times](#) (8/21, Schmidt, Subscription Publication, 11.82M) reports that in making the comment, Sullivan challenged Clinton's "longstanding claim that she had complied with the rules." The Times notes that Clinton campaign spokesman Brian Fallon on Thursday said, "Hillary Clinton's use of a personal email account was consistent with the practice of other secretaries of state, and permissible under the department's policy at the time."

The [Washington Times](#) (8/21, Dinan, 344K) reports that Sullivan's remark "cast...doubt on" Clinton's contention "that she did nothing wrong" in employing the email system "and only belatedly returned 30,000 emails to the" State Department. The Times notes that Sullivan said that Clinton's email system prompted the State Department to speak with "the FBI to see what documents can be recovered from the computer server and flash drives used to store her emails." Sullivan jabbed at the contention by the Obama Administration "that the FBI needed to be left alone to conduct its investigation," giving "them 30 days to figure out whether emails can be recovered."

The [Wall Street Journal](#) (8/21, Barrett, Subscription Publication, 5.95M) reports that Sullivan ordered government attorneys to press the FBI to determine if it can pull up any government records that Clinton deleted from her private computer server. The Journal says that if the FBI follows through with the judge's order, the scope of the agency's review would expand from an inquiry into the security of Clinton's email system to include whether the former secretary of state and her attorneys turned over all pertinent government documents.

Source: Feds Probing How Classified Data Wound Up On Clinton's Server. Meanwhile, [Bloomberg Politics](#) (8/21, Strohm, Walcott, 247K) reports that Federal "law enforcement officials are investigating how classified material found its way into messages that members...Clinton's State Department staff sent to her private e-mail address, according to a U.S. official with knowledge of the inquiry." That "official" told Bloomberg Politics that "there is some indication that Clinton aides drew upon a variety of messages in classified information systems to produce summaries and updates of events in Libya and elsewhere," later sending the information "to the secretary's personal e-mail server. This transfer of classified information onto a server not approved to handle sensitive material is a focus of the investigation and could form the basis for a criminal probe to determine just how much classified material was sent – and who prepared and sent it."

he wants the criminal investigation because "it looks like her assistant may have produced emails back and forth with her that utilized classified information. That's clearly a crime. It not only is a wrongful disclosure potentially, but it made us very vulnerable by the very nature." Blitzer said his understanding is that there "seems to be a dispute going on between the State Department and other agencies" over whether the emails were "classified at the time." Issa responded that from his experience, it has been "amazing how the State Department" has classified even the "most mundane information," adding that the CIA, NSA, and other agencies "appear to be appalled that very sensitive information was sent out on her non-government server in an unclassified format."

Meanwhile, [CNN's Situation Room](#) (8/20, 554K) reviewed how the email controversy began, noting that the situation has reached the point where Clinton's "team" has handed over her private server to the Justice Department, with FBI officials now looking to scrutinize "some 300 emails that passed through it."

Court Filing: Clinton Used Personal iPad "Not Certified As Secure" By State. Catherine Herridge reported on [Fox News' Special Report](#) (8/20, Baier, 1.53M) that documents from a recent court filing show that Clinton used a personal iPad "that was not certified as secure by State Department I.T. specialists," who have a policy to deny approval of a personal device if "that information system would result in a high potential impact on organizations or individuals."

Clinton Spokesman Makes "Novel Argument" In Her Defense. On its website, the [New York Times](#) (8/20, Haberman, Subscription Publication, 11.82M) reports that while defending Clinton during a Wednesday conference call about her email system, her spokesman, Brian Fallon, "made a novel argument," pointing to a Fox News report that said a pair of "Clinton's aides while she was secretary of state had sent her classified information over her private email server." Contending that the report illustrated that "the definition of what is classified is subjective, and the emails weren't marked as classified at the time they were sent," Fallon said that "for the I.G. to now declare the material as classified, since it was provided by State to the House Benghazi committee earlier this year in unredacted form, presumably that means that members of the House Benghazi committee may have unwittingly handled classified material on unclassified systems within the House of Representatives."

[Politico](#) (8/20, Bender, 942K) reports that while the Clinton camp on Wednesday contended "that Clinton, in the worst-case scenario, was simply a 'passive recipient of unwitting information that subsequently became deemed as classified,'" some "fellow diplomats and other specialists said on Thursday that if any emails were blatantly of a sensitive nature, she could have been expected to flag it." For example, former Ambassador Thomas Pickering, "who served under the former secretary of state and oversaw a department review of the deadly attack in 2012 on the U.S. consulate in Benghazi," is quoted as saying that Clinton "might have had some responsibility to blow the whistle," adding, "The recipient may have an induced kind of responsibility, if they see something that appears to be a serious breach of security."

McClatchy: After 2013 Hack, State Did Nothing To Tighten Clinton Emails' Security. [McClatchy](#) (8/21, Kumar, Taylor, Gordon, 28K) reports, "Despite a hack two years ago that publicly exposed...Clinton's emails, the State Department took no action to shore up the security of the former secretary of state's private computer server. A State Department official said the agency wasn't able to 'do anything in response to the March 2013 hack of longtime Clinton confidant Sidney Blumenthal because it occurred on a non-governmental computer system.'" McClatchy adds that the revelation "renews questions of when State Department officials first learned that Clinton was doing department business on a private server and what steps they took to safeguard her sensitive diplomatic communications, some of which have been deemed classified."

Clinton Calls For Expansion Of AmeriCorps Civil Service Program. The [AP](#) (8/21, Barrow) reports that Hillary Clinton is proposing "to expand the AmeriCorps service program launched under her husband's administration," calling "for spending about \$20 billion over 10 years on the expansion, increasing the number of civil service volunteers from 75,000 to 250,000 and more than doubling the educational grant that enrollees can receive." The proposal "is part of Clinton's \$350 billion 'new college compact'" aimed at addressing the rising "costs of attending college." [Reuters](#) (8/21, Becker) also reports on Clinton's plan.

GOP CONTENDERS PLOT STRATEGIES ON "HOW TO DEAL WITH" TRUMP. The [Washington Post](#) (8/21, Costa, Rucker, 6.76M) reports as they seek to figure out "how to deal with Donald Trump," his GOP presidential rivals this week "debut[ed] strategies for engaging the white-hot front-runner." The Post says that Trump's rivals "are falling into three categories: Those who are emulating and befriend[ing] him in an effort to win over his supporters," such as Sen. Ted Cruz and Gov. Scott Walker; "those who are assailing his background or calling him out for his views and rhetoric," such as Jeb Bush and Sen. Rand Paul; "and those who prefer to stay silent, as if hunkering down in the basement to ride out the tornado," such as Govs. Chris Christie and John Kasich and Sen. Marco Rubio.

The [New York Times](#) (8/21, Parker, Subscription Publication, 11.82M) reports, "After weeks of" answering Trump's attacks "with elliptical, indirect and sparing responses, Jeb Bush aggressively" went after the GOP presidential frontrunner on Thursday in New Hampshire, casting the billionaire "as a Democratic-leaning poseur," one "with a record that should disqualify him as a genuine conservative." Speaking with reporters, Bush said, "There's a big difference between Donald Trump and me. I'm a proven conservative with a record. He isn't."

On the [CBS Evening News](#) (8/20, story 6, 1:55, Rose, 5.08M), Major Garrett reported, "Desperate to regain lot of momentum during the summer of Trump, Jeb Bush used separate New Hampshire campaign events to" go after the billionaire. Bush was shown saying, "You don't win when you're the large, you know, dog in the room where it's all about you. You win when you connect with people about their aspirations, not about how, you know, great you are, how rich you are, how this you are, how that you are. That's -- that's not leadership."

Under the headline "Trump And Allies Plot Path To Victory," [USA Today](#) (8/21, Jackson, Jacobs, 5.23M) reports that as Trump and his backers assess the race for the GOP presidential nomination, "the path to victory is fairly clear. First, consolidate the leads he enjoys in Republican polls; then turn out enough supporters to win early state contests; then ride a wave of new and energized anti-establishment voters to the" GOP "nomination and beyond."

Trump: "Low Minimum Wage Is Not A Bad Thing For" US. [Reuters](#) (8/21, Heavey) reports that during a Thursday appearance on MSNBC, Trump said that he wouldn't support raising the minimum wage, arguing that do so would damage the US' ability to compete economically with other nations. Trump said, "Having a low minimum wage is not a bad thing for this country," adding, "We can't have a situation where our labor is so much more expensive than other countries' that we can no longer win."

Trump Organization Seeking to "Make Peace" With Hispanic Media. [Politico](#) (8/20, Gold, 942K) reports that "Trump's organization is quietly reaching out to a Hispanic media group with a very un-Trump-like request: Let's meet and make peace." Speaking with Politico, National Hispanic Media Coalition CEO Alex Nogales said "he received a call last week from Lawrence Glick, executive vice president of strategic development at the Trump Organization, proposing the meeting." Nogales is quoted as saying that the crux of Glick's message the message "was let's get together to talk so we can solve our differences." Politico noted that Trump previously "has publicly railed against the Hispanic media."

Fact Check: Some Claims In Trump Immigration Plan "Stray From The Facts." A [Fact Check](#) (8/21, Robertson, Kiely, 6K) piece says that "Trump's immigration plan includes several statements that stray from the facts." For example, Fact Check noted that Trump has "said 'birthright citizenship' is the 'biggest magnet for illegal immigration.'" Actually, research indicates the biggest draw is economic opportunity." In another example, Fact Check noted that Trump has "claimed taxpayers have paid 'hundreds of billions' in health care, education, welfare and more for illegal immigration from Mexico. But the Congressional Budget Office found the net financial impact of illegal immigration on state and local budgets was 'most likely modest.'"

NYTimes Analysis: Trump Remarks On Immigration Draw Little Fire In Brazil. The [New York Times](#) (8/21, Romero, Subscription Publication, 11.82M) reports that in the Latin America countries of Guatemala, Mexico, and Peru, there has been an outcry over Trump's "caustic remarks about Latino immigrants in the" US. However, in Brazil, "Trump's new 171-room" hotel being built in Rio de Janeiro "has generated...little uproar." The Times says that those in academia "attribute some of the indifference...about Mr. Trump's immigration remarks to an entrenched tradition in Portuguese-speaking Brazil of seeing the country as separate from its Spanish-speaking neighbors in Latin America."

Bergdahl Attorney Says Trump Remarks Threaten Fair Trial. The [AP](#) (8/21, Riechmann) reports that the attorney "representing Army Sgt. Bowe Bergdahl, who left his infantry post and was held by the Taliban for five years," on Thursday asserted that remarks "Trump is making about his client are threatening the soldier's right to a fair trial." While campaigning in New Hampshire this week, Trump, among other things, "called Bergdahl a 'dirty, rotten traitor,'" "claimed six U.S. troops died while searching for Bergdahl," and said "that the five Taliban leaders who were released" from the US prison at Guantanamo Bay in exchange for Bergdahl "were now 'back on the battlefield.'" In a statement, Bergdahl's lawyer, Eugene Fidell, said, "Mr. Trump's comments, along with many others that have been made over the last year, directly threaten my client's right to a fair trial."

Editorial Wrap-Up:

NEW YORK TIMES. "Children Die Because People Are Wrongly Afraid Of Vaccines." An editorial in the [New York Times](#) (8/21, Subscription Publication, 11.82M) laments "the delay or refusal by misinformed people to accept vaccination for themselves and their children," arguing that it adds to "the grim toll of 1.5 million children who die annually for lack of immunization, according to the World Health Organization." The Times adds that healthcare workers and governments "have no choice but to pursue" campaigns of "enforcement and education" because "the lives of millions of children remain at risk."

"Putin Vs. Parmesan." The [New York Times](#) (8/21, Board, Subscription Publication, 11.82M) says in an editorial that "Vladimir Putin's zany crackdown on European flowers and food imports" seems to be aimed at sending the message "that Russia is standing up to the perfidious West, whether by bravely destroying its food or blocking its bugs." But while Putin "still appears to be enormously popular with the masses," there is "an educated layer of the population that doesn't buy into the Western conspiracies or Ukrainian adventures and sees Mr. Putin's war on food for the propaganda gimmick it is."

“**‘Little Pink Pill’ For Woman Comes With Risks.**” The [New York Times](#) (8/21, Board, Subscription Publication, 11.82M) says in an editorial that “we will probably never know” whether in approving “a marginally effective drug to enhance the sexual drive of women with low libido,” the FDA “made a purely scientific judgment or whether it was unduly influenced by a campaign, partly financed by the manufacturer and organized with the help of one of its consultants, to depict the agency as gender-biased.” The Times says fibanserin, marketed as Addyi, has “serious side effects.”

“**Consumers Are Cutting The Cord To Gain Choices And Pay Less.**”

DOI in the News:

SECRETARY JEWELL PROMOTES LWCF IN WISCONSIN. The [Milwaukee Journal Sentinel](#) (8/17, Smith, 564K) reports that Interior Secretary Jewell "toured western Wisconsin" with Rep. Ron Kind "on Friday to see firsthand some of the habitat and facilities supported by" the LWCF. Jewell said, "Wildlife and outdoor recreation are highly valued by Americans. When it comes to investing in these values, the Land and Water Conservation Fund is exemplary." She also "announced \$42 million of projects to be funded by LWCF this year, including \$800,000 in Wisconsin."

The [La Crosse \(WI\) Tribune](#) (8/17, 87K) reports that "Jewell said the outdoor recreation industry, which generates an estimated \$12 billion and employs more than 100,000 workers in Wisconsin, needs to do a better job of telling Congress about the importance of access to public lands." She said, "This is good for jobs. It's good for the economy. It's sustainable."

Additional coverage was provided by [Crain's Cleveland \(OH\) Business](#) (8/13, 63K), the [Columbus \(OH\) Dispatch](#) (8/16, 515K), [Wisconsin Politics](#) (8/17, 370), the [Houston \(TX\) Chronicle](#) (8/17, 2.28M), [WXOW-TV LaCrosse \(WI\)](#) LaCrosse, WI (8/14, 2K), [WFAU-TV Eau Claire \(WI\)](#) Eau Claire, WI (8/17, 64K), [WKBT-TV La Crosse \(WI\)](#) La Crosse, WI (8/17, 26K), [WKYC-TV Cleveland \(OH\)](#) Cleveland (8/15, 135K), [KCSG-TV St. George \(UT\)](#) St. George, UT (8/17, 43), [KVRR-TV Fargo \(ND\)](#) Fargo, ND (8/17, 198), [KXMC-TV Minot \(ND\)](#) Minot, ND (8/17, 1K), and [WIZM-AM](#) La Crosse, WI (8/16).

Also providing coverage of the LWCF was provided by the [Biloxi \(MS\) Sun Herald](#) (8/14, 129K), the [Asheville \(NC\) Citizen-Times](#) (8/14, 118K), and the [Bellingham \(WA\) Herald](#) (8/17, 101K).

Calls To Renew LWCF Ramp Up. The [National Parks Traveler](#) (8/16, 989) reports that "with time running out on the federal Land and Water Conservation Fund that sends billions of dollars out into the states to support recreation, efforts are ramping up to garner public pressure to ensure Congress renews the program." The article notes that "a 'new and urgent Care2 petition,' signed by more than 25,000 people (through Thursday afternoon), calls on the Interior Department to take immediate action to protect the National Park System and save the critically important Land and Water Conservation Fund that helps fund them." According to the article, "the petition signers fear that if Congress fails to reauthorize the fund, major oil corporations will be able to secure leases to drill without revenues contributing to national parks."

WILDFIRES BURNING THROUGH FIREFIGHTING BUDGET. The [AP](#) (8/17, 2.28M) reports that "the Obama administration says wildfires have been so bad this season that the Forest Service will exhaust its firefighting budget next week and will again have to tap into other programs for more money." Agriculture Secretary Tom Vilsack, whose department includes the Forest Service, said Friday that "Congress needs to change the way it funds firefighting." In an interview, Vilsack said "firefighting costs are consuming an ever-greater share of the agency's budget, taking money away from programs that could help prevent wildfires."

In an editorial, the [Sheridan \(WY\) Press](#) (8/17) urges Congress to take action on wildfire funding. It notes that "the Wildfire Disaster Funding Act was introduced in January and has since been referred to a committee on federal lands." Also, "the Flame Act Amendments of 2015 were reintroduced by legislators earlier this year." However, "little if any action has been taken on this legislation."

Wildfire Burns Sage Grouse Habitat In Idaho. The [Greenwire](#) (8/14, Subscription Publication) reports that "a wildfire in southwest Idaho has grown rapidly this week, burning more than 256,000 acres of sage grouse habitat and causing a 'tragic impact' on local ranching communities, according to federal responders." Since Monday, the Soda Fire has "burned roughly 265,000 acres of Bureau of Land Management rangelands southwest of Boise, covering an area at least 40 miles long and 10 miles wide, according to the most recent report from InciWeb, an interagency service." The article notes that "it is by far the largest wildfire currently burning in the United States, according to the National Interagency Fire Center in Boise." According to Ron Dunton, BLM's assistant director of fire and aviation, "flames have been driven by gusty winds and hot, dry weather, and are being fueled by invasive cheat grass."

Additional Coverage. Additional coverage of wildfires was provided by [CBS News](#) (8/17), [T ME](#) (8/17, 19.55M), the [High Country \(CO\) News](#) (8/17, 74K), the [Arkansas Democrat Gazette](#) (8/17, 297K), the [Washington \(DC\) Post](#) (8/17, Press, 6.76M), the [Houston \(TX\) Chronicle](#) (8/17, 2.28M), [Fox News](#) (8/16, 8.91M), the [Boston \(MA\) Herald](#) (8/17, 548K), the [Denver \(CO\) Post](#) (8/17, Press, 787K), the [Houston \(TX\) Chronicle](#) (8/17, 2.28M), the [Seattle \(WA\) Times](#) (8/17, 962K), [National Parks Traveler](#) (8/17, 989), [US News & World Report](#) (8/16, 811K), the [Salt Lake \(UT\) Tribune](#) (8/17, 492K), the [Salt Lake \(UT\) Tribune](#) (8/17, 492K), the [Craig \(CO\) Daily Press](#) (8/16, 10K), the [Houston \(TX\) Chronicle](#) (8/17, 2.28M), the [Denver \(CO\) Post](#) (8/17, 787K), the [Seattle \(WA\) Times](#) (8/17, O'Sullivan, Day, 962K), the [Yakima \(WA\) Herald-Republic](#) (8/17, 86K), the [Mohave Valley \(AZ\) Daily News](#) (8/17, 23K), the [Yuma \(AZ\) Sun](#) (8/17, 70K), the [New Republic](#) (8/17, 242K), the [Sierra \(CA\) Sun Times](#) (8/17), [KRNV-TV Reno \(NV\)](#) Reno, NV (8/17, 2K), [KMGH-TV Denver \(CO\)](#) Denver (8/17, 121K), [KATU-TV Portland \(OR\)](#) Portland, OR (8/17, 134K), [KCNC-TV Denver \(CO\)](#) Denver (8/16, 79K), [K NG-TV Seattle \(WA\)](#) Seattle (8/16, 316K), [WBUR-FM Boston \(MA\)](#) Boston (8/17, 113K), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (8/17, 1.07M).

INTERIOR TO PROPOSE INTERGOVERNMENTAL RULE FOR NATIVE HAWAIIAN GOVERNMENT. The [Honolulu Civil Beat](#) (8/17, 41) reports that the Interior Department has "taken a major step toward federal recognition of Native Hawaiians." The department has "moved forward regarding procedures to re-establish a government-to-government relationship with a native governing entity by submitting a draft rule for regulatory review." Jessica Kershaw, press secretary for the Interior Department, confirmed Friday that a draft rule will be proposed. She said, "I will confirm for you that in response to an extensive public comment period with public meetings, as you are aware, in Hawaii and also Indian country in the continental United States and requests from congressional states and Native Hawaiian community leaders, the Department of Interior will propose a rule that establishes an administrative procedure that the secretary would use if the Native Hawaiian community forms a unified government that seeks a formal government-to-government

relationship with the United States."

Additional coverage was provided by [West Hawaii Today](#) (8/17, 24K).

FATE OF UTAH'S PUBLIC LANDS TO CLARIFY IN SEPTEMBER. The [Deseret \(UT\) News](#) (8/17, 549K) reports on the effort "to create a compromise reasonably in managing public lands in several eastern Utah counties, including spaces for designated wilderness, conservation, recreation, resource extraction and a national monument." Rep. Rob Bishop said "he believes he can deliver a 'better product' for Utah through his public lands initiative than President Barack Obama can create through a national monument designation." In an interview, Bishop said, "We have made it very clear because we have shown maps to the White House as well: 'This is what we intend to do. We can create more certainty as well as conservation than you can ever do with your monument process. They also know if they go ahead with this monument, everything here is screwed up.'" However, Interior Secretary Sally Jewell a week earlier said that "details of the initiative have yet to be seen, despite several requests, and that she doesn't control the president's pen when it comes to another monument designation in Utah." She said, "I have met with Congressman Bishop on this a couple of times. We've asked for detail because we have no detail. Once we see the bill, we'll be able to provide input on how we can help get it across the finish line or what concerns we might have. But we actually haven't seen anything tangible." The article notes that "with Obama's second term nearing completion, the fate of Utah's public lands appears to be coming to a head in September, when Bishop is expected to present formal lands initiative legislation and Jewell's team has a chance to weigh in on its implications."

INTERIOR GAINS FOLLOWERS WITH SOCIAL MEDIA STRATEGY. [The Hill](#) (8/17, Cama, 471K) reports that the Interior Department "seems to have found the key to social media success in the federal government: cute animals and beautiful landscapes." The department has "amassed more than 1 million followers and growing on platforms like Twitter and Instagram, mostly by sending out photos of breathtaking landscapes, wildlife, sunsets and the occasional bear belly-flopping into a stream." According to the article, "in the federal government, where social media is usually limited to press releases and meeting notices, Interior stands out, with a following approaching that of the White House and NASA." The article notes that Interior's social media "content often goes viral, either on news websites and blogs publishing listicles of breathtaking landscapes or with individual posts like one in May of bear cubs wrestling at Yellowstone National Park."

CYBERSECURITY REMAINS ON GAO'S "HIGH-RISK LIST." The [Washington Post](#) (8/17, Davidson, 6.76M) reported in its "Federal Eye" blog that cybersecurity "remains on the Government Accountability Office's 2015 high-risk list." The Post quoted a statement from GAO which said that cybersecurity "remains an ongoing problem and additional efforts are needed to address this issue government-wide," and added that the effort should include "recruiting young, bright, eager folks." GAO has offered "three recommendations to help government focus on closing the skills gap," telling OPM in January that it should "strengthen how it identifies and addresses the skills gap in cybersecurity and other critical areas, 'establish a schedule and process for collecting government-wide staffing' data and develop a core set of metrics for use by all agencies in government-wide workforce analyses."

PRESIDENT OBAMA URGED TO CONTINUE USING ANTIQUITIES ACT. For the "Taking Note" blog of the [New York Times](#) (8/14, 12.12M), Robert B. Semple Jr. lauds President Obama for "making more use of the Antiquities Act in his final years in office (if only as a threat), much as Bill Clinton did near the end of his presidency." He says that "there are at least two more monuments we would recommend to Mr. Obama before he retires." One, "known as the California Desert, would add more than a million acres to already-protected lands in southeastern California," and would be relatively uncontroversial. However, "the other one, which would cover 1.9 million acres of in the so-called Bears Ears region of southeastern Utah, could be hugely controversial and will take a good deal of preparation and Presidential courage to pull off."

Empowering Native American Communities:

MAN PLEADS GUILTY TO ASSAULT ON BIA OFFICER. The [AP](#) (8/17, 2.28M) reports that "a North Dakota man has pleaded guilty to an assault that injured a Bureau of Indian Affairs officer." According to the article, "Brandon Belgarde, of Rugby, pleaded guilty to assault with a dangerous weapon, and assaulting and resisting a federal officer." Authorities say "Belgarde rammed his vehicle into a BIA vehicle during a November 2014 traffic stop."

Office of Insular Affairs:

ASSISTANT SECRETARY KIA'AINA ANNOUNCES GRANTS UNDER OFFICE OF INSULAR AFFAIRS' TECHNICAL ASSISTANCE PROGRAM. The [Saipan \(MNP\) Tribune](#) (8/17, 641) reports that Interior Assistant Secretary for Insular Areas Esther Kia'aina announced Friday "\$500,000 in grant assistance under the Office of Insular Affairs' Technical Assistance Program for two non-governmental organizations, one in Hawaii and one in Guam, both collaborating with federal, state, and territorial officials on the ground to establish wrap-around one-stop social services for migrants from the freely associated states of the Federated States of Micronesia, the Republic of the Marshall Islands and the Republic of Palau." Kia'aina said, "Given the financial and social welfare of migrants from the freely associated states, it is important that the federal government do what it can within its current resources to help empower our Micronesian communities as well as help affected jurisdictions like Hawaii and Guam."

Tackling America's Water Challenges:

ANIMUS RIVER REOPENS AS OFFICIALS SAY TOXIC PLUME NO LONGER A RISK. The [AP](#) (8/15, Whitehurst) reports the Animus river on Friday "reopened" for recreational use after officials stated that the yellow "toxic plume" that resulted from a spill of three million gallons of water from the Gold King Mine "now presents little danger to users beyond Lake Powell." Southern Nevada Waste Authority spokesman Corey Enus stated that "His agency estimates the wastewater will make it out of Lake Powell in about two weeks," and further testing will be done to monitor possible contaminants. Meanwhile, the [CBS Evening News](#) (8/14, story 6, 0:25, Pelley, 5 08M) reported that "Colorado health officials reopened the Animus River, but warned people not to drink untreated water and to scrub their hands and clothes if they come in contact with sediment."

WSJournal Analysis: Spill Highlights Issues With Cleaning Old Mines. The [Wall Street Journal](#) (8/15, Frosch, Harder, Subscription Publication, 6.06M) reports that the spill in the Animus river shows highlights the Environmental Protection Agency's difficult task of cleaning up abandoned mines that may contaminate as much as 40 percent of the headwaters of western US watersheds. The Journal notes that more than 160,000 abandoned mines exist throughout the west, with at least 33,000 linked to pollution of local water sources.

Media Analysis: EPA "Under Fire" For Toxic Spill. The Environmental Protection Agency (EPA) is "under fire" for the toxic waste spill that contaminated the Animus River in Colorado last week, reported [The Hill](#) (8/15, Cama, 471K). Dan Kish, of the conservative Institute for Energy Research, said the spill "raised serious questions about competency" and "puts a big dent" on the agency's reputation as "a pollution fighting brand." Meanwhile, Republicans have also decried the EPA as "hypocritical." The Hill noted the spill comes "at a particularly sensitive time for the EPA and President Obama's environmental record," occurring just two days following the President's unveiling of new emissions regulations for power plants.

The [AP](#) (8/16, Biesecker) reports that the "political fallout" for the Environmental Protection Agency (EPA) "could linger." According to the AP, critics are using the EPA's "much maligned handling of the mine spill to undercut the Obama administrations rollout of major regulation aimed at cutting greenhouse gas emissions at the nation's power plants."

SENATE TO HOLD HEARING FOR DELTA TUNNELS PROPOSAL. The [Woodland \(CA\) Daily Democrat](#) (8/14, 22K) reports that "a Tuesday hearing is planned to examine thus far unanswered questions about the Delta tunnels proposal 'in an attempt to determine whether the proposal is good for California.'" The Senate Select Committee on the Sacramento-San Joaquin Delta, chaired by Sen. Lois Wolk, will host the discussion. The article notes that "the session is meant to consider whether the tunnels are a 'good investment,' and if they 'meet the co-equal goals of providing a 'more reliable water supply for California and protecting, restoring, and enhancing the Delta ecosystem' in a manner that 'protects and enhances the unique cultural, recreational, natural resource, and agricultural values of the Delta as an evolving place.'"

Additional coverage of the project was provided by the [Red Green & Blue](#) (8/15, 7).

TEN PILOT PROJECTS UNDER PILOT SYSTEM CONSERVATION PROGRAM ANNOUNCED. The [Summit County \(CO\) Citizens Voice](#) (8/16, 506) reports that "water allocation in the Colorado River Basin may be entering a new era, officials said last week as they announced finalization of 10 pilot projects that will allow farmers, municipalities and other water users to voluntarily and temporarily forego use of their water in exchange for compensation." According to the article, "the 10 projects, five in Colorado and five in Wyoming, will be funded for one or more years, at a total cost of roughly \$1 million." The program is "part of a larger \$11 million Pilot System Conservation Program involving all seven Colorado River states." The article notes that "Denver Water, Southern Nevada Water Authority, Metropolitan Water District of Southern California and Central Arizona Water Conservation District, together with the United States Bureau of Reclamation, are funding the Pilot System Conservation Program."

MERCED IRRIGATION DISTRICT RECEIVES GRANT FOR DROUGHT RESILIENCY PROJECTS. The [Merced \(CA\) Sun-Star](#) (8/17, 35K) reports that "the Merced Irrigation District received nearly \$300,000 of grant funding from the U.S. Bureau of Reclamation for drought resiliency projects." The funds will "help MID develop a real-time simulation water management model that will help the district analyze, predict and respond to drought conditions." The article notes that "the district also will install two weather stations and two river gauge stations to collect water supply data on precipitation, flows, temperature and system losses."

BOR MOVING FORWARD WITH PLANS FOR YAKIMA. [KING-TV](#) Seattle (8/14, 316K) reports that "the drought of 2015 has for the second time in 10 years pointed out the limitations of the state's Yakima Basin irrigation projects." However "this time the U.S. Bureau of Reclamation is moving forward on plans to both provide more water to farmers in

the rich Yakima Valley and even improve fish habitat in the upper Yakima River, one of the nation's blue ribbon fly fishing streams." The article notes that "it's a project with multiple phases that could be built out over 30 years at a cost of \$900 million."

PALO VERDE VALLEY FARMERS ARE KEY ACTORS IN FIGHT AGAINST DROUGHT. The [Los Angeles Times](#) (8/15, Perry, 4.07M) reports that "in the desert of California, where the Colorado River for decades has turned barren ground into an agricultural bounty, farmers are being paid not to grow crops on a portion of their land so that water can be shipped to thirsty cities on the coast." The article notes that "in the Imperial Valley, so-called fallowing agreements have caused political upheaval, recriminations and litigation." According to the article, "the federal government had to threaten to take the water without compensation to get the Imperial Irrigation District to agree in 2003 to sell water to San Diego." However, "just to the north, in the smaller Palo Verde Valley, a 35-year agreement signed in 2005 with the Metropolitan Water District of Southern California has enjoyed public acceptance by farmers and local officials."

FARMERS CLOSELY WATCHING NEXT STEPS FOR SAN JOAQUIN RIVER. The [Fresno \(CA\) Bee](#) (8/17, 265K) reports that "more than six decades after their deaths, the San Joaquin River and chinook salmon slowly are coming back to life in an unprecedented, hard-fought revival." The article notes that "until now, some water released from Friant Dam for this project has been collected at Mendota Pool in west Fresno County, a point dozens of miles from the end of the restoration project." However, "when the river finally refills beyond the Mendota Pool in the future, federal officials may have to contend with statewide water fights in the controversial Sacramento-San Joaquin Delta."

BOR SCIENCE INTEGRITY OFFICER PROFILED. The [New York Times](#) (8/15, Murphy, Subscription Publication, 12.12M) profiles David Raff, the science integrity officer for the BOR, "which is currently struggling to manage competing demands for a dwindling resource."

Securing America's Energy Future:

Renewable Energy:

FISHERMEN'S ENERGY UNVEILS NEW OFFSHORE WIND TURBINE ACCESS LADDER. The [Recharge News](#) (8/17, 633) reports that "Fishermen's Energy has demonstrated a new type of access ladder that has been created to increase safety and provide service personnel greater access to offshore wind turbines."

Onshore Energy Development:

BLM RELEASES DRAFT PLAN FOR PERMITTING OIL AND GAS WELLS AROUND MOAB. The [Salt Lake \(UT\) Tribune](#) (8/17, 492K) reports that "federal land managers Friday released a much-anticipated analysis of mineral lease options for lands around Moab." The article notes that "the preferred alternative from the Bureau of Land Management of Utah would close areas adjacent to Arches and Canyonlands national parks to leasing and block disturbance on larger regions popular with mountain bikers, hikers and tourists driving to scenic destinations." According to the article, "the plan — which covers 1 million acres of public land in east-central Utah — is considered a bellwether for a new planning and permitting process, which grew out of controversial leases the BLM sold for the area in 2008 and later retracted after activist Tim DeChristopher monkey-wrenched a sale."

BLM TO AUCTION MORE DRILLING RIGHTS ON PAWNEE NATIONAL GRASSLAND. The [Denver Business Journal](#) (8/17, Subscription Publication, 41K) reports that the BLM said Friday "it will offer at its November lease auction 19 parcels totaling 10,050 acres in three counties: Weld, Huerfano and Las Animas. The Weld County parcel is near Fort Morgan." The article notes that "also on the BLM's auction block in November are 102 parcels owned by the U.S. Forest Service covering 79,487 acres of underground mineral rights within the Pawnee National Grassland in Weld County — a rolling area of Colorado's eastern plains that is known internationally among bird watchers for the variety of wildlife that live in the area."

KENTUCKY COAL MINING TOWN URGES REPUBLICANS TO SUPPORT POWER+ PLAN. The [Vox](#) (8/16, 1.1M) reports that "while Appalachia's representatives in Washington use coal miners and their communities as a political bludgeon, it's President Obama who's actually trying to help them," with the POWER+ Plan. Last week, "the little town of Whitesburg, Kentucky, passed a resolution in support of the POWER+ Plan," and urging its representatives in Congress to support the plan.

WYOMING TREASURER SUPPORTS COAL LEASING PROGRAM. In an op-ed for the [Casper \(WY\) Star-Tribune](#) (8/17, 115K), Mark Gordon, treasurer of Wyoming, writes that the federal coal leasing program, "through which companies pay to lease and mine coal on federal land, has been a remarkable success by any reasonable measure." According to Gordon, "the BLM Federal coal lease program creates great value for taxpayers and those who rely on affordable electricity." He concludes, "While there may be room for process improvement, continuing the program is certainly in the best interest of Wyoming and the United States."

Additional coverage of the listening session being held on the federal coal program was provided by the [Pittsburgh Post-Gazette](#) (8/15, Hopey, 493K), the [High Country \(CO\) News](#) (8/17, 74K) and the [Douglas \(WY\) Budget](#) (8/17, 80).

FEDERAL AGENCIES URGED TO CLOSE URANIUM-MINING LOOPHOLES AT GRAND CANYON. In an op-ed for the [Arizona Republic](#) (8/16, 1.12M), Steve Martin, who served as superintendent of Grand Canyon National Park from 2007 to 2011, criticizes regulatory agencies that "continue to allow private companies to mine uranium on public lands surrounding the Grand Canyon, exposing one of America's most treasured national parks to the risk of permanent radioactive contamination." According to Martin, "for this privilege, companies pay zero federal royalties, and past experience indicates they're likely to leave the American taxpayer on the hook for costly mine cleanups." He urges U.S. Forest Service and BLM "decision-makers" to "step forward as guardians of public lands, reform the flawed regulations and protect the Colorado River and Grand Canyon from permanent radiological contamination."

Offshore Energy Development:

NOIA SUPPORTS UPCOMING OFFSHORE LEASE SALE. The [Augusta \(VA\) Free Press](#) (8/17, 280) reports that NOIA President Randall Luthi issued a statement "supporting DOI's Western Gulf of Mexico Lease Sale scheduled for next week." He said, "Delaying the sale due to concerns that the LWCF has not been re-authorized is the epitome of the tail wagging the dog. The problem is with how the LWCF funds have been used, not with the funding source. These groups should be working with Congress to see that the LWCF truly reflects the needs and desires of the public and the conservation community. Their current effort would leave the LWCF with no funding."

Additional coverage was provided by the [Offshore Engineer](#) (8/17), [Oil and Gas Journal](#) (8/17, 1K), and [World Oil](#) (8/17).

BOEM TO PREPARE SEIS FOR 2017 CENTRAL GULF OF MEXICO LEASE SALE. The [Oil and Gas Journal](#) (8/17, 1K) reports that the BOEM "plans to prepare a supplemental environmental impact statement for the final Central Gulf of Mexico Planning Area oil and gas lease sale under the current 5-year US Outer Continental Shelf program." The bureau "proposed offering 46 million acres in the area, with the exception of whole and portions of blocks that are off-limits under the 2006 Gulf of Mexico Security Act, and blocks which are beyond the US Exclusive Economic Zone in the area known as the northern portion of the Eastern Gap." According to the article, "public scoping meetings for OCS Sale No. 247's SEIS will be held on Sept. 1 in Mobile, Ala.; Sept. 2 in Gulfport, Miss.; and Sept. 3 in New Orleans, the US Department of the Interior agency said on Aug. 14."

Additional coverage was provided by [Marine Link](#) (8/17, 1K).

FEDERAL AGENCIES REASSESSING WILDLIFE IMPACTS FROM AN ARCTIC SPILL. The [Alaska Dispatch News](#) (8/15, 219K) reports that "with increased ship traffic and oil exploration in Alaska's Arctic waters, federal agencies are reassessing their guidelines for responders to assure as many animals as possible survive a spill." According to the article, "in the event of a large oil spill in Alaska's Arctic, officials say they would have limited ability to clean oiled marine mammals, and in some cases might not be able to clean them at all." The article notes that "assuming rescuers could reach them, polar bears would have to be cleaned just a few at a time. And the prospects for walrus are even grimmer."

NORTH MYRTLE BEACH TO CONSIDER OPPOSING OFFSHORE DRILLING. The [Myrtle Beach \(SC\) Online](#) (8/17, 36K) reports that "a week after Myrtle Beach City Council passed a resolution opposing offshore drilling off the coast of South Carolina, North Myrtle Beach council members are poised to become the third Grand Strand community to take a stand against oil exploration." North Myrtle Beach City Council "on Tuesday will consider a resolution that points to the need to protect the area's greatest asset — the beach — as a reason to oppose oil exploration."

BLACK ELK ENERGY FACING FEDERAL CHARGES FOR DEADLY PLATFORM BLAST. The [AP](#) (8/17) reports that "oil platform operator Black Elk Energy is facing federal criminal charges in connection with a November 2012 explosion off Louisiana's coast that left three workers dead and others badly injured." U.S. Attorney Kenneth Allen Polite Jr. of the Eastern District in Louisiana "filed a six-count criminal complaint against Houston-based Black Elk Energy Offshore Operations last week." Polite claim "Black Elk and its contractors failed to comply with federal safety regulations on the platform, located about 20 miles south of Grand Isle." The BSEE "issued a report in November 2013 that said storage tanks weren't properly purged of flammable liquid before the crew began welding nearby."

ADDITIONAL COVERAGE \$120 MILLION IN PROPOSED OIL SPILL RESTORATION PROJECTS ANNOUNCED. Additional coverage of the \$120 million in funding for

restoration projects for 10 watersheds across the Gulf of Mexico was provided by the [Houston \(TX\) Chronicle](#) (8/17, 2.28M), the [Pensacola \(FL\) News Journal](#) (8/16, 125K), [Marine Link](#) (8/17, 1K), [Marine Technology](#) (8/17), and [KSTP-TV Minneapolis-St. Paul \(MN\)](#) Minneapolis-St Paul, MN (8/17, 139K).

VIRGINIA PILOT VIRGINIA BEACH LEADERS NEED TO OPPOSE DRILLING. The [Hampton Roads \(VA\) Virginian-Pilot](#) (8/17, 363K) editorializes that Virginia Beach's leaders should reverse a 2010 decision to allow drilling off the shore of Virginia. According to Virginia Pilot, the decision was a "mistake" based on exaggerated projections of job growth and with no agreement that ensured major royalties for the state. Virginia-Pilot adds that the US Navy has written in opposition to drilling, citing it as incompatible with its training missions. Virginia-Pilot also references the Gulf of Mexico oil spill, explaining that the potential of an oil spill leaves Virginia's large tourism industry vulnerable.

America's Great Outdoors:

Bureau of Land Management:

BLM HOLDING HORSE, BURRO ADOPTION EVENTS. The [Washington Post](#) (8/14, Greenberg, 6.76M) reports on the adoption events being held by the BLM this year. According to the article, "it's just one of the ways the federal government is working to contain the burgeoning population of mustangs and burros in the western United States." Davida Carnahan, who works with BLM's Eastern States office, noted that "contraception and adoption, among other methods, are used to curb population growth."

BUSINESS LEADERS CRITICIZE GARFIELD COUNTY PROCLAMATION BLAMING FEDERAL AGENCIES. The [Salt Lake \(UT\) Tribune](#) (8/17, 492K) reports that on June 22, the Garfield County Commission declared a state of emergency claiming that the BLM and the U.S. Forest Service are "to blame for the county's economic malaise because policies have 'eliminated' multiple use." But "several Escalante business leaders" are "frustrated with the commission's declaration." According to the article, "they believe the three-page resolution, which calls on federal land agencies to align their management with the county's priorities, exhibits a lack of vision for the future and could wind up harming Escalante's economic prospects by discouraging investment."

BILL INTRODUCED TO EXPAND BLACK HILLS NATIONAL CEMETERY. The [AP](#) (8/17, 2.28M) reports that "South Dakota's U.S. senators are pushing to add nearly 200 acres of land to expand the Black Hills National Cemetery to make room for future veterans." Sens. Mike Rounds and John Thune "introduced a bill earlier this month that would permanently transfer the federal land to the 100-acre cemetery in Sturgis." The article notes that "the land that would be added borders the existing cemetery grounds to the north and is held by the Bureau of Land Management."

WILKS BROTHERS CONSIDER OPENING 16,000 ACRES TO HUNTING. The [Billings \(MT\) Gazette](#) (8/17, 179K) reports that "although nothing has been agreed to yet, the state's largest private landowners are telling Montanans they are considering opening up 16,000 acres of their land in Fergus and Golden Valley counties to public hunting." Darryl James, a spokesman for brothers Dan and Farris Wilks, said "the proposal is meant to 'assuage the fears of Montana sportsmen' as well as to 'help manage a clearly over objective elk population.'" The article notes that "the Wilkses are seeking 4,900 acres of scattered BLM inholdings in exchange for 5,200 acres of their private land along Red Hill Road and in the Missouri River Breaks."

MIGRANTS LOST IN DESERT NEAR GILA BEND FOUND. The [Arizona Republic](#) (8/15, 1.12M) reports that "a group of 5 migrants reported lost in the desert south of Interstate 8 and east of Gila Bend have been found, authorities said Saturday." The article notes that "units with the federal Bureau of Land Management and Border Patrol assisted MCSO in their search efforts."

Fish and Wildlife Service:

HUNTER WHO SHOT CECIL THE LION ILLEGALLY SLAYED BEAR IN 2006. The [New York Post](#) (8/15, 2.73M) reports that "despised dentist Walter Palmer illegally killed a black bear years before he slew Cecil the lion, it was revealed Friday." According to the article, "newly surfaced photos show the 55-year-old Minnesota man — who sparked a global firestorm of criticism last month by killing one of Zimbabwe's most beloved big cats — posing with the carcass of a black bear he unlawfully shot during a 2006 hunt in Wisconsin." Palmer, "who lied to authorities about killing the bear in September 2006, pleaded guilty to making false statements about the hunt two years later, according to officials."

Additional coverage was provided by [The Guardian \(UK\)](#) (8/14, 3.3M), the [Telegraph \(UK\)](#) (8/17, 986K), the [Daily Mail \(UK\)](#) (8/17, 5.59M), [ABC News](#) (8/17, 3.97M), and [WIMS-AM South Shore \(IN\)](#) South Shore, N (8/14).

STEP TAKEN TOWARD PROPOSED GRAND KANKAKEE MARSH FISH AND WILDLIFE REFUGE. The [Kankakee \(IL\) Daily Journal](#) (8/17, 87K) reports that "a first small step" toward "establishing the proposed Grand Kankakee Marsh Fish and Wildlife Refuge is being taken by the U.S. Fish and Wildlife Service, said John Rogner, wildlife refuge landscape conservation coordinator for the Upper Midwest and Great Lakes." The agency is "accepting the donation of 'a little over 70 acres' of high-quality natural habitat in the northeast corner of Iroquois County from Friends of the Kankakee, an organization formed in 2005 and dedicated to acquiring lands to be donated to this cause."

FROZEN SPERM MAY HELP BLACK-FOOTED FERRETS RECOVER. The [Washington Post](#) (8/14, Feltman, 6.76M) reports that "for a critically endangered species, frozen sperm is truly the gift that keeps on giving." The article notes that "the black-footed ferret, a critically endangered species native to North America, is the latest animal to benefit." In a study published Thursday in the journal *Animal Conservation*, researchers working as part of an FWS recovery program "report successfully using sperm frozen as much as 20 years before to increase the genetic diversity of the small population."

CRITICAL HABITATS DESIGNATED FOR RARE PLANTS IN FLORIDA. The [Miami Herald](#) (8/17, 651K) reports that "two rare plants that grow in pine rockland slated for a controversial Walmart shopping center and proposed amusement park will be getting an additional level of protection, federal wildlife managers said Friday." According to the article, "more than 2,700 acres will be designated as 'critical habitat' for the Florida brickell-bush and Carter's small-flowered flax, two small ground flowers that grow in the crevices of the rocky forest floor and are found only in South Miami-Dade County." However, "because of the complexity of the federal law, the designation, which will be formally announced on Monday, will affect the two projects differently."

PUBLIC MEETING ON NAVASSA SUPERFUND SITE TO BE HELD TUESDAY. [WWAY-TV](#) Wilmington, NC (8/13, 2K) reports that "the public will have an opportunity Tuesday to give federal and state agencies feedback on a plan to restore the natural resources in a Brunswick County town where a wood treatment operation contaminated the nearby environment for several decades." The FWS, the National Oceanic and Atmospheric Administration, and the NC Department of Environment and Natural Resources are "trustees acting on behalf of the public to develop and carry out a plan to restore the natural resources affected by the contamination as part of the Natural Resource Damage Assessment and Restoration process." They are "hosting the meeting so people can provide their ideas for restoring natural resources, which were impacted by four decades of contamination caused by chemicals that were used to treat wood at the old Kerr-McGee Chemical Corp. site in Navassa."

SHOOTING OF GRIZZLY BEAR UNDER INVESTIGATION. The [AP](#) (8/17, 2.28M) reports that "a woman who shot a grizzly bear that ultimately died after she believed it posed a threat to her North Idaho family is worried she may be in trouble for killing a federally protected species." Wayne Kasworm, a FWS biologist, said "the bear was trapped and collared near Troy, Montana, three weeks ago," and "the bear was released between 5 to 10 miles from where it was killed." The incident is under investigation.

FWS CREWS SEARCHING FOR INVASIVE SEA LAMPREY IN WESTERN NEW YORK. [WIVB-TV](#) Buffalo, NY (8/14, 108K) reports that FWS crews are "in Western New York searching for invasive sea lampreys in area streams." According to the article, "the biological science technicians are looking in the water for the presence and concentration of lamprey larvae to help determine future chemical treatment plans to kill the aquatic invaders."

EFFORTS UNDERWAY TO SAVE ENDANGERED RATTLESNAKE. The [Houston Chronicle](#) (8/17, 2.28M) reports that "a northern Indiana college professor is on mission to determine how many members of an endangered rattlesnake species remain in Indiana's wilds." According to the article, "students of Indiana University-Purdue University Fort Wayne biology professor Bruce Kingsbury have been searching for evidence of eastern massasauga rattlesnakes." The FWS says "the snake is also a candidate for a federal endangered species listing."

FLORIDA OFFICIALS SEEK NEW DIRECTION IN PANTHER PROTECTION. The [AP](#) (8/17, 2.28M) reports that "Florida Fish and Wildlife Conservation Commission officials on Friday said they have no intention of seeking to remove the Florida panther from the endangered species list or changing any protections." However, "the officials also said they believe it's time to rethink some of the criteria set by federal officials about what it would take for the panther to be taken off the list and what the state agency's responsibilities are." The article notes that "chief among those is loosening a requirement for Florida officials to establish panther populations outside of southwest Florida, where they are concentrated currently, according to a revision of a draft policy paper that will be voted on by commissioners in September."

ANTENNA COLLECTS DATA ON MIGRATORY BIRDS. The [Falmouth \(MA\) Enterprise](#) (8/17, 28K) reports that "a 40-foot radio antenna used to track migratory birds and bats was recently installed at South Cape Beach." The objective of "the study is to collect new information on the flight paths of birds and bats across southern New England to support conservation decisions in the planning process." The article notes that "the study—spearheaded by the University of Massachusetts Amherst and the US Fish and Wildlife Service, Division of Migratory Birds, and funded by the Bureau of Ocean Energy Management—tracks migratory birds that have been outfitted with a new technology called NanoTags, or VHF transmitters."

ADDITIONAL COVERAGE FWS AWARDS GRANTS THROUGH COOPERATIVE ENDANGERED SPECIES CONSERVATION FUND. Additional coverage of the grants awarded through the was provided by the [Houston \(TX\) Chronicle](#) (8/17, 2.28M), [AmmoLand](#) (8/17, 6K), the [Pagosa \(CO\) Daily Post](#) (8/14), the [Palm Springs \(CA\) Desert Sun](#) (8/14, 99K), and [KREM-TV Spokane \(WA\)](#) Spokane, WA (8/14, 88K).

OP-ED LESSER PRAIRIE CHICKEN SHOULD BE TAKEN OFF THREATENED LIST. For the [Hutchinson \(KS\) News](#) (8/17, 2K), Jeff Myrick writes that “a 50-percent increase this year in the population of the lesser prairie chicken (LPC) has prompted Sen. Jerry Moran of Kansas to ask U.S. Fish and Wildlife Director Dan Ashe if that will get the bird taken off the threatened list, which the agency hung it on in 2014.” According to Myrick, “Moran appears to be right.” He concludes that “whatever threat there was to the lesser prairie chicken appears to be gone.”

National Park Service:

YOSEMITE NATIONAL PARK CLOSES CAMPGROUND AFTER TWO PLAGUE-INFECTED SQUIRRELS FOUND DEAD. The [Los Angeles Times](#) (8/15, Rocha, 4.07M) reports Yosemite National Park officials announced they are closing the “popular” Tuolumne Meadows Campground “from noon Monday to noon Friday, Aug. 21” after finding squirrels infected with the plague and about a week after a child contracted the disease at a different campsite.

According to the [AP](#) (8/15), the California Department of Health said Friday “Campers had their reservations canceled at the 304-site campground so the insecticide can be sprayed into rodent ‘burrow holes.’”

The [Washington Post](#) (8/16, Izadi, 6.76M) also reports.

Falling Tree Limb Falls Kills Two Young Campers In Yosemite. The [AP](#) (8/14, Press, 6.76M) reports that “officials say an oak tree limb fell on a tent in the heart of Yosemite National Park killing two young campers.” Park spokesman Scott Gediman on Friday “declined to release the ages or any details about the two, describing them only as under age 18.” Gediman “also declined to describe the size of the limb, citing a pending investigation.”

Additional coverage was provided by the [Los Angeles \(CA\) Times](#) (8/14, Rocha, 4.07M), the [Los Angeles \(CA\) Times](#) (8/15, Rocha, 4.07M), the [New York \(NY\) Daily News](#) (8/14, Chan, 3.75M), the [San Francisco \(CA\) Chronicle](#) (8/17, Subscription Publication, 3 35M), the [Detroit \(MI\) Free Press](#) (8/15, 910K), [NBC News](#) (8/17, 3.73M), [USA Today](#) (8/15, Bowerman, 4.95M), [US News & World Report](#) (8/14, 811K), [The Guardian \(UK\)](#) (8/14, 3.3M), the [Huffington Post](#) (8/17, 164K), and [TIME](#) (8/17, 19 55M).

Additional Coverage. Additional coverage was provided by the [Los Angeles \(CA\) Times](#) (8/15, Cart, 4 07M), [US News & World Report](#) (8/15, 811K), the [Washington \(DC\) Post](#) (8/17, Press, 6.76M), the [Christian Science Monitor](#) (8/15, 455K), and [Nature World Report](#) (8/17).

UTAH'S NATIONAL PARKS RECEIVE LOW GRADES FOR POLLUTION. The [Salt Lake \(UT\) Tribune](#) (8/17, 492K) reports that “Utah’s national parks aren’t failing the dirty air test — but just barely.” According to the article, “in a new assessment, a report card for polluted parks from the National Parks Conservation Association, three of the state’s ‘Mighty Five’ got D grades for two out of three clean-air categories. And another two earned just middling C’s.”

Opinion: EPA Smog Rules Criticized. In the [Sacramento \(CA\) Bee](#) (8/16, 535K), Jillian Melchior, an energy fellow for Independent Women’s Forum, criticizes the EPA’s increasingly tough standards on smog, writing that the policies force “clean air” cities to impose measures that could cost billions and hinder growth. Melchior notes that “the last regulatory revisions, established in 2008, were so stringent that several national park sites — as well as myriad cities and towns across America — fail to meet them.” And “even more adamant smog standards to mandate ozone levels somewhere between 60 and 70 ppb” means “the number of noncompliant national park sites will roughly double, and even immaculate places like the Mojave Desert and Colorado’s Longs Peak could land on the naughty list.”

OHIO ZOO TAKING CUBS OF EUTHANIZED GRIZZLY BEAR. The [Greenwire](#) (8/14, Subscription Publication) reports that “an Ohio zoo is taking the two orphaned cubs of a grizzly bear euthanized after killing a hiker in Yellowstone National Park.” The Toledo Zoo “agreed to take in the female cubs as part of its planned brown bear exhibit.” According to the article, “before their transfer sometime this fall, the zoo’s curator of mammals said, the cubs will be held at a rehabilitation center.”

Additional coverage was provided by the [International Business Times](#) (8/17, 835K), [WAMU-FM](#) Washington (8/17, 30K), and [KTWO-AM](#) Casper, WY (8/17, 576).

YELLOWSTONE BISON CULLED TO KEEP POPULATION IN CHECK. The [Washington Post](#) (8/16, Warrick, 6.76M) reports that “the culling of the bison is a routine, if little-known, facet of managing Yellowstone’s roughly 4,900 bison, the country’s biggest and wildest repository of descendants of the great herds that once roamed the Western plains.” The article notes that “since January, more than 500 of the woolly beasts — the most in years — have been chased onto trucks by government workers and hauled to slaughterhouses.” Also, “some 200 others that wandered off park grounds were rounded up in a similar fashion or stalked by hunters and shot.” And “next year’s takings are expected to be still higher, a consequence of a surging population and strict rules that park officials themselves find difficult to carry out.”

GPS COLLARS TRACK NUISANCE BEARS IN GREAT SMOKY MOUNTAINS NATIONAL PARK. The [AP](#) (8/17, 2.28M) reports that “biologists are now tracking nuisance bears in Great Smoky Mountains National Park with GPS collars.” Wildlife biologist Bill Stiver said “the collars are providing scientists with a real-time look at the problem bears’ behavior for the first time.” According to the article, “so far, they are tracking two females and three males that were trapped earlier this summer at campgrounds and picnic areas.”

Additional coverage was provided by the [Knoxville \(TN\) News Sentinel](#) (8/17, 235K), the [Memphis \(TN\) Commercial Appeal](#) (8/17, 282K), and the [Kingsport \(TN\) Times-News](#) (8/17, 109K).

PANEL CHAUTAUQUA INSTITUTION SHOULD DELAY VENUE DECISION. The [AP](#) (8/14, Carolyn Thompson |, Ap, 6.76M) reports that “the Chautauqua Institution must choose between programming and preservation in deciding the future of its 122-year-old amphitheater, a panel of preservationists concluded, adding that a decision to demolish the venue ‘cannot be reversed, only regretted.’” The article notes that “plans to raze and rebuild the open-air theater where Susan B. Anthony, President Franklin D. Roosevelt, Duke Ellington and countless others have taken the stage have been debated through the summer at the intellectual and arts retreat in anticipation of an Aug. 29 vote by the institution’s board.” A historic preservation panel formed at the recommendation of the NPS said “in an Aug. 6 report that the institution must decide whether its desire for expanded programming and capacity is worth losing the existing amphitheater over.”

SELMA INTERPRETIVE CENTER RECEIVES \$150,000 IN FUNDING. The [AP](#) (8/17, 2 28M) reports that “an interpretive center explaining the history of the civil rights movement in Selma is receiving \$150,000 for renovations.” The article notes that the “funding is the final part of a \$1.65 million renovation to the Selma Interpretive Center’s second and third floors.” The funds will also allow the NPS “to hire another employee to manage it.”

STUDY BACKS BAN ON DRONES IN NATIONAL PARKS. The [Los Angeles Times](#) (8/14, Khan, 4.07M) reports that “drones flying near American black bears in Minnesota caused the animals’ heart rates to soar, even though few bears showed any outward symptoms of stress, according to a new study led by University of Minnesota researchers.” According to the article, “the findings, published in the journal *Current Biology*, could help researchers learn to better deploy drones to study animals without adversely affecting them, and help provide insight into how drones’ rising presence could affect sensitive or endangered populations.” The study authors concluded, “Our results support the 2014 decision by the U.S. National Park Service to ban all public use of UAVs within park boundaries after a low-flying UAV caused a herd of big horn sheep (*Ovis canadensis*) in Zion National Park to scatter, separating lambs from their mothers.”

FEDERAL AGENCIES PARTNERING FOR SW ECODISTRICT. [WAMU-FM](#) Washington (8/17, 30K) reports that the National Capital Planning Commission is “overseeing the creation of the ‘SW Ecodistrict.’” The article notes that “seventeen federal and local agencies have joined up to get this thing off the ground.” According to the article, “the SW Ecodistrict is bounded by Independence Avenue to the north, 12th Street to the west, Sixth Street to the east, and includes Banneker Park, at the end of L’Enfant Promenade.”

INTERIOR SAYS CAPT. JOHN SMITH WATER TRAIL ELIGIBLE FOR NATIONAL REGISTER OF HISTORIC PLACES. The [Virginia Gazette](#) (8/14, Bogues, 50K) reports that “preservation groups opposed to Dominion’s proposal to build transmission lines across the James River got a big victory this week when the U.S. Department of Interior ruled a section of the Capt. John Smith Historic Water Trail was eligible for the National Register of Historic Places.” According to the article, “the application for the portion of the trail to be declared eligible was filed by the National Trust for Historic Preservation, a Washington, D.C.-based group that argues the transmission towers Dominion wants to build threaten the historic view of the river.” The article notes that “the eligibility will now become an important consideration for the U.S. Army Corps of Engineers, as it considers whether to grant Dominion a permit to build the transmission lines cross the James.”

ADDITIONAL COVERAGE OF BAN ON SALES OF BOTTLED WATER AT NATIONAL PARKS. Additional coverage of the ban on sales of bottled water at national parks was provided by the [Arkansas Democrat Gazette](#) (8/16, 297K).

ADDITIONAL COVERAGE SEWALL-BELMONT HOUSE & AMP MUSEUM COULD BECOME PART OF NPS. Additional coverage that the Sewall-Belmont House & Museum could become part of the NPS was provided by the [Washington Business Journal](#) (8/14, Subscription Publication, 112K).

US Geological Survey:

RESEARCHERS STUDYING SEQUOIA TO MEASURE DROUGHT'S IMPACT. [NPR](#) (8/17, 1.85M) reports that "the giant sequoias in the Sierra Nevada are one of America's treasures, but for the first time in the Sequoia National Park's history, the trees are showing visible signs of exhaustion due to the drought." The "notion that the giant sequoias could die because of drought has brought together multiple agencies, including the National Park Service, Stanford, the U.S. Forest Service, U.S. Geological Survey and the Carnegie Airborne Observatory, for the first health-related study on the giant sequoia."

DEWBERRY TO EVALUATE NEW LIDAR TECHNOLOGIES FOR USGS. [Directions Magazine](#) (8/17, 82K) reports that "under its Geospatial Products and Services Contract (GPSC) with the U.S. Geological Survey (USGS), Dewberry is executing a task order to evaluate two new forms of light detection and ranging (lidar) to determine if single photon lidar (SPL) and Geiger mode lidar (GML) can satisfy USGS Lidar Base Specification version 1 2 for quality level (QL2) lidar with two points per square meter (pts/m2) and vertical RMSE ≤10 cm for use in the USGS 3D Elevation Program (3DEP)."

Top National News:

OBAMA PRAISES BOND AS A "HERO" AND A "FRIEND." The death of former NAACP Chairman Julian Bond this weekend garners significant print and online coverage this morning, and received nearly five minutes of coverage on the network news broadcasts last evening. Most reports highlight the President's comments on the late civil rights leader, and almost universally, the coverage details Bond's work in the civil rights movement as a Georgia lawmaker and as an educator. The reports on Bond's death and expressions of mourning from political and civil rights figures appear this morning alongside a number of reports on the current state of race relations across the nation.

Jeff Glor, on the [CBS Evening News](#) (8/16, story 6, 1 55, Glor, 5.08M), called Bond a "giant of the civil rights movement," and Jericka Duncan added that he "made history," having "worked side-by-side with Dr. Martin Luther King, Jr." as "one of the original leaders of the Student Nonviolent Coordinating Committee." Similarly, on [NBC Nightly News](#) (8/16, story 7, 2:20, Hill, 7.86M), Erica Hill called Bond one of the country's "strongest voices for justice and equality," and Kristen Dahlgren said that for many, he was "a vital link to the past." Bond: "Like many of you, I was privileged to be here 50 years ago. And like many of you, I am the grandson of a slave."

In a brief report on [ABC World News](#) (8/16, story 9, 0:30, Llamas, 5.84M), Tom Llamas called Bond "a pioneer" and noted that the President called him "a hero who helped change America." The [AP](#) (8/17, Superville) reports that the President said Bond "was a hero and friend," and noted that he and the First Lady "have benefited from Bond's example, counsel and friendship." [Reuters](#) (8/17, Cowan) quotes a statement from the President, which said, "Julian Bond was a hero and, I'm privileged to say, a friend. Justice and equality was the mission that spanned his life. ... Julian Bond helped change this country for the better." [USA Today](#) (8/17, Eversley, 4 95M) notes that Bond praised the President during last month's NAACP convention in Philadelphia, "telling USA TODAY that the president's speech condemning the US criminal justice system showed Obama is 'a path-breaking president and he proved it today.'"

A more than 1,300-word report in the [New York Times](#) (8/17, Reed, Subscription Publication, 12.12M) eulogizes Bond and quotes Rep. John Lewis, who defeated him in a 1986 congressional campaign, as saying in a tweet, "We went through a difficult period during our campaign for Congress in 1986, but many years ago we emerged even closer." Lewis wrote in another message, "Julian Bond's leadership and his spirit will be deeply missed."

The [Atlanta Journal-Constitution](#) (8/17, Leslie, 1.05M) reports on reactions to Bond's death, which "came from all corners of the region and nation Sunday morning." In addition to the President and Lewis, the Journal notes reactions from political and civil rights figures including Georgia Gov. Nathan Deal, Atlanta Mayor Kasim Reed, former Atlanta Mayor Shirley Franklin, the Rev. Jesse Jackson, and the Rev. Al Sharpton, among others.

The [Daily Intelligencer \(NY\)](#) (8/16, Danner, 460K) describes Bond as "one of the giants of the Civil Rights Movement," and on its website, [People](#) (8/16, Carlson, 45.27M) called him "a major figure of the '60s civil rights movement and a tirelessly outspoken voice for change in the decades since," and detailed his "decades of activism and public service." Similar to other reports, the [Huffington Post](#) (8/16, Workneh, 164K) examined Bond's career and noted the expressions of mourning and condolences from political and civil rights figures.

A number of reports this morning consider the current state of race relations in the nation, examining issues ranging from racial profiling by police, to the exclusion of blacks from juries, the impact of the Charleston, South Carolina church shootings on the long-standing policy of openness at black churches, and the declining incomes of blacks with college degrees. [USA Today](#) (8/17, Bolten, 4.95M) examines the "chasm of mistrust between many black lawns and the law officers paid to protect and serve the public," noting that the mistrust "has been further fueled by the recent slayings of unarmed black men by white police officers." USA Today cites a study of racial profiling conducted by the Des Moines Register, which found that of the 23 black lawns it interviewed, "all but one — a black police officer — said they believe the state's law enforcement officers routinely single out minorities for questioning and use their authority as a method of intimidation."

A lengthy piece in the [New York Times](#) (8/17, Liptak, Subscription Publication, 12.12M) reports on the exclusion of blacks from juries across the nation, noting that "a study to be released Monday has found that" in Louisiana's Caddo Parish, "prosecutors used peremptory challenges three times as often to strike black potential jurors as others during the last decade." The finding "is consistent with patterns researchers found earlier in Alabama, Louisiana and North Carolina, where prosecutors struck black jurors at double or triple the rates of others." The Times notes that this fall, the Supreme Court will review a Georgia death penalty case "against a black defendant" in which "prosecutors excluded every black prospective." The Times says the findings "bring fresh attention to a question that has long haunted the American justice system: Are criminal juries warped by racism and bias?"

A separate story in [USA Today](#) (8/17, Pager, 4.95M) says that in the wake of the Charleston, South Carolina church shootings, black churches across the country "must confront their own vulnerabilities without undercutting what lies at the foundation of their faith — an open-door policy meant to create a safe haven in African-American communities." While the "long-standing practice and tradition of the churches, historically at the center of the black community, is to welcome all who want to pray," after the Charleston shootings "black churches contemplated whether the time had come to ask more questions when a stranger arrives."

The [New York Times](#) (8/17, Cohen, Subscription Publication, 12.12M) reports in another story that while a college degree "has long been recognized as a great equalizer, a path for minorities to help bridge the economic chasm that separates them from whites," a report set for release Monday "raises troubling questions about the ability of a college education to narrow the racial and ethnic wealth gap." According to the report, from 1992 to 2013, "the median net worth of blacks who finished college dropped nearly 56 percent (adjusted for inflation)." During that same period, "the median net worth of whites with college degrees rose about 86 percent."

Clay Defends His Response After Ferguson. The [St. Louis Post-Dispatch](#) (8/17, 968K) reports that while friends of Rep. William Lacy Clay, which include "community activists [and] high-ranking White House officials," say he is "a persistent advocate for St. Louis and Missouri's 1st Congressional District and a spark for the Justice Department's investigation of Brown's death," critics "say he has not been visible enough in the community and has too long lived off" the legacy of his father, former Rep. Bill Clay. In the wake of Michael Brown's death and the "sometimes violent aftermath, Lacy Clay has encountered fresh comparisons to his father and renewed questions about his leadership." Clay "defends his response to Ferguson," saying, "I don't regret anything. ... I reached out to the Justice Department through a letter and phone call, asking them to do a parallel investigation. And those results have come back and it certainly has changed the way Ferguson operates as a city."

Sanders Vows To Address Racial Injustice. The [AP](#) (8/17, Thomas) reports that Sen. Bernie Sanders "is making racial injustice a touchstone of his presidential campaign after facing disruptions from activists promoting the Black Lives Matter movement." During a three-day campaign swing through Iowa, Sanders said he would "fight institutional racism, address police brutality and criminal justice reform." Asked on [NBC's Meet the Press](#) (8/16, 3.08M) about an article quoting his campaign as apologizing to Black Lives Matter organizers, Sanders said, "Well, that was sent out by a staffer, not by me. Look, we are reaching out to all kinds of groups, absolutely. I met with people at Black Lives Matter. ... We're reaching out to everybody. On this issue of Black Lives Matter, let me be very clear, the issue they are raising is a very, very important issue. There is no candidate for president who will be stronger in fighting against institutional racism and, by the way, reforming a broken criminal justice system."

GOWDY CALLS FOR INTELLIGENCE IG TO REVIEW CLINTON EMAIL SERVER. [Reuters](#) (8/17, Dunsmuir) reports that House Oversight Chair Trey Gowdy said on Sunday that Clinton's private email server should be examined by the Intelligence IG after the FBI completes its review of it.

Hi Jeremy and Sarah,

Just passing this along per Stephenne's out-of-office message.

Thanks!

Katy

Subject Report highlights the need for protection of lands that are Too Wild to Drill

Hi Stephenne,

I wanted to flag our 2015 *Too Wild To Drill* report that TWS released today. The [Too Wild to Drill](#) place-based report features a half dozen western lands that are facing threats from energy development and asks the Interior Department to protect these treasured places. The new report of *Too Wild to Drill* also highlights a few landscapes from previous reports that have since been protected.

Check out our [press release](#) and [visit the web page](#) for an interactive map, video, and other creative tools you can share and explore.

Please let me know if you need more information on the report.

Best,

Katy

- Desolation Canyon, Utah	10
- Thompson Divide, Colorado	12
- Bears Ears, Utah	14
- Grand Junction, Colorado	16
- A Commitment to Conservation	18

America is home to millions and millions of acres of publicly owned land – shared by all Americans. These lands provide key habitat for diverse species of wildlife, fish and birds. They are where the streams and rivers that quench our thirst and water our crops originate. They are places that provide the energy resources that fuel society. They are the places we visit to hike, camp and escape the hustle and bustle of the modern electronic world.

There are many values to the roughly 640 million acres of federally-owned lands in the United States. This report is about the wildest lands that are most at risk. These lands are in danger of being valued only for the extractive resources under them while ignoring the overwhelming values of what's above. These are the lands that are *Too Wild to Drill*.

Tipping the scales

For generations, the Bureau of Land Management (BLM) has encouraged and incentivized energy development on federal lands. This approach has led to an enormous imbalance in how the BLM governs the lands in its jurisdiction – more than 90% of the lands within its management plans are available to oil and gas leasing. This approach fails to balance the many uses of public land and other values that Americans desire. The BLM's approach has led to some of the wildest places in America being threatened by oil and gas drilling.

Change is coming to the agency. Thanks to reforms started under then Secretary of the Interior Ken Salazar and now continued by Secretary Sally Jewell and BLM Director Neil Kornze, the agency is taking meaningful steps to modernize how western lands are managed.

Protecting a legacy of wilderness

America's wildlands are world-renowned. The creation of the National Park System, about to celebrate its 100th anniversary, is a visionary

example of protecting and preserving American historic and wild places for future generations. From Great Smoky Mountains National Park in Tennessee to the giant redwoods in California, our national parks will continue to weave the stories of those who came before us with those who will explore these same lands in years to come.

In addition to our national parks and monuments, there are millions of acres of American wildlands managed by the BLM and the US Forest Service that still need to be protected for the future. Sagebrush steppes in the intermountain west provide habitat for sage-grouse, mule deer, elk, pronghorn antelope and hundreds of bird species. The Arctic tundra has an equally impressive diversity of wildlife, with everything from Arctic terns to polar bears spending some part of their lifecycle on the coastal plains.

These wildlands are also part of a booming recreation economy. Millions of people flock to wildlands to hike, camp, hunt, fish, bird-watch or participate in many other activities. They stay in nearby towns, eat at local restaurants and buy gear, licenses, supplies and gifts in local stores. Outdoor recreation adds more than \$646 billion to the U.S. economy every year. This economic driver employs millions of people as well – usually in the places closest to the protected wildlands that people are visiting.

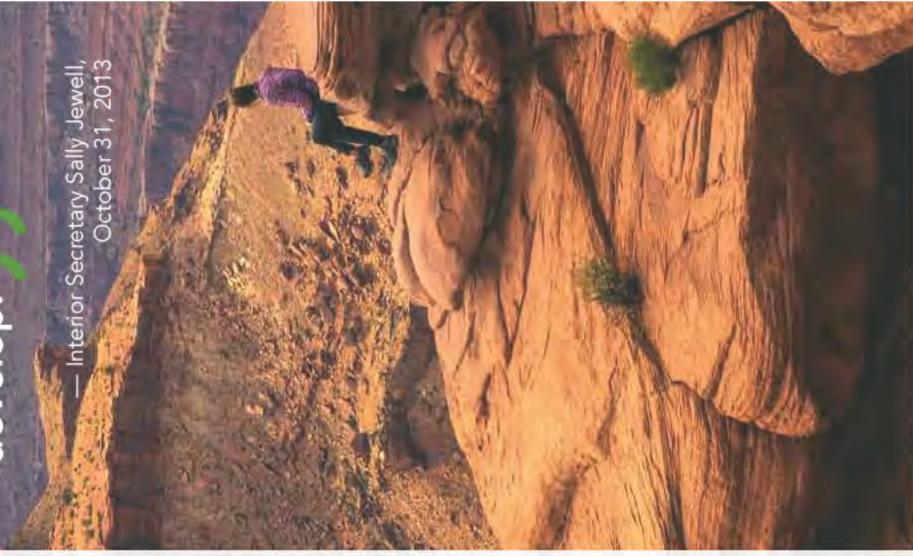

Protecting the landscapes featured in this report will build on the bedrock of conservation and preservation that has shaped American culture since the early 1900s. Modern management approaches and smarter guidelines could help land managers embrace a commitment to conservation. This commitment is needed to restore balance and update the lopsided and antiquated management of our lands.

The best way to protect and conserve these places is for citizens to demand it – and public engagement can make a huge difference. Many places listed in previous *Too Wild to Drill* reports have been protected because citizens advocated for strong conservation.

Some places in America are simply *Too Wild to Drill* and there is a role for everyone to play in protecting these treasures.

Part of the answer is recognizing that there are some places that are too special to develop.

— Interior Secretary Sally Jewell,
October 31, 2013

Successes

Since 1935, The Wilderness Society has worked to protect America's wildest landscapes for future generations. Here are some places that have been featured in previous editions of the Too Wild to Drill report that have been fully protected, thanks to the work of The Wilderness Society, our partners and people like you. The key to success is often local people speaking out about why it is important to protect local areas. Working together, we've protected millions of acres that were once threatened by oil and gas development including the Wyoming Range, the North Fork of the Flathead River drainage in Montana, and these examples:

Roan Plateau

Threatened by oil and gas drilling for years, Colorado's Roan Plateau has a better opportunity for protection thanks to an October 2014 legal settlement for the area. This is great news for the herds of elk and mule deer that call the plateau home, as well as the streams full of cutthroat trout.

In 2008 the area was opened to oil and gas leasing over the objections of The Wilderness Society and others. A 2012 court decision forced the Bureau of Land Management to reconsider the way it was managing the Roan but by then many leases had already been sold. It wasn't until 2014 that a settlement could be reached that would cancel some of the leases and give us a chance to come up with a better plan.

The Wilderness Society will continue working to make sure that the Roan Plateau stays off-limits to drilling in the future.

Rocky Mountain Front

Montana's Rocky Mountain Front, the border between the towering peaks of the Rocky Mountains and the idyllic northern prairie, was protected in late 2006 when Congress voted to set aside 500,000 acres of the Front from oil and gas leasing.

In addition, the area was part of a package of wilderness and other land protection bills passed by Congress in 2014. The newly protected 67,000 acres of wilderness and 208,000 acres of a Conservation Management Area stretches from the edge of the Bob Marshall and Scapegoat Wilderness areas to the rolling prairielands to the east.

The region is a mix of prairie, forest and tundra and stands among the country's most biologically diverse, hosting huge herds of bighorn sheep, migratory elk and mule deer. A coalition of ranchers, local community leaders and sportsmen teamed up with The Wilderness Society and other conservation groups to bring permanent protection to this popular area.

George Washington National Forest

Containing more than 2,000 miles of hiking trails and eight designated wilderness areas, Virginia's George Washington National Forest is definitely Too Wild to Drill. Fortunately, plans released by the Forest Service in late 2014 will prohibit new natural gas leases in the forest and keep drilling out of essential parts of this wild landscape.

Keeping gas drilling out of the wildest parts of the George Washington National Forest will protect the drinking water for the more than 8 million people that live between Washington, D.C. and Richmond, Virginia.

Arctic National Wildlife Refuge, Alaska

Photo by: Lucinda Elze

The Arctic National Wildlife Refuge stretches nearly 200 miles south from the Arctic Ocean, spanning a uniquely diverse range of wilderness landscapes and habitat. Of the 19 million acres included within the refuge, more than 7 million acres are congressionally designated wilderness, the highest degree of protection.

In January 2015, the Obama Administration announced that it was recommending the Coastal Plain and other portions of the Arctic refuge for wilderness designation – and that it would manage these areas to uphold their wild character. This recommendation is particularly important because the Arctic is experiencing impacts from climate change at twice the rate of the rest of the globe.

What's at Risk?

This vast refuge encompasses five distinct ecological regions – from coastal lagoons to windswept alpine tundra all the way to the tall spruce, birch and aspen trees of the northern boreal forest south of the Brooks Range. This varied habitat allows 42 fish species, 37 land mammals, eight marine mammals and more than 200 migratory and resident bird species to thrive – including the most diverse and stunning populations of wildlife in the Arctic.

North of the jagged peaks of the Brooks Range lies the refuge's Coastal Plain that encompasses 1.4 million acres of gently sloping tundra nestled between mountains and sea. The Coastal Plain is the biological heart of the refuge.

The cooling breezes and summer plants of the Coastal Plain provide irreplaceable habitat for the more than 120,000-animal porcupine caribou herd.

“To Gwich'in communities, this is not merely an environmental or conservation issue. Protecting the Coastal Plain of the refuge is about upholding our rights to continue our Native ways of life. ...Do we not have a moral obligation to future generations to do all we can to work toward leaving behind a more vibrant, thriving planet that will sustain human life?”

— Princess Daazhrait Johnson, Former Executive Director of the Gwich'in Steering Committee

The caribou journey hundreds of miles to give birth to their young on the ancient calving grounds of the Coastal Plain. There, calves gain nourishment from tundra plants, refuge from predators, and relief from hordes of midsummer mosquitoes. Typically, one-half to three-quarters or more of the Porcupine Caribou Herd's calves are born within this relatively small area each summer, making it an essential place for the herd's viability.

Included in the refuge boundary is a Marine Protected Area that encompasses coastal islands and lagoons where seals and whales, such as beluga, gray and bowhead, may be seen swimming by on their way to feeding areas. Sea ducks and other waterfowl are found in these lagoons with many migratory birds using both land and marine waters of the refuge. When days shorten and darkness begins to set in, whales and many birds migrate to other parts of the world while the Arctic's year-round residents, such as musk oxen, owls, mink and wolves remain behind. As winter envelopes the Coastal Plain, polar bears, which are listed as threatened under the Endangered Species Act, dig into their dens, birth their cubs and nurse them until spring. The refuge's Coastal Plain includes the most important land denning habitat for polar bears along America's Arctic coast.

Threats to the Arctic National Wildlife Refuge

Keeping such an amazing place pristine and protected seems like an obvious choice; yet, to some members of congress, the Arctic refuge is nothing more than a ripe oilfield waiting to be drilled.

In 2015 alone, more than a half-dozen bills to open the Arctic National Wildlife Refuge to drilling have been introduced – some as standalone measures, and some that are tucked into much larger bills.

With comprehensive energy bills near the top of the congressional to-do list, there is a very real possibility that a provision to open the Arctic National Wildlife Refuge could sneak through.

Protecting the Arctic National Wildlife Refuge

The only way to protect the Arctic refuge is to ensure that efforts to open it to drilling – even exploratory or so-called “safe” drilling – are stopped in their tracks.

The Obama Administration has done virtually everything it can to protect the refuge. The last line of defense may be the stroke of a veto pen.

Photo by: The Strand Agency

On Montana's Rocky Mountain Front, in the heart of the Crown of the Continent, there is a sacred place called the Badger-Two Medicine. The name comes from Badger Creek and the Two Medicine River whose headwaters originate along the Continental Divide. The land of the Badger-Two Medicine and its pure unpolluted waters are at the forefront of a drilling controversy.

What's at Risk?

The 130,000-acre Badger-Two Medicine, managed by the Lewis and Clark National Forest, is part of a larger Traditional Cultural District that under the National Historic Preservation Act requires the Department of the Interior to consult with tribes regarding potential development. Bounded on the northwest by Glacier National Park, on the east by the Blackfeet Indian Reservation, and on the south by the Bob Marshall and Great Bear Wilderness, the Badger-Two Medicine is central to the Blackfeet Tribe's creation stories and their cultural identity. The Blackfeet call the Rocky Mountains running

Photo by: teolyhinum.com

Badger-Two Medicine, Montana

“The Badger-Two Medicine for thousands of years has helped shape the identity of the Blackfeet people. This area has been utilized as a sanctuary for not only the wildlife, but also for our people to come together and realize their spirituality and to be in touch with their creator...These ancient lands are among the most revered landscapes in North America and it should not be sacrificed, for any price.”

— letter from Earl Old Person, Chief of the Blackfeet Nation of Montana to President Barack Obama, March 19, 2015

through British Columbia, Alberta and Montana – the Backbone of the World – and the Badger is known as a place of prayer, fasting and vision questing. A holy place.

The Badger-Two Medicine is also home to grizzly bears and elk, and offers the best remaining habitat for the genetically-pure populations of westslope cutthroat trout along the Rocky Mountain Front. The grasslands, forests and rugged terrain provide secure habitat for wildlife, allowing long-term connectivity and secure migration routes for animals like wolverines. It's also a magnet for hikers, hunters and anglers who visit the Badger-Two Medicine to explore the confluence of peaks and plains, a hallmark of the Rocky Mountain Front.

Much of the Badger-Two Medicine area is roadless, and in 2009, in recognition of the high ecological values and cultural significance, the Forest Service closed nearly all of the area to motorized travel. This roadless forest is the source of the Two Medicine River, which then flows into the Tiber Reservoir, a major source of irrigation water for the state of Montana. Drilling in the area would harm this critical watershed, which is already feeling the stresses of climate change and dwindling snowpack.

Threats to Badger-Two Medicine

The threats facing the Badger-Two Medicine come from decades-old oil and gas leases. In 1981, the Department of the Interior under the Reagan administration began issuing leases in the Badger-Two Medicine without full environmental review and consulting the Blackfeet people, violating laws requiring that they do so. Throughout the 1980s and 1990s battles over the leases were fought in and out of courts, administrative offices and even in the halls of congress.

A 1997 moratorium on oil and gas leasing along the Rocky Mountain Front was followed by a 2006 law permanently withdrawing the Front's public lands (including the Badger-Two Medicine) from all new oil and gas leasing. By 2010, all but 18 of the old leases had been voluntarily relinquished by the leaseholders, but nearly 41,000 acres – all in the Badger-Two Medicine – still remain as a constant reminder of the area's vulnerability to drilling.

Now the threat to the Badger-Two Medicine has been awakened – the Solenex energy company,

based in Louisiana, has filed a lawsuit claiming that the suspension of its original leases from 1981 must be lifted and the company allowed to drill. Solenex's Hall Creek lease lies in the heart of the Badger-Two Medicine and literally on the doorstep of Glacier National Park. All that separates the national park from the area that Solenex wants to develop is a two-lane highway. With climate change from fossil fuel use already melting away many of the national park's glaciers, allowing oil drilling to take place right next door is just adding insult to injury.

Protecting Badger-Two Medicine

Because the leases were improperly issued and violate key environmental laws such as the National Environmental Policy Act and the Endangered Species Act, the Department of the Interior has the legal authority and moral obligation to cancel the remaining federal oil and gas leases in the Badger-Two Medicine.

The people of the Blackfeet Nation are leading the charge in this effort and have the support of 19 tribes, including the Crow, Shoshone and Sioux, as well as the National Congress of American Indians. Jon Tester, Montana's senior senator, also supports the call to rid the Badger-Two Medicine of the leases. The Wilderness Society and other conservation groups, along with hunters, anglers and local community leaders, support the Blackfeet's request that Department of the Interior Secretary Sally Jewell, Department of Agriculture Secretary Tom Vilsack (who oversees the U.S. Forest Service) and the Obama Administration cancel the leases. Now is the time to protect the Badger-Two Medicine.

Desolation Canyon, Utah

Few areas outside of Utah's most well-known national parks look as perfectly Utah as Desolation Canyon. Rapids roar past red rock sandstone carved across millennia by the Green River through the rafters' paradise of Desolation Canyon. Cottonwood trees and wildlife populate the sandy beaches throughout the canyon. But the threat of drill rigs and well pads still threaten to mar this picture perfect part of Utah.

Will over 200 oil and gas wells ruin the quiet, rugged wilderness of Desolation Canyon? Or will it remain *Too Wild to Drill?*

What's at Risk?

Desolation Canyon is one of the premier rafting destinations in Utah – so vast and secluded that the Utah tourism website proudly exclaims: "Desolation and Gray Canyons are too extensive to be rafted in a single day."

Historical remnants abound throughout the Desolation Canyon area. American Indian petroglyphs and artifacts can still be found in the surrounding wildlands, and notorious outlaws Butch Cassidy and the Sundance Kid frequented the area to trade for horses during their criminal days.

Recreation is a key industry in Utah – bringing in more than \$12 billion in economic activity to the state and providing for more than 122,000 jobs.

More than a dozen rafting guide services take people through Desolation Canyon, and hundreds more people take unguided trips through the canyon. All of these visits generate economic activity in the towns bordering Desolation Canyon – visits to restaurants, gear stores and the other businesses that cater to river runners before and after their trips.

But it's the lands of the Desolation Canyon region that are most at risk from oil and gas drilling. The area around Desolation Canyon has some of the most prized wilderness-quality lands in the lower 48 states that are still open to oil and gas drilling. There are an estimated 700,000 acres of wilderness-quality

lands in the area – lands so wild that they qualify for protection under the 1964 Wilderness Act.

Areas outside of the Desolation Canyon complex have already been heavily developed – making the need to protect this wild slice of Utah even more important.

Photo by: Ray Blokhum, Southern Utah Wilderness Alliance

Threats to Desolation Canyon

In 2012, the BLM approved an oil and gas company's plans to develop the lands in and around the Desolation Canyon region. This plan allowed for more than 1,300 oil and gas wells – with more than 200 around the wildest parts of the Desolation Canyon area.

Sprawling development surrounding Desolation Canyon would fragment the wilderness-quality lands in the area – leaving islands of remote wilderness between pipelines, wellheads and access roads across previously untouched areas.

Pollution would also threaten Desolation Canyon. Smog and other air pollution already run rampant throughout eastern Utah, especially in the winter. Additional development would only make these problems worse, threaten the health of local communities and degrade the wild experiences of the rafters and other visitors to Desolation Canyon.

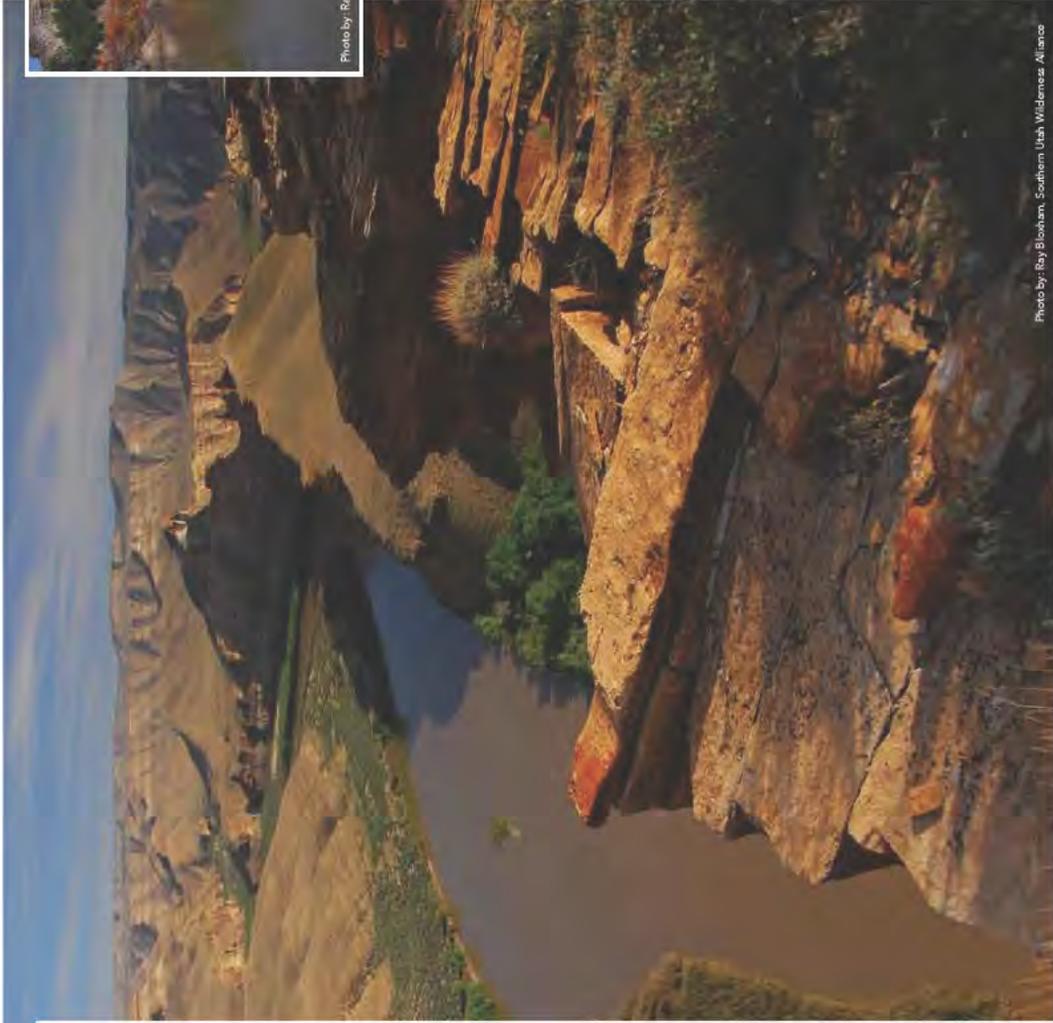

Protecting Desolation Canyon

There are several options for protecting the wilderness, cultural resources and amazing recreational experiences of Desolation Canyon.

The most straightforward would be for the BLM to prevent drilling on the 200 wells around the wildest parts of Desolation Canyon. This is clearly within the BLM's authority and would show that the agency truly does have a commitment to conservation even if it didn't achieve it in its 2012 decision.

The court system could also help. The Wilderness Society is part of a legal challenge to the BLM's drilling plan in court, and a favorable ruling could mean that Desolation Canyon will be protected from oil and gas drilling, but only legislation can protect this place forever.

Thompson Divide, Colorado

One of Colorado's crown jewels, the Thompson Divide in the White River National Forest is a sublimely wild slice of the American west. Encompassing nearly 220,000 acres of mountain peaks, clear trout streams, abundant wildlife and endless aspen groves, the Thompson Divide is definitely *Too Wild to Drill*.

Unfortunately, 25 leases were illegally granted more than a decade ago, and oil and gas drilling now threatens Thompson Divide.

Despite broad community support from the area's residents, ranchers, hunters and anglers for protecting this area, these leases – and the fate of the Thompson Divide – remain in limbo.

What's at Risk?

Hikers, campers, hunters and anglers flock to the Thompson Divide from across the country for wildlife and a remote back-country experience. Even President Theodore Roosevelt trod the trails through the Thompson Divide back in 1905, calling it "a great, wild country ... where the mountains crowded together in chain, peak, and tableland; all of the higher ones wrapped in an unrent shroud of snow."

The Thompson Divide is critical to the local economy, providing nearly 300 jobs in the hunting,

fishing, grazing and outdoor recreation industries and contributing \$30 million to the region's economy every year. Whether hiking or biking, climbing, hitting the Nordic ski area outside of Carbondale or snowmobiling the Sunlight to Powderhorn trail, there is something for practically every type of outdoor enthusiast in the Thompson Divide.

Wildlife is abundant in the region. Elk, black bear, bighorn sheep and even rare Canada lynx can be found in the Thompson Divide's valleys and sub-alpine meadows. Rare birds also make their way through the area, including the rarely seen black swift and speedy peregrine falcon.

All of that wildlife is a huge draw for hunters from across the nation. The Thompson Divide is part of one of the most sought-after hunting permits in the state of Colorado, with just three hunting areas accounting for 20,000 hunting licenses. Anglers flock to Thompson Divide to fish for native cutthroat trout in the cold mountain streams that feed the gold-medal Roaring Fork River.

Cattle ranching is also important in the area and could be negatively impacted by leasing. Nearly three dozen grazing allotments provide crucial summer forage for local cattle herds. Those grazing areas don't just benefit cows though. Throughout the cold months, elk and mule deer come down from the mountains to winter retreat in the area.

Threats to the Thompson Divide

In 2003, the Bush administration sold a set of 25 oil and gas leases in the Thompson Divide. These leases were sold for the statutory minimum – \$2 an acre – and the BLM has acknowledged that they were issued without the legally required environmental review or protection for roadless areas.

If the leases are allowed to be developed, substantial and irreversible changes will impact the Thompson Divide. Pipelines and access roads would dissect the land, disrupting the wildlife and cattle. Nearby landowners and towns would have little recourse to stop or mitigate the new industrial activities and associated noise and pollution that would move in next door.

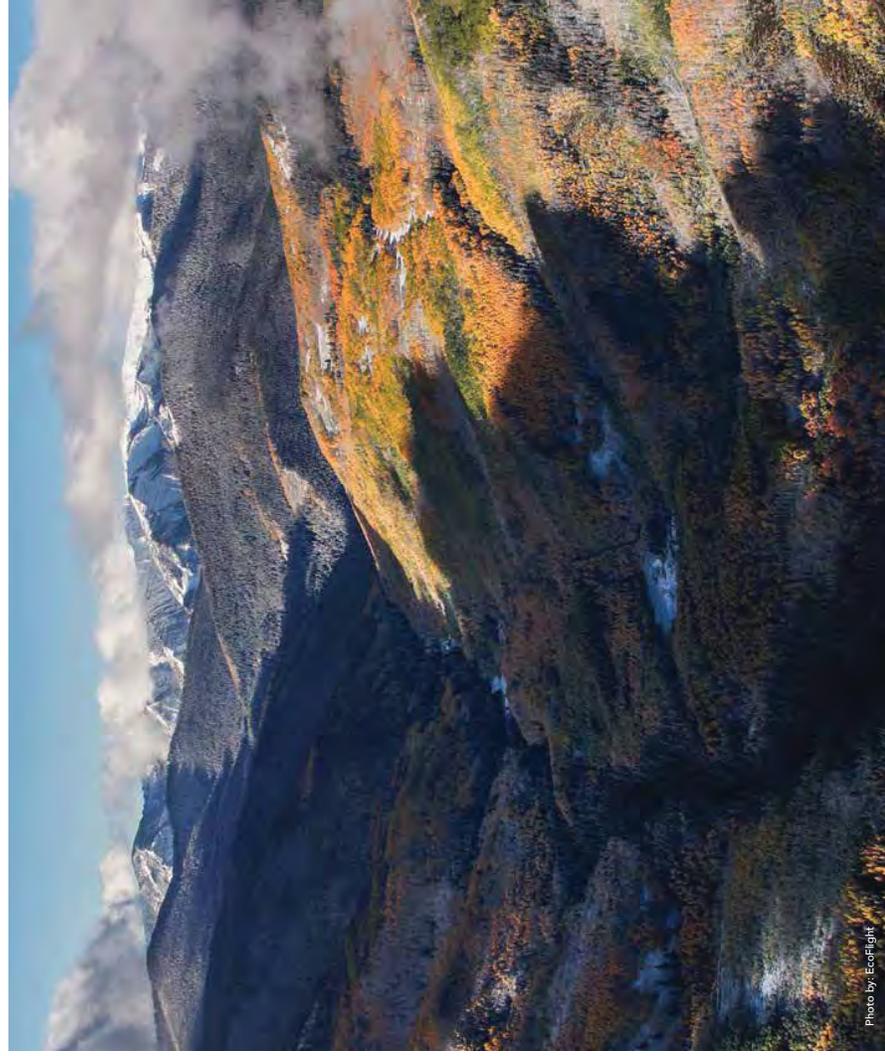

Protecting the Thompson Divide

There are multiple efforts underway to protect the Thompson Divide. At the federal level, the U.S. Forest Service, which manages most of the area, released a management plan that prevents future leasing in large portions of the Thompson Divide for the next 20 years – but it doesn't protect the entire area nor stop development on existing oil and gas leases.

The BLM, which oversees the 25 illegally issued leases, is reviewing those leases, and could ultimately void them, modify their terms or leave

them in place. The local community has spoken out strongly in favor of voiding the leases.

Currently, the BLM's efforts, as well as several community-led initiatives to find solutions for the Thompson Divide, are being considered. The BLM could decide to cancel the illegally issued leases as part of its current reevaluation. Other plans would involve action from congress. Legislation to permanently withdraw lands in the Thompson Divide from future leasing and allow the existing leases to be retired or bought out was introduced in the last congress and members of Colorado's delegation are working on reintroducing the bill this year.

Bears Ears, Utah

Significant cultural resources, forested plateaus, narrow slot canyons and grand vistas are just a few of the hallmarks of the Bears Ears region of southeast Utah. Named for the two buttes that rise up from the Elk Ridge plateau, Bears Ears is a region rich with Native American cultural sites, wildlife habitat and amazing recreation opportunities.

However, the threat of oil and gas drilling, potash, tar sands and uranium mining loom over this region – one of the most significant, unprotected cultural landscapes in the nation.

What's at Risk

Cultural resources and outdoor recreation are two of the biggest draws of the area. Home to more than 100,000 cultural and historic sites, many of them still undisturbed, Bears Ears contains irreplaceable Ice Age hunting camps and cliff dwellings, prehistoric villages and rock art panels of ancestral Puebloan peoples.

For Native American tribes, the region is vital to the cultural and ceremonial lives of their people as a place for hunting and collecting traditional foods and medicines. This place remains vibrant and alive as a center of subsistence, spirituality, healing and contemplation for tribes of the Colorado Plateau.

For the outdoor enthusiast, the opportunities are endless in the Bears Ears region. Rock climbers can test their skills on world-class pitches along Indian Creek and Harts Draw. Hikers experience unparalleled solitude throughout the region, exploring the towering red rock of Hammond, Woodenshoe and Fish and Owl Canyons. Rafting on the San Juan and Colorado Rivers in the region offers everything from mild to wild, with chances to view desert bighorn sheep along the way.

For shutterbugs, the region is packed with amazing views, both vast and intimate. The Valley of the Gods in the southeastern part of the area hosts a number of diverse photo opportunities of striking red rock monoliths. Grand Gulch and Fish and Owl canyons feature steep, sheer cliffs, loaded with archeological sites. The overlooks of the San Juan River feature mesmerizing world-class views.

Threats to Bears Ears

Despite the wealth of cultural resources and recreation opportunities, extractive industries are pushing to exploit Bears Ears region. Now, oil and gas development, uranium and tar sands mining, looting of cultural sites, careless visitation and irresponsible off-road vehicle use all threaten to destroy the area.

Oil and gas companies are pressing to explore the region, and leases have previously been sold in Lockhart Basin, on the doorstep of Canyonlands National Park. Drilling in these areas would seriously degrade these landscapes, while impairing neighboring Canyonlands National Park with increased heavy truck traffic, dust, noise and air pollution. Light pollution associated with

new development also threatens the region's night skies – which are currently some of the darkest in the lower 48 states.

Without permanent protections for the area, the region could fall victim to the dirty mining required to extract the even dirtier tar sands oil from the ground.

Protecting Bears Ears

Given the variety of cultural values and spectacular wilderness in the Bears Ears region, it is clear that the area needs permanent protection. A total of 24 tribes so far, including Navajo, Hopi, Ute, Hualapai, Zuni and other Pueblo tribes all support permanently protecting the 1.9 million acres of the Bears Ears region. Many tribes have also passed resolutions for permanent protection of the region and have urged

the Obama Administration to consider the region for monument designation.

The tribes have proposed that the region be permanently protected for its rich cultural and natural values, and many have cited their individual tribal interests and ties to the region. Preserving the cultural and historic sites and wilderness values of Bears Ears, as well as ensuring access for traditional activities like ceremonies and collection, are key goals in protecting the area. Tribes are unique and key stakeholders in the process of protection, and have asserted their strong interest in cooperating in the management of the lands of the region.

Efforts are being made to craft legislation to protect the region, but if a legislative solution can't be found, a national monument proclamation by the president will ensure that these valued treasures are protected forever.

Grand Junction, Colorado

Colorado's western slope near Grand Junction is an absolute treasure trove of canyon complexes. From the banks of the Dolores River to the hoodoo-filled South Shale Ridge, there is no shortage of diversity in the region's landscapes.

Unfortunately, the BLM is poised to finalize management decisions that will leave a looming threat of oil and gas drilling and unchecked off-road vehicle use through some of the wildest areas.

What's at Risk?

The Grand Junction area is an outdoor enthusiast's dream – if you can do it outside, you can do it around Grand Junction. Hiker? Check out Bangs Canyon, just miles from downtown Grand Junction, where the only crowds you'll find on the Unaweep trail through the canyon are the bighorn sheep that frequent the area. Biker? The mountain biking mecca of Fruita is home to miles of trails – some of the best in the nation. Angler? Get ready to chase native Colorado River cutthroat trout in Carr Creek, near Brush Mountain. Birder? Head to Granite Creek and keep your eyes peeled and binoculars ready to spot Mexican spotted owls, western burrowing owls, southwest willow flycatchers, whooping cranes and even peregrine falcons and bald eagles. Just like taking in the scenery? The area is rich with wide open vistas and wildlife.

Research and exploration by The Wilderness Society and other citizen-scientists have identified more than 400,000 acres of wilderness caliber lands throughout the region. These include areas with unparalleled solitude in addition to stunning recreation opportunities. They are also key habitat for wildlife – elk, mule deer, black bears and many different migratory birds.

These are just a few examples of the incredible wealth of opportunities in the Grand Junction area. But while the opportunities to enjoy the outdoors are bountiful, so are the threats to these experiences.

Threats to Grand Junction

With so many opportunities to get away from it all around Grand Junction, it's hard to imagine that industrialization could threaten such a collection of wild landscapes. Unfortunately, oil and gas drilling and motorized vehicle use already threaten the peace and quiet of the region.

In April 2015 a proposed Resource Management Plan from the BLM for the Grand Junction region, including areas like Bangs Canyon, Book Cliffs, Kings Canyon, Carr Creek and many other wild places, was put forward. Disappointingly, this plan left many wilderness-quality lands open to potential oil and gas leasing and off-road vehicle use, which would seriously degrade trails and wildlife habitat. Equally disappointing, the BLM failed to acknowledge the hundreds of thousands of acres of wilderness-quality lands identified by citizens.

The BLM's plan would only protect 44,000 acres of the "lands with wilderness characteristics" (the agency's term for wilderness-quality lands), while making nearly a million acres available to oil and gas leasing.

Leaving so much land open to development and exploitation threatens many of the landscapes listed above. Kings Canyon, with its cliffs that rise 1,000 feet above the Little Dolores River like the parapets of an enormous castle, could see its wild qualities destroyed underneath ATV tires and heavy oil trucks.

The overall plan lacks a commitment to conservation that the BLM must make in order to protect wild places like those in the Grand Junction region. Oil and gas drilling in some of these places would destroy the peace and quiet, disturb birds and wildlife, and cause air pollution in some of Colorado's wildest landscapes.

Protecting Grand Junction

The BLM hasn't finalized the Grand Junction plan – although it will happen later this year. In the meantime, The Wilderness Society is pushing the BLM to reconsider protective management for wilderness quality lands. The BLM needs to follow its own policies and recognize these spectacular wild acres as "lands with wilderness characteristics," ensuring they remain wild. With the wealth of wilderness lands around Grand Junction, it's clear that more of them deserve to be protected.

All photos by Bob West, BLM

A Commitment to Conservation

For generations, the Bureau of Land Management held a single-minded approach to managing the 245 million acres under its purview. Despite a legal obligation to manage its lands for multiple uses, like recreation, wildness, wildlife habitat and other values, the BLM management almost always defers to energy interests – specifically by making 90% of its lands available for polluting energy sources like drilling for oil and natural gas, as well as mining coal.

A commitment to conservation means ensuring a balanced approach to energy development and conservation on federal lands. Guiding energy development – both fossil fuels and renewable energy like wind and solar – to places with fewer conflicts and protecting areas that are better suited for other uses should be the goal.

Energy development often industrializes the landscape and converts it to a single use. When the BLM approves energy development it needs to demonstrate its commitment to conservation too, protecting natural and recreational values with administrative designations and updated policies that move our country forward on a smarter path. By taking a landscape-level approach that protects watersheds and wildlife habitat, the agency can better balance energy development and conservation of our public lands.

During the past few decades the public expectation of how public lands should be managed has changed and more people are looking to public lands for recreation or wildlife values. Recent surveys have also shown broad support for modernizing outdated policies and guidelines that fail to recognize the many values of our land. It is time for the BLM to catch up with the public's desires.

Smarter leasing plans have begun to be implemented in some BLM field office, decisions, and now it is time for the agency as a whole to embrace the concept.

How the BLM Can Commit to Conservation

South Park – Colorado: A great opportunity for the BLM to demonstrate a commitment to conservation is in Colorado's South Park area. This area, part of eastern Colorado's Royal Gorge Field Office, is less than two hours from downtown Denver, nestled in the mountains of the Front Range.

The BLM is in the beginning stages of developing a new Resource Management Plan for the field office, and as part of that process the agency is considering a Master Leasing Plan for the South Park area. A Master Leasing Plan is the right approach to ensure South Park has a guided plan for leasing, drilling, and most importantly, conservation, which will govern the activities in the area.

Showing a commitment to conservation in South Park must include dosing some areas to oil and gas leasing as part of a balanced management plan. The public lands surrounding the James Mark Jones State Wildlife Area have important wilderness character and wildlife habitat and should be protected from oil and gas development. Places such as Reinecker Ridge provide abundant opportunities for backpacking, wildlife viewing, horseback riding, snowshoeing and photography in the backyard of a thriving metro area.

The BLM should also commit to conserving the way of life for Park County residents. The local community is working together to advocate for a Master Leasing Plan that protects their water, land and heritage for future generations, and this is an important opportunity for the BLM to make sure that happens.

Examples of Committing to Conservation

National Petroleum Reserve – Alaska: On the western side of Alaska's Arctic lies the National Petroleum Reserve – Alaska (NPR-A). While the name makes it sound like one big oilfield, it is a large wild place – at 23 million acres it is ten times the size of Yellowstone National Park.

In 2012 the Department of Interior announced its plan for managing the NPR-A. The legislation that

created the NPR-A called for "Special Areas" to be protected, areas important for caribou migrations and waterfowl nesting areas. The BLM issued a landscape-level plan that protected 11 million acres of key wildlife and waterfowl habitat, while making more than 70 percent of the economically recoverable oil and gas reserves available to leasing. The BLM's plan conserved critical areas like the bird nesting mecca of Teshekpuk Lake, and habitat for thousands of migrating caribou. This kind of smart planning and balance is a perfect example of committing to conservation and should be replicated across the nation – not just in Alaska.

Dinosaur Trail: In March 2015, one of the first Master Leasing Plans was put in place by the BLM in northwest Colorado's White River Field Office. This Master Leasing Plan covered the area south of Dinosaur National Monument, and will protect more than 140,000 acres of "Lands with Wilderness Characteristics" so that they stay pristine. These acres are home to imperiled sage-grouse, pronghorn antelope and herds of mule deer that have been threatened by oil and gas development.

For some of the areas that are open to leasing, the BLM is committing to "phased leasing" – ensuring any drilling in the area is done gradually to reduce the possibility of air pollution and disturbance to wildlife and wildlands.

The Dinosaur Trail MLP is another example of the BLM showing what a strategic commitment to conservation looks like in practice.

Deseret News//Interior Secretary Sally Jewell's favorite Utah hikes

Secretary of the Interior Sally Jewell, former CEO of the outdoor retailer REI, made a recent visit to Salt Lake City and discussed significant issues with the Deseret News, including the possibility of a national monument designation in Utah, the potential listing of the sage grouse as an endangered species, public lands initiatives, and the impacts of fracking technology on environmental and energy concerns.

But we also asked another question: Secretary Jewell, what are some of your favorite hikes in Utah?

Here are her answers.

DOI in the News:

PRESIDENT OBAMA DESIGNATES NEW IDAHO WILDERNESS REGION. [McClatchy](#) (8/8, Clark, Baccellieri, 28K) reports President Obama on Friday "signed legislation creating three new wilderness regions in Idaho." The legislation "sets aside 275,665 acres of land" that will be distributed into three distinct areas: "the Hemingway-Boulders Wilderness, the White Clouds Wilderness and the Jim McClure-Jerry Peak Wilderness."

Also providing coverage is the [AP](#), the [Spokane \(WA\) Spokesman-Review](#) (8/7, 183K), the [Spokane \(WA\) Spokesman-Review](#) (8/9, 183K), the [Elko \(NV\) Daily Free Press](#) (8/10, 22K), the [Boise \(ID\) Weekly](#) (8/10, 103K), the [UPI](#) (8/7), [WBAL-AM Baltimore \(MD\)](#) Baltimore (8/10, 12K), and [WIMS-AM South Shore \(N\)](#) South Shore, IN (8/7).

SECRETARY JEWELL TALKS ABOUT FAVORITE UTAH HIKES. Interior Secretary Sally Jewell told the [Deseret \(UT\) News](#) (8/10, 549K) about her "favorite hikes in Utah." Jewell's top picks were Mount Timpanogos, Zion's Narrows, Delicate Arch, and The Wave.

REP. SIMPSON PUSHES WILDFIRE DISASTER FUNDING ACT. The [Christian Science Monitor](#) (8/8, Knickerbocker, 455K) reports that "fire borrowing" was "politically and economically tolerable when there were fewer such fires (especially in the West, where most such wildland conflagrations occur) and the budget for fire-fighting covered at least most of the cost." However, "in recent years, as drought conditions continued to increase – exacerbated, many experts say, by climate change – and homebuilding and other development pushed into what's called the 'wildland-urban interface,' the budgeting situation worsened." Rep. Mike Simpson is "the lead sponsor of the Wildfire Disaster Funding Act, a bill that would treat catastrophic wildfires like other natural disasters (floods, hurricanes, tornadoes, etc.), funding suppression of such fires through emergency disaster programs."

Additional coverage of wildfires was provided by the [National Geographic](#) (8/10, 31 65M), the [San Bernardino \(CA\) Sun](#) (8/9, 142K), the [Arizona Republic](#) (8/8, 1.12M), [Reuters](#) (8/9, Schwartz), [Reuters](#) (8/8, Dobuzinskis), the [Missoulian \(MT\)](#) (8/10, 116K), the [Flathead \(MT\) Beacon](#) (8/9, 15K), the [Houston \(TX\) Chronicle](#) (8/10, 2.28M), [Elko \(NV\) Daily Free Press](#) (8/10, 22K), the [Havasupai \(AZ\) News-Herald](#) (8/10, 27K), the [Las Vegas \(NV\) Sun](#) (8/9, 199K), the [Albuquerque \(NM\) Journal](#) (8/10, 259K), the [Durango \(CO\) Herald](#) (8/6, 28K), [KTVZ-TV Bend \(OR\)](#) Bend, OR (8/10, 32K), [KNXV-TV Phoenix \(AZ\)](#) Phoenix (8/10, 103K), [KTAR-FM Glendale \(AZ\)](#) Glendale, AZ (8/8, 17K), and [KTVN-TV Reno \(NV\)](#) Reno, NV (8/10, 3K).

CENTURY CONSERVATION SERVICE CORPS ACT OF 2015 UNVEILED. The [Greenwire](#) (8/7, Subscription Publication) reports that bipartisan Senate legislation unveiled last week "aims to bolster the ranks of groups descended from the New Deal-era Civilian Conservation Corps by streamlining their collaborations with federal agencies." The "21st Century Conservation Service Corps Act of 2015," S. 1993, from Sens. John McCain and Michael Bennet, would "enable certain federal departments and agencies more easily to hire youth service organizations without increasing federal spending." McCain said, "While more and more young people each year are applying for service opportunities, they are being turned away – even as our federal agencies could use their help to complete a growing backlog of critical projects."

Additional coverage was provided by the [Pagosa \(CO\) Daily Post](#) (8/7).

NATIONAL MONUMENT DESIGNATION TRANSPARENCY ACT INTRODUCED. The [Examiner](#) (8/10, 1.34M) reports that Rep. Devin Nunes has "introduced the National Monument Designation Transparency Act (H R. 3389), which would require new procedures for designating national monuments." According to the article, "the bill would require the president to give notice to Congress as well as the governor of a state and the chief elected official of each unit of local government that a proposed monument would be located in," and "such notice would have to come at least 30 days before any proposed designation." The legislation was referred to the House Committee on Natural Resources.

SIX ARRESTED IN SERIES OF SOUTHERN NEVADA POLICE CAR RAMMINGS. The [AP](#) (8/10, 2.28M) reports that "Las Vegas police officers say six people have been arrested after several law enforcement vehicles were intentionally rammed with stolen cars over the past few months." According to authorities, "they identified the suspects on Friday and found stolen guns, motorcycles and vehicles when they served search warrants at six locations in southern Nevada." The article notes that "police have been investigating since April 29, when a federal Department of the Interior K9 vehicle was rammed and a nearby home was damaged."

ADDITIONAL COVERAGE SECRETARY JEWELL VISITS ALASKA VILLAGE TO RAISE AWARENESS OF CLIMATE CHANGE'S IMPACT. The [Public Radio International](#) (8/9, 3K) reports that "scientists estimate that due to climate change, the village of Kivalina, in northwestern Alaska, will be underwater by the year 2025." The article notes that Interior Secretary Sally Jewell visited Kivalina earlier this year. Her visit was "intended to raise awareness of Kivalina's plight and to highlight that in the coming decades numerous other towns along US coastlines may face the same problem."

ADDITIONAL COVERAGE OF CREATION OF RESILIENT LANDS AND WATERS PARTNERSHIPS. The [Indian Country Today Media Network](#) (8/7, 32K) reports that "President Barack Obama is stepping up efforts to combat climate change as he nears the end of his second and last term, with tribes among the beneficiaries of new policies and grants." As an example, the article notes that "in June several federal agencies got together on a joint initiative, to create partnerships across the country. The Department of the Interior (DOI), Department of Agriculture (USDA), Environmental Protection Agency (EPA), National Oceanic and Atmospheric Administration (NOAA), and the U.S. Army Corps of Engineers (USACE) on June 24 announced the creation of the Resilient Lands and Waters partnerships: the California Headwaters, California's North-Central Coast and Russian River Watersheds, the Colorado Plateau, the Florida Everglades, the Great Lakes, the Gulf of Mexico, the Hawaiian Islands, the Mississippi River, the Pacific Northwest, the Rocky Mountain West, the Southeastern United States, the Southwest, the Tennessee River, the Upper Midwest, the Virginia Piedmont, the Washington Coast, the Wisconsin and Michigan Great Lakes, and the Yellowstone and Snake River Basins."

the Everglades, climate change threatens many of our treasured landscapes, which impacts our natural and cultural heritage, public health and economic activity. The key to making these areas more resilient is collaboration through sound science and partnerships that take a landscape-level approach to preparing for and adapting to climate change.”

ADDITIONAL COVERAGE SECRETARY JEWELL LAUNCHES YOUTH OUTDOOR INITIATIVE IN SALT LAKE CITY. Additional coverage of Salt Lake City’s inclusion “in a national initiative to connect children with nature” was provided by [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (8/10, 1.07M).

SEN. LEE CALLS FOR SUPPORT OF ANTIQUITIES MODERNIZATION ACT. In an op-ed for the [St. George \(UT\) Spectrum](#) (8/7, 46K), Sen. Mike Lee writes that he has introduced the Antiquities Modernization Act in the Senate to “both preserve the original Antiquities Act intent by continuing the president’s power to designate monument sites that need protection, while also giving local communities a say in the process.” According to Lee, “this legislation would both end top-down Washington land grabs and encourage a new ground-up, open, and public process that maximizes input from all the stakeholders involved.” He argues that “public lands management always works better when local, state, and federal government agencies work together.”

WSJOURNAL ADMINISTRATION MUST HOLD OPM ACCOUNTABLE FOR SECURITY BREACH. In an editorial, the [Wall Street Journal](#) (8/8, Subscription Publication, 6.06M) urges the Administration to hold individuals accountable following the Office of Personnel Management security breach, rather than interfering with the work of the OPM’s Inspector General, who this week said his investigation was being hampered.

Empowering Native American Communities:

SEN. MORAN’S BILL WOULD REAFFIRM TRIBAL CONTROL OF LAND. The [Topeka \(KS\) Capital-Journal](#) (8/9, 109K) reports that “millions of acres of land obtained by the federal government on behalf of Native American tribes would be affected by legislation introduced last week by U.S. Sen. Jerry Moran.” Moran, “a Republican member of the 14-member Senate Indian Affairs Committee, introduced S. 1931 on Tuesday.” The legislation would “reaffirm that land taken into trust for tribes since 1934 can be utilized by those tribes.”

PANEL SETTLES ALASKA TRIBAL LEADERSHIP DISPUTE. The [AP](#) (8/8, Rachel D’oro |, Ap, 6.76M) reports that “a federal appeals panel has sided with the new leaders in a tribal power dispute that has stalled efforts to relocate a badly eroded village in western Alaska.” The Interior Board of Indian Appeals “stepped in to review a 2013 ruling by a Bureau of Indian Affairs official that determined the sitting tribal council no longer represented the Yup’ik Eskimo community of Newtok for bureau funding purposes.” The appeals board said in “its Thursday decision that the old faction failed to submit any evidence in support of ‘its own claim of continuing authority.’”

Additional coverage was provided by the [Alaska Public Radio Network](#) (8/7, 2K).

YOUTH WORKING WITH WIND RIVER CONSERVATION PROGRAM. The [County 10](#) (8/7) reports that “the Wind River Conservation Program has been working with a bunch of local youth on great community service projects in and around the Wind River Indian Reservation.” According to the article, “some of the work has been done in conjunction with the Bureau of Land Management and the U.S. Forest Service.” The article notes that “this is the first year of the program, which is funded by a \$153,000 Bureau of Indian Affairs Forestry Youth Incentive grant.”

NATIVE AMERICAN CONSERVATION CORPS WORKS IN GRAND CANYON. The [Arizona Republic](#) (8/8, 1.12M) reports on a team of six young Hopi and Navajo crew members working in Grand Canyon National Park through the Ancestral Lands Conservation Corps. According to the article, “team members had been living and working on the rim and in the inner canyon since May, repairing trails and doing various manual labor projects.” The article notes that “perhaps most importantly, they were serving as ambassadors for Native American culture whenever they encountered curious tourists.”

BILL WOULD EXPEDITE TRANSFER IN OWNERSHIP OF KENNEWICK MAN. The [Greenwire](#) (8/7, Subscription Publication) reports that Sen. Patty Murray has “introduced a bill to expedite the return of an ancient skeleton to Northwest American Indian tribes that have been demanding the return for almost two decades. Kennewick Man, or the Ancient One, as the skeleton is known to the tribes requesting repatriation, has been at the center of a bitter fight between Native Americans, federal officials and researchers since it was found on a bank of the Columbia River near Kennewick, Wash., in 1996.” S. 1979, the “Bring the Ancient One Home Act,” seeks “to transfer ownership of the bones from the Army Corps to the Washington State Department of Archaeology and Historic Preservation in hopes the state agency’s more efficient repatriation process can see the return through.”

GOV. WALKER URGED TO DROP STATE’S APPEAL IN TRIBAL TRUST LAND CASE. In an op-ed for the [Juneau \(AK\) Empire](#) (8/9, 15K), Richard Peterson, president of the Central Council of the Tlingit and Haida Indian Tribes of Alaska, urges Alaska Gov. Bill Walker to “drop the state’s appeal in *Akiachak Native Community v. Department of the Interior* before the end of August.” He argues that “the state of Alaska’s fear of tribal trust land is unfounded.” Peterson concludes that “tribal acquisitions of land in trust should be welcomed — it is good for everyone.”

Office of Insular Affairs:

OIA PROVIDES \$2.1 MILLION TO USVI FOR SCHOOL MAINTENANCE. The [St. Croix Source](#) (8/7) reports that “the U.S. Office of Insular Affairs will provide \$2.1 million to the U.S. Virgin Islands Department of Education for school maintenance, Delegate Stacey Plaskett announced Thursday.” Plaskett said, “The Department of Interior and Assistant Secretary for Insular Areas Esther Kia’aina has released more than \$2 million in grant funding to the Department of Education for maintenance to the territory’s school. As we all know, the schools in our territory are in dire need of repair and most of them, quite frankly, need to be rebuilt.” The article notes that “the grant funding is part of OIA’s Insular Assessment of Buildings and Classrooms (ABCs) Initiative.”

Additional coverage was provided by the [Virgin Islands Consortium \(VIR\)](#) (8/10).

Tackling America’s Water Challenges:

CALIFORNIA EMERGENCY DROUGHT RELIEF ACT INTRODUCED. The [Lexology](#) (8/10, 5K) reports that Sen. Dianne Feinstein “introduced a bill last week to help address ongoing and future drought in California.” The legislation, “known as the California Emergency Drought Relief Act (Act), is expected to be folded into broader legislation addressing the historic drought in the Western United States.” The article notes that “the bill’s goals are to move existing water supplies and develop new water sources in order to help those communities suffering the worst effects of the drought, while complying with the existing regulatory regime under the Endangered Species Act and the Clean Water Act.”

In an editorial, the [Sacramento \(CA\) Bee](#) (8/10, 535K) says that the measure “includes plenty to embrace, not the least of which is that it offers \$1.3 billion for California’s water system, an important though modest sum in this large and thirsty state.”

COLORADO RIVER UNDER STRAIN. The [Albuquerque \(NM\) Journal](#) (8/10, 259K) reports that the Colorado River is “suffering from a historic drought that has exposed the region’s dependence on a single, vulnerable resource.” According to the article, “the drought, now in its 16th year, has made one fact brutally clear: The Colorado cannot continue to meet the current urban, agricultural, hydroelectric and recreational demands on it – and the point at which the river will fall short could come sooner than anyone thought.” The article notes that “in the decades to come, federal officials say, significant shortages are likely to force water-supply cutbacks in parts of the basin – the first in the more than 90 years that the river has been managed under the 1922 Colorado River Compact.”

Meanwhile, the [Arizona Daily Star](#) (8/10, 257K) reports that a wet May has “bailed out a water supply that’s on the edge” in Arizona. According to the article, “they delayed a water shortage for the Central Arizona Project that many officials had feared was imminent.”

TULLOCH LAKE DROPPING EARLY TO COOL STANISLAUS RIVER FISH. The [Modesto \(CA\) Bee](#) (8/10, 179K) reports that “fish concerns will force Tulloch Lake to drop sooner than water agencies had announced in a milestone spring accord, while construction work meant to ensure that 7,000 people won’t run out of water for drinking and fire protection has not yet begun.” The Oakdale and South San Joaquin irrigation districts “in recent days announced that Tulloch’s water level must come down five weeks sooner, regardless of the April agreement.” State and federal agencies have “deemed water temperatures in the Stanislaus River dangerously high for fish and lowering Tulloch is part of a strategy to cool the river.”

CONTINUING COVERAGE OF DELTA WATER TUNNELS. Continuing coverage of “Gov. Jerry Brown’s plan to build a pair of tunnels around the Sacramento-San Joaquin Delta” was provided by the [Sacramento \(CA\) Bee](#) (8/10, 535K) and the [Antioch \(CA\) Herald](#) (8/10, 81K).

ADDITIONAL COVERAGE TRIBES FEAR SALMON KILL IN KLAMATH RIVER. Additional coverage that two American Indian tribes are raising concerns about the spread of a deadly fish disease in the Klamath River was provided by [Reuters](#) (8/8, Sherwood).

Securing America’s Energy Future:

Renewable Energy:

VOTERS BACK DESERT RENEWABLE ENERGY CONSERVATION PLAN. In an op-ed for the [Palm Springs \(CA\) Desert Sun](#) (8/8, 99K), Dave Metz, a partner at Fairbank, Maslin, Maullin, Metz & Associates, and Lori Weigel, a partner at Public Opinion Strategies, writes that a "June 2015 survey of 807 voters commissioned by the Pew Charitable Trusts found solid agreement with the Bureau of Land Management's Desert Renewable Energy Conservation Plan, commonly called the 'DRECP.'" They note that "while most voters in the region are not currently aware of the plan, which identifies areas for renewable energy development as well as areas to be conserved as wildlife habitat and for its environmental value, those who are familiar with the plan overwhelmingly support it (66 percent)" and "once the basics of the plan are explained, even more support it (74 percent)." They conclude that "this data confirms that support for protecting public lands in the California desert and the DRECP is strong for voters across geographic boundaries, party lines, and ethnic backgrounds in the region."

Onshore Energy Development:

CONSERVATION GROUP PUSHES INTERIOR TO END PUBLIC LANDS COAL MINING. The [Summit County \(CO\) Citizens Voice](#) (8/7, 506) reports that "continuing to extract and burn the coal from public lands at current rate will make it nearly impossible to meet even modest climate targets, conservation advocates said this week, calling on Interior Secretary Sally Jewell to acknowledge the risks of unchecked carbon emissions." According to the article, "with a series of public hearings on coal mining policies coming up, WildEarth Guardians this week released a roadmap for keeping publicly owned coal in the ground and leading the nation away from fossil fuels." Jeremy Nichols, Climate and Energy Program Director for WildEarth Guardians, said, "it's time for the Interior Department to shut it down. Keeping our coal in the ground is the only way to ensure our country successfully transitions to clean energy and effectively confronts the climate crisis."

Commentary. In an op-ed for the [Daily Inter Lake \(MT\)](#) (8/10, 51K), Matt Lee-Ashley, a senior fellow and director of the Public Lands Project at the Center for American Progress, writes that "even with the Clean Power Plan in place, little-known federal policies and subsidies at the Department of the Interior will continue to tilt U.S. energy markets in favor of coal." He argues that "there is no reason coal should get a special deal on America's public lands." He concludes that "taxpayers deserve a fair share from coal mining on public lands; it's far past time to modernize an outdated program, end coal subsidies, and require that everyone play by the same rules."

For "The Blog" of the [Huffington Post](#) (8/7, Seur, 164K), Carrie La Seur, an environmental lawyer, calls the federal coal program "corporate welfare at its slickest." According to La Seur, "it is high time Interior sewed shut this hole in the federal purse – but that is not what Interior proposes."

In an op-ed for the [Billings \(MT\) Gazette](#) (8/10, 179K), John Ostlund, a Yellowstone County commissioner, writes that "we are not getting as much revenue from the vast federal coal resources as we should be, because we're not producing as much coal as we could." He notes that "it matters for Yellowstone County, and other counties in which coal is mined, because one-eighth of the federal coal royalty tax revenue collected by DOI is distributed back to the county where the coal originated," and "another 40 percent of federal coal tax revenue is distributed to the state general fund." Ostlund urges the Interior Department to "change the bonus bid process so that it is paid only on the coal that is actually mined, not on unrecoverable coal, for instance," and "to reform the permitting process."

SENATORS SEEK LONGER COMMENT TIME ON STREAM PROTECTION RULE. [The Hill](#) (8/10, Cama, 471K) reports that "dozens of senators are asking the Obama administration to double the public comment period for a new mountaintop removal mining regulation." Led by Sen. Dan Coats, "the 33 senators said Friday that they and other stakeholders need 120 days to thoroughly analyze the rule and its impacts on mining and other sectors." The senators wrote in their letter, "The background and complexity of the proposed rule raise many potential issues that justify an extended comment period."

EMERGENCY DECLARED IN COLORADO AFTER EPA ACCIDENTALLY POLLUTES RIVER. [USA Today](#) (8/10, Toppo, 4.95M) reports that Durango, Colorado and nearby La Plata County "declared a state of emergency Sunday," after the EPA "took responsibility for breaching a debris dam near a Colorado mine, releasing water contaminated with heavy metals into a river that flows through the region." Now, "the Navajo Nation is considering suing the EPA." Navajo Nation President Russell Begaye told a local paper "that he had directed Navajo Nation Attorney General Ethel Branch to assemble a legal team to file a lawsuit against the EPA."

[ABC World News](#) (8/9, story 6, 1:55, Llamas, 5.84M) reported that the "potentially toxic runoff has stretched 100 miles, shutting down vacation spots and angering residents." The EPA "is on the scene because get this, one of their crews caused it." ABC (Bruce) said that the "thick yellow muck" is heading toward Lake Powell in Utah and could reach the Grand Canyon.

The [Farmington \(NM\) Daily Times](#) (8/10, 44K) reports that EPA officials said Sunday that the "Gold King Mine discharged an estimated 3 million gallons of contaminated water, three times the amount previously believed." "The mine continues to discharge 500 gallons per minute, EPA Region 8 administrator Shaun McGrath said in a teleconference call Sunday afternoon, but the polluted water is being contained and treated in two ponds by the site of the spill near Silverton, Colo."

EPA "Takes Full Responsibility" For Colorado Wastewater Spill. The [CBS Evening News](#) (8/7, story 10, 1:50, Pelley, 5.08M) reported that the Environmental Protection Agency (EPA) "takes full responsibility" for accidentally releasing "a million gallons of toxic sludge" into the Animus River in southern Colorado. Tests have confirmed that "heavy metals, like lead, cadmium, and arsenic are now flowing in the river," which is a source of "drinking water for towns surrounding it" and "dangerous for human life." [ABC World News](#) (8/7, story 9, 0:25, Muir, 5.84M) similarly reported that "dozens of miles of river" are now closed, "stretching all the way to New Mexico."

Wastewater Drainage Slowing, Reaches New Mexico. Toxic wastewater is continuing to drain into Colorado's Animus River, reports the [AP](#) (8/9). The rate of drainage from the abandoned mine, however, is currently "about 550 gallons per minute," which is "down from about 740 gallons per minute on Friday." The AP states the toxic waste has "reached the northern New Mexico cities of Aztec and Farmington."

The [Los Angeles Times](#) (8/9, Kelly, 4.07M) reports that "portable labs for testing well water" are being "rushed" to Farmington, as "residents, farmers and others nervously wait for answers on whether the water is safe for them and their livestock." EPA officials have said the wastewater spilling out of the Gold King Mine is now being "collected in a settling pond and treated to make it less toxic," but they also "have no idea how much water remained in the mine." The Times further notes the toxic waste already in the river is now heading for "the San Juan River, Lake Powell and the Colorado River." [ABC World News](#) (8/8, story 7, 0:30, Vega, 5.84M) reported that wastewater "is also now approaching Utah."

The [CBS Evening News](#) (8/8, story 8, 0:30, Axelrod, 5.08M) and [NBC Nightly News](#) (8/8, story 4, 2:15, Geist, 7.86M) also provided coverage, with NBC noting that the EPA had been excavating the mine when "heavy machinery tore" a hole and "out gushed a million gallons of bright mustard colored ooze."

Meanwhile, the [Washington Times](#) (8/9, Richardson, 344K) reports New Mexico Gov. Susana Martinez "blasted the EPA for accidentally flooding the Animus River," and she is "calling on the agency to hold itself to the same standard for the disaster as it would a private entity." The Times additionally notes Martinez is "disturbed" by the lack of information the EPA is providing, indicating that she was not informed about the spill until almost a full day after the incident began.

[Bloomberg News](#) (8/9, Drajem, 2.66M) reported that "five drinking water systems that might be impacted downstream in New Mexico have closed off intakes from the river," which won't be opened up until clean-up is complete and water quality is improved. In a Saturday statement, the EPA indicated "it is providing technical and laboratory assistance."

Additional Coverage. Additional coverage was provided by [US News & World Report](#) (8/9, 811K), [Bloomberg News](#) (8/7, Drajem, 2.66M), the [Grand Junction \(CO\) Daily Sentinel](#) (8/10, 73K), the [Durango \(CO\) Herald](#) (8/9, 28K), [The Guardian \(UK\)](#) (8/7, 3.3M), the [Farmington \(NM\) Daily Times](#) (8/10, 44K), the [Canon City \(CO\) Daily Record](#) (8/10, 22K), the [Denver \(CO\) Post](#) (8/10, Paul, 787K), the [Denver \(CO\) Post](#) (8/10, Paul, 787K), the [Salt Lake \(UT\) Tribune](#) (8/10, 492K), and [KCNC-TV Denver \(CO\)](#) Denver (8/7, 79K).

NATURAL GAS LINE PROJECT PROPOSED IN EAGLE. The [Vail \(CO\) Daily](#) (8/10, 44K) reports that a project to upgrade or relocate a natural gas transmission line will "be presented to the public for the first time during an open house Monday in Eagle." The article notes that "because the alternative routes impact both U.S. Bureau of Land Management and town of Eagle Open Space, the two governmental entities are co-hosting the open house."

COMMENTS URGED TO KEEP COLOWYO MINE OPEN. The [Craig \(CO\) Daily Press](#) (8/8, 10K) editorializes that "the Office of Surface Mining Reclamation and Enforcement is in a very important comment period, and it's vital for the Moffat County community to submit comments in order to keep Colowyo Mine." t argues that "comments make a difference, and it's critical to understand that all the comments submitted will be read, assessed and used to help determine the fate of Colowyo."

Additional coverage of the Colowyo Mine case was provided by [Inside Climate News](#) (8/10).

BLM URGED TO REJECT ALTON COAL DEVELOPMENT PROPOSAL. The [Salt Lake \(UT\) Tribune](#) (8/10, 492K), Clait Braun, Ph.D., principal of Grouse Inc. in Tucson, Ariz., and Allison Jones, conservation biologist and director of Wild Utah Project, write that "a proposal from Alton Coal Development to greatly expand a coal strip mine from private lands to public lands less than 10 miles from Bryce Canyon National Park" would "destroy thousands of acres of sensitive sage-grouse habitats designated for the highest level of protection by the state of Utah and allow further habitat destruction by a coal company that has failed to reclaim the land on its existing private property mine." They write that "in a recently released Environmental Impact Statement now out for public comment the BLM proposes a sage grouse mitigation plan that would be laughable if it didn't result in the

Action alternative for the Alton Coal mine expansion.”

Offshore Energy Development:

SENATE BILL ENDS BAN ON EXPORTATION OF OIL. The [Charleston \(SC\) Moultrie News](#) (8/7) reports that “the U.S. Senate Energy Committee has passed legislation eliminating a 40-year ban on exportation of U.S. crude oil in anticipation of new drilling off the coast of South Carolina and three other South Atlantic states.” The legislation was “approved July 30 on a 12-10 vote, and is expected to be before the full Senate this year.”

Also providing coverage is [WPDE-TV](#) Myrtle Beach, SC (8/10, 3K).

Additional coverage of offshore drilling was provided by the [Carteret County \(NC\) News-Times](#) (8/10, 28K), the [Jacksonville \(NC\) Daily News](#) (8/8, 2K), and the [Coastal Review](#) (8/10).

Oil Industry Pushes For More Gulf Drilling Access. The [South Florida Sun Sentinel](#) (8/9, Gibson, 651K) reports that the US oil industry is lobbying Congress to pass a bill expanding drilling access to much of the eastern Gulf of Mexico. “We can continue to put downward pressure on the cost of important energy resources into the future,” said David Mica, executive director of the Florida Petroleum Council. The industry argues that doing so would create jobs, but critics are skeptical. “I honestly think some of these industry reports are inflated by an order of magnitude 10 times greater than what’s actually there,” said Frank Alcock, a former Energy Department economist.

SHELL’S FENNICA HEADS TO CHUKCHI SEA. On its website, the [Alaska Public Radio Network](#) (8/7, 2K) reported that Shell’s Fennica icebreaker left Alaska’s Dutch Harbor on Thursday for the Chukchi Sea, where upon its arrival, “Interior Department officials said they expect to quickly approve the deeper drilling” into the sea floor. The article compared the Fennica’s mission with that of the Coast Guard icebreaker Healy, which will conduct scientific experiments. The [Marine Link](#) (8/10, 1K) and the [Maritime Executive](#) (8/7, 21) carried similar coverage.

Shell’s Arctic Executive Pickard Profiled. The [Houston Chronicle](#) (8/7, Dlouhy, 2.28M) featured an in-depth profile of Ann Pickard, Shell’s executive vice president of its Arctic operations, highlighting “her career taking on some of the toughest jobs in the oil industry,” and featuring comments from Pickard herself. The Chronicle outlined Pickard’s work handling challenging situations in Australia and Nigeria, as well as her encouragement to pursue Arctic exploration, and featured highly positive comments from energy industry figures about Pickard and her leadership.

America’s Great Outdoors:

Bureau of Land Management:

BLM GRANTS BURNING MAN PERMIT. The [AP](#) (8/10, 2.28M) reports that the BLM has “rescinded its request for V P accommodations at the Burning Man festival and granted the permit needed to hold the event in Nevada’s Black Rock Desert starting Aug. 30.” The bureau “announced Friday that it scrapped a request for festival organizers to build the so-called Blue Pit Compound at a cost of \$1 million.” BLM Nevada spokesman Steven Clutter said, “We worked to maximize the efficiency of the operation, and it’s essentially back to where it was last year.”

Additional coverage was provided by the [Las Vegas \(NV\) Sun](#) (8/8, 199K), the [Denver \(CO\) Post](#) (8/10, Press, 787K), the [Lakeland \(FL\) Ledger](#) (8/9, 136K), the [Daily Mail \(UK\)](#) (8/10, 5.59M), the [Daily Mail \(UK\)](#) (8/10, 5.59M), the [Miami \(FL\) Herald](#) (8/10, 651K), the [US News & World Report](#) (8/8, 811K), [Yahoo! News](#) (8/8, 5.98M), the [Quincy \(IL\) Herald-Whig](#) (8/10, 99K), the [Washington \(DC\) Post](#) (8/8, Press, 6.76M), the [Minneapolis \(MN\) Star Tribune](#) (8/8, Press, 1.19M), [USA Today](#) (8/8, 4.95M), the [Bristol \(VA\) Herald Courier](#) (8/10), and [Fox News](#) (8/8, 8.91M).

UTAH STAKES CLAIM TO RECAPTURE CANYON CITING REPEALED FRONTIER-ERA LAW. The [Salt Lake \(UT\) Tribune](#) (8/10, 492K) reports that “the state of Utah has added a 9.22-mile ‘road’ through Recapture Canyon to a list of 12,000 routes it is seeking to wrest from federal ownership.” In a letter Wednesday to Interior Secretary Sally Jewell, state officials claim “the state enjoys a ‘right-of-way’ through the canyon under the repealed frontier-era law known as RS 2477.” According to the article, “the law allows Western counties to claim title to routes over public lands if they can demonstrate 10 years of continuous use prior to the law’s repeal in 1976.”

NEW LAND EXCHANGE PROPOSAL INVOLVING WILKS RANCH. The [AP](#) (8/10, 2.28M) reports that “Montana’s largest landowner is proposing a new land exchange with the federal Bureau of Land Management after a previous one met opposition from hunters.” According to the article, “Farris Wilks and his brother, Dan, who own the NBar Ranch at Grass Range in Fergus County, are proposing, on a preliminary basis, to give 5,200 acres of their land to the BLM in return for 4,900 acres of BLM land.” The article notes that “about 3,400 acres of the Wilks property that would be exchanged is inside the Upper Missouri Breaks National Monument and 640 acres is adjacent to it.”

RED RIVER LANDOWNERS PROTEST AGAINST BLM CLAIMS. [KAUZ-TV](#) Wichita Falls, TX (8/10, 447) reports that the BLM has “tried to claim the land of another Red River landowner.” The BLM is “now claiming that 100 of Jimmy Smith’s “145 acres he bought and owns is not his.” But “instead of backing down and allowing the government agency to take over his land Smith has joined many other Red River landowners in protesting the BLM claims to land.”

BLM BAT STUDY SEEKS TO FIND ROOSTS. The [AP](#) (8/10, 2.28M) reports that “a team of bat catchers...trekked out into the High Desert east of Bend on a recent Monday night” as “part of a two-year Bureau of Land Management project trying to determine where western long-eared myotis bats go during the daytime,” according to Christopher “Digger” Anthony, wildlife biologist with the BLM in Prineville. Anthony, “who is leading the research as part of his master graduate studies with Oregon State University in Corvallis,” said, “The main thing is to identify their roosts.” The article notes that “figuring out where the bats go during the day will fill in gaps in knowledge about what habitats are most important for the flying mammals.”

WOMAN INFECTED WITH TULAREMIA. [KKCO-TV](#) Grand Junction, CO (8/10, 508) reports that “a Mesa County woman has a confirmed case of the bacterial infection Tularemia.” The BLM believes the woman was “infected near the Colorado River.” According to the article, “while there have been reported cases of Tularemia the BMI says the threat is not high enough to considering restricting access to public lands.” Christopher Joyner from the BLM said, “People really enjoy recreating on public lands, and we don’t want to do anything to restrict that access. What we do want to do is make sure the public takes necessary actions so they don’t get infected.”

PROTECTION URGED FOR GREAT DIVIDE BASIN, NORTHERN RED DESERT. In an op-ed for the [Casper \(WY\) Star-Tribune](#) (8/10, 115K), Kyle Wilson, a BLM Wild Lands Specialist with the Wyoming Wilderness Association, writes that “setting aside lands from development has been to the economic and recreational benefit of all Americans,” and “in Wyoming, protected federal lands provide local government and businesses with sustainable revenues that are less subject to the boom and bust cycles seen in the energy industry.” He calls attention to “the often forgotten lands in our basins and deserts are beginning to gain some much-needed attention.” According to Wilson, “the Great Divide Basin and northern Red Desert, for example, are a recreational paradise.”

Fish and Wildlife Service:

ZIMBABWE STILL PLAN TO SEEK EXTRADITION OF HUNTER ACCUSED OF KILLING CECIL THE LION. The [Minneapolis Star Tribune](#) (8/10, 1.19M) reports that “Zimbabwe still plans to ask the U.S. to extradite the Twin Cities big-game hunter who shot the famed African lion Cecil, but not until the police send over charges, an official of the African nation said Friday.” A spokesman for Zimbabwe’s top prosecuting authority said “the agency is still waiting for police in Zimbabwe to send them charging documents in the case of Walter J. Palmer, as well as the police request for extradition.”

Additional coverage was provided by the [Chicago Tribune](#) (8/7, Board, 2.46M) and the [Times of Northwest Indiana](#) (8/10, 283K).

PLAN WOULD LIMIT INTERACTION WITH MANATEES AT CRYSTAL RIVER NATIONAL WILDLIFE REFUGE. The [AP](#) (8/10, 2.28M) reports that “federal wildlife officials are seeking public comment for plans to limit swimming among manatees at a popular Florida refuge.” The FWS is “proposing new measures to protect manatees that spend the winter at Three Sisters Springs in the Crystal River National Wildlife Refuge.” According to the article, “from Nov. 15 through March 31 each year, the wildlife service would cut the number of tour operators allowed access to the springs, limit the number of people in the water with the manatees and restrict how those people interact with the endangered animals.”

JUDGE TOSSES OUT LAWSUIT OVER RECREATIONAL SEA TURTLE TAKES. The [Carteret County \(NC\) News-Times](#) (8/10, 28K) reports that “a U.S. District Court judge has dismissed the civil complaint against state and federal agencies and their officials filed by the N.C. Fisheries Association and Carteret County Fisherman’s Association.” Judge James Dever III “granted on July 22 motions to dismiss forwarded by federal and state defendants in the NCF’s complaint, which alleged violations of the Endangered Species Act due to recreational sea turtle takes.”

MYSTERIOUS FUNGUS POSES THREAT TO SNAKES. The [AP](#) (8/10, 2.28M) reports that “a mysterious fungus spreading across the eastern half of the country” poses a threat to snakes. According to the article, “in less than a decade, the fungus has been identified in at least nine Eastern states, and although it affects a number of species, it’s

especially threatening to rattlesnakes that live in small, isolated populations with little genetic diversity, such as those found in Vermont, New Hampshire, Massachusetts and New York." The article notes that "biologists have compared its appearance to the fungus that causes white nose syndrome in bats, which since 2006 has killed millions of the creatures and continues to spread across North America."

National Park Service:

NATIONAL PARKS ATTRACTING MORE VISITORS. [USA Today](#) (8/7, 4.95M) reports that "more than 292 million visitors made 2014 the busiest year ever for America's national parks." The article notes that "this year, attendance is up another 4% through May, according to National Parks visitor data." According to the article, "a combination of cheaper gasoline, more retiring baby boomers with time on their hands and heavy state tourism advertising campaigns may get the credit."

Glacier National Park Sees Spike In Visitors. The [Greenwire](#) (8/7, Subscription Publication) reports that "visits to Glacier National Park are at a record pace this year, despite an active wildfire that has shut down several miles of the Montana park's most popular attraction." The article notes that "totals are up 11 percent compared with the same period last year." It also notes that "a record 2.3 million people visited Glacier National Park in 2014."

Congress Urged To Fund NPS. In an op-ed for the [Daytona Beach \(FL\) News-Journal](#) (8/9, 166K), Joseph H. Carter Sr., a Washington speech writer, writes that "Florida's nine national parks are suffering, needing about \$190 million in crucial maintenance left unfunded and neglected at the end of the last fiscal year, the National Park Service reports." According to Carter, "powerful forces are loudly demanding that wildlife prairies be opened for livestock grazing, that park forests be cut for lumber, and that mineral-rich public land be opened to mining and petroleum production," and "the plea for money to fix neglected parks is lost in the tumult." Carter urges Congress to "properly" fund "our National Park Service, which serves nearly 300 million visitors annually."

BILL WOULD DESIGNATE WOMEN'S RIGHTS MUSEUM AS NATIONAL PARK. The [Huffington Post](#) (8/10, 164K) reports that "the 14 Democratic women in the U.S. Senate introduced a bill on Thursday to designate the nation's foremost museum of women's suffrage as a national park." If the legislation "passes, it would mean increased funding to pay for park rangers, expanded hours and crucial repairs to the Sewall-Belmont House & Museum in Washington, D.C." Sen. Barbara Mikulski, "the bill's chief sponsor, in a statement Thursday in the congressional record," said, "Not a single one of us would be here without Alice Paul and the National Woman's Party. That's why it's so important that we not only preserve the place where they fought for women's full inclusion in society, the Sewall-Belmont House, but elevate it to its rightful spot among our nation's most important national treasures."

CHILD CONTRACTS PLAGUE AT YOSEMITE. [ABC World News](#) (8/7, story 13, 0:15, Muir, 5.84M) briefly reported that a child is in the hospital "being treated for the plague after contracting the disease while camping with her family" two weeks ago in Yosemite National Park.

The [Greenwire](#) (8/7, Subscription Publication) reports that "the California Public Health Laboratory confirmed that a child returning from a camping trip to Yosemite National Park and Stanislaus National Forest contracted the first case of plague in the state since 2006, but officials are urging calm." Health officials said plague is "extremely rare, with no known cases of human-to-human infection in California since 1924."

Additional coverage was provided by the [New York \(NY\) Daily News](#) (8/7, 3.75M), the [Daily Mail \(UK\)](#) (8/10, 5.59M), [The Guardian \(UK\)](#) (8/7, 3.3M), and [Reuters](#) (8/7, Bernstein).

HIKER KILLED BY BEAR AT YELLOWSTONE NATIONAL PARK. The [AP](#) (8/8, Press, 6.76M) reports that the NPS says "a Montana man found dead in Yellowstone National Park was the victim of a grizzly bear attack." According to the article, "based on tracks found at the scene and other evidence, it appears that an adult female grizzly and at least one cub were likely involved." However, "authorities were not releasing an official cause of death until an autopsy is done Monday and additional evidence is reviewed."

Additional coverage was provided by [CNN](#) (8/8, Grinberg, 5.17M), the [Houston \(TX\) Chronicle](#) (8/10, 2.28M), the [Washington \(DC\) Post](#) (8/10, Holley, 6.76M), [USA Today](#) (8/9, Calfas, 4.95M), the [Denver \(CO\) Post](#) (8/10, Simpson, 787K), the [Chattanooga \(TN\) Times Free Press](#) (8/8, 179K), [ABC News](#) (8/10, 3.97M), [Reuters](#) (8/9, Zuckerman), [NBC News](#) (8/10, 3.73M), [TIME](#) (8/10, 19.55M), [Slate](#) (8/10, 1.38M), the [Daily Mail \(UK\)](#) (8/10, 5.59M), [ABC Radio Australia](#) (8/9, 769), [Gawker](#) (8/10, 1.79M), [Yahoo! News](#) (8/10, 5.98M), [WIMS-AM South Shore \(N\)](#) South Shore, IN (8/8), [WFXT-TV Boston \(MA\)](#) Boston (8/10, 131K), [WRC-TV Washington \(DC\)](#) Washington (8/10, 345K), and [WDIV-TV Detroit \(MI\)](#) Detroit (8/10, 292K).

FRENCH COUPLE DIES AT WHITE SANDS NATIONAL MONUMENT SON SURVIVES. The [AP](#) (8/10, 2.28M) reports that "a French couple who died during an afternoon hike across the searing New Mexico desert likely saved their 9-year-old son by giving him two sips of water for each one they took before the supply ran out, a sheriff said Friday." According to Otero County Sheriff Benny House, "the boy was dehydrated but in remarkably good shape when he was found alongside his dead father on a trail in the White Sands National Monument." House "identified the couple as David Steiner, 42, and his wife, Ornella Steiner, 51."

Additional coverage was provided by [CNN](#) (8/8, Gray, 5.17M), the [US News & World Report](#) (8/7, 811K), the [Washington \(DC\) Post](#) (8/7, Press, 6.76M), [World News Australia](#) (8/9, 9K), [MSN](#) (8/10, 7.76M), the [Inquisitr](#) (8/10, 527K), the [Daily Mail \(UK\)](#) (8/10, 5.59M), and [The Guardian \(UK\)](#) (8/9, 3.3M).

MANASSAS BATTLEFIELD TRUST RECEIVES \$20,000 GRANT. The [Washington Post](#) (8/10, —, Lane, 6.76M) reports that "the Manassas Battlefield Trust, the friends group associated with the Manassas National Battlefield Park, was awarded one of 25 grants from the American Battlefield Protection Program, a division of the National Park Service." According to the article, "the \$20,000 grant will provide funding for the group's recently hired executive director, Debra Kathman, as well as the development of outreach and marketing materials to raise awareness about the trust and its mission."

INTERIOR RELEASES FINAL STUDY OF SHEPHERDSTOWN BATTLEFIELD. The [Shepherdstown \(WV\) Chronicle](#) (8/10) reports that "in early July, The Department of Interior released the final study documents of the National Park Service's (NPS) Special Resource Study (SRS) of the Shepherdstown Battlefield." The study "concluded that the 510 acre site of the 1862 Battle of Shepherdstown would be preferably included within the Antietam National Battlefield Park."

NPS RELEASES STUDY ON STE. GENEVIEVE LOG HOMES. The [St. Louis Post-Dispatch](#) (8/10, 968K) reports that "the centuries-old vertical log homes of Ste. Genevieve, Mo., are now on the official path to becoming a national park." The NPS "released on Friday a study declaring dozens of properties in the 4,000-person Mississippi River town as historically significant and suitable for a park designation." According to the article, "the study said Ste. Genevieve, about an hour south of St. Louis, holds one of the oldest National Historic Landmark districts in the country, 'possessing a large and rare collection of French vernacular vertical log houses.'"

NPS STUDYING EXPANSION OF JOSHUA TREE NATIONAL PARK. The [Palm Springs \(CA\) Desert Sun](#) (8/9, 99K) reports that "local activists have long wanted to see Eagle Mountain become part" of Joshua Tree National Park, "citing its importance to at-risk species and its potential value as a historical attraction." The NPS is "now deciding whether it should try to make that happen, launching a 'boundary study' that drew several hundred people to public comment meetings this week." David Lamfrom, California desert program director for the nonprofit National Parks Conservation Association, said, "The park service is going to do an examination to determine if those lands are of national park quality or not."

NEW BADLANDS SUPERINTENDENT COULD REVIVE WORK ON TRIBAL NATIONAL PARK. The [AP](#) (8/10, 2.28M) reports that "the incoming superintendent of Badlands National Park says he's open to a languishing plan to create a tribal national park in the Badlands." Recently named Superintendent Mike Pflaum said that "he wants to help repair relationships with tribal officials on issues including the plan." Pflaum says "he wants to learn more once he arrives to lead the park."

NEW USS ARIZONA MEMORIAL SUPERINTENDENT ANNOUNCED. The [AP](#) (8/10, 2.28M) reports that the NPS said Friday "it was naming the superintendent of national parks in the Seattle area to oversee the USS Arizona Memorial, which has been rocked by allegations that tickets to the memorial were sold even though people aren't supposed to pay to visit the solemn site honoring World War II dead." Jacqueline Ashwell, "who currently leads the Seattle unit of Klondike Gold Rush National Historical Park and other Park Service sites, will assume her new role Oct. 19, the agency said in a statement." Ashwell will "replace Paul DePrey, who was at the helm during the alleged ticket sales."

SHEEP BELONG TO SOUTHERN NEVADA WATER AUTHORITY ILLEGALLY GRAZING WITHIN GREAT BASIN NATIONAL PARK. The [Las Vegas Review-Journal](#) (8/10, 378K) reports that for years, sheep belonging to the Southern Nevada Water Authority have been grazing illegally inside Great Basin National Park. Park superintendent Steve Mietz said, "It's been going on for a while now, and we're still having trouble with trespass sheep." According to the article, the two agencies have been discussing ways to fix the problem, but the sheep keep intruding.

FATALLY INJURED SEA TURTLE MAY HAVE BEEN ATTACKED BY HUMAN. The [AP](#) (8/10, 2.28M) reports that "an endangered loggerhead sea turtle that died after being found with a crushing head wound at a North Carolina national park may have been attacked by a person, authorities said Friday." According to the article, "the young turtle was found alive by a park ranger at the Outer Banks' Cape Lookout National Seashore in late July, and was handed over to veterinarians from North Carolina State University to receive treatment." However, "the turtle was later found unresponsive at the rehabilitation facility at the North Carolina Aquarium on Roanoke Island, and was given pain medication and allowed to die, according to a report by the Coastal Conservation Association."

DROUGHT CAUSES EMERGENCY FISHING CLOSURE IN OLYMPIC NATIONAL PARK. [K NG-TV Seattle](#) (8/9, 316K) reports that "most Rivers and streams in Olympic

this summer." Park spokesperson Barb Maynes said, "Pacific salmon and trout show signs of physiological stress at water temperatures above 60 degrees Fahrenheit, with lethal effects beginning at 70 degrees."

WOLF HUNT TO RESUME MONDAY NEAR DENALI NATIONAL PARK AND PRESERVE. The [Alaska Dispatch News](#) (8/9, 219K) reports that "wolf hunting will resume Monday on state lands northeast of Denali National Park and Preserve amid calls by conservationist groups to reinstate the long-disputed 'wolf buffer' near the park." In May, Alaska Department of Fish and Game Commissioner Sam Cotten had "closed the corridor outside the park to wolf hunting two weeks before the end of the season after two wolves were shot legally near the Stampede Trail." On Friday, the state's wildlife conservation director, Bruce Dale, "confirmed that the northeast corridor would reopen to wolf hunting on Monday, Aug. 10."

NPS COMMEMORATES OLMSTEAD'S YOSEMITE REPORT. The [Boston Globe](#) (8/7, Humphries, 1.1M) reports that the NPS will commemorate Frederick Law Olmsted's Yosemite report Sunday at 10 a.m. at Arnold Arboretum. According to the article, "scholars today see it as an important statement that influenced the nascent preservation movement and eventually the creation of the National Park Service 50 years later."

SLEEPING BEAR DUNES AREA PARTIALLY REOPENS AFTER STORMS. The [Detroit Free Press](#) (8/9, 910K) reports that "authorities say they have reopened parts of northern Michigan's Sleeping Bear Dunes National Lakeshore — a week after severe storms and violent winds uprooted trees, scattered debris and spoiled the landscape in the popular tourist area." The NPS "announced late Saturday the Pierce Stocking Scenic Drive and Dune Climb have partially reopened." The article notes that "the Sleeping Bear Heritage Trail also has been cleared from Empire to Glen Haven, but the stretch between Glen Haven and Glen Arbor remains closed."

Also providing coverage is [WWJ-TV Detroit \(MI\)](#) Detroit (8/9, 34K).

BODY OF MISSING NEW JERSEY SWIMMER RECOVERED. The [New York Post](#) (8/7, 2.73M) reports that "officials have positively identified the body of a swimmer who disappeared off Sandy Hook that has been found in the surf." According to Gateway Recreation Area spokeswoman Daphne Yun, "the body of 25-year-old Andros Vega-Pena, of Red Bank, was found Friday." Yun says the NPS is "saddened by the man's death and thanks those who helped with the rescue and recovery effort."

ATTEMPT TO ESTABLISH NATIONAL PARK IN MAINE CRITICIZED. In an op-ed for the [Central Maine](#) (8/8, 12K), Jim Robbins, president and owner of Robbins Lumber in Searsport, writes that the effort to establish a national park in Maine is "just a misguided, misleading attempt to provide" Roxanne Quimby "with a legacy that even her vast fortune can't buy." He notes that "Quimby failed to win over local residents despite a massive public relations campaign and large donations to environmental and community groups, such as the Friends of Baxter State Park, the Millinocket Trail's End Festival and the Natural Resources Council of Maine." Robbins argues that "a national monument certainly would attract fewer visitors and provide even fewer jobs, while provoking the same concerns about the way federal lands grow in size, scope and restrictions on activities within their boundaries and on adjacent areas."

US Geological Survey:

BIOLOGISTS RELEASING 10,000 LAKE STURGEON IN NORTHERN NEW YORK WATERWAY. The [AP](#) (8/10) reports that "state fish biologists are releasing 10,000 lake sturgeon into northern New York waters as part of a restoration program for the threatened species." On Monday, "7,500 sturgeon are to be released into Chaumont Bay at the eastern end of Lake Ontario, and 2,500 are to be released into the St. Lawrence River at Ogdensburg." The article notes that "the restoration effort is a collaboration between the Department of Environmental Conservation, the U.S. Fish and Wildlife Service, the St. Regis Mohawk Tribe, the New York Power Authority and the U.S. Geological Survey."

Top National News:

OBAMA DEFENDS IRAN DEAL DURING SUNDAY SHOW APPEARANCE. The President's interview on [CNN's Fareed Zakaria GPS](#), during which he defended the Iran nuclear agreement, received no coverage on the three network news broadcasts Sunday evening, and print and online coverage are relatively light. Much of the coverage describes the President as continuing to defend the agreement, but generally does not offer analysis of his tone. Also, while a number of stories report on lawmakers' announcing their positions, there is no speculation on how the agreement will fare when Congress votes.

The [AP](#) (8/10, Superville) notes that the President said the agreement achieves the goal of dealing with Iran's "nuclear problem" better than "any alternative." He argued that "a constructive relationship with Iran could be a byproduct of the deal...but it won't happen immediately. If at all." The [Jerusalem Post](#) (8/10, Wilner, 34K) calls the CNN interview "another opportunity for the US president to outline his extensive argument in favor of the deal." The President said, "If Iran is able to get a nuclear weapon, if its breakout time remains as short it is — as it is right now and they are installing advanced centrifuges, and so on — then they will be emboldened to engage in more of the activities, which are not constrained or bound by the amount of money Iran has, but rather have to do with the very strategic decisions that Iran is making at any given time." [The Hill](#) (8/9, Richardson, 471K) reported that while he "acknowledged that Iran would benefit economically" from the agreement, the President "contended that it would not be a 'game-changer'" and argued that "the threat of Iran acquiring a nuclear weapon far outstrips that of Tehran becoming economically enriched."

The [Los Angeles Times](#) (8/10, Parsons, 4.07M) says the President "stood by his charge that Iranian hardliners are making 'common cause' with Republican lawmakers" opposing the deal, "insisting that such an accusation 'is absolutely true, factually.'" The President told [CNN's Fareed Zakaria GPS](#) (8/9, 10:02 a.m. EDT, 410K) that "inside of Iran, the people most opposed to the deal are the Revolutionary Guard, the Quds Force, hardliners implacably opposed to any cooperation with the international community, and there is a reason for that. Because they recognize that, if in fact this deal gets done, that rather than them being in the driver's seat with respect to the Iranian economy, they are in a weaker position. And the point I was simply making is that, if you look at the facts, the merits of this deal, then you will conclude that, not only does it cut off a pathway for Iran getting a nuclear weapon, but it also establishes the most effective verification and inspection regime that's ever been put in place."

On its website, [Voice of America](#) (8/9, 32K) reported that the President "dismissed the importance of a tweet from Iran's supreme leader, Ayatollah Ali Khamenei, showing an apparent silhouette of the American leader with a gun to his own head," saying, "I think that he tweeted that in response to me stating a fact, which is that if we were confronted with a situation in which we could not resolve this issue diplomatically, that we could militarily take out much of Iran's military infrastructure. I don't think that's disputable."

The [Washington Times](#) (8/10, A1, Boyer, 344K) notes that the President said Israeli Prime Minister Benjamin Netanyahu "has failed to offer a better alternative" to the deal, despite his "vehement criticism that the accord won't prevent Tehran from building nuclear weapons." The President argued that "Netanyahu and the Israeli public should get behind the deal because it is 'very good for Israel,' a consideration that he said has always driven the prime minister's decisions."

During the [interview](#) (8/9, 10:02 a.m. EDT, 410K), which was recorded before Sen. Chuck Schumer announced his opposition to the deal, the President was asked why the agreement doesn't have broad support from the public or Congress. The President said, "People haven't been getting all the information. ... But the people who know most about the central challenge that we're trying to deal with, which is making sure that Iran does not get a nuclear weapon, they are overwhelmingly in favor of it." In his column for the [Washington Post](#) (8/10, 6.76M), E. J. Dionne says last week's Republican presidential debate demonstrated why the President does not have "any chance of turning the opposition party" in favor of the deal. The President realizes that Republicans "will have the votes to pass a measure disapproving it, and he needs to keep enough Democrats on his side to sustain his veto." Dionne adds that the President "knows that he is in an ongoing battle for public opinion over a very big issue," and he "has to convince Americans that his measured approach to the world is the safest path for the country."

In a piece for [Politico Magazine](#) (8/9), former White House national security adviser Samuel Berger argued in favor of the agreement, writing that rejection "fundamentally shifts the balance of power on Iran from the president to the Congress in a way that makes a future agreement virtually impossible to achieve." Rejection, he adds, "isolates us in the world," and "allows Iran to move further toward a nuclear weapon, presenting the United States and Israel with terrible choices." Berger added that lawmakers "need to recognize that no means no — not for now, but not for exerting some control over Iran's nuclear program."

McCaskill Says She Is Still Undecided. Also Sunday, Sen. Claire McCaskill "insisted" that Schumer's opposition "hasn't placed pressure on fellow Democrats to follow suit," the [Washington Times](#) (8/10, Howell, 344K) reports. McCaskill said on NBC's "Meet the Press," "I don't think any of [us] feel pressure, either by Chuck Schumer's rejection of this deal or the president's full-throated support of this deal." McCaskill also said on [NBC's Meet the Press](#) (8/9, 11 05 a.m. EDT, 3.08M) that she is still undecided, noting, "I hope my colleagues are doing what I'm doing, their homework. [Republicans] insisted on 60 days to review this deal. Most of them made their mind up in about five minutes. This is one where the heightened rhetoric on both sides is not always helpful."

Deutch Opposes Deal. The [Palm Beach \(FL\) Post](#) (8/9, Bennett, 497K) notes that Rep. Ted Deutch, who is "hardly a member of the stick-it-to Obama crowd," announced his opposition to the deal last week.

Sanders Voices His Support For Deal, Takes Issue

SECRETARY JEWELL ANNOUNCES \$405 MILLION IN PILT PAYMENTS. The [Environment & Energy Publishing](#) (6/25, 705) reports that the Interior Department on Thursday "announced it will distribute nearly \$405 million to 1,900 counties as part of a federal program that pays rural counties hundreds of millions of dollars a year to offset lost property tax revenue.". Interior Secretary Sally Jewell, in announcing the PILT payments, called it "a 'lifeline for many local communities,' noting that the payments go to mostly rural counties near national parks and refuges that use the money for public schools, roads and local police."

Additional coverage was provided by the [Salt Lake \(UT\) Tribune](#) (6/26, 470K), the [Eureka \(CA\) Times Standard](#) (6/25, 55K), the [Durango \(CO\) Herald](#) (6/25, 28K), the [Farmington \(NM\) Daily Times](#) (6/26, 45K), and the [Loveland \(OH\) Magazine](#) (6/26).

SECRETARY JEWELL VOWS TO BRING NEVADA RANCHER BUNDY TO JUSTICE. The [Greenwire](#) (6/25, Subscription Publication) reports that Interior Secretary Sally Jewell said “Nevada cattle rancher Cliven Bundy, whose ranch was the site of an armed confrontation with federal officials last year over unpaid grazing fees, will be brought to justice.” Speaking with reporters ahead of this week’s Western Governors’ Association meeting, Jewell said “the federal government will continue pursuing Bundy in the courts.” She said, “Cliven Bundy has had multiple court orders to remove his cattle from federal public lands, and he has not paid his grazing fees, and he has not abided by the law, and so we will continue to pursue that.”

Additional coverage was provided by [The Hill](#) (6/26, Cama, 533K), the [Las Vegas \(NV\) Review-Journal](#) (6/26, 380K), and [Western Journalism](#) (6/26, 361K).

SECRETARY JEWELL DISCUSSES SAGE GROUSE DURING WESTERN GOVERNORS MEETING. The [Greenwire](#) (6/25, Subscription Publication) reports that “the governors of Utah and Wyoming signaled yesterday that they are concerned the Bureau of Land Management’s final plans to increase sage grouse protections could unduly limit development in their states, but stopped short of directly opposing them.” Addressing the Western Governors’ Association’s annual meeting, Interior Secretary Sally Jewell “argued that the plans have a real shot at preventing the bird from being listed as threatened under the Endangered Species Act – a move that could severely inhibit any number of activities across the Western landscape, from energy development to infrastructure construction.” She said, “If we stay the course, we will have a decision by the end of September, and I remain optimistic that if we continue on this path together, that the Fish and Wildlife Service will have the certainty it needs that a ‘not warranted’ listing is a clear possibility.”

SECRETARY JEWELL SAYS NO DECISION MADE ON BASIN AND RANGE NATIONAL MONUMENT YET. The [Environment & Energy Publishing](#) (6/25, 705) reports that “the Obama administration has made no decision about whether it will designate a 700,000-acre national monument protecting public rangelands and mountains in east-central Nevada, Interior Secretary Sally Jewell said yesterday.” However, “the area that conservationists and art enthusiasts are recommending be designated the ‘Basin and Range National Monument’ is ‘very special’ and could be preserved with minimal conflicts with other land uses, Jewell told reporters at the Western Governors’ Association annual meeting near Lake Tahoe.” Senate Minority Leader Harry Reid, “who has introduced legislation to withdraw more than 800,000 acres of the Basin and Range area from future mineral development, has urged the administration to consider using its powers under the Antiquities Act to designate the lands as a monument if Congress fails to act.”

SECRETARY JEWELL TO VISIT GUAM, CHINA AND VIETNAM. The [Pacific \(GUM\) Daily News](#) (6/25, 61K) reports that Interior Secretary Sally Jewell is “scheduled to visit Guam as part of her Asia-Pacific tour, the federal agency announced early this morning.” Jewell will visit Guam as part of her trip next week to China and Vietnam, the release states.” Assistant Secretary of Insular Affairs Esther Kia’aina will “also be on island, according to the governor’s office.” According to the article, “the federal officials will meet with local leaders to discuss issues such as Compact Impact and the cost of compliance with federal regulations, the governor’s office stated in a press release.”

Also reporting on the story are the [Pacific News Center](#) (6/26) and [KUAM-TV](#) Dededo, GUM (6/25, 171).

HOUSE BEGINS DEBATE ON INTERIOR-EPA FUNDING BILL. The [Law 360](#) (6/26, 15K) reports that “the U.S. House of Representatives on Thursday kicked off debate on a nearly \$30.2 billion bill to fund the U.S. Department of the Interior and Environmental Protection Agency for 2016, taking up several amendments including an increase in funding for the Bureau of Indian Affairs.” Legislators “began with general debate on the bill, H.R. 2822, the 2016 Department of the Interior, Environment and Related Agencies Appropriations Act, before moving on to discuss proposed amendments.”

Amendment To Interior-EPA Bill Would Upend BLM’s Sage Grouse Plans. The [Greenwire](#) (6/25, Subscription Publication) reports that Rep. Mark Amodei has “offered an amendment to the House’s fiscal 2016 spending bill for the Interior Department that would upend federal efforts to conserve public lands for the greater sage grouse and throw a potential twist into the September decision whether to list the bird under the Endangered Species Act.” The amendment would “impose a one-year ban on the Bureau of Land Management’s recommending mineral withdrawals under the 1872 mining law for the purpose of conserving sage grouse.” The measure also “appears to ban funding for BLM to finalize or implement dozens of land-use plans across the West designed to beef up protections for sage grouse ahead of the September listing decision.”

Meanwhile, the [Boise State \(ID\) Public Radio](#) (6/26) reports that the Idaho Cattle Association is going to protest the federal sage grouse plan.

Additional coverage of the sage grouse was provided by the [High Country \(CO\) News](#) (6/26, 74K) and the [Craig \(CO\) Daily Press](#) (6/26, 10K).

blank story

BIPARTISAN PUSH SEEKS TO REAUTHORIZE LWCF. The [Greenwire](#) (6/25, Subscription Publication) reports that “lawmakers from both parties and each side of the Capitol today sought to give new momentum to stalled legislation that would reauthorize” the Land and Water Conservation Fund.

In an op-ed for the [Albuquerque \(NM\) Journal](#) (6/26, 241K), Regina Wheeler, CEO, Positive Energy Solar, writes that “more than 60 other local businesses...recently wrote U.S. Senate Energy and Natural Resources Chair Lisa Murkowski and ranking member Maria Cantwell asking them to reauthorize LWCF before it sunsets.” Wheeler argues that the “impact of this program in New Mexico is broad and deep, and if Congress does not act quickly it will be a tragedy felt by all New Mexicans for years to come.”

SBA REPORT RANKS INTERIOR’S HELP FOR SMALL BUSINESSES. The [Washington Post](#) (6/26, Jayakumar, 5.03M) reports that the Small Business Administration released its annual scorecard for government agencies on Friday, measuring their effectiveness in “awarding work to small businesses.” The Post says the Federal government awarded almost 25 percent of “prime contracts” to small businesses, higher than its goal of 23 percent; although top performers include the State, Interior, and

Transportation Departments, “agencies that performed poorly included the Energy Department and the Education Department.”

CONTINUING COVERAGE OF WILDFIRES. Continuing coverage of various wildfires was provided by [Idaho Statesman](#) (6/25, 199K), the [Elko \(NV\) Daily Free Press](#) (6/26, 22K), the [Idaho Statesman](#) (6/25, 199K), [KIVI-TV Boise \(ID\)](#) Boise, ID (6/26, 861), the [Daily Mail \(UK\)](#) (6/26, 5.37M), [WWBT-TV Richmond \(VA\)](#) Richmond, VA (6/26, 83K), the [Quincy \(IL\) Herald-Whig](#) (6/26, 100K), the [Houston \(TX\) Chronicle](#) (6/26, Press, 2.29M), the [St. Joseph \(MO\) News-Press](#) (6/26, 20K), the [Bloomington \(IL\) Pantagraph](#) (6/26, 158K), the [Omaha \(NE\) World-Herald](#) (6/26, 557K), the [Watertown \(WI\) Daily Times](#) (6/26, 27K), [WPXI-TV Pittsburgh \(PA\)](#) Pittsburgh (6/25, 307K), the [Corvallis \(OR\) Gazette-Times](#) (6/26, 32K), the [Seattle \(WA\) Times](#) (6/26, 970K), [Newser](#) (6/26, 245K), the [Christian Science Monitor](#) (6/24, 539K), the [Carson City \(NV\) Now](#) (6/26, 211), [The Guardian \(UK\)](#) (6/25, 2.93M), the [Bristol \(VA\) Herald Courier](#) (6/26), the [Greenwich \(CT\) Time](#) (6/26, 20K), the [Quincy \(IL\) Herald-Whig](#) (6/26, 100K), [CBS News](#) (6/26, 8.2M), the [Contra Costa \(CA\) Times](#) (6/26, Press, 279K), [KIVI-TV Boise \(ID\)](#) Boise, ID (6/26, 861), and [KRXI-TV Reno \(NV\)](#) Reno, NV (6/26, 656).

ADDITIONAL COVERAGE OF WESTERN GOVERNORS’ ASSOCIATION MEETING. Additional coverage of the meeting of the Western Governors’ Association was provided by the [Crookston \(MN\) Times](#) (6/25, 5K), the [Casper \(WY\) Star-Tribune](#) (6/26, 99K), the [Alaska Public Radio Network](#) (6/25, 2K), the [Mohave Valley \(AZ\) Daily News](#) (6/26, 23K), the [Casa Grande \(AZ\) Dispatch](#) (6/26, 24K), [KBOI-TV Boise \(ID\)](#) Boise, ID (6/26, 1K), and [KIVI-TV Boise \(ID\)](#) Boise, ID (6/26, 861).

ADDITIONAL COVERAGE: SECRETARY JEWELL TOURS FIRE COMMAND CENTER. Additional coverage of Interior Secretary Sally Jewell’s tour of a fire incident command center was provided by the [Greenfield \(IN\) Daily Reporter](#) (6/26, 31K) and the [Gardnerville \(NV\) Record Courier](#) (6/26, 20K). [Farmington \(NM\) Daily Times](#) (6/26, 45K),

ADDITIONAL COVERAGE OF INTERIOR’S PHOTOS ON SOCIAL MEDIA. Additional coverage of the photos the Interior Department shares on social media was provided by the [Oklahoman](#) (6/26, 506K).

ADDITIONAL COVERAGE OF RESILIENT LANDS AND WATERS INITIATIVE. Additional coverage of the Resilient Lands and Waters initiative was provided by the [Government Security News](#) (6/26, 104K).

OP-ED: CIVILIAN CONSERVATION CORPS DESERVES MONUMENT. In an op-ed for the [Albuquerque \(NM\) Journal](#) (6/26, 241K), Joseph P. Sánchez, Ph.D., who retired from the NPS in 2014 after 35 years of service, writes that although the Civilian Conservation Corps and the Works Progress Administration were “important to the nation and to National Parks throughout the country, and although their works remain evident in many parks, nowhere is there a unit of the National Park System dedicated to preserving and telling their stories.” He argues that “there ought to be such a national monument, it ought to be in New Mexico and it ought to be at the Old Santa Fe Trail Building in Santa Fe, itself a CCC project.” Sánchez urges President Barack Obama to “take a major step forward regarding that almost forgotten, but significant, part of our national history, by proclaiming a Civilian Conservation Corps/Works Projects Administration National Monument at the Old Santa Fe Trail Building.”

Empowering Native American Communities:

INTERIOR ANNOUNCES MILESTONE FOR LAND BUY-BACK PROGRAM. The [Native American Times](#) (6/26, 337) reports that “in a major milestone for the Department of the Interior’s Land Buy-Back Program for Tribal Nations (Buy-Back Program), Deputy Secretary Michael Connor today announced that more than \$500 million has been paid to more than 24,000 individual landowners to restore the equivalent of nearly 850,000 acres of land to tribal governments.” Connor said, “The Department is making significant progress toward fulfilling President Obama’s goal of strengthening and investing in tribal communities. Today’s announcement highlights not only the efficiency of our work in the department but also our partnership with tribal governments. The Buy-Back Program and tribal leaders must continue to work together to ensure that landowners are aware of the opportunity to consolidate their fractional land interests for the benefit of both the landowner and tribal communities.”

In a piece for the [Indian Country Today Media Network](#) (6/25, 28K), Connor writes that he milestone is “a significant achievement for the Program, which began making offers in 2013, and reflects tremendous work in partnership with tribal governments across Indian Country.” He asserts that the Interior Department is “taking significant and lasting steps toward fulfilling President Obama’s goal of strengthening and investing in tribal communities through this exceptional opportunity.” Connor concludes that “the Buy-Back Program is another example of this Administration’s commitment to provide more sustainability for landowners, their families, and tribal communities for the benefit of generations to come.”

BIA APPROVES FAST-TRACK LEASING REGULATIONS FOR TWO TRIBES. [Law 360](#) (6/26, 15K) reports that the BIA has “signed off on regulations proposed by two Native American tribes under the HEARTH Act that will allow them to bypass BIA approval of land-lease deals, according to notices published Thursday in the Federal Register.” The article notes that “the California-based Rincon Band of Luiseno Mission Indians and the Absentee Shawnee Tribe of Oklahoma are the latest of 20 tribes to take advantage of the 2012 legislation.”

FBI CONFIRMS MAN WAS KILLED BY LAW OFFICERS ON SPIRIT LAKE RESERVATION. The [AP](#) (6/26) reports that “federal authorities have confirmed that law officers shot and killed a man on the Spirit Lake Indian Reservation last week.” FBI spokesman Kyle Loven said that “31-year-old Joseph Charboneau (SHAHR’-buh-noh) was killed during an altercation with Bureau of Indian Affairs officers on June 16.”

Tackling America’s Water Challenges:

HOUSE REPUBLICANS INTRODUCE NEW DROUGHT RELIEF LEGISLATION. The [Environment & Energy Publishing](#) (6/25, 705) reports that a group of House Republicans on Thursday “introduced new legislation to address the drought in California and other parts of the West, the latest move in a yearslong effort to find a legislative fix for the region’s ongoing water crisis.” According to the article, “the California-specific provisions in H.R. 2898, the ‘Western Water and American Food Security Act,’ focus on boosting

water transfers from the Sacramento-San Joaquin River Valley Delta to parched agricultural communities in the Central Valley and municipalities farther south, including Los Angeles, that are running low on water.” In order “to allow for more water to flow south from the bay delta, the legislation would tweak the science formulas used to protect the region’s endangered smelt and salmon species, a change that Democrats have long argued would roll back environmental regulations for the region’s vulnerable fish population.”

Also reporting on the story are [The Hill](#) (6/25, Cama, 533K), the [National Journal](#) (6/26, Plautz, Subscription Publication, 156K), the [Houston \(TX\) Chronicle](#) (6/26, Freking, 2.29M), and the [Fresno \(CA\) Bee](#) (6/26, 313K).

BOR PLANS WORK AT LAKE NIGHORSE. The [Durango \(CO\) Herald](#) (6/25, 28K) reports that the BOR has “plans to build an entrance station and boat-decontamination station at Lake Nighthorse, according to Brent Rheese, the bureau’s Upper Colorado River regional director, who last week attended a meeting in Durango of the four-state Upper Colorado River Commission.” The article notes that “lack of recreation access has been a sore point and a source of snarky jokes for area residents since the reservoir filled.”

Securing America’s Energy Future:

Renewable Energy:

HOUSE COMMITTEE HOLDS HEARING ON BLM’S RENEWABLE ENERGY PROGRAMS. The [E&E Daily](#) (6/25, Subscription Publication) reports that a House Natural Resources Committee hearing Wednesday “on BLM’s renewable energy programs erupted into a partisan shouting match after a Republican leader accused an agency official of misleading the panel.” The hearing of the Subcommittee on Oversight and Investigations “reviewed a newly released GAO report that found flaws in BLM’s ability to collect and maintain the bonds required to cover the cost of reclaiming projects in case a company goes belly-up.” A BLM employee in Wyoming told GAO that “someone had mistakenly shredded several bonds that had been kept in a safe at the Rawlins field office because he or she did not know what they were.”

