

November 5, 2011

Ken Salazar, Secretary
United States Department of the Interior
1849 C Street, N.W.
Washington, DC 20240

Dear Secretary Salazar:

My heartfelt wish as the owner of 70,000 acres of pristine and remarkable wilderness in Maine's celebrated North Woods is to gift this resource to the National Park Service in honor of the 100 year anniversary of the National Park System in the year 2016.

Maine currently possesses substantial open spaces, but the future status and the public accessibility of these vulnerable resources are not guaranteed. My intention is to insure public access and enjoyment of this legendary portion of Maine and preserve an experience that has inspired Henry David Thoreau and millions of subsequent visitors.

Please accept the enclosed materials that express the hopes of 3,731 individuals and organizations who share a vision and commitment to the creation of a Maine Woods National Park.

You will find 406 letters that express the hopes of Maine residents from every portion of the state, as well as the petition signatures from 3,325 supporters who urge the National Park Service to explore the feasibility of a resource that we believe is key to Maine's future.

Letters of support come from local citizens' committees, school boards, chambers of commerce, business owners, guides, and leaders of preservation groups. Supporters include the leader of the Penobscot Nation, elected officials, conservationists, educators, small business owners, Maine guides, and members of snowmobile clubs.

This growing alliance of thousands of individuals demonstrates broad support from neighboring communities, including participation by 205 residents of Millinocket, 137 of Medway, and 49 of East Millinocket—the three communities in closest proximity to the proposed National Park.

Materials for your consideration also include a proposal for the National Park, with an estimated annual budget and a plan for an endowment. This proposal, with maps and photographs, addresses in a preliminary way the critical questions of a Special Resource Study.

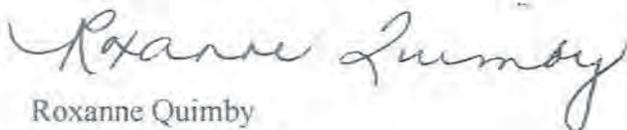

Rarely has an opportunity arisen that would so effectively strengthen the economic vitality of a region while simultaneously preserving its natural beauty.

A recent poll by Critical Insights established that across Maine supporters for a Maine Woods National Park comprised 60% of the population, compared to only 30% not in favor and 10% undecided.

We believe that establishing the facts through a Special Resource Study is now essential and holds great promise for Maine's future.

We therefore urge you to employ the expertise and resources of the National Park Service to explore the potential of this campaign to manage Maine's beautiful landscape in a way that will build its economic future.

Sincerely,

Roxanne Quimby

enclosures

Proposal

Exhibit One: 89 letters of support from local leaders, business people, and residents

Exhibit Two: 39 letters from Maine leaders and elected officials

Exhibit Three: 278 letters from Maine residents throughout the state

Exhibit Four: 839 local and Maine petition signatures

Exhibit Five: 1,343 statewide petition signatures

Exhibit Six: 1,070 online petition supporters

2011 NOV -8 AM 11:26

RECEIVED

506624

THE SECRETARY OF THE INTERIOR
WASHINGTON

JAN - 6 2012

Ms. Roxanne Quimby
136 Center Street
Old Town, Maine 04468

Dear Ms. Quimby:

Thank you for your service to the National Park Foundation. The Foundation's work is inspirational and greatly supports of the priorities I have set at the Department of the Interior.

I am writing to share with you *The 50 State Report on America's Great Outdoors* that the Department of the Interior recently published on the America's Great Outdoors (AGO) Initiative and to seek your engagement in its successful implementation.

During this past spring and summer, leaders in the Department of the Interior and I engaged in conversations with governors and senior staff in all 50 states about the AGO Initiative. Our goal was to continue a dialogue with leaders and stakeholders in all 50 states on this conservation and outdoor recreation effort. This outreach built on over 100 listening sessions the Administration held with the American public and was based on a fundamental principle of AGO: that conservation and recreation projects are best driven at the state and local levels.

My leadership team and I requested that each state provide a short list of projects related to the establishment or enhancement of urban parks, restoration of rivers, and conservation of large landscapes on which the Department could be a partner. Based upon these recommendations, I recently announced two projects in each state that the Department will collaborate on with the states and stakeholders to conserve land, build trails, restore and increase access to rivers, and enhance parks and wildlife areas.

The enclosed report summarizes these project proposals. The report shows the diverse ideas related to conservation and recreation across America and the collective goal of reconnecting people to the outdoors. Overall, there are:

- 24 projects to restore and provide recreational access to rivers and other waterways;
- 23 projects to construct new trails or improve recreational sites;
- 20 projects that will create and enhance urban parks; and
- 13 projects that will restore and conserve America's most significant landscapes.

In addition to the conservation and recreation benefits that these projects will afford citizens across the Country, they will also create jobs through travel, tourism, and outdoor recreation activities. These are local and sustainable jobs that contribute to the more than \$1 billion economic impact that conservation, recreation, and preservation have on our Nation's economy.

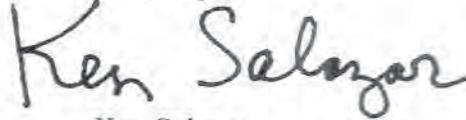

The Department will continue to work with the states, communities, and stakeholders to advance these projects with existing budget resources, including providing technical support and use of its administrative authorities. In addition, we will partner with states and communities to leverage grants, private funding, and other resources to help ensure the success of these projects.

As the Department's most important partner dealing with national parks I need your assistance to make these projects a reality. Your creative thinking about potential partnerships and funding mechanisms can be a crucial asset to our efforts on these projects.

In addition to the AGO 50 State Report, I am enclosing a copy of the report the President announced last winter. I welcome your thoughts and ideas as we accelerate these efforts over the next year.

Thank you for your collaboration on these projects and your support of America's Great Outdoors.

Sincerely,

A handwritten signature in black ink that reads "Ken Salazar". The signature is written in a cursive, flowing style.

Ken Salazar

LePage tells Obama to steer clear of national park debate

[Print](#)[Email](#)[Share](#)[Tweet](#)

Gov. Paul LePage

Ashley L. Conti | BDN

Gov. Paul LePage

By Christopher Cousins, BDN Staff

[Follow on Twitter](#) | [Find on Facebook](#)

August 27, 2015 at 11:00 a.m.

AUGUSTA, Maine — Gov. Paul LePage has sent letters to President Barack Obama and Maine's congressional delegation to express opposition to proposals to apply national monument protections to federal land in the Gulf of Maine and land in the Millinocket area.

According to LePage, the federal government is considering new monument designations under the provisions of the Antiquities Act, which LePage suggests should be reformed. He argued that both monuments would harm Maine's economy by putting some of its natural resources off-limits and suggested that one of the proposals — which is little more than rumor at this point — seeks to pursue a national park that has already been rejected by voters in East Millinocket and Medway.

"I am hearing more and more that national park proponents are considering seeking a national monument designation after their proposal was defeated at the polls in Medway and East Millinocket," wrote LePage in an Aug. 28 letter to Sens. Susan Collins and Angus King and Reps. Bruce Poliquin and Chellie Pingree. "A national monument designation makes Maine timber off limits to the forest products industry."

As for a National Marine Monument in the Gulf of Maine, LePage signaled his opposition to

Obama and requested information about the process moving forward.

“Fundamentally, I oppose this power because it is so sweeping and provides few procedural protections to those who are likely to be most affected,” wrote LePage to Obama. “In addition to my general objections to this power, I am also opposed to the specific project in question that looks to designate Cashes Ledge and undersea canyons and seamounts in the Gulf of Maine as a national monument. These National Marine Monuments serve only one purpose — excluding commercial fishing activity from certain segments of the ocean.”

Hello,

I wanted to thank you both and also Lucas St. Clair and Mitchell Butler (whose e-mail I unfortunately didn't have) for meeting with me today. I would love to get a copy of the powerpoint that you shared with me if possible and also a copy of the economic study. I very much look forward to working together with all of you and would be happy to set up a time to speak again in the future if you wish.

All my best,
Nikki

America's Craziest Governor Goes Off the Rails

Is Paul LePage overplaying his hand or no longer playing with a full deck?

By COLIN WOODARD | July 19, 2015

The strangest month in memory at Maine's State House started with Gov. Paul LePage stepping out of his office to squeeze a squeaking rubber pig toy for the assembled press and call their attention to a tabletop Christmas tree decorated with ornaments bearing portraits of several of his erstwhile Republican legislative allies, including the president of the state senate.

State lawmakers of both parties, he explained in the unusual June 17 appearance, had rejected his budget in favor a compromise package he alleged was filled with pork. In response, he announced he had just issued some 200 line-item vetoes just to give lawmakers more work to do before the session could adjourn for Maine's cherished, all-too-short summer. "For five months they wasted our time," LePage explained. "This time I am going to waste a little bit of their time."

"We need Mainers to understand our government is corrupt," the chief executive of that government continued. "The Maine people have to demand better from our elected officials."

One month later LePage— a pugnacious, hot-headed, sometimes vulgar Tea Party-style conservative—is facing a bipartisan investigation into potential abuse of power, a nascent impeachment effort by opponents in the lower State House chamber, and a federal lawsuit by the outgoing Democratic House speaker, who has accused the governor of blackmailing a non-profit school into revoking their job offer to him. Meanwhile, leaders of the Republican-controlled state Senate and many Republicans in the House have turned on the governor, helping overturn hundreds of his vetoes and line-item vetoes in lightning-paced voting sessions, sometimes at a rate of one every 25 seconds. His veto of the bipartisan budget was overturned, narrowly avoiding a state government shutdown. An aggressive attempt to appropriate wider veto authority for his office has been rebuffed by lawmakers and legal experts, but still threatens to plunge the state into a constitutional crisis.

"For whatever reason the governor has chosen to demonize the entire legislature and people in both parties who don't always agree with him on everything," says Sen.

Roger Katz, a moderate Republican whose face adorned one of the ornaments on LePage's Christmas tree. "There is so much he could get done if he chose to work with the legislature instead of against it."

Mark Brewer, a political scientist at the University of Maine, puts it this way: "This is no longer a partisan battle or one primarily over policy. He's turned it into an institutional fight, a knock-down, drag-out fight between executive and legislative prerogative."

LePage won reelection in November by a five-point margin in a three-way race, surprising many outside the state who knew him as the guy who told the NAACP to "kiss my butt," chastised a state senator for wanting to "give it to the people without Vaseline" and turned an obscure mural depicting U.S. labor history into a national cause célèbre by removing it from the state labor department because an anonymous constituent likened it to North Korean brainwashing. He's perhaps the only governor in the country who could rib New Jersey Governor Chris Christie for being "a little bit shy" and only be half kidding.

Since his January re-inauguration, however, he's brandished his slender electoral mandate as a club, verbally battering anyone who stands in the way of the will of the Maine people, now said to be synonymous with his own. He spent much of a volatile, hour-long May 29 press conference lambasting Democratic legislative leaders as "repugnant," "disgraceful" and child-like before pledging to veto every bill with a Democratic sponsor regardless of merit until they agreed to back one of his top priorities, a constitutional referendum to eliminate the state's income tax. Days later he turned on two longtime allies—Senate President Mike Thibodeau and Senate Majority Leader Garrett Mason—for engaging in budget talks with Democrats; his daughter, who heads his political organization Maine People Before Politics, recorded robocalls deployed in both the stalwart conservatives' districts, erroneously accusing them of funding "welfare for illegal aliens." Instead of falling into line, the lawmakers have steeled their resolve.

"I think he wants some primary challenges against Republicans in 2016 so he will have a more conservative legislature to work with," says political scientist Jim Melcher of the University of Maine at Farmington. "But that's hard to pull off and I

think he's overplayed his hand.”

LePage's isolation increased substantially earlier this month after a bizarre episode in which he failed to veto 19 bills he opposed—including a hotly-contested measure to prevent 1,000 legal asylum seekers from having their welfare benefits cut off—and thus allowed the bills to become law. The blunder was based on a novel interpretation of the state constitution that conflated the legislature having gone into recess for a few days with having adjourned for the session, which would have allowed the governor more time to veto the bills. Despite his take being soundly rejected by the state's attorney general, the non-partisan staff of the legislature and Republican leaders in the senate, LePage defiantly doubled-down on it, refusing to veto another 51 bills, which also became law early this week and will remain so unless the courts intervene.

As Democrats celebrated this act of unintentional compromise, some prominent conservatives expressed concern. “The administration has absolutely no ground to stand on here,” fumed Republican operative Lance Dutson, former head of the conservative Maine Heritage Policy Center, who this week launched a political organization for Republicans fed up with LePage. “All it has is rhetoric and intimidation, which unfortunately has been the story way too many times recently.” Mike Cianchette, the governor's attorney until he was deployed to Afghanistan with the Navy Reserves in 2013, told the *Bangor Daily News* LePage had taken “a very aggressive legal position” on the latest vetoes that “may be a bridge too far for the courts.”

The courts may soon be considering charges against LePage himself over the strong-arm tactics he used to force Good Will-Hinckley—a school for troubled teens—to recently abandon the hiring of House Speaker Mark Eves as their new director. Eves, a family therapist by training, said the governor threatened to pull \$530,000 in state funding, an accusation LePage has not denied. Eves says he is planning to file a federal civil rights lawsuit, even as the legislature's bipartisan watchdog committee unanimously voted to investigate. LePage, unbowed, has claimed his actions are somehow protected by the First Amendment and that the legislature's investigative agency—which has subpoena power—lacks the authority to

scrutinize his actions. As for the 70 new laws LePage meant to veto, the governor has said he won't enforce them unless compelled to by Maine's highest court, a threat that if carried out would throw state government into disarray.

Democrats are predictably apoplectic, with state party Chair Phil Bartlett pronouncing LePage "unfit to govern." State Rep. Pinny Beebe-Center, one of six lawmakers trying to start impeachment proceedings, called the governor's actions "lower than low." "We're the laughingstock of the country," she says. "He has made a mockery of Maine for too long," House Majority Leader Jeff McCabe said last week. "As lawmakers, we must put an end to this outrageousness."

Progressive political activist Ben Chin has worried aloud that the state no longer had a functional executive: "If there was to be a natural disaster or something like that, it's impossible for me to imagine our governor in the current state that he's in, for whatever reason, actually being able to effectively manage that."

(The governor's office didn't respond to POLITICO's request for an interview.)

What will happen next is anyone's guess, but it's hard not to conclude that at a minimum the governor has squandered the political capital he came away with in November's election. "I really think he's missed a real opportunity to get things done in a cooperative way," says Katz, the moderate Republican state senator. "I worry the well is so poisoned that it's gong to be difficult to get back to cooperation even if he chooses to do so."

Lucas will be back in town those two days. We will be doing delegation meetings but it seemed to me it might be a good idea to sit back down with you and perhaps loop a few other people in as you see fit. Right now we are open those two days.

Thanks!

Our View: National park plan merits delegation's backing

www.pressherald.com

By The Editorial Board

Members of Maine's congressional delegation will be watching closely later this month as residents of the Katahdin-area towns of East Millinocket and Medway vote on their support for a proposed north woods national park and recreation area.

And the delegation should be paying attention. The proposed Katahdin Woods and Waters National Park would take advantage of the Katahdin area's significant natural assets, packaging them in a way that has proven successful at other national parks, with little to no downside, even if it doesn't completely live up to its promise.

Deasey Mountain offers one of the best vantage points for seeing Mount Katahdin from the proposed Katahdin Woods and Waters National Recreation Area. Creating the recreation area and an adjacent proposed national park – an idea once roundly rejected by area residents – is drawing increasing support in the region. 2014 Press Herald file photo/Gregory Rec

Search photos available for purchase: [Photo Store](#) →

However, statements on the park issue from Sens. Angus King, an independent, and Susan Collins, a Republican – and, more recently, from 2nd District Republican Rep. Bruce Poliquin – have followed nimbly the public sentiment in the Katahdin region. For years, the park proposal was dead on arrival to residents who saw papermaking as the area's once and future savior, and the delegation followed suit. Now that the region's view on the park proposal is softening, Maine's representatives in Washington appear to be opening to the idea.

THE POLL

But it shouldn't only be the Katahdin region that they are listening to. A north woods national park would affect and benefit a much wider swath of the state, from Dover-Foxcroft and Bangor, up through Lincoln and Patten, and on to Presque Isle.

And within that large, mostly rural area, the proposal is very popular. Elliotsville Plantation Inc., the group behind the park proposal, released a poll June 2 showing 67 percent of the voters in the 2nd Congressional District in favor, with just 25 percent opposed.

The poll, conducted by a respected pollster who also works for Collins, showed broad support for the park among almost all demographic groups and party affiliations.

The only people surveyed who were against the park were those who self-identified as "very conservative," and even then, the split was within the poll's margin of error.

That support shows most residents see the proposal for what it is – a potential boon to the area.

THE PROPOSAL

The proposal now calls for a 75,000-acre national park between Baxter State Park and the East Branch of the Penobscot River. On the other side of the river, there would be a 75,000-acre recreation area.

The park would be open to fishing, hiking and paddling while the recreation area would allow snowmobiling and hunting, too.

The 150,000-acre boundary would be drawn in the legislation establishing the park. Elliotsville Plantation – the creation of the family of Burt's Bees founder Roxanne Quimby and now run by her son, Lucas St. Clair – would donate 100,000 acres. The rest would be purchased only as landowners become willing to sell. No land would be taken through eminent domain.

The park would be funded in part by a \$40 million endowment, which, along with gate fees, would pay more than half of the park's annual operating budget.

That's the plan as presented by Elliotsville Plantation. But there is also room for local input if and when the planning process moves forward.

THE PURPOSE

A park would create 450 to 1,000 jobs, according to a study funded by Elliotsville Plantation and reviewed by four of Maine's top economists.

It would be another major draw for Maine's tourism industry, bringing more people up the I-95 corridor, a fact not lost on the Bangor City Council, which supports the park.

It would provide a companion to Acadia National Park and its 2.5 million annual visitors, just two hours away, as well as to Baxter next door. The proposed new park is a much different landscape than Acadia – think mountains and moose instead of lighthouses and lobsters – and a more accessible experience than the wild backwoods of Baxter.

And with the significant marketing of the National Park Service behind the park, millions more people would hear about this underappreciated area.

THE OPPONENTS

Finally, the proposed new park would have no impact on the industries that have traditionally supported the area: papermaking and forestry.

Those industries have declined because of forces far beyond Maine. They may return, in numbers far smaller than before, or they may not. But that's got nothing to do with what happens in the area of the proposed park, which if harvested for timber would only support up to 21 jobs and make up less than 1 percent of Maine's timber haul.

Sure, a park wouldn't fully replace the jobs that have been lost. But that's not the choice here.

The choice is whether to accept a plan with a level of investment that would be the envy of mill towns throughout Maine, and would take full advantage of the Katahdin region's natural resources, or to continue along a path that has led to high unemployment and empty storefronts.

Much of central and northern Maine have made their decision. Residents of the Katahdin region are coming around – the plan has been endorsed by Medway selectmen as well the local chamber of commerce and Rotary club.

Maine's congressional delegation should get on board, too.

So I was reminded of our conversation when I was listening to Senator King at the just concluded NP subcommittee hearing. He offered kudos for the "Passports To Your National Parks" app. Basically said it would be better if it included option of buying passes but he was offering a compliment. As I say this reminded me of opinion I was sharing on the positive view he would have of other things NP is doing on the tech/millennial attraction front that could be covered in a letter. His disappointment in the current inability to charge forward with app/online passes will be mitigated if he more fully understands the other cools stuff NPS is doing in association with the centennial etc.

His tone in general in the hearing in my opinion was very positive and cooperative. He hit on Roosevelt-Campabello – he is quite on fixated on that budget coming straight to Congress. He also hit on the Acadia concessions thing but in a very constructive sort of way, talking about the a current concessionaire's ability to get some points for past performance.

FOR IMMEDIATE RELEASE
 June 2, 2015

Poll: Overwhelming Support for National Park and Recreation Area

BANGOR – A poll released today shows that a proposal to create a new national park and national recreation area in Maine is overwhelmingly popular.

The poll of Maine's 2nd Congressional District, where the national park and recreation area would be located, found that 67 percent of voters across the district approve of the proposal, while just 25 percent oppose.

"The park and recreation area would create between 450-1,000 jobs, permanently protect access for outdoor recreation such as snowmobiling and hunting, and include a \$40 million endowment to offset costs," said Lucas St. Clair, the president of Elliottsville Plantation Inc., the foundation that has proposed creating the park and recreation area. "We have been working for more than three years to build support for the national park and national recreation area. After thousands of conversations, we have a proposal that incorporates the best ideas from stakeholders in the region."

The poll of 500 likely voters was conducted by Moore Information and pollster Hans Kaiser. Kaiser has extensive experience polling in Maine and his clients include U.S. Senator Susan Collins, the National Republican Senatorial Committee and the National Republican Congressional Committee.

The poll, which included both landline and cell phone interviews, was conducted May 13-14. It has a margin of error of 4 percent with a 95 percent confidence level.

"The park and recreation area gets wide majority support among a wide cross section of respondents, including Republicans (57 percent support), Democrats (77 percent support) and Independents (68 percent support)," Kaiser wrote in a memo about the poll. "Men and women, voters of all ages,

conservatives, moderates and liberals are all supportive of the proposal with large majorities in each group favoring it."

For more information or to receive a copy of the polling memo from Moore Information, email David Farmer at davidwfarmemaine@gmail.com

For more information about the proposal to create a new national park and national recreation area in Maine, visit: www.Katahdinwoods.org.

would make it easier for people to buy tickets and greatly increase revenue for national parks.

They say it's time to move the park system "into this new century."

Nikki it was great to meet you last night. I'm glad you and Lucas got a chance to talk. He'll be back in town in a couple of weeks. Let me know if you'd like us to come in and give you a more thorough fill on where we are with this endeavor. We've come a loooong way but still have some big hills to climb.

Best,
George

Perfect. I have you down for 3:00-3:00 on Tuesday. I have included details below about getting into Interior and room number but please let me know if you have any questions.

Hope you are enjoying this beautiful day!

best,
Katie

DOI is located at 1849 C Street NW (you can enter on either C or E between 18th and 19th- we are on the E street side of the building) and the meeting will be in room 6614. Please allow 5-10 minutes to get through security and have them call me at 202-208-5403 or my cell which is 202-304-6730. Security will then send you up to the 6th floor for the meeting. Upon arrival, they will ask to see an ID (license is fine).

Hi Sarah,

Attached are Questions for the Record submitted to Secretary Jewell by various Energy Committee Members regarding the hearing which was held on February 25, 2015 entitled "The FY 2016 Budget Request for the Department of the Interior." We request that Secretary Jewell provide her responses to these questions by **Tuesday, March 24, 2015** for inclusion in the official hearing record.

Please provide the responses directly to me, and feel free to contact me if you have any questions.

Sincerely,

Darla Ripchensky, PMP

Administrative Director

Fax - (202) 208-5533

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Shelley Moore Capito

Witness Name: Secretary Jewell

Question 1: The office of Surface Mining (OSM) has spent more than \$8 million over the past several years to develop a rule to replace the 2008 stream buffer zone rule. OSM recently repealed the 2008 rule and reinstated the rules that were in place before 2008. You previously committed to taking a fresh look to decide whether any new rulemaking was necessary. In light of these developments, is there any need for spending more tax-payer money on a new rulemaking?

Question 2: The earlier stream buffer zone rule development included several cooperating primacy states, including West Virginia, as part of the NEPA process. Has this arrangement continued? If so, when was the last time OSM communicated with those cooperating state agencies on the status of any further rule development?

Question 3: I want to ask about habitat conservation, and in particular that related to the Northern Long-eared bat, which is a huge issue in my home state. It appears that the assumptions made by BLM and FWS about drilling impacts in connection with the Northern Long-eared do not take into consideration recent technologies developed and in use by the oil and gas industry. In fact, the majority of studies on oil and gas industry impacts are based upon assumptions of well density and drilling footprints that are decades old. Shouldn't the conservation and management strategies of FWS and BLM incorporate information from engineers and other industry specialists who develop and implement technological innovations that improve the efficiency of oil and gas operations and reduce their environmental impacts? Also, why don't BLM-FWS Assumptions on Effects of Oil and Gas Development take into account new technologies and smaller drilling footprints?

Question 4: On July 17, 2014, the US Fish and Wildlife Service announced that it was banning the use of neonicotinoids on USFWS lands. What other federal agencies did the USFW consult before making this decision?

Question 5: What input, if any, did USFWS receive from these agencies?

Question 6: Were any NGO organizations consulted or have input into this decision?

Question 7: Why was this decision not published in the Federal Register for public comment?

Question 8: Are agricultural operations on USFWS lands reviewed as a part of each refuge management plan where such operations occur?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Question 9: Why was this action not undertaken as a part of refuge management planning process?

Question 10: Was an economic analysis conducted before this decision was made? If so, please provide a copy. If not, why not?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator James Risch

Witness Name: Secretary Jewell (and Michael Connor)

There are several Idaho federal water storage project feasibility studies that were authorized under BOR (e.g., Snake River systems including; Boise River Project – Lucky Peak, Arrowrock, Anderson, and Deer Flat; Upper Snake River: Teton, Idaho site reservoirs, Deer Flat,).

Question 1: What is the feasibility study status of the BOR Idaho water project studies?

Question 2: What possible actions does BOR consider pursuing on the Snake River system via the outcome of the feasibility studies?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Barrasso

Witness Name: Secretary Jewell

Question 1: During the hearing, I asked you whether BLM's final rule on hydraulic fracturing would allow states to apply for a variance. In response, you stated that BLM's "proposed regulations say that if a state's rule is stronger than the proposed federal rule, that the state's rule will govern." Will BLM allow states (not operators) to apply for a variance from BLM's final hydraulic fracturing rule? If so, under what circumstances will a state be able to obtain a variance from BLM's final rule?

Question 2: During the hearing, we discussed your letter to Governor Matt Mead dated January 26, 2015. In the letter, you state that: "The rider attached to H.R. 83... does not affect the U.S. Fish and Wildlife Service's...court-ordered obligation to make a determination by September 30, 2015, as to whether the greater sage-grouse does or does not warrant protection under the Endangered Species Act." I specifically asked you whether such a "determination" would be legally binding. You stated that you "would have to defer to the solicitors." Please clarify for the Committee whether such a "determination" would be legally binding if the rider remains in effect.

Question 3: I understand there are significant delays in obtaining sundry notices and rights-of-way for natural gas gathering lines on Federal land from BLM. However, in response to one of my questions on this matter, you said that you are "not aware of circumstances where permits have been slowed down by the BLM."

A. What is the total number of requests for sundry notices and rights-of-way for natural gas gathering lines pending at the Bureau of Land Management?

B. What is the total number of requests for sundry notices and rights-of-way for natural gas gathering lines pending at each BLM Field Office?

C. When were each of the pending requests for sundry notices and rights-of-way for natural gas gathering lines first submitted to BLM?

Question 4: On February 20, 2015, the Office of Surface Mining Reclamation and Enforcement (OSM) published a notice in the *Federal Register* to pursue a rulemaking to revise regulations under the Surface Mining Control and Reclamation Act on the use of explosives on surface coal mining operations. A. Does OSM plan to consult with the state regulatory authorities prior to initiating this rulemaking? B. If so, when will this consultation take place and which states will it involve?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of Interior

QUESTIONS FROM SENATOR JEFF FLAKE

Witness Name: Secretary Jewell

Question 1. In the Department's wildfire budget justification, the anticipated cost of wildfire suppression based on the average of the previous 10 years is \$384 million. The Department's anticipated 'worst case' scenario cost, based on a Forest Service mathematical model is \$467 million. The Department claims that the 'on budget' funding is sufficient to fight the predictable 99% of the fires which account for 70% of the costs. But, the Department has only requested enough funds to cover 70% of the *predictable* costs, not the *worst case* costs - meaning that the plan going into the year is to have insufficient funds to fight the fires that are predicted to happen. Why doesn't the department request 'on-budget' discretionary amounts sufficient to cover at least 70% of the worst case scenario?

Question 2. The maintenance cost for the National Park System continues to rise. This year the Department is requesting a 94% increase in deferred maintenance funding and a 67% increase for regularly scheduled maintenance. Together the costs of just maintaining the current park system are over \$308 million. Yet, even with this ever-increasing cost, the Department is proposing to more than triple the amount spent on Federal land acquisitions in FY16 to \$447 million. What impact will the proposed additional land acquisition have on the continually increasing maintenance bill of the National Park System?

Question 3. Last year the Federal government, as a landowner of nearly half the land area in the Western US, met its obligations to counties and local governments by appropriating money out of discretionary funds to make Payment in Lieu of Taxes (PILT) payments. The Department is requesting no discretionary funds for PILT in FY16, relying instead on Congress to use mandatory spending to fund PILT. How does the Department intend to offset the cost of the proposed mandatory spending increase?

Question 4. The recently-passed water rights settlement on the Bill Williams River, Arizona is contingent on the completion of several actions, including approvals by the Lower Colorado River Multi-Species Conservation Plan Steering Committee. What is the Department doing to facilitate the final implementation of the settlement?

Question 5. In July 2014, the Bureau of Reclamation partnered with municipal water providers in Arizona, California, Colorado, and Nevada to create the Colorado River System Conservation Program. How much funding does this program currently have? How many projects has it funded? How much water has been conserved? What has been the effect on reservoir levels? What additional steps will the Department take in FY16 with this program?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of Interior

Question 6. The Department has requested \$244 million for Indian water rights settlements and negotiation. Which new Indian water rights settlements are being prioritized by the department? What will the additional \$16.9 million for negotiation and legal support allow the department to do? What is being done to increase the pace of settling outstanding claims?

Question 7. The Fish and Wildlife Service (FWS) published the final EIS and draft Record of Decision on the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf on November 25, 2014. The final EIS differed significantly from the draft EIS published in July 2014, due in large part to extensive negotiations between the FWS and the Arizona Game and Fish Commission. Senator McCain and I sent a letter to Director Ashe on December 21, 2014 requesting an extension of the public comment deadline to allow stakeholders, including the Arizona Game and Fish Commission, time to analyze the significantly changed proposed regulations. In this letter we specifically identified provisions in the consent decree that allow a modification of the deadline upon showing good cause, consistent with the Federal Rules of Civil Procedure. Did the FWS approach the Department of Justice about seeking an extension of the public comment deadline? What was the Department of Justice's reason for not seeking an extension?

Question 8. There is a proposal for the President to bypass Congress and designate over 1.7 million acres of land in northern Arizona as the Grand Canyon Watershed National Monument. This would lock up not only Federal land, but over 60,000 acres of State Trust land and nearly 30,000 acres of private land. Such a designation would have a devastating effect on the economic productivity of State trust land which is managed primarily to benefit Arizona public schools. It would have a similarly chilling effect on the economic productivity on private land and existing mining operations. The creation of this monument has been strongly opposed by the State of Arizona. Would any of the Department's proposed funding be used to pursue the designation of a National Monument in Arizona?

Question 9. In order to get the most value for every dollar spent on managing National Parks, the Park Service is required to seek competing bids for private companies to run concessions within the National Parks. In instances where a concessionaire has held the contract for extended periods the leasehold surrender interest (LSI) that must be paid to the outgoing concessionaire when a contract changes hands can become a significant barrier to the competitive bidding process. What actions is the Department pursuing to ensure a true competition for park concessions while still respecting the investment made by private companies in their business?

Question 10. Arizona counties and municipalities have tried to work with the BLM to authorize third-party concessionaires to operate on Recreation and Public Purposes Act (RPPA) parcels. The BLM in Arizona will not permit local governments to allow

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of Interior

a third-party concessionaire on the exact same land that the BLM could itself allow a concessionaire to operate if the BLM still controlled the land. During Director Kornze's nomination hearing in December 2013, I asked specifically about the status of the Solicitor's Office evaluation of the August 2011 Instructional Memorandum for Third Party Uses on Recreation and Public Purposes Acts Patents and Leases (2011-162), and when Arizona local governments could expect a decision about the ability to enter into agreements with third-party concessionaires. In the written responses, Director Kornze did not provide an update on the Solicitor's evaluation or an expected timeline for the local governments. What is the status of the Solicitor's office evaluation of the above memorandum, and when does the office expect to make a decision regarding third-party concessionaries to operate on RPPA lands?

Question 11. In a December 5, 2014 report, the Congressional Research Service identified several potential technical discrepancies in how some Federal payments to counties are treated in the calculation of Payments in Lieu of Taxes (PILT) payments. The report specifies that payments made under the Bankhead-Jones Farm Tenant Act by the BLM require a reduction in the following year's PILT payments, but payments for similar lands administered by the Forest Service do not require a reduction. Additionally, the report claims that payments under the Secure Rural Schools (SRS) program require an offset in the following year's PILT levels for payments from the Forest Service but not payments from the BLM. As the agency responsible for making annual PILT payments, does the Department treat SRS payments by the Forest Service and the BLM differently when computing PILT payments? Similarly, does the Department treat payments made under the Bankhead-Jones Act by the Forest Service and BLM differently for purposes of PILT payments?

Question 12. Your testimony includes several references to encouraging individuals to serve, work, and volunteer on public lands. Some have suggested that questions of legal liability act as a disincentive for federal agencies to work with volunteers. Has the Department identified any such impediments to promoting volunteer work on public lands? If so, does the Department have suggestions on how to remove these barriers?

Question 13. The trans-canyon pipeline that supplies water to Grand Canyon National Park has incurred repeated maintenance issues over the last thirty plus years. Most recently, we witnessed two separate closures of Phantom Ranch as crews sought to address pipeline breaks, and a section of the pipeline is undergoing repairs until July of this year. According to some estimates, the cost to replace the entire pipeline would fall between \$100 million and \$150 million with additional operations and maintenance charges. Does the Park Service have updated estimates regarding the cost to repair the trans-canyon pipeline?

Question 14. I understand that the Park Service is evaluating potential solutions to the water pipeline challenges at the Grand Canyon National Park by developing a

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of Interior

water-delivery study. Please describe the alternatives being considered and the costs associated with each option. When do you expect to complete the final study?

Question 15. In evaluating potential water-delivery options, has anyone from the Park Service considered regional water-supply solutions? If so, who has the Park Service met with, and what options are being considered?

Question 16. Is there an opportunity for the Park Service to achieve cost savings by pursuing a regional water-supply solution, as opposed to solely looking at replacement of the trans-canyon pipeline?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Al Franken

Witness Name: Secretary Jewell

Question 1: As you know, a recent court decision reversed the Fish and Wildlife Service's determination to delist the gray wolf from the Endangered Species Act. Right now, farmers and ranchers in Minnesota are concerned about losing their livestock to wolf attacks, and they really need federal funds that can help to protect their herds. For example, the Wolf Livestock Loss Demonstration Program provides funding to livestock producers so they can employ strategies to help prevent wolf attacks from occurring in the first place. Can you tell me why the Fish and Wildlife Service has proposed to discontinue funding for this program in FY 2016?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Martin Heinrich

Witness Name: Secretary Jewell

Question 1: In December, Congress passed the Manhattan Project National Historical Park Act, which directs the National Park Service to establish the Manhattan Project National Historical Park in three states within one year of enactment. Do you expect to be able to meet that deadline?

Question 2: When and how does the National Park Service plan to involve local communities in the park planning process for the Manhattan Project National Historic Park?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of Interior

Questions from Senator Mazie K. Hirono

Witness Name: Secretary Jewell

Question 1: National Monuments

Madam Secretary, I would like to thank the Administration for taking action to protect and preserve lands across our nation, the recent executive action for Honouliuli in Hawaii is a good example. It is a sobering, yet important piece of our nation's history that will serve to educate future generations. In 2009, when I was a member of the House of Representatives I worked with Senators Inouye and Akaka to authorize a special resource study on World War II internment camp sites in Hawaii. Now that the President has designated Honouliuli as a national monument to be managed by the National Park Service, an agency well-seasoned and experienced with management of national monuments across our country. I want to see Honouliuli and other sites recently designated get off to a strong start.

This designation has been a collaborative, inclusive effort—between the local community, Hawaii's Congressional delegation, and other public and private stakeholders. Can you give me a sense of what the path will be to move Honouliuli forward in FY 2016 and beyond?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Mike Lee

Witness Name: Secretary Jewell

Antiquities Act

1. Secretary Jewell, during your confirmation hearing, I asked if you would seek the input of local stakeholders regarding national monument designations. You confirmed you would do this. However on October 31, 2013, you said, “if Congress doesn’t step up to act to protect some of these important places that have been identified by communities and people throughout the country, then the president will take action ... there’s not question that if Congress doesn’t act, we will.” One would think that the elected representatives of the people would be a group of stakeholders whose buy in and support should necessary in designating monuments. Has your opinion changed from the answer you gave me your confirmation hearing?

Transcript, Sally Jewell Confirmation Hearing, March 21, 2013

Senator Lee: *The monument designation question is important because, as you were discussing that with Senator Heinrich, I appreciated your commitment to work with local stakeholders whenever they are dealing with something like monument designation. We had about 2 million acres designated as a monument a few years ago in my state, and it was not only not done without extensive consultation, input, and buy-in of local officials and residents, it was done completely by surprise. It was brought upon us completely by stealth. It was announced from a neighboring state, and we would have like to have had input. So, I would really appreciate if you would commit to me that you would advise the president that it is best to work with locals affected by broad decisions like that in advance of making such a decision.*

Secretary Jewell: *That is certainly consistent with what I believe in and with what the White House believes in as well.*

2. The President added four new national monuments in 2014. Regarding your commitment to an open process with local consultation, were these communities given proper notice before these monuments were designated? Did you change anything about the designation area or timing in relation to the concerns of the impacted community or state?
Last four monuments listed:
3. The Antiquities Act also states that the President is to reserve “the smallest area compatible with the proper care and management of the objects to be protected.” However, of the 11 monuments President Obama has designated so far, just the last three monuments constituted

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

over 250 million acres of new federal property. Would you consider these areas to be the smallest areas available?

Endangered Species Act

1. As you know, the agency recently put out a rule related to adverse modification – “Definition of Destruction or Adverse Modification of Critical Habitat.” Can you please provide me the statutory authority for this rule?
2. How much does the Department spend on ESA litigation? If attorney’s fees were capped, is it possible that money could instead be used for species recovery?
3. In a hearing before the House Natural Resources Committee on April 3, 2014, you stated that the Department publishes the underlying data for potential ESA listings. However, my staff has experienced many examples where the data used in listings is simply not available because the Department has, in fact, *not* made it available – for example, the underlying data for the listing of the Gunnison sage grouse was not released. Why does the Department publish scientific findings for some listings, but not for others? Can you commit to making available to the public all underlying data for all potential listings?
4. How do you ensure that state and local entities are able to stay informed and participate in the listing determination process? On average, how many meetings does your Department have with state and local officials during the listing process?

National Park Service

1. What is the current maintenance backlog for the National Park Service? What is the proportion of the Service’s budget that is spent on administrative overhead versus park maintenance?
2. How does the Department intend to prioritize its funding to address this backlog? Is it your opinion that we should consider a moratorium on the addition of National Park land until the NPS addresses the backlog in its current portfolio?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Joe Manchin III

Witness Name: Secretary Jewell

Question 1: Secretary Jewell, I am very interested in some of the AML proposals in the Interior budget. As you know, I am very supportive of funding the UMWA's pension plan. Our miners have mined the coal that powered our nation and we need to ensure they continue to receive their hard earned benefits.

I am also interested in the proposal to use AML money for coalfield communities in Appalachia, like those in my home state of West Virginia. As you're aware, this program would require a legislative solution.

In your view, what would this legislative solution look like and can I get your commitment to work with me and other members from the region to ensure this money reaches the communities who need it the most?

Question 2: OSM's budget justification document notes that States and Tribes directly regulate 97 percent of the Nation's coal production under approved regulatory programs. The agency's budget also notes the reduced workload anticipated by OSM.

With the states responsible for most of the regulatory work why does OSM ask for \$5.5 million more for itself while cutting the states grants by more than \$3 million? What is OSM planning to use the extra \$5.5 million for?

Question 3: As you know, I have serious concerns about the potential OSM Stream Buffer Zone rule. The original intent of this rulemaking was in response to the 2008 rule promulgated under the Bush Administration. Why is OSM moving forward with this process when the 2008 rule was vacated?

Question 4: In 2013, the Director of Mining and Reclamation at West Virginia's Department of Environmental Protection testified in the House about their experience as a cooperating agency during the Stream Protection Measures Rulemaking process. Under this agreement, OSM should be coordinating with West Virginia and the other cooperating state agencies.

Instead, OSM denied the agencies the opportunity to review the first chapter of the Environmental Impact Study and provided them only a few days to review and comment on hundreds of pages of the following chapters.

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

After this, according to the West Virginia DEP, OSM “shifted to a nearly complete blackout on information about the development of the Stream Protection Measures Rule.”

Yesterday, 11 states, including West Virginia sent a letter to OSM stating that several of the states are “seriously contemplating withdrawing from the EIS development” due to a continued lack of cooperation from OSM.

Can you explain this?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Lisa Murkowski

Witness Name: Secretary Jewell

Question 1: Please provide a record of the authorities on which the Department relied for the development of the Comprehensive Conservation Plan (CCP) and accompanying Environmental Impact Statement for the Arctic National Wildlife Refuge (EIS), including, the approval for and authorization of funds expended by year, including Congressional authorization or appropriation, for the development of the CCP and EIS.

Question 2: Please provide a detailed current plan, calendar and itemized budget for the development and implementation of the Step-Down Plans identified in the CCP and EIS.

Question 3: Please a comprehensive list of the dates and times of any meeting, call or other interaction held by the Department of the Interior (DOI) or any of its component parts including the United States Fish and Wildlife Service (USFWS) or contractor operating on behalf of DOI, with any entity not considered a cooperative agency, including any corporation or non-governmental organization.

Question 4: Please identify in a log any legal or policy analysis provided to or given by DOI or USFWS related to sections 1002, 1003 or 1326 of ANILCA as it might apply to the CPP or EIS.

Question 5: Please provide a comprehensive list of programs or initiatives within DOI in support of the US Chairmanship of the Arctic Council and in fulfillment of Executive Order Enhancing Coordination of National Efforts in the Arctic. Please include in the list a identification of the funds expended or to be expended for any and all programs or initiatives on the list.

Question 6: with respect to the issue of climate change, please provide a comprehensive list of DOI programs or initiatives dedicated to adaptation or promoting resilience in communities in response to a changing climate and the funds associated with these initiatives or programs.

Question 7: Please provide an itemization of any funds expended since January 1, 2012 related to international travel costs for DOI personnel in support for arctic initiatives, studies, programs or workshops.

Question 8: Please provide an estimate of any funds expended since January 1, 2012 related to Alaska specific travel costs for DOI personnel in support for arctic initiatives, studies, programs or workshops.

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Question 9: In the 2016 Budget Justification, the Bureau of Land Management (BLM) notes: “*Since 2009, the BLM has approved 52 renewable energy projects, including 29 utility-scale solar facilities, 11 wind farms, and 12 geothermal plants, with associated transmission corridors and infrastructure to connect with established power grids. If fully constructed, these projects will provide more than 14,000 megawatts of power, or enough electricity to power about 4.8 million homes, and provide over 20,000 construction and operations jobs.*” (p. I-3) Please provide a detailed timeline for each of these identified projects including (1) date on which BLM received an initial application for approval (2) date on which a ROD was issued (3) description of the project – including estimated capital costs as well as construction and operating jobs and (4) estimated cost of mitigation measures required by BLM.

Question 10: Please provide an equivalent description of the number of new oil and gas units or developments approved by BLM since 2009.

Question 11: In the 2016 Budget Justification, BLM notes that since 2000, BLM has permitted nearly 47,000 new wells – please provide the number of permitted new wells since 2009.

Question 12: Please provide the number of permitted new wells since 2009 that have been drilled.

Question 13: Please provide estimates of revenues from NPRA production provided to Congress, the White House or other similar governmental institution issued prior to, or associated with, the passage of the Energy Policy Act of 2005.

Question 14: Please provide an accounting of revenues received from production in the National Petroleum Reserve Alaska since passage of the Energy Policy Act of 2005.

Question 15: In its *Report to Congress June 2006* related to Sec. 207 of the Alaska Land Transfer Acceleration Act, BLM identified roughly 56,870,900 acres of BLM-managed lands that are withdrawn by “d-1 PLOs” and made recommendations – primarily that those d-1 withdrawals could be lifted. With next year being ten years since that report was issued I feel compelled to ask if anything has happened.

Question 16: Please provide an update on where the Department stands in settling with the state on the proper process to complete patenting of the state’s lands. The Alaska Statehood Act set up a very specific process for federal surveying to complete the patented transfer of lands. To reduce its costs, the department has proposed a new surveying process, taking advantage of GPS coordinates. But apparently there is now a difference of opinion between the State of Alaska and your Department over the process

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

to be used. Please describe that disagreement and how the department plans to resolve the issue?

Question 17: Relating to the U.S. Geological Survey budget, the USGS is a major source of grant funding for a series of seismic monitors on volcanoes in Alaska, largely on the Alaska Peninsula and the Aleutian Chain, near the air corridor for flights to America from Asia. The grants help fund the work of the Alaska Volcano Observatory, a joint entity between USGS and the University of Alaska. Ash from eruptions is particularly dangerous to such flights as shown by the near crash of a jumbo jet years ago.

- A) The problem is many of the seismic monitors need not just upgrading to digital technology, but antenna and battery replacements since the stations are rapidly going off line.
- B) I believe this is causing a real health and safety issue not just for Alaskans, but international passengers on trans-Pacific flights. While Congress added money to your budget this year to help with the maintenance costs on the network, your FY 16 budget seems to propose only a slight increase for hazards funding, even while your overall budget calls for a \$759.2 million increase – 6% above FY 15. That is disappointing since estimates are that it will require an additional \$5 to \$7 million a year for perhaps five years just to keep the Alaska seismic network functioning, much less to meet the entire U.S.G.S. earthquake monitoring budget needs.
- C) Why is there not more money in your spending plan devoted to basic health and safety needs?

Question 18: The State of Alaska a number of years ago requested that it receive the conveyance of several thousand acres along the Susitna River in Southcentral Alaska as part of its statehood conveyance. In 2013 my staff had been assured by Department personnel that the transfer would be completed, since none of the land is in conservation system units. But apparently the transfer is still pending. What is the hold up and when will the transfer of the acreage be completed to the State of Alaska?

Question 19: We have spoken often about the need for the Department to speed up the cleanup of 136 abandoned oil and gas exploration wells in northern Alaska, wells drilled by the government in both the 1940s and late 1980s and early 1990s. You had about \$2 million in your budget last year for such cleanups. Fortunately in the Helium bill in 2013 we were able to increase your cleanup funding by \$50 million so that the Department will be able to tackle the worst of the wells in coming years and gain efficiencies by being

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

able to reduce mobilization costs and improve coordination of the cleanup efforts. But that \$50 million will not solve all of the problems.

- A) My question is this: when will the Department change its priorities and increase its regular budgetary funding to tackle environmental cleanups of abandoned federal wells on an annual basis?
- B) Abandoned well cleanup truly is a federal responsibility. How will you assure me that we aren't back in the same position in four or five years of having insufficient funding to clean up environmental well problems on federal lands?

Question 20: Recently I have received a number of complaints from placer miners in the eastern Interior part of Alaska about Department policies involving the current and future regulation of placer mining. There are concerns about the draft Eastern Interior Resource Management Plan and its apparent designation of about 700,000 acres of the FortyMile River mining district as "areas of critical environmental concern" where the Department is considering closing the area to mining. Significantly, as I understand it, this land was specifically kept open to mining by Congress in 1980's Alaska National Interest Lands Conservation Act when it was not included in the Yukon-Charley National Preserve. There are also a host of concerns about new regulations for mining efforts in still open areas, concerning about reclamation cost estimates, reclamation standards, new bonding processes and the turnover in our compliance staff that makes consistency in mining enforcement difficult at best.

- Recognizing that the issue of mining on the FortyMile is complicated, please tell me the reason for all of these changes in mining practice now in Interior Alaska, when mining had been working seemingly fine based on the 1983 management plan crafted just after passage of ANILCA?

Question 21: Just recently I learned that your Department has decided to implement a new southern boundary of the wilderness area inside Denali National Park and Preserve. Apparently 35 years ago when the Alaska lands act passed, no one noticed that the world is round and that map boundaries might need to be adjusted for the curvature of the earth. The problem appears to be that now the Department wants to add up to fifth-eighth of a mile to the wilderness area south of Denali. That might not seem like much, but it could have significant impacts. For example, there are potential impacts on:

- Hundreds of commercial air taxi and scenic flights to see the mountain.
- Potential for impact climbers getting to base camp to climb Denali.
- Snowmachine recreation efforts in the eastern sections of the park, and caribou and moose hunting for both subsistence and sport hunters in the Cantwell area.

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Apparently the boundary change will add about 23,500 acres to the wilderness area in the park. But Alaska lands act (Sect. 103c) specifically limits “minor boundary adjustments” to just 23,000 acres.

- Will the Department work with us, either administratively or if a legislative fix is required, to make sure that this boundary expansion does not impact tourism and recreational hunting interests in Southcentral Alaska?

At a time when Department policy changes are having such a huge impact on future oil and gas and mineral development, this change that could impact another major leg of the state’s economy – tourism – may be exceptionally hard for Alaskans to accept, especially 35 years after ANILCA’s passage and after business and lifestyles have adapted to the changes generated by passage of the lands act.

Question 22: In late 2013 it became clear that the Cook Inlet Region Inc. (CIRI) Alaska Native Regional Corp. was coming up short by 42,000 acres of the land conveyance it was promised as a result of the Alaska Native Claims Settlement Act of 1971. The shortage was the result of the complex settlement of land conveyances to CIRI village corporations that had been complicated by the 1976 Cook Inlet land exchange. For the past year the BLM in Alaska has acknowledged that CIRI is short of its required conveyance and apparently has been working to identify solutions. Please update us on where Interior is with crafting a solution to the CIRI land shortage, and how soon such a fix may be proposed by your Department?

Question 23: The Department has a legal responsibility to fulfill the government's obligations under the Alaska Native Claims Settlement Act (ANCSA). Under ANCSA, Alaska Native Corporation often had to select lands for conveyance that were outside their traditional aboriginal lands because those lands were already occupied by the Federal government, the Department of Defense, or various state and local governmental entities. Accordingly, land exchanges and selection of other lands was necessary to fulfill Alaska Native Corporation (ANC) entitlements under ANCSA.

Given that ANCs have been denied their traditional aboriginal lands and, out of convenience to the government, have selected other lands and are now trying to develop those lands, it’s troubling--but not surprising--that I often hear that your Department delays and impedes the issuances of permits to Alaska Natives who wish to develop their subsurface lands within the boundaries of a National Refuge.

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

- A) What are you going to do to make sure your department protects Alaskan Native Corporations' rights to the lands selected under ANCSA and that the agencies in your department expeditiously assist them in permitting, conveyance, and other dealings with your department?

Question 24: The U.S. Geological Survey recently released its Mineral Commodity Summaries report for 2015, and it shows that the United States is at least 50 percent reliant on foreign nations for at least 43 different commodities. The report also states, as it annually does, that "U.S. import reliance has increased significantly since 1978, the year that this information was first reported."

- A) Is our nation's foreign mineral dependence a matter of concern to you?
- B) What are you doing, at Interior, to help reduce and eliminate it?
- C) Do you believe the proposals in Interior's budget request – which would impose new taxes and fees on top of an already-slow permitting process – will somehow increase our nation's mineral security?
- D) It takes an average of 7 to 10 years (even absent significant litigation) to permit a new mine in the United States, which is considerably longer than other countries with similar environmental standards. Will you commit to reviewing the federal mine permitting process, and will you commit to identifying steps to make the process more efficient?

Question 25: The FY 2016 Land and Water Conservation Fund budget request is \$900 million: \$400 million in discretionary funding and \$500 million in permanent funding for DOI agencies and the Forest Service. In 2017 the President's budget request proposes that all \$900 million would be mandatory funding.

- A) Please explain to me why, with such an enormous maintenance backlog (According to CRS, over \$22 billion at the federal agencies combined, \$13 billion at NPS alone), DOI would propose to focus such a large amount of funding on acquiring more federal land?
- B) Shouldn't these funds be used to pay down the maintenance backlog to, at least, stem the growth of the backlog?
- C) More generally, how do you reconcile additional federal land acquisition at this time of staggering national debt and maintenance backlogs?

The budget proposal seeks to turn the LWCF program into a permanent mandatory program without making any changes to it. I don't support that. I am also concerned that this program has been overly focused on federal land acquisition. Part of the reason for that is the 60 percent set-aside for state-side grants was stripped from the LWCF Act.

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

These state-side grants are valuable tools to develop state parks and other outdoor recreation opportunities on non-federal land.

- D) Shouldn't a larger percentage of LWCF funds be set-aside for state-side grants?
Why or Why not?

Question 26: As many colleagues and I have emphasized many times, we have a nearly \$13 billion parks maintenance backlog. And with that staggering figure, there is a very strong argument that we should not be adding any new parks to the system until we can take care of what we already have. Alaskans are particularly concerned with the prospect of additions of new Parks with roughly 2/3 of the entire system located within my State.

- A) With the Parks Centennial upon us in 2016, it would seem that this could be a great time to reevaluate how we establish and maintain the Parks as well as how we build support for the Parks in their local communities, nationwide and even internationally. In a time of severe budget constraints, all options need to be on the table. One idea that I am particularly interested in is increasing private donations to the system through private endowments.
- B) Will you agree to work with me and the other members of this committee to review options and find a path forward to create a sustainable supplementary funding stream for America's Parks for the second century?

Question 27: I have some questions regarding the general approach of the National Park Service to rule making as well as some questions regarding a specific rule proposed by NPS.

- A) In the past, NPS has put into place regulations that shortened the hunting seasons as defined by the Alaska Board of Game. When instituting the closures, the NPS has cited "Park Values" in those closures.
- I. Please provide me with a definition of "Park Values"?
- II. Do you believe that the State of Alaska has the right to manage wildlife within the borders of the State? When is it proper for the federal government to reverse State Board of Game decisions?
- B) Recently, the National Park Service has proposed a rule (Regulation Identifier Number 1024-AE21) that would close a number of preserves in Alaska to the take of predators, such as bear and wolf.

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

- I. I am aware of several stakeholders who have contacted you regarding their concerns about the potential for this proposed regulation to unduly impact subsistence communities across Alaska. One of these stakeholders includes the Wrangell-St. Elias National Park Subsistence Resources Commission, an official Federal advisory committee created by the Alaska National Interest Lands Conservation Act (ANILCA) to make recommendations to you, the Secretary of the Interior, regarding fish and wildlife resources for subsistence dependent communities. I would like to hear from you how the Department proposes to avoid any undue impact on these communities, communities whose lives depend on the take of predators.
- II. The take of certain predators by Alaska Natives is done for cultural, economic, traditional, and spiritual needs. Can you describe to me how this proposed rule incorporates these significant considerations?

Question 28: Please describe the role of DOI in any additional discussions that have taken place with the State Department since the Regional Recommendation was finalized in December 2013. Who participated in these discussions? Does DOI defer to other agencies (i.e., the U.S. Entity) in discussions with the State Department regarding potential U.S. negotiating positions? Why or why not? If not, what are the major outstanding points of disagreement between DOI and other agencies?

Question 29: What is DOI's position on the "ecosystem-based function" principles and recommendations outlined in the Regional Recommendation? Please provide specific examples of the department's positions on these principles and recommendations?

Question 30: Total domestic oil production increased 15% from 2012 to 2013. Can you confirm that on federal lands, however, it only increased by 1% over the same period?

Question 31: While EIA is still assessing the 2014 data, according to its latest Monthly Energy Review, total U.S. field production averaged 16.3% higher in 2014 than in 2013. How much do you expect oil production on federal lands has increased over the past year?

Question 32: The Bureau of Land Management issued 3,769 drilling permits in FY 2014. This is one less than it approved in FY 2013, and 2,848 fewer than the 6,617 permits that were approved in FY 2008. Is it accurate to say that permits have fallen by 43% during this administration and that you are doing little if anything to correct this trend?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Question 33: Over the past decade, has federal natural gas production increased or decreased? What is the Department doing to reverse this trend?

Question 34: Given the nature of U.S. Geological Survey's core mission, many of us have requested that an economic geologist to be nominated to lead that agency. We did have a nominee in the last Congress, but she was not brought up for confirmation by the previous majority, and the agency has now gone without a confirmed director for two full years.

- A) Can you tell us when you anticipate the President will send this Committee a nominee to consider for USGS?
- B) Can you tell us whether the President is taking our request for an economic geologist seriously, as he searches for a new candidate?

Question 35: The Department of Interior is mandated to provide a subsistence priority on federal land, yet nearly every rural community in Alaska struggles to meet their subsistence needs because of low moose populations, low caribou populations – in some cases, and nearly non-existent king salmon populations.

- A) What is the Department's plan to ensure that adequate amounts of food can be put on the table?
- B) How do you reconcile a mandate to provide a subsistence priority with the competing mandates that creating wilderness, not managing for abundant and healthy wildlife populations, and limiting access by subsistence hunters fishers?
- C) Why is it difficult for your agency to manage predators to increase prey species to sustainable levels?

Question 36: In 2013, I wrote a letter to the Department asking what you could do to speed up the cleaning of environmental contamination on lands that you have transferred to Alaska Native Corporations to satisfy their aboriginal land claims under the 1971 Alaska Native Claims Settlement Act. Your Department studied the issue in 1998 and proposed a six-point effort to speed up the cleaning of such contamination. Last January in a letter to me you proposed that the Department would update its contaminated lands survey and then address the other five recommendations all involving how to tackle the actual cleanups. I had been led to believe that updated list would be finished in the fall – there were more than 650 sites on the old list—unfortunately, it was not completed.

- A) When will an updated, comprehensive list of contaminated sites on Native conveyed lands be finished? What will the Department propose to actually speed up and fund the cleanup of the contamination –all caused by the federal government prior to transfer of the land to Alaska Natives?
- B) Most recently, the Department's current spending authorization requires the Department to provide to Congress by June of this year a detailed report including the comprehensive inventory of contaminated land conveyed through ANSCA

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

including sites identified since the 1998 report and a detailed plan addressing how the Department intends to complete the cleanup of each contaminated site. What is the status of the effort to comply with this recent statutory directive?

Question 37: In the past Alaska Fire Service had two CL215s which carry about 1,400 gallons. There are plans to replace these with Fire Boss Single Engine Air Tanker (SEAT) aircraft.

- What is the cost per gallon dropped for the two aircraft?
- What is the cost difference between the CL215s vs the Fire Boss Single Engine Air Tanker (SEAT) in total budget cost to AFS?
- How effective do you expect the SEATs to be at Initial Attack?

Question 38: The BLM's FY16 budget request proposes to reduce funding for the Oregon and California Grant Lands program by \$6.043 million overall, with a \$3.8 million decrease in Other Forest Resources management and a \$3.2 million decrease in Western Oregon Resource Management Planning. The BLM Budget Justification also shows that the agency plans to offer less timber for sale in FY 16 (204 mmbf, down from 215 mmbf in FY15 and 239.8 mmbf in 2014)

- What is the updated schedule for finalizing the new Resource Management Plans? If planning activities will continue into FY16 how would the proposed \$3.2 million decrease in the planning account impact the agency's ability to finalize the plans and maintain the timber sale program?
- The BLM is under Court Order to meet the mandate of the O&C Act to offer the Allowable Sale Quantity (ASQ) in at least two districts in Western Oregon. How will the proposed reductions in the FY16 timber sale program affect the Court Order requirements to increase timber sale levels? Will the BLM meet the terms of this Court Order to offer the ASQ in certain districts as well as offering enough timber to meet the ASQ's of other districts in the O&C in FY16?
- How much money does the BLM spend annually to comply with the "Survey and Manage" requirements of the Northwest Forest Plan in Western Oregon? How many acres of BLM timberland in Western Oregon are encumbered by complying with the "Management Recommendations" associated with the "Survey and Manage" requirements of the Northwest Forest Plan?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Bernie Sanders

Witness Name: Secretary Jewell

The Department of Interior manages the vast amount of mineral and energy assets that are owned by the American people. There have been numerous reports and studies by the Government Accountability Office and others that suggest that the American people are in fact not getting a fair return on these assets that they own, and instead that the big corporations like oil and coal companies are reaping huge windfalls. In addition, these activities are being done in ways that increase carbon emissions which are making climate change worse. I believe that DOI can and should be doing more to ensure that the American people receive a fair return from the development of these resources.

- Question 1: For coal on federal lands, oil and gas development on federal lands, and offshore oil and gas development, what is the Department looking at specifically to ensure that taxpayers are getting fairly compensated? Please include all relevant rulemakings under development and an estimate of their timing for finalization.
- Question 2: What statutory changes are needed to expedite DOI's ability to recover fair market returns from the use and development of taxpayer-owned minerals, or access to federally-owned lands?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Ron Wyden

Witness Name: Secretary Jewell

Question 1: Secretary Jewell, I want to take a moment to focus on an issue of particular importance to my home state of Oregon and to the Northwest region—the Columbia River Treaty.

In November of 2013, when I was Chairman of the Committee, I held a hearing on the modernization of the Columbia River Treaty, urging the Administration to follow the consensus document known as the “Regional Recommendation,” and to engage Canada expediently in negotiations. Now, over a year later, it is my impression that the Administration has not been expedient about addressing this issue.

What can you tell me about why this process has taken so long? And what will it take for you and the Administration to act to advance the Columbia River Treaty and engage Canada?

Question 2: As you know, the National Park System turns 100 years old next year, and during its time has become one of America’s greatest success stories. In nearly every state, Americans can visit a national park, trail, or monument and learn about the nation’s rich cultural and ecological heritage. To ensure that these parks remain the treasures that they are, it’s imperative that the Administration and Congress invest in them to keep them maintained and safe for visitors.

What are the Department of Interior’s plans for ensuring that the deferred maintenance backlog remains a priority and that the backlog “to-do” list gets consistently checked off?

Question 3: I understand that some of my colleagues were suspicious about what you and the Administration were doing to protect sage grouse habitat, but in Oregon, this work is really important. Can you assure me that you’ll continue the important work you are doing with private landowners in places like Eastern Oregon?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Rob Portman

Witness Name: Secretary Jewell

Question 1: When groups want work together to raise money for a project on a certain park, for example: let's assume a structure in Cuyahoga National park needs a new roof, how can groups who donate money through the current Centennial Challenge ensure all the money from their donations comes back to the roof in Cuyahoga that they donated for without having to donate it to the federal government's centennial challenge?

Question 2: Last year the FY15 Omnibus provided \$10 million to reinvest in the Centennial Challenge. Can you provide a status of the projects for FY15, what projects or types of projects have been chosen?

Question 3: When was the last time Ohio was mapped via USGS using LIDAR technology, and what percentage of the state has been mapped using LIDAR as part of 3D Elevation Program?

Question 4: The Service proposed to list the northern long-eared bat as endangered under the ESA in October 2013, but it is my understanding that service is now leaning toward a determination that the species threatened, and issuing a 4(d) rule. For species listed as threatened, the Service may issue a 4(d) rule to provide protections that are deemed necessary and advisable for conservation of the species. The 4(d) rule as I understand it would provide limited exemptions for forest management practices, maintenance and limited expansion of transportation and utility rights-of-way, removal of trees and brush to maintain prairie habitat, and some tree removal projects.

But there remains concern that the proposed 4(d) rule, which would accompany a potential threatened listing, does not accommodate similar exemptions for oil and gas activities, renewable power (such as solar and wind), commercial or residential construction, or agricultural practices. Major industries that drive our economy.

Can I get your commitment that you will work with folks in those industries to ensure equal consideration within the 4(d) rule for these types of activities that are substantially similar to activities exempted under the rule?

Hi Sarah,

Attached are Questions for the Record submitted to Secretary Jewell by various Energy Committee Members regarding the hearing which was held on February 25, 2015 entitled "The FY 2016 Budget Request for the Department of the Interior." We request that Secretary Jewell provide her responses to these questions by **Tuesday, March 24, 2015** for inclusion in the official hearing record.

Please provide the responses directly to me, and feel free to contact me if you have any questions.

Sincerely,

Darla Ripchensky, PMP

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Shelley Moore Capito

Witness Name: Secretary Jewell

Question 1: The office of Surface Mining (OSM) has spent more than \$8 million over the past several years to develop a rule to replace the 2008 stream buffer zone rule. OSM recently repealed the 2008 rule and reinstated the rules that were in place before 2008. You previously committed to taking a fresh look to decide whether any new rulemaking was necessary. In light of these developments, is there any need for spending more tax-payer money on a new rulemaking?

Question 2: The earlier stream buffer zone rule development included several cooperating primacy states, including West Virginia, as part of the NEPA process. Has this arrangement continued? If so, when was the last time OSM communicated with those cooperating state agencies on the status of any further rule development?

Question 3: I want to ask about habitat conservation, and in particular that related to the Northern Long-eared bat, which is a huge issue in my home state. It appears that the assumptions made by BLM and FWS about drilling impacts in connection with the Northern Long-eared do not take into consideration recent technologies developed and in use by the oil and gas industry. In fact, the majority of studies on oil and gas industry impacts are based upon assumptions of well density and drilling footprints that are decades old. Shouldn't the conservation and management strategies of FWS and BLM incorporate information from engineers and other industry specialists who develop and implement technological innovations that improve the efficiency of oil and gas operations and reduce their environmental impacts? Also, why don't BLM-FWS Assumptions on Effects of Oil and Gas Development take into account new technologies and smaller drilling footprints?

Question 4: On July 17, 2014, the US Fish and Wildlife Service announced that it was banning the use of neonicotinoids on USFWS lands. What other federal agencies did the USFW consult before making this decision?

Question 5: What input, if any, did USFWS receive from these agencies?

Question 6: Were any NGO organizations consulted or have input into this decision?

Question 7: Why was this decision not published in the Federal Register for public comment?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Question 8: Are agricultural operations on USFWS lands reviewed as a part of each refuge management plan where such operations occur?

Question 9: Why was this action not undertaken as a part of refuge management planning process?

Question 10: Was an economic analysis conducted before this decision was made? If so, please provide a copy. If not, why not?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator James Risch

Witness Name: Secretary Jewell (and Michael Connor)

There are several Idaho federal water storage project feasibility studies that were authorized under BOR (e.g., Snake River systems including; Boise River Project – Lucky Peak, Arrowrock, Anderson, and Deer Flat; Upper Snake River: Teton, Idaho site reservoirs, Deer Flat,).

Question 1: What is the feasibility study status of the BOR Idaho water project studies?

Question 2: What possible actions does BOR consider pursuing on the Snake River system via the outcome of the feasibility studies?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Barrasso

Witness Name: Secretary Jewell

Question 1: During the hearing, I asked you whether BLM's final rule on hydraulic fracturing would allow states to apply for a variance. In response, you stated that BLM's "proposed regulations say that if a state's rule is stronger than the proposed federal rule, that the state's rule will govern." Will BLM allow states (not operators) to apply for a variance from BLM's final hydraulic fracturing rule? If so, under what circumstances will a state be able to obtain a variance from BLM's final rule?

Question 2: During the hearing, we discussed your letter to Governor Matt Mead dated January 26, 2015. In the letter, you state that: "The rider attached to H.R. 83... does not affect the U.S. Fish and Wildlife Service's...court-ordered obligation to make a determination by September 30, 2015, as to whether the greater sage-grouse does or does not warrant protection under the Endangered Species Act." I specifically asked you whether such a "determination" would be legally binding. You stated that you "would have to defer to the solicitors." Please clarify for the Committee whether such a "determination" would be legally binding if the rider remains in effect.

Question 3: I understand there are significant delays in obtaining sundry notices and rights-of-way for natural gas gathering lines on Federal land from BLM. However, in response to one of my questions on this matter, you said that you are "not aware of circumstances where permits have been slowed down by the BLM."

A. What is the total number of requests for sundry notices and rights-of-way for natural gas gathering lines pending at the Bureau of Land Management?

B. What is the total number of requests for sundry notices and rights-of-way for natural gas gathering lines pending at each BLM Field Office?

C. When were each of the pending requests for sundry notices and rights-of-way for natural gas gathering lines first submitted to BLM?

Question 4: On February 20, 2015, the Office of Surface Mining Reclamation and Enforcement (OSM) published a notice in the *Federal Register* to pursue a rulemaking to revise regulations under the Surface Mining Control and Reclamation Act on the use of explosives on surface coal mining operations. A. Does OSM plan to consult with the state

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

regulatory authorities prior to initiating this rulemaking? B. If so, when will this consultation take place and which states will it involve?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

QUESTIONS FROM SENATOR JEFF FLAKE

Witness Name: Secretary Jewell

Question 1. In the Department's wildfire budget justification, the anticipated cost of wildfire suppression based on the average of the previous 10 years is \$384 million. The Department's anticipated 'worst case' scenario cost, based on a Forest Service mathematical model is \$467 million. The Department claims that the 'on budget' funding is sufficient to fight the predictable 99% of the fires which account for 70% of the costs. But, the Department has only requested enough funds to cover 70% of the *predictable* costs, not the *worst case* costs - meaning that the plan going into the year is to have insufficient funds to fight the fires that are predicted to happen. Why doesn't the department request 'on-budget' discretionary amounts sufficient to cover at least 70% of the worst case scenario?

Question 2. The maintenance cost for the National Park System continues to rise. This year the Department is requesting a 94% increase in deferred maintenance funding and a 67% increase for regularly scheduled maintenance. Together the costs of just maintaining the current park system are over \$308 million. Yet, even with this ever-increasing cost, the Department is proposing to more than triple the amount spent on Federal land acquisitions in FY16 to \$447 million. What impact will the proposed additional land acquisition have on the continually increasing maintenance bill of the National Park System?

Question 3. Last year the Federal government, as a landowner of nearly half the land area in the Western US, met its obligations to counties and local governments by appropriating money out of discretionary funds to make Payment in Lieu of Taxes (PILT) payments. The Department is requesting no discretionary funds for PILT in FY16, relying instead on Congress to use mandatory spending to fund PILT. How does the Department intend to offset the cost of the proposed mandatory spending increase?

Question 4. The recently-passed water rights settlement on the Bill Williams River, Arizona is contingent on the completion of several actions, including approvals by the Lower Colorado River Multi-Species Conservation Plan Steering Committee. What is the Department doing to facilitate the final implementation of the settlement?

Question 5. In July 2014, the Bureau of Reclamation partnered with municipal water providers in Arizona, California, Colorado, and Nevada to create the Colorado River System Conservation Program. How much funding does this program currently have? How many

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

projects has it funded? How much water has been conserved? What has been the effect on reservoir levels? What additional steps will the Department take in FY16 with this program?

Question 6. The Department has requested \$244 million for Indian water rights settlements and negotiation. Which new Indian water rights settlements are being prioritized by the department? What will the additional \$16.9 million for negotiation and legal support allow the department to do? What is being done to increase the pace of settling outstanding claims?

Question 7. The Fish and Wildlife Service (FWS) published the final EIS and draft Record of Decision on the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf on November 25, 2014. The final EIS differed significantly from the draft EIS published in July 2014, due in large part to extensive negotiations between the FWS and the Arizona Game and Fish Commission. Senator McCain and I sent a letter to Director Ashe on December 21, 2014 requesting an extension of the public comment deadline to allow stakeholders, including the Arizona Game and Fish Commission, time to analyze the significantly changed proposed regulations. In this letter we specifically identified provisions in the consent decree that allow a modification of the deadline upon showing good cause, consistent with the Federal Rules of Civil Procedure. Did the FWS approach the Department of Justice about seeking an extension of the public comment deadline? What was the Department of Justice's reason for not seeking an extension?

Question 8. There is a proposal for the President to bypass Congress and designate over 1.7 million acres of land in northern Arizona as the Grand Canyon Watershed National Monument. This would lock up not only Federal land, but over 60,000 acres of State Trust land and nearly 30,000 acres of private land. Such a designation would have a devastating effect on the economic productivity of State trust land which is managed primarily to benefit Arizona public schools. It would have a similarly chilling effect on the economic productivity on private land and existing mining operations. The creation of this monument has been strongly opposed by the State of Arizona. Would any of the Department's proposed funding be used to pursue the designation of a National Monument in Arizona?

Question 9. In order to get the most value for every dollar spent on managing National Parks, the Park Service is required to seek competing bids for private companies to run concessions within the National Parks. In instances where a concessionaire has held the contract for extended periods the leasehold surrender interest (LSI) that must be paid to the outgoing concessionaire when a contract changes hands can become a significant barrier to the competitive bidding process. What actions is the Department pursuing to ensure a true competition for park concessions while still respecting the investment made by private companies in their business?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Question 10. Arizona counties and municipalities have tried to work with the BLM to authorize third-party concessionaires to operate on Recreation and Public Purposes Act (RPPA) parcels. The BLM in Arizona will not permit local governments to allow a third-party concessionaire on the exact same land that the BLM could itself allow a concessionaire to operate if the BLM still controlled the land. During Director Kornze's nomination hearing in December 2013, I asked specifically about the status of the Solicitor's Office evaluation of the August 2011 Instructional Memorandum for Third Party Uses on Recreation and Public Purposes Acts Patents and Leases (2011-162), and when Arizona local governments could expect a decision about the ability to enter into agreements with third-party concessionaires. In the written responses, Director Kornze did not provide an update on the Solicitor's evaluation or an expected timeline for the local governments. What is the status of the Solicitor's office evaluation of the above memorandum, and when does the office expect to make a decision regarding third-party concessionaries to operate on RPPA lands?

Question 11. In a December 5, 2014 report, the Congressional Research Service identified several potential technical discrepancies in how some Federal payments to counties are treated in the calculation of Payments in Lieu of Taxes (PILT) payments. The report specifies that payments made under the Bankhead-Jones Farm Tenant Act by the BLM require a reduction in the following year's PILT payments, but payments for similar lands administered by the Forest Service do not require a reduction. Additionally, the report claims that payments under the Secure Rural Schools (SRS) program require an offset in the following year's PILT levels for payments from the Forest Service but not payments from the BLM. As the agency responsible for making annual PILT payments, does the Department treat SRS payments by the Forest Service and the BLM differently when computing PILT payments? Similarly, does the Department treat payments made under the Bankhead-Jones Act by the Forest Service and BLM differently for purposes of PILT payments?

Question 12. Your testimony includes several references to encouraging individuals to serve, work, and volunteer on public lands. Some have suggested that questions of legal liability act as a disincentive for federal agencies to work with volunteers. Has the Department identified any such impediments to promoting volunteer work on public lands? If so, does the Department have suggestions on how to remove these barriers?

Question 13. The trans-canyon pipeline that supplies water to Grand Canyon National Park has incurred repeated maintenance issues over the last thirty plus years. Most recently, we witnessed two separate closures of Phantom Ranch as crews sought to address pipeline breaks, and a section of the pipeline is undergoing repairs until July of this year. According

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

to some estimates, the cost to replace the entire pipeline would fall between \$100 million and \$150 million with additional operations and maintenance charges. Does the Park Service have updated estimates regarding the cost to repair the trans-canyon pipeline?

Question 14. I understand that the Park Service is evaluating potential solutions to the water pipeline challenges at the Grand Canyon National Park by developing a water-delivery study. Please describe the alternatives being considered and the costs associated with each option. When do you expect to complete the final study?

Question 15. In evaluating potential water-delivery options, has anyone from the Park Service considered regional water-supply solutions? If so, who has the Park Service met with, and what options are being considered?

Question 16. Is there an opportunity for the Park Service to achieve cost savings by pursuing a regional water-supply solution, as opposed to solely looking at replacement of the trans-canyon pipeline?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Al Franken

Witness Name: Secretary Jewell

Question 1: As you know, a recent court decision reversed the Fish and Wildlife Service's determination to delist the gray wolf from the Endangered Species Act. Right now, farmers and ranchers in Minnesota are concerned about losing their livestock to wolf attacks, and they really need federal funds that can help to protect their herds. For example, the Wolf Livestock Loss Demonstration Program provides funding to livestock producers so they can employ strategies to help prevent wolf attacks from occurring in the first place. Can you tell me why the Fish and Wildlife Service has proposed to discontinue funding for this program in FY 2016?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Martin Heinrich

Witness Name: Secretary Jewell

Question 1: In December, Congress passed the Manhattan Project National Historical Park Act, which directs the National Park Service to establish the Manhattan Project National Historical Park in three states within one year of enactment. Do you expect to be able to meet that deadline?

Question 2: When and how does the National Park Service plan to involve local communities in the park planning process for the Manhattan Project National Historic Park?

|

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Mazie K. Hirono

Witness Name: Secretary Jewell

Question 1: National Monuments

Madam Secretary, I would like to thank the Administration for taking action to protect and preserve lands across our nation, the recent executive action for Honouliuli in Hawaii is a good example. It is a sobering, yet important piece of our nation's history that will serve to educate future generations. In 2009, when I was a member of the House of Representatives I worked with Senators Inouye and Akaka to authorize a special resource study on World War II internment camp sites in Hawaii. Now that the President has designated Honouliuli as a national monument to be managed by the National Park Service, an agency well-seasoned and experienced with management of national monuments across our country. I want to see Honouliuli and other sites recently designated get off to a strong start.

This designation has been a collaborative, inclusive effort—between the local community, Hawaii's Congressional delegation, and other public and private stakeholders. Can you give me a sense of what the path will be to move Honouliuli forward in FY 2016 and beyond?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Mike Lee

Witness Name: Secretary Jewell

Antiquities Act

1. Secretary Jewell, during your confirmation hearing, I asked if you would seek the input of local stakeholders regarding national monument designations. You confirmed you would do this. However on October 31, 2013, you said, “if Congress doesn’t step up to act to protect some of these important places that have been identified by communities and people throughout the country, then the president will take action ... there’s not question that if Congress doesn’t act, we will.” One would think that the elected representatives of the people would be a group of stakeholders whose buy in and support should necessary in designating monuments. Has your opinion changed from the answer you gave me your confirmation hearing?

Transcript, Sally Jewell Confirmation Hearing, March 21, 2013

Senator Lee: *The monument designation question is important because, as you were discussing that with Senator Heinrich, I appreciated your commitment to work with local stakeholders whenever they are dealing with something like monument designation. We had about 2 million acres designated as a monument a few years ago in my state, and it was not only not done without extensive consultation, input, and buy-in of local officials and residents, it was done completely by surprise. It was brought upon us completely by stealth. It was announced from a neighboring state, and we would have like to have had input. So, I would really appreciate if you would commit to me that you would advise the president that it is best to work with locals affected by broad decisions like that in advance of making such a decision.*

Secretary Jewell: *That is certainly consistent with what I believe in and with what the White House believes in as well.*

2. The President added four new national monuments in 2014. Regarding your commitment to an open process with local consultation, were these communities given proper notice before these monuments were designated? Did you change anything about the designation area or timing in relation to the concerns of the impacted community or state?
Last four monuments listed:
3. The Antiquities Act also states that the President is to reserve “the smallest area compatible with the proper care and management of the objects to be protected.” However, of the 11

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

monuments President Obama has designated so far, just the last three monuments constituted over 250 million acres of new federal property. Would you consider these areas to be the smallest areas available?

Endangered Species Act

1. As you know, the agency recently put out a rule related to adverse modification – “Definition of Destruction or Adverse Modification of Critical Habitat.” Can you please provide me the statutory authority for this rule?
2. How much does the Department spend on ESA litigation? If attorney’s fees were capped, is it possible that money could instead be used for species recovery?
3. In a hearing before the House Natural Resources Committee on April 3, 2014, you stated that the Department publishes the underlying data for potential ESA listings. However, my staff has experienced many examples where the data used in listings is simply not available because the Department has, in fact, *not* made it available – for example, the underlying data for the listing of the Gunnison sage grouse was not released. Why does the Department publish scientific findings for some listings, but not for others? Can you commit to making available to the public all underlying data for all potential listings?
4. How do you ensure that state and local entities are able to stay informed and participate in the listing determination process? On average, how many meetings does your Department have with state and local officials during the listing process?

National Park Service

1. What is the current maintenance backlog for the National Park Service? What is the proportion of the Service’s budget that is spent on administrative overhead versus park maintenance?
2. How does the Department intend to prioritize its funding to address this backlog? Is it your opinion that we should consider a moratorium on the addition of National Park land until the NPS addresses the backlog in its current portfolio?

Questions for the Record

Hearing: The FY2016 Budget Request for the Department of the Interior

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Joe Manchin III

Witness Name: Secretary Jewell

Question 1: Secretary Jewell, I am very interested in some of the AML proposals in the Interior budget. As you know, I am very supportive of funding the UMWA's pension plan. Our miners have mined the coal that powered our nation and we need to ensure they continue to receive their hard earned benefits.

I am also interested in the proposal to use AML money for coalfield communities in Appalachia, like those in my home state of West Virginia. As you're aware, this program would require a legislative solution.

In your view, what would this legislative solution look like and can I get your commitment to work with me and other members from the region to ensure this money reaches the communities who need it the most?

Question 2: OSM's budget justification document notes that States and Tribes directly regulate 97 percent of the Nation's coal production under approved regulatory programs. The agency's budget also notes the reduced workload anticipated by OSM.

With the states responsible for most of the regulatory work why does OSM ask for \$5.5 million more for itself while cutting the states grants by more than \$3 million? What is OSM planning to use the extra \$5.5 million for?

Question 3: As you know, I have serious concerns about the potential OSM Stream Buffer Zone rule. The original intent of this rulemaking was in response to the 2008 rule promulgated under the Bush Administration. Why is OSM moving forward with this process when the 2008 rule was vacated?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Question 4: In 2013, the Director of Mining and Reclamation at West Virginia's Department of Environmental Protection testified in the House about their experience as a cooperating agency during the Stream Protection Measures Rulemaking process. Under this agreement, OSM should be coordinating with West Virginia and the other cooperating state agencies.

Instead, OSM denied the agencies the opportunity to review the first chapter of the Environmental Impact Study and provided them only a few days to review and comment on hundreds of pages of the following chapters.

After this, according to the West Virginia DEP, OSM "shifted to a nearly complete blackout on information about the development of the Stream Protection Measures Rule."

Yesterday, 11 states, including West Virginia sent a letter to OSM stating that several of the states are "seriously contemplating withdrawing from the EIS development" due to a continued lack of cooperation from OSM.

Can you explain this?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Lisa Murkowski

Witness Name: Secretary Jewell

Question 1: Please provide a record of the authorities on which the Department relied for the development of the Comprehensive Conservation Plan (CCP) and accompanying Environmental Impact Statement for the Arctic National Wildlife Refuge (EIS), including, the approval for and authorization of funds expended by year, including Congressional authorization or appropriation, for the development of the CCP and EIS.

Question 2: Please provide a detailed current plan, calendar and itemized budget for the development and implementation of the Step-Down Plans identified in the CCP and EIS.

Question 3: Please a comprehensive list of the dates and times of any meeting, call or other interaction held by the Department of the Interior (DOI) or any of its component parts including the United States Fish and Wildlife Service (USFWS) or contractor operating on behalf of DOI, with any entity not considered a cooperative agency, including any corporation or non-governmental organization.

Question 4: Please identify in a log any legal or policy analysis provided to or given by DOI or USFWS related to sections 1002, 1003 or 1326 of ANILCA as it might apply to the CPP or EIS.

Question 5: Please provide a comprehensive list of programs or initiatives within DOI in support of the US Chairmanship of the Arctic Council and in fulfillment of Executive Order Enhancing Coordination of National Efforts in the Arctic. Please include in the list a identification of the funds expended or to be expended for any and all programs or initiatives on the list.

Question 6: with respect to the issue of climate change, please provide a comprehensive list of DOI programs or initiatives dedicated to adaptation or promoting resilience in communities in response to a changing climate and the funds associated with these initiatives or programs.

Question 7: Please provide an itemization of any funds expended since January 1, 2012 related to international travel costs for DOI personnel in support for arctic initiatives, studies, programs or workshops.

Question 8: Please provide an estimate of any funds expended since January 1, 2012 related to Alaska specific travel costs for DOI personnel in support for arctic initiatives, studies, programs or workshops.

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Question 9: In the 2016 Budget Justification, the Bureau of Land Management (BLM) notes: *“Since 2009, the BLM has approved 52 renewable energy projects, including 29 utility-scale solar facilities, 11 wind farms, and 12 geothermal plants, with associated transmission corridors and infrastructure to connect with established power grids. If fully constructed, these projects will provide more than 14,000 megawatts of power, or enough electricity to power about 4.8 million homes, and provide over 20,000 construction and operations jobs.”* (p. I-3) Please provide a detailed timeline for each of these identified projects including (1) date on which BLM received an initial application for approval (2) date on which a ROD was issued (3) description of the project – including estimated capital costs as well as construction and operating jobs and (4) estimated cost of mitigation measures required by BLM.

Question 10: Please provide an equivalent description of the number of new oil and gas units or developments approved by BLM since 2009.

Question 11: In the 2016 Budget Justification, BLM notes that since 2000, BLM has permitted nearly 47,000 new wells – please provide the number of permitted new wells since 2009.

Question 12: Please provide the number of permitted new wells since 2009 that have been drilled.

Question 13: Please provide estimates of revenues from NPRA production provided to Congress, the White House or other similar governmental institution issued prior to, or associated with, the passage of the Energy Policy Act of 2005.

Question 14: Please provide an accounting of revenues received from production in the National Petroleum Reserve Alaska since passage of the Energy Policy Act of 2005.

Question 15: In its *Report to Congress June 2006* related to Sec. 207 of the Alaska Land Transfer Acceleration Act, BLM identified roughly 56,870,900 acres of BLM-managed lands that are withdrawn by “d-1 PLOs” and made recommendations – primarily that those d-1 withdrawals could be lifted. With next year being ten years since that report was issued I feel compelled to ask if anything has happened.

Question 16: Please provide an update on where the Department stands in settling with the state on the proper process to complete patenting of the state’s lands. The Alaska Statehood Act set up a very specific process for federal surveying to complete the patented transfer of lands. To reduce its costs, the department has proposed a new surveying process, taking advantage of GPS coordinates. But apparently there is now a difference of opinion between the State of Alaska and your Department over the process to be used. Please describe that disagreement and how the department plans to resolve the issue?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Question 17: Relating to the U.S. Geological Survey budget, the USGS is a major source of grant funding for a series of seismic monitors on volcanoes in Alaska, largely on the Alaska Peninsula and the Aleutian Chain, near the air corridor for flights to America from Asia. The grants help fund the work of the Alaska Volcano Observatory, a joint entity between USGS and the University of Alaska. Ash from eruptions is particularly dangerous to such flights as shown by the near crash of a jumbo jet years ago.

- A) The problem is many of the seismic monitors need not just upgrading to digital technology, but antenna and battery replacements since the stations are rapidly going off line.
- B) I believe this is causing a real health and safety issue not just for Alaskans, but international passengers on trans-Pacific flights. While Congress added money to your budget this year to help with the maintenance costs on the network, your FY 16 budget seems to propose only a slight increase for hazards funding, even while your overall budget calls for a \$759.2 million increase – 6% above FY 15. That is disappointing since estimates are that it will require an additional \$5 to \$7 million a year for perhaps five years just to keep the Alaska seismic network functioning, much less to meet the entire U.S.G.S. earthquake monitoring budget needs.
- C) Why is there not more money in your spending plan devoted to basic health and safety needs?

Question 18: The State of Alaska a number of years ago requested that it receive the conveyance of several thousand acres along the Susitna River in Southcentral Alaska as part of its statehood conveyance. In 2013 my staff had been assured by Department personnel that the transfer would be completed, since none of the land is in conservation system units. But apparently the transfer is still pending. What is the hold up and when will the transfer of the acreage be completed to the State of Alaska?

Question 19: We have spoken often about the need for the Department to speed up the cleanup of 136 abandoned oil and gas exploration wells in northern Alaska, wells drilled by the government in both the 1940s and late 1980s and early 1990s. You had about \$2 million in your budget last year for such cleanups. Fortunately in the Helium bill in 2013 we were able to increase your cleanup funding by \$50 million so that the Department will be able to tackle the worst of the wells in coming years and gain efficiencies by being able to reduce mobilization costs and

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

improve coordination of the cleanup efforts. But that \$50 million will not solve all of the problems.

- A) My question is this: when will the Department change its priorities and increase its regular budgetary funding to tackle environmental cleanups of abandoned federal wells on an annual basis?
- B) Abandoned well cleanup truly is a federal responsibility. How will you assure me that we aren't back in the same position in four or five years of having insufficient funding to clean up environmental well problems on federal lands?

Question 20: Recently I have received a number of complaints from placer miners in the eastern Interior part of Alaska about Department policies involving the current and future regulation of placer mining. There are concerns about the draft Eastern Interior Resource Management Plan and its apparent designation of about 700,000 acres of the FortyMile River mining district as "areas of critical environmental concern" where the Department is considering closing the area to mining. Significantly, as I understand it, this land was specifically kept open to mining by Congress in 1980's Alaska National Interest Lands Conservation Act when it was not included in the Yukon-Charley National Preserve. There are also a host of concerns about new regulations for mining efforts in still open areas, concerning about reclamation cost estimates, reclamation standards, new bonding processes and the turnover in our compliance staff that makes consistency in mining enforcement difficult at best.

- Recognizing that the issue of mining on the FortyMile is complicated, please tell me the reason for all of these changes in mining practice now in Interior Alaska, when mining had been working seemingly fine based on the 1983 management plan crafted just after passage of ANILCA?

Question 21: Just recently I learned that your Department has decided to implement a new southern boundary of the wilderness area inside Denali National Park and Preserve. Apparently 35 years ago when the Alaska lands act passed, no one noticed that the world is round and that map boundaries might need to be adjusted for the curvature of the earth. The problem appears to be that now the Department wants to add up to fifth-eighth of a mile to the wilderness area south of Denali. That might not seem like much, but it could have significant impacts. For example, there are potential impacts on:

- Hundreds of commercial air taxi and scenic flights to see the mountain.
- Potential for impact climbers getting to base camp to climb Denali.

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

- Snowmachine recreation efforts in the eastern sections of the park, and caribou and moose hunting for both subsistence and sport hunters in the Cantwell area.

Apparently the boundary change will add about 23,500 acres to the wilderness area in the park. But Alaska lands act (Sect. 103c) specifically limits “minor boundary adjustments” to just 23,000 acres.

- Will the Department work with us, either administratively or if a legislative fix is required, to make sure that this boundary expansion does not impact tourism and recreational hunting interests in Southcentral Alaska?

At a time when Department policy changes are having such a huge impact on future oil and gas and mineral development, this change that could impact another major leg of the state’s economy – tourism – may be exceptionally hard for Alaskans to accept, especially 35 years after ANILCA’s passage and after business and lifestyles have adapted to the changes generated by passage of the lands act.

Question 22: In late 2013 it became clear that the Cook Inlet Region Inc. (CIRI) Alaska Native Regional Corp. was coming up short by 42,000 acres of the land conveyance it was promised as a result of the Alaska Native Claims Settlement Act of 1971. The shortage was the result of the complex settlement of land conveyances to CIRI village corporations that had been complicated by the 1976 Cook Inlet land exchange. For the past year the BLM in Alaska has acknowledged that CIRI is short of its required conveyance and apparently has been working to identify solutions. Please update us on where Interior is with crafting a solution to the CIRI land shortage, and how soon such a fix may be proposed by your Department?

Question 23: The Department has a legal responsibility to fulfill the government's obligations under the Alaska Native Claims Settlement Act (ANCSA). Under ANCSA, Alaska Native Corporation often had to select lands for conveyance that were outside their traditional aboriginal lands because those lands were already occupied by the Federal government, the Department of Defense, or various state and local governmental entities. Accordingly, land exchanges and selection of other lands was necessary to fulfill Alaska Native Corporation (ANC) entitlements under ANCSA.

Given that ANCs have been denied their traditional aboriginal lands and, out of convenience to the government, have selected other lands and are now trying to develop those lands, it’s troubling--but not surprising--that I often hear that your Department delays and impedes the

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

issuances of permits to Alaska Natives who wish to develop their subsurface lands within the boundaries of a National Refuge.

- A) What are you going to do to make sure your department protects Alaskan Native Corporations' rights to the lands selected under ANCSA and that the agencies in your department expeditiously assist them in permitting, conveyance, and other dealings with your department?

Question 24: The U.S. Geological Survey recently released its Mineral Commodity Summaries report for 2015, and it shows that the United States is at least 50 percent reliant on foreign nations for at least 43 different commodities. The report also states, as it annually does, that "U.S. import reliance has increased significantly since 1978, the year that this information was first reported."

- A) Is our nation's foreign mineral dependence a matter of concern to you?
- B) What are you doing, at Interior, to help reduce and eliminate it?
- C) Do you believe the proposals in Interior's budget request – which would impose new taxes and fees on top of an already-slow permitting process – will somehow increase our nation's mineral security?
- D) It takes an average of 7 to 10 years (even absent significant litigation) to permit a new mine in the United States, which is considerably longer than other countries with similar environmental standards. Will you commit to reviewing the federal mine permitting process, and will you commit to identifying steps to make the process more efficient?

Question 25: The FY 2016 Land and Water Conservation Fund budget request is \$900 million: \$400 million in discretionary funding and \$500 million in permanent funding for DOI agencies and the Forest Service. In 2017 the President's budget request proposes that all \$900 million would be mandatory funding.

- A) Please explain to me why, with such an enormous maintenance backlog (According to CRS, over \$22 billion at the federal agencies combined, \$13 billion at NPS alone), DOI would propose to focus such a large amount of funding on acquiring more federal land?
- B) Shouldn't these funds be used to pay down the maintenance backlog to, at least, stem the growth of the backlog?
- C) More generally, how do you reconcile additional federal land acquisition at this time of staggering national debt and maintenance backlogs?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

The budget proposal seeks to turn the LWCF program into a permanent mandatory program without making any changes to it. I don't support that. I am also concerned that this program has been overly focused on federal land acquisition. Part of the reason for that is the 60 percent set-aside for state-side grants was stripped from the LWCF Act. These state-side grants are valuable tools to develop state parks and other outdoor recreation opportunities on non-federal land.

D) Shouldn't a larger percentage of LWCF funds be set-aside for state-side grants? Why or Why not?

Question 26: As many colleagues and I have emphasized many times, we have a nearly \$13 billion parks maintenance backlog. And with that staggering figure, there is a very strong argument that we should not be adding any new parks to the system until we can take care of what we already have. Alaskans are particularly concerned with the prospect of additions of new Parks with roughly 2/3 of the entire system located within my State.

With the Parks Centennial upon us in 2016, it would seem that this could be a great time to reevaluate how we establish and maintain the Parks as well as how we build support for the Parks in their local communities, nationwide and even internationally. In a time of severe budget constraints, all options need to be on the table. One idea that I am particularly interested in is increasing private donations to the system through private endowments.

A) Will you agree to work with me and the other members of this committee to review options and find a path forward to create a sustainable supplementary funding stream for America's Parks for the second century?

Question 27: I have some questions regarding the general approach of the National Park Service to rule making as well as some questions regarding a specific rule proposed by NPS.

A) In the past, NPS has put into place regulations that shortened the hunting seasons as defined by the Alaska Board of Game. When instituting the closures, the NPS has cited "Park Values" in those closures.

I. Please provide me with a definition of "Park Values"?

II. Do you believe that the State of Alaska has the right to manage wildlife within the borders of the State? When is it proper for the federal government to reverse State Board of Game decisions?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

- B) Recently, the National Park Service has proposed a rule (Regulation Identifier Number 1024-AE21) that would close a number of preserves in Alaska to the take of predators, such as bear and wolf.
- I. I am aware of several stakeholders who have contacted you regarding their concerns about the potential for this proposed regulation to unduly impact subsistence communities across Alaska. One of these stakeholders includes the Wrangell-St. Elias National Park Subsistence Resources Commission, an official Federal advisory committee created by the Alaska National Interest Lands Conservation Act (ANILCA) to make recommendations to you, the Secretary of the Interior, regarding fish and wildlife resources for subsistence dependent communities. I would like to hear from you how the Department proposes to avoid any undue impact on these communities, communities whose lives depend on the take of predators.
- II. The take of certain predators by Alaska Natives is done for cultural, economic, traditional, and spiritual needs. Can you describe to me how this proposed rule incorporates these significant considerations?

Question 28: Please describe the role of DOI in any additional discussions that have taken place with the State Department since the Regional Recommendation was finalized in December 2013. Who participated in these discussions? Does DOI defer to other agencies (i.e., the U.S. Entity) in discussions with the State Department regarding potential U.S. negotiating positions? Why or why not? If not, what are the major outstanding points of disagreement between DOI and other agencies?

Question 29: What is DOI's position on the "ecosystem-based function" principles and recommendations outlined in the Regional Recommendation? Please provide specific examples of the department's positions on these principles and recommendations?

Question 30: Total domestic oil production increased 15% from 2012 to 2013. Can you confirm that on federal lands, however, it only increased by 1% over the same period?

Question 331: While EIA is still assessing the 2014 data, according to its latest Monthly Energy Review, total U.S. field production averaged 16.3% higher in 2014 than in 2013. How much do you expect oil production on federal lands has increased over the past year?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Question 32: The Bureau of Land Management issued 3,769 drilling permits in FY 2014. This is one less than it approved in FY 2013, and 2,848 fewer than the 6,617 permits that were approved in FY 2008. Is it accurate to say that permits have fallen by 43% during this administration and that you are doing little if anything to correct this trend?

Question 33: Over the past decade, has federal natural gas production increased or decreased? What is the Department doing to reverse this trend?

Question 34: Given the nature of U.S. Geological Survey's core mission, many of us have requested that an economic geologist to be nominated to lead that agency. We did have a nominee in the last Congress, but she was not brought up for confirmation by the previous majority, and the agency has now gone without a confirmed director for two full years.

- A) Can you tell us when you anticipate the President will send this Committee a nominee to consider for USGS?
- B) Can you tell us whether the President is taking our request for an economic geologist seriously, as he searches for a new candidate?

Question 35: The Department of Interior is mandated to provide a subsistence priority on federal land, yet nearly every rural community in Alaska struggles to meet their subsistence needs because of low moose populations, low caribou populations – in some cases, and nearly non-existent king salmon populations.

- A) What is the Department's plan to ensure that adequate amounts of food can be put on the table?
- B) How do you reconcile a mandate to provide a subsistence priority with the competing mandates that creating wilderness, not managing for abundant and healthy wildlife populations, and limiting access by subsistence hunters fishers?
- C) Why is it difficult for your agency to manage predators to increase prey species to sustainable levels?

Question 36: In 2013, I wrote a letter to the Department asking what you could do to speed up the cleaning of environmental contamination on lands that you have transferred to Alaska Native Corporations to satisfy their aboriginal land claims under the 1971 Alaska Native Claims Settlement Act. Your Department studied the issue in 1998 and proposed a six-point effort to speed up the cleaning of such contamination. Last January in a letter to me you proposed that the Department would update its contaminated lands survey and then address the other five recommendations all involving how to tackle the actual cleanups. I had been led to believe that

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

updated list would be finished in the fall –there were more than 650 sites on the old list—
unfortunately, it was not completed.

- A) When will an updated, comprehensive list of contaminated sites on Native conveyed lands be finished? What will the Department propose to actually speed up and fund the cleanup of the contamination –all caused by the federal government prior to transfer of the land to Alaska Natives?
- B) Most recently, the Department’s current spending authorization requires the Department to provide to Congress by June of this year a detailed report including the comprehensive inventory of contaminated land conveyed through ANSCA including sites identified since the 1998 report and a detailed plan addressing how the Department intends to complete the cleanup of each contaminated site. What is the status of the effort to comply with this recent statutory directive?

Question 37: In the past Alaska Fire Service had two CL215s which carry about 1,400 gallons. There are plans to replace these with Fire Boss Single Engine Air Tanker (SEAT) aircraft.

- What is the cost per gallon dropped for the two aircraft?
- What is the cost difference between the CL215s vs the Fire Boss Single Engine Air Tanker (SEAT) in total budget cost to AFS?
- How effective do you expect the SEATs to be at Initial Attack?

Question 38: The BLM’s FY16 budget request proposes to reduce funding for the Oregon and California Grant Lands program by \$6.043 million overall, with a \$3.8 million decrease in Other Forest Resources management and a \$3.2 million decrease in Western Oregon Resource Management Planning. The BLM Budget Justification also shows that the agency plans to offer less timber for sale in FY 16 (204 mmbf, down from 215 mmbf in FY15 and 239.8 mmbf in 2014)

- What is the updated schedule for finalizing the new Resource Management Plans? If planning activities will continue into FY16 how would the proposed \$3.2 million decrease in the planning account impact the agency’s ability to finalize the plans and maintain the timber sale program?
- The BLM is under Court Order to meet the mandate of the O&C Act to offer the Allowable Sale Quantity (ASQ) in at least two districts in Western Oregon. How will the proposed reductions in the FY16 timber sale program affect the Court Order requirements to increase timber sale levels? Will the BLM meet the terms of this Court Order to offer

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

the ASQ in certain districts as well as offering enough timber to meet the ASQ's of other districts in the O&C in FY16?

- How much money does the BLM spend annually to comply with the “Survey and Manage” requirements of the Northwest Forest Plan in Western Oregon? How many acres of BLM timberland in Western Oregon are encumbered by complying with the “Management Recommendations” associated with the “Survey and Manage” requirements of the Northwest Forest Plan?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Bernie Sanders

Witness Name: Secretary Jewell

The Department of Interior manages the vast amount of mineral and energy assets that are owned by the American people. There have been numerous reports and studies by the Government Accountability Office and others that suggest that the American people are in fact not getting a fair return on these assets that they own, and instead that the big corporations like oil and coal companies are reaping huge windfalls. In addition, these activities are being done in ways that increase carbon emissions which are making climate change worse. I believe that DOI can and should be doing more to ensure that the American people receive a fair return from the development of these resources.

- Question 1: For coal on federal lands, oil and gas development on federal lands, and offshore oil and gas development, what is the Department looking at specifically to ensure that taxpayers are getting fairly compensated? Please include all relevant rulemakings under development and an estimate of their timing for finalization.

- Question 2: What statutory changes are needed to expedite DOI's ability to recover fair market returns from the use and development of taxpayer-owned minerals, or access to federally-owned lands?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Ron Wyden

Witness Name: Secretary Jewell

Question 1: Secretary Jewell, I want to take a moment to focus on an issue of particular importance to my home state of Oregon and to the Northwest region—the Columbia River Treaty.

In November of 2013, when I was Chairman of the Committee, I held a hearing on the modernization of the Columbia River Treaty, urging the Administration to follow the consensus document known as the “Regional Recommendation,” and to engage Canada expediently in negotiations. Now, over a year later, it is my impression that the Administration has not been expedient about addressing this issue.

What can you tell me about why this process has taken so long? And what will it take for you and the Administration to act to advance the Columbia River Treaty and engage Canada?

Question 2: As you know, the National Park System turns 100 years old next year, and during its time has become one of America’s greatest success stories. In nearly every state, Americans can visit a national park, trail, or monument and learn about the nation’s rich cultural and ecological heritage. To ensure that these parks remain the treasures that they are, it’s imperative that the Administration and Congress invest in them to keep them maintained and safe for visitors.

What are the Department of Interior’s plans for ensuring that the deferred maintenance backlog remains a priority and that the backlog “to-do” list gets consistently checked off?

Question 3: I understand that some of my colleagues were suspicious about what you and the Administration were doing to protect sage grouse habitat, but in Oregon, this work is really important. Can you assure me that you’ll continue the important work you are doing with private landowners in places like Eastern Oregon?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Rob Portman

Witness Name: Secretary Jewell

Question 1: When groups want work together to raise money for a project on a certain park, for example: let's assume a structure in Cuyahoga National park needs a new roof, how can groups who donate money through the current Centennial Challenge ensure all the money from their donations comes back to the roof in Cuyahoga that they donated for without having to donate it to the federal government's centennial challenge?

Question 2: Last year the FY15 Omnibus provided \$10 million to reinvest in the Centennial Challenge. Can you provide a status of the projects for FY15, what projects or types of projects have been chosen?

Question 3: When was the last time Ohio was mapped via USGS using LIDAR technology, and what percentage of the state has been mapped using LIDAR as part of 3D Elevation Program?

Question 4: The Service proposed to list the northern long-eared bat as endangered under the ESA in October 2013, but it is my understanding that service is now leaning toward a determination that the species threatened, and issuing a 4(d) rule. For species listed as threatened, the Service may issue a 4(d) rule to provide protections that are deemed necessary and advisable for conservation of the species. The 4(d) rule as I understand it would provide limited exemptions for forest management practices, maintenance and limited expansion of transportation and utility rights-of-way, removal of trees and brush to maintain prairie habitat, and some tree removal projects.

But there remains concern that the proposed 4(d) rule, which would accompany a potential threatened listing, does not accommodate similar exemptions for oil and gas activities, renewable power (such as solar and wind), commercial or residential construction, or agricultural practices. Major industries that drive our economy.

Can I get your commitment that you will work with folks in those industries to ensure equal consideration within the 4(d) rule for these types of activities that are substantially similar to activities exempted under the rule?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Shelley Moore Capito

Witness Name: Secretary Jewell

Question 1: The office of Surface Mining (OSM) has spent more than \$8 million over the past several years to develop a rule to replace the 2008 stream buffer zone rule. OSM recently repealed the 2008 rule and reinstated the rules that were in place before 2008. You previously committed to taking a fresh look to decide whether any new rulemaking was necessary. In light of these developments, is there any need for spending more tax-payer money on a new rulemaking?

Question 2: The earlier stream buffer zone rule development included several cooperating primacy states, including West Virginia, as part of the NEPA process. Has this arrangement continued? If so, when was the last time OSM communicated with those cooperating state agencies on the status of any further rule development?

Question 3: I want to ask about habitat conservation, and in particular that related to the Northern Long-eared bat, which is a huge issue in my home state. It appears that the assumptions made by BLM and FWS about drilling impacts in connection with the Northern Long-eared do not take into consideration recent technologies developed and in use by the oil and gas industry. In fact, the majority of studies on oil and gas industry impacts are based upon assumptions of well density and drilling footprints that are decades old. Shouldn't the conservation and management strategies of FWS and BLM incorporate information from engineers and other industry specialists who develop and implement technological innovations that improve the efficiency of oil and gas operations and reduce their environmental impacts? Also, why don't BLM-FWS Assumptions on Effects of Oil and Gas Development take into account new technologies and smaller drilling footprints?

Question 4: On July 17, 2014, the US Fish and Wildlife Service announced that it was banning the use of neonicotinoids on USFWS lands. What other federal agencies did the USFW consult before making this decision?

Question 5: What input, if any, did USFWS receive from these agencies?

Question 6: Were any NGO organizations consulted or have input into this decision?

Question 7: Why was this decision not published in the Federal Register for public comment?

Question 8: Are agricultural operations on USFWS lands reviewed as a part of each refuge management plan where such operations occur?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Question 9: Why was this action not undertaken as a part of refuge management planning process?

Question 10: Was an economic analysis conducted before this decision was made? If so, please provide a copy. If not, why not?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator James Risch

Witness Name: Secretary Jewell (and Michael Connor)

There are several Idaho federal water storage project feasibility studies that were authorized under BOR (e.g., Snake River systems including; Boise River Project – Lucky Peak, Arrowrock, Anderson, and Deer Flat; Upper Snake River: Teton, Idaho site reservoirs, Deer Flat,).

Question 1: What is the feasibility study status of the BOR Idaho water project studies?

Question 2: What possible actions does BOR consider pursuing on the Snake River system via the outcome of the feasibility studies?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Barrasso

Witness Name: Secretary Jewell

Question 1: During the hearing, I asked you whether BLM's final rule on hydraulic fracturing would allow states to apply for a variance. In response, you stated that BLM's "proposed regulations say that if a state's rule is stronger than the proposed federal rule, that the state's rule will govern." Will BLM allow states (not operators) to apply for a variance from BLM's final hydraulic fracturing rule? If so, under what circumstances will a state be able to obtain a variance from BLM's final rule?

Question 2: During the hearing, we discussed your letter to Governor Matt Mead dated January 26, 2015. In the letter, you state that: "The rider attached to H.R. 83... does not affect the U.S. Fish and Wildlife Service's...court-ordered obligation to make a determination by September 30, 2015, as to whether the greater sage-grouse does or does not warrant protection under the Endangered Species Act." I specifically asked you whether such a "determination" would be legally binding. You stated that you "would have to defer to the solicitors." Please clarify for the Committee whether such a "determination" would be legally binding if the rider remains in effect.

Question 3: I understand there are significant delays in obtaining sundry notices and rights-of-way for natural gas gathering lines on Federal land from BLM. However, in response to one of my questions on this matter, you said that you are "not aware of circumstances where permits have been slowed down by the BLM."

A. What is the total number of requests for sundry notices and rights-of-way for natural gas gathering lines pending at the Bureau of Land Management?

B. What is the total number of requests for sundry notices and rights-of-way for natural gas gathering lines pending at each BLM Field Office?

C. When were each of the pending requests for sundry notices and rights-of-way for natural gas gathering lines first submitted to BLM?

Question 4: On February 20, 2015, the Office of Surface Mining Reclamation and Enforcement (OSM) published a notice in the *Federal Register* to pursue a rulemaking to revise regulations under the Surface Mining Control and Reclamation Act on the use of explosives on surface coal mining operations. A. Does OSM plan to consult with the state regulatory authorities prior to initiating this rulemaking? B. If so, when will this consultation take place and which states will it involve?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of Interior

QUESTIONS FROM SENATOR JEFF FLAKE

Witness Name: Secretary Jewell

Question 1. In the Department's wildfire budget justification, the anticipated cost of wildfire suppression based on the average of the previous 10 years is \$384 million. The Department's anticipated 'worst case' scenario cost, based on a Forest Service mathematical model is \$467 million. The Department claims that the 'on budget' funding is sufficient to fight the predictable 99% of the fires which account for 70% of the costs. But, the Department has only requested enough funds to cover 70% of the *predictable* costs, not the *worst case* costs - meaning that the plan going into the year is to have insufficient funds to fight the fires that are predicted to happen. Why doesn't the department request 'on-budget' discretionary amounts sufficient to cover at least 70% of the worst case scenario?

Question 2. The maintenance cost for the National Park System continues to rise. This year the Department is requesting a 94% increase in deferred maintenance funding and a 67% increase for regularly scheduled maintenance. Together the costs of just maintaining the current park system are over \$308 million. Yet, even with this ever-increasing cost, the Department is proposing to more than triple the amount spent on Federal land acquisitions in FY16 to \$447 million. What impact will the proposed additional land acquisition have on the continually increasing maintenance bill of the National Park System?

Question 3. Last year the Federal government, as a landowner of nearly half the land area in the Western US, met its obligations to counties and local governments by appropriating money out of discretionary funds to make Payment in Lieu of Taxes (PILT) payments. The Department is requesting no discretionary funds for PILT in FY16, relying instead on Congress to use mandatory spending to fund PILT. How does the Department intend to offset the cost of the proposed mandatory spending increase?

Question 4. The recently-passed water rights settlement on the Bill Williams River, Arizona is contingent on the completion of several actions, including approvals by the Lower Colorado River Multi-Species Conservation Plan Steering Committee. What is the Department doing to facilitate the final implementation of the settlement?

Question 5. In July 2014, the Bureau of Reclamation partnered with municipal water providers in Arizona, California, Colorado, and Nevada to create the Colorado River System Conservation Program. How much funding does this program currently have? How many projects has it funded? How much water has been conserved? What has been the effect on reservoir levels? What additional steps will the Department take in FY16 with this program?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of Interior

Question 6. The Department has requested \$244 million for Indian water rights settlements and negotiation. Which new Indian water rights settlements are being prioritized by the department? What will the additional \$16.9 million for negotiation and legal support allow the department to do? What is being done to increase the pace of settling outstanding claims?

Question 7. The Fish and Wildlife Service (FWS) published the final EIS and draft Record of Decision on the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf on November 25, 2014. The final EIS differed significantly from the draft EIS published in July 2014, due in large part to extensive negotiations between the FWS and the Arizona Game and Fish Commission. Senator McCain and I sent a letter to Director Ashe on December 21, 2014 requesting an extension of the public comment deadline to allow stakeholders, including the Arizona Game and Fish Commission, time to analyze the significantly changed proposed regulations. In this letter we specifically identified provisions in the consent decree that allow a modification of the deadline upon showing good cause, consistent with the Federal Rules of Civil Procedure. Did the FWS approach the Department of Justice about seeking an extension of the public comment deadline? What was the Department of Justice's reason for not seeking an extension?

Question 8. There is a proposal for the President to bypass Congress and designate over 1.7 million acres of land in northern Arizona as the Grand Canyon Watershed National Monument. This would lock up not only Federal land, but over 60,000 acres of State Trust land and nearly 30,000 acres of private land. Such a designation would have a devastating effect on the economic productivity of State trust land which is managed primarily to benefit Arizona public schools. It would have a similarly chilling effect on the economic productivity on private land and existing mining operations. The creation of this monument has been strongly opposed by the State of Arizona. Would any of the Department's proposed funding be used to pursue the designation of a National Monument in Arizona?

Question 9. In order to get the most value for every dollar spent on managing National Parks, the Park Service is required to seek competing bids for private companies to run concessions within the National Parks. In instances where a concessionaire has held the contract for extended periods the leasehold surrender interest (LSI) that must be paid to the outgoing concessionaire when a contract changes hands can become a significant barrier to the competitive bidding process. What actions is the Department pursuing to ensure a true competition for park concessions while still respecting the investment made by private companies in their business?

Question 10. Arizona counties and municipalities have tried to work with the BLM to authorize third-party concessionaires to operate on Recreation and Public Purposes Act (RPPA) parcels. The BLM in Arizona will not permit local governments to allow

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of Interior

a third-party concessionaire on the exact same land that the BLM could itself allow a concessionaire to operate if the BLM still controlled the land. During Director Kornze's nomination hearing in December 2013, I asked specifically about the status of the Solicitor's Office evaluation of the August 2011 Instructional Memorandum for Third Party Uses on Recreation and Public Purposes Acts Patents and Leases (2011-162), and when Arizona local governments could expect a decision about the ability to enter into agreements with third-party concessionaires. In the written responses, Director Kornze did not provide an update on the Solicitor's evaluation or an expected timeline for the local governments. What is the status of the Solicitor's office evaluation of the above memorandum, and when does the office expect to make a decision regarding third-party concessionaries to operate on RPPA lands?

Question 11. In a December 5, 2014 report, the Congressional Research Service identified several potential technical discrepancies in how some Federal payments to counties are treated in the calculation of Payments in Lieu of Taxes (PILT) payments. The report specifies that payments made under the Bankhead-Jones Farm Tenant Act by the BLM require a reduction in the following year's PILT payments, but payments for similar lands administered by the Forest Service do not require a reduction. Additionally, the report claims that payments under the Secure Rural Schools (SRS) program require an offset in the following year's PILT levels for payments from the Forest Service but not payments from the BLM. As the agency responsible for making annual PILT payments, does the Department treat SRS payments by the Forest Service and the BLM differently when computing PILT payments? Similarly, does the Department treat payments made under the Bankhead-Jones Act by the Forest Service and BLM differently for purposes of PILT payments?

Question 12. Your testimony includes several references to encouraging individuals to serve, work, and volunteer on public lands. Some have suggested that questions of legal liability act as a disincentive for federal agencies to work with volunteers. Has the Department identified any such impediments to promoting volunteer work on public lands? If so, does the Department have suggestions on how to remove these barriers?

Question 13. The trans-canyon pipeline that supplies water to Grand Canyon National Park has incurred repeated maintenance issues over the last thirty plus years. Most recently, we witnessed two separate closures of Phantom Ranch as crews sought to address pipeline breaks, and a section of the pipeline is undergoing repairs until July of this year. According to some estimates, the cost to replace the entire pipeline would fall between \$100 million and \$150 million with additional operations and maintenance charges. Does the Park Service have updated estimates regarding the cost to repair the trans-canyon pipeline?

Question 14. I understand that the Park Service is evaluating potential solutions to the water pipeline challenges at the Grand Canyon National Park by developing a

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of Interior

water-delivery study. Please describe the alternatives being considered and the costs associated with each option. When do you expect to complete the final study?

Question 15. In evaluating potential water-delivery options, has anyone from the Park Service considered regional water-supply solutions? If so, who has the Park Service met with, and what options are being considered?

Question 16. Is there an opportunity for the Park Service to achieve cost savings by pursuing a regional water-supply solution, as opposed to solely looking at replacement of the trans-canyon pipeline?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Al Franken

Witness Name: Secretary Jewell

Question 1: As you know, a recent court decision reversed the Fish and Wildlife Service's determination to delist the gray wolf from the Endangered Species Act. Right now, farmers and ranchers in Minnesota are concerned about losing their livestock to wolf attacks, and they really need federal funds that can help to protect their herds. For example, the Wolf Livestock Loss Demonstration Program provides funding to livestock producers so they can employ strategies to help prevent wolf attacks from occurring in the first place. Can you tell me why the Fish and Wildlife Service has proposed to discontinue funding for this program in FY 2016?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Martin Heinrich

Witness Name: Secretary Jewell

Question 1: In December, Congress passed the Manhattan Project National Historical Park Act, which directs the National Park Service to establish the Manhattan Project National Historical Park in three states within one year of enactment. Do you expect to be able to meet that deadline?

Question 2: When and how does the National Park Service plan to involve local communities in the park planning process for the Manhattan Project National Historic Park?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of Interior

Questions from Senator Mazie K. Hirono

Witness Name: Secretary Jewell

Question 1: National Monuments

Madam Secretary, I would like to thank the Administration for taking action to protect and preserve lands across our nation, the recent executive action for Honouliuli in Hawaii is a good example. It is a sobering, yet important piece of our nation's history that will serve to educate future generations. In 2009, when I was a member of the House of Representatives I worked with Senators Inouye and Akaka to authorize a special resource study on World War II internment camp sites in Hawaii. Now that the President has designated Honouliuli as a national monument to be managed by the National Park Service, an agency well-seasoned and experienced with management of national monuments across our country. I want to see Honouliuli and other sites recently designated get off to a strong start.

This designation has been a collaborative, inclusive effort—between the local community, Hawaii's Congressional delegation, and other public and private stakeholders. Can you give me a sense of what the path will be to move Honouliuli forward in FY 2016 and beyond?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Mike Lee

Witness Name: Secretary Jewell

Antiquities Act

1. Secretary Jewell, during your confirmation hearing, I asked if you would seek the input of local stakeholders regarding national monument designations. You confirmed you would do this. However on October 31, 2013, you said, “if Congress doesn’t step up to act to protect some of these important places that have been identified by communities and people throughout the country, then the president will take action ... there’s not question that if Congress doesn’t act, we will.” One would think that the elected representatives of the people would be a group of stakeholders whose buy in and support should necessary in designating monuments. Has your opinion changed from the answer you gave me your confirmation hearing?

Transcript, Sally Jewell Confirmation Hearing, March 21, 2013

Senator Lee: *The monument designation question is important because, as you were discussing that with Senator Heinrich, I appreciated your commitment to work with local stakeholders whenever they are dealing with something like monument designation. We had about 2 million acres designated as a monument a few years ago in my state, and it was not only not done without extensive consultation, input, and buy-in of local officials and residents, it was done completely by surprise. It was brought upon us completely by stealth. It was announced from a neighboring state, and we would have like to have had input. So, I would really appreciate if you would commit to me that you would advise the president that it is best to work with locals affected by broad decisions like that in advance of making such a decision.*

Secretary Jewell: *That is certainly consistent with what I believe in and with what the White House believes in as well.*

2. The President added four new national monuments in 2014. Regarding your commitment to an open process with local consultation, were these communities given proper notice before these monuments were designated? Did you change anything about the designation area or timing in relation to the concerns of the impacted community or state?
Last four monuments listed:
3. The Antiquities Act also states that the President is to reserve “the smallest area compatible with the proper care and management of the objects to be protected.” However, of the 11 monuments President Obama has designated so far, just the last three monuments constituted

February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

over 250 million acres of new federal property. Would you consider these areas to be the smallest areas available?

Endangered Species Act

1. As you know, the agency recently put out a rule related to adverse modification – “Definition of Destruction or Adverse Modification of Critical Habitat.” Can you please provide me the statutory authority for this rule?
2. How much does the Department spend on ESA litigation? If attorney’s fees were capped, is it possible that money could instead be used for species recovery?
3. In a hearing before the House Natural Resources Committee on April 3, 2014, you stated that the Department publishes the underlying data for potential ESA listings. However, my staff has experienced many examples where the data used in listings is simply not available because the Department has, in fact, *not* made it available – for example, the underlying data for the listing of the Gunnison sage grouse was not released. Why does the Department publish scientific findings for some listings, but not for others? Can you commit to making available to the public all underlying data for all potential listings?
4. How do you ensure that state and local entities are able to stay informed and participate in the listing determination process? On average, how many meetings does your Department have with state and local officials during the listing process?

National Park Service

1. What is the current maintenance backlog for the National Park Service? What is the proportion of the Service’s budget that is spent on administrative overhead versus park maintenance?
2. How does the Department intend to prioritize its funding to address this backlog? Is it your opinion that we should consider a moratorium on the addition of National Park land until the NPS addresses the backlog in its current portfolio?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Joe Manchin III

Witness Name: Secretary Jewell

Question 1: Secretary Jewell, I am very interested in some of the AML proposals in the Interior budget. As you know, I am very supportive of funding the UMWA's pension plan. Our miners have mined the coal that powered our nation and we need to ensure they continue to receive their hard earned benefits.

I am also interested in the proposal to use AML money for coalfield communities in Appalachia, like those in my home state of West Virginia. As you're aware, this program would require a legislative solution.

In your view, what would this legislative solution look like and can I get your commitment to work with me and other members from the region to ensure this money reaches the communities who need it the most?

Question 2: OSM's budget justification document notes that States and Tribes directly regulate 97 percent of the Nation's coal production under approved regulatory programs. The agency's budget also notes the reduced workload anticipated by OSM.

With the states responsible for most of the regulatory work why does OSM ask for \$5.5 million more for itself while cutting the states grants by more than \$3 million? What is OSM planning to use the extra \$5.5 million for?

Question 3: As you know, I have serious concerns about the potential OSM Stream Buffer Zone rule. The original intent of this rulemaking was in response to the 2008 rule promulgated under the Bush Administration. Why is OSM moving forward with this process when the 2008 rule was vacated?

Question 4: In 2013, the Director of Mining and Reclamation at West Virginia's Department of Environmental Protection testified in the House about their experience as a cooperating agency during the Stream Protection Measures Rulemaking process. Under this agreement, OSM should be coordinating with West Virginia and the other cooperating state agencies.

Instead, OSM denied the agencies the opportunity to review the first chapter of the Environmental Impact Study and provided them only a few days to review and comment on hundreds of pages of the following chapters.

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

After this, according to the West Virginia DEP, OSM “shifted to a nearly complete blackout on information about the development of the Stream Protection Measures Rule.”

Yesterday, 11 states, including West Virginia sent a letter to OSM stating that several of the states are “seriously contemplating withdrawing from the EIS development” due to a continued lack of cooperation from OSM.

Can you explain this?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Lisa Murkowski

Witness Name: Secretary Jewell

Question 1: Please provide a record of the authorities on which the Department relied for the development of the Comprehensive Conservation Plan (CCP) and accompanying Environmental Impact Statement for the Arctic National Wildlife Refuge (EIS), including, the approval for and authorization of funds expended by year, including Congressional authorization or appropriation, for the development of the CCP and EIS.

Question 2: Please provide a detailed current plan, calendar and itemized budget for the development and implementation of the Step-Down Plans identified in the CCP and EIS.

Question 3: Please a comprehensive list of the dates and times of any meeting, call or other interaction held by the Department of the Interior (DOI) or any of its component parts including the United States Fish and Wildlife Service (USFWS) or contractor operating on behalf of DOI, with any entity not considered a cooperative agency, including any corporation or non-governmental organization.

Question 4: Please identify in a log any legal or policy analysis provided to or given by DOI or USFWS related to sections 1002, 1003 or 1326 of ANILCA as it might apply to the CPP or EIS.

Question 5: Please provide a comprehensive list of programs or initiatives within DOI in support of the US Chairmanship of the Arctic Council and in fulfillment of Executive Order Enhancing Coordination of National Efforts in the Arctic. Please include in the list a identification of the funds expended or to be expended for any and all programs or initiatives on the list.

Question 6: with respect to the issue of climate change, please provide a comprehensive list of DOI programs or initiatives dedicated to adaptation or promoting resilience in communities in response to a changing climate and the funds associated with these initiatives or programs.

Question 7: Please provide an itemization of any funds expended since January 1, 2012 related to international travel costs for DOI personnel in support for arctic initiatives, studies, programs or workshops.

Question 8: Please provide an estimate of any funds expended since January 1, 2012 related to Alaska specific travel costs for DOI personnel in support for arctic initiatives, studies, programs or workshops.

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Question 9: In the 2016 Budget Justification, the Bureau of Land Management (BLM) notes: “*Since 2009, the BLM has approved 52 renewable energy projects, including 29 utility-scale solar facilities, 11 wind farms, and 12 geothermal plants, with associated transmission corridors and infrastructure to connect with established power grids. If fully constructed, these projects will provide more than 14,000 megawatts of power, or enough electricity to power about 4.8 million homes, and provide over 20,000 construction and operations jobs.*” (p. I-3) Please provide a detailed timeline for each of these identified projects including (1) date on which BLM received an initial application for approval (2) date on which a ROD was issued (3) description of the project – including estimated capital costs as well as construction and operating jobs and (4) estimated cost of mitigation measures required by BLM.

Question 10: Please provide an equivalent description of the number of new oil and gas units or developments approved by BLM since 2009.

Question 11: In the 2016 Budget Justification, BLM notes that since 2000, BLM has permitted nearly 47,000 new wells – please provide the number of permitted new wells since 2009.

Question 12: Please provide the number of permitted new wells since 2009 that have been drilled.

Question 13: Please provide estimates of revenues from NPRA production provided to Congress, the White House or other similar governmental institution issued prior to, or associated with, the passage of the Energy Policy Act of 2005.

Question 14: Please provide an accounting of revenues received from production in the National Petroleum Reserve Alaska since passage of the Energy Policy Act of 2005.

Question 15: In its *Report to Congress June 2006* related to Sec. 207 of the Alaska Land Transfer Acceleration Act, BLM identified roughly 56,870,900 acres of BLM-managed lands that are withdrawn by “d-1 PLOs” and made recommendations – primarily that those d-1 withdrawals could be lifted. With next year being ten years since that report was issued I feel compelled to ask if anything has happened.

Question 16: Please provide an update on where the Department stands in settling with the state on the proper process to complete patenting of the state’s lands. The Alaska Statehood Act set up a very specific process for federal surveying to complete the patented transfer of lands. To reduce its costs, the department has proposed a new surveying process, taking advantage of GPS coordinates. But apparently there is now a difference of opinion between the State of Alaska and your Department over the process

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

to be used. Please describe that disagreement and how the department plans to resolve the issue?

Question 17: Relating to the U.S. Geological Survey budget, the USGS is a major source of grant funding for a series of seismic monitors on volcanoes in Alaska, largely on the Alaska Peninsula and the Aleutian Chain, near the air corridor for flights to America from Asia. The grants help fund the work of the Alaska Volcano Observatory, a joint entity between USGS and the University of Alaska. Ash from eruptions is particularly dangerous to such flights as shown by the near crash of a jumbo jet years ago.

- A) The problem is many of the seismic monitors need not just upgrading to digital technology, but antenna and battery replacements since the stations are rapidly going off line.
- B) I believe this is causing a real health and safety issue not just for Alaskans, but international passengers on trans-Pacific flights. While Congress added money to your budget this year to help with the maintenance costs on the network, your FY 16 budget seems to propose only a slight increase for hazards funding, even while your overall budget calls for a \$759.2 million increase – 6% above FY 15. That is disappointing since estimates are that it will require an additional \$5 to \$7 million a year for perhaps five years just to keep the Alaska seismic network functioning, much less to meet the entire U.S.G.S. earthquake monitoring budget needs.
- C) Why is there not more money in your spending plan devoted to basic health and safety needs?

Question 18: The State of Alaska a number of years ago requested that it receive the conveyance of several thousand acres along the Susitna River in Southcentral Alaska as part of its statehood conveyance. In 2013 my staff had been assured by Department personnel that the transfer would be completed, since none of the land is in conservation system units. But apparently the transfer is still pending. What is the hold up and when will the transfer of the acreage be completed to the State of Alaska?

Question 19: We have spoken often about the need for the Department to speed up the cleanup of 136 abandoned oil and gas exploration wells in northern Alaska, wells drilled by the government in both the 1940s and late 1980s and early 1990s. You had about \$2 million in your budget last year for such cleanups. Fortunately in the Helium bill in 2013 we were able to increase your cleanup funding by \$50 million so that the Department will be able to tackle the worst of the wells in coming years and gain efficiencies by being

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

able to reduce mobilization costs and improve coordination of the cleanup efforts. But that \$50 million will not solve all of the problems.

- A) My question is this: when will the Department change its priorities and increase its regular budgetary funding to tackle environmental cleanups of abandoned federal wells on an annual basis?
- B) Abandoned well cleanup truly is a federal responsibility. How will you assure me that we aren't back in the same position in four or five years of having insufficient funding to clean up environmental well problems on federal lands?

Question 20: Recently I have received a number of complaints from placer miners in the eastern Interior part of Alaska about Department policies involving the current and future regulation of placer mining. There are concerns about the draft Eastern Interior Resource Management Plan and its apparent designation of about 700,000 acres of the FortyMile River mining district as "areas of critical environmental concern" where the Department is considering closing the area to mining. Significantly, as I understand it, this land was specifically kept open to mining by Congress in 1980's Alaska National Interest Lands Conservation Act when it was not included in the Yukon-Charley National Preserve. There are also a host of concerns about new regulations for mining efforts in still open areas, concerning about reclamation cost estimates, reclamation standards, new bonding processes and the turnover in our compliance staff that makes consistency in mining enforcement difficult at best.

- Recognizing that the issue of mining on the FortyMile is complicated, please tell me the reason for all of these changes in mining practice now in Interior Alaska, when mining had been working seemingly fine based on the 1983 management plan crafted just after passage of ANILCA?

Question 21: Just recently I learned that your Department has decided to implement a new southern boundary of the wilderness area inside Denali National Park and Preserve. Apparently 35 years ago when the Alaska lands act passed, no one noticed that the world is round and that map boundaries might need to be adjusted for the curvature of the earth. The problem appears to be that now the Department wants to add up to fifth-eighth of a mile to the wilderness area south of Denali. That might not seem like much, but it could have significant impacts. For example, there are potential impacts on:

- Hundreds of commercial air taxi and scenic flights to see the mountain.
- Potential for impact climbers getting to base camp to climb Denali.
- Snowmachine recreation efforts in the eastern sections of the park, and caribou and moose hunting for both subsistence and sport hunters in the Cantwell area.

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Apparently the boundary change will add about 23,500 acres to the wilderness area in the park. But Alaska lands act (Sect. 103c) specifically limits “minor boundary adjustments” to just 23,000 acres.

- Will the Department work with us, either administratively or if a legislative fix is required, to make sure that this boundary expansion does not impact tourism and recreational hunting interests in Southcentral Alaska?

At a time when Department policy changes are having such a huge impact on future oil and gas and mineral development, this change that could impact another major leg of the state’s economy – tourism – may be exceptionally hard for Alaskans to accept, especially 35 years after ANILCA’s passage and after business and lifestyles have adapted to the changes generated by passage of the lands act.

Question 22: In late 2013 it became clear that the Cook Inlet Region Inc. (CIRI) Alaska Native Regional Corp. was coming up short by 42,000 acres of the land conveyance it was promised as a result of the Alaska Native Claims Settlement Act of 1971. The shortage was the result of the complex settlement of land conveyances to CIRI village corporations that had been complicated by the 1976 Cook Inlet land exchange. For the past year the BLM in Alaska has acknowledged that CIRI is short of its required conveyance and apparently has been working to identify solutions. Please update us on where Interior is with crafting a solution to the CIRI land shortage, and how soon such a fix may be proposed by your Department?

Question 23: The Department has a legal responsibility to fulfill the government's obligations under the Alaska Native Claims Settlement Act (ANCSA). Under ANCSA, Alaska Native Corporation often had to select lands for conveyance that were outside their traditional aboriginal lands because those lands were already occupied by the Federal government, the Department of Defense, or various state and local governmental entities. Accordingly, land exchanges and selection of other lands was necessary to fulfill Alaska Native Corporation (ANC) entitlements under ANCSA.

Given that ANCs have been denied their traditional aboriginal lands and, out of convenience to the government, have selected other lands and are now trying to develop those lands, it’s troubling--but not surprising--that I often hear that your Department delays and impedes the issuances of permits to Alaska Natives who wish to develop their subsurface lands within the boundaries of a National Refuge.

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

- A) What are you going to do to make sure your department protects Alaskan Native Corporations' rights to the lands selected under ANCSA and that the agencies in your department expeditiously assist them in permitting, conveyance, and other dealings with your department?

Question 24: The U.S. Geological Survey recently released its Mineral Commodity Summaries report for 2015, and it shows that the United States is at least 50 percent reliant on foreign nations for at least 43 different commodities. The report also states, as it annually does, that "U.S. import reliance has increased significantly since 1978, the year that this information was first reported."

- A) Is our nation's foreign mineral dependence a matter of concern to you?
- B) What are you doing, at Interior, to help reduce and eliminate it?
- C) Do you believe the proposals in Interior's budget request – which would impose new taxes and fees on top of an already-slow permitting process – will somehow increase our nation's mineral security?
- D) It takes an average of 7 to 10 years (even absent significant litigation) to permit a new mine in the United States, which is considerably longer than other countries with similar environmental standards. Will you commit to reviewing the federal mine permitting process, and will you commit to identifying steps to make the process more efficient?

Question 25: The FY 2016 Land and Water Conservation Fund budget request is \$900 million: \$400 million in discretionary funding and \$500 million in permanent funding for DOI agencies and the Forest Service. In 2017 the President's budget request proposes that all \$900 million would be mandatory funding.

- A) Please explain to me why, with such an enormous maintenance backlog (According to CRS, over \$22 billion at the federal agencies combined, \$13 billion at NPS alone), DOI would propose to focus such a large amount of funding on acquiring more federal land?
- B) Shouldn't these funds be used to pay down the maintenance backlog to, at least, stem the growth of the backlog?
- C) More generally, how do you reconcile additional federal land acquisition at this time of staggering national debt and maintenance backlogs?

The budget proposal seeks to turn the LWCF program into a permanent mandatory program without making any changes to it. I don't support that. I am also concerned that this program has been overly focused on federal land acquisition. Part of the reason for that is the 60 percent set-aside for state-side grants was stripped from the LWCF Act.

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

These state-side grants are valuable tools to develop state parks and other outdoor recreation opportunities on non-federal land.

- D) Shouldn't a larger percentage of LWCF funds be set-aside for state-side grants?
Why or Why not?

Question 26: As many colleagues and I have emphasized many times, we have a nearly \$13 billion parks maintenance backlog. And with that staggering figure, there is a very strong argument that we should not be adding any new parks to the system until we can take care of what we already have. Alaskans are particularly concerned with the prospect of additions of new Parks with roughly 2/3 of the entire system located within my State.

- A) With the Parks Centennial upon us in 2016, it would seem that this could be a great time to reevaluate how we establish and maintain the Parks as well as how we build support for the Parks in their local communities, nationwide and even internationally. In a time of severe budget constraints, all options need to be on the table. One idea that I am particularly interested in is increasing private donations to the system through private endowments.
- B) Will you agree to work with me and the other members of this committee to review options and find a path forward to create a sustainable supplementary funding stream for America's Parks for the second century?

Question 27: I have some questions regarding the general approach of the National Park Service to rule making as well as some questions regarding a specific rule proposed by NPS.

- A) In the past, NPS has put into place regulations that shortened the hunting seasons as defined by the Alaska Board of Game. When instituting the closures, the NPS has cited "Park Values" in those closures.
- I. Please provide me with a definition of "Park Values"?
- II. Do you believe that the State of Alaska has the right to manage wildlife within the borders of the State? When is it proper for the federal government to reverse State Board of Game decisions?
- B) Recently, the National Park Service has proposed a rule (Regulation Identifier Number 1024-AE21) that would close a number of preserves in Alaska to the take of predators, such as bear and wolf.

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

- I. I am aware of several stakeholders who have contacted you regarding their concerns about the potential for this proposed regulation to unduly impact subsistence communities across Alaska. One of these stakeholders includes the Wrangell-St. Elias National Park Subsistence Resources Commission, an official Federal advisory committee created by the Alaska National Interest Lands Conservation Act (ANILCA) to make recommendations to you, the Secretary of the Interior, regarding fish and wildlife resources for subsistence dependent communities. I would like to hear from you how the Department proposes to avoid any undue impact on these communities, communities whose lives depend on the take of predators.
- II. The take of certain predators by Alaska Natives is done for cultural, economic, traditional, and spiritual needs. Can you describe to me how this proposed rule incorporates these significant considerations?

Question 28: Please describe the role of DOI in any additional discussions that have taken place with the State Department since the Regional Recommendation was finalized in December 2013. Who participated in these discussions? Does DOI defer to other agencies (i.e., the U.S. Entity) in discussions with the State Department regarding potential U.S. negotiating positions? Why or why not? If not, what are the major outstanding points of disagreement between DOI and other agencies?

Question 29: What is DOI's position on the "ecosystem-based function" principles and recommendations outlined in the Regional Recommendation? Please provide specific examples of the department's positions on these principles and recommendations?

Question 30: Total domestic oil production increased 15% from 2012 to 2013. Can you confirm that on federal lands, however, it only increased by 1% over the same period?

Question 31: While EIA is still assessing the 2014 data, according to its latest Monthly Energy Review, total U.S. field production averaged 16.3% higher in 2014 than in 2013. How much do you expect oil production on federal lands has increased over the past year?

Question 32: The Bureau of Land Management issued 3,769 drilling permits in FY 2014. This is one less than it approved in FY 2013, and 2,848 fewer than the 6,617 permits that were approved in FY 2008. Is it accurate to say that permits have fallen by 43% during this administration and that you are doing little if anything to correct this trend?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Question 33: Over the past decade, has federal natural gas production increased or decreased? What is the Department doing to reverse this trend?

Question 34: Given the nature of U.S. Geological Survey's core mission, many of us have requested that an economic geologist to be nominated to lead that agency. We did have a nominee in the last Congress, but she was not brought up for confirmation by the previous majority, and the agency has now gone without a confirmed director for two full years.