Also reporting on the story is the [Kansas City \(MO\) infoZine](#) (6/26, 175).

FEDERAL REGULATORS CRITICIZE GRANT LAKE HYDROELECTRIC PROJECT. The [Kenai \(AK\) Peninsula Clarion](#) (6/25, 17K) reports that “a set of environmental, recreational, and engineering studies supporting the controversial Grant Lake hydroelectric project is missing necessary information, according to comments released by the Federal Energy Regulatory Commission (FERC), the federal agency that licenses hydroelectric projects.” The article notes that “comments released on Thursday by the US Fish and Wildlife Service also found weaknesses in HEA’s 2013 fisheries research and the analysis based on it.” Jeffry Anderson, supervisor of the Kenai Fish and Wildlife Field Office, “wrote in his comments that environmental sampling done during a single year is insufficient to ‘differentiate potential impacts of the Project from natural background variation.’”

Onshore Energy Development:

FRACKING OPPONENTS SEEM TO BE LOSING MOMENTUM. The [Washington Times](#) (6/25, Richardson, 641K) reports that “in a development that has caught both sides by surprise, the legal and political momentum these days appears to be running against the anti-fracking cause.” According to the article, “in states where the revolutionary oil- and gas-drilling technique actually is being employed in a significant way, the movement is losing ground.” The article notes that “foes of fracking were hit with another setback Tuesday as a federal judge delayed this week’s scheduled implementation of the Obama administration’s tight new fracking rules for federal lands, prompted by a lawsuit challenging the regulations filed by four states.”

REPORT TRACKS FUGITIVE METHANE EMISSIONS. [Think Progress](#) (6/25, 435K) reports that “oil and gas operations located on federal and tribal lands leaked \$360 million worth of fuel in 2013, money which would have gone in part to taxpayers and tribes in the form of royalties, according to a new report.” The report was commissioned by the Environmental Defense Fund “to track fugitive methane emissions, a term referring to methane released when natural gas is leaked, vented, or flared.” According to the article, “the report looked specifically at fugitive methane emissions on federal and tribal lands,” and “it found that, on those lands, more than 65 billion cubic feet (Bcf) of natural gas was wasted via leaks and venting in 2013, representing more than 1 million metric tons of methane.”

REVISION OF ROYALTY RATES URGED. In an op-ed for [Newsweek](#) (6/26, 175K), Nicole Gentile, the director of campaigns with the Public Lands Project at the Center for American Progress, writes that “under the current royalty rates, bonding requirements, minimum bids and rental rates on public lands—some of which have not been updated in nearly a century—American taxpayers and energy-producing states are not receiving a fair return from the development of their valuable resources.” According to Gentile, “from a business perspective, the federal government is lagging behind states and private landowners in defending the financial interests of their shareholders: American taxpayers.” She concludes that “the upcoming rulemaking that addresses the federal oil and gas leasing process is a critical opportunity for the Obama administration to re-evaluate how public lands are leased and ensure that the public receives a fair and equitable share of these shared resources.”

SEN. MCCONNELL PUSHES BACK AGAINST REGULATIONS IMPACTING COAL INDUSTRY. In an op-ed for the [Harlan \(KY\) Daily Enterprise](#) (6/26, 19K), Senate Majority Leader Mitch McConnell criticizes the Obama Administration for waging “a war against Kentucky coal jobs, miners, and their families.” McConnell touts a step taken by the Senate Appropriations Committee “towards using Congress’s power of the purse” to “help those not only in the coal industry but also farmers and Kentucky job creators.” Among the things, the measure “expresses the committee’s concerns with the Department of Interior rewriting the Stream Buffer Zone rule.”

The piece also appears at the [Middlesboro \(KY\) Daily News](#) (6/26, 433).

Offshore Energy Development:

OBAMA ADMINISTRATION URGED TO REMOVE VIRGINIA FROM OFFSHORE DRILLING PLANS. The [Hampton Roads \(VA\) Daily Press](#) (6/26, Subscription Publication, 219K) reports that “Sierra Club Virginia joined with two former military leaders Thursday to urge the Obama administration to remove Virginia from its draft plan for offshore oil and gas development, citing potential risks to military readiness, the aerospace industry and future offshore wind energy.” Sierra Club Virginia says “it has examined maps and reports from a number of federal agencies and consulted with current and former Pentagon officials to compile a report examining potential conflicts with offshore drilling.” Eileen Levandoski, assistant director of Sierra Club Virginia, “Because of the high level of military activities, there is a limited area off Virginia’s coast for any energy development, including offshore wind.”

BOEM RELEASE DOCUMENTARY ON STUDY OF UNDERWATER CANYONS. [KATC-TV Lafayette, LA](#) (6/26, 71K) reports that “research related to sea corals conducted at the University of Louisiana at Lafayette is featured in a video recently released by the national Bureau of Ocean Energy Management.” The film, “Pathways to the Abyss,” shows “initial findings of a five-year, \$9 million study of underwater canyons off the coasts of Maryland and Virginia.” According to the article, “scientists are researching submarine topography and marine habitats in the Baltimore and Norfolk canyons for potential offshore energy and mineral exploration.”

PIPELINE COMPANY’S OIL SPILL RESPONSE PLAN RAISES QUESTIONS ABOUT RESPONSE TO CALIFORNIA SPILL. [Politico Pro](#) (6/26, Subscription Publication) reports that “the pipeline company responsible for last month’s 100,000-gallon California oil spill said it could detect a leak and shut down oil flows within 15 minutes of oil escaping from the line, according to a copy of its response plan approved by federal regulators.” According to documents released Wednesday by four Democratic lawmakers, “federal regulators at the Pipeline and Hazardous Materials Safety Administration said earlier this month they were still working to redact portions of that 1,100-plus-page spill response plan that the regulator approved last year for Plains All American, the company behind the May 19 oil spill at Santa Barbara’s Refugio Beach.”

HOMEOWNER SUES PIPELINE OPERATOR OVER SANTA BARBARA COUNTY OIL SPILL. The [Los Angeles Times](#) (6/26, Panzar, 4.03M) reports that the latest lawsuit filed against Plains All American Pipeline by Santa Barbara County homeowner Alexandra Geremia claims that her home has been “‘bombarded’ with a steady stream of tar balls and oil sheen from the spill that prevents her from walking on the beach.” Moreover, the lawsuit describes the spill’s clean-up efforts as “unsatisfactory,” and claims that the value of Geremia’s property will be hurt for years to come.

ADDITIONAL COVERAGE: BOEM ANNOUNCES RESEARCH PARTNERSHIP WITH NATIONAL ACADEMIES. Additional coverage of the BOEM’s new research partnership with the National Academies was provided by [Offshore Magazine](#) (6/26, 129K).

ADDITIONAL COVERAGE OF SHELL’S ARCTIC DRILLING PLANS. Additional coverage of Shell’s Arctic drilling plans was provided by the [Huffington Post](#) (6/26, Sheppard, 194K) and the [Homer \(AK\) News](#) (6/25, 9K).

America’s Great Outdoors:

Bureau of Land Management:

BLM, FOREST SERVICE RELOCATING TO NEW BUILDING IN GREAT FALLS. The [Great Falls \(MT\) Tribune](#) (6/25, 80K) reports that the BLM and Lewis and Clark National Forest “plan to relocate to a new office building in Great Falls on River Drive North, which officials say will be smaller but more energy efficient compared to the building they share now at 1101 15th St. N.” According to the article, “last week, Sletten Construction Co. broke ground on a new, 32,148-square-foot building at 38th Street North and River Drive North that will serve as a new regional headquarters for both the forest and the BLM.”

BLM RECOGNIZES WYOMING YOUTH WITH VOLUNTEER AWARD. The [AP](#) (6/26, Mathers, 2.29M) reports that “now in their 16th year, Casper-based Conservation Outdoor Recreation Education youth are cleaning up the Big Horn Basin one scrap at a time while appreciating what the Basin’s environs have to offer.” According to the article, “recently, the youth hiked to the summit of Heart Mountain,” where they “hauled a 200-pound bench to the top, taking turns carrying the bench dismantled in two parts.” Victor Orr, CORE conservation outdoor recreation educator, “who leads kids on outdoor trips all summer,” said that “now the seat sits at the summit for hikers.” Sarah Beckwith, BLM public affairs in Worland, said, “Orr and the kids received the BLM’s prestigious ‘Making a Difference’ National Volunteer Award for outstanding youth.”

PUBLIC COMMENT PERIOD FOR NEW HAYDEN FOX VEGETATION TREATMENT PROJECT IN OREGON ENDS FRIDAY. The [Oregon Public Broadcasting](#) (6/26, 3K) reports that “the public comment period for the New Hayden Fox vegetation treatment project in southern Oregon ends Friday.” The BLM “field office in Klamath Falls is proposing commercial timber thinning, brush mowing and reducing overall fire hazards.” Lisa Bryant, public affairs specialist with the Lakeview district of the BLM, said, “I think mostly we are trying to address wildlife habitat, we are trying to address timber needs and we are trying to address fuel hazards and prevention of or minimizing impacts of future fires.”

SUPPORT URGED FOR RESILIENT FEDERAL FORESTS ACT OF 2015. In an op-ed for the [Salem \(OR\) Capital Press](#) (6/25, 113K), Nick Smith, Executive Director of Healthy Forests, Healthy Communities, supports HR 2647, the Resilient Federal Forests Act of 2015, which “would give the U.S. Forest Service and Bureau of Land Management policy and legal tools to make federal forests less vulnerable to catastrophic wildfire, insects and disease.” According to Smith, “in addition to improving the health of federal forests across the nation, the legislation would create thousands of jobs in forested communities while generating additional timber revenues for rural counties with large amounts of federal forest land.” He claims that the measure “addresses many of the current obstacles to federal forest management, from curbing excessive litigation to providing more resources for forest management activities.”

Fish and Wildlife Service:

GLOBAL ANTI-POACHING ACT ADVANCES OUT OF HOUSE COMMITTEE. The [Environment & Energy Publishing](#) (6/25, 705) reports that “a sweeping bill aimed at curbing wildlife trafficking today moved one step closer to becoming law when it advanced with

little debate out of the House Foreign Affairs Committee.” The “Global Anti-Poaching Act,” H.R. 2494, would “name and shame countries involved in the illicit trade and provide increased assistance to nations attempting to fight it.” The legislation also “includes a provision to make the penalties for smuggling or selling endangered species and products made from them equivalent to the ones for trafficking weapons and drugs, which is a key component of the White House’s strategy to reduce the illegal wildlife trade.”

Congress Urged To Support Anti-Poaching Efforts. For the “Congress” blog of [The Hill](#) (6/26, Pacelle, 533K), Wayne Pacelle, president and CEO of The Humane Society of the United States, argues that anti-poaching efforts impacts national security. According to Pacelle, “it is well known that terrorist groups like Al-Shabaab, Joseph Kony’s Lord’s Resistance Army and the Janjaweed share a common reliance on poaching to fund their terrorism.” He notes that “on Thursday, the House takes up a spending bill for the Interior Department” and “one controversial provision would block the U.S. Fish and Wildlife Service from proposing a federal rule to clamp down on the ivory trade in the United States.” Pacelle writes that “lawmakers who care about elephants, national security and the future of Africa should offer an amendment to strike that language, enabling the U.S. Fish and Wildlife Service to take action on the issue and do what’s right for elephants, Africa and the world.”

COURT ASKED TO OVERTURN DECISION STRIKING DOWN PRAIRIE DOG PROTECTIONS. The [AP](#) (6/26, Whitehurst, 2.29M) reports that “government attorneys are defending federal protections for Utah prairie dogs after 10 states stepped into the case in favor of a ruling that animal activists say could undermine the Endangered Species Act.” U.S. Department of Justice attorneys “want a federal appeals court to overturn the unusual decision striking down prairie dog protections near the southern Utah town of Cedar City, about 250 miles south of Salt Lake City.” The article notes that “the ruling could have wide-ranging effects because most protected animals in the U.S. are only found in one state,” and “if it’s upheld on appeal, the case could bring the Endangered Species Act before the U.S. Supreme Court.”

COURT BACKS HABITAT BOOST FOR SANTA ANA SUCKER. The [Courthouse News](#) (6/25, 7K) reports that “federal regulators need not defend their designation of several thousand acres in California as ‘critical habitat’ for the Santa Ana sucker, the Ninth Circuit ruled Thursday.” According to the article, “rejecting claims that the government did not sufficiently cooperate with state and local agencies on water-resource issues, the court noted that the pertinent statute ‘is a non-operative statement of policy that ‘does not create an enforceable mandate for some additional procedural step.’”

NEW REPORT FINDS 25 PERCENT INCREASE IN LESSER PRAIRIE CHICKEN POPULATION. The [Midland \(TX\) Reporter-Telegram](#) (6/26, 45K) reports that “a year after the U.S. Fish and Wildlife Service listed the lesser prairie chicken as threatened, a new report finds the species’ fortunes have improved.” The Western Association of Fish and Wildlife Agencies, “which oversees conservation efforts through a range-wide plan, reports a 25 percent increase in the lesser prairie chicken’s population from 2014 to 2015.” Still, the Permian Basin Petroleum Association and “four Southeast New Mexico counties are continuing to pursue the lawsuit they filed against the Fish and Wildlife Service for listing the species.”

ENDANGERED RED WOLF KILLED IN NORTH CAROLINA. The [AP](#) (6/26) reports that “wildlife protection advocates are calling for federal authorities to care for the puppies of a rare red wolf legally shot and killed on private property last week.” According to the article, “a landowner in Hyde County in northeastern North Carolina reported to the U.S. Fish and Wildlife Service that he shot the wolf June 17.” FWS spokesman Pete Benjamin in Raleigh says “the wolf showed signs of nursing, but officials don’t know how many or where the puppies might be.”

PUBLIC HEARING HELD ON REMOVAL OF LOUISIANA BLACK BEAR FROM ENDANGERED SPECIES LIST. The [Baton Rouge \(LA\) Advocate](#) (6/26, 34K) reports that “a sparse but well-informed crowd gathered in Baton Rouge on Thursday night to give their comments about a proposal to remove the Louisiana black bear from the Endangered Species List.” According to the article, “about 20 people attended the public hearing at the state Department of Wildlife and Fisheries offices.”

FWS IMPOSES FIRE BAN ON MID-COLUMBIA RIVER WILDLIFE REFUGES. The [Sunnyside \(WA\) Daily Sun-News](#) (6/25) reports that “due to extreme fire conditions, the U.S. Fish and Wildlife Service has imposed a complete ban on activities likely to start a fire on Mid-Columbia River National Wildlife Refuges.” The article notes that “included in the order are the Hanford Reach National Monument and Columbia, Cold Springs, Conboy Lake, McKay Creek, McNary, Toppenish and Umatilla National Wildlife Refuges.”

FLESH-EATING BACTERIA KILLS FLORIDA SWIMMER. [USA Today](#) (6/25, Cumley, 5.01M) reports that “a Florida man died after encountering a deadly bacteria while he was swimming, according to his mother.” Karen Yeager Mercer said that Cason Yeager “died June 16, two days after he and family went swimming in the Gulf of Mexico south of Pine Island.” Mercer said “her family started its Sunday outing on their boat in the Weeki Wachee River and traveled out about 2 miles into the Gulf in an area filled with shallow water and islands that are part of the Chassahowitzka National Wildlife Refuge about 65 miles north of St. Petersburg, Fla.”

NEW MANATEE ZONES FOR PINELLAS COUNTY APPROVED. [WTSP-TV](#) St. Petersburg, FL (6/25, 89K) reports that “the Florida Fish and Wildlife Conservation Commission approved a final rule establishing new manatee zones in portions of the inshore waters of western Pinellas County at its June 24 meeting in Sarasota.” The article notes that “the new zones will slow speeds in seagrass areas where manatees feed and will have limited effect on travel time for boaters because only a small portion of the Intracoastal Waterway (ICW) channel is included.”

PELICANS NESTING AT CHASE LAKE NATIONAL WILDLIFE REFUGE A NEAR RECORD. Additional coverage of the pelicans nesting at Chase Lake National Wildlife Refuge was provided by the [Washington \(DC\) Post](#) (6/26, Press, 5.03M), the [Colorado Springs \(CO\) Gazette](#) (6/26, 166K), the [Quincy \(IL\) Herald-Whig](#) (6/26, 100K), [ABC News](#) (6/26, 3.69M), [Fox News](#) (6/25, 9.4M), and [Yahoo! News](#) (6/26, 6.18M).

HANFORD REACH NATIONAL MONUMENT MARKS 15TH ANNIVERSARY. In his column for the [Seattle Post-Intelligencer](#) (6/26, 822K), Joel Connelly marks the 15th anniversary of the Hanford Reach National Monument. He writes it was “a good deed it was to spare this stretch of river, and spare the shrub-steppe lands around it from the predations of corporate agriculture.”

National Park Service:

NPS PULLS CONFEDERATE FLAG MERCHANDISE. In its “Blog Briefing Room” blog, [The Hill](#) (6/26, Hensch, 533K) reports that the NPS announced on Thursday that Confederate battle flags will “no longer be available as a memento for visitors to the parks system.” NPS Director Jonathan B. Jarvis said in a statement, “We strive to tell the complete story of America. All sales items are evaluated based on educational value and their connection to the park.” He added, “Any standalone depictions of Confederate flags have no place in park stores.” Jarvis said the move is “driven by last week’s mass shooting at Emanuel African Methodist Episcopal Church, a historic black church in Charleston, S.C.”

Additional coverage was provided by the [Wall Street Journal](#) (6/26, Ellis, Subscription Publication, 5.68M), [NBC News](#) (6/26, 2.54M), the [Los Angeles \(CA\) Times](#) (6/24, 4.03M), the [Hanover \(PA\) Evening Sun](#) (6/26, 59K), the [Reston \(VA\) Patch](#) (6/26, 888), the [New York \(NY\) Daily News](#) (6/25, Gologowski, 3.79M), [USA Today](#) (6/25, Stanglin, 5.01M), the [Charleston \(SC\) Post and Courier](#) (6/25, 305K), the [Hilton Head Island \(SC\) Packet](#) (6/25, 84K), [Reuters](#) (6/25, Dekok), the [Summit County \(CO\) Citizens Voice](#) (6/25, 506), the [Baltimore \(MD\) Sun](#) (6/25, 802K), the [Huffington Post](#) (6/25, O'Connor, 194K), the [Daily Mail \(UK\)](#) (6/26, 5.37M), [MSN](#) (6/26, 7.78M), the [Houston \(TX\) Chronicle](#) (6/26, 2.29M), the [Chambersburg \(PA\) Public Opinion](#) (6/26, 35K), the [Charleston \(SC\) City Paper](#) (6/26, 9K), [WPMT-TV Harrisburg \(PA\)](#) Harrisburg, PA (6/25, 71K), [WCIV-TV Charleston \(SC\)](#) Charleston, SC (6/26, 16K), and [WGAL-TV Lancaster \(PA\)](#) Lancaster, PA (6/26, 101K).

FLIGHT 93 NATIONAL MEMORIAL VISITOR CENTER TO OPEN SEPTEMBER 10. The [AP](#) (6/26, Mandak, 1.29M) reports that “a \$26 million visitors center complex at the Flight 93 National Memorial will be dedicated and open to the public Sept. 10, a day before the 14th anniversary of the terror attacks.” According to the article, “the new center near Shanksville, about 75 miles southeast of Pittsburgh, consists of two buildings, a 4,700-square-foot learning center that will play host to activities, guest speakers and events and a separate visitors center with exhibit space and more serene, sober reminders of the crash site.” Keith Newlin, the deputy superintendent of the memorial, said that “officials hope the new visitors center will boost annual visitors from about 300,000 to 500,000 but more importantly spread the story of the heroes who died there.”

Additional coverage was provided by the [New Jersey Local News](#) (6/26, 871K), the [Allentown \(PA\) Morning Call](#) (6/25, 374K), the [Lansdale \(PA\) Reporter](#) (6/25, 22K), the [West Chester \(PA\) Daily Local News](#) (6/25, 43K), the [Pittsburgh \(PA\) Post-Gazette](#) (6/26, Mandak, 621K), the [Daily Mail \(UK\)](#) (6/26, 5.37M), the [Houston \(TX\) Chronicle](#) (6/26, Mandak, 2.29M), the [Washington \(DC\) Post](#) (6/26, Joe Mandak |, Ap, 5.03M), [Yahoo! News](#) (6/26, Mandak, Press, 6.18M), [WTAE-TV Pittsburgh \(PA\)](#) Pittsburgh (6/26, 248K), [KYW-TV Philadelphia \(PA\)](#) Philadelphia (6/25, 45K), and [WHP-TV Harrisburg \(PA\)](#) Harrisburg, PA (6/26, 1K).

LEADING PRESIDENTS BASED ON TOURISM NUMBERS RANKED. [TIME](#) (6/26, 19.57M) “looked at all the federal land each president established, according to the National Park Service — from national parks to battlefields to national historic sites — as well as each president’s library and monuments to him.” According to the article, “totaling the annual visitor statistics for each location, the president who came out on top was Richard Nixon, with more than 31 million tourists visiting his sites in 2014.” The Golden Gate National Recreation Area “launches” Nixon “to the No. 1 spot.”

CONGRESS URGED TO FUND ROADS. [The Hill](#) (6/26, Laing, 533K) reports that Transportation Secretary Anthony Foxx is “imploping Congress to find the money to pay for a plan to spend \$275 billion on the nation’s roads over the next six years that was approved by a Senate committee on Wednesday.” The measure, called the Developing a Reliable and Innovative Vision for the Economy (DRIVE) Act, “calls for appropriating nearly \$43 billion per year to the federal government’s highway program until 2021 — if lawmakers can come up with a way to pay for it.” The article notes that “the measure also includes approximately \$240 million per year for the National Park Service and about \$1.3 billion per year for federal lands and tribal transportation programs.”

KINGS CANYON NATIONAL PARK RECEIVES FUNDING FOR NEW RESILIENT LANDSCAPES PROGRAM. The [Visalia \(CA\) Times-Delta](#) (6/25, 36K) reports that the NPS, “U.S. Forest Service, CAL FIRE and University of California, Berkeley, are joining forces in support of a new resilient landscapes program.” The article notes that “the project has been funded with \$89,000 for the 2015 fiscal year and has the opportunity to receive additional money in the future.” Woody Smeck, Sequoia and Kings Canyon National Parks Superintendent, said, “This is a wonderful opportunity for the park to work on an interagency project with Sequoia National Forest, CAL FIRE, and University of California, Berkeley as we build a fire resilient landscape to enhance giant sequoia habitat, protect watershed, and enhance defensible space around our gateway and in-holding communities.”

NPS SURVEYS SHEEP IN DENALI NATIONAL PARK. The [Alaska Public Radio Network](#) (6/25, 2K) provides a video of the NPS conducting “ground-based and aerial surveys to identify sheep population trends in an effort to ensure effective management” within Denali National Park.

GRAND CANYON TEMPORARILY CLOSING WALKWAY FOR REPAIRS. The [AP](#) (6/26, Press, 5.03M) reports that Grand Canyon National Park is “temporarily closing a staircase leading from the train depot to the El Tovar Hotel.” According to the article, “crews plan to close the trail and the staircase from July 1 through the end of October.”

HIKER WHO DIED AT GRAND CANYON NATIONAL PARK OFFICIALS IDENTIFIED. The [AP](#) (6/26, Press, 1.29M) reports that “authorities at Grand Canyon National Park have identified a man from Japan who died during a hike last week.” Park officials said Thursday that “36-year-old Takayuki Fujiwara was visiting from Morioka City, Iwate Prefecture, Japan.” An official cause of death was not released.

Additional coverage was provided by the [Washington \(DC\) Post](#) (6/26, Press, 5.03M), the [Daily Mail \(UK\)](#) (6/26, 5.37M), and [Yahoo! News](#) (6/26, 6.18M).

PERMANENT SUPERINTENDENT FOR TRUMAN SITE NAMED. The [Independence \(MO\) Examiner](#) (6/25, 22K) reports that Carol Dage, who has been the Harry S. Truman National Historic Site’s chief of cultural resources and, for the last 10 months, the acting superintendent, has been named “the permanent superintendent effective next month.” According to the article, “one of her immediate

tasks, she said, is to fill six staff positions left open until a new superintendent was named.”

CAMERAS SHOWS BROWN BEARS AT KATMAI NATIONAL PARK. The [Huffington Post](#) (6/26, Mazza, 194K) reports that “a series of cameras set up near Brooks Falls in Alaska’s Katmai National Park have returned for the season, allowing armchair travelers to watch coastal brown bears catch and eat sockeye salmon.” The NPS says “up to 25 bears have been seen on the camera at once in previous years, eating fish and fighting for prime salmon-catching spots.” The article notes that “the three cameras come courtesy of a \$150,000 grant from the Annenberg Foundation’s Explore.org, which funds cameras and other projects in locations around the world.”

ADDITIONAL COVERAGE: REPORT SAYS NATIONAL PARKS AT RISK FROM RISING SEAS. Additional coverage of the report on the risk of rising seas to national parks was provided by the [Houston \(TX\) Chronicle](#) (6/26), the [Washington \(DC\) Times](#) (6/26, 641K), the [Asheville \(NC\) Citizen-Times](#) (6/25, 39K), and [WCTI-TV Greenville \(NC\)](#) Greenville, NC (6/26, 62K).

SUPPORTERS OF NATIONAL PARK IN MAINE CRITICIZED. In an op-ed for the [Bangor \(ME\) Daily News](#) (6/25, 179K), Andy Young, a founding member of Preserve Maine Traditions, writes that the job figures touted by supporters of a national park in Maine are “imaginary numbers.” He notes that “the numbers Roxanne Quimby and Lucas St. Clair keep pushing at us go back to a study they commissioned in 2013, when they hired Headwaters Economics to do a report on the economic performance of other similar parks around the country.” According to Young, “they chose six ‘peer regions’ that supposedly are similar to the Katahdin area, but in reality those ‘peers’ bear little resemblance to it.”

In a piece for the [Bangor \(ME\) Daily News](#) (6/24, 179K), Patricia Callahan claims that “Mainers, especially northern Mainers, don’t share our fellow Americans’ lovesickness with extreme wealth and don’t take kindly to being told what to do. They prefer Stephen and Tabitha King’s philanthropic style to that of Roxanne Quimby and her son.”

TUSAYAN MAYOR DEFENDS PROPOSED DEVELOPMENT NEAR GRAND CANYON. In a piece for the [Arizona Republic](#) (6/25, 1.27M), Tusayan Mayor Greg Bryan “defends proposed development near the Grand Canyon.” He argues that “without new development, Tusayan will remain a landlocked company town with no land to build much-needed affordable housing and amenities.” Bryan also asserts that “the development will better meet current and future visitor needs and reduce pressures inside the national park for employee housing, visitor services and educational opportunities about the area.”

PROTECTION URGED FOR EVERGLADES. In an op-ed for [LiveScience](#) (6/26, 444K), Michael Sainato writes that the Everglades has “been a battleground of controversy, as environmentalists and developers continuously struggle over its uses and resources.” He notes that “this past Earth Day, U.S. president Barack Obama used the Everglades as his stage to address the stark realities of climate change in the face of Florida politicians, such as Governor Rick Scott, who still uphold policies that fail to fully account for the environmental impacts of unchecked development and growth throughout the state.” Sainato argues that “the livelihood of Florida depends on the Everglades.” Also, he notes that “the Everglades provides one of the best support systems Florida has against climate change and rising sea levels by mitigating saltwater intrusion to south Florida’s freshwater supplies and creating a natural protective barrier for Florida from tropical storms and hurricanes.”

US Geological Survey:

USGS TO CONDUCT HYDROGEOLOGICAL STUDY OF PROPOSED MANURE LAGOON SITE. The [Watertown \(NY\) Daily Times](#) (6/26, 68K) reports that “the owners of a proposed manure lagoon site near the Black River in the town of Rutland have agreed to share the cost of a hydrogeological study of the area around the planned facility.” James W. Wright, executive director of the Development Authority of the North Country, said Thursday that Milk Street Dairy has “agreed to participate in the subsurface study of the lagoon planned on Ridge Road to determine how liquid manure would flow if it leaks from the 7.5-million-gallon manure storage facility.” The study will be conducted by the USGS “under the guidance of the state Department of Environmental Conservation.”

Top National News:

MEDIA ANALYSES: SCOTUS ACA RULING A MAJOR VICTORY FOR OBAMA. Coverage of the [Supreme Court ruling](#) in King v. Burwell cast it as another major victory for President Obama in a week that has been one of the best – or possibly even the best – of his presidency. Analyses also focus on the unlikely role of Chief Justice John Roberts, who wrote for the 6-3 majority, as the two-time savior of the Affordable Care Act, and on conservative anger at Roberts over the ruling. Coverage led all three broadcast network newscasts, which combined for nearly 17 minutes of coverage, with NBC devoting nearly eight minutes to the subject, more than twice as much as ABC.

[ABC World News](#) (6/25, lead story, 2:25, Muir, 5.84M) called it a “historic ruling” bringing “very strong reaction tonight on both sides. ... Many tonight pointing to” Roberts, “twice now saving Obamacare.” Terry Moran called it “a stunning 6-3 decision” that “saved the linchpin of the President’s healthcare law.” The [CBS Evening News](#) (6/25, lead story, 3:15, Pelley, 5.08M) said the ACA “was saved from a devastating blow,” and like ABC, said that “the conservative Chief Justice of the United States rescued for the second time the largest part of President Obama’s legacy. ... The President said today, ‘Now Obamacare is woven into the fabric of America.’” On the [NBC Nightly News](#) (6/25, lead story, 4:05, Holt, 7.86M), Pete Williams reported, “This is the second time the US Supreme Court has bailed out Obamacare – this time, even more decisively than it did three years ago.” On [CNN’s Situation Room](#) (6/25, 554K), Wolf Blitzer called the ruling “a huge victory for President Obama.”

The [AP](#) (6/26, Sherman) says the Supreme Court “sent a clear message” that the ACA “is here to stay,” adding, “Whether you call it the Affordable Care Act, Obamacare, or in the words of a dissenting justice, SCOTUScare, Obama’s signature domestic achievement is, as the president himself put it, ‘reality.’” But House Speaker Boehner, “declining to concede,” said Republicans “will ‘continue our efforts to repeal the law and replace it with patient-centered solutions that meet the needs of seniors, small business owners, and middle-class families.’” [Bloomberg News](#) (6/26, Deprez, Olorunnipa, 3.81M) says the decision “strikes at a tenet of the modern-day

Republican party: Obamacare must be undone.”

[USA Today](#) (6/26, Wolf, Heath, 5.01M) reports the ruling put the “landmark 2010 statute on solid legal footing for the immediate future.” In his majority decision, Roberts wrote, “Congress passed the Affordable Care Act to improve health insurance markets, not to destroy them. If at all possible, we must interpret the act in a way that is consistent with the former, and avoids the latter.” Roberts argued that the ACA “makes clear that Congress wanted subsidies available everywhere, and the alternative ‘could well push a state’s individual insurance market into a death spiral.’” The [Wall Street Journal](#) (6/26, A1, Kendall, Radnofsky, Subscription Publication, 5.68M) reports that Roberts said the plaintiffs raised strong arguments for their view, but that in context, the intent of the legislation was clear.

In his dissent, the [New York Times](#) (6/26, Liptak, Subscription Publication, 12.24M) reports, Justice Antonin Scalia “called the majority’s reasoning ‘quite absurd.’” Scalia wrote, “The court’s decision reflects the philosophy that judges should endure whatever interpretive distortions it takes in order to correct a supposed flaw in the statutory machinery. It is up to Congress to design its laws with care, and it is up to the people to hold them to account if they fail to carry out that responsibility.” The Times notes that Scalia “announced his dissent from the bench, a sign of bitter disagreement.” The [Washington Post](#) (6/26, Barnes, 5.03M) reports Scalia said Roberts “performed ‘somersaults of statutory interpretation’ to save the act: ‘We should start calling this law SCOTUScare,’” a line also noted by [Vox](#) (6/25, Lind, 839K). In its “The Fix” blog, the [Washington Post](#) (6/25, Schwarz, 5.03M) writes that in his 21-page dissent, “Scalia went full Scalia,” calling the decision “‘interpretive jiggery-pokery,’ a ‘defense of the indefensible’ and ‘pure applesauce.’”

[Politico](#) (6/25, Haberkorn, Gerstein, 1.11M) says a ruling in favor of the plaintiffs “would have eliminated the subsidies in the 34 states that refused to set up an insurance exchange,” which the Urban Institute has estimated would strip more than 8.2 million people of insurance. [McClatchy](#) (6/26, Doyle, Pugh, 32K) says the decision “does not end all legal challenges” to the ACA, “but it’s probably the last one that had the potential to gut the law.” The [Los Angeles Times](#) (6/26, Savage, 4.03M) and the [Christian Science Monitor](#) (6/25, Richey, 539K) both call it “a major victory for President Obama.”

In a front-page analysis, the [Washington Post](#) (6/26, A1, Barnes, 5.03M) writes that Obama and Roberts “got off to a rough start from the very beginning, when they tripped over each other’s words during a key line in the oath at Obama’s first inauguration,” but on Thursday, he “again helped sustain the president’s policy legacy in a way that few could have anticipated” at that time. [USA Today](#) (6/26, Wolf, Heath, 5.01M) calls Roberts “an unlikely savior for President Obama.”

Linda Greenhouse writes in the [New York Times](#) (6/26, Subscription Publication, 12.24M) that the 6-3 ruling “means that one or perhaps two of the justices who grabbed this case back in November had to have jumped ship,” since “it takes at least four votes to add a case to the court’s docket.” Greenhouse argues that Roberts and Justice Anthony Kennedy probably saw that backing “a cynically manufactured and meritless argument” would result in the Court being perceived “as a partisan tool.”

The [New York Times](#) (6/26, Subscription Publication, 12.24M) says in an editorial that the Court “rightly rejected a blatantly political effort to destroy” the ACA, calling King v. Burwell “an ideological farce dressed in a specious legal argument. ... Its core claim – that an ambiguous four-word phrase buried deep in the 900-page law eliminates health insurance for millions of lower-income Americans – was preposterous.” A [Washington Post](#) (6/26, 5.03M) editorial calls it a “cogent ruling” that endorsed “the most reasonable reading of the statute.” [USA Today](#) (6/26, 5.01M) similarly says the case “was always a feeble, ‘gotcha’ sort of a challenge, and the court majority saw it that way.”

Paul Krugman writes in his [New York Times](#) (6/26, Subscription Publication, 12.24M) column that the ACA is doing “better than even many supporters realize,” with “around 15 million Americans” gaining insurance coverage under the law, and many of the uninsured left “in that position because their state governments have refused to let the federal government enroll them in Medicaid.”

In a [New York Times](#) (6/26, Subscription Publication, 12.24M) op-ed, University of Minnesota political scientist Lawrence Jacobs and Harvard professor of government and sociology Theda Skocpol, co-authors of “Healthcare Reform and American Politics: What Everyone Needs to Know,” write that the “Supreme Court decision, rejecting an ultraright challenge” to ACA subsidies, “will speed the already remarkable implementation of health reform,” which “has been truly rapid by historical standards.”

Ezra Klein writes at [Vox](#) (6/25, 839K) that “this wasn’t a ‘win for Obamacare.’ ... This was a win for the more than 6 million people who will keep their health insurance,” and “also a win for common sense, and for judicial restraint.”

Jonathan Cohn of the [Huffington Post](#) (6/25, 194K) writes that Roberts “gave Obamacare opponents a major smackdown.” Brian Beutler of the [New Republic](#) (6/25, 228K) says the ruling “marks the end of the line for Obamacare’s most zealous challengers.” Pamela Brown said on [CNN’s Legal View](#) (6/25, 473K), “Once again, the Supreme Court saved the Affordable Care Act, essentially. ... This is a huge victory for the Obama Administration.” [Reuters](#) (6/26, Hurley) and the [Washington Times](#) (6/26, Howell, 641K) also report on the ruling.

Analyses: Obama Experiencing One Of The Best Weeks Of His Presidency. Several analysis pieces look at the ruling in the context of the President’s legacy, with [National Journal](#) (6/25, Nelson, Subscription Publication, 156K) calling it “Barack Obama’s Best Day Ever.” The [AP](#) (6/26, Pace) writes that following on the passage of trade promotion authority on Wednesday, Obama “is defying the lame-duck label and solidifying the contours of his legacy with the help of unlikely allies in Congress and the Supreme Court.” The [Wall Street Journal](#) (6/26, Lee, Nelson, Subscription Publication, 5.68M) writes about the two victories under the headline “Obama Has A Good Week.” [NBC Nightly News](#) (6/25, story 2, 2:25, Holt, 7.86M) ran a feature on some of those covered under the ACA that was sympathetic to supporters of the law, saying “the Obamacare law [is] directly affecting so many families who say it’s been quite literally a lifesaver.”

In a [New York Times](#) (6/26, Subscription Publication, 12.24M) analysis piece, Michael Shear writes that the TPA vote is a “major legislative accomplishment,” but the Court ruling “is a bigger domestic political victory for Mr. Obama, whose health care legacy has

always depended on the Affordable Care Act becoming as permanent a part of the American social safety net as Medicare and Social Security.”

[Politico](#) (6/25, Wheaton, 1.11M) says the Court “handed Obama one of the biggest victories of his presidency,” and the [Washington Post](#) (6/26, Nakamura, 5.03M) says for the Administration, “this was a cheerful moment to remember – an inflection point, as White House aides like to say, that brought an emerging domestic legacy into sharper focus.” Howard Dean said on [MSNBC’s Ed Show](#) (6/25, 444K), “The President’s had a huge day and huge week. ... He’s had an unbelievable week, maybe the best of his presidency.”

White House Political Director David Simas said on [MSNBC’s Hardball](#) (6/25, 713K), “This is why we do the work that we do. This is why that after 100 years of trying and then a very tough legislative fight up here in Washington, the President made the decision to make sure that when he had this opportunity, he could finally deliver on the promise of healthcare as a right rather than a privilege.”

Jeffrey Toobin said on [CNN’s The Lead](#) (6/25, 320K), “When you look at the Obama presidency, which is now about three-quarters over, what’s the most significant thing he has done? You could say ending the war in Iraq. You could say winding down the war in Afghanistan, you could talk about the economic recovery. But in terms of what will endure, I think the Affordable Care Act is now firmly established, and you are talking about millions of people who have healthcare who wouldn’t otherwise have healthcare.”

The AP’s Julie Pace noted on [MSNBC’s Andrea Mitchell Reports](#) (6/25, 487K) that while the President “was taking a victory lap,” it was “interesting that he wasn’t gloating. He wasn’t taking political shots at Republicans, though did he note how many times they have tried to repeal this on the Hill and how they tried to push this in the courts.”

Conservatives Expressing Anger At Roberts. [Bloomberg Politics](#) (6/26, Kapur, Weigel, 161K) says “conservatives took direct aim at...their one-time hero Chief Justice John Roberts” following the ruling. Club For Growth President David McIntosh said, “Roberts told everybody he was just going to be an umpire and call strikes and balls, but now as justice he’s got two results-oriented decisions that go far beyond that role.” And Competitive Enterprise Institute “general counsel Sam Kazman told reporters that Roberts’s rationale seemed to abandon the logic of ‘what words mean’ in favor of executive power.”

[Politico](#) (6/25, Gerstein, 1.11M) says “conservatives were left baffled” after Roberts “saved Obamacare three years ago,” but after Thursday’s decision, “they felt betrayed. Adding to the sting: The chief justice wasn’t just along for the ride,” but “wrote the majority opinion and delivered it from the bench.” The [Wall Street Journal](#) (6/26, A1, Kendall, Subscription Publication, 5.68M) reports Gov. Mike Pence called the ruling “judicial activism” and Rep. Matt Salmon (R-AZ) questioned whether Roberts could still be called a conservative. Salmon said, “I don’t know that you can

HOUSE TO VOTE ON INTERIOR-EPA SPENDING BILL THIS WEEK. The [E&E Daily](#) (6/22, Subscription Publication) reports that "the House this week will take up a fiscal 2016 spending plan for the Interior Department and U.S. EPA that includes several policy riders aimed at key Obama administration environmental regulations." House Appropriations Chairman Hal Rogers has said that "both the bill's funding levels and the policy provisions would put a halt to regulations that Republicans believe are crippling industry."

Also providing coverage are the [Wall Street Journal](#) (6/23, Harder, 5.68M) and [The Hill](#) (6/22, Marcos, Carney, 533K).

CIVILIAN CONSERVATION CORPS TURNS TO INTERIOR, USDA FOR HELP. The [Greenwire](#) (6/22, Subscription Publication) reports that members from the Civilian Conservation Corps "tromped from the Franklin D. Roosevelt Memorial out across the nation's capital Friday" during the Corps Network's second annual Day of Service. The group "brought together 150 members of modern-day service organizations, the scions of the CCC, Roosevelt's New Deal program, for a day of fence painting and trail clearing at three national park sites during 'Great Outdoors Month,' as the Obama administration pushes to grow the ranks of youth corps nationwide to 100,000." President and CEO Mary Ellen Sprenkel said "modern politics make replicating a multibillion-dollar federal effort that put thousands of young men to work on public lands during the Great Depression all but impossible." According to the article, "asking Congress for more money to reach the goal of a 100,000-strong workforce is a non-starter, so the Corps Network has turned to the Interior and Agriculture departments for help."

INCLUSION OF LAKE BERRYESSA IN PROPOSED BERRYESSA NATIONAL MONUMENT UNCERTAIN. [KQED-FM](#) San

Francisco (6/20, 40K) reports that “a 360,000-acre patchwork of federal lands north of the Bay Area may yet become California’s next national monument, but it will happen without a major component — or so it seems.” According to the article, “how Lake Berryessa came to be removed from the proposed Berryessa-Snow Mountain National Monument remains a mystery even to the most keen observers.” Rep. Mike Thompson’s “latest version of the bill, which remains stalled in committee, is murky on the status of the 20,000-acre lake, currently managed by the federal Bureau of Reclamation.”

INTERIOR’S INSTAGRAM ACCOUNT GAINS POPULARITY. The [National Journal](#) (6/22, Subscription Publication, 156K) reports that the Interior Department has “access to photos posted by employees and volunteers on 435 Facebook accounts for national parks, wildlife refuges and public lands.” The “photos have proved to be popular with the #naturelovers of Instagram.” Rebecca Matulka, Interior’s senior digital media strategist who runs the account, says “she sometimes notices users comment on a photo thinking it’s from National Geographic, and then they correct themselves.” Matulka said, “That is pretty amazing that they think our photos are up with that quality.”

Additional coverage of the Interior Department’s use of social media was provided by the [Daily Mail \(UK\)](#) (6/23, 5.37M).

CONTINUING COVERAGE OF WILDFIRES. Continuing coverage of various wildfires was provided by [Fox News](#) (6/23, 9.4M), the [Arizona Daily Sun](#) (6/23, 34K), the [Elko \(NV\) Daily Free Press](#) (6/23, 22K), the [San Francisco \(CA\) Chronicle](#) (6/23, Subscription Publication, 2.92M), the [Idaho Statesman](#) (6/22, 199K), the [Salem \(OR\) Statesman Journal](#) (6/22, 30K), the [Ontario \(OR\) Argus Observer](#) (6/23, 19K), the [Riverside \(CA\) Press Enterprise](#) (6/23, 395K), the [Casa Grande \(AZ\) Dispatch](#) (6/23, 24K), the [Houston \(TX\) Chronicle](#) (6/23, Weber, 2.29M), the [Houston \(TX\) Chronicle](#) (6/23), and the [Washington \(DC\) Post](#) (6/23, Christopher Weber |, Ap).

CONGRESS URGED TO REAUTHORIZE AND FUND LWCF. For the “Congress” blog of [The Hill](#) (6/23, Peterman, 533K), Frank Peterman, a conservationist, warns that the Land and Water Conservation Fund is “at a particularly precarious and vulnerable time this summer.” He writes that “with its authorizing legislation expiring in September, it’s urgent that Congress hears from the public how vital it is to reauthorize the bill and acts to save the fund.” Peterman asserts that “our elected officials can and must reauthorize and fully fund this program that has been ensuring access to our public lands and preserving our heritage for a half-century.”

America’s Great Outdoors:

National Park Service:

STUDY SAYS WARMER WEATHER WILL DRIVE VISITORS TO NATIONAL PARKS. The [ClimateWire](#) (6/22, Subscription Publication) reports that “a new study concludes that as temperatures rise, managers of many of America’s national parks – from Maine’s Acadia to California’s Redwood – should brace for even bigger crowds during peak travel season.” Led by researchers with the NPS, “the study found that the number of visitors in many U.S. national parks is highly likely to change as the planet warms.” The article notes that “the study projects that by 2060, the national park system will see an increase in visitation of up to 23 percent.”

FOURTH GRADERS CAN VISIT NATIONAL PARKS FOR FREE. The [Tampa \(FL\) Tribune](#) (6/22, 491K) reports that “the National Park Foundation is offering all fourth graders in the United States and their families a school year’s worth of free access to any U.S. national parks.” Once registered under the “Every Kid in a Park” program, “the family of the fourth grade student will be given a voucher that grants free entrance to the child plus a carload of passengers to federal recreation areas for a year.”

NPS REASSURES DEL. NORTON OF SAFETY OF WASHINGTON MONUMENT ELEVATOR. The [Roll Call](#) (6/23, 99K) reports that “after meeting with National Park Service officials, Del. Eleanor Holmes Norton, D-D.C., is certain the Washington Monument elevator is safe to ride, following a string of electrical issues that led to recent closures.” Norton said in a statement, “After hearing today’s briefing I would not hesitate to bring my 3-year-old grandson and his brother, who is two months old, to ride the elevator to the top of the monument. hope that the thousands of visitors who come to the nation’s capital during this busy tourist season are also reassured.”

US PARK POLICE REACHES SETTLEMENT OVER PROTEST TACTICS. The [Washington Post](#) (6/23, Hsu, 5.03M) reports that a federal judge, ending “a 13-year legal struggle,” gave “final approval Monday to a settlement in which the federal government agreed to new terms of engagement with demonstrators in the nation’s capital and to pay \$2.2 million to almost 400 protesters and bystanders swept up by U.S. and local police during a September 2002 demonstration against the World Bank.” Washington, DC “in 2010 agreed to pay \$8.25 million to the same class-action litigants, who were picked up in a mass arrest at Pershing Park, and also agreed to overhaul police practices to protect the First Amendment rights of protesters.” In approving the deal, US District Judge Emmet G. Sullivan “called the settlement ‘historic’ and said it could guide police agencies nationwide.” It is significant this agreement is with the federal government, because the Department of Justice is reviewing the practices and the policies of local law enforcement agencies,” Sullivan said.

GRANT TO SUPPORT DOCUMENTATION OF JAPANESE AMERICAN INTERNMENT. The [Santa Clarita Valley \(CA\) News](#) (6/22, 431) reports that “archives at 15 California State University campuses are collaborating to digitize nearly 10,000 documents and more than 100 oral histories related to the confinement of Japanese Americans during World War II.” The NPS recently “awarded a two-year \$321,554 grant to CSU Dominguez Hills, which is serving as the principal investigator for the CSU Japanese American Digitization Project.” The article notes that “the grant was one of 20 awarded by the National Park Service totaling more than \$2.8 million to help preserve and interpret the World War II confinement sites of Japanese Americans.”

SEN. GILLIBRAND ANNOUNCES EFFORT TO DESIGNATE FINGER LAKES AS NATIONAL HERITAGE AREA. The [Corning \(NY\) Leader](#) (6/22, 757) reports that Sen. Kirsten Gillibrand “wants the world to know about the Finger Lakes Region, so she’s agreed to champion the effort to seek its designation as a National Heritage Area.” Gillibrand “came to Penn Yan Monday afternoon to announce her plans to push for federal legislation to fund a feasibility study of the Finger Lakes Region (Cayuga, Chemung, Cortland,

Livingston, Monroe, Onondaga, Ontario, Schuyler, Steuben, Tioga, Tompkins, Wayne and Yates counties) for the potential designation." If the legislation passes, the NPS will conduct the study.

Additional coverage was provided by the [Victor \(NY\) Post](#) (6/22).

GROUP PUSHES FOR VOLVON NATIONAL PARK. The [San Francisco Chronicle](#) (6/23, Subscription Publication, 2.92M) reports that "a renewed push for a new national park in the Bay Area could settle the debate over historic American Indian sites." According to the article, "a group called the East Bay Hill People has envisioned Volvon National Park, a combination of existing parks from Mount Diablo to the east that overlay historic territory of the Volvon tribe." James Benney of the East Bay Hill People, said, "We have identified over 80 intact villages and campsites and over 2,000 mortar holes in Volvon territory alone."

OCMULGEE NATIONAL MONUMENT CLOSER TO BECOMING NATIONAL PARK. [WMGT-TV](#) Macon, GA (6/23) reports that "the Ocmulgee National Monument is one step closer to becoming a national park." Last week, legislators "introduced a bill that would change the site's name as well as create a larger boundary for the existing area."

RESEARCHERS COLLECTING DATA ON VISITOR TRENDS OF GRAND TETON NATIONAL PARK. The [Logan \(UT\) Herald Journal](#) (6/23, 47K) reports that "Utah State University and other universities are collecting data on visitor experiences in the popular Grand Teton National Park to help park officials with a comprehensive management plan." USU's Quinney College of Natural Resources and Pennsylvania State University have "compiled reports and continue to collect data on who is visiting the Moose-Wilson corridor and why, how they are moving through it and their expectations." According to the article, "people-tracking by researchers at both Penn State and USU is helping Grand Teton National Park make decisions about a popular southern approach to the park, including whether they should add parking areas, restrooms and a multipurpose trail along the way."

VOTE TO BE HELD ON PROPOSED NATIONAL PARK IN MAINE. The [Bangor \(ME\) Daily News](#) (6/22, 179K) reports that "voters will take a stance on a proposed north woods national park and recreation area in a nonbinding referendum on Tuesday, June 23." Town Administrative Assistant Kathy Lee said Monday that "the Board of Selectmen endorses the proposal but was not speaking for townspeople." The article notes that "the board's endorsement came with eight conditions it outlined in a March 2 letter to members of the state's federal delegation."

Additional coverage was provided by the [AP](#) (6/23, 641K).

ENTRANCE FEES AT PETRIFIED FOREST INCREASING. The [Arizona Republic](#) (6/21, 1.27M) reports that "entrance fees at the Petrified Forest National Park are going up later this year." The NPS announced that "the fee increase will occur on October 1 and will pay for important maintenance and improvement projects within the park in northeastern Arizona."

YELLOWSTONE VISITATION FOR 2015 JUMPS. The [AP](#) (6/23, 2.29M) reports that "Yellowstone National Park has seen about 24 percent more visitors January through May of this year compared to the same time period in 2014." The NPS says "some of that increase could be attributed to a new after-hours counter at the park's West Entrance." However, "it also credits a mild winter and early spring for drawing more people to the park."

Additional coverage was provided by the [Minneapolis \(MN\) Star Tribune](#) (6/23, Press, 1.29M), the [Washington \(DC\) Post](#) (6/23, Press, 5.03M), the [Washington \(DC\) Times](#) (6/23, 641K), the [Jackson Hole \(WY\) News & Guide](#) (6/23, 1K), and the [Casper \(WY\) Star-Tribune](#) (6/23, 99K).

SMALL AIRCRAFT MAKES EMERGENCY LANDING NEAR HOOVER DAM. The [AP](#) (6/23, Ho) reports that the NTSB and the FAA are investigating a small plane that made an emergency landing onto Boulder Beach, near the Hoover Dam, causing at least two of the female passengers aboard some minor injuries. The aircraft landed between two portable restrooms, but neither was damaged. The FAA however "said the downed plane's left elevator, left wing and landing gear were damaged," the AP reports. Authorities closed off a section of the beach to remove the airplane and conduct an investigation.

The [Las Vegas Review-Journal](#) (6/23, Laux, 380K) reports that the three female occupants of the 1979 Piper PA-32P-301, as well as the pilot suffered some scrapes and bruising, but were not hospitalized. The Park Service too is investigating the incident alongside the NTSB and the FAA.

[KXNT-AM](#) Las Vegas (6/22, 10K) reports there has been "no word on the cause of the incident," which will be investigated by the FAA and likely by the NTSB.

The [Las Vegas Sun](#) (6/22, 176K) and [KSNV-TV](#) Las Vegas (6/23, 12K) also cover the story.

AUTHORITIES FIND BODY OF MAN REPORTED MISSING IN BUFFALO NATIONAL RIVER . The [AP](#) (6/23, 30K) reports that "authorities have recovered the body of a Missouri man reported missing in the Buffalo National River last week during rough weather." The NPS says "search crews on Monday morning found the body of 22-year-old Curtis Miller of Independence, Missouri." The agency says "Miller's body was found in sandbar about 2 miles downstream from Grinder's Ferry in Searcy County, Arkansas, where Miller was last seen swimming Thursday evening."

Additional coverage was provided by the [Arkansas Democrat Gazette](#) (6/22, 342K), the [Houston \(TX\) Chronicle](#) (6/23, 2.29M), and the [Kansas City \(MO\) Star](#) (6/23, 590K).

MAN DIES AFTER RAFTING ACCIDENT IN DINOSAUR NATIONAL MONUMENT. The [Steamboat \(CO\) Pilot & Today](#) (6/22, 30K) reports that "the body of a 34-year-old Denver man was recovered in the Green River Monday, two days after he disappeared in a rafting accident in Dinosaur National Monument, according to officials."

Additional coverage was provided by the [Denver \(CO\) Post](#) (6/23, Paul, 894K).

Bureau of Land Management:

GARFIELD COUNTY BLAMES GRAND STAIRCASE FOR LOW SCHOOL ENROLLMENT. The [Salt Lake \(UT\) Tribune](#) (6/23, 470K) reports that “alarmed about dropping school enrollment, the Garfield County Commission on Monday declared a ‘state of emergency,’ claiming restrictive federal land management policies are endangering the future of Escalante, Panguitch and other communities in the southern Utah county.” It claims that the BLM and the U.S. Forest Service “refuse to collaborate with counties in decision-making, according to the declaration unanimously approved by the commission.” Escalante Mayor Jerry Taylor said, “We need good jobs and something to sustain our community. It’s tough right now. Tourism is up. We promote it, but we need something more. We can’t have all our eggs in one basket.”

Additional coverage was provided by the [Deseret \(UT\) News](#) (6/23, 538K) and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (6/23, 1.07M).

BLM SEEKS INPUT ON UTAH COUNTY SHOOTING RESTRICTIONS. The [Deseret \(UT\) News](#) (6/23, 538K) reports that the BLM is “seeking public input to determine target shooting restrictions in an area of northwest Utah County.” According to the article, “the area includes about 8,124 acres of public lands located within the area known as Lake Mountain in Utah County, west of Utah Lake and near Saratoga Springs and Eagle Mountain.”

BLM ANNOUNCES NEW UTAH RESOURCE COUNCIL APPOINTMENTS. The [Deseret \(UT\) News](#) (6/23, 538K) reports that the BLM has “appointed three new members and reappointed another to its Utah Resource Advisory Council.” According to the article, “new members are Daniel McClendon of Kanab, who has a background in energy issues; Rich County Commissioner William Cox; and Willie Grayeyes of Navajo Mountain, representing Indian tribes.” Steven Burr, of Moab, who specializes in recreation, was reappointed to the council.

FEDERAL GOVERNMENT URGED TO HOLD BUNDY ACCOUNTABLE FOR STANDOFF. In an op-ed for the [Las Vegas Review-Journal](#) (6/23, 380K), David Jenkins, president of Conservatives for Responsible Stewardship, criticizes the Obama Administration for failing to hold Cliven Bundy accountable for the armed standoff he incited more than a year ago. He claims that the government’s actions has only served to embolden Bundy and encourage further lawlessness and intimidation. Jenkins urges the government to bring Cliven Bundy and those who took up arms against law enforcement in the standoff to justice.

Fish and Wildlife Service:

FUNDING WILL HELP PROTECT SAGE GROUSE. The [Reno \(NV\) Gazette-Journal](#) (6/22, 178K) reports that “funding to help protect Bi-State Distinct Population Segment of the greater Sage Grouse from wildfire was announced Friday by U.S. Sen. Harry Reid, D-Nev.” The announcement included that the Interior Department will “award \$4.3 million to Nevada to restore the health and fire resilience of iconic landscapes in the states, including \$395,000 for the Bi-State Sage Grouse in Nevada and a portion of eastern California.”

Additional coverage of the sage grouse was provided by the [High Country \(CO\) News](#) (6/23, 74K) and the [Ecosystem Marketplace](#) (6/23).

PROGRAM DEVELOPED FOR 13 STATES TO CATALOG CULVERTS. The [AP](#) (6/21, Ring, 641K) reports that “Vermont, which has been assessing its culverts for about a decade, helped develop a program being put into place for 13 Eastern states that are contributing to a regional database of those road-stream crossings that will help policymakers decide which culverts should be replaced or upgraded first, said Rich Kirn, a biologist with the Department of Fish and Wildlife who has helped lead Vermont’s efforts.” A program involving “13 states along with the Vermont Agency of Natural Resources, the Nature Conservancy and the U.S. Fish and Wildlife Service” has been developed. The article notes that “the collaborative is funded with \$475,000 from the North Atlantic Landscape Conservation Cooperative through the Disaster Relief Appropriations Act of 2013, which dedicates federal funds for Superstorm Sandy recovery.”

SUPREME COURT DECLINES APPEAL OF TEXAS WHOOPING CRANE CASE. The [Greenwire](#) (6/22, Subscription Publication) reports that the Supreme Court on Monday “declined an appeal by conservationists claiming Texas’ water management unlawfully threatened endangered whooping cranes.” Environmentalists said that “the state was permitting too much water to be drawn from the San Antonio and Guadalupe rivers.” According to the environmentalists, “that practice was depleting the Aransas Wildlife Refuge, the winter home to the world’s only flock of whooping cranes.”

GROUPS FILE LAWSUIT OVER MONTANA MINES’ IMPACT. The [Greenwire](#) (6/22, Subscription Publication) reports that “environmental and conservation groups are suing the Fish and Wildlife Service over permitting for what could become one of the world’s largest copper and silver mines in Montana’s Cabinet Mountains.” Save Our Cabinets, Earthworks and Defenders of Wildlife claim “the agency’s biological opinion making way for development of Mines Management Inc.’s Montanore project doesn’t take enough account of the mine’s potential impact on grizzly bears and bull trout.” The groups, “which filed their lawsuit in Missoula U.S. District Court, say FWS asserting the mine and animals can coexist goes against the agency’s own science.”

FWS WEIGHING PROTECTIONS FOR ALEXANDER ARCHIPELAGO WOLVES. The [Environment & Energy Publishing](#) (6/22, 705) reports that “the Alaska Department of Fish and Game confirmed last week that the population of Alexander Archipelago wolves on the largest island in the chain plummeted last year, yet it didn’t recommend any changes to the upcoming wolf hunting season.” According to the article, “citing a draft report from the ADFG, the U.S. Forest Service previously warned that the ‘dramatic decline’ in the smaller, darker subspecies of gray wolves on Prince of Wales Island could complicate its long-running plan to allow logging in the Tongass National Forest, which spans much of the Alexander Archipelago (Greenwire, June 8).” The FWS is “weighing whether Endangered Species Act protections are warranted for Alexander Archipelago wolves, which rely on the roots of old-growth trees in

the Tongass to create their dens.”

FLORIDA COMMISSION PROPOSES TO SHIFT FOCUS IN EFFORTS TO SAVE PANTHERS. The [Naples \(FL\) Daily News](#) (6/23, 186K) reports that “Florida’s top wildlife agency is proposing to back away from a key piece of a federal plan to save the Florida panther from extinction.” According to the article, “in a draft position paper set to get an airing Tuesday at a meeting of the Florida Fish and Wildlife Conservation Commission in Sarasota, the agency says it will not work to relocate panthers north of the Caloosahatchee River as a way to give panthers more room to roam.” Instead, the commission says “it plans to focus its efforts first on keeping the growing population south of the river at a sustainable level and finding ways for panthers and people to coexist.”

Additional coverage was provided by the [Wall Street Journal](#) (6/23, Campo-Flores, Subscription Publication, 5.68M).

CONSTRUCTION COMPANY TO PAY \$20K FOR DISTURBING PLANTS IN MINNESOTA VALLEY NATIONAL WILDLIFE REFUGE. The [AP](#) (6/23, 2.29M) reports that “the U.S. Attorney’s office says a Hugo construction company has agreed to pay \$20,000 for allegedly disturbing plants in a national wildlife refuge.” Lametti & Sons Inc. “agreed to pay a \$10,000 fine and \$10,000 in restitution to the nonprofit group Refuge Friends Inc.” According to the article, “a criminal petty offense citation charged the company with one count of disturbing plants last summer in the Minnesota Valley National Wildlife Refuge.”

Additional coverage was provided by the [Minneapolis \(MN\) Star Tribune](#) (6/23, Press, 1.29M), the [St. Paul \(MN\) Pioneer Press](#) (6/23, 484K), and [WCCO-AM Minneapolis \(MN\)](#) Minneapolis (6/22, 70K).

ADDITIONAL COVERAGE: CONFISCATED IVORY CRUSHED IN TIMES SQUARE TO HIGHLIGHT ELEPHANT POACHING. Additional coverage of the ivory crush in Times Square was provided by the [Government Executive](#) (6/23, 2K), the [Courier Mail \(AUS\)](#) (6/23, 22K), [Vice](#) (6/23, 1.43M), and [Business Insider India](#) (6/23).

US Geological Survey:

CLIMATE CHANGE IMPACTING THE NAVAJO NATION. [KNPR-FM](#) Las Vegas (6/23, 3K) reports that “a third of the Navajo Nation is now covered with sand dunes — the result of climate change.” Margaret Hiza Redsteer, a research scientist for the USGS, said, “It’s a losing battle, unfortunately. They have to plow the road quite frequently to keep the road open so they can get in and out to their house.”

Securing America’s Energy Future:

Renewable Energy:

HOUSE PANEL TO REVIEW BLM’S MANAGEMENT OF RECLAMATION BONDS. The [E&E Daily](#) (6/22, Subscription Publication) reports that “a House Natural Resources panel Wednesday will review a new report by the Government Accountability Office that committee Republicans say documents the Bureau of Land Management’s ‘chronic mismanagement’ of wind and solar reclamation bonds.” The report, requested by former committee Chairman Doc Hastings, has been “delivered to the committee but has not yet been released to the public.” The committee has “not disclosed any details of the report’s findings.”

Onshore Energy Development:

JUDGE TO RULE SOON ON FEDERAL DRILLING RULES. The [AP](#) (6/23, Gruver) reports that US District Judge Scott Skavdahl is expected to rule on new drilling rules from the federal Bureau of Land Management before they take effect Wednesday. Four states and the petroleum industry have sued the Interior Department, saying that the regulations that require developers to disclose chemical products used in fracking are duplicative and would be an unnecessary burden. They are asking Skavdahl to suspend implementation while litigation continues. The six-hour hearing is scheduled for Tuesday. Six environmental groups have filed in support of the government.

Additional coverage was provided by [Bloomberg Politics](#) (6/23, 161K), the [Minneapolis \(MN\) Star Tribune](#) (6/23, Gruver, 1.29M), the [Houston \(TX\) Chronicle](#) (6/23, Gruver, 2.29M), the [San Diego \(CA\) Union-Tribune](#) (6/22, 579K), the [Daily Mail \(UK\)](#) (6/23, 5.37M), [Yahoo! News](#) (6/23, Gruver, 6.18M), [KMGH-TV Denver \(CO\)](#) Denver (6/23, 124K), [KFYR-TV Bismarck \(ND\)](#) Bismarck, ND (6/23, 1K), and [KTWO-AM Casper \(WY\)](#) Casper, WY (6/23, 576).

SOUTHERN UTE INDIAN TRIBE SUES BLM OVER FRACKING RULE. The [EnergyWire](#) (6/22, Subscription Publication) reports that “the Southern Ute Indian Tribe filed suit late last week in U.S. District Court for the District of Colorado, arguing that the Bureau of Land Management’s new rule for fracking on public and American Indian lands conflicts with the tribe’s sovereignty.” Chairman Clement Frost said in a statement Friday, “The Tribe values the Reservation environment, but the BLM was overreaching when it enacted this rule for tribal lands. Tribal lands should be treated differently than federal lands.”

Additional coverage was provided by the [Courthouse News](#) (6/22, 7K), the [Albuquerque \(NM\) Journal](#) (6/23, 241K), and the [Natural Gas Intelligence](#) (6/23, Subscription Publication).

BLM APPROVES COAL LEASE IN UTAH. [KUER-FM](#) Salt Lake City (6/23, 3K) reports that “the federal government approved a big coal lease in central Utah Friday over the objections of environmental groups.” WildEarth Guardians, Greenpeace and other environmental groups asked the BLM “earlier this month to scrap an auction for 42 million tons of coal in Sanpete County.” However, “the agency went ahead Thursday and approved the \$17 million sale, adjacent to the Skyline Mine.” Megan Crandall, spokeswoman for the BLM’s Utah office, says “the lease could mean work for 300 miners and federal royalties of \$100 million that would be split with Utah.”

TEXAS APPROVES MONEY FOR EARTHQUAKE STUDY. The [Dallas \(TX\) Morning News](#) (6/23, Wilonsky, 1.09M) reports that Texas Gov. Greg Abbott has approved \$4.47 million to fund the TexNext Seismic Monitoring Program to gather data on earthquakes in the state. The program will place 22 seismometers around the state and will send data to the Bureau of Economic Geology, run out of the University of Texas at Austin. The [Fort Worth \(TX\) Star-Telegram](#) (6/23, Baker, 489K) reports that the seismometers will join 16 already in place. State Rep. Drew Darby, chairman of the House Energy Resources Committee said that increased seismic activity spurred the appropriation, telling the Star-Telegram that “Someone was telling us we needed to listen and we listened appropriately and we have a measured response.” The move comes as there is disagreement between academia, industry, and regulators over whether or not fracking wastewater wells in North Texas are triggering the tremors.

ADDITIONAL COVERAGE: REPORT CALLS FOR UPDATE OF ROYALTY RATE. Additional coverage of the report issued by the Center for American Progress calling for an update of the royalty rate was provided by the [Natural Gas Intelligence](#) (6/23, Subscription Publication).

Offshore Energy Development:

BOEM COMPLETES GULF OF MEXICO LEASE SALE. The [Marine Link](#) (6/23, 1K) reports that the BOEM “completed its required evaluation of bids to ensure that the public receives fair market value for tracts leased as part of the Gulf of Mexico Central Planning Area Oil and Gas Lease Sale 235.” According to the article, “the sale held on March 18, 2015, made 7,788 unleased blocks covering about 41.2 million acres offshore Louisiana, Mississippi and Alabama available for lease.” The BOEM “awarded 161 leases on tracts covering 923,711 acres to the successful high bidders who participated in the sale.”

COAST GUARD CLEARS SHELL DRILLSHIP BOUND FOR ARCTIC. The [Fuel Fix \(TX\)](#) (6/22, Dlouhy, 7K) reports that Shell’s Noble Discoverer, “now docked in Washington state waters, has received a critical ‘certificate of compliance’ from the U.S. Coast Guard verifying it meets a host of safety and security requirements.” According to the article, “since a May 20 Coast Guard inspection, Shell and Noble cleared more than a dozen violations documented at the vessel.” However, “it remains unclear when the rig might begin venturing north, with critical federal permits still pending and Shell’s other Arctic rig, the Transocean Polar Pioneer, already en route.”

FITCH: DEEPWATER HORIZON COULD HAUNT BP’S RATINGS FOR YEARS. [Bloomberg News](#) (6/22, Katakey, 3.81M) reports that Fitch Ratings downgraded BP’s outlook to “negative” over lower crude prices and the imminent ruling over fines sought by the US Government in relation to the 2010 Deepwater Horizon oil spill. The rating itself remained at A. Fitch said in a statement that BP’s ability to respond to low prices is constrained by the need to hoard cash to cover what could be a \$13.7 billion payout mandated by the American justice system. Such a hit would push BP’s debt levels above its guidance through 2020. The [San Antonio \(TX\) Express-News](#) (6/22, Eaton, 670K) reports that Fitch cited the oil company’s “continued uncertainty” over the fine and the fact that it has only set aside \$3.5 billion for the judgment. Further, BP hasn’t settled a combined \$35 billion in claims from five US states over the spill, though Fitch said that it doesn’t expect eventual rulings to reach that high. The company’s A rating comes from the fact that it is sufficiently capitalized to pay off its debts over the course of several years.

ENERGY XXI TO SELL GULF PIPELINE SYSTEM FOR \$245 MILLION. [Fuel Fix \(TX\)](#) (6/22, Meyers, 7K) reports that Energy XXI “will sell a subsea pipeline system in the shallow waters of the Gulf of Mexico for \$245 million as part of a broader campaign to shed assets and increase cash.” CorEnergy, a real estate trust that holds midstream assets, will buy the 153-mile pipeline system in a deal that is still being negotiated.

TESTING CONTINUES TO DETERMINE EXPANSE OF SANTA BARBARA OIL SPILL. The [AP](#) (6/23, Melley) reports that test results released Monday show that tar from the Santa Barbara oil spill washed up at least as far away as Manhattan Beach in Los Angeles County. Testing continues on samples found farther south at San Clemente Beach in Orange County, but the Department of Fish and Wildlife has not yet declared that the spill was responsible for the oil and tar debris found there.

The [Los Angeles Times](#) (6/23, Panzar, 4.03M) and [Reuters](#) (6/23, Gorman) also provide coverage.

Tackling America’s Water Challenges:

HOUSE SUBCOMMITTEE TO TAKE UP MEASURES TO BOOST WATER SUPPLY. The [E&E Daily](#) (6/22, Subscription Publication) reports that “with more than a third of the West gripped by severe drought or worse, a House Natural Resources Committee subpanel will this week take up a handful of measures aimed at boosting some local supplies and getting a grip on the state of the federal government’s infrastructure.” Rep. John Fleming’s Subcommittee on Water, Power and Oceans will “take the measures up at a Thursday morning hearing.”

CALIFORNIA AGENCIES CLAIM FARMERS ARE ILLEGALLY DIVERTING WATER. The [ClimateWire](#) (6/22, Subscription Publication) reports that “as the California drought rages on, a group of 27 public water agencies is lodging a complaint with the State Water Resources Control Board (SWRCB) asking for an immediate order to block farmers in the southern part of the Sacramento-San Joaquin River Delta from diverting water for crop irrigation.” The State Water Contractors (SWC), “a coalition of water agencies representing about 26 million Californians, says farmers in the delta south of the San Joaquin River are illegally diverting between 100,000 and 300,000 acre-feet of water per year.” According to the article, “in the complaint filed last week, the SWC provided calculations from two models, which it says proves farmers in this region of the delta illegally took enough water to serve more than 2 million people last year.”

GRAND CANYON FLOODS ARE REBUILDING SANDBARS. The [High Country \(CO\) News](#) (6/23, 74K) reports that “strategically timed surges of water...released from Lake Powell to create artificial floods” is “working as intended” according to scientists. The article notes that “many sandbars are growing again.” The researchers note that “the continued success of floods as a management tool is dependent on good monsoons in the future.” However, “how seasonal storm patterns in the Southwest might be affected by

climate change is still highly uncertain.”

BOR WARNS OF RISING WATER LEVELS ON PECOS RIVER. The [AP](#) (6/23) reports that “federal officials are warning that water levels on the Pecos River will be rising in the coming days.” The BOR says “it’s moving water downstream for farmers who are part of the Carlsbad Irrigation District.” According to the article, “the release from Santa Rosa Reservoir began Monday morning,” and “water will be released from Sumner Reservoir on Tuesday, once the water from Santa Rosa arrives.”

JUDGE TO HEAR ARGUMENTS ON COLUMBIA RIVER DAMS AND SALMON. [Oregon Public Broadcasting](#) (6/23, 3K) reports that “the longstanding legal battle over maintaining dams and salmon in the Columbia River is back in court this week.” On Tuesday, Oregon U.S. District Court Judge Michael Simon will “hear arguments on the Obama administration’s latest salmon plan.” Simon took over the case when Judge James Redden retired.

100TH ANNIVERSARY OF LAHONTAN DAM CELEBRATED. The [Reno \(NV\) Gazette-Journal](#) (6/22, 178K) reports that “on Saturday, the Truckee-Carson Irrigation District and a handful of regional and U. S. Bureau of Reclamation officials and water users gathered to celebrate the 100th anniversary of the construction of the Lahontan Dam.”

Empowering Native American Communities:

LAWSUIT BY CHICKASAW AND CHOCTAW NATIONS CLAIMS GOVERNMENT MISMANAGEMENT OF ASSETS. The [Bartlesville \(OK\) Examiner-Enterprise](#) (6/23, 602) reports that “citing a history of corruption and swindles that dates back more than 100 years, the Choctaw and Chickasaw Nations are asking a judge to order federal agencies to provide a full accounting for how they have managed tribal trust assets.” The tribes also “want compensation to make them ‘whole.’” According to the article, “if current mediation efforts fail, a non-jury federal court trial is scheduled to begin July 14 in Oklahoma City before U.S. District Judge Lee R. West.”

Also reporting on the story is [KJRH-TV](#) Tulsa, OK (6/23, 41K).

Top National News:

OBAMA USES EPITHET IN INTERVIEW TO UNDERSCORE POINT ON RACE RELATIONS. Media coverage – including reports on all three broadcast networks – of President Obama’s [podcast interview](#) with Marc Maron focused largely on the President’s use of one word in discussing racism in the wake of the killing of nine people at Emanuel African Methodist Episcopal Church in Charleston, South Carolina last week. There is little media or commentator criticism of the President for using the term in the context of the wider discussion, but some reports and pundits suggest the use of the epithet may overshadow the wider message.

[ABC World News](#) (6/22, story 2, 1:30, Muir, 5.84M) reported the interview is “making national headlines...because of a word he used, something we have not heard from this president or any other president in recent times.” Obama: “Racism, we are not cured of it. And it’s not just a matter of it not being polite to say [bleeped] in public. That’s not the measure of whether racism still exists or not.” ABC (Karl): “Those are blunt words for a president who has had to address the issue of race over and over again...and the White House has said the President has absolutely no regrets about using that word.”

The [CBS Evening News](#) (6/22, story 3, 2:25, Pelley, 5.08M) reported Obama “said racism is ‘still part of our DNA,’ then he doubled down with six letters that perhaps only the President can get away with saying in public.” CBS (Garrett) added, “The White House said the President did not plan on using the ‘n’ word, but that he had no regrets. It was the first time he has used that word in public as president.” CBS noted that Obama “used the ‘n’ word more than ten times in his memoir ‘Dreams From My Father,’” and added that “the only other known public presidential utterance came from Bill Clinton in 1995 when he discussed seeds of hate in America.”

[NBC Nightly News](#) (6/22, story 2, 2:45, Holt, 7.86M) said Obama spoke “about race in the most blunt language the American public has ever heard from him. In doing so he used a controversial word, one steeped in a legacy of hate, to make his point.” NBC (Welker) said, “Out of sensitivity, NBC News has decided to bleep out the word.” While most print and online media did publish Obama’s remarks unedited, [USA Today](#) (6/23, Jackson, 5.01M), [Politico](#) (6/22, Gass, 1.11M), and [The Hill](#) (6/22, Fabian, 533K) edited out the offensive word.

The [AP](#) (6/23, Pickler) reports that “coarse language is often part of the discussion” on the Maron program, but White House Press Secretary Josh Earnest said Obama “didn’t plan in advance to use the word to be provocative...but was simply making a point during a casual, free-flowing interview. He said he didn’t recall ever hearing the president say the racial slur aloud before, but noted that it did appear” in his memoir. [The Hill](#) (6/22, Fabian, 533K) says the “discussion about race consumed cable news chatter,” and Earnest “fielded more than a dozen questions about Obama’s comments at his daily briefing with reporters.”

[USA Today](#) (6/23, Jackson, 5.01M) says Obama “used a racial slur to underscore his point that, while the United States has made great progress on race relations, more work needs to be done,” according to Earnest. USA Today writes, “The use of the so-called ‘n word’ generated intense debate on social media.” Previous presidents “have used the term privately, according to the historical record.” [Reuters](#) (6/23, Edwards, Spetalnick) reports that Randall Kennedy, author of a 2001 book on the history of the term, said Harry Truman, Lyndon Johnson, and Richard Nixon were known to do so.

The [New York Times](#) (6/23, Shear, Hauser, Subscription Publication, 12.24M) says Obama and Maron had “a wide-ranging conversation about race” in which the President discussed “his own upbringing as a man born to a black father and a white woman.” The Times says Obama “has been more open about the issue of race during his second term, in part because of racially charged episodes in the last several years” including the killing of Trayvon Martin and several high-profile police shootings of unarmed black men.

The [Washington Post](#) (6/23, Delreal, 5.03M) says Obama “made a startling declaration about race relations in America...and it's not exactly what he said, but how he said it.” While his word choice is getting attention, the Post says Obama emphasized “that race relations have dramatically improved in recent decades.” The President said, “I always tell young people in particular: do not say that nothing has changed when it comes to race in America unless you lived through being a black man in the 1950s, or 60s, or 70s. It is incontrovertible that race relations have improved significantly during my lifetime and yours and that opportunities have opened up and that attitudes have changed.” The [Wall Street Journal](#) (6/23, Tau, Subscription Publication, 5.68M) reports Obama also said the US has a legacy of centuries of racism to overcome, and that that cannot change “overnight.”

Obama was less optimistic about the prospects for gun control in the aftermath of this most recent mass shooting. [Politico](#) (6/22, Gass, 1.11M) said Obama “doesn't foresee any progress for the time being.” He told Maron, “The grip of the NRA on Congress is extremely strong. I don't foresee any legislative action being taken in this Congress and I don't foresee any real action being taken until the American public feels a sufficient sense of urgency and they say to themselves, ‘This is not normal, this is something that we can change, and we're going to change it.’” [McClatchy](#) (6/23, Clark, 32K) adds that Obama “repeated that he's spoken about gun violence ‘too many times’ and called it ‘not enough just to feel bad.’”

Appearing on [MSNBC's Andrea Mitchell Reports](#) (6/23, 487K), Rep. Jim Clyburn (D-SC) said Obama “was being the professor that he used to be before he became a United States senator. ... The problem we have today is when you try to lay out such an elongated explanation, we live in sort of a sound bite world. So people will lift the word out, lift that one sentence out, and people lose the context.”

NAACP President/CEO Cornell William Brooks said on [CNN's Situation Room](#) (6/23, 554K), “The NAACP several years ago buried the ‘n’ word, plain and simple. That word, however, is being resurrected not by the President's podcast but by contemporary events. And so we condemn the use of the word, but we commend the President trying to have an honest and frank conversation about race.”

On [Fox News' Special Report](#) (6/23, Baier, 1.53M), Wesley Lowery of the Washington Post said, “I didn't have an issue with the President's use of the ‘n’ word in this instance in part because this was a conversation about the word in the academic sense. ... So I think a little bit of the political furor around it is a little disingenuous.”

However, Harold Ford said on [MSNBC's Now](#) (6/23, 213K), “I didn't think saying that word made his point any stronger at all. Furthermore, I think you give people license to use that word the moment you hear the President use it, and that is not what the President intended.”

Obama To Eulogize Pinckney; Biden Will Also Attend Funeral. The [New York Times](#) (6/23, Baker, Subscription Publication, 12.24M) reports President Obama and Vice President Biden will attend the funeral of Emanuel AME Church minister Clementa Pinckney in Charleston on Friday, and the President will deliver the eulogy. In a brief item, [ABC World News](#) (6/22, story 3, 0:15, Muir, 5.84M) said Obama “knew Pinckney personally.”

The [Washington Post](#) (6/23, Eilperin, 5.03M) says Biden said on Pinckney last week, “He was a good man, a man of faith, a man of service who carried forward Mother Emanuel's legacy as a sacred place promoting freedom, equality, and justice for all.” [McClatchy](#) (6/23, Clark, 32K), [Politico](#) (6/22, Reynolds, 1.11M), and [The Hill](#) (6/22, Fabian, 533K) also briefly report.

Haley Calls For Confederate Flag's Removal, And Many Republicans Join Her. While the President's remarks on the podcast were covered in detail, all three broadcast networks opened Monday evening with coverage of South Carolina Republican Gov. Nikki Haley's public call for the Confederate flag to be removed from the State House grounds in Columbia, a reversal from her cautious remarks just days ago, and one that led many Republicans who had been taking a similarly cautious line to endorse her call. By law, only the state legislature can order the flag removed.

On [ABC World News](#) (6/22, lead story, 2:25, Muir, 5.84M), Steve Osunsami reported that Haley said “she is not against the heritage the flag represents,” but “is demanding the state lawmakers meeting this week move quickly to take down the Confederate battle flag flying at the State House.” Haley: “We can honor the nine blessed souls who are now in heaven.” Scott Pelley opened the [CBS Evening News](#) (6/22, lead story, 3:10, 5.08M) by saying, “The state that fired the first shot in the Civil War may be the last to retire the colors. The Confederate battle flag at the state Capitol has long been the third rail of South Carolina politics,” but “today, after 150 years of history, politicians could see which way the wind is blowing now.” On [NBC Nightly News](#) (6/22, lead story, 2:55, Holt, 7.86M), Ron Allen noted that “Haley previously defended the flag when running for re-election.” Haley: “I spend a lot of my days on the phones with CEOs and recruiting jobs to this state. I can honestly say I have not had one conversation with a single CEO about the confederate flag.”

The [AP](#) (6/23, Adcox, Collins, Kinnard) says Haley's “about-face comes just days after” the shootings. Haley said Monday, “The murderer now locked up in Charleston said he hoped his actions would start a race war. We have an opportunity to show that not only was he wrong, but that just the opposite is happening.” Both South Carolina senators and Democratic Rep. Jim Clyburn – the state's “only black congressman” – were on hand for the statement.

[USA Today](#) (6/23, 5.01M) says Haley delivered an “impassioned speech.” On its front page, the [New York Times](#) (6/23, A1, Robles, Pérez-Peña, Subscription Publication, 12.24M) reports Haley was met with “a long, loud burst of applause and cheers” from members of both parties. Jamelle Bouie of [Slate](#) (6/23, 1.31M) writes that Haley “was cautious” on Friday, “telling CBS that she hoped the state could have a conversation with ‘thoughtful words to be exchanged,’” but by Monday, “pushed by public outrage, she had changed her tune.”

The [Los Angeles Times](#) (6/23, Muskal, 4.03M) says Haley “said the Confederate flag could continue to fly on private property, but called on the Legislature to change an existing law that allows the battle flag on Statehouse grounds. The Legislature is coming back for a special session on the budget on Tuesday, but the timing on the flag issue is unclear.”

The [Washington Post](#) (6/23, A1, Frankel, 5.03M), on its front page, reports Haley acknowledged that “a symbol deeply embedded in state history is today widely seen more as a racist relic than as a proud heirloom.” The Post says “a growing number of people view the Confederate flag as a ‘symbol of hatred,’ as Charleston Mayor Joseph P. Riley called it Monday when he said the flag should be moved to a museum.” In another front-page story, the [Washington Post](#) (6/23, A1, Harlan, 5.03M) says the flag “can stand for almost anything in this state – an emblem of identity or racial hate or just boozy partying” – but in the wake of the shootings, people across South Carolina “are trying to make sense of a symbol that is both a war relic and a banner for white supremacists.”

The [AP](#) (6/23, Peoples, Lerer) reports Republican presidential contenders “rushed Monday to embrace” Haley’s call, “eager to move past a vexing issue that challenges the GOP’s effort to win over the diverse coalition of voters it likely needs to win back the White House.” Jeb Bush, Gov. John Kasich, Rick Perry, and Gov. Scott Walker all offered support on Twitter shortly after Haley spoke. The AP says it was “a sharp shift for the GOP’s presidential class, which avoided taking such a firm position about the flag for several days.”

The [New York Times](#) (6/23, Rappeport, Subscription Publication, 12.24M) reports Walker “said he supported her decision,” while Perry said, “Removing the flag is an act of healing and unity that allows us to find a shared purpose based on the values that unify us.” [The Hill](#) (6/22, Zimmerman, 533K) reports in its “Blog Briefing Room” that Republican National Committee Chairman Reince Priebus also weighed in, saying in statement, “Now is the time to do what is right, and I support the call by Governor [Nikki] Haley and South Carolina leaders to remove the Confederate battle flag from state house grounds.”

[Bloomberg Politics](#) (6/22, Niquette, 161K), the [Wall Street Journal](#) (6/23, Dawsey, McWhirter, Subscription Publication, 5.68M), [McClatchy](#) (6/23, Lightman, 32K), the [Washington Times](#) (6/23, McLaughlin, 641K), and [Politico](#) (6/22, Lerner, 1.11M) also have reports.

The [New York Times](#) (6/23, Subscription Publication, 12.24M) says in an editorial that Haley “acted in the interest of her state and the nation” in calling for the removal of the flag. State lawmakers “who must vote on removing it need to do that now and show the nation they understand the pain this symbol of hate and brutality causes to this day.”

The [Washington Post](#) (6/23, 5.03M) says in an editorial that “South Carolina’s Confederate battle flag is the last on any state government grounds. With its removal, the nation would finally be saying that the flag is not a symbol worthy of respect. There is no excuse for any member of the South Carolina legislature to vote, or for any presidential candidate to say, otherwise.”

Kathleen Parker, a South Carolinian, agrees in her [Washington Post](#) (6/23, 5.03M) column, writing, “Now, once and for all, it is clear that the Confederate battle flag that flies on the South Carolina State House grounds is the racist symbol many have long thought it to be.”

Dewayne Wickham writes in his [USA Today](#) (6/23, Wickham, 5.01M) column that supporters of the flag “ignore the documented racist purpose of the fight they waged. The Republican majority of the South Carolina legislature also seems to be either dumbstruck or just playing dumb, when it comes to this ugly reality.”

Bush Faced Backlash After Removing Flag In Florida In 2001. The [Washington Post](#) (6/23, O’Keefe, 5.03M) writes that in 2001, after then-Florida Gov. Jeb Bush ordered the removal of “a mostly white flag that featured the Confederate battle flag design in the top left corner” from the grounds of the State Capitol in Tallahassee, Bush received many angry emails and replied to them directly, as was his practice when possible. The Post samples some of the messages and Bush’s replies.

Clinton Has Embraced Race Issues As GOP Candidates Have “Stumbled.” The [Washington Post](#) (6/23, Rucker, Gearan, 5.03M) writes that while “the Republican hopefuls mostly stammered and stumbled in response to the shootings,” Hillary Clinton “has forcefully initiated a conversation about race and bigotry in recent days.” The [New York Times](#) (6/23, Chozick, Subscription Publication, 12.24M) says this is markedly different from 2008, when Clinton – facing a black rival for the Democratic nomination – was more circumspect. In 2008, she “appeared reluctant to make race a central issue,” but “now, Mrs. Clinton is offering sweeping and passionate speeches on race, which was one of the subjects that first drove her interest in politics in the 1960s and ‘70s.”

Carson: Dangerous To Ignore That Shootings Were Racism. Presidential candidate Ben Carson writes in a [USA Today](#) (6/23, 5.01M) op-ed, “Not everything is about race in this country. But when it is about race, then it just is. ... To some, calling the events in Charleston, S.C., a hate crime reinforces a stigma, which they have fought hard to put behind them. But refusing to call it what it is – racism – is a far more dangerous proposition.”

Republicans Return Or Donate Funds From Council Of Conservative Citizens Leader. The [AP](#) (6/23) reports, “Republican presidential candidates, GOP lawmakers and the lone black Republican in the House are returning donations” from Earl Holt of the Council of Conservative Citizens, “a white supremacist group” cited by shooting suspect Dylann Roof in his manifesto, or donating the money to charity. Sen. Rand Paul, Rick Santorum, and Gov. Scott Walker will all give the money “to a fund set up by Charleston’s mayor to assist the victims’ families,” while Rep. Mia Love (R-UT) has returned the donations.

The [Washington Post](#) (6/23, Hamburger, 5.03M) reports Sen. Ted Cruz, whose campaign “was the first to announce that it would return money it had received,” also donated the money to the Mother Emanuel Hope Fund. Still, [The Hill](#) (6/22, Kamisar, Lillis, 533K) reports in its “Ballot Box” blog, Democratic strategists were “wasting no time attacking vulnerable Republicans for accepting the donations to begin with.”

The [CBS Evening News](#) (6/22, story 4, 1:50, Pelley, 5.08M) had an update on the investigation into Roof that focused on the manifesto he appears to have written. The story mentioned Roof’s citing of the Council’s website. Jared Taylor of the Council told CBS, “The council unequivocally condemns violence or illegality of any kind. What we present is the truth about race relations in the United States.” CBS (Pegues) said the Southern Poverty Law Center, “which tracks hate groups, calls the Council a white nationalist race group.”

The [New York Times](#) (6/23, A1, Wines, Alvarez, Subscription Publication, 12.24M) reports in a front-page story that the Council “opposes ‘all efforts to mix the races,’ and believes ‘that the American people and government should remain European in their composition and character.’” It grew out of “the ashes of the old and unabashedly racist White Citizens’ Councils,” and in the 1990s, “the council counted influential Republican friends from town halls to the halls of Congress” including then-Senate Majority Leader Trent Lott.

Walmart To Remove “All Items” With Confederate Flag Image. [USA Today](#) (6/23, Brackett, 5.01M) reports Walmart said Monday “that it is removing ‘all items’ promoting the Confederate flag for sale from its stores and its website.” Spokesman Brian Nick said in a statement, “We never want to offend anyone with the products that we offer. We have taken steps to remove all items promoting the Confederate flag from our assortment.”

More Commentary. Eugene Robinson writes in his [Washington Post](#) (6/23, 5.03M) column, “If American racism were a thing of the past, nine men and women who went to church last Wednesday evening would be alive.” While “the weekend displays of multiracial unity” throughout Charleston were inspiring, “they cannot be taken as a sign that the country has moved beyond its troubled racial past.” Robinson said President Obama’s election “marked a milestone, one I never dreamed I’d live to see.” But he did not “fully appreciate...the extent to which the mere fact of a black family living in the White House would, at least in the short term, heighten racial anxieties and conflicts.”

In his [Washington Post](#) (6/23, 5.03M) column, Michael Gerson writes that “when many relatives of those cruelly murdered in Charleston...publicly offered their forgiveness, it was stunning and admirable in many ways” that “provided a contrast to our political culture. So many are engaged in a search for evidence of their victimization in order to justify their anger. Here, genuine victims of a horrible crime responded with mercy.”

Gerald F. Seib similarly writes in the [Wall Street Journal](#) (6/23, Subscription Publication, 5.68M) that while the families’ response has been inspiring, the reaction from the political class has been predictable and disappointing.

SUPREME COURT STRIKES DOWN FEDERAL RAISIN SEIZURE PROGRAM. The [AP](#) (6/23, Hananel) reports that the Supreme Court ruled on Monday that the government cannot force raisin farmers “to give up part of their annual crop for less than it’s worth, a victory for conservative groups that hailed the decision as a win for private property rights.” The court ruled 8-1 that “a 1940s-era program born out of the Great Depression is unconstitutional because it allows federal officials to seize personal property from farmers without fully compensating them, even though the goal is to benefit farmers by stabilizing market prices.” The justices “sided with California farmers Marvin and Laura Horne, who claimed they were losing money under a program they called outdated and ineffective.”

The [New York Times](#) (6/23, Liptak, Subscription Publication, 12.24M) reports that the case “arose from the activities of” the Hornes, who “set up a business arrangement that they claimed allowed them to avoid the program.” The Agriculture Department imposed fines, and the Hornes “defended themselves on the ground that aspects of the program violated the takings clause of the Fifth Amendment, which says private property may not be taken for public use without just compensation.” Chief Justice John Roberts, writing for the court, “said the program was indeed a government taking of private property.” Justice Sonia Sotomayor dissented, saying “the program was not a classic taking because it did not deprive the Hornes of all of their property rights.”

The [Wall Street Journal](#) (6/23, Bravin, Subscription Publication, 5.68M) reports that the ruling could affect several similar Agriculture Department programs, covering such crops as almonds, dates, dried prunes, spearmint oil, and tart cherries, but is unlikely to have a huge affect on the agricultural economy.

The [Los Angeles Times](#) (6/23, Savage, 4.03M) reports that the court ruled that Marvin Horne “must be paid in full for his crop – a decision that bolstered free markets and property rights and could potentially crimp other government regulation of business.” The court “struck down as unconstitutional one of the last farm programs, spawned in the Great Depression, that had allowed growers to band together with the support of government to keep prices steady.” California produces 99% of the nation’s raisins, and “in years when the market was glutted, the Raisin Administrative Committee would set aside part of the crop and keep it off the open market,” but it “has not used that authority in recent years as raisin acreage has declined.”

[McClatchy](#) (6/22, Doyle, 32K) reports that the ruling “will reshape the contours of the decades-old raisin program,” and that while “part of a long-running challenge to federal regulation of various agricultural markets, the ruling Monday also broadens the government’s responsibilities to private property owners. ‘The government has a categorical duty to pay just compensation when it takes your car, just as when it takes your home,’ Roberts wrote, adding that the Fifth Amendment ‘protects ‘private property’ without any distinction between different types.’”

The [Washington Post](#) (6/23, 5.03M) editorializes in support of the ruling, saying that the court “usefully clarified that the Fifth Amendment protects uncompensated takings of personal property, not merely real estate, as a lower court had ruled,” and that “the educational value of the case extends much more widely: to federal agriculture policy in general, which can fairly be characterized as a series of New Deal-vintage controls and subsidies that have not grown any more rational with age.” The Post adds that it is now “up to Congress to liberate sugar, milk, corn, soybeans and all the other commodities still entangled in an outmoded web of regulations and corporate welfare.”

The [Wall Street Journal](#) (6/23, Subscription Publication, 5.68M) also praises the ruling, noting that the court has struck a major blow for property rights.

In a column for [USA Today](#) (6/23, 5.01M), David B. Rivkin, Jr., and Andrew M. Grossman, who practice constitutional law at the law firm Baker & Hostetler, write that “what brought the justices together in this case may be a shared wariness of government cronyism.” While many government programs “can at least be defended as advancing the public interest, the raisin marketing program only

benefits private parties like major producers and exporters at the expense of other private parties like smaller farms and consumers.” The attorneys argue that “as Republicans and Democrats bicker over the budget, the economy, health care, and just about everything else, they should be able to come together on a non-partisan reform agenda taking aim at government cronyism and corporate welfare.”

HIGH COURT STRIKES DOWN LOS ANGELES LAW ON HOTEL REGISTRY INSPECTIONS. The [Los Angeles Times](#) (6/23, Savage, 4.03M) reports that the Supreme Court on Monday “struck down as unconstitutional a Los Angeles city ordinance that authorized police to instantly inspect hotel and motel guest registries at any hour of the day or night.” The ruling “marks one of the rare times the high court has restricted the right of government officials to access business records.” In a 5-4 decision, the justices “unexpectedly concluded that the ordinance violated the 4th Amendment’s ban on ‘unreasonable searches’ because the mostly small-business owners had no right to object to the surprise inspections, even if they suspected the police were harassing them needlessly. ‘Even if a hotel has been searched 10 times a day, every day,’ Justice Sonia Sotomayor said, the owner ‘can be arrested on the spot’ for refusing an officer’s request to check the registry.”

The [New York Times](#) (6/23, Liptak, Subscription Publication, 12.24M) reports that Justices Anthony Kennedy, Ruth Bader Ginsburg, Stephen Breyer and Elena Kagan joined the majority opinion, while in dissent, Justice Antonin Scalia argued that “the majority had struck a needless blow against a valuable and barely intrusive practice.” He was joined by Chief Justice John Roberts and Justice Clarence Thomas. Justice Samuel Alito filed a separate dissent.

The [Wall Street Journal](#) (6/23, Bravin, Subscription Publication, 5.68M) reports that Los Angeles City Attorney Mike Feuer said the ruling provided guidance for city officials in changing the law, saying in a released statement, “We believe we can craft an ordinance, consistent with the Supreme Court’s decision, which enables the city to renew our efforts to combat human trafficking and other crimes associated with these motels.”

Editorial Wrap-Up:

NEW YORK TIMES. “*Take Down The Confederate Flag, Symbol Of Hatred.*” The [New York Times](#) (6/23, Subscription Publication, 12.24M) says in an

SENATE PANEL APPROVES INTERIOR-EPA SPENDING BILL. The [Greenwire](#) (6/18, Subscription Publication) reports that the Senate Appropriations Committee on Thursday "approved the \$30 billion fiscal 2016 spending bill for the Interior Department and U.S. EPA on a 16-14 party-line vote, as Democratic frustration with spending cuts and multiple policy riders boiled over." Both sides "traded barbs over the measure from the outset of the markup, with Democrats slamming the \$7.6 billion that the bill would hand EPA, a more than \$538 million reduction from current levels." The Interior Department would "see \$11 billion and the Forest Service \$5.12 billion under the bill, which was approved in subcommittee Tuesday."

The [AP](#) (6/19, Taylor, 5.03M) reports that "measure is certain to attract a veto threat from the White House and a filibuster by Democrats" because it includes policy riders that block much of President Obama's climate agenda, including proposed rules on ozone, fracking, coal plants, and waterways. "It will protect jobs, keep electricity prices low and fight back against the bureaucratic overreach committed by this administration's EPA," said Majority Leader Mitch McConnell (R-KY), who attended the panel's debate.

[The Hill](#) (6/19, Shabad, 533K) notes that ranking member Sen. Tom Udall (D-NM) offered amendments to strip the riders and boost funding, but all were rejected. "These riders are terrible policy. They're nothing more than a special interest giveaway to polluters," he said.

The [Helena \(MT\) Independent Record](#) (6/19, 38K) reports that "Senate committee action on Thursday saw funding for the Land and

Water Conservation Fund restored to current year levels, but reauthorization for the program that uses offshore oil lease royalties to buy wildlife habitat still faces a looming September sunset." According to the article, "a successful amendment to the Department of Interior appropriations bill co-sponsored by Sen. Steve Daines, R-Montana, added \$14 million to bring total funding to match this year at \$306 million." However, "whether that funding will ever hit the ground still hinges on reauthorization before a Sept. 30 deadline."

The [Oregonian](#) (6/19, Brosseau, 1M) reports that "a bill passed Thursday in the U.S. Senate Committee on Appropriations tries to preserve money for fire prevention by untangling it from spending to put out fires." According to the article, "the new financing model would treat wildfires more like natural disasters, such as floods."

Additional coverage was provided by [The Hill](#) (6/19, Shabad, 533K), the [Washington \(DC\) Examiner](#) (6/19, 349K), the [Albuquerque \(NM\) Journal](#) (6/19, 241K), the [Durango \(CO\) Herald](#) (6/18, 28K), the [Houston \(TX\) Chronicle](#) (6/19, Taylor, 2.29M), the [Minneapolis \(MN\) Star Tribune](#) (6/19, Taylor, 1.29M), [ABC Otus News](#) (6/19), the [Daily Mail \(UK\)](#) (6/19, 5.37M), the [Florence \(SC\) Morning News](#) (6/19, 90K), the [US News & World Report](#) (6/18, 907K), the [St. Louis \(MO\) Post-Dispatch](#) (6/19, 1.01M), the [Elko \(NV\) Daily Free Press](#) (6/19, 22K), [Yahoo! News](#) (6/19, Taylor, 6.18M), [Stars And Stripes \(DC\)](#) (6/19, 19K), [PBS NewsHour](#) (6/19), [Utility Dive](#) (6/19), [Agri-Pulse](#) (6/19), [KTOO-FM Juneau \(AK\)](#) Juneau, AK (6/19), [KDLG-AM](#) Dillingham, AK (6/19), [KTVZ-TV Bend \(OR\)](#) Bend, OR (6/19, 1K), and [KSCB-AM](#) Liberal, KS (6/19).

WILDFIRES BURN IN WEST. The [AP](#) (6/19, Press) reports that "wildfires are chewing through parched parts of the West, where temperatures are rising Thursday." The article provides "a look at the latest hotspots" in four states and "what crews are doing to control them."

Additional coverage was provided by the [Washington \(DC\) Post](#) (6/19, Press, 5.03M), the [US News & World Report](#) (6/18, 907K), [USA Today](#) (6/18, 5.01M), the [Daily World \(WA\)](#) (6/19, 881), the [Payson \(AZ\) Roundup](#) (6/18, 21K), the [Lebanon \(OR\) Express](#) (6/19, 92K), [KCSG-TV St. George \(UT\)](#) St. George, UT (6/19, 43), and [WPDE-TV Myrtle Beach \(SC\)](#) Myrtle Beach, SC (6/19, 3K).

COMPANIES SEEK EXEMPTION FOR SEASONAL OUTDOOR STAFF FROM ORDER RAISING WAGE FOR FEDERAL CONTRACTORS. In its "Federal Eye" blog, the [Washington Post](#) (6/19, Davidson, 5.03M) reports that "Executive Order 13658, which applies to contracts issued on or after Jan. 1 this year, is under fire from outdoor recreation companies that hire seasonal employees to run tours on federal lands." They want such "workers excluded from the order." According to the article, "if legislation to do that is successful, advocates for the higher wage fear it would be followed by other actions to undermine the executive order, keeping more federal contractor employees in low-paying positions." However, "if the guides and outfitters are not exempted, the bill's proponents say the mandated wage could run some of those companies to ground."

CONGRESS URGED TO LEAVE ANTIQUITIES ACT ALONE. For the "Congress" blog of [The Hill](#) (6/19, Streit, Basil, Gomez, Jr., 533K), Nick Streit, a sportsman, Toby Basil, a veteran, and Rafael Gomez, Jr., a tribal council member, write that they all support safeguarding "our cultural, historical, and natural treasures for future generations to enjoy." They are sharing their stories "as our country celebrates the 109th anniversary of the Antiquities Act this month," because "each of us has a unique and special bond to a national monument created through the Antiquities Act." They urge Congress to oppose "proposals that would undermine the Antiquities Act."

[America's Great Outdoors:](#)

National Park Service:

SCIENTISTS PUTTING TRACKING DEVICES ON NATIONAL PARK VISITORS. The [AP](#) (6/19, Mead Gruver |, Ap, 5.03M) reports that "scientists are putting tracking devices on a new species — people — as they try to learn more about how their movements affect ecosystems in national parks." According to the article, "park visitors carrying global positioning devices have provided Rocky Mountain National Park in Colorado data to improve shuttle service to a popular, and often congested, lake." Also, "another recent study at Yosemite National Park in California tracked where people stroll through two popular meadows and pause now and then to admire the view." Now, "people-tracking by researchers with Penn State and Utah State is helping Grand Teton National Park make decisions about a popular southern approach to the park, including whether they should add parking areas, restrooms and a multipurpose trail along the way."

Additional coverage was provided by the [Denver \(CO\) Post](#) (6/19, Press, 894K), the [Houston \(TX\) Chronicle](#) (6/19, Gruver, 2.29M), and the [Seattle \(WA\) Post-Intelligencer](#) (6/19, 822K).

NPS SHRINKS BUFFERS FOR BIRDS, TURTLES AT CAPE HATTERAS NATIONAL SEASHORE. The [Greenwire](#) (6/18, Subscription Publication) reports that the NPS "this week finalized a plan to scale back protective buffers around beach-nesting birds and turtles in North Carolina, a positive step according to some fishermen but which drew criticism from environmentalists." The service's "goal is to improve access for fishing and other beach activities at Cape Hatteras National Seashore, as required by the 2015 National Defense Authorization Act, which Congress passed in December." The agency "will require additional staff to conduct intensive monitoring to protect newly hatched chicks." According to the NPS, "the anticipated cost — \$250,000 annually — will be funded through the sales of off-road vehicle (ORV) permits."

YOSEMITE NATIONAL PARK AWARDS \$2 BILLION CONCESSIONS CONTRACT. The [Greenwire](#) (6/18, Subscription Publication) reports that Yosemite National Park officials have announced "a new company has the option to take over the single most lucrative contract in the national park system." Aramark was "offered the 15-year contract to manage the iconic California park's Ahwahnee Hotel, Curry Village, Badger Pass Ski Resort, several shops, High Sierra camps and other services, a \$2 billion value." Aramark, "which hold contracts in Denali National Park & Preserve, Glacier Bay and four other national parks, would step in the day after Delaware North's current contract expires March 1, 2016, if it reaches a deal with the Park Service and gets Congress' approval."

Additional coverage was provided by the [Buffalo \(NY\) News](#) (6/19, 493K) and [KPIX-TV San Francisco \(CA\)](#) San Francisco (6/18, 130K).

MORE HIKERS NEED RESCUING AT GRAND CANYON. The [Greenwire](#) (6/18, Subscription Publication) reports that “Grand Canyon National Park officials blamed mostly unprepared hikers for making 2014 the year with the most rescues since 2001.” According to spokeswoman Emily Davis, “the park spent half a million dollars on 324 search-and-rescue operations last year, mostly for instances of fatigue, inexperience or physical inability.” The article notes that “last year, the National Park Service as a whole spent \$4 million on about 2,600 search-and-rescue operations, averaging seven per day.”

CONSERVATIONISTS WANT END TO YELLOWSTONE BISON CULL. The [Greenwire](#) (6/18, Subscription Publication) reports that “conservation groups released a report yesterday calling for a halt to bison culling just as the National Park Service closed the public comment period for updating the management plan for Yellowstone National Park’s bison herd.” The current management plan has “allowed bison wandering from the park in search of food to be killed upon entry into Montana.”

AAA CALLS FOR NPS CHANGES AFTER GW PARKWAY CLOSURE. The [ARLnow \(VA\)](#) (6/18, 2K) reports that AAA says “the recent lane closures on the corroding Memorial Bridge demonstrate the park service’s ‘inability to appropriately manage transportation facilities under its control.’” According to the article, “the auto association said the National Park Service, which manages the parkway, is either too underfunded or too inept to effectively run a major commuter route.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (6/19, Hedgpeth, 5.03M).

U.S. PARK POLICE THROWS OUT DATED POLICY ON PREGNANT OFFICERS IT SETTLEMENT. In its “Federal Eye” blog, the [Washington Post](#) (6/19, Rein, 5.03M) reports that “the U.S. Park Police, in agreeing this week to pay \$300,000 to a former detective who sued after she got pregnant and was assigned to clerical work, also threw out a longstanding policy that critics derided as out of touch with the times.” On Tuesday, the Park Police agreed to settle the case of Renee Abt, “awarding Abt \$300,000 for her pain and suffering, the maximum allowed under federal law.” It also “agreed to rescind its previous pregnancy policies and comply instead with the Pregnancy Discrimination Act.”

RESERVATION SYSTEM PROPOSED FOR VISITORS TO MUIR WOODS. [KPIX-TV](#) San Francisco (6/18, 130K) reports that a plan proposed by Rep. Jared Huffman for Muir Woods National Monument “calls for a vehicle parking reservation system, parking limits and public transit and traffic enforcement.” According to the article, “the goal is to allow no more than 80 vehicles to park on Muir Woods Road during peak periods for two and a half years, with those spaces being reserved ahead of time.” The article notes that “the reservation system would take up to two years to be put in place and Huffman’s plan is long-term, a seven year course of action.”

ADVOCATES WANT STONEWALL TO BE A NATIONAL PARK. [The Villager \(NY\)](#) (6/18, 1K) reports that “the Stonewall Inn could soon be a city landmark, and if advocates have their way, it could also become a national park.” According to the article, “a movement is underway to get Christopher Park, the small triangular park located directly across from the famed gay bar, transferred to the U.S. National Park Service.”

OPPONENTS OF NATIONAL PARK IN MAINE HOLD RALLY. The [Bangor \(ME\) Daily News](#) (6/18, 179K) reports that “opponents of a proposed 150,000-acre national park and recreation area east of Baxter State Park held a rally Thursday, during which they presented a list of 224 businesses directly employing more than 3,900 people that don’t want to see the plan realized.” The article notes that “possibly the strongest single display of opposition to the proposal since Lucas St. Clair began leading the call for a park in 2012, the businesses include some of the biggest logging, papermaking, forestry, land management and trucking companies in the state.”

Also, the [Bangor \(ME\) Daily News](#) (6/18, 179K) reports that “about 175 regional residents attended a debate over the proposal from Roxanne Quimby family scion Lucas St. Clair.”

NPS PLANS FOR POSSIBLE FLOODING AT BUFFALO NATIONAL RIVER. [KATV-TV](#) Little Rock, AR (6/19, 91K) reports that the NPS is “planning for possible flooding at Tyler Bend Campground along the Buffalo National River.” According to the article, “until the threat passes, the pavilion restroom and group site restrooms will be closed.”

ARCHAEOLOGICAL GROUP SEARCHES FOR CLUES ABOUT CENTURIES-OLD MANDAN ARCHITECTURE. The [AP](#) (6/19, 25K) reports that “a nonprofit archaeological group from Denver is digging in North Dakota, looking for clues on how Mandan American Indians lived 500 years ago.” The article notes that “funding for the project is coming from the Northern Plains Heritage Area, a National Park Service program, along with money from Colorado State University, Minnesota State University Moorhead, the University of Arkansas and the University of Colorado.”

NEW PATROL HORSE DONATED TO NPS. The [Topanga \(CA\) Messenger](#) (6/19) reports that the NPS “recently welcomed a new patrol horse to its ranks.” Called Jordan, “the 10-year-old quarter horse was donated by the Santa Monica Mountains Fund, the park’s official fundraising partner.” According to the article, “Jordan joins two other patrol horses at the Rancho Sierra Vista stables near Newbury Park.”

SAINT-GAUDENS NATIONAL HISTORIC SITE TO DISPLAY 12-FOOT BRONZE LINCOLN STATUE. The [Hanover \(PA\) Evening Sun](#) (6/19, 59K) reports that a team at Gettysburg is “crafting a replica of” Augustus Saint-Gaudens’ “Abraham Lincoln: The Man” for “a monument that will greet visitors at Saint-Gaudens National Historic Site, a national park built around the artist’s studio and gardens in New Hampshire.” Gettysburg National Military Park spokeswoman Katie Lawhon said, “We have done some pretty in-depth restoration on Gettysburg’s monuments, but it’s unusual that we’re building one for elsewhere.”

The story also appears at the [York \(PA\) Daily Record](#) (6/19, 191K).

TWO CHARGED WITH VANDALIZING BOULDER FIELD LANDMARK. The [Lehigh Valley \(PA\) Express Times](#) (6/19, 230K) reports that “two Monroe County residents have been charged with vandalizing Boulder Field, a National Natural Landmark at Hickory Run State Park in Carbon County, according to a report.” According to the article, “authorities on May 14 found numerous rocks and a tree at Boulder Field had been spray-painted.”

ALCATRAZ IS AMERICA'S NO. 1 TOURIST SPOT. The [Los Angeles Times](#) (6/16, Forgione, 4.03M) reports that “Alcatraz beat out the Golden Gate Bridge, the Lincoln Memorial and the Statue of Liberty to be selected the No. 1 landmark in the U.S. in TripAdvisor’s recent Travelers’ Choice awards.” The article notes that “it also ranked as the seventh most popular landmark in the world, between the spectacular cathedral in Milan, Italy (No. 6) and the Christ the Redeemer statue in Rio de Janeiro (No. 8).”

NEW SUPERINTENDENT ANNOUNCED FOR THEODORE ROOSEVELT NATIONAL PARK. The [AP](#) (6/19, 2.29M) reports that Wendy Ross has been named superintendent of Theodore Roosevelt National Park. NPS Midwest Regional Director Cameron Sholly said in a statement, “She has a great blend of experiences and a proven track record of solving complex problems through innovation and relationship building.”

GRAND TETON'S MUSEUM CURATOR PROFILED. The [AP](#) (6/19, Anderson, 2.29M) reports on the work of Bridgette Guild, Grand Teton’s museum curator, archives and library manager and tribal liaison. Guild said, “It’s a geological park, established because of landscape, but because of the cultural landscape, the cultural resources are so rich.”

MEMORIAL UNION ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [Madison \(WI\) Capital Times](#) (6/19, 205K) reports that the UW-Madison Memorial Union has joined the National Register of Historic Places.

Bureau of Land Management:

VINTAGE POSTERS RELEASED FOR 15TH ANNIVERSARY OF BLM NATIONAL CONSERVATION LANDS. [KSL-TV](#) Salt Lake City (6/19, 1.07M) reports that “Tuesday marked the 15th anniversary of the Bureau of Land Management’s National Conservation Lands, and to celebrate, the organization released three new, vintage-inspired posters” The article notes that “the posters are part of an ongoing series that highlights the beautiful BLM conservation lands in a new, unique way, according to a BLM news release.”

Additional coverage was provided by the [Denver \(CO\) Post](#) (6/19, 894K), the [San Antonio \(TX\) Express-News](#) (6/19, 670K), and the [Houston \(TX\) Chronicle](#) (6/19, 2.29M).

SIERRA CLUB DIRECTOR CALLS FOR EXPANSION OF FEDERALLY PROTECTED LANDS. The [Moab \(UT\) Times-Independent](#) (6/19) reports that Sierra Club executive director Michael Brune “called for expanding federally protected lands in the Grand and San Juan counties — including the establishment of a Greater Canyonlands National Monument —during a public event in Moab on Tuesday, June 16.” The Sierra Club and “other environmental groups are advocating the creation of the Greater Canyonlands National Monument, which would comprise an additional 1.8 million acres of federal Bureau of Land Management and Forest Service lands that surround the existing Canyonlands National Park.” Also, “a 1.9 million-acre parcel known as the Bears Ears area in the southeast corner of Utah is also being promoted as worthy of greater federal protection.”

Fish and Wildlife Service:

FWS TO CRUSH IVORY IN TIMES SQUARE. The [Greenwire](#) (6/18, Subscription Publication) reports that the FWS is “planning to crush more than a ton of confiscated ivory tomorrow in New York City’s Time Square as part of the Obama administration’s drive to stop the poaching of African elephants for their highly sought-after tusks.” According to the article, “the media-savvy move is supported by conservation groups that want to bring attention to the poaching crisis and the role played by the demand for ivory trinkets.” However, “some advocates say the administration should do more with its regulatory authority to protect elephants.” The FWS will “crush about \$3 million worth of illicit goods.”

Additional coverage was provided by [The Hill](#) (6/19, Cama, 533K), the [New York \(NY\) Daily News](#) (6/19, Schiffman, 3.79M), the [National Geographic](#) (6/19, 32.75M), [LiveScience](#) (6/19, 444K), and the [Scientific American](#) (6/19, 2.87M).

FWS RECRUITS “CITIZEN SCIENTISTS” TO WATCH MAYFLIES. The [AP](#) (6/19, 2.29M) report that FWS “officials are recruiting ‘citizen scientists’ to gather field data to help better predict when millions of the mayflies will swarm the banks of the Mississippi River.” According to the article, “volunteers are asked to gather and submit field observations using a website and smartphone apps developed in 2008 by the USA-National Phenology Network.” Steingraeber, a fisheries biologist with the FWS in Onalaska, said that “the technology, known as Nature’s Notebook, will allow those with little training to record standardized observations that will be uploaded to public databases available to scientists.”

Additional coverage was provided by the [La Crosse \(WI\) Tribune](#) (6/19, 87K), the [Minneapolis \(MN\) Star Tribune](#) (6/19, Press, 1.29M), the [Denver \(CO\) Post](#) (6/19, 894K), the [St. Paul \(MN\) Pioneer Press](#) (6/19, 484K), and [WISC-TV Madison \(WI\)](#) Madison, WI (6/19, 267K).

FWS DIRECTOR ASHE TO ATTEND URBAN KIDS FISHING DERBY. The [Kansas City \(MO\) Star](#) (6/19, 590K) reports that FWS Director Dan Ashe will be “in Kansas City on Saturday to attend the 10th annual Urban Kids Fishing Derby.” The article notes that “the event, sponsored by Urban American Outdoors and the Kansas City Parks and Recreation Department, attracts hundreds of children and their parents each year.”

PLAN FOR LESSER PRAIRIE CHICKEN FACES OPPOSITION. [Science Magazine](#) (6/19, 398K) reports that the FWS decided in March 2014 to formally list the lesser prairie chicken as threatened. The agency “called for forging closer collaborations with western

state governments, which are often uneasy with federal action, and with the private landowners who control an estimated 95% of the prairie chicken's habitat." However, "some members of Congress are trying to block the plan, and at least a dozen industry groups, four states, and three environmental groups are challenging it in federal court."

FWS SUED OVER RIO GRANDE CUTTHROAT TROUT. The [Pueblo \(CO\) Chieftain](#) (6/19, 79K) reports that "an environmental organization is suing a federal agency to get endangered species records about a fish whose habitat includes Southern Colorado." The Center for Biological Diversity is suing the FWS, "seeking information about its decision not to list the Rio Grande cutthroat trout as an endangered species." The center claims the FWS "violated the Freedom of Information Act by allegedly failing to provide documents requested."

RESEARCHER SAYS FEDERAL AGENCIES LOSE TRACK OF ENDANGERED SPECIES PROTECTION MEASURES. The [Newswise](#) (6/19, 1K) reports that "using a case study approach to investigate protection of endangered species, University at Buffalo Law School Associate Professor Jessica Owley found significant gaps in how public agencies keep track of endangered species agreements." Owley's "findings demonstrate key concerns with monitoring and enforcement of endangered species permits." Owley's article, "Keeping Track of Conservation," appears in *Ecology Law Quarterly*.

GILLNETS BANNED BELOW TULUKSAK TO PROTECT KING SALMON RUN. The [AP](#) (6/19, 2.29M) reports that "qualified subsistence fishermen can't use gillnets in the Kuskokwim River below Tuluksak under a restriction intended to help protect this season's king salmon run." According to the article, "gillnets targeting king salmon and years of dwindling returns for the species prompted the Yukon Delta National Wildlife Refuge to announce in a news release Tuesday that conservancy measures are warranted."

CREW LOOKS FOR INVASIVE SPECIES IN FOX RIVER. The [Green Bay \(WI\) Press-Gazette](#) (6/18, 121K) reports that "four biological technicians with the U.S. Fish & Wildlife Service have been fishing for sea lampreys this week in the lower Fox." According to the article, "after two days of searching," the "team hadn't found a trace."

FWS FINALIZES GUIDE FOR UPPER MISSISSIPPI RIVER NATIONAL WILDLIFE AND FISH REFUGE. The [Clinton \(IA\) Herald](#) (6/19, 27K) reports that the FWS has "released the final prospectus and invitation for applications to conduct commercial waterfowl hunting guide services on the Upper Mississippi River National Wildlife and Fish Refuge."

Securing America's Energy Future:

Renewable Energy:

MORE BIRDS DIE FROM SOLAR PLANTS AND WINDMILLS THAN FROM OIL SPILLS. In an analysis for [Investors Business Daily](#) (6/19, 551K), Kerry Jackson examines whether oil spills or solar plants and windmills cause more bird deaths. Jackson notes that toll by oil spills pales in comparison "to the damage wrought by wind and solar power." He also notes that "the biggest cause of bird deaths" in the United States is cats.

Also providing coverage is the [American Thinker](#) (6/19, 19K).

Onshore Energy Development:

INTERIOR UNDER PRESSURE TO PREVENT CLOSURE OF COLOWYO MINE. In an op-ed for the [Craig \(CO\) Daily Press](#) (6/18, 10K), Rep. Scott Tipton writes that he is "pressuring the U.S. Department of the Interior to take swift action to prevent the impending closure of the Colowyo, including an appeal of the court's decision, and Sen. Cory Gardner is joining us in this effort." Also, "on the state front, Gov. John Hickenlooper has vowed to join the battle to save the mine as well." Tipton claims that "this battle offers a vivid and all-too-familiar lesson in how environmental special interests, if not balanced against the practical need for a healthy and growing economy, can wreak havoc in the everyday lives of Coloradans."

The [Craig \(CO\) Daily Press](#) (6/18, 10K) reports that on Tuesday, Tipton, "a long with six other congressmen and women, sent a letter to Secretary of the Interior Sally Jewell, urging her to visit Northwest Colorado and hold a community meeting to address the region's concerns." The letter stated, "Because your presence would signal a high level of attention to this process and mean so much to the many people impacted by this situation, we urge you to personally visit the region and hold a community meeting to address concerns and answer questions."

The [Craig \(CO\) Daily Press](#) (6/18, 10K) reports that "the Steamboat Institute hosted a panel of experts Wednesday night at Strings Music Pavillion to discuss 'The Coming Storm of Federal Energy Regulations and Their Impact on Colorado Business.'" According to the article, "the three-person panel discussed upcoming Environmental Protection Agency regulations and the situation at Colowyo Coal Mine before taking questions from the audience." The story also appears at the [Steamboat \(CO\) Pilot & Today](#) (6/18, 30K).

REPUBLICANS INVESTIGATING POSSIBLE MISMANAGEMENT AT OSMRE. The [E&E Daily](#) (6/18, Subscription Publication) reports that "Republican lawmakers in both the Senate and House are investigating the Interior Department's Office of Surface Mining, Reclamation and Enforcement over what they call possible mismanagement." The agency has "for years been under the congressional microscope for a rulemaking that Director Joseph Pizarchik said would better implement the Surface Mining Control and Reclamation Act, particularly the forthcoming stream protection rule." Now, the Senate Homeland Security and Government Affairs Committee and the House Oversight and Government Reform Committee are probing "claims that Pizarchik may be usurping power from states, a long-standing concern of local regulators and mining companies."

BLM FIGHTS STATE, INDUSTRY BID TO DELAY FRACKING RULES. [Natural Gas Intelligence](#) (6/19, Subscription Publication) reports that the BLM is "pushing back against state and industry calls for an injunction against the federal hydraulic fracturing

(fracking) rule that is scheduled to take effect this month.” BLM lawyers “filed a brief last week in U.S. District Court for the District of Wyoming, arguing that a motion by states for the injunction ‘falls far short of standards’ normally applied to obtaining extraordinary remedy.” It argued that “the states have not established that ‘irreparable harm’ would happen unless the new rule is blocked.”

REPORT CALLS FOR UPDATE OF ROYALTY RATE. The [Greenwire](#) (6/18, Subscription Publication) reports that “taxpayers across the West lose out on as much as \$730 million each year due to the low oil and natural gas royalty rates energy developers pay to drill on federal lands, according to a nonpartisan government watchdog group that is urging the Obama administration to update royalties for the first time in nearly a century.” The Center for Western Priorities “released a new report that blasts ‘antiquated’ federal policies that fail to collect ‘a fair share’ from companies extracting oil and gas from public lands.” The BLM “in April published an advanced notice of proposed rulemaking asking the public for input on updating oil and gas royalty rates, as well as rental payments, lease sale minimum bids, civil penalty caps and financial assurances.”

Also providing coverage are [Politico](#) (6/19, Schor, 1.11M) and the [Grand Junction \(CO\) Daily Sentinel](#) (6/19, 73K).

TWO STUDIES LINK EARTHQUAKES TO OIL, GAS WASTEWATER DISPOSAL. The [Environment & Energy Publishing](#) (6/18, 705) reports that “two studies out today point to oil and gas activity, specifically deep injection of wastewater, as the cause of a surge in earthquakes in Oklahoma and the central United States.” According to the article, “to slow or stop the earthquakes, the studies say, oil and gas producers will need to cut the volume of waste fluid they’re injecting into wells.” However, “the studies differ on where to focus those efforts.” The article notes that “one from the University of Colorado and the U.S. Geological Survey, published in *Science*, suggests regulators look at high-volume disposal wells,” and “the other study, from Stanford University, looking at Oklahoma, puts the focus on cumulative injection across broad areas of earthquake activity.”

Additional coverage was provided by [Bloomberg News](#) (6/19, Doom, 3.81M), the [US News & World Report](#) (6/18, 907K), the [Denver \(CO\) Post](#) (6/19, Finley, 894K), the [Denver \(CO\) Business Journal](#) (6/18, Subscription Publication, 62K), [UPI](#) (6/18), and the [Friendswood \(TX\) Journal](#) (6/19, 77).

COAL INDUSTRY CRITICIZES PAPAL ENCYCLICAL. The [Environment & Energy Publishing](#) (6/18, 705) reports that “the coal industry and its supporters have been among the most vocal critics of Pope Francis’ new message focused on environmental protection and climate change.” In response, “the coal industry deployed its long-standing message that coal can help boost energy production in the developing world and help reduce poverty.” The article notes that “the message was in an email to allies by Arch Coal Inc. lobbyist Thomas Altmeyer, which was obtained and leaked by the environmental group Greenpeace.” The note said, “Industry, policymakers and social leaders – like Pope Francis – must work together to support policies that bring about new advances in fossil energy technologies so we can strike a balance between global economic needs and climate concerns.”

CLOUD PEAK RECOGNIZED FOR RECLAMATION WORK BY OSMRE. The [Riverton \(WY\) Ranger](#) (6/19, 167) reports that “Cloud Peak Energy was recognized in 2014 for its reclamation work at the Antelope Mine in northeastern Wyoming.” The firm “received the 2014 Excellence in Surface Mining Reclamation Award from the U.S. Department of the Interior’s Office of Surface Mining Reclamation and Enforcement for the project south of Gillette.” Cloud Peak spokesman Rick Curtsinger said “the government specifically noted the mine’s work to fight cheat grass – an invasive species – while promoting native plant life on reclaimed tracts of land.”

COMPANY APPLIES TO SEARCH FOR OIL IN BIG CYPRESS NATIONAL PRESERVE. Additional coverage that a company has applied to explore for oil and gas in the Big Cypress National Preserve was provided by the [Fort Myers \(FL\) News-Press](#) (6/18, 177K) and [WTSP-TV St. Petersburg \(FL\)](#) St. Petersburg, FL (6/18, 89K).

Offshore Energy Development:

BSEE OFFICIALS CONFIRM SHELL COMPLETED TESTING OF EMERGENCY EQUIPMENT PRIOR TO ARCTIC DRILLING. [Fuel Fix \(TX\)](#) (6/19, Dlouhy, 7K) reports on Thursday, Shell employees and contractors “successfully deployed and tested emergency equipment meant to respond to a blow-out well in the Arctic Ocean.” Interior Department’s Bureau of Safety and Environmental Enforcement officials oversaw the deployment of the equipment this week in waters near Washington state that are “slightly deeper than Shell’s proposed drilling sites in the Chukchi Sea northwest of Alaska.” Additional details of the exercise were not provided, and while BSEE officials confirmed the equipment “could function under pressures that exceed those expected at Shell’s planned wells in the Arctic,” a letter written by a BSEE official “outlined federal regulators’ concerns with some incidents during the containment dome’s deployment.”

Additional coverage was provided by the [San Antonio \(TX\) Express-News](#) (6/19, 670K) and [Marine Link](#) (6/19, 1K).

CROWD PROTESTS SHELL’S ARCTIC PLANS. The [Alaska Public Radio Network](#) (6/18, 2K) reports that “a crowd of about 40 gathered in the drizzling rain outside Juneau’s federal building this afternoon to protest Royal Dutch Shell’s oil rig, the Polar Pioneer.” The article notes that “concerns from environmental groups include the likelihood of a spill, the impact on coastal Native communities and climate change.” In a statement, the BOEM says the Polar Pioneer will “meet ‘rigorous safety standards’ during its exploration.”

Also reporting on the story are the [Juneau \(AK\) Empire](#) (6/19, 14K) and [KTOO-FM](#) Juneau, AK (6/19).

BOEM, AASG TO PARTNER IN SHARING OCS INFORMATION. The [Offshore Engineer](#) (6/19) reports that the BOEM and the Association of American State Geologists “signed an agreement to foster interaction, cooperation and coordination on marine minerals and oil and gas resources on the outer continental shelf (OCS).” Renee Orr, BOEM’s chief of strategic resources, said, “As BOEM worked through extensive coordination with 13 Atlantic states following Hurricane Sandy, we realized that we could streamline operations even more through closer coordination with state geologists. They are important partners in helping us strengthen coastal resilience using OCS sand, as well as managing offshore oil and gas activities in all four OCS regions — the Atlantic, Pacific, Gulf of Mexico and offshore Alaska.”

Also reporting on the story is the [Marine Link](#) (6/19, 1K).

Tackling America's Water Challenges:

BOR AWARDING \$6.5 MILLION IN GRANT FUNDING TO HELP RELIEVE DROUGHT IN CALIFORNIA. [Government Security News](#) (6/19, 104K) reports that the Interior Department has announced that the BOR is "awarding grants totaling \$6.5 million for more efficient management and conservation of California's water as part of the Obama Administration's effort to bring relief to drought-stricken communities." Interior Deputy Secretary Mike Connor said, "These are just the latest grants in the President's all-hands-on-deck campaign to alleviate the impacts of this historic drought in California and throughout the West. The entire government is dedicated to helping respond to continued drought conditions. We know that water is the lifeblood of our communities and every drop counts."

CALIFORNIA PASSES EMERGENCY CONSERVATION REGULATIONS. The [ClimateWire](#) (6/18, Subscription Publication) reports that "as California's historic drought rages on, two of the state's key fish species already in significant population decline – central California coast's coho salmon and steelhead – are facing additional mortality this summer if water supplies are not increased in one of their prime spawning habitats, four tributaries of the Russian River." On Wednesday, the State Water Resources Control Board "passed emergency regulations that require enhanced conservation measures for about 13,000 landowners who live near these tributaries, above and beyond statewide restrictions that already mandate water reductions from all Californians." The article notes that "the emergency regulations also give the state water board the authority to collect water use data from landowners who live in the 130 square miles of land that surrounds the affected tributaries."

TOXIC ALGAE CLOSES SCOOTENEY PARK FOR ANOTHER WEEKEND. The [Tri-City Herald \(WA\)](#) (6/18, 100K) reports that "the recreation facilities at Scootenevy Reservoir and Park will be closed for a second weekend, the Bureau of Reclamation said." According to the article, "the closure is expected through June 26 or until the toxicity level from algae blooms in the reservoir reduces and a potable water supply is in place." Julia Pierko, acting field office manager in Ephrata for the Bureau of Reclamation, said, "This area is very popular with the local community, and we are doing what we can to reopen the park."

Empowering Native American Communities:

SENATE COMMITTEE FOCUSES ON FINANCIAL STRUGGLES OF NATIVE AMERICANS IN HEARING. The [E&E Daily](#) (6/18, Subscription Publication) reports that "capital is still largely failing to reach Indian Country due to failing or underfunded federal programs, lawmakers and experts" said Wednesday. The article notes that "the financial investment struggles of American Indian tribes were the focus of not only the Senate Indian Affairs Committee's oversight hearing," but "the four-day Reservation Economic Summit on Capitol Hill hosted by the National Center for American Indian Enterprise Development." Committee Chairman John Barrasso "called on Congress to help tribes clear financial hurdles during his keynote address at the summit yesterday morning." Also, "at his committee's hearing later on, experts noted that Native Americans are the most undeserved demographic when it comes to access to capital."

Additional coverage was provided by the [Native American Times](#) (6/19, 337).

BILL INTRODUCED TO REPEAL LAND SWAP FOR COPPER MINE IN ARIZONA. The [E&E Daily](#) (6/18, Subscription Publication) reports that Rep. Raúl Grijalva "introduced legislation yesterday to repeal a land swap to facilitate development of a copper mine in southern Arizona." Grijalva and "other project foes – notably the San Carlos Apache Tribe and the Yavapai-Apache Nation – say the swap is not only bad for the environment but allows the company to disturb culturally sensitive sites."

QUAPAW SEEK TO HAVE KANSAS LAWSUIT ON GAMING EXPANSION DISMISSED. The [Joplin \(MO\) Globe](#) (6/19, 64K) reports that the Quapaw Tribe said filed a motion on Monday asking that a Kansas lawsuit on gaming expansion "be dismissed because the tribe has sovereign immunity, which largely protects it against lawsuits." The article notes that "federal attorneys also are trying to get the lawsuit thrown out."

Additional coverage was provided by the [Arkansas Democrat Gazette](#) (6/19, 342K).

TRIBE OPTIMISTIC ABOUT KEWADIN LANSING CASINO PLAN. The [Lansing \(MI\) State Journal](#) (6/18, 180K) reports that "an Upper Peninsula American Indian tribe's plans for a \$245 million, 125,000-square foot downtown casino aren't dead, despite an ongoing legal dispute with Michigan Attorney General Bill Schuette's office." According to the article, "the Sault Ste. Marie Tribe of Chippewa Indians is 'firmly convinced' it has the legal right to pursue the Kewadin Lansing Casino project adjacent to the Lansing Center, and is optimistic the U.S. Department of the Interior will approve its application to have the site taken into trust."

GRANT ANNOUNCED TO ASSIST PINE RIDGE SCHOOL RECOVERY EFFORTS. Additional coverage of the grant announced for the Pine Ridge School was provided by the [Mitchell \(SD\) Daily Republic](#) (6/19, 37K), the [Yankton \(SD\) Press & Dakotan](#) (6/19, 25K), the [Pierre \(SD\) Capital Journal](#) (6/19, 620), and the [Native American Times](#) (6/19, 337).

ADDITIONAL COVERAGE: INTERIOR APPROVES SPOKANE TRIBE CASINO. Additional coverage of the approval of the Spokane Tribe casino was provided by the [Indian Country Today Media Network](#) (6/18, 28K).

Top National News:

OBAMA: "THIS TYPE OF MASS VIOLENCE DOES NOT HAPPEN IN OTHER ADVANCED COUNTRIES." Amid saturation coverage of the shooting spree in Charleston, the President's [remarks](#) about the tragedy – particularly his exasperated plea for stricter gun laws – sparked extensive, largely sympathetic reporting. As [Mother Jones](#) (6/19, Oh, 723K) noted on its website, "this time last

year, Obama called the nation's political failure to act on guns the 'biggest frustration' of his presidency." Yesterday, says the [AP](#) (6/19, 709K), the President "expressed anger, sadness and heartache," and, according to the [Washington Post](#) (6/19, Eilperin, 5.03M), struggled "to contain his emotions at times." He stood, says [Politico](#) (6/19, Wheaton, 1.11M), "righteous, angry and powerless...as he responded to yet another mass killing." To [McClatchy](#) (6/19, Kumar, 32K), he was "somber" as he delivered his "emotional plea to lawmakers." Obama's comments were featured on all three network newscasts, which devoted a combined 38 minutes to the Charleston massacre.

In the fifth story in its line-up last night – the first four were also devoted to the shooting – the [CBS Evening News](#) (6/18, story 5, 2:05, Pelley, 5.08M) reported that the President "expressed his sadness over the tragedy," and also "his anger." CBS (Garrett) added, "Fourteen times...Obama has consoled the nation after a deadly shooting," and "in every instance," he issued "a call for action to reduce the violence." The President "has taken 23 separate executive actions to limit actions to some firearms under certain conditions," and "top officials say they've exhausted all executive powers on gun control." Obama "appears exhausted by gun violence and the political stalemate."

At the tail end of its lead story last night, [ABC World News](#) (6/18, lead story, 5:55, Muir, 5.84M) showed the President saying, "I've had to make statements like this too many times. Communities like this have had to endure tragedies like this too many times." [NBC Nightly News](#) (6/18, story 4, 1:15, Guthrie, 7.86M) didn't note the President's comments until the fourth story in its line-up, in which it showed him saying, "At some point, we as a country will have to reckon with the fact that this type of mass violence does not happen in other advanced countries and it is in our power to do something about it. The fact that this took place in a black church, obviously, also raises questions about a dark part of our history, and we know that hatred across races and faiths pose a particular threat to our democracy and our ideals."

Chris Cillizza, in a post for the [Washington Post](#) (6/19, 5.03M), said "two emotions" were "evident" in Obama yesterday: "anger" over "the fact that he was, once again, addressing the country in the wake of a mass shooting," and "a head-shaking weariness about the almost-certain fact that this latest shooting would do little to move the needle on gun control legislation." The [Los Angeles Times](#) (6/19, Branson-Potts, 4.03M) reports that Obama "condemned the politics surrounding" the issue "and called for Americans to do something about gun violence." On its website, [NPR](#) (6/18, Montanaro, 1.52M) noted that the President said, "I say that recognizing the politics in this town foreclose a lot of those avenues right now," but "it would be wrong for us not to acknowledge it. And at some point, it's going to be important for the American people to come to grips with it, and for us to be able to shift how we think about the issue of gun violence collectively."

[USA Today](#) (6/19, Korte, 5.01M) reports that "as Obama spoke, Vice President Biden stood silently at his side." The Vice President "later released a statement saying, 'Hate has once again been let loose in an American community.'" The [National Journal](#) (6/19, Resnick, Alvarez, Subscription Publication, 156K) notes that Biden also said, "As a nation we must confront the ravages of gun violence and the stain of hatred that continues to be visited on our streets, in our schools, in our houses of worship, and in our communities."

[Al Jazeera America](#) (6/19, 133K) reported on its website that Obama said that he and Biden "both spoke with Charleston Mayor Joseph Riley to express condolences." The President also "said he and first lady Michelle Obama knew several parishioners at Emanuel AME church, including the church's pastor, South Carolina State Senator Clementa Pinckney, who was among those killed." The [Washington Times](#) (6/19, Boyer, 641K) notes that the President said, "There is something particularly heartbreaking about a death happening in a place where we seek solace and peace."

The [New York Times](#) (6/19, Horowitz, Corasaniti, Southall, Subscription Publication, 12.24M) reports that DOJ's Civil Rights Division, the FBI, and the US Attorney's Office for South Carolina "have opened a hate crime investigation into the shooting." The [Charleston \(SC\) Post and Courier](#) (6/19, Pan, 305K) indicates that South Carolina "is one of five states, including Arkansas, Wyoming, Georgia and Michigan, that doesn't have a hate crime statute on the books, so local authorities are forced to rely on federal authorities to make charges in these cases." [Newsweek](#) (6/19, Richinick, 175K) noted on its website that Attorney General Lynch told reporters yesterday, "Acts like this have no place in our country and in a civilized society."

The [CBS Evening News](#) (6/18, lead story, 4:35, Pelley, 5.08M) kicked off its broadcast last night saying, "So here we are again, another mass shooting in America. Our neighbors – this time ministers, a librarian, and grandparents – cut down for nothing." [NBC Nightly News](#) (6/18, lead story, 3:45, Guthrie, 7.86M) also led its broadcast with the "stunning act of mass murder in a predominantly African-American house of worship," which is "being investigated as a hate crime." [ABC World News](#) (6/18, lead story, 5:55, Muir, 5.84M) called the church "a symbol of the civil rights movement," and [NBC Nightly News](#) (6/18, story 5, 1:45, Allen, 7.86M) noted that it "is affectionately known as Mother Emanuel" and has "been a pillar in the struggle for freedom and equality." The [CBS Evening News](#) (6/18, story 4, 0:30, Pelley, 5.08M) said of Mother Emanuel that it was "founded during the era of slavery in 1816. Whites burned it to the ground six years later and church members met secretly until it was rebuilt after the Civil War. Booker T. Washington spoke here in 1909. The reverend Dr. Martin Luther King, Jr., in 1962." The [New York Times](#) (6/19, Weisman, Subscription Publication, 12.24M) also reports on the church's history this morning.

Obama Discusses Shootings At Los Angeles Fundraiser. The [AP](#) (6/19, 709K) reports that "hours after delivering a statement on the shooting massacre of nine people at an historic church in Charleston," Obama "and a group of entertainment industry donors had a lengthy discussion about the roots of gun violence in the first of two Hollywood-centric fundraisers in Los Angeles on Thursday, according to an attendee who was present." The [Los Angeles Times](#) (6/19, Parsons, 4.03M) notes that the President urged people who are "upset about mass shootings and other social problems...to 'push society and ultimately push Congress' in the direction of change."

The [Hollywood Reporter](#) (6/19, Daunt, 758K) reported that according to an attendee, "Obama told the group: 'This shooting is incredibly personal, and I've done this too much as president. Look, we've got to go back to the base of the issue and we have to fight it until it's fixed.'" There were "about 25 people at the event, which cost \$16,700 per person to benefit the Democratic National Committee."

[Bloomberg Politics](#) (6/19, Sink, 161K) says that “some Republican presidential candidates canceled political events on Thursday,” but “Obama carried on with fundraisers at the homes of two of Hollywood’s most famous producers,” Tyler Perry and Chuck Lorre.

Friend Says Roof “Wanted Something Big Like Trayvon Martin.” [ABC World News](#) (6/18, story 2, 2:05, Muir, 5.84M) noted the “new chilling details...coming in about the suspect,” 21-year-old Dylann Roof, and ABC’s Cecilia Vega added that according to “friends” Roof’s “alleged plan was six months in the making.” A childhood friend of the suspect, Joey Meek, was shown saying, “I think he wanted something big like Trayvon Martin. He wanted to make something spark up the race war again.”

[Newsweek](#) (6/19, Richinick, 175K) reported on its website that “just before noon...police apprehended the accused gunman,” who on Wednesday night had “sat with churchgoers...before opening fire on a weekly Bible meeting.” The [Los Angeles Times](#) (6/19, Glionna, Mejia, Bierman, 4.03M) notes that Roof “was taken into custody during a traffic stop” in Shelby, NC, and [ABC World News](#) (6/18, story 4, 0:55, Thomas, 5.84M) indicated that “senior law enforcement officials say, so far, the evidence suggests Roof acted alone.”

The [Miami Herald](#) (6/19, Mazzei, 676K) reports that Charleston Mayor Joseph P. Riley Jr. “described the shooting as ‘pure, pure concentrated evil.’” The [Charleston \(SC\) Post and Courier](#) (6/19, Bartelme, 305K) reports that Roof “wore patches popular in white supremacist circles, had strong conservative beliefs about the South and may have recently received a gun for his birthday, according to friends and relatives.”

The [New York Times](#) (6/19, Horowitz, Dewan, Oppel, Subscription Publication, 12.24M) reports that Roof’s Facebook profile picture shows him “against a distinctly Southern backdrop: a swamp dripping with Spanish moss.” Roof’s “black jacket is adorned with two flags – one from apartheid-era South Africa, the other from white-ruled Rhodesia – that have been adopted as emblems by modern-day white supremacists.” [USA Today](#) (6/19, Frank, 5.01M), the [Washington Post](#) (6/19, A1, Markon, 5.03M), and the [Wall Street Journal](#) (6/19, Levitz, Kamp, Subscription Publication, 5.68M), among other news outlets, also describe the alleged shooter’s background, and his drift toward racist violence.

The [Los Angeles Times](#) (6/19, Serrano, Phelps, Muskal, 4.03M) reports that according to Charleston Police Chief Greg Mullen, “a witness in the church who was unharmed – one of three survivors in the church – told authorities that the gunman let her live so she could tell her story.” The [Washington Times](#) (6/19, Boyer, Miller, 641K) notes Roof reportedly said, “I have to do it. You rape our women and you’re taking over our country. And you have to go.”

Shootings Rekindle Debate Over Racism. The [Washington Post](#) (6/19, Horwitz, 5.03M) reports that “almost immediately, the shooting – by a white man in a black church – rekindled heated discussion about race relations and hate groups.” The massacre, says the [New York Times](#) (6/19, Baker, Subscription Publication, 12.24M), “once again confronted...Obama with a moment of racial turmoil,” and “any hopes of what supporters once called a ‘post-racial’ era now seem fanciful.”

The [CBS Evening News](#) (6/18, story 6, 2:00, Pelley, 5.08M) noted that the shootings came “at a time of increasing mistrust between blacks and whites,” and added (Axelrod) the country is “growing increasingly pessimistic” about race, with a recent CBS News/New York Times poll showing 61% saying “race relations are bad,” which is “the highest number since the Rodney King riots 23 years ago.” CBS added that “the full picture of hate in this country may actually be more troubling” than most Americans realize: The FBI “reported 5,922 hate crimes in 2013,” and “Richard Cohen, head of the Southern Poverty Law Center, says that is just a fraction.” Cohen was shown saying, “The true number, according to the Bureau of Justice statistics, is over 200,000.”

The [Washington Times](#) (6/19, Miller, 641K) reports that “black community activists raised alarms Thursday about the mass murder...potentially sparking race riots in Charleston.” Under the headline “Racist Ideology Still Runs Deep In Charleston, Some Say,” [USA Today](#) (6/19, Pager, 5.01M) reports, “Slavery may be abolished, but some Charleston residents say white supremacy is not.” The [Huffington Post](#) (6/18, Bellware, 194K), meanwhile, indicated that yesterday, “flowers were laid, black cloth was draped and flags at the state’s Capitol building were lowered to half-staff. Except one,” a Confederate flag “that’s part of a Civil War memorial on the grounds of the South Carolina State House.” That “sparked outrage” in Charleston.

Tavis Smiley, author and host/managing editor of Tavis Smiley on PBS, writes in [USA Today](#) (6/19, 5.01M), “Black America is under attack. Unsafe. Unprotected. Subject to random violence. Hated for who we are.”

Patricia Williams Lessane, director of the Avery Institute of Afro-American History and Culture at the College of Charleston, writes in the [New York Times](#) (6/19, Subscription Publication, 12.24M), “For me, last night’s events signal several visceral truths. One, that we African-Americans have no sanctuary,” and also that the “daily threat of terror does not exist within a vacuum,” but rather “looms within the growing prison-industrial state, against the backdrop of school-reform debates, our slow movement toward gun reform and the political maneuvers by Republicans to make it increasingly more difficult for poor people and minorities to vote.”

In an editorial, the [Wall Street Journal](#) (6/19, Subscription Publication, 5.68M) disputes the notion that any sort of institutional racism was behind the attack. Rather, to the Journal, the shooter was motivated by mental illness and by pure evil.

On its front page, the [Washington Post](#) (6/19, A1, Ross, 5.03M) notes the massacre “comes at a moment when a resurgent civil rights movement grips the nation...with its Black Lives Matter catchphrase and raucous social-media-empowered legions, is about stemming police violence and pushing the criminal justice system to treat African Americans equally.” Adds the Post, “For many, the Black Lives Matter movement is picking up the unfinished work of activists who fought for equal voting rights five decades ago.”

The [Birmingham \(AL\) News](#) (6/19, Wright, 219K) reports, “The murders in a church in South Carolina and the bombing of the Sixteenth Street Baptist Church in Birmingham nearly 50 years ago are disheartening in a profound way, said the daughter of a civil rights icon.” Arthur Shores’ daughter, Judge Helen Shores Lee, said yesterday, “The Sixteenth Street Church bombing was a hate crime. The mayor of Charleston talked this morning about this being a hate crime. This person had nothing else to do but to shoot all these black people.”

[NBC Nightly News](#) (6/18, story 6, 1:50, Guthrie, 7.86M) interviewed Rep. James Clyburn, who said, "I think from what I've been hearing today, these people are so appreciative of the way the mayor has conducted himself in this, the way the police chief last night did not hesitate to label this crime with what it should be labeled and the way they went about apprehending the perpetrator. I think that started us on the road of healing."

The [Huffington Post](#) (6/18, Alman, 194K) noted that "during a live segment Thursday in Charleston...following the church massacre there, a black woman heckled [CNN anchor Don] Lemon and CNN co-host John Berman on camera, calling Lemon and...Obama 'Uncle Toms' – a derogatory term for black people who are considered subservient to whites."

"Civil Rights Advocates" Ask Why Attack Isn't Being Designated As Terrorism. The [New York Times](#) (6/19, Gladstone, Subscription Publication, 12.24M) reports that while the tragedy "has been classified as a possible hate crime...many civil rights advocates are asking why the attack has not officially been called terrorism." The Times adds that "against the backdrop of rising worries about violent Muslim extremism in the United States, advocates see hypocrisy in the way the attack and the man under arrest in the shooting have been described by law enforcement officials and the news media."

Clinton Calls For Action To Curb Gun Violence. The [AP](#) (6/19, Riccardi) reports that in an appearance in Las Vegas, Hillary Clinton "said Thursday the country has to face 'hard truths' about guns and race." Asked Clinton, "How many innocent people in our country, from little children to church members to movie theater attendees, how many people do we need to see cut down before we act?" [Reuters](#) (6/19, Becker) notes that Clinton also said, "I pledge to you I will work with you. ... Let's unite in partnership, not just to talk but to act."

[Politico](#) (6/19, Karni, 1.11M) reports that Clinton "quoted Martin Luther King, Jr. in her message to the families of the victims, saying: 'you do not walk alone. You do not walk alone because millions of Americans regardless of race, creed, ethnicity, or religion are walking with you, in grief, in solidarity, in determination, we are with you.'"

Republicans Avoid Race, Gun Debates. [Reuters](#) (6/19, Sullivan, Oliphant) reports that GOP White House hopefuls avoided addressing racism and the gun issue in their reaction to the Charleston tragedy. Sen. Rand Paul said, "There's a sickness in our country, there's something terribly wrong, but it isn't going to be fixed by your government." Ted Cruz said, "A sick and deranged person came and prayed with an historically black congregation for an hour and then murdered nine innocent souls." Sen. Marco Rubio, meanwhile, did not even mention the killings yesterday. [NBC Nightly News](#) (6/18, story 2, 2:20, Guthrie, 7.86M) showed Sen. Lindsey Graham saying of Roof, "I don't know if he finished high school, but [he is a] strange, disturbed young man."

[The Hill](#) (6/19, Fabian, 533K) reports that Obama "called South Carolina Gov. Nikki Haley" and Sens. Graham and Tim Scott. The President "placed the call from Air Force One en route to Los Angeles, where he was scheduled to attend two Democratic National Committee fundraisers."

First Lady, Daughters Light Candle In Victims' Memory At Milan's Duomo. The [AP](#) (6/19, Barry) reports that the First Lady "and her daughters visited Milan's Duomo cathedral on Thursday, where an official traveling with her said they lit candles in memory of the victims of the shooting in South Carolina." Mrs. Obama "made no comment and issued no statement."

Lawmakers Hold Prayer Circle For Victims. [USA Today](#) (6/19, Troyan, 5.01M) reports that "members of Congress and their staffs, some overcome with emotion and grief, gathered outside the Capitol on Thursday with the Senate chaplain to pray for the victims." USA Today adds that "the congressional prayer circle, arranged by South Carolina Sen. Tim Scott's office, was one of many signs that the murder of nine churchgoers was shocking to everyone on Capitol Hill."

WPost: Gun Control Not A Panacea, But Would "Reduce The Violence." The [Washington Post](#) (6/19, 5.03M) editorializes, "Expanding background checks or shutting down unscrupulous gun dealers would not prevent every incident, but they are sensible steps that would reduce the violence."

Eugene Robinson writes in the [Washington Post](#) (6/19, 5.03M), "Maybe it was white rage that provoked a young man to kill nine innocent worshippers as they prayed. Maybe it was mental illness or some other twisted motivation." But "the one thing about which there can be no debate is that he had a gun."

Activists: Guns Should Be Allowed In Churches For Self-Defense. The [Washington Times](#) (6/19, Richardson, 641K) reports that the Charleston tragedy "Wednesday prompted not just a surge in calls from the left for tighter gun-control laws, but also pleas from the right for churches to protect themselves by allowing their parishioners to pack heat." Activist Kenneth Blackwell, "former Ohio secretary of state, said houses of worship could take themselves out of the line of fire by taking down the 'gun-free zone' signs and letting it be known that law-abiding concealed-carry permit holders – and their guns – are welcome."

MEDIA ANALYSES: AFTER HOUSE PASSAGE, TPA FACES UNCERTAIN FATE IN SENATE. Amid heavy coverage of the South Carolina church shooting, the House's 218-208 vote on Thursday for a stand-alone TPA measure was not mentioned on the network news broadcasts, and cable coverage was very light. Print and online coverage, while still heavy, were also noticeably lighter than earlier this week. Much of the coverage casts the House vote as a win for the President and Repu

LAWMAKERS BLAST OPM "NEGLIGENCE" THAT LED TO CYBERATTACKS. Members of the House Oversight and Government Reform Committee blasted OPM Tuesday for what they described as "gross negligence" which allowed hackers tied to China to access private information about Federal employees and personal information on military and intelligence workers with security clearances in two cyberattacks last year. Coverage of the hearing highlighted the bipartisan and vitriolic nature of Congress members' remarks regarding the breach and the performance of OPM officials present.

The [Los Angeles Times](#) (6/17, Bennett, Diersing, 4.03M) describes the hearing as "contentious," adding that lawmakers "ripped into the officials in charge of securing the networks," and the [AP](#) (6/17, Dilanian) notes that the criticism came from both sides of the aisle and "from within" OPM as well, as OPM assistant inspector general for audit Michael Esser "detailed a yearslong failure by OPM to adhere to reasonable cybersecurity practices," and said that "for a long time, the people running the agency's information technology had no expertise." Esser also noted that an inspector general's report recommended shutting down some vulnerable networks, which OPM Director Katherine Archuleta declined to do as "it would interfere with the agency's mission." DHS cyber official Andy Ozment is cited saying "hackers gained access to OPM's network using stolen credentials," an "important" point since the credentials could have been used to access encrypted as well as unencrypted data.

The [Washington Post](#) (6/17, Rein, 5.03M) "Federal Eye" blog cites Esser's testimony, saying that OPM "has not disciplined any employees for the agency's failure to pass numerous cybersecurity audits" and many OPM personnel in charge of information technology "had no IT background."

[AFP](#) (6/17, Lever) quotes Ozment saying, "As our detection methods continue to improve, more events will come to light."

The [Washington Times](#) (6/17, Dinan, 641K) also highlights Esser's testimony, in which he says OPM does not keep track of all

servers and databases on its main network, meaning it “cannot fully defend its network;” Esser is quoted saying that “In the case of the background check systems that aren’t updated, that ‘could potentially have national security implications.’”

[Politico](#) (6/16, Perera, 1.11M) reported that Archuleta and other OPM officials “struggled to respond to a barrage of questions from outraged lawmakers.” Asked about the agency’s failure to encrypt personal information, Archuleta said, “It is not feasible to implement on networks that are too old,” but her “attempts at an explanation only further stoked the anger of House Oversight and Government and Reform Chairman Jason Chaffetz, who expressed disbelief that OPM had failed to take apparently simple steps to secure its data,” saying, “You failed, utterly and totally. ... Your systems were vulnerable! The data was not encrypted!” Chaffetz is cited saying the Administration “should fire” Archuleta and OPM Chief Information Officer Donna Seymour.

[Bloomberg News](#) (6/16, 3.81M) cites Archuleta saying OPM “fends off an average of 10 million hacking attempts a month and the attacks will increase.” Archuleta is quoted saying, “We discovered these intrusions because of our increased efforts in the last eighteen months to improve cybersecurity at OPM, not despite them.” Bloomberg also briefly notes the KeyPoint breach, quoting DHS spokesman S.Y. Lee saying, “To date, no nefarious activity associated with this potential intrusion has been observed...We are committed to ensuring our employees’ privacy and take very seriously our responsibility to protect sensitive data in background investigations.”

[USA Today](#) (6/17, Kelly, 5.01M) notes that Archuleta told the panel that investigators “are still trying to figure out how many federal employees are victims” of the attacks, adding that “4.2 million federal workers will be notified by June 19 that their personnel records have been compromised.” Archuleta told “angry members” of the committee, “While we have not yet determined its scope and impact, we are committed to notifying those individuals whose information may have been compromised as soon as practicable.”

[Reuters](#) (6/16, Zengerle, Chiacu) quotes Archuleta: “I want to emphasize that cyber security issues that the Government is facing is a problem that has been decades in the making, due to a lack of investment in federal IT systems and a lack of efforts in both the public and private sectors to secure our internet infrastructure.”

The [Christian Science Monitor](#) (6/16, 539K) says “much of the discussion focused on what OPM can do to improve security,” though OMB chief information officer Tony Scott is quoted saying that “significantly better forms of network protections may not come for ‘years and years.’”

The [Washington Times](#) (6/17, Dinan, 641K) notes that “Top officials said they don’t yet know how many millions had their information stolen” and refused to discuss in an open hearing whether “CIA agents and other sensitive employees” were among those affected, “though lawmakers took that silence as confirmation of their worst fears.” The refusal to discuss certain matters in an open hearing “left committee members on both sides of the aisle frustrated.” US Rep. Steven Lynch (D-MA) is quoted saying, “This is one of those hearings where I think I am going to know less coming out of this hearing than I did when I walked,” adding, “Matter of fact, I wish that you were as strenuous and hardworking at keeping information out of the hands of hackers as you are keeping information out of the hands of Congress and federal employees.”

[The Hill](#) (6/17, Bennett, 533K) also reports this story.

In his [Washington Post](#) (6/17, Ignatius, 5.03M) column discussing DHS challenges more broadly, David Ignatius says Secretary Johnson “must reenlist US citizens — and a weary government bureaucracy — to fight the next rounds and keep the country safe.” Johnson’s challenge, he adds, “is that homeland security is a cooperative venture” and the “place where security cooperation is most needed, and hardest to get these days, is Silicon Valley.” The breaches at OPM show “just how vulnerable the US government and private companies are to hacking Post-Snowden,” and in a recent speech in San Francisco, Johnson is quoted telling tech companies, “We need each other, and we must work together. There are things government can do for you, and there are things we need you to do for us.”

An editorial in the [Washington Post](#) (6/17, Board, 5.03M) says the breach of OPM’s networks “represents a failure of stewardship and a serious external threat,” adding that both OPM and DHS, “which is supposed to protect federal civilian networks, have a lot of explaining to do.” The Post says “the president and Congress ought to question the DHS’s obvious weakness at protecting civilian federal networks,” in that Einstein “has failed to stop a series of breaches of federal agencies.” The Post says the breach “calls for a determined probe to identify the hackers and strike back,” adding that “We don’t suggest this lightly,” because an “essential aspect of deterrence is the credible threat of retaliation.”

OPM Officials Urged To Resign. [Bloomberg News](#) (6/16, 3.81M) reports that Chaffetz urged the resignation of Archuleta and Seymour, saying, “Those two had an opportunity to right the ship...They were given strong recommendations over a series of years but they didn’t get it done and there should be consequences. If we want a different result, we’re going to have to have different people.” House Oversight ranking Democrat Elijah Cummings is cited wondering whether the same hackers who breached USIS last year and KeyPoint Government Solutions “used stolen data to break into OPM’s networks;” Cummings is quoted saying, “I believe USIS and it’s parent company may now be obstructing this committee’s work.”

The [Wall Street Journal](#) (6/17, Paletta, 5.68M) says Congressional browbeating is a rite of passage for federal officials, but this hearing was notable for the bipartisan criticism from lawmakers who appeared upset that a lack of information was provided. As an example, US Rep. Ted Lieu (D-CA) is quoted saying he wanted a “few good people to accept responsibility and resign for the good of the nation.”

Additional Coverage. Additional coverage was provided by the [National Journal](#) (6/17, Subscription Publication, 156K), [Politico](#) (6/16, Perera, 1.11M), [Politico](#) (6/16, Perera, 1.11M), the [Christian Science Monitor](#) (6/16, 539K), [Yahoo! News](#) (6/17, Carollo, 6.18M), [Ars Technica](#) (6/16, 571K), the [Chicago \(IL\) Tribune](#) (6/16, Reports, 2.74M), [NextGov](#) (6/17, 2K), [NextGov](#) (6/17, 2K), the [Federal Times](#) (6/16, 118K), and the [Government Executive](#) (6/17, 2K).

WHITE HOUSE DETAILS “SERIOUS CONCERNS” WITH HOUSE’S INTERIOR-EPA BILL. The [E&E Daily](#) (6/16, Subscription Publication) reports that “a top White House official yesterday said the Obama administration has ‘serious concerns’ with the House’s fiscal 2016 spending bill for the Interior Department and U.S. EPA, warning that it is short on funding and long on ‘ideological riders.’” Office of Management and Budget Director Shaun Donovan “detailed the administration’s concerns in a letter to House Appropriations Chairman Hal Rogers (R-Ky.) a day before today’s scheduled committee markup of the \$30.17 billion measure funding Interior, EPA and the Forest Service.” The article notes that “as in previous letters to appropriators, Donovan said the president is unwilling to ‘lock in’ sequestration spending levels, as the House’s overall budget would do, ‘nor will he accept fixes to defense without also fixing non-defense.’” Also providing coverage are the [Washington Times](#) (6/17, Boyer, 641K) and the [Energy Guardian](#) (6/17).

House Approves Spending Bill. The [Greenwire](#) (6/16, Subscription Publication) reports that “persistent partisan deadlock on spending levels and policy riders was on full display this morning as the House Appropriations Committee considered an Interior Department and U.S. EPA funding bill that faces long odds to enactment.”

[Politico Pro](#) (6/17, Subscription Publication) reports that “the House Appropriations Committee Tuesday approved deep cuts to EPA and blocked funds for regulations on greenhouse gases and hydraulic fracturing in a 2016 spending bill that is all but certain to be draw a veto threat.” Additional coverage was provided by [The Hill](#) (6/17, Henry, 533K).

Additional coverage was provided by [The Hill](#) (6/17, Henry, 533K) and the [Minneapolis \(MN\) Star Tribune](#) (6/17, Taylor).

Senate Clears Spending Bill. The [Environment & Energy Publishing](#) (6/16, 705) reports that “a Senate fiscal 2016 spending plan for the Interior Department and U.S. EPA contains policy riders and funding levels aimed at ‘aggressively’ curtailing environmental regulations.”

[Politico Pro](#) (6/17, Subscription Publication) reports that “the Senate’s Interior-EPA spending panel approved a 2016 spending bill on Tuesday that cuts funding for EPA and includes a series of policy riders designed to hamper key administration environmental initiatives.” According to the article, “the \$30 billion package” includes policy riders that “would block all or parts” the Interior Department’s fracking rule, among other programs, according to lawmakers. The measure also “authorizes the construction of an emergency access road to the remote Alaskan community of King Cove, a project long sought by Sen. Lisa Murkowski.”

Additional coverage was provided by [The Hill](#) (6/17, Cama, 533K), the [National Journal](#) (6/17, Plautz, Subscription Publication, 156K), the [Biloxi \(MS\) Sun Herald](#) (6/16, 127K), the [Spartanburg \(SC\) Herald-Journal](#) (6/16, 109K), the [Bristol \(VA\) Herald Courier](#) (6/17), the [Alaska Public Radio Network](#) (6/16, 2K), the [Daily Mail \(UK\)](#) (6/17, 5.37M), [Yahoo! News](#) (6/17, Taylor), the [Houston \(TX\) Chronicle](#) (6/17, Taylor, 2.29M), [US News & World Report](#) (6/16, 907K), the [Washington \(DC\) Post](#) (6/17, Andrew Taylor |, Ap, 5.03M), [WCAV-TV Charlottesville \(VA\)](#) Charlottesville, VA (6/17, 1K), and [WJAX-TV Jacksonville \(FL\)](#) Jacksonville, FL (6/17).

House Cuts Funding For Eisenhower Memorial Commission. [Roll Call](#) (6/17, 99K) reports that “posing the biggest threat yet to architect Frank Gehry’s plans for a memorial” to Dwight D. Eisenhower, the House Appropriations Committee on Tuesday “approved a bill, 30-21, that would cut all funding for the Eisenhower Memorial Commission, and advanced non-binding language calling for a ‘reset’ on the project, which has not received any construction funds from Congress since fiscal 2012.” The article notes that “only one member objected to the report on the Interior-Environment spending bill that urges House and Senate committees with jurisdiction to work expeditiously on legislation that would direct appointment of a new EMC staff, and authorize an ‘open, public, and transparent new design process’ involving Congress, the Eisenhower family, the National Park Service and others.” Rep. Sanford D. Bishop Jr., “a House appointee to the 11-member commission, asked his colleagues to ‘reconsider this attack on the Eisenhower Memorial Commission’ during the three-hour markup.”

Riders Would Delist Gray Wolves. The [Minneapolis Star Tribune](#) (6/17, Sherry, 1.29M) reports that “senate and House Republicans are trying to insert language to delist gray wolves in Minnesota, Wyoming, Wisconsin and Michigan from the endangered species list in big Interior Department spending bill proposals this week.” The rider has “already caught the ire of environmentalists and wolf advocacy groups.” According to the article, “the language provides for the delisting of gray wolves and prohibits the rule from ever being subjected to judicial review – which means it could never be overruled by a future judge.”

House Bill Contains Funding For Everglades. The [Sunshine State \(FL\) News](#) (6/17, 3K) reports that federal funding for the Everglades was “contained in the Interior, Environment, and Related Agencies Appropriations bill passed Tuesday by the U.S. House Appropriations Committee.” According to the article, “almost \$140 million” from NPS funds “would go to restore the Everglades at the following national parks: Big Cypress, Biscayne, Everglades and Dry Tortugas.”

Senate Bill Would Boost Funding For Native Services, Firefighting. The [Alaska Dispatch News](#) (6/16, 216K) reports that the Senate appropriations bill would “ensure dedicated funding for emergency firefighting but also cut billions of dollars from federal lands and environment funding.” The legislation “includes a timely funding boost for activities to prevent forest fires by providing pruning and forest breaks to reduce the risk of fires spreading quickly.”

QUESTIONS RAISED OVER FEDERAL SAGE GROUSE PLANS. The [Greenwire](#) (6/16, Subscription Publication) reports that “the Obama administration is promoting final federal greater sage grouse protection plans as powerful conservation tools that won’t stifle ‘sustainable development and traditional uses of the land’ across 50 million acres in 10 Western states.” Last month, in announcing the plans, Interior Secretary Sally Jewell said, “They respect the existing rights that exist on those lands. They take a balanced and a targeted approach, focusing protections on the places that matter most.” However, “some ranchers, energy developers and others affected by those plans aren’t so sure they’re ‘balanced and targeted.’” According to the article, “stakeholders have questions and strong concerns about how they’ll be affected by land-use amendments outlined in the plans’ 14 final environmental impact statements.”

Additional coverage of the sage grouse was provided by the [WyoFile](#) (6/17).

Scientists Deploy Drones To Map Sagebrush For Wildfire Strategy. The [AP](#) (6/17, 3.69M) reports that “scientists have deployed drones over western Idaho to map a little-known landscape as part of an effort to reduce wildfire risks and protect sage grouse and other wildlife across the West.” According to the article, “they say they have to learn more about what grows in the region so that when charred areas are restored, land managers don’t plant a type of sagebrush that sage grouse won’t eat.” The article notes that “a key part of the Interior Department’s new wildfire strategy involves replacing native plants after giant blazes, which have been an increasing problem in rangeland in many Western states over the last decade.”

Idaho Land Managers Receive Funds To Remove Plants That Threaten Sage Grouse. The [Boise State \(ID\) Public Radio](#) (6/16) reports that “Idaho is among 12 states that will share \$10 million from the Interior Department, which will be used to keep the threat of wildfire to a minimum in sensitive sage grouse habitat.” The BLM’s district in Boise was “awarded \$166,000 to cut down dense and invasive conifer trees like junipers.” The BLM’s Lance Okeson said, “This project is really important because what we’re doing is we’re focusing on the best of the best habitat [for sage grouse]. [I]f we start early before the trees get very big... it’s really cheap and it’s really effective. And it’s easy to maintain those habitats.”

SEN. CANTWELL WANTS TO RESHAPE APPROACH TO NATIONAL WILDLIFE MANAGEMENT. The [ClimateWire](#) (6/16, Subscription Publication) reports that Sen. Maria Cantwell is “aiming to shape a more holistic approach to national wildfire management.” She has “released a white paper outlining the problems a new bill, the ‘Wildlife Management Act of 2015,’ is likely to address when it is completed.” Cantwell said, “The science is clearly telling us that wildfires are not behaving the same way they have in the past several decades.” She added, “We cannot keep using the same, tired approaches we have for the last 100 years. We need to make sure we are focusing on getting different results. Common sense tells us that our response needs to be modified now that we know the problem is different.”

Additional coverage of wildfires was provided by the [Washington \(DC\) Post](#) (6/17, Dan Joling |, Ap, 5.03M), the [Washington \(DC\) Post](#) (6/17, Dan Joling |, Ap, 5.03M), the [Seattle \(WA\) Times](#) (6/17, 970K), the [Craig \(CO\) Daily Press](#) (6/16, 10K), the [Kenai \(AK\) Peninsula Clarion](#) (6/16, 17K), [KTUU-TV Anchorage \(AK\)](#) Anchorage, AK (6/17, 78K), the [Eko \(NV\) Daily Free Press](#) (6/17, 22K), and [KCPQ-TV Seattle \(WA\)](#) Seattle (6/16, 157K).

REP. LABRADOR RAISES DOUBTS ABOUT SUPPORT FOR BOULDER-WHITE CLOUDS WILDERNESS. The [Idaho Statesman](#) (6/16, 199K) reports that Rep. Raul Labrador “raised doubts Monday about the support for a wilderness bill Republican Rep. Mike Simpson has pushed for 15 years at a House hearing.” Labrador, “questioning a Forest Service official Tuesday at the House Resources Committee’s subcommittee on Public Lands, said motorized recreation users only support the bill because they fear the alternative — a national monument designation by President Barack Obama.” He said, “The truth is, the public will is against this bill.”

SECRETARY JEWELL PROMOTES “EVERY KID IN A PARK” INITIATIVE WITH A ROCK CLIMB. [Outdoor USA Magazine](#) (6/17) reports that Interior Secretary Sally Jewell “recently donned a helmet and climbing harness and joined renowned climber Tommy Caldwell on a rock face in Chesapeake and Ohio Canal National Historical Park.” Accompanying the two “on the climb and short hike were 25 third-graders from Elsie Whitlow Stokes Charter School in Washington, D.C.” The article notes that “the outing was designed to highlight the Obama Administration’s Every Kid in a Park initiative.”

UTAH MOVERS CLOSER TO LAWSUIT IN PUSH TO CONTROL FEDERAL LANDS. The [AP](#) (6/17, 506K) reports that “Utah lawmakers inched closer to a possible lawsuit in the state’s push to seize control of federal lands with the selection Tuesday of two consulting firms that will prepare a legal strategy and attempt to sway public opinion in their favor.” According to the article, “a Utah legislative commission voted unanimously to pay up to \$2 million for the work to a law firm and public policy research organization.” The Davillier Law Group will “prepare an analysis by year’s end of the historical and constitutional grounds for transferring the lands,” said Rep. Keven Stratton.

Additional coverage was provided by the [San Francisco \(CA\) Chronicle](#) (6/17, Subscription Publication, 2.92M), the [Seattle \(WA\) Post-Intelligencer](#) (6/17, 822K), the [Twin Falls \(ID\) Times-News](#) (6/17, 75K), the [Washington \(DC\) Times](#) (6/17, McCombs, 641K), and the [Casper \(WY\) Star-Tribune](#) (6/17, 99K).

WASHINGTON COUNTY COMMISSION DENOUNCES PROPOSED GRAND CANYON WATERSHED NATIONAL MONUMENT. The [St. George \(UT\) News](#) (6/16, 3K) reports that “the Washington County Commission passed a resolution at its regular meeting Tuesday opposing the creation of” a proposed Grand Canyon Watershed National Monument. The measure “cites concerns over the loss of multiple uses on public lands, without public input, in an area directly south of Washington County.”

WILL SHAFROTH APPOINTED HEAD OF NATIONAL PARK FOUNDATION. The [Boulder \(CO\) Daily Camera](#) (6/17, 167K) reports that Will Shafroth, “a former congressional candidate from Boulder, has been appointed president and chief executive officer of the National Parks Foundation.” In a statement, Interior Secretary Sally Jewell, “noted Shafroth’s longtime experience advocating for America’s scenic lands and parks.” She said, “Will has a passion for public lands and the necessary experience to guide the foundation into the future as the National Park Service celebrates its centennial next year.”

AMENDMENTS TO NDAA SHOW CRITICIZED. For the “Congress” blog of [The Hill](#) (6/17, Reppenhagen, 533K), Gareth Reppenhagen, the Rocky Mountain director of Vet Voice Foundation, writes that the legislation to fund the Department of Defense for the coming year could “include some entirely unrelated issues – and threaten the parks and public lands I visit and enjoy with my family, and the heritage I hope to pass along to my son.” Reppenhagen criticizes provisions that “block the ability of U.S. Fish and Wildlife Service to protect the Greater sage-grouse,” as well as “language in the defense bill that would block the president’s ability to protect national monuments.” Reppenhagen asserts that those supporting these riders “cannot be permitted to single-handedly set precedents about the management and conservation of our wildlife or our parks, monuments and public lands, especially by sneaking provisions such as these into unrelated legislation.”

America's Great Outdoors:

National Park Service:

NPS AWARDS GRANTS TO WORLD WAR II INTERNMENT PROJECTS IN HAWAII. [KHON-TV](#) Honolulu (6/16, 37K) reports that “projects that preserve and interpret Japanese American confinement sites in Hawaii will receive more than \$366,000 in grant money, the National Park Service announced Tuesday.” The funds are “part of 20 grants totaling more than \$2.8 million to be distributed nationwide.” NPS Director Jonathan B. Jarvis said, “As stewards of our nation’s history, the National Park Service recognizes the importance of preserving these confinement sites. They are poignant reminders – today and for future generations – that we must be always vigilant in upholding civil liberties for all. These grants help us share valuable lessons on the fragility of our constitutional rights and ensure the experiences of those who were incarcerated are not forgotten.”

Additional coverage was provided by the [Arkansas Democrat Gazette](#) (6/17, 342K), the [Northwest Arkansas Online](#) (6/17), and [KITV-TV](#) Honolulu (6/17, 39K).

NPS AWARDS CIVIL WAR BATTLEFIELD GRANTS FOR KENTUCKY SITES. The [Danville \(KY\) Advocate-Messenger](#) (6/17, 34K) reports that “Perryville Battlefield is among three Kentucky parks to receive Lands and Water Conservation Fund grants to help preserve Civil War battlefields.” Perryville “received \$77,510 to preserve and continue to develop.” NPS Director Jonathan Jarvis said, “The impact of the events that took place on those hallowed grounds continues to affect all Americans. The protection of these sites provides opportunities for all of us to connect physically and emotionally with our country’s journey from Civil War to Civil Rights.”

NPS PRORANGER PROGRAM RECRUITS STUDENTS FOR RANGER POSITIONS. [USA Today](#) (6/16, 5.01M) reports on the NPS’ ProRanger Program. According to the article, “the ProRanger program requires students take four courses through the university, complete two summer internships at parks, attend Temple’s seasonal law enforcement training program, take one course during their summer internships and complete various projects and activities during any given semester.” Lofton Wiley, the ProRanger program manager, said, “I personally enjoy seeing people’s careers flourish and seeing people be successful. I like to help people out during their careers. I believe if we can help cultivate the next generation, we’re doing the park service justice.”

NPS BUILDING IN SANTA FE TO REOPEN TO VISITORS. The [Santa Fe New Mexican](#) (6/17, 49K) reports that “a campaign by advocates of reopening the historic National Park Service building on Old Santa Fe Trail to the public apparently has succeeded.” Sen. Tom Udall, said Tuesday that “the landmark adobe structure on Museum Hill — built by the Civilian Conservation Corps and decorated by the Works Progress Administration and members of the Santa Fe art colony before it opened in 1939 — will be staffed by volunteers able to provide information about the building, as well as about parks and trails in the area.”

BADLANDS NATIONAL PARK OFFICIALS URGE VISITORS TO USE TRAILS. The [AP](#) (6/17, 2.29M) reports that “officials at Badlands National Park are urging visitors to use the park’s trails following a cave-in that injured several members of a family over the weekend.” Park spokeswoman Julie Johndreau says “trails are there for a reason and that they’re reminding visitors to use them while they explore this summer.”

PUBLIC COMMENTS RECEIVED ON YELLOWSTONE BISON PLAN. The [AP](#) (6/17, 2.29M) reports that “more than 2,800 individual letters and online comments have been submitted during the initial public comment period on the future of Yellowstone bison.” The state of Montana and Yellowstone National Park is looking to rewrite the Interagency Bison Management Plan.

NPS STUDYING SEWALL-BELMONT HOUSE & MUSEUM. In his column for the [Washington Post](#) (6/17, Kelly, 5.03M), John Kelly notes that the NPS is “considering adding the Sewall-Belmont House & Museum to the stable of properties it oversees.” The agency “made the announcement last week after a two-year feasibility study”

NPS TO MARK CHKALOV FLIGHT ANNIVERSARY. The [Clark County \(WA\) Columbian](#) (6/16, 109K) reports that “re-enactors, vintage aircraft and a new generation of Russian visitors will help set the scene on Saturday for the 78th anniversary of the Chkalov flight.” The NPS will “host the observance at 10:30 a.m. at Pearson Air Museum, 1115 E. Fifth St. in Vancouver.”

ADDITIONAL COVERAGE OF MANHATTAN PROJECT NATIONAL HISTORICAL PARK. Additional coverage of the Manhattan Project National Historical Park was provided by the [Oak Ridger \(TN\)](#) (6/16, 15K).

NATIONAL LANDMARK STATUS SUPPORTED FOR PAOLI BATTLEFIELD. In an editorial, the [West Chester \(PA\) Daily Local News](#) (6/16, 43K) supports National Historical Landmark status for the Paoli Battlefield.

Bureau of Land Management:

UTAH LAWMAKERS BACK AID FOR OFFICIAL CONVICTED IN ATV PROTEST. The [AP](#) (6/17, McCombs, 2.29M) reports that “a Republican-dominated Utah legislative commission is throwing its support behind using state money to help pay legal bills of a county commissioner convicted in an ATV ride protesting federal control of public lands.” According to the article, “despite opposition from its two Democratic members, the state commission for the stewardship of public lands voted Tuesday to send a recommendation to the state’s Constitutional Defense Council.” The money would aid “San Juan County Commissioner Phil Lyman, who along with blogger Monte Wells was found guilty by a jury last month of federal misdemeanor charges.”

Additional coverage was provided by the [Salt Lake \(UT\) Tribune](#) (6/17, 470K), the [Deseret \(UT\) News](#) (6/17, 538K), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (6/17, 1.07M).

Lyman Launches Nonprofit. The [Environment & Energy Publishing](#) (6/17, 705) reports that Lyman has “launched a nonprofit dedicated to supporting those ‘whose freedoms are at risk.’” The Recapture Institute will “host educational talks on Navajo culture,

offer volunteer opportunities, support civic action and provide a public forum for discussing policies that ‘compromise the American dream,’ according to the organization’s website.” The organization will “also raise awareness of Lyman’s role in the May 10, 2014, OHV ride through Recapture Canyon just east of Blanding, Utah, which the organization contends was lawful, and raise money ‘in support of Commissioner Lyman,’ according to the site.”

CONCERNS RAISED OVER BLM PLAN FOR BIG HORN BASIN. The [Casper \(WY\) Star-Tribune](#) (6/17, 99K) reports that “conservationists and ranchers are raising concerns over a U.S. Bureau of Land Management plan that will govern 3.2 million federal acres in the Big Horn Basin.” The plan “calls on managing 1.1 million acres as priority sage grouse habitat, establishes three master leasing areas that seek to minimize the impacts of energy development on wildlife, and identifies three new areas for greater environmental protections.”

BLM SEEKS PUBLIC COMMENTS ON TARGET SHOOTING CLOSURES NEAR LAKE MOUNTAIN. [KSL-TV](#) Salt Lake City (6/17, 1.07M) reports that the BLM is “asking for the public’s input on amending the management plan which closed the eastern Lake Mountains area to target shooting.” Officials are “asking for input and comments from the public as it begins an environmental assessment ‘to determine the suitability of and potential for target shooting restrictions on public lands in this area’ according to a BLM news release.”

CORE YOUTH RECEIVE BLM’S VOLUNTEER AWARD. The [Powell \(WY\) Tribune](#) (6/17, 13K) reports that “now in their 16th year, Casper-based Conservation Outdoor Recreation Education (CORE) youth are cleaning up the Big Horn Basin one scrap at a time while appreciating what the Basin’s environs have to offer.” According to Victor Orr, CORE conservation outdoor recreation educator, on Tuesday, “they hauled a 200-pound bench to the top, taking turns carrying the bench dismantled in two parts.” Sarah Beckwith, BLM public affairs in Worland said, “Orr and the kids received the BLM’s prestigious ‘Making a Difference’ National Volunteer Award for outstanding youth.”

Fish and Wildlife Service:

FWS PROPOSES DELISTING EASTERN COUGAR. The [Greenwire](#) (6/16, Subscription Publication) reports that the FWS has “announced that it intends to formally remove the Eastern cougar from the endangered species list due to extinction.” An agency “review four years ago formally concluded that the subspecies of the North American cougar had gone extinct,” but “reported sightings of Eastern cougars – also known as mountain lions, pumas, panthers or ‘ghost cats’ – persist.” Martin Miller, chief of endangered species for the agency’s Northeast region, said in a statement, “We recognize that people have seen cougars in the wild in the eastern U.S.. Those cougars are not of the eastern cougar subspecies.”

Additional coverage was provided by [The Hill](#) (6/17, Devaney, 533K), [Reuters](#) (6/17, Zuckerman), [CNN](#) (6/16, Dinan, 3.17M), the [Bristol \(VA\) Herald Courier](#) (6/17), the [Daily Mail \(UK\)](#) (6/17, 5.37M), the [Seattle \(WA\) Times](#) (6/17, 970K), the [Washington \(DC\) Post](#) (6/17, David Sharp |, Ap, 5.03M), [Yahoo! News](#) (6/17, Sharp, 6.18M), the [Boston \(MA\) Herald](#) (6/17, 709K), the [Houston \(TX\) Chronicle](#) (6/17, Sharp, 2.29M), the [Worcester \(MA\) Telegram & Gazette](#) (6/16, 191K), the [Portland \(ME\) Press Herald](#) (6/16, 153K), the [Minneapolis \(MN\) Star Tribune](#) (6/17, Sharp, 1.29M), the [Charleston \(SC\) Post and Courier](#) (6/16, 305K), [WDIV-TV Detroit \(MI\)](#) Detroit (6/17, 292K), [W GAL-TV Lancaster \(PA\)](#) Lancaster, PA (6/17, 101K), [WTAE-TV Pittsburgh \(PA\)](#) Pittsburgh (6/17, 248K), [WZVN-TV Fort Myers \(FL\)](#) Fort Myers, FL (6/17, 1K), [WCAX-TV Burlington \(VT\)](#) Burlington, VT (6/17, 57K), [WKYT-TV Lexington \(KY\)](#) Lexington, KY (6/17, 83K), [WBZ-TV Boston \(MA\)](#) Boston (6/16, 119K), [WCAV-TV Charlottesville \(VA\)](#) Charlottesville, VA (6/17, 1K), and [WJXT-TV Jacksonville \(FL\)](#) Jacksonville, FL (6/17, 340K).

GROUP THREATENS LAWSUIT OVER DENIAL OF PROTECTIONS FOR RIO GRANDE CUTTHROAT TROUT. The [Santa Fe New Mexican](#) (6/17, 49K) reports that “a wildlife conservation group has put the federal government on notice that a decision last fall to deny Endangered Species Act protections to New Mexico’s struggling state fish, the Rio Grande cutthroat trout, will soon be greeted by a lawsuit.” The Center for Biological Diversity announced Tuesday that “it and other interested parties plan to file suit in 60 days against the Department of the Interior’s Secretary Sally Jewell in her oversight role for the U.S. Fish and Wildlife Service.” The group’s “letter claims sections of the Endangered Species Act were violated when the agency decided last September that listing the cutthroat trout subspecies as endangered isn’t warranted.”

FEDERAL AGENCIES SUED OVER BIGHORN SHEEP HABITAT. The [Courthouse News](#) (6/16, 7K) reports that “grizzly bears and bighorn sheep are threatened by federal permission for 8,000 domestic sheep to graze in prime habitat in Beaverhead Deerlodge National Forest in Montana, environmentalists claim in court.” The Gallatin Wildlife Association “sued the U.S. Forest Service and Fish and Wildlife Service in Federal Court, to protect bighorn sheep habitat ‘in the heart of the Gravelly Mountains.’”

FLOODING IMPACTS TRINITY RIVER REFUGE. The [Dayton \(TX\) News](#) (6/17, 23) reports that “the recent flooding in Houston” has left “95 percent” of the Trinity River National Wildlife Refuge “submerged in water.” The article notes that “prior to the flooding, only 5 percent of the refuge was underwater.” According to the article, “the refuge has been almost completely submerged for around 90 days and has, since then, undergone noticeable short term changes.” For instance, “in search of dry land, wildlife has dispersed onto higher ground – often placing themselves in greater danger alongside public roads.”

ADDITIONAL COVERAGE: FWS DESIGNATES ALL CHIMPANZEES AS “ENDANGERED.” Additional coverage that the FWS “on Friday introduced that all chimpanzees in the US will be listed as endangered” was provided by the [Boston \(MA\) Globe](#) (6/17, Board, 886K), [Southern California Public Radio](#) (6/16, 85K), [LatinosPost](#) (6/16, 27K), [Vocal Republic](#) (6/17), [io9](#) (6/16, 837K), and [Tech Times](#) (6/16, 153K).

ADDITIONAL COVERAGE OF EFFORT TO SAVE MONARCH BUTTERFLY. Additional coverage of the effort to save the Monarch butterfly was provided by the [AgWeek](#) (6/17, 87K).

ADDITIONAL COVERAGE OF SEN. INHOFE’S CONCERN FOR MANATEES. Additional coverage of Sen. James Inhofe’s concern for manatees was provided by [Salon](#) (6/16, 1.16M).

US Geological Survey:

USGS WANTS MORE SEISMIC MONITORS AT GLACIER PEAK. The [AP](#) (6/16) reports that the USGS is “seeking permission to install four new monitoring stations around Glacier Peak, Snohomish County’s only volcano.” According to the article, the USGS “started mapping the volcano and its surrounding peaks and calleys last year using Light Detection and Ranging, or lidar.” Now, “the hope for U.S. Forest Service approval to set up equipment that can track seismic activity.”

USGS MONITORING STREAMS, RIVERS IN COLORADO AFTER HEAVY RAIN. [KUSA-TV](#) Denver (6/16, 248K) reports that USGS “crews are paying close attention to river levels around the state” after “weeks of heavy rain and snowmelt.” USGS associate director of hydrologic studies Suzanne Pashke said, “Right now, the South Platte is flowing at 1,640 cubic feet per second or about 2,000 cubic feet per second over the last few days.”

Securing America’s Energy Future:

Onshore Energy Development:

JUDGE DEMANDS EXPLANATION FOR LENGTHY DELAY ON ENERGY LEASE OUTSIDE GLACIER NATIONAL PARK. The [AP](#) (6/17, Brown) reports that “a federal judge is pressing U.S. officials to explain why it’s taken three decades to decide on a proposal to drill for natural gas just outside Glacier National Park in an area considered sacred by some Indian tribes in Montana and Canada.” According to the article, “a frustrated U.S. District Judge Richard Leon called the delay ‘troubling’ and a ‘nightmare’ during a recent court hearing.” Leon “ordered the Interior and Agriculture departments to report back to him with any other example of where they have ‘dragged their feet’ for so long.”

Also reporting on the story is the [Fairfield \(MT\) Sun Times](#) (6/17).

MOFFAT COUNTY BECOMES COOPERATING AGENCY IN DEVELOPMENT OF NEW ANALYSIS FOR COLOWYO COAL MINE. The [Craig \(CO\) Daily Press](#) (6/16, 10K) reports that “at Tuesday morning’s Moffat County Commissioners meeting, the commissioners signed a memo of understanding establishing the county as a cooperating agency in the development of the new environmental analysis for Colowyo coal mine.” According to the article, “the agreement sets forth the roles and responsibilities agreed to between the Office of Surface Mining Reclamation and Enforcement and Moffat County, for the purpose of collaborative planning and production of an environmental assessment for Colowyo’s South Taylor Pit.” The article notes that “as a cooperating agency, Moffat County will be able to assist in identifying issues to be addressed in the planning effort, provide relevant data for the construction of the environmental assessment and suggest alternatives to be considered in the assessment.”

COMMENTS SOUGHT ON DAN RIVER ASH DAMAGE PLAN. The [Charlotte \(NC\) Observer](#) (6/17, 601K) reports that “a state-federal team is seeking public comment on its plan to assess natural resource damage from Duke Energy’s 2014 spill of coal ash into the Dan River.” The FWS, “Virginia Department of Environmental Quality and North Carolina’s Department of Environment and Natural Resources are jointly overseeing the damage assessment.”

BLM URGED TO RAISE ROYALTY RATE. In a piece for the [Washington Post](#) (6/17, Hein, 5.03M), Jayni Foley Hein, policy director at the Institute for Policy Integrity at NYU School of Law, writes that “last fiscal year, the federal government generated more than \$13 billion from drilling and mining activities on its land – but it should have made hundreds of millions of dollars more.” Hein argues that “antiquated pricing rules have given these energy companies access to federal lands at prices that ignore decades of inflation, as well as many environmental and health costs of fossil fuel production.” She notes that the BLM has “never increased the royalty rate” and argues that “as a starting point, the federal government should update the minimum bid to account for inflation; that alone would raise it to \$24.”

Offshore Energy Development:

DEMOCRATS, REPUBLICANS CRITICIZE PRESIDENT OBAMA’S DRILLING REGULATIONS. [The Hill](#) (6/16, Cama, 533K) reports that President Obama’s Arctic drilling policies are generating criticism from both parties. Republicans are accusing Obama of squelching development with over-regulation, while Democrats argue that the President has not gone far enough to restrict offshore drilling in the Arctic, says [The Hill](#), adding that most of the criticism is in reference to a rule restricting drilling season, requiring the driller to have a rig available to relieve a blowout, and demanding Arctic-specific plans. The [Houston Chronicle](#) (6/16, 2.29M) reports that oil industry representatives argue that these regulations are “too prescriptive” and threaten to temper exploration and keep old technologies in use.

Industry Allies, Environmentalists Respond To Government-Sponsored Arctic Drilling Report. The [San Antonio Express-News](#) (6/17, 670K) reports that “oil industry representatives and allies on Capital Hill on Tuesday touted a National Petroleum Council on Arctic drilling as a definitive, unbiased resource.” The report makes the case that the United States should “aggressively develop Arctic oil and gas resources” in anticipation of declining onshore production. Although the NPC is a federal advisory committee established to provide guidance to the government, the group is “set apart... by its heavy oil and gas industry membership.” Environmentalists have seized on this point in their criticism of the report, arguing that it “reads more like an industry wish list... than a balanced assessment.” While Republican Rep. Garret Graves (LA) “observed that the NPC leadership behind the report are all appointed by the energy secretary, presumably because of their oil and gas expertise,” Democratic Rep. Jared Huffman (CA) argued that “it’s an industry-sponsored effort,” noting that employees from Exxon Mobil, Chevron, and Shell held leadership positions in the preparation of the report.

Environmentalists Criticize NPC Arctic Drilling Report. [Fuel Fix \(TX\)](#) (6/16, Dlouhy, 7K) reports on environmentalists’ claims that a recent National Petroleum Council report on Arctic drilling advocating aggressive US development of oil and gas resources has

"serious flaws and...a number of highly problematic assumptions." More than half of the contributors to the report work in the oil and gas industry, says Fuel Fix, adding that critics question the assessment of the industry's ability to handle an oil spill in Arctic conditions.

BSEE Director Salerno Testifies Before House Subpanel. [Politico Pro](#) (6/17, Subscription Publication) reports that BSEE chief Brian Salerno "disputed some of the National Petroleum Council's conclusions issued in its March report on Arctic oil and gas drilling." Salerno "told the House Natural Resources Committee's energy subpanel that he had contacted his Canadian counterparts to follow up on a suggestion in the NPC report that Canada was considering alternatives to a requirement in the Obama administration's proposed Arctic drilling safety rules that companies have the capability to build a relief well in the same drilling season that the production well is drilled." Salerno also "challenged NPC's criticism of the limits on drilling during the Arctic shoulder season that Interior included in its safety proposal."

The [Argus Media](#) (6/17) reports that Salerno "defended a proposed rule that would require oil and gas producers exploring in the arctic to have equipment on hand to drill a relief well in case of a blowout." He said "regulators must ensure that producers operating in the Chukchi and Beaufort seas off the Alaskan coast can seal off a blown out well within the same drilling season."

Additional coverage was provided by [The Hill](#) (6/16, Cama, 533K), [Alaska Public Radio Network](#) (6/16, 2K), the [Alaska Dispatch News](#) (6/16, 216K), [KTOO-FM Juneau \(AK\)](#) Juneau, AK (6/17), and the [Oil and Gas Journal](#) (6/17, 1K).

Meanwhile, the [EIN News](#) (6/17, 1K) reports that "API encouraged Congress and regulators to prioritize Arctic offshore oil and natural gas development as the House Natural Resources Committee prepared to hold a hearing on Arctic energy today." API Upstream Group Director Er k Milito said, "Arctic oil and natural gas represent incredible potential for American energy security, jobs and revenue for the government. No other undeveloped energy basin in the country can match the amount of oil and natural gas we can produce in the Arctic." Additional coverage was provided by [Penn Energy](#) (6/17, 128).

SHELL MAY SOON RESUME ARCTIC OIL EXPLORATION. [Bloomberg](#) (6/16, Drajem, 3.81M) reports that Royal Dutch Shell received permission from the Commerce Department to use air guns, ice-breaking, anchor handling, and drilling that may disturb arctic marine animals. The final hurdle, receiving approval of its drilling plan from the Interior Department, could be imminent, allowing Shell to resume oil exploration of the coast of Alaska, says Bloomberg, adding that these operations were shut down in 2012 after its main drilling rig broke down and was lost. [Fuel Fix \(TX\)](#) (6/16, Dlouhy, 7K) reports that although the Interior Department did not see any "showstoppers," its safety bureau expressed some concerns in a letter to Shell about one of its tugboats, which "dragged anchor amid gale-force winds" during an exercise.

Additional coverage of Shell's plans in the Arctic was provided by [Bloomberg News](#) (6/16, Drajem, 3.81M), the [New York \(NY\) Times](#) (6/16, Press, Subscription Publication, 12.24M), [Yahoo! Finance](#) (6/16, 5.69M), and the [Natural Gas Intelligence](#) (6/17, Subscription Publication).

REP. CARNEY TOURS REHOBOTH BEACH TO LEARN ABOUT RISKS OF OFFSHORE DRILLING. The [Lewes \(DE\) Cape Gazette](#) (6/17, 42K) reports that Rep. John Carney, who "opposes opening the mid-Atlantic to offshore drilling," toured "Rehoboth Beach May 27 to find out more about the risks of opening offshore areas to gas and oil companies." Carney said "he doesn't want to see a repeat of the Deepwater Horizon oil spill in the Gulf of Mexico." He said "he plans to fight the Department of Interior's offshore drilling proposal."

Tackling America's Water Challenges:

BOR AWARDED \$6.5 MILLION IN GRANT FUNDING TO HELP RELIEVE DROUGHT IN CALIFORNIA. The [YubaNet \(CA\)](#) (6/17, 1K) reports that the Interior Department "announced that its Bureau of Reclamation is awarding grants totaling \$6.5 million for more efficient management and conservation of California's water as part of the Obama Administration's effort to bring relief to drought-stricken communities." Interior Deputy Secretary M ke Connor said, "These are just the latest grants in the President's all-hands-on-deck campaign to alleviate the impacts of this historic drought in California and throughout the West. The entire government is dedicated to helping respond to continued drought conditions. We know that water is the lifeblood of our communities and every drop counts."

NAVAJO GENERATING STATION'S IMPACT ON CLIMATE, DROUGHT EXAMINED. [ProPublica](#) (6/17, 25K) reports on that "the Navajo Generating Station is a monument to man's outsized confidence that it would always be possible to engineer new solutions to an arid region's environmental limits." The article notes that "15 years into a historic drought, it is becoming increasingly clear that the era of engineering more and more water out of the Colorado River is coming to a close." Also, "every hour the Navajo's generators spin, the plant spews more climate-warming gases into the atmosphere than almost any other facility in the United States." It says that "the Navajo Generating Station is more a caution than a marvel, showing how much energy it takes to move water through an artificial river system, and the unforeseen damage produced by doing so."

OFFICIALS REVISE STRATEGY FOR SHASTA LAKE. The [AP](#) (6/17, 2.29M) reports that "state and federal officials said Tuesday that they're revising their strategy for releasing water from the California's largest reservoir for the coming long, hot summer to avoid killing off this year's run of endangered salmon." The move "to hold back water from Shasta Lake north of Redding is meant to take advantage of what little cool water there is in the warming lake required for survival of spawning winter-run Chinook salmon." The article notes that "this year is especially challenging, water officials said, because this summer is expected to be hotter than last year's and there is less water in the state to go around."

BOR MAKES A CALL FOR WATER ON BEHALF OF KLAMATH PROJECT. The [Klamath Falls \(OR\) Herald And News](#) (6/17, 45K) reports that the BOR's Klamath Basin Area Office "on Tuesday made a call to exercise a 1905 water right on behalf of the Klamath Project." Area Manager Therese O'Rourke Bradford said, "The call for administration, made by both Reclamation and Project

water users, will assist in managing the limited water supply to ensure water will be available as long as possible through the 2015 spring-summer irrigation season.”

NASA DATA SHOWS WORLD DRAINING MAJOR AQUIFERS. The [Washington Post](#) (6/17, A1, Frankel, 5.03M) reports on its front page that California isn't the “only place draining underground aquifers in the hunt for fresh water,” as according to NASA data released on Tuesday, it is “happening across the world.” The Post says that 21 of the world's 37 largest aquifers have “passed their sustainability tipping points, meaning more water is being removed than replaced from these vital underground reservoirs” and 13 of them “fell at rates that put them into the most troubled category.”

Drought Restrictions Cut Water To California Town. The [CBS Evening News](#) (6/16, story 10, 0:25, Pelley, 5.08M) reported, “In just two days,” Mountain House, “a town in central California, could run out of water.” The town “lost its only supplier last week when the state ordered severe cuts to save water during the historic drought. Fifteen thousand live” in the town, and local officials “are now scouring the state to find someone to sell them water.”

Empowering Native American Communities:

WHITE HOUSE QUESTIONS ‘MISPLACED PRIORITIES’ IN APPROPRIATIONS BILL. The [Nation Sun News](#) (6/16) reports that “the White House is objecting to an appropriations measure that reduces funding for Indian programs and includes some questionable Indian policy riders.” Shaun Donovan, director of the White House Office of Management and Budget, “questioned the ‘misplaced priorities’ in the bill, which is being brought up for markup this morning.” Donovan said “lawmakers are putting lives in danger by not embracing the increases that President Barack Obama requested for the Indian Health Service and the Bureau of Indian Affairs.”

Federal Recognition New Rule Attacked In Interior's Appropriations Bill. The [Indian Country Today Media Network](#) (6/16, 28K) reports that “a rider that would stop the Bureau of Indian Affairs from revising procedures for federal acknowledgment of Indian tribes has been attached to the Interior Department's 2016 spending plan by the House Appropriations Subcommittee.”

Additional coverage was provided by the [Nation Sun News](#) (6/17).

PRESIDENTIAL MANAGEMENT FELLOW WORKS ON NATIVE AMERICAN ISSUES. The [Indian Country Today Media Network](#) (6/16, 28K) profiles Tracy Leigh Canard Goodluck (Oneida/Mvskoke Creek), “recently selected as a Presidential Management Fellow and assigned to the White House Domestic Policy Council (DPC).” Goodluck said, “It has been exciting to work on this initiative both at the White House and at DOI because the work we are doing with BIE [Bureau of Indian Education] reform, Native youth engagement opportunities such as the White House Tribal Youth Gathering being held in July, and the partnerships with Native organizations across the country, all have real and tangible impacts in Indian country.”

ADDITIONAL COVERAGE: INTERIOR APPROVES SPOKANES’ CASINO PROJECT. Additional coverage of the approval of the proposed Spokane Tribe casino was provided by the [Houston \(TX\) Chronicle](#) (6/17, 2.29M), the [Seattle \(WA\) Times](#) (6/17, 970K), the [Spokane \(WA\) Spokesman-Review](#) (6/16, 172K), the [Spokane \(WA\) Spokesman-Review](#) (6/16, 172K), the [Indian Country Today Media Network](#) (6/16, 28K), the [Law 360](#) (6/17, 15K), [KREM-TV Spokane \(WA\)](#) Spokane, WA (6/16, 44K), and [KXLY-TV Spokane \(WA\)](#) Spokane, WA (6/17, 18K).

ADDITIONAL COVERAGE: SENATE INDIAN AFFAIRS COMMITTEE TAKES UP ECONOMIC DEVELOPMENT. Additional coverage that the Senate Indian Affairs Committee is holding a listening session on the Buy Indian Act was provided by the [Nation Sun News](#) (6/16).

ADDITIONAL COVERAGE: BIA ENCOURAGING TRIBES TO APPLY FOR WAIVERS UNDER NO CHILD LEFT BEHIND. Additional coverage that the BIA is encouraging tribes to apply for No Child Left Behind waivers was provided by the [Arizona Republic](#) (6/16, Rumore, 1.27M) and the [Navajo-Hopi Observer](#) (6/17, 43K).

Top National News:

MEDIA ANALYSES: EVEN WITH ADDITIONAL TIME, OBAMA TRADE AGENDA IN SERIOUS TROUBLE. The network news broadcasts did not cover the House's 236-189 vote Tuesday to extend the deadline to pass a trade adjustment assistance bill to July 30, and discussion of the vote on cable was very light. Print and online coverage, however, are extensive. The tone of the coverage has not shifted significantly from yesterday, with most reports noting that the move buys the President and House Republicans more time, but questioning whether the President and Republicans actually have a fair chance to find the needed votes.

While [The Hill](#) (6/16, Marcos, 533K) reported in its “Floor Action” blog that the move gave lawmakers “through the end of July to figure out how to pass President Obama's trade agenda,” [Foreign Policy](#) (6/16, Francis, 449K) noted that the trade pact “remains on legislative life support.” [NPR](#) (6/16, Kurtzleben, Taylor, 1.52M) similarly said on its website that “it's clear that Obama and the House GOP have their work cut out for them in procuring those votes.”

Likewise, the [Washington Times](#) (6/17, Boyer, Dinan, 641K) reports that it “remains unclear whether the White House will be able to sway enough votes,” noting that the White House will need to win “up to 90...and has made little headway.” [Vox](#) (6/16, Allen, 839K), along similar lines, said that the “inability of the White House to formulate a political strategy for reviving the fast-track trade authority bill is the latest and most conclusive sign that the legislation is dead for now.” Meanwhile, [Reuters](#) (6/16, Hughes, Lawder) reports that while the extension provides more time to build support for the pact, it compresses the time frame for the President to negotiate the agreement.

[McClatchy](#) (6/17, Hotakainen, 32K) says trade opponents criticized the move, saying it “was unfair to delay a vote for so long and to make it part of an intelligence bill,” a reference to the fact that the extension was included “in a rule for debate on the 2016 intelligence

authorization bill.” In a separate story on its website, [NPR](#) (6/16, 1.52M) said that Democrats “were virtually united in opposing the six-week extension to reconsider the matter, even though that’s what Obama wanted.”

The [Washington Post](#) (6/17, Kane, DeBonis, 5.03M) calls yesterday’s vote a “modest victory” for the President and notes that White House spokesman Josh Earnest “called the move to buy more time on the existing trade package a ‘prudent one,’” saying it will “give members of the House and Senate additional time to consider the path forward. ... In this case, we are pleased that Democrats and Republicans appear to be working together to try to find this path.” The [New York Times](#) (6/17, Steinhauer, Subscription Publication, 12.24M) says Earnest “suggested...that Mr. Obama’s efforts to win support from House Democrats might have cooled for now.”

[US News & World Report](#) (6/17, Williams, 907K) noted on its “Washington Whispers” blog that “Republicans and pro-trade Democrats are talking to the White House, trying to figure out how to revive the bill,” but “no one’s got any answers.” Peter Cook said on [Bloomberg’s TV Market Makers](#) (6/16), “One option being discussed that’s on the table is going to conference with the Senate,” in the hope that “they can cut a deal by getting into a closed room with senators and trying to work a final deal there.” However, Cook added that the President’s trade agenda is “effectively in a deep freeze.”

[The Hill](#) (6/17, Lillis, 533K) said that pro-Democrats are pressing the Administration to provide more details about the TPP, arguing that “a lack of transparency has made it much tougher to move President Obama’s ambitious trade agenda through Congress.” According to the lawmakers, they told USTR Froman and National Economic Council head Zients “to release more details of the trade pact, a strategy they think will assuage many of the concerns.”

GOP Leaders Ponder Standalone TPA, TAA Measures. [USA Today](#) (6/17, Davis, 5.01M) reports that “there are few options for TPA supporters to get it to Obama’s desk,” and the [AP](#) (6/17, Babington, Kuhnhen) says that following talks with the President, GOP leaders in Congress crafted a “quick rescue plan,” under which Speaker Boehner and Senate Majority Leader McConnell would “split the stalled bill into two parts in hopes of sending them to the president separately, with Republicans providing most of the needed votes for one part, and Democrats for the other.” One measure would give Congress “the right to accept or reject any future deal, but not change it,” and the other would renew the trade adjustment assistance program.

The [Wall Street Journal](#) (6/17, Peterson, Stanley-Becker, Subscription Publication, 5.68M) quotes House Majority Leader McCarthy as saying a standalone vote on TPA would be “a very good option,” but questions whether a sufficient number of the 13 Senate Democrats who backed TPA will support the strategy. [Politico](#) (6/17, Sherman, Raju, 1.11M) reported that the House is “on the brink of scheduling a standalone vote” on TPA without the accompanying TAA legislation, citing sources that said a House vote on TPA could come “as early as this week.”

Lori Wallach, Director of Public Citizen’s Global Trade Watch, said on [MSNBC’s The Ed Show](#) (6/16, 444K) that what is “likely to happen” is that Republicans will “come back to the House without the worker adjustment assistance that was attached to it,” while the [Huffington Post](#) (6/16, Delaney, 194K) reported that House Democrats are “confident” that TAA “won’t be a casualty of an ongoing standoff with Republicans over President Barack Obama’s trade agenda.” Rep. Sander Levin “pointed to the Obama administration’s emphasis on trade assistance,” saying, “As long as the president is emphatic that before any trade bill there has to be TAA, TAA is not in jeopardy.”

Boehner Blasts Members Over Vote On Trade Rule. [Politico](#) (6/16, Sherman, 1.11M) reported that during a closed Republican strategy meeting Tuesday morning, Boehner “laid into Republicans who have abandoned the party on procedural votes, reminding lawmakers that they are part of a team.” The [Washington Post](#) (6/17, Kane, DeBonis, 5.03M) says Boehner “acknowledged that he gave a brow-beating address to his rank-and-file Republicans Tuesday morning in advance of the vote,” and [Foreign Policy](#) (6/16, Francis, 449K) reported that Tuesday’s vote came after Speaker Boehner “scolded Republicans who refused to allow the trade debate to move forward.”

[Bloomberg Politics](#) (6/17, House, 161K) reports that according to a House GOP aide, Majority Whip Scalise removed Reps. Cynthia Lummis, Steve Pearce, and Trent Franks from the GOP Whip team as punishment for “siding again

SECRETARY JEWELL ANNOUNCES FUNDING FOR WILDFIRE PROJECTS. The [Environment & Energy Publishing](#) (6/12, 705)

reports that “the Obama administration is advancing efforts to protect landscapes from wildfires, announcing funding today for 10 projects designed to improve natural fire resiliency across millions of acres of public lands stretching from Oregon to states in the Southeast coastal plain.” Interior Secretary Sally Jewell said in a statement “the \$10 million for the first projects funded this year under the Wildland Fire Resilient Landscapes Program will restore critical areas that are ‘essential for mitigating the impacts of fire and climate change.’” The article notes that “all the projects have matching funds and incorporate partnerships with various state, local and private partners.”

The [AP Atlanta](#) (6/14, 167K) reports that Jewell said, “These projects will restore critical landscapes, which is essential for mitigating the impacts of fire and climate change. These projects support our efforts to protect our nation’s landscapes for this and future generations.”

Congress Urged To Act On Wildfire Bills. In an editorial, the [Palm Springs \(CA\) Desert Sun](#) (6/12, 85K) urges Congress to approve “bipartisan legislation that would end the need for ‘fire borrowing,’ where the Forest Service and Interior Department are forced to shift funds from other needed projects to deal with catastrophic fires.” The editorial says that “Washington should stop playing politics with the issue and stop needless shifting of funds away from forest management work that could prevent or minimize these catastrophic events in the first place.”

Op-Ed: Partnerships Critical To Managing Forests. In an op-ed for the [Colorado Springs \(CO\) Gazette](#) (6/14, 166K), Daniel Jirón is, regional forester for the U.S. Forest Service Rocky Mountain Region, discusses how partnerships are important in protecting Colorado’s forests and grasslands.

Additional Coverage. Additional coverage of wildfires was provided by [KUNC-FM](#) Greeley, CO (6/14, 6K), the [Walla Walla \(WA\) Union-Bulletin](#) (6/12, 38K), the [Idaho Press Tribune](#) (6/14, 6K), the [Seattle \(WA\) Post-Intelligencer](#) (6/12, 822K), the [Cortez \(CO\) Journal](#) (6/14, 646), the [Walla Walla \(WA\) Union-Bulletin](#) (6/12, 38K), [Southwest Farm Press](#) (6/14, 86K), and the [Roseburg \(OR\) News-Review](#) (6/14, 53K).

WHITE HOUSE ANNOUNCES \$110 MILLION IN FUNDS TO BATTLE WESTERN DROUGHT. [NBC Nightly News](#) (6/14, story 6, 2:00, Quintanilla, 7.86M) reported, “With folks out West dealing with one of the worst droughts in over a century, this week the White House said it’s giving more than \$100 million in aid to communities that have been hit.” The President was shown saying, “I think it’s important that all of us take responsibility, because it’s not just California.”

The [Washington Post](#) (6/13, Mooney, 5.03M) reports that on Friday the Administration announced it will allocate \$110 million in additional funds to help communities impacted by the ongoing Western drought as well as fight regional wildfires. White House senior adviser Brian Deese said, "We are focused on and concerned about the impact of the drought for economic and social conditions across the Western United States." The new funding is in addition to more than \$190 million from Federal agencies to aid Western communities, as well as another \$1.2 billion the Department of Agriculture is expecting to provide for losses of grazing land for livestock producers.

The [Los Angeles Times](#) (6/13, Stevens, 4.03M) notes that prior to the announcement, President Obama and his advisers met with Western governors to participate in a briefing about wildfires and the drought. Officials said about 35% of the West is undergoing "severe to exceptional drought." Of the new funds, "a significant share" will be apportioned to California, where a recent UC Davis study estimated "18,000 jobs have been lost" due to the drought. Officials with the Labor Department will grant up to \$18 million to the state for "temporary jobs for dislocated workers," according to Assistant Labor Secretary Portia Wu. Additionally, \$10 million of the funds will go to small, rural California communities in need of "emergency water," according to Agriculture Undersecretary Robert Bonnie. [The Hill](#) (6/12, Cama, 533K) also noted the announcement of funds and meeting with Western governors.

California Orders Long-Term Water Rights Holders To Cut Water Use. As part of the ongoing effort to address the record drought in California, state regulators have taken "drastic action" by implementing new rules "governing water rights," the [CBS Evening News](#) (6/13, story 6, 1:50, Axelrod, 5.08M) reported. Officials are now mandating that senior rights holders "stop diverting river water immediately."

The [AP](#) (6/13) reports that California officials on Friday announced they would order more than 100 "senior rights holders" in the Sacramento, San Joaquin, and delta watersheds to halt pumping at the sites. The ban on water pumping is "the first time that the state has forced large numbers of holders of senior-water rights" to curb their water use.

The [Los Angeles Times](#) (6/13, Boxall, 4.03M) notes that Friday's announcement pertains to senior water rights holders who have rights dating back to between 1903 and 1914, and follows an announcement earlier this Spring halting water pumping from about 9,000 holders of junior water rights. The Times says the effects of the latest order "will vary," with most large irrigation districts having sufficient water storage for continued use. Additionally, utilities will be able to keep using water for hydropower "as long as the water is returned to the rivers." And, many ranchers and growers have other groundwater supplies that aren't affected by the order.

In a related article, the [Washington Post](#) (6/14, Kuznia, 5.03M) reports that "ultra-wealthy" enclaves in California "guzzle five times more water per capita than the statewide average." As state regulators impose new "water rationing" rules, local officials are reserving the "right to install flow restrictors" as a way to control water usage by "ultra-wealthy customers undeterred by financial penalties." In response to the restrictions, residents "are feeling aggrieved."

California's Water Czar Now A Prominent Personality. The [New York Times](#) (6/15, Nagourney, Subscription Publication, 12.24M) profiles Water Resources Board head Felicia Marcus, California's "water czar," saying that when Gov. Jerry Brown chose her for "this powerful if relatively little known board 27 months ago, it seemed a wonky niche of a job, albeit an important assignment." Now, Marcus "has become the face of California's crackdown on water abusers" and "is a drought celebrity." She is "the lightning rod one day, and the empathetic enforcer the next."

Additional Coverage. Additional coverage of the drought was provided by the [Greenwire](#) (6/12, Subscription Publication), the [Los Angeles \(CA\) Times](#) (6/12, Stevens, 4.03M), the [Reading \(PA\) Eagle](#) (6/14, 111K), the [Ogden \(UT\) Standard-Examiner](#) (6/12, 83K), the [Columbus \(GA\) Ledger-Enquirer](#) (6/12, 119K), the [San Francisco \(CA\) Chronicle](#) (6/14, Subscription Publication, 2.92M), the [Bristol \(VA\) Herald Courier](#) (6/14), the [Houston \(TX\) Chronicle](#) (6/12, Williams), [KCNC-TV Denver \(CO\)](#) Denver (6/13, 57K), [Yahoo! News](#) (6/12, Williams, 6.18M), [KCRA-TV Sacramento \(CA\)](#) Sacramento, CA (6/14, 136K), [KNXV-TV Phoenix \(AZ\)](#) Phoenix (6/14, 139K), the [Dubuque \(IA\) Telegraph Herald](#) (6/14, 88K), the [Eugene \(OR\) Register-Guard](#) (6/14, 172K), the [Imperial Valley \(CA\) News](#) (6/14, 1K), the [San Francisco \(CA\) Chronicle](#) (6/14, Subscription Publication, 2.92M), [Government Security News](#) (6/15, 104K), the [San Francisco \(CA\) Chronicle](#) (6/14, Subscription Publication, 2.92M), and the [Telegraph \(UK\)](#) (6/14, 1.15M).

SECRETARY JEWELL CRITICIZES SAGE RIDERS IN DEFENSE BILL. The [Idaho Statesman](#) (6/12, 199K) reports that Interior Secretary Sally Jewell said "riders to the National Defense Authorization Act that would allow states to veto sections of federal plans designed to protect sage grouse would leave the status quo in place and cause uncertainty for business and ranchers across the West." Jewell, "who met this week by phone with the Idaho Statesman editorial board, said riders like one written by Republican Rep. Rob Bishop that would delay implementing sage grouse conservation plans for six years 'would be very destructive,' and make it unlikely her department could downlist sage grouse and remove the threat of harsh restrictions under the Federal Endangered Species Act."

House Republicans Seek To Remove Protections For Gray Wolves. The [Summit County \(CO\) Citizens Voice](#) (6/14, 506) reports that "for the second time in five years, anti-environmental Republicans in Congress are trying to make an end run around the Endangered Species Act by stripping federal protection for gray wolves in Wyoming and the western Great Lakes states." According to the article, "the amendment to a spending bill for the Interior Department is similar to a measure passed in 2011, when Congress removed protections for wolves in Idaho and Montana — the first time that Congress legislatively removed protections for a species. Since the 2011 rider passed, more than 1,900 wolves have been killed in the two states."

SEN. VITTER DEMANDS NEW INSPECTOR GENERAL NOMINEE. The [New Orleans Times-Picayune](#) (6/14, 733K) reports that Sen. David Vitter is "objecting to President Barack Obama's nomination of Mary Kendall to be inspector general at the Department of Interior." His "objection centers on Kendall's role as acting inspector general at the Interior Department following the BP oil spill, specifically the review of how a White House report had been edited, making it seem that an outside group of experts agreed with the department's decision to employ a moratorium on deep-water drilling." Vitter said, "Mary Kendall has a long history of allowing political ideology to influence her decisions. I believe she was at the core of the administration's devastating Gulf drilling moratorium and may have used her authority inappropriately."

The [Greenwire](#) (6/12, Subscription Publication) reports that in a letter to President Obama, Vitter wrote, "I must notify you that I will strenuously object to any consideration of her nomination, and request that you immediately withdraw it and instead put forward a nominee who can be confirmed by the Senate and hit the ground running, without questions about their independence from the political leadership of the DOI and the White House."

Meanwhile, the [Greenwire](#) (6/12, Subscription Publication) reports that "Kendall has a tough road ahead before she can be the Department of the Interior's permanent watchdog." The article notes that "her tenure in the position has angered several Republican lawmakers – enough so that a trio of GOP senators sparked an investigation of Kendall by her fellow inspectors general." In a May 2012 letter, Sens. David Vitter (R-La.), Jeff Sessions (R-Ala.) and John Cornyn (R-Texas) called for an investigation into Kendall by the Council of the Inspectors General on Integrity and Efficiency.

Also reporting on the story is the [Washington Examiner](#) (6/14, 349K).

HOUSE PANEL TO HOLD HEARING ON OCMULGEE MOUNDS NATIONAL HISTORICAL PARK BOUNDARY REVISION ACT OF 2015. The [Macon \(GA\) Telegraph](#) (6/12, 178K) reports that "a bid to turn the Ocmulgee National Monument into Georgia's first national historical park could gain ground next week." The House of Representative's Federal Lands Subcommittee will hold hearing on the Ocmulgee Mounds National Historical Park Boundary Revision Act of 2015 on Tuesday. The legislation "aims to redesignate the national monument, expand the current boundaries to include a total of about 2,800 acres, and administer a special study by the Department of the Interior."

INTERIOR OFFICIALS TO CELEBRATE BROWNS DESIGNATION. The [Mountain Mail](#) (6/14, 17K) reports that "several federal and state officials will celebrate the designation of Browns Canyon National Monument July 18 in downtown Buena Vista." Attendees will include Interior Secretary Sally Jewell and BLM Director Neil Kornze.

GROUP STUDYING POSSIBILITY OF HERNANDO DESOTO HISTORIC TRAIL. The [New Albany \(MS\) Gazette](#) (6/12) reports that "now that the Tanglefoot Trail is fully, and successfully, in use and has been designated a part of the National Recreational Trails system, area history and tourism officials are moving to their next project: more recognition for Hernando DeSoto." According to the article, "a group of stakeholders from Union, Pontotoc and DeSoto counties met at the museum here Wednesday to discuss" the creation of a Hernando DeSoto Historic Trail..

GOV. HICKENLOOPER WOULD "CONSIDER" OFFER OF A CABINET POST. The [Denver Post](#) (6/14, Nussbaum, 894K) reports that Gov. John Hickenlooper said he would consider accepting a cabinet post if offered one after the 2016 presidential election. When asked about serving as secretary of the Interior Department, Hickenlooper said, "I would consider it." He added, "I'd have to evaluate and really be convinced that I could make a dramatic difference for the future of the country and do such a better job than the governor of New Mexico or the governor of — its usually a Western state — the governor of Washington."

Additional coverage was provided by the [Boulder \(CO\) Daily Camera](#) (6/15, 167K) and the [Loveland \(CO\) Reporter-Herald](#) (6/15, 51K).

REP. WILSON UNVEILS CYBERATTACK STANDARDS STUDY ACT. In response to the recent OPM breach, Rep. Joe Wilson (R-SC) introduced the Cyberattack Standards Study Act, which that "asks the federal government to conduct a study on cyberattack standards of measurement," the [Aiken \(SC\) Standard](#) (6/12, Asberry, 42K) reported. Officials revealed that "cyberattackers walked away with personnel data and Social Security numbers for all the federal workers from a central personnel database."

ADDITIONAL COVERAGE: RENOVATED SAGAMORE HILL TO REOPEN. Additional coverage that Sagamore Hill is reopening after renovations was provided by the [New York Times](#) (6/12, Press, Subscription Publication, 12.24M), the [Oneida \(NY\) Dispatch](#) (6/13, 7K), the [Albany \(NY\) Times Union](#) (6/14, 538K), the [Daily Mail \(UK\)](#) (6/14, 5.37M), the [Houston \(TX\) Chronicle](#) (6/12, Eltman, 2.29M), the [Seattle \(WA\) Post-Intelligencer](#) (6/14, 822K), [Yahoo! News](#) (6/12, Eltman, 6.18M), the [Waterbury \(CT\) Republican-American](#) (6/14, 124K), and the [Washington \(DC\) Post](#) (6/12, Frank Eltman |, Ap, 5.03M).

ADDITIONAL COVERAGE OF "EVERY KID IN A PARK" INITIATIVE. Additional coverage of the "Every Kid in a Park" initiative was provided by [WTOP-FM](#) Washington (6/14, 333K).

WPOST LAUDS OBAMA'S PUSH FOR FEDERAL WORKERS COMPENSATION REFORM. In an editorial, the [Washington Post](#) (6/14, 5.03M) offers "Kudos to President Obama for repeatedly tackling the issue" of reforming worker compensation for federal employees "in his budget proposals, including his most recent one, and to Rep. Tim Walberg, chairman of the House subcommittee on workforce protections, for holding a recent hearing on the president's ideas." The Post concludes, "Here's hoping that with both House Republicans and the Obama administration pulling in the right direction, Congress will finally crown reform efforts with success."

DESIGNATION OF AUTAUGA CREEK AS NATIONAL RECREATIONAL TRAIL PRAISED. The [Montgomery \(AL\) Advertiser](#) (6/14, 28K) praises the designation of Autauga Creek as a National Recreational Trail. Interior Secretary Sally Jewell said in a statement, "Our world-class network of national trails provides easily access ble places to get exercise and connect with nature in both urban and rural areas while also boosting tourism and supporting economic opportunities in local communities across the country."

America's Great Outdoors:

National Park Service:

LWCF GRANTS TO PRESERVE CIVIL WAR BATTLEFIELDS. The [AP](#) (6/15, 7K) reports that “Tennessee and Kentucky are among seven states that will receive a portion of \$3.1 million in grants to help preserve Civil War battlefields.” The other states to receive grant money are Mississippi, North Carolina, Pennsylvania, Virginia and West Virginia. The NPS says the Land and Water Conservation Fund grants will “preserve more than 270 acres of battlefields that are threatened with damage or destruction by development.”

SEN. ROBERTS ELECTED CHAIRMAN OF DWIGHT D. EISENHOWER MEMORIAL COMMISSION. The [Topeka \(KS\) Capital-Journal](#) (6/14, 117K) reports that “a long and winding 16-year saga to create a national memorial for Dwight D. Eisenhower, mired in artistic disagreements and political dissension, has fallen into the lap” of Sen. Pat Roberts. Roberts was “elected chairman of the Eisenhower Memorial Commission in late April, following the resignation of then-chairman Rocco Siciliano.” Roberts’ spokeswoman, Sarah Little, said, “After several years of meeting with the approval agencies, the Commission of Fine Arts and the National Capital Planning Commission, the Eisenhower Memorial Commission is planning to submit for final approval from both agencies this summer.”

OVER 200,000 PUBLIC COMMENTS RECEIVED ON PROPOSED DEVELOPMENT PROJECT NEAR GRAND CANYON. The [AP](#) (6/12, 2.29M) reports that “the Kaibab National Forest is sifting through more than 200,000 public comments that are mostly against an easement through the town of Tusayan that would help make a development near the Grand Canyon possible.” Kaibab spokeswoman Jackie Banks says “the scope of a review of environmental impacts will be determined later this month, partially directed by the public comments.”

Additional coverage was provided by the [Arizona Republic](#) (6/12, 1.27M) and [Reuters](#) (6/12, Zuckerman).

CREWS CLEAN ST. LOUIS GATEWAY ARCH. [WCSC-TV](#) Charleston, SC (6/14, 47K) reports that a video released by the NPS “shows the nerve-racking job of cleaning the iconic Gateway Arch in St. Louis.” The article notes that “in addition to cleaning the monument, the crew that scaled it also collected samples of discoloration for a study on the arch’s corrosion.”

Additional coverage was provided by [KEYE-TV Austin \(TX\)](#) Austin, TX (6/14, 4K), [WTVW-TV Evansville \(IN\)](#) Evansville, IN (6/14, 4K), and [WGN-TV Chicago \(IL\)](#) Chicago (6/14, 196K).

MONGOLIAN OFFICIALS LEARN FROM NATIONAL PARKS. The [Bismarck \(ND\) Tribune](#) (6/14, 39K) reports that “to learn what U.S. parks have done to keep natural habitats alive and well, five Mongolian officials visited North Dakota, embarking upon a protected area study tour hosted by the Wildlife Conservation Society.” The article notes that “Theodore Roosevelt National Park was the last stop on the tour, which visited Grand Teton National Park, Yellowstone National Park and Badlands National Park.” According to the article, “the visitors met with park staff and other officials to learn best practices related to protected area management, tourism, community outreach, industry relations and finance strategies.”

SEARCH FOR MISSING CLIMBER ON MOUNT RAINIER SUSPENDED AFTER BODY SPOTTED. The [AP](#) (6/14, 2.29M) reports that “the search for the missing Utah climber on Mount Rainier was called off Saturday afternoon after a helicopter spotted the body of a deceased male climber near the summit.” Mount Rainier National Park spokeswoman Patricia Wold said “the body matches the description of missing climber Kyle Bufis, but the Pierce County Medical Examiner will confirm the person’s identity after climbing rangers retrieve the body.” Additional coverage was provided by the [Seattle \(WA\) Times](#) (6/14, 970K), the [Seattle \(WA\) Times](#) (6/14, 970K), the [Daily Mail \(UK\)](#) (6/14, 5.37M), and the [Salt Lake \(UT\) Tribune](#) (6/14, 470K).

Meanwhile, the [Salt Lake \(UT\) Tribune](#) (6/14, 470K) provides “a map of park service searches and rescues in 2014.” The article also provides “the data in a spreadsheet.” Additional coverage of search and rescue efforts at national parks was provided by the [Salt Lake \(UT\) Tribune](#) (6/15, 470K).

CHANGES MAKE ANGELS LANDING TRAIL SAFER. The [Salt Lake \(UT\) Tribune](#) (6/14, 470K) reports that once considered “one of the deadliest trails in the world,” Angels Landing has “gone five years without a death.” The article notes that “safety began to improve in 2011. That spring, the National Park Service erected a sign near the trailhead warning Angels Landing hikers — or would-be hikers — that six people have died from falls on the trail since 2004.” The NPS also “installed more chains, which hikers can grip like a stairway railing as they walk.” The agency also “carved more steps in the rock.”

OLDEST ACTIVE PARK RANGER RELATES STORIES FROM PERSONAL EXPERIENCE. The [Washington Post](#) (6/12, 5.03M) profiles Betty Soskin, 93, a park ranger at the Rosie the Riveter WWII Home Front National Historical Park. The article notes that Soskin is “the oldest, full-time park ranger in the National Park Service.” Soskin is “able to relate personal tales of racial segregation in the Jim Crow era, as a ‘primary source,’ she said.”

COLLEGE STUDENTS TO PROVIDE INPUT ON FUTURE OF BADLANDS NATIONAL PARK. The [Rapid City \(SD\) Journal](#) (6/14, 108K) reports that “a group of college students from Texas will play a big role in mapping the future of Badlands National Park, with an eye toward attracting more young people to the sprawling park near Wall.” According to the article, “the students, along with park experts, will have a say in the way future visitors to the Badlands interact with rangers and scientists; how patrons trek the 244,000-acre preserve’s back country; and how people learn about the vast inland sea that once supported plesiosaurs and other exotic species.” The NPS “recently partnered with the University of Texas at Austin School of Architecture and the Lady Bird Johnson Wildflower Center to create a plan for the future of the Badlands’ Cedar Pass area in western South Dakota.”

DRAFT PLAN FOR FIRE ISLAND NATIONAL SEASHORE RELEASED. [Newsday \(NY\)](#) (6/14, 1.46M) reports that the NPS is “proposing to protect and manage Fire Island by partnering more with state and local stakeholders, instead of issuing top-down directives.” According to officials, “the draft management plan for the Fire Island National Seashore, released last week, looks ahead 20 years and is the first overhaul of federal policies since 1977.” The report says that “through greater collaboration, the ways people enjoy Fire Island will be balanced with the need to protect wildlife and other natural resources.”

YELLOWSTONE CONSIDERS MONITORING UNGUIDED SNOWMOBILE USERS. The [AP](#) (6/14, 2.29M) reports that NPS officials are “proposing to track whether unguided groups of snowmobilers are doing more harm to the landscape than commercially led snowmachines in Yellowstone National Park.” The proposal is “included in a draft winter-use adaptive management plan for Yellowstone.” According to the article, “if adopted, law enforcement personnel would begin keeping data on violations such as disturbing wildlife and driving under the influence that distinguish between snowmobilers out on their own and those who are being commercially guided.”

POINT REYES NATIONAL SEASHORE FACES CHALLENGES IN TULE ELK MANAGEMENT. The [San Jose \(CA\) Mercury News](#) (6/14, Journal, 762K) reports that “once thought extinct, tule elk have returned in force in Marin and now have become the source of concern as well as controversy as herds in West Marin are managed against the backdrop of drought, working farms and tourism.” Earlier this year, Point Reyes National Seashore officials “revealed that more than 250 tule elk died inside the fenced area over a two-year period, in part because pools that the herds rely on for water had gone dry.” Meanwhile, “ranchers are complaining about the free-range elk getting on their land and eating grass and drinking water intended for their dairy cattle and other agricultural operations.”

MAN CLAIMS SELF-DEFENSE AFTER SHOOTING ELK IN ROCKY MOUNTAIN NATIONAL PARK. The [AP](#) (6/14, 2.29M) reports that “a Colorado State University student says he killed an elk inside Rocky Mountain National Park in an act of self-defense.” Park spokesman Kyle Patterson “confirmed that Raphael Bresselsmith is under investigation for illegally shooting the cow elk on June 3 but could not provide more details.” Bresselsmith said in a statement that the elk “charged at him twice.”

BLACK BEAR EUTHANIZED IN GRAND TETON NATIONAL PARK. The [AP](#) (6/12, 2.29M) reports that “wildlife officials have euthanized a 3-year-old female black bear they say became too habituated to visitors in Grand Teton National Park.” The animal was “put down Thursday after it climbed into the open trunk of a vehicle at Jenny Lake Lodge, ate some food and then tried to get into the main part of the car.” According to the article, “witnesses say the 125-pound bear visited some nearby cabins before she ripped into items left in a housekeeping cart and stole a purse, which she carried off into the woods.”

MONTANA CONSIDERS RELEASING WILD BISON OUTSIDE YELLOWSTONE. [Reuters](#) (6/13) reports that Montana wildlife managers are seeking public input on a proposals regarding the management of wild bison. The proposals span taking no steps to restore bison to the landscape to reintroducing them on private or public acreage.

BADLANDS, JEWEL CAVE NATIONAL PARKS SEE LEADERSHIP CHANGES. The [Rapid City \(SD\) Journal](#) (6/14, 108K) reports that “Friday brought leadership changes to two area National Park Service sites, Badlands National Park and Jewel Cave National Park.” Eric Brunnemann, who “completed his last day as superintendent at Badlands National Park,” will “transfer to become superintendent of Guadalupe Mountains National Park in Texas and New Mexico.” The interim superintendent at Badlands National Park will be Larry Johnson, who is the outgoing superintendent at Jewel Cave National Monument. Johnson will “eventually transfer to become superintendent at Ozark National Scenic Riverways in Missouri.”

BADLANDS BUTTE COLLAPSES, INJURING FIVE. The [Pierre \(SD\) Capital Journal](#) (6/14, 620) reports that “five people were injured in Badlands National Park when a butte collapsed Saturday, the National Park Service announced Sunday in a news release.”

Additional coverage was provided by the [AP](#) (6/15, 2.29M).

MAN APPARENTLY DROWNS AT LAKE MEAD. The [AP](#) (6/15) reports that the NPS says “a swimmer apparently drowned at Lake Mead.” According to the article, “rangers say they received a call early Sunday afternoon about a man who appeared to be drowning near Boulder Beach in the Lake Mead National Recreation Area.”

HEALTH CONCERNS ENDED PUBLIC’S ACCESS TO STAIRS AT THE WASHINGTON MONUMENT. In his column for the [Washington Post](#) (6/14, Kelly, 5.03M), John Kelly explains that “it was concerns over health that ended routine access” to the Washington Monument’s stairs. According to Kelly, “a worrying number of people were experiencing heart attacks during the climb or injuring themselves in falls during the descent.”

COOPERATION URGED IN TELLING RECONSTRUCTION’S STORY. In an editorial, the [Hilton Head Island \(SC\) Packet](#) (6/14, 84K) notes that the NPS “recently commissioned the first comprehensive review of nationally significant historical sites of the Reconstruction era.” The paper advises that cooperation will be necessary “to understanding Reconstruction.” It argues that “the story must be told and that the triumphs and failings of mankind throughout the period must be accepted as fact.”

Additional coverage was provided by the [Florence \(SC\) Morning News](#) (6/15, 90K) and the [Florence \(SC\) Morning News](#) (6/15, 90K).

CONGRESS URGED TO EMBRACE NEW CLEAN WATER RULE. For the “Congress” blog of [The Hill](#) (6/14, Finnerty, 533K), Maureen Finnerty, chair of the Coalition to Protect America’s National Parks – Voices of Experience, writes that “a new rule to re-extend protections of the Clean Water Act to the headwater streams and wetlands that provide drinking water for one in every three Americans” is “great news for our national parks.” She notes that “already, more than half of our 407 national parks have waterways deemed “impaired” under the Clean Water Act and in need of attention.” Finnerty urges Congress to “join national park visitors and tourism-dependent businesses and communities in celebrating what this new rule means for our heritage – not seeking to undermine or delay the rule.”

Bureau of Land Management:

NEVADA RANCHER BUNDY DENIES FIRING GUNSHOTS NEAR RESEARCHERS. The [AP](#) (6/14, Griffith, 2.29M) reports that “Nevada rancher and states’ rights advocate Cliven Bundy said Saturday that contract researchers for the federal Bureau of Land Management had no business being on rangeland where he grazes cattle, but he denied he or his supporters fired gunshots near them.” BLM officials have “declined comment beyond a statement saying the shooting prompted them to take unspecified safety

precautions in the area to protect is employees and contractors.” Bundy said “he and his son, Ryan, were checking a water source when they met the three employees on a remote dirt road June 5, but he did not learn about the shooting and that they were researchers until reading a newspaper story nearly a week later.” However, Bundy said “he became upset after learning the researchers were monitoring water seeps and springs in the area.”

Additional coverage was provided by the [New Jersey Herald](#) (6/14, 39K), the [Reno \(NV\) Gazette-Journal](#) (6/13, 178K), the [Daily Mail \(UK\)](#) (6/14, 5.37M), [KFMB-TV San Diego \(CA\)](#) San Diego (6/14, 58K), the [Washington \(DC\) Post](#) (6/14, Martin Griffith |, Ap, 5.03M), the [Las Vegas \(NV\) Sun](#) (6/13, 176K), [WJLA-TV Washington \(DC\)](#) Washington (6/14, 36K), [Fox News](#) (6/13, 9.4M), the [Orange County \(CA\) Register](#) (6/14, 631K), the [Deseret \(UT\) News](#) (6/14, 538K), [KTVN-TV Reno \(NV\)](#) Reno, NV (6/14, 1K), [Newsmax](#) (6/13, 584K), [Yahoo! News](#) (6/14, Griffith, 6.18M), [KNXV-TV Phoenix \(AZ\)](#) Phoenix (6/14, 139K), the [Spokane \(WA\) Spokesman-Review](#) (6/13, 172K), the [Minneapolis \(MN\) Star Tribune](#) (6/12, Griffith, 1.29M), the [Daily Mail \(UK\)](#) (6/14, 5.37M), the [Washington \(DC\) Post](#) (6/12, Martin Griffith |, Ap, 5.03M), [Yahoo! News](#) (6/12, Griffith, 6.18M), [KOLQ-TV Reno \(NV\)](#) Reno, NV (6/14, 3K), the [Houston \(TX\) Chronicle](#) (6/12, Griffith, 2.29M), the [Provo \(UT\) Daily Herald](#) (6/14, 130K), [KOLD-TV Tucson \(AZ\)](#) Tucson, AZ (6/14, 20K), and the [Elko \(NV\) Daily Free Press](#) (6/14, 22K).

COURT OVERTURNS RULING ORDERING BLM TO LOG MORE IN OREGON. The [AP](#) (6/12, Barnard, 2.29M) reports that “a federal appeals court on Friday overturned a 2013 ruling that ordered the U.S. Bureau of Land Management to sell more timber in southern Oregon.” The U.S. Court of Appeals for the District of Columbia Circuit also “overturned a ruling in the same case that had annulled a system federal scientists used to estimate the harm to northern spotted owls, a threatened species, from logging projects.” The appeals court held that “timber companies and organizations demanding more timber under a 1937 law known as the O&C Act had no standing to sue because they failed to show evidence they suffered harm from reduced logging levels.”

Additional coverage was provided by the [Oregonian](#) (6/14, 1M), the [Bend \(OR\) Bulletin](#) (6/14, 94K), [Fox Business](#) (6/12, 387K), and the [Eugene \(OR\) Register-Guard](#) (6/14, 172K).

WILD HORSE ADVOCATES DIVIDED ON BLM’S PLAN TO DART HORSES IN ATTEMPT TO CONTROL FERTILITY. The [Salt Lake \(UT\) Tribune](#) (6/14, 470K) reports that federal land managers are planning “to shoot a ‘fertility vaccine’ into the haunches of wild horses in Tooele County’s Onaqui herd.” The BLM “pitches the mass vaccinations, to be administered annually for the next five years, as a humane alternative to the controversial and costly roundups demanded by the state’s ranchers and rural county commissioners angry about the proliferation of wild horses across public rangelands.” However, wild-horse advocates are “split by the BLM’s new methodology for controlling wild horse populations in the West.”

GOV. HICKENLOOPER WEIGHS IN ON BLM’S TRAVEL MANAGEMENT PLAN. The [Grand Junction \(CO\) Daily Sentinel](#) (6/14, 73K) reports that Colorado Gov. John Hickenlooper on Friday asked that the BLM “set back a final decision on the proposed travel-management plan for lands in Mesa and surrounding counties.” Mesa County Commissioner Rose Pugliese “complained this week that Hickenlooper failed to support the county in its request for the delay during the governor’s consistency review, a forum that officials said was inappropriate for such a request.” Meanwhile, BLM officials are “planning to meet with county officials next week, spokesman Christopher Joyner said.”

Fish and Wildlife Service:

FWS DESIGNATES ALL CHIMPANZEES AS “ENDANGERED.” On Friday, the United States Fish and Wildlife Service designated all chimpanzees “as endangered under the Endangered Species Act,” the [New York Times](#) (6/13, Fleur, Subscription Publication, 12.24M) reports. The ruling “follows a petition filed in 2010” by advocates “to eliminate a longstanding distinction between the legal status of captive chimpanzees, which were previously listed as ‘threatened,’ and their wild counterparts, which have been deemed ‘endangered’ for decades.” As a result of the new designation, “biomedical research, interstate trade, and export and import of captive chimpanzees will now require permits issued by the Fish and Wildlife Service.” FWS Director Dan Ashe, said, “At the time we thought it was important to encourage breeding of captive chimps to expand their numbers. But we expanded a culture of treating these animals as a commodity for research, sale, import and export, and entertainment. That has undermined the conservation of chimpanzees in the wild.”

The [Washington Post](#) (6/13, Fears, 5.03M) reports that the ruling “hits medical research in the United States the hardest” as it is “the only developed nation that continues to use apes for research, at the insistence of the NIH.” [McClatchy](#) (6/13, Adams, 32K) reports that the rule “will be published next week” and will take “effective in September.”

Additional coverage was provided by [The Hill](#) (6/14, Devaney, 533K), the [Daily Mail \(UK\)](#) (6/14, 5.37M), the [International Business Times](#) (6/14, 774K), [NBC News](#) (6/14, 2.54M), the [Seattle \(WA\) Times](#) (6/14, 970K), [TIME](#) (6/14, 19.57M), the [Economic Times \(IND\)](#) (6/14, 1.92M), the [Everett \(WA\) Herald](#) (6/13, 124K), the [Sydney \(AUS\) Morning Herald](#) (6/13, 180K), and the [Tampa Bay \(FL\) Times](#) (6/14, 912K).

FWS PROPOSE OPENING FOUR WILDLIFE REFUGES FOR SPORT FISHING IN NORTH DAKOTA. The [AP](#) (6/14, 2.29M) reports that the FWS is “proposing opening four wildlife refuges for sport fishing in the Devils Lake area.” The proposed rule would allow sport fishing for the first time at the Ardoch National Wildlife Refuge, the Lake Alice National Wildlife Refuge, the Rose Lake National Wildlife Refuge and the Silver Lake National Wildlife Refuge. The agency will be “accepting public comments on the proposed rule through July 13.”

STUDY FINDS THREAT OF SAGE GROUSE LISTING MAY HAVE INCREASED HUNTING IN UTAH. The [Greenwire](#) (6/12, Subscription Publication) reports that “the threat of an Endangered Species Act listing may have slightly boosted the rate of Utah sportsmen and women hunting sage grouse, researchers found.” According to the article, “a newly published study by scientists at Utah State University found the participation rate in Utah’s annual sage grouse hunt increased by about 5 percent in 2010 after the Fish and Wildlife Service decided ESA protections were ‘warranted’ for the bird.” The study also “found that the percentage of hunters who said a potential federal listing was a primary motivational factor in hunting sage grouse increased from 10 percent in 2009 to 17

percent in 2010.”

INTERAGENCY GRIZZLY BEAR COMMITTEE CONSIDERS STRIPPING PROTECTIONS FROM SOME MONTANA

GRIZZLIES. [Reuters](#) (6/12, Zuckerman) reports that the Interagency Grizzly Bear Committee believes that the grizzly bears in and along the northern Continental Divide in Montana have recovered sufficiently that they may no longer require federal protections. Government bear managers may recommend removing the animals from the federal list of endangered and threatened species at a Montana meeting of the Interagency Grizzly Bear Committee on Tuesday, according to committee spokesman Gregg Losinski.

PUBLIC COMMENTS BEING WEIGHED IN PROPOSAL TO RETURN GRIZZLIES TO CASCADES. The [Seattle Times](#) (6/15, 970K) reports on the comments received on reintroducing grizzly bears into the Cascades. According to the article, “a final decision is expected in late 2017, and it could recommend anything from leaving things as is, hoping that grizzlies return on their own, to bringing in new populations.”

INVASIVE CARIBOU KILLED ON KAGALASKA ISLAND. The [Bristol Bay \(AK\) Times](#) (6/14, 4K) reports that “the meat wasn’t wasted when federal hunters killed nine caribou on Kagalaska Island last month, and donated more than half a ton of hindquarters, back straps, and other choice cuts of wild game to Adak residents, according to Steve Delehanty, refuge manager of the Alaska Maritime National Wildlife Refuge.” Delehanty said “it cost \$71,000 to remove the invasive all-male caribou population from the nearby island.” Delehanty said “1,208 pounds of caribou meat were backpacked out of Kagalaska and brought to Adak, by four U.S. Fish and Wildlife Service employees, and one volunteer local resident during the two-day project in late May.”

BABY BATS HALT I-65 PROJECT. The [AP](#) (6/14, 2.29M) reports that “baby bats have brought one element of the ongoing widening of Interstate 65 to a halt.” According to the article, “the presence of northern long-eared bat pups means workers widening I-65 between Bowling Green and Elizabethtown won’t be able to clear trees from the right of way for the project until August.”

BIOLOGISTS VIEW MUD AS SOLUTION TO CONSERVATION ISSUES IN ARKANSAS. The [AP](#) (6/14, Bowden, 2.29M) reports that “farmers have struggled in recent weeks against the elements, trying to find time to plant and treat crops amid standing water and mud.” But Micheal Budd, a land biologist for the FWS, said “mud could be the solution to many deep-seated conservation issues facing northeast Arkansas during the harvest season.” Budd, “the organizer of the MUD Drive, an event that aims to convince farmers to voluntarily stop draining fields after harvest,” said, “There could be better conditions to talk about this in, but this could save a lot of fields and wildlife habitats.”

WISCONSIN’S WOLF POPULATION INCREASES. The [AP](#) (6/14, 484K) reports that “a Wisconsin wildlife official says the state’s gray wolf population has gone up by about 13 percent in the past year.” David MacFarland with the Department of Natural Resources said that “a preliminary estimate says there are 746 gray wolves in the state.” The article notes that “it’s the first increase in the estimated population since hunting and trapping of gray wolves was legalized in 2012.”

Additional coverage was provided by the [Milwaukee Journal Sentinel](#) (6/14, Smith, 784K).

THURSTON COUNTY SETS UP SCREENING PROCESS TO PROTECT GOPHERS. The [AP](#) (6/14, 2.29M) reports that “Thurston County officials have set up a screening process for developers in unincorporated areas designed to protect pocket gophers.” According to the article, “the new reviews will consider the impact developments have on Mazama pocket gophers and other species.” The FWS “listed for subspecies of the gophers as threatened under the Endangered Species Act.”

US Geological Survey:

GEOLOGISTS INVESTIGATING EARTHQUAKE SWARMS IN ALABAMA. The [Christian Science Monitor](#) (6/13, 539K) reports that “more than a dozen weak earthquakes” have struck Alabama in the last seven months, and “geologists are trying to figure out what is causing the seismic swarm in an area of the South more prone to tornadoes than earthquakes.” The article notes that “one potential source that regulators are discounting is hydraulic fracturing or ‘fracking,’ a process for extracting underground oil or natural gas that has been blamed for earthquake swarms elsewhere, including Oklahoma.”

Securing America’s Energy Future:

Onshore Energy Development:

FLOODS EXPOSE DANGERS FROM OIL, GAS ACTIVITIES IN REFUGES. The [Environment & Energy Publishing](#) (6/14, 705) reports recent floods have exposed “the danger that oil and gas activities pose to habitat and wildlife” in national refuges. The article notes that “as far back as 1984, the General Accounting Office found that over 90 percent of FWS managers with oil and gas exploration or production in their refuges considered such activities a threat to natural resources,” and “five years later, GAO, which now stands for the Government Accountability Office, concluded that fossil fuel production was ‘incompatible’ with the refuge system’s mission and recommended “bold action” to address the conflict.” However, “there are still 5,002 oil and gas wells on 107 of the National Wildlife Refuge System’s 563 units, according to a study from FWS researchers published April 27 in PLOS ONE, a peer-reviewed open access scientific journal.”

WYOMING OFFICIAL CRITICIZES BLM VARIANCE. The [Oil and Gas Journal](#) (6/14, 1K) reports that Wyoming State Oil and Gas Supervisor Mark Watson said the BLM would “benefit rather than the states from a variance stipulation within BLM’s final hydraulic fracturing rule.” Watson said, “A better solution would be a mechanism to allow states to apply for primacy if they could demonstrate that the objectives of the BLM frac rule could be met by the states’ rules and regulations.” Watson said “a primacy arrangement would provide certainty and uniformity in enforcing a fracturing rule.”

OSAGE OIL, GAS OPERATORS RAISE CONCERNS OVER NEW RULES. The [Bartlesville \(OK\) Examiner-Enterprise](#) (6/14, 602)

reports that "doing business in Osage County oilfields has been increasingly difficult since the U.S. government settled a class-action lawsuit over its historic mismanagement of oil-and-gas leases on the former Osage Indian Reservation." Revisions to the Code of Federal Regulations for the Osage County leases were outlined in a document published in the May 11 Federal Register. According to Rob Lyon, president of the O

DOI in the News:

DATA BREACH MAY HAVE COMPROMISED ALL FEDERAL EMPLOYEES. A new development in the OPM breach story comes from American Federation of Government Employees president J. David Cox, who wrote to OPM saying that the breach may have

compromised the information of all current Federal employees as well as former employees and Federal retirees. The possibility of the breach affecting government contractors and family members and acquaintances of Federal employees is also discussed. The upper bound for estimates of those affected is 14 million; the coverage noted that this figure is far higher than the 4 million initially reported by the Administration. While most major print outlets devoted coverage to this story, it was mentioned only in passing in one evening news broadcast.

[NBC Nightly News](#) (6/11, story 6, 0:25, Holt, 7.86M) reported that US officials acknowledge “the massive hack into government personnel records is more serious than we were originally told.” Data stolen included “diplomats and workers with security clearances who deal with nuclear and trade secrets.” Congress was told that “China’s government appears to be behind it.”

[USA Today](#) (6/12, Kelly, 5.01M) reports that a cyber attack on the Office of Personnel Management “compromised the Social Security numbers of every federal employee,” according to J. David Cox, president of the American Federation of Government Employees.

The [AP](#) (6/12, Dilanian) reports that Sen. Harry Reid accused “the Chinese” of being responsible for the attack, that, according to Cox’s letter to OPM, compromised “all personnel data for every federal employee, every federal retiree, and up to one million former federal employees.” That data, said Cox, includes “military records and veterans’ status information, address, birth date, job and pay history, health insurance, life insurance, and pension information; and age, gender and race data.” He also said that the union believes that “Social Security numbers were not encrypted,” which he called “a cybersecurity failure that is absolutely indefensible and outrageous.” The union “said it is basing its assessment on ‘sketchy information provided by OPM,’ which in turn “has sought to downplay the damage.”

The [Washington Post](#) (6/12, Rein, 5.03M) “Federal Eye” blog says the AFGE “points to a database called the Central Personnel Data File as the hackers’ target;” the Post notes that years ago, it “became part of a database called Enterprise Human Resources Integration,” managed by an Interior Department business center and which “likely contains the personnel files that were accessed.” The Post also notes that “it remains unclear whether in fact the hackers actually stole what they had gained access to, for instance by downloading records of employees’ financial information.”

The [Wall Street Journal](#) (6/12, Paletta, Subscription Publication, 5.68M) cites OPM saying it would cover 18 months of credit monitoring for all those affected; Cox is quoted saying in his letter that OPM “owes employees free lifetime credit monitoring and liability insurance that covers the entirety of any loss attributable to the breach.”

[AFP](#) (6/12) quotes White House spokesman Josh Earnest saying, “The precise scope of this particular intrusion is one that continues to be under investigation by the FBI and other technical experts...We have already begun the process of contacting those that we, thus far, believe could potentially have been affected.”

The [Washington Post](#) (6/12, Rein, 5.03M) “Federal Eye” blog reports that Winvale Group was hired last Friday “to start notifying victims of the intrusion;” call center staff in three states “are already answering questions from anxious callers.” Winvale spokesman Patrick Hillmann is quoted saying, “The current call volumes we’re experiencing are expected for a cybersecurity incident of this proportion.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (6/12, Howell, 641K), the [Houston \(TX\) Chronicle](#) (6/12, Kurtenbach), and the [Federal Times](#) (6/11, 118K).

SECRETARY JEWELL TO ATTEND SAGAMORE HILL REOPENING. The [AP](#) (6/12, Eltman) reports that “Sagamore Hill, the ‘Summer White House,’ during Theodore Roosevelt’s presidency, is set to reopen.” According to the article, “the 28-room mansion in Oyster Bay has undergone an extensive four-year, \$10 million renovation by the National Park Service.” Interior Secretary Sally Jewell is among the dignitaries expected to attend the official reopening scheduled for July 12.

Additional coverage was provided by [ABC News](#) (6/12, 3.69M), [Yahoo! News](#) (6/12, Eltman, 6.18M), and [KSRO-AM Santa Rosa \(CA\)](#) Santa Rosa, CA (6/12).

IDAHO SPORTSMEN SEND SMOKED SALMON TO WHITE HOUSE, INTERIOR. [Politico Pro](#) (6/11) reports that “a group of Idaho sportsmen sent smoked salmon to the White House, Department of Agriculture and Department of Interior, hoping to encourage the agencies to provide permanent protection for the Boulder-White Clouds region through the establishment of a national monument.” The group says that “while salmon swim nearly 1,000 miles upstream to central Idaho’s Boulder-White Clouds in under two months, after more than a decade, Congress has still been unable to provide permanent protections for the area.”

The [Idaho Statesman](#) (6/11, 199K) reports that The House Natural Resources subcommittee on Federal Lands will conduct a hearing Tuesday on Rep. Mike Simpson’s bill to protect wilderness in the Boulder-White Clouds.

PROPOSED GRAND CANYON WATERSHED NATIONAL MONUMENT FACES OPPOSITION. The [Kingman \(AZ\) Daily Miner](#) (6/12, 26K) reports that “Mohave County elected officials and congressional representatives of Arizona are pushing back against the Sierra Club and other environmentalists who want to take down 1.7 million acres of federal land for the Grand Canyon Watershed National Monument.” According to the article, “they’re opposed to forming the proposed national monument by presidential executive order, rather than by congressional action.” But “proponents of the watershed say it remains at risk from threats such as toxic uranium mining and the logging of old-growth forest.”

REPUBLICAN LAWMAKERS, OUTDOOR INDUSTRY DECRY MINIMUM WAGE INCREASE. The [E&E Daily](#) (6/11, Subscription Publication) reports that “House Republicans and outdoor recreation industry leaders attacked President Obama’s move to increase the minimum wage for companies operating on federal land during a hearing yesterday, saying it would cause economic harm.” Oversight and Government Reform Subcommittee on Interior Chairwoman Cynthia Lummis said, “What we have here is something that unfortunately we see time and again, especially in the West – the federal government in Washington forcing a one-size-fits-all

directive on the people.” Last year, Obama issued Executive Order 13658, “which imposed a \$10.10 minimum wage on all federal contractors.”

Additional coverage was provided by the [High Country \(CO\) News](#) (6/12, 74K).

ADDITIONAL COVERAGE OF POLICY RIDERS IN INTERIOR-EPA BILL. Additional coverage of the policy riders in the spending bill to fund the Interior Department and the Environmental Protection Agency was provided by the [Natural Gas Intelligence](#) (6/12, Subscription Publication).

ADDITIONAL COVERAGE OF NEW NATIONAL RECREATIONAL TRAILS. Additional coverage of the new national recreation trails was provided by the [Chickasaw Journal](#) (6/11, 5K) and the [Chickasaw Journal](#) (6/11, 5K).

CONGRESS URGED TO ACT ON WILDFIRE THREAT. In an editorial, the [A bany \(OR\) Democrat-Herald](#) (6/12, 42K) urges Congress “to act to implement a fairly simple fix: Pending legislation would allow the agencies to classify the very largest wildfires as natural disasters, and would allow the agencies to pay for those fires out of federal disaster funds instead of their firefighting budgets.” The editorial doesn’t “understand why this bipartisan proposal has failed to get much traction in Congress.” It concludes that “maybe the fact that our forests again are ablaze (and will be for months to come) finally will light a fire under lawmakers.”

Additional coverage of the concerns raised by federal officials about the upcoming wildfire season was provided by the [Southwest Farm Press](#) (6/12, 86K), the [High Plains and Midwest AG \(KS\) Journal](#) (6/12), the [Idaho Business Review](#) (6/11, 35K), the [Eugene \(OR\) Register-Guard](#) (6/12, 172K), [Inside Tucson Business \(AZ\)](#) (6/12, 12K), the [Mattoon \(IL\) Journal Gazette & Times Courier](#) (6/12, 36K), the [Newton County \(AR\) Times](#) (6/12, 7K), and the [Durango \(CO\) Herald](#) (6/9, 28K).

OP-ED: SCULPTURE “CITY” SHOULD BE A NATIONAL MONUMENT. In an op-ed for the [San Francisco Chronicle](#) (6/12, Subscription Publication, 2.92M), Jon Christensen writes that “artist Michael Heizer’s monumental sculpture ‘City’ — a landscape of modern and ancient forms the size of the National Mall in Washington, D.C. — sits in a vast empty valley in the middle of the Nevada desert and at the center of a visionary proposal to establish a new national monument.”

America’s Great Outdoors:

National Park Service:

NPS QUESTIONED ON REVIEW OF JAMES K. POLK HOME. The [E&E Daily](#) (6/11, Subscription Publication) reports that “in an unorthodox but tactically clever move, Sen. Bill Cassidy (R-La.) yesterday in his first hearing as chairman of the Energy and Natural Resources Subcommittee on National Parks allowed all of the lawmakers in the room to question the National Park Service witness before he did.” During the hearing, Sen. Lamar Alexander pressed Victor Knox, the associate director of park planning, facilities and lands at NPS, “to quickly complete a review of the James K. Polk Home for inclusion in the National Park System, as called for in his bill S. 1483.”

NPS AWARDS PROVIDES CIVIL WAR BATTLEFIELD GRANTS. The [AP](#) (6/12, 641K) reports that “Tennessee and Kentucky are among seven states that will receive a portion of \$3.1 million in grants to help preserve Civil War battlefields.” The NPS says “the Land and Water Conservation Fund grants will preserve more than 270 acres of battlefields that are threatened with damage or destruction by development.” According to the article, “in Tennessee, the Franklin II Battlefield in Franklin will receive \$1.4 million, and the Chattanooga Battlefield will get \$258,250.” Also, Kentucky battlefields include the Mill Springs Battlefield in Pulaski County, which “will receive \$85,919, Perryville Battlefield in Boyle County gets \$77,510 and Richmond Battlefields in Madison County \$35,340.”

The [AP](#) (6/12, 28K) reports that the NPS is “providing \$389,000 to preserve Civil War battlefield sites in Mississippi.” The funds are “part of \$3.1 million being awarded nationwide.” The grants are administered by the Park Service’s American Battlefield Protection Program. Additional coverage was provided by [WDBD-TV](#) Jackson, MS (6/12, 105K).

SENATORS WANTS NPS CONTRACT PROCESS REFORM. [WCSH-TV](#) Portland, ME (6/11, 30K) reports that Sens. Angus King and Susan Collins are “continuing to fight the National Park Service over the way it awards contracts to companies providing concession services inside national parks.” The article notes that “the issue became heated last year when the park service selected a New Mexico based corporation over a Maine company to operate the Acadia National Park concessions, including three gift shops and the restaurant at Jordan Pond House.” King “believes the bidding process is flawed because they didn’t factor in the \$3 million impact to the local economy.”

DC TO LAUNCH NEW CIRCULATOR BUS ROUTE ON NATIONAL MALL. The [AP](#) (6/12, Press, 5.03M) reports that “District of Columbia officials are launching a new Circulator bus route with stops at tourist sites along the National Mall.” Mayor Muriel Bowser plans to join NPS officials to announce the service Friday.

Additional coverage was provided by the [Washington \(DC\) Post](#) (6/12, Dingfelder, 5.03M), the [Washington \(DC\) Times](#) (6/12, 641K), [Greater Greater Washington \(DC\)](#) (6/12), the [Washington \(DC\) City Paper](#) (6/11, 592K), and [WRC-TV Washington \(DC\)](#) Washington (6/12, 433K).

SEWALL-BELMONT HOUSE & MUSEUM CLOSER TOWARD NATIONAL PARK STATUS. [Hill Now \(DC\)](#) (6/11) reports that “a historic home on Capitol Hill is one step closer to becoming part of the national park system.” The Sewall-Belmont House & Museum at 144 Constitution Ave. NE has “received word from the National Park Service that the site’s inclusion in the system is ‘suitable and feasible.’”

GLACIER PARK WELCOMES 100 MILLIONTH VISITOR. The [Flathead \(MT\) Beacon](#) (6/11, 15K) reports that Becky Janssen is the

100 millionth visitor to Glacier National Park. The article notes that “among the items the park gave Janssen is a license plate commemorating the event.”

Additional coverage was provided by the [Missoulian \(MT\)](#) (6/12, 118K) and [KECI-TV](#) Missoula, MT (6/12, 2K).

HAWAII VOLCANOES NATIONAL PARK RECOGNIZED WITH EPA GREEN CHALLENGE AWARD. [KHON-TV](#) Honolulu (6/11, 37K) reports that Hawaii Volcanoes National Park has been honored with the EPA’s Federal Green Challenge Regional Overall Achievement award “for reducing its environmental footprint through sustainable practices in six target areas: energy, water, waste, electronics, purchasing and transportation.” Jared Blumenfeld, EPA’s regional administrator for the Pacific Southwest, said, “We applaud National Park Service staff for leading the way towards zero waste, and educating the millions of visitors to Hawaii Volcanoes National Park. This unique landscape deserves protection, and that starts with the commitment by the federal employees who work there.” Park superintendent Cindy Orlando said, “We are extremely honored to receive this level of recognition for our climate-friendly efforts. Our staff is dedicated to implementing environmentally responsible practices, and we encourage our visitors and park partners to do the same.”

Additional coverage was provided by [Hawaii 24/7](#) (6/11).

NPS ORGANIZING RECYCLING PROGRAM. The [Lovell \(WY\) Chronicle](#) (6/12) reports that “residents of Lovell will soon be asked if they want to help support a community recycling program financially.” According to the article, “members of the Rose City Recycling committee attended a work meeting of the Lovell Town Council Tuesday, June 2, and presented three proposals for advancing the recycling program currently being organized by the National Park Service and staffed with local volunteers.” The NPS has been “organizing and paying for most of the cost of the recycling program for some six or seven years now, even purchasing the trailers that are parked at the Red Apple parking lot,” and “the Park Service budget will not allow the agency to carry the burden after December 31 of this year.”

ANGLERS OPPOSE DECISION TO CLOSE PUBLIC WATER IN BISCAYNE NATIONAL PARK. The [Augusta \(GA\) Chronicle](#) (6/12, 184K) reports that the NPS has “announced plans to close nearly 10,000 acres of public water in Biscayne National Park off southern Florida.” The article notes that “public hearings on the plan resulted in mostly negative comments from recreational anglers and local communities whose economies would be affected.”

NTSB REVEALS DETAILS ON PLANE PROP THAT KILLED ALASKA PILOT. [KTUU-TV](#) Anchorage, AK (6/12, Klint, 78K) reports that according to a preliminary NTSB report, the Piper PA-18 Super Cub which propeller “struck and killed its pilot in Wrangell-St. Elias National Park and Preserve last week” had been left on, along with three others, “to stave off swarms of mosquitoes while loading the airplanes,” according to the NTSB. Another airplane had begun to slowly move forward toward the PA-18, prompting the pilot to “go around the front of his airplane towards the left wing to prevent the two airplanes from making contact,” NTSB officials wrote. “Subsequently, (he) ran into the back of the spinning propeller, and was struck three times,” according to investigators.

[Alaska Dispatch News](#) (6/11, Edge, 216K) reports that the NTSB report said, “The engines of all four airplanes were started and allowed to operate at idle, with the cockpits unattended.”

BROAD CHANNEL OFFICIALS LAMENT LACK OF NOTICE OF WEST PARKING LOT PROJECT. The [Queens \(NY\) Chronicle](#) (6/12, 101K) reports that two weeks ago, the FHWA began work to renovate the west parking lot at the Broad Channel side of the Joseph P. Addabbo Memorial Bridge. The article notes that while officials in the New York City neighborhood of Broad Channel praised the work on the parking lot, they “lamented the lack of prior notice given to them by” the National Park Service, which manages the land. According to the report, an FHWA spokesman said in an email that the project “consists of ‘grading, asphalt pavement removal, hot asphalt concrete pavement, concrete curb and sidewalks, cellular confinement systems, drainage improvements, riprap and other miscellaneous work.’” The FHWA spokesman said that the project is slated to be completed by next October.

ST. CROIX COMMUNITY BIDS NPS ARCHAEOLOGISTS FAREWELL. The [Virgin Islands Daily News](#) (6/12, 333) reports that “more than 70 teachers, students, historians, conservationists, community organizers, college professors, small business owners and non-profit groups bid farewell and ‘Thank You’ on Wednesday to a pair of National Park Service archaeologists who – everyone attested – have changed the face of the park service on St. Croix.” According to the article, “David Goldstein, chief of interpretation and education at the National Park Service sites on St. Croix, and Joshua Torres, National Park Service Cultural Resource Program Manager, were treated to a surprise send-off party and pot-luck dinner at The Buccaneer’s Mermaid restaurant and lauded by all in attendance for four years of service to the St. Croix community.” Park Service Chief of Resource Management Zandy Hillis-Starr “thanked Goldstein and Torres on behalf of the organization.”

MAN RESCUED AFTER FALL AT MOUNT RAINIER PARK. The [AP](#) (6/12, 2.29M) reports that “a Mount Rainier National Park spokeswoman says park rangers have rescued an injured 18-year-old man who fell 30 to 40 feet in an area below Christine Falls.” According to spokeswoman Patti Wold, the “man suffered multiple injuries in the fall Thursday and was flown to a hospital.”

ADDITIONAL COVERAGE: NPS SUPPORTS RENAMING ALASKA’S MOUNT MCKINLEY. Additional coverage that the NPS supports renaming Mount McKinley was provided by the [Alaska Public Radio Network](#) (6/11, 2K), the [Houston \(TX\) Chronicle](#) (6/12, 2.29M), the [Madison \(WI\) Capital Times](#) (6/12, 205K), the [Washington \(DC\) Times](#) (6/12, 641K), [Newser](#) (6/12, 245K), and [KTUU-TV Anchorage \(AK\)](#) Anchorage, AK (6/12, 78K).

ADDITIONAL COVERAGE OF “FIND YOUR PARK” MOVEMENT. Additional coverage of the “Find Your Park” movement was provided by the [Pike County \(PA\) Courier](#) (6/11, 21K).

ADDITIONAL COVERAGE: SUBARU SHARING ZERO LANDFILL KNOWLEDGE WITH NPS. Additional coverage that Subaru is sharing its zero landfill knowledge with the NPS was provided by the [News Wheel](#) (6/12).

ADDITIONAL COVERAGE: NPS MODIFIES NATIONAL MALL VOLLEYBALL COURTS RESERVATION POLICY. Additional coverage that the changes to the National Mall volleyball courts reservation policy was provided by the [Washington \(DC\) Post](#) (6/12, Stein, 5.03M).

Bureau of Land Management:

BLM FIREFIGHTER DIES AFTER TRAINING IN SOUTHWEST IDAHO. The [AP](#) (6/12, 3K) reports that “federal officials say a wildland firefighter has died after a physical training exercise.” The BLM says “33-year-old Terry Sonner of Hammett died Wednesday morning after collapsing.” According to agency spokeswoman Jessica Gardetto, “attempts by crewmembers to revive Sonner failed.” The cause of death hasn’t been determined.

Additional coverage was provided by the [East Idaho News](#) (6/12), the [Idaho Press Tribune](#) (6/12, 6K), [KTVB-TV Boise \(ID\)](#) Boise, ID (6/11, 119K), and [KMVT-TV Twin Falls \(ID\)](#) Twin Falls, ID (6/12, 1K).

BLM TELLS WORKERS TO STAY OUT OF GOLD BUTTE AFTER SHOTS FIRED NEAR SURVEYORS. The [Las Vegas Review-Journal](#) (6/12, 380K) reports that the BLM has told its employees and contractors to keep out of a disputed swath of public land in northeastern Clark County after shots were fired near a survey crew’s camp June 5. No one was injured in the incident. The surveyors said the men identified themselves as ranchers and were “very cordial.”

LOGGING ACCIDENT KILLS MAN WORKING ON TREE-THINNING PROJECT FOR BLM. The [AP](#) Seattle (6/11, 157K) reports that “the Coos County sheriff’s office in southwest Oregon says a 45-year-old Myrtle Creek man has died in a logging accident.” According to the sheriff’s office, “a load of logs was being pulled to a log landing Wednesday when one of the logs swung around and fatally struck Darrell Carmichael.” Carmichael was “working for JSP Cutting out of Myrtle Creek on a tree-thinning project for the federal Bureau of Land Management.”

Additional coverage was provided by [KOBI-TV Medford \(OR\)](#) Medford, OR (6/12) and [KTVZ-TV Bend \(OR\)](#) Bend, OR (6/12, 1K).

Fish and Wildlife Service:

LION HUNTERS RAISE CONCERNS ABOUT PROPOSED PROTECTIONS. [Reuters](#) (6/11, Nyambura-Mwaura) reports that lion hunters are raising concerns over proposal by the FWS to list lions as a threatened species and set up a system of permits for importing trophies from lion hunts. Hunting advocates and opponents are lobbying the FWS ahead of its expected final decision this year. FWS spokesman Gavin Shire said, “We would look to see if each permit application is consistent with the conservation of the species.”

BANDON MARSH NATIONAL WILDLIFE REFUGE MAKES PROGRESS IN MOSQUITO CONTROL. The [Oregonian](#) (6/12, 1M) reports that “a spring monitoring program has found few mosquito larvae in the Ni-les’tun Unit of the Bandon Marsh National Wildlife Refuge.” According to the FWS, “this year, monitoring has detected few saltmarsh mosquito larvae within the marsh compared to last year.” The low figures is “a result of the intensive efforts last year to kill larvae before they could develop into adults and fly off.”

LOCAL RESIDENTS OPPOSE FISHING DECISION AT YUKON DELTA NATIONAL WILDLIFE REFUGE. The [Alaska Dispatch News](#) (6/11, 216K) reports that “federal managers have greatly expanded their authority over salmon-producing waters in the Yukon Delta National Wildlife Refuge, including a long stretch of the Kuskokwim River, by shutting down all fishing by nonrural residents to protect king salmon.” The FWS in-season manager, Neil Lalonde, “last week shut down fishing by nonrural residents, and the decision is not sitting well with some locals.”

DEVICE AIMS TO REVEAL AGE, GENDER, AND IDENTITY OF ENDANGERED WOLVES FROM SCAT. The [Mongabay](#) (6/11, 7K) reports that a scientist is “building a handheld device that analyzes the odor of wolf scat to determine the age, gender, and individual identity of the animal that left it.” According to the article, “the goal is to improve estimates of the size and demographics of endangered Mexican gray wolf populations, and ultimately to help bring back the wolf and restore greater balance to the forests of the southwestern U.S. and Mexico.”

RISING TEMPERATURES WOULD HURT PLANT GROWTH. [TIME](#) (6/12, Worland, 19.57M) reports that a new study finds that, given limited efforts to curb climate change, plant growth will be stunted in 2100 compared to now. The study’s authors say that though rising temperatures will reduce the number of freezing days and therefore increasing growing time, they will also decrease water availability and change soil conditions, resulting in less net growth. “Those that think climate change will benefit plants need to see the light, literally and figuratively,” said lead study author Camilo Mora, professor at the University of Hawaii. The study concedes that this is a worst-case scenario relying on little effort being made to reduce carbon emissions.

DELAY URGED IN SAGE GROUSE PROTECTION. The [Ogden \(UT\) Standard-Examiner](#) (6/12, 83K) editorializes that Sens. Orrin Hatch and Mike Lee are “correct in trying to prevent the greater sage grouse from being protected under the Endangered Species Act.” The lawmakers have “joined colleagues in the House, including Utah’s Rep. Bishop, in introducing amendments to the National Defense Authorization Act that will delay listing the sage grouse as endangered for at least 10 years.” The paper says that “if it comes down to a choice between maintaining military readiness or listing the sage grouse as endangered, we’re going to choose military readiness.”

US Geological Survey:

STUDY FINDS SANDBARS MIGHT NOT BE CRITICAL FOR ENDANGERED CHUB. The [Arizona Daily Sun](#) (6/12, 34K) reports that “a common perception exists that the presence of sandbars in the Colorado River is an important, and possibly necessary, element for the survival of the river’s endangered humpback chub.” However, “one study published this year found that backwaters

may not be as vital to the chub's survival as once thought. The study's authors found that after a controlled flood from Glen Canyon Dam, the majority of juvenile humpback chub were found outside of the backwater habitats associated with sandbars." Ted Melis, deputy director of the USGS's Southwest Biological Science Center, said, "We don't have any publications to date to connect survival of young humpback chub to these sandbars. We've done some studies but nobody has shown that having those backwaters created by sandbars is a limiting factor on how well humpback chub survive."

ADDITIONAL COVERAGE: SCIENTISTS CONCLUDE RELEASES FROM GLEN CANYON DAM WORKING. Additional coverage that three years after the BOR made "high-flow experiment" releases from Glen Canyon Dam "an established protocol, a group of current and former U.S. Geological Survey scientists have concluded that the tactic is indeed showing promise as a way to reverse decades of sandbar declines" was provided by the [Arizona Daily Sun](#) (6/12, 34K).

Securing America's Energy Future:

Renewable Energy:

CHOCKECHERRY AND SIERRA MADRE WIND ENERGY PROJECT WOULD BE LARGEST ONSHORE WIND FARM IN NORTH AMERICA. The [Greenwire](#) (6/11, Subscription Publication) reports that Power Company of Wyoming "plans to string 157 wind turbines...as part of the much larger Chokecherry and Sierra Madre Wind Energy Project." According to the article, "once completed in the coming decade, it will number 1,000 turbines and rank as the largest onshore wind farm in North America, if not the world."

LOS ANGELES WON'T BUY POWER FROM SODA MOUNTAIN SOLAR PROJECT. The [Los Angeles Times](#) (6/12, Sahagun, 4.03M) reports that "the city of Los Angeles has dropped plans to buy electricity from a controversial solar plant proposed for the Mojave Desert, delivering a serious blow to the most environmentally sensitive renewable energy project in the state." City officials said Thursday that the Soda Mountain Solar Project would be "too damaging to bighorn sheep, desert tortoises and other wildlife near the site along Interstate 15, just south of Baker and less than a mile from the Mojave National Preserve." According to the article, "the decision was made after a Department of Water and Power review found that other proposed renewable energy projects would charge the city less for electricity and would have fewer challenges in delivering the power to Los Angeles."

OPINION: WIND TAX CREDIT NECESSARY FOR INDUSTRY. Writing in [The Hill](#) (6/12, Garland, Reilly, 533K), Sitting American Wind Energy Association chair Mike Garland and former chair Susan Reilly accuse former Sen. Don Nickles of misrepresenting the position of their organization on the Wind Production Tax Credit. It is their position that the tax credit is necessary for the continued expansion of the wind power industry. They also note that Nickles' firm has made over \$1.4 million lobbying for fossil fuel interests, including \$200,000 to fight the tax credit specifically.

Onshore Energy Development:

FRACKING RULES TO FACE LEGAL CHALLENGE. [Reuters](#) (6/12, Rascoe) reports that energy industry organizations and state officials who oppose new Federal rules for hydraulic fracturing, or fracking, on public land are taking their legal challenge to court this month in an effort to block the regulations just before they are to take effect. Opponents of the regulations will ask a federal judge on June 23 for a preliminary injunction. The Interior Department rules, which are scheduled to take effect on June 24, would force companies to provide information on chemicals used in fracking and to take measures to prevent leakage from oil and gas wells on Federal land.

Additional coverage was provided by [Reuters](#) (6/12, Rascoe).

HOUSE PANEL PASSES PIPELINE BILL. The [Greenwire](#) (6/11, Subscription Publication) reports that the House Natural Resources Committee has "approved bills to hasten logging projects on national forests and to allow the Interior Department to approve the siting of gas pipelines through national parks, part of a broader GOP push to improve forest health and reduce the price of energy." The article notes that "Democrats and environmental groups objected to both bills, arguing they would erode environmental protections and limit citizens' ability to influence the management of federal lands."

[Politico Pro](#) (6/11) reports that the green group Western Values Project said in its statement ahead of the panel vote, "Pipelines through these pristine places could not only tarnish the landscape — they could put western economies at risk. If national parks are America's best idea, then fast-track approval of pipelines through them is one of Congress' worst."

BLM MOVES FORWARD WITH COAL LEASE NEAR BRYCE CANYON NATIONAL PARK. The [Environment & Energy Publishing](#) (6/11, 705) reports that the BLM is "closer to a decision on whether to lease more than 3,500 acres of federal coal near Bryce Canyon National Park in Utah." The bureau has "completed a long-awaited supplemental draft environmental impact statement for the so-called Alton tract, according to a notice set to appear in tomorrow's edition of the Federal Register." The BLM was "moving forward with approving the lease sale in 2012 when, amid pressure from environmental groups and sister agencies, it decided to go back to the drawing board."

ENVIRONMENTAL GROUPS SUE BLM OVER CALIFORNIA DRILLING PLAN. The [EnergyWire](#) (6/11, Subscription Publication) reports that "environmental groups say the Bureau of Land Management failed to consider risks from hydraulic fracturing before opening up vast swaths of public lands in California to oil and gas development." The Center for Biological Diversity and Los Padres ForestWatch sued the bureau "yesterday in federal court, arguing that the agency's resource management plan for public lands in California allows drilling across the Central Valley, San Joaquin Valley and southern Sierra Nevada, and along California's central coast, without considering unique environmental impacts associated with fracking."

BLM SEEKS INPUT ON MANAGEMENT OF LAND IN COLORADO. The [Greenwire](#) (6/11, Subscription Publication) reports that

the BLM is "asking for public comment on its management of 680,000 acres of land in Colorado to help determine which areas to open up to mining and oil and gas exploration. "The bureau has "already identified 78,000 acres with wilderness characteristics that could prevent energy development and exploration." But Wild Connections, a conservation group, has "found 246,000 acres with wilderness characteristics." The group said the bureau "left out the Table Mountain plateau north of the Arkansas River, which Wild Connections says is a key wildlife refuge."

FERC DECISION ON JORDAN COVE LIQUEFIED NATURAL GAS PROJECT IN COOS BAY DELAYED AGAIN. The [Oregonian](#) (6/12, 1M) reports that "a final federal decision on the controversial Jordan Cove liquefied natural gas project in Coos Bay has been delayed once again." The Federal Energy Regulatory Commission is "widely expected to approve the project, and was scheduled to release the project's final environmental impact statement on Friday." However, the FERC "now says the U.S. Department of Interior and Bureau of Land Management require additional information to determine how an alternative route for a section of the Pacific Connector Pipeline would affect its lands."

SEN. GARDNER DECRIES "ASSAULT" ON COLOWYO MINE. The [PJ Tatler](#) (6/11, 6K) reports that Sen. Cory Gardner is warning that "the federal government could devastate a local community and raise energy prices with an 'assault'" on the Colowyo Mine. Gardner said, "For a community that's the size of the town I live in, three thousand people or so, to lose two hundred twenty jobs would be economic catastrophe."

In an editorial, the [Pueblo \(CO\) Chieftain](#) (6/12, 79K) supports efforts by Rep. Scott Tipton and Sen. Cory Gardner "to prevent the closure of a Colorado coal mine at the hands of an anti-coal environmental group called WildEarth Guardians." The paper argues that "the government shouldn't give in to anti-coal organizations that seek to legislate environmental policy through the courts when they don't get their way through normal channels."

Additional coverage was provided by the [Craig \(CO\) Daily Press](#) (6/11, 10K), the [Steamboat \(CO\) Pilot & Today](#) (6/11, 30K) and the [Grand Junction \(CO\) Daily Sentinel](#) (6/12, 73K).

COMPANY PAYS \$175,000 TO SETTLE CLAIMS INVOLVING INDIAN OIL, NATURAL GAS LEASES. The [AP](#) (6/12) reports that "federal prosecutors say a Kay County company has agreed to pay \$175,000 to settle claims involving debt owed to the government involving Indian oil and natural gas leases." Oklahoma City U.S. Attorney Sanford Coats said Thursday that Case Sales Company, Inc., "held five Indian oil and gas leases for wells in the Anadarko area" and "the company was required to comply with certain reporting requirements to the U.S. Department of Interior for each well it operated." However, "prosecutors allege that from 2004 through 2009, Case failed to submit timely and accurate reports," and "as a result, the agency assessed a civil penalty against the company."

EARTHQUAKES SUBSIDE AFTER WASTEWATER WELL PLUGGED. The [Denver \(CO\) Post](#) (6/12, Elliott) reports that seismic activity around a wastewater well in northern Colorado has ceased for the past two months after the bottom 450 feet of the well was capped with cement last year. The shortened well is back in operation, but no tremors greater than magnitude 1 have appeared. Operators are optimistic, but not convinced that shortening the well stopped the shaking.

Additional coverage was provided by the [AP](#) (6/12, Elliott, 2.29M).

FRACKING SUPPORTERS LAUNCH BUZZFEED-STYLE WEBSITE. [Fuel Fix \(TX\)](#) (6/12, Meyers, 7K) reports that supporters of fracking have launched the FrackFeed.com website in hopes of swaying public opinion to support the practice. Using memes of Ron Burgundy and Dr. Evil, the site is styled similarly to Buzzfeed, with "short, pithy pieces of content." The goal is to counter what the site's backers say are myths about the practice and try to stand up to the more effective grassroots campaign model pursued by environmentalists.

AMA CALLS FOR FRACKING CHEMICAL DISCLOSURE. In continuing coverage, the [Pittsburgh \(PA\) Post-Gazette](#) (6/12, Hopey, 621K) reports that the American Medical Association has adopted the policy that companies should disclose the chemicals used in the fracking process and that monitoring "should focus on human exposure in well water and surface water and government agencies should share this information with physicians and the public." "Keeping the names of the chemicals secret is preposterous," said plank author Todd Sack, a physician from Florida. He argues that physicians cannot effectively treat public health issues if they do not know what compounds their patients may have been exposed to.

ADDITIONAL COVERAGE OF BUFFALO FIELD OFFICE RESOURCE MANAGEMENT PLAN. Additional coverage of the Buffalo Field Office Resource Management Plan was provided by the [Wyoming Tribune Eagle](#) (6/11, 44K).

PROFESSOR PORTER: STUDY SHOWS ENVIRONMENTAL ISSUES ARE IMPROVING, BUT TRANSPARENCY NEEDED. In an interview with [Bloomberg News](#) (6/11, 3.81M), Harvard Professor Michael Porter says that the oil and gas industry should be more transparent in explaining the fracking process to diffuse the political arguments surrounding the practice, and that their adversarial approach to communities "makes it worse." Further, he says that reducing some of the environmental risks can be done at little cost.

PROFESSOR: NEW FRACKING RULES DO NOT GO FAR ENOUGH. Writing in the [Oklahoman](#) (6/12, Kraft, 506K), Professor emeritus Michael Kraft of the University of Wisconsin-Green Bay says that the Interior Department's new fracking rules do not go far enough to protect localities. He praises requirements to disclose the chemicals involved, but says that rules should require companies to disclose their chemical mixes before drilling begins and cover toxic air emissions.

EDITORIAL: EPA'S STANCE ON FRACKING IS CORRECT. The [Denver \(CO\) Post](#) (6/12, 894K) editorializes that the EPA's finding that fracking does not cause widespread environmental harm is good news for the US as the world works to reduce its carbon footprint because the practice drives down the price of natural gas and allows it to displace coal as a fuel for electricity generation. It also says that the environmental groups relying on a small caveat in the report to vindicate their stance on the issue are grasping at straws.

EDITORIAL: TEXAS RAILROAD COMMISSION NEEDS TO ACCEPT THAT WASTEWATER WELLS CAUSE

EARTHQUAKES. The [Dallas \(TX\) Morning News](#) (6/12, 1.09M) editorializes that Texas Railroad Commission staff seismologist Craig Pearson's continued insistence that there is no evidence that wastewater wells established in fracking operations are to blame for seismic activity is false. The Morning News points to studies by Southern Methodist University, the University of Texas, and the United States Geological Survey as strong scientific evidence that they do, and that the commission's credibility as an industry regulator is at stake if it ignores the facts.

COMMENTARY: STATES SHOULD LIMIT LOCAL FRACKING BANS. Writing in the [Houston \(TX\) Chronicle](#) (6/12, Lacy, Powell, 2.29M) local Texas leaders Ross Lacy and Clinton Powell argue that limiting bans on fracking is a good policy move because cooperation between local and state regulators is vital to successful oil and gas development, and the ban on bans forces it to occur. Further, creating a patchwork of different municipal regulations on the issue would make economic investment in Texas more difficult, they say.

Offshore Energy Development:

APPEALS COURT UPHOLDS SHELL'S SPILL-RESPONSE PLANS FOR DRILLING IN ARCTIC. [The Hill](#) (6/11, Henry, 533K) reports the 9th Circuit Court of Appeals "has upheld the Interior Department's approval of a Royal Dutch Shell oil spill clean-up strategy for the company's planned Arctic drilling operations." Green groups had sued the department's Bureau of Safety and Environmental Enforcement "over its decision to sign off on Shell's oil spill response plans." But the court ruled yesterday "that the bureau acted lawfully when it approved the proposal, Reuters reports."

[Fuel Fix \(TX\)](#) (6/11, 7K) reports "a federal district court previously ruled for the agency and Shell, which intervened in the case;" the decision yesterday "upheld it." At the center of the lawsuit "were the oil spill response plans Shell submitted for proposed exploratory oil drilling in the Chukchi and Beaufort seas," which the BSEE "approved in March 2012."

The [AP](#) (6/12) reports the case made by the environmental groups argued that "the approvals violated Clean Water and Endangered Species acts." But "the government countered the groups' claims were based, in part, on a misreading of the laws and Shell's response plans."

Additional coverage was provided by the [Seattle Post-Intelligencer](#) (6/11, 822K), [Reuters](#) (6/11), the [Houston \(TX\) Chronicle](#) (6/12, 2.29M), the [Alaska Dispatch News](#) (6/11, 216K), the [Law 360](#) (6/12, 15K), the [Maritime Executive](#) (6/12, 21), [Courthouse News](#) (6/11, 7K), and [KUCB-FM Unalaska \(AK\)](#) Unalaska, AK (6/12).

First Vessel Leaves Washington State For Planned Arctic Drilling. In an article headlined "First Vessel In Shell's Arctic Drilling Fleet Heads For Alaska" [Reuters](#) (6/11, Cavaliere) reports that oil spill containment barge The Arctic Challenger departed Washington State for Alaska in preparation for Shell's oil and gas exploration in the Chukchi and Beaufort Seas this summer. Seattle's ports have been the site of several weeks of protests from environmental groups because of Shell's plans to return to the Arctic.

SOUTH CAROLINA AGENCY DENIES REQUEST TO STOP SEISMIC TESTING. The [Charleston \(SC\) Post and Courier](#) (6/11, 305K) reports that South Carolina "won't stop a federal permit to use seismic guns to search for oil and natural gas offshore, its environmental regulatory board decided Thursday." The S.C. Department of Health and Environmental Control board "denied a request by environmental advocates and others to overrule a staff decision to approve the first of three permits."

Additional coverage was provided by the [Columbia \(SC\) State](#) (6/12, 300K) and [WCIV-TV Charleston \(SC\)](#) Charleston, SC (6/12, 16K).

PENALTY RULING MAY BE NEAR IN DEEPWATER HORIZON DISASTER. The [New Orleans \(LA\) Times-Picayune](#) (6/12, Larino, 733K) reports that a filing in US district court Wednesday means that a New Orleans judge may be near to ruling how much BP will pay in fines over the catastrophic 2010 Deepwater Horizon spill. The judge and magistrate were due to meet with lawyers for a regular status conference, but canceled it and said it will be rescheduled after a penalty ruling. The Clean Water Act provides for up to \$13.7 billion in fines for the British company. BP says that its work to clean up the mess warrants a lower fine.

ADDITIONAL COVERAGE: BOEM, LOUISIANA TO RESTORE WHISKEY ISLAND. Additional coverage that the BOEM "signed an agreement with Louisiana officials allowing the state to mine 13.4 million cubic yards of sand from Ship Shoal" was provided by the [New Orleans \(LA\) Times-Picayune](#) (6/12, 733K).

Tackling America's Water Challenges:

CALIFORNIA WATER AGENCIES WANT BOR TO STOP RELEASING WATER FROM TRINITY RESERVOIR. The [Western Farm Press](#) (6/12, 2K) reports that "two California water agencies want the U.S. Bureau of Reclamation to comply with provisions of the Endangered Species Act and stop releasing water from Trinity Reservoir in northern California until consultations with other regulatory agencies can be made." Westlands Water District and San Luis & Delta-Mendota Water Authority are "challenging three years' worth of increased flows to the Trinity River that the USBR made in alleged violation of the ESA." According to the article, "the water districts filed a 'notice of violation' with U.S. Interior Secretary Sally Jewell on June 10, alleging the USBR violated federal law by unilaterally releasing 120,000 acre feet of water from Trinity Lake in northern California over a three-year period."

BOR PREPARING TO FLOAT PUMPS IF FOLSOM LAKE DROPS TOO LOW. [KXTV-TV](#) Sacramento, CA (6/11, 45K) reports that the BOR is "preparing a barge with eleven floating pumps to continue providing tap water to hundreds of thousands of people if the level of Folsom Lake drops below the water supply outlet built into the dam." BOR spokesperson Erin Curtis said, "We're just making a prudent decision now based on what could happen." The agency "first began considering floating pumps last year as the lake

approached a record low level of 357 feet above sea level – just 40 feet above the center of the outlet that provides domestic water to the cities of Roseville and Folsom, Folsom Prison and the San Juan Water District.”

ALMOND FARMERS A TARGET AS CALIFORNIA DEALS WITH DROUGHT. The [CBS Evening News](#) (6/11, story 7, 2:10, Pelley, 5.08M) reported, “A damp spring has not eased California’s historic drought” as a “report out today shows conditions are still severe in 94 percent of the state.” Now there is a “fight” over water supplies and the farmers “who produce 80 percent of the world’s almonds are right in the middle of it.” CBS (Tracy) says that “California almonds are a \$6.5 billion industry, the most profitable crop in the state. But almond trees are also thirsty. A recent study shows that it takes one gallon of water to grow one single almond.”

Empowering Native American Communities:

WHITE HOUSE HOSTING TRIBAL YOUTH GATHERING. [Politico](#) (6/12, Burris, 1.11M) reports that “for the first time, the White House is inviting Native-American youth to voice their concerns about issues faced in their community.” According to the article, “those eager to be among the 800 Native Americans who will be chosen to attend the first Tribal Youth Gathering hope to share their stories about issues like foster care, cultural preservation and education.” The article notes that “to qualify to for the conference, they must complete the Generation Indigenous Challenge by joining the National Native Youth Network, a White House effort in partnership with the Aspen Institute’s Center for Native-American Youth and the U.S. Department of the Interior.”

APPEALS COURT SIDES WITH BIG LAGOON RANCHERIA IN FIGHT OVER LAND DECISIONS. The [AP](#) (6/12, 442) reports that “in a victory for Native American tribes, an appeals court ruled Thursday that states cannot use negotiations for a Native American casino to challenge the federal government’s decisions to recognize a tribe and set aside land for it.” An 11-judge panel of the 9th U.S. Circuit Court of Appeals said “states have to use a separate process to contest those decisions and have a window of six years to file their challenge.” The decision “came in a fight between California and the Humboldt County-based Big Lagoon Rancheria over the tribe’s plan for a Las Vegas-style casino.”

SPOKANE TRIBE CASINO DECISION EXPECTED SOON. The [Spokane \(WA\) Spokesman-Review](#) (6/12, 172K) reports that “after more than two years of waiting, the Spokane Tribe – and the city and county that share its name – may know soon whether it will get the federal go-ahead to build a casino, hotel and shopping mall on the West Plains.” According to the article, “several government sources said Thursday they have been told to expect a decision from the U.S. Department of the Interior in the near future, although no date has been set for the announcement.”

MINNESOTA LEGISLATURE INCREASES FUNDS FOR NATIVE AMERICAN EDUCATION. The [St. Paul \(MN\) Pioneer Press](#) (6/12, 484K) reports that “the Minnesota Legislature left the Capitol at midnight on May 18 with deals set on education, energy, environment and economic development.” Originally, a \$3.2 million increase was proposed “to help schools better serve Indian students.” Now, there will be “\$14.5 million in new funds split between per pupil student aid and assistance to schools operated by the federal Bureau of Indian Education.”

Top National News:

HOUSE TRADE MEASURES CLEAR FIRST HURDLE AHEAD OF TODAY’S KEY VOTES. Media coverage of the trade debate in the House highlights conflicting signals ahead of today’s key votes. The [Washington Times](#) (6/12, Dinan, 641K) indicates that “optimism abounded among free-trade supporters,” and the [Columbus \(OH\) Dispatch](#) (6/12, Votaw, 565K) noted that Speaker Boehner “expressed growing optimism.” Less sanguine was the [Huffington Post](#) (6/11, Barron-Lopez, 194K), which reported that the President’s trade agenda “could be less than a day away from taking a deep blow that would unravel it all,” while [Roll Call](#) (6/11, Dumain, 99K) described the situation as “dire” for “fast track” supporters. [McClatchy](#) (6/11, Hotakainen, 32K), meanwhile, says “both sides braced for a close vote,” which “will determine whether the president suffers a high-profile defeat or one of the biggest wins of his second term.”

As the House debate got underway Thursday, [USA Today](#) (6/12, Davis, 5.01M) reports, “trade supporters scored a critical victory” with a narrow 217-212 vote on the rule for the “trio of trade bills...set to receive votes” today. The trio includes TAA, trade promotion authority (TPA) – which is the “most contentious” – and “a customs enforcement bill.” [The Hill](#) (6/11, Marcos, 533K) said trade supporters “survived a bad scare,” with 34 Republicans voting against the rule and just 8 Democrats supporting it. Notably, the [ABC Otus News](#) (6/12, Parkinson) blog reported before the vote that as of Thursday, “18 House Democrats” had “come out in support of TPA” – 10 more than supported the rule. [Politico](#) (6/11, French, 1.11M) indicates that the President’s trade agenda survived, but just “barely,” and [The Hill](#) (6/11, Marcos, 533K) said that the “tight” tally “foreshadows the challenge GOP leaders will face” today.

[Politico](#) (6/11, Dove, 1.11M) also reports that the President “and his aides are accusing House Democrats of raising a last-minute funding objection” TAA provisions “designed to scuttle the entire package.” In a separate story, [Politico](#) (6/11, French, 1.11M) says “the uncertainty surrounding the” TAA measure is “becoming a serious problem for Obama,” because “if TAA fails, the House will not take up Trade Promotion Authority.”

The TAA issue, says the [AP](#) (6/12, Babington, Werner) along similar lines, is boosting TPP opponents’ “hopes of bringing down the whole package,” as “numerous House Democrats said they would vote” against it today. The AP notes that AFL-CIO President Richard Trumka “urged House Democrats to do something once unthinkable,” oppose TAA “as the best means to kill fast track.” Lawmakers “attending the meeting” with the labor leader said he “told Democrats he would pray for those who oppose the unions’ position.”

“Obama and other top White House officials are in regular communication with leaders on Capitol Hill,” the [Washington Times](#) (6/12, Wolfgang, 641K) reports, noting that the President and Boehner spoke on the phone yesterday. Asked about it, notes [Reuters](#) (6/12), White House press secretary Josh Earnest said, “I am confident that is not the only telephone call the president will have with a member of Congress today.” The [Wall Street Journal](#) (6/12, Hughes, Subscription Publication, 5.68M) notes that Boehner told

reporters yesterday, "I have talked to the president. ... He's working at this. And I hope his efforts are successful." The [National Journal](#) (6/12, Koren, Subscription Publication, 156K) notes that Boehner also said, "We've had good conversations this week on a bipartisan basis."

The [AP](#) (6/12) remarks on the fact that the "controversy" about the bills is "so thick that...Obama conferred on strategy with...Boehner and drew a public rebuttal in the House from a Democratic foe of the measure," Rep. Peter DeFazio, who said on the House floor, "You're not right, Mr. President. Actually, you're wrong." [Bloomberg Politics](#) (6/12, House, Dougherty, 161K) notes that Pelosi, meanwhile, "didn't say whether she will support the trade package," though "she praised the 'excellent and impassioned work' of people on all sides of the trade debate."

In the afternoon, noted the [Huffington Post](#) (6/11, Barron-Lopez, 194K), "White House Chief Of Staff Denis McDonough, Treasury Secretary Jack Lew and Labor Secretary Tom Perez rushed to Capitol Hill...to meet with House Democrats," and "a number of Democrats said that the three officials' message, while not stated outright, was implied loud and clear: This vote is for the president." [Roll Call](#) (6/11, Dumain, 99K) reported that "House Democrats emerged from" the meeting "with more questions than answers on how members will proceed on Trade Promotion Authority – and few predictions of if or how the impasse would be broken."

On its website, the [Washington Post](#) (6/11, Kane, 5.03M) noted that "on a letter to Congress on Thursday," Perez "called the TAA program 'a critical lifeline to workers.'" The Post cast Democrats as still "pondering whether to use their considerable leverage to tank...Obama's top domestic legislative priority."

Under the headline "The Return Of Growth Economics," meanwhile, the [Wall Street Journal](#) (6/12, Subscription Publication, 5.68M) editorializes that passage of the TPP would boost the US economy and put the GOP Congress on track to change the course of US economic policy for years to come.

Obama Visits With Lawmakers At Congressional Baseball Game. [USA Today](#) (6/11, Korte, 5.01M) reported on its website that the President "cheered on both teams when he visited Nationals Park Thursday night for the annual Congressional Baseball Game, but it was clear to everyone that he was really there to root for a free trade deal." USA adds that "upon arriving, he first sought out...Pelosi," and then "visited both the Democratic and Republican dugouts." He "spent only about an inning at the game – long enough to watch Sen. Rand Paul...strike out." The Democrats ultimately "won, 5-2."

Also on its website, the [Washington Post](#) (6/11, Kane, 5.03M) reported that "Republican fans – largely staff and lawmakers who aren't playing – cheered and chanted 'TPA,'" while "Democratic fans chanted 'O-BAM-A.'"

WPost A1: Obama's Difficulty Enlisting Chicago Democrats "Emblematic." Under the headline "What Chicago Democrats Tell Us About President Obama's Problems On Trade," the [Washington Post](#) (6/12, A1, Debonis, 5.03M) reports on its front page that Chicago Rep. Danny K. Davis, who "was right there with him" when the President announced his Senate candidacy in 2004, has not been swayed by "months of lobbying and personal appeals from Obama." Moreover, Davis "is hardly an outlier in Obama's home town," and "in a city where clout is king, the most powerful man on the planet seems to have none." To the Post, "Obama's failure to persuade Chicagoland Democrats is emblematic of the difficulties he has had convincing Democrats across the country."

Sanders, De Blasio Call On Clinton To State Position On TPP. The [Huffington Post](#) (6/11, Bobic, 194K) reported that Sen. Bernie Sanders said yesterday that "it's long past time for Hillary Clinton to make clear where she stands on a pending trade deal between the US and Pacific nations that has divided wings of the Democratic Party." Said Sanders, "If she's against this, we need her to speak out. Right now. Right now. I don't understand how any candidate, Democrat or Republican, is not speaking out on that issue."

The [New York Times](#) (6/12, Burns, Subscription Publication, 12.24M), meanwhile, reports that "reviving a public split with the White House," New York City Mayor Bill de Blasio "declared on the eve of a key vote in Washington that it would be a 'huge mistake' for Congress to approve...Obama's chief legislative priority," the TPP. The mayor, "who has yet to endorse a candidate for president," also said Clinton "should speak forcefully against the trade agreement," adding, "Democrats all over the country are looking to her for leadership."

Caroline Kennedy Defends TPP, Cites Father's Support For Free Trade. US Ambassador to Japan Caroline Kennedy writes in a piece for [Politico Magazine](#) (6/12), "For my father, President John F. Kennedy, expanding trade was integral to America's prosperity and security." The TPP "is the most progressive trade deal in history," and it will "support more jobs that pay higher wages here at home." After calling to passage the TPA, and then the trade agreement, Kennedy concludes, "As my uncle, Senator Kennedy, said two decades ago, 'We cannot turn our backs on progress or cast our votes against the future.'"

US CONSIDERING NETWORK OF BASES IN IRAQ. Statements by Pentagon officials that the US is considering a network of "lily pad" bases to aid American forces to train Iraqi troops prompted overwhelmingly negative and pessimistic analysis and commentary. Reporting characterized the plan as another indication of an uncertain strategy which doesn't show a firm US commitment to fighting ISIL.

The [CBS Evening News](#) (6/11, story 4, 0:45, Pelley, 5.08M) reported the US "is considering building a series of new military bases in Iraq so that US forces can help the Iraqi army take on ISIS." Joint Chiefs Chairman Gen. Martin Dempsey "likened the bases to lily pads from which American soldiers would train Iraqi troops and, in Dempsey's words, encourage the Iraqi security forces forward."

The [New York Times](#) (6/12, Cooper, Subscription Publication, 12.24M) reports the possible move represents "potentially deepening American involvement in the country." Dempsey "described a possible future campaign entailing the establishment" of the bases that would host American trainers working with Iraqi forces and tribesmen. Dempsey, according to the [Wall Street Journal](#) (6/12, Lubold, Entous, Subscription Publication, 5.68M), noted that he is not attempting to "float" any specific proposals. Rather, the Pentagon is studying all possible options.

In a [Washington Post](#) (6/12, 5.03M) column, Eugene Robinson tells readers that they should not “feel bad if you’re confused” about the US strategy in Iraq, because President Obama “doesn’t seem to know either.” Robinson notes that the decision to send 450 additional troops comes “days after” the President “admitt[ed]” the US does not “yet have a complete strategy” for training Iraqi forces. Robinson says that Obama “imposed such tight restrictions” on US troops’ activities “that only the sunniest optimist would believe this increase can make a difference.”

David Ignatius also suggests the US plan does not have enough force behind it in his [Washington Post](#) (6/12, 5.03M) column. Ignatius says while the Administration and ISIL “both issued new manifestos for the battle in Iraq this week,” the militants’ plan is the “more forceful.” Ignatius says the US is taking a “careful, incremental step,” while the Islamic State’s “message” is “that it will continue its rampage and compel Sunnis to accept its rule.” According to Ignatius, the US “is fighting an uphill battle” in part because it’s focusing the effort on trying to bring Iraqis together in a war defined by brutal “beheadings, stonings, point-blank assassinations and wanton destruction” of religious symbols.

[Reuters](#) (6/11, Stewart) reports Dempsey told reporters that the “lily pad” plan is “one of the options that we’re considering,” but it’s “just part of prudent planning.” Dempsey added, “At the planning level, it’s not theoretical. It’s very practical, looking at geographic locations, road networks, airfields, places where we can actually establish these hubs.”

[NBC Nightly News](#) (6/11, story 5, 2:15, Holt, 7.86M) reported that the idea “is raising new questions about the President’s strategy,” including the possibility that it represents “mission creep.” Deputy National Security Adviser Ben Rhodes said, “We don’t have a specific plan to open another base at this time but if we see a need the Iraqi security forces have, we have the ability to move US forces either from outside the country or from within the country.” Asked if his explanation was an example of “mission creep,” Rhodes replied, “No, this is the exact same mission that we’ve been pursuing, which is to train, advise, and assist Iraqis. Americans are not in combat.”

The [Washington Times](#) (6/12, Klimas, 641K) reports that under the plan the US base at al Taqaddum that is being used to help train Iraqis would be the first of the hubs. Pentagon spokesman Col. Steve Warren said any location where the US established a forward operating base during the last war in Iraq is a possibility for future operations, so the military has “hundreds of options.” Warren, according to the [Washington Post](#) (6/12, Ryan, 5.03M), “said the choice of any new sites would depend in part on whether the United States sees opportunities to help build up tribal forces.”

Meanwhile, [CNN’s Situation Room](#) (6/11, 5:26 p.m. EDT, 2:58, Keillar, 554K) reported the Pentagon has been working on a proposal for “a system of forward bases” in Iraq. Pentagon correspondent Barbara Starr explained that while t

DATE: TUESDAY, JUNE 9, 2015 7:00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + Obama Administration Officials To Discuss Wildfire Threats Tuesday In Denver.
- + Security Of Federal Government's Intrusion Detection System Questioned.
- + Secretary Jewell Attends Honouliuli Dedication Ceremony.
- + Senate Panel To Hold Hearing Before Tackling Comprehensive Energy Bill.
- + Additional Coverage: Ten New National Recreation Trails Designated.
- + Additional Coverage Of Interior Officials' Visit To West Virginia.

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + Subaru To Share Zero Landfill Expertise With NPS To Reduce Park Waste.
- + Three Pipe Bombs Discovered, Made Sage At Lake Mohave.
- + Fourth-graders Visit Tonto National Monument Through Grant From National Park Foundation.
- + NPS Offers Archaeology Field School At Fort Vancouver National Historic Site.
- + Arizona Health Officials To Monitor For Plague At Grand Canyon.
- + Petition Seeks To Halt The Killing Of Denali National Park Wolves.
- + NPS Monitors Nesting Eaglets.
- + Zion Park Adds New Tram Ride.
- + New Chief To Take Post At Timucuan Ecological And Historic Preserve.
- + William J. And Sarah Wagner Lippincott House Added To National Register Of Historic Places.
- + Additional Coverage: NPS Plans No-fishing Marine Reserve At Biscayne National Park.
- + Additional Coverage Of Bear Attack In Smokies.

Bureau of Land Management:

- + Hollow Pipes At Proposed Nevada National Monument Pose Threat To Wildlife .
- + Celebration Park Fire Under Investigation.
- + New Lawsuits Filed Over Chariot Fire.
- + Mercury Clean-Up Begins In BLM Area In Oregon.
- + BLM Announces New Eastern Colorado Resource Management Plan.
- + BLM Arizona Warns About Equine Influenza.
- + Wildlife Managers Urged To Use Contraceptive Vaccine To Manage Wild Horses.

Fish and Wildlife Service:

- + Decision On Prairie Dog Could Impact Endangered Species Act.
- + Alaska Fire Crews Battling Wildfires At Yukon Delta National Wildlife Refuge.
- + Arizona Sues Over Lack Of Mexican Wolf Plan.
- + Federal Government Says Enbridge To Pay \$4 Million, Restore Area Hit By 2010 Oil Spill.
- + East Rock School Students Help To Build Bird Habitat.

SECURING AMERICA'S ENERGY FUTURE:

Renewable Energy:

- + Additional Coverage: BLM Proposes Trimming Soda Mountain Solar Project.

Onshore Energy Development:

- + OSM Director Pizarchuk Recommends West Virginia Seeks Federal Help In Studying Impacts Of Mountaintop Removal Mining.
- + Industry, Advocates Continue Fight Over Fracking.
- + BLM's New Proposed Federal Coal Leases In Powder River Basin Criticized.
- + Additional Coverage: Colowyo Mine May Close.

Offshore Energy Development:

- + Video Shows Deepwater Habitats Of Two Submarine Canyons.
- + Claimants Rush To File For Losses From BP Oil Spill.
- + Opponents Of Shell's Plans To Drill In Arctic Stage Electronic Blockade.
- + California's Top Senate Candidates Vow Action On Oil Spills.
- + California Republicans Respond To Proposed Ban On Offshore Drilling.
- + Sen. Sullivan Criticizes Washington Leaders For Moves To Block Shell's Alaska Plans.
- + Op-Ed: Ohio Would Benefit From Arctic Drilling.
- + Opposition To Arctic Drilling Said Based On Cost, Cleanup Challenges.

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + Buyback Offers Extended To Montana Land Owners.
- + Gaming Compact Between New Mexico, Gaming Tribes Approved.
- + Tribes Ask Judge To Allow Expert Testimony In Trust Land Row.

TOP NATIONAL NEWS:

- + Obama: No "Complete Strategy" Yet In Place To Fight ISIL.
- + Obama Says High Court Should Not Have Taken Up Subsidies Case.
- + Obama's House Allies Expected To Abandon Him On TPA.

EDITORIAL WRAP-UP:

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

BIG PICTURE:

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

OBAMA ADMINISTRATION OFFICIALS TO DISCUSS WILDFIRE THREATS TUESDAY IN DENVER. The [AP](#) (6/9, Elliott, 2.29M) reports that "an unusually wet May reduced the likelihood of wildfires during June over much of the nation, but the danger will increase from July through September, the National Interagency Fire Center said in its latest outlook report." According to the article, "as the summer progresses, fire danger is expected to increase across the country, especially in the Northwest, Georgia and the Carolinas." Interior Secretary Sally Jewell and Agriculture Secretary Tom Vilsack will "discuss wildfire threats and the nationwide outlook for the wildfire season Tuesday in Denver." The two will also "discuss a proposal by Obama to change the way wildfire-fighting is funded to ease the strain on the U.S. Forest Service budget."

Additional coverage was provided by the [Denver \(CO\) Post](#) (6/9, Press, 894K), the [San Francisco \(CA\) Chronicle](#) (6/9, Subscription Publication, 2.92M), [US News & World Report](#) (6/9, 907K), the [Washington \(DC\) Post](#) (6/9, Dan Elliott |, Ap, 5.03M), [Yahoo! News](#) (6/9, Elliott, 6.18M), and [Fox News](#) (6/9, 9.4M).

Ecologist Argues Native Plants Should Be Used To Curb Wildfires. In an op-ed for the [Idaho Statesman](#) (6/8, 199K), Wayne Padgett, "an ecologist who retired in 2013 as the program lead for BLM's Colorado Plateau Native Plant Materials Development Program," criticizes the "use a non-native invasive species such as forage kochia to build a '356-mile network of fuel breaks along a 57-mile section of the Interstate 84 corridor from Boise to Glenns Ferry.'" He notes that "through research and development funded by the BLM, locally adapted native plant materials are available." Padgett argues that "they are not invasive, and they can not only help reduce the severity of future fires, but also restore resilience and provide forage and habitat critical for sage grouse."

SECURITY OF FEDERAL GOVERNMENT'S INTRUSION DETECTION SYSTEM QUESTIONED. The [NextGov](#) (6/9, 2K) reports that "when attackers compromised a federal personnel system holding records on up to 4 million current and former employees, the files were in an Interior Department data center equipped with the most up-to-date version of a governmentwide intrusion detection tool, a government official with knowledge of the center at the time said Friday." However, "that tool, called EINSTEIN 3, would not have been able to catch a threat that has no known footprints, according to multiple industry experts." Interior Department officials said in a statement they "continue to be vigilant to ensure that necessary security measures are in place to further strengthen and protect agency, customer and employee data." Interior has a "multipronged remediation strategy to prevent, detect and act against malicious activity on our network in order to respond and recover following an incident," officials added.

The [EnergyTrio](#) (6/8, Subscription Publication) reports that “security experts are questioning the U.S. government’s ability to fend off hackers and help guard private networks following a massive breach of federal workers’ personal data.” According to the article, “while historically poor cyber practices at OPM may have exacerbated the effect of the attack, the data breach also drew attention to the Department of Homeland Security and its role protecting both government and private critical infrastructure networks.”

Additional coverage was provided by [ExecutiveGov](#) (6/9, 548) and [Ars Technica](#) (6/8, 571K).

SECRETARY JEWELL ATTENDS HONOULIULI DEDICATION CEREMONY. [Honolulu Magazine](#) (6/9, 2K) reports a dedication ceremony was held on March 31 to celebrates Honouliuli’s new status as a national monument. Interior Secretary Sally Jewell said, “It’s time for the shame to be forgotten.”

SENATE PANEL TO HOLD HEARING BEFORE TACKLING COMPREHENSIVE ENERGY BILL. The [Environment & Energy Publishing](#) (6/9, 705) reports that the Senate Energy and Natural Resources Committee will hold a session on “energy accountability and reform” this week “before committee leaders turn to hashing out a comprehensive energy bill.” The hearing will “focus on more than three dozen bills aiming to tweak programs and authority under the Energy Department, the Interior Department, the Federal Energy Regulatory Commission and other federal agencies regarding the commercialization of federal labs, energy resource standards, oil and gas leasing, energy markets, research programs, manufacturing and federal loan guarantees, among other issues.”

ADDITIONAL COVERAGE: TEN NEW NATIONAL RECREATION TRAILS DESIGNATED. Additional coverage of the ten new trails designated for national recognition as part of the National Trails System was provided by the [Oshkosh \(WI\) Northwestern](#) (6/5, 35K), the [Woodinville \(WA\) Weekly](#) (6/9, 84K), and the [Montgomery \(AL\) Advertiser](#) (6/8, 28K).

ADDITIONAL COVERAGE OF INTERIOR OFFICIALS’ VISIT TO WEST VIRGINIA. Additional coverage of Interior Secretary Sally Jewell and OSM Director Joseph Pizarch k’s visit to West Virginia was provided by the [Washington Times](#) (6/5, Mattise, 641K), the [Myrtle Beach \(SC\) Online](#) (6/9, 41K), and [WRAL-TV](#) Raleigh, NC (6/9, 117K).

America’s Great Outdoors:

National Park Service:

SUBARU TO SHARE ZERO LANDFILL EXPERTISE WITH NPS TO REDUCE PARK WASTE. The [Treehugger](#) (6/9, 42K) reports that a partnership between Subaru, the National Parks Conservation Association (NPCA), and the National Park Service (NPS), will tackle the challenge of reducing waste at national parks. According to the article, “three of America’s most iconic National Parks are getting a helping hand on their waste management practices from Subaru’s zero-landfill experts.” The work will be for Yosemite, Grand Teton, and Denali National Parks, but it could also help “the development of ‘scalable zero landfill implementation plans’ that can be adopted by other national parks in the near future.”

THREE PIPE BOMBS DISCOVERED, MADE SAFE AT LAKE MOHAVE. [KVVU-TV](#) Las Vegas (6/9, 71K) reports that “three pipe bombs were discovered and rendered safe at Lake Mohave,” according to the NPS. Lake Mead National Recreation Area Deputy Chief Engineer Mark Hnat, said, “The visitor did the right thing in reporting these suspicious devices. If you see something suspicious, it’s important to report it, so together we can keep our park safe.” According to the article, “it’s believed all of the devices have been located.”

Additional coverage was provided by the [Las Vegas \(NV\) Sun](#) (6/8, 176K) and [KTNV-TV](#) Las Vegas (6/9, 56K).

FOURTH-GRADERS VISIT TONTO NATIONAL MONUMENT THROUGH GRANT FROM NATIONAL PARK FOUNDATION. The [Payson \(AZ\) Roundup](#) (6/8, 21K) reports that “six fourth-grade classes from Julia Randall Elementary School recently got a chance to visit Tonto National Monument, thanks to a grant from the National Park Foundation, which paid for bus.” According to the article, “the students, teachers and chaperones hiked on the paved trail to the Lower Cliff Dwelling where park staff offered a tour of the 700-year-old cliff dwellings built by the Salado people.” Superintendent Duane Hubbard said, “As a Payson resident with two children enrolled in the district, I wanted to see a stronger connection between Northern Gila County and Tonto National Monument. The monument staff have collaborated with the Globe and Miami schools through field trips and classroom presentations for many years. We look forward to strengthening these already established relationships while welcoming the Payson children to our park and encouraging them to discover the amazing resources of Tonto National Monument.”

NPS OFFERS ARCHAEOLOGY FIELD SCHOOL AT FORT VANCOUVER NATIONAL HISTORIC SITE. The [Stars And Stripes \(DC\)](#) (6/9, 19K) reports on “this summer’s archaeology field school at Fort Vancouver National Historic Site.” The NPS “partners with Portland State University and Washington State University Vancouver in the annual session, which gives college students some hands-on experience in archaeology.” According to the article, “it also gives members of the public a chance to observe the careful excavations, the precise record-keeping and the preservation of artifacts involved in an actual archaeological project.”

ARIZONA HEALTH OFFICIALS TO MONITOR FOR PLAGUE AT GRAND CANYON. The [AP](#) (6/9, 2.29M) reports that “Arizona health officials plan to start monthly monitoring of public areas along the South Rim of the Grand Canyon for plague.” Grand Canyon National Park officials say “they’re collaborating in the monitoring that will be conducted by the Coconino County Public Health Services District and involve testing fleas found on squirrels in the area.” According to park officials, “if plague is found during the testing that will be conducted monthly through September, steps then will be taken to prevent it from spreading to the public.”

PETITION SEEKS TO HALT THE KILLING OF DENALI NATIONAL PARK WOLVES. The [Ketchikan \(AK\) SitNews](#) (6/9) reports that “the iconic wolf population of Denali National Park has plummeted to its lowest level on record in the park, and hunting may be a key factor, according to a revised National Park Service (NPS) monitoring report released in May 2015.” Meanwhile, “a citizen petition calling for an end to wolf hunting and trapping inside Alaska’s Denali Park and no-kill buffers on its border has drawn in excess of over

11,000 signatures with a goal to reach 10,000 by early 2016.

NPS MONITORS NESTING EAGLETS. The [Milwaukee Journal Sentinel](#) (6/9, Jones, 784K) reports that “for several years the National Park Service has monitored young bald eagles along National Park areas of the Mississippi and St. Croix rivers and Apostle Islands in Wisconsin.” The work is “done in the spring before bald eagles fledge at 11- to 12-weeks-old and are still tied to their nests.” Bill Route, an ecologist with the Great Lakes Inventory and Monitoring Program for the National Park Service, said, “They’re our biological technicians. They’re collecting our data.”

ZION PARK ADDS NEW TRAM RIDE. The [AP](#) (6/9, Beth J. Harpaz |, Ap, 5.03M) reports that “a new narrated tram ride in Zion National Park has been added to the options for seeing Zion Canyon Scenic Drive.”

NEW CHIEF TO TAKE POST AT TIMUCUAN ECOLOGICAL AND HISTORIC PRESERVE. The [Florida Times-Union](#) (6/8, 277K) reports that Chris Hughes, currently chief of science and resource management at Glen Canyon National Recreation Area in Utah and Arizona, as well as the nearby Rainbow Bridge National Monument, is leaving “to take charge next month at Jacksonville’s national park, the Timucuan Ecological and Historic Preserve.”

WILLIAM J. AND SARAH WAGNER LIPPINCOTT HOUSE ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [AP](#) (6/9, 2.29M) reports that the William J. and Sarah Wagner Lippincott House, which was “once owned by Steve Miller of the Steve Miller Band has been added to the National Register of Historic Places.”

ADDITIONAL COVERAGE: NPS PLANS NO-FISHING MARINE RESERVE AT BISCAYNE NATIONAL PARK. Additional coverage of the plans to create a no-fishing marine reserve at Biscayne National Park was provided by the [Huffington Post](#) (6/9, Pierno, 194K) and the [Soundings](#) (6/9, 961).

ADDITIONAL COVERAGE OF BEAR ATTACK IN SMOKIES. Additional coverage that “Great Smoky Mountains National Park closed several trails and backcountry campsites Sunday after a bear encounter sent a teenager to the hospital” was provided by [USA Today](#) (6/8, Overton, 5.01M), [Reuters](#) (6/8, Reilly), and the [Washington \(DC\) Post](#) (6/9, Press, 5.03M).

Bureau of Land Management:

HOLLOW PIPES AT PROPOSED NEVADA NATIONAL MONUMENT POSE THREAT TO WILDLIFE . The [Las Vegas Review-Journal](#) (6/9, 380K) reports that hollow plastic pipes in an area that has been proposed for a new National Monument in Nevada pose a threat to wildlife. The pipes, driven into the ground to mark mining claims, attract birds who get trapped and die. The BLM, Nevada Department of Wildlife and volunteers have made an effort to remove hollow pipe markers throughout much of Southern Nevada

CELEBRATION PARK FIRE UNDER INVESTIGATION. The [AP](#) (6/9, 75K) reports that “authorities say a wildfire that has scorched at least 7,000 acres near Celebration Park is believed to have been started by people, but the cause is under investigation.” BLM spokeswoman Carrie Bilbao says “the fire was mostly contained by Sunday morning, but there’s still no solid estimate of when it will be fully contained.” Bi bao says “no structures are threatened by the fire, which is burning in brush and grass northeast of Murphy.”

Additional coverage was provided by the [Spokane \(WA\) Spokesman-Review](#) (6/8, 172K).

NEW LAWSUITS FILED OVER CHARIOT FIRE. The [San Diego Union-Tribune](#) (6/8, 579K) reports that “eight lawsuits have now been filed in federal court claiming a design flaw in the 2009 Jeep Wrangler was partially responsible for the 2013 Chariot fire that destroyed nearly 150 buildings in the Mount Laguna area east of San Diego.” According to the article, “the two most recent claims are from insurance carriers — the United Services Automobile Association (USAA) and State Farm Insurance — seeking to recoup losses stemming from the 7,000-acre blaze.” The article notes that “the new suits mimic an initial claim made by the Al Bahr Shriners of San Diego County, which earlier this year added Chrysler as a defendant in a \$20 million lawsuit against the federal Bureau of Land Management, alleging a BLM field officer accidentally started the fire as he drove the Jeep over the desert floor.”

MERCURY CLEAN-UP BEGINS IN BLM AREA IN OREGON. The [Oregon Public Broadcasting](#) (6/9, 3K) reports that “cleanup of a mercury-contaminated site began Monday on a Bureau of Land Management area in Central Oregon.” The Barnes Butte Area will “close for two weeks while crews work to remove mercury contamination from a 1940s mine site.”

BLM ANNOUNCES NEW EASTERN COLORADO RESOURCE MANAGEMENT PLAN. The [Chaffee County \(CO\) Times](#) (6/9, 9K) reports that the BLM “began the process for a new land management plan Monday that will cover the Royal Gorge Field Office boundaries.” The conservation nonprofit Wild Connections is “pushing for the agency to recognize more land with wilderness characteristics, specifically around the Bighorn Sheep Canyon area.” The Eastern Colorado Resource Management Plan will “combine what used to be two different management plans – the Royal Gorge and northeastern management plans.”

BLM ARIZONA WARNS ABOUT EQUINE INFLUENZA. [The Horse](#) (6/9, 5K) reports that “the BLM Arizona office is advising horse and burro owners near the Black Mountain Herd Management Area (HMA), in the northwest part of the state, that their animals could have been exposed to equine influenza (EI) by wild burros.” According to Roger Oyler, BLM Arizona spokesman, “veterinary testing determined that two burros from the HMA that had died were infected with EI in May.” In all, six wild burros tested positive for the virus, Oyler said.

WILDLIFE MANAGERS URGED TO USE CONTRACEPTIVE VACCINE TO MANAGE WILD HORSES. The [Billings \(MT\) Gazette](#) (6/9, 178K) editorializes that the “BLM has been seeking public comment on a plan for the Pryor Mountain Wild Horse Range this fall.” The paper notes that “such horse removals have become rarer, and it’s expected that the fall operation will be one of the last in the Pryors.” According to the editorial, wildlife managers will be able to use a contraceptive vaccine “for keeping the population at carrying capacity — without killing or removing any horses.”

DECISION ON PRAIRIE DOG COULD IMPACT ENDANGERED SPECIES ACT. The [Environment & Energy Publishing](#) (6/9, 705) reports that a ruling in a case involving the Utah prairie dog “shocked environmentalists and emboldened conservatives who had long questioned the take provision’s constitutionality.” Now, “the government’s appeal of the prairie dog decision has become one of the country’s most important environmental cases.” According to the article, “if federal regulators can’t protect the prairie dog on private property, it could undermine protections for countless other species.”

ALASKA FIRE CREWS BATTLING WILDFIRES AT YUKON DELTA NATIONAL WILDLIFE REFUGE. The [AP](#) (6/9, D’oro, 2.29M) reports that “following a winter marked by little snow and warmer temperatures, fire crews on Monday were tackling two large wildfires burning on mostly treeless tundra in the southwest part of the state.” According to the article, “weekend rain helped tamp down the lightning-caused fires that through Monday have burned 63 square miles in the Yukon Delta National Wildlife Refuge, about 50 miles northeast of the commercial hub town of Bethel.”

Additional coverage was provided by the [Bristol \(VA\) Herald Courier](#) (6/9), [US News & World Report](#) (6/8, 907K), the [Washington \(DC\) Post](#) (6/9, Rachel D’oro |, Ap, 5.03M), the [Pittsburgh \(PA\) Tribune-Review](#) (6/9, 682K), [Yahoo! News](#) (6/9, D’oro, 6.18M), [Fox News](#) (6/8, 9.4M), the [Daily Mail \(UK\)](#) (6/9, 5.37M), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (6/9, 1.07M).

ARIZONA SUES OVER LACK OF MEXICAN WOLF PLAN. The [AP](#) (6/9, 2.29M) reports that “the Arizona Game and Fish Department is suing the federal government to force it to develop an updated recovery plan for endangered Mexican grey wolves.” The lawsuit filed Monday seeks to force the FWS “to publish a plan that includes guidelines for when the wolves can be removed from the endangered species list.”

Additional coverage was provided by the [Arizona Daily Sun](#) (6/9, 34K), the [Arizona Republic](#) (6/8, 1.27M), and [KNAU-FM Flagstaff \(AZ\)](#) Flagstaff, AZ (6/9, 3K).

FEDERAL GOVERNMENT SAYS ENBRIDGE TO PAY \$4 MILLION, RESTORE AREA HIT BY 2010 OIL SPILL. The [Detroit News](#) (6/8, Lynch, 523K) reports “four weeks after the State of Michigan filed a \$75 million settlement agreement with the Canadian company responsible for 2010’s Kalamazoo River oil spill, the federal government weighed in with its own settlement which tacks an additional \$4 million onto” the Enbridge’s tab. Obama Administration officials “announced the agreement with the company Monday.” An additional “settlement, under the federal Oil Pollution Act, is expected some time in the future.” In a statement Assistant Attorney General John C. Cruden for the Justice Department’s Environment and Natural Resources Division, said, “This settlement will restore natural resources affected by the 2010 spill — one of the largest inland spills in our history — and compensates the public for natural resource losses resulting from the spill.”

The [MLive](#) (6/9, 803K) reports that Charlie Wooley, deputy regional director for the Midwest Region of the U.S. Fish and Wildlife Service, said, “Working together, the natural resource trustees are using the settlements in tandem to develop a big-picture, comprehensive plan to restore natural resources. This cooperative approach will enhance our ability to return to the public the natural resources lost due to the spill.”

[Reuters](#) (6/8, Stephenson) also provides coverage.

EAST ROCK SCHOOL STUDENTS HELP TO BUILD BIRD HABITAT. The [New Haven \(CT\) Independent](#) (6/9, 4K) reports that “children at East Rock Community Magnet School gathered in a field Monday to witness a ceremony that would certify a habitat right in their backyard as an urban oasis.” The article notes that East Rock is “one of six schools across New Haven to have an outdoor habitat, and is the second school to receive a grant this year that allowed for them to create nature trails, rock and rain gardens, bird feeder stations, butterfly and songbird habitats and meadows with walking paths.” According to the article, “many people and organizations were involved in making this schoolyard habitat possible, including Audubon Connecticut, Common Ground, the Yale Peabody Museum, and the U.S. Fish and Wildlife Service, as well as students and teachers at East Rock School.”

Additional coverage was provided by the [New Haven \(CT\) Register](#) (6/8, 193K).

Securing America’s Energy Future:

Renewable Energy:

ADDITIONAL COVERAGE: BLM PROPOSES TRIMMING SODA MOUNTAIN SOLAR PROJECT. Additional coverage of the revision to the Soda Mountain Solar Project was provided by [Victorville \(CA\) Daily Press](#) (6/8, 1K) and [Penn Energy](#) (6/9, 128).

Onshore Energy Development:

OSM DIRECTOR PIZARCHIK RECOMMENDS WEST VIRGINIA SEEKS FEDERAL HELP IN STUDYING IMPACTS OF MOUNTAINTOP REMOVAL MINING. The [Greenwire](#) (6/8, Subscription Publication) reports that OSM Director Joseph Pizarchik is “recommending that West Virginia seek federal help in reviewing the potential health and environmental impacts of mountaintop removal coal mining.” According to the article, “at issue are numerous peer-reviewed studies in recent years linking the practice to negative health outcomes, including birth defects and cancer.” The article notes that “in recent months – after years of pressure from environmentalists and other critics of the Appalachian coal strip mining – the West Virginia Bureau for Public Health and the Department of Environmental Protection signaled interest in looking into the issue.”

Also reporting on the story is [WYMT-TV](#) Hazard, KY (6/9).

caused the widespread contamination of American drinking water, response has varied in tone with invested parties highlighting the parts of the report that lend credence to their arguments. The [Christian Science Monitor](#) (6/8, Caspari, 539K) reports that oil and gas industry groups praised the finding that widespread contamination has not occurred, with the American Petroleum Institute saying in a statement that “Hydraulic fracturing is being done safely under the strong environmental stewardship of state regulators and industry best practices.” However, environmentalists focused in the caveat that it can and has in a few instances. Sierra Club Executive Director Michael Brune said that the study “confirms what millions of Americans already know – that dirty oil and gas fracking contaminates drinking water.”

[KRTV-TV](#) Great Falls, MT (6/9, Talwani, 3K) reports on its website that Montana is experiencing the same divide, with Montana Petroleum Association executive director Dave Galt saying that it “reaffirms” fracking’s safety, while Montana Environmental Information Center attorney Derf Johnson said that “the biggest take-home message from this study is that contrary to what the petroleum industry has been saying for some time, fracking does indeed contaminate water.”

Both of the leading papers in Washington, DC commented on the report. The [Washington \(DC\) Times](#) (6/9, 641K) editorializes that the EPA, “of all villains,” confirmed advocates’ claims and Hollywood pieces as “fantasy,” adding that the “left-wing prosecution of innovators” will likely move on to accusing fracking of causing earthquakes. Meanwhile, the [Washington Post](#) (6/9, 5.03M) editorializes that in the fight over fracking, “the loudest voices try their best to obscure this essential point: The controversial drilling technique doesn’t need to be banned; it needs to be well regulated.” That’s particularly true in the wake of the release of the EPA’s assessment on fracking’s impact on drinking water, which “supports neither side.”

Study: Not Enough Evidence To Condemn Fracking As Unhealthy. [NPR](#) (6/8, Hurdle, 1.52M) reports that a study written before but released after the EPA determination and published in Health Affairs finds that there isn’t enough data to determine whether fracking is a health hazard or not. It points to the lack of government funding and the reluctance of the industry to disclose the chemicals involved in the process, as well as the long time frames needed for epidemiological studies as reasons why a determination cannot yet be made. While other studies have linked fracking to water contamination, information on pre-fracking baseline data are “often hard or impossible to find.”

WPost: EPA Report Shows Fracking Needs To Be Regulated, Not Banned. In an editorial, the [Washington Post](#) (6/9, 5.03M) says that in the fight over fracking, “the loudest voices try their best to obscure this essential point: The controversial drilling technique doesn’t need to be banned; it needs to be well regulated.” That’s particularly true in the wake of the release of the EPA’s assessment on fracking’s impact on drinking water, which “supports neither side.”

BLM’S NEW PROPOSED FEDERAL COAL LEASES IN POWDER RIVER BASIN CRITICIZED. For “The Blog” of the [Huffington Post](#) (6/9, Hitt, 194K), Mary Anne Hitt, Director, Sierra Club’s Beyond Coal Campaign, writes that the BLM has “just made an under-the-radar decision that threatens to set back U.S. progress on clean energy and climate change” with “a resource management plan that calls for up to 10 billion tons of coal development and thousands of new fracking and oil and gas wells in Wyoming’s Powder River Basin.” According to Hitt, “at a time when the rest of the Obama administration is taking meaningful steps to address climate disruption, the carbon impact of BLM’s proposal is enormous.” She argues that “the U.S. simply cannot afford to keep subsidizing coal mining on public lands, and the Interior Department must not continue to blindly expand the scope of this program without informing itself and the public of the predictable, expensive, and avoidable climate consequences.”

ADDITIONAL COVERAGE: COLOWYO MINE MAY CLOSE. Additional coverage of the Colowyo mine was provided by [Fox News](#) (6/8, 9.4M).

Offshore Energy Development:

VIDEO SHOWS DEEPWATER HABITATS OF TWO SUBMARINE CANYONS. To mark World Oceans Day, the [Independent \(UK\)](#) (6/9, Moodley, 1.01M) highlights “a small clip of some of” the BOEM’s “scientific findings over the last five years in the Atlantic Ocean.” The bureau’s “five-year project, sponsored by the National Oceanographic Partnership Program (NOPP) and funded alongside the U.S. Geological Survey (USGS) and the National Oceanic and Atmospheric Administration (NOAA), studied two mid-Atlantic Canyons 100 miles off the coasts of Virginia and Maryland.” According to the article, “the group managed to study biologically rich regions never previously explored fully, thus making some notable discoveries, such as a high density of corals and varieties not known to previously inhabit the area, as well as over 125 species of fish.”

Additional coverage of World Oceans Day was provided by the [Huffington Post](#) (6/9, Calvelli, 194K) and the [Huffington Post](#) (6/9, Sakashita, 194K).

CLAIMANTS RUSH TO FILE FOR LOSSES FROM BP OIL SPILL. The [AP](#) (6/9, Mcgill, 6.18M) reports “people seeking money for losses from the 2010 BP oil spill rushed to file claims online or lined up outside Gulf Coast claims offices Monday as a midnight filing deadline” neared. The “claims are being filed for compensation under the terms of a 2012 settlement that plaintiffs’ lawyers struck with BP.” There was a spike in filings yesterday, according to Patrick Juneau, the attorney appointed by a federal court overseeing the process. Juneau “said it would take days to arrive at a final figure, noting that claims also were being filed by mail and would be accepted as long as they were postmarked June 8.”

OPPONENTS OF SHELL’S PLANS TO DRILL IN ARCTIC STAGE ELECTRONIC BLOCKADE. The [Seattle Times](#) (6/9, Kamb, 970K) reports “opponents of Shell Oil’s lease of a Port of Seattle terminal to stage the company’s Arctic drilling fleet” are employing “a new tactic in their battle against the oil giant: deluging phone lines and email accounts of firms supporting the company’s stay in Seattle.” Yesterday, shell.noblogs.org “directed protesters to engage in an ‘electronic blockade’ of local firms supporting the oil company.” The blog post said that the goal was to “keep their phones ringing, their voice mail full and their email mounting for eight hours. ... We make our voices an immediate concern because we are tying up the resources they use to do business.”

Seattle Times' reporter reports that Seattle police have taken down a tent that was used as an organization spot by protesters.

CALIFORNIA'S TOP SENATE CANDIDATES VOW ACTION ON OIL SPILLS. The [Los Angeles Times](#) (6/9, Finnegan, 4.03M) reports that the two leading contenders for Democrat Barbara Boxer's Senate seat both made beachfront appearances in the past four days to examine and comment on the May 19 oil spill. "As California's top law enforcement official," state Attorney General Kamala Harris used her visit "to vow swift prosecution of any criminal wrongdoing that her squads of lawyers and investigators might find in the oil spill." Candidate Loretta Sanchez "made the most of her less-powerful perch" to emphasize bipartisanship, and "said she would look into what the federal government can do to prevent oil spills and tighten oversight of the industry's accident prevention practices."

CALIFORNIA REPUBLICANS RESPOND TO PROPOSED BAN ON OFFSHORE DRILLING. [Fox News](#) (6/8, 9.4M) reports that a bill to halt offshore oil drilling off California's coast is coming up against Republican criticism that it could hurt the local economy. Republican state Sen. Jeff Stone told the Los Angeles Times, "This bill, I think, sends the wrong message about oil and gas production in our state,"

SEN. SULLIVAN CRITICIZES WASHINGTON LEADERS FOR MOVES TO BLOCK SHELL'S ALASKA PLANS. In an op-ed for the [Alaska Dispatch News](#) (6/6, 216K), Sen. Dan Sullivan criticizes officials in Washington for recent moves to "Shell's Alaska drilling program." According to Sullivan, "while genuine concerns and actions to protect the environment are laudable, it is not laudable to use bold statements about the environment as a means for political grandstanding that could undermine economic opportunities for Alaska, Washington and the country." He argues that "not only are the actions of Washington's politicians potentially harmful to Alaskans, they threaten the well-being of Washington's businesses, families, the fishing community and union members."

OP-ED: OHIO WOULD BENEFIT FROM ARCTIC DRILLING. In an op-ed for the [Cincinnati Enquirer](#) (6/8, 467K), Jim Samuel, founder and principal of Capitol Integrity Group in Columbus, supports recent decisions by the federal government that could "lead to limited oil and gas exploration this summer in the Chukchi Sea off the coast of Alaska." Samuel argues that Arctic oil development can affect Ohio's "economy in a very direct way" because "Ohio is the nation's second largest producer of raw steel, and the oil and gas industry is a huge consumer of steel products, from drilling platforms to compressors to pipelines." He concludes that "our national security and our economy are pressing reasons to move forward with energy development in the Arctic as it is with our shale energy development here in the Appalachian Basin."

OPPOSITION TO ARCTIC DRILLING SAID BASED ON COST, CLEANUP CHALLENGES. Charlie Kronick of Greenpeace writes to the editors of the [Financial Times](#) (6/8, Subscription Publication, 1.34M) that Arctic oil would not be cost-competitive for Shell to develop and that any spill response would be hampered by extreme weather conditions.

[Empowering Native American Communities:](#)

BUYBACK OFFERS EXTENDED TO MONTANA LAND OWNERS. The [AP](#) (6/9, 72K) reports that "the U.S. government has made offers worth more than \$230 million combined to buy fractionated parcels of land on two Montana American Indian reservations and turn them over to tribal governments, Department of Interior officials said." The article notes that "the offers involving almost 12,000 landowners on the Fort Peck and Fort Belknap reservations are part of a nationwide program that aims to buy land parcels owned by multiple individuals so they can be put to beneficial use." Interior officials said Monday "they had expanded the effort to include properties with buildings, homes and other structures, although only the underlying land would be eligible for purchase."

Additional coverage was provided by the [Lewiston \(ID\) Tribune](#) (6/9, 44K), the [Missoulian \(MT\)](#) (6/9, 118K), the [Seattle \(WA\) Daily Journal of Commerce](#) (6/9, 13K), the [Montana Standard](#) (6/9, 37K), the [Rapid City \(SD\) Journal](#) (6/9, 108K), the [Flathead \(MT\) Beacon](#) (6/8, 15K), the [Great Falls \(MT\) Tribune](#) (6/8, 80K), the [Winfield \(KS\) Daily Courier](#) (6/9, 13K), and the [Everett \(WA\) Herald](#) (6/8, 124K).

GAMING COMPACT BETWEEN NEW MEXICO, GAMING TRIBES APPROVED. The [Farmington \(NM\) Daily Times](#) (6/9, 45K) reports that "the gaming compact between the state of New Mexico and five tribes, including the Navajo Nation, has been approved." The Interior Department "did not take action on the compact, so it was approved Friday, one day after the review window expired, said Jared Touchin, spokesman for the Office of the Speaker."

TRIBES ASK JUDGE TO ALLOW EXPERT TESTIMONY IN TRUST LAND ROW. The [Law 360](#) (6/9, 15K) reports that "the Chickasaw Nation and Choctaw Nation urged an Oklahoma federal judge on Friday to allow expert testimony in a suit alleging the U.S. Department of the Interior failed to protect tribal trust land, arguing their four experts provided useful opinions the court can weigh at trial." The tribes "asked the court to exercise its broad discretion to deny the government's in limine motions to exclude reports and other testimony from two former DOI officials and two other experts."

[Top National News:](#)

OBAMA: NO "COMPLETE STRATEGY" YET IN PLACE TO FIGHT ISIL. The President's comments about the campaign against ISIL, during a press conference at the end of the G-7 summit, are generating largely negative coverage for the White House. Most reports cast the remarks as an acknowledgment that Obama has yet to settle on a military strategy for the ongoing campaign – nearly 10 months after telling reporters, "We don't have a strategy yet." Yesterday, in what the [CBS Evening News](#) (6/8, story 7, 1:50, Rose, 5.08M) described as "a startling admission," the President said, "We don't yet have a complete strategy." Though he went on to say that the strategy isn't "complete" because "it requires commitments on the part of the Iraqis," much of the reporting was unforgiving. As [Politico](#) (6/8, Dove, 1.11M) puts it, "The nuances of military planning don't make for good sound bites," and "to critics, this kind of statement is Obama admitting exactly what they accuse him of: that he's a president neither prepared for what he's facing in the Middle East nor willing to do what now needs to be done."

[ABC World News](#) (6/8, story 8, 0:50, Muir, 5.84M), for example, referred to “an amazing admission,” since he “said the same thing last August: We have no strategy. It’s been 10 months since he sent American forces back into action in Iraq and” on Monday he said “the same thing: no strategy to win.” The [Los Angeles Times](#) (6/9, Parsons, 4.03M) also describes Obama as “acknowledging that the US-led coalition does not yet have a ‘complete strategy,’” and [Roll Call](#) (6/8, Dennis, 99K) reported that “nearly a year after” saying “he didn’t yet have a strategy to defeat ISIS,” a “frustrated” Obama “said he needs the Pentagon and the Iraqis to form” one.

[The Blaze](#) (6/8, Lucas, 1.87M), likewise, said “Obama had a similar assessment last August,” while [The Hill](#) (6/8, Fabian, 533K) calls the comments a “surprising admission nine months into the US-led coalition’s campaign.” [TIME](#) (6/8, Rhodan, 19.57M) observed on its website that “Obama’s previous statements about not having a plan to defeat ISIS have been the source of political contention for quite some time.”

The [Daily Caller](#) (6/8, Wenig, 366K) said of the President’s comments, “He seems to contend that his strategy (that there is no strategy) depends on the participation and willingness and proficiency of actors otherwise outside of his control – the Iraqis. Odd thing is, as journalists were quick to point out, Obama said pretty much the same exact thing a year ago...except then he blamed Congress.”

The [Washington Times](#) (6/8, Wolfgang, 641K) indicates that “critics were quick to pounce” yesterday, with House Majority Leader McCarthy saying that “Obama’s failure to develop a ‘complete strategy’ is the reason why the Islamic State continues to gain ground and retain control of large sections of Iraq and Syria.” Kristin Roberts, writing for [National Journal](#) (6/8, Subscription Publication, 156K), indicated that “according to Obama, arresting ISIS is an Iraqi responsibility,” and “this is dishonest.” While “the truth is that his ambivalence reflects the collective churning of the American gut...we’ve seen this movie before, and we didn’t like the ending.”

However, Jonathan Allen wrote for [Vox](#) (6/8, 839K) that while “some news outlets have played” the President’s comment “as a gaffe that reveals Obama’s own doubts about his ability to defeat ISIS,” in fact “that’s not what he said.” Added Allen, “What Obama said is that there’s no full strategy yet for training and equipping Iraqi soldiers because ‘it requires commitments on the part of the Iraqis.’” That is “different than saying he has no strategy for ISIS.” On [Foreign Policy](#) (6/8, 449K), John Hudson and Paul McLeary made the same point, “Obama said the United States and its allies must accelerate the training of the Iraqi security forces.”

In fact, the [New York Times](#) (6/9, Davis, Shear, Subscription Publication, 12.24M) reports, Obama said ISIL’s “recent gains indicated a need for a shift in strategy.” The [AP](#) (6/9, Pace, Pickler), meanwhile, says that he acknowledged “military setbacks,” but “touted ‘significant progress’ in areas where the US has trained Iraqis to fight.” [Reuters](#) (6/9, Mason) quotes the President as saying, “We want to get more Iraqi security forces trained, fresh, well-equipped and focused and (Prime Minister) Abadi wants the same thing so we’re reviewing a range of plans for how we might do that.” The [Wall Street Journal](#) (6/9, Nelson, Subscription Publication, 5.68M) notes that Obama added, “When a finalized plan is presented to me by the Pentagon, then I will share it with the American people.”

State Department spokesman John Kirby was interviewed on [CNN’s Situation Room](#) (6/8, 554K), where he defended the President’s comments, “I think what the President was referring to is the train and equip strategy isn’t complete, because there still needs to be commitment from the Iraqi side. You need more trainees, and we’re working with them on that. ... But make no mistake, we have been training literally hundreds of Iraqi troops and units to get out there in the field and fight and those that we have trained and held and equipped have done well out there.”

In an editorial, the [Wall Street Journal](#) (6/9, Subscription Publication, 5.68M) mocks the President’s comment and traces the problems in the fight against ISIL to his decision to withdraw all troops from Iraq in 2011. To the Journal, that decision signaled to Sunni fighters that the US would not be a committed partner to them in the fight against extremism.

[McClatchy](#) (6/9, Prothero, 32K) reports that “US officials say the bombing campaign has killed more than 10,000 Islamic State fighters and insist that the group controls 25 percent less territory in Iraq than it did when the US began bombing Islamic State positions there 10 months ago.” However, “the casualty numbers are impossible to confirm independently and suggest that, at best, the Islamic State is a far larger organization than American officials initially imagined.” Moreover, “the number of people living under Islamic State rule has grown since the US bombing began.”

“Defense Officials”: Baghdad Not Sending Recruits To At Least One US Training Site. [The Hill](#) (6/8, Wong, 533K) reports “the US mission in Iraq has stalled at one of five coalition training sites because the central government has not been sending new recruits, according to defense officials.” The Hill adds that “Baghdad has not identified or sent any new recruits to the Al-Asad air base in western Iraq for as many as four to six weeks, defense officials said Monday.”

Awkward Encounter Between Obama And Abadi Noted. The [CBS Evening News](#) (6/8, story 7, 1:50, Rose, 5.08M) reported last night that “strains in the relationship were plain as the Iraqi prime minister tried to steal a moment of the President’s time after the ceremonial G-7 photo.” CBS added that “immersed in conversation with other leaders, the President never turned around,” and Prime Minister “Abadi and his translator finally walked away in frustration.”

[NBC Nightly News](#) (6/8, story 6, 1:25, Jansing, 7.86M) reported that Abadi “looked like the ultimate outsider trying to make his way in.” He was “eager to get...Obama’s attention: sitting, standing, hovering. It looked like a snub, but looks were deceiving,” and Abadi “got what he came for: a promise of more help to defeat surprisingly resilient ISIL fighters.” The [AP](#) (6/9) also recounts the scene, describing it as “awkward.”

State Spokesman: ISIL Campaign Likely To Last “Three To Five” Years. Asked about how long the campaign against ISIL would take on [CNN’s Situation Room](#) (6/8, 554K), State Department’s Kirby said, “We think it’s a multiyear effort, probably three to five is the best estimate that people have. It’s going to take a while.” Regarding cooperation with the Kurds, Kirby stated that although “all the arming and equipping is going through the government,” the US does “have dialogue across the spectrum of Iraqi society.”

may consider creating national guard units to combat the [Washington Post](#) (6/8, Carney, 533K) reported in its “Floor Action” blog that in an interview with The Joe Elliot Show on Monday, Senate Majority Leader McConnell said that the fight against ISIL will have to be led by local Iraqi forces, not US troops. McConnell said, “In the end the boots on the ground there are going to have to be local boots on the ground, not ours, to engage in combat, to take these areas of Iraq back. ... I think all we can do at this point is provide the kind of training that should have been done on an ongoing basis for the Iraqi military.” McConnell also “suggested that the current situation in Iraq could have been avoided if...Obama had left a residual force after the war ended.”

McConnell: Iraqi Forces Must Lead Fight Against ISIL. [The Hill](#) (6/8, Carney, 533K) reported in its “Floor Action” blog that in an interview with The Joe Elliot Show on Monday, Senate Majority Leader McConnell said that the fight against ISIL will have to be led by local Iraqi forces, not US troops. McConnell said, “In the end the boots on the ground there are going to have to be local boots on the ground, not ours, to engage in combat, to take these areas of Iraq back. ... I think all we can do at this point is provide the kind of training that should have been done on an ongoing basis for the Iraqi military.” McConnell also “suggested that the current situation in Iraq could have been avoided if...Obama had left a residual force after the war ended.”

OBAMA SAYS HIGH COURT SHOULD NOT HAVE TAKEN UP SUBSIDIES CASE. Media reports cast the President’s comments about the upcoming ruling on the ACA subsidies provision as a preemptive rebuke of the US Supreme Court. The [New York Times](#) (6/9, A1, Shear, Subscription Publication, 12.24M), for example, calls Obama’s comments on the case his “most pointed yet,” while the [National Journal](#) (6/8, Scott, Subscription Publication, 156K) says the President “sought...to portray the...lawsuit...as baseless litigation founded in political animus.” [Politico](#) (6/8, Wheaton, 1.11M) reports that Obama was expressing “deep frustration with the...Supreme Court,” and the [Washington Times](#) (6/9, Curl, 641K) indicates that he “took a swipe at” it. To [The Hill](#) (6/8, Fabian, 533K), the President uttered “his toughest and bluntest comments to date,” as his “frustration that the federal courts could unwind much of his legacy burst into public display.”

The [Blaze](#) (6/8, Lucas, 1.87M) quoted Obama as saying of the court potentially striking down subsidies, “This would be hard to fix,” but “fortunately, there is no reason to have to do it. It doesn’t need fixing.” [Reuters](#) (6/9, Mason) notes the President also said, “Under well-established precedent, there is no reason why the existing (healthcare) exchanges should be overturned through a court case.” The [Blaze](#) (6/8, Lucas, 1.87M) reported that Obama “added that the health care law is working, and is getting less criticism now.” Added Obama, “We haven’t had a lot of conversation about the horrors of Obamacare because none of them have come to pass. ... None of the predictions about how this wouldn’t work have come to pass.”

The [AP](#) (6/8) reports that Obama stated that “it has been well-documented that Congress never intended to exclude people who went through the federal exchange.” In fact, the [New York Daily News](#) (6/8, Chasan, 3.79M) indicated that he “called the challenge bizarre,” while the [New York Times](#) (6/9, A1, Shear, Subscription Publication, 12.24M) notes that he went on to say that a ruling striking down the subsidies “would be a ‘contorted reading’ of the Affordable Care Act.” The case, he added, “probably shouldn’t have even been taken up.” Obama also “warned that only Congress – led by Republicans who opposed the health care law – could prevent that disarray if the court invalidates the subsidies.” With “a slight smirk,” the President remarked, “Congress could fix this whole thing with a one-sentence provision.” [Bloomberg Politics](#) (6/9, Kapur, 161K), however, reports that “Obama had barely finished proposing an idea to deal with a far-reaching Supreme Court decision on Obamacare before Republicans fired back with a categorical response: Not gonna happen.”

The [Wall Street Journal](#) (6/9, Tau, Subscription Publication, 5.68M) quotes Sen. John Barrasso as saying, “Instead of bullying the Supreme Court, the president should spend his time preparing for the reality that the court may soon rule against his decision to illegally issue tax penalties and subsidies on Americans in two-thirds of the country.” [The Hill](#) (6/8, Ferris, 533K) noted that Barrasso also warned that “the GOP will not pass ‘a so called ‘one-sentence’ fake fix.’”

The [Huffington Post](#) (6/8, Marans, 194K) reported that “if the court rules in favor of a narrow interpretation of that provision of the law, 6.4 million people in 34 states will lose their subsidies, leaving many unable to afford insurance.” Moreover, noted [NPR](#) (6/8, Rovner, 1.52M), “an analysis from the Kaiser Family Foundation found that subsidized enrollees would face an average effective premium increase of 287 percent if the court rules against the administration.” NPR also reported that “Supreme Court decisions generally take effect 25 days after they are issued,” and that “could mean subsidies would stop flowing as soon as August, assuming the decision is issued later this month, as expected.”

According to the [Los Angeles Times](#) (6/9, A1, Levey, 4.03M), “states have made few, if any, concrete plans to deal with the chaotic fallout potentially just weeks away,” with “just two states whose residents are in jeopardy – Pennsylvania and Delaware” – outlining “strategies for preserving subsidies.”

McConnell: GOP Will Unveil Backup Plan “If Plaintiff Is Successful.” [The Hill](#) (6/8, Carney, 533K) reported that Senate Majority Leader Mitch McConnell yesterday “declined to discuss the details of a Republican backup plan for ObamaCare, saying that the party will be ready if the Supreme Court rules against the healthcare law.” Interviewed on The Joe Elliott Show, McConnell said, “We’ll have a plan that makes sense for the American people. ... If the plaintiff is successful it will require some addressing of the issue, and if that were to happen we’ll be ready to announce our proposal.”

PPP Poll: Two-Thirds Back Subsidies. [The Hill](#) (6/8, Ferris, 533K) reports that “two-thirds of people hope that ObamaCare subsidies will be upheld in court later this month, including nearly 50 percent of Republicans, according to a new” PPP poll. Writing for [Salon](#) (6/8, 1.16M), however, Jim Newell noted that “the outcome of King v. Burwell will not be decided by popular vote. It will most likely come down to what side of the bed a certain Chief Justice woke up on after oral arguments a few months ago.”

Reporting on a Washington Post-ABC News poll, meanwhile, the [Washington Times](#) (6/9, Howell, 641K) notes that it shows that “54 percent of people oppose the law itself, a six-point increase in dissatisfaction from last year. Support for the law rests at 39 percent.”

OBAMA’S HOUSE ALLIES EXPECTED TO ABANDON HIM ON TPA. The [Christian Science Monitor](#) (6/8, Kiefer, 539K) reported that many of the President’s “most loyal foot soldiers are expected to abandon him” when the House votes on whether to grant him trade promotion authority. While the President and top officials are lobbying the black caucus, “which makes up about a quarter of

House Democrats, for many members, trade is in a category of its own, and some members of the caucus say labor unions are forcing the issue, taking away whatever advantage Obama might have." Currently, fewer than "20 Democrats have publicly sided with Obama," and with fast track needing 218 votes to pass, the White House "is looking under every Democratic rock for votes." [The Hill](#) (6/8, Needham, 533K) said that on Monday, Rep. Suzan DelBene "became the 19th House Democrat to say she would back fast-track trade authority for President Obama, according to The Hill's Whip list."

[Politico](#) (6/8, Bresnahan, 1.11M) reported that while fast-track supporters remain "confident they can secure the votes needed," House Majority Leader McCarthy "and other GOP leaders have not yet committed" to bringing up the measure by the end of the week, "a sign that while pro-trade leaders in the House are closing in on the 217 ayes they need to pass the bill, the contentious vote remains very close." Politico added that GOP aides "predicted a decision by Wednesday on whether the measure would come up for consideration in the House this week, signaling it does not have the votes to pass quite yet."

Labor Plans More Ads To Pressure Democrats On Fast Track. In a separate story, [Politico](#) (6/8, French, 1.11M) said that labor is making "a final push to scuttle" the fast track legislation, "by pressuring on-the-fence Democrats to vote against the measure when the House takes it up." The Coalition to Stop Fast Track said Monday that "labor leaders, including the AFL-CIO, will buy TV ads in congressional districts nationwide where Democrats have announced intentions to vote for or are still deciding whether to support" the bill. Ads "will run in California, Colorado, Connecticut, Delaware, Florida, Louisiana, Massachusetts, Nebraska, North Carolina, Texas and Washington." Politico added that progressive will "hold a protest outside Minority Leader Nancy Pelosi's San Francisco office on Tuesday to urge the California Democrat to oppose fast-track."

WSJournal: TPA Opponents Clouding The Facts About Trade Deficit. A [Wall Street Journal](#) (6/9, Subscription Publication, 5.68M) editorial questions claims made by Rep. Rosa DeLauro and other opponents of the trade promotion legislation, arguing that they are clouding the facts about the US trade deficit because of the strong evidence that free trade improves American living standards.

Editorial Wrap-Up:

NEW YORK TIMES. "The Supreme Court's Jerusalem Passport Case." The [New York Times](#) (6/9, Subscription Publication, 12.24M) editorializes in favor of the Supreme Court's ruling in the Jerusalem passport case, because "decisions about recognizing foreign states and their territorial claims have long been the province of the president for reasons of both 'common sense and necessity,' as [Justice Anthony] Kennedy wrote," and thus "the court was right to keep them there."

"Democracy Wins In Turkey." A [New York Times](#) (6/9, Subscription Publication, 12.24M) editorial says the "weeks ahead are likely to be unstable and uncertain," in Turkey, "and new elections may be necessary if a coalition government cannot be formed." But even if one is formed, it warns that "formidable challenges remain: a stalled economy, two million Syrian refugees living in camps within Turkey's borders, the Islamic State just over the horizon in Syria and Iraq, and troubled relationships with the Turkish Kurds and the West that need repairing. The country can ill afford protracted indecision."

"What Doctors Say About Transgender Troops." A [New York Times](#) (6/9, Subscription Publication, 12.24M) discusses the AMA's resolution that there is "no medically valid reason" for barring transgender troops, writing, "While the Defense Department's health care regulations are designed to 'maintain and restore health,' the statement notes that military doctors are now barred from providing 'safe, effective and medically necessary' treatment to service members who are transgender." The Times calls on the President and Defense Secretary Carter to "move swiftly to repeal that discriminatory policy so that thousands of transgender Americans in uniform have the option to serve openly."

WASHINGTON POST. "Testing The Waters." In an editorial, the [Washington Post](#) (6/9, 5.03M) says that in the fight over fracking, "the loudest voices try their best to obscure this essential point: The controversial drilling technique doesn't need to be banned; it needs to be well regulated." That's particularly true in the wake of the release of the EPA's assessment on fracking's impact on drinking water, which "supports neither side."

"Turkey's Decisive Rejection." A [Washington Post](#) (6/9, 5.03M) editorial says it "remains to be seen whether" Turkish President Recep Tayyip Erdogan, "who has dominated Turkish politics for the past dozen years will accept his defeat," and he "may be tempted to maneuver around his rebuff." The Post says a "period of turmoil could, in the end, benefit Turkey if the result is to defang an autocracy-in-the-making. But better that Mr. Erdogan accept now that he must change course."

"A Is For Assessment."

WALL STREET JOURNAL. "Return Of The Speech Police." The [Wall Street Journal](#) (6/9, Subscription Publication, 5.68M) editorializes about lobbying efforts to persuade the Justice Department and the Federal Election Commission (FEC) to investigate former Florida Governor Jeb Bush and his Right to Rise Super PAC for alleged violations of campaign finance law. Last month, the Campaign Legal Center and Democracy 21 asked Attorney General Loretta Lynch to appoint a special investigator to probe whether Bush "is raising and spending money as a candidate." The Journal argues that under Federal law, a politician is not a candidate for Federal office until a declaration of intent to seek the office, and when more than \$5,000 is raised or spent on the candidacy. The Journal also contends that Bush's PAC may lawfully raise money before he announces his candidacy.