- A) Can you tell us when you anticipate the President will send this Committee a nominee to consider for USGS?
- B) Can you tell us whether the President is taking our request for an economic geologist seriously, as he searches for a new candidate?

Question 35: The Department of Interior is mandated to provide a subsistence priority on federal land, yet nearly every rural community in Alaska struggles to meet their subsistence needs because of low moose populations, low caribou populations – in some cases, and nearly non-existent king salmon populations.

- A) What is the Department's plan to ensure that adequate amounts of food can be put on the table?
- B) How do you reconcile a mandate to provide a subsistence priority with the competing mandates that creating wilderness, not managing for abundant and healthy wildlife populations, and limiting access by subsistence hunters fishers?
- C) Why is it difficult for your agency to manage predators to increase prey species to sustainable levels?

Question 36: In 2013, I wrote a letter to the Department asking what you could do to speed up the cleaning of environmental contamination on lands that you have transferred to Alaska Native Corporations to satisfy their aboriginal land claims under the 1971 Alaska Native Claims Settlement Act. Your Department studied the issue in 1998 and proposed a six-point effort to speed up the cleaning of such contamination. Last January in a letter to me you proposed that the Department would update its contaminated lands survey and then address the other five recommendations all involving how to tackle the actual cleanups. I had been led to believe that updated list would be finished in the fall – there were more than 650 sites on the old list—unfortunately, it was not completed.

- A) When will an updated, comprehensive list of contaminated sites on Native conveyed lands be finished? What will the Department propose to actually speed up and fund the cleanup of the contamination –all caused by the federal government prior to transfer of the land to Alaska Natives?
- B) Most recently, the Department's current spending authorization requires the Department to provide to Congress by June of this year a detailed report including the comprehensive inventory of contaminated land conveyed through ANSCA

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

including sites identified since the 1998 report and a detailed plan addressing how the Department intends to complete the cleanup of each contaminated site. What is the status of the effort to comply with this recent statutory directive?

Question 37: In the past Alaska Fire Service had two CL215s which carry about 1,400 gallons. There are plans to replace these with Fire Boss Single Engine Air Tanker (SEAT) aircraft.

- What is the cost per gallon dropped for the two aircraft?
- What is the cost difference between the CL215s vs the Fire Boss Single Engine Air Tanker (SEAT) in total budget cost to AFS?
- How effective do you expect the SEATs to be at Initial Attack?

Question 38: The BLM's FY16 budget request proposes to reduce funding for the Oregon and California Grant Lands program by \$6.043 million overall, with a \$3.8 million decrease in Other Forest Resources management and a \$3.2 million decrease in Western Oregon Resource Management Planning. The BLM Budget Justification also shows that the agency plans to offer less timber for sale in FY 16 (204 mmbf, down from 215 mmbf in FY15 and 239.8 mmbf in 2014)

- What is the updated schedule for finalizing the new Resource Management Plans? If planning activities will continue into FY16 how would the proposed \$3.2 million decrease in the planning account impact the agency's ability to finalize the plans and maintain the timber sale program?
- The BLM is under Court Order to meet the mandate of the O&C Act to offer the Allowable Sale Quantity (ASQ) in at least two districts in Western Oregon. How will the proposed reductions in the FY16 timber sale program affect the Court Order requirements to increase timber sale levels? Will the BLM meet the terms of this Court Order to offer the ASQ in certain districts as well as offering enough timber to meet the ASQ's of other districts in the O&C in FY16?
- How much money does the BLM spend annually to comply with the "Survey and Manage" requirements of the Northwest Forest Plan in Western Oregon? How many acres of BLM timberland in Western Oregon are encumbered by complying with the "Management Recommendations" associated with the "Survey and Manage" requirements of the Northwest Forest Plan?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Bernie Sanders

Witness Name: Secretary Jewell

The Department of Interior manages the vast amount of mineral and energy assets that are owned by the American people. There have been numerous reports and studies by the Government Accountability Office and others that suggest that the American people are in fact not getting a fair return on these assets that they own, and instead that the big corporations like oil and coal companies are reaping huge windfalls. In addition, these activities are being done in ways that increase carbon emissions which are making climate change worse. I believe that DOI can and should be doing more to ensure that the American people receive a fair return from the development of these resources.

- Question 1: For coal on federal lands, oil and gas development on federal lands, and offshore oil and gas development, what is the Department looking at specifically to ensure that taxpayers are getting fairly compensated? Please include all relevant rulemakings under development and an estimate of their timing for finalization.
- Question 2: What statutory changes are needed to expedite DOI's ability to recover fair market returns from the use and development of taxpayer-owned minerals, or access to federally-owned lands?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Ron Wyden

Witness Name: Secretary Jewell

Question 1: Secretary Jewell, I want to take a moment to focus on an issue of particular importance to my home state of Oregon and to the Northwest region—the Columbia River Treaty.

In November of 2013, when I was Chairman of the Committee, I held a hearing on the modernization of the Columbia River Treaty, urging the Administration to follow the consensus document known as the “Regional Recommendation,” and to engage Canada expediently in negotiations. Now, over a year later, it is my impression that the Administration has not been expedient about addressing this issue.

What can you tell me about why this process has taken so long? And what will it take for you and the Administration to act to advance the Columbia River Treaty and engage Canada?

Question 2: As you know, the National Park System turns 100 years old next year, and during its time has become one of America’s greatest success stories. In nearly every state, Americans can visit a national park, trail, or monument and learn about the nation’s rich cultural and ecological heritage. To ensure that these parks remain the treasures that they are, it’s imperative that the Administration and Congress invest in them to keep them maintained and safe for visitors.

What are the Department of Interior’s plans for ensuring that the deferred maintenance backlog remains a priority and that the backlog “to-do” list gets consistently checked off?

Question 3: I understand that some of my colleagues were suspicious about what you and the Administration were doing to protect sage grouse habitat, but in Oregon, this work is really important. Can you assure me that you’ll continue the important work you are doing with private landowners in places like Eastern Oregon?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Rob Portman

Witness Name: Secretary Jewell

Question 1: When groups want work together to raise money for a project on a certain park, for example: let's assume a structure in Cuyahoga National park needs a new roof, how can groups who donate money through the current Centennial Challenge ensure all the money from their donations comes back to the roof in Cuyahoga that they donated for without having to donate it to the federal government's centennial challenge?

Question 2: Last year the FY15 Omnibus provided \$10 million to reinvest in the Centennial Challenge. Can you provide a status of the projects for FY15, what projects or types of projects have been chosen?

Question 3: When was the last time Ohio was mapped via USGS using LIDAR technology, and what percentage of the state has been mapped using LIDAR as part of 3D Elevation Program?

Question 4: The Service proposed to list the northern long-eared bat as endangered under the ESA in October 2013, but it is my understanding that service is now leaning toward a determination that the species threatened, and issuing a 4(d) rule. For species listed as threatened, the Service may issue a 4(d) rule to provide protections that are deemed necessary and advisable for conservation of the species. The 4(d) rule as I understand it would provide limited exemptions for forest management practices, maintenance and limited expansion of transportation and utility rights-of-way, removal of trees and brush to maintain prairie habitat, and some tree removal projects.

But there remains concern that the proposed 4(d) rule, which would accompany a potential threatened listing, does not accommodate similar exemptions for oil and gas activities, renewable power (such as solar and wind), commercial or residential construction, or agricultural practices. Major industries that drive our economy.

Can I get your commitment that you will work with folks in those industries to ensure equal consideration within the 4(d) rule for these types of activities that are substantially similar to activities exempted under the rule?

Hi Stephenne and Jeremy,

Hope you are both doing well.

Please see the attached letter that went out yesterday in the mail from Rep. Gosar and 24 of his colleagues to President Obama. Secretary Jewell was Cc'd on this letter. Wanted to

send you all an electronic copy for your records as a result.

Thank you.

Sincerely,

Jeff Small

February 18, 2015

The Honorable Barack Obama
President
The White House
1600 Pennsylvania Avenue N.W.
Washington, D.C. 20500

Dear President Obama:

We write to you today to express deep concern and to ask that you not use an Executive Order to declare the Grand Canyon Watershed a National Monument. We request that any designation pursued be done so in a way that includes public input and seeks congressional approval. Efforts in managing this pristine area of pride for our nation are currently being handled appropriately and locking up 1.7 million acres would be a step backwards.

Arizona is blessed with some of the most beautiful and unique landscapes on Earth. From the saguaro-studded hills of the Sonoran Desert to the snowcapped ridges of the San Francisco Peaks and the awe-inspiring chasms of the Grand Canyon, recreational enjoyment of Arizona's diverse landscapes is deeply ingrained into the culture and daily lives of Arizona residents and visitors from around the world. For generations, Arizonans have enjoyed responsible, multiple-use recreation on these public lands, and have been active participants in conserving this amazing public resource.

At a time when the National Park Service, which is one of the federal agencies responsible for managing our national monuments, is already struggling with an annual budget shortfall, why would we burden them with new responsibilities? Due to budget strains, many parks are reducing access and limiting staff to handle current shortfalls. The NPS maintenance backlog alone is currently at \$12 billion and rising. We would ask that no new designation be placed on our lands until obligations to maintain our current parks are met.

The Arizona Game and Fish Commission continues to voice its concerns regarding such a designation. The Commission, a constitutionally-mandated group of citizen volunteers, has already considered the alternatives and voted in 2012 to oppose creation of the monument.

We agree with the Commission, which stated that changing the management objectives of this large swath of land would negatively “impact public access, recreation, grazing, and the ability of the commission to manage wildlife.” The Arizona Game and Fish Commission also accurately pointed out that nearly 50 percent of all land in Arizona is already under federal management and that “more than 77 percent of Arizona’s lands are restricted from public access and recreation...” Furthermore, the Commission noted that more than 10 million acres in Arizona is already managed as some form of wilderness, and that the state already has more designated wilderness acreage than 47 other states. Furthermore, Arizona already has more national monuments than any other state with a total number of 18.

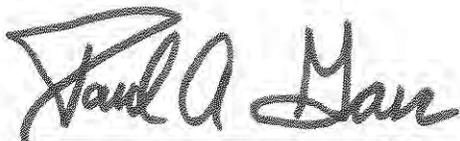

The nearly two million acres inside the Grand Canyon Watershed are already managed with great success through cooperation between federal and state agencies. We believe lands already managed by government for a diverse public do not need the additional layer of bureaucracy and restrictions that a National Monument designation would bring. Nor should these lands be closed to public access to natural resources and recreational opportunities. Because of their integral role in the everyday life of the American people, we strongly oppose any conversion of public lands in this area from multiple-use to more restrictive land use designations.

In addition to our opposition to locking these lands away from public access, we are also concerned that this decision may be made unilaterally as an Executive Order, devoid of any public input process or consultation with related state level agencies. A unilateral designation of the Grand Canyon Watershed as a National Monument would erode the extensive cooperation and success that federal and state agencies in Arizona have achieved to date. We urge you to respect and support the successful multiple-use of this land as currently executed.

The ability of the Arizonans to enjoy the responsible use of their public land must be respected. Again, we ask that you please refrain from any unilateral National Monument designation of the Grand Canyon Watershed.

Thank you for your consideration of this request and we would appreciate a timely response to this letter. Please feel free to contact Jeff Small in Rep. Gosar’s office at jeff.small@mail.house.gov regarding this matter.

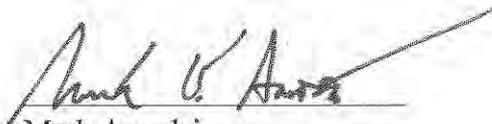

Sincerely,

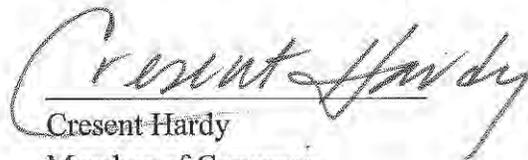

Paul A. Gosar, D.D.S.

Hi Sarah,

Attached are Questions for the Record submitted to Secretary Jewell by various Energy Committee Members regarding the hearing which was held on February 25, 2015 entitled "The FY 2016 Budget Request for the Department of the Interior." We request that Secretary Jewell provide her responses to these questions by **Tuesday, March 24, 2015** for inclusion in the official hearing record.

Please provide the responses directly to me, and feel free to contact me if you have any questions.

Sincerely,

Darla Ripchensky, PMP

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Shelley Moore Capito

Witness Name: Secretary Jewell

Question 1: The office of Surface Mining (OSM) has spent more than \$8 million over the past several years to develop a rule to replace the 2008 stream buffer zone rule. OSM recently repealed the 2008 rule and reinstated the rules that were in place before 2008. You previously committed to taking a fresh look to decide whether any new rulemaking was necessary. In light of these developments, is there any need for spending more tax-payer money on a new rulemaking?

Question 2: The earlier stream buffer zone rule development included several cooperating primacy states, including West Virginia, as part of the NEPA process. Has this arrangement continued? If so, when was the last time OSM communicated with those cooperating state agencies on the status of any further rule development?

Question 3: I want to ask about habitat conservation, and in particular that related to the Northern Long-eared bat, which is a huge issue in my home state. It appears that the assumptions made by BLM and FWS about drilling impacts in connection with the Northern Long-eared do not take into consideration recent technologies developed and in use by the oil and gas industry. In fact, the majority of studies on oil and gas industry impacts are based upon assumptions of well density and drilling footprints that are decades old. Shouldn't the conservation and management strategies of FWS and BLM incorporate information from engineers and other industry specialists who develop and implement technological innovations that improve the efficiency of oil and gas operations and reduce their environmental impacts? Also, why don't BLM-FWS Assumptions on Effects of Oil and Gas Development take into account new technologies and smaller drilling footprints?

Question 4: On July 17, 2014, the US Fish and Wildlife Service announced that it was banning the use of neonicotinoids on USFWS lands. What other federal agencies did the USFW consult before making this decision?

Question 5: What input, if any, did USFWS receive from these agencies?

Question 6: Were any NGO organizations consulted or have input into this decision?

Question 7: Why was this decision not published in the Federal Register for public comment?

Question 8: Are agricultural operations on USFWS lands reviewed as a part of each refuge management plan where such operations occur?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Question 9: Why was this action not undertaken as a part of refuge management planning process?

Question 10: Was an economic analysis conducted before this decision was made? If so, please provide a copy. If not, why not?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator James Risch

Witness Name: Secretary Jewell (and Michael Connor)

There are several Idaho federal water storage project feasibility studies that were authorized under BOR (e.g., Snake River systems including; Boise River Project – Lucky Peak, Arrowrock, Anderson, and Deer Flat; Upper Snake River: Teton, Idaho site reservoirs, Deer Flat,).

Question 1: What is the feasibility study status of the BOR Idaho water project studies?

Question 2: What possible actions does BOR consider pursuing on the Snake River system via the outcome of the feasibility studies?

**Questions for the Record
February 24, 2015**

Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator James Risch

Witness Name: Secretary Jewell (and Michael Connor)

There are several Idaho federal water storage project feasibility studies that were authorized under BOR (e.g., Snake River systems including; Boise River Project – Lucky Peak, Arrowrock, Anderson, and Deer Flat; Upper Snake River: Teton, Idaho site reservoirs, Deer Flat,).

Question 1: What is the feasibility study status of the BOR Idaho water project studies?

Question 2: What possible actions does BOR consider pursuing on the Snake River system via the outcome of the feasibility studies?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Barrasso

Witness Name: Secretary Jewell

Question 1: During the hearing, I asked you whether BLM's final rule on hydraulic fracturing would allow states to apply for a variance. In response, you stated that BLM's "proposed regulations say that if a state's rule is stronger than the proposed federal rule, that the state's rule will govern." Will BLM allow states (not operators) to apply for a variance from BLM's final hydraulic fracturing rule? If so, under what circumstances will a state be able to obtain a variance from BLM's final rule?

Question 2: During the hearing, we discussed your letter to Governor Matt Mead dated January 26, 2015. In the letter, you state that: "The rider attached to H.R. 83... does not affect the U.S. Fish and Wildlife Service's...court-ordered obligation to make a determination by September 30, 2015, as to whether the greater sage-grouse does or does not warrant protection under the Endangered Species Act." I specifically asked you whether such a "determination" would be legally binding. You stated that you "would have to defer to the solicitors." Please clarify for the Committee whether such a "determination" would be legally binding if the rider remains in effect.

Question 3: I understand there are significant delays in obtaining sundry notices and rights-of-way for natural gas gathering lines on Federal land from BLM. However, in response to one of my questions on this matter, you said that you are "not aware of circumstances where permits have been slowed down by the BLM."

A. What is the total number of requests for sundry notices and rights-of-way for natural gas gathering lines pending at the Bureau of Land Management?

B. What is the total number of requests for sundry notices and rights-of-way for natural gas gathering lines pending at each BLM Field Office?

C. When were each of the pending requests for sundry notices and rights-of-way for natural gas gathering lines first submitted to BLM?

Question 4: On February 20, 2015, the Office of Surface Mining Reclamation and Enforcement (OSM) published a notice in the *Federal Register* to pursue a rulemaking to revise regulations under the Surface Mining Control and Reclamation Act on the use of explosives on surface coal mining operations. A. Does OSM plan to consult with the state regulatory authorities prior to initiating this rulemaking? B. If so, when will this consultation take place and which states will it involve?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of Interior

QUESTIONS FROM SENATOR JEFF FLAKE

Witness Name: Secretary Jewell

Question 1. In the Department's wildfire budget justification, the anticipated cost of wildfire suppression based on the average of the previous 10 years is \$384 million. The Department's anticipated 'worst case' scenario cost, based on a Forest Service mathematical model is \$467 million. The Department claims that the 'on budget' funding is sufficient to fight the predictable 99% of the fires which account for 70% of the costs. But, the Department has only requested enough funds to cover 70% of the *predictable* costs, not the *worst case* costs - meaning that the plan going into the year is to have insufficient funds to fight the fires that are predicted to happen. Why doesn't the department request 'on-budget' discretionary amounts sufficient to cover at least 70% of the worst case scenario?

Question 2. The maintenance cost for the National Park System continues to rise. This year the Department is requesting a 94% increase in deferred maintenance funding and a 67% increase for regularly scheduled maintenance. Together the costs of just maintaining the current park system are over \$308 million. Yet, even with this ever-increasing cost, the Department is proposing to more than triple the amount spent on Federal land acquisitions in FY16 to \$447 million. What impact will the proposed additional land acquisition have on the continually increasing maintenance bill of the National Park System?

Question 3. Last year the Federal government, as a landowner of nearly half the land area in the Western US, met its obligations to counties and local governments by appropriating money out of discretionary funds to make Payment in Lieu of Taxes (PILT) payments. The Department is requesting no discretionary funds for PILT in FY16, relying instead on Congress to use mandatory spending to fund PILT. How does the Department intend to offset the cost of the proposed mandatory spending increase?

Question 4. The recently-passed water rights settlement on the Bill Williams River, Arizona is contingent on the completion of several actions, including approvals by the Lower Colorado River Multi-Species Conservation Plan Steering Committee. What is the Department doing to facilitate the final implementation of the settlement?

Question 5. In July 2014, the Bureau of Reclamation partnered with municipal water providers in Arizona, California, Colorado, and Nevada to create the Colorado River System Conservation Program. How much funding does this program currently have? How many projects has it funded? How much water has been conserved? What has been the effect on reservoir levels? What additional steps will the Department take in FY16 with this program?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of Interior

Question 6. The Department has requested \$244 million for Indian water rights settlements and negotiation. Which new Indian water rights settlements are being prioritized by the department? What will the additional \$16.9 million for negotiation and legal support allow the department to do? What is being done to increase the pace of settling outstanding claims?

Question 7. The Fish and Wildlife Service (FWS) published the final EIS and draft Record of Decision on the Proposed Revision to the Regulations for the Nonessential Experimental Population of the Mexican Wolf on November 25, 2014. The final EIS differed significantly from the draft EIS published in July 2014, due in large part to extensive negotiations between the FWS and the Arizona Game and Fish Commission. Senator McCain and I sent a letter to Director Ashe on December 21, 2014 requesting an extension of the public comment deadline to allow stakeholders, including the Arizona Game and Fish Commission, time to analyze the significantly changed proposed regulations. In this letter we specifically identified provisions in the consent decree that allow a modification of the deadline upon showing good cause, consistent with the Federal Rules of Civil Procedure. Did the FWS approach the Department of Justice about seeking an extension of the public comment deadline? What was the Department of Justice's reason for not seeking an extension?

Question 8. There is a proposal for the President to bypass Congress and designate over 1.7 million acres of land in northern Arizona as the Grand Canyon Watershed National Monument. This would lock up not only Federal land, but over 60,000 acres of State Trust land and nearly 30,000 acres of private land. Such a designation would have a devastating effect on the economic productivity of State trust land which is managed primarily to benefit Arizona public schools. It would have a similarly chilling effect on the economic productivity on private land and existing mining operations. The creation of this monument has been strongly opposed by the State of Arizona. Would any of the Department's proposed funding be used to pursue the designation of a National Monument in Arizona?

Question 9. In order to get the most value for every dollar spent on managing National Parks, the Park Service is required to seek competing bids for private companies to run concessions within the National Parks. In instances where a concessionaire has held the contract for extended periods the leasehold surrender interest (LSI) that must be paid to the outgoing concessionaire when a contract changes hands can become a significant barrier to the competitive bidding process. What actions is the Department pursuing to ensure a true competition for park concessions while still respecting the investment made by private companies in their business?

Question 10. Arizona counties and municipalities have tried to work with the BLM to authorize third-party concessionaires to operate on Recreation and Public Purposes Act (RPPA) parcels. The BLM in Arizona will not permit local governments to allow

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of Interior

a third-party concessionaire on the exact same land that the BLM could itself allow a concessionaire to operate if the BLM still controlled the land. During Director Kornze's nomination hearing in December 2013, I asked specifically about the status of the Solicitor's Office evaluation of the August 2011 Instructional Memorandum for Third Party Uses on Recreation and Public Purposes Acts Patents and Leases (2011-162), and when Arizona local governments could expect a decision about the ability to enter into agreements with third-party concessionaires. In the written responses, Director Kornze did not provide an update on the Solicitor's evaluation or an expected timeline for the local governments. What is the status of the Solicitor's office evaluation of the above memorandum, and when does the office expect to make a decision regarding third-party concessionaries to operate on RPPA lands?

Question 11. In a December 5, 2014 report, the Congressional Research Service identified several potential technical discrepancies in how some Federal payments to counties are treated in the calculation of Payments in Lieu of Taxes (PILT) payments. The report specifies that payments made under the Bankhead-Jones Farm Tenant Act by the BLM require a reduction in the following year's PILT payments, but payments for similar lands administered by the Forest Service do not require a reduction. Additionally, the report claims that payments under the Secure Rural Schools (SRS) program require an offset in the following year's PILT levels for payments from the Forest Service but not payments from the BLM. As the agency responsible for making annual PILT payments, does the Department treat SRS payments by the Forest Service and the BLM differently when computing PILT payments? Similarly, does the Department treat payments made under the Bankhead-Jones Act by the Forest Service and BLM differently for purposes of PILT payments?

Question 12. Your testimony includes several references to encouraging individuals to serve, work, and volunteer on public lands. Some have suggested that questions of legal liability act as a disincentive for federal agencies to work with volunteers. Has the Department identified any such impediments to promoting volunteer work on public lands? If so, does the Department have suggestions on how to remove these barriers?

Question 13. The trans-canyon pipeline that supplies water to Grand Canyon National Park has incurred repeated maintenance issues over the last thirty plus years. Most recently, we witnessed two separate closures of Phantom Ranch as crews sought to address pipeline breaks, and a section of the pipeline is undergoing repairs until July of this year. According to some estimates, the cost to replace the entire pipeline would fall between \$100 million and \$150 million with additional operations and maintenance charges. Does the Park Service have updated estimates regarding the cost to repair the trans-canyon pipeline?

Question 14. I understand that the Park Service is evaluating potential solutions to the water pipeline challenges at the Grand Canyon National Park by developing a

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of Interior

water-delivery study. Please describe the alternatives being considered and the costs associated with each option. When do you expect to complete the final study?

Question 15. In evaluating potential water-delivery options, has anyone from the Park Service considered regional water-supply solutions? If so, who has the Park Service met with, and what options are being considered?

Question 16. Is there an opportunity for the Park Service to achieve cost savings by pursuing a regional water-supply solution, as opposed to solely looking at replacement of the trans-canyon pipeline?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Al Franken

Witness Name: Secretary Jewell

Question 1: As you know, a recent court decision reversed the Fish and Wildlife Service's determination to delist the gray wolf from the Endangered Species Act. Right now, farmers and ranchers in Minnesota are concerned about losing their livestock to wolf attacks, and they really need federal funds that can help to protect their herds. For example, the Wolf Livestock Loss Demonstration Program provides funding to livestock producers so they can employ strategies to help prevent wolf attacks from occurring in the first place. Can you tell me why the Fish and Wildlife Service has proposed to discontinue funding for this program in FY 2016?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Martin Heinrich

Witness Name: Secretary Jewell

Question 1: In December, Congress passed the Manhattan Project National Historical Park Act, which directs the National Park Service to establish the Manhattan Project National Historical Park in three states within one year of enactment. Do you expect to be able to meet that deadline?

Question 2: When and how does the National Park Service plan to involve local communities in the park planning process for the Manhattan Project National Historic Park?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of Interior

Questions from Senator Mazie K. Hirono

Witness Name: Secretary Jewell

Question 1: National Monuments

Madam Secretary, I would like to thank the Administration for taking action to protect and preserve lands across our nation, the recent executive action for Honouliuli in Hawaii is a good example. It is a sobering, yet important piece of our nation's history that will serve to educate future generations. In 2009, when I was a member of the House of Representatives I worked with Senators Inouye and Akaka to authorize a special resource study on World War II internment camp sites in Hawaii. Now that the President has designated Honouliuli as a national monument to be managed by the National Park Service, an agency well-seasoned and experienced with management of national monuments across our country. I want to see Honouliuli and other sites recently designated get off to a strong start.

This designation has been a collaborative, inclusive effort—between the local community, Hawaii's Congressional delegation, and other public and private stakeholders. Can you give me a sense of what the path will be to move Honouliuli forward in FY 2016 and beyond?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Mike Lee

Witness Name: Secretary Jewell

Antiquities Act

1. Secretary Jewell, during your confirmation hearing, I asked if you would seek the input of local stakeholders regarding national monument designations. You confirmed you would do this. However on October 31, 2013, you said, "if Congress doesn't step up to act to protect some of these important places that have been identified by communities and people throughout the country, then the president will take action ... there's not question that if Congress doesn't act, we will." One would think that the elected representatives of the people would be a group of stakeholders whose buy in and support should necessary in designating monuments. Has your opinion changed from the answer you gave me your confirmation hearing?

Transcript, Sally Jewell Confirmation Hearing, March 21, 2013

Senator Lee: *The monument designation question is important because, as you were discussing that with Senator Heinrich, I appreciated your commitment to work with local stakeholders whenever they are dealing with something like monument designation. We had about 2 million acres designated as a monument a few years ago in my state, and it was not only not done without extensive consultation, input, and buy-in of local officials and residents, it was done completely by surprise. It was brought upon us completely by stealth. It was announced from a neighboring state, and we would have like to have had input. So, I would really appreciate if you would commit to me that you would advise the president that it is best to work with locals affected by broad decisions like that in advance of making such a decision.*

Secretary Jewell: *That is certainly consistent with what I believe in and with what the White House believes in as well.*

2. The President added four new national monuments in 2014. Regarding your commitment to an open process with local consultation, were these communities given proper notice before these monuments were designated? Did you change anything about the designation area or timing in relation to the concerns of the impacted community or state?
Last four monuments listed:
3. The Antiquities Act also states that the President is to reserve "the smallest area compatible with the proper care and management of the objects to be protected." However, of the 11 monuments President Obama has designated so far, just the last three monuments constituted

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

over 250 million acres of new federal property. Would you consider these areas to be the smallest areas available?

Endangered Species Act

1. As you know, the agency recently put out a rule related to adverse modification – “Definition of Destruction or Adverse Modification of Critical Habitat.” Can you please provide me the statutory authority for this rule?
2. How much does the Department spend on ESA litigation? If attorney’s fees were capped, is it possible that money could instead be used for species recovery?
3. In a hearing before the House Natural Resources Committee on April 3, 2014, you stated that the Department publishes the underlying data for potential ESA listings. However, my staff has experienced many examples where the data used in listings is simply not available because the Department has, in fact, *not* made it available – for example, the underlying data for the listing of the Gunnison sage grouse was not released. Why does the Department publish scientific findings for some listings, but not for others? Can you commit to making available to the public all underlying data for all potential listings?
4. How do you ensure that state and local entities are able to stay informed and participate in the listing determination process? On average, how many meetings does your Department have with state and local officials during the listing process?

National Park Service

1. What is the current maintenance backlog for the National Park Service? What is the proportion of the Service’s budget that is spent on administrative overhead versus park maintenance?
2. How does the Department intend to prioritize its funding to address this backlog? Is it your opinion that we should consider a moratorium on the addition of National Park land until the NPS addresses the backlog in its current portfolio?

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Joe Manchin III

Witness Name: Secretary Jewell

Question 1: Secretary Jewell, I am very interested in some of the AML proposals in the Interior budget. As you know, I am very supportive of funding the UMWA's pension plan. Our miners have mined the coal that powered our nation and we need to ensure they continue to receive their hard earned benefits.

I am also interested in the proposal to use AML money for coalfield communities in Appalachia, like those in my home state of West Virginia. As you're aware, this program would require a legislative solution.

In your view, what would this legislative solution look like and can I get your commitment to work with me and other members from the region to ensure this money reaches the communities who need it the most?

Question 2: OSM's budget justification document notes that States and Tribes directly regulate 97 percent of the Nation's coal production under approved regulatory programs. The agency's budget also notes the reduced workload anticipated by OSM.

With the states responsible for most of the regulatory work why does OSM ask for \$5.5 million more for itself while cutting the states grants by more than \$3 million? What is OSM planning to use the extra \$5.5 million for?

Question 3: As you know, I have serious concerns about the potential OSM Stream Buffer Zone rule. The original intent of this rulemaking was in response to the 2008 rule promulgated under the Bush Administration. Why is OSM moving forward with this process when the 2008 rule was vacated?

Question 4: In 2013, the Director of Mining and Reclamation at West Virginia's Department of Environmental Protection testified in the House about their experience as a cooperating agency during the Stream Protection Measures Rulemaking process. Under this agreement, OSM should be coordinating with West Virginia and the other cooperating state agencies.

Instead, OSM denied the agencies the opportunity to review the first chapter of the Environmental Impact Study and provided them only a few days to review and comment on hundreds of pages of the following chapters.

Questions for the Record

February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

After this, according to the West Virginia DEP, OSM “shifted to a nearly complete blackout on information about the development of the Stream Protection Measures Rule.”

Yesterday, 11 states, including West Virginia sent a letter to OSM stating that several of the states are “seriously contemplating withdrawing from the EIS development” due to a continued lack of cooperation from OSM.

Can you explain this?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Lisa Murkowski

Witness Name: Secretary Jewell

Question 1: Please provide a record of the authorities on which the Department relied for the development of the Comprehensive Conservation Plan (CCP) and accompanying Environmental Impact Statement for the Arctic National Wildlife Refuge (EIS), including, the approval for and authorization of funds expended by year, including Congressional authorization or appropriation, for the development of the CCP and EIS.

Question 2: Please provide a detailed current plan, calendar and itemized budget for the development and implementation of the Step-Down Plans identified in the CCP and EIS.

Question 3: Please a comprehensive list of the dates and times of any meeting, call or other interaction held by the Department of the Interior (DOI) or any of its component parts including the United States Fish and Wildlife Service (USFWS) or contractor operating on behalf of DOI, with any entity not considered a cooperative agency, including any corporation or non-governmental organization.

Question 4: Please identify in a log any legal or policy analysis provided to or given by DOI or USFWS related to sections 1002, 1003 or 1326 of ANILCA as it might apply to the CPP or EIS.

Question 5: Please provide a comprehensive list of programs or initiatives within DOI in support of the US Chairmanship of the Arctic Council and in fulfillment of Executive Order Enhancing Coordination of National Efforts in the Arctic. Please include in the list a identification of the funds expended or to be expended for any and all programs or initiatives on the list.

Question 6: with respect to the issue of climate change, please provide a comprehensive list of DOI programs or initiatives dedicated to adaptation or promoting resilience in communities in response to a changing climate and the funds associated with these initiatives or programs.

Question 7: Please provide an itemization of any funds expended since January 1, 2012 related to international travel costs for DOI personnel in support for arctic initiatives, studies, programs or workshops.

Question 8: Please provide an estimate of any funds expended since January 1, 2012 related to Alaska specific travel costs for DOI personnel in support for arctic initiatives, studies, programs or workshops.

Questions for the Record
February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Question 9: In the 2016 Budget Justification, the Bureau of Land Management (BLM) notes: *“Since 2009, the BLM has approved 52 renewable energy projects, including 29 utility-scale solar facilities, 11 wind farms, and 12 geothermal plants, with associated transmission corridors and infrastructure to connect with established power grids. If fully constructed, these projects will provide more than 14,000 megawatts of power, or enough electricity to power about 4.8 million homes, and provide over 20,000 construction and operations jobs.”* (p. I-3) Please provide a detailed timeline for each of these identified projects including (1) date on which BLM received an initial application for approval (2) date on which a ROD was issued (3) description of the project – including estimated capital costs as well as construction and operating jobs and (4) estimated cost of mitigation measures required by BLM.

Question 10: Please provide an equivalent description of the number of new oil and gas units or developments approved by BLM since 2009.

Question 11: In the 2016 Budget Justification, BLM notes that since 2000, BLM has permitted nearly 47,000 new wells – please provide the number of permitted new wells since 2009.

Question 12: Please provide the number of permitted new wells since 2009 that have been drilled.

Question 13: Please provide estimates of revenues from NPRA production provided to Congress, the White House or other similar governmental institution issued prior to, or associated with, the passage of the Energy Policy Act of 2005.

Question 14: Please provide an accounting of revenues received from production in the National Petroleum Reserve Alaska since passage of the Energy Policy Act of 2005.

Question 15: In its *Report to Congress June 2006* related to Sec. 207 of the Alaska Land Transfer Acceleration Act, BLM identified roughly 56,870,900 acres of BLM-managed lands that are withdrawn by “d-1 PLOs” and made recommendations – primarily that those d-1 withdrawals could be lifted. With next year being ten years since that report was issued I feel compelled to ask if anything has happened.

Question 16: Please provide an update on where the Department stands in settling with the state on the proper process to complete patenting of the state’s lands. The Alaska Statehood Act set up a very specific process for federal surveying to complete the patented transfer of lands. To reduce its costs, the department has proposed a new surveying process, taking advantage of GPS coordinates. But apparently there is now a difference of opinion between the State of Alaska and your Department over the process

Questions for the Record
February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

to be used. Please describe that disagreement and how the department plans to resolve the issue?

Question 17: Relating to the U.S. Geological Survey budget, the USGS is a major source of grant funding for a series of seismic monitors on volcanoes in Alaska, largely on the Alaska Peninsula and the Aleutian Chain, near the air corridor for flights to America from Asia. The grants help fund the work of the Alaska Volcano Observatory, a joint entity between USGS and the University of Alaska. Ash from eruptions is particularly dangerous to such flights as shown by the near crash of a jumbo jet years ago.

- A) The problem is many of the seismic monitors need not just upgrading to digital technology, but antenna and battery replacements since the stations are rapidly going off line.
- B) I believe this is causing a real health and safety issue not just for Alaskans, but international passengers on trans-Pacific flights. While Congress added money to your budget this year to help with the maintenance costs on the network, your FY 16 budget seems to propose only a slight increase for hazards funding, even while your overall budget calls for a \$759.2 million increase – 6% above FY 15. That is disappointing since estimates are that it will require an additional \$5 to \$7 million a year for perhaps five years just to keep the Alaska seismic network functioning, much less to meet the entire U.S.G.S. earthquake monitoring budget needs.
- C) Why is there not more money in your spending plan devoted to basic health and safety needs?

Question 18: The State of Alaska a number of years ago requested that it receive the conveyance of several thousand acres along the Susitna River in Southcentral Alaska as part of its statehood conveyance. In 2013 my staff had been assured by Department personnel that the transfer would be completed, since none of the land is in conservation system units. But apparently the transfer is still pending. What is the hold up and when will the transfer of the acreage be completed to the State of Alaska?

Question 19: We have spoken often about the need for the Department to speed up the cleanup of 136 abandoned oil and gas exploration wells in northern Alaska, wells drilled by the government in both the 1940s and late 1980s and early 1990s. You had about \$2 million in your budget last year for such cleanups. Fortunately in the Helium bill in 2013 we were able to increase your cleanup funding by \$50 million so that the Department will be able to tackle the worst of the wells in coming years and gain efficiencies by being

Questions for the Record
February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

able to reduce mobilization costs and improve coordination of the cleanup efforts. But that \$50 million will not solve all of the problems.

- A) My question is this: when will the Department change its priorities and increase its regular budgetary funding to tackle environmental cleanups of abandoned federal wells on an annual basis?
- B) Abandoned well cleanup truly is a federal responsibility. How will you assure me that we aren't back in the same position in four or five years of having insufficient funding to clean up environmental well problems on federal lands?

Question 20: Recently I have received a number of complaints from placer miners in the eastern Interior part of Alaska about Department policies involving the current and future regulation of placer mining. There are concerns about the draft Eastern Interior Resource Management Plan and its apparent designation of about 700,000 acres of the FortyMile River mining district as "areas of critical environmental concern" where the Department is considering closing the area to mining. Significantly, as I understand it, this land was specifically kept open to mining by Congress in 1980's Alaska National Interest Lands Conservation Act when it was not included in the Yukon-Charley National Preserve. There are also a host of concerns about new regulations for mining efforts in still open areas, concerning about reclamation cost estimates, reclamation standards, new bonding processes and the turnover in our compliance staff that makes consistency in mining enforcement difficult at best.

- Recognizing that the issue of mining on the FortyMile is complicated, please tell me the reason for all of these changes in mining practice now in Interior Alaska, when mining had been working seemingly fine based on the 1983 management plan crafted just after passage of ANILCA?

Question 21: Just recently I learned that your Department has decided to implement a new southern boundary of the wilderness area inside Denali National Park and Preserve. Apparently 35 years ago when the Alaska lands act passed, no one noticed that the world is round and that map boundaries might need to be adjusted for the curvature of the earth. The problem appears to be that now the Department wants to add up to fifth-eighth of a mile to the wilderness area south of Denali. That might not seem like much, but it could have significant impacts. For example, there are potential impacts on:

- Hundreds of commercial air taxi and scenic flights to see the mountain.
- Potential for impact climbers getting to base camp to climb Denali.
- Snowmachine recreation efforts in the eastern sections of the park, and caribou and moose hunting for both subsistence and sport hunters in the Cantwell area.

Questions for the Record
February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Apparently the boundary change will add about 23,500 acres to the wilderness area in the park. But Alaska lands act (Sect. 103c) specifically limits “minor boundary adjustments” to just 23,000 acres.

- Will the Department work with us, either administratively or if a legislative fix is required, to make sure that this boundary expansion does not impact tourism and recreational hunting interests in Southcentral Alaska?

At a time when Department policy changes are having such a huge impact on future oil and gas and mineral development, this change that could impact another major leg of the state’s economy – tourism – may be exceptionally hard for Alaskans to accept, especially 35 years after ANILCA’s passage and after business and lifestyles have adapted to the changes generated by passage of the lands act.

Question 22: In late 2013 it became clear that the Cook Inlet Region Inc. (CIRI) Alaska Native Regional Corp. was coming up short by 42,000 acres of the land conveyance it was promised as a result of the Alaska Native Claims Settlement Act of 1971. The shortage was the result of the complex settlement of land conveyances to CIRI village corporations that had been complicated by the 1976 Cook Inlet land exchange. For the past year the BLM in Alaska has acknowledged that CIRI is short of its required conveyance and apparently has been working to identify solutions. Please update us on where Interior is with crafting a solution to the CIRI land shortage, and how soon such a fix may be proposed by your Department?

Question 23: The Department has a legal responsibility to fulfill the government's obligations under the Alaska Native Claims Settlement Act (ANCSA). Under ANCSA, Alaska Native Corporation often had to select lands for conveyance that were outside their traditional aboriginal lands because those lands were already occupied by the Federal government, the Department of Defense, or various state and local governmental entities. Accordingly, land exchanges and selection of other lands was necessary to fulfill Alaska Native Corporation (ANC) entitlements under ANCSA.

Given that ANCs have been denied their traditional aboriginal lands and, out of convenience to the government, have selected other lands and are now trying to develop those lands, it’s troubling--but not surprising--that I often hear that your Department delays and impedes the issuances of permits to Alaska Natives who wish to develop their subsurface lands within the boundaries of a National Refuge.

Questions for the Record
February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

- A) What are you going to do to make sure your department protects Alaskan Native Corporations' rights to the lands selected under ANCSA and that the agencies in your department expeditiously assist them in permitting, conveyance, and other dealings with your department?

Question 24: The U.S. Geological Survey recently released its Mineral Commodity Summaries report for 2015, and it shows that the United States is at least 50 percent reliant on foreign nations for at least 43 different commodities. The report also states, as it annually does, that "U.S. import reliance has increased significantly since 1978, the year that this information was first reported."

- A) Is our nation's foreign mineral dependence a matter of concern to you?
B) What are you doing, at Interior, to help reduce and eliminate it?
C) Do you believe the proposals in Interior's budget request – which would impose new taxes and fees on top of an already-slow permitting process – will somehow increase our nation's mineral security?
D) It takes an average of 7 to 10 years (even absent significant litigation) to permit a new mine in the United States, which is considerably longer than other countries with similar environmental standards. Will you commit to reviewing the federal mine permitting process, and will you commit to identifying steps to make the process more efficient?

Question 25: The FY 2016 Land and Water Conservation Fund budget request is \$900 million: \$400 million in discretionary funding and \$500 million in permanent funding for DOI agencies and the Forest Service. In 2017 the President's budget request proposes that all \$900 million would be mandatory funding.

- A) Please explain to me why, with such an enormous maintenance backlog (According to CRS, over \$22 billion at the federal agencies combined, \$13 billion at NPS alone), DOI would propose to focus such a large amount of funding on acquiring more federal land?
B) Shouldn't these funds be used to pay down the maintenance backlog to, at least, stem the growth of the backlog?
C) More generally, how do you reconcile additional federal land acquisition at this time of staggering national debt and maintenance backlogs?

The budget proposal seeks to turn the LWCF program into a permanent mandatory program without making any changes to it. I don't support that. I am also concerned that this program has been overly focused on federal land acquisition. Part of the reason for that is the 60 percent set-aside for state-side grants was stripped from the LWCF Act.

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

These state-side grants are valuable tools to develop state parks and other outdoor recreation opportunities on non-federal land.

- D) Shouldn't a larger percentage of LWCF funds be set-aside for state-side grants?
Why or Why not?

Question 26: As many colleagues and I have emphasized many times, we have a nearly \$13 billion parks maintenance backlog. And with that staggering figure, there is a very strong argument that we should not be adding any new parks to the system until we can take care of what we already have. Alaskans are particularly concerned with the prospect of additions of new Parks with roughly 2/3 of the entire system located within my State.

- A) With the Parks Centennial upon us in 2016, it would seem that this could be a great time to reevaluate how we establish and maintain the Parks as well as how we build support for the Parks in their local communities, nationwide and even internationally. In a time of severe budget constraints, all options need to be on the table. One idea that I am particularly interested in is increasing private donations to the system through private endowments.
- B) Will you agree to work with me and the other members of this committee to review options and find a path forward to create a sustainable supplementary funding stream for America's Parks for the second century?

Question 27: I have some questions regarding the general approach of the National Park Service to rule making as well as some questions regarding a specific rule proposed by NPS.

- A) In the past, NPS has put into place regulations that shortened the hunting seasons as defined by the Alaska Board of Game. When instituting the closures, the NPS has cited "Park Values" in those closures.
- I. Please provide me with a definition of "Park Values"?
- II. Do you believe that the State of Alaska has the right to manage wildlife within the borders of the State? When is it proper for the federal government to reverse State Board of Game decisions?
- B) Recently, the National Park Service has proposed a rule (Regulation Identifier Number 1024-AE21) that would close a number of preserves in Alaska to the take of predators, such as bear and wolf.

Questions for the Record
February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

- I. I am aware of several stakeholders who have contacted you regarding their concerns about the potential for this proposed regulation to unduly impact subsistence communities across Alaska. One of these stakeholders includes the Wrangell-St. Elias National Park Subsistence Resources Commission, an official Federal advisory committee created by the Alaska National Interest Lands Conservation Act (ANILCA) to make recommendations to you, the Secretary of the Interior, regarding fish and wildlife resources for subsistence dependent communities. I would like to hear from you how the Department proposes to avoid any undue impact on these communities, communities whose lives depend on the take of predators.

- II. The take of certain predators by Alaska Natives is done for cultural, economic, traditional, and spiritual needs. Can you describe to me how this proposed rule incorporates these significant considerations?

Question 28: Please describe the role of DOI in any additional discussions that have taken place with the State Department since the Regional Recommendation was finalized in December 2013. Who participated in these discussions? Does DOI defer to other agencies (i.e., the U.S. Entity) in discussions with the State Department regarding potential U.S. negotiating positions? Why or why not? If not, what are the major outstanding points of disagreement between DOI and other agencies?

Question 29: What is DOI's position on the "ecosystem-based function" principles and recommendations outlined in the Regional Recommendation? Please provide specific examples of the department's positions on these principles and recommendations?

Question 30: Total domestic oil production increased 15% from 2012 to 2013. Can you confirm that on federal lands, however, it only increased by 1% over the same period?

Question 331: While EIA is still assessing the 2014 data, according to its latest Monthly Energy Review, total U.S. field production averaged 16.3% higher in 2014 than in 2013. How much do you expect oil production on federal lands has increased over the past year?

Question 32: The Bureau of Land Management issued 3,769 drilling permits in FY 2014. This is one less than it approved in FY 2013, and 2,848 fewer than the 6,617 permits that were approved in FY 2008. Is it accurate to say that permits have fallen by 43% during this administration and that you are doing little if anything to correct this trend?

Questions for the Record
February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

Question 33: Over the past decade, has federal natural gas production increased or decreased? What is the Department doing to reverse this trend?

Question 34: Given the nature of U.S. Geological Survey's core mission, many of us have requested that an economic geologist to be nominated to lead that agency. We did have a nominee in the last Congress, but she was not brought up for confirmation by the previous majority, and the agency has now gone without a confirmed director for two full years.

- A) Can you tell us when you anticipate the President will send this Committee a nominee to consider for USGS?
- B) Can you tell us whether the President is taking our request for an economic geologist seriously, as he searches for a new candidate?

Question 35: The Department of Interior is mandated to provide a subsistence priority on federal land, yet nearly every rural community in Alaska struggles to meet their subsistence needs because of low moose populations, low caribou populations – in some cases, and nearly non-existent king salmon populations.

- A) What is the Department's plan to ensure that adequate amounts of food can be put on the table?
- B) How do you reconcile a mandate to provide a subsistence priority with the competing mandates that creating wilderness, not managing for abundant and healthy wildlife populations, and limiting access by subsistence hunters fishers?
- C) Why is it difficult for your agency to manage predators to increase prey species to sustainable levels?

Question 36: In 2013, I wrote a letter to the Department asking what you could do to speed up the cleaning of environmental contamination on lands that you have transferred to Alaska Native Corporations to satisfy their aboriginal land claims under the 1971 Alaska Native Claims Settlement Act. Your Department studied the issue in 1998 and proposed a six-point effort to speed up the cleaning of such contamination. Last January in a letter to me you proposed that the Department would update its contaminated lands survey and then address the other five recommendations all involving how to tackle the actual cleanups. I had been led to believe that updated list would be finished in the fall – there were more than 650 sites on the old list—unfortunately, it was not completed.

- A) When will an updated, comprehensive list of contaminated sites on Native conveyed lands be finished? What will the Department propose to actually speed up and fund the cleanup of the contamination –all caused by the federal government prior to transfer of the land to Alaska Natives?
- B) Most recently, the Department's current spending authorization requires the Department to provide to Congress by June of this year a detailed report including the comprehensive inventory of contaminated land conveyed through ANSCA

Questions for the Record
February 24, 2015

Hearing: The FY2016 Budget Request for the Department of the Interior

including sites identified since the 1998 report and a detailed plan addressing how the Department intends to complete the cleanup of each contaminated site. What is the status of the effort to comply with this recent statutory directive?

Question 37: In the past Alaska Fire Service had two CL215s which carry about 1,400 gallons. There are plans to replace these with Fire Boss Single Engine Air Tanker (SEAT) aircraft.

- What is the cost per gallon dropped for the two aircraft?
- What is the cost difference between the CL215s vs the Fire Boss Single Engine Air Tanker (SEAT) in total budget cost to AFS?
- How effective do you expect the SEATs to be at Initial Attack?

Question 38: The BLM's FY16 budget request proposes to reduce funding for the Oregon and California Grant Lands program by \$6.043 million overall, with a \$3.8 million decrease in Other Forest Resources management and a \$3.2 million decrease in Western Oregon Resource Management Planning. The BLM Budget Justification also shows that the agency plans to offer less timber for sale in FY 16 (204 mmbf, down from 215 mmbf in FY15 and 239.8 mmbf in 2014)

- What is the updated schedule for finalizing the new Resource Management Plans? If planning activities will continue into FY16 how would the proposed \$3.2 million decrease in the planning account impact the agency's ability to finalize the plans and maintain the timber sale program?
- The BLM is under Court Order to meet the mandate of the O&C Act to offer the Allowable Sale Quantity (ASQ) in at least two districts in Western Oregon. How will the proposed reductions in the FY16 timber sale program affect the Court Order requirements to increase timber sale levels? Will the BLM meet the terms of this Court Order to offer the ASQ in certain districts as well as offering enough timber to meet the ASQ's of other districts in the O&C in FY16?
- How much money does the BLM spend annually to comply with the "Survey and Manage" requirements of the Northwest Forest Plan in Western Oregon? How many acres of BLM timberland in Western Oregon are encumbered by complying with the "Management Recommendations" associated with the "Survey and Manage" requirements of the Northwest Forest Plan?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Bernie Sanders

Witness Name: Secretary Jewell

The Department of Interior manages the vast amount of mineral and energy assets that are owned by the American people. There have been numerous reports and studies by the Government Accountability Office and others that suggest that the American people are in fact not getting a fair return on these assets that they own, and instead that the big corporations like oil and coal companies are reaping huge windfalls. In addition, these activities are being done in ways that increase carbon emissions which are making climate change worse. I believe that DOI can and should be doing more to ensure that the American people receive a fair return from the development of these resources.

- Question 1: For coal on federal lands, oil and gas development on federal lands, and offshore oil and gas development, what is the Department looking at specifically to ensure that taxpayers are getting fairly compensated? Please include all relevant rulemakings under development and an estimate of their timing for finalization.
- Question 2: What statutory changes are needed to expedite DOI's ability to recover fair market returns from the use and development of taxpayer-owned minerals, or access to federally-owned lands?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Ron Wyden

Witness Name: Secretary Jewell

Question 1: Secretary Jewell, I want to take a moment to focus on an issue of particular importance to my home state of Oregon and to the Northwest region—the Columbia River Treaty.

In November of 2013, when I was Chairman of the Committee, I held a hearing on the modernization of the Columbia River Treaty, urging the Administration to follow the consensus document known as the “Regional Recommendation,” and to engage Canada expediently in negotiations. Now, over a year later, it is my impression that the Administration has not been expedient about addressing this issue.

What can you tell me about why this process has taken so long? And what will it take for you and the Administration to act to advance the Columbia River Treaty and engage Canada?

Question 2: As you know, the National Park System turns 100 years old next year, and during its time has become one of America’s greatest success stories. In nearly every state, Americans can visit a national park, trail, or monument and learn about the nation’s rich cultural and ecological heritage. To ensure that these parks remain the treasures that they are, it’s imperative that the Administration and Congress invest in them to keep them maintained and safe for visitors.

What are the Department of Interior’s plans for ensuring that the deferred maintenance backlog remains a priority and that the backlog “to-do” list gets consistently checked off?

Question 3: I understand that some of my colleagues were suspicious about what you and the Administration were doing to protect sage grouse habitat, but in Oregon, this work is really important. Can you assure me that you’ll continue the important work you are doing with private landowners in places like Eastern Oregon?

Questions for the Record
February 24, 2015
Hearing: The FY2016 Budget Request for the Department of the Interior

Questions from Senator Rob Portman

Witness Name: Secretary Jewell

Question 1: When groups want work together to raise money for a project on a certain park, for example: let's assume a structure in Cuyahoga National park needs a new roof, how can groups who donate money through the current Centennial Challenge ensure all the money from their donations comes back to the roof in Cuyahoga that they donated for without having to donate it to the federal government's centennial challenge?

Question 2: Last year the FY15 Omnibus provided \$10 million to reinvest in the Centennial Challenge. Can you provide a status of the projects for FY15, what projects or types of projects have been chosen?

Question 3: When was the last time Ohio was mapped via USGS using LIDAR technology, and what percentage of the state has been mapped using LIDAR as part of 3D Elevation Program?

Question 4: The Service proposed to list the northern long-eared bat as endangered under the ESA in October 2013, but it is my understanding that service is now leaning toward a determination that the species threatened, and issuing a 4(d) rule. For species listed as threatened, the Service may issue a 4(d) rule to provide protections that are deemed necessary and advisable for conservation of the species. The 4(d) rule as I understand it would provide limited exemptions for forest management practices, maintenance and limited expansion of transportation and utility rights-of-way, removal of trees and brush to maintain prairie habitat, and some tree removal projects.

But there remains concern that the proposed 4(d) rule, which would accompany a potential threatened listing, does not accommodate similar exemptions for oil and gas activities, renewable power (such as solar and wind), commercial or residential construction, or agricultural practices. Major industries that drive our economy.

Can I get your commitment that you will work with folks in those industries to ensure equal consideration within the 4(d) rule for these types of activities that are substantially similar to activities exempted under the rule?

United States Senate

WASHINGTON, DC 20510

March 10, 2015

The Honorable Barack Obama
President of the United States
The White House
1600 Pennsylvania Ave., NW
Washington, DC 20500

Dear Mr. President:

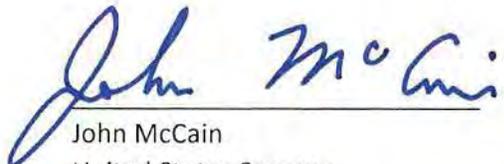

We write in opposition to any unilateral executive action to designate more national monuments in Arizona, and we specifically oppose recent requests that you designate a “Grand Canyon Watershed National Monument” in northern Arizona. Such proposals, without the necessary support from state leaders, congressional delegation, and proper reviews should not advance. This proposal, in particular, extends far afield from the intent of the Antiquities Act by seeking to lock away 1.7 million acres of land in Arizona—an area larger than the State of Delaware—from hunting, livestock, wildfire prevention, mining, and certain forms of outdoor recreation and tourism. What’s more, as noted by Supreme Court precedent, such a designation could also have grave consequences for surface and groundwater rights in Arizona.

Aside from federal overreach, the greatest threat to the watershed of the Grand Canyon is the ongoing 15-year drought in the Southwest. A national monument designation does nothing to address the historically low snowmelt or surface water levels that feed the Colorado River and its tributaries. Arguably, the creation of a new monument might worsen watershed health if land managers and private property owners are restricted from thinning the area’s overgrown forests or if hunters are barred from culling overpopulated wildlife. Arizona cannot afford to have its hands tied when it comes to controlling wildlife populations, enhancing its water supplies, and preventing wildfires.

This monument proposal would also further unravel a longstanding agreement made by a number of environmental organizations and relevant stakeholders in support of a multiple-use philosophy across much of this area. As part of a locally driven collaborative process that included local miners and cattle growers, Congress passed the Arizona Wilderness Act of 1984 with the full understanding and intention that federally regulated mining and grazing would continue on much of the Arizona Strip and the Kaibab National Forest.

We of course support preserving the Grand Canyon for the enjoyment of future generations—the existing national park does just that. The Park’s powerful, awe-inspiring landscape attracts over 5 million visitors from across the United States and abroad each year. Ensuring the protection of this crown jewel is the civic duty of every Arizonan and American, and we appreciate the heartfelt motivation by those in Congress who initially backed this concept. However, the current monument proposal is ill-conceived, single-minded, and impractical to implement, and we respectfully urge you to disregard it.

Sincerely,

John McCain
United States Senator

Jeff Flake
United States Senator

Deputy Secretary Connor Tours Tule Springs Fossil Beds National Monument Ahead of Public Meeting on Conservation in Southern Nevada

Session Hosted by Senator Reid and Congresswoman Titus to Focus on Next Steps for New Addition to National Park System, Conservation Priorities for the 114th Congress

02/18/2015

Contact us

LAS VEGAS, Nevada – Today, Deputy Secretary of the Interior Michael L. Connor visited the recently-designated Tule Springs Fossil Beds National Monument, the newest addition to the National Park Service. The visit builds on the Department's work to support locally-driven efforts to preserve and protect places that hold special meaning to communities across the country.

"Tule Springs Fossil Beds National Monument is a worthy addition to our National Park System with its rich history and remarkable access for the two million people of the Las Vegas metropolitan area," said Connor. "A broad group of community members stepped forward to support the legislation to make this a national park, and we are committed to continuing that collaboration as we take care of this exceptional area."

Spanning 22,650 acres of the Upper Las Vegas Wash, Tule Springs is regarded by scientists as one of the best collections of Pleistocene mammal fossils in the United States. Researchers count among their discoveries Columbian mammoths, dire wolves, saber-tooth cats, prehistoric camels and giant sloths. The National Monument lies just minutes from the community of North Las Vegas and only 30 minutes from the Las Vegas Strip, providing a boost to the tourism and outdoor recreation industries of the Las Vegas Metropolitan Area.

The Tule Springs Fossil Beds National Monument was created through Title 30 of the National Defense Authorization Act (NDAA) in December of 2014. Originally sponsored by Senator Reid, Congresswoman Titus and the rest of the Nevada delegation, the legislation was supported by the cities of Las Vegas and North Las Vegas, Clark County, the Las Vegas Metro Chamber of Commerce, local and national conservation partners, as well as thousands of individual Nevadans.

The legislation provided for management of the area by the National Park Service. Staff from Lake Mead National Recreation Area, the closest National Park Service area to Tule Springs, have been administering the land transfer from the Bureau of Land Management. Lake Mead employees have been meeting with community leaders and supporters, establishing a volunteer cadre, and analyzing existing conditions in order to welcome visitors while preserving the park's unique resources.

Later today, at the invitation of Senator Harry Reid and Congresswoman Dina Titus, Connor is also joining a public meeting to hear from the Las Vegas community on next steps for the monument, as well as other conservation priorities for southern Nevada for the 114th Congress.

Senator Reid and Congresswoman Titus have invited the public to comment on their conservation proposals for the 114th Congress, including the Garden Valley Withdrawal Act and the Gold Butte National Conservation Area Act, two bills introduced by Senator Reid and Congresswoman Titus at the start of this session.

"I want to thank Congresswoman Dina Titus for co-hosting this event with me and to Mike Connor from the Department of Interior for being here to listen to Nevadans on these important issues. Some of my proudest accomplishments in the Senate have been working to protect the special places in our state for future generations. The goal for today's meeting is to talk a little bit about conservation in Southern Nevada and hear from the public their thoughts on these issues and I appreciate every Nevadan who will attend."

"We welcome more than 42 million visitors from around the world to Southern Nevada every year, and many of those travelers come to see the sights beyond the bright lights of the Las Vegas Strip," said Congresswoman Dina Titus. "Today's public hearing is a chance for the community to convene and discuss the future of some of Nevada's most sensitive habitats and scenic landscapes. Together we can find the best ways to preserve public space and cultural resources for generations to come."

restrict mining and energy exploration on more than 800,000 acres of federal land in two lonesome valleys straddling Lincoln and Nye counties.

The Senate minority leader has said he wants to withdraw the land in Garden and Coal valleys to protect "City," noted artist Michael Heizer's sprawling earth sculptor roughly the size of the National Mall. Supporters of the bill want a national monument dedicated to "City" and to the pristine basin-and-range landscape around it.

The designation would also block a future rail corridor for nuclear waste shipments to the proposed Yucca Mountain repository, which Reid spokeswoman Kristen Orthman acknowledged Wednesday while saying Yucca Mountain is not why Reid introduced the bill or decided to target so much land for withdrawal. That's just a welcome side effect, Orthman said.

See all of our coverage: 2015 Nevada Legislature.

Rep. Dina Titus, D-Nev., who quietly introduced a House version of the bill last week, also said Yucca Mountain has nothing to do with it.

Motivations aside, the legislation faces an uphill battle in a GOP-led Congress already pushing back against such lands bills. Rep. Crescent Hardy, R-Nev., has vowed to fight the bill and a measure, also sponsored by Reid, to designate 350,000 acres at Gold Butte in northeastern Clark County a conservation area. Both areas are in Hardy's congressional district.

The two bills also are drawing opposition from local officials and some rural residents.

And the push for increased protection of Gold Butte is further complicated by the lingering dispute between federal authorities and Cliven Bundy, whose cattle roam the area in defiance of court orders and aborted government roundups.

Titus said she still hopes to work on the lands bills with Hardy, whom she described as "more open" to protecting Gold Butte than in the past.

On Wednesday, Titus and Reid hosted a "conversation about conservation" in Las Vegas for an audience of several hundred people.

The enthusiastic crowd packed the jury assembly room at the Lloyd George U.S. Courthouse to celebrate the new Tule Springs Fossil Beds National Monument at the Las Vegas Valley's northern edge and call for the protection of Gold Butte and Garden and Coal valleys.

The preservation pep rally was for the benefit of Michael Connor, the deputy U.S. secretary of interior, who had just toured Tule Springs.

Gold Butte, less than 100 miles northeast of Las Vegas, is in particular need of preservation, Reid said by video link from Washington, where he is recovering from eye surgery.

"What a loss it would be if we didn't protect it," he said. "If we don't do something, it will be gone in a matter of decades."

Titus, in person, said the lands must be preserved "for us, for the whole country and for generations to come."

Art lovers argue that Heizer's masterwork warrants special protection and could become a World Heritage site one day. "City" has been described as one of the most ambitious pieces of art ever, a network of sculpted berms, plazas and geometric shapes a mile-and-a-half long and 900 feet wide inspired by ancient cities of South and Central America.

For a piece like that, "you need the scale of Nevada," said Michael Govan, head of the Los Angeles County Museum of Art. "It is almost finished, and that's why its protection is so paramount."

Several dozen people spoke of what Gold Butte, Tule Springs and the lonely valleys of the southern Great Basin mean to them.

Just one person opposed the conservation measures. The man, who called himself "John Q. Public," railed against the treatment of Bundy and criticized the government for trying to kick the public off public land.

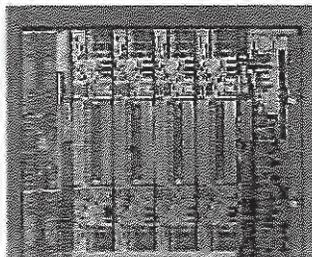

The audience hissed and booed and shouted him down, receiving an obscene gesture in return.

A monumental push: Reid plans to designate two more areas for protection

By **Amber Phillips (contact)**

Sunday, April 19, 2015 | 2 a.m.

Until late last year, environmentalists' and tourism officials' dream of Congress bestowing a national monument outside Las Vegas seemed like a long shot.

Tennessee Lots &
Acreage

Waterfalls, Views & Level Mtn
Land 1-13 Acre Lots Near
Chattanooga

A bill to protect almost 23,000 acres of prehistoric fossil beds outside North Las Vegas had languished in Congress for several years.

But thanks in part to Sen. Harry Reid's behind-the-scenes jockeying in 2014, Tule Springs National Monument is becoming a reality.

Now Reid is pushing for two more national monuments in Nevada to protect more than 1 million acres of desert outside Las Vegas.

Three national monuments within a four-hour drive from the Strip would be beyond tourism officials' wildest dreams. But such a turn of events would be a nightmare for many Nevada Republicans, and they may not be able to stop it from happening.

What is a national monument?

Designation as a national monument offers one of the highest levels of federal protection for a swath of land in America. Congress or the president create monuments to protect land with historical or cultural significance. Examples include Mount Rushmore in South Dakota and Ford's Theater in Washington, D.C., where Abraham Lincoln was assassinated.

National monuments differ slightly from national parks in that the parks, such as the Grand Canyon, are created to protect educational or scenic land.

What does Reid want to protect?

Reid reintroduced a bill in January that would create a conservation area over 350,000 acres of desert scrub near Gold Butte, the mining ghost town northeast of Lake Mead. The area's colorful rocks, canyons and petroglyphs are popular with hikers, bikers and off-roaders.

Reid also reintroduced a bill that would withdraw 800,000 acres of land in Lincoln and Nye counties from oil and gas drilling. The move would ensure that Nevada artist Michael Heizer could protect "City," a miles-long Earth sculpture he has carved and built in the desert over decades.

Democratic Rep. Dina Titus recently introduced two similar bills in the House of Representatives.

But the bills have almost no chance of advancing in Congress during Reid's remaining 21 months in office. His next-best option is to convince President Barack Obama to protect the land by designating it part of two new national monuments.

Why is this controversial?

The Republican-controlled Congress is reluctant to hand the federal government control of so much land and close it off to development, particularly energy development in rural Clark, Lincoln and Nye counties.

The Gold Butte proposal is particularly contentious because it covers the land where Bunkerville rancher Cliven Bundy led an armed standoff with federal officials last year.

Republican Sen. Dean Heller introduced legislation with Nevada's three House Republicans to take away the president's power to create national monuments.

"If it's something the state government wants, the local government wants, the federal government wants, that's fine," Heller said. "I just want things to go through the process."

But Reid appears to be forging ahead, making his case in public meetings and letters to administration officials. In February, he and Titus invited a high-ranking official from the Department of the Interior to a public meeting in Southern Nevada filled with supporters in favor of protecting the land.

"Legislation has always been Reid's priority, but he's not opposed to designations," Reid spokeswoman Kristen Orthman said.

What will happen?

There's a very real chance Reid could get his wish and see Obama designate two new national monuments in Southern Nevada before both leave office in January 2017.

Reid has gathered a diverse and powerful group of supporters: the Las Vegas Convention and Visitors Authority, Nevada Resort Association, wilderness activists, MGM Resorts International CEO Jim Murren and Barrick Gold Corp.

The president, whose administration has designated 16 national monuments since 2009, tends to choose projects that have strong local support and a clear public input process, said Matt Keller, of the Wilderness Society.

"It's a challenge to move these things, and lawmakers have to find openings when they have them," Keller said.

Reid already is credited with creating Northern Nevada's Great Basin national park and more than 60 protected wilderness areas. Leaving a 30-year career in the U.S. Senate with three national monuments to his name would be the capstone of Reid's environmental legacy.

"These are our lands," he told KNPR. "They are federal lands. They belong to everybody in America."

Obama pursues legacy-building executive land grab of 700,000 acres in Southern Nevada

May 7, 2015 | Editorial

Serious implications for national security, future economic development

By Congressman Cresent Hardy

According to a draft proclamation my office obtained (https://edit-hardy.house.gov/sites/hardy.house.gov/files/Basin%20and%20Range%20National%20Monument_Admin%20Draft.pdf) (click here to view (https://edit-hardy.house.gov/sites/hardy.house.gov/files/Basin%20and%20Range%20National%20Monument_Admin%20Draft.pdf)), the president is quietly planning to establish a national monument – dubbed the “Basin and Range National Monument” – directly under the airspace of the Nevada Test and Training Range (NTTR).

I am appalled and deeply concerned about the national security implications of President Obama’s politically motivated effort to permanently tie up more than 700,000 acres of land, most of which is under one of the most heavily used Military Operating Areas in the United States, and all of which is in Nevada’s 4th Congressional district.

Our Air Force, along with their Joint partners and close allies, routinely train on this land, with nearly 20,000 aircraft sorties flown last year in the airspace overhead. RED FLAG, arguably the world’s premier air-to-air military exercise, takes place on the NTTR and entails in part involvement from Special Operations Forces and Personnel Recovery Teams, whose role in the training takes them on foot and in vehicles, traversing the very land the president seeks to close off.

Without these unequalled training opportunities, our military would see reduced flexibility as they prepare to fight alongside our closest allies in an integrated and dynamic fashion.

In fact, pilots who have flown in recent conflicts have pointed to their training on the Nevada Test & Training Range as a major contributor to their safety and success overseas. This training would be drastically impaired as a result of this monument designation, leading to a loss of communication abilities between aircraft and ground support at Nellis Air Force Base, as well as the elimination of vital drop zones for overland work.

The NTTR is an unparalleled resource for some of our most cutting-edge testing, tactics development, and military training. The Air Force recognizes it as the “largest contiguous air and ground space available for peacetime military operations in the free world” – making it a “crown jewel” of the Department of Defense. We are privileged to have such a nationally significant resource in Nevada’s 4th Congressional District.

Nellis Air Force Base, which I make a point to visit regularly, is also in the district, and boasts the NTTR headquarters. During my first several months in office, I have had a number of opportunities to interact with the amazing men and women who utilize this space on a daily basis, year round.

It seems the president and Senator Harry Reid share an ambivalence toward what we in Nevada know to be true: namely, that closing down this vast area of land for generations to come would adversely impact Nevadans’ ability to choose how we want to grow economically, and it would hamper our military members from sharpening their skills.

Let me be clear. I do not specifically oppose national monuments or designating specific lands as preserves, but doing so at the direct detriment of our military operations puts at risk the very protection of the freedoms that allow us to enjoy those lands.

It’s true that presidents have historically exercised their authority under the Antiquities Act to unilaterally designate national monuments. Of course, few of these designations have had such a dramatic and specific impact on the capabilities of our military operations.

Many thought the president may try to make a move like this, and it turns out they were right.

Other than the end of terms for a couple of politicians, what's the rush?

I feel strongly that the best management of our public lands comes only through methodical consideration and partnership across all levels of local, state and federal government.

Tule Springs National Monument is a great example of an effort that was given due consideration, had appropriate community backing, and did not interfere with crucial Department of Defense exercises. In fact, it protected a frequently used flight corridor for the Air Force.

By contrast, the president's current initiative has almost none of these qualities.

Our state deserves better. Our community deserves better.

I implore Nevada's Congressional delegation, along with state and local leaders, and all Nevadans, to recognize the permanent damage the president's action could inflict on Nevada, and more importantly to our national security.

This initiative smacks of a lack of transparency, and is devoid of meaningful local input. In fact, it very specifically ignores local opposition.

President Obama may recall then-President Bill Clinton's nearly identical action in Utah in 1996 to set aside Grand Staircase-Escalante National Monument, and how irate our neighbors to the east remain, years later.

President Obama risks more than the disapproval of Nevadans.

If the president presses forward with this initiative, it will be at the cost of national security measures and military preparedness, and will be done in direct opposition to the residents and visitors that respectfully make recreational use of this area as is.

The personal, economic and national security costs are just too much to trade. The president should shelve this awful plan.

###

Related: In January of this year, a majority of the Nevada Congressional delegation introduced bicameral legislation (<https://www.congress.gov/bill/114th-congress/house-bill/488>) to prohibit the further extension or establishment of national monuments in Nevada except by the express authorization of Congress. As of March 2, the bill has been referred to the House Committee on Natural Resources Subcommittee on Federal Lands, of which Congressman Hardy is a member.

White House preps paperwork for Nevada national monument, and opponents decry

Annie Dress

Ava Dress

--- Share --- Share ---

By **STEVE TETREAULT**
REVIEW-JOURNAL WASHINGTON BUREAU

WASHINGTON — The White House has prepared paperwork for President Barack Obama's signature declaring 704,000 acres in central Nevada as the nation's newest national monument, according to documents released Thursday by Rep. Cresent Hardy, R-Nev.

A draft proclamation establishes a "Basin and Range National Monument," encompassing parts of Lincoln and Nye counties, an area that conservationists have touted as containing some of the most compelling desert valleys and rugged mountain ranges in the nation.

The area generally tracks the region designated for federal protection in legislation introduced last year by Sen. Harry Reid, D-Nev., and this year again by Reid and Rep. Dina Titus, D-Nev. The proposal consists of Garden Valley and Coal Valley separated by the Golden Gate Range and also includes a portion of Seaman Range to the east.

Within the area that would be withdrawn from mining and energy leasing is land surrounding "City," a monumental earthen artwork being completed by sculptor Michael Heizer.

The designation would allow for the use of existing roads for the public to access the site, and authorize activities to manage it.

In all, the proposal encompasses 1,100 square miles.

Last fall, Congress created the Tule Springs Fossil Beds National Monument in northern Clark County. But Obama appears poised to create a second one in Nevada under authority granted the president by the 1906 Antiquities Act — a move that would instantly become controversial in the state and on Capitol Hill.

Leaders in the two local counties have said they do not favor it. And Republicans in Congress have introduced legislation to block Obama from creating national monuments in Nevada and elsewhere in the West without approval from Congress.

Hardy said the proposed monument area is underneath the airspace of the Nellis Test and Training Range utilized by the Air Force for its Red Flag exercises and other missions.

"I am appalled and deeply concerned about the national security implications of President Obama's politically motivated effort to permanently tie up more than 700,000 acres of land, most of which is under one of the most heavily used Military Operating Areas in the United States, and all of which is in Nevada's 4th Congressional District," Hardy said in a statement.

Reid spokeswoman Kristen Orthman said Hardy was spreading "misinformation" about the proposal. A clause in the draft proclamation states the monument designation would not preclude the use of military flight training routes, or designation of new units of special use airspace.

"Congressman Hardy is getting a little bit ahead of himself," Orthman said. "We will not allow those who have no interest in the protection of the Basin and Range area to demagogue it with a misinformation campaign built heavy on partisan rhetoric but short on actual facts."

An administration official said the White House works closely with the Department of Defense to protect national security interests in land designations "as has historically always been the case."

"Sen. Reid believes this area deserves protection — that is why he introduced legislation to do so in 2014," Orthman said. "But in lieu of legislation, Sen. Reid fully supports President Obama if he decides to designate this area, which he has the legal authority to do so."

Titus spokesman Caitlin Teare similarly said the Las Vegas congresswoman "supports the president's use of his authority to designate a national monument to protect the public space and art in this important region for future generations."

The six-page document released by Hardy is undated and labeled as a draft. Declining to say where Hardy got it, his spokesman Scott Knutson said the congressman has established it was being circulated among federal agencies for comment within the past week.

Sources familiar with the federal bureaucracy said it could be difficult to say how long such a proposal could be tied up in the interagency process or when ultimately it could be presented to Obama for his signature.

"The Basin and Range" refers generally to the area between the Sierra Nevada Mountains in eastern California and the Colorado Plateau region where the corners of Colorado, Utah, Arizona and New Mexico join.

Its topography, built by shifts in the Earth over eons, is characterized by narrow mountain chains alternating with flat arid valleys, or basins.

"The Basin and Range area of southeastern Nevada is an iconic American landscape," according to the draft proclamation that also calls it "one of the most undisturbed corners of the broader Great Basin region."

The region "is one of the most scenic, most unspoiled landscapes," said Brian O'Donnell, executive director of the Conservation Lands Foundation. "It has an abundance of cultural resources, petroglyphs, native American sites. It has important wildlife habitats for a number of sensitive species. It is incredibly worthy of conservation."

But Nye County Commissioner Lorinda Wichman called the proposal "overkill" and said any additional wilderness designations in the county "are going to be met with complaints."

"I do get just a bit appalled at the lack of communication and the bull-in-a-china-shop approach to the actions of this administration," Wichman said.

"Nye County is larger than Switzerland and within Nye's 18,000-plus square miles we are able to generate ad valorem taxes on less than 3 percent of the land mass," Wichman said. "Each time there is more land withdrawn from Nye County for special designations the residents of Nye County lose potential opportunities to fund future services."

In January, Sen. Dean Heller, R-Nev., introduced a bill that would prohibit the designation of national monument land in Nevada "except by express authorization of Congress."

Hardy and Reps. Mark Amodei and Joe Heck, both R-Nev., sponsored a similar House bill.

"Currently, with a quick stroke of the pen, the executive branch can lock up millions of acres of public land without consulting the public or their representation in Congress," Heller said at the time. "This legislation ensures Congress and local officials are not bypassed by the executive branch when it comes to proposed national monuments in Nevada."

The Antiquities Act defines national monuments as protected areas such as "historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest."

Obama has designated eight monuments by proclamation. The most recent was the San Gabriel Mountains National Monument in Southern California designated last year.

The most controversial was the May 2014 designation of 500,000 acres in the Organ Mountain-Desert Peaks region of southern New Mexico.

Obama considering another national monument in Nevada

By **Amber Phillips (contact)**

Thursday, May 7, 2015 | 3:04 p.m.

WASHINGTON — President Barack Obama is seriously considering creating another national monument in Nevada — and the congressman whose district it would sit in is not happy about it.

"I am appalled and deeply concerned," Republican Rep. Cresent Hardy said in a statement published on his website Thursday.

Hardy's office obtained a draft of the president's proclamation to set aside more than 700,000 acres of land in Lincoln and Nye counties for protection.

The six-page draft is being circulated among federal agencies for input before Obama makes a decision on whether to prohibit development and energy exploration there.

"The land tells the story of a rich cultural tradition," it reads. "From the earliest human inhabitants 13,000 years ago, to miners and ranchers in the past century and a half, to a modern artist in recent decades, the area's residents have created and left behind noble legacies."

The modern artist the administration refers to is quirky Michael Heizer, who has spent the past 40 years building one of the world's largest sculptures in the Nevada desert. "City" is a 1,200-square-mile sculpture reminiscent of Mayan ruins in Mexico. It's nearly complete, and protecting it and the land around it has been a priority for retiring Sen. Harry Reid, D-NV.

Reid and Las Vegas Democrat Rep. Dina Titus introduced legislation in Congress earlier this year to cordon off "City" and thousands of acres around it from oil and gas development. But that's unlikely to move in a Republican Congress, so Reid has lobbied Obama to use his power under the Antiquities Act to unilaterally create national monuments.

Reid and Titus also hosted a community meeting in February with a high-level Department of Interior official to show support for creating the national monument. Public meetings are a precursor for every one of the 16 national monuments Obama has designated.

Support from members of Congress whose district covers the monument is not. And Hardy is livid.

The entire projected national monument sits in his district, which spans from North Las Vegas through most of central, rural Nevada. Hardy said in the statement he fears that closing off the land would inhibit Nellis Air Force Base from conducting high-profile training flights.

"It seems the president and Senator Harry Reid share an ambivalence toward what we in Nevada know to be true: namely, that closing down this vast area of land for generations to come would adversely impact Nevadans' ability to choose how we want to grow economically, and it would hamper our military members from sharpening their skills," he said.

But most wilderness protection bills or proclamations have language that allows for military activities, including the national monument Congress created in nearby Tule Springs in 2014 to protect prehistoric

fossils.

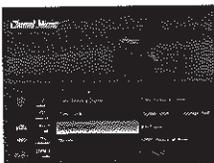

"Congressman Hardy is getting a little bit ahead of himself," Reid's spokesperson, Kristen Orthman, said in a statement.

The deal is far from done — Obama could change his mind. But it appears this is one fight Hardy is going to lose.

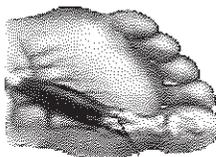

"No area is as uniquely Nevada as is the Basin and Range," Orthman continued. "It deserves protection so our children and grandchildren and the generations of Nevadans to follow can experience one of the most beautiful places on Earth."

Obama considers protecting Nevada land

By Timothy Cama - 05/08/15 08:30 AM EDT

President Obama is considering a controversial proposal to protect more than 1,000 square miles of rural land in southern Nevada.

Rep. Cresent Hardy (R-Nev.) said he obtained a draft document outlining the proposed Basin and Range National Monument, which he said Obama is considering establishing unilaterally under his Antiquities Act power.

Some Nevada Democrats and conservationists have long sought to protect the land in Lincoln and Nye counties, but Republicans have pushed back.

"I am appalled and deeply concerned about the national security implications of President Obama's politically motivated effort to permanently tie up more than 700,000 acres of land, most of which is under one of the most heavily used military operating areas in the United States, and all of which is in Nevada's 4th congressional district," Hardy wrote in a statement, referring to his district.

The land surrounds "City," a massive in-progress piece of art meant to resemble ancient mounds and monuments.

Obama's national monument designation would protect the area from development, energy production and a wide range of other activities.

"The land tells the story of a rich cultural tradition," the White House wrote in the draft, **according** to the *Las Vegas Sun*. "From the earliest human inhabitants 13,000 years ago, to miners and ranchers in the past century and a half, to a modern artist in recent decades, the area's residents have created and left behind noble legacies."

Kristen Orthman, a spokeswoman for Senate Minority Leader Harry Reid (D-Nev.), fought back against Hardy.

"Sen. Reid believes this area deserves protection — that is why he introduced legislation to do so in 2014," she said. "But in lieu of legislation, Sen. Reid fully supports President Obama if he decides to designate this area, which he has the legal authority to do so. No area is as uniquely Nevada as is the Basin and Range."

Obama extensively used his power to create national monuments, and has used it to protect more land and water than any previous president.

That has irked Republicans, who see Obama's actions as out of line and a power grab. They've proposed multiple bills to remove or significantly curtail Obama's power to create national monuments without congressional consent.

INTRODUCTION

Under ongoing climate and landscape changes, there is a critical need to identify, connect, and conserve landscapes that more effectively and strategically capture biodiversity and associated ecological processes (Margules and Pressey 2000). The ecological significance and context of currently unprotected lands should be used to determine the location of new areas for future conservation and protection (Dickson et al. 2014). Indeed, lands that are currently unprotected or threatened by human impacts can complement or enhance the features and functions of existing protected area networks (Rodrigues et al. 2004). In the United States, intact public lands are essential to the conservation of biodiversity (Groves et al. 2000) and maintenance of key ecological processes, including landscape connectivity for multiple species (Crist et al. 2005, Theobald et al. 2012). Currently, the existing protected areas network in the U.S. is likely insufficient to guard against the long-term loss of species because it does not include the range of ecosystem types they inhabit (Scott et al. 2001).

Across the western U.S., extensive areas of public land administered by the Bureau of Land Management (BLM) present substantial opportunities to maintain and further protect important components of biological diversity and function. Within the 11 contiguous western states, BLM lands also provide habitat for a wide diversity of plant and animal species, including roughly 20% of the nation's rare or imperiled species (Stein et al. 2008). Approximately 68% of Nevada is administered by the BLM (Gorte et al. 2012). The state of Nevada falls entirely within the Great Basin ecoregion, which is considered to be one of the most endangered ecoregions in the U.S. (Noss et al. 1995). Limited water supplies, changing land use and climate, invasion by non-native plant species, and altered fire regimes all are contributing to the vulnerability of the Great Basin ecoregion (Chambers et al. 2008). Both the Great Basin ecoregion and Nevada contain more unprotected roadless BLM lands than any other ecoregion or state in the contiguous U.S. (Dickson et al. 2014).

In this context, the proposed 877,100-acre Basin and Range Conservation Area (BRCA) in southeastern Nevada presents a significant opportunity to conserve key components of biological diversity and ecological function within this landscape and across the region. A recent study by Dickson et al. (2014) was designed to provide a sound scientific basis for future proposals for conservation-based special designations in the western U.S., with an emphasis on BLM lands. We leveraged the inputs and results produced by this study to conduct an assessment of conservation features and values across the BRCA and adjacent lands. We focused our assessment on information that highlighted the ecological importance and representativeness of the BRCA in landscape and regional settings.

Assessing ecological importance

For our assessment, we first calculated the amount of area determined by Dickson et al. (2014) and The Nature Conservancy (TNC; TNC 2011) to be of high conservation value within the proposed boundary of the BRCA. In addition, we mapped and summarized four landscape-level indicators of biodiversity, resilience to climate change, and connectivity (Map 1; see also Dickson et al. 2014). Specifically, we used readily available and published spatial data that characterized two indicators of connectivity: landscape permeability (Theobald et al. 2012) and proximity to the nearest protected area (USGS 2011a); one indicator of biodiversity: rarity-weighted species richness (Chaplin et al. 2000); and one indicator of resilience to climate change: topographic complexity (Smith et al. 2011). Data for each indicator was generated using a 65,000-acre scale of analysis and a 270-m pixel resolution (see detailed methods described by Dickson et al. 2014). Although we focused our assessment on the BRCA, our indicator maps extended across all 11 western states, permitting comparisons between the two extents.

We determined the values of each of these four indicators relative to the larger landscape using a simple scoring system based on percentile ranks. Specifically, the mean value of each indicator within the BRCA was compared to the distribution of means of a large ($n > 100$) random sample of areas across the western U.S. The size of the random samples was equivalent to the size of the proposed BRCA. Scores ranged from 0 to 100. A score of 98 for a given indicator would indicate that the mean value of that indicator in the BRCA was greater than or equal to 98% of similarly-sized random samples.

Assessing representativeness

The ability of any protected areas network to capture biodiversity and maintain ecological function will depend on the variety of ecosystem components (e.g., vegetation and landform types that contribute to habitat) that are represented within the network (Aycrigg et al. 2013). In the U.S., only 12% of lands have protected status (USGS 2011a), and these lands have typically not been selected on the basis of representation (Pressey 1994). Thus, as a second step, we assessed the degree to which the BRCA diversifies the existing protected areas network by increasing representation of different ecosystem components. We compiled spatial data on major ecosystem and landform types across the Western U.S. and within the proposed BRCA using data obtained from the USGS (USGS 2011b). Next, we calculated the percentages of different ecosystem components in the western U.S. that are represented in the current protected areas network, including lands managed specifically for conservation of species (IUCN 1994) and those within the BLM National Landscape Conservation System (NLCS). We also calculated the percentages of ecosystem components that would be represented within the protected areas network following any designation of the proposed BRCA.

RESULTS AND DISCUSSION

The BRCA has high ecological importance

Our assessment of ecological importance suggests the BRCA has significant ecological values. The West-wide results of Dickson et al. (2014) indicated that the proposed boundary of the BRCA encompassed 112,823 acres (13%) of relatively high conservation value, and that 24,651 (22%) of these acres might be considered 'conservation priority areas' (Map 2). Lands identified by TNC as having high conservation value encompassed 144,256 acres (17%). Between the two studies, 17,206 acres of these lands were overlapping.

The BRCA is relatively roadless

Unprotected public lands that are relatively roadless and undeveloped, such as those administered by the BLM in and around the proposed BRCA, may afford the best opportunity to conserve natural elements and ecosystem processes (Davidson et al. 1996, Watts et al. 2007). Based on the map extent derived by Dickson et al. (2014), approximately 555,747 acres (63%) of the BRCA is roadless (Map 2).

The BRCA has high landscape connectivity value

The maintenance of connectivity processes is one of the most important aspects of biodiversity and landscape-level conservation (Taylor et al. 2006, Noon et al. 2009). Our indicator map of permeability (Map 1A) provided an estimate of the overall ecological connectivity of the natural landscape. This permeability model was designed to inform land use planning and policy about landscapes that might be important for maintaining ecological flows (e.g., habitat connectivity for multiple species simultaneously) and adapting to climate change (Theobald et al. 2012). Compared to a random sample of lands in the West, we observed particularly high values for landscape permeability within the BRCA (Figure 1). Our assessment suggests that the BRCA and surrounding BLM lands provide important features that can facilitate the movement of multiple organisms within and across jurisdictions, now and

under future climate conditions (Stein et al. 2008). Because the BRCA currently exhibits relatively low levels of human modification (Theobald 2010), it is likely to promote connectivity for multiple local and wide-ranging ecological processes, if left undisturbed and intact.

Locating new protected areas in close proximity to existing protected areas could significantly contribute toward interconnecting a larger, regional network of biodiverse and ecologically effective lands, especially in the western U.S. A larger network of protected areas in the region that includes the BRCA would likely facilitate or enhance the ability of species to migrate and adapt to a climate that is rapidly changing in the Southwest (Seager et al. 2007). Relative to all other western lands, the BRCA also was highly proximate to existing protected areas. Indeed, the proposed BRCA overlaps or encompasses four existing wilderness areas and is immediately adjacent to or within 25 km of eight other state or federally protected areas. Given the relatively high proximity of the BRCA to existing protected areas, this landscape could contribute significantly toward interconnecting a larger network of protected lands within Nevada (Map 1B). Furthermore, based on the results of Dickson et al. (2014), the area has great potential to link a regional network of existing and future protected lands, forming an 'archipelago' of connectivity that extends from southern Nevada into northwestern Arizona, southwestern Utah, and western Colorado.

The BRCA has high biodiversity value

Species richness is one of the most fundamental and important measures of biodiversity (Magurran 2004). Because rare and endemic species are key elements of total biodiversity in a given area (Meyers et al. 2000), we used NatureServe's rarity-weighted richness index (hereafter, 'species richness' for convenience; refreshed 2008) to map and evaluate this component of biodiversity (Map 1C; see Chaplin et al. [2000] for references and modeling methods). The BRCA exhibits high adjacency and some overlap with areas of relatively high rarity-weighted species richness, suggesting the presence of rare and endemic species. The results of Dickson et al. (2014) indicated numerous areas of high conservation value in Nevada, including those within or adjacent to the BRCA, were driven by high values for rarity-weighted species richness, when compared to all other western states.

The proposed BRCA also contains a unique variety of Mojave, Sonoran, and Great Basin vegetation communities, which together serve as rare and important ecological transition zones and contribute to overall biodiversity in the area. The high value conservation areas identified by (Dickson et al. 2014), including those overlapping the BRCA, also encompassed numerous ecotones where vegetation community transitions can signify and promote important patterns of diversity (Whittaker 1975). For example, the Seaman Range contains one of the most genetically diverse relict stands of ponderosa pine (*Pinus ponderosa*) in the West (Potter et al. 2013).

The BRCA contains important terrain features that may enhance resilience to climate change

Topographically complex landscapes can harbor high levels of biodiversity (Coblentz and Riitters 2004) and may provide refugia for native species under changing climatic conditions (Dobrowski 2011). We produced a map of topographic complexity using USGS digital elevation models and the standard deviation of slope values (Map 1D; after Dickson et al. 2014). We considered this map of the physical environment to be a proxy for ecological complexity and refugia. This diversity of topographic features within the BRCA provides a range of microclimates that can enable species with limited dispersal ability opportunity to move and persist in habitats that fall within their climatic constraints (Loarie et al. 2009).

The BRCA would enhance the diversity of the U.S. protected areas network

Based on our assessment of representation, the proposed BRCA stands to increase the variety of vegetation and landform types in the U.S. protected area network, a number of which are currently underrepresented. The majority of protected areas in the western U.S. occur within high montane and alpine ecosystems (Figure 2). This underrepresentation presents a significant bias, since most shrubland- and grassland-dominated ecosystem types are offered little protection. Nevertheless, our assessment indicated that the BRCA encompasses a relatively large amount of cool and warm semi-desert scrub and grassland vegetation types, as well as temperate forest, which are all currently underrepresented in the existing protected areas network (Figure 2; Aycrigg et al. 2013). Similarly, Dickson et al. (2014) found these types to be common in their identification of unprotected areas with high conservation value. Significant biases also are evident with respect to the protection of major landform types around the West, and cliffs and mountain tops have much more protection than basins, flats and valley bottoms (Figure 3). However, the BRCA includes a disproportionately high amount of basin/flat, peak/ridge, and otherwise sloped landform types (Figure 3). The diverse basin and range topography of the BRCA would contribute substantially to the portfolio of protected areas lacking these uncommon terrain features.

CONCLUSION

Our assessment of ecological indicators in a landscape and West-wide context highlighted the intrinsic value of the BRCA with respect to landscape permeability, species richness, topographic complexity, and proximity to nearest protected area. Considering also the results of Dickson et al. (2014), protective designation of the proposed BRCA would substantially grow and enhance the existing network of protected areas in the Southwest (Davidson et al. 1996, Scott et al. 2001). The value of this area in sustaining the ecological processes and large contiguous landscapes that support high levels of biodiversity, resilience to climate change, and connectivity across jurisdictions should not be underestimated.

RECEIVED

2014 NOV -3 PM 3:49

OFFICE OF THE
CLERK OF THE SENATE

The Honorable Sally Jewell
Secretary of the Department of the Interior
1849 C Street NW
Washington, DC 20240-0001

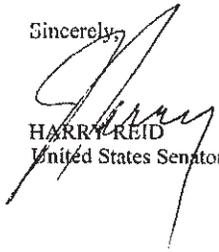

Dear Secretary Jewell:

I am writing to request that the Department of the Interior host a public stakeholder meeting in Las Vegas in December to discuss various conservation efforts in Southern Nevada. Among those discussed could include the proposed Tule Springs Fossil Beds National Monument, Gold Butte, Michael Heizer's 'City', and others.

Growing up in Searchlight, I developed a deep appreciation for our public lands and spent countless hours hunting and hiking in the deserts and mountains of southern Nevada. From those experiences, I have determined that our dramatic landscapes need to be protected for our children and grandchildren to experience as I have. Throughout my time in congress and now as Nevada's senior Senator, I have worked hard to conserve Nevada's special places. I appreciate the Department of Interior's partnership in working with me and the Nevada delegation to protect natural and cultural resources while allowing for the responsible growth of our economy.

Thank you for your consideration of my request to host and participate in a conversation of these efforts in southern Nevada. Please feel free to contact me or have your staff contact Sara Moffat of my staff at (202) 224-0441.

Sincerely,

HARRY REID
United States Senator

May 6, 2015

The Honorable Sally Jewell
Secretary of the Interior
1849 C Street, N.W.
Washington, DC 20240

Dear Secretary Jewell:

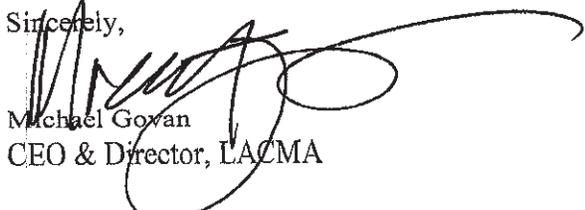

I write to express my strong support of the designation of the Garden and Coal Valley area as a component of the National Landscape Conservation System pursuant to either Presidential authorities or federal legislative actions, and to notify you of the Los Angeles County Museum of Art's intent to transfer to the federal government for the purpose of such a designation a conservation easement in private lands encompassing and nearby the artwork *City*, by the artist Michael Heizer.

Michael Heizer is an internationally renowned and influential artist whose works are owned and exhibited by many museums, including ours. The land art work *City*, in Garden Valley, Nevada, is monumental by design. The sculpture, which measures more than a mile in length and a quarter mile in width, comprises earthen mounds and pits, cinder-dyed cement slopes, and huge geometric cement forms that capture shifting sun and shadows. The primitive forms create a large, sunken plaza reminiscent at once of the national mall in Washington and large Mesoamerican ruins such as Chichén Itzá or Teotihuacán in Mexico while also reflecting the most modern building technologies. The artist has been working on *City* since the 1970s, and the artwork is nearly complete after some 40 years of work. The location of *City* in an undeveloped area within the Basin and Range region will draw visitors from around the world to experience a uniquely American sculpture set within a uniquely American landscape.

The Triple Aught Foundation, a 501(c)(3) organization dedicated to owning and displaying the art of Michael Heizer, presently owns the land upon which *City* is situated, as well as lands around *City* that are maintained as undeveloped open space. Museum Associates, a 501(c)(3) organization organized under the laws of California, doing business as, and operating The Los Angeles County Museum of Art (LACMA) has acquired a conservation easement from the Triple Aught Foundation to ensure the protection of *City* and the adjacent open space and secure public access to *City* upon its completion and the preparation of a visitor management plan by Triple Aught and the Bureau of Land Management. In order to achieve designation as a component of the National Landscape Conservation System, LACMA is prepared at this time to donate the conservation easement encompassing the realty containing *City* and the adjacent open space to the federal government as approved by the Board of Trustees of LACMA pursuant to their authority under LACMA's Articles of Incorporation and Bylaws. Our intent is that the donated conservation easement would be administered by the Secretary of the Interior through the Bureau of Land Management as a part of the National Landscape Conservation System. The Los Angeles County Museum of Art is also prepared to continue to explore and advise on arrangements with the Triple Aught Foundation and the Bureau of Land Management that would further the preservation and interpretation of the entire site for the public.

We look forward to the accomplishment of this important milestone in the ongoing historic and artistic significance of this national treasure.

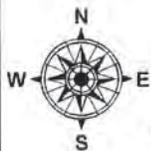

Sincerely,

Michael Govan
CEO & Director, LACMA

EVENT MEMORANDUM FOR THE SECRETARY

Waco Mammoth National Monument Dedication Events

DATE: Monday, October 5, 2015
LOCATION: Waco Mammoth National Monument
TIME: 8:00 AM-1:30 PM
FROM: Russ Whitlock, Superintendent, Lyndon B. Johnson National Historical Park
830-330-4987 (m); russ_whitlock@nps.gov

I. PURPOSE

The dedication ceremony is a local celebration by the community and hundreds who have invested in the Site to recognize the accomplishment of achieving national monument designation for the mammoth site. The ceremony is another public expression of the communities support for the national monument and the surrounding Waco Mammoth Site as a valued component of the greater Waco, Texas area.

While in Waco for the dedication, you will have the opportunity to visit both the Mayborn Museum exhibit on Mammoth bones and the Mammoth Dig Shelter as well as participate in a thank you luncheon hosted by the National Park Conservation Association (NPCA).

The Mayborn Museum tour will include two areas of the museum: the museum's interpretive exhibits on Columbian Mammoths and the curatorial storage area housing the current collection from the Waco Mammoth Site.

The Dig Shelter is the focal point of the national monument and contains the only currently exhibited fossil remains of Columbian Mammoths. During the tour most visitors realize the importance of the site from what they see and hear. This is an excellent introduction to the Site's significance and a perfect experience before you join the several hundred motivated and devoted supporters for the dedication ceremony. The Dig Shelter is a large climate controlled structure that protects the most recent excavation site.

NPCA is sponsoring a "Mammoth Thank You Luncheon" for major donors and supporters of the Waco Mammoth National Monument. Expect approximately 75 at the luncheon.

II. PARTICIPANTS

Museum Participants

- You
- Former First Lady Laura Bush
- Jon Jarvis
- U.S. Congressman Bill Flores, Congressional District #17
- Gina Flores, wife of U.S. Congressman Bill Flores
- Charles Walter, Director, Mayborn Museum
- Tom Haddad, Assistant Director of Facilities and Collections, Mayborn Museum

- Anita Benedict, Collections Manager, Mayborn Museum (tour guide)
- Greg McDonald, Paleontologist & Senior Curator of Natural History at National Park Service, Ft. Collins
- Russ Whitlock, Superintendent, Lyndon B. Johnson National Historical Park
- Sarae Leuckel, Deputy Superintendent, Lyndon B. Johnson National Historical Park
- Jason Hagerup, City of Waco photographer

Bone Site Participants

- You
- Former First Lady Laura Bush
- Jon Jarvis
- Russ Whitlock
- Sarae Leuckel
- Raegan King, Mammoth Site Operations Coordinator (tour guide)
- Jane Meyer, Community Member and Supporter
- Gloria Young, Community Member and Supporter
- Larry Groth, Former City Manager, City of Waco
- Gayle Lacy, President, Waco Mammoth Foundation
- Walter Lacy, Founding Member of Strecker Associates and Supporter
- Chet Edwards, former U.S. Congressman
- Theresa Pierno, Chief Operating Officer of the National Parks Conservation Association
- Jason Hagerup, City of Waco photographer

Program Participants

- You
- Former First Lady Laura Bush
- Jon Jarvis
- Ken Starr
- Russ Whitlock
- Malcolm Duncan, Mayor, City of Waco
- Larry Groth, Former City Manager, City of Waco (emcee)
- Gloria Young, Founding President of Waco Mammoth Foundation

III. AGENDA

--Visit to Mayborn Museum Exhibit on Mammoth Bones (45-50 minutes)

--Visit to Waco Mammoth National Monument Bone Site (30-40 minutes)

--Waco Mammoth National Monument Dedication Ceremony (45 minutes)

- Larry Groth will give welcoming remarks (introduces everyone unless otherwise noted below)
- Presentation of Colors by the LBJ Colorguard

- The National Anthem
- Larry Groth will return to the podium to recognize special guests; introduce Gloria Young
- Gloria Young remarks on the history of Waco Mammoth National Monument
- Russ Whitlock remarks and give special presentation to Larry Groth (*surprise*)
- Malcolm Duncan remarks
- Ken Starr remarks
- Laura Bush remarks
- Jon Jarvis remarks; introduces Secretary Jewell
- Secretary Jewell remarks
- Larry Groth returns to podium to close the program

--Media Availability (15 minutes)

--Mock Archaeological Dig & Distribution of Every Kid in a Park Passes (45 minutes)

- You, Jon Jarvis, and approx. 20 4th Grade Students from Hillcrest Professional Development School

--NPCA Luncheon Honoring Dedication of Waco Mammoth National Historic Site (90 minutes)

- Approx. 100 supporters
- You have no formal role at the luncheon
- SJ Table: Jane Meyer, Mayor Malcolm and Susan Duncan, Nell and Jim Hawkins, Mary Ann and Don Parks, Nancy and Fred Logan
- Lunch will be served
- Ken Starr welcomes guests and delivers blessing; introduce Theresa Pierno.
- Theresa Pierno will deliver remarks and thank guests.
- Lunch continues.

IV. TALKING POINTS/REMARKS

Program talking points provided by O/S Comms attached.

Significance

- Only known nursery heard of Columbian Mammoths in the nation
- A total of 24 fossils have been excavated plus remains of a camel, saber-toothed cat, dwarf antelope, alligator and giant tortoise
- All collected specimens and archival materials/records housed in one location; the Mayborn Museum at Baylor University
- The five acres of the national monument and surrounding 104 acres of the Waco Mammoth Site offer excellent opportunities for further exploration and paleontological and geological research.
- Site and national monument retain a high degree of integrity as the area has not been disturbed beyond minor top level of ground.

- City of Waco held land ownership allowing for donation of initial acreage for national monument.

Site Specific Items of Importance

- Initial park developed through private donations of lands and over \$4 million in contributions demonstrating strong local support by private individuals, groups and organizations, local governments.
- NPS Special Resource Study found, in 2008, “the most effective and efficient approach to ensuring long-term protection of significant resources and providing opportunities for public enjoyment is for the NPS to join the existing management partnership with the City of Waco, Baylor University and the Waco Mammoth Foundation.”
- City has operated the Site since 2009 and will continue to support operations of the national monument. City is conducting all educational programs, NPS is recruiting for seasonal interpretive rangers who will allow the park to operate full time and respond to educational program requests.
- Baylor University continues to house and protect the fossil remains at Mayborn Museum. Additionally they provide oversight and monitoring of remains *in situ* within the national monument’s dig shelter.
- Waco Mammoth Foundation will continue to support the park financially and as a public advocate for future operations and development of the national monument.

V. KEY FACTS

Waco Mammoth terminology:

- “Site” means the entire 108 acre parcel designated as the authorized boundary of the national monument.
- “Monument” means the 7.11 acre parcel of fee simple ownership and rights-of-way that comprises the national monument and is surrounded by the remaining 100 acres.

VI. BACKGROUND

Museum

- From the date of initial discovery of bones in 1978, Baylor University and staff of the Mayborn Museum have been involved with the Mammoth site.
- From 1984 to present, Baylor University organized and administered all excavation activities, production of study papers, and research of fossil remains.

Greg McDonald, Senior Curator for NPS, states it is unusual for the entire collection from an excavation site to be housed in a single location. He believes this is a contributing aspect of the national monument in that the archival records and complete collection of fossils and biological material are in one place for research and scientific study.

A General Agreement, signed by Baylor University, The City of Waco, and the NPS commits the university to:

- continue stewardship of the Site's collected specimens and archives housed within the Mayborn Museum.
- continue to monitor the environmental conditions within the Dig Shelter and condition of the *in situ* fossil specimens displayed
- continue to promote scientific study and research opportunities through consultation with NPS

The ownership transfer of the archival collection to the City of Waco has been completed. The City intends to donate the collection to NPS as part of the July 2015 donation of lands to create the national monument. NPS has requested ownership not occur until a NPS paleontologist can be assigned to take responsibility for the collection. Until that time, Baylor University will continue to provide for safeguarding and access in consultation with NPS Curators.

Former First Lady Laura Bush expected to speak on importance of partnerships and private support and mention the upcoming centennial of NPS.

Dig Shelter

- Congressman Chet Edwards, in attendance at the dedication ceremony, secured a grant through Save America's Treasures Program to replace the "circus tent" that was protecting the *in situ* specimens with a more durable shelter that eventually became the large Dig Shelter you'll visit on the monument tour.
- The entire park area and all facilities have been designed, funded, and constructed by the City of Waco and the Waco Mammoth Foundation. To date nearly \$4 million has been invested.
- The City provides management and operations of the facilities and grounds and currently provides all the interpretive and educational programs. NOTE: A certificate of eligibility in the hands of the Site Manager to hire five NPS seasonal interpretive positions.
- To date, the national monument has no budget so Lyndon B. Johnson NHP is supporting the interpretive seasonal positions and making small purchases to support operations and programs in the park.

What you will see during the national monument tour constitutes the majority of NPS holdings. The national monument could grow to the full 108 acres over time and the City of Waco is open to enlarging the monument as necessary to incorporate visitor services, resources protection, and scientific research.

The City and Foundation developed a three-tier plan in 2010 to indicate a preferred development of the entire property. Their plans, including a visitor center, laboratory, children's discovery area, and nature trails will be considered during development of the park's Foundation Document and General Management Plan.

Dedication Ceremony

Former City Manager Larry Groth (pronounced growth) was an advocate for the Mammoth site to become a park and part of the NPS from the beginning of the Special Resource Study. Superintendent Russ Whitlock will make a surprise presentation during the ceremony designating Larry Groth as an honorary park ranger. He will be presented a ranger hat.

Gloria Young is a local celebrity and much-loved by the mammoth group. She and her husband F.M. Young have supported the idea of a national monument since the 1990's. Gloria's comments will offer a historical perspective since the first bone discovery in 1978. Her comments will be fun and light-hearted.

Timeline

- 2002: Special Resource Study authorized. Sponsored by U.S. Representative Chet Edwards (seat currently held by Bill Flores)
- 2008: Special Resource Study completed and transmitted to Washington Office
The preferred alternative was "partnership led by NPS."
City of Waco hosts a Groundbreaking Ceremony for the Waco Mammoth Site
- 2009: Waco Mammoth Site opens to the public
The architects carefully referenced NPS styles become evident even down to the entrance sign copied after Curecanti National Monument.
- 2009-2012: Several attempts to pass legislation creating Waco Mammoth National Monument, but met with resistance from NPS due to requirement of no Federal funding.
John Nau attempted to find compromise with representatives of Congressman Flores and Senator Cornyn with no success.
- 2013: Suzanne Dixon, Regional Director for NPCA contacted representatives from the Waco Mammoth Foundation, City of Waco, and Baylor University. She offered to open doors in the Congress and White House and assist representatives from Waco to have an opportunity to plead their case. After several frustrating attempts through the legislative route, the group agreed to pursue designation under the Antiquities Act.

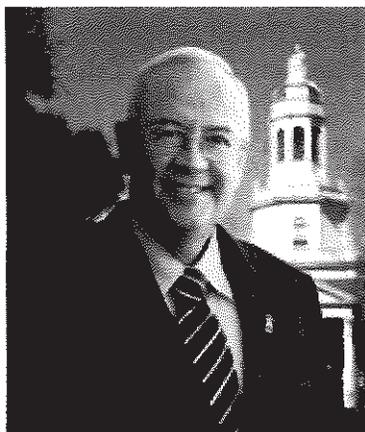

VI. ATTACHMENTS

Bios (below)

Attachment 2: WacoTrib.com editorial on former City Manager Larry Groth

Ken Starr
President & Chancellor, Baylor University

A distinguished academician, lawyer, public servant and sixth-generation Texan, Judge Ken Starr serves as the chief executive officer of Baylor University, holding the titles of President and Chancellor. On June 1, 2010, Judge Starr began his service as the 14th president to serve Baylor University and was named to the position of President and Chancellor on November 11, 2013. In providing the additional title, he is charged with the task of increasing Baylor's influence in the nation and around the world.

Judge Starr also serves on the faculty of Baylor Law School as The Louise L. Morrison Chair of Constitutional Law and teaches a seminar on current Constitutional issues. Judge Starr is a member of the Board of Directors for the National Association of Independent Colleges and Universities (NAICU) and currently serves as President of the Southern University Conference. In addition, he serves as a member of the Board of Trustees for the Baylor College of Medicine and the Board of Trustees for Baylor Scott & White Health.

In September 2010, Judge Starr established his first fundraising priority: The President's Scholarship Initiative, a three-year challenge to raise \$100 million for student scholarships which was completed five months ahead of its goal. He also is leading Baylor into the future under *Pro Futuris*, a new strategic vision developed with the collective wisdom of the extended Baylor family.

Judge Starr has argued 36 cases before the U.S. Supreme Court, including 25 cases during his service as Solicitor General of the United States from 1989-93. He also served as United States Circuit Judge for the District of Columbia Circuit from 1983 to 1989, as law clerk to Chief Justice Warren E. Burger from 1975 to 1977 and as law clerk to Fifth Circuit Judge David W. Dyer from 1973 to 1974. Starr was appointed to serve as Independent Counsel for five investigations, including Whitewater, from 1994 to 1999.

Prior to coming to Baylor, Judge Starr served for six years as The Duane and Kelly Roberts Dean and Professor of Law at Pepperdine, where he taught current constitutional issues and civil procedure. He has also been of counsel to the law firm of Kirkland & Ellis LLP, where he was a partner from 1993 to 2004, specializing in appellate work, antitrust, federal courts, federal jurisdiction and constitutional law. Judge Starr previously taught constitutional law as an adjunct

professor at New York University School of Law and was a distinguished visiting professor at George Mason University School of Law and Chapman Law School. He is admitted to practice in California, the District of Columbia, Virginia and the U.S. Supreme Court.

Judge Starr is the author of more than 25 publications, and his book, "First Among Equals: The Supreme Court in American Life," published in 2002, was praised by U.S. Circuit Judge David B. Sentelle as "eminently readable and informative... not just the best treatment to-date of the Court after (Chief Justice Earl) Warren, it is likely to have that distinction for a long, long time." A member of Columbus Avenue Baptist Church in Waco, Judge Starr and his wife, Alice, have three children and six grandchildren.

Gloria & F.M. Young

F. M. Young was born to Anna Marie Huber and John Young on January 13, 1930 in Tours, TX, the youngest son of a family that would eventually consist of seven boys and three girls. After a series of moves in early childhood his family eventually settled in the Speegleville area, where he attended local schools through the tenth grade. He then left school to begin construction work with his two brothers Raymond T. and Bernard W. full time, operating his first bulldozer at sixteen years old. The brothers progressed from odd jobs performed for local farmers to local roadwork, creating the first asphalt plant in Waco in 1948 and working on official highway projects in 1950. From their success the Young brothers purchased a grocery store in Speegleville for their parents to run. Around 1953 F. M. began dating Gloria Davis...

Gloria June Davis Young was born in Waco, TX on October 10, 1933, the only child of Roy Haywood Davis and Mildred Thomas Davis. Gloria lived initially in Moody, TX until around age two when the Davis family then moved to the Speegleville area where most of her extended family was located. Her father ran the family farm while her mother helped on the farm during the years she was not teaching school locally. Gloria attended Speegleville schools, then entered the Waco school system for high school. Graduating in 1952, Gloria knew she wanted to continue the family tradition and become a teacher as well, so she enrolled in North Texas State University (now the University of North Texas) in Denton, TX. While in college she began dating F. M. Young during her trips back home, and in 1955 she both graduated early with her teaching degree and married the love of her life.

After their wedding on June 4, 1955, the Youngs moved into a house on 41st and Hillcrest in Waco, TX. Gloria began teaching at Hillcrest Elementary that September while F. M. continued expanding Young Brothers Inc. with Raymond T. and Bernard W. They had two daughters (Melanie in 1957 and Kim in 1958), adopted an infant son, Davis, in 1967 then welcomed Susan in 1969. After seventeen years, the Youngs moved to a lake house in Speegleville where they live currently, maintaining a separate neighboring house used to house visits from their four children and seven grandchildren.

Young Brothers Inc. continued to grow in the latter half of the 1900s. From a small trailer in 1950, the company expanded by opening a new plant behind the old Waco Dam in 1954, then doubled their capacity again by 1958 when the headquarters moved to a new location on Mill Street. The variety of their projects expanded as well. New jobs ranged from helping with recovery efforts after the 1953 Waco Tornado, to dredging the Brazos River for gravel to ever-more audacious highway contracts in McLennan County and beyond. Then in 1960 the brothers decided to part ways. F. M. continued to run Young Brothers road construction while Raymond T. focused on his new Slurry Seal company and Bernard W. (ever the inventor) formed Tymco, a business built around a regenerative air sweeper he created.

After the split in 1961, Young Brothers Inc. expanded further and led the way in several construction methods in the state of Texas and beyond. Several new plants were built in new cities, and in 1980 F. M. built the first computerized concrete plant in Central Texas. F. M. was active in a number of professional organizations, served as President of the Association of General Contractors (AGC) in 1985 and eventually purchased a helicopter to travel between his Waco and Bryan operations. In 2003, seeking a less involved and active role in operations, F. M. agreed to sell the company to MDU Resources. He worked as a consultant for MDU for a while, then stayed busy helping management at Brazos Paving, an offshoot company he still owned in Bryan until he sold the company to the employees via an ESOP (Employee Stock Ownership Plan) and officially retired.

Philanthropy

Gloria and F. M. Young have a rich history of donating to Waco institutions. Throughout his career, F. M. has used his construction prowess and resources to provide free services to various churches, schools and neighborhoods. Specifically for Baylor University, the company donated the concrete for the scoreboard at Floyd Casey Stadium and created a marina on the Brazos River for the Gov. Bill and Vara Daniel Historic Village. The Youngs have always taken an interest in the Brazos River district in Waco, promoting revitalization projects and creating the Brazos Queen II as a tourist attraction.

There have been a number of historical donations from the Youngs as well. When the W. R. Poage estate was auctioned, they purchased a number of items with the express intent to house them in the W. R. Poage Political Library at Baylor University. Also in 1959 the Youngs donated a historic home on Mill Street, the East Terrace House, to the Waco Heritage Society which is now part of the historic homes collection maintained by the Historic Waco Foundation.

**Malcom Duncan
Mayor of Waco**

Malcolm Duncan, Jr. was elected as Mayor on May 12, 2012. Prior to that he served on the Waco City Council beginning June 1, 2010 as the representative for District V. Duncan is a retired businessman, a civic leader and the son of former City Councilman and Mayor Malcolm Duncan Sr.

Duncan has served on the boards of the Waco-McLennan County Health District, Waco-McLennan County Library Foundation, Chamber of Commerce, and Waco Business League. In addition, he worked on the city's Planning and Zoning Commission.

Malcolm Duncan, Jr. is currently the president of Duncan Motors, Inc. of Waco, and has been a prominent figure in the Freightliner and automotive sales industry. Duncan received his BBA from the University of Texas in 1975. His family includes his wife Susan Closs Duncan, two daughters and two granddaughters.

Luncheon Table Assignment

Jane Meyer She and her husband **Paul** are well known philanthropist in this area. Personal friends of Gloria & F. M. Young. Their family foundation made the first major gift to the Mammoth Foundation at the start of fund raising for construction of the park....months later after viewing the bones held in storage at BU, visiting the dig site, and realizing we had to have all the 3.5 million in hand before the City would move to let contract to begin construction, he asked how much had been raised to date....was told 1.7 million and he immediately made a matching donation to the 1.7 million so the construction could begin immediately to protect the bones.

Mr. Meyer passed away two years ago but Mrs. Meyer has continued in her support of the site. Mr. Meyer was the founder of SMI (Success Motivation Institute) and many other investments. Their VERY generous gift made it possible to "protect the bones" which were in danger of destruction by the elements, varmints or vandals.

Malcolm Duncan, Mayor of Waco, His parents were some of the first supporters of the Mammoth project. His father was mayor of Waco and his mother served on the Waco Independent School District board ...very interested in education and formed the Mac Grants that provide scholarships to MCC for disadvantaged students. Malcolm Jr has been an excellent leader following in his parents' footsteps. He led the movement to update the Humane Society facilities and help them move to a no-kill facility. He has been a strong supporter of the Mammoth Site and serves on the Mammoth Foundation Board. His **wife Susan** prefers to

stay out of the lime light. She has spent her time being an excellent mother to their two daughters and loving her grandchildren.

Nell and Jim Hawkins Jim is a successful businessman in Waco and a very generous donor to multiple charities and events in this area. He is in investments.

Nell is a bundle of energy and involved in many activities in our area. She and Jim entertain for various charities and special events in their magnificent home overlooking Lake Waco. They have been generous donors to the Mammoth Foundation and opened their home to the public....for \$100 a ticket as a fundraiser for the Mammoth Site. She serves on our Fundraising Committee.

MaryAnn and Don Parks...Don has sold his business and retired. They are well known for their generosity to various charities in our community. They were very generous to our fundraising efforts when we were raising funds to build the facilities for the Waco Mammoth Site.

Nancy and Fred Logan...Lovely couple....gave the funds to have the Life Size Mammoth painted on the wall inside the shelter. Nancy is on the Fundraising committee as our Corresponding Secretary and writes lovely personal thank you notes to all of our donors at the time of their donation. Of course an "official" letter follows with the tax information. I am not certain of Fred's occupation. They are longtime residents of Waco.

Talking Points for Secretary Jewell
Waco Mammoth National Monument Designation Celebration
Waco, Texas
October 5, 2105

Suggested Length: 5minutes

Objectives:

- Thank the local community/groups, fed/state partners for vision, leadership
- Highlight commitment to preserving lands/waters for next generation
- Reiterate President's commitment to conservation – largest amount of area protected; more ink in his pen

I. ACKNOWLEDGEMENTS

- I'm here today, most of all, to **thank you** for all to your work to make this happen

- **Former First Lady Laura Bush**
 - Before she was the country's First Lady, she was your First Lady!; continues to advocate for conservation in her home state
 - Honorary Co-Chair of NPS Centennial with FLOTUS

- **Jon Jarvis & team** at NPS
 - **Russ Whitlock**, Superintendent at Lyndon B. Johnson NHP **& Staff**

- **Gloria Young**, Founding President, Waco Mammoth Foundation
 - Supported idea of national monument since 1990's

- Many **federal, state and local partners** who have worked for years to make this day possible. This day is for you.

II. SPECIAL DAY

- Happy to celebrate the designation of Waco Mammoth National Monument with you today.
 - Many years in the making – some could say **65,000 years!**
 - Represents hard work from many of you here today since the **discovery more than 25 years ago**
- Because you know, as I do - we have an obligation to the **next generation** to leave our **land, water and wildlife better than we found it.**
 - **Critical** to connect our nation's **young people – from every background and every community** – to the great outdoors
- Glad to see that people have already been **learning and benefiting** from this place with the help of local partners
 - Baylor University
 - Continue to house and protect the fossil remains at Mayborn Museum
 - Staff monitors remains in their original resting place within the dig shelter
 - City of Waco
 - Has operated site since 2009; will continue to conduct educational programming
- **But there's a lot left to learn here**, need to make sure next generation of scientists gets that chance

III. PRESIDENT OBAMA'S CONSERVATION VISION

- President Obama doubled down on **your community's hard work** when he declared this place a National Monument in July
- He also **fulfilled the visions** of two other communities by **designating new national monuments in California and Nevada**

- With that action, he has continued his legacy of protecting **more lands and waters than any other President**, using his authority time and time again to **preserve some of the places most important to our history**.
 - Declared or expanded **19 national monuments**
 - Protecting more than **260 million acres** of public lands/waters

IV. CONCLUSION

- **Margaret Mead** said: “Never doubt that a small group of thoughtful, committed citizens can change the world; indeed, it’s the only thing that ever has.”
- Thanks to **your vision, your leadership and your elbow grease – *because of you*** – our children, our grandchildren, and their grandchildren will have the opportunity to know and love this place as we do, and perhaps take us further down the path of discovery

###

EDITORIAL: Former Waco city manager Larry Groth never forgot critical relevance of community

Posted: Sunday, March 9, 2014 12:01 am

Former President George W. Bush famously said the judgment of history takes many years to coalesce, but we'll take a stab at summing up Larry Groth's considerable record as a longtime city administrator, even though he's but days into retirement. One of his greatest attributes was evident at his Feb. 26 retirement party at the Waco Convention Center. Besides the expected number of city employees, many members of Waco's business community and nonprofit sector paid homage.

That's relevant. It confirms Groth's management of the city of Waco was inclusive of the community at large — particularly critical when you're part of a charge, as Groth has been, to address such steep challenges as chronic poverty, homelessness and recidivism. True, over his long career, he's been behind massive street repair projects; expansion of Cameron Park Zoo; and ensuring our water supply is pleasing to the taste and sufficient to sustain both industry and neighborhoods.

But the Waco native also has been shrewd enough to know unless people's lives are significantly improved, unless they have a shot at sharing in its prosperity and design, all is for naught. In an interview we conducted with Groth last fall upon announcement of his March 1 retirement, he said such projects as the \$46 million Dissolved Air Flotation plant at Lake Waco to clean up water from the dairy country upstream and passage of a \$63 million bond package that, among other things, renovated the Convention Center and improved Cameron Park, weren't the first things to spring to mind when he reflected on accomplishments.

"I'm going to have to think of projects, but the thing I'm really most proud of is the relationships I've built in this community," he said. "Because of those relationships, people would at least have a feeling of comfort and confidence when I said, 'This is something that in my professional opinion I think is best for the city,' even if it might have at first seemed kind of strange. Because of those relationships, people have been willing to do that. And that takes a lot of years to build. I really believe in trying to be honest, trying to be consistent, trying to do what's right. That's the single most important thing I could cite."

Fair enough, though history demands Groth be credited for much else during his years at City Hall, including his final 11 years as a busy city manager: pushing through a long-envisioned plan to raise Lake Waco by 7 feet; spearheading construction of a new low-water dam to keep Lake Brazos levels steady — important as riverfront development takes root; facilitating (with Assistant City Manager Wiley Stem III and Waco Mayor Malcolm Duncan Jr.) long-needed improvements in how our city addresses its problem of stray and abandoned dogs and cats; and helping launch the Waco Mammoth Site.

Given Groth's engineering background, it's no wonder he cites pride in the 20-year street reclamation project that began in the 1980s (though he credits successive city councils for continuing the program, even if it wasn't sexy). On the other hand, most of his time as city manager was spent not only on economic development — with an eye on downtown revitalization — but working with the Greater Waco Community Education Alliance, Baylor University and groups such as Mission Waco and public school officials to ensure the city is shaping the workforce needed for tomorrow's industry.

Groth, 62, plans on exploring the four corners of the nation on a new Harley Davidson given to him by community leaders as a going-away present. But in our corner of the world, he has acquitted himself with dedication, inclusiveness, transparency and technical savvy, leaving his successor, the Waco City Council and this community with far more than just a solid foundation upon which to expand and dream and celebrate.

FAQs
Waco Mammoth National Monument

General/Process

What is a “national monument” established by the President?

- A “national monument” established by the President protects “objects of historic or scientific interest that are situated on lands owned or controlled by the Federal Government” (54 U.S.C. § 320301, known as the Antiquities Act). If the national monument is administered by the National Park Service (NPS), as most but not all national monuments are, it is subject to the same laws and policies as govern other units of the National Park System. Thus, an NPS national monument established by the President is a protected area similar to a national park, administered for the protection and enjoyment of its resources and values.

How does an area become a national monument?

- To be established by the President the area must meet the criteria of 54 U.S.C § 320301 (the Antiquities Act), including having objects of historic or scientific interest located on land already owned or controlled by the Federal government.
- The views of the public are carefully considered in the process.
- National monuments can also be created by Congress. These national monuments are established under their own own enabling statutes, rather than 54 U.S.C. § 320301.
- National monuments can be administered by Federal agencies other than NPS. The Presidential proclamation or Congressionally-enacted statute creating the national monument typically indicates which Federal agency is to administer it.

(b) (5)

How many national monuments are there?

- Of the more than 140 national monuments established by presidents since 1906, over 100 have been units of the National Park System (though a number have since been redesignated as other types of units within the National Park System, such as National Parks, National Historical Parks, etc.). With the addition of Waco Mammoth National Monument, there are currently 79 national monuments administered by the National Park Service, of which 53 were created by Presidential proclamation under the Antiquities Act, and 26 by Congressional legislation.

(b) (5)

(b) (5)

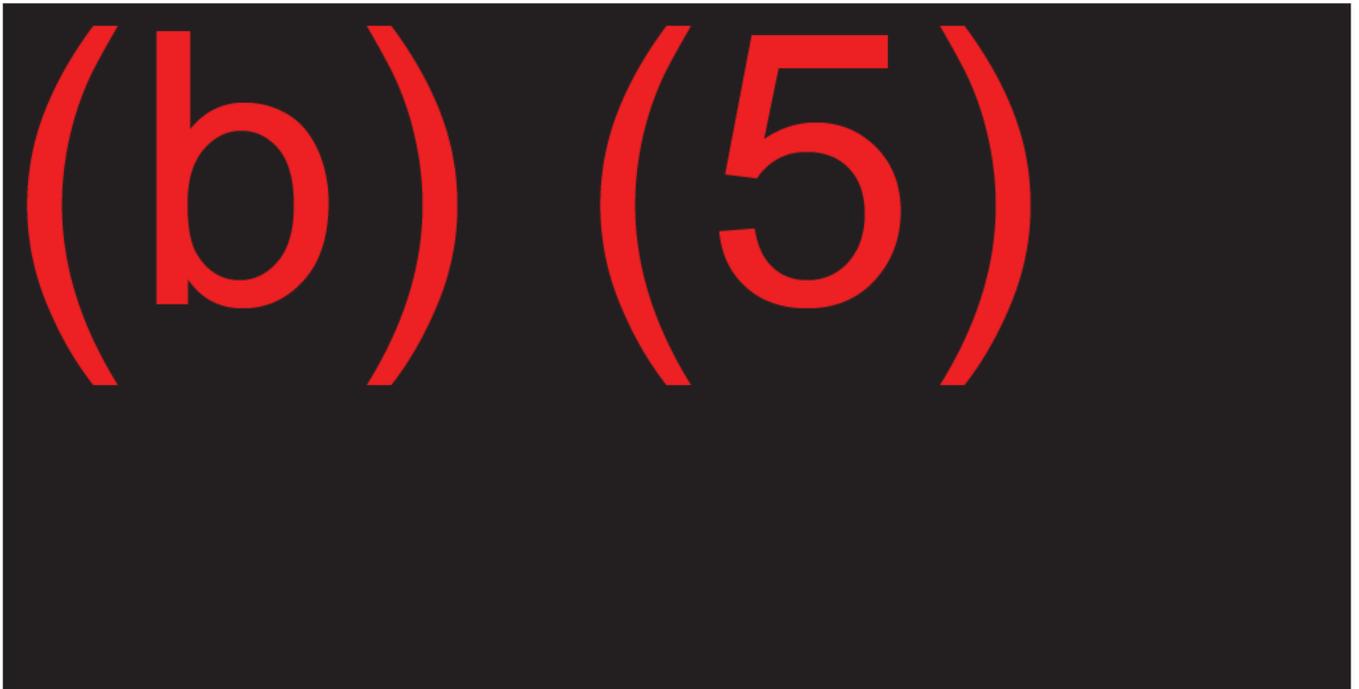

Waco Mammoth

(b) (5)

(b) (5)

What is the Waco Mammoth National Monument?

- The Waco Mammoth National Monument includes within its boundary most of the current Waco Mammoth Site city park in Waco, Texas, located 4.5 miles north of the city's center. The Monument protects a site where paleontological excavation has unearthed extraordinary fossils of a nursery herd of Columbian Mammoths and other animals from the Pleistocene Epoch, including Western Camels, horses, saber-toothed cats, dwarf antelopes, American Alligators, and giant tortoises.

When will it take effect?

- The national monument was established at the time President Obama signed the proclamation.

April 26, 1978

Waco Mammoth National Monument Proposal

(b) (5)

Additional background:

The Waco Mammoth site provides a rare opportunity to understand and interpret the behavior and ecology of the now extinct Columbian Mammoth. In addition, both the excavation area and the land around it offer an excellent opportunity for further exploration and paleontological and geological research.

In 1978, Waco residents Paul Barron and Eddie Bufkin were looking for arrowheads and fossils along the Bosque River when they discovered a large bone protruding from the earth. Realizing the possible significance of this discovery, Mr. Barron and Mr. Bufkin immediately took the bone to the Strecker Museum at Baylor University for identification. The bone was identified as the upper leg bone of a Columbian Mammoth. Over the next 20 years, Baylor University oversaw the excavation of the site, where they found the remains of 24 Columbian Mammoths, including both adults and juveniles, as well as a Western Camel, saber-toothed cat, dwarf antelope, American Alligator, and giant tortoise. The Columbian Mammoths are the largest mammoth species and stood 12 to 14 feet tall and weighed seven to eight tons. Many of the discovered bones, including the remains of four Columbian Mammoths as well as the skeleton of the camel, remain in place, providing visitors an opportunity to view them.

Secretary Jewell Applauds President Obama's Action to Establish Waco Mammoth National Monument

New National Park to Showcase Columbian Mammoth Fossils

WASHINGTON, DC – Secretary of the Interior Sally Jewell welcomed President Obama's designation of the Waco Mammoth Site as one of the nation's newest national monuments, permanently protecting the site where the extremely well-preserved fossils of a herd of Columbian Mammoths and other Ice Age animals have been found.

The Waco Mammoth National Monument provides a rare opportunity to understand and interpret the behavior and ecology of the now extinct Columbian Mammoth. In addition, both the excavation area and the land around it offer an excellent opportunity for further exploration and paleontological and geological research.

"The National Park System offers endless opportunities to inspire and teach us about the history of our nation, and the Waco Mammoth National Monument will share the wonder of scientific discovery with visitors from across the country and around the world," Jewell said, "Waco Mammoth National Monument provides another opportunity to inspire a new generation to love science and learn the thrill of discovery that a site like this can demonstrate first-hand."

The site will be managed by the National Park Service in cooperation with the City of Waco and Baylor University. The National Park Service will conduct a management planning process, working closely with these partners, community residents, and other groups that have devoted themselves to preserving the site for many years.

"The National Park Service is proud to work in partnership with the City of Waco and Baylor University to protect, preserve, and most importantly share the remarkable Waco Mammoth National Monument with the American people and visitors from around the world," said National Park Service Director Jonathan B. Jarvis. "The Waco Mammoth National Monument will engage students, visitors, and scientists alike with the story of these extinct mammoths. As the National Park Service prepares to celebrate its centennial in 2016, this new addition to our Park Service family will help more Americans develop lifelong relationships with parks as places where they can discover amazing things."

In 1978, Waco residents Paul Barron and Eddie Bufkin were looking for arrowheads and fossils along the Bosque River when they discovered a large bone protruding from the earth. Realizing the possible significance of this discovery, Mr. Barron and Mr. Bufkin immediately took the bone to the Strecker Museum at Baylor University for identification. The bone was identified as the upper leg bone of a Columbian Mammoth. Over the next 20 years, Baylor University oversaw the excavation of the site, where they found the remains of 24 Columbian Mammoths, including both adults and juveniles, as well as a Western Camel, saber-toothed cat, dwarf antelope, American Alligator, and giant tortoise. The Columbian Mammoths are the largest mammoth species and stood 12 to 14 feet tall and weighed seven to eight tons. Many of the discovered bones, including the remains of four Columbian Mammoths as well as the skeleton of the camel, remain in place, providing visitors an opportunity to view them.

Congress directed the National Park Service to conduct a special resource study of the Waco Mammoth Site, which was completed in 2008. That study confirmed that the Waco Mammoth resources are nationally significant, worthy of permanent preservation and suitable and feasible for inclusion in the national park system. In April 2015, Director Jarvis participated in a public meeting at the Waco Mammoth Site to hear from the community about the potential inclusion of the site in the National Park System. A large crowd participated in the public meeting and voiced strong support for the proposal.

The City of Waco has operated the Waco Mammoth Site as a park since 2009, in partnership with Baylor University and with support from the nonprofit Waco Mammoth Foundation, Inc. The city donated to the United States approximately 5 acres, which includes the excavation site and the dig shelter, making it possible to establish the monument. Nearly the entire Waco Mammoth Site will be included within the boundary of the National Monument.

The site remains the nation's first and only recorded discovery of a nursery herd, including females and their offspring, of Pleistocene mammoths. Of the 24 mammoths uncovered to date, at least 18 were part of the nursery herd, and more remains likely remain in the area. As a result of a natural catastrophic event, the entire nursery herd died at the same moment in time, which left the skeletons relatively intact. The site offers a one-of-a-kind opportunity to examine the matriarchal herd structure and behavior of this extinct species. For example, the herd apparently formed a circular defensive position before death, and juvenile mammoth skeletons rest atop the long tusks of adults, suggesting that the adults were trying to save their offspring from the rising waters and sucking mud.

The Antiquities Act was first used by President Theodore Roosevelt in 1906 to designate Devils Tower National Monument in Wyoming. Since then, 16 presidents have used this authority to protect unique natural and historic features in America, such as the Grand Canyon, the Statue of Liberty, and Colorado's Canyons of the Ancients.

With this new designation, President Obama will have used the Antiquities Act to establish or expand 16 national monuments. Altogether, he has protected more than 260 million acres of public lands and waters – more than any other President – as well as preserved sites that help tell the story of significant people or extraordinary events in American history, such as Cèsar E. Chávez National Monument in California, Harriet Tubman Underground Railroad National Monument in Maryland, and Charles Young Buffalo Soldiers National Monument in Ohio.

Memorandum/ Proclamation

- In progress – internal review next week

Lands

- ESA – review final copy due tomorrow from Anthony Castilaw – we get up to 2 weeks to review – Sarae to Scott Thompson-Buchanan – Ray Todd - Colin
- Title – revised title commitment due today?
- Preliminary Title Opinion – after all materials are received – next week
- Draft deed has been sent to the City for preliminary review, but will soon need closer City review – still needs description of easement which is being surveyed – and City will survey 52' setback – maybe 10 days?
- Letter requesting waiver of deed condition (conservation easement) has been sent to DOJ
- Donor letter of intent awaiting Greg's input
- City Council Executive Session on Tuesday went well according to City attorney. We are checking with her to see the form of the authorization that will be presented for a vote on April 21. We think it authorizes the City Mgr (Dale Fisseler) to sign.

Map

- Scott Thompson-Buchanan can turn it around in a day or 2. (b) (5)

(b) (5)

Bibliography

- Greg and Michele will be in charge to update SRS bibliography

Secretary Jewell,

Please find attached a letter sent to President Obama in care of the White House Council on Environmental Quality from some of the groups in Pullman that have been working toward a national park or monument designation for a few years. We remain very dedicated to seeing Chicago's first national park established very soon.

Timeliness is critical as all the deed work is complete for the State of Illinois to transfer land to the National Park Service. After Governor Rauner takes office on January 12th, that deed process will have to start over. Please let me know if you have any questions.

Sincerely,

David Doig

President

December 9, 2014

President Barack Obama
The White House
1600 Pennsylvania Avenue NW
Washington, D.C. 20500

Dear Mr. President:

As people who live and work in the Pullman neighborhood, we write to remind you of the massive amount of support for establishing a national monument in our community. We have been working for many years toward this goal and have grown that support, numbering now in the tens of thousands. To illustrate the passion for creating a national park at Pullman, the August public meeting moderated by National Park Service Director, Jon Jarvis, attracted nearly 600 people on the same night that Jackie Robinson West – our neighbor to the west – was playing in the Little League World Series!

The national monument designation at Pullman will come to a community that is experiencing strong, steady investment, which bodes well for assisting the National Park Service in its mission.

- Chicago Neighborhood Initiatives has invested more than \$5 million to renovate dozens of historic rowhomes within the proposed monument boundary.
- Mercy Housing invested more than \$15 million to preserve the Historic Pullman Wheelworks, also within the boundary and now apartments for 200 families.
- The State of Illinois is finishing a \$4 million renovation to the Hotel Florence.
- Pullman residents have invested more than \$3.5 million in private façade and residential improvements.
- In the last few years, more than \$100 million – 80 percent of which has come from private funds – has been invested into making Pullman a strong, sustainable and accessible neighborhood.

Seizing on the energy created by this investment, and by a national monument designation, Pullman will this winter, welcome teams of Chicago urban planners, designers, architects, and economists for a visioning workshop. At the end of the three-day workshop we will have plans for improving transit, leveraging educational programs, renovating historic buildings and attracting new businesses in our new national park. And in true Pullman fashion, we will begin to build support and investment for these improvements that will benefit residents, businesses, visitors, and the National Park Service.

With the year coming to a close, we hope to celebrate Pullman being designated as Chicago's first national park within the next few weeks. We are standing by eagerly for the opportunity to work with the National Park Service in making Pullman America's next great, urban national park.

EVENT MEMORANDUM FOR THE SECRETARY

MEETING WITH CHICAGO MAYOR RAHM EMANUEL

DATE: October 6, 2014
LOCATION: Office of the Secretary
TIME: 3:30PM – 4:00PM
FROM: John Blair, Director, OIEA (202)208-6649

I. PURPOSE

Our initial understanding was that Mayor Rahm Emanuel (D) was going to be in town, and that he wanted to say hello and give you an update on the STEM schools you visited in February. In the last few days, however, we now understand that the Mayor is chiefly interested in discussing that status of the proposed Pullman National Monument. Mayor Emanuel would also like to briefly thank you for the National Park Service’s working with the Chicago Cubs’ Baseball team on the historic preservation of Wrigley Field.

Note: You have an internal staff briefing on Pullman already scheduled for Friday afternoon at 2:00 pm. Your meeting with Mayor Emanuel is closed press.