"It Requires Commitments." In an editorial, the [Wall Street Journal](#) (6/9, Subscription Publication, 5.68M) mocks the President's comment that "We don't yet have a complete strategy" against ISIL, and traces the problems in the fight against ISIL to his decision to withdraw all troops from Iraq in 2011. To the Journal, that decision signaled to Sunni fighters that the US would not be a committed partner to them in the fight against extremism.

"Trade Deficit Myths." A [Wall Street Journal](#) (6/9, Subscription Publication, 5.68M) editorial questions claims made by Rep. Rosa

Business and other opponents of the trade promotion legislation, arguing that they are obscuring the facts about the US trade deficit because of the strong evidence that free trade improves American living standards.

DOI in the News:

MEDIA: MANY UNKNOWNNS REMAIN REGARDING CYBERATTACK AGAINST OPM. The day after the Administration announced that suspected Chinese hackers breached the Office of Personal Management, placing the personal data of up to four million current and former Federal employees at risk, reporting continued to focus on the potential impact and large-scale nature of the attack, as well as theories about the origins and purpose. Reporting almost universally noted that the government is still unsure of

the scope of the attack and the presence of a plethora of other unknowns. While noting the likely connection to China and possible security implications, media also included statements by the White House and lawmakers, which mostly focused on the need for legislative action to deter and prevent similar attacks in the future. The major print dailies covered the story and the three network broadcasts combined for five minutes and 15 seconds of reporting.

On [NBC Nightly News](#) (6/5, story 5, 2:15, Holt, 7.86M) , Andrea Mitchell reported that US officials and outside experts say the cyberattack against OPM has “China’s cyber fingerprints.” Meanwhile, the [AP](#) (6/6, Dilanian, Alonso-Zaldivar) reports the “giant hack” of personnel files “is being treated as the work of foreign spies who could use the information to fake their way into more-secure computers and plunder U.S. secrets.” Federal employees were told by video on Friday “to change all their passwords, put fraud alerts on their credit reports and watch for attempts by foreign intelligence services to exploit them.”

The [Washington Post](#) (6/6, Nakashima, 5.03M) reports China “is building a massive database of Americans’ personal information by hacking government agencies and U.S. health-care companies.” Hackers “working for the Chinese government have compromised the networks” of OPM, which “holds data on millions of current and former federal employees, as well as the health insurance giant Anthem, among other targets,” according to officials.

On the [CNN’s Situation Room](#) (6/5, 554K) , Michelle Kosinski reported that “this is looking like an act of cyber warfare at this point.” The [Los Angeles Times](#) (6/6, Bennett, Serrano, 4.03M) reports the investigation into the cyberattack “is proceeding on the theory that the hack was directed by the Chinese government and aimed at uncovering sensitive, personal information that could” be utilized in efforts to “blackmail or bribe government employees to obtain secrets.” Officials said that social security numbers, email addresses, and job performance reviews were among the information “siphoned out of the computer servers.” The Times notes “there is no indication so far that classified servers were breached.”

The [Washington Post](#) (6/6, Rein, 5.03M) “Federal Eye” blog notes that the information reached by hackers is contained “in a data center at the Department of the Interior.” The Interior Business Center “manages personnel systems – including payroll and security information – and finances for 150 federal agencies offices.” According to the Post, “the database contains a trove of data on every civilian employee in the government.” According to [Reuters](#) (6/6, Shalal, Spetalnick) and [The Hill](#) (6/5, Bennett, 533K), security clearance and background check data going as far back as 1985 might have been exposed in the cyberattack. The Hill quotes an “unnamed official” as saying, “This is deep. This means that they potentially have information about retirees, and they could know what they did after leaving government.”

Jeff Pegues reported for the [CBS Evening News](#) (6/5, story 4, 1:45, Rose, 5.08M) that the hacking “bears similarities to earlier attacks against healthcare companies Anthem Blue Cross and Premera.” All of which “appear aimed at personnel records and not financial information.” The [New York Times](#) (6/6, A1, Perlroth, Sanger, Davis, Subscription Publication, 12.24M) reports the “multiple attacks” started last year and “appear to mark a new era in cyberespionage with the theft of huge quantities of data and no clear motive for the hackers.” Similarly, [The Hill](#) (6/5, Bennett, 533K) reported the data stolen in the cyberattacks against the healthcare firms “has not really been monetized on the dark web,” said John Hultquist, iSight’s senior manager of online espionage threat intelligence. Hultquist said hackers “may have the information to impersonate them or may be even able to exploit them based on the fact that they have some sensitive information.”

The [Wall Street Journal](#) (6/6, Barrett, Lee, Subscription Publication, 5.68M) reports officials were on Friday attempting to determine what information was compromised. Similarly, [USA Today](#) (6/6, Jackson, 5.01M) reports that White House officials are “under fire over” the cyberattack and said Friday “they are still trying to learn the scope” of the breach. White House spokesman Josh Earnest said, “There is still a lot of work that needs to be done to get to the bottom of this particular incident.” Earnest and other officials indicated “the U.S. is speeding up plans for additional defenses to deter hackers.” According to Earnest, “‘The threat is ever evolving’, so it is critical that the government adapt its defenses to ‘reflect that ever-evolving risk.’”

The [Washington Times](#) (6/6, Boyer, 641K) reports that Earnest said President Obama will “of course” still host Chinese President Xi Jinping for an official state visit in September. The Times says the cyberattack makes it “likely” the meeting will “include more discussions about China’s role in cyberattacks.” Earnest said the President “has frequently, including in every single meeting...raised China’s activities in cyber space as a significant source of concern.”

The [Washington Post](#) (6/6, Denyer, 5.03M) reports that China “dismissed American computer hacking allegations on Friday,” and Pierre Thomas reported for [ABC World News](#) (6/5, story 8, 1:15, Muir, 5.84M) that “the Chinese have denied the allegations, even saying the US should ‘show more trust and participate in more cooperation.’” Similarly, the [AP](#) (6/6, Mader) notes that China responded by “saying such claims are unproven and irresponsible,” adding “that it wishes the United States would trust it more.” Chinese Foreign Minister spokesman Hong Lei said he “hopes the U.S. would be ‘less suspicious and stop making any unverified allegations, but show more trust and participate more in cooperation.’” [The Hill](#) (6/5, Bennett, 533K) quoted Zhu Haiquan, the spokesman for the Chinese Embassy in Washington, as saying, the accusations are “not responsible and counterproductive.” Zhu added, according to Chinese news outlet Xinhua, that “Cyber attacks conducted across countries are hard to track and therefore the source of attacks is difficult to identify.”

Earnest and some members of Congress called on the legislature to take action to help deter breaches such as the one that occurred at OPM. [The Hill](#) (6/5, Kamisar, 533K) reported that Earnest said Congress must “come out of the Dark Ages” and begin to address the need to protect the country from cyberattacks. Earnest said, “We need not just improved efforts on the part of the federal government, but improved coordination with the private sector on these matters, and that effort to coordinate requires congressional action.” Corey Fritz, a spokesman for House Speaker Boehner “fired back at the White House” by highlighting the House passed two cybersecurity bills focused on data sharing. Fritz said, “Where is the leadership?,” adding that in the aftermath of the cyberattack, the Administration is placing “blame” on “anyone but itself. It’s absolutely disgusting.”

[The Hill](#) (6/5, Hensch, 533K) reported Sen. John McCain “argued Friday that public and private data are both vulnerable to breaches if Congress doesn’t act.” McCain urged action, saying, “We cannot sit idly-by, accepting a situation in which persistent cyber-attacks

and data integrity are the new norm. [Washington Post](#) (6/6, 5.03M) reports that Rep. Adam Schiff also notes that he hopes the breach might push the Senate to pass cybersecurity legislation that has already cleared the House.” Schiff said in a statement, “It’s clear that a substantial improvement in our cyber databases and defenses is perilously overdue.”

In an editorial, the [Washington Post](#) (6/6, 5.03M) asserts “What’s so disconcerting about the breach” of the computer system of the Office of Personnel Management, “is that it is just one in a series of intrusions into vital computer systems of the U.S. government,” adding, “We hope the breach at the OPM...awakens the administration and Congress to the need for a robust strategy that puts safeguards in place and promises consequences for the people and countries who try to violate them.”

GOP Lawmakers Pan Federal Government For Failing To Protect Data. The recently reported breach of Office of Personnel Management data by hackers drew attention on the Sunday shows, and much fire was directed at the federal government for its failure to protect data. Lawmakers of both parties are also calling for a strong US response, both defensively and offensively.

On [Fox News Sunday](#) (6/7, Wallace), House Homeland Security Committee member Peter King and House Intelligence Committee ranking member Adam Schiff talked about the recent cyberattack against the OPM. King stated, “The House has passed two bills in recent months, which would begin to address some cybersecurity issues, but more has to be done. I think we also have to find a way effectively use of all our intelligence and surveillance apparatus, even if that involves the NSA and others. We’re talking about nation states here.” Schiff added that the stolen data is “very valuable information. ... One thing we have to do, in addition to defending against these attacks, is find out how we can go on offensive and deter future attacks.”

House Homeland Security Committee Chairman Michael McCaul said on [CBS’ Face The Nation](#) (6/7, Dickerson, 2.64M) that the breach is “very significant. We look at the threat indicators who has motive and intent to steal this data. It’s a huge data mining process that targeted the federal government. In my judgment, this was an attack by China against United States government. It qualifies as espionage and that raises all sorts of issues.”

House Majority Whip Steve Scalise said on [Fox News Sunday Morning Futures](#) (6/7), “This is a typical example of the President having something happen right under his nose. ... This is the second attack at OPM. This is a federal agency that the President has authority over, not Congress. Obviously, we’re going to look into this [cyberattack] at the Congressional level, but with four million more federal employees [impacted], the President ought to be working with us to do more. We need to go after China and these other countries that are trying to steal data.”

Meanwhile, the [Wall Street Journal](#) (6/8, Subscription Publication, 5.68M), in an editorial, condemns the OPM for its failure to do more to protect the data, despite previous breaches and repeated warnings. The Journal condemns the White House’s focus on private-sector cybersecurity, arguing the primary focus for the federal government should be in protecting its own data. The Journal says that the US is in a cyberwar, and needs to start acting like it.

INTERIOR OFFICIALS VISIT WEST VIRGINIA MINING SITES. The [AP](#) (6/5, 641K) reports that Interior Secretary of Interior Sally Jewell is visiting surface mining and mine land reclamation projects in West Virginia.” Along with Joseph Pizarchik, director of the Office of Surface Mining Reclamation and Enforcement,” Jewell will “receive briefings from state and industry officials on production and reclamation technologies.”

During her visit on Friday, Jewell said “Obama administration officials aren’t ‘turning our backs on coal,’” the [AP](#) (6/6, Mattise, 2.29M) reports. Jewell also “mentioned the \$55 million Obama proposed in his budget for grants for ailing coal communities.” The article notes that “many elected officials in West Virginia loathe Obama policies that affect coal and aim to stem global warming.”

The [Charleston \(WV\) Gazette](#) (6/5, 31K) reports that “the federal Office of Surface Mining plans to recommend that the National Academy of Sciences review a series of studies that have found that residents living near mountaintop removal mining operations face increased risks of serious illnesses and premature death.” OSM Director Joseph Pizarchik said Friday that “his agency would propose asking for the academy’s expert assistance in response to a request from West Virginia Department of Environmental Protection officials for help in examining the studies.” Pizarchik said, “From the standpoint of those studies, those are obviously going to have to be validated and looked at. Those people have the types of expertise to be able to look at those studies and make an informed decision based on an analysis of that on how best to proceed.”

Also providing coverage are the [Steubenville \(OH\) Herald Star](#) (6/8, 32K), the [Times West Virginian](#) (6/8, 30K), the [Bluefield \(WV\) Daily Telegraph](#) (6/8, 45K), the [Elkins \(WV\) InterMountain](#) (6/8, 30K), the [Wheeling \(WV\) Intelligencer](#) (6/8, 74K), the [Columbus \(IN\) Republic](#) (6/8, 75K), [Yahoo! News](#) (6/5, Mattise, Press, 6.18M), [Yahoo! Finance](#) (6/8, 5.69M), the [Houston \(TX\) Chronicle](#) (6/6, 2.29M), the [Washington \(DC\) Times](#) (6/6, 641K), [West Virginia MetroNews](#) (6/8, 16K), [WBNS-TV Columbus \(OH\)](#) Columbus, OH (6/7, 184K), [WSAZ-TV Huntington \(WV\)](#) Huntington, WV (6/8, 51K), and [WSAZ-TV Huntington \(WV\)](#) Huntington, WV (6/8, 51K).

Additional coverage was provided by the [Marietta \(OH\) Times](#) (6/8, 26K), [WOWK-TV](#) Charleston, WV (6/7, 9K), the [Bluefield \(WV\) Daily Telegraph](#) (6/7, 45K), and [West Virginia Public Broadcasting](#) (6/7).

SECRETARY JEWELL JOINS CABINET MEMBERS PRESENT AT BEAU BIDEN’S FUNERAL. In a story about those in attendance at the funeral for Beau Biden on Saturday, [The Hill](#) (6/6, Hensch, 533K) “Briefing Room” blog mentioned that Interior Secretary Sally Jewell was but one cabinet member present at the ceremony. The [Wilmington \(DE\) News Journal](#) (6/7, Blackwell, 352K) reports with similar coverage.

FEDERAL AGENCIES TO ASSESS CLIMATE CHANGE’S IMPACT ON STATES. [KSL-TV](#) Salt Lake City (6/8, 1.07M) reports that “the Intermountain Region of the U.S. Forest Service is beginning a lengthy, first effort to craft a threat assessment from climate change, identifying specific vulnerabilities in the area that spans 34 million acres in Utah, Nevada and portions of four other states.” According to the article, “during this study phase of what is called the Intermountain Adaptation Partnership, the Forest Service and partners like the National Park Service, universities and the Interior Department’s Southwest Climate Science Center will look at

species and ecosystems that are challenged by a changing climate.

LAKEPORT CITY COUNCIL SUPPORTS PROTECTION OF BERRYESSA SNOW MOUNTAIN REGION. The [Lake County \(CA\) Record-Bee](#) (6/6, 21K) reports that “Lakeport’s City Council issued a resolution supporting the permanent protection of the Berryessa Snow Mountain Region.” Also, Lakeport Mayor, Martin Scheel said, “I’m proud to support the proposed Berryessa Snow Mountain National Monument. This designation will stimulate local economies and protect our natural and recreational resources. Lakeport and many other surrounding cities will benefit from protecting these lands.”

ADDITIONAL COVERAGE: TEN NEW NATIONAL RECREATION TRAILS DESIGNATED. Additional coverage of the ten new trails designated for national recognition as part of the National Trails System was provided by the [Spokane \(WA\) Spokesman-Review](#) (6/5, 172K), the [Sno Valley \(WA\) Star](#) (6/5), the [Glens Falls \(NY\) Post-Star](#) (6/7, 98K), the [National Parks Traveler](#) (6/7, 989), the [Seattle \(WA\) Post-Intelligencer](#) (6/5, 822K), the [Biloxi \(MS\) Sun Herald](#) (6/6, 127K), [KTVN-TV Reno \(NV\)](#) Reno, NV (6/8, 1K), and the [Las Vegas Sun](#) (6/4, 176K).

ADDITIONAL COVERAGE: WHITE HOUSE NOMINATES INTERIOR INSPECTOR GENERAL. Additional coverage that the White House has nominated a full-time inspector general for the Interior Department was provided by the [Washington \(DC\) Times](#) (6/5, Boyer, 641K) and [The Hill](#) (6/8, Henry, 533K).

CONGRESS URGED TO FULLY FUND LWCF. In an op-ed for the [Southern Maryland Newspapers](#) (6/5, 4K), Interior Secretary Sally Jewell and Rep. Steny Hoyer warn that the Land and Water Conservation Fund Act is in “jeopardy.” They note that “two weeks ago, we held an event at Douglas Point to highlight the importance of the Land and Water Conservation Fund.” The authors say “our message is simple: A half-century ago, Congress made the historic commitment to the American people to offset the impact of development on our lands and waters with smart investments in their conservation and restoration. It is time for Congress to reaffirm this commitment and ensure that our natural and historic resources are protected for generations to come.”

In an editorial, the [Lincoln \(NE\) Journal Star](#) (6/8, 267K) also supports reauthorizing the fund.

ARGUMENTS FOR PUBLIC LAND TRANSFER ANALYZED. In a piece for the [Idaho Statesman](#) (6/5, 199K), Rocky Barker writes that the Campaign for Accountability is “asking Utah, Montana and Arizona to investigate the primary proponent of public land transfer to western states for fraud.” Barber notes that when he “hiked with Interior Secretary Sally Jewell recently in the Boise Foothills, which remain open space instead of development primarily because of federal ownership, she made another argument that hasn’t been heard much.” Jewell said, “Just a takeover of public land by states is really cheating the American taxpayer who currently owns these lands.” However, in conclusion, Barber questions the validity of the fraud argument.

CONGRESS URGED TO TREAT WILDFIRES LIKE DISASTERS. Writing for the [Klamath Falls \(OR\) Herald And News](#) (6/8, 45K), Pat Bushey urges Congress to support the effort “to get the worst wildfires declared federal disasters eligible for federal disaster funds.” Bushey doubts that anybody “can argue that the massive fires that have burned through rural communities in recent years don’t constitute disasters.” He concludes that “they should be treated that way by the federal government without cutting into thinning programs that lessen the risk of future wildfires.”

America’s Great Outdoors:

National Park Service:

USS ARIZONA MEMORIAL REOPENS AFTER DOCK REPAIRED. The [AP](#) (6/5, Mcavoy, 2.29M) reports that “visitors may visit the USS Arizona Memorial once more now that the Navy has finished repairing a dock damaged in a mishap involving a hospital ship and two tugboats, the National Park Service said Friday.” The NPS and Navy “had to suspend tours to the Pearl Harbor landmark for more than a week after last Wednesday’s incident.” According to the NPS, “the Navy finished repairing the dock on Thursday, the park service said.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (6/5, Audrey Mcavoy |, Ap, 5.03M), the [Washington \(DC\) Post](#) (6/5, Audrey Mcavoy |, Ap, 5.03M), the [Huffington Post](#) (6/5, |, Mcavoy, 194K), the [Daily Mail \(UK\)](#) (6/8, 5.37M), [Yahoo! News](#) (6/5, Mcavoy, 6.18M), [Yahoo! News](#) (6/5, Mcavoy, 6.18M), and [KHON-TV Honolulu \(HI\)](#) Honolulu (6/4, 37K).

NPS TO EXCAVATE “PERSISTENCE” CAVE AT WIND CAVE NATIONAL PARK. The [AP](#) (6/8, Burbach, 1.29M) reports that the NPS is “beginning to excavate the mouth of an unexplored cave in the Black Hills of South Dakota, and researchers believe it could help broaden our understanding of how the region’s climate has changed over thousands of years.” A NPS worker first located the cave, called “Persistence,” in 2004 on Wind Cave National Park land. On Monday, “a team of scientists led by East Tennessee State University professor Jim Mead will begin unearthing the entrance of the cave, hauling out bags of sediment and animal bones to be carefully analyzed. “

Additional coverage was provided by the [Bristol \(VA\) Herald Courier](#) (6/8), the [Houston \(TX\) Chronicle](#) (6/8, Burbach, 2.29M), the [Memphis \(TN\) Commercial Appeal](#) (6/8, 318K), [US News & World Report](#) (6/7, 907K), the [Washington \(DC\) Post](#) (6/8, Kevin Burbach |, Ap, 5.03M), the [Daily Mail \(UK\)](#) (6/8, 5.37M), [Fox News](#) (6/7, 9.4M), [KSFY-TV Sioux Falls \(SD\)](#) Sioux Falls, SD (6/8, 3K), and [KXXV-TV Waco \(TX\)](#) Waco, TX (6/8, 30K).

FEDERAL OFFICIALS MEET TO DISCUSS MANHATTAN PROJECT PARK PLAN. This past week, officials with the NPS and Energy Department met with leaders from the Los Alamos National Laboratory, Hanford Nuclear Reservation, and Oak Ridge National Laboratory “to discuss an ambitious plan: to create a new national park scattered across three different states and dedicated to the history of the atomic bomb,” the [AP](#) (6/7) reported. DOE official Laurie Morman stated: “There are a number of sites that still have an active mission, so we’re still working through those challenges to how adjustments can be made.” The article noted that “NPS

[Mexican](#) (6/8, Wright, 49K) reports that funding is expected to be an issue “at a time of strained congressional relations and budgets.” Neither of the federal agencies has a firm cost estimate for the project, and it will take years to sort out what areas should be open to the public.

Additional coverage is available from the [Durango \(CO\) Herald](#) (6/7, 28K), the [Houston \(TX\) Chronicle](#) (6/8, 2.29M) , [WBIR-TV](#) Knoxville, TN (6/7, 56K) and [KUNM-FM](#) Albuquerque, NM (6/8, 4K).

“SOCCER IN THE CIRCLE” RETURNING TO DUPONT CIRCLE. In its “Going Out Guide,” the [Washington Post](#) (6/5, Hahn, 5.03M) reports that “the immensely popular Soccer in the Circle returns to the center of Dupont Circle on June 12 for the U.S.-Sweden match.” The article notes that “though it’s taking place on National Park Service property, the event is sponsored by the Embassy of Sweden.”

CLIMATE CHANGE HASTENS DECLINE OF THE JOSHUA TREE. The [Los Angeles Times](#) (6/6, Sahagun, 4.03M) reports that “climate change is taking an enormous toll, and the current drought has hastened the decline of” the Joshua tree, a species that is regarded as the symbol of California deserts.” In a collaborative effort launched this year, Joshua Tree National Park, the FWS and a research team led by Riverside ecologist Cameron Barrows “organized the first long-term project designed to monitor the Joshua trees’ responses to climate change and drought.” According to the article, “the data, collected with help from volunteer citizen scientists from the nonprofit group Earthwatch, will create baseline information to help guide conservation decisions as Joshua trees retreat to cooler and wetter higher elevations.”

Additional coverage was provided by the [AP](#) (6/8, 2.29M).

PILOT DIES AT ALASKA NATIONAL PARK AFTER WALKING INTO HIS PLANE’S PROPELLER. The [AP](#) (6/5) reported National Park Service officials say a pilot died “after being struck by the rotating propeller of his own plane at Alaska’s Wrangell-St. Elias National Park and Preserve” on Thursday. The AP reported that Clint Johnson, head of the NTSB’s Alaska office, said it’s his understanding that Baldwin’s plane was idling and it is not known why he walked into the propeller.

[Alaska Dispatch News](#) (6/5, Shedlock, 216K) reported Johnson said the NTSB “wasn’t told of the incident until about 5:30 p.m. Thursday night because of weather and communication issues at the park.” The story adds that since the plane’s engine was running, the NTSB is assisting in the investigation, which will be led by the National Park Service, according to Johnson.

[KTUU-TV](#) Anchorage, AK (6/8, Patil, 78K) online reported according to Johnson there were four other planes at the strip at the time of the fatality. “We will be investigating it, as is our duty, but we won’t be sending an investigator out there,” Johnson said.

[Mat-Su Valley \(AK\) Frontiersman](#) (6/8, O’Connor, 21K) provided additional coverage.

EROSION CLOSES TWO STAIRWAYS TO BEACH AT INDIANA DUNES NATIONAL LAKESHORE. The [Merrillville \(IN\) Post-Tribune](#) (6/5, 114K) reports that “large waves kicked up by strong winds washed away what little beach remained in front of the Lakeview picnic area at Indiana Dunes National Lakeshore near Beverly Shores and forced the closure of two stairways leading to the beach, the National Park Service said Friday.” According to the article, “the June 1 storm left a steep drop-off onto large boulders that have armored this portion of the shoreline dating back before the establishment of the national lakeshore.” The NPS “closed the picnic area’s two beach-access stairways in response to what it said were dangerous conditions.”

NPS DEBUNKS RUMORS OF ERUPTION AT SUNSET CRATER VOLCANO NATIONAL MONUMENT. The [Provo \(UT\) Daily Herald](#) (6/8, 130K) reports that “what appeared to be steam plumes coming from Sunset Crater” has “proved only to be a controlled burn in the area.” The NPS was “quick to extinguish any rumors about a volcanic eruption at Sunset Crater Volcano National Monument.” A statement said, “The National Park Service has received numerous inquiries about the possibility of current volcanic activity at Sunset Crater Volcano. The internet source of the purported eruption is based upon a black and white satellite image. The report is not from an academic source or part a scientific agency, such as the United States Geological Survey.”

DESCENDANT OF JUIAN ALDEN WEIR DONATES TWO ART PIECES TO NPS. The [Wilton \(CT\) Bulletin](#) (6/8, 9K) reports that “a descendant of American painter Juian Alden Weir recently helped Weir Farm commemorate its 25th anniversary as a national historic site by donating two pieces of art to the National Park Service.” According to the article, “Charlie Burlingham, grandson of the American Impressionist painter, and president of the Weir Farm Art Center, donated his grandfather’s works last Thursday, May 28.”

DENALI NATIONAL PARK ISSUES WARNING ABOUT COW MOOSE THAT HAS CHARGED VISITORS. The [Alaska Dispatch News](#) (6/5, 216K) reports that Denali National Park and Preserve is “warning visitors to watch out for a cow moose with two calves at the Riley Creek Campground that has charged three people in the last two weeks, one of whom was attacked and injured by the moose.” The animal has been “roaming Riley Creek Campground at the park entrance for a few weeks, according to Denali National Park volunteer program manager Kathleen Kelly.”

Additional coverage was provided by the [AP](#) (6/6, Press, 5.03M) and [Reuters](#) (6/7, Quinn).

ARCHES NATIONAL PARK PROPOSES RESERVATION SYSTEM. The [AP](#) (6/6, 2.29M) reports that “more people are visiting Arches National Park every year, and the park superintendent is proposing a reservation system during the busy season to ensure they don’t have to turn people away.” However, “the idea is fiercely opposed by the business community in nearby Moab, Utah, who rely on tourists and fear the system would be confusing and lead to fewer impromptu visits.” The article notes that “the issue flared up again Memorial Day weekend when the state highway patrol closed the park entrance because of overcrowding and dangerous traffic conditions.”

STUDY COMMISSIONED BY GRAND TETON NATIONAL PARK SAYS PROPOSED PATHWAY CONFLICTS WITH GRIZZLY

... The [BBC](#) (6/8, 55K) reports that a study led by a wildlife biologist says a proposed maintenance pathway shouldn't be added to Moose-Wilson Road because of the potential for interactions between humans and bears." According to the article, "the 82-page report from British Columbia wildlife biologist Grant MacHutchon says the pathway could be dangerous for humans and have an impact on grizzly habitat." Grand Teton National Park "commissioned the study and will consider it when making a final decision about the pathway." The report "recommends that if the pathway must be built, it should be attached to the Moose-Wilson Road shoulder and open 9 a.m. to 5 p.m. in summer months."

SEVERAL SMOKIES TRAILS, CAMPSITES CLOSED AFTER BEAR ATTACK. [WBIR-TV](#) Knoxville, TN (6/7, 56K) reports that "officials in the Great Smoky Mountains National Park closed several trails and backcountry campsites Sunday after a bear encounter that sent a teenager to the hospital." According to park officials, "a 16-year-old boy from Ohio was hurt Saturday night when a bear pulled him from his hammock." After the attack, "rangers and wildlife biologists responded to those sites to clear out other campers and evaluate bear activity in the area."

BRINK OF THE LOWER FALLS TRAIL IN YELLOWSTONE REOPENED. The [AP](#) (6/6, 2.29M) reports that "the popular Brink of the Lower Falls Trail in Yellowstone National Park has reopened." According to the article, "crews removed a large boulder, cleaned up a mud slide and repaired damage to the trail caused by heavy rains in May."

CIVIL WAR TRUST TOUTS SUCCESS OF BATTLEFIELD PRESERVATION CAMPAIGN. The [Fredericksburg \(VA\) Free Lance-Star](#) (6/8, 85K) reports that the Civil War Trust "far surpassed the original goal of 'Campaign 150: Our Time, Our Legacy,' begun four years ago this month, having raised more than \$52 million to protect more than 10,000 acres at 64 battlefields in 16 states." At its annual conference, held this year in the former Confederate capital, the trust noted that the figure is "the largest sum privately raised for heritage land preservation in the nation's history."

GLOBAL PHOTOGRAPHY CONTEST TO FOCUS ON YELLOWSTONE NATIONAL PARK. The [Bozeman \(MT\) Daily Chronicle](#) (6/8, 54K) reports on Yellowstone Forever, "a photography contest sponsored by Yellowstone Park Foundation and Nature's Best Photography magazine." Entries for Yellowstone Forever will be accepted through Sept. 10, 2015. According to the article, "winners will be featured in Nature's Best Photography in spring 2016 and a print exhibition of the winning images will be displayed at the Old Faithful Haynes Photo Shop in Yellowstone."

ADDITIONAL COVERAGE OF MAINTENANCE BACKLOG AT NATIONAL PARKS. Additional coverage of the backlog in maintenance work at national parks was provided by the [Baltimore Sun](#) (6/5, 802K).

ADDITIONAL COVERAGE: NPS WORKING TO RECOGNIZE RECONSTRUCTION SITES. Additional coverage of the effort to recognize Reconstruction sites was provided by the [Hilton Head Island \(SC\) Packet](#) (6/7, 84K).

ADDITIONAL COVERAGE OF BISCAYNE NATIONAL PARK' GENERAL MANAGEMENT PLAN. Additional coverage of Biscayne National Park' General Management Plan was provided by the [AmmoLand](#) (6/8, 5K), [WPLG-TV](#) Miami (6/8, 225K), and [WJAX-TV](#) Jacksonville, FL (6/8).

ADDITIONAL COVERAGE: HOMESTEAD MONUMENT TO HOST NATURALIZATION CEREMONY. Additional coverage of the naturalization ceremony for new United States citizens hosted at the Homestead National Monument of America last Friday was provided by the [AP](#) (6/8, 2.29M).

Bureau of Land Management:

BLM, IDAHO NATIONAL LABORATORY PREPARE FOR FIRE SEASON. [KIFI-TV](#) Idaho Falls, ID (6/7, 3K) reports that "on Thursday, Idaho National Laboratory and Bureau of Land Management fire officials discussed what to expect this coming fire season, including communications, operational strategies, mutual aid agreements and critically important sage grouse protection." Eric Gosswiller, INL fire chief, said, "The secretary of the interior (Sally Jewell) recently issued a new directive that establishes sage grouse habitat as one of the top priorities for the West. And with that are a number of initiatives that include responding more aggressively to the fires, more collaboration with different agencies. What that means in terms of response resources, if we have a lot of fires activity in our region, we have a lot of valuable sage grouse habitat. The chances are we'll have priority to get some additional response resources, including aircraft."

Additional coverage was provided by the [Idaho Statesman](#) (6/7, 199K).

New Firefighters Undergo Training. The [Twin Falls \(ID\) Times-News](#) (6/5, 75K) reports that "fifty-four new firefighters from the Bureau of Land Management and the Forest Service gathered in the Fairfield District of the Sawtooth National Forest for a week of training" last week. Tony Erickson, assistant fire management officer with the BLM's Twin Falls District, said "protecting sage grouse habitats will not change fire fighting techniques, but they will be pre-positioning resources and pre-planning for fires in those areas."

Additional coverage was provided by the [Twin Falls \(ID\) Times-News](#) (6/8, 75K).

BLM ALLOWS GRAZING ON CLOSED ALLOTMENT TO AVOID CONFRONTATION. The [AP](#) (6/5, Press, 1.29M) reports that "federal land managers say they won't immediately enforce drought-related grazing restrictions in northern Nevada so as to avoid confrontation with ranchers openly defying the order." Ranchers Dan and Eddyann Filippini have been "notified they are violating the closure ordered in 2013 in an area covering more than 150 square miles near Battle Mountain about 200 miles northeast of Reno," BLM spokesman Rudy Evenson said Thursday. However, "he said BLM acting-state director John Ruhs told them the agency won't try to stop them while they continue negotiating a compromise." Conservationists claim "it's another example of the government caving in to scofflaw ranchers like Cliven Bundy, who continues to graze his cattle illegally in southern Nevada after the Bureau of Land Management backed down from an armed standoff last year."

Additional coverage was provided by [The News \(OR\)](#) (6/5, 6.03M), the [Salem Daily Emerald \(OR\)](#) (6/5, 6.03M), the [Freemason Post \(6/5, Press, 5.03M\)](#), the [Houston \(TX\) Chronicle \(6/5, 2.29M\)](#), the [Daily Mail \(UK\) \(6/8, 5.37M\)](#), and [Yahoo! News \(6/5, 6.18M\)](#).

FIRE BURNING IN IDAHO'S CELEBRATION PARK MOSTLY CONTAINED. The [AP \(6/8, 1M\)](#) reports that "authorities say a wildland fire that has scorched at least 3,000 acres of Celebration Park is 90 percent contained." BLM spokeswoman Carrie Bilbao said "the fire is mostly contained as of Sunday morning, but there's still no solid estimate of when it will be fully contained." Bilbao said "the fire isn't threatening any structures."

BLM RELEASES TRAVEL MANAGEMENT PLAN FOR BIG BELT MOUNTAINS. The [Helena \(MT\) Independent Record \(6/8, 38K\)](#) reports that "m trail users may push for a new campground near Helgate Gulch, as the Bureau of Land Management recently released travel management proposals and an environmental assessment for lands it manages in the Big Belt Mountains southeast of Helena." The bureau "began accepting public comment June 1 and will continue to do so through July 9 for proposed travel plan alternatives in the Missouri River Foothills Planning Area, which will decide what routes will be open or closed to motorized use."

BLM PRESENTS "MAKING A DIFFERENCE" NATIONAL VOLUNTEER AWARD. The [Kern Valley \(CA\) Sun \(6/8, 16K\)](#) reports that the BLM "presented the 2015 'Making a Difference' National Volunteer Award to Bodfish resident, Ted Brummer, for outstanding volunteer service." Brummer's "work focuses on visitor education, trash clean up, historical interpretation, historical resource monitoring, and local history research for the Keyesville Special Recreation Management Area just outside the town of Lake Isabella."

Fish and Wildlife Service:

FWS SOUTHEAST REGION BANS GENETICALLY MODIFIED CROPS ON REFUGES. The [Greenwire \(6/5, Subscription Publication\)](#) reports that the FWS' Southeast Region will "stop planting genetically modified crops in wildlife refuges, according to a Federal Register notice to be published Monday." The move "comes as FWS halts its work on a programmatic environmental assessment stemming from a 2012 legal settlement reached with environmental and public interest groups." According to the article, "the region chose to stop the environmental assessment as a result of FWS headquarters' announcement last year that it would phase out genetically engineered crops on all of its refuges by January 2016."

Also reporting on the story is the [Hope \(AR\) Star \(6/6, 9K\)](#).

FEDERAL POLLINATOR PLAN NEEDS MILKWEEDS FOR MONARCH BUTTERFLIES. The [Minneapolis Star Tribune \(6/6, Marcotty, 1.29M\)](#) reports that the national pollinator plan released recently by the White House seeks to "rescue pollinators considered vital to a healthy environment." According to the article, "scientists both in and outside federal agencies are trying to figure out just how much land and how many milkweed plants will suffice to increase the number of monarchs to 225 million in five years, or enough to cover 15 acres of trees in Mexico." The FWS is "looking at the land it manages with an eye toward planting pollinator-friendly habitat."

COLORADO RESERVOIRS RELEASE PEAK FLOWS FOR ENDANGERED FISH. The [Vail \(CO\) Daily \(6/8, 44K\)](#) reports that for the first time in five years, the Colorado River Water Conservation District "collaborated with the Bureau of Reclamation and Denver Water to mimic natural spring runoff and peak-river flows." Jana Mohrman, the FWS hydrologist with the Upper Colorado River Endangered Fish Recovery Program, noted that "that's about the opposite of what reservoir operators typically do as they try to store water for times of drought, prevent floods and generally even out flows throughout the year." The article notes that "the three reservoir operators finished a conference call Monday and made the decision to participate in the Coordinated Reservoirs Operations Program with their six reservoirs starting that afternoon."

Additional coverage was provided by the [AP \(6/8, 6.18M\)](#), the [Denver \(CO\) Post \(6/8, Finley, 894K\)](#), the [Grand Junction \(CO\) Free Press \(6/8, 43K\)](#).

CREWS TURN UP EMPTY IN SEARCH OF DETROIT RIVER FOR PRESENCE OF SEA LAMPREY LARVAE. The [Detroit Free Press \(6/6, 957K\)](#) reports that "crews from the U.S. Fish and Wildlife Service fanned out across the Detroit River on Saturday, scouring the water for the presence of sea lamprey larvae, which burrow into river bottoms until they become parasites that use their suction-cup mouths to prey on Great Lakes fish." According to fish biologist Aaron Jubar, "Saturday's search turned up no evidence they have infested the river." The article notes that "the inspections in the Detroit and St. Clair rivers this week are part of an effort by the Fish and Wildlife Service to monitor hundreds of Great Lakes tributaries every spring and summer."

FWS TO IMPROVE FISH PASSAGE BENEATH CENTRAL CALIFORNIA TRACTION RAILROAD TRESTLE. The [Stockton \(CA\) Record \(6/7, Writer, 121K\)](#) reports that the FWS "recently committed about \$200,000 to improving fish passage beneath the Central California Traction Railroad trestle that crosses the Stockton Diverting Canal just east of Wilson Way." The article notes that "this will be the third of four significant obstacles on the Lower Calaveras to be fixed, though a separate, more expensive multimillion-dollar upgrade farther upstream at Bellota Weir is considered even more important."

EPA SUED OVER IMPACT OF NITROGEN POLLUTION NEAR ANTIOCH DUNES NATIONAL WILDLIFE REFUGE. The [SFbay \(6/5, 52\)](#) reports that "an environmental nonprofit filed a lawsuit Wednesday against the U.S. Environmental Protection Agency, claiming it didn't do enough to protect endangered species at a wildlife refuge in Antioch." The Wild Equity Institute said "in the suit that the EPA failed to consult with the U.S. Fish and Wildlife Service about the effects of a PG&E power plant located near the Antioch Dunes National Wildlife Refuge."

NUMBERS OF NORTHWEST MONTANA GRIZZLIES LAG WHILE OTHER BEAR POPULATIONS GROW. The [AP \(6/6, Scott, 2.29M\)](#) reports that although the population of remote population of grizzly bears in the Cabinet-Yaak Mountains of Northwest Montana are "climbing out of the 'negative territory' for the first time in decades, wildlife officials say human-caused mortalities continue to plague the tenuous population, which is estimated to number around 50, with a projected growth of 1.4 percent annually." The article notes that "in contrast, the robust grizzly populations of the much-larger Northern Continental Divide Ecosystem (NCDE)

Wayne Kasworm, the FWS recovery coordinator in Libby, said “augmenting the sparse population with transplanted bears – an effort begun in 1990 – has finally started to take hold.”

STATES URGED TO BETTER PROTECT SAGE GROUSE. In an op-ed for the [Denver Post](#) (6/8, Molvar, 894K), Erik Molvar, the Sagebrush Sea Campaign director for WildEarth Guardians, writes that the efforts by states to prevent the listing of the greater sage grouse has been inadequate. Molvar acknowledges that states could have conserved sage grouse without federal intervention, but they have failed to do so. Molvar advises states to stop complaining about federal encroachment and start taking responsibility.

CALIFORNIA URGED TO TIGHTEN RULES ON IVORY SALES. In an editorial, the [Los Angeles Times](#) (6/8, Board, 4.03M) supports AB 96, introduced by Assembly Speaker Toni Atkins, which would “tighten the rules by barring the sale of almost all ivory in California.” The bill “passed the Assembly last week with bipartisan support,” and the Times urges the Senate to “pass it too,” and the governor to “sign it into law.” The paper argues that “as the decimation of the African elephant continues, fueled by the illegal ivory trade, this law is not only smart, but necessary.”

US Geological Survey:

GEOLOGISTS SEE SUCCESS IN ARTIFICIAL GRAND CANYON FLOODS. The [Salt Lake \(UT\) Tribune](#) (6/8, 470K) reports that “after three straight years of experimental controlled floods unleashed to push sediments down the Colorado River, the U.S. Geological Survey released a report this week declaring the seasonal gushers a success.” USGS scientists have “rigged remote time-lapse cameras along the canyon’s 200-mile reach, training their lenses on 43 sandbar locations to document how each responds to the floods and changes over time.” According to project leader Paul Grams, “the data are shedding new light on how sandbars form.”

Securing America’s Energy Future:

Renewable Energy:

BLM ADVANCES PARED-DOWN SODA MOUNTAIN SOLAR PROJECT. The [Environment & Energy Publishing](#) (6/5, 705) reports that the BLM has “significantly reduced the size of a controversial large-scale solar power project in the Southern California desert in an effort to move it forward and appease critics who have roundly blasted the project’s location near the Mojave National Preserve.” However, “the revised proposal outlined in a final environmental impact statement (EIS) released today does not appear to have lessened the near unanimous condemnation of the proposed Soda Mountain Solar Project by critics who maintain it could damage sensitive wildlife habitat, deplete groundwater quantity and spoil viewsheds in the preserve.”

Additional coverage was provided by the [AP](#) (6/5, Freking, 641K), the [Houston \(TX\) Chronicle](#) (6/5, Freking, 2.29M), [Southern California Public Radio](#) (6/5, 85K), the [Palm Springs \(CA\) Desert Sun](#) (6/7, 85K), the [San Bernardino \(CA\) Sun](#) (6/5, 120K), and the [Riverside \(CA\) Press Enterprise](#) (6/8, 395K).

QUESTIONS REMAIN CONCERNING TURBINES’ IMPACT ON BIRDS. The [Contra Costa \(CA\) Times](#) (6/6, Thomas, 279K) reported Saturday that questions remain unanswered concerning the impact of wind turbines on endangered birds in Contra Costa County, California. While environmentalists claim that wind farms are to blame for a larger number of bird deaths, wind energy companies say that the deaths are part of “background mortality.” A study commissioned by the wind industry saw the number of birds dying stay unchanged when the turbines were switched off.

Onshore Energy Development:

BLM’S SAGE GROUSE PLANS COULD IMPACT ENERGY INDUSTRY. The [Greenwire](#) (6/5, Subscription Publication) reports that the BLM “released final plans last week for bolstering sage grouse protections across 50 million acres in 10 states in what’s been called the agency’s largest landscape-scale conservation plan.” The Obama Administration said “the plans are a critical step to saving the West’s vanishing sagebrush habitat and convincing the Fish and Wildlife Service that sage grouse need no protection under the Endangered Species Act.” However, “industry groups panned the administration’s land-use plans as a property grab, warning that they will restrict oil and gas drilling, mining, and other forms of development across much of the West and cause more economic harm than a federal listing.”

The [EnergyWire](#) (6/5, Subscription Publication) reports that “even as stakeholders nervously watch the looming September deadline that will decide the bird’s fate under the Endangered Species Act, landowner and environmental advocates have condemned the plan as inadequately protecting both the bird and landowners’ rights in the mineral-rich basin.”

Additional coverage was provided by the [Sidney \(MT\) Herald](#) (6/8, 10K).

Republicans Plan To Bring Sage Grouse Into Defense Authorization Debate. The [E&E Daily](#) (6/5, Subscription Publication) reports that “supporters of ending the crude oil export ban are trying to drum up Democratic support ahead of possible amendment votes in the Senate next week, while GOP senators signaled plans to bring the sage grouse and other threatened species into the defense authorization debate.” Republicans have “indicated there’s solid support in their caucus for taking on the export ban but conceded that the extent of Democratic support was less clear.”

Republicans Criticized For Attacking Environmental Laws. The [New York Times](#) (6/8, Board, Subscription Publication, 12.24M) editorializes that “President Obama has announced or will soon propose important protections for clean water, clean air, threatened species and threatened landscapes,” but “Republicans in Congress are trying hard not to let that happen — counterattacking with a legislative blitz.” The Times notes that “the usual complaints about ‘executive overreach’ and ‘job-killing regulations’ have been raised,” but it claims that “beneath all the political sound bites lies a deep-seated if unspoken grievance that Mr. Obama is actually

...ing to realize the promises of laws that Congress passed years ago but which remain a promise that today's Congress. The editorial highlights "a further example of how far these Republicans have strayed from what was once a bipartisan commitment to environmental stewardship is their tepid response to what could be one of great conservation efforts of this century: a multiyear, ecosystem-wide effort by the Interior Department, in concert with states and private landowners, to keep a threatened bird called the greater sage grouse off the endangered species list by protecting its habitat across 10 Western states."

JUDGE MERGES LAWSUITS AGAINST NEW FEDERAL DRILLING RULES. The [AP](#) (6/5) reported, "Wyoming US District Judge Scott Skavdahl on Thursday granted a consolidation request filed by both sides in a lawsuit filed by the Independent Petroleum Association of America and Western Energy Alliance against the Interior Department, US Bureau of Land Management and their directors." The other lawsuit against the BLM "was filed by the state of Wyoming, which has been joined by Colorado and North Dakota," the article reports. "Meanwhile, six environmental groups including the Sierra Club, Earthworks and The Wilderness Society have joined both lawsuits on the federal government's side," according to the article.

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (6/5, 2.29M), [KFGO-AM Fargo \(ND\)](#) Fargo, ND (6/6, 3K), [KNBN-TV Rapid City \(SD\)](#) Rapid City, SD (6/8, 33), and [KULR-TV Billings \(MT\)](#) Billings, MT (6/8, 2K).

COLORADO MAY JOIN LEGAL BATTLE TO HALT SHUTDOWN OF COLOWYO COAL MINE. The [Denver Business Journal](#) (6/5, Proctor, Subscription Publication, 62K) reports that "Gov. John Hickenlooper's administration may join the legal battle to keep a major Colorado coal mine open in the face of federal judge's threat to shutter the Colowyo coal mine in northwestern Colorado." Mike King, the executive director of the Colorado Department of Natural Resources, said, "We are reviewing opportunities to participate in an appeal of the U.S. District Court ruling that threatens the shutdown of the Colowyo Coal mine, eliminate 220 jobs and create economic hardship to northwest Colorado." Hickenlooper also has sent a letter to Interior Secretary Sally Jewell asking her to "do everything possible" to prevent the shutdown of the mine.

OSM To Hold Public Meeting. The [Craig \(CO\) Daily Press](#) (6/6, 10K) reports that "on Wednesday, the Office of Surface Mining, Enforcement and Reclamation will host a public participation meeting from 4 to 8 p.m. under the Moffat County Fairgrounds Grandstands." The event is "a step in the 120 day new analysis process that OSM has to take to continue mining at Colowyo."

HILL ANALYSIS: DIVIDE OVER FRACKING FALLS ALONG PARTY LINES. [The Hill](#) (6/6, Cama, 533K) examined the political divide over fracking in red and blue states. While some liberal states such as New York and Maryland have banned fracking, some conservative states "such as Texas and Oklahoma have gone the opposite route, moving to ensure that local towns and cities cannot outlaw the practice in their communities." Fearing "a patchwork of rules for fracking across municipal lines," industry groups "want the regulatory questions to be settled on a state-by-state basis."

Companies Face Questions About Possible Link Between Fracking, Earthquakes. During a Wednesday hearing in Texas, oil and gas companies faced questions about the possible link between fracking and a recent spate of quakes near Fort Worth, the [Wall Street Journal](#) (6/7, Ailworth, Subscription Publication, 5.68M) reports.

FEDERAL JUDGE RULES PEBBLE LIMITED PARTNERSHIP SUIT CAN MOVE FORWARD. US District Judge H. Russel Holland on Thursday "refused to block a lawsuit by" Pebble Limited Partnership, an Alaskan mining company that claims the EPA "was biased when it tried to block the firm's efforts to build a huge gold and copper mine southwest of Anchorage," the [Washington Post](#) (6/6, Warrick, 5.03M) reports. Holland found "the mining company had made a 'plausible' case in arguing that anti-mine activists had unfairly influenced regulators in their decision to block the mine."

OPINION: US SHOULD LIFT CRUDE OIL EXPORT BAN. Writing in [The Hill](#) (6/6, Andrews, 533K), former Rep. Michael Andrews (D-TX) argues that the US would benefit from lifting the crude oil export ban because doing so would create American jobs and bring export policy in line with trade policy. He notes that the circumstances under which the ban was instituted are gone now, and that the domestic oil industry needs more markets for its products in order to sustain more job creation. Further, Andrews says that it is "inconsistent" for the US to push free trade and challenge barriers put up by competitors while maintaining the ban.

Editorial: End Oil Export Ban. The [Houston \(TX\) Chronicle](#) (6/6, 2.29M) editorialized Saturday that the US should repeal its ban on the export of crude oil, saying that doing so would open more markets to American industry and provide a foreign policy tool. The paper further argues that the country's energy future can be achieved with methods like fracking as long as the industry follows proper safety protocols.

Offshore Energy Development:

US GOVERNMENT TO PROVIDE ENVIRONMENTAL GROUP WITH OFFSHORE FRACKING DOCUMENTS. [Reuters](#) (6/5, Rascoe) reported that the US government will provide a Green group with documents about the fracking in the Gulf of Mexico after the Center for Biological Diversity filed a lawsuit seeking access to the information.

Additional coverage was provided by the [Maritime Executive](#) (6/8, 21).

FORMER BP EXECUTIVE ACQUITTED OF LYING OVER 2010 SPILL. [Bloomberg News](#) (6/5, Fisk, 3.81M) reported Friday that former BP Vice President for Gulf of Mexico Exploration David Rainey has been acquitted of charges related to the response to the 2010 Deepwater Horizon oil spill. Prosecutors alleged that Rainey lied about the flow rates into the Gulf of Mexico, but the jury determined that there wasn't enough evidence to prove this. Rainey's attorney said that he is "grateful and relieved and really wants to put this chapter behind him," while a lawyer for the Justice Department said that they will "respect the jury's verdict."

The [AP](#) (6/6, McGill) reported that the jury spent two hours in deliberation, and that US District Judge Kurt Engelhardt expressed agreement with the verdict.

ADDITIONAL COVERAGE OF OFFSHORE DRILLING PROPOSAL The [Los Angeles Times](#) (6/7, 1.6M) reports that the proposal to open “up areas off Florida’s Atlantic and Gulf coasts to oil and gas exploration” is receiving mixed reactions. Last month, “Gulf Coast senators led by Republican Bill Cassidy of Louisiana introduced a bill that would open up oil drilling within 50 miles of Florida’s Gulf Coast starting in 2017. The state’s existing 125-mile buffer expires in 2022.” According to the article, “the moves have left some members of Florida’s congressional delegation and state officials scrambling to protect the state’s largely pristine and nationally celebrated coastline, especially with memories of the 2010 Deepwater Horizon BP oil spill fresh in their minds.”

ADDITIONAL COVERAGE: ENVIRONMENTAL GROUPS FILE LEGAL CHALLENGE TO SHELL’S ARCTIC PLANS. Additional coverage of the lawsuit filed “in the 9th Circuit Court of Appeals on behalf of 10 environmental organizations” challenging “the approval of Shell’s exploration plan in the Arctic, which was approved by the Bureau of Ocean Energy Management last month” was provided by the [Bristol Bay \(AK\) Times](#) (6/8, 4K).

INCREASE IN OIL-SPILL LIABILITY CAP URGED. In an op-ed for the [Camden \(NJ\) Courier Post](#) (6/7, 140K), Ian Adams, the western region director of the R Street Institute, supports raising the oil-spill liability cap. Adams notes that the cap was recently raised to \$134 million, but he argues that “the cap on oil-spill liability should be higher still, particularly in light of the amount of damage that spills repeatedly have been shown to cause.” Raising the oil-spill liability cap “substantially,” Adams argues, will “allow private risk-transfer mechanisms to send the sort of price signals that will deter risky behavior.”

Tackling America’s Water Challenges:

PANEL UNDERLINES CHALLENGES CALIFORNIA FACES IN MEETING WATER DEMANDS. The [Los Angeles Times](#) (6/8, Lin, 4.03M) reports that “a panel of water experts on Sunday mapped out the challenges California faces in meeting future demands for water at a time when water sources are under stress and future supplies appear uncertain.” According to the article, “the panel, speaking at the Los Angeles Times book club, agreed the problems are serious and multifaceted: groundwater reserves underneath California’s Central Valley are estimated to have been depleted by 125 million acre-feet since the first wells were drilled more than a century ago and as water demand is forecast to outstrip supply coming from the Colorado River in the coming decades.” Mike Sweeney, executive director of the Nature Conservancy in California, noted that one solution would be “building tunnels that would allow water to be pumped from the water-rich Sacramento River around the delta, instead of through it,” but the option also raises further questions.

Feinstein: Federal Help Needed For California Drought. In a [Los Angeles Times](#) (6/7, 4.03M) op-ed, Sen. Dianne Feinstein notes her plans to introduce drought legislation in Congress to grant California Federal aid to help address the state’s drought. Feinstein says Federal assistance is crucial to plans “for new and expanded reservoirs to store water north and south of the Sacramento-San Joaquin delta,” in part to get needed environmental assessments completed. Feinstein added that desalination and water recycling must be implemented to help communities be “more self-reliant” in the future.

Additional Coverage. Additional coverage of the drought was provided by the [Los Angeles Times](#) (6/6, Bierman, 4.03M), the [Las Vegas \(NV\) Sun](#) (6/8, 176K), and the [Sacramento \(CA\) Bee](#) (6/8, 551K).

Empowering Native American Communities:

QUAPAW TRIBE CHAIRMAN DEFENDS LAND TRUST PROPOSAL. The [AP](#) (6/8, 456K) reports that “the chairman of the Quapaw Tribe of Oklahoma is defending the tribe’s request to put 160 acres of land it has purchased in Arkansas into federal trust.” Chairman John Berrey said in letters to the BIA office in Nashville, Tennessee, “and to the federal assistant secretary of Indian Affairs that there are no plans for a casino on the land in Pulaski County.” Berrey said “there are no plans to change the current agricultural use of the land near the Little Rock Port Authority’s industrial park.”

Also reporting on the story is the [Arkansas Democrat Gazette](#) (6/6, 342K).

GOV. MALLOY TO SIGN CONNECTICUT CASINO BILL INTO LAW. The [AP](#) (6/5, Haigh, Press, 6.18M) reports that Gov. Dannel P. Malloy “plans to sign a bill into law creating a multi-step process for possibly opening a new tribal casino along the Connecticut border to fight out-of-state gambling competition.” Under the legislation, “the Mashantucket Pequot and Mohegan tribes would issue a request for proposals, or RFP, from municipalities interested in hosting one satellite casino to compete with the MGM Resorts casino planned in Springfield, Massachusetts.”

JUDGE TO DECIDE ON DISPUTE OVER MARTHA’S VINEYARD CASINO PLAN. The [AP](#) (6/6, Marcelo, 2.29M) reports that “the state of Massachusetts and an Indian tribe whose ancestors first inhabited Martha’s Vineyard are asking a federal judge to settle whether the tribe can build a casino on the island that has long been a favored vacation destination for the rich and powerful.” The Aquinnah Wampanoags “want to turn an unfinished tribal community center on the remote, western side of the island into a gambling hall filled with electronic betting machines.” They claim “the federal Indian Gaming Regulatory Act permits them to offer certain types of gambling because they are a federally-recognized tribe with jurisdiction over about 485 acres in the town of Aquinnah.”

MAN TO PLEAD GUILTY TO ASSAULTING, INJURING BIA OFFICER. The [AP](#) (6/8, 2.29M) reports that “a North Dakota man says he will plead guilty to an assault that injured a Bureau of Indian Affairs officer.” According to the article, “a plea agreement calls for Brandon Belgarde, of Rugby, to plead guilty to assault with a dangerous weapon, and assaulting and resisting a federal officer.”

Office of Insular Affairs:

MARSHALL ISLANDS RECEIVES \$348,200 FROM OIA. The [Marianas Variety](#) (6/8) reports that Interior Assistant Secretary for Insular Areas Esther Kia’aina has “approved \$348,200 from the Technical and Maintenance Assistance Programs in the Office of Insular Affairs to the Republic of the Marshall Islands for fiscal year 2015.” N kolao P

DOI in the News:

CONTINUING COVERAGE OF ANNOUNCEMENT OF SAGE GROUSE PLAN. The [Greenwire](#) (5/29, Subscription Publication) reports that Last week, the Interior Department "unveiled more than a dozen resource management plans covering millions of acres of land across the West." One plan "for almost 800,000 federal acres in the Powder River Basin envisions the leasing of more than 10 billion tons of coal to mining companies over the next two decades."

The [AP](#) (6/1) reports that "a conservationist in the corner of northeast Wyoming known for vast coal deposits and vaster vistas sees little new on climate change in a new management plan from the U.S. Bureau of Land Management." Shannon Anderson, a lawyer at the Powder River Basin Resource Council, said, "The big issue for a lot of groups is the carbon bomb unleashed with these plans. It doesn't do different things. It affirms business as usual." BLM Director Neil Kornze said that while the Buffalo Resource Management Plan "includes no substantial changes on coal leasing, the agency has seen interest in new leases decline in recent years." Kornze added: "We look at greenhouse gas impacts of production in our (environmental impact statements), and we have guidances related to that. We'll be following the guidance that we have out there already."

Also reporting on the story is the [Casper \(WY\) Star-Tribune](#) (6/1, 99K).

Additional coverage was provided by the [YubaNet \(CA\)](#) (6/1, 1K), the [Switchboard](#) (6/1, 116K), and the [Vox](#) (6/1, 839K).

Plan Receives Mixed Responses. The [Colorado Statesman](#) (6/1, 17K) reports that the announcement was "met with mixed reviews on Thursday, as environmentalists praised the new rules while the oil and gas industry expressed concerns about potential economic impacts from drilling restrictions." Also, "several sportsmen groups issued a joint statement today praising the plans." Meanwhile, "Kathleen Sgamma of the Western Energy Alliance said the regulations could affect more than 18,000 oil and gas industry jobs and will have an economic impact of nearly \$5 billion felt across Colorado, Montana, Utah and Wyoming." But "the BLM's statement said any economic impact will be minimal."

The [Grand Junction \(CO\) Daily Sentinel](#) (6/1, 73K) editorializes that "if Fish and Wildlife agrees that the plans lay the proper groundwork to avert a listing, then Congress will have to provide the resources." It notes that Sen. Michael Bennet is "urging the Senate Appropriations Committee to include full funding for conservation efforts." According to the paper, "that's a better approach than measures introduced in Congress to prevent Fish and Wildlife from making a decision for 6-10 years."

In an editorial, the [Salt Lake \(UT\) Tribune](#) (6/1, 470K) criticizes Rep. Rob Bishop response to the announcement by characterizing it as a way to "endear himself to the oil and gas lobby by demonstrating ignorance of just how the natural world works."

In a piece for the [Las Vegas Review-Journal](#) (6/1, 380K), Glen Cook criticizes the plan and argues that the announcement shows why local control of federal lands is such an important issue in Nevada.

Additional coverage was provided by [Bloomberg BNA](#) (6/1, 8K), [NPR](#) (5/29, 1 52M), [McClatchy](#) (5/29, Adams, 32K), the [Vail \(CO\) Daily](#) (6/1, 44K), the [Durango \(CO\) Herald](#) (5/28, 28K), the [Eugene \(OR\) Register-Guard](#) (6/1, 172K), the [Elko \(NV\) Daily Free Press](#) (6/1, 22K), the [Summit County \(CO\) Citizens Voice](#) (5/29, 506), the [Black Hills \(SD\) Pioneer](#) (6/1, 11K), the [High Plains and Midwest AG \(KS\) Journal](#) (6/1), the [St. George \(UT\) News](#) (5/29, 3K), the [Wyoming Public Media](#) (6/1), the [Wyoming Tribune Eagle](#) (5/29, 44K), [AgWeb](#) (6/1, 14K), [Argus Media](#) (6/1), [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (6/1, 1.07M), [KCSG-TV St. George \(UT\)](#) St. George, UT (6/1, 43), [KTVN-TV Reno \(NV\)](#) Reno, NV (6/1, 1K), and [KSTU-TV Salt Lake City \(UT\)](#) Salt Lake City (5/29, 233K).

ADMINISTRATION'S PROPOSED CHANGES TO FEDERAL WORKERS' COMP RULES RILE ALLIES. The [Washington Post](#) (6/1, Davidson, 5.03M) reports in its "Federal Eye" blog that the Administration, "with support from House Republicans," is looking to reduce workers' compensation for federal employees, "to the consternation of fellow Democrats" and the President's "union allies." The changes proposed by the Labor Department would save the Federal government money, but "nowhere in the department's recent statement to the House workforce-protections subcommittee did the agency provide evidence to back the administration's concern about 'disincentives' for the return to work."

NON-PROFIT ONLY SEVEN FEDERAL AGENCIES RESPONDED ADEQUATELY TO FOIA REQUEST. The [Washington Post](#) (5/30, 5 03M) "In the Loop" blog by Al Kamen examines which Federal agencies will respond to Freedom of Information Act (FOIA) requests in a reasonable amount of time. Kamen says the non-profit Transactional Records Access Clearinghouse (TRAC) at Syracuse University "decided to test 21 various agencies' responses to requests for documents under that act." Kamen cites that as of April 24, over three months since the requests were sent out, only seven of the 21 Federal agencies "had provided usable data," according to TRAC.

America's Great Outdoors:

National Park Service:

WASHINGTON MONUMENT REOPENS AFTER POWER RESTORED TO ELEVATOR. The [AP](#) (5/29, 2.29M) reports that the NPS says the Washington Monument has "reopened after a power failure two days ago." The NPS announced Friday that the monument reopened at noon Friday. It was closed on Thursday and Friday morning after an electrical problem caused a power failure on Wednesday evening.

Additional coverage was provided by the [Washington \(DC\) Post](#) (5/29, Weil, 5.03M), the [Washington \(DC\) Post](#) (5/29, Press, 5.03M), the [Washington \(DC\) Post](#) (5/29, Hedgpeth, 5.03M), [Fox News](#) (5/29, 9.4M), [Yahoo! News](#) (5/29, 6.18M), and [WRC-TV Washington \(DC\)](#) Washington (6/1, 433K).

USS ARIZONA MEMORIAL DOCK MISHAP BEING INVESTIGATED. The [AP](#) (5/29, Mcavoy, 2.29M) reports that "the Navy command overseeing the hospital ship involved in a mishap that damaged the USS Arizona Memorial's dock has sent investigators to Hawaii to probe what happened." The Military Sealift Command's operations chief, Capt. Dean Vesely, will lead the investigation. Meanwhile, "the U.S. Coast Guard has started its own probe because civilian tugboats were involved."

Also providing coverage are the [Washington \(DC\) Post](#) (5/29, Audrey Mcavoy J, Ap, 5.03M), the [Honolulu \(HI\) Star-Advertiser](#) (6/1, 353K), the [Hampton Roads \(VA\) Virginian-Pilot](#) (6/1, 405K), the [Daily Mail \(UK\)](#) (6/1, 5.37M), and [Yahoo! News](#) (5/29, Mcavoy, 6.18M).

SENATORS PRESS FOR QUICKER ACTION ON ISLE ROYALE WOLVES. The [AP](#) (5/29, 2.29M) reports that Sens. Gary Peters and Debbie Stabenow "want the federal government to decide faster what to do about Isle Royale National Park's imperiled wolf population." In a letter sent Friday to NPS Director Jonathan Jarvis, they said "without wolves, the moose will degrade Isle Royale's vegetation and eventually suffer their own crash." The NPS is "planning a review that could last two to three years." According to the article, "the senators urged the agency to move faster and consider emergency measures, including bringing in more wolves."

Also providing coverage are the [Detroit \(MI\) Free Press](#) (5/29, 957K), the [St. Paul \(MN\) Pioneer Press](#) (6/1, 484K), and [WWJ-TV Detroit \(MI\)](#) Detroit (5/30, 34K).

MEMORIAL BRIDGE TO HAVE TWO LANES CLOSED FOR SIX TO NINE MONTHS TO FIX CORROSION DETERIORATION. The [Washington Business Journal](#) (5/30, Neibauer, Subscription Publication, 119K) reports that on Friday the National Park Service closed both curb lanes of Memorial Bridge, the "iconic, six-lane Potomac River span" in Washington, after FHWA inspections discovered "increasingly rapid deterioration and corrosion." The story says bridge, built in 1932, has been on the decline for years, and FHWA officials have "been preparing plans for emergency repair work for many months."

The [Washington Post](#) (5/29, Hedgpeth, Laris, 5.03M) reports the prohibition on vehicles over 10-tons on the bridge begins Friday but with an "education period" without ticketing for a few weeks to give "Metro and tour bus operators time to find detours," according to the National Park Service. Two lanes of the bridge will be partially shutdown for six to nine months, transportation officials said.

Additional coverage was provided by [WAMU-FM](#) Washington (6/1, 35K).

BIOLOGISTS STUDYING COUGAR FOUND IN VERDUGO MOUNTAINS. The [AP](#) (5/29, 2.29M) reports that "biologists are for the first time studying a mountain lion found in the Verdugo Mountains, a small range surrounded by suburbs north of downtown Los Angeles." The NPS said Friday "the adult male dubbed P-41 was captured May 7 and outfitted with a GPS tracking collar." Also, "blood and tissue samples were collected before it was released."

Additional coverage was provided by the [Los Angeles \(CA\) Daily News](#) (5/29, 379K), the [Los Angeles \(CA\) Observed](#) (6/1, 2K), [KCAL-TV Los Angeles \(CA\)](#) Los Angeles (5/29, 153K), and [WLS-TV Chicago \(IL\)](#) Chicago (6/1, 6K).

NPS TO CONDUCT SURVEY OF SITE OF FREEDOM RIDERS BUS BURNING. The [Anniston \(AL\) Star](#) (6/1, 57K) reports that "federal surveyors could determine this summer if the site where a mob fire-bombed a bus carrying civil rights activists just outside Anniston should be a national park." Ben West, of the Southeast Regional Office of the NPS, announced Friday that "his agency would conduct a survey of the 1961 bus burning to determine its national significance." The article notes that "the announcement is the latest in a years-long community push to build a park at the site."

STONES ALONG DISTRICT-MARYLAND BORDER BEING RESTORED. The [Washington Post](#) (5/30, Harris, 5.03M) reports that a restoration team is "working to restore 26 of the boundary stones along the District-Maryland border." David Maloney, state historic preservation officer in the D.C. Office of Planning, said, "Our historic preservation staff has been working over the past several years to make this project happen. We have partnered with DDOT [District Department of Transportation] and the NPS's [National Park Service] Historic Preservation Training Center to fully restore these important historic artifacts."

PETRIFIED FOREST NATIONAL MONUMENT KEEPS "CONSCIENCE PILE." [USA Today](#) (5/31, Mckinnon, Republic, 5.01M) reports on the "conscience pile" at Petrified Forest National Monument. According to the article, "when a piece of wood is returned, the park files away the letter and puts the wood in a rusted metal box at the main office." Then, "when the box is full, a park ranger takes it to a service road closed to the public and empties it on an ever-growing pile of wood." This is because "to replace a piece of wood that had been removed would disrupt the record and potentially affect future research."

WYOMING INTERVENES IN GRAND TETON GRIZZLY SUIT. The [AP](#) (5/29, Gruver, 2.29M) reports that "the state of Wyoming is intervening on the side of the federal government in a lawsuit over the number of grizzly bears that elk hunters in Grand Teton National Park would be allowed to kill before park officials would have to reassess their rules for the hunt." Attorneys for the state argued in court documents that "the need to keep elk from overpopulating and damaging private property outside the park is one reason Wyoming should be allowed to side with the federal government in the case."

DEMAND FOR HIKING PERMITS AT GRAND CANYON LESS THAN EXPECTED. The [AP](#) (6/1, 2.29M) reports that "it isn't clear yet if a new permit program for rim-to-rim hikes at the Grand Canyon is proving successful, park officials said Sunday." Grand Canyon National Park "so far has given out fewer permits than expected because the new system went into effect last September." According to park spokeswoman Kirby-Lynn Sheldowski, "only nine permits have been given this year."

RETIRED TEACHER HAS BEEN VOLUNTEERING AT ROCKY MOUNTAIN NATIONAL PARK FOR DECADES. The [AP](#) (5/30, Mansfield, 641K) reports that Jim Flanigan, a retired English teacher, has volunteered at Rocky Mountain National Park "during the summer months for 32 years." As a member of the Trail Masters, Flanigan "educates and instructs visitors about resource protection and park regulations, helps keep traffic moving, assists visitors with finding a suitable trail for hiking, and answers questions." Flanigan said, "it's been a rewarding experience. When I first started doing this, it was "Wow! This is a chance to give back, a chance to serve, and that's good. But to do it well is important, so I do a lot of reading and researching, and I read all of the sources they provide the paid staff. It's been a thing where you keep learning."

GLACIER OFFICIALS DEVELOPING PLAN TO EASE CONGESTION. The [AP](#) (5/29, 2.29M) reports that Glacier National Park officials are "developing proposals to ease congestion on the Going-to-the-Sun Road that include requiring day hiking permits and vehicle reservations to drive the popular route that crosses the Continental Divide." The article notes that "the number of visitors to the northwestern Montana park reached a record 2.3 million in 2014, with the Going-to-the-Sun Road is its main attraction." According to the article, "a final decision on how to address the crowding won't be made until 2017, but the National Park Service has released five preliminary alternative proposals for the public to comment on until June 5."

TRAFFIC FORCES TEMPORARY CLOSURE OF UNDER ARCHES NATIONAL PARK. [KSL-TV](#) Salt Lake City (6/1, 1.07M) reports that "a chaotic and dangerous traffic mess on Memorial Day weekend that forced an unprecedented temporary closure of Arches National Park has lit a fire under a big controversy: Should tourists be required to have a reservation before they can enter the national park?" Kate Cannon, superintendent of Arches and Canyonlands national parks, has "already won approval to begin charging higher entrance fees at peak times." However, "her proposal to initiate a reservation system, though, is drawing fierce opposition from the business community in Moab."

TRAIL RIDGE ROAD THROUGH ROCKY MOUNTAIN NATIONAL PARK OPENS FOR SEASON.. The [AP](#) (5/29, 2.29M) reports that Trail Ridge Road is "open for the season but the scenic road through Rocky Mountain National Park will be shut down after dark for now."

Also reporting on the story is the [Denver Post](#) (6/1, Paul, 894K).

YELLOWSTONE SEEKS INPUT ON WINTER PLAN. The [AP](#) (5/29, 2.29M) reports that "last winter, Yellowstone National Park loosened its strict limits on the daily number of individual snowmobiles." Now park officials are seeking "public comment on a proposal to check how the rules affecting the environment, and change them if necessary."

NPS TO HOLD PUBLIC MEETINGS TO DISCUSS YELLOWSTONE BISON MANAGEMENT PLAN. The [AP](#) (5/29, Brown, 2.29M) reports that "a range of proposals that could either curb or accelerate the slaughter of wild bison migrating from Yellowstone National Park will get an initial public airing next week." In March, "government officials proposed changes ranging from letting the park's bison herds expand to 7,500 animals, to even more aggressive efforts to drive down the numbers."

APPLE ORCHARD ALONG BLUE RIDGE PARKWAY PRESERVED. The [AP](#) (6/1, 2.29M) reports that “an apple orchard along the Blue Ridge Parkway in McDowell County has been permanently preserved.” According to the article, “people who worked to protect the Orchard at Altapass gathered there Saturday to celebrate conservation easements signed in March.” The article notes that “in 2001, the Conservation Trust bought 132 acres of the orchard and donated it to the National Park Service to include in the parkway’s official boundary.”

NEW SIGNS FOR HISTORIC SITES IN DOWNTOWN OPELOUSAS. The [AP](#) (6/1, Washington, 641K) reports that “as part of Historic Preservation Month, the city of Opelousas is showing off new signs at its historic locations around town.” According to the article, “the city tourism office announced the addition of historic bronze plaques for selected historic buildings and sites in the National Historic District located in the heart of downtown Opelousas.” The bronze signs are part of a project funded by a Preserve America Grant through the Interior Department.

ADDITIONAL COVERAGE OF MAINTENANCE BACKLOG AT NATIONAL PARKS. Additional coverage of the maintenance backlog at national parks was provided by the [Santa Fe New Mexican](#) (6/1, 49K).

ADDITIONAL COVERAGE OF DEBATE OVER NEW NATIONAL PARK IN MAINE. Additional coverage of the debate over a new national park in Maine was provided by [Al Jazeera America](#) (6/1, 133K).

NPS SITES EDUCATE NATION ON CIVIL RIGHTS HISTORY. For the “Congress” blog of [The Hill](#) (6/1, Sainato, 533K), Michael Sainato, a freelance journalist, writes that the stories national parks, monuments, and sites “tell and the gravity of their importance are not all well known, but by understanding and recognizing the lessons they teach us, the connections they have to contemporary issues of civil rights can lead to the awareness necessary for solutions so America’s past prejudices and civil injustices are not perpetuated.” He notes that “a national conscience engagement forum is being held at Little Rock Central High School National Historic Site on November 20-22nd, 2015.” Superintendent of the site, Robin White is “helping to organize the forum to address contemporary systematic social issues.” White said, “The National Park Service is a tool I use to make the World a better place as a public servant responsible for one of American history’s greatest stories of the struggle in pursuing an equal education. We have a right to be here, as we are, whoever we are. We are still on the battlefield for civil rights in 2015. The courage and sheer determination of the Little Rock 9 helped changed American minds and the Little Rock Central High School National Historic Site now provides a forum for conscious engagement in turning civil wrongs into civil rights.”

PROTECTION OF EVERGLADES URGED. In an op-ed for the [Miami Herald](#) (6/1, 676K), Bob Graham, a U.S. senator from 1987 to 2005, writes that “America’s Everglades is reeling from abuse, neglect and a failure of policy leaders to fully understand the economic and environmental consequences of not restoring and protecting this critical ecosystem.” He notes that “the Everglades is the water supply for almost 8 million Floridians, and millions of visitors,” and “what was once one of the world’s most diverse ecosystems has seen a dramatic decline in wildlife, sea life and flora.” Graham argues that “the state and its federal partner should reconsider the 2000 decision to grant to the now-rudderless Water Management District the authority to purchase land for Everglades restoration and place it in the hands of Everglades National Park’s guardian, the U.S. Department of Interior.”

Bureau of Land Management:

SPORTSMEN CALL FOR MORE ACCESS TO FEDERAL LANDS. The [Arizona Republic](#) (5/30, 1.27M) reports that “sportsmen called on a House panel last week to support a sweeping proposal that they said would guarantee hunting, fishing and recreational shooting rights on federal lands for future generations.” However, “officials with the U.S. Forest Service and the Bureau of Land Management, two of the federal agencies with massive land holdings that would be affected by” the Sportsmen’s Heritage and Recreational Enhancement Act, “hedged their positions on the bill.” According to the article, “they defended their agencies’ support of hunters and sporting activities on federal lands and generally supported many of the goals of the proposal.” However, “they also expressed concerns about some parts, noting that there is not yet an actual bill to comment on, and that they only received the draft proposal recently.”

SKINNY DIPPER HOT SPRINGS TO STAY OPEN DURING APPEAL PROCESS. The [AP](#) (6/1, 75K) reports that “the popular Skinny Dipper Hot Springs won’t close for now, while the Bureau of Land Management weighs an appeal it received seeking to keep it open.” Idaho BLM’s Tate Fischer said “he won’t close or dismantle the hot springs near Banks while the appeals process is underway.” Fischer “says the earliest the site could be closed is 2016.”

Also providing coverage are [The East Oregonian](#) (6/1, 24K), the [Idaho Statesman](#) (5/29, 199K), the [Boise \(ID\) Weekly](#) (6/1, 103K), and [KXLY-TV Spokane \(WA\)](#) Spokane, WA (6/1, 18K).

JOSEPHINE COUNTY OATHKEEPERS WANT INVESTIGATION OF BLM. [KOBI-TV](#) Medford, OR (6/1) reports that “the Oathkeepers of Josephine County say they’re moving operations out of the Sugar Pine Mine area for good, but they say their work is far from over.” In a press conference Friday, the Oathkeepers “urged lawmakers to investigate the BLM for what they call a history of constitutional violations.” Joseph Rice said, “BLM has willfully gone in and violated the civil rights of the miners, and that is a violation of due process and the violations against the fourth amendment against illegal search and seizure.”

TWO BLM EMPLOYEES HONORED BY PUBLIC LANDS FOUNDATION FOR WORK ON LANDER OFFICE RESOURCE MANAGEMENT PLAN. The [County 10](#) (5/31) reports that two BLM “employees from Lander were presented with the Outstanding Public Lands Professional Award for their achievements and dedication to managing America’s public lands.” Richard Vander Voet and Sue Oberlie were “recognized by the Public Lands Foundation and the BLM for their work on the nationally significant Lander Office Resource Management Plan (RMP).”

ARIZONA SHERIFF OPPOSES PROPOSED GRAND CANYON WATERSHED. The [St. George \(UT\) News](#) (5/30, 3K) reports that “the Mohave County Sheriff’s Office in Arizona announced Thursday that Sheriff Jim McCabe has sent letters to federal officials in opposition to the proposed Grand Canyon Watershed National Monument.”

SEN. HATCH RAISES CONCERNS ABOUT BLM’S RESTRICTIONS ON RANCHING, GRAZING. In an op-ed for the [St. George \(UT\) Spectrum](#) (5/31, 46K), Sen. Orrin Hatch warns that the BLM’s “growing restrictions on ranching and grazing operations could threaten our way of life.” He writes that “to address the BLM’s mismanagement and restore our rangeland health, I have introduced the Grand Staircase-Escalante National Monument Grazing Protection Act.” Hatch says the legislation would “restore livestock grazing and direct the BLM to create and implement a management program within the areas of the Monument to improve rangeland conditions for wildlife and livestock carrying capacity.”

ARMED OPPOSITION TO FEDERAL GOVERNMENT CRITICIZED. The [Salt Lake \(UT\) Tribune](#) (6/1, 470K), Lauren Howells, the Karen Shepherd Fellow with the Alliance for a Better Utah, criticizes the response by “armed protesters in both Nevada and Oregon. She writes that “violence and the threat of violence against government agents warrant public dialogue.” Howells argues that “such aggressive and rogue tactics are incompatible with the democratic values that have shaped our nation since inception.” Instead, Howells asks, “isn’t a much better weapon for political change — and one that is more closely aligned with fundamental American values — the ability to freely engage in political discourse without the threat of violence?”

Fish and Wildlife Service:

OBAMA ADMINISTRATION CLOSE TO BREAKING DELISTING RECORD. The [Greenwire](#) (5/29, Subscription Publication) reports that “the Obama administration intends to remove more recovered species from the federal lists of endangered and threatened wildlife and plants than all previous administrations combined, according to a recently released White House regulatory plan.” The article notes that “the target – set tentatively for the end of September – has divided advocates and critics of the Endangered Species Act, the landmark law that established processes for adding imperiled species to the lists and removing them when they are no longer at threat of extinction.” According to the article, “under President Obama, the Fish and Wildlife Service has delisted 12 species – already more species declared recovered than in any single administration since ESA was enacted in December 1973.”

WISCONSIN TO RECEIVE \$36.5 MILLION FOR CONSERVATION PROGRAMS. The [Milwaukee Journal Sentinel](#) (5/30, Smith, 784K) reports that “Wisconsin will receive \$36.5 million for conservation programs and projects in 2015, part of a \$1.15 billion apportionment of excise tax revenues to states from the U.S. Fish and Wildlife Service.” The article notes that “the funding comes from the Federal Aid in Wildlife Restoration and Sport Fish Restoration programs, also known as Pittman-Robertson and Dingell-Johnson, respectively, for the laws that established them.” FWS Director Dan Ashe said, “These funds are the cornerstone of state-based efforts that are critical to the preservation of America’s wildlife and natural resources. But they are also the fuel for a massive financial engine that benefits outdoor recreationists, hunters, boaters and anglers, equipment manufacturers and retailers, and local and regional economies. Their value cannot be overstated in providing opportunities for the next generation of Americans to get outdoors, experience our wild places and learn the importance of conserving our natural heritage.”

NATIVE AMERICAN PASTOR EMBROILED IN LAWSUIT OVER EAGLE FEATHERS. The [Washington Post](#) (5/27, Phillip, 5.03M) reports that “nearly a decade after a federal agent with the U.S. Fish and Wildlife Service entered a sacred powwow in McAllen, Tex., to confiscate them, pastor Robert Soto finally has his eagle feathers back.” However, “a cloud of fear still hangs over his congregation.” According to the article, “Soto and other members of the church have been locked in a legal battle with federal officials over their right to use eagle feathers in Native American religious ceremonies as their people have done for centuries.” Last week, they were scheduled to “appear before a federal judge in the latest chapter of this legal drama that observers have called ‘one for the ages.’”

FWS TO CONTINUE PROTECTIONS FOR BONE CAVE HARVESTMAN. [The Hill](#) (6/1, Devaney, 533K) reports that the FWS says "it will continue protecting a blind spider-like creature known as the Bone Cave harvestman." The service "rejected a petition to remove protections from the Bone Cave harvestman, which is endemic to Texas." The agency wrote, "Based on our review, we find that the petition does not present substantial scientific or commercial information indicating that the petitioned action may be warranted. Therefore, we are not initiating a status review in response to this petition."

RESTORATION PROGRAM APPEARS TO HAVE SUCCEEDED IN SAVING SHOREBIRDS. The [Washington Post](#) (5/29, 5.03M) reports that "a crash program to restore New Jersey bay and ocean beaches wrecked by Hurricane Sandy appears to have succeeded in saving tens of thousands of shorebirds that otherwise might have died after the October 2012 storm wiped out their feeding grounds." According to the article, "the restoration of Delaware Bay beaches succeeded in widening the habitat for the crabs to lay eggs and for birds to land and chow down." Meanwhile, "a few miles away, New Jersey Audubon and the U.S. Fish and Wildlife Service have restored nesting grounds for endangered shorebirds on a stretch of ocean beach."

NINE STATES BACK UTAH RULING TOSSING FEDERAL PRAIRIE DOG RULES. The [AP](#) (5/29, Whitehurst, 2.29M) reports that "nine states have stepped into a lawsuit over the Utah prairie dog to support a ruling that animal activists say threatens to undermine the Endangered Species Act." According to the article, "the attorneys general asked an appeals court to uphold a ruling striking down federal protections for the Utah prairie dog on private property." They claimed that "federal authorities shouldn't be managing animals that live only within state borders."

SIX COMPANIES SUBMIT BIDS FOR WETLANDS RESTORATION PROJECT IN MISSOURI. The [AP](#) (6/1, 2.29M) reports that "six companies have submitted bids for a \$1.1 million wetlands restoration project in southwest Missouri." Scott Hamilton, with the FWS, says "six companies submitted bids on the project, which involves 250 acres of land north of Webb City." A decision on the company selected may arrive in June.

FIGHT AGAINST DEADLY BAT DISEASE IN THE BLACK HILLS CONTINUES. The [AP](#) (6/1, Feldman, 641K) reports that "as a disease that has ravaged the population of the northern long-eared bat continues to spread throughout most of its habitat, scientists are looking at the Black Hills as the last bastion of hope for the species' continued survival." The article notes that "although the bats were listed as 'threatened' and placed on the endangered species list on April 2 by the U.S. Fish and Wildlife Service, a special exemption was placed in the ruling that essentially eliminated most of the protections the bats would normally get for their habitat in the Black Hills." The Center for Biological Diversity filed a lawsuit against the FWS "on the same day the ruling that included the exemption was passed."

DECISION ON JUNE SUCKER MADE. The [Provo \(UT\) Daily Herald](#) (6/1, 130K) reports that "officials have decided which option to implement in the recovery of the June sucker, an endangered fish that only occurs naturally in Utah Lake." According to the article, "the Utah Reclamation Mitigation and Conservation Commission, and the Department of the Interior both selected Alternative B, the preferred alternative, in their official record of decision."

GRIZZLY RESEARCHERS WORKING NEAR SALMO-PRIEST WILDERNESS. The [Spokane \(WA\) Spokesman-Review](#) (5/31, 172K) reports that "federal grizzly bear researchers are working near the Salmo-Priest Wilderness to trap and fit GPS collars on grizzly bears. They also are 'trying to get DNA samples from other bears to help determine the number of grizzlies in the Idaho-Washington Selkirk Mountains."

STUDY SAYS FROG DEFORMITIES IN ALASKA COULD BE RELATED TO WARMING, COPPER. The [AP](#) (6/1) reports that "federal and university scientist have found new evidence that Alaska wood frogs may be hurt by warming water and pollution." According to the article, "frogs in southcentral and eastern interior Alaska have been detected with missing limbs, abnormal eyes and other physical problems." Researchers from Alaska Pacific University, the U.S. Fish and Wildlife Service and the University of California, Davis "in a study published in the journal *Ecosphere* conclude that wood frog tadpoles found in warmer water that contains minute traces of copper are attacked more quickly and frequently than tadpoles in clear, cooler water."

Also reporting on the story is the [Alaska Dispatch News](#) (5/30, 216K).

ADDITIONAL COVERAGE FWS TO HUNT FOR SEA LAMPREY IN DETROIT RIVER. Additional coverage that a FWS crew will be searching the Detroit River for sea lamprey was provided by the [Detroit News](#) (5/30, 523K).

ADDITIONAL COVERAGE OF KILLING OF PROTECTED WOLF IN COLORADO. Additional coverage of the killing of a protected gray wolf in Colorado was provided by [Reuters](#) (5/29).

ATTACKS ON ENDANGERED SPECIES ACT CRITICIZED. In an op-ed for the [San Francisco Examiner](#) (6/1, 412K), Gail Mallinson, the director/producer of *The Edge of the Wild*, writes that "the Endangered Species Act is under serious attack in Congress this year." She notes that "Republicans have vowed to dismantle the Act, which would leave privately held wilderness areas in the US open for development, logging, or mining" and "President Obama has also called for changes to the Act that would make it even more difficult for rare species to become designated as endangered, usually the only stopgap between a very rare species and its demise." Mallinson hopes that the story of San Bruno Mountain "shows the folly of disabling or diminishing the Endangered Species Act, and of what can happen if this important law isn't upheld."

US Geological Survey:

SENSOR MALFUNCTIONS RESULT IN THREE FALSE ALARMS. The [Los Angeles Times](#) (5/30, Welsh, 4.03M) reports that "in the past two days, malfunctions in the network of sensors that detect earthquakes in Northern California have issued three false alarms, forcing the U.S. Geological Survey to make a series of embarrassing retractions." USGS officials said "they are working to repair the problem and prevent future false alarms."

ADDITIONAL COVERAGE OF "SAN ANDREAS" FILM. Additional coverage of the disaster film "San Andreas" was provided by [Southern California Public Radio](#) (5/29, 85K).

Securing America's Energy Future:

Renewable Energy:

CONCERNS RAISED OVER THREAT OF LARGER WIND TURBINES TO BIRDS. In an op-ed for the [Vineland \(NJ\) Daily Journal](#) (5/31, 58K), Michael Parr, vice president and chief conservation officer for the American Bird Conservancy, writes that "a new report from the U.S. Fish and Wildlife Service calls into question the wind industry's assertion that birds fly well above wind turbines' rotor blades." Parr suggests that "before we rush to build thousands of turbines taller than many skyscrapers, with blade tips that often spin in excess of 100 miles per hour, we should pause to examine what we already know about turbines' impacts on wildlife."

COURT BLOCKS WIND FARM OFF ATLANTIC CITY. The [AP](#) (5/29, Parry) reports that a New Jersey appeals court has blocked a plan to build a wind farm three miles off of Atlantic City. Fishermen's Energy will appeal the decision to the state Supreme Court. The plan has been rejected by New Jersey regulators three times over concerns that the firm's Chinese partner, Xiangtan Electric Manufacturing Group, was financially unsound. The US Department of Energy pledged upwards of \$47 million to the project in 2014.

RESEARCH ON WIND TURBINE SIZE, BIRD KILLS CALLED FOR. Writing in the [Tulsa \(OK\) World](#) (6/1, Parr, 456K), American Bird Conservancy vice president and chief conservation officer Michael Parr argues that more research is needed to ensure that new wind turbines built at a height of 360 feet do not result in the deaths of hundreds of thousands more migratory birds. He claims that "scientists have estimated that as the number of turbines increases, they could kill more than a million birds each year by 2030." As a solution, Parr proposes avoiding building turbines in migration routes along the Atlantic seaboard and the Great Lakes, shutting turbines off during migration season in the spring and fall, and creating a map limiting wind farming areas with respect for bird flight as is done with respect to commercial aviation.

Onshore Energy Development:

COLOWYO MINE URGES OSM TO APPEAL COURT'S RULING. The [Grand Junction \(CO\) Daily Sentinel](#) (6/1, 73K) reports that "the Colowyo coal mine in northwest Colorado has asked a federal judge to stay his ruling that could force closure of the mine, saying the mine is likely to prevail on appeal." Colowyo, meanwhile, "encouraged the federal Office of Surface Mining also to appeal the May 8 ruling by U.S. District Judge R. Brooke Jackson that gave the federal agency until Sept. 5 to deal with fault he found in the environmental assessment for the mine's permit." But WildEarth Guardians, "which brought the suit, said the federal agency's failure to fully consider the effects of the mine on climate change ought not to be ignored."

Also reporting on the story is the [Denver Post](#) (6/1, Raabe, 894K).

Conservation Group Makes Waves With Lawsuits. The [Craig \(CO\) Daily Press](#) (5/29, 10K) reports that "through a series of federal lawsuits," WildEarth Guardians is "reshaping the way the federal government enforces environmental laws." The article notes that "the most recent example is a claim brought against the Department of the Interior's Office of Surface Mining, Enforcement and Reclamation regarding the approval of plans to mine federal coal at two locations in Northwest Colorado."

Paper Defends Colowyo Coal Mine. In an editorial, the [Craig \(CO\) Daily Press](#) (5/29, 10K) criticizes WildEarth Guardians for its lawsuit. The paper says that "Colowyo Coal Mine and Trapper use mechanisms to keep dust down at the mines. They have intense reclamation processes. They are not here to destroy the earth. They're here to keep the lights on."

WYOMING, COLORADO WANT BLM FRACKING RULE BLOCKED. The [AP](#) (5/29, 2.29M) reports that "Wyoming and Colorado are asking a Federal judge to block the US Bureau of Land Management from implementing its hydraulic fracturing rule." The two states on May 29 asked US District Judge Scott Skavdahl of Casper to issue an injunction against the BLM. "Wyoming Gov. Matt Mead says his state has led the way in enacting its own responsible rules for hydraulic fracturing," the article reports, adding that the governor "says the Federal rule would hurt the state's economy."

Additional coverage was provided by the [Denver \(CO\) Post](#) (6/1, 894K) and the [Grand Junction \(CO\) Daily Sentinel](#) (6/1, 73K).

BLM SEEKS TO LOWER MINE PERMITTING TIMELINE. The [Elko \(NV\) Daily Free Press](#) (6/1, 22K) reports that BLM Director Neil Kornze, "who comes from a mining family and spent most of his childhood and teenage years in northeastern Nevada's mining community, said the agency is actively working to cut down on the permitting process for mines on federal land." During a May stop in Elko, he said, "We're requesting (from mining companies) more information up front, which allows us to be more timely in the processing of the application." Kornze "cited the Pan Mine in White Pine County as a notable example."

IMPACT OF ADMINISTRATION'S "WAR ON COAL" CAMPAIGN CONSIDERED. In a 7,000-word article, [Politico](#) (5/30, Grunwald, 1.11M) examined the Administration's "war on coal," which "has quietly transformed the U.S. electric grid and the global climate debate."

HEADLINE ADDITIONAL COVERAGE OF BLM'S FRACKING RULE. Additional coverage of the BLM's fracking rule was provided by the [Green Biz](#) (6/1, 1K).

CONCERNS RAISED OVER THREAT OF OIL, GAS DRILLING TO CHACO CANYON. In an op-ed for the [Albuquerque \(NM\) Journal](#) (6/1, 241K), Paul F. Reed, a preservation archaeologist, writes that "Chaco Canyon and the greater Chaco landscape" are threatened by oil and gas drilling. Reed urges the BLM to use "a tool known as a 'master leasing plan' for the greater Chaco landscape to ensure we strike a balance between responsible energy development and the protection of communities and cultural resources." He claims that "this approach can help ensure that where development does occur, it happens responsibly, and not to the detriment of people, natural resources and cultural resources."

Offshore Energy Development:

AGENCIES DEFEND OIL SPILL RESPONSE. The [AP](#) (5/30, Blood, Chang) reported Coast Guard Capt. Jennifer Williams, who is overseeing the "massive oil cleanup along the California coast," said, "We had people on the ground on day zero." The initial response to the spill is "under scrutiny in recent days by environmentalists and witnesses who felt little on-the-ground cleanup was done on the first day." Williams noted that "agencies had a playbook to follow including having a cultural monitor on the beach so workers didn't accidentally trample on artifacts." Challenges workers faced included high tide, choppy waters, lights casting shadows when work continued after dark, and the time needed for volunteers' safety training.

In another article, the [AP](#) (5/29, Blood, Chang) reported, "Steve Calanog, the deputy on-scene coordinator with the Environmental Protection Agency, said the first hours were devoted to hatching a plan to clean up the mess." He explained, "In order to be most efficient, we need to be able to size up the situation first in order to effectively develop plans to respond to it."

More Deaths Of Marine Mammals Brought To SeaWorld To Recover From Oil Spill. The [Los Angeles Times](#) (5/29, Perry, 4.03M) reported that SeaWorld San Diego officials said that two sea lions and a seal who were brought to the park "from the Refugio State Beach oil spill have died." In total, "four sea lions, an elephant seal, and two dolphins brought to SeaWorld have not survived," and the park is still "caring for 17 sea lions and five elephant seals."

The [San Diego Union-Tribune](#) (5/30, Shroder, 579K) also covered this story.

PROPOSED ARCTIC DRILLING REGULATIONS CRITICIZED. In an op-ed for the [Alaska Dispatch News](#) (5/29, 216K), Sen. Cathy Giessel writes that "while the resumption of Arctic exploration in the Chukchi this summer would be a significant advancement, the Interior department's proposed regulations applicable to Arctic offshore exploration drilling could deal a serious setback to long-term efforts to responsibly explore and produce energy in this vital region." Giessel argues that "the regulations proposed to apply to Arctic offshore exploration drilling are redundant, overly prescriptive and excessive, and may in fact increase safety and environmental risks." She concludes that "the necessary path forward is clear: rather than finalize the proposed Arctic exploration drilling regulations, DOI must go back to the drawing board to lay out a revised and thoughtful proposal."

Additional coverage of Arctic drilling was provided by [Roll Call](#) (6/1, 99K) and the [Ashland \(OR\) Daily Tidings](#) (6/1, Honoré, 10K).

Tackling America's Water Challenges:

ACTION URGED ON COLORADO RIVER. In an op-ed for the [Pueblo \(CO\) Chieftain](#) (6/1, 79K), Nathan Fey is the Colorado stewardship director for American Whitewater, writes that "with the release of phase two of the federal Colorado River Basin Study report, it's time to move beyond talk to action." He argues that "there is enough water to sustain our state, and the rest of the West, if we use it wisely." Fey suggests "moving from an outdated approach to water management based on dam and pipeline building, to an innovative, visionary strategy rooted in using the water we have more wisely and restoring water to our overdeveloped river systems."

CALIFORNIA URGED TO TACKLE WATER ISSUES. In his column for the [Los Angeles Times](#) (5/30, Hiltzik, 4.03M), Michael Hiltzik writes that the solutions to California's water issues "depend on long-range thinking." According to Hiltzik, the Bay Delta "tunnels themselves may not be the best solution to the water crisis, but billions of dollars in construction — whether new groundwater storage; environmentally sensitive conveyance, flood control and recycling systems; even desalination plants in the few locations where they can do the most good — plainly will be needed."

DROUGHT POTENTIALLY DAMAGING TO CALIFORNIA'S ALMOND ORCHARDS. [NBC Nightly News](#) (5/31, story 8, 2:05, Quintanilla, 7.86M) reported that California's drought "could pose a problem for one of the state's biggest crops." NBC (Jackson) focused on the impact on the almond crop, as California "grows 80 percent of the world's almonds." They are "getting more popular in other countries and more profitable here, which is why many farmers are replacing crops like cotton with orchards." However, they are a water-intensive crop, and farmers are being forced to adopt more stringent water-use measures.

Empowering Native American Communities:

OSAGE NATION TO START OUTREACH FOR LAND BUY-BACK PROGRAM. The [Osage News](#) (5/27) reports that Principal Chief Geoffrey Standing Bear signed the "initial agreement to begin outreach for the Land Buy-Back Program in the Osage Nation." Outreach efforts will start in late June and early July. Outreach efforts will "include town hall meetings, mail outs, advertisements, three short-term positions, and a social media push designed to notify restricted landowners of the opportunity to sell their land interest, said Bruce Cass, Tribal Development and Land Acquisition director."

Additional coverage was provided by the [Round House Talk \(OK\)](#) (5/28), the [Nation Sun News](#) (5/28), the [Tulsa \(OK\) World](#) (5/28, 456K), the [Oklahoman](#) (5/31, 506K), and the [Oklahoma Journal Record](#) (5/28, Staff, 9K).

LAND BUY-BACK OFFICIALS MAKE PRESENTATION TO TURTLE MOUNTAIN TRIBE. The Turtle Mountain Times reports that Interior Department officials presented a PowerPoint presentation to the Turtle Mountain Tribe. According to the article Turtle Mountain is "going to be allocated 9 million dollars for the purchase." Offers will be sent around March of next year.

TWO MEMBERS OF JAMUL INDIAN VILLAGE SUE BIA. The [Courthouse News](#) (5/29, 7K) reports that two "Jamul Indians sued the Bureau of Indian Affairs and a casino company for \$4 million, claiming they dug up their ancestors' remains and dumped them by a freeway." According to the article, "two members of the Jamul Indian Village in San Diego County say their ancestors' cemetery was excavated and 'unceremoniously dumped' on a Caltrans highway construction site, with the approval of the Bureau of Indian Affairs and other members of the Indian community, whom they also sued." Plaintiffs Walter Rosales and Karen Toggerly "claim the casino project and cemetery excavation are taking place without proper permits and violate environmental law."

Also reporting on the story is the [San Diego Reader](#) (5/31, 241K).

SOBOBA TRIBE ADDS LAND TO RESERVATION. The [Riverside \(CA\) Press Enterprise](#) (6/1, 395K) reports that "more than 500 acres of land were added to the Soboba Reservation on Friday, May 29." Soboba Tribal Chairwoman Rosemary Morillo and Amy Dutschke from the BIA "completed a process that started 12 years ago." The Soboba

Band of Luiseno Indians "eventually plans to relocate its casino to the property, which includes the Country Club at Soboba, where the signing ceremony took place."

TRIBES WANT CONGRESS TO REVIEW MAINE INDIAN CLAIMS SETTLEMENT ACT. The [Bangor \(ME\) Daily News](#) (5/30, 179K) reports that "Maine tribal leaders are calling on Congress to take a fresh look at the 35-year old Maine Indian Claims Settlement Act to determine whether state officials are misinterpreting and misusing the agreement." According to the article, "a series of longstanding disputes between the state and tribes over issues ranging from water rights to gaming came to a head Tuesday, when the Passamaquoddy and Penobscot tribes withdrew their representatives from the Maine Legislature." On Wednesday, "tribal leaders held a news conference in which they called on Congress to start an inquiry into the settlement act and how Maine state officials have used it to argue their views in disputes over sovereignty, application of laws and authority."

ADDITIONAL COVERAGE LAND BUY-BACK OFFERS SENT TO 6,500 AT CHEYENNE RIVER INDIAN RESERVATION. Additional coverage of the land buy-back offers sent to Cheyenne River Indian Reservation landowners was provided by the [Round House Talk \(OK\)](#) (5/8), the [Round House Talk \(OK\)](#) (5/7), and the [Native News Online](#) (5/31).

Office of Insular Affairs:

ASSISTANT SECRETARY KIA'AINA TO VISIT GUAM. The [Marianas Variety](#) (6/1) reports that Assistant Secretary for Insular Areas Esther Kia'aina will "visit Guam from June 1 to 7 where she will confer with Guam Gov. Eddie B. Calvo and other leaders on a range of policy issues and convene the U.S. insular areas climate change stakeholder meeting." Kia'aina said, "My expectation is that through this meeting, the federal government will be better able to assess and help each of the Insular Areas develop climate change action plans, depending on their varying needs. This in turn would favorably position the Insular Areas to secure the necessary funding resources and assistance they will need for the implementation of such plans to improve their capacities for climate change adaptation and resiliency strategies."

Additional coverage was provided by [KUAM-TV Dededo \(GUM\)](#) Dededo, GUM (5/31, 171).

Top National News:

PATRIOT ACT PROVISIONS EXPIRE AS SENATE FAILS TO REACH DEAL. Provisions of the Patriot Act expired at midnight after the Senate adjourned a rare Sunday session without a deal to extend them. The Senate did vote to limit debate on the USA Freedom Act, but a final vote on the measure cannot occur until later this week unless all senators agree, which Sen. Rand Paul refuses to do. Coverage of the Senate session is extensive. Amid heavy print and online coverage, the three network news broadcasts – which ran before the midnight deadline – spent five minutes and 20 seconds on the story. The coverage casts Majority Leader McConnell's call for senators to vote for the USA Freedom Act as a major turnaround on his part, while much attention is given to Paul's role in slowing Senate consideration of the bill.

[Politico](#) (5/31, Raju, Everett, 1.11M) calls the fact that the provisions "temporarily lapsed" a "troubling development for Senate Republicans in just their fifth month in the majority," but adds that the Senate "overwhelmingly" voted to advance "the USA Freedom Act." While the measure "easily cleared a filibuster in a 77-17 vote that appeared to set the stage for eventual passage," it was "not the outcome envisioned by...McConnell," who had "hoped to pass a temporary extension of current law to avoid a midnight shutdown of three PATRIOT Act programs, including the controversial 'bulk data' phone record collection program." [USA Today](#) (6/1, Kelly, 5.01M) says the debate "highlighted sharp divisions within the GOP over privacy concerns and national security and carried immediate implications for government surveillance programs."

The [New York Times](#) (6/1, Steinhauer, Weisman, Subscription Publication, 12.24M) says McConnell "relented Sunday, setting up a final round of votes on Tuesday or Wednesday that will most likely send a compromise version of the House bill to President Obama for his signature," and the [AP](#) (6/1, Werner, Dilanian) says McConnell "reluctantly embraced" the bill in an "about-face" after he had "no other options."

The [AP](#) (6/1) also provides a roll call of the Senate vote, while a front-page story in the [Los Angeles Times](#) (6/1, A1, Mascaro, 4.03M) says "no final vote on that measure can take place until later this week unless all senators agree, which Sen. Rand Paul (R-Ky.) refused to do."

Tom Llamas reported on [ABC World News](#) (5/31, story 4, 0:25, Llamas, 5.84M) that senators were "working against the clock in a rare Sunday session," and Kristen Welker reported on [NBC Nightly News](#) (5/31, story 3, 2:50, Quintanilla, 7.86M) that while the senators were "working to keep the government surveillance program intact," Paul was "vowing to block it." Jeff Gior also called the Sunday session "rare" on the [CBS Evening News](#) (5/31, story 2, 2:05, Gior, 5.08M), and Julianna Goldman added that while "senators rushed back from recess," they did so "without a clear path for a compromise."

On [CNN's State Of The Union](#) (5/31, Sciutto, 420K), Sen. Mike Lee said, "I do believe we have the votes. At this point I think the question is not about whether we will get it passed, but when," and Sen. Angus King said on [CNN's State Of The Union](#) (5/31, Sciutto, 420K), "I support the concept of moving the data out of the government. I think that's a good idea from a privacy point of view. My concern is, if you move it out of the government and leave it with the phone companies and the phone companies say we will hold that data for a week or month or six months, then the program loses its functionality altogether and you repealed it altogether without saying so."

When asked if he would be voting for the USA Freedom Act, Sen. Bernie Sanders, a presidential candidate, said on [NBC's Meet the Press](#) (5/31, Todd, 3.08M), "I may well be voting for it. It doesn't go as far as I want it to go. I voted against the Patriot Act and reauthorization of the Patriot Act. We have to be vigorous in protecting the American people but we have to protect the Constitutional rights of the American people."

[Politico](#) (5/31, Nelson, 1.11M) reported that CIA Director Brennan on Sunday called the Patriot Act "integral" to US efforts to combat terrorism," saying that "the tools in the act have helped thwart terrorist attacks in the dozen years since they were enacted." While Brennan did not address the Act's provision "allowing for the bulk collection of phone and other data," he did respond to Paul's "harsh criticism of the act without directly naming him," telling [CBS' Face The Nation](#) (5/31, Wallace, 2.64M), "Unfortunately, I think there's been a little bit too much political grandstanding and crusading for ideological causes that have skewed the debate on this issue, but these tools are important to American lives." The [Wall Street Journal](#) (6/1, Lee, Peterson, Subscription Publication, 5.68M) notes that while he did not cite any specific incident, Brennan said the programs "really have helped stop attacks."

Former NSA Director Michael Hayden said on [Fox News Sunday](#) (5/31, Wallace), "There's a bit of a political consensus right now. The NSA needs access to metadata." Hayden added, "Why would reasonable people take off the table tools that I believe are lawful, and around which there's already a political consensus? If the vote goes forward most of these things go on. Why would we give up things to keep us safer?"

The [Wall Street Journal](#) (6/1, Paletta, Subscription Publication, 5.68M) says now that the program has expired, the government will still have the ability to access telephone records, it could require grand-jury approval and a subpoena, which could take longer than the current program, but an analysis in the [New York Times](#) (6/1, Savage, Subscription Publication, 12.24M) says that "interviews with law enforcement and intelligence officials about what they will do in the interim suggests there are multiple workarounds to the gap."

[McClatchy](#) (6/1, Cockerham, 32K) says that while Paul "was able to use Senate rules to object and prevent a final vote on the bill on Sunday night," the Senate "could pass it as soon as Tuesday," meaning "the NSA's surveillance powers might lapse for little more than a day," and the [Huffington Post](#) (5/31, Watkins, 194K) said Paul ran down "the procedural clock in a sensational emergency session Sunday night," leaving the Senate "in a stalemate on the House-passed USA Freedom Act."

However, [Reuters](#) (6/1, Zengerle, Strobel) notes that Paul acknowledged that after the vote, saying, "This bill will ultimately pass." Nonetheless, the [Washington Post](#) (6/1, Nakashima, Debonis, 5.03M) says Paul "declared victory because the House bill...would end the government's collection of phone records."

Several stories this morning consider the effect Paul's stance is having on his relationship with the Republican establishment as well as how it is being received by Republican voters in Iowa. The [Washington Times](#) (6/1, McLaughlin, 641K) reports that GOP analysts say Paul's effort "carries both risk and reward" for his presidential hopes, noting that while it is "helping him solidify his libertarian-leaning base," it "could further alienate voters that already have questions about his world view." A separate story in the [New York Times](#) (6/1, Weisman, Subscription Publication, 12.24M) says Paul's "stand was a lonely one," and ultimately it "only delayed passage of the USA Freedom Act." Nonetheless, "Sunday was Mr. Paul's moment." Paul's "protest of the surveillance program has no doubt solidified his position with the libertarian wing of his party." However, his "one-man stand was a big gamble," as Paul "has spent more than a year cozying up to Mr. McConnell, trying to bolster his bona fides with the party establishment." It now "appears that those overtures might have been for naught."

The [Washington Post](#) (6/1, Hohmann, 5.03M) says that while Paul "has tried to use the issue in recent days to revive his struggling presidential campaign" in Iowa, many Republican voters there "have responded with unease." Some have "said that they simply could not agree with his argument that the National Security Agency's bulk data collection was an unreasonable invasion of privacy." The Post adds that Paul's "hard-line stance on the NSA has so far found little resonance among the rank-and-file Republicans that he will need to win over if he hopes to find success in the caucuses."

Paul Campaign Video May Violate Senate Rules. [Politico](#) (5/31, Everett, 1.11M) reported that a video released by Paul's campaign on Friday violates the Senate's strict prohibition on the "use of its proceedings for campaign activities." In the video, which "includes explicit links to a campaign donation page, Paul...extensively uses footage from

his lengthy speech on the Senate floor on May 20 against bulk data collection and surveillance in the PATRIOT Act." This, despite the "standing rules of the Senate," which state, "The use of any tape duplication of radio or television coverage of the proceedings of the Senate for political campaign purposes is strictly prohibited."

Other Presidential Hopes Weigh-In. Other 2016 presidential candidates also discussed the issue on the Sunday shows. Former Florida Gov. Jeb Bush said on [CBS' Face The Nation](#) (5/31, Schieffer, 2.64M), "t's not a violation of civil liberties. There's not a shred of evidence that the metadata program violated anybody's civil liberties. The first duty of our national government is to protect the homeland and this has been an effective tool, along with many others. The Patriot Act should be reauthorized."

Former New York Gov. George Pataki said on [CNN's State Of The Union](#) (5/31, Sciutto, 420K), "We are at as great a risk today as we have been at anytime since 9/11 of another terrorist attack. I hope the Senate can get it done today. They should reauthorize the Patriot Act."

Former Sen. Rick Santorum said on [NBC's Meet the Press](#) (5/31, Todd, 3.08M), "I think the Patriot Act has worked very well. I'm not aware of any abuses of the Patriot act that caused undue fear of invasion of privacy. ... I would vote for [the House bill] and as President I would sign it."

Ben Carson said on [ABC's This Week](#) (5/31, Stephanopoulos, 2.73M), "I certainly believe that there is a correlation between some of the steps that have been taken since 9/11 and the fact that we haven't had other major insults. Having said that, I think we really have to protect the Constitution and the Fourth Amendment."

FOLLOWING SON'S DEATH, BIDEN RECEIVES BIPARTISAN CONDOLENCES. Coverage of the death of Vice President Biden's son, former Delaware Attorney General Beau Biden, who died Saturday at age 46 following a long battle with brain cancer, continued Sunday evening and this morning, with many reports noting that condolences were going out to the Biden family from across the political spectrum. The three network news broadcasts spent nearly nine minutes on the story, which led two of the broadcasts Sunday evening.

Tom Llamas reported on [ABC World News](#) (5/31, story 3, 2:25, Llamas, 5 84M) that condolences are "pouring in" following the death of the Vice President Biden's oldest son. Jim Avila noted that in a statement the President and First Lady "called him a close friend, full of love, honor and service, who will live on in our hearts." In the lead story for the [CBS Evening News](#) (5/31, lead story, 3:25, Glor, 5.08M), Jeff Glor noted that there has been "an outpouring of grief for the Vice President's eldest son, including from Majority Leader Mitch McConnell," who said before a rare Sunday Senate session, "The Senate offers its presiding officer and every member of his family our prayers and our sympathy." Similarly, Chris Jansing reported in the lead story for [NBC Nightly News](#) (5/31, lead story, 3:00, Quintanilla, 7.86M) that "in a town often torn apart by partisanship," there was "a bipartisan outpouring of grief" for Biden.

CONGRESSIONAL FUNDING DELAY THREATENS NATIONAL PARKS. The [Washington Post](#) (5/24, Warrick, 5.03M) reports "A government fund that has helped preserve some of the nation's most iconic parks...could disappear as early as fall because of a congressional dispute over how the program's revenues should be spent." In an interview with the Post, Interior Secretary Sally Jewell explained Congress is divided over renewing the Land and Water Conservation Fund after 50 years because some lawmakers see the oil and gas royalties that pay for the Fund as just "a chunk of money" that they would rather reallocate to alternative projects. Additional coverage was provided by the [Denver Post](#) (5/25, Warrick, 894K) and the [Pittsburgh Tribune-Review](#) (5/25, 682K).

The [Greenwire](#) (5/22) reports that Jewell "continued her yearlong campaign to prompt Congress to reauthorize and fully fund the Land and Water Conservation Fund, visiting a historic site overlooking the Potomac River that was preserved with help from the land conservation fund." Jewell, BLM Director Neil Kornze and House Minority Whip Steny Hoyer, "along with state and local government leaders, visited the historic Chiles Homesite at Douglas Point in southern Maryland as Congress debates the fate of the 50-year-old LWCF, which is set to expire at the end of September. "

Mayors Urges Congress To Fully Fund LWCF. The [E&E Daily](#) (5/21) reports that "a bipartisan alliance of 38 mayors from across the country called on Congress today to reauthorize and fully fund" the Land and Water Conservation Fund. The Mayors for Parks Coalition wrote in a letter, "Please vote to reauthorize and fully fund LWCF before it expires this September."

Secretary Jewell Discusses Drawing New Visitors To National Parks. In an interview with [WBUR-FM Boston](#) (5/25, 123K), Interior Secretary Sally Jewell discussed drawing new visitors to national parks.

Congress To Reauthorize LWCF. In an op-ed for the [New York Times](#) (5/23, Solomon, Subscription Publication, 12 24M), Christopher Solomon, a contributing editor at Outside magazine, urges Congress to reauthorize the Land and Water Conservation Fund. He notes that "in all, the fund has provided more than \$4 billion in matching funds (leveraging another \$4 billion in state and local money) for 42,000 projects spread through every county in America."

SECRETARY JEWELL ASKED TO INTERVENE IN THREATENED COLORADO COAL MINE SHUTDOWN. The [Denver Business Journal](#) (5/22, Hendee, Subscription Publication, 62K) reports that Colorado Gov. John Hickenlooper on Friday asked Interior Secretary Sally Jewell "in a letter to 'do everything possible' to prevent a shutdown of the Colowyo Coal Mine near Craig." Hickenlooper said in the letter that the mine "contributes more than \$200 million to the regional economy and generates tax and royalties of \$12 million annually." He wrote, "Given the importance of this mine to the economies of the region, I ask that you do everything possible to respond to the judge's order and remedy the situation as expeditiously as possible."

OSMRE To Review Environmental Study. The [AP](#) (5/22, Slevin, 2.29M) reports that "federal regulators are re-doing an environmental review for a Colorado coal mine after a judge threatened to shut it down unless they took a closer look at its indirect environmental impacts, including its contribution to climate change." But "it's not clear yet whether the federal agency that granted the permit will appeal the overall ruling, which could set a precedent that might endanger mining projects elsewhere." The OSMRE "posted a notice of the review for the Colowyo Mine near Craig on Thursday, saying it would accept public comments through June 15." Agency spokesman Chris Holmes "declined to comment Friday on whether it would appeal the May 8 ruling from U.S. District Judge R. Brooke Jackson in Denver."

Judge Invited To Visit Northwest Colorado's Coal Industry. The [Craig \(CO\) Daily Press](#) (5/22, 10K) editorializes that it is "troublesome that Federal District Judge R. Brooke Jackson ruled that OSM has only 120 days to complete an environmental assessment for mining plans." The editorial asks Interior Secretary Sally Jewell and OSM to appeal Federal District Judge R. Brooke Jackson's decision, and it invites "the judge to visit Northwest Colorado's coal industry."

Additional Coverage. Additional coverage was provided by the [Denver \(CO\) Post](#) (5/25, Jaffe, 894K), the [Craig \(CO\) Daily Press](#) (5/22, 10K), the [Grand Junction \(CO\) Daily Sentinel](#) (5/25, 73K), the [Denver \(CO\) Business Journal](#) (5/22, Hendee, Subscription Publication, 62K), and [WKMS-FM Murray \(KY\)](#) Murray, KY (5/25, 5K).

SENATE DEMOCRATS URGE OBAMA ADMINISTRATION TO BLOCK ARCTIC DRILLING. [Politico Pro](#) (5/22) reports that "eighteen Senate Democrats, led by Sen. Jeff

Merkley and including likely future caucus leader Sen. Chuck Schumer, rapped the Obama administration today for advancing Shell's bid to tap offshore Arctic oil reserves and urged the administration to backtrack on a move they said runs afoul of the president's broader climate change agenda." The Democratic senators wrote to Interior Secretary Sally Jewell, "Opening development on a new fossil-fuel reservoir in the Arctic not only puts the natural resources, ecosystems, and the dependent communities at risk, it also contradicts the President's Climate Action Plan to limit greenhouse gas emissions and reduce climate change. It is an unacceptable and irresponsible decision."

Additional coverage was provided by [Reuters](#) (5/23), [Energy Voice \(UK\)](#) (5/25), [Maritime Executive](#) (5/25, 21), and [KTVZ-TV Bend \(OR\)](#) Bend, OR (5/25, 1K).

Environmental Groups Criticize Process For Approving Arctic Drilling. [The Guardian \(UK\)](#) (5/22, 2.93M) reports that "the Obama administration's process for giving Shell the go-ahead for restarting its drilling in the Arctic lacked transparency and prevented an informed public response, environmental groups have warned." According to the article, "the results of a third-party audit required by the US government before Royal Dutch Shell be allowed back into the US Arctic remain under wraps, and the third-party auditor – supposedly taken on to provide better oversight – was selected and paid for by Shell, the US Bureau of Safety and Environmental Enforcement confirmed." The environmental group Greenpeace warns that "the consequences of such a lack of transparency and opportunity for public scrutiny are worrying."

Environmental Activists Damage 'Precious' Marine Habitat In Shell Oil Protests. [Reuters](#) (5/23, Johnson) reported that environmental groups who have vowed to disrupt Royal Dutch Shell's plans for Arctic oil exploration, most recently by using cables to moor a floating barge to the floor of the Elliot Bay, have damaged "precious" marine habitat on the sea floor, according to state officials. The damaged area is a popular underwater area for divers interested in seeing aquatic life, and according to Department of Natural Resources spokesman Joe Smillie, damage to the area will likely have "implications to the food web."

Protestors Chain Themselves To Part Of Shell's Drilling Fleet. [The AP](#) (5/24) reported that two environmental activists have chained themselves to the anchor chain of the Arctic Challenger, which is part of Royal Dutch Shell's exploratory drilling fleet. The Coast Guard has not taken any action, but expressed concern over the health of the protesters.

Additional Coverage. Additional coverage of Arctic drilling was provided by the [Christian Science Monitor](#) (5/25, 539K), the [Indian Country Today Media Network](#) (5/22, 28K), [Oil Price](#) (5/25, 2K), the [Rock River \(L\) Times](#) (5/24, 65K), the [Des Moines \(IA\) Register](#) (5/23, 288K), and [Northwest Georgia News](#) (5/25).

CONSERVATIONISTS, OUTDOORSMEN DECRY SENATE SPENDING LEVELS FOR INTERIOR, EPA. [The Environment & Energy Publishing](#) (5/21, Subscription Publication, 705) reports that "conservationists and sportsmen today blasted a vote by Senate appropriators to slash available funding for federal lands agencies and U.S. EPA, warning it will force steep cuts to government services at national parks, refuges, forests and battlefields." America's Voice for Conservation, Recreation and Preservation "urged lawmakers to strike an agreement to raise spending limits similar to the bipartisan accord that was reached in late 2013 to reverse sequester cuts."

FOURTH GRADERS CAN VISIT NATIONAL PARKS FOR FREE WITH "EVERY KID IN THE PARK" INITIATIVE. [The New York Times](#) (5/22, Winchester, Subscription Publication, 12.24M) reports that "next school year, fourth graders in the United States and their families will be entitled to free admission to America's national parks, federal lands and waters." The program is part of the White House's "Every Kid in the Park" initiative, in partnership with the NPS and the National Park Foundation. Interior Secretary Sally Jewell said, "In many provinces in Canada, ski resorts give a free season pass to a particular age of child, and the objective is to introduce kids to outdoor recreation with a view that this will be on their radar. It's the same basic principle."

WHITE HOUSE SAID TO CONSIDERING NATIONAL MONUMENT IN NEVADA. [The Las Vegas Review-Journal](#) (5/25, 380K) reports that the White House is said to be considering to designate a national monument in Nevada. The proposal has divided Nevada's congressional delegation, with Democrats urging the president to act and Republicans opposing the creation of new monuments without legislative approval.

National Monument In Caldera Unlikely. [The Twin Falls \(ID\) Times-News](#) (5/25, 75K) reports that "the notion of a national monument in the Caldera around Island Park has spawned a flurry of opposition over the past two years." However, "for all that opposition, there appears to be very little hard evidence that the Obama Administration is actively considering a monument designation in the caldera."

Concerns Raised About Designating Grand Canyon Watershed National Monument. In an editorial, the [Arizona Republic](#) (5/26, 1.27M) notes that "the Obama administration is considering a presidential designation to create a 1.7-million-acre Grand Canyon Watershed National Monument." It argues that "designating a monument is a dramatic step in terms of conservation." In particular, the paper raises concerns that a designation could "threaten the water rights of private-property owners near the monument." The editorial concludes that "if that means a change in access to water, it's only reasonable that people have their voices heard."

Additional Coverage. Additional coverage of national monuments was provided by the [High Country \(CO\) News](#) (5/25, 74K), the [High Country \(CO\) News](#) (5/25, 74K), the [High Country \(CO\) News](#) (5/25, 74K), and the [High Country \(CO\) News](#) (5/25, 74K).

CONSERVATION GROUP BLASTS FIRE PLAN. [The Idaho Mountain Express](#) (5/25, 1K) reports that "by ignoring the effect that livestock grazing has on the spread of cheatgrass, a rangeland fire-management plan released by the U.S. Department of the Interior on Tuesday will not adequately protect sage grouse habitat, Hailey-based conservation organization Western Watersheds Project contends." Ken Cole, Western Watersheds Project's National Environmental Policy Act coordinator, said, "Science shows that ungrazed lands are more resilient to devastating large-scale fires. The land management agencies can sink all of the hundreds of millions of dollars into this strategy, but none of it will have any effect until land managers address the destruction caused by the sacred cows."

GRANT FROM "SAVE AMERICA'S TREASURES" PROGRAM HELPS PRESERVATION OF PITTSBURGH COURIER ARCHIVE. [The Houston Chronicle](#) (5/25, Conte, 2.29M) reports that John Brewer, a part-time historian, "has been working to preserve nearly 50,000 photographs that were part of the Pittsburgh Courier's archives." A grant the Interior Department's "Save America's Treasures" program has assisted Brewer, "with support from Rep. Mike Doyle, a Forest Hills Democrat, and Rep. John Lewis, a Georgia Democrat and civil rights pioneer."

GAO RELEASES REPORT ON WIRELESS SPENDING PLANS AT FEDERAL AGENCIES. In its "The Switch" blog, the [Washington Post](#) (5/22, Fung, 5.03M) reports that a new report from the Government Accountability Office shows "just what carriers charge our top civil servants for phone service." The article notes that the Interior Department "pays \$26.39 for 400 minutes, no texts and unlimited data." However, "it also buys a plan whose only difference seems to be the addition of text messages — and it costs 2.5 times more."

GOP ADAPTS TO CHANGING ENERGY REALITY. [Reuters](#) (5/24, Oliphant) reports that Republicans have begun to adapt to losing the political advantage over America's energy security as capital from the country's energy production boom is reaped by the Obama Administration. The article reports that the party's answer is to advocate for the repeal of the crude-oil export ban in order to highlight the reversal in the US' energy import-export balance. The shift is a polar change from the scarcity politics of the 2008 presidential campaign and former Gov. Sarah Palin's "Drill, baby, drill" slogan.

INTERIOR'S INSTAGRAM PHOTOS HIGHLIGHTED. [Wired](#) (5/22, 4.16M) highlights photos on the US Department of the Interior's Instagram feed.

NYTIMES STATE LEADERS SHOULD PUSH GE ON HUDSON RIVER CLEANUP. [The New York Times](#) (5/25, Board, Subscription Publication, 12.24M) editorializes, General Electric plans to end cleanup work this fall on the upper Hudson River, where it has been "digging up toxic PCB's, polychlorinated biphenyls, that it dumped into the river" many years ago. The river "will still be sick" and polluted at that point, "But G.E. is sticking to the letter of its obligations to the Environmental Protection Agency under the Superfund law — an agreement in 2002 to remove only so much mud, in these specific spots, over this period of time." The paper notes that "the three government agencies designated under the law as the Hudson's "natural resource trustees," public guardians of the river's health — the New York State Department of Environmental Conservation, the Interior Department and the National Oceanic and Atmospheric Administration — have warned the E.P.A. and New York State that another 136 acres of river, including the Champlain Canal, should be dredged before the project ends, or else the river's degraded health will persist decades longer." The Times urges environmental groups and state leaders and agencies to push for GE to do more before time runs out.

[America's Great Outdoors:](#)

[National Park Service:](#)

CAPITOL POLICE BLOW UP PRESSURE COOKER NEAR NATIONAL MALL. Kate Snow reported on [NBC Nightly News](#) (5/25, story 5, 0:30, Snow, 7.86M) that as thousands gathered for the Memorial Day concert on the National Mall on Sunday, Capitol Police "noticed a car with a pressure cooker inside and a strong smell of gasoline and propane." Police blew up the device and the car's owner "was charged with driving on a revoked license."

NPS TO STUDY RECONSTRUCTION SITES. [The AP](#) (5/25, Smith, 2.29M) reports that "with its four-year observance of the 150th anniversary of the Civil War now past, the National Park Service is turning its attention to a lesser-known period of American history: the era of Reconstruction after the war." The service is "embarking on a yearlong study to inventory sites throughout the South and beyond that are important to telling the sometimes-bloody story of Reconstruction — a time when 4 million blacks, freed from slavery,

worked to build lives as a free people." The NPS "plans to identify nationally important sites dealing with the Reconstruction era from the Civil War through 1900 that could be designated national historic landmarks."

NPS CONSIDERING FOUR OPTIONS FOR RIM OF THE VALLEY. The [Los Angeles Times](#) (5/23, 4.03M) reports that the NPS has "proposed adding about 173,000 acres of wildlife habitat, parks and recreational areas (Alternative C) to the existing Santa Monica Mountains National Recreation Area." However, "other conservation advocates favor Alternative D, which would add about 313,000 acres to the national recreation area."

The [Los Angeles Times](#) (5/23, Groves, 4 03M) reports that Alternative A "would leave the recreation area's boundaries unchanged." And under Alternative B, the NPS would "develop conservation partnerships with other agencies and landowners in the study area."

Additional coverage was provided by the [Los Angeles Times](#) (5/23, Groves, 4 03M).

FEDERAL GRANTS AVAILABLE FOR 17 RECREATIONAL TRAIL PROJECTS IN TEXAS. The [Eastex \(TX\) Advocate](#) (5/25) reports that "the Texas Parks and Wildlife Commission on Thursday approved \$2.38 million in federal grants for 17 recreational trail projects across the state." The National Recreational Trails Fund "comes from a portion of the federal gas tax generated by gasoline purchases for off-road motorcycles and four-wheelers."

Additional coverage was provided by the [Amarillo \(TX\) Globe News](#) (5/23, 95K).

WORLD WAR I MEMORIAL COMMISSION SEEKING MORE INCLUSIVE DESIGN. The [Washington Post](#) (5/22, Ruane, 5.03M) reports that "the 12-foot bronze statue of Gen. John J. Pershing may not be the centerpiece of a new World War I memorial at Washington's Pershing Park, the vice chairman of the U.S. World War I Centennial Commission said Friday." According to Edwin L. Fountain, "the memorial will include the 35-year-old statue of the famous World War I Army general." However, "the commission is seeking a design that will be a more inclusive commemoration of those who served in the war."

PHILADELPHIA VETERANS SEEK SUPPORT FOR BATTLE OF THE BULGE MEMORIAL. The [Stars And Stripes \(DC\)](#) (5/25, 19K) reports that "a dwindling group of elderly Philadelphia veterans wants to build a Battle of the Bulge memorial in Washington Square, a site within the city's Historic Mile they believe is a fitting place to remember the key World War II confrontation." The article notes that the veterans "need permits from the National Park Service and the Department of the Interior, as well as funds."

USPS DEDICATES LIMITED EDITION MEDAL OF HONOR VIETNAM WAR FOREVER STAMPS. [WTVW-TV](#) Evansville, IN (5/25, 4K) reports that "the US Postal Service and nearly a dozen Vietnam Medal of Honor recipients are to dedicate the Limited Edition Medal of Honor: Vietnam War Forever Stamps Monday at the Vietnam Veterans Memorial on the National Mall in Washington, DC." The event is hosted by the Vietnam Veterans Memorial Fund and the NPS.

INTERIOR WARNS OF WATER IMPACTS FROM MAJOR SOUTH RIM DEVELOPMENT AT GRAND CANYON. The [Environment & Energy Publishing](#) (5/25, Subscription Publication, 705) reports that "plans to build major commercial and residential complexes on the south rim of the Grand Canyon could imperil the park's springs and undermine the United States' conservation commitments under an international treaty, a top Interior Department official warned this month in a letter to the Agriculture Department." According to the article, "the letter urges the Kaibab National Forest to take a close look at plans by Stilo Development Group, an Italian company, to build upscale hotels, a conference center, a spa and an American Indian cultural complex in addition to new houses and townhouses in Tusayan, Ariz., within a few miles of the park." Michael Bean, Interior's principal deputy assistant secretary for fish and wildlife and parks, wrote in the May 11 letter to Robert Bonnie, who is the Agriculture Department's top official in charge of the Forest Service, "We believe the Forest Service's environmental analysis should consider impacts, including cumulative impacts, beyond the immediate footprint of the right-of-way. In particular, if the development taps into groundwater sources, it could present irretrievable loss in water resources and attendant biota associated with seeps and springs in the park."

NPS APPROVES \$11.28 MILLION PROJECT TO RENOVATE FORT VANCOUVER. The [Olympian \(WA\)](#) (5/23, 76K) reports that "an \$11.28 million project to rehabilitate historic buildings and utilities at Fort Vancouver National Historic Site will also result in moving the Gifford Pinchot National Forest headquarters to the Vancouver, Washington, site." The NPS "announced Tuesday it awarded the contract to Pacific Tech Construction, Inc., of Kelso."

NPS AWARDS FUNDING FOR CAPTAIN PENNIMAN HOUSE RESTORATION. The [Cape Cod \(MA\) News](#) (5/25) reports that the NPS has "awarded the Cape Cod National Seashore \$85,000 to re-paint the Captain Edward Penniman House in Eastham." The money "comes from the park service's Centennial Challenge Fund, which matches the \$100,000 pledged by the friends of the Cape Cod National Seashore."

IMPROVEMENT PLANNED AT BIG SPRINGS NATIONAL PARK. [KFVS-TV](#) Cape Girardeau, MO (5/25, 23K) reports that "this year the National Park Service is planning to begin several major restoration and rehabilitation projects at Big Springs in Carter County, Missouri. Some projects have already started." Big Springs will "start improvements on restoring cabins, trails and recreational areas."

SITE CHOSEN FOR THE POTOMAC YARD METRO STATION. In its "Dr. Gridlock" blog, the [Washington Post](#) (5/22, Lazo, 5.03M) reports "Alexandria took an important step Wednesday night in selecting a site for the proposed Potomac Yard Metro Station, which the city hopes to open in late 2018." Moving forward, the city "in partnership with Metro, the Federal Transit Administration and the National Park Service, will work to finalize the environmental impact statement, a federal requirement that will deliver a thorough examination of the project's impact along with a mitigation plan."

NPS, SHADDOX CEMETERY ASSOCIATION MEMBERS FACE OFF OVER GRAVEYARD FENCE. The [Northwest Arkansas Online](#) (5/24) reports that a fence installed by the Shaddox Cemetery Association members "to keep the animals out has led to an eight-year fight with the National Park Service over two-tenths of an acre of federal land within the fence." After an elk was ground "grazing among the tombstones, the cemetery association spent \$12,000 – 'not to mention a lot of blood, sweat and tears from sanding and painting' – to erect a steel fence, said Lois Willard, 63, of Marble Falls." The NPS says "the association damaged an American Indian archaeological site dating between 700 and 50 B.C. when brush was cleared to build the fence in 2007."

GOV. HERBERT SIGNS AGREEMENT OUTLINING ARCHES NATIONAL PARK WATER RIGHTS. The [St. George \(UT\) News](#) (5/23, 3K) reports that Gov. Gary R. Herbert "signed a water right agreement Friday with the U.S. Department of Interior and Arches National Park that outlines Arches' water rights and removes the possibility of future litigation." The agreement "also identifies protections for basin water users, including businesses, ranchers, farmers and those that recreate in red rock country." Herbert said, "Today's agreement between the state and federal government once again shows our ability to collaborate and solve complex challenges when we work together. These agreements don't happen overnight. They take time and a commitment from everyone involved, but we came out of this process with a fair and equitable agreement that benefits Arches and the state of Utah."

COTTONWOODS IN ZION NATIONAL PARK DYING OUT. The [AP](#) Salt Lake City (5/25, 1.07M) reports that a NPS hydrologist says "cottonwood trees dotting the red rock landscape of southern Utah's Zion National Park could die out in 30 to 50 years." Hydrologist Dave Sharrow said that "levees protecting canyon roads have kept regular floods from wetting the soil and an unchecked deer population may be eating the cottonwood seedlings that do take hold." According to Sharrow, "the park has asked for \$7 million in federal money for more than a decade to address the levees but it has not yet received the money."

Additional coverage was provided by the [Deseret \(UT\) News](#) (5/25, 538K) and [KSL-TV](#) Salt Lake City (5/25, 1 07M).

ENDANGERED BUTTERFLY FEARED MISSING AT INDIANA DUNES. The [AP](#) (5/23, 2.29M) reports that "the endangered Karner blue butterfly hasn't been found this spring at the Indiana Dunes National Lakeshore and officials say they're worried the tiny insect could be gone." According to USGS research ecologist Ralph Grundel, "surveys in the late 1990s found more than 1,000 of the butterflies in the park along Lake Michigan but those numbers declined to where only two were spotted last year."

SAND DUNE AT INDIANA DUNES NATIONAL LAKESHORE TO REMAIN CLOSED THIS SUMMER. The [AP](#) (5/22, Coyne, 2.29M) reports that "a popular sand dune at the Indiana Dunes National Lakeshore along Lake Michigan will remain closed this summer as scientists study what caused a boy to nearly be buried alive in 2013, a park spokesman said Friday." According to the article, "a team of scientists have been studying Mount Baldy, which is more than 120 feet tall, to determine what caused a hole that trapped Nathan Woessner under 11 feet of sand for more than three hours on July 12, 2013."

PARCELS IN CUYAHOGA VALLEY NATIONAL PARK AVAILABLE FOR LEASE. [ABC News](#) (5/25, 3.69M) reports that "a unique opportunity to live inside of a national park is being offered to those seeking a special home – if they are willing to put in the elbow grease." According to the article, "three farms in need of rehabilitation located inside of the Cuyahoga Valley National Park in Ohio are available for lease in 2015 to individuals interested in sustainable farming." The article notes that "the parcels will join an existing 10-farm program that operates under the National Park Service's Countryside Initiative nonprofit, whose mission is 'to preserve the agricultural heritage of the Valley,' according to the park's website."

CONCERNS RAISED OVER THREATS TO BUFFALO RIVER. [KOLR-TV](#) Springfield, MO (5/25, 8K) reports that some say the Buffalo River "needs to be continually protected from potential threats." Don Castleberry, a retired National Park Service Midwest Regional Director, said, "The immediate threat is the water quality." Castleberry said "the threat comes from hog farm production waste nearby."

DESTRUCTIVE ASH BORER BEETLE ADVANCING IN ST. LOUIS AREA. The [AP](#) Columbia, MO (5/25, 1K) reports that "a green beetle blamed for destroying tens of millions of ash trees in 25 states is advancing in the St. Louis area." The article notes that "the spread of the beetle has prompted some drastic measures." The NPS has "cut down all 800 ash trees on the Gateway Arch's grounds in recent months."

YELLOWSTONE VISITORS MORE LIKELY TO BE INJURED FROM SLIPS, FALLS THAN BEAR MAULING. The [AP](#) (5/25, 2 29M) reports that although Yellowstone National Park is "full of hazards like bears, bison, scalding water and canyons, visitors are most likely to be injured from mundane accidents like trips, slips and falls." Still, the park "works to keep visitors educated about bear safety."

The [Kansas City \(MO\) Star](#) (5/25, 590K) reports on the "wild things that happened this month in the wilderness of America's national parks." However, the article notes that "it is routine behaviors inside the parks' extreme environs that cause the most trouble."

RESCUERS PREPARED TO HELP ON MOUNT RAINIER. The [AP](#) (5/23, Le, 2 29M) reports that "as the climbing season gets underway on Mount Rainier, a specialized rescue team has been training to be ready when things go wrong on the 14,411-foot peak." Rescuers from the U.S. Army Reserve, U.S. Air Force and National Park Service will "on hand to airlift them to safety."

FRANKLIN'S MASONIC HALL UNVEILS LANDMARK PLAQUE. The [Tennessean](#) (5/22, 444K) reports that state and local officials gathered Friday at Franklin's Masonic Hall "to watch as Gayle Hazelwood, acting on behalf of the National Park Service, unveiled a bronze plaque that will alert visitors to the site's national significance." According to the article, "the plaque notes that the hall, which has been continuously occupied by Hiram Masonic Lodge No. 7 since 1826, was the site of negotiations between President Andrew Jackson and a Chickasaw Nations delegation over the terms of what would be an unratified 1830 treaty."

POPULAR YELLOWSTONE AND GRAND TETON TRAILS CLOSED FOR NOW. The [AP](#) (5/23, 2.29M) reports that "two of the most heavily used day-hiking routes in Yellowstone and Grand Teton national parks in northwest Wyoming are closed for the time being because of weather damage and maintenance." In Yellowstone, "the iconic Brink of the Lower Falls trail is closed in the Grand Canyon of the Yellowstone because of a mud and rock slide that deposited a 7-by-8-foot boulder on the route, effectively blocking the path." In Grand Teton, "the trail beyond Hidden Falls to Inspiration Point is closed and being rerouted so crews can replace bridges over Cascade Creek and rebuild the rocky ledge trails and steps that lead up to the popular Jenny Lake overlook."

ARIZONA PUBLIC SERVICE CO. RESPONSIBLE FOR KEEPING POWER RUNNING AT GRAND CANYON. The [Arizona Republic](#) (5/22, 1.27M) reports on the work of Kevin Hartigan, the local representative for Arizona Public Service Co., who is "responsible for keeping the lights on and water flowing at" the Grand Canyon. APS purchased "the remote power system at Grand Canyon from the National Park Service in the 1950s."

Bureau of Land Management:

AGENCIES FIGHT INVASIVE PLANTS TO HELP SAGE GROUSE IN WYOMING. The [AP](#) (5/22, 2 29M) reports that "state and federal land management agencies are teaming up with the Wyoming Game and Fish Department and others to keep invasive plants out of sage grouse habitat." The article notes that "the Wind River/Sweetwater River Sage Grouse Working Group this month awarded a \$31,000 grant to Fremont County Weed and Pest." The funds will "go toward a large-scale, three-year noxious weed inventory and treatment effort that the county weed district began last year in partnership with the U.S. Bureau of Land Management."

AGENCIES LAUNCH CAMPAIGN FOR WILDFIRE AWARENESS. The [AP](#) (5/25) reports that the BLM "and other federal and state agencies are starting a public information campaign intended to reduce human-caused fires in sagebrush steppe areas in Idaho." The Idaho office of the BLM said in a statement Thursday that "efforts will include radio and television announcements, social media postings and a billboard on Interstate 84 between the Broadway and Gowen Field off-ramps in Boise."

BLM ASKED TO DELAY TRAVEL MANAGEMENT PLAN. The [Grand Junction \(CO\) Daily Sentinel](#) (5/26, 73K) reports that "Colorado Republican legislators and congressional representatives are asking Gov. John Hickenlooper to scrutinize plans for roads and trails on public lands in the Mesa County area." State lawmakers, "in fact, are asking that Hickenlooper refuse to sign the travel-management section of the proposed resource management plan offered by the Grand Junction Office of the Bureau of Land Management." U.S. Sen. Cory Gardner and U.S. Rep. Scott Tipton, also asked BLM Director Neil Kornze "to delay the final decision on the travel-management section for more study by the county."

BLM ANALYZING PLANS FOR HELIUM PLANT. The [AP](#) (5/25) reports that "a company planning to build a gas processing plant in the Wyoming Range says its proposed development shouldn't cause further degradation to a stream network that no longer supports cutthroat trout." According to the article, "representatives of the Denver firm QEP Resources are planning a gas processing plant to produce helium, methane and carbon dioxide, along with 10 new gas wells and associated infrastructure within the Dry Piney Creek drainage." The project is "in the early stages of being analyzed" by the BLM.

COLORADO SUPREME COURT ASKED TO INTERVENE IN CHRISTO PROJECT. The [AP](#) (5/25, 894K) reports that "a group fighting artist Christo's plan to drape a nearly six-mile stretch of the Arkansas River with translucent fabric is pleading with the Colorado Supreme Court to intervene, asking the high court to decide if an appellate court made a mistake when it ruled that the state parks department made a harmless error when it failed to follow its own procedures." Opponents said the holding "not only threatens the natural beauty of the Arkansas Headwaters and the citizens and wildlife living there, it also is an affront to people who are relying on state regulators."

BLM TO OPEN HANKSVILLE-BURPEE DINOSAUR QUARRY TO PUBLIC. The [Salt Lake \(UT\) Tribune](#) (5/25, 470K) reports that the BLM will open the Hanksville-Burpee Dinosaur Quarry to free public tours starting May 29.

BLACK ROCK EVENT CANCELED BECAUSE OF WEATHER. The [Fiko \(NV\) Daily Free Press](#) (5/25, 22K) reports that "visitor and staff safety concerns have prompted the Bureau of Land Management, Black Rock Field Office to cancel this weekend's Black Rock Rendezvous, which was previously scheduled to start today."

ADDITIONAL COVERAGE BLM PRESERVING WILL JAMES CABIN. Additional coverage that the BLM is preserving a cabin "that was reportedly used by author and artist Will James" was provided by the [AP](#) (5/25, French, 2 29M).

BLM'S O&C PLANS CRITICIZED. In an op-ed for the [Medford \(OR\) Mail Tribune](#) (5/24, Kupillas, 64K), Sue Kupillas, a former Jackson County Commissioner and former executive director of Communities for Healthy Forests, writes that "Western Oregon's rural forested communities have waited over 20 years for a solution to restore balance to the management of the Bureau of Land Management's O&C timberlands." However, she says that "the BLM's draft plans are disappointing, though unsurprising considering the sum of broken federal policies that prevent the forests from being actively managed." She calls on "citizens to get involved and urge the BLM to improve their draft plans."

Fish and Wildlife Service:

FWS MOVES TO REGULATE BIRD KILLS. The [Greenwire](#) (5/22) reports that "the Obama administration is considering a new program to permit and mitigate accidental bird kills from drilling pits, gas flares, power lines and communications towers, a move aimed at reducing major sources of avian mortality that was cheered by bird advocates." The FWS "released a notice of intent to prepare a programmatic environmental impact statement that could establish a permitting regime under the Migratory Bird Treaty Act requiring that such incidental take be mitigated and potentially offset by habitat restoration or protection." The agency "plans to take 60 days of public comments and will hold open houses in Sacramento, Calif.; Denver; St. Louis; and Arlington, Va., in the coming months."

Also reporting on the story are [The Hill](#) (5/22, Wheeler, 533K) and [The Verge](#) (5/25, 913K).

FWS REVIEWING RETURN OF WETLANDS NEAR ANACONDA. The [Missoulian \(MT\)](#) (5/25, 118K) reports that "the return of 2,400 acres of wetlands near Anaconda is up for public review through the U.S. Fish and Wildlife Service." The FWS has "overseen the Atlantic Richfield Co.'s efforts to replace habitat ruined by a century of mining damage in the Upper Clark Fork River Basin." The article notes that "the latest part of that effort concerns the Dutchman wetlands, which feature a mix of aspen groves, spring-fed creeks, shrub fields and willow corridors."

EFFORTS TO SAVE SHOREBIRDS DECLARED A SUCCESS. The [AP](#) (5/25, Parry, 2.29M) reports that "a crash program to restore New Jersey bay and ocean beaches wrecked by Superstorm Sandy appears to have succeeded in saving tens of thousands of shorebirds that otherwise might have died after the 2012 storm wiped out their feeding grounds." According to the article, "with the birds now returning en masse for a third spring after the storm, those involved feel they can finally say the urgent efforts have worked."

EFFORT CONTINUES TO SAVE AMARGOSA VOLE. The [Las Vegas Review-Journal](#) (5/25, 380K) reports that a breeding program for the Amargosa vole at the University of California, Davis was so successful that last month, researchers were ready to replace the 20 voles they had taken from the wild with 29 healthy youngsters born in captivity. But on April 13, as the lab-raised voles were transported to Tecopa to be released into the marshes, they died. It was determined that the voles probably died from a combination of heat dehydration and stress.

CONCERNS RAISED OVER WATER CLEANUP AT GREAT SALT LAKE. The [AP](#) (5/25) reports that “a \$74 million project to clean up ground water contaminated by mining has environmentalists worried that the pollutants could end up hurting birds on the Great Salt Lake.” According to the article, “water regulators are preparing to take the final steps in a decade-long project to clean up underground plumes of water contaminated by 100 years’ worth of minerals and heavy metals dumped by Kennecott miners.” The article notes that “with water levels are at historic lows, some say that the wastewater could combine with minerals already in the lake and hurt the birds.”

GROUP FILES LAWSUIT OVER CAPE SABLE SEASIDE SPARROW. The [Fort Myers \(FL\) News-Press](#) (5/24, 177K) reports that “the Cape Sable seaside sparrow is at the ecological forefront after the Center for Biological Diversity filed a lawsuit recently against the federal government for water releases during the record floods of 2013.” FWS spokesman Ken Warren said: “The U.S. Fish and Wildlife Service has collaborated with scientists from the National Park Service, the U.S. Army Corps of Engineers and internationally recognized experts to develop enhanced conservation measures for the Cape Sable seaside sparrow. It’s an ongoing process and we’ll continue to work with our partners to do whatever it takes to ensure the continued existence of this species and to accomplish restoration of the Everglades.”

LAWSUIT FILED TO SAVE CACTUS FERRUGINOUS PYGMY-OWL . The [Payson \(AZ\) Roundup](#) (5/22, 21K) reports that “two environmental groups have filed a lawsuit aimed at forcing the federal government to protect Arizona’s diminishing cactus ferruginous pygmy-owl population under the Endangered Species Act.” According to the article, “the lawsuit filed by Defenders of Wildlife and the Tucson-based Center for Biological Diversity calls for the U.S. Fish and Wildlife Service to list the owl as endangered.”

KANSAS BIOLOGISTS BANDING EAGLE CHICKS. The [AP](#) (5/22, Pearce, 2.29M) reports that Dan Mulhern is the FWS biologist who oversees Kansas eagles. Mulhern said “this spring Kansas could produce its 1,000th eaglet since 1989.”

ADDITIONAL COVERAGE OF PROPOSAL TO REVISE ENDANGERED SPECIES ACT’S PETITION PROCESS. Additional coverage of the proposal to revise the Endangered Species Act’s petition process was provided by the [Courthouse News](#) (5/22, 7K) and the [Summit County \(CO\) Citizens Voice](#) (5/24, 506).

EFFORTS TO PROTECT SAGE GROUSE ANALYZED. In his column for the [Denver Post](#) (5/25, Carroll, 894K), Vincent Carroll analyzes whether the greater sage grouse can avoid a listing. He writes that efforts to protect sage grouse habitat weights in favor not listing the bird. However, Carroll notes that if the animal is listed, private landowners will likely be less willing to cooperate on conservation measures.

Additional coverage was provided by the [Twin Falls \(ID\) Times-News](#) (5/25, 75K) and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (5/26, 1.07M).

LOUISIANA BLACK BEAR RECOVERY HAILED. The [New Orleans Advocate](#) (5/25) editorializes that “to move from endangered species to a backyard pest — that’s almost a miracle for the Louisiana black bear.” The paper notes that “among those who deserve credit for the black bear announcement are state and national leaders who have pushed conservation of the woodlands along the big river and its tributaries, including former U.S. Sen. J. Bennett Johnston and the late Gov. David C. Treen, who championed the Tensas wildlife refuges and preservation of the Atchafalaya Basin in the 1980s.”

Additional coverage was provided by the [Summit County \(CO\) Citizens Voice](#) (5/25, 506).

Securing America’s Energy Future:

Onshore Energy Development:

INTERIOR OPPOSES “ENERGY CORRIDOR” BILL. Although some lawmakers are pushing “to establish new natural gas pipelines on federal lands in the eastern United States,” the Interior Department is opposing a bill that would “speed up the permitting process for natural gas pipelines.” [The Hill](#) (5/23, Henry, 533K) reported. The measure, introduced by Reps. Tom MacArthur and Cedric Richmond, calls for at least 10 “energy corridors” to be established “in the eastern United States within two years.” Before a House subcommittee this week, Bureau of Land Management representative Timothy Spisak claimed that the timeline is “too short... to adequately coordinate with states, tribes, and other federal partners, and the public.”

OBAMA ADMINISTRATION EXPECTED TO RELEASE NUMEROUS, HIGH-PROFILE REGULATIONS THIS SUMMER. According to a rule-making schedule released by the White House on Thursday, this summer is expected to be “busy for the Obama administration’s energy and environmental regulators, with numerous high-profile rule releases planned,” [The Hill](#) (5/22, Cama, 533K) reported. The schedule revealed that “regulators hope to fill out the Obama administration’s agenda with major rules on greenhouse gases, the oil and natural gas sectors, coal production, and other policy priorities.”

Additional coverage was provided by [Truth-Out](#) (5/25, 9K).

WYOMING MONITORING NEW FRACKING ACTIVITY. In a related article, the [AP](#) (5/24) reported that, “as Wyoming challenges new federal fracking rules on public lands, state regulators are quietly implementing a state requirement that petroleum companies justify keeping secret the ingredients in the chemical products they pump underground during hydraulic fracturing.” Wyoming “has approved six applications from companies seeking to keep their ingredients confidential under the terms of a settlement with environmental groups announced in January.” However, Mark Watson, Wyoming oil and gas supervisor, “says he has rejected three to four applications due to a lack of information.”

TEXAS EARTHQUAKE RESEARCH GETS HALF OF FUNDING FROM OIL, GAS INDUSTRY. The [Dallas Morning News](#) (5/23, Kuchment, Selk, 1.09M) reported that the Bureau of Economic Geology, housed at the University of Texas at Austin, is set to be voted the state’s official quake investigator. The research entity is expected to get as much as “\$4.5 million to deploy quake monitors across the state and help explain why many long-dormant faults are suddenly waking up,” the article reports, noting that the bureau gets about half of its funding from the oil and gas industry. “It doesn’t inherently mean it’s biased research,” said Aaron Velasco, a seismologist with the University of Texas at El Paso. Major environmental groups also back the plan despite its association with funding from the energy industry. “Forty to 60 percent of the bureau’s annual budget comes from fossil fuel companies, according to director Scott Tinker, a former oil company geologist who serves as a paid adviser to Shell Oil Co,” according to the article.

ADDITIONAL COVERAGE FOUR STATES SUE OVER FRACKING REGULATIONS. Additional coverage that Wyoming, North Dakota, Colorado and Utah are suing the Interior Department “over fracking regulations issued by the federal government in March” was provided by the [Indian Country Today Media Network](#) (5/24, 28K).

UDALL PRAISED FOR OPPOSITION TO CHACO CANYON DEVELOPMENT. For the “Congress” blog of [The Hill](#) (5/23, Torrez, 533K), Rod Torrez, communications strategist for HECHO, praises Sen. Tom Udall for voicing “his concern in a Senate hearing last week over oil and gas development in the northwest New Mexico, and its potential impact on Chaco Canyon, which in the Senator’s words is ‘an incredibly rich cultural destination as well as sacred place to the tribes of the Southwest.’” According to Torrez, “Udall was right to flag the potential conflicts and how Chaco Canyon is situated right in one of the most productive oil and gas production areas in the country. It appears that many new leases are getting closer to the Chaco Culture National Historical Park, which really concerns me.” He notes that “Udall then followed up on a letter to Interior Secretary Sally Jewell regarding the protection of Chaco and its ‘enormous significance’ to tribes and America’s future generations.”

Offshore Energy Development:

CALIFORNIA OIL SPILL CLEANUP CONTINUES. The [CBS Evening News](#) (5/25, story 4, 0:15, Glor, 5.08M) reported, “The oil spill cleanup continued along the coast of Santa Barbara, California. Up to 101,000 gallons spilled when a pipeline ruptured last week. Two beaches that were closed may reopen next week.”

California Pipeline Spill Stiffens Opposition To State’s Oil Projects. [Reuters](#) (5/22, Hays) reports that the recent oil spill off Santa Barbara County coastline in California is likely to stiffen opposition to large oil projects across the state, particularly several proposed oil-by-rail offloading terminals that were already being contested. John Auers, a consultant at Turner, Mason & Co., said “It’s certainly not good news for anyone trying to permit any kind of oil-related facilities in California.”

Corrective Actions Ordered After California Pipeline Spill. [Reuters](#) (5/23, Gorman) reported that the U.S. Transportation Department’s Pipeline and Hazardous Materials Administration has issued a corrective action order against Plains All American Pipeline LP, requiring the company to perform an in-depth analysis of the root cause and “every contributing factor” that contributed to last Tuesday’s spill. The order is not considered a disciplinary enforcement sanctions. Although there are several deadlines in the order, PHMSA said they do not expect a quick restart to the pipeline.

The [Los Angeles Times](#) (5/23, Panzar, 4.03M) reported that no fines were issued against Plains All American Pipeline, but the company “will have to pay for the cleanup and repair environmental damage and is likely to face penalties under U.S. pollution laws, legal experts say.”

The [Santa Barbara \(CA\) Independent](#) (5/23, Fastman, 119K) reported that the ruptured pipeline carried nearly 40,000 barrels per day of oil extracted by Exxon, Venoco and Freeport-McMoRan. Representatives from the affected energy producers are “evaluating their workaround options, but trucking seems to be the only viable transportation options,” as there is no existing infrastructure to transfer oil by trains or tankers. A spokesman for the Western States Petroleum Association said that the closed pipeline carries less than two percent of the oil refined in California daily, so he does not expect consumers to notice any price changes.

The [Santa Barbara \(CA\) Independent](#) (5/22, 119K) also provides coverage of the spill.

Volunteers Scramble To Save Wildlife Caught In California Oil Spill. Tom Llamas reported on [ABC World News](#) (5/24, story 5, 1:20, Llamas, 5.84M) that in Santa Barbara, California, "crews are cleaning up the disastrous oil spill on the coast." As some 105,000 gallons leaked from a ruptured pipeline owned by Texas-based Plains All American Pipeline, volunteers "are racing against the clock to save the animals." Clayton Sandell added that according to wildlife experts, "animals swimming through the oil spill here are showing up as far as 50 miles up and down the California coast."

Ruptured Pipeline Not Equipped With Auto Shut-Off, Says Officials. The [AP](#) (5/24) reported that the pipeline responsible for last Tuesday's spill of thousands of gallons of oil off California's coast "was the only pipe of its kind in the county not required to have an automatic shut-off valve." According to Kevin Drude, deputy director of the county's Energy and Minerals Division, the original pipeline owners skirted the requirement "by successfully arguing in court in the late 1980s that it should be subject to federal oversight because the pipeline is part of an interstate network."

Op-Ed Says Moving Pipelines Inland Is Key To Preventing Offshore Spills. In a column in the [San Gabriel Valley \(CA\) Tribune](#) (5/23, Scauzillo, 121K) Steve Scauzillo wrote that a short-term fix to preventing an offshore oil spill would be keep pipelines away from the coast. Scauzillo notes that few people remember the Plains All American pipeline that burst in Glendale last year, releasing 10,000 gallons of crude into the streets "because oil on land gets cleaned up in a matter of hours, or a few days" versus a much longer timeframe for ocean spills.

COAST GUARD BATTLING FIRE ON OIL RIG ON GULF OF MEXICO. [ABC World News](#) (5/22, story 7, 0:20, Robach, 5.84M) reported that, according to the Coast Guard, an oil rig is burning on the Gulf of Mexico and 28 crew members have "safely evacuated." Officials have spotted an oil slick "more than a mile long." The [AP](#) (5/23, Mcgill) reports that "the fire was still burning Friday evening, the Coast Guard and an environmentalist who flew over the site said." [Bloomberg News](#) (5/22, Polson, 3.81M) identified the Texas Petroleum Investment Co. platform in Breton Sound Block 21, off the southeastern Louisiana coast, as the site of the fire. [The Hill](#) (5/23, Henry, 533K) also reported on the story.

GULF TOURISM REBOUNDS SOME CREDIT BP. The [AP](#) (5/25, Reeves) reports that five years after the BP disaster, "the petroleum giant that was vilified during heated town hall meetings for killing a way of life is being praised by some along the coast for spending more than \$230 million to help lure visitors back to an area that some feared would die because of the spill." While questions about the spills' long term effects remain, especially in light of a large bottlenose dolphins die-off, amid pending claims for reimbursement over losses due to the blowout, visitors to the gulf have increased. "Many attribute the change in large part to the millions of dollars that BP spent on tourism grants and advertising that promoted the Gulf Coast nationwide to people who didn't realize that Alabama and Mississippi had coastlines," the article reports. "We're just amazingly thankful," Ted Scarritt, who offers tourist cruises in Orange Beach said. "I think our area has recovered profoundly," he added.

MAN SENTENCED FOR LYING ABOUT BLOWOUT PREVENTER TESTING. The [Maritime Executive](#) (5/26, 21) reports that "the United States Attorney's Office for the Eastern District of Louisiana announced that Race Addington, 49, of Houston, was sentenced May 20 for making false statements to agencies or departments of the United States in relation to the veracity of blowout preventer testing on an offshore oil and gas platform located at Ship Shoal 225 on a federal mineral lease in the Gulf of Mexico." U.S. District Judge Helen G. Berrigan sentenced Addington to one year probation and 40 hours of community service.

OPPONENTS OF OFFSHORE DRILLING PLAN CRITICIZED. In an op-ed for the [Houston Community Newspapers](#) (5/25, 8K), Bill Wilson, a board member of Americans for Limited Government, praises the Interior Department's upcoming five-year leasing plan. Wilson criticizes officials of coastal states who are "trying to block the Obama administration's decision to permit offshore energy exploration."

Additional coverage was provided by [WGHP-TV](#) High Point, NC (5/22, 400K).

Tackling America's Water Challenges:

CALIFORNIA FARMERS AGREE TO 25% VOLUNTARY WATER CUTS. The [Los Angeles Times](#) (5/23, Morin, 4.03M) reports the California State Water Resources Control Board on Friday "accepted an unprecedented proposal from Sacramento-San Joaquin Delta farmers to voluntarily cut water use by 25%" in an effort to avoid stricter, state government-imposed cuts in water usage. The Times says the agreement "staves off the threat of potentially lengthy litigation" between farmers and the Control Board.

The [AP](#) (5/23, Nirappil, Smith) reports for "the first time since a 1977 drought," California water regulators are warning of coming cuts for senior water-rights holders "whose claims date back a century or more." The AP says California has until now required a 25% conservation by municipalities and reduced water deliveries to many growers and communities "with less solid claims to water."

The [New York Times](#) (5/23, Medina, Subscription Publication, 12.24M) reports that since a recent announcement by California Gov. Jerry Brown of "across-the-board cutbacks for urban water systems, the state's farmers have become something of a scapegoat." The story says urban residents who are cutting back on water usage for showers and landscaping have "angrily accused the agricultural industry of not doing enough to curb its own use of water," leaving California farmers feeling besieged and fighting back with public relations campaigns.

Additional coverage was provided by the [AP](#) (5/22, 196K) and [U-T San Diego \(CA\)](#) (5/25, 579K).

BOR ANNOUNCES LAKE BERRYESSA'S SPANISH FLAT RECREATION AREA IS REOPENING. The [Vacaville \(CA\) Reporter](#) (5/22, 52K) reports that the BOR has "signed a short-term concession contract with a new operator, Spanish Flat Partners, LLC, to operate the Spanish Flat Recreation Area at Lake Berryessa starting this Memorial Day weekend and through the summer."

Additional coverage was provided by the [Napa Valley \(CA\) Register](#) (5/25, 45K).

FEDERAL FUNDING LAGS BEHIND COST OF RURAL WATER PROJECTS. The [Helena \(MT\) Independent Record](#) (5/26, 38K) reports that "since 2000, Congress has provided a steady drip of federal funding for potable water projects in the West," but "the problem, officials say, is that funding isn't keeping up with construction deadlines or inflation." In fact, "in recent years, annual funding for the projects has actually decreased, down from about \$10 million a year in 2008."

ADDITIONAL COVERAGE BOR TO INVEST \$50 MILLION FOR WATER CONSERVATION PROJECTS. Additional coverage that the BOR will "invest about \$50m to support 64 projects that include enhancing water efficiency and water conservation in 12 western states" was provided by [Desalination & Water Reuse](#) (5/25), [Water Technology Online](#) (5/25), and the [Clean Technology Business Review](#) (5/24).

Empowering Native American Communities:

BIA SENDING DELEGATION TO INSPECT LOWER BRULE FINANCIAL RECORDS. The [Sioux Falls \(SD\) Argus Leader](#) (5/23, 116K) reports that the BIA is "sending a delegation to the Lower Brule Sioux Reservation this week to inspect financial records amid an ongoing power struggle and accusations of malfeasance." The article notes that "the struggle between Vice Chairman Kevin Wright and his allies against the friends and family of former Chairman Michael Jandreau, who died April 3, has paralyzed the tribal government." In a letter to Wright announcing the BIA's upcoming visit this week, Regional Director Tim LaPointe wrote: "The BIA is closely monitoring the events at the tribe and we share your concerns."

BILL INTRODUCED TO TAKE LAND AS PART OF LYTTON RANCHERIA RESERVATION. The [Santa Rosa \(CA\) Press Democrat](#) (5/25, 168K) reports that Rep. Jared Huffman "introduced a bill this week to take land near Windsor into federal trust for housing and other purposes — but not a casino — as part of the Lytton Rancheria reservation." The measure, "introduced Thursday, would allow the Pomo tribe to return to a communal homeland about 10 miles from their original reservation north of Healdsburg. No gaming will be conducted on the lands to be taken into trust by the federal government, according to Huffman's office."

BIA OFFICERS CLEAN UP PLAYGROUNDS ON WIND RIVER RESERVATION. The [County 10](#) (5/22) reports that "earlier this month, local Bureau of Indian Affairs officers spent some time at the playgrounds at Beaver Creek and Mill Creek housing to make the areas more kid friendly." The article notes that Officers Dawley, Stream, Pujols and Lt. Keel participated in the project. Special Agent Joe Keel said, "The BIA's motto is that the honor is to serve. My officers and I try live up to that everyday. Doing stuff like this allows us all to better enjoy the community we serve and live in." The clean-up was done in celebration of Earth Day

Office of Insular Affairs:

INTERIOR PROVIDES \$250,000 IN EMERGENCY ASSISTANCE TO GUAM. [KUAM-TV](#) Dededo, GUM (5/22, 171) reports that "the U.S. Department of the Interior's Assistant Secretary for Insular Areas Esther Kia'aina today approved \$250,000 to assist Guam Governor Eddie Calvo and other emergency recovery officials in efforts to help over 300

individuals and families displaced in the wake of Typhoon Dolphin that hit Guam on May 15, 2015. The funding will be used to purchase tents, generators, portable cooling units, toiletry and first-aid kits, as well as food." Assistant Secretary Esther Kia'aina said, "People on Guam are still reeling from the effects of this storm and we are pleased to support the Governor in assisting Guam's residents, including those who have migrated from the Freely Associated States under the Compacts of Free Association. The funds will be helping those who are now either homeless or are living in substandard conditions as a result of Dolphin and who are at a risk for their health, safety and well-being. We want Guam to be successful in providing residents the basic necessities as they either return home or move into temporary or intermediate housing for the short-term and transition out of storm shelters for the long-term."

Also reporting on the story is [Pacific News Center](#) (5/26, Carrera).

US WANTS MARSHALL ISLANDS TO REPAY FUNDS SPENT BY INTERIOR. The [Fiji Times](#) (5/26, 893) reports that "the US has put the Marshall Islands Government on notice that it has until July 1 to repay the Interior Department \$US800,000 (\$F1.6m) spent on designs for an elementary school in Majuro that the Marshall Islands says now cannot be built on the planned site."

Top National News:

OBAMA US NOT INVOLVED IN "MAJOR GROUND WAR" FOR FIRST TIME SINCE 9/11. The President's Memorial Day [remarks](#) at Arlington Cemetery generated two brief reports on the network newscasts, as well as largely positive print and online coverage. Stories generally focused on Obama's celebration of the fact that, for the first time since 9/11, no US troops are currently involved in ground fighting overseas. [ABC World News](#) (5/25, story 9, 1:45, Robach, 5.84M), for example, showed the President saying, "This is the first Memorial Day in 14 years that the United States is not engaged in a major ground war." ABC added, "Yes, not a ground war, but they are still serving" in Iraq and Afghanistan. US troops, says the [Washington Post](#) (5/26, Mufson, 5.03M), "remain mired and at risk in both countries, training and advising Iraqi forces against the Islamic State and Afghan forces fighting the Taliban."

The [New York Daily News](#) (5/25, Edelman, 3.79M) reports that in stating that "our servicemembers are at less risk this year," Obama was giving "a nod to his own policies," while [The Hill](#) (5/25, Byrnes, 533K) indicates that he "highlighted the US drawdown in Afghanistan." [Politico](#) (5/25, Nelson, 1.11M) reports that the President said this year's "Memorial Day is 'especially meaningful'" because of it.

The [AP](#) (5/26) also notes the President "said 'we'll continue to bring'" US troops "home and reduce our forces further, down to an embassy presence by the end of the year." [Reuters](#) (5/25) quotes Obama as warning, however, "Afghanistan remains a very dangerous place. And as so many families know, our troops continue to risk their lives for us." The [CBS Evening News](#) (5/25, story 9, 0 30, Gior, 5.08M) noted that "In Kabul" yesterday, "US forces paused to remember the soldiers that died in fighting in Afghanistan."

[USA Today](#) (5/26, Jackson, 5.01M) reports that Obama also "spotlighted the careers of the last two Americans to die in combat in Afghanistan – Wyatt Martin and Ramon Morris – and said the nation will never stop trying to repay the debt owed to these and thousands of others who made the ultimate sacrifice on behalf of the United States." [TIME](#) (5/25, Luckerson, 19 57M) noted on its website that Obama said, "These two men, these two heroes, if you passed them on the street you wouldn't know that they were brothers. ... They were bonded together to secure our liberty and keep us safe."

The [Philly \(PA\) Voice](#) (5/25, Klopp) recounted that the President had earlier placed "a wreath at the Tomb of the Unknown Soldier." The [Washington Times](#) (5/26, Boyer, 641K) reports that Defense Secretary Ashton Carter, "who introduced the president at Arlington, said nearly 200,000 U.S. service members are stationed overseas on this Memorial Day." Said Carter, "Troops of such caliber demand great leaders, and there's no doubt they have one in our commander-in-chief. ... He cares deeply about the safety, welfare and dignity of our men and women in uniform and their families."

The [New Orleans Times-Picayune](#) (5/26, Alpert, 733K) reports that "also paying a Memorial Day tribute to the sacrifice of American soldiers was House Majority Whip Steve Scalise," who said, "We owe these brave men and women a tremendous debt of gratitude, because without their selfless sacrifice Americans could not experience God

SECRETARY JEWELL ANNOUNCES \$50 MILLION FOR WESTERN WATER-SAVING PROJECTS. The [AP](#) (5/21, 3.69M) reports that "the U.S. government will invest nearly \$50 million in water conservation and reuse projects in 12 drought-stricken Western states, Interior Secretary Sally Jewell announced Wednesday." Jewell said, "It is absolutely critical that states and the federal government leverage our funding resources so that we can make each drop count." The funds come "from the Interior Department's WaterSMART sustainable water initiative, which has provided about \$250 million in funding since 2010."

[Politico Pro](#) (5/20) reports that Jewell said, "In a time of exceptional drought, it is absolutely critical that states and the federal government leverage our funding resources so that we can make each drop count."

The [AP](#) (5/21) reports that the Uncompahgre Valley Water Users Association announced Wednesday that it will receive a \$900,000 grant from the Interior Department's Bureau of Reclamation for water conservation and reuse projects at a new hydroelectric facility in Montrose. Interior Secretary Sally Jewell announced funding Wednesday for more than 60 projects in a dozen states, the AP reports.

Additional coverage was provided by the [Daily Mail \(UK\)](#) (5/21, 5.37M), the [Columbus \(IN\) Republic](#) (5/21, 75K), the [Graham \(TX\) Leader](#) (5/21, 13K), the [San Jose \(CA\) Mercury News](#) (5/21, Press, 762K), the [U-T San Diego](#) (5/20, 579K), the [Franklin \(N\) Daily Journal](#) (5/21, 51K), the [Minneapolis Star Tribune](#) (5/21, 1.29M), [KSRO-AM](#) (5/21), the [San Francisco Chronicle](#) (5/21, Subscription Publication, 2.92M), [Reuters](#) (5/20), the [Daily Mail \(UK\)](#) (5/21, 5.37M), the [Houston \(TX\) Chronicle](#) (5/21, 2.29M), the [Houston \(TX\) Chronicle](#) (5/21, 2.29M), the [Oregonian](#) (5/21, 1M), the [Idaho Statesman](#) (5/20, 199K), the [Los Angeles \(CA\) Times](#) (5/21, Boxall, 4.03M), the [Los Angeles \(CA\) Daily News](#) (5/20, 379K), the [Washington \(DC\) Post](#) (5/20, Press, 5.03M), [Yahoo! News](#) (5/21, 6.18M), [KGW-TV Portland \(OR\)](#) Portland, OR (5/20, 107K), [KTVZ-TV Bend \(OR\)](#) Bend, OR (5/21, 1K), [KCAL-TV Los Angeles \(CA\)](#) Los Angeles (5/20, 153K), [KSBW-TV](#) Monterey, CA (5/21, 27K), and [Fox News](#) (5/20, 9.4M).

FWS MOVES TO DELIST LOUISIANA BLACK BEAR. The [Greenwire](#) (5/20) reports that the FWS has "proposed removing from the list of threatened species a type of black bear that is famous for being spared by avid hunter and former President Teddy Roosevelt." The decision "to delist the Louisiana black bear, one of 16 subspecies of American black bears, was trumpeted by the Interior Secretary Sally Jewell, who oversees FWS, and environmentalists as a prime example of how public-private partnerships can help to recover species protected by the Endangered Species Act." However, "critics of ESA said the rare recovery was possible only through coercing landowners into cooperation with regulators."

[The Hill](#) (5/21, Cama, 533K) reports that Jewell and Louisiana Gov. Bobby Jindal "announced the proposed delisting under the Endangered Species Act Wednesday, crediting a two-decade public-private partnership with the bear's recovery." Jewell "declared that the recovery shows the effectiveness of the Endangered Species Act, which has long been a target of conservatives who decry the economic impacts that protections have on industries that use the land where species live." "Across Texas, Louisiana and Mississippi, we have worked together with our partners to protect and restore habitat, reintroduce populations and reduce the threats to the bear," Jewell said in a statement, following an announcement event with Jindal. "Today's recovery of the bear is yet another success story of the Endangered Species Act."

Additional coverage was provided by the [Baton Rouge \(LA\) Advocate](#) (5/21, 34K), [KNOE-TV](#) Monroe, LA (5/21, 2K), the [New Orleans Times-Picayune](#) (5/21, 733K), [WVUE-TV](#) New Orleans (5/21, 32K), [ABC News](#) (5/21, 3.69M), [TIME](#) (5/21, 19.57M), [Fox News](#) (5/20, 9.4M), the [Washington \(DC\) Times](#) (5/21, McConnaughey, 641K), the [Houston \(TX\) Chronicle](#) (5/21, McConnaughey, 2.29M), the [Houston \(TX\) Chronicle](#) (5/21, McConnaughey, 2.29M), the [Washington \(DC\) Post](#) (5/20, Janet McConnaughey |, Ap, 5.03M), the [Washington \(DC\) Post](#) (5/20, 5.03M), the [New Orleans \(LA\) Times-Picayune](#) (5/21, 733K), the [Merced \(CA\) Sun-Star](#) (5/21, 46K), the [Mississippi Business Journal](#) (5/21, 1K), the [Modesto \(CA\) Bee](#) (5/21, 163K), the [Baton Rouge \(LA\) Advocate](#) (5/21, 34K), [Fox News](#) (5/20, 9.4M), the [Daily Mail \(UK\)](#) (5/21, 5.37M), [Yahoo! News](#) (5/21, 6.18M), [KATC-TV Lafayette \(LA\)](#) Lafayette, LA (5/21, 71K), [WVUE-TV New Orleans \(LA\)](#) New Orleans (5/21, 32K), [KNOE-TV Monroe \(LA\)](#) Monroe, LA (5/21, 2K), [KTVE-TV El Dorado \(AR\)](#) El Dorado, AR (5/21, 1K), [KATC-TV Lafayette, LA](#) (5/21, 71K), and the [Seymour \(IN\) Times Tribune](#) (5/21, 28K).

INTERIOR CIO PARTICIPATING IN NEW IT COST COMMISSION. The [Federal Times](#) (5/20, 118K) reports that "the Commission on IT Cost, Opportunity, Strategy and Transparency (IT COST) — created and fostered by the Technology Business Management (TBM) Council — is bringing together federal and private sector CIOs to develop a set of recommendations focused on increasing transparency and providing visibility into even the lowest-level IT buys." The article notes that "Sylvia Burns, CIO at the Department of the Interior, is one of five federal CIOs participating in the new IT COST Commission."

SPORTSMEN TESTIFY AT HOUSE HEARING. The [Arizona State University Cronkite News](#) (5/20) reports that "sportsmen called on a House panel Wednesday to support a sweeping proposal that they said would guarantee hunting, fishing, and recreational shooting rights on federal lands for future generations." The Sportsmen's Heritage and Recreational Enhancement Act "covers everything from ivory possession and use of lead shot to a requirement that federal agencies adopt a policy of 'open until closed' for hunting on public lands." Congressional Sportsmen's Foundation President Jeff Crane said, "The overarching purpose behind the SHARE Act is quite simply to ensure access to opportunity for hunters, shooters and anglers."

ADDITIONAL COVERAGE OF NEW WILDFIRE STRATEGY. Additional coverage of the new wildfire strategy announced in Boise, Idaho on Tuesday was provided by the [Clark County \(WA\) Columbian](#) (5/20, 109K).

America's Great Outdoors:

National Park Service:

ELLIS ISLAND NATIONAL IMMIGRATION MUSEUM RESTORED. [NPR](#) (5/20, 1.52M) reports that the Statue of Liberty-Ellis Island Foundation worked with the NPS to restore Ellis Island's "main building that processed 12 million immigrants around the early 20th century." According to the article, "after it was closed by federal government in 1954, the building was reopened as a museum in 1990," and "it was recently renamed the Ellis Island National Immigration Museum to tell immigrant stories beyond the Ellis Island years."

FIGHT DEVELOPING OVER HISTORIC DESIGNATION OF SITE NEAR CAMP DAVID. The [New York Times](#) (5/21, Siddons, Subscription Publication, 12.24M) reports that the local council is expected to vote "soon" on whether to designate an area known as Trout Run, near Camp David, should be on the register of historic places. However, the "seemingly simple" issue has "turned into a strange fight about what the property might become." If the designation is enacted, then a unit of the Church of Scientology, which currently owns the site, could use a local "loophole" to open a center for recovering addicts on the site, something that a number of local residents oppose.

ALEXANDRIA PICKS LOCATION FOR POTOMAC YARD METRO STATION. The [Washington Post](#) (5/20, Sullivan, 5.03M) reports that "a new Metrorail station at Potomac Yard should be built close to the existing shopping center, the Alexandria City Council unanimously decided Wednesday night, as they waxed nearly poetic about the economic development they believe it will bring." The article notes that "the city is also negotiating an agreement with the National Park Service, which operates the parkway, because 0.16 acres of federal land is needed for the construction." According to the article, "city officials said they expect to provide about \$12 million in improvements to the federal land in exchange."

THREE FINED FOR WORSHIPPING WITH CANNABIS AT ROGER WILLIAMS NATIONAL MEMORIAL. The [Providence \(RI\) Journal](#) (5/20, 322K) reports that "three people from a West Greenwich church that uses marijuana for prayer and anointing were issued \$100 fines Tuesday during one of their daily novenas at the Roger Williams National Memorial." Jennifer Smith, site manager for the national property, said, "We have issued a special use permit for the Healing Church to gather, speak and conduct First Amendment activities on May 23, 2015. Activities are subject to all applicable federal, state, county and municipal laws, ordinances, regulations, codes, and the terms and conditions of this permit."

FORT MONROE COMMEMORATES "CONTRABAND DECISION." The [Hampton Roads \(VA\) Daily Press](#) (5/20, Subscription Publication, 219K) reports that Fort Monroe will commemorate Union Army Maj. Gen. Benjamin Butler's "contraband" decision. According to the article, "actors from New York's 99th Company, the Tidewater Marine Living History Association as well as a Civil War surgeon will be on hand for the event." NPS Ranger Aaron Firth said, "We want people to experience what it was like being there and just what these people would have felt knowing they would not be returned."

ARCHAEOLOGISTS, VOLUNTEERS SEARCH ALCOVE SPRING SITES. The [Marysville \(KS\) Advocate](#) (5/20, 15K) reports that "archaeologists, volunteers and members of the Oregon-California Trails Association spent Saturday sweeping areas at Alcov Spring Historic Park with metal detectors, searching for traces of history." They discovered "a nickel from the 1860s, found in the north part of the park near where the Oregon Trail once crossed the prairie during that very period."

YELLOWSTONE TRAIL CLOSED DUE TO ROCK AND MUD SLIDE. The [AP](#) (5/20, Press, 5 03M) reports that "heavy rain and snow over the weekend has caused a rock and mud slide across a popular Yellowstone National Park trail, forcing its closure until further notice."

MEETING HELD ON NATIONAL PARK IN MAINE. [WCSH-TV](#) Portland, ME (5/20, 30K) reports that "East Millinocket is quickly approaching a non-binding vote on the proposal to bring a national park to the Katahdin region" and "a public discussion on that proposal turned into a heated debate about the area's future Wednesday night." The meeting was organized by the Maine Woods Coalition which opposes the park. According to the article, "they wanted to feature voices from both sides, but the park's chief proponent, Quimby's son, Lucas St. Clair, could not attend."