II. PARTICIPANTS

- Chicago Mayor Rahm Emanuel
- Tommy Beaudreau
- John Blair
- Melissa Green, City of Chicago Federal Affairs Director
- David Spielfogel, Senior Advisor to the Mayor

III. BACKGROUND

Pullman Historic District (from materials for your Internal Pullman Update on Friday 10/3)

The Pullman National Historic Landmark District covers approximately 300 acres of the Pullman neighborhood in southeast Chicago. Most houses are privately owned and maintained. The Illinois Historic Preservation Agency manages the Administration and Factory Complex and the Hotel Florence as a historic site, and the city of Chicago manages the Pullman Landmark District. The Historic Pullman Foundation operates a visitor center and owns several properties in the district. Other organizations work toward the interpretation and improvement of the district.

From the start of the Pullman Palace Car Company in 1867, George Pullman employed a mostly white workforce to manufacture the palace cars, but he recruited the first porters, waiters, and maids from the population of former house slaves to serve the affluent customers. These service jobs, while lower-paying, had prestige in the African-American community.

The Pullman porters played a major role in the rise of the African-American middle class and the development of the civil rights movement of the 20th century. Pullman porters remained a group of

exclusively African-American men throughout the life of the Pullman car operations. Work as a Pullman porter garnered steady wages, the opportunity to earn sizeable tips and to travel, and respect in the African-American community.

In 1894 Pullman factory workers walked off the job. In solidarity with the Pullman workers, American Railway Union (ARU) members nationwide boycotted Pullman cars, disrupting rail traffic across much of the nation. With the support of the ARU, the strike that began as a walkout at the Pullman factory grew into one of America's largest labor strikes, paralyzing most of the railroads west of Detroit. On June 27, 1894, as the Pullman strike and boycott were growing, Congress passed legislation designating Labor Day a federal holiday, and President Grover Cleveland signed it. The Pullman strike of 1894 spurred final federal action in an attempt to placate workers across the nation.

The Pullman Palace Car Company, renamed the Pullman Company in 1900, was the focus of another important labor event. In 1937, the Brotherhood of Sleeping Car Porters (BSCP), an influential African-American union founded in 1925 by A. Philip Randolph, won a labor contract for the Pullman porters from the company. The Pullman Company was the nation's largest employer of African Americans, and Pullman porters composed 44 percent of the Pullman Company workforce. The porters successfully voted to have the BSCP serve as their bargaining agent, forcing the Pullman Company to recognize the union. By 1937, the BSCP had successfully negotiated its first collective bargaining agreement with the Pullman Company, leading to higher salaries, overtime rates, better job security, and increased protection for workers' rights through grievance procedures. It was the first major labor agreement between a union led by African Americans and a corporation, a significant event contributing to the rise of the civil rights movement in the United States.

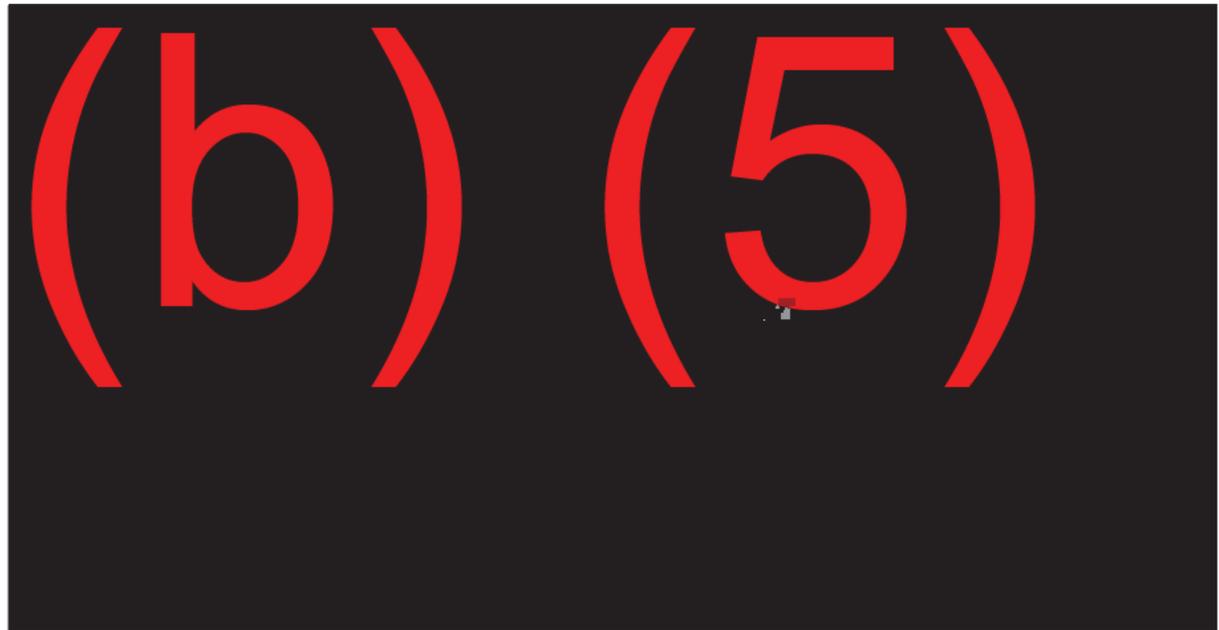

A. Philip Randolph expanded his agenda once he became the leader of the foremost black labor organization in the United States. In 1937, Randolph was chosen as the leader of the National Negro Congress (NNC), an umbrella organization that united many of the major black civil rights organizations of the day. Years later, when he was vice-president of the AFL-CIO and also working with various civil rights organizations, Randolph became one of the leaders of the 1963 March on Washington for Jobs and Freedom.

Discussion:

Next Steps:

Wrigley Field, Chicago, Illinois

The Chicago Cubs are undertaking a \$300-million renovation of Wrigley Field and have submitted a certification application to the National Park Service (NPS) for the 20% historic rehabilitation tax credit. The NPS has met several times with the Cubs as well as been in contact with the Illinois Historic Preservation Agency and the city's Commission on Chicago Landmarks concerning the project. The NPS reviewed the Part 1 application (Evaluation of Significance) in March 2013 and determined that Wrigley Field is eligible for listing in the National Register of Historic Places.

The NPS conditionally approved the Part 2 application (Description of Proposed Work) on March 2014 and has approved several amendments to the Part 2 application. A proposed Jumbotron and another large sign in the outfield bleachers were approved as part of the March approval. Currently, one amendment remains under review by the NPS that includes the proposed relocation of the bullpen and additional commercial advertising in the outfield. The NPS is awaiting the submission of additional information from the Cubs sometime this month, including some revisions to their signage plan.

Mayor Rahm Emanuel has been largely supportive of the project in the Cubs' negotiations with the City over the proposed changes to the ballpark and other city restrictions on the ballpark's operations. The ballpark is a designated city landmark, and in July the Commission on Chicago Landmarks approved the further expansion of the bleachers and a revised signage scheme with additional and larger outfield signs than previously approved by the NPS. The NPS has indicated that any additional new signage must meet the Secretary's Standards, both individually as well as relative to its cumulative impact on the historic character and appearance of the ballpark.

The tax incentives program is administered by the NPS and the IRS, in partnership with the State Historic Preservation Offices. Newspaper reports indicate that the Cubs are in discussions with the owners of the rooftop clubs opposite the ballpark, who say that the proposed new outfield signs will block views and hurt their businesses. This issue is outside the purview of the NPS—the NPS's review is limited to certifying that a building is historic, and therefore eligible for the program, and that the rehabilitation preserves the building's historic character and features and meets the Secretary of the Interior's Standards for Rehabilitation.

STEM Education/February Chicago Visit

The following background is simply to refresh your memory regarding your February 6, 2014, visit to Chicago. During that visit you met with Mayor Emanuel, discussed STEM Education and Early College STEM Schools (ECSS), and you visited the Michele Clark Academic Preparatory High School.

In February, you visited Michele Clark Academic Preparatory High School, a Chicago public school, located on Chicago's West Side in the heart of the South Austin Community. In 2002, Clark became a high school with the addition of the first 9th grade class, and now serves students in grades 6 - 12. Michele Clark Academic Preparatory High School is one of the five Chicago Public Schools with a STEM focus and corporate sponsor affiliate. Michele Clark partners directly with Cisco to prepare students for higher education and provides opportunities for potential employment with Cisco. More information on this program is below. Michelle Clark has a robotics club, which is building its own VEX robot through a partnership with Northeastern Illinois University. The program provides students with experiences in Engineering concepts, Physical and Digital robot design, computer programming skills, and preparation for qualifying VEX Competitions in Illinois. The VEX Robotics Design System is a robotic kit intended to introduce students to the world of robotics, and comes with 4 electric motors, 4 wheels, gears, and structural parts.

The school also has three completed Sea Perch robots, funded by a U.S. Navy grant. Michele Clark has its remote controlled sailboats, and one of its IT classrooms has now been upgraded with a high-tech Promethean board. The school's academic performance was strong in 2012-2013 and is doing well so far this year. The current 20-week Freshman On-Track rate is 95%, up from 89% last year.

Early College STEM Schools (ECSS) connect high school, college, and the world of work through dynamic partnerships and pioneers a new vision for college and career readiness. With a unique Early College model, students will follow CPS high school graduation requirements but will also have the opportunity to graduate high school with industry certifications, significant college credit,

and possibly an Associate's Degree. CPS, the City Colleges, and their corporate sponsors work together to ensure that students have an opportunity to pursue a career in technology and gain skills for the 21st century workforce, enabling them to realize their full potential.

Five CPS high schools partner with corporate sponsors:

- Michelle Clark – Cisco
- George Corliss – Verizon Wireless
- CVCA – Motorola Solutions
- Lake View – Microsoft
- Sarah E Goode STEM Academy – IBM

The ECSS program is a way for students to continue their education and launch a career path. Between 1973 and 2007, the United States added 63 million jobs. However, jobs held by those with no more than a high school education fell by two million and workers with a high school education or less make up just 41% of the workforce nationally. Economic forecasters believe that by 2018, nearly two out of three jobs in the United States will require at least some college education—nationally, 22 million more postsecondary education degrees need to be produced.

Here's a photo of you chasing Mayor Emanuel with a remote controlled robot during the February visit:

WGNTV.com: Emanuel plan to offer CPS students with good grades free college tuition [VIDEO]

Posted 8:37 AM, October 1, 2014, by Adrienne Balow and Julian Crews, Updated at 12:40pm, October 1, 2014

Mayor Rahm Emanuel wants to offer free college classes to any Chicago Public School student who graduates with good grades.

The Chicago Star Scholarship guarantees free tuition at any one of Chicago's seven City Colleges to CPS students who graduate with a grade point average of 3.0 or higher, and place into college level math and English. It will provide waivers from tuition, fees and books.

The mayor says it is designed to reward hard-working students, many of whom struggle to work their way through college.

This is a brand new scholarship. There is no application form or website yet. More details are expected soon from the City Colleges of Chicago.

These scholarships are targeted to CPS high school students who will be graduating in June 2015 and beginning community college a year from now.

Northwest Herald: Rahm Emanuel to Chicago agencies: Increase minimum wage to \$13 in city

Published: Tuesday, Sept. 30, 2014 11:03 a.m. CDT By AP

CHICAGO — Chicago Mayor Rahm Emanuel has asked the city's sister agencies to pay all contractor and subcontractor employees a minimum wage of \$13 an hour.

The mayor signed an executive order earlier this month requiring city contractors and subcontractors to pay employees the higher minimum wage.

And on Tuesday morning, Emanuel asked other agencies to follow suit, including Chicago Public Schools, the Chicago Transit Authority, the Chicago Housing Authority, Chicago City Colleges, the Public Building Commission and the Chicago Parks Department.

The mayor's office says about 2,400 employees would be affected if the agencies agree to do it. Employees affected would include landscapers, maintenance workers, bus drivers and custodial workers.

Emanuel and other Democrats are making a big election-year push to raise the state's minimum wage, which is \$8.25 per hour.

RCI Ventures: Chicago sets multiple tourism records for Summer 2014

Chicago is celebrating after setting multiple tourism records for the summer 2014 travel season.

Mayor Rahm Emanuel and Don Welsh, President and CEO of Choose Chicago, announced that for the first time, Chicago saw records across all key performance indicators – demand, occupancy, supply, average daily rate, revenue per available room and overall revenue.

The Windy City's record hotel performance during the peak tourism season of May – August shows that Chicago is on pace to achieve Mayor Emanuel's goal of 55 million visitors a year by 2020 and create 30,000 additional jobs.

Tourist destination

“This summer was a prime example of how, by making Chicago a destination for national and international travelers, leisure and business alike, we are making important gains that are bringing more opportunities to more Chicagoans,” said Mayor Emanuel.

“Our strategy is working and we will continue to aim higher to set new records next year, because bringing more conventions and tourism to Chicago means more jobs for residents and further supports our City's economic growth.”

This year, during the summer season, Chicago had a record high 4.56 million hotel rooms available for occupancy, an increase of more than 117,000 room nights from 2013. For the fifth consecutive year, demand outpaced growth in supply, resulting in higher occupancy rates. Chicago's hotels saw a record 87.2 percent occupancy during this period, a gain of 1.8 percent over 2013.

“Mayor Emanuel and our partners continue to support the mission and goals of Choose Chicago,” said Welsh. “The investments we have made in the regional, national and international markets are working. Visitors from around world are discovering the tremendous experiences Chicago offers year-round. We are extremely pleased with these results and the impact on Chicago's overall economy.”

In July, Mayor Emanuel and Choose Chicago announced Chicago had surpassed one million occupied rooms for the first time. In August, Chicago again surpassed one million occupied rooms and overall room demand for the summer season reached another record with 3.98 million rooms sold, a 4.4 percent increase over same period in 2013. In another key area, leisure room demand, Chicago saw a record 2.48 million rooms sold, a gain of 6.3 percent over 2013 and the largest May – August increase since 2009.

Hotel development

Chicago is among the fastest growing domestic markets for new hotel development. Supply grew at a rate of 2.6 percent, the fastest pace since the recession, and average daily rates for hotel rooms reached a record \$215.92, a gain of 2.5 percent. This marks the fifth consecutive year that Chicago had record summer pricing gains. In addition, Revenue per Available Room reached a record \$188.30, a 4.3 percent increase over last year.

All of this contributed to overall hotel revenue of \$858.5 million for the summer, a seven percent increase and the fifth consecutive year of growth, and generated a record \$47.9 million in city tax revenue for the City of Chicago. This year-over-year growth continues to spur new employment in Chicago. Since 2011, the City has added nearly 5,200 tourism-related jobs.

These milestones follow an exceptional first half of 2014, which produced record demand in Chicago with a 2.2 percent increase over the first six months of 2013. Chicago's hotel community offered an additional 313,000 room nights compared to the same period in 2013. This growth represents 4.67 million hotel rooms occupied in the first-half of 2014, which further supports the 133,000 jobs and more than \$13 billion in spending generated as a result of annual visitation to Chicago.

HuffPo Chicago: Rahm Emanuel Urges Illinois Lawmakers to Decriminalize Marijuana

Chicago Mayor Rahm Emanuel on Tuesday urged Illinois lawmakers to decriminalize the possession of less than 15 grams of marijuana. He also pushed for a statewide penalty reduction from felony to misdemeanor for those caught with 1 gram or less of a controlled substance.

"It doesn't make sense that one arrest for a very small amount of a controlled substance can lead to a lifetime of struggles, sending people in and out of prison and putting up barriers to get a job or finding a place to live. We need action from Springfield," Emanuel said in a statement, per the Chicago Tribune.

The mayor testified Tuesday at a legislative hearing before the House-Senate Joint Criminal Reform Committee, which is looking for ways to ease overcrowding in the state's prisons and jails and to reduce racial disparities in sentencing which disproportionately affect blacks and Latinos.

To push for softer pot penalties is also part of a strategy to get lawmakers to strengthen penalties for gun crimes, Chicago news outlet WGN reports. Emanuel has faced consistent criticism for the rate of gun violence in Chicago since he became mayor in 2011.

Emanuel has previously argued that easing up on drug arrests frees up police to tackle gun crimes and other, more pressing issues.

In 2012, Emanuel successfully lobbied the Chicago City Council to pass an ordinance decriminalizing small amounts of marijuana within the city limits.

Two years on, however, the ordinance giving Chicago police the discretion to issue \$250 to \$500 tickets for possession of 15 grams or less of pot is considered a failure. Arrests for marijuana possession actually increased, despite police having an option to ticket offenders, and the city collected just \$67,256 of the \$310,755 in fines levied in the first year of the program, the Chicago Sun-Times reports.

Illinois currently has a pilot program in place for legal medical marijuana use.

Al Jazeera America: Could Chicago's Rahm Emanuel lose his re-election race?

Voters are unhappy with the mayor — but his fundraising prowess is a big deterrent for would-be challengers

September 29, 2014 5:00AM ET
by Mark Guarino

CHICAGO — Rahm Emanuel has everything a winning mayoral candidate would seem to need: name recognition, a campaign war chest nearing \$10 million and famous friends in Hollywood and the White House who are more than willing to slide into town at a moment's notice.

Yet polling has consistently shown that the former Obama administration chief of staff has one significant deficit in his campaign for re-election next February: The majority of voters in his city do not like him.

Over the last 12 months, Emanuel's approval ratings have been on a downward spiral. A Chicago Tribune poll released in August, for example, shows that 35 percent of likely voters approve of the job he has been doing, down from 50 percent about a year ago. The results are similar regardless of voters' race, income, age or gender. A Chicago Sun-Times poll from May shows similar dissatisfaction: Only 18 percent of those surveyed said Emanuel was doing a better job than previous mayor Richard M. Daley.

The polling results reflect a growing tension over leadership in Chicago. To many, Emanuel represents a problem. In 2012, the first full year of his term, the city's homicide count surpassed 500. And, many say, his decision to shut nearly 50 public schools — the largest mass school closing in U.S. history — and to strike development deals downtown instead of in lower-income neighborhoods has deepened the city's economic divide.

Critics say Emanuel, who once earned more than \$18 million over a two-year period as a Wall Street investment banker, professes concern for struggling households, but has done little on their behalf. They say his many unpopular measures — a rollout of traffic cameras, privatizing public transit and expanding charter schools amid mass teacher and custodian layoffs — contradict the mayor's narrative that he is fighting for all of Chicago.

“The Emanuel tenure has been a huge wake-up call for a lot of people,” says Tim Meegan, a high school social-studies teacher who is running for city-council alderman in the city's 33rd Ward, an ethnically diverse area on the city's northwest side. “He's not a working-class guy from the streets of Chicago, and he's refused to compromise except to the 1 percent. He's so insulated that he doesn't really understand the city he has been charged with governing.”

Emanuel has publicly brushed off the polls, saying they are likely tied to the sagging economy and that voters are feeling squeezed by shrinking opportunities in the job market. His campaign spokesperson Steve Mayberry wrote in an email that the mayor has created 26,000 new jobs and is fighting to raise the minimum wage.

“There's a lot more work to do — especially in the neighborhoods suffering most from joblessness and violence,” he wrote. “But by making the tough decisions that were avoided for too long, Mayor Emanuel is providing the strong leadership to make Chicago work for everyone.”

And, despite the polls, Emanuel remains, so far, in a comfortable position. He is not yet feeling the heat from any high-profile challenger who will outspend him. Despite Chicago's gaping budget holes, the most underfunded pension system in the U.S. and lagging unemployment — issues a GOP candidate in another city might pounce on — the Republican party here is virtually nonexistent. That means any opposition must originate from Emanuel's own party. But in a patronage town where loyalties are tribal, that can be risky.

And Emanuel, who established his political career as a prodigious fundraiser, is trying to ensure that critics from within his own party are dissuaded from even thinking of entering the race. Chicago Forward, a super-PAC representing Emanuel backers, has already raised more than \$1 million to advocate for the mayor's policies. Emanuel also persuaded a group of loyal alderman to form their own organization to advocate for his policies.

The divide-and-conquer approach has so far paid off: Cook County Board President Toni Preckwinkle, enormously popular in Chicago and a clear winner over Emanuel in the polls, announced this summer that she would not run. Her decision came two months after the Tribune revealed that an Emanuel spokesperson was trying to pitch negative stories about her to reporters.

"You can't beat somebody with nobody and they have to have name recognition and they have to raise resources. At the moment, if Rahm ran today, Rahm would win despite what the polls show," says Dick Simpson, a political scientist at the University of Illinois at Chicago.

Yet polling shows that, despite his efforts to mute the opposition from within his own party, Emanuel may still be vulnerable to Democrats who are voicing populist outrage over his alleged scandals and missteps. Chicago Alderman Bob Fioretti, one of the few dissenting voices in the city council, has announced his candidacy; Chicago Teachers Union President Karen Lewis, who became the public face of the outcry over the school closings, is also expected to run.

Simpson says Emanuel is not invincible in the coming election and that the escalating nickel and diming from his office have gouged people at a time when they are hurting most. They see the mayor's pet projects — a giveaway of premium parkland to filmmaker George Lucas to house a personal art collection and the use of public tax money to build a South Loop basketball stadium for DePaul University — as producing little to no impact beyond the downtown area.

Take the red-light cameras. Emanuel insisted they were intended for public safety. But according to a 10-month Tribune investigation, it appeared the cameras were rigged to issue thousands of unjustified \$100 tickets, confirming public suspicions that their primary purpose was to generate income. A separate investigation showed that Redflex Traffic Systems, a city contractor, was involved in a \$2 million bribery scheme to win the contract. Two company officials, plus a city official, received federal indictments in August; they say they are not guilty.

The scandal underscores the perception that Emanuel is out of touch. It didn't help when, in the spring, media reports showed that he had regularly blown through speeding cameras, racking up 20 citations for various violations since 2012, but had them dismissed.

These misfires have galvanized the opposition and played directly into the "two Chicagos" narrative it embraces. Fioretti, a Chicago native and Democrat who recently declared his candidacy, says he will audit the city's books and issue a moratorium on charter schools.

Michael Kolenc, Fioretti's senior campaign strategist, says that Emanuel is not vulnerable on a single issue, but many. "Time and time again, he's not listened to Chicagoans and what they want. Instead, he's gone off on his own. So the streets are less safe, our schools need to be stronger, and we need to bring economic development to all parts of the city, not just one," he says.

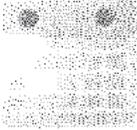

Mayberry, Emanuel's spokesperson, blasts Fioretti for "a notorious history of pandering and inconsistency on some of the city's most pressing issues" and says his "lack of political backbone has been on display since the day he assumed office."

Emanuel's most formidable opponent may be Lewis, who became a vocal critic of the mayor following a teachers' strike early in his first term. Lewis is currently gathering petitions to get her name on the ballot. The Tribune poll shows her beating Emanuel in a head-to-head challenge 43-39 percent. A Chicago Sun-Times poll shows her beating Emanuel 45-36 percent.

If either Fioretti or Lewis wins, they will inherit a rapidly worsening pension crisis that predates Emanuel. Observers say that means they too will be faced with the ugly choice of raising taxes or deferring the problem, like the current mayor and his predecessor, Daley, have done. The 2015 election year budget has a \$297.3 million deficit; it would be nearly triple that amount, but the city decided to defer the \$550 million jump in pension contributions for police and firemen until a later date.

Ralph Marteri, executive director of the Center for Tax and Budget Accountability, in Chicago, says that even though Emanuel "is faced with fiscal constraints that are not of his making," he, and any potential successor, is responsible for enacting reform measures to ensure the city will not reach bankruptcy.

"We can't let any elected official off the hook, because that's what they all want," he says. "It's their job. Leading means telling taxpayers what they need to hear [more] than what they want to hear, then do that. Instead, you get pandering, and that never solves problems."

INFORMATION MEMORANDUM FOR THE SECRETARY

INTERNAL PULLMAN UPDATE

DATE: October 3, 2014
LOCATION: Office of the Secretary
TIME: 2:00PM – 2:30PM
FROM: Christy Goldfuss, Deputy Director, NPS (202) 208-3818

PURPOSE

The purpose of this meeting is to update you on the Pullman Historic District, including next steps in the process.

BACKGROUND

The Pullman National Historic Landmark District covers approximately 300 acres of the Pullman neighborhood in southeast Chicago. Most houses are privately owned and maintained. The Illinois Historic Preservation Agency manages the Administration and Factory Complex and the Hotel Florence as a historic site, and the city of Chicago manages the Pullman Landmark District. The Historic Pullman Foundation operates a visitor center and owns several properties in the district. Other organizations work toward the interpretation and improvement of the district.

From the start of the Pullman Palace Car Company in 1867, George Pullman employed a mostly white workforce to manufacture the palace cars, but he recruited the first porters, waiters, and maids from the population of former house slaves to serve the affluent customers. These service jobs, while lower-paying, had prestige in the African-American community.

The Pullman porters played a major role in the rise of the African-American middle class and the development of the civil rights movement of the 20th century. Pullman porters remained a group of exclusively African-American men throughout the life of the Pullman car operations. Work as a Pullman porter garnered steady wages, the opportunity to earn sizeable tips and to travel, and respect in the African-American community.

In 1894 Pullman factory workers walked off the job. In solidarity with the Pullman workers, American Railway Union (ARU) members nationwide boycotted Pullman cars, disrupting rail traffic across much of the nation. With the support of the ARU, the strike that began as a walkout at the Pullman factory grew into one of America's largest labor strikes, paralyzing most of the railroads west of Detroit. On June 27, 1894, as the Pullman strike and boycott were growing, Congress passed legislation designating Labor Day a federal holiday, and President Grover Cleveland signed it. The Pullman strike of 1894 spurred final federal action in an attempt to placate workers across the nation.

The Pullman Palace Car Company, renamed the Pullman Company in 1900, was the focus of another important labor event. In 1937, the Brotherhood of Sleeping Car Porters (BSCP), an influential African-American union founded in 1925 by A. Philip Randolph, won a labor contract for the Pullman porters from the company. The Pullman Company was the nation's largest

employer of African Americans, and Pullman porters composed 44 percent of the Pullman Company workforce. The porters successfully voted to have the BSCP serve as their bargaining agent, forcing the Pullman Company to recognize the union. By 1937, the BSCP had successfully negotiated its first collective bargaining agreement with the Pullman Company, leading to higher salaries, overtime rates, better job security, and increased protection for workers' rights through grievance procedures. It was the first major labor agreement between a union led by African Americans and a corporation, a significant event contributing to the rise of the civil rights movement in the United States.

A. Philip Randolph expanded his agenda once he became the leader of the foremost black labor organization in the United States. In 1937, Randolph was chosen as the leader of the National Negro Congress (NNC), an umbrella organization that united many of the major black civil rights organizations of the day. Years later, when he was vice-president of the AFL-CIO and also working with various civil rights organizations, Randolph became one of the leaders of the 1963 March on Washington for Jobs and Freedom.

Cc: Enric Sala <esala@ngs.org>, Sally Yozell - NOAA Federal <sally.yozell@noaa.gov>

Hi Tommy - I hope you are well. I heard from Sally Yozell that you had taken over for Laura Davis. I hope you are enjoying the new role - Congrats! I have also made a job change -- I am now at the National Geographic Society working on ocean policy here. It is lots of fun and a way to keep working on many of the same issues as I did when I was at NOAA.

I just left a message at your office. I wanted to see if I could talk with you briefly about an idea that we at NGS are hoping that DOI would be supportive of -- it is for a "monumental" deliverable associated with the Our Oceans Conference that Secretary Kerry is planning. It has to do with expanding the current boundaries of the Remote Pacific Islands Marine National Monument from its current 50 miles to 200 miles. There are many good reasons to do this. I am attaching both a short description of the proposal and a document providing the rationale for monument status of the expanded area. We also have a more detailed scientific report justifying expansion if you would like me to send it to you.

Bottom line -- these islands are uninhabited and more than 1000 miles from Hawaii. The unique and pristine ocean areas are partially protected now. But much much more could be protected under the Antiquities Act. And in doing so, the President could create the largest protected area on the face of the earth -- creating an unparalleled area of ocean wilderness -- a stroke for conservation that would never be matched again. President Obama, as you know, has often used the Antiquities Act to create monuments on land, but never used it for ocean conservation. This would be a fantastic first!

I would be happy to come in and discuss with you and/or Mike Connor. Just let me know what might be best. The conference is soon so I will be available whenever you could make time for me. Thanks so much! Best,
Monica

Expansion of the U.S. Pacific Remote Islands Marine National Monument

The largest ocean legacy on Earth

May 20, 2014

Report to the United States government prepared by:

Dr. Enric Sala - National Geographic Society, Washington, DC
Dr. Lance Morgan - Marine Conservation Institute, Sonoma, CA
Dr. Elliott Norse - Marine Conservation Institute, Redmond, WA
Dr. Alan Friedlander, University of Hawaii, Honolulu, HI

Expansion of the U.S. Pacific Remote Islands Marine National Monument

EXECUTIVE SUMMARY

Presidential Leadership and Legacy

President Obama has the authority and opportunity to leave the largest ocean conservation legacy in history by extending the existing U.S. Pacific Remote Islands Marine National Monument from the current 50 nautical miles around the seven U.S. Pacific Remote Islands out to the full extent of its 200-nautical mile Exclusive Economic Zone (EEZ) – an increase of 1.8 million square km of new protected area (increase 10 times the current 225,000 square km Monument).

That action would create the largest protected area on Earth (an expanded Monument over 2 million square km) – and include some of the world's most pristine deep sea and open ocean ecosystems, with unique and global biodiversity value¹. These pristine national treasures would receive full protection, meaning no extractive activities such as mining, drilling, and fishing would be allowed.

The new National Monument alone would protect 18 percent of the United States EEZ, and it would double the area of the ocean that is currently fully protected globally². This would make the United States the undisputable world leader in ocean conservation, and set a record in conservation that is unlikely to be matched again in the U.S. or anywhere else in the world.

By doing this, the President sends very clear and strong messages:

- a) Even as climate change threatens human life and property at home and abroad, The U.S. will show global leadership and do what is needed to protect our Earth.
- b) The United States will protect its ocean natural resource treasures for the benefit of our own citizens and for the benefit of all other nations because these waters are part of the oceans that connect all of us and give life to the planet.
- c) Of all the nations in the world, the U.S. is unmatched in its laws, public support, and technological capacity to conserve our oceans effectively.

¹ The largest monument on land in the United States is approximately 43,000 square kilometers. The largest marine no-take reserve is currently the United Kingdom's Chagos Islands that were protected in 2010, which measures 545,000 square kilometers.

² <http://www.mpatlas.org>

Global ecological importance

The waters surrounding the Pacific Remote Islands Marine National Monument are of global ecological importance. If fully protected as Marine National Monuments with no extractive uses, the seven islands' EEZs would be havens for all kinds of marine wildlife, and a precautionary bulwark against the degradation and decline of marine ecosystems in the Pacific, which continues to unfold at an alarming rate. In addition, the areas would provide badly needed baselines for other Pacific nations that are increasingly working to restore their own degraded coral island and pelagic ecosystems – and to preserve the last wild places left. This guards against the “shifting baseline” syndrome, whereby our expectations of what is natural diminish over time because we cannot remember what healthy ecosystems are supposed to look like. Finally, the islands would be ideal places to monitor the ocean impacts of global climate change, such as coral bleaching and ocean acidification.

The waters and seafloor surrounding the Pacific Remote Islands Marine National Monument harbor some of the best-preserved ocean habitats in the Pacific, and are home to many species of key ecological and commercial importance:

- Large predatory fishes, such as tuna, swordfish, marlin, and oceanic sharks are still found in these waters, even though their populations have been significantly depleted in the past 50 years; an estimated 90% of all large predatory fish worldwide have been wiped out, although the exact status of commercially exploited populations in the Pacific varies. Protection would increase the area where these commercially important species can grow and produce more eggs per capita without being exposed to the “wall of hooks” – and hence help replenish their populations.
- Five species of protected sea turtles also use these waters as migratory and feeding grounds, including the critically endangered leatherback turtle – which is near extinction because of human activities.
- The proposed area is habitat for 22 species of protected marine mammals, including a new species recently described by scientists, the Palmyra beaked whale. Seven of these marine mammals are considered endangered.
- Several million seabirds of 19 species congregate around or nest at the US Pacific Remote Islands. These seabirds forage in the waters surrounding the current Monument, out to 200 nautical miles and farther, feeding themselves and their chicks.

- The deep sea on the area proposed as an expansion, virtually unexplored, is dotted with an estimated 241 undersea mountains and other unexplored geological features that are hotspots of ocean biodiversity. These undersea mountains (seamounts) each typically harbors thousands of species new to science, and large numbers of endemic species found nowhere else on the planet, just as archipelagos like the Galapagos and Hawaiian Islands do.
- Protecting ocean ecosystems from multiple human impacts will help them to be more resilient from climate change providing refuges for endangered species to adapt to changes already underway.

Legal feasibility

President Obama would earn high praise domestically and abroad by using his authority under the Antiquities Act of 1906 to extend protection for relatively pristine waters surrounding 7 US Central Pacific islands that President Bush started to protect in 2009. This action by President Obama, who has so far declared eleven Monuments on land but none in the sea, would be a natural and culminating step in his conservation legacy and demonstrate the United States' leadership on protecting these critical ocean resources necessary for the health and well-being of humankind.

- This is a unique opportunity for very large ocean conservation impact in United States' waters because of the sheer size and remote location of the waters that would be protected. The larger the area being protected the more beneficial it is for science and for conservation. These waters are the least fished in the United States' EEZ, hence this is the least contentious of any potential large Marine National Monument. Any proposal to create even much smaller marine reserves around our mainland or other islands would be received with strong opposition from the fishing lobby (both commercial and recreational). This new, expanded Monument provides would firmly establish President Obama as the leading figure in ocean conservation in U.S. history.
- The President has clear authority under the Antiquities Act to establish National Monuments to protect lands, submerged lands and marine waters that are controlled by the U.S. Since first used by Theodore Roosevelt, all but two succeeding presidents have used the Act to establish one or more National Monuments. The President who

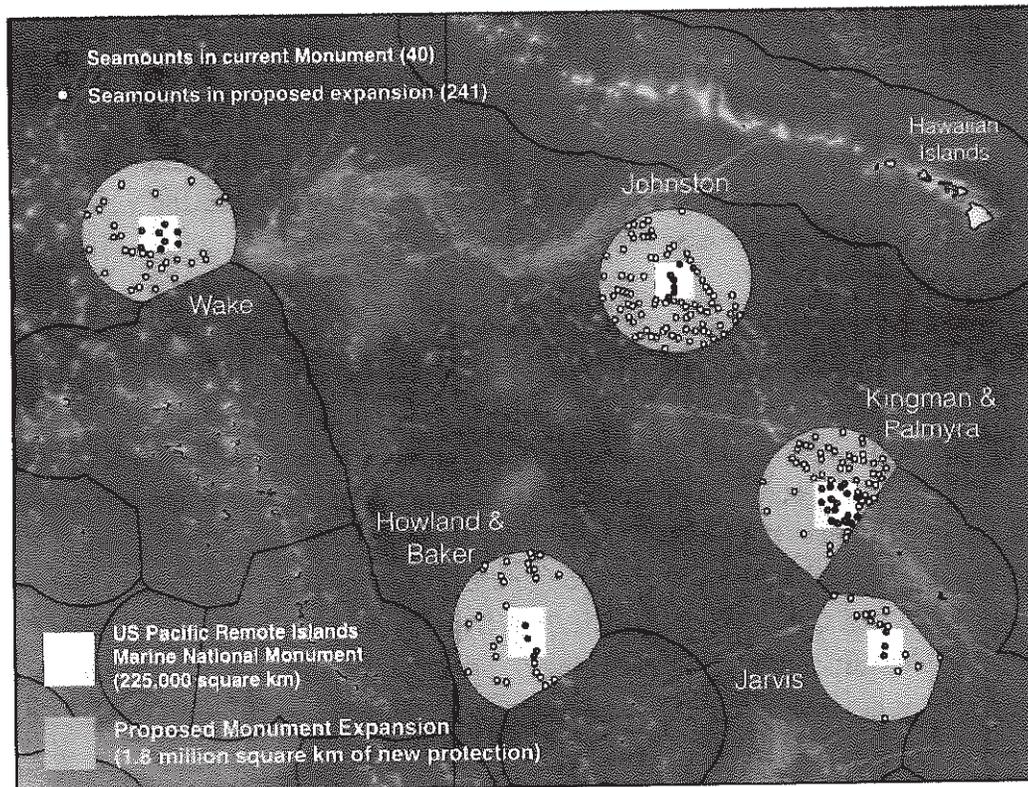

established the largest ocean area as Marine National Monuments to date is George W. Bush, who created four Monuments in the Pacific covering a total of 860,000 square km.

- Protection is not controversial because the islands are highly remote, under full U.S. control, uninhabited³, and principally used for conservation; yet without formal protections extending to the exclusive economic zone, ecosystem degradation in the near future from fishing or other development is likely. The 50 nautical mile buffers around 5 island or atoll/reef complexes are already managed for conservation and the extension of these boundaries will greatly expand these safe zones for marine life.
- There is no conflict with commercial fishing. Tuna fishing occurs episodically in the proposed area. The status of yellowfin and bigeye tuna is a cause for concern; both species are likely being overfished and are now fully exploited. The Honolulu-based longline fleet sets only 4% of their hooks in this area, and the annual catch by the purse seine fleet is only 5% of their tuna catch in the Pacific – and this effort occurs only at the edge of the U.S. EEZ. Both of these fleets obtain 95% of their catch from regions outside of the waters being considered for protection. Moreover, tuna move throughout the Pacific in yearly migrations, therefore the U.S. quota can still be caught outside the boundaries of the proposed Monument. However, tuna are crucial ecologically because they push small fish to the surface, which are then caught by seabirds, which in turn will feed their chicks on the islands of the current Monument.
- The new Monument will further emphasize the President’s legacy in pivoting the U.S. policy focus towards the greater Pacific region. It will greatly enhance the conservation value of the recent announcement by Kiribati that it will close the entire Phoenix Island Protected Area (408,250 square km that adjoin the U.S. territories of Howland and Baker islands) to commercial fishing. There is a growing movement among Pacific states, large and small, to protect and recover their ocean ecosystems and manage their fisheries more sustainably. In addition to the protections by Kiribati, other nations like Australia, New Caledonia, Palau, the Cook Islands and New Zealand have been developing national systems of marine reserves for a number of years. Protecting our own unique islands and their surrounding waters would make the U.S. *the* world leader in ocean conservation.

³ The only inhabitants are civilian and military employees of the U.S. government at Wake and Palmyra, who provide the capacity to manage the expanded monument.

Conclusion

There is widespread recognition that the oceans need more protection, especially no-take reserves, to protect and restore marine life. Currently less than 1% of the ocean is fully protected from fishing. The natural resource values of the oceanic region surrounding the Pacific Remote Islands MNM are superb, the need for their conservation is clear, and the timing is right for bold leadership by President Obama. The President is the only decision maker with the ability and authority to act swiftly and decisively to protect these national treasures, using the Antiquities Act. Should the President protect these places, he would make conservation history by establishing the world's largest protected area. President Theodore Roosevelt laid the seeds for the National Park system through his proclamation of 18 National Monuments; President Bush helped increase the legacy of our ocean heritage; and now President Obama can leave an incomparable ocean legacy by protecting our unique and vibrant Pacific ocean ecosystems and establishing the largest ocean conservation legacy in history.

President Obama can use the Antiquities Act to extend the boundaries of Pacific Remote Islands Marine National Monument around U.S. territories in the Central Pacific. That would send a strong message to Americans, our friends and others around the world, saying this is how Americans treat our lands and waters in an age of climate change and emerging ocean acidification.

Expansion of the U.S. Pacific Remote Islands Marine National Monument

Scientific and Economic Report

1. Introduction

The seven islands and atolls that are the core of the Pacific Remote Islands Marine National Monument (Kingman, Palmyra, Jarvis, Howland, Baker, Wake, and Johnston – hereafter ‘the islands’ or ‘assessment areas’) and their surrounding waters are of global conservation interest. The islands and atolls harbor some of the most pristine coral reefs and deep reefs in the world. The surrounding waters contain dynamic and diverse open ocean (pelagic) habitats that are permanent or temporary home to many vulnerable and threatened species of ecological importance.

However, the Pacific Remote Islands Marine National Monument protects only 50 nautical miles (nm) around the islands. Most of the Exclusive Economic Zone (EEZ) of the U.S. around these islands (from 50 to 200 nm) is currently open to exploitation.

President Obama has a unique and rare opportunity to create the largest protected area on Earth by expanding the current Pacific Remote Islands Marine National Monument from 50 to 200 nm. Here we describe why President Obama must establish the largest ocean conservation legacy in human history.

If fully protected as Marine National Monuments with no extractive uses, the eight islands’ EEZs would be havens for all kinds of marine wildlife, and a precautionary bulwark against the degradation and decline of marine ecosystems in the Pacific, which continues to unfold at an alarming rate. In addition, the areas would provide badly needed baselines for other Pacific nations that are increasingly working to restore their own degraded coral island and pelagic ecosystems – and to preserve the last wild places left. This guards against the “shifting baseline” syndrome, whereby our expectations of what is natural diminish over time because we cannot remember what healthy ecosystems are supposed to look like. Finally, the islands would be ideal places to monitor the ocean impacts of global climate change, such as coral bleaching and ocean acidification.

This report makes the case for expansion of the Pacific Remote Islands Marine National Monument, including the scientific justification and the benefits of protection for the United States and for other Pacific nations. The report focuses on the value of the waters and deep-sea habitats in the proposed area for Monument expansion (between 50 and 200 nm), which is currently unprotected.

2. Conservation Value

The waters and seafloor surrounding the Pacific Remote Islands Marine National Monument harbor some of the best-preserved ocean habitats in the Pacific, and are home to many species of key ecological and commercial importance. An estimated 14 million seabirds representing 19 species use the islands as critical stopover points, as well as breeding areas and feeding grounds. Large tunas are still providing an important ecological function to foraging seabirds at these remote islets and atolls. Tunas drive prey, such as squid, towards surface waters where they are easily caught by seabirds. In short, seabirds rely on the tunas to help them feed their chicks, which in turn are eaten in near shore waters by reef sharks. Therefore, protecting the waters around the current Monument from fishing is critically important to maintaining the health of the coral reefs within the Monument. Twenty-two species of marine mammals inhabit and feed in these waters, including a recently discovered species of beaked whale. In addition, there are an estimated 241 undersea mountains that probably are deep-sea biodiversity hotspots.

This section of the report analyzes the scientific information available for these waters and seafloor, and their conservation value.

2.1. Open Ocean Waters

2.1.1. Large Predatory Fishes

Large predatory fishes, such as sharks, tunas and billfishes, are a key component of open ocean (pelagic) ecosystems. They are highly migratory, ranging widely throughout the tropical central and western Pacific. The tuna populations of this region are distinct from the eastern tropical Pacific tuna populations and other areas in the Pacific. Four species of tuna are common to this region: skipjack (*Katsuwonus pelamis*), yellowfin (*Thunnus albacares*), bigeye (*Thunnus obesus*), and albacore (*Thunnus alalunga*). There is growing concern over the regional status of bigeye and yellowfin, which are likely overfished or close to be overfished. Within the EEZ of the seven islands, bigeye and yellowfin are targets of the longline fishery in and around Johnston, Palmyra

and Kingman Reef, while the other species are more commonly targeted by the purse seine fleet near the equator in the waters of Howland, Baker and Jarvis (see “Fishing” section below). Other pelagic fishes that are kept by the longline fleet are blue marlin, black marlin, striped marlin, swordfish, sailfish, short-billed spearfish, mahi mahi, wahoo and bluefin tuna.

In 2003, a widely reported scientific study estimated the decline of large predatory fishes such as tunas at nearly 90% (1). Among the populations of pelagic fishes that are greatly reduced are many species of oceanic sharks (2) – the top predators in marine ecosystems (Figure 1). In 2006, another analysis further reported a 74% global decline in pelagic fishes from the pre-exploitation, pristine state (3). Globally it is clear that large, pelagic fishes are being unsustainably fished, and that without drastic improvements in management they will not recover.

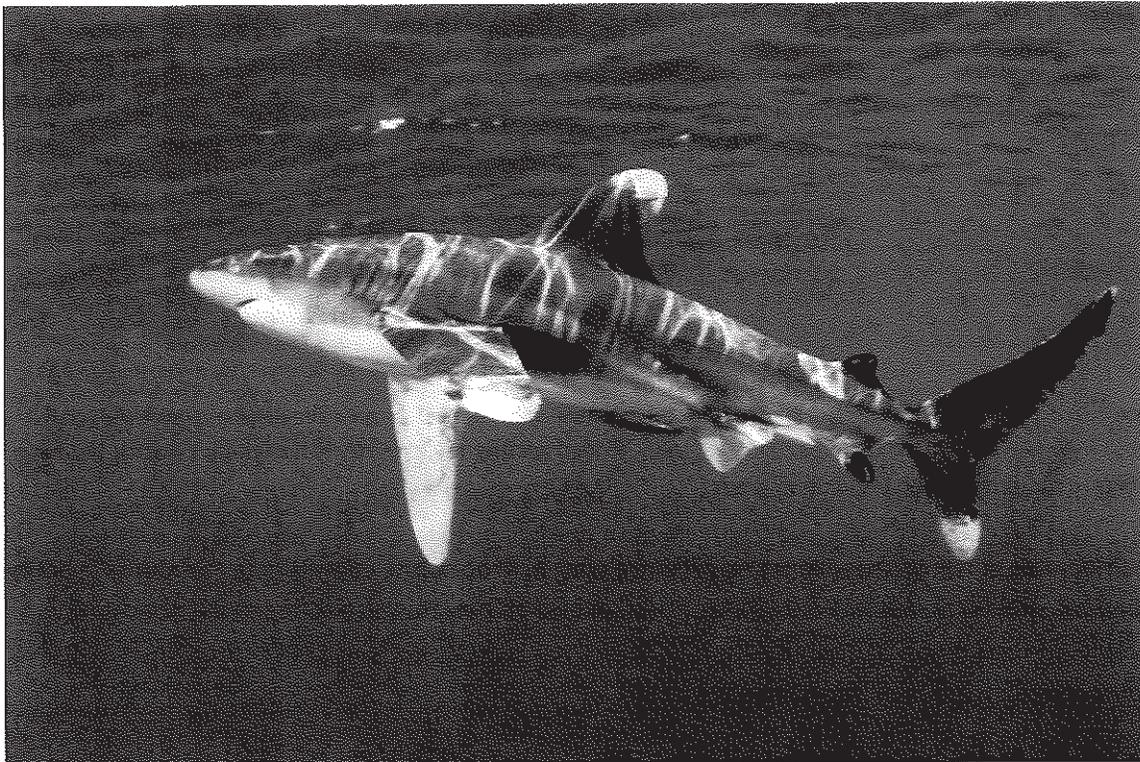

Figure 1. Oceanic whitetip sharks are among many kinds of large predators that are disappearing from ecosystems worldwide. Extending no-take protection to the edge of Pacific Remote Islands Marine National Monument Exclusive Economic Zones (to the 200 nautical mile limit) would make history by creating the world’s biggest safe refuge for pelagic sharks.

The loss of these top predators has significant impacts on the structure of ecosystems (4). As explained in greater detail in this document, tunas are important to the success of foraging seabirds in the tropics as they drive small fish and squid to the surface where they are accessible to diving seabirds (Figure 2). The observed declines of tuna stocks because of overfishing must be having deleterious effects on island seabird populations.

Figure 2. Tuna are ecological keystone species in US Central Pacific waters because they chase small fishes and squids to the surface, where seabirds can catch them to feed to their chicks (5, 6). 97% of the US' Pacific yellowfin and bigeye tuna catch happens in other areas (7).

The import of pelagic fishes from the offshore waters around the islands (see “Seabirds” section below) by adult seabirds not only helps raise seabird chicks, but also to feed reef sharks. For example, in the lagoon of Palmyra Atoll, 30% of the blacktip reef sharks (*Carcharhinus melanopterus*) were found to eat seabirds (8).

Tuna in the region are managed under international agreement by the Western Central Pacific Fisheries Commission. The four species of tuna and a number of other pelagic species provide a relatively small proportion of commercial fishing catch in the waters surrounding these islands (9). No international vessels are permitted to fish in the EEZ of the islands, and the US purse seine and longline tuna fleets take less than 5% of their annual tuna catch here (7). The areas surrounding the more southerly US territories- Jarvis, Howland, and Baker – are of almost no significance to the US tuna longline fleet (7).

Given the significant role of schooling fish to the health of seabirds in this region, and the small overall catch, protecting tuna and other fishes in these waters is the best way of ensuring the health of the surrounding pelagic ecosystems. Furthermore, restrictions on fishing in these areas are likely to help sustain these populations of fishes for the long term.

2.1.2. Sea Turtles

Sea turtles have inhabited the Earth for a very long time, as evidenced by 150 million year old fossils. In the last few centuries, humans have caused massive reductions in sea turtle numbers through direct capture of adults and collection of eggs, and indirectly through bycatch in commercial fisheries (10, 11). Although irresponsible fishing methods and practices are the main cause of turtle declines today, they are also harmed by entanglement in marine debris, destruction of feeding and nesting areas, and ingestion of garbage and plastic objects carelessly thrown into the sea. All of these stressors are significantly impacting dwindling sea turtle populations.

Sea turtles are listed as threatened or endangered with extinction by several international bodies (12) and are protected domestically under the Endangered Species Act (ESA)⁴. The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) controls the international trade in endangered and threatened species and currently lists all species of sea turtles found in US waters in CITES Appendix 1, as the most endangered animals and plants⁵. Similarly, the International Union for the Conservation of Nature (IUCN) categorizes all sea turtle species as endangered and lists the leatherback sea turtle, which has been documented in all the US Pacific territorial waters, as *critically endangered* (12).

Five species of sea turtle have been documented as present in the seven islands and surrounding waters: green (*Chelonia mydas*), hawksbill (*Eretmochelys imbricata*), leatherback (*Dermochelys coriacea*), loggerhead (*Caretta caretta*), and olive ridley (*Lepidochelys olivacea*) (13). Green and hawksbill turtles forage and nest in the US Pacific islands, and loggerheads, leatherbacks and olive ridleys forage and/or migrate through US Pacific waters (14). There are reports of green sea turtles nesting on Baker, Howland, Jarvis and Palmyra (15, 16). Green sea turtles also swim and forage in the waters surrounding each of these islands, as well as those of Kingman, Wake and Johnston. Hawksbill sea turtles are found in the waters surrounding Baker, Howland, Jarvis, Palmyra, and Kingman (17-19).

⁴ <http://www.nmfs.noaa.gov/pr/species/esa/turtles.htm>

⁵ <http://www.cites.org/eng/app/index.shtml>

The waters in this region are important migration paths for all sea turtle species. These waters are important to the migration of the critically endangered leatherback sea turtle. Benson and colleagues mapped satellite tag tracking data for 126 individual leatherbacks across the Pacific (Figure 3). These maps show leatherbacks are actively transiting and/or foraging in the EEZs of the monuments twelve months a year (Figure 4) (20). Considering the extremely low population of leatherback sea turtles globally (90% or greater in decline in the Pacific) (21), and the minuscule percentage that are successfully tagged, the fact these turtles have been tracked navigating US waters demonstrates that these EEZs are an important migration route between Indonesia and California⁶ and deserve strict protection.

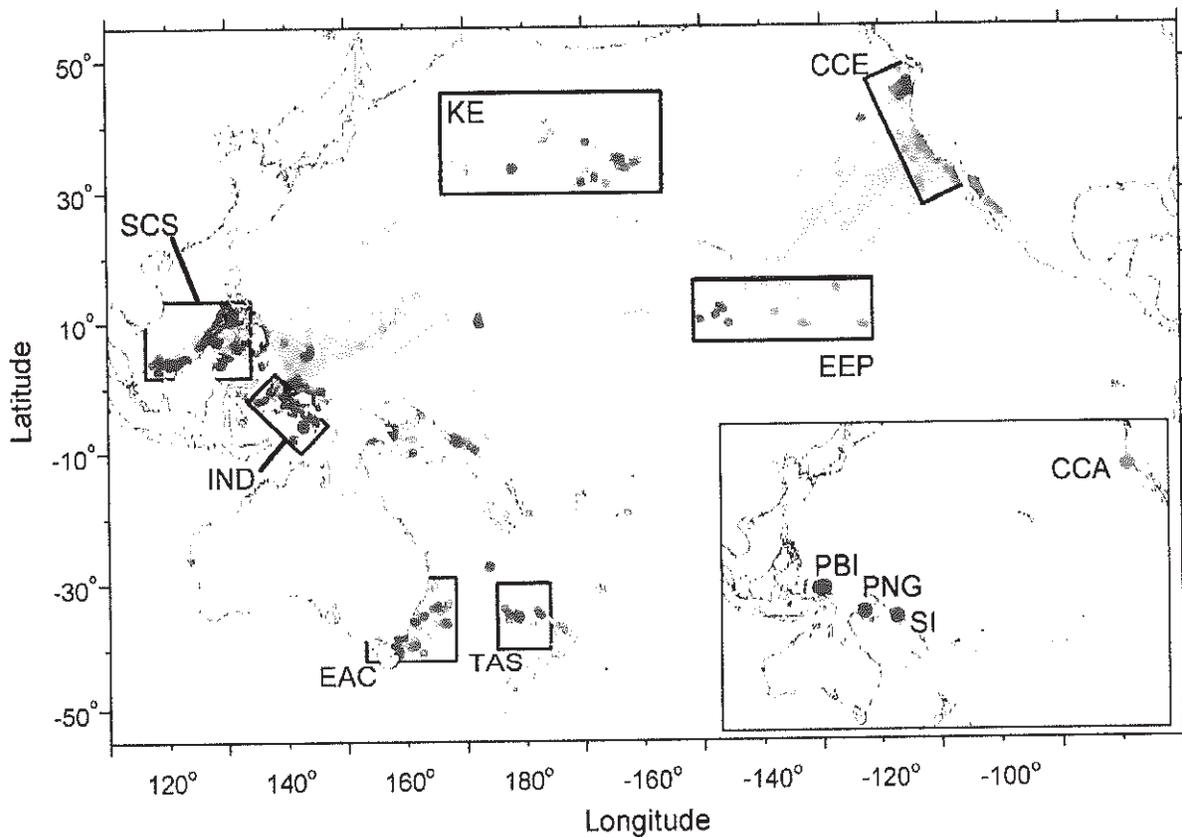

Figure 3. All 126 leatherback deployments presented as probability of transit. Large, darker circles indicate Area Restricted Search (ARS) behavior; small, lighter dots indicate transiting behavior. Color of track indicates deployment season: red ¼ summer nesters, blue ¼ winter nesters, green ¼ deployments at central California foraging grounds. Inset shows deployment locations; PBI ¼ Papua Barat, Indonesia, PNG ¼ Papua New Guinea, SI ¼ Solomon Islands, CCA ¼ central California. Black boxes represent ecoregions for which habitat associations were quantitatively examined (see text): SCS ¼ South China, Sulu and Sulawesi Seas, IND ¼ Indonesian Seas, EAC ¼ East Australia Current Extension, TAS ¼ Tasman Front, KE ¼ Kuroshio Extension, EEP ¼ equatorial eastern Pacific, and CCE ¼ California Current Ecosystem.

⁶ Donnelly, M. 2008, October 2. Director of International Policy. Interviewer: Jennifer Felt.

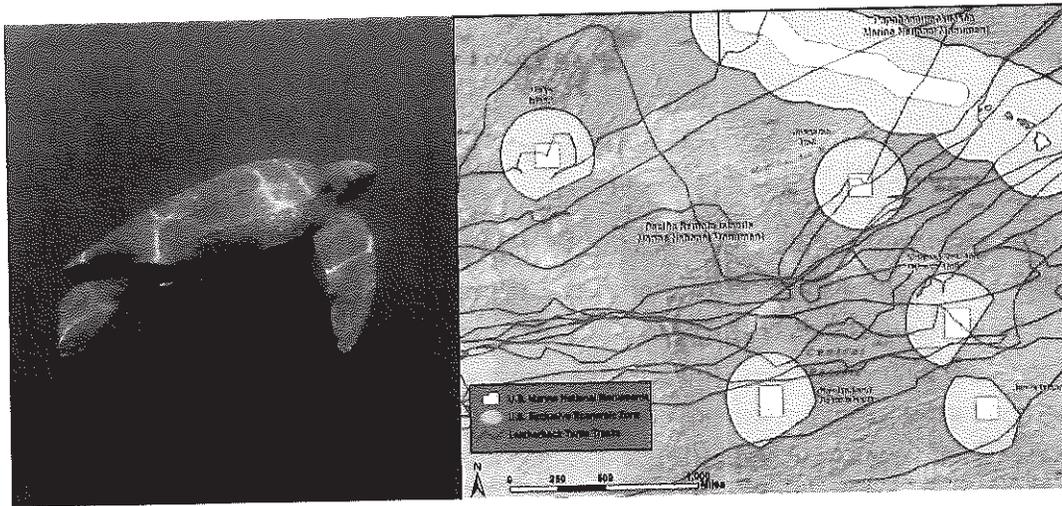

Figure 4. Seeking high concentrations of the jellyfish they eat, critically endangered Pacific leatherback sea turtles—the largest turtles in the world—migrate through the EEZ surround the USA’s Pacific Remote Islands, where President Obama could protect them from the “wall of hooks” and nets of the tuna fleet.

All five species of sea turtles found in U.S. island waters have been documented as bycatch fatalities in U.S. fisheries. Longliners fishing for tuna and other large pelagic fish accidentally catch and kill large numbers of sea turtles throughout Pacific waters. A report by Lewison and colleagues (22) estimated the effects of longline fisheries on turtle species in the entire Pacific:

“... despite infrequent rates of encounter, the analyses show that more than 200,000 loggerheads and 50,000 leatherbacks were likely taken as pelagic longline bycatch in 2000. The analyses suggest that thousands of these turtles die each year from longline gear in the Pacific Ocean alone. Given 80–95% declines for Pacific loggerhead and leatherback populations over the last 20 years, this bycatch level is not sustainable.”

Turtle bycatch numbers are compiled separately by National Marine Fisheries Service (NMFS) observers for the tuna and swordfish fisheries. According to NMFS, tuna purse seine vessels have 100% observer coverage, and the tuna longline fleet has approximately 20% observer coverage. We requested turtle bycatch data for the seven areas from the Pacific Islands Regional Office of NMFS, but did not receive it. One thing in favor of the turtles is that tuna longline sets are “deep sets” that are less prone to hook turtles than shallow sets for swordfish.

As discussed earlier, the economic importance of commercial tuna fishing in the EEZs of the seven assessment areas is relatively small. Altogether, only 5% of the annual tuna catch by US

boats comes from these areas (7). A fully protected Monument across the entire EEZ of the islands would provide much needed sanctuary for migrating, foraging and nesting turtles and their hatchlings.

2.1.3. Seabirds

Seabirds are an important component of ocean and coastal ecosystems and play an especially important role in the central Pacific. Unfortunately, the population of just about every seabird in the greater region is declining (23). The major threats to seabirds and factors contributing to their decline are bycatch in fisheries, human settlements, nonnative predators such as rats and cats, habitat destruction, indirect fishery interactions, pollution, and global climate change and sea level rise (23, 24). Protecting and effectively managing the few remaining refuges for seabirds in the tropical Pacific, particularly uninhabited islands and their surrounding foraging grounds that they rely on for food, are essential for the continued health and survival of these species.

Over 3 million seabirds of 19 species use the lands and marine waters of the seven islands for breeding, foraging, or resting; and up to 14 million seabirds may use the waters around the islands for foraging (B. Flint, personal communication). These birds are primarily pelagic feeders that obtain the fish and squid they consume and feed to their young by associating with schools of large predatory fish such as tuna and billfish (5, 24). Large schools of predatory fish force schools of small pelagic fish to the surface where they become easy picking for seabirds; otherwise the fish would be too deep or scattered for the seabirds to reach (6) (Figure 5).

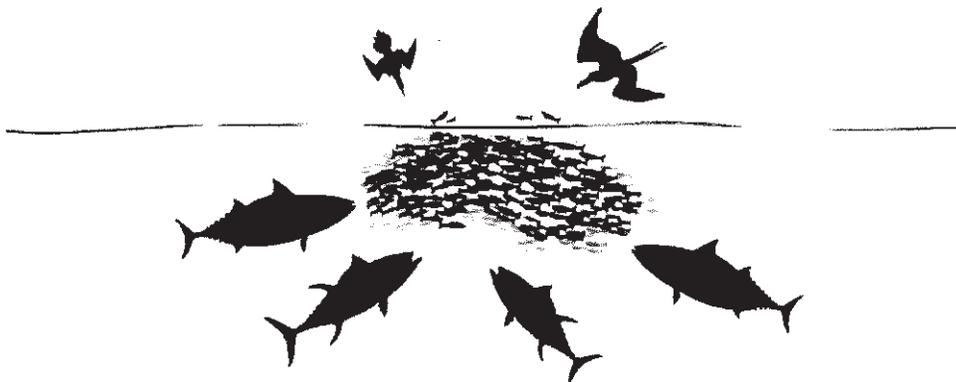

Figure 5. Schematic of subsurface-predator facilitated foraging (6).

It is especially important to have abundant schools of small prey and large predatory fish near breeding colonies because it is much harder for newly hatched and inexperienced birds to find food and successfully feed far from shore and return home safely (5, 24). Because tropical oceans have very low productivity, predators such as tuna and seabirds are adapted to unpredictable and patchy prey distributions. What food can be found exists mostly in ocean fronts and currents that concentrate nutrients. These zones of high nutrients encourage the growth of plankton and attract small pelagic fish, which in turn attracts tunas and seabirds. Commonly, there are eddies that form patches of high nutrients and food availability downstream of remote islands, aided in part by the nutrients brought back to the island and surrounding waters by the seabirds themselves. These areas of high nutrients attract small pelagic fish and in turn attract tunas and seabirds. The presence of natural densities of these tunas within the foraging radius of seabird colonies enhances the ability of birds to provide adequate food for themselves and their chicks (6, 24).

Although some food is available close to shore, breeding seabirds typically have to travel great distances to find enough food to feed themselves and their young (6). The red-tailed tropicbird has the longest recorded foraging distance around the islands, with a radius of 468 km (252 nm) (Figure 6) (6). Other longer-ranged species also feed beyond the 200 nm boundary of the islands' EEZ (Figure 7).

Figure 6. Red-tail tropicbirds nest on U.S. Central Pacific Islands but forage out to 252 nautical miles (468 kilometers) out at sea to feed their chicks. Protecting the EEZ out to 200 nautical miles (370 km) from these islands will protect the crucial feeding grounds of these and many other seabirds.

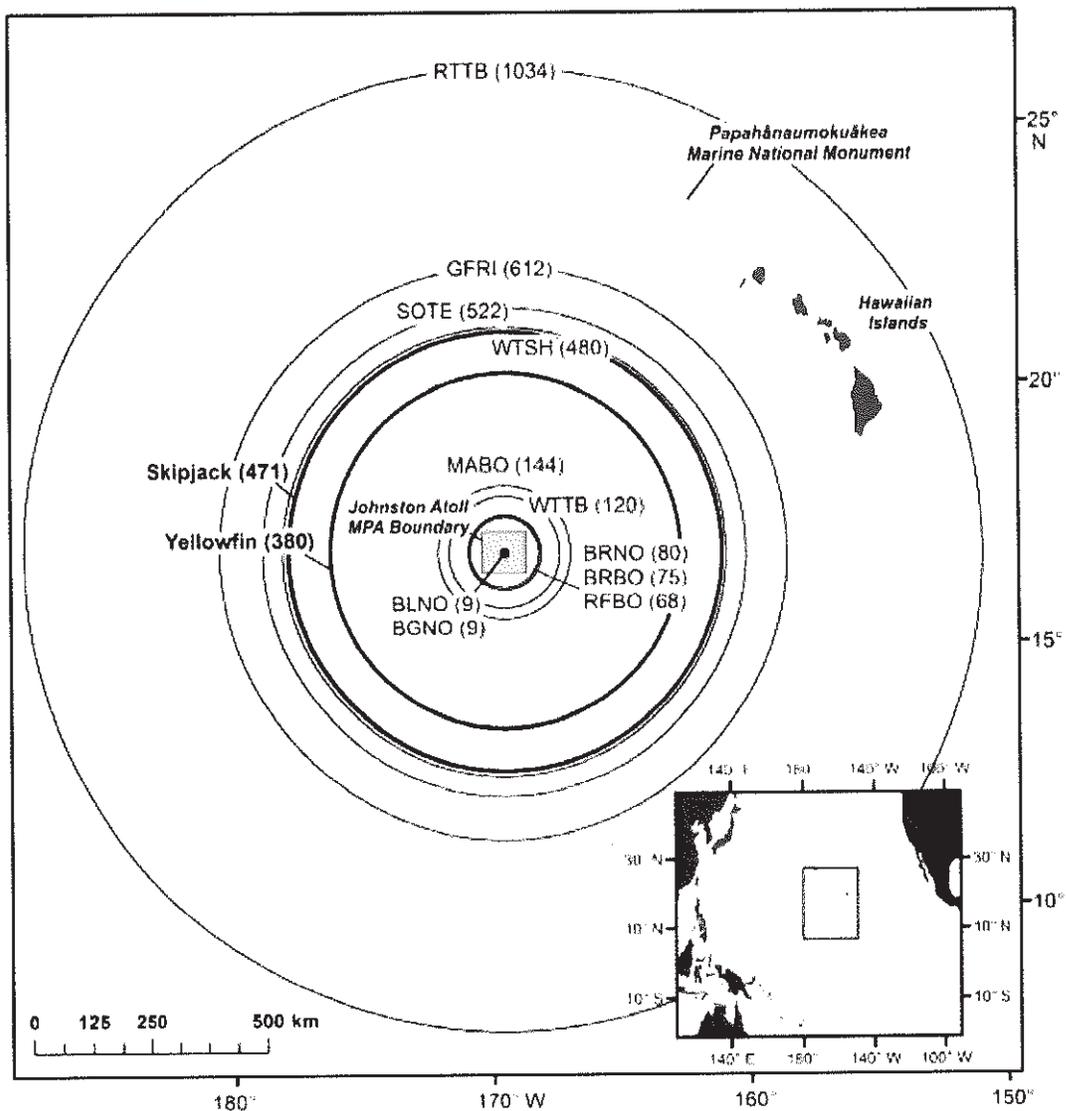

Figure 7. Foraging ranges of breeding tropical seabirds (thin lines) and tuna (thick lines), centered around Johnston Atoll, part of the US Pacific Remote Islands Marine National Monument. Maximum foraging ranges and median lifetime displacement are shown in () following species names. Centering tuna movements around an island is hypothetical and done to show maximum potential overlap between tunas and seabirds (RTTB: red-tailed tropic bird; GFRI: great frigatebird; SOTE: sooty tern; WTSH: wedgetailed shearwater; MABO: masked booby; WTTB: white-tailed tropicbird; BRNO: brown noddy; BRBO: brown booby; RFBO: red-footed booby; BLNO: black noddy; BGNO: blue-grey noddy) [figure source: (6)]

Unfortunately, the patchy nature of food resources in the tropical Pacific and the association between tuna and seabirds exposes the birds to higher likelihood of contact with fishing vessels. Of the fisheries occurring in the US EEZ in the tropical Pacific, the most harmful to the seabirds is longlining for tuna. Longlining is a fishing method in which many baited hooks are attached to a fishing line that is typically miles long. As a reference, the Hawaii-based longline fleet deployed an astonishing 45.4 million hooks in 2012 (7). Seabirds get caught on the baited

hooks and drown. Globally endangered black-footed albatross (Table 1) in particular interact with longline fisheries. Data from the National Marine Fisheries Service (NMFS) observer program shows that a minimum of 450 black-footed albatrosses and Laysan albatrosses were killed in 2005-2007 in the longline fishery (25). This is an ongoing management concern.

Table 1. Seabirds found in the EEZ of the U.S. Pacific Remote Islands⁷ (26).

Seabirds	Breeding	ESA Status	IUCN Status
Audubon's Shearwater (<i>Puffinus iherminieri</i>)	Breeding		Least Concern
Band-rumped Storm-petrel (<i>Oceanodroma castro</i>)		Critical	Least Concern
Black Noddy (<i>Anous minutus</i>)	Breeding		Least Concern
Black-footed Albatross (<i>Diomedea nigripes</i>)	Breeding		Endangered
Black-naped Tern (<i>Sterna lunata</i>)			Least Concern
Black-winged Petrel (<i>Pterodroma nigripennis</i>)			Least Concern
Blue Noddy (<i>Procelsterna cerulea</i>)	Breeding		Least Concern
Bonin Petrel (<i>Pterodroma hypoleuca</i>)			Least Concern
Bridled Tern (<i>Sterna anaethetus</i>)			Least Concern
Brown Booby (<i>Sula leucogaster</i>)	Breeding		Least Concern
Brown Noddy (<i>Anous stolidus</i>)	Breeding		Least Concern
Bulwer's Petrel (<i>Bulweria bulwerii</i>)	Breeding		Least Concern
Christmas Shearwater (<i>Puffinus nativitatis</i>)	Breeding		Least Concern
Fairy Tern (<i>Sterna nereis</i>)	Breeding		Vulnerable
Flesh-footed Shearwater (<i>Puffinus carneipes</i>)			Least Concern
Gould's Petrel (<i>Pterodroma leucoptera</i>)			Vulnerable
Great Crested Tern (<i>Sterna bergii</i>)			Least Concern
Great Frigatebird (<i>Fregata minor</i>)	Breeding		Least Concern
Grey-backed Tern (<i>Sterna sumatrana</i>)	Breeding		Least Concern
Hawaiian Petrel (<i>Pterodroma sandwichensis</i>)		Endangered	Vulnerable
Herald Petrel (<i>Pterodroma heraldica</i>)			Least Concern
Kermadec Petrel (<i>Pterodroma neglecta</i>)			Least Concern
Laysan Albatross (<i>Diomedea immutabilis</i>)	Breeding		Vulnerable
Lesser Frigatebird (<i>Fregata ariel</i>)	Breeding		Least Concern
Little Shearwater (<i>Puffinus assimilis</i>)			Least Concern
Masked Booby (<i>Sula dactylatra</i>)	Breeding		Least Concern
Murphy's Petrel (<i>Pterodroma ultima</i>)			Near
Newell's Shearwater (<i>Puffinus newelli</i>)		Threatened	Threatened
Phoenix Petrel (<i>Pterodroma alba</i>)	Former Breeder		Endangered
Polynesian Storm-petrel (<i>Nesofregatta fuliginosa</i>)			Vulnerable

⁷ Personal communication with Beth Flint at the US Fish and Wildlife Service; <http://www.fws.gov/endangered/>
<http://www.iucnredlist.org/>

2.1.4. Marine Mammals

The waters surrounding the islands are home to at least 22 species of marine mammals, many of which are rare or endangered (Table 2).

Table 2: The status of species under the Endangered Species Act (ESA) and the International Union for the Conservation of Nature (IUCN) for marine mammals in the Central Pacific.⁸

Marine Mammals	ESA Status	IUCN Status
Blainville's beaked whale (<i>Mesoplodon blainvillei</i>)		Data Deficient
Blue whale (<i>Balaenoptera musculus</i>)	Endangered	Endangered
Bottlenose dolphin (<i>Tursiops truncatus</i>)		Data Deficient
Bryde's whale (<i>Balaenoptera edeni</i>)		Data Deficient
Cuvier's beaked whale (<i>Ziphius cavirostris</i>)		Least Concern
Dwarf sperm whale (<i>Kogia simus</i>)		Data Deficient
False killer whale (<i>Pseudorca crassidens</i>)		Lower Risk
Fin whale (<i>Balaenoptera physalus</i>)	Endangered	Endangered
Hawaiian monk seal (<i>Monachus schauinslandi</i>)	Endangered	Critically Endangered
Humpback whale (<i>Megaptera novaeangliae</i>)	Endangered	Vulnerable
Killer whale (<i>Orcinus orca</i>)		Data Deficient
Melon-headed whale (<i>Peponocephala electra</i>)		Least Concern
North Pacific right whale (<i>Eubalaena japonica</i>)	Endangered	Endangered
Palmyra beaked whale (<i>Mesoplodon hotaula</i>)		unknown
Pan-tropical spotted dolphin (<i>Stenella attenuata</i>)		Least Concern
Risso's dolphin (<i>Grampus griseus</i>)		Data Deficient
Rough toothed dolphin (<i>Steno bredanensis</i>)		Least Concern
Sei Whale (<i>Balaenoptera borealis</i>)	Endangered	Endangered
Shortfinned pilot whale (<i>Globicephala macrorhynchus</i>)		Lower Risk
Sperm whale (<i>Physeter macrocephalus</i>)	Endangered	Vulnerable
Spinner dolphin (<i>Stenella longirostris</i>)		Data Deficient
Striped dolphin (<i>Stenella coeruleoalba</i>)		Least Concern

⁸ Data from: <http://www.nmfs.noaa.gov/pr/species/esa/>; <http://www.iucnredlist.org/>; http://www.wpcouncil.org/protected/species_mammals.html; Fish and Wildlife Service Fact Sheets. 2008. Summary of interagency assessment process as of October 1st, 2008.

The life histories and conservation status of many of these species are not well known due to the difficulty and cost of research. However, it is safe to assume that many of these species rely on the waters surrounding the US islands to some degree for food, mating, calving, migration or play; many of the details await discovery.

The waters around Johnston Island are teeming with spinner dolphins and frequented by endangered whales such as blue whales, sperm whales, sei whales, Northern Pacific right whales, Cuvier's beaked whale, and even humpback whales, some of which are believed to give birth in the warm waters near shore (27). Johnston Island, Wake Island, and Palmyra Atoll are occasionally visited by the rare and endangered Hawaiian monk seal (28), and may hold potential as monk seal re-colonization areas. There are only about 1200 Hawaiian monk seals remaining (27), and starting experimental populations in other locations is a potential recovery strategy being considered. Kingman and Palmyra are known to have large numbers of dolphins swimming in their waters, as well as large resident pods of rare melon-headed whales. Recently a new species of marine mammal, a type of beaked whale, was described from Palmyra (29). Even Wake Island, once a fierce battleground, has its own resident population of spinner dolphins⁹.

All marine mammals in US waters are protected from "take" by the Marine Mammal Protection Act, and all of the whales are similarly protected by the International Whaling Commission, with limited exceptions for research. In addition, blue, fin, humpback, right, sei, and sperm whales, as well as the Hawaiian monk seal are endangered species protected by the Endangered Species Act (ESA). Despite all this protection, these animals still are not safe. Every year, whales, dolphins and seals get caught and killed by fishing gear. Most of the deaths occur when marine mammals get snagged on a longline, trapped in a purse seine net, or entangled in derelict fishing gear (25).

Current data are not available, but in the period from 2005-2007, about half of the marine mammal species living in these areas have been caught on longline gear used for swordfish and tuna; the most frequent deaths involve false killer whales that are part of a small and distinct Hawaiian population. The sustainable take level for this whale is one death a year, suggesting major concern for this species¹⁰. Table 3 shows *estimated* deaths of marine mammals in the Hawaii-based longline fishery (both for swordfish and tuna) for 2005 and 2006, and *actual* deaths in 2007 (because the estimates were not complete).

⁹ Fish and Wildlife Service Fact Sheets. 2008. Summary of interagency assessment process as of October 1st, 2008.

¹⁰ Tosatto, Mike. Pacific Islands Regional Office, NMFS, NOAA. Personal Communication with Lance Morgan.

Table 3: Estimated numbers of fishery interactions with long-line fishing gear for the Hawaiian longline fishery (swordfish and tuna fleets) from 2005-2007 (25)

Species	2005	2006	2007*
Striped dolphin (<i>Stenella coeruleoalba</i>)	0	6	0
Bottlenose dolphin (<i>Tursiops truncatus</i>)	0	2	3
Risso's dolphin (<i>Grampus griseus</i>)	4	7	4
Unidentified dolphin (Delphinidae)	0	9	1
Blainvilles beaked whale (<i>Mesoplodon blainvillei</i>)	6	0	0
False killer whale (<i>Pseudorca crassidens</i>)	6	17	4
Shortfinned pilot whale (<i>Globicephala macrorhynchus</i>)	6	6	1
Bryde's whale (<i>Balaenoptera edeni</i>)	1	0	0
Humpback whale (<i>Megaptera novaeangliae</i>)	0	1	0
Unidentified whale (Cetacea)	1	14	1
Total	24	62	14

*2007 is observed interactions, not estimated ones, which would be higher.

Entanglement is another problem. Lost fishing gear can get entwined around a marine mammal making it hard to impossible for the whale, dolphin, or seal to feed or come to the surface to breathe. Marine debris from other sources, such as trash dumped overboard at sea, can also damage or even kill marine mammals and their prey if they consume or get entangled in it (see marine debris discussion below under threats).

Other factors affecting marine mammals living in the central and western Pacific are whaling, noise pollution, and vessel strikes. Whaling is not allowed in US waters, but occurred in the region for over a century, decimating populations in the process¹¹. All vessels traveling through water make some noise, some more than others. Many marine mammals, particularly whales and dolphins, are acoustically oriented animals that rely on audible feedback to locate prey and navigate. It is unknown how much damage noise pollution causes to marine mammals, but it has been known to confuse, disorient, and in extreme cases cause the death of marine mammals. No known vessel strikes of whales have been documented in the region; thus strikes are thought to be uncommon, but certainly possible¹².

¹² National Marine Fisheries Service. 2006. Biological opinion and incidental take statement under section 7 of the Endangered Species Act on the effects of the U.S. purse seine fishery in the western and central Pacific Ocean.

2.2. Deep Seamounts

A seamount is a mountain rising from the seabed, but which does not reach the sea surface of the ocean. Seamounts are widespread throughout the world's oceans, and can arise along the mid-ocean ridges or as isolated features on the seafloor. Most often they occur in chains or clusters. Nearly all seamounts are volcanoes. Some are still erupting actively, such as Loihi seamount, southeast of Hawaii which will become a new Hawaiian island many thousands of years from now. Others, such as the Emperor Seamounts northwest of the Hawaiian Islands, stopped erupting tens of millions of years ago.

In addition to the shallow water coral ecosystems, there are likely hundreds of undescribed undersea mountains found in the EEZs of the islands. The Pacific Remote Islands Marine National Monument includes 40 seamounts; the proposed expansion would include 241 more seamounts (Figure 8, Table 4). Only a very small number (~300) of the estimated 14,000-100,000 seamounts worldwide have been visited and sampled by scientists. Consequently, most of the deep-water species and ecosystems of these seamounts remain undiscovered.

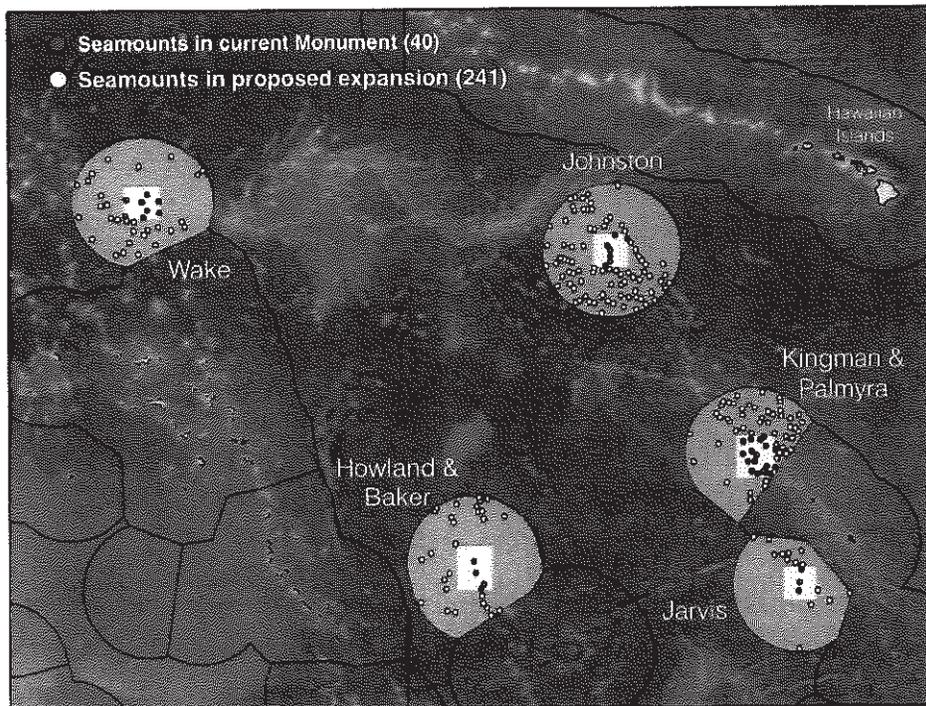

Figure 8. Seamounts (observed and estimated) at the EEZs of the U.S. Pacific Remote Islands ¹³.

¹³ Kitchingman, A. and S. Lai. 2004. Global seamount location database, Sea Around Us Project, University of British Columbia.

Table 4. Number of seamounts in the U.S. Pacific Remote Islands Marine National Monument and in the unprotected areas of their EEZ.

Assessment Island Area	Seamounts in current Monument	Seamounts in proposed expansion
Wake	8	37
Johnston	7	89
Howland and Baker	4	31
Kingman and Palmyra	18	67
Jarvis	3	17
TOTAL	40	241

Less than 0.2% of seamounts globally having been explored, and 15-44% of the species on a seamount or seamount group are found nowhere else on earth, which makes seamounts extraordinary biodiversity hotspots (30). Roughly 5-10% of invertebrates found on each survey of a seamount are new to science (31). Some seamounts are “lost worlds” having enormous pools of undiscovered species. Therefore all estimates of biodiversity loss and extinction are conservative because our scientific study of the deep sea is still meager (Table 5).

Table 5. Level of study of deep sea ecosystems

Habitat	Amount studied
Pelagic deepwater	<0.0001%
Abyssal plains	<1%
Continental slope (bathyal)	minimal
Ridges	10%
Seamounts	0.5%
Hydrothermal vents	10%
Canyons	Minimal
Cold seeps	2%

Given the numbers of seamounts and high levels of endemism, seamounts may well harbor the largest number of undiscovered large marine species left on Earth. Unique and undiscovered seamount species hold tremendous potential as medicines and for biomedical research. Many deep-sea species contain compounds that are currently in clinical trials to treat diseases such as cancer and AIDS. There is strong scientific evidence that deep sea biodiversity holds major promise for the treatment of ills that plague mankind.

Most of the world's ocean basins are flat, muddy abyssal plains, but seamounts are solid rocky mountains that tower above the plains. Seamounts protrude into the water column and have dramatic effects on the water currents around them. These currents both remove fine sediments from seamounts and bring them an unending supply of nutrients. Therefore, seamounts often attract a remarkable diversity of fishes and other open ocean animals. Because food availability above and on seamounts is often higher than in surrounding waters and seafloors, seamounts are biological hotspots that attract a diverse fauna. Pelagic predators such as sharks, tunas, billfishes, sea turtles, seabirds and marine mammals often congregate above seamounts. However, the seamounts in the EEZ of the islands do not harbor tuna fisheries (Figure 9) (32).

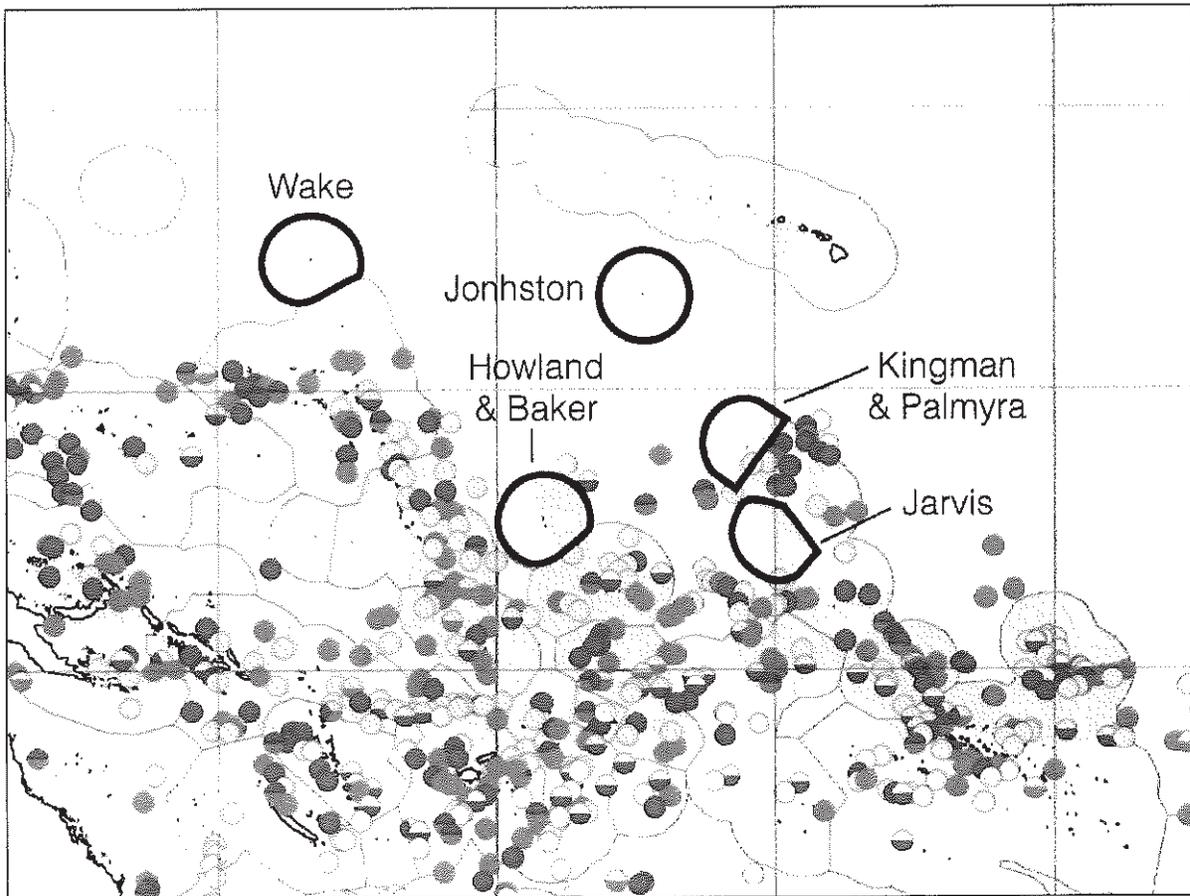

Figure 9. Location of seamounts with significant higher catch rates of tuna [adapted from (32)]. Relative catches of yellowfin tuna (yellow), bigeye (red), and albacore (blue) are depicted on each circle, corresponding to a specific seamount. The EEZs of the Pacific Remote Islands are highlighted in dark blue.

Deep-sea fish species such as orange roughy and eels gather on seamounts to spawn. Animals that live on the rocky crests and slopes of seamounts can also be very diverse and abundant. These include many suspension-feeding animals, such as deep-sea corals and sponges. Corals are especially important in seamount ecosystems because they can form extensive, complex but fragile three-dimensional structures that provide habitat for many other kinds of animals. On some seamounts, scientists have found many new species. Figure 10 shows species found in deep-water (up to 1360 m depth) EEZ areas of Jarvis, Kingman and Palmyra.

3. Threats to the Region

The central Pacific region is at risk from a variety of human activities. Human use of the Pacific Ocean has intensified significantly in the last 40 years. Threats in the pelagic realm include the overfishing of target populations of large predatory fish, disturbance of seabird foraging grounds, the killing of non-target species (marine mammals, sea turtles, and seabirds) in fisheries, and marine debris. The lack of good research on these pelagic threats does not detract from their reality; our ignorance about them is one good reason to take the precautionary approach of fully protecting these relatively intact ecosystems while we can.

3.1. Fishing

Commercial fishing is a threat to the ecosystems of the seven islands because by definition it removes large numbers of fish, which in turn has ecosystem impacts. Industrial fishing, especially for tuna, has been occurring in the islands' waters for many years. Regrettably, its cumulative effects have not been assessed, although we know that population growth and economic globalization is placing an enormous strain on fisheries everywhere. The U.S. Hawaii-based longline fleet alone set a record 45.4 million hooks in Pacific waters in 2012 (7).

Overexploitation is a constant danger, whether by legal or illegal fishing. The macro impacts of fishing on large fish species has been addressed by Myers and Worm, who found that the world's oceans have lost more than 90% of their large predatory fish (1). Jackson indicates that more important than the percentage of decline is the shift in species abundance and composition (33). Industrial scale commercial fishing is a phenomenon of the last 60 years; it is now the principal extractive use of the islands' EEZ waters, and a use that could potentially grow as more boats chase fewer tuna.

Early commercial catch levels are not known. The enactment of a federal fisheries law in 1976 inaugurated a new era of catch reporting by US vessels; reporting has gradually improved, but is not yet comprehensive for all species. Although reef fish, bottom fish and shellfish have been taken sporadically in the past near some islands, there is little near shore fishing going on now. After establishment of the Pacific Remote Islands Marine National Monument in 2009, commercial fishing was closed within its boundaries.

Commercial fishing for tuna by longline and purse seine boats continues in the outer waters of the EEZs, and other species also are taken and kept, such as swordfish and mahi mahi (7, 9). Of the four species targeted by the tuna fleet, the bigeye population is the one most likely to be overexploited at this point in time. Yellowfin tuna is considered to be fully exploited, while

skipjack and albacore are nearing full exploitation levels. There is also anecdotal information and satellite observation of illegal fishing (e.g., shark-finning) in the region by non-US flagged vessels.

Tuna fishing effort varies from across the region. The longline fleet concentrates around Hawaii and Kingman, Palmyra and Johnston (Figure 11). Most of the purse seine catch is taken around Howland, Baker and Jarvis. The portion of the total US tuna catch obtained from the islands' collective EEZs prior to the monument designation in 2009 amounted to about 3% of the purse seine fleet catch, and 7% of the longline fleet's take. In 2012, the log book data for the long-line fleet showed about 5% of catch from the region under consideration (Figure 12), and almost no purse seine or other tuna catch in the area (7). The complete closure of these waters to commercial fishing should not result in significant impacts.

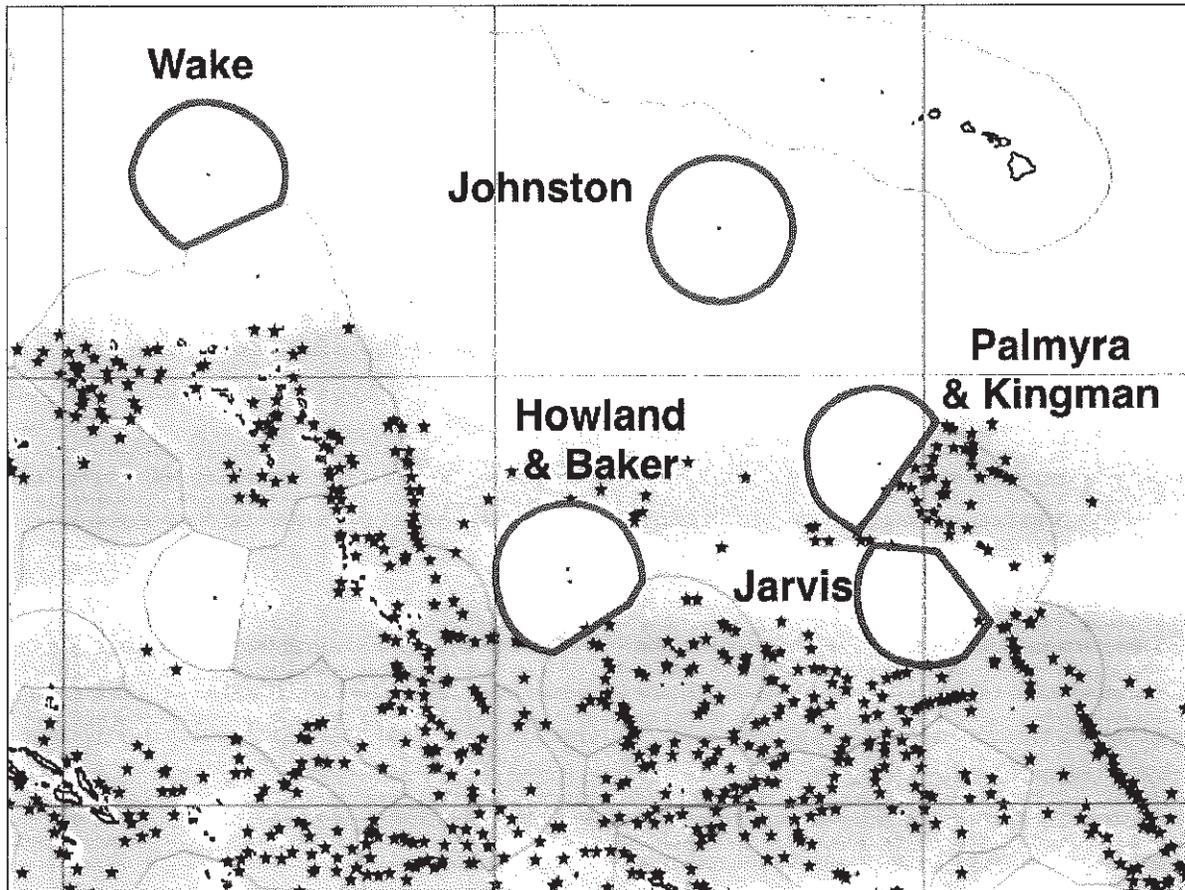

Figure 11. Location of the 1.8 million longline sets (blue dots) recorded in the South Pacific Commission's catch and effort database (1960–2007) [adapted from (32)]. Location of seamounts where tuna fishing occurs (black stars) is shown. The EEZs of the Pacific Remote Islands are highlighted in red. Note that the Pacific Remote Islands EEZs are among the least fished in the central Pacific.

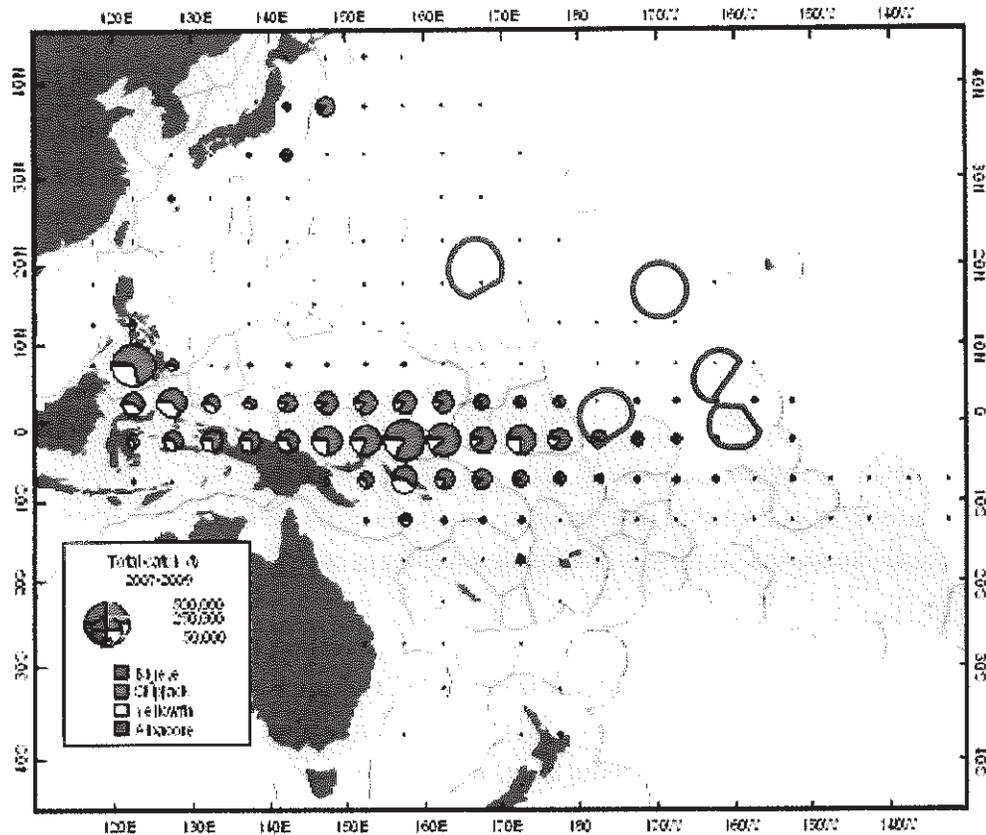

Figure 12. Tuna catches in the Western and Central Pacific [adapted from (9)]. The size of the circle is proportional to the total tuna catch in that specific region. The EEZs of the Pacific Remote Islands are highlighted in dark blue. Note that the Pacific Remote Islands EEZs have almost no tuna catch within their boundaries.

Recreational fishing occurs only at Palmyra Atoll, where the Fish and Wildlife Service allows limited catch and release fishing, whose main objective is help with fish tagging research, and to raise funds to help run the operation of the Palmyra Research Station.

A recreational fishery can have an impact as strong as a commercial fishery. Among populations of concern, recreational landings in the United States in 2002 accounted for 23% of the total nationwide, rising to 38% in the South Atlantic and 64% in the Gulf of Mexico (34). Moreover, recreational fishing affects many of the most-valued overfished species, all of which are taken primarily in the recreational fishery. Moreover, catch and release, even when conducted with apparently harmless gear, has a significant impact on target fish populations. A study conducted off Baja California showed that an average 26 percent of the caught-and-released striped marlin, and 100 percent of the fish released bleeding from the gill chamber, died within five days after release (35).

3.2. Illegal Fishing

All refuge waters in the assessment islands are closed to US and foreign commercial fishing. Because most of the islands are unoccupied and poorly monitored, it is not possible to easily catch US or foreign boats that may enter refuge waters. This issue is complicated by the fact that NOAA and FWS disagree over who has jurisdiction over which waters under what controlling authorities.

There is also some illegal foreign fishing in US island waters. We know this from foreign fishing vessel groundings at Kingman and Palmyra (36); the occasional arrest of a high seas vessel in our EEZ by the Coast Guard (more information in “threats” section); and anecdotal biological evidence of poaching, such as a decline in species numbers over time (e.g., sharks, bumphead parrot fish, and sharks at Palmyra); skewed age structures (grey reef sharks at Howland and Baker), and suspiciously low absences of expected numbers of fish (grey reef sharks at Wake) (33).

It is prohibited for foreign vessels to fish in the entire EEZs of the islands. Infrequent Coast Guard patrols and the lag time between spotting and apprehending a violator before the boat exits US waters means few illegal entrants are caught and prosecuted. The Coast Guard patrols Kingman, Palmyra and Johnston Island EEZs using direct flights from Honolulu. Regular aerial patrols of the other EEZs do not happen unless there is an extended deployment of a Coast Guard aircraft. As a result, even if an aircraft from Hawaii is deployed to Samoa or Guam, only one to two hours of active patrol time per dispatch could be dedicated to patrol the most remote EEZs, such as those of Howland, Baker, Jarvis or Wake Island. These factors, combined with an aging air fleet in need of modernization, challenge the Coast Guard’s ability to protect US living marine resources in the assessment areas. Despite these limitations, the Coast Guard has observed the presence in the islands’ EEZs of an average of 15 illegal fishing vessels per year for the last 4 years. In 2007, there were 11 illegal fishing vessels detected in the islands’ EEZs compared to nine illegal vessels in 2006¹⁴.

One such case is documented in the US Department of Homeland Security United States Coast Guard *Report on Illegal Incursions into the United States Exclusive Economic Zone by Foreign Fishing Vessels*. On February 23, 2007, a Coast Guard aircraft observed the Ecuadorian fishing vessel *San Andres* actively fishing approximately 80 nautical miles inside the US EEZ around Jarvis Island. The Coast Guard was unable to intercept this vessel with a cutter, but did obtain evidence of active fishing activity by the Ecuadorian vessel inside the US EEZ. The US will

¹⁴ United States Coast Guard. 2007. Report on illegal incursions into the United States exclusive zone by foreign fishing vessels.

request the government of Ecuador to take enforcement action against the vessel and prevent further occurrences¹⁵.

The vision of a fully protected reserve, which protects natural ecological functions, energetics and ecosystem processes, is incompatible with the extraction of fish or shellfish by commercial and recreational fishers. This was recognized by President Bush when he proclaimed the Papahānāmokuākea Marine National Monument, which prohibits all fishing (except subsistence fishing) within 50 nm of the island chain. At the time of the proclamation there was little recreational fishing taking place in the Monument, and only a few commercial fishermen were actively fishing for bottom fish and pelagic species. President Bush's proclamation capped commercial fishing at the existing catch level, and directed a phase out of the fishery within five years; recreational fishing was terminated immediately.

Given the massive amount of fishing capacity and power of the entire Pacific fishing fleet, closing the EEZ of the US central Pacific islands will offer a much needed respite for these large pelagic creatures. Critically endangered sea turtles, albatrosses and sharks will once again have significant areas where they are protected during their oceanic wanderings. The closure of these fishing grounds will have relatively small impacts to the combined fishing fleets (less than 5% of their average landings), which can be made up in other areas. Indeed the scientific value from studying these near pristine and intact ecosystems far outweighs the commercial opportunities that are lost. Extending the current Pacific Remote Islands Marine National Monument into the adjacent pelagic waters will provide a unique opportunity to study the linkages between ocean and coastal tropical atolls.

3.3. Minerals Extraction

Given the geological history of the Pacific Basin, there are no likely oil and gas deposits in the region. For a number of years there has been discussion of mining cobalt crusts and manganese nodules from the basin and some limited exploration. No mineral extraction is currently taking place on the seafloor of the islands EEZs. We believe seabed mining in the eight islands EEZs would be incompatible with preserving these areas as intact, fully protected ecosystems. Therefore, we recommend all minerals extraction be prohibited.

4. Protection Will Promote Scientific Research

The U.S. Pacific Remote Islands are home to some of the healthiest marine ecosystems remaining in the world; compared to other areas, they are relatively intact and rich in biodiversity. The islands have nearly four times as many shallow-water, reef-building coral species as the Florida Keys, and are home to hundreds of fish species, dozens of seabird species, and an untold number of invertebrate species, including many endemic species found nowhere else. The islands serve as stepping stones on dispersal highways for many coral reef species and marine colonizers that are now established throughout the Pacific. Seldom visited, and mostly uninhabited, the islands' surrounding marine waters are relatively free from the problems of most other marine ecosystems: over-exploitation, disturbance and pollution.

It is within this context that the great scientific value of the island areas must be understood – they offer a unique window into the past. Nowhere else do we have such remarkably intact tropical ecosystems from which to develop historical baselines of what “natural” islands and oceans are supposed to be. The assessment islands and their surrounding waters offer tremendous opportunities for scientific research on a number of topics if they are protected in their natural state. The islands offer:

- Pristine examples from which to assess the status of coral reef ecosystems throughout the Pacific, and an understanding of coral reef community dynamics without the impacts of fishing, pollution or runoff
- A historical baseline for setting coral reef restoration goals throughout the Pacific
- Sites to monitor the effects of climate change on healthy ecosystems
- Areas study the ecology of near shore ecosystems and their relationship to open ocean waters
- Sites to enhance knowledge of seabirds, sea turtles and marine mammals in open ocean settings and their congregation and migratory patterns—much remains to be done here
- Zones for exploration of the open ocean ecosystem, including its pelagic waters and the deep sea, all of which are not well understood
- Areas to implement and learn from terrestrial and coral restoration projects

Comprehensive coral reef research between NOAA, FWS and several other institutions began in 2000. NOAA has done integrated ecosystem assessments to develop benthic habitat maps; conducts biennial Pacific Reef Assessment and Monitoring Program cruises to each region/island; and conducts Oceanographic and water quality monitoring around each island. A modest budget allocation goes to this effort—about \$3M annually¹⁶. Scientists have mapped

¹⁶ Brainard, Rusty. 2008. Personal Communication.

and monitored all US-affiliated islands in the Pacific, allowing for status and health comparisons between the islands and with other non-US islands. These comparisons have only begun. Researchers must continue to more completely understand the differences between nearly pristine and less than pristine coral areas. In addition, The Palmyra Atoll Research Consortium (PARC) should be allowed to continue operation and supported. Very little work has investigated the deep sea and open ocean areas of this region and resources to support this are needed.

Scientific research has shown that these Central Pacific US remote atolls have the largest reef fish biomasses ever reported (37). Their biomass is between 5 and 30 times greater than that in unprotected US coral reefs (38, 39). These results indicate that fishing has removed between 20 and 97 percent of the reef fishes – including sharks – of US unprotected coral reefs. In addition, the biomass of large predators at Jarvis, Kingman, Howland and Palmyra is larger than the biomass of their fish prey (37). These findings support the idea that our previous understanding about the structure of coral reef fish assemblages is biased as a consequence of having studied mostly degraded reefs (40). Based on this consistent set of data, we conclude that large biomass and inverted biomass pyramids were the norm on coral reefs before exploitation by humans. These Central Pacific reefs are essential baselines to understand how natural reefs function, to understand what we have lost, and to identify rigorous, unbiased management and conservation goals. These systems need to be protected lest we forget what a healthy ocean looks like, and how an intact ecosystem functions. This latter point is even more significant given future uncertainty due to rising levels of atmospheric CO₂ and its impacts.

Fully protected from fishing, large tuna will inhabit the pelagic waters of the region and provide an important ecological function to foraging seabirds at these remote islets and atolls driving prey, such as squid, towards surface waters where they are easily caught by seabirds. The community dynamics that reveal themselves to scientists in these untrammelled waters are important insights that cannot be gained in areas under heavy exploitation.

Open ocean research also must be advanced to understand the importance of the ocean areas beyond the coral reef shelves. The assessment areas collectively encompass an estimated 281 seamounts, most of which have not been identified or explored. Given the high rates of species discovery at other seamounts and bottom habitats in the deep Pacific Ocean, we can easily surmise that hundreds to thousands of new species will be discovered in these waters. We recommend that research be continued and increased levels of funding. All research should continue under current agency research permits, consistent with the monuments' objective of protecting and restoring these unique areas. Funding must be increased for future research for coral reef, deep sea, and open ocean surveys and studies.

APPENDIX 1

Recommendations for Protection and Management of the expanded Pacific Remote Islands Marine National Monument

General recommendations and use

In general, we recommend that the U.S. Pacific Remote islands be fully protected to the outer boundary of their EEZ as a Marine National Monument in order to safeguard these rare, relatively pristine and intact ecosystems. Resource extraction should be prohibited on all of the islands, in the waters of the EEZ and on the seafloor, with certain limited exceptions. The purposes of the Monument should be to protect and restore the scientific and historic resources therein, and to maintain natural biodiversity and ecological processes. Uses of the Monument would be limited to scientific research, education, and wildlife viewing by permit.

Management

Because of the existing Fish and Wildlife Service (FWS) and National Oceanic and Atmospheric Administration (NOAA) co-management of the Pacific Remote Islands MNM and its extensive management plan development, we recommend that FWS retain its full and exclusive authority over the islands and nearshore waters, and that seaward of this region, that NOAA should retain management out to the 200 nm zone (or extent of the EEZ) around the islands as an ocean reserve under its authorities. The President should direct NOAA and FWS to coordinate their research and law enforcement activities in their respective zones of management.

The following principles should apply to the areas under consideration:

- Commercial extractive activities are prohibited, including mining and drilling.
- Ships waste discharges and other discharges are prohibited unless relevant national and international treatment standards are met.
- Commercial and recreational fishing is prohibited in the entire zone, except as provided in the earlier proclamation for the Pacific Remote Islands MNM.

The special circumstances of the two military-managed islands call for special measures:

- Johnston Island and surrounding waters to 12 nm is transferred to the Department of the Interior immediately and managed by FWS as a refuge, with funding provided for staff to be based on the island.
- Wake Island remains under DOD management until such time as the DOD declares the island surplus to its needs, at which time it would revert to the Department of the Interior.
- Interior and DOD are directed to negotiate a cooperative wildlife management agreement for Wake Island's emergent lands. FWS and DOD are directed to co-manage the land areas and wildlife as mutually agreed upon. Funding is provided to place FWS staff on the island for wildlife law enforcement and management purposes.
- The marine waters of Wake to a distance of 12 nm are designated as an overlay national wildlife refuge with primary management authority granted to FWS. Appropriate regulations should be issued by FWS, in consultation with DOD, for recreational fishing in the 0-12nm zone around Wake Island. FWS is authorized to manage recreational fishing under the Refuge Administration Act, Consistent with the management goals of the monument.
- The waters from 12 to 200 nm at Wake are managed by NOAA as a fully protected area.

Military activities

As per the President's memo of August 26, 2008, DOD should be permitted to continue any activities it deems necessary for national defense in the waters surrounding Wake and the other islands.

Expansion of Pacific marine sanctuary is consistent with Hawaiian practice - Hawaii News - Honolulu Star-Advertiser

StarAdvertiser.com

Expansion of Pacific marine sanctuary is consistent with Hawaiian practice

By Hannah Kihalani Springer

POSTED: 01:30 a.m. HST, Sep 07, 2014

LAST UPDATED: 02:27 a.m. HST, Sep 07, 2014

M. General?

Ola aku la ka 'aina kaha, ua pua ka lehua i kai.

(Life has come to the kaha lands, for the lehua blooms are seen at sea.)

"Lehua" is a reference to the deep-sea fishermen of Kekaha, North Kona.

Kekaha is my home on Hawaii island and my family, descendants of subsistence fishermen, continue to supplement our table with fish caught in the waters that our ancestors fished for hundreds of years.

The 'olelo no'eau, or Hawaiian saying, above draws our attention to the Hawaiian inclination of connectivity.

Lehua blossoms are a metaphor for the fishermen of the kaha lands; the seasonal bloom of lehua coincides with the traditional lifting of the kapu on aku fishing.

The kapu was the regulatory system that maintained a sustainable yield of desired resources. Observations were made, conclusions drawn about conditions, and precautionary management actions were taken.

Our ancestors harvested from the waters around Hawaii with efficiency using these sophisticated management techniques -- and our ocean resources thrived because of it.

The people of old understood that rigorously managed fisheries benefited fish and fishers alike. The proposed expansion of the Pacific Remote Islands Marine National Monument (PRIMNM) is consistent with this Hawaiian practice.

Like the connectivity between the aku, lehua and fishermen, there are strong and poetic connections between the deep-sea waters of the PRIMNM and our nearshore island waters.

Ocean currents, migrating marine mammals and birds, and our history and voyaging canoes link us to these distant and uninhabited islands and atolls. In recent times, commercial fishermen, calling Honolulu their homeport, have become connecting factors as well.

These geographies, and their waters, abundant with wildlife, help maintain the productivity of Hawaii's ocean ecosystem and are a vital link in ensuring the health of the broader central Pacific.

Today in Kekaha, lineal descendants, applied scientists, old and new community members, are working on place-based, adaptive management of our nearshore fishery. We have learned that protected marine areas

can benefit ecosystems and replenish resources adjacent to protected areas.

The same applies to expanding the monument area from its current 50 miles to the 200-nautical-mile U.S. exclusive economic zone. Protecting this area ensures long-term viability of our resources, including fish species with commercial value.

If President Barack Obama fully protects the PRIMNM, commercial fishers can replace the less than 5 percent of U.S. tuna catch from this region in neighboring geographies, which are already active fishing grounds.

Even with the expansion of the PRIMNM, 94 percent of the exclusive economic zone area in the Pacific covered by the South Pacific Tuna Fishery would remain open for business to U.S. commercial fishers.

The U.S. has more fishing opportunities than any other country fishing in the region -- and yet, other Pacific Island presidents have already led the way in establishing large-scale marine reserves to ensure the ability to feed families, secure ocean livelihoods and perpetuate culture.

President Obama should join our Pacific neighbors in this effort.

The PRIMNM expansion presents an opportunity to include a memorial to the Hui Panala'au, the more than 130 young men from Hawaii who were sent on a colonizing mission to Howland, Baker and Jarvis by the federal government from 1935-1942.

Three of the young men died during their missions; three of them are still alive today, and all are deserving of the honorable recognition suggested by a descendant, Noelle Kahanu, at a Honolulu town hall meeting last month.

The people of old left lessons for us: a rigorous management system ensures the long-term viability of our resources.

Let us seize this opportunity to rise to the standards of those set by our ancestors not long ago.

Hi Nicky,

I talked to a former solicitor and a former hill staffer on Interior appropriations. Both said if there is any rule that would limit how much money the park service got it is internal to the park service. In other words, the park service can get more money if you guys want them to. My guess is Jarvis is just doing a back of the envelope calculation based on other parks, and there is no rule connecting acres and money. Just between us, both of these people laughed out loud when I told and said that it was just the park service trying to get more acres.

Here is the language that gives you the options but you have probably already seen it.

The role of DOI in FS monuments was settled by two executive orders, in 1933 and in 1950, exercising presidential authority under various reorganization acts, both of which were ratified by Congress in 1984 (and thus cannot be undone without congressional consent). The latest relevant guidance from the Justice Department's Office of Legal Counsel (OLC) is that the President "may delegate management responsibilities" for national monuments to agencies other than the Interior Department "if that agency has some independent statutory authority to manage the relevant resource, but the Department of the Interior must maintain concurrent management of the monument." Management may thus "generally be shared" between Interior and the other agency. OLC also said "no precise rules have been developed to govern how management authority must be allocated between the Department of the Interior and other managing agencies," but it noted that the "administrative practice . . . requires" that Interior "be consulted on all significant management decisions relating to the national monument and have the opportunity to bring any issue upon which it disagrees with the other managing agency or agencies to the President or his delegee for resolution."

PUBLIC OPINION STRATEGIES

MEMORANDUM

TO: INTERESTED PARTIES

FROM: LORI WEIGEL, PUBLIC OPINION STRATEGIES

DATE: JUNE 5, 2014

RE: KEY FINDINGS FROM A SURVEY OF LOS ANGELES COUNTY VOTERS REGARDING SUPPORT FOR PERMANATELY PROTECTING THE SAN GABRIEL MOUNTAINS AND RIVERS

Public Opinion Strategies recently completed a survey of 400 voters throughout Los Angeles County with an oversample of Latino voters regarding their perceptions of a proposal to permanently protect the San Gabriel Mountains and rivers.¹ The survey finds strong and widespread support for the proposal as detailed in the survey.

In fact, a majority say the President should take action now on this proposal.

Voters perceive that protecting the San Gabriel Mountains and rivers offers many benefits for themselves personally and the community, with particular importance on clean water, air, wildlife, and ensuring there are places for children to recreate and experience nature. Specifically, the survey found:

- **Four-in-five Los Angeles County voters (80 percent) support protecting the San Gabriel Mountains and rivers.** Survey respondents received a brief explanation of the proposal in order to ensure all respondents had the same level of information on the topic:

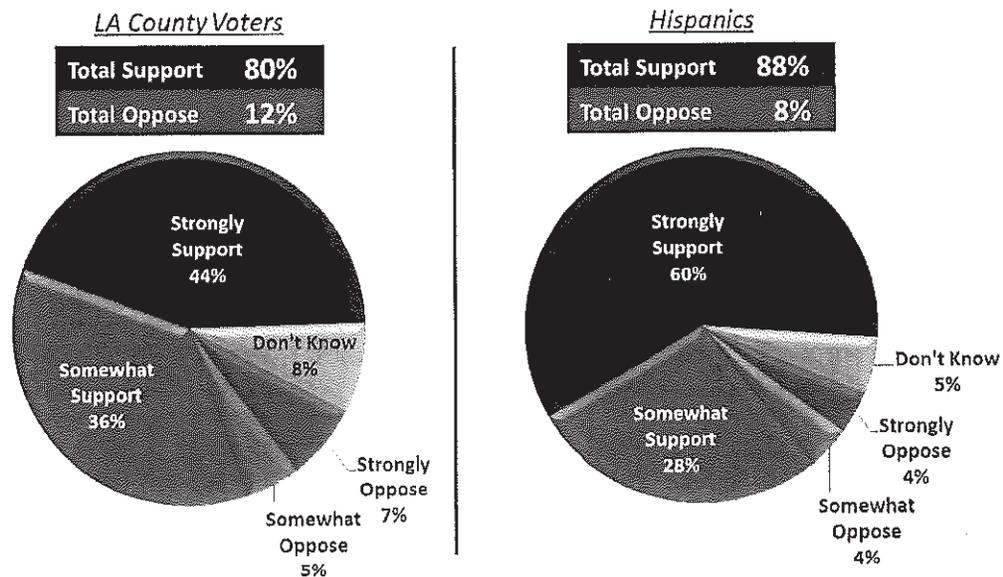

As you may know, the San Gabriel proposal would enhance protections for significant portions of the San Gabriel Mountains in the Angeles National Forest and provide close to home recreational opportunities for communities throughout Los Angeles County. The proposal, developed with community input, would bring greater resources to the area for maintaining and enhancing the public lands, with improved parking, improved rest rooms, better trash collection, and new recreation opportunities that extend into the San Gabriel

¹ **Methodology:** Public Opinion Strategies conducted a telephone survey of N=500 voters throughout Los Angeles County, California. The survey was conducted May 27-31, 2014 and has an overall margin of error of +4.38%. Sampling error for subgroups within the sample will be larger. The sample is proportional throughout the state and demographically representative of the electorate. Interviews were conducted both on traditional land lines and cell phones.

Valley. Recreational activities could include hiking, biking, picnicking, fishing, boating, and camping. Hunting would also be allowed in this area.

Fully 80 percent of Los Angeles County voters support the proposed protection of the San Gabriel Mountains and rivers, with almost universal support (88 percent) among Hispanic voters in the county. Opposition is in the single digits among Hispanics and only slightly higher overall.

Support for protecting the San Gabriel Mountains and rivers

The intensity of support for this proposal is also striking, as voters broadly are more likely to be strongly in support than strongly opposed by a **six-to-one margin**. Among Hispanic voters, that ratio is a significant **twelve-to-one**.

- **Support for protecting the San Gabriel Mountains and rivers is widespread and broad-based.** Majorities of all key subgroups of the electorate express this sentiment, including:
 - 82 percent of women and 76 percent of men;
 - 88 percent of Latinos, 82 percent of Asian Americans, 76 percent of African Americans, and 76 percent of White/Anglos;
 - 90 percent of voters under age 35, 85 percent of 35-44 year olds, 76 percent of 45-64 year olds, and 72 percent of seniors;
 - 90 percent of moms/women with a child in the household, 76 percent of dads/men with a child in the household, and 79 percent of those without a child under the age of 18 living at home;
 - 87 percent of self-described liberal voters, 81 percent of moderates and 74 percent of conservatives;

- 84 percent of Democrats, 82 percent of independents/Decline to State voters, and 68 percent of GOP voters; and
- 73 percent of those who hunt or fish.

Notably, support is strongest among the one-in-five residents who indicate having heard something about the proposed National Recreation Area prior to the survey. Among those already aware of the proposal, fully 84 percent express support for the idea.

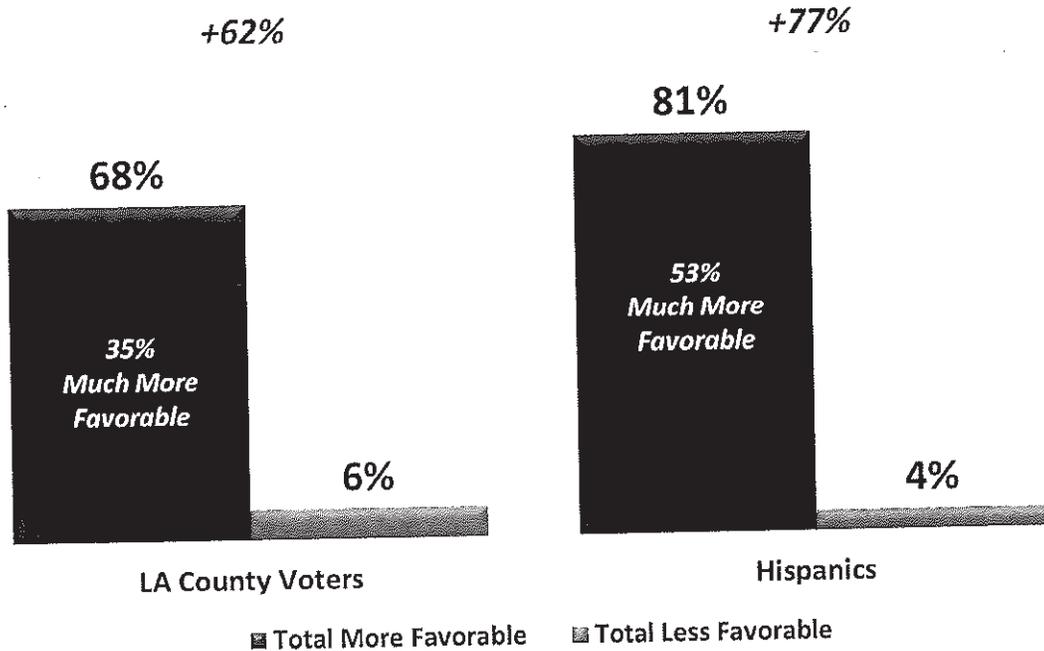

- **Virtually every potential benefit of protections for the San Gabriel Mountains is perceived to be important by Los Angeles County voters.** Respondents were asked to rate a randomized list of potential benefits of this proposal and asked to rate each one as either extremely, very, somewhat or not that important to them personally. As the following graph illustrates, virtually all of the potential benefits are ones that County residents deem to be at least somewhat important. And, 13 of the 17 potential benefits tested are viewed as extremely or very important by a solid majority of County voters.

Summary of Benefits - Ranked by % Extremely/Very Important

Benefits	% Extremely/ Very Important	% Total Important
Provide clean water for drinking	90%	95%
Protect clean air	83%	92%
Protect open space and natural areas that are threatened by development	78%	90%
Provide opportunities for children to get outside and explore nature	77%	91%
Protect habitat for threatened animals, such as the California condor and mountain lions	76%	90%
Reducing the amounts of trash, graffiti and user-created dams in and along the San Gabriel River	74%	93%
Provide greater education experiences so children can learn about nature	73%	95%
Preserve and enhance the natural, historic and scenic resources of the San Gabriel Mountains and the rivers that flow through the San Gabriel Valley.	73%	93%
Provide better maintenance and cleaning of trails, restrooms and parking areas, as currently the Forest Service relies on volunteers to pick up litter	67%	92%
Provide families with affordable places to spend time together, and relax	66%	93%
Providing better recreational opportunities for those who come to swim, hike, camp, and recreate here	62%	90%
Provide spaces for exercise and outdoor recreation to help address Los Angeles County's childhood obesity and diabetes health problems	61%	88%
Provide more restrooms, access trails, picnic sites, and educational signs to enhance visitor experiences	56%	89%
Provide opportunities for quiet and spiritual reflection	49%	81%
Increase the number of multi-lingual staff and rangers	43%	77%
Preserve opportunities for fishing	35%	76%
Preserve opportunities for hunting	15%	42%

- Elected officials and those running for public office would be wise to note that voters' positive associations with proposal extend to officials who support it. More than two-thirds of Los Angeles County voters say they would have a more favorable impression of a "candidate for public office if he or she supported this proposal regarding providing greater protection and attention to the San Gabriel Mountains and rivers."
- In fact, more than one-in-three say they would have a much more favorable impression (35 percent) reaching a level of intensity that signals this issue is a true motivator. Among Hispanics, as the below chart indicates, positive associations are extremely high (81 percent more favorable) and intense – a solid majority of 53 percent say they would be much more favorable toward a candidate who supports protections for the San Gabriel Mountains.

**Impact of Support for San Gabriel Mountains and Rivers
On Views of a Candidate for Public Office**

- In fact, a majority say they would tell the President to take action on this proposal now. A majority of 55 percent of all County voters and fully 70 percent of Hispanic voters say they would tell President Obama to take action on this proposal now.

Memo

To: Interested Parties

From: San Gabriel Mountains Forever Coalition

Date: July 3, 2014

Subject: Recommended Implementation Guidance for Enhanced Management of the San Gabriel Mountains and rivers

The following memo summarizes potential management guidance for a San Gabriel Mountains National Monument, as suggested by the San Gabriel Mountains Forever coalition. These recommendations are made based on multiple conversations with community partners, agency staff, and administration officials, many of whom have inquired as to how enhanced management of the area should be implemented to accommodate the needs of the landscape and the communities that depend on it for drinking water, outdoor recreation, and more.

It is important to note that as a result of over the 10 plus years of public input on the San Gabriel Watershed and Mountains Special Resources Study conducted by the National Park Service, there has been consistent interest by stakeholders for a National Park Service role alongside the US Forest Service in the Angeles and San Bernardino national forests. SGMF realizes the Administration is interested in pursuing all avenues to achieve our desired outcomes. SGMF is receptive to other selected management arrangements that can achieve desired outcomes listed below. SGMF would appreciate detailed information on commitments made for achieving desired outcomes and proposed timeframes.

Desired Outcomes

The vision of San Gabriel Mountains Forever is the protection and enhancement of our mountains, rivers and parks with access for all. The SGMF is committed to working with the Administration to see the following types of outcomes in the proposed national monument:

- Protection of the area's natural, historic, and cultural resources
- Rehabilitate and re-open all recreation areas throughout the forest for sustainable recreation
- Establish new recreation areas, new parking areas, restrooms and educational kiosks, and new trails for communities located in areas underserved by recreational opportunities and access to the forest
- Implement a comprehensive signage system (including safety, way finding, and interpretive signage) and relate signage infrastructure throughout the proposed monument and urban access points

- Create a front line visitor reception program, welcoming and orienting visitors at all key entry points of a proposed national monument and at all key recreation areas
- Develop a comprehensive education program (including fire prevention and littering elements) to serve the needs of foothill communities and adjacent residents and visitors
- Enhance engagement and support of volunteer programs, local nonprofit organizations and community groups, which complete stewardship projects and educational programs in the forest
- Increase opportunities for youth to work within the forest undertaking restoration and trail maintenance, recreation outreach and planning, and public outreach and education.

Implementation Guidance

In order to best meet the desired outcomes of the SGMF for new San Gabriel Mountains National Monument (Monument), the community suggests the following implementation guidance:

Staffing

- Hire a full-time staff, at the appropriate management level and based on location, to manage and convene a public advisory committee as well as lead a management plan, visitor services plan, and access plan. SGMF recommends this position be filled within 90 days of the national monument proclamation. To best execute this position, we feel the staff member must have access to agency resources (including staff time and funds) necessary to carry out planning processes and activities identified.
- Conduct training for local agency staff, providing them with the tools necessary to nurture and develop a reciprocal relationship with the surrounding communities; this should include special emphasis on engagement with multicultural and disadvantaged communities and youth.

Planning Initiatives

- In the proclamation and management plan for the Monument, clearly prioritize the protection of the Monument's natural, historic, and cultural resources while providing for the education and enjoyment of its visitors.
- Prepare a visitor services study and plan to improve visitor experiences within the Monument through expanded recreational opportunities, and increased interpretation, education, resource protection, and enforcement for the Monument. The results of this study should be incorporated into the management plan for the Monument.
- Prepare an access study that studies public access to the Monument and make recommendations on improving accessibility. The results of this study should be incorporated into the management plan for the Monument. A Transit to Trails program should be implemented at the earliest possible opportunity.

Resources & Implementation

- Commit to providing the resources necessary to conduct and implement the plans and projects identified in the appropriate budget year, pending National Monument designation timing, and to subsequently prioritize submission of such budgetary request(s) to Congress to sustain funding for these objectives over the long term.

- Create a meaningful partnership with local stakeholders through the public advisory committee.
- Should there not be significant progress in the advancement of management improvements in a proposed National Monument SGMF shall revisit the need for additional agency or Administration or legislative alternatives to meet our desired outcomes.

President Barack Obama
The White House
Washington, D.C. 20500

Re: San Gabriel Mountains and Watershed protection

Dear Mr. President:

We are organizations in the Los Angeles and San Gabriel region that represent communities and members that stand to benefit from Congresswoman Judy Chu's recently introduced San Gabriel National Recreation Area Act.

A cornerstone of the San Gabriel National Recreation Area Act is the creation of a new unit of the national park system. This is specifically included to ensure the benefits of National Park Service involvement in our communities through a genuine commitment by the Administration to the region. A new unit of the national park system ensures that dedicated funding is provided for staff and resources, providing tangible benefits to our local communities. This is an important part of the support by local organizations for this legislation.

In the event that you consider using your executive authorities to designate a new national monument in this region, we believe it is critical for any national monument proclamation to include the creation of a new unit of the national park system, as intended by Congresswoman Chu's legislation. Anything less would fall short of local stakeholders' expectations in guaranteed new enhancements for the San Gabriel Mountains and Watershed. In addition, the proclamation should include health, environmental justice and Native American values and sacred sites as core goals for permanent protections. This should include jobs and apprenticeship programs for urban youth of color and low income youth, as well as the development of a Transit to Trails program. The proposed legislation addresses these values through a diverse public advisory council including environmental justice, comprehensive management and visitor plans, and a partnership among federal, state, tribal, and local authorities and the private sector.

We have been proud to provide local support to the Administration over the years on these efforts. The National Park Service and U.S. Forest Service have a unique opportunity in their nearly 100 year relationship to form a new partnership in which each agency's expertise comes together to benefit our communities. Such an outcome would enhance each agency's proud legacy and contribution to our public lands in the region. Thank you for your consideration of our views.

DOI in the News:

SECRETARY JEWELL VOWS TO PUSH KLAMATH PACTS DESPITE CONGRESS' INACTION. The [E&E](#) (12/21) reports that Interior Secretary Sally Jewell has vowed “to continue working on a landmark water-sharing and dam removal agreement on the Klamath River, after Congress failed to act on enabling legislation last week.” Jewell said, “I am deeply disappointed that authorizing legislation for the hard-fought Klamath Agreements was not passed during this session of Congress. In crafting these agreements, a diverse and committed group of coalition parties set aside ideology and years of conflict for the hope of long term progress and sustainability for tribes, the fishery and irrigated agriculture in the region.”

Additional coverage of the issue was provided by [Fox News](#) (12/21, 9.42M).

SAGE GROUSE PROTECTION BOOSTED BY INTERIOR'S NATURAL RESOURCE INVESTMENT CENTER.

[Natural Gas Intelligence](#) (12/22, Subscription Publication) reports that “efforts by western states and the energy industry to enhance habitat protections for the greater sage grouse should benefit from the recently unveiled U.S. Department of Interior (DOI) Natural Resource Investment Center, said Secretary Sally Jewell.” The center is “designed to spur public-private partnerships for water conservation and sage grouse habitat programs similar to some of the government-industry programs that led to DOI’s decision in September to not list the bird as threatened or endangered under the Endangered Species Act.” According to the article, “besides fostering water exchanges across the West, the center is designed to create partnerships to enhance grouse habitat in Nevada, where a collaboration with DOI, Barrick Gold of North America and The Nature Conservancy has expanded efforts.”

HOUSE REPUBLICANS QUESTION EPA'S MINE SPILL ADDENDUM. The [E&E](#) (12/21) reports that House Natural Resources Committee Republicans are “accusing U.S. EPA of spreading ‘demonstrably false’ information related to this summer’s abandoned mine spill in Colorado.” Before a Natural Resources oversight hearing on the incident earlier this month, EPA “released an addendum to an agency internal review of the spill,” which “includes new interviews with two EPA staffers, who say the agency was conducting preliminary work at Gold King but was not planning more significant work until consultations with the Interior Department’s Bureau of Reclamation.” Last Friday, Natural Resources Chairman Rob Bishop and Investigations Subcommittee Chairman Louie Gohmert “fired off a letter to EPA’s Office of Inspector General questioning the addendum.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (12/22, 283K), the [Albuquerque \(NM\) Journal](#) (12/22, 263K), the [Durango \(CO\) Herald](#) (12/21, 31K), the [Daily Signal](#) (12/21), and [KCNC-TV Denver \(CO\)](#) Denver (12/21, 57K).

PEER, Questions EPA For Recent Chemical Accidents. The [Daily Caller](#) (12/22, Bastasch, 366K) reports Public Employees for Environmental Responsibility (PEER) attorney Laura Dumais called the EPA a “proverbial plumber with the leaky pipes” in part because of the EPA’s refusal to release information about the “unidentified” chemicals found in an Arlington office ventilation center, which PEER said resulted in health problems in over 20 EPA employees. The Interior Department also criticized the EPA because its employees released 3 million gallons of toxic waste into the Animas River four months prior, an error the Interior Department said was preventable.

ADDITIONAL COVERAGE: CASTNER RANGE PROPOSED AS NATIONAL MONUMENT. Additional coverage that Castner Range has been proposed for national monument status was provided by the [El Paso \(TX\) Inc.](#) (12/22, 31K).

WILDLIFE ADVOCATES CHEER OMNIBUS BILL. For “The Blog” of the [Huffington Post](#) (12/22, Clark, 251K), Jamie Rappaport Clark, President & CEO, Defenders of Wildlife, cheers the omnibus budget bill because it was “almost free of catastrophic anti-wildlife riders, making it a huge victory for imperiled species and the Endangered Species Act.” Clark recognizes “our conservation champions in Congress, the Obama administration and the tireless work of the conservation community,” who prevented “a whole slew of potential riders attacking our lands and wildlife...from inclusion in the final funding deal.”

CONGRESS URGED TO MAKE LWCF PERMANENT. In an editorial, the [Eugene \(OR\) Register-Guard](#) (12/21, 209K) urges Congress to permanently restore the Land and Water Conservation Fund. The paper says that the LWCF has “enjoyed bipartisan support since its inception.” It concludes that “it’s time to remove the fund from the political arena and permanently re-authorize the program.”

Additional coverage of the LWCF was provided by the [Milwaukee Journal Sentinel](#) (12/20, Smith, 691K), [VTDigger \(VT\)](#) (12/21, 1K), and [WXPR-FM](#) Rhinelander, WI (12/22).

REPUBLICANS CRITICIZED FOR FAILING TO ATTACK STREAM BUFFER RULE IN OMNIBUS. For the “Congress” blog of [The Hill](#) (12/21, 654K), Charlie Drevna, senior fellow at the Institute For Energy Research, criticizes the omnibus bill for neglecting to help the “domestic manufacturing and energy sectors.” Of note, Drevan points out

“Republicans lost out on an opportunity to help protect...jobs by vacating” the stream buffer rule; “instead, the Omnibus helps support Obama’s war on coal.”

PROTECTION URGED FOR OWYHEE CANYONLANDS. For the “Congress” blog of [The Hill](#) (12/22, Collier, 654K), Zach Collier, the owner of Northwest Rafting Company, argues that “protecting the Owyhee Canyonlands is good for business.” He writes that “a protective designation that would provide a ‘star on the map’ for the Owyhees would almost certainly boost the local economy as well as the whitewater industry across the state and region.” But more than anything else, what “fuels” Collier is “the opportunity to keep the river and the entire watershed just like it is.”

OP-ED: FEDERAL LAND WITHDRAWAL IS “POOR PUBLIC POLICY.” In a [Washington Examiner](#) (12/22, 112K) op-ed, National Mining Association president and CEO Hal Quinn objects to the Interior Department’s recent decision to withdraw 10 million federal acres from new mining operations, the largest land withdrawal in Federal Land Policy and Management Act history, for increased sage grouse protection in Western states. Quinn asserts the land withdrawal will restrict domestic mineral access and increase US dependence on foreign minerals, which has already doubled in the last 20 years, without significantly increasing sage grouse protection.

Empowering Native American Communities:

SPENDING BILL LEAVES OUT PROVISIONS DEFUNDING BIA, FEDERAL RECOGNITION. The [Houma \(LA\) Courier](#) (12/21, 53K) reports that “Native American tribes including the United Houma Nation that are seeking federal recognition have received some encouragement under a federal spending bill that keeps the government operating in 2016.” The bill, “signed by President Barack Obama on Friday, increases spending for the Bureau of Indian Affairs, albeit only slightly.” However, “things could have been worse,” since “Republican congressmen threatened to defund the bureau, and another proposal would have stripped it of authority to grant federal recognition to tribes, leaving that solely in the hands of lawmakers.”

Additional coverage was provided by the [Thibodaux \(LA\) Daily Comet](#) (12/21, 42K).

UPDATED RIGHT-OF-WAY RULE TO TAKE EFFECT ON MARCH 21. [E&E Publishing](#) (12/21, 705) reports that the BIA has “decided to give tribes, energy companies and utilities 90 more days to prepare for a final rule on rights of way on Native American land.” Kevin Washburn, the bureau’s assistant secretary, announced the new rule will take effect on March 21.

Additional coverage was provided by [JD Supra](#) (12/22, 6K).

CHUKCHANSI TRIBE CLEAR HURDLE TOWARD REOPENING COARSEGOLD CASINO. The [Fresno \(CA\) Bee](#) (12/22, 270K) reports that the Picayune Rancheria of Chukchansi Indians “cleared a critical hurdle Monday toward reopening its casino in Coarsegold, and the tribe could have the slot machines ringing again by early January.” The National Indian Gaming Commission “agreed Monday to allow Chukchansi Gold Resort & Casino to reopen and the state Attorney General’s office, which has the final say, isn’t opposing the federal order.”

ADDITIONAL COVERAGE: PROGRAM SEEKS TO COMBAT OVERDOSES. Additional coverage of the “partnership to equip Bureau of Indian Affairs law enforcement officer with naloxone” was provided by the [Mt. Pleasant \(MI\) Morning Sun](#) (12/19, 33K) and [Bartlesville \(OK\) Radio](#) (12/22).

ADDITIONAL COVERAGE: TURTLE MOUNTAIN INDIAN RESERVATION JOINS LAND BUY-BACK PROGRAM. Additional coverage of the land buy-back agreement with the Turtle Mountain Band of Chippewa Indians was provided by the [Navajo Times \(AZ\)](#) (12/22, 66K).

HISTORY OF BROKEN PROMISES RETRACED. In an op-ed for the [Longmont \(CO\) Times-Call](#) (12/22, 435), Tom Aron writes that “in 2015, President Obama publicly acknowledged the troubles we’ve put upon our Indians and he committed us to improving their health service, their economic growth, and their better future.” In retracing how the federal government has broken promises, Aron questions whether the government will “ever become honest with the Indians.”

Tackling America’s Water Challenges:

BOR COMMISSIONER LOPEZ ADDRESSES COLORADO RIVER WATER USERS ASSOCIATION MEETING. Video of BOR Commissioner Estevan Lopez’s address to the Colorado River Water Users Association Meeting was provided by the [Frequency](#) (12/22, 17K).

EXPERTS SAY FOREIGN HACKERS LIKELY ABLE TO STRIKE US POWER GRID AT WILL. According to the [AP](#) (12/22, Burke, Fahey), in the last decade, “sophisticated foreign hackers have gained enough remote access to

control the operations networks that keep the lights on,” about a dozen times, “according to top experts who spoke only on condition of anonymity due to the sensitive nature of the subject matter.” While the breaches “have not caused the kind of cascading blackouts that are feared by the intelligence community” so many hackers “have stowed away in the largely investor-owned systems that run the US electric grid that experts say they likely have the capability to strike at will.”

YUROK TRIBE URGES COURT TO ALLOW WATER RELEASE TO PREVENT SALMON-KILL. [Law360](#) (12/22, 30K) reports that the Yurok Tribe on Friday “urged the Ninth Circuit to reverse a lower court decision blocking the U.S. Secretary of the Interior from releasing flows aimed at curbing disease and fish kill of salmon in a California river on the tribe’s reservation.”

ARIZONA SEEKS WATER FOR GROWTH. The [Arizona Republic](#) (12/19, 960K) reports that “Arizonans must find new sources, reuse more wastewater and get more efficient to protect their state’s future.” The article notes that “the federal government has said Colorado River flows likely will diminish further.” The BOR “averaged the results of existing climate models to predict a 9 percent decline in flows by 2060,” but “many climate scientists predict worse.”

DROUGHT MONITOR REVEALS IMPROVED DROUGHT CONDITIONS IN PACIFIC NORTHWEST. The [Salem \(OR\) Capital Press](#) (12/21, Jenkins, 113K) reports the Department of Agriculture, National Oceanic and Atmospheric Administration, and University of Nebraska-Lincoln’s US Drought Monitor revealed on Thursday that Washington’s severe drought conditions ended. The Drought Monitor also revealed improved drought conditions in Oregon and Idaho, and slightly improved conditions in California. Reservoir and snowpack levels have also recovered, and according to the state Water Resources Department, California’s snowpacks reached 75 to 80 percent of their normal levels.

WATER SHORTAGE THREATENS CALIFORNIA FARMLAND, AGRICULTURE INDUSTRY DISAGREES ON SOLUTION. The [Sacramento \(CA\) Bee](#) (12/22, Kasler, 515K) reported the California Department of Conservation estimated 765,000 acres of irrigated farmland, including eight percent of the San Joaquin Valley’s prior agricultural base, have disappeared between 2000 and 2012 because of severe drought conditions. The state approved the Sustainable Groundwater Management Act, which will take effect in 2020, to limit groundwater extraction but farmers expressed concern about the combined potential negative impact that the restrictions and simultaneous climate change conditions will have on California’s agricultural and farming economy.

BOR TO BUILD NEW FIRE STATION ON OWN LAND. The [Star of Grand Coulee \(WA\)](#) (12/23, 41) reports that BOR officials announced Friday that “it will build its 21,500-square-foot fire station near the intersection of B Street and Highway 155.” According to the article, “the site, which was the bureau’s preferred site, is on land already owned by the federal government and is outside the west administration/industrial gate area.”

BOR SEEKS COMMENTS ON PARKING STRUCTURE PROPOSAL. The [Estes Park \(CO\) Trail-Gazette](#) (12/22, 13K) reports that the BOR has “released a draft Environmental Assessment (EA) for public review and comment for a Town of Estes Park (Estes Park) proposal to construct up to a three-level parking structure on Reclamation lands.” If approved by BOR, “the parking structure would be constructed adjacent to the existing Estes Park Visitor Center and Transit Facility.”

ADDITIONAL COVERAGE: ENVIRONMENTAL GROUP SUES OVER SPOTTED FROG PROTECTION. Additional coverage of the lawsuit over spotted frog protections was provided by the [Bend \(OR\) Bulletin](#) (12/22, 94K), [Courthouse News](#) (12/21, 7K) and [KUOW-FM Seattle \(WA\)](#) Seattle (12/22, 15K).

Securing America’s Energy Future:

Renewable Energy:

RENEWABLE ENERGY DEVELOPMENT IN US FACING REGULATORY ROADBLOCKS. The [AP](#) (12/22, Lieb) explores in a 1,400-word article how problems in developing transmission infrastructure are hamstringing the establishment of a renewable energy grid in the US. For example, regulators in Missouri – partly due to pressure from property owners – have “blocked the 780-mile-long Grain Belt Express power line from being built.” Renewable energy projects in Arkansas, Wyoming, and Arizona have also been blocked by regulators.

PROGRESSION HAWAII OFFSHORE WIND RAISES \$225K. The [Portland \(OR\) Business Journal](#) (12/22, Subscription Publication, 41K) reports that “an Oregon-based wind energy company working to develop a 400-megawatt project off Hawaii recently raised \$225,000.” Progression Hawaii Offshore Wind Inc. “filed its fundraising paperwork with the securities and Exchange Commission on Dec. 14.” According to the article, “the developers planned to submit its formal lease application with the federal Bureau of Ocean Energy Management by the end of the year.”

NAVAJO NATION TO BUILT FIRST UTILITY-SCALE SOLAR PROJECT. The [AP](#) (12/22, Fonseca, 263K) reports that an Arizona Navajo community will see its first utility-scale solar project by the end of 2016. Walter Haase, general manager of the Navajo Tribal Utility Authority said the \$64 million 27-megawatt project leveraged federal loans and tax credits. Haase said the tribal utility will work to extend its agreement with the Salt River Project after the two years or find another buyer for the power and renewable energy credits.

Onshore Energy Development:

POLITICO MAGAZINE EXAMINES CONOCOPHILLIPS' PUSH TO DRILL IN ALASKA. In a nearly 8,000-word piece for [Politico Magazine](#) (12/21, MacGillis), Alec MacGillis, a political reporter for ProPublica, describes how, after then-Interior Secretary Bruce Babbitt negotiated a deal in 2000 to prevent drilling in Alaska's western Arctic, the Obama Administration in 2013 granted ConocoPhillips the right to drill in the National Petroleum Reserve-Alaska, saying that how ConocoPhillips "overcame years of resistance from courts, native Alaskans, environmental groups and several federal agencies is the story of how Washington really works."

The piece also appears at [ProPublica](#) (12/22, 6K).

LOCAL COLORADO LEADERS WANT BLM TO PROTECT THOMPSON DIVIDE FROM DRILLING. [E&E Publishing](#) (12/21, 705) reports that "a bipartisan delegation of local Colorado government leaders say they support a Bureau of Land Management draft plan that could cancel a number of hotly contested oil and natural gas leases inside the state's pristine Thompson Divide." According to the article, "the local leaders in and around White River National Forest submitted a letter Friday to BLM Colorado Director Ruth Welch stating they support the agency's 'proposed action' unveiled last month canceling 18 of the 25 leases held by two Houston-based companies inside the Thompson Divide."

The [Glenwood Springs \(CO\) Post Independent](#) (12/22, 32K) reports Garfield County Commissioner John Martin, Pitkin County Commissioner Steve Child, Glenwood Springs Mayor Mike Gamba, and Carbondale Mayor Stacey Bernot addressed a letter to Bureau of Land Management (BLM) State Director Ruth Welch on Dec. 17 thanking the BLM for reconsidering its proposed action to cancel or modify 75 already-issued oil and gas leases in the Thomson Divide and White River National Forest areas. The BLM scheduled a formal comment period effective until Jan. 8, and at a special meeting on Dec. 22, staff from Rep. Scott Tipton's office will discuss proposal comments submitted by Thomson Divide officials.

CONSERVATION GROUPS FILE LAWSUIT AIMED TO CHALLENGE APPROVAL OF FOUR CORNERS POWER PLANT. [KRQE-TV](#) Albuquerque, NM (12/21, 34K) reports that "national conservation groups took legal action on Monday against the Office of Surface Mining, US Fish and Wildlife and other federal agencies." The lawsuit seeks "to challenge the feds on their approval of the Four Corners Power Plant and Navajo Mine." The groups claim "the federal agencies' approval of the Four Corners Power Plant and Navajo Mine Energy Project has negative impacts on communities, the climate and endangered species."

FORMER MASSEY CEO COULD FACE MILLIONS IN FEES, JAIL TIME. The [E&E](#) (12/18) reports that "former Massey Energy Co. CEO Don Blankenship may have to pay millions of dollars in restitution fees after a conviction that carries up to a year in prison." In U.S. District Court in Beckley, W.Va., on Wednesday, prosecutors argued "against easing his \$5 million bond to \$250,000 and lifting his travel restrictions, highlighting that potential fees make him a flight risk ahead of his April 2016 sentencing." Blankenship was "convicted on a misdemeanor conspiracy charge Dec. 3 for willfully neglecting mine safety standards."

Offshore Energy Development:

GEORGIA REPRESENTATIVE REJECTS BIPARTISAN EFFORT TO PREVENT GEORGIAN OFFSHORE DRILLING. The [Atlanta Journal-Constitution](#) (12/21, Galloway, 1.15M) reports Rep. Buddy Carter and other Georgia representatives refused to sign a bipartisan letter directed to the Bureau of Ocean Energy Management opposing seismic testing off of the Georgia coast because of the project's estimated \$700 million in revenue and 5,000 new jobs. In addition to the legislators contesting offshore drilling, over 93 Atlantic coastal communities expressed resistance to the Obama Administration's proposed early 2016 plan enabling seismic testing for offshore oil and gas.

[WBOC-TV](#) Salisbury, MD (12/22, Tuchman, 69K) reports Commissioners of Dewey Beach joined the over 93 municipalities who have voted against Atlantic offshore drilling and seismic testing. Dewey Beach Mayor Diane Hanson said if approved, the proposed offshore seismic testing will lead to oil drilling that "would be the end of our economy" in the event of an oil spill. Secretary of the Interior Sally Jewell rejected the opposition and called the project a "safe and responsible development of our nation's domestic energy resources" crucial to American job creation and decreased foreign oil dependency.

TRIAL SET FOR FEBRUARY OVER DEADLY 2012 PLATFORM BLAST. The [AP](#) New Orleans (12/22, 88K) reports that “two companies charged with manslaughter in a deadly 2012 rig explosion about 20 miles off Grand Isle are scheduled for trial in February.” The trial is set for Feb. 1 in federal court in New Orleans. U.S. District Judge Jane Triche Milazzo will “hear the case against Black Elk Energy and one of its contractors, Grand Isle Shipyards Inc.”

ALABAMA RENOVATES ABANDONED BEACHFRONT GOVERNOR’S MANSION WITH BP OIL SPILL MONEY. The [AP](#) (12/22, Reeves) reports that the state of Alabama “is using BP grant money left over from the 2010 Gulf oil spill to finally repair and renovate a beachfront governor’s mansion that has been abandoned for nearly two decades.” The costs are estimated at \$1.5 to \$1.8 million and the project should be finished by late May. While environmentalists “filed suit over the state’s plan to use BP restoration money to construct a hotel on the beachfront,” Jennifer Ardis, a spokeswoman for Gov. Robert Bentley, “said the state is ‘comfortable’ using money remaining from a separate BP grant to pay contractor Phil Harris Construction Inc. to fix the mansion.”

[America’s Great Outdoors:](#)

[Bureau of Land Management:](#)

SAN JUAN COUNTY COMMISSIONER LYMAN WEIGHS APPEAL OF SENTENCE IN ATV PROTEST RIDE. The [AP](#) (12/22, 2.15M) reports that San Juan County Commissioner Phil Lyman said “he’s considering an appeal of a conviction that led to a 10-day prison sentence for his role in an ATV protest ride through a closed canyon, but also said he thought the judge’s sentence last week was thoughtful and considerate of the facts and situation.” Lyman said “on Monday that he was impressed that U.S. District Judge David Nuffer considered the realities of living in rural Utah in making his Friday ruling.” Lyman, “who has a couple of weeks to decide about an appeal, said he’ll depend on his attorney’s analysis of legal factors in making a decision about an appeal.”

In an editorial, the [Salt Lake \(UT\) Tribune](#) (12/22, 339K) compares the sentences of Lyman, who “received the minimal sentence,” and Tim DeChristopher, who was “sentenced to two years in federal prison back in 2011 for his protest of how the federal government treats the land it owns in Utah.” The Tribune acknowledges that “legally, DeChristopher committed a felony while Lyman was guilty only of a misdemeanor.” But it concludes that “in the long run, true justice would be served if DeChristopher’s Peaceful Uprising campaign grows in prominence and strength, while Lyman’s crusade simply fades away.”

Additional coverage was provided by the [Salt Lake \(UT\) Tribune](#) (12/22, 339K).

BLM LOOKS TO COWS IN WAR ON INVASIVE GRASS. The [E&E](#) (12/21) reports that “cows have trampled Western rangelands for the better part of a century, gorging on native plants and making room for exotic grasses,” and now, “cheatgrass and other invasive species dominate 25 million acres of the Great Basin – an area the size of Kentucky – and are spreading to hundreds more acres each day, the Interior Department estimates.” As a result, “desperate federal land managers are turning to their old enemy to help turn the tide of invading weeds.” The BLM “wants cows to devour cheatgrass on tracts that burned in the 280,000-acre Soda Fire last August in southwest Idaho.”

BLM SEEKS PUBLIC INPUT ON SULPHUR WILD HORSE GATHER PLAN. The [St. George \(UT\) News](#) (12/21, 3K) reports that the BLM Management-Cedar City Office has “announced a 30-day public comment period beginning Monday and ending Jan. 19, 2016, for the Sulphur Wild Horse Gather Plan, which includes a proposed fence along a portion of state Route 21.”

Additional coverage was provided by the [Horse](#) (12/22, 4K).

BLM SEEKS INPUT ON LOWER DESCHUTES BOATER CHANGES. [KTVZ-TV](#) Bend, OR (12/22, 32K) reports that the BLM Prineville District Office will be “accepting comments proposed improvements to the recreational experience in Segment 3 (Buck Hollow to Macks Canyon) on the Lower Deschutes River.” The comment period ends February 1, 2016.

BLM APPROVES RESOURCE MANAGEMENT PLAN FOR PREHISTORIC TRACKWAYS NATIONAL MONUMENT. [KRWG-FM](#) Las Cruces, NM (12/22, 1K) reports that the BLM has signed a Record of Decision approving the Resource Management Plan for the Prehistoric Trackways National Monument.

BLM EXTENDS COMMENT PERIOD FOR COPPER FLAT COPPER MINE PROJECT. [KRWG-FM](#) Las Cruces, NM (12/22, 1K) reports that the BLM has “extended the public comment period another 45 days for the Draft Environmental Impact Statement (EIS) on the Copper Flat Copper Mine Project (Project).” With this extension, public comments will be accepted until March 4, 2016.

ADDITIONAL COVERAGE OF RED RIVER LAND DISPUTE. Additional coverage of the Red River land dispute in Texas was provided by the [Heartland Institute](#) (12/21, 4K).

Fish and Wildlife Service:

FWS DIRECTOR ASHE: HUNTING TROPHY PERMIT PROGRAMS TO BE HELD TO HIGHER STANDARD. [E&E Publishing](#) (12/22, 705) reports that the FWS on Monday “announced it will finalize Endangered Species Act protections for lions in Africa and India to confront growing threats from habitat loss, a declining prey base and increased killings from humans.” The decision, “which was cheered by wildlife advocacy groups, comes as lion populations have fallen by 43 percent over the past couple of decades and follows the July baiting and killing of a well-known lion named ‘Cecil’ in Zimbabwe that sparked international condemnation.”

The [Washington Post](#) (12/22, Fears, 7.78M) reports that FWS Director Dan Ashe said trophy permit programs need “to be held to a much higher standard.” The agency pledged to make sure “that all the revenue is transparent so we can be assured that these revenues aren’t contributing to some kind of corruption in the range states that distracts from management.” Ashe also said he will issue an order preventing hunters convicted of violating wildlife laws from obtaining permits. Permit fees will be raised to increase funding for Fish and Wildlife law enforcement.

For “The Blog” of the [Huffington Post](#) (12/22, Pacelle, 251K), Wayne Pacelle, President and CEO, The Humane Society of the United States, writes that “the world must get past an era of a handful of people killing the most magnificent animals in the world to adorn their trophy rooms.” He says that “these creatures have their own desires to live, and we shouldn’t snuff them out for bragging rights and a higher perch in the pantheon of the trophy-hunting world.” Pacelle is optimistic that Monday’s “announcement is, without question, a turning point for the future of the lions now roaming Africa.”

Additional coverage was provided by [The Hill](#) (12/22, Cama, 654K), [PBS NewsHour](#) (12/22, 168K), [PBS NewsHour](#) (12/22, 168K), [Reuters](#) (12/22, Farge), [NPR](#) (12/21, 1.78M), [NPR](#) (12/21, 1.78M), the [New Republic](#) (12/22, 232K), [TIME](#) (12/22, 19.1M), the [New York Times](#) (12/21, Goode, Subscription Publication, 11.64M), [US News & World Report](#) (12/21, 996K), [Fusion](#) (12/22, 280K), the [Elko \(NV\) Daily Free Press](#) (12/22, 22K), the [Boston \(MA\) Herald](#) (12/22, 629K), the [Fort Wayne \(IN\) Journal-Gazette](#) (12/22, 172K), the [Houston \(TX\) Chronicle](#) (12/22, 2.15M), the [Washington \(DC\) Times](#) (12/22, Freking, 283K), the [San Francisco \(CA\) Chronicle](#) (12/22, Subscription Publication, 3.44M), the [Toronto \(CAN\) Star](#) (12/21, 119K), the [Bristol \(VA\) Herald Courier](#) (12/22), the [Austin \(MN\) Daily Herald](#) (12/22, 21K), the [Portland \(ME\) Press Herald](#) (12/21, 158K), [The Guardian \(UK\)](#) (12/22, Milman, 3.48M), [Australian Broadcasting Corporation](#) (12/22, 104K), the [New Vision \(UGA\)](#) (12/22, 1K), the [Daily Mail](#) (12/22, Mailonline, 5.31M), the [Daily Mail](#) (12/22, 5.31M), the [Examiner](#) (12/22, 616K), the [National Geographic](#) (12/22, 31.87M), the [Discovery Channel](#) (12/22, 395K), [Vice](#) (12/22, 1.88M), [Popular Science](#) (12/22, 6.54M), the [Scientific American](#) (12/22, 3M), [Inquisitr](#) (12/21, 262K), [LiveScience](#) (12/22, 476K), the [Global Post](#) (12/21, 114K), [Townhall](#) (12/21, 127K), the [Huffington Post](#) (12/22, 251K), the [Daily Kos](#) (12/21, 391K), [Yahoo! News](#) (12/22, Sheridan, 6.43M), [Yahoo! News](#) (12/22, 6.43M), [KERO-TV Bakersfield \(CA\)](#) Bakersfield, CA (12/22, 2K), and [WCCO-AM Minneapolis \(MN\)](#) Minneapolis (12/21, 70K).

FWS PROPOSES PROTECTIONS FOR MIAMI TIGER BEETLE. [Courthouse News](#) (12/21, 7K) reports that the FWS said it is proposing the Miami tiger beetle, “once considered extinct, for protection as an endangered species.” Cindy Dohner, the FWS’ Southeast Regional Director, said, “The Miami tiger beetle is in trouble because it has only survived in increasingly rare urban pine rockland habitat. Its remaining habitat faces huge urban development pressures.”

FWS CONSIDERS DELISTING GIANT GARTER SNAKES. [The Hill](#) (12/21, Devaney, 654K) reports that the FWS is “considering weakening the protections for giant garter snakes.” The agency “listed giant garter snakes as a threatened species in 1993 but is now looking to delist the snake as part of a revised draft recovery plan.”

SCIENTISTS URGE INTERIOR DEPARTMENT, FWS TO DELIST GRAY WOLF IN MIDWESTERN STATES. The [Heartland Institute](#) (12/22, Burnett, 4K) reports 26 wildlife management professionals, including former Fish and Wildlife Service (FWS) biologists, urged Interior Department Secretary Sally Jewell and FWS director Dan Ashe in a Nov. 18 letter to delist the gray wolf from Endangered Species Act (ESA) protection in Michigan, Minnesota, and Wisconsin. The letter followed a recent federal decision restoring ESA protection to the gray wolf despite FWS and state wildlife agency objections.

BUSINESSMAN PLEADS GUILTY TO TRAFFICKING IN ELEPHANT IVORY. The [AP](#) (12/21) reports that “a South Florida businessman has pleaded guilty to trafficking in elephant ivory.” Raymond J. Reppert Jr. entered his plea in Miami federal court Monday. Reppert “faces up to 5 years in prison and \$250,000 in fines at his Feb. 25 sentencing.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (12/22, 283K).

National Park Service:

NATIONAL PARK VISITATION ON TRACK TO BREAK RECORD. The [Salt Lake \(UT\) Tribune](#) (12/22, 339K) reports that the NPS says that “its 409 units are on pace to set a new annual visitation record.” The NPS’s Public Use Statistics Office “estimated 272.5 million recreation visits to the parks through October, the latest month that complete, though unofficial statistics are available.” NPS Director Jonathan Jarvis said, “With every visit to national parks, people write themselves a prescription for the health benefits that come when enjoying these natural and historical wonders. Americans have loved the national parks for a century and more. Our aim now is to help the next generation become not only visitors but park supporters and advocates too.” The article notes that “things could even get more busy in 2016, when the park service celebrates its centennial year with a number of special events planned.”

Meanwhile, [USA Today](#) (12/21, Wright, 5.56M) reports in 2016, the NPS will celebrate its 100th anniversary. The article notes that “as part of the festivities, an initiative called ‘Find Your Park’ (Encuentra Tu Parque in Spanish) encourages Americans to explore the scenic beauty in their own backyards.”

Additional coverage of the centennial was provided by [Mongabay](#) (12/22, 6K).

“EVERY KID IN A PARK” INVITES 4TH GRADERS TO VISIT PRESIDENT CLINTON BIRTHPLACE HOME. [TXK Today \(TX\)](#) (12/22) reports that President William Jefferson Clinton Birthplace Home National Historic Site is inviting “every fourth-grade class from the region to visit and learn about the president’s childhood as part of the ‘Every Kid in a Park’ program.” Christian H. Davis, supervisory park ranger for the birthplace home in Hope, Ark., said that “all fees associated with transportation will be covered by the historic site.”

ADDITIONAL COVERAGE: EFFIGY MOUNDS NATIONAL MONUMENT SUPERINTENDENT TO PLEAD GUILTY TO STEALING REMAINS. Additional coverage that former Effigy Mounds National Monument superintendent Thomas Munson will “plead guilty to embezzlement and theft charges in connection with an accusation that he stole several ancient Native American remains from the Effigy Mound Monument federal museum in Iowa” was provided by the [Indian Country Today Media Network](#) (12/21, 47K).

BOTTLED WATER SALES BAN IN NATIONAL PARKS CRITICIZED. For “The Blog” of the [Huffington Post](#) (12/21, Goldstein, 251K), Dr. Harold Goldstein, Executive Director, California Center for Public Health Advocacy, the bottled water sales ban in national parks harms the public’s “health and well-being,” as well as the environment. He notes that “while plastic bottles filled with water are excluded in the name of environmental stewardship, plastic bottles filled with sugary drinks (sodas, sweet teas, energy drinks and the like) are still warmly embraced by park policy.” Goldstein suggests that “if we want to protect both the environment and the health of park visitors...let’s not set things up so that people who want bottled water are encouraged to buy the leading contributors to diabetes.”

US Geological Survey:

SENATE CONFIRMS NOMINATION OF KIMBALL TO BE USGS DIRECTOR. [Politico Pro](#) (12/21) reports that last Friday, the Senate confirmed Suzette Kimball to be director of the United States Geological Survey.

Additional coverage was provided by the [Greenwire](#) (12/21, Subscription Publication).

STUDY: CLIMATE CHANGE COULD CAUSE “MASSIVE” TREE DIE-OFF IN SOUTHWEST US. The [Washington Post](#) (12/22, Mooney, 7.78M) reports that a study published in Nature Climate Change found that “warming climate could trigger a ‘massive’ dieoff of coniferous trees...in the U.S. southwest sometime this century.” Nate McDowell of the Los Alamos National Laboratory led the research which included a field experiment conducted over five years that identified piñon pines and junipers as particularly vulnerable to reduced rainfall. McDowell “conducted the research along with 18 other authors from a diverse group of universities and federal agencies, including the U.S. Geological Survey.”

LAKES AROUND WORLD WARMING FASTER THAN OCEANS, REPORT SAYS. [Colorado Public Radio](#) (12/22) reports that “a survey of some lakes in Colorado – and across the world – shows they’re warming faster compared to oceans or the air around them.” According to Jill Baron, a research ecologist at the USGS, “scientists compiled data from 235 lakes, including two in Rocky Mountain National Park. Summer air and lake temperatures have been rising over the last decade in the park.” Baron, who was a co-author on the research, said, “These are some of the highest lakes in the world that were part of this study. And they’re behaving just like all the others.”

USGS TO CONDUCT LOW-LEVEL AIRBORNE TESTS IN SOUTHEAST MISSOURI. [KFVS-TV](#) Cape Girardeau, MO (12/22, 21K) reports that the USGS will be “conducting a high-resolution airborne survey in the St. Francois Mountains starting Monday, December 21.” For the next month, the USGS will be “making low-level flights in southeast Missouri regions including Iron, Madison, St. Francois and Reynolds counties.” According to the article, “the flights are being conducted so the USGS can collect information about the geology and mineral deposits of the region.”

Top National News:

OBAMA SAYS TRUMP IS “EXPLOITING” CONCERNS OF “BLUE-COLLAR MEN.” During his 37-minute year-end interview with Steve Inskeep of [NPR](#) (12/21, 1.78M), President Obama discussed many issues, including US policy on ISIL and terrorism, race in America, and climate change, but it is the President’s remarks on Donald Trump that are getting the most attention. While reports are generally straightforward accounts of Obama’s remarks, a wide array of print and online sources covered them.

The [AP](#) (12/22, Superville, 996K) reports that the President said Trump “is ‘exploiting’ the fears that working-class men in particular have about the economy and stagnant wages.” Obama said, “Particularly blue-collar men have had a lot of trouble in this new economy, where they are no longer getting the same bargain that they got when they were going to a factory and able to support their families on a single paycheck. You combine those things and it means that there is going to be potential anger, frustration, fear. Some of it justified but just misdirected. I think somebody like Mr. Trump is taking advantage of that. That’s what he’s exploiting during the course of his campaign.”

The [New York Times](#) (12/22, Davis, Subscription Publication, 11.64M) also says Obama said the national GOP frontrunner “is exploiting the resentment and anxieties of working-class men to boost his campaign” in his “most pointed response” to Trump since Trump called for a ban on Muslim entry to the US. The [Washington Post](#) (12/22, Nakamura, 7.78M) says the President “has mostly refrained from weighing in directly” on the 2016 campaign, “but his aides have disparaged Trump.”

The [Washington Times](#) (12/22, Boyer, 283K) says Obama’s “analysis was reminiscent of his comments in 2008, when he blamed economically disadvantaged voters who were ‘bitter’ and ‘cling to guns or religion’ for his poor showing among small-town Pennsylvanians” in the presidential primary there. But the [Christian Science Monitor](#) (12/21, Grier, 496K) writes that Obama “was not dismissing the worries of the voters involved,” but “was instead questioning Trump’s motives.” Still, the [New York Daily News](#) (12/22, Edelman, 3.59M) says the President “suggested that many of those anxieties, which sometimes manifest in candidates and voters alike suggesting the President is not American or not a Christian, are also tied to the fact that he is the first African-American commander-in-chief.”

[Fox News](#) (12/21, 9.42M) reports on its website that the President “used a radio interview” to accuse Trump “of ‘exploiting’ economic woes to tap into voter ‘fear’ and ‘frustration,’ in some of his most direct criticism to date” of the GOP candidate. On its website, [The Nation](#) (12/21, 367K) calls it “a broad and fascinating” interview, while [The Blaze](#) (12/21, 1.89M) says “the Drudge Report accused Obama of playing the ‘race card’ on Trump.” [BuzzFeed](#) (12/21, Nas, 10.99M), the [Daily Caller](#) (12/21, Guest, 366K), [Salon](#) (12/21, Kaufman, 868K), and the [TIME](#) (12/21, Rhodan, 19.1M) website also have reports.

Obama, DNC Attack Trump’s “Anti-Muslim Rhetoric” In Fundraising Pitch. [Politico](#) (12/21, McCaskill, 1.19M) reports that Obama and the Democratic National Committee are using Trump’s “anti-Muslim rhetoric as a fundraising pitch this holiday season. In an email signed by Obama sent to supporters, the president said he’s had his religion, birthplace and love for America questioned because of his name and background, and that he’s learned to listen closely when fear and ignorance start creeping into conversation.” Obama adds, “So I pay attention when I hear the Republican frontrunner for president call for a ban on Muslims entering this country. And when their other candidates say we should only admit Christian refugees, not Muslims, or that there should be a religious test to determine which people fleeing a war-torn country can enter ours.”

The [Washington Times](#) (12/22, Miller, 283K) writes that “campaign strategists” say Obama and Democratic frontrunner Hillary Clinton are criticizing Trump as “part of a calculated ploy by Democrats who want to help him win because they are convinced the billionaire businessman will lose in the general election.”

Trump Loses Some Black Celebrity Friends Over Comments. The [New York Times](#) (12/22, Haberman, Eder, Subscription Publication, 11.64M) reports that accusations that Trump “is using racially charged rhetoric” in his campaign has turned some of his black one-time friends, like “hip-hop mogul” Russell Simmons, against Trump. The Times says Trump “has long courted personalities from the worlds of sports and entertainment, including the boxer Mike Tyson, the former Chicago Bulls forward Dennis Rodman, and the rapper and producer Sean Combs.” Not all of them are now critics, however. “Football legend” Herschel Walker says he still considers Trump a friend.

White Supremacist Movement Using Trump To Seek New Supporters. The [Washington Post](#) (12/22, Holley, Larimer, 7.78M) “Morning Mix” blog reports that “America’s dying white supremacist movement” has latched onto Trump’s campaign. Since “in an era of gay marriage and a black president...separatists can’t exactly swan dive into conversations with strangers about the white-power cause,” they now use Trump’s remarks as a lead-in to identify potential supporters. The Post says “white supremacist groups have enthusiastically embraced” Trump.

PolitiFact Declares Trump’s “Many Campaign Misstatements” The Lie Of The Year. [McClatchy](#) (12/22, Clark,

27K) reports that PolitiFact, after realizing that the “only real contenders” for its annual “Lie Of The Year” title “were all Trump statements,” designated “the many campaign misstatements of Donald Trump” as the winner. PolitiFact “had previously given ‘Mostly False, False or Pants on Fire’ to 76 out of Trump 77 statements.”

Report: “Dozens” Of Jersey City Muslims Celebrated 9/11. The [Washington Times](#) (12/22, Chasmar, 283K) reports that “several police officers and eyewitnesses” say “dozens of Muslims celebrated the fall of the twin towers on 9/11 in at least three locations in Jersey City.” The report is “‘the first credible indication’ of people celebrating in the area on 9/11,” according to NJ.com. Trump has “claimed that ‘thousands and thousands’ of Muslims rejoiced following the attack.”

Trump Demands Apology For ISIL Claim From “Liar” Clinton. [ABC World News](#) (12/21, story 3, 2:50, Muir, 5.84M) reported that after Hillary Clinton called Trump “ISIS’ best recruiter” in the Saturday Democratic presidential debate, “claiming ISIS uses videos of Trump to recruit more radical jihadists,” Trump has demanded an apology. ABC (Karl) added, “Hillary Clinton’s campaign is saying, quote, ‘Hell no,’ she won’t apologize.” [NBC Nightly News](#) (12/21, story 4, 2:25, Holt, 7.86M) said that “after a strongly worded statement from the Clinton camp, Trump shouldn’t hold his breath.” NBC (Tur) added, “For now, intelligence says Trump is right. ISIS has not used videos [of Trump] for recruiting.”

[Reuters](#) (12/22, Wise) reports Trump said of Clinton on NBC’s Meet The Press on Sunday, “She’s a liar and everybody knows that. She just made this up in thin air.” The [AP](#) (12/22) reports Trump said Monday that “he wants an apology.” The [Washington Post](#) (12/22, Gearan, Balz, 7.78M) writes that Clinton “is biding her time out of the spotlight and under less scrutiny,” and is happy to cede the spotlight to Trump for now. The [Wall Street Journal](#) (12/22, Tau, Subscription Publication, 6.23M) says in its front-page report that Trump was mentioned nine times in the Democratic debate.

Trump: “It’s Disgusting” That Clinton Used Bathroom During Debate. The [Detroit Free Press](#) (12/22, 921K) reports Trump appeared before a crowd of about 7,500 in Grand Rapids on Monday evening in his second appearance in Michigan since entering the presidential race. [MLive \(MI\)](#) (12/22, 698K) reports that during a 65-minute speech, Trump “poked fun” at Clinton’s “late return after a bathroom break in Saturday night’s televised debate.” The [Washington Post](#) (12/22, Johnson, 7.78M) reports Trump “asked the crowd four times where Clinton had gone. ‘I know where she went – it’s disgusting, I don’t want to talk about it,’ Trump said, screwing up his face, as the crowd laughed and cheered. ‘No, it’s too disgusting. Don’t say it, it’s disgusting.’”

Trump Leads Cruz And Rubio In One-On-One Match-Ups, But Trails Clinton. [Reuters](#) (12/22, Cassella) reports that a new Reuters/Ipsos poll shows that while Trump would defeat Sen. Ted Cruz 41% to 31% in a two-way race, and would defeat Sen. Marco Rubio 40% to 34%, Trump trails Hillary Clinton in a general election match-up 40% to 29%.

While conventional wisdom has suggested that Trump’s polling support may not equate to actual caucus and primary votes, the [Los Angeles Times](#) (12/22, Lauter, 3.6M) reports that a Morning Consult analysis concludes that “some surveys may actually be understating his support” because “some significant number of Trump supporters, especially those with college educations, are ‘less likely to say that they support him when they’re talking to a live human’ than when they are in the ‘anonymous environment’ of an online survey,” according to the firm’s polling director.

In a 1,900-word [USA Today](#) (12/22, 5.56M) analysis, Rick Hampson writes that “one of the many paradoxes of Donald Trump’s presidential candidacy is that it’s dominated politics without changing how politics are practiced.” Trump’s rivals “are not aping his tactics” or his rhetoric, and are not emulating Trump’s frequent use of insults and self-praise. If he “crashes,” Trump “may be remembered only as a cautionary tale, along with failed demagogues” like Huey Long and George Wallace. Still, his “success so far would seem to make him an appealing model.” But Hampson says it would be hard for anyone else to copy “a candidate so rich, so famous, so bombastic, [and] so opportunistic.”

Trump Tweets About Miss Universe Winner Error. [USA Today](#) (12/22, Mcdermott, 5.56M) reports that after host Steve Harvey read the name of the wrong contestant as the winner of the Miss Universe pageant on Sunday night, Trump – the former owner of the pageant – retweeted two tweets that said the error would not have happened if Trump were still in charge. Trump later tweeted, “Very sad what happened last night at the Miss Universe Pageant. I sold it 6 months ago for a record price. This would never have happened!” [ABC World News](#) (12/21, story 9, 1:25, Muir, 5.84M), the [CBS Evening News](#) (12/21, story 10, 2:10, Dubois, 5.08M), and [NBC Nightly News](#) (12/21, story 10, 2:00, Holt, 7.86M) all reported on Harvey’s error, but not Trump’s comments.

Egyptian Filmmaker Makes Short Film About Trump Event. The [New York Times](#) (12/22, Mackey, Subscription Publication, 11.64M) has a brief item on Egyptian filmmaker Mohamed Abdelfattah’s [seven-minute documentary](#) on a Trump campaign event near Phoenix, while Stephen Benedict Dyson writes in [Politico Magazine](#) (12/21, Dyson) about the politics of the “Star Wars” universe, which has some wondering if Trump is a real-life embodiment of Darth Vader.

SIX US TROOPS KILLED IN TALIBAN ATTACK. [NBC Nightly News](#) (12/21, story 2, 2:20, Holt, 7.86M) reported that

six Americans were killed and two others wounded in a suicide attack near Bagram Airfield in Afghanistan. A “lone suicide bomber on a motorcycle drove into the group and detonated his vest.” Jim Miklaszewski said the attack comes as Afghan forces, “without direct US combat support,” are engaged in a “losing battle with the Taliban throughout large parts of Afghanistan.” [ABC World News](#) (12/21, story 2, 1:30, Muir, 5.84M) noted that the Taliban “immediately” claimed responsibility for the attack on Twitter.

The [CBS Evening News](#) (12/21, lead story, 1:55, Dubois, 5.08M) called the attack “tragic evidence today of the growing insurgency in Afghanistan.” Michael O’Hanlon, a national security analyst, was shown saying, “The threat remains roughly constant. The insurgency is resilient, and we have 100,000 fewer combined forces on patrol across the country.” [Reuters](#) (12/22, Harooni, Stewart) similarly reports that the attack, which came days after the Pentagon warned of the worsening situation in the country, illustrated the Taliban’s ability to strike prominent targets tied to the US-backed government.

[USA Today](#) (12/22, Zoroya, Brook, 5.56M) reports that the attack is the “largest loss of life this year for the U.S.-led coalition in Afghanistan,” according to two senior Defense officials. Defense Secretary Ash Carter said the attack “serves as a painful reminder of the dangers our troops face every day in Afghanistan.”

The [New York Times](#) (12/22, Mashal, Rosenberg, Subscription Publication, 11.64M) reports that Abdul Shakor Qudosi, the district governor of Bagram, said three Afghan police officers were also wounded by the suicide bomber. The attack came as local officials in Helmand “pleaded” with the national government for reinforcements. They say that despite Sunday efforts by NATO forces, the district of Sangin remains largely under Taliban control.

The [AP](#) (12/22, O’Donnell) reports that a US official speaking on the condition of anonymity said some of the troops killed were American, but the exact number remained unclear. Meanwhile, the AP adds that Helmand’s deputy governor Mohammad Jan Rasulyar took the “unusual step of alerting Afghan President Ashraf Ghani to the dire security situation and requesting urgent reinforcements through an open letter posted on Facebook on Sunday.” Afghan Defense Ministry spokesman Dawlat Waziri said on Monday that Afghan Army commandos and special forces arrived in Sangin “to push a counter-offensive.”

The [Washington Post](#) (12/22, Ryan, Constable, 7.78M) reports that that the attack, along with the Taliban’s capture of Sangin district, are the latest signs “of deepening violence across Afghanistan and the risks facing President Obama’s plan to leave the most intense fighting to local forces.” David Sedney, a former senior Pentagon official for Afghanistan and Pakistan who is now a senior associate at the Center for Strategic and International Studies, said, “The military strategy is failing, and the [training] construct is under-resourced and undercapable.”

The [Wall Street Journal](#) (12/22, Stancati, Totakhil, Subscription Publication, 6.23M) reports that following the attack at Bagram Airfield, three rockets landed close to Kabul’s diplomatic quarter. The Journal says there was no immediate word from officials on whether the rockets caused casualties.

The [New York Times](#) (12/22, Southall, Subscription Publication, 11.64M) reports that New York City police detective Joseph Lemm was among the six who were killed in the suicide attack. Lemm was on his third tour of duty in the Middle East, and his second tour with the National Guard in Afghanistan. NYPD Commissioner William Bratton said Lemm, a 15-year veteran of the police department, “epitomized the selflessness we can only strive for: putting his country and city first.”

The [Washington Post](#) (12/22, Jaffe, 7.78M) says that for President Obama, “the deaths Monday of six U.S. soldiers near Bagram Air Base underscores the perils of his decision to keep as many as 9,800 troops in Afghanistan through much of next year.” A statement from Obama’s press secretary said the US “condemns this cowardly attack on members of the U.S. and Afghan forces, and we remain committed to supporting the Afghan people and their government.”

GRAHAM SUSPENDS HIS PRESIDENTIAL CAMPAIGN. During a conference call with reporters on Monday and in a video posted in his campaign website, Sen. Lindsey Graham announced that he is suspending his presidential campaign. Coverage of Graham’s announcement, which includes reports on two network newscasts, focuses on what his departure will mean to the remaining GOP field, particularly as the jockey for endorsement and supporters ahead of the South Carolina primary in February.

While [McClatchy](#) (12/22, Douglas, Douglas, 27K) reports that Graham “entered the race hoping that his conservative national security credentials would appeal to voters, especially in his home state,” [NBC Nightly News](#) (12/21, story 5, 0:15, Holt, 7.86M) said Graham “was lagging behind badly in the polls including in his home state.” [ABC World News](#) (12/21, story 4, 0:20, Muir, 5.84M) reported that Graham “never polled above single digits” and was “frustrated by the two-tier debates.”

The [AP](#) (12/22, Kellman, Barrow) notes that Graham “mustered little support in the polls,” and says his exit “will not

have an immediate effect on the race in the final stretch before the Feb. 1 Iowa caucuses and the Feb. 9 New Hampshire primary.” However, his withdrawal “could produce a ripple effect in his home state,” as he will “likely be a highly sought-after endorsement for those still in the race” after the New Hampshire primary and before voters go to the polls in South Carolina on Feb. 20. Graham has “given no indication of who he would back.” [Politico](#) (12/21, Strauss, 1.19M) reported that Graham’s exit from the race “set off a scramble among his rivals to try to pick up the support of the South Carolina senator and his backers.” Graham’s “one-time challengers quickly heaped praise on him,” and “behind the scenes, teams for the various campaigns started courting the ex-candidate’s supporters.” Politico noted that while Graham “barely registered at the polls and had weak fundraising numbers, his endorsement and supporters are hot items due to the early timing of the South Carolina primary and because Graham can offer foreign policy credibility to whoever he backs.”

Editorials are highly complimentary of Graham. For example, the [Washington Post](#) (12/22, 7.78M) says in an editorial the fact that Graham has left the race while Donald Trump “seemingly soars should prompt real worry within the Republican Party, not to mention the country at large.” the Post praises Graham’s “fearlessness in confronting Mr. Trump and the serial bigotry...that has become a trademark of his unfortunate campaign,” and says that while Graham “has pledged to support the Republican nominee, whoever it is, we hope he continues to show the principled leadership that marked his failed campaign and draws the line if it comes down to Mr. Trump.”

A [USA Today](#) (12/22, 5.56M) editorial says Graham is “conservative without being a rigid ideologue,” and calls him “the kind of politician Republicans need if they’re going to thrive as the nation becomes more ethnically and racially diverse.”

In its editorial, the [Wall Street Journal](#) (12/22, Subscription Publication, 6.23M) praises Graham’s willingness to speak the truth about the fight against ISIL and reject the argument from the President, Hillary Clinton, Sen Bernie Sanders, Trump, and Sen, Ted Cruz that the group can be defeated cheaply and from the air.

Editorial Wrap-Up:

NEW YORK TIMES. “The Security Council Wakes Up On Syria.” The [New York Times](#) (12/22, Board, Subscription Publication, 11.64M) says in an editorial that the UN Security Council resolution on the plan to end the Syrian civil war “is a positive development. But it leaves unsettled crucial differences that have long plagued Syrian peacemaking efforts. And it leaves unresolved a host of tough decisions” that world and regional powers, “and Syria’s own president, Bashar al-Assad, must still make. ... Absent an end to the civil war, there can be no effective campaign to defeat the Islamic State. Yet there is still no agreement on who will represent the Syrian opposition, an array of moderate and extremist groups supported by different countries.”

“Congress Gets Out Of The I.M.F.’s Way.” The [New York Times](#) (12/22, Board, Subscription Publication, 11.64M) editorializes, “After five years of Republican foot-dragging, members of Congress last week ratified an agreement that will increase the capital of the International Monetary Fund” and give China, India, and other developing nations “a greater say in the organization. This should strengthen the fund at a time when its expertise is needed to help revive a slowing global economy.” The Times says congressional Republicans “appear to have realized that their inaction was undermining America’s leadership in the world.”

“A Step Forward For Juvenile Offenders.” The [New York Times](#) (12/22, Board, Subscription Publication, 11.64M) says in an editorial that New York Gov. Andrew Cuomo “took a bold step forward” toward juvenile justice reform this week “when he announced that his administration would seek out and pardon thousands of people who were convicted of nonviolent crimes while they were 16 or 17 years old and have stayed out of trouble with the law for a decade.”

WASHINGTON POST. “A UN Resolution On Syria Is Shattered – And Russia Is To Blame.” In an editorial, the [Washington Post](#) (12/22, 7.78M) says that less than 48 hours after the UN Security Council unanimously passed a resolution “demanding that ‘all parties immediately cease any attacks against civilians and civilian objects’ as well as ‘any indiscriminate use of weapons, including through shelling and aerial bombardment,’” in Syria, “Russian planes carried out at least six airstrikes on civilian targets” in “blatant violation of the resolution Russia had just voted for.” The Post says that the Security Council ambassadors should be “embarrassed by this outrage,” and so too should Secretary of State Kerry, “who just last Tuesday emerged from a meeting with Mr. Putin saying that the Russian ruler would ‘take on board’ Mr. Kerry’s objections to airstrikes on Syrian targets outside Islamic State-held land.”

“A Sad Goodbye To Sen. Graham.” The [Washington Post](#) (12/22, 7.78M) says in an editorial the fact that Sen. Lindsey Graham has left the race while Donald Trump “seemingly soars should prompt real worry within the Republican Party, not to mention the country at large.” the Post praises Graham’s “fearlessness in confronting Mr. Trump and the serial bigotry...that has become a trademark of his unfortunate campaign,” and says that while Graham “has pledged to support the Republican nominee, whoever it is, we hope he continues to show the principled

leadership that marked his failed campaign and draws the line if it comes down to Mr. Trump.”

“When Death Comes At The Hands Of Private Security Guards.” The [Washington Post](#) (12/22, 7.78M) editorializes that three recent deaths in Washington, DC have been linked to altercations between individuals and private security guards. The Post argues that “it will be up to police and prosecutors to determine if there was criminal culpability in any of the cases, but the fact of these three deaths in three months demands that D.C. officials take a serious look at how they regulate the private police forces that help patrol the city.” The Post questions “whether the training required and received by private security officers is sufficient,” and is encouraged that “city officials are taking the concerns seriously,” and that “the administration has promised to review its oversight.”

WALL STREET JOURNAL. “Treasury’s Latest Inversion Failure.” The [Wall Street Journal](#) (12/22, Subscription Publication, 6.23M) editorializes that Treasury Secretary Jack Lew, rather than working with Congress to rewrite US tax laws to combat the trend of US companies moving overseas, has instead responded with a series of anti-inversion notices that lack a legal foundation. The Journal says that Monday’s merger between Illinois fertilizer company CF Industries and the Dutch company OCI can be used as a demonstrate why Lew’s recent moves haven’t worked to keep US businesses from moving abroad.

“Lindsey Graham’s Truth Telling.” In an editorial, the [Wall Street Journal](#) (12/22, Subscription Publication, 6.23M) praises Sen. Lindsey Graham’s willingness to speak the truth about the fight against ISIL and reject the argument from the President, Hillary Clinton, Sen Bernie Sanders, Donald Trump, and Sen, Ted Cruz that the group can be defeated cheaply and from the air.

“The Voter Revolt In Spain.” The [Wall Street Journal](#) (12/22, Subscription Publication, 6.23M) editorializes that the political uncertainty resulting from the Spanish election will jeopardize Spain’s economic reforms, which enabled the country to emerge from a deep recession. The Journal argues that the best scenario would be for Prime Minister Mariano Rajoy to form a minority government with Ciudadanos and adopt the new party’s proposed lower corporate and personal rates and simplified tax regime, transparency measures, and reductions of bureaucracy. According to the Journal, a failure by Rajoy to form a government would reinforce the notion that austerity reforms are political suicide in Europe.

DOI in the News:

CONGRESS APPROVES SPENDING BILL. [Politico Pro](#) (12/20, Subscription Publication) reports that Congress sent the \$1.1 trillion omnibus spending bill to the White House Friday. Notably, “the bill contains no Republican riders targeting major elements of President Barack Obama’s environmental and climate agenda and legacy.” It leaves Interior Department “rules on hydraulic fracturing and stream buffer zone controls, among other high-profile initiatives.”

Conservationists Cheer Passage Of Spending Bill. [Wyoming Public Radio](#) (12/20) reports that “environmental advocates are celebrating this week after Congress passed a bipartisan spending bill that at one point included several provisions blocking conservation efforts.” The Land and Water Conservation Fund was “re-authorized to fund city parks and national park in-holdings.” The bill also “gave a 6% increase to federal land management agencies, a total of over \$32 billion.”

Additional coverage of the LWCF was provided by the [New York \(NY\) Times](#) (12/20, Conniff, Subscription Publication, 11.64M), the [Eugene \(OR\) Register-Guard](#) (12/21, 209K), the [Milwaukee \(WI\) Journal Sentinel](#) (12/20, Smith, 691K), the [Grand Forks \(ND\) Herald](#) (12/20, 102K), the [Salt Lake \(UT\) Tribune](#) (12/20, 339K), and [WMUR-TV Manchester \(NH\) Manchester, NH](#) (12/20, 190K).

Vilsack Criticizes Congress For 2016 Forest Service Wildfire Budget. The [Washington Post](#) (12/19, Rein, 7.78M) reports that Agriculture Secretary Vilsack sent a letter to Congress on Thursday venting “months of frustration” and condemning the money allotted to the US Forest Service in 2016 as “way short of addressing what he describes as a ‘catastrophic’ problem of wildfires.”

The [E&E](#) (12/18) reports that in a letter sent to Congress’ four top appropriators, Vilsack said, “I will not authorize transfers from restoration and resilience funding.” He added, “The American public can no longer afford delays to forest restoration and other critical Forest Service activities caused by annual fire transfers. If the amount Congress appropriated in FY 2016 is not sufficient to cover fire suppression costs, Congress will need to appropriate additional funding on an emergency basis.”

WSJournal Analysis: Both Parties Benefit From Ending Oil Export Ban. A 1,609-word [Wall Street Journal](#) (12/20, B3, Harder, Berthelsen, Subscription Publication, 6.23M) analysis says the lifting of the 40-year-old oil export ban was made possible because its supporters were able to convince liberal opponents that a shift in policy could be to their advantage. Republicans offered Democrats key environmental concessions to help fight global warming. The Journal also indicates that both Republicans and Democrats were eager to avoid the same political pitfalls that befell the Keystone XL Pipeline, which was opposed by environmental groups, thus making it hard for Democrats to support.

Additional Coverage. Additional coverage was provided by [Politico](#) (12/18, 1.19M), the [Arkansas Democrat Gazette](#) (12/19, 294K), [MinnPost \(MN\)](#) (12/20, 4K), the [Baton Rouge \(LA\) Advocate](#) (12/20, 70K), and [KRWG-FM Las Cruces \(NM\) Las Cruces, NM](#) (12/20, 1K).

SECRETARY JEWELL PRESSED ON TRAPPER COAL MINE PERMIT. [Politico Pro](#) (12/18) reports that Sens. Cory Gardner and Michael Bennet, Gov. John Hickenlooper, and Rep. Scott Tipton sent a letter to Interior Secretary Sally Jewell “asking her to ensure the Trapper coal mine gets its environmental assessment on time.” The mine was “caught

up in the same permitting issues that threatened the Colowyo Mine, but its owners worked out a deal with the Office of Surface Mining Reclamation and Enforcement to conduct an environmental assessment.” The Colorado officials are “calling for that assessment to be complete by an April 30 deadline.”

Additional coverage was provided by [E&E Daily](#) (12/18, Subscription Publication).

NEVADA COUNTIES UPSET OVER SAGE GROUSE DEAL. The [AP](#) (12/20, 64K) reports that Nevada counties are upset over a sage grouse deal “privately brokered” by Gov. Brian Sandoval and Interior Secretary Sally Jewell. Attorneys for White Pine, Elko, Eureka and six other Nevada counties argue “it proves that the Bureau of Land Management planning amendments the Obama administration insists are necessary to continue to keep the bird off the list of endangered species are both illegal and impractical.” According to the article, “the counties suing to void the protections lost a bid earlier this month for a temporary restraining order blocking their implementation.” However, “the case continues before U.S. District Judge Miranda Du — who since her appointment in 2012 has inherited several cases involving similar conflicts.”

Additional coverage was provided by the [Fort Collins \(CO\) Coloradoan](#) (12/19, 59K), the [Houston \(TX\) Chronicle](#) (12/20, 2.15M), the [Salt Lake \(UT\) Tribune](#) (12/20, 339K), the [Seattle \(WA\) Times](#) (12/20, 1.17M), the [Washington \(DC\) Times](#) (12/20, Sonner, 283K), the [Las Vegas \(NV\) Sun](#) (12/19, 179K), the [Raleigh \(NC\) News & Observer](#) (12/20, 356K), the [Mesquite \(NV\) Local News](#) (12/20, 16K), and [KTVZ-TV Bend \(OR\)](#) Bend, OR (12/20, 32K).

Concerns Raised Over Sage Grouse Mining Reforms. The [Salem \(OR\) Capital Press](#) (12/18, 113K) reports that the BLM and U.S. Forest Service “held public scoping meetings on Dec. 15 in Boise and Dec. 16 in Idaho Falls on a proposal to stop all new mining claims within 10 million acres of focal sage brush habitat in the West, including 3.6 million acres in Idaho.” According to the article, “members of Idaho’s mining industry are concerned that proposed federal land-use restrictions to protect sage grouse in designated habitat go too far and were developed with too little public input.” BLM officials say “the mining restrictions were key in the U.S. Fish and Service’s recent decision against listing sage grouse as an endangered species.” They add that “if such habitat protections aren’t implemented, officials say a listing could still result, extending new burdens to protect the bird to private land and impacting a broad range of activities, such as ranching.”

Meanwhile, [OneNewsNow](#) (12/19, 7K) reports that the Interior Department “continues efforts to protect the sage grouse bird, but critics say the campaign will have no impact on the species, while the amount of land involved is ‘absurd.’”

HOUSE REPUBLICANS RAISE CONCERNS ABOUT EPA’S TOXIC SPILL PROBE. The [Washington Examiner](#) (12/20, 112K) reports that House Republicans are “leveling new charges against the Environmental Protection Agency for trying to change the chain of events that led the agency to cause a massive 3 million-gallon spill of toxic sludge in Colorado that sullied the waterways of three states.” A letter from the House Natural Resources Committee sent to the EPA’s Office of Inspector General (OIG) “spells out problems with a recent addendum the agency made to its own internal investigation that contradicts official investigations by the Department of Interior and the inspector general’s office.” The letter says, “The addendum states that its new narrative is based on ‘a followup interview with the two on-scene coordinators (OSCs) most closely associated with the event. However, the circumstances surrounding this interview raise concerns about its timing, appropriateness and potential to affect the [EPA inspector general’s] investigation.”

Additional coverage was provided by the [Daily Caller](#) (12/18, Bastasch, 366K).

SECRETARY JEWELL SPEAKS AT GEO-XII PLENARY. [Earthzine](#) (11/13, Davidson, Osenga) provided an audio recording of Interior Secretary Sally Jewell “speaking at the GEO-XII Plenary in Mexico City on November 13, 2015.”

SEN. CRUZ BLOCKS BID TO PASS PUBLIC LANDS, WATER BILLS. The [E&E](#) (12/18) reports that citing “far too much federal land,” Sen. Ted Cruz last week “blocked a package of public lands and water bills from advancing on the Senate floor.” Cruz “objected to quick passage of 11 bills that passed the Energy and Natural Resources Committee with broad bipartisan support.” He said, “We do not need the federal government becoming the largest landlord in the United States.”

BILL INTRODUCED TO CREATE FRANKLIN MOUNTAINS NATIONAL MONUMENT. [KVIA-TV](#) El Paso, TX (12/20, 6K) reports that on Wednesday, Rep. Beto O’Rourke introduced a bill to create the Franklin Mountains National Monument. According to the article, “the Army is doing a remedial investigation” and “the Department of Defense would have to transfer the land to the Department of Interior for it to be added to the list of national monuments.”

In an editorial, the [El Paso \(TX\) Times](#) (12/19, 199K) urges support for the proposal.

SMITH ISLAND PROJECT TO RECEIVE FUNDING FROM RESILIENT LANDS AND WATERS INITIATIVE. The

[Everett \(WA\) Herald](#) (12/19, 139K) reports that Snohomish County is “in line to receive \$1.4 million in federal funding for its Smith Island Restoration Project, which will turn hundreds of acres of fallow agricultural land back into a salt water estuary.” According to the article, “the project is a \$24 million effort to restore former tidelands that have long been cut off from salt water by extensive diking along Union Slough.” The funds come from the Resilient Lands and Waters Initiative, a joint effort by the National Oceanic and Atmospheric Administration, the Interior Department, and the Environmental Protection Agency.

BEST IMAGES FROM INTERIOR’S INSTAGRAM ACCOUNT SHARED. The [San Francisco Chronicle](#) (12/20, Subscription Publication, 3.44M) shares 20 of the Interior Department’s “best nature photos from 2015” from its Instagram account.

OBAMA GRANTS FEDERAL EMPLOYEES 1.3% RAISE. The [Washington Post](#) (12/20, Yoder, 7.78M) reports President Obama issued an order on Friday evening granting a 1.3 percent raise to most federal employees. According to the Post, 1 percentage point “will be paid across the board and the funds for the other 0.3 percentage point will be divided and paid in varying amounts by locality.”

ADDITIONAL COVERAGE OF PARIS CLIMATE TALKS. Additional coverage of the Paris climate talks was provided by the [Arctic \(AK\) Sounder](#) (12/20, 6K).

PROTECTION URGED FOR BEARS EARS. In an op-ed for the [Arizona Republic](#) (12/20, 960K), Eric Descheenie and Alfred Lomahquahu, co-chairs of the Bears Ears Inter-Tribal Coalition, write about the importance of protecting the Bears Ears, which they describe as “a place of traditional religious significance to tribes of the southwest United States.”

Empowering Native American Communities:

TURTLE MOUNTAIN INDIAN RESERVATION JOINS LAND BUY-BACK PROGRAM. The [Columbus \(IN\) Republic](#) (12/20, 64K) reports that “the federal government says it has signed an agreement with the Turtle Mountain Band of Chippewa Indians to extend a land buy-back program to their reservation in northern North Dakota.” The agreement between the tribe and the Interior Department “paves the way for the government to buy fractionated land parcels from their multiple owners and give them to the tribe.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (12/20, 283K) and [KXMC-TV Minot \(ND\)](#) Minot, ND (12/20, 1K).

FEDERAL JUDGE THROWS OUT KANSAS LAWSUIT OVER OKLAHOMA CASINO. The [AP](#) (12/20, 283K) reports that “a federal lawsuit seeking to prevent an Oklahoma Indian tribe’s casino from expanding into Kansas was dismissed after the judge said his court doesn’t have the jurisdiction to decide the case.” In a decision announced Friday, U.S. District Judge Daniel Crabtree said “the court lacks the authority to review an advisory opinion by attorneys for the National Indian Gaming Commission that could allow casino gambling on tribal land in Cherokee County, Kansas.” The lawsuit was filed by Kansas Attorney General Derek Schmidt and the Cherokee County Commission.

Additional coverage was provided by the [Joplin \(MO\) Globe](#) (12/20, 63K) and the [Jefferson City \(MO\) News Tribune](#) (12/20, 92K).

NEW EDUCATION ACT PROVIDES HOPE FOR NATIVE AMERICAN STUDENTS. The [Princeton \(MN\) Union Eagle](#) (12/19, 89) reports that “there’s hope for the Bug School and other failing school buildings across America that are full of Native American students.” Last week, President Barack Obama signed into law the Every Student Succeeds Act, an education bill passed by Congress that replaces the No Child Left Behind Act. The bill includes an amendment “ensuring that American Indian children do not attend school in buildings that are dilapidated or deteriorating.”

COURT REJECTS TOWNS’ CHALLENGE TO ONEIDA SETTLEMENT. The [Auburn \(NY\) Citizen](#) (12/20, 53K) reports that “a midlevel New York court has rejected the challenge by two upstate townships to the 2013 agreement by the state with the Oneida Indian Nation that allows the tribe to put up to 25,000 acres of land into trust.” The Appellate Division says “the agreement didn’t violate the constitutional home rule powers of the towns of Vernon and Verona and their rights to tax, regulate and govern land within their boundaries.”

PRIOR LAKE OPPOSES SHAKOPEE TRIBE’S LAND PLANS. The [Minneapolis Star Tribune](#) (12/21, 1.15M) reports that “the Prior Lake City Council is appealing to the U.S. Bureau of Indian Affairs in a land dispute that has divided local officials and may sour the city’s relationship with the Shakopee Mdewakanton Sioux Community (SMSC).” The Shakopee tribe, “which owns and operates Mystic Lake Casino Hotel and other area businesses, has been buying land and putting it into trust — a federal designation that allows it to keep the land forever, tax-free.” The City Council

is “trying to stop that from happening, arguing that it would take land off local tax rolls and derail the city’s long-term development plans.”

OREGON TRIBE APPROVES PLAN TO SELL MARIJUANA. The [AP](#) (12/20, Wozniacka) reports the Confederated Tribes of Warm Springs has voted for “a plan to build a facility to grow marijuana on their reservation in central Oregon and sell it at tribe-owned stores outside the reservation.”

Additional coverage was provided by the [Bend \(OR\) Bulletin](#) (12/20, 94K).

TRIBAL GOVERNMENT FOR NATIVE HAWAIIANS CRITICIZED. In an op-ed for the [Wall Street Journal](#) (12/18, Akina, Subscription Publication, 6.23M), Keli’i Akina, president and CEO of the Grassroot Institute of Hawaii, criticizes the effort to create a semi-sovereign, race-based tribal government. Akina claims that the push for a tribe is supported by the elite while many Native Hawaiians oppose the idea.

[Office of Insular Affairs:](#)

SENATE TO CONSIDER BILL TO DROP AMERICAN SAMOA FLIGHT FEE. [Radio New Zealand](#) (12/20, 1K) reports that “a United States Senate committee has been assigned a bill that includes a provision to waive federal cabotage fees for domestic flights in American Samoa.” In October, the Office of Insular Affairs “submitted the proposed provision that would remove cabotage for flights between the main island of Tutuila and the Manu’a islands.”

RUM COVER-OVER EXTENDED AT RETROACTIVE HIGHER RATE. The [Virgin Islands Daily News](#) (12/20, 333) reports that Congress last Friday “extended a temporary tax measure that will keep rum tax revenues flowing to the territory’s coffers at the higher rate through the end of 2016.” According to the article, “the package of tax extenders, which keeps the territory’s rum cover-over revenue coming in at a \$13.25 per proof gallon rate instead of \$10.50, is now on its way to President Obama for a signature to become law.”

[Tackling America’s Water Challenges:](#)

DEPUTY SECRETARY CONNOR PROGRESS ON COLORADO RIVER PROBLEMS. The [Arizona Daily Star](#) (12/21, 270K) reports that “for the second time in a decade, the feds are warning that if water interests in Arizona, California and Nevada can’t find a fix for the Colorado River’s problems, the interior secretary will find it for them.” Deputy Interior Secretary Michael Connor “implied that was the department’s position in a talk Friday to hundreds of water officials, farmers and others gathered in Las Vegas for the 70th annual conference of the Colorado River Water Users Association.” Then, “after his speech, Connor came right out and said it in response to a reporter’s questions.” Connor said, “I’m optimistic at the progress that we’ve made so far, but we need to be very transparent about the risks we face and think through solutions. We feel it’s very important to stay on track and get it resolved.” Connor said that “by the time of next year’s conference, he hopes the states will have reached agreement and that his boss, Interior Secretary Sally Jewell, will come to celebrate.” But “if not, he said, he or Jewell may have to carry out ‘contingency planning’ to manage the river.”

ENVIRONMENTAL GROUP SUES OVER SPOTTED FROG PROTECTION. The [AP](#) (12/20, 2.15M) reports that “an environmental group is suing the U.S. Bureau of Reclamation over protections for the threatened Oregon spotted frog.” In a lawsuit Friday, the Center for Biological Diversity says the BOR is “operating two dams on the Deschutes River in a way that harms the frogs.” The center says “large fluctuations of the size of the dam reservoirs and flows in the river alternately flood or dry out frog habitat.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (12/18, 283K), the [Bend \(OR\) Bulletin](#) (12/20, 94K), the [Columbus \(IN\) Republic](#) (12/20, 64K), [Oregon Public Broadcasting](#) (12/20, 10K), and [KTVZ-TV Bend \(OR\)](#) Bend, OR (12/20, 32K).

BOR LOOKS TO MODERNIZE HUNGRY HORSE DAM POWER PLANT. The [AP](#) (12/18, 283K) reports that “federal officials are seeking public comment on the power plant at Hungry Horse Dam as they move forward with a proposed modernization of the plant.” The BOR, “which operates the dam and power plant, is looking for the public’s help in identifying concerns that should be addressed in an environmental assessment for the project.” The BOR is “proposing an overhaul of the power plant with major upgrades and modernization of the generating units, which have been in service since the dam opened in 1953.”

Additional coverage was provided by the [Billings \(MT\) Gazette](#) (12/20, 200K) and the [Flathead \(MT\) Beacon](#) (12/18, 15K).

ADDITIONAL COVERAGE OF KLAMATH BASIN WATER ACCORD. Additional coverage of the Klamath Basin accords was provided by the [Sacramento \(CA\) Bee](#) (12/18, 515K) and [KSL-TV](#) Salt Lake City (12/20, 464K).

Securing America's Energy Future:

Renewable Energy:

BOEM WORKING ON PROPOSED SALE NOTICE FOR OFFSHORE WIND IN MID-ATLANTIC. [WHQR-FM](#) Wilmington, NC (12/21) reports that “now that the Environmental Assessment is complete” for offshore wind in the mid-Atlantic, “the next step in the development of offshore wind is the publication of a proposed sale notice.” Environmental advocates and researchers say that “while more needs to be understood about the marine ecosystem and how to mitigate disturbance to it, offshore wind is a welcome development in the arsenal of alternative energy.” A

WORK ON BLOCK ISLAND WIND FARM ADVANCING. The [Providence \(RI\) Journal](#) (12/18, Kuffner, 316K) reports on the progress of the Block Island Wind Farm. According to the article, “if all goes smoothly, by fall 2016, five towering wind turbines arranged in a curve along the southeast coast of Block Island will be spinning away.”

Onshore Energy Development:

COURT REJECTS BID TO FAST-TRACK FRACKING RULE CASE. [EnergyWire](#) (12/18, Subscription Publication) reports that a federal judge in Wyoming last week “rejected a request from environmentalists to fast-track a dispute over the Obama administration’s hydraulic fracturing rule.” A federal judge in September issued a preliminary injunction of the rule, and “the groups in October asked the U.S. District Court for the District of Wyoming to convert that PI decision to a final judgment in the case so they could move the full litigation to the appeals court.” But Judge Scott Skavdahl rejected the request, “finding that converting the PI decision to a final judgment would prevent the industry and state challengers from reviewing the complete administrative record in the case and arguing the merits on a slew of related issues.”

COALITION URGES BLM TO BOOST PROTECTION FOR CHACO CANYON. The [Greenwire](#) (12/18, Subscription Publication) reports that “a coalition of Native American and conservation groups pressed the Obama administration in Washington, D.C., this week to shield” Chaco Canyon in New Mexico from oil and gas drilling. The BLM has “issued more than 200 oil and gas permits covering most of the basin in recent years.” According to the article, “many sites – notably the Chaco Culture National Historical Park – are legally protected, but environmentalists and Pueblo leaders object to the bright lights and noise of drilling operations creeping toward the remote canyon revered for its cultural history and pitch-black sky.”

COUNTIES SEEK ADDITIONAL TIME TO COMMENT ON BLM LEASE PLAN. The [Grand Junction \(CO\) Daily Sentinel](#) (12/20, 73K) reports that “two Western Slope counties are asking the Interior Department for additional time to comment on proposed cancellations of natural gas leases on the Thompson Divide, while two other counties are urging the agency to move ahead.” Mesa and Rio Blanco counties on Thursday asked Interior Secretary Sally Jewell “to slow down the process of considering the proposed cancellation of 18 leases and modification to 47 others on the White River National Forest.” The BLM “should have originally set a 90-day comment period, said the Mesa-Rio Blanco county letter, noting that the agency took 18 months to prepare the draft environmental impact statement.”

SCIENTISTS PRESENT NEW EVIDENCE TYING NORTH TEXAS EARTHQUAKES TO INJECTION WELLS. In a brief, the [Dallas Morning News](#) (12/20, 1.26M) reported that “scientists presented new evidence this week suggesting that all five North Texas earthquake sequences, including those in Dallas, have been triggered by humans.” Scientists “believe that high-volume injection wells...may have triggered” an earthquake that struck Venus, Texas, near Dallas, in May. However, “they have not yet worked out a specific mechanism behind the Dallas and Irving quakes.”

ADDITIONAL COVERAGE: REPORT FINDS “LEASE SUSPENSIONS” COST TAXPAYERS. Additional coverage of the report released by The Wilderness Society on lease suspensions was provided by the [Salt Lake \(UT\) Tribune](#) (12/20, 339K).

ADDITIONAL COVERAGE: FWS TO UPDATE OIL AND GAS RULES FOR WILDLIFE REFUGES. Additional coverage that the FWS is looking to “update 50-year-old regulations for oil and gas development on National Wildlife Refuge System lands” was provided by the [Summit County \(CO\) Citizens Voice](#) (12/20, 506).

PROTECTION URGED FOR ARCTIC NATIONAL WILDLIFE REFUGE’S COASTAL PLAIN. In an op-ed for the [Alaska Dispatch News](#) (12/18, 203K), Princess Daazhrai Johnson, an actress and writer and former executive director of the Gwich’in Steering Committee, and Allison Akootchook Warden, an Inupiaq artist, supports a recently introduced bill “to protect the coastal plain of Arctic National Wildlife Refuge as wilderness.” They argue that “protecting the coastal plain and our traditional way of life is a matter of basic human rights.” They conclude that “some places should remain untouched and protected from destructive drilling and development – the coastal plain is one of these places.”

Offshore Energy Development:

ANALYSIS: OPPOSITION BUILDING TO DRILLING OFF ATLANTIC COAST. The [Washington Post](#) (12/20, Warrick, 7.78M) reported that the Virginia Beach city council's decision two weeks ago to reverse its support "is the latest blow to a plan that could bring offshore drilling to the Southeast Atlantic coast as early as 2017." In recent months, "at least 93 coastal communities...have joined a revolt against a pro-drilling movement that once seemed unstoppable in the Republican-dominated South." Resistance to the drilling "appears to be growing, particularly in coastal towns where politicians and business leaders are expressing doubts about whether oil and gas can deliver the economic benefits the industry's backers claim."

Additional coverage of offshore drilling in the Atlantic was provided by the [Florida Times-Union](#) (12/18, 226K), [Natural Gas Intelligence](#) (12/20, Subscription Publication), and [Think Progress](#) (12/18, 293K).

BP: NO RESPONSIBILITY FOR DAMAGES FROM PRODUCTION MORATORIUM AFTER DEEPWATER HORIZON. The [New Orleans Times-Picayune](#) (12/17, LaRose, 661K) reports that BP asked a federal judge on Tuesday to toss out "multiple lawsuits seeking damages from the company for the months-long moratorium on drilling in the Gulf of Mexico" in the wake of the 2010 Deepwater Horizon accident. BP claimed that "the same federal law that holds the company in large part responsible for the accident that killed 11 rig workers and injured 16 more also limits its liability to damage from the actual spill." Attorneys for the company say that the shutdown had been initiated by the U.S. government, rather than by the company itself.

FLORIDA COUNTIES ADVANCING DIFFERENT PLANS FOR BP OIL SPILL FUNDS. The [AP](#) (12/21, Nelson-Gabriel, 7.78M) reports that Florida counties have different plans for funds from the Deepwater Horizon oil spill settlement. The AP describes the plans which range from "preserving bird habitat in the Everglades to boat ramps and waterfront parks in the Panhandle." Triumph Gulf Coast, a nonprofit organization, "will use settlement money to help diversify the economy of northwest Florida," while environmental groups are monitoring and spearheading projects in coordination with the National Fish and Wildlife Foundation.

ADDITIONAL COVERAGE OF HILCORP'S ARCTIC ISLAND. Additional coverage of "plans by Hilcorp Alaska LLC to build a gravel island platform in the Beaufort Sea" was provided by the [Arctic \(AK\) Sounder](#) (12/20, 6K) and the [Bristol Bay \(AK\) Times](#) (12/20, Restino, 4K).

America's Great Outdoors:

Bureau of Land Management:

SAN JUAN COUNTY COMMISSIONER LYMAN SENTENCED 10 DAYS IN JAIL FOR ATV PROTEST RIDE. The [E&E](#) (12/18) reports that San Juan County Commissioner Phil Lyman last week was "sentenced to 10 days in jail, three years of probation and a \$1,000 fine for organizing an illegal all-terrain vehicle ride through Recapture Canyon to protest what he deemed was a heavy-handed Bureau of Land Management." Lyman's co-defendant, Monte Wells, "who helped him advertise the protest, received five days in jail and three years of probation." Federal District Judge David Nuffer also "barred both men from advocating on public lands issues for three years, according to a Justice Department spokeswoman."

Additional coverage was provided by [Reuters](#) (12/20, Mcentee), the [Houston \(TX\) Chronicle](#) (12/20, 2.15M), the [Washington \(DC\) Post](#) (12/18, Press, 7.78M), the [Daily Mail](#) (12/20, 5.31M), the [Washington \(DC\) Times](#) (12/18, Mccombs, Whitehurst, 283K), [US News & World Report](#) (12/18, 996K), the [Los Angeles \(CA\) Times](#) (12/18, Press, 3.6M), [KSTU-TV Salt Lake City \(UT\)](#) Salt Lake City (12/18, 148K), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (12/20, 464K).

BLM TO USE INFRARED TO COUNT WILD BURROS AHEAD OF ROUNDUP. The [AP](#) (12/20, 2.15M) reports that "federal wildlife officials are planning to use infrared equipment to count the number of wild burros in an elusive eastern Utah herd ahead of a round-up next spring that's part of a new in-depth study of the animals." The BLM is "using the equipment to sense the animals' body heat because they tend to scatter and blend into the landscape, making them tough to count." Gus Warr, wild horse and burro specialist for the BLM in Utah, said, "It's cutting edge. We will be able to identify burros based off their heat signature. Burros are tough to identify and count because the jacks go off by themselves and the jennies and foals stick together. They blend into the background and they don't run. They'll just stand there and look at you."

Additional coverage as provided by the [Washington \(DC\) Times](#) (12/20, 283K), the [Denver \(CO\) Post](#) (12/20, Press, 825K), and the [St. George \(UT\) Spectrum](#) (12/19, 48K).

BLM HOLDS WILD HORSE ADOPTION. The [Las Vegas Review-Journal](#) (12/20, 403K) reports that four foals were

“rescued in a September roundup at Cold Creek, nearly 35 miles north of Las Vegas, according to BLM Assistant District Manager Karla Norris.” On Saturday, the BLM “hosted its second horse adoption event of the year in an effort to give the four foals a forever home.”

RIFLE, COUNTY SEEK TO ADDRESS HUBBARD MESA CONFLICTS. The [Glenwood Springs \(CO\) Post Independent](#) (12/20, 32K) reports, “County and Rifle city officials intend on requesting a meeting with the Bureau of Land Management to discuss user conflicts related to target shooting in the Hubbard Mesa area north of Rifle.” According to the article, “those officials hope to organize that meeting, and involve representatives from various user groups, prior to a series of public meetings in January dealing with the larger Roan Plateau draft Supplemental Environmental Impact Statement (SEIS) released in November.”

BLM SCHEDULES ROAN PLAN MEETINGS. The [Grand Junction \(CO\) Daily Sentinel](#) (12/21, 73K) reports that the BLM has “scheduled three public meetings in January in connection with its recently released draft management plan amendment for the Roan Plateau west of Rifle.”

ADDITIONAL COVERAGE: BLM DESIGNATES 2016 FEE-FREE DAYS. Additional coverage of the BLM’s fee-free days in 2016 was provided by the [Deseret \(UT\) News](#) (12/20, 476K).

BLM’S ROCK SPRINGS OFFICE UPDATING MANAGEMENT PLAN. In an op-ed for the [Casper \(WY\) Star-Tribune](#) (12/20, 81K), Craig Thompson writes that the Rock Springs office of the BLM is “updating its plan in a document that will guide management of the public lands for the next 15 to 20 years.” Thompson points out the importance of “hunting, fishing and tourism on these public lands,” which “contribute to the \$4.5 billion the Outdoor Industry Association estimates people spend on outdoor recreation annually in the state.” He argues participation “in the BLM planning process by attending the meetings and commenting on the proposed plan.”

SUPPORT URGED FOR SEN. HATCH’S TEST-RANGE BILL. In an op-ed for the [Salt Lake \(UT\) Tribune](#) (12/20, 339K), Brad C. Smith, Utah Superintendent of Public Instruction, and Kevin S. Carter, director of Utah School and Institutional Trust Lands Administration, write that Sen. Orrin Hatch’s “proposal to expand the Utah Test and Training Range (UTTR) will not only assist our military in testing new generations of aircraft and weapons systems.” They argue that “it will also create revenue for Utah’s public school endowment through the consolidation of school trust lands located within the UTTR.” According to the authors, “the state trust lands within the UTTR will be transferred to the federal government as part of the UTTR expansion to prevent future uses on the lands that could be incompatible with defense activities,” and “in exchange, Utah’s school trust will receive about 15 areas of federal lands elsewhere in the west desert area that are now managed by the U.S. Bureau of Land Management (BLM).”

Fish and Wildlife Service:

US TO INCLUDE AFRICAN LIONS UNDER ENDANGERED SPECIES ACT. The [Washington Post](#) (12/21, Nutt, 7.78M) reports that the FWS will announce on Monday that the African lion has been added to the endangered species list, according to officials from the International Fund for Animal Welfare and the Humane Society International. The officials believe the decision is based on a study by the International Union for the Conservation of Nature that found only 20,000-30,000 African lions remain in existence, though public outcry at the death of Cecil the lion may have had influence. The new regulation will not ban the hunting of lions in countries that permit it, but would prevent US hunters from importing trophies such as skins or heads without a permit.

The [New York Times](#) (12/21, Goode, Subscription Publication, 11.64M) also emphasizes that the move comes after years of petitioning by activist groups and new data on decreasing lion populations, though some activists point out that the killing of Cecil was a “defining moment,” spurring a ban on trophy imports in France and Britain as well as by 40 airlines. Wildlife experts say inclusion of lions under the US Endangered Species Act will likely influence international classifications of the species, moving them into Appendix 1, which would prohibit almost all international trade.

Additional coverage was provided by the [Associated Press](#) (12/21, Freking), [US News & World Report](#) (12/20, 996K), the [Minneapolis \(MN\) Star Tribune](#) (12/21, Freking, 1.15M), the [Houston \(TX\) Chronicle](#) (12/21, 2.15M), the [Washington \(DC\) Times](#) (12/21, Freking, 283K), the [Cortez \(CO\) Journal](#) (12/21, 4K), the [St. Paul \(MN\) Pioneer Press](#) (12/21, 507K), the [Salt Lake \(UT\) Tribune](#) (12/21, 339K), [ABC News](#) (12/21, 3.35M), the [Daily Mail](#) (12/21, 5.31M), and [Yahoo! News](#) (12/21, Freking, 6.43M).

FWS PROPOSES PROTECTIONS FOR MIAMI TIGER BEETLE. The [E&E](#) (12/18) reports that the FWS last week “proposed adding the Miami tiger beetle to the federal endangered species list, a move that would complicate plans to build a Wal-Mart shopping center and theme park in the bug’s sparsely vegetated, sandy home.” Cindy Dohner, FWS’s Southeast regional director, said in a statement, “The Miami tiger beetle is in trouble because it has only survived in increasingly rare urban pine rockland habitat. Its remaining habitat faces huge urban development pressures.”

NEW PRESERVE IN MISSOURI AIMS TO PROTECT ENDANGERED BATS. The [AP](#) (12/20, 2.15M) reports that “a nature preserve planned in the northeast Missouri town of Hannibal” will “serve as a protected area for tens of thousands of endangered bats.” The Sodalis Nature Preserve will be “built near the Mississippi River” and “the Canadian company Enbridge Inc., whose nearly 600-mile-long Flanagan South Pipeline passes near Hannibal, will pay for land acquisition, management and maintenance as part of a mitigation fund to offset the impact to federally endangered species and migratory birds.” The FWS, “along with The Conservation Fund and the Iowa Natural Heritage Foundation, are also partners in the project, development of which was approved Tuesday by the Hannibal City Council.”

Additional coverage was provided by the [Seattle \(WA\) Post-Intelligencer](#) (12/20, 767K), the [Washington \(DC\) Post](#) (12/20, Jim Salter |, Ap, 7.78M), the [Washington \(DC\) Times](#) (12/20, Salter, 283K), and [Yahoo! News](#) (12/20, Salter, 6.43M).

ARCHAEOLOGISTS SEEK CULTURAL EVIDENCE IN SHERBURNE NATIONAL WILDLIFE REFUGE. The [AP](#) (12/20, 2.15M) reports that an archaeological survey that started late this fall in Sherburne National Wildlife Refuge seeks to find “evidence of Native American cultures, of fur traders and farmers.” According to the article, “the survey, which is to wrap up in May at a cost of no more than \$76,850, is one element of a \$520,000, 968-acre oak savanna restoration.” The article notes that the largest restoration in the Sherburne National Wildlife Refuge’s “50-year history includes a long-planned timber harvest, which instigated the archaeological work.”

COLLABORATION KEY TO RESTORING HABITAT FOR ENDANGERED SPECIES ALONG RIO GRANDE. The [El Defensor Chieftain \(NM\)](#) (12/20, 10K) reports that “the groups involved with restoring the habitat of endangered species along the Rio Grande had plenty to celebrate at Sevilleta National Wildlife Refuge a couple of weeks ago.” Sevilleta National Wildlife Refuge Manager Kathy Granillo said “the work completed so far could not have been done without the collaborated effort of several groups.” FWS Southwest Regional Director Dr. Benjamin Tuggle said, “The Service is proud to be leading the effort to recover endangered species in the Middle Rio Grande. When Sevilleta National Wildlife Refuge received a \$297,000 Cooperative Recovery Initiative grant from the Service, we knew we could count on our partners at the New Mexico Interstate Stream Commission and the Bureau of Reclamation to work with us to help make this project a reality.”

FWS SEEK INPUT ON USE OF BIOCONTROLS AGAINST INVASIVE SPECIES. The [La Crosse \(WI\) Tribune](#) (12/20, 87K) reports that “invasive species continue to affect the Upper Mississippi River National Wildlife and Fish Refuge, and as part of its management of the refuge, the U.S. Fish and Wildlife Service plans to continue using other species to combat the invasives’ spread.” According to Tim Yager, assistant refuge manager, “use of biological control agents, or biocontrols, has been ongoing in the refuge for at least 15 years.” Now, “the compatibility determination, a kind of approval for biocontrol use, is up for renewal, and the refuge is seeking public comments as they move forward with the process.”

Additional coverage was provided by the [Winona \(MN\) Daily News](#) (12/20, 29K) and [WXOW-TV](#) LaCrosse, WI (12/19, 532).

KAGALASKA CARIBOU REMAIN AFTER SPRING ERADICATION HUNT. [Alaska Dispatch News](#) (12/19, 203K) reports that “caribou remain on Kagalaska Island, despite an eradication project in May, according to Steve Delehanty, refuge manager of the Alaska Maritime National Wildlife Refuge.” According to the article, “federal officials don’t know yet if they’ll launch another extermination effort aimed at removing the invasive animals.”

FWS REOPENS COMMENT PERIOD ON TWO CRAYFISH SPECIES. The [AP](#) (12/21, 2.15M) reports that the FWS has “reopened the public comment period on the Guyandotte River crayfish and the Big Sandy crayfish.” The FWS says “surveys found one new location of the Guyandotte River crayfish in Wyoming County and one new location of the Big Sandy crayfish in the West Virginia portion of the lower Tug Fork basin.” The reopened comment period will run until Jan. 14, 2016.

WHOOPING CRANES WINTERING AT WHEELER NATIONAL WILDLIFE REFUGE. The [AP](#) (12/20, 2.15M) reports on the whooping cranes that make the Wheeler National Wildlife Refuge “their winter home.” Lizzie Condon, the Keep Whooping Cranes Safe coordinator for the International Crane Foundation, said “there are currently at least six whoopers at the Wheeler refuge right now, with the first arrivals landing on Nov. 14.”

VENOMOUS COBRA DISCOVERED ON SHIP THAT DOCKED IN NEW JERSEY. The [Wall Street Journal](#) (12/18, King, Subscription Publication, 6.23M) reports that a venomous Indian cobra is at the Bronx Zoo after it was found aboard a ship that docked this week in Newark, N.J., zoo officials said. The crew of the MV Maersk Sana discovered the snake while at sea and sent a photo of it to the FWS office in New Jersey, officials said. The FWS identified it as an Indian cobra and asked the Bronx Zoo for help, said Kevin Torregrosa, the zoo’s collections manager in herpetology.

Additional coverage was provided by [Inquisitr](#) (12/20, 262K), and [Canada Journal](#) (12/20).

ADDITIONAL COVERAGE: FWS COULD REMOVE PROTECTIONS FOR YELLOWSTONE GRIZZLY. Additional coverage of the contention over the possible removal of protections for Yellowstone grizzly bears was provided by [CounterPunch](#) (12/18, 17K), the [Missoulian \(MT\)](#) (12/21, 118K), the [Bozeman \(MT\) Daily Chronicle](#) (12/20, 54K), the [Powell \(WY\) Tribune](#) (12/20, 13K), [Global Animal](#) (12/18, 3K), and [Big Horn Radio Network](#) (12/20).

UTAH WILDLIFE BOARD'S ANTI-WOLF STANCE CRITICIZED. In an op-ed for the [Salt Lake \(UT\) Tribune](#) (12/20, 339K), Kirk Robinson, Ph.D., executive director of Western Wildlife Conservancy, and Allison Jones, MS, executive director of Wild Utah Project, write that the Utah Wildlife Board recently sent a letter to Interior Secretary Sally Jewell, "protesting in advance any plans to include parts of Utah in the recovery area for the highly endangered lobo (there are only 110 in the wild, all descended from just seven founders)." But they argue that "contrary to the board's assertion, the Endangered Species Act and supplementary law clearly provide that recovery areas with the best remaining habitat, even outside a species' assumed historic range, can be established (16 USC 532(5))." Moreover, they say that "scientific studies support a lobo recovery area extending into Utah because that ecological niche is currently vacant and because there is evidence from wolf remains and DNA showing that lobos once occupied it."

National Park Service:

NPS DIRECTOR JARVIS INTERVIEWED. [National Geographic](#) (12/18, 31.87M) reports that as the NPS "prepares to celebrate the centennial of its founding," NPS Director Jarvis shared "his favorite park units, the ups and downs of the job, his hopes for the next 100 years, and more." Asked about his legacy, Jarvis said: "I'll leave that up to the historians, but I hope people will look back on this period at some point in the future and say, 'They didn't waste the opportunity of the centennial'—that the NPS used it smartly to build a relationship with the American people that then translated into the kind of political, monetary, volunteerism, and visitation support the parks will need for decades to come."

Mount Rushmore National Memorial Hosting Rose Parade Viewing. The [AP](#) (12/20, 283K) reports that Mount Rushmore National Memorial is "hosting a viewing party of the annual Rose Parade on New Year's Day." The theme of the parade in Pasadena, California, is "Find Your Adventure" and it "plans to shine light on the centennial celebration of the National Park Service."

Additional Coverage. Additional coverage of the Centennial was provided by the [Oregonian](#) (12/20, 769K) and the [Hagerstown \(MD\) Herald-Mail Media](#) (12/20, 12K).

SEN. BOXER SEEKS HISTORIC DESIGNATION FOR TULE LAKE CAMP. [E&E Daily](#) (12/18, Subscription Publication) reports that Sen. Barbara Boxer last week "introduced legislation that would require the National Park Service to separately manage a site in Northern California where nearly 19,000 Japanese-Americans were held during the World War II." The Tule Lake camp is already a unit of the NPS' World War II Valor in the Pacific National Monument, but Boxer thinks Tule Lake, "which was the largest internment camp during the war, should not be honored along with the USS Arizona Memorial at Pearl Harbor and other battlefields included in the valor monument." She said in a statement, "This legislation will give Tule Lake the national recognition it deserves, while honoring the tens of thousands of Japanese-Americans who were forcibly relocated and incarcerated in one of our country's darkest moments."

Additional coverage was provided by [The Hill](#) (12/20, 654K).

Project Explores Japanese Internment Camps In New Mexico. The [Albuquerque \(NM\) Journal](#) (12/20, 263K) reports on the Japanese-American Citizens League project "Confinement in the Land of Enchantment: Japanese Americans In New Mexico During WWII." The project "explores the New Mexico prison camps in Lordsburg, Santa Fe, Fort Stanton and Old Raton Ranch, which held Japanese-Americans during WWII."

HANFORD SITE TO BECOME NATIONAL PARK. The [AP](#) (12/21, Geranios) reports on the opening of development of the Manhattan Project National Historic Park's Hanford site which "thousands of people are expected next year to tour." The main attractions will be B Reactor and "along with the ghost towns of Hanford and White Bluffs, which were evacuated by the government to make room for the Manhattan Project."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (12/20, 2.15M), the [Washington \(DC\) Times](#) (12/20, Geranios, 283K), [CBS News](#) (12/20, 4.1M), [The Guardian \(UK\)](#) (12/20, 3.48M), the [Japan Times](#) (12/21, 5K), [KGTU-TV San Diego \(CA\)](#) San Diego (12/20, 69K), and [WSPA-TV Greenville \(SC\)](#) Greenville, SC (12/20, 29K).

NPS TO STUDY POSSIBLE INCLUSION OF MILL SPRINGS. The [Somerset \(KY\) Commonwealth Journal](#) (12/20, 26K) reports that the NPS is "embarking on a two-year study to determine if the Mill Springs Civil War battlefield

spanning between Nancy and Mill Springs in Wayne County should be included in the national park system.” Justin Henderson, project manager for the NPS, explained, “At the conclusion of the special resource study process, the National Park Service through the Secretary of the Interior will submit its findings to Congress. Congress will then determine whether Mill Springs Battlefield should be added to the national park system. Only Congress has the authority to designate a new unit of the National Park Service.”

CUYAHOGA VALLEY NATIONAL PARK TO CULL DEER WITH SHARPSHOOTERS. The [Cleveland Plain Dealer](#) (12/20, 1.07M) reports that the Cuyahoga Valley National Park “next year will join a growing list of public entities that have turned to lethal deer culling to control unnaturally large populations.” The national park wants “to take 350 deer a year for the next four years.”

GLACIER NATIONAL PARK PROPOSES NEW EMPLOYEE HOUSING. The [Missoulian \(MT\)](#) (12/20, 118K) reports that “a duplex, four-plex and eight-plex would be built in developed areas inside Glacier National Park under a plan to address a housing shortage for National Park Service seasonal employees on the east side of the park.” Glacier spokeswoman Denise Germann said “the proposal is to construct a two-story eight-plex and one-story four-plex in the Swiftcurrent housing area at Many Glacier, next to the Swiftcurrent Ranger Station Historic District.” Public comment for the project will be accepted through Jan. 19.

NPS RENOVATING WILLIAM JOHNSON HOUSE. The [Natchez \(MS\) Democrat](#) (12/21, 26K) reports that “work is under way at a downtown historic house in preparation for the installation of new exhibits that will help tell a new piece of a story in Natchez’s history.” The NPS’ William Johnson House on State Street is “receiving masonry and plaster repairs as well as the replacement of historic wood shingle roofs on the McCallum House side of the museum.” Also, the site’s heating and air-conditioning system is “being upgraded to a more energy efficient system.”

NEW SUPERINTENDENT FOR SAN JUAN ISLAND ANNOUNCED. The [Journal of the San Juan Islands \(WA\)](#) (12/20) reports that Elexis Fredy has been “selected as the new superintendent at San Juan Island National Historical Park in Washington state.” Fredy “replaces Lee Taylor who left earlier this year to become deputy superintendent of Olympic National Park.” She begins her new role on Feb. 7.

HALEAKALA NATIONAL PARK SETS ASIDE COMMERCIAL-FREE DAY. The [AP](#) (12/20, 2.15M) reports that Haleakala National Park will be “closed to commercial tours Tuesday so that Native Hawaiians can use the area to practice cultural traditions.” According to the article, “the park will be open to visitors who pay regular park fees on a day set aside as part of the Commercial Services Plan at Haleakala.”

BIRD COUNT SCHEDULED AT THEODORE ROOSEVELT NATIONAL PARK. The [AP](#) (12/20, 283K) reports that Theodore Roosevelt National Park is “inviting volunteers to participate in the annual nationwide Audubon Christmas bird count.” According to the article, “the count scheduled Sunday is in its 116th year and is the world’s longest-running citizen science event.”

NPS SEEKS THIRD EXTENSION ON HOT SPRINGS CONTRACT. The [Hot Springs \(AR\) Sentinel-Record](#) (12/18, 34K) reports that the NPS, “in hopes of awarding a new concessions contract in early 2016, wants to extend its current agreement with the Hot Springs Advertising and Promotion Commission for the third year in a row.”

EL TOVAR AT GRAND CANYON TO UNDERGO MAJOR RENOVATIONS IN 2017. The [AP](#) (12/20, 2.15M) reports that “a landmark hotel at the South Rim of the Grand Canyon will close for a few months in 2017 for a major renovation.” According to the article, “crews will replace carpet, paint guest rooms, upgrade electrical and plumbing systems, refinishing wood flooring and make other improvements at El Tovar.” The project will “last from January 2017 until mid-April that year during the slow season.”

Additional coverage was provided by the [Albuquerque \(NM\) Journal](#) (12/20, 263K), [Washington \(DC\) Post](#) (12/18, Press, 7.78M), the [Washington \(DC\) Times](#) (12/18, 283K), and [Skift](#) (12/19).

ADDITIONAL COVERAGE: MOUNTAIN LION KITTEN SPOTTED NEAR LOS ANGELES. Additional coverage of the mountain lion kitten spotted in the hills around Los Angeles was provided by [The Guardian \(UK\)](#) (12/20, Walters, 3.48M) and the [Los Angeles \(CA\) LAist](#) (12/20, 135K).

ADDITIONAL COVERAGE: UAV OPERATOR ISSUED CITATION NEAR WASHINGTON MONUMENT. Additional coverage that a man who was flying a drone near the Washington Monument was cited was provided by the [AP](#) (12/20, 2.15M).

US Geological Survey:

CHEROKEE NATION TECHNOLOGIES HELPS USGS THROUGH NEW \$30 MILLION CONTRACT. The [Bartlesville \(OK\) Examiner-Enterprise](#) (12/20, 602) reports that Cherokee Nation Technologies is “providing scientific and

technical support to the United States Geological Survey in an effort to better understand the nation's biological resources." According to the article, "the \$30 million contract aids the USGS in developing and disseminating research-based information." Greg Kilkenny, president of Federal Solutions for Cherokee Nation Businesses, said, "The more we understand the species, habitats and ecosystems within our nation, the better we can support effective, collaborative decision-making. We are thankful for the opportunity to continue working with USGS and support such an imperative effort."

Top National News:

RYAN: REPUBLICANS GOT AS MUCH AS THEY COULD IN SPENDING DEAL. Media reports this morning cast House Speaker Ryan's comments on [NBC's Meet the Press](#) on Sunday as a spirited defense of the compromise spending legislation passed by Congress and signed by the President on Friday. Ryan argued that given the process that was in place when he assumed the speakership, he was able to "make the best of this process" and "get good wins for conservatives" including lifting the oil export ban, limiting the IRS so it "can't meddle in politics," and "more pro-life riders." Under the headline, "Paul Ryan Defends Compromise In Passing Spending Deal," the [New York Times](#) (12/21, A19, Fandos, Subscription Publication, 11.64M) quotes Ryan as saying, "We fought for as much as we could get. ... We advanced our priorities and principles. Not every single one of them, but many of them. And then we're going to pick up next year and pick up where we left off and keep going for more." Ryan "also said he would make a priority of restoring a 'more orderly appropriations' process in 2016" and said he would sit down with the President early next year "to try and 'find common ground without compromising principles.'"

The [Milwaukee Journal Sentinel](#) (12/21, Spicuzza, 691K) similarly headlines its story, "Paul Ryan Defends Compromise In Passing Spending Deal," and says he is "dismissing criticism from conservatives" over the bill. Ryan noted that "this is divided government. And in divided government you don't get everything you want. So we fought for as much as we could get." The [Washington Times](#) (12/21, Howell, 283K) reports that Ryan said the deal "to fund the government and solidify hundreds of billions of dollars of tax relief was a 'cake already baked' before he stepped into leadership, but that he made the best of it and seized key GOP wins that set the table for a productive 2016." Ryan also defended the tax break package, "rejecting critics who say it increases the deficit in a massive give-away to special interests."

In a separate analysis, the [Washington Times](#) (12/21, Dinan, Howell, 283K) says that while some conservatives "found plenty to dislike in the bill, saying it missed chances to reel in Mr. Obama," Ryan convinced his members that "while the deal fell short of everything he wanted, it won some permanent victories, including tax breaks and lifting a 40-year-old ban on exporting crude oil, while Democrats won only temporary victories in boosting spending or preventing Republicans from reining in Mr. Obama's executive actions." On its website, [MSNBC](#) (12/20, 733K) noted that conservative pundits like Mark Levin and Laura Ingraham "blasted the deal, saying that Ryan failed to leverage the must-pass spending bill to nix funding for Planned Parenthood or limit the entry of Syrian refugees," but, like other reports, said he is "dismissing conservative criticism." Ryan told NBC, "No matter what you do in this job you're going to get criticized. ... The question is are you focusing on your goals? Are you keeping your principles intact? Are you advancing ideas that make a difference in people's lives?"

In a column for [Bloomberg News](#) (12/20, Hunt, 3.4M), Al Hunt says Ryan "has experienced the easy part; big challenges loom." While "the right-wing agenda for the past several elections was to repeal and replace Obamacare; slash spending; cut tax rates; block President Obama's executive actions liberalizing immigration and strengthening environmental rules; and, more recently, defund Planned Parenthood and stop Syrian refugees from entering the country," none of those priorities are in the omnibus bill, and "when the current funding expires next September, in the midst of the general election, these right-wing politicians are less likely to give passes."

Ryan Coy About Seeking A Second Term As Speaker. [The Hill](#) (12/20, Richardson, 654K) said that during his interview on "Meet the Press," Ryan "refused to say...whether he wants to run for a second term as Speaker." While Ryan said "he had been enjoying the position, which party leaders had to pressure him into taking in October, 'more than I thought I would,'" he said he "wasn't thinking about staying on after 2016." [Politico](#) (12/20, Warmbrodt, 1.19M) reported that host Chuck Todd asked Ryan twice "whether he would want to remain speaker after 2016," to which Ryan replied, "I just haven't been thinking about it. ... I stepped into the breach, stepped up when I had a duty and an obligation to do so. I'm excited about the potential. I'm excited about the opportunity. I feel blessed and honored to have this position."

Hunt: "Prominent Republicans" Eye Ryan For 2016 Presidential Nomination. Hunt also noted in his [Bloomberg News](#) (12/20, Hunt, 3.4M) column that Ryan's name is being mentioned by "prominent Republicans" who "look at the chaotic presidential race and contemplate a possible deadlocked result." Ryan "doesn't carry the baggage of the other name that keeps coming up, Mitt Romney, and would be a fresher contrast to Hillary Clinton." While the Ryan camp "knows this is a long shot," it is "preparing to respond if the idea gains currency."

McConnell: Congress Trying To Make Progress Despite Divisions. On [CNN's State Of The Union](#) (12/20, Tapper, 420K), Senate Majority Leader McConnell was asked about Congress' growing unpopularity. He said, "We were elected to try to do a job for the American people. We know we have divided government. There are plenty of things we disagree with the President on. ... We're in the process of putting an Obamacare repeal on his desk. We've already put on his desk through the Congressional Review Act efforts to repeal some of his onerous regulations on existing power plants and new power plants, and this ridiculous regulation called Waters of the US that would declare every puddle in America subject to EPA regulation. So the things that we differ on we will talk about, but we want to make some progress in the meantime."

The [Wall Street Journal](#) (12/21, A5, Hughes, Subscription Publication, 6.23M) reports that after reaching compromise on key issues this year, GOP congressional leaders are setting the bar lower for 2016, and laying down markers on issues like national security on which the parties can distinguish themselves from each other going into an election that will decide the presidency and control of the Senate. McConnell has said he will seek agreement where he can, but stressed the Senate agenda will be driven in part by the political needs of his members. Ryan similarly stressed the need to show the differences between the parties, telling NBC that "we're going to have one heck of a contrast in 2016."

AP Analysis: Opponents May Have More Success Chipping Away At ACA. An [AP](#) (12/21, Alonso-Zaldivar) analysis says "one lesson" from the budget deal is that Republican opponents of the ACA "may be able to get more by chipping away at it than trying to take the whole thing down at once." Noting that the spending bill "delayed a widely criticized tax on high-cost employer health insurance plans" and "temporarily suspended two taxes on industry already being collected," the AP says that unlike "frontal attacks on 'Obamacare' that have repeatedly failed, this tactic could well succeed" as "delays and suspensions have a way of becoming permanent."

Lobbyists Successfully Pushed To Preserve Tax Loophole. The [New York Times](#) (12/21, Lipton, Moyer, Subscription Publication, 11.64M) reports that as congressional leaders were crafting the tax and spending bills, "lobbyists swooped in to add 54 words that temporarily preserved a loophole sought by the hotel, restaurant and gambling industries, along with billionaire Wall Street investors, that allowed them to put real estate in trusts and avoid taxes." The changes, "and the enormous windfall they generated, show the power of connected corporate lobbyists to alter a huge bill that is being put together with little time for lawmakers to consider," and "there were thousands of other add-ons and hard to decipher tax changes" throughout the legislation. The Times notes that "executives at companies with the most at stake are also big campaign donors."

CLINTON FOCUSES ON TRUMP IN DEMOCRATIC PRESIDENTIAL DEBATE. All three broadcast networks reported Sunday evening on the Saturday night Democratic presidential debate, saying that even in a debate where he did not appear, Republican Donald Trump was a major topic. [ABC World News](#) (12/20, lead story, 2:45, Llamas, 5.84M) reported that Democrat Hillary Clinton drew "the most fire over what she said about Donald Trump helping ISIS recruit terrorists."

Attachments: 12.18.15.docx

Good evening,

This week's Congressional Affairs Update - and the final one for 2015 - is attached.

Today, Congress passed an omnibus spending package for the remainder of FY 2016, which the President signed into law. The omnibus includes \$1.5 billion for the Service, an increase of \$69 million. A number of harmful riders that were proposed and included in previous legislation are not included in the final legislation.

Congress heads out on recess for the winter break. Our next Congressional Affairs Update will be sent out early January when Congress returns.

Have a very happy holiday,

Angela

DOI in the News:

REP. BISHOP VOWS TO CONTINUE PUSH TO OVERHAUL LWCF. [Politico Pro](#) (12/17, Subscription Publication) reports that House Natural Resources Chairman Rob Bishop “claimed partial victory over two reforms to the Land and Water Conservation Fund included in the year-end omnibus spending bill.” However, Bishop “vowed that his push for a full overhaul would continue and stopped short of endorsing the overall \$1.1 trillion spending bill.” According to the article, “while the three-year LWCF reauthorization in this week’s bipartisan spending pact goes beyond” Bishop’s preferred “time frame, it also prohibits the program from invoking eminent domain and raises the share that state-level programs must receive from LWCF’s annual pot of money – two of Bishop’s top priorities.”

[E&E Publishing](#) (12/17, 705) reports that Bishop said, “Those are two major reforms. Even though we could have done better, we should do better, and we’re still going to look at this thing, because that other 50 percent on the state programs, let’s face it, if you’re just buying more land and you can’t maintain what you’ve already got, there’s something wrong in the system in the first place.”

Additional coverage of the reauthorization of the LWCF was provided by the [Spokane \(WA\) Spokesman-Review](#) (12/17, 174K), the [East Oregonian](#) (12/16, 24K), the [Seattle Post-Intelligencer](#) (12/16, 767K), the [Grand Junction \(CO\) Daily Sentinel](#) (12/18, 73K), the [Bozeman \(MT\) Daily Chronicle](#) (12/18, 54K), the [Asheville \(NC\) Citizen-Times](#) (12/16, 127K), the [Salt Lake \(UT\) Tribune](#) (12/18, 339K), [Public News Service](#) (12/17, 306).

Omnibus Report Seeks To Shape Public Land Policies. The [E&E](#) (12/17) reports that “while Congress’ \$1.15 trillion funding deal is mostly bereft of environmental policy riders, the bill’s report language seeks to shape numerous Obama administration policies affecting public lands, wildlife and energy issues.” According to the article, “the 109-page report for the section of the spending bill affecting the Interior Department and Forest Service offers a litany of concerns over programs ranging from energy royalties to bottled water sales at national parks.”

Spending Package Provides Funding Boost To Prevent “Fire Borrowing.” [E&E Daily](#) (12/17, Subscription Publication) reports that “while Congress’s fiscal 2016 spending package provides no long-term funding overhauls for wildfire, it does provide a one-time boost in suppression cash to prevent the disruptive practice of ‘fire borrowing.’” According to the article, “the package would provide \$2.1 billion for wildfire suppression, nearly \$600 million above what the government has spent annually, on average, battling fires over the past decade.”

Additional coverage was provided by the [Associated Press](#) (12/18, Gruver), the [Houston \(TX\) Chronicle](#) (12/18, 2.15M), the [Washington \(DC\) Times](#) (12/18, Gruver, 283K), the [Eugene \(OR\) Register-Guard](#) (12/18, 209K), the [Bend \(OR\) Bulletin](#) (12/18, 94K), the [Colorado Springs \(CO\) Gazette](#) (12/18, 150K), [Yahoo! News](#) (12/18, Gruver, 6.43M), [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (12/18, 464K), and [KOMO-TV Seattle \(WA\)](#) Seattle (12/18, 324K).

NPS Directed To Provide Report On Bottled Water Ban. [The Hill](#) (12/18, Wheeler, 654K) reports that the NPS will “be required to provide a report justifying a ban on bottled water at 19 parks around the country, under a provision included in the massive 1.8 trillion year-end fiscal deal in Congress.” According to the article, “the language, included in the conference committee’s report on the appropriations bill, falls short of the bottled water industry’s push for an end to the ban.” Rep. Keith Rothfus said, “We’ve preserved the issue. If the park service cannot provide the justification for a policy that seems to have no real benefit and is an inconvenience for families, we’ll be back.”

Additional coverage was provided by the [Washington Post](#) (12/17, Rein, 7.78M).

Spending Bill Bars Official Portraits. The [E&E](#) (12/17) reports that the \$1.15 trillion omnibus spending bill would “bar the federal government from footing the bill for official portraits.” According to the article, “language tucked into the fiscal 2016 package would ban federal spending on portraits of Obama administration officials as high up as the president, as well as members of Congress.” Notably, a spokeswoman for the Interior Department said “a portrait of Secretary Sally Jewell has not been commissioned at this time.”

Language On Sage Grouse Welcomed. In an editorial, the [Las Vegas Review-Journal](#) (12/18, 403K) welcomes “language that prohibits the federal government from listing the sage grouse as an endangered species while nearly quadrupling Bureau of Land Management spending on habitat conservation.” The paper argues that “the government’s current sage grouse preservation plan remains unnecessarily burdensome to states and industry trying to put public lands to economically productive use, but the omnibus bill ensures it can’t get worse — and that the Interior Department can’t retaliate against Nevada for suing over the provisions of that preservation plan.”

Advocates Says Endangered Species Have Become “Congressional Poker Chips.” Noah Greenwald, endangered species program director, Center for Biological Diversity, writes at the [Huffington Post](#) (12/18, Greenwald, 251K) that “it seems nothing short of a holiday miracle that gray wolves...have been spared from the annual year-end political games in Congress that routinely transform our federal budgeting process into a corporate wish-list where everything from endangered species to perks for the oil and gas industry are traded like so many plastic poker chips.” However, he says that “wolves continue to face the prospect of being stripped of their federal protections.” Greenwald concludes that “there’s much work left to be done, both to protect our most imperiled wildlife and to wrest our

government back from the pay-to-play special interest groups – from the livestock industry to the oil and gas polluters – who are doing everything in their power to push science and the will of the majority of Americans from the halls of Congress.”

Additional Coverage. Additional coverage of the spending bill was provided by [McClatchy](#) (12/18, 27K), the [Washington \(DC\) Post](#) (12/18, Phillips, 7.78M), the [Washington \(DC\) Post](#) (12/18, Depillis, 7.78M), [Bloomberg BNA](#) (12/18, Schultz, 7K), [Reuters](#) (12/18, Gardner, Cornwell), the [Emmett \(ID\) Messenger-Index](#) (12/18, 22K), the [Minneapolis \(MN\) Star Tribune](#) (12/18, Taylor, 1.15M), the [Spartanburg \(SC\) Herald-Journal](#) (12/17, 123K), the [San Francisco \(CA\) Chronicle](#) (12/18, Subscription Publication, 3.44M), the [High Country \(CO\) News](#) (12/18, 74K), the [Houston \(TX\) Chronicle](#) (12/18), the [Seattle \(WA\) Times](#) (12/18, 1.17M), the [Washington \(DC\) Post](#) (12/18, Andrew Taylor |, Ap, 7.78M), the [Will County \(IL\) Herald News](#) (12/17), the [Daily Mail](#) (12/18, 5.31M), the [Flathead \(MT\) Beacon](#) (12/17, 15K), the [Los Alamos \(NM\) Daily Post](#) (12/18), the [Palm Springs \(CA\) Desert Sun](#) (12/17, 98K), the [Tri-City Herald \(WA\)](#) (12/18, 100K), the [Idaho Statesman](#) (12/18, 218K), and the [Great Falls \(MT\) Tribune](#) (12/17, 76K).

ADDITIONAL COVERAGE: INTERIOR ANNOUNCES NATURAL RESOURCE INVESTMENT CENTER. Additional coverage of the new Natural Resource Investment Center was provided by [Wisconsin Business](#) (12/18), [BizTimes Milwaukee \(WI\)](#) (12/17, 43K), [WaterOnline](#) (12/18), [AmmoLand](#) (12/18, 7K), [Sustainable Brands](#) (12/18), [Fast Company Exist](#) (12/18, 22K), and the [Huffington Post](#) (12/18, 251K).

ADDITIONAL COVERAGE: INTERIOR RELEASES BEST PHOTOS OF 2015. Additional coverage of the Interior Department’s best photos of 2015 was provided by the [Daily Mirror \(UK\)](#) (12/18, 798K).

ADDITIONAL COVERAGE: COALITION OF TRIBES PROPOSES BEARS EARS NATIONAL MONUMENT. Additional coverage that a coalition of American Indian tribes is pushing for the designation of the Bears Ears National Monument was provided by [Colorado Public Radio](#) (12/18).

EUREKA COUNT OBJECTS TO NEVADA GOVERNOR’S GROUSE DEAL. The Eureka County Natural Resources Advisory Commission writes at the [Elko \(NV\) Daily Free Press](#) (12/18, 22K) that they joined eight other affected Nevada counties in filing a legal challenge to the Greater Sage-Grouse Land Use Plan Amendment. However, immediately after the Attorney General joined the suit on behalf of the State, Governor Sandoval’s Office issued a press release claiming “litigation at this juncture threatens to compromise future collaborative efforts” and “a lawsuit now will chill ongoing discussions between the state and Department of Interior...by pursuing litigation now, the Attorney General is acting in his personal capacity and does not represent the State of Nevada, the Governor, or any state agencies.” The Commission concludes that urging “Sandoval to be much more transparent in his efforts to correct the LUPA, engage in principled discussions with Nevada counties and public land users in a common path forward, and change his direction by supporting the Nevada legal challenge.”

Empowering Native American Communities:

NEW YORK COURT REJECTS TOWNS’ CHALLENGE TO ONEIDA SETTLEMENT. The [AP](#) (12/18, 2.15M) reports that “a midlevel New York court has rejected the challenge by two upstate townships to the 2013 agreement by the state with the Oneida Indian Nation that allows the tribe to put up to 25,000 acres of land into trust.” The Appellate Division says “the agreement didn’t violate the constitutional home rule powers of the towns of Vernon and Verona and their rights to tax, regulate and govern land within their boundaries.” The court says “the negative town consequences didn’t result from the agreement or subsequent state legislation, but from the U.S. Interior Department decision to place the lands in trust.”

ADDITIONAL COVERAGE: PILOT PROGRAM WILL EQUIP LAW ENFORCEMENT ON TRIBAL LANDS WITH NALOXONE. Additional coverage of the pilot program announced Wednesday to prevent overdoses on tribal lands was provided by [Indian Country Today Media Network](#) (12/17, 47K), [Fox News](#) (12/17, 9.42M), the [Oklahoman](#) (12/17, Cosgrove, 470K), the [Fort Smith \(AR\) Times Record](#) (12/18, 106K), and the [Sioux Falls \(SD\) Argus Leader](#) (12/17, 173K).

Office of Insular Affairs:

SURVEY DETAILS HEALTH CARE ISSUES IN VIRGIN ISLANDS. The [Virgin Islands Consortium \(VIR\)](#) (12/18) reports that “representatives from a cross section of government, non-profit, and healthcare agencies filled the small conference room at the St. Thomas East End Medical Center Corporation (STEEMCC) on Wednesday to receive the long-awaited results from a comprehensive healthcare needs assessment that began in April 2015.” Researchers from the University of the Virgin Islands Caribbean Exploratory Research Center (CERC) of Excellence announced “the findings from surveying a broad spectrum of health related issues of approximately 600 adults and students on the east end of St. Thomas.” According to the article, “the outcomes reflected a community in need of health literacy and

radical change in the delivery of healthcare.” The final report will be delivered to the US Department of Interior, VI Governor’s office, the Department of Health, Frederiksted Health Care, Inc., federal partners and stakeholders.

Tackling America’s Water Challenges:

COLORADO OFFICIAL WHO CLASHED WITH EPA OVER GOLD KING MINE SPILL RESIGNS. The [AP](#) (12/18, Press, 1.15M) reports that “Colorado’s top environmental official is stepping down, months after he clashed with federal authorities over a massive spill of toxic wastewater from an inactive mine in southwest Colorado.” Mike King’s resignation was announced Thursday and takes effect Dec. 31. According to the article, “his departure comes on the heels of the resignation of Hickenlooper’s lieutenant governor and appears part of the regular string of exits of veteran officials as the administration moves into its final years.”

Additional coverage was provided by [ABC News](#) (12/18, 3.35M), the [Albuquerque \(NM\) Journal](#) (12/18, 263K), the [Daily Mail](#) (12/18, 5.31M), the [Lincoln \(NE\) Journal Star](#) (12/18, 283K), the [Durango \(CO\) Herald](#) (12/17, 31K), and the [Washington \(DC\) Post](#) (12/18, Press, 7.78M). Additional coverage of the spill was provided by [Colorado Public Radio](#) (12/18).

BOR LOOKS TO MODERNIZE HUNGRY HORSE DAM POWER PLANT. The [AP](#) (12/18, 2.15M) reports that “federal officials are seeking public comment on the power plant at Hungry Horse Dam as they move forward with a proposed modernization of the plant.” The BOR, “which operates the dam and power plant, is looking for the public’s help in identifying concerns that should be addressed in an environmental assessment for the project”

ADDITIONAL COVERAGE OF GILA RIVER DIVERSION PROJECT. Additional coverage of the Gila River diversion project was provided by the [High Country \(CO\) News](#) (12/18, 74K).

ADVOCATES SAY BEAVERHEAD WATERWAY THREATENED. Guy Alsentzer and Wade Fellin, of Upper Missouri Waterkeeper, write at the [Helena \(MT\) Independent Record](#) (12/18, 38K) that the Beaverhead waterway is being threatened by intense sediment and algal blooms that are impacting fishing and public water supplies. They say that during a meeting held by Montana officials and the US Bureau of Reclamation scientists pointed = to the fact that the Clark Canyon Dam has reached its “trapping” lifespan after 19 years of collecting sediment. They also say that proposals to turn the dam into a hydroelectric facility could exacerbate the problem. They urge the public to “demand our decision makers ensure any new hydroelectric facility protects local water quality, downstream users, fisheries, and proactively addresses a critical issue – the water quality threat posed by unnatural sediment trapped behind the dam.”

Securing America’s Energy Future:

Renewable Energy:

ENVIRONMENTAL GROUPS PROTEST POTENTIAL “LOOPHOLE” IN DRECP. The [Greenwire](#) (12/17, Subscription Publication) reports that conservation groups are “challenging a potential ‘loophole’” in the Desert Renewable Energy Conservation Plan because it “could open nearly 1 million acres of public land to new development.” The DRECP “proposes to designate specific ‘development focus areas’ across 10 million acres of federal desert land where utility-scale renewable energy projects will be encouraged.”

BLM Urged To Resolve Key Issues In DRECP. Kim Delfino, California programs director for Defenders of Wildlife, and Barbara Boyle, senior representative of the Beyond Coal campaign, write at the [Victorville \(CA\) Daily Press](#) (12/17, 1K) that “as the end of the 30-day comment period on the recently released Desert Renewable Energy Conservation Plan (DRECP) draws to a close, regional and national conservation groups have had the opportunity to reflect on the finer details of the Bureau of Land Management’s (BLM) plan.” They are happy that “the DRECP protects 3.85 million acres of lands with important natural resources and recreational values by designating them as part of the National Landscape Conservation System.” They say that “the BLM’s plan must close loopholes that leave close to a million acres of critical wildlife areas open to industrial renewable energy development” and that “800,000 acres of public land left ‘unallocated,’ including the biologically significant Pisgah Valley, the scenic Owens Valley and the remote Deep Springs Valley, must be closed to development.”

DEVELOPER’S FINANCIAL TROUBLES CLOUD FUTURE OF PALEN SOLAR PROJECT. [E&E Publishing](#) (12/17, 705) reports that Abengoa Solar’s “pending bankruptcy has clouded the future” of the Palen Solar Electric Generating System. The company, “in a formal petition filed this week with the California Energy Commission (CEC), announced that it has an agreement in place to transfer ownership of the Palen Solar Electric Generating System to a subsidiary of San Diego-based EDF Renewable Energy Inc.” Abengoa is “in bankruptcy proceedings, and is apparently selling off assets to reduce a heavy debt load that’s crippling the renewable energy giant, according to media reports.”

Onshore Energy Development:

LAWMAKERS QUESTIONS DELAYS IN ENERGY LEASE SALES. [E&E Daily](#) (12/17, Subscription Publication) reports that House Republicans on Wednesday “blasted” the BLM for “postponing a pair of recent oil and gas lease sales, accusing the agency of flouting its duty under the Mineral Leasing Act and for kowtowing to anti-leasing environmental groups.” In a letter to Interior Assistant Secretary for Land and Minerals Management Janice Schneider, the lawmakers claimed the BLM is “violating an MLA requirement to hold at least four lease sales annually in each state with leasable lands.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (12/18, Richardson, 283K), the [Flathead \(MT\) Beacon](#) (12/17, 15K), the [Great Falls \(MT\) Tribune](#) (12/17, 76K), the [Huron \(MI\) Daily Tribune](#) (12/18, 19K), the [Deseret \(UT\) News](#) (12/18, 476K), the [Denver \(CO\) Post](#) (12/17, 825K), the [Houston \(TX\) Chronicle](#) (12/18), the [Missoulian \(MT\)](#) (12/18, 118K), and [KATV-TV Little Rock \(AR\)](#) Little Rock, AR (12/18, 106K).

Lawmakers Wants BLM To Move Oil, Gas Lease Auctions Online. [Politico Pro](#) (12/17) reports that “fifteen Republican Members of Congress, including Natural Resources Chairman Rob Bishop, are asking BLM to move its oil and gas lease auctions online.” The letter arrives as “the Utah field office canceled an auction in November, ‘to allow the time needed to better accommodate the high level of public interest in attending the sale.’” In a letter sent to BLM, the lawmakers “told BLM it should move the auctions online, and it should meet its legal requirement to hold auctions quarterly.”

JUDGE DENIES REQUEST TO EXPEDITE APPEAL IN BATTLE OVER BLM FRACKING RULE. [Law360](#) (12/18, 30K) reports that U.S. District Judge Scott W. Skavdahl, who blocked the Interior Department’s new fracking rule in September, “denied the government’s request that he quickly make a final ruling and expedite an appeal, saying Thursday it would be unfair to opponents of the regulations.” According to the article, “it was another win for states, petroleum industry groups and a Native American tribe that have challenged the Bureau of Land Management’s hydraulic fracturing regulations since they were introduced in March.”

INTERIOR PUSHES FOR SPLIT OF FRACKING CASE. [Law360](#) (12/18, 30K) reports that the Interior Department “continued its push to split up a suit challenging a delayed rule barring fracking on federal and tribal lands Thursday, arguing in Wyoming federal court it would be more efficient to decide the scope of the agency’s authority before handling other claims by states and industry groups.”

BOWIE RESOURCE PARTNERS REQUEST TO SELF-BOND. [Reuters](#) (12/18, Rucker) reports, in continuing coverage, that US coal company Bowie Resource Partners wants to self-bond the mines it recently bought from Peabody Energy Corp. The move could save Bowie up to \$6 million a year, but would put taxpayers on the hook for more than \$360 million in future cleanup costs for the company’s mining operations. If state officials in New Mexico and Colorado deny the move, Bowie would face costly insurance.

STUDY: ROYALTY INCREASES MAY HELP COAL RELATIVE TO NATURAL GAS. The [Wyoming Business Report](#) (12/18, 24K) reports that “a new study claims that raising royalty rates across the board for fossil fuels may benefit coal when compared to other feedstocks where higher royalties would represent a larger portion of total costs.” Study author Mark Haggerty, a researcher for Bozeman, Montana-based Headwaters Economics, said, “We find costs for natural gas would actually rise by a larger amount. It’s proportionately more expensive to deliver natural gas to market when compared to coal [under increased federal royalties].”

COLORADO OFFICIALS PRESSURE INTERIOR TO FINISH TRAPPER MINE STUDY. The [Grand Junction \(CO\) Daily Sentinel](#) (12/18, Harmon, 73K) reports “it’s imperative that work on an environmental assessment of the Trapper Mine in northwest Colorado be complete in five months,” according to a letter sent to the Department of the Interior and signed by Rep. Scott Tipton (R-CO), Gov. John Hickenlooper and Sens. Michael Bennet (D-CO) and Cory Gardner (R-CO). The Daily Sentinel explains that “in the letter, the Colorado officials urge Interior Secretary Sally Jewell to provide the necessary resources to meet the April 30 deadline for the Trapper Mine study.”

UTAH AG UNLIKELY TO ISSUE OPINION ON LEGALITY OF CIB FUNDING. The [Moab \(UT\) Times-Independent](#) (12/18, Marcello) reports that “despite requests from several lawyers representing conservation and environmental groups, the Utah Attorney General’s Office is unlikely to publish a formal opinion as to whether the Utah Permanent Community Impact Fund Board (CIB) is in violation of federal laws and the state constitution for setting aside funding for major infrastructure projects.” The paper explains that “recently, the CIB has come under scrutiny for committing \$53 million to four counties to purchase ‘throughput capacity.’” Meanwhile, “a lawsuit could be filed at the state level, or according to Patrick Etchart, spokesman for the US Office of Natural Resources Revenue, entities could bring allegations to the federal government.” He said, “If we suspect any violation of the law, [our] enforcement [office] will refer to the Office of Inspector General or to the U.S. Justice Department and the U.S. Attorney’s Office.”

EPA CONSIDERS POLLUTION CONTROLS AT UTAH COAL POWER PLANTS. The [AP](#) (12/18, McCombs) reports

that the EPA “will consider requiring additional pollution controls at two of Utah’s oldest coal-fired power plants to cut down haze that environmentalist groups and the National Park Service say contributes to murky air at nearby national parks in southern Utah.” The AP explains that the EPA is considering two options. The AP says that first option, supported by environmentalists, would require new equipment to cut down on emissions. Meanwhile, the second option would be to rely “on existing measures already in place that officials say are already working to address the problem.” This option has the support of Rocky Mountain Power. The NPS has urged the EPA to “take strong action and remedy air quality” by requiring pollutant reductions at the coal plants. “The scenic views that characterize these parks are degraded on many days by industrial haze that impairs visibility and dulls sensational colors and contrasts,” wrote Tammy Whittington of the Park Service.

EARTHQUAKE OF 3.0 MAGNITUDE HITS HASLET, TEXAS. The [Dallas Morning News](#) (12/17, Wilonsky, 1.26M) reported on the first official 3.0 earthquake in Haslet, Texas. SMU researchers “say there’s mounting evidence that all five North Texas earthquake sequences have been caused by people – specifically, those involved in the gas-drilling, waste-water-injecting business.” The article adds that while “they’ve yet to make anything official,” SMU seismologist Heather DeShon told The Dallas Morning News, “We don’t think they’re natural. But we don’t understand the subsurface physics surrounding the Irving earthquake sequence, so we’re still considering all causes.”

OKLAHOMA EARTHQUAKES MARK GROWING TREND OF EARTHQUAKES LINKED TO OIL, GAS ACTIVITY. [Rigzone](#) (12/18, Boman, 11K) reported that Oklahoma’s earthquake activity, which is “believed to have been triggered by saltwater disposal well injection activity, marks the latest in a trend of a growing number of U.S. earthquakes and their link to increased oil and gas activity.” Studies released this year “have highlighted the likely link between oil and gas wastewater injection and earthquakes.” The USGS “is working to gain a better understanding of the physical processes involved in inducing earthquakes, and has developed preliminary methods to estimated earthquake hazards associated with induced events.”

ADVOCATE CALLS FOR BETTER REGULATION OF OIL, GAS DRILLING IN NATIONAL PARKS. Elizabeth Glass Geltman, Secretary of the Environment Section of the American Public Health Association, writes at the [Huffington Post](#) (12/18, Geltman, 251K) that the National Park Service “recently proposed revisions to regulations governing oil and gas drilling in national parks, the so-called 9B regulations.” She says at “a moratorium on conducting oil and gas operations in national parks is not a realistic option” and that “the only way to eliminate all drilling in national parks would be for Congress to authorize purchase of the underlying mineral estates from private owners.” However, she says that this is not likely. In the alternative, she concludes that “creating modern rules to deal with new circumstances in oil and gas development is good for national park users, good for park maintenance, good for ecosystem preservation and good for public health.”

GESSING: BLM REGULATIONS WOULD HURT NEW MEXICO ECONOMY. Paul Gessing, president of New Mexico’s Rio Grande Foundation, writes at [Albuquerque \(NM\) Business First](#) (12/17) reports that “under President Barack Obama’s administration, the BLM has become far more difficult for the oil and gas industries to deal with” and points to a decrease in oil and natural gas production on Federal lands. Meanwhile, he says that “a slew of new and proposed regulations will only make things more challenging,” include changes to the metering of production on Federal leases and rules on venting and flaring. He points to other proposed regulations as well.

Offshore Energy Development:

CLINTON “SKEPTICAL” ABOUT DRILLING OFF ATLANTIC COAST. [The Hill](#) (12/17, Cama, 654K) reported that Democratic presidential hopeful Hillary Clinton “told South Carolinians that she is skeptical of whether offshore oil and natural gas drilling should be allowed off southeastern states’ coasts.” Said Clinton on a radio program, “I am very skeptical about the need or desire for us to pursue offshore drilling off the coast of South Carolina, and frankly off the coast of other southeast states.” Under a Bureau of Ocean Energy Management plan, “energy companies would get one lease auction in 2021 for drilling rights in certain areas in the region that stretches from Virginia to Georgia.”

Additional coverage was provided by [The Guardian \(UK\)](#) (12/18, Milman, 3.48M).

OFFSHORE DRILLER PREPARES FOR EXPLORATION IN ALASKA NEXT YEAR. [EnergyWire](#) (12/17, Subscription Publication) reports that Caelus Energy LLC in February will begin “drilling its first exploration well on Alaska state lands in Smith Bay, a remote inlet located 60 miles southeast of Barrow.” According to the article, “if Caelus secures the required state and federal permits, the Dallas-based independent oil company plans to spud two wells at its leases during this winter’s drilling season, which stretches from January to May.” Caelus has “owned the Smith Bay lands only since June, when it acquired a 75 percent working interest in the 117,000 acres from NordAq Energy Inc.”

BP: NO RESPONSIBILITY FOR DAMAGES FROM PRODUCTION MORATORIUM AFTER DEEPWATER HORIZON. The [New Orleans Times-Picayune](#) (12/17, LaRose, 661K) reports that BP asked a federal judge on Tuesday to toss out “multiple lawsuits seeking damages from the company for the months-long moratorium on drilling

in the Gulf of Mexico" in the wake of the 2010 Deepwater Horizon accident. BP claimed that "the same federal law that holds the company in large part responsible for the accident that killed 11 rig workers and injured 16 more also limits its liability to damage from the actual spill." Attorneys for the company say that the shutdown had been initiated by the US government, rather than by the company itself.

OBAMA ADMINISTRATION ACCUSED OF "ENERGY OBSTRUCTIONISM." Robert L. Bradley Jr., founder and CEO of the Institute for Energy Research, writes at the [Morrow County \(OH\) Sentinel](#) (12/17) that in October, the Obama Administration canceled two scheduled offshore lease sales in Alaska and "also declined requests to renew drilling rights set to expire soon." Bradley says that "these moves mean the end of Arctic energy exploration." Bradley points out that "earlier this year, Interior Secretary Sally Jewell talked up a 'balanced proposal' that would purportedly allow access to nearly 80 percent of Alaska's untapped energy supply." However, Bradley says that the President has done repeatedly blocked energy development. Bradley says that during the upcoming elections, "with hundreds of thousands of middle-class jobs on the line, Americans should reject the radical anti-energy policies of the previous seven years."

America's Great Outdoors:

Bureau of Land Management:

UTAH OFFICIAL SET TO SENTENCED FOR ROLE IN ATV PROTEST RIDE. The [Greenwire](#) (12/17, Subscription Publication) reports that San Juan Commissioner Phil Lyman was scheduled to appear before federal District Judge David Nuffer in Salt Lake City Thursday morning "to receive his sentence for convictions of conspiracy and operating an ATV on federal lands closed to motorized travel." According to the article, "federal prosecutors, conservationists and a former BLM director are urging jail time to demonstrate that laws to protect the nation's lands and cultural treasures cannot be broken, particularly by an elected official." However, Lyman's lawyers are "urging Nuffer to sentence him only to probation and community service, arguing that Lyman deeply regrets his decision and has already suffered 'significant financial repercussions.'"

Additional coverage was provided by the [Salt Lake \(UT\) Tribune](#) (12/18, 339K), the [San Francisco \(CA\) Chronicle](#) (12/18, Subscription Publication, 3.44M), the [Minneapolis \(MN\) Star Tribune](#) (12/18, 1.15M), the [Daily Mail](#) (12/18, 5.31M), the [Denver \(CO\) Post](#) (12/18, Press, 825K), the [Houston \(TX\) Chronicle](#) (12/18, 2.15M), and the [Washington \(DC\) Post](#) (12/18, Brady Mcombs |, Ap, 7.78M).

NEVADA RANCHERS WHO DEFIES BLM COLLECTED DROUGHT SUBSIDIES WHILE DENYING THE DROUGHT. [Grist](#) (12/18, 6K) reports that "in June, tough-talking ranchers in remote Battle Mountain, Nev., defied the federal government, herding cattle onto public rangeland that had been closed to grazing to protect it during the West's scorching drought." In the end, the federal government backed down and the BLM "canceled the drought closures and opened the range, just as the cattlemen wanted." However, "even as the conflict played out, some of these same ranchers were collecting drought subsidies from the federal government."

BLM, MOAB HALF MARATHON SPAR OVER NEW PERMIT. The [Moab \(UT\) Sun News](#) (12/18) reports that the BLM is requiring the Moab Half Marathon "to obtain a new permit that owner and organizer Ranna Bieschke says is unwarranted, and will harm event attendance." According to the article, "for the past nine years, the race has operated under a land use permit which came up for renewal every three years" but on March 22, 2015, the existing land use permit expired, and BLM officials said that the race would be "more appropriate under a Special Recreation Permit." In response, Moab Half Marathon, Inc., has "filed an appeal that asks the Interior Board of Land Appeals to issue a stay on the decision."

BLM HOLDS OPEN HOUSE FOR PROPOSED MINING CLAIM BAN. The [Elko \(NV\) Daily Free Press](#) (12/18, 22K) reports that "federal agencies drew a crowd of concerned citizens to their open house-style meeting Wednesday to discuss a proposed 20-year ban on mineral entry in nearly 2.8 million acres of Nevada." Gene Seidlitz, acting deputy state director of minerals management with the BLM, said the bureau is "in the process of gathering data and public comments regarding its proposal, which would ban new mining claims in 'sagebrush focal areas.'" He said that "those areas have already been segregated for up to two years to allow the BLM to study data on how mineral exploration fragments that habitat."

ADDITIONAL COVERAGE OF RED RIVER LAND DISPUTE. Additional coverage of the Red River land dispute was provided by the [Bluefield \(WV\) Daily Telegraph](#) (12/18, 44K), the [Goshen \(IN\) News](#) (12/18, 1K), and the [North Andover \(MA\) Eagle Tribune](#) (12/18, 91K).

Fish and Wildlife Service:

LAWSUIT SEEKS PROTECTION FOR COASTAL MARTEN. The [AP](#) (12/18, 2.15M) reports that "an environmental

group is suing the government over its failure to protect coastal populations of the Pacific marten.” The Center for Biological Diversity and another group say the FWS’ “April 2015 decision to deny Endangered Species Act protection to the marten ignored science.” The center “first petitioned for protection for the marten in 2010.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (12/18, 283K) and [KTVZ-TV Bend \(OR\)](#) Bend, OR (12/18, 32K).

FWS COULD REMOVE PROTECTIONS FOR YELLOWSTONE GRIZZLY. Additional coverage that The [Powell \(WY\) Tribune](#) (12/18, 13K) reports that the FWS “believes that the Yellowstone grizzly population is biologically recovered and is considering whether to move forward with a delisting proposal, said Serena Baker, Fish & Wildlife Mountain-Prairie Region 6 public affairs specialist in Lakewood, Colorado.” Baker said, “We continue to work with states, tribes and other partners to ensure that a robust conservation plan is in place to maintain a recovered grizzly bear population in the absence of ESA (Endangered Species Act) protections.”

ENVIRONMENTAL GROUPS PRESSURE EPA TO REVISIT GE’S HUDSON RIVER PCB CLEANUP. The [Albany \(NY\) Times Union](#) (12/18, Nearing, 344K) reports that a coalition of several environmental groups petitioned the Environmental Protection Agency on Thursday to “reexamine the ultimate effectiveness” of General Electric Co’s “six-year PCB cleanup of the upper Hudson River,” in an “apparent end-run around regional EPA head Judith Enck.” The [Switchboard](#) (12/18, 116K) provides additional coverage.

HOUSTON-BASED LIQUEFIED NATURAL GAS COMPANY DONATES MONEY TO HELP TRACK OCELOTS. The [Houston Chronicle](#) (12/17, Schiller, 2.15M) reports that on Wednesday, Houston-based Annova LNG announced that it is “donating \$40,000 for GPS-enabled collars as well as cameras and other materials to allow researchers” to study ocelots. The article says that ocelots have taken “refuge in the thickest, thorniest brush in South Texas.” A photo gallery accompanying the article also shows an image of a “Texas license plate that benefits ocelots and the U.S. Fish and Wildlife Service.”

CHANGING OF REFUGE NAME TO HONOR BILLY FRANK JR. WELCOMED. In an editorial, the [Olympian \(WA\)](#) (12/18, 78K) welcomes the changing of the name of the Nisqually wildlife refuge to the Billy Frank Jr. National Wildlife Refuge. The paper says that this move “honors Frank, a Nisqually tribal member who was a leader in defending tribal sovereignty and treaty rights starting with fish-ins along the Nisqually River in the 1960s.”

National Park Service:

NEW YORK DEMOCRATS PROPOSE PROTECTION FOR STONEWALL INN. The [Greenwire](#) (12/17, Subscription Publication) reports that New York Democrats introduced legislation Thursday to protect the Stonewall Inn. Rep. Jerrold Nadler is pushing an identical bill in the House. Gillibrand said in a statement, “The events at Stonewall in 1969 were a turning point for the LGBT rights movement in America – a critical chapter, alongside Selma and Seneca Falls, in the long history of America’s quest for equal rights.”

Additional coverage was provided by the [Windy City Times](#) (12/18, 54K).

FAMILY LAWYER CRITICIZES PROBE OF BOY’S DEATH AT LASSEN VOLCANIC NATIONAL PARK. The [Daily Caller](#) (12/18, Watson, 366K) reports that the lawyer for the family of the boy who died at Lassen Volcanic National Park in 2009 is unsatisfied with a new Department of Interior Office of Inspector General report on possible destruction of evidence. Stephen Campora, the Botell family’s lawyer, said Department of Interior Acting Inspector General Mary Kendall “dances around the more serious questions — namely, whether” Lassen Superintendent Darlene Koontz “perjured herself by offering seemingly contradictory testimony to the court, or whether she intentionally sanitized the report from a historical landscape architect who said the park’s structure was ‘quite the worst trail I’d ever seen in terms of poor condition and safety hazards.’”

UAV OPERATOR ISSUED CITATION NEAR WASHINGTON MONUMENT. [USA Today](#) (12/17, 5.56M) reports that according to the U.S. Park Police, a man was issued a citation on Thursday for allegedly flying a UAV next to the Washington Monument, “the 10th reported incident this year involving illegal operation of a drone in a Washington-area national park in 2015.” The article notes that federal legislation bans “flying remote-controlled aircraft in the restricted airspace around Washington, D.C., and in any area administered by the National Park Service.”

NASA HELPS NPS DEVELOP BEAVER MANAGEMENT PLANNING. [National Parks Traveler](#) (12/17, 989) reports that NASA has been working with the National Park Service to come up with “solutions for dealing with the beavers” along the Natchez Trace Parkway. Citing a press release from the Park Service, the article says that beavers’ “excessive dam building causes issues with flooding, property damage, and road maintenance.” NASA has provided the National Park Service with “satellite data from December 1992 to January 2015” that is “intended to aid Park Service managers in wetland conservation and beaver management planning.”