NEW PROJECT LAUNCHED TO FOCUS ON LGBT HISTORY IN CALIFORNIA. The [Bay Area Reporter \(CA\)](#) (5/21, 310) reports that "a project has been launched in California to focus on the state's LGBT history as work advances on a National Historic Landmark LGBTQ Theme Study and proposed framework for the National Park Service." According to the article, "called California Pride: Mapping LGBTQ Histories, the online, crowdsourced archive will feature, according to organizers, the 'memories, stories, and images related to sites throughout the Golden State associated with lesbian, gay, bisexual, transgender, and queer experience.'"

WYOMING CRIMINALIZES TAKING ECOLOGICAL PHOTOS ON PUBLIC LANDS. [ABC News](#) (5/21, 3.69M) reports that "visitors to Wyoming's renowned Yellowstone National Park could find themselves thrown in jail for simply taking a photograph without permission, according to critics of a statute signed into law by the Wyoming governor this spring." According to the article, "while the law is meant to criminalize the act of entering public and private lands in order to collect pollution data, critics argue that the law's wide-ranging restrictions could ensnare a tourist taking photos in one of the state's National Parks."

Also reporting on the story are the [High Country \(CO\) News](#) (5/21, 74K) and the [AllGov](#) (5/21, 2K).

LOS ANGELES URGED TO COLLABORATE ON LA RIVER REVITALIZATION. In an interview with the [Los Angeles Times](#) (5/21, Morrison, 4.03M), Sean Woods, superintendent of California State Parks for Los Angeles, says that "the L.A. River is a perfect example that one entity cannot do it alone." To revitalize the river, Woods urges the city "to work with the Army Corps of Engineers, the National Park Service, city parks, and that effort will float all of our boats."

ADDITIONAL COVERAGE OF FEE INCREASES AT NPS SITES. Additional coverage of fee hikes at NPS sites was provided by the [Alamogordo \(NM\) Daily News](#) (5/21, 19K), [Big Island \(HI\) Now](#) (5/20), [KHON-TV Honolulu \(HI\)](#) Honolulu (5/20, 37K), and [KITV-TV Honolulu \(HI\)](#) Honolulu (5/21, 39K).

ADDITIONAL COVERAGE OF RECENT BASE JUMPING DEATHS. Additional coverage of recent BASE jumping deaths was provided by the [Daily Mail \(UK\)](#) (5/21, 5 37M), the [Contra Costa \(CA\) Times](#) (5/21, Press, 279K), the [Boulder \(CO\) Daily Camera](#) (5/21, 167K), the [Boston \(MA\) Globe](#) (5/20, 886K), the [New York \(NY\) Post](#) (5/21, 3.15M), the [Denver \(CO\) Post](#) (5/21, 894K), the [Washington \(DC\) Post](#) (5/20, Press, 5.03M), [Yahoo! News](#) (5/21, 6.18M), the [Contra Costa \(CA\) Times](#) (5/21, Press, 279K), and the [Bradford \(PA\) Era](#) (5/21, 30K).

ADDITIONAL COVERAGE OF OLDEST ACTIVE PARK RANGER. Additional coverage of Betty Reid Soskin, the nation's oldest active park ranger, was provided by the [Black Entertainment Television](#) (5/20, 933K).

Bureau of Land Management:

JUDGE'S ORDER BARS ENFORCEMENT BY BLM IN OREGON GOLD MINE DISPUTE. The [AP](#) (5/21, Barnard, 2.29M) reports that "the federal government and southern Oregon gold miners have each taken a step back from tensions over a mining claim where a constitutional activist group has posted armed guards." The UBLM is "holding off enforcement action" and "the miners have agreed not to work the claim until their appeal of the agency's decision against their operation is resolved." The agreement was "affirmed Wednesday in a decision from an Interior Board of Land Appeals administrative law judge forbidding the BLM to enforce an order halting work at the mine."

Additional coverage was provided by the [Raw Story](#) (5/20, 668K).

BLM NORTHWEST AND SOUTHWEST RESOURCE ADVISORY COUNCILS SEEK NOMINATIONS. The [Grand Junction \(CO\) Free Press](#) (5/21, 43K) reports that the BLM has "announced that it is seeking public nominations for open positions on the BLM Colorado Northwest and Southwest District Resource Advisory Councils." Ruth Welch, BLM's Colorado State Director, said, "As a land-management agency that carries out a multiple-use mission, the BLM seeks out and values diverse input from citizens who care about the stewardship of America's public lands. This input advances our efforts in managing uses of and protecting resources on the public lands."

BLM HOLDS PUBLIC MEETINGS ABOUT WESTERN OREGON FOREST PLAN. The [Oregon Public Broadcasting](#) (5/21, 3K) reports that the BLM "kicked off a series of public meetings Tuesday on how to manage its forests in Western Oregon." The article notes that "over the past three years the agency has been soliciting input from Oregonians on what kinds of recreational opportunities they want to pursue on the O&C Lands."

BLM REPAIRING CABIN USED BY WILL JAMES. The [Billings \(MT\) Gazette](#) (5/21, 178K) reports that the BLM has been "making repairs to keep" a cabin that was reportedly used by author and artist Will James, "and its ties to history, standing." Jennifer Macy, archaeologist for the Billings Field Office of the BLM, said, "We're trying to preserve it yet keep it historically accurate."

GRAND CANYON WATERSHED NATIONAL MONUMENT CRITICIZED. The [Arizona Daily Sun](#) (5/21, 34K), Robert E. Mansell, chairman of the Arizona Game and Fish Commission, explains his opposition to the Grand Canyon Watershed National Monument. He points to the creation of the Sonoran Desert National Monument in 2001 as "a cautionary tale." Mansell claims that "the 1.7 million acres already being successfully managed will instead be subject to deferred management, budget shortages and increased bureaucracy."

WILD HORSE INMATE PROGRAM HELPS PRISONERS. For "The Blog" of the [Huffington Post](#) (5/21, Hayes, 194K), Tim Hayes writes about the success of the Wild Horse Inmate Program. According to Hayes, "the inmates identified" with the horses and "they began to feel compassion, an emotion they had probably never known or felt before."

Fish and Wildlife Service:

HOUSE EFFORT TO BLOCK SAGE GROUSE ESA LISTING SETS OFF "MAJOR" SKIRMISH. The [New York Times](#) (5/21, Steinhauer, Subscription Publication, 12 24M) reports that a GOP maneuver on the military bill to block the Department of the Interior from adding the sage grouse to the endangered species list has "set off a major congressional skirmish that has spilled over into Western states, where the sage grouse is revered, and among environmental groups that fear a steady erosion" of the ESA. The Times says that effort "is part of an ambitious push that House Republicans have pursued since retaking the majority in 2010 to roll back, limit or unravel environmental regulations."

The [Environment & Energy Publishing](#) (5/20, Subscription Publication, 705) reports that "House Republicans and Western state officials yesterday said the federal government is snubbing state plans to conserve the greater sage grouse and advancing 'top-down' policies to lock up federal lands." However, "Democrats, sportsmen and a state official from Colorado said the federal government has worked closely with states and that saving sage grouse will take an all-lands approach that includes private, state and federal tracts." The article notes that "those combating views were on display yesterday at a hearing of the Natural Resources Committee just months before the Fish and Wildlife Service is set to decide whether the sage grouse is threatened or endangered across its 165 million acres of Western rangelands."

For the "Congress" blog of [The Hill](#) (5/21, Ashe, Kornze, Tidwell, Weller, 533K), Dan Ashe, director of the U.S. Fish and Wildlife Service; Neil Kornze, director of the Bureau of Land Management; Tom Tidwell, chief of the United States Forest Service; and Jason Weller, chief of the Natural Resources Conservation Service, write that "federal agencies are working hand in hand with states and other partners through voluntary, incentive-based conservation and comprehensive state and federal land management plans to conserve the greater sage-grouse and support traditional land uses and economic development." For example, they note that "the BLM and USFS will soon release plans for managing federal lands to ensure sage-grouse populations thrive, while allowing energy, grazing and other public land uses to continue." They assert that "everyone can win if we stay the course."

Additional coverage was provided by [Slate](#) (5/20, 1 31M), the [Idaho Statesman](#) (5/20, 199K) and [Boise State \(D\) Public Radio](#) (5/21).

BID-WINNING TEXAN KILLS BLACK RHINO IN NAMIBIA. [CNN](#) (5/19, Lavandera, 3.17M) reports that after spending \$350,000 to win a permit almost 18 months ago, Corey Knowlton "arrived quietly in Namibia to hunt the famed black rhino." CNN, which was allowed to follow the crew, did not provide certain details because Namibian government officials "fear poaching syndicates will use the information to identify the location of other black rhinos." With that said, the outlet notes that the 36-year-old Texan "faced scathing criticism and death threats" in the lead up to his killing the animal.

Additional coverage was provided by [Fox News](#) (5/20, 9.4M), [NPR](#) (5/20, 1 52M), [USA Today](#) (5/20, Quinn, Newser, 5.01M), the [Inquisitr](#) (5/21, 369K), the [Dallas \(TX\) Observer](#) (5/21, 194K), the [San Antonio \(TX\) Express-News](#) (5/21, 670K), the [San Francisco \(CA\) Chronicle](#) (5/21, Subscription Publication, 2.92M), the [Daily Mail \(UK\)](#) (5/21, 5 37M), [WTSP-TV St. Petersburg \(FL\)](#) St. Petersburg, FL (5/20, 89K), [KERA-TV Dallas \(TX\)](#) Dallas (5/21, 1K), and [KHOU-TV Houston \(TX\)](#) Houston (5/20, 336K).

Groups Aim To Bring Orphaned Baby Rhinos To Texas. [Reuters](#) (5/19) reports that a coalition of groups in the US and Africa want to bring hundreds of baby white rhinos to Texas. But the governments must first sign off on the conservation initiative. What's more, the well-meaning individuals have to find a way to pay for the animals' transport.

OFFICIALS PLAN TO BOLSTER MANATEE ENFORCEMENT IN BREVARD COUNTY. The [Florida Today](#) (5/20, 168K) reports that "the feds and Florida plan to beef up enforcement this weekend to save more sea cows along the Space Coast." The FWS and the Florida Fish and Wildlife Conservation Commission will "initiate a joint enforcement blitz in Brevard County over Memorial Day weekend." The article notes that "they want better enforcement of manatee zones in Brevard, where three manatees have died so far this year from watercraft-related injuries."

Study Indicates Manatees In Better Shape Than Thought. The [Savannah \(GA\) Morning News](#) (5/20, 144K) reports that "a new study from the USGS indicates Florida manatees are a lot less likely to go extinct than previously thought." The article notes that "the more hopeful outlook isn't the result of any conservation efforts," but because "they were undercounted previously." According to the article, "the new prediction puts their chance of going extinct in the next century at less than one percent, though researchers caution they didn't take into account several recent mortality events."

DETROIT RIVER INTERNATIONAL WILDLIFE REFUGE BENEFIT DINNER HELD. The [Southgate \(MI\) News Herald](#) (5/20, 60K) reports that "more than 300 people gathered for the annual Detroit River International Wildlife Refuge Benefit Dinner in Wyandotte earlier this month, where Sen. Debbie Stabenow (D) was the keynote speaker." Stabenow said, "The Detroit River International Wildlife Refuge is the ultimate tribute to the hard work and vision of John D. Dingell. Today, the Friends of the Refuge are building on what he started, restoring wildlife habitats and increasing public access so Michigan families can continue to kayak, fish, or hunt in the Refuge for years to come."

RANCHERS, FARMERS FILE LAWSUIT OVER JAGUAR HABITAT. The [AP](#) (5/21, 2.29M) reports that "farmers and ranchers are suing the federal government over a decision to set aside hundreds of square miles near the U.S.-Mexico border as habitat essential for the conservation of the jaguar." The New Mexico Farm and Livestock Bureau, the New Mexico Cattle Growers' Association and the New Mexico Federal Lands Council filed their complaint Wednesday. They claim the FWS "should not have set aside habitat in New Mexico because the area wasn't occupied by the jaguar when the animal was listed as an endangered species."

CREWS BATTLING FIRE IN ALLIGATOR RIVER WILDLIFE REFUGE. The [AP](#) (5/21) reports that "federal and state fire crews are battling a wildfire at the Alligator River National Wildlife Refuge across from Manteo on the mainline side of the Outer Banks." According to a spokeswoman for the refuge, "the fire was reported late Tuesday and was then about 20 acres." But "by Wednesday morning, the fire had grown to 100 acres."

HAVASU WILDLIFE REFUGE EXPANDING "NO RECREATION ZONE." The [Havasu \(AZ\) News-Herald](#) (5/21, 27K) that the FWS "announced Wednesday that Havasu National Wildlife Refuge will be expanding its zone of protection this week." According to the article, "effective immediately, protected backwater portions of the refuge will be extended 1/2 mile to the south."

INVESTIGATION OF BUTTERFLY CONSUMED IN VIDEO CONCLUDES IT WAS NOT ENDANGERED SPECIES. The [Tomah \(WI\) Journal](#) (5/21, 13K) reports that "the insect purportedly eaten in a video posted on the Facebook account of a former city council member was likely not an endangered Karner blue butterfly." The Wisconsin Department of Natural Resources "this week said it closed its joint investigation with the U.S. Fish and Wildlife Service of the video, which shows Walt Pankowitz eating what he claimed was the butterfly protected under the Endangered Species Act." According to DNR conservation warden supervisor Jeremy Peery, "the butterfly looked like a spring azure, not the rare Karner bluey."

ENVIRONMENTAL GROUP TO SUE DHS, GSA OVER PLUM ISLAND. The [Suffolk \(NY\) Times](#) (5/21, 32K) reports that a Plum Island preservation advocacy group informed the Southold, New York town board of its intent to move forward with a lawsuit against DHS and the General Services Administration for alleged failures to protect endangered species living on the island, which is overseen by the two entities. Chris Cryder, special projects coordinator for the Connecticut Fund for the Environment, is quoted saying that DHS and the GSA's response to their notice of intent to sue "was not adequate," and a lawsuit "will be filed in the coming months."

MAN SENTENCED IN WILDLIFE SMUGGLING CASE. The [AP](#) (5/21, 2.29M) reports that "a Florida businessman has been sentenced to three years in federal prison for a wildlife smuggling conspiracy that included rhinoceros horns and elephant ivory." The article notes that "a federal judge on Wednesday also ordered the Boynton Beach auction house owned by Christopher Hayes to pay a \$1.5 million fine."

OBAMA ADMINISTRATION CRITICIZED FOR OVERHAUL OF ENDANGERED SPECIES ACT. For "The Blog" of the [Huffington Post](#) (5/21, Greenwald, 194K), Noah Greenwald, Endangered species program director, Center for Biological Diversity, criticizes the Obama Administration for "rolling out a series of regulatory changes that threaten to cripple the Endangered Species Act, dramatic changes that would never have flown under the Bush administration."

Additional coverage of the proposal to reform the Endangered Species Act was provided by the [High Country \(CO\) News](#) (5/21, 74K).

US Geological Survey:

USGS TURNS TO CITIZEN SCIENTISTS. For the "Pundits" blog of [The Hill](#) (5/21, Rodewald, Contributor, 533K), Amanda D. Rodewald, director of conservation science at the Cornell Lab of Ornithology, writes that "citizen scientists are increasingly relied upon to provide agencies and organizations with the data needed to make decisions." As an example, she notes that the USGS "depends on volunteers to improve The National Map and document the aftermath of earthquakes." In fact, Rodewald writes, "the best information we have on bird populations comes via citizen science initiatives such as the USGS's North American Breeding Bird Survey and Cornell Lab of Ornithology's eBird."

Securing America's Energy Future:

Renewable Energy:

CONSERVANCY GROUP 30,000 WIND TURBINES IN PROTECTED BIRD HABITATS. [CBS News](#) (5/21, Casey, 8.2M) reports on its website that analysis by the American Bird Conservancy "shows that more than 30,000 turbines overlap with federally protected bird habitat," and that by 2030, "wind turbines could kill more than 1.4 million birds annually, not including losses at associated transmission lines and towers." Tom Vinson of the American Wind Energy Association contested ABC's findings and "also argued that bird deaths from wind turbines were far less than other threats, including oil waste pits, windows and buildings," CBS reports. ABC has called for "effective mitigation" and "independent, transparent post-construction monitoring to help inform mitigation, and calculate compensation for the loss of...protected birds."

Onshore Energy Development:

REPUBLICANS FORTHCOMING MOUNTAINTOP MINING REGS PART OF "WAR ON COAL." [McClatchy](#) (5/21, Cockerham, 32K) reports that Congressional Republicans are looking to block a rule expected from the Administration to protect "Appalachian streams from mountaintop removal mining, as opponents of the controversial practice say the mines are getting closer to communities and harming people's health." Some Republicans, McClatchy says, "are describing the move as the latest campaign in the Obama administration's 'war on coal.'"

OFFICIALS FROM THREE STATES COMPLAIN ABOUT STREAM BUFFER ZONE RULE. [Politico Pro](#) (5/20) reports that "officials from three states told House lawmakers on Wednesday that they have largely been shut out of the rulemaking process for the Interior Department's stream buffer zone rule." Gregory Baker of the Virginia Department of Mines, Minerals and Energy "testified that his state chose to participate in the process in order to have a voice, but that since the initial proposed rule was circulated, the state was not given a chance to review the latest version." Russell Hunter of the West Virginia Department of Environmental Protection "complained that his state received very little time to review and comment on parts of the draft rule 'in what appeared to be a mockery of the process.'" Randall Johnson, the director of the Alabama Surface Mining Commission, "testified that OSM would not give states more time to comment back in 2011 in order to propose a rule that year. Johnson noted that OSM has yet to propose a rule."

WVDEP Backs Out Of Agreement To Cooperate With OSMRE In Revising Stream Protection Rule. The [Charleston \(WV\) State Journal](#) (5/21, 1K) reports that "the West Virginia Department of Environmental Protection is backing out of its agreement with the U.S. Office of Surface Mining Reclamation and Enforcement to cooperate in drafting the federal Stream Protection Rule." According to the article, "the WV DEP had previously agreed to cooperate with OSMRE in the preparation of a draft Environmental Impact Statement on proposed revisions to the federal surface mining regulations, but the agency said a 'lack of communication and engagement' has caused it to terminate the agreement, according to a May 20 announcement."

WESTERN STATES WARY OF ENFORCING BLM FRACKING RULES. The [Environment & Energy Publishing](#) (5/20, Subscription Publication, 705) reports that "a second legal and bureaucratic struggle is underway over the Bureau of Land Management's plan to regulate hydraulic fracturing on public land, as states decide whether they'll help enforce the plan." The BLM has "asked at least three oil-producing states to sign memoranda of understanding (MOUs) that would allow the states to enforce the federal rules on federal land." However, "Wyoming and Utah have balked and North Dakota is wavering, in part because BLM would require state regulations to match or exceed the federal regulations as part of an MOU."

Additional coverage was provided by the [Bismarck \(ND\) Tribune](#) (5/21, 39K).

INTERIOR BLASTS EFFORT TO FAST-TRACK PIPELINES THROUGH PARKS. The [Greenwire](#) (5/20) reports that "an Interior Department official today sharply criticized a bicameral effort that would scrap Congress' ability to oversee the construction of natural gas pipelines through national parks and some of the nation's most iconic landscapes." According to the article, "a senior Interior adviser on energy, minerals and realty management told members of a House Natural Resources subcommittee that a bipartisan House bill that mirrors a Republican effort in the Senate threatens to undermine the very purpose for which the National Park Service was created."

Additional coverage was provided by [The Hill](#) (5/21, Henry, 533K).

Offshore Energy Development:

HEARING HELD ON OFFSHORE DRILLING REVENUE-SHARING BILLS. The [Environment & Energy Publishing](#) (5/21, Subscription Publication, 705) reports that "a trio of offshore drilling revenue-sharing bills – focused on the Arctic, Gulf of Mexico and South Atlantic – were considered yesterday at a hearing of the Energy and Natural Resources Committee." However, "they ran into sharp objections from committee Democrats and a representative of the Obama administration, suggesting" Sen. Lisa Murkowski "may have to moderate her ambitions in order to secure bipartisan support and win the president's signature."

Additional coverage was provided by the [Oil and Gas Journal](#) (5/21, 1K).

SHELL MOVING FORWARD WITH ARCTIC PLANS. The [Independent \(UK\)](#) (5/21, Bawden, 1.01M) reports that "Shell's chief executive has staged a defiant performance at the company's annual shareholders meeting, claiming that calls to curb new oil developments were 'unrealistic' and saying that there would always be opponents to plans to drill in the Arctic." Ben van Beurden said that "the scale of the safety precautions Shell was taking as part of its plan to drill for oil in the Arctic was 'unprecedented' in the history of the oil industry."

Meanwhile, [KTUU-TV](#) Anchorage, AK (5/21, 78K) reports that "several environmental groups have asked a judge to stop Shell's Chukchi Sea drilling plans this summer, saying federal authorities didn't properly evaluate the threats drilling may pose to walrus in the region." The National Resources Defense Council said that a "legal brief, filed late Monday from Alaska in U.S. District Court, is its latest move in a case dating back to last year." NRDC officials wrote, "This brief asks a federal judge to invalidate a rule allowing Shell and others to harm walrus in the course of oil and gas exploration in the Chukchi Sea. NRDC's original complaint was filed in November."

Additional coverage was provided by [Scientific American](#) (5/21, 2.87M).

BP SETTLES GULF CLAIMS FOR \$211 MILLION WITH TRANSOCEAN, HALLIBURTON. Transocean announced Wednesday it has settled with BP and individual plaintiffs for \$211 million over the April 20, 2010 Deepwater Horizon incident which killed 11 and released millions of barrels of crude into the Gulf of Mexico.

The [AP](#) (5/21, Mcgill) reports that the "settlement that Transocean reached with the Plaintiffs Steering Committee will involve two classes of businesses and individuals," including a "new 'punitive damages class' that for various reasons was not included in the BP settlement." BP spokesman Geoff Morrell said in a statement, "We have now settled all matters relating to the accident with both our partners in the well and our contractors." Halliburton CEO Dave Lesar similarly expressed satisfaction with the deal "that allows us to close another chapter in the Deepwater Horizon case." The AP adds that notice of the settlement has not yet been filed in Federal court.

[Reuters](#) (5/21) adds that although cross claims have been settled, BP still faces a potential \$13.7 billion fine under the US Clean Water Act.

[USA Today](#) (5/21, 5.01M), the [Wall Street Journal](#) (5/21, Gold, Subscription Publication, 5.68M), [Bloomberg News](#) (5/21, Wethe, 3.81M), the [New Orleans Times-Picayune](#) (5/21, Larino, 733K), and [The Hill](#) (5/21, Henry, 533K) also report.

STUDY DOLPHIN DEATHS MAY BE LINKED TO GULF OF MEXICO OIL SPILL. The [New York Times](#) (5/21, Fleur, Subscription Publication, 12.24M) reports that researchers believe the death of numerous dolphins over the course of two years may be connected to the 2010 oil spill in the Gulf of Mexico. After analyzing "tissue samples collected from 46 dolphins shortly after they died," researchers from the National Oceanic and Atmospheric Administration "found more instances of adrenal and lung lesions in the dolphins that died near the Deepwater Horizon spill than in the other dolphins." For its part, BP dismissed the findings.

[AFP](#) (5/21, Sheridan), however, says the paper in the journal PLOS ONE "presents the strongest evidence to date." In addition, the advocacy group "Oceana's vice president for the US, Jacquelyn Savitz, said the study 'confirms yet again that the oil spill is linked to major impacts on marine animals in the Gulf.'" Notably, more than "1,200 dolphins have washed up in area of the Gulf of Mexico affected by the spill since April 29, 2010."

The [Wall Street Journal](#) (5/21, Mcwhirter, Subscription Publication, 5.68M) and [The Hill](#) (5/21, Cama, 533K) also provide coverage of this story.

OIL SPILL TRUSTEES ANNOUNCE TEN NEW PROPOSED PROJECTS. The [Alabama Live](#) (5/21, 416K) reports that "state and federal trustees announced 10 new proposed projects Wednesday to restore damage stemming from the 2010 Deepwater Horizon oil spill, with a total estimated cost of \$133.6 million." The article notes that "if approved, the projects would be funded by BP, which has agreed to provide up to \$1 billion for early restoration projects in the Gulf before the Natural Resources Damage Assessment process is complete."

JUDGE SAYS GULF OIL LEAK RECORDS CANNOT BE KEPT SECRET. The [AP](#) (5/21, McGill) reports that a Federal judge on Wednesday rejected New Orleans-based Taylor Energy's bid to "preserve the confidentiality of numerous emails and reports about its failed efforts to halt a decade-old Gulf of Mexico oil leak." An AP investigation "revealed evidence that the leak at the site of the toppled platform is worse than Taylor or government regulators had publicly reported," and that the documents could boost a lawsuit the Waterkeeper Alliance is leading against Taylor Energy. Lawyers for Taylor Energy had argued "the documents contain commercially valuable trade secrets and private information," and Judge Wells Roby indicated she may order changes to the protective order she characterized as overly broad, the AP reports.

BOEM HOST PUBLIC MEETING ON PROPOSED OIL AND GAS LEASES. The [Panama City \(FL\) News Herald](#) (5/21, 94K) reports that the BOEM "hosted a public meeting Tuesday to gather public comment as it prepares a draft Environmental Impact Statement for 10 proposed oil and gas lease sales scheduled for between 2017 and 2022." However, "the local meeting drew just one person and no official comments." BOEM public affairs officer John Filostrat said because "the process is still in its early stages, low attendance at scoping meetings is not uncommon."

"MASSIVE CLEANUP" UNDERWAY AFTER CALIFORNIA OIL SPILL. [ABC World News](#) (5/20, story 4, 1 25, Muir, 5 84M) reported that 105,000 gallons of oil are "on the move tonight, and now covering nine miles of coastline in Santa Barbara," after a "major oil spill in California." Kendis Gibson reported that "a massive cleanup effort is under way on one of southern California's most popular beaches." Janet Wolf of the Santa Barbara County Board of Supervisors is shown saying, "This oil spill affects all of us. This is a disaster. It's a worst nightmare scenario."

On [NBC Nightly News](#) (5/20, story 2, 2:40, Holt, 7.86M), Hallie Jackson reported that some volunteers "came hoping to help wildlife only to find there's nothing to save." Linda Cropp at the Environmental Defense Center "says it's too soon to tell how badly the spill's hurting birds and other animals here." Cropp is shown saying, "This is one of the worst places to have an oil spill."

On the [CBS Evening News](#) (5/20, story 6, 1:30, Pelley, 5.08M), Ben Tracy reported that a "pipeline ruptured Tuesday afternoon possibly leaking 100,000 gallons of crude, according to its owner Plains All American Pipeline." The company's district manager, Darren Palmer, is shown saying, "We are sorry that this accidentally release has happened and we are bringing in all the resources at our disposal to respond."

Tackling America's Water Challenges:

BOR AWARDS 2015 WATER CONSERVATION FIELD SERVICES PROGRAM GRANTS. The [Prairie \(MT\) Star](#) (5/21) reports that the BOR has "awarded 17 Water Conservation Field Services Program grants in the Pacific Northwest Region, ranging from \$11,940 to \$25,000." According to the article, "the Program provides technical and financial assistance to encourage water conservation on Reclamation Projects by assisting irrigation districts to develop and implement water conservation plans, and to foster improved water management."

BOR SAYS NO KLAMATH WATER AVAILABLE TO COMBAT SALMON-KILLING PARASITE. The [AP](#) (5/21, Barnard, 2 29M) reports that "a deadly salmon parasite is thriving in the drought, infecting nearly all the juvenile chinook in the Klamath River in Northern California as they prepare to migrate to the ocean." The Klamath Fish Healthy Advisory Team, "made up of state and federal agencies and Indian tribes, warns a major fish kill is likely, and the Yurok Tribe and NOAA Fisheries Service have asked for extra water releases to flush out worms that carry the parasite, known as C shasta." However, the BOR says "after four years of drought, it has no water to spare for chinook salmon." BOR spokeswoman Erin Curtis said Wednesday "the water stored in Klamath Basin reservoirs is already committed to endangered sucker fish and threatened coho salmon, and releasing water now means less for any crisis that erupts this summer."

EXTRA KLAMATH RIVER WATER RELEASES CURTAILED. The [Klamath Falls \(OR\) Herald And News](#) (5/21, 45K) reports that "the potential for a fish-kill in the Klamath River has been upgraded to 'likely,' but no additional flows will be released from Upper Klamath Lake at this time, according to Basin water managers." Brian Person, acting manager for the BOR Klamath Basin Area Office, said "the agency chose not to release flows after consulting with tribal and federal fish health experts and after reviewing recent fish health and water quality reports."

SISKIYOU SUPERVISORS OBJECTS TO MISCHARACTERIZATION BY INTERIOR REPRESENTATIVE. The [Siskiyou \(CA\) Daily News](#) (5/20, 16K) reports that "the rift between the United States Department of the Interior and Siskiyou County may have widened over a recent letter from DOI representative John Bezdek." The article notes that "the Siskiyou County Board of Supervisors has long expressed its opposition to the removal of the dams, but the way Bezdek characterized that opposition stoked an impassioned response earlier this month."

Empowering Native American Communities:

DEPUTY SECRETARY CONNOR TESTIFIES BEFORE SENATE PANEL. The [Law 360](#) (5/21, 15K) reports that Interior Deputy Secretary Michael Connor "told a panel of senators Wednesday that to support tribal self-determination and avoid expensive litigation over water issues in Indian Country, the Obama administration backs water rights settlements with Native American tribes." During a hearing before the Senate Indian Affairs Committee, Connor said "legal disputes between states, tribes and other parties are 'often expensive and divisive.'"

JUDGE DECLINES TO TOSS MESA GRANDE BAND LAND DISPUTE. The [Law 360](#) (5/21, 15K) reports that the Interior Department "has to face a suit over tribal land in the mountains northeast of San Diego, the Court of Federal Claims ruled Wednesday, rejecting arguments that the Mesa Grande Band of Mission Indians' action is time-barred." Judge Charles F. Lettow said "in an opinion that the Mesa Grande Band's complaint plausibly alleges that the DOI erred in issuing a land patent for an 80-acre tract claimed by the tribe to the neighboring Santa Ysabel Band."

JUDGE DISMISSES LAWSUIT OVER FLATHEAD RESERVATION WATER RIGHTS. The [Ravalli \(MT\) Republic](#) (5/21, 19K) reports that "a federal judge on Monday dismissed a 2014 lawsuit in which the Confederated Salish and Kootenai Tribes sought to have the court affirm that the 1855 Hellgate Treaty reserved the water flowing through the Flathead Indian Reservation for their use." U.S. District Court Judge Dana Christensen said "if the CSKT water compact recently approved by the state Legislature also gains approval from Congress and the Tribal Council, 'a declaration of the kind the Tribes request would serve no purpose.'" The article notes that "on the other hand, Christensen wrote in his decision, if the compact isn't ratified by Congress or the tribes, the declaration they sought 'would result in duplicative litigation and would encourage forum shopping – the Tribes would likely make the same historical and legal arguments made before this Court if they were to appear before the Montana Water Court without a decree.'"

FATE OF MASHPEE WAMPANOAG'S CASINO PROPOSAL REMAINS UNCERTAIN. The [Taunton \(MA\) Gazette](#) (5/20, Tuoti, 27K) reports that "the Mashpee Wampanoag tribe's pursuit of federal approval to build a casino in Taunton remains a major question mark as state gambling regulators examine proposals for commercial casinos in the nearby cities of Brockton and New Bedford." Assistant Secretary of the Interior Kevin Washburn said "last week that he does not have a sense of when a decision will be reached on the Mashpee's land-into-trust application."

CONNECTICUT SENATE PASSES CASINO BILL. The [AP](#) (5/21, Haigh, 641K) reports that "Connecticut senators neared agreement Wednesday night on legislation that creates a two-step process for opening a new tribal casino in the state and sends a message to neighboring Massachusetts that Connecticut is fighting to save thousands of existing casino jobs at Mohegan Sun and Foxwoods Resort Casinos." The article notes that "a vote on the bill was delayed for much of the day, due to a six-hour unofficial filibuster by the General Assembly's minority Republicans, who were upset their Democratic colleagues hadn't brought up bills the minority party wanted to vote on." But Senate Majority Leader Bob Duff, said "enough votes exist to pass the legislation."

The [Hartford \(CT\) Courant](#) (5/20, 591K) reports that "the Senate voted narrowly late Wednesday to start the process of authorizing a third casino in Connecticut, although proceeding on a cautious path that would buy the state more time to sort out complicated legal issues."

OP-ED FEDERAL GOVERNMENT CREATES UNFAIR ADVANTAGE IN GAMING INDUSTRY. In an op-ed for the [Washington Times](#) (5/21, Istook, 641K), Ernest Istook, president of Americans for Less Regulation, writes that "as the Obama administration invites more tribes into the casino game, some established Indian players want to keep the newcomers out." He argues that "those who compete with tribal casinos, or with other tribal businesses, often find themselves at a government-created disadvantage." Istook concludes that "our country needs to be fair to Native Americans, but not in ways that create unfairness for everybody else."

Office of Insular Affairs:

FOUR STUDENTS FROM INSULAR AREAS CHOSEN FOR SUMMER INTERNSHIP IN DC. The [St. Croix Source](#) (5/21) reports that the Interior Department has "selected four students from the U.S. Insular Areas to participate in the Office of Insular Affairs Internship Program." Assistant Secretary for Insular Areas Esther Kia'aina said, "I believe strongly in building the capacity of young people from the Insular Areas, especially those who are interested in public service and giving back to their communities. Because the role of the federal government, including the Office of Insular Affairs, is very important in the Insular Areas, I want our future leaders to learn about the workings of the federal executive branch, Congress and judicial branch. They will get a full and rewarding experience by working closely with senior leadership in our office."

Top National News:

OBAMA CLIMATE CHANGE POSES "IMMEDIATE RISK" TO US SECURITY. The President's [convocation speech](#) at the US Coast Guard Academy in New London, CT was not noted on the network newscasts last night, but it generated mostly positive print and online coverage, with a number of reports casting his arguments as some of his strongest to date on the issue of climate change. [USA Today](#) (5/21, Korte, 5 01M), for example, refers to Obama's "most forceful argument yet that climate change ranks alongside terrorism as a grave threat to America's future." Likewise, Rebecca Leber wrote for the [New Republic](#) (5/21, 228K) that though Obama had "already pitched action on climate change," yesterday "he went a step further," and Keith Johnson said on [Foreign Policy](#) (5/21, 449K) that he "ramped up his rhetoric." [Slate](#) (5/20, Holthaus, 1.31M), meanwhile, remarked on the President's "sharpest jab yet.. against politicians that deny human influence on climate change, sending them this message: You're a threat to national security."

Along those lines, widely noted in the coverage are Obama's comments about climate change deniers, as well as what the [AP](#) (5/21, Benac) calls his "determined and hopeful response to the opposition," which is "not likely to be fulfilled." Said Obama, "This cannot be subject to the usual politics and the usual rhetoric." The [Daily Intelligence \(NY\)](#) (5/21, Fuller, 452K), however, calls the President's speech "forcefully political," and [Politico](#) (5/20, Wheaton, 1.11M) says Obama "castigated" climate skeptics.

The [Hartford \(CT\) Courant](#) (5/20, De la Torre, 591K) quotes him as saying, "I know there are still folks in Washington who refuse to admit that climate change is real," but "politicians who say they care about military readiness ought to care about this as well," because "when the seas rise and the storms come, we all have to be ready." The [Hartford \(CT\) Guardian](#) (5/21, Adams) also notes that Obama charged that "denying it or refusing to deal with" climate change "undermines our national security."

The [Norwich \(CT\) Bulletin](#) (5/21, Penney, 46K) reports that Obama "said climate change – the science of which he called 'indisputable' – increases the risk of instability and conflict, creates new global tensions and will require the military to undertake more humanitarian missions as resources become scarcer and weather more unpredictable." [Bloomberg Politics](#) (5/20, Keane, 161K) points out that the President "didn't mention Islamic State militants," but indicated that "drought" was "a contributor to the unrest in Syria and to the rise of Boko Haram."

[Politico](#) (5/20, Wheaton, 1.11M) describes the address as "a somber lecture." "Domestically," noted the [Christian Science Monitor](#) (5/21, Feldmann, 539K), Obama said "the effects of climate change are already visible in coastal areas, putting the Coast Guard on the front lines." Geneva Sands, writing for [Fusion](#) (5/21), wrote that the President "said that rising sea levels threaten" both "economic infrastructure and force readiness." The President also "said that coastal military installations around Norfolk are already being impacted by flooding" and "expressed concern that the thawing permafrost in Alaska is already damaging military facilities."

The [Los Angeles Times](#) (5/21, Parsons, 4.03M), meanwhile, indicates that the President "warned...that climate change poses an 'immediate risk to our national security' so significant that US military forces will have to adjust how they train and operate."

The [Wall Street Journal](#) (5/21, Nelson, Subscription Publication, 5.68M) quotes Obama as saying, "Climate change will shape how every one of our services plan, operate, train, equip and protect their infrastructure, today and for the long term." [Reuters](#) (5/21, Rampton) reports that he told graduates that it "will affect everything that you do in your careers." On its website, [NPR](#) (5/21, Peralta, 1 52M) noted that Obama also said, "Make no mistake," climate change "will impact how our military defends our country. And so we need to act – and we need to act now."

The [AP](#) (5/21, Benac) reports that Obama's "message was reinforced by Secretary of State John Kerry, just back from meetings in Asia," who "said in a statement that the idea of climate change as a national security issue 'was a primary topic of discussion' throughout his conversations with Asian leaders." The [Daily Caller](#) (5/21, Bastasch, 366K) quoted Kerry as saying, "Anyone who doubts that confronting climate change is a national security issue should have sat in the meetings I just had in Asia, where it was a primary topic of discussion with every one of my interlocutors, alongside other security issues like [North Korea] and violent extremism." The [Washington Post](#) (5/21, Nakamura, 5.03M) notes that Kerry also said, "So now it's time to put aside discredited scientific arguments and partisan politics and to focus on the facts. ... Not just for our health and the health of our children, but for our planet's security as well."

The [Los Angeles Times](#) (5/21, Parsons, 4.03M) reports that the President's "call to action comes as" he "pursues a global agreement to reduce greenhouse gas emissions," with the White House hoping "to close an ambitious deal with sweeping goals at a December summit in Paris." The [New York Times](#) (5/21, Davis, Subscription Publication, 12.24M) notes that back in March, Obama "introduced a blueprint for cutting greenhouse gas emissions over the next decade in the United States by up to 28 percent from its level in 2005 levels." Moreover, says the [New York Daily News](#) (5/21, Edelman, 3.79M), after "facing resistance from Republicans in Congress," Obama "tried to tackle the problem himself, using executive orders to cut greenhouse gas emissions."

Yet Jeff Goodell, in a post for [Rolling Stone](#) (5/21, 6.04M), noted that Wednesday's speech came "a week after signing off on a new round of offshore drilling off the coast of Alaska," and Rebecca Leber, in the [New Republic](#) (5/21, 228K), also said that last week's announcement, which "effectively reopened the Arctic...to drilling," could be judged as "hypocritical, especially since" the Administration "defends the decision as a national security matter, as well."

In a post for [Mother Jones](#) (5/21, 723K), meanwhile, James West indicated that "the commencement address contained very similar language to the president's State of the Union speech in January," and [TIME](#) (5/21, Rhodan, 19.57M) pointed out on its website that it "echoed statements presented in the White House National Security Strategy." Time also reported that "according to a White House report released Wednesday, the Department of Defense is currently examining the impact climate change can have on US military bases." DOD "is also considering how much strain extreme weather places on the Coast Guard." The [Military Times](#) (5/20, Shane, 756K) noted that the report also "highlights international threats posed by natural disasters, 'which worsen refugee flows and conflicts over basic resources like food and water,'" and "argues climate change will act as 'an accelerant of instability around the world,' one that US forces will be called upon to solve."

Coast Guard Adm. Thad Allen (ret.) said on [MSNBC's All In with Chris Hayes](#) (5/20, 251K), "If you look at the security issues related to crop failures, fish stocks declining, the instability that comes from that, regions of the world become less governed or lawless, and the opportunity for terrorism or other forms of illicit trafficking to spring up there." Allen added that "the fact of the matter is our threats out there are evolving and some of that is related to climate." In fact, writes Goodell of [Rolling Stone](#) (5/21, 6.04M), "the notion that climate change is a threat to national security is not news to anyone in the Pentagon," where "there are not a lot of climate skeptics in the military high command." However, "Pentagon officials are reluctant to talk openly about this, in part because they don't like to engage in heated political issues, but mostly because they fear climate deniers in Congress will slash their budgets if they tell the truth too bluntly."

Indeed, some GOP lawmakers had harsh words for Obama's speech in Connecticut. [Bloomberg Politics](#) (5/20, Keane, 161K) notes that "Republicans said Obama should focus on acute national security threats rather than a long-term problem whose severity they continue to question, despite scientific consensus that temperatures are rising due to human activity." The [AP](#) (5/21, Benac), for example, quotes Rep. Mac Thornberry as saying, "Our adversaries are not motivated by the weather; they are emboldened by America's withdrawal from the world."

[Voice of America](#) (5/21, 63K) reported that Sen. John Barrasso "derided Obama's contention that climate change is a national security threat." Said the senator, "Americans understand that there are much more immediate threats facing our nation – the fall of Ramadi in Iraq, the brutal terrorist attacks by ISIS." "These are clear examples of the real threat that must be addressed by...Obama."

Kevin Corke similarly reported on [Fox News' Special Report](#) (5/20, 1.53M) that in Congress the speech garnered "heated criticism," with Sen. John McCain saying, "The President of the United States today says, well, it's climate change that we have to worry about. ... Do we give a damn about what is happening in the streets of Ramadi?"

[Politico](#) (5/20, Wheaton, 1.11M) notes that "one of Congress's top climate skeptics, Sen. James Inhofe," also responded to the speech "by calling Obama's threat assessment a 'severe disconnect from reality.'" Along similar lines, [Fox News](#) (5/21, 9.4M) reported on its website that Obama delivered the speech "at a time when the US military is facing threats on multiple fronts – most immediately, the advances of the Islamic State in Syria and Iraq, where the terror group recently seized Ramadi."

Greg Gutfeld said on [Fox News' The Five](#) (5/20, 408K) that the President is "saying that practices, our use of fossil fuels, our evil insensitivity towards the planet is causing women to be raped. ... Boko Haram is raping hundreds of women and it's our fault. It's not their fault. ... It's disgusting to me that he would even make this link."

Dana Perino, also on [Fox News' The Five](#) (5/20, 408K), said that the Administration "is pushing us on a national security level...because it becomes a panacea to protect them from any blame about the spread of terrorism on their watch."

On its website, the [Washington Times](#) (5/21, Wolfgang, 641K) quotes Laura Sheehan, senior vice president for communications at the American Coalition for Clean Coal Electricity, as saying that Obama had "missed the boat...by failing

KAYACTIVISTS PROTEST ARCTIC OIL EXPLORATION. [TIME](#) (5/18, Worland, 19 57M) reports that hundreds of kayaktivists on May 16 came together in the waters of Seattle's Elliott Bay to participate in a protest against Shell plans to drill in the Arctic this summer. Citing an AP story, TIME describes the "Paddle in Seattle" as the beginning of a three-day period of "massive peaceful resistance." The group on May 18 "plans to block access to the oil giant's rig parked in the Port of Seattle's Terminal 5 and delay preparations for drilling," the article reports. Environmental activists say Shell's Arctic drilling plans "pose a threat to local wildlife and will contribute to dependence on fossil fuels. They also cite the company's failed attempt to drill in 2012 as evidence that Shell would not be able to respond quickly to a large-scale oil spill."

The [Christian Science Monitor](#) (5/17, Knickerbocker, 539K) reports that as part of its movement against Shell, the group "sHellNo.org has scheduled 'NonViolent Direct Action Training' for Monday's Mass Direct Action" as part of its civil disobedience movement to block Shell's Polar Pioneer drilling rig. The kayaktivists have so far kept their legal distance from the vessels, approximately 100 yards. "Why would we invest in an energy source that scientists say is leading us to catastrophe?" asked Annie Leonard, executive director of Greenpeace USA. Shell's website says the Arctic holds a large amount of resources that "amounts to...10 times the total oil and gas produced in the North Sea to date." BOEM Director Abigail Ross Hopper said, "We have taken a thoughtful approach to carefully considering potential exploration in the Chukchi Sea, recognizing the significant environmental, social and ecological resources in the region and establishing high standards for the protection of this critical ecosystem, our Arctic communities, and the subsistence needs and cultural traditions of Alaska Natives."

[Reuters](#) (5/17, Cohen, Cavaliere) reports that Shell says it will proceed with its plans despite opposition from activists and Seattle's mayor. "The timeline now is just to make sure the rigs are ready to go," said Curtis Smith, a Shell spokesman. The Bureau of Ocean Energy Management's consent to the company's Arctic exploration plans earlier this week received the backing of some Alaska lawmakers who touted the economic benefits it would bring to the area.

The [AP](#) (5/16, Bellisle) provided coverage on protests by hundreds of activists on May 16 who sought to show their opposition to Shell's project, while some did not support the activists' efforts. While protesters came in canoes, kayaks and other small ships, insisting that fossil fuels belong below the ground, one by-stander, Greg Huyler of Yakima, Washington, said, "The problem is, all of these kayaks are petroleum products, and they're going to gripe about drilling for oil. And 90 percent of them drove here in cars that use petroleum products."

Rift Grows Between Washington, Alaska. The [Seattle Times](#) (5/17, Bernton, 970K) reported on the growing polarization between Alaska and Washington states with regard to offshore drilling and oil exploration in general. Alaska's House and Senate last month approved a measure in favor of "closing the Boeing production facilities to reduce emissions of carbon dioxide from commercial activity" rather than restricting the oil industry in the state. While the Shell Arctic drilling project will not bring Alaska any new royalties, Sen. Lisa Murkowski is hoping that amendments will be made to the law in order to allow her state to receive some of the federal revenues from further explorations and that new jobs will also be created. Meanwhile, Washington "Gov. Jay Inslee wrote a letter to Interior Secretary Sally Jewell opposing further offshore Arctic oil and gas leases," the article reports.

Trends In Oil Markets Explored. [Bloomberg News](#) (5/15, Roston, 3.81M) took a look at the oil boom in Alaska.

Opinion: Shell Arctic Exploration Should Be Banned. Cindy Shogan, executive director of Alaska Wilderness League, writes for [The Hill](#) (5/17, Shogan, 533K) in its "Congress Blog" that the Obama Administration's decision to grant Shell access to the Arctic is poorly thought out in light of "the Interior Department's own admission" that "there is a 75 percent chance of a major oil spill if full field development occurs in the Chukchi Sea." She adds that former Interior Secretary Ken Salazar in 2012 "promised to hold Shell's feet to the fire," after the company's infractions at the time. Shogan adds that about a year ago, "Rear Admiral Joseph A. Servidio wrote that he was 'most troubled by the significant number and nature of the potential violations of law and regulations'" by Shell. She calls on the Administration to rethink its decision to give Shell another chance considering the company's "incompetence."

WSJournal Praises Decision To Grant Shell Approval To Drill Off Alaska's Coast. In an editorial, the [Wall Street Journal](#) (5/16, Board, Subscription Publication, 5.68M) called the Bureau of Ocean Energy Management's decision to finally grant conditional approval to Royal Dutch Shell for exploratory drilling off the coast of Alaska good news and criticizes the lengthy bureaucratic delays and the opposition from environmental groups to Arctic oil.

Additional Coverage. Additional coverage was provided by [BBC News](#) (5/17, 1.79M), [Sky News \(UK\)](#) (5/18, 138K), the [Denver \(CO\) Post](#) (5/17, Press, 894K), the [Houston \(TX\) Chronicle](#) (5/15, Le, 2 29M), the [Waterbury \(CT\) Republican-American](#) (5/17, 124K), the [Orangeburg \(SC\) Times And Democrat](#) (5/17, 51K), the [Lafayette \(LA\) Daily Advertiser](#) (5/17, 83K), [Reuters](#) (5/16), [NPR](#) (5/15, 1.52M), the [Anchorage \(AK\) Petroleum News](#) (5/17, 20K), the [Anchorage \(AK\) Petroleum News](#) (5/17, 20K), [KOMO-TV](#)

[Seattle \(WA\)](#) Seattle (5/17, 200K), [WRTV-TV Indianapolis \(IN\)](#) Indianapolis (5/17, 145K).

SECRETARY JEWELL ASKED TO MONITOR FRACKING NEAR CHACO CANYON. The [Public News Service](#) (5/18, 306) reports that "New Mexico's congressional delegation is asking U.S. Interior Secretary Sally Jewell to monitor a possible escalation of fracking in an area considered sacred by many Native Americans." In a letter to Jewell, Sens. Tom Udall and Martin Heinrich and Rep. Ben Ray Lujan "stress the historic, cultural and ecological significance of Chaco Culture National Historic Park." Udall also wants Interior Department officials "to keep him posted as they consider offering more oil and gas leases in the region."

SECRETARY JEWELL URGED TO HAVE OSM APPEAL DECISION IN COLORADO MINE CASE. The [Craig \(CO\) Daily Press](#) (5/17, 10K) reports that "Moffat County Commissioners met with U.S. Sen. Cory Gardner, R-Colorado, on Saturday morning in Mesa County to discuss the recent lawsuit that threatens Colowyo Coal Company." Gardner "drafted a letter to Secretary of Interior Sally Jewell, asking her to have the Office of Surface Mining appeal the decision by Federal District Judge R. Brooke Jackson, who ruled OSM did not comply with federal law when it approved mining plans for Colowyo and Trapper mines roughly 20 years ago."

SCHOOLCHILDREN VISIT WHITE HOUSE FOR "EVERY KID IN A PARK" INITIATIVE. The [Weekly Standard](#) (5/17, 414K) reports that "schoolchildren visited the White House this week for the latest installment of the administration's 'Every Kid in a Park' initiative." Interior Secretary Sally Jewell "joined the fun, tweeting some pictures along with the program's basic mission: 'to help more kids experience nature, outdoors ... #FindYourPark.'" However, "the timing of it all was rather ironic," because "Chicago kids trying to #FindTheirPark may soon have one less park to choose from, thanks to President Obama." On Tuesday, the Obama Foundation announced that the Obama Presidential Library will be built "on top of one of Chicago's historical urban parks."

SECRETARY JEWELL ATTENDS WHITE HOUSE AAPI SUMMIT. The [American Bazaar](#) (5/16) reports that "the daylong White House Summit on the Asian Americans and Pacific Islanders, the first-ever White House-sponsored celebration of heritage and advancement in the AAPI community, held on May 12, combined political activism, artistic performances and fireside chats." The article notes that "President Obama was not present, but his 15 cabinet secretaries and senior administration officials participated in the Summit on AAPIs, explaining how the Obama administration's actions have benefited the Asian American community." Interior Secretary Sally Jewell was among the cabinet officials who participated.

HOUSE VOTES TO ENSURE NELLIS OPERATIONS WITHIN PROPOSED BASIN AND RANGE NATIONAL MONUMENT. The [Las Vegas Review-Journal](#) (5/17, 380K) reports that the House approved an amendment Thursday that seeks to ensure Air Force activities in Nevada are not hindered by a proposed Basin and Range National Monument. Rep. Cresent Hardy said, "My amendment is about protecting America's national security, and that means ensuring that our military has guaranteed access to land located beneath or associated with military operations areas for essential training and readiness activities."

In an op-ed for the [Los Angeles Times](#) (5/15, Govan, O'Donnell, 4.03M), Michael Govan, director of the Los Angeles County Museum of Art, and Brian O'Donnell, executive director of the Conservation Lands Foundation, urge support for the proposed Basin and Range National Monument. They note that "its approximately 700,000 acres would contain a unique variety of Mojave, Sonoran and Great Basin vegetation communities," and "it would shelter at least two dozen threatened and sensitive species, including ancient bristlecone pines, some more than 2,000 years old." Also, they argue that "setting aside this land would help to rectify an imbalance in Nevada's and America's parklands."

REP. MEYER SUPPORTS GRAND CANYON WATERSHED NATIONAL MONUMENT. In an op-ed for the [Arizona Republic](#) (5/15, 1.27M), Rep. Eric Meyer writes that "Grand Canyon's watershed on the lands north and south of Grand Canyon National Park is worthy of designation as a new national monument." He notes that "the region has been temporarily protected from most harmful uranium mining, a decision supported by the majority of Arizonans," but "Arizona's attorney general has decided to back a mining industry challenge to the uranium mining withdrawal that protects the area." Meyer says that "establishing a national monument will make those protections against uranium mining permanent."

America's Great Outdoors:

National Park Service:

SAGINAW CHIPPEWA INDIAN TRIBE TO REPATRIATE, REBURY REMAINS. The [AP](#) (5/15, 2.29M) reports that "the Saginaw Chippewa Indian Tribe of Michigan and its Zibiwing Cultural Society are working to repatriate and rebury the remains of 43 Native Americans." According to the article, "the American Museum of Natural, Toledo Zoological Society and Dearborn Historical Museum are collaborating with 10 federally-recognized tribes and two state historic tribes on the planned repatriation and reburial." The article notes that "it's made possible by financial support from the Department of the Interior, National Park Service and the National NAGPRA Program." NPS Director Jonathan B. Jarvis said, "The work funded by these grants is a step toward addressing past violations of the treatment of human remains and sacred objects of native peoples, while restoring the ability of American Indian and native Hawaiian peoples to be stewards of their own ancestral dead and cultural heritage."

SETTLEMENT REACHED IN SHERCO PLANT LAWSUIT. The [AP](#) (5/15, 2.29M) reports that a settlement has been reached between the Environmental Protection Agency, a subsidiary of Xcel Energy, and several environmental advocacy groups concerning haze produced by the coal-fired Sherco plant impacting two national parks in the area. The agreement "requires Northern States Power Co. to reduce sulfur dioxide emissions from two Sherco units by about 10,000 tons annually by Oct. 1" with more cuts to take place by 2017. The suit was brought against the EPA and Northern States Power after the National Park Service certified that emissions from the plant were obstructing views in Voyageurs and Isle Royale national parks. The [Minneapolis Star Tribune](#) (5/17, Shaffer, 1.29M) reports that Xcel has already invested \$50 million at the plant to reduce emissions, and that a 15-year plan is currently under consideration by the Minnesota Public Utilities Commission that would shutter the plant.

BISON GORES EXCHANGE STUDENT IN YELLOWSTONE NATIONAL PARK. The [AP](#) (5/17, 2.29M) reports that "a 16-year-old girl has been gored by a bison in Yellowstone National Park while posing for a picture near the animal." The NPS says "the unidentified girl's injuries were serious but not life-threatening." The service "described her as an exchange student from Taiwan who was visiting the park with her host family."

Also providing coverage are the [Washington \(DC\) Post](#) (5/16, Press, 5.03M), the [Denver \(CO\) Post](#) (5/17, 894K), [US News & World Report](#) (5/16, 907K), the [Daily Mail \(UK\)](#) (5/17, 5.37M), [CNN](#) (5/17, Mullen, 3.17M), [CBS News](#) (5/17, 8.2M), [ABC News](#) (5/17, 3.69M), [Reuters](#) (5/17), the [Christian Science Monitor](#) (5/16, 539K), and the [Huffington Post](#) (5/17, 194K).

CONTINUING COVERAGE OF ELK DEATHS AT POINT REYES. The [New York Times](#) (5/18, Cohen, Subscription Publication, 12.24M) reports that at Point Reyes National Seashore, "the die-off in the elk refuge and the flourishing of the free-roaming flocks have rekindled a dispute over management of these majestic creatures found only in California, where they were half a million strong before the Gold Rush." The article notes that "in defense of the park service, David Press, a wildlife ecologist with the agency, said the plan for managing the elk preserve 'wasn't written in light of the worst drought in records.'" According to the article, "the problem of the tule elk — named after the sedge-like vegetation they favor and pronounced 'too-ly' — pits conservationists, who want wild animals to roam the national seashore freely, against ranchers, who want to confine the elk behind fences."

CROSSING CONNECTS BIG BEND NATIONAL PARK AND MEXICAN PUEBLO. The [Houston Chronicle](#) (5/15, Delsol, 2.29M) reports that "Big Bend National Park and the town of Boquillas del Carmen in Mexico's adjacent Coahuila state are joined at the hip." Recently, "after years of behind-the-scenes analyses and negotiations, the National Park Service and Customs and Border Protection, with the blessing of the federal governments of both countries, unveiled a brand-new automated port of entry like those on Canadian border on April 10, 2013." According to the article, "a few formalities are involved now: Visitors must scan their passports at the new kiosk, and while there are no border patrol agents, park rangers are on hand to explain the process and dispense a little information about Boquillas."

SUSPECT IN NPS EMPLOYEE'S ATTACK CONSIDERING PLEA. The [AP](#) (5/17, 2.29M) reports that "a man accused of assaulting a National Park Service employee in southeastern Arizona will get more time to review the evidence against him before deciding on whether to accept a plea deal." According to the article, "a judge granted the request made by a new court-appointed attorney for Gil Gaxiola during a hearing Friday."

HAWAII VOLCANOES NATIONAL PARK HOSTING BIOBLITZ AND BIODIVERSITY & CULTURAL FESTIVAL. The [Big Island \(HI\) Video News](#) (5/16) reports that "hundreds of scientists, students and Hawaiian cultural practitioners are storming Hawai'i Volcanoes National Park this weekend to participate in the BioBlitz, as well as the Biodiversity & Cultural Festival."

NPS STUDYING PUBLIC PADDLING IN CUYAHOGA RIVER. The [AP](#) (5/17, 2.29M) reports that the NPS is "working with Kent State University to look at opening up the Cuyahoga (ky-uh-HOH'-guh) River for canoeing and kayaking." According to the article, "small private groups will be taking trips over the summer in the Cuyahoga Valley National Park so officials can determine the feasibility of large-scale paddling."

DENALI WOLF POPULATION DROPS TO HISTORIC LOW. The [Cordova \(AK\) Times](#) (5/17, 2K) reports that "a Denali National Park staff report saying the park's historic low wolf numbers have been a result of low snowfall is being challenged by a retired University of Alaska professor who says hunting and trapping may be a factor in wolf mortality." The NPS' "annual wolf monitoring report for Denali suggested that the reason for the 'lowest wolf density estimate since monitoring began in 1986' may be due solely to natural

causes such as low snowfall." But "then came a follow-up report that admitted that both human and natural causes were involved, says Rick Steiner, who is also a board member of Public Employees for Environmental Responsibility."

Meanwhile, the [AP](#) (5/15, 2.29M) reports that "wolf hunting season will end two weeks early near Denali National Park and Preserve after reports of a recent wolf shooting at a bear baiting station." Alaska's Fish and Game Commissioner Sam Cotten "closed the season at midnight Thursday in an area to the north and east of the park."

SHENANDOAH PARK ESTABLISHES SECOND KID-FRIENDLY TRAIL. The [AP](#) (5/18, Press, 5 03M) reports that "Shenandoah National Park is establishing a second kid-friendly trail." The park says "the activities trail will be at the park's Blackrock Summit trail." The article notes that "the trail is part of the Kids in Parks program, a network of family-friendly outdoor experiences called TRACK Trails."

OPPOSITION TO GRAND CANYON ESCALADE PROJECT LAUDED. The [Fly Rod & Reel](#) (5/17, 146K) reports that "one month after naming the Colorado River in the Grand Canyon America's Most Endangered River of 2015, American Rivers applauded a positive step toward protecting the river from harmful development." The article notes that "newly elected Navajo Nation President Russell Begaye expressed his opposition to the proposed Grand Canyon Escalade Project on the east rim of the Grand Canyon." Bob Irvin, President of American Rivers, said, "The Grand Canyon should be protected for all of us, for all time. We applaud President Begaye's stance against the Escalade project and support his efforts to bring economic development to the Navajo Nation while safeguarding one of our nation's irreplaceable natural treasures."

EAST MILLINOCKET POSTPONES NATIONAL PARK VOTE. The [Bangor \(ME\) Daily News](#) (5/17, 179K) reports that "votes on the proposed north woods national park and the annual town meeting at which the selectmen and school board hope to pass budgets have been delayed by uncertainty about state funding." According to Mark Scally, chairman of the Board of Selectmen, "the school board requested the change recently because state education funds are critical to their budgeting efforts."

CURATOR WANTS STRASBURG TO BE RECOGNIZED FOR TRANSCONTINENTAL RAILROAD. The [AP](#) (5/17, 2 29M) reports that "Utah has long celebrated the completion of the transcontinental railroad in the town of Promontory, when a golden spike was driven into the tracks in 1869." However, "a Colorado museum curator is challenging that legacy, arguing the railroad wasn't completed until the next year in Strasburg, Colorado." Cliff Smith, the curator at the Comanche Crossing Museum in Strasburg, said he hopes the NPS "will one day recognize Strasburg's claim."

TWO DIE IN BASE JUMPING ACCIDENT AT YOSEMITE. The [AP](#) (5/17, Daisy Nguyen |, Ap, 5.03M) reports that "extreme athlete Dean Potter, renowned for his bold and sometimes rogue climbs and BASE jumps, was among two people who were killed while attempting a wingsuit flight in Yosemite National Park, a park spokesman said Sunday." According to park ranger Scott Gediman, Potter and his climbing partner Graham Hunt "jumped from a 7,500-foot promontory called Taft Point." The article notes that "BASE jumping, in which someone parachutes from a fixed structure or cliff, is illegal in Yosemite."

Also providing coverage is the [Los Angeles \(CA\) Times](#) (5/18, Hamilton, 4.03M), [CNN](#) (5/18, Mullen, Stringer, 3.17M), [NBC News](#) (5/18, 2.54M), the [New York \(NY\) Times](#) (5/18, Branch, Subscription Publication, 12.24M), the [Houston \(TX\) Chronicle](#) (5/18, Nguyen, 2.29M), and [TIME](#) (5/18, 19.57M).

COMPANY WAITS FOR APPROVAL TO TRANSFORM FORMER YANKTON POST OFFICE. The [AP](#) (5/17, 2.29M) reports that "the company that plans to transform the former Yankton post office into residential and commercial space is waiting for a final approval from federal officials to be able to begin construction." U.S. Property must ask the NPS "to approve the proposed changes to the old post office because the building is part of the National Register of Historic Places."

YELLOWSTONE WOLVES CHANGED ECOSYSTEM. The [Inquisitr](#) (5/18, 369K) reports that "after about a 70-year absence, wolves were reintroduced to Yellowstone National Park when a nearly record-breaking number of public comments were reviewed in 1994." But "after Yellowstone National Park reintroduced wolves into the wilderness, a trophic cascade occurred." According to the article, "their return benefited everything from the bald eagle to the river's flow."

ADDITIONAL COVERAGE OF ECONOMIC IMPACT OF NPS SITES. Additional coverage of the economic impact of NPS sites was provided by the [Tennessean](#) (5/15, 444K).

ADDITIONAL COVERAGE OF ISLE ROYALE WOLVES. Additional coverage that "only three wolves seem to remain in Isle Royale National Park" was provided by the [Detroit News](#) (5/17, 523K).

SEN. CARDIN URGED TO SUPPORT NPS. In a piece for the [Baltimore Sun](#) (5/17, 802K), Anne Donahue writes that the NPS centennial in 2016 is "a historic opportunity for Sen. Ben Cardin to use his position on the Senate Environment and Public Works Committee, which oversees national park transportation funding, to ensure our parks have the resources to thrive."

Bureau of Land Management:

ANNIVERSARY OF ORGAN MOUNTAINS-DESERT PEAKS MONUMENT CELEBRATED. The [Alamogordo \(NM\) Daily News](#) (5/17, 19K) reports that "a week-long celebration of the first anniversary of Organ Mountains-Desert Peaks National Monument continued Saturday evening at Mesilla Valley Bosque State Park with a big game cookout." According to the article, "residents, small business owners, sportsmen and dignitaries gathered at the park to enjoy elk tacos, prepared on a disco, beer from High Desert Brewing Co., live music and other culinary novelties."

COUNTIES SAY THEY WERE LEFT OUT OF SAGE GROUSE DECISION. The [Ontario \(OR\) Argus Observer](#) (5/17, 19K) reports that "officials from three counties say they were left out of the decision making that made 'substantial changes' to the proposed final environmental impact statement for greater sage grouse." Malheur, Harney and Lake county governments are "all designated cooperating agencies in the preparation of the final environmental impact statement," but "those governments say they were not included in a decision that would create a new special designation encompassing 1.9 million acres of land within the three counties."

OLD WOMAN MOUNTAINS PRESERVE COMPLETES FIRST PHASE OF IMPROVEMENTS. The [Palm Springs \(CA\) Desert Sun](#) (5/15, 85K) reports that "the Old Woman Mountains Preserve — 2,500 acres in the eastern Mojave Desert — has completed a first phase of improvements intended to better connect the ancient landscape to modern visitors and native populations." The article notes that "the Native American Land Conservancy was able to complete the project with a \$376,000 grant from the California State Parks Off Highway Motor Vehicle Recreation Division grant program, and more than \$100,000 from the Bureau of Land Management, which offered supplies and technical support."

Fish and Wildlife Service:

REPUBLICANS WORKING TO OVERHAUL ENDANGERED SPECIES ACT. [The Hill](#) (5/17, Cama, 533K) reports that "Republicans in the House and the Senate are plotting separate courses for how to dial back the Endangered Species Act (ESA), a long-time foe of conservatives and strong GOP supporters like oil drillers and ranchers." Republicans say "they want to improve the law so that it simultaneously is less of a nuisance to landowners and users and it better protects animals and plants." However, "Democrats are promising to defend tooth and nail the four-decade-old law from what they see as attempts to dismantle it, and one top Democrat is planning his own competing package to strengthen the conservation law."

The [Environment & Energy Publishing](#) (5/15, Subscription Publication, 705) reports that "House efforts to overhaul the Endangered Species Act are about to heat up, according to the leaders of the Natural Resources Committee." According to Chairman Rob Bishop, committee Republicans "plan to reintroduce a package of ESA reform bills that were recommended by a GOP working group last session."

HOUSE TAKES STEPS TO DELIST LESSER PRAIRIE CHICKEN. The [AP](#) (5/17, Press, 5 03M) reports that "the U.S. House has taken steps to remove federal protections for the lesser prairie chicken." House members "voted 229-190 to approve an amendment to the National Defense Authorization Act that would prohibit listing the lesser prairie chicken as a threatened or endangered species until 2021."

Also providing coverage are [The Hill](#) (5/15, Matishak, Marcos, 533K), the [Topeka \(KS\) Capital-Journal](#) (5/15, 117K), the [Daily Mail \(UK\)](#) (5/17, 5.37M), the [Denver \(CO\) Post](#) (5/17, 894K), and the [Houston \(TX\) Chronicle](#) (5/17, 2 29M).

NO SAGE GROUSE PROVISION IN MARKUP OF NATIONAL DEFENSE AUTHORIZATION ACT. The [Environment & Energy Publishing](#) (5/15, Subscription Publication, 705) reports that "the Senate Armed Services Committee did not include any language about the greater sage grouse or its endangered species listing in its markup of the National Defense Authorization Act." Chairman John McCain said that "unlike the House version of the bill being debated on the floor this week, his committee's bill 'has nothing pertaining to that.'" He said, "Any number of my colleagues of course are free to propose any amendments that come to mind on the floor, but no, I am not frankly interested in that."

HOUSE BILLS PUTS 10-YEAR HOLD ON SAGE GROUSE LISTING. The [Bend \(OR\) Bulletin](#) (5/17, 94K) reports that "the greater sage grouse could not be declared an endangered species for 10 years under legislation passed Friday by the U.S. House of Representatives." According to the bill, "designation of the sage grouse as an endangered species by the secretary of the Interior would have no effect until Sept. 30, 2025."

Also reporting on the story is the [Salem \(OR\) Capital Press](#) (5/16, 113K).

COLORADO TAKES STEPS TO PROTECT GREATER SAGE GROUSE. [The Hill](#) (5/17, Henry, 533K) reports that "Colorado Gov. John Hickenlooper has issued an executive order to protect the state's greater sage grouse population in a move meant to avoid potential federal regulations that could come with an endangered status for the bird." According to the article, "Hickenlooper's order establishes a 'habitat exchange' program in which ranchers and other landowners who take steps toward preserving grouse habitat land on their property earn credits for that work." The order also "requires state agencies to work with regulators if their activities might threaten the grouse's habitat, and it charges the state's Oil and Gas Conservation Commission with tracking energy development in sensitive habitat land."

Also providing coverage are the [Denver \(CO\) Post](#) (5/17, Nicholson, 894K), the [Houston \(TX\) Chronicle](#) (5/15, Elliott, 2.29M), and [KCNC-TV Denver \(CO\)](#) Denver (5/15, 57K).

MAINE RECEIVES GRANT UNDER CLEAN VESSEL ACT. The [AP](#) (5/18, 2.29M) reports that the FWS is "providing a \$356,000 grant to Maine under the Clean Vessel Act." The Maine Department of Environmental Protection "plans to use money to install or upgrade pump-out stations and to subsidize pump-out vessels and facilities."

FWS PETITIONED TO IMPOSE MORATORIUM ON IMPORTS OF LIVE SALAMANDERS. The [New York Times](#) (5/15, 12.24M) reports that "there are signs of hope for American salamanders in the face of a potential biological catastrophe — a fungus that could be carried here through the global trade in exotic pets." According to the article, "federal wildlife officials have signaled a crackdown may be coming on imports of amphibians." The Center for Biological Diversity, along with the group Save the Frogs, has formally petitioned the Fish and Wildlife Service to enact "an emergency moratorium on imports of all live salamanders into the United States to prevent the introduction of this disease while the Service sets up longer-term regulatory measures." Laury Marshall Parramore, a spokeswoman for the wildlife agency, said, "The threat to global salamander populations from a new fungal strain is very real and of great concern to the U.S. Fish and Wildlife Service. We're committed to expediting an injurious determination."

FWS ALLOWS INTRODUCTION OF NEW HORSES ON NORTH CAROLINA'S OUTER BANKS. The [Scranton \(PA\) Times Tribune](#) (5/17, 168K) reports that "as the summer tourist season approaches on North Carolina's Outer Banks, there's a growing hope among horse advocates that the iconic wild horses of Corolla can be saved from a fate of inbreeding and deformities." The FWS, "which considers the horses 'nuisance animals' that compete with federally protected birds for habitat, has loosened its stance and is allowing the introduction of new horses into the threatened herd in order to bring in fresh genes."

FWS TO KILL INVASIVE ADAK CARIBOU AND DONATE MEAT. The [Bristol Bay \(AK\) Times](#) (5/17, 4K) reports that "local residents are feeling a little better about a federal agency's plan to kill invasive caribou on Kagalaska Island." The FWS has "promised to donate the meat to community members on nearby Adak Island, according to Adak City Clerk Debra Sharrah."

FWS TESTING ANIMAL SHOT BY COYOTE HUNTER. The [Glenwood Springs \(CO\) Post Independent](#) (5/18, 27K) reports that the FWS is "conducting DNA tests on an animal shot by a coyote hunter on April 29 near Kremmling to determine if the animal is a gray wolf." Steve Segin, a public affairs officer with the agency, said, "The way they'll look at it is a potential wild wolf in Grand County."

GROUP SUES TO HALT LOGGING PROJECT IN KOOTENAI FOREST. The [AP](#) (5/17, 2.29M) reports that "a conservation group has filed a lawsuit to halt a logging project in the Kootenai National Forest in northwest Montana." According to the article, "in its lawsuit filed in U.S. District Court in Missoula, the Helena-based Alliance for the Wild Rockies argues that the U.S. Forest Service's approval of logging on a 92,407-acre area along the east side of Lake Kooncanusa Reservoir violates environmental laws and threatens lynx and grizzly bear habitat."

CRABBERS CRITICIZE NEW FISHING POLICY. [USA Today](#) (5/17, Waymer, Today, 5 01M) reports that "in 2018, the Merritt Island National Wildlife Refuge and Canaveral National Seashore plan to phase out commercial fishing, and it's uncertain where those who sell their catches will be allowed to fish on the federal property." Crabbers claim "the feds are unfairly stripping their right to eke out a living here, where the space race left behind a vast buffer of unspoiled nature and some of the best crabbing around."

NEW HAMPSHIRE SEEKS PUBLIC INPUT ON 10-YEAR WILDLIFE ACTION PLAN. The [AP](#) (5/15, 2.29M) reports that "the New Hampshire Fish and Game Department is asking people around the state for their input on a 10-year revision of its Wildlife Action Plan that aims to protect species from becoming endangered." The article notes that "the revision is required by states for them to qualify for State Wildlife Grant funds from the U.S. Fish and Wildlife Service."

EFFORTS TO IMPROVE HABITATS FOR NEW ENGLAND COTTONTAIL WORKING. The [AP](#) (5/17, 2.29M) reports that "New Hampshire's Fish and Game Department says efforts to improve habitat for the endangered New England cottontail seem to be working." Heidi Holman, a wildlife biologist with the department and leader of the cottontail restoration project, said "five to 10 of the rabbits can be found through 11 acres of habitat around the Stonyfield Farm site in Londonderry."

RESEARCHERS CONTINUE SURVEYS AFTER LYNX FAMILY DOCUMENTED IN VERMONT. The [AP](#) (5/17, Rathke, 2.29M) reports that "researchers are still surveying for Canada lynx in northern Vermont and New Hampshire after evidence of a family of the federally threatened animals was discovered in 2012 and 2013, the first time in Vermont's history that a reproductive lynx had been documented." According to the article, "biologists found tracks as well as scat and hair from a family of three, possibly four, animals traveling together in the Nulhegan Basin in northeastern Vermont in the winter of 2012."

ADDITIONAL COVERAGE PHOENIX ZOO BREEDS BLACK-FOOTED FERRETS. Additional coverage of the Phoenix Zoo's breeding program for black-footed ferrets was provided by the [Arizona Republic](#) (5/15, 1.27M).

FWS REVIEWING STATUS OF AMERICAN BURYING BEETLE. The [Tulsa \(OK\) World](#) (5/17, 456K) editorializes that "under pressure from U.S. Sen. Jim Inhofe, the Fish and Wildlife Service is reviewing the endangered status of the American burying beetle." The paper notes that "the beetle is the poster bug for those who, like Inhofe, think there's something cockeyed about how the Endangered Species Act works." The editorial argues that "a review to determine the true status of the odd little bug is reasonable."

US Geological Survey:

SCIENTISTS LEARN FROM 1980 MOUNT ST. HELENS ERUPTION. [PBS](#) (5/18, 1.23M) reports on the 35th anniversary of the Mount St. Helens eruption. John Pallister, the lead for the U.S. Geological Survey (USGS) Volcano Disaster Assistance Program, said, "It was a watershed event in volcanology in a lot of ways." He said, "It was when geologists after the eruption worldwide started recognizing these giant debris avalanches, these giant landslides that are now recognized as a major hazard at volcanoes all around the world."

Also providing coverage is [USA Today](#) (5/17, Grisham, Network, 5 01M).

USGS STUDY SAYS GLOBAL WARMING THREATENS GENETIC DIVERSITY IN COLUMBIA RIVER BASIN BULL TROUT. The [Summit County \(CO\) Citizens Voice](#) (5/17, 506) reports that "a native western trout species that's been listed as endangered since 1998 will likely be further threatened by global warming, according to biologists, who found that genetic diversity in bull trout is lowest where stream temperatures are warmest and winter flooding is highest." According to the article, "with these trends predicted to continue, a new U.S. Geological Survey-led study suggests that the species is more susceptible to climate change than previously thought." USGS researcher Ryan Kovach, the lead author of the report, said, "Genetic diversity is extremely depressed where future climatic conditions may be most challenging for bull trout. Together, these results highlight that bull trout may have little resiliency in a warming world."

Securing America's Energy Future:

Renewable Energy:

CALIFORNIA HYDROELECTRIC POWER DROPS IN DROUGHT. The [Los Angeles \(CA\) Times](#) (5/16, Xia, 4.03M) reports that California's dams are producing less power due to drought-depleted reservoirs in the state. The article notes that though some dams are now producing 20 percent of their normal capacity, the state will still be able to meet its electricity needs due to investments in solar and wind. However, a report by the Pacific Institute found that taxpayers spent nearly \$1.4 billion more from 2012 to 2014 on power generation due to increased coal and natural gas use because renewables were only able to fill 55 percent of the reduction in hydroelectric production.

Onshore Energy Development:

RULINGS ON COAL MINES' CONTRIBUTION TO GLOBAL WARMING EVALUATED. The [AP](#) (5/15, Slevin, Brown, 5 03M) reported that US judges in Denver over the last year required "Federal agencies that approve mining projects... to take into account coal's indirect environmental impact along with traditional concerns about mine dust and equipment emissions." One such mine in northwestern Colorado might "lose its permit if a new environmental review isn't completed within four months," the article reports, adding that "industry representatives fear the rulings, if allowed to stand, could set an example for other judges to follow and eventually threaten the mines that make up the backbone of an industry already facing uncertainty." Colorado Mining Association President Stuart Sanderson "said calculating a mine's contribution to global warming is

meaningless because it's dwarfed by unregulated emissions in the developing world," the article reported. But for environmentalists, rulings will bring transparency "so the public can decide if burning coal is worth the cost," according to the article.

Additional coverage was provided by the [Daily Mail \(UK\)](#) (5/17, 5.37M), the [Pittsburgh \(PA\) Tribune-Review](#) (5/17, 682K), the [Denton \(TX\) Record-Chronicle](#) (5/16, 44K), the [Longview \(TX\) News-Journal](#) (5/15, 64K), the [Houston \(TX\) Chronicle](#) (5/15, Slevin, Brown, 2.29M), [US News & World Report](#) (5/15, 907K), and [ABC News](#) (5/17, 3 69M).

The story was also carried by the [Arizona Republic](#), (5/17, Slevin, Brown, 1.27M)

OIL GROUPS SEEK TO BLOCK FRACKING RULE. The [FuelFix](#) (5/15, 7K) reports that oil industry groups "are asking a Federal judge to block the government from implementing new rules for hydraulic fracturing and drilling on public land," adding that "the preliminary injunction request, filed Friday in a US district court in Wyoming, came as part of the Independent Petroleum Association of America and Western Energy Alliance's ongoing challenge of those new mandates." Midway through the story, the Express-News switches from referring to "rules," plural, to "the rule," singular, saying that the rule, which will be effective June 24, "forces companies to disclose the chemicals they pump underground, seal off waste water in storage tanks and sets other standards for the construction of oil and gas wells drilled into land overseen by the Bureau of Land Management." Mark Barron, one of the Denver-based attorneys leading the litigation, said, "BLM has underestimated the cost of the final rule at every phase of development," adding that "injunctive relief is necessary to protect independent producers until the court reaches resolution."

FIGHT OVER COAL ROYALTIES HEATS UP. The [Washington Examiner](#) (5/18, 349K) reports that "the battle over coal has a new front: the royalties companies pay for mining on federal lands." Environmental and watchdog groups claim that there is "a loophole in the Interior Department's coal program that allows coal companies to stiff the state and federal governments." However, "the coal industry and its allies contend critics haven't pointed to any significant underpayments on the 12.5 percent fee they are supposed to pay the government for mining on federal land." The Interior Department "proposed a rule in January that would end a practice in which mining companies sell coal to subsidiaries that they own, which then flip it to international customers at a higher price, mostly in Asia."

CONCERNS RAISED OVER OXBOW WELL VIOLATIONS. The [Grand Junction \(CO\) Daily Sentinel](#) (5/18, 73K) reports that "conservationists are decrying environmental violations by Oxbow Mining in connection with 36 methane vent wells at its currently idle Elk Creek underground coal mine, and say the violations call into question efforts to let the mine install such wells in a roadless area should it resume operations." According to the article, "following an inspection in October by the state Division of Reclamation, Mining and Safety and the federal Office of Surface Mining, Reclamation and Enforcement, the state issued Oxbow a notice of violation and proposed a \$1,500 fine." The article notes that "among the issues the notice of violation raised were well pads that were built to sizes larger than permitted and/or in locations not shown on maps, roads that were larger than permitted, and wells that weren't properly plugged. A federal inspection report raised concerns about mismanaged sediment and topsoil on some sites."

THOMPSON DIVIDE COMPROMISE TOUTED. In an op-ed for the [Grand Junction \(CO\) Daily Sentinel](#) (5/18, 73K), Keira Bresnahan, the chairwoman of the Piceance Energy Action Council, writes that "the immediate future for natural gas in Colorado looks relatively dim." But she is hopeful that "there could be a light at the end of the tunnel if SG Interests and Ursa Resources are approved to trade their leases in Pitkin County for leases in Mesa and Delta counties."

Offshore Energy Development:

REPORT SAYS DECADE-OLD GULF OIL LEAK COULD LAST ANOTHER CENTURY. The [AP](#) (5/17, Tucker, Kunzelman, 2.29M) reports that "for more than a decade, oil has been leaking into the Gulf of Mexico where a hurricane toppled a drilling company's platform off the coast of Louisiana." Now, the federal government is "warning that the leak could last another century or more if left unchecked." However, "Taylor Energy Co., which owned the platform and a cluster of oil wells, has played down the extent and environmental impact of the leak." The firm also "maintains that nothing can be done to completely eliminate the chronic oil slicks that often stretch for miles off the Louisiana coast."

Additional coverage was provided by the [Atlanta \(GA\) Journal-Constitution](#) (5/17, 985K), the [Denver \(CO\) Post](#) (5/17, Tucker, Kunzelman), the [FuelFix](#) (5/17, 7K), the [San Antonio \(TX\) Express-News](#) (5/17, 670K), [US News & World Report](#) (5/16, 907K), the [Washington \(DC\) Post](#) (5/17, Tucker, Kunzelman), the [Washington \(DC\) Times](#) (5/17, Tucker, Kunzelman, 641K), the [Columbus \(OH\) Dispatch](#) (5/16, 565K), the [Chicago \(IL\) Tribune](#) (5/15, Reports, 2.74M), and the [Huffington Post](#) (5/15, |, Tucker, Kunzelman, 194K).

PROTESTORS RALLY OPPOSITION TO OFFSHORE DRILLING. The [NJ Today](#) (5/16) reports that "at noon, in solidarity with people across the world, New Jersey residents joined hands across the shoreline in opposition to fossil fuels and the importance of moving toward a clean energy future." Jeff Tittel, director of the New Jersey Sierra Club, said, "We are here today standing up for our coast and against offshore drilling. People all across this country are united in the efforts to stop the proposals to drill not only here in the Atlantic but in Alaska. We need to oppose offshore drilling whether it's in ANWAR, or Belmar, or Bradley Beach. We must say no to the fossil fools in Washington and instead move toward offshore wind. If the choice is either windmills or oil rigs, we choose wind. The spill in Virginia could have devastating impacts to our fishing and tourism economy. That is why the only oil we want to see on our beaches is suntan oil."

Additional coverage was provided by the [Press of Atlantic City \(NJ\)](#) (5/17, 214K), the [Daytona Beach \(FL\) News-Journal](#) (5/16, 176K), the [Charleston \(SC\) Post and Courier](#) (5/15, 305K), and [KTUU-TV Anchorage \(AK\)](#) Anchorage, AK (5/18, 78K).

FRAUDSTER WILL SERVE NEARLY 3 YEARS FOR LYING ABOUT OIL SPILL DAMAGE. The [AP](#) (5/15) reports that a Mississippi man, who had lied about his employment to receive \$36,000 in oil-spill recovery money following the Deepwater Horizon explosion, has been sentenced to 33 months in prison. Elvis O'Neal Gray in February was convicted in Federal court and sentenced on May 14. US District Judge Louis Guirola Jr. "ordered Gray to pay a \$7,500 fine and serve three years' post-release supervision," the article reports.

Tackling America's Water Challenges:

NYTIMES ANALYSIS CALIFORNIA WATER CRISIS PRODUCT OF GOVERNOR'S FATHER. In a 2,455-word analysis of California's water crisis, the [New York Times](#) (5/17, Nagourney, Subscription Publication, 12 24M) suggests it may be partially because of the legacy of former California Gov. Edmund G. Brown Sr. noting, "Nearly 50 years later, it has fallen to Mr. Brown's only son, Gov. Jerry Brown, to manage the modern-day California that his father helped to create."

California Town Blasted For Water-usage. The [Environment & Energy Publishing](#) (5/15, Subscription Publication, 705) reports that "Bermuda Dunes, an oasis town of about 6,000 located in the Coachella Valley, has been named as the heaviest water-using municipality in the drought-stricken state of California." The article notes that "the identification of the town is being touted as the latest example of 'drought shaming,' in which a growing number of Californians are taking to social media to criticize water wasters and pressure them to reduce."

Additional Coverage. Additional coverage of the drought was provided by the [Wall Street Journal](#) (5/15, Finley, Subscription Publication, 5 68M), the [Fairfield \(CA\) Daily Republic](#) (5/17, 53K), [Reuters](#) (5/15, Sherwood), [KPBS-TV San Diego \(CA\)](#) San Diego (5/15, 8K), and [KGET-TV Bakersfield, CA](#) (5/17, 216).

FEDERAL WATER BILL REMAINS MIRED IN UNCERTAINTY. The [Fresno \(CA\) Bee](#) (5/17, 313K) reports that "five months into a new Congress, and deep into a lasting drought, California water legislation still stymies and splits the state's lawmakers." According to the article, "draft copies are tightly held," and "the legislative timing, though a June 2 Senate hearing could yet happen, remains unsettled." Sen. Dianne Feinstein said, "It's very difficult to put something together. Obviously change is controversial, so to propose something and then not to be able to do it makes no sense."

TRUCKS TRANSPORTING CALIFORNIA SALMON TO OCEAN. The [AP](#) (5/17, Knickmeyer, 2.29M) reports that "state and federal wildlife agencies in California are deploying what they say is the biggest fish-lift in the state's history through this month, rolling out convoys of tanker trucks to transport a generation of hatchery salmon downstream to the San Francisco Bay." California is "locked in its driest four-year stretch on record, making the river routes that the salmon normally take to the Pacific Ocean too warm and too shallow for them to survive." The article notes that "for the first time, all five big government hatcheries in California's Central Valley for fall-run Chinook California salmon — a species of concern under the federal Endangered Species Act — are going to truck their young, release-ready salmon down to the Bay, rather than release them into rivers to make the trip themselves."

BOR KEEPING AN EYE ON SHRINKING LAKE POWELL. The [Raw Story](#) (5/17, 668K) reports that Lake Powell "provides a dramatically visible marker of the crisis facing the Colorado river after years of diminishing snowfalls on the Rockies." The BOR is "now facing a difficult balancing act." Rose Davis of the BOR's Upper Colorado region said, "We all are depending on the snow pack on the Rockies and Lake Powell is the first reservoir. It doesn't look very good. We have 56% of normal snowpack is the last reading that I saw. It's just terrible."

TRINITY RIVER COULD BE USED TO PREVENT FISH-KILL. The [Eureka \(CA\) Times Standard](#) (5/16, 55K) reports that "anticipating another drought-parched summer, Humboldt County supervisors are set to ask Washington, D.C., on Tuesday to help prevent a potential fish-kill by setting aside long-promised Trinity River water." The article notes that "while the supervisors' letter to U.S. Secretary of the Interior Sally Jewel states that Humboldt County will likely use the water in the late summer when fish-kill

conditions seem apparent, it also calls for even more foresight from the Interior Department's Bureau of Reclamation, which controls the flow of dam water."

BOR MONITORING WATER SEEPAGE. The [Omak-Okanogan County \(WA\) Chronicle](#) (5/15) reports that BOR officials are "monitoring water seepage along Interstate 90 near the Weber Siphon." The bureau was "alerted to the seepage today by the state Department of Transportation, which located it near where two concrete pipes run underneath the interstate."

BAY DELTA CONSERVATION PLAN CRITICIZED. In an op-ed for the [Sacramento \(CA\) Bee](#) (5/17, 551K), Craig Wilson, a former Delta watermaster and former chief counsel to the State Water Resources Control Board, criticizes the Bay Delta Conservation Plan. Instead, he argues that "a western conveyance would work better."

Empowering Native American Communities:

INTERIOR ANNOUNCES \$2 MILLION IN GRANTS TO BUILD TRIBAL EDUCATION DEPARTMENTS. The [Lake County \(MT\) Leader & Advertiser](#) (5/17, 11K) reports that "Assistant Secretary – Indian Affairs Kevin K. Washburn today announced that grants ranging from \$25,000 to \$150,000 per fiscal year are available for federally recognized tribes and their education departments." Interior Secretary Sally Jewell said, "This grant program reflects President Obama's commitment to tribal self-governance and self-determination, and will support tribal educators who best understand the unique needs of their communities as they strengthen their capacity to assume full control of B E-funded schools on their reservations. It is a critical step in redesigning the BIE from a direct provider of education into an innovative organization that will serve as a capacity-builder and service-provider to tribes with BIE-funded schools."

SENATE COMMITTEE HEARS TESTIMONY ON CONDITION OF INDIAN SCHOOLS. The [Minneapolis Star Tribune](#) (5/17, 1.29M) editorializes that "Minnesota's congressional delegation merits praise for its full-court press last week to improve the nation's dilapidated and underachieving Bureau of Indian Education (B E) school system." The U.S. Senate Committee on Indian Affairs heard testimony on the "poor condition" of BIE schools last week. The paper says that "in this age of highly charged partisanship, the bipartisan charge to tackle this educational crisis is especially admirable — and needed."

Additional coverage was provided by [Politico](#) (5/15, Emma, 1.11M), the [Huffington Post](#) (5/15, Klein, 194K), [Education Week](#) (5/17, 139K), and [KTUV-TV](#) Billings, MT (5/17, 4K).

SUICIDES ON PINE RIDGE RESERVATION INVESTIGATED. In an op-ed for the [New York Times](#) (5/17, Flood, Subscription Publication, 12.24M), Joe Flood addresses the "suicide epidemic" on Pine Ridge Indian Reservation. He notes that "tribal leaders and experts are struggling to understand the recent suicide epidemic (specifics on many of the cases aren't widely known), but there's general agreement on one underlying cause: the legacy of federally funded boarding schools that forcibly removed generations of Native American children from their homes." Also, "former students and scholars of the institutions say that the isolation and lack of oversight at the mostly church-run schools allowed physical and sexual abuse to run rampant."

BIA RECEIVES COMMENTS ON NEW ICWA RULE. The [Claremore \(OK\) Daily Progress](#) (5/17, 19K) reports that "tribal leaders and members, attorneys, psychiatrists and other individuals who have a special interest in the adoption of native children participated in a national conference call Tuesday afternoon and a public meeting in Tulsa on Thursday, to provide comments and recommendations to a proposed rule released by the Bureau of Indian Affairs in February." The changes are "proposed in an effort to create consistent Indian Child Welfare Act (ICWA) implementation in all states."

Additional coverage was provided by the [Native American Times](#) (5/17, 337).

SEN. FEINSTEIN DEFERS ON AGUA CALIENTE LAND EXCHANGE. The [Palm Springs \(CA\) Desert Sun](#) (5/15, 85K) reports that Sen. Dianne Feinstein has "deferred to a government environmental report in responding to concerns about a proposed land exchange between the Agua Caliente Band of Cahuilla Indians and the federal Bureau of Land Management."

NATIVE AMERICAN FISH AND WILDLIFE SOCIETY TO MEET. [KTOO-FM](#) Juneau, AK (5/17) reports that the Native American Fish and Wildlife Society meets in Juneau May 20-22, where "tribal and other government officials and staff will discuss climate change, subsistence, Arctic policy and dozens of other issues." Norman Jojola, the natural resource manager for the BIA's Northern Pueblos Agency in New Mexico, said, "A lot of the Western knowledge tends to have them tell you what a certain species wants, what a certain species needs, this is how they're going to survive. Instead traditional knowledge would go out, look at the species, live with the species and let the species tell you what it wants rather than you telling it what it's supposed to do."

SANCHEZ OFFERS APOLOGY FOR MAKING NATIVE AMERICAN "WAR CRY" GESTURE. The [Los Angeles Times](#) (5/18, Finnegan, 4.03M) reports that Rep. Loretta Sanchez, who last week announced that she will seek to succeed retiring Sen. Barbara Boxer in 2016, on Sunday offered an apology "for making a stereotypical Native American 'war cry' gesture that disrupted" her nascent bid. Sanchez "made the controversial gesture Saturday while joking with a group of Indian Americans about confusing an Indian American with a Native American." Speaking at the California Democratic Party convention on Sunday, Sanchez said that "in this crazy and exciting rush of meetings yesterday, I said something offensive, and for that I sincerely apologize."

The [Huffington Post](#) (5/17, Bobic, 194K) reported that asked about the incident on Saturday, state Attorney General Kamala Harris, widely perceived as the frontrunner in the Senate race, said, "It is shocking and there is no place for that in our public discourse."

Top National News:

RAMADI'S FALL SPARKS MEDIA QUESTIONS ABOUT ADMINISTRATION'S ISIL STRATEGY. While the three network newscasts spent a combined total of only two minutes on the fall of Ramadi to ISIL, print and online coverage of the story is fairly heavy. Generally, media reports cast the development as a major setback for Iraqi forces, and a number of stories – though that angle does not figure prominently in any of the reports – also question whether the city's fall is a reflection of the Administration's strategy for fighting ISIL, particularly its reliance on airstrikes to support Iraqi forces.

The [New York Times](#) (5/18, Arango, Subscription Publication, 12.24M), for example, says the city's fall, "despite intensified American airstrikes in recent weeks in a bid to save the city," is the "biggest victory so far this year" for IS L, which "laid bare the failed strategy of the Iraqi government" and "raised questions about the United States' strategy to defeat the Islamic State." The [Washington Post](#) (5/18, Naylor, Salim, 5.03M), meanwhile, calls the retreat of Iraqi forces "a blow to efforts announced by Iraqi officials to defend the city.. by sending military reinforcements."

The [AP](#) (5/18) calls Ramadi's takeover "a major victory for Islamic State," which "calls into question the Obama administration's hopes of relying solely on airstrikes to support the Iraqi forces in expelling the extremists," and both [Bloomberg News](#) (5/18, Sabah, 3.81M) and the [Los Angeles Times](#) (5/18, McDonnell, Bulos, 4.03M) call the fall of the city a "setback," which the Times says "underscores the limitations of airstrikes that lack an effective military partner on the ground." A [Wall Street Journal](#) (5/18, Subscription Publication, 5.68M) editorial also questions the Administration's strategy, saying the fall of Ramadi undermines assertions from the White House and Pentagon that the war against ISIL is going well, adding that the group has been able to retake most of the ground it lost due to the limitations put on military planners by the White House.

[The Hill](#) (5/17, 533K) noted that ISIL had "raised their black flag over the local government compound in Ramadi," and called the city's fall "a strategic blow to Iraqi forces," while [Reuters](#) (5/18, Coles) says this is ISIL's biggest victory since security forces and Shiite militias began pushing them back with the help of coalition airstrikes last year.

In an interview posted on the [PBS](#) (5/18, 1.23M) website, Nour Malas of the Wall Street Journal said this is "a huge setback for the government campaign launched last month to reclaim Anbar province," and in a story for the [Wall Street Journal](#) (5/18, Subscription Publication, 5.68M), Malas notes that the Iraqi forces' defeat came as they stepped up an effort to push ISIL out of Anbar province. On [ABC World News](#) (5/17, story 5, 0.30, Llamas, 5.84M), Tom Llamas also called it "a major setback," however, while [USA Today](#) (5/18, Shamary, 5.01M) calls Ramadi's fall "the biggest victory for the extremists this year despite stepped-up US-led airstrikes," it notes that US Central Command "was not yet ready to concede the city to the Islamic State, saying that Ramadi remains 'contested.'"

Charlie D'Agata similarly reported on the [CBS Evening News](#) (5/17, story 4, 1.05, Glor, 5.08M) that the Pentagon said late Sunday that "the situation remains fluid and contested and it is too early to make definitive statements about the situation on the ground," and Savannah Guthrie noted on [NBC Nightly News](#) (5/17, story 4, 0:25, Guthrie, 7.86M) that the Pentagon says "the situation there remains quite fluid and contested." Additionally, [Reuters](#) (5/18, 42K) quoted Pentagon spokeswoman Maureen Schumann as saying, "It is too early to make definitive statements about the situation on the ground there at this time."

Although [AFP](#) (5/18) notes that another Pentagon spokeswoman, Elissa Smith, said the US "warned two months ago that Ramadi could fall, said Smith, adding that losing the city now does not mean it will remain in IS hands," the [Washington Times](#) (5/18, Klimas, 641K) calls the takeover of Ramadi a "major loss for the Iraqi government and the US-Arab coalition supporting the mission with airstrikes," and says that "analysts cautioned that the US may be downplaying gains by the terrorists under pressure for the coalition campaign to be seen as succeeding."

Meanwhile [McClatchy](#) (5/18 Porthero 32K) cites Iraqi security sources who "described the fight for control of the capital of Iraq's largest province as essentially over after

reinforcements sent on Saturday to retake the city were crushed by Islamic State fighters," while the [AP](#) (5/18) says Iraqi officials "disagreed with each other over whether the city had fallen," though Prime Minister Haider al-Abadi "ordered security forces not to abandon their posts across Anbar province."

Displaced Sunnis From Anbar Face Hostility, Suspicion In Baghdad. The [Washington Post](#) (5/18, Morris, 5.03M) reports that Sunnis fleeing the violence in Anbar province are being "met with suspicion and hostility." Displaced Sunnis "complain of harassment by security forces and powerful Shiite militias who worry that the people reaching Baghdad may have ties to the Islamic State." According to Ziad Ali, head of the Baghdad morgue, "the number of unidentified bodies turning up in the Baghdad morgue has risen," which is "seen as a sign of an increase in sectarian killings." While Ali "declined to give exact numbers," he "said that instead of receiving about one unidentified body a day, there were now around five times that."

SENIOR ISIL LEADER KILLED IN US SPECIAL FORCES RAID. Senior IS L leader Abu Sayyaf was killed in a US special forces raid in Syria on Saturday. [McClatchy](#) (5/18, Rosen, 32K) says the raid was intended to capture Abu Sayyaf, but he "resisted and was killed, a Defense Department official said." McClatchy adds that his wife, Umm Sayyaf, "was taken back to Iraq for questioning," while [Reuters](#) (5/18, Dunham, Perry) notes that the raid, which was ordered by the President, marks the first special forces operation in Syria since the failed attempt to resc

OBAMA DEFENDS DECISION TO ALLOW SHELL DRILL IN ARCTIC. [Politico Pro](#) (5/15, Subscription Publication) reports that President Barack Obama on Thursday "defended the decision to let Shell drill offshore in the Arctic, and addressed criticism from environmentalists that the move undercuts his fight against climate change." At a press conference, Obama said "Shell had to go back to the drawing board" after its last effort "off the Alaskan coast suffered a series of crippling failures in 2012." Obama "gave a vote of confidence to his Interior Department's response to that stumble, saying the company had to wait a very lengthy period 'until they could provide us with the kind of assurances that we have not seen before.'"

Additional coverage was provided by [The Hill](#) (5/14, Cama, 533K), the [FuelFix](#) (5/14, 7K), the [Atlanta \(GA\) Journal-Constitution](#) (5/15, 985K), the [Houston \(TX\) Chronicle](#) (5/15, 2.29M), the [Washington \(DC\) Post](#) (5/14), [US News & World Report](#) (5/14, 907K), and the [Daily Mail \(UK\)](#) (5/15, 5.37M).

Shell Oil Rigs Arrive In Seattle Amid Controversy. [Reuters](#) (5/14, Cavaliere) reports that Royal Dutch Shell's first two Arctic oil drilling rigs arrived in Seattle on May 14 amid plans by environmentalists to protest the storage of the two vessels in the port.

The [Los Angeles Times](#) (5/15, Yardley, 4 03M) reports that kayaktivists went out in large numbers near Seattle's port to meet the rigs and show their opposition to the docking of the Polar Pioneer in city water, while the city mayor also cited permit violations for Shell's fleet. Yet the company still "intends to make a regular resident here as part of its plans to drill for oil in the Arctic Ocean," the article reports. Paddlers "ungreeted" the boat upon its arrival chanting, "What do we want? Climate justice! When do we want it? Now!" The large vessel remained unphased. Paul Queary, a spokesman for Foss Maritime, said, "we have the bigger boat." The vessels "should be back in late October or early November," Queary said. Cassidy Sharp, a spokeswoman for Greenpeace, said, "the bigger moment is when they leave here and when they're drilling for oil in Alaska... Of course, the endgame is for the Obama administration to cancel the lease to drill in the Chukchi Sea."

Additional coverage was provided by the [Tri-City Herald \(WA\)](#) (5/14, 100K), the [Boston \(MA\) Globe](#) (5/14, 886K), the [Washington \(DC\) Post](#) (5/14, Phuong Le |, Ap, 5 03M), the [Seattle \(WA\) Times](#) (5/14, Garnick, Bernton, 970K), the [Seattle \(WA\) Post-Intelligencer](#) (5/14, 822K), the [Daily Mail \(UK\)](#) (5/15, 5.37M), and [USA Today](#) (5/14, Graf, King-Tv, Seattle, 5.01M).

Arctic Drilling Rallies Environmentalists Around Other Issues. The [AP](#) (5/14) reports that the arrival of the Shell oil rig in Seattle "marks a pivotal moment for an environmental movement increasingly mobilized around climate change." Environmental groups "in the Pacific Northwest are sensing a shift in the politics that surround energy production, and have mobilized against a series of projects that would transform the region into a gateway for crude oil and coal exports to Asia," the article reports. "These proposals have woken a sleeping giant in the Northwest," said Eric de Place, policy director for Sightline Institute. "It has unleashed this very robust opposition movement," he added. "Shell still needs other permits from state and federal agencies, including one to actually drill offshore in the Arctic and another to dispose of wastewater," the article reports, but the company is moving ahead meanwhile.

Additional coverage was provided by the [Christian Science Monitor](#) (5/14, 539K) and the [Washington \(DC\) Post](#) (5/15, Le).

Alaskans Support Shell. The [Environment & Energy Publishing](#) (5/14, Subscription Publication, 705) reports that "on Tuesday afternoon, John Hopson Jr., mayor of the Native Alaska village of Wainwright, nervously took the microphone at a Port of Seattle commission meeting and tried to explain the importance of Arctic oil drilling to his community." He was "one of a dozen Alaskans on hand to urge the commissioners to allow Royal Dutch Shell PLC to use the Seattle port as home port for its Arctic drilling armada."

Canada Closely Watching Shell Exploration Plans In Alaska. [CBC News \(CAN\)](#) (5/15, 257K) reports that "Royal Dutch Shell's plans to explore for oil off Alaska's northwestern coast are being closely watched in Canada with a mixture of hope and concern." The article notes that "Shell isn't active in the Canadian Arctic these days, but both proponents and critics say the U.S. decision has implications for Canada."

USA Today: US Should Allow Shell To Drill Off Alaska. In an editorial, [USA Today](#) (5/15, 5.01M) says "there are good reasons to doubt the Obama administration should let Royal Dutch Shell have another try at drilling for oil" off Alaska's coast, but the company "should get another shot." USA Today says the "drilling Shell managed to do" three years ago "went smoothly" and the US "needs the kind of oil that could be found off Alaska."

In a [USA Today](#) (5/15, 5.01M) op-ed, Susan Murray, the deputy vice president for conservation group the Pacific for Oceana, says the approval of Shell's plans to drill off Alaska comes despite the lack of "any significant public evidence that the company has accepted responsibility for the problems it encountered in 2012 or that it is any more prepared now." Murray says any oil in the location "will be there when – and if – companies like shell" are capable of operating there.

Additional Coverage. Additional coverage was provided by [BBC News](#) (5/15, 1.79M), the [Pittsburgh \(PA\) Post-Gazette](#) (5/15, Board, 621K), the [Spokane \(WA\) Spokesman-Review](#) (5/15, 172K), the [Homer \(AK\) News](#) (5/14, 9K), the [Alaska Journal of Commerce](#) (5/15, 14K), the [Huffington Post](#) (5/15, Profeta, 194K), [OneNewsNow](#) (5/14, 6K), and [EcoWatch](#) (5/14, 27K).

SECRETARY JEWELL RETURNING TO IDAHO TO DISCUSS SAGE GROUSE. The [Idaho Statesman](#) (5/15, 199K) reports that Interior Secretary Sally Jewell is "returning to Idaho for the fourth time since President Barack Obama picked her to be the nation's public landlord in March 2013." Jewell will "talk about wildfires, the same issue she came to talk about the last three times." However, the article notes that "Jewell's last trip and this trip will focus on fire and sage grouse."

STUDY WILDFIRES MAY CONTRIBUTE TO CLIMATE CHANGE. The [Washington \(DC\) Post](#) (5/15, Mooney, 5 03M) reports that a study by researchers from the National

Park Service and UC-Berkeley found that over a nine year period, two thirds of the carbon loss came from six percent of burning land. The study comes as scientists are hypothesizing that wildfires contribute to a warming planet, which increases the chance of wildfire in a reinforcing cycle. William Sommers, a wildfire researcher at George Mason University, notes that while wildfires have been part of the ecosystem for hundreds of millions of years, "with anthropogenic climate change, the acceleration of natural processes makes it a very difficult situation." However, the article notes that "Forest managers are not powerless in the face of stronger wildfires" and that policies can be adapted to reduce the risk.

America's Great Outdoors:

National Park Service:

REPUBLICANS PROBING NPS RESPONSE TO PRO-MARIJUANA RALLY ON NATIONAL MALL. The [Greenwire](#) (5/14) reports that "lawmakers have begun to probe how the National Park Service responded to a pro-marijuana rally on the National Mall last month." Reps. Jason Chaffetz, chairman of the House Oversight and Government Reform Committee, and Mark Meadows, head of the Government Operations subpanel, have "requested documents as well as a briefing by U.S. Park Police about the rally, according to a letter obtained by Greenwire under the Freedom of Information Act."

DOGS SET LOOSE ON NATIONAL MALL TO CONTROL GEESE. [NBC Nightly News](#) (5/14, story 14, 0:15, Holt, 7.86M) reported, "Tonight the National Mall has gone to the dogs. Border collies let loose in the nation's capital on patrol as the so-called geese police to chase away geese who leave a whole lot of droppings on the ground around the monuments making for quite a mess to clean up."

Also reporting on the story are [NBC News](#) (5/15, 2.54M), the [Houston \(TX\) Chronicle](#) (5/15, 2.29M), the [Washington \(DC\) Post](#) (5/15, Press, 5.03M), and [WUSA-TV Washington \(DC\)](#) Washington (5/14, 95K).

NEW NAVAJO PRESIDENT OPPOSES GRAND CANYON TRAM. The [Greenwire](#) (5/14) reports that "newly inaugurated Navajo President Russell Begaye didn't actually read the document he signed at his inauguration ceremony that said he planned to develop a controversial aerial tram at the Grand Canyon, a spokesman said yesterday." One day "after hundreds watched him sign the agreement presented by predecessor Ben Shelly as a display of leadership solidarity, Begaye issued a statement that he is and always has been opposed to the Grand Canyon Escalade, a proposal to transport tourists from the east rim of the canyon just outside the national park to the confluence of the Colorado and Little Colorado rivers below via tram."

Also reporting on the story is the [Washington \(DC\) Post](#) (5/14, Felicia Fonseca |, Ap, 5.03M).

SEN. SCHUMER WANTS EASIER ACCESS TO NATIONAL RECREATION AREA. The [Queens \(NY\) Chronicle](#) (5/15, 101K) reports that Sen. Chuck Schumer is pushing for "better accessibility" to Gateway National Recreation Area "via public transportation." Schumer is calling on the Interior Department "to work with the city to connect the park with existing transportation infrastructure, including buses and subways, so people may get to it easier." Schumer said, "Despite the fact that fact Gateway National Recreation Area is located in a densely populated area amongst an economically diverse community, the unique potential of this invaluable urban park is hamstrung by insufficient public access to all that it has to offer — from beaches, to camping, to biking, to birding, to fishing, to just plain hanging out in a rare and wide-open space."

GM INVESTING \$1 BILLION IN R& D TECH CENTER. [Forbes](#) (5/14, 6.84M) reports that "General Motors will invest \$1 billion in its research and development campus in suburban Detroit." The article notes that "in 2000, the campus was listed on the National Register of Historic Places, and last year, it was named a National Historic Landmark by the Department of the Interior and the National Park Service."

Additional coverage was provided by [WDIV-TV Detroit \(MI\)](#) Detroit (5/15, 292K) and [WWJ-TV Detroit \(MI\)](#) Detroit (5/14, 34K).

BRIDGE TO FORKS OF THE ROAD DONATED TO NATCHEZ. The [AP](#) (5/15, Cook, 2.29M) reports that on Wednesday, "the historic brick bridge at the Forks of the Road site was transferred from Chartre Companies to the City of Natchez." Natchez National Historical Park Superintendent Kathleen Jenkins said "Natchez obtaining this land has immense historical significance." Also, "Shawn Bengé, deputy regional director of the National Park Service Southeast Region, said its important sites like Forks of the Road are preserved, because they commemorate American history — both the good and the bad."

ISLE ROYALE WOLF POPULATION DROPS TO THREE. [WUOM-FM](#) Ann Arbor, MI (5/15, 13K) reports that "in their latest winter study report, researchers on Isle Royale" saw only three wolves. However, "the report's finding of just three wolves left doesn't seem to alarm" Park Superintendent Phyllis Green. She said, "It is not at this point in time causing us to take any immediate action, but we are gathering data for moving into our planning process."

COASTAL COMMISSION DELAYS VOTE ON U2 GUITARIST'S MALIBU MANSION PLAN. The [Los Angeles Times](#) (5/15, Groves, 4.03M) reports that "the California Coastal Commission is keeping U2 guitarist the Edge waiting a while longer over the question of what he can build near a pristine ridge top overlooking Malibu." On Thursday, the commission "voted unanimously at its meeting in Santa Barbara to postpone a decision on rock star David Evans' proposal to build five mansions of 10,000 to 14,000 square feet each, all with swimming pools, in Sweetwater Mesa on the site of an ancient landslide." The article notes that "among those who raised concerns were the National Park Service, Los Angeles County Supervisor Sheila Kuehl, Serra Retreat homeowners and the Santa Monica Mountains Conservancy, which back in 2011 had agreed to remain neutral on the project — then even more expansive — in exchange for money and dedicated open space."

COMSTOCK HISTORY CENTER MUSEUM OPENS NEW MINING PHOTO EXHIBIT.. The [Lahontan Valley \(NV\) News](#) (5/15, 11K) reports that "the Comstock History Center Museum is presenting a new historic photo exhibit, 'Vanishing Icons: A Look Back at Comstock Mines and Mills.'" The article notes that "as part of the Historic American Engineering Record, the project was sponsored by the United States Department of Interior and conducted by the National Park Service."

VETERAN CLIMBER FOUND DEAD ON MOUNT MCKINLEY. [NBC News](#) (5/15, 2.54M) reports that "a veteran mountain climber from Argentina has been found dead in the snow 85 percent of the way to the top of Mount McKinley in Alaska, North America's tallest mountain, the National Park Service confirmed Thursday." According to Maureen Gualtieri, a spokeswoman for the agency, "Heraldo Javier Callupan, 39, from the city of General Roca in central Argentina, was found by two other climbers Sunday 17,200 feet up the 20,237-foot peak, but because of harsh weather on the mountain face, authorities weren't able to identify him and notify his family until late Wednesday."

Also reporting on the story is [WDIV-TV Detroit \(MI\)](#) Detroit (5/15, 292K).

DENALI NATIONAL PARK BIOLOGIST PROFILED. The [National Geographic](#) (5/14, 32.75M) profiles wildlife biologist Patricia Owen, who has "worked at Denali National Park for more than 25 years." Owen oversees "the park's wildlife management program to minimize human-wildlife conflicts through education."

ADDITIONAL COVERAGE OF "FIND YOUR PARK" CAMPAIGN. Additional coverage of the "Find Your Park" campaign was provided by the [San Diego LGBT Weekly](#) (5/14).

BAXTER STATE PARK'S FORMER DIRECTOR SUPPORTS NATIONAL PARK PLAN. In an op-ed for the [Bangor \(ME\) Daily News](#) (5/14, 179K), Irvin "Buzz" Caverly, the former director of Baxter State Park, writes that "the lands offered today as a North Woods national park, when accepted, I believe, will be as valuable to future generations as Baxter State Park is to our generation today." He supports this effort and urges "all Maine people and their representatives, state and federal, to make a commitment to a North Woods national park."

GRAND CANYON DEVELOPMENT PLAN CRITICIZED. In an op-ed for the [Arizona Republic](#) (5/14, 1.27M), Ash Patel, president/CEO of Southwest Hospitality Management, writes that "the U.S. Forest Service is considering a proposal to improve a few miles of road near the Grand Canyon, and to allow Tusayan to build sewer, water and power lines to two remote parcels of ranch land." Patel argues that "this proposal threatens the Grand Canyon and the livelihood of many who provide services to visitors." According to Patel, "transforming the Grand Canyon into a retail resort would destroy local businesses and sustainability."

SUPPORT URGED FOR CALIFORNIA DESERT CONSERVATION AND RECREATION ACT OF 2015 . In an op-ed for the [Palm Springs \(CA\) Desert Sun](#) (5/14, 85K), Scott Robinson, executive director of the Boys & Girls Club of Cathedral City, writes that the California Desert Conservation and Recreation Act of 2015 would "establish a Mojave Trails National Monument and Sand to Snow National Monument, several new wilderness areas, add public lands to Joshua Tree, Death Valley, and Mojave National Preserve, and designate 77 miles of precious California waterways as Wild and Scenic Rivers." He notes that "these lands contain Native American petroglyphs, mule deer, and the rugged desert vistas that our corner of the state is known for." Robinson encourages "local legislators and congressmen Ruiz and Paul Cook to also be leaders on this important issue for our children."

Bureau of Land Management:

BLM MAKE CORONA, GEMINI BRIDGES ROPE BAN OFFICIAL. The [Salt Lake \(UT\) Tribune](#) (5/15, 470K) reports that "federal land managers this week reinforced a two-year ban on roped activities at Corona Arch and Gemini Bridges." The BLM "listed the closure of 37.3 acres — a plan announced early this year — in the Federal Register Thursday."

According to the article, "the Federal Register announcement, signed by acting Utah BLM Director Megan Crandall, identifies 31 acres around Corona Arch and 6.3 acres surrounding Gemini Bridges in Grand County near Moab."

BLM MODIFIES HI-LINE DISTRICT PLAN. The [AP](#) (5/15, 2.29M) reports that a BLM "plan for 2.4 million federal acres in northern Montana has been modified to classify 5,000 additional acres as 'land with wilderness characteristics.'" The bureau has "altered the Hi-line District Resource Management Plan after the Montana Wilderness Association lobbied for areas the agency had missed in its inventory." A BLM spokesman said "sage grouse protection is driving revisions to several Montana BLM resource management plans, with directions being handed down from the agency's Washington office in an attempt to avoid the bird being listed as an endangered species."

BIOLOGISTS PUTTING GPS BACKPACKS ON SAGE GROUSE. The [Durango \(CO\) Herald](#) (5/14, 28K) reports that "To keep tabs on their whereabouts, wildlife biologists are fitting" some Gunnison sage grouse "with GPS backpacks as part of a pilot program with the Bureau of Land Management and Colorado Parks and Wildlife (CPW)." The article notes that "four GPS backpacks were purchased for \$4,000 apiece through a grant from the National Fish and Wildlife Foundation."

BLM FIREFIGHTERS HONORED FOR VALOR AND SERVICE. [KMYT-TV](#) Twin Falls, ID (5/15, 1K) reports that "three Twin Falls District BLM firefighters traveled to Washington, D.C., last week to receive an award for valor and exceptional service to the nation as public servants at the 70th Honor Awards Convocation of the Department of the Interior at its headquarters." According to the article, "Engine Captain Eric Killoy (Heyburn), Engine Operator Camas Beames (Hazelton), firefighter and emergency medical technician (EMT) certified Mackenzie Tieg (Buhl), and firefighter and EMT trainee Dylan Forrester (Caldwell) were recognized for their heroic actions last summer when they were the first to respond to a helicopter accident." BLM Deputy Director Linda Lance said, "These employees have made a genuine difference to our nation through their dedication and hard work for the BLM. All of us at the BLM are proud of the enormous contributions that these employees have made to their communities to benefit the public lands."

BLM HOLDING OPEN HOUSE TO EDUCATE PUBLIC ON PLAN FOR OREGON FORESTS. The [Coos Bay \(OR\) World](#) (5/15, 32K) reports that the Coos Bay District of the BLM will hold an open house on May 28. The public is invited to "learn about the Draft Resource Management Plan/Environmental Impact Statement for western Oregon forests."

EDITORIAL ORGAN MOUNTAINS-DESERT PEAKS NATIONAL MONUMENT WILL BRING BENEFITS. The [El Paso \(TX\) Times](#) (5/15, Sun-News, 204K) editorializes that "a full year has passed since President Barack Obama used his powers under the Antiquities Act to designate the Organ Mountains-Desert Peaks National Monument on May 21, 2014." It notes that "the year since then has not brought the calamity monument opponents had warned that it would," but there also hasn't been much "in terms of tourism growth or enhanced economic development, as had been promised by supporters." However, the paper is optimistic that "those benefits will come in time." It concludes that "the goal now should be to make the most of" the designation.

Fish and Wildlife Service:

EFFORT TO BLOCK SAGE GROUSE RIDER IN DEFENSE AUTHORIZATION ACT FAIL. The [Environment & Energy Publishing](#) (5/14, Subscription Publication, 705) reports that "Democratic efforts to prevent the Defense Authorization Act from regulating endangered species took a hit last night, with the House Rules Committee rejecting an amendment to take out language on the greater sage grouse and moving forward with another amendment on the lesser prairie chicken and American burying beetle."

Sen. Crapo Urges Collaboration To Avoid Sage-grouse Listing. The [Rexburg \(ID\) Standard Journal](#) (5/15, 16K) reports that Sen. Mike Crapo is calling on the FWS and "various federal agencies to uphold their commitments to collaborate with Idaho to avoid a listing of the greater sage-grouse under the Endangered Species Act (ESA)." During a Senate Environment and Public Works (EPW) Committee hearing, Crapo questioned FWS Director Dan Ashe "about the agency's continued willingness to engage with western states on conservation management plans that would protect the sage-grouse while taking into account unique circumstances within each state."

Gov. Hickenlooper Optimistic About Avoiding Sage-grouse Listing. The [Craig \(CO\) Daily Press](#) (5/14, 10K) reports that Colorado Gov. John Hickenlooper told the members of the Associated Governments of Northwest Colorado on Tuesday about sage grouse discussions with the FWS and Colorado Hickenlooper said, "We are very, very close to avoiding a listing altogether." Hickenlooper also "supported the filing of a suit against the agency when it listed the Gunnison sage-grouse as threatened, but declined to say whether he would do the same if the greater sage-grouse is listed."

Species Lead Team Working On Recommendation For Sage Grouse Listing. The [Missoula \(MT\) Independent](#) (5/15, 65K) reports that "for the past few weeks, a five-member Species Lead Team—including representatives from industry, the states and the USFWS—has been scrambling to develop a recommendation on whether to list the sage grouse." The article notes that "the recommendation, which won't be made public, is due to USFWS regional directors by mid-May."

CALIFORNIA DROUGHT IMPACTING NATIVE SPECIES. The [Davis \(CA\) Enterprise](#) (5/15, 17K) reports that "several native species, including several fish and plant species, are struggling with water depletions while others experience temporary setbacks until the rains return." The article notes that "during a research study last summer in more than 60 California streams that previously were recorded as hotspots for native species," Peter Moyle, a professor of wildlife, fish and conservation biology at UC Davis, "found that a third of the streams had gone dry, taking the fish with them."

Additional coverage was provided by [KVPR-FM Fresno \(CA\)](#) Fresno, CA (5/15, 2K) and [KQED-FM San Francisco \(CA\)](#) San Francisco (5/13, 40K).

COURT FINDS FWS CAN'T BAN PYTHON, ANACONDA INTERSTATE TRANSPORT. [Reuters](#) (5/14) reports that a U.S. court has granted a preliminary injunction sought by the United States Association of Reptile to block a rule issued by the FWS in March banning the transport of the reticulated python and green anaconda across state lines.

FWS DATA SHOWS KILLING OF BIRDS BY GOLF COURSES. [Reveal](#) (5/15) reports that FWS "data show that Dairy Creek Golf Course in San Luis Obispo, California, has intentionally killed hundreds of migratory birds over the past three years." Audubon International has "certified as environmentally friendly more than a dozen golf courses that have killed nuisance birds." According to data from the FWS, "those golf courses, mostly in California, have killed nearly 4,000 birds from 2011 through 2013."

CAPTIVES BREEDING SYSTEM AT PHOENIX ZOO SHOWS PROMISE FOR RECOVERY OF MEXICAN GRAY WOLVES. [KJZZ-FM](#) Phoenix (5/15, 7K) reports that "a lack of genetic diversity and inbreeding...pose a major threat to" the recovery of Mexican gray wolves. However, "a complex captive breeding system and careful genetic planning is showing some promising results." The Mexican gray wolf habitat at the Phoenix Zoo is being managed by the FWS "for potential release into the wild."

GROUP BUYS 170 ACRES FROM DEVELOPER TO PROTECT ENDANGERED FROGS. The [Houston Chronicle](#) (5/15, McConnaughey, 2.29M) reports that "a Mississippi environmental nonprofit has bought more than 170 acres of land from a residential development to reforest and protect as critical habitat for the critically endangered Mississippi gopher frog." The Land Trust for the Mississippi Coastal Plain will "replant it in longleaf pine as habitat for the burrowing frogs and other rare animals."

ADDITIONAL COVERAGE \$1.1B GENERATED BY HUNTING, FISHING DISTRIBUTED TO STATE AGENCIES. Additional coverage that the FWS "recently announced that \$1.1 billion in generated revenue from hunting and fishing will be distributed back to the state wildlife agencies throughout the nation" was provided by [KSL-TV](#) Salt Lake City (5/15, 1.07M).

ACTION URGED ON ENDANGERED SPECIES. For "The Blog" of the [Huffington Post](#) (5/15, Wright, 194K), Dr. Patricia Wright, Professor of Anthropology, Stony Brook University, writes that "our efforts to protect animals should not stop short of our borders." She notes that "our earth's ecosystems are vastly complex and interconnected." Wright urges "involvement" such as "supporting a conservation organization financially or through volunteering, advocating for smart conservation policies at the state, federal and international level or encouraging young people to pursue careers in the field."

In an op-ed for the [Daily Caller](#) (5/15, Seasholes, 366K), Brian Seasholes, Director, Reason Foundation Endangered Species Project, writes that "private landowners.. are the key to successful endangered species conservation" while the federal government enforcement of the Endangered Species Act is "counterproductive." He notes that "endangered species conservation is often difficult, usually takes many years if not decades, and" claimed that it "is solved on the ground, not in shiny offices, not by pieces of paper, not by wishful thinking, and not by the urban elites who wield much of this country's economic and political power and favor laws like the Endangered Species Act that place enormous burdens on the relatively few, less-wealthy and less-powerful rural landowners." Seasholes argues that "alienating and disenfranchising America's rural landowners — the very people who are the linchpin to successful endangered species conservation — is the worst way to go about saving this country's imperiled species."

Additional coverage of Endangered Species Day was provided by [Take Part](#) (5/14, 309K).

US Geological Survey:

USGS STUDY FINDS CONNECTION BETWEEN FRACKING DURATION AND CHEMICAL CONCENTRATION IN WASTEWATER. [Manufacturing](#) (5/15, 6K) reports that "a recent study from the U.S. Geological Survey links the duration of hydraulic fracturing to the concentration of organic compounds in drilling wastewater." Also, "researchers speculated that increased microbial activity in water with high levels of organic compounds could prove useful in future efforts to clean up fracking accidents." The agency's "analysis of 13 fracking wells in Pennsylvania's shale gas fields found surprising variation in the wells' levels of organic compounds and microbes."

USGS FLOOD SENSORS IN MEXICO HELP SCIENTISTS KEEP EYE ON FLOOD WATERS DURING THE MONSOON. [KOLD-TV](#) Tucson, AZ (5/15, 20K) reports that "the U.S. & Mexico are working together to keep an eye on rising flood waters during Monsoon 2015 which is about one month away." The USGS says it has "a total of five special weather devices equipped with flood sensors on the Mexico side of the border."

Securing America's Energy Future:

Onshore Energy Development:

ONRR SEEKS \$306,000 PENALTY FROM DEFUNCT WYOMING GAS OPERATOR. The [AP](#) (5/15, 2.29M) reports that "the federal government is seeking a \$306,000 penalty against a defunct coal-bed methane developer, alleging the company failed to report production on gas wells in Wyoming." The Office of Natural Resources Revenue claims Patriot Energy Resources, LLC, "didn't submit required production reports on the wells." It also "alleges claims the company has not yet responded to a noncompliance notice sent in July."

Additional coverage was provided by the [Washington \(DC\) Times](#) (5/15, 641K) and [KGWN-TV Cheyenne \(WY\)](#) Cheyenne, WY (5/15, 519).

HOUSE HOLDS HEARING ON STREAM PROTECTION RULES. The [Argus Media](#) (5/15) reports that "a House of Representatives subcommittee hearing today on stream protection rules highlighted the increasing focus on the coal industry as the Republican-controlled Congress challenges President Barack Obama's administration on a broad array of energy issues." House Republicans are "pushing the federal Office of Surface Mining Reclamation and Enforcement (OSM) to delay implementation of an update to stream protection rules." A bill proposed by Rep. Alex Mooney, HR 1644, would "order OSM to study the industry impact of its proposed rulemaking and prevents implementation of a new rule for one year after the completion of the study to allow for congressional, industry and public review."

REP. FLEMING CRITICIZES STUDY ON HEALTH IMPACT OF MOUNTAINTOP REMOVAL MINING. The [Washington Post](#) (5/14, 5.03M) reports that Rep. John Fleming is criticizing "a study on the health impact of mountaintop removal mining in rural Kentucky."

PAWNEE NATIONAL GRASSLAND LEASED FOR \$32 MILLION BY OIL AND GAS INTERESTS. The [Denver Post](#) (5/14, Jaffe, 894K) reports that the US Bureau of Land Management on May 14 approved a \$32.1 million lease for 33,000 acres for oil and gas development on the Front Range and in the Pawnee National Grassland of Colorado. The sale took place despite environmental concerns over air quality and climate change. Ironhorse Resources LLC purchased a 1,919-acre parcel in the grassland for \$19.4 million. Some 86 parcels were auctioned off with 73 sold, according to BLM. "Allowing mineral access with no surface occupancy allows for resource development while minimizing the overall environmental impact on the Pawnee," Forests and Grassland Supervisor Glenn Casamassa said at the time.

SALT RIVER PROJECT APPROVES \$13 MILLION TO BEGIN PLANT CLOSURE. The [Arizona Republic](#) (5/15, Randazzo, 1.27M) reports that officials with the Salt River Project have agreed to purchase the Los Angeles ownership share of the Navajo Generating Station. The SRP will pay Los Angeles \$10 million for its share and transfer assets at the closed Mojave Generating Station, and spend \$2.9 million to pay for coal expenses. The Los Angeles Department of Water and Power will vote on the deal on May 19, after which it will need approval from the Mayor and City Council. With NV Energy also exiting the plant by 2019, SRP will be paying for all the costs associated with new pollution regulations on coal plants.

ADDITIONAL COVERAGE ADDITIONAL COVERAGE COURT FINDS OSM ILLEGALLY APPROVED COLORADO MINE EXPANSIONS. Additional coverage of the decision on the Colowyo and Trapper coal mines was provided by the [High Country \(CO\) News](#) (5/15, 74K), the [Craig \(CO\) Daily Press](#) (5/14, 10K), the [Rio Blanco \(CO\) Herald Times](#) (5/15) and the [Colorado Independent](#) (5/15, 28).

OPINION ENERGY INDUSTRY SUPPORTS CONSERVATION EFFORTS. Barry Russell, president and CEO of the Independent Petroleum Association of America, writes for [The Hill](#) (5/15, Russell, 533K) about the commitment of independent oil and natural gas producers in the US to supporting "species conservation across the country." In the west, "independent oil and natural gas companies are working closely with states, local communities and stakeholders, and conservation groups in the development and implementation of state-based plans to conserve the greater sage-grouse," he writes, adding that one such company "runs an annual conservation and restoration project in the Powder River Basin alongside the Bureau of Land Management (BLM) and the Wyoming Conservation Corps to thin and remove invasive trees across priority sage-grouse habitat on BLM lands." Oil and natural gas companies "also utilize various resources and techniques to limit the impact of their operations on sage-grouse and other species," according to Russell.

Offshore Energy Development:

COASTAL STATES LOOK TO GAIN MORE OFFSHORE DRILLING REVENUE. The [FuelFix](#) (5/14, Dlouhy, 7K) reports that "senators from Texas, Alaska and other coastal states have launched a fresh campaign to siphon off more of the revenue that flows to the federal government from offshore drilling." Sens. Bill Cassidy, R-La., Lisa Murkowski, R-Alaska and Mark Warner, D-Va., "introduced a trio of bills this week that aim to broaden the existing revenue sharing program, setting the stage for the proposals' possible inclusion in a wide-ranging energy bill now being assembled in the chamber," the article reports. "States like Texas that host offshore drilling for the benefit of the nation (should) continue to receive a share of the revenue," said Sen. John Cornyn, R-Texas. "Some inland lawmakers insist that coastal waters — and the oil and gas produced from them — belong to all Americans, so the revenue should be shared equally nationwide," according to the article, which notes that the "Obama Administration has adopted this view in its latest Federal budget plan."

The [San Antonio Express-News](#) (5/15, 670K) also carried the story.

BILL WILL EXPAND ACCESS OF GULF TO ENERGY EXPLORATION. The [AP](#) (5/15, 2.29M) reports that legislation introduced by Sen. Bill Cassidy "would amend a 2006 law to open parts of the Outer Continental Shelf for oil and gas exploration." The bill would "redefine President Barack Obama's Eastern Gulf of Mexico drilling moratoria to open access to energy resources in areas 50 miles from the Florida coastline."

FLORIDA LAWMAKERS OPPOSE ATLANTIC DRILLING. The [UPI](#) (5/14) reports that "Florida lawmakers introduced a bill to ban early oil and gas work off the state coast, saying an early push for east coast drilling was too risky." Rep. Patrick Murphy said, "I was involved in the cleanup efforts following the BP oil spill in the Gulf Coast, and I refuse to sit by while Florida's east coast could potentially be threatened from the devastating effects of offshore drilling. Seismic testing is the first step in the wrong direction."

ADDITIONAL COVERAGE OF DEBATE ON OFFSHORE DRILLING. Additional coverage of the debate on offshore drilling was provided by the [Coastal Observer \(SC\)](#) (5/15) and the [Switchboard](#) (5/15, 116K).

Tackling America's Water Challenges:

BOR RELEASE REPORT ON WATER CONSERVATION. The [Imperial \(CA\) Valley Press](#) (5/15, 46K) reports that the BOR "released a report Tuesday outlining opportunities and potential safeguarding actions to address the future water supply in California, and while Colorado River Resources Manager Tina Shields sees this progression as beneficial, she is quick to point out that certain of these measures have been in effect for as long as two years in Imperial County." She said, "We're sort of a model for people to look at, not at all a poster child for efficiency improvements and transfers. Our agricultural community has done a lot, with farmers doing a lot on their own, and the irrigation district has been implementing many water efficiency actions in recent years."

KLAMATH FARMERS TO RECEIVE LESS IRRIGATION WATER. The [AP](#) (5/15, 2.29M) reports that "farmers on a federal irrigation project straddling the Oregon-California border will get less than half the water they would expect in a plentiful year." Greg Addington, executive director of the Klamath Water Users Association, says they were notified this week by the BOR that "the mountain snowpack is rapidly declining and estimates of water availability have dropped." The article notes that "a month ago, the drought was expected to result in 60 percent of full water deliveries this summer," and "now, that will be about 45 percent."

AGENCIES RELEASE SCHEDULE FOR CLEAR CREEK PULSE FLOW. The [Red Bluff \(CA\) Daily News](#) (5/14, 578) reports that the BOR, National Marine Fisheries Service and FWS "announced Wednesday that pulse flow releases from Whiskeytown Dam into Clear Creek will be made in mid-May and mid-June to attract adult spring-run Chinook to Clear Creek habitats for holding and spawning purposes." The article notes that "releases will begin increasing on Monday, May 18, and remain at the peak of 800 cubic feet per second for two days, May 21 and 22."

COLORADO'S RAIN ISN'T REPLENISHING SOUTHWEST RESERVOIRS. The [AP](#) (5/15, 22K) reports that "Colorado is slogging through a wetter than normal spring, with heavy rains restoring much-needed moisture to parched rangeland and sending some rivers over the banks." However, "the precipitation isn't helping dry downstream states in the Southwest that rely on the Colorado River, which originates in western Colorado."

SALTON SEA SOLUTIONS RECYCLED OVER AND OVER. The [Palm Springs \(CA\) Desert Sun](#) (5/14, 85K) reports that "concern about the consequences of a shrinking Salton Sea began almost as soon as the floodwaters of the mighty Colorado River stopped pouring into the Salton Sink in 1907 — 16 months after a breach in a canal inundated entire

communities in the Coachella and Imperial valleys and created an accidental lake the size of Delaware.” However, “50 years — and tens of millions of dollars later — some of the same proposals to fix the dying sea have recycled themselves, often many times over.” The article notes that “some of the proposed solutions considered in recent times — building dikes to downsize the sea, constructing desalination plants, creating evaporation ponds, pumping Salton Sea water to the Gulf of Mexico, building ocean-to-sea canals and expanding geothermal development — had been hashed and rehashed by the early 1970s.”

CALIFORNIA DROUGHT CONTINUES UNABATED. [NBC Nightly News](#) (5/14, story 9, 2:10, Holt, 7 86M) reported that as California enters the “hottest months of the year,” the drought is “only intensifying.” The piece focuses on the impact of the drought as seen by drone. NBC (Almaguer) adds that “even the occasional rain won’t put a dent in the current drought. Water levels at reservoirs across the state won’t rise any time soon. It’s replenished here by rainfall and the melting snow pack. The forecast calls for neither of those.”

ADDITIONAL COVERAGE OF BOR REPORT ON COLORADO RIVER. Additional coverage of the BOR’s new report “outlining how to avoid drastic involuntary water cutbacks across the Colorado River Basin” was provided by the [Colorado Independent](#) (5/15, 28).

ADDITIONAL COVERAGE OF REVISION TO BAY DELTA CONSERVATION PLAN. Additional coverage of the revision to the Bay Delta Conservation Plan was provided by the [Chico \(CA\) News and Review](#) (5/15, 101K).

Empowering Native American Communities:

HEARING HELD ON CONDITIONS OF INDIAN SCHOOLS. The [Minneapolis Star Tribune](#) (5/15, 1.29M) reports that Rep. John Kline “pushed a top Interior Department official Thursday to move the Bug-O-Nay-Ge-Shig School in northern Minnesota up the national list of dilapidated Indian schools to fix.” Kline “invited Obama administration officials to explain why so little has been done to improve the conditions in Indian schools, including the Bug school up on the Leech Lake Indian Reservation.” He said to the panel of officials from the Interior and Education departments, “We want these Native American students to be well educated, but you can’t be well educated, in my opinion, wearing your coat, wearing your mittens, hoping the blanket keeps out the zero degree air.”

Additional coverage was provided by [Education Week](#) (5/15, 139K) and [Think Progress](#) (5/14, 435K).

Bug-O-Nay-Ge-Shig Administrators Resign After Student Protest. The [Grand Forks \(ND\) Herald](#) (5/15, 100K) reports that “the Bug-O-Nay-Ge-Shig School Board accepted the resignations of the school superintendent and principal at Thursday night’s board meeting.” The article notes that “the decision comes a week after students at the high school in Bena protested some decisions by the administration.”

CHAUDHURI SWORN IN AS CHAIRMAN OF NATIONAL INDIAN GAMING COMMISSION. The [Economic Times \(IND\)](#) (5/15, 1 92M) reports that “Jonodev Osceola Chaudhuri has been sworn in as the chairman of the National Indian Gaming Commission, becoming the first Indian-American to occupy this top position in the US.” Chaudhuri was sworn in by Interior Secretary Sally Jewell. Chaudhuri said, “I would like to thank President (Barack) Obama, the Senate, Secretary Jewell and those in Indian country who have supported my nomination.”

Also reporting on the story are [Press Trust of India](#) (5/15) and the [Casino City Times](#) (5/15).

JODI GILLETTE STEPS DOWN AS WHITE HOUSE ADVISOR. The [Indian Country Today Media Network](#) (5/14, 28K) reports that “Jodi Archambault Gillette, President Barack Obama’s special assistant for Native American affairs, departed the White House May 14 to accept a new position as policy advisor at the law firm of Sonosky, Chambers, Sachse, Endreson & Perry, LLP.”

ADDITIONAL COVERAGE OF YOUTH SUICIDE EPIDEMIC ON RESERVATIONS. On [Mad In America](#) (5/15), David Walker, PhD discussed “the current epidemic of youth suicide at Pine Ridge Reservation, and a recent story for the New York Times penned by Julie Bosman.” Walker writes that “really troubles” him “about the NYT piece by Ms. Bosman is the implication that having more ‘mental health professionals’ around — particularly those who practice within the bio-medically-dominated Indian Health Service — will have some noticeable impact on the problem of epidemic youth suicide at Pine Ridge.”

Office of Insular Affairs:

INTERIOR AWARDS \$2.37 MILLION FOR RENEWABLE ENERGY PROJECTS IN TERRITORIES. The [Marianas Variety](#) (5/15) reports that Interior Assistant Secretary for Insular Areas Esther Kia’aina has “announced \$2,374,000 in grant assistance under the Empowering Insular Communities or EIC Program for various clean energy and energy-efficiency projects in American Samoa, Guam, and the Northern Mariana Islands.” Kia’aina said, “I am pleased to support renewable energy projects that reduce dependence on imported fossil fuels and help relieve the high cost burden of electricity in the region. Not only do these projects help build renewable energy infrastructure but they help these communities build climate change resiliency and self-sufficiency.”

INTERIOR ANNOUNCES \$500K SOLAR POWER GRANT FOR GUAM MEMORIAL HOSPITAL. The [Pacific \(GUM\) Daily News](#) (5/14, 61K) reports that the Interior Department has “announced it will give Guam Memorial Hospital a \$500,000 grant to install a solar panel power system on its roof.” Assistant Secretary Esther Kia’aina said, “I am pleased to support renewable energy projects that reduce dependence on imported fossil fuels and help relieve the high cost burden of electricity in the region. Not only do these projects help build renewable energy infrastructure but they help these communities build climate change resiliency and self-sufficiency.”

ADDITIONAL COVERAGE \$650,000 IN GRANTS APPROVED TO COMBAT REEF THREATS. Additional coverage of the \$650,000 in initial grant assistance provided under the Coral Reef Initiative program was provided by the [Marianas Variety](#) (5/15).

Top National News:

SENATE VOTES 65-33 TO LAUNCH TPA DEBATE. With the media’s attention heavily focused on the Philadelphia train derailment, yesterday’s developments on the trade debate were not mentioned on the network newscasts, and didn’t generate much coverage on cable. Print and online outlets, meanwhile, continued to remark on the Democratic split on the issue, and cautioned that while Senate passage of “fast-track” legislation now appears likely, the measure faces an uncertain fate in the House. However, as [Politico](#) (5/15, Everett, 1.11M) reports, “Senate liberals know they are going to lose the battle over fast-track trade authority...they’re doing all they can to prolong the fight — perhaps even past the Memorial Day recess into June — in hopes that a long delay will damage the bill’s already difficult prospects in the House.”

[USA Today](#) (5/15, Davis, 5.01M) notes that “the Senate voted 65-33 to begin debate,” with 13 Democrats joining Republican supporters of fast-track, and [Roll Call](#) (5/15, Dennis, 99K) indicated that “every Republican who voted” did so in favor of fast-track. It was “a burst of bipartisanship,” says the [AP](#) (5/15, Espo). Under the headline “Senate Dems Run From Obama On Trade,” however, the [Blaze](#) (5/15, Kasperowicz, 1.87M) said that “nearly every Senate Democrat who’s anybody at all voted against” the bill, and [NPR](#) (5/15, Calamur, 1.52M) noted that opponents of the TPP “say it will hurt US jobs.”

[Roll Call](#) (5/15, Dennis, 99K) reported that “Democrats who backed advancing the bill included Michael Bennet of Colorado, Maria Cantwell of Washington, Thomas R. Carper of Delaware, Chris Coons of Delaware, Dianne Feinstein of California, Heidi Heitkamp of North Dakota, Tim Kaine of Virginia, Claire McCaskill of Missouri, Patty Murray of Washington, Bill Nelson of Florida, Jeanne Shaheen of New Hampshire, Mark Warner of Virginia and Ron Wyden of Oregon.”

[Bloomberg Politics](#) (5/14, Przybyla, 161K) reports that “the 65-33 vote Thursday followed separate votes sought by Democrats to pass proposals curbing currency manipulation and boosting imports from sub-Saharan Africa.” The [Washington Post](#) (5/15, Debonis, 5.03M) notes that the “separate enforcement bill...passed...78 to 20,” and the Trade Preferences Extension Act was approved 97 to 1. [The Hill](#) (5/15, Carney, Bolton, 533K) reports that “Sen. James Lankford (R-Okla.) was the only no vote.” [Politico](#) (5/15, Palmer, 1.11M) says “the enforcement bill is not particularly controversial, but it contains a provision aimed at China and opposed by the White House that would allow duties on goods from countries that undervalue their currency for a trade advantage.”

[Politico](#) (5/15, French, 1.11M) reports that “in her most pointed criticism of the legislation that’s now on track for Senate passage,” House Minority Leader Pelosi said yesterday “that granting the fast-track trade authority requested by President Barack Obama would give future administrations ‘carte blanche’ to bypass Congress when negotiating trade deals.” Said Pelosi, “This is not a TPA for the Trans-Pacific Partnership, a fast-track just for the Pacific bill. It is effectively a six-year, I don’t want to say ‘get out of jail free’ but it’s something to that effect, a ‘carte blanche.’” [Reuters](#) (5/15, Cowan, Hughes) notes that Pelosi also said, “I would hope there could be some addressing of the length of time.”

The White House, the [New York Times](#) (5/15, Weisman, Subscription Publication, 12.24M) reports, “insists that a more diplomatic approach should be pursued.” In effect, “even supporters said that vote was intended more to allow lawmakers to express their frustration on the currency issue,” with “the real showdown” coming “over the Portman-Stabenow amendment attached to the trade promotion authority itself.” Adds the Times, “If that reached Mr. Obama’s desk, supporters say, the president would have to sign it.” Sen. Lindsey Graham said yesterday, “Portman’s the real deal. That’s firing with real bullets.” The [Wall Street Journal](#) (5/15, Hughes, Subscription Publication, 5.68M) quotes

Sen. Sherrod Brown as saying yesterday, "We cannot have trade promotion without trade enforcement."

The [Washington Times](#) (5/15, Dinan, 641K) notes that "at a press conference Thursday, Mr. Obama said he was worried any moves on punishing currency manipulation could 'end up having a blowback effect' on US monetary policy, possibly tying the Federal Reserve's hands in managing the dollar."

A [McClatchy](#) (5/15, Hall, 32K) analysis examines Senate Democrats' demand for "legislation aimed at currency manipulation by Asian nations, particularly China," noting that while Democrats "said nations such as China devalued their currency, to unfairly promote their exports at the expense of US jobs," that is "an outmoded argument attacking yesterday's problem." China, McClatchy notes, "is not devaluing its currency, and it's actually moving away from policies aimed at propping up its exports."

Sen. Mark Warner said on [MSNBC's Hardball](#) (5/14, 713K) that "virtually all the Democrats...said, if we're going to move forward on a trade agenda, we've also got to make sure that we have strong enforcement provisions. ... We got that guaranteed, passed it overwhelmingly today, because let's face it, I'm pro-trade, but I've also recognized in the past, we lost a lot of jobs in the '90s, textile and furniture jobs. We've not always done as good a job as a country enforcing our trade laws as we should. And we want to make sure we've got the strongest enforcement provisions possible."

The [Minneapolis Star Tribune](#) (5/15, Spencer, 1.29M) reports that "labor unions and some environmentalists expressed disappointment" over yesterday's vote. A spokesman from Friends of the Earth said in a statement, "By voting away their authority to set trade negotiating objectives, the majority of our Senators chose corporate polluters over the American people."

Charles Krauthammer writes in the [Washington Post](#) (5/15, 5.03M) that in the House, "very few House Democrats will vote yes," and that "will require Republican near-unanimity. And it's not there." Adds Krauthammer, "Having strongly opposed Obama's constitutional usurpations on immigration, health care, criminal justice and environmental regulation, I'm deeply sympathetic to" him on the trade issue.

In a column defending the TPP, Fareed Zakaria writes in the [Washington Post](#) (5/15, 5.03M), "Let's hope we don't look back 20 years from now, under new rules written by China, and wish we had been more assertive when we had the chance."

Obama: "Issue With Respect To Myself And Elizabeth" Not "Personal." [Politico](#) (5/15, Wheaton, 1.11M) reports that the President yesterday "downplayed widespread talk of a feud between him and Sen. Elizabeth Warren." Said Obama, "The issue with respect to myself and Elizabeth has never been personal. ... It's fun for the press to see if we can poke around at it, when you see two close allies who have a disagreement on a policy issue." [The Hill](#) (5/15, Fabian, 533K) says that "Obama smiled and paused for effect as he used Warren's first name during his Thursday press conference."

The [AP](#) (5/15, Kuhnhehn), meanwhile, reports that the rift between Obama and Warren "predates the current hostilities between the two Democrats over trade." Warren "has been aggravating the Obama administration since her pre-Senate days when she chaired an oversight panel charged with being a watchdog over the massive federal bank bailout."

Blake Zeff said on [MSNBC's Now](#) (5/14, 213K) that privately, people at the White House "get very annoyed by...Warren because they feel that she has chopped off a chunk of the President's base" and "tried to undermine his credibility or integrity with the base, and it really bothers him."

Chris Matthews said on [MSNBC's Hardball](#) (5/14, 713K) that the rivalry between the President and Warren "continued to escalate" Thursday. The President "won a key vote...after...Warren led a successful revolt against an earlier vote this week, in spectacular fashion, by the way, by rowing nearly every Senate Democrat against their own President."

Catherine Rampell, in the [Washington Post](#) (5/15, 5.03M) reports that according to Brown, "Obama is not just undemocratic; he's a bigot, too." After quoting the Obama remarks Brown objected to, Rampell adds, "You'll have to squint to locate the sexism in this quote, but somehow Brown excavated it."

Canadian Finance Minister: Volcker Rule Violates NAFTA. The [Huffington Post](#) (5/15, Carter, 194K) reported that "Obama and...Warren... have been locked in a public feud over whether free trade agreements can be used to undermine the 2010 Wall Street reform law," and "on Wednesday, the Canadian government sided with Warren." Canadian Finance Minister Joe Oliver "gave a speech in New York arguing that the Volcker Rule – a key tenet of the 2010 banking law – violates the North American Free Trade Agreement." The HuffPost added that "the US Treasury Department vociferously rejected Oliver's claim," saying in a statement, "The Volcker Rule is clearly not a violation of NAFTA or any other trade agreement, all of which explicitly safeguard the ability of the United States to protect the integrity and stability of our financial system."

McConnell Thanks Obama For "Pushing Back" On "Ridiculous Rhetoric." [Voice of America](#) (5/15, Bowman, 63K) reports that Senate Majority Leader Mitch McConnell said yesterday, "I'd like to thank the president. ... No, you're not hearing things. President Obama has done his country a service by taking on his [political] base and pushing back on some of the more ridiculous rhetoric we've heard."

Pritzker Urges Passage Of TPA. In an interview with the [Miami Herald](#) (5/15, Whitefield, 676K) in which she called for US engagement in the Western Hemisphere, Commerce Secretary Pritzker also called on Congress to approve fast-track, saying, "It's a reality that the leaders in the TPP aren't prepared to put their final and best offers on the table until we have [Trade Promotion Authority]." Pritzker also said, "What's important is that we're one step closer to executing on the president's vision of expanded trade."

Ignatius Urges Clinton To Take Stand On TPP. David Ignatius writes in the [Washington Post](#) (5/15, 5.03M), "I think Obama is right about the TPP, but there's a larger point here about leadership," which is that "governing is a contact sport." Asks Ignatius, "What does Hillary Clinton believe about the Trans-Pacific Partnership or the Iran nuclear deal? You would assume that she's supportive because she helped get both agreements started." However, "she has been a study in reticence – a trimmer checking the political winds, rather than a leader." Ignatius goes on to criticize "Clinton's rope-a-dope approach to the TPP that deserves most attention, because it highlights her vulnerability as a candidate," and urges her to "take a political lesson from Obama."

Modi Arrives In China In Bid To Strengthen Trade Ties. The [Christian Science Monitor](#) (5/15, Ford, 539K) reported that Indian Prime Minister Narendra Modi, who has "repeatedly promised to create more jobs, which means boosting industry and infrastructure," arrived in China on Thursday as part of his effort to "attract Chinese companies to invest in his ambitious plans." While a "stubborn border dispute...still dogs China's relationship with India," neither country "wants to let that get in the way of better trade and investment ties."

WSJournal: Lawmakers Should Repeal Protectionist Catfish Program. An editorial in the [Wall Street Journal](#) (5/15, Subscription Publication, 5.68M) urges lawmakers to repeal a program which places responsibility for regulating catfish with the USDA. The Journal describes the program as protectionism, calling it an effort to drive Vietnamese exporters from the US market, and argues that its repeal would be a demonstration that lawmakers are serious about free trade.

BOEHNER HITS BACK AT CRITICS OF AMTRAK FUNDING. The political sparring over the funding of Amtrak in the wake of the crash outside Philadelphia continued on Thursday, with Speaker Boehner hitting back sharply at claims that there is a link between funding and the accident.

[USA Today](#) (5/15, Jansen, 5.01M) reports that the Amtrak crash "highlighted the long-running feud over federal funding for the passenger railroad." A number of Democrats are now calling for additional funding, but Boehner downplayed the impact of funding on the crash, saying, "The train was going twice the speed limit. Adequate funds were there, no money's been cut from rail safety, and the House passed a bill earlier this spring to reauthorize Amtrak and authorize a lot of these programs." The [AP](#) (5/15, Fram) reports that Boehner "mocked a reporter" for asking about the relation of funding to the crash. Boehner said, "Are you really going to ask such a stupid question?"

[Politico](#) (5/15, Sherman, Bade, 1.11M) reports that Democrats "responded, in so many words, that the comment itself was dumb" and "at least one safety expert said that federal investment in train-speed technology would have prevented the accident." For example, Sen. Chuck Schumer (D) said, "Speaker Boehner's comments are patently false. Experts have made clear that positive train control [technology] could have prevented the tragedy in Philadelphia. It is simply a fact that insufficient funding for Amtrak has delayed the installation of PTC, and to deny a connection between the accident and underfunding Amtrak is to deny reality."

[Politico](#) (5/15, Scholtes, Wolfe, Caygle, 1.11M) reports that the crash came after seven years of "feuding" between Congress and the railroad industry "over who should bear the cost of technology designed to prevent such accidents — while the process of installing the safeguards fell disastrously behind schedule." Some Senators, such as Richard Blumenthal (D), "were quick to blame the railroads and their lobbyists for foot-dragging on installing technology that has been available for decades."

[The Hill](#) (5/15, Fabian, 533K) reports that President Obama, for his part, called for more infrastructure spending on Thursday. The President said, "We are a growing country with a growing economy. We need to invest in the infrastructure that keeps us that way. That's what great nations do."

Watchdog Reports Fault Amtrak Spending. The [Washington Times](#) (5/15, Howell, 641K) reports that "dozens" of investigations over the past ten years have "revealed a culture of financial irresponsibility and mismanagement at Amtrak that has led to billions of wasted taxpayer dollars over the years and may have put travelers at risk." The Times

and the only profitable Amtrak route."

More Commentary. In an op-ed for the [Washington Post](#) (5/15, 5.03M), Philip K. Howard, chairman of Common Good, says that the derailment "is just another symptom of Congress's refusal to address the United States' decrepit infrastructure," as Amtrak "is notoriously underfunded, with a huge capital expenditure backlog."

In an editorial, the [Wall Street Journal](#) (5/15, Subscription Publication, 5 68M) takes issue with the idea that more spending could have prevented the crash. Looking at Democrat claims that positive train control (PTC) technology could have prevented it, but wasn't sufficiently funded, the Journal notes that the railroad's IG said back in 2012 that the rollout of the technology had been hindered by poor planning and unreliable engineering, not a lack of funds.

STEPHANOPOULOS FAILED TO DISCLOSE DONATIONS TO CLINTON FOUNDATION. George Stephanopoulos' disclosure of his donations to the Clinton Foundation generated cable commentary, as well as extensive reporting on print and online outlets, much of it very negative toward the former politico turned news anchor. Somewhat surprisingly, the network newscasts – including ABC World News – ignored the story altogether last night. News reports indicate the story originated with questions to ABC News from the [Washington Free Beacon](#) (5/15, Stiles, 113K), which later reported that "Stephanopoulos scored a friendly interview with Clinton on the eve of the government shutdown in September 2013, the same year he made a \$25,000 donation to the Clinton Foundation."

With those questions pending, Stephanopoulos yesterday acknowledged his donations in an interview with Dylan Byers of [Politico](#) (5/15, 1.11M), who wrote that the "This Week" host said "he should not have donated money to the Clinton Foundation and that he will not moderate the ABC News-sponsored Republican primary debate in February after failing to disclose those contributions." Stephanopoulos "said that while he made the donations 'for the best reasons,' he now realizes he should not have given." According to Byers, he gave "\$75,000 to the Clinton Foundation," whereas "ABC News initially said" that he "had given a total of \$50,000."

[Bloomberg Politics](#) (5/14, Eikin, 161K) notes that Stephanopoulos also issued a statement yesterday, in which he said, "I made charitable donations to the Foundation in support of the work they're doing on global A DS prevention and deforestation, causes I care about deeply. ... I thought that my contributions were a matter of public record. However, in hindsight, I should have taken the extra step of personally disclosing my donations to my employer and to the viewers on air during the recent news stories about the Foundation. I apologize."

The [New York Times](#) (5/15, Peters, Koblin, Subscription Publication, 12 24M) reports that "the nature of the disclosure of the donations, made only after news outlets began asking questions, combined with his longstanding ties.. to President Bill Clinton, raised questions that could jeopardize Mr. Stephanopoulos' future as a top-draw interviewer and debate moderator." Politico "senior media writer" Jack Shafer writes in [Politico Magazine](#) (5/15) that the disclosure "corrodes much of the journalistic credibility Stephanopoulos has labored so carefully to accumulate." Shafer says that with his donation "to the politically identified Clinton Foundation, Stephanopoulos has betrayed" a "compact" to avoid partisanship "implicitly and explicitly," even as it "torched the journalism-cred he has acquired in the past two decades." Adds Shafer, "I find it implausible that he did not understand...that his contributions would be an issue with his employers and his viewers."

Subject: Save the Date for Browns Canyon Event
Attachments: Brown Canyon - STD DRAFT.docx

Team OCL:

Attached is a "Save the Date" announcement for the Browns Canyon event in July. I believe everyone has been confirmed as attending or invited, except for Sen. Gardner. Do you know if he's:

- A) been invited
- B) is confirmed as attending
- C) tentative and ok with listing him on the invite with "invited" next to his name

We'd like to get this our soon. Please let me know.

Thanks!

Maria Nájera

Subject: Re: Save the Date for Browns Canyon Event

Hi Maria-

He has been invited. Unclear on B or C.

Thanks,
Jamey

DOI in the News:

ADMINISTRATION GIVES SHELL CONDITIONAL APPROVAL FOR ARCTIC DRILLING. Coverage of yesterday's announcement of a conditional permission to Shell to drill for oil in the Arctic generated just one brief mention on the network newscasts, but sparked a significant amount of print and online coverage, much of which highlighted environmentalists' outrage about the decision – despite the fact that, according to the [Washington Post](#) (5/12, Warrick, 5.03M), "the tentative approval was widely expected." [ABC World News](#) (5/11, story 12, 0:20, Muir, 5.84M) referred to "a controversial move by the Obama Administration," with "a major hurdle cleared for the Shell Oil Company that could allow them to start drilling for oil and gas off the coast of Alaska as early as the summer." According to "critics," the move "will have a devastating impact on the environment."

[Reuters](#) (5/12, Gardner) quotes Abigail Ross Harper, director of the Bureau of Ocean Energy Management, as saying yesterday, "We have taken a thoughtful approach to carefully considering potential exploration in the Chukchi Sea." [McClatchy](#) (5/11, Cockerham, 32K) noted that Harper also said the agency recognizes "the significant environmental, social and ecological resources in the region and establishing high standards for the protection of this critical ecosystem, our Arctic communities and the subsistence needs and cultural traditions of Alaska Natives. ... As we move forward, any offshore exploratory activities will continue to be subject to rigorous safety standards."

[Politico Pro](#) (5/11) reports that "BOEM's approval of the multiyear Shell plan also requires the company to obtain separate permits from BSEE and puts a hold on the start of drilling until Endangered Species Act consultations are complete."

Under the headline "Drill, Baby, Drill In The Arctic," the [National Journal](#) (5/11, Geman, Subscription Publication, 156K) describes the decision as "escalating" an Administration "collision with environmentalists," while the [Daily Intelligencer \(NY\)](#) (5/11, Fuller, 452K) says that "environmental groups, never too pleased with" President Obama, "quickly added this to their list of reasons to be miffed at his administration and this seeming inconsistency in his otherwise consistent statements on energy and climate change."

Writing for [Mother Jones](#) (5/11, McDonnell, 723K), Tim McDonnell similarly indicated that the decision "underscores what many describe as an inconsistency in" the climate change policies of this President, who "despite his aggressive rhetoric on the dangers of global warming, and a suite of policies to curb the nation's carbon footprint...has also pushed to expand offshore oil and gas drilling." [McClatchy](#) (5/11, Cockerham, 32K) notes that Audubon President and CEO David Yarnold said yesterday, "Spills under ice sheets can't be controlled, and America doesn't need the oil in order to maintain its energy independence. So this is just cynical partisan politics, a public relations bone that the Obama administration is throwing to Shell."

The [Washington Times](#) (5/12, Sherfinski, 641K) says Obama's "move on Monday is the second in four months involving offshore drilling that managed to anger environmentalists," and the [Daily Caller](#) (5/11, Bastasch, 366K) reported that the decision "defies...Obama's environmentalist supporters, who are opposed to allowing oil companies to tap into polar reserves." [TME](#) (5/11, Worland, 19.57M) reported that "the relationship between environmental groups and the White House has been fraught with disagreement as well as collaboration." While "environmental groups have praised Obama's aggressive stance on reducing greenhouse gas emissions...they have also criticized his support of efforts to allow drilling in new areas like the Atlantic Ocean off the coast of Southeastern US."

[Newsweek](#) (5/11, Schlanger, 175K) notes that "the decision comes three years after the government originally issued the same permission to Shell," which was "temporarily revoked after Shell's first attempt at offshore drilling, in 2012, ended with two rigs running aground." [Slate](#) (5/11, Griswold, 1.31M) noted that environmentalists "maintain that Shell hasn't proven it can operate safely in the Arctic." Moreover, "if there's one thing that industry and environmental groups agree on, it's that drilling in the Chukchi Sea – where the closest Coast Guard station equipped to respond to a spill is more than 1,000 miles away – is extremely dangerous."

[Bloomberg News](#) (5/11, Drajem, 3 81M) reports that Cindy Shogan, executive director of Alaska Wilderness League, said in a statement, "We can't trust Shell with America's Arctic. As we all remember, Shell's mishaps in 2012 culminated with its drilling rig running aground. ... Shell's 2015 plans are even riskier and dirtier this time around."

[Politico Pro](#) (5/11) reports that Franz Matzner, director of the Natural Resources Defense Council's Beyond Oil Initiative, said in a statement, "President Obama must protect our planet and our children's health from dangerous climate change. That should mean saying 'no' to Shell and 'yes' to clean energy alternatives."

[US News & World Report](#) (5/11, Newhouser, 907K) reported that Marissa Knodel, member of the climate and energy team at Friends of the Earth, said in a statement, "The Department of the Interior's hasty approval of Shell's revised Exploration Plan ignores its legal duties and sets us on the path toward climate catastrophe." Knodel further called it "the largest, loudest and dirtiest exploration plan ever proposed in the American Arctic Ocean."

[USA Today](#) (5/12, Korte, 5.01M) notes "the Bureau of Ocean Energy Management's approval of the drilling plan is just one step to allow drilling, and there are still 16 conditions that Shell must meet." Among them, Shell "must apply for and receive permits from the three other federal agencies and the state of Alaska to drill each well." On its front page, the [New York Times](#) (5/12, A1, Davenport, Subscription Publication, 12 24M) calls the decision "a major victory for Shell and the rest of the petroleum industry." Yesterday's "breakthrough," [NPR](#) (5/11, Chappell, 1.52M) reported, "is a new sign that Shell could soon recoup some of the several billion dollars it has spent on federal leases and other preparations in recent years."

[The Hill](#) (5/11, Cama, 533K) notes that Shell spokesman Curtis Smith "said the approval 'is an important milestone and signals the confidence regulators have in our plan.'" The [Wall Street Journal](#) (5/12, Harder, Sweet, Subscription Publication, 5 68M) notes that Smith also referred to the additional permits and approvals the company will require, "We'd like to see them sooner rather than later," he said. "We're moving assets and people as if we're going to achieve those permits. We have reason to believe we will."

The [AP](#) (5/12, 2.29M) reports that "a giant floating oil rig currently anchored off Port Angeles, Washington, will be towed to Seattle this week despite the Seattle mayor's assertion that the Port of Seattle can't host the rig until it gets a new land-use permit, a Royal Dutch Shell spokesman said Monday." Shell spokesman Curtis Smith said "the 400-foot-long Polar Pioneer was scheduled to arrive at the Port of Seattle's Terminal 5 'later in the week' to prepare for planned exploration in the Arctic Ocean."

Additional coverage was provided by [CNN](#) (5/11, Liptak, Producer, 3.17M), [Fox Business](#) (5/11, 387K), the [Huffington Post](#) (5/11, Sheppard, 194K), the [Christian Science Monitor](#) (5/11, 539K), the [Los Angeles \(CA\) Times](#) (5/12, Yardley, 4 03M), the [Washington \(DC\) Post](#) (5/11, Mark Thiessen |, Ap, 5.03M), the [Denver \(CO\) Post](#) (5/12, Press, 894K), the [Wheeling \(WV\) Intelligencer](#) (5/12, 74K), the [Boston \(MA\) Globe](#) (5/11, 886K), the [San Francisco \(CA\) Chronicle](#) (5/12, Subscription Publication, 2.92M), the [Seattle \(WA\) Post-Intelligencer](#) (5/12, 822K), the [Idaho Statesman](#) (5/11, Cockerham, 32K), the [Macon \(GA\) Telegraph](#) (5/11, 178K), the [Seattle \(WA\) Times](#) (5/12, 970K), the [Summit County \(CO\) Citizens Voice](#) (5/11, 506), the [Houston \(TX\) Chronicle](#) (5/12, Thiessen, 2.29M), the [Atlanta \(GA\) Journal-Constitution](#) (5/12, 985K), the [Boston \(MA\) Herald](#) (5/12, 709K), the [Chicago \(IL\) Tribune](#) (5/11, Reports, 2.74M), the [Alaska Native News](#) (5/12, 245), [My Central Oregon](#) (5/11), the [Japan Times](#) (5/12, 6K), [Environment News Service](#) (5/11, 25), [Fortune](#) (5/11, 2 98M), [CNBC](#) (5/12, 2.01M), the [Law 360](#) (5/12, 15K), [ENews Park Forest](#) (5/12, 2K), [Audubon Magazine](#) (5/12, 1 51M), [UPI](#) (5/11), [MarketWatch](#)

(5/11, 977K), [Think Progress](#) (5/11, 435K), the [Examiner](#) (5/12, 1.2M), [Popular Science](#) (5/12, 6.78M), [BBC News](#) (5/12, 1.79M), [BBC News](#) (5/12, 1.79M), [The Guardian \(UK\)](#) (5/11, 2.93M), the [Daily Mail \(UK\)](#) (5/12, 5.37M), [The Times \(UK\)](#) (5/12, 3K), [City AM \(UK\)](#) (5/12, 3K), [Natural Gas Intelligence](#) (5/12, Subscription Publication), the [Oil and Gas Investor](#) (5/12, Subscription Publication), [Offshore Engineer](#) (5/12), the [Arctic Journal \(GRL\)](#) (5/12), [WIMS-AM South Shore \(IN\)](#) South Shore, N (5/11), [WDIV-TV Detroit \(MI\)](#) Detroit (5/12, 292K), [KING-TV Seattle \(WA\)](#) Seattle (5/11, 298K), [KHOU-TV Houston \(TX\)](#) Houston (5/11, 336K), and [KOMO-TV Seattle \(WA\)](#) Seattle (5/12, 200K).

Also providing coverage are [Politico Pro](#) (5/12, Schor, Subscription Publication), [ABC News](#) (5/12, 3.69M), [CBS](#) (5/12, 8.2M), [Fox Business](#) (5/11, 387K), [Houston Chronicle](#) (5/12, 2.29M), [KOMO News](#) Seattle (5/12, 200K), [Seattle PI](#) (5/12, 822K), [The Arctic Journal](#) (5/12), the [Environment & Energy Publishing](#) (5/11, Subscription Publication, 705), [Platts](#) (5/12, 4K), [World Oil](#) (5/12), the [Alaska Dispatch News](#) (5/11, 216K), [CNBC](#) (5/12, 2.01M), the [Energy Guardian](#) (5/12), and the [FuelFix](#) (5/11, 7K).

REPORT FOSSIL FUELS FROM PUBLIC LANDS ACCOUNT FOR ONE QUARTER OF TOTAL US CARBON EMISSIONS. [De Smog Blog](#) (5/11, 343) reports that "a newly released analysis by the Climate Accountability Institute concludes that fossil fuels extracted from federal lands release carbon equal to a quarter of all U.S. greenhouse gas emissions. The rate has stayed roughly consistent from 2003 to 2014." The article notes that "when it comes to coal, the rate was even higher than average last year, the report concluded." Rick Heede, author of the analysis, wrote, "In 2014, two-fifths (40.2 percent) of U.S. coal production was from leases on Federal Lands; production on Indian Lands accounted for an additional 1.9 percent of U.S. coal production."

CONGRESS URGED TO SUPPORT LAND AND WATER CONSERVATION FUND. In an op-ed for the [Denver Post](#) (5/12, Simms, 894K), Lisa Simms, assistant director and dean of curriculum and instruction at the Denver School of Innovation and Sustainable Design, urges Congress to support the Land and Water Conservation Fund. In her piece, Simms focuses on the positive impact of the outdoors on youth.

ARIZONA GAME AND FISH COMMISSION OPPOSES PROPOSED NATIONAL MONUMENT IN GRAND CANYON WATERSHED. In an op-ed for the [Arizona Capitol Times](#) (5/11, 599), Robert Mansell, chairman of the Arizona Game and Fish Commission, writes about the commission's "opposition to any designation of a national monument in the Grand Canyon watershed." He notes that "the commission's opposition is based on the negative impacts that such a designation is likely to have on wildlife management across this vast expanse in northern Arizona." Mansell points to the creation of the Sonoran Desert National Monument in 2001 as "a cautionary tale."

America's Great Outdoors:

National Park Service:

NEW GIRL SCOUT RANGER PROGRAM ANNOUNCED. [KCSG-TV](#) St. George, UT (5/12, 43) reports that "thousands of Girl Scouts celebrated the announcement of the revamped Girl Scout Ranger Program in Golden Gate National Recreation Area on Saturday, May 2." The program, a joint venture between the NPS and the Girl Scouts of the USA, "connects girls to national parks throughout the United States, including monuments, seashores, and urban sites." NPS Deputy Director Peggy O'Dell said, "The National Park Service and Girl Scouts have the same goal – providing meaningful and memorable outdoor experiences for girls. This partnership will introduce scouts to the many ways they can play, learn, serve, and work in our national parks. We want each girl to 'Find Your Park' and enjoy these treasures."

NPS TO CHARGE MORE FOR YELLOWSTONE ACCESS. The [AP](#) (5/12, 2.29M) reports that "beginning June 1, it will cost more to visit Yellowstone National Park." The NPS "announced Monday that the entrance fee to the first national park will increase to \$30 per vehicle." The article notes that "the higher fees will boost the park's revenue by about \$3 million a year" and "Yellowstone Superintendent Dan Wenk says that will help fund various park projects."

Additional coverage was provided by the [U-T San Diego \(CA\)](#) (5/11, 579K), the [Washington \(DC\) Post](#) (5/11, Press, 5.03M), [ABC News](#) (5/12, 3.69M), and the [Columbus \(IN\) Republic](#) (5/12, 75K).

In an editorial, the [Redding \(CA\) Record-Searchlight](#) (5/12, 81K) raises concerns that higher fees at NPS sites will "drive" away some visitors.

NPS CLEANS UP TRASH TO DETER BEAR ATTACKS. [TIME](#) (5/12, 19.57M) reports that "ten people have been killed by bears" in Glacier National Park's "105-year history, compared with seven at Yellowstone National Park." The NPS "points out that more people have died — at Yellowstone, at least — by drowning or from burns sustained when they fell into the park's thermal pools." Nevertheless, grizzly attacks have "prompted the park service to clean up its act at Glacier, Yellowstone and other national parks."

Additional Coverage Of Bear Scare At Yellowstone. Additional coverage of the bear that scared Yellowstone visitors was provided by the [Houston \(TX\) Chronicle](#) (5/12, Brown, 2.29M), the [Houston \(TX\) Chronicle](#) (5/12, Brown, 2.29M), the [Washington \(DC\) Post](#) (5/11, Matthew Brown |, Ap, 5.03M), [CBS News](#) (5/12, 8.2M), the [Daily Mail \(UK\)](#) (5/12, 5.37M), the [Discovery Channel](#) (5/12, 774K), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (5/12, 1.07M).

NPS, RANCHERS FACE OFF OVER POINT REYES' ELK HERD. The [E&E Daily](#) (5/11) reports that the NPS is facing a new "battle in Point Reyes — this time over a free-roaming band of tule elk, and the ranches where they like to hang out."

REP. KILMER QUESTIONS IMPACT OF NAVY JETS ON OLYMPIC NATIONAL PARK. The [Seattle Post-Intelligencer](#) (5/11, 822K) reports that Rep. Derek Kilmer wants to know if the sounds at Olympic National Park are "threatened by the U.S. Navy's interest in using areas of the Peninsula for electronic warfare range testing, with an increased number of jets flying over pristine places." In a letter to two Cabinet secretaries and chairman of the federal Interagency Committee on Aviation Noise, Kilmer said, "I write to you today to ask for your assistance in maintaining a strong and ready military and protecting one of the most pristine environments and soundscapes in the lower forty-eight states — the Olympic National Park."

GLACIER NATIONAL PARK MARKS 105TH ANNIVERSARY. [KBZK-TV](#) Butte, MT (5/12, 785) reports that "May 11, 2015, marks the 105th anniversary of Glacier National Park becoming an officially protected land." Last month, a NPS report "revealed that 2.3 million visitors to Glacier National Park in 2014 spent \$193 million in communities near the park." Glacier National Park Superintendent Jeff Mow said, "This study reinforces the fact that Glacier National Park plays a significant role in the economy of the state of Montana, and specifically Northwest Montana."

NPS TO HOLD MEETINGS ON PROPOSED PROTECTION OF NATIVE HABITAT AT NU'U. The [Maui \(HI\) Now](#) (5/11) reports that "the proposed protection and restoration of habitat for native species at Nu'u on the leeward slopes of Haleakalā will be discussed at two upcoming public scoping meetings." The NPS, "in partnership with the Leeward Haleakalā Watershed Restoration Partnership and the National Fish and Wildlife Foundation, propose to protect and restore either 1,300 or 2,100 acres of habitat in the upper elevations of Nu'u." The park is "starting to prepare an Environmental Assessment and welcomes public participation during the environmental analysis process."

NPS HOLDS PUBLIC HEARINGS ON BUFFERS FOR SHOREBIRDS, SEA TURTLES IN NORTH CAROLINA. The [AP](#) (5/12, 2.29M) reports that "by next month, shorebirds and anglers could share parts of the North Carolina seashore in a way that works for them both." The NPS held public hearings held last week "regarding smaller buffers around shorebirds and sea turtle nests." The article notes that "a federal law that passed in December gave the park six months to decrease the size of the no-drive zones or offer an alternative route around nests."

ACADIA NATIONAL PARK TO OFFER "CAR-FREE" EXPERIENCE SATURDAY MORNING. The [Bangor \(ME\) Daily News](#) (5/11, 179K) reports that "on Saturday, May 16, up until noon, private motorized vehicles will not be permitted on Cadillac Mountain" at Acadia National Park "or anywhere else along the park's roads, so visitors can use them without having to face the sound of engines and smell of exhaust." Park entrance fees also will be waived until noon. ANP Superintendent Sheridan Steele said, "We are excited to offer a way for visitors to enjoy a carefree, car-free experience on the Park Loop Road during our shoulder seasons and look forward to working with the neighboring communities to make it a success."

APPOMATTOX NAMES SUPERINTENDENT OF COURT HOUSE NATIONAL PARK. The [AP](#) (5/12, 2.29M) reports that Robin Snyder has been named the superintendent of Appomattox Court House National Historical Park. Snyder, "who has been the acting superintendent at the park since February, will begin her assignment in late June."

Additional coverage was provided by the [Washington \(DC\) Post](#) (5/11, Press, 5.03M) and [WSET-TV Lynchburg \(VA\)](#) Lynchburg, VA (5/12, 17K).

TWO DEVELOPMENTS THREATENS GRAND CANYON. In her column for the [Arizona Republic](#) (5/11, 1.27M) Linda Valdez writes that Grand Canyon National Park Superintendent Dave Uberuaga says "two proposed developments are 'fundamentally wrong.'" One development is the proposed Grand Canyon Escalade on the Navajo Nation. The other is a plan "for a major development near Tusayan." Uberuaga wants to prevent "direct, long-term irreversible impacts" to the Grand Canyon.

Bureau of Land Management:

BLM DIRECTOR KORNZE TO TESTIFY ON BUDGET REQUEST BEFORE SENATE. The [Environment & Energy Publishing](#) (5/11, Subscription Publication, 705) reports that "Senate appropriators on Wednesday will review the Bureau of Land Management's \$1.25 billion fiscal 2016 budget request, a proposal that seeks new fees on oil and gas drilling and would roughly quadruple funding for an imperiled Western bird." BLM Director Neil Kornze will "defend the budget before the Interior, Environment and Related

Agencies Appropriations Subcommittee."

NEVADA RANCHER BUNDY REACHES OUT TO SUPPORTER. The [Los Angeles Times](#) (5/12, Glionna, 4.03M) reports that on Monday, Nevada rancher Cliven Bundy, "who has waged a running battle of words and lawsuits with the federal government over public lands, made a phone call to an out-of-state supporter facing prison time over comments he made in support of the newly christened tea party folk hero." Will Michael "pleaded guilty last month in federal court to threatening a Bureau of Land Management official as well as making interstate communication threats during Bundy's 2014 standoff with federal officials over land grazing rights." Bundy says "he feels responsible for the man's predicament and wanted to offer a show of emotional support."

MESA COUNTY COMMISSIONERS ASK FOR EXTENSION TO REVIEW BLM'S RESOURCE MANAGEMENT PLAN. [KKCO-TV](#) Grand Junction, CO (5/12, 1K) reports that "the Mesa County Commissioners are stepping in to address the issues involving the Bureau of Land Management's Resource Management Plan." The commissioners are "sending a letter to the BLM asking for a six month extension to review the plan." The letter "cites three topics of concern including; comprehensive travel and transportation management, fluid leasable minerals and inconsistencies with local and state plans."

BLM SEEKS INPUT ON RED GRADE TRAILS PROJECT. The [Sheridan \(WY\) Press](#) (5/12) reports that the BLM is "currently taking public comments on the environmental assessment of the Sheridan Community Land Trust's proposal to build 6.5 miles of trail and two trailheads on BLM lands, which comprises Phase II of the proposed Red Grade Trails System."

WORK PROGRESSES ON NEW GREAT FALLS FIELD OFFICE. The [Great Falls \(MT\) Tribune](#) (5/11, 80K) reports that "Sletten Construction Company is designing a new building for the U.S. Forest Service and Bureau of Land Management." The project will be the new Great Falls field office for both federal agencies.

CONCERNS RAISED OVER PARADIGM FUEL BREAK PROJECT. The [Idaho Statesman](#) (5/11, 199K) reports that the BLM is "preparing to begin building a 356-mile network of fuel breaks in a 57-mile section of the Interstate 84 corridor. Boise to Glenns Ferry." The Paradigm Fuel Break Project is "aimed to slow down and reduce the size of wild fires in the area, which are mostly caused by humans." However, "critics say the agency's choice to plant an invasive exotic plant threatens the rangeland it hopes to protect."

Fish and Wildlife Service:

MIGRATORY BIRDS TO RECEIVE \$3.8 MILLION IN GRANTS FROM FWS. The [AmmoLand](#) (5/12, 5K) reports that "migratory birds throughout the Western Hemisphere will benefit from \$3.8 million in grants for 27 collaborative conservation projects across the Americas, the U.S. Fish and Wildlife Service announced today." The Neotropical Migratory Bird Conservation Act grants will leverage the agency's "investment with \$14.6 million in additional private funds—a nearly 4-to-1 match." FWS Director Dan Ashe said, "Migratory birds connect people from many countries to the natural world, and to each other. These projects continue a long history of collaboration and tie conservation actions together across the diverse habitats where these birds breed, migrate and live."

FWS ANNOUNCES NEW NATIONAL WILDLIFE REFUGE SYSTEM CHIEF. The [AmmoLand](#) (5/12, 5K) reports that FWS Director Dan Ashe "announced the selection of Cynthia Martinez as the agency's chief of the National Wildlife Refuge System." Martinez, "a 21-year veteran of the agency, has served as the Service's deputy chief for the refuge system since 2012." Ashe said, "She possesses a diversity of experience working within the Service and National Wildlife Refuge System. Cynthia also demonstrates the strong leadership and innovation the Service needs as we continue to introduce new generations of Americans to conservation."

AMENDMENTS OFFERED ON SAGE GROUSE, LESSER PRAIRIE CHICKEN IN DEFENSE BILL. The [E&E Daily](#) (5/11) reports that "House Democrats are taking another crack at votes they lost on an imperiled bird and biofuels policy during last month's House Armed Services Committee markup of the fiscal 2016 National Defense Authorization Act." Democrats have "offered amendments for this week's expected floor debate of the bill that would reverse language added in committee to limit an endangered species listing for the greater sage grouse and the Pentagon's ability to invest in biofuels."

Also, [The Hill](#) (5/12, Wong, 533K) reports that "after the House Armed Services Committee adopted a measure in its defense policy bill to block special protections for the greater sage grouse, Republicans want to do the same for the lesser prairie chicken." The legislation will be "debated this week on the House floor, and a group of Oklahoma Republicans is proposing an amendment that would block the re-listing of the prairie chicken on the endangered species list in 2021, unless the Interior secretary determines that a conservation plan is not working."

Report Says Sage Grouse Likely To Go Extinct In Powder River Basin Within Three Decades. The [Casper \(WY\) Star-Tribune](#) (5/12, 99K) reports that "sage grouse will likely go extinct in the Powder River Basin within the next three decades, according to a recent study commissioned by the Pew Charitable Trusts." The article notes that "those declines mirror wider trends across the bird's range." The study found that "sage grouse populations across the West declined by 56 percent between 2007 and 2013."

FUNDING WILL KEEP TROUT STOCKED AT TENNESSEE, GEORGIA LAKES. The [AP](#) (5/12, 2.29M) reports that "a steady stream of trout will continue to flow into lakes in Tennessee and Georgia thanks to a funding agreement involving the Tennessee Valley Authority, the U.S. Fish and Wildlife Service and state agencies." The article notes that "the agreement will keep open three fish hatcheries that together supply more than a million trout each year for 13 TVA reservoirs and dam tailwaters in the two states." Under the agreement, "TVA pays for the fish, the U.S. Fish and Wildlife Service pays the cost of the hatcheries and state agencies pay for stocking and monitoring."

Additional coverage was provided by the [Knoxville \(TN\) News Sentinel](#) (5/12, 332K), the [Knoxville \(TN\) News Sentinel](#) (5/12, 332K), the [Chattanooga \(TN\) News Sentinel](#) (5/12, 5K), the [Johnson City \(TN\) Press](#) (5/12, 76K), and the [Johnson City \(TN\) Press](#) (5/12, 76K).

LOUISIANA BLACK BEAR TO BE REMOVED FROM ENDANGERED LIST. The [Monroe \(LA\) News Star](#) (5/11, 67K) reports that "Louisiana's black bear, which was on the brink of extinction half a century ago, is expected to be removed from the Endangered Species Act listing." According to the article, "at least 500 bears — and perhaps as many as 1,000 — roam the deep woods of the Tensas National Wildlife Refuge, Upper Atchafalaya Basin and other connecting corridors like Three Rivers." Tom MacKenzie of the FWS "declined to confirm the removal of the black bear from the endangered species list, but did say, 'We'll be making an announcement May 20.'"

FWS SEES LAHONTAN TROUT RETURN TO TRUCKEE RIVER. The [AP](#) (5/12, 2.29M) reports that "Lahontan cutthroat trout are successfully reproducing in the lower Truckee River in what experts are calling a major milestone in efforts to restore the population once on the brink of extinction." The article notes that "last year, cutthroats raised from a strain of a remnant population in the mountains near the Nevada-Utah line spawned upstream from Pyramid Lake for the first time in nearly 80 years." Now, FWS officials have "documented about 1,000 newly hatched baby cutthroats swimming in the river after a second spawn this spring."

JUDGE WON'T BLOCK PLAN TO KILL CORMORANTS IN COLUMBIA RIVER ESTUARY. The [AP](#) (5/12, 2.29M) reports that "a judge has refused to block a plan to shoot more than 10,000 double-crested cormorants in the Columbia River estuary." U.S. District Judge Michael Simon denied the preliminary injunction sought by conservation groups.

US Geological Survey:

RESEARCHERS STUDYING SEISMIC SHAKING IN DC. The [Washington Post](#) (5/12, 5.03M) reports that "researchers are analyzing seismic shaking underneath the nation's capital to better predict damage to federal buildings and monuments from future earthquakes." The article notes that "their study was sparked by a 2011 Virginia earthquake, a magnitude-5.8 temblor that cracked the Washington Monument and the National Cathedral." According to the article, "to understand why strong earthquake tremors hit the capital, the USGS partnered with Virginia Tech in 2014 to install 27 seismometers around the District."

USGS CHECKS TRINITY RIVER. The [Jacksboro \(TX\) Gazette-News](#) (5/12) reports that "hydrologists and hydrologic technicians from the US Geological Survey were in Jack County Friday afternoon monitoring the flow of the Trinity River at the Highway 59 bridge near Maryetta." USGS' Glenn Harwell said, "We're measuring discharge with a gauge that keeps track of how much water is going downstream. It helps to define the relationships for folks like the Corps of Engineers and Tarrant County Water District."

Securing America's Energy Future:

Renewable Energy:

BOEM TRYING TO EXPAND OFFSHORE WIND. The [Climate Central](#) (5/12, 5K) reports that "the Block Island Wind Farm is set to break ground in July off the coast of Rhode Island, and with it, the future of offshore wind in the U.S. seems very real." The BOEM "held the country's largest offshore wind development lease auction in January for 742,000 acres of open water 12 miles off the shore of Martha's Vineyard." The bureau is also "planning to lease waters off the coast of New Jersey this year, while investigating a possible new wind development area off the coast of South Carolina, BOEM spokeswoman Tracey Moriarty said."

BOEM TO PROVIDE UPDATE ON OFFSHORE WIND PROPOSAL IN HAWAII. The [reNews](#) (5/12) reports that the BOEM will "provide an update on 3 June on Alpha Wind Energy's proposal to build a pair of 408MW floating offshore wind farms off the coast of Oahu in Hawaii." According to the article, "the update will come at the third BOEM Hawaii Intergovernmental Renewable Energy Task Force meeting to be held at the Homer Maxey International Trade Resource Center in Honolulu, Hawaii." The bureau will "present

information on the two unsolicited lease requests, which were received in January, and will explain the next steps in the process."

Onshore Energy Development:

COURT FINDS OSM ILLEGALLY APPROVED COLORADO MINE EXPANSIONS. The [Grand Junction \(CO\) Daily Sentinel](#) (5/12, 73K) reports that "a judge has ruled that the federal government illegally approved expansions of two mines that supply Tri-State Generation and Transmission Association's Craig coal-fired power plant." U.S. District Court Judge R. Brooke Jackson held Friday that the Office of Surface Mining "approved expansions of the Colowyo Mine north of Meeker and the Trapper Mine near Craig in 2007 and 2009, respectively, without providing public notice of the decisions and accounting for the environmental impacts." Brooke "ordered the Office of Surface Mining to address those shortfalls within 120 days or the approval at Tri-State's Colowyo Mine will be vacated and the affected mining shut down."

Additional coverage was provided by the [Steamboat \(CO\) Pilot & Today](#) (5/10, 30K), the [Denver \(CO\) Post](#) (5/12, Jaffe, 894K), and the [Law 360](#) (5/12, 15K).

ONRR RECEIVES COMMENTS ON PROPOSED COAL RULE. [Think Progress](#) (5/11, 435K) reports that "a proposed rule from DOI's Office of Natural Resources Revenue that aims to close a regulatory loophole that allows coal companies to avoid paying royalties owed to taxpayers" has "attracted a record-breaking 210,000 public comments from taxpayers, who argue that they are not receiving a fair share of revenues from the mining of coal on U.S. public lands." Critics claim that "the proposed rule does not go far enough to guarantee that western states and U.S. taxpayers are receiving a fair value for the coal mined on America's public lands, due to additional subsidies given to coal companies under the rule."

OIL, GAS INDUSTRY DECRIES PROTECTIONS FOR BAT. The [Pittsburgh Post-Gazette](#) (5/12, Kelner, 621K) reports that "the oil and gas industry has decried the possible effects that protecting the northern long-eared bat, effective May 4, under the act could have on their operations, while pointing out that other industries are not facing the same restrictions." The Independent Petroleum Association of America has stated that because the FWS "enacted the listing in response to a fungal disease called white-nose syndrome, and not habitat change, drillers should not be subjected to increased restrictions for new projects." Neal Kirby, a spokesman for the IPAA, also noted, "Inexplicably, oil and natural gas activities did not make the exempt list, even though the service acknowledged that oil and natural gas activity does not significantly affect the bat's population levels."

INTERIOR PANEL NIXES BIA EXTENSION OF TRIBAL OIL, GAS LEASE. The [Law 360](#) (5/12, 15K) reports that the BIA "erred in approving a land pooling agreement for oil and gas drilling on 80 acres within 642 acres of tribal land in Oklahoma because the agreement was not submitted on time, the Interior Board of Indian Appeals has ruled."

BILLIONAIRE COAL EXECUTIVE TO RUN FOR WEST VIRGINIA DEMOCRATIC NOMINATION. [Reuters](#) (5/12, Pelt) reports that billionaire coal mining executive Jim Justice, who switched his party affiliation from Republican to Democrat in February, intends to run against incumbent Democratic Governor Earl Ray Tomblin. Reuters reports that Justice supports an all-of-the-above energy approach and credits himself with having saved thousands of energy jobs in the state.

RESEARCHERS SAY FRACKING "MOST LIKELY" BEHIND UPTICK IN TEXAS' EARTHQUAKES. The [International Business Times](#) (5/11, Ross, 774K) reports, "Researchers have pinned the recent rise in small earthquakes" in areas of Texas on fracking, as "all of the earthquakes in the last seven years have occurred above the Barnett Shale, a geological formation that has become a major fracking site for petroleum companies." Scientists from Southern Methodist University in April said most of the new quakes are "most likely" man-made. The report "adds to the growing body of evidence that fracking could be causing more earthquakes," the article reports. "While some uncertainties remain, it is unlikely that natural increases to tectonic stresses led to these events," Heather DeShon, a professor of geophysics at SMU and the report's head researcher, said. But for USGS researcher George Choy, "The connection has not been established, but we cannot rule them out."

ADDITIONAL COVERAGE MOUNTAIN TOWN WANT COAL COMPANIES TO PAY ROYALTIES. Additional coverage that mountain towns "leaped into the national political fray last week, demanding the federal government close loopholes and eliminate subsidies to the royalties it charges coal companies to mine on public lands" was provided by [US News & World Report](#) (5/11, 907K), [Colorado Public Radio](#) (5/12), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (5/12, 1.07M).

Offshore Energy Development:

COURT GIVES BP OPTION TO APPEAL SOME GULF SPILL CLAIMS. [The Hill](#) (5/11, Cama, 533K) reports that the Court of Appeals for the Fifth Circuit in New Orleans on May 8 "ruled that oil giant BP has the right to appeal some damage claims under its settlement from the 2010 Gulf of Mexico oil spill at its well." The court said that BP's agreement to a settlement does not waive the company's right to appeal claims, after it had in 2012 "said it expected to pay \$7.8 billion to resolve claims," and later revised the sum to some \$10.3 billion.. BP has so far paid almost half that.

The [New Orleans Times-Picayune](#) (5/11, Larino, 733K) also covers the court's decision, adding, "The ruling could limit payout to victims of the 2010 disaster and stokes plaintiffs' lawyer fears that BP seeks to drag the agreed-upon settlement back through litigation," according to Reuters.

ADDITIONAL COVERAGE BSEE DIRECTOR SALERNO MAKES SAFETY ANNOUNCEMENT AT OFFSHORE TECHNOLOGY CONFERENCE. Additional coverage of BSEE Director Brian Salerno's comments at the Offshore Technology Conference was provided by [Occupational Health & Safety](#) (5/12, 235K).

Tackling America's Water Challenges:

CLIMATE CHANGE EXACERBATING DROUGHT. [Bloomberg Politics](#) (5/11, 161K) reports that "while droughts are common in the western U.S., climate change has led to longer and more frequent water shortages in recent years." The BOR "this week will start a program targeting 17 Western states." According to the article, "the program will provide \$5 million to water districts, cities and tribes for projects, including infrastructure improvements to access water and set up water markets to match buyers and sellers."

Additional coverage of the drought was provided by the [Sacramento \(CA\) Bee](#) (5/12, 551K).

PROTESTORS QUESTION BOR'S PLAN TO RELEASE WATER. The [Redding \(CA\) Record-Searchlight](#) (5/12, 81K) reports that "protesters took to Shasta Dam Monday morning to question the U.S. Bureau of Reclamation's plans to soon release some 2.5 billion gallons of water into Clear Creek for salmon during the fourth year of California's drought."

Empowering Native American Communities:

SOUTHERN CHEROKEE TRIBE MEMBERS SEEK FEDERAL RECOGNITION. The [Rolla \(MO\) Daily News](#) (5/11, 15K) reports that "members of the Southern Cherokee tribe recently mailed the first of two shipments of documentation to the Department of the Interior's Bureau of Indian Affairs in an effort to be re-recognized as a federal Indian tribe." Southern Cherokee Chief Steve Matthews said, "We began our research at the Library of Congress. We visited numerous historical societies, state archives and read books to make sure we got our story right. We also went through three computers in the process."

BIA SEEKS COMMENTS ON UKIAH VALLEY POMO INDIAN TRIBE'S FEDERAL RECOGNITION BID. The [Law 360](#) (5/12, 15K) reports that "the proposed Ukiah Valley Pomo Indian Tribe's quest for federal recognition has taken a step forward after years of litigation, with the Bureau of Indian Affairs asking for public comment on the California-based group's eligibility to organize as a tribe."

YAKIMA, KLICKITAT COUNTIES RAISE CONCERNS ABOUT YAKAMA NATION RETROCESSION PETITION. The [Yakima \(WA\) Herald-Republic](#) (5/12, 86K) reports that "as the federal government moves toward approving the Yakama Nation's retrocession petition — which returns civil and criminal jurisdiction over tribal members on the reservation from the state back to the tribe — officials in Yakima and Klickitat counties are concerned that some questions remain unanswered." In Klickitat County, "commissioners want to know how retrocession would affect a long-standing boundary dispute, and officials in Yakima County want to ensure there's a formal plan detailing how tribal and local law enforcement agencies will work together once the retrocession is approved."

BIA HOLDS RETIREMENT CEREMONY FOR CHEROKEE AGENCY SUPERINTENDENT. The [Cherokee \(NC\) One Feather](#) (5/12) reports that the BIA "held a special retirement ceremony for Darlene Whitetree, Cherokee Agency superintendent, on Friday, May 8." Whitetree "retired after 16 years of serving the BIA and leaves behind a wealth of knowledge, strong public service record, and expertise in providing top-notch services to Cherokee." Johnna Blackhair, Eastern Regional Director of the BIA, said, "Today is a day of celebration. We are here to share in the celebration of the career and endeavors she has pursued on behalf of the Cherokee Nation. Her knowledge and expertise in trust matters has significantly impacted the Cherokee agency. It is a bittersweet moment because we are going to miss her and the ability to rely on her for personal expertise."

BIA TO ENFORCE CLICK IT OR TICKET CAMPAIGN 2015. The [Bartlesville \(OK\) Radio](#) (5/12) reports that the BIA Indian Highway Safety Program (IHSP) "sent out a memorandum to all tribal police chiefs at the beginning of the month regarding the national 'Click it or Ticket' safety belt mobilization campaign for 2015." The national campaign runs from May 19 through June 1.

GILA RIVER OFFICIALS REJECT SALT RIVER PROJECT'S PLAN FOR POWER LINE. The [Arizona Republic](#) (5/11, 1 27M) reports that "Salt River Project's plan to build a 230-kilovolt power line in the Southeast Valley was dealt a major setback last week, after the Gila River Indian Community Council rejected a preferred route that would bring most of the new line across tribal land, avoiding residential areas in Chandler and Sun Lakes." The article notes that "the May 6 vote came despite approval from about 4,000 allottees who hold tribal land and gave consent to SRP for the above-ground line."

RESERVATIONS IN MONTANA PLAGUED BY HEALTH PROBLEMS, UNEMPLOYMENT. The [Bozeman \(MT\) Daily Chronicle](#) (5/12, 54K) editorializes that "in Montana counties with the highest Native American populations...the rate of premature death can be as much as four times what it is in Gallatin County." Also, "the unemployment rate, a key predictor of health outcomes, can be three times as high." It notes that "the reservations are under the control of the federal Bureau of Indian Affairs, a chronically underfunded agency that must walk a fine line between getting involved and respecting tribal sovereignty."

Top National News:

AMID DEMOCRATIC INFIGHTING, "FAST TRACK" FACES UNCERTAIN FATE IN SENATE. Media coverage of the ongoing trade debate in Washington reflects the uncertainty over the fate of the Senate's "fast-track" legislation this week, and casts the President's confrontation with his party's liberal wing as the major obstacle to approval of the Trans-Pacific Partnership. The trade debate was not mentioned on the network newscasts last night.

On its website, [T ME](#) (5/11, Edwards, 19.57M) said "the Senate is expected to approve...fast track," a move that "would grease the skids for Obama to finish the Trans-Pacific Partnership, an unprecedentedly massive trade pact." In fact, "most trade experts agree that if the fast track bill passes, it all but guarantees that the Trans-Pacific Partnership will too." Also on its website, [The Hill](#) (5/11, Carney, 533K) reported that "despite the Democratic skepticism, it's unclear if" Senate Minority Leader Reid "will be able to garner enough support to carry out his threat to block the legislation."

However, the [Washington Post](#) (5/12, Kane, 5.03M) reports, "the Democratic infighting" has "left...opponents believing they have the votes to block the measure," opening "the unusual possibility that the president's own party would launch a filibuster against his coveted trade agenda."

At any rate, says the [New York Times](#) (5/12, B1, Weisman, Subscription Publication, 12 24M), "both sides say the vote will be close, but absent a breakthrough in negotiations, the 60-vote threshold will be difficult to meet." Nonetheless, "a bipartisan coalition, from Senator Charles E. Schumer...to Senator Lindsey Graham...has told the White House there will be no trade promotion authority bill without a provision aimed at China's currency policies." Commerce Secretary Pritzker called the approach "a terrible idea," even though it would bolster the authority of her cabinet agency" at Treasury's expense. Added Prizker, "There's one authority over our currency. We should strengthen Treasury. ... We should not dilute this by having more than one department responsible for currency." In an editorial, the [Wall Street Journal](#) (5/12, A12, Subscription Publication, 5.68M) also criticizes the emphasis on the Chinese currency matter, an effort led in the Senate by Sen. Rob Portman. To the Journal, failure to pass TPA will be evidence of a process of US economic decline – which will enhance China's influence.

[Politico](#) (5/11, Raju, 1.11M) predicts a "cliffhanger vote," and notes that Sen. Ron Wyden, who "co-authored the fast-track trade measure," has "made it clear in a closed-door Democratic meeting last Thursday that he would not vote to advance the Tuesday procedural motion unless Republicans promise they would also move forward with two other trade measures: a customs enforcement bill and the African Growth and Opportunity Act. Otherwise, he would vote no." A "senior Senate Democratic aide" tells Politico, "There was no ambiguity about this." On its front page, however, the [Washington Post](#) (5/12, A1, DeBonis, 5 03M) reports from Oregon that the "deeply blue" state, "with its boom in new-economy jobs, has come to occupy a special role in the debate about the benefits and perils of free trade." The Post quotes Wyden as saying, "We're the face of the opportunity to grow more good-paying jobs." The Post adds that "Democrats elsewhere have been mostly unwilling to extend Obama the benefit of the doubt on trade."

Dana Milbank, in the [Washington Post](#) (5/12, 5.03M), says Obama could be in danger of causing his own defeat on trade, "Let's suppose you are trying to bring a friend around to your point of view. Would you tell her she's emotional, illogical, outdated and not very smart? Would you complain that he's being dishonest, fabricating falsehoods and denying reality with his knee-jerk response?" While "such a method of a persuasion is likelier to get you a black eye than a convert...this is how...Obama treats his fellow Democrats on trade – and why he's in danger of losing." To Milbank, Obama "is also being undermined by his administration's allergy to disclosure and its zeal for confidentiality," which "makes it appear" he "is hiding something." [USA Today](#) (5/12, Davis, 5.01M), meanwhile, predicts that "if successful on Tuesday, Senate leaders will" still "have to navigate an expected barrage of amendments from lawmakers in both parties who want to add certain requirements to the administration's negotiating authority."

Danny Vinik, writing for the [New Republic](#) (5/11, 228K), remarked on the President's interview with Yahoo's Matt Bai this past weekend, where he "delivered his sharpest rebuke yet to Senator Elizabeth Warren and other liberals who oppose the trade deal." Obama said, "The truth of the matter is that Elizabeth is, you know, a politician like everybody else. ... And you know, she's got a voice that she wants to get out there. And I understand that. And on most issues, she and I deeply agree. On this one, though, her arguments don't stand the test of fact and scrutiny." The [National Journal](#) (5/11, Alvarez, Subscription Publication, 156K) says the "heated dispute between" Obama and Warren "spilled into Monday's daily White House press briefing, with White House press secretary Josh Earnest inviting Warren to 'walk over' to read the negotiated document." Said Earnest, "There's no need for this false criticism that members of Congress aren't aware of what's being negotiated."

But Warren "hit back at...Obama" yesterday, notes [Politico](#) (5/11, Van Hall, 1.11M), "saying she is justified in her criticism of trade negotiations that she believes could undermine the Dodd-Frank financial reform." Warren also told the [Washington Post's Plum Line blog](#) (5/12, Sargent, 5.03M) that "the president won't actually let people read the agreement for themselves. It's classified. ... If the president is so confident it's a good deal, he should declassify the text and let people see it before asking Congress to tie its hands on fixing it." [Reuters](#) (5/12) highlights the same Warren quote in its coverage, while [TIME](#) (5/11, Frizell, 19.57M) noted that she "has argued that the deal will weaken regulations and undermine the Dodd Frank financial reforms."

[Bloomberg Politics](#) (5/11, Dorning, 161K), which reports that Warren "commands a loyal following in the party's liberal wing," quotes her as saying, "Whatever the Obama administration has committed to won't bind the next president. ... If that president wants to negotiate a trade deal that undercuts Dodd Frank, it will be very hard to stop it." The [Washington Times](#) (5/12, Sherfinski, 641K) notes that Obama had said over the weekend, "Think about the logic of that, right? ... The notion that I had this massive fight with Wall Street to make sure that we don't repeat what happened in 2007, 2008. And then I sign a provision that would unravel it? ... I'd have to be pretty stupid."

Warren and Rep. Rosa DeLauro write in the [Boston Globe](#) (5/12, 886K) that TPP advocates "sell this proposal as a free trade deal — but the United States already has free trade agreements with half of the countries at the negotiating table," and note that the text of the deal remains classified. Congress, they argue, "should refuse to vote for any expedited procedures to approve the TPP before the trade agreement is made public. And Congress certainly shouldn't vote for expedited procedures to enact trade deals that don't yet even exist."

Jared Keller, in the [Pacific Standard](#) (5/11), asks why "the most liberal president in decades" is "not only backing TPP, but picking an increasingly bitter fight with a key part of his own political base over it? The answer resurrects an old question about the Democratic Party some had thought buried by the tactical brilliance of both Bill Clinton's and Obama's campaigns: Do the Democrats have a political death wish?" Keller further wonders whether in "trying to turn back a seemingly unstoppable march toward global trade," Warren is "risking more – GOP control of both executive and legislative branches, for instance – than she and her allies stand to gain."

In addition to his party's liberal wing, the [Wall Street Journal](#) (5/12, Davis, Subscription Publication, 5.68M) reports, Obama also has to contend with some GOP opposition – particularly Sen. Rand Paul, who said last night that he hasn't made a final decision. While the senator claims to be in favor of the TPP, he objected to fast-track.

14 Senate Democrats Call For Stronger Labor Standards Ahead Of TPP Implementation. [The Hill](#) (5/11, Needham, 533K) reports that a group of 14 Senate Democrats, "nearly all of whom oppose fast-tracking trade agreements," yesterday called on Obama "to require that stronger labor standards be implemented before a sweeping Asia-Pacific deal takes effect, firing a shot across the bow on the eve of a crucial test vote in the Senate." In a letter to USTR Froman and Labor Secretary Perez, they argued that "waiting to improve standards until after the" TPP "is enacted could diminish enforcement of labor protections in those countries." The 14 Democrats who signed the letter were Sens. Sherrod Brown, Ben Cardin, Schumer, Debbie Stabenow, Bob Casey, Al Franken, Ed Markey, Tammy Baldwin, Gary Peters, Tom Udall, Richard Blumenthal, Brian Schatz, Jeff Merkley, and Warren.

Rep. Sandy Levin wrote in the [Huffington Post](#) (5/11, 194K), "Eight years ago, Charlie Rangel and I worked with our House Democratic colleagues to co-author what became known as the 'May 10th Agreement' on labor and environmental standards in trade agreements." House Democrats "brought about these historic changes, so we have some standing to evaluate their implementation," and "I have deep concern – and some dismay – when the president says that 'we are just wrong,' or we are 'satisfied with the status quo,' or worse, we are 'making this stuff up.'" Added Levin, "House Democrats know a progressive trade agreement when we see it," and "we think the TPP agreement...falls short of what is needed."

NYTimes Outlines Potential Compromise. A [New York Times](#) (5/12, Board, Subscription Publication, 12 24M) editorial says that while the two sides in the debate "have major differences, a compromise is still possible and would be good for the American economy." Lawmakers, it says, have "legitimate concerns" about currency manipulation, and the President and lawmakers "should be able to write amendments to the bill that clearly explain that trade pacts that could undercut financial and other regulations would not receive fast-track consideration."

Bolton: Warren “Economically Illiterate.” The [Boston Herald](#) (5/12, Stout, 709K) reports that “former UN Ambassador John Bolton – who has weighed a White House run built on hitting the Obama administration on its foreign policy decisions,” said on Monday that Obama “actually ‘got it right’ with his controversial Pacific trade pact,” and called Warren’s “opposition to the Trans-Pacific Partnership ‘economically illiterate.’”

Amendments Regarding Israel “Raising The Rancor Even More.” [Politico](#) (5/11, Toosi, 1.11M) reports about amendments that “are raising the rancor even more,” namely those which “aim to discourage foreign governments – in particular European ones – from boycotting, divesting from or putting sanctions on commercial activity linked to Israel and Israeli-controlled territories.” The amendments “were inspired by the ‘BDS movement,’ which was started a decade ago by Palestinian activists to put economic pressure on Israel.” AIPAC “backs the provisions,” in an apparent “shift” to “the pro-Israel group’s position on the settlements.”

Union Official Blasts TPP. In a letter to the editor of the [Washington Post](#) (5/12, 5 03M), Marc Perrone, international president of the United Food and Commercial Workers International Union, argues that “no elected official truly interested in making the economy better and fairer can support the Trans-Pacific Partnership,” which is “bad for our workers, families and shared future.”

WTimes Analysis: Clinton Could Successfully Avoid Picking Sides In Democratic Debate. The [Washington Times](#) (5/12, Miller, 641K) reports that “as calls intensify for...Hillary Rodham Clinton to take a stand on a major trade deal that has split her party, she’s wagered that she can ignore them, and campaign veterans say it’s a safe bet.” Clinton “has refused to pick sides in a fight that has her torn between the party’s liberal base and union allies that desperately want to sink” the TPP and Obama. Hank Sheinkopf, “a Democratic campaign consultant who formerly advised President Bill Clinton,” tells the Times, “She’s playing it very smart. There’s no pressure on her. She can do what she wants when she wants.”

WHITE HOUSE PUSHES BACK AGAINST CLAIMS IN HERSH ARTICLE. The White House is pushing back against claims by investigative journalist in a story for the [London Review of Books](#) that much about the Administration’s official narrative concerning the raid that killed Osama bin Laden is untrue. In a piece for the [Blaze](#) (5/11, 1.87M), Fred Lucas noted that according to Hersh, the Administration “rushed to take sole credit for killing the Al Qaeda leader behind the 9/11 attacks, when in fact the government of Pakistan provided significant assistance.” Hersh said on [CNN’s Anderson Cooper 360](#) (5/11, 686K) that “the simple way to describe it is, the President did authorize the raid. The SEALS carried it out. They killed bin Laden, they got in and out successfully. And the rest is hogwash.”

Lester Holt reported on [NBC Nightly News](#) (5/11, story 8, 2:25, Holt, 7.86M) that the White House is “hitting back hard” against Hersh’s claims. Andrea Mitchell said the White House and former officials said Monday that Hersh’s claims are “flat wrong.” The [Huffington Post](#) (5/11, Bendery, 194K) noted that White House Press Secretary Josh Earnest said “there was next to nothing accurate about Hersh’s piece,” noting, “I can tell you that the Obama White House is not the only one to observe that the story is riddled with inaccuracies and outright falsehoods,” and [Politico](#) (5/11, Lerner, 1.11M) reported that former CIA Deputy Director Mike Morell “dismissed” Hersh’s report, telling CBS, “It’s all wrong. ... I started reading the article last night. I got a third of the way through and I stopped, because every sentence I was reading was wrong. The source that Hersh talked to has no idea what he’s talking about.”

[Alabama Live](#) (5/11, 416K) called Hersh’s report “a bombshell,” but noted that “critics are lining up to question his claims,” including the fact that it is based “mostly on a single, anonymous source identified as only as ‘retired senior intelligence official.’” [Politico](#) (5/11, Ewing, 1.11M) said the “firestorm of criticism” in the wake of Hersh’s report “has been immediate and unforgiving, from the White House to the Pentagon to the CIA.”

A [Christian Science Monitor](#) (5/11, Grier, 539K) analysis also indicated that Hersh “doesn’t seem to have a lot of sources” for his claim, adding that the “initial reaction in the US media to the account was skeptical, despite Hersh’s famed past work,” and the [New York Times](#) (5/12, Rosenberg, Subscription Publication, 12.24M) says Hersh’s article “pairs plausible alternatives to the details about the raid presented by the administration with a number of much more questionable claims,” adding that were it not for Hersh’s byline, “the story would likely have been readily dismissed and gained little attention.”

NBC News: A Year Before Raid, Pakistani Officer Told US Where Bin Laden Was Hiding. Mitchell also reported on [NBC Nightly News](#) (5/11, story 8, 2:25, Holt, 7.86M) that while NBC News “independently learned from two intelligence source that is a Pakistani officer did tell the US where bin Laden was hiding a year before the raid, something the White House disputes,” that “doesn’t necessarily dispute with the White House claim that the US acted alone.”

The New Yorker Declined Hersh Story Years Ago. [Politico](#) (5/11, Byers, 1.11M) reported in its “On Media” blog that The New Yorker, “where Hersh is a regular contributor,” was offered the story but declined it, “years before its publication in the London Review of Books, the On Media blog has confirmed.” According to the blog, the New Yorker declined the story “on the grounds that it didn’t hold up to scrutiny.”

WHITE HOUSE URGES LAWMAKERS TO PASS USA FREEDOM ACT. The [Washington Post](#) (5/12, Nakashima, Debonis, 5.03M) reports that the White House is voicing its support for the USA Freedom Act and is urging lawmakers to pass the bipartisan measure that would “end the National Security Agency’s mass collection of Americans’ phone records.” The Administration’s support for the bill, which “preserves the government’s ability to obtain more limited amounts of records, comes as the House is expected to pass it on Wednesday,” setting up “a showdown in the Senate, where Majority Leader Mitch McConnell (R-Ky.) is backing another bill that would maintain the NSA program of mass collection and renew it through 2020.”

Paul Plans To Filibuster Patriot Act Reauthorization. The [Huffington Post](#) (5/11, Bobic, 194K) reported that Sen. Rand Paul plans to “mount a fight against the reauthorization of the Patriot Act,” telling the New Hampshire Union Leader on Monday, “I’m going to lead the charge in the next couple of weeks as the Patriot Act comes forward. We will be filibustering. We will be trying to stop it. We are not going to let them run over us.” The Post added that it is unclear whether he “plans to vote to block reauthorizing the surveillance law, or whether he intends to mount a traditional ‘talking’ filibuster that would eat up valuable time on the Senate floor.”

The [New York Times](#) (5/12, Peters, Subscription Publication, 12.24M) says Paul “has become the most unabashed and unambiguous opponent of renewing those far-reaching powers of any presidential candidate,” adding that few of his positions “arouse greater suspicion from conservatives,” and “few issues make him stand out so starkly against a field of rivals who are largely in agreement that the intelligence agencies should have broad, unencumbered powers to pursue terrorists.”

Editorial Wrap-Up:

NEW YORK TIMES. “Trade Wars In Congress.” A [New York Times](#) (5/12, Board, Subscription Publication, 12 24M) editorial says that while the two sides in the debate “have major differences, a compromise is still possible and would be good for the American economy.” Lawmakers, it says, have “legitimate concerns” about currency manipulation, and the President and lawmakers “should be able to write amendments to the bill that clearly explain that trade pacts that could undercut financial and oth

SECRETARY JEWELL DELIVERS COMMENCEMENT ADDRESS AT HASKELL INDIAN NATIONS UNIVERSITY. The [Lawrence \(KS\) Journal World](#) (5/8, 38K) reports that Interior Secretary Sally Jewell was the keynote speaker at Haskell Indian Nations University's commencement exercises on Friday. Jewell noted "in her speech that the class of 2015 had representatives from 65 tribes and 40 states." She urged "students to take care of themselves, get outside and find strength and pride in their native heritage."

In an editorial, the [Lawrence \(KS\) Journal World](#) (5/11, 38K) says it hopes "Jewell left Haskell with a favorable impression of the school and new enthusiasm for its unique mission." The paper notes that "it's been a long time since Haskell has gotten the attention it deserves from federal officials, and Jewell's support could go a long way toward promoting the school and securing some much-needed funding." It concludes that "Haskell is just one small part of Jewell's responsibilities, but visiting the campus had to give the secretary a new appreciation for the school, its people, its heritage and its needs."

Additional coverage was provided by [News-TV Lawrence, KS](#) (5/10) and [News-TV Lawrence, KS](#) (5/10).

INTERIOR PROPOSES REGULATIONS TO CLARIFY HAWAIIAN HOMES COMMISSION ACT. The [Honolulu Star-Advertiser](#) (5/10, 353K) reports that "after nearly a century, the U.S. government for the first time is proposing administrative rules to clarify its oversight of the federally created land trust designed to benefit thousands of Native Hawaiians." According to the article, "the proposed regulations will address the process the Department of the Interior uses to evaluate changes sought by the state to the Hawaiian Homes Commission Act, the federal law that established the roughly 200,000-acre trust in 1921." Kris Sarri, the agency's principal deputy assistant secretary for policy, management and budget, said in a statement, "The Department of Interior takes our responsibilities for the Hawaiian Home Lands Trust and its beneficiaries seriously. The trust is vital to the health and strength of the Native Hawaiian community and especially to the beneficiaries who live on the lands or are on the waiting list for a homestead lease."

PRESIDENT OBAMA PLANS NATIONAL MONUMENT DESIGNATION IN NEVADA. The [Environment & Energy Publishing](#) (5/8, Subscription Publication, 705) reports that "President Obama is planning to designate a 700,000-acre national monument in rangelands of east-central Nevada, according to a document obtained by Rep. Crescent Hardy (R-Nev.)." The document was "prepared by the White House and has been circulating among federal agencies the past week, Hardy's spokesman said, according to a report in the Las Vegas Review-Journal."

PETITIONERS URGE SECRETARY JEWELL TO HALT KILLING OF DENALI NATIONAL PARK WOLVES. The [National Parks Traveler](#) (5/10, 989) reports that Interior Secretary Sally Jewell is "being urged by more than 100,000 petitioners to intervene to halt the killings of wolves that wander out of Denali National Park in Alaska." According to the petition drive launched on Care2 by Marybeth Holleran, "trappers and hunters have reduced the wolf population in and around the park and its adjacent preserve from 143 to 48 over the past seven years." The petition asks Jewell to "see that a permanent, no-kill buffer zone is established along the park's boundary."

SECRETARY JEWELL RECOGNIZES RESCUER WITH "CITIZEN'S AWARD FOR BRAVERY." The [Arkansas Democrat Gazette](#) (5/10, 342K) reports that Michael Hogrefe was given the "citizen's award for bravery" by Interior Secretary Sally Jewell at a ceremony Thursday for rescuing a 10-year-old girl and the girl's father from the Buffalo National River last July.

ORGANIZATION SAYS IT CAN HELP WESTERN COMMUNITIES WIN BACK FEDERAL LANDS. The [Los Angeles Times](#) (5/10, Duara, 4 03M) reported on the American Lands Council. The organization's goal is "to wrest control of vast swaths of land from the federal government and turn them over to the states." The organization's "pitch resounds in rural communities that have watched their economic fortunes tumble" and currently "struggle to pay for basic services."

SEA RISE AFFECTS FLORIDA BUT STATE LACKS PLAN, COORDINATION. The [AP](#) (5/10, Dearen, Kay) reports that "St. Augustine is one of many chronically flooded communities along Florida's coast, and officials in these diverse places share a concern" that they will be "inundated by rising seas in just a couple of decades" even as the state has "yet to offer a clear plan or coordination to address... a slow-moving emergency." Gov. Rick Scott "is skeptical of man-made climate change and has put aside the task of preparing for sea level rise," according to an AP review, "Scott's administration has organized just a few conference calls." The AP reports that "Scott administration officials are moving forward on a five-year plan that will provide basic guidance to cities dealing with sea level rise."

APP MAKES FINDING CAMPING SITES EASY. The [Washington Post](#) (5/8, Tsukayama, 5.03M) spotlights "the government's free app for finding open spots — a project of several agencies including the National Park Service and the Army Corps of Engineers." As "a good tool for finding places to book," the app is "worth a quick download."

ADDITIONAL COVERAGE OF SAGEBRUSH HABITAT PROJECTS. Additional coverage of the \$4 million in projects to "stem the loss of sagebrush habitat" was provided by the [Summit County \(CO\) Citizens Voice](#) (5/9, 506).

ATTACKS ON PUBLIC LANDS CRITICIZED. For the "Congress" blog of [The Hill](#) (5/10, O'Mara, 533K), Collin O'Mara, president and CEO of the National Wildlife Federation, criticizes the "growing assault on our nation's public lands is under way at the state and federal levels." O'Mara argues that "states don't have the resources to suddenly start managing tens of millions of acres of land," and he warns that "the losses would reverberate throughout the U.S. economy." O'Mara concludes that "our public lands belong to all

Americans, no matter where they are.”

America’s Great Outdoors:

National Park Service:

FLYOVER OVER NATIONAL MALL HIGHLIGHTS V-E DAY CELEBRATION. [USA Today](#) (5/8, Brown, Jansen, 5.01M) reports that “when 56 planes flew over the National Mall Friday, they were in some of the most secure and restricted airspace in the world.” The article notes that “it’s unique enough that those planes are fighters and bombers from WWII, but they are also flying a path that’s been severely restricted since the terrorist hijackings on Sept. 11, 2001.” According to the article, “Pete Bunce, CEO of the General Aviation Manufacturers Association, which helped organize the event, spent a year coordinating plans with the Federal Aviation Administration, Secret Service, Transportation Security Administration and National Park Service to fly the vintage planes into the heavily controlled airspace over Washington.”

Additional coverage of the event was provided by [USA Today](#) (5/8, Bello, Today, 5.01M) and the [Baltimore \(MD\) Sun](#) (5/8, 802K).

OLD SWEDES CHURCH TO BECOME PART OF DELAWARE’S NEW NATIONAL PARK. The [AP](#) (5/11, Press, 5 03M) reports that “a historic Wilmington church is officially becoming part of Delaware’s new National Historical Park.” Sen. Tom Carper “planned to join the Rev. Patricia Downing on Monday for the signing of a cooperative easement agreement adding Old Swedes Church to the park.”

JACKSONVILLE MOVES FORWARD WITH URBAN AGENDA PROGRAM. The [Jacksonville \(FL\) Daily Record](#) (5/10, 346) reports that “Jacksonville is one of 10 cities — and the only one in the Southeast — selected as a ‘model city’ for the Urban Agenda program. Former Rocky Mountain National Park Backcountry Ranger Nathan Souder will be “moving to Jacksonville in June to begin his tour of duty with the Urban Agenda.”

NPS RANGERS HONORED FOR RESCUE IN TENNESSEE. The [AP](#) Nashville, TN (5/11, 68K) reports that three NPS “rangers in Tennessee have been recognized for rescuing a man stranded in Big South Fork River.” According to the article, “receiving the Valor Award from Interior Secretary Sally Jewell were rangers Thomas A. Hall, Brett F. Painter and Matt L. Hudson.” They were recognized recently at the Department of Interior’s awards convocation ceremony in Washington, D.C.

FISHING VESSEL RUNS AGROUND IN KATMAI NATIONAL PARK. The [AP](#) (5/10, 2.29M) reports that the NPS says “a fishing vessel abandoned after a fire last month has run aground at Katmai National Park.” The agency said Saturday that “the Northern Pride was found between Cape Chiniak and Kaguyak Point along the Shelikof Strait.” The article notes that “the vessel has released an oil-like sheen” and the NPS says “the sheen is unrecoverable.”

WYOMING PAYS MONTANA TO SCHOOL YELLOWSTONE STUDENTS. The [AP](#) (5/10, 2.29M) reports that “the state of Wyoming has paid a Montana school district more than \$438,000 to educate nearly three dozen students who live on the Wyoming side of the border in Yellowstone National Park.” The payment was made in April to Gardiner Public Schools. The article notes that “Wyoming was forced to cover the costs of Mammoth Hot Springs students’ education in Gardiner after the federal government abruptly announced last year that it could no longer foot the bill for the Yellowstone students, as it had for decades.”

BLACK BEARS CHASE TOURISTS IN YELLOWSTONE NATIONAL PARK. [ABC News](#) (5/10, 3.69M) reports that a black bear and her three cubs chased tourists at Yellowstone National Park. According to the article, “in a video released by Montana Fish Wildlife and Parks, sightseers run as the mother bear, seemingly equally terrified and confused, charges one family as they scramble to get to their car.” The article notes that “no one was attacked or injured, but experts say the run-in is a perfect example of the dangers in Yellowstone National Park.”

YELLOWSTONE RECEIVES FUNDING FOR TWO PROJECTS. The [Casper \(WY\) Star-Tribune](#) (5/11, 99K) reports that Yellowstone National Park has “received \$1 million from the National Park Service Centennial Challenge to help fund upgrades to its Gardiner gateway as well as for native cutthroat trout revitalization.” The article notes that “a total of \$500,000 in Centennial Challenge funds will go to the Gardiner Gateway Project to be added to nearly \$16 million already allocated to the project through the Yellowstone Park Foundation, local partners and additional federal and state funding sources.” Also, “the second project funded in Yellowstone will help preserve the native Yellowstone cutthroat trout and return the natural function of the ecosystem.” The article notes that “the appropriation of \$500,000 will be added to the \$1 million Yellowstone Park Foundation annual commitment to the fish restoration project.”

JOSHUA TREE NATIONAL PARK SEEING MORE VANDALISM IN RECENT YEARS. The [Contra Costa \(CA\) Times](#) (5/11, Steinberg, 279K) reports that Joshua Tree National Park has seen an increase in instances of graffiti recently. David Smith, Joshua Tree National Park’s superintendent, said, “Traditional values may not be held by some of the people coming to National Parks. They may not have grown up visiting natural places. The rules inside a park are different than the rules inside a city or a town.” Smith added that the problem “comes from a diverse group of graffiti vandals.” While, “some are undoubtedly teenagers...a new breed has surfaced recently — people who consider themselves great artists.”

NPS PLANS MEETINGS ON VALLES CALDERA TAKEOVER. The [Santa Fe New Mexican](#) (5/10, 49K) reports that “three public listening sessions will be held next week in Northern New Mexico as the National Park Service takes over management of the 89,000-acre Valles Caldera National Preserve.” The meetings will be held Monday through Wednesday in Albuquerque, Jemez Springs and Los Alamos.

GRAND CANYON TO CELEBRATE RENOVATION OF HISTORIC PHOTO STUDIO. The [AP](#) (5/11, 2.29M) reports that “the historic Kolb Studio at the Grand Canyon’s South Rim will look like new again this week.” The completion of “a two-year renovation of the iconic, cedar-shingled property” will be celebrated Saturday. The Grand Canyon Association, “which operates Kolb Studio, estimates that more than \$400,000 of restoration work was done.”

CRATER LAKE NATIONAL PARK PLANS FOR BUSY 2015 SEASON. The [Bradenton \(FL\) Herald](#) (5/9, 127K) reports that “major road and parking lot improvements, a possible Sister City agreement with China, the Crater Lake Lodge’s 100th anniversary, the National Park Service’s 2016 Centennial, expanded vehicle-free days and creation of a possible Crater Lake symphony are among many projects at a busy Crater Lake National Park slated for this season.” Park superintendent Craig Ackerman said, “We’re expecting record numbers of visitors this year.”

NPS PREPARES ASSESSMENT TO BUILD NEW WALKING TRAIL AT JOSHUA TREE NATIONAL PARK. The [San Bernardino \(CA\) Sun](#) (5/8, 120K) reports that “an environmental assessment is being prepared by the National Park Service as officials consider the construction of a new walking trail at Skull Rock in the Joshua Tree National Park.” Park officials have “designed an expanded trail promising to enhance the recreational, educational and interpretative opportunities at Skull Rock.”

NPS PREPARING STUDY ON GLACIER NATIONAL PARK ROAD PLAN. The [AP](#) (5/10, 205K) reports that the NPS is “preparing a draft environmental study of how to handle increasing traffic along Glacier National Park’s Going-to-the-Sun Road.”

STUDENTS TO PARTICIPATE IN OBED WILD AND SCENIC RIVER’S “NATIONAL PARK IN YOUR BACKYARD” PROGRAM. The [Knoxville \(TN\) News Sentinel](#) (5/10, 332K) reports that Obed Wild and Scenic River’s “National Park in Your Backyard” program will be held May 18. According to the article, “students will spend the day with National Park Service rangers learning various aspects of rock-climbing and paddling.”

OBED WILD AND SCENIC RIVER NATIONAL PARK HOLDING PHOTOGRAPHY CONTEST. The [Knoxville \(TN\) News Sentinel](#) (5/10, 332K) reports that “the Obed Wild and Scenic River national park is accepting submissions for its fourth annual photography contest through July 21.”

ADDITIONAL COVERAGE OF REPORT ON ECONOMIC IMPACT OF NPS SITES. Additional coverage of the report on the economic impact of NPS sites was provided by [Newsday](#) (5/10, 1.46M).

Bureau of Land Management:

SENATORS PROPOSE TWO WILDERNESS AREAS INSIDE RÍO GRANDE DEL NORTE NATIONAL MONUMENT . The [Albuquerque \(NM\) Journal](#) (5/10, 241K) reports that Sens. Martin Heinrich and Tom Udall “last week proposed two wilderness areas within the Río Grande del Norte National Monument northwest of Taos.” According to the article, “the two proposed wilderness areas – dubbed the Cerro del Yuta Wilderness and Río San Antonio Wilderness – would comprise 21,420 acres within the 242,500-acre national monument, which President Obama designated two years ago.” Supporters of “such preservation contend it entices tourists and their money, and creates jobs in the recreation industry,” but opponents “argue that such employment creation claims are dubious and that locking up lands to development actually costs potential jobs.”

ADVOCACY GROUPS DIFFER ON BLM’S PLAN TO HELP CONTROL WILD HORSE POPULATION. The [AP](#) (5/10, 2.29M) reports that the BLM’s “plan to inject 50 wild horses in western Utah with contraception drugs to help control the population is being applauded by one wild horse advocacy group but derided by another.” The American Wild Horse Preservation Campaign “supports the plan, saying it is a more humane method than taking horses off their ranges.” However, “the group Protect Mustangs says the anti-fertility drug can lead to sterilization and wreak havoc on natural selection.”

BLM, BOR TO SIGN OFF ON HOWARD PRAIRIE WORK. The [Medford \(OR\) Mail Tribune](#) (5/11, Tribune, 64K) reports that “two federal agencies are expected to sign off on a plan to remove the nearly 100 blown-down trees as well as damaged ones still standing from” Howard Prairie Resort’s South Campground, “as well as from nearby Willow Point Campground, also shuttered by damage from the same storm.” The BLM, “which owns the trees, has been negotiating a nearly \$100,000 agreement for its sister agency,” the BOR, “to pay for the removal of the trees and many of their upended root balls and buy the wood from the BLM.” BOR “officials, in turn, plan to use some of that wood and root balls to build complex wild salmon habitat in Little Butte and Bear creeks as required by a different federal agreement for helping in-stream habitat.”

BLM REMAINS CONCERNED ABOUT ROSEMONT MINE. The [Tucson](#) (5/10, 72K) reports that “a top U.S. Bureau of Land Management official in Arizona said at a 2013 press conference that ‘a lot of progress’ was being made to address the agency’s concerns about the proposed Rosemont Mine.” However, “at the same time, memos obtained by the Arizona Daily Star show, his staff wrote a half-dozen memos and emails raising serious concerns about potential environmental damage from the mine.” In a recent interview, Tim Shannon, “head of the BLM district that includes the Rosemont site, declined to discuss the disparity between his comments and the staff memos, penned in late 2013 and early 2014.” But the article notes that “detailed comments written last month show that the bureau remains concerned about the mine’s impacts on Las Cienegas conservation area and what it sees as the U.S. Forest Service’s failure to properly acknowledge them in its various environmental reports.”

FINDINGS AT NATIVE AMERICAN ARCHAEOLOGICAL SITE IN MONTANA TO GUIDE MANAGEMENT OF LOCATION. The [AP](#) (5/10, Puckett, 2.29M) reports that “cutting-edge archaeological work that included use of a drone and prescribed fire has unearthed previously unknown information about a one-of-a-kind Native American archaeological site in northeastern Montana dating back thousands of years.” According to Josh Chase, a BLM archaeologist, “among the new findings at the prehistoric site are rock alignments that probably had religious meaning to Native Americans.” Chase said that “the findings will help the agency better study and manage the unique location.”

VOLUNTEERS HELP CLEAN UP TRASH AT SNAKE RIVER CANYON. The [Twin Falls \(ID\) Times-News](#) (5/10, 75K) reports that “more than 60 volunteers spent hours Saturday picking up broken pieces of concrete, tree trimmings and shotgun shells.” They “spent the day picking up trash on the Snake River Canyon’s north rim in Jerome County.” The article notes that “it was the 16th annual cleanup day, organized by the Bureau of Land Management’s Twin Falls district office, Southern Idaho Off-Road Association, Backcountry Horsemen of Idaho, Magic Valley ATV Club and Jerome County.”

BLM URGED TO HOLD OFF ON COMPLETING RESOURCE PLAN. The [Grand Junction \(CO\) Daily Sentinel](#) (5/10, 73K) editorializes that “Mesa County’s request that the Bureau of Land Management hold off for six months before completing the travel-management portion of its proposed resource management plan for the Grand Junction field office may be ‘unprecedented,’ but it’s not inappropriate given the raging national debate about control of public lands.” According to the editorial, “since the BLM deferred route-by-route decisions in the North Fruita Desert and DeBeque areas upon input from cooperators, it doesn’t seem unreasonable for the county to be granted time to understand the new classification system that undergirds the BLM’s route selection process.” The paper also notes that “the state clearly sees the value in minimizing conflicts between local governments and federal land managers and is offering technical assistance to smooth the way.”

CONSERVATION GROUPS HELPED TO PROTECT COAST DAIRIES. In an op-ed for the [Santa Cruz \(CA\) Sentinel](#) (5/9, 100K), Andy Schiffrin writes that while “livestock people couldn’t afford to purchase the ranch, it’s important to remember that the conservation organizations got involved to prevent the parcelization of Coast Dairies and its conversion into a large and inappropriate number of housing units.”

Fish and Wildlife Service:

FWS DIRECTOR ASHE WYOMING PLAN BY ITSELF WON’T KEEP GROUSE OFF LIST. The [AP](#) (5/8, Gruver, 2.29M) reports that “Wyoming has made key sacrifices as it develops a conservation strategy for the greater sage grouse, but it won’t be enough to keep the birds off the federal endangered species list,” FWS Director Dan Ashe told a U.S. Senate committee on Wednesday. Ashe “urged broader cooperation on conservation measures by several states and federal agencies.” However, “he cautioned that even those measures might not stop ongoing litigation aimed at listing the sage grouse under the Endangered Species Act.”

Coverage was also provided by the [Denver \(CO\) Post](#) (5/10, Press, 894K), the [Lewiston \(D\) Tribune](#) (5/10, 44K), and [KOTA-TV Rapid City \(SD\)](#) Rapid City, SD (5/10, 757).

Additional coverage of the sage grouse was provided by the [Salt Lake \(UT\) Tribune](#) (5/10, 470K).

PETA SUES FWS OVER LOOPHOLE IN ENDANGERED SPECIES ACT. The [AP](#) (5/8, Barakat, 2.29M) reports that “an animal-rights group sued the U.S. Fish and Wildlife Service on Friday to stop a policy it says allows trophy hunters, circus acts and others dealing with threatened species to skirt the Endangered Species Act by making token donations to conservation groups.” The lawsuit, filed by People for the Ethical Treatment of Animals, claims that the FWS is “sanctioning a massive loophole in the Endangered Species Act.” The law “allows exceptions in the import or export of endangered species when granting a permit aids the species’ survival” and “PETA says the agency is granting exceptions for applicants making donations as small as \$500 to conservation groups.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (5/8, Matthew Barakat |, Ap, 5.03M), the [Hampton Roads \(VA\) Virginian-Pilot](#) (5/10, 405K), the [Daily Mail \(UK\)](#) (5/10, 5.37M), and the [WCAV-TV Charlottesville \(VA\)](#) Charlottesville, VA (5/10, 1K).

CONSERVATION CENTER HELPING EFFORT TO REPOPULATE ENDANGERED WOLVES. The [AP](#) (5/10, Suhr, 2.29M) reports that “a secluded Missouri conservation center heralded for helping repopulate the wild with endangered wolves is tending to its latest puppy season.” Maggie Dwire, the assistant Mexican gray wolf recovery coordinator for the FWS, said, “To take something so close to extinction, breed several generations in captivity and establish a wild population, that’s huge. We’ve been incredibly successful, but we still have a really long way to go.”

NATIVE AMERICAN TRIBES OPPOSE REMOVING PROTECTIONS FOR YELLOWSTONE-AREA GRIZZLIES. [Reuters](#) (5/9) reports that Native American tribes said on Friday they oppose the federal government plans to remove protections for grizzly bears in the Yellowstone National Park area. Tribal members of the Yellowstone Ecosystem Subcommittee have joined with other Indian Nations to demand discussions with the FWS before it officially proposes removing bears in the area from the federal list of endangered and threatened species.

NEW MEXICO DENIES TED TURNER RANCH NEW WOLF PERMIT. The [Albuquerque \(NM\) Journal](#) (5/10, 241K) reports that “New Mexico’s Game and Fish Commission has denied for the first time a permit that had been in place for 17 years that allowed Ted Turner’s Ladder Ranch in the Gila mountains to aid the federal Mexican wolf recovery program.” The commission rejected “Turner’s permit renewal request on Thursday, a decision that surprised the Turner team and is being viewed by some as a move by the governor-appointed commission to curb reintroduction of the endangered Mexican gray wolf in New Mexico.” The FWS, “which manages the wolf reintroduction program, said in a statement that the Turner ranch has been ‘an excellent partner in the recovery of Mexican wolves’ and said it is ‘disappointed’ in the commission’s decision.”

FWS HOLDS GRAND OPENING OF THE WHITE-TAIL TRAIL AND THE WHITE-TAIL SLOUGH. The [Daily Astorian \(OR\)](#) (5/10, 23K) reports that the FWS is “holding a grand opening celebration of the White-tail Trail and White-tail Slough at Julia Butler Hansen Refuge for the Columbian White-tailed Deer from 9 a.m. to 1:30 p.m. Saturday.” Project Leader Jackie Ferrier said, “The Refuge’s White-tail Trail and White-tail Slough provide rich opportunities for wildlife observation, photography and simply enjoying the great outdoors.”

CULVERT TO BE BUILT BETWEEN WRECK POND AND OCEAN. The [AP](#) (5/10, Parry) reports that “an environmental group and several government agencies will build a \$4 million concrete culvert this fall” between Wreck Pond and “the ocean to make it easier for fish, including herring, to reach the sea.” According to the article, “the project led by the American Littoral Society also should improve water quality, reduce flood damage and lessen a frequent source of beach closures when bacteria from the pond overflows after heavy rainfalls.” The article notes that “the work is being paid for by a post-Superstorm Sandy grant from the U.S. Fish and Wildlife Service.”

STUDENTS CREATE MURAL TO HELP ENDANGERED MONK SEAL. The [AP](#) (5/11, Moseley, 2.29M) reports that “five enthusiastic students at Kahakai Elementary School stood in front of a large mural where hand-painted pictures of monk seals shined on a 4-foot-by-8-foot canvass behind them.” According to the article, “the young scholars spent more than two months crafting the drawings of the endangered species and joyfully expressed their knowledge and pride of the animal and a mural that has taken on a life of its own.” The piece “recently left the school to go to the Mokupapapa Discovery Center in Hilo,” and “when the Ke Kai Ola Hawaiian Monk Seal Visitor Center is completed, the artwork will travel there.”

REWARD OFFERED FOR INFORMATION ABOUT SLAIN FLORIDA PANTHER. The [AP](#) (5/10, 2.29M) reports that “the Humane Society of the United States, the Center for Biological Diversity and Humane Society Wildlife Land Trust are offering a \$10,000 reward for information leading to an arrest and conviction of whoever shot an endangered Florida Panther.” The article notes that “the pledge, along with a \$5,000 reward offered by the Florida Fish and Wildlife Conservation Commission and the U.S. Fish and Wildlife Service, pushes to \$15,000 the total reward being offered.”

ADDITIONAL COVERAGE FWS DISTRIBUTING \$1.1 BILLION GENERATED FROM OUTDOORS INDUSTRY. Additional coverage that the FWS “recently announced it’s set to distribute \$1.1 billion in revenues generated by the hunting and angling industries through voluntary taxes paid on hunting and fishing gear, to state and territorial wildlife services across the nation” was provided by the [AP](#) (5/11, 75K), the [New Bedford \(MA\) Standard-Times](#) (5/10, Season, 59K), and the [Columbus \(OH\) Dispatch](#) (5/10, 565K).

ADDITIONAL COVERAGE ENDANGERED FERRETS TO BE RELEASED AT ROCKY MOUNTAIN ARSENAL NATIONAL WILDLIFE REFUGE. Additional coverage that black-footed ferrets will be released at Rocky Mountain Arsenal National Wildlife Refuge was provided by the [AP](#) (5/10, 2.29M) and the [National Geographic](#) (5/10, 32.75M).

FWS' SOUTHWEST REGION TO FOCUS ON "EMPHASIS AREAS". In a piece for [Government Executive](#) (5/10, 2K), Benjamin Tuggle, regional director of the FWS' Southwest Region, writes about the challenges in steering "conservation of myriad species in a multitude of ecosystems." According to Tuggle, "through careful consideration by the regional leadership team representing every facet of the mission, the Southwest Region will concentrate conservation on geographies where it can most effectively achieve the greatest return on investment of limited resources."

Securing America's Energy Future:

Onshore Energy Development:

ANTHER SERIES OF CLUSTER EARTHQUAKES RATTLE DALLAS. On Thursday, a "series of cluster earthquakes rattled the Dallas area," prompting experts to intensify their "subterranean quest to find out how parts of Texas have become 'earthquake country,'" the [Christian Science Monitor](#) (5/9, Jonsson, 539K) reports. The Texas Railroad Commission "has reserved judgment about whether the wastewater from fracking is the real culprit." However, on Friday, officials "dispatched a team of inspectors to check the wastewater wells for damage."

Fracking 'Likely' Behind Texas Quakes, Report Says. [CNN](#) (5/9, Lett, Morris, 3.17M) reported, "Since 2008, the northern region of Texas experienced four swarms of earthquakes, more than 130 temblors in all." Most are reportedly in the Dallas metro area with a dramatic increase seen in 2015. "There were 25 small quakes in January alone," the article reports, adding, "most are small, but for an area that the USGS says had only one recorded earthquake in the 58 years before 2008, the uptick has many in the community concerned." Susan Hough, a seismologist at the USGS and the California Institute of Technology, says the pattern "fits the mold of induced quakes." An SMU study report says the seismic activity is likely linked to the disposal of fracking wastewater. Head researcher Heather DeShon of SMU wrote in the report, "While some uncertainties remain, it is unlikely that natural increases to tectonic stresses led to these events."

Kemp: Man-made Earthquake Analyzed. John Kemp reported for [Reuters](#) (5/9, Kemp) on the link between fracking wastewater injection wells and seismic activity in Oklahoma and other parts of the US where some 57 million barrels were disposed of each day in 2007. Kemp gives a historic overview of man-made earthquakes from the 1960s and how those were due to chemical weapons contaminated water. He writes that most tremors of low magnitude constitute little risk to infrastructure and humans, adding that the stronger, more destructive man-made quakes are attributed to other elements such as dam projects. Kemp writes that fracking wastewater is unlikely to cause larger seismic activity, unless it the fluid is injected in areas laden with faults. He explains however that carbon capture and storage, which is essential for the continued development of fossil fuels, may pose a much larger earthquake risk than wastewater injection.

THINK TANK WARNS ABOUT LOOPHOLE IN PROPOSED ROYALTIES RULE. [Inside Climate News](#) (5/10) reports that "recently proposed federal rules on mining royalties, intended to close loopholes that subsidize exports of coal mined from public lands, may instead end up giving away the coal to the industry for free, according to an environmentalist think tank." Public comments by Tom Sanzillo of the Institute for Energy Economics and Financial Analysis, an environmental advocacy group, "described how the proposal could reduce royalties to zero." According to the article, "as long as coal prices remain so low, the deductions allowed by the proposal would make export sales worthless on paper, and the royalties would vanish like disappearing red ink."

Additional coverage was provided by the [Lexington \(KY\) Herald-Leader](#) (5/10, 268K) and the [Lodi \(CA\) News-Sentinel](#) (5/10, 32K).

OSM RAISES CONCERNS ABOUT WEST VIRGINIA'S COAL CLEANUP LIABILITIES. The [Charleston \(WV\) Gazette](#) (5/10, 31K) reports that "federal coal-mine regulators are increasingly concerned about growing pollution cleanup liabilities across West Virginia's coalfields, given the 'precarious financial situation that many of the state's coal companies find themselves in today.'" The OSM "outlined its worries in a letter late last month to Randy Huffman, secretary of the West Virginia Department of Environmental Protection." Roger Calhoun, director of the OSM's Charleston field office, "urged Huffman to consider the concerns and to refer them to a DEP advisory panel that monitors the state's reclamation fund when it conducts this year's annual study of whether that fund has enough money to clean up mine sites that could be abandoned if mine companies go belly up."

BLM SEEKS PUBLIC COMMENT ON POTENTIAL OIL, GAS LEASING IN NEVADA. The [AP](#) (5/11, 2.29M) reports that the BLM is "seeking public comment on issues concerning public land being eyed for potential oil and gas leasing in eastern Nevada." The bureau's Ely District is "analyzing 94 parcels of public land covering 140,389 acres to identify potential impacts in an environmental assessment."

ADDITIONAL COVERAGE OF GAO REPORT ON NATURAL GAS FLARING. Additional coverage of the GAO report on natural gas flaring was provided by [Think Progress](#) (5/8, 435K).

ADDITIONAL COVERAGE MOUNTAIN TOWN WANT COAL COMPANIES TO PAY ROYALTIES. Additional coverage that mountain town "signed a letter to U.S. Interior Secretary Sally Jewell calling for the federal government to require coal companies to pay royalties on the true market price of coal mined on public land" was provided by the [Aspen \(CO\) Times](#) (5/10, 1K) and the [Telluride \(CO\) Daily Planet](#) (5/8, 11K).

WTIMES OP-ED HAILS SHALE BOOM, TOUTS END OF GREEN ENERGY. In an op-ed for the [Washington Times](#) (5/10, Moore, 641K), Heritage Foundation fellow Stephen Moore discusses how the growth of shale gas and oil in the US "crushed green energy," going so far as to say that the movement "is dead." Moore praises the success of the oil and gas industry for helping to lower gas prices, and criticizes green energy supporters for backing technology which "can't possibly compete" with a resurgent fossil fuel industry.

Offshore Energy Development:

SHELL'S ARCTIC VESSEL TO DOCK IN EVERETT FIRST. The [AP](#) (5/8) reports, "The Noble Discoverer, the drillship that's part of Royal Dutch Shell's Arctic drilling fleet, will arrive in Everett next week," according to the Port of Everett. The ship will later head to Seattle where Mayor Ed Murray has required the Port of Seattle to obtain a new permit to host the fleet. "Shell spokesman Curtis Smith said the company is closely watching 'the actions of all interested parties' and is considering its options," the article reports. Kayaktivists are still planning to oppose Shell's use of Terminal 5.

Judge: Protesters Must Stay Away From Shell's Arctic Ships. The [AP](#) (5/11) reported that US District Judge Sharon Gleason ordered Greenpeace activists on Friday to avoid drilling ships owned by Royal Dutch Shell, and also prohibited the organization from operating drones in Shell's planned drilling area in the Arctic. Citing a report from the Alaska Dispatch News, the AP said the "safety-zone injunction is in effect until Oct. 31," and implements "buffer zones" of various sizes around the company's fleet.

Federal Government Urged To Block Shell's Arctic Drilling Plans. In an op-ed for the [Alaska Dispatch News](#) (5/8, 216K), Lois Epstein, the Arctic program director for The Wilderness Society, writes that "despite Royal Dutch Shell's disastrous performance during its 2012 Arctic Ocean drilling season, the federal government is on track to approve the company's exploratory drilling plan for the Arctic Ocean in 2015." Epstein acknowledges that "the pressure on the federal government – both the Department of the Interior and the US Coast Guard – to approve drilling this summer is enormous," but argues that "the federal government needs to say no."

Additional coverage of Shell's plans was provided by the [Maritime Executive](#) (5/11, 21).

OUTER CONTINENTAL SHELF GOVERNORS COALITION PUSHED FOR OFFSHORE OIL TESTING, DRILLING. The [Charleston \(SC\) Post and Courier](#) (5/10, 305K) reports that a coalition of governors "worked behind the scenes, largely in private, with industry lobbyists to open the Southeast coast to oil and natural gas testing and drilling," according to an Institute for Southern Studies investigation. The Outer Continental Shelf Governors Coalition was "founded in 2011 in the wake of the Deep Horizon oil spill disaster in the Gulf of Mexico to push for offshore drilling leases, shortly before the Obama administration publicly began considering the move off the Atlantic states."

BLUFFTON MAYOR DOESN'T EXPECT VOTE ON OFFSHORE DRILLING RESOLUTION. The [Bluffton \(SC\) Today](#) (5/10, 48K) reports that "as of last week, nearly two dozen communities in the Carolinas had gone on record against seismic testing and drilling for oil off the states' coasts, with the city of Columbia becoming the first inland municipality to formally oppose the practice." However, "though several Bluffton officials support those municipalities, there are no current plans for Town Council to vote on a formal resolution against offshore drilling and seismic testing, Mayor Lisa Sulka said last week."

JUDGE RULES BP CAN APPEAL SOME DAMAGES CLAIMS FROM GULF SPILL. [Reuters](#) (5/9) reported that a Federal appeals court on Friday ruled that BP should be allowed to appeal some of the damage claims linked to the 2010 spill in the Gulf of Mexico, which could help the company limit the planned \$7.8 billion it pays out to those affected by the spill. In the court's decision, Judge Fortunato Benavides said BP deserved to appeal the claims because it had not waived its right to do so.

Medical Claims From Spill Top 37,500. The [New Orleans Times-Picayune](#) (5/11, Larino, 733K) reported Friday that Matt Garretson, the claims administrator for medical

payments related to the BP oil spill, said in a court filing last week that over 25,000 new claims have been filed this year, bringing the total to 37,594. According to the Times-Picayune, Garretson requested extended deadlines for the newer claims, and warned that the increase could exacerbate the wait time for payments.

ADDITIONAL COVERAGE BSEE DIRECTOR SALERNO MAKES SAFETY ANNOUNCEMENT AT OFFSHORE TECHNOLOGY CONFERENCE. Additional coverage that BSEE Director Brian Salerno "made two announcements during a press conference in Houston Tuesday at the Offshore Technology Conference" was provided by the [Marine Link](#) (5/9, 1K) and the [Maritime Executive](#) (5/11, 21).

Tackling America's Water Challenges:

REP. THOMPSON TO REINTRODUCE LEGISLATION TO CHANGE FEDERAL OVERSIGHT OF LAKE BERRYESSA. The [Napa Valley \(CA\) Register](#) (5/11, 45K) reports that Rep. Mike Thompson will "try again to switch federal agencies in charge of managing Lake Berryessa, and again he will have the support of Napa County." Thompson wants the BLM, not the BOR, "to manage recreation at the eastern Napa County reservoir." He plans to reintroduce legislation in Congress to make the change.

BOR LOOKING INTO ELECTRIFICATION OF CHANDLER PUMP STATION. The [Tri-City Herald \(WA\)](#) (5/10, 100K) reports that "the Yakima Basin drought may be the catalyst needed to move forward a project that would give Kennewick Irrigation District customers a more reliable source of water and keep more water in a critical stretch of the river during a drought." The BOR has "agreed to take another look at the electrification of the Chandler pump station, which the bureau owns and operates."

PROTESTORS TO PICKET AT SHASTA DAM OVER WATER RELEASES. The [Redding \(CA\) Record-Searchlight](#) (5/10, 81K) reports that "a group of Shasta County residents peeved at Bureau of Reclamation plans to release billions of gallons of water down Clear Creek to help migrating salmon this summer will picket at Shasta Dam on Monday, even if the protest is unlikely to stub the water flows."

FEDERAL GOVERNMENT URGED TO HELP WITH CALIFORNIA DROUGHT. In an op-ed for the [San Jose \(CA\) Mercury News](#) (5/10, 762K), Grace F. Napolitano, Daniel P. Beard and David Wegner write that "the Obama administration and Interior Department officials have been absent as Californians grapple with the drought." According to the authors, "they seem content to plan and promote surface-water projects that won't contribute a drop of water for 20 to 25 years and will cost taxpayers billions of dollars." The authors conclude that "it is time for federal officials to stop wringing their hands about the drought and instead provide some leadership to address the immediate water needs of California communities."

WESTERN STATES CLOSELY MONITORING CALIFORNIA DELTA DEBATE. In an op-ed for the [Las Vegas Sun](#) (5/10, 176K), Patricia Mulroy, a senior fellow of the Brookings Institution at the William S. Boyd School of Law at UNLV, writes that "what happens to the Sacramento-San Joaquin Delta matters in Las Vegas, Phoenix, Salt Lake City and Denver." She notes that "the Brown administration has revised the ongoing Bay Delta Conservation Plan process by staging habitat improvements over time, as opposed to a 50-year strategy as first contemplated." Mulroy concludes that "as the rest of the West closely watches California, the hope is for the state to be a beacon of water hope for the world through compromise and forward progress and not a tragic, lost opportunity."

Empowering Native American Communities:

INTERIOR SENDS LAND BUY-BACK OFFERS TO 6,500 AT CHEYENNE RIVER INDIAN RESERVATION. The [Sioux City \(IA\) Journal](#) (5/10, 149K) reports that "the federal government says it has sent offers to more than 6,500 landowners who own parcels on the Cheyenne River Indian Reservation as part its effort to help tribal governments consolidate land." According to Interior Department Deputy Secretary Michael Connor, "almost \$150 million in purchase offers have been sent to landowners with fractional interests on the reservation."

Additional coverage was provided by the [Nation Sun News](#) (5/7).

AMERICAN INDIAN GRADUATE CENTER ACCEPTING COBELL SCHOLARSHIP APPLICATIONS. The [Cherokee \(OK\) Phoenix](#) (5/10, 442) reports that "on April 20, the American Indian Graduate Center announced that it is now accepting Cobell Scholarship applications through June 1 for the fall term." AIGC Director Sam Deloria said, "We at AIGC are eager to fund applicants for the Cobell Scholars Program beginning with the fall 2015 term. The provisions of a scholarship program in conjunction with the Cobell Settlement was an inspired idea and we are pleased to have been selected to administer the program."

NEW MONEY ENTERING INDIAN COUNTRY. [Yahoo! Finance](#) (5/1, 5.69M) reports that "a range of programs and lawsuit settlements have resulted in new money coming into Indian Country." The article notes that "over the past five years, Indian Country lawsuit settlements totaling more than \$3 billion have been reached."

Additional coverage was provided by [Transforming Network Infrastructure](#) (4/30).

BIA RELEASES FINAL RULES REGARDING OSAGE MINERALS ESTATE DEVELOPMENT. The [Tulsa \(OK\) World](#) (5/11, 456K) reports that the BIA "on Monday released their final rules that revise government regulations relating to development of the Osage Nation's minerals estate." BIA Director Michael Black said "on Friday that the release comes nearly three years after a \$380 million Osage tribal trust settlement resolved litigation alleging the U.S. mismanaged the tribe's minerals."

LITTLE ROCK PORT AUTHORITY BOARD PASSES LAND-USE RESOLUTION. The [AP](#) (5/8, Lauer, 2 29M) reports that "the Little Rock Port Authority Board of Directors passed a resolution Friday encouraging appropriate land use and development on property beside its industrial park facilities." The article notes that "the board's unanimous vote in a special meeting comes as the deadline for public comment approaches on the Quapaw Tribe's federal application to place 160 acres of land adjacent to the Little Rock Port Industrial Park into federal trust." The trust application before the BIA "asks to remove the property from local jurisdiction and make it American Indian land, which would create a sovereign status for the owners."

YAKAMA NATION'S LAND PETITION CONTESTED. The [Dalles \(OR\) Chronicle](#) (5/9, 14K) reports that "the Yakama Nation has quietly issued a petition to the federal government to retrocede some 99,000 acres of northwestern Klickitat County, including the town of Glenwood, to within its reservation boundaries." Now, "the county and area residents are fighting back, holding meetings, gathering concerned comments from state and federal authorities, and sending a commissioner to Washington, D.C., to meet with officials in an effort to bring this struggle of more than a century to a final resolution."

OP-ED INTERIOR FAILING TO MONITOR MINERAL ISSUES. In a piece for the [Indian Country Today Media Network](#) (5/10, 28K), attorney Roger Birdbear writes that "the federal government favoring industry at the cost of the mineral owner." In the second part published at the [Indian Country Today Media Network](#) (5/10, 28K), Birdbear argues that "monitoring these issues is the responsibility of the Department of the Interior and the Bureau of Indian Affairs and falls under their trust responsibility." He concludes that "their inability to prevent these deductions, and even their allowance of them, means that a suit can be brought against the federal government for failing in their duties."

MINNESOTA URGED TO INVEST IN NEGLECTED INDIAN SCHOOLS. The [Minneapolis Star Tribune](#) (5/10, 1.29M) editorializes that "Minnesota lawmakers must not squander the opportunity at hand to take a serious run at improving the state's still dismal educational outcomes for its American Indian students." It notes that "after consulting with the state's tribal leaders and educators, Gov. Mark Dayton and Cassellius called for a historic yet affordable \$20 million Indian education initiative this year." The paper says that "although \$20 million in the scope of the state budget is a relatively small sum, it would go far to address dismal educational disparities that the state can't afford to ignore."

Top National News:

MEDIA ANALYSES SAUDI KING'S DECISION NOT TO ATTEND SUMMIT SIGNALS FRAYING TIES WITH US. Saudi King Salman's decision not to attend the President's summit with Arab leaders this week is being cast in the media as a snub that could signal that relations between the US and Saudi Arabia may be fraying over US nuclear negotiations with Iran. For example, Julianna Goldman reported on the [CBS Evening News](#) (5/10, story 6, 2:10, Glor, 5.08M) that those who watch the region closely say it could "signal some pretty serious gaps between pretty serious allies," and [Al Jazeera America](#) (5/11, 133K), likewise, says the king's decision raises "questions about relations between Riyadh and Washington," adding that "some commentators called the king's cancellation a snub."

The [Washington Post](#) (5/11, Morello, DeYoung, 5.03M) notes that while US officials said the king's absence "did not signal any displeasure with security assurances the United States is preparing to offer" at the summit, the announcement "represented an abrupt about-face, nonetheless, and came as a surprise after Secretary of State John F. Kerry was assured of the king's attendance when he met with Saudi officials last week in Riyadh and Paris."

The [New York Times](#) (5/11, Cooper, Subscription Publication, 12.24M), meanwhile, calls King Salman's decision not to attend "an apparent signal of its continued displeasure with the administration over United States relations with Iran, its rising regional adversary." The Times cites Arab officials who said "they viewed the king's failure to attend the meeting as a sign of disappointment with what the White House was willing to offer at the summit meeting as reassurance that the United States would back its Arab allies against a rising Iran," while [Bloomberg Politics](#) (5/11, Atlas, Syeed, Lerman, 161K) says the king's decision "may be a sign of frustration with Washington over its Iran policy," and the [New York Daily News](#) (5/11, Edelman, 3.79M) portrays the decision as "a sign that relations between the two historical allies had frayed amid ongoing negotiations between

the US and Iran.”

A [New York Times](#) (5/11, Hubbard, Subscription Publication, 12.24M) analysis casts Salman’s decision not to attend the summit as part of his effort to “reshape foreign and domestic policies,” noting that since becoming king, Salman “has rattled alliances with the United States and regional powers that for decades have been the bedrock of stability for his kingdom.” This “new direction,” the Times adds, “poses stark challenges to the United States as Saudi Arabia rallies its Sunni allies to press Washington for a firmer commitment to their security,” while the [Wall Street Journal](#) (5/11, Solomon, Lee, Omran, Arabia, Subscription Publication, 5.68M) reports that the move appears to be reverberating across the Gulf region as Bahrain announced on Sunday that King Hamad bin Isaa Al Khalifa has decided not to attend the summit, and [Politico](#) (5/10, Toosi, 1.11M) said that while Salman “is not the only head of state sending a substitute, his decision to stay away stands out in part because of Saudi Arabia’s longstanding ties to the US and its leading role in the region.” The [Kuwait News Agency](#) (5/11) also posted a short piece on King Salman’s announcement, citing a press statement from Foreign Minister Adel Al-Jubeir.

[Reuters](#) (5/11, Fahmy) quotes a source who said that during the summit, the President is expected to make another push to help Gulf allies create a region-wide defense system to protect against Iranian missiles, but is likely not to seek a full security treaty with Saudi Arabia or other Gulf states, while the [AP](#) (5/11, Riechmann) reports that Gulf leaders will be looking for “commitments from Obama that the United States has their backs at a time when the region is under siege from Islamic extremists, Syria continues to unravel, Iraq is volatile and Yemen is in chaos.” In addition, Arab nations who “feel threatened by Iran’s rising influence,” fear “a nuclear pact will embolden Tehran” and worry that the deal “would unlock billions of dollars that Iran might decide to use to further intrude in countries or support terrorist proxies.” [Al Arabiya](#) (5/10, 22K) adds that “arms purchases may also be concluded at the summit with Kuwait purportedly seeking the purchase of 28 Boeing Co F/A-18E/F Super Hornet advanced fighter jets, valued at over \$3 billion.”

McCain: Iran Nuclear Agreement Review Act To Allow For “Extensive Debate” Of Deal. On [Fox News Sunday Morning Futures](#) (5/10), Senate Armed Services Committee Chairman John McCain commented on the Iran Nuclear Agreement Review Act of 2015, saying, “This was a negotiated compromise between Democrats and Republicans. It gives us the opportunity to judge whether the Congressionally-imposed sanctions – which are strong – will be removed or not. That, of course, could be vetoed by the President if we decide to keep those sanctions in place. But there will be extensive debate and discussion on the floor of the Senate. That’s one of the major steps forward because this agreement so far, as I read it, is a piece of Swiss cheese and that will be revealed in debate and discussion on the floor of the Senate.”

Houthis Agree To Five-Day Cease-Fire. [USA Today](#) (5/11, Onyanga-Omara, 5.01M) reports that King Salman canceled his plans to attend the summit because of a five-day cease-fire set to begin in Yemen on Tuesday.

The [New York Times](#) (5/11, Kalford, Fahim, Subscription Publication, 12.24M) reports that the Houthi rebels said Sunday that they have agreed to the Saudi-proposed cease-fire, but notes that the Saudi-led coalition “has escalated its bombing campaign” ahead of it taking effect, “apparently trying to inflict as much damage as possible on the Houthis and their allies before any pause in the conflict,” and the [Wall Street Journal](#) (5/11, Fitch, Al-Kibsi, Subscription Publication, 5.68M) also notes intensified coalition strikes over the past week, reporting that on Saturday, coalition planes launched 130 sorties, striking more than 100 targets and targeting 17 Houthi leaders.

Editorial Wrap-Up:

NEW YORK TIMES. “**Transgender At The CIA.**” A [New York Times](#) (5/11, Board, Subscription Publication, 12.24M) editorial examines the case of a transgender employee at the CIA, identified only as “Jenny.”

WASHINGTON POST. “**New Rules For The National Security Agency.**” In an editorial, the [Washington Post](#) (5/11, 5.03M) writes that with Section 215 of the Patriot Act expiring on June 1 and a US Court of Appeals for the 2nd Circuit ruling against the NSA’s telephone metadata collection program, Congress “needs to respond.” The Post says that there is a “promising reform proposal readily available: the USA Freedom bill, which enjoys bipartisan support in both chambers as well as broad endorsement from President Obama – and the affected private industries as well.”

“**The Danger Next Door.**” An editorial in the [Washington Post](#) (5/11, 5.03M) says that China should use its rising “to curb the expanding nuclear arsenal of its neighbor and longtime client state, North Korea,” noting that “if China possesses about 250 nuclear weapons, then its leaders should be unsettled to hear from their own experts that North Korea is ramping up to 50 or even 100 in the next decade.” The Post argues that China “has the leverage to halt North Korea’s steady climb to becoming a nuclear power.”

“**A Turnaround Plan For Prince George’s Schools.**” In an editorial, the [Washington Post](#) (5/11, 5.03M) defends efforts by Prince George’s County, Maryland County Executive Rushern L. Baker III (D) to reform the county’s school system. The Post hails his efforts and argues that those opposed to them need to come up with a viable alternative.

WALL STREET JOURNAL. “**No-Growth Republicanism.**” In an editorial, the [Wall Street Journal](#) (5/11, Subscription Publication, 5.68M) says that the Republicans’ Pat Buchanan wing, which is opposed to both trade and immigration, is making a comeback, led by Sen. Jeff Sessions. The Journal says that these Republicans are opposed to globalization, just like many Democrats, and are risking making the US a slow-growth nation economically.

“**ObamaCare’s Big Dig.**” The [Wall Street Journal](#) (5/11, Subscription Publication, 5.68M) editorializes about the Federal investigation into Massachusetts’ healthcare exchange program. The Journal contends that Massachusetts’ exchange contractor, CGI Corp., short-changed the state in numerous areas and it notes that earlier this year, Massachusetts Governor Charlie Baker requested and received the resignations of four of the 11 members of the connector board. The Journal contends that these resignations and the Federal probe offer sad commentary on the state of the entire national healthcare debate.

“**The Neverending Campaign.**” In an editorial, the [Wall Street Journal](#) (5/11, Subscription Publication, 5.68M) says that a new report from the Center for Competitive Politics found that, as many suspect, presidential campaigns are in fact getting longer. The Journal says that the report suggests that the lengthening of campaigns started following the restrictions on campaign contributions in the early 1970s. The Journal says that if Americans want shorter campaigns, campaign finance needs to be deregulated.

LAST LAUGHS

- + Late Night Political Humor.

DOI in the News:

NATIONAL MONUMENT DESIGNATION BEING CONSIDERED IN NEVADA. The [Las Vegas Sun](#) (5/7, 176K) reports that "President Barack Obama is seriously considering creating another national monument in Nevada — and the congressman whose district it would sit in is not happy about it." Rep. Cresent Hardy's "office obtained a draft of the president's proclamation to set aside more than 700,000 acres of land in Lincoln and Nye counties for protection." The proposal is "being circulated among federal agencies for input before Obama makes a decision on whether to prohibit development and energy exploration there."

INTERIOR USES DRONES IN MANAGEMENT OF PUBLIC LANDS. [Bloomberg News](#) (5/7, Black, 3.81M) reports that at the Association of Unmanned Vehicle Systems International's Unmanned Systems 2015 conference this week, Brad Koeckeritz, the national unmanned aircraft specialist for the U.S. Interior Department, said that the "agency's use of drones to douse forest fires, save lives and help manage wildlife has helped boost public acceptance."

CLIMATE CHANGE TIED TO GROWTH IN WILDFIRES. [TIME](#) (5/8, 19 57M) reports that "in part because of the increased risk caused by drought, the Forest Service anticipates spending as much as \$1.7 billion and mobilizing more than 10,000 people to fight wildfires this year." U.S. Forest Service Chief Tom Tidwell told lawmakers this week, "We are seeing wildfires in the United States grow to sizes that were unimaginable just 20 or 30 years ago. We expect 2015 to continue the trend of above average fire activity." The article notes that "climate change, at least in part, lies at the heart of growth in both the frequency and severity of wildfires in recent decades."

GROUP HELPS LOCAL GOVERNMENTS FIGHT FEDERAL LAND MANAGEMENT. The [High Country \(CO\) News](#) (5/8, 74K) reports that American Stewards of Liberty, a Texas-based nonprofit, "trains local governments to use 'coordination,' an often-overlooked provision in two key environmental laws that govern land management: the Federal Land Policy and Management Act and the National Forest Management Act." The group says "over 100 local governments have invoked coordination to fight land-use restrictions since 2006."

Additional coverage of the fight over public lands was provided by the [Las Vegas Review-Journal](#) (5/8, 380K).

ADDITIONAL COVERAGE SECRETARY JEWELL TO ADDRESS HASKELL COMMENCEMENT. Additional coverage that Interior Secretary Sally Jewell will "deliver the commencement address Friday at the Haskell Indian Nations University in Lawrence" was provided by the [Topeka \(KS\) Capital-Journal](#) (5/7, 117K).

ADDITIONAL COVERAGE MOUNTAIN TOWNS WANT COAL COMPANIES TO PAY ROYALTIES. Additional coverage that "11 leaders of Western mountain towns.. signed a letter to U.S. Interior Secretary Sally Jewell calling for the federal government to require coal companies to pay royalties on the true market price of coal mined on public land" was provided by the [Glenwood Springs \(CO\) Post Independent](#) (5/8, 27K).

BI-STATE SAGE GROUSE DECISION CRITICIZED. For the "Pundits" blog of [The Hill](#) (5/7, Molvar, Contributor, 533K), Erik Molvar, the Sagebrush Sea Campaign Director for WildEarth Guardians, criticizes the decision not to protect the Mono Basin sage grouse. According to Molvar, "the result is a political hijacking of the Endangered Species Act process that is required by law to render decisions based on facts and science." Molvar argues that "science has taken a back seat to a strange political calculus in which tiny and isolated populations on the brink of extinction and facing a multitude of human-caused threats, paired with an absence of legally binding protections, add up to 'no additional protection needed.'"

FEDERAL GOVERNMENT URGED TO MEET OBLIGATIONS ON PILT PAYMENTS. In an op-ed for the [Salem \(OR\) Capital Press](#) (5/7, 113K), Sen. Mike Crapo writes that "extending Secure Rural Schools and Self Determination Act (SRS) payments and fully funding Payments in Lieu of Taxes (PILT) is not a simple undertaking, especially considering the federal government's overspending problem." However, he asserts that "when the federal government took over millions of acres of lands across our nation, it also took on the responsibility for the impact of federal ownership on local communities." Crapo argues that "the federal government can, and must, meet its responsibility within its budget."

SUPPORT URGED FOR LWCF. In an op-ed for the [Great Falls \(MT\) Tribune](#) (5/7, 80K), Becky Edwards urges support for the Land and Water Conservation Fund. She says "it will take vital leadership from our entire Montana congressional delegation to make sure it is reauthorized by its September deadline."

NATIONAL MONUMENT DESIGNATION SOUGHT FOR OLD SANTA FE TRAIL BUILDING. In an op-ed for the [Albuquerque \(NM\) Journal](#) (5/8, 241K), David Nimkin, senior director of the Southwest Region for the National Parks Conservation Association, writes that the Old Santa Fe Trail Building should be designated a national monument. Nimkin says that "this designation would establish the only National Park System unit in the country dedicated to the CCC and WPA." Furthermore, he notes that "creating it should be as easy as it is appropriate, since no land acquisition would be required." Also, "New Mexico residents have already demonstrated strong support for either a national monument or national historic park designation for this remarkable structure."

America's Great Outdoors:

National Park Service:

WHITE HOUSE FENCE GETTING ADDITIONAL SPIKES. The [AP](#) (5/8, Caldwell) reports a proposal submitted to the National Capital Planning Commission has the Secret Service adding a second layer of spikes atop the White House fence. The new "pencil point" spikes, which the commission approved, will protrude outward. Additionally, the Secret Service and National Park Service said that "a preliminary review of design concepts for long-term security changes at the fence is being reviewed, and a final design is expected to be selected this summer," with construction expected to start next year.

[Politico](#) (5/8, Wheaton, 1.11M) reports, "It's clear the current fence wasn't keeping intruders out," with "an especially embarrassing breach last September" and another person making it over the fence in April.

Also covering this story are [Reuters](#) (5/7), the [Wall Street Journal](#) (5/8, Tau, 5 68M), the [New York \(NY\) Times](#) (5/7, Subscription Publication, 12.24M), [NPR](#) (5/7, 1.52M), the [Huffington Post](#) (5/8, 194K), the [Daily Mail \(UK\)](#) (5/8, 5.37M), the [Daily Mail \(UK\)](#) (5/8, 5.37M), [US News & World Report](#) (5/7, 907K), the [Boston \(MA\) Herald](#) (5/8, 709K), the [Washington \(DC\) Post](#) (5/7, Alicia A. Caldwell |, Ap, 5.03M), [ABC Otus News](#) (5/8), [TIME](#) (5/8, 19.57M), [Yahoo! News](#) (5/8, Caldwell, 6.18M), [WTVB-TV Raleigh-Durham \(NC\)](#) Raleigh-Durham, NC (5/8, 4K), and [WRC-TV Washington \(DC\)](#) Washington (5/8, 433K).

BILL WOULD GIVE INTERIOR POWER TO ALLOW CONSTRUCTION OF PIPELINES NPS LAND WITHOUT CONGRESSIONAL APPROVAL. [The Hill](#) (5/8, Henry, 533K) reports that Sen. Bill Cassidy "introduced a bill Thursday that would give the Interior Department the power to allow construction of natural gas pipelines on National Park Service lands without needing congressional approval first." Currently, "Congress must sign off on these pipeline projects before the Interior Department can authorize them, even though Interior can approve other infrastructure projects on NPS land on its own." The bill "would take Congress out of the equation and give Interior the whole natural gas pipeline approval process."

XANTERRA DROPS EFFORTS TO TRADEMARK GRAND CANYON NAMES. The [AP](#) (5/8, Fonseca, 2.29M) reports that "a major national parks concessionaire has dropped efforts to trademark names of the Grand Canyon's most popular properties, including a group of rustic cabins, cottonwood trees and cantina on the canyon floor." Xanterra Parks & Resorts "applied for roughly 20 trademarks before its contract to manage hotels, restaurants and mule rides at the Grand Canyon's South Rim expired in December." The U.S. Patent and Trademark Office "now lists some of those applications as 'dead,'" and "Xanterra said it is abandoning others."

Additional coverage was provided by the [Washington \(DC\) Post](#) (5/7, Felicia Fonseca |, Ap, 5.03M) and the [Denver \(CO\) Post](#) (5/8, Fonseca, 894K).

CRATER LAKE NATIONAL PARK COULD SIGN "SISTER-PARK" AGREEMENT WITH PARK IN CHINA. The [Medford \(OR\) Mail Tribune](#) (5/7, Tribune, 64K) reports that "Crater Lake National Park may soon have a sister-park relationship with a park in the Fujian Province of China." Crater Lake Superintendent Craig Ackerman said, "We're hoping to have a signed agreement by November. We would like them to see our operations and our issues. We can look at where they might collaborate with us."

FREE FERRIES OFFERED THIS SATURDAY TO BOSTON HARBOR ISLANDS. The [Boston Globe](#) (5/7, 886K) reports that "a ferry trip to the Boston Harbor Islands will be free Saturday in celebration of the opening of the season at the islands' national and state parks." The Boston Harbor Island Alliance, in partnership with the NPS, "and the Massachusetts Department of Conservation and Recreation, is offering the free ride to let visitors know that the area is more than a place, it's 'a feeling, a state of mind or a sense of American pride.'" The article notes that "the free rides are also a part of the National Park Service's 2015 Find Your Park campaign, according to the DCR."

YELLOWSTONE NATIONAL PARK TO CELEBRATE INTERNATIONAL MIGRATORY BIRD DAY. The [Casper \(WY\) Star-Tribune](#) (5/7, 99K) reports that "Yellowstone National Park and the Grizzly and Wolf Discovery Center will celebrate International Migratory Bird Day on Saturday, May 16, with free public programs and a field trip."

NPS CONCERT SERIES KICKS OFF MAY 10. The [Topanga \(CA\) Messenger](#) (5/8) reports that the NPS' "annual Sunday Concerts in the park will kick off at 4 p.m. May 10 at Peter Strauss Ranch featuring local bands the Handymen and the Chance Bands, playing songs from the Eagles, Van Morrison, Bob Dylan the Byrds, Mavericks and others."

NPS PLANS PRESCRIBED FIRES AT THEODORE ROOSEVELT NATIONAL PARK. The [AP](#) (5/8, 75K) reports that the NPS says "it plans to conduct prescribed fires in Theodore Roosevelt National Park this month, pending weather conditions." According to the agency, "burns could begin Friday." Acting Superintendent Wendy Ross said that "prescribed fires are also an important tool in vegetation and habitat management."

ADDITIONAL FLAT ROCK STRUCTURES ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [Hendersonville \(NC\) Times-News](#) (5/8, 34K) reports that "additional historic structures in Flat Rock have been recognized by the National Register of Historic Places in updated documentation filed through the North Carolina Department of Cultural Resources." According to the article, "a total of 610 contributing resources have been added to the National Register, up from 28 properties listed in the original 1973 document."

ADDITIONAL COVERAGE OF TULE ELK DEATHS AT POINT REYES NATIONAL SEASHORE. Additional coverage of the tule elk deaths at Point Reyes National Seashore was provided by [Bay Nature](#) (5/8).

Bureau of Land Management:

BLM DIRECTOR BRIEFED AT INTERAGENCY FIRE CENTER. The [Rexburg \(D\) Standard Journal](#) reports that BLM Director Neil Kornze was "briefed this week on the severe drought gripping much of the West and preparations for the coming wildfire season at the National Interagency Fire Center in Boise." The article notes that "the briefing was his first stop on a tour focused on areas impacted by severe drought conditions and on the coming wildfire season, which peaks nationally from May through July."

National Interagency Fire Center Issues Wildfire Report. The [AP](#) (5/8, Kruesi) reports that "prolonged drought conditions across the West have national wildfire experts expecting a busy and early fire season." According to the latest wildfire report issued by the National Interagency Fire Center, "Idaho is slated to experience above-normal wildfire activity in its southwestern and northern regions starting in July." The report said, "Above normal wildland fire potential will persist across the Pacific Coast states and expand into the northern Great Basin and northern Rocky Mountains during the summer months."

BLM SEEKING HELP ON WILD HORSES. The [Elko \(NV\) Daily Free Press](#) (5/8, 22K) reports that "although wild horse enthusiasts have been known to lob criticisms to federal stewards, Bureau of Land Management Director Neil Kornze says the proof is in the numbers." He said that "horses and burros on the range have thrived...to the point where the agency has incorporated into its management regular attempts to round up the extra horses." However, "the wild horse growth has come to a head with herds able to double every three-and-a-half years, he said," and "in many management areas, horses exceed the BLM-determined population caps." Kornze said the bureau is "seeking help in two areas: developing better contraceptives and increasing adoptions."

BLM PRESENTS AWARDS. [KTVZ-TV](#) Bend, OR (5/8, 1K) reports that BLM Deputy Director Linda Lance "presented awards to agency employees and teams for their exceptional service to the nation as public servants." At the 70th Honor Awards Convocation of the Department of the Interior at its headquarters in Washington, D.C., Lance said, "Each of these employees has made a genuine difference to our nation through their dedication and hard work for the BLM. All of us at the BLM are proud of the enormous contributions that these employees have made to their communities to benefit the public lands."

BARE SHOE TREE RAISES QUESTIONS. The [AP](#) (5/8, Fiscaro, 2.29M) reports that "the case of a shoe tree gone bare has become somewhat of a 'whodunit' mystery for Crooked River Ranch residents, who had mixed opinions about the sneaker-bearing juniper to begin with." The tree, which sits on BLM "land at the northeast corner of 43rd Street and Lower Bridge Way, started collecting shoes about a year ago, according to locals and the BLM." A spokeswoman with the BLM Prineville Office, Lisa Clark, said "to her knowledge, BLM employees were not involved in removing the shoes."

ADDITIONAL COVERAGE TEEN SOUGHT IN VANDALISM OF BLACKS CLIFF. Additional coverage of the vandalism of Blacks Cliff was provided by the [Washington \(DC\) Post](#) (5/7, Larimer, 5.03M) and the [New York \(NY\) Daily News](#) (5/8, Moran, 3.79M).

Fish and Wildlife Service:

FWS DIRECTOR ASHE TESTIFIES AT SENATE HEARING. [KELO-AM](#) Sioux Falls, SD (5/7) reports that Sen. Mike Rounds, "a member of the Senate Environment and Public Works (EPW) Committee, today questioned Fish and Wildlife Service (FWS) Director Dan Ashe about the agency's aggressive techniques used to intimidate landowners regarding land easements." During the hearing, Rounds "cited a letter he received from a South Dakota farmer who reports encountering an aggressive FWS agent he feels was using intimidation tactics regarding Waterfowl Management Rights despite proactively enacting conservation measures on his land for decades." Rounds said, "I'm particularly troubled that taxpayer dollars are funding this type of truly aggressive approach to citizens who are voluntarily and proactively enacting conservation measures on their own land, as they have been doing for generations."

[KELO-AM](#) Sioux Falls, SD (5/7) reports that "Ashe says the agent must have seen an easement violation on the property." He says "an easement with a landowner means taxpayers have a vested interest in that property and Fish and Wildlife is tasked with making sure laws are followed." Ashe "promised Rounds he would look into the specifics of the case."

Additional coverage of the hearing was provided by [WNAX-AM Yankton \(SD\)](#) Yankton, SD (5/8) and [Western Journalism](#) (5/8, 361K).

FWS DIRECTOR ASHE MAY VISIT AFRICA TO DISCUSS CONSERVATION ISSUES. In its "In The Loop" blog, the [Washington Post](#) (5/7, Kamen, 5.03M) reports that FWS Director Dan Ashe, "an expert on wildlife conservation, may be headed to Africa this month to finally look at some government projects in Gabon and east Africa and to meet with African leaders on wildlife trafficking issues." The goal, according to an Interior official, "would be 'to join discussions' with African officials 'related to the conservation of elephants and other wildlife in central Africa."

TENTH ANNUAL ENDANGERED SPECIES DAY TO BE CELEBRATED. The [AmmoLand](#) (5/8, 5K) reports that “the 10th annual national Endangered Species Day will be celebrated May 15, 2015, with special events and programs that recognize our nation’s efforts to conserve and protect America’s most imperiled species.” FWS Director Dan Ashe said, “For more than 40 years, the Endangered Species Act has played a critical role in protecting and conserving America’s threatened, endangered and at-risk species. Endangered Species Day honors those who uphold the legacy of the Act while inspiring the next generation of conservation leaders.”

NEW MONTANA LAW WILL FUND SAGE GROUSE PRESERVATION. The [AP](#) (5/8, 2 29M) reports that “Gov. Steve Bullock has signed into law a plan to pay for and enact Montana’s strategy to preserve a struggling bird species.” Bullock “signed Senate Bill 261, the Sage Grouse Stewardship Act, during a small ceremony in his office Thursday.” The legislation will “provide millions of dollars for the state to conserve habitat for the chicken-sized birds.” Additional coverage was provided by the [Great Falls \(MT\) Tribune](#) (5/7, 80K).

Also reporting on efforts to preserve the sage grouse was the [Wyoming Tribune Eagle](#) (5/7, 44K).

MEETING HELD ON POTENTIAL GRIZZLY BEAR REINTRODUCTION. The [Idaho State Journal](#) (5/8, 59K) reports that “though surveys show public support for efforts to increase the number of grizzly bears in the North Cascades, state Sen. Kirk Pearson is concerned the opinions of those who live in the mountains have yet to be heard.” Pearson “told the Skagit Valley Herald that a meeting Tuesday with representatives from the North Cascades National Park Service and U.S. Fish and Wildlife Service was an opportunity to focus on the effects of grizzly bear reintroduction on the mountain communities that would be most affected.” Pearson said, “I know the surveys they’ve done say they favor reintroduction, but I would like to know what my constituents are thinking who live closer to the zone, other than people in Seattle saying this is great when the people in Concrete might have a different opinion.”

ENDANGERED FERRETS TO BE RELEASED AT ROCKY MOUNTAIN ARSENAL NATIONAL WILDLIFE REFUGE. The [Denver Post](#) (5/8, Finley, 894K) reports that federal wildlife managers plan to release 30 captive-bred black-footed ferrets in September at the Rocky Mountain Arsenal National Wildlife Refuge. According to refuge manager Dave Lucas, the ferrets will help control prairie dogs that are threatening newly restored native prairie.

KUSKOKWIM RIVER INTER TRIBAL FISHERIES COMMISSION WANTS BIGGER ROLE. The [Alaska Public Radio Network](#) (5/7, 2K) reports that “the path to unified management of Kuskokwim salmon stocks is uncharted, but along the way, the newly established Kuskokwim River Inter Tribal Fisheries Commission wants involvement at each step.” The article notes that “the million dollar question is what federal and state managers do with a more vocal and organized tribal presence in another critical year.” Geoff Haskett of the FWS said, “This commission is going to have way more ability to influence decisions and discussions. We’ve been working on this for the latest month and a half, working with the state, trying to get as many comments as we possibly can. We’re not going to get everything right. But I need to let you know our intent is to utilize this commission to act upon the things we talk both and have more discussions. We’re trying.”

NISQUALLY WILDLIFE REFUGE COULD BE RENAMED TO HONOR BILLY FRANK JR. The [Seattle Post-Intelligencer](#) (5/7, 822K) reports that “the state’s congressional delegation, showing rare bipartisan unity, plans next week to introduce legislation that would rename the Nisqually National Wildlife Refuge in honor of Billy Frank Jr., champion of native fishing rights and a Washington civil rights hero.” The legislation would “create a National Historic Site to mark the 1854 Treaty of Medicine Creek, which took land from natives but did guarantee them the right to take fish ‘at all usual and accustomed stations . . . in common with the citizens of the territory.”

WACCAMAW NATIONAL WILDLIFE REFUGE ACQUIRES LAND. The [AP](#) (5/8, 2 29M) reports that “almost 500 acres of forest and wetlands near Conway are being preserved for future generations.” The Nature Conservancy is “buying more than 300 acres while the Waccamaw National Wildlife Refuge is acquiring the rest of the land.”

LUMBER LIQUIDATORS RECALL CHINESE-MADE LAMINATE FLOORING. The [Wall Street Journal](#) (5/7, Dulaney, Subscription Publication, 5.68M) reports Lumber Liquidators is pulling all of its laminate floors made in China over safety concerns. Lumber Liquidators had previously characterized its flooring made in China as “completely safe,” but the company announced that it is reviewing its supplier’s labeling and certification process. The company has also asked Freeh Group International Solutions, which was founded by former FBI director Louis J. Freeh, to review its sourcing practices.

The [Los Angeles Times](#) (5/8, Masunaga, 4.03M) reports that “in an SEC filing last week, the company said searches were conducted in September 2013 at its corporate offices by the Department of Homeland Security’s Immigration and Customs Enforcement and the U.S. Fish and Wildlife Service.”

PROFESSOR ARRESTED FOR ALLEGEDLY SMUGGLING IVORY. The [Minneapolis Star Tribune](#) (5/8, 1 29M) reports that on Tuesday morning, St. Cloud State University professor Yiwei Zheng was “arrested at a St. Cloud restaurant by agents from the U.S. Fish and Wildlife Service, accused of smuggling elephant ivory and rhinoceros horn out of the United States and into China from 2006 through at least 2011.”

US Geological Survey:

STUDY FINDS 150 MILLION IN US THREATENED BY QUAKES. The [Los Angeles Times](#) (5/8, Lin, 4.03M) reports that a new study “found that close to half of all Americans — nearly 150 million people — are threatened by shaking from earthquakes strong enough to cause damage.” The article notes that “that figure is a sharp jump from the figure in 1994, when the Federal Emergency Management Agency estimated that just 75 million Americans were at risk from earthquakes.” According to William Leith, a co-author and USGS senior science advisor for earthquake and geologic hazards, “one reason for the sharp increase in exposure to quake damage is population increases in areas prone to earthquakes, especially California.”

Securing America’s Energy Future:

Onshore Energy Development:

BLM LEASE AUCTION IN WYOMING SEES DAMPENED DEMAND. The [AP](#) (5/7, Gruver, 2 29M) reports that “low prices for oil and natural gas have dampened the enthusiasm of petroleum companies to lease public land in Wyoming for oil and gas drilling.” The article notes that “a recent federal oil and gas lease sale in Cheyenne netted the least amount of revenue of any sale since the aftermath of the Great Recession in 2009.” Tuesday’s BLM “auction of the right to drill on BLM land brought in just \$688,000.”

Additional coverage was provided by the [Casper \(WY\) Star-Tribune](#) (5/8, 99K).

BLM POSTS PROPOSED LIST OF PARCELS FOR SALE. [KTWO-AM](#) Casper, WY (5/8, 576) reports that the BLM Wyoming State Office has “posted its proposed list of parcels for the quarterly competitive oil and gas lease sale scheduled for Tuesday, Aug. 4, 2015, at the Holiday Inn in Cheyenne, Wyo.” The article notes that “the posted list, which identifies 72 proposed parcels totaling 70,035.50 acres, initiates a 30-day public protest period.”

ADDITIONAL COVERAGE GAO SLAMS BLM OVER NATURAL GAS FLARING ON FEDERAL LANDS. Additional coverage of the report on natural gas flaring was provided by [UPI](#) (5/7), [Natural Gas Intelligence](#) (5/8, Subscription Publication), the [Bend \(OR\) Bulletin](#) (5/8, 94K), and the [Columbus \(MS\) Commercial Dispatch](#) (5/8, 2K).

EXPERT CHANGES IN OIL PRODUCTION NOT ALWAYS REFLECTIVE OF POLICIES. Robert Rapier, chief technology officer and executive VP at Merica International, a forestry and renewable energy company, writes for The [Wall Street Journal](#) (5/7, 5.68M) in “The Experts” blog about different perspectives on whether the Obama Administration has been friendly to the energy industry. He notes that while there has been an uptick in oil production, this does not mean it is thanks to Obama, but is a reflection of the development of the fracking industry, which started during the Bush era. Rapier points out that many developments in the energy industry are delayed, as is often the case with projects or bills that get approved during one term but for which results are not perceived until the following one.

Offshore Energy Development:

BSEE ANNOUNCES 100% SEMS COMPLIANCE AFTER FIRST CYCLE. The [Oil and Gas Journal](#) (5/8, 1K) reports that BSEE representatives from “assessed the progress of the agency’s Safety and Environmental Management System (SEMS) initiative at an Offshore Technology Conference breakfast in Houston on May 7.” The article notes that “after the program’s first cycle requiring SEMS implementation and a subsequent audit, 96% of operators were in compliance,” and “three of the 86 participating operators failed to meet the first-cycle requirements and were assessed a civil penalty.” Susan Dwarnick, head of BSEE’s Offshore Safety Improvement branch, said that “those three are now in compliance.”

In a piece for [Offshore Magazine](#) (5/8, 129K), Douglas Morris, Chief of Offshore Regulatory Programs, Bureau of Safety and Environmental Enforcement, writes that “it has been over four years since the Bureau of Safety and Environmental Enforcement (BSEE) issued the Safety and Environmental Management Systems (SEMS) regulations, which provide the cornerstone of our hybrid regulatory approach.” He notes that “our review of the first round of SEMS audit reports revealed that there is a wide range of comfort and experience levels among operators with respect to using management systems to identify and reduce process safety and environmental risks on the outer continental shelf.” According to Morris, “while the overall compliance for this first round of audits was excellent, there is a need for more detailed information in each of the submitted audits to demonstrate that an operator’s SEMS plan is comprehensively being implemented in the field.”

Additional coverage was provided by [Platts](#) (5/7, 4K).

BSEE Considering New Safety Measures. The [FuelFix](#) (5/7, 7K) reports that “offshore drilling regulators want oil and gas companies to bolster the way they manage safety offshore — and they’re asking the industry for advice.” The BSEE will “hold a workshop on July 29 in Houston aimed at getting ideas for strengthening the safety and environmental management systems required of companies operating offshore.” The BSEE “disclosed it was considering writing a new safety management systems rule as part of a federal regulatory update.”

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (5/8, Dlouhy, 2 29M).

Technology Could Increase Security Risks. The [FuelFix](#) (5/7, 7K) reports that “the oil and gas industry needs to stitch up safety vulnerabilities created by its increasing use of automated equipment at offshore wells and production facilities, top maritime and drilling regulators said Thursday.” U.S. Coast Guard Rear Adm. Paul Thomas said, “Machines are talking to machines and making decisions and doing things that aren’t humanly possible, and that’s why we’re able to get higher pressures. All of these are amazing technologies, but they bring with them vulnerabilities that I don’t think we’ve figured out how to manage.”

DELAWARE OPPOSES SEISMIC SURVEYS OFF COAST. The [Delmarva \(MD\) Daily Times](#) (5/7, 2K) reports that “last summer the federal government announced Maryland and Delaware, areas which asked to be removed from possible drilling, would still be open to geological and geophysical surveying, pending a long line of state and federal approval.” In a letter dated April 21, Delaware Department of Natural Resources and Environmental Control Secretary David Small said “surveying off Delaware would contradict the state’s position.” Small said, “The extent of proposed surveys into waters offshore of Delaware does not correlate to the leasing program areas and we do not see the need for surveys in areas that are not currently subject to leasing.”

BOEM PROVIDES SAND FOR BEACHFILL CONSTRUCTION. The [Dredging Today](#) (5/7) reports that “beachfill construction to complete the remaining sections of the Storm Damage Reduction Project on Long Beach Island, New Jersey, began this week.” The BOEM is “making available up to seven million cubic yards of sand from federal waters under an agreement announced last July between BOEM, the U.S. Army Corps of Engineers Philadelphia District, and the New Jersey Department of Environmental Protection (NJDEP).”

KAYACTIVISTS, SEATTLE MAYOR CAUSE UNCERTAINTY FOR SHELL ARCTIC DRILLING PLANS. The [AP](#) (5/7, Le) reports on the impending confrontation between Royal Dutch Shell and environmentalists on their kayaks in Seattle, aided by the mayor’s recent backing of their cause. Seattle Mayor Ed Murray announced that the Port of Seattle should obtain a new permit in order to host Shell’s drilling fleet, a move that can block the company’s plans.

Additional coverage was provided by the [Seattle \(WA\) Times](#) (5/8, 970K). and [The Guardian \(UK\)](#) (5/7, 2.93M).

BP OIL SPILL CLAIMS ADMINISTRATOR GRANTED SUBPOENA POWER TO AVERT FRAUD. The [New Orleans Times-Picayune](#) (5/7, Larino, 733K) reports that US District Judge Carl Barbier on May 6 “granted BP oil spill claims administrator Patrick Juneau the ability to subpoena records to investigate fraudulent claims.” The decision will allow Juneau to “conduct investigations and ‘maintain the integrity’ of the multibillion-dollar settlement agreement” of the Gulf Deepwater Spill, the article reports, adding that “Juneau will maintain the records for continuity of the project,” per the court order.

SHELL EXECUTIVE SUPPORTS INTERIOR OPENING ATLANTIC DRILLING. In a piece for the [FuelFix](#) (5/7, 7K), Mark Shuster is the executive vice president of upstream Americas exploration for Shell, writes that “when Secretary Jewel announced that acreage off the Atlantic Outer Continental Shelf (OCS) would be included in future offshore lease sales, it sent a strong signal that the U.S. is prepared to further capitalize on its geologic good fortune by way of exploration that could lead to new domestic supplies of oil and gas.” He argues that “much like the shale revolution credited with jump-starting the economy and driving down consumer prices, increased access to offshore acreage could add yet another chapter to an energy future that is enviable among nations.” Shuster also says that “while disappointing the potentially oil-rich Eastern Gulf of Mexico was left out of the Secretary’s plan, it’s not a stretch to predict that jobs, billions in tax revenues and increased energy security could follow if the Atlantic OCS is blessed with oil and gas resources of its domestic brethren.”

Tackling America’s Water Challenges:

WATER TO BE SAMPLED FOR MUSSEL INFESTATION. The [Deseret \(UT\) News](#) (5/8, 538K) reports that the Utah Department of Natural Resources and the BOR are “embarking on an aggressive three-year round of water sampling to determine if the invasive quagga mussel has infested Deer Creek Reservoir.” According to the article, “on Thursday, the agencies demonstrated those water sampling techniques as well as boat decontamination procedures in a public outreach campaign aimed at increasing awareness over the severity of the problem.”

REPAIR WORK ON LEWIS WASTE-WAY STRUCTURE CONTINUES. The [Nevada Appeal](#) (5/8, 48K) reports that “as of Wednesday, the Truckee-Carson Irrigation District and the U.S. Bureau of Reclamation’s repair work on the Lewis waste-way structure was at about 20 percent, according to TCID’s website.” The project “stems from a failure of the embankment adjacent to the structure on April 30.”

CALIFORNIA IMPLEMENTS REQUIREMENTS FOR DESALINATION PLANTS. The [Greenwire](#) (5/7) reports that “future desalination plants in California must follow new rules governing how they extract water from the ocean and how they discard leftover salt, following state action yesterday.” The California Water Resources Control Board “passed its first-ever requirements for plants that turn seawater into drinking water.” The board “approved the measure as an amendment to its Water Quality Control Plan for Ocean Waters, saying it wanted to ensure there were uniform standards as interest in the facilities grows.”

CONTINUING COVERAGE BAY DELTA CONSERVATION PLAN REVISED. The [Los Angeles Times](#) (5/8, Board, 4.03M) editorializes that last week, “a scaled-back version” of the Bay Delta Conservation Plan was introduced. The paper argues that “the factions that keep rejecting delta plans, or else damming them with faint praise, owe California some workable alternatives that address all of the state’s needs, not just their own.” It suggests that “any viable plan must include two interrelated ingredients: science-based management of the delta, with biologists and hydrologists rather than water contractors or politicians deciding how much water is needed to preserve species; and increased trust among the factions.”

Additional coverage of the revision to the Bay Delta Conservation Plan was provided by the [High Country \(CO\) News](#) (5/8, 74K) and the [Livermore \(CA\) Independent](#) (5/8, 137K).

ADDITIONAL COVERAGE RESEARCHERS CHALLENGE GILA STUDIES. Additional coverage that University of New Mexico researchers are challenging the Gila studies was provided by the [San Francisco \(CA\) Chronicle](#) (5/8, Subscription Publication, 2 92M) the [Las Cruces \(NM\) Sun-News](#) (5/8, 38K), and the [Houston \(TX\) Chronicle](#) (5/8, 2.29M).

PEORIA PREPARED FOR DROUGHT WITH WATER PLANNING. In an op-ed for the [Arizona Republic](#) (5/7, 1.27M), Peoria Mayor Cathy Carlat writes that “like most of Arizona, Peoria has been in the grip of a serious drought for over 15 years,” but “water continues to flow to Peoria residents, and the city continues to grow economically.” Meanwhile, “California is also experiencing drought, but municipal providers there have been ordered to cut back on water deliveries by 25 percent, and their economy is suffering.” Carlat argues that difference is that “Peoria and Arizona have been planning for drought for years.”

Empowering Native American Communities:

LAND BUY-BACK OFFERS SENT TO 6,500 AT CHEYENNE RIVER. The [AP](#) (5/8, 25K) reports that “the federal government says it has sent offers to more than 6,500 landowners who own parcels on the Cheyenne River Indian Reservation as part its effort to help tribal governments consolidate land.” Interior Department Deputy Secretary Michael Connor says “almost \$150 million in purchase offers have been sent to landowners with fractional interests on the reservation.”

Additional coverage was provided by the [Mitchell \(SD\) Daily Republic](#) (5/8, 37K) and [KELO-TV Sioux Falls \(SD\)](#) Sioux Falls, SD (5/8, 31K).

BIA PROPOSING NEW GUIDELINES FOR INDIAN CHILD WELFARE ACT. The [Minneapolis Star Tribune](#) (5/8, 1.29M) reports that the BIA is “proposing new rules that it says will strengthen the Indian Child Welfare Act.” Kevin Washburn, the assistant secretary who leads the BIA, is “touring the country with other agency officials to hear from tribes and the public about the proposals.” At a meeting at Mystic Lake Casino on Wednesday, Washburn said, “Guidelines are great. We need things that are legally enforceable.”

24TH ANNUAL INDIAN COUNTRY LAW ENFORCEMENT OFFICERS MEMORIAL SERVICE HELD. The [Artesia \(NM\) News](#) (5/8, 10K) shows a picture of a BIA officer placing “a flower at the base of the Indian Law Enforcement Officer’s Memorial this morning during the 24th Annual Indian Country Law Enforcement Officers Memorial Service at the Federal Law Enforcement Training Center.” According to the paper, “members of the BIA, the International Association of Chiefs of Police, and the FLETC gathered to honor tribal, state, local and federal law enforcement officers who gave their lives in the line of duty.”

FREEDMEN DESCENDANTS ARGUE FOR CLASS CERTIFICATION. The [Law 360](#) (5/8, 15K) reports that “a descendant of the freedmen of the Five Civilized Tribes urged a D.C. federal court Wednesday to sign off on the descendants’ bid for class status in a dispute with the U.S. Department of the Interior over the accounting of revenue from land granted to their ancestors.” Leatrice Tanner-Brown and the Harvest Institute Freedmen Federation argued that the Interior Department “owes a fiduciary duty to freedmen descendants over land allotted from the Five Civilized Tribes — the Seminole, Cherokee, Choctaw, Creek and Chickasaw — under the Act.”

COURT FINDS NAVAJO ATTORNEY PROTECTED BY FEDERAL TORT CLAIMS ACT IN ACCIDENT SUIT. The [Law 360](#) (5/8, 15K) reports that “a Navajo Nation attorney working under a self-determination contract between the tribe and the federal government on a child adoption case can be afforded protection against a personal injury suit under the Federal Tort Claims Act as a government employee, the Eleventh Circuit affirmed Thursday. The appeals court held that “Kandis Martine had been correctly deemed an employee of the U.S. Bureau of Indian Affairs for her involvement in the Navajo Nation Child & Family Services Program’s efforts to oppose the adoption of a Navajo child.”

OP-ED FEDERAL MANAGEMENT OF EDUCATION CRITICIZED. In an op-ed critiquing Common Core for the [Wilkes-Barre \(PA\) Times Leader](#) (5/8, 115K), Michael A. MacDowell, president emeritus of Misericordia University, writes that “one needs to only examine the U.S. Bureau of Indian Education to see how federal management of education can be harmful.” He notes that “the bureau spends nearly 56 percent more per student than the average American public school, yet facilities and student achievement lag far behind other schools.”

[Top National News:](#)

SENATE APPROVES IRAN LEGISLATION BY 98-1 MARGIN. The Senate vote on a bill allowing for Congressional review of a potential nuclear deal with Iran was not noted on the network newscasts, but is generating extensive, largely positive print coverage, much of which hails the measure’s bipartisan nature. The coverage also casts the White House as reluctantly backing the bill – even as it warns that further changes to it could lead to a presidential veto. Moreover, though the [AP](#) (5/8, Riechmann) says the Senate “muscle its way into President...Obama’s talks to curb Iran’s nuclear program,” a number of reports indicate that the measure is unlikely to empower the legislative branch to scuttle a deal.

As the [Blaze](#) (5/7, Kasperowicz, 1.87M) reported, “under the bill, Congress will be able to pass a resolution of disapproval if it decides the final Iran deal is no good,” but that resolution “can still be vetoed,” and it “seems doubtful” that both chambers would be able to muster “a two-thirds majority...to override.” The [Jerusalem Post](#) (5/7, Wilner, 94K), meanwhile, says “a binding resolution of disapproval would require a two-thirds majority in Congress, which appeared unlikely on Thursday, as 150 House Democrats signed a letter endorsing the progress of the nuclear talks.” In addition, says the [AP](#) (5/8, Riechmann), “even if Congress rejects his final nuclear deal with Tehran...Obama could use his executive pen to offer a hefty portion of sanctions relief on his own.” He could also take other “unilateral actions that – when coupled with European and UN sanctions relief – would allow a deal to be implemented.”

On its front page, the [Washington Post](#) (5/8, A1, Kane, Debonis, 5.03M) says the “98-to-1 vote...lent a bipartisan boost to the measure – which the House is likely to approve next week.” [NPR](#) (5/7, Neuman, 1.52M) reported that the White House “says...Obama will sign the legislation,” though [USA Today](#) (5/8, Kelly, 5.01M) notes it also “has warned that it could withdraw its support” if the bill “is changed significantly.”

As [TIME](#) (5/7, Rhodan, 19.57M) recounted on its website, the legislation initially “faced backlash from the White House,” but “in mid April White House Press Secretary Josh Earnest said the President would be open to signing” it. Or as [Newsweek](#) (5/8, Cadel, 1.75K) put it, “After resisting various attempts by Congress to insert itself in the talks, the White House finally backed off last month, clearing the way for Democrats to support a bill.” Obama, says the [Washington Times](#) (5/8, Dinan, 641K), “had resisted having to accept congressional involvement, but relented once he saw he was likely to lose the fight.”

[Reuters](#) (5/8, Zengerle) remarks on the difficulties faced by the bill’s supporters in coming months, including controversy over Speaker Boehner’s invitation to Israel’s Benjamin Netanyahu and Sen. Robert Menendez’s indictment. After being indicted, notes the [New Jersey Local News](#) (5/7, Salant, 871K), Menendez “temporarily gave up his position as ranking Democrat on the Senate Foreign Relations Committee April 1.” Yesterday, in a floor speech, “Menendez, who previously has criticized Obama over the Iran talks, raised some further concerns.” Said the senator, “I increasingly get alarmed that there is a suggestion that there will be greater upfront sanctions relief. ... I don’t believe that Iran should get a signing bonus.”

The [New York Times](#) (5/8, A1, Steinhauer, Subscription Publication, 12 24M) reports on its front page that Menendez’s resignation from the committee left Sen. Benjamin Cardin, “who is far less hawkish, in charge of the Democrats’ role in the bill.” [Voice of America](#) (5/7, Bowman, 63K) quotes Cardin, “the bill’s co-author,” as saying yesterday, “Our goal is to prevent Iran from becoming a nuclear weapon state, pure and simple.”

[McClatchy](#) (5/8, Hotakainen, 32K) says “the vote marked a victory for Tennessee Republican Sen. Bob Corker, chairman of the Senate Foreign Relations Committee, who called it ‘a big achievement’ for the Senate.” The [Knoxville \(TN\) News Sentinel](#) (5/8, Collins, 332K) highlights Corker’s role in crafting the bill, which passed after “some lawmakers” who had “expressed serious misgivings about” it “conceded it would provide the only opportunity for congressional review of any nuclear deal with Iran.” Corker said yesterday, “Without this bill, there is no review of what happens relative to Iran.”

[Politico](#) (5/7, Everett, 1.11M) reports that “though an internal GOP dispute threatened to drag out final passage until next week, all 100 senators reached an agreement to pass the bill on Thursday afternoon,” even as Senate Majority Leader McConnell “eyes finishing a package of trade bills and extend expiring highway and surveillance laws – all before the Memorial Day recess.” [McClatchy](#) (5/8, Hotakainen, 32K) notes that the bill “even” got “support from Florida Republican Sen. Marco Rubio, who still said he was ‘deeply disappointed by the direction this has taken,’” and “could not convince his colleagues to vote on an amendment that would have required Iran to recognize Israel’s right to exist.”

On its website, [Roll Call](#) (5/7, Lesniewski, 99K) said “the lopsided final vote won cheers from across the political spectrum, as well as on both sides of the Rotunda, with...Boehner looking ahead to consideration of the bill in his chamber.” Said Boehner, “I applaud the Senate for passing this bill, and thank Sen. Corker and others for their hard work. I look forward to House passage of this bill to hold President Obama’s administration accountable.”

The [Arkansas Democrat Gazette](#) (5/8, 342K) notes that the lone Senate vote against the bill came from Sen. Tom Cotton. [Bloomberg Politics](#) (5/8, Hunter, 161K) notes that the Senate “didn’t allow a vote on a proposal by” the Arkansas senator, “who drew criticism from Democrats for writing an open letter to Iran’s leaders – signed by 46 other Republicans – saying any deal with Obama couldn’t be counted on because a future president or Congress could overturn it.” Cotton said after the vote, “I will work with Republicans and Democrats to stop a dangerous deal that would put Iran on the path to obtaining a nuclear weapon.” [The Hill](#) (5/7, Carney, 533K), [Huffington Post](#) (5/7, Schulberg, 194K), [Daily Caller](#) (5/7, Wenig, 366K), and [Wall Street Journal](#) (5/8, Peterson, Subscription Publication, 5.68M), among other news outlets, run similar reports on yesterday’s vote.

Iran Releases Impounded Ship. The [New York Times](#) (5/8, Gladstone, Subscription Publication, 12 24M) reports Iran on Thursday released the Maersk Line cargo vessel “impounded” more than a week ago in the Strait of Hormuz. According to the Times, the ship’s release, coupled with the US announcement that it will no longer accompany ships into the strait, is “an apparent stand-down” that “reflected what political analysts called a wish by both Iran and the United States to avert an escalation of tensions” that could scuttle nuclear talks.

NYTimes Analysis: North Korea Serves As “Rallying Call For Both Sides” Of Iran Nuclear Debate. The [New York Times](#) (5/8, Sanger, Subscription Publication, 12.24M) reports that while the Administration focused on reaching a deal with Iran over its nuclear program, “North Korea went on an atomic spending spree” resulting in “an expansion” that South Korean “officials” believe the US “has little hope of stopping.” According to the Times, “the apparent buildup in nuclear bombs...has become a rallying call for both sides debating the agreement with Iran.” Republicans and Israel “cite the trail of broken agreements with the North as a warning” for what will occur once a deal is brokered with Iran, while the White House’s supporters say North Korea provides a “lesson...that an enforceable, verifiable deal” is necessary.

Tehran Mayor Fills City’s Billboards With Art. The [New York Times](#) (5/8, Erdbrink, Subscription Publication, 12.24M) reports Tehran Mayor Mohammad Baqer Ghalibaf “directed all of the city’s 1,500 billboards fitted out with copies of famous works of art, including many by prominent Western artists.” According to the Times, “analysts” in Iran “were quick to detect an ulterior motive” in the move, saying Ghalibaf “might be trying to position himself as the right man for the times” as the country’s 2016 presidential elections near and there is “a possible warming of relations” with the US.

COURT NSA’S MASS COLLECTION OF PHONE DATA IS ILLEGAL. Yesterday’s court ruling on a controversial NSA surveillance program generated reports on two network newscasts and extensive analysis elsewhere. The coverage highlights the decision’s impact on the renewal of the Patriot Act, and some reports cast it as somewhat of a vindication for Edward Snowden – who first called public attention to the program’s existence. Other stories, however, indicate that the ruling will have a limited legal effect. The [CBS Evening News](#) (5/7, story 5, 1:00, Crawford, 5.08M), for example, said that “as a legal matter” the ruling is “largely symbolic.” While the Appeals Court “said the telephone data collection program was not authorized by Congress under the Patriot Act...that law is going to expire in three weeks anyway.” Moreover, [Bloomberg Politics](#) (5/8, Van Voris, 161K) notes, the court “didn’t rule on arguments raised” by the ACLU “that the program violates constitutional free-speech guarantees and protections against unreasonable searches and seizures.”

The [Washington Times](#) (5/8, Dinan, 641K) similarly notes that “the case didn’t reach big constitutional questions that the plaintiffs...had raised,” and the [New York Daily News](#) (5/8, Brown, 3.79M) reports that “while issuing a strong rebuke against the mass collection of telephone metadata, the US Second Circuit Court of Appeals declined to stop the program outright.” In a brief report, however, [ABC World News](#) (5/7, story 7, 0:20, Muir, 5.84M) called the ruling “a big legal blow... to the government’s domestic spy program,” and [McClatchy](#) (5/8, Doyle, 32K) described it as “a blow to the Obama administration’s surveillance operations” and “a victory for the” ACLU.

The [New York Times](#) (5/8, Savage, Weisman, Subscription Publication, 12.24M) reports that “the data collection had repeatedly been approved in secret by judges serving on” the FISA court, who “were willing to accept an interpretation of Section 215 that the appeals court on Thursday rejected.” The Times adds that “the court, in a unanimous ruling written by Judge Gerard E. Lynch, held that Section 215 ‘cannot bear the weight the government asks us to assign to it, and that it does not authorize the telephone metadata program.’”

[USA Today](#) (5/8, Heath, Wolf, 5.01M) says “the phone surveillance program, which was among those Snowden disclosed in 2013, already is on life support,” and the President “has asked Congress for changes that would leave the data in the hands of private phone companies, not the government.” Moreover, “the House Judiciary Committee voted last week to end the NSA phone surveillance program.” [Vox](#) (5/7, Lee, 839K) noted that Sens. Patrick Leahy and Mike Lee are co-sponsors of companion Senate legislation. Known as the USA FREEDOM Act, their bill “would end the NSA’s bulk phone surveillance program and replace it with a system that allows narrower information requests with greater judicial oversight” The senators said yesterday in a joint statement, “The dragnet collection of Americans’ phone records is unnecessary and ineffective. ... Congress should not reauthorize a bulk collection program that the court has found to violate the law.”

[Wired](#) (5/7, Greenberg, 4.16M) described the ruling as a “surprise development” with “real significance for Congress’s upcoming decision as to whether and how to reform the Patriot Act,” while [Politico](#) (5/7, Tummarello, 1.11M) reports that Senate Minority Leader Reid yesterday called “called for an immediate vote on the USA Freedom Act,” telling the Senate, “It would be the height of irresponsibility to extend these illegal spying powers when we could pass bipartisan reform into law instead.” On its front page, the [Washington Post](#) (5/8, A1, Nakashima, 5 03M) says that “Administration officials have indicated that they are likely to endorse the bipartisan reform legislation.”

[USA Today](#) (5/8, Kelly, 5.01M) notes that Senate Majority Leader McConnell “has introduced a competing measure that would simply renew the Patriot Act through 2020.” McConnell said yesterday, “The USA Freedom Act would replace Section 215 with an untested, untried and more cumbersome system. It would not end bulk collection of call data. Instead, it would have untrained corporate (phone company) employees with uncertain supervision and protocols do the collecting.”

The [Los Angeles Times](#) (5/8, Lauter, Cloud, 4.03M) reports that the White House “said in a statement that it was studying the appeals court ruling.” Said NSC spokesman Ned Price, “We are in the process of evaluating the decision handed down this morning. ... The president has been clear that he believes we should end [the bulk collection program] as it currently exists by creating an alternative mechanism to preserve the program’s essential capabilities without the government holding the bulk data.” [Politico](#) (5/7, Gerstein, 1.11M) notes that White House spokesman Eric Schultz, meanwhile, “reiterated that...Obama supports legislation in Congress that would reform the metadata collection process so that phone companies, not the government, store the data.” Said Schultz, “Our team is still reviewing the details of the ruling, but we believe that regardless of the fine print of that ruling, that legislation is the way to go.”

[Reuters](#) (5/8, Stempel) reports that Attorney General Lynch, at a Senate budget hearing yesterday, called the NSA data a “vital tool in our national security arsenal.” [Politico](#) (5/7, Gerstein, 1.11M) reports, however, that “the usefulness of the phone metadata has been the subject of considerable controversy,” as “a review panel set up by Obama in the wake of the program’s disclosure by Snowden concluded that the program had not been critical to disrupting any terrorist plot in the US.”

The [National Journal](#) (5/7, Volz, Subscription Publication, 156K) quoted Lynch as further saying, “We are reviewing that decision, but given the time issues we are also working with this body and others to look for ways to reauthorize Section 215.” The [AP](#) (5/8, Neumeister, Dilanian) notes that Lynch also said that “the June 1 expiration of the Patriot Act provisions provides opportunities to reauthorize the program ‘in a way that does preserve its efficacy and protect privacy.’”

On its website, the [New York Times](#) (5/8, Peters, Subscription Publication, 12 24M) indicated that GOP presidential hopefuls “lined up on different sides of the debate” after the ruling. While Sen. Rand Paul called the ruling “a monumental decision for all lovers of liberty,” Sen. Marco Rubio “accused the NSA’s critics of spreading misinformation,” and called on Congress to “reauthorize” the programs “immediately or risk putting the country in harm’s way.” Sen. Ted Cruz “took the middle ground,” expressing support for “a more limited reauthorization of the Patriot Act that would rein in certain aspects of how the NSA can gather intelligence.” [Roll Call](#) (5/7, Lesniewski, 99K) reported that “in a series of tweets,” Paul “declared he would do what was in his power to preclude reauthorization of expiring National Security Agency surveillance powers under the Patriot Act.” Said Paul, “I will fight tooth-and-nail to stop a blanket reauthorization of this attack on our freedoms.”

[The Hill](#) (5/7, Hattem, 533K), [Roll Call](#) (5/7, Ruger, 99K), [Christian Science Monitor](#) (5/7, Richey, 539K) and [Wall Street Journal](#) (5/8, Barrett, Paletta, Subscription Publication, 5.68M), among other news outlets, run similar stories on the court ruling. In an editorial, the [Wall Street Journal](#) (5/8, Subscription Publication, 5.68M) criticizes it as both misguided and dangerous for the country, and urges the Administration to appeal it to the Supreme Court. The [New York Times](#) (5/8, Subscription Publication, 12 24M) praises the ruling in its own editorial page, calling it “powerful,” and arguing that its “most important message...is a simple one: Congress could not have intended to approve a program whose true scope almost no one outside the National Security Agency fully comprehended – that is, until...Snowden leaked its details to the world.”

Clinton Says She Backs USA Freedom Act. [The Hill](#) (5/7, Hattem, 533K) reported that Hillary Clinton on Thursday took “her clearest stand yet on government surveillance,” expressing “firm support” for “legislation to reform America’s spying powers.” Via Twitter, Clinton said, “Congress should move ahead now with the USA Freedom Act – a good step forward in ongoing efforts to protect our security & civil liberties.” The Hill added that in offering her stance, Clinton ended “a long pattern of dodging questions about how – or whether – the NSA’s practices should be reformed.”

Snowden’s Attorney Hails Ruling. As [Politico](#) (5/7, Gerstein, 1.11M) puts it, meanwhile, “Snowden hasn’t had his day in court, but he’s already finding some vindication in the US judicial system.” On its website, [US News & World Report](#) (5/7, Nelson, 907K) noted that Snowden attorney Jesselyn Radack said “this historic ruling against mass surveillance was only possible because of” her client, who “should be allowed to return to the United States without fear of criminal prosecution.” [Politico](#) (5/7, Gerstein, 1.11M) indicates, however, that “there was no hint Thursday that the Obama administration had softened its stance toward Snowden.” Said Price, “Mr. Snowden is accused of leaking classified information and faces felony charges here in the United States. ... He should return to the US as soon as possible, where he will be accorded full due process and protections.”

[Fusion](#) (5/7, Rivero), meanwhile, said the “landmark decision...clears the path to a full legal challenge against” the NSA program. Yesterday, “reactions from the anti-surveillance community were positive,” with “Glenn Greenwald, the journalist who first published the Snowden documents,” calling the court’s decision “a vehement rejection of the Obama Admin’s attempt to interpret Patriot Act for mass surveillance.”

CARTER, COMEY SAY ISIL GAINING INFLUENCE IN US. Defense Secretary Carter, FBI Director Comey and Sen. Tom Cotton each expressed their views that ISIL is gaining influence in the US, with Carter and Cotton connecting that sway to the Texas shooting at a Prophet Mohammed cartoon contest. The [Washington Times](#) (5/8, Klimas, 641K) reports Carter “said Thursday that the shooting was inspired by – but not directed by – the Islamic State.” Carter said, “Still, in all, it’s concerning that there are individuals like this who draw their inspiration from IS L.” The Times notes that ISIL “penned a letter threatening a six-month terror campaign in five states.” Carter said Americans should take the threats “seriously” and law enforcement and homeland security “have been saying the same.”

Jim Sciutto reported on [CNN’s Situation Room](#) (5/7, 554K) that the Texas shooter, Elton Simpson, “had deeper ties to terror groups like ISIS than officials previously knew...investigators now suspect that the ISIS and al Shabaab members had a more direct role in Sunday’s shooting, pushing Simpson to carry out an attack, though there is no evidence yet that the men had operational control, such as choosing the Texas target or the timing.”

The [Washington Times](#) (5/8, Ybarra, 641K) reports analysts believe IS L “is sufficiently wealthy and has enough social media savvy that, if unchecked,” could help the group “execute a 9/11-scale attack in the US a few years from now.” Meanwhile, [USA Today](#) (5/8, Johnson, 5.01M) reports Comey on Thursday offered “a dramatic assessment of the domestic threat posed” by ISIL. Comey told reporters there are “hundreds, maybe thousands” of people across the country who are receiving recruitment overtures from the terrorist group or directives to attack the US.” Comey said, “It’s like the devil sitting on their shoulders, saying ‘kill, kill, kill.’”

Pierre Thomas reported in the lead story for [ABC World News](#) (5/7, lead story, 3:05, Muir, 5.84M) that Comey said ISIL “has launched an unprecedented social media campaign aimed at hundreds if not more than a thousand followers here in the United States.” Similarly, on [Fox News’ Special Report with Bret Baier](#) (5/7, 1.53M), Catherine Herridge reported that Comey “told reporters that there has been a dramatic change in the way terrorists are recruited,” and Jeff Pagues said on the [CBS Evening News](#) (5/7, story 4, 1:45, Pelley, 5.08M) that Comey said IS L “reaches out through Twitter, identifies followers and sends them to encrypted web sites that are difficult track. Comey says the message is, ‘Go kill people,’ sometimes supplying them with hit lists, sometimes suggesting particular targets.”

Evan Perez reported on [CNN’s Situation Room](#) (5/7, 554K) that Comey said that “the way ISIS recruitment is changing online.. it’s getting harder and harder to figure out who is going to move from just being talked to online and communication with ISIS recruiters and actually carrying out an attack.” Comey indicated “there are other Elton Simpsons out there and he knows it. He is monitoring hundreds of investigations around the country and it’s harder every day to find these people.”

inspire attacks" in the US, adding that "There's no doubt if we just looked on social media" that the shooting in Texas was "an Islamic State-inspired attack." Cotton said IS L "seems to be winning right now, so they are appealing to disaffected, alienated youth all around the country who want to be with what they see is the winning force."

FBI Warned Garland Police About Simpson Hours Before Attack. On [NBC Nightly News](#) (5/7, story 3, 2:10, Holt, 7.86M), Lestor Holt reported that in a "stunning" revelation, FBI Director Comey says "the Feds sent a bulletin to local police about one of the men that would open fire hours later" in Garland, Texas. Pete Williams added that "the FBI says it sent police...a secure electronic message with Elton Simpson's picture and car license number. The FBI says it acted as soon as they developed information that he was interested in going there."

Evan Perez reported on [CNN's Situation Room](#) (5/7, 554K) that the FBI sent a "generalized warning...to the Garland police. It didn't have any specific information, per se. t only said that he had expressed interest in some of his social media activities about this Mohammed cartoon contest event. The FBI did not know that he was planning to attack. They did not know he was actually on route to Garland, Texas." Similarly, Jeff Pegues reported on the

Jeremy,

Thank you and John for speaking with me earlier! I really appreciate it.

It would be great if you could send any particularly good examples of legislation. We would sincerely appreciate any and all technical assistance the Department can provide in drafting a bill for a new National Monument at the Stonewall Inn.

All best,

Robert Atterbury

Subject: Fw: Stonewall Monument

Pam, do you have any examples of legislation to designate a national park or historic site that are a good example of what Congress usually includes in its Findings at the top of the legislation? Nadler's office would like our assistance in drafting the bill and I told them that I think typically the findings would be drafted by the bill sponsor, and not by us...is that true?

[DOI in the News:](#)

WATCHDOG RAISES CONCERNS ABOUT SECURITY AT INTERIOR HEADQUARTERS. [Politico](#) (5/1, Dixon, 1.11M) reports that “the Interior Department’s headquarters at the Stuart Lee Udall Building just blocks from the White House has several security issues with vehicle and pedestrian entrances, a new inspector general report says.” According to the article, “the IG’s biggest complaint was about retractable ‘vehicle-restraint bollards’ — those posts that sink into the ground so a car can pass — ‘that continually malfunction’ and are backed up by unarmed security guards with plastic traffic cones who don’t always check IDs.” The report also cited “pedestrian entrances, where guards once again weren’t properly checking IDs.”

INTERIOR BETA TESTS PERISCOPE. The [FedScoop](#) (5/3) reports that when the Interior Department “gave its audience a live glimpse of Everglades National Park’s alligators this Earth Day, what stood out was how they did it: using a new, much-hyped live streaming platform called Periscope.” Interior’s Director of Digital Strategy Tim Fullerton said that “he’d reached out to Twitter, which recently acquired Periscope, about being a beta tester for the app before it launched last month.” He said, “We’re always finding new ways to engage with the public and using different tools. The live-streaming capability through Periscope provides us a new way to open up a window to our work.” The article also notes that “next week, Fullerton plans leave Interior to take a new post at the advocacy group Everytown for Gun Safety in New York.”

LAWMAKERS PUSH FOR NATIONAL WOLF DELISTING. The [AP](#) (5/1, Neary, 2.29M) reports that Rep. Cynthia Lummis and “others in Congress are pushing the U.S. Department of Interior to end federal protections for wolves nationwide.” Lummis and “more than 30 other members of Congress this week wrote to U.S. Interior Secretary Sally Jewell and Dan Ashe, head of the U.S. Fish and Wildlife Service, calling on them to implement a stalled 2013 federal plan to end protections for wolves under the federal Endangered Species Act.” They “claim healthy wolf populations justify ending protections.”

Additional coverage was provided by the [Milwaukee \(WI\) Journal Sentinel](#) (5/3, 784K), the [Scottsbluff \(NE\) Star-Herald](#) (5/3, 36K), the [Casper \(WY\) Star-Tribune](#) (5/3, 99K), the [Daily Astorian \(OR\)](#) (5/3, 23K), the [Lewiston \(ID\) Tribune](#) (5/3, 44K), and [KIFI-TV Idaho Falls \(ID\)](#) Idaho Falls, ID (5/3, 3K).

RANCHERS OPPOSE GRAND CANYON WATERSHED NATIONAL MONUMENT. The [St. George \(UT\) News](#) (5/2, 3K) reports that “ranchers and representatives from agencies like the Arizona Farm Bureau and the Arizona Game and Fish Department gathered” at a community park in Moccasin, Arizona, Friday to oppose the proposed Grand Canyon Watershed National Monument. They claim “the generations-old practice of grazing cattle and ranching on the Arizona Strip is currently being threatened by a proposal that would designate 1.7 million acres of Arizona land as a national monument.”

TRAVEL DESTINATIONS BEING IMPACTED BY CLIMATE CHANGE. [USA Today](#) (5/2, Villano, 5.01M) reported that across America “the phenomenon of climate change” is “wreaking havoc on some of the most beautiful destinations in the country” and “there has been no recent evidence that the trend will slow or stop any time soon.” Among the examples the article cites are shrinking lakes, rising seas and melting glaciers.

OBAMA ADMINISTRATION CRITICIZED FOR OPENING UP LANDS TO FOSSIL FUEL PRODUCTION. For “The Blog” of the [Huffington Post](#) (5/1, Siegel, 194K), Kassie Siegel writes that “even as President Obama rightly deplores global warming’s threats to human well-being and our planet’s web of life, his administration is opening up more public lands for dirty fossil fuel production and weakening international efforts to cut planet-warming pollution.” She notes that “hundreds of thousands of acres of federal land have been leased for coal mining” and “the administration even allocated 810,000 acres of U.S. public land for oil shale and tar sands leasing in the Colorado River Basin – a grave blow to the climate, since these are among the dirtiest, most carbon-intensive fuels on earth.” Furthermore, the Interior Department has “put Arctic drilling back on the table, backed oil exploration along the Atlantic coast, and is opening up tens of millions of acres in the Gulf of Mexico for new drilling and offshore fracking.”

[America’s Great Outdoors:](#)

National Park Service:

PHILANTHROPIST'S GIFTS BENEFIT NPS SITES. On 60 Minutes on [CBS](#) (5/3), NPS Director Jon Jarvis discussed philanthropist David Rubenstein's gifts benefiting NPS sites, including his most recent donation to restore the Marine Corps War Memorial.

SPRINGFIELD RE-ENACTS LINCOLN'S FUNERAL. The [AP](#) (5/2, John O'Connor |, Ap, 5.03M) reports on 150th anniversary funeral procession that Springfield presented Saturday to commemorate Abraham Lincoln's death. According to the article, "the re-enactment brought onlookers from far and wide, including many men donning top hats and women in hoop skirts carrying parasols. Even a century-and-a-half later, some felt compelled to attend."

Additional coverage was provided by the [Denver \(CO\) Post](#) (5/4, O'Connor, 894K) and the [Chicago \(IL\) Tribune](#) (5/3, Reports, 2.74M).

PROSECUTORS DROP CHARGES AGAINST HUNTER IN RIM FIRE. The [AP](#) (5/1, Smith, Thanawala, 2.29M) reports that "criminal charges were dropped against a bow hunter accused of starting one of California's largest wildfires, a blaze that burned parts of Yosemite National Park, federal prosecutors said Friday." According to the article, "the decision came after two key witnesses unexpectedly died within months of an indictment that was handed down last year against Matthew Emerald." Prosecutors said that "without testimony from the two witnesses, they did not believe they could prove the allegations to jurors beyond a reasonable doubt."

Additional coverage was provided by the [Los Angeles \(CA\) Times](#) (5/1, Rocha, 4.03M) and the [Chicago \(IL\) Tribune](#) (5/1, Reports, 2.74M).

MANHATTAN PROJECT NATIONAL PARK TO REMAIN NEUTRAL. The [Japan Times](#) (5/2, 6K) reports that "promoting specific views on the history of U.S. atomic bomb development is not the intention of a national park to be built to commemorate facilities related to the Manhattan Project, the secret U.S. wartime atomic bomb program, the head of a body cooperating with the U.S. government on the plan indicated Friday." According to the article, "during a meeting with the mayors of the two Japanese cities that suffered atomic bombings during World War II, Cynthia Kelly, president of the Atomic Heritage Foundation, said she hopes the planned park exhibits will offer "an open-ended interpretation" and will let visitors decide for themselves what was right or wrong." Kelly "made the remarks as Nagasaki Mayor Tomihisa Taue said he is paying attention to whether the park will convey 'all the facts in a fair manner' over the development of atomic bombs and their use, as well as the inhumane nature of nuclear weapons."

PROPOSED TRIBAL NATIONAL PARK STALLED. The [Rapid City \(SD\) Journal](#) (5/3, 108K) reports that "after years of work and even a signed agreement, the once-collaborative dream of having the Pine Ridge Indian Reservation be home to the nation's first tribal national park has degenerated into a bureaucratic standoff." The Oglala Sioux Tribe has "passed a resolution halting its participation in the project. Badlands National Park, meanwhile, is withholding \$442,000 of the tribe's share of park gate receipts because of the tribe's failure to produce required annual financial reports."

NPS RECOMMENDS STRUCTURAL ANALYSIS OF CHAUTAUQUA INSTITUTION'S HISTORIC AMPHITHEATER. The [Pittsburgh Post-Gazette](#) (5/3, Pitz, 621K) reports that a NPS architect "who toured Chautauqua Institution's historic amphitheater last month has urged the nonprofit's leaders to have a structural analysis done of the 121-year-old landmark." Bonnie Halda, chief of the preservation assistance division for the NPS, toured Chautauqua March 9 and 10. In an April 14 letter to Chautauqua's president, Thomas M. Becker, Halda "suggested the nonprofit hire a professional engineer with expertise in historic buildings who can provide 'recommendations regarding the long-term stability of the structure.'"

NPS BACKS OUT OF PLAN TO BRING CAPITAL BIKESHARE TO GEORGE WASHINGTON PARKWAY. [WAMU-FM](#) Washington (5/4, 35K) reports that "plans to install Capital B keshare stations along George Washington Memorial Parkway may be hitting a snag." In 2013 the NPS and Arlington County "received a federal grant of close to \$300,000 to install eight Capital Bikeshare stations along the George Washington Memorial Parkway." But now, "sources inside Arlington County government say the National Park Service wants out." The NPS is "asking Arlington to find other places to put the Bikeshare stations because it no longer wants them."

OLYMPIC NATIONAL PARK'S ENCHANTED VALLEY CLOSED TO CAMPING. The [Tacoma \(WA\) News Tribune](#) (5/2, 242K) reports that "Olympic National Park managers have closed a portion of the Enchanted Valley to camping because black bears...were seen eating human food." When it "reopens to camping, visitors will be required to use bear canisters, thick containers designed to keep food and scented items safe from bears, rodents, raccoons and other animals." Olympic National Park superintendent Sarah Creachbaum said, "Bears that eat human food come to consider people as a food source and are extremely dangerous. Sadly, bears have gotten into and consumed human food this spring in Enchanted Valley, and we have closed the area to camping."

NPS PROPOSES OPTIONS TO RELIEVE GLACIER'S CONGESTED SUN ROAD. The [Flathead \(MT\) Beacon](#) (5/1, 15K) reports that amid "increased visitation and congestion along" Going-to-the-Sun Road at Glacier National Park, "park officials are proposing several changes that could impact how visitors travel throughout Glacier." The article notes that "the list of options includes expanded parking, a larger fleet of free shuttles, an added emphasis on biking opportunities and controlled vehicle entry through a reservation system."

VANDALS HIT OZARK NATIONAL SCENIC RIVERWAYS. The [AP](#) (5/1, 2.29M) reports that the NPS is "looking for people

who defaced a cliff in the Ozarks National Scenic Riverways along the Jacks Fork River near Eminence.” According to the article, “the graffiti on a 45- to 50-foot cliff known as Cha k Bluff was discovered last weekend.” Dennis Weiland, chief ranger at the park, says the NPS “should be able to remove the graffiti but it will have to find workers able to rappel down the cliff.”

OLYMPIC NATIONAL PARK ACCPETING BIDS TO OPERATE SOL DUC HOT SPRINGS RESORT. The [Tacoma \(WA\) News Tribune](#) (5/2, 242K) reports that “Olympic National Park is seeking proposals from companies interested in operating Sol Duc Hot Springs Resort.”

NPS HOLDING RIM OF THE VALLEY CORRIDOR MEETINGS. The [Santa Clarita Valley \(CA\) News](#) (5/3, 431) reports that the NPS “released its study earlier this month on the Rim of the Valley Corridor and is holding a meeting in Newhall for Santa Clarita, Agua Dulce, Castaic and Acton residents on May 5 in Hart Hall at Hart Park from 7 p.m. to 9 p.m.”

NATIONAL HISTORIC LANDMARK DESIGNATION SOUGHT FOR PAOLI BATTLEFIELD. The [Philadelphia Inquirer](#) (5/4, 617K) reports on the effort to designate Paoli Battlefield a national historic landmark. In March, advocates “submitted an application to the landmark committee” and “they should hear in July whether they can proceed with their bid.”

ST. CROIX NATIONAL SCENIC RIVERWAY SUPERINTENDENT INTERVIEWED. In an interview with the [Minneapolis Star Tribune](#) (5/3, Giles, 1.29M), Chris Stein, superintendent of the St. Croix National Scenic Riverway, discussed the “opportunities and threats in the pristine 250-mile riverway.”

NPS RELEASES ANNUAL PARK RANKING FOR RECREATION VISITORS FOR 2014. [KSDK-TV](#) St. Louis (5/3, 263K) reports on the NPS' Annual Park Ranking for Recreation Visitors for 2014. The article has a gallery of “the 50 national parks visited most, from smallest to largest numbers of visitors.”

ADDITIONAL COVERAGE OF ECONOMIC IMPACT OF NPS SITES. Additional coverage of the economic impact of NPS sites was provided by the [Houston \(TX\) Chronicle](#) (5/3, 2.29M).

ADDITIONAL COVERAGE: NPS SIGNS MARKETING DEAL WITH ANHEUSER-BUSCH. Additional coverage that the NPS has entered into a marketing deal with Anheuser-Busch was provided by the [Denver \(CO\) Post](#) (5/3, Blevins, 894K) and [WSB-TV Atlanta \(GA\)](#) Atlanta (5/3, 167K).

ADDITIONAL COVERAGE OF NATIONAL PARK PHOTO CONTEST. Additional coverage of the Share the Experience photo contest was provided by the [Houston Chronicle](#) (5/1, Molina, 2.29M), the [Los Angeles \(CA\) Times](#) (5/1, Forgione, 4.03M), the [Imperial Valley \(CA\) News](#) (5/3, 1K), and the [Sierra \(CA\) Sun Times](#) (5/3).

ADDITIONAL COVERAGE: MAN FALLS TO DEATH AT GRAND CANYON. Additional coverage of the man who fell to his death at the Grand Canyon was provided by the [Washington \(DC\) Post](#) (5/1, Press, 5.03M), the [Washington \(DC\) Post](#) (5/1, Press, 5.03M), the [Houston \(TX\) Chronicle](#) (4/30, 2.29M), the [Huffington Post](#) (5/1, 194K), [Reuters](#) (5/1), the [Daily Mail \(UK\)](#) (5/3, 5.37M), and the [Daily Mail \(UK\)](#) (5/3, 5.37M).

ADDITIONAL COVERAGE OF LAVA LAKE ON HAWAII'S VOLCANO. Additional coverage of the lava lake on Hawaii's volcano was provided by the [Houston \(TX\) Chronicle](#) (5/1, 2.29M).

Bureau of Land Management:

TWO CONVICTED IN ATV PROTEST RIDE. The [AP](#) (5/1, Mccombs, 2.29M) reports that “a jury convicted a southern Utah county commissioner and a blogger and acquitted two others accused of knowingly breaking the law during an ATV protest ride last year through a canyon home to Native American cliff dwellings.” The jury on Friday found San Juan County Commissioner Phil Lyman and blogger Monte Wells guilty, and it acquitted Shane Marian and Franklin “Trent” Holliday. Lyman and Wells were “found guilty of misdemeanor charges of illegal use of ATVs and conspiracy.”

Additional coverage was provided by the [Ogden \(UT\) Standard-Examiner](#) (5/2, 83K), the [Mohave Valley \(AZ\) Daily News](#) (5/3, 23K), the [Elko \(NV\) Daily Free Press](#) (5/4, 22K), the [Oklahoman](#) (5/3, 506K), and [WRAL-TV Raleigh \(NC\)](#) Raleigh, NC (5/3, 117K).

LAWMAKERS URGE QUICK RELEASE OF SECURE RURAL SCHOOLS PAYMENTS. [KTVZ-TV](#) Bend, OR (5/3, 1K) reports that Reps. Greg Walden, Peter DeFazio, Earl Blumenauer, Kurt Schrader and Suzanne Bonamici on Friday urged the BLM and the U.S. Forest Service “to swiftly release Secure Rural Schools payments to struggling Oregon counties.” the lawmakers wrote in a letter to BLM Director Neil Kornze and Forest Service Chief Tom Tidwell, “Despite efforts in Congress and in Oregon to reform federal forest management and provide greater stability for our forested communities, county governments in Oregon continue to struggle to balance their budgets. Some are even teetering on the brink of bankruptcy.”

BLM TO START ADMINISTERING CONTRACEPTIVES INTO UTAH HORSES WITH DART GUNS. The [Salt Lake \(UT\) Tribune](#) (5/3, 470K) reports that later this month, the BLM will “begin administering contraceptives to free-roaming mares in Tooele County, this time using dart guns to avoid rounding up these wild horses.” In a decision released Friday, BLM's Utah office will “administer the contraceptive Porcine Zona Pellucida, or PZP, with darts to mares roaming the Onaqui Mountain Herd Management Area, a 207,000-acre patch of public land 60 miles southwest of Tooele.”

DEMONSTRATORS PROTEST BLM PLAN THAT WOULD CLOSE SOME ROADS TO MOTORIZED VEHICLES. The

[Grand Junction \(CO\) Dails Sentinel](#) (5/3, 73K) reports that “some 250 people demonstrated Saturday against a Bureau of Land Management plan that would close some roads to motorized vehicles.” According to the article, “as the gathering made plain, people with disabilities enjoy camping, fishing and hunting as much as anyone, but the travel management section of the BLM’s resource management plan for the area seems not to notice, protesters said.”

Also reporting on the story is [KJCT-TV Grand Junction \(CO\)](#) Grand Junction, CO (5/3, 1K).

SCIENTISTS STUDY RED GULCH DINOSAUR TRACK SITE. The [AP](#) (5/3, French, 2.29M) report on “the discovery of the Red Gulch Dinosaur Track Site in 1997.” A small group came “upon what is now considered one of the best preserved dinosaur tracksites in the world.” According to the article, “originally the group thought they were on private land, but after contacting the Bureau of Land Management, which conducted a survey, they found out the site was on BLM property, Cliff Manuel said.” For nearly a year the bureau “kept the discovery under wraps as scientists studied the site,” and “since its discovery, scientists have documented 125 track ways with an estimated 1,100 different individuals leaving marks in what was once the beach of the ancient sea.”

ORGAN MOUNTAINS-DESERT PEAKS PREPARES TO CELEBRATE FIRST ANNIVERSARY. The [Alamogordo \(NM\) Daily News](#) (5/3, 19K) reports that “from May 15 to 22, elk tacos, hikes, talks, tribal blessings, interfaith services and a fiesta on the Mesilla Plaza will mark the first anniversary of the official designation of the Organ Mountains-Desert Peaks National Monument.”

Fish and Wildlife Service:

SAGE GROUSE PROVISION A CONTENTIOUS POINT IN DEFENSE BILL. [The Hill](#) (5/3, Matishak, 533K) reports on the \$612 billion defense bill approved by the House Armed Services Committee. The article notes that “a provision that blocks the Interior Department from putting the greater sage-grouse on the endangered species list nearly brought the panel’s mark-up process to a halt.”

Additional coverage of the sage grouse was provided by the [Grand Junction \(CO\) Daily Sentinel](#) (5/3, 73K) and the [Elko \(NV\) Daily Free Press](#) (5/3, 22K).

No Sage Grouse Hunting In North Dakota In 2015. The [AP](#) (5/1, Nicholson, 2.29M) reports that “North Dakota will not have a sage grouse hunting season in 2015 for the eighth straight year due to low numbers of the birds that are a candidate for the endangered list.”

FWS TO CHANGE IVORY RULE ENFORCEMENT AFTER BAGPIPES SEIZED. The [AP](#) (5/3, 5.37M) reports that the FWS is “looking for a little harmony over rules used to enforce a ban on ivory that ended up snagging a pair of teenage bagpipers at the Canadian border.” Craig Hoover, chief of the wildlife trade and conservation branch in the FWS’ division of management authority and international affairs, said “this week that the ivory ban will remain in place but the new rule will make accommodations for things like musical instruments.” Hoover said, “The criteria caused some concern. We met with the League of American Orchestras and based on those concerns, we made some changes.”

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (5/1, Stevens, 2.29M), the [Washington \(DC\) Post](#) (5/1, Rik Stevens |, Ap, 5.03M), and the [South Bend \(IN\) Tribune](#) (5/3, 188K).

FEDERAL AGENCIES RAISE CONCERNS ABOUT PESTICIDE USE IN WASHINGTON OYSTER BEDS. The [AP](#) (5/3, 709K) reports that “for decades, oyster growers in southwest Washington have battled to control native shrimp that burrow in the mudflats and make it hard for oysters to grow,” but “now, after getting state approval, a group of shellfish farmers plan to spray a widely-used neurotoxic pesticide on up to 2,000 acres of commercial shellfish beds in Grays Harbor and Willapa Bay.” They claim “it’s a safe way to keep in check a threat to the area’s multimillion-dollar shellfish industry.” However, critics, including the FWS and the National Oceanic and Atmospheric Administration, “worry about unintended harm to other species.”

Additional coverage was provided by the [Los Angeles \(CA\) Times](#) (5/3, 4.03M), the [Portland \(ME\) Press Herald](#) (5/3, 153K), the [Clark County \(WA\) Columbian](#) (5/2, 109K), the [Oregonian](#) (5/3, 1M), the [Daily Mail \(UK\)](#) (5/3, 5.37M), the [Houston \(TX\) Chronicle](#) (5/3, Le, 2.29M), the [Bend \(OR\) Bulletin](#) (5/3, 94K), the [Washington \(DC\) Post](#) (5/2, Phuong Le |, Ap, 5.03M), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (5/3, 1.07M).

The [AP](#) (5/3, 5.37M) reports that “Washington state’s largest shellfish producer says it is bowing to public pressure and will not use a pesticide recently approved to control a native burrowing shrimp that makes it hard for oysters to grow.” Taylor Shellfish Farms “decided not to spray its oyster beds after getting a stream of calls from customers and the public concerned about the spraying plan, company spokesman Bill Dewey said Friday.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (5/1, Press, 5.03M) and the [Houston \(TX\) Chronicle](#) (5/1, 2.29M).

The [AP](#) (5/4, 3.69M) reports that “Washington’s Department of Ecology has canceled a permit to spray pesticides over shellfish beds in two areas, officials said Sunday.” The department “reported hearing from residents across Washington state that the practice did not meet their expectations.”

Additional coverage was provided by the [Daily Mail \(UK\)](#) (5/4, 5.37M), the [Houston \(TX\) Chronicle](#) (5/4, 2.29M), the [Oregonian](#)

(5/4, 1M), and the [Seattle \(WA\) Times](#) (5/4, 970K).

FEDERAL AGENCIES CONSIDERING PROTECTIONS FOR GREEN SEA TURTLES. The [Pacific \(GUM\) Daily News](#) (5/3, 61K) reports that the “federal government is considering placing even more restrictions on the green sea turtle, by listing it as an ‘endangered’ species as opposed to a ‘threatened’ species for this part of the Pacific, including Guam.” According to the proposal by the FWS and the National Oceanic and Atmospheric Administration, “if the designation for the green sea turtle is changed, one possible result could be the designation of critical habitat ‘if prudent and determinable’ and the implementation of recovery plans for the green sea turtle.”

ALASKA MARITIME NATIONAL WILDLIFE REFUGE MULLING FATE OF ALASKA ISLAND FERAL CATTLE. The [AP](#) (5/1, D'oro, 2.29M) reports that “federal wildlife managers are still trying to determine the fate of hundreds of feral cattle that have long gone without caretakers on a remote, uninhabited Alaska island.” The article notes that “an aerial survey last fall counted 2,024 cattle on Chirikof Island, more than double an earlier estimate of 800.” The Alaska Maritime National Wildlife Refuge has “long planned to remove the non-native herds, which are battering the habitat of native wildlife such as seabirds and salmon,” and “now refuge officials are working on a draft environmental impact statement to explore all options, including leaving at least some of the animals in place.”

NEW REFUGE VISITOR CENTER AT KENAI NATIONAL WILDLIFE REFUGE OPENS. The [Kenai \(AK\) Peninsula Clarion](#) (5/2, 17K) reports that “Kenai National Wildlife Refuge staff said that their new visitor center, which began construction in 2013 and opened to the public for the first time on Friday, is not only larger than their previous center but more interactive.” The article notes that “the new visitor center contains a walk-through exhibit called ‘From Icefields to Oceans,’ which depicts the variety of habitats found on the Kenai Peninsula, including wetlands, tundra, and streams.”

SAMMAMISH RESIDENTS OPPOSE DEVELOPMENT. The [Seattle Times](#) (5/3, 970K) reports that “one year ago, Interior Secretary Sally Jewell and King County Executive Dow Constantine knelt with schoolchildren to release kokanee salmon fry into a Sammamish creek and celebrate a \$300,000 habitat-restoration project.” However, “at the top of the creek’s steep ravine, where it rises to the Sammamish Plateau, a developer has proposed a 30-home subdivision on 85 acres with a bridge spanning the creek.” Wally Pereyra, a fish biologist, said, “If we don’t protect the watershed, we lose the capacity to support a spawning population of fish. The creek dies by a thousand cuts.”

BOATERS RESCUED FROM RIVER DURING WYOMING ANTLER HUNT. The [AP](#) (5/3, 5.37M) reports that “rangers and law enforcement officers carried out a daring moonlight rescue after a boat full of people capsized in a rushing river and two other boats were swept downstream during a popular antler-hunting event in Wyoming.” According to the article, “a crowd of people was trying to cross the Gros Ventre River in boats and on horseback after midnight Friday, in an annual rush to find antlers shed by elk in the Bridger-Teton National Forest.” FWS officer David Bonham said that “a boat carrying five people started taking on water and then capsized.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (5/2, Press, 5.03M) and the [Houston \(TX\) Chronicle](#) (5/3, 2.29M).

STUDY: CLIMATE CHANGE COULD FORCE ONE IN SIX SPECIES TO GO EXTINCT. The [Los Angeles Times](#) (5/1, Kaplan, 4.03M) provided additional reporting on a study by University of Connecticut ecologist Mark Urban suggesting that “one in six species now alive on the planet could become extinct as a result of climate change.” The 131 studies from which estimates were derived did not consider whether or how climate change may prompt species adaptation, but University of Washington biologist Janneke Hille Ris Lambers said “climate change will have enormous impacts on the organisms.”

ADDITIONAL COVERAGE OF NORTHERN LONG-EARED BAT LISTING. Additional coverage of the listing of the northern long-eared bat as a threatened species was provided by the [Perry County \(MO\) Republic Monitor](#) (5/3, 14K) and [Pallet Enterprise](#) (5/3).

US Geological Survey:

GREEN GROUPS, LAWMAKERS HIGHLIGHT LINKS BETWEEN QUAKES, DRILLING. [The Hill](#) (5/3, Henry, 533K) reports that “green groups and lawmakers are seizing” on new USGS research released last month that links earthquakes to oil and gas drilling, arguing that it shows the “need for tougher federal regulations” instead of continue to place primary responsibility on states. While the new research is linked to “traditional” drilling, it “raised a red flag for those opposed to fracking.” However, it doesn’t appear that the EPA is likely to act in near future.

Additional coverage was provided by the [Native American Times](#) (5/3, 337).

SCIENTISTS RELEASE NEW STUDY ON AFTERSHOCKS. The [Christian Science Monitor](#) (5/2, 539K) reports that “a new study finds that the biggest aftershocks tend to strike at the edge of the original earthquake.” Study author Nicholas van der Elst, a seismologist with the USGS, said, “We’re very concerned about large aftershocks. We really want to know where to expect that magnitude 6 if it’s in a major metropolitan area.” According to the article, “by analyzing thousands of quake records, Van der Elst has shown that location is as important as earthquake size in forecasting large aftershocks.”

USGS NATIONAL SEISMIC MODELING PROJECT CHIEF PETERSEN INTERVIEWED. Mark Petersen, chief of the United States Geological Survey’s National Seismic Modeling Project, was interviewed by the [New York Times](#) (5/3, Murphy, Subscription Publication, 12.24M) on his interests.

Securing America's Energy Future:

Renewable Energy:

DROUGHT IMPACTING HOOVER DAM POWER CAPACITY. The [Albuquerque \(NM\) Journal](#) (5/3, 241K) takes a look at the power capacity at Hoover Dam, which “has dropped nearly 25 percent since 2000.” The ongoing drought “has put a serious crimp in the hydroelectric line at Hoover Dam and other power plants across the West, limiting an inexpensive and pollution-free energy source that once was considered endless.” Mike Connor, deputy secretary of the Interior Department, said, “The drought is taking a toll on power generation.”

BLM ACCEPTING COMMENTS ON WYOMING-TO-CALIFORNIA LINES FOR WIND POWER. The [AP](#) (5/1, Gruver, 2.29M) reports that “a planned 730-mile power line project to export Wyoming wind power to southern California has passed a significant regulatory milestone with the release of a federal environmental study.” The BLM “on Friday opened a 30-day period in which it will accept any protests against land-use changes for the TransWest Express project in the works since 2007.”

Additional coverage was provided by the [Ogden \(UT\) Standard-Examiner](#) (5/2, 83K) and the [Casper \(WY\) Star-Tribune](#) (5/4, 99K).

SCIENTISTS STUDYING WHERE BIRD MIGRATION PATHS COULD CROSS OFFSHORE WIND ZONE. The [Baltimore Sun](#) (5/2, 802K) reports that “teams have spent three years in waters from Long Island to the Carolinas in search of surf scoters and two other types of sea birds, capturing them and releasing them with tracking devices.” Researchers “finished their tagging last month and have begun collecting data on their movement patterns, planning to continue following the birds as long as possible.” According to the article, “the study aims to more clearly map the routes the birds take between seasons, and to learn whether they cross a 125-square-mile zone established for possible wind farms.”

EDITORIAL: STUDY ON BIRD DEATHS SHOWS OFFICIALS SHOULD REVIEW DESERT RENEWABLE ENERGY CONSERVATION PLAN . The [Palm Springs \(CA\) Desert Sun](#) (5/3, 85K) editorializes that “a new report shines a bright light on unintended consequences accompanying the state’s headlong rush into green energy.” The report “estimating that more than 3,500 birds died during the 377-megawatt Ivanpah solar project’s first year of operation is the latest sign state and federal officials should take a fresh look at California’s entire renewable energy sector as they work on long-term planning for the desert’s development as a solar power mecca.” The paper says that “state and federal officials working on the Desert Renewable Energy Conservation Plan — an overall blueprint for renewable energy development across 22.5 million acres of California desert — should also see the bird deaths report as yet another reason to take a new look at their efforts.”

Onshore Energy Development:

INTERIOR FINALIZES TRIBAL ROYALTIES RULE. The [Environment & Energy Publishing](#) (5/1, Subscription Publication, 705) reports that “American Indian tribes are set to see a boost in revenue from oil production on their lands under a new Interior Department rule that changes how royalties are calculated. “Interior’s Office of Natural Resources Revenue has “released the final version of the Indian Oil Valuation Amendments, regulations that adjust royalty calculations to ensure fair payment to tribes hosting oil and gas drilling.” According to the article, “tribes will receive payments based on the operator’s gross proceeds or an index of area oil prices – whichever is higher.”

SENATE PANEL HOLDS HEARING ON BLM FRACKING RULES. The [Natural Gas Intelligence](#) (5/3) reports that “Senate subcommittee members on Thursday took turns criticizing the federal Bureau of Land Management’s (BLM) new rule for hydraulic fracturing (fracking) on federal and tribal lands as unnecessary and an example of federal government overreach during a hearing in Washington, DC.” BLM Director Neil Kornze was “on the hot seat for more than an hour as part of a panel that included two critics of the new federal fracking rules: Wyoming Oil/Gas Supervisor Mark Watson and the Western Energy Alliance’s (WEA) Kathleen Sgamma.” Subcommittee Chair John Barrasso and other members “kept raising questions about why BLM concluded a federal fracking rule is needed when states with substantial oil/gas production already have regulations in place.”

WESTERN TOWNS CONCERNED ABOUT CLIMATE CHANGE TARGET COAL FOR FUNDS. The [Denver Post](#) (5/4, Finley, 894K) reports that ten Western mountain towns concerned about climate change are launching a campaign that targets the coal industry, seeking hundreds of millions of dollars a year from companies to help communities adapt. In a letter being sent this week to Tuesday to Interior Secretary Sally Jewell, top federal land and budget managers, 11 lawmakers and two White House officials, Mountain Pact towns seek changes in the federal government’s system for collecting royalties from coal companies.

OSMRE REPORT BACKS NAVAJO MINE EXPANSION PLAN. The [Law 360](#) (5/3, 15K) reports that “a U.S. Department of the Interior agency has determined that not signing off on a Navajo Nation-owned company’s coal mine expansion plans would create major adverse economic impacts on the local economy, according to a final environmental report released Friday.” The OSMRE’s “final environmental impact assessment for the Four Corners Power Plant and Navajo Transitional Energy Co. LLC coal mine expansion project identified several alternatives to the tribe’s proposed plans to increase the amount of coal mined at the site.”

US TO FUND ENVIRONMENTAL TRUST FOR ABANDONED URANIUM MINES IN NAVAJO NATION. The [Kansas City \(MO\) infoZine](#) (5/3, 175) reports that as the result of a settlement, “the U.S. will place \$13.2 million into an environmental

response trust to pay for the evaluations of 16 priority abandoned uranium mines located across Navajo lands.” Any cleanup work must be approved by both the Navajo Nation and the Environmental Protection Agency. The story notes that “the last uranium mine on the Navajo Nation shut down in 1986.” It also explains that “federal agencies including EPA, the Department of Energy, the Bureau of Indian Affairs, the Department of the Interior, the Nuclear Regulatory Commission and the Indian Health Service have been collaborating to address uranium contamination” at and around the sites.

Also reporting on the story is [Reuters](#) (5/1).

SEISMOLOGISTS SAY EARTHQUAKES NEAR BALDWIN HILLS NOT RELATED TO OIL OPERATIONS. The [Los Angeles Times](#) (5/4, Torres, Nelson, 4.03M) reports that earthquakes centered in the Baldwin Hills area – including a 3.8 magnitude quake that occurred on Sunday morning – “do not appear to be connected to drilling operations at nearby oil fields.” According to seismologists, “the earthquakes were far enough below the surface that drilling at the Inglewood Oil Field was not the cause.” The article also discusses previous claims from residents near the Inglewood field that “something is going on” near the Inglewood Oil Field “that causes it to rise in some places and sink in others.” However, a 2012 study commissioned by the owner and operator of the field “found that ground movements were not related to company’s operations.” Instead, the report attributed property damage claims to “natural slope instability, which was induced by rainfall.”

The [Los Angeles Times](#) (5/3, Quakebot, 4.03M) reports that in response to some residents who asked whether oil production in the Baldwin Hills/Inglewood area might have been a factor in the two recent earthquakes, Caltech scientist Lucky Jones “wrote on Twitter that it was unlikely because the depth of the quake was so far below oil production facilities.”

MICHIGAN EARTHQUAKE NOT LINKED TO FRACKING. The [Christian Science Monitor](#) (5/3, Sappenfield, 539K) reports on a 4.2-magnitude earthquake that hit near Kalamazoo, Michigan on May 2. “Reports have suggested that the Michigan quake was not the result of fracking and put its depth at only 3.7 miles,” the article reports.

ADDITIONAL COVERAGE OF PROPOSED RULES ON FEDERAL COAL ROYALTIES. Additional coverage of the new proposed rules from the Interior Department on how federal coal royalties are calculated was provided by the [Missoulian \(MT\)](#) (5/3, 118K) and [KAJ-TV](#) Kalispell, MT (5/3, 909).

EDITORIAL: CONCERNS ABOUT EARTHQUAKES ON THE RISE. The [Houston Chronicle](#) (5/3, 2.29M) editorialized that with two recent studies identifying fracking wastewater disposal sites as the reason behind increased seismic activity, more needs to be done to stop the trend. The Southern Methodist University research, along with findings from the US Geologist Survey in Oklahoma, confirmed the 600-fold increase is “very likely” related to the “disposal of underground water in the fracking process.” The Chronicle called on “lawmakers, regulators and the industry itself to take stock of the earthquake/fracking fluid connection and its numerous implications for the environment, public safety and other concerns.”

Offshore Energy Development:

FLORIDA SENATOR AIMS TO BLOCK SEISMIC TESTING OFF ATLANTIC COAST OF STATE. The “Morning Energy” blog of [Politico](#) (5/1, Dixon, 1.11M) reports, “Florida Sen. Bill Nelson is browbeating the Obama White House over the administration’s plans to let oil and gas exploration teams conduct seismic testing off the coast of his state.” On Friday, Nelson offered “legislation to block such work.” Currently, a ban “exists for putting drilling rigs off Florida’s Gulf Coast until 2022 but that doesn’t apply to the Atlantic-facing side of the state.” His “office says that 18 coastal communities in the Sunshine State have passed resolutions in opposition to seismic testing and that the senator is concerned about the impact on marine life.”

Additional coverage was provided by the [Orlando \(FL\) Sentinel](#) (5/1, 776K) and the [Daytona Beach \(FL\) News-Journal](#) (5/2, 176K).

BOEM SIGNS AGREEMENT TO RENOURISH NAPLES SHORELINE. The [Marine Technology](#) (5/3) reports that “an agreement signed between the U.S. Bureau of Ocean Energy Management (BOEM) and Collier County, Fla. will see the use of up to 500,000 cubic yards of sand from the Outer Continental Shelf (OCS) to renourish four segments of shoreline near Naples, Florida.” According to the article, “the sand will assist Collier County Parks and Recreation Department in reducing coastal storm flooding and erosion and provide recreational and environmental habitat benefits along the county’s shoreline.” BOEM Director Abigail Ross Hopper said, “Under this agreement, BOEM is continuing its commitment to work with Florida’s coastal communities to enhance resilience efforts for the future. We are committed to continuing our collaborative efforts to help local communities withstand damage from future storms and address the effects of climate change, such as rising sea levels, which challenge coastal areas.”

NORTH CAROLINA APPROVES REQUESTS FOR SEISMIC SURVEYING. The [Island Gazette \(NC\)](#) (5/3, 23K) reports that “the North Carolina Division of Coastal Management (DCM) received consistency review submissions for offshore seismic survey activities for oil and gas exploration in January of this year.” On April 24th, it “announced approval of those requests.”

BP 2010 SPILL CLAIMS ADMINISTRATOR SEEKS SUBPOENA POWER TO UNCOVER FRAUDULENT CLAIMS. The [New Orleans Times-Picayune](#) (5/3, LaRose, 733K) reported, “The claims administrator for the multibillion-dollar BP oil spill settlement is asking the federal judge overseeing the case to grant him subpoena power to investigate fraudulent claims.” Patrick Juneau requested that US District Judge Carl Barbier allow him “the ability to issue subpoenas that was granted in 2013 to Louis Freeh, the former FBI director who was appointed special master over the claims process,” the article reports. The filing also said, “The Claims Administrator will... need to obtain pertinent documents to corroborate claimant information in the course of his investigations.” It added, “Further, the financial dealings of claimants will more than likely be relevant to this inquiry. Evidence

relevant to these issues is held by third parties, who, upon information and belief, will provide the complete, relevant and necessary information in a timely manner only upon receipt of a subpoena.”