GROUP ACQUIRES LAND TO BENEFIT THE INDIANA DUNES NATIONAL LAKESHORE. [La Porte County \(IN\) Life](#) (12/18) reports that on Wednesday, Save the Dunes “acquired a significant property totaling nearly 100 acres in Hobart, Indiana.” The group has had “this property on their ‘wish list’ for years, as has the Indiana Dunes National Lakeshore.” Save the Dunes “plans to apply for grant funding to undertake ecological restoration, add site amenities, and then donate the property to the Indiana Dunes National Lakeshore.”

Additional coverage was provided by the [AP](#) (12/18, 2.15M).

NPS DISCOVERS MALE MOUNTAIN LION IN SANTA MONICA MOUNTAINS. The [Moorpark \(CA\) Acorn](#) (12/18, 33K) reports that “a mountain lion dubbed P-45 by the National Park Service has recently been discovered in the Santa Monica Mountains.” P-45 was “captured Nov. 21 in the central portion of the Santa Monica Mountains and outfitted with a GPS collar.” According to the article “for local park biologists, the large adult male mountain lion captured in the Santa Monica Mountains last month is cause for both delight and puzzlement.”

Meanwhile, [KTLA-TV](#) Los Angeles (12/17, 368K) reports that “researchers tracking P-23, a well-known mountain lion living in the Santa Monica Mountains, recently discovered the big cat was caring for a kitten that had previously remained undetected.”

GROUP WORKING TO HONOR FAMILIES DISPLACED BY SHENANDOAH NATIONAL PARK. [WHSV-TV](#) Harrisonburg, VA (12/18, 39K) reports that a group is working to honor the families who “lost their homes when Shenandoah National Park was formed in the early 20th century.” The Blue Ridge Heritage Project “plans to build memorials in eight counties where families were displaced by the park’s formation.” Currently, “only one in Madison County has been finished, but there are plans for memorials in Rockingham, Augusta and Page counties.”

US Geological Survey:

STUDY FINDS “INTERSEX” MALE BASS THROUGHOUT PROTECTED NORTHEAST US WATERS.

[Environmental Health News](#) (12/18) reports that “eighty-five percent of male smallmouth bass tested in or nearby 19 National Wildlife Refuges in the U.S. Northeast had signs of female reproductive parts, according to a new federal study.” The study, led by the USGS and FWS, “also reported that 27 percent of male largemouth bass in the testing sites were intersex.” According to the article “the study is the first of its kind in National Wildlife Refuges and adds to growing evidence that endocrine disrupting chemicals are getting into U.S. lakes, rivers, streams and reservoirs—no matter how protected the waters seem.”

USGS MAPPING NATIONAL PARKS. [GISuser](#) (12/18) reports that the USGS has been “regularly contributing new and updated works of art for the national parks—maps.” The USGS is working to add all of the National Scenic Trails to The National Map Products.

USGS: BARNETT SHALE CONTAINS TWICE AS MUCH NATURAL GAS AS PREVIOUSLY THOUGHT.

[Bloomberg News](#) (12/17, Loh, 3.4M) reported that the Barnett Shale formation in Texas “contains 53 trillion cubic feet of natural gas, twice as much as previously estimated, U.S. government researchers said.” The formation “also contains 172 million barrels of shale oil and 176 million barrels of natural gas liquids, the U.S. Geological Survey reported Thursday.”

The [Texas Tribune](#) (12/17, Malewitz, 6K) added that “the fracking revolution prompted the agency to take another look at how much natural gas operators could recover from the Barnett with new drilling techniques, Kristen Marra, a scientist with the Geological Survey, said in a statement.” The revised estimate “drew cheers from oil and gas industry supporters, who have spent much of the year fretting about scaled-back production and worker layoffs due to plummeting oil prices.”

Top National News:

OBAMA SEEKS TO REASSURE AMERICANS AHEAD OF HOLIDAYS. President Obama on Thursday said there is no specific or credible intelligence about possible terrorist threats to the US homeland. Media reporting characterizes Obama’s speech at the National Counterterrorism Center (NCTC) as an effort to reassure Americans ahead of the busy travel period as he continues a recent effort to show strength against ISIL and terrorism. The [AP](#) (12/18) reports that while the President said there is no information suggesting an attack in the short term, he urged Americans to remain vigilant while continuing with their normal lives. [AFP](#) (12/18) reports that following a meeting with top security officials, Obama said, “At this moment, our intelligence and counterterrorism professionals do not have any specific and credible information about an attack on the homeland.”

On [CNN’s Situation Room](#) (12/17, 554K), Jim Acosta said Obama’s visit to NCTC was “one more attempted show of strength” from the President, and [CNN](#) (12/18, Liptak, Producer, 3.54M) reported on its website that the speech

“continu[ed] a week-long push to underscore his command of national security dangers.” According to the website, the President “said he understood why unease has spread” following attacks in Paris and San Bernardino, but “he sought to bolster the country’s mettle ahead of a busy holiday travel season.” The [New York Daily News](#) (12/18, Edelman, 3.59M) reports Thursday was Obama’s third “national security-focused speech” in 11 days and he “continued to execute a recent strategy to better communicate the progress of the nation’s fight against terrorism.” The [New York Times](#) (12/18, Harris, Subscription Publication, 11.64M) says Obama “is struggling to fashion a message that reassures Americans that he is serious about battling” ISIL “while also avoiding the alarmism that he sees emanating from some Republican candidates.”

The [Los Angeles Times](#) (12/18, Parsons, 3.6M) reports Obama acknowledged “a new phase of terrorism including lone actors and small groups of terrorists” makes plots “harder to detect, and that makes it harder to prevent.” However, the President said that “as the threat evolves, so do we.” [The Atlantic](#) (12/18, Koren, 2.66M) reported on its website that Obama said officials will use the San Bernardino attack to “learn whatever lessons we can and make any improvements that are needed.”

[Voice of America](#) (12/18, Salinas, 64K) reported on its website that “Obama noted that while many Americans may not be aware of it...officials have taken in terrorists, disrupted plots, thwarted attacks and saved lives.” According to the [Washington Times](#) (12/18, Boyer, 283K) and [The Hill](#) (12/17, Fabian, 654K), Obama touted the “dedicated patriots working around the clock all across the country to protect us all.” Meanwhile, [Politico](#) (12/17, McCaskill, 1.19M) quoted Obama as saying the US is “constantly adapting, constantly improving, upping our game, getting better.” [Reuters](#) (12/18, Rampton, Edwards, Mason) quotes Obama as adding, “We’ve prevailed over much greater threats than this. We will prevail again,” he said.

[USA Today](#) (12/18, Jackson, 5.56M), meanwhile, reports Obama said the US and allies are combating ISIL in their stronghold of Syria and Iraq, “going after terrorists over there – where they plot and plan and spew their propaganda.” The President said the US is also increasing security at its borders to block “foreign fighters” from gaining entry to the country.

The [Washington Post](#) (12/18, Jaffe, 7.78M) reports Obama called on Americans uphold American values despite fears of terrorism. The President said terrorists “cannot defeat us on the battlefield, but they can lead us to change in ways that would undermine what this country is all about.” Obama added, “When we stay true to our values, nothing can beat us.” [NBC Nightly News](#) (12/17, lead story, 3:15, Snow, 7.86M) shows Obama saying, “We cannot give in to fear or change how we live our lives because that’s what terrorists want. That’s the only leverage that they have.” [TIME](#) (12/18, Berenson, 19.1M) similarly said on its website that Obama concluded his speech “with a call for national unity.” The President said “One of our greatest weapons against terrorism is our own strength and resilience as a people” and “our greatest allies in this fight are each other, Americans of all faiths and all backgrounds.” Obama said added, “When Americans stand together, nothing can beat us.”

NYTimes: White House Seeks To “Get Its Message Out” To Through Non-Traditional Mediums. The [New York Times](#) (12/18, Baker, Subscription Publication, 11.64M) reports the Administration is seeking to “get its message out to a variety of audiences that might not read traditional newspapers and magazines.” As an example, the Times says Obama this week “reached out beyond the usual high priesthood of foreign policy journalism to include younger writers with new media sources” for “off-the-record discussions” about his strategy against ISIL and terrorism. The Times also highlights that Vice President Biden posted on Medium and had photographs on Instagram during his recent visit to Ukraine.

PELOSI: DEMOCRAT VOTES TO PASS SPENDING BILL MAY NOT BE THERE. The [Huffington Post](#) (12/17, Barron-Lopez, 251K) reported that House Minority Leader Pelosi “reiterated her support” for the “sweeping year-end bill to fund the government,” but “sent a shiver through the Capital when she gave a resounding ‘No’ when asked if she’s confident she has the votes within her Democratic caucus to help push the omnibus spending bill over the finish line.” Pelosi said, “Members are reviewing it. There are people who have very serious concerns,” citing in particular the bill’s provision to lift the ban on crude oil exports. “A Democratic aide” told the Huffington Post that Progressive House Caucus Democrats have “started to mull the idea of voting against the omnibus solely because of the crude oil exports provision.”

[Politico](#) (12/17, Sherman, Bresnhan, French, 1.19M) said that while “the Capitol isn’t in full panic yet,” there seems to be “a rising level of concern on the Democratic side of the aisle that they will be short the votes needed to pass the omnibus spending bill.” Pelosi “is trying to convince members of her party that, while the bill isn’t perfect, it is better than a full-year continuing resolution, which would lower spending levels drastically.” [The Hill](#) (12/17, Lillis, 654K) reported that Rep. Luis Gutiérrez, “a leading member of the Congressional Hispanic Caucus,” blasted the spending package Thursday, saying, “I think it’s a disgrace. ... I think Democrats have to stand up tomorrow and say, ‘no.’” A “similar verdict” came from leaders of the Congressional Progressive Caucus. Reps. Keith Ellison and Raúl Grijalva “said they both intend to oppose the \$1.1 trillion spending bill when it hits the floor Friday.”

Meanwhile, [The Hill](#) (12/17, Lillis, 654K) noted that “a number of conservative Republicans” are expected to oppose the measure “over spending levels they deem too high and the absence of anti-terror provisions.” That means “GOP leaders will likely need a significant number of Democratic votes to move the package on to the Senate.”

House Approves Tax Package. In a 318-109 vote on Thursday, the House approved the first portion of the year-end budget deal, a “huge package of tax breaks for businesses and low-income workers,” the [New York Times](#) (12/18, Herszenhorn, Subscription Publication, 11.64M) reports. Under the measure, “several tax breaks that have been renewed repeatedly on a temporary basis” – including a business tax credit for research expenses, a benefit for certain capital investments, an enhanced child tax credit, and a \$2,500 college tax credit, among others – would be permanently extended. In a statement, House Speaker Ryan “called the measure ‘a pivotal step towards rewriting our broken tax code by ending Washington’s days of extending tax policies one year at a time.’” The House is scheduled to vote on the spending measure Friday. The [AP](#) (12/18, Fram) says Ryan “all but claimed the bill’s passage as a personal triumph, citing it as an example of his drive ‘to get our House back on track.’”

[USA Today](#) (12/18, Kelly, 5.56M) notes that “all but a handful of Republicans voted for the bill,” and “while a majority of Democrats voted against it,” more than “70 Democrats joined with Republicans to approve the legislation.” [Reuters](#) (12/18, Lawder) reports that while the measure is a victory for Republicans, some Democrats said it benefits corporations and business owners more than working families.

Senate To Pass Combined Spending, Tax Measure Friday. The [Washington Times](#) (12/18, Howell, 283K) reports that the House will vote on the spending portion of the package Friday “then send the entire package over to the Senate for final approval later in the day.” [Roll Call](#) (12/17, Lesniewski, 139K) said that Senate Majority Leader McConnell has announced an agreement to “allow the Senate to quickly call up and pass the combined measure after the House finishes work Friday – without a weekend session.”

Spending Bill Includes Pay Raise For Federal Employees. The [Washington Post](#) (12/18, Davidson, 7.78M) reports in its “Federal Eye” blog that the funding bill includes “an average 1.3 percent pay increase,” for federal workers, “among other fed-friendly provisions, while avoiding a hit on their pensions.”

Measure Includes Compensation For Victims Of Overseas Terrorism. [USA Today](#) (12/18, Tumulty, 5.56M) says the bill also includes financial compensation for “hundreds of survivors of overseas terrorist attacks dating to the late 1970s, as well as the family members of people killed in such attacks.” The measure will make about “\$1 billion...available for those people, including survivors of the bombings of the U.S. embassy in Beirut, Lebanon in 1983, the Beirut embassy annex in 1984, and the U.S. embassy in Nairobi, Kenya in 1998 – and family members of those killed in those attacks.”

AP Analysis: Lawmakers Still Placing Pet Projects In Spending Bill. An [AP](#) (12/18, Taylor) analysis reports that while “the custom of ‘earmarking’ has become relatively rare,” lawmakers “have found ways to help their states and districts, and the process is far more opaque than it used to be.” The AP cites a number of examples found deep in the “massive, 2,009-page spending bill and accompanying documents.” [Politico](#) (12/17, Bresnahan, 1.19M) said that while Sen Richard Shelby “loaded up the \$1.1 trillion spending bill with pet provisions,” he still plans to vote against it, “citing the lack of language to restrict Syrian refugees as the reason.” Politico said the move, which “demonstrates the potency of immigration as an electoral issue in Alabama and the power of Shelby’s fellow home-state senator, Republican Jeff Sessions, over the controversial topic in the Southern state,” could make Shelby the “unofficial chairman of the ‘hope yes, vote no’ caucus on Capitol Hill.”

[USA Today](#) (12/18, Singer, 5.56M) lists the “dozens of odd provisions included in the massive year-end spending bill, which provides \$1.1 trillion in federal spending but specifies many activities that may not be paid for out of that giant bankroll.”

An editorial in the [Wall Street Journal](#) (12/18, Subscription Publication, 6.23M) laments the fact the omnibus bill funds the DC Opportunity Scholarship Program for fiscal 2016 but does not reauthorize it and argues that while former-Speaker Boehner was a champion of the program, after his departure, there appears to be no one in the House GOP caucus to carry the mantle of poor, minority children.

WPost A1 Analysis Notes Change In House GOP’s Tone Under Ryan. A [Washington Post](#) (12/18, A1, Debonis, Kane, 7.78M) front-page analysis says there has been “a distinct change in tone for the House GOP under Ryan,” noting that while negotiations over the spending bill “took place in much the same way and produced similar results as they did under Boehner,” they did so “with almost none of the acrimony or divisiveness that had become the hallmark of Boehner’s tenure.” However, “one big question facing House Republicans is whether Ryan’s speakership will fundamentally change the way the party functions or whether the speaker is just enjoying a post-Boehner honeymoon.”

FAROOK’S FRIEND MARQUEZ CHARGED WITH SUPPORTING TERRORISM. In the first criminal charges filed in

connection with the San Bernardino attacks Enrique Marquez, a friend of shooter Syed Farook, has been arrested and charged by federal authorities with conspiring with Farook in 2011 and 2012 to commit crimes of terrorism as well as the unlawful purchase of two assault rifles used in the San Bernardino shootings, and for defrauding immigration officials by entering into a fake marriage with a member of Farook's family. The [San Bernardino \(CA\) Sun](#) (12/18, Saunders, 143K) reports that according to a Justice Department statement, the criminal complaint filed in US District Court in Riverside, California charged Marquez with "conspiring with Farook to provide material support – including himself, a firearm and explosives – for crimes of terrorism, making a false statement in connection with acquisition of firearms, and immigration fraud." In the lead story for the [CBS Evening News](#) (12/17, lead story, 2:40, Pelley, 5.08M), Carter Evans reported that investigators say Marquez also purchased the powder used in pipe bombs that were found at the scene of the attack. [ABC World News](#) (12/17, story 2, 0:55, Muir, 5.84M) reported that Marquez actually called 911 after the San Bernardino attack occurred, telling the operator that Farook committed the shooting and had used guns that Marquez had purchased for him. On [CNN's Situation Room](#) (12/17, 554K), Pamela Brown reported that Marquez reportedly told investigators he purchased the weapons so that Farook could avoid scrutiny due to his Middle Eastern features.

[USA Today](#) (12/18, Johnson, Bacon, 5.56M) says Marquez is "accused of immersing himself in radical ideology shortly after meeting Farook in 2005 while the two were neighbors in Riverside." According to court documents, by 2011, "Marquez and Farook bonded in the firebrand rhetoric of now-deceased al-Qaeda cleric Anwar al-Awlaki and in the extremist literature of Inspire, the official publication of al-Qaeda in Yemen." The [Washington Post](#) (12/17, Horwitz, Berman, Goldman, 7.78M) says the government document "shows Farook as clearly being the force guiding Marquez toward violent extremism." Brian Ross reported in the lead story for [ABC World News](#) (12/17, lead story, 3:05, Muir, 5.84M) Farook helped radicalize Marquez by showing him "videos and publications from Al Qaeda." Marquez also reportedly warned friends to plans "of what he called a terror sleeper cell" in the weeks prior to the San Bernardino attack.

[Reuters](#) (12/18, Hosenball, Dobuzinskis) cites an affidavit which said Marquez told investigators he and Farook planned to attack the Riverside Community College library or cafeteria in 2011. Marquez and Farook also planned to attack a state highway with pipe bombs during rush hour and to shoot arriving police and emergency crews.

The [Wall Street Journal](#) (12/17, Emshwiller, Barrett, Subscription Publication, 6.23M) says Marquez faces a maximum of 15 years on the terrorism charge and 10 years each on the firearms and immigration charges. The [Los Angeles Times](#) (12/18, Serrano, Winton, 3.6M) calls the charges "a major development in the widening investigation" of the San Bernardino attack, but notes that the charges "do not allege that Marquez had any advance knowledge" of the attack.

Pete Williams said in the lead story for [NBC Nightly News](#) (12/17, lead story, 3:15, Snow, 7.86M) that the new details "vividly demonstrate the threat of homegrown terrorism." In an interview on [CNN's Situation Room](#) (12/17, 554K), Rep. Adam Schiff said that from the federal complaint, Farook "clearly was motivated" by radical Islamist propaganda before he married Malik. He added, "I think it begs the question of whether there was some online channel, some other mechanism or some third party who knew both and understood both were radicalized that helped putting them together."

US Theme Parks Increase Security. [NBC Nightly News](#) (12/17, story 7, 1:45, Snow, 7.86M) reported that "the major theme parks in Orlando, including Disney, are upping security and adding metal detectors as so many families head there for Christmas vacation." NBC (Sanders) added that "at Disneyworld, SeaWorld, Universal and other parks, walk-through metal detectors and wand detectors became the most visible part of the theme park security."

The [CBS Evening News](#) (12/17, story 2, 1:50, Werner, 5.08M) reported that Disney officials say they have added "visible and non-visible security measures," including more uniformed officers and specially trained dogs." Inside the park, "guests will no longer see toy guns, not even water pistols" as they have been "removed from Disney stores and visitors will not be allowed to bring them into the parks."

Editorial Wrap-Up:

NEW YORK TIMES. "Horror Stories From New York State Prisons." In an editorial, the [New York Times](#) (12/18, Subscription Publication, 11.64M) deplores the "culture of violence infests the sprawling state prison system" and the lack of accountability that provides "clear evidence that law enforcement officials are willfully looking the other way." The Times calls for "sustained and vigorous federal pressure" coupled with "leadership and commitment from New York's top political figures" to change the "deplorable system." The Times concludes by decrying as "a disgrace" the lack of action by "elected officials and prosecutors at the federal, state and local levels have done to prevent inmates from dying at the hands of prison guards."

"What Went Wrong With Navy SEALs." In an editorial, the [New York Times](#) (12/18, Subscription Publication,

11.64M) decries as “criminal and inexcusable” that SEAL Team 2 viciously beat detainees while assigned to train Afghan police officers in the village of Kalach, adding that SEAL command clearing them of all charges is “mind-boggling,” given the “clear evidence of misconduct.” The Times argues that the incident “harmed what the United States and its allies are trying to achieve in Afghanistan” and that, because special forces’ “mission is inherently secretive and violent,” leaders have to “enforce a clear understanding of lines these forces must not cross.”

“A Pause To Weigh Risks Of Gene Editing.” In an editorial, the [New York Times](#) (12/18, Subscription Publication, 11.64M) lauds the call by an international panel of experts for a pause on altering the human genome in ways that could be inherited; this would provide time “to assess risks and benefits,” as well as “develop a ‘broad societal consensus’ on the work.” The technology, according to the times, “has outstripped the ability of scientists and ethicists to understand and cope with the consequences.” The Times calls the panel’s proposal “sensible,” as it offers a way “to move forward once a vigorous program of basic research has resolved lingering questions.”

THE WASHINGTON POST. “On Regime Change In Syria, The White House Capitulates To Russia.” The

Legislative Summary, Friday, December 18, 2015

--

Joseph Nevils
Legislative Assistant

Department of the Interior
1849 C St, NW 20240
(202) 208-4580 (O)
(202) 208-7619 (F)

Legislative Summary
 from
 the Legislative Counsel
Friday, December 18, 2015
 To: All Interested Interior Offices

Attached for your information is today's Legislative Summary.

In order to keep the Summary as up-to-date as possible, we request that any bureau or office contacted directly regarding hearings or markups notify this office immediately.

New information about scheduled hearings and business meetings appears shaded in yellow. Hearings printed in *bold italic* type indicate DOI involvement.

If you have any questions or corrections, please contact Joseph Nevils on (202) 208-4580, or via E-Mail (Joseph_Nevils@ios.doi.gov).

2015 Congressional Recess Schedule

<i>Senate</i>	<i>Holidays & Special Days</i>	<i>House</i>
State Work Period December 21-31		
	Christmas December 25	
TBD	Target Adjournment	December 18

Scheduled Floor Action

House Floor

Friday, Dec. 18, 9 a.m.

The House may consider omnibus legislation funding the government for the remainder of FY 2016 and/or legislation extending dozens of expired tax provisions.

Senate Floor

Recent Legislative Activity of Interest

Senate:

By Mr. **MCCAIN** (for himself and Mr. **FLAKE**):

S. 2406. A bill to require the Administrator of the Federal Aviation Administration to review certain decisions to grant categorical exclusions for Next Generation flight procedures and to consult with the airports at which such procedures will be implemented; to the Committee on Commerce, Science, and Transportation.

Measures Reported:

[S. 329](#), to amend the Wild and Scenic Rivers Act to designate certain segments of the Farmington River and Salmon Brook in the State of Connecticut as components of the National Wild and Scenic Rivers System, with an amendment. (S. Rept. No. 114-182)

[S. 556](#), to protect and enhance opportunities for recreational hunting, fishing, and shooting, with an amendment in the nature of a substitute. (S. Rept. No. 114-183)

[S. 782](#), to direct the Secretary of the Interior to establish a bison management plan for Grand Canyon National Park. (S. Rept. No. 114-184)

[S. 1583](#), to authorize the expansion of an existing hydroelectric project, with an amendment in the nature of a substitute. (S. Rept. No. 114-185)

[S. 1592](#), to clarify the description of certain Federal land under the Northern Arizona Land Exchange and Verde River Basin Partnership Act of 2005 to include additional land in the Kaibab National Forest. (S. Rept. No. 114-186)

[S. 1694](#), to amend Public Law 103-434 to authorize Phase III of the Yakima River Basin Water Enhancement Project for the purposes of improving water management in the Yakima River basin, with an amendment in the nature of a substitute. (S. Rept. No. 114-187)

[S. 1941](#), to authorize, direct, expedite, and facilitate a land exchange in El Paso and Teller Counties, Colorado. (S. Rept. No. 114-188)

[S. 1942](#), to require a land conveyance involving the Elkhorn Ranch and the White River National Forest in the State of Colorado. (S. Rept. No. 114-189)

[S. 2046](#), to authorize the Federal Energy Regulatory Commission to issue an order continuing a stay of a hydroelectric license for the Mahoney Lake hydroelectric project in the State of Alaska. (S. Rept. No. 114-190)

[S. 2069](#), to amend the Omnibus Public Land Management Act of 2009 to modify provisions relating to certain land exchanges in the Mt. Hood Wilderness in the State of Oregon, with amendments. (S. Rept. No. 114-191)

[S. 2083](#), to extend the deadline for commencement of construction of a hydroelectric project. (S. Rept. No. 114-192)

[H.R. 373](#), to direct the Secretary of the Interior and Secretary of Agriculture to expedite access to certain Federal land under the administrative jurisdiction of each Secretary for good Samaritan search-and-recovery missions. (S. Rept. No. 114-193)

[H.R. 1324](#), to adjust the boundary of the Arapaho National Forest, Colorado. (S. Rept. No. 114-194)

[H.R. 1554](#), to require a land conveyance involving the Elkhorn Ranch and the White River National Forest in the State of Colorado. (S. Rept. No. 114-195)

[H.R. 2223](#), to authorize, direct, expedite, and facilitate a land exchange in El Paso and Teller Counties, Colorado. (S. Rept. No. 114-196)

Further Continuing Appropriations: Senate passed [H.J. Res. 78](#), making further continuing appropriations for fiscal year 2016.

Saving Federal Dollars Through Better Use of Government Purchase and Travel Cards Act: Senate passed [S. 1616](#), to provide for the identification and prevention of improper payments and the identification of strategic sourcing opportunities by reviewing and analyzing the use of Federal agency charge cards.

House:

By Mr. **OLSON** (for himself, Mr. **LATTA**, Mr. **CUELLAR**, and Mrs. **KIRKPATRICK**):

H.R. 4265. A bill to amend the Clean Air Act with respect to national ambient air quality standards, including the 2015 ozone standards, and for other purposes; to the Committee on Energy and Commerce.

By Mr. **O'ROURKE**:

H.R. 4268. A bill to designate the Castner Range in the State of Texas, to establish the Castner Range National Monument, and for other purposes; to the Committee on Natural Resources, and in addition to the Committee on Armed Services, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. **ROGERS** of Kentucky:

H.J. Res. 78. A joint resolution making further continuing appropriations for fiscal year 2016, and for other purposes; to the Committee on Appropriations. considered and passed.

By Mr. **HARDY**:

H.J. Res. 79. A joint resolution proposing a balanced budget amendment to the Constitution of the United States; to the Committee on the Judiciary.

DOI in the News:

OMNIBUS SPENDING DEAL CONTAINS \$12B FOR INTERIOR. The [Greenwire](#) (12/16, Subscription Publication) reports that Congress' omnibus deal "offers perks for the sage grouse and the National Park Service and contains almost no policy riders that would hamstring the Obama administration's agenda on public lands, energy and wildlife." The \$1.15 trillion spending package for fiscal 2016 "contains \$12 billion for the Interior Department, including substantial boosts to its three main land management agencies." The package also "includes a three-year extension and a one-time funding boost for the Land and Water Conservation Fund, a partial victory for conservation groups, sportsmen, the Obama administration and pro-LWCF lawmakers from both parties."

[The Hill](#) (12/17, Cama, 654K) reports that "the small victory is far from what environmentalists and conservationists wished for, which was a permanent authorization of the program at its maximum \$900 million annual budget." Jennifer Rokala, executive director of the Center for Western Priorities, said in a statement, "The short-term renewal of America's most successful parks program is a sign of the ineffectiveness of this Congress and deep dysfunction in Washington."

The [E&E](#) (12/16) reports that "both parties were boasting of victories early" Wednesday morning. Democrats say "they protected Obama administration priorities and extended renewable energy incentives." Republicans say "funding for U.S. EPA, set to implement many of those White House priorities, will be at its lowest level since 2008 at \$8.1 billion."

Omnibus Package Includes Funding For Western Drought Response. [Politico Pro](#) (12/16) reports that "lawmakers weren't able to pull off an agreement on drought relief legislation for the parched West in the end-of-year spending deal, but they are pushing more money at the problem." The omnibus appropriations package unveiled Wednesday "includes \$100 million for Western drought response, with instructions to the Interior Department to spend it on things that can boost water supplies as quickly as possible."

Additional coverage was provided by the [Fresno \(CA\) Bee](#) (12/17, 270K), the [Miami \(FL\) Herald](#) (12/17, 620K), and the [Sacramento \(CA\) Bee](#) (12/17, 515K).

Omnibus Orders Interior To Work With States On Stream Protection Rule. [Politico Pro](#) (12/16, Subscription Publication) reports that Congressional appropriators are directing the Interior Department "to work more closely with big coal mining states over the agency's proposed stream rule, although they stopped short of blocking the rule." In an explanatory statement, on the \$1.1 trillion omnibus spending bill, appropriators say they are "concerned" about the rule. The report says OSM should "reengage state partners in a meaningful manner before finalizing the Stream Buffer Zone rule."

Wildfire-logging Deal Left Out Of Omnibus Package. [E&E Daily](#) (12/16, Subscription Publication) reports that "a deal to reform wildfire spending and increase the pace of forestry work was left out of the fiscal 2016 omnibus package amid opposition from key Senate leaders and environmentalists, dealing a blow to the Obama administration and the timber industry that had worked for weeks to iron out a deal." The article notes that "it marks the second straight year the administration and a large contingent of allies – loggers, sportsmen and conservationists included – have failed to fundamentally reform how the Forest Service and Interior Department pay to fight increasingly expensive wildfires that are siphoning money from the agencies' forest programs."

Wolf Provision Left Out Of Budget Bill. The [AP](#) (12/17, 2.15M) reports that "a proposal that would have taken gray wolves in the western Great Lakes region and Wyoming off the endangered list did not make it into a massive year-end congressional tax and spending package, an omission that surprised its backers but was welcomed Wednesday by groups that support maintaining federal protections for the predators." Rep. Collin Peterson said "budget negotiators dropped the provision from the final bill, which was unveiled late Tuesday, because the White House had threatened a veto if the bill contained any changes to the Endangered Species Act."

Additional coverage was provided by the [Minneapolis \(MN\) Star Tribune](#) (12/17, 1.15M), the [Washington \(DC\) Times](#) (12/17, 283K), [Bring Me The News \(MN\)](#) (12/16), and [WOOD-TV Grand Rapids \(MI\)](#) Grand Rapids, MI (12/16, 129K).

Federal Royalty Rates Untouched In Omnibus Bill. The [Grand Junction \(CO\) Daily Sentinel](#) (12/17, 73K) reports that a reduction in the federal royalty rates was "left out of an omnibus spending bill negotiated by House leaders this week." Industry is pushing for a rate of 2 percent, which they argue is "needed to better compete with producers in countries like China, where the industry benefits from subsidies and a recent devaluation in the country's currency." However, the Interior Department and BLM "oppose the 2 percent rate, saying the government must ensure a fair return to U.S. taxpayers and citing the anticipated loss of tens of millions of dollars of royalty revenues."

Additional Coverage. Additional coverage of the spending and tax bills was provided by the [Washington Post](#) (12/17, Debonis, Snell, 7.78M), the [New York \(NY\) Times](#) (12/17, Board, Subscription Publication, 11.64M), the [The](#)

[East Oregonian](#) (12/16, 24K), the [Daily Inter Lake \(MT\)](#) (12/17, 51K), the [National Journal](#) (12/17, Subscription Publication, 53K), the [National Parks Traveler](#) (12/17, 989), the [Arizona Republic](#) (12/16, 960K), the [Denver \(CO\) Post](#) (12/17, Press, 825K), the [Fort Collins \(CO\) Coloradoan](#) (12/16, 59K), the [Salem \(OR\) Statesman Journal](#) (12/16, 141K), the [Oregonian](#) (12/17, 769K), the [Daily Signal](#) (12/16), [Science Magazine](#) (12/17, 402K), [YubaNet \(CA\)](#) (12/17, 6K), [KRWG-FM Las Cruces \(NM\)](#) Las Cruces, NM (12/17, 1K), and [KRWG-FM Las Cruces \(NM\)](#) Las Cruces, NM (12/17, 1K).

MEDIA ANALYSES: REPEAL OF OIL EXPORT BAN WON'T HAVE IMMEDIATE IMPACT. A [New York Times](#) (12/17, Krauss, Cardwell, Subscription Publication, 11.64M) analysis reports that it is unlikely that the repeal of the ban on US oil exports contained in the spending deal before Congress will “have a big immediate impact on crude prices or suddenly lift the American oil industry out of its tailspin of bankruptcies, job losses and dropped dividends.” The Times says “few experts see a big expansion of markets anytime over the next year at least,” and “the price spread between American oil and international benchmark prices has narrowed significantly in recent months, making American exports less competitive.” [Reuters](#) (12/17, Gardner) similarly says that while permitting oil exports would be a victory for the oil industry, with oil prices and US output falling, traders say that in the over-supplied global market, there may not be foreign buyers for the US oil.

[USA Today](#) (12/16, Bomey, 5.56M) reported that allowing US producers to export “is a welcome development to the industry but hardly a boon to the bottom line,” adding that “few analysts expect the price of oil to swing sharply up or down because of the decision.” In a second article, [USA Today](#) (12/16, Jervis, 5.56M) reported that “industry experts and producers generally applauded the move but warn that the low price of oil remains the biggest hurdle in propping up the sagging balance sheets of producers – something exports won’t impact.”

The [Wall Street Journal](#) (12/17, Harder, Ailworth, Subscription Publication, 6.23M) reports that according to US oil producers, the impact of lifting the export ban will be long term as they seek out new markets, increase production and possibly keep global fuel prices low. The [Houston Chronicle](#) (12/17, 2.15M) reported that “the industry’s ongoing price slump would delay the benefits” of lifting the ban. However, exporting US crude “could be a boon to the Houston economy when oil prices begin to climb again,” as “the area’s Ship Channel and pipeline terminals are the main link between U.S. oil fields and the international markets.”

The [Financial Times](#) (12/16, Meyer, Crooks, Subscription Publication, 1.37M) reported that US crude will not flood the global market due to the supply glut and demand for US oil shrinking with the diminishing price gap between Brent and WTI. In a second article, the [Wall Street Journal](#) (12/17, Friedman, Subscription Publication, 6.23M) likewise reports that with the narrowing of the price gap between US crude and Brent, little oil is likely to be exported in the near future. Instead, US companies will try to stay in business through cost cuts and reduced spending on new drilling.

A [Bloomberg News](#) (12/17, Carroll, 3.4M) analysis reports that the arrival of US oil on the global market “will intensify competition for market share between oil-rich nations, publicly traded producers and trading houses, adding pressure to prices that have tumbled 67 percent in the past 18 months.” Bloomberg adds that “in the longer term, it may also extend a lifeline to shale drillers strapped for cash after amassing huge debt loads during the boom years.”

“Winners” In The Bill Include Big Oil, Renewable Energy. [The Hill](#) (12/17, Jagoda, Wheeler, 654K) reports that the deal’s winners include Big Oil and the renewable energy industry. The oil industry “emerged as a major beneficiary of the spending bill.” American Petroleum Institute President Jack Gerard said Wednesday, “Extensive research has determined that lifting the ban on U.S. crude oil exports would create American jobs, bolster the U.S. economy, and benefit consumers.” Renewable energy producers also “claimed a significant win” with the tax credit extension included in the bill. Said Tom Kiernan, CEO of the American Wind Energy Association, “This agreement will enable wind energy to create more affordable, reliable and clean energy for America by providing multi-year predictability as we have called for.”

The [Washington Post](#) (12/17, Mufson, 7.78M) reports that lifting the ban “is a triumph for [API], shale oil producers in states like Texas and North Dakota, free trade economists from both parties, and Sens. Lisa Murkowski (R-Alaska) and Heidi Heitkamp (D-N.D.), whose home state producers...will be able to get somewhat higher prices abroad.” Meanwhile, the Solar Energy Industries Association “said that the [tax credit extension]...would lead to \$125 billion in new private sector investment in the United States and that solar power would triple by 2022 to 95 gigawatts, equal to about 3.5 percent of U.S. electricity generation, offsetting emissions equivalent to 26 coal-fired power plants.”

[Reuters](#) (12/17, Gardner) reports separately that the renewable energy industry praised the bill, seeing it as a win for green energy. Reuters adds that the inclusion of the renewable tax extensions was key for many Democrats.

In an analysis, the [AP](#) (12/17) said the biggest proponents of ending the ban were oil companies such as Exxon Mobil and Continental Resources. The AP added that the economic benefits of lifting the ban “could be very broad.”

Some Environmentalists, Democrats Criticize Lifting Ban. [The Hill](#) (12/17, Cama, 654K) reports separately that

“environmental groups and some Democrats are furious” that the ban would be lifted by the spending bill. Environmentalists “said the extensions of wind and solar power tax breaks does not justify a provision that would generate billions of dollars for the oil industry.” House Minority Leader Nancy Pelosi (D-CA) “said Democrats are ‘curious’ to look more closely at the renewable energy tax incentives and whether they’ll offset the environmental impact of increased oil exports.”

On its website, [CBS News](#) (12/17, Hennelly, 4.1M) reported that “environmental and consumer groups denounced the move, which they say will result in an dramatic increase of oil use worldwide, an acceleration of global warming and higher prices for U.S. consumers.” [TIME](#) (12/17, 19.1M) added that environmentalists “say any incentive to increase drilling runs contrary to that deal and lessens the chances of meeting the agreement’s goal of holding temperature rise well below 2°C (3.6°F) by 2100.” However, Democratic Senator Barbara Boxer said in a statement, “There is a lot to be said, pro and con, about this agreement...[but] the extension of tax credits for solar and wind energy is a game changer.”

Commentary. In a [USA Today](#) (12/17, 5.56M) op-ed, energy journalist Bill Loveless writes that the benefits of lifting the ban “may be more hypothetical than certain, at least for now.” According to studies by the US Energy Information Administration “and other oil-market watchers,” any “substantial impact of lifting the restrictions...won’t occur for years.”

Nonetheless, the [Wall Street Journal](#) (12/17, Subscription Publication, 6.23M) praises the move in an editorial, saying it will alleviate domestic saturation and could save many companies and thousands of jobs.

In his “Heard on the Street” column for the [Wall Street Journal](#) (12/17, Subscription Publication, 6.23M), Spencer Jakab says that the spread between WTI and Brent will likely shrink even further with the possibility of US oil exports. The narrowing of the gap will weigh on refiners, as it already has this year, and will provide only small comfort to oil producers with oil prices so low.

In his column for [Reuters](#) (12/17), John Kemp wrote that allowing oil drillers and refiners to sell their products at market prices without unnecessary restrictions is the best way to keep a healthy US oil industry.

INTERIOR LAUNCHES ONLINE TOOL SHOWING COLORADO RIVER DROUGHT. [E&E Publishing](#) (12/16, 705) reports that the Interior Department on Wednesday “launched an online tool seeking to make the effects of the 16-year drought plaguing the Colorado River more accessible to the public.” The website “features interactive photos, graphs and data tables that illustrate how the 1,400-mile-long river has been affected by its most significant drought in a century.” Interior Deputy Secretary Michael Connor said in a statement, “Innovation is absolutely critical to helping us deal with the severe threats to water supply posed by drought and climate change. Projects like this one show the power of open data to help us better understand our resource challenges.”

Additional coverage was provided by the [Cache Valley \(UT\) Daily](#) (12/17, 639), the [Houston \(TX\) Chronicle](#) (12/17, 2.15M), the [Washington \(DC\) Times](#) (12/17, Press, 283K), [KCNC-TV Denver \(CO\)](#) Denver (12/16, 57K), [KBTX-TV Waco \(TX\)](#) Waco, TX (12/17, 81K), and [KOLO-TV Reno \(NV\)](#) Reno, NV (12/17, 2K).

WHITE HOUSE RECOGNIZES SENIOR EXECUTIVES FROM INTERIOR, DOE, EPA. [E&E Publishing](#) (12/16, 705) reports that senior executives from the EPA, the Nuclear Regulatory Commission, and the departments of Energy and the Interior on Tuesday “took home the government’s top award for excellence in civil service,” the Obama Administration announced. The Office of Personnel Management stated that the list of more than 100 recipients of the 2015 Presidential Rank Awards “was not comprehensive and only includes winners agreeing to public recognition as of Dec. 15.” The article notes that “the winners were announced the same day President Obama signed an executive order titled ‘Strengthening the Senior Executive Service,’ which raised the aggregate spending cap on awards to 7.5 percent in fiscal 2017 from the current 4.8 percent.”

ADVOCATES PUSH FOR RENEWAL OF LWCF. [Public News Service](#) (12/16, 306) reports that “advocates are calling on Congress to permanently reauthorize” the LWCF. According to the article, “bills to reauthorize the fund have broad bipartisan support but have failed to clear a critical House committee.”

2015 IS COSTLIEST WILDFIRE SEASON ON RECORD. [USA Today](#) (12/17, Rice, 5.56M) reports “the 2015 wildfire season is now the costliest on record,” with \$1.71 billion spent to fight the fires, according to the US Forest Service on Wednesday. According to the National Interagency Fire Center in Boise, Idaho, “with the season nearly over, 9.8 million acres burned in 2015, the second-highest total since records began in 1960.” The figures arrive after the Wildfire Funding Act – “a bipartisan effort” that would have classified wildfires like other national disasters “and ended the transfer of money from other programs to battle the blazes” – failed to make the federal budget this week.

REP. O’ROURKE INTRODUCES CASTNER RANGE NATIONAL MONUMENT ACT. [KFOX-TV](#) El Paso, TX (12/17, 13K) reports that Rep. Beto O’Rourke has introduced the Castner Range National Monument Act. The measure would

“eventually transfer the mountain range from the Department of Defense to the Department of Interior.”

INTERIOR RELEASES BEST PHOTOS OF 2015. The [New York Post](#) (12/16, 2.59M) reports that the Interior Department has “released their best photos of 2015, featuring an array of images including animals, auroras and more.”

Additional coverage was provided by the [Daily Mail](#) (12/17, Dailymail.com, 5.31M) and the [Daily Express \(UK\)](#) (12/17, 217K).

JOURNALISTS MEET WITH WHITE HOUSE SPOKESMAN ON TRANSPARENCY. The [E&E](#) (12/16) reports that “journalists and advocates of open government discussed their problems gaining access” to the Obama Administration in a meeting Tuesday with White House spokesman Josh Earnest. The meeting “came after several letters from a coalition of journalism and public interest groups blasted the White House for failing to live up to President Obama’s promises of open government, including one this past August.” According to the article, “reporters have complained about blocked access to the administration, press officials monitoring interviews with federal employees and slow responses to Freedom of Information Act requests.”

ADDITIONAL COVERAGE: INTERIOR ANNOUNCES NATURAL RESOURCE INVESTMENT CENTER. Additional coverage of the new Natural Resource Investment Center was provided by [Government Technology](#) (12/17, 7K), the [Durango \(CO\) Herald](#) (12/15, 31K), the [Lake Tahoe \(CA\) News](#) (12/17), the [Environmental Leader](#) (12/16, 1K), the [Brownfield Aq News](#) (12/16), [Ecosystem Marketplace](#) (12/17), and [KNAU-FM Flagstaff \(AZ\)](#) Flagstaff, AZ (12/17, 1K).

ADDITIONAL COVERAGE OF PARIS CLIMATE DEAL. Additional coverage of the Paris climate agreement was provided by the [Oracle Herald](#) (12/16), the [Wyoming Business Report](#) (12/16, 24K), and [Western Journalism](#) (12/17, 355K).

MARINE SUPPORTS NATIONAL MONUMENT STATUS FOR CALIFORNIA AREAS. Oscar Franquez Jr., a Santa Clarita native and a San Diego-based staff sergeant in the Marines, writes at the [San Diego Union-Tribune](#) (12/16, 534K) that, as a member of the armed services, he believes “we must preserve places like Mojave Trails, Sand to Snow and Castle Mountains by giving them the national monument designations they deserve.” He says that “for many of my fellow Marines, the California desert may be their first opportunity to experience and explore a desert landscape, to see desert wildlife, or visit ancient rock art.” Franquez concludes that “we must do everything in our power to conserve key areas of our public lands to ensure that our nation’s future generations can enjoy her beauty, setting the example for other nations to conserve and value their lands as well.”

ADVOCATE SAYS NATIONAL MONUMENTS WOULD PROTECT ANCIENT PLANTS. Robin Kobaly, executive director of The SummerTree Institute, writes at the [Palm Springs \(CA\) Desert Sun](#) (12/16, 98K) that vast landscapes of “extremely long-lived ancient plants grace the open spaces of our California Desert and its proposed national monuments, not only imparting a unique texture and ambiance to the landscape, but together offering a bounty we are just beginning to understand.” She says that she supports “the designation of the Mojave Trails, Sand to Snow, and Castle Mountains national monuments because they protect ancient forests of desert plants and soils that are irreplaceable.” She points out that “new research shows that these unassuming ancient plants – each many hundreds to thousands of years old – are responsible for incredible contributions to our well-being, with many of those gifts remaining mostly unappreciated.”

Empowering Native American Communities:

INTERIOR PARTNERS WITH TWO MORE TRIBES ON BUY-BACK PROGRAM. The [Native American Times](#) (12/17, 337) reports that Interior Deputy Secretary Michael L. Connor announced agreements with the Round Valley Indian Tribes of the Round Valley Reservation in California and the Turtle Mountain Band of Chippewa Indians of North Dakota to implement the Land Buy-Back Program for Tribal Nations. Connor said, “Federal and tribal partners must do all we can to give landowners a meaningful chance to participate in this unique Program and receive compensation for their fractional interests. We welcome the active participation of the Round Valley Indian Tribes and the Turtle Mountain Band of Chippewa Indians, which will be critical to the success of implementing the Buy-Back Program at their locations.”

STUDENTS AT BLACKFEET BOARDING DORMITORY RECEIVE NEW TABLETS. The [Cut Bank \(MT\) Pioneer Press](#) (12/17, 237) reports that students at the Blackfeet Boarding Dormitory received new tablets on Wednesday. About 90 new tablets were “handed out to every student there, the result of a partnership among Verizon, Microsoft and President Obama’s Generation Indigenous (Gen-I) initiative that is bringing wireless broadband connectivity to 10 Bureau of Indian Education facilities.”

Also providing coverage is [KRTV-TV Great Falls \(MT\)](#) Great Falls, MT (12/17, 2K).

HAWAIIAN SELF-GOVERNANCE UNCERTAIN AFTER ELECTION CANCELLED. The [AP](#) (12/16, 996K) reports that “the decision to cancel an election for Native Hawaiian self-government and skip ahead to a convention has many questioning whether the effort has a chance at achieving anything.” Nai Aupuni, “the organization guiding the election process, on Tuesday terminated the election to select 40 delegates who would meet at a convention and come up with a plan for self-determination for Native Hawaiians.” Instead, all 196 candidates will be offered seats at the convention, planned for four weeks starting in February.

Additional coverage was provided by the [Honolulu \(HI\) Civil Beat](#) (12/17, 41).

PILOT PROGRAM WILL EQUIP LAW ENFORCEMENT ON TRIBAL LANDS WITH NALOXONE. [Reuters](#) (12/17, Brandes) reports that, as early as next year, Oklahoma’s Bureau of Indian Affairs (BIA) law enforcement officers will be equipped with naloxone in a pilot program aimed at reducing opioid and heroin-related deaths among Native Americans.

The [Tulsa \(OK\) World](#) (12/17, Krehbiel, 365K) reports that “officials with the Bureau of Indian Affairs, Indian Health Services and the White House Office of National Drug Control Policy announced a memorandum of understanding Wednesday afternoon that will train BIA officers on how to identify opioid and heroin overdoses and administer an atomized dosage of naloxone.”

Additional coverage was provided by the [Oklahoman](#) (12/17, 470K), [KTUL-TV Tulsa \(OK\)](#) Tulsa, OK (12/17, 30K), and [KOKI-TV Tulsa \(OK\)](#) Tulsa, OK (12/17, Lincoln, 72K).

NATIVE AMERICAN BANK NAMED PERFORMANCE LENDER BY INTERIOR. The [Native American Times](#) (12/17, 337) reports that Native American Bank, N.A. has been “designated by the Office of Indian Energy and Economic Development Division of Capital Investment as a Department of the Interior Performance Lender, President and CEO Thomas D. Ogaard recently announced.”

NAVAJO NATION SEEKS FUNDING TO IMPROVE RURAL SCHOOL BUS ROUTES. The [Salt Lake \(UT\) Tribune](#) (12/17, 339K) reports that San Juan County in Utah and the Navajo Nation is seeking funds to improve “roads used to bus children to school.” The funds to “convert 87 miles of dirt road to gravel” was “left out of a \$305 billion transportation funding bill signed by President Barack Obama earlier this month.” In a statement released Tuesday, San Juan County Commissioner Rebecca Benally said “the push for bus-route funding will continue in 2016.”

Also reporting on the story is the [Deseret \(UT\) News](#) (12/17, 476K).

POLICE OFFICER TESTIFIES HOMICIDE WEAPON WAS STOLEN FROM BIA AGENT. The [Billings \(MT\) Gazette](#) (12/17, 200K) reports that “a Billings police officer testified the weapon used to kill David Vallie outside a downtown apartment complex was stolen from a Bureau of Indian Affairs special agent.” Jonathan Michael Martinez is “on trial for the deliberate homicide of Vallie on Oct. 2, 2014.” Officer David Firebaugh “testified he recovered a gun from a hit-and-run crash he investigated the day after Vallie’s death.” Firebaugh “ran the serial number and found it belonged to Bureau of Indian Affairs Special Agent John Dodd.”

PRIEST SAYS AUTHORITIES ARE TARGETING RELIGIOUS SCHOOLS. Patrick Beretta, part time chaplain, writes at the [Huffington Post](#) (12/17, Beretta, 251K) to criticize what he sees as the unfair targeting of religious schools by Federal and state authorities. He points to a recent Politico piece by Maggie Severns where she writes, “The network of schools for Native American children run by an obscure agency of the Interior Department remains arguably the worst school system in the United States.” Beretta says that “in light of this acknowledged disaster, the continued challenges directed at private religious education are inexcusable.” He says the Montana Department of Revenue has redefined the term: “qualified education provider” to exclude private religious schools. Matt Brower, the Director of the Montana Catholic Conference told a Montana Department of Revenue hearing that “over 23% of our students are Native American. ... Parents and others who wish to help students attend religiously affiliated schools by contributing to student scholarship organizations shouldn’t be discriminated against.”

Office of Insular Affairs:

PRESIDENT OBAMA SIGNS ESEA REAUTHORIZATION. The [Pacific News Center](#) (12/17) reports that President Obama has “signed an historic education bill that will mean millions in new education dollars for Guam public schools.” The “Every Student Succeeds Act” replaces the 2001 “No Child Left behind” law and “would boost territory Title I education funding by nearly 25% for Guam, according to Congressional Research Service estimates.” Also, “Bureau of Indian Education schools would be separated out from the Elementary and Secondary Education Act formula and receive their own, separate allocation.”

Tackling America's Water Challenges:

SEN. FEINSTEIN CONTINUES EFFORTS ON DROUGHT BILL. The [E&E](#) (12/16) reports that Sen. Dianne Feinstein's "quest to introduce a bill addressing California's drought continued" Tuesday "when she sat down with federal officials responsible for ensuring compliance with the Endangered Species Act." Discussions with California House Republicans "fell apart late last week," but Feinstein said that "she still intends to introduce a bill this week." She met with federal wildlife agencies, "which have been skeptical of previous attempts to adjust protections for endangered fish in the state's main water hub, the Sacramento-San Joaquin River Delta."

FIRST SCOPE FOR GILA DIVERSION PLAN DUE IN JANUARY. The [Silver City \(NM\) Daily Press](#) (12/16) reports that "the New Mexico Unit of the Central Arizona Project moved one step closer to having an actual plan for their controversial diversion of water from the Gila River, thanks to an agreement with the Interstate Stream Commission to hire an engineer for preliminary design work." According to the article, "the entity approved a memorandum of understanding with the New Mexico Interstate Stream Commission on Tuesday that will allow the ISC hire an engineer for the 'up-to-30 percent' design of the as-yet-undefined project." However, the cost of the proposed project "still remains a point of contention among the public."

Additional coverage was provided by the [High Country \(CO\) News](#) (12/17, 74K).

CALIFORNIA REGULATORS BACK OFF PLAN TO WITHHOLD WATER FOR SALMON. The [AP](#) (12/17, 2.15M) reports that California drought regulators have "backed off a plan to withhold water from farms and cities in favor of an endangered species of salmon, instead choosing a more flexible approach." The State Water Resources Control Board on Tuesday "voted to require that regulators work to ensure the Sacramento River does not exceed 56 degrees next year, the highest temperature at which juvenile winter-run Chinook salmon can survive." According to the article, "the board had been considering a plan that would have required the U.S. Bureau of Reclamation to hold back an additional 200,000 acre-feet of water at Lake Shasta through next October, but that plan was met by opposition from farmers and groups representing downstream cities."

Additional coverage was provided by the [Washington \(DC\) Times](#) (12/17, 283K), the [Miami \(FL\) Herald](#) (12/17, 620K), [Courthouse News](#) (12/16, 7K), [KPIX-TV San Francisco \(CA\)](#) San Francisco (12/16, 89K), [KTXL-TV Sacramento \(CA\)](#) Sacramento, CA (12/16, 89K), and [KXJZ-FM Sacramento \(CA\)](#) Sacramento, CA (12/16, 6K).

BOR SEEKS INPUT FOR PROPOSED HUNGRY HORSE POWER PLANT MODERNIZATION. The [Char-Koosta News](#) (12/17, 12K) reports that the BOR is "seeking public comments to identify issues and concerns to be addressed in an Environmental Assessment for a proposed Hungry Horse Power Plant (HHPP) Modernization, part of Hungry Horse Dam in northwest Montana." According to the article, "the proposed modernization and overhaul project will alleviate safety-related concerns, potential limitations on plant operations, and increased risk to sustained long-term operation of the plant."

Securing America's Energy Future:

Onshore Energy Development:

LAWMAKERS QUESTION INTERIOR OVER DELAYS IN ENERGY LEASE SALES. The [AP](#) (12/17, 51K) reports that "members of Congress from eleven states say they're concerned about postponements to recent oil and gas lease sales." The legislators wrote Interior Department Assistant Secretary Janice Schneider "asking her to explain the delays by Jan. 5." The effort is led by Natural Resources Committee Chairman Rob Bishop and Oversight Committee Chairman Jason Chaffetz.

Additional coverage was provided by the [Columbus \(IN\) Republic](#) (12/17, 64K), the [Escanaba \(MI\) Daily Press](#) (12/17, 781), the [Washington \(DC\) Times](#) (12/17, 283K), and [KULR-TV Billings \(MT\)](#) Billings, MT (12/17, 2K).

REP. GOSAR CRITICIZES ENVIRONMENTAL REGULATIONS FOR IMPACT ON COAL INDUSTRY. [EPNewswire](#) (12/17) reports that Rep. Paul A. Gosar "recently criticized several proposed environmental regulations for their potential effects on the coal industry after taking part in committee hearings on the rules." Gosar said that "a measure proposed by the Office of Natural Resources Revenue (ONRR) would impact the valuation of federal onshore oil, natural gas and coal royalties." Gosar said, "The Office of Natural Resources Revenue's proposed rule is a bureaucratic nightmare that will make it impossible to produce coal on federal lands, including tribal land. If implemented, this fundamentally flawed new regulation will kill jobs, result in an unconstitutional tax on coal exports and bankrupt even more American energy companies." He also "discussed the proposed changes to the Stream Protection Rule, which would create a wider margin between streams and mining operations." Gosar said, "The Department of the Interior's new stream buffer zone rule is even more troubling and will negatively affect both surface and underground coal mines. This terrible new regulation is projected to sterilize between 27 percent and 64 percent

of recoverable reserves. The associated decline in annual coal production will have a direct impact on employment and risks killing between 112,757 and 280,809 mining-related jobs.”

GROUPS FILE COMPLAINT AGAINST ARCH COAL. The [AP](#) (12/17, 2.15M) reports that the Powder River Basin Resource Council and the Western Organization of Resource Councils have “filed a complaint, saying one of the largest coal mine operators in Wyoming is violating state and federal mining laws.” The complaint claims Arch Coal is “mining coal without setting aside sufficient funds to reclaim land it disturbs.” The complaint was filed Wednesday with the Wyoming Department of Environmental Quality and the federal Office of Surface Mining.

Additional coverage was provided by the [Billings \(MT\) Gazette](#) (12/17, 200K), the [Casper \(WY\) Star-Tribune](#) (12/17, 81K), the [Denver \(CO\) Post](#) (12/17, Press, 825K), and the [Washington \(DC\) Times](#) (12/17, 283K).

OKLAHOMA LANDOWNER SEEKS TO INTERVENE IN DRILLERS’ BIA LAWSUIT. [Law360](#) (12/17, 30K) reports that “an Oklahoma landowner seeking to intervene in a lawsuit that aims to compel the U.S. Bureau of Indian Affairs to process oil and gas drilling applications struck back at efforts to block his involvement Wednesday in Oklahoma federal court, arguing his intervention is vital and won’t delay proceedings.” David W. Hayes, “who says he owns and lives on 475 acres in Osage County on which oil and gas wells have been drilled, said granting the parties’ request to block him from the case would be unfair.”

Offshore Energy Development:

CLINTON SAYS “SKEPTICAL” ABOUT SOUTHEAST OFFSHORE DRILLING. The [Charleston \(SC\) Post and Courier](#) (12/16, 291K) reports that Hillary Clinton told a South Carolina radio station that she is “very skeptical about the need or desire for us to pursue offshore drilling off the coast of South Carolina and...other Southeast states.” Clinton said such a move would delay a move to renewable energy resources needed to mitigate climate change.

Coastal Businesses Urge Gov. Haley To Oppose Offshore Energy Exploration. The [Charleston \(SC\) Post and Courier](#) (12/16, 291K) reports that more than 400 “mostly coastal small businesses” sent a letter to South Carolina Gov. Nikki Haley on Wednesday “voicing their opposition to oil and gas drilling and seismic testing off the state’s coast because of fears it could harm the environment and tourism.” Haley’s spokeswoman, Chaney Adams, said the governor believes offshore exploration “is critical to our future because it means jobs, energy independence from other countries and security for our state.”

Additional coverage was provided by [WCSC-TV Charleston \(SC\)](#) Charleston, SC (12/17, 39K) and [WIS-TV Columbia \(SC\)](#) Columbia, SC (12/17, 89K).

BSEE LAUNCHES PILOT PROGRAM FOR OFFSHORE OIL SAFETY. [Safety And Health Magazine](#) (12/17) reports that the BSEE has “initiated a pilot program in an effort to improve safety at offshore oil and gas operations.” The bureau’s Risk-Based Inspection Program will “use data from audits and annual inspections to identify offshore facilities that possess a greater risk profile. Considerations such as the size of a facility and the production of hydrogen sulfide also will factor into the risk profile.” BSEE Director Brian Salerno said, “By focusing on facilities based upon their risk factors, BSEE can more efficiently and effectively manage limited inspection and audit resources. Risk factors include design, operating and environmental characteristics of the facility, which may correlate to a greater likelihood of experiencing an incident. However, it does not mean that the facility has a bad safety record or is a poor safety performer, only that certain risk factors are present that must be managed.”

ADDITIONAL COVERAGE: SHELL MOVES TO PRESERVE ARCTIC DRILLING RIGHTS. Additional coverage of Shell’s efforts to preserve its Arctic drilling rights was provided by the [Alaska Dispatch News](#) (12/16, 203K), [Natural Gas Intelligence](#) (12/17, Subscription Publication), and [KTOO-FM Juneau \(AK\)](#) Juneau, AK (12/16).

ADDITIONAL COVERAGE: BOEM ASKED TO HOLD OFF ON SEISMIC TESTING IN ATLANTIC. Additional coverage that “a bipartisan group of nearly three dozen members of the United States Congress has asked the federal Bureau of Ocean Energy Management to rescind its decision allowing companies to explore for energy resources off the country’s southeastern coast” was provided by the [Daytona Beach \(FL\) News-Journal](#) (12/16, 162K).

America’s Great Outdoors:

Bureau of Land Management:

TESTS CONFIRM GENETIC PURITY OF UTAH BISON HERD. The [Deseret \(UT\) News](#) (12/17, Hollenhorst, 476K) reports that “new genetic tests confirm what has long been suspected: a herd of bison in the Henry Mountains is one of the few surviving populations of pure American plains bison, a species that once dominated the Great Plains and the western United States by the millions.” Professor Johan du Toit of Utah State University’s Department of Wildland

Resources explains that by “pure” he means “bison that have not been contaminated with cattle genes” and that “most of the bison that are around today, particularly those on private land, are hybrids.” The News points out that “the absence of cattle genes is not due to a lack of cross-breeding opportunities. The Henry Mountains bison roam freely in an area south of Hanksville where domestic ranch cattle also graze under permits from the Bureau of Land Management.”

Additional coverage was provided by [Phys \(UK\)](#) (12/17, 74K) and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (12/17, 464K).

LAUGHLIN FOUNDER DONATES PERSONAL RETREAT TO BULLHEAD CITY, ARIZONA. The [Las Vegas Review-Journal](#) (12/17, Hawkins, 403K) reports Don Laughlin, founder of the Colorado River gaming town of Laughlin, and his associates conveyed title of his remote Chief Mountain retreat to Bullhead City, Arizona on Tuesday. The Review-Journal says that the \$7.7 million “property located in the Black Mountains of Arizona features more than 1,120 acres, a cabin, a bunker, a helipad and an acre lake stocked with fish.” City Manager Toby Cotter said terms of the deal require the city to “hold the land for at least five years” and that “the city can later sell the property or trade it to the Bureau of Land Management for parcels that the BLM holds closer to Bullhead City.”

Additional coverage was provided by the [Mohave Valley \(AZ\) Daily News](#) (12/17, 23K).

ATTORNEY: BLM “SHOWS CONTEMPT FOR PROPERTY RIGHTS.” Chance Weldon, an attorney with the Center for the American Future at the Texas Public Policy Foundation, writes at the [Washington Examiner](#) (12/17, 112K) that “since 2008, the Bureau of Land Management has claimed up to 90,000 acres of private property inside Texas along the Red River as federal land.” Weldon says that the property owners have tried and failed to get BLM to come to the table and that last month they filed a Federal lawsuit against BLM. He points out that in response, BLM released statements claiming the lawsuit is premature but that “BLM remains committed to working with adjacent landowners, counties and other stakeholders through our ongoing planning process to properly identify the extent of federal holdings in the Red River.” However, Weldon says that “all that BLM’s public statements signify is contempt for the situation it has put these families into by forcing them into a lawsuit to defend their homes.”

Fish and Wildlife Service:

LAWSUIT SEEKS PROTECTION FOR COASTAL MARTEN. [E&E Publishing](#) (12/16, 705) reports that two conservation groups on Wednesday challenged the FWS’s decision to not protect the coastal marten under the Endangered Species Act. The lawsuit from the Center for Biological Diversity and the Environmental Protection Information Center also “challenges a new rule that FWS relied upon to avoid adding the elusive, forest-dwelling carnivore to the federal lists of endangered and threatened species.”

Additional coverage was provided by the [Eureka \(CA\) Times Standard](#) (12/16, 56K) and the [Lost Coast Outpost \(CA\)](#) (12/16).

MONTANA SEEKS PRIVATE LANDOWNER COOPERATION ON SAGE GROUSE RECOVERY. [Montana Public Radio](#) (12/17) reports that Montana officials are “working out the details of the landmark agreement to save the greater sage grouse without having to put the bird on the Endangered Species List.” The Montana Sage Grouse Oversight Team met Tuesday in Helena. They are working to complete the state’s Sage Grouse Habitat Conservation Program by the first of the year.

EFFORTS TO KEEP ASIAN CARP FROM REACHING GREAT LAKES APPEAR UNSUCCESSFUL. The [AP](#) (12/17, Flesher) reports that the Obama Administration and state officials pledged swift action six years ago to stop the progress of Asian carp toward the Great Lakes. The AP says that over \$300 million has been spent since then but that “the quest for a surefire deterrent seems to be coming up empty.” Meanwhile, “an advisory panel that has debated solutions for several years is scheduled to hold what may be its final meeting Thursday, with no sign of a consensus plan.” The AP explains that this fall, two small silver carp were discovered farther up the Illinois River than ever before, meaning that the population had advanced “66 miles since January.” Charles Wooley, deputy Midwestern regional director of the Fish and Wildlife Service, said, “We’d not seen that kind of movement in the last four or five years. ... And all of a sudden, boom.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (12/17, John Flesher |, Ap, 7.78M) and the [Washington \(DC\) Times](#) (12/17, Flesher, 283K).

CHARLES M. RUSSELL NATIONAL WILDLIFE REFUGE MANAGER DISCUSSES BISON, GRAZING, HUNTING. The [Great Falls \(MT\) Tribune](#) (12/16, 76K) reports that Paul Santavy is “nearing his one-year anniversary as manager of the Charles M. Russell National Wildlife Refuge.” In an interview before a meeting of the Russell Country Sportsmen’s Association on Tuesday, Santavy “discussed black-footed ferret recovery, grazing reform, declining budgets, the possibility of bison reintroduction on the refuge and his love for the second largest refuge in the Lower

TWO PANTHER DEATHS CONTINUE RECORD-BREAKING TREND IN FLORIDA. The [Fort Myers \(FL\) News-Press](#) (12/16, 177K) reports that “the death of a 2-½-year-old female panther and a 6-year-old male panther continues the record-breaking trend of panthers killed in Florida this year.” Both carcasses will be sent to the Florida Fish and Wildlife Conservation Commission Wildlife Research Lab in Gainesville for a necropsy, the agency said. In all, 39 Florida panthers have died this year.

MANATEE RESCUED IN SOUTH CAROLINA. [KTVU-TV](#) San Francisco (12/17, 11K) reports that “members of the SeaWorld Orlando Rescue Team took to the road this week to aid a manatee spotted in the upper reaches of the Cooper River in Charleston, S.C.” A rescue team along with FWS, the National Oceanic and Atmospheric Administration’s National Ocean Service, and the South Carolina Department of Natural Resources were “able to help save this wayward manatee.”

ART DEALER SENTENCED FOR ROLE IN SELLING ENDANGERED RHINOCEROS HORNS. [KTVU-TV](#) San Francisco (12/17, 11K) reports that “a San Francisco art dealer was sentenced in federal court in Las Vegas today to one year and two days for his role in selling two horns from an endangered Black Rhinoceros for \$55,000.” Lumsden Quan was arrested on March 19, 2014 “after selling the horns to an undercover U.S. Fish and Wildlife Service agent who was posing as a Colorado wildlife collector.” According to the article, “Quan pleaded guilty before U.S. District Judge Gloria Navarro in Las Vegas in August to one count of conspiring to violate the federal Lacey and Endangered Species acts and one count of violating the Lacey Act.”

ADDITIONAL COVERAGE: FWS COULD REMOVE PROTECTIONS FOR YELLOWSTONE GRIZZLY. Additional coverage that the FWS is “once again poised to pursue removal of Endangered Species Act protections for grizzly bears in the Greater Yellowstone Ecosystem” was provided by the [Missoula \(MT\) Independent](#) (12/17, 65K).

FWS DECISION ON CHIMPANZEES ONE OF THE “LOBBYING VICTORIES OF 2015.” As one of the ten of the top “Lobbying Victories Of 2015,” [The Hill](#) (12/16, Wilson, 654K) picks a FWS decision earlier this year that “extended endangered-species protection to chimpanzees held in captivity altered how entities could hold them.” The winners are: “People for the Ethical Treatment of Animals; the Humane Society of the United States; Steve Ross, director of the Lester E. Fisher Center for the Study and Conservation of Apes at the Lincoln Park Zoo in Chicago; and the Jane Goodall Institute.”

ROLE OF INTENT IN MIGRATORY BIRD ACT ENFORCEMENT EXAMINED. John Villasenor, a UCLA faculty member and senior fellow at the Brookings Institution, writes at [Vice](#) (12/17, 1.88M) about the case of an 11-year old Virginia girl and her mother who tried to rescue a baby woodpecker from a cat. However, the mother was confronted by a US Fish and Wildlife Service employee and was fined \$535 under the Migratory Bird Treat Act while being told that she could face conviction and imprisonment. Villasenor says that the FWS eventually backpedaled, citing a “clerical error,” but that “the incident illustrated the potential unintended consequences of criminal statutes drafted using language that is silent regarding the state of mind of the defendant.” He goes on to explore this issue, noting that “there are many other federal and state statutes that fail to speak to intent.”

National Park Service:

34 CONGRESS MEMBERS SUPPORT BOTTLED WATER BAN IN NATIONAL PARKS. [Food & Water Watch](#) (12/17) reports that “more than thirty members of Congress sent a letter to National Park Service Director Jon Jarvis supporting the parks going bottled water free over the objections of the industry.” According to the article, “the letter was sent in response to a bottled water industry attempt to ban the parks from using federal funds to implement a bottled-water-free policy via a controversial appropriations bill rider.” The letter, sponsored by Rep. Raúl M. Grijalva, “highlights the broad base of public support for these bottled-water-free policies in national parks.”

INTERIOR’S IG RAISES CONCERNS ABOUT INVESTIGATION INTO BOY’S DEATH AT LASSEN VOLCANIC NATIONAL PARK. The [Greenwire](#) (12/16, Subscription Publication) reports that the Interior Department’s Office of Inspector General on Tuesday “highlighted inconsistencies and unanswered questions about the National Park Service’s investigation of a 9-year-old boy’s death at Lassen Volcanic National Park.” However, the watchdog’s report “ultimately did not corroborate any of the allegations made by lawyers representing the family of the late Thomas Botell Jr.”

FOURTH GRADERS RECEIVE FREE NATIONAL PARK PASSES IN COLORADO. [KUSA-TV](#) Denver (12/16, 559K) reports that federal agencies in Colorado handed out Every Kid in a Park passes to fourth graders Wednesday. According to the article, “students also got to participate in several interactive activities by the U.S. Forest Service, Fish and Wildlife Service, Bureau of Land Management and National Oceanic and Atmospheric Administration’s National Weather Service in the Colorado Story Hall.”

SLEEPING BEAR DUNES NATIONAL LAKESHORE PASS TO FEATURE LOCAL STUDENT'S WORK. The [Traverse Ticker](#) (12/17) reports that the Sleeping Bear Dunes National Lakeshore has “announced the winner of its Kids’ Centennial Artwork Contest: Chloe Jerva, a sixth grade student at Glen Lake Community Schools.” According to the article, “the park held the contest to celebrate the 100th anniversary of the National Park Service and to also select an image for the front of the park’s 2016 Annual Park Entrance Pass.”

RETIRED NPS OFFICIAL TO PLEAD GUILTY IN THEFT OF ANCIENT REMAINS. The [AP](#) (12/17, 2.15M) reports that a retired NPS superintendent “appeared in court Wednesday to face allegations that he stole ancient Native American remains that he was supposed to protect and concealed them for decades.” Former Effigy Mounds National Monument superintendent Thomas A. Munson, “76, was released pending further proceedings after a brief arraignment hearing.” U.S. Attorney Kevin Techau said “his office has reached a plea agreement that calls” for Munson “to plead guilty to one count of embezzlement of government property.” The plea hearing is scheduled for Jan. 4.

Additional coverage was provided by the [Washington \(DC\) Post](#) (12/17, Ryan J. Foley |, Ap, 7.78M), the [Washington \(DC\) Times](#) (12/17, Foley, 283K), [ABC News](#) (12/17, 3.35M), the [Daily Mail](#) (12/17, 5.31M), and the [Des Moines \(IA\) Register](#) (12/16, 300K).

REPORT: CAPTAIN LOST TRACK OF SHIP THAT STRUCK ARIZONA MEMORIAL DOCK. The [AP](#) (12/17, 2.15M) reports that “a hospital ship struck the dock of the USS Arizona Memorial in May after the pilot and ship’s captain lost track of where the ship was going as it was leaving Pearl Harbor, an investigation into the incident released Wednesday said.” According to a report by the U.S. Military Sealift Command, “the harbor pilot on board the USNS Mercy had poor control over tugboats guiding the ship” and “this resulted in the ship unexpectedly heading toward the Arizona.” The report said “it also led the pilot and the ship’s captain to lose track of where the ship was going for three minutes, leading the ship to hit the dock.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (12/17, Audrey Mcavoy |, Ap, 7.78M), the [Washington \(DC\) Times](#) (12/17, Mcavoy, 283K), the [Albuquerque \(NM\) Journal](#) (12/17, 263K), and the [Daily Mail](#) (12/17, 5.31M)
Human error blamed for ship hitting Arizona Memorial dock

NPS EXTENDS VALLEY FORGE DEER CULLING. The [Philadelphia Inquirer](#) (12/17, 641K) reports that “what originally was to be a four-year program of killing deer at Valley Forge National Historical Park has entered its sixth season.” The NPS said that “although the deer population has been reduced to the target level of 185 – down 85 percent from the 1,277 when the shootings started in 2010 – the culling operation still is needed to maintain the density.” The agency says that “deer-population control is critical to maintaining plant life that sustain other species in the park.”

ENDANGERED TADPOLES FROM SEQUOIA AND KINGS CANYON NATIONAL PARKS SUCCESSFULLY MORPHED INTO FROGS. The [Fresno \(CA\) Bee](#) (12/17, 270K) reports that “critically endangered tadpoles that were emergency evacuated in August from remote locations in Sequoia and Kings Canyon National Parks to the Oakland Zoo and the San Francisco Zoo, have now morphed into healthy mountain yellow-legged frogs, the National Park Service announced on Dec. 16 in Oakland.” Danny Boiano, aquatic ecologist for Sequoia and Kings Canyon National Parks, said, “Mountain yellow-legged frogs are getting hammered by non-native trout and disease, and urgent intervention was needed to keep two populations in Sequoia and Kings Canyon National Parks from disappearing. The National Park Service is fortunate to partner with Oakland and San Francisco zoos on this project; along with several agencies and universities, we are all striving to recover these iconic endangered species.”

CRAYFISH INVADING CRATER LAKE, SOLUTIONS EXAMINED. The [AP](#) (12/17, Mann) reports from Medford, Oregon, where “underwater barriers in Crater Lake are being floated as one idea to slow the invasion of millions of non-native crayfish that are threatening a salamander known as the Mazama newt.” The AP explains that “crayfish were introduced to the lake by humans in 1915 to provide food for non-native fish. An explosion in the number of non-native species threatens not only the newt, but ultimately the awe-inspiring clarity of Crater Lake itself.” Dr. Sudeep Chandra, a biology professor at the University of Nevada in Reno, served as “chairman of a scientific panel that is working with Crater Lake National Park officials to find ways to slow down the crayfish invasion.” The AP says that the “panel suggested finding a way to sequester newt breeding areas just outside the lake” and that “installing the metal barriers, which likely would be made of aluminum, is another option but would require extensive environmental analysis.”

YOSEMITE NATIONAL PARK RANGER RECEIVES INTERIOR AWARD FOR SUPERIOR SERVICE. The [Sierra \(CA\) Sun Times](#) (12/17) reports that Yosemite National Park Ranger Shelton Johnson was given the Superior Service Award of the Department of the Interior for “his passion for connecting minorities to parks, his meticulous research that forms the basis of his innovative interpretive programs, and his superlative ability to articulate powerful messages for the National Park Service.”

NON-NATIONAL PARK OPTIONS FOR MAINE LAND ENCOURAGED. James L. Robbins, former president and owner of Robbins Lumber, writes at the [Bangor \(ME\) Daily News](#) (12/16, 165K) that “in 2000, Robbins Lumber put a conservation easement on the 20,767 acres surrounding Niatous and West Lakes to protect the land forever.” He says that he told Roxanne Quimby about this project because I wanted her to know she had other options and her answer was that “it is a national park or nothing.” Robbins says that he opposes her park “because she only owns 87,500 acres of the 150,000 acres she promises to donate” and the other acres are owned by individual land owners who may feel threatened by the proposal. He concludes by urging Quimby to establish a conservation easement, because “it would be available for recreation, it would remain in the tax base, wildlife and other resources would be protected and the wood would still be available.”

Top National News:

OBAMA TO VISIT VICTIMS OF SAN BERNARDINO ATTACK. The White House announced on Wednesday that President Obama will visit the victims and families impacted by the San Bernardino attacks on Friday. Reporting on the story is generally focused on the information conveyed by the Administration regarding the visit, which is being described as limited, but also highlights that Obama has made similar visits throughout his presidency as a result of other mass shooting situations. FBI Director Comey’s announcement that the San Bernardino shooters did not issue public social media postings about their extremist views received more attention and analysis than the President’s plans.

On [NBC Nightly News](#) (12/16, story 5, 2:15, Holt, 7.86M), Pete Williams reported the Administration said on Wednesday night that Obama will meet with San Bernardino attack victims and their families on Friday. White House spokesman Josh Earnest said, according to [USA Today](#) (12/17, Korte, 5.56M), “While he is en route to Honolulu, the president will stop in San Bernardino, California to visit privately with the families of the victims of the terror attack in San Bernardino earlier this month.”

The [AP](#) (12/17, Superville) characterizes the visit as “continuing a grim ritual of his time in office,” while the [Los Angeles Times](#) (12/16, Memoli, 3.6M) says it will allow the President to “join in mourning the 14 victims.” [TIME](#) (12/17, Rhodan, 19.1M) and [Politico](#) (12/16, Gass, 1.19M) reported Earnest indicated the visit will be similar to the President’s travel to Roseburg, Oregon earlier this year following the mass shooting at Umpqua Community College. The [Wall Street Journal](#) (12/17, Lee, Subscription Publication, 6.23M) and the [Washington Times](#) (12/17, Boyer, 283K) explain the White House said Obama will conduct private visits with the family out of the media’s view.

The [Huffington Post](#) (12/16, Bendery, 251K), [Reuters](#) (12/17, Rampton, Edwards, Chiacu), and [Times of San Diego](#) (12/17, Sklar) report that the San Bernardino stop was added to the itinerary of a previously scheduled trip to Hawaii, where the President and his family will vacation for Christmas. The [San Bernardino \(CA\) Sun](#) (12/17, Yarbrough, 143K) reports that a White House official indicated the President will not take part in any public events during the visit. Rep. Pete Aguilar, who represents San Bernardino, said in a statement, “I’m pleased that President Obama will be traveling to San Bernardino to meet with family members of those lost in the horrific attack at the Inland Regional Center.” Aguilar added, “I’ve conveyed to the White House the importance of the President’s presence in our region as we rebuild, and I join with our community in welcoming him to San Bernardino.”

[The Hill](#) (12/16, Fabian, 654K) “Briefing Room” blog said Obama “has spent this week trying to show the public he has a handle on the fight against” ISIL and he “has faced criticism that he has struck the wrong tone in response to the attacks” by “focusing too heavily on the issue of gun control and not speaking out forcefully enough against radical Islamic extremism.” According to The Hill, Friday’s visit “is a chance for Obama to convey sympathy to the families of the victims of the shooting.”

Comey: Malik Did Not Post Publicly On Social Media About Jihad Before Coming To US. On the [CBS Evening News](#) (12/16, story 4, 2:00, Pegues, 5.08M), Jeff Pegues reported Comey said Wednesday that San Bernardino shooter Tashfeen Malik only used private messages when discussing jihad on social media prior to coming to the US. Pegues said this “would have made it harder for immigration officials to see signs of her radicalization.” [Al Jazeera America](#) (12/17, 138K) similarly reported on its website that Malik “was wrongly said to have pledged allegiance” to ISIL on a social media account.

Comey said during a New York press conference, according to the [Los Angeles Times](#) (12/17, Serrano, 3.6M), that media reports about Malik and her husband Syed Farook’s social media use have been inaccurate, calling them “garble.” The Times says Comey “emphasized the distinction between postings on social media and private messages using social media platforms.” The [New York Daily News](#) (12/17, Rayman, Schapiro, 3.59M) quotes Comey as saying, “Before there is a physical meeting of these two people resulting in their engagement and journey to the United States, they are communicating online, showing signs in that communications of their joint commitment to jihad and to martyrdom.” The [Washington Post](#) (12/17, Goldman, Berman, 7.78M) reports Comey said there is “no evidence of posting on social media by either of them at that period in time and thereafter reflecting their commitment to jihad or to

martyrdom.”

[The Atlantic](#) (12/17, Graham, 2.66M) reported Comey’s comments were an effort to “dampen speculation” about whether US intelligence “miss[ed] crucial warning signs about” the shooters, while the [Daily Beast](#) (12/17, Harris, 1.26M) said Comey “significantly altered the public understanding of how the couple plotted their rampage and what might have been done to stop them.” According to the Daily Beast, Comey “was adamant that even though the couple were communicating with each other...there was nothing that the FBI could have done to intercept and read their communications.” Comey said, “To be clear, and I think this is the way we all want it, we don’t intercept the communications of Americans,” adding, “This was an American citizen communicating overseas without predication to believe they’re involved in terrorist activity. If we don’t know something about somebody, we’re not combing through their emails or direct messages.”

Pete Williams reported on [NBC Nightly News](#) (12/16, story 5, 2:15, Holt, 7.86M) that Comey also said that while investigators still haven’t discovered what else the shooters had been planning, the FBI has not found any indication that the couple, prior to the attack, was in “direct contact” with any foreign terrorist group, nor was there any indication that they were “part of a [terrorist] cell.” However, the [New York Times](#) (12/17, Baker, Santora, Subscription Publication, 11.64M) reports Comey added the shooters were “consuming poison on the Internet” and being radicalized over time. Comey said Malik and Farook “were radicalized before the emergence of ISIL,” adding, “And so untangling the motivations of which particular terrorist propaganda motivated in what way remains a challenge to these investigations and our work is ongoing there.”

[Reuters](#) (12/16, Ax) reports Comey said ISIL has “revolutionized” terrorism by attempting to inspire small attacks like the one in San Bernardino. Comey said, “Your parents’ al Qaeda was a very different model than the threat we face today.” Comey said ISIL has a three-pronged strategy of recruiting fighters to join its efforts in the Middle East, promoting attacks in other countries, and training operatives to commit violence in Europe and the US.

The [Wall Street Journal](#) (12/17, Hong, Subscription Publication, 6.23M) reports Comey indicated that he is not ready to address whether the suspects’ families should have alerted authorities about the radicalization, but said he is “highly confident that in this case, as in nearly all of our other cases involving radicalization, that somebody saw something that was concerning and obviously didn’t tell law enforcement.”

Site Of Shootings To Reopen In January. The [San Bernardino \(CA\) Sun](#) (12/17, Nolan, 143K) reports Inland Regional Center, the site of the attack, “will reopen some of its buildings on Jan. 4.” However, the specific location of the shooting, Building 3, “will remain closed indefinitely.” The Sun notes the facility “provides services to adults and children with developmental disabilities.

<i>Senate</i>	<i>Holidays & Special Days</i>	<i>House</i>
		No Votes December 11-14
State Work Period December 21-31		
	Christmas December 25	
TBD	Target Adjournment	December 18

Scheduled Floor Action

House Floor

Friday, Dec. 11

~~No votes are expected.~~

Senate Floor

Program for Monday: ~~After the transaction of any morning business (not to extend beyond 5 p.m.), Senate will begin consideration of the nominations of Alissa M. Starzak, of New York, to be General Counsel of the Department of the Army, John Conger, of Maryland, to be a Principal Deputy Under Secretary of Defense, Stephen P. Welby, of Maryland, to be an Assistant Secretary of Defense, and Franklin R. Parker, of Illinois, to be an Assistant Secretary of the Navy, and vote on confirmation of the nominations at approximately 5:30 p.m.~~

~~During the balance of the week, Senate may consider any cleared legislative and executive business.~~

Recent Legislative Activity of Interest

Senate:

By Mr. **HATCH** (for himself and Mr. **LEE**):

S. 2383. A bill to withdraw certain Bureau of Land Management land in the State of Utah from all forms of public appropriation, to provide for the shared management of the withdrawn land by the Secretary of the Interior and the Secretary of the Air Force to facilitate enhanced weapons testing and pilot training, enhance public safety, and provide for continued public access to the withdrawn land, to provide for the exchange of certain Federal land and State land, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. **COONS** (for himself and Mr. **FLAKE**):

S. 2385. A bill to strengthen protections for the remaining populations of wild elephants, rhinoceroses, and other imperiled species through country-specific anti-poaching efforts and anti-trafficking strategies, to promote the value of wildlife and natural resources, to curtail the demand for illegal wildlife products in consumer countries, and for other purposes; to the Committee on Foreign Relations.

By Mrs. **GILLIBRAND** (for herself and Mr. **SCHUMER**):

S. 2386. A bill to authorize the establishment of the Stonewall National Historic Site in the State of New York as a unit of the National Park System, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. **WYDEN** (for himself, Mr. **BROWN**, Mr. **WHITEHOUSE**, Mrs. **GILLIBRAND**, Ms. **KLOBUCHAR**, Mr. **SANDERS**, Ms. **WARREN**, and Mr. **MERKLEY**):

S. 2387. A bill to restore protections for Social Security, Railroad retirement, and Black Lung benefits from administrative offset; to the Committee on Finance.

By Mr. **SANDERS** (for himself, Mr. **MARKEY**, and Mr. **MERKLEY**):

S. 2391. A bill to amend the Internal Revenue Code of 1986 to permanently extend certain energy tax provisions; to the Committee on Finance.

By Mr. **SANDERS**:

S. 2398. A bill to provide benefits and services to workers who have lost their jobs or have experienced a reduction in wages or hours due to the transition to clean energy, to amend the National Labor Relations Act to establish an efficient system to enable employees to form, join, or assist labor organizations, and for other purposes; to the Committee on Finance.

By Mr. **SANDERS**:

S. 2399. A bill to provide for emissions reductions, and for other purposes; to the Committee on Finance.

Measures Passed:

Further Continuing Appropriations Act: Senate passed H.R. 2250, further Continuing

Appropriations Act, 2016, after withdrawing the committee amendment in the nature of a substitute.

Indian Tribal Energy Development and Self-Determination Act Amendments: Senate passed an amended version of S. 209, to amend the Indian Tribal Energy Development and Self-Determination Act of 2005.

House:

By Mr. **PASCRELL** (for himself, Mr. **PIERLUISI**, Mr. **RANGEL**, Mr. **LARSON** of Connecticut, and Mr. **SERRANO**):

H.R. 4213. A bill to amend the Internal Revenue Code of 1986 to make residents of Puerto Rico eligible for the earned income tax credit and to provide for equitable treatment for residents of Puerto Rico with respect to the refundable portion of the child tax credit; to the Committee on Ways and Means.

By Mr. **CARTWRIGHT** (for himself, Ms. **BASS**, Mr. **BLUMENAUER**, Mr. **BRADY** of Pennsylvania, Mrs. **CAPPS**, Ms. **CASTOR** of Florida, Ms. **CLARK** of Massachusetts, Mr. **CLEAVER**, Mr. **CONNOLLY**, Mr. **CUMMINGS**, Mr. **DEFAZIO**, Ms. **DELBENE**, Mr. **DEUTCH**, Mr. **ELLISON**, Mr. **FARR**, Mr. **GRAYSON**, Mr. **HASTINGS**, Mr. **HIGGINS**, Mr. **HUFFMAN**, Mr. **JOHNSON** of Georgia, Mr. **KEATING**, Mr. **BEYER**, Ms. **BONAMICI**, Ms. **BROWN** of Florida, Mr. **CAPUANO**, Ms. **JUDY CHU** of California, Ms. **CLARKE** of New York, Mr. **COHEN**, Mr. **CONYERS**, Mrs. **DAVIS** of California, Ms. **DEGETTE**, Mr. **DESAULNIER**, Ms. **EDWARDS**, Ms. **ESHOO**, Mr. **FATTAH**, Mr. **GRIJALVA**, Mr. **HECK** of Washington, Mr. **HONDA**, Ms. **JACKSON LEE**, Ms. **EDDIE BERNICE JOHNSON** of Texas, Mr. **KENNEDY**, Ms. **KUSTER**, Mr. **LARSEN** of Washington, Mrs. **LAWRENCE**, Mr. **LEWIS**, Mr. **LOEBSACK**, Mr. **LOWENTHAL**, Mrs. **CAROLYN B. H.R. 4215. A bill to require regulation of wastes associated with the exploration, development, or production of crude oil, natural gas, or geothermal energy under the Solid Waste Disposal Act, and for other purposes; to the Committee on Energy and Commerce.

By Mr. **BUCK** (for himself, Mr. **GOSAR**, Mr. **BISHOP** of Utah, Mrs. **LUMMIS**, Mrs. **LOVE**, and Mr. **TIPTON**):

H.R. 4220. A bill to amend the Internal Revenue Code of 1986 to facilitate water leasing and water transfers to promote conservation and efficiency; to the Committee on Ways and Means.

By Mr. **DESAULNIER** (for himself and Mr. **LAMALFA**):

H.R. 4228. A bill to amend title 23, United States Code, to establish additional requirements for certain transportation projects with estimated costs of \$2,500,000,000 or more, and for other purposes; to the Committee on Transportation and Infrastructure.

By Mr. **NADLER**:

H.R. 4230. A bill to authorize the establishment of the Stonewall National Historic Site in the State of New York as a unit of the National Park System, and for other purposes; to the Committee on Natural Resources.

By Mr. ROHRBACHER (for himself, Mr. ISSA, Mr. LOWENTHAL, Mr. ROYCE, and Mrs. MIMI WALTERS of California):

H.R. 4233. A bill to eliminate an unused lighthouse reservation, provide management consistency by incorporating the rocks and small islands along the coast of Orange County, California, into the California Coastal National Monument managed by the Bureau of Land Management, and meet the original Congressional intent of preserving Orange County's rocks and small islands, and for other purposes; to the Committee on Natural Resources.

Reports Filed: Reports were filed today as follows:

H.R. 2406, to protect and enhance opportunities for recreational hunting, fishing, and shooting, and for other purposes, with an amendment (H. Rept. 114-377, Part 1).

Suspensions: The House agreed to suspend the rules and pass the following measures:

Surface Transportation Board Reauthorization Act of 2015: S. 808, to establish the Surface Transportation Board as an independent establishment:

Coast Guard Authorization Act of 2015: H.R. 4188, to authorize appropriations for the Coast Guard for fiscal years 2016 and 2017:

PUBLIC LANDS:

BLM airs concerns with Calif. conservation bills

Phil Taylor, E&E reporter

Published: Thursday, December 10, 2015

A Bureau of Land Management official yesterday said the Obama administration cannot support two bills to protect and increase recreational access to public lands in California, a position that frustrated the bills' supporters.

Kristin Bail, who leads BLM's National Conservation Lands, told a House Natural Resources panel that the administration has major concerns with provisions in [H.R. 3668](#), a bill by Rep. Paul Cook (R-Calif.) that would conserve more than a million acres of public lands in the California Desert and restrict the president's powers to protect the lands under the Antiquities Act.

Bail said BLM cannot support provisions in the bipartisan [H.R. 1838](#), by Rep. Sam Farr (D-Calif.), that would reopen the 75,000-acre Clear Creek Management Area in San Benito and Fresno counties to recreation, including off-highway vehicles, and designate 21,000 acres of new wilderness and five river and creek segments as wild and scenic rivers.

The bill could expose the public and BLM employees to dangerous levels of cancer-causing asbestos, Bail said.

BLM's concerns over Cook's bill could spell trouble for the congressman's efforts to head off potential White House plans to designate the lands as national monuments that would preclude new mining development.

Cook's bill was introduced as an alternative to Sen. Dianne Feinstein's (D-Calif.) [S. 414](#), which calls for similar land protections and tighter restrictions on mining. After six years trying to pass the bill, Feinstein this summer asked Obama to consider protecting the lands using his Antiquities Act authorities. A visit to the region in October by two top-level Interior and Agriculture officials suggests the White House is seriously considering taking up Feinstein's request ([Greenwire](#), Oct. 7).

Cook said such a move would represent "a massive land grab" and touted provisions in his bill that he said would facilitate "responsible mining."

A key distinction is that his bill would allow 10 percent of the proposed 965,000-acre Mojave Trails Special Management Area to be mined, while Feinstein's bill, and presumably a presidential declaration, would ban future mining and call the area a national monument.

Cook's bill earned support yesterday from San Bernardino County Supervisor Robert Lovingood and Federal Lands Subcommittee Chairman Tom McClintock (R-Calif.).

While McClintock said he was concerned with the bill's wilderness provisions, he said both bills on the docket "move us generally in the right direction."

Compared to the Feinstein measure, Cook's bill is "a much more balanced approach that sustains local economic and recreational activities while protecting treasured desert landscapes," he said.

Yet Bail said BLM cannot support the measure, in large part because the proposed Mojave Trails Special Management Area "would fail to adequately protect the nationally significant resources found there and would undermine the ability of the Bureau of Land Management to manage the area for responsible recreational use."

She said other provisions of the bill would conflict with BLM's recently finalized Desert Renewable Energy Conservation Plan, a sweeping effort with state and local stakeholders to zone federal lands in Southern California for renewable energy and conservation.

Notably, Bail said the administration "strongly opposes" the bill's curbs on the president's Antiquities Act authority, a restriction the White House has successfully fought in numerous other Republican bills over the past several years.

Democrats and conservationists yesterday also came out against the bill.

Rep. Debbie Dingell (D-Mich.) cited statements of concern from the Wilderness Society, Pew Charitable Trusts and National Parks Conservation Association and noted her own concern with several provisions, namely the Antiquities Act language.

"Congress divested its authority to protect public land for a reason," she said. "Political gridlock can stall or block conservation initiatives."

A statement released yesterday by the Campaign for the California Desert, a coalition of conservation, community and business leaders backing Feinstein's bill, said that Cook's proposal would allow too much mining, would threaten groundwater and would add 8,000 fewer acres to the Mojave National Preserve than Feinstein's bill.

"The differences between Congressman Cook's and Senator Feinstein's proposals make it clear that local communities cannot rely solely on the legislative process to effectively protect the California Desert for future generations," the campaign said.

"Local leaders will continue their call for President Obama to designate the Mojave Trails, Sand to Snow, and Castle Mountains National Monuments," it said.

Cook said his and Feinstein's bills are not that far apart, but he lamented that the senator "gave up" when she called on Obama to unilaterally act.

An impasse over the two bills raises the chance that Obama will invoke the 1906 antiquities law once more.

Feinstein bill would not diminish SoCal mining -- report

Phil Taylor, E&E reporter

Published: Wednesday, October 28, 2015

A bill to protect more than 1.4 million acres of public lands in Southern California would not diminish the region's mining sector, according to a report released yesterday by the Sonoran Institute, a regional conservation group based in Tucson, Ariz.

The bill's proposed national monuments, parks and wilderness expansions would bolster jobs in the service, government and professional sectors, which play a much larger role than mining in the region's economy, the **report** found. Those jobs -- which drive what's known as "amenity-based" economic growth - - depend heavily on protected public lands, the report found.

Protections in Sen. Dianne Feinstein's (D-Calif.) **S. 414** "represent the highest and best economic use of public lands," said John Shepard, senior director of programs at the Sonoran Institute. "Mining is overshadowed by other economic sectors and trends that benefit from preserving the California desert's natural, cultural and other community benefits."

While the institute has taken no official position on Feinstein's bill, its report offers a ringing endorsement.

Feinstein's bill would designate two new national monuments, six new wilderness areas and expand three national parks while setting aside a handful of areas for off-highway vehicle recreation. The bill received a hearing this month before the Senate Energy and Natural Resources Committee, where its prospects for passage are unclear (***E&E Daily***, Oct. 9).

In a parallel track, Feinstein is asking President Obama to designate lands in her bill -- Mojave Trails, Sand to Snow and Castle Mountains -- as national monuments using his authority under the Antiquities Act.

Mining access has emerged as a major sticking point for opponents of Feinstein's bill and Obama's use of the act.

San Bernardino County Supervisor Robert Lovingood told the committee the legislation could stifle mining opportunities and hamper a gold mine that could become California's second largest. Feinstein's bill would ban new mining claims within conservation areas, while honoring existing claims.

The minerals industry is "one of our most significant economic drivers," Lovingood said, adding that the county oversees roughly 100 mines. The federal government already owns 80 percent of the county, which prevents the collection of millions of dollars in property taxes, he said.

"The proposed national monument status withdraws public lands from mineral entry," he said. "This prevents the extraction of important mineral materials, such as aggregates, which are the basic materials necessary for maintaining roads, bridges and local infrastructure."

But the Sonoran Institute report -- which looked at the seven counties covered in the bill: San Bernardino, Inyo, Riverside, Imperial, Kern, Los Angeles and San Diego -- came to an opposite conclusion.

In the last 25 years, mining has represented no more than 0.25 percent of the region's overall employment, the report said, citing Department of Commerce data. In addition, mining's contribution to labor-related income never exceeded 1 percent and trended neither up nor down between 1970 and 2013, it said.

In 2013, the mining industry employed between 3,000 and 5,600 people.

However, mining and oil and gas jobs have made up a higher portion of jobs in some individual counties, representing 6 percent in Kern and 4 percent in Inyo. In San Bernardino, which would be home to the

largest amount of protected lands, mining and oil and gas represent 0.2 percent of jobs, the report found.

While Feinstein's bill would withdraw more than 1 million acres from future mining claims, it would honor the 1,176 active claims inside the proposed designation areas. In San Bernardino alone, there are 8,803 active mining claims and 600 square miles of high mineral potential areas outside the proposed designation areas, the report found.

The report cited mining research commissioned by the Bureau of Land Management to support its identification of renewable energy zones in the California desert.

"There is extensive ground outside of the legislation to continue to look for and develop mineral resources of all kinds," said Joe Marlow, a resource economist at the Sonoran Institute.

As mining and other extractive and agricultural jobs remained flat, service-based sectors emerged, a trend common across the West, the report said.

In addition, non-labor income -- which is an indicator of the presence of retirees -- shot up nearly threefold in the seven counties between 1970 and 2013, the report found.

Roughly 3.2 million people visited Death Valley and Joshua Tree national parks and the Mojave National Preserve in 2014, and nearly 4.2 million visited BLM lands in 2013.

"We think conservation has a stronger economic argument" than mining and industrial projects, Shepard said. "The additional designations [in Feinstein's bill] are likely to encourage similar growth trends going forward into the future."

Imperial and Riverside counties have endorsed Feinstein's bill, though supervisors in San Bernardino remain split.

Some critics of the bill, including Lovingood, have backed [H.R. 3668](#) by Rep. Paul Cook (R-Calif.), a companion to Feinstein's bill that would allow more mining opportunities within the Mojave Trails National Monument and bar presidents from protecting the lands using the Antiquities Act.

On Tue, Oct 13, 2015 at 10:59 AM, Duran, Leah <leah_duran@ios.doi.gov> wrote:

[Sen. Feinstein asks Obama to designate monuments in the Mojave Desert](#)

LA Times // Julie Cart // Oct. 13, 2015

Sen. Dianne Feinstein, champion of the California desert, is asking President Obama to take executive action to protect hundreds of thousands of acres in the Mojave Desert.

Since 2009, Feinstein has been unsuccessfully trying to convince her colleagues in Congress to designate the Mojave Trails, Sand to Snow and Castle Mountains

areas as new national monuments. Now, the Democratic senator is calling on Obama to use the Antiquities Act to set aside desert tracts near Mojave National Preserve and Death Valley National Park.

In a public meeting scheduled for today in Palm Springs, Feinstein and other national, state and local officials will listen to public comment on setting aside the disparate pieces of public land for heightened protection.

All of the land proposed for monument designation is in federal hands and no transfers are required.

Obama has invoked the Antiquities Act sparingly. Most recently he designated the Berryessa-Snow Mountains National Monument in Northern California.

Monument designations can be controversial because they sometimes place restrictions on hunting, off-road recreation and other uses. But Feinstein's proposal would preserve existing recreational activities.

Obama has the option to designate the new monuments without consulting Congress, but Feinstein said she will continue trying to gain support for her legislation.

DOI in the News:

SECRETARY JEWELL TESTIFIES ON GOLD KING MINE SPILL. The [Greenwire](#) (12/9, Subscription Publication) reports that Natural Resources Committee Republicans “blasted” Interior Secretary Sally Jewell on Wednesday “for her agency’s investigation into U.S. EPA’s spill of polluted water from an abandoned Colorado mine spill last summer.” The legislators were “disappointed” that the BOR’s “technical assessment into the so-called Gold King mine spill didn’t dig deeper into EPA’s role or assign blame.” Rep. Cynthia Lummis said, “It gives us the appearance that the Department of the Interior apparently jointly decided by the EPA that these areas were beyond the scope of review.”

[The Hill](#) (12/10, Henry, 654K) reports that House Natural Resources Committee Chairman Rob Bishop “charged” that the Interior Department “couldn’t conduct an unbiased and independent investigation into the August mine waste spill.” But Jewell said “the office charged with conducting the report — the Technical Service Center — does such a minuscule amount of work for the EPA that it was able to conduct an appropriate review of the incident.” She said, “I know EPA wanted to get to the bottom of what happened, technically, at Gold King Mine and they looked for people of that expertise. The work of the Technical Services Center is very broad. Half of a percent or so is for the EPA.”

[Politico Pro](#) (12/9) reports that Jewell said that “there is no evidence crimes were committed by EPA workers responsible for the August spill of tainted mine water into the Animas River, though she sidestepped a question about whether those workers were negligent.”

The [AP](#) (12/10, 932K) reports that Jewell said a review by her agency showed the spill was “clearly unintentional.” She said, “I don’t believe there’s anything in there to suggest criminal activity.” But Republicans were “dissatisfied” and “they pointed to earlier statements in which Jewell and other agency officials said the Interior review focused on technical mining issues — not the potential culpability of those involved in the spill.”

Additional coverage was provided by [Politico](#) (12/9, 1.19M), [The Hill](#) (12/10, Cama, Henry, 654K), the [Washington \(DC\) Times](#) (12/10, Richardson, 283K), the [Washington Examiner](#) (12/10, 112K), [Colorado Public Radio](#) (12/10), the [Seymour \(IN\) Times Tribune](#) (12/10, 26K) the [Aurora \(CO\) Sentinel](#) (12/10, 64K), the [New York \(NY\) Times](#) (12/10, Press, Subscription Publication, 11.64M), the [Washington \(DC\) Times](#) (12/10, Brown, 283K), the [Durango \(CO\) Herald](#) (12/9, 31K), the [Albuquerque \(NM\) Journal](#) (12/10, 263K), the [Albuquerque \(NM\) Journal](#) (12/10, 263K), [US News & World Report](#) (12/9, 996K), the [Charlotte \(NC\) Observer](#) (12/10, 516K), [North Jersey \(NJ\) Media Group](#) (12/10, 77K), the [Winona \(MN\) Daily News](#) (12/10, 29K), the [El Paso \(TX\) Inc.](#) (12/10, 31K), the [Houghton \(MI\) Daily Mining Gazette](#) (12/10, 23K), [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (12/10, 464K), [WTEN-TV Albany \(NY\)](#) Albany, NY (12/9, 82K), [KECI-TV Missoula \(MT\)](#) Missoula, MT (12/10, NBCMontana, 1K), [KRQE-TV Albuquerque \(NM\)](#) Albuquerque, NM (12/9, 34K), [WBTV-TV Charlotte \(NC\)](#) Charlotte, NC (12/10, 81K), [KRWG-FM Las Cruces \(NM\)](#) Las Cruces, NM (12/10, 1K).

GAO Asked To Investigate Interior’s Probe Of Mine Spill. [Politico Pro](#) (12/9) reports that House Natural Resources Chairman Rob Bishop on Wednesday asked the Government Accountability Office to review the “scope, objectivity and thoroughness” of the Interior Department’s technical report on the Animas River spill. Bishop and other lawmakers “questioned whether Interior’s review of the spill caused by EPA workers was truly independent and unbiased, and they were particularly concerned that it makes no conclusion about negligence or criminal activity.”

Additional coverage was provided by the [Denver \(CO\) Post](#) (12/10, Matthews, 825K), the [Albuquerque \(NM\) Journal](#) (12/10, 263K), the [Salt Lake \(UT\) Tribune](#) (12/10, 339K), the [Washington Examiner](#) (12/10, 112K), and [Utah Policy](#) (12/10).

Rep. Bishop Disappointed With Secretary Jewell’s Planned Testimony. [Politico Pro](#) (12/9) reports that Bishop said, “The failure of Secretary Jewell’s testimony to address the concerns with the report raised by impacted states and the [U.S. Army Core of Engineers], why we still don’t know the root cause of the spill, the extent of impacts to Interior Department-managed land, water and other resources, or who should be held accountable, is deeply concerning. These questions need answers. We hope to get them during this hearing.”

Additional coverage was provided by [E&E Daily](#) (12/9, Subscription Publication).

Interior Report Says EPA Error Led To Mine Spill. [Politico Pro](#) (12/9) reports that “a lack of understanding of mine engineering issues ‘led directly’ to EPA’s Aug. 5 spill of 3 million gallons of tainted water from an abandoned gold mine into Colorado’s Animas River,” according to a technical review from the BOR. The article says that “while the causes of the mine spill trace back through decades of human-caused changes in groundwater flow patterns, the report concludes it was a lack of uniform requirements to handle abandoned mines that led to the spill.”

Dispute Between Colorado And EPA Over Gold King Mine Spill Deepens. The [Durango \(CO\) Herald](#) (12/9, 31K) reports that a disagreement between the EPA and Colorado’s Division of Reclamation, Mining and Safety “only

deepened Wednesday, as the EPA released documents to back up its insistence that the state agency was involved in the decision-making leading up to the accidental Aug. 5 Gold King Mine spill by an EPA-contracted team.” According to the article, “the state agency has said it had no authority to assess, manage or approve work at the mine.”

SECRETARY JEWELL SAYS BANKRUPT COAL INDUSTRY COULD LEAVE TAXPAYERS WITH MAJOR BILL.

[Reuters](#) (12/10, Rucker) reports that Interior Secretary Sally Jewell told the House Natural Resources Committee that taxpayers could be left with \$3.6 billion in cleanup bills if coal companies go bankrupt due to the practice of self-bonding. “With the increased financial fragility of many coal mining companies, if they are self-bonded that does potentially leave the states and the taxpayers at risk,” Jewell said. “As with most things that are labeled too-big-to-fail, many of these companies are now failing,” said Rep. Debbie Dingell (D-MI), who called self-bonding a “textbook case of taxpayer exposure to polluter cleanup costs.”

SECRETARY JEWELL: NO TIMELINE FOR BLM’S FLARING RULE. [Politico Pro](#) (12/10, Subscription Publication) reports that Interior Secretary Sally Jewell said Wednesday that the BLM’s “long-awaited rule for venting and flaring of methane produced by drilling sites on public lands may not be finished before she leaves her post.” She told reporters, “I know that it would certainly be my goal to have that rule finished during the time that I’m in this position. But there’s appropriate notification periods and working with OIRA and all of those things are necessary.”

UTAH TO PURSUE LAWSUIT TO SEIZE CONTROL OF FEDERAL LANDS. [E&E Publishing](#) (12/9, 705) reports that a panel of Utah state lawmakers on Wednesday “voted to order a legal team to prepare a lawsuit challenging the federal government’s ownership and management of roughly two-thirds of the Beehive State.” The Commission for the Stewardship of Public Lands also “recommended Utah Attorney General Sean Reyes (R) consider filing the complaint as a case of original jurisdiction with the U.S. Supreme Court.” The article notes that “those moves followed” the release on Wednesday “of an independent, state-commissioned report that urged Gov. Gary Herbert (R) to consider such a lawsuit to force the United States to cede ownership of federal lands to the state.”

The [AP](#) (12/9, 270K) reports that Interior Secretary Sally Jewell “considers Utah’s push a misguided effort that doesn’t take into account benefits or costs of managing public lands, agency spokeswoman Jessica Kershaw in a statement.” The statement said, “The Secretary has been clear on this issue – she’s happy to have thoughtful discussion about achieving balanced managements – but she’s not open to selling off public lands to the highest bidder.”

Meanwhile, the [Salt Lake \(UT\) Tribune](#) (12/10, 339K) reports that two University of Utah legal scholars are arguing that “Utah cannot legally claim the mineral riches locked in 31 million acres of public lands the state now is banking on taking from the federal government.” John Ruple and Bob Keiter in a new white paper, “These conclusions follow from well-established principles of law predating Utah’s admission to the Union that excluded from grants to the states all lands known to be mineral in character. Therefore, even if the state can establish a duty to dispose of the public domain, and show that such a duty necessitates granting the land to the state, the exclusion of minerals from those grants would severely limit the economic value of the land that would be conveyed to the states.”

Additional coverage was provided by the [Salt Lake \(UT\) Tribune](#) (12/10, 339K), the [Denver \(CO\) Post](#) (12/10, McCombs, 825K), the [Minneapolis \(MN\) Star Tribune](#) (12/10, McCombs, 1.15M), the [Daily Mail](#) (12/10, 5.31M), the [Houston \(TX\) Chronicle](#) (12/10, 2.15M), the [Seattle \(WA\) Post-Intelligencer](#) (12/10, 767K), the [Twin Falls \(ID\) Times-News](#) (12/10, 81K), the [Washington \(DC\) Post](#) (12/10, Brady McCombs |, Ap, 7.78M), the [Washington \(DC\) Times](#) (12/10, McCombs, 283K), [ABC News](#) (12/10, 3.35M), the [Colorado Springs \(CO\) Gazette](#) (12/10, 150K), the [Provo \(UT\) Daily Herald](#) (12/10, 155K), [Newswise](#) (12/10, 1K), [Yahoo! News](#) (12/10, McCombs, 6.43M), and [KSTU-TV Salt Lake City \(UT\)](#) Salt Lake City (12/9, 148K),

DEMOCRATS STAND FIRM ON OPPOSITION TO GOP POLICY RIDERS. [Politico Pro](#) (12/9) reports that “Democratic leaders are hardening their opposition to GOP policy riders in a massive end-of-year spending and tax deal, acknowledging the two sides are still far apart even as Democrats prepare to send their latest counteroffer to Republicans.” According to sources, “Democrats were preparing a new offer to Republicans that would lessen the current ban on oil exports – a key GOP demand – in exchange for dropping a host of riders and reauthorizing the Land and Water Conservation Fund as well as adding new working-class tax benefits and tax benefits for using renewable energy.”

Additional coverage was provided by [Bloomberg News](#) (12/9, Wingfield, 3.4M) and the [National Journal](#) (12/10, Subscription Publication, 53K).

Rep. Bishop Explains Stance On LWCF. [The Hill](#) (12/8, Cama, Henry, 654K) reports that Rep. Rob Bishop, chairman of the House Natural Resources Committee, defended his decision Tuesday to allow the Land and Water Conservation Fund “to lapse earlier this year.” Bishop wrote Tuesday that the LWCF is “broken,” and that “it needs to be restored to its original functions.” In a Politico op-ed, Bishop wrote, “Since I chose to let the fund expire – due to fundamental flaws – on Sept. 30, a few have hurled criticisms and impugned the motives of members of Congress for wanting to reform the LWCF.” He added, “Efforts to blindly reauthorize the LWCF are denying the fact that the law’s

original intent to develop recreational opportunities close to home for more Americans was perverted long ago.”

Overhaul Of LWCF Criticized. In an op-ed for The [Sacramento \(CA\) Bee](#) (12/10, 515K), Whit Fosburgh is president and CEO of the Theodore Roosevelt Conservation Partnership, writes in criticism of Rep. Rob Bishop’s proposed reforms to the LWCF. Bishop points “to maintenance backlogs on federal public lands as justification for shifting money to the states and limiting federal land acquisition.” However, Fosburgh argues “acquiring land parcels that connect isolated public lands actually reduces maintenance costs in the long term.”

Congress Urged To Reauthorize LWCF. In an op-ed for the [Helena \(MT\) Independent Record](#) (12/10, 38K), Rep. Ryan Zinke urges Congress to reauthorize the LWCF.

GOVERNMENT SHUTDOWN WOULD IMPACT NATIONAL PARKS. The [Washington Post](#) (12/10, Rein, 7.78M) ran up updated version of a story that originally ran on September 23, “before Congress approved a temporary funding measure to avert a government shutdown.” The report says that “the legislation expires this week, leaving Congress faced with the same spending issues that went unresolved earlier this fall.” The Post notes that in the event of a government shutdown, Yellowstone National Park and 407 others would close to the public. The Post notes that “at Yellowstone, Park Superintendent Dan Wenk and his staff have worked to determine what new wildlife management programs and services are in place today that weren’t in 2013, when the government closed for 16 days in the most potent shutdown in modern history.”

INTERIOR WATCHDOG RETRACTS CLAIM ABOUT FORMER SALAZAR AIDE. The [Greenwire](#) (12/9, Subscription Publication) reports that the Interior Department’s inspector general has “retracted its claim that a former aide to then-Interior Secretary Ken Salazar broke the terms of his presidential ethics pledge.” The watchdog “released its full report on Steve Black, once a counselor to Salazar at the department.” According to the article, “the IG earlier this week had released a summary of the report asserting that Black had violated the pledge, but the office now said that isn’t the case.” Nancy DiPaolo, a spokeswoman for the Interior IG office, said, “Under Deputy IG Mary Kendall’s direction, it is our policy to be proactive and post summaries of investigations. We are still perfecting this process, and whenever we learn of a mistake, we quickly correct it. We became aware that the summary contained erroneous information, specifically, in that Steve Black had indeed violated the President’s Ethics Pledge. Our investigation did not conclude that a violation occurred. So, we posted the full report [yesterday] to more clearly show the details of the investigation.”

RED ROCK MONUMENT PROPOSAL DRAWING CONTROVERSY IN ARIZONA. The [Arizona Republic](#) (12/9, McKinnon, 960K) reports that a fistfight recently broke out during an educational conversation at the Oakcreek Country Club to discussed the proposed Sedona Verde Valley Red Rock National Monument. The Republic explains that the area is already managed by the US Forest Service but that “supporters insist the monument designation is the only way to protect the land from overuse and keep developers away.” The Republic says that “opponents and have gained strength drawing on anti-government sentiment, a growing movement to shift federal lands into state control and hometown issues like the nightmarish weekend traffic jams.” Meanwhile, proponents hope President Obama will designate the national monument before he leaves office. The report goes on to examine the dispute at length.

TWO HOUSE BILLS WOULD DESIGNATE NEW WILDERNESS AREAS IN CALIFORNIA. The [McClatchy](#) (12/10, 27K) reports that “off-road vehicles could again be roaring through Fresno County’s western hills and Southern California’s desert under bills weighed Wednesday by a House panel.” According to the article, “while the separate legislative packages would designate new wilderness areas for protection, the bills emphasize public use of federal lands.” However, “that puts them in the middle of a perennial access vs. conservation debate that often stymies Congress.”

SANTA CLARITA CITY COUNCIL SUPPORTS EXPANDED SAN GABRIEL MOUNTAINS NATIONAL MONUMENT. The [Santa Clarita Valley \(CA\) Signal](#) (12/10, 23K) reports that Santa Clarita City Council members voted “this week to support a piece of legislation that would expand the San Gabriel Mountains National Monument farther into the Santa Clarita Valley.” They “voted unanimously Tuesday night to support H.R. 3820, which would expand the monument’s boundaries by about 109,000 acres in the western Angeles National Forest — stretching the monument into areas near Placerita Canyon, Sand Canyon Road and Elsmere Canyon in the Santa Clarita Valley.”

BEST INSTAGRAMS FROM NATIONAL PARKS IN 2015 HIGHLIGHTED. [Mashable](#) (12/9, 1.8M) highlights “the 20 best Instagrams from U.S. parks in 2015.”

ADDITIONAL COVERAGE: JUDGE REFUSES TO BLOCK RULES PROTECTING GREATER SAGE GROUSE. Additional coverage of U.S. District Judge Miranda Du’s decision to issue an injunction against “new U.S. rules intended to protect the greater sage grouse” was provided by the [Albuquerque \(NM\) Journal](#) (12/10, 263K), the [Washington \(DC\) Times](#) (12/10, Sonner, 283K), [KJZZ-FM](#) Phoenix (12/10, 8K).

FORMER FWS OFFICIALS CRITICIZES PROPOSED ALASKA ROAD. Lyle Laverty, former assistant secretary for Fish, Wildlife and Parks from 2007-2009, writes at [The Hill](#) (12/10, Laverty, 654K) in its “Congress Blog” against a

proposed road through Alaska's Izembek National Wildlife Refuge and Wilderness Area, an idea that has been included as a rider in a funding proposal before Congress. He says that after extensive scientific analysis, the FWS in 2013 determined that the proposed road should not be built and that the Department of the Interior made the right decision to reject the proposed road. He points out that a "\$9 million, state-of-the-art hovercraft that the Aleutians East Borough purchased with federal funds proved capable of transporting an ambulance between King Cove and Cold Bay in 20 minutes, which is much faster than it would take to drive the proposed road." He concludes that "taxpayers have provided a transportation solution and the proposed road would set a terrible precedent for the National Wildlife Refuge System and designated Wilderness Areas all across the nation."

INTERIOR YOUTH AMBASSADOR IN PARIS FOR CLIMATE TALKS. In an op-ed for the [Alaska Dispatch News](#) (12/9, 203K), Esau Sinnok, a U.S. Department of Interior Arctic Youth Ambassador, writes about his experience visiting Paris, France, for the United Nations climate talks. Sinnok has met with Interior Secretary Sally Jewell and other indigenous people, which gave him "insight into how issues of the Arctic and climate change are being handled by our world leaders." Sinnok wants "to tell leaders that climate change is affecting the Arctic more than other places of the world, and if the ice in Greenland melts, these villages and islands will be under water."

CASSIDY: OBAMA SHOULD SUPPORT OIL EXPORT. Sen. Bill Cassidy (R-LA) writes at [The Hill](#) (12/10, Sen. Bill Cassidy (r-La.), M.d., 654K) in its "Congress Blog" that if President Obama wants to lower greenhouse gas "emissions and simultaneously address that which most Americans think is the greatest threat – terrorism – he should allow Americans to explore for and export oil." Cassidy says that "despite the lower GHG emissions and the economic and security benefits of increased domestic energy production, the Obama administration has slowed energy production on federal lands and closed off areas of exploration and development of offshore oil." He concludes that "if Obama really believes that no challenge poses a greater threat to future generations than climate change, and if he is willing to acknowledge that most Americans feel that terrorism poses at least an equally serious threat, he should support exploring for and exporting American oil."

FEDERAL LAND OWNERSHIP CRITICIZED. Brian Seasholes, director of the Reason Foundation Endangered Special Project, writes at the [Daily Caller](#) (12/10, Seasholes, 366K) reports that the Federal government owns one-third of the US, or 640 million acres, and that "this enormous amount of federal land has profound impacts on the ability of many states, municipalities and communities to govern themselves effectively, raise taxes necessary for basic services, such as police, fire and schools, conserve the environment, and maintain viable economies that can provide living wages for ordinary people." He says that the House Committee on Natural Resources has created an online "Federal Footprint Map" that consists of many "layers" representing land and water managed by agencies or overlaid by Federal regulations. Seasholes concludes by pointing out that "there is a growing call, led by the American Lands Council and Representative Ken Ivory of Utah, to transfer some federal lands to states so these lands can be managed more responsibly."

Empowering Native American Communities:

HOUSE COMMITTEE HOLDS HEARING ON INDIAN RECOGNITION BILL. The [Connecticut Mirror](#) (12/8) reports that "Nicholas Mullane, a longtime Republican selectman for the town of North Stonington, on Wednesday helped bolster a GOP bill that would strip the Obama administration of its authority to recognize Indian tribes." At a hearing of the House Committee of Natural Resources, Mullane said "he favors a bill introduced by Rep. Rob Bishop, R-Utah, that would give tribes federal acknowledgment only by an act of Congress."

[E&E Daily](#) (12/9, Subscription Publication) reports that the House subcommittee "agreed that both Congress and the Bureau of Indian Affairs have injected politics where they shouldn't in decisions on who the United States recognizes as an Indian tribe, but witnesses and members at the hearing remained bitterly split on who should have that power moving forward."

Additional coverage was provided by the [New London \(CT\) Day](#) (12/9, 77K).

INTERIOR SAYS TRIBAL LAND BUY ALLOWED UNDER CARCIERI. [Law360](#) (12/10, 30K) reports that the Interior Department "urged the D.C. Circuit to uphold the agency's ability to take land into trust for a Washington state tribe's casino project, saying Tuesday the controversial Carcieri ruling did not prevent the DOI from making the acquisition."

NAVAJO NATION GOVERNMENT OFFICIALS DISCUSS BIA AND INDIAN HEALTH BUDGET. The [Flagstaff \(AZ\) Navajo-Hopi Observer](#) (12/9, 43K) reports that "members of the Navajo Nation Council, Vice President Jonathan Nez, and Acting Chief Justice Allen Sloan met Nov. 30 in hopes of presenting a unified voice to the Bureau of Indian Affairs (BIA) and Indian Health about the Fiscal Year 2016 budget." According to the article, "Speaker LoRenzo Bates (Nenahnezad, Newcomb, San Juan, Tiis Tsoh Sikaad, Tse'Daa'Kaan, Upper Fruitland) said the proposed BIA budget for FY2016 includes an overall increase of 8 percent, or approximately \$12.2 million. While the proposed IHS budget increase could range from 5 percent to 22 percent."

NAVAJO COUNCIL CRITICIZES SEN. BARRASSO'S LAND-INTO-TRUST BILL. [Law360](#) (12/10, 30K) reports that "a Navajo Nation Council panel on Tuesday backed two congressional bills to reaffirm the U.S. Department of the Interior's authority to take land into trust for tribes, saying a similar bill sponsored by Sen. John Barrasso would undermine the sovereignty of tribes by putting conditions on the department's authority."

TEXAS CONTINUES OPPOSITION AGAINST TIGUA GAMBLING. The [El Paso \(TX\) Times](#) (12/9, 199K) reports that the Texas Attorney General's Office will "continue its epic court battle to keep El Paso's Tigua Indians from offering certain kinds of gambling." According to the article, "in a Wednesday evening filing in U.S. District Court, the state AG opposed the Tigua's request, in light of a recent opinion by the U.S. Department of the Interior that the tribe be allowed to offer games such as bingo, pull tabs and tip jars." In its filing, the state Attorney General's Office "cited a 20-year history of court losses and said the Tiguas' latest arguments are no more likely to succeed."

FORMER VILLAGE LEADERS NOT BUDGING AFTER LOSING ALASKA TRIBAL DISPUTE. The [AP](#) (12/10, 2.15M) reports that "former officials in an Alaska Native village are refusing to relinquish their old office and tribal records, despite a federal appeals panel's finding that they're no longer in charge." According to the article, "last week, the new leadership asked a federal judge to have Alaska State Troopers enforce a Nov. 4 court ruling that ordered former leaders to stop representing themselves as the governing body in the community of about 380."

Additional coverage was provided by [KTUU-TV](#) Anchorage, AK (12/10, 62K).

LARGE-SCALE WARRANT OPERATION IN NORTH DAKOTA YIELD MULTIPLE ARRESTS. The [Grand Forks \(ND\) Herald](#) (12/10, 102K) reports that "during Operation No Sanctuary, the U.S. Marshals Service's High Plains Fugitive Task Force and Bureau of Indian Affairs cleared 29 warrants searching for fugitives who were wanted on federal, state, local and tribal charges." The Herald explains that Operation No Sanctuary was organized after the Spirit Lake Tribal Council passed a resolution declaring a state of emergency due to "rampant use, abuse, sale trade and transport of illegal drugs at epidemic proportion on the reservation." The Herald also points out that "in a separate but simultaneous operation, law enforcement also conducted compliance checks on 20 registered sex offenders on the reservation in which seven people were identified as potentially being noncompliant with federal, state or tribal registration laws, according to the release."

Securing America's Energy Future:

Renewable Energy:

DEEPWATER WIND PROPOSES NEW OFFSHORE WIND PROJECT FOR LIPA. [Newsday \(NY\)](#) (12/9, Harrington, 1.42M) reports that Rhode Island-based Deepwater Wind is proposing a new 15-turbine project for LIPA 30 miles off Montauk. The project comes in response to a LIPA/PSEG request for proposals for around 169 megawatts of power and "would deliver power specifically to the South Fork of Long Island."

Onshore Energy Development:

HOUSE COMMITTEE HOLDS HEARING ON STREAM PROTECTION RULE.. [E&E Daily](#) (12/9, Subscription Publication) reports that "House Oversight and Government Reform Committee Republicans pelted a top Interior Department official with tough, rapid-fire questions" Tuesday "on the agency's proposed stream protection rule." Republican "members of two panel subcommittees expressed deep skepticism toward the Obama administration's assertion that the rule would not have a significant negative impact on the economy or mining jobs." Janice Schneider, assistant Interior secretary for land and minerals management, said the impact would be "minimal" and "largely offset" by compliance-related jobs.

[Politico Pro](#) (12/9) reports that Rep. Cynthia Lummis, "a member of the conservative House Freedom Caucus that helped oust Speaker John Boehner, said Interior could learn something from the cooperative approach new Speaker Paul Ryan has brought to running the House." During a hearing on the proposed stream rule, she told Schneider that "complaints from states that they had been shut out of the rulemaking process mean Interior should start over." She said, "I can tell you from just the last month in the House of Representatives, it makes a huge difference. Just the change in the new speaker, Speaker Ryan, has brought about that process of cooperation that didn't exist here before he was speaker. And his speakership has already proven the benefits when you allow your stakeholders to be part of the discussion, it really works."

HOUSE SUBCOMMITTEE HOLDS HEARING ON ROYALTY REFORMS. [E&E Daily](#) (12/9, Subscription Publication) reports that Obama Administration "efforts to address the valuation of coal, oil and natural gas are generating concern among fossil fuel boosters on Capitol Hill." At issue is a January 2015 Office of Natural Resources Revenue proposal to "update valuation criteria. Administration officials have said the changes have been proposed to keep up with

energy industry changes.” However, “companies have called on ONRR to yank the proposal.” They raised concerns during a hearing of the House Natural Resources Subcommittee on Energy and Mineral Resources Tuesday.

Update Of Royalty Rate Charged For Drilling On Public Lands Supported. In an op-ed for the [Santa Fe New Mexican](#) (12/10, 67K), Jim Baca, who recently retired as the State of New Mexico’s Natural Resource Trustee, points out “the outdated rates companies pay to American taxpayers for the right to drill on our national public lands.” He notes that “the royalty — set at 12.5 percent of the value of the oil or gas extracted from the land — has not been updated since 1920.” Baca argues that “facilitating oil exports without addressing low royalty rates could shortchange New Mexico’s taxpayers to the tune of between \$47 million and \$534 million over the next decade, according to a study by the Denver-based Center for Western Priorities.”

OBAMA ADMINISTRATION RAISES CONCERNS ABOUT BONDING DEALS. [E&E Daily](#) (12/9, Subscription Publication) reports that Janice Schneider, Interior assistant secretary for lands and minerals, said Tuesday that “preventing coal companies from abandoning their responsibility to return land and water to pre-mining conditions was a ‘huge priority’ amid the industry’s financial woes.” Schneider also “expressed concern about states working out deals with mining companies to address liabilities but also keep them from going further into debt and said the department is ‘still thinking through’ action on the issue.” The issue “came up during a House Oversight and Government Reform Committee hearing on the Office of Surface Mining Reclamation and Enforcement’s proposed stream protection rule.”

BLM RESCHEDULES POSTPONED OIL, GAS LEASE SALE IN UTAH. The [Greenwire](#) (12/9, Subscription Publication) reports that the BLM has “rescheduled its postponed November oil and gas lease sale in Utah for Feb. 16,” the agency announced Tuesday. According to the BLM, “the sale of 39 parcels covering 38,000 acres of the Beehive State will be combined with another smaller lease sale for lands around Moab that has been planned for that date.”

Additional coverage was provided by the [Salt Lake \(UT\) Tribune](#) (12/10, 339K), the [Washington Times](#) (12/10, 283K), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (12/10, 464K).

EPA HAZE RULES TARGET TEXAS COAL FACILITIES. The [Dallas Morning News](#) (12/9, Haber, 1.26M) reports that “with an eye to lifting the haze that hangs over Big Bend National Park and other federal parks and wilderness areas,” the EPA released new air pollution standards Wednesday for Texas – one of a handful of states that had continued to resist government efforts to cut down on the release of visibility-impairing sulfur dioxide.” Meanwhile, the state’s grid operator, the Electric Reliability Council of Texas, has released analysis of a draft of the haze rule published by the EPA last year predicting that “when combined with President Obama’s order to reduce carbon emissions from the power sector as much as 4,700 megawatts of coal capacity could be shut down – roughly a quarter of the current fleet.” The Morning News points out that the tighter standards come as conditions in many national parks continue to worsen.”

BLM TO HOST OPEN HOUSE ON MONTANA MINERAL WITHDRAWALS TO PROTECT SAGE GROUSE. The [Billings \(MT\) Gazette](#) (12/10, 200K) reports that “a proposal to withdraw certain lands from mining for up to 20 years to protect sage grouse habitat in portions of Fergus, Petroleum, Phillips and Valley counties will be the subject of a Wednesday open house in Malta” hosted by the BLM. According to the article, “information on the proposal and how to provide comments will be available at stations around the room; however, there will be no formal presentation.”

BLM HOSTING PUBLIC MEETING ON MINING ACTIVITIES. The [Klamath Falls \(OR\) Herald And News](#) (12/10, 45K) reports that the BLM is “hosting a meeting next week to let the public know about a proposal to withdraw 1.9 million acres of public land from mining activities.” The meeting will be HELD Monday at the BLM Lakeview District Office in Lakeview.

Offshore Energy Development:

BOEM AWARDS LEASES IN WESTERN GULF OF MEXICO. [Marine Technology](#) (12/10) reports that the BOEM “completed its required evaluation to ensure that the public receives fair market value for tracts leased as part of Western Gulf of Mexico Oil and Gas Lease Sale 246.” The sale was held on August 19, 2015. According to the article, “after extensive economic analysis, BOEM has awarded leases on all 33 tracts receiving bids covering 190,000 acres to successful high bidders who participated in the sale, which made 4,083 unleased blocks covering nearly 22 million acres available offshore Texas.”

Additional coverage was provided by [E&P Magazine](#) (12/10).

BOEM, NAS ENTER RESEARCH PACT. [EnergyWire](#) (12/9, Subscription Publication) reports that in the coming year, the BOEM and the National Academy of Sciences “plan to supplement BOEM’s efforts to, among other things, develop the agency’s five-year offshore leasing program and modernize its infrastructure risk management systems.” BOEM “plans to publish its final environmental impact statement and leasing program proposal by the end of 2016,

Director Abigail Ross Hopper said during the bureau's first joint meeting with NAS to discuss an ongoing research partnership."

BSEE LAUNCHES NEW RISK-BASED INSPECTION PROGRAM. [EnergyWire](#) (12/9, Subscription Publication) reports that "a new federal program announced Monday will mean five high-risk offshore oil and gas facilities will soon be getting additional inspections." BSEE Director Brian Salerno said his agency will "be looking at 'several risk areas and operations' and 'taking a deeper look into how operators implement and support their safety readiness programs.'" According to the article, "picking the facilities will include looking at size, design and environmental risk factors; national inspection program data; and audits from the agency's Safety and Environmental Management Systems." Salerno said the program is focusing on those with heightened risk, but "it does not mean that the facility has a bad safety record or is a poor safety performer, only that certain risk factors are present that must be managed."

Additional coverage was provided by [Maritime Executive](#) (12/10, 21) and [World Oil](#) (12/9).

GOV. BRYANT PROPOSES ECONOMIC DEVELOPMENT PROJECTS FOR BP OIL SPILL FUNDS. The [AP](#) (12/10) lists Mississippi Gov. Phil Bryant's announced proposed economic development projects using recovery money from the 2010 BP oil spill.

COLE: SHELL'S ALASKAN ARCTIC DRILLING SIDELINED BY ECONOMICS, NOT JUST REGULATION. In a column for the [Alaska Dispatch News](#) (12/8, Cole, 203K), Dermot Cole wrote, "Fresh assertions that the Obama administration smothered Shell's Arctic dreams followed the news that Statoil gave up on its leases," as Alaska politicians and "other regular critics of the Obama administration...downplayed the economic factors, presenting both the Shell and Statoil actions as a product of excessive regulation." While the Obama administration "has increased its opposition to Arctic drilling...there is no doubt low oil prices and Shell's expensive failure to find oil are project killers." Added Cole, "If there is regulatory uncertainty, there is also economic uncertainty, brought on by court challenges, industry missteps and the crash in oil prices."

Additional coverage was provided by the [Washington \(DC\) Times](#) (12/8, Joling, 283K) and the [Alaska Dispatch News](#) (12/8, Cole, 203K).

America's Great Outdoors:

Bureau of Land Management:

HOUSE PASSES RED RIVER BOUNDARY BILL. In its "Floor Action" blog, [The Hill](#) (12/10, Marcos, 654K) reports that "the House approved legislation on Wednesday to require the Bureau of Land Management to disclaim lands along a river in Texas." According to the article, "passed largely along party lines by a vote of 253-177, the bill would direct the Interior Department to commission a survey of land spanning 116 miles along the Red River."

Also reporting on the story is the [Dallas \(TX\) Morning News](#) (12/10, 1.26M).

White House Threatens Veto Of Red River Boundary Bill. [E&E Daily](#) (12/9, Subscription Publication) reports that the Obama Administration on Tuesday said "it would veto a bill aimed at settling a dispute between Texas landowners and the Bureau of Land Management over property boundaries along the Red River." Rep. Mac Thornberry's H.R. 2130 would "require BLM to pay for a survey of about 30,000 acres along 116 miles of the Red River – using a firm picked by officials in Texas." The legislation would "take too much authority away from the secretary of the Interior, who has historically been responsible for determining the boundaries of federal lands, according to a statement from the White House Office of Management and Budget."

Additional coverage was provided by [Breitbart](#) (12/9, 2M).

UTAH MAN THREATENS TO KILL BLM EMPLOYEE WHO DIDN'T WANT TO GIVE HIM A RIDE. The [Salt Lake \(UT\) Tribune](#) (12/10, 339K) reports that a Utah man is "accused of attacking and kidnapping an employee of the U.S. Bureau of Land Management while the victim was driving in rural Millard County." However, "investigators say the assault does not appear to be politically motivated, despite widespread anti-government sentiments and threats against BLM workers earlier this year in western Utah."

Fish and Wildlife Service:

LEAKED LETTER SHOWS FWS DIRECTOR ASHE SUPPORTS YELLOWSTONE GRIZZLY DELISTING. The [Greenwire](#) (12/9, Subscription Publication) reports that "the federal government is preparing to lift endangered species protections for grizzly bears around Yellowstone National Park, according to a leaked letter from Fish and Wildlife Service Director Dan Ashe to wildlife officials in the states abutting the park." According to the article, "dated Sept. 25,

the letter to Idaho, Montana and Wyoming officials sets out a number of conditions for protecting Yellowstone grizzlies but says there is a 'mutually understood process that will allow the service to proceed with a proposed delisting.'" The article says that "the plan under consideration would establish a 19,279-square-mile 'demographic monitoring area' in which bear populations are not allowed to dip below 600 'unless necessary to address human safety issues.'" Also, "hunting would be allowed to claim up to 10 percent of females and 22 percent of adult males if populations exceeded 747 bears."

Also providing coverage is the [Big Horn Radio Network](#) (12/10).

FWS Looks To Maintain Yellowstone Bear Numbers. The [AP](#) (12/10, 2.15M) reports that "wildlife managers will seek to maintain grizzly bear numbers in the three-state Yellowstone region near current levels as they move toward lifting protections for the threatened species," a FWS spokeswoman said Wednesday. According to spokeswoman Serena Baker, "a decision on whether to propose a rule to lift protections is expected in early 2016."

Additional coverage was provided by [US News & World Report](#) (12/9, 996K), the [Washington \(DC\) Post](#) (12/10, Matthew Brown |, Ap, 7.78M), the [Washington \(DC\) Times](#) (12/10, Brown, 283K), the [Minneapolis \(MN\) Star Tribune](#) (12/10, 1.15M), the [Daily Mail](#) (12/10, 5.31M), the [Jackson Hole \(WY\) News & Guide](#) (12/10, 1K), and [Yahoo! News](#) (12/10, Brown, 6.43M).

SENATORS TO UNVEIL ANTI-TRAFFICKING PACKAGE. The [Greenwire](#) (12/9, Subscription Publication) reports that "instead of taking up a House-passed bill to stem the illicit trade in endangered species and products made from them, members of the Senate Foreign Relations Committee are planning to introduce their own anti-trafficking package." The forthcoming legislation from Subcommittee on Africa and Global Health Policy Chairman Jeff Flake and panel member Sen. Chris Coons differs from the House measure because "ours is somewhat broader," Coons said in an interview Tuesday.

GABON SEIZES IVORY CACHE. The [Greenwire](#) (12/9, Subscription Publication) reports that "more than 440 pounds of ivory has been seized in Gabon, potentially the largest seizure ever in the central African state, according to government officials." Wildlife enforcement advocacy group Eagle said "two Gabonese men originally from Nigeria and Cameroon were arrested Monday."

Also providing coverage is [Newser](#) (12/10, 303K).

JOHN JAMES AUDUBON STATE PARK TO ACQUIRE AUDUBON WETLANDS. The [AP](#) (12/8, 283K) reports that "the Kentucky Heritage Land Conservation Fund has partnered with six local citizens and the U.S. Fish and Wildlife Service to buy the 649-acre tract known as Audubon Wetlands for John James Audubon State Park."

FWS WORKING ON DOCUMENT FOR BALLVILLE DAM REMOVAL. The [Fremont \(OH\) News-Messenger](#) (12/9, 13K) reports that the FWS "plans to publish a draft supplemental environmental impact statement for the Ballville Dam project on Feb. 10, 2016, Mayor Jim Ellis said Wednesday." According to the article, "once a final supplemental EIS is issued and the city gets a final permit from the U.S. Army Corps of Engineers, it can start a dam removal project that has been discussed for several years and was reaffirmed by voters in a November ballot referendum."

ADDITIONAL COVERAGE: MODOC SUCKER DELISTED. Additional coverage of the delisting of the Modoc sucker was provided by the [Scientific American](#) (12/10, 3M), the [Salem \(OR\) Capital Press](#) (12/8, 113K) and the [Klamath Falls \(OR\) Herald And News](#) (12/8, 45K).

National Park Service:

NATIONAL PARKS TELL AMERICA'S STORY. As part of its continuing series on national parks, the [National Geographic](#) (12/10, 31.87M) reports on the history of national parks. According to the article, "national parks were a good idea that has gotten better, and a big idea that has gotten bigger." NPS Director Jon Jarvis says that "its purpose is to tell America's story, not simply protect parcels of landscape."

National Geographic Program Teaches Students Value Of National Park Stewardship. The [Salt Lake \(UT\) Tribune](#) (12/10, 339K) reports that "as the centennial of the National Park Service approaches in 2016," Jeanethe Falvey, "a senior manager for National Geographic online education helped develop a program to teach third- through fifth-grade students how to be stewards for the parks." The "Find Your Park, Love Your Park" initiative "provides resources for teachers like an interactive map, outdoor activities and a tool for students to design their own park to instruct kids how to be responsible for public space." Falvey said, "Part of the whole reason for this is just studying appreciation of the natural world and parks and being able to visit a pristine place. Just pledging to learn about that is something we find to be pretty valuable as well."

NPS Seeks To Boost Number Of Volunteers. [KSNF-TV](#) Joplin, MO (12/10) reports that "with 2016 being the 100th

anniversary of the National Park System, rangers want to boost the number of volunteers to one million nationwide.” Volunteer coordinator, Diane Eilenstein, says “there’s room for more regardless of your age and whether you want to help inside or out in the park.”

HEARING HELD ON OBAMA ADMINISTRATION’S NPS FUNDING BILL. [E&E Daily](#) (12/9, Subscription Publication) reports that NPS Director Jonathan Jarvis on Tuesday “promoted an administration proposal to bolster the agency as the blueprint for how to effectively fund the park system in its second century, but senators raised concerns about the size of the federal contributions that the centennial bill calls for.” Jarvis told members of the Senate Energy and Natural Resources Committee, “The future of the national park system is going to be dependent on somewhat of a new financial model, to be very blunt about it.” Jarvis said “that a significant stream of revenue would need to come from increased user fees, leveraged philanthropy, corporate sponsorships and international tourism.” He added, “But there’s also a requirement for appropriations to cover the basics of operations and facilities.”

NPS EVALUATING DRONES IN NATIONAL PARKS. The [Times of Northwest Indiana](#) (12/10, 283K) reports that the NPS is “evaluating the impact drones might have” in national parks. Indiana Dunes National Lakeshore spokesman Bruce Rowe said, “There is an interim rule prohibiting the use of drones in all national parks.” He added, “When the evaluation is complete, the NPS will propose a Service-wide regulation on drone use in the parks. The public will then have the opportunity to give their input before a permanent rule is finalized.”

INTERIOR URGED TO FUND SANDY REPAIRS AT RIIS PARK AND WEST POND. The [Forum \(NY\)](#) (12/9) reports that Assemblyman Phil Goldfeder is “calling on the federal government to commit funds to fix lingering Superstorm Sandy damage at Jacob Riis Park and Jamaica Bay West Pond, both of Gateway National Recreation Area.” In a letter to Interior Secretary Sally Jewell, Goldfeder “urged the Obama administration to provide money for repairs to the famed Art Deco Riis Park bathhouse and the full restoration of West Pond.”

FRANKLIN PARK RENOVATION PROGRESSING. [Washington Post Magazine](#) (12/7) reports that “the much-discussed efforts to renovate Franklin Park hit some milestones this summer, but there’s still plenty of work ahead before it’s completed.” The next steps are “working through issues of money and management.”

MESA VERDE SEEKS INPUT ON REMOVAL OF FERAL HORSES, CATTLE. The [Durango \(CO\) Herald](#) (12/9, 31K) reports that Mesa Verde National Park is seeking public input “about how to remove feral horses and cattle from the park.” According to the article, “a band of 80 feral horses and about 12 head of cattle roaming Mesa Verde National Park have rangers at a loss for how to handle the trespassing animals, which have caused significant damage to archaeological sites and pose a risk to visitors.”

FINDINGS FROM NATURAL TRAP CAVE EXCAVATION RELEASED. The [Billings \(MT\) Gazette](#) (12/10, 200K) reports that “another year of excavation concluded this summer at the Natural Trap Cave, and Julie Meachen, the project’s chief paleontologist, is beginning to release details of some of the researchers’ discoveries.” According to the article, “over the past two summers, researchers funded by National Geographic and the National Science Foundation removed pieces of long-deceased animals and pollen samples in hopes of mapping environmental changes between the last ice age and the present.” Meachen said “the recent digs produced samples from many of the large mammals discovered in excavations in the 1970s and ‘80s but no new species have been discovered.”

DISCOVERER OF DINOSAUR TRACKS AT LAKE POWELL WANTS TRACKS TO BE RESCUED. [KSL-TV](#) Salt Lake City (12/10, 464K) reports that “a photographer who discovered thousands of dinosaur tracks at Lake Powell says it’s time to start rescuing them before his spectacular finds are destroyed.” Andre Delgalvis “believes the tracks are threatened by Lake Powell’s wave action and by an invasion of tiny shellfish known as quagga mussels.” However, “at this point, it’s not clear if recovering the tracks is feasible or if it would be permitted by the National Park Service.”

AIRPLANE WRECKAGE NOT FOUND FOLLOWING REPORTED MYSTERY FIRE. The [Carlsbad \(NM\) Current-Argus](#) (12/9, Onsurez, 18K) reports it is unclear whether a small fire initially believed to have been started Tuesday night in Texas by a plane crash currently under investigation by the FAA and the NTSB was really caused by a plane accident. FAA spokesman Lynn Lunsford said no wreckage had been found on Guadalupe Peak, adding that it would be unusual for a plane to crash without leaving debris. “First step is to find the wreckage and ID the aircraft,” said NTSB spokesman Terry Williams. “We have investigators on scene doing the on-scene phase of the investigation. Right now weather is a factor,” he added.

ADDITIONAL COVERAGE: NPS POSTS JOB OPENING FOR PHOTOGRAPHER. Additional coverage of the NPS’ job posting for a photographer was provided by the [Christian Science Monitor](#) (12/9, 496K), the [Nature World News](#) (12/9), [Digital Photography Review](#) (12/9, 179K), [The Verge](#) (12/10, 1.13M), [The Week](#) (12/10, 1.62M), [Gear Junkie](#) (12/10, 3K), [Yahoo! News](#) (12/10, Byford, 6.43M), and the [Discovery Channel](#) (12/10, 395K).

US Geological Survey:

USGS STUDY FINDS ONE QUARTER OF ALASKA PERMAFROST COULD MELT BY 2100. [The Guardian \(UK\)](#) (12/10, Milman, 3.48M) reports that “up to a quarter of the permafrost that lies underneath the surface of Alaska could melt by the end of the century, spewing long-held carbon into the atmosphere and helping accelerate climate change, US government scientists have predicted.” The USGS “used satellite and on-ground data to estimate that 38% of mainland Alaska has permafrost, a band of soil, rock or sediment that is frozen underground for at least two consecutive years.” The USGS study states, “Increasing air temperatures have led to widespread thawing and degradation of permafrost, which in turn has affected ecosystems, socioeconomics, and the carbon cycle of high latitudes. Taken together, these results have obvious implications for potential remobilization of frozen soil carbon pools under warmer temperatures.”

RESEARCHERS GAUGE EFFECTIVENESS OF FISH HABITAT WORK. The [Port Huron \(MI\) Times Herald](#) (12/9, 75K) reports that “researchers say it’s too early to definitively tell if the nine fish habitat improvement projects in the St. Clair River from Port Huron to Harsens Island have made a difference.” However, “the preliminary results are encouraging.” According to the article, “crews from the USGS have been checking for fish eggs and larvae in areas close to the shore, such as the Blue Water River Walk in Port Huron, as well as in deeper parts of the river near artificial reefs.”

STUDY: WILDFIRE MAY DOUBLE EROSION IN WESTERN WATERSHEDS. [Arizona Public Media](#) (12/10, 2K) reports that a new study “predicts wildfires will dramatically increase soil erosion in the American West.” According to the article, “the study predicted two-thirds of watersheds will see at least a 10 percent increase in erosion by 2050” and “a quarter of watersheds will see a 100 percent increase.” Joel Sankey, a research geologist with the USGS in Flagstaff who led the research, said, “We know that one of the things that happens after wildfires is there can be a lot of erosion, and a lot of that soil can accumulate in downstream streams, lakes, reservoirs. That can have all sorts of impacts on the ecosystem and the watersheds themselves.”

Top National News:

IN WAKE OF RECENT TRUMP PROPOSAL, OBAMA DENOUNCES “BIGOTRY IN ALL OF ITS FORMS.”

Coverage of the President’s speech marking the anniversary of the 13th Amendment focused on what reports cast as his unmistakable – if not explicitly stated – rebuke of Donald Trump’s recent call to bar all Muslims from entering the United States. As [Bloomberg Politics](#) (12/9, Tartar, 303K) reports, the controversy about Trump’s anti-Muslim statements had largely drowned out the President’s own message on the terror threat last Sunday night, “racking up at least 250 headlines in the first 24 hours after his controversial announcement and another 200 or so since then.” Meanwhile, Obama “garnered a similar level of coverage as Trump during the first day after his terrorism speech, but then amassed just 50 headlines in the following 24-hour period.” Yesterday, Obama’s remarks sparked very positive media reviews and generated extensive print and online coverage, as well as reports on two network newscasts. [ABC World News](#) (12/9, story 3, 1:35, Llamas, 5.84M) said Obama took a “veiled shot at Trump,” and showed him saying, “We betray the efforts of the past if we fail to push back against bigotry in all its forms.” ABC went on to indicate Hillary Clinton yesterday told “supporters in Iowa [that] Trump traffics in prejudice and paranoia and that the other GOP candidates are one and the same.” The [Washington Post](#) (12/10, Gearan, Nakamura, 7.78M) also casts Clinton’s comments as “part of a new push by the Democratic front-runner, the White House and their allies to make the controversial billionaire the intolerant face of the Republican Party.”

[NBC Nightly News](#) (12/9, story 4, 2:15, Holt, 7.86M), meanwhile, reported Obama “subtly” weighed in on the Trump controversy, and showed him telling his audience, “Our freedom is bound up with the freedom of others, regardless of what they look like or where they come from or what their last name is or what faith they practice.” [USA Today](#) (12/10, Korte, 5.56M) notes Obama “emphasized those last five words, which received a standing ovation from a bipartisan crowd in Emancipation Hall.” [Politico](#) (12/9, Wheaton, 1.19M), however, says it was Democrats who gave the President “a lengthy standing ovation.” Both ABC and NBC also noted boxing great Mohammed Ali condemned Trump on Wednesday. Though not mentioning the President, the [CBS Evening News](#) (12/9, story 5, 1:50, Garrett, 5.08M) also ran a story on the reaction to Trump’s proposal, in which it said it has “has thrown the [Republican] party into turmoil.”

The [Washington Post](#) (12/9, Jaffe, 7.78M) reports that while Obama “spoke to ideas that he has returned to repeatedly in his presidency – especially the nation’s ongoing question to make real the promise of the country’s Declaration of Independence: ‘We hold these truths to be self evident, that all men are created equal,’” his speech “seemed tailored to the news of the week.” Obama, says the [New York Times](#) (12/10, Davis, Subscription Publication, 11.64M), “made subtle reference to the roiling political debate that is consuming the 2016 presidential race, implicitly rebuking...Trump,” though he made no explicit mention of him. The [AP](#) (12/10, Jalonick) similarly refers to a “veiled swipe” at Trump, as does the [New York Daily News](#) (12/10, Joseph, 3.59M). The Daily News also reports the President “even seemed to allude to Trump’s bombastic, obnoxious persona as he tweaked the GOP front-runner.” Said Obama, “However harshly, loudly, rudely challenged at each point in our journey, in America we can create the

change that we seek.”

The [Huffington Post](#) (12/9, Reilly, 251K) headlined its report “Obama Implicitly Criticizes Donald Trump’s Anti-Muslim Plan,” [CNN](#) (12/10, Bradner, 3.54M) referred to an “indirect reference to Trump,” [TIME](#) (12/10, Rhodan, 19.1M) cast Obama as using “his moment to juxtapose his vision of America with the leading Republican presidential candidate,” and [The Hill](#) (12/9, Fabian, 654K) detected “a clear shot at Trump” in the speech.

With nearly every report reaching similar conclusions, the [Washington Times](#) (12/10, Boyer, 283K) this morning indicates the President “didn’t call out Republican foes such as...Trump or Sen. Ted Cruz of Texas, who have criticized his plan to accept refugees from Syria and Iraq.” The [Christian Science Monitor](#) (12/10, Lewontin, 496K) also focused on the rest of Obama’s message yesterday, noting that he pointed to the 13th Amendment “as a foundational document repudiating the legacy of slavery.”

In an editorial, [USA Today](#) (12/10, 5.56M) argues that “political leaders...have strongly denounced...Trump’s offensive call to slam the door to the USA in the face of all Muslims,” but “reacting is not enough.” Instead, “more need to remind Americans that bigotry will only be exploited by ISIL in its effort to provoke an apocalyptic showdown between Islam and the West. ... Better yet, show up at a mosque, as President Bush did, and show the world what tolerance and unity really look like.”

Nearly Two-Thirds Of Republicans, 37% Of All Voters Back Trump Proposal. [Bloomberg Politics](#) (12/10, McCormick, 303K) reports that according to its Bloomberg Politics/Purple Strategies PulsePoll, “almost two-thirds of likely 2016 Republican primary voters favor...Trump’s call to temporarily ban Muslims from entering the US, while more than a third say it makes them more likely to vote for him.” The poll also found “support at 37 percent among all likely general-election voters for the controversial proposal.”

GOP Establishment Increasingly Concerned; Trump Leading By 20 In South Carolina. [The Hill](#) (12/9, Hagen, 654K) reported that according to a Fox News poll, Trump lead the South Carolina primary “with 35 percent support, followed by retired neurosurgeon Ben Carson at 15 percent,” and Ted Cruz and Marco Rubio “at 14 percent each.” Jeb Bush “sits in fifth place with 5 percent,” and Lindsey Graham “registers only 2 percent support in his home state.” Meanwhile, says [Politico](#) (12/9, Cheney, 1.19M), the GOP establishment is starting to come “with the harsh reality of...Trump’s rise, all but begging him not to mount a third-party run, even as some rivals talk about flouting their own pledges to support Trump if he’s the nominee.” As days go by, “party elders are left coping with their inability to guide and manage the tenor of the primary.”

In a front-page piece headlined “It’s Not Chaos. It’s Trump’s Campaign Strategy,” the [Washington Post](#) (12/10, A1, Schwartzman, Johnson, 7.78M) remarks on the fact that “insults and controversial proposals have propelled” Trump “to the forefront of the 2016 presidential race – and kept him there.” In fact, Trump’s campaign, though seemingly “lurching” and “chaotic,” features “a disciplined and methodical candidate, according to a Washington Post review of the businessman’s speeches, interviews and thousands of tweets and retweets over the past six months.” Moreover, he is managing to dominate the news cycle while “spending remarkably little.”

Netanyahu Rejects Trump’s Comments, But Will Meet With Him Later This Month. The [Washington Post](#) (12/10, Booth, 7.78M) reports that “Israeli Prime Minister Benjamin Netanyahu will meet with...Trump” in Israel on December 28. Netanyahu tweeted late yesterday, however, that he “rejects Donald Trump’s latest comments about Muslims.” Says [McClatchy](#) (12/9, Clark, 27K), “Add...Netanyahu’s name to the list of politicians denouncing...Trump’s call to bar all Muslims from entering the US.”

Over 360,000 Britons Sign Petition To Ban Trump’s Entry Into UK. The [New York Times](#) (12/10, Bilefsky, Subscription Publication, 11.64M) reports that “more than 360,000 people, angered by...Trump’s call to ban the entry of Muslims into the United States, have signed a petition accusing him of hate speech and asking the British government to bar him from the country.” In fact, “so many people have signed the online petition that Parliament is now required to consider debating the matter.” The [Wall Street Journal](#) (12/10, Winning, Subscription Publication, 6.23M), among other news outlets, also reports the petition this morning.

Trump Business Interests In Muslim World Taking A Hit. The [New York Times](#) (12/9, Droubi, Creswell, Schwartz, Subscription Publication, 11.64M) reports from Dubai that “just hours after...Trump called for a ban on the entry of Muslims into the United States, one of his Middle Eastern business partners, the Dubai-based Landmark Group, responded by removing all Trump-branded products from the shelves of its Lifestyle retail stores.” In fact, “the value of the Trump name in the world’s vast Muslim population has been thrown into question since he made his comments.” The [Wall Street Journal](#) (12/10, Fitch, Kholaf, Subscription Publication, 6.23M) runs a similar report this morning, under the headline “Dubai Retailer Stops Selling Trump-Branded Products.”

Trump Spokeswoman Defends Proposal On CNN. The [Washington Times](#) (12/10, Howell, 283K) reports Trump campaign spokeswoman Katrina Pierson “battled CNN conservative commentator S.E. Cupp Tuesday over the GOP

front-runner's call to ban all Muslims from entering the country, saying the plan is really nothing new." When Pierson said the proposal was about not allowing "insurgents" come into the country, Cupp retorted that it would in fact preclude "regular Muslims" from coming to the US. Pierson then said, "Yes from Arab nations. ... You know what? So what? They're Muslim!"

Palin Comes To Trump's Support. [The Hill](#) (12/9, Hensch, 654K) reported Sarah Palin wrote on Facebook yesterday that she supports Trump's "call for a ban on admitting Muslims into the US." Wrote Palin, "Herd mentality [is] running rampant with hypocritical and/or naïve pundits trying to crush...Trump because he's committed to clobbering the bad guys, and putting the good guys first. ... Trump's temporary ban proposal is in the context of doing all we can to force the Feds to acknowledge their lack of strategy to deal with terrorism."

COMEY: CALIFORNIA SHOOTERS WERE RADICALIZED TWO YEARS AGO. The [New York Times](#) (12/10, Schmidt, Subscription Publication, 11.64M) reports that according to "senior American officials," Syed Rizwan Farook, who, along with his wife, Tashfeen Malik, carried out last week's shooting attack in San Bernardino, CA, "began discussing a terrorist attack with his wife even before she came to America last year." FBI Director Comey said during testimony before the Senate Judiciary Committee on Wednesday that "the couple, who met online, had been talking of an attack as far back as two years ago." Comey said they were "talking to each other about jihad and martyrdom before they became engaged and married and were living in the US," adding that the "investigation to date shows that they were radicalized before they started courting or dating each other online."

[AFP](#) (12/10, Mathes) quotes Comey as saying the FBI "working very hard to understand whether there was anybody else involved with assisting them, with supporting them, with equipping them. And we're working very, very hard to understand, did they have other plans."

Tommy -

I'm attaching two pieces of testimony that BLM (Kristin Bail, AD for NLCS and Community Partnerships) is scheduled to deliver at a House Resources Federal Lands s/c hearing this afternoon:

H.R. 3668, the California Minerals, Off-Road Recreation, and Conservation Act of 2015, which designates a number of recreation areas, wilderness areas, and wild and scenic rivers, among other things. (Cannot support as drafted)

H.R. 1838, the Clear Creek National Recreation Area and Conservation Act. (Support).

Let me know if you have any questions.

Chris

Christopher P. Salotti
Legislative Counsel
U.S. Department of the Interior
Phone: 202.208.1403

**Statement of
Kristin Bail
Assistant Director
National Landscape Conservation System & Community Partnerships
Bureau of Land Management, Department of the Interior
House Natural Resources Committee
Subcommittee on Federal Lands
H.R. 3668, California Minerals, Off-Road Recreation, and Conservation Act
December 9, 2015**

Thank you for the opportunity to testify on H.R. 3668, the California Minerals, Off-Road Recreation, and Conservation Act of 2015. H.R. 3668 would designate six National Off-Highway Vehicle (OHV) Recreation Areas, six wilderness areas, and five Wild and Scenic Rivers and would authorize land transfers to Death Valley National Park, Joshua Tree National Park, and the Mojave National Preserve. The bill also would designate the Black Lava Butte and Flat Top Mesa Area of Critical Environmental Concern (ACEC), the Mojave Trails Special Management Area, and the Sand to Snow National Monument. In addition, H.R. 3668 would authorize land conveyances to the Town of Apple Valley and the City of Twentynine Palms, and includes a number of other miscellaneous provisions. Finally, the bill provides direction for the future conservation, management, and use of Federal lands within the California Desert Conservation Area (CDCA).

The Department of the Interior (DOI, Department) would like to recognize the sponsor's efforts to address a number of resource, climate change, and management issues in the California desert. Due to the length and complexity of the bill, my testimony will briefly summarize the views of DOI. While the Department supports many of the conservation goals of H.R. 3668, we cannot support the bill as written. In particular, the Department opposes the designation of the Mojave Trails area as a Special Management Area, which would fail to adequately protect the nationally significant resources found there and would undermine the ability of the Bureau of Land Management (BLM) to manage the area for responsible recreational use. Additionally, the Department strongly opposes restrictions to the President's authority to protect important areas under the Antiquities Act of 1906. A number of additional important concerns are detailed below. We defer to the Department of Agriculture and the Department of Defense regarding provisions in the bill concerning the lands and interests they administer.

Background

The California desert has been the subject of Congressional conservation efforts for nearly 40 years. The CDCA contains over 25 million acres and includes 16 million acres of public lands administered by the Department. It was singled out for special management in the Federal Land Policy and Management Act of 1976 (FLPMA). Section 601 of FLPMA recognized the unique location of the CDCA which is adjacent to the metropolitan areas of southern California and over 20 million residents. This location has always meant the management of the CDCA's fragile resources must balance the public's desire for conservation, recreational activities, public access, energy development, rights-of-way, and other uses. The CDCA Plan of 1980 and its associated amendments were vast in their scale, ambitious in their goals, and designed to accommodate a variety of uses and users.

By the early 1990s, increased development pressures on the desert and new public awareness led many to believe that further measures were necessary to adequately conserve the special places of the California desert. Through the leadership of members of the California congressional delegation, careful deliberation and an extensive public process led to the enactment of the 1994 California Desert Protection Act (CDPA), which protected 69 new wilderness areas, established three new units of the National Park Service, and provided strong protections for traditional cultural uses of the area by American Indian tribes. The areas conserved by the CDPA are some of the most beloved in the West and are invaluable resources for the people of the California desert and the nearby Los Angeles metropolitan area.

Over the past five years, Federal, state, and local partners have come together in a remarkable effort to plan for the responsible development of utility-scale renewable energy in the desert, balancing the promise of clean energy with our shared responsibility to protect the most special places and resources. As part of this effort, known as the Desert Renewable Energy Conservation Plan (DRECP), the BLM has conducted a comprehensive inventory and analysis of cultural, natural and recreation resources in the California desert, drawing on the expertise of both state and federal agencies as well as the input from local communities and the public. In the Proposed Land Use Plan Amendment and Final Environmental Impact Statement for the DRECP, for example, new conservation allocations would protect significant and intact natural habitats and cultural resources and link existing Congressionally-designated National Conservation Lands. The BLM notes that some provisions of H.R. 3668 would not be compatible with designations identified in the DRECP. Because the DRECP process included extensive public involvement and coordination with Tribal, State, and local government agencies, the BLM recommends that the bill be amended to align wherever possible with the DRECP.

H.R. 3668

Off-Highway Vehicle Recreation Areas

Title I of H.R. 3668 designates six OHV Recreation Areas totaling about 220,000 acres. The BLM supports the Dumont Dunes, Razor, and Stoddard Valley designations as they would provide congressionally designated areas for this popular recreational activity in the California desert and would be consistent with BLM management goals for these areas. The BLM notes, however, that the proposal to expand the existing El Mirage, Spangler Hills, and Johnson Valley OHV areas would conflict with some of the conservation designations identified through the public process of the DRECP, including protection of critical habitat for the desert tortoise, bighorn sheep, State-listed Mohave ground squirrel, and numerous rare and sensitive plants. We would like the opportunity to work with the sponsor on boundary modifications to these three areas to achieve greater consistency with the cooperative analysis and public input received through the DRECP in order to protect these critical habitats. We would also appreciate the opportunity to work with the sponsor and the Subcommittee on minor and technical amendments to this title, to address management discretion for commercial uses, the requirement for additional planning activities, and language concerning a project application that has been withdrawn.

Wilderness

Title II of H.R. 3668 would designate the approximately 92,000-acre Avawatz Mountains Wilderness, the approximately 8,000-acre Great Falls Basin Wilderness, and the approximately 80,000-acre Soda Mountains Wilderness. In addition, this section would expand the existing Golden Valley Wilderness by approximately 1,300 acres, the San Geronio Wilderness by approximately 6,000 acres, the Malpais Mesa Wilderness by approximately 15,000 acres, the Kingston Range Wilderness by approximately 53,000 acres, and Death Valley National Park Wilderness by approximately 88,000 acres. The Department supports each of these designations but defers to the U.S. Department of Agriculture for lands currently managed by the U.S. Forest Service. The proposed additions to the National Wilderness Preservation System will protect fragile desert ecosystems and provide important habitat for a diversity of plant and animal life. They also serve as a unique and irreplaceable living research laboratory. The Avawatz Mountains, for example, have been identified as important for regional habitat connectivity, enabling desert tortoise and other wildlife to move across a large landscape. The proposed wilderness areas meet the definition of wilderness. These lands have retained their primeval character and have been influenced primarily by the forces of nature, with opportunities for hiking, hunting, rock climbing and horseback riding for those who wish to experience the desert solitude and an outstanding backcountry experience. We would like to work with the sponsor and the Subcommittee on some management language modifications in section 203. In particular, with regard to Sections 203(e)(2) and 203(f), NPS and BLM have collaborated in the past to address cross-boundary issues. The Department would like to work with the sponsor to ensure flexible interagency coordination moving forward.

Title II proposes to release over 150,000 acres of twelve BLM-administered wilderness study areas (WSAs) from WSA status. The bill also includes new language that appears to prevent the BLM from conducting regular resource inventories and from considering public concerns regarding the management of these lands for a full range of multiple uses. The BLM strongly opposes language that would restrict the BLM's management of these lands following release from WSA status for a full range of multiple uses under FLPMA, including section 201, which provides for land inventory and identification across a broad range of resources and uses. We recommend the bill be amended to include standard WSA release language. The BLM would support the release of several WSAs under standard WSA release language, but notes that many of these areas, while not appropriate for the protection of wilderness characteristics, nevertheless contain important resources worthy of balanced management subject to the BLM's full inventory and public planning process. These WSAs include the Cady Mountain, Kingston Range, Avawatz Mountains, Soda Mountains, Great Falls Basin, and Death Valley 17 WSAs, which are small portions of WSAs that were not designated as Wilderness by this or other legislation. On the other hand, the Department notes that the Crater Mountain, White Mountains, Symmes Creek, Independence Creek, Southern Inyo, and Cerro Gordo WSAs contain significant wilderness characteristics and other unique resources. We would like the opportunity to work with the sponsor and the Subcommittee on language ensuring the continued protection of outstanding resources in these areas.

National Park System Additions

Title III of H.R. 3668 would expand the three California desert units of the National Park System: Death Valley National Park, Joshua Tree National Park, and Mojave National Preserve.

Altogether, a total of approximately 66,200 acres of BLM-managed lands would be transferred to the NPS, and the NPS would be given authority to acquire an additional 1,644 acres of non-federal land. In addition, the bill would establish several areas within Death Valley National Park as wilderness. These provisions would enhance opportunities for visitors seeking adventure and challenge, health and learning, and reflection and solitude in the great American desert lands of California. The Department strongly supports these additions and designations with amendments.

Within Death Valley National Park, the areas known as North Eureka Valley, Ibox, Panamint Valley, Warm Springs, and Axe Head (approximately 59,000 acres in total) would be designated as wilderness under the bill. In addition, the area known as the Bowling Alley, which consists of approximately 29,000 acres of land adjacent to Death Valley National Park, would be transferred from the BLM to the NPS and designated as wilderness. All of these areas are appropriate for wilderness designation because of their superlative scenery and wilderness qualities.

In addition to the approximately 29,000 acres at the Bowling Alley, about 6,400 acres of non-wilderness land in an area known as the Crater would be transferred from the BLM to the NPS for inclusion in Death Valley National Park.

At Joshua Tree National Park, approximately 2,900 acres of BLM land would be transferred to the NPS by H.R. 3668. The NPS would also be authorized to acquire approximately 1,639 acres from the Mojave Desert Land Trust, which plans to donate the land to the park. These lands, which are contiguous to several places along the northern boundary of the park, are located in primary wildlife corridors that link the park with other public lands in the Mojave Desert. The park would also be authorized to acquire and administer the Joshua Tree Visitor Center, currently located outside the park boundary and owned by the Joshua Tree National Park Association, enabling the park to protect this asset and provide for its continued public use.

At Mojave National Preserve, approximately 28,000 acres would be transferred from the BLM to the NPS for inclusion in the preserve upon termination of all mining and reclamation activities by Newcastle Gold, Limited, or any successor. Given the significant natural and cultural resources in this area as well as its proximity to the Mojave National Preserve, the Department cannot support the transfer as drafted in this title. These lands include a unique plant assemblage known as the Lanfair Valley Desert Grassland. The Spirit Mountains, one of the most significant Native American Traditional Cultural Properties in the Mojave Desert, can be viewed from this area, making this a culturally significant site as well.

The Department also opposes the inclusion of Section 303(e), which would give unrestricted water, mining, and access rights to the owners and operators of Castle Mountain Mine. Providing all of the water described in these provisions for the purposes of the mine would likely have irreparable adverse impacts on the preserve's resources and values.

On October 8, 2015, the Department testified before the Senate Committee on Energy & Natural Resources in support of the immediate expansion of the Mojave National Preserve by 21,000 acres followed by a subsequent expansion of 8,000 acres upon the termination and reclamation of mining or ten years from enactment of the title if no mining activities have occurred.

The Department also recommends amending H.R. 3668 with respect to the Death Valley National Park wilderness designation by removing references to the “Federal Land Policy and Management Act of 1976” and “Conservation Areas” which are applicable to BLM-managed areas, but not to areas that are part of the National Park System. We believe that section 202(b) should use the same language that was used for the park wilderness designation in section 601(a) of P.L. 103-433 as enacted in 1994.

We further recommend designating an approximately 1-acre area known as Mormon Peak Communication Area, which serves as a major communications hub for the Death Valley National Park community, as potential wilderness rather than wilderness, until such time that a technological alternative becomes available to the present system. We also suggest narrowing the buffer zone along the roads in the park to 50 feet from the center line to follow established NPS practice for setbacks in wilderness.

In addition, the Department recommends deleting the proposed section 301(c)(2), which would require a memorandum of understanding between the NPS and Inyo County regarding access and use to gravel pits along Saline Valley Road within Death Valley National Park. This requirement is no longer relevant due to the fact that the NPS and the county are currently working together to find alternatives to the use of this site.

Finally, the Department would like the opportunity to work with the sponsor on a number of technical issues in several NPS-related sections of the bill, including accurate terminology, alignment with language for similar provisions in other laws, time frames, and minor clarifications.

Designation of Wild, Scenic, & Recreational Rivers

Title IV of H.R. 3668 amends the Wild and Scenic Rivers Act (16 U.S.C. 1274[a]) by adding segments of five rivers to the National Wild and Scenic River System. Three of these – the Amargosa River, Surprise Canyon Creek, and Whitewater River – cross public lands managed by the BLM and NPS. All three of these rivers are important and rare riparian areas in the deserts of southern California and provide habitat for a number of threatened, endangered and sensitive species. We support these designations and would like to work with the sponsor and Subcommittee on technical issues, including correcting what we believe may be an error in the legal description.

Black Lava Butte & Flat Top Mesa

Title V of H.R. 3668 establishes the Black Lava Butte and Flat Top Mesa ACEC, which would include approximately 6,500 acres of BLM-managed public lands. The Department strongly supports this provision for the protection of the remarkable cultural resources located on Black Lava Butte but recommends minor technical amendments to enhance manageability.

Mojave Trails Special Management Area

The BLM testified before the Senate Committee on Energy & Natural Resources in support of the designation of the Mojave Trails National Monument on October 8, 2015. The spectacular

and diverse landscapes of the BLM's National Conservation Lands currently include 23 National Monuments and 21 National Conservation Areas (NCAs). Each of the National Monuments and NCAs designated by Congress and managed by the BLM is unique. However, all of these designations have certain critical elements in common, including withdrawal from mineral entry under the public land, mining, and mineral leasing laws; limiting off-highway vehicles to roads and trails designated for their use; and language that charges the Secretary of the Interior with allowing only those uses that further the conservation purposes for which the unit is established.

The Mojave Trails area encompasses approximately 965,500 acres of BLM-administered public lands in the Mojave Desert of southeastern California along historic Route 66 between Needles and Ludlow, California. The area connects eleven existing designated BLM wilderness areas that lie between the Mojave National Preserve and Joshua Tree National Park. This area features stunning sand dunes, iconic mountain ranges, and critical wildlife habitat as well as the remains of historic World War II-era training camps, sites important to Native Americans, and the best preserved section of historic Route 66. Within the proposed Special Management Area are over 250,000 acres of lands acquired by the BLM in the late 1990s from the Catellus Development Corporation for conservation purposes through donation by local conservation partners and purchase with Land and Water Conservation Fund monies.

The BLM currently manages much of this area through administratively-designated ACECs and Desert Wildlife Management Areas (DWMAs), which protect the desert environment and the habitat of the threatened desert tortoise and many other listed and sensitive species. The area was identified for protection under all of the action alternatives analyzed in the DRECP, a collaborative public planning process with the State of California over five years in the making. Based on strong public support and extensive analysis, the Department believes that the significance of the natural and cultural resources in the Mojave Trails area merits their inclusion in the BLM's National Conservation Lands. As we have previously testified, the Department believes the Mojave Trails area could be managed under the common critical elements of the National Conservation Lands in a way that protects the area's significant resources and also allows for recreational use, including by off-highway vehicles.

Title VI of H.R. 3668 would designate this area as the Mojave Trails Special Management Area with a focus on mining and motorized recreation, which would severely conflict with the protection of significant natural and cultural resources. The title contains several management provisions related to mining, utilities, off-highway vehicle recreation, and existing rights that would significantly constrain the management discretion currently available to the bureau and would fail to protect habitat for sensitive wildlife and plant species and other unique resources. Indeed, we believe the provisions outlined in this title would result in management that is considerably less protective of the area's significant natural and cultural resources than is the case today. Therefore, the Department opposes the designation of the Mojave Trails area as a Special Management Area as identified in this title. Additionally, the Department opposes the title's waiver of important processes of NEPA and FLPMA.

Sand to Snow National Monument

Title VII of the bill establishes the Sand to Snow National Monument, which would include an incredibly diverse and biologically-rich terrain spanning from the San Bernardino Mountains to

the west and Joshua Tree National Park to the east. The proposed monument includes approximately 73,200 acres of BLM-administered public lands and approximately 62,200 acres of lands under the management of the U.S. Forest Service within the San Bernardino National Forest. From west to east, the proposed monument descends from the snows of the 11,000-foot Mount San Gorgonio through the sands of the Sonoran and Mojave deserts, extends to the unusual desert riparian oasis of Big Morongo Canyon, and finally connects to the stark beauty of Joshua Tree National Park. The DRECP includes proposed National Conservation Lands units for the proposed monument area in all the action alternatives analyzed.

The Department supports designation of the Sand to Snow National Monument for its outstanding natural values, but we would like the opportunity to work with the sponsor and Subcommittee on a number of issues in this title, including language on OHV use and utilities and alignment with language for similar provisions in other laws.

Land Conveyances, Withdrawals, & Related Provisions

Title VIII of H.R. 3668 provides for the release of federal reversionary land interests, addresses California State School land and energy development in Juniper Flats, and provides for a number of land exchanges and conveyances.

Section 801 would transfer the federal reversionary interest in certain lands and minerals to the Metropolitan Water District of Southern California (MWDSC). The BLM supports the goal of conveying the reversionary interest to MWDSC. As with previous such proposals, we recommend amending the legislation to ensure the payment of fair market value for the reversionary interest and to address issues of technical clarity. The value of the reversionary interest would be established through an appraisal by the Department of the Interior's Office of Valuation Services. Upon receiving that appraisal, the District could make a decision on purchasing the reversionary interest. All costs associated with this conveyance, including the appraisal, would be the responsibility of the Metropolitan Water District.

Section 802 requires the Secretary to work with the California State Lands Commission to develop a process for exchange of state parcels within the new conservation designations. The BLM supports developing such a process, but would like to work with the sponsor on modifications to ensure it is consistent with existing authorities.

Section 803 prohibits the development of renewable energy generation facilities (excluding rights-of-way or facilities for the transmission of energy and telecommunication facilities and infrastructure) in the Juniper Flats area. The Department notes that the proposed Land Use Plan Amendment and Final Environmental Impact Statement for the DRECP designates a small portion of scattered parcels east of Juniper Flats as Development Focus Areas for renewable energy development. The Department would appreciate the opportunity to work with the sponsor and Subcommittee on boundary adjustments to ensure consistency among the maps included with the bill.

Section 804 authorizes the exchange of approximately 1,300 acres managed by the BLM and the U.S. Forest Service within the San Gorgonio Wilderness with a private individual. We are concerned that such an exchange would create private inholdings that prevent the protection of

wilderness characteristics and other unique resources for which the area was designated. The Department would like to work with the sponsor to ensure that section 804 is consistent with FLPMA, the National Environmental Policy Act (NEPA), including the requirement that all exchanges be in the public interest.

Sections 805 and 806 require the Secretary of the Interior to convey Federal land to the Town of Apple Valley and the City of Twentynine Palms for various uses. Since these are both no cost conveyances, the Department would like to work with the sponsor and the Subcommittee on language ensuring that the land would be used for purposes consistent with the Recreation and Public Purposes Act, verifying that the conveyances would be in the public interest, and including a reversionary clause.

Section 807 includes provisions related to the exercise of valid existing rights in areas identified for new designation or conveyance under the bill. The Department strongly recommends that all new designations and conveyances be subject to valid existing rights and urges a general statement protecting such valid existing rights.

Miscellaneous Provisions

Title IX of H.R. 3668 contains a number of miscellaneous provisions related to tribal uses and interests, deed restrictions on donated land, wildlife management, monument designations, and categorical exclusions for broadband. Specifically, section 901 provides for access by members of Indian tribes and requires the Secretary to develop a Tribal Cultural Resources Management Plan for the Xam Kwatchan Trail network. The Department generally supports this section and would like to work further with the sponsor on this important issue.

Section 902 stipulates that the designations under this Act should not impede military activities, such as overflights and training. The Department would like to work with the Department of Defense, the sponsor, and the Subcommittee to ensure consistency with other authorities, such as FLPMA.

Section 903 allows for the establishment of deed restrictions on the use of acquired or donated lands within the CDCA. The Department generally supports these provisions, but would like to work with the sponsor to ensure consistency with existing agreements and requirements, to provide for discretion and public input, and to ensure technical accuracy.

Section 904 permits fish and wildlife habitat restoration and management activities on lands designated as wilderness by both H.R. 3668 and the CDPA, when consistent with wildlife conservation objectives of the California Department of Fish and Wildlife. Section 904 also requires the Secretary of the Interior to authorize additional structures and facilities, as well as the continued presence of existing manmade structures and facilities, for wildlife water development projects where determined necessary to benefit wildlife by the California Department of Fish and Wildlife in the wilderness areas and the National Monument designated by the bill. The Department has concerns with this approach and recommends that the sponsor and Subcommittee consider wildlife management language consistent with laws previously enacted by Congress designating wilderness.

Section 905 would restrict presidential authority to designate a national monument in the OHV areas, special management areas, or future additions to the Mojave National Preserve proposed in H.R. 3668. The Department strongly opposes this provision. The Antiquities Act has been used for over 100 years as an instrument to protect critical natural, historical, and scientific resources on Federal lands for the benefit of future generations. Sixteen presidents in both parties have used this authority to preserve unique natural and historic features in America, such as the Grand Canyon, the Statue of Liberty, and Colorado's Canyons of the Ancients.

Finally, section 906 categorically excludes a proposed broadband corridor from review under NEPA. The Department strongly opposes this provision because the unknown environmental consequences of the corridor make it an inappropriate use of a categorical exclusion. Environmental analysis under NEPA is necessary to determine if the proposed corridor would create environmental conflicts with the resources protected by the proposed designations and if reasonable alternatives or mitigation measures would be needed to address those conflicts.

Conclusion

The Department of the Interior appreciates the sponsor's work on H.R. 3668 and supports the bill's conservation goals. The Department has a number of substantive as well as minor and technical modifications to recommend, and we look forward to continuing to work with the sponsor and the Subcommittee to address those issues.

**Statement of
Kristin Bail
Assistant Director
National Landscape Conservation System & Community Partnerships
Bureau of Land Management, Department of the Interior
House Natural Resources Committee
Subcommittee on Federal Lands
H.R. 1838, Clear Creek National Recreation Area & Conservation Act
December 9, 2015**

Introduction

Thank you for the opportunity to testify on behalf of the Department of the Interior (DOI) on H.R. 1838, which would establish the Clear Creek National Recreation Area in San Benito and Fresno Counties in California; designate the Joaquin Rocks Wilderness on public lands in San Benito and Fresno Counties; and designate seven stream segments within the Clear Creek Management Area (CCMA) as wild and scenic rivers. The BLM supports the conservation designations in the bill.

The bill also seeks to expand recreational opportunities in the CCMA, including in an area that has been identified by the Environmental Protection Agency (EPA) as containing naturally occurring asbestos. This action has the potential to expose the public to increased cancer risks. As a general matter, the Administration supports the goals of promoting responsible motorized and non-motorized recreation, including off-highway vehicle (OHV) use, while also protecting public safety, conservation, and other important uses of public lands. However, the National Recreation Area provisions of the bill are unclear about the BLM's ability to manage the lands to adequately protect public health and safety. The BLM therefore cannot support this provision of the bill as written. The BLM would like the opportunity to work with the sponsor to ensure the agency's ability to protect public health and safety is unambiguous.

Background

The BLM manages approximately 63,000 acres of public lands in the 75,000-acre CCMA in southern San Benito and western Fresno Counties, California. The CCMA offers a variety of settings and landforms that host many diverse natural and cultural resources, and offers recreation and other multiple-use opportunities, including grazing. The CCMA also contains a 30,000-acre area of serpentine rock containing naturally occurring asbestos. Until 1979, asbestos was mined in parts of the CCMA at the Atlas Asbestos Mine and mill, which is now a Superfund site.

Since the 1970s, Federal and state health agencies have expressed concerns about how recreational use in the CCMA by hikers, campers, hunters, botanists, rock collectors, and OHV users disturbs soils containing asbestos and creates the potential for exposure to and inhalation of airborne asbestos-laced dust, increasing the risk to human health. As a result of this concern, as well as the presence of the San Benito evening primrose (a special status plant species), the BLM has designated this 30,000-acre area within the CCMA as the Serpentine Area of Critical Environmental Concern (Serpentine ACEC). ACEC designations highlight areas where special management attention is needed to protect and prevent irreparable damage to important historical, cultural, and scenic values, fish, or wildlife resources or other natural systems or processes; or to protect human life and safety from natural hazards.

Based on the concerns for the health of recreational visitors, the EPA initiated a risk assessment study in 2004 in connection with the clean-up of the Atlas Asbestos Mine Superfund Site, to evaluate visitors' exposure to airborne asbestos fibers in the CCMA. The EPA's Clear Creek Management Area Asbestos Exposure and Human Health Risk Assessment (completed in May 2008) concluded that asbestos exposure for many recreational activities in the ACEC may result in excess lifetime cancer risks. The study noted that children are at greater risk than adults because they are exposed to these high levels of asbestos at an earlier age. The study also showed that visiting the CCMA for a period of more than one day per year can put adults and children above the EPA's acceptable risk range for exposure to carcinogens and increase excess lifetime cancer risk from many typical CCMA recreational activities, including OHV use and hiking.

As a result of the EPA study, the BLM implemented a temporary closure of the Serpentine ACEC in May 2008 to all forms of entry and public use in order to protect public health and safety. The BLM collaborated with the EPA, stakeholders, and the public to incorporate the EPA's health risk information into land-use decisions for the CCMA. Through an extensive planning process, with full opportunity for public comment, the BLM determined that limiting an individual's time spent in the Serpentine ACEC is the most effective way to mitigate the health risks from asbestos exposure. Thus, the BLM limits high-risk activities within the Serpentine ACEC through its Clear Creek Resource Management Plan (RMP), which was finalized in February 12, 2014. Under the management plan, the BLM allows for a range of recreational uses and other activities in portions of the CCMA. It also limits the types of uses and places time restrictions during which an activity can take place within the Serpentine ACEC to minimize asbestos-related risk to public health and safety. Specifically, the RMP strictly limits vehicular and pedestrian access to the Serpentine ACEC. The BLM will reassess recreation opportunities and travel management decisions if significant new information becomes available concerning human health risks from exposure to airborne asbestos fibers in the CCMA.

H.R. 1838

As noted earlier, H.R. 1838 would establish the Clear Creek National Recreation Area in San Benito and Fresno Counties; designate public lands in San Benito and Fresno Counties as the Joaquin Rocks Wilderness; and designate segments of five creeks within the CCMA as wild and scenic rivers.

Clear Creek National Recreation Area

Section 3 of H.R. 1838 establishes the Clear Creek National Recreation Area, to be managed by the Secretary of the Interior, to promote motorized and non-motorized recreation, including OHV use, scenic touring, hunting and gem collecting. Under the bill, the Secretary would open the CCMA to the uses identified in the bill including motorized recreation, mountain biking, hiking, hunting, and camping. The bill provides direction for developing a comprehensive management plan that would provide for these activities.

While we appreciate the sponsor's work on new language clarifying that the Secretary may still close any area, trail, or route from use for the purposes of public safety or resource protection under a future permanent management plan, we are still concerned that the bill's provisions for interim management leaves the agency's ability to close areas for the protection of public health and safety in doubt. As mentioned above, certain activities in these areas are currently limited for health and safety reasons due to the risks from the carcinogen asbestos in the area. Public and employee health and safety has guided the BLM's approach in managing the area, and the agency would like to work with the sponsor to ensure the bill provides adequate authority for the BLM to manage the recreation area, including for the risk of exposure to asbestos, and on language addressing the significant potential risks to the public and employees.

While section 4 of H.R. 1838 provides the BLM an exemption from responsibility for the public's exposure to asbestos while recreating at the CCMA pursuant to section 105 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980 (42 U.S.C. 9605), the bill does not reduce risk to the public; it only attempts to reduce liability to the BLM. As determined by the EPA, the potential public health risks are high in the Serpentine ACEC of the CCMA, especially with respect to young children. In addition, the BLM is required to meet Occupational Safety and Health Administration standards for employees working in a designated hazardous asbestos area within the Serpentine ACEC, as well as meet Federal, State, and local air and water quality regulations designed to protect public health and safety from uncontrolled releases of hazardous airborne pollutants.

Finally, the National Environmental Policy Act, the Federal Land Policy and Management Act (FLPMA), and the BLM's implementing regulations and land use planning guidance already provide for collaborative processes designed to involve Federal, State, Tribal, and local government agencies, as well as the public and local stakeholders, in the planning process. The

BLM would like the opportunity to work with the sponsor on technical modifications to the bill to ensure consistency with these existing land use planning authorities.

Joaquin Rocks Wilderness Area

Section 5 of H.R. 1838 proposes to designate 20,500 acres of public land in Fresno and San Benito Counties as the Joaquin Rocks Wilderness. The core of this area – more than 7,000 acres – has already been designated for special protection by the BLM as an ACEC. The centerpiece of the proposed wilderness area is the three large sandstone monoliths, known locally as Las Tres Piedras, which tower 4,000 feet above the southern San Joaquin Valley. The rocks are home to a number of raptors, including the prairie falcon and the majestic California condor. Vernal Pools at the top of the rocks provide important seasonal habitat, and are also an important water source for wildlife in this arid region. Rock art sites throughout the proposed wilderness attest to earlier occupation and may even include ancient astronomical references. The BLM supports the wilderness designation in H.R. 1838, and would like the opportunity to work with the sponsor on minor boundary modifications and mapping issues and on minor modifications to management language to be consistent with usual wilderness management language.

Wild & Scenic River Designations

Section 6 of H.R. 1838 proposes to add seven stream segments totaling just over 31 miles to the National Wild and Scenic River System within Fresno and San Benito Counties. All seven rivers find their origin in the mountains of Southern San Benito County in the Diablo Range and each represent distinct watersheds. The segments are all free flowing and contain outstandingly remarkable values as required by the National Wild and Scenic Rivers Act. The BLM supports these designations and would like to work with the sponsor to identify the most suitable classification for each of the seven segments.

Release of San Benito Mountain Wilderness Study Area

Section 7 of H.R. 1838 proposes to release nearly 1,500 acres of BLM-managed land in the San Benito Mountain Wilderness Study Area (WSA) from WSA status. This small area does not contain lands that meet the basic requirements for wilderness. If the San Benito Mountain WSA is released from WSA status by Congress, it would be managed consistent with the goals and objectives and resource management actions for the Serpentine ACEC and the San Benito Mountain Research Natural Area, as described in the Record of Decision and Approved RMP for CCMA. The BLM supports this provision.

Conclusion

The BLM appreciates the work by Congressman Farr on H.R. 1838. Lands in the CCMA present complex resource management and public health and safety issues. While we support the proposed conservation designations, we cannot support provisions in the bill that could increase the exposure of public land users and employees to naturally occurring asbestos. We

would like to continue working with Congressman Farr and the Subcommittee to address future uses at the CCMA, including the growing and popular activity of responsible OHV use in California and across the West. Thank you for the opportunity to testify. I would be glad to answer any questions.

DOI in the News:

LAWMAKERS CONTINUE DISCUSSIONS ON SPENDING BILL, TAX PACKAGE. [E&E Publishing](#) (12/8, 705)

reports that lawmakers in the Capitol have “just five days left to avoid a government shutdown, as negotiations proceed on an omnibus spending bill and a tax package.” Some “rumored Democrat asks in exchange for crude exports include an extension and full funding for the Land and Water Conservation Fund; money for the Payment in Lieu of Taxes and Secure Rural Schools programs; and a one-year moratorium on policy riders.” According to the article, “environmentalists said there’s a core group of Senate Democrats who are unlikely to support an exports deal unless Republicans make major concessions such as permanently banning offshore drilling in certain areas, as well as the Arctic National Wildlife Refuge.”

The [Greenwire](#) (12/7, Subscription Publication) reports that Interior Secretary Sally Jewell said Friday that “her department is opposing all policy riders under consideration for a government spending bill that could undermine the Obama administration’s lands, energy and wildlife policies, though she conceded that the negotiations are largely above her pay grade.” However, Jewell said “her Capitol Hill allies are playing a stout defense and that she believes the White House will reject one particular rider by Senate Energy and Natural Resources Chairwoman Lisa Murkowski (R-Alaska) to permit a road through the Izembek National Wildlife Refuge in Alaska.”

INTERIOR’S IG RELEASES TWO REPORTS RESOLVING CONTROVERSIES. [Politico Pro](#) (12/7, Subscription Publication) reports that the Interior Department’s inspector general on Tuesday “released two reports that resolve long-running controversies.” In one report, the independent watchdog concluded that “an offshore lease sale in the Chukchi Sea was not scientifically altered to benefit the oil industry.” And “a second report corroborated accusations that a former aide to Interior Secretary Ken Salazar violated an ethics pledge but did not act illegally.”

Additional coverage was provided by the [Greenwire](#) (12/7, Subscription Publication), the [Alaska Public Radio Network](#) (12/7, 2K), and [KTOO-FM Juneau \(AK\)](#) Juneau, AK (12/7).

WESTERN GOVERNORS SPLIT ON OVERHAUL OF LWCF. The [Greenwire](#) (12/7, Subscription Publication) reports that governors at the Western Governors’ Association meeting last Friday said “they support reauthorization of the Land and Water Conservation Fund, but disagreed over whether the 50-year-old program should first be reformed.” According to the article, “the split has thus far kept the bipartisan Western Governors’ Association on the sidelines of the testy debate in Washington over how to reauthorize LWCF, which expired Sept. 30 for the first time since its enactment in 1965.” Interior Secretary Sally Jewell, “who delivered a keynote speech to WGA on Friday, said she does not support reforming the law, arguing that it works just fine.”

Congress Urged To Renew LWCF. In an editorial, the [Hendersonville \(NC\) Times-News](#) (12/6, 31K) supports renewal of the Land and Water Conservation Fund. It argues that “Congress should approve a commonsense solution to divide proceeds roughly 40 percent each for federal and state interests and 20 percent for special projects, such as lands in danger of development.”

Additional Coverage. Additional coverage of the LWCF was provided by the [Santa Fe New Mexican](#) (12/8, 67K), the [Missoulian \(MT\)](#) (12/8, 118K) and the [News Center \(WV\)](#) (12/8).

SECRETARY JEWELL TO TESTIFY BEFORE HOUSE COMMITTEE ON COLORADO MINE SPILL. [National Journal](#) (12/8, Subscription Publication, 53K) reports that Interior Secretary Sally Jewell will appear before a Wednesday hearing in the House Natural Resources Committee “about her agency’s role in the August spill of mining waste in Colorado, which was caused by an EPA-backed team.”

Additional coverage was provided by [E&E Daily](#) (12/7, Subscription Publication) and [Bloomberg BNA](#) (12/8, 7K).

SECRETARY JEWELL DELIVERS COP21 SPEECH. The [Indian Country Today Media Network](#) (12/6, 47K) reports that “the world’s indigenous leaders met on November 27 for the International Indigenous Peoples’ Forum on Climate Change (IIPFCC) in the lead-up to the United Nations COP21 climate talks.” Interior Secretary Sally Jewell “discussed climate resilience in her COP21 speech, highlighting work in Indian country as examples of what the U.S. is doing to improve climate change within communities.” Jewell spoke of the work to “honor and capture” the “knowledge to strengthen our understanding of ecosystems and climate change.”

GOOD SAMARITAN BILL WORKING ITS WAY THROUGH CONGRESS. The [Washington Examiner](#) (12/8, 112K) reports that Rep. Joe Heck and Sen. Dean Heller are working on the Good Samaritan Search and Recovery Act of 2015. The legislation would “require the departments of Interior and Agriculture to establish processes to give eligible organizations and individuals a decision within 48 hours on a permit to access public lands.” The article says that “the permits would be issued only in cases when it’s believed the missing person or people are presumed dead.” Interior spokeswoman Jessica Kershaw said “recommendations proposed by the department were taken into account in the bill, such as removing a certification requirement for eligible groups, clarifying that a Good Samaritan search-and-recovery is done only by eligible groups and that the government is released from liability.”

REPORT: FEDERAL AGENCIES SPENDING BILLIONS ON PR, MARKETING. The [Washington Times](#) (12/8,

Howell, 283K) reports that “according to government contract data compiled from USASpending.gov in an oversight report by spending watchdog OpentheBooks.com,” federal agencies “have spent more than \$4.3 billion on self-promotion and marketing” over the last seven years. The report says agencies “spent \$2.35 billion in salary and bonus payments to federal employees with the job title of ‘public affairs officer’ and more than \$2 billion on outside contractors for additional public relations projects.”

INTERIOR DEPARTMENT CHOSEN AS TRAVEL INSTAGRAMMER OF THE WEEK. [Johnny Jet Travel Insider](#) (12/8) picked the Interior as the Travel Instagrammer of the Week.

ADDITIONAL COVERAGE: SECRETARY JEWELL PLANS WORKING GROUP TO ADDRESS REPATRIATION OF TRIBAL OBJECTS FROM FRANCE. Additional coverage that “French and U.S. officials are working together to address the issue of Native American artifacts being auctioned off against a tribe’s will” was provided by the [Lake Powell Life](#) (12/8).

ESTABLISHMENT OF GREAT BEND OF THE GILA NATIONAL MONUMENT URGED. In an op-ed for the [Arizona Republic](#) (12/7, 960K), Barnaby V. Lewis, Akimel Odham Elder of the Gila River Indian Community in Sacaton, and William H. Doelle, an archaeologist and serves as President and CEO of Archaeology Southwest, write that “the Great Bend of the Gila speaks to the diversity of our country’s cultural makeup as few places can.” They argue in support of establishing a Great Bend of the Gila National Monument.

Empowering Native American Communities:

LITTLE SHELL TRIBE SEEKS FEDERAL RECOGNITION. The [High Country \(CO\) News](#) (12/8, 74K) reports on the effort by Montana’s Little Shell Tribe of Chippewa Indians to be federally recognized. According to the article, “the state of Montana recognized the tribe in 2000, but the U.S. Bureau of Indian Affairs (BIA) remains undecided — 36 years after the Little Shell Band first submitted its petition for recognition.” But after President Barack Obama “fulfilled a promise to Indian Country when the BIA announced revisions to the acknowledgment process” in April, the tribe is hopeful.

NATIVE HAWAIIANS SPEAK OUT ON FEDERAL RECOGNITION. [Intercontinental Cry Magazine](#) (12/8) reports that in 2014, the Interior Department “held a series of 15 public hearings throughout the Hawaiian islands to discuss the reestablishment of a ‘formal government-to-government relationship between the United States and the Native Hawaiian community.’” According to the article, “throughout the hearings, thousands of Native Hawaiian’s lamented the same cry; that they oppose the U.S. government being involved in Native Hawaiian nationhood.”

SUPREME COURT LIKELY TO LIMIT INDIAN TRIBAL COURT POWER IN CIVIL SUITS. The [New York Times](#) (12/8, Liptak, Subscription Publication, 11.64M) reports that the Supreme Court, in Monday’s case of Dollar General Corp. v. Mississippi Band of Choctaw Indians, No. 14-1175, “seemed poised to limit the power of Indian tribal courts to hear civil cases against outsiders.” Several of the Supreme Court’s “more liberal members” seemed to agree with a federal appeals court’s earlier decision that the Dollar Store’s connection to the tribe “was sufficient to allow the tribal court to have jurisdiction.” However, those Supreme Court members were in the minority. Chief Justice Roberts “repeatedly raised an objection about the juries in tribal courts,” and stated that “we have never before recognized Indian court jurisdiction over a nonmember” of the tribe.

DEMOCRATS URGED TO TAKE UP NATIVE AMERICAN EDUCATION REFORM AS 2016 ELECTION ISSUE. In her column for the [Syracuse University \(NY\) Daily Orange](#) (12/8, 27K), Keely Sullivan argues that “Native American schools in the landscape of the U.S. education system have been neglected and that the issue must be taken up by 2016 Democratic presidential candidates.” She argues that “with the power of the media at their disposal, presidential candidates are the best vehicles to raise awareness and public attention about reforming Native American schools.” Sullivan concludes that “the 2016 election has the ability and the clout to bring this issue to the forefront of mainstream media and American politics, candidates must exercise that power and refuse to sideline one of the nation’s biggest blunders.”

SUPPORT URGED FOR SPOKANE TRIBE’S PROPOSED CASINO. In an op-ed for the [Seattle Times](#) (12/8, 1.17M), Carol Evans, chairwoman of the Spokane Tribal Council, writes that in June, the Interior Department “approved our privately funded \$400 million project, and sent it to the governor’s office for his agreement.” According to Evans, “by approving the Spokane Tribe Economic Project (STEP), Gov. Jay Inslee has the opportunity to bring fairness to the West Plains of Spokane County, and to set a new off-reservation gambling policy for the state that is anchored in a proper respect for tribal ancestral territory.” Evans also says that “the federal government also predicts STEP will create 5,000 local jobs, a factor that motivates many community leaders to support our proposed casino.”

Tackling America’s Water Challenges:

GILA DIVERSION PROJECT CRITICIZED. In an op-ed for the [Santa Fe New Mexican](#) (12/8, 67K), David S. Smith is founder and executive director of CAVU, writes about “what is really at stake in the proposed diversion of the Gila River in Southern New Mexico.” He argues that “the world’s first designated wilderness area,” where “people fish, hunt, raft and camp” should be left alone. Smith asks, “Shouldn’t we spend the federal funds available to us now on conservation projects we can implement within the next year or two rather than committing to build a billion-dollar diversion with only a very small portion of the money we’d need in hand?”

Securing America’s Energy Future:

Renewable Energy:

CALIFORNIA SOLAR PLAN BEST BY CONTROVERSY. The [Public CEO](#) (12/8) reports that following the release of the Desert Renewable Energy Conservation Plan’s Final Environmental Impact Statement earlier this month, “a new conflict over alternative energy has broken out.” According to the article, “pitting lawmakers, regulators, customers and the solar power industry against one another, the dispute centered around how much solar users ought to be charged — and how much solar power ought to be incentivized. Heated argument”

Onshore Energy Development:

BLM DELAYS ANOTHER OIL, GAS LEASE SALE IN FACE OF CLIMATE PROTESTS. [E&E Publishing](#) (12/7, 705) reports that the BLM “for the second time in less than a month has postponed an oil and gas lease sale in the face of planned protests by the Keep It in the Ground movement.” The bureau’s Eastern States office in Washington, D.C., said “its Thursday sale of nine parcels totaling less than 600 acres in Arkansas and Michigan would be delayed until its next quarterly lease sale March 17.”

Additional coverage was provided by [The Hill](#) (12/8, Cama, Henry, 654K), [Reuters](#) (12/8), the [Washington Examiner](#) (12/8, 112K), and the [Oil and Gas Journal](#) (12/8, 1K).

HOUSE PANEL TO ADDRESS STREAM PROTECTION RULE. [E&E Daily](#) (12/7, Subscription Publication) reports that members of the House Oversight and Government Reform Committee’s Interior Subcommittee will press Janice Schneider, assistant secretary for land and minerals management, on the Office of Surface Mining Reclamation and Enforcement’s proposed stream protection rule. OSMRE has “long described the measure as a way of better enforcing the Surface Mining Control and Reclamation Act, both related to surface and underground mines that may have an impact on waterways above.” But “coal companies, led by the National Mining Association, have long accused OSMRE of wanting to expand its powers rather than protect streams, and to shut down significant portions of the country’s mining.” Also, states are “balking at the proposal, calling it too long and costly and complaining about their inability to receive rulemaking documents before their release.”

HOUSE PANEL TO DISCUSS ROYALTY REFORM PROPOSAL. [E&E Daily](#) (12/7, Subscription Publication) reports that Republicans on a House Natural Resources subcommittee are expected to “push back” Tuesday against Obama Administration “reforms affecting coal leasing and royalty payments.” At the center of the Energy and Mineral Resources Subcommittee hearing will be the Interior Department Office of Natural Resources Revenue’s coal valuation reform proposal to “make sure mining companies are paying their due for the government-owned fuel they extract.” The proposal would “require a calculation based on the first so-called arm’s length transaction and, if not feasible, through other new means.”

STUDY FINDS OPENING FEDERAL LANDS TO DRILLING WORTH \$20.7 TRILLION. The [Washington Examiner](#) (12/8, 112K) reports that “if all federal lands not open to drilling were freed up, the ensuing rush of energy production could contribute \$20.7 trillion to the nation’s economy in less than four decades.” Joe Mason, a banking professor at Louisiana State University and a senior fellow at the Wharton Business School, found “opening all federal lands to oil, gas and coal production — including national parks and monuments — would be a massive stimulus to the nation’s economy.” The study was conducted on behalf of the pro-fossil fuel group Institute for Energy Research.

STRONGER PROTECTION URGED FOR ARCTIC NATIONAL WILDLIFE REFUGE. Dan Ritzman of the Sierra Club’s Our Wild America campaign writes for [The Hill](#) (12/7, Ritzman, 654K) that Sen. Michael Bennet’s “recently introduced legislation to protect the coastal plain of the Arctic National Wildlife Refuge as wilderness” has “long-standing public support and would officially safeguard one of America’s last truly wild places.” Senator Murkowski aims to expedite oil and gas leasing in the Refuge, following Shell’s withdrawal from the Arctic Ocean. Ritzman argues that the Arctic National Wildlife Refuge “must be protected for the sake of our climate and future generations.”

In an op-ed for the [Concord \(NH\) Monitor](#) (12/5, 65K), Charles F. Bass calls for “stronger protection” of the Arctic National Wildlife Refuge. He warns that “the threat of oil drilling continues to hang over this iconic landscape teeming with caribou, polar bears and millions of migratory birds.”

Offshore Energy Development:

BSEE ANNOUNCES SPECIAL INSPECTIONS FOR HIGH-RISK OFFSHORE OIL, GAS FACILITIES. The [New Orleans Times-Picayune](#) (12/7, 661K) reports that “high-risk offshore oil and gas facilities could face special inspections as part of a pilot program” announced Monday by the BSEE. The bureau will “choose five facilities for the special inspections based on past inspection and audit information and the results of risk-based modeling, officials said.” BSEE Director Brian Salerno said, “BSEE’s inspection teams will be focusing on several risk areas or operations. We will be taking a deeper look into how operators implement and support their safety readiness programs.”

SEISMIC BLASTING, DRILLING OPPOSED. The Shore Democrats Executive Committee writes in an op-ed for the [Lewes \(DE\) Cape Gazette](#) (12/7, 42K) to urge readers to ask their local officials to oppose offshore drilling and seismic blasting. The op-ed promotes the Assateague Coastal Trust’s website, which provides a “map with the ‘footprint’ of the BP Deepwater Horizon oil spill laid over the Atlantic Ocean off of our coast.” The committee opines of the noise created by the seismic testing, claiming it results in “Mass strandings and deaths of whales, dolphins and sea birds.” The op-ed adds that “There have already been 10 permits submitted by oil companies to the Bureau of Ocean Energy Management for drilling in the Atlantic between New Jersey and Florida.”

America’s Great Outdoors:

Bureau of Land Management:

BLM DESIGNATES 2016 FEE-FREE DAYS. The [Emmett \(ID\) Messenger-Index](#) (12/8, 22K) reports that the BLM announced fee-free days on Jan. 18, 2016 (Martin Luther King Jr. Day), Feb. 13-15, 2016, Sept. 24, 2016 (National Public Lands Day), and Nov. 11, 2016 (Veterans Day). BLM Director Neil Kornze said, “Fee-free days make it easier than ever for Americans to connect with their public lands. Come discover opportunities to hike, bike, climb, fish and camp – right outside your back door.”

Additional coverage was provided by [KMVT-TV](#) Twin Falls, ID (12/8, 1K).

HOUSE TO VOTE ON RED RIVER BILL. [E&E Daily](#) (12/7, Subscription Publication) reports that “the House could vote as soon as Wednesday on a bill aimed at settling a dispute between landowners, state officials and the Bureau of Land Management over the ownership of land along the Red River, which divides Texas and Oklahoma.” Rep. Mac Thornberry’s H.R. 2130 would “require BLM to pay for a survey of 30,000 acres along 116 miles of the Red River.” The legislation would “also require BLM to sell the property after the survey is completed.”

BLM SEEKS VOLUNTEERS FOR EAGLE COUNT. The [AP](#) (12/8, 2.15M) reports that the BLM is “looking for volunteers to help count eagles along standard routes in Wyoming.” According to the article, “volunteers with the Midwinter Bald Eagle Survey would count eagles along routes in Campbell, Johnson, Sheridan, Natrona and Converse counties on Jan. 9.”

BLM-MOAB MOVES CAMPSITE RESERVATION PROCESS TO RECREATION.GOV. The [St. George \(UT\) News](#) (12/7, 3K) reports that the BLM’s Utah Moab Field Office is “moving group campsite reservations to the website recreation.gov, including group campsites at Goose Island, Big Bend, Onion Creek, Dewey Bridge, Lone Mesa, Horsethief, Ledge, Ken’s Lake and Windwhistle campgrounds.”

TRONOX SAGE GROUSE PROJECT WINS BLM AWARD. The [Washington Times](#) (12/6, 283K) reports that “Tronox Alkali has been awarded the Bureau of Land Management’s Hardrock Mineral Environmental Award for the company’s efforts in sage grouse conservation in Sweetwater County.” Tronox was recognized for its Sage Grouse Initiative Project, “which is a strategy developed by the company to minimize its impact on sage grouse populations.”

BLM’S SAGE-GROUSE PLANS SUPPORTED. In an op-ed for the [Wyoming Tribune Eagle](#) (12/6, 44K), Judith Kohler, communications manager, public lands, for the Rocky Mountain Regional Center of the National Wildlife Federation, supports the BLM’s conservation plans for the greater sage-grouse. She argues that “the plans complement the work by private landowners, states, conservation organization and the U.S. Department of Agriculture’s Natural Resources Conservation Service – the very on-the-ground efforts and planning that led to the U.S. Fish and Wildlife Service’s decision not to list the bird.” She claims that “those who want to derail this conservation effort are out of touch with the solid, bipartisan majority of Westerners who support the plans.”

Fish and Wildlife Service:

STATES, FEDS NEGOTIATING MANAGEMENT OF YELLOWSTONE-AREA GRIZZLIES. The [WyoFile](#) (12/8)

reports that FWS Director Dan Ashe “wrote state game chiefs in September agreeing the Yellowstone-area grizzly bear population could decline to 600 — 114 fewer than today’s count of 714 — once federal protections are lifted.” According to the article, “Ashe’s Sept. 24 letter to Wyoming, Idaho and Montana officials was confirming the minimum number of bears and other measures the four agencies had agreed to at that point.” The article says that “Ashe and state officials are negotiating a complex agreement that would see the bear removed from protections of the Endangered Species Act and put under state management.”

FWS TO END PROTECTIONS FOR MODOC SUCKER. [E&E Publishing](#) (12/7, 705) reports that the FWS announced on Monday that “it will end Endangered Species Act protections for the Modoc sucker, the second fish in the history of the law to be removed from the federal lists of endangered and threatened species due to recovery.” According to the agency, “the suckers are well established in each of the streams where they were known to exist historically, and they appear to occupy nearly all available suitable habitat in the streams where they are currently found.”

Additional coverage was provided by [The Hill](#) (12/8, Wheeler, 654K), the [Houston \(TX\) Chronicle](#) (12/8, 2.15M), the [Washington \(DC\) Times](#) (12/8, 283K), [Oregon Public Broadcasting](#) (12/8, 10K), and [KOIN-TV Portland \(OR\)](#) Portland, OR (12/7, 55K).

UTAH OBJECTS TO BEING PART OF RECOVERY ZONE FOR MEXICAN WOLF. The [AP](#) (12/6, McCombs, 283K) reports that “Utah state officials are balking at the possible inclusion of southern Utah in a recovery zone for the Mexican gray wolf.” In a letter sent this week to the Interior Department, the Utah Wildlife Board argues that “scientific research shows the animals have never lived north of Interstate 40, which runs through New Mexico and Arizona.” The board puts forth that “trying to lure the wolves to Utah would actually harm the species because they would hybridize with Northern gray wolves.”

Additional coverage was provided by the [Albuquerque \(NM\) Journal](#) (12/8, 263K), the [St. George \(UT\) Spectrum](#) (12/6, 48K), and [KJZZ-FM Phoenix \(AZ\)](#) Phoenix (12/8, 8K).

GILA TOPMINNOW SPOTTED IN ARIZONA. The [AP](#) (12/8, 2.15M) reports that “an endangered fish that hadn’t been seen in Arizona in a decade has been spotted in the Santa Cruz River.” According to the article, “researchers conducting an annual fish survey found the Gila topminnow last month near the U.S. border with Mexico.” The Sonoran Institute says “the fish hadn’t been seen since 2005 and that its resurgence is a sign that the water in the Santa Cruz River is cleaner.” Doug Duncan, a fish biologist with the FWS, said “the area has seen an improvement in water quality since a 2009 upgrade to the international wastewater treatment plan.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (12/8, 283K), the [Nogales \(AZ\) International](#) (12/8, 330), and [KNXV-TV Phoenix \(AZ\)](#) Phoenix (12/8, 184K).

MEMBERS OF INTERAGENCY GRIZZLY BEAR COMMITTEE TO CONVENE IN MISSOULA. The [AP](#) (12/8, 2.15M) reports that “state and federal grizzly bear experts from across the Pacific Northwest will be in Missoula this week to discuss ongoing efforts to remove the bears from federal Endangered Species Act protection.” The Interagency Grizzly Bear Committee will kick off its winter meeting Tuesday.

Additional coverage was provided by [Montana Public Radio](#) (12/8).

APPEALS COURT CLEARS SALVAGE LOGGING PROJECT IN OREGON. The [Salem \(OR\) Capital Press](#) (12/7, 113K) reports that “salvage logging on BLM land in Southern Oregon did not violate the Endangered Species Act by jeopardizing the threatened spotted owl, according to the 9th Circuit.” The court “upheld a previous ruling, which found that the U.S. Fish and Wildlife Service properly considered the impact of salvage logging on the threatened northern spotted owl.” The 9th Circuit also “rejected the allegation that the Fish and Wildlife Service ignored data that showed spotted owls expand their home range after fires.”

EFFORT SEEKS TO SAVE FISH IN COLORADO RIVER BASIN. [KUNC-FM](#) Greeley, CO (12/8, 5K) reports on the Upper Colorado River Endangered Fish Recovery Program, a “long-standing program” which is “part of a multistate effort to save four species of fish native to the Colorado River Basin: humpback chub, Colorado pikeminnow, razorback sucker and bonytail.”

MALAYSIANS ARRESTED IN OREGON ON WILDLIFE SMUGGLING CHARGES. The [AP](#) (12/8) reports two Malaysian nationals were arrested in Portland on federal allegations of smuggling orangutan skulls and parts of other wildlife into the US. According to the complaint, the two “own an online business that has been smuggling endangered wildlife into the U.S. since 2004.” The charges carry a maximum sentence of 20 years incarceration and a fine up to \$250,000. This story is also carried on the website of [KOMO-TV](#) Seattle (12/8, 324K). Additional coverage is provided by [Malay Mail Online](#) (12/8) and the [Rakyat \(MYS\) Post](#). (12/8)

SNAKE LOBBY DECRIED FOR DEFENSE OF “DANGEROUS, INVASIVE” SPECIES. In a 1,950-word piece for

[Slate](#) (12/8, Flesher, 1.24M), South Florida Sun-Sentinel reporter David Flesher rails against the reptile lobby for their support of the “wide availability of dangerous, non-native snakes” in the US, highlighting the “dangerous, invasive” nature of the species. The FWS is cited asserting “More than 1.2 million Burmese pythons, boas, ball pythons, and other constrictors were imported into the United States from 2004 to 2013.” Yet, “Under pressure from the [snake] lobby and its political allies, the Fish and Wildlife Service dithered for years,” Flesher writes, describing how the industry kills legislation to ban certain types of pythons. While Flesher concedes “many snake owners love their animals,” he concludes they are too dangerous to merit conservation.

National Park Service:

SENATE COMMITTEE TO HOLD OVERSIGHT HEARING OF NPS. [The Hill](#) (12/7, Devaney, Wheeler, 654K) reports that on Tuesday, the Senate Energy and Natural Resources Committee will “hold an oversight hearing of the National Park Service ahead of the agency’s 2016 centennial.”

RISING SEAS THREATEN STATUE OF LIBERTY. [New Jersey Local News](#) (12/6, 785K) reports that “rising sea levels due to climate change threaten the Statue of Liberty and it would cost \$1.5 billion to replace the landmark, according to the U.S. Interior Department.” Reports by the agency’s inspector general and the NPS said that “\$40 billion in national parks, historic sites, and monuments are endangered as water levels rise along with increased temperatures.” The article notes that “among the sites named are the Statue of Liberty and Gateway National Recreation Area, which includes the Fort Hancock and Sandy Hook Proving Ground National Historic Landmark in New Jersey.”

Additional coverage was provided by the [Middletown \(NJ\) Patch](#) (12/8, 6K).

CEREMONY HELD IN REMEMBRANCE OF PEARL HARBOR ATTACK. The [AP](#) (12/8, 2.15M) reports that “a few dozen elderly men who survived the Japanese bombing of Pearl Harbor 74 years ago gathered Monday at the site to remember fellow servicemen who didn’t make it.” The U.S. Navy and NPS “hosted a ceremony in remembrance of those killed on Dec. 7, 1941.” According to the article, “more than 3,000 people joined the survivors.” The article says that “the event was held on a Navy pier overlooking the USS Arizona Memorial.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (12/6, 283K), the [Boston \(MA\) Globe](#) (12/8, Mcavoy, 1M), the [Albuquerque \(NM\) Journal](#) (12/8, 263K), the [Boston \(MA\) Herald](#) (12/8, 629K), the [Denver \(CO\) Post](#) (12/8, Press, 825K), [US News & World Report](#) (12/7, 996K), the [Washington \(DC\) Post](#) (12/8, Audrey Mcavoy |, Ap, 7.78M), the [New York \(NY\) Times](#) (12/8, Press, Subscription Publication, 11.64M), [CNN](#) (12/8, Hetter, Hunter, London, 3.54M), [USA Today](#) (12/7, Zoroya, 5.56M), the [Japan Times](#) (12/8, 5K), [WHDH-TV Boston \(MA\)](#) Boston (12/8, 188K), and [WKKJ-FM Chillicothe \(OH\)](#) Chillicothe, OH (12/8, 2K).

HARRIET TUBMAN NATIONAL PARK SET TO CLEAR HURDLE. The [Auburn \(NY\) Citizen](#) (12/8, 53K) reports that “the Harriet Tubman National Historical Park in Auburn is closer to becoming reality, but two federal government agencies need to act to formally establish the site.” Sen. Chuck Schumer said Monday that “a ‘general’ land transfer agreement has been reached between the A.M.E. Zion Church and the Department of Interior, which oversees the National Park Service.” Under the terms of the agreement, “the church agreed to sell the historic Thompson Memorial A.M.E. Zion Church, which is located on Parker Street and will be part of the park, to the Interior Department.” The church and the NPS will “jointly operate the Home for the Aged and Tubman’s residence on South Street through a preservation easement.” According to Schumer, the Department of Interior and Department of Justice “must finalize the agreement to formally establish the Tubman park.”

Additional coverage was provided by the [Syracuse \(NY\) Post-Standard](#) (12/8, 533K).

NPS TO TRACK WILD HOGS WITH GPS COLLARS. The [AP](#) (12/8, 2.15M) reports that “with wild hogs plaguing” Great Smoky Mountains National Park and the Big South Fork National River and Recreation Area, “officials are using GPS technology to keep an eye on where they roam.” They have been “approved to share 20 GPS collars that would allow biologists to track some of the hogs.” Park wildlife biologist Bill Stiver said, “Wild hogs are the most prolific large animal in North America. They can breed at six months of age and have two litters a year, each with three to eight piglets.”

Additional coverage was provided by the [Christian Science Monitor](#) (12/7, 496K) and the [Knoxville \(TN\) News Sentinel](#) (12/8, Simmons, 229K).

JUDGE DISMISSES COMPLAINT OVER USE OF CANNABIS AT ROGER WILLIAMS NATIONAL MEMORIAL. The [Providence \(RI\) Journal](#) (12/7, Naylor, 316K) reports that “a federal judge on Monday dismissed a complaint filed by Anne Armstrong and Alan Gordon of The Healing Church, who said the government interfered with their ‘cannabis-related religious activity’ at the Roger Williams National Memorial in May.” Senior U.S. District Judge Mary M. Lisi said “the plaintiffs could have practiced their religion freely elsewhere.”

GLACIER PARK BREAKS VISITATION RECORD. The [AP](#) (12/8, 283K) reports that “despite wildfires this past summer, Glacier National Park has set an all-time annual visitation record already this year.” According to the article, “through Nov. 30, 2.35 million visitors had entered the park this year, beating 2014’s full-year record-setting number of 2.33 million visitors.” The article says that “a total of 19,505 visitors entered the park last month – a 24 percent increase from last November.”

GREAT SMOKY MOUNTAINS NATIONAL PARK PLANNING FESTIVAL OF CHRISTMAS PAST. The [AP](#) (12/8, Press, 7.78M) reports that Great Smoky Mountains National Park is planning the 40th annual Festival of Christmas Past this weekend. The park says the program will be held “from 9:30 a.m. to 4 p.m. Saturday at Sugarlands Visitor Center.” The festival is free.

FUNDING APPROVED FOR REVITALIZATION OF FRANKLIN PARK. The [Washington Business Journal](#) (12/8, Subscription Publication, 112K) reports that “the District is expected to front the estimated \$18 million cost of revitalizing Franklin Park, a major public space initiative on federally owned land in the heart of downtown Washington.” The National Capital Planning Commission “on Thursday unanimously, and enthusiastically, approved the concept plans for the overhauled 4.8-acre park, the second largest National Park Service-owned square in downtown D.C.” Peter May, the park service representative to the commission, said, “We’re grateful to the District’s interest and willingness to not just talk about making improvements, but actually put a lot of money into doing it. We’re very grateful for that, because with our own resources, it could take a while to realize anything close to this. And frankly it wouldn’t be as aggressive as what we are doing now.”

FIRE ISLAND BEACHES TO PARTIALLY BAN VEHICLES FOR DUNE STABILIZATION PROJECT. [Newsday \(NY\)](#) (12/8, 1.42M) reports that “off-road driving will be off limits on some Fire Island beaches during a dune stabilization project that is expected to last into early next year, officials said.” According to Fire Island National Seashore Superintendent Chris Soller, “vehicles will be banned on beaches from Kismet east to Robbins Rest.” The article says that “the \$2.9 million project, largely financed by Sandy relief aid, is intended to restore navigation channels at the Fire Island communities.”

US Geological Survey:

USGS RESEARCH SHOWS URANIUM CONTAMINATES WESTERN WATER. In a 2,115 word piece, the [AP](#) (12/8, Knickmeyer, Smith, 2.15M) investigates the problem of uranium-contaminated water in California’s central farm valleys and in the Midwest, where the US Geological Survey has found “up to one in 10 public water systems have raw drinking water with uranium levels that exceed federal and state safety standards.” Although authorities are not currently working to prevent uranium contamination, USGS researcher Bryant Jurgens predicted that if they start, “it’s going to take many decades to reverse” the current levels of contamination, which he said are the result of decades of contamination.

In an accompanying piece entitled “5 Things To Know About Uranium Found In Drinking Water,” the [AP](#) (12/8, Knickmeyer, Smith, 2.15M) explained the cancer risks from long-term exposure to uranium, how farming methods and irrigation can lead to uranium’s presence in drinking water, and the geographical regions affected by the contamination. The AP laments, “officials are unable to point to any public health campaigns in the most-affected areas or any help with testing or dealing with wells that test for high levels,” while noting some schools and communities that are addressing the issue. The article adds that public water systems are tested for uranium and treated, but points out that private water systems are not.

Top National News:

OBAMA’S OVAL OFFICE ADDRESS FAILS TO QUIET CRITICS OF HIS ISIL STRATEGY. Continuing analysis of President Obama’s Sunday evening address on terrorism and the ISIL threat splits along ideological lines, with commentators on the left praising what they cast as Obama’s caution and call on Americans not to blame Islam as a whole for extremism and conservatives saying Obama failed to offer any new approaches or to acknowledge that the threat is larger than he has indicated in the past. There is also coverage of how terrorism is re-emerging as a presidential campaign issue, which analyses say could benefit Republicans.

The [Washington Times](#) (12/8, Boyer, Taylor, 283K) reports the White House defended the President’s counterterrorism strategy on Monday “against a flood of criticism that his prime-time address to the nation was weak.” From his “‘stay the course’ message in the face of the latest terrorist attacks to complaints that he veered into a partisan plea for gun control,” critics said the speech “failed to inspire confidence in his strategy or reassure nervous Americans” about security. Gerald Seib of the [Wall Street Journal](#) (12/8, Subscription Publication, 6.23M) writes that the President intended to rally the nation behind his anti-ISIL strategy, but the speech seemed to have the opposite effect, widening the divide between Obama and his critics.

The [AP](#) (12/8, Hennessey) writes that when Obama “seized the spotlight for a rare prime time address” from the Oval Office on Sunday evening, he offered “no new policy prescriptions, no fresh military strategies and no timelines,” but rather, “came with one major message: It’s going to be OK.” The President “sought to calm nerves and quiet a chorus of critics” who say he “has been too slow to acknowledge the threat posed by Islamic radicalism and too tepid in his response.”

On [NBC Nightly News](#) (12/7, story 6, 2:20, Holt, 7.86M), correspondent Richard Engel said that “three out of the four” steps in the President’s plan to defeat ISIL “aren’t working.” Engel said that the US has been successful in hunting down terrorists through drone and coalition airstrikes. However, he said the program to train and assist ground forces “has been by any measure, a failure.” Engel also said that sealing Turkey’s border with Syria is “another approach tried and failed.” Finally, Engel reported that while there has been progress in the pursuit for ceasefires and political resolution in the Syrian war, the war “still has no end in sight.”

In a similar segment on [Fox News’ Special Report](#) (12/7, 1.53M), Kevin Corke provided an assessment of Obama’s four-step plan. Corke said the airstrikes have been working, noting that it was confirmed on Monday that the “the head of ISIS in Libya was killed in a massive airstrike.” However, Corke said training and equipping Syrian opposition forces has had little success. Corke said that while Obama has conducted “lateral meetings” with Russia and Turkey and Secretary of State Kerry “continues to push for” a political agreement, there is “no guarantee” that Russia will “change its course and end support for the Assad regime.”

The [New York Times](#) (12/8, Callimachi, Subscription Publication, 11.64M) reports that ISIL militants have made it clear that they want the US “and its allies to be dragged into a ground war,” which could “turn the occurrence into a new recruiting drive at the very moment when the terror group appears to be losing volunteers. It is partly that theory” that the President Obama referred to when he said the US “should pursue a ‘sustainable victory’ that involves airstrikes and supports local forces” fighting ISIL rather than increased allied intervention in the region.

The [Washington Post](#) (12/8, Eilperin, Mufson, 7.78M) reports the President “had made nine public statements” after the Paris attacks, but following the San Bernardino incident, “he decided that would not be enough.” In his [National Journal](#) (12/7, Subscription Publication, 53K) column, Charlie Cook writes that “one of the worst days to be president would be one in which advisers and supporters are pressing you to say or do something to address an almost impossible situation about which there really isn’t much you can say or do.” Obama “had to say something. A president is more than a commander in chief.” But “there was little he could say at this time, nothing consequential.”

The [Washington Post](#) (12/8, Debonis, 7.78M) reports the President “called on Congress to vote on a new war authorization ‘to demonstrate that the American people are united and committed’ to the fight against” ISIL, but Congress “is hardly united behind the need for a new authorization – or most of the other proposals Obama outlined in his Oval Office address.” John McQuaid writes on the [Forbes](#) (12/7, 7.28M) website that “many people have been finding President Obama’s rhetoric pretty weak. Sunday night, he tried to correct this problem. Did he? Not really.” He “faces a strange, perhaps unprecedented problem for a president trying to reassure the nation facing attack from abroad. He is not trying to rally people for war, but against it.”

The [Military Times](#) (12/8, Shane, 792K) reports Republicans “panned” the speech “as more political spin than a real plan for defeating terrorists.” Peter Beinart of [The Atlantic](#) (12/7, 2.66M) writes that Obama “gave the address to convince an increasingly fearful nation that he takes the terrorist threat seriously. But he doesn’t, at least not in the way his political opponents do.” Many Republicans “still see the ‘war on terror’” in the “epic terms” of the first days after 9/11.

The [New Yorker](#) (12/7, Davidson, 4.84M) reports on its website that Obama “spoke about the positions that some politicians have found it easy or, rather, tempting, to push now and yet are dangerous or corrosive” – namely, blaming Muslims. Julia Azari of [Vox](#) (12/7, 874K) writes that the President attempted to “strike a delicate balance: to say something acknowledging ‘radical Islam’ while simultaneously challenging the politics of fear.” The [Daily Caller](#) (12/7, Harper, 366K) reports that the Center on American Islamic Relations, “the largest Islamic advocacy group in the country, lauded Obama’s televised speech, in which Obama urged Americans not to associate all Muslims with the terrorist attacks.”

David Corn of [Mother Jones](#) (12/7, 1.05M) writes that “in a highly political season...Obama has a tough task: to present the campaign against [ISIL], Al Qaeda, and other extremists in the proper context.” Polls show that “many Americans are wigged out about terrorism, particularly Republicans,” even though “since 9/11 jihadist terrorism in the United States has claimed the lives of 45 people, and 48 have been killed in terrorist attacks spurred by white supremacist or far-right extremist ideologies.”

The [Washington Post](#) (12/8, 7.78M) says in an editorial that “the heart” of Obama’s speech “concerned what he does not want to do in response to terrorism. After reviewing steps he has already taken or proposed” to fight ISIL, he

“delivered what sounded like his main appeal: ‘Our success won’t depend on tough talk, or abandoning our values or giving into fear.’” But Obama “still is not doing what is needed to ‘destroy’” ISIL, which “would require a Sunni ground force, made up of Syrians, Iraqis and perhaps foreign troops from the Persian Gulf and Turkey, with substantial U.S. support.” David Ignatius writes in his [Washington Post](#) (12/8, 7.78M) column that “at the center” of Obama’s strategy “is an empty space. It’s supposed be filled by a hypothetical ‘Sunni ground force,’ but after more than a year of effort, it’s still not there. Unless this gap is filled, Obama’s plan won’t work.”

The [Miami Herald](#) (12/8, 620K) says in an editorial that Obama “broke no new ground, and truth be told, he didn’t make the most persuasive case that his strategy...is the right one.” But still, “by and large hit the right tone and said what needed to be said.” The [Christian Science Monitor](#) (12/7, 496K) says in an editorial that the President “laid out a range of tasks necessary to defeat Islamic State and prevent another shooting like that in San Bernardino,” but “perhaps the most difficult yet critical task was this: that Muslim leaders speak out against interpretations of Islam that are ‘incompatible with the values of religious tolerance, mutual respect, and human dignity.’”

Marc Thiessen writes in his [Washington Post](#) (12/8, 7.78M) column that Obama “did nothing more Sunday night than repackage his old, failing strategy in the shiny wrapping of tougher language,” and in his [Washington Post](#) (12/8, 7.78M) column, Michael Gerson writes that Obama “warned against ‘tough talk.’ On this, at least, no one can accuse him of hypocrisy.” However, John Nichols writes on [The Nation](#) (12/7, 367K) website that “the agenda Obama laid out was an ambitious one.” And in his [Washington Post](#) (12/8, 7.78M) column, Eugene Robinson writes that “Obama’s plan to ‘destroy’ the group is cautious, slow and uncertain. But the one thing I haven’t heard from his critics is a better idea.”

Peter Dombrowski of the Navy War College writes on the [New Republic](#) (12/7, 232K) website that Obama “has adjusted tactics when needed” and “nonpartisan analysis...suggests it is working, albeit slowly. Few American politicians share the President’s faith, however.”

Speech Viewed In Context Of 2016 Politics. Ryan Grim of the [Huffington Post](#) (12/7, 251K) writes that “with the rise of the ultra-conservative wing of the GOP, and the surge of presidential contenders like Donald Trump, Ben Carson and Ted Cruz, all of whom have demonized Muslims in one way or another, it is nearly a requirement for a GOP candidate to dog whistle, or worse, against Muslims.” [Reuters](#) (12/8) columnist Bill Schneider writes that Trump is leading this populist wave by running on emotion, while Obama insists on cool analysis of the facts. But [National Journal](#) (12/7, Subscription Publication, 53K) says “the disconnect” between the President “and the American public on the urgency of the ISIS threat is a problem for his party in 2016, especially for Hillary Clinton.”

The [AP](#) (12/8, Peoples) reports that “minutes after” Obama finished his remarks, Sen. Marco Rubio “declared that he ‘may have made things worse.’ Jeb Bush called the president ‘weak’ and his approach ‘business as usual.’ And Donald Trump declared on Twitter, ‘We need a new President – FAST!’” The [New York Daily News](#) (12/8, Edelman, 3.59M) reports the candidates continued their critiques on Monday, with Bush saying on Fox News, “We’re at war with radical Islamic terrorism and the President continues to deny that.” Mike Huckabee said on MSNBC, “I think he blew a great opportunity. ... I did not hear that his main focus was we’re going to do whatever it takes.”

The [New York Times](#) (12/8, Board, Subscription Publication, 11.64M) says in an editorial that if the President is right that groups like ISIL want Americans to give into fear, then ISIL “must have been cheered by the presidential field, most of whom did their best to talk tough and stoke fear without advancing any workable ideas. ... This is the moment for presidential candidates to show they’re ready to advance solutions that are palatable to the majority of Americans who, despite their anger and fear, don’t support another long war. So far, the candidates’ talk offers next to nothing.”

Dan Balz of the [Washington Post](#) (12/8, Balz, 7.78M) writes that “the instantaneous reaction” to the speech “was as predictable as it was partisan. The battle over how to confront the threats from Islamic state militants has been baked into the politics of 2016.” Dana Milbank writes in his [Washington Post](#) (12/8, 7.78M) column that the President “addressed the nation Sunday night from the Oval Office...and the loyal opposition answered his rallying cry over the next day with a patriotic display of carping and dyspepsia. ... It was tiresome. There’s a real case to be made that Obama’s minimalist strategy isn’t working. But the only thing this reflexive complaining does is divide the country further.”

Obama’s Motivations For Standing For Speech Considered. In a blog post, the [Washington Post](#) (12/8, Borchers, 7.78M) looks at why the President chose to stand for the speech, writing that it may have been due to “the way he would be perceived and the way he would feel. ... Standing up makes you look more powerful and confident. ... More important to the president, however, might be what standing up does for his own comfort level.” In his two previous Oval Office addresses, “he seemed stiff and uncomfortable.” [Politico](#) (12/7, Wheaton, 1.19M) writes that the very idea of the Oval Office address may be on its last legs. While it “was once a symbol of presidential gravitas...more often than not, the president and his message can often get lost in the scenery.”

WTimes Says ISIL “Has Risen Rapidly” Under “Obama’s Watch.” The [Washington Times](#) (12/8, Scarborough,

283K) reports that “under President Obama’s watch,” ISIL “has risen rapidly from the ruins of its Iraq insurgency in 2010 into a full-service global terrorist group” with “affiliates in 19 countries, thousands of adherents in Europe and hundreds of followers in the United States.” The [Washington Times](#) (12/8, Taylor, 283K) says in another report that a study by the American Enterprise Institute released Monday says both ISIL and Al Qaeda “are no longer on the run and arguably are winning.” The [Huffington Post](#) (12/7, 251K) reports a new CNN/ORC poll finds that 53% of Americans “now favor sending ground troops into combat” against ISIL.

In a [Wall Street Journal](#) (12/8, Subscription Publication, 6.23M) op-ed, Sens. Lindsey Graham and John McCain write that while the President insists his anti-ISIL strategy is working, he has adopted a reactive and indirect approach that is not enough to defeat this growing and secretive enemy.

Two Fox News Contributors Suspended For Use Of Vulgarities In Discussing Obama Speech. [The Hill](#) (12/7, Byrnes, 654K) reports that retired Lt. Col. Ralph Peters, a Fox News analyst, was suspended after referring to Obama as “a total p----” on Fox Business on Monday, while Fox News contributor Stacey Dash was suspended for saying on the flagship network that the President “didn’t give a s-t.” The [Los Angeles Times](#) (12/8, Battaglio, 3.6M) also reports on the two-week suspensions.

FBI SAYS SAN BERNARDINO ATTACKERS HAD BEEN RADICALIZED “FOR QUITE SOME TIME.” Coverage continues of the investigation into the background of San Bernardino attackers Syed Rizwan Farook and Tashfeen Malik. [ABC World News](#) (12/7, story 3, 3:00, Muir, 5.84M) reported that the FBI said Monday that they “were both radicalized for, quote, ‘quite some time.’” ABC (Ross) added, “There was no joy, no smiles, as the two future killers arrived in the United States for the first time as a married couple. ... Tonight, federal authorities are trying to determine if even then they were planning a war with America.”

The [Washington Post](#) (12/8, Ryan, Dauber, 7.78M) reports FBI Los Angeles Field Office Assistant Director in Charge David Bowdich said at a news conference, “Both subjects were radicalized and have been for quite some time.” He “touched on the question of whether one of them guided the other down the path of radicalization, saying that police did not know yet when or how this might have occurred.” Bowdich said, “How did that happen and by whom and where did that happen? I will tell you right now, we don’t know those answers at this point.”

[NBC Nightly News](#) (12/7, lead story, 2:50, Holt, 7.86M) reported that “federal authorities are trying to connect the dots to determine whether others may have been involved and whether the duo had even more targets in mind.” Asked if investigators had any sense of “who was in control during the attack,” Bowdich replied, “We do not have any sense who is in control.”

[USA Today](#) (12/8, Bacon, 5.56M) reports that Bowdich said there was evidence that Farook and Malik “had practiced shooting at local ranges in recent days. Bowdich called the investigation ‘massive,’ saying more than 400 interviews had been conducted and more than 300 pieces of evidence amassed.” On the [CBS Evening News](#) (12/7, story 3, 2:50, Pelley, 5.08M), Carter Evans reported that two days before the attack, Farook took target practice at the Riverside Magnum Range with his AR-15. The [New York Times](#) (12/8, Nagourney, Subscription Publication, 11.64M) reports Bowdich said authorities “had recovered 19 types of pipes in the couple’s home that could have been made into bombs, up from the 12 types” that had been previously identified.

[ABC World News](#) (12/7, story 4, 2:20, Muir, 5.84M) and [NBC Nightly News](#) (12/7, story 2, 2:20, Holt, 7.86M) reported on some new details on the moments of the attack, interviewing survivors, while the [CBS Evening News](#) (12/7, story 4, 2:10, Pelley, 5.08M) reported that “six of the 21 people wounded last Wednesday remain in the hospital, two of them are in critical condition.”

Malik Attended “Conservative Religious School” In Pakistan. The [New York Times](#) (12/8, Masood, Walsh, Subscription Publication, 11.64M) reports that officials also said Monday that Malik “spent a year studying at a conservative religious school for women” in Multan, Pakistan starting in 2013. Representatives of the Al Huda Center said that Malik “enrolled in an 18-month course to study the Quran,” but “left before finishing the course, telling administrators she was leaving to get married.” The [Los Angeles Times](#) (12/8, Sahi, Bengali, 3.6M) says the school is part of a network of religious schools “that has educated thousands of mainly urban, upper-middle class Pakistani women in a conservative strain of Islam.” The [Wall Street Journal](#) (12/8, Shah, Nauman, Subscription Publication, 6.23M) also reports on Malik’s attendance at the school.

Investigators “Taking A Close Look” At Former Neighbor Of Attackers. On [NBC Nightly News](#) (12/7, story 3, 1:45, Holt, 7.86M), correspondent Pete Williams reported that “a big question” is whether anyone else knew that Farook and Malik “were planning some kind of attack? Officials are questioning a former neighbor, Enrique Marquez. Today officials said publicly that five years ago he agreed to buy two assault-style rifles for Farook – the same two rifles that were eventually used in the San Bernardino shooting. Last week the FBI said Marquez was not a suspect. Tonight, after searching his house twice over the weekend, officials say they are taking a close look at him.”

TRUMP CALLS FOR "A TOTAL AND COMPLETE SHUTDOWN OF MUSLIMS ENTERING" US. In the wake of the recent deadly shooting spree in San Bernardino, California, and the terror attacks in Paris, GOP presidential frontrunner Donald Trump on Monday called for Muslims to be barred from entering the US. Trump's proposal, which received widespread media coverage – including reports in the lead segments of two-of-the-three network news broadcasts – was quickly criticized by the White House and GOP and Democratic presidential candidates alike.

In the lead segment for [ABC World News](#) (12/7, lead story, 3:35, Muir, 5.84M), David Muir reported that Trump on Monday issued an "unprecedented call to bar all Muslims from entering the" US, calling for "a, quote, total and complete shutdown of Muslims entering this country." ABC's Tom Llamas added that "Trump is telling the world Muslims are no longer welcome in America," issuing a call "for a total and complete shutdown of Muslims entering the United States. Declaring, 'Our country cannot be the victims of horrendous attacks by people that believe only in Jihad, and have no sense of reason or respect for human life.'" Llamas said that Trump's remarks came "less than 24 hours after President Obama called for more tolerance for Muslims after that terrorist attack in California."

In a follow-up segment for [ABC World News](#) (12/7, story 2, 1:05, Muir, 5.84M), Martha Raddatz said, "Just think about what Donald Trump is saying right now. There are as many as seven million Muslims in this country. So, could their relatives not come in? What about athletes? Would Trump ban teams from coming from Muslim countries? Student visas? The White House has already responded, saying it's totally contrary to our value as Americans." In the lead segment for the [CBS Evening News](#) (12/7, lead story, 2:00, Pelley, 5.08M), Major Garrett reported that Trump's GOP presidential rivals "uniformly condemned his proposal," while "Democratic presidential candidates issued withering criticism of Trump. Hillary Clinton called the comments 'reprehensible' and 'prejudiced' and said, 'This makes us less safe.'"

On [NBC Nightly News](#) (12/7, story 4, 2:30, Holt, 7.86M), Andrea Mitchell reported that on Sunday night, "President Obama appealed to Americans not to turn against one another and let the war against ISIL become a war against Islam." The President was shown saying, "It is our responsibility to reject religious tests on who we admit into this country. It is our responsibility to reject proposals that Muslim-Americans should somehow be treated differently." Mitchell added, "Less than 24 hours later," Trump "did exactly that," issuing "a statement calling for a total and complete shutdown of Muslims entering the United States."

In a follow-up segment for [NBC Nightly News](#) (12/7, story 5, 1:05, Holt, 7.86M), Katy Tur reported that Trump's proposal was "the latest in a long line of extreme comments coming from the candidate as he's become more hardline on the campaign trail. First, it was that he was open to a Muslim data base. Then surveillance of Muslims. And then closing all mosques. And now he said a ban on all Muslims coming into the country and even Muslim-Americans living abroad."

The [AP](#) (12/8, Colvin) reports that in a statement, the Trump campaign said "such a ban should stand 'until our country's representatives can figure out what is going on.'" The AP says that Trump's proposal was "swiftly condemned" by his GOP presidential rivals "and other Republicans." For example, Jeb Bush tweeted, "Donald Trump is unhinged. His 'policy' proposals are not serious," while Gov. John Kasich blasted the billionaire's "outrageous divisiveness." The AP adds that Trump's proposal was also criticized by "the heads of the Republican Party in Iowa, New Hampshire and South Carolina, the first three states to vote in next year's presidential primaries."

On its website, the [New York Times](#) (12/8, Rappeport, Subscription Publication, 11.64M) reported that Trump's proposal drew "swift condemnation from his" opponents in the GOP presidential race, "raising the question of whether the billionaire businessman has finally gone too far." For example, Gov. Chris Christie told radio host Michael Medved that "this is the kind of thing that people say when they have no experience and don't know what they're talking about." And Kasich said of Trump, "This is just more of the outrageous divisiveness that characterizes his every breath and another reason why he is entirely unsuited to lead the United States."

The [Los Angeles Times](#) (12/8, Barabak, Lee, 3.6M) reports, "The raw, exclusionary language, delivered unapologetically by a candidate of Trump's prominence, is without parallel in recent political history." [Politico](#) (12/7, Schreckinger, 1.19M) describes Trump's call as "one of his most provocative proposals to date," and added that while number of rival GOP candidates "were quick to dismiss his" plan, "to a certain type of Republican, looking to register a protest, Trump's very outrageousness is proof that he's not part of the system. And that's more important to many voters than conventional foreign-policy or military credentials."

The [Huffington Post](#) (12/7, Bobic, 251K) reports that Trump campaign manager Corey Lewandowski said "that the ban would apply to 'everybody,' including Muslims seeking tourist visas." The [Washington Post](#) (12/8, Johnson, 7.78M) reports that Trump on Monday was asked during an interview with Fox News if "his policy would apply to Muslim military personnel stationed overseas who want to come home." Trump replied, "They will come home. We have to be vigilant. We have to take care of the Muslims that are living here. But we have to be vigilant." Trump went on to say, "Anybody here stays, but we have to be very vigilant. ... This does not apply to people living in the country except that we have to be vigilant."

On its front page, the [Wall Street Journal](#) (12/8, A1, Epstein, Nicholas, Subscription Publication, 6.23M) reports that during a Monday evening campaign rally in South Carolina, Trump – despite being widely criticized for the proposed ban – stood behind his proposal, telling the crowd, “It’s going to get worse and worse, folks. ... You are going to have more World Trade Centers.” The Journal adds that legal experts say the type of ban proposed by Trump is forbidden by the US Constitution.

In an online report, the [New York Times](#) (12/8, Healy, Barbaro, Subscription Publication, 11.64M) said, “Experts on immigration law and policy expressed shock at the proposal Monday afternoon. ‘This is just so antithetical to the history of the United States,’ said Nancy Morawetz, a professor of clinical law at New York University School of Law, who specializes in immigration. ‘It’s unbelievable to have a religious test for admission into the country.’ She added: ‘I cannot recall any historical precedent for denying immigration based on religion.’”

The [Washington Times](#) (12/8, Miller, McLaughlin, 283K) reports that during Monday’s South Carolina rally, Trump “called his proposal ‘common sense,’” adding, “We have no choice. We have no choice.”

[USA Today](#) (12/8, Jackson, 5.56M) reports that at the rally, Trump “read the press release announcing the Muslim immigration proposal,” and many in “the crowd gave the policy a 24-second standing ovation.” USA Today adds that the Council on American-Islamic Relations blasted Trump’s proposal “as unconstitutional and un-American. ‘It seems that Donald Trump is now channeling the worst of the worst of the Islamophobia industry in the United States,’ said CAIR spokesman Ibrahim Hooper.”

On the [CBS Evening News](#) (12/7, story 2, 2:15, Pelley, 5.08M), Omar Villafranca reported, “In the wake of the attacks in Paris and San Bernardino, Muslims around the US say the rhetoric against them has become increasingly incendiary,” adding, “Last night in Philadelphia, a severed pig’s head was found outside a mosque.” Villafranca said that the Council of the American Islamic Relations “has received more reports about active Islamic intimidation, threats and violence targeting American Muslims in the past week-and-a-half [than] during any other limited period of time since the 9/11 terror attacks.”

WPost’s Bump: Poll Trump Cited In Justifying Proposal Has “Various Caveats.” In “The Fix” blog on the website of the [Washington Post](#) (12/8, Bump, 7.78M), Philip Bump said that in the statement announcing his plan, Trump cited polling from the Center for Security Policy to justify his proposal. The statement said, in part that “a poll from the Center for Security Policy released data showing ‘25% of those polled agreed that violence against Americans here in the United States is justified as a part of the global jihad.’” Bump added that the Center for Security Policy is operated “by Frank Gaffney, who is identified as an anti-Muslim extremist by the Southern Poverty Law Center.” Bump went on to point out “the various caveats” of the group’s poll, saying, for example, that it was “an opt-in Internet survey,” making “it less reliable as a national bellwether than more traditional polling methods where all members of a population have a chance of being selected.”

USA Today Accuses Trump Of “Fear-Mongering.” In an editorial, [USA Today](#) (12/8, 5.56M) blasts Trump over his proposal, saying that “he apparently doesn’t care about turning himself into a threat to national security or trashing the values of

Week Ending December 4, 2015

Note: This report covers activities since November 19.

NEW PUBLIC LAWS

November 25 – The President signed into law **S. 1356** (Johnson, R-WI), the National Defense Authorization Act for FY 2016. The law includes an extension of authority for the establishment of a commemorative work in honor of Brigadier General Francis Marion through May 8, 2018. It is Public Law 114-92.

LEGISLATIVE ACTIVITY

FLOOR ACTION

November 30 – The House passed the following bills of interest to the National Park Service:

- **H.R. 1541** (Grijalva, D-AZ-3), to amend title 54, United States Code, to make Hispanic-serving institutions eligible for technical and financial assistance for the establishment of preservation training and degree programs. The bill as passed also includes Asian American and Native American Pacific Islander-serving institutions. The bill passed by voice vote. The Department does not have a position on the bill.
- **H.R. 2288** (Goodlatte, R-VA-6), to remove the use restrictions on certain land transferred to Rockingham County, Virginia, and for other purposes. The bill as passed specified that only the 1-acre parcel of land with the child care center would be released from the use restriction. The bill passed by a vote of 407–0. The Department does not have a position on the bill.

December 3 – The House by a vote of 359-65, and the Senate by a vote of 83-13, approved the conference report on **H.R. 22** (Davis, R-IL-13), to authorize funds for Federal-aid highways, highway safety program, and transit programs. This bill, which provides funding for the Federal Lands Highway program, is a five-year authorization which gradually increases the annual allocation of funding for the National Park Service from \$240 million in FY 15 to \$300 million in FY 20.

December 3 – The House, by a vote of 249-174, passed **H.R. 8** (Upton, R-MI-6), the North American Energy Security and Infrastructure Act. Among other provisions, the bill authorizes the Secretary of the Interior to permit oil and gas pipeline rights of way through units of the National Park System.

COMMITTEE ACTIVITY

December 1 – The House Oversight and Government Reform Subcommittee on Interior (Lummis) held an oversight hearing on Examining Invasive Species Policy. The Department witness was Jamie Reaser, Executive Director, National Invasive Species Council.

December 2 – The House Natural Resources Subcommittee on Federal Lands (McClintock) held a hearing on a discussion draft bill, “The National Park Service Centennial Act.” The Department’s testimony addressed provisions in the Administration’s legislative proposal of the same title, which was introduced by Rep. Raul Grijalva (D-AZ-3) as H.R. 3556. The draft bill contains some of the provisions in H.R. 3556. The Department’s witness was National Park Service Director Jon Jarvis.

NEW BILLS INTRODUCED

Introduced on November 19:

H.R. 4119 (Palazzo, R-MS-4), to authorize the exchange of certain land located in Gulf Islands National Seashore, Jackson County, Mississippi, between the National Park Service and the Veterans of Foreign Wars, and for other purposes.

S. 2309 (Brown, D-OH), to amend title 54, United States Code, to establish within the National Park Service the U.S. Civil Rights Network, and for other purposes.

S. 2318 (Barrasso, R-WY), to reauthorize the Land and Water Conservation Fund for 10 years, and for other purposes.

Introduced on November 30:

H.R. 4131 (Heck, D-WA-10), to direct the Chief of Engineers to transfer an archaeological collection, commonly referred to as the Kennewick Man or the Ancient One, to the Washington State Department of Archeology and Historic Preservation.

H.R. 4132 (Poliquin, R-ME-2), to amend section 320301 of title 54, United States Code, to require approval of affected States before national monuments may be designated under that section, and for other purposes.

Introduced on December 1:

H.R. 4151 (Simpson, R-ID-2), to amend chapter 2003 of title 54, United States Code, to fund the Land and Water Conservation Fund and provide for the use of such funds, and for other purposes.

HILL VISITS & BRIEFINGS

November 23-24 – Don Hellmann, Assistant Director, Legislative and Congressional Affairs met with staff of Sen. Mazie Hirono (D-HI); Sen. John Hoeven (R-ND); Rep. Paul Cook (R-CA-8) and Rep. Jeff Denham (R-CA-10) regarding the NPS Centennial Act.

November 24 – Melissa Kuckro, Senior Legislative Affairs Specialist, and Brandon Bies, Legislative Liaison, National Capital Region, met with staff of Sen. Ben Cardin (D-MD) to discuss a range of NPS issues in Maryland.

December 2-4 – Denise Ryan, Deputy Director, made courtesy visits to staff of several members of the Senate Energy and Natural Resources Committee, including offices of Senators Mazie Hirono (D-HI), Al Franken (D-MN), Shelley Moore Capito (R-WV), Joe Manchin (D-WV), Lamar Alexander (R-TN), Cory Gardner (R-CO), Angus King (I-ME), and John Hoeven (R-ND).

December 2 - Chief Robert Maclean, Deputy Chief Jackie Burks, and Major Charles Guddemi, U.S. Park Police, briefed House Committee on Oversight and Government Reform Chairman Jason Chaffetz (R-UT-3) and Ranking Member Elijah Cummings (D-7-MD) on the government response to the non-traditional aviation threat. Jason Powell, Senior Counsel, DOI Congressional and Legislative Affairs, joined the briefing.

December 2 – Director Jon Jarvis, National Capital Regional Director Bob Vogel, and John Stanwich, NPS Liaison to the White House, joined U.S. Secret Service Director James Clancy at a briefing for Del. Eleanor Holmes Norton (D-DC-At Large) on the White House fence.

December 2 - Chris Powell, Midwest Region Associate Regional Director for Communications, Legislation, Planning, Compliance and Partnerships, and Tokey Boswell, Midwest Region Acting Chief of Planning, briefed Rep. Darin LaHood (R-18-IL) on the New Philadelphia, Illinois Special Resource Study.

December 3 – Susan Farinelli, Legislative Affairs Specialist, and Lee Dickinson, NPS Special Use Permit Manager, briefed staff of Sen. Ron Wyden (D-OR) on special use permits.

December 3 - Chris Powell, Midwest Region Associate Regional Director for Communications, Legislation, Planning, Compliance and Partnerships, and Buffalo National River Superintendent Kevin Cherie and Deputy Superintendent Laura Miller, briefed Sen. John Boozman (R-AR) on the encroachment at Shaddox Cemetery and past incidences of illegal roadwork.

December 3 - Special Assistant to the Director Bruce Sheaffer, Deputy Comptroller Jennifer Madello, and Legislative Affairs Specialist George Helfrich, met with staff of Rep. Robin Kelly regarding funding for Pullman National Monument.

PARK VISITS AND TOURS

November 23 – Staff from the offices of Sen. Richard Burr (R-NC) and Sen. Thom Tillis (R-NC) attended the ribbon cutting ceremony at Cape Hatteras NS for the opening of a newly constructed Off Road Vehicle ramp. The ramp is the third of several beach access projects planned for the Seashore’s future.

November 24 – Rep. Niki Tsongas (D-MA-3) visited Lowell NHP to meet with Superintendent Celeste Bernardo and Assistant Superintendent Peter Aucella to discuss park issues.

UPCOMING COMMITTEE ACTIVITY

December 8 – The Senate Committee on Energy and Natural Resources (Murkowski) will hold a hearing on **S. 2257** (Cantwell, D-WA), to prepare the National Park Service for its Centennial in 2016 and for a second century of protecting our national parks' natural, historic, and cultural resources for present and future generations, and for other purposes. The hearing will take place at 10:00 a.m. in Room 366 Dirksen Senate Office Building. The Department's witness will be National Park Service Director Jon Jarvis.

December 9 – The House Natural Resources Subcommittee on Federal Lands (McClintock) will hold a hearing on two bills, including **H.R. 3668** (Cook, R-CA-8), to codify in law and expand certain off-highway vehicle recreation areas in the State of California, to designate as wilderness certain public lands in the State of California administered by the Bureau of Land Management, to expand the Death Valley National Park Wilderness and the San Geronio Wilderness in San Bernardino National Forest, to ensure the conservation and necessary management of wildlife in these wilderness areas, to establish the Mojave Trails Special Management Area in the State, and for other purposes. The hearing will take place at 2:00 p.m. in 1334 Longworth House Office Building. The Department's witness will be Kristen Bail, Assistant Director, National Landscape Conservation System and Community Partnerships, BLM.

December 9 – The House Natural Resources Committee (Bishop) will hold an oversight hearing on the Department of the Interior's Role in the EPA's Animas Spill. The hearing will be held at 10:00 a.m. in 1324 Longworth House Office Building. The Department's witness will be Secretary Sally Jewell.

UPCOMING HILL VISITS AND BRIEFINGS

December 8 - Cape Hatteras National Seashore Superintendent Dave Hallac, Deputy Superintendent Mark Dowdle, and Chief of Resource Management Michelle Havens, and Kyle Earnest, Legislative Affairs Specialist, will meet with Sen. Richard Burr (R-NC), Rep. Walter Jones (R-NC-3), and staff of Sen. Thom Tillis (R-NC), as well as staff from the House Natural Resources Committee and the Senate Energy and Natural Resources Committee, regarding the status of the legislatively mandated review of potential changes to the park's ORV rule.

December 8 – Mike Caldwell, Regional Director, Northeast Region, and Melissa Kuckro, Senior Legislative Affairs Specialist, will make courtesy visits to the offices of Senators Tim Kaine (D-VA), Ben Cardin (D-MD), and Mark Warner (D-VA) and Representatives William Keating (D-MA-9), John Larson (D-CT-1), and Jerrold Nadler (D-NY-10).

UPCOMING PARK VISITS AND TOURS

Nothing to report.

Thank you! Sorry to be picky but would you mind putting specific names/titles/phone numbers in the FROM: section, as well as put a list of these attachments at the bottom, since I'm not sure how you'd prefer them to be named?

Done!

Please note that on the attachments, the letter Grijalva sent to us as the tracking cover sheet on it, which is unnecessary for the memo; it's just how we had the electronic copy. And ditto on Neil's response; it includes a response to Reps. Gallego and Kirkpatrick that do not need to be included.

NATIONAL MONUMENTS:

Grijalva bill would protect 1.7M acres around Grand Canyon

Phil Taylor, E&E reporter

Published: Tuesday, October 13, 2015

House Natural Resources ranking member Raúl Grijalva (D-Ariz.) yesterday said he will introduce a bill to protect 1.7 million acres of federal lands surrounding Grand Canyon National Park from future mining and other threats, a measure that is unlikely to pass Congress but aims to provide President Obama a blueprint for protecting the lands under the Antiquities Act.

Grijalva unveiled the bill yesterday at a news conference in Flagstaff, Ariz., where he was joined by tribal leaders. The Havasupai, Hualapai, Navajo and Hopi tribes support the legislation, a Grijalva spokesman said.

The Greater Grand Canyon Heritage National Monument would consist of lands north and south of the national park, including much of the Kaibab National Forest and Kaibab plateau, a key watershed feeding the canyon that is home to mule deer, mountain lions and the endangered California condor.

Grijalva's bill also would establish an advisory council to help manage tribal sacred and cultural sites, forest restoration and wildlife consisting of officials from tribes, Arizona's Game and Fish Department, the scientific community, and conservation and sportsmen's groups. It would protect commercial and recreational hunting and preserve grazing and water rights, he said.

It also would make permanent the Obama administration's decision in 2012 to impose a 20-year ban on new mining claims across 1 million acres surrounding the canyon, though it would not close existing mines or impede valid existing claims, Grijalva said.

The "Greater Grand Canyon Heritage National Monument Act" comes several months after Grijalva and Arizona Democratic Reps. Ann Kirkpatrick and Ruben Gallego sent a letter to Obama asking that he designate a Grand Canyon national monument using his executive powers ([E&ENews PM](#), Jan. 29).

The effort is backed by conservation groups including the Grand Canyon Trust, Sierra Club and Center for Biological Diversity.

Grijalva's bill faces tough odds in Congress in the run-up to a presidential election year. The congressman said yesterday he does not expect it will receive a hearing, according to the Associated Press.

Yet a presidential designation has been strongly opposed by Arizona's Republican lawmakers. In July, the House voted 222-206 for an amendment co-sponsored by Rep. Paul Gosar (R-Ariz.) to the fiscal 2016 Interior Department and Forest Service spending bill to restrict agencies from implementing a presidential monument designation in Arizona and other Western states.

In March, Arizona's two Republican senators said a monument designation surrounding the Grand Canyon would block access for hunting, livestock grazing, wildfire prevention and mining.

Arizona's Game and Fish Commission has voted to oppose the monument, while five former commissioners have lent support to the monument.

"Certain special interest groups and a few misguided members of Arizona's delegation have been pushing for the president to circumvent Congress and make a massive 1.7-million-acre designation using the Antiquities Act for the Grand Canyon Watershed," Gosar said this summer. "Their intentions are clear: They want this designation in order to prevent hunting, mining, timber harvesting and grazing on this massive swath of land."

A Grijalva aide said lands in the bill all fall within Kirkpatrick's 1st District.

Grijalva is the latest Democratic lawmaker to try to push Obama's hand in designating national monuments before he leaves office. The Grand Canyon proposal would be more than twice the size of Obama's largest monument proclamation to date, the 700,000-acres Basin and Range National Monument that he designated this summer in Nevada.

Sen. Dianne Feinstein (D-Calif.) in August also prodded Obama to prepare a monument designation in excess of 1 million

Sen. Dianne Feinstein (D Calif.) in August also prodded Obama to prepare a monument designation in excess of 1 million acres in Southern California if her legislation to protect the lands continues to stall in Congress ([Greenwire](#), Aug. 24). Feinstein's bill got a hearing last week before the Senate Energy and Natural Resources Committee ([E&E Daily](#), Oct. 9).

Two top Obama administration officials are scheduled to meet with stakeholders in Palm Springs, Calif., today to discuss the merits of protecting the lands.

Congress of the United States
Washington, DC 20515

January 28, 2015

President Barack Obama
The White House
1600 Pennsylvania Avenue
Washington, DC 20500

Dear President Obama:

Upon visiting the Grand Canyon, President Theodore Roosevelt famously stated: *"Leave it as it is. You can not improve on it. The ages have been at work on it, and man can only mar it."*

Roosevelt meant what he said – he took action to protect this natural wonder. In 1906, he established the Grand Canyon Game Preserve, Two years later, he proclaimed the 800,000-acre Grand Canyon National Monument.

Today, it is time for a new monument to protect the greater Grand Canyon region. North and south of Grand Canyon National Park is the Grand Canyon watershed region. The heart of this proposed national monument is the Kaibab Plateau, where the Colorado River carves its way through the Grand Canyon and provides water for millions of people in Arizona, Nevada, and California, as well as further downstream in Mexico.

The Kaibab Plateau is home to sensitive plants and animals found nowhere else in the world. The area is a corridor for iconic wildlife such as mountain lions and mule deer, and it is a habitat for imperiled species such as the California condor and desert tortoise. South of the Grand Canyon, the Coconino Plateau contains deep groundwater that supplies life-giving seeps and springs. This area is also culturally rich and contains sites, including Red Butte, that are special and sacred to Native American tribes.

Not only is the Grand Canyon region an environmental treasure, it is also an economic driver for northern Arizona and our entire state. In 2013, 4.5 million visitors spent nearly a half a billion dollars in the region, supporting more than 6,000 local jobs.

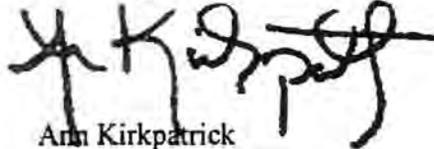

The Grand Canyon and its watershed deserve permanent protection from several existing and future threats. Uranium mining, for example, continues to threaten the water quality, wildlife, and intact habitat of the watershed. The region also lacks safe habitat connections between Grand Canyon National Park and Grand Staircase-Escalante National Monument in Utah. And the old-growth ponderosa pine forests of the North Kaibab Plateau lack permanent protections from logging, which threatens native wildlife diversity and climate resiliency.

Protecting this region as a national monument will not only protect ancient forests, corridors for migratory wildlife and thousands of archeological sites, it will also support clean drinking water,

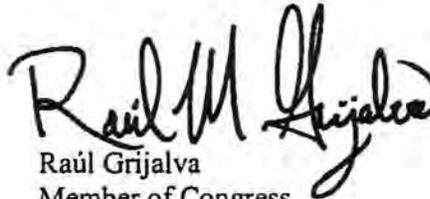

cultural heritage, and recreation. Native American tribes in the region have a deep connection to these lands and waters, so tribal consultations should be an important part of any efforts to establish a national monument.

We respectfully ask that you use your authority under the Antiquities Act to protect the Grand Canyon's watershed as a national monument. Thank you for your consideration.

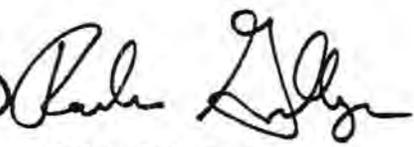

Sincerely,

Ann Kirkpatrick
Member of Congress

Raúl Grijalva
Member of Congress

Ruben Gallego
Member of Congress

United States Department of the Interior
BUREAU OF LAND MANAGEMENT
Washington, D.C. 20240

AUG 13 2015

The Honorable Ruben Gallego
House of Representatives
Washington, DC 20515

Dear Representative Gallego:

Thank you for your letter to President Barack Obama regarding potential future national monument designations for the Grand Canyon watershed region. The Bureau of Land Management was asked to respond to your letter.

This Administration has demonstrated a commitment to working with the public and members of Congress in making Federal land management decisions. We respect and value the importance of public and Congressional input in considering protections for our natural, cultural, and historic treasures. We constantly strive to take into account the interests of a wide range of stakeholders to both protect America's public lands and provide for economic development in a manner that is consistent with law and sound public policy.

We look forward to continuing to work with all stakeholders to ensure that public lands in Arizona are managed appropriately for the use and enjoyment of this and future generations. A similar reply is being sent to the co-signers of your letter.

Sincerely,

Neil Kornze
Director

United States Department of the Interior

Just found out that they might want to discuss the California water bill as well. Anything you can add on that?

WASHINGTON SCHEDULE:

- + Today’s Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:**INTERIOR SECRETARY SALLY JEWELL MODERATES STATE DEPARTMENT PANEL ON CLIMATE CHANGE.**

The [Alaska Public Radio Network](#) (12/1, Gokey, 2K) reports on its website on Kotzebue city council member Maija

Natasha Luken's participation in a State Department panel Tuesday morning at the climate talks in Paris, which was moderated by Interior Secretary Sally Jewell. The article called the Marshall Islands "the front lines of climate change," due to the threat of the sea level rising. Luken likened the threat to Alaska to that of the Marshall Islands, given their geographic proximity. [KTUU-TV Anchorage, AK](#) (12/2, 62K) reports similarly on its website. [Politico Pro](#) (12/1) also noted Jewell's Tuesday participation in "a session on resilience with an emphasis on island nations," providing information on how to access the session's live stream.

Climate Talks Attendance Costs Listed. The [Washington Free Beacon](#) (12/2, Harrington, 70K) lists costs to taxpayers from Administration officials' attendance at the climate change talks in Paris, which total nearly \$2 million. Interior Secretary Sally Jewell's hotel accommodations at the Tuileries Finances reportedly cost \$36,091, and her car service costs \$13,903. The article points out that "Obama's motorcade alone totals \$784,825."

JEWELL DISCUSSES NPS REPORT ON CLIMATE CHANGE. The [National Parks Traveler](#) (12/2, 989) continues coverage of the NPS report on how climate change is impacting America's national parks. The article says Interior Secretary Sally Jewell noted this report in her appearance at the climate talks in Paris, stating, "What's happening in our national parks is a small window into the impacts of climate change on natural and cultural resources around the world. As negotiations kick off in Paris today, this report offers positive examples of what we can do, at a local level, to adapt and build resilience in the face of a changing climate – even as we work to curb carbon pollution around the world." That article lists actions being taken by the NPS to combat climate change, including elevated designed and the addition of sediment and vegetation. "Sea level changes are subtle at some parks but already destructive at others where we are losing shoreline and infrastructure and where historical and cultural resources are also at risk," NPS Director Jonathan B. Jarvis said, adding, "The upside is that we're taking positive action as the result of adaptation planning we began in the National Park Service several years ago. This report illustrates actions we have underway to adapt to our changing climate, and as best we can, to preserve and protect the resources of our coastal parks."

The [Island Free Press \(NC\)](#) (12/2, Barnett) reports similarly. [KTOO-FM](#) Juneau, AK (12/1, Joling) also provides continuing coverage of the Associated Press report on its website.

INTERIOR SUPPORTS CORPORATE PARTNERSHIP TO COMBAT DEFORESTATION. [Business Green \(UK\)](#) (12/2, Shankleman) reports that Marks & Spencer and Unilever "signed a new pledge committing to prioritise the development of sustainable palm oil, beef, paper and other commodities, as part of a major public-private partnership aimed at tackling deforestation." The article says this initiative is supported by the Interior Department, quoting Interior Secretary Sally Jewell as saying on Tuesday morning in Paris, "This public-private partnership is a true model for how we can proactively work together to address climate change. ... The partnership tackles major and complex issues. We lose an average of 3.3 million hectares of forest each year even after restoration, and that's an area about the size of South Africa. Our challenge is to come together here in Paris and in the years to come to secure forests' role in addressing climate change because we all need to take action."

In its coverage of the conversation on combating deforestation at the Paris climate change talks, [Yale University \(CT\) Environment 360](#) (12/2, Pearce, 3K) says Interior Secretary Sally Jewell pointed out that, "Even allowing for reforestation, the world still loses 3.3 million hectares of forests each year."

GREEN GROUPS URGE OBAMA TO ATTACK CLIMATE CHANGE MORE AGGRESSIVELY. [The Hill](#) (12/2, Henry, 654K) reports over "150 environmental groups" are asking Obama to press "even further on global warming than what he has proposed as part of an international climate change pact." In a letter sent yesterday, "the groups pushed Obama to increase the amount of carbon pollution the U.S. will cut as part of a climate agreement" and "said he should commit to stopping development of untapped fossil fuels on federal land while working toward a transition to 100 clean energy around the globe by 2050." The article cites Interior Secretary Sally Jewell's September statement that America is "a nation that continues to be dependent on fossil fuels," in which she explained, "There are millions of jobs in this country that are dependent on these industries, and you can't just cut it off overnight and expect to have an economy that is, in fact, the leader in the world."

INTERIOR ANNOUNCES SPECIALIZED INVESTIGATIVE UNIT TO FIND STUDENTS TAKEN IN MEXICO. The [AP](#) (12/2) reports the "parents of 43 students who disappeared in southern Mexico at the hands of police and a drug gang have lifted a protest camp" in Mexico City. The decision, they say, is a "show of faith in a new investigation." The AP adds that on Monday, Interior Department deputy secretary for human rights Roberto Campa announced the "creation of a specialized investigative unit" at the parents' request, which he called the "fresh group" of investigators. This story is also carried by [Fox News](#) (12/1, 9.42M), the [Washington \(DC\) Post](#) (12/2, 7.78M), the [Daily Mail](#) (12/2, 5.31M), the [New York \(NY\) Times](#) (12/2, Subscription Publication, 11.64M), [Philly \(PA\)](#) (12/2, 1.18M), the [Toronto \(CAN\) Sun](#) (12/1, 74K), the [Houston \(TX\) Chronicle](#) (12/2), and on the website of [WRAL-TV](#) Raleigh, NC (12/2, 243K).

GLOBAL LEADERS LAUNCH SOLAR PUSH IN THIRD WORLD. In an article carried by the [Economic Times \(IND\)](#) (12/2, 1.92M), the Press Trust of India reports that solar industry experts on Tuesday "hailed" the launch of the International Solar Alliance (ISA), "saying the initiative will give [a] much-needed boost to a low-carbon future." A 120-

country program to implement solar power and infrastructure in developing nations, the ISA was unveiled Tuesday at the Paris climate summit by Indian Prime Minister Narendra Modi and French President Francois Hollande. Among those weighing in on the alliance was Natural Resources Defense Council President Rhea Suh, who said, "It has the potential to propel international solar markets forward, all while fighting climate change, improving global health and boosting economies." A version of this PTI story is also carried on the [NDTV \(IND\)](#) (12/2, 342K) website.

[Money Control](#) (12/2, 85K) reports that ISA's launch at the Paris climate talks "shows India's leadership in clean energy, environmental experts here have said." Said the NRDC's Suh, "This unprecedented international solar collaboration sets an encouraging tone as country representatives gather today to reach a new global climate agreement. India's leading role in forming an International Solar Alliance anchors its own climate commitment to ramp up renewable energy."

JARVIS: CONGRESS SHOULD FULLY FUND CONSERVATION FUND. Jonathan B. Jarvis, director of the National Park Service, writes at the [Louisville \(KY\) Courier-Journal](#) (12/1, Jarvis, 433K) that "the National Park Service is well known for iconic parks out West, but you may want to look in your backyard to find a much closer park experience, thanks to the National Park Service's Land and Water Conservation Fund programs." He says that "it is hard to argue with a program that has helped so many communities improve public outdoor recreation, but unfortunately, Congress has allowed the authority for this program to expire, and only once in the history of the fund has Congress provided the full \$900 million the program is authorized to spend each year." Jarvis concludes that "Congress has an opportunity to affirm the importance of parks and public lands by permanently reauthorizing the LWCF and providing dedicated, full funding for the programs it supports."

NPS BOTTLED WATER SALES BAN LAMBASTED. In the "Contributors" blog of [The Hill](#) (12/2, Schatz, Contributor, 654K), Citizens Against Government Waste president Tom Schatz derides the NPS' "baffling" ban on bottled water sales, calling it "potentially perilous" to visitors who should be well hydrated while hiking challenging terrain. In addition, Schatz denounces the sales ban's expense to taxpayers and visitors, citing costs of construction of water filling stations and charges for refilling water bottles. Schatz says NPS Director Jonathan Jarvis "admitted" in Policy Memorandum 11-03 that the sales ban "contradicts the agency's healthy foods initiative, which is intended to provide multiple food options at park concessions, such as sustainably produced food from local sources," and said the policy raises health concerns. US House Rep. Keith Rothfus (R-PA) said NPS "confirmed that participating parks haven't been able to determine if the policy" has had the intended result of reducing trash.

INTERIOR AMONG AGENCIES CALLED OUT BY SEN. GRASSLEY FOR MISUSE OF ADMINISTRATIVE LEAVE. [E&E Publishing](#) (12/1, Bogardus, 705) reports that on Tuesday Sen. Charles Grassley (R-IA) released a "stinging" report accusing federal agencies of abusing administrative leave. The study "found that 17 agencies spent nearly \$80.6 million on administrative or paid leave for employees who were out of work for a month or more in fiscal 2014," for "inconsistent and vague" reasons. Grassley said of the administrative leave practice, "Some agencies use it too extensively, and the taxpayers get short-changed. The statutory and regulatory vacuum on the use of paid leave has contributed to this problem." The Interior Department was listed as one of several agencies that "did not explain why it took many thousands of hours to resolve issues with security investigations or complete employees' investigations for misconduct before those employees retired, resigned, or were finally suspended, removed, or returned to duty."

DOI DISTRIBUTED \$47M TO NORTH DAKOTA IN 2015. In an article carried by the [Bismarck \(ND\) Tribune](#) (12/2, Dalrymple, 54K), Forum News Service reports that The Department of Interior's Office of Natural Resources Revenue has said that it disbursed \$47,164,777 to North Dakota in fiscal 2015. The payout is approximately \$20 million less than the state received last year and just over half its 2013 amount; explained North Dakota Budget Director Pam Sharp, "Its just part of the whole impact of the lower price of oil." The Office of Natural Resources Revenue, continues Forum News Service, said about \$853 million was paid out to American Indian tribes and individual Indian mineral owners. Spokesman Patrick Etchart said that distributions to Native American tribes has risen considerably in recent years, with much of the increase connected to oil production in the state.

This story is also carried on the website of the [Grand Forks \(ND\) Herald](#) (12/2, 102K).

TED WILLIAMS PRAISES INTERIOR'S SAGE GROUSE INITIATIVE. [Forbes](#) (12/1, Burke, 7.28M) features an interview with environmental writer Ted Williams, who "calls out the miscreants and criminals who trash our environment, and praises the heroes who fight for it." Williams graded President Obama's environmental policy a "B," saying he has "appointed decent, competent people" and "restored science to federal resource agencies." Williams said Obama's "Interior Department has done some good stuff, like the Sage Grouse Initiative" and "been a leader on climate change" in his opposition of the Keystone Pipeline as well as Don Young's "Empty Oceans Bill," which is "an assault on the Magnuson-Stevens Fishery Conservation and Management Act."

Empowering Native American Communities:

BIA OFFICERS TAKE CHILDREN FROM RESERVATION AMID CUSTODY FIGHT. The [AP](#) (12/2, Hanson) reports that two BIA officers “escorted two children off an American Indian reservation in Montana” in accordance with a state order, causing a “clash between state and tribal courts.” The attorney of the grandmother who had taken the children onto the reservation opined, “It disturbs me that it was so coordinated,” saying the BIA “didn’t consult with the tribe, but they did coordinate with a non-Indian guy to a great extent.” University of Montana’s Indian Law Clinic co-director explained the BIA “acts independently,” and is not under the jurisdiction of the tribe, which she called “a perpetual problem with BIA involvement in tribal affairs.” A federal court may end up with jurisdiction of the custody matter. This article is also carried in the [Flathead \(MT\) Beacon](#) (12/1, 15K), the [Minneapolis \(MN\) Star Tribune](#) (12/2, 1.15M), the [Daily Mail](#) (12/2, 5.31M), the [Washington \(DC\) Post](#) (12/2, Hanson, 7.78M), [Yahoo! News](#) (12/2, Hanson, 6.43M), the [Houston \(TX\) Chronicle](#) (12/2, 2.15M), [Philly \(PA\)](#) (12/2, Hanson, 1.18M), [US News & World Report](#) (12/1, 996K), the [Denver \(CO\) Post](#) (12/2, Press, 825K), the website of [ABC News](#) (12/2, 3.35M), the [New York \(NY\) Times](#) (12/2, Press, Subscription Publication, 11.64M), and on the website of [CBS News](#) (12/2, 4.1M).

BIA CONSIDERS OSAGE COUNTY DRILLING REGULATIONS OVER ENVIRONMENTAL STUDY. Relying on information in [Tulsa \(OK\) World](#) (12/2, Krehbiel-Burton, 365K), the [AP](#) (12/2) reports the Bureau of Indian Affairs may enact new regulations on oil drilling in Osage County, Oklahoma following the publication of a new environmental impact study. According to the article, the BIA could “three potential actions” on issuing drilling permits: “maintaining the status quo; adding some formalized county-wide measures regarding resource conservation; or implementing more up front, proactive measures, such as mandatory vehicle buffer zones around the breeding grounds of the lesser prairie chicken.” This story is carried in the [Houston \(TX\) Chronicle](#) (12/2), the [Washington \(DC\) Times](#) (12/2), and on the websites of [KRMG-AM Tulsa \(OK\)](#) Tulsa, OK (12/2, 20K) and [WRAL-TV Raleigh \(NC\)](#) Raleigh, NC (12/2, 243K).

CALIFORNIA COUNTIES BACK INTERIOR IN DISMISSAL OF TRIBAL LAND HOLDINGS SUIT. [Law360](#) (12/2, Sheehan, 30K) reports that on Monday the California State Association of Counties filed an amicus brief on behalf of the Department of the Interior in advocating for the Ninth Circuit to uphold a dismissal of the Mishewal Wappo Tribe of Alexander Valley’s lawsuit against the agency. The tribe claimed the DOI violated the California Rancheria Act in its termination of land holdings.

Office of Insular Affairs:

OBAMA PLEDGES SUPPORT TO ISLAND NATIONS AT RISK FROM RISING SEAS. The [Wall Street Journal](#) (12/2, Taylor, Subscription Publication, 6.23M) reports Obama pledged support for the small island countries that are most at risk from the rising sea levels associated with climate change. Obama said, “Some of their nations could disappear entirely and as weather patterns change, we might deal with tens of millions of climate refugees in the Asia Pacific region.” The [Washington Times](#) (12/1, Boyer, 283K) also offers coverage of this story.