OFFSHORE DRILLING BUFFER SUPPORTED. The [Wilmington \(NC\) Star News](#) (5/2, 108K) editorializes that “Gov. Pat McCrory is urging the federal government not to impose a 50-nautical-mile buffer between our beaches and any offshore drilling for oil and gas.” However, the paper is “skeptical that the gains of tapping those offshore reserves will be worth the risk to our water quality, the coastal tourism economy, and our area’s ability to attract affluent retirees who add more to the tax base than they require in services.” According to the paper, “in defending the proposed 50-nautical mile buffer for the Southeast – that’s 57.5 regular miles – Abigail Ross Hopper of the Bureau of Ocean Energy Management said the buffer fits in with Defense Department needs, commercial fishing and environmental concerns, and would accommodate offshore wind farms.” It concludes that “a 50-nautical-mile buffer between our beaches and oil drilling makes good policy.”

OFFSHORE DRILLING CRITICIZED. In his column for the [Miami Herald](#) (5/3, 676K), Carl Hiaasen writes that BP has “spent a fortune cleaning up its image and the mess in Louisiana, Alabama, Mississippi and Florida, including \$13.7 billion in claims and settlements.” However, “the truth is that terrible damage was done by that 87-day flood of oil into the Gulf, and many communities suffered immensely.”

Tackling America’s Water Challenges:

CONTINUING COVERAGE OF DELTA TUNNELS. The [Greenwire](#) (5/1) reports that California Gov. Jerry Brown “announced major changes yesterday to his contentious plan to revamp the crumbling Sacramento-San Joaquin River Delta, reducing habitat restoration that had been seen as key for building giant tunnels under the delta.”

The [Pleasant Hill Patch](#) (5/3) reports that “some conservationists who protested outside of the event said the new plan doesn’t do enough to restore the habitat of the Delta.” Brown “admitted that fish populations there are at an all-time low, but said the plan he is putting forward is the best option.”

In a column ran in the [Chicago Tribune](#) (5/1, Fox, News, 2.74M), Justin Fox writes that “for a time the hope was that the state could get the Fish and Wildlife and Marine Fisheries services to sign off on a 50- year plan to restore delta habits while guaranteeing certain flows through the tunnels.” He notes that “in 2012 both agencies issued ‘red flag’ memos indicating that this would be a problem, and with Friday’s announcement Brown formally gave up on that.” Brown “still wants the tunnels, though, which have been redesigned a couple of times to be less burdensome to people and fish in and around the town of Hood just south of Sacramento, where they would take in their water.” But “the problem is that the water districts south of the delta that would pay for the tunnel might back without a commitment from the fisheries agencies to back off on their frequent orders to shut off the flow of water.”

Additional coverage was provided by the [Fresno \(CA\) Bee](#) (4/30, 313K), the [Davis \(CA\) Enterprise](#) (5/3, 17K), [KQED-FM San Francisco \(CA\)](#) San Francisco (4/30, 40K), and the [Bay Area \(CA\) Indymedia](#) (5/1, 2K).

IRRIGATORS SUE BOR OVER COLUMBIA RIVER WATER CONTRACT. The [AP](#) (5/3, 2.29M) reports that “a group of agricultural operators who farm near the Columbia River have filed suit against the federal government over an irrigation water contract.” The suit was filed earlier this week by the Columbia-Snake River Irrigators Association against the BOR. The association claims “the government is holding up construction of an irrigation pipeline by delaying the issuing of a water service contract.”

Also reporting on the story is the [Salem \(OR\) Capital Press](#) (5/1, 113K).

SACRAMENTO OFFICIALS WANT TO AVOID “DEAD POOL” AT FOLSOM DAM. The [Sacramento \(CA\) Bee](#) (5/3, 551K) reports that “faced with the prospect of drier winters ahead, Sacramento officials are proposing changing the way” Folsom Dam is “operated to keep more water behind its wall each year as drought insurance.” They want the federal government to “alter monthly releases from the dam so that an extra cushion of water remains stored each December to guard against a ‘dead pool’ scenario come summer and fall.”

BOR RELEASES FINAL DOCUMENTS ON TEHAMA-COLUSA WATER TRANSFERS. The [Red Bluff \(CA\) Daily News](#) (5/2, 578) reports that the BOR on Friday “released the final environmental documents for the transfer of Central Valley Project water by CVP contractors located north of the Sacramento-San Joaquin Delta.”

HUNGRY HORSE DAM VISITOR CENTER OPENS MAY 17. The [Missoulian \(MT\)](#) (5/3, 118K) reports that the BOR “announces the opening of the Hungry Horse Dam Visitor Center for the 2015 summer season beginning Sunday, May 17.”

ADDITIONAL COVERAGE OF WATER RESOURCES REFORM DEVELOPMENT ACT OF 2014. Additional coverage of the Water Resources Reform Development Act of 2014 was provided by the [Star of Grand Coulee \(WA\)](#) (4/29, 41) and the [Yakima \(WA\) Herald-Republic](#) (5/3, 86K).

LAKE MEAD WATER LEVEL FALLS TO A HISTORIC LOW. Additional coverage that Lake Mead has hit a historic low level was provided by the [New York Times](#) (5/4, Rojas, Subscription Publication, 12.24M) and the [Minneapolis Star Tribune](#) (5/3, Glionna, 1.29M).

SENATORS HEAR ABOUT WORK AT LAKE NIGHTHORSE. The [Durango \(CO\) Herald](#) (5/1, 28K) reports that at Lake

Nighthorse on Friday, Sens. Cory Gardner and Michael Bennet “heard about the work required to establish recreation at the reservoir.” They “heard about the progress toward recreation and the challenges that remain to be solved.”

Empowering Native American Communities:

ASSISTANT SECRETARY WASHBURN TESTIFIES ON TRIBAL RECOGNITION RULE CHANGES. The [New London \(CT\) Day](#) (5/3, 71K) reports that “North Stonington First Selectman Nick Mullane and U.S. Sen. Richard Blumenthal said last week that an April 22 hearing in Washington about proposed federal tribal recognition rule changes seems to have gone in their favor.” At the hearing, BIA Assistant Secretary Kevin Washburn addressed members of the House Natural Resources Committee panel on Indian affairs. According to the article, “after Washburn outlined the new set of rules — which he sent to the Office of Management and Budget for final review before sharing with panel members — those in attendance challenged him with questions of legality.”

REP BISHOP CRITICIZES INTERIOR FOR FORWARDING NEW FEDERAL RECOGNITION RULES TO OMB. The [Thibodaux \(LA\) Daily Comet](#) (5/2, 38K) reports that Rep. Rob Bishop is “demanding the Obama administration hold off on new rules that could make it easier for Indian groups to win federal recognition as tribes.” He says “he’s prepared to use every tool at his disposal to block enactment of the regulations.” Bishop “criticized the Interior Department for forwarding the regulations to the Office of Management and Budget for final approval last week.”

LEGISLATORS TARGET INDIAN CASINO IN SOUTH BEND. The [South Bend \(IN\) Tribune](#) (5/3, 188K) reports that “as the Indiana General Assembly wrapped up its 2015 session Wednesday, it took two parting shots at the Pokagon Band’s plans to build a casino in South Bend.” According to the article, “tacked on to a gambling bill that would allow riverboat casinos to be land-based, and let an Anderson horse track add casino gambling, was a last-minute amendment requiring any gaming compact the governor reaches with an Indian tribe also to require approval by the Legislature.” The House and Senate also “passed a joint resolution, on voice vote, asking Congress to change federal law to prohibit Indian tribes from opening casinos in the state.”

CASINO PROPOSALS FACE CRITICAL JUNCTURE IN MASSACHUSETTS. The [Boston Globe](#) (5/3, 886K) reports that “the state’s efforts to fulfill its promise to bring a resort casino to economically stressed Southeastern Massachusetts will undergo two critical tests in the next nine days, beginning Monday, when two would-be casino developers must submit detailed financing plans to the state Gaming Commission by 5 p.m. or face elimination.” Supporters of “those two proposals, one envisioned for New Bedford and the other in Somerset, need to show they have adequate financing to remain in the competition for the state’s third and final resort casino license.”

BIA DELAYS ACTION ON GOLF COURSE. The [Kendall \(FL\) Gazette](#) (5/3, 738) reports that “the decision to extend land trust status to the Miccosukee Golf and Country Club in Kendale Lakes has been delayed by the U.S. Bureau of Indian Affairs following new and detailed objections lodged by Miami-Dade County on Mar. 20.”

OKLAHOMA CIVIL APPEALS COURT HOLDS JUDGE CAN DEVIATE FROM INDIAN CHILD WELFARE ACT. The [Tulsa \(OK\) World](#) (5/3, 456K) reports that “disregarding new Bureau of Indian Affairs guidelines, the Oklahoma Court of Civil Appeals ruled Friday that a judge can deviate from child-placement preferences in the federal Indian Child Welfare Act when such action is in the best interest of a child.”

MONTANA OFFERS SUPPORT TO NATIVE LANGUAGE IMMERSION PROGRAMS. [NPR](#) (5/2, 1.52M) reports that “a new Montana state bill, expected to be signed into law this week,” will subsidize “Native American language immersion programs in public schools.” Under the legislation, “schools that are interested in creating immersion programs must apply to receive funding that will help compensate native language instructors.”

COMMISSION FINDS NATIVE AMERICAN KIDS MORE LIKELY TO BE PLACED IN FOSTER CARE IN MAINE. [Al Jazeera America](#) (5/3, 133K) reports that “a commission has found that Native American children in Maine are five times as likely to be placed in foster care as non-Native children.” The Maine Wabanaki-State Child Welfare Truth and Reconciliation Commission “presented its preliminary findings and recommendations on Thursday at the first in a series of public forums in Maine.”

NEW BUDGET WOULD MEAN SPENDING CUTS FOR FEDERAL INDIAN PROGRAMS. In a piece for the [Indian Country Today Media Network](#) (5/2, 28K), Mark Trahan writes that “House and Senate negotiators have reached a deal on a budget resolution,” which would “require deep spending cuts in federal Indian programs.” According to the piece, “in past budget years, American Indian and Alaska Native programs have been able to get support from the appropriations committees, but in this cycle there will be less flexibility because of the instructions in the budget.”

MODERN APPROACH TO INDIAN COUNTRY URGED. In an op-ed for the [Fairbanks \(AK\) News-Miner](#) (5/4, 42K), Jenny Bell-Jones, an assistant professor in the department of Alaska Native Studies and Rural Development at the University of Alaska Fairbanks, writes that “making sure we all have accurate information regarding the decision in *Akiachak v the Department of the Interior* is important as the deadline approaches for the state to proceed with its appeal against the decision in the case.” She argues for “a modern approach to Indian country instead of spending our dwindling funds on expensive appeals that only serve to perpetuate political discrimination.”

Office of Insular Affairs:

GUAM URGED TO EXERCISE SELF-DETERMINATION. In a piece for the [Pacific \(GUM\) Daily News](#) (5/3, 61K), Madeleine Z. Bordallo, the Guam delegate to the House, writes that “we must exercise self-determination and decide for ourselves what will be our political affiliation with the U.S.” Bordallo “authored legislation in 2010 that authorized the U.S. Department of the Interior’s Office of Insular Affairs to use technical assistance grants for political status education, and during a recent hearing of the House Natural Resources Committee, Assistant Secretary Esther Kia’aina committed to making funds available for this purpose.” Bordallo says she “will work with Kia’aina to live up to this commitment, and ensure that federal resources help to support our efforts to resolve our political status.”

Top National News:

AS BALTIMORE CURFEW ENDS, OFFICIALS WEIGH IN ON CAUSES, LESSONS. The unrest in Baltimore continued to dominate the news cycle, leading all three network newscasts and generating extensive discussion on the Sunday morning shows. After days of fear and uncertainty, reports last night and this morning offered a glimmer of hope that tensions may be easing, and officials took to the airways to weigh in on the larger lessons from the violence. Generally, the media’s narrative blamed the violence on long-standing grievances stemming from economic inequality and a pattern of police abuse against minorities.

Typical of the tenor of the coverage was [NBC Nightly News](#) (5/3, lead story, 3:30, Allen, 7.86M), which indicated that “officials” said “Baltimore has turned a very positive corner.” Baltimore’s mayor, for example, was “at a mall that re-opened” Sunday, “where, last week, high school students clashed with police,” and she “said she’s convinced the unrest is behind her city.” Stephanie Rawlings-Blake was shown calling for “improving our police department, reforming our police department, and putting in place things that will eliminate this type of incident, you know, from ever happening again.” NBC added that “in recent years, Baltimore has paid millions of dollars to settle police misconduct cases, and called in the Justice Department to help stop alleged police brutality – some cases similar to Freddie Gray’s.”

The [Washington Post](#) (5/4, Harris, Zauzmer, Bui, 5.03M) alludes to “the rhythms of recovery” emerging “as people headed to church,” while [ABC World News](#) (5/3, lead story, 2:30, Avila, 5.84M) referred to “a day of prayer and reconciliation after a week of protests and violence ignited by what the Baltimore city prosecutor says was the illegal arrest of Freddie Gray and his death.” The [CBS Evening News](#) (5/3, lead story, 2:20, Albert, 5.08M) showed Gov. Larry Hogan saying, “We’re going to get back to normal as quickly as we can.” Rawlings-Blake, meanwhile, said on [NBC’s Meet the Press](#) (5/3, Todd, 3.08M), “Everyone wants to have that sense of peace and calm back in our city. So we can begin to heal. That’s going to be my focus this week.”

Also yesterday, the [Baltimore Sun](#) (5/4, Dance, 802K) reports, Rawlings-Blake “lifted the curfew that has been in place across the city for five nights.” The [Wall Street Journal](#) (5/4, Tau, Subscription Publication, 5.68M) quotes the mayor as saying, “My number one priority in instituting a curfew was to ensure the public peace, safety, health and welfare of Baltimore citizens. It was not an easy decision, but one I felt was necessary to help our city restore calm. ... I want to thank the people of Baltimore for their patience during this difficult time as we continue to come together to heal and restore our city.” The curfew had proved controversial over the last week, says the [New York Times](#) (5/4, Blinder, Subscription Publication, 12.24M), noting that “in addition to the concerns about” its “economic impact...many demonstrators accused the police and the National Guard of rigorously enforcing it in predominantly black neighborhoods while white residents were allowed to flout it without fear of arrest for a misdemeanor.”

The [Baltimore Sun](#) (5/4, Dance, 802K) notes that a spokesman for Hogan, meanwhile, “said the Maryland National Guard will gradually draw down its presence in the city over the coming days.” [USA Today](#) (5/4, Jansen, 5.01M) notes that Hogan “agreed Sunday with the mayor in lifting the curfew,” but he also “told a news conference after a prayer service in Baltimore that 200 businesses were destroyed in rioting Monday, mostly minority owned and many without insurance, and that others struggled in the week under curfew.” Said Hogan, “It’s going to be devastating. ... Hundreds of millions of dollars have been lost. People had their homes burned down.” [The Hill](#) (5/3, Balluck, 533K) notes that Rawlings-Blake also “said on Sunday that the rioters in her city would face justice.” The mayor told Chuck Todd on NBC’s “Meet the Press,” “I don’t condone it and I will make sure those individuals are held accountable.”

[USA Today](#) (5/4, Jansen, 5.01M) reports that Hogan also “said the National Guard is pulling out, but that thousands of extra workers won’t be removed immediately.” The [Huffington Post](#) (5/3, Bellware, 194K) quoted Hogan as saying, “We’ve already started withdrawal of the Guard. ... The trucks are pulling out this morning. It’s going to take a little bit of a while.” [Reuters](#) (5/4, Malone, Simpson) also reports on the Guard’s gradual withdrawal.

[The Hill](#) (5/3, Lillis, 533K) reports, meanwhile, that “Democrats on and off Capitol Hill are linking the recent violence in Baltimore to a dearth of government programs aimed at elevating poverty,” and are “calling for broader government commitments to education, workforce training, summer jobs programs and other initiatives aimed at fighting unemployment, while hammering the Republicans’ new budget proposal for cutting those same measures.” In a panel segment that featured Philadelphia Mayor Michael Nutter and Birmingham Mayor William Bell, Rep. Chris Van Hollen talked about the situation in Baltimore on [CNN’s State Of The Union](#) (5/3, Smerconish, 420K), stating, “I think there are a whole constellation of problems here. There are systematic, underlying problems that should be addressed by government at the local, state, and federal levels.”

Van Hollen later added on [CNN’s State Of The Union](#) (5/3, Smerconish, 420K), “We need to do a lot more. ... There are specific proposals now in Congress that can make things better in places like Baltimore and around the country.” Van Hollen, notes [The Hill](#) (5/3, Lillis, 533K), also said the current GOP budget “will make poverty worse in places like Baltimore.” The [Washington Times](#) (5/4, Wolfgang, 641K) reports that “though Baltimore has long been governed by Democrats,” Van Hollen “says Republicans and their budget priorities are to blame for the economic woes in the city and elsewhere across the country.” Said

Van Hollen, "There are specific proposals right now in Congress that can make things better in places like Baltimore and around the country. And instead what we passed in Congress, the Republicans, \$10 million estates get no estate tax."

[Politico](#) (5/3, Schreckinger, 1.11M) reports that, on ABC's "This Week," Rep. Elijah Cummings "praised Baltimore's response to the death of Freddie Gray and the state's attorney who charged six police officers in the incident," saying, "We did pretty good. ...

DOI in the News:

SECRETARY JEWELL SAYS COLLABORATION CAN ACHIEVE POSITIVE OUTCOME ON GREATER SAGE GROUSE.

In an op-ed for the [Billings \(MT\) Gazette](#) (4/29, 178K), Interior Secretary Sally Jewell writes that "across 11 states in the West, including Montana, there is an unprecedented effort under way to protect the closely related greater sage grouse as the Fish and Wildlife Service prepares to make a final determination later this year on whether the bird needs to be protected under the Endangered Species Act." Efforts so far "show conservation and economic activity can and do go hand in hand." Jewell says that "with additional elbow grease, thoughtful planning and commitment, I am optimistic that – in partnership with states, industry, sportsmen, ranchers, scientists and other stakeholders – we can achieve the same outcome as we did on the bi-state sage grouse."

Wyoming Delegation Supports Bills Against Grouse Protections. The [AP](#) Raleigh, NC (4/29, 117K) reports that "Wyoming's congressional delegation is supporting a legislative effort to block federal protection of the greater sage grouse." Sens. Mike Enzi and John Barrasso are "co-sponsoring a bill by Sen. Cory Gardner of Colorado that would retain state oversight of the species for six years — regardless of an upcoming decision on whether the birds warrant protection under the Endangered Species Act." Rep. Cynthia Lummis is co-sponsoring a similar bill in the House by Rep. Chris Stewart.

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (4/29, Gruver, 2.29M), the [Casper \(WY\) Star-Tribune](#) (4/29, 99K), the [San Antonio \(TX\) Express-News](#) (4/29, 670K), the [Twin Falls \(ID\) Times-News](#) (4/29, 75K), and [KIFI-TV Idaho Falls \(ID\)](#) Idaho Falls, ID (4/29, 3K).

Lawmakers Warn Listing Grouse Could Impact Military Readiness. The [Stars And Stripes \(DC\)](#) (4/29, 19K) reports that

“on Tuesday, Republican lawmakers in the House said listing the bird could hurt military readiness.” Rep. Rob Wittman said, “Listing the sage-grouse could have serious repercussions for many critical DOD training facilities in the western United States. We should not further threaten our military’s readiness when it is already in such a precarious state.” Also, Rep. Rob Bishop said “environmental laws designed to protect animal species are threatening to undermine the military.”

Sage Grouse Seem To Be Doing Well In Utah. The [Price \(UT\) Sun Advocate](#) (4/29, 19K) reports that “all indications are Greater sage-grouse are doing well in Utah,” according to Terry Messmer, Wildlife Biologist with Utah State University. At a meeting of the Carbon Sage-grouse Management Area working group, Messmer said “all indications point to an increase in the overall number of sage-grouse in Utah. “

Bi-State Sage Grouse Decision Lauded. The [Natural Gas Intelligence](#) (4/29) reports that “Western governors lauded a U.S. Fish and Wildlife Service (USFWS) decision on the bi-state sage grouse population as an indication that the bird can be protected more widely while oil/gas development is still encouraged.” The Western Governors’ Association “praised a recent announcement by Interior Secretary Sally Jewell that the USFWS has determined that the bi-state population in California and Nevada no longer needs to be labeled as endangered.”

[KXLO-FM](#) Lewiston, MT (4/29) reports that “the United States Cattlemen’s Association (USCA) applauds last week’s announcement by the Department of Interior on the decision to not list the Bi-State Greater Sage Grouse under the Endangered Species Act (ESA) in California and Nevada.” USCA Public Lands Committee Chair Bert Paris said, “USCA applauds Secretary Jewell’s decision regarding the bi-state grouse. USCA is pleased that the work done by ranchers, land managers, wildlife and state officials has been recognized by the DOI. It is our hope that DOI will expand the territory of non-listing to include all eleven western states. The efforts currently employed by public-private partnerships across these states must be acknowledged and we will work with invested stakeholders to take this decision further.”

In his column for the [Daily Sparks Tribune \(NV\)](#) (4/28, 15K), Thomas Mitchell writes that “the latest ray of hope comes from a decision by the Interior and Agriculture departments this past week to withdraw a proposal to list the bi-state sage grouse under ESA.” He notes that “efforts are being made across the West to fight the encroachment on sagebrush range by pinyon and juniper, which should require little more than a herd of goats, a few chainsaws or brush hogs.” Mitchell is hopeful that these “coordinated efforts will sway Interior to give conservation efforts a chance.”

SECRETARY JEWELL TO BE KEYNOTE SPEAKER AT HASKELL INDIAN NATIONS UNIVERSITY’S SPRING COMMENCEMENT CEREMONY. The [Native News Online](#) (4/29) reports that Interior Secretary Sally Jewell will be the Keynote Speaker at Haskell Indian Nations University’s Spring 2015 Commencement Ceremony.

SECRETARY JEWELL APPLAUDS CHAUDHURI CONFIRMATION AS NIGC CHAIR. The [Cherokee \(OK\) Phoenix](#) (4/29, 442) reports that on April 16, Interior Secretary Sally Jewell “applauded the Senate’s confirmation of Jonodev Osceola Chaudhuri to be the chair of the National Indian Gaming Commission, the federal agency tasked with collaborating with tribes and states to regulate Indian gaming. The President nominated Chaudhuri in July 2014.” Jewell said, “Jonodev will be an outstanding chair of the National Indian Gaming Commission. Having served on the Commission, in tribal government and private practice Indian law, his experience and expertise will enable him to provide strong strategic leadership as the commission tackles the complex issues associated with supporting economic opportunities for Indian nations.”

OUTDOOR INDUSTRY A RISING POLITICAL FORCE. [Outside](#) (4/29, 234K) reports that “outdoor companies and their employees are flexing their political muscles in novel and creative ways all across the country.” The article notes that “on April 16, Count My Job sponsored a gathering on Capitol Hill that featured a very supportive” Interior Secretary Sally Jewell. Discussing “the need for better government data and more industry input on policy,” Jewell said, “If you are not at the table, you are on the menu, and I think about that a lot. Because if we value public lands and they are important to our businesses and they are important to the things we care about, then we have got to be at the table.”

PRESIDENT OBAMA WARNS WORLD CAN NO LONGER DELAY CLIMATE ACTION. President Obama writes in a [Miami Herald](#) (4/29, 676K) op-ed this morning that climate change is “real as are its effects: stronger storms, deeper droughts, longer wildfire seasons and public-health risks.” Those who “choose to deny science,” he writes, “need only to travel to the Everglades where you can actually see the effects of a changing climate.” While he pledged to “continue doing everything [he] can to prepare and protect America from the worst effects of a changing climate,” the President said, “Now it’s up to all of us to ensure that our country’s beautiful God-given landscapes remain the birthright of all Americans for generations to come.”

America’s Great Outdoors:

National Park Service:

NPS DEFENDS STUN GUN USE ON VISITOR RECORDING HAWAII LAVA LAKE WITH DRONE. The [AP](#) (4/29, Kelleher, 1.29M) reports that “a park ranger used a Taser on a man flying a drone over a lake of lava at Hawaii Volcanoes National Park, then arrested the man in front of several hundred people after telling him that flying an unmanned aircraft at a national park is prohibited.” Travis Ray Sanders was “arrested and cited with interfering with agency functions and operating an aircraft on undesignated land.” Park spokeswoman Jessica Ferracane said, “He was described as being very unpredictable, belligerent. The ranger felt he needed to be stopped for the safety of himself and others.”

Additional coverage was provided by the [Columbus \(IN\) Republic](#) (4/29, 75K), the [Huffington Post](#) (4/29, |, Kelleher, 194K), the [Boston \(MA\) Herald](#) (4/29, 709K), the [Houston \(TX\) Chronicle](#) (4/29, Kelleher, 2.29M), the [US News & World Report](#) (4/28,

907K), the [Washington \(DC\) Post](#) (4/29, Jennifer Sinco Kelleher |, Ap), the [Daily Mail \(UK\)](#) (4/29, 5.37M), [Forbes](#) (4/28, 6.84M), the [Inquisitr](#) (4/29, 369K), and [Mashable](#) (4/28, 2.3M).

GRANTS ANNOUNCED FOR MARITIME PRESERVATION PROJECTS. The [AP](#) (4/29) reports that this week, the Maritime Administration and the NPS announced \$2.6 million in grants for maritime preservation projects across the nation. The Mariners Museum in Newport News, Virginia will be awarded a nearly \$100,000 Federal grant to “conserve and restore the USS Monitor’s turret and other large artifacts from the Civil War ironclad,” according to the article.

Maine Groups To Receive Federal Grants To Help Preserve Maritime History. The [AP](#) (4/29) reports that two organizations in Maine will receive almost \$250,000 “to support maritime history preservation projects.” According to the article, Sens. Susan Collins and Angus King announced the National Park Service, “partnering with the Maritime Administration, has granted the Wood Island Life Saving Station Association...\$200,000 to repair and preserve the Life Saving Station.” Additionally, the AP notes that the Penobscot Maritime Museum will also receive almost \$50,000 to “help provide online access to the National Fisherman Collection, which showcases” the post-WWII “technological changes made to the nation’s commercial fishery.”

TOUR BUS COMPANY SUES NPS OVER \$80 MILLION NATIONAL MALL CONTRACT. In its “Top Shelf” blog, the [Washington Business Journal](#) (4/29, Cooper, Subscription Publication, 119K) reports that “a tour bus company is suing the National Park Service over an \$80 million contract to provide tours of the National Mall, reigniting a tour bus saga that dates to 2011.” National Mall Tours of Washington Inc., “a subsidiary of the company that runs bus tours of Arlington National Cemetery, claims the Park Service improperly awarded the contract to City Sightseeing Washington D.C. Inc. in March.” The lawsuit, “filed April 10 in U.S. District Court for the District of Columbia, says the award was improper because Big Bus Tours changed ownership during the contract process.”

HOUSE PASSES LEGISLATION TO FACILITATE SEARCH-AND-RESCUE EFFORTS. In its “Floor Action” blog, [The Hill](#) (4/29, Marcos, 533K) reports that “the House passed legislation on Tuesday to facilitate access to federal lands for search and recovery missions.” The legislation would “require permits for accessing federal land to be approved within 48 hours to individuals or organizations for ‘good Samaritan’ search missions for people believed to be deceased.” Under the measure, “search mission groups can obtain permits for accessing federal lands without an insurance policy if they agree to free the federal government from all liability.”

NEW DC MUSIC FESTIVAL TO HELP RAISE FUNDS FOR NATIONAL MALL RESTORATION. The [AP](#) (4/28, Brett Zongker |, Ap, 5.03M) reports that “a group working to raise money to improve the National Mall plans to launch a new music festival this year in Washington to help raise funds for the restoration effort.” According to the article, “Drake, The Strokes and British rock band Alt-J will headline the two-day Landmark Music Festival on Sept. 26 and 27.” Karen Cucurullo, the acting superintendent of the National Mall, says the NPS “wants to engage a younger generation as the agency approaches its 100th anniversary.”

Also providing coverage is [Bil board Magazine](#) (4/28, 560K).

FIRST PEOPLES BUFFALO JUMP STATE PARK MAY BECOME NATIONAL HISTORIC LANDMARK. The [Bend \(OR\) Bulletin](#) (4/29, 94K) reports that First Peoples Buffalo Jump State Park is on track to become a National Historic Landmark. In February, the National Historic Landmark Review Committee “approved nomination of First Peoples Buffalo Jump for landmark status.” A National Park Service committee is scheduled to meet in May to consider the nomination. If approved, the nomination would be sent to Interior Secretary Sally Jewell for approval.

NPS STUDY FINDS DECLINE IN DENALI NATIONAL PARK WOLF POPULATION. The [AP](#) (4/29, 2.29M) reports that “Denali National Park and Preserve’s wolf numbers have reached a new low this spring with an estimated population of just 48, according to a National Park Service study.” The NPS has “estimated the wolf population twice each year since 1986 using radio collared wolves and analysis of a few un-collared wolves.” The article notes that “this spring’s count is the lowest since an estimate of 46 wolves in fall 1986 and is the lowest on record for any spring count.”

VOYAGEURS NATIONAL PARK CLOSES AREAS AROUND EAGLE NESTING SITES. [KBJR-TV](#) Duluth, MN (4/29, 1K) reports that “biologists have decided to close off several areas in Voyageurs National Park due to bald eagle nesting sites.” Park managers are “asking both motorized and non-motorized watercraft users to not travel within 200 meters of nests where bald eagles are actively nesting during the closure period, which will last from early May through mid-August.”

ADDITIONAL COVERAGE OF ECONOMIC IMPACT OF NPS SITES. Additional coverage of the economic impact of NPS sites was provided by the [Greenville \(SC\) News](#) (4/28, 164K), the [Durango \(CO\) Herald](#) (4/28, 28K), and [WCSH-TV Portland \(ME\)](#) Portland, ME (4/28, 30K).

Bureau of Land Management:

INTERIOR URGED TO TAKE ACTION ON CEMEX ISSUE. The [Santa Clarita Valley \(CA\) Signal](#) (4/29, 30K) reports that Rep. Steve Knight “sent a letter on Tuesday to Department of Interior Deputy Secretary Michael Conner urging him to take action in the immediate future that would prevent a large mining project in Soledad Canyon.” Knight said, “Preventing Cemex from mining in Soledad Canyon is a long-standing and complicated issue, and I understand that resolving it can’t happen overnight. But time is running out and we must act now to ensure we reach a solution.” His “letter comes after the California State Director of the Bureau of Land Management corresponded with Cemex and stated that the company’s lack of diligence in obtaining necessary

permits and authorizations makes cancellation of the mining development legally viable.”

REPS. BISHOP, STEWART LAUNCH ACTION GROUP FOR STATES TO TAKE OVER FEDERAL LANDS. The [Salt Lake \(UT\) Tribune](#) (4/29, 470K) reports that “two Utah congressmen are launching a “Federal Land Action Group” to identify ways Congress could push a transfer of federal lands to state and local governments.” Reps. Chris Stewart and Rob Bishop “announced the new working group on Tuesday and said that it would hold a series of forums with experts on public lands policy with the end goal of introducing legislation to move the federal lands into state and local control.” Stewart said, “The federal government has been a lousy landlord for Western states and we simply think the states can do it better. If we want healthier forests, better access to public lands, more consistent funding for public education and more reliable energy development, it makes sense to have local control.”

Also reporting on the story is the [Deseret \(UT\) News](#) (4/29, 538K).

ATTORNEYS WANT MENTION OF GUNS, MILITIAS OUT OF RECAPTURE CANYON TRIAL. The [Salt Lake \(UT\) Tribune](#) (4/29, 470K) reports that as Phil Lyman’s “trial opens this week in Salt Lake City, his lawyers are trying to keep federal prosecutors from mentioning firearms and militias when they present their case to a jury.” Defense attorneys claim “such terms are misleading, confusing and prejudicial.” Attorney Jared Stubbs wrote, “Nor do they have anything to do with whether or not the defendants illegally rode ATVs on closed government land. Mention of guns and militias paint a picture of a violent and confrontational protest ... [and] imply that part of the alleged unlawful acts of the defendants were an armed conflict with the government.”

USAGE OF ANTIQUITIES ACT IN UTAH WOULD BE CONTROVERSIAL. In a piece for the [High Country \(CO\) News](#) (4/29, 74K), Andy Gulliford writes that “before he leaves office, President Barack Obama has the chance to significantly alter the landscape of Utah by using his ace in the hole, the Antiquities Act.” Obama “could set aside thousands of acres in southern Utah as a new national monument managed by the Bureau of Land Management,” but “like anything to do with public land in this state, a new monument is controversial.” Gulliford notes “some of the caveats: National monument status will only increase tourism, and more tourists will only mar delicate landscapes. And some folks prefer plain-old vanilla BLM lands without any special designation, though that leaves a large window open for oil and gas drilling, potential mining and, inevitably, more roads.”

Fish and Wildlife Service:

CRAIGSLIST PROHIBITS IVORY SALES. The [Greenwire](#) (4/28) reports that “in response to an investigation by wildlife advocacy groups made public today that estimates the annual value of ivory and related wildlife products for sale on Craigslist at well over \$15 million, the popular classified advertising website has added ivory to its list of prohibited items.” The International Fund for Animal Welfare and the Wildlife Conservation Society lauded “the move, which was quietly made earlier this month.” However, “given the scale of the poaching threat facing elephants and Craigslist’s role in facilitating the illicit trade, they called for further action from the website.”

FWS APPROVES TRANSFER OF ORPHANED POLAR BEAR TO ST. LOUIS ZOO . [KTVI-TV](#) St. Louis (4/28, 328K) reports that a young polar bear named Kali is headed to the St. Louis Zoo. The FWS approved Kali’s transfer Monday night. The bear will “soon be transferred from Buffalo to the brand new McDonnell Polar Bear Point in St. Louis.” According to the article, “inside the new Polar Bear Point, it will just be Kali for now, but the exhibit was built for a family, up to 5 polar bears.”

STREAMFLOW DROPPED AT MERWIN DAM TO PRESERVE WATER FOR CHINOOK SPAWNING PERIOD. The [Clark County \(WA\) Columbian](#) (4/28, 109K) reports that “state and federal officials have agreed to allow PacifiCorp to reduce streamflows in the North Fork of the Lewis River at Merwin Dam this spring in order to preserve water for the important fall chinook spawning period.” The committee includes NOAA Fisheries, the FWS, and Washington Department of Fish and Wildlife among others.

RESEARCHERS PLACE TRANSMITTERS ON MISSISSIPPI RIVER PADDLEFISH. The [Minneapolis Star Tribune](#) (4/29, 1.29M) reports that researchers are putting ultrasonic transmitters on paddlefish in the Mississippi River. The goal is to “collect information on the native fish in case invasive Asian carp arrive in large numbers, changing the ecosystem and potentially harming paddlefish.”

US Geological Survey:

USGS STUDY SHOWS SIZE OF A PYTHON’S HOME RANGE IN EVERGLADES. The [AP](#) (4/29, 2.29M) reports that “new research is revealing how far invasive Burmese pythons are slithering through the Everglades.” The USGS “published Tuesday the results of a 14-year study tracking 19 pythons through Everglades National Park.” The study “showed that a python’s home range covers an area roughly 8.5 square miles.”

Also providing coverage is [CBS News](#) (4/29, 8.2M).

USGS CREATING MODEL FOR INDUCED EARTHQUAKES. The [Rapid City \(SD\) Journal](#) (4/29, 108K) reports that “a new report by the U.S. Geological Survey (USGS) begins to address how to incorporate induced earthquakes into the seismic hazard maps.” The USGS “identified 17 areas in eight states (Alabama, Arkansas, Colorado, Kansas, New Mexico, Ohio, Oklahoma and Texas) that have experienced substantial increases in earthquakes since 2009.” Mark Petersen, chief of the USGS National Seismic Hazard Modeling Project, said, “This new report describes for the first time how injection-induced earthquakes can be incorporated into U.S. seismic hazard maps. These earthquakes are occurring at a higher rate than ever before and pose a

much greater risk to people living nearby. The USGS is developing methods that overcome the challenges in assessing seismic hazards in these regions in order to support decisions that help keep communities safe from ground shaking.”

Securing America’s Energy Future:

Renewable Energy:

DROUGHT WEAKENS HYDROPOWER OUTPUT ACROSS WEST. [The Guardian \(UK\)](#) (4/28, Frankel, 2.93M) reports on declining hydropower output from dams in areas affected by drought. “The 53 hydropower facilities run by the US Bureau of Reclamation across the west are producing 10% less power than a few years ago, despite rising demand.” The Guardian reports particular concern over Hoover Dam which is being retrofitted to handle lower reservoir levels below which, “a structure hailed as an engineering marvel...would cease to perform one of its primary functions.”

Onshore Energy Development:

INDUSTRY-BACKED REPORT CRITICIZES ROYALTY OVERHAUL. The [Greenwire](#) (4/28) reports that “an Obama administration proposal to improve how the Interior Department determines the value of federal coal would give the agency ‘unparalleled and unrestricted power,’ said an industry-backed report released today.” At issue is the Office Of Natural Resources Revenue’s proposal “to make sure taxpayers are getting their due in royalties from companies mining federally owned tracts of coal, particularly amid increased exports.”

Additional coverage was provided by [Politico](#) (4/28, Dixon, 1.11M).

QUESTIONS RAISED ABOUT COMPANIES’ ABILITY TO FUND MINE CLEANUPS.. The [Environment & Energy Publishing](#) (4/29, Subscription Publication, 705) reports that “environmental advocates and states are scrutinizing coal mining company financial reports to determine whether they have enough money to cover the cost of returning sites to pre-mining conditions.” According to the article, “states like Wyoming and West Virginia allow companies to self-bond, as long as they meet certain requirements,” but “the coal mining downturn is raising questions about the ability of companies to make good on their promises.” The article notes that “advocates say Wyoming, the nation’s top coal mining state, is central to the discussion because companies have about \$2 billion in self bonding, mostly Alpha Natural Resources Inc., Arch Coal Inc., Cloud Peak Energy Inc. and Peabody Energy Corp.”

GROUPS PROTEST NEW OIL AND GAS DRILLING PLAN FOR COLORADO’S PICEANCE BASIN. The [Summit County \(CO\) Citizens Voice](#) (4/28, 506) reports that “conservation and wildlife advocacy groups are protesting a new federal plan that covers oil and gas drilling and fracking in the northwestern Corner of Colorado.” In their formal April 27 protest letter, the groups argued that “the recently published resource management plan amendment for Bureau of Land Management’s White River Field Office failed to meet legal requirements because it didn’t consider special areas of environmental concern.” Also, the groups claim that the BLM “didn’t consider the cumulative effects of new fossil fuel development, all while claiming it can meet state-set standards for wildlife populations.”

ADDITIONAL COVERAGE OF NEW FRACKING RULE. Additional coverage of the new fracking rule was provided by [R&D Magazine](#) (4/29, 234K) and [Phys](#) (4/29, 530).

WTIMES ANALYSIS: STATISTICS, STUDIES MISUSED IN FRACKING DEBATE. The [Washington Times](#) (4/29, Richardson, 641K) reports that the “old saw” that statistics “can be used to support anything” is “being increasingly applied to science, especially, critics say, when it comes to the fight” over fracking. The Times says that determining who conducted a fracking study, along with who funded it, “has become as important as the results of the research itself as the powerful fossil fuel industry and media-savvy environmental movement spar to claim the scientific high ground.”

Offshore Energy Development:

ENVIRONMENTALISTS WANT SEC REVIEW OF SHELL’S ARCTIC REGULATORY FILINGS. The [AP](#) (4/28, Joling) reports that Oceana and the Abrams Environmental Law Clinic at the University of Chicago Law School on April 27 petitioned the US SEC “for an investigation of Royal Dutch Shell PLC and what the groups call misstatements in regulatory filings regarding the risk of a catastrophic oil spill from Arctic offshore drilling.” Mike LeVine, an attorney for Oceana, said, “Shell asserts that it has thorough response capabilities and does not explain that the techniques on which it proposed to rely on are unlikely to be effective in the Arctic, or haven’t been tested in the Arctic Ocean.”

[Reuters](#) (4/28, Gardner) reports that Andrew Sharpless, CEO of Oceana, said, “There is no proven way to clean up a spill in the icy Arctic conditions and Shell has an obligation to make investors aware of that.”

Additional coverage was provided by [FuelFix](#) (4/28, Dlouhy, 7K) and the [Longview \(TX\) News-Journal](#) (4/28, 64K).

IN EFFORT TO SWAY PRESIDENT OBAMA, GREEN GROUPS TAKE OUT AD AGAINST ARCTIC DRILLING. [The Hill](#) (4/28, Henry, 533K) reports that “more than a dozen conservation and environmental groups” took out an advertisement in USA Today on Tuesday arguing that drilling in the Arctic is “not worth the risk” of potential environmental damage. The Hill interprets that ad as an effort to push the President Obama to bar Arctic drilling, which Shell is looking to begin.

BOEM HOLDS OPEN HOUSE ON SEISMIC TESTING. The [Outer Banks \(NC\) Sentinel](#) (4/29, 25K) reports that “a number of

local residents who attended the Bureau of Ocean Energy Management's (BOEM) open house at the Ramada Plaza in Kill Devil Hills on April 27 were there to register their opposition to seismic surveying — and, more broadly, energy drilling — off the North Carolina coast." BOEM G&G Permitting Supervisory Geologist John Johnson said that "the application permitting process for seismic surveying is very lengthy and thorough. Ten applications have been filed by eight data acquisition companies, which sell their data to oil companies." BOEM Division of Environmental Sciences Marine Acoustician Stan Labak noted that "monitoring and mitigation measures are used to assess the impact on marine life and protect it during the surveying."

BOEM REASSERTS FACTS ON SAFE SEISMIC TESTING. [Breaking Energy](#) (4/28) reports that "last month BOEM reasserted the facts on safe seismic in its online 'Science Notes' feature." BOEM Chief Environmental Officer William Y. Brown notes that "to date, there has been no documented scientific evidence of noise from air guns used in geological and geophysical (G&G) seismic activities adversely affecting marine animal populations or coastal communities." Brown also "points out that the surveys characterize sub-seabed geology for energy development purposes but also are used for the government's marine minerals program and renewable energy."

US OFFICIALS HAVE HAD CONCERNS ABOUT CANADA'S RESPONSE TO OIL SPILLS FOR YEARS. The [Toronto \(CAN\) Globe and Mail](#) (4/29, Tromp, 1.1M) reports that "American authorities are nervously eyeing Canadian proposals to triple the number of oil tanker voyages through the shared waters off B.C.'s coast, saying among themselves that Canadian standards to clean up a major spill are decades behind those of the U.S. and leave states vulnerable to environmental damage and costs." In one instance, Washington State officials declared to the *Globe and Mail* that their "oil-spill response regime was far advanced" from Canada's.

SHELL, GREENPEACE DISPUTE HEADS TO COURT AGAIN. The [AP](#) (4/29, Joling) reports, "Attorneys for Royal Dutch Shell PLC presented testimony to a federal court judge Tuesday that the company needs safety zones around its Arctic drill fleet to prevent Greenpeace USA activists from endangering company workers and themselves." A Greenpeace attorney retorted that Shell's request would impede free speech.

BP'S CLAIMS OF GULF RECOVERY CRITICIZED. In an op-ed for the [Palm Beach \(FL\) Post](#) (4/29, 495K), David Yarnold, president and CEO of National Audubon Society, writes that "just in time for the fifth anniversary of the worst oil spill in U.S. maritime history, BP declared all's well on the Gulf Coast." But "what BP doesn't want you to know," according to Yarnold, is that "its crews had been on the scene of that massive cleanup for the three weeks leading up to the release of the report that claimed all cleanup operations had been long finished." Yarnold emphasizes that "in sharp contrast to BP's claims of a recovered Gulf Coast, much of the erosion and land loss caused by the oil damage won't be corrected in our lifetimes — if ever." He argues that BP "continues to be far more concerned about its bottom line than repairing the damage it inflicted on the Gulf Coast."

Tackling America's Water Challenges:

LAKE MEAD'S WATER LEVEL DROPS TO HISTORIC LOW. The [Independent \(UK\)](#) (4/29, Guion, 1.01M) reports that "the historic drought plaguing the western US has claimed another casualty, as Lake Mead — the vast Nevada reservoir that provides water to some 40 million people in the US Southwest — has dropped to its lowest water level since it first was filled, in 1937." According to the article, "the record-low water level was 1,080.18 feet (329.24 metres) above sea level, but by Monday afternoon, the water level had fallen to 1,080 feet."

BROWN SEEKS FINES OF UP TO \$10K PER DAY FOR THOSE WASTING WATER. The [Los Angeles Times](#) (4/29, Megerian, 4.03M) reports that on Tuesday, California Gov. Jerry Brown (D) announced new legislation that would increase the maximum fines for "water wasters" to \$10,000 per day, from the current \$500, and "allow local governments to issue the penalties." In addition, Brown proposed legislation to "streamline environmental reviews for some water supply projects, such as recycling facilities."

Empowering Native American Communities:

CHIPPEWA-CREE TRIBE ORDERED TO PAY ST. MARKS. The [Great Falls \(MT\) Tribune](#) (4/28, 80K) reports that "federal investigators have ordered Montana's Chippewa Cree Tribe to pay its chairman, Ken St. Marks, nearly \$650,000 in compensation for 'prohibited reprisal(s)' taken against him dating back to March 2013." On April 24, the U.S. Office of the Inspector General "issued a final report, finding that St. Marks' removal from office was motivated by his disclosures to authorities from the Inspector General's Office and the U.S. Bureau of Reclamation." The Inspector General's Office's report concludes, "(The) Chippewa Cree Tribe acted wrongfully toward St. Marks. Moreover, the numerous criminal indictments and convictions of Chippewa Cree Tribe employees and officials create significant concern for the Department about the welfare of the Chippewa Cree Tribe's government and its members."

MACKINAC TRIBE APPEALING RULING IN FEDERAL RECOGNITION CASE. The [Law 360](#) (4/29, 15K) reports that "the Mackinac Tribe said Monday that it would take its fight for federal recognition to the D.C. Circuit, appealing a late March ruling finding the tribe did not exhaust available administrative processes before filing suit against the U.S. Department of the Interior." The tribe's "notice of appeal follows U.S. District Judge Ketanji Brown Jackson's March 31 ruling granting summary judgment to the DOI, concurring with its argument that the Mackinac Tribe failed to seek formal federal recognition and reorganization through the department's prescribed process."

Office of Insular Affairs:

INTERIOR FUNDS TO BE USED TO REPAIR SCHOOLS. The [Pacific News Center](#) (4/29) reports that “Department of Education Superintendent Jon Fernandez says the funds they will be getting from the Department of Interior will be used to take care of health and safety concerns at the schools.” Fernandez says, “I think what they want to do is have an embedded team of people, two or three experts, that will work with our local employees to develop and support a maintenance plan that will address those critical health and safety issues and to be able to execute that plan in the next five years. Let’s do it so that in the end of five years, when OIA leaves, there’s confidence that DOE has that experience, expertise and a plan to take care and ensure that the work done won’t be undone.”

Top National News:

OBAMA CALLS RIOTERS “CRIMINALS” AND “THUGS,” BUT SAYS CRISIS IN BALTIMORE LONG IN COMING. Much of the coverage of the situation in Baltimore focuses on the sense of shock and fear in the streets of the city the day after the violent riots. Encapsulating much of the reporting was a morning report on the website of the [Baltimore City Paper](#) (4/28, Ericson, 214K), which said, “It is not clear yet whether Tuesday is the day after, or Day Two.” On its front page, the [Washington Post](#) (4/29, A1, Cox, Jouvenal, 5.03M) says “a pallor reminiscent of an earlier desperate era hung over [the] city Tuesday,” while in its lead story, [NBC Nightly News](#) (4/28, lead story, 3:15, Holt, 7.86M) reported on the “still-smoldering” Baltimore, where, “as you can imagine...tensions are high.” [WJZ-TV](#) Baltimore (4/28, 4:14 p.m. EDT, 69K) noted that “the violence...has resulted in more than 200 arrests, including 34 juveniles, at least 19 structure fires.”

President Obama’s [comments](#) were noted on all three network newscasts, which led with the aftermath of the violence and devoted a combined 30 minutes and 35 seconds to the story. Both on TV and print, Obama’s comments are receiving generally positive media reviews. [Bloomberg Politics](#) (4/28, Dorning, Sink, 161K), for example, says his remarks “harkened back to the promise of social change that helped propel” his “barrier-breaking 2008 candidacy.” The [New York Times](#) (4/29, Davis, Subscription Publication, 12.24M) remarks on the President’s “passion and frustration,” and [Politico](#) (4/28, Gass, 1.11M) on his “stern tone” as he urged America “to get serious about lifting up impoverished communities.” [USA Today](#) (4/29, Jackson, 5.01M) describes Obama as “at times emotional” as he “sought to balance his support of the police with criticism for the actions of some individuals,” and A.B. Stoddard said on [Fox News’ Special Report](#) (4/28, 1.53M) that the President “was very good today.”

Not everyone agreed: Tavis Smiley, host and managing editor of Tavis Smiley on PBS, writes in [USA Today](#) (4/29, 5.01M) that “Obama is right to urge the nation to do some ‘soul searching,’ but we also need moral leadership,” as “these national crises such as Ferguson and Baltimore show the limits of the president’s ‘hands off’ approach to a ‘hands up’ crisis. We have to be intentional; we have to be engaged. We don’t need another commission or task force.” And Chuck Todd said on [NBC Nightly News](#) (4/28, story 4, 1:10, Holt, 7.86M), “It will be interesting to see if the President does something he hasn’t done before. He never walked the streets of Ferguson, didn’t go to Sanford, Florida, didn’t go to North Charleston. Is Baltimore different? Does he come and walk the streets? Does he smell the burning ground that we smell and the smoldering?” Does he use “the symbolic bully pulpit? There’s been some critiques that he hasn’t done it enough.”

The [CBS Evening News](#) (4/28, story 4, 1:00, Pelley, 5.08M) noted that Obama “called the rioters ‘criminals’ and ‘thugs,’” but also “said the nation has a lot of soul-searching to do to solve urban violence.” Obama was shown saying, “In communities where there are no fathers who can provide guidance to young men, communities that where there’s no investment, and manufacturing’s been stripped away, and drugs have flooded the community and the drug industry ends up being the primary employer for a whole lot of folks, in those environments, if we think that we’re just going to send the police to do the dirty work of containing the problems that arise there without, as a nation and as a society, saying what can we do to change those communities, to help lift up those communities and give those kids opportunity, then we’re not going to solve this problem.”

On [CNN’s The Lead](#) (4/28, 320K), former Federal prosecutor Sunny Hostin took issue with the President’s use of the word “thugs,” saying, “It’s not a word certainly that I am comfortable with. It’s not a word that I use. I think we can all agree that that word, that term has been racialized and I think what I saw during the riots was...a lot of crimes being committed. I saw assault. I saw theft and arson. Those are crimes. Should we call them criminals? Yes. Thugs? I’m not comfortable with that. There’s not a place for name calling, especially racialized name calling.”

The [Baltimore Sun](#) (4/29, Fritze, 802K) notes that Obama also said of the violence, “That is not a protest. That is not a statement. ... It’s a handful of people taking advantage of the situation. They need to be treated as criminals.” In its lead story, [ABC World News](#) (4/28, lead story, 4:45, Muir, 5.84M) showed Obama saying, “When individuals get crowbars and start prying open doors to loot, they’re not protesting. They’re not making a statement. They’re stealing.” [WJZ-TV](#) Baltimore (4/28, 5:45 p.m. EDT, 69K) showed Obama adding, “When they burn down a building, they’re committing arson and they’re destroying and undermining businesses and opportunities in their own communities.”

[Politico](#) (4/28, Dove, 1.11M) reports that “the president offered not one, not two, but six points on the Baltimore riots – carefully outlined in notes he’d made ahead of a press conference on Tuesday with the Japanese prime minister.” But “really, the six points boiled down to one point: ‘This has been a slow-rolling crisis. This has been going on a long time.’” [ABC World News](#) (4/28, story 3, 1:50, Avila, 5.84M) showed Obama saying that “what’s happening in this city is a slow-rolling crisis.” Said the President, “This has been going on a long time. This is not new. And we shouldn’t pretend that it’s new.” [WBFF-TV](#) Baltimore (4/28, 5:13 p.m. EDT, 3K) reported that the President said that “if this is examined and looked at purely from a law enforcement standpoint...we are going to find ourselves back in the same situation again, because there are deeper issues that clearly need to be discussed and examined.”

[NBC Nightly News](#) (4/28, story 3, 1:30, Holt, 7.86M) reported that the President continued, “I think there are police departments that have to do some soul searching. I think there’s some communities that have to do some soul searching. But I think we as a

country have to do some soul searching. And that we don't just pay attention to these communities when a CVS burns and we don't just pay attention when a young man gets shot or has his spine snapped." The [CBS Evening News](#) (4/28, story 2, 2:35, Pegues, 5.08M), for example, noted that "according to a Baltimore Sun investigation, the city has paid about 100 people more than \$5 million to settle police brutality cases."

[Vox](#) (4/28, Prokop, 839K) noted that Obama "called for more attention to the systemic problems that plague low-income communities," a point also highlighted by [Slate](#) (4/28, Mathis-Lilley, 1.31M), which reported that "Obama pivoted to a broader discussion of the backlash against police violence, and his tone became sharper." On its website, [TIME](#) (4/28, Rhoda, 19.57M) put Obama's words in the context of "a series of moments where the nation's first black president has been called to address violence and distrust between communities of color and law-enforcement."

[NPR](#) (4/28, Calamur, 1.52M) noted that Obama "said he'd spoken to Baltimore Mayor Stephanie Rawlings-Blake and Maryland Gov. Larry Hogan on Monday about the steps they have taken to try to stop what the president called 'senseless violence and destruction.'" Running similar accounts of the President's comments this morning, among other news outlets, are the [AP](#) (4/29, Pickler), [AFP](#) (4/29), [Huffington Post](#) (4/28, Reilly, 194K), [New York Daily News](#) (4/29, Sandoval, 3.79M), [Washington Times](#) (4/29, Boyer, 641K), [Roll Call](#) (4/28, Dennis, 99K), [The Hill](#) (4/28, Fabian, 533K), [Wall Street Journal](#) (4/29, Lee, Subscription Publication, 5.68M), [Reuters](#) (4/29), the [Blaze](#) (4/28, Morgenstern, 1.87M), and the [National Journal](#) (4/28, Kelly, Alvarez, Subscription Publication, 156K).

[NBC Nightly News](#) (4/28, story 2, 3:30, Holt, 7.86M) interviewed Kweisi Mfume, who said of the looting, "Violence, burning, looting has absolutely nothing to do with the cry for justice, the investigation or to find out what caused this death." But tensions, he added, have "been simmering for 40, 50 years, since 1968." NBC Nightly News added, "African-American men [are] vanishing from daily life in places like west Baltimore because of premature deaths and soaring incarceration rates."

The [New York Times](#) (4/29, Subscription Publication, 12.24M) writes in an editorial that Obama "implied that the Baltimore Police Department had 'to do some soul-searching.'" Adds the Times, "Indeed it does: A well-documented history of extreme brutality and misconduct set the stage for just this kind of unrest." In an editorial, the [Washington Post](#) (4/29, 5.03M) similarly describes Baltimore as a city "where police have earned notoriety for abusive, vicious and brutal community interactions," and "where homicide, drug crimes, teenage pregnancy, high school truancy, poverty and joblessness are endemic in some inner-city neighborhoods." As a result, "it's not hard to fathom how Baltimore has succumbed to rioting, or why other cities might do likewise." As Obama "aptly put it on Tuesday: 'This is not new.'"

The [New York Times](#) (4/29, Shane, Subscription Publication, 12.24M) says Baltimore's "population – which peaked at nearly one million in the early 1950s – has sunk to about 622,000, a result of both white and black flight to the suburbs." That "drop slowed in recent years and now may be turning around, as several gentrifying neighborhoods draw young professionals," but "heroin and cocaine addiction, and the violence that accompanies the street drug trade, remain a scourge," while "the homicide rate...has stayed stubbornly high – at 34 per 100,000 people last year," or "about eight times New York City's."

The [Wall Street Journal](#) (4/29, Subscription Publication, 5.68M), meanwhile, editorializes that the rioting came after 40 years of uninterrupted Democratic control of the city – which came along with what it casts as misguided liberal policies. The Journal goes on to contrast the deterioration of Baltimore and other cities with changes in New York City under Rudy Giuliani. Jason L. Riley, an author and a Manhattan Institute senior fellow, argues in the [Wall Street Journal](#) (4/29, Subscription Publication, 5.68M) that race issues are not the primary consideration in Baltimore, but rather what he sees as an ingrained culture of crime that has been allowed to grow unchecked.

In his "Talking Points Memo" segment on [Fox News' The O'Reilly Factor](#) (4/28, 767K), Bill O'Reilly similarly argued that "despite African-Americans controlling Baltimore, the city is not prospering. The facts then dictate that racial persecution really isn't the problem in Baltimore. Something else is in play. That something else is personal behavior." [Later](#) (4/28, 767K) in the segment, O'Reilly said that while it is "long past time for police agencies in America to have a no tolerance policy towards brutality on the part of officers," it is "also long past time for African-American communities across America to begin to police themselves. Criminal activity, drug use, child abandonment, disrespect, general chaos all on display every single day in many places. ... No government is going to stop that."

Earlier Tuesday, Earnest Called Policing Debate "Fundamentally A Local Issue." The [Washington Post](#) (4/29, Eilperin, Mufson, 5.03M) says the President's "outpouring contrasted with his silence Monday afternoon and evening as violence spread through Baltimore." In fact, "earlier that day press secretary Josh Earnest had called tension between police and communities across the country 'fundamentally a local issue' and not a problem the federal government could solve."

Trump On Twitter: "Our Great African American President" Had Little Impact On Baltimore "Thugs." [USA Today](#) (4/29, Durando, 5.01M) reports that on Twitter, Donald Trump "slammed...Obama" yesterday, writing, "Our great African American President hasn't exactly had a positive impact on the thugs who are...destroying Baltimore." [E! Entertainment](#) (4/28, Harrison, 5.57M) noted on its website that Trump also said, "President Obama, you have a big job to do. Go to Baltimore and bring both sides together. With proper leadership, it can be done! Do it."

OBAMA TOUTS TRANS-PACIFIC PARTNERSHIP AFTER MEETING WITH JAPANESE PM. With the media's attention firmly fixed on the situation in Baltimore, the President's comments on trade following his meeting with Japanese Prime Minister Shinzo Abe were ignored by all three network newscasts and were not a significant subject of discussion on the cable news shows. Print and online outlets, meanwhile, note the remaining differences between the two nations on the TPP and the President's acknowledgment of a potentially difficult fight ahead on Capitol Hill. The President, says the [AP](#) (4/29, Kuhnhen),

also “acknowledged...the challenge he faces winning congressional support for” the deal, which “has become a cornerstone of his second term agenda.” Said Obama, “It’s never fun passing a trade bill in this town.” [Voice of America](#) (4/28, 63K) notes that the deal, “and a companion one with European nations, has drawn opposition in the US from labor unions and Democratic lawmakers,” while “business-oriented Republicans in Congress who often oppose Obama on a wide range of issues generally support the pending trade agreements.” The President said yesterday, “I’m confident we will end up getting the votes in Congress.”

In a post for [Foreign Policy](#) (4/28, 449K), however, David Francis writes that Obama and Abe “appear to remain far apart” on trade, as the two nations have yet “to close significant gaps to get the deal done by the end of Obama’s term,” or else “wait until the next US president takes office.” Mireya Solís, “a senior fellow and Japan expert at the Brookings Institute, said the remaining points of contention – rice and cars – would be the most difficult areas for diplomats to find agreement.” In fact, [The Hill](#) (4/28, Fabian, 533K) says the President “hinted that Japanese automobile trade barriers remain an issue.” Said Obama, “There are many Japanese cars in America. ... I want to see more American cars in Japan, as well.”

The [Washington Times](#) (4/29, Boyer, 641K) also refers to the two leaders “facing unresolved issues on free trade,” but in a separate [report](#) says that they “emerged from a meeting in the Oval Office expressing a commitment to work together on the” trade deal. Said Obama, “I know that the politics around trade can be hard in both our countries, but I know that Prime Minister Abe, like me, is deeply committed to getting this done. ... And I’m confident we will.”

The [National Journal](#) (4/28, Condon, Subscription Publication, 156K) reports that Obama “is likely to be smiling when Japanese Prime Minister Shinzo Abe goes to Capitol Hill on Wednesday – something he definitely didn’t do one of the last times a foreign leader spoke before Congress.” The President “sees Abe’s visit – and his intervention with Congress – as coming at a key moment, even as the United States and Japan struggle to wrap up their parts in the negotiations.”

David Ignatius, in the [Washington Post](#) (4/29, 5.03M), says that “for both Abe and Obama, the pact will come with a severe short-term political cost.” For Abe, the deal “will require compromises from big power blocs that support the ruling Liberal Democratic Party,” and in the US “liberal Democrats are in open revolt against” Obama’s trade agenda.

Obama: TPP Good For US Workers “Regardless Of What China’s Doing.” A day after telling the [Wall Street Journal](#) that the treaty was necessary to curb China’s influence in the region, [Bloomberg Politics](#) (4/28, Keane, Dougherty, 161K) notes that Obama said yesterday that “the trade pact ‘is good for Americans and American workers regardless of what China’s doing,’” adding that it is “not simply a defensive agreement.” The [Wall Street Journal](#) (4/29, Lee, Nelson, Subscription Publication, 5.68M), meanwhile, quotes Obama as saying, “We don’t think that a strong US-Japan alliance should be seen as a provocation. ... But I think we have to do it in a way that brings China and other countries into a common effort to maintain order and peace in the region.”

In fact, says the [New York Times](#) (4/29, Bradsher, Subscription Publication, 12.24M), China, “the main country worried about an American-led trade deal,” in recent times “has gone nearly silent.” While “two years ago, the prospect of the deal...evoked fears in China of commercial encirclement...the Chinese government has changed its view,” and “some of China’s leading trade policy intellectuals now say that they have few concerns about the agreement.” These analysts “also say that the pact could even help China, by making it easier for Beijing to pursue its own regional agreements.”

Business Roundtable To Launch Campaign Ad In Favor Of Trade Pact. [Bloomberg Politics](#) (4/28, Keane, Dougherty, 161K) reports that the Business Roundtable “said Tuesday it’s made a ‘six-figure’ purchase of advertising to run across the US, pressuring Congress to pass fast-track authority.”

Obama: US “Commitment To Japan’s Security Is Absolute.” Another strong Obama message reflected in today’s coverage is his assertion that “our treaty commitment to Japan’s security is absolute,” as [Reuters](#) (4/29, Spetalnick, Layne) notes. Obama had just charged that China has been “flexing its muscles” to further its South China Sea territorial claims. [AFP](#) (4/29) reports that the President hailed “the alliance” between US and Japan “as the ‘cornerstone of peace and security in the Asia-Pacific region,’” and “the two countries vowed to counter new threats and increase military deterrence.” [McClatchy](#) (4/29, Clark, 32K) indicates that Obama also called Japan “one of the US’s ‘closest allies in the world.’”

The [Japan Times](#) (4/29, 6K), meanwhile, notes that Abe told reporters, “The Japan-US alliance, based on an unwavering bond, is essential to the peace and stability of the world.”

The [New York Times](#) (4/29, Davis, Subscription Publication, 12.24M) calls “Abe’s visit...an opportunity for Mr. Obama to spotlight his pivot toward Asia and strengthen military and economic ties between the United States and Japan at a time when both countries are concerned with the rising influence of China.” He and Abe “cemented new military guidelines that will allow Japan’s military” a more active role in the world, and “both...pointed to Mr. Abe’s state visit – the first by a Japanese prime minister in nine years – as a historical milestone that reflected the power of reconciliation decades after a painful era of hostility in a year that marks the 70th anniversary of the end of World War II.”

Abe “Deeply Pained” About Comfort Women. [Politico](#) (4/28, Toosi, 1.11M) reports that during the news conference, Abe “was asked whether he’d be willing to apologize for Japan’s World War II practice of providing so-called ‘comfort women’ – who were by and large non-Japanese sex slaves – to Japanese soldiers.” The Prime Minister “sidestepped an apology,” and said instead, “I am deeply pained to think about the comfort women who experienced immeasurable pain and suffering as a result of victimization due to human trafficking. ... This is a feeling that I share equally with my predecessors.”

The [Washington Times](#) (4/29, Richardson, 641K) reports on Yong Soo Lee, age 85, who is among “the last of the surviving ‘comfort women’” and “a living testament to a disgraceful and contentious episode in Japanese history, one that Mr. Abe has been accused of trying to downplay.” Lee “plans to attend a rally outside the Capitol and then watch Mr. Abe’s speech” to Congress “from the gallery as the guest of Rep. Michael M. Honda, California Democrat, a Japanese-American and advocate for the comfort women.”

The [AP](#) (4/29, Har), meanwhile, reports that “hundreds of people who protested outside the Japanese Consulate in San Francisco are calling on...Abe to apologize for his country’s treatment of people from other Asian countries during World War II.” Abe “plans to travel to San Francisco and Silicon Valley on Thursday.”

Hundreds Invited To Abe’s Arrival Turned Away After Long Wait. [McClatchy](#) (4/29, Kumar, 32K) reports that “hundreds of people who were invited to the White House to watch the arrival ceremony Tuesday morning for the visit of...Abe” were “turned away at the gates after waiting in line for more than an hour on a cool morning.” McClatchy adds that “White House staffers did not provide a reason for closing the gates, though they did thank people for visiting the White House. (Of course, none of them had actually gotten into White House grounds).”

First Lady, Akie Abe Visit Virginia School. The [Washington Post](#) (4/29, C1, Shapiro, 5.03M) reports that the First Lady and “Akie Abe, the Japanese prime minister’s wife, visited a Virginia elementary school Tuesday and spoke to students “about the two countries’ diplomatic ties, a mutual appreciation for organic food and even sake.” Mrs. Obama told the students that “Japan is among the nation’s ‘best friends in the world,’ and that “while there may be some differences between our countries – maybe we speak different languages and eat different foods...we have so much in common.”

First Lady Wore Gown By Japanese-Born Designer To State Dinner. [Washington Post](#) (4/29, C1, Givhan, 5.03M) Style writer Robin Givhan says that the First Lady’s gown for Tuesday’s state dinner was “a beautiful example of fashion diplomacy.” The dress was designed by Tadashi Shoji, “who was born in Japan and came to the United States in the 1970s when he was headed to college.”

Japan Probing Possible Attempted Attack On US Army Camp. The [Washington Times](#) (4/29, Ernst, 641K) reports that authorities in Japan “are investigating a possible attempted rocket attack at the US Army’s Camp Zama in Japan early Tuesday morning.”

MEDIA ANALYSES: KENNEDY THE LIKELY SWING VOTE IN SCOTUS SAME-SEX MARRIAGE CASE. While the continuing unrest in Baltimore dominated the network news broadcasts, the networks spent a combined seven minutes and 10 seconds on Tuesday’s oral arguments before the Supreme Court on same-sex marriage. Print coverage this morning is also heavy. Almost universally, reports describe the justices as divided over the issue, and most reports cast Justice Anthony Kennedy as the pivotal vote in the case. Stories indicate that while he expressed reservations about changing the longstanding definition of marriage as a union between a man and a woman, he appeared to be leaning toward supporting gay marriage. For example, the [New York Times](#) (4/29, Liptak, Subscription Publication, 12.24M) says that Tuesday’s questions “suggested” that the justices “were divided along the usual lines...with Justice...Kennedy holding the controlling vote,” while the [Washington Post](#) (4/29, Barnes, Barbash, 5.03M) casts Kennedy “in a familiar role as the apparent decider.”

While Charles Krauthammer said on [Fox News’ Special Report](#) (4/28, 1.53M) that the question of whether same-sex marriage is a right “hinges on Kennedy and what side of the bed he gets out of,” [Reuters](#) (4/29, Hurley) says the Justice appeared to be moving cautiously toward backing gay unions. However, both the [Los Angeles Times](#) (4/29, Savage, Phelps, 4.03M) and the [AP](#) (4/29, Sherman) say Kennedy “did not tip his hand.”

Jonathan Karl also reported on [ABC World News](#) (4/28, story 6, 2:00, Muir, 5.84M) that “all eyes are on” Kennedy, who at first “seemed skeptical about the Court changing the long-standing view that marriage is between a man and a woman,” but was “also critical of the opponents’ argument that marriage is primarily about having children,” and Pete Williams noted on [NBC Nightly News](#) (4/28, story 7, 2:55, Holt, 7.86M) that while Kennedy, who is “likely the deciding vote,” said that “the traditional definition has been around for millennia, he also said allowing gay couples to marry gives them respect,” adding that Kennedy’s comments indicated “there’s a bare 5-4 majority in favor of same-sex marriage.”

Steve Hayes said on [Fox News’ Special Report](#) (4/28, 1.53M) that while Kennedy “has been a strong supporter of gay rights on the court,” he “has also been a strong proponent of state autonomy. In a sense what we could be looking at is this fight between two of the things that Anthony Kennedy has been the most outspoken about in the past decade,” and [McClatchy](#) (4/29, Doyle, 32K) says that while Kennedy “hinted at sympathy for same-sex marriage,” he “underscored lingering uncertainties...when he cautioned that the definition of marriage as being between a man and a woman ‘has been with us for millennia, and it’s very difficult for the court to say, “Oh, well, we know better.”” Chief Justice John Roberts expressed similar concern, [Bloomberg Politics](#) (4/28, Drajem, McLaughlin, Stohr, 161K) reports. Noting that the “‘basic definition’ of marriage is between a man and woman,” Roberts said that although “acceptance of same-sex marriage has occurred relatively quickly, people feel ‘very differently’ about issues they have an opportunity to vote on rather than having a policy imposed by a court.” Addressing a lawyer for gay marriage advocates, Roberts said, “You’re seeking to change what the institution is. ... If you prevail here, there will be no more debate.”

[Politico](#) (4/28, Gerstein, 1.11M) says the arguments “left both sides with something...to worry about.” Fears of gay marriage backers “were stoked” by Kennedy, “who came out of the gate early with questions about the dangers of upending the long tradition of limiting marriage to opposite-sex couples,” while the “scare for opponents of gay marriage” came from Roberts, “who suggested the case might be resolved as a simple matter of sex discrimination – without even having to wade into the issue of

how laws that affect gays should be treated by the courts." [The Hill](#) (4/28, Wheeler, 533K) called Roberts and Kennedy "the most likely swing votes," adding that their "tough questions to lawyers for both sides" left "uncertainty about where they would ultimately land."

The [Wall Street Journal](#) (4/29, Meckler, Kendall, Bravin, Subscription Publication, 5.68M) reports that while the plaintiffs, 16 gay and lesbian couples who have been forbidden by states to marry, contend that they have a constitutional right to the same unions as heterosexual couples and the states are violating that right, the states of Kentucky, Michigan, Ohio, and Tennessee argue that the decision of whether to recognize same-sex unions should be left to state legislatures, and [McClatchy](#) (4/29, Doyle, 32K) says the "two fundamental questions" being addressed by the Court are "whether the Constitution's 14th Amendment, which guarantees due process and equal protection of the law, compels states to license same-sex marriages," and "whether the same constitutional protections require states to recognize same-sex marriages performed elsewhere."

A [New York Times](#) (4/29, Baker, Subscription Publication, 12.24M) analysis says the fact that for "thousands of years, in societies around the globe, marriage has meant" a union between a man and a woman "weighed heavily" on the justices during Tuesday's arguments, which "challenged the justices to decide whether they are ready or willing to overturn not just legal doctrine but also embedded traditions in the name of equal rights." The Times describes the issue as a "collision of ancient understandings and modern sensibilities" that has "put the court right in the middle of one of the most defining social issues confronting 21st-century America." However, A.B. Stoddard said on [Fox News' Special Report](#) (4/28, 1.53M) that this is "not a question for this Court whether or not gay marriage is right or fair. It's a question of whether it's a constitutional right and whether they are going to overturn the rights of states to ban it. And that's a higher threshold than is it okay with you because you feel like it's the right thing to do," while the [Huffington Post](#) (4/28, Reilly, 194K) reported that the Court "seemed to be debating how – not if – same-sex marriage should become legal in every state in the country," adding that the justices "weighed whether now is the right time to force states to let same-sex couples marry." Jan Crawford noted on the [CBS Evening News](#) (4/28, story 7, 2:15, Pelley, 5.08M) that the Court "could take a more incremental step...and say if a state is only going to allow traditional marriage, it still must recognize same-sex marriages that are performed in other states, where it's legal."

The [Washington Times](#) (4/29, Wetzstein, 641K) says Kennedy and other justices "asked attorney Mary L. Bonauto, who argued for the gay couples, about why they should conclude that states had no rational basis to define marriage as it always has been defined," adding that it was "mostly the female justices, as well as Justice Stephen Breyer, who questioned the states' lawyer, John Bursch," with Justice Elena Kagan asking "how same-sex marriage would alter heterosexual marriage," Justice Ruth Bader Ginsburg noting that "including gay couples in marriage 'is not taking away anything,'" and Justice Sonia Sotomayor questioning "why marriage doesn't bind gay parents to their children like it does with biological parents." Bursch stuck "to his argument that states and the people have the right, through the democratic process, to determine marriage laws, and the high court should not intervene."

Chad Griffin, president of the Human Rights Campaign, said on [MSNBC's Now With Alex Wagner](#) (4/28, 213K) that gay marriage opponents were unable to answer the question of "what harm is done? What harm is done to that straight couple that's been married for ten or 20 years, when John and Joe or Jane and Jill next door get married," adding that they must "show what harm could possibly be caused by allowing gay marriage. Otherwise, there's no legitimate reason to discriminate against our fellow gay and lesbian citizens."

A number of editorial pages voice support for same-sex unions this morning. For example, an editorial in the [Washington Post](#) (4/29, 5.03M) says the "main lesson" from Tuesday's arguments is "how little remains of the argument against recognizing a right to same-sex marriage under the Constitution," while a [New York Times](#) (4/29, Subscription Publication, 12.24M) editorial cites an outburst during the arguments by a man in the gallery who shouted that "same-sex marriage violates the teachings of the Bible, and that its supporters will burn in hell," as a "bracing reminder" of "the depth of the discrimination that gays and lesbians continue to face across America," and "one of the major reasons the court needs to resolve, finally, the question it has been dodging for more than four decades: Is there a constitutional right to same-sex marriage?"

A [USA Today](#) (4/29, 5.01M) editorial also supports same-sex marriage, arguing that "the 14th Amendment safeguards individual rights by barring any state from making a law that denies citizens equal prote

Subject: 8:30 PM Deadline - Organ Mountains Event with President Obama & Secretary Jewell

Colleagues: we have learned that additional space is available for DOI staff to attend the event tomorrow where President Obama will sign the proclamation establishing the Organ Mountains-Desert Peaks National Monument. The doors for the event will open at 2:30 pm.

We will be taking additional staff on a first come, first served basis. If you have not been invited and you would like to attend, please email me back by 8:30 pm tonight. If you know of any other DOI team members who would like to be invited, please email me their names and email addresses too.

Again, this is first come, first served and the deadline to respond is 8:30 pm tonight. I apologize for the short turnaround.

After 8:30 pm I will send an email either confirming your participation or letting you know you are on a waiting list.

Please let me know if you have any questions. Many thanks! John Blair

Subject: 8:30 PM Deadline - Organ Mountains Event with President Obama & Secretary Jewell
To:

Colleagues: we have learned that additional space is available for DOI staff to attend the event tomorrow where President Obama will sign the proclamation establishing the Organ Mountains-Desert Peaks National Monument. The doors for the event will open at 2:30 pm.

We will be taking additional staff on a first come, first served basis. If you have not been invited and you would like to attend, please email me back by 8:30 pm tonight. If you know of any other DOI team members who would like to be invited, please email me their names and email addresses too.

Again, this is first come, first served and the deadline to respond is 8:30 pm tonight. I apologize for the short turnaround.

After 8:30 pm I will send an email either confirming your participation or letting you know you are on a waiting list.

Please let me know if you have any questions. Many thanks! John Blair

Secretary Jewell Joins Community to Celebrate Organ Mountains-Desert Peaks National Monument Designation

President's Proclamation Honors Community's Vision to Protect, Promote Public Lands in Doña Ana County and to Boost Tourism, Outdoor Recreation Economy

LAS CRUCES, NM - Secretary of the Interior Sally Jewell today joined hundreds of community members to celebrate President Obama's designation of the Organ Mountains-Desert Peaks National Monument in south-central New Mexico. The President's action supports the locally driven effort to conserve, protect and enhance some of the public lands in Doña Ana County.

The celebration took place at the XXXX. Secretary Jewell was joined by Bureau of Land Management (BLM) Director Neil Kornze, White House Council on Environmental Quality Acting Chair Mike Boots, U.S. Senators Tom Udall and Martin Heinrich, and local community and business leaders.

"Today is the culmination of a community-led effort to conserve, protect and promote these public lands, but it's the beginning of a new chapter for the businesses that will benefit from the tourism and recreation, and the wildlife that rely on this unique habitat," said Secretary of the Interior Sally Jewell. "The Organ Mountains and surrounding Desert Peaks are steeped in culture, history, wildlife and opportunities to enjoy the great outdoors – from hunting to hiking to gazing at ancient petroglyphs and fossils – and the President's action ensures that these cherished landscapes are celebrated and passed on to the generations of New Mexicans and Americans to come."

The Organ Mountains-Desert Peaks will join other popular national monuments in the Land of Enchantment, including Aztec Ruins, Bandalier, Petroglyph, Rio Grande del Norte, White Sands and others. Following the President's designation of the Rio Grande del Norte National Monument in March 2013, the BLM reported a 40% increase in visitors to the area in less than one year. A recent independent study by BBC Research & Consulting estimates that the new national monument designation could generate \$7.4 million in new economic activity annually from new visitors and business opportunities.

“,” Udall said. “”

“,” said Heinrich. “.”

Jewell in January participated in a meeting with senior officials at the Bureau of Land Management and the U.S. Border Patrol to underscore Interior's continued commitment to cooperate in providing law enforcement and border security in the area. The proclamation supports the 2006 Memorandum of Understanding between the U.S. Department of Homeland Security, the U.S. Department of the Interior, and the U.S. Department of Agriculture regarding "Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States' Borders."

The proclamation also allows watershed restoration and small-scale flood prevention projects if they are consistent with the care and management of the monument's resources.

“,” BLM Director Neil Kornze said. “.”

The BLM currently manages all of the public lands within this new national monument for a range of multiple uses which will continue, including grazing, conservation of natural and archeological resources and outdoor recreation, such as hunting, hiking, biking, and camping. Statewide, BLM-New Mexico hosted 2.9 million visitors at 28 recreation sites in fiscal year 2013. Recreation on BLM-managed lands and waters in New Mexico supported more than 1,900 jobs and contributed more than \$172 million to the state's economy in fiscal year 2012.

The Organ Mountains provide a spectacular backdrop for the City of Las Cruces, with steep, angular rock outcroppings reminiscent of organ pipes rising to nearly 9,000 feet in elevation and extending for 20 miles, running generally north and south. This high-desert landscape within the Chihuahuan Desert contains a multitude of biological zones – mixed desert shrubs and grasslands in the lowlands ascending to piñon and juniper woodlands, and finally to ponderosa pines at the highest elevations.

The area is home to a high diversity of animal life, including deer, pronghorn antelope, mountain lions, peregrine falcons and other raptors as well as rare plants, some found nowhere else in the world, such as the Organ Mountains pincushion cactus. Hundreds of archeologically and culturally significant sites are found within the new monument, including some limited Paleo-Indian artifacts, extensive rock art sites and the ruins of a ten room pueblo, among other ancient dwellings. More recent history is memorialized with Geronimo's Cave, Billy the Kid's Outlaw Rock, and sites related to early Spanish explorers. The Organ and Doña Ana Mountains are popular recreation areas, with multiple hiking trails, a popular campground, and opportunities for hunting, mountain biking, rock climbing, and other recreation.

On the west side of Las Cruces, the Desert Peaks area contains mountain ranges and peaks of the Robledo Mountains and the Sierra de las Uvas. These landscapes contain mesas and buttes interspersed with deep canyons and arroyos. Significant cultural sites of the Mogollon, Mimbres, and Jornada cultures are located throughout this region along with historic sites associated with more recent settlements, including the Butterfield Overland Stagecoach Trail. This area is also home to the unusual Night-blooming Cereus, with a one-night-a-year bloom.

To the southwest of Las Cruces is the Potrillo Mountains Complex, characterized by cinder cones, volcanic craters, and basalt lava flows in the open desert landscape. There too is abundant wildlife, and significant scientific finds including an 11,000-year old skeleton of an extinct ground sloth. In more modern times, the Apollo astronauts

trained in a section of the Potrillos because of its resemblance to a moonscape. Today it serves as a popular destination for outdoor recreation.

The Bureau of Land Management's [National Conservation Lands](#) contain some of the West's most spectacular landscapes. They include more than 875 federally recognized areas comprising more than 27 million acres of National Monuments, National Conservation Areas, Wilderness Areas, Wilderness Study Areas, Wild and Scenic Rivers, National Scenic and Historic Trails, and Conservation Lands of the California Desert.

Information about the Organ Mountains-Desert Peaks National Monument can be found at www.blm.gov/nm/omdp

THE WHITE HOUSE

Office of the Press Secretary

FOR IMMEDIATE RELEASE

May 21, 2014

President Obama Designates Organ Mountains-Desert Peaks National Monument

WASHINGTON, DC — As part of his commitment to make 2014 a year of action using his pen and phone, President Obama will sign a proclamation today to establish the Organ Mountains-Desert Peaks National Monument in south-central New Mexico, an action that, according to independent analysis, could generate \$7.4 million in new economic activity each year. Using his authorities under the Antiquities Act, the President's action will permanently preserve approximately 496,000 acres to ensure that the prehistoric, historic, and scientific values of this area remain for the benefit of all Americans while preserving access for sportsmen, ranchers, and recreational users. The Organ Mountains-Desert Peaks National Monument joins the ten other national monuments President Obama has designated across the country to permanently protect sites that are significant to our nation's rich history and natural heritage.

“Whether they’re hiking or camping or fishing, visitors to our parks and public lands are not only enjoying the bounty of our natural resources, but also promoting jobs and growth. And continuing to set aside federal land for outdoor recreation will drive critical revenue for those local communities, and preserve our pristine land for generations to come,” said **President Obama**.

“Today is the culmination of a community-led effort to preserve, protect and promote these public lands, but it’s the beginning of a new chapter for the businesses that will benefit from the tourism and recreation, and the wildlife that rely on this unique habitat,” said **Secretary of the Interior Sally Jewell**. “The Organ Mountains and surrounding Desert Peaks are steeped in culture, history, wildlife and opportunities to enjoy the great outdoors – from hunting to hiking to gazing at ancient petroglyphs and fossils – and the President’s action ensures that these cherished landscapes are celebrated and passed on to the generations of New Mexicans and Americans to come.”

The President’s proclamation honors years of work by the local community and businesses seeking increased protection and recognition for the area. Senators Martin Heinrich and Tom Udall have championed legislation to protect and preserve the Organ Mountains-Desert Peaks region. Conservation groups and sportsmen’s organizations, local tribal governments, veterans and ranchers, faith leaders and Latino leaders, historic preservationists, the nearby cities of Las Cruces and El Paso, and over two hundred local businesses have also expressed support for permanent protection.

The area is home to a high diversity of animal life, including deer, pronghorn antelope, mountain lions, peregrine falcons and other raptors as well as rare plants, some found nowhere else in the world, such as the Organ Mountains pincushion cactus. Hundreds of archeologically and culturally significant sites are found within the new monument, including some limited Paleo-Indian artifacts, extensive rock art sites and the ruins of a ten room pueblo, among other ancient dwellings. More recent history is memorialized with Geronimo’s Cave, Billy the Kid’s Outlaw Rock, and sites related to early Spanish explorers. The Organ and Doña Ana Mountains are popular recreation areas, with multiple hiking trails, a popular campground, and opportunities for hunting, mountain biking, rock climbing, and other recreation.

Today’s action builds on steps the Administration has taken over the past five years as part of the America’s Great Outdoors initiative, which fosters a 21st century approach to conservation that responds to the priorities of the American people. When he signed the Omnibus Public Land Management Act of 2009, President Obama marked the most extensive expansion of land and water conservation in more than a generation, designating more than 2 million acres of federal wilderness, thousands of miles of trails, and protecting more than 1,000 miles of rivers.

Wilderness, parks, forests, monuments, and other public lands help support local economies through tourism. Recent estimates also show that over \$50 billion were added to the economy from visits to public lands in 2012 alone. In fact, a recent study says that this national monument could double the number of visitors to the region and help grow the local economy by more than 70%. Protected public lands also attract businesses interested in relocating to areas with beautiful scenery, outdoor opportunities, and a high quality of life. These businesses can bring high paying jobs, which helps explain why, on average, western non-metro counties’ per capita income increases when there is more protected public land in the area. The outdoor recreation industry supports 6.1 million jobs nationwide.

First exercised by President Theodore Roosevelt in 1906 to designate Devils Tower National Monument in Wyoming, the authority of the Antiquities Act has been used by 16 presidents since 1906 to protect unique natural and historic features in America, such as the Grand Canyon, the Statue of Liberty, and Colorado's Canyons of the Ancients.

The monument will continue to be managed by the Bureau of Land Management as part of the system of National Conservation Lands. The Bureau of Land Management currently manages the federal land within the national monument for multiple uses, including conservation of natural and archeological resources and outdoor recreation, such as hiking, biking, camping and hunting. Recreation on BLM-managed lands and waters in New Mexico supported more than 1,900 jobs and contributed more than \$170 million to the state's economy in fiscal year 2012.

May 21, 2014

President Obama Designates Organ Mountains-Desert Peaks National Monument

WASHINGTON, DC — As part of his commitment to make 2014 a year of action using his pen and phone, President Obama will sign a proclamation today to establish the Organ Mountains-Desert Peaks National Monument in south-central New Mexico, an action that, according to independent analysis, could generate \$7.4 million in new economic activity each year. Using his authorities under the Antiquities Act, the President's action will permanently preserve approximately 496,000 acres to ensure that the prehistoric, historic, and scientific values of this area remain for the benefit of all Americans while preserving access for sportsmen, ranchers, and recreational users. The Organ Mountains-Desert Peaks National Monument joins the ten other national monuments President Obama has designated across the country to permanently protect sites that are significant to our nation's rich history and natural heritage.

“Whether they're hiking or camping or fishing, visitors to our parks and public lands are not only enjoying the bounty of our natural resources, but also promoting jobs and growth. And continuing to set aside federal land for outdoor recreation will drive critical revenue for those local communities, and preserve our pristine land for generations to come,” said **President Obama**.

“Today is the culmination of a community-led effort to preserve, protect and promote these public lands, but it's the beginning of a new chapter for the businesses that will benefit from the tourism and recreation, and the wildlife that rely on this unique habitat,” said **Secretary of the Interior Sally Jewell**. “The Organ Mountains and surrounding Desert Peaks are steeped in culture, history, wildlife and opportunities to enjoy the great outdoors – from hunting to hiking to gazing at ancient petroglyphs and fossils – and the President's action ensures that these cherished landscapes are celebrated and passed on to the generations of New Mexicans and Americans to come.”

The President's proclamation honors years of work by the local community and businesses seeking increased protection and recognition for the area. Senators Martin Heinrich and Tom Udall have championed legislation to protect and preserve the Organ Mountains-Desert Peaks region. Conservation groups and sportsmen's organizations, local tribal governments, veterans and ranchers, faith leaders and Latino leaders, historic preservationists, the nearby cities of Las Cruces and El Paso, and over two hundred local businesses have also expressed support for permanent protection.

The area is home to a high diversity of animal life, including deer, pronghorn antelope, mountain lions, peregrine falcons and other raptors as well as rare plants, some found nowhere else in the world, such as the Organ Mountains cholla cactus. Hundreds of archeologically and culturally

significant sites are found within the new monument, including some limited Paleo-Indian artifacts, extensive rock art sites and the ruins of a ten room pueblo, among other ancient dwellings. More recent history is memorialized with Geronimo's Cave, Billy the Kid's Outlaw Rock, and sites related to early Spanish explorers. The Organ and Doña Ana Mountains are popular recreation areas, with multiple hiking trails, a popular campground, and opportunities for hunting, mountain biking, rock climbing, and other recreation.

Today's action builds on steps the Administration has taken over the past five years as part of the America's Great Outdoors initiative, which fosters a 21st century approach to conservation that responds to the priorities of the American people. When he signed the Omnibus Public Land Management Act of 2009, President Obama marked the most extensive expansion of land and water conservation in more than a generation, designating more than 2 million acres of federal wilderness, thousands of miles of trails, and protecting more than 1,000 miles of rivers.

Wilderness, parks, forests, monuments, and other public lands help support local economies through tourism. Recent estimates also show that over \$50 billion were added to the economy from visits to public lands in 2012 alone. In fact, a recent study says that this national monument could double the number of visitors to the region and help grow the local economy by more than 70%. Protected public lands also attract businesses interested in relocating to areas with beautiful scenery, outdoor opportunities, and a high quality of life. These businesses can bring high paying jobs, which helps explain why, on average, western non-metro counties' per capita income increases when there is more protected public land in the area. The outdoor recreation industry supports 6.1 million jobs nationwide.

First exercised by President Theodore Roosevelt in 1906 to designate Devils Tower National Monument in Wyoming, the authority of the Antiquities Act has been used by 16 presidents since 1906 to protect unique natural and historic features in America, such as the Grand Canyon, the Statue of Liberty, and Colorado's Canyons of the Ancients.

The monument will continue to be managed by the Bureau of Land Management as part of the system of National Conservation Lands. The Bureau of Land Management currently manages the federal land within the national monument for multiple uses, including conservation of natural and archeological resources and outdoor recreation, such as hiking, biking, camping and hunting. Recreation on BLM-managed lands and waters in New Mexico supported more than 1,900 jobs and contributed more than \$170 million to the state's economy in fiscal year 2012.

REMARKS BY THE PRESIDENT

DESIGNATING THE ORGAN MOUNTAINS-DESERT PEAKS NATIONAL MONUMENT

Department of the Interior

Washington, D.C.

4:25 P.M. EDT

THE PRESIDENT: Thank you. (Applause.) Everybody, please have a seat. Thank you so much. Thank you. Well, good afternoon, everybody. As somebody who lives in the neighborhood, I thought I might just drop by and see what all the fuss is about. (Laughter.) I want to thank Sally for hosting me here today.

And I am thrilled to be with all of you because of your work -- not to mention some of the art on the walls reminds me that one of the great

blessings of being an American is that we are blessed with some of the most beautiful landscapes and real estate on Earth. I think about the awe that I felt as a little boy the first time I saw the Grand Canyon. I think about the pride that I felt when I took my daughters to see Yellowstone. I think about the memories of what it's like to go on a hike without a security detail behind me. (Laughter.) It's a wistful feeling. (Laughter.)

But most of all, I think about our obligation to be good stewards to the next generation -- to make sure that our children's children get the same chance to experience all of these natural wonders. So today, I'm here to announce that I am using my executive authority to protect more of our pristine landscapes by designating the Organ Mountains-Desert Peaks region a National Monument. (Applause.) I am grateful for the incredible partnership of so many residents of this region -- including ranchers and tribal leaders and hunters -- and many of you here today, especially Senators Martin Heinrich and Tom Udall and former Senator Jeff Bingaman, who were instrumental in helping preserve this treasured landscape. (Applause.)

Anyone who's ever seen the Organ Mountains that overlook Las Cruces, New Mexico will tell you that they are a spectacular sight. Secretary Jewell told me as much after her visit there. You got massive rocks that jut up 9,000 feet in the air and stretch for 20 miles, like the organ pipes of a giant. And they're home to many of God's smaller creatures, as well -- deer and antelope roam; falcons, mountain lions. There are even plant species that don't grow anywhere else in the world.

But it's not just the natural beauty of this region that makes it invaluable to future generations. Its caves and peaks and cliffs bear the marks of millennia of history. From the rock art of some of the first Native peoples living on the land to the trail traveled by some of the first overland mail carriers. Some of the most notorious adventures of the Wild West were written in the Organ Mountains-Desert Peaks region.

More than 130 years ago, Billy the Kid took cover in the Robledo Mountains and literally left his mark -- inscribing his name into what we now know as "Outlaw Rock." You can see it today, and I want to make sure that future generations can see it as well. Legend has it that Apache chief Geronimo hid in these same mountains and staged a miraculous escape from what is now called "Geronimo's Cave."

Every year, tens of thousands of Americans visit the region to discover what still remains of these landmarks, and to explore what lies along its beautiful trails. Families go on vacation. Tribes return to uphold rich traditions. Archeologists dig for ancient artifacts. Scientists study a thriving environment. And all of it supports the local economy and jobs in the region.

So, we're not just preserving history. Outdoor recreation at parks and forests and other public lands brings in tourism dollars -- attracting new businesses and encouraging spending at lodgings and food establishments and, of course, park souvenirs. One recent study says that the Organ Mountains-Desert Peaks designation alone could double the number of visitors to the area and help grow the local economy by more than 70 percent.

It's impossible to put a price on towering peaks and pristine forests and America's cultural history, but we know that our national parks have an economic impact that extends beyond their boundaries. In 2012, hundreds of millions of recreational visits to public lands and waters generated over \$50 billion for local communities, and supported nearly 900,000 jobs. So whether they're hiking or camping or fishing, visitors to our parks and public lands are not only enjoying the bounty of our natural resources, but also they're promoting jobs and they're promoting growth. And continuing to set aside federal land for outdoor recreation will drive critical revenue for those local communities, and preserve our pristine lands for generations to come.

The Organ Mountains-Desert Peaks National Monument is the second national monument I've designated this year, the 11th overall. I've preserved more than 3 million acres of public lands for future generations. And I am not finished. (Applause.)

As I said in my State of the Union address, I'm searching for more opportunities to preserve federal lands where communities are speaking up. Because wherever I see an opening to get things done for the American people, I'm going to take it. I've said before: I want to work with anyone in Congress who is ready to get to work and shares those goals, but recently they haven't gotten the job done.

Congress is sitting on dozens of bills that would help protect our precious land and wildlife. And by one count, there's a set of 10 land conservation bills that have been introduced a combined 52 times over the past 30 years, and they are still stuck. So I'm here to pick up a little bit of the slack. (Laughter and applause.) Because there is no time to waste to preserve our precious resources and give a shot in the arm to local economies, like Las Cruces.

So I want to thank everybody, again, not just here on stage but all of those at the Department of the Interior who worked so hard on this project. And I want to thank all the public servants around the country for everything that you do to guide Americans through God-given wonders, and keep our national landscapes pristine -- not only today, but for many years to come.

Thanks, everybody. And now I'm going to sign this proclamation.

(Proclamation is signed.)

Here is a little bit to start. There is also a 2007 MOU I can send you which manages the boarder and doesn't change anything on how we manage boarder security.

DHS says Organ Mountains designation won't impede border security

Phil Taylor, E&E reporter

Published: Wednesday, May 21, 2014

President Obama's plan to designate a 500,000-acre national monument in southern New Mexico today will not impede the government's ability to secure the Mexican border, according to U.S. Customs and Border Protection.

The CBP statement refutes claims by Rep. Rob Bishop (R-Utah) and a local New Mexican sheriff that the Organ Mountains-Desert Peaks National Monument would restrict land access and impede the U.S. Border Patrol from cracking down on illegal drug and human trafficking.

"This designation will in no way limit our ability to perform our important border security mission, and in fact provides important flexibility as we work to meet this ongoing priority," CBP spokeswoman Jenny Burke said in an email. "CBP is committed to continuing to work closely with the Department of the Interior and the U.S. Forest Service to maintain border security while ensuring the protection of the environment along the border."

Obama's plans and previous legislative proposals to protect five mountain ranges above the Chihuahan Desert grasslands surrounding Las Cruces have sparked debate for years over whether they would slow officers' pursuit of illegal drug smugglers.

Bishop, the chairman of the Natural Resources Subcommittee on Public Lands and Environmental Regulation, sent a [letter](#) to Obama this week saying it would be "irresponsible" to designate a monument before finding solutions to "existing criminal activities plaguing the border."

"Restrictive environmental laws within these federal corridors limit Border Patrol access and, as a result, make it easier for drug smugglers and human traffickers to move their drugs and people in and out of the United States unnoticed," he said.

In addition, Doña Ana County Sheriff Todd Garrison was quoted this week in the Las Cruces *Sun-News* warning that the designation would shut down access for his deputies, allowing border crossers to treat the land as they wish.

"The lands they're trying to promote will be torn up and misused by people that don't give a flip about them anyway," Garrison said.

In reality, the monument's specific boundaries and management prescriptions will not be known until later this afternoon when Obama signs the proclamation. The White House has said the monument will be based on [S. 1805](#) by New Mexico Democratic Sens. Tom Udall and Martin Heinrich.

That bill would tighten motorized restrictions in the monument area by also designating 240,000 acres of wilderness. But it also would drop wilderness protections from within 5 miles of the border and keep a major east-west route through the wilderness open to law enforcement officials.

CBP backed the bill in a [letter](#) to Heinrich last January, stating it would "significantly enhance the flexibility" of Border Patrol by specifying that agents would have unfettered access in a 5-mile border zone currently protected as a wilderness study area.

While the Obama monument will be modeled after the bill, presidents can neither declare wilderness nor release wilderness study areas from the roadless protection they were granted by Congress. Both would require passage of the Udall-Heinrich bill.

Interior Secretary Sally Jewell in January met with senior officials at the Bureau of Land Management and Border Patrol in southern New Mexico to pledge her cooperation in policing the area, according to an Interior Department official.

Today's proclamation will also allow watershed restoration and small-scale flood prevention projects that support the monument's purpose, activities that may not have been possible in wilderness areas.

Monument supporters said the president is mindful of the security threat.

"The current wild character of Organ Mountains-Desert Peaks has led to extremely low rates of illegal border crossing activity," said Garrett Reppenhagen, regional coordinator for Vet Voice Foundation, a Portland, Ore.-based nonprofit that advocates for veterans on issues including clean energy and the protection of public lands.

Peter Ossorio, a Las Cruces resident and retired Army intelligence officer who prosecuted drug smugglers in southern New Mexico as an assistant U.S. attorney, said current Border Patrol measures make the area "nearly impenetrable."

Organ Mountains will be more than twice as big as Obama's largest designation to date, the 243,000-acre Rio Grande del Norte National Monument in northern New Mexico ([E&ENews PM](#), May 19).

The move comes months after Obama pledged in his State of the Union address to use executive powers to set aside public lands that Congress fails to protect.

The move is backed strongly by conservation, sportsmen's, tribal, county and national security leaders, as well as local businesses that cite an independent report that found the designation would contribute about \$7.4 million to the local economy each year.

It is opposed by Bishop and Rep. Steven Pearce (R-N.M.), who represents the area. Both say Obama is abusing the Antiquities Act and circumventing Congress.

Some ranchers also worry that the monument will lead to new land restrictions, though administration officials insist that will not be the case.

That bill would tighten motorized restrictions in the monument area by also designating 240,000 acres of wilderness. But it also would drop wilderness protections from within 5 miles of the border and keep a major east-west route through the wilderness open to law enforcement officials.

CBP backed the bill in a [letter](#) to Heinrich last January, stating it would "significantly enhance the flexibility" of Border Patrol by specifying that agents would have unfettered access in a 5-mile border zone currently protected as a wilderness study area.

While the Obama monument will be modeled after the bill, presidents can neither declare wilderness nor release wilderness study areas from the roadless protection they were granted by Congress. Both would require passage of the Udall-Heinrich bill.

Interior Secretary Sally Jewell in January met with senior officials at the Bureau of Land Management and Border Patrol in southern New Mexico to pledge her cooperation in policing the area, according to an Interior Department official.

Today's proclamation will also allow watershed restoration and small-scale flood prevention projects that support the monument's purpose, activities that may not have been possible in wilderness areas.

Monument supporters said the president is mindful of the security threat.

"The current wild character of Organ Mountains-Desert Peaks has led to extremely low rates of illegal border crossing activity," said Garrett Reppenhagen, regional coordinator for Vet Voice Foundation, a Portland, Ore.-based nonprofit that advocates for veterans on issues including clean energy and the protection of public lands.

Peter Ossorio, a Las Cruces resident and retired Army intelligence officer who prosecuted drug smugglers in southern New Mexico as an assistant U.S. attorney, said current Border Patrol measures make the area "nearly impenetrable."

Organ Mountains will be more than twice as big as Obama's largest designation to date, the 243,000-acre Rio Grande del Norte National Monument in northern New Mexico ([E&ENews PM](#), May 19).

The move comes months after Obama pledged in his State of the Union address to use executive powers to set aside public lands that Congress fails to protect.

The move is backed strongly by conservation, sportsmen's, tribal, county and national security leaders, as well as local businesses that cite an independent report that found the designation would contribute about \$7.4 million to the local economy each year.

It is opposed by Bishop and Rep. Steven Pearce (R-N.M.), who represents the area. Both say Obama is abusing the Antiquities Act and circumventing Congress.

Some ranchers also worry that the monument will lead to new land restrictions, though administration

officials insist that will not be the case.

**Memorandum of Understanding
Among
U. S. Department of Homeland Security
and
U. S. Department of the Interior
and
U. S. Department of Agriculture
Regarding
Cooperative National Security and Counterterrorism
Efforts on Federal Lands along the United States' Borders**

I. Purpose and Scope

A. This Memorandum of Understanding (MOU) is made and entered into by the Department of Homeland Security (DHS), including and on behalf of its constituent bureau U.S. Customs and Border Protection (CBP) and the CBP Office of Border Patrol (CBP-BP); the Department of the Interior (DOI), including and on behalf of its constituent bureaus, the National Park Service (NPS), U.S. Fish and Wildlife Service (FWS), Bureau of Indian Affairs (BIA), Bureau of Land Management (BLM), and the Bureau of Reclamation (BOR); and the Department of Agriculture (USDA), including and on behalf of its constituent agency the U.S. Forest Service (USFS). Throughout this MOU, these three Departments, including their constituent agencies, may be referred to as "the Parties." Any reference to a bureau, agency, or constituent component of a Party shall not be deemed to exclude application to any appropriate bureau or constituent component of that Party. DHS recognizes that the BIA enters into this agreement only on its own behalf and not on behalf of any Indian tribe.

B. The geographic and jurisdictional scope of this MOU is nationwide. The Parties recognize the national security and counterterrorism significance of preventing illegal entry into the United States by cross-border violators (CBVs), including but not limited to the following: drug and human smugglers and smuggling organizations, foreign nationals, and terrorists and terrorist organizations. The Parties further recognize that damage to DOI and USDA-managed lands and natural and cultural resources is often a significant consequence of such illegal entry. The Parties are committed to preventing illegal entry into the United States, protecting Federal lands and natural and cultural resources, and - where possible - preventing adverse impacts associated with illegal entry by CBVs.

C. This MOU is intended to provide consistent goals, principles, and guidance related to border security, such as law enforcement operations; tactical infrastructure installation; utilization of roads; minimization and/or prevention of significant impact on or impairment of natural and cultural resources; implementation of the Wilderness Act, Endangered Species Act, and other related environmental law, regulation, and policy across land management agencies; and provide for coordination and sharing information

on threat assessments and other risks, plans for infrastructure and technology improvements on Federal lands, and operational and law enforcement staffing changes. This MOU provides guidance in the development of individual agreements, where appropriate, between CBP and land management agencies to further the provisions contained herein.

D. This MOU is entered into pursuant to the governing statutory authorities of each of the Parties.

E. The Parties acknowledge that CBP operation and construction within the sixty-foot "Roosevelt Reservation" of May 27, 1907 (along the US-Mexico border) and the sixty-foot "Taft Reservation" of May 3, 1912 (along the US-Canada border) is consistent with the purpose of those reservations and that any CBP activity (including, but not limited to, operations and construction) within the sixty-foot reservations is outside the oversight or control of Federal land managers.

F. This MOU supersedes any conflicting provision of any prior MOU or Memorandum of Agreement between the Parties or their subordinate bureaus or components.

II. Background

A. DHS, through its constituent bureaus (including CBP and its CBP-BP), is statutorily mandated to control and guard the Nation's borders and boundaries, including the entirety of the northern and southern land and water borders of the United States.

B. DOI and USDA, through their constituent bureaus, are statutorily charged as managers of Federal lands throughout the United States, including DOI and USDA lands in the vicinity of international borders that are administered as wilderness areas, conservation areas, national forests, wildlife refuges, units/irrigation projects of the Bureau of Reclamation, and/or units of the national park system. Tribal governments have primary management roles over tribal lands; however, the United States, through the BIA, may also have a stewardship or law enforcement responsibility over these lands. Many of these Federal and tribal lands contain natural and cultural resources that are being degraded by activities related to illegal cross-border movements.

C. The volume of CBVs can and has, in certain areas, overwhelmed the law enforcement and administrative resources of Federal land managers. In order to more effectively protect national security, respond to terrorist threats, safeguard human life, and stop the degradation of the natural and cultural resources on those lands, DOI and USDA land managers will work cooperatively with CBP to benefit from the enforcement presence, terrorist and CBV interdiction, and rescue operations of CBP.

III. Common Findings and Affirmation of the Parties

A. The Parties to this MOU recognize that CBP-BP access to Federal lands can facilitate rescue of CBVs on Federal lands, protect those lands from environmental damage, have a role in protecting the wilderness and cultural values and wildlife resources of these lands, and is necessary for the security of the United States. Accordingly, the Parties understand that CBP-BP, consistent with applicable Federal laws and regulations, may access public lands and waterways, including access for purposes of tracking, surveillance, interdiction, establishment of observation points, and installation of remote detection systems.

B. The Parties recognize that DOI and USDA have responsibility for enforcing Federal laws relating to land management, resource protection, and other such functions on Federal lands under their jurisdiction.

IV. Responsibilities and Terms of Agreement

A. The Parties Agree to the Following Common Goals, Policies, and Principles:

1. The Parties enter into this MOU in a cooperative spirit with the goals of securing the borders of the United States, addressing emergencies involving human health and safety, and preventing or minimizing environmental damage arising from CBV illegal entry on public lands;
2. The Parties will strive to both resolve conflicts at and delegate resolution authority to the lowest field operational level possible while applying the principles of this MOU in such manner as will be consistent with the spirit and intent of this MOU;
3. The Parties will develop and consistently utilize an efficient communication protocol respecting the chain of command for each of the Parties that will result in the consistent application of the goals, policies, and principles articulated in this MOU, and provide a mechanism that will, if necessary, facilitate the resolution of any conflicts among the Parties. If resolution of conflict does not occur at the local level, then the issue will be elevated first to the regional/sector office; if not resolved at the regional/sector level, then the issue will be elevated to the headquarters level for resolution;
4. The Parties will cooperate with each other to complete, in an expedited manner, all compliance that is required by applicable Federal laws not otherwise waived in furtherance of this MOU. If such activities are authorized by a local agreement as described in sub-article IV.B below, then the DOI, USDA, and CBP will complete the required compliance before executing the agreement;

5. The Parties will cooperate with each other to identify methods, routes, and locations for CBP-BP operations that will minimize impacts to natural, cultural, and wilderness resources resulting from CBP-BP operations while facilitating needed CBP-BP access;
6. The Parties will, as necessary, plan and conduct joint local law enforcement operations consistent with all Parties' legal authorities;
7. The Parties will establish a framework by which threat assessments and other intelligence information may be exchanged, including intelligence training to be conducted by all parties so that the intelligence requirements of each may be identified and facilitated;
8. The Parties will establish forums and meet as needed at the local, regional, and national levels to facilitate working relationships and communication between all Parties;
9. The Parties will develop and share joint operational strategies at the local, regional, and national levels, including joint requests for infrastructure and other shared areas of responsibility;
10. The Parties will share the cost of environmental and cultural awareness training unless otherwise agreed; and
11. The Parties will, as appropriate, enter into specific reimbursable agreements pursuant to the Economy Act, 31 U.S.C. §1535 when one party is to furnish materials or perform work or provide a service on behalf of another party.

B. Responsibilities and Terms Specific to DOI and USDA. The DOI and the USDA hereby recognize that, pursuant to applicable law, CBP-BP is authorized to access the Federal lands under DOI and USDA administrative jurisdiction, including areas designated by Congress as wilderness, recommended as wilderness, and/or wilderness study areas, and will do so in accordance with the following conditions and existing authorities:

1. CBP-BP agents on foot or on horseback may patrol, or pursue, or apprehend suspected CBVs off-road at any time on any Federal lands administered by the Parties;
2. CBP-BP may operate motor vehicles on existing public and administrative roads and/or trails and in areas previously designated by the land management agency for off-road vehicle use at any time, provided that such use is consistent with presently authorized public or administrative use. At CBP-BP's request, the DOI and the USDA will provide CBP-BP with keys, combinations, or other means necessary to

access secured administrative roads/trails. CBP-BP may drag existing public and administrative roads that are unpaved for the purpose of cutting sign, subject to compliance with conditions that are mutually agreed upon by the local Federal land manager and the CBP-BP Sector Chief. For purposes of this MOU, "existing public roads/trails" are those existing roads/trails, paved or unpaved, on which the land management agency allows members of the general public to operate motor vehicles, and "existing administrative roads/trails" are those existing roads/trails, paved or unpaved, on which the land management agency allows persons specially authorized by the agency, but not members of the general public, to operate motor vehicles;

3. CBP-BP may request, in writing, that the land management agency grant additional access to Federal lands (for example, to areas not previously designated by the land management agency for off-road use) administered by the DOI or the USDA for such purposes as routine patrols, non-emergency operational access, and establishment of temporary camps or other operational activities. The request will describe the specific lands and/or routes that the CBP-BP wishes to access and the specific means of access desired. After receiving a written request, the local Federal land manager will meet promptly with the CBP-BP Sector Chief to begin discussing the request and negotiating the terms and conditions of an agreement with the local land management agency that authorizes access to the extent permitted by the laws applicable to the particular Federal lands. In each agreement between CBP-BP and the local land management agency, the CBP-BP should be required to use the lowest impact mode of travel and operational setup reasonable and practicable to accomplish its mission. The CBP-BP should also be required to operate all motorized vehicles and temporary operational activities in such a manner as will minimize the adverse impacts on threatened or endangered species and on the resources and values of the particular Federal lands. However, at no time should officer safety be compromised when selecting the least impactful conveyance or operational activity. Recognizing the importance of this matter to the Nation's security, the CBP-BP Sector Chief and the local Federal land manager will devote to this endeavor the resources necessary to complete required compliance measures in order to execute the local agreement within ninety (90) days after the Federal land manager has received the written request for access. Nothing in this paragraph is intended to limit the exercise of applicable emergency authorities for access prior to the execution of the local agreement. The Secretaries of the Interior, Agriculture, and Homeland Security expect that, absent compelling justification, each local agreement will be executed within that time frame and provide the maximum amount of access requested by the CBP-BP and allowed by law;

4. Nothing in this MOU is intended to prevent CBP-BP agents from exercising existing exigent/emergency authorities to access lands, including authority to conduct motorized off-road pursuit of suspected CBVs at any time, including in areas designated or recommended as wilderness, or in wilderness study areas when, in their professional judgment based on articulated facts, there is a specific exigency/emergency involving human life, health, safety of persons within the area, or posing a threat to national security, and they conclude that such motorized off-road pursuit is reasonably expected to result in the apprehension of the suspected CBVs. Articulated facts include, but are not limited to, visual observation; information received from a remote sensor, video camera, scope, or other technological source; fresh "sign" or other physical indication; canine alert; or classified or unclassified intelligence. For each such motorized off-road pursuit, CBP-BP will use the least intrusive or damaging motorized vehicle readily available, without compromising agent or officer safety. In accordance with paragraph IV.C.4, as soon as practicable after each such motorized off-road pursuit, CBP-BP will provide the local Federal land manager with a brief report;
5. If motorized pursuits in wilderness areas, areas recommended for wilderness designation, wilderness study areas, or off-road in an area not designated for such use are causing significant impact on the resources, or if other significant issues warrant consultation, then the Federal land manager and the CBP-BP will immediately meet to resolve the issues subject to paragraphs IV.A.2 and IV.A.3 of this MOU;
6. CBP may request, in writing, that the land management agency authorize installation or construction of tactical infrastructure for detection of CBVs (including, but not limited to, observation points, remote video surveillance systems, motion sensors, vehicle barriers, fences, roads, and detection devices) on land under the local land management agency's administrative jurisdiction. In areas not designated as wilderness, the local Federal land manager will expeditiously authorize CBP to install such infrastructure subject to such terms and conditions that are mutually developed and articulated in the authorization issued by the land management agency. In areas designated or managed as wilderness, the local Federal land manager, in consultation with CBP, will promptly conduct a "minimum requirement," "minimum tool," or other appropriate analysis. If supported by such analysis, the local Federal land manager will expeditiously authorize CBP to install such infrastructure subject to such terms and conditions that are mutually developed and articulated in the authorization issued by the land management agency;

7. The DOI and USDA will provide CBP-BP agents with appropriate environmental and cultural awareness training formatted to meet CBP-BP operational constraints. The DOI and USDA will work with CBP-BP in the development and production of maps for use or reference by CBP-BP agents including, as appropriate, site-specific and resource-specific maps that will identify specific wildlife and environmentally or culturally sensitive areas;
8. The DOI and USDA will, as applicable, provide CBP-BP with all assessments and studies done by or on behalf of DOI or USDA on the effects of CBVs on Federal lands and native species to better analyze the value of preventative enforcement actions;
9. The DOI and USDA will assist CBP-BP in search and rescue operations on lands within the respective land managers' administration when requested;
10. The CBP-BP and land management agencies may cross-deputize or cross-designate their agents as law enforcement officers under each other agency's statutory authority. Such cross-deputation or cross-designation agreements entered into by the local land management agency and the field operations manager for the CBP-BP shall be pursuant to the policies and procedures of each agency; and
11. DOI and USDA will work at the field operations level with affected local CBP-BP stations to establish protocols for notifying CBP-BP agents when DOI or USDA law enforcement personnel are conducting law enforcement operations in an area where CBP-BP and DOI/USDA operations can or will overlap.

C. Responsibilities and Terms Specific to the CBP. DHS hereby agrees as follows:

1. Consistent with the Border Patrol Strategic Plan, CBP-BP will strive to interdict CBVs as close to the United States' international borders as is operationally practical, with the long-term goal of establishing operational control along the immediate borders;
2. If the CBP-BP drag any unpaved roads for the purpose of cutting sign under provision IV.B.2 above, then CBP-BP will maintain or repair such roads to the extent that they are damaged by CBP-BP's use or activities;
3. If CBP-BP agents pursue or apprehend suspected CBVs in wilderness areas or off-road in an area not designated for such use under

paragraph IV.B.5, then the CBP-BP will use the lowest impact mode of travel practicable to accomplish its mission and operate all motorized vehicles in such a manner as will minimize the adverse impacts on threatened or endangered species and on the resources and values of the particular Federal lands, provided officer safety is not compromised by the type of conveyance selected;

4. CBP-BP will notify the local Federal land manager of any motorized emergency pursuit, apprehension, or incursion in a wilderness area or off-road in an area not designated for such use as soon as is practicable. A verbal report is sufficient unless either CBP-BP or the land managing agency determines that significant impacts resulted, in which case a written report will be necessary;
5. If motorized pursuits in wilderness areas, areas recommended for wilderness designation, wilderness study areas, or off-road in an area not designated for such use are causing significant impact on the resources as determined by a land manager, or if other significant issues warrant consultation, then the CBP-BP and Federal land manager will immediately meet to resolve the issues subject to paragraphs IV.A.2 and IV.A.3 of this MOU;
6. CBP will consult with land managers to coordinate the placement and maintenance of tactical infrastructure, permanent and temporary video, seismic and other remote sensing sites in order to limit resource damage while maintaining operational efficiency;
7. CBP-BP will ensure that current and incoming CBP-BP agents attend environmental and cultural awareness training to be provided by the land management agencies;
8. CBP-BP will provide land management agencies with appropriate and relevant releasable statistics of monthly CBV apprehensions, search and rescue actions, casualties, vehicles seized, drug seizures and arrests, weapons seizures and arrests, and other significant statistics regarding occurrences on the lands managed by the land manager;
9. CBP-BP will consult with land managers in the development of CBP-BP's annual Operational-Requirements Based Budgeting Program to ensure affected land managers can provide input and are, in the early stages of planning, made aware what personnel, infrastructure, and technology the CBP-BP would like to deploy along the border within their area of operation; and
10. CBP-BP will work at the field operations manager level with affected local land management agencies to establish protocols for notifying

land management agency law enforcement officers when BP is conducting special operations or non-routine activities in a particular area.

V. Miscellaneous Provisions

A. Nothing in this MOU may be construed to obligate the agencies or the United States to any current or future expenditure of funds in advance of the availability of appropriations, nor does this MOU obligate the agencies or the United States to spend funds for any particular project or purpose, even if funds are available.

B. Nothing in this MOU will be construed as affecting the authority of the Parties in carrying out their statutory responsibilities.

C. This MOU may be modified or amended in writing upon consent of all Parties, and other affected Federal agencies may seek to become a Party to this MOU.

D. The Parties shall retain all applicable legal responsibility for their respective personnel working pursuant to this MOU with respect to, *inter alia*, pay, personnel benefits, injuries, accidents, losses, damages, and civil liability. This MOU is not intended to change in any way the individual employee status or the liability or responsibility of any Party under Federal law.

E. The Parties agree to participate in this MOU until its termination. Any Party wishing to terminate its participation in this MOU shall provide sixty (60) days written notice to all other Parties.

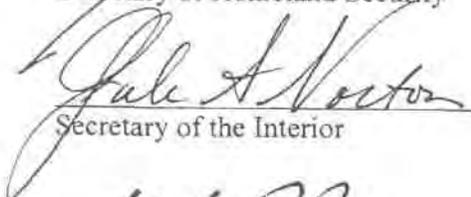

F. This document is an intra-governmental agreement among the Parties and does not create or confer any rights, privileges, or benefits upon any person, party, or entity. This MOU is not and shall not be construed as a rule or regulation.

In witness whereof, the Parties hereto have caused this Memorandum of Understanding to be executed and effective as of the date of the last signature below.

Subject: Fwd: Invite: Celebration of Organ Mountains-Desert Peaks National Monument - Friday, May 23, 2014

Good afternoon,

In case you have not already received it, please see the below invitation to join Secretary Jewell, Senator Tom Udall, Senator Heinrich, and other elected officials and stakeholders for the celebration of the Organ Mountains Desert Peaks National Monument in Las Cruces, NM tomorrow.

Thank you,

Lauren Bogard
Special Assistant
Office of Congressional and Legislative Affairs
U.S. Department of the Interior
Phone: (202) 208-5954

Please join U.S. Secretary of the Interior Sally Jewell, Bureau of Land Management Director Neil Kornze, White House Council on Environmental Quality Acting Chair Mike Boots, and Senators Tom Udall and Martin Heinrich, and other local officials and businesses, on Friday, May 23, 2014 at 2:00pm (MDT) for a celebration of the designation of Organ Mountains-Desert Peaks National Monument.

President Obama today established the national monument using his authority under the Antiquities Act – preserving the scenic, historic and culturally rich landscapes of this region in New Mexico. The area provides great opportunities for tourism, outdoor recreation and important wildlife habitat. The lands will continue to be managed by the Department of the Interior's Bureau of Land Management.

We hope you are able to join us on **Friday, May 23rd**, and ask that you RSVP by clicking [HERE](#).

Celebration of Organ Mountains-Desert Peaks National Monument

Friday, May 23, 2014

1:30pm– Check-In*
2:00pm – Celebration

Ocate High School
5700 Mesa Grande Drive, Las Cruces, New Mexico

Limited parking will be available – carpooling is encouraged.

* Please note that the school does not release until 12:30pm so we ask that you not arrive prior to

1:00pm.

Thank you,

*Office of Intergovernmental & External Affairs

Secretary Jewell Joins Community to Celebrate Organ Mountains-Desert Peaks National Monument Designation

President's Proclamation Honors Community's Vision to Protect, Promote Public Lands in Doña Ana County and to Boost Tourism, Outdoor Recreation Economy

LAS CRUCES, NM - Secretary of the Interior Sally Jewell today joined hundreds of community members to celebrate President Obama's designation of the Organ Mountains-Desert Peaks National Monument in south-central New Mexico. The President's action supports the locally driven effort to conserve, protect and enhance some of the public lands in Doña Ana County.

The celebration took place at the Oñate High School in Las Cruces. Secretary Jewell was joined by Bureau of Land Management (BLM) Director Neil Kornze, White House Council on Environmental Quality Acting Chair Mike Boots, U.S. Senators Tom Udall and Martin Heinrich, and local community and business leaders.

“Today is the culmination of a community-led effort to conserve, protect and promote these public lands, but it’s the beginning of a new chapter for the businesses that will benefit from the tourism and recreation, and the wildlife that rely on this unique habitat,” said Secretary of the Interior Sally Jewell. “The Organ Mountains and surrounding Desert Peaks are steeped in culture, history, wildlife and opportunities to enjoy the great outdoors – from hunting to hiking to gazing at ancient petroglyphs and fossils – and the President’s action ensures that these cherished landscapes are celebrated and passed on to the generations of New Mexicans and Americans to come.”

The Organ Mountains-Desert Peaks will join other popular national monuments in the Land of Enchantment, including Aztec Ruins, Bandalier, Petroglyph, Rio Grande del Norte, White Sands and others. Following the President’s designation of the Rio Grande del Norte National Monument in March 2013, the BLM reported a 40% increase in visitors to the area in less than one year. A recent independent study by BBC Research & Consulting estimates that the new national monument designation could generate \$7.4 million in new economic activity annually from new visitors and business opportunities.

“This is a great day for New Mexico – thanks to so many New Mexicans who spoke up and worked hard, we have a new national monument. It will put the unique and spectacular desert landscapes of Doña Ana County on recreation maps around the world, creating jobs and bringing in millions of dollars in revenue," Udall said. "I'm proud to join Senator Bingaman, Senator Heinrich, Secretary Jewell – and especially the many people of Doña Ana County who love Las Cruces's beautiful backdrop and wanted it protected for generations to come. Today we celebrate them.”

“This celebration and tremendous accomplishment would not be possible without the community’s strong support,” said Heinrich. “I give my heartfelt gratitude to the diverse coalitions and stakeholders from southern New Mexico who worked tirelessly to make today a reality, and I thank Senator Jeff Bingaman who helped push this effort many years ago. The Organ Mountains-Desert Peaks National Monument will help preserve our cultural identity, promote tourism in the region, boost the local economy, and foster recreational opportunities like hunting, hiking, and camping. I also thank President Obama and Secretary Jewell for recognizing how special this land is for all of us. I will continue to work to ensure we preserve New Mexico’s treasured landscapes for future generations to enjoy.”

Jewell in January participated in a meeting with senior officials at the Bureau of Land Management and the U.S. Border Patrol to underscore Interior’s continued commitment to cooperate in providing law enforcement and border security in the area. The proclamation supports the 2006 Memorandum of Understanding between the U.S. Department of Homeland Security, the U.S. Department of the Interior, and the U.S. Department of Agriculture regarding “Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States’ Borders.”

The proclamation also allows watershed restoration and small-scale flood prevention projects if they are consistent with the care and management of the monument’s resources.

“The creation of New Mexico's Organ Mountains-Desert Peaks National Monument helps celebrate the nation's newest and most exciting conservation system, the National Conservation Lands,” BLM Director Neil Kornze said. “This system, which is managed by the BLM, includes incredible like public lands like the the Rio Grande del Norte, the San Juan Islands along Washington’s coast, and California’s Fort Ord. Each of these areas has been protected by President Obama as testament to the BLM's important conservation work.”

The BLM currently manages all of the public lands within this new national monument for a range of multiple uses which will continue, including grazing, conservation of natural and archeological resources and outdoor recreation, such as hunting, hiking, biking, and camping. Statewide, BLM-New Mexico hosted 2.9 million visitors at 28 recreation sites in fiscal year 2013. Recreation on BLM-managed lands and waters in New Mexico supported more than 1,900 jobs and contributed more than \$172 million to the state’s economy in fiscal year 2012.

The Organ Mountains provide a spectacular backdrop for the City of Las Cruces, with steep, angular rock outcroppings reminiscent of organ pipes rising to nearly 9,000 feet in elevation and extending for 20 miles, running generally north and south. This high-desert landscape within the Chihuahuan Desert contains a multitude of biological zones – mixed desert shrubs and grasslands in the lowlands ascending to piñon and juniper woodlands, and finally to ponderosa pines at the highest elevations.

The area is home to a high diversity of animal life, including deer, pronghorn antelope, mountain lions, peregrine falcons and other raptors as well as rare plants, some found nowhere else in the world, such as the Organ Mountains pincushion cactus. Hundreds of archeologically and culturally significant sites are found within the new monument, including some limited Paleo-Indian artifacts, extensive rock art sites and the ruins of a ten room pueblo, among other ancient dwellings. More recent history is memorialized with Geronimo’s Cave, Billy the Kid's Outlaw Rock, and sites related to early Spanish explorers. The Organ and Doña Ana Mountains are popular recreation areas, with multiple hiking trails, a popular campground, and opportunities for hunting, mountain biking, rock climbing, and other recreation.

On the west side of Las Cruces, the Desert Peaks area contains mountain ranges and peaks of the Robledo Mountains and the Sierra de las Uvas. These landscapes contain mesas and buttes interspersed with deep canyons and arroyos. Significant cultural sites of the Mogollon, Mimbres, and Jornada cultures are located throughout this region along with historic sites associated with more recent settlements, including the Butterfield Overland Stagecoach Trail. This area is also home to the unusual Night-blooming Cereus, with a one-night-a-year bloom.

To the southwest of Las Cruces is the Potrillo Mountains Complex, characterized by cinder cones, volcanic craters, and basalt lava flows in the open desert landscape. There too is abundant wildlife, and significant scientific finds including an 11,000-year old skeleton of an extinct ground sloth. In more modern times, the Apollo astronauts trained in a section of the Potrillos because of its resemblance to a moonscape. Today it serves as a popular destination for outdoor recreation.

The Bureau of Land Management’s [National Conservation Lands](#) contain some of the West’s most spectacular landscapes. They include more than 875 federally recognized areas comprising more than 27 million acres of National Monuments, National Conservation Areas, Wilderness Areas, Wilderness Study Areas, Wild and Scenic Rivers, National Scenic and Historic Trails, and Conservation Lands of the California Desert.

Information about the Organ Mountains-Desert Peaks National Monument can be found at www.blm.gov/nm/omdp

Secretary Jewell Joins Community to Celebrate Organ Mountains-Desert Peaks National Monument Designation

President's Proclamation Honors Community's Vision to Protect, Promote Public Lands in Doña Ana County and to Boost Tourism, Outdoor Recreation Economy

LAS CRUCES, NM - Secretary of the Interior Sally Jewell today joined hundreds of community members to celebrate President Obama's designation of the Organ Mountains-Desert Peaks National Monument in south-central New Mexico. The President's action supports the locally driven effort to conserve, protect and enhance some of the public lands in Doña Ana County.

The celebration took place at the XXXX. Secretary Jewell was joined by Bureau of Land Management (BLM) Director Neil Kornze, White House Council on Environmental Quality Acting Chair Mike Boots, U.S. Senators Tom Udall and Martin Heinrich, and local community and business leaders.

“Today is the culmination of a community-led effort to conserve, protect and promote these public lands, but it’s the beginning of a new chapter for the businesses that will benefit from the tourism and recreation, and the wildlife that rely on this unique habitat,” said Secretary of the Interior Sally Jewell. “The Organ Mountains and surrounding Desert Peaks are steeped in culture, history, wildlife and opportunities to enjoy the great outdoors – from hunting to hiking to gazing at ancient petroglyphs and fossils – and the President’s action ensures that these cherished landscapes are celebrated and passed on to the generations of New Mexicans and Americans to come.”

The Organ Mountains-Desert Peaks will join other popular national monuments in the Land of Enchantment, including Aztec Ruins, Bandalier, Petroglyph, Rio Grande del Norte, White Sands and others. Following the President’s designation of the Rio Grande del Norte National Monument in March 2013, the BLM reported a 40% increase in visitors to the area in less than one year. A recent independent study by BBC Research & Consulting estimates that the new national monument designation could generate \$7.4 million in new economic activity annually from new visitors and business opportunities.

“,” Udall said. “”

“,” said Heinrich. “.”

Jewell in January participated in a meeting with senior officials at the Bureau of Land Management and the U.S. Border Patrol to underscore Interior’s continued commitment to cooperate in providing law enforcement and border security in the area. The proclamation supports the 2006 Memorandum of Understanding between the U.S. Department of Homeland Security, the U.S. Department of the Interior, and the U.S. Department of Agriculture regarding “Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States’ Borders.”

The proclamation also allows watershed restoration and small-scale flood prevention projects if they are consistent with the care and management of the monument’s resources.

“,” BLM Director Neil Kornze said. “.”

The BLM currently manages all of the public lands within this new national monument for a range of multiple uses which will continue, including grazing, conservation of natural and archeological resources and outdoor recreation, such as hunting, hiking, biking, and camping. Statewide, BLM-New Mexico hosted 2.9 million visitors at 28 recreation sites in fiscal year 2013. Recreation on BLM-managed lands and waters in New Mexico supported more than 1,900 jobs and contributed more than \$172 million to the state’s economy in fiscal year 2012.

The Organ Mountains provide a spectacular backdrop for the City of Las Cruces, with steep, angular rock outcroppings reminiscent of organ pipes rising to nearly 9,000 feet in elevation and extending for 20 miles, running generally north and south. This high-desert landscape within the Chihuahuan Desert contains a

multitude of biological zones – mixed desert shrubs and grasslands in the lowlands ascending to piñon and juniper woodlands, and finally to ponderosa pines at the highest elevations.

The area is home to a high diversity of animal life, including deer, pronghorn antelope, mountain lions, peregrine falcons and other raptors as well as rare plants, some found nowhere else in the world, such as the Organ Mountains pincushion cactus. Hundreds of archeologically and culturally significant sites are found within the new monument, including some limited Paleo-Indian artifacts, extensive rock art sites and the ruins of a ten room pueblo, among other ancient dwellings. More recent history is memorialized with Geronimo's Cave, Billy the Kid's Outlaw Rock, and sites related to early Spanish explorers. The Organ and Doña Ana Mountains are popular recreation areas, with multiple hiking trails, a popular campground, and opportunities for hunting, mountain biking, rock climbing, and other recreation.

On the west side of Las Cruces, the Desert Peaks area contains mountain ranges and peaks of the Robledo Mountains and the Sierra de las Uvas. These landscapes contain mesas and buttes interspersed with deep canyons and arroyos. Secretary Jewell Joins Community to Celebrate Organ Mountains-Desert Peaks National Monument Designation

President's Proclamation Honors Community's Vision to Protect, Promote Public Lands in Doña

Ana County and to Boost Tourism, Outdoor Recreation Economy

LAS CRUCES, NM - Secretary of the Interior Sally Jewell today joined hundreds of community members to celebrate President Obama's designation of the Organ Mountains-Desert Peaks National Monument in south-central New Mexico. The President's action supports the locally driven effort to conserve, protect and enhance some of the public lands in Doña Ana County.

The celebration took place at the Oñate High School in Las Cruces. Secretary Jewell was joined by Bureau of Land Management (BLM) Director Neil Kornze, White House Council on Environmental Quality Acting Chair Mike Boots, U.S. Senators Tom Udall and Martin Heinrich, and local community and business leaders.

"Today is the culmination of a community-led effort to conserve, protect and promote these public lands, but it's the beginning of a new chapter for the businesses that will benefit from the tourism and recreation, and the wildlife that rely on this unique habitat," said Secretary of the Interior Sally Jewell. "The Organ Mountains and surrounding Desert Peaks are steeped in culture, history, wildlife and opportunities to enjoy the great outdoors – from hunting to hiking to gazing at ancient petroglyphs and fossils – and the President's action ensures that these cherished landscapes are celebrated and passed on to the generations of New Mexicans and Americans to come."

The Organ Mountains-Desert Peaks will join other popular national monuments in the Land of Enchantment, including Aztec Ruins, Bandalier, Petroglyph, Rio Grande del Norte, White Sands and others. Following the President's designation of the Rio Grande del Norte National Monument in March 2013, the BLM reported a 40% increase in visitors to the area in less than one year. A recent independent study by BBC Research & Consulting estimates that the new national monument designation could generate \$7.4 million in new economic activity annually from new visitors and business opportunities.

"This is a great day for New Mexico – thanks to so many New Mexicans who spoke up and worked hard, we have a new national monument. It will put the unique and spectacular desert landscapes of Doña Ana County on recreation maps around the world, creating jobs and bringing in millions of dollars in revenue," Udall said. "I'm proud to join Senator Bingaman, Senator Heinrich, Secretary Jewell – and especially the many people of Doña Ana County who love Las Cruces's beautiful backdrop and wanted it protected for generations to come. Today we celebrate them."

"This celebration and tremendous accomplishment would not be possible without the community's strong support," said Heinrich. "I give my heartfelt gratitude to the diverse coalitions and stakeholders from southern New Mexico who worked tirelessly to make today a reality, and I thank Senator Jeff Bingaman who helped push this effort many years ago. The Organ Mountains-Desert Peaks National Monument will help preserve our cultural identity, promote tourism in the region, boost the local economy, and foster recreational opportunities like hunting, hiking, and camping. I also thank President Obama and Secretary Jewell for recognizing how special this land is for all of us. I will continue to work to ensure we preserve New Mexico's treasured landscapes for future generations to enjoy."

Jewell in January participated in a meeting with senior officials at the Bureau of Land Management and the U.S. Border Patrol to underscore Interior's continued commitment to cooperate in providing law enforcement and border security in the area. The proclamation supports the 2006 Memorandum of Understanding between the U.S.

Department of Homeland Security, the U.S. Department of the Interior, and the U.S. Department of Agriculture regarding “Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States’ Borders.”

The proclamation also allows watershed restoration and small-scale flood prevention projects if they are consistent with the care and management of the monument’s resources.

“The creation of New Mexico’s Organ Mountains-Desert Peaks National Monument helps celebrate the nation’s newest and most exciting conservation system, the National Conservation Lands,” BLM Director Neil Kornze said. “This system, which is managed by the BLM, includes incredible like public lands like the the Rio Grande del Norte, the San Juan Islands along Washington’s coast, and California’s Fort Ord. Each of these areas has been protected by President Obama as testament to the BLM’s important conservation work.”

The BLM currently manages all of the public lands within this new national monument for a range of multiple uses which will continue, including grazing, conservation of natural and archeological resources and outdoor recreation, such as hunting, hiking, biking, and camping. Statewide, BLM-New Mexico hosted 2.9 million visitors at 28 recreation sites in fiscal year 2013. Recreation on BLM-managed lands and waters in New Mexico supported more than 1,900 jobs and contributed more than \$172 million to the state’s economy in fiscal year 2012.

The Organ Mountains provide a spectacular backdrop for the City of Las Cruces, with steep, angular rock outcroppings reminiscent of organ pipes rising to nearly 9,000 feet in elevation and extending for 20 miles, running generally north and south. This high-desert landscape within the Chihuahuan Desert contains a multitude of biological zones – mixed desert shrubs and grasslands in the lowlands ascending to piñon and juniper woodlands, and finally to ponderosa pines at the highest elevations.

The area is home to a high diversity of animal life, including deer, pronghorn antelope, mountain lions, peregrine falcons and other raptors as well as rare plants, some found nowhere else in the world, such as the Organ Mountains pincushion cactus. Secretary Jewell Joins Community to Celebrate Organ Mountains-Desert Peaks National Monument Designation

President's Proclamation Honors Community's Vision to Protect, Promote Public Lands in Doña Ana County and to Boost Tourism, Outdoor Recreation Economy

LAS CRUCES, NM - Secretary of the Interior Sally Jewell today joined hundreds of community members to celebrate President Obama's designation of the Organ Mountains-Desert Peaks National Monument in south-central New Mexico. The President's action supports the locally driven effort to conserve, protect and enhance some of the public lands in Doña Ana County.

The celebration took place at the XXXX. Secretary Jewell was joined by Bureau of Land Management (BLM) Director Neil Kornze, White House Council on Environmental Quality Acting Chair Mike Boots, U.S. Senators Tom Udall and Martin Heinrich, and local community and business leaders.

"Today is the culmination of a community-led effort to conserve, protect and promote these public lands, but it's the beginning of a new chapter for the businesses that will benefit from the tourism and recreation, and the wildlife that rely on this unique habitat," said Secretary of the Interior Sally Jewell. "The Organ Mountains and surrounding Desert Peaks are steeped in culture, history, wildlife and opportunities to enjoy the great outdoors – from hunting to hiking to gazing at ancient petroglyphs and fossils – and the President's action ensures that these cherished landscapes are celebrated and passed on to the generations of New Mexicans and Americans to come."

The Organ Mountains-Desert Peaks will join other popular national monuments in the Land of Enchantment, including Aztec Ruins, Bandalier, Petroglyph, Rio Grande del Norte, White Sands and others. Following the President's designation of the Rio Grande del Norte National Monument in March 2013, the BLM reported a 40% increase in visitors to the area in less than one year. A recent independent study by BBC Research & Consulting estimates that the new national monument designation could generate \$7.4 million in new economic activity annually from new visitors and business opportunities.

“,” Udall said. “”

“,” said Heinrich. “.”

Jewell in January participated in a meeting with senior officials at the Bureau of Land Management and the U.S. Border Patrol to underscore Interior's continued commitment to cooperate in providing law enforcement and border security in the area. The proclamation supports the 2006 Memorandum of Understanding between the U.S. Department of Homeland Security, the U.S. Department of the Interior, and the U.S. Department of Agriculture regarding "Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States' Borders."

The proclamation also allows watershed restoration and small-scale flood prevention projects if they are consistent with the care and management of the monument's resources.

“,” BLM Director Neil Kornze said. “.”

The BLM currently manages all of the public lands within this new national monument for a range of multiple uses which will continue, including grazing, conservation of natural and archeological resources and outdoor recreation, such as hunting, hiking, biking, and camping. Statewide, BLM-New Mexico hosted 2.9 million visitors at 28 recreation sites in fiscal year 2013. Recreation on BLM-managed lands and waters in New Mexico supported more than 1,900 jobs and contributed more than \$172 million to the state’s economy in fiscal year 2012.

The Organ Mountains provide a spectacular backdrop for the City of Las Cruces, with steep, angular rock outcroppings reminiscent of organ pipes rising to nearly 9,000 feet in elevation and extending for 20 miles, running generally north and south. This high-desert landscape within the Chihuahuan Desert contains a multitude of biological zones – mixed desert shrubs and grasslands in the lowlands ascending to piñon and juniper woodlands, and finally to ponderosa pines at the highest elevations.

The area is home to a high diversity of animal life, including deer, pronghorn antelope, mountain lions, peregrine falcons and other raptors as well as rare plants, some found nowhere else in the world, such as the Organ Mountains pincushion cactus. Hundreds of archeologically and culturally significant sites are found within the new monument, including some limited Paleo-Indian artifacts, extensive rock art sites and the ruins of a ten room pueblo, among other ancient dwellings. More recent history is memorialized with Geronimo’s Cave, Billy the Kid’s Outlaw Rock, and sites related to early Spanish explorers. The Organ and Doña Ana Mountains are popular recreation areas, with multiple hiking trails, a popular campground, and opportunities for hunting, mountain biking, rock climbing, and other recreation.

On the west side of Las Cruces, the Desert Peaks area contains mountain ranges and peaks of the Robledo Mountains and the Sierra de las Uvas. These landscapes contain mesas and buttes interspersed with deep canyons and arroyos. Significant cultural sites of the Mogollon, Mimbres, and Jornada cultures are located throughout this region along with historic sites associated with more recent settlements, including the Butterfield Overland Stagecoach Trail. This area is also home to the unusual Night-blooming Cereus, with a one-night-a-year bloom.

To the southwest of Las Cruces is the Potrillo Mountains Complex, characterized by cinder cones, volcanic craters, and basalt lava flows in the open desert landscape. There too is abundant wildlife, and significant scientific finds including an 11,000-year old skeleton of an extinct ground sloth. In more modern times, the Apollo astronauts trained in a section of the Potrillos because of its resemblance to a moonscape. Today it serves as a popular destination for outdoor recreation.

The Bureau of Land Management’s [National Conservation Lands](#) contain some of the West’s most spectacular landscapes. They include more than 875 federally recognized areas comprising more than 27 million acres of National Monuments, National Conservation Areas, Wilderness Areas, Wilderness Study Areas, Wild and Scenic Rivers, National Scenic and Historic Trails, and Conservation Lands of the California Desert.

Information about the Organ Mountains-Desert Peaks National Monument can be found at www.blm.gov/nm/omdp

Secretary Jewell Joins Community to Celebrate Organ Mountains-Desert Peaks National Monument Designation

President's Proclamation Honors Community's Vision to Protect, Promote Public Lands in Doña Ana County and to Boost Tourism, Outdoor Recreation Economy

LAS CRUCES, NM - Secretary of the Interior Sally Jewell today joined hundreds of community members to celebrate President Obama's designation of the Organ Mountains-Desert Peaks National Monument in south-central New Mexico. The President's action supports the locally driven effort to conserve, protect and enhance some of the public lands in Doña Ana County.

The celebration took place at the Oñate High School in Las Cruces. Secretary Jewell was joined by Bureau of Land Management (BLM) Director Neil Kornze, White House Council on Environmental Quality Acting Chair Mike Boots, U.S. Senators Tom Udall and Martin Heinrich, and local community and business leaders.

"Today is the culmination of a community-led effort to conserve, protect and promote these public lands, but it's the beginning of a new chapter for the businesses that will benefit from the tourism and recreation, and the wildlife that rely on this unique habitat," said Secretary of the Interior Sally Jewell. "The Organ Mountains and surrounding Desert Peaks are steeped in culture, history, wildlife and opportunities to enjoy the great outdoors – from hunting to hiking to gazing at ancient petroglyphs and fossils – and the President's action ensures that these cherished landscapes are celebrated and passed on to the generations of New Mexicans and Americans to come."

The Organ Mountains-Desert Peaks will join other popular national monuments in the Land of Enchantment, including Aztec Ruins, Bandalier, Petroglyph, Rio Grande del Norte, White Sands and others. Following the President's designation of the Rio Grande del Norte National Monument in March 2013, the BLM reported a 10%

increase in visitors to the area in less than one year. A recent independent study by BBC Research & Consulting estimates that the new national monument designation could generate \$7.4 million in new economic activity annually from new visitors and business opportunities.

“This is a great day for New Mexico – thanks to so many New Mexicans who spoke up and worked hard, we have a new national monument. It will put the unique and spectacular desert landscapes of Doña Ana County on recreation maps around the world, creating jobs and bringing in millions of dollars in revenue,” Udall said. “I’m proud to join Senator Bingaman, Senator Heinrich, Secretary Jewell – and especially the many people of Doña Ana County who love Las Cruces’s beautiful backdrop and wanted it protected for generations to come. Today we celebrate them.”

“This celebration and tremendous accomplishment would not be possible without the community’s strong support,” said Heinrich. “I give my heartfelt gratitude to the diverse coalitions and stakeholders from southern New Mexico who worked tirelessly to make today a reality, and I thank Senator Jeff Bingaman who helped push this effort many years ago. The Organ Mountains-Desert Peaks National Monument will help preserve our cultural identity, promote tourism in the region, boost the local economy, and foster recreational opportunities like hunting, hiking, and camping. I also thank President Obama and Secretary Jewell for recognizing how special this land is for all of us. I will continue to work to ensure we preserve New Mexico’s treasured landscapes for future generations to enjoy.”

Jewell in January participated in a meeting with senior officials at the Bureau of Land Management and the U.S. Border Patrol to underscore Interior’s continued commitment to cooperate in providing law enforcement and border security in the area. The proclamation supports the 2006 Memorandum of Understanding between the U.S. Department of Homeland Security, the U.S. Department of the Interior, and the U.S. Department of Agriculture regarding “Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States’ Borders.”

The proclamation also allows watershed restoration and small-scale flood prevention projects if they are consistent with the care and management of the monument’s resources.

“The creation of New Mexico’s Organ Mountains-Desert Peaks National Monument helps celebrate the nation’s newest and most exciting conservation system, the National Conservation Lands,” BLM Director Neil Kornze said. “This system, which is managed by the BLM, includes incredible public lands like the Rio Grande del Norte, the San Juan Islands along Washington’s coast, and California’s Fort Ord. Each of these areas has been protected by President Obama as testament to the BLM’s important conservation work.”

The BLM currently manages all of the public lands within this new national monument for a range of multiple uses which will continue, including grazing, conservation of natural and archeological resources and outdoor recreation, such as hunting, hiking, biking, and camping. Statewide, BLM-New Mexico hosted 2.9 million visitors at 28 recreation sites in fiscal year 2013. Recreation on BLM-managed lands and waters in New Mexico supported more than 1,900 jobs and contributed more than \$172 million to the state’s economy in fiscal year 2012.

The Organ Mountains provide a spectacular backdrop for the City of Las Cruces, with steep, angular rock outcroppings reminiscent of organ pipes rising to nearly 9,000 feet in elevation and extending for 20 miles, running

generally north and south. This high-desert landscape within the Chihuahuan Desert contains a multitude of biological zones – mixed desert shrubs and grasslands in the lowlands ascending to piñon and juniper woodlands, and finally to ponderosa pines at the highest elevations.

The area is home to a high diversity of animal life, including deer, pronghorn antelope, mountain lions, peregrine falcons and other raptors as well as rare plants, some found nowhere else in the world, such as the Organ Mountains pincushion cactus. Hundreds of archeologically and culturally significant sites are found within the new monument, including some limited Paleo-Indian artifacts, extensive rock art sites and the ruins of a ten room pueblo, among other ancient dwellings. More recent history is memorialized with Geronimo's Cave, Billy the Kid's Outlaw Rock, and sites related to early Spanish explorers. The Organ and Doña Ana Mountains are popular recreation areas, with multiple hiking trails, a popular campground, and opportunities for hunting, mountain biking, rock climbing, and other recreation.

On the west side of Las Cruces, the Desert Peaks area contains mountain ranges and peaks of the Robledo Mountains and the Sierra de las Uvas. Secretary Jewell Joins Community to Celebrate Organ Mountains-Desert Peaks National Monument Designation

President's Proclamation Honors Community's Vision to Protect, Promote Public Lands in Doña Ana County and to Boost Tourism, Outdoor Recreation Economy

LAS CRUCES, NM - Secretary of the Interior Sally Jewell today joined hundreds of community members to celebrate President Obama's designation of the Organ Mountains-Desert Peaks National Monument in south-central New Mexico. The President's action supports the locally driven effort to conserve, protect and enhance some of the public lands in Doña Ana County.

The celebration took place at the Oñate High School in Las Cruces. Secretary Jewell was joined by Bureau of Land Management (BLM) Director Neil Kornze, White House Council on Environmental Quality Acting Chair Mike Boots, U.S. Senators Tom Udall and Martin Heinrich, and local community and business leaders.

"Today is the culmination of a community-led effort to conserve, protect and promote these public lands, but it's the beginning of a new chapter for the businesses that will benefit from the tourism and recreation, and the wildlife that rely on this unique habitat," said Secretary of the Interior Sally Jewell. "The Organ Mountains and surrounding Desert Peaks are steeped in culture, history, wildlife and opportunities to enjoy the great outdoors – from hunting to hiking to gazing at ancient petroglyphs and fossils – and the President's action ensures that these cherished landscapes are celebrated and passed on to the generations of New Mexicans and Americans to come."

The Organ Mountains-Desert Peaks will join other popular national monuments in the Land of Enchantment, including Aztec Ruins, Bandalier, Petroglyph, Rio Grande del Norte, White Sands and others. Following the President's designation of the Rio Grande del Norte National Monument in March 2013, the BLM reported a 40% increase in visitors to the area in less than one year. A recent independent study by BBC Research & Consulting estimates that the new national monument designation could generate \$7.4 million in new economic activity annually from new visitors and business opportunities.

“This is a great day for New Mexico – thanks to so many New Mexicans who spoke up and worked hard, we have a new national monument. It will put the unique and spectacular desert landscapes of Doña Ana County on recreation maps around the world, creating jobs and bringing in millions of dollars in revenue,” Udall said. “I’m proud to join Senator Bingaman, Senator Heinrich, Secretary Jewell – and especially the many people of Doña Ana County who love Las Cruces’s beautiful backdrop and wanted it protected for generations to come. Today we celebrate them.”

“This celebration and tremendous accomplishment would not be possible without the community’s strong support,” said Heinrich. “I give my heartfelt gratitude to the diverse coalitions and stakeholders from southern New Mexico who worked tirelessly to make today a reality, and I thank Senator Jeff Bingaman who helped push this effort many years ago. The Organ Mountains-Desert Peaks National Monument will help preserve our cultural identity, promote tourism in the region, boost the local economy, and foster recreational opportunities like hunting, hiking, and camping. I also thank President Obama and Secretary Jewell for recognizing how special this land is for all of us. I will continue to work to ensure we preserve New Mexico’s treasured landscapes for future generations to enjoy.”

Jewell in January participated in a meeting with senior officials at the Bureau of Land Management and the U.S. Border Patrol to underscore Interior’s continued commitment to cooperate in providing law enforcement and border security in the area. The proclamation supports the 2006 Memorandum of Understanding between the U.S. Department of Homeland Security, the U.S. Department of the Interior, and the U.S. Department of Agriculture regarding “Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States’ Borders.”

The proclamation also allows watershed restoration and small-scale flood prevention projects if they are consistent with the care and management of the monument’s resources.

“The creation of New Mexico’s Organ Mountains-Desert Peaks National Monument helps celebrate the nation’s newest and most exciting conservation system, the National Conservation Lands,” BLM Director Neil Kornze said. “This system, which is managed by the BLM, includes incredible like public lands like the the Rio Grande del Norte, the San Juan Islands along Washington’s coast, and California’s Fort Ord. Each of these areas has been protected by President Obama as testament to the BLM’s important conservation work.”

The BLM currently manages all of the public lands within this new national monument for a range of multiple uses which will continue, including grazing, conservation of natural and archeological resources and outdoor recreation, such as hunting, hiking, biking, and camping. Statewide, BLM-New Mexico hosted 2.9 million visitors at 28 recreation sites in fiscal year 2013. Recreation on BLM-managed lands and waters in New Mexico supported more than 1,900 jobs and contributed more than \$172 million to the state’s economy in fiscal year 2012.

The Organ Mountains provide a spectacular backdrop for the City of Las Cruces, with steep, angular rock outcroppings reminiscent of organ pipes rising to nearly 9,000 feet in elevation and extending for 20 miles, running generally north and south. This high-desert landscape within the

Chihuahuan Desert contains a multitude of biological zones – mixed desert shrubs and grasslands in the lowlands ascending to piñon and juniper woodlands, and finally to ponderosa pines at the highest elevations.

The area is home to a high diversity of animal life, including deer, pronghorn antelope, mountain lions, peregrine falcons and other raptors as well as rare plants, some found nowhere else in the world, such as the Organ Mountains pincushion cactus. Hundreds of archeologically and culturally significant sites are found within the new monument, including some limited Paleo-Indian artifacts, extensive rock art sites and the ruins of a ten room pueblo, among other ancient dwellings. More recent history is memorialized with Geronimo's Cave, Billy the Kid's Outlaw Rock, and sites related to early Spanish explorers. The Organ and Doña Ana Mountains are popular recreation areas, with multiple hiking trails, a popular campground, and opportunities for hunting, mountain biking, rock climbing, and other recreation.

On the west side of Las Cruces, the Desert Peaks area contains mountain ranges and peaks of the Robledo Mountains and the Sierra de las Uvas. These landscapes contain mesas and buttes interspersed with deep canyons and arroyos. Significant cultural sites of the Mogollon, Mimbres, and Jornada cultures are located throughout this region along with historic sites associated with more recent settlements, including the Butterfield Overland Stagecoach Trail. This area is also home to the unusual Night-blooming Cereus, with a one-night-a-year bloom.

To the southwest of Las Cruces is the Potrillo Mountains Complex, characterized by cinder cones, volcanic craters, and basalt lava flows in the open desert landscape. There too is abundant wildlife, and significant scientific finds including an 11,000-year old skeleton of an extinct ground sloth. In more modern times, the Apollo astronauts trained in a section of the Potrillos because of its resemblance to a moonscape. Today it serves as a popular destination for outdoor recreation.

The Bureau of Land Management's [National Conservation Lands](#) contain some of the West's most spectacular landscapes. They include more than **875 federally recognized** areas comprising more than **27 million acres** of National Monuments, National Conservation Areas, Wilderness Areas, Wilderness Study Areas, Wild and Scenic Rivers, National Scenic and Historic Trails, and Conservation Lands of the California Desert.

Information about the Organ Mountains-Desert Peaks National Monument can be found at www.blm.gov/nm/omdp

RE: President Obama designates new national monument and more This Week at Interior

Here's what happened this week at Interior: President Obama designates half a million acres in New Mexico for the Organ Mountains-Desert Peaks National Monument; for the first time in decades the fresh water of the Colorado River has reunited with the salt waters of the Sea of Cortez; and Secretary Jewell travels to Denver to announce \$6.7million in public/private grants to hire young people to work on public lands across the nation.

Secretary Jewell Joins Community to Celebrate Organ Mountains-Desert Peaks National Monument Designation

President's Proclamation Honors Community's Vision to Protect, Promote Public Lands in Doña Ana County and to Boost Tourism, Outdoor Recreation Economy

LAS CRUCES, NM - Secretary of the Interior Sally Jewell today joined hundreds of community members to celebrate President Obama's designation of the Organ Mountains-Desert Peaks National Monument in south-central New Mexico. The President's action supports the locally driven effort to conserve, protect and enhance some of the public lands in Doña Ana County.

The celebration took place at the Oñate High School in Las Cruces. Secretary Jewell was joined by Bureau of Land Management (BLM) Director Neil Kornze, White House Council on Environmental Quality Acting Chair Mike Boots, U.S. Senators Tom Udall and Martin Heinrich, and local community and business leaders.

"Today is the culmination of a community-led effort to conserve, protect and promote these public lands, but it's the beginning of a new chapter for the businesses that will benefit from the tourism and recreation, and the wildlife that rely on this unique habitat," said Secretary of the Interior Sally Jewell. "The Organ Mountains and surrounding Desert Peaks are steeped in culture, history, wildlife and opportunities to enjoy the great outdoors – from hunting to hiking to gazing at ancient petroglyphs and fossils – and the President's action ensures that these cherished landscapes are celebrated and passed on to the generations of New Mexicans and Americans to come."

The Organ Mountains-Desert Peaks will join other popular national monuments in the Land of Enchantment, including Aztec Ruins, Bandalier, Petroglyph, Rio Grande del Norte, White Sands and others. Following the President's designation of the Rio Grande del Norte National Monument in March 2013, the BLM reported a 40% increase in visitors to the area in less than one year. A recent independent study by BBC Research & Consulting estimates that the new national monument designation could generate \$7.4 million in new economic activity annually from new visitors and business opportunities.

"This is a great day for New Mexico – thanks to so many New Mexicans who spoke up and worked hard, we have a new national monument. It will put the unique and spectacular desert landscapes of Doña Ana County on recreation maps around the world, creating jobs and bringing in millions of dollars in revenue." Udall said. "I'm proud to join Senator Bingaman, Senator Heinrich, Secretary Jewell –

and especially the many people of Doña Ana County who love Las Cruces's beautiful backdrop and wanted it protected for generations to come. Today we celebrate them.”

“This celebration and tremendous accomplishment would not be possible without the community’s strong support,” said Heinrich. “I give my heartfelt gratitude to the diverse coalitions and stakeholders from southern New Mexico who worked tirelessly to make today a reality, and I thank Senator Jeff Bingaman who helped push this effort many years ago. The Organ Mountains-Desert Peaks National Monument will help preserve our cultural identity, promote tourism in the region, boost the local economy, and foster recreational opportunities like hunting, hiking, and camping. I also thank President Obama and Secretary Jewell for recognizing how special this land is for all of us. I will continue to work to ensure we preserve New Mexico’s treasured landscapes for future generations to enjoy.”

Jewell in January participated in a meeting with senior officials at the Bureau of Land Management and the U.S. Border Patrol to underscore Interior’s continued commitment to cooperate in providing law enforcement and border security in the area. The proclamation supports the 2006 Memorandum of Understanding between the U.S. Department of Homeland Security, the U.S. Department of the Interior, and the U.S. Department of Agriculture regarding “Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States’ Borders.”

The proclamation also allows watershed restoration and small-scale flood prevention projects if they are consistent with the care and management of the monument’s resources.

“The creation of New Mexico's Organ Mountains-Desert Peaks National Monument helps celebrate the nation's newest and most exciting conservation system, the National Conservation Lands,” BLM Director Neil Kornze said. “This system, which is managed by the BLM, includes incredible public lands like the Rio Grande del Norte, the San Juan Islands in Washington, and California’s Fort Ord. Each of these areas has been protected by President Obama as testament to the BLM’s important conservation work.”

The BLM currently manages all of the public lands within this new national monument for a range of multiple uses which will continue, including grazing, conservation of natural and archeological resources and outdoor recreation, such as hunting, hiking, biking, and camping. Statewide, BLM-New Mexico hosted 2.9 million visitors at 28 recreation sites in fiscal year 2013. Recreation on BLM-managed lands and waters in New Mexico supported more than 1,900 jobs and contributed more than \$172 million to the state’s economy in fiscal year 2012.

“This is an exciting day for New Mexico and the entire country. Hundreds of Americans from diverse backgrounds came together to protect this treasured piece of land, which will now be preserved for future generations” said Acting Chair Boots. “When the President signed the proclamation on Wednesday, he made it clear that he’s not finished. He’s going to continue to get things done for the American people wherever he can, and that includes protecting lands where communities like Las Cruces are speaking up.”

The Organ Mountains provide a spectacular backdrop for the City of Las Cruces, with steep, angular rock outcroppings reminiscent of organ pipes rising to nearly 9,000 feet in elevation and extending for 20 miles, running generally north and south. This high-desert landscape within the Chihuahuan Desert contains a multitude of biological zones – mixed desert shrubs and grasslands in the lowlands ascending to piñon and juniper woodlands, and finally to ponderosa pines at the highest elevations.

The area is home to a high diversity of animal life, including deer, pronghorn antelope, mountain lions, peregrine falcons and other raptors as well as rare plants, some found nowhere else in the world, such as the Organ Mountains pincushion cactus. Hundreds of archeologically and culturally significant sites are found within the new monument, including some limited Paleo-Indian artifacts, extensive rock art sites and the ruins of a ten room pueblo, among other ancient dwellings. More recent history is memorialized with Geronimo’s Cave, Billy the Kid’s Outlaw Rock, and sites related to early Spanish explorers. The Organ and Doña Ana Mountains are popular recreation areas, with multiple hiking trails, a popular campground, and opportunities for hunting, mountain biking, rock climbing, and other recreation.

On the west side of Las Cruces, the Desert Peaks area contains mountain ranges and peaks of the Robledo Mountains and the Sierra de las Uvas. These landscapes contain mesas and buttes interspersed with deep canyons and arroyos. Secretary Jewell Joins Community to Celebrate Organ Mountains-Desert Peaks National Monument Designation

President's Proclamation Honors Community's Vision to Protect, Promote Public Lands in Doña Ana County and to Boost Tourism, Outdoor Recreation Economy

LAS CRUCES, NM - Secretary of the Interior Sally Jewell today joined hundreds of community members to celebrate President Obama's designation of the Organ Mountains-Desert Peaks National Monument in south-central New Mexico. The President's action supports the locally driven effort to conserve, protect and enhance some of the public lands in Doña Ana County.

The celebration took place at the Oñate High School in Las Cruces. Secretary Jewell was joined by Bureau of Land Management (BLM) Director Neil Kornze, White House Council on Environmental Quality Acting Chair Mike Boots, U.S. Senators Tom Udall and Martin Heinrich, and local community and business leaders.

"Today is the culmination of a community-led effort to conserve, protect and promote these public lands, but it's the beginning of a new chapter for the businesses that will benefit from the tourism and recreation, and the wildlife that rely on this unique habitat," said Secretary of the Interior Sally Jewell. "The Organ Mountains and surrounding Desert Peaks are steeped in culture, history, wildlife and opportunities to enjoy the great outdoors – from hunting to hiking to gazing at ancient petroglyphs and fossils – and the President's action ensures that these cherished landscapes are celebrated and passed on to the generations of New Mexicans and Americans to come."

The Organ Mountains-Desert Peaks will join other popular national monuments in the Land of Enchantment, including Aztec Ruins, Bandalier, Petroglyph, Rio Grande del Norte, White Sands and others. Following the President's designation of the Rio Grande del Norte National Monument in March 2013, the BLM reported a 40% increase in visitors to the area in less than one year. A recent independent study by BBC Research & Consulting estimates that the new national monument designation could generate \$7.4 million in new economic activity annually from new visitors and business opportunities.

"This is a great day for New Mexico – thanks to so many New Mexicans who spoke up and worked hard, we have a new national monument. It will put the unique and spectacular desert landscapes of Doña Ana County on recreation maps around the world, creating jobs and bringing in millions of dollars in revenue," Udall said. "I'm proud to join Senator Bingaman, Senator Heinrich, Secretary Jewell – and especially the many people of Doña Ana County who love Las Cruces's beautiful backdrop and wanted it protected for generations to come. Today we celebrate them."

"This celebration and tremendous accomplishment would not be possible without the community's strong support," said Heinrich. "I give my heartfelt gratitude to the diverse coalitions and stakeholders from southern New Mexico who worked tirelessly to make today a reality, and I thank Senator Jeff Bingaman who helped push this effort many years ago. The Organ Mountains-Desert Peaks National Monument will help preserve our cultural identity, promote tourism in the region, boost the local economy, and foster recreational opportunities like hunting, hiking, and camping. I also thank President Obama and Secretary Jewell for recognizing how special this land is for all of us. I will continue to work to ensure we preserve New Mexico's treasured landscapes for future generations to enjoy."

Jewell in January participated in a meeting with senior officials at the Bureau of Land Management and the U.S. Border Patrol to underscore Interior's continued commitment to cooperate in providing law enforcement and border security in the area. The proclamation supports the 2006 Memorandum of Understanding between the U.S. Department of Homeland Security, the U.S. Department of the Interior, and the U.S. Department of Agriculture regarding "Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States' Borders."

The proclamation also allows watershed restoration and small-scale flood prevention projects if they are consistent with the care and management of the monument's resources.

"The creation of New Mexico's Organ Mountains-Desert Peaks National Monument helps celebrate the nation's newest and most exciting conservation system, the National Conservation Lands," BLM Director Neil Kornze said. "This system, which is managed by the BLM, includes incredible public lands like the Rio Grande del Norte, the San Juan Islands in Washington, and California's Fort Ord. Each of these areas has been protected by President Obama as testament to the BLM's important conservation work."

The BLM currently manages all of the public lands within this new national monument for a range of multiple uses which will continue, including grazing, conservation of natural and archeological resources and outdoor recreation, such as hunting, hiking, biking, and camping. Statewide, BLM-New Mexico hosted 2.9 million visitors at 28 recreation sites in fiscal year 2013. Recreation on BLM-managed lands and waters in New Mexico supported more than 1,900 jobs and contributed more than \$172 million to the state's economy in fiscal year 2012.

"This is an exciting day for New Mexico and the entire country. Hundreds of Americans from diverse backgrounds came together to protect this treasured piece of land, which will now be preserved for future generations" said Acting Chair Boots. "When the President signed the proclamation on Wednesday, he made it clear that he's not finished. He's going to continue to get things done for the American people wherever he can, and that includes protecting lands where communities like Las Cruces are speaking up."

The Organ Mountains provide a spectacular backdrop for the City of Las Cruces, with steep, angular rock outcroppings reminiscent of organ pipes rising to nearly 9,000 feet in elevation and extending for 20 miles, running generally north and south. This high-desert landscape within the Chihuahuan Desert contains a multitude of biological zones – mixed desert shrubs and grasslands in the lowlands ascending to piñon and juniper woodlands, and finally to ponderosa pines at the highest elevations.

The area is home to a high diversity of animal life, including deer, pronghorn antelope, mountain lions, peregrine falcons and other raptors as well as rare plants, some found nowhere else in the world, such as the Organ Mountains pincushion cactus. Hundreds of archeologically and culturally significant sites are found within the new monument, including some limited Paleo-Indian artifacts, extensive rock art sites and the ruins of a ten room pueblo, among other ancient dwellings. More recent history is memorialized with Geronimo's Cave, Billy the Kid's Outlaw Rock, and sites related to early Spanish explorers. The Organ and Doña Ana Mountains are popular recreation areas, with multiple hiking trails, a popular campground, and opportunities for hunting, mountain biking, rock climbing, and other recreation.

On the west side of Las Cruces, the Desert Peaks area contains mountain ranges and peaks of the Robledo Mountains and the Sierra de las Uvas. These landscapes contain mesas and buttes interspersed with deep canyons and arroyos. Significant cultural sites of the Mogollon, Mimbres, and Jornada cultures are located throughout this region along with historic sites associated with more recent settlements, including the Butterfield Overland Stagecoach Trail. This area is also home to the unusual Night-blooming Cereus, with a one-night-a-year bloom.

To the southwest of Las Cruces is the Potrillo Mountains Complex, characterized by cinder cones, volcanic craters, and basalt lava flows in the open desert landscape. There too is abundant wildlife, and significant scientific finds including an 11,000-year old skeleton of an extinct ground sloth. In more modern times, the Apollo astronauts trained in a section of the Potrillos because of its resemblance to a moonscape. Today it serves as a popular destination for outdoor recreation.

The Bureau of Land Management's [National Conservation Lands](#) contain some of the West's most spectacular landscapes. They include more than 875 federally recognized areas comprising more than 27 million acres of National Monuments, National Conservation Areas, Wilderness Areas, Wilderness Study Areas, Wild and Scenic Rivers, National Scenic and Historic Trails, and Conservation Lands of the California Desert.

Secretary Jewell Joins Community to Celebrate Organ Mountains-Desert Peaks National Monument Designation

President's Proclamation Honors Community's Vision to Protect, Promote Public Lands in Doña Ana County and to Boost Tourism, Outdoor Recreation Economy

LAS CRUCES, NM - Secretary of the Interior Sally Jewell today joined hundreds of community members to celebrate President Obama's designation of the Organ Mountains-Desert Peaks National Monument in south-central New Mexico. The President's action supports the locally driven effort to conserve, protect and enhance some of the public lands in Doña Ana County.

The celebration took place at the Oñate High School in Las Cruces. Secretary Jewell was joined by Bureau of Land Management (BLM) Director Neil Kornze, White House Council on Environmental Quality Acting Chair Mike Boots, U.S. Senators Tom Udall and Martin Heinrich, and local community and business leaders.

"Today is the culmination of a community-led effort to conserve, protect and promote these public lands, but it's the beginning of a new chapter for the businesses that will benefit from the tourism and recreation, and the wildlife that rely on this unique habitat," said Secretary of the Interior Sally Jewell. "The Organ Mountains and surrounding Desert Peaks are steeped in culture, history, wildlife and opportunities to enjoy the great outdoors – from hunting to hiking to gazing at ancient petroglyphs and fossils – and the President's action ensures that these cherished landscapes are celebrated and passed on to the generations of New Mexicans and Americans to come."

The Organ Mountains-Desert Peaks will join other popular national monuments in the Land of Enchantment, including Aztec Ruins, Bandalier, Petroglyph, Rio Grande del Norte, White Sands and others. Following the President's designation of the Rio Grande del Norte National Monument in March 2013, the BLM reported a 40% increase in visitors to the area in less than one year. A recent independent study by BBC Research & Consulting estimates that the new national monument designation could generate \$7.4 million in new economic activity annually from new visitors and business opportunities.

"This is a great day for New Mexico – thanks to so many New Mexicans who spoke up and worked hard, we have a new national monument. It will put the unique and spectacular desert landscapes of Doña Ana County on recreation maps around the world, creating jobs and bringing in millions of dollars in revenue," Udall said. "I'm proud to join Senator Bingaman, Senator Heinrich, Secretary Jewell – and especially the many people of Doña Ana County who love Las Cruces's beautiful backdrop and wanted it protected for generations to come. Today we celebrate them."

"This celebration and tremendous accomplishment would not be possible without the community's strong support," said Heinrich. "I give my heartfelt gratitude to the diverse coalitions and stakeholders from southern New Mexico who worked tirelessly to make today a reality, and I thank Senator Jeff Bingaman who helped push this effort many years ago. The Organ Mountains-Desert Peaks National Monument will help preserve our cultural identity, promote tourism in the region, boost the local economy, and foster recreational opportunities like hunting, hiking, and camping. I also thank President Obama and Secretary Jewell for recognizing how special this land is for all of us. I will continue to work to ensure we preserve New Mexico's treasured landscapes for future generations to enjoy."

Jewell in January participated in a meeting with senior officials at the Bureau of Land Management and the U.S. Border Patrol to underscore Interior's continued commitment to cooperate in providing law enforcement and border security in the area. The proclamation supports the 2006 Memorandum of Understanding between the U.S. Department of Homeland Security, the U.S. Department of the Interior, and the U.S. Department of Agriculture regarding "Cooperative National Security and Counterterrorism Efforts on Federal Lands along the United States' Borders."

The proclamation also allows watershed restoration and small-scale flood prevention projects if they are consistent with the care and management of the monument's resources.

"The creation of New Mexico's Organ Mountains-Desert Peaks National Monument helps celebrate the nation's newest and most exciting conservation system, the National Conservation Lands," BLM Director Neil Kornze said. "This system, which is managed by the BLM, includes incredible public lands like the Rio Grande del Norte, the San Juan Islands in Washington, and California's Fort Ord. Each of these areas has been protected by President Obama as testament to the BLM's important conservation work."

The BLM currently manages all of the public lands within this new national monument for a range of multiple uses which will continue, including grazing, conservation of natural and archeological resources and outdoor recreation, such as hunting, hiking, biking, and camping. Statewide, BLM-New Mexico hosted 2.9 million visitors at 28 recreation sites in fiscal year 2013. Recreation on BLM-managed lands and waters in New Mexico supported more than 1,900 jobs and contributed more than \$172 million to the state's economy in fiscal year 2012.

"This is an exciting day for New Mexico and the entire country. Hundreds of Americans from diverse backgrounds came together to protect this treasured piece of land, which will now be preserved for future generations" said Acting Chair Boots. "When the President signed the proclamation on Wednesday, he made it clear that he's not finished. He's going to continue to get things done for the American people wherever he can, and that includes protecting lands where communities like Las Cruces are speaking up."

The Organ Mountains provide a spectacular backdrop for the City of Las Cruces, with steep, angular rock outcroppings reminiscent of organ pipes rising to nearly 9,000 feet in elevation and extending for 20 miles, running generally north and south. This high-desert landscape within the Chihuahuan Desert contains a multitude of biological zones – mixed desert shrubs and grasslands in the lowlands ascending to piñon and juniper woodlands, and finally to ponderosa pines at the highest elevations.

The area is home to a high diversity of animal life, including deer, pronghorn antelope, mountain lions, peregrine falcons and other raptors

as well as rare plants, some found nowhere else in the world, such as the Organ Mountains pincushion cactus. Hundreds of archeologically and culturally significant sites are found within the new monument, including some limited Paleo-Indian artifacts, extensive rock art sites and the ruins of a ten room pueblo, among other ancient dwellings. More recent history is memorialized with Geronimo's Cave, Billy the Kid's Outlaw Rock, and sites related to early Spanish explorers. The Organ and Doña Ana Mountains are popular recreation areas, with multiple hiking trails, a popular campground, and opportunities for hunting, mountain biking, rock climbing, and other recreation.

On the west side of Las Cruces, the Desert Peaks area contains mountain ranges and peaks of the Robledo Mountains and the Sierra de las Uvas. These landscapes contain mesas and buttes interspersed with deep canyons and arroyos. Significant cultural sites of the Mogollon, Mimbres, and Jornada cultures are located throughout this region along with historic sites associated with more recent settlements, including the Butterfield Overland Stagecoach Trail. This area is also home to the unusual Night-blooming Cereus, with a one-night-a-year bloom.

To the southwest of Las Cruces is the Potrillo Mountains Complex, characterized by cinder cones, volcanic craters, and basalt lava flows in the open desert landscape. There too is abundant wildlife, and significant scientific finds including an 11,000-year old skeleton of an extinct ground sloth. In more modern times, the Apollo astronauts trained in a section of the Potrillos because of its resemblance to a moonscape. Today it serves as a popular destination for outdoor recreation.

The Bureau of Land Management's [National Conservation Lands](#) contain some of the West's most spectacular landscapes. They include more than 875 federally recognized areas comprising more than 27 million acres of National Monuments, National Conservation Areas, Wilderness Areas, Wilderness Study Areas, Wild and Scenic Rivers, National Scenic and Historic Trails, and Conservation Lands of the California Desert.

Information about the Organ Mountains-Desert Peaks National Monument can be found at www.blm.gov/nm/omdp

RE: New National Park Service LGBT Theme Study and more This Week at Interior

Here's what happened this week at Interior: Secretary Jewell at New York City's Stonewall Inn, to announce the launch of a National Park Service theme study on LGBT historic sites; Secretary Jewell joins Dr. Jill Biden in Seattle for a panel on 21st century workplaces and their effects on working families and the economy; with hurricane season approaching the USGS launches a new app that shows coastal erosion from extreme storms; and new images of the celebration last week at the new Organ Mountains-Desert Peaks National Monument.

Hi Secretary,

I'm attaching a list and PDF of all the correspondence we've received and responded to from the Western Governors. We will upload these for you but I wanted to be sure you received them prior to WGA, per your request. Many thanks to Fav and Rob in Exec Sec for helping us compile these letters.

In addition, please find a PDF of the President's and Western Gov's proclamations for Great Outdoors Month that Vicki Dixon in our office compiled for you.

Thank you and see you in CO.

Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street, N.W.
Washington DC 20240

Honorable Tom Vilsack
Secretary
U.S. Department of Agriculture
1400 Independence Avenue, S.W.
Washington, DC 20250

Dear Secretaries Jewell and Vilsack:

The listing of the Lesser Prairie Chicken by the U.S. Fish and Wildlife Service as a threatened species has created significant and wide-ranging impacts on Kansans. This listing will create hardships and unintended consequences for our citizens, with little long-range improvement to the population of the Lesser Prairie Chicken because of the listing.

Historical studies have shown annual population fluctuation of the Lesser Prairie Chicken (LPC) and the strong correlation between drought and declining LPC numbers. At least three consecutive years of drought have exacerbated regional populations of LPC, along with other wildlife, and domestic livestock herds.

Kansans and wildlife/range management specialists working in Kansas in partnership with other states have developed appropriate plans that were being implemented prior to the listing. The USFWS decision to promote the NRCS Conservation Plan and the WAFWA Range-Wide Conservation Plan without adequate consideration of other quality, regional and statewide plans is short-sighted and damaging. There are reasonable alternatives, and other proposed conservation plans submitted by other state and regional conservation groups that should be fully considered. In the wake of the listing, Kansans should not be asked to enter any agreements until all conservation plans can be appropriately considered.

The "threatened" listing of the LPC has jeopardized the strongest habitat tool available in the occupied range. The voluntary incentive-based Conservation Reserve Program (CRP) has provided significant acreage of habitat for the Lesser Prairie Chicken and other wildlife species.

I am calling on USDA to pursue enhanced Incentives for voluntary Conservation Reserve Program (CRP) measures in the LPC habitat areas. Since 2008, total CRP acreage in Kansas has declined by 25%, thus reducing habitat for the LPC and other wildlife species.

The agreement between the Department of the Interior and the Department of Agriculture to allow voluntary practices designed to protect and increase LPC populations overlaps regulatory controls with voluntary incentive based programs. Guidelines developed for USDA voluntary programs should not be used as the only standard. The USFWS should recognize all science-based practice standards, in addition to the NRCS Field Office Technical Guide.

Mandatory mitigation plans like the Range-Wide Plan add significant cost to any new development. A farmer wanting to establish a new five acre farmstead could see mitigation costs approaching or exceeding \$200,000. The installation of an oil well on range land could cost the oil producer as much as \$100,000. A single wind turbine could require a mitigation cost of \$1,000,000, and transmission lines almost \$200,000 per mile. The bottom line is that mandatory mitigation could slow or halt capital and energy development in many areas of Western Kansas, in addition to creating disincentives for growth in agriculture, the combination of which will significantly impact the Kansas economy

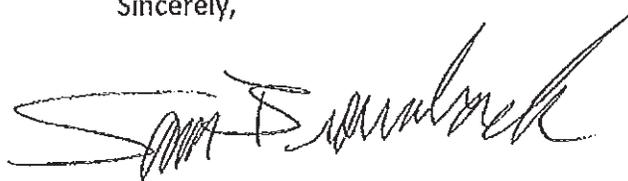

Creating additional rules, regulations and financial hardships for landowners and energy producers will not have a positive response or improve the habitat for the LPC. We do not believe it will efficiently and effectively increase the population of the LPC in Kansas, the state with the single largest occupied range. We already have appropriate tools, and this issue is best addressed at the state and regional level as opposed to a federally directed initiative.

In summary, action is needed in these areas:

1. Suspend current regulatory actions concerning the LPC until all proposed plans have been reviewed and thoughtfully considered for their attributes of species recovery.
2. Challenge USFWS to reconvene with USDA/NRCS to address the current program opportunities through CRP or Environmental Quality Incentives Program to show good faith that species recovery is the mission.
3. USFWS and all applicable federal agencies must recognize the significance of drought as the greatest limiting factor on the effectiveness of all protection efforts and persistent drought conditions must be understood as limiting the ability of any efforts to increase LPC populations.

Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Sam Brownback". The signature is fluid and cursive, with a large initial "S" and a long, sweeping underline.

Sam Brownback

Honorable Sally Jewell
Secretary
United States Department of Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Secretary Jewell:

Shortly after its release Western Governors received a copy of the report, *A Strategy for Improving the Mitigation Policies and Practices of the Department of Interior* (the Report) produced by members of Department of Interior's (DOI) Energy and Climate Change Task Force. The Report outlines challenges and opportunities that may arise with respect to implementation of your Secretarial Order 3330: *Improving Mitigation Policies and Practices of the Department of the Interior* (the Order). The Report identifies specific guiding principles to be considered by DOI and its agencies in reaching landscape-scale mitigation decisions, along with strategies and tools DOI will employ in this effort.