The [New York Times](#) (12/2, Davenport, Subscription Publication, 11.64M) reports in a front-page story entitled “The Marshall Islands Are Disappearing” on the threat of the rising seas to the Marshall Islands. The Times says the situation regarding the Marshall Islands presents a different scenario for the US than that of the other island countries, because a 1986 agreement allows the country’s residents to emigrate to the US, which is “a pass that will become more enticing as the water rises on the islands’ shores.” The article highlights the efforts of Tony A. deBrum, the foreign minister of the Marshall Islands, to convey the severity of the threat, and notes that deBrum hosted Assistant Secretary of the Interior for Insular Areas Esther Kia’aina in March, “showing her the impact of sea-level rise on his home country.”

Tackling America’s Water Challenges:

WESTERN VALUES PROJECT LOBBIES TO REVIVE LWCF. [E&E Publishing](#) (12/1, Yachnin, 705) reports that on Tuesday the Western Values Project unveiled TV ads urging action to review the Land and Water Conservation Fund (LWCF), and plans to spend “six figures” targeting legislators who supported the fund in the past. House Natural Resources Chairman Rob Bishop (R-UT) is also targeted for “his efforts to move a measure that would reform the LWCF by restricting federal land purchases and focusing on the portion of funding that goes to states,” according to Greenwire. [Politico Pro](#) (12/1) specifies that the group warns that without change “Pennsylvania and Florida could lose support for projects at the Gettysburg National Military Park and the headwaters of the Everglades.”

CALIFORNIA PROJECTS 10 PERCENT DELIVERIES FROM STATE WATER PROJECT. The [Sacramento \(CA\) Bee](#) (12/2, Kasler, Reese, 515K) reports that California officials expect to deliver just 10% “of normal supplies from the State Water Project next year, or half as much as this year.” The Bee says that “the State Water Project is one of two major manmade systems that deliver Northern California water through the Sacramento-San Joaquin Delta to millions of Californians in the southern half of the state,” the other being the Federal Central Valley Project. The Bee explains that “this year the state project is shipping just 20 percent of historic supplies, while the federal project has left most customers with zero allocations.”

REPORT FINDS ARIZONA NOT PREPARED FOR CLIMATE RISKS. [Government Technology](#) (12/2, 71K) reports that a new report by Climate Central gave Arizona a C- grade for its efforts to prepare for future climate risks. Arizona officials disagreed with the assessment. Tom Buschatzke, the state water agency's director, said that "Arizona's requirement for all public water systems with at least 500 customers to have a drought-management plan is just as valuable for dealing with climate impacts as an adaptation plan." He also said that the "the U.S. Bureau of Reclamation's 2012 Colorado River Basin study and a separate study that the water department and Arizona State University did for Phoenix's Salt River Project both looked at potential climate change impacts on water supplies." State forester Jeff Whitney also said that the state is making strides in address wildfire risk but that "national forests within Arizona's borders have suffered decades of mismanagement by the federal government." Whitney did point to steps taken by the Federal government to cut wildfire risk.

CALIFORNIA INITIATIVE WOULD REQUIRE VOTER APPROVAL FOR REVENUE BONDS. [Bloomberg News](#) (12/1, Varghese, 3.4M) reports that Dino Cortopassi, the 78-year-old farmer turned businessmen turned businessman, is spending \$4 million in support of an initiative placed on the November ballot that would require voter approval for revenue bonds exceeding \$2 billion. One project that would be impacted would be Governor Jerry Brown's "effort to improve the state's water supply includes building two \$15 billion tunnels under the Sacramento-San Joaquin delta." Bloomberg explains that "Cortopassi said he opposes the project because of its environmental impact and has raised funds for a group that's against it."

Securing America's Energy Future:

Renewable Energy:

GATES JOINS MONIZ TO PROMOTE CLEAN ENERGY FUND. [E&E Publishing](#) (12/2, Koss, 705) reported Bill Gates joined Energy Secretary Ernest Moniz in lobbying Congress "to sell the plan" to establish a clean energy fund "announced in Paris yesterday by President Obama and spearheaded by Gates, includes a pledge by 19 nations to double clean energy research and development funding to \$20 billion, with 28 major companies putting up billions of their own in aid." According to the article, "Moniz emphasized that Mission Innovation and Breakthrough Energy Coalition are unprecedented efforts in terms of size and approach," saying, "This is not just more venture capital."

CLEAN-ENERGY PATENTS SET FOR NEW RECORD THIS YEAR. [Bloomberg News](#) (12/2, Randall, 3.4M) reports that US patents granted for clean energy have increased annually since 2002 and is this year "on track to break another record after eight consecutive increases." Most of the patents 586 patents in the first half of 2015 have been for solar technologies, followed by fuel cells, electric vehicles, and wind power.

WIND DEVELOPER SAYS IT WILL HONOR VERMONT VOTE ON PROPOSED PROJECT. The [AP](#) (12/2, 2.15M) reports Iberdrola Renewables' which has proposed 96-megawatt wind turbine project in Vermont "says it will honor a public vote on the project" expected to be held during the November election.

LONG ISLAND FIRM LAUNCHES ROOFTOP SOLAR ARRAY. [Newsday \(NY\)](#) (12/2, Harrington, 1.42M) reports that a 1.5-megawatt rooftop solar project for beer distributor Clare Rose by developer EnterSolar "will be formally recognized at a launch event in Yaphank on Wednesday."

Onshore Energy Development:

ECONOMIST ADVOCATES FOR "SOCIAL COST OF CARBON" MEASURE FOR FOSSIL FUEL EXTRACTION. In a piece for the "Upshot Blog" of the [New York Times](#) (12/1, Greenstone, Subscription Publication, 11.64M) Michael Greenstone, chief economist of President Obama's Council of Economic Advisers from 2009 to 2010, says there is a "middle ground" in supplying energy without causing significant climate damage. Greenstone suggests that "leasing the rights to access fossil fuels on federal land but requiring the leases and royalty payments to reflect the full climate damages from these fuels...would put the market to work by unlocking fossil fuels that have the highest value in relation to their impact on the climate." As a "bonus," this "provides money to pay for some of the damage of climate change." Greenstone discusses how to measure the monetary value of climate damages through the Social Cost of Carbon and advocated for applying an SCC-related fee. In asserting there is "opportunity for policy overhaul," Greenstone cites how the Interior Department "is considering how to restructure lease terms for fossil fuels on federal lands."

INTERIOR INVESTIGATION LEADS TO FELONY CHARGES AGAINST OIL COMPANY. The [New Orleans Times-Picayune](#) (12/2, Schleifstein, 661K) reports the US Attorney's Office in New Orleans charged Talos Energy LLC's subsidiary Energy Resource Technology GOM, LLC. on Monday "with four federal felony counts involving safety and environmental regulations involving its operations in the Gulf of Mexico between 2012 and 2014." The article notes this case "was investigated by the Department of Interior's Office of Inspector General, with assistance from the BSEE," whose records from 2010 to 2014 indicate "the company was issued 215 warning 'incident of noncompliance' notices,

131 component shut-in incident or non-compliance warnings, and was ordered to shut in some operations 14 times. Also in 2014, the BSEE “fined the company \$80,000 in 2014 for improper actions that led to the death of a worker during the August 2011 collapse of a crane boom.” The article lists other rule violations by Energy Resource Technology GOM.

LAWMAKER: EPA REGULATIONS ON COAL WILL KILL JOBS, HURT AMERICANS. The [Williamson \(WV\) Daily News](#) (12/2, 1K) reports that West Virginia Rep. Evan Jenkins (R) urged his fellow lawmakers on Monday “to vote yes this week on two resolutions disapproving of the EPA’s new regulations on new and existing coal-fired power plants.” In an address on the House floor, Jenkins warned that the regulations would kill jobs and raise energy costs for all Americans – specifically hurting seniors, the middle-class, and those on fixed incomes. The News goes on to carry a transcript of Jenkins’ address; midway through it, he notes, “On the House Appropriations Committee, I helped to secure a provision in the Interior/EPA funding bill that would prohibit funding for the rulemaking on power plants to proceed.”

STUDY: COAL LEADING SOURCE OF POLLUTION CAUSING HEART DISEASE. The [Washington Post](#) (12/2, Fears, 7.78M) reports a new study by George D. Thurston, a professor of population health and environmental medicine at New York University, found long-term exposure to coal-fired power plant emissions “is significantly more harmful to the heart than other forms of carbon pollution.” According to Thurston, “Our results indicate that, pound for pound, coal-burning particles contribute roughly five times as much to heart disease mortality risk as the average air pollution particle in the United States.” Thurston and the study’s other 10 authors also “said the findings show the Environmental Protection Agency’s effort to strengthen regulation of power plant emissions standards – as part of the White House’s Clean Power Plan – does not go far enough.”

NATURAL GAS SURPASSES COAL AS TOP US POWER SOURCE FOR FOURTH TIME ON RECORD. [Reuters](#) (12/1) reported that US Energy Information Administration data shows that in September, natural gas overtook coal as a power source for the fourth time on record. Gas previously surpassed coal in April, July and August of this year. The EIA reported that 123,248 thousand megawatt hours of electricity were produced with gas in September versus 118,489 thousand MWh produced with coal.

REPORT: 150 OIL PROJECTS CANCELED OR DELAYED AMID DOWNTURN. [Fuel Fix \(TX\)](#) (12/1, Eaton, 28K) reported that new research from energy investment bank Tudor, Pickering, Holt & Co. shows that the oil industry downturn has meant the cancellation of projects that could cut 19 million barrels a day over the new few years. Oil companies “have canceled or delayed final investment decisions on about 150 projects that are tied to 125 billion barrels of oil equivalent, which could stay underground for several years longer than expected amid a steep drop in crude prices...Tudor, Pickering, Holt & Co. said Tuesday.” BP and Chevron “have deferred the largest number of projects while Exxon Mobil Corp. could delay the most oil barrels, about 2.5 million barrels a day of production capacity from 25 projects.” Royal Dutch Shell “is next, deferring 1.7 million barrels of oil a day, but its deal to buy BG Group this year has alleviated many of the growth issues it might face in coming years.”

IHS REPORT: OIL COMPANIES CONTINUE INVESTING IN GREATER EFFICIENCY DESPITE DOWNTURN. A new IHS analysis has found energy companies “continue to invest in initiatives that promise to help them save money and become more efficient, a necessary step if they want to remain competitive and meet the world’s appetite for oil in the coming decades” as well as “ride out the worst downturn in years,” the [San Antonio Express-News](#) (12/2, Meyers, 1.46M) reports. According to IHS, over “the past decade, the application of digital technologies has helped boost output by up to 8 percent and lower operating costs by up to 25 percent.”

Offshore Energy Development:

BSEE DIRECTOR: PROPOSED WELL CONTROL RULE SEEKS TO ENSURE SAFETY, PROTECT ENVIRONMENT. [Maritime Executive](#) (12/2, 21) carries Monday’s op-ed by Brian Salerno, director of the Bureau of Safety and Environmental Enforcement, who discussed proposed new rules designed to improve offshore safety. Industry standards “put in place after the Deepwater Horizon tragedy are a step in the right direction, but do not solve the problem,” as the standards “do not have the force of law, as regulations do.” The BSEE “understands that operators may need time to comply” with some of the proposed requirements, and has “built in additional time to meet those requirements” and “solicited comments about the proposed compliance dates to ensure they are appropriate.” Salerno wrote, “While we can never reduce 100 percent of the risk offshore, this proposed rule does reduce the likelihood of another catastrophic event. ... The proposed well control rule addresses and seeks to reduce many such risks, with the goal of ensuring the safety of offshore personnel and protection of the environment.”

America’s Great Outdoors:

Bureau of Land Management:

GEORGE P. BUSH JOINING SUIT AGAINST BLM OVER RED RIVER LAND SEIZURE. The [AL](#) (12/2, Weissert) reports Texas' General Land Office's (GLO) Land Commissioner George P. Bush joined a lawsuit against the BLM that alleges the agency's seizure of "a 116-mile tract along the Red River that marks the border between Texas and Oklahoma" was unconstitutional. The article highlights opposition to BLM's seizure of the land. The BLM is quoted as stating it is committed to "working with adjacent landowners, counties and other stakeholders through our ongoing planning process to properly identify the extent of federal holdings in the Red River." BLM Spokeswoman Donna Hummel said, "We share the interest of all parties in clarifying ownership and identifying appropriate management alternatives." This story is also carried in the [Albuquerque \(NM\) Journal](#) (12/2, Weissert, 263K), the [Houston \(TX\) Chronicle](#) (12/2, 2.15M), the [El Paso \(TX\) Times](#) (12/1, 199K), and the [Washington \(DC\) Times](#) (12/2, Weissert, 283K).

The [San Angelo \(TX\) Standard-Times](#) (12/2, Ingle, 2K) adds that the BLM will have to respond to the GLO's intervention. The Times Record News said it has yet to hear back from the BLM on its request for comment. The article links to the GLO's complaint, motion to intervene, and provides a map of the land in question. The [Dallas Morning News](#) (12/2, Blanchard, 1.26M) explains the BLM "claimed the land as public by citing a 1923 ruling from the U.S. Supreme Court that set the boundary between Texas and Oklahoma and awarded land in between the boundary to the federal government."

[PJ Media](#) (12/1, Straub, 69K) provides analysis that the legal issue in Aderholt vs. Bureau of Land Management is complex because the "dispute may hinge on whether the changes in the flow of the Red River came about through erosion – a gradual eating away at the banks – or avulsion – a sudden change brought about by flooding, tornado or some other natural event." In detailing the background on the case, the article cites BLM's deputy director of operations Steve Ellis' 2014 testimony before the House Subcommittee on Public Lands & Environmental Regulation, where he explained the agency seeks to "establish a long-term plan articulating the BLM's objectives and strategies for maintaining the health and productivity of public lands in the region."

The [Texas Tribune](#) (12/1, Malewitz, 6K) points to the potential future royalties from development of minerals on the land in question – which would flow to the state's Permanent School Fund should Texas own the land – as cause for the GLO's intervention. Because the land has yet to be developed, it is difficult to place a monetary value on the property. The Tribune notes that BLM "plans to finalize the management scheme by 2018 at the earliest, frustrating residents who want a resolution now." This story is also carried on the website of [WFAA-TV Dallas](#) (12/1, 391K). The [Dallas Morning News](#) (12/1, 1.26M) adds that Texas Gov. Greg Abbott (R) "said he will file his own brief supporting the landowners." Similar coverage is provided by the [Houston \(TX\) Chronicle](#) (12/2, Rosenthal, 2.15M).

UTAH POLITICIANS JOIN PUSH FOR BLM TO PROTECT BONNEVILLE SALT FLATS. The [AP](#) (12/2, Price) reports on a letter by Republican officials in Utah to the BLM that urged protection of the state's famous Bonneville Salt Flats. Gov. Gary Herbert wrote the flats are "approaching ruin," and the AP noted how "rough salt led to a string of canceled motorsports in recent years." BLM spokeswoman Megan Crandall said the agency "remains committed to responsibly maintaining" the flats, and looks "forward to continued collaboration with our many partners and stakeholders to ensure the Salt Flats remain protected." This story is also carried in the [Elko \(NV\) Daily Free Press](#) (12/2, Price, 22K), the [Daily Mail](#) (12/2, 5.31M), the [Washington \(DC\) Post](#) (12/2, Price, 7.78M), [Philly \(PA\)](#) (12/2, Price, 1.18M), the [Columbus \(GA\) Ledger-Enquirer](#) (12/2, 122K), the [Houston \(TX\) Chronicle](#) (12/2, 2.15M), and the [Washington \(DC\) Times](#) (12/2, Price, 283K).

UTAH CLOSES HAZARDOUS MINE OPENINGS NEAR MOAB. [KSL-TV](#) Salt Lake City (12/2, Lockhart, 464K) reports online that "Utah Division of Oil, Gas and Mining workers closed several old and unsafe mine openings north of Moab this month, including five mine shafts." KSL explains that the project was funded by the BLM, "which owns the property where the mines are located." KSL says that "the closures were prioritized because of well-used mountain bike and jeep trails nearby that bring a lot of people to the area."

BLM TO HOST INPUT MEETING IN LAS CRUCES. The [Las Cruces \(NM\) Sun-News](#) (12/1, 47K) reports that BLM's "Las Cruces District Resource Advisory Council will meet in Las Cruces on Dec. 8." The Sun-News says that "planned agenda items include updates on the New Mexico Copper Project Draft Environmental Impact Statement (EIS); the Prehistoric Trackways National Monument Record of Decision for the approved Resource Management Plan and EIS; lands with wilderness characteristics; Restore New Mexico; and grazing permit renewals."

FERM: "WHY IS THE BLM KILLING WILD HORSES?" Jack Ferm writes at the [St. George & Southern Utah Independent](#) (12/2, Ferm) that BLM is "tasked with protecting our heritage, including wild horses known colloquially as 'mustangs.'" Ferm says that "in the dichotomy of federal law, the BLM can use motorized vehicles to capture wild horses, but by law the BLM is not allowed to kill them (either directly or indirectly); whereas Fish and Wildlife Service can kill horses but can't use motorized vehicles to capture them." He says that BLM has knowingly sold horses to slaughterhouses. He says that this was done to make way for oil and gas leases on BLM property. Ferm claims that "all of this happened under the 'watchful' eye of the BLM staff, headed by Ken Salazar, a cattle rancher" and Interior Secretary Sally Jewell, a former Mobil Oil executive.

EMERY COUNTY COMMISSION DISCUSS VARIOUS BLM ISSUES. The [Emery County \(UT\) Progress](#) (12/2, Stoddard, 8K) reports that the Emery County board recently heard from Kenneth R. Brown of the Western County Alliance. The Progress says he gave testimony at meetings held by BLM “concerning the wild horse and burro issue.” He said that there are currently bills in Congress that would transfer the jurisdiction of wild horses and burros to the states and Brown said “the states know the problem of wild horses and burros better than anyone.” Meanwhile, the commission approved the communication use lease between Emery County and BLM “for Mt. Ellen/South Summit Ridge Communication site.” Public lands director Ray Petersen “said they had requested the lease be in perpetuity, but the BLM renewed the lease for 30 years.” The commission also discussed issuing a letter in support of Green River City’s Waypoint Grant Application for the development of recreational infrastructure in and around Green River because “the BLM wanted approval from Emery County because Green River is involved.”

RUHS BEGINS DUTIES AS BLM NEVADA STATE DIRECTOR. The [Elko \(NV\) Daily Free Press](#) (12/2, 22K) reports that “John Ruhs began his duties as the new state director for the Bureau of Land Management in Nevada Monday.” The Free Press says that “Ruhs previously served as the Director of BLM’s Eastern States and had been the acting State Director for Nevada from April through September.” He said, “I’m happy to be back in Nevada permanently and look forward to continuing BLM’s mission as stewards of the land.”

Fish and Wildlife Service:

TEXAS COUNTY WANTS SPIDER’S ENDANGERED STATUS LIFTED. The [Austin \(TX\) American Statesman](#) (12/2, Herman, Subscription Publication, 405K) reports that Williamson County commissioners have “hired the Texas Public Policy Foundation’s Center for the American Future to represent the county for free in a potential federal lawsuit against” the FWS in an attempt to have the bone cave harvestman, a pale orange, eight-legged spider, removed from the endangered species list. Robert Henneke, the director of the foundation’s Center for the American Future, said in a statement that “the county believes the federal government has overstepped its authority in regulating a species that only lives within the State of Texas.” Meanwhile, Commissioner Valerie Covey said, “We don’t believe the bone cave harvestman is endangered.” The American Statesman says that the listing could impact the Southwest Bypass project, which would extend Leander Road to Texas 29. An FWS spokeswoman had no comment.

NEW MEXICO COUNTY PASSES RESOLUTION OPPOSING WOLF RELEASES. The [Ruidoso \(NM\) News](#) (12/2, Stallings, 39K) reports that Lincoln County commissioners have adopted a resolution backing Socorro County’s opposition to FWS’s plans to reintroduce Mexican gray wolves in Socorro County. The commissioners stated that they believe Lincoln County will be the next location for the release of the wolves if the plan moves forward. The News says that the resolution asks members of Congress to call for an investigation into the FWS’s “disregard of the positions of the local and state government, and to defund the wolf recovery program.”

TURTLE-SMUGGLER XU PLEADS GUILTY IN US FEDERAL COURT. In a wire story carried by [CBC News \(CAN\)](#) (12/2, 233K), the AP reports that Canadian national Kai Xu, 27, pled guilty in US federal court Tuesday “to smuggling or attempting to smuggle thousands of turtles from southeastern Michigan.” Xu was apprehended last year at a border crossing with 51 turtles “taped to his body.” He faces a potential sentence of 10 years in prison. According to an affidavit from an agent with the US Fish and Wildlife Service, Xu was caught with 41 live turtles taped to his legs and 10 between his legs.

A similar version of this AP story, carried on the [KCPQ-TV](#) Seattle (12/1, 114K) website, says that the Detroit Free Press “reported that Gavin Shire of the U.S. Fish and Wildlife Service investigated the case against Xu and said there is a large demand for turtles in Asia — and not necessarily for pets.” Shire, continues the AP, told the Free Press that there is a significant amount of illegal and unregulated turtle consumption in Asia.

Other versions of this AP story were carried by the [Halifax \(CAN\) Chronicle Herald](#) (12/2, 336K) and [Toronto \(CAN\) Star](#) (12/1, 119K).

FWS: HIGH COURT SHOULDN’T REVIEW DECISION OVER SANTA ANA SUCKER. In a paywall article, [Law360](#) (12/2, Rodriguez, 30K) reports that the US Fish and Wildlife Service urged the US Supreme Court “not to review the Ninth Circuit’s decision supporting the agency’s move to double the size of the habitat of the Santa Ana sucker, a threatened fish unique to Southern California rivers.”

National Park Service:

PLANS FOR CONCERTS IN THE PARKS DRAWS CRITICISM. Kurt Repanshek writes at [National Parks Traveler](#) (12/2, Repanshek, 989) that more needs to be known about what C3 Presents plans to do if it gains greater access to national parks as concert venues. He says that the company spent \$15,000 lobbying the Interior Department during the third quarter. He notes that there has been criticism of a concert C3 Presents staged in September on West Potomac Park that some said “sets a troubling precedent that could signal an end to the days of free music in the

national park, ushering in an era of pricey, multi-day festivals. Reparatier says that the company has close ties to the Obama Administration and that “not only was the decision to allow C3 Presents’ paid-admission concert counter to Park Service policies stating that ‘all activities must be free and open to the public,’...but it was made by top Park Service staff in the Washington office who overruled underlings.”

SENATE COMMITTEE APPROVES BILL ALLOWING BUFFALO HUNTING IN GRAND CANYON. The [Grand Canyon \(AZ\) News](#) (12/2) reports that the “Senate Energy and Natural Resources Committee approved a bill to allow the Arizona Game and Fish Department (AZGFD) to assist in better management and conservation of the bison population within Grand Canyon National Park.” The News says that the Grand Canyon Bison Management Act will next be considered by the Senate Committee on Environment and Public Works. According to Kurt Davis, chairman of the Arizona Game and Fish Commission, “Allowing volunteer sportsmen and women to assist in managing the bison population would be a direct cost savings to taxpayers and would quickly improve habitat within the Grand Canyon National Park.”

ENVIRONMENTALIST CONCERN RAISED BY REPRESENTATIVE’S FAILURE TO SUPPORT GRAND CANYON NATIONAL MONUMENT. [E&E Daily](#) (12/1, Taylor, Subscription Publication) reports that US Rep. Ann Kirkpatrick’s (D-AZ) has yet to support H.R. 3882, a bill to designate “a national monument that would protect 1.7 million acres of old-growth pine forests, wildlife habitat and Native American sacred sites surrounding Grand Canyon National Park.” The article says this has raised the concern of environmentalists, as Kirkpatrick’s hesitation “could deter Obama from using his executive powers to protect the lands before leaving office,” insofar as the Representative’s district “encompasses most of the lands,” and because Kirkpatrick “is vying for Sen. John McCain’s (R-AZ) seat next November.”

YOSEMITE PARK DAYCARE HEAD PLEADS GUILTY TO EMBEZZLEMENT. Relying on information in the [Fresno \(CA\) Bee](#) (11/30, 270K), the [AP](#) (12/2) reports that former Yosemite National Park Child Care Center director Charity Brocchini “pleaded guilty to embezzling more than \$42,000” between 2005 and 2009. She faces a possible 10-year prison sentence and a fine of up to \$250,000. The NPS Investigative Services Branch and the DHHS Inspector General investigated this case. This story is also carried by the [Houston \(TX\) Chronicle](#) (12/2, 2.15M) and the [Washington \(DC\) Times](#) (12/2, 283K) .

NPS ANNOUNCES REESE WITHERSPOON WILL HOST NATIONAL CHRISTMAS TREE LIGHTING. The [AP](#) (12/2) reports the NPS announced Reese Witherspoon will be the host of Thursday’s annual National Christmas Tree lighting ceremony. The NPS “also announced that actress and singer Bellamy Young, who appears on the ABC series ‘Scandal,’ will appear.” This story is also carried in the [Washington \(DC\) Post](#) (12/2, Press, 7.78M), the [Houston \(TX\) Chronicle](#) (12/2, 2.15M), [Philly \(PA\)](#) (12/2, 1.18M), and the [Washington \(DC\) Times](#) (12/2, 283K).

US Geological Survey:

USGS RECORDS NINE OKLAHOMA EARTHQUAKES OF 2.5 OR GREATER MAGNITUDE SINCE MONDAY. The [Tulsa \(OK\) World](#) (12/2, Peterson, 365K) reports that the US Geological Survey recorded “nine Oklahoma quakes of at least 2.5 magnitude since a 4.7 magnitude temblor recorded 3:49 a.m. Monday.” The article lists the USGS’ data on the seismic activity, and links to a map of recent Oklahoma earthquake activity.

Top National News:

OBAMA SAYS PARTS OF CLIMATE AGREEMENT SHOULD BE LEGALLY BINDING. In what the [CBS Evening News](#) (12/1, story 6, 3:05, Pelley, 5.08M) called “a last push for a climate agreement before flying home” from the Paris climate change talks, President Obama on Tuesday said some of the commitments made during the conference should be legally binding and vowed the US would abide by its promises. While there was heavy reporting on Obama’s comments, the coverage lacked great depth or analysis and generally highlighted that the President’s statements likely will exacerbate the already existing conflict with congressional Republicans.

The [AP](#) (12/2, Ritter) reports Obama said that parts of an agreement that emerges from the conference should be legally binding on participating countries. Obama said, “Although the targets themselves may not have the force of treaties, the process, the procedures that ensure transparency and periodic reviews, that needs to be legally binding and that’s going to be critical.” The AP says that while the President’s comments “won praise” at the conference, “it could rile conservatives in Washington, especially if he tries to put the deal into effect without seeking congressional approval.” [Vice](#) (12/1, Gold, 1.88M) summarized the President’s comments by saying, “In other words: Targets for cutting emissions shouldn’t be binding, but keeping track of nations’ progress on their commitments should be.” Obama argued, according to the [New York Daily News](#) (12/2, Good, 3.59M), that legally binding reviews will not hinder countries’ ability to update their commitments. The President said, “As the science changes and as technology changes, five years from now, 10 years from now, 15 years from now – in each successive cycle, countries can update the pledges that they make.”

[Bloomberg Politics](#) (12/2, Sink, 303K) reports Obama also vowed the US will meet the commitments it makes during the summit. In a statement that Bloomberg characterizes as a challenge to Republican lawmakers, Obama said, "My expectation is that we will absolutely be able to meet our commitments." The President added, "This is part of American leadership, by the way. This is part of the debate that we have to have in the United States more often. Too often American leadership is defined by sending troops somewhere." Meanwhile, the [New York Times](#) (12/2, Herszenhorn, Subscription Publication, 11.64M) reports Obama's statement comes as he "faced repeated questions" in Paris "about whether other leaders could trust" the US will fulfill its commitments after the end of his term, which is "a sentiment that some Republicans reinforced Tuesday." Sen. John Barrasso said Americans view the climate issue "as a very, very low priority," later adding, "The President's promise cannot be relied on." [USA Today](#) (12/2, Singer, 5.56M) reports that Obama indicated that despite Republican opposition to the eventual agreement, he believes a future GOP president will take a different stance. Obama said that "when you're in this job, you think about it differently than when you're running for the job." Obama added, "Your credibility and America's ability to influence events depends on taking seriously what other countries care about."

[AFP](#) (12/2) reports that Obama "accepted it was difficult to create political momentum for action, particularly in the United States." However, the President expressed confidence that the issue will be solved. Obama said, "Climate change ... is a problem that by definition is just about the hardest thing for any political system to absorb." The President added, "People don't feel it immediately so there's not a lot of constituency pressure on politicians to do something about it right away. It kind of creeps up on you." Obama said, [NPR](#) (12/2, 1.78M) reported on its website, "I actually think we're going to solve this thing." The President said, "Getting 200 nations to agree on anything is hard ... but I'm convinced that we're going to get big things done here." The [Wall Street Journal](#) (12/2, Subscription Publication, 6.23M) editorializes that any deal likely to be reached at the conference will have minimal impact. According to the Journal, the countries involved in the talks will accept anything that appears to be progress, but differences will prevent a meaningful deal.

The [Washington Post](#) (12/2, Mooney, 7.78M) reports that despite the attention on the first days of the climate summit, when world leaders made statements and pledges were made, the final 10 days "is where the world will determine just how much progress can be locked in to truly address climate change." Obama said, "The task that remains here in Paris is to turn these achievements into an enduring framework for progress that gives the world confidence in a low-carbon future." [Reuters](#) (12/2, Wallace, Doyle) reports that as the conference reaches this next stage, disagreements that have hindered a deal up until this point remain. The participating countries are working on a more than 50-page draft that continues to include unresolved issues. Reuters says the biggest remaining issue is how to raise the billions of dollars that developing countries will need to shift away from fossil fuels.

As Obama Mentions Miami, South Florida Officials Meet For Regional Climate Summit. The [Miami Herald](#) (12/2, Staletovich, 620K) reports that as South Florida officials met for their own climate summit in the "vulnerable" city of Key West, Obama mentioned the area while in Paris. Obama said, "You can put a price on the damage that climate change is doing – you know, you go down to Miami and when it's flooding at high tide on a sunny day and fish are swimming through the middle of the streets, you know that – there's a cost to that." According to the Herald, the Southeast Florida Regional Climate Change Compact features state officials, local leaders, scientists, and environmentalists hearing "the latest projections on climate-related ills" and talking about "tackling sea rise."

Obama Likens Response To Climate Change, Terrorism. The [Washington Times](#) (12/2, Boyer, 283K) reports Obama "defended spending his energies on a climate-change summit" at a time of increased concerns about terrorism, saying the issue presents a security challenge to the world. Obama said, "This one trend, climate change, affects all trends." The President added, "This is an economic and security imperative that we have to tackle now. Great nations can handle a lot at once." The [Baltimore Sun](#) (12/2, 700K) reports Obama "liken[ed] the challenge of climate change to the war on terrorism, which he said also demands a global, coordinated response." Obama said both climate change and terrorism represent a "generational problem" that requires a consistent effort by a coalition of countries. According to [The Hill](#) (12/1, Cama, 654K), Obama's comments "double down on the controversial position of his administration that climate change is as bad as terrorism, if not worse."

White House: 73 Companies Promise Steps Against Climate Change. [Voice of America](#) (12/1, 64K) reports the White House on Tuesday announced that 73 companies are pledging to take steps to contest climate change. The "goals include reducing emissions by as much as 50 percent, reducing water usage by 80 percent, and buying 100 percent renewable energy."

House Votes To Block Administration Rules On Power Plants Emissions. The [AP](#) (12/2, Daly) reports that as Obama pursued a global agreement on climate change, congressional Republicans "moved to block his plan to force steep cuts in greenhouse gas emissions from US power plants." The House passed resolutions on Tuesday that "disapprov[e] Obama's power-plant rules," while also "rendering them inoperative." According to the AP, the votes come after the Senate "approved identical motions last month under a little-used law that allows Congress to block executive actions it considers onerous," but the bills now "face almost-certain vetoes."

Harper, Heyward: World Leaders' Travel Is Hypocritical. In the [Washington Times](#) (12/2, 283K), Jennifer Harper writes that despite talking about the dangers of carbon emissions, the world leaders who gathered in France “can't escape the carbon aftermath of their personal aircraft and ground transportation.” Harper cites a [Brietbart](#) column by John Heyward that said “Climate change alarmists stubbornly refuse to live as if they believe a single word of what they're saying. The size of their carbon footprints is staggering.” According to Heyward, in 2015 “these conferences are unnecessary” due to “incredibly advanced telecommuting systems.”

Porter: Combating Climate Change Does Not Mean Giving Up Economic Growth. In a [New York Times](#) (12/2, Subscription Publication, 11.64M) column, Eduardo Porter writes that hanging over the climate talks is “a question that is unlikely to be openly discussed...Could civilization, as we know it, survive” without economic growth? Porter says that when “economic growth took off consistently around the world only some 200 years ago,” it was spurred by “innovation and lots and lots of carbon-based energy.” However, according to the author, “taking action against climate change” will not require giving up growth, because “we can glimpse technological paths that will allow civilization to keep growing and afford the world economy a positive-sum future.”

Smog Prompts Chinese Government To Warn Residents To Remain Indoors. [ABC World News](#) (12/1, story 8, 1:25, Muir, 5.84M) reported that as the talks went on, the Chinese government warned residents to stay indoors and ordered the temporary shutdown of factories due to severe smog.

WHITE HOUSE REPORTEDLY REJECTED PENTAGON PLAN TO CLOSE GUANTANAMO. The [Wall Street Journal](#) (12/2, A1, Lubold, Lee, Subscription Publication, 6.23M) reports on its front page that Administration officials say the White House has rejected the Defense Department's latest cost estimate for closing the Guantanamo Bay prison, saying that \$600 million is too pricey. The plan includes the cost of building an alternative facility inside the US. A Pentagon official said that after initial costs, the US facility would cost less than \$300 million per year to operate, compared to the approximately \$400 million per year spent at Guantanamo. The [Washington Times](#) (12/2, Morton, 283K) has a report based on the Journal story.

MCCONNELL: CONGRESS HAS CHANCE TO END ACA'S “BROKEN PROMISES.” The [Washington Times](#) (12/2, Howell, 283K) reports that as he “cu[ed] up votes this week on a fast-track measure to gut much of” the ACA and defund Planned Parenthood, Senate Majority Leader McConnell said Tuesday that Congress has an opportunity to end the law's “cycle of broken promises and failures with just 51 votes.” While the President “is sure to veto” the repeal measure, the effort “would serve as a test run for 2017, when Republicans hope to scrap the law for good with a new president and twin majorities in Congress.” McConnell said, “When the president picks up his pen, he'll have a real choice to make. ... He may well decide to stick to his rhetoric that the law is working better than even he intended and veto the bill. But he should instead decide to finally stand with a middle class that's suffered enough from this failed law and sign it. We'll see.”

[Politico](#) (12/2, Kim, Haberkorn, 1.19M) noted that McConnell “can only afford three GOP defections if he wants to pass the measure,” adding that currently, “two moderate Senate Republicans appear to be the likeliest contenders to jump ship, both over provisions in the bill that would defund Planned Parenthood.” Sens. Susan Collins and Mark Kirk are considered likely to vote against the bill, which means McConnell has “little room to spare.” Nonetheless, Senate Republicans “were confident they would ultimately secure 51 votes by the time they vote on Thursday.”

Editorial Wrap-Up:

NEW YORK TIMES. “The Chicago Police Scandal.” The [New York Times](#) (12/2, Subscription Publication, 11.64M) in an editorial says that Emanuel “demonstrated a willful ignorance when he talked about the murder charges” against the police officer who “executed 17-year-old Laquan McDonald,” seeking “to depict the cop as a rogue officer. He showed a complete lack of comprehension on Tuesday when he explained that he had decided to fire” McCarthy, “not because he failed in his leadership role, but because he had become ‘a distraction.’”

“The G.O.P.'s Worst Budget Riders.” The [New York Times](#) (12/2, Subscription Publication, 11.64M) in an editorial says that Speaker Paul Ryan must decide by December 11 whether “to avoid a year-end shutdown fight or give in to right-wing demands.” The Times points to a number of riders that may be attached to a spending bill, which it says “would do great harm,” and are “ideologically driven,” or “serve narrow interests.” The paper urges the President to “do the right thing” and “Just say no” to these measures.

“An Opening In The War Against AIDS.” The [New York Times](#) (12/2, Subscription Publication, 11.64M) in an editorial urges international authorities to “move aggressively” against HIV, calling current progress “discouraging,” because infected persons “are not receiving” appropriate “care and are transmitting the virus.” The Times points out that treatment has become “remarkably easy” with a single pill daily containing all necessary medications. In addition, pharmaceuticals “are greatly reducing prices.” The Times concludes by agreeing with those who are “skeptical” about

the success of current measures, and states that lasting success will be attained only by developing a vaccine and “a cure.”

WASHINGTON POST. *“A ‘Tax Extenders’ Bill That Could Make Fiscal Matters Worse.”* In an editorial, the [Washington Post](#) (12/2, 7.78M) voices opposition to a tax extenders bill reportedly in development which “would make permanent certain provisions...that deserve to be fixtures of the tax code on their merits, and already were, for all intents and purposes.” The Post says that doing so might encourage lawmakers to “make some tax breaks more generous while they acknowledge their permanence,” which could swell the deficit; the editorial also says the bill could “gut” revenue sources, ACA taxes on medical device and high-cost employer-provided insurance. The Post calls for Obama to block the bill, saying it is “better to accept another short-term ‘extender’ bill, as in the past, than to so thoroughly imperil the future.”

“This Week, Jason Rezaian Will Have Been In An Iranian Prison For 500 Days.” A [Washington Post](#) (12/2, 7.78M) editorial notes that on Thursday, reporter Jason Rezaian marks his 500th day of detention in Iran and criticizes the Administration for failing to “create incentives for the regime to release” him and other Americans.

“Rahm Emanuel Ducks And Dodges In Chicago.” The [Washington Post](#) (12/2, 7.78M) says in an editorial that the firing of Chicago Police Superintendent Garry McCarthy exposed the flaws of Mayor Rahm Emanuel’s “rickety one-bad-apple narrative.” Emanuel “beat a tactical retreat” by firing McCarthy and “naming a task force to address the police department’s obvious lack of accountability,” but he “has more explaining to do.”

WALL STREET JOURNAL. *“We’ll Always Have The Illusions Of Paris.”* The [Wall Street Journal](#) (12/2, Subscription Publication, 6.23M) editorializes that any deal likely to be reached at the Paris conference will have minimal impact. According to the Journal, the countries involved in the talks will accept anything that appears to be progress, but differences will prevent a meaningful deal.

“US Manufacturing Slides.” A [Wall Street Journal](#) (12/2, Subscription Publication, 6.23M) editorial cites the decline of US manufacturing last month to its lowest level since the end of the recession as evidence that the President should focus more on the nation’s economic climate.

“Britain’s Choice On Syria.” The [Wall Street Journal](#) (12/2, Subscription Publication, 6.23M) writes in an editorial that the vote in Britain’s parliament on Syrian airstrikes represents a serious moment in British foreign policy and a chance for Prime Minister David Cameron’s government to recover from its defeat on the 2013 Syria bombing proposal. The Journal says that sharp divisions among Labour party members may signal the end of Corbyn’s leadership and will likely push parliament to vote in favor of the strikes, albeit without much serious debate about the goals of the military campaign.

DOI in the News:

JEWELL SPEAKS AT CELEBRATION OF VALLES CALDERA'S ADDITION TO NPS. In continuing coverage of the NPS' planned celebration of Valles Caldera's transition from trust management to the Park Service, the [AP](#) (10/10) featured the statements of US Interior Secretary Sally Jewell at Saturday's ceremony. Jewell is quoted as saying, "This spectacular area tells a story of New Mexico's rich natural and cultural heritage," adding, "We are honored to serve as stewards of this land to ensure that it remains cared for and shared with future generations." Jewell called Valles Caldera "a perfect example of the key role the Land and Water Conservation Fund has played in enhancing public lands from city parks to national parks over the last 50 years." Jewell is paraphrased as emphasizing "the value of the preserve to many native tribes," and as noting that "The Interior Department is committed to being stewards of the preserve and supporting the values held by the tribes."

This report was also carried by the [Washington \(DC\) Times](#) (10/10, 344K) and the [Albuquerque \(NM\) Journal](#) (10/13, 259K).

The [Los Alamos \(NM\) Daily Post](#) (10/13, Clark) quoted Secretary Jewell as stating, "Today we celebrate an outstanding addition to the National Park family – the Valles Caldera ... This spectacular area tells a story of New Mexico's rich natural and cultural heritage. We are honored to serve as stewards of this land to ensure that it remains cared for and shared with future generations." Jewell said she joined "with Americans across the country in calling on Congress to permanently reauthorize and provide dedicated funding for this program in order to honor our nation's outdoor heritage and provide resources to local communities who want to invest in conservation, historic preservation and recreational opportunities." Other speakers at the dedication included Ken Smith, former chairman of the Valles Caldera Board of Trustees, along with NPS Regional Director Sue Masica and Park Superintendent Jorge Silva-Bañuelos, former executive director of the Valles Caldera Trust.

The [Santa Fe \(NM\) Reporter](#) (10/12, St. Cyr, 69K) also covers this story in a brief. The [Los Alamos \(NM\) Daily Post](#) (10/13, Clark) reported in anticipation of the event.

WACO MAMMOTH SITE DESIGNATED NATIONAL MONUMENT. The [Examiner](#) (10/13, Burmeier, 1.34M) provided the history of the Waco Mammoth Site, designated as a national monument in July 2015, which protects the location "where the extremely well-preserved fossils of a herd of Columbian Mammoths and other Ice Age animals have been found." Secretary of the Interior Sally Jewell is quoted as saying, "Our National Parks inspire and teach us about our nation's natural history – in this case, about the prehistoric animals that walked our Earth tens of thousands of years ago," adding that, "The Waco Mammoth National Monument will share the wonder of these incredible mammoths with visitors from around the world and help introduce a new generation to the thrill of scientific discovery that only a special site like this can demonstrate first-hand." NPS Director Jonathan B. Jarvis said the NPS "will work in partnership with the City of Waco and Baylor University to protect, preserve, and most importantly share the remarkable Waco Mammoth National Monument with the American people and visitors from around the world."

INTERIOR IG REPORT FINDS NPS IMPROPERLY RENTED OUT CABIN FOR POLITICIANS. The [AP](#) (10/9, Bob Moen) reported on an Interior Department Inspector General's report that found the NPS rented out the Brinkerhoff Lodge in Grand Teton National Park "as a low-cost family vacation getaway" to "politicians and others" including Vice President Joe Biden, despite its designation for official government business. The IG report "recommended that the Park Service change its practice of charging guests little or nothing for overnight stays and improve the lodge's management, fire safety and security." The AP listed politicians alleged to have stayed in the cabin.

This story was also carried by the [New York \(NY\) Times](#) (10/9, Press, Subscription Publication, 11.82M), the [Houston \(TX\) Chronicle](#) (10/9, 2.28M), the [Minneapolis \(MN\) Star Tribune](#) (10/9, Moen, 1.19M), the [Daily Mail \(UK\)](#) (10/9, 5.59M), [Philly \(PA\)](#) (10/9, Moen, 1.06M), the [Casper \(WY\) Star-Tribune](#) (10/11, Moen, 115K), and on the website of [WTRF-TV Wheeling \(WV\)](#) Wheeling, WV (10/13, 26K).

NPS spokeswoman April Slayton told [Greenwire](#) (10/9, Bogardus, Subscription Publication) that in response to the IG report the agency will not allow personal use of the lodge in the future, "and only government employees on official travel with a valid travel authorization will be allowed to stay at the lodge."

INTERIOR, FOREST SERVICE EVALUATING DRONES FOR FIGHTING WILDFIRES. [The Hill](#) (10/10, Cama, 471K) reported that the Department of the Interior and the US Forest Service is examining whether to employ unmanned helicopters in managing massive wildfires, adding that agencies officials will attend a demonstration in Idaho next week of an unmanned K-Max helicopter, developed by Lockheed Martin and Kaman Aerospace. In a joint statement, the two Federal agencies said, "The Interior Department and U.S. Forest Service are constantly examining new technologies to improve the safety and effectiveness of wildland firefighters on the ground," noting, "the challenges of safely operating during periods of reduced visibility and at night can preclude manned aircraft from supporting wildfire operations."

INTERIOR TO ESTABLISH NEW BISON HERD IN AZ. The [AP](#) (10/12) reports that the Interior Department agreed with Arizona state officials to establish a bison herd in northern AZ that had genetic lineage from western South Dakota's Wind Cave National Park. The Game and Fish Department is paraphrased as saying the "establishment of the herd is part of a national effort to conserve bison lineages that have high genetic purity, genetic diversity, and rare bison genes," adding that "Both herds have high levels of cattle DNA."

This story was also carried by the [Washington \(DC\) Times](#) (10/13, 344K), the [Albuquerque \(NM\) Journal](#) (10/13, 259K), and the websites of [KNXV-TV Phoenix \(AZ\)](#) Phoenix (10/13, 103K) and [KOLD-TV Tucson \(AZ\)](#) Tucson, AZ (10/13, 23K).

CONTINUING COVERAGE CA GROUP APPEALS PAMUNKEY TRIBE'S FEDERAL RECOGNITION. The [AP](#) (10/9) continued coverage of Stand Up for California's "last-minute appeal" of the Interior Department decision to grant Virginia's Pamunkey Indian Tribe Federal recognition, because the California organization "that favors gambling limits" is concerned the tribe could open a casino, despite its stated intentions not to do so. Virginia state already recognizes the Pamunkey. The article featured opinion that the appeal is "unfounded, meritless, and unsupported by evidence."

This report was also carried by the [Houston \(TX\) Chronicle](#) (10/9, 2.28M), the [Fredericksburg \(VA\) Free Lance-Star](#) (10/13, 91K), the [Native American Times](#) (10/11, 337), and the [Navajo Times \(AZ\)](#) (10/13, 66K), as well as the websites of [KFMB-TV San Diego \(CA\)](#) San Diego (10/9, 53K) and [WCAV-TV Charlottesville \(VA\)](#) Charlottesville, VA (10/9, 3K).

The [Virginia Gazette](#) (10/9, Brauchle, 50K) featured the interview comments of Stand Up for California director Cheryl A. Schmit, who said the appeal has "nothing personal with the tribe, it's all about the process," asserting the tribe has failed to properly show its historical lineage. Schmit contended, "It's a very serious and solemn decision when the Department of Interior makes these recognitions," adding the Department "should be concerned about the integrity of these decisions."

HILL ANALYSIS THE FAIR MARKET VALUE OF COAL. In its "Pundits Blog," [The Hill](#) (10/9, Hein, Contributor, 471K) reported that the Department of the Interior should seek to "account for the upstream costs of coal mining on federal lands" as the Administration "makes strides to reduce downstream greenhouse gas emissions from coal-fired power plants." The Hill asserted that this will help to satisfy "fiscal reform advocates who demand a 'fair share' for energy production" and "environmentalists who seek to lessen the negative externalities associated with coal mining." The Hill also said the Federal government needed to close "fiscal loopholes" for coal companies, which reportedly cost taxpayers "up to \$1 billion each year in lost revenue." The Hill praised Secretary Sally Jewell's call for an "honest and open conversation about modernizing the federal coal program" as "a welcome first step."

JEWELL QUOTED REGARDING LAPSE OF LAND AND WATER CONSERVATION FUND. The [Covote Chronicle](#) (10/13, Harrison) reports that Congress allowed the Land and Water Conservation Fund (LWCF) to lapse. The article quotes US Interior Department Secretary Sally Jewell as commenting that, "after 50 years of resounding success in enriching America's great outdoors, the Land and Water Conservation Fund needlessly faces an uncertain future. I am extremely disappointed that, despite overwhelming bipartisan support, Congress has allowed this innovative and effective program to expire."

Montana Asserts Harms From Lapse Of Land And Water Conservation Fund. Continuing coverage of a previous [AP](#) (10/13, Whittle) report and relying on information in the [Montana Standard](#) (10/13, Kuglin, 36K), the [AP](#) (10/13) reports that the Montana Fish, Wildlife and Parks argued the loss of the Land and Water Conservation Fund, which Congress allowed to lapse in Sept., "could harm the program that focuses on nongame species in need of management, such as small birds, reptiles and amphibians." The article notes that the state "has received more than \$14.3 million in State Wildlife Grants from the U.S. Fish and Wildlife Service since 2000," and that the Fund has "paid for \$41 million in Habitat Conservation Plan grants to the state since 2002."

The [Houston \(TX\) Chronicle](#) (10/12, 2.28M) also carried this report, and the [Napa Valley \(CA\) Register](#) (10/13, Whittle, 37K) provided additional coverage.

Additional Coverage. In an op-ed for [Vermont Business Magazine](#) (10/13, Leahy, 23K), Sen. Patrick Leahy (D-VT) advocated for re-authorization of the now-lapsed Land and Water Conservation Fund (LWCF) and the Historic Preservation Fund.

Columnist Hannah Ryan wrote in a piece for the [Missoulian \(MT\)](#) (10/9, Ryan, 116K) to decry the failure to reauthorize the Land and Water Conservation Fund, which she said could become "a great program that we didn't save."

COALITION ASKS INTERIOR, FWS TO RELEASE OF MEXICAN WOLVES DESPITE NM OPPOSITION. [Greenwire](#) (10/9, Hiar, Subscription Publication) continued coverage on Thursday of the activists' letter submitted yesterday to Interior Secretary Sally Jewell and FWS Director Dan Ashe petitioning for the release of at least five packs of Mexican gray wolves in NM to strengthen the genetics of the endangered predators, in spite of state opposition.

DECISION NOT TO LIST SAGE GROUSE AS ENDANGERED PRAISED. Columnist Kelly Sloan wrote in the [Colorado Statesman](#) (10/9, Sloan, 17K) praising the Department of the Interior's decision not to list the greater sage grouse as endangered, calling it "good news" that an endangered listing was averted, "at least temporarily," because "an Endangered Species listing is traditionally one of the most injurious hammers in Interior's arsenal, one that can leave permanent economic scars."

Empowering Native American Communities:

CITIES OPT TO CELEBRATE NATIVE AMERICANS ON COLUMBUS DAY. The [Raycom News Network](#) (10/9, Wright) reported on cities and states recognizing the Federal holiday Columbus Day as "Indigenous Peoples Day" in order to celebrate Native Americans' contributions. In addition, Hawaii recognizes Columbus Day as "Discoverers Day," while some "States also have opted to ignore the Columbus holiday" altogether. [WFSB-TV New Haven \(CT\)](#) New Haven, CT (10/13, Wright, 269K) also carries this story on its website.

The [AP](#) (10/13) features the opinion of American Indian activists who contend a Federal holiday honoring Christopher Columbus "overlooks a painful history of colonialism, enslavement, discrimination and land grabs that followed the Italian explorer's 1492 arrival in the Americas"; meanwhile, advocates assert the holiday "celebrates centuries of cultural exchange between America and Europe, commemorates an iconic explorer and honors Italian-Americans, a group that has endured its own share of discrimination."

The [St. Paul \(MN\) Pioneer Press](#) (10/13, Melo, 447K) and the [Durango \(CO\) Herald](#) (10/12, Butler, 28K) report similarly.

ED ANNOUNCES GRANTS FOR NATIVE YOUTH COLLEGE, CAREER READINESS. The [Tulsa \(OK\) World](#) (10/13, 364K) reports that ED has announced "more than \$5.3 million in grants to help Native American youth become college- and career-ready." ED's Native Youth Community Projects program will give "grants to a dozen recipients in nine states that will impact more than thirty tribes and involve more than 48 schools." The paper quotes Education Secretary Arne Duncan saying, "These grants are an unprecedented investment in our Native youth, and a recognition that tribal communities are best positioned to drive solutions and lead change. These grants are a down payment on President Obama's commitment last summer at his historic trip to the Standing Rock Sioux Reservation in North Dakota to create new opportunities for our American Indian youth to cultivate the next generation of Native leaders."

POINTE-AU-CHIEN TRIBE SUING BP, OTHERS OVER OIL SPILL. The [Houma \(LA\) Courier](#) (10/10, Somosot, 55K) reports federal court records show that "the Pointe-au-Chien Indian tribe is suing BP, Transocean and Halliburton for damages in connection with the severe loss of tribal lands and resources stemming from the Deepwater Horizon oil spill in 2010." The tribe's attorney "opted to not accept the compensation offered by BP, as it was insufficient to cover its out-of-pocket costs and amounted to less than \$75,000."

Office of Insular Affairs:

KIA'AINA EMOTIONALLY RECALLS MEETING TYPHOON VICTIMS. [Marianas Variety](#) (10/9, Villahermosa) reported on Assistant Interior Secretary for Insular Affairs Esther Kia'aina's "teary-eyed" statement to the press on Wednesday, recalling meeting with victims of Typhoon Soudelor on Saipan. Kia'aina said, "I am completely amazed by the professionalism, cooperation and dedication by the CNMI government as well as the people's resiliency." Kia'aina stated the agency was present on Tuesday to "support the emergency management team to determine and to assess the current status of their recovery effort as well as to look at innovative ways of collaborating on long-term hazard mitigation planning and determining strategic areas and how to leverage resources."

Tackling America's Water Challenges:

CONGRESS ALLOWS LAND AND WATER CONSERVATION FUND TO EXPIRE. [USA Today](#) (10/12, Theobald, 5.23M) reports that congress missed the Sept. 30 deadline for reauthorizing the Land and Water Conservation Fund, which "has had wide bipartisan support for 50 years." Supporters of the fund blame House Natural Resources Committee Chairman Ron Bishop, who is "among a group of conservatives who are leery of the federal government acquiring additional land when, for example, there is a \$11.5 billion maintenance backlog on existing National Park Service land." Meanwhile in the Senate, Sen. Mike Lee "blocked several attempts on the floor to permanently authorize the fund on the final day before it expired," noting that "more than two-thirds of his state is federal land" and "the federal government should focus on properly managing the land it already owns."

"CULTURE OF BADGERING" HELPED CUT CALIFORNIA WATER USAGE. The [New York Times](#) (10/12, Richtel, Subscription Publication, 11.82M) reports that while California officials "credit their new conservation policies and the sting of thousands of warnings and penalties that they had issued to people for overuse," for the state's sharp reduction in water usage over the summer, "the most effective enforcers may be closer to home: the domestic water police," including "moms and dads, spouses and partners, children, even co-workers and neighbors who are quick to wag a finger when they spot people squandering moisture." The Times says this "culture of badgering has intensified since January 2014, when the drought led Gov. Jerry Brown to declare a state of emergency and ask Californians to voluntarily cut water use by 20 percent."

SENATORS SEEK COMPROMISE ON DROUGHT RELIEF LEGISLATION. [Greenwire](#) (10/9, Snider, Subscription Publication) reported that on Thursday US Senate Energy and Natural Resources Chairwoman Lisa Murkowski (R-AK) suggested that legislative "efforts to pass drought relief legislation for California and the West" will depend on whether negotiators can find areas of common agreement.

Securing America's Energy Future:

Renewable Energy:

BIG DATA INVESTMENTS OPTIMIZING POWER FROM WIND. [Bloomberg News](#) (10/12, Hirtenstein, 2.66M) reports that Italy's Enel, is investing "small sums of money" to tap significant savings by examining the data that comes from hundreds of power plants. Italy's largest utility "already is squeezing more out of the wind farms it operates around the world" after operational data identified certain wind turbines had software that held back performance. CEO Francesco Starace "expects a deeper analysis of data to produce more savings and open new opportunities," Bloomberg reports, adding that he sees big data explaining and predicting consumer behavior in the long term and "Information about their machines' performance is immediately applicable in the short term." Starace said that the Enel is "investing in batteries of all kinds, hardware and software management, plants with and without batteries, putting storage in people's homes and electric vehicles."

INVESTORS COOLING ON RENEWABLE ENERGY SHARES. The [Christian Science Monitor](#) (10/12, Warner, 455K) reports on renewables' downturn as "optimism is fading alongside sinking oil and gas prices." CSM reports that investors have "particularly soured on SunEdison's strategy of developing new wind and solar farms and then selling them to the companies it spun off," TerraForm Power and TerraForm Global as neither has returned reliable dividends. Similarly, NRG Energy's green spin-off NRG Yield was downgraded on Tuesday by Moody's as its 30 percent drop in share price would limit new project investments, CSM reports. "Despite wavering confidence, analysts predict

renewables will weather this downturn," CSM adds.

NEW MEXICO TO HAVE THREE NEW UTILITY-SCALE SOLAR FACILITIES BY END OF 2016. The [Albuquerque \(NM\) Journal](#) (10/13, 259K) reports that by the end of next year, "New Mexico will be producing another 165 megawatts of solar electricity from three large-scale generating facilities scheduled to come online near Roswell and Deming." Southwest Public Service Co. "signed a long-term power purchase agreement with Florida-based NextEra Energy Resources to build and operate two 70 MW solar facilities near Roswell that, once operational in 2017, will be the largest such solar photovoltaic facilities in the state." Tri-State Generation and Transmission Association "also announced a deal, with D E. Shaw Renewable Investments LLC and Denver-based TurningPoint Energy for a 25-MW solar facility in Luna County, about 25 miles northeast of Deming." The projects are attracting "attention in the renewable energy industry because of the low-cost electricity they will provide."

DUKE ENERGY SAYS NEW SENSORS LEAD TO BIG SAVINGS AT PLANTS. The [Charlotte \(NC\) Business Journal](#) (10/13, Downey, Subscription Publication, 68K) reports "a four-year, \$80 million Duke Energy project" that deploys "sensors for key power plant equipment is nearing \$15 million in maintenance savings for the company this year." The project is called Duke's "Smart Generation" program. Duke "has put sensors on equipment such as boilers, turbines, generators, large pumps, transformers and other important power plant hardware. It is designed to avoid problems by catching them early." Duke's Michael Reid said, "It allows us to be more and more creative in solving problems."

TEXAS WIND POWER BOOM MAY SLOW AS TAX BREAK EXPIRES. The [San Antonio Express-News](#) (10/13, Blum, 884K) reports that as Texas tax breaks for wind projects expire, the state may lose its place as the top state for wind generation.

GERMAN SOLAR CONTRACTOR TO ENTER POWER PRODUCER BUSINESS IN NORTH CAROLINA. The [Charlotte \(NC\) Business Journal](#) (10/13, Downey, Subscription Publication, 68K) reports that Germany's Conergy "has made North Carolina ground zero for its strategy to move from being a construction contractor for solar projects to being an independent power producer that owns and operates solar projects." A total of 28 megawatts of solar capacity will be sold to Duke Energy with additional projects under development. Yann Brandt, Conergy's regional head for the Americas, says the company is also looking at California, New Jersey, Massachusetts, and Florida.

GLOBAL WIND INSTALLATIONS POISED TO DOUBLE IN FIVE YEARS. [Bloomberg News](#) (10/12, Morales, 2.66M) reports that "cumulative wind-energy installations worldwide may double within five years as falling costs help producers compete with conventional power." According to the Global Wind Energy Council, wind developers installed a cumulative total of about 370 gigawatts worldwide by the end of last year. Bloomberg reports that to double installations in the next five years, developers would have to add 74 gigawatts a year, over last year's record 51.5 gigawatts added.

SUNEDISON TO EXIT BRITAIN AS GOVERNMENT CUTS ROOFTOP SOLAR SUBSIDIES. The [New York Times](#) (10/10, Reed, Subscription Publication, 11.82M) reports that following the decision by Britain's Conservative government under Prime Minister David Cameron to cut rooftop solar subsidies for new installations by as much as 87 percent after January, SunEdison this week parted ways with its UK partner the Mark Group and said it would soon end the free installation program. CEO Ahmad Chatila told investors on Wednesday that SunEdison would "de-emphasize or exit" countries including Britain, while focusing on the United States, Latin America, India and China. In a statement, SunEdison said that "we are extremely disappointed that the draconian policy proposals made by the government" will "essentially eliminate the solar" market in Britain. The Times reports that in the government's view "it is time for the nascent industry to start surviving on its own" and the cuts are "part of a broad trimming back of renewable-energy programs."

Onshore Energy Development:

EMERGENCY PLAN ADDRESSES THREAT FROM UNDERGROUND FIRE NEAR NUCLEAR WASTE SITE. The [Chicago Tribune](#) (10/10, 2.46M) reported on the Westlake and Bridgeton Landfills near St. Louis where two things lurk "that should never meet: a slow-burning fire and a cache of Cold War-era nuclear waste, separated by no more than 1,200 feet." Government officials have "quietly adopted an emergency plan in case the smoldering embers ever reach the waste, a potentially 'catastrophic event' that could send up a plume of radioactive smoke over a densely populated area near the city's main airport." While the landfill fire has been burning "since at least 2010, the plan for a worst-case scenario was developed only a year ago" and not publicized until last week. Landfill operator Republic Services "downplayed any risk." The piece adds that "interceptor wells – underground structures that capture below-surface gasses – and other safeguards are in place to keep the fire and the nuclear waste separate."

ANALYSIS NUCLEAR POWER MAY OFFER SOLUTION FOR MICHIGAN'S CARBON EMISSION GOALS. A [Detroit Free Press](#) (10/11, Reindl, 910K) analysis questioned whether the future of Michigan's low-carbon energy drive lies in nuclear, rather than solar or wind, power. Currently, the state generates 23 percent of its power "from just four commercial reactors," which the Free Press indicates is "more than double the much-heralded 10% figure achieved across the state from renewable sources such as wind, biomass and solar." The article also highlights DTE's recently approved to construct a new "1,560-megawatt Fermi 3 reactor next to Fermi 2 near Monroe," even though they have not yet moved forward. Yet, hydraulic fracking is noted as a more inexpensive option that is currently hindering a potential move toward increasing the state's nuclear capabilities.

US SHALE OIL INDUSTRY CAN PROFOUNDLY IMPACT GLOBAL OIL MARKET. The [Financial Times](#) (10/12, Dale, Subscription Publication, 1.37M) reported that US shale oil can reshape the global market as it responds quickly to price changes, is exposed to capriciousness of banking, and introduced the industry to manufacturing-like processes.

Offshore Energy Development:

TUSCALOOSA NEWS SAYS OIL COMPANIES HAVE LEARNED FROM BP SPILL. The [Tuscaloosa \(AL\) News](#) (10/11, 78K) editorializes that "various lawsuits from individuals, businesses and stockholders of BP...remain in line to be adjudicated," but the "\$20 billion final agreement between five Gulf states – including Alabama – and BP to settle all civil claims against the oil company" is "a major penalty that will, as Attorney General Loretta Lynch said, 'inspire BP and its peers to take every measure necessary to ensure that nothing like this can ever happen again.'" The News says "oil companies since the Deepwater Horizon spill have made enormous strides in safety, to where they say disasters of this scale are less likely to happen moving forward."

Vitter Comments On BP Settlement. The [Bayou Buzz \(LA\)](#) (10/12, 4K) reports Sen. David Vitter last week issued a statement regarding the \$20.8 billion BP settlement for civil claims over the Deepwater Horizon oil spill. Vitter said, "It's vitally important to hold BP accountable for the damage and ongoing consequences of the spill, especially when Louisiana relies so heavily on our coastal resources. As we look further into the details of the BP settlement, rest assured I will continue fighting to make sure Louisianians receive what we are justly owed."

America's Great Outdoors:

Bureau of Land Management:

BLM DIRECTOR KORNZE SPEAKS ON NEW BIKE TRAIL MAP APP. The [Phoenix Business Journal](#) (10/13, Totten, Subscription Publication, 5K) reported in its "Business" blog that the US Bureau of Land Management named the Black Canyon Trail, described as "an 80-mile ride an hour north of downtown Phoenix," as one of the "top 20 mountain biking trails in the US." The BLM "has created a national map detailing notable mountain biking trails." BLM Director Neil Kornze is quoted as saying "The BLM is proud to manage some of the world's best mountain bike trails...This new, mobile-friendly tool will help the public get a glimpse of these amazing places and plan their rides."

NEVADA PURCHASES LAND TO TRIPLE SIZE OF CAVE LAKE STATE PARK. Relying on information in the [Elko \(NV\) Daily Free Press](#) (10/13, 22K), the [AP](#) (10/13) reports that the Nevada Division of State Lands purchased "2,980 acres in eastern Nevada surrounding Cave Lake State Park near Ely" from the US Forest Service, and will triple the size of the park. The article notes that the state has proposed acquisitions of two other land tracts that are both administered by the Bureau of Land Management. This report is also carried by the [Houston \(TX\) Chronicle](#) (10/12, 2.28M), the [Washington \(DC\) Times](#) (10/13, 344K), and on the website of [KSNV-TV Las Vegas \(NV\)](#) Las Vegas (10/12, 12K).

CONGRESSMAN SEEKS GREATER GRAND CANYON HERITAGE NATIONAL MONUMENT TO PREVENT URANIUM ORE MINING. The [AP](#) (10/13, Fonseca) reports that US Rep. Raul Grijalva (D-AZ) announced plans to propose a bill to create Greater Grand Canyon Heritage National Monument among one million acres rich in uranium ore that are banned from the filing of new mining claims: a regulation that Grijalva wants to make permanent. Grijalva admitted the measure would probably not be granted a Congressional hearing, but aims to have "a template ready that President Barack Obama could consider signing as a proclamation for a new monument." While Navajo Nation President Russell Begaye "said the tribe has struggled with the effects of uranium mining" for decades, "Arizona Game and Fish Commission and sportsmen's groups criticized the effort to sidestep Congress and questioned the expense of running a national monument." The US Bureau of Land Management and the Forest Service oversee much of the land in question.

The [Albuquerque \(NM\) Journal](#) (10/13, 259K) also carries this story.

SENATE CONSIDERS BILL TO PROTECT LAND IN SOUTHERN CA. [Greenwire](#) (10/9, Taylor, Subscription Publication) reported on testimony at Thursday's hearing of the Senate Energy and Natural Resources Subcommittee on Public Lands, Forests and Mining, which considered a bill by Sen. Dianne Feinstein (D-CA) "to protect 1.4 million acres of deserts, mountains and woodlands in Southern California." An elected San Bernardino County representative criticized the bill, arguing S. 414 would "cut off mineral development and stifle a key economic sector," while a conservationist argued the measure "would bolster tourism and is supported by environmentalists."

Fish and Wildlife Service:

FWS REMOVES UTE WILDFLOWER FROM ENDANGERED SPECIES CANDIDATE LIST. Relying on information in the [Durango \(CO\) Herald](#) (10/11, 28K), the [AP](#) (10/13) reports that the US Fish and Wildlife Service "removed Sleeping Ute milkvetch from a list of candidates for protection under the Endangered Species Act." Despite the wildflower's range that is limited to a certain portion of Ute Mountain Ute Tribal land, "the oil and gas development that once seemed to threaten the species is no longer expected to occur" there, according to a recent survey by the tribe that found "nearly five times as many of the wildflowers as found in 2000."

This story was also carried by the [Houston \(TX\) Chronicle](#) (10/12, 2.28M) and the [Washington \(DC\) Times](#) (10/12, 344K).

FWS PROPOSES PROTECTIONS FOR SOUTH PACIFIC OCEAN CREATURES, WILL REVIEW POLAR BEAR'S STATUS. [The Hill](#) (10/10, Devaney, 471K) reported on new standards promulgated in Tuesday's edition of the Federal Register. On Friday, the Fish and Wildlife Service proposed additional "protections for several animals endemic to American Samoa in the South Pacific Ocean," including "two types of American Samoan land snails, a distinct segment of friendly ground-doves, the Pacific sheath-tailed bat and the mao." In addition, the FWS said it "will conduct a five-year status review of the polar bear to determine whether it should be listed as an endangered species," following up on a 2008 review of the animal.

SURVEY SUGGESTS HIGH POLITICAL INFLUENCE AT FWS. The [High Country \(CO\) News](#) (10/13, Zaffos, 74K) reported that a recent survey by the Union of Concerned Scientists found "73 percent of Fish and Wildlife scientists say political influence is too high at the agency and a relative majority believes their office is less effective than it was five years ago." The article suggested US Fish and Wildlife Service officials may have been unduly influenced in their decision that the "greater sage grouse does not warrant protection under the Endangered Species Act."

FWS PROPOSES PROTECTIONS FOR FLORIDA PLANTS, FRESHWATER MUSSEL. The [AP](#) (10/11) reported the US Fish and Wildlife Service proposed protection of the Suwannee moccasinshell musselin in FL and GA as they are in decline due to "pollution, sedimentation and reduced water flows." Officials are paraphrased as saying "the moccasinshell's decline serves as a warning about the decline of clean water in the region." The FWS also proposed protections for five FL plants, including the Florida bristle fern. The [Washington \(DC\) Times](#) (10/11, 344K) also carried this story.

FWS INVESTIGATES FATAL CALIFORNIA CONDOR SHOOTING IN AZ. The [AP](#) (10/10) reported that the US Fish and Wildlife Service announced its investigation of Thursday's "fatal shooting of an endangered California condor in northern Arizona." The Arizona Game and Fish Department said it conducted a preliminary investigation. This story was also carried by the [Houston Chronicle](#) (10/10, 2.28M) and the [Albuquerque \(NM\) Journal](#) (10/10, 259K).

National Park Service:

CRITICS FIGHT MAINE WOODS NATIONAL PARK PROPOSAL OVER FEARS OF NPS REGULATION. The [AP](#) (10/11, Sharp) reported on criticism to Burt's Bees founder Roxanne Quimby's proposal to donate "70,000 acres of woodlands — and millions of dollars — for a Maine Woods National Park," which a recent poll showed local residents disfavor two to one. While supporters of the proposal assert it would create jobs in an economically depressed area, opponents assert National Park Service regulations such as those aimed at protecting park vistas could limit industries in surrounding towns.

This report was also carried by the [Denver \(CO\) Post](#) (10/11, 787K), the [Washington \(DC\) Post](#) (10/11, Sharp, 6.76M), the [Houston \(TX\) Chronicle](#) (10/11, 2.28M), [Philly \(PA\)](#) (10/11, Sharp, 1.06M), and the website of [ABC News](#) (10/11, Sharp, 3.97M).

NPS FINDS MAN DEAD IN TENT IN ROCKY MOUNTAIN NATIONAL PARK. The [AP](#) (10/11) reported that on Saturday the National Park Service said it found a man dead in his tent in Rocky Mountain National Park. He was found "in a backcountry camping site on the west side of the park in northern Colorado." This report was also carried by the [Houston \(TX\) Chronicle](#) (10/11, 2.28M), the [Washington \(DC\) Times](#) (10/11, 344K), and the [Albuquerque \(NM\) Journal](#) (10/11, 259K).

NPS SEARCHES FOR MISSING DIVER IN LAKE POWELL, AZ. The [AP](#) (10/13) reports that the National Park Service and the Coconino County Sheriff's Office in Page, AZ continue to search for 29-year-old William "Billy" Burke of Wyoming "who disappeared after he jumped from a 90-foot cliff into Lake Powell." Although "Bystanders immediately searched for the man," the AP says "they couldn't find him." Due to the water's depth, "a remotely operated vehicle has been brought in to help the search." This story was also carried by the [Arizona Republic](#) (10/11, 1.12M) and [KNXV-TV](#) Phoenix (10/12, 103K) on its website.

PARKS FOUNDATION CONTEST WINNERS VISIT CO NATIONAL PARKS. The [AP](#) (10/13, Press) reports that the National Park Foundation is awarding eight winners of a contest to help promote the National Park Service's "Find Your Park" campaign with a trip to Colorado this week. As the NPS celebrates its centennial next year, the AP paraphrases the foundation as expressing a goal to "make sure parks stay relevant for the next 100 years." This story was also carried by the [Denver \(CO\) Post](#) (10/12, 787K), [Philly \(PA\)](#) (10/12, 1.06M), the [Houston \(TX\) Chronicle](#) (10/12, 2.28M), and the [Washington \(DC\) Times](#) (10/13, 344K).

SENATORS PROPOSE STUDY THAT COULD MAKE EVERS HOME PART OF NPS. The [AP](#) (10/9, Pettus) reported that on Friday Mississippi senators Thad Cochran (R) and Roger Wicker (R) said they proposed legislation to "authorize a study on the national significance of" the home of Mississippi civil rights leader Medgar Evers, "as a step toward making it part of the Park Service," which the AP noted would "bring a steadier source of money from Washington." The article provided background on Evers, who "led voter registration drives and challenged Mississippi's staunchly segregated society." This report was also carried by the [Houston \(TX\) Chronicle](#) (10/9, Pettus, 2.28M) and [Philly \(PA\)](#) (10/9, Pettus, 1.06M).

US Geological Survey:

SERIES OF SMALL EARTHQUAKES RECORDED IN NORTHERN OKLAHOMA. The [AP](#) (10/13) reports several "small earthquakes have been recorded across northern Oklahoma following two moderate earthquakes in the area on Saturday." USGS "reported that nine quakes ranging in magnitude from 2.5 to 3.7 were recorded between 5:07 p.m. Saturday and 5:27 a.m. Sunday." The most recent "seismic activity comes after a 4.5 magnitude temblor Saturday afternoon near Cushing and a 4.4 magnitude quake Saturday morning southwest of Medford." The AP adds that "Cushing is where the world's most important crude oil storage hub is located and it is used to settle futures contracts traded on the New York Mercantile Exchange." The Oklahoma Geological Survey has said it's "likely that many recent earthquakes in the state have been triggered by the injection of wastewater from oil and natural gas drilling operations." [Reuters](#) (10/11, Wade) also provides coverage of this story.

EDITORIAL ARCTIC MAY BECOME TOO COST PROHIBITIVE FOR INDUSTRY. The [Juneau \(AK\) Empire](#) (10/9, 15K) editorialized that the Arctic may "become too cost prohibitive for new exploration and industry," and jeered so-called "kayaktavists" for attempting to stop a Royal Dutch Shell PLC drilling rig from leaving a Seattle port, while failing to use "vessels that are at least made of recycled plastic, if not made of wood." The US Geological Survey is cited as estimating "the Arctic holds an oil and gas bonanza."

Top National News:

COVERAGE OF OBAMA INTERVIEW FOCUSES ON CLINTON EMAIL COMMENTS. The President's interview with CBS' "60 Minutes," particularly his comments on Hillary Clinton's use of a private email server while she was Secretary of State, continues to generate media coverage, with some reports casting his remarks as a defense of Clinton.

Cecilia Vega reported on [ABC World News](#) (10/12, story 2, 3:15, Muir, 5.84M) that the President "had some strong words for Clinton and her troubles with that private email server." Under the headline, "Obama Defends Clinton's Use Of Private Email Server, Sort Of," the [Christian Science Monitor](#) (10/12, Warner, 455K) highlights a number of the President's comments during the interview, but leads its coverage with his discussion of Clinton's email server, noting that he said her use of the server while Secretary of State was "a mistake" but "didn't endanger national security." The Monitor also noted that the President "denied prior knowledge of the private email server" and when asked about his Administration's "prosecution of individuals with classified material on personal computers, the president said he didn't think with Clinton there was an intent to 'hide something or to squirrel away information.'"

A [USA Today](#) (10/13, Cummings, 5.23M) story also focuses primarily on his comments about Clinton's emails, reporting that the President said, "I can tell you that this is not a situation in which America's national security was endangered," adding that "it is important for Clinton to answer questions on the subject 'to the satisfaction of the American public. And they can make their own judgment.'" The President also argued that "the political scandal around it has been 'ginned up' by her Republican opponents." [Western Journalism](#) (10/13, Huston, 303K) similarly noted on its website that while the President "conceded.. that the American people have every right to consider whether Clinton's actions were appropriate," he "added that the political season is fueling the fire."

Some commentators Monday evening also cast the President's comments as a defense of Clinton. For example, Paul Begala said on [CNN's Anderson Cooper 360](#) (10/12, 686K) that Clinton "needs to send him a bouquet of roses. That was as calm a defense — a lot of Democrats panic and my people are kind of weak that way and here is the President of the United States, the most beloved Democrat in America saying, 'Everybody calm down. National security was not compromised.'"

Bianna Keilar said on [CNN's Situation Room](#) (10/12, 554K), "I do think for Hillary Clinton I think this is a good thing, especially in that the President also said she didn't pose a

national security risk. So she's got some backup there. He's also repeating some of what she said. But what took a long time...for her to come to – I think that apology and that she's going to continue to explain to the American people. I think this is him in a way sort of keeping her on track with that as her strategy going forward."

Other commentators took a different track. For example, Eric Bolling said on [Fox News' The Five](#) (10/12, 408K), "I think he destroyed her. I think he threw her right under the bus. ... At first Hillary Clinton said that they knew what was going on. He just said right up front, we didn't know what she did was wrong. She already apologized for it. Later on he gets to, hey, but there's nothing to see here... but I will tell you I was shocked he went that forceful right off the bat at her." Similarly, Carol Lee said on [MSNBC's Andrea Mitchell Reports](#) (10/12, 487K) that the President "seemed to go out of his way not to do her any favors with his answer. He said he wasn't aware that she had a private server while she was Secretary of State. ... I think he made pretty clear that what happened was not something that he approves of and he also gave a classic answer deflecting to the American people to decide whether or not what she did passes muster with them."

Kevin Madden noted on [CNN's Anderson Cooper 360](#) (10/12, 686K) that the President "did say Hillary Clinton has to answer these questions to the satisfaction of the American public and I think to this point she has not. He's not the arbiter here. The ultimate arbiter I think will be the public when they render electoral judgment on Hillary Clinton but also the investigators. There are investigations going on right now. They are going to decide whether or not in a non-partisan way whether or not there were violations or there was some wrongdoing here and that's ultimately where the test will be."

RNC Ad Blasts Clinton Over Email Scandal. [McClatchy](#) (10/12, Clark, 28K) reports that as Democrats prepare for the party's first presidential primary debate, the RNC has launched a new 30-second TV ad titled, "Not Telling Us The Truth...Again," which "bash[es] Hillary Clinton for her use of a private email account." According to the RNC, "the five-figure ad buy will run on national cable and online, with a digital component directly targeting social media supporters of Clinton's Democratic rival, Bernie Sanders." It comes "as Clinton's poll numbers have dropped and as she has launched her own cable TV ad highlighting House Majority Leader Kevin McCarthy's claim that her poll numbers plunged because of the Republican-led Benghazi committee's work."

Gowdy Denies Fired Committee Aide's Claims. On [NBC Nightly News](#) (10/12, story 2, 2:10, Holt, 7.86M), Andrea Mitchell reported that Rep. Trey Gowdy, chair of the Benghazi investigation committee, said that fired committee aide Brad Podliska's claim that the investigation turned into a partisan witch hunt against Hillary Clinton is a "lie," and that Podliska "was a lousy employee" who "mishandled classified information" and wouldn't "do what his supervisors instructed him to do." In response to Gowdy's claims, Podliska's attorneys on Monday said Gowdy "violated laws by talking about a confidential employment dispute."

Jake Tapper reported on [CNN's Situation Room](#) (10/12, 554K) that Podliska is threatening to sue the committee in part "for objecting to what he calls a partisan hyperfocus on" Clinton. The committee denies that, stating Podliska has "now run to the press with his new salacious allegations," after the committee refused his demands for money.

Eight Of Nine Benghazi Hearings Canceled This Year. Meanwhile, Nancy Cordes reported on the [CBS Evening News](#) (10/12, story 2, 2:35, Pelley, 5.08M) that CBS News obtained internal documents showing that while the committee originally planned to hold nine hearings this year, only one is scheduled, "with Clinton as the lone witness later this month." Cordes reported that Republicans say the other eight were scrapped "because they have had difficulty procuring some of the relevant documents from the Obama Administration."

Clinton Aide Negotiated With Abu Dhabi For NYU While At State. The [Washington Post](#) (10/13, A1, Helderman, 6.76M) reports on its front page that during her first four months as then-Secretary of State Hillary Clinton's chief of staff at the State Department, Cheryl D. Mills also "worked part time at New York University, negotiating with officials in Abu Dhabi to build a campus in that Persian Gulf city." Mills, whose work at the State Department was unpaid, was "officially designated as a temporary expert-consultant," which "allowed her to continue to collect outside income while serving as chief of staff." The Post calls the arrangement "another example of how Clinton as secretary allowed close aides to conduct their public work even as they performed jobs benefiting private interests," adding that the situation "raises questions about how one of the State Department's top employees set boundaries between her public role and a private job that involved work on a project funded by a foreign government."

ADMINISTRATION PLANS "MAJOR CHANGES" TO HEALTHCARE.GOV. In what the [New York Times](#) (10/13, Pear, Subscription Publication, 11.82M) says is at least a tacit acknowledgment of "the difficulties of some health care consumers," the Administration is planning to make "major changes to HealthCare.gov" in order to make it easier for consumers to find insurance plans in which their doctors are participating and to predict their healthcare costs for the next year. This, as officials are expecting that many consumers currently in ACA networks will have to switch plans and find new doctors due to "substantial premium increases coming in some states in 2016." According to the Times, "new features of HealthCare.gov will allow consumers to type in the names of their doctors, prescription drugs and preferred hospitals, and see which plans cover them, administration officials said."

OBAMA LAMENTS "US VERSUS THEM" MENTALITY AMONG SOME US CHRISTIANS. The [New York Review of Books](#) (10/12, 5K) website ran the first half of President Obama's September 14 conversation in Des Moines, Iowa with novelist Marilynne Robinson, one of the President's favorite writers. The transcript runs more than 3,900 words, and the remainder of the conversation will appear in the next issue. Media attention to the interview is limited, with wire sources and national newspapers mainly just noting that the interview was released – if they report on it at all – and saying that it was the latest unusual media move by the President. (Four sources mention his interview earlier this year with comedian Marc Maron, and several mention other appearances in non-traditional media.)

What coverage there is focuses largely on an exchange between the President and Robinson on faith and Christianity, which drew the attention of online conservative media. The talk also drew attention on Twitter, where [it was trending](#) Monday. Elizabeth Bruenig of the New Republic [called it](#) the "interviewer/interviewee match-up of the century," while CNN's Brian Stelter [termed it](#) "riveting," and HarperCollins executive editor Calvert Morgan [called Obama](#) "a president with the mind, soul, and humility to interview" the writer. But Carlos Lozada of the Washington Post [tweeted that](#) Obama showed "a brutally bleak view of religion in America" that [may have been](#) "another version of his 'cling to their guns and religion' thing."

[The Hill](#) (10/12, Fabian, 471K) reports that the President "lamented the rancorous, divided state of US politics" during the "unusual discussion." The Hill, as do many other outlets, quotes Obama as asking, "How do you reconcile the idea of faith being really important to you and you caring a lot about taking faith seriously with the fact that, at least in our democracy and our civic discourse, it seems as if folks who take religion the most seriously sometimes are also those who are suspicious of those not like them?" Robinson replied that "those 'turning in on themselves – and God knows, arming themselves' against an 'imagined other,' are not 'taking their Christianity seriously.'"

The [Washington Times](#) (10/13, Chasmar, 344K) reports that in the interview, Obama also "suggested that Christians who take their religion the most seriously often adopt an 'us versus them' mentality," and later in the interview said "that part of what makes America great is 'this nagging dissatisfaction that spurs us on.'" [Mediaite](#) (10/13, Feldman, 251K) similarly says that "as they spoke about religion, Obama brought up an 'us versus them' mentality amongst some Christians," a quote also carried by the [Daily Mail \(UK\)](#) (10/13, Rushing, 5.59M) on its website.

Jason Howerton of [The Blaze](#) (10/12, 1.66M) says "it was Obama's line of questioning about Robinson's Christian faith was grabbing people's attention on Monday." Conservative news site [WND](#) (10/13, 152K) says the interview "took a strange turn" with the discussion of faith, which WND calls "his comment on devout Christians." The [Daily Caller](#) (10/12, Guest, 375K) took a different tack, focusing on the President's claim "that 'Fox News and conservative media' make him 'seem scary.'"

The [AP](#) (10/13, 530K) said in its brief report that the two discussed "faith, democracy, education and writing," while the [Washington Post](#) (10/13, Jaffe, 6.76M) reports that faith was a major topic, but does not delve into it. Instead, the Post calls the interview "the most highbrow, at times the weirdest and, in moments, the most revealing" of Obama's recent "unconventional media moves." However, the Post does not say what was weird about the discussion.

[TIME](#) (10/12, 19.55M) says "the conversation focused on faith, politics and their intersection in Robinson's work, which has long concerned itself with Christian thought," and the President's questions "revealed nearly as much about him as it did about his interviewee." Time says Obama disclosed that "his outsider status during his first presidential campaign allowed him to connect with small-town America," and that "one of the biggest struggles of his political career has been bridging the gap between 'our common life and our political life.'"

[CNN Money](#) (10/12, 2.15M) reports on its website that Obama has "interviewed David Simon, the creator of HBO's 'The Wire,' on the enforcement of drug laws and over-policing" and science educator Bill Nye "on the dangers of climate change," and continued his unusual role as an interviewer with Robinson. CNN Money says Obama's "questions to Robinson illuminate his views on policy and the world around him," including that "being a good Christian is hard" and that government can and should have a positive role in Americans' lives.

[Slate](#) (10/12, 1.38M) writes that in the interview, "we encounter a lovely meshing of two like sensibilities: Obama, a creature of grassroots politicking, has a touch of" the "serenity" and "preference for the simple and the true" of one of Robinson's best-known protagonists, while Robinson, "in her musings on faith, channels a blend of idealism and realism that feels distinctly Obamian."

[Entertainment Weekly](#) (10/12, Holub, 11.48M) reports on its website that the two went "back-and-forth a bit about the value of pessimism in American culture." Emma Cueto of women's culture and news site [Bustle](#) (10/12, 2.33M) writes that Robinson "seems very much to admire Obama and the difficult political situation he has to navigate. Both are clearly deep thinkers, and their conversation is fascinating." The [Des Moines \(IA\) Register](#) (10/13, 310K) has a brief and straightforward item on the publication of the interview.

Editorial Wrap-Up:

NEW YORK TIMES. *"How To Keep People In Health Plans."* In an editorial, the [New York Times](#) (10/13, Board, Subscription Publication, 11.82M) considers the reasons behind the "sharp drop earlier this year in the number of people enrolled in health insurance plans purchased through federal and state marketplaces established under the Affordable Care Act." Some people were confused by "various notices telling them what information they need to submit to obtain subsidies," while many cited cost as a big factor. The Times calls for more states to expand Medicaid, along with "stronger outreach efforts" to help people understand what documents they need to provide.

"Is The Pentagon Telling The Truth About Afghanistan?" A [New York Times](#) (10/13, Subscription Publication, 11.82M) editorial says that new data from the UN "on the military advances by a resurgent Taliban is alarming for what it says about the deteriorating security situation in Afghanistan — and what it suggests about the American military's honesty about what is happening there." The Times argues that "as long as this country has troops and money invested in Afghanistan, Congress and the public need to hear the truth about how the mission is going."

"A Deal To Fix The Subways In New York." A [New York Times](#) (10/13, Board, Subscription Publication, 11.82M) editorial.

WASHINGTON POST. *"Iran's Ludicrous Conviction Of Jason Rezaian."* In an editorial on Iran's conviction of journalist Jason Rezaian, the [Washington Post](#) (10/13, 6.76M) laments the "showcase for the opacity, the brazen disregard for the rule of law and, ultimately, the sheer cruelty of Iran's Islamic regime," and adds that the entire "travesty ought to shame the Iranian government into releasing the journalist."

"Will Democratic Candidates Offer True Progress?" In an editorial, the [Washington Post](#) (10/13, 6.76M) argues that while the "net effect" of the "left-wing populism" being espoused by Sen. Bernie Sanders has been to push Democrats' "reigning ideology leftward," the "challenge for [Hillary] Clinton and her fellow candidates, starting Tuesday night, is to stand up for policy nuance in a party whose voter base seems impatient with it." The Post opines that the "candidates who distinguish themselves" during Tuesday's Democratic debate "will be those capable of explaining, persuasively, how they will convert their grand promises into tangible progress. Populism may get votes; pragmatism gets results."

"A Stinging Loss For The Washington Football Team." A [Washington Post](#) (10/13, Board, 6.76M) editorial.

WALL STREET JOURNAL. *"The Mullahs Say Thanks."* In an editorial, the [Wall Street Journal](#) (10/13, Subscription Publication, 5.95M) casts Iran's missile test as evidence of Iran viewing the recently reached nuclear deal as a sign of weakness on the West's part. The Journal notes that Friday was journalist Jason Rezaian's 444th day of captivity — the exact number of days US diplomats spent as hostages in 1979 and 1980 — and that the announcement of his conviction was surely a sign. The missile test, meanwhile, is cast as an indication that Iran will simply not abide by provisions it doesn't like, and that it believes it will be able to act with impunity.

"Rubio's Family Leave Gambit." The [Wall Street Journal](#) (10/13, Subscription Publication, 5.95M) says in an editorial that Marco Rubio has crafted a strong foreign policy agenda, but his domestic stances have been less encouraging. The Journal says Rubio has offered proposals on family leave and tax credits that echo the Democrats, rather than offering a principled conservative alternative.

"A Bad Tax Brainstorm." An editorial in the [Wall Street Journal](#) (10/13, Subscription Publication, 5.95M) decries the Organization for Economic Cooperation and Development's proposals to combat "base erosion and profit shifting," or BEPS, arguing that the OECD proposals are based on the premise that the world's fiscal problems are due to insufficient tax collection, rather than weak growth.

Week Ending October 9, 2015

NEW PUBLIC LAWS

Nothing to report.

LEGISLATIVE ACTIVITY

FLOOR ACTION

Nothing to report.

COMMITTEE ACTIVITY

October 7-8 – The House Committee on Natural Resources (Bishop) held a markup and approved the following bills of interest to the National Park Service:

- **H.R. 974** (Lummis, R-WY-At Large), to direct the Secretary of the Interior to promulgate regulations to allow the use of hand-propelled vessels on certain rivers and streams that flow in and through certain Federal lands in Yellowstone National Park, Grand Teton National Park, the John D. Rockefeller, Jr. Memorial Parkway, and for other purposes. The committee amended the bill to provide a definition of hand-propelled vessel and paddling and specify the applicable waters within the parks. The Department does not have a position on the bill as reported.
- **H.R. 1452** (Miller, R-FL-1), to authorize Escambia County, Florida, to convey certain property that was formerly part of Santa Rosa Island National Monument and that was conveyed to Escambia County subject to restrictions on use and reconveyance. The bill was reported without amendment. The Department could support the bill if amended to protect the undeveloped lands that were part of the conveyance.
- **H.R. 2270** (Heck, D-WA-10), to redesignate the Nisqually National Wildlife Refuge, located in the State of Washington, as the Billy Frank Jr. Nisqually National Wildlife Refuge, to establish the Medicine Creek Treaty National Historic Site within the wildlife refuge, and for other purposes. The committee amended the bill to establish a Medicine Creek Treaty National Memorial and place it under the jurisdiction of the U.S. Fish and Wildlife Service rather than the NPS. The Department does not have a position on the bill as reported.
- **H.R. 2406** (Wittman, R-VA-1), to protect and enhance opportunities for recreational hunting, fishing, and shooting, and for other purposes. The committee adopted amendments, among others, requiring a bison management plan at Grand Canyon NP, prohibiting the NPS from restricting recreational or commercial fishing access at Biscayne Bay NP unless done in coordination with the State of Florida, providing the option to use funds in the federal land disposal account for deferred maintenance activities, and clarifying language regarding the transportation of bows through the National Park System. The Department does not have a position on the bill as

reported.

October 8 – The Senate Energy and Natural Resources Subcommittee on Public Lands, Forests, and Mining (Barrasso) held a hearing on several bills, including the following bills of interest to the National Park Service:

- **S. 414** (Feinstein, D-CA), to provide for conservation, enhanced recreation opportunities, and development of renewable energy in the California Desert Conservation Area. The bill includes major expansions of Death Valley NP, Mojave National Preserve, and Joshua Tree NP, and also designates wilderness at Death Valley NP. The Department supports the bill with amendments.
- **S. 872** (Murkowski, R-AK), to provide for the recognition of certain Native communities and the settlement of certain claims under the Alaska Native Claims Settlement Act, and for other purposes. The Department opposes the bill because it would delay completing the Alaska Land Transfer Program.
- **S. 1955** (Murkowski, R-AK), to amend the Alaska Native Claims Settlement Act to provide for equitable allotment of land to Alaska Native veterans. The Department opposes the bill because it would delay completing the Alaska Land Transfer Program.

Steve Ellis, Deputy Director, Bureau of Land Management, was the Department's witness.

NEW BILLS INTRODUCED

Introduced on October 1:

H.R. 3668 (Cook, R-CA-8), to codify in law and expand certain off-highway vehicle recreation areas in the State of California, to designate as wilderness certain public lands in the State of California administered by the Bureau of Land Management, to expand the Death Valley National Park Wilderness and the San Geronio Wilderness in San Bernardino National Forest, to ensure the conservation and necessary management of wildlife in these wilderness areas, to establish the Mojave Trails Special Management Area in the State, and for other purposes.

Introduced on October 5:

H.R. 3683 (Clay, D-MO-1), to amend title 54, United States Code, to establish within the National Park Service the African American Civil Rights Network, and for other purposes.

Introduced on October 7:

H.R. 3707 (Tsongas, D-MA-3), to authorize the Secretary of the Interior, in consultation with the Groundwork USA national office, to provide grants to certain nonprofit organizations.

S. 2164 (Wyden, D-OR), to extend the secure rural schools and community self-determination program and to make permanent the payment in lieu of taxes program and the land and water conservation fund.

Introduced on October 8:

H.R. 3711 (Vargas, D-CA-51), to authorize the Secretary of Interior to conduct a special resource study of Chicano Park, located in San Diego, California, and for other purposes.

S. 2165 (Cantwell, D-WA), to amend title 54, United States Code, to permanently authorize the Land and Water Conservation Fund.

S. 2169 (Tester), to amend title 54, United States Code, to extend the Land and Water Conservation Fund.

S. 2177 (Cochran), to authorize the Secretary of the Interior to conduct a special resource study of the Medgar Evers House, located in Jackson, Mississippi, and for other purposes.

HILL VISITS & BRIEFINGS

October 6-7 – Margaret Goodro, Superintendent, Lake Clark NP and National Preserve and Brandon Flint, Legislative Specialist, met with staff of Sen. Dan Sullivan (R-AK); Sen. Lisa Murkowski (R-AK) and Rep. Don Young (R-AK-at large) as a courtesy and to update them on park issues.

PARK VISITS AND TOURS

October 3 – Rep. Carolyn Maloney (D-NY-12) visited Women’s Rights NHP with guests for a tour and overview by Chief of Interpretation Kimberly Szewczyk.

UPCOMING COMMITTEE ACTIVITY

October 20 – The Senate Energy and Natural Resources Committee (Murkowski) will hold a hearing to consider the following nominations:

- Mary L. Kendall, to be Inspector General at the Department of the Interior;
- Suzette M. Kimball, to be Director of the United States Geological Survey;
- Kristen Joan Sarri, to be an Assistant Secretary of the Interior (Policy, Management and Budget).

The hearing will take place in 366 Dirksen Senate Office Building at 10:00 a.m.

UPCOMING HILL VISITS AND BRIEFINGS

Nothing to report.

UPCOMING PARK VISITS AND TOURS

October 14 – Rep. Bruce Westerman (R-AR-4) and his staff will visit Hot Springs NP. They will discuss the future of the Bathhouse Row rehabilitation leasing program with Superintendent Josie Fernandez.

October 16 – Sen. Ben Cardin (D-MD) will participate in a groundbreaking ceremony for the Railroad Lift Bridge Restoration at the Chesapeake & Ohio Canal NHP.

October 15-16 - Staff of Sen. Maria Cantwell (D-WA) and Reps. Kay Granger (R-TX-12), Curt Clawson (R-FL-19), Jim Bridenstine (R-OK-1), Ted Yoho (R-FL-3), Mario Diaz-Balart (R-FL-25) and staff of the House Natural Resources Committee will visit Everglades National Park for an orientation and overview. The Everglades Foundation is hosting the group.

October 23 – Sen. Ben Cardin (D-MD) will provide remarks at the opening of the Piscataway Living Building, part of National Capital Parks–East.

Feinstein's Calif. desert bill draws mixed reviews

Phil Taylor, E&E reporter

Published: Friday, October 9, 2015

A bill by Sen. Dianne Feinstein (D-Calif.) to protect 1.4 million acres of deserts, mountains and woodlands in Southern California would cut off mineral development and stifle a key economic sector in San Bernardino County, a county elected official testified yesterday.

But a conservationist argued [S. 414](#), which would designate two new national monuments and six new wilderness areas and expand three national parks, is a "balanced approach to conservation" that would bolster tourism and is supported by environmentalists, elected officials, business leaders and off-highway recreation groups.

Both views were on display yesterday at a hearing of the Senate Energy and Natural Resources Subcommittee on Public Lands, Forests and Mining, which featured testimony on 10 public lands bills.

Feinstein said her bill "fulfills a commitment made two decades ago to preserve the magnificent desert landscapes of my home state." She said it carries 140 endorsements, including Riverside and Imperial counties, eight chambers of commerce, three public utility companies, and dozens of environmental and motorized recreation groups.

The hearing came less than a week before two top Interior and Agriculture department officials are set to attend a public meeting near Palm Springs to discuss calls for President Obama to protect most of the lands in Feinstein's bill by executive decree ([Greenwire](#), Oct. 7).

Feinstein in August asked the president to designate three national monuments -- Mojave Trails, Sand to Snow and Castle Mountains -- using his authority under the Antiquities Act.

San Bernardino County Supervisor Robert Lovingood said he opposes a national monument. He also aired concerns with Feinstein's bill, saying it could stifle mining opportunities and hamper a gold mine that could become California's second largest.

"The mining concerns and economic development are paramount to us," he said, noting that San Bernardino oversees roughly 100 mines. The federal government already owns 80 percent of the county, which prevents the collection of millions of dollars in property taxes, he said.

But Feinstein's bill drew support yesterday from Bureau of Land Management and Forest Service witnesses. It is endorsed by San Bernardino Supervisor James Ramos and Frazier Haney, conservation director for the Mojave Desert Land Trust, who called it a balanced approach.

Panel Chairman John Barrasso (R-Wyo.) said a presidential monument designation would be premature and unnecessarily large.

"It would not address the other uses of the land this legislation balances, including off-road vehicle recreation," he said. "Are there objects that need to be protected here by the president that really can't wait for the legislative process?"

Alaska lands controversy

Much of yesterday's debate centered on [S. 872](#), a bill by committee Chairwoman Lisa Murkowski (R-Alaska) and Sen. Dan Sullivan (R-Alaska) that would allow the five southeast Alaska Native communities of Haines, Ketchikan, Petersburg, Tenakee and Wrangell to organize as urban corporations and each receive 23,000 acres of land.

The bill was backed by Leo Barlow of the Southeast Alaska Landless Corp., who said 3,425 Alaska Natives who enrolled in those communities were deprived of owning acres around their traditional homelands under the Alaska Native Claims Settlement Act.

The 1971 settlement provided aboriginal Alaskans a payment of \$962.5 million and conveyed to them more than 44 million acres of federal land.

"We have been handicapped and literally denied 44 years of opportunity," Barlow said.

But the Obama administration opposes the bill, said BLM Deputy Director Steve Ellis, who testified that it "risks setting a precedent for other similar communities to seek to overturn administrative finality and reopen their status determinations."

Ellis said the administration supports fulfilling ANCSA entitlements as soon as possible.

Buck Lindenkugel, an attorney for the Southeast Alaska Conservation Council (SEACC), said his organization also opposes the bill because it would give portions of the Tongass National Forest to for-profit corporations.

"Our fundamental concern is maintaining the integrity of the Tongass," he said.

Murkowski said residents of the five communities have been denied the benefits received by other Alaska Natives and rejected Ellis' claim that her bill would set any precedents.

SEACC's concerns with Tongass selections are "unjustified fear," she added, because land selections would be overseen by the Interior secretary and need not occur within protected conservation areas in the forest.

Interior, Agriculture Departments to Join Senator Feinstein at Public Meeting to Hear Community's Vision for Conservation in the California Desert

WHITEWATER, Calif. – On Tuesday, October 13, U.S. Deputy Secretary of the Interior Michael Connor and U.S. Department of Agriculture Under Secretary for Natural Resources and Environment Robert Bonnie will join U.S. Senator Dianne Feinstein, as well as other federal, state, local and tribal officials, in a visit to the desert of Southern California.

At the invitation of Senator Feinstein, Connor and Bonnie will [attend Feinstein's public meeting to hear about the community's vision](#) for the management of public lands of the California desert, including the Senator's proposal to designate three new National Monuments: Sand to Snow National Monument, Mojave Trails National Monument, and Castle Mountains National Monument.

For more than twenty years, Senator Feinstein has led the effort to protect the special places of the California desert. Located less than 100 miles from the Los Angeles metropolitan area, the desert is a beloved resource for millions of people. This region is a popular destination for outdoor recreation, including, hiking, rock climbing, camping, and off-highway vehicle travel. The region is also home to a wide diversity of wildlife, spectacular mountains and dunes, important historical resources, and areas of cultural significance to local tribes.

Who: **Michael Connor**, U.S. Deputy Secretary of the Interior
Robert Bonnie, U.S. Department of Agriculture Under Secretary for Natural Resources and Environment
Dianne Feinstein, U.S. Senator

What: Community meeting on California desert conservation priorities

When: Tuesday, October 13, 2015
1:45 p.m. PDT – Media check-in
2:00 p.m. PDT – Public meeting begins

Where: Wildlands Conservancy Whitewater Preserve

9160 Whitewater Canyon Road
Whitewater, CA 92282

Media: Credentialed members of the media who are interested in attending are required to [RSVP here](#).

DOI in the News:

OFFICIALS TO CELEBRATE VALLES CALDERA'S TRANSITION. The [AP](#) (10/9) reports that "state, federal and tribal officials will be gathering this weekend to mark the official transition of Valles Caldera National Preserve to the National Park Service." Interior Secretary Sally Jewell will be "joined by members of New Mexico's congressional delegation, Native American leaders and other local officials for a celebration at the preserve Saturday." The article notes that "officials say public access is expected to increase with the change."

Additional coverage was provided by [Fronteras](#) (10/9), the [Santa Fe New Mexican](#) (10/9, 67K), the [Washington \(DC\) Times](#) (10/9, 344K), and [KRQE-TV Albuquerque \(NM\)](#) Albuquerque, NM (10/9, 36K).

INTERIOR ANNOUNCES NEW JERSEY OFFSHORE WIND LEASE SALE. The [CNS News](#) (10/9, 182K) reports that "the federal government is auctioning off 343,833 acres of offshore federal land for wind energy development on Nov. 9, with bidding coming from 13 companies deemed to be 'legally, technically and financially qualified' to participate." Interior Secretary Sally Jewell and BOEM Director Abigail Ross Hopper announced Wednesday that "343,833 acres offshore New Jersey will be offered for commercial wind energy development in a competitive lease sale on November 9, 2015." Jewell said, "On the heels of this summer's historic 'steel-in-the-water' milestone for the nation's first commercial offshore wind farm, today's announcement marks another major step in standing up a sustainable offshore wind program for Atlantic coast communities. This effort took significant engagement and cooperation with New Jersey and other stakeholders to advance clean energy development and reduce potential use conflicts, which moves us closer to harnessing the enormous potential of wind energy along the Atlantic coast."

DEMOCRATS BOYCOTT NATURAL RESOURCES MARKUP IN EFFORT TO RENEW LWCF. The [E&E Daily](#) (10/8, Subscription Publication) reports that "House Natural Resources Democrats yesterday afternoon ratcheted up pressure on Chairman Rob Bishop (R-Utah) to allow the committee to consider legislation to revive the Land and Water Conservation Fund, a popular land acquisition and recreation program." Democrats "boycotted the first part of a markup on a series of public lands bills to protest Bishop's decision to not allow the committee to vote on H.R. 1814, a measure from ranking member Raúl Grijalva that would permanently reauthorize the LWCF." Grijalva has "formally asked Bishop three times to consider his legislation, most recently last Thursday."

Meanwhile, [Politico Pro](#) (10/8) reports that "Robert Dillon, a spokesman for Energy and Natural Resources Chairwoman Lisa Murkowski, sees a contradiction in greens' argument in ME yesterday that the \$20 billion accumulated by the fund only exists in theory: 'So is [the Center for American Progress] and the rest saying that the provision in LWCF that allowed the \$20 billion balance to accrue on paper is meaningless? If, as they claim, the fund doesn't really exist, then they should have no objection with allowing that provision to remain expired. The money either exists or it doesn't. You can't complain that there isn't more money going into the fund, and then turn around and say the balance in the fund is meaningless.'"

Additional coverage of the LWCF was provided by the [Daily Inter Lake \(MT\)](#) (10/9, 51K), the [Missoulian \(MT\)](#) (10/9, 116K), the [Seattle Post-Intelligencer](#) (10/7, 560K) and the [Salem \(OR\) Statesman Journal](#) (10/7, 132K).

SENATE HOLDS HEARING ON DROUGHT RELIEF LEGISLATION. The [Palm Springs \(CA\) Desert Sun](#) (10/8, 99K) reports that "Thursday's Senate committee hearing on legislation to provide drought relief in the West showed why passing anything on this issue is so difficult." The hearing before the Senate Energy and Natural Resources Committee "focused on two bills to provide help to California's House-passed legislation sponsored by Rep. David Valadao, R-Hanford, Calif., and a proposal by Democratic California Sens. Dianne Feinstein and Barbara Boxer." Interior Deputy Secretary Michael Connor said "the administration opposes Valadao's bill, claiming it would impede drought responses and increase legal disputes." Connor said "the administration favors most of the provisions of the Senate bill but is concerned some provisions could spark legal challenges."

Additional coverage was provided by the [Salinas Californian](#) (10/8, 27K) and the [Courthouse News](#) (10/8, 7K).

Groups Lay Out Drought Proposals In Letter. The [E&E](#) (10/8) reports that "with the Senate Energy and Natural Resources Committee preparing to dig into a series of hot-button Western drought proposals this morning, a coalition of conservation groups yesterday put their asks on the table." According to the article, "staffers from the Theodore Roosevelt Conservation Partnership, Nature Conservancy, Trout Unlimited and sportsmen's organizations have been talking for months about how to better prepare for parched conditions in the drought-prone West and make sure that the environment doesn't get short shrift when times get tough." Now, their proposals are "laid out in a letter the groups sent yesterday to ENR Chairwoman Lisa Murkowski (R-Alaska) and ranking member Maria Cantwell (D-Wash.), whose hearing this morning is aimed at creating a West-wide drought package."

Deputy Secretary Connor: Water Management Should Not Depend On El Niño. In an op-ed for the [San Francisco Chronicle](#) (10/9, Subscription Publication, 3 35M), Interior Deputy Secretary Michael L. Connor writes that "hopes have been raised recently that a strong El Niño may end California's drought." But he argues that "pinning hopes on El Niño is not a solution to our long-term water shortages and it certainly is no substitute for the kinds of farsighted, aggressive drought response measures already instituted at the federal, state and local levels."

PUBLIC MEETING TO BE HELD ON CALIFORNIA DESERT PROTECTION PROPOSAL. The [Riverside \(CA\) Press Enterprise](#) (10/9, 303K) reports that "members of the public are invited to a meeting Tuesday, Oct. 13, with Obama Administration officials to voice their opinions on an effort by U.S. Sen. Dianne Feinstein to create national monuments in the California desert." Feinstein, has "introduced legislation to establish the Mojave Trails and Sand to Snow national monuments, more than 1 million acres all together." The legislation, called "the California Desert Conservation and Recreation Act of 2015, also includes designation of 250,000 acres of wilderness and additions to existing national parks." Interior Deputy Secretary Mike Connor are among the invited participants of the public hearing.

Additional coverage was provided by the [Victorville \(CA\) Daily Press](#) (10/8, Writer, 2K) and the [San Bernardino \(CA\) Sun](#) (10/8, 142K).

ALASKA OFFICIALS VISIT DC FOR MEETINGS. The [Alaska Native News](#) (10/8, 245) reports that Alaska Gov. Bill Walker "returned to Alaska Thursday after a day of meetings in Washington, D.C., with key Obama administration officials." Lieutenant Governor Byron Mallott "remained on Capitol Hill today to continue meetings with federal officials." Walker and Mallott "met with President Barack Obama's senior advisor, Brian Deese, and U.S. Department of Interior Secretary Sally Jewell about increasing oil production."

The [AP](#) (10/9, 2 28M) reports that Walker "lobbied members of President Barack Obama's administration on opening up parts of an Alaska refuge to oil drilling." Walker told Interior Secretary Sally Jewell "his hopes of filling the trans-Alaska pipeline with oil drilled from a small section of the Arctic National Wildlife Refuge." But "he says both Jewell and the president have told him the proposal would be met with a lot of pushback."

Additional coverage was provided by [KTOO-FM Juneau \(AK\)](#) Juneau, AK (10/8).

OBAMA ADMINISTRATION SUPPORTS WILDFIRE DISASTER FUNDING ACT. The [Spokane \(WA\) Spokesman-Review](#) (10/8, 183K) reports that "this year, as it has eight times in the last 13 years, the Forest Service was forced to borrow from its thinning and forest-preservation programs to pay for firefighting." According to the article, "though the \$700 million the agency transferred this summer was eventually reimbursed in the budget bill passed last week, Forest Service Chief Tom Tidwell said the borrowing is disruptive to the planning and execution of programs." The Obama Administration and all Washington and Idaho House representatives support the Wildfire Disaster Funding Act.

GOVERNORS, AGS DISAGREE ON OBAMA POLICIES. The [Wall Street Journal](#) (10/9, Kendall, Harder, Subscription Publication, 5.95M) reports on disagreement between governors and attorneys general about litigation over Obama Administration policies in states where those officials are from different parties. The Journal says that have one part of a state government preparing to implement regulations while another is trying to stop them could send differing messages to courts, the state's citizens, and other states.

MCDONALD'S RENAMES HAMBURGER TO "DENALI MAC." The [Greenwire](#) (10/8, Subscription Publication) reports that "the mountain of beef named after North America's tallest peak is changing its name to match its namesake's new moniker." According to the article, "the extra-large McKinley Mac, which replaces a typical Big Mac's hamburgers with two quarter-pounders, will now be called the Denali Mac at Alaska McDonald's restaurants."

NOAA SAYS CLIMATE CHANGE IS CAUSING CORAL BLEACHING. The [CBS Evening News](#) (10/8, story 9, 2:20, Pelley, 5.08M) reported the National Oceanic and Atmospheric Administration "sounded the alarm about coral, home to about a fourth of all the life in the oceans," on Thursday. Jeff Glor reported coral is bleaching, which "occurs when coral is exposed to warmer-than-normal water. The coral gets stressed and loses its coat of protection. If the coral remains exposed for long periods of time, it can die. NOAA says climate change is the primary cause." Bleaching started in the Pacific and Indian oceans last year "and NOAA says the Caribbean is next."

ADDITIONAL COVERAGE SECRETARY JEWELL ANNOUNCES \$186 MILLION SETTLEMENT OF TRIBAL TRUST LAWSUIT. Additional coverage of the trust settlement with the Chickasaw Nation and Choctaw Nation was provided by the [Talequah \(OK\) Daily Press](#) (10/9, 20K).

STATE TAKEOVER OF PUBLIC LANDS CRITICIZED. For the "Congress" blog of [The Hill](#) (10/9, Fosburgh, 471K), Whit Fosburgh, the president and CEO of the Theodore Roosevelt Conservation Partnership, writes that "the notion that our federal lands would be better managed by individual states is fundamentally flawed." Fosburgh warns that "if we were to transfer America's public lands to individual states, millions of acres would be sold off to billionaires and global corporations—people who neither understand nor value America's future or outdoor heritage." Fosburgh acknowledges that "America's public lands are not managed perfectly, and there are real management issues that need to be addressed," but he concludes that "the idea that federal public lands should be handed over to individual states is not only flawed, it is never going to happen."

USE OF ANTIQUITIES ACT SUPPORTED. In an op-ed for the [High Country \(CO\) News](#) (10/9, 74K), Roger Clark, a program director of the Grand Canyon Trust, supports the use of the Antiquities Act to safeguard against "those who would trash our national treasures." He argues that "with Congress deadlocked, the president needs the flexibility to act when our nation's crown jewels need protection from previously unrecognized threats." Clark concludes that "if ever a law existed to fight the thieves of time, the Antiquities Act is it."

Empowering Native American Communities:

FEDERAL RECOGNITION PUT ON HOLD FOR PAMUNKEY INDIAN TRIBE. The [Washington Post](#) (10/9, Heim, 6.76M) reports that "the Pamunkey Indians, who claim Pocahontas as an ancestor and in July became the first state tribe to receive federal recognition, are facing a last-minute challenge by a California-based group that previously allied with casino giant MGM Resorts to try to block their bid." Stand Up for California, "a one-person nonprofit organization run by Cheryl Schmit, filed a request for reconsideration to the Interior Board of Indian Appeals on Tuesday, the last day of a 90-day window to appeal the Bureau of Indian Affairs's decision to award the Pamunkey federal recognition." The action "could delay or even derail the tribe's goal of federal recognition, a status it has been seeking for more than three decades."

BIA TO TIGHTEN GRIP ON LOWER BRULE SIOUX TRIBE'S MONEY AMID INVESTIGATIONS. The [AP](#) (10/9, 37K) reports that the BIA is "changing the way it sends money to South Dakota's Lower Brule Sioux Tribe amid allegations of financial mismanagement by the tribe in recent years." The bureau said "in a letter to the tribe that it plans to distribute money for contracted social services and other programs on a monthly basis, rather than in a lump sum on Oct. 1 as is typically done."

COURT TOSSES EX-PICAYUNE RANCHERIA OF CHUKCHANSI INDIANS COUNCILMAN'S LAWSUIT.. [Law 360](#) (10/9, 21K) reports that "a California federal court on Wednesday tossed an ex-Picayune Rancheria of Chukchansi Indians councilman's suit targeting the Bureau of Indian Affairs over his allegedly unconstitutional removal from the tribe's council, finding that it lacks jurisdiction to interfere in the intra-tribal matter." U.S. District Judge William B. Shubb said that "Patrick Hammond III's key claims involve tribal law and internal governance — areas outside of federal jurisdiction."

COURT HEARS ARGUMENTS ON ALASKA'S TRIBAL TRUST LAND APPEAL. [Law 360](#) (10/9, 21K) reports that "the federal government urged the D.C. Circuit on Thursday to toss the state of Alaska's bid to overturn a decision that would allow the U.S. Department of the Interior to take land into trust for Alaska Native tribes, arguing that the DOI's revision of the rule the state is challenging rendered the appeal moot."

HASKELL INDIAN NATIONS UNIVERSITY FORMALLY RESOLVES TO GAIN MORE AUTONOMY.. The [Lawrence \(KS\) Journal World](#) (10/8, 42K) reports that "Haskell Indian Nations University has formally resolved to move toward more autonomy from the federal government, including studying the possibility of becoming federally chartered instead of federally operated." The Haskell Board of Regents on Thursday "approved a resolution to study ways for increasing Haskell's autonomy and authority, and to pursue permanent legislation that would enable Haskell to establish an Endowment Association."

BUG-O-NAY-GE-SHIG SCHOOL BOARD HEAR FROM NEWLY HIRED STAFF. The [Bemidji \(MN\) Pioneer](#) (10/9, 27K) reports that Bug-O-Nay-Ge-Shig School Board members "heard from newly hired staff at Thursday's meeting and discussed how to resolve the need for mental health counselors at the school." The article notes that "the high school topped the agenda at the August school board meeting, discussion focused on a congressional letter of support addressed to the U.S. Department of the Interior signed by U.S. Sens. Amy Klobuchar and Al Franken and Reps. John Kline, Tim Walz, Erik Paulsen, Betty McCollum, Keith Ellison, Tom Emmer, Collin Peterson and Rick Nolan urging the department to consider putting the Bug-O-Nay-Ge-Shig school on a list of Bureau of Indian Education schools to receive funding."

Office of Insular Affairs:

ASSISTANT SECRETARY KIA'AINA VISITS CNMI. The [Saipan \(MNP\) Tribune](#) (10/9, 641) reports that Education Commissioner Dr. Rita Sablan met Tuesday with Esther Kia'aina, the U.S. Department of the Interior assistant secretary for insular affairs, and "discussed three Interior-funded projects: the Marianas High School's solar energy bid project, the 'Connect Youth to Career' program, and the deferred maintenance project." Kia'aina on Tuesday also "visited the Northern Marianas College and the Commonwealth Utilities Corp., among others." According to the article, "during her trip in the CNMI, which reportedly ended yesterday, she focused on what the CNMI plans for its hazardous mitigation plans, and committed on Wednesday to find remaining Interior fiscal 2015 funds, including for Capital Improvement Projects, for reprogramming to meet the immediate needs of the Northern Marianas."

The [Fiji Times](#) (10/9, 893) reports that Kia'aina has "advised CNMI lawmakers to discuss local labour and immigration issues with members of the US Congress, according to Speaker Joseph Deleon Guerrero."

ASSISTANT SECRETARY KIA'AINA TO LOOK INTO UNEMPLOYMENT AID ISSUE. The [Marianas Variety](#) (10/9) reports that Assistant Interior Secretary for Insular Affairs Esther Kia'aina "on Wednesday said she will look into the law that bars guest workers from seeking unemployment insurance assistance." She said, "That [issue] was brought to my attention only yesterday by the U.S. Department of Labor. I have to talk to the CNMI first.... I will leave it to the governor and his team to determine whether or not they want to federally authorize an unemployment insurance program. It is an important issue but I need you to know that the whole population is impacted and it's been challenging for the U.S. Department of Labor to have those issues addressed."

ADDITIONAL COVERAGE 902 LETTER SENT TO WHITE HOUSE. Additional coverage of Gov. Eloy S. Inos' 902 letter was provided by the [Saipan \(MNP\) Tribune](#) (10/9, 641).

Tackling America's Water Challenges:

BOR CONDUCTING TECHNICAL REVIEW OF GOLD KING MINE SPILL. [Politico Pro](#) (10/8) reports that the Interior Department will "conduct a wide-ranging technical review of the Animas River spill accidentally caused by EPA workers in August at the Gold King mine in Colorado, according to a Superfund work form obtained by POLITICO through a Freedom of Information Act request." According to the article, "the Aug. 20 document for the first time outlines how Interior's Bureau of Reclamation will conduct its review, for which \$125,000 has been allocated." The article notes that "the review is focused on technical matters rather than legal issues like potential negligence."

EPA Under Fire After Reports Of New Colorado Mine Spill. The [Washington Times](#) (10/9, Richardson, 344K) reports that the EPA is under fire amid "reports of another spill from a clean-up project at a Colorado mine, this time a relatively small discharge at the Standard Mine near Crested Butte." Local officials "have confirmed that more than 2,000 gallons of reportedly uncontaminated water were spilled from the mine side Wednesday into a local watershed." Josh Green, spokesman for Rep. Scott Tipton, "said the accident, coming on the heels of the Aug. 5 blowout at the Gold King Mine, raises more questions about the agency's competence and commitment to transparency." According to Green, "the EPA has yet to notify his office a day after the accident, which was first reported Thursday by the Crested Butte News."

Securing America's Energy Future:

Onshore Energy Development:

HOUSE APPROVES BILL TO SPEED UP TRIBAL ENERGY PROJECTS. [The Hill](#) (10/9, Henry, 471K) reports a bill was approved on Thursday by the House "to speed up energy development on Native American land and for Alaska natives." The bill "passed on a 254-173 vote, with about a dozen Democrats voting in favor." The bill "promotes energy production on Indian lands by streamlining the federal permitting process for tribal energy projects." The Interior Department under current law "is required to sign off on any lease a tribe might sign with an energy company." The legislation "looks to cut back on the permitting procedure for those leases."

Additional coverage was provided by the [Arizona State University Cronkite News](#) (10/8) and the [Daily Caller](#) (10/9, Bastasch, 375K).

JUDGE SETS NOVEMBER 23 DEADLINE FOR DECISION ON BADGER-TWO MEDICINE DRILLING LEASE. [Montana Public Radio](#) (10/9) reports that "a U.S. District Court judge today gave the federal government until November 23 to decide whether a Louisiana company can drill for oil and gas on National Forest land in the Badger Two-Medicine area adjacent to Glacier National Park." Judge Richard Leon "rejected the timeline Interior proposed, saying it could potentially draw out the process for another two years."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (10/9, 2 28M), [KULR-TV Billings \(MT\)](#) Billings, MT (10/9, 2K), and [KPLC-TV Lake Charles \(LA\)](#) Lake Charles, LA (10/9, 53K).

Offshore Energy Development:

UNESCO SAYS SHELL'S ARCTIC DRILLING THREATENED WORLD HERITAGE SITE. [Alaska Dispatch News](#) (10/9, 219K) reported that the United Nations Educational, Scientific and Cultural Organization (UNESCO) has "cheered" Shell's decision to halt its exploratory oil drilling in the Arctic because the drilling threatened Russia's Wrangel Island Reserve, the only designated World Heritage site in the Arctic. Said UNESCO in a statement on Wednesday, "This Arctic jewel, and the wealth of wildlife it supports, were threatened by Shell's Chukchi Sea operations." Although Shell's Burger prospect is about 360 miles from Wrangel Island, "an oil spill from the targeted Shell site could send a plume into the Wrangel Island Reserve buffer zone, UNESCO said, citing environmental analysis by the Bureau of Ocean Energy Management."

Clinton's Split From White House On Arctic Drilling Noted. On its website, [ABC News](#) (10/9, Kreutz, 3.97M) reported on seven ways Hillary Clinton "has already distanced herself from the White House in the past six months as a candidate." One of the seven ways is that Clinton has "split from Obama with her opposition to the Keystone XL pipeline and Arctic drilling." Over the summer, Clinton "spoke out against off-shore drilling in the Arctic Ocean one day after the Obama administration gave Shell the go ahead to drill for oil and gas there." ABC added that "both Democratic presidential candidates Bernie Sanders and Martin O'Malley had been vocal opponents on the two issues for months."

Deseret News: Shell's Arctic Department Indicator Of Changing Energy Picture. In an editorial, the [Deseret \(UT\) News](#) (10/9, 407K) writes that Shell's decision to leave the Arctic "represents neither a triumph for conservationists or a foreshadowing of a future oil crisis due to supply shortages," but "is rather an indicator of a dramatically changing energy picture influenced more by market forces than by regulatory policy." What Shell's decision "quite possibly does reflect, however, is that the long-term trajectory of demand and supply is taking a new course, and those who set national energy policy should consider the ramifications." The paper writes that "it is too soon to place a bet one way or the other on the future of big oil," and "essential the nation pursue an energy policy that is balanced and not based on an either-or proposition that serves to eliminate or elevate use of oil."

Commentary: Obama Cannot Fight Climate Change While Developing Fossil Fuels. In commentary carried by the [Irish Times](#) (10/9, Goldenberg, 371K), Suzanne Goldenberg, US environmental correspondent of the Guardian, writes that "it's time that" President Obama "said out loud what has long been recognised: waging an effective fight against climate change while developing new fossil fuel reserves just can't be done."

WEST COAST DEMOCRATIC SENATORS AIM TO BAN OFFSHORE DRILLING ON OUTER CONTINENTAL SHELF. The [E&E Daily](#) (10/8, Subscription Publication) reports that "the Senate delegations of California, Oregon and Washington reintroduced a bill yesterday that would ban offshore drilling along the West Coast." Democratic Sens. Barbara Boxer and Dianne Feinstein of California, Maria Cantwell and Patty Murray of Washington, and Ron Wyden and Jeff Merkley of Oregon "announced the 'West Coast Ocean Protection Act,' aimed at getting a permanent moratorium against drilling off the coast."

America's Great Outdoors:

Bureau of Land Management:

SAGE GROUSE INJUNCTION SOUGHT. The [Elko \(NV\) Daily Free Press](#) (10/9, 22K) reports that "the county is seeking an injunction against the federal government's Sept. 22 decision on land management concerning sage grouse habitat." According to the article, "Western Exploration LLC, Elko and Eureka counties and Quantum Minerals LLC filed the lawsuit Sept. 23 in U.S. District Court." The injunction was set for a hearing in Reno on Nov. 12.

Additional coverage was provided by [KNPR-FM Las Vegas \(NV\)](#) Las Vegas (10/9, 1K).

Federal Sage Grouse Plans Criticized For Abandoning Scientific Integrity. For the "Pundits" blog of [The Hill](#) (10/9, Molvar, Contributor, 471K), Erik Molvar, the Sagebrush Sea Campaign Director for WildEarth Guardians, writes that the new federal sage grouse plans "unveiled this September abandon scientific integrity." According to Molvar, "instead, a collection of special political favors for the oil and gas industry and other industries actually block sage grouse habitat protections from addressing the most important threats — and most powerful industries — in each state." He says that "the Interior Department should have stuck with the science and created an honest and forthright conservation strategy."

Additional Coverage. Additional coverage of the sage grouse was provided by the [Colorado Statesman](#) (10/9, 17K).

ADDITIONAL COVERAGE BLM UNVEILS MAP OF MOUNTAIN BIKE TRAILS. Additional coverage of the BLM's map of mountain bike trails was provided by the [Moab \(UT\) Sun News](#) (10/9) and the [Ruidoso \(NM\) News](#) (10/8, 39K).

Fish and Wildlife Service:

PHILADELPHIA DESIGNATED AS URBAN WILDLIFE REFUGE PARTNERSHIP CITY. [KYW-TV](#) Philadelphia (10/8, 45K) reports that "students from the Pennrose Elementary School gave nature a little lift with the release of Monarch butterflies to celebrate grants for more environmental activities in the vicinity of the John Heinz Wildlife Refuge." FWS Director Dan Ashe came to Pennrose "to announce the designation of Philadelphia as an Urban Wildlife Refuge Partner City and the release of some \$200,000 in grants." Ashe says "some of the funds also will support improvements to the network of trails leading to the refuge and neighborhood green spaces."

FWS PROVIDES GRANTS TO COMBAT DEADLY BAT DISEASE. The [Ruidoso \(NM\) News](#) (10/8, 39K) reports that "officials with the U.S. Fish and Wildlife Service announced last week that an additional \$2.5 million in grants has been awarded for research, management and communications projects about the white nose syndrome that has killed more than five million North American bats." The funds "aim to further the effort to stop the spread of the deadly fungal disease first documented in New York in 2007, and to protect colonies of flying mammals that are critical to the economy and environment." The FWS "provided grants to 26 projects in federal agency projects to increase capacity for research and response to WNS; for research and communication projects, \$30,000 or less each, for non-U.S. federal applicants; and research projects to address priorities

established by multi-agency working groups under a national response plan for WNS."

GROUPS FILE NOTICE OF PLAN TO SUE OVER BULL TROUT PLAN. The [AP](#) (10/9, 2.28M) reports that "a federal plan to bolster threatened populations of bull trout in five Western states falls short, two conservation groups said as they filed notice of their intention to sue the government." The plan "to aid the fish's recovery violates the Endangered Species Act, the groups Alliance for the Wild Rockies and Friends of the Wild Swan said in a notice Wednesday to Interior Secretary Sally Jewell." The FWS "last month released a proposal outlining ways to boost bull trout populations in Idaho, Oregon, Washington, Montana and a tiny portion of Nevada," but "the groups say the plan doesn't set measurable goals for removing the species from the endangered list."

Additional coverage was provided by [NPR](#) (10/8, 1.85M), the [Washington \(DC\) Times](#) (10/9, Ridler, 344K), the [Centralia \(WA\) Chronicle](#) (10/9, 903), the [Daily Inter Lake \(MT\)](#) (10/9, 51K), the [Oregonian](#) (10/9, 756K), [KIVI-TV Boise \(ID\)](#) Boise, D (10/9, 861), [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (10/9, 494K), [KTVB-TV Boise \(ID\)](#) Boise, ID (10/8, 191K), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (10/9, 494K).

GROUPS SEEK RELEASE OF MORE MEXICAN WOLVES. The [AP](#) (10/9, 2.28M) reports that "more than three dozen environmental groups asked the federal government Thursday to release at least five packs of Mexican gray wolves in New Mexico to bolster the genetics of the endangered predators." The groups sent a letter to Interior Secretary Sally Jewell and FWS Director Dan Ashe. The move "came after New Mexico wildlife officials declined to issue permits to the Fish and Wildlife Service for releases earlier this year in Gila National Forest."

Additional coverage was provided by the [Albuquerque \(NM\) Journal](#) (10/9, 259K), the [San Francisco \(CA\) Chronicle](#) (10/9, Subscription Publication, 3.35M), and the [Washington \(DC\) Times](#) (10/9, Bryan, 344K).

FWS SEEKS PUBLIC INPUT ON PLANNING ACCESS TO RATTLESNAKE MOUNTAIN. The [Tri-City Herald \(WA\)](#) (10/9, 100K) reports that the FWS is seeking comments on access to Rattlesnake Mountain. As the agency "makes plans to comply with a new federal law requiring that the public be allowed on the mountain, it's asking for comments on the best way to provide access and holding open houses on Oct. 14 to share information."

STUDY HIGHWAY RUNOFF KILLS SALMON BUT FILTERS CAN HELP FISH SURVIVE. The [AP](#) (10/9, 2.28M) reports that "toxic runoff that flows from highways into urban streams is killing coho salmon in Puget Sound, but simple filtering methods can help fish survive, a new study finds." According to the study published Thursday in the *Journal of Applied Ecology*, "salmon exposed to untreated highway runoff in controlled experiments became lethargic, lost their orientation and died within hours." The article notes that "the study included researchers from NOAA Fisheries, U.S. Fish and Wildlife Service, Washington State University and the Squamish Tribe."

Additional coverage was provided by the [Seattle \(WA\) Post-Intelligencer](#) (10/8, 560K), the [San Francisco \(CA\) Chronicle](#) (10/9, Subscription Publication, 3.35M), the [Washington \(DC\) Times](#) (10/9, Le, 344K), and [KCPQ-TV Seattle \(WA\)](#) Seattle (10/8, 161K).

THREAT OF LISTING ENCOURAGES COLLABORATION. In his column for the [Idaho Statesman](#) (10/8, 190K), Rocky Barker writes that "using the federal Endangered Species Act as a shield rather than a sword has had some success this year." He notes that "the threat of listing brought about an incredible conservation effort by private landowners, 11 states and the federal government to protect sage grouse and a determination it didn't need listing." Also, on Wednesday, the FWS "determined the Southern Idaho ground squirrel, Goose Creek milkvetch, and the Great Basin population of the Columbia spotted frog were dropped from candidate species status."

National Park Service:

BILL WOULD INCREASE FUNDING TO NPS FOR CENTENNIAL. The [Deseret \(UT\) News](#) (10/9, 407K) reports that the NPS "turns 100 next year, and the White House hopes this seniority merits a pay raise from Congress." According to the article, "a proposed bill — introduced Sept. 18 — aims to relieve some of the agency's financial strain by establishing a fund to finance 'signature projects and programs to enhance the National Park System as it approaches its centennial in 2016 and to prepare the parks for another century of conservation, preservation, and enjoyment.'" The legislation "asks for a \$900 million fund for infrastructure spending, with an additional \$300 million to be allocated for 'signature' projects that parks will use to mark the centennial."

WATCHDOG REPORT ASSESSES MANAGEMENT OF VIP LODGE AT GRAND TETON NATIONAL PARK. The [Greenwire](#) (10/8, Subscription Publication) reports that the NPS "lost out on tens of thousands of dollars in potential revenue by not billing visitors to a government-owned lodge in Wyoming's Grand Teton National Park, the Interior Department's internal watchdog will report today in a stern assessment of the agency's management and operation of the facility." The report, "signed off by Interior Deputy Inspector General Mary Kendall and expected to be released today, provides a comprehensive look at how the Park Service has utilized the Brinkerhoff Lodge in Grand Teton National Park." The article notes that "the lodge attracted controversy last year when Time first reported that Vice President Joe Biden, former U.S. EPA Administrator Lisa Jackson, NPS Director Jon Jarvis and other senior officials had stayed at the four-bedroom log cabin located on the shore of Jackson Lake, seemingly for vacation at little or no cost to them."

Additional coverage was provided by [Politico](#) (10/9, Wolff, 942K) and [The Hill](#) (10/9, Cama, 471K).

HOUSE PANEL PASS MEASURE LIFTING BAN ON PADDLING YELLOWSTONE STREAMS. The [Spokane \(WA\) Spokesman-Review](#) (10/8, 183K) reports that the U.S. House Natural Resources Committee voted Thursday "to approve a controversial measure that would lift longstanding restrictions and allow kayaks, rafts and other 'hand-propelled' vessels to be used on hundreds of miles of rivers and streams in Yellowstone and Grand Teton national parks." The article notes that "conservation and angling groups opposed the changes."

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/9, Brown, 344K) and the [Casper \(WY\) Star-Tribune](#) (10/9, 115K).

NPS CLOSING LANDMARK BRIDGE AT ANTIETAM FOR REPAIRS. The [AP](#) (10/9, 2.28M) reports that the NPS says "it's closing the landmark Burnside Bridge at the Antietam National Battlefield for major repairs that will continue at least into next spring." Park managers said Thursday that "they will close the bridge Friday for the \$1.7 million preservation project."

NPS APPROVES PROGRAM ALLOWING LODGING DURING WINTER IN BRYCE CANYON NATIONAL PARK. [KSL-TV](#) Salt Lake City (10/9, 494K) reports that "for the first time since it was founded, Bryce Canyon National Park will have lodging available inside the park during the winter months." The NPS "approved a pilot program that will allow up to 35 motel rooms to remain open throughout the 2015-2016 winter season, according to the Bryce Canyon National Park website."

JUDGE GRANTS EXTENSION FOR ASSESSMENT OF ARKANSAS HOG FARM. The [AP](#) (10/9, 2.28M) reports that "a judge is giving two federal agencies more time to assess the environmental impact of a northern Arkansas hog farm in the Buffalo National River watershed." The judge "granted a three-month extension Wednesday to the U.S. Department of Agriculture Farm Services Agency and the U.S. Small Business Administration." According to the article, "the agencies had asked for the extension, citing 'an unexpectedly large' amount of public comments on a draft environmental assessment of C&H Hog Farms in Mount Judea."

OFFICIALS CONFIRM PNEUMONIA OUTBREAK IN JOSHUA TREE BIGHORN SHEEP. The [Palm Springs \(CA\) Desert Sun](#) (10/8, 99K) reports that "Joshua Tree National Park officials Thursday confirmed a pneumonia outbreak in the park's bighorn sheep population." According to officials, "biologists have a formed an interagency task-force to monitor outbreaks, suggest best practices for limiting the range and effects of the disease and provide recommendations for management actions."

NPS TO HONOR BLACK FLORIDIAN CONSERVATIONIST. The [Fort Lauderdale \(FL\) Westside Gazette](#) (10/9, 86K) reports that "the Joneses bought their first island in Biscayne Bay in 1897 and lived there continuously until 1992." According to the article, "in the course of nearly a century, the African American family carved a prosperous livelihood out of limestone rock; raised two sons fluent in the language of land and sea; consorted with American presidents and elites, and ultimately saved the Bay to create Biscayne National Park." On Monday, Oct. 12, 2015 the NPS will "honor the family's youngest son, Sir Lancelot Jones, who resisted the blandishments of real estate developers and sold his island intact to the Service in 1970s."

YOSEMITE CELEBRATES ANNIVERSARY. The [Merced \(CA\) Sun-Star](#) (10/9, 35K) reports that Yosemite National Park "on Oct. 1 welcomed approximately 1,500 people to its birthday party." Scott Gediman, Yosemite public affairs officer, "opened the program." During the ceremony, free park entrance passes were given "to fourth-graders, as part of a new White House initiative."

HISTORIC TIMPANOGOS CAVE MARKER UNCOVERED BY CONSTRUCTION CREWS. [KSL-TV](#) Salt Lake City (10/9, 494K) reports that "the installation of a new water line in American Fork canyon has resulted in a historic find." Timpanogos Cave National Monument Crews lifted the original boundary marker "out of the ground and people are still wondering why it was buried in the first place." Cami McKinney, a historian at Timpanogos Cave National Monument, said "the marker was replaced during the era when the National Park Service went from being administered by the Forest Service to the Department of the Interior."

NPS DENIES BID FOR FERRY SERVICE TO CUMBERLAND ISLAND HAS BEEN AWARDED. The [Brunswick \(GA\) News](#) (10/9, 45K) reports that "there is some confusion over whether the National Park Service has actually awarded the bid for ferry service to Cumberland Island." Calvin Lang, "the vendor who has provided passenger ferry service to

Cumberland Island National Seashore the past 25 years," believes he has been awarded the contract. But Bill Reynolds, a spokesman at the NPS' regional offices in Atlanta, said "the contract has not been formally awarded and he could not confirm Lang will provide the ferry service for the next decade."

GW MEMORIAL PARKWAY CONSTRUCTION TO CLOSE RAMP AT DCA THIS WEEKEND. The [Del Ray \(VA\) Patch](#) (10/9, Barton, 719) reports that on Saturday, the FHWA and the National Park Service will pave the northbound exit ramp connecting Ronald Reagan Washington National Airport to the George Washington Memorial Parkway. The road work is slated to begin at 7 a.m. and be completed by 7 p.m.; the exit ramp will be closed during the paving. According to the article, the paving work is part of a larger project on the GW Parkway and Route 233 bridge, which "will allow for better access to and from the airport, and add safety improvements to sidewalks and trails for pedestrians."

Changes Planned For Mount Vernon Trail. [Greater Greater Washington](#) (10/9, Russell) reports on the changes planned for a section of the Mount Vernon Trail, which runs alongside Reagan National Airport. The article says that there are three changes planned for the trail: "it's moving away from the George Washington Parkway where it passes under the Route 233 bridge, it's getting a new barrier wall under the Metro bridge that carries the Yellow and Blue lines into the airport, and it's moving around a large tree that forces a quick S curve."

GREAT SMOKY MOUNTAINS NATIONAL PARK RECOGNIZES VOLUNTEERS. The [Knoxville \(TN\) Daily Sun](#) (10/9) reports that "Great Smoky Mountains National Park has recognized two volunteers who received regional and national awards for their service to the park." Tom Harrington was "recognized as the Southeast Regional Enduring Service Award recipient." Harrington has "served more than 20,000 hours in the Cades Cove area of the park." Also, Sterling Fisher has "volunteered for over 10 years throughout the park and was recognized as the Southeast Regional Youth Volunteer Awards and the National George and Helen Hartzog Youth Volunteer Award recipient."