As discussed at the Western Governors' Association (WGA) Winter Meeting in December 2013, the landscape-scale approach described in the Order presents certain legal and regulatory complexities for both federal and state agencies. Recognizing this, on January 21, 2014, the WGA submitted to you a letter and list of questions regarding the Order. For your reference we have attached to this letter both the January 21 letter and list of questions that accompanied that letter.

Since submission of the letter and questions, WGA staff has had several discussions with DOI representatives regarding the Order. Those conversations, however, have not yielded sufficient and direct responses -- from either DOI or BLM -- to the many questions raised in our January letter.

Governors remain unclear on exactly how DOI will seek to engage our states in the development and implementation of this new landscape-scale mitigation regime. We would appreciate a detailed and expedited response to our questions regarding how the Order will be operationalized.

The Report reflects DOI's appreciation for the need to collaborate with state agencies and the expertise states can add to the landscape-scale mitigation discussion. Indeed, such collaboration is listed as a *guiding principle* in the Report's Executive Summary.

Honorable Sally Jewell
May 30, 2014
Page 2

Western Governors share the responsibility of properly managing land and resources within their state borders and recognize that landscape-scale mitigation efforts can play an important role in project development, resource conservation, and land use planning. State agencies house a wealth of knowledge and scientific expertise that would be beneficial -- indeed vital -- to DOI in achieving the goals and deliverables set forth in the Report.

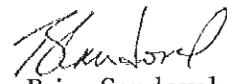

To achieve a mutually beneficial level of collaboration, we respectfully request that DOI and its representatives actively engage with state agencies now -- while the landscape-scale mitigation plan is being developed -- so that the goals set forth in the Report may be achievable in the near-term and our partnership durable in the long-term.

One point of clarification: among the tools discussed in the Report are geospatial assessments, including WGA's Crucial Habitat Assessment Tool (CHAT). DOI's enthusiasm for CHAT is greatly appreciated and we are confident in CHAT's value for project pre-planning. Western Governors, however, continue to underscore that CHAT is a non-regulatory tool intended to give project planners -- be they public or private -- a "30,000-foot" view of states' wildlife assets. That "first look" then can guide project planners to relevant state agencies for a deeper dive. While CHAT can be extremely helpful for project-specific pre-planning, it is not intended to be a landscape-based regulatory planning tool.

We look forward to your expedited response to the questions we have posed.

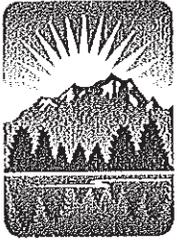

Sincerely,

John Hickenlooper
Governor, State of Colorado
WGA Chairman

Brian Sandoval
Governor, State of Nevada
WGA Vice Chairman

Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Secretary Jewell:

Western Governors are dedicated to ensuring the health of our grasslands and forests. When there is damage to a natural area in the West -- whether caused by wildfire, invasive species, flooding, or other factors -- federal agencies often play an important role in the area's stabilization and rehabilitation. It appears, however, that there is a lack of consensus among federal agencies about how to best balance competing missions and effectively implement important restoration functions, such as reseeded, in a timely fashion. We urge federal agencies to develop shared criteria for selection of seed mixes to improve response times, limit further damage (such as that caused by encroachment of non-native species), and help build a basis for a stable seed production and storage system.

To our knowledge, there are divergent policies among federal agencies regarding such issues as: use of native seed; permissible seed sourcing; what seed mixes are deemed acceptable for use; responsibility among federal agencies for seed banking, etc. These inconsistencies make it difficult for seed suppliers to effectively meet federal needs. In addition, overly restrictive sourcing criteria can substantially increase costs, a critically important issue in these times of constrained budgets.

Western states intend to do their part and want to improve coordination with federal agencies. Proactive landscape-scale land management necessitates shared and targeted management planning for fire, drought, flooding, and other threats to grasslands and forests.

Accordingly, we would like to work with federal agencies to establish clear and consistent disaster rehabilitation approaches that restore landscapes without creating monocultures or checkerboards. Increased state-federal collaboration on long-term restoration and research would be mutually beneficial.

Western Governors would appreciate answers from your Department to the following questions, which are offered in a spirit of cooperation:

Honorable Sally Jewell

May 30, 2014

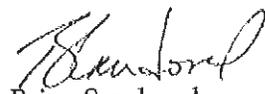

Page 2

1. How do the federal agencies under the Department of Interior (DOI) establish seeding goals and objectives? To what extent are your agencies working together to set shared goals and objectives? How are you coordinating with USDA, NRCS and other departments and agencies?
2. How are DOI agencies planning for natural disasters or other circumstances that could lead to spikes in seed demand, decreasing supply and increasing cost?
3. Is the policy guidance of DOI agencies on the use of local and native seed backed up by best available science? If local and native seed are required by DOI policies, what are your agencies doing to ensure adequate supply?
4. How does DOI acquire input on seeding practices from the states?
5. How does DOI acquire input from external stakeholders such as the seed industry, private landowners, sportsman groups, conservation groups, etc.?
6. What monitoring and evaluation do DOI agencies perform to verify achievement of goals and objectives and to refine and improve seeding practices?

Western Governors acknowledge that harmonizing seeding policies and approaches will take time and effort, but we stand ready to work with you to achieve that goal. We believe doing so will help realize our shared objective of ensuring that we are equipped to expeditiously and effectively restore the Western landscapes we all depend upon and cherish.

Sincerely,

John Hickenlooper

JUN 06 2014

The Honorable John Hickenlooper
Chairman, Western Governors' Association
1600 Broadway Suite 1700
Denver, CO 80202

Dear Governor Hickenlooper:

Thank you for your letter dated May 30, 2014, regarding the role Federal land management agencies play in re-seeding damaged landscapes from events such as wildfires, flooding, invasive species, and other factors.

The Department of the Interior's focus on landscape scale conservation and restoration makes coordination on re-seeding efforts crucial to those efforts. We agree that coordination among Federal agencies and with states is vitally important. To that end, Bureau of Land Management Director Neil Kornze is convening a seed meeting of Federal agencies and the WGA to develop a strategy that will address many of the points you raise in your letter. The questions you raise will provide an excellent starting point to begin discussions in this area. By working together, we can improve on the success of our restoration efforts and decrease the time needed to reach our restoration goals.

Thank you for your interest in this issue. If you would like additional information regarding the Department's progress in this area, please contact Director Kornze at (202) 208-3801. A similar letter is being sent to Governor Brian Sandoval.

Sincerely,

A handwritten signature in cursive script that reads "Sally Jewell".

GOVERNOR

STATE CAPITOL
CHEYENNE, WY 82002

Office of the Governor

May 19, 2014

The Honorable Sally Jewell, Secretary
Department of the Interior
Main Interior Building
1849 C Street, NW
Washington, DC 20240

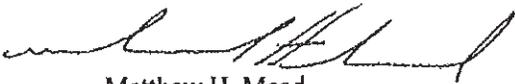

Dear Secretary Jewell:

The recovery of grizzly bears in the Yellowstone Ecosystem is a conservation success story of our time. Wyoming has worked with the U.S. Fish and Wildlife Service (FWS) and other state and federal agencies to compile and evaluate food sources data and the effect of those food sources on grizzly bear populations in the Yellowstone Ecosystem. This work substantiates that grizzly bears forage on a broad variety of food. Science demonstrates grizzly bears are expanding – in population and geography – beyond recovery criteria established by FWS and the State of Wyoming.

Both the Interagency Grizzly Bear Committee and the Yellowstone Ecosystem Subcommittee have reviewed the data and both recommend FWS delist the grizzly bears. All regulatory requirements and biological objectives have been met or exceeded. It is appropriate to publish a delisting proposal and return management of the grizzly bear to the State of Wyoming and other states in the Yellowstone Ecosystem.

Based on your September 2013 letter, I had expected to see a delisting decision in early 2014. There is no reason to wait. I encourage the FWS to work with Wyoming Game and Fish Department to develop and publish a proposed delisting rule expeditiously.

Sincerely,

Matthew H. Mead
Governor

Sally Jewell, Governor

OFFICE OF THE
EXECUTIVE SECRETARY

Honorable Sally Jewell
Secretary
United States Department of the Interior
1849 C Street NW
Washington, DC 20240

Dear Secretary Jewell:

The State of Kansas previously has expressed opposition to the listing of the Lesser Prairie Chicken as a threatened species. Since the March 27 announcement by the Fish & Wildlife Service that the listing would occur, Kansans have been dealing with the implications of that decision and the impending deadlines for participation in the Range-Wide Conservation Plan.

Kansas continues to maintain that the listing of the Lesser Prairie Chicken was not justified, and that the listing will negatively impact the state's agriculture and energy sectors in ways that can be avoided consistent with the interests of conservation and protection of the species. As a consequence, Kansas has filed a legal action to seek judicial review of the listing decision.

In the meantime, however, I am concerned that Kansans have not been allowed sufficient time to evaluate their options and prepare applications under the Range-Wide Conservation Plan. In particular, the Kansas oil & gas industry has a large proportion of small independent producers - unlike other states in the range of the Lesser Prairie Chicken, where larger producers are more dominant and have the resources to respond more rapidly. Those affected parties require more time than the standard thirty days to review their options and make vital economic decisions relating to their participation in the Range-Wide Plan. Accordingly, I am requesting that you take the necessary steps to allow an additional ninety days for those affected by the listing to opt-in to the protections provided by the federal rule.

Finally, I must note my concern that insufficient attention is being given to the important role of the Conservation Reserve Program in connection with the Lesser Prairie Chicken, and I urge greater inter-agency cooperation toward that end. The listing explicitly states that: "Lands enrolled in CRP encompass a significant portion of estimated occupied range in several lesser prairie-chicken states, but particularly in Kansas where an increase in the lesser prairie-chicken population is directly related to the amount of land that was enrolled in the CRP and planted to mixtures of native grasses." 79 Fed. Reg. 20027 (Apr. 10, 2014). I am particularly concerned that federal policies regarding expiration and/or re-enrollment of CRP land could work against the goals embodied in the listing, thereby creating conflicting federal policies that further exacerbate the effect of the listing on Kansans.

Thank you for your consideration.

Sincerely,

Sam Brownback
Governor of Kansas

cc: Dan Ashe, Director of U.S. Fish & Wildlife Service

MATTHEW H. MEAD
GOVERNOR

THE STATE OF WYOMING 649590

RECEIVED
STATE CAPITAL
CHEYENNE, WY 82002
2014 MAY -7 AM 9:

Office of the Governor

OFFICE OF THE
EXECUTIVE SECRETARY

May 6, 2014

The Honorable Sally Jewell
Secretary of the Interior
U.S. Department of the Interior
1849 C Street, NW, Room 5665
Washington, D.C. 20240

Dear Secretary Jewell,

In a letter dated March 11, 2014, Director Joe Pizarchek of the Office of Surface Mining (OSM) informed the Wyoming Department of Environmental Quality (DEQ) that \$21.2 million of Abandoned Mine Land (AML) funds – approved by Congress under the Helium Stewardship Act of 2013 (the Act) – would not be sent to Wyoming. The Act directed \$75 million of AML funds to Wyoming in FY 2015. OSM has interpreted, or misinterpreted, the Act as restricting Wyoming to only an estimated \$53.8 million. The OSM determination is incorrect and I ask that you review and reverse this determination.

The Surface Mining Control and Reclamation Act (SMCRA), as amended in 2006, requires eligible States and Indian tribes receive AML funding in two ways. First, eligible states and Indian tribes receive 50% of funds collected on state or tribal lands for reclamation (as a certified program, Wyoming does not receive the actual 50% state share but instead receives an equivalent share as in lieu Treasury funds). Second, funds known as "prior balance funds" are paid. Prior to 2007, States and Tribes did not receive a full 50% share of SMCRA funds. Amendments in 2006 corrected this underfunding, requiring "*the Secretary . . . make payments to States or Indian tribes for the amount due for the aggregate unappropriated amount allocated to the State or Indian tribe . . .*" These amendments were passed to ensure that Wyoming (and other eligible states) were paid amounts allocated and due to them under SMCRA prior to 2007.

In 2012, the Transportation Bill amended SMCRA adding a provision limiting the "*total annual payment*" (emphasis added) to \$15 million. While the payment was modified, the balance due to Wyoming was not modified by the Transportation Bill. SMCRA also required the prior balance be repaid "*in 7 equal annual installments, beginning with fiscal year 2008.*" Wyoming is owed \$165.4 million in prior balance funds.

The Wyoming Congressional delegation worked to ensure that Wyoming was paid. The Helium Stewardship Act raised Wyoming's cap to \$28 million for FY 2014 and \$75 million for FY 2015. It clearly states these funds first be applied to in lieu payments (traditional reclamation) and funds over the in lieu payments be applied to the remaining prior balance funding owed to Wyoming.

OSM released a new table titled "*Hypothetical AML Funding Projections from FY 2014 through FY 2024*". This table reflects Wyoming will receive \$53.8 million instead of the \$75 million set forth in the

Secretary Sally Jewell
May 6, 2014
Page 2

Act. Wyoming DEQ Director Todd Parfitt wrote to Director Pizarchek and requested the table be corrected. (DEQ letter attached.) Director Pizarchek did not honor this request. (March 11, 2014 letter attached.)

Director Pizarchek's interpretation is inconsistent with the Act on prior balance payments. SMCRA clearly delineates that Wyoming is still owed \$165.4 million (stipulated in the 2006 Amendments). Under Helium Stewardship Act, Wyoming should receive the \$21.2 million prior balance funds (\$75 million minus the estimated \$53.8 million in lieu payment). When this payment is made, Wyoming will still be owed a substantial prior balance amount (\$165.4 million minus \$21.2 million). If a debtor can avoid his debt by missing a payment – every lender in the country would be broke. I am sure that OSM did not intend to suggest this was the position of the United States.

Please review this matter at your earliest convenience.

Sincerely,

Matthew H. Mead
Governor

OFFICE OF SURFACE MINING
RECLAMATION AND ENFORCEMENT
Washington, D.C. 20240

MAR 11 2014

DEPARTMENT
OF

MAR 17 2014

ENVIRONMENTAL
QUALITY

Mr. Todd Parfitt
Director
Wyoming Department of Environmental Quality
122 West 25th Street
Cheyenne, WY 82002

Dear Mr. Parfitt:

Thank you for your letter dated February 4, 2014, which expressed concern that a mistake may have been made in the Abandoned Mine Land (AML) funding projections prepared by the Office of Surface Mining Reclamation and Enforcement (OSMRE). In response to your letter, we have reviewed our projections and have determined that they are correct and consistent with the Surface Mining Control and Reclamation Act of 1977 (SMCRA), as amended.

As you note, the Helium Stewardship Act of 2013, which was signed into law on October 2, 2013, contained an amendment to SMCRA that increased the cap for two years on annual AML distributions provided to certified states and tribes. In summary, the law raised the cap from \$15 million to \$28 million for Fiscal Year 2014 and to \$75 million in Fiscal Year 2015. This amendment also specified that if the cap were reached, OSMRE should distribute a state's or tribe's certified in lieu funds under section 411(h)(2) of SMCRA first, then distribute state or tribal prior balance replacement funds under section 411(h)(1) of SMCRA.

In calculating the AML funding projections, we first determined a state's or tribe's certified in lieu funds by multiplying the annual coal production estimates provided by the Department of Energy with the reclamation fee rate set forth in section 402(a) of SMCRA. Using this methodology, we estimate that just over \$107.6 million in reclamation fees will be collected in Wyoming in Fiscal Year 2014. Pursuant to section 411(h)(2) of SMCRA, certified in lieu funds are normally distributed in an amount equivalent to 50 percent of the reclamation fees collected in their states. In Wyoming's case, that would amount to approximately \$53.8 million. As you may be aware, prior balance replacement funds were authorized for seven fiscal years only, from Fiscal Year 2008 to Fiscal Year 2014 pursuant to section 411(h)(1)(C) of SMCRA. Therefore, prior balance replacement funds will not be included in AML funding provided to states and tribes for Fiscal Year 2015 and thereafter. Since certified states such as Wyoming will receive certified in lieu funds only in Fiscal Year 2015, our projection that Wyoming's distribution will be \$53.8 million is accurate.

Please note that the \$53.8 million projection is only an estimate. Once we finalize actual fee collections received during Fiscal Year 2014 and make any required reductions due to sequestration, the actual AML funding distributed to Wyoming may be different.

Please let us know if you need additional information.

Sincerely,

A handwritten signature in cursive script, appearing to read "Joseph G. Pizarchik".

Re: 25 C.F.R. § 83 Rulemaking and the Little Shell Tribe of Chippewa Indians

Dear Secretary Jewell & Assistant Secretary Washburn:

I support the Department of the Interior's ("Department") rulemaking to revise 25 C.F.R. § 83, "Procedures for Establishing that an American Indian Group exists as an Indian Tribe" ("Part 83 Process"). I urge you to continue forward with this work and publish the proposed rule as soon as possible.

This rule revision is important because I believe that the Part 83 Process was not properly administered when the Department of the Interior issued a Final Determination against the Little Shell Tribe of Chippewa Indians of Montana ("Little Shell Tribe") in November of 2009. This Final Determination overturned the Proposed Finding in Favor of Acknowledging the Little Shell Tribe. The Part 83 Process should have determined that the Little Shell Tribe is an Indian tribe of Montana—a designation which is more than 100 years overdue.

Montanans, Montana tribes and the State of Montana all recognize that the Little Shell Tribe is a part of our state's rich culture and history. I support their efforts to become federally recognized and it is time for the Federal Government to finally grant the Little Shell Tribe the recognition they are owed. Federal recognition will enhance their ability to provide additional services to tribal members and strengthen their tribal government. I am encouraged that the Department has seen the need to fix this issue through the Part 83 rulemaking process.

I trust the Department will move swiftly to publish its proposed Part 83 rule and complete the rulemaking process. The Department has my full support in this effort.

Sincerely,

A handwritten signature in black ink, appearing to read "Steve Bullock".

Dear Governor Bullock:

Thank you for your letter of May 1, 2014, urging completion of the rulemaking process for Federal acknowledgment of Indian tribes.

We have announced availability of the proposed rule for public comment, and the Federal Register published the proposed rule on May 29, 2014 (79 FR 30766). I am enclosing a copy of the press release, which contains additional information.

Thank you for your support of our efforts as we work toward a proposed rule that improves the transparency, efficiency, timeliness, flexibility, and integrity of the Federal acknowledgment process.

Sincerely,

Kevin K. Washburn
Assistant Secretary -- Indian Affairs

Interior Proposes Reform of Federal Acknowledgment Regulations *Proposed rule would address "broken" process*

Washington, D.C. — Secretary of the Interior Sally Jewell and Assistant Secretary-Indian Affairs Kevin K. Washburn today announced publication of proposed regulations that would reform the 35-year old process by which the Department of the Interior officially recognizes Indian tribes. Federal acknowledgment establishes the U.S. Government as the trustee for Tribal lands and resources and makes Tribal members and governments eligible for federal budget assistance and program services.

"President Obama believes that reforming the federal acknowledgment process will strengthen our important trust relationship with Indian tribes. Acknowledgment by the Department of the Interior confirms the existence of a nation-to-nation relationship between an Indian Tribe and the United States," said Secretary Jewell. "Through this Administration's outreach initiatives, tribal leaders have told us that the current process can be inconsistent, cost millions of dollars and take decades to complete. Our proposed rule maintains the rigorous integrity needed, but allows that process to be conducted in a timely, efficient and transparent manner."

The existing regulations, known as "the Part 83 process", were originally adopted in 1978 and were updated only once 20 years ago. Prior to that, Interior had addressed requests for Tribal acknowledgment on a case-by-case basis. While the 1978 regulations established a structured process for federal acknowledgment, these regulations have been widely criticized as being too time-consuming, sometimes arbitrary and generally "broken."

"Reform of the process is long-overdue," said Assistant Secretary Washburn. "One of my first assignments at the Department was to search for ways to improve the federal recognition process and address long-standing criticisms of those regulations. This initiative is the product of substantial Tribal consultation and public comment and we are grateful for the broad public interest in this reform effort and the helpful guidance we have received from Tribes and the public."

-Continued-

Page 2 - Reform of Federal Acknowledgment Regulations

Key features of the proposed rule would promote transparency by updating the Part 83 criteria to include objective standards; promote efficiency by requiring a petitioner to show community and political influence/authority from 1934 to the present rather than from as early as 1789; and eliminate the need for a petitioner to demonstrate that third parties identified the petitioner as a tribe from 1900 to the present. The proposed rule would make changes to the petitioning process that facilitate the timely issuance of proposed findings and final determinations. It would also allow an administrative judge to conduct a comprehensive hearing and review of a negative proposed finding.

In recognition of the high level of interest in the acknowledgement process, the Department used a transparent approach and significant outreach effort. Before beginning the formal rulemaking initiative, Interior issued a discussion draft last summer to facilitate public input on how to improve the process. Through the discussion draft and ensuing tribal consultations and public meetings, the Department obtained substantial feedback. In total, more than 2,800 commenters providing input on the discussion draft.

The proposed rule reflects current federal policy embodied in the Indian Reorganization Act and seeks to codify the Department's past practice under the Part 83 process to promote consistency and transparency. With the issuance of this proposed rule, the Department is again seeking input from tribes, petitioners seeking acknowledgment, and interested members of the public so that any reforms to the process are fair, timely and transparent.

Of the 566 federally recognized tribes, 17 have been recognized through the Part 83 process under Title 25 of the Code of Federal Regulations, *Procedures for Establishing that an American Indian Group Exists as an Indian Tribe*. Though far more tribes have been recognized through Congressional action, the Part 83 process is an important mechanism because it allows deliberative consideration of petitions by a staff of federal experts in anthropology, genealogy and history and ultimately allows for a decision by an objective decision-maker. When petitioning groups that meet the several criteria are officially "acknowledged" as Indian tribes, the U.S. Government accepts trusteeship of Tribal lands and natural resources and Tribal governments and members become eligible to receive federal health, education, housing and other program and technical assistance services.

Interior will be conducting tribal consultations and public meetings on the proposed rule in July 2014. Tribal consultations are generally open only to representatives of federally recognized Indian tribes. Public meetings are open to everyone. The tribal consultations will be held on the following dates and locations:

2014 APR 25 AM 9:38

OFFICE OF THE
EXECUTIVE SECRETARY

Susana Martinez
Governor

April 22, 2014

The Honorable Sally Jewell
Secretary of the Interior
1849 C Street, N.W.
Washington, D. C. 20240

The Honorable Chuck Hagel
Secretary of Defense
1400 Defense Pentagon
Washington, D. C. 20301

Dear Secretary Jewell and Secretary Hagel:

I am writing to you concerning the Department of Interior (DOI) and the Department of Defense (DOD) review of the proposed SunZia Southwest Transmission Project. As you are aware, this project has been under consideration by the Bureau of Land Management (BLM) for several years, and they completed their Final Environmental Impact Statement (FEIS) in June, 2013. Prior to the publication of the FEIS, there had been several multi-agency meetings regarding proposed routing for the transmission lines (two AC lines, or one AC line and one DC line), though the meetings seemed to fall short of National Environmental Policy Act (NEPA) requirements pertaining to cooperating agency involvement.

The objective of the project is to pull wind energy from Central New Mexico and move the energy to a site in Arizona. The BLM Preferred Alternate Route is planned across the Northern Extension Area of White Sands Missile Range (WSMR). This planned route poses an unacceptable negative impact to critical test and evaluation missions at WSMR. As I understand it, there are two good alternatives which would both support the project's objectives and WSMR's mission—the DOD preferred route north of the Northern Extension Area, or burying the line for approximately 35 miles along the BLM preferred route. I strongly support either one of these alternatives.

The Honorable Sally Jewell and the Honorable Chuck Hagel
April 22, 2014
Page 2

I was briefed recently on the Massachusetts Institute of Technology Lincoln Laboratory Review of the BLM Preferred Alternative Route, and I understand the review validates DOD concerns. My Administration fully supports our national goals regarding development of renewable energy, but not at the expense of military missions. We have followed closely the evolution of our National Security Strategy—White Sands Missile Range will continue to play a significant role as the Defense Department continues development of long-range capability against emerging threats, particularly those that might arise in the Asia-Pacific Theater.

With respect to the FEIS, and as provided for in 43 CFR 1610, I provided a Consistency Review statement to BLM on August 16, 2013. I have not received a response. This statement fully described several inconsistencies between the FEIS and our state's plans, policies, and programs with regards to our support for military missions in New Mexico.

Secretary Jewell, I urgently ask for your support of an alternative which avoids a negative impact to WSMR. Secretary Hagel, please let me know how we can further demonstrate our support for WSMR—it is an invaluable resource to our nation and to our great State of New Mexico.

My staff point of contact for this issue is Hanson Scott, hanson.scott@state.nm.us. Please let us know if we can provide additional information.

Sincerely,

Susana Martinez

EXECUTIVE SECRETARY

John W. Hickenlooper
Governor

April 14, 2014

The Honorable Sally Jewell
Secretary
United States of the Interior
1849 C Street NW
Washington, DC 20240

Dear Secretary Jewell,

We are writing today to offer my support of the proposal to provide \$1 million per year of funding to connect urban youth with the Rocky Mountain Arsenal National Wildlife Refuge ("Refuge") and fulfill our mutual goal of exposing the future stewards of our natural resources to the environment and wildlife.

Located in a fast growing urban area, part of which is economically disadvantaged, use of the Refuge exploded in 2013 to over 300,000 visitors, from 23,000 visitors in the prior year, and is expected to increase each year. In addition to its ideal location in close proximity to over 141,000 school children, the Refuge boasts a 16,000-acre reserve including bison, eagles and a restored native prairie ecosystem.

This proposal will allow for immediate implementation of the following:

- Removal of physical barriers from residential areas to the Refuge.
- Investment into partnerships, initially with Environmental Learning for Kids, a non-profit organization focused on providing outdoor education and experiences to underserved youth. In addition, the Refuge will continue to expand partnerships with local school districts, the Colorado Parks and Recreation Association and a new and emerging metropolitan green space alliance.
- Increased investment into youth employment opportunities with Mile High Youth Corps and Ground Work Denver to create a future conservation constituency.
- Finance one special project each year in support of the National Wildlife Refuge System's urban refuge initiative. This will allow the Refuge to support and encourage further innovation and local grassroots efforts as they develop across the region.

We share your commitment to youth in the outdoors and hope you will agree with me that the Refuge is best positioned to bridge many of the existing divides between youth and nature.

Sincerely,

John W. Hickenlooper

JUN 06 2014

The Honorable John W. Hickenlooper
Governor of Colorado
136 State Capitol
Denver, Colorado 80203

Dear Governor Hickenlooper:

Thank you for your April 14, 2014 letter of support of the proposal to provide \$1 million per year of funding for connecting urban youth to Rocky Mountain Arsenal National Wildlife Refuge. Your support for this effort harmonizes with the Secretary's recently announced Secretarial Order to significantly expand recreational, educational, volunteer and career opportunities for millions of youth and veterans on the nation's public lands, including partnerships with businesses and youth organizations, in an effort to bridge the growing disconnect between young citizens and the great outdoors.

At this time, the proposal selected to receive these funds has not been determined. An announcement of the selectee is anticipated for July, 2014.

Thank you for your active engagement and commitment to bridging the growing gap between youth and nature.

Sincerely,

DIRECTOR

Office of the Governor

April 10, 2014

The Honorable Sally Jewell
Secretary, U.S. Department of Interior
1849 C Street, N.W., Room 6151
Washington, DC 20240

Dear Secretary Jewell:

I am deeply concerned by the actions of Bureau of Land Management (BLM) officials engaged in the impoundment of livestock in Clark County, Nevada. The conduct of BLM officials, including use of aggressive canines, SWAT teams and equipment, snipers with long rifles, a military helicopter, and over 200 heavily-armed law enforcement officials, has the appearance of a paramilitary operation rather than a round-up of cattle.

As a result, there is a toxic atmosphere of intimidation, turbulence, and anxiety in this quiet community that has left many locals in fear of even leaving their homes. To complicate matters more, the Clark County Fair, which is scheduled to begin today in Logandale, Nevada and close on Sunday, will bring thousands of children, families and exhibitors to the area.

Based on the aggressive behavior that has been displayed already, which is well documented in the mainstream media and social media sites, I am concerned that this matter may continue to escalate to a tragic and unnecessary outcome.

Indeed, so-called militias from other states have raised a call to arms to come to Nevada to confront federal authorities. <https://m.youtube.com/watch?v=e8O-o5OPsA&feature=youtu.be>

To further exacerbate the situation, the BLM has closed important public roads and established "First Amendment Zones" to limit where members of the public can express their views of this event. Moreover, the BLM has limited media access and required private landowners and right-of-way holders to obtain prior approval before accessing their lands or visiting their utility lines.

Over the past week, my office has received hundreds of phone calls and emails, overwhelmingly decrying the actions of BLM officials. I have met with state and local government officials, who fear tragedy is imminent. I have spoken with BLM Director Neil Kornze to insist that he take action, including dismantling the offensive "First Amendment Zones." To date, the only response I have received from federal officials is that there is no consideration for suspending or changing the character of the operation.

Arrests, public road-closures, the creation of an overly-restrictive "First Amendment Zone," use of tasers and police dogs, and generally heavy-handed behavior have created a dangerous situation in this community and our state. Local residents are living in fear and are upset and frustrated by BLM's actions. National militia groups are descending upon Clark County.

As Governor of the State of Nevada, I respectfully call on you, as Secretary of the United State Department of Interior, to suspend this enforcement activity immediately and order the BLM and all involved federal agencies to stand down. It is not my intent to question the Orders of the court or the merits of the legal dispute. I ask you to withdraw from this poorly planned and executed endeavor and put an end to this now to avoid what could become a horrible tragedy.

I look forward to speaking with you today and implore you to give this matter your utmost attention.

Sincere regards,

BRIAN SANDOVAL
Governor

CC: The White House

545827

THE SECRETARY OF THE INTERIOR
WASHINGTON

APR 11 2014

The Honorable Brian Sandoval
Governor of Nevada
Carson City, Nevada 89701

Dear Governor Sandoval:

I am in receipt of your letter expressing concern about the cattle impoundment being undertaken by the Bureau of Land Management in Clark County, Nevada. As I assured you in our conversation of yesterday, our highest priority is the safety of the public, as well as the local, State, and Federal employees and contractors who are involved in carrying out and supporting this lawful impoundment in furtherance of two recent Federal court orders. I ask that you join with us to publicly emphasize the need for demonstrators to remain lawful, peaceful, and not to place themselves or others in danger by impeding the Federal employees and contractors conducting the impoundment.

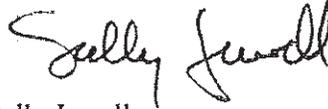

I am dismayed by the tone of your letter and by the factual misstatements it contains. Rest assured that there are no military helicopters, no Federal snipers, no paramilitary operation by the Federal Government, and no curtailment of First Amendment rights of those who disagree with our decision to implement Federal court orders to remove trespassing cattle. The BLM is conducting this operation consistent with established procedures and protocols.

The reported presence of out-of-state militia members underscores the need for your support and for the involvement of State law enforcement personnel to maintain public safety during this impoundment. The public statements of the protest participants, while showing flagrant disregard for Federal authority, indicate that they respect the exercise of State police powers. As public officials, we share the responsibility to ensure compliance with all laws without exception. In your role as Governor, you can reinforce that message.

Our goal in this action is to remove trespassing cattle that unlawfully remain on public lands, including lands managed by the National Park Service, as a result of their owner's refusal to comply with Federal law and three Federal court orders. He has also rejected our many efforts over the years to resolve this situation. For more than 20 years, the owner of these cattle has been trespassing on publicly owned resources for his own use and profit, unfairly impacting other potential uses of these public lands and without complying with the same laws as 16,000 law-abiding public lands ranchers nationwide. To allow this illegal activity to continue is unfair to lawful users of the public lands.

As we discussed yesterday and as I also relayed to Clark County Sheriff Doug Gillespie, I ask you to stand with us and to commit the resources to help us resolve this trespass situation peacefully.

Sincerely,

A handwritten signature in cursive script that reads "Sally Jewell". The signature is written in black ink and is positioned above the printed name.

Sally Jewell

April 9, 2014

The Honorable Sally Jewell, Secretary
U. S. Department of the Interior
1849 C Street, N.W.
Washington, DC 20240

Dear Secretary Jewell,

I performed a consistency review of the Proposed Resource Management Plan for the Lander Field Office (Lander RMP) in April 2013. Nearly a year later, there is still no Record of Decision (ROD). This delay has consequences. Please help bring the Lander RMP to finality.

RECEIVED
2014 APR 10 PM 3:08
OFFICE OF THE GOVERNOR
EXECUTIVE SECRET

The Lander RMP covers a total of 6.6 million acres in five counties. For more than seven years, dozens of cooperators reviewed and commented on thousands of pages of data and information while maintaining a tight schedule for the Lander RMP process outlined by the BLM. In addition to the cooperators, there was a high degree of public participation. The participation reflects the plan's importance to the lives of people who live, work, and visit the five counties covered by the planning area. The public process for developing resource management plans is as important as the final product. The citizenry has done its job; it is now up the Department of Interior to do its part.

The Lander RMP will guide land use decisions for 20 years—including grazing, habitat protection, mineral development, recreation and other uses. The uncertainty of the Lander RMP's ROD affects the private sector's ability to plan and to make long term business decisions. This jeopardizes economic prosperity and creates unnecessary tension and uncertainty. It prevents implementation of conservation initiatives and actions addressing natural resource issues such as trails, recreation, energy development, wildlife, not to mention public health and safety.

In its March 2010 status determination for the Greater Sage-Grouse, the U.S. Fish and Wildlife Service endorsed Wyoming's strategy, stating: "the core area strategy...if implemented by all landowners via regulatory mechanisms, *would* provide adequate protection for sage-grouse and their habitats in the State." [Emphasis added.] Wyoming's strategy is being implemented on non-federal lands. Without a final Lander RMP, Wyoming's ability to demonstrate and document Greater Sage-Grouse conservation efforts is curtailed. The U.S. Fish and Wildlife

The Honorable Sally Jewell
April 9, 2014
Page 2

Services' decision on the listing is less than 18 months away. Wyoming and its partners have expended considerable resources to develop an effective, enduring model for sage-grouse conservation that will be implemented through the Lander RMP. The Lander RMP will serve as a template for other resource management plans revision efforts in Wyoming and across the west—but only after it is signed.

Please help resolve the delay of the Lander RMP. I hope you will be able to sign the decision at your earliest convenience. It would be wonderful if the signing would take place in Wyoming, but that is secondary to the real need to have the Lander RMP signed expeditiously.

Sincerely,

Matthew H. Mead
Governor

Rick VanderVoet, Lander Field Manager, Bureau of Land Management

THE SECRETARY OF THE INTERIOR
WASHINGTON

JUN 04 2014

The Honorable Matthew H. Mead
Governor of Wyoming
Cheyenne, Wyoming 82002

Dear Governor Mead:

Thank you for your letter of April 9, 2014, regarding your interest in the Bureau of Land Management (BLM) issuing the Record of Decision (ROD) for the Lander Resource Management Plan (RMP). I share your desire to provide the public with management certainty to this area.

The Department must balance releasing the Lander ROD with a landscape approach to Greater sage-grouse conservation. While the U.S. Fish and Wildlife Service has expressed its support of the Wyoming strategy, the Lander RMP is only one component of the larger, multi-state planning initiative with broad national implications. I recognize the years of effort by the State of Wyoming and members of the public working with the BLM to arrive at fair and balanced management for the Lander area. I appreciate your leadership and that of your predecessor, Governor Freudenthal, in developing a plan to both conserve the Greater sage-grouse and sustain responsible natural resource development. As your letter indicates, the Lander RMP will guide the use of public lands for at least the next two decades.

The Department is on target to complete its review of the proposed plan amendments and revisions. This has required extensive coordination with the USDA Forest Service as well as states throughout the West in what has been one of the most extensive land-use planning efforts ever, all within a very short timeframe. As you can appreciate, the first Greater sage-grouse plan needs to be fully vetted as it will set the stage for all the plans that follow. We have nearly completed our review of the Lander plan and are very close to finalizing our decision.

Thank you for your leadership in Wyoming and as co-chair of the Sage-grouse Task Force in advancing the State-Federal collaboration that is critical to our success in conserving the sage-grouse. I look forward to seeing you at the Western Governors' Association's meeting and our continued work together on this pioneering effort.

Sincerely,

A handwritten signature in cursive script that reads "Sally Jewell".

LEMANU P. MAUGA
LEUTENANT GOVERNOR

April 9, 2014

Serial: 300

Honorable Sally Jewell
Secretary of the Interior
Department of the Interior
United States Government
Washington D.C. 20240

Dear Madams Secretary;

The Legislature of American Samoa has transmitted to me, the approved Senate Joint Resolution No. 33-3 amending Article II, Section 9 and Article II Section 19 of the Revised Constitution of American Samoa to provide for a "Legislative Override of Executive Varies without action by the Secretary of the Interior". Moreover, it has been decreed by the Legislature of American Samoa, to place this resolution on the ballot for the next election on November 4, 2014 to be voted on by the people of American Samoa.

While I don't object to the subject of the resolution, I am very concerned that legal issues connected with the Presidential Delegated Oversight Authority to DOI over the Territory of American Samoa, along with former Congressman Fofu Sumia 1984 amendment shifting the review of amendments of our Constitution to the Congress of the United States have not been clearly addressed. These legal issues might invalidate the proposed Constitutional amendment as prescribed by Senate Concurrent Resolution No. 33-3.

Based on the foregoing, I am requesting your assistance if it would be possible to have the Solicitor General review the referenced resolution and determine if there are legal impediments which require resolution before the matter is placed in a referendum in the next general election. It is important for me to ensure that the people of American Samoa are well informed of all the issues associated with the proposed constitutional amendments.

As time is of the essence, your usual prompt attention is appreciated and humbly requested to ensure that sufficient time is spent to create full awareness among the people of American Samoa so they can make informed choices. Thank you very much for your consideration of this request.

Sincerely,

Lolo M. Moliga
Governor of American Samoa

Rhea Suh
Assistant Secretary
U.S. Department of the Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Assistant Secretary Suh:

It has come to my attention that the U.S. application for candidacy in the Extractive Industries Transparency Initiative (EITI) was approved by the EITI Board at its March 18-19 meeting in Oslo, Norway. I understand and appreciate that the application included an opt-in provision for states, as requested in WGA's letter to you last July. I further understand that the Multi-Stakeholder Group (MSG) that is providing input to the Extractive Industries Transparency Initiative plans to gather, collate, and analyze publicly available state revenue data for inclusion in the U.S. EITI report, regardless of whether a state has opted in.

I strongly recommend that the MSG and the Interior Department (as the primary federal government representative to EITI) clarify the proposed use of state data and propose a formal opt-in process for interested states. To better inform state consideration of EITI participation, WGA recommends that our federal partners develop and distribute an explanation of the initiative that describes:

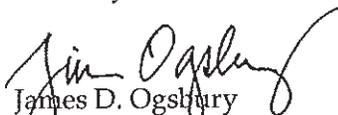

- the rationale for state participation and identifies the costs and benefits for a state opting in to EITI reporting;
- the process by which a state can opt-in to formally participate in U.S. EITI reporting; and
- how state data will be gathered and used for states which do not opt in.

While Governors support the goal of revenue transparency and recognize that the U.S. system of transparency can be a model for the rest of the world, they will react unfavorably to efforts by EITI that create an unfunded federal mandate. Unless states have opted in, DOI, EITI or the "Independent Administrator" contracted to gather and "repackage" existing state data should not expect state agency staff to take time away from their duties to help gather, collect, analyze or interpret data requested by EITI.

Rhea Suh
April 4, 2014
Page Two

We look forward to receiving more information about the proposed use of state data and a formal opt-in process for interested states.

Sincerely,

James D. Ogshury
Executive Director

United States Department of the Interior

OFFICE OF THE SECRETARY
Washington, D.C. 20240

APR 17 2014

Mr. James D. Ogsbury
Executive Director
Western Governors' Association
1600 Broadway, Suite 1700
Denver, Colorado 80202

Dear Mr. Ogsbury:

Thank you for your letter dated April 4, 2014, on behalf of the Western Governors' Association (WGA) concerning U.S implementation of the Extractive Industries Transparency Initiative (USEITI). You requested further clarification of how extractive revenues collected by states may be affected as USEITI implementation continues, and I appreciate the opportunity to share this information with you.

As you know, the USEITI candidacy application was approved at the March 2014 EITI International Board Meeting. Consistent with our previous communications, the candidacy application sought and successfully obtained a waiver of the EITI requirement to include reconciliation of state extractive revenues in EITI reporting. Publicly available information about state extractive revenues will be in the USEITI Report as part of the contextual data describing the U.S. extractive sector.

Moving forward, a working group will be formed to engage states in the joint design of a state "opt-in" procedure for USEITI reporting. The USEITI Multi-Stakeholder Group (MSG), which includes representatives from the States of California and Wyoming, will lead this effort. The rationale for seeking the waiver and proposing to instead develop an "opt-in" procedure recognizes not only the complex and varied nature of the state extractive landscape, but also the need to first obtain meaningful guidance from states on an approach that will be mutually beneficial. As a result, the approval of the USEITI candidacy application marks a starting point for more detailed discussion, not a destination with defined outcomes for state participation.

We welcome the opportunity for more active WGA involvement in designing a state "opt-in" procedure and identifying the benefits to state residents, especially in those areas where substantial energy development occurs. We would like to invite WGA representatives to begin attending the USEITI MSG open meetings, starting with the next one on April 23rd, and/or to

participate in the state "opt-in" working group. We will continue to keep you informed and seek your input as the state "opt-in" procedure is designed, and look forward to WGA's continued engagement on behalf of states.

Please let me know if there is any additional information that would be helpful.

Sincerely,

April 3, 2014

Honorable Sally Jewell
Secretary of the Interior
U.S. Department of the Interior
1849 C Street, NW
Washington, D.C. 20240-10148

Dear Secretary Jewell,

Thank you for your continued engagement with Western Governors and the Western Governors' Association. We are writing to ask the Department of Interior's support for reauthorization of the Federal Permit Streamlining Pilot Project (Pilot Project).

In accordance with Section 365 of the Energy Policy Act of 2005, then-Secretary of the Interior Gale Norton structured the Pilot Project through a memorandum of understanding with the Secretary of Agriculture, Administrator of the Environmental Protection Agency, and Chief of the U.S. Army Corps of Engineers.

The Pilot Project established seven regional Bureau of Land Management (BLM) offices as Pilot Project offices for a period of 10 years. The Western states where these offices are located collectively process the vast majority of the applications for permit to drill (APD) filed with the BLM.

A key aspect of the Pilot Project is that these offices are eligible to receive a portion of rental fees paid by oil and gas development companies in connection with their leases on BLM land. The Pilot Project offices utilize the additional funding to add staff and other resources to increase office efficiency and streamline processing of APDs. Further, this additional funding has been used by the Pilot Project offices to support BLM resource conservation efforts.

Since enactment of the Energy Policy Act of 2005, demand for natural gas has increased dramatically. In order to continue the development of domestic resources, efficient and streamlined regulatory permitting processes are ever more important. The Pilot Project is an important tool in this regard.

The Energy Policy Act of 2005 dictates that the Pilot Project's 10-year term will expire in 2015. Given its success, we support reauthorization of the Pilot Project.

Honorable Sally Jewell

April 3, 2014

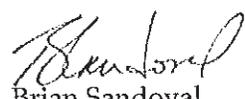

Page 2

Bipartisan support for the Pilot Project was seen when, in Dec. 2013, Congress passed and the President signed H.R. 767, expanding the scope of the Pilot Project and providing additional discretion to BLM. Ongoing bipartisan support is further evidenced by the Feb. 5, 2014 letter sent to you by Senator Tom Udall and Congressman Rob Bishop.

We join interested Members of Congress in asking the Department of Interior to support extension of the Pilot Project. We look forward to working collaboratively with you to ensure the continued success of this program, so important to a number of Western states.

Respectfully,

John Hickenlooper
Governor, State of Colorado
WGA Chairman

Brian Sandoval
Governor, State of Nevada

THE SECRETARY OF THE INTERIOR
WASHINGTON

APR 17 2014

The Honorable John Hickenlooper
Chairman, Western Governors' Association
1600 Broadway, Suite 1700
Denver, Colorado 80202

Dear Governor Hickenlooper:

Thank you for your letter of April 3, 2014, regarding the expiration of the Federal Permit Streamlining Pilot Project (Pilot Project) authorized by the Energy Policy Act of 2005 (EPAct), and your desire to seek its reauthorization. I appreciate your sharing your views on this matter. The Department of the Interior and the Bureau of Land Management (BLM) also consider the 10-year Pilot Project to be a success, and it has allowed the BLM and its Pilot Project partner bureaus and agencies to efficiently process oil and gas drilling permits and administer the Federal mineral estate.

The additional resources devoted to processing oil and gas use authorizations through the EPAct have enhanced the BLM's capabilities to coordinate across the relevant agencies, increasing the pace of permitting and streamlining associated environmental reviews. In addition, the Pilot Project has provided the BLM's oil and gas inspection and enforcement program with resources necessary to allow for more thorough oversight of authorized oil and gas operations.

Recently, legislative authority was granted to expand the Pilot Project in the Miles City (MT) Field Office to include all field offices within the jurisdiction of the BLM's Montana/Dakotas State Office. Similarly, the Pilot Project in the Buffalo (WY) Field Office was legislatively expanded to include the Casper Field Office. We would like to work with Congress to provide additional flexibility nationwide to utilize the pilot office authority to respond accordingly as industry's geographical interests and permitting demands shift over time.

We look forward to working with you to develop solutions that will allow us to extend the success of these pilot offices and to provide for environmentally responsible energy development on the public lands. If you would like to discuss this matter further, please do not hesitate to contact me. A similar letter has been sent to Governor Brian Sandoval.

Sincerely,

Sally Jewel

State of New Mexico - OFFICE OF THE SECRETARY

RECEIVED

2014 APR -2 PM 4: 18

Susana Martinez
Governor

March 24, 2014

The Honorable Secretary Sally Jewell
U.S. Department of Interior
1849 C Street, NW
Washington, DC 20240

Dear Secretary Jewell:

I am writing in support of the creation of a national monument covering lands in the Organ Mountains, Organ Needles, and Pena Blanca WSA, as set forth in H.R. 995, The Organ Mountains National Monument Establishment Act sponsored by Congressman Steve Pearce. New Mexico is blessed with thousands of miles of remarkable lands preserved not only for our citizens' enjoyment, but for countless visitors from around the world. This establishment of roughly 50,000 acres would protect and conserve these lands for future generations to enjoy the beauty of our rich terrain.

While H.R. 995 ensures that this effort is not overzealous in scope and breadth, I am concerned that a similar proposal brought forth by Senators Heinrich and Udall allocates too much land. This proposal appropriates roughly five times the acreage of HR995 and could threaten border security as well as water and grazing rights if it were adopted.

I stand with members of our delegation in wanting to ensure that our beautiful state is protected for future generations. However, the approach favored by Senators Heinrich and Udall is simply too broad. I strongly encourage your support of Congressman Pearce's approach, and look forward to working with members of our delegation to ensure its success.

Santa Fe, New Mexico 87501

Dear Governor Martinez:

Thank you for your letters of March 24, 2014, to Bureau of Land Management (BLM) Director Neil Kornze and me regarding proposed legislation to designate a national monument consisting of public lands managed by the BLM in Doña Ana County, New Mexico.

Your input on these pending bills is very much appreciated. We constantly work to take into account the interests of a wide range of stakeholders to protect America's public lands and provide for economic development in a manner that is consistent with law and sound public policy.

This area is not only a treasure for the State of New Mexico, but one of national significance to be managed for, and cherished by, all the people of the United States. The Department of the Interior and the BLM welcome opportunities to engage in important discussions such as this regarding the protection of some of America's most compelling landscapes.

We look forward to continuing to work with you, the sponsors of these bills, and other stakeholders to appropriately manage this important area for generations to come.

Sincerely,

A handwritten signature in cursive script that reads "Sally Jewell".

Re: National Historic Landmark Designation of Nevada State Prison

Dear Secretary Jewell:

Please accept this letter expressing my support for the nomination of Nevada State Prison as a National Historic Landmark. Nevada State Prison has played a prominent role in shaping the rich history of the State of Nevada, a history we are now celebrating as we enter our 150th year of statehood. The historical, cultural, architectural and geological significance of this unique site cannot be overstated, and its profound impact on Nevada's legacy should be preserved for the benefit of future generations of Americans.

One of the oldest prisons in the Western United States, Nevada State Prison operated from 1862 until its closure in 2012. It was originally housed in the Warm Springs Hotel in Carson City. In 1867, the facility was reconstructed out of sandstone which was quarried at the site. Since its reconstruction, the prison has played a role in defining some of the most quintessential cultural, political, and social events in Nevada's history.

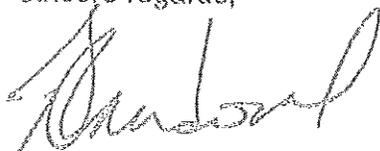

Nevada State Prison's first warden, Abraham Curry, who is considered the founding father of Carson City, donated the land upon which Nevada's State Capitol building stands today. The State Capitol was constructed using the sandstone quarried at Nevada State Prison. The Capitol's timeless architecture and sandstone exterior continue to embody the strength and unbreakable resolve that have defined Nevada throughout its rugged history. Nevada has evolved from its early days as an untamed frontier into a premiere international destination that today is at the forefront of some of America's most dynamic industries and emerging technologies. Like the Capitol's sandstone exterior that

has withstood the test of time, the State of Nevada, too, has weathered its own tempests and has emerged strong, unwavering, and ready for the opportunities that lie ahead. Thus, Nevada State Prison's early role in the construction of some of Nevada's most cherished landmarks is also an essential chapter in the ongoing story of the Silver State.

Nevada State Prison is also renowned for its geological treasures, linking modern-day Nevada to its rich early heritages. As far back as 1882, fossilized footprints were discovered at the site, and fossils from a variety of species are still being uncovered there to this day. These types of invaluable discoveries at the site of Nevada State Prison spur research and scientific interest that help to answer important questions about our past. They are also a reflection of Nevada's unrivaled contributions in the field of anthropology, which include North America's oldest known petroglyphs, recently discovered in northern Nevada, as well as the Tule Springs fossil bed outside of Las Vegas, which is home to thousands of fossils of Ice Age mammoths, bison and American lions.

As an iconic and historic institution, Nevada State Prison is so much more than a building. It truly is a landmark that embodies much of what Nevada has to offer its citizens, as well as the millions of visitors that travel to Nevada every year. The site is emblematic of ideas that continue to inform the history of this great State, as well as the ideas that will inspire its future. It has played a pivotal role in the development of Nevada from its earliest days as an unchartered territory, and has endured the ups and downs of its 150-year history. I therefore wish to convey my enthusiastic support for the designation of Nevada State Prison as a National Historic Landmark. I firmly believe that such a designation would greatly enhance Nevada's cultural and historical vitality, and I hope you will also carefully consider supporting the nomination of this inimitable treasure of Nevada's past.

Sincere regards,

A handwritten signature in black ink, appearing to read "B. Sandoval", written in a cursive style.

APR - 9 2014

The Honorable Brian Sandoval
Governor of Nevada
101 North Carson Street
Carson City, NV 89701

Dear Governor Sandoval:

Thank you very much for your letter of support for the National Historic Landmark (NHL) designation of the Nevada State Prison in Carson City. From your letter, the history of the prison sounds impressive. The NHL staff will evaluate the prison's eligibility for designation if they receive a request for nomination. To date, they have not received any information about the prison, nor a request that the site be considered for NHL designation.

Rebecca Palmer, the Nevada State Historic Preservation Officer, informed the NHL staff that a National Register of Historic Places nomination is being prepared for the Nevada State Prison. Preparation of the nomination is funded, in part, by a Certified Local Government grant from the National Park Service to Carson City. We look forward to receiving the National Register nomination.

National Historic Landmark designation is quite different from National Register listing. The NHL program recognizes properties of exceptional national significance that exhibit a very high degree of integrity. National Register listing is available for historic properties that are significant from a local, state, or national perspective. Each program has distinct criteria for evaluating eligibility.

As the Nevada State Prison nomination is being prepared, the National Register and NHL staff will assist the preparers as needed. The staff will hold your letter of endorsement until a nomination has been received. Thank you very much for your interest in the National Historic Landmark program and for your support in recognizing Nevada's rich heritage.

Sincerely,

Mike Connor
Deputy Secretary
U.S. Department of the Interior
1849 C Street, NW
Washington, DC 20240

Dear Deputy Secretary Connor:

I am pleased to congratulate you on your appointment as Deputy Secretary of the Department of the Interior. I did ask for quick approval of your nomination but am not sure I caused the 2-day response. I have enjoyed working with you in the past, and I look forward to working with you in the future on projects that are critical to North Dakota.

In particular, I look forward to continued discussions with you regarding the Red River Valley Water Supply project. A study on the project is currently underway; I will provide you with an update on the proposed route once the study is completed early this summer.

I also again want to request your support to obtain funding for a Plan of Study to identify potential improvements to the river operating plans implemented in both the United States and Canada with regard to the Souris River. It is very important that this Plan of Study is completed, as it will be of great importance in helping the United States and Canada to provide long-term flood protection for our citizens in the Souris River Valley.

Congratulations on your new position; I look forward to continuing to work with you on issues important to our state and our nation.

Sincerely,

Jack Dalrymple

Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Secretary Jewell:

Western Governors and the U.S. Department of the Interior (DOI) share a commitment to conserve the greater sage-grouse. As we have repeatedly stated, Western Governors support all reasonable management efforts necessary to support a not-warranted decision by the U.S. Fish and Wildlife Service concerning the greater sage-grouse. We thank you and your agency directors for your cooperation with our states in the development of sound conservation measures.

Western Governors are pleased to share our most recent *Inventory of State and Local Governments' Conservation Initiatives for Sage-Grouse: 2013 Update*. This third annual inventory illustrates the many ways that states and counties are taking proactive, voluntary steps to conserve the species – steps which are consistent with the Conservation Objectives Team report, and other conservation requirements, issued by the Service. These steps preclude the need to include the greater sage-grouse on the federal endangered species list.

An accurate evaluation of the effect of state measures upon overall population trends for greater sage-grouse requires DOI and its agencies to take into account the full spectrum of state activities, be they legislative, regulatory, administrative or voluntary, and adequately acknowledge the associated benefits.

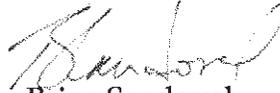

Western Governors pledge to continue working with DOI, U.S. Fish and Wildlife Service and the Bureau of Land Management to comprehensively document all greater sage-grouse conservation actions in order to ensure that greater sage-grouse conservation plans and policies are fully accounted for at the time of a final listing proposal.

MATTHEW H. MEAD
GOVERNOR

STATE CAPITOL
CHEYENNE, WY 82002

Office of the Governor

641022

February 18, 2014

The Honorable Sally Jewell
Secretary of the Interior
U.S. Department of the Interior
1849 C Street, N.W.
Washington, DC 20240

Dear Secretary Jewell,

I support the work of the Sweetwater River Conservancy (Conservancy) in Wyoming. The Conservancy finalized a Wetland Mitigation Bank with the U.S. Army Corps of Engineers to safeguard important wetland habitat in perpetuity and unlock other areas for development. Now the Conservancy is working to secure habitat for the sage-grouse using a Habitat Conservation Bank permitted by the U.S. Fish and Wildlife Service (Service).

RECEIVED
2014 FEB 19 10:46 AM
FEDERAL BUREAU OF INVESTIGATION
U.S. DEPARTMENT OF JUSTICE

The Conservancy's Habitat Conservation Bank builds on principles in my sage-grouse core area conservation strategy. It will protect over 700,000 acres of sage-grouse habitat. This landscape-scale habitat bank will be larger than all other nationwide Service-approved habitat banks combined. While sage-grouse are the focus of the Conservancy's work, benefits extend to mule deer, water quality and quantity, livestock production and other natural resources. I look forward to final approval of the proposed Bank by the Service. I commend Mark Sattelberg, Ecological Services Field Supervisor for Wyoming, for his efforts to achieve these goals.

The Conservancy also maintains habitat for bald and golden eagles, other raptors and migratory birds. These avian species have been a focus of wind industry guidelines, the Bald and Golden Eagle Protection Act and Migratory Bird Treaty Act. Proactive habitat banking concepts for bald and golden eagles, migratory birds and other raptor management would benefit from matching proven science, federal land use and wildlife protection laws. I would appreciate your assistance in applying habitat banking to avian species.

Thank you for your upcoming meeting with the Conservancy. Working with the Sweetwater River Conservancy and similar groups encourages private efforts and results in long term benefits to sage-grouse, wildlife, water, open space, hunting and ranching. Wyoming continues to be a leading force in sage-grouse protection. The Conservancy's work is another important extension of that effort.

Sincerely,

Matthew H. Mead
Governor

*Secretary,
look forward to seeing
you soon.*

THE SECRETARY OF THE INTERIOR
WASHINGTON

MAR 25 2014

The Honorable Matthew H. Mead
Governor of Wyoming
Cheyenne, Wyoming 82002

Dear Governor Mead:

Thank you for your letter of February 18, 2014, supporting the efforts of the Sweetwater River Conservancy (Conservancy) to conserve natural resources in Wyoming. The Department of the Interior also supports these important conservation efforts because of the great potential to protect essential natural resources. I appreciate your support and the backing of State agencies on these projects as well.

The Conservancy's habitat conservation bank is an ambitious undertaking. I am excited that the habitat conservation bank is designed on a landscape scale and builds on your sage-grouse core area conservation strategy, something that is required for the continued protection of greater sage-grouse. I commit the Bureau of Land Management and the U.S. Fish and Wildlife Service (FWS) to diligently work on the establishment of the habitat conservation bank.

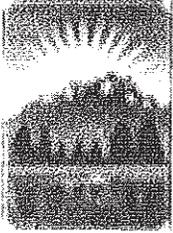

Regarding your comments about using conservation banks for avian species, we have initiated discussions at the national level on this complicated issue. At this time, we are exploring whether it is possible to utilize a traditional conservation banking approach to address impacts to eagles, given our current regulations governing take of eagles. We will continue to assess the degree to which it is possible to do as you suggest and apply these habitat banking concepts to eagles. Although the regulations implementing the MBTA do not currently address conservation banking when activities affect birds covered by that Act, the FWS supports and encourages voluntary banking efforts for this purpose.

It was a pleasure to meet with former-Governor Freudenthal and the Conservancy recently, and I look forward to learning more about their innovative efforts. I also commend your leadership in sage-grouse protection and natural resource issues in Wyoming.

Sincerely,

Sally Jewell

2014 FEB 19 AM 6:41

OFFICE OF THE
EXECUTIVE SECRETARIAT

Dear Secretary Jewell:

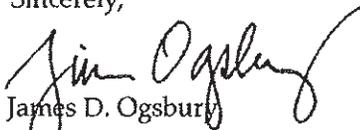

On behalf of the Western Governors' Association (WGA), I am writing to communicate Western Governors' concerns regarding invasive species. The problem of invasive species is one of the most complex environmental issues facing our nation, growing and creating economic and ecological damage across our western landscapes and Pacific Islands.

The National Invasive Species Council (NISC) was created to provide high-level interdepartmental coordination of federal invasive species actions, as well as to promote coordination with states and local entities to address cross-boundary invasive species concerns. Executive Order 13112, which established NISC in 1999, provides for biennial updates of the National Invasive Species Management Plan by NISC. The most recent Management Plan, released in August 2008, covered the period from 2008-2012.

Western Governors understand that a new Management Plan is currently being drafted under the auspices of NISC. WGA strongly urges NISC to engage and cooperate with states during the drafting process. Such coordination will ensure that federal priorities and actions align with the efforts of states, localities, nonprofit entities, and other stakeholders.

Western Governors welcome the opportunity to work with you on development and implementation of a new National Invasive Species Management Plan that can achieve measurable progress on invasive species. I look forward to learning from you how WGA can most constructively participate in the process of developing the management plan.

Sincerely,

James D. Ogsbury
Executive Director

Honorable Sally Jewell

United States Department of the Interior

OFFICE OF THE SECRETARY
Washington, DC 20240

APR 01 2014

Mr. James D. Ogsbury
Executive Director
Western Governors' Association
1600 Broadway, Suite 1700
Denver, CO 80202

Dear Mr. Ogsbury,

Thank you for your letter expressing concern about invasive species causing extensive environmental and economic harm across western landscapes and in the Pacific Islands. I agree that invasive species do not respect jurisdictional boundaries and are best addressed by coordinated efforts and through close collaboration with states, localities, nonprofit entities, and other stakeholders.

I appreciate your interest in contributing to the development and implementation of the National Invasive Species Management Plan (Management Plan), currently being updated and revised by the National Invasive Species Council (NISC). As Co-Chair of the National Invasive Species Council, I welcome the opportunity to work closely with the Western Governors' Association (WGA) to design the best strategy possible for addressing invasive species and protecting our vital natural resources. The WGA plays a critical role in invasive species prevention and control efforts throughout the western United States.

NISC recognizes the importance of engagement and cooperation with the states and tribes in gathering valuable input for the Management Plan, and improving our collective efforts to minimize the impacts of invasive species over the next few years. We look forward to working with WGA in our planning process as the 13 NISC member departments and agencies identify key priorities.

The revised plan will also be extensively reviewed by the Invasive Species Advisory Committee (ISAC). Mandated by Executive Order 13112, ISAC consists of 30 of nonfederal individuals, representing industry, universities, states, and other stakeholders who provide advice and recommendations to NISC on invasive species issues. ISAC's comments will be carefully considered for incorporation in the revised Management Plan.

Again, thank you for your interest in the development and implementation of the new National Invasive Species Management Plan. Please don't hesitate to contact me at 202-354-1881, or by e-mail at Lori_Williams@ios.doi.gov, if you have any additional questions about how the Western Governors' Association can most constructively participate in this effort.

Sincerely,

Lori C. Williams, Esq.
Director, National Invasive Species Council

Re: Yakama Nation Retrocession Petition

Dear Assistant Secretary Washburn:

Pursuant to 25 U.S.C. §1323 and Revised Code of Washington (RCW) 37.12, I have included the attached proclamation, signed by me on January 17, 2014. The proclamation addresses a retrocession petition submitted by the Confederate Tribes and Bands of the Yakama Nation in Washington State.

On March 19, 2012, former Washington State Governor Christine Gregoire signed Engrossed Substitute House Bill 2233. This important piece of legislation created a process by which the state of Washington may retrocede to the United States civil and criminal jurisdiction previously acquired by the State over a federally recognized Indian tribe under federal Public Law 280 in 1953. The bill gives the Governor of the state of Washington the authority to approve, in whole or in part, a retrocession petition submitted by a Washington State Indian tribe. Final approval rests with the U.S. Department of the Interior.

On July 17, 2012, the Yakama Nation filed a retrocession petition with the Office of the Governor requesting full civil and criminal jurisdiction on all of Yakama Nation Indian country in five specific areas of RCW 37.12.010. I believe that the enclosed Proclamation is a great first step towards strengthening the sovereignty and independence of the Yakama Nation.

In paragraph one of the proclamation, the State grants exclusive civil and criminal jurisdiction within the exterior boundaries of the Yakama Reservation in four subject areas of RCW 37.12.010: Compulsory School Attendance; Public Assistance; Domestic Relations; and Juvenile Delinquency.

In paragraph two, the proclamation also grants to the Yakama Nation civil and criminal jurisdiction within the exterior boundaries of the reservation in Operation of Motor Vehicles on Public Streets, Alleys, Roads, and Highways cases which do not involve non-Indian plaintiffs, non-Indian defendants, or non-Indian victims. I would note that the proclamation itself states that the State will retain jurisdiction in these cases over civil causes of action involving "non-Indian

The Honorable Kevin Washburn
January 27, 2014
Page Two

plaintiffs, non-Indian defendants, *and* non-Indian victims,” as well as in criminal cases involving “non-Indian defendants *and* non-Indian victims.” The intent set forth in paragraph two, however, is for the State to retain jurisdiction in this area where *any* party is non-Indian, and therefore may be more properly read in both instances as the State retaining jurisdiction in those cases involving “non-Indian plaintiffs, non-Indian defendants *and/or* non-Indian victims.” I respectfully request that the Department make this clear in the notice accepting the retrocession Proclamation.

Finally, in paragraph three of the proclamation, the State is also retroceding criminal jurisdiction within the exterior boundaries of the reservation over all offenses not specifically addressed in paragraphs one and two, which do not involve non-Indian defendants or non-Indian victims. Again, I would note that in this paragraph the proclamation states that the State retains jurisdiction over criminal offenses involving “non-Indian defendants *and* non-Indian victims,” but the intent is for the State to retain such jurisdiction in those cases involving non-Indian defendants *and/or* non-Indian victims.”

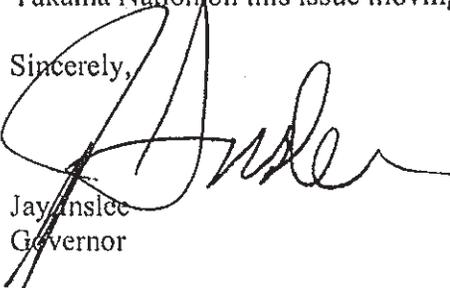

The proclamation does deny part of the petition by the Yakama Nation, and allow the State to retain existing civil and criminal jurisdiction in a limited number of areas. First and foremost, the State is retaining its existing jurisdiction outside of the exterior boundaries of the Yakama Reservation, including all trust and fee lands. Moreover, consistent with the description above, the State is retaining civil and criminal jurisdiction in Operation of Motor Vehicle cases that involve non-Indian plaintiffs, non-Indian defendants, and/or non-Indian victims.

It is important to note that nothing in the proclamation changes the existing jurisdiction the Yakama Nation has over Indian child custody proceedings under RCW 37.12.010(3) and Adoption proceedings and Dependent Children pursuant to RCW 37.12.010(6) and (7). The Yakama Nation reassumed jurisdiction over these subjects in 1980 under the Indian Child Welfare Act, and shall remain under the exclusive jurisdiction of the Yakama Nation.

Similarly, nothing in the proclamation shall affect the State’s civil jurisdiction over the civil commitment of sexually violent predators pursuant to chapter 71.09 RCW and the State must retain such jurisdiction notwithstanding the completion of the retrocession process authorized under RCW 37.12.160.

Thank you for accepting this proclamation on behalf of the state of Washington and for working to bring the retrocession petition to fruition. I look forward to continue working with you and the Yakama Nation on this issue moving forward.

Sincerely,

Jay Inslie
Governor

**PROCLAMATION BY THE GOVERNOR
14-01**

WHEREAS, on March 19, 2012, Governor Christine Gregoire signed Engrossed Substitute House Bill 2233, "Creating a procedure for the state's retrocession of civil and criminal jurisdiction over Indian tribes and Indian country"; and

WHEREAS, Engrossed Substitute House Bill 2233, which became Chapter 48, Laws of 2012, creates a process by which the state of Washington (hereafter, "the State") may retrocede to the United States all or part of the civil and criminal jurisdiction previously acquired by the State over a federally recognized Indian tribe, and the Indian country of such tribe, under federal Public Law 280, Act of August 15, 1953; and

WHEREAS, on March 13, 1963, in accordance with federal Public Law 280, Act of August 15, 1953, the State assumed partial civil and criminal jurisdiction, subject to the limitations in RCW 37.12.021 and RCW 37.12.060, within the Indian country of the Confederated Tribes and Bands of the Yakama Nation (hereafter, "Yakama Nation") pursuant to Chapter 36, Laws of 1963; and

WHEREAS, after March 13, 1963, the Yakama Nation did not invoke with the State the provision of RCW 37.12.021 but chose to rely upon the rights and remedies of its Treaty of 1855 with the United States, 12 Stat. 951 and federal laws; and

WHEREAS, on January 11, 1980, the Assistant Secretary-Indian Affairs, United States Department of the Interior, approved the Yakama Nation's petition for re-assumption of jurisdiction over Indian child custody proceedings under the Indian Child Welfare Act of 1978. Effective March 28, 1980, the Yakama Nation reassumed jurisdiction over Yakama Indian child custody proceedings; and

WHEREAS, on July 17, 2012, the Yakama Nation filed a retrocession petition with the Office of the Governor. The retrocession petition by the Yakama Nation requests full retrocession of civil and criminal jurisdiction on all of Yakama Nation Indian country and in five areas of RCW 37.12.010, including: Compulsory School Attendance; Public Assistance; Domestic Relations; Juvenile Delinquency; and Operation of Motor Vehicles on Public Streets, Alleys, Roads, and Highways; and

WHEREAS, Governor Gregoire convened government-to-government meetings with the Yakama Nation to discuss the Nation's retrocession petition. In the course of those meetings, the Yakama Nation and Governor Gregoire confirmed that the Yakama Nation asks the State to retrocede all jurisdiction assumed pursuant to RCW 37.12.010 in 1963 over the Indian country of the Yakama Nation, both within and without the external boundaries of the Yakama Reservation. However, the Yakama Nation requests that the State retain jurisdiction over mental illness as provided in RCW 37.12.010(4), and jurisdiction over civil commitment of sexually violent predators under RCW 71.09, and acknowledges that the State would retain criminal jurisdiction over non-Indian defendants; and

WHEREAS, Governor Jay Inslee convened further government-to-government meetings between the State and Yakama Nation. The Governor's Office has also consulted with elected officials from the jurisdictions proximately located to the Yakama Nation's Indian country; and

WHEREAS, on July 9, 2013, Governor Inslee exercised the six-month extension provision for issuing a proclamation, pursuant to RCW 37.12.160; and

WHEREAS, strengthening the sovereignty and independence of the federally recognized Indian tribes within Washington State is an important priority for the State; and

NOW, THEREFORE, I, Jay Inslee, Governor of the state of Washington, by virtue of the authority vested in me by Section 37.12.160 of the Revised Code of Washington, do hereby grant in part, and deny in part, the retrocession petition submitted by the Confederated Tribes and Bands of the Yakama Nation, according to the following provisions:

1. Within the exterior boundaries of the Yakama Reservation, the State shall retrocede full civil and criminal jurisdiction in the following subject areas of RCW 37.12.010: Compulsory School Attendance; Public Assistance; Domestic Relations; and Juvenile Delinquency.
2. Within the exterior boundaries of the Yakama Reservation, the State shall retrocede, in part, civil and criminal jurisdiction in Operation of Motor Vehicles on Public Streets, Alleys, Roads, and Highways cases in the following manner: Pursuant to RCW 37.12.010(8), the State shall retain jurisdiction over civil causes of action involving non-Indian plaintiffs, non-Indian defendants, and non-Indian victims; the State shall retain jurisdiction over criminal offenses involving non-Indian defendants and non-Indian victims.
3. Within the exterior boundaries of the Yakama Reservation, the State shall retrocede, in part, criminal jurisdiction over all offenses not addressed by Paragraphs 1 and 2. The State retains jurisdiction over criminal offenses involving non-Indian defendants and non-Indian victims.

Re: Request for a 60-day Extension for the Public Comment Period for the Utah Greater Sage Grouse Draft Land Use Plan Amendments/Draft Environmental Impact Statement

Dear Secretary Jewell:

I respectfully request the Bureau of Land Management grant a 60-day extension of the public comment period for the Utah Greater Sage Grouse Draft Plan Amendments/Draft Environmental Impact Statement (DEIS).

Utah is a public lands state, and decisions on land use made by our federal agency affect our state, residents, and economy significantly. The DEIS contains many proposed changes, with multiple options for each change, and affects the management of millions of acres in Utah. Many of these changes are complicated and technical, necessitating careful review.

Utah has already devoted time and resources to prepare an aggressive Sage Grouse Conservation Plan, which we have been implementing over the last year. Many of the same state and local agencies implementing the plan have been involved reviewing the hundreds of pages of information and numerous maps contained in the DEIS. Despite the great effort we have made, we have not had adequate time to complete the thorough review necessitated by these monumental changes, thus resulting in this request.

Thank you for your consideration of this request. If you have questions about this request, please contact Kathleen Clarke, director of the Governor's Public Lands Policy Coordination Office, at (801) 537-9083.

Sincerely,

A handwritten signature in black ink that reads "Gary R. Herbert".

FEB 18 2014

The Honorable Gary R. Herbert
Governor
State of Utah
Salt Lake City, Utah 84114

Dear Governor Herbert:

Thank you for your letter dated January 22, 2014, to Secretary of the Interior Sally Jewell requesting an extension of the comment period for the Bureau of Land Management's (BLM) Utah Greater Sage-Grouse Draft Land Use Plan Amendment(LUP)/Draft Environmental Impact Statement (DEIS). Secretary Jewell asked the BLM to respond to your letter.

Since the BLM announced the National Greater Sage-Grouse Planning Strategy in 2011, we have experienced unprecedented levels of state-Federal cooperation on planning efforts and landscape-level strategies to conserve the Greater Sage-Grouse and sagebrush habitat across the West. However, work remains in advance of the U.S. Fish and Wildlife Service's September 2015 court-ordered deadline to determine if the species warrants protection under the Endangered Species Act.

The BLM anticipates that the draft changes to the resource management plans covering the 68 Greater Sage-Grouse planning areas will be finalized in late 2014. Unfortunately, the existing court-ordered deadline does not allow for the flexibility to extend the comment period for the Utah Greater Sage-Grouse LUP/DEIS. In the coming months, the BLM will continue to address the volume and scope of comments we will be receiving on the LUP/DEIS, working closely with cooperating agencies, the state, other Federal agencies, Tribes and other stakeholders. The proposed plan and Final EIS needs to be released in time to allow for the Governor's consistency review, protest period, and protest resolution in order to issue a Record of Decision by Fall 2014.

Thank you for your interest in the BLM's planning efforts for the Greater-Sage Grouse and BLM public lands.

Sincerely,

Neil Kornze

January 21, 2014

Honorable Sally Jewell
Secretary
United States Department of Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Secretary Jewell:

Thank you for briefing Western Governors last month on your recently finalized Secretarial Order 3330: *Improving Mitigation Policies and Practices of the Department of the Interior*. Though Secretarial Order 3330 went final last week, this letter communicates our initial views, and the attachment propounds questions regarding the Order.

The landscape-based approach envisioned in Secretarial Order 3330 – and increasingly embodied in new federal regulations from the Department of Interior (DOI) and other federal land management agencies – presents certain legal and regulatory complexities. Such a management philosophy must be implemented in a way that clearly recognizes the legal rights and responsibilities of states and private landowners adjacent to federal lands or within shared watersheds and air sheds.

Western Governors share the responsibility – with each other, with federal partners and with private landowners – of managing land within their state's borders. The Governors agree that mitigation for impacts to natural resources is an appropriate element of project development and land use plans.

Governors, however, also bear the responsibility to manage state property interests and preserve private property rights within state boundaries. DOI mitigation requirements and processes that may affect state and private land should be:

- Developed in cooperation with the Governors in whose states DOI lands are situated; and
- Be clearly defined and predictably implemented so proper and reasonable mitigation can be included in project planning.

Honorable Sally Jewell

January 21, 2014

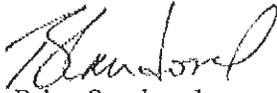

Page 2

While individual governors are likely to provide their own comments, attached please find our initial joint comments and questions concerning Order 3330. Western Governors are committed to the protection of Western landscapes. We welcome the opportunity to continue to partner with DOI and other federal land management agencies to ensure effective and conscientious land management and project impact mitigation strategies in the West.

To that end, we respectfully request that DOI share with Western Governors feedback it received from BLM field offices in anticipation of the Jan. 17, 2014 deadline set forth in the Instruction Memorandum appurtenant to the Regional Mitigation Manual and provide Western Governors with an opportunity to comment on the recently finalized Mitigation Policy.

Sincerely,

John Hickenlooper
Governor, State of Colorado
WGA Chairman

Attachment

Western Governors' Association – Version 2
Initial Questions and Comments on Secretarial Order 3330
January 21, 2014

While the below list is not intended to represent the entirety of the Western states' input, Secretarial Order 3330 and the accompanying Draft Regional Mitigation Manual Section 1794 (hereafter "Mitigation Policy") leave a number of critical questions unresolved. Among them:

Science:

- The Mitigation Policy indicates it is being developed based on science-based methodologies. By whom are these methodologies being developed? Has state-generated data been taken into account? Will those methodologies be shared with states?
- What is the relationship and interaction between the National Environmental Policy Act (NEPA) and this Mitigation Policy? Will NEPA reviews occur at the landscape, resource management plan and/or specific project levels? How will NEPA be implicated where mitigation occurs off-site?
- The Mitigation Policy calls for DOI to incorporate climate change strategies into mitigation plans. What type or types of climate change modelling will DOI use to estimate the potential future effects of climate change in determining its acceptable form or level of mitigation?
- Under Secretarial Order 3330, the DOI's Energy and Climate Change Task Force is tasked with reviewing existing mitigation practices. Will state strategies inform this review?
- When DOI's Energy and Climate Change Task Force assesses the role of Landscape Conservation Cooperatives (LCCs), how will DOI ensure that the LCCs' role is limited to providing scientific and technical expertise, as distinct from discharging management responsibilities?

Landscape Planning – Cooperation:

- How will DOI coordinate and integrate this planning effort with other federal land management departments/agencies?
- As BLM elevates the role of landscape-scale planning in its mitigation-related decisions, will the agency engage state and private stakeholders early in the planning process?

- What role will states have in determining the location and breadth of specific off-site mitigation?
- Will BLM seek to participate in state-run mitigation programs and, if so, to what extent?
- How will BLM ensure consistency and transparency of mitigation decisions?
- How will this Mitigation Policy be implemented in the field, where BLM field managers exert substantial autonomy? Will staff be trained on how to implement the proposed mitigation strategies? Will local field managers be held accountable for enforcing approved mitigation plans?

Project-Level Application:

- The Mitigation Policy appears to authorize BLM to approve or deny project permit applications based on whether mitigation measures could take place on state-owned or privately-owned lands. Is that a feasible outcome of the Policy?
- In the event a state or private landowner refuses to consent to mitigation plans acceptable to BLM, will project plans still be conditionally approved?
- Large-scale projects and linear development projects such as energy transmission lines are likely to impact a wide array of lands and resources. For such projects, are there any institutional mechanisms to assist in project planning and does BLM plan to take into account state-generated data and research?
- How will this Mitigation Policy be informed by, and reconciled with, President Obama's various Presidential Memoranda and Executive Orders seeking to modernize and streamline federal infrastructure reviews, siting and permitting regulations, policies and procedures?
- In what ways will project proponents be required to incorporate into mitigation proposals requirements of federal land management and environmental statutes including, but not limited to, the Clean Water Act (CWA), the Endangered Species Act, and the Federal Land Management and Policy Act? Will project proponents be provided with specific federal requirements to be taken into account in mitigation proposals?
- Consistency and predictability are essential for project planning and development, particularly with respect to large-scale, long-term projects such as electric transmission lines. How will this effort improve regulatory certainty and minimize financial risks in order to encourage project proponents to pursue important energy infrastructure projects?

- Section 4(a) of the Order states that the DOI Energy and Climate Change Task Force will focus on offsetting the impact of "large development projects." How will the Task Force define what constitutes a "large development project" and identify the types of projects that are excluded? Will "large development projects" include non-energy-related infrastructure? If so, what kinds?

Water

- How will the Mitigation Policy apply to existing facilities and existing rights-of-way on BLM land that are needed to exercise state-issued water rights? How will it apply to efforts to repair, maintain or enlarge existing water facilities on BLM land? How will it apply to efforts to renew or amend an existing right-of-way?
- How will the Mitigation Policy ensure that it does not impair the reasonable exercise of state-issued water rights?
- With specific regard to the CWA, will a project proponent be required to identify a "point source" at the project pre-planning stage and if so, with what level of specificity?

THE SECRETARY OF THE INTERIOR

WASHINGTON

MAR 26 2014

The Honorable John Hickenlooper
Chairman, Western Governors' Association
1600 Broadway, Suite 1700
Denver, Colorado 80202

Dear Governor Hickenlooper:

Thank you for your letter of January 21, 2014, regarding my Secretarial Order (SO) 3330: *Improving Mitigation Policies and Practices of the Department of the Interior*. Effective engagement with state government is critical to the work of the Department of the Interior (Department), and I appreciate your personal interest, as well as that of the other Western Governors.

As you note in your letter, protection of Western landscapes is a goal we all share and one that demands strong partnerships and collaborative land management. Large landscape impacts such as wildland fire, invasive species, transmission lines, and highways do not stop at state borders, and Governors from across the West have partnered to address these common challenges. For example, our experience permitting solar development in the desert Southwest has shown that planning and close coordination among states and Federal agencies can produce faster and smarter permitting that result in more efficient energy development and better environmental outcomes. The Western Governors' Association (WGA) is also leading in this regard with development of its Critical Habitat Assessment Tool, a key aggregator of state wildlife data that Federal managers currently use.

This approach is not without challenges, and my team and I are committed to working closely with Governors, tribes, local officials, and other stakeholders to craft solutions that can achieve broad and durable results. As part of SO 3330, I commissioned a task force to examine the Department's existing mitigation practices and to develop a science-based strategy for landscape-scale planning. The task force is to identify new or revised policies or practices, including any regulatory changes that would be needed, and draft a strategy for how we should address them. I anticipate that report will be completed in the near future. I also have directed my staff to reach out to the staff at WGA to discuss the issues raised in your letter in depth, including your inquiry about the Bureau of Land Management's Regional Mitigation Manual. I understand that productive discussions have already taken place. Our outreach will continue as our work in this area progresses, both with WGA and with individual Governors and state agencies.

I value the strong working relationship the Department has with WGA, and I personally appreciate my partnership with you and your fellow Governors. Should your staff have additional questions, please do not hesitate to contact Letty Belin, Counselor to the Deputy Secretary (202-208-6291), Jim Lyons, Counselor to the Assistant Secretary for Land and Minerals Management (202-208-6734), or Neil Kornze, Principal Deputy Director of the Bureau of Land Management (202-208-3801). A similar letter is being sent to Governor Brian Sandoval.

Sincerely,

Sally Jewell

THE SECRETARY OF THE INTERIOR
WASHINGTON

MAR 26 2014

The Honorable Brian Sandoval
Vice Chairman, Western Governors' Association
1600 Broadway, Suite 1700
Denver, Colorado 80202

Dear Governor Sandoval:

Thank you for your letter of January 21, 2014, regarding my Secretarial Order (SO) 3330: Improving Mitigation Policies and Practices of the Department of the Interior. Effective engagement with state government is critical to the work of the Department of the Interior (Department), and I appreciate your personal interest, as well as that of the other Western Governors.

As you note in your letter, protection of Western landscapes is a goal we all share and one that demands strong partnerships and collaborative land management. Large landscape impacts such as wildland fire, invasive species, transmission lines, and highways do not stop at state borders, and Governors from across the West have partnered to address these common challenges. For example, our experience permitting solar development in the desert Southwest has shown that planning and close coordination among states and Federal agencies can produce faster and smarter permitting that result in more efficient energy development and better environmental outcomes. The Western Governors' Association (WGA) is also leading in this regard with development of its Critical Habitat Assessment Tool, a key aggregator of state wildlife data that Federal managers currently use.

This approach is not without challenges, and my team and I are committed to working closely with Governors, tribes, local officials, and other stakeholders to craft solutions that can achieve broad and durable results. As part of SO 3330, I commissioned a task force to examine the Department's existing mitigation practices and to develop a science-based strategy for landscape-scale planning. The task force is to identify new or revised policies or practices, including any regulatory changes that would be needed, and draft a strategy for how we should address them. I anticipate that report will be completed in the near future. I also have directed my staff to reach out to the staff at WGA to discuss the issues raised in your letter in depth, including your inquiry about the Bureau of Land Management's Regional Mitigation Manual. I understand that productive discussions have already taken place. Our outreach will continue as our work in this area progresses, both with WGA and with individual Governors and state agencies.

I value the strong working relationship the Department has with WGA, and I personally appreciate my partnership with you and your fellow Governors. Should your staff have additional questions, please do not hesitate to contact Letty Belin, Counselor to the Deputy Secretary (202-208-6291), Jim Lyons, Counselor to the Assistant Secretary for Land and Minerals Management (202-208-6734), or Neil Kornze, Principal Deputy Director of the Bureau of Land Management (202-208-3801). A similar letter is being sent to Governor John Hickenlooper.

Sincerely,

Handwritten signature of Sally Jewell in cursive script.

***Re: Request for extension of Public Comment Period for the Nevada and
Northeastern California Sub-region Greater Sage-grouse Draft Land Use
Plan Amendments/Draft Environmental Impact Statement***

Dear Secretary Jewell:

I respectfully request that the Bureau of Land Management grant a 60-day extension of the public comment period for the Nevada and Northeastern California Sub-region Greater Sage-grouse Draft Land Use Plan Amendments/Draft Environmental Impact Statement (DEIS).

Land management decisions made under the final version of this document will have significant impacts on our economy, custom and culture for decades. The highly-technical DEIS is more than 1,600 pages, including appendices. It is critical to our collective success that all parties – private citizens, local governments, non-governmental organizations, industry and states – have sufficient time to review and provide meaningful comments on this substantial document.

As you know, Nevada and many other states have been working fervently to address the critical issues presented by the potential listing of the Greater Sage-grouse under the Endangered Species Act. Nevada has undertaken substantial initiatives to protect the Greater Sage-grouse and the sagebrush ecosystem, including efforts that are outlined in the State's alternative submittal (Alternative E) as part of the BLM's planning process for the DEIS. We continue to develop and review comments in consultation with our Sagebrush Ecosystem Council, state agencies, the scientific community, and stakeholders across the state.

2014 FEB 18 PM 2:22

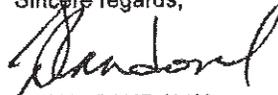

640985

RECEIVED

Should you have any questions or wish to discuss this further, please do not hesitate to contact me or my Chief of Staff, Mr. Gerald Gardner, at (775) 684-5670.

Thank you for your kind consideration of this request and for your continued attention to this critical issue.

Sincere regards,

BUREAU OF LAND MANAGEMENT
Washington, D.C. 20240
<http://www.blm.gov>

FEB 19 2014

The Honorable Brian Sandoval
Governor
State of Nevada
Carson City, Nevada 89701

Dear Governor Sandoval:

Thank you for your letter dated January 17, 2014, to Secretary of the Interior Sally Jewell requesting an extension of the comment period for the Bureau of Land Management's (BLM) Nevada and Northeastern California Sub-region Greater Sage-Grouse Draft Land Use Plan Amendments/Draft Environmental Impact Statement (DEIS). Secretary Jewell asked the BLM to respond to your letter.

Since the BLM announced the National Greater Sage-Grouse Planning Strategy in 2011, we have experienced unprecedented levels of state-Federal cooperation on planning efforts and landscape-level strategies to conserve the Greater Sage-Grouse and sagebrush habitat across the West. However, work remains in advance of the U.S. Fish and Wildlife Service's September 2015 court-ordered deadline to determine if the species warrants protection under the Endangered Species Act. The BLM anticipates that the draft resource management plans covering the 68 Greater Sage-Grouse planning areas will be finalized in late 2014.

Unfortunately, the existing court-ordered deadline does not allow for the flexibility to extend the comment period for the Nevada and Northeastern California Sub-region Greater Sage-Grouse Draft Land Use Plan Amendments/DEIS. In the coming months, the BLM will be addressing comments on the Draft Land Use Plan/DEIS, working closely with cooperating agencies, the state, other Federal agencies, Tribes and other stakeholders. The proposed plan and Final EIS needs to be released in time to allow for the Governor's consistency review, protest period, and protest resolution in order to issue a Record of Decision by fall 2014.

Thank you for your interest in the BLM's planning efforts for the Greater-Sage Grouse and BLM public lands.

Sincerely,

Steve Ellis
Deputy Director for Operations

GREAT OUTDOORS MONTH, 2014

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

On windswept coastlines, in lush forests, and atop striking mountain peaks, Americans take in sights that have inspired generations. Our natural landscapes provide refuge for those seeking solitude. They attract tourism, create jobs, and honor our history and cultural heritage. They are family campgrounds, arenas for recreation, and backdrops for countless adventures. During Great Outdoors Month, we celebrate the rugged beauty that echoes the independence at the heart of the American spirit, and we rededicate ourselves to protecting these open spaces for tomorrow's explorers, athletes, and lovers of nature.

America's conservation legacy is rooted not only in its forward-thinking leaders like Presidents Thomas Jefferson, Abraham Lincoln, and Theodore Roosevelt -- but also in all the Americans who did their part to safeguard a small slice of the land they love. It falls to each of us to advance their legacy in our time. That is why I have permanently protected more than 3 million acres of public land -- including 11 new National Monuments established through the Antiquities Act and new wilderness areas in nine States across the country -- and designated more than a thousand miles of wild and scenic rivers. In my first term, I was proud to launch the America's Great Outdoors Initiative, which increases access to public lands and empowers Americans to better care for the parks, waterways, and natural treasures in their own communities.

My Administration remains committed to developing the next generation of environmental stewards. We created the 21st Century Conservation Service Corps, which provides quality jobs, career pathways, and service opportunities for young people and veterans. We are working to bring public lands into the classroom and to extend educational opportunities to millions of children. And through First Lady Michelle Obama's *Let's Move Outside!* initiative, we are encouraging children to get active while getting to know the great outdoors.

This month, as we enjoy the natural splendor of our Nation, let us stay true to a uniquely American idea -- that each of us has an equal stake in the land around us, and an equal responsibility to protect it. Together, let us ensure our children and grandchildren will be able to look upon our lands with the same sense of wonder as all the generations that came before.

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim June 2014 as Great Outdoors Month. I urge all Americans to explore the great outdoors and to uphold our Nation's legacy of conserving our lands and waters.

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of May, in the year of our Lord two thousand fourteen, and of the Independence of the United States of America the two hundred and thirty-eighth.

BARACK OBAMA

STATE OF ALASKA

Executive Proclamation *by* *Governor Sean Parnell*

WHEREAS, Alaska is blessed with outstanding opportunities for safe and healthy fun in the great outdoors. Every summer, residents and visitors alike enjoy time spent outside in our state's spectacular wilderness; and

WHEREAS, biking, swimming, hiking, climbing, fishing, paddling, hunting, boating, and many more activities help us experience the physical and mental health benefits of outdoor recreation; and

WHEREAS, Great Outdoors Month is an opportunity to celebrate Alaska's natural treasures and cherish the memorable experiences of being outdoors with family and friends; and

WHEREAS, Alaskans play an important role in caring for and utilizing our natural spaces. Across our state, Alaskans have demonstrated dedication to maintaining our wilderness spaces for future generations, using our natural resources in a responsible manner, and educating our youth on the amazing wonders that surround us; and

WHEREAS, outdoor recreation is vital to Alaska's economy, with annual spending on outdoor recreation at \$9.5 billion, creating 92,000 Alaska jobs; and

WHEREAS, Great Outdoors Month is an opportunity to recognize the importance of Alaska's majestic mountains, pristine waters, and vast landscapes as Alaskans enjoy the opportunities that abound.

NOW, THEREFORE, I, Sean Parnell, Governor of the State of Alaska, do hereby proclaim June 2013 as:

Great Outdoors Month

in Alaska, and encourage all Alaskans to take advantage of opportunities to enjoy the great outdoor activities provided by Alaska's majestic wilderness.

Dated: May 30, 2014

Office of the Governor

*** GREAT OUTDOORS MONTH ***

WHEREAS, Arizona is blessed with outstanding opportunities for safe and healthy fun in the Great Outdoors enjoying our natural splendors in the company of family and friends; and

WHEREAS, through biking, swimming, hiking, climbing, paddling, fishing, hunting, boating, OHV riding and many other activities, we are able to enjoy the physically and mentally healthful benefits of outdoor recreation; and

WHEREAS, enjoyment of the Great Outdoors allows us to celebrate the commitment of our state to conserve and protect our air, water, wildlife and lands and contribute to conservation efforts through various licenses, taxes and fees; and

WHEREAS, recreationists are among the most active volunteers in Arizona, working on trails and in visitor centers and campgrounds, on ski slopes and removing invasive species, organizing outdoor programs and events and restoring habitat; and

WHEREAS, Great Outdoors Month connects all of us to the outdoors, and especially our children, through diverse events including National Trails Day, National Fishing and Boating Week, National Marina Day, National Get Outdoors Day, the Great American Backyard Campout and more; and

WHEREAS, the economic impact of outdoor recreation is both large and growing nationally, exceeding \$850 billion in annual expenditures; and

WHEREAS, many of our important cultural and historic events and traditions are linked to places in Arizona which are parts of national, state and local park systems; and

WHEREAS, Great Outdoors Month allows us to celebrate the partnership of federal, state and local agencies, the recreation and tourism industries and recreationists which make outdoor recreation opportunities available, and add new and needed features such as improved trails through the Recreational Trails Program and the Land and Water Conservation Fund.

NOW, THEREFORE, I, Janice K. Brewer, Governor of the State of Arizona, do hereby proclaim June 2014 as

*** GREAT OUTDOORS MONTH ***

and, I further urge all citizens and visitors from other states and other lands to explore and enjoy, protect and conserve Arizona's Great Outdoors.

IN WITNESS WHEREOF, I have hereunto set my hand and caused to be affixed the Great Seal of the State of Arizona

Janice K. Brewer
GOVERNOR

DONE at the Capitol in Phoenix on this eighth day of April in the year Two Thousand and Fourteen, and of the Independence of the United States of America the Two Hundred and Thirty-eighth.

ATTEST:

Kim Blum
Secretary of State

WHEREAS, Colorado boasts a multitude of natural wonders, including our Rocky Mountains, the Colorado River, the Great Sand Dunes, many state parks throughout the state; and

WHEREAS, the abundance of opportunities to swim, fish, hike, bike, ski, run, kayak, and explore Colorado presents visitors and residents the chance to enjoy the environment and experience our vast outdoors; and

WHEREAS, those who take advantage of the opportunities afforded them in the outdoors generally live longer, healthier, fuller lives than those who do not; and

WHEREAS, Colorado receives over 300 days of sunlight, making almost any day a perfect day to be outdoors; and

WHEREAS, the State of Colorado encourages its citizens and visitors to take advantage of the beauty and cleanliness of our state by participating in outdoor activities and leading healthier, fuller lives;

Therefore, I, John W. Hickenlooper, Governor of the State of Colorado, do hereby proclaim June, 2014,

GREAT OUTDOORS MONTH

in the State of Colorado.

GIVEN under my hand and the Executive Seal of the State of Colorado, this first day of June, 2014

Proclamation *Presented*

In Recognition of Great Outdoors Month

WHEREAS, Great Outdoors Month reminds us that Hawai'i provides outstanding opportunities to enjoy the Great Outdoors and experience unique landscapes, ocean waters, and flora and fauna existing nowhere else in the world; and

WHEREAS, Great Outdoors Month highlights that year-round outdoor recreation such as swimming, hiking, biking, paddling, surfing, fishing, hunting, boating and jogging provide physical and mental health benefits for our people; and

WHEREAS, Great Outdoors Month allows us to celebrate the commitment of our state to conserve and protect our 'aina, including the water, air, and wildlife; and

WHEREAS, Great Outdoors Month celebrates those recreational users who are among the most active volunteers in Hawai'i, maintaining trails, restoring native forests and wildlife habitat, revitalizing near shore reef habitat and marine life, caring for our cultural and historical sites, and organizing programs to share the Great Outdoors; and

WHEREAS, Great Outdoors Month recognizes the economic impact in Hawai'i where it is estimated that we spend \$8.5 billion on outdoor recreation which supports 65,000 jobs; and

WHEREAS, Great Outdoors Month celebrates the partnership of federal, state and local agencies, and the recreation and tourism industries to promote recreational opportunities and make them available to all residents and visitors;

NOW, THEREFORE, I, NEIL ABERCROMBIE, Governor, and I, SHAN S. TSUTSUI, Lieutenant Governor of the State of Hawai'i, do hereby proclaim June, 2014, as

"GREAT OUTDOORS MONTH"

in Hawai'i and ask the people of the Aloha State to join us in recognizing our State's commitments to protecting our outdoor spaces and celebrating all that they have to offer.

DONE at the State Capitol, in the Executive Chambers, Honolulu, State of Hawai'i, this thirtieth day of May, 2013.

Washington DC 20005

Dear Friends:

I am pleased to recognize June 2014 as "Great Outdoors Month" and June 14th as "National Get Outdoors Day" in the State of Montana.

I support your efforts to educate the public about the value and importance of outdoor recreation and preserving our natural surroundings.

Montana's outdoor heritage is an important part of our cultural legacy. Many Montanans volunteer their time and energy to preserving and protecting our natural surroundings and this builds stronger communities and healthier citizens. As Governor, I am proud of the efforts we have made to protect our clean air and water for future generations.

I encourage Montanans to acknowledge June 2014 as "Great Outdoors Month" and to plan a trip to one of our national forests, state parks, or other public lands on June 14th for "National Get Outdoors Day."

Sincerely,

PROCLAMATION

OFFICE OF THE GOVERNOR

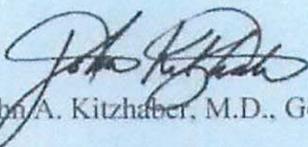

- WHEREAS:** Our great Northwest provides numerous opportunities for fun outdoor activities through shared resources of our parks, forests, refuges, and other public lands and waters; and
- WHEREAS:** June is an especially active time for recreation and many summertime activities that range from enjoyment of wildlife viewing to adventure sports like rock climbing; and
- WHEREAS:** Outdoor recreation is enjoyed by nearly every one and plays an important positive role in providing numerous mental, physical, economic and social benefits; and
- WHEREAS:** Countless citizens volunteer their time and talents to protect our natural resources to help ensure that great outdoor places remain where families and friends can learn, exercise, and create meaningful memories; and
- WHEREAS:** Recreation is a valuable means for education to reach America's youth with the message that outdoor recreation is a fun, healthy use of leisure time.
- NOW,**
THEREFORE: I, John A. Kitzhaber, M.D., Governor of the State of Oregon, hereby proclaim **June 2014** to be

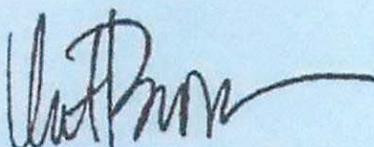

GREAT OUTDOORS MONTH

in Oregon and encourage all Oregonians to join in this observance.

IN WITNESS WHEREOF, I hereunto set my hand and cause the Great Seal of the State of Oregon to be affixed. Done at the Capitol in the City of Salem in the State of Oregon on this day, April 16, 2014.

John A. Kitzhaber, M.D., Governor

Kate Brown, Secretary of State

Gary Richard Herbert

Governor

Declaration

Whereas, Utah provides outstanding adventures for families and individuals in the great outdoors amid the natural splendors of our Mighty 5th national parks, national monuments and forests, 43 state parks, and other public lands;

Whereas, hiking, biking, climbing, skiing, horseback riding, ATV driving, hunting, fishing, camping, swimming, boating, river running, and many other activities and sports allow Utah residents and visitors to enjoy the physical and mental benefits of outdoor recreation;

Whereas, enjoyment of the great outdoors not only lets us acclaim Utah's commitment to conserve and protect our air, water, wildlife, landscapes, and lands, but also contributes significantly to conservation efforts through the collection of user fees, licenses, and taxes;

Whereas, recreational users of the great outdoors are among the most active volunteers in Utah, removing invasive species and restoring habitat along waterways, trails, and ski slopes, staffing visitors centers and campgrounds, and organizing outdoor programs and events;

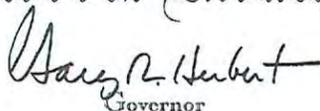

Whereas, many of Utah's important cultural and historic events and traditions are linked to places that belong to national, state, and local park systems, and Great Outdoors Month connects all of us, particularly our children, to the outdoors through diverse events, including National Trails Day, National Fishing and Boating Week, National Marina Day, National Get Outdoors Day, and the Great American Backyard Campout;

Whereas, the economic impact of the outdoor recreation industry is significant and is growing both locally—being an estimated \$7 billion a year and supporting about 124,000 jobs in Utah—and nationally, exceeding \$650 billion in annual expenditures; and

Whereas, we wish to recognize the partnership of federal, state, and local agencies, as well as Utah's recreation and tourism industries, which make outdoor recreation opportunities in our state available for all to enjoy;

Now, therefore, I, Gary R. Herbert, Governor of the State of Utah, do hereby declare June 2014 as

Great Outdoors Month in Utah

Governor

The State of Washington

Proclamation

WHEREAS, Washington State residents have a proud tradition of both safeguarding the environment and enjoying the outdoors; and

WHEREAS, a clean and sustainable environment contributes to our quality of life; and

WHEREAS, outdoor recreation promotes health, fitness, and environmental awareness; and

WHEREAS, outdoor recreation is an ideal way to exercise, appreciate nature, and enjoy memorable experiences with family and friends; and

WHEREAS, it is up to all of us to maintain and enhance our legacy of environmental stewardship and appreciation of the great outdoors; and

WHEREAS, it is our duty to leave a well-tended legacy to those who will follow;

NOW, THEREFORE, I, Jay Inslee, Governor of the state of Washington, do hereby proclaim June 2014 as

Great Outdoors Month

in Washington, and I urge all people to take the time to enjoy our state's various outdoor activities, to share them with family and friends, and to make outdoor activities a regular part of their lives.

Signed this 1st day of April, 2014

A handwritten signature in blue ink, appearing to read "Jay Inslee".

Governor Jay Inslee

GOVERNOR'S PROCLAMATION

WHEREAS, Great Outdoors Month celebrates open spaces; and

WHEREAS, Wyoming residents stay healthy and enjoy the outdoors in a variety of ways including biking and hiking, paddling and swimming, fishing and hunting; and

WHEREAS, volunteers help others enjoy the outdoors by organizing recreational programs and events, restoring habitat and through work on trails and ski slopes and in visitor centers and campgrounds; and

WHEREAS, one link to Wyoming's outdoor culture, history and traditions is the national, state and local park system; and

WHEREAS, "WY Outside," a coalition of public, private and nonprofit organizations, was established to encourage children and families to enjoy the outdoors throughout the year; and

WHEREAS, the Wyoming Department of State Parks will hold its 6th annual "Summer Outdoor Slam" at Curt Gowdy State Park on June 7 in honor of National Great Outdoors Day, offering a variety of recreational opportunities for children and families; and

WHEREAS, other events such as National Trails Day, National Fishing and Boating Week, National Marina Day and the Great American Backyard Campout also encourage people to get outside; and

WHEREAS, all of those who work and volunteer to make outdoor activities available hope that everyone can enjoy the outdoors.

NOW THEREFORE, I, MATTHEW H. MEAD, Governor of the State of Wyoming, do hereby proclaim June, 2014 as

GREAT OUTDOORS MONTH

in Wyoming.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Executive Seal of the Governor of Wyoming to be affixed this 22 day of May, 2014.

June 2, 2014

Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street, N.W.
Washington DC 20240

Honorable Tom Vilsack
Secretary
U.S. Department of Agriculture
1400 Independence Avenue, S.W.
Washington, DC 20250

Dear Secretaries Jewell and Vilsack:

The listing of the Lesser Prairie Chicken by the U.S. Fish and Wildlife Service as a threatened species has created significant and wide-ranging impacts on Kansans. This listing will create hardships and unintended consequences for our citizens, with little long-range improvement to the population of the Lesser Prairie Chicken because of the listing.

Historical studies have shown annual population fluctuation of the Lesser Prairie Chicken (LPC) and the strong correlation between drought and declining LPC numbers. At least three consecutive years of drought have exacerbated regional populations of LPC, along with other wildlife, and domestic livestock herds.

Kansans and wildlife/range management specialists working in Kansas in partnership with other states have developed appropriate plans that were being implemented prior to the listing. The USFWS decision to promote the NRCS Conservation Plan and the WAFWA Range-Wide Conservation Plan without adequate consideration of other quality, regional and statewide plans is short-sighted and damaging. There are reasonable alternatives, and other proposed conservation plans submitted by other state and regional conservation groups that should be fully considered. In the wake of the listing, Kansans should not be asked to enter any agreements until all conservation plans can be appropriately considered.

The "threatened" listing of the LPC has jeopardized the strongest habitat tool available in the occupied range. The voluntary incentive-based Conservation Reserve Program (CRP) has provided significant acreage of habitat for the Lesser Prairie Chicken and other wildlife species.

I am calling on USDA to pursue enhanced Incentives for voluntary Conservation Reserve Program (CRP) measures in the LPC habitat areas. Since 2008, total CRP acreage in Kansas has declined by 25%, thus reducing habitat for the LPC and other wildlife species.

The agreement between the Department of the Interior and the Department of Agriculture to allow voluntary practices designed to protect and increase LPC populations overlaps regulatory controls with voluntary incentive based programs. Guidelines developed for USDA voluntary programs should not be used as the only standard. The USFWS should recognize all science-based practice standards, in addition to the NRCS Field Office Technical Guide.

Mandatory mitigation plans like the Range-Wide Plan add significant cost to any new development. A farmer wanting to establish a new five acre farmstead could see mitigation costs approaching or exceeding \$200,000. The installation of an oil well on range land could cost the oil producer as much as \$100,000. A single wind turbine could require a mitigation cost of \$1,000,000, and transmission lines almost \$200,000 per mile. The bottom line is that mandatory mitigation could slow or halt capital and energy development in many areas of Western Kansas, in addition to creating disincentives for growth in agriculture, the combination of which will significantly impact the Kansas economy

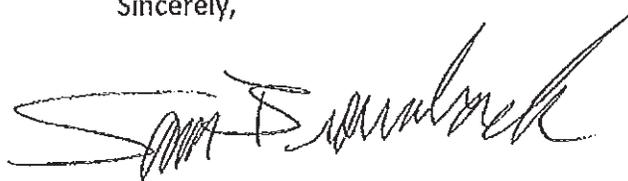

Creating additional rules, regulations and financial hardships for landowners and energy producers will not have a positive response or improve the habitat for the LPC. We do not believe it will efficiently and effectively increase the population of the LPC in Kansas, the state with the single largest occupied range. We already have appropriate tools, and this issue is best addressed at the state and regional level as opposed to a federally directed initiative.

In summary, action is needed in these areas:

1. Suspend current regulatory actions concerning the LPC until all proposed plans have been reviewed and thoughtfully considered for their attributes of species recovery.
2. Challenge USFWS to reconvene with USDA/NRCS to address the current program opportunities through CRP or Environmental Quality Incentives Program to show good faith that species recovery is the mission.
3. USFWS and all applicable federal agencies must recognize the significance of drought as the greatest limiting factor on the effectiveness of all protection efforts and persistent drought conditions must be understood as limiting the ability of any efforts to increase LPC populations.

Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Sam Brownback". The signature is fluid and cursive, with a large initial "S" and a long, sweeping underline.

Honorable Sally Jewell
Secretary
United States Department of Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Secretary Jewell:

Shortly after its release Western Governors received a copy of the report, *A Strategy for Improving the Mitigation Policies and Practices of the Department of Interior* (the Report) produced by members of Department of Interior's (DOI) Energy and Climate Change Task Force. The Report outlines challenges and opportunities that may arise with respect to implementation of your Secretarial Order 3330: *Improving Mitigation Policies and Practices of the Department of the Interior* (the Order). The Report identifies specific guiding principles to be considered by DOI and its agencies in reaching landscape-scale mitigation decisions, along with strategies and tools DOI will employ in this effort.

As discussed at the Western Governors' Association (WGA) Winter Meeting in December 2013, the landscape-scale approach described in the Order presents certain legal and regulatory complexities for both federal and state agencies. Recognizing this, on January 21, 2014, the WGA submitted to you a letter and list of questions regarding the Order. For your reference we have attached to this letter both the January 21 letter and list of questions that accompanied that letter.

Since submission of the letter and questions, WGA staff has had several discussions with DOI representatives regarding the Order. Those conversations, however, have not yielded sufficient and direct responses -- from either DOI or BLM -- to the many questions raised in our January letter.

Governors remain unclear on exactly how DOI will seek to engage our states in the development and implementation of this new landscape-scale mitigation regime. We would appreciate a detailed and expedited response to our questions regarding how the Order will be operationalized.

The Report reflects DOI's appreciation for the need to collaborate with state agencies and the expertise states can add to the landscape-scale mitigation discussion. Indeed, such collaboration is listed as a *guiding principle* in the Report's Executive Summary.

Honorable Sally Jewell
May 30, 2014
Page 2

Western Governors share the responsibility of properly managing land and resources within their state borders and recognize that landscape-scale mitigation efforts can play an important role in project development, resource conservation, and land use planning. State agencies house a wealth of knowledge and scientific expertise that would be beneficial -- indeed vital -- to DOI in achieving the goals and deliverables set forth in the Report.

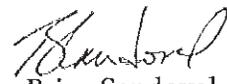

To achieve a mutually beneficial level of collaboration, we respectfully request that DOI and its representatives actively engage with state agencies now -- while the landscape-scale mitigation plan is being developed -- so that the goals set forth in the Report may be achievable in the near-term and our partnership durable in the long-term.

One point of clarification: among the tools discussed in the Report are geospatial assessments, including WGA's Crucial Habitat Assessment Tool (CHAT). DOI's enthusiasm for CHAT is greatly appreciated and we are confident in CHAT's value for project pre-planning. Western Governors, however, continue to underscore that CHAT is a non-regulatory tool intended to give project planners -- be they public or private -- a "30,000-foot" view of states' wildlife assets. That "first look" then can guide project planners to relevant state agencies for a deeper dive. While CHAT can be extremely helpful for project-specific pre-planning, it is not intended to be a landscape-based regulatory planning tool.

We look forward to your expedited response to the questions we have posed.

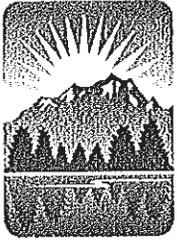

Sincerely,

John Hickenlooper
Governor, State of Colorado
WGA Chairman

Brian Sandoval

Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Secretary Jewell:

Western Governors are dedicated to ensuring the health of our grasslands and forests. When there is damage to a natural area in the West -- whether caused by wildfire, invasive species, flooding, or other factors -- federal agencies often play an important role in the area's stabilization and rehabilitation. It appears, however, that there is a lack of consensus among federal agencies about how to best balance competing missions and effectively implement important restoration functions, such as reseeded, in a timely fashion. We urge federal agencies to develop shared criteria for selection of seed mixes to improve response times, limit further damage (such as that caused by encroachment of non-native species), and help build a basis for a stable seed production and storage system.

To our knowledge, there are divergent policies among federal agencies regarding such issues as: use of native seed; permissible seed sourcing; what seed mixes are deemed acceptable for use; responsibility among federal agencies for seed banking, etc. These inconsistencies make it difficult for seed suppliers to effectively meet federal needs. In addition, overly restrictive sourcing criteria can substantially increase costs, a critically important issue in these times of constrained budgets.

Western states intend to do their part and want to improve coordination with federal agencies. Proactive landscape-scale land management necessitates shared and targeted management planning for fire, drought, flooding, and other threats to grasslands and forests.

Accordingly, we would like to work with federal agencies to establish clear and consistent disaster rehabilitation approaches that restore landscapes without creating monocultures or checkerboards. Increased state-federal collaboration on long-term restoration and research would be mutually beneficial.

Western Governors would appreciate answers from your Department to the following questions, which are offered in a spirit of cooperation:

Honorable Sally Jewell

May 30, 2014

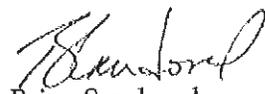

Page 2

1. How do the federal agencies under the Department of Interior (DOI) establish seeding goals and objectives? To what extent are your agencies working together to set shared goals and objectives? How are you coordinating with USDA, NRCS and other departments and agencies?
2. How are DOI agencies planning for natural disasters or other circumstances that could lead to spikes in seed demand, decreasing supply and increasing cost?
3. Is the policy guidance of DOI agencies on the use of local and native seed backed up by best available science? If local and native seed are required by DOI policies, what are your agencies doing to ensure adequate supply?
4. How does DOI acquire input on seeding practices from the states?
5. How does DOI acquire input from external stakeholders such as the seed industry, private landowners, sportsman groups, conservation groups, etc.?
6. What monitoring and evaluation do DOI agencies perform to verify achievement of goals and objectives and to refine and improve seeding practices?

Western Governors acknowledge that harmonizing seeding policies and approaches will take time and effort, but we stand ready to work with you to achieve that goal. We believe doing so will help realize our shared objective of ensuring that we are equipped to expeditiously and effectively restore the Western landscapes we all depend upon and cherish.

Sincerely,

John Hickenlooper

The Honorable John Hickenlooper
Chairman, Western Governors' Association
1600 Broadway Suite 1700
Denver, CO 80202

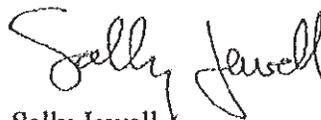

Dear Governor Hickenlooper:

Thank you for your letter dated May 30, 2014, regarding the role Federal land management agencies play in re-seeding damaged landscapes from events such as wildfires, flooding, invasive species, and other factors.

The Department of the Interior's focus on landscape scale conservation and restoration makes coordination on re-seeding efforts crucial to those efforts. We agree that coordination among Federal agencies and with states is vitally important. To that end, Bureau of Land Management Director Neil Kornze is convening a seed meeting of Federal agencies and the WGA to develop a strategy that will address many of the points you raise in your letter. The questions you raise will provide an excellent starting point to begin discussions in this area. By working together, we can improve on the success of our restoration efforts and decrease the time needed to reach our restoration goals.

Thank you for your interest in this issue. If you would like additional information regarding the Department's progress in this area, please contact Director Kornze at (202) 208-3801. A similar letter is being sent to Governor Brian Sandoval.

Sincerely,

Sally Jewell

MATTHEW H. MEAD
GOVERNOR

STATE CAPITOL
CHEYENNE, WY 82002

Office of the Governor

May 19, 2014

The Honorable Sally Jewell, Secretary
Department of the Interior
Main Interior Building
1849 C Street, NW
Washington, DC 20240

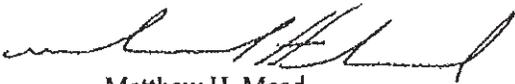

Dear Secretary Jewell:

The recovery of grizzly bears in the Yellowstone Ecosystem is a conservation success story of our time. Wyoming has worked with the U.S. Fish and Wildlife Service (FWS) and other state and federal agencies to compile and evaluate food sources data and the effect of those food sources on grizzly bear populations in the Yellowstone Ecosystem. This work substantiates that grizzly bears forage on a broad variety of food. Science demonstrates grizzly bears are expanding – in population and geography – beyond recovery criteria established by FWS and the State of Wyoming.

Both the Interagency Grizzly Bear Committee and the Yellowstone Ecosystem Subcommittee have reviewed the data and both recommend FWS delist the grizzly bears. All regulatory requirements and biological objectives have been met or exceeded. It is appropriate to publish a delisting proposal and return management of the grizzly bear to the State of Wyoming and other states in the Yellowstone Ecosystem.

Based on your September 2013 letter, I had expected to see a delisting decision in early 2014. There is no reason to wait. I encourage the FWS to work with Wyoming Game and Fish Department to develop and publish a proposed delisting rule expeditiously.

Sincerely,

Matthew H. Mead
Governor

Sally Jewell, Governor

OFFICE OF THE
EXECUTIVE SECRETARIAT

Honorable Sally Jewell
Secretary
United States Department of the Interior
1849 C Street NW
Washington, DC 20240

Dear Secretary Jewell:

The State of Kansas previously has expressed opposition to the listing of the Lesser Prairie Chicken as a threatened species. Since the March 27 announcement by the Fish & Wildlife Service that the listing would occur, Kansans have been dealing with the implications of that decision and the impending deadlines for participation in the Range-Wide Conservation Plan.

Kansas continues to maintain that the listing of the Lesser Prairie Chicken was not justified, and that the listing will negatively impact the state's agriculture and energy sectors in ways that can be avoided consistent with the interests of conservation and protection of the species. As a consequence, Kansas has filed a legal action to seek judicial review of the listing decision.

In the meantime, however, I am concerned that Kansans have not been allowed sufficient time to evaluate their options and prepare applications under the Range-Wide Conservation Plan. In particular, the Kansas oil & gas industry has a large proportion of small independent producers - unlike other states in the range of the Lesser Prairie Chicken, where larger producers are more dominant and have the resources to respond more rapidly. Those affected parties require more time than the standard thirty days to review their options and make vital economic decisions relating to their participation in the Range-Wide Plan. Accordingly, I am requesting that you take the necessary steps to allow an additional ninety days for those affected by the listing to opt-in to the protections provided by the federal rule.

Finally, I must note my concern that insufficient attention is being given to the important role of the Conservation Reserve Program in connection with the Lesser Prairie Chicken, and I urge greater inter-agency cooperation toward that end. The listing explicitly states that: "Lands enrolled in CRP encompass a significant portion of estimated occupied range in several lesser prairie-chicken states, but particularly in Kansas where an increase in the lesser prairie-chicken population is directly related to the amount of land that was enrolled in the CRP and planted to mixtures of native grasses." 79 Fed. Reg. 20027 (Apr. 10, 2014). I am particularly concerned that federal policies regarding expiration and/or re-enrollment of CRP land could work against the goals embodied in the listing, thereby creating conflicting federal policies that further exacerbate the effect of the listing on Kansans.

Thank you for your consideration.

Sincerely,

Sam Brownback
Governor of Kansas

cc: Dan Ashe, Director of U.S. Fish & Wildlife Service

MATTHEW H. MEAD
GOVERNOR

THE STATE OF WYOMING 643590

RECEIVED
STATE CAPITAL
CHEYENNE, WY 82002
2014 MAY -7 AM 9:

Office of the Governor

OFFICE OF THE
EXECUTIVE SECRETARY

May 6, 2014

The Honorable Sally Jewell
Secretary of the Interior
U.S. Department of the Interior
1849 C Street, NW, Room 5665
Washington, D.C. 20240

Dear Secretary Jewell,

In a letter dated March 11, 2014, Director Joe Pizarchek of the Office of Surface Mining (OSM) informed the Wyoming Department of Environmental Quality (DEQ) that \$21.2 million of Abandoned Mine Land (AML) funds – approved by Congress under the Helium Stewardship Act of 2013 (the Act) – would not be sent to Wyoming. The Act directed \$75 million of AML funds to Wyoming in FY 2015. OSM has interpreted, or misinterpreted, the Act as restricting Wyoming to only an estimated \$53.8 million. The OSM determination is incorrect and I ask that you review and reverse this determination.

The Surface Mining Control and Reclamation Act (SMCRA), as amended in 2006, requires eligible States and Indian tribes receive AML funding in two ways. First, eligible states and Indian tribes receive 50% of funds collected on state or tribal lands for reclamation (as a certified program, Wyoming does not receive the actual 50% state share but instead receives an equivalent share as in lieu Treasury funds). Second, funds known as "prior balance funds" are paid. Prior to 2007, States and Tribes did not receive a full 50% share of SMCRA funds. Amendments in 2006 corrected this underfunding, requiring "*the Secretary . . . make payments to States or Indian tribes for the amount due for the aggregate unappropriated amount allocated to the State or Indian tribe . . .*" These amendments were passed to ensure that Wyoming (and other eligible states) were paid amounts allocated and due to them under SMCRA prior to 2007.

In 2012, the Transportation Bill amended SMCRA adding a provision limiting the "*total annual payment*" (emphasis added) to \$15 million. While the payment was modified, the balance due to Wyoming was not modified by the Transportation Bill. SMCRA also required the prior balance be repaid "*in 7 equal annual installments, beginning with fiscal year 2008.*" Wyoming is owed \$165.4 million in prior balance funds.

The Wyoming Congressional delegation worked to ensure that Wyoming was paid. The Helium Stewardship Act raised Wyoming's cap to \$28 million for FY 2014 and \$75 million for FY 2015. It clearly states these funds first be applied to in lieu payments (traditional reclamation) and funds over the in lieu payments be applied to the remaining prior balance funding owed to Wyoming.

OSM released a new table titled "*Hypothetical AML Funding Projections from FY 2014 through FY 2024*". This table reflects Wyoming will receive \$53.8 million instead of the \$75 million set forth in the

Secretary Sally Jewell
May 6, 2014
Page 2

Act. Wyoming DEQ Director Todd Parfitt wrote to Director Pizarchek and requested the table be corrected. (DEQ letter attached.) Director Pizarchek did not honor this request. (March 11, 2014 letter attached.)

Director Pizarchek's interpretation is inconsistent with the Act on prior balance payments. SMCRA clearly delineates that Wyoming is still owed \$165.4 million (stipulated in the 2006 Amendments). Under Helium Stewardship Act, Wyoming should receive the \$21.2 million prior balance funds (\$75 million minus the estimated \$53.8 million in lieu payment). When this payment is made, Wyoming will still be owed a substantial prior balance amount (\$165.4 million minus \$21.2 million). If a debtor can avoid his debt by missing a payment – every lender in the country would be broke. I am sure that OSM did not intend to suggest this was the position of the United States.

Please review this matter at your earliest convenience.

Sincerely,

Matthew H. Mead
Governor

RECLAMATION AND ENFORCEMENT
Washington, D.C. 20240

MAR 11 2014

DEPARTMENT
OF

MAR 17 2014

ENVIRONMENTAL
QUALITY

Mr. Todd Parfitt
Director
Wyoming Department of Environmental Quality
122 West 25th Street
Cheyenne, WY 82002

Dear Mr. Parfitt:

Thank you for your letter dated February 4, 2014, which expressed concern that a mistake may have been made in the Abandoned Mine Land (AML) funding projections prepared by the Office of Surface Mining Reclamation and Enforcement (OSMRE). In response to your letter, we have reviewed our projections and have determined that they are correct and consistent with the Surface Mining Control and Reclamation Act of 1977 (SMCRA), as amended.

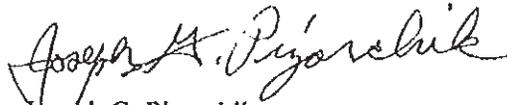

As you note, the Helium Stewardship Act of 2013, which was signed into law on October 2, 2013, contained an amendment to SMCRA that increased the cap for two years on annual AML distributions provided to certified states and tribes. In summary, the law raised the cap from \$15 million to \$28 million for Fiscal Year 2014 and to \$75 million in Fiscal Year 2015. This amendment also specified that if the cap were reached, OSMRE should distribute a state's or tribe's certified in lieu funds under section 411(h)(2) of SMCRA first, then distribute state or tribal prior balance replacement funds under section 411(h)(1) of SMCRA.

In calculating the AML funding projections, we first determined a state's or tribe's certified in lieu funds by multiplying the annual coal production estimates provided by the Department of Energy with the reclamation fee rate set forth in section 402(a) of SMCRA. Using this methodology, we estimate that just over \$107.6 million in reclamation fees will be collected in Wyoming in Fiscal Year 2014. Pursuant to section 411(h)(2) of SMCRA, certified in lieu funds are normally distributed in an amount equivalent to 50 percent of the reclamation fees collected in their states. In Wyoming's case, that would amount to approximately \$53.8 million. As you may be aware, prior balance replacement funds were authorized for seven fiscal years only, from Fiscal Year 2008 to Fiscal Year 2014 pursuant to section 411(h)(1)(C) of SMCRA. Therefore, prior balance replacement funds will not be included in AML funding provided to states and tribes for Fiscal Year 2015 and thereafter. Since certified states such as Wyoming will receive certified in lieu funds only in Fiscal Year 2015, our projection that Wyoming's distribution will be \$53.8 million is accurate.

Please note that the \$53.8 million projection is only an estimate. Once we finalize actual fee collections received during Fiscal Year 2014 and make any required reductions due to sequestration, the actual AML funding distributed to Wyoming may be different.

Please let us know if you need additional information.

Sincerely,

A handwritten signature in black ink, appearing to read "Joseph G. Pizarchik". The signature is fluid and cursive, with the first name "Joseph" being the most prominent.

Re: 25 C.F.R. § 83 Rulemaking and the Little Shell Tribe of Chippewa Indians

Dear Secretary Jewell & Assistant Secretary Washburn:

I support the Department of the Interior's ("Department") rulemaking to revise 25 C.F.R. § 83, "Procedures for Establishing that an American Indian Group exists as an Indian Tribe" ("Part 83 Process"). I urge you to continue forward with this work and publish the proposed rule as soon as possible.

This rule revision is important because I believe that the Part 83 Process was not properly administered when the Department of the Interior issued a Final Determination against the Little Shell Tribe of Chippewa Indians of Montana ("Little Shell Tribe") in November of 2009. This Final Determination overturned the Proposed Finding in Favor of Acknowledging the Little Shell Tribe. The Part 83 Process should have determined that the Little Shell Tribe is an Indian tribe of Montana—a designation which is more than 100 years overdue.

Montanans, Montana tribes and the State of Montana all recognize that the Little Shell Tribe is a part of our state's rich culture and history. I support their efforts to become federally recognized and it is time for the Federal Government to finally grant the Little Shell Tribe the recognition they are owed. Federal recognition will enhance their ability to provide additional services to tribal members and strengthen their tribal government. I am encouraged that the Department has seen the need to fix this issue through the Part 83 rulemaking process.

I trust the Department will move swiftly to publish its proposed Part 83 rule and complete the rulemaking process. The Department has my full support in this effort.

Sincerely,

A handwritten signature in black ink, appearing to read "Steve Bullock", written over a horizontal line.

The Honorable Steve Bullock
Governor of Montana
Helena, Montana 59620

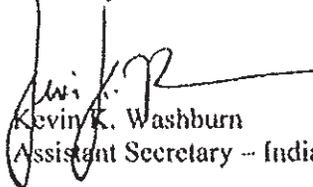

Dear Governor Bullock:

Thank you for your letter of May 1, 2014, urging completion of the rulemaking process for Federal acknowledgment of Indian tribes.

We have announced availability of the proposed rule for public comment, and the Federal Register published the proposed rule on May 29, 2014 (79 FR 30766). I am enclosing a copy of the press release, which contains additional information.

Thank you for your support of our efforts as we work toward a proposed rule that improves the transparency, efficiency, timeliness, flexibility, and integrity of the Federal acknowledgment process.

Sincerely,

Kevin K. Washburn
Assistant Secretary -- Indian Affairs

Interior Proposes Reform of Federal Acknowledgment Regulations *Proposed rule would address "broken" process*

Washington, D.C. --- Secretary of the Interior Sally Jewell and Assistant Secretary-Indian Affairs Kevin K. Washburn today announced publication of proposed regulations that would reform the 35-year old process by which the Department of the Interior officially recognizes Indian tribes. Federal acknowledgment establishes the U.S. Government as the trustee for Tribal lands and resources and makes Tribal members and governments eligible for federal budget assistance and program services.

"President Obama believes that reforming the federal acknowledgment process will strengthen our important trust relationship with Indian tribes. Acknowledgment by the Department of the Interior confirms the existence of a nation-to-nation relationship between an Indian Tribe and the United States," said Secretary Jewell. "Through this Administration's outreach initiatives, tribal leaders have told us that the current process can be inconsistent, cost millions of dollars and take decades to complete. Our proposed rule maintains the rigorous integrity needed, but allows that process to be conducted in a timely, efficient and transparent manner."

The existing regulations, known as "the Part 83 process", were originally adopted in 1978 and were updated only once 20 years ago. Prior to that, Interior had addressed requests for Tribal acknowledgment on a case-by-case basis. While the 1978 regulations established a structured process for federal acknowledgment, these regulations have been widely criticized as being too time-consuming, sometimes arbitrary and generally "broken."

"Reform of the process is long-overdue," said Assistant Secretary Washburn. "One of my first assignments at the Department was to search for ways to improve the federal recognition process and address long-standing criticisms of those regulations. This initiative is the product of substantial Tribal consultation and public comment and we are grateful for the broad public interest in this reform effort and the helpful guidance we have received from Tribes and the public."

-Continued-

Page 2 - Reform of Federal Acknowledgment Regulations

Key features of the proposed rule would promote transparency by updating the Part 83 criteria to include objective standards; promote efficiency by requiring a petitioner to show community and political influence/authority from 1934 to the present rather than from as early as 1789; and eliminate the need for a petitioner to demonstrate that third parties identified the petitioner as a tribe from 1900 to the present. The proposed rule would make changes to the petitioning process that facilitate the timely issuance of proposed findings and final determinations. It would also allow an administrative judge to conduct a comprehensive hearing and review of a negative proposed finding.

In recognition of the high level of interest in the acknowledgement process, the Department used a transparent approach and significant outreach effort. Before beginning the formal rulemaking initiative, Interior issued a discussion draft last summer to facilitate public input on how to improve the process. Through the discussion draft and ensuing tribal consultations and public meetings, the Department obtained substantial feedback. In total, more than 2,800 commenters providing input on the discussion draft.

The proposed rule reflects current federal policy embodied in the Indian Reorganization Act and seeks to codify the Department's past practice under the Part 83 process to promote consistency and transparency. With the issuance of this proposed rule, the Department is again seeking input from tribes, petitioners seeking acknowledgment, and interested members of the public so that any reforms to the process are fair, timely and transparent.

Of the 566 federally recognized tribes, 17 have been recognized through the Part 83 process under Title 25 of the Code of Federal Regulations, *Procedures for Establishing that an American Indian Group Exists as an Indian Tribe*. Though far more tribes have been recognized through Congressional action, the Part 83 process is an important mechanism because it allows deliberative consideration of petitions by a staff of federal experts in anthropology, genealogy and history and ultimately allows for a decision by an objective decision-maker. When petitioning groups that meet the several criteria are officially "acknowledged" as Indian tribes, the U.S. Government accepts trusteeship of Tribal lands and natural resources and Tribal governments and members become eligible to receive federal health, education, housing and other program and technical assistance services.

Interior will be conducting tribal consultations and public meetings on the proposed rule in July 2014. Tribal consultations are generally open only to representatives of federally recognized Indian tribes. Public meetings are open to everyone. The tribal consultations will be held on the following dates and locations:

2014 APR 25 AM 9:38

OFFICE OF THE
EXECUTIVE SECRETARY

Susana Martinez
Governor

April 22, 2014

The Honorable Sally Jewell
Secretary of the Interior
1849 C Street, N.W.
Washington, D. C. 20240

The Honorable Chuck Hagel
Secretary of Defense
1400 Defense Pentagon
Washington, D. C. 20301

Dear Secretary Jewell and Secretary Hagel:

I am writing to you concerning the Department of Interior (DOI) and the Department of Defense (DOD) review of the proposed SunZia Southwest Transmission Project. As you are aware, this project has been under consideration by the Bureau of Land Management (BLM) for several years, and they completed their Final Environmental Impact Statement (FEIS) in June, 2013. Prior to the publication of the FEIS, there had been several multi-agency meetings regarding proposed routing for the transmission lines (two AC lines, or one AC line and one DC line), though the meetings seemed to fall short of National Environmental Policy Act (NEPA) requirements pertaining to cooperating agency involvement.

The objective of the project is to pull wind energy from Central New Mexico and move the energy to a site in Arizona. The BLM Preferred Alternate Route is planned across the Northern Extension Area of White Sands Missile Range (WSMR). This planned route poses an unacceptable negative impact to critical test and evaluation missions at WSMR. As I understand it, there are two good alternatives which would both support the project's objectives and WSMR's mission—the DOD preferred route north of the Northern Extension Area, or burying the line for approximately 35 miles along the BLM preferred route. I strongly support either one of these alternatives.

The Honorable Sally Jewell and the Honorable Chuck Hagel
April 22, 2014
Page 2

I was briefed recently on the Massachusetts Institute of Technology Lincoln Laboratory Review of the BLM Preferred Alternative Route, and I understand the review validates DOD concerns. My Administration fully supports our national goals regarding development of renewable energy, but not at the expense of military missions. We have followed closely the evolution of our National Security Strategy—White Sands Missile Range will continue to play a significant role as the Defense Department continues development of long-range capability against emerging threats, particularly those that might arise in the Asia-Pacific Theater.

With respect to the FEIS, and as provided for in 43 CFR 1610, I provided a Consistency Review statement to BLM on August 16, 2013. I have not received a response. This statement fully described several inconsistencies between the FEIS and our state's plans, policies, and programs with regards to our support for military missions in New Mexico.

Secretary Jewell, I urgently ask for your support of an alternative which avoids a negative impact to WSMR. Secretary Hagel, please let me know how we can further demonstrate our support for WSMR—it is an invaluable resource to our nation and to our great State of New Mexico.

My staff point of contact for this issue is Hanson Scott, hanson.scott@state.nm.us. Please let us know if we can provide additional information.

Sincerely,

Susana Martinez

EXECUTIVE SECRETARY

John W. Hickenlooper
Governor

April 14, 2014

The Honorable Sally Jewell
Secretary
United States of the Interior
1849 C Street NW
Washington, DC 20240

Dear Secretary Jewell,

We are writing today to offer my support of the proposal to provide \$1 million per year of funding to connect urban youth with the Rocky Mountain Arsenal National Wildlife Refuge ("Refuge") and fulfill our mutual goal of exposing the future stewards of our natural resources to the environment and wildlife.

Located in a fast growing urban area, part of which is economically disadvantaged, use of the Refuge exploded in 2013 to over 300,000 visitors, from 23,000 visitors in the prior year, and is expected to increase each year. In addition to its ideal location in close proximity to over 141,000 school children, the Refuge boasts a 16,000-acre reserve including bison, eagles and a restored native prairie ecosystem.

This proposal will allow for immediate implementation of the following:

- Removal of physical barriers from residential areas to the Refuge.
- Investment into partnerships, initially with Environmental Learning for Kids, a non-profit organization focused on providing outdoor education and experiences to underserved youth. In addition, the Refuge will continue to expand partnerships with local school districts, the Colorado Parks and Recreation Association and a new and emerging metropolitan green space alliance.
- Increased investment into youth employment opportunities with Mile High Youth Corps and Ground Work Denver to create a future conservation constituency.
- Finance one special project each year in support of the National Wildlife Refuge System's urban refuge initiative. This will allow the Refuge to support and encourage further innovation and local grassroots efforts as they develop across the region.

We share your commitment to youth in the outdoors and hope you will agree with me that the Refuge is best positioned to bridge many of the existing divides between youth and nature.

Sincerely,

A handwritten signature in black ink, appearing to read "John W. Hickenlooper".

JUN 06 2014

The Honorable John W. Hickenlooper
Governor of Colorado
136 State Capitol
Denver, Colorado 80203

Dear Governor Hickenlooper:

Thank you for your April 14, 2014 letter of support of the proposal to provide \$1 million per year of funding for connecting urban youth to Rocky Mountain Arsenal National Wildlife Refuge. Your support for this effort harmonizes with the Secretary's recently announced Secretarial Order to significantly expand recreational, educational, volunteer and career opportunities for millions of youth and veterans on the nation's public lands, including partnerships with businesses and youth organizations, in an effort to bridge the growing disconnect between young citizens and the great outdoors.

At this time, the proposal selected to receive these funds has not been determined. An announcement of the selectee is anticipated for July, 2014.

Thank you for your active engagement and commitment to bridging the growing gap between youth and nature.

Sincerely,

DIRECTOR

Office of the Governor

April 10, 2014

The Honorable Sally Jewell
Secretary, U.S. Department of Interior
1849 C Street, N.W., Room 6151
Washington, DC 20240

Dear Secretary Jewell:

I am deeply concerned by the actions of Bureau of Land Management (BLM) officials engaged in the impoundment of livestock in Clark County, Nevada. The conduct of BLM officials, including use of aggressive canines, SWAT teams and equipment, snipers with long rifles, a military helicopter, and over 200 heavily-armed law enforcement officials, has the appearance of a paramilitary operation rather than a round-up of cattle.

As a result, there is a toxic atmosphere of intimidation, turbulence, and anxiety in this quiet community that has left many locals in fear of even leaving their homes. To complicate matters more, the Clark County Fair, which is scheduled to begin today in Logandale, Nevada and close on Sunday, will bring thousands of children, families and exhibitors to the area.

Based on the aggressive behavior that has been displayed already, which is well documented in the mainstream media and social media sites, I am concerned that this matter may continue to escalate to a tragic and unnecessary outcome.

Indeed, so-called militias from other states have raised a call to arms to come to Nevada to confront federal authorities. <https://m.youtube.com/watch?v=e8O-o5OPsA&feature=youtu.be>

To further exacerbate the situation, the BLM has closed important public roads and established "First Amendment Zones" to limit where members of the public can express their views of this event. Moreover, the BLM has limited media access and required private landowners and right-of-way holders to obtain prior approval before accessing their lands or visiting their utility lines.

Over the past week, my office has received hundreds of phone calls and emails, overwhelmingly decrying the actions of BLM officials. I have met with state and local government officials, who fear tragedy is imminent. I have spoken with BLM Director Neil Kornze to insist that he take action, including dismantling the offensive "First Amendment Zones." To date, the only response I have received from federal officials is that there is no consideration for suspending or changing the character of the operation.

Arrests, public road-closures, the creation of an overly-restrictive "First Amendment Zone," use of tasers and police dogs, and generally heavy-handed behavior have created a dangerous situation in this community and our state. Local residents are living in fear and are upset and frustrated by BLM's actions. National militia groups are descending upon Clark County.

As Governor of the State of Nevada, I respectfully call on you, as Secretary of the United State Department of Interior, to suspend this enforcement activity immediately and order the BLM and all involved federal agencies to stand down. It is not my intent to question the Orders of the court or the merits of the legal dispute. I ask you to withdraw from this poorly planned and executed endeavor and put an end to this now to avoid what could become a horrible tragedy.

I look forward to speaking with you today and implore you to give this matter your utmost attention.

Sincere regards,

BRIAN SANDOVAL
Governor

CC: The White House

545827

THE SECRETARY OF THE INTERIOR
WASHINGTON

APR 11 2014

The Honorable Brian Sandoval
Governor of Nevada
Carson City, Nevada 89701

Dear Governor Sandoval:

I am in receipt of your letter expressing concern about the cattle impoundment being undertaken by the Bureau of Land Management in Clark County, Nevada. As I assured you in our conversation of yesterday, our highest priority is the safety of the public, as well as the local, State, and Federal employees and contractors who are involved in carrying out and supporting this lawful impoundment in furtherance of two recent Federal court orders. I ask that you join with us to publicly emphasize the need for demonstrators to remain lawful, peaceful, and not to place themselves or others in danger by impeding the Federal employees and contractors conducting the impoundment.

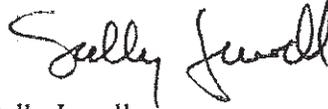

I am dismayed by the tone of your letter and by the factual misstatements it contains. Rest assured that there are no military helicopters, no Federal snipers, no paramilitary operation by the Federal Government, and no curtailment of First Amendment rights of those who disagree with our decision to implement Federal court orders to remove trespassing cattle. The BLM is conducting this operation consistent with established procedures and protocols.

The reported presence of out-of-state militia members underscores the need for your support and for the involvement of State law enforcement personnel to maintain public safety during this impoundment. The public statements of the protest participants, while showing flagrant disregard for Federal authority, indicate that they respect the exercise of State police powers. As public officials, we share the responsibility to ensure compliance with all laws without exception. In your role as Governor, you can reinforce that message.

Our goal in this action is to remove trespassing cattle that unlawfully remain on public lands, including lands managed by the National Park Service, as a result of their owner's refusal to comply with Federal law and three Federal court orders. He has also rejected our many efforts over the years to resolve this situation. For more than 20 years, the owner of these cattle has been trespassing on publicly owned resources for his own use and profit, unfairly impacting other potential uses of these public lands and without complying with the same laws as 16,000 law-abiding public lands ranchers nationwide. To allow this illegal activity to continue is unfair to lawful users of the public lands.

As we discussed yesterday and as I also relayed to Clark County Sheriff Doug Gillespie, I ask you to stand with us and to commit the resources to help us resolve this trespass situation peacefully.

Sincerely,

A handwritten signature in cursive script that reads "Sally Jewell". The signature is written in black ink and is positioned above the printed name.

Sally Jewell

Office of the Governor

642771

April 9, 2014

The Honorable Sally Jewell, Secretary
U. S. Department of the Interior
1849 C Street, N.W.
Washington, DC 20240

Dear Secretary Jewell,

I performed a consistency review of the Proposed Resource Management Plan for the Lander Field Office (Lander RMP) in April 2013. Nearly a year later, there is still no Record of Decision (ROD). This delay has consequences. Please help bring the Lander RMP to finality.

The Lander RMP covers a total of 6.6 million acres in five counties. For more than seven years, dozens of cooperators reviewed and commented on thousands of pages of data and information while maintaining a tight schedule for the Lander RMP process outlined by the BLM. In addition to the cooperators, there was a high degree of public participation. The participation reflects the plan's importance to the lives of people who live, work, and visit the five counties covered by the planning area. The public process for developing resource management plans is as important as the final product. The citizenry has done its job; it is now up the Department of Interior to do its part.

The Lander RMP will guide land use decisions for 20 years—including grazing, habitat protection, mineral development, recreation and other uses. The uncertainty of the Lander RMP's ROD affects the private sector's ability to plan and to make long term business decisions. This jeopardizes economic prosperity and creates unnecessary tension and uncertainty. It prevents implementation of conservation initiatives and actions addressing natural resource issues such as trails, recreation, energy development, wildlife, not to mention public health and safety.

In its March 2010 status determination for the Greater Sage-Grouse, the U.S. Fish and Wildlife Service endorsed Wyoming's strategy, stating: "the core area strategy...if implemented by all landowners via regulatory mechanisms, *would* provide adequate protection for sage-grouse and their habitats in the State." [Emphasis added.] Wyoming's strategy is being implemented on non-federal lands. Without a final Lander RMP, Wyoming's ability to demonstrate and document Greater Sage-Grouse conservation efforts is curtailed. The U.S. Fish and Wildlife

Services' decision on the listing is less than 18 months away. Wyoming and its partners have expended considerable resources to develop an effective, enduring model for sage-grouse conservation that will be implemented through the Lander RMP. The Lander RMP will serve as a template for other resource management plans revision efforts in Wyoming and across the west—but only after it is signed.

Please help resolve the delay of the Lander RMP. I hope you will be able to sign the decision at your earliest convenience. It would be wonderful if the signing would take place in Wyoming, but that is secondary to the real need to have the Lander RMP signed expeditiously.

Sincerely,

Matthew H. Mead
Governor

THE SECRETARY OF THE INTERIOR
WASHINGTON

JUN 04 2014

The Honorable Matthew H. Mead
Governor of Wyoming
Cheyenne, Wyoming 82002

Dear Governor Mead:

Thank you for your letter of April 9, 2014, regarding your interest in the Bureau of Land Management (BLM) issuing the Record of Decision (ROD) for the Lander Resource Management Plan (RMP). I share your desire to provide the public with management certainty to this area.

The Department must balance releasing the Lander ROD with a landscape approach to Greater sage-grouse conservation. While the U.S. Fish and Wildlife Service has expressed its support of the Wyoming strategy, the Lander RMP is only one component of the larger, multi-state planning initiative with broad national implications. I recognize the years of effort by the State of Wyoming and members of the public working with the BLM to arrive at fair and balanced management for the Lander area. I appreciate your leadership and that of your predecessor, Governor Freudenthal, in developing a plan to both conserve the Greater sage-grouse and sustain responsible natural resource development. As your letter indicates, the Lander RMP will guide the use of public lands for at least the next two decades.

The Department is on target to complete its review of the proposed plan amendments and revisions. This has required extensive coordination with the USDA Forest Service as well as states throughout the West in what has been one of the most extensive land-use planning efforts ever, all within a very short timeframe. As you can appreciate, the first Greater sage-grouse plan needs to be fully vetted as it will set the stage for all the plans that follow. We have nearly completed our review of the Lander plan and are very close to finalizing our decision.

Thank you for your leadership in Wyoming and as co-chair of the Sage-grouse Task Force in advancing the State-Federal collaboration that is critical to our success in conserving the sage-grouse. I look forward to seeing you at the Western Governors' Association's meeting and our continued work together on this pioneering effort.

Sincerely,

A handwritten signature in cursive script that reads "Sally Jewell".

Honorable Sally Jewell
Secretary of the Interior
Department of the Interior
United States Government
Washington D.C. 20240

Dear Madams Secretary;

The Legislature of American Samoa has transmitted to me, the approved Senate Joint Resolution No. 33-3 amending Article II, Section 9 and Article II Section 19 of the Revised Constitution of American Samoa to provide for a "Legislative Override of Executive Varies without action by the Secretary of the Interior". Moreover, it has been decreed by the Legislature of American Samoa, to place this resolution on the ballot for the next election on November 4, 2014 to be voted on by the people of American Samoa.

While I don't object to the subject of the resolution, I am very concerned that legal issues connected with the Presidential Delegated Oversight Authority to DOI over the Territory of American Samoa, along with former Congressman Fofu Sumia 1984 amendment shifting the review of amendments of our Constitution to the Congress of the United States have not been clearly addressed. These legal issues might invalidate the proposed Constitutional amendment as prescribed by Senate Concurrent Resolution No. 33-3.

Based on the foregoing, I am requesting your assistance if it would be possible to have the Solicitor General review the referenced resolution and determine if there are legal impediments which require resolution before the matter is placed in a referendum in the next general election. It is important for me to ensure that the people of American Samoa are well informed of all the issues associated with the proposed constitutional amendments.

As time is of the essence, your usual prompt attention is appreciated and humbly requested to ensure that sufficient time is spent to create full awareness among the people of American Samoa so they can make informed choices. Thank you very much for your consideration of this request.

Sincerely,

Lolo M. Moliga
Governor of American Samoa

Rhea Suh
Assistant Secretary
U.S. Department of the Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Assistant Secretary Suh:

It has come to my attention that the U.S. application for candidacy in the Extractive Industries Transparency Initiative (EITI) was approved by the EITI Board at its March 18-19 meeting in Oslo, Norway. I understand and appreciate that the application included an opt-in provision for states, as requested in WGA's letter to you last July. I further understand that the Multi-Stakeholder Group (MSG) that is providing input to the Extractive Industries Transparency Initiative plans to gather, collate, and analyze publicly available state revenue data for inclusion in the U.S. EITI report, regardless of whether a state has opted in.

I strongly recommend that the MSG and the Interior Department (as the primary federal government representative to EITI) clarify the proposed use of state data and propose a formal opt-in process for interested states. To better inform state consideration of EITI participation, WGA recommends that our federal partners develop and distribute an explanation of the initiative that describes:

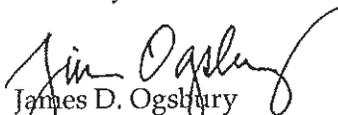

- the rationale for state participation and identifies the costs and benefits for a state opting in to EITI reporting;
- the process by which a state can opt-in to formally participate in U.S. EITI reporting; and
- how state data will be gathered and used for states which do not opt in.

While Governors support the goal of revenue transparency and recognize that the U.S. system of transparency can be a model for the rest of the world, they will react unfavorably to efforts by EITI that create an unfunded federal mandate. Unless states have opted in, DOI, EITI or the "Independent Administrator" contracted to gather and "repackage" existing state data should not expect state agency staff to take time away from their duties to help gather, collect, analyze or interpret data requested by EITI.

Rhea Suh
April 4, 2014
Page Two

We look forward to receiving more information about the proposed use of state data and a formal opt-in process for interested states.

Sincerely,

James D. Ogshury
Executive Director

OFFICE OF THE SECRETARY
Washington, D.C. 20240

APR 17 2014

Mr. James D. Ogsbury
Executive Director
Western Governors' Association
1600 Broadway, Suite 1700
Denver, Colorado 80202

Dear Mr. Ogsbury:

Thank you for your letter dated April 4, 2014, on behalf of the Western Governors' Association (WGA) concerning U.S implementation of the Extractive Industries Transparency Initiative (USEITI). You requested further clarification of how extractive revenues collected by states may be affected as USEITI implementation continues, and I appreciate the opportunity to share this information with you.

As you know, the USEITI candidacy application was approved at the March 2014 EITI International Board Meeting. Consistent with our previous communications, the candidacy application sought and successfully obtained a waiver of the EITI requirement to include reconciliation of state extractive revenues in EITI reporting. Publicly available information about state extractive revenues will be in the USEITI Report as part of the contextual data describing the U.S. extractive sector.

Moving forward, a working group will be formed to engage states in the joint design of a state "opt-in" procedure for USEITI reporting. The USEITI Multi-Stakeholder Group (MSG), which includes representatives from the States of California and Wyoming, will lead this effort. The rationale for seeking the waiver and proposing to instead develop an "opt-in" procedure recognizes not only the complex and varied nature of the state extractive landscape, but also the need to first obtain meaningful guidance from states on an approach that will be mutually beneficial. As a result, the approval of the USEITI candidacy application marks a starting point for more detailed discussion, not a destination with defined outcomes for state participation.

We welcome the opportunity for more active WGA involvement in designing a state "opt-in" procedure and identifying the benefits to state residents, especially in those areas where substantial energy development occurs. We would like to invite WGA representatives to begin attending the USEITI MSG open meetings, starting with the next one on April 23rd, and/or to

participate in the state "opt-in" working group. We will continue to keep you informed and seek your input as the state "opt-in" procedure is designed, and look forward to WGA's continued engagement on behalf of states.

Please let me know if there is any additional information that would be helpful.

Sincerely,

April 3, 2014

Honorable Sally Jewell
Secretary of the Interior
U.S. Department of the Interior
1849 C Street, NW
Washington, D.C. 20240-10148

Dear Secretary Jewell,

Thank you for your continued engagement with Western Governors and the Western Governors' Association. We are writing to ask the Department of Interior's support for reauthorization of the Federal Permit Streamlining Pilot Project (Pilot Project).

In accordance with Section 365 of the Energy Policy Act of 2005, then-Secretary of the Interior Gale Norton structured the Pilot Project through a memorandum of understanding with the Secretary of Agriculture, Administrator of the Environmental Protection Agency, and Chief of the U.S. Army Corps of Engineers.

The Pilot Project established seven regional Bureau of Land Management (BLM) offices as Pilot Project offices for a period of 10 years. The Western states where these offices are located collectively process the vast majority of the applications for permit to drill (APD) filed with the BLM.

A key aspect of the Pilot Project is that these offices are eligible to receive a portion of rental fees paid by oil and gas development companies in connection with their leases on BLM land. The Pilot Project offices utilize the additional funding to add staff and other resources to increase office efficiency and streamline processing of APDs. Further, this additional funding has been used by the Pilot Project offices to support BLM resource conservation efforts.

Since enactment of the Energy Policy Act of 2005, demand for natural gas has increased dramatically. In order to continue the development of domestic resources, efficient and streamlined regulatory permitting processes are ever more important. The Pilot Project is an important tool in this regard.

The Energy Policy Act of 2005 dictates that the Pilot Project's 10-year term will expire in 2015. Given its success, we support reauthorization of the Pilot Project.

Honorable Sally Jewell

April 3, 2014

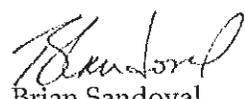

Page 2

Bipartisan support for the Pilot Project was seen when, in Dec. 2013, Congress passed and the President signed H.R. 767, expanding the scope of the Pilot Project and providing additional discretion to BLM. Ongoing bipartisan support is further evidenced by the Feb. 5, 2014 letter sent to you by Senator Tom Udall and Congressman Rob Bishop.

We join interested Members of Congress in asking the Department of Interior to support extension of the Pilot Project. We look forward to working collaboratively with you to ensure the continued success of this program, so important to a number of Western states.

Respectfully,

John Hickenlooper
Governor, State of Colorado
WGA Chairman

Brian Sandoval
Governor, State of Nevada

APR 17 2014

The Honorable John Hickenlooper
Chairman, Western Governors' Association
1600 Broadway, Suite 1700
Denver, Colorado 80202

Dear Governor Hickenlooper:

Thank you for your letter of April 3, 2014, regarding the expiration of the Federal Permit Streamlining Pilot Project (Pilot Project) authorized by the Energy Policy Act of 2005 (EPA Act), and your desire to seek its reauthorization. I appreciate your sharing your views on this matter. The Department of the Interior and the Bureau of Land Management (BLM) also consider the 10-year Pilot Project to be a success, and it has allowed the BLM and its Pilot Project partner bureaus and agencies to efficiently process oil and gas drilling permits and administer the Federal mineral estate.

The additional resources devoted to processing oil and gas use authorizations through the EPA Act have enhanced the BLM's capabilities to coordinate across the relevant agencies, increasing the pace of permitting and streamlining associated environmental reviews. In addition, the Pilot Project has provided the BLM's oil and gas inspection and enforcement program with resources necessary to allow for more thorough oversight of authorized oil and gas operations.

Recently, legislative authority was granted to expand the Pilot Project in the Miles City (MT) Field Office to include all field offices within the jurisdiction of the BLM's Montana/Dakotas State Office. Similarly, the Pilot Project in the Buffalo (WY) Field Office was legislatively expanded to include the Casper Field Office. We would like to work with Congress to provide additional flexibility nationwide to utilize the pilot office authority to respond accordingly as industry's geographical interests and permitting demands shift over time.

We look forward to working with you to develop solutions that will allow us to extend the success of these pilot offices and to provide for environmentally responsible energy development on the public lands. If you would like to discuss this matter further, please do not hesitate to contact me. A similar letter has been sent to Governor Brian Sandoval.

Sincerely,

Sally Jewel

Susana Martinez
Governor

March 24, 2014

The Honorable Secretary Sally Jewell
U.S. Department of Interior
1849 C Street, NW
Washington, DC 20240

Dear Secretary Jewell:

I am writing in support of the creation of a national monument covering lands in the Organ Mountains, Organ Needles, and Pena Blanca WSA, as set forth in H.R. 995, The Organ Mountains National Monument Establishment Act sponsored by Congressman Steve Pearce. New Mexico is blessed with thousands of miles of remarkable lands preserved not only for our citizens' enjoyment, but for countless visitors from around the world. This establishment of roughly 50,000 acres would protect and conserve these lands for future generations to enjoy the beauty of our rich terrain.

While H.R. 995 ensures that this effort is not overzealous in scope and breadth, I am concerned that a similar proposal brought forth by Senators Heinrich and Udall allocates too much land. This proposal appropriates roughly five times the acreage of HR995 and could threaten border security as well as water and grazing rights if it were adopted.

I stand with members of our delegation in wanting to ensure that our beautiful state is protected for future generations. However, the approach favored by Senators Heinrich and Udall is simply too broad. I strongly encourage your support of Congressman Pearce's approach, and look forward to working with members of our delegation to ensure its success.

Re: National Historic Landmark Designation of Nevada State Prison

Dear Secretary Jewell:

Please accept this letter expressing my support for the nomination of Nevada State Prison as a National Historic Landmark. Nevada State Prison has played a prominent role in shaping the rich history of the State of Nevada, a history we are now celebrating as we enter our 150th year of statehood. The historical, cultural, architectural and geological significance of this unique site cannot be overstated, and its profound impact on Nevada's legacy should be preserved for the benefit of future generations of Americans.

One of the oldest prisons in the Western United States, Nevada State Prison operated from 1862 until its closure in 2012. It was originally housed in the Warm Springs Hotel in Carson City. In 1867, the facility was reconstructed out of sandstone which was quarried at the site. Since its reconstruction, the prison has played a role in defining some of the most quintessential cultural, political, and social events in Nevada's history.

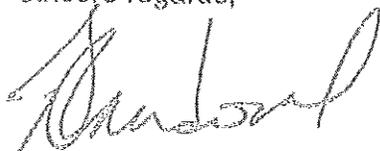

Nevada State Prison's first warden, Abraham Curry, who is considered the founding father of Carson City, donated the land upon which Nevada's State Capitol building stands today. The State Capitol was constructed using the sandstone quarried at Nevada State Prison. The Capitol's timeless architecture and sandstone exterior continue to embody the strength and unbreakable resolve that have defined Nevada throughout its rugged history. Nevada has evolved from its early days as an untamed frontier into a premiere international destination that today is at the forefront of some of America's most dynamic industries and emerging technologies. Like the Capitol's sandstone exterior that

has withstood the test of time, the State of Nevada, too, has weathered its own tempests and has emerged strong, unwavering, and ready for the opportunities that lie ahead. Thus, Nevada State Prison's early role in the construction of some of Nevada's most cherished landmarks is also an essential chapter in the ongoing story of the Silver State.

Nevada State Prison is also renowned for its geological treasures, linking modern-day Nevada to its rich early heritages. As far back as 1882, fossilized footprints were discovered at the site, and fossils from a variety of species are still being uncovered there to this day. These types of invaluable discoveries at the site of Nevada State Prison spur research and scientific interest that help to answer important questions about our past. They are also a reflection of Nevada's unrivaled contributions in the field of anthropology, which include North America's oldest known petroglyphs, recently discovered in northern Nevada, as well as the Tule Springs fossil bed outside of Las Vegas, which is home to thousands of fossils of Ice Age mammoths, bison and American lions.

As an iconic and historic institution, Nevada State Prison is so much more than a building. It truly is a landmark that embodies much of what Nevada has to offer its citizens, as well as the millions of visitors that travel to Nevada every year. The site is emblematic of ideas that continue to inform the history of this great State, as well as the ideas that will inspire its future. It has played a pivotal role in the development of Nevada from its earliest days as an unchartered territory, and has endured the ups and downs of its 150-year history. I therefore wish to convey my enthusiastic support for the designation of Nevada State Prison as a National Historic Landmark. I firmly believe that such a designation would greatly enhance Nevada's cultural and historical vitality, and I hope you will also carefully consider supporting the nomination of this inimitable treasure of Nevada's past.

Sincere regards,

A handwritten signature in black ink, appearing to read "B. Sandoval", written in a cursive style.

NATIONAL PARK SERVICE
1849 C Street, N.W.
Washington, DC 20240

H34(2280)

APR - 9 2014

The Honorable Brian Sandoval
Governor of Nevada
101 North Carson Street
Carson City, NV 89701

Dear Governor Sandoval:

Thank you very much for your letter of support for the National Historic Landmark (NHL) designation of the Nevada State Prison in Carson City. From your letter, the history of the prison sounds impressive. The NHL staff will evaluate the prison's eligibility for designation if they receive a request for nomination. To date, they have not received any information about the prison, nor a request that the site be considered for NHL designation.

Rebecca Palmer, the Nevada State Historic Preservation Officer, informed the NHL staff that a National Register of Historic Places nomination is being prepared for the Nevada State Prison. Preparation of the nomination is funded, in part, by a Certified Local Government grant from the National Park Service to Carson City. We look forward to receiving the National Register nomination.

National Historic Landmark designation is quite different from National Register listing. The NHL program recognizes properties of exceptional national significance that exhibit a very high degree of integrity. National Register listing is available for historic properties that are significant from a local, state, or national perspective. Each program has distinct criteria for evaluating eligibility.

As the Nevada State Prison nomination is being prepared, the National Register and NHL staff will assist the preparers as needed. The staff will hold your letter of endorsement until a nomination has been received. Thank you very much for your interest in the National Historic Landmark program and for your support in recognizing Nevada's rich heritage.

Dear Deputy Secretary Connor:

I am pleased to congratulate you on your appointment as Deputy Secretary of the Department of the Interior. I did ask for quick approval of your nomination but am not sure I caused the 2-day response. I have enjoyed working with you in the past, and I look forward to working with you in the future on projects that are critical to North Dakota.

In particular, I look forward to continued discussions with you regarding the Red River Valley Water Supply project. A study on the project is currently underway; I will provide you with an update on the proposed route once the study is completed early this summer.

I also again want to request your support to obtain funding for a Plan of Study to identify potential improvements to the river operating plans implemented in both the United States and Canada with regard to the Souris River. It is very important that this Plan of Study is completed, as it will be of great importance in helping the United States and Canada to provide long-term flood protection for our citizens in the Souris River Valley.

Congratulations on your new position; I look forward to continuing to work with you on issues important to our state and our nation.

Sincerely,

Jack Dalrymple

February 23, 2014

Honorable Sally Jewell
Secretary
U.S. Department of the Interior
1849 C Street, N.W.
Washington, D.C. 20240

Dear Secretary Jewell:

Western Governors and the U.S. Department of the Interior (DOI) share a commitment to conserve the greater sage-grouse. As we have repeatedly stated, Western Governors support all reasonable management efforts necessary to support a not-warranted decision by the U.S. Fish and Wildlife Service concerning the greater sage-grouse. We thank you and your agency directors for your cooperation with our states in the development of sound conservation measures.

Western Governors are pleased to share our most recent *Inventory of State and Local Governments' Conservation Initiatives for Sage-Grouse: 2013 Update*. This third annual inventory illustrates the many ways that states and counties are taking proactive, voluntary steps to conserve the species – steps which are consistent with the Conservation Objectives Team report, and other conservation requirements, issued by the Service. These steps preclude the need to include the greater sage-grouse on the federal endangered species list.

An accurate evaluation of the effect of state measures upon overall population trends for greater sage-grouse requires DOI and its agencies to take into account the full spectrum of state activities, be they legislative, regulatory, administrative or voluntary, and adequately acknowledge the associated benefits.

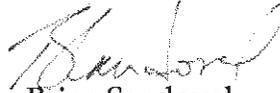

Western Governors pledge to continue working with DOI, U.S. Fish and Wildlife Service and the Bureau of Land Management to comprehensively document all greater sage-grouse conservation actions in order to ensure that greater sage-grouse conservation plans and policies are fully accounted for at the time of a final listing proposal.

Honorable Sally Jewell

THE SECRETARY OF THE INTERIOR
WASHINGTON

APR 10 2014

The Honorable Brian Sandoval
Vice Chairman, Western Governors' Association
1600 Broadway, Suite 1700
Denver, Colorado 80202

Dear Governor Sandoval:

Thank you for your letter dated February 23, 2014, regarding conservation of the greater sage-grouse. I appreciate receiving a copy of the Western Governors' Association (WGA) *Inventory of State and Local Governments' Conservation Initiatives for Sage-Grouse: 2013 Update* and *WGA's Conserving Wildlife and Crucial Habitat in the West*.

The Department of the Interior's Bureau of Land Management and U.S. Fish and Wildlife Service, along with the U.S. Forest Service, are continuing to work collaboratively with affected states to conserve the greater sage-grouse and its habitat and potentially avoid the need to list the species under the Endangered Species Act. These collaborative efforts play an important role in conserving and improving sage brush habitats across the range of the greater sage-grouse. We appreciate WGA's commitment to greater sage-grouse conservation and the proactive steps being taken across local and state lands.

Thank you for your interest in the management of the greater sage-grouse on our Nation's public lands. We look forward to continuing to work with you on this issue. A similar letter is being sent to Governor John Hickenlooper.

Sincerely,

Sally Jewell

February 18, 2014

The Honorable Sally Jewell
Secretary of the Interior
U.S. Department of the Interior
1849 C Street, N.W.
Washington, DC 20240

Dear Secretary Jewell,

I support the work of the Sweetwater River Conservancy (Conservancy) in Wyoming. The Conservancy finalized a Wetland Mitigation Bank with the U.S. Army Corps of Engineers to safeguard important wetland habitat in perpetuity and unlock other areas for development. Now the Conservancy is working to secure habitat for the sage-grouse using a Habitat Conservation Bank permitted by the U.S. Fish and Wildlife Service (Service).

RECEIVED
2014 FEB 19 10:46 AM
FEDERAL BUREAU OF INVESTIGATION
U.S. DEPARTMENT OF JUSTICE

The Conservancy's Habitat Conservation Bank builds on principles in my sage-grouse core area conservation strategy. It will protect over 700,000 acres of sage-grouse habitat. This landscape-scale habitat bank will be larger than all other nationwide Service-approved habitat banks combined. While sage-grouse are the focus of the Conservancy's work, benefits extend to mule deer, water quality and quantity, livestock production and other natural resources. I look forward to final approval of the proposed Bank by the Service. I commend Mark Sattelberg, Ecological Services Field Supervisor for Wyoming, for his efforts to achieve these goals.

The Conservancy also maintains habitat for bald and golden eagles, other raptors and migratory birds. These avian species have been a focus of wind industry guidelines, the Bald and Golden Eagle Protection Act and Migratory Bird Treaty Act. Proactive habitat banking concepts for bald and golden eagles, migratory birds and other raptor management would benefit from matching proven science, federal land use and wildlife protection laws. I would appreciate your assistance in applying habitat banking to avian species.

Thank you for your upcoming meeting with the Conservancy. Working with the Sweetwater River Conservancy and similar groups encourages private efforts and results in long term benefits to sage-grouse, wildlife, water, open space, hunting and ranching. Wyoming continues to be a leading force in sage-grouse protection. The Conservancy's work is another important extension of that effort.

Sincerely,

Matthew H. Mead
Governor

*Secretary,
look forward to seeing
you soon.*

THE SECRETARY OF THE INTERIOR
WASHINGTON

MAR 25 2014

The Honorable Matthew H. Mead
Governor of Wyoming
Cheyenne, Wyoming 82002

Dear Governor Mead:

Thank you for your letter of February 18, 2014, supporting the efforts of the Sweetwater River Conservancy (Conservancy) to conserve natural resources in Wyoming. The Department of the Interior also supports these important conservation efforts because of the great potential to protect essential natural resources. I appreciate your support and the backing of State agencies on these projects as well.

The Conservancy's habitat conservation bank is an ambitious undertaking. I am excited that the habitat conservation bank is designed on a landscape scale and builds on your sage-grouse core area conservation strategy, something that is required for the continued protection of greater sage-grouse. I commit the Bureau of Land Management and the U.S. Fish and Wildlife Service (FWS) to diligently work on the establishment of the habitat conservation bank.

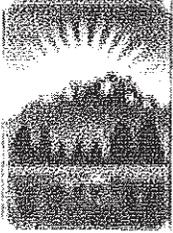

Regarding your comments about using conservation banks for avian species, we have initiated discussions at the national level on this complicated issue. At this time, we are exploring whether it is possible to utilize a traditional conservation banking approach to address impacts to eagles, given our current regulations governing take of eagles. We will continue to assess the degree to which it is possible to do as you suggest and apply these habitat banking concepts to eagles. Although the regulations implementing the MBTA do not currently address conservation banking when activities affect birds covered by that Act, the FWS supports and encourages voluntary banking efforts for this purpose.

It was a pleasure to meet with former-Governor Freudenthal and the Conservancy recently, and I look forward to learning more about their innovative efforts. I also commend your leadership in sage-grouse protection and natural resource issues in Wyoming.

Sincerely,

Sally Jewell

2014 FEB 19 AM 6:41

OFFICE OF THE
EXECUTIVE SECRETARIAT

Dear Secretary Jewell:

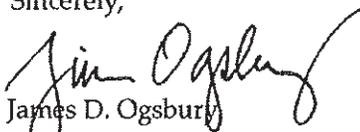

On behalf of the Western Governors' Association (WGA), I am writing to communicate Western Governors' concerns regarding invasive species. The problem of invasive species is one of the most complex environmental issues facing our nation, growing and creating economic and ecological damage across our western landscapes and Pacific Islands.

The National Invasive Species Council (NISC) was created to provide high-level interdepartmental coordination of federal invasive species actions, as well as to promote coordination with states and local entities to address cross-boundary invasive species concerns. Executive Order 13112, which established NISC in 1999, provides for biennial updates of the National Invasive Species Management Plan by NISC. The most recent Management Plan, released in August 2008, covered the period from 2008-2012.

Western Governors understand that a new Management Plan is currently being drafted under the auspices of NISC. WGA strongly urges NISC to engage and cooperate with states during the drafting process. Such coordination will ensure that federal priorities and actions align with the efforts of states, localities, nonprofit entities, and other stakeholders.

Western Governors welcome the opportunity to work with you on development and implementation of a new National Invasive Species Management Plan that can achieve measurable progress on invasive species. I look forward to learning from you how WGA can most constructively participate in the process of developing the management plan.

Sincerely,

James D. Ogsbury
Executive Director

United States Department of the Interior

OFFICE OF THE SECRETARY
Washington, DC 20240

APR 01 2014

Mr. James D. Ogsbury
Executive Director
Western Governors' Association
1600 Broadway, Suite 1700
Denver, CO 80202

Dear Mr. Ogsbury,

Thank you for your letter expressing concern about invasive species causing extensive environmental and economic harm across western landscapes and in the Pacific Islands. I agree that invasive species do not respect jurisdictional boundaries and are best addressed by coordinated efforts and through close collaboration with states, localities, nonprofit entities, and other stakeholders.

I appreciate your interest in contributing to the development and implementation of the National Invasive Species Management Plan (Management Plan), currently being updated and revised by the National Invasive Species Council (NISC). As Co-Chair of the National Invasive Species Council, I welcome the opportunity to work closely with the Western Governors' Association (WGA) to design the best strategy possible for addressing invasive species and protecting our vital natural resources. The WGA plays a critical role in invasive species prevention and control efforts throughout the western United States.

NISC recognizes the importance of engagement and cooperation with the states and tribes in gathering valuable input for the Management Plan, and improving our collective efforts to minimize the impacts of invasive species over the next few years. We look forward to working with WGA in our planning process as the 13 NISC member departments and agencies identify key priorities.

The revised plan will also be extensively reviewed by the Invasive Species Advisory Committee (ISAC). Mandated by Executive Order 13112, ISAC consists of 30 of nonfederal individuals, representing industry, universities, states, and other stakeholders who provide advice and recommendations to NISC on invasive species issues. ISAC's comments will be carefully considered for incorporation in the revised Management Plan.

Again, thank you for your interest in the development and implementation of the new National Invasive Species Management Plan. Please don't hesitate to contact me at 202-354-1881, or by e-mail at Lori_Williams@ios.doi.gov, if you have any additional questions about how the Western Governors' Association can most constructively participate in this effort.

Sincerely,

Lori C. Williams, Esq.
Director, National Invasive Species Council

Washington, D.C. 20240

Re: Yakama Nation Retrocession Petition

Dear Assistant Secretary Washburn:

Pursuant to 25 U.S.C. §1323 and Revised Code of Washington (RCW) 37.12, I have included the attached proclamation, signed by me on January 17, 2014. The proclamation addresses a retrocession petition submitted by the Confederate Tribes and Bands of the Yakama Nation in Washington State.

On March 19, 2012, former Washington State Governor Christine Gregoire signed Engrossed Substitute House Bill 2233. This important piece of legislation created a process by which the state of Washington may retrocede to the United States civil and criminal jurisdiction previously acquired by the State over a federally recognized Indian tribe under federal Public Law 280 in 1953. The bill gives the Governor of the state of Washington the authority to approve, in whole or in part, a retrocession petition submitted by a Washington State Indian tribe. Final approval rests with the U.S. Department of the Interior.

On July 17, 2012, the Yakama Nation filed a retrocession petition with the Office of the Governor requesting full civil and criminal jurisdiction on all of Yakama Nation Indian country in five specific areas of RCW 37.12.010. I believe that the enclosed Proclamation is a great first step towards strengthening the sovereignty and independence of the Yakama Nation.

In paragraph one of the proclamation, the State grants exclusive civil and criminal jurisdiction within the exterior boundaries of the Yakama Reservation in four subject areas of RCW 37.12.010: Compulsory School Attendance; Public Assistance; Domestic Relations; and Juvenile Delinquency.

In paragraph two, the proclamation also grants to the Yakama Nation civil and criminal jurisdiction within the exterior boundaries of the reservation in Operation of Motor Vehicles on Public Streets, Alleys, Roads, and Highways cases which do not involve non-Indian plaintiffs, non-Indian defendants, or non-Indian victims. I would note that the proclamation itself states that the State will retain jurisdiction in these cases over civil causes of action involving "non-Indian

The Honorable Kevin Washburn
January 27, 2014
Page Two

plaintiffs, non-Indian defendants, *and* non-Indian victims,” as well as in criminal cases involving “non-Indian defendants *and* non-Indian victims.” The intent set forth in paragraph two, however, is for the State to retain jurisdiction in this area where *any* party is non-Indian, and therefore may be more properly read in both instances as the State retaining jurisdiction in those cases involving “non-Indian plaintiffs, non-Indian defendants *and/or* non-Indian victims.” I respectfully request that the Department make this clear in the notice accepting the retrocession Proclamation.

Finally, in paragraph three of the proclamation, the State is also retroceding criminal jurisdiction within the exterior boundaries of the reservation over all offenses not specifically addressed in paragraphs one and two, which do not involve non-Indian defendants or non-Indian victims. Again, I would note that in this paragraph the proclamation states that the State retains jurisdiction over criminal offenses involving “non-Indian defendants *and* non-Indian victims,” but the intent is for the State to retain such jurisdiction in those cases involving non-Indian defendants *and/or* non-Indian victims.”

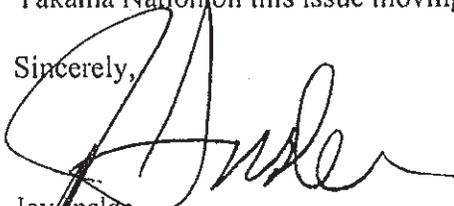

The proclamation does deny part of the petition by the Yakama Nation, and allow the State to retain existing civil and criminal jurisdiction in a limited number of areas. First and foremost, the State is retaining its existing jurisdiction outside of the exterior boundaries of the Yakama Reservation, including all trust and fee lands. Moreover, consistent with the description above, the State is retaining civil and criminal jurisdiction in Operation of Motor Vehicle cases that involve non-Indian plaintiffs, non-Indian defendants, and/or non-Indian victims.

It is important to note that nothing in the proclamation changes the existing jurisdiction the Yakama Nation has over Indian child custody proceedings under RCW 37.12.010(3) and Adoption proceedings and Dependent Children pursuant to RCW 37.12.010(6) and (7). The Yakama Nation reassumed jurisdiction over these subjects in 1980 under the Indian Child Welfare Act, and shall remain under the exclusive jurisdiction of the Yakama Nation.

Similarly, nothing in the proclamation shall affect the State’s civil jurisdiction over the civil commitment of sexually violent predators pursuant to chapter 71.09 RCW and the State must retain such jurisdiction notwithstanding the completion of the retrocession process authorized under RCW 37.12.160.

Thank you for accepting this proclamation on behalf of the state of Washington and for working to bring the retrocession petition to fruition. I look forward to continue working with you and the Yakama Nation on this issue moving forward.

Sincerely,

Jay Inslie
Governor

**PROCLAMATION BY THE GOVERNOR
14-01**

WHEREAS, on March 19, 2012, Governor Christine Gregoire signed Engrossed Substitute House Bill 2233, "Creating a procedure for the state's retrocession of civil and criminal jurisdiction over Indian tribes and Indian country"; and

WHEREAS, Engrossed Substitute House Bill 2233, which became Chapter 48, Laws of 2012, creates a process by which the state of Washington (hereafter, "the State") may retrocede to the United States all or part of the civil and criminal jurisdiction previously acquired by the State over a federally recognized Indian tribe, and the Indian country of such tribe, under federal Public Law 280, Act of August 15, 1953; and

WHEREAS, on March 13, 1963, in accordance with federal Public Law 280, Act of August 15, 1953, the State assumed partial civil and criminal jurisdiction, subject to the limitations in RCW 37.12.021 and RCW 37.12.060, within the Indian country of the Confederated Tribes and Bands of the Yakama Nation (hereafter, "Yakama Nation") pursuant to Chapter 36, Laws of 1963; and

WHEREAS, after March 13, 1963, the Yakama Nation did not invoke with the State the provision of RCW 37.12.021 but chose to rely upon the rights and remedies of its Treaty of 1855 with the United States, 12 Stat. 951 and federal laws; and

WHEREAS, on January 11, 1980, the Assistant Secretary-Indian Affairs, United States Department of the Interior, approved the Yakama Nation's petition for re-assumption of jurisdiction over Indian child custody proceedings under the Indian Child Welfare Act of 1978. Effective March 28, 1980, the Yakama Nation reassumed jurisdiction over Yakama Indian child custody proceedings; and

WHEREAS, on July 17, 2012, the Yakama Nation filed a retrocession petition with the Office of the Governor. The retrocession petition by the Yakama Nation requests full retrocession of civil and criminal jurisdiction on all of Yakama Nation Indian country and in five areas of RCW 37.12.010, including: Compulsory School Attendance; Public Assistance; Domestic Relations; Juvenile Delinquency; and Operation of Motor Vehicles on Public Streets, Alleys, Roads, and Highways; and

WHEREAS, Governor Gregoire convened government-to-government meetings with the Yakama Nation to discuss the Nation's retrocession petition. In the course of those meetings, the Yakama Nation and Governor Gregoire confirmed that the Yakama Nation asks the State to retrocede all jurisdiction assumed pursuant to RCW 37.12.010 in 1963 over the Indian country of the Yakama Nation, both within and without the external boundaries of the Yakama Reservation. However, the Yakama Nation requests that the State retain jurisdiction over mental illness as provided in RCW 37.12.010(4), and jurisdiction over civil commitment of sexually violent predators under RCW 71.09, and acknowledges that the State would retain criminal jurisdiction over non-Indian defendants; and

WHEREAS, Governor Jay Inslee convened further government-to-government meetings between the State and Yakama Nation. The Governor's Office has also consulted with elected officials from the jurisdictions proximately located to the Yakama Nation's Indian country; and

WHEREAS, on July 9, 2013, Governor Inslee exercised the six-month extension provision for issuing a proclamation, pursuant to RCW 37.12.160; and

WHEREAS, strengthening the sovereignty and independence of the federally recognized Indian tribes within Washington State is an important priority for the State; and

NOW, THEREFORE, I, Jay Inslee, Governor of the state of Washington, by virtue of the authority vested in me by Section 37.12.160 of the Revised Code of Washington, do hereby grant in part, and deny in part, the retrocession petition submitted by the Confederated Tribes and Bands of the Yakama Nation, according to the following provisions:

1. Within the exterior boundaries of the Yakama Reservation, the State shall retrocede full civil and criminal jurisdiction in the following subject areas of RCW 37.12.010: Compulsory School Attendance; Public Assistance; Domestic Relations; and Juvenile Delinquency.
2. Within the exterior boundaries of the Yakama Reservation, the State shall retrocede, in part, civil and criminal jurisdiction in Operation of Motor Vehicles on Public Streets, Alleys, Roads, and Highways cases in the following manner: Pursuant to RCW 37.12.010(8), the State shall retain jurisdiction over civil causes of action involving non-Indian plaintiffs, non-Indian defendants, and non-Indian victims; the State shall retain jurisdiction over criminal offenses involving non-Indian defendants and non-Indian victims.
3. Within the exterior boundaries of the Yakama Reservation, the State shall retrocede, in part, criminal jurisdiction over all offenses not addressed by Paragraphs 1 and 2. The State retains jurisdiction over criminal offenses involving non-Indian defendants and non-Indian victims.