STUDENTS HELP WITH DRAGONFLY MERCURY PROJECT. The [Daily Astorian \(OR\)](#) (10/8, 23K) reports that "Astoria High School biology students waded into the Yeon easement pond near Sunset Beach last week to collect dragonfly larvae for a National Park Service project." The larvae, "known as nymphs, were collected to determine their mercury levels, which help show overall levels in the national park ecosystems." The Dragonfly Mercury Project "relies on the national parks partnering with citizen scientists, such as the students, to compile the data." The article notes that "Lewis and Clark National Historical Park in Astoria is one of more than 50 national parks across the country to partake in the project" and "it is the only national park in Oregon to join."

NPS SHARES VIDEO FEATURING "RANGER RYAN" ON YOUTUBE. The [Lost Coast Outpost \(CA\)](#) (10/9) links to a video, featuring "Ranger Ryan," that was uploaded to the Redwood National Park Service's YouTube page a couple weeks ago.

CALVARY'S STEWARDSHIP OF YELLOWSTONE MIGHT HAVE PRESERVED NATIONAL PARK SYSTEM. The [Smithsonian](#) (10/9, 315K) reports that "before the National Park Service, Yellowstone was guarded by the cavalry." According to the article, "without them, we might not have national parks today."

ADDITIONAL COVERAGE PAINTING OF LINCOLN'S ASSASSINATION BEING RESTORED. Additional coverage that Carl Bersch's "Lincoln Borne By Loving Hands" is being restored was provided by the [Smithsonian](#) (10/9, 315K).

NO-FISHING ZONE IN BISCAYNE NATIONAL PARK CRITICIZED. In an op-ed for the [Miami Herald](#) (10/9, 651K), Rep. Ileana Ros-Lehtinen criticizes "the inclusion of a no-fishing zone in Biscayne National Park's General Management Plan (GMP)." She says that "putting a no-fishing zone at the forefront of Biscayne's coral-protection strategy would seem to suggest that NPS believes fishing is the primary threat to our reefs." However, "scientists have determined that poor water quality and periodic extreme water temperatures are responsible for most coral losses in Biscayne over the last two decades." She urges the NPS "to develop a GMP for Biscayne that can actually deliver the conservation benefits it's designed to provide, and do so with the support of all stakeholders in our community — the type of GMP that neighboring Everglades National Park recently proposed."

US Geological Survey:

LUCY JONES RECEIVES AWARD FOR GOVERNMENT SERVICE. The [Greenwire](#) (10/8, Subscription Publication) reports that a USGS "scientist's immovable dedication to ensuring people in earthquake zones are ready for earth shaking has landed her a federal award for civil service." Seismologist Lucile "Lucy" Jones will "receive a Samuel J. Heyman Service to America Medal tonight from the Partnership for Public Service." Jones, "a 32-year veteran of USGS, led the research into foreshock and aftershock sequences that are now the basis for earthquake advisories in tremor-prone California." Acting USGS Director Suzette Kimball said, "I don't know how you put a dollar figure on it, but her work has helped mitigate substantial risks facing Americans in earthquake-prone areas, particularly in Southern California, and has helped decision-makers make better policies and take better precautions to respond to natural disasters and especially earthquakes."

The [Los Angeles Times](#) (10/6, Xia, 4 07M) reports that Jones said, "I believe it is our obligation as scientists working for the American people to make information from our science understandable by non-scientists so that it can be used to support others in making our country safer from inevitable natural disasters." She served as Los Angeles Mayor Eric Garcetti's science advisor for seismic safety and helped push an initiative to strengthen the city's infrastructure.

Top National News:

AFTER MCCARTHY'S SURPRISE EXIT, PRESSURE ON RYAN TO RUN FOR SPEAKER. Rep. Kevin McCarthy's surprise decision to pull out of the race for speaker of the House led all three network newscasts last night and sparked extensive print and online coverage, with nearly all of them painting a starkly negative picture of the state of the GOP. Reports described an atmosphere of utter chaos and disbelief among Republicans, and an uncertain prognosis for a House caucus that appears hopelessly divided. The lead story on [NBC Nightly News](#) (10/8, lead story, 2:45, Alexander, 7 86M) encapsulated much of the media's take on yesterday's upheaval, reporting that "the same forces that propelled political outsiders, including Donald Trump, to the top of the GOP presidential field, are fueling the revolt...in Congress." Karen Tumulty, meanwhile, wonders in a [Washington Post](#) (10/9, A1, Tumulty, 6.76M) front-page analysis whether Republicans "are on the verge of ceasing to function as a national political party," as "the most powerful and crippling force at work in the once-hierarchical GOP is anger, directed as much at its own leaders as anywhere else."

While the coverage mentions a number of potential replacements for Speaker Boehner, media analysts and many GOP lawmakers appear to be in agreement that Rep. Paul Ryan may be the only candidate capable of uniting the fractious GOP majority. The [New York Times](#) (10/9, Steinhauer, Herszenhorn, Subscription Publication, 11.82M), for example, says "many Republicans would like to see Mr. Ryan make a run," while [USA Today](#) (10/9, Slack, 5.23M) calls him "the next logical candidate," and [AFP](#) (10/9, Mathes) reports that he "has credibility among the establishment as well as rebellious conservatives."

[Bloomberg Politics](#) (10/8, Wasson, 247K) says Ryan "was under pressure from some lawmakers" yesterday, according to "a leadership aide who spoke on condition of anonymity." According to another "aide," Ryan has "canceled fundraisers he had scheduled for the next two days." The [Washington Post](#) (10/9, Costa, Helderman, DeBonis, 6.76M) reports that Boehner "personally asked Ryan to run for speaker over two long phone conversations" yesterday, "according to two sources familiar with the exchanges." Interviewed by the [National Review](#) (10/9, Lowry, 504K), McCarthy also weighed in, "I personally want Paul Ryan."

[Politico](#) (10/8, Sherman, Palmer, Bresnahan, 942K) notes that Ryan had issued a statement reiterating his decision not to run shortly after McCarthy's announcement, but [USA Today](#) (10/9, Singer, 5.23M) indicates that "late in the day, colleagues were pressing him to reconsider." The [Milwaukee Journal Sentinel](#) (10/9, Gilbert, 564K) similarly reports that Ryan's statement "didn't stop GOP colleagues from continuing to press him to change his mind, and feeding a frenzy of speculation over whether that might happen." In an editorial titled "The Republican Crack-Up," the [Wall Street Journal](#) (10/9, Subscription Publication, 5 95M) casts McCarthy's decision not to run as indicative of the self-destructive tendencies in some House GOP circles, and urges Ryan to run.

On its website, [NPR](#) (10/9, Taylor, 1.85M) noted that Rep. Charlie Dent "said Ryan was probably the only lawmaker who could get the necessary 218 votes in the caucus." Barring that, the [Huffington Post](#) (10/8, McAuliff, Grim, Levine, 164K) reported, Dent "suggested Republicans may even have to rely on Democrats to help pick a speaker." Said Dent, "I suspect at some point, if we can't get 218 Republicans to vote for a speaker candidate, we'll have to assemble a bipartisan coalition to elect a speaker." In an editorial, [USA Today](#) (10/9, 5 23M) calls for that very course of action, "if it weren't heresy for both parties."

Accounts of Thursday's events in the House, meanwhile, paint a vivid picture of chaos. The [Los Angeles Times](#) (10/9, Mascaro, 4.07M), for example, says the news left "Republicans in disarray," while [Politico](#) (10/8, Sherman, Palmer, Bresnahan, 942K) refers to a "bombshell withdrawal" and the [Huffington Post](#) (10/8, McAuliff, Grim, Levine, 164K) said the developments "sparked shock, tears and chaos in the GOP." [McClatchy](#) (10/9, Lightman, 28K) speaks of a "startling decision" by McCarthy and a "Republican civil war," and describes lawmakers coming out of the caucus meeting as "stunned, surly and in some cases, sad." [The Hill](#) (10/8, Wong, 471K) headlined its online report on the day's events "Shock! McCarthy Drops From Speaker's Race," and quoted Rep. Tom Rooney as saying that "McCarthy's withdrawal drove some lawmakers to tears." Said Rooney, "The person next to me was crying."

Adding to the sense of chaos during the GOP caucus meeting, the [New York Daily News](#) (10/9, Joseph, 3.75M) recounts, "many members didn't hear" McCarthy's announcement "initially because of microphone issues." Boehner "then told confused members the leadership vote would be postponed." [USA Today](#) (10/9, Shesgreen, 5.23M) says Boehner "seemed to have no inkling on Thursday that his deputy...was preparing to withdraw." He "only learned about McCarthy's decision... a few minutes before House Republicans were set to gather." The [Washington Times](#) (10/9, Dinan, 344K) notes that the outgoing speaker later told reporters, "We will announce the date for this election at a later date, and I'm

confident we will elect a new speaker in the coming weeks."

[AFP](#) (10/9, Mathes) reports that "seeking to calm the waters," Boehner also "issued a statement saying he would stay on 'until the House votes to elect a new speaker,'" and [Politico](#) (10/8, Gold, 942K) noted that he "canceled his planned Thursday night appearance on 'The Tonight Show.'"

On the other hand, said the [Christian Science Monitor](#) (10/9, Kiefer, 455K), "right-wingers were pleased to see McCarthy drop out," because "they see him as 'Boehner 2.0.'" In a statement, the Freedom Caucus "said it respects his decision to 'put the conference ahead of himself' and said the next speaker 'needs to yield back power to the membership.'" In fact, says [Politico](#) (10/8, Strauss, Glueck, 942K), "conservatives couldn't contain their glee" yesterday, while the [Washington Post](#) (10/9, Costa, 6.76M) reports they celebrated "the departure of one of the GOP's moderates and fastest-rising stars." Another [Washington Post](#) (10/9, Fahrnthold, 6.76M) article describes similar reactions at a Greenville, SC chapter of the Tea Party.

The [Washington Times](#) (10/8, Mclaughlin, 344K) reports that during an interview on WRKO radio in Boston, Sen. Ted Cruz said, "I think the reason we are seeing a change in leadership in the House is the American people are fed up...with Republican leadership that isn't listening to us and isn't honoring the promises that were made to the men and women who gave Republicans majorities in both houses."

Reports: McCarthy Didn't Have The Votes. Media coverage last night and this morning also weighs in on McCarthy's motives for his unexpected decision to pull out of the race. [ABC World News](#) (10/8, lead story, 2.30, Karl, 5.84M) reported that "by the time McCarthy himself emerged" from the meeting, "swarmed by cameras, he seemed more relieved than defeated." McCarthy was shown saying, "I think I shocked some of you, huh? The one thing I found in talking to everybody, if we are going to unite and be strong, we need a new face to help do that." The [CBS Evening News](#) (10/8, lead story, 2.30, Pelley, 5.08M) opened its broadcast reporting, "He left them speechless."

Interviewed by the [National Review](#) (10/9, Lowry, 504K), McCarthy "said he had thought about dropping out over the last week after the Benghazi gaffe, but figured, I'd push through." But he "realized he couldn't," because the House Freedom Caucus, "whose members he'd need to pick off to get to 218 on the House floor, had gone into 'lockdown' and 'wanted things I couldn't deliver.'" Asked if "the House is governable," McCarthy replied, "I don't know. Sometimes you have to hit rock bottom."

In an interview with [Politico](#) (10/9, Sherman, Palmer, Bresnahan, 942K) "after his bombshell announcement," McCarthy said, "For the betterment of the conference, if we are going to have all these battles about wanting to do something, it's easier if we have someone who comes and unites us. ... And there's something to be said about a fresh face."

The [Los Angeles Times](#) (10/9, Mascaro, 4.07M) says that "McCarthy was expected to easily win," but the [AP](#) (10/9) reports that he confronted "insurmountable obstacles," and that he "had concluded he did not have a path to getting the needed 218-vote majority in the full House later this month."

The [San Francisco Chronicle](#) (10/9, Lockhead, Subscription Publication, 3.35M) similarly reports that according to "Republicans," McCarthy "had more than 200 votes out of the 247 Republicans in the caucus," but "could not reach the magic 218 majority of the full House needed not only to win election to speaker, but to govern effectively and pass legislation through the House without help from Democrats." Adds the Chronicle, "The arithmetic is all the more shocking given that Republicans have their largest majority since Herbert Hoover was president in 1928." As the [New York Times](#) (10/8, Hulse, Subscription Publication, 11.82M) puts it, "Republicans expanded their numbers in the House and won the Senate in 2014 by asking voters to give them control of Congress and let them prove that they could govern the country. Right now they appear unable to govern themselves."

The [Wall Street Journal](#) (10/9, A1, O'Connor, Subscription Publication, 5.95M) reports on its front page that in an interview, McCarthy said the vote wasn't his only concern, "It was only going to get worse. ... You've got the debt ceiling coming up, and everything else. This was for the good of the team."

On its website, [The Atlantic](#) (10/9, Berman, 2.69M) said "conservatives had effectively held McCarthy hostage, just as they had done weeks ago to Boehner: The 30-odd member Freedom Caucus was threatening to block his ascension unless he agreed to empower its members through committee and leadership slots, procedural reforms, and possibly even legislative promises that he would be unable to keep." Moreover, the "dynamic was even more significant that McCarthy's stumble on Fox News last week."

Chris Cillizza wrote in a post for the [Washington Post](#) (10/9, Cillizza, 6.76M) about theories being bandied about to explain McCarthy's motives, including "rumors of personal problems." However, he added, "those single-issue theories all miss the broader point here: There is a revolution happening within the Republican party right now. The establishment's hold on power is more tenuous than it has been at any time in recent memory."

Names Floated As Caucus Weighs "Caretaker Speaker." [Bloomberg Politics](#) (10/8, Wasson, 247K) reports that during the day yesterday, "talk emerged of a so-called caretaker speaker, who could hold the job through the November 2016 congressional elections, but Republicans were struggling...to find a volunteer." [Politico](#) (10/8, Sherman, Palmer, Bresnahan, 942K) says "House Republicans immediately began floating a number of names as potential caretakers." Among them are "retiring Minnesota Rep. John Kline, a close ally of Boehner," Texas Rep. Mac Thornberry, and Oklahoma Rep. Tom Cole.

The [Washington Post](#) (10/9, Costa, Helderman, DeBonis, 6.76M) mentions Reps. Trey Gowdy and Jordan, "head of the Freedom Caucus," as possibilities, and another [Politico](#) (10/8, French, 942K) piece brought up the names Rep. Candice Miller, National Republican Congressional Committee chairman Greg Walden, and Rep. Lynn Westmoreland, who is "also being floated as a potential interim speaker." [The Atlantic](#) (10/9, Berman, 2.69M) listed the potential candidacies of Reps. Jeb Hensarling, "a favorite among conservatives," as well as Steve Scalise and Tom Price.

The [Huffington Post](#) (10/8, Bendery, 164K) reported that Rep. Jason Chaffetz "said McCarthy's exit creates an opening for him to win," and mentioned Rep. Daniel Webster, who has "the endorsement of the House Freedom Caucus," as a candidate. The [Los Angeles Times](#) (10/9, Biernan, Mascaro, 4.07M) notes, however, that "many members said that they would not necessarily stick with Wednesday's endorsement of Webster and that all options are open as they try to choose a leader." The [Miami Herald](#) (10/9, Klas, 651K) reports that "central to" Webster's "pitch is his record of reform in the Florida House, after Florida Democrats narrowly lost their majority in 1996 and he became speaker with a 61-59 majority." Said Webster yesterday, "Everyone knows this is a top-down process, and my plan is to flatten the pyramid of power so every member has an opportunity to be successful."

[Reuters](#) (10/9, Cornwell, Sullivan), meanwhile, quotes Chaffetz as saying, "It was just absolutely stunning what happened. ... I don't know if I am the right person. I put my name in the hat because I do want to unite this party internally."

In addition to some of the names mentioned above, [USA Today](#) (10/9, Allen, King, 5.23M) mentions the potential candidacy of Rep. Cathy McMorris Rodgers in an online story. The [Washington Times](#) (10/9, Miller, 344K), meanwhile, reports that "some of the names that were immediately mentioned by lawmakers included": Rep. Jim Sensenbrenner, Harold Rogers, Joe Barton, and Kline.

Centrist "Tuesday Group" Coalescing Behind Leaving Boehner As Speaker Indefinitely. The [Wall Street Journal](#) (10/9, Hughes, Peterson, Subscription Publication, 5.95M), meanwhile, reports that the centrist Tuesday Group is aligning behind the idea of leaving Boehner as speaker indefinitely. Said Rep. Carlos Curbelo, "By refusing to give Kevin McCarthy the maybe 10 to 15 votes he needed to get to 218, they decided to leave John Boehner serving as speaker. That's fine with me. Maybe we agree for once."

The [Washington Times](#) (10/9, Howell, 344K) describes "centrist Republicans" as "palpably frustrated with a group of conservatives within the House GOP caucus who ousted" Boehner and "likely sank...McCarthy's bid to replace him." Rep. Peter King, whom the WTimes erroneously identifies as a "New York Democrat," said yesterday, "This is unprecedented to have this small group, a tiny minority, hijack the party and blackmail the House."

Eugene Robinson writes in the [Washington Post](#) (10/9, Robinson, 6.76M), "If he chooses, Boehner can use his remaining weeks in office to keep his party from further injuring itself by shutting down the government or playing chicken with the debt ceiling." However, "it will only be a matter of time before the next speaker has to quell some far-right tantrum."

A [Washington Post](#) (10/9, Board, 6.76M) editorial says House Majority Leader McCarthy's exit from the race for House Speaker "threw the House into chaos," and says one reason for his decision may be that the Freedom Caucus demanded rule changes to "enhance the power of the fringes." The Post says the next speaker should not grant the Freedom Caucus "this or any other ransom, and the majority of Republicans should back him or her up."

White House Pokes Fun At GOP Chaos. On its website, [The Hill](#) (10/8, Fabian, 471K) reported that the White House said the fracas in the House "shows how Republicans are hurt by 'extreme ideology' within their own party." Press secretary Josh Earnest went on to say that "it might be easy to 'poke fun at the chaos,' but stressed that House Republicans need to choose a leader who can quell a vocal faction of conservatives 'that places their extreme ideology ahead of everything else.'" The [Washington Times](#) (10/9, Wolfgang, 344K) further quotes Earnest as saying, "We're having a little fun with all of this," and taking "a jab at" former Vice President Cheney, "who earlier Thursday endorsed Mr. McCarthy for speaker, hours before he quit the race." Quipped Earnest, "Dick Cheney's endorsement doesn't mean as much as it used to."

Trump Appears To Claim Credit For Derailing McCarthy. [Bloomberg Politics](#) (10/8, 247K) reports that appearing in Las Vegas, Donald Trump yesterday said of McCarthy's decision "They're giving me a lot of credit for that because I said you really need someone very very tough and very smart" as House speaker. The [Washington Times](#) (10/9

Sherfinski, 344K) notes that Trump added, "I know tough people, they're not smart – that's the worst, okay? That's the worst. ... You got to be smart. But we need smart, we need tough – we need the whole package."

User At DHS Address Edited McCarthy, Ellmers Wikipedia Pages Thursday. The [Daily Caller](#) (10/9, Ross, 375K) reported that a user at an Internet address originating from DHS offices in Springfield, Virginia made edits to the Wikipedia pages on McCarthy and Rep. Renee Ellmers (R-NC) Thursday, "alleging that the two Republicans were having an affair." The alleged affair, which both have denied, "became the source of intense speculation" after McCarthy dropped his bid for speaker. A DHS spokeswoman said, "DHS has immediately launched an investigation into this serious matter."

Guggenheim Securities Now Sees 40% Chance Stalled Congress Won't Raise Debt Limit. [Politico](#) (10/8, White, 942K) reports that "chaos in the US House of Representatives makes an already scary autumn even more uncertain for Wall Street with debt limit and shutdown fights looming and no one clearly in charge." Chris Krueger of Guggenheim Securities said yesterday, "We will not mince words — this is the political equivalent of a dumpster fire. ... We are increasing our odds from 30 percent to 40 percent for some kind of accident that would keep Congress from raising the debt ceiling in time due to brinkmanship, procrastination or political gridlock."

Dana Milbank titles his [Washington Post](#) (10/9, Milbank, 6.76M) column "Kevin McCarthy Falls To A Conservative Coup," and writes that the events "would be entertaining if the consequences weren't so serious." To Milbank, "the only thing that will likely end the thuggish tactics is public anger – and punishment at the polls – when the conservative hardliners are blamed for shutdowns, defaults, or whatever else results from their coup. And who would want to preside over that?"

Subject: For Review: California Desert Media Advisory by 3 PM TODAY
Attachments: 10-09-15 California Desert Feinstein Advisory Draft v2.docx

Good morning all,

Attached please find a draft media advisory for Deputy Secretary Connor's travel to CA at attend Senator Dianne Feinstein's public meeting on conserving the CA desert. Please have edits to me by **3 PM today**, and please reply only to me instead of replying to all. This will go out tomorrow.

Thank you,
~Leah

Interior, Agriculture Departments to Join Senator Feinstein at Public Meeting to Hear Community's Vision for Conservation in the California Desert

WHITEWATER, Calif. – On Tuesday, October 13, U.S. Deputy Secretary of the Interior Michael Connor and U.S. Department of Agriculture Under Secretary for Natural Resources and Environment Robert Bonnie will join U.S. Senator Dianne Feinstein, as well as other federal, state, local and tribal officials, in a visit to the desert of Southern California.

At the invitation of Senator Feinstein, Connor and Bonnie will attend Feinstein's public meeting to hear about the community's vision for the management of public lands of the California desert, including the Senator's proposal to designate three new National Monuments: Sand to Snow National Monument, Mojave Trails National Monument, and Castle Mountains National Monument.

For more than twenty years, Senator Feinstein has led the effort to protect the special places of the California desert. Located less than 100 miles from the Los Angeles metropolitan area, the desert is a beloved resource for millions of people. This region is a popular destination for outdoor recreation, including off-highway vehicle travel, hiking, rock climbing, and hunting. The region is also home to a wide diversity of wildlife, spectacular mountains and dunes, important historical resources, and areas of cultural significance to local tribes.

Who: **Michael Connor**, U.S. Deputy Secretary of the Interior
Robert Bonnie, U.S. Department of Agriculture Under Secretary for Natural Resources and Environment
Dianne Feinstein, U.S. Senator (CA-14)

What: Community meeting on California desert conservation priorities

When: Tuesday, October 13, 2015
1:45 p.m. PDT – Media check-in
2:00 p.m. PDT – Public meeting begins

Where: Wildlands Conservancy Whitewater Preserve
9160 Whitewater Canyon Road
Whitewater, CA 92282

Media: Credentialed members of the media who are interested in attending are required to [RSVP here](#).

DOI in the News:

DEMOCRATS CALLS ON REPUBLICANS TO VOTE ON LWCF EXTENSION. [Politico Pro](#) (10/7) reports that "Democratic are calling Republicans to bring an extension to the Land and Water Conservation Fund up for debate and vote, Democratic leadership said in a letter going out today." Democratic leaders say "a bipartisan bloc of 53 senators asked for an extension to be added to the recent continuing resolution used to fund the government, but Republican leadership blocked the move."

[Politico Pro](#) (10/7) reports that "House Natural Resources Chairman Rob Bishop today signaled that he is in no hurry to reauthorize the Land and Water Conservation Fund, amid a showdown in the Senate that threatens to derail a separate chemical reform law." Bishop "asked the Obama administration for data on the program's effectiveness and said it would be a mistake to reauthorize the expired LWCF without first evaluating that information."

Meanwhile, [Political Pro](#) (10/7) reports that supporters of the Land and Water Conservation Fund are contesting "the idea that the Land and Water Conservation fund has a bank account with \$20 billion in it." Jessica Goad, Advocacy Director at the Center for Western Priorities, said, "It's misleading and inaccurate to claim that there is money left in the LWCF account, just sitting around ready to be used to protect our lands and waters. In reality, every penny has been plundered and the money has been spent. This talking point is nothing more than a convenient excuse for inaction and a cloak for some politician's real goal of blocking the renewal of one of our country's most successful conservation programs." Also, Matt Lee-Ashley, a Senior Fellow at the Center for American Progress, adds, "Congressman Bishop seems to be asking for take-backsies – he axed the nation's most successful parks program last week, and now he says it's doing just fine. The truth is that LWCF has now expired."

Additional coverage of the LWCF was provided by the [Palm Springs \(CA\) Desert Sun](#) (10/7, 99K), the [Bangor \(ME\) Daily News](#) (10/6, 223K), the [Jackson Hole \(WY\) News & Guide](#) (10/8, 1K), the [Salt Lake \(UT\) Tribune](#) (10/8, 492K), and the [Greenwire](#) (10/7, Subscription Publication).

OBAMA ADMINISTRATION OFFICIALS TO DISCUSS SEN. FEINSTEIN'S PROPOSAL TO PROTECT CALIFORNIA DESERT. The [Greenwire](#) (10/7, Subscription Publication) reports that "top Interior and Agriculture officials will travel to Southern California on Tuesday to discuss a proposal for President Obama to protect more than a million acres of the region's deserts, woodlands, mountains and historical sites under the Antiquities Act." Interior Deputy Secretary Michael Connor and Agriculture Undersecretary for Natural Resources and Environment Robert Bonnie accepted Sen. Dianne Feinstein's "invitation to attend a public meeting at the Whitewater Preserve near Palm Springs to discuss her proposals to designate the Mojave Trails, Sand to Snow and Castle Mountains national monuments, department representatives said." The article notes that "it's a strong sign that President Obama is considering using executive powers to ban mining and other industrial uses across desert vistas speckled with Joshua and juniper trees, prehistoric lava flows, wildlife and a turn-of-the-century mining town."

DEPUTY SECRETARY CONNOR TO TESTIFY AT SENATE HEARING ON WATER BILLS. [The Hill](#) (10/8, Cama, Henry, 471K) reports that the Senate Energy and Natural Resources Committee will hold a hearing Thursday "on Western and Alaskan water bills." Interior Deputy Secretary Michael Connor will testify.

REPUBLICANS DEMAND RECORDS ON PLANS FOR NEW MARINE MONUMENTS. The [Greenwire](#) (10/7, Subscription Publication) reports that "Republicans on the House Natural Resources Committee want all records on President Obama's plans for new marine monuments, accusing the administration of shutting out public input. "Chairman Rob Bishop and "other panel Republicans sent a letter today to the White House Council on Environmental Quality and the National Oceanic and Atmospheric Administration." The letter "asks for records of all meetings, correspondence and memos related to marine monument designations."

USGS' LUCY JONES AWARDED SERVICE TO AMERICA MEDAL. The [Washington Post](#) (10/7, Davidson, 6.76M) "Federal Eye" blog reported on the winners of the annual Samuel J. Heyman Service to America Medals.

The [My News LA \(CA\)](#) (10/7) reports that "seismologist Lucy Jones, the local face of the U.S. Geological Survey and a seismic safety adviser to Mayor Eric Garcetti, will receive the vaunted Samuel J. Heyman Service to America Medal, considered a top honor for government service, federal officials announced today." Interior Secretary Sally Jewell said, "Dr. Jones is a role model, not only for her scientific accomplishments at the U.S. Geological Survey, but also for her public service to humanity. Besides conducting leading research on earthquakes, she turns complex scientific concepts into plain English, educating the public so they can take action to save lives and property." Jones is "one of eight federal workers who will be honored during the 'Sammies' award ceremony tonight in Washington, D.C. presented by the nonprofit Partnership for Public Service."

Additional coverage was provided by the [YubaNet \(CA\)](#) (10/8, 1K).

FEDERAL GOVERNMENT SEEKS HELP WITH CROWDSOURCING EFFORTS. The [Huffington Post](#) (10/8, 164K) reports that after Congress passed the America Competes Act in 2010, all federal agencies were allowed to begin "using prizes and challenges as a tool to accomplish their missions." The article notes that "the use of crowdsourcing by the U.S. government has grown by six-fold since January 2011, when President Barack Obama signed a revised version of Competes into law." On Wednesday, the Obama Administration, the Case Foundation, the Joyce Foundation and Georgetown University are "hosting an event to announce 23 new national challenges, including nine from non-governmental organizations."

ADDITIONAL COVERAGE SECRETARY JEWELL ANNOUNCES \$186 MILLION SETTLEMENT OF TRIBAL TRUST LAWSUIT. Additional coverage of the trust settlement with the Chickasaw Nation and Choctaw Nation was provided by the [Sherman \(TX\) Herald Democrat](#) (10/7, 568), [KXII-TV Sherman, TX](#) (10/7, 46K), the [Durant \(OK\) Daily Democrat](#) (10/8, 20K), the [News United](#) (10/8), and the [Fort Smith \(AR\) Times Record](#) (10/8, 107K).

KING COVE RESIDENT PUSHES FOR ROAD THROUGH IZEMBEK NATIONAL WILDLIFE REFUGE. In an op-ed for the [Alaska Dispatch News](#) (10/7, 219K), Etta Kuzakin, president of the Agdaagux Tribe of King Cove, writes about her experience taking a medevac flight to Anchorage to deliver her baby. She notes that "only 11 miles are needed to connect King Cove to existing roads in the Izembek National Wildlife Refuge, which lead directly to this airport." In conclusion, Kuzakin asserts that she plans "to move heaven

and earth to make this road a reality.”

Additional coverage of the road was provided by the [Minneapolis \(MN\) Star Tribune](#) (10/8, 1.19M).

Empowering Native American Communities:

HOUSE APPROVES BILL TO TAKE NEW MEXICO TRIBAL LAND INTO TRUST. [Law 360](#) (10/8, 21K) reports that “a bill to transfer land that once hosted a Native American boarding school to 19 unified New Mexico-based tribes landed on President Barack Obama’s desk Tuesday after the U.S. House of Representatives passed the measure without opposition.” The Albuquerque Indian School Land Transfer Act will “place 11 acres once used by the Bureau of Indian Affairs to operate the boarding school into a trust to be run by the confederation of Pueblo tribes that operate the Indian Pueblo Cultural Center in Albuquerque.”

BIA TO TIGHTEN GRIP ON LOWER BRULE SIOUX TRIBE’S MONEY AMID INVESTIGATIONS. The [Sioux Falls \(SD\) Argus Leader](#) (10/7, 163K) reports that the BIA will “slow the amount of money that it sends to the Lower Brule Sioux Tribe amid allegations that millions of dollars in federal aid went missing over the past several years.” According to the article, “the allegations first brought to light by a Human Rights Watch report have spurred multiple federal investigations over what happened to more than \$20 million that went to the tribe when it was controlled by longtime Chairman Michael Jandreau, who died in April.” The article notes that “both the Interior Department’s Office of Inspector General and the Internal Revenue Service are investigating the tribe.”

UNIVERSITY OF HAWAII’I TO UNVEIL NEW VOLUME ON NATIVE HAWAIIAN LAW. The [Maui \(HI\) Now](#) (10/6) reports that “the University of Hawai’i this week unveils a new volume on Native Hawaiian law during a special book signing reception at the Hawai’i Supreme Court and UH Law School.” According to the article, “the 1,400-page volume entitled ‘Native Hawaiian Law: A Treatise’ was compiled and edited by three members of the faculty at the William S. Richardson School of Law who specialize in Native Hawaiian law and is an update and continuation of the handbook, published in 1991.”

ADDITIONAL COVERAGE \$5.3 MILLION IN GRANTS AWARDED UNDER NATIVE YOUTH COMMUNITY PROJECTS PROGRAM. Additional coverage of the \$5.3 million in grants awarded under the Native Youth Community Projects program was provided by the [Pawhuska Journal Capital](#) (10/8).

ADDITIONAL COVERAGE HASKELL INDIAN NATIONS UNIVERSITY FACES FUNDING ISSUES. Additional coverage of Haskell Indian Nations University’s issues with funding was provided by the [Houston \(TX\) Chronicle](#) (10/8, 2.28M), the [Hutchinson \(KS\) News](#) (10/8, 2K), the [Lawrence \(KS\) Journal World](#) (10/7, 42K), the [Washington \(DC\) Times](#) (10/8, Hendricks, Williams, 344K), the [Kansas City \(MO\) Star](#) (10/8, 566K), the [Hilton Head Island \(SC\) Packet](#) (10/8, 89K), the [Rock Hill \(SC\) Herald](#) (10/8, 91K), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (10/8, 494K).

ADDITIONAL COVERAGE BIA APPROVES MASHPEE WAMPANOAG CASINO. Additional coverage of the approval of the Mashpee Wampanoag casino was provided by the [Indian Country Today Media Network](#) (10/7, 32K).

NATIVE HAWAIIANS URGED TO REVIEW FEDERAL PROPOSAL. The [Lahaina \(HI\) News](#) (10/8, 36K) editorializes that “the U.S. Department of the Interior last week Tuesday announced a proposal to create an administrative procedure and criteria that the secretary of the interior would apply if the Native Hawaiian community forms a unified government that then seeks a formal government-to-government relationship with the United States.” The paper says that “it will be interesting to see how Hawaiians react to the proposal and process.” According to the editorial, “based on attending nation-building conferences in the past, the challenge will not lie in establishing government-to-government relationships. The hard part will be creating the new Native Hawaiian government.”

Office of Insular Affairs:

SECTION 902 TALKS SOUGHT. The [Saipan \(MNP\) Tribune](#) (10/8, 641) reports that “Gov. Eloy S. Inos has written to President Barack Obama to initiate Section 902 consultation talks pursuant to the CNMI Covenant.” During a press conference with Esther Kia’aina, Interior’s Assistant Secretary for Insular Areas, “who has been briefed on the request,” Enos said, “Yes, the official notification is coming out imminently in the next day or two on where we stand on the 902 [talks].”

UNIVERSITY OF GUAM UNVEILS NEW CALVO FIELDHOUSE GYM. The [Pacific News Center](#) (10/8) reports that the University of Guam has completed its makeover of the Calvo Fieldhouse. According to the article, “after five months of renovations, UOG opened up their fieldhouse with new gym floors and retractable bleachers.” The article notes that “this new gym completes the \$3 million dollar project funded by the Office of Insular Affairs Department of Interior.” Office of Insular Affairs Assistant Secretary of the Interior for Insular Areas Esther Kia’aina says, “The first phase was the gym next door \$1.3 million dollars which came out of the Capital Improvement Project Program and this \$1 million dollars came out of Compact Impact. The reason it’s important to understand that is that funding in general is difficult. We have to determine what funds are available to make sure we leverage that. I want to thank all of you because without that creative financing, we wouldn’t get projects like this coming to closure.”

Additional coverage was provided by [KUAM-TV Dededo \(GUM\)](#) Dededo, GUM (10/8, 171).

GUAM SEAL PARK RENOVATIONS TO BE FINISHED IN EARLY 2016. The [Pacific \(GUM\) Daily News](#) (10/7, 61K) reports that “the images on Guam’s iconic seal — the oval that appears in the middle of the island’s flag with a proa, coconut tree and beach line — will soon come to life at the Guam Seal historical park in Hagåtña.” In March, the Office of Insular Affairs announced “nearly \$1.5 million in grant funding for various projects on island.” Administration spokesman Julius Santos “recently said the renovations are expected to be complete by the first quarter of 2016.”

Tackling America’s Water Challenges:

ENVIRONMENTAL GROUPS CLAIM DELTA TUNNELS VIOLATE FEDERAL LAW. The [Central Valley \(CA\) Business Times](#) (10/8, 206) reports that “the twin water tunnels touted by Gov. Edmund Brown Jr. are a violation of federal law, says a coalition of environmental groups.” In a letter to state and federal authorities, the groups say, “The BDCP Delta Water Tunnels project is not a permissible project under the federal Clean Water Act (CWA) because it would degrade water quality in the San Francisco Bay-Delta Estuary. This in turn will adversely impact numerous recognized beneficial uses and public health.”

CALIFORNIA’S FARMERS DECRY ENVIRONMENTAL REGULATIONS. [Fox News](#) (10/7, 8.91M) reports that “drought-stricken California farmers say environmental regulations barring them from irrigating their parched lands are making them the endangered species.” According to the article, “with the drought entering its fourth year, anger is building in central California at state and federal agencies, who critics say are putting wildlife ahead of jobs, families and the food supply.” The article notes that “blocked by environmentalists from pumping water from rivers onto their arid lands, farmers blame both regulations and the agencies and activists who go to court to enforce them.”

OP-ED WATER MANAGEMENT SHOULD NOT DEPEND ON EL NIÑO. In an op-ed for the [San Francisco Chronicle](#) (10/8, Subscription Publication, 3.35M), Michael L. Connor writes that “hopes have been raised recently that a strong El Niño may end California’s drought.” But he argues that “pinning hopes on El Niño is not a solution to our long-term water shortages and it certainly is no substitute for the kinds of farsighted, aggressive drought response measures already instituted at the federal, state and local levels.”

Securing America’s Energy Future:

Renewable Energy:

RENEWABLE ENERGY SURGES AS DRILLING AND MINING FALTER. [McClatchy](#) (10/8, Cockerham, 28K) reports as fossil fuel production in the US drops, “solar and wind power is skyrocketing as technology and cheaper financing drive down the costs.” Bloomberg New Energy Finance analyst Jacqueline Liliinshtein said, “In the U.S., we’ve known that wind energy can be cheaper than (natural) gas in some states, but solar is now inching toward that same milestone.” McClatchy adds that “Texas leads the U.S. in wind power, with about 10 percent of its power from wind” while “California, Nevada and North Carolina are the nation’s top solar states and dominate the market.”

NORTH CAROLINA RESIDENTS RAISE CONCERNS ABOUT WIND TURBINES. The [Wilmington \(NC\) Star News](#) (10/7, 111K) reports that “five energy companies have voiced interest in putting wind turbines off the North Carolina coast.” However, “not everyone is excited about the idea, including some residents of the Brunswick County towns that will see turbines on the horizon.” At a meeting Wednesday in Wilmington, the N.C. Renewable Energy Task Force “heard plans to open three areas to wind energy production: two of them off Brunswick County and one near Kitty Hawk.”

Additional coverage was provided by the [Wilmington \(NC\) Port City Daily](#) (10/8).

PROGRESSION ENERGY PLANS 400MW FLOATING WIND PROJECT OFF HAWAII. The [Recharge News](#) (10/8, 633) reports that “US developer Progression Energy plans a 400MW floating wind project in the Pacific Ocean off the state of Hawaii, joining a list of companies interested in the concept for western states in federal waters that are too deep for conventional foundation technology.”

Onshore Energy Development:

WHITE HOUSE THREATENS VETO OF NATIVE AMERICAN ENERGY ACT. The [Alaska Dispatch News](#) (10/7, 219K) reports that “two House bills that are the focus of Alaska’s lawmakers – on crude exports and Native energy – drew veto threats from President Barack Obama Wednesday.” The White House “issued a policy statement threatening a veto of Alaska Rep Don Young’s ‘Native American Energy Act,’ arguing it would ‘undermine public participation and transparency of review of projects on Indian lands’ under environmental law, ‘set unrealistic deadlines and remove oversight for appraisals of Indian lands or trust assets,’ and cut off some fee payments under the Equal Access and Justice Act.” According to the article, “both bills are still likely to advance in the House, though an early veto threat is often a death knell for a bill’s ability to move through the Senate.”

BIA OIL AND GAS LEASE SALE BRINGS IN \$50 MILLION. The [Red Dirt Report](#) (10/7) reports that the BIA Concho Field Office “held an oil and gas lease sale today at the Redlands Community College in El Reno.” According to the article, “there were over 400 tracts covering over 31,000 mineral acres available for lease at the auction.” The article notes that “the sale totaled approximately \$50 million in oil and gas lease bonuses which will be paid to restricted Cheyenne and Arapaho Tribal members who own the various mineral tracts.”

BLM OPENS PUBLIC SCOPING FOR OIL, GAS LEASE SALE. The [Tri-State Livestock News \(SD\)](#) (10/8) reports that the BLM has “opened a 15-day public scoping period on six nominated Oil and Gas Lease parcels located in Garfield, Sheridan, Richland, and Roosevelt counties Montana.” The public scoping period will end Oct. 21, 2015. The lease sale is tentatively scheduled for May 4, 2016.

UTAH’S OIL SHALE BUSINESS MOVING FORWARD DESPITE OIL’S DOWNTURN. The [Salt Lake \(UT\) Tribune](#) (10/8, 492K) reports that “cratering oil prices have slowed Utah’s oil-shale business, but the nascent commercial industry is still on its feet, moving forward on projects that proponents hope someday will unlock a vast trove of hydrocarbons embedded under the Uinta Basin.” The article notes that “Enefit is developing a major mine near the Colorado state line that originally envisioned surface mining on private land south of Bonanza, in Uintah County.” The BLM is “expected to release a draft Environmental Impact Statement later this year on Enefit’s proposed utility corridor across public land.”

SAN MIGUEL COUNTY MULLS LETTER CALLING FOR OIL AND GAS ROYALTY REFORM. The [Telluride \(CO\) Daily Planet](#) (10/8, 11K) reports that “at their meeting Wednesday morning, the San Miguel County Board of Commissioners will decide whether or not to sign a draft letter to Interior Secretary Sally Jewell and Bureau of Land Management Director Neil Kornze calling for updated royalty rates for oil and gas leases on federal public lands.” The article notes that “the letter was drafted by the Center for Western Priorities, a Denver-based environmental advocacy group, as part of their ‘Fair Share’ campaign, and will be brought before the BOCC by Commissioner Art Goodtimes.” The draft letter states, “Federal oil and gas royalties returned to energy producing states are a crucial source of revenue for local governments. In San Miguel County, federal oil and gas royalties fund infrastructure projects, conservation programs, schools and other programs. The failure of the federal government to update the royalty rate systematically lobbies taxpayers in Colorado and across the West, depriving citizens of their fair share of revenue and leaving millions on the table every year.”

COURT’S DECISION STRIKING DOWN FRACKING RULE WELCOMED. The [Oklahoman](#) (10/8, 408K) editorializes that “a court decision striking down an Obama administration effort to stymie hydraulic fracturing on federal lands shows the administration has taken its anti-energy philosophy to new lengths.” The paper claims that “the administration is now imposing regulations to solve a problem that may not exist based on legal authority that resides only in bureaucrats’ imaginations.” The editorial concludes that “Oklahomans have good reason to cheer this judge’s decision whether they drill on public lands, private lands or none at all.”

Offshore Energy Development:

WEST COAST DEMOCRATIC SENATORS AIM TO BAN OFFSHORE DRILLING ON OUTER CONTINENTAL SHELF. The [AP](#) (10/8) reports “a group of Democratic senators” yesterday “proposed permanently banning offshore drilling on the outer continental shelf off California, Oregon and Washington.” Legislation “to be formally introduced shortly would block federal leases for the exploration, development or production of oil or natural gas in any area of the outer continental shelf off the coast of the three states.” In a statement Sen. Barbara Boxer said, “We cannot afford to put California’s coastal economy at risk by drilling offshore.”

BP REIMBURSES LOUISIANA \$58M FOR STATE’S LEGAL COSTS IN OIL SPILL SETTLEMENT. The [New Orleans Times-Picayune](#) (10/8, 718K) reports that BP Plc will reimburse Louisiana \$58 million for outside attorney fees and litigation costs that were spent negotiating the \$20 billion settlement over the 2010 Gulf of Mexico oil spill. The reimbursement will be paid “separately from the more than \$8 billion Louisiana is getting for coastal restoration and other recovery projects,” and is also apart from the “more than 400 economic damage settlements” reached between BP and local entities.

America’s Great Outdoors:

Bureau of Land Management:

BLM ANNOUNCES PLANS FOR SOUTHERN ARIZONA’S FIRST HOTSHOT WILDFIRE CREW. The [Arizona Public Media](#) (10/8, 2K) reports that the BLM “announced plans to give Southern Arizona its first hotshot wildfire crew.” According to the article, “the crew will be stationed at Fort Huachuca in Sierra Vista, and is part of a partnership with the U.S. Army.” BLM Spokesman Adam Milnor said, “This crew is going to be available for prevention activities. That means prescribed burns, fuel treatments, that allow us to get ahead of fires and hopefully reduce the chance for catastrophic burns down the road.”

Additional coverage was provided by [KOLD-TV Tucson \(AZ\)](#), Tucson, AZ (10/8, 23K).

BOARDMAN-TO-HEMINGWAY ROUTE DECISION NOT EXPECTED UNTIL 2016. The [Ontario \(OR\) Argus Observer](#) (10/8, 19K) reports that “a final decision on the route for Idaho Power’s proposed Boardman-to-Hemingway transmission line will not come until sometime next year.” The BLM is “scheduled to issue its final environmental impact statement on the project and a final decision in 2016.” And “that will be followed by a site certificate from the Oregon Energy Facility Siting Council in 2018 or 2019, Idaho Power’s Mitch Colburn said.”

OREGON RANCHERS RESENTENCED IN ARSON CASE. The [Eugene \(OR\) Register-Guard](#) (10/8, 172K) reports that “an Eastern Oregon rancher and his adult son on Wednesday finally got the prison sentences they deserve — according to the law — for deliberately setting fires that spread from their property onto federal land.” According to the article, “Dwight Hammond Jr., 73, and Steven Hammond, 46, were each sentenced to mandatory minimum sentences of five years, in proceedings scheduled after a federal appeals court ruled that a judge in Eugene had disregarded the law and let the ranchers off too lightly during their original sentencing hearing three years ago.” The article notes that “now-retired U.S. District Judge Michael Hogan in 2012 sentenced Steven Hammond to one year and a day in prison for setting intentional fires in 2001 and 2006, and ordered Dwight Hammond to spend three months behind bars for his involvement in the 2001 blaze, which burned in the Steens Mountain federal management and protection area.”

Additional coverage was provided by the [Oregonian](#) (10/8, 756K).

ADDITIONAL COVERAGE BLM UNVEILS MAP OF MOUNTAIN BIKE TRAILS. Additional coverage of the BLM’s map of mountain bike trails was provided by the [Ogden \(UT\) Standard-Examiner](#) (10/8, 105K) and the [Phoenix New Times](#) (10/8, 169K).

SUPPORT URGED FOR BLM’S SAGE GROUSE CONSERVATION MEASURES. In a letter to the [Missoulian \(MT\)](#) (10/8, 116K), Ben Deeble, president, Big Sky Upland Bird Association, calls “the federal decision to not list sage grouse as threatened” as “bittersweet” because “we have won, at least in a bureaucratic sense,” but “we haven’t won in a biological sense, as the birds still face extreme habitat loss risks in Montana.” Deeble claims that “Gov. Steve Bullock’s sage grouse conservation measures for oil, gas and coal fields here will be entirely ineffective.” He says that the BLM is “proposing far better protections for core sage grouse habitat, and people should be supporting them, not Bullock’s (and now U.S. Sen. Steve Daines’) call to allow more intensive industrial development across federal lands.”

BLM DECISION COMPLICATES CADIZ WATER SCHEME. In his column for the [Los Angeles Times](#) (10/7, 4.07M), Michael Hiltzik writes that the Interior Department “may have put the final kibosh on” Cadiz’s “always-questionable plan to pump groundwater out of the Mojave Desert and deliver it via a 35-mile pipeline to the Colorado Aqueduct, and thence to Southern California.” But, according to Hiltzik, “the real question about Cadiz is how it has managed to carry on a losing fight for so long.” He says that “the answer has much to do with political influence, so it’s worth taking a look at this company’s discreditable history, which we’ve been following for 13 years.”

Additional coverage was provided by [AllGov](#) (10/8, 2K).

Fish and Wildlife Service:

FWS SAYS 20 SPECIES DON’T NEED PROTECTIONS. [E&E Publishing](#) (10/7, 705) reports that the FWS announced Wednesday that “Endangered Species Act protections

are not warranted for most populations of the Sierra Nevada red fox and 19 other species." According to the agency, "the red fox subspecies – generally smaller than other North American foxes and characterized by large ears and a bushy white-tipped tail – is more widespread than originally thought."

Additional coverage was provided by [The Hill](#) (10/8, Devaney, 471K), [Bloomberg Research](#) (10/8, 2.66M), and [KTZV-TV Bend \(OR\)](#) Bend, OR (10/8, 32K).

Eels Won't Be Listed As A Threatened Species. The [AP](#) (10/8, 548K) reports that "American eels will not be listed under the Endangered Species Act, the U.S. Fish and Wildlife Service said Wednesday, a victory for fishermen who catch the increasingly valuable species." The FWS "rejected a petition from the California-based Center for Environmental Science, Accuracy & Reliability to list the eels — prized in Asian cuisine — as threatened." The agency "issued a report Wednesday saying that 'there have been large declines in abundance from historical times,' but the species 'currently appears to be stable.'"

Additional coverage was provided by the [Boston \(MA\) Herald](#) (10/8, 548K), the [Houston \(TX\) Chronicle](#) (10/8, 2.28M), the [US News & World Report](#) (10/7, 811K), the [Washington \(DC\) Times](#) (10/8, Whittle, 344K), the [Daily Mail \(UK\)](#) (10/8, 5.59M), the [Business Insider](#) (10/8, 2.93M), and the [Christian Science Monitor](#) (10/7, 455K).

Page Springsnail Avoids Listing. The [AP](#) (10/8, 2.28M) reports that "a tiny snail found along springs in Yavapai County won't be listed under the Endangered Species Act." The FWS said Wednesday that "actions taken by the Arizona Game and Fish Department have restored much of the habitat for the Page springsnail. The agency says eight of the 10 snail populations are stable or increasing in size."

Additional coverage was provided by the [Albuquerque \(NM\) Journal](#) (10/8, 259K) and the [Washington \(DC\) Times](#) (10/8, 344K).

FWS Opts Not To List Three Species In Idaho, Surrounding States. The [AP](#) (10/8, 2.28M) reports that "authorities say three species found in Idaho and neighboring states don't require federal protections under the Endangered Species Act." The FWS "in an announcement Wednesday says the southern Idaho ground squirrel, Great Basin population of the Columbia spotted frog and a plant called the Goose Creek milkvetch no longer merit candidate status for listing."

FWS Says Tahoe Yellow Cress Doesn't Warrant Listing. The [Reno \(NV\) Gazette-Journal](#) (10/7, 179K) reports that "a tiny plant that grows only along the shoreline of Lake Tahoe does not need federal protection after years of successful efforts to prevent its extinction, officials announced Wednesday." According to FWS officials, "it appears the Tahoe yellow cress now has a promising future and does not need to be listed as an endangered or threatened species." Ted Koch, supervisor of FWS' Reno office, said that "fifteen years of work by a coalition of land managers, conservationists and private property owners has 'truly exemplified' the most basic function of the Endangered Species Act – cooperation toward conservation of sensitive ecosystems and the plants and animals that depend upon them to survive."

FWS PROPOSES LISTING KENTUCKY ARROW DARTER. [E&E Publishing](#) (10/7, 705) reports that the FWS is "proposing to list a Kentucky fish under the Endangered Species Act, raising the possibility that coal mining operations in the state will have to follow new requirements to protect the species." The service was "under a deadline to make a decision on whether to list the Kentucky arrow darter, due to a 2011 settlement with conservation groups." The agency had "worked with various state and federal agencies to come up with conservation measures and prevent the need for a listing." However, in a release Wednesday, the FWS said "the fish qualified for threatened status and proposed a critical habitat spanning 246 stream miles throughout 10 Kentucky counties."

FWS PLANS TO DOWNGRADE PROTECTION OF DEER SPECIES. The [AP](#) (10/8, 2.28M) reports that "federal officials plan to downgrade the Columbian white-tailed deer's status from endangered to threatened, maintaining the species' protection but under more flexible regulations." The FWS announced Tuesday that "they plan to downgrade the deer's status but keep it protected under the Endangered Species Act." The decision will "give state officials more leeway in managing deer populations."

TWO GROUPS FILE NOTICE TO SUE OVER BULL TROUT RECOVERY PLAN. The [Flathead \(MT\) Beacon](#) (10/7, 15K) reports that "a pair of environmental groups announced Wednesday they will sue the federal government unless a recovery plan for threatened bull trout is amended to address violations of the Endangered Species Act." The groups, Alliance for the Wild Rockies and Friends of the Wild Swan, "filed the 60-day notice to sue a little more than a week after the U.S. Fish and Wildlife released its final Bull Trout Recovery Plan on Sept. 28." According to the article, "the final recovery plan offers little variation from the draft plan proposed one year ago, drawing criticism from conservation groups who have been at the vanguard of legal challenges on the road toward bull trout recovery for more than two decades."

Additional coverage was provided by [Montana Public Radio](#) (10/8).

HAGERMAN NATIONAL WILDLIFE REFUGE UNVEILS BUTTERFLY GARDEN. The [Sherman \(TX\) Herald Democrat](#) (10/8, 568) reports that "the Hagerman National Wildlife Refuge is unveiling a tool officials hope will help reverse the dying off of the monarch butterfly." The refuge's "new butterfly garden" is "a man-made tool that will serve a dual purpose, Alex Ocanas, who's heading up the butterfly garden and monarch conservation efforts at Hagerman, said." The article notes that "not only does the garden provide an oasis for the colorful creatures, it also serves as an educational platform."

GRANT AWARDED TO ADDRESS DEADLY BAT DISEASE. [Tennessee Today](#) (10/7, 40K) reports that "a UT team has received a federal grant to help combat a deadly disease affecting bats." According to the article, "the group's research will attempt to find resolutions to help manage this crisis by examining the waking from winter slumber, cave emergence, and foraging behavior." A \$248,500 grant was awarded from the FWS.

ADDITIONAL COVERAGE CHESAPEAKE RESTORATION AGREEMENT SEEKS TO INCREASE BROOK TROUT HABITAT. Additional coverage of the Chesapeake Restoration Agreement was provided by the [Washington Post](#) (10/8, Wheeler, 6.76M).

National Park Service:

AD CAMPAIGN URGES VISITORS TO "FIND YOUR PARK". The [AdWeek](#) (10/8, 377K) reports that in a "new ad for the National Park Foundation, which raises money to sustain government parks, Grey New York creates a world full of colorful lost souls trying to find their way home—to whichever tourist attraction happens to match their stripes." Titled "Find Your Park," the piece "actually nets out as visually charming, smartly riddled with rich and inviting landscapes, and armed with a strong, simple metaphor."

YELLOWSTONE TOURISM INCREASES. [ABC World News](#) (10/7, story 11, 0:10, Muir, 5.84M) reported, "Yellowstone National Park setting a new report. 3.8 million visitors through September alone, thanks to low gas prices and free admission for some students."

Additional coverage was provided by the [AP](#) (10/8, 2.28M) and the [Christian Science Monitor](#) (10/7, 455K).

GLACIER NATIONAL PARK ON PACE TO BREAK VISITATION RECORD THIS YEAR. The [AP](#) (10/8, 2.28M) reports that "Glacier National Park could set a visitation record this year as the number of visits at the end of September remains above that counted at the same point last year, when the record was broken." The article notes that "Glacier visitation so far this year stands at more than 2.2 million, and is almost 23,000 people ahead of totals at the end of September last year."

AMATEUR HUNTERS WON'T BE ALLOWED IN EVERGLADES NATIONAL PARK DURING 2016 PYTHON CHALLENGE. The [Miami Herald](#) (10/8, 651K) reports that "ground zero for pythons in Everglades National Park will be off-limits to all but a handful of authorized python trappers during the 2016 Python Challenge." The article notes that "in early August, state organizers announced that the second Challenge set for January had for the first time expanded to include park territory, where authorized trappers would be required to turn live bagged snakes over to park officials." But "the news triggered complaints from an environmental group which said allowing hunters onto park territory set a bad precedent and wasted limited resources on an event with questionable results. National parks do not allow hunting." In an Sept. 25 letter, "park officials clarified strict registration requirements — including an apprenticeship with staff or training with the park's Python Control teams and a criminal background check — that will likely limit trappers in the park to about 36 volunteers already tracking snakes."

PHOTOGRAPHER SAYS PURCHASE OF GRAND TETON ELK LICENSE SHOWS RULES AREN'T BEING FOLLOWED. The [Jackson Hole \(WY\) News & Guide](#) (10/8, 1K) reports that "a Jackson photographer who has sued to stop the annual elk hunt in Grand Teton National Park has secured a license to shoot an elk starting Oct. 24." Timothy Mayo said he purchased "the license to show that officials are not following laws requiring park hunters to be qualified and experienced." Mayo, "a plaintiff in the 2014 suit against the U.S. Department of Interior and National Park Service," said "he purchased his license over the counter at the Wyoming Game and Fish Department office in Jackson without demonstrating any marksmanship abilities."

HOUSE COMMITTEE TO CONSIDER BILL OPENING PARKS TO PADDLING. The [AP](#) (10/8, 2.28M) reports that "a congressional committee will consider legislation to allow canoes, rafts and other 'hand-propelled' vessels to be used on hundreds of miles of rivers and streams in Yellowstone and Grand Teton national parks." The House Natural Resources Committee has scheduled a Thursday hearing on the bill from U.S. Rep. Cynthia Lummis.

NPS SIGNS CONTRACT WITH NEW YOSEMITE CONCESSIONAIRE. The [Fresno \(CA\) Bee](#) (10/8, 265K) reports that the NPS "on Wednesday signed a contract with Yosemite Hospitality, LLC, a subsidiary of Philadelphia-based Aramark, to provide concession services in Yosemite National Park." The agency "announced in June that it picked Aramark to oversee a new \$2 billion contract over DNC Parks & Resorts, a subsidiary of Delaware North Co., which has been the main concession operator since 1993." Yosemite Hospitality's 15-year contract starts March 1 2016.

FRESNO COULD LOSE 49 ACRES FOR PROPOSED PARK. [KFSN-TV](#) Fresno, CA (10/8, 137K) reports that “a 49 acre field just off of Peach Avenue, near Butler in Southeast Fresno used to be home to a federal plant research station,” and “when it shut down, the city of Fresno thought it would be a good place for a park.” The NPS “agreed, and deeded it to the city, but the city has dropped the ball, and the government could take the land back.” In a recent letter, the NPS said that “the city has been given 90 days to comply or” it is “forced to consider reversion of the property to federal ownership for re-disposal.”

NEVADA STATE PRISON ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [AP](#) (10/8, 2 28M) reports that the Nevada State Prison has been added to the National Register of Historic Places.

SHENANDOAH NATIONAL PARK VOLUNTEER SELECTED FOR NORTHEAST REGIONAL GEORGE AND HELEN HARTZOG AWARD. The [Martinsburg \(WV\) Journal](#) (10/8, 36K) reports that Shenandoah National Park Volunteer John Marklin has been “selected as the Northeast Regional George and Helen Hartzog Award.” Marklin, “who won the award in the Individual Volunteer category, logged over 4,000 hours of volunteer service, for serving as both peregrine falcon restoration site attendant and campground host.”

US Geological Survey:

USGS SCIENTISTS USE TWITTER TO MONITOR EARTHQUAKES. [CNN Money](#) (10/7, 2.15M) reports that since 2009, USGS seismologists have teamed up with Twitter to get emergency alerts of earthquakes. Users who tweet “earthquake” help “American scientists get better at tracking these destructive phenomena.” Paul Earle, a seismologist at the federal agency, said, “It’s not a revolutionary change in what we do, but it just gives us that extra minute to start on our response.”

Additional coverage was provided by the [Motherboard](#) (10/8, 10K).

BILL WOULD OVERHAUL VOLCANO MONITORING. [Wired](#) (10/8, 4.12M) reports that “two senators from across the aisle have introduced a bill to help improve and modernize volcano monitoring in the United States.” Sens. Cantwell and Murkowski’s new bill (S. 2065) would “create a National Volcano Early Warning and Monitoring System and unify the various volcano observatories under single umbrella.” It would also “create a National Volcano Watch Office that would operate around the clock and a National Volcano Data Center.”

Top National News:

OBAMA APOLOGIZES TO DOCTORS WITHOUT BORDERS FOR AFGHAN HOSPITAL BOMBING. Coverage of the President’s apology to Doctors Without Borders international president Joanne Liu – which included reports on all three network newscasts – highlighted the group’s undiminished outrage and its call for an independent, international investigation. [NBC Nightly News](#) (10/7, lead story, 2:55, Engel, 7.86M) reported in its lead story that the President’s apology “may be too late,” and Doctors Without Borders executive director Jason Cone was shown saying in response, “This doesn’t change anything. We appreciate the expression of condolences but it doesn’t change the fact we have 22 dead patients and staff that were killed as a result of this attack.” On its website, [TIME](#) (10/8, Worland, 19.55M) quotes Cone as further stating, “Today we say: enough. Even war has rules.”

[Fox News’ Special Report with Bret Baier](#) (10/7, 1.53M) reported that the Administration is “promising a transparent, thorough, and objective investigation,” but the group is still “calling for an international probe of what it considers a war crime.” The [CBS Evening News](#) (10/7, story 4, 0 35, Pelley, 5.08M) also noted in its brief report that the aid group “says it still wants an independent investigation,” while [USA Today](#) (10/8, Stanglin, Jackson, 5.23M) reports that Liu said “the strike ‘was not just an attack on our hospital, it was an attack on the Geneva Conventions,’” which “cannot be tolerated.” [Reuters](#) (10/8, Nebel, Bases) quotes Liu as also saying during her press conference in Geneva, “If we let this go, as if it was a non-event, we are basically giving a blank check to any countries who are at war. ... If we don’t safeguard that medical space for us to do our activities, then it is impossible to work in other contexts like Syria, South Sudan, like Yemen.”

On its website, [NBC News](#) (10/8, Abdullah, 3.73M) reported that the group “renewed its call...for an unprecedented international and independent humanitarian fact-finding commission,” sending “letters to 76 countries that have signed Article 90 of the additional protocol to the Geneva Conventions.” NBC noted that the US and Afghanistan, “which are not signatories,” would “have to give their consent to such a mission.” Interviewed by [Foreign Policy](#) (10/8, Hudson, 364K), Liu said, “We need an establishment of facts from a body that’s not going to have a conflict of interest in the matter. ... That’s essential to making a final determination to whether or not there was a war crime.” As [AFP](#) (10/8, Cartillier) reports, DOD, NATO, “and Afghan officials” are currently carrying out investigations into the incident.

[ABC World News](#) (10/7, story 7, 0:20, Muir, 5.84M) indicated – very briefly – that the White House said, “quote, ‘When the US makes a mistake, we own up to it, we apologize.’” The [Wall Street Journal](#) (10/8, Lee, Subscription Publication, 9 95M) notes that during his briefing yesterday, press secretary Josh Earnest he went on to say, “And we implement the kinds of changes that make it less likely that those kinds of mistakes will occur in the future.” [USA Today](#) (10/8, Stanglin, Jackson, 5.23M) reports that Earnest also “disputed claims the airstrike amounted to a war crime, saying there is no evidence ‘that this was anything other than a terrible, tragic mistake.’”

While the [Los Angeles Times](#) (10/8, Parsons, 4.07M) reports that “it wasn’t immediately clear what moved Obama to say he was sorry,” the [New York Times](#) (10/8, A1, Shear, Subscription Publication, 11.82M) indicates in a front-page story that Earnest “said the president had decided to issue the formal apology in the wake of testimony from the top general in Afghanistan before a congressional committee.” By yesterday morning, he added, “Obama had concluded ‘that he had learned enough about this matter to conclude that it was appropriate for him to offer an apology.’”

The [Los Angeles Times](#) (10/8, Parsons, 4.07M) also reports that Earnest “sidestepped the question of whether the White House would support the independent investigation that Liu has called for.” Along similar lines, the [Washington Post](#) (10/8, Deane, 6.76M) says Earnest “declined to say whether the White House would support demands from the aid group...for an independent probe.” [Politico](#) (10/7, 942K) notes, however, that Earnest said “Obama assured Liu that the Defense Department’s investigation would offer a ‘transparent, thorough and objective’ accounting of the facts and that he would follow through on any necessary changes.”

The [Tribune News Service](#) (10/8) reports that Obama’s call to Liu “came a day after the White House had stopped short of an apology,” and notes that “emerging details about the erroneous strike have only fueled growing condemnation by Doctors Without Borders and other aid groups.” Previously, says [The Hill](#) (10/7, Wong, 471K), “US officials...described the incident as having ‘collateral damage,’ and officials also appeared to at first blame Taliban forces or Afghan security.” The [Washington Times](#) (10/8, Boyer, 344K) also reports that on Tuesday, “the White House had refused to apologize publicly, citing three separate investigations that were underway.”

The [AP](#) (10/7) reports that the White House said Obama also “spoke with Afghan President Ashraf Ghani and pledged to keep working closely with his government.” According to [Voice of America](#) (10/8, 32K), Obama expressed his condolences and commended “Afghan forces for their bravery in the fight to control the northern Afghan city in clashes with Taliban insurgents.”

In an interview on [CNN’s Situation Room](#) (10/7, 554K), Rep. John Garamendi, a member of the Armed Forces committee, also called for a “fully transparent discussion and investigation,” and argued that the US should cooperate and allow for an international investigation. Said Garamendi, “It’s our reputation at stake. We’re an open country. What are we hiding here? Are we hiding a mistake? That would be a serious problem. Get it out there.”

Ross Baker, distinguished professor of political science at Rutgers University and member of the Board of Contributors of [USA Today](#) (10/8, Baker, 5.23M), writes in this morning’s edition that calling the incident a “war crime” is “characteristic of the overheated, inflammatory rhetoric used these days by modern media to capture the attention of a jaded public suffering from sensory overload that has become increasingly receptive to hyperbole, exaggeration and sometimes even outright falsehood.” Baker adds that “such language tends to conflate mistakes and malice and equates stupidity with sin,” and that “Doctors Without Borders cheapens the value of its own indignation by raising what seems to have been a deadly mistake to the level of a wanton moral transgression.”

NYTimes Analysis: “Frustrations” In Kunduz “Boiling” Before Taliban Assault. The [New York Times](#) (10/8, Rubin, Subscription Publication, 11 82M) reports that “frustrations” in Kunduz province “had been boiling even before the Taliban’s recent assault.” According to the Times, officials and residents of Kunduz “described feeling abandoned by the government, and left at the mercy of local strongmen and militia leaders — including the Afghan Local Police — and, in recent months, to the steady advance of the Taliban toward the city.” The Times says “that distrust has manifested itself in ethnic and factional divisions that carry uncomfortable echoes of the Afghan civil war.”

SOME ROSEBURG RESIDENTS FEAR OBAMA WILL “POLITICIZE” SHOOTINGS. The [Washington Times](#) (10/8, Boyer, 344K) reports that amid concerns from residents of Roseburg, OR that the President, who will visit the community on Friday, “intends to politicize” the recent shooting rampage at Umpqua Community College, White House press secretary Josh Earnest said, “Those individuals have nothing to fear,” adding, “The president’s made clear that the goal of his visit is to spend time with the families of those who were so deeply affected by this terrible tragedy. ... That’s the purpose of the president’s trip.” In its “The Oval” blog, [USA Today](#) (10/8, Jackson, 5.23M) noted that Roseburg Beacon publisher David Jaques told Fox News that the President “is not welcome because residents believe he will ‘grandstand for political purposes.’”

The [New York Times](#) (10/7, Healy, Turkewitz, Subscription Publication, 11.82M) says the President’s visit has “stirred fiercely polarized responses,” and notes that many residents “are bristling at his renewed call for stricter gun laws,” adding that in some ways, last week’s shooting “has actually tightened the embrace of guns” in the town.

Senate Democrats To Unveil "Sweeping" Gun Legislation Thursday. [Politico](#) (10/8, Everett, Kim, 942K) reported that at a press conference Thursday, Senate Democrats will unveil "a sweeping package of legislation" being prepared by party leaders to build on "their failed 2013 attempt to require universal background checks for gun purchases, according to senators and aides." According to "sources familiar with the package," in addition to the background checks, the legislation, which is "unlikely to be officially introduced this week," will "add new money for the Justice Department's existing background checks system that has recently faltered and include provisions to prevent domestic abusers from buying guns." It also aims to ensure that all key records are sent to a federal database and would make straw purchasing a federal crime, and is "expected to include a proposal from Sen. Patrick Leahy (D-Vt.) intended to cut down on gun trafficking."

The [New York Times](#) (10/8, Hershenhorn, Subscription Publication, 11.82M) says Democrats are beginning "a new push for gun control legislation in the Senate and plan to block other bills until their measures get a vote." While the package "has little chance of passage in the Republican-controlled chamber," Democrats are "mindful of trying to put Republicans, especially those running for re-election in swing states in 2016, on record as opposing the measures."

WPost's Sargent: Administration Skeptical Key Clinton Gun Proposal Can Work. In the "Plum Line" blog on the website of the [Washington Post](#) (10/8, Sargent, 6.76M), Greg Sargent wrote that "one of the most newsworthy and controversial ideas" Hillary Clinton laid out this week in announcing several gun-control proposals was a pledge "to use executive action as president to fix the background check system if Congress" doesn't address the issue. However, "the Obama administration has already" weighed "the same executive-action" idea, "and has doubts over whether it can be made to work in practical terms, according to current and former senior administration officials." Sargent said the executive-action idea was among several proposals the Obama Administration considered in the wake of the 2013 Newtown shooting spree. Sargent quoted a "senior administration official" as saying, "It was very clear that it was way more complicated than the other stuff being looked at."

Boehner Blasts Democrats Over Gun Violence. House Speaker Boehner took a shot at Democrats on Wednesday, charging that if they "really cared about gun violence, they would have done something about it when they were running Washington," the [Huffington Post](#) (10/7, McAuliff, 164K) reported. Boehner's comments came in response to a question "about whether or not Congress should reconsider barring the Centers for Disease Control and Prevention from studying gun violence as a health issue." Boehner said, "In '09 and '10, we had Democrat majorities in the House and Senate. We had a Democrat president. And this clearly was not a priority for them. The president can rail all he wants."

Police Say Oregon Gunman Killed Himself. Police officials said Wednesday that the gunman in last week's shootings, Christopher Harper-Mercer, committed suicide in the classroom where most of the shootings took place. The [New York Times](#) (10/8, Turkewitz, Subscription Publication, 11.82M) reports that the Oregon State Police said in a news conference that after an exchange of gunfire with police, during which he was struck on the right side, Harper-Mercer returned to the classroom "where he had killed his teacher and fellow students" and shot himself. On [NBC Nightly News](#) (10/7, story 4, 1:45, Holt, 7.86M), Miguel Almaguer reported on Roseburg Detective Todd Spingath and Detective Sgt. Joe Kaney, who "heard the urgent calls for help on their radio" and "rushed directly toward the gunfire." The detectives, who exchanged fire with Harper-Mercer, hitting him in the side, "say they don't want to be called heroes," but "there are few other ways to describe them."

The [Wall Street Journal](#) (10/8, Frosch, Kesling, Subscription Publication, 5.95M) cites law enforcement officials who say Harper-Mercer was discharged from Army basic training after only a month following a suicide attempt.

Public Safety Experts Take Issue With Carson's Comments. The [AP](#) (10/8) reports that "public safety experts" are taking issue with Ben Carson's "call for those caught in mass shootings to rush the attacker." These experts, which include the FBI, say rushing a shooter "should only be used as a last resort." Julianna Goldman noted on the [CBS Evening News](#) (10/7, story 5, 2:20, Pelley, 5.08M) that in an appearance on "CBS This Morning" Wednesday, Carson "doubled down, repeating the suggestion that victims of last week's mass shooting at an Oregon community college could have done more to protect themselves." Tom Llamas said on [ABC World News](#) (10/7, story 4, 1:40, Muir, 5.84M) that Carson is "standing firmly behind his comments," adding that he "didn't seem to know about Chris Mintz, the army veteran who did rush the shooter and saved lives, though he was shot seven times." Carson "now says Mintz did exactly what should be done."

While the [AP](#) (10/8) notes that Carson is receiving "no support...from his presidential rivals," Llamas said on [ABC World News](#) (10/7, story 4, 1:40, Muir, 5.84M) that Carson is "getting support from his top rival," Donald Trump, who said "the whole Carson controversy is overblown."

Highlighting comments about the shooting from Carson and other Republican presidential hopefuls, the [Washington Post](#) (10/8, 6.76M) says in an editorial that the "increasingly unhinged commentary" from the GOP field is "worthy of attention, if only for what they say about the poverty of the argument against regulation of gun ownership." The Post argues that the Republican candidates are "tying themselves in knots on this issue, because there's no logical way to refute" that fact that "countries that do not allow so many guns to circulate so freely lose many, many fewer of their citizens to gun crimes or accidents."

Bush Says He Understands, But Disagrees With, Gun Control Advocates. The [CBS Evening News](#) (10/7, story 6, 2:00, Pelley, 5.08M) reported CBS' Major Garrett asked Jeb Bush about Ben Carson's comments on the victims of mass shootings Tuesday. Garrett said Bush "said the focus should be on the victims' families and that he has compassion for those calling for stricter gun laws but disagrees." Bush: "I know they're acting on their heart. Name a case where gun rights being restricted out of Washington would have changed the course of any of those cases. The bigger problem right now is that we have people that have growing despair, that are isolated from society, they're disconnected from the rest of us, and spiral out of control, and then commit these atrocious acts of violence, in many cases commit suicide."

Dionne: Gunmakers Must Be Held Accountable. In his [Washington Post](#) (10/8, Dionne, 6.76M) column, E.J. Dionne argues that the debate over guns must be "recast" as "a fight to hold those who make billions of dollars from the sale of firearms accountable for what their products do to individuals and communities." Noting that the Industrial Areas Foundation is "pushing the president to use the federal government's purchasing power to promote safer guns" by requiring companies seeking to do business with the government to "remove the barriers to getting smart guns and gun safety technologies to market" and "cooperate with law enforcement to 'identify and isolate dealers that provide large numbers of guns used in crimes.'"

JOHNSON OBAMA POLICIES PROMPTED DROP IN BORDER ARRESTS, DEPORTATIONS. The [Washington Times](#) (10/8, Dinan, 344K) reports that in remarks to the Congressional Hispanic Caucus Institute's convention on Wednesday, DHS Secretary Johnson cited as "successful outcome of President Obama's immigration policies," the decline in border arrests and deportations. According to Johnson, "only about 331,000 illegal immigrants were caught on the border in fiscal year 2015," which is "the lowest number since 2011." Johnson said, "Our investments in border security have led to these results."

Senate Plans Vote On Bill Targeting "Sanctuary Cities." [Politico](#) (10/7, Kim, Everett, 942K) reported that Senate Republicans plan to hold a vote later this month on a "controversial immigration bill later this month" to punish "sanctuary cities that give safe harbor to immigrants here illegally." Sen. David Vitter's legislation would target such cities "by withholding key federal grants and increasing prison sentences for those who try to re-enter the United States after being deported."

Surge In Border Apprehensions Sparks Fears Of Another Crisis. [McClatchy](#) (10/8, Ordoñez, 28K) reports that there are "concerns about the potential of another migrant crisis" amid an "unexpected summer upsurge in the number of unaccompanied children and migrant families apprehended along the southwest border." McClatchy notes that in August, more than "4,500 unaccompanied children and 5,100 families were apprehended," which is "greater than any previous August since at least 2011." According to "experts," if "the upswing continues... it could be a sign of a meaningful trend." While US Customs and Border Protection "acknowledged a rise in the number of children and parents stopped at the border in July and August," it "emphasized that apprehensions are down overall for the year."

WSJournal: Report Finds Most Immigrants Are Assimilating. In an editorial, the [Wall Street Journal](#) (10/8, Subscription Publication, 5.95M) highlights a new report from the National Academies of Sciences, Engineering, and Medicine, which found that most immigrants to the US are assimilating, belies arguments from Donald Trump and others that immigrants to the US are committing crimes and receiving welfare.

In his [Washington Post](#) (10/8, Meyerson, 6.76M) column, Harold Meyerson similarly argues that the "immigrant crime wave that right-wing media and many Republican politicians rail about...is either a figment of their imaginations or an article of faith that, whatever their individual beliefs, they seek to instill or inflame in their followers." Meyerson says those beliefs "are as valid as their predecessors' claims that the Irish or the Chinese, say, posed a danger to the United States and that no more of them should be allowed in."

Editorial Wrap-Up:

NEW YORK TIMES. "A Step Toward Justice In The Release Of 6,000 Prisoners." The [New York Times](#) (10/8, Subscription Publication, 11.82M) editorializes, "When a nation locks up as many people as indiscriminately as the United States does, even big numbers start to lose their meaning." The release of 6,000 federal prisoners at the end of the month "following a decision last year by the United States Sentencing Commission to reduce sentencing guidelines for many nonviolent drug crimes" may sound like a lot, but "more than 2.3 million people are behind bars in America." The release "is just a small step toward more efficiency and justice."

"Alabama Puts Up More Hurdles For Voters." The [New York Times](#) (10/8, Board, Subscription Publication, 11.82M) editorializes that Alabama's decision to "close 31 driver's license offices across the state, including those in every county in which blacks make up more than 75 percent of registered voters," will combine with its recent voter-ID law to "make it even more difficult for many of the state's most vulnerable voters" to obtain a common form of identification needed to cast a ballot.

"America's Gun Madness, As Seen From Europe." In a [New York Times](#) (10/8, Kamdar, Subscription Publication, 11 82M) "Editorial Observer" piece, Mira Kamdar compares gun laws in the US and France, saying that the fact that Christopher Harper-Mercer obtained five handguns, an assault rifle, and several magazines of ammunition before carrying out the mass shooting in an Oregon college is "unimaginable" in her home country. Kamdar says "limits on gun possession in France mean that people can go about their daily lives without fear of dying at the hands of shooters at school, stores or movie theaters."

WASHINGTON POST. "Republican Candidates' Dangerous Incoherence On Guns." Highlighting comments about the mass shooting in Oregon shooting from Ben Carson and other Republican presidential hopefuls, the [Washington Post](#) (10/8, 6.76M) says in an editorial that the "increasingly unhinged commentary" from the GOP field is "worthy of attention, if only for what they say about the poverty of the argument against regulation of gun ownership." The Post argues that the Republican candidates are "tying themselves in knots on this issue, because there's no logical way to refute" that fact that "countries that do not allow so many guns to circulate so freely lose many, many fewer of their citizens to gun crimes or accidents."

"Hillary Clinton Was Right To Speak Up On Syria." An editorial in the [Washington Post](#) (10/8, 6.76M) praises Hillary Clinton for "touch[ing] off an important and overdue debate among Democrats about US policy in Syria" by saying she "favored the creation of a no-fly zone and humanitarian corridors 'to stop the carnage on the ground and from the air,' some of which is now being inflicted by Russian bombers." The Post argues that "by declining to protect moderate forces from Russian bombing, Mr. Obama is advancing the end state Mr. Putin seeks," and Clinton "was right to speak up."

"America's Voting Machines Are In Serious Need Of An Upgrade." The [Washington Post](#) (10/8, 6.76M) says in an editorial that "most Americans use voting machines that are at least a decade old and based on engineering and designs from the 1990s. The perils of ignoring the latter may not be apparent until the electoral system is suddenly wracked by mishaps. ... Unfortunately, the likelihood of major dysfunction grows as voting machines age." While funding for upgrades has been short, "at some point in the not-distant future, there is an excellent chance that electoral disasters will shake loose funding for upgrades; when that happens, local officials should be ready to move."

WALL STREET JOURNAL. "Those Assimilating Immigrants." In an editorial, the [Wall Street Journal](#) (10/8, Subscription Publication, 5.95M) highlights a new report from the National Academies of Sciences, Engineering, and Medicine, which found that most immigrants to the US are assimilating, belies arguments from Donald Trump and others that immigrants to the US are committing crimes and going on welfare.

"Hillary Trade Places With Clinton." In an editorial, the [Wall Street Journal](#)

DOI in the News:

SECRETARY JEWELL ANNOUNCES \$186 MILLION SETTLEMENT OF TRIBAL TRUST LAWSUIT. The [AP](#) (10/7, 51K) reports that Interior Secretary Sally Jewell says "a \$186 million settlement has been reached with the Chickasaw and Choctaw nations over the government's handling of some tribal resources and properties." Jewell announced "the settlement Tuesday at a ceremony at the Choctaw Nation headquarters in Durant." The deal "ends a nine-year lawsuit alleging the federal government mismanaged 1.3 million acres of timberlands in southeastern and south-central Oklahoma, with some claims more than 100 years old." Under the agreement, "the government will pay the Chickasaw Nation \$46.5 million and the Choctaw Nation \$139.5 million. In return, the tribes will dismiss their lawsuit and set aside future litigation."

The [Oklahoman](#) (10/7, 408K) reports that Jewell said "she also hoped the agreement would help establish better relations between the two tribes and the federal government." She said "It recognizes that there has been a very painful history between the Choctaw Nation and the Chickasaw Nation and the United States government."

Additional coverage was provided by the [Oklahoma Journal Record](#) (10/5, 9K), the [Tulsa \(OK\) World](#) (10/7, 364K), the [Sherman \(TX\) Herald Democrat](#) (10/7, 568), the [Washington \(DC\) Times](#) (10/7, 344K), the [Navajo Times \(AZ\)](#) (10/7, 66K), the [Native American Times](#) (10/7, 337), [KOTV-TV Tulsa \(OK\)](#) Tulsa, OK (10/7, 81K), [KXII-TV Sherman \(TX\)](#) Sherman, TX (10/7, 46K), [KGOU-FM](#) Norman, OK (10/7, 2K), and [KTEN-TV](#) Sherman, TX (10/7, 1K).

SECRETARY JEWELL BACKS PACIFIC RIM TRADE. [Alaska Dispatch News](#) (10/5, 219K) reports that "the U.S. reached an agreement Monday on a massive trade deal with 11 Pacific Rim countries that could have a major impact on Alaska seafood exports." The environmental provisions of the Trans-Pacific Partnership are "meant to address logging, illegal wildlife tracking, and 'illegal, unreported, or unregulated fishing,' according to the U.S. trade office." Interior Secretary Sally Jewell called it a "historic accomplishment." Jewell said, "The TPP holds important tools to move trading partners toward more sustainable development – helping to protect precious natural resources and combat wildlife trafficking, illegal logging and illegal, unreported and unregulated fishing. It also includes commitments to conserve species like rhinos, elephants and pangolins and protect natural areas and forests."

SENATE IN "STALEMATE" OVER LWCF. [Politico Pro](#) (10/6) reports that Sen. Richard Burr says the Senate is "in 'sort of a stalemate' over his effort to reauthorize the Land and Water Conservation Fund by amending bipartisan legislation updating the Toxic Substances Control Act." Burr "acknowledged he is blocking quick consideration of the TSCA update until he secures an LWCF vote, and Sen. Kelly Ayotte (R-N.H.) announced through a spokeswoman that she was joining the effort."

Additional coverage was provided by [The Hill](#) (10/7, Henry, 471K).

PUBLIC EDUCATION LEADERS IN UTAH RAISE CONCERNS OVER NATIONAL MONUMENT DESIGNATIONS. The [St. George \(UT\) Spectrum](#) (10/6, 46K) reports that "leaders in public education within Utah have voiced their concerns over the long-term impacts national monument designations could ultimately have on school land." For instance, Tim Donaldson, School Children's Trust director for the Utah State Board of Education, said "designations, such as the proposed Bears' Ears Monument, would capture school trust lands." According to the article, "in turn, this would make these areas of land virtually undevelopable, therefore causing schools to lose money."

NEW STUDY LINKS INCREASED WILDFIRES IN ROCKIES TO CLIMATE CHANGE. The [AP](#) (10/7, 6.76M) reports that new research published Monday from scientists at the University of Wyoming suggests that the recent, more extreme wildfire seasons in the Rocky Mountain region could become more common due to global climate change. Study co-author John Calder said that people in the region should expect "a new normal" to wildfire cycles with larger and more frequent blazes.

HASKELL INDIAN NATIONS UNIVERSITY SEEKS INDEPENDENCE. The [Kansas City \(MO\) Star](#) (10/7, 566K) reports that "government red tape...has an impact on staffing" at Haskell Indian Nations University. Interior Secretary Sally Jewell "acknowledged the staffing concerns following the commencement address she gave at last spring's graduation." She said, "The funding hasn't kept up. We really need Congress to step up and support the budget for Indian education." But Haskell can "only expect 'stable funding' from the Department of Interior over the next couple of years," according to the office of U.S. Rep. Lynn Jenkins.

BEAR STORY MADE FROM VINE VIDEOS. [BuzzFeed](#) (10/7, 10.73M) compiles Vine videos from The Department of The Interior's Twitter, Explore.org and BEARCAM to form a narrative.

WACO MAMMOTH DESIGNATION LAUDED. In a piece for the [Austin \(TX\) American Statesman](#) (10/6, Subscription Publication, 415K), Jody Seaborn lauds the dedication of the Waco Mammoth National Monument. Seaborn says that "adding the 'national monument' label to the site strengthens the good stewardship already taking place there and guarantees its continuation." Seaborn concludes by congratulating "all involved."

FEDERAL MANAGEMENT OF PUBLIC LANDS CRITICIZED. For the "Congress" blog of [The Hill](#) (10/7, Stewart, 471K), Rep. Chris Stewart questions why "people who don't live in my state, and have probably never even been there, get to decide what happens to that land." He notes that "federal ownership means the western communities which surround that land and which are most impacted by the decisions of federal land managers have little to no say in the name, let alone the policies that govern that land." According to Stewart, "that might be merely irritating if the feds did a decent job managing public lands," but because "they don't," it's "much more than just irritating; it's a disaster."

[Breitbart](#) (10/6, 1.49M) provides five examples of federal decisions that show "responsible land use."

SUPREME COURT TO HEAR UTAH ROADS CASE. In an op-ed for the [Denver Post](#) (10/7, Pendley, 787K), William Perry Pendley, president and CEO of the Mountain States Legal Foundation, writes that the U.S. Supreme Court on Friday is scheduled to consider whether to take a Utah roads case. Pendley criticizes the ruling by a panel of the U.S. Court of Appeals for the 10th Circuit, blasting the reasoning, and its conflict with earlier 10th Circuit rulings.

Empowering Native American Communities:

CHINOOK TRIBE TRIES NEW TACTIC IN ONGOING QUEST FOR FEDERAL RECOGNITION. [Oregon Public Broadcasting](#) (10/7, 20K) reports that the Chinook Indian Nation is "taking a new approach" in its quest for federal recognition. According to the article, "every day for the last three months," Tribal Chairman Tony Johnson has "sent President Barack Obama a letter requesting clarification of tribal status via executive order."

TRIBES FILES LAWSUIT OVER EDUCATION REFORMS. The [Courthouse News](#) (10/6, 7K) reports that "the Department of the Interior and the Bureau of Indian Education are trampling tribal rights with their new 'Blueprint for Reform,' according to a lawsuit filed by the Cheyenne River Sioux Tribe in a South Dakota federal court on Oct. 2." According to the tribe's complaint, "the reforms would reduce staff at reservation educational line offices that serve to provide federal oversight and resources-such as grant money and special education-to tribal schools." The article notes that "some of the offices would be closed or consolidated into educational resource centers located in urban areas, sometimes hundreds of miles from the reservation, the tribe says, adding that the government did not properly consult it about the reforms – a violation of earlier treaties."

BIA SHOWS INGENUITY IN MASHPEE CASINO SITE RULING. [Law 360](#) (10/7, 21K) reports that "a recent decision by the Bureau of Indian Affairs to take land into trust for a Massachusetts tribe's planned \$500 million casino project highlights the agency's inventiveness in working around restrictions on such acquisitions and lays out a novel approach the agency looks ready to defend, experts say." The bureau "approved the Mashpee Wampanoag Tribe's request to have tribe-owned land in Mashpee and Taunton, Massachusetts, taken into trust for its First Light Casino project on Sept. 18."

NAVAJO ASK EPA FOR ROLLING MINE SPILL COMPENSATION. The [Greenwire](#) (10/6, Subscription Publication) reports that “the Navajo Nation requested that U.S. EPA supply formal assurances that ‘all claims, known and unknown’ stemming from the Gold King mine spill will be fully paid out.” Navajo Nation Attorney General Ethel Branch “raised concerns about EPA’s claims process, asking the agency to confirm that accepting compensation does not eliminate the potential for future claims, as tribal members are in need of immediate assistance.” Branch said, “We need to assure our people, who are concerned for their futures, that their injuries will not go ignored.”

REPORT SAYS NAVAJO NATION’S JAILS COST MORE THAN NEEDED. The [AllGov](#) (10/7, 2K) reports that “the Navajo Nation, the nation’s largest Indian reservation, has two brand new jails that wound up costing far more than they should have, raising questions about spending on the projects.” According to a report from the Department of Justice’s inspector general, “the jails, which are largely empty, cost the federal government \$70 million in economic stimulus grants to build, but should have cost less than \$40 million.” Inspector General Michael E. Horowitz said “more than \$32 million of the money wound up being spent on the jails’ ‘excessive’ and ‘larger than planned’ size.”

Additional coverage was provided by the [Native American Times](#) (10/7, 337).

FEDERAL RECOGNITION OF VIRGINIA TRIBES URGED. In an op-ed for the [Richmond \(VA\) Style Weekly](#) (10/7, 73K), Dale Wolf and Jack Fehino, members of the Maggie L. Walker Governor’s School class of 2011, write that “in February, U.S. Sens. Tim Kaine and Mark Warner introduced the bipartisan Thomasina E. Jordan Indian Tribes of Virginia Federal Recognition Act,” and “while further action on this bill looms, similar bills aiming to cover additional tribes in Virginia and other states have advanced from the Senate Subcommittee on Indian Affairs, but the full body has yet to hear them.” They note that “if successful, then the legislation that Kaine and Warner introduced would grant federal recognition to half a dozen Virginia groups: the Chickahominy tribe, the Eastern Chickahominy tribe, the Upper Mattaponi tribe, the Rappahannock tribe, the Monacan Indian Nation and the Nansemond tribe.” But “unfortunately, efforts to get this law or something like it passed have been severely complicated by a relic of more prejudiced times.”

Office of Insular Affairs:

PUERTO RICO DUMP CLOSURE ONGOING. The [Saipan \(MNP\) Tribune](#) (10/6, 641) reports that “tires, wood, and other debris extraction is ongoing at the Puerto Rico dump, as the closure project enters its fourth month since a notice-to-proceed was given in May to turn the regulation-violating dump site into an eco-friendly community park, said one of the officials overseeing the project yesterday.” Carl Castro, of the Office of the Governor’s Capital Improvement Projects Office, said, “Project is on schedule.” The article notes that “the dump closure project kicked off last June, with CNMI and Office of Insular Affairs officials attending a groundbreaking ceremony.”

Tackling America’s Water Challenges:

CALIFORNIA’S FEDERAL RESERVOIRS IN WORSE SHAPE THAN LAST YEAR. The [Sacramento \(CA\) Bee](#) (10/7, 535K) reports that “in the latest indicator of the severity of the drought, the federal government’s main reservoirs serving California have begun the new ‘water year’ at just a quarter full and in worse shape than last year.” The BOR said Tuesday that “the six key reservoirs of the Central Valley Project were a combined 200,000 acre-feet below the same time last year, a difference of about 6 percent.” In total, “the reservoirs, including Shasta and Folsom, are just 24 percent full.”

Securing America’s Energy Future:

Onshore Energy Development:

REPORT SAYS COAL ROYALTIES SHOULD BE UPDATED. [US News & World Report](#) (10/6, 811K) reports that “coal companies should be charged as much as five times what it costs them for surface mining on federal lands, according to a new report from a nonpartisan think tank at the New York University School of Law.” The study notes that “the royalties that companies pay to mine coal on federal lands have not been upgraded in decades, and through a variety of loopholes and incentives, companies have been allowed to fork over just a fraction of what would seem to be required by law – leaving as much as \$1 billion a year on the table for the past 30 years.” Jayni Hein, the study’s lead author and policy director at the NYU School of Law’s Institute for Policy Integrity, which released the report this week, said, “In some cases, it’s gaming the system, in other cases, it’s using the rules to the best of their advantage. There’s no reason these companies should be able to lease coal for the same price they were able to decades ago.”

BLM, ALASKA HOLDING SEPARATE OIL, GAS LEASE SALES. The [EnergyWire](#) (10/6, Subscription Publication) reports that the BLM and state of Alaska are “holding separate oil and gas lease sales next month in northern Alaska, the two governments announced last week.” The BLM is “offering leases on 1.5 million acres of land in the National Petroleum Reserve-Alaska in the northwest corner of the state.” The Alaska Division of Oil and Gas is “opening bidding on tracts in state waters in the Beaufort Sea, on the North Slope and in the North Slope Foothills area.”

USGS STUDY MONTEREY SHALE HOLDS LESS FRACKING POTENTIAL THAN THOUGHT. The [AP](#) (10/7, Knickmeyer) reports on Tuesday, the U.S. Geological Survey (USGS) downgraded “the fracking potential of California’s vast Monterey Shale oil deposits,” with its newest USGS study saying that “most oil-rich portion of the giant shale formation holds just 21 million barrels of oil that can be recovered by intensive methods, such as hydraulic fracturing.” The piece adds the USGS study only quantified the San Joaquin Basin and that upcoming surveys “will estimate the recoverable petroleum in the other three basins.”

FORMER GLACIER NATIONAL PARK SUPERINTENDENTS OPPOSE LEASES IN BADGER-TWO MEDICINE. In an op-ed for the [Missoulian \(MT\)](#) (10/7, 116K), former Glacier National Park superintendents Phillip Iverson, Robert Haraden, H. Gilbert Lusk, Suzanne Lewis, Michael (Mick) Holm and Chas Cartwright, agree with the Blackfeet Nation that the Badger-Two Medicine is “sacred ground.” The authors note that “they have made many good-faith efforts to swap or to buy out these remaining leases – because they maintain that due to the fragile and pristine nature of the Badger-Two Medicine and Blackfeet culture, industrial development cannot be mitigated.” They argue that “industrial energy development of this world-class resource would represent an intolerable assault to the ecological and cultural values of Glacier National Park, as well as to the Blackfeet people.”

Offshore Energy Development:

LYNCH BP RECEIVES “LARGEST PENALTY IN THE HISTORY OF ENVIRONMENTAL LAW.” In continuing coverage, the [Christian Science Monitor](#) (10/6, 455K) reports the Department of Justice’s \$20.8 billion settlement with BP over its handling of the Deepwater Horizon oil spill “may mark the beginning of the end of an especially dark chapter in environmental history.” The fines consist of several separate funds to be paid out over time. These funds include \$5.5 billion, which Attorney General Loretta Lynch says is “the largest civil penalty in the history of environmental law.” Lynch said at a Tuesday morning press conference: “At trial, our litigation team proved that the spill was the result of BP’s gross negligence. BP is receiving the punishment it deserves, while also providing critical compensation for the injuries it caused to the environment and the economy of the Gulf region,” adding, “I am proud that the Department of Justice has helped lead the way from tragedy to opportunity.”

Experts Defend Long Payout For BP Oil Spill Settlement. The [New Orleans Times-Picayune](#) (10/6, 718K) reports that according to some experts, a slow payout of BP’s \$20 billion settlement over the 2010 Gulf of Mexico oil spill over the course of 15 years could actually benefit Louisiana and other coastal states. Supporters of the extended timeline say it will ensure the settlement money “is distributed efficiently and actually used as intended,” whereas “dumping a large pot of money on the coast is a recipe for problems and waste.” The long payout also benefits BP, as the company is able to earn interest on the money it sets aside for the oil spill payments.

Louisiana Indian Tribe Says BP Still Liable For Gulf Oil Spill Damages. [Reuters](#) (10/6, Rascoe) reports that a Louisiana Indian tribe filed a lawsuit last Thursday claiming that BP Plc. is liable for damage to the tribe’s cultural and natural resources because of damage from the 2010 Gulf of Mexico oil spill.

ENVIRONMENTALISTS EMBOLDENED BY SHELL’S EXIT FROM ARCTIC. The [Houston Chronicle](#) (10/2, Dlouhy, 2.28M) reported that environmentalists opposing Arctic oil drilling “have claimed a high-profile success against Shell and aim to funnel the resulting enthusiasm into other fights against fossil fuels.” The Chronicle reported that “asked if the protests factored into its thinking, Royal Dutch Shell, which has its North American operations based in Houston, referred to a statement last week that cited the well results, high costs and challenging regulations.” Added the Chronicle, “There was no mention of environmentalists.”

America’s Great Outdoors:

Bureau of Land Management:

BLM DECISION COMPLICATES CADIZ PLAN TO SELL MOJAVE GROUNDWATER. The [Greenwire](#) (10/6, Subscription Publication) reports that the BLM “rejected a California company’s plan to build a water pipeline connecting Mojave Desert groundwater to 100,000 homes in urban Southern California.” In a letter, BLM California Director Jim Kenna “told Cadiz Inc. it cannot avoid a federal environmental review by using an existing railroad right of way for its 43-mile pipeline.” Cadiz President Scott Slater said that “he was ‘disappointed the BLM decided to take a political path’ but planned to continue pursuing ‘all legal remedies.’”

SUPPORTERS OF ATV PROTEST RIDERS COMMENT ON SOCIAL NETWORK. The [Salt Lake \(UT\) Tribune](#) (10/7, 492K) reports that “San Juan County Commissioner Phil

Lyman's Facebook page, where his online friends continue to comment on his conviction and pending sentencing for arranging a protest ATV ride on protected Bureau of Land Management turf, reveals the mentality of his supporters." Lyman political ally and San Juan County Assessor Shelby Seely wrote, "Not sure why the government would want an illegal immigrant to run the BLM." Seely was "referring to former state BLM Director Juan Palma, whom Lyman supporters allege set up the commissioner by leading him to believe that he had the agency's blessing to ride in Recapture Canyon."

Fish and Wildlife Service:

SAGE GROUSE DECISION MARKS SHIFT IN APPROACH TO CONSERVATION. The [Christian Science Monitor](#) (10/6, 455K) reports that "the sage grouse is an unlikely lightning rod for public policy reform, but the eccentric-looking bird now finds itself at the center of a debate over the future of conservation of endangered wildlife in the United States." The decision last month by the Interior Department "not to list the sage grouse on the endangered species list and instead to put forth a kind of collaborative plan for the species' survival may mark a turning point in the country's approach to conservation." According to the article, "some environmentalists will now argue that in order for conservation to truly succeed, it must work on a macro-scale, with more than a single species as its focus," and "instead, they say, looking at entire ecosystems, as well as acknowledging the benefits that nature provides to humans, could be the path to conservation."

Additional coverage was provided by the [Blue Mountain \(OR\) Eagle](#) (10/6, 7K) and [Atlas Obscura](#) (10/7).

Report Highlights Success Stories Of ESA. [E&E Publishing](#) (10/6, 705) reports that "the Endangered Species Act has sparked partnerships between government regulators and private landowners that have restored imperiled species without the need for federal protection, according to a new report arguing that the landmark environmental law is working." "The report by the Sand County Foundation, "which works with private landowners on voluntary conservation efforts, highlights six so-called success stories, including the decision last month by the Fish and Wildlife Service not to pursue an ESA listing for the greater sage grouse."

HAWAII YET TO BAN IVORY SALES. The [Washington Post](#) (10/7, Fears, 6.76M) reports that "a thriving ivory retail market has placed Hawaii behind only New York and California in sale volume at a time when massive numbers of elephants are being illegally slaughtered for their tusks." However, "now, after California's governor signed a ban on sales Sunday and New York instituted a ban last year, Hawaii stands alone among America's big three as a place where the artifact can be sold over the counter for cash." The article notes that "at least three attempts at bans in the state House and Senate fell apart against a wall of opposition from merchants."

Washington State Voters Urged To Support Initiative 1401. For "The Blog" of the [Huffington Post](#) (10/7, Wasser, 164K), Sam Wasser, Director of the University of Washington Center for Conservation Biology, writes that his "work on analyzing DNA samples taken from confiscated shipments of illegal African elephant ivory has helped us pinpoint where the bulk of elephant poaching is taking place." He says that "in Washington State, we have the opportunity to make a big difference this November by supporting Initiative 1401, a statewide ballot measure before voters this fall." He notes that "California and New York are already working towards ending illegal wildlife trade in their states." If Washington does "the same, the three largest ports in the U.S. will be sending a collective message that environmental security and economic security must go hand in hand for us to live in a sustainable world."

FWS RELEASES RARE FERRETS AT ROCKY MOUNTAIN ARSENAL NATIONAL WILDLIFE REFUGE. The [Greenwire](#) (10/6, Subscription Publication) reports that 30 black-footed ferrets were released at Rocky Mountain Arsenal National Wildlife Refuge on Monday. It was the "latest in a decades-long effort among the federal government, Western states and landowners to recover one of North America's most endangered species."

Additional coverage was provided by the [Albuquerque \(NM\) Journal](#) (10/7, 259K), the [Salem \(OR\) Capital Press](#) (10/6, 113K), the [Christian Science Monitor](#) (10/6, 455K), [Clapway](#) (10/6), [Tech Times](#) (10/6, 171K), [AOL](#) (10/6, 6.06M), and [KCNC-TV Denver \(CO\)](#) Denver (10/6, 79K).

SURVEY FINDS FEDERAL SCIENTISTS CONCERNED ABOUT POLITICAL MEDDLING IN WILDLIFE DECISIONS. The [Greenwire](#) (10/6, Subscription Publication) reports that "a majority of scientists at the Fish and Wildlife Service and National Oceanic and Atmospheric Administration believe their agencies give too much consideration to 'political interests,' according to a recent survey from a science advocacy group." The Union of Concerned Scientists "survey – which was sent to 37,593 scientists and technical experts at FWS, NOAA, the Centers for Disease Control and Prevention, and the Food and Drug Administration – found that concerns about inappropriate political influence were highest at FWS." The article notes that "seventy-four percent of the FWS respondents said the level of consideration of political interests was 'too high.'"

FWS PROPOSES NEW PROTECTIONS FOR TWO FRESHWATER FISH SPECIES . [The Hill](#) (10/7, Devaney, 471K) reports that the FWS is "proposing new protections for certain small fish often used as bait by fishermen." Under the agency's proposal, "the headwater chub and certain roundtail chubs would be listed as threatened species."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (10/7, 2 28M), the [Washington \(DC\) Times](#) (10/7, 344K), the [Franklin \(IN\) Daily Journal](#) (10/7, 51K), and the [Albuquerque \(NM\) Journal](#) (10/7, 259K).

FWS PROPOSES TO DOWNGRADE STATUS OF COLUMBIAN WHITE-TAILED DEER. The [Oregonian](#) (10/7, 756K) reports that the FWS on Tuesday "unveiled a proposal to downgrade" the Columbian white-tailed deer's "status from endangered to threatened, continuing its protections under the Endangered Species Act with more leeway for state wildlife officials to get involved in managing deer populations." In a statement Tuesday, the agency's deputy regional director, Richard Hannan, said "the animal's recovery is a result of state, federal and tribal wildlife managers' combined efforts." He said, "The continued conservation success in the Pacific Northwest illustrates what we can accomplish when we all work together."

FWS DEVELOPING A PROPOSAL TO REMOVE YELLOWSTONE GRIZZLIES FROM FEDERAL PROTECTION. The [New York Daily News](#) (10/7, Couillard, 3.75M) reports that the FWS is "drafting a proposal to remove grizzly bears from federal protection at Yellowstone." The service "found that the recovery goals of grizzlies in the Wyoming park have been met and adequate methods are in place to continue the sustainability of the bear, spokesman Ryan Moehring told the Daily News." The article notes that "the proposal would only apply to the grizzly bears found at Yellowstone National Park — with other populations of grizzlies in Montana, Idaho and Washington state remaining on the endangered species list, Moehring said."

HOMEBUILDERS PRAISE DECISION NOT TO PROTECT TORTOISE. The [Arizona Daily Star](#) (10/7, 257K) reports that "while environmentalists weren't happy with the U.S. Fish and Wildlife's decision not to list the Sonoran Desert tortoise as endangered, the Southern Arizona Home Builders Association and the Arizona Game and Fish Department were pleased." David Godlewski, SAHBA's president, said, "From a scientific standpoint, a listing wasn't warranted, and we think the additional regulations would have been challenging to the homebuilding industry and likely cause an increase in housing costs. It was a good decision for the industry and future homeowners."

CHESAPEAKE RESTORATION AGREEMENT SEEKS TO INCREASE BROOK TROUT HABITAT. The [Baltimore Sun](#) (10/6, 834K) reports that "last year, Maryland, the other bay watershed states, and the federal government signed a new Chesapeake restoration agreement that included a pledge to increase brook trout habitat 8 percent by 2025." The article notes that "that amounts to an expansion by more than 200,000 acres of stream watershed across all six states that drain into the bay." Ben Hutzell, a biologist with the FWS, "which has provided technical help and oversight for this and other stream restoration projects around the region," said, "Anytime we can do work to enhance habitat for brook trout, it gives us justification to do work in the area."

National Park Service:

NPS DIRECTOR JARVIS VISITS MONROE TO PROMOTE "EVERY KID IN THE PARK" INITIATIVE. [KNOE-TV](#) Monroe, LA (10/7, 1K) reports that NPS Director Jon Jarvis "told stories about interacting with animals in nature to some fourth graders from Cypress Point Elementary at ULM's Natural History Museum to encourage them to visit national, state and local parks." He said, "Both the US Wildlife and Fisheries services and National Park Service sister agencies are really trying to do is get kids out to these places and we are really looking at parks and refuges near urban centers and Black Bayou is a perfect example of that." Jarvis is "trying to spread the message of a new initiative called Every Kid in the Park, which allows fourth grade students to apply for a free access pass to national parks."

NPS BEGINS CLEARING FORT ROSALIE SITE. The [AP](#) (10/7, 2.28M) reports that the NPS has "started clearing the way for a renovated Fort Rosalie." Throughout October, NPS "contractors will be removing vegetation from the site near the Natchez Visitor Reception Center." According to Natchez National Historical Park Superintendent Kathleen Bond, "contractors would be removing invasive plant species such as paper mulberry, pastoral trees and wisteria vines."

In an editorial, the [Natchez \(MS\) Democrat](#) (10/7, 25K) notes that the NPS is "beginning to clean up the former Fort Rosalie site in preparation for its public opening next year during Natchez's tricentennial birthday celebration." According to the paper, "the good news for locals is that NPS doesn't typically do subpar work." It looks forward to when "the first phase of Fort Rosalie is completed so Natchez residents can again stand on the ground where Bienville and his men stood and look out across the beauty of our corner of the world." The editorial thanks "the NPS for caring for some of our area's most significant historical sites."

Additional coverage was provided by the [San Francisco \(CA\) Chronicle](#) (10/7, Subscription Publication, 3.35M), the [Seattle \(WA\) Post-Intelligencer](#) (10/7, 560K), and the [Washington \(DC\) Times](#) (10/7, 344K).

PYTHON HUNTERS WON'T BE ALLOWED IN EVERGLADES. The [Greenwire](#) (10/6, Subscription Publication) reports that the NPS will "not allow hunters to kill invasive

pythons in limited sections of Everglades National Park as part of a state-sponsored event that drew a formal protest last summer from watchdog group Public Employees for Environmental Responsibility." NPS Southeast Regional Director Stan Austin "sent a letter in September to PEER stating that the agency never had any intention to kill pythons in the park." Instead, "volunteers trained by the Park Service may capture pythons in the park and turn them into NPS or the Florida Fish and Wildlife Conservation Commission as part of the 2016 Python Challenge."

YELLOWSTONE SETS VISITATION RECORD. The [AP](#) (10/7, 2 28M) reports that "Yellowstone National Park has set a record this year with more than 3.8 million visits at the end of September, and is on track to top 4 million visits by the year's end." According to park statistics, "the number of recreational visits this year has surpassed a 2010 record of more than 3.6 million by nearly 5 percent." Yellowstone spokeswoman Amy Bartlett says "the increase in visitors can be attributed to the 'Find Your Park' campaign, lower gas prices and the upcoming National Parks Service centennial, which takes place next year."

NPS, GOLDEN GATE BRIDGE REACH DEAL ON PERMIT FOR SUICIDE BARRIER. The [Marin \(CA\) Independent Journal](#) (10/6, 67K) reports that Golden Gate Bridge and NPS officials have "worked out a tentative deal that would allow work on a \$76 million suicide barrier on the span to move forward." According to the article, "if approvals are given, the bridge district intends to advertise a construction contract by Oct. 13." Then, "bids would be opened in January, with another six weeks needed to go through the submissions made by bidders."

DOG RESCUED AFTER FALL INTO CRACK AT VOLCANOES NATIONAL PARK. The [AP](#) (10/7, 2 28M) reports that "a Big Island family was reunited with their dog after a rescue team removed the Labrador retriever trapped in a crack in the earth at Hawaii Volcanoes National Park." According to the article, "Marta Caproni and her boyfriend were walking the 4-year-old chocolate Lab, Romeo, and his littermate, Tommy, at the park when Romeo ran off and disappeared." A rescue team was able to remove Romeo by sending in Ranger Arnold Nakata.

NATIONAL REGISTER OF HISTORIC PLACES DENIES PLANS TO MOVE INDIANA BRIDGE. The [AP](#) (10/7, 86K) reports that "the National Register of Historic Places has denied Indiana's request to move a two-span steel truss bridge to southern Indiana, boosting the hopes of preservationists who want the structure to stay put." The Indiana Department of Transportation had "sought permission to move the western Indiana bridge's two sections to separate locations on the Salt Creek Trail, a walking trail that will eventually link Brown County State Park to Nashville's town limits."

US Geological Survey:

USGS STUDY CLIMATE CHANGE TO HIT MARSHALL ISLANDS HARDER, QUICKER THAN EXPECTED. [CBS News](#) (10/7, Casey, 7 05M) reports that a combined study conducted by scientists from the USGS, Deltares Institute and the University of Hawaii concludes that effects from climate change will cause sea levels to rise around the Marshall Islands more severely and sooner than expected. The study's lead author, USGS geologist Curt Storlazzi said to CBS, "many atoll islands will be flooded annually," which will contaminate freshwater access and displace up to a half million people due to rising sea levels and higher waves.

Top National News:

OBAMA KICKS OFF CAMPAIGN FOR CONGRESSIONAL APPROVAL OF TPP. Media reports are casting President Obama's [remarks](#) to business leaders yesterday and his interview with [Marketplace](#) as the launch of his campaign for Congressional passage of the Trans-Pacific Partnership. The coverage, which once again included not a single mention on the network newscasts, indicates that at this stage, Obama is fashioning his arguments to persuade lawmakers – not the US public at large – of the need to approve the treaty. Notably for a debate in which Obama will require GOP support, for the second day in a row he described the treaty as a tax-cutting mechanism, saying it would eliminate "18,000 taxes that other countries.. effectively place on US goods and services when we try to sell there." Obama, notes [USA Today](#) (10/7, Jackson, 5.23M), also "said...Japan slaps a 38% tax on American beef, and Malaysia has a 30% tax on US auto parts," and the [AP](#) (10/7, Freking) quotes him saying, "If the tariffs are down, if the taxes are down on goods made in America, that means US companies are investing here and are able to sell over there." Reports describe him as confident that he will prevail, and continue to speculate about Hillary Clinton's eventual stance. The [Los Angeles Times](#) (10/7, Memoli, Parsons, 4.07M) reports that Clinton, campaigning in Iowa on Tuesday, "sidestepped the question of whether she would support the agreement, saying only that she intended to 'make a timely decision.'"

[Bloomberg News](#) (10/7, 492K) reports that Obama "made the case for the deal at a meeting Tuesday with executives and representatives from the manufacturing, farm and technology industries at the US Agriculture Department's headquarters." The White House "released a list of 19 participants who joined administration officials in the meeting on the trade deal, including John Engler, president of the Business Roundtable; Jay Timmons, president and chief executive officer of the National Association of Manufacturers; R. Bruce Josten executive vice president of the US Chamber of Commerce; Dean Garfield, president and CEO of the Information Technology Industry Council, and Tom Linebarger, CEO and chairman of Cummins Inc." The [Los Angeles Times](#) (10/7, Memoli, Parsons, 4.07M) says Obama "launched the pitch alongside Agriculture Secretary Tom Vilsack."

[Reuters](#) (10/6, Edwards) notes that Obama framed his brief remarks as just the launch of a broader push to promote the deal, and announced "a long healthy process of discussion, consultation before this ever comes to an actual vote." Obama, according to [USA Today](#) (10/7, Jackson, 5.23M), "told [the] business leaders.. he is confident that Congress will approve" the treaty.

In his interview with [Marketplace](#) (10/6, 45K), meanwhile, the President revealed that "he personally worked the phones to build support in the closing negotiations of the Trans-Pacific Partnership trade deal." Said Obama, "I made calls to prime ministers, I made calls to presidents, I made calls to US businesses, I made calls to a lot of stakeholders, environmental groups, to explain to them why it is so important for us to make sure that we've got a high-standard set of rules governing trade and commerce in this region." Obama also told [Marketplace](#) (10/6, 45K), "We're not going to bring back all the manufacturing jobs that were lost. The economy is dynamic and is changing. ... The anxieties are real, the concerns are real, but the prescription is not for us to try to look backwards. The prescription here is for us to look forward, and that's what this trade deal does."

The [New York Daily News](#) (10/7, Joseph, 3.75M) further quotes Obama as saying at USDA headquarters, "This agreement has the strongest labor standards of any trade agreement in history, including setting fair hours, prohibiting child labor, prohibiting forced labor. It includes the highest environmental standards in history. ... It will be an enormous achievement for us to have some 40% of the worlds' economies operating under rules that don't hurt us."

The [AP](#) (10/7, Freking) indicates that "one of the administration's selling points is that it will put pressure on China to match various safeguards and openness to competition that's written into the agreement." Obama said yesterday, "Under this agreement, we, rather than countries like China, are writing the rules for the global economy." Under the headline "US Allies See Trans-Pacific Partnership As A Check On China," the [New York Times](#) (10/7, Perlez, Subscription Publication, 11 82M) reports that America's "allies" also "expressed optimism about the impact of the 12-nation accord on a region worried about its dependence on the slowing Chinese economy." In China, "where the government's initial opposition to the trade pact has softened recently, the Ministry of Commerce issued a statement on Tuesday saying that the accord was 'one of the important free trade agreements in the Asia-Pacific region.'"

The [Washington Times](#) (10/7, Wolfgang, 344K) reports that "outside of those big-picture complaints, lawmakers have raised a number of concerns related to several specific industries." The Times adds that "perhaps most notably, tobacco state lawmakers have objected to the fact that countries' health departments will be able to restrict or heavily tax the sale of American-produced cigarettes and related products."

In an online piece, Catherine Ho lists in the [Washington Post](#) (10/6, 6.76M) four potential obstacles to Congressional approval: "Republicans may be hesitant to hand Obama a victory. ... Obama may not have the support of some key Democrats. ... Powerful outside lobbying groups oppose the deal," and "if the final vote falls during primary season, vulnerable candidates could be nervous about backing a controversial deal." Along those lines, Sunlen Serfaty said on [CNN's New Day](#) (10/7, 226K) that Obama "certainly does face a tough battle ahead in Congress" because "this will inevitably be tangled into the politics of the presidential race."

Picking up on some of those themes, the [Tribune News Service](#) (10/7, 2.46M) reports that "to achieve a victory," the White House "will need help from Republicans and will need to overcome doubts from a key Democratic constituency," and adds that while "unions have lost political clout as their numbers have declined, their political action committees donated more than \$60 million to campaigns during the 2012 elections," and "about 90 percent of that money went toward Democratic candidates, according to the Center for Responsive Politics." Chris Shelton, president of the Communications Workers of America, said yesterday "the union will 'hold accountable those members of Congress who support this giveaway to the 1 percent.'"

[USA Today](#) (10/7, Jackson, 5.23M) similarly indicates that Obama is pursuing the deal in opposition to some of his natural allies in the Democratic Party and the labor movement. Bill Samuel, director of government affairs for the AFL-CIO, told [Bloomberg News](#) (10/7, 492K) in an interview that "selling the trade pact will be an 'uphill climb' for the White House," as the debate "comes up in the hothouse of a presidential election and a congressional election; never a good time to be selling free trade." [Al Jazeera America](#) (10/7, 109K) noted on its website that "it's unclear where Clinton will come down on the trade agreement," while Sen. Bernie Sanders "moved quickly to voice his opposition" and Gov. Martin O'Malley "has been highly critical of the trade pact in recent months."

McCormell Speaks Of TPP's "Troubling Parts," Trump Says "It's Not Good For Our Country." Senate GOP leader Mitch McConnell, [Reuters](#) (10/7, Lawder) reports, yesterday spoke of "a number of troubling parts" to the deal, adding, "We're in the process, all of us, of reading the Trans-Pacific Partnership agreement," and "I don't have any observation to make."

In a front-page story, the [Wall Street Journal](#) (10/7, A1, Meckler, Hook, Subscription Publication, 5.95M) reports that if Democrats face a complicated political picture as they take a stand on the deal, for Republicans the situation is not a whole lot easier. GOP candidates will be forced to pick between the party's establishment and its populist base – a dangerous position given the current political climate. Donald Trump discussed his opposition to the deal on [Fox News' Special Report with Bret Baier](#) (10/7, 1.53M) saying, "it's not good for our country. We're losing our jobs. We're losing our money. We're losing our base. We're losing everything. These trade deals are negotiated by people that don't know what they're doing."

Marcus: Clinton Could End Up With "Worst Of All Worlds." Ruth Marcus, in the [Washington Post](#) (10/7, Marcus, 6.76M), says Clinton "is facing one of the most fateful decisions of the presidential primary season," a "true 'Sophie's Choice.'" In fact, "the best-case scenario for Clinton would have been to have negotiations blow up and therefore avoid having to take a position." Marcus adds that "history suggests she will duck. And also that, after much hemming and hawing on Clinton's part; after pundits like me pouncing on her evasiveness and inconsistency; after incessant pounding from interest groups and activists, Clinton will end up opposing the deal," which "would be the worst of all worlds – which is, all too often, exactly where Clinton finds herself."

WSJournal: TPP Is Flawed, But Still Could Do Some Good. The [Wall Street Journal](#) (10/7, Subscription Publication, 5.95M) editorializes that the TPP has the potential to provide major economic and strategic benefits to the US. The Journal says it is withholding judgment on the deal – and whether the US could have done better – until the full details emerge, but it is worried that US negotiators may have given in too much to protectionist forces. In particular, it frets that five years is not enough time for IP protection, though it concedes that it is better than nothing for some of the countries. It also worries that some tariff schedules could be reduced faster. The Journal recommends that Congress carefully vet the agreement, adding that President Obama will need to do the heavy-lifting to persuade Congress to pass it.

US Trade Deficit Up In August. [Reuters](#) (10/7, Subscription Publication, 11.82M) reports the Commerce Department said yesterday that the US trade deficit increased by 15.6% in August to \$48.3 billion.

Japanese PM Hails TPP. The [Washington Post](#) (10/7, Denyer, 6.76M) reports that Japanese Prime Minister Shinzo Abe "hailed the hard-won Trans-Pacific Partnership trade deal on Tuesday, saying it would help raise stubbornly anemic growth at home and boost the entire Asia-Pacific region." Said Abe, "This is the beginning of a new century of the Asia-Pacific. ... It will create a vast economic zone of an unprecedented size...and Japan will be there as a central player."

Accord A Key Issue In Canadian Campaign. The [New York Times](#) (10/7, Austen, Subscription Publication, 11 82M) reports from Ottawa that the deal arrived "amid an election campaign in Canada" and "ignited debate...instantly." While there are plenty of domestic issues in play, the TPP's "political effect could be enough to tip the balance in a contest where the Conservatives, New Democrats and Liberals, under [Prime Minister] Justin Trudeau, have been locked in a near three-way tie in polling since the campaign began in August." The Times adds that "the Liberal Party led the unsuccessful fight against free trade with the United States in 1988," but Trudeau "now describes his party as a champion of trade pacts." However, "he has said that he cannot endorse the Trans-Pacific deal until its full text is available."

EARNEST MEDICAID EXPANSION WOULD HELP COMBAT GUN VIOLENCE. [The Hill](#) (10/6, Hensch, 471K) reported in its "Blog Briefing Room" blog that White House press secretary Josh Earnest said that by "pushing for the expansion of Medicaid," the 2016 Republican presidential field could aid the fight against gun violence. Earnest argued that many of the GOP presidential hopefuls "talk about improving mental healthcare," adding, "One of the biggest providers of mental healthcare — especially in disadvantaged communities — is Medicaid. For those who say they want to work with the administration in limiting gun violence, we would welcome the support for the Affordable Care Act and expanding Medicaid."

Senate Democrats To Offer Gun Control Proposal Thursday. [The Hill](#) (10/6, Carney, 471K) reported in its "Floor Action" blog that a new gun control proposal is expected from senate Democrats in Thursday. Senate Minority Leader Reid told reporters, "We've had a number of meetings today with Democratic senators. ... So we're going to move forward. We have a program. We're going to do some press on this on Thursday." Reid "declined to get into details" of the Democrats' proposal, saying, "We're going to make sure this is inclusive, that all my caucus is involved in this, and we're not going to outline stuff here today."

WPost Calls For Gun Law Reform. In an editorial, the [Washington Post](#) (10/7, 6.76M) calls for reform of the nation's gun laws, citing last weekend's shooting of an 8-year-old girl by an 11-year-old boy in Tennessee after the girl refused to let him see her puppy. The Post argues that "only reform of our gun laws can begin to reduce the number of children whose lives are lost or ruined because of guns."

Zalles: Ammunition Buyers Should Be Licensed. In a [Washington Post](#) (10/7, Zalles, 6.76M) op-ed, Jeffrey Zalles, president of the Marin County, CA chapter of the Brady Campaign, suggests that we stop "worrying about the guns" and focus "on the bullets," by requiring buyers of ammunition to be licensed and marking shells with a serial number. Zalles adds that to offset criticism from gun owners that this amounts to "a big-government intrusion into their privacy and constitutional rights," the NRA should be responsible for issuing the licenses.

Witnesses: Oregon Shooter Believed He Was "Freeing" Victims. [ABC World News](#) (10/6, story 6, 1:25, Karlinsky, 5 84M) reported that according to "law enforcement sources," alleged Oregon community college shooter Chris Harper Mercer left behind writings in which "he says other people think I'm crazy, but I'm not. I'm the sane one." ABC cites witnesses who say Mercer "seemed to think by killing his victims, he was freeing them." In a brief report, the [CBS Evening News](#) (10/6, story 7, 0 20, Pelley, 5.08M) reported that the first of the funerals for victims of the shooting will be held Thursday, adding that the President "will meet with relatives of the victims on Friday."

[ABC World News](#) (10/6, story 5, 2:05, Vega, 5.84M) reported that GOP presidential candidate Ben Carson was asked ,what he would do if he was confronted by a gunman who asked his religion, as the Oregon shooter did. Carson: "I'm glad you asked that question, because not only would I probably not cooperate with him, I would not just stand there and let him shoot me. I would say, hey guys, everybody attack him. He may shoot me but he can't get us all." ABC added that Carson "also bash[ed] President Obama's plan to visit with victims, saying, if he were elected, he would not go." In addition, he "suggest[ed] that even some kindergarten teachers should be armed."

The [New York Times](#) (10/7, Rich, Subscription Publication, 11.82M) reports on efforts by colleges and universities to guard against and prepare for mass shootings, noting that for most, such shootings "are now on the list of hazards — from fires and bombings to natural disasters like earthquakes and tornadoes in the South — for which they must prepare." since the Virginia Tech shooting in 2007, "colleges have been strengthening their security measures," and about "two-thirds of four-year colleges or universities with more than 2,500 students have dedicated armed officers on campus, according to the Department of Justice." In addition, colleges have "beefed up high-tech communications systems to send emergency instructions to students and staff members, and added features like automatic locking mechanisms for dormitory and classroom doors."

AP Analysis: Despite GOP Claims, Chicago's Gun Laws Aren't That Tough. An [AP](#) (10/7) analysis examines claims by Republican presidential candidates Chris Christie, Donald Trump, and Carly Fiorina that the increase in homicides and shootings this year in Chicago, which "has a reputation for having some of the country's strictest gun laws," is "proof that gun control doesn't work." The AP notes that the city's gun laws "aren't as tough as their reputation suggests," as "courts have overturned or gutted many of them in recent years, forcing a city that once banned handguns and gun shops to allow them both."

Milwaukee Officers Testify Against Store That Sold Gun Used To Shoot Them. The [CBS Evening News](#) (10/6, story 8, 2:15, Diaz, 5 08M) reported that Milwaukee police officer Bryan Norberg testified Tuesday "against the Milwaukee store that sold the gun that nearly killed him" in 2009 when he and his partner Graham Kunisch "stopped 18-year-old Julius Burton for riding his bike on a city sidewalk." After struggling with the officers, "Burton shot Norberg in the mouth. Kunisch was hit in the eye." According to both offices, "the weapon was negligently and unlawfully sold by Badger Guns." The charging document states that in 2005, 537 guns recovered from crimes were traced back to the store.

STATE DEPARTMENT DEMANDS INFORMATION OVER CLINTON-PETRAEUS EMAILS. Ed Henry reported on [Fox News' Special Report with Bret Baier](#) (10/6, 1.53M) that Hillary Clinton is "playing defense" after the State Department on Tuesday sent a letter to her personal attorney "demanding to know why emails from January 2009 between Clinton and Gen. David Petraeus have emerged, despite her claim that official email did not start on the personal account until that March." Henry also reported that Clinton bought a product from a Connecticut company in 2013 "that backed up all the emails in her server." Henry said this brings up questions as to whether her deleted personal emails are "still alive," and whether the private company has "access to the official email that had classified information."

The [Washington Times](#) (10/7, Dinan, 344K) reports that the State Department has told Clinton to "go back to her Internet companies and try to recover email messages from any personal email accounts that she used during her time in government, saying it appears she didn't turn over all of her documents." The Times says that Patrick F. Kennedy, under secretary of state for management, wrote in an Oct. 2 letter to David Kendall, Clinton's attorney, that the agency "has become aware of messages Mrs. Clinton sent to other government officials in her first few months" as secretary of state, "but which she did not turn over" to the department.

[McClatchy](#) (10/7, Gordon, Kumar, 28K), citing an unnamed source, says that Clinton "hired a Connecticut company to back up her emails on a 'cloud' storage system, and her lawyers have agreed to turn whatever it contains over to the FBI." McClatchy adds that Senate Homeland Security panel Chairman Sen. Ron Johnson has "also asked the firm to turn over to the committee copies of any Clinton emails still in its possession." McClatchy says, however, "There were conflicting accounts as to whether the development could lead to recovery of any of Clinton's more than 31,000 personal emails, which she said she deleted from her private server."

The [Washington Post](#) (10/7, Helderman, 6 76M) reports "The FBI's probe into the security of Clinton's e-mail has expanded to include a second private technology company

which said Tuesday it plans to provide the law enforcement agency with data it preserved from Clinton's account. The additional data, provided by Connecticut-based Datto Inc., could open a new avenue for investigators interested in recovering e-mails deleted by Clinton "that have caught the interest of GOP lawmakers." The Post adds, "Datto was hired to provide backups for the Clinton e-mail accounts starting in May 2013 by Platte River Networks, the Colorado-based tech firm hired earlier that year by the Clinton family to manage the system after Hillary Clinton concluded her term as secretary."

Email: Employee At IT Firm Hired By Clinton Feared A Cover-up. [Politico](#) (10/6, Bade, 942K) reported, "An employee at Platte River Networks "was concerned that instructions from a Clinton-linked company would have the tech firm 'covering up some shady [sic] sh[**]'," according to emails obtained by Senate investigators. Employees at the IT firm "in a mid-August email chain were trying to find records that showed that Clinton Executive Service Corp., the company paying the Platte River bill, had instructed them to reduce the length of time backups of Clinton's emails were kept." One of the employees is quoted as writing in the email chain, "Starting to think this whole thing really is covering up some shady sh[**]. I just think if we have it in writing that they told us to cut the backups, and we can go public saying we have had backups since day one, then we were told to trim to 30 days, it would make us look a WHOLE LOT better."

Email Chain Shows Mills Forwarded Now-Classified Information To Clinton Foundation. [Politico](#) (10/6, Bade, 942K) reported that Cheryl Mills, who served as then-Secretary of State Hillary Clinton's chief of staff, "twice forwarded information to the Clinton Foundation that was later deemed classified." Politico said that "a new email chain" that the conservative organization Citizens United obtained through a Freedom of Information Act lawsuit shows that Mills "forwarded State Department background information about Rwanda and the Congo to the Clinton" Foundation. Politico added that ex-President Bill Clinton "was visiting Africa, including Rwanda, around the time that Mills sent the email." The former President "was also considering giving Rwandan President Paul Kagame a plenary role at the Clinton Global Initiative, according to the emails."

Group Wants State To Declare Whether Clinton Had Approval To Use Private Email System. [The Hill](#) (10/6, Hattem, 471K) reported that the conservative group Judicial Watch "is preparing a new attack in a protracted legal battle with the State Department over...Clinton's private email server." On Tuesday, attorneys with the group "said they would demand that the department declare whether Clinton received explicit approval to use a private email account and personal server while serving as secretary of State." Addressing US District Court Judge Emmet Sullivan on Tuesday, Michael Bekesha, an attorney for Judicial Watch, said, "We need to know whether or not Mrs. Clinton was authorized to use that system of records." Bekesha added that Clinton "was 'either approved' to use the sever...or she was a rogue employee."

Democrats To Propose Amendment To Shut Down Benghazi Panel. In a brief item, [Bloomberg Politics](#) (10/6, House, Rosenkrantz, 247K) reported that Rep. Louise Slaughter, the ranking Democrat on the House Select Committee on Benghazi, will propose a "House amendment to abolish" the panel. Slaughter spokesman James Owens said the congresswoman "will offer her amendment to a GOP bill creating a new select [committee] on Planned Parenthood." Bloomberg Politics said that the amendment "is unlikely to be advanced by GOP-controlled" panel. The move, which comes in the wake of House Majority Leader Kevin McCarthy saying last week that the panel has hurt Democratic presidential frontrunner Clinton in the polls, "would be first official legislative attempt to scuttle" the committee.

Editorial Wrap-Up:

NEW YORK TIMES. "Mr. Putin's Motives In Syria." A [New York Times](#) (10/7, Subscription Publication, 11.82M) editorial questions Putin's motives in Syria and argues that it "may not be too late for [him] to reconsider." Noting that the US and its allies "are in need of help and might well be open to cooperating with Russia on finding a combination of military and diplomatic measures that could curb the Islamic State" and "impose cease-fires that would give civilians some respite from the violence," the Times says this "should be the priority for both the West and Russia," adding that it "would certainly be a better way for Mr. Putin to satisfy his need for respect and a role in the Middle East."

"Shut Down The Benghazi Committee." In an editorial, the [New York Times](#) (10/7, Board, Subscription Publication, 11.82M) says the House Select Committee on Benghazi "should rename their laughable crusade...the Inquisition of Hillary Rodham Clinton." The Times says "the effort to find" Clinton "personally responsible for the deaths has lost any semblance of credibility" and "become an insult to the memory of four slain Americans." According to the Times, Clinton's testimony on Oct. 22 "should be the last salvo for a committee that has accomplished nothing," and if Republicans "insist on keeping the process alive, the Democrats should stop participating in this charade."

"Why Student Debtors Go Rescued." In an editorial, the [New York Times](#) (10/7, Board, Subscription Publication, 11.82M) blames student loan servicers for not helping to prevent defaults through "poor customer service" that leads to borrowers not understanding their full range of options. The Times calls on the Consumer Financial Protection Bureau to begin "vigorously enforcing the law and creating rules under which this wayward industry will be required to do business."

WASHINGTON POST. "The Intolerable Detention Of Jason Rezaian Reaches A Grim Milestone." The [Washington Post](#) (10/7, Board, 6.76M) editorializes that reporter Jason Rezaian's status as a "de facto hostage" should be viewed "as intolerable to the United States as was the captivity" of the 52 American diplomats in Iran in 1981. The Post says that Rezaian "is not only not guilty of any crime, but also has never been plausibly accused of one, or prosecuted according to Iran's laws."

"Shot And Killed Over A Puppy." In an editorial, the [Washington Post](#) (10/7, 6.76M) calls for reform of the nation's gun laws, citing last weekend's shooting of an 8-year-old girl by an 11-year-old boy in Tennessee after the girl refused to let him see her puppy. The Post argues that "only reform of our gun laws can begin to reduce the number of children whose lives are lost or ruined because of guns."

"South Sudan Is Still In Danger." In an editorial, the [Washington Post](#) (10/7, Board, 6.76M) argues that while the prospects for "permanent peace" in South Sudan "remain tenuous," the US and others who have played a role in negotiations "must not abandon the people of this nation and must pressure the leaders to overcome their mistrust for a lasting settlement." The Post says that President Salva Kiir "should shelve" his unilateral plan to change the country's political map from 10 states to 28, as rebel leader Riek Machar has said the plan "definitely would" kill the peace deal if not amended. The Post also calls for both sides "to do more to stop" fighting, agree to terms for demilitarization in the capital of Juba, and bring "to justice those fighters and commanders who are responsible" for human rights violations during the civil war.

WALL STREET JOURNAL. "The Pacific Trade Stakes." The [Wall Street Journal](#) (10/7, Subscription Publication, 5.95M) editorializes that the TPP has the potential to provide major economic and strategic benefits to the US. The Journal says it is withholding judgment on the deal--and whether the US could have done better--until the full details emerge, but it is worried that US negotiators may have given in too much to protectionist forces. In particular it frets that five years is not enough time for P protection, though it concedes that it is better than nothing for some of the countries. It also worries that some tariff schedules could be reduced faster. The Journal recommends that Congress carefully vet the agreement, adding that President Obama will need to do the heavy-lifting to persuade Congress to pass it.

"Syria's Radiating Danger." In an editorial, the [Wall Street Journal](#) (10/7, Subscription Publication, 5.95M) calls Russia's violations of Turkey's airspace provocations and argues that each time they go unanswered, Russia, Iran, and Syria will be emboldened to test limits of the US.

[A well-earned designation: Waco mammoth site officially dedicated a national monument](#)

Jody Seaborn // Austin Statesman // October 6, 2015

The Waco Mammoth Site is one of Texas' unique treasures. On Monday, the prehistoric graveyard of fossilized mammoth bones officially became a national treasure, too, when Secretary of the Interior Sally Jewell and National Park Service Director Jon Jarvis dedicated it as a national monument.

Renamed the Waco Mammoth National Monument, the site was discovered in 1978 by two young men hunting for arrowheads and fossils near the Bosque River. Excavations over the next few decades uncovered the fossilized remains of 24 Columbian mammoths, the larger relative to the woolly mammoths, as well the remains of other animals from the Pleistocene Epoch, including a Western camel, a saber-toothed cat and a giant tortoise. Most of the mammoth fossils that have been discovered belong to a nursery herd of females and juveniles that died together in a flood some 68,000 years ago. It's the largest known concentration of mammoths that died in a single event.

At various times over the years, Republican and Democratic members of the Texas congressional delegation tried to persuade their colleagues in the House and Senate to pass legislation declaring the site a national monument but to no avail. Then in July, President Barack Obama, using the authority granted presidents by the American Antiquities Act of 1906, signed an executive order doing what a paralyzed Congress could not bring itself to do and named the Waco site a national monument, making it one of 19 national monuments Obama has established or expanded during his presidency.

President Theodore Roosevelt signed the Antiquities Act into law 109 years ago and it's one of the reasons we remember Roosevelt as a great conservation-minded president — along with the five national parks and 18 national monuments he created, and the 230 million acres he put under federal protection. But it is Obama who has protected more public lands than any other president — more than 260 million acres. Obama will leave office in January 2017 with a conservation and environmental legacy that will rank him with Roosevelt and Richard Nixon (yes, Richard Nixon!) among the nation's most environmentally progressive presidents.

Baylor University and Waco city officials deserve praise for recognizing the mammoth site's importance and for raising millions of dollars to develop the site into a 105-acre park, which opened to the public in 2009 and features a visitor center, an enclosed dig shelter and a walking trail. Adding the "national monument" label to the site strengthens the good stewardship already taking place there and guarantees its continuation. Waco and Baylor will partner with the National Park Service in a relationship that Jewell called a model for federal-local cooperation on protecting public sites and lands. Congratulations to all involved.

(By the way, anyone planning a day trip to the Waco Mammoth National Monument should be aware that the site is closed on Sundays and Mondays. Check the monument's website for hours and fees.)

[Waco Mammoth National Monument Dedicated](#)

WACO (October 5, 2015) Former first lady Laura Bush, U.S. Secretary of the Interior Sally Jewell and National Park Service Director Jonathan B. Jarvis took part in a dedication ceremony Monday morning to mark the designation of Waco Mammoth National Monument.

"It's our duty to protect places like this that will inspire the next generation of archaeologists, paleontologists, and historians, and show the rich diversity of our country's natural heritage," Jewell said.

The invitation-only ceremony was not open to the public.

On July 10 President Barack Obama designated the site as one of three new national monuments.

It's now managed by the National Park Service in cooperation with the City of Waco and Baylor University.

"The National Park Service has worked seamlessly with our partners at the City of Waco, Baylor University, and the Waco Mammoth Foundation to lay the groundwork for the continued success of the Waco Mammoth National Monument," Jarvis said.

A painstaking excavation of the site, which was discovered in 1978, has uncovered the remains of 25 Columbian mammoths that died nearly 68,000 years ago, probably after the nursery herd was caught in a flash flood.

In 2002, then U.S. Rep. Chet Edwards, D-Waco authored legislation which later became a law that directed the National Park Service to determine the feasibility of establishing a national park at the Waco Mammoth Site.

Three years later he secured \$200,000 for preservation efforts at the site and an additional \$200,000 for the Baylor Mayborn Museum's Mammoth Exhibit.

In March 2009 the U.S. Department of the Interior recommended including the site as part of the National Park Service, and Edwards introduced the "Waco Mammoth National Monument Establishment Act of 2009," which would have implemented the Department of Interior proposal and authorized appropriations for the project.

The original U.S. Department of the Interior recommendation called for giving the Park Service the lead responsibility for protection, scientific study and visitor enjoyment of the site in partnership with the City of Waco and Baylor University, which was the option local leaders preferred.

The House passed the bill, but the measure later died in the U.S. Senate, the victim of a maneuver called an anonymous hold.

Subsequent measures introduced by Edwards' successor, U.S. Rep. Bill Flores, R-Bryan, called for designating the site as a National Monument.

The new bill didn't provide funding for the monument, but the authors said local support would make the national recognition possible without additional federal spending.

Ground was broken in 2008 for \$3.2 million visitor center and pavilion to protect the site, which has been operated since 2009 by the city in partnership with Baylor University and support from the nonprofit Waco Mammoth Foundation.

In April Jarvis toured the site and later said he would ask the Interior Department to seek Mr. Obama's approval to designate the site a national monument.

Two weeks later the Waco City Council voted to turn five acres of the site and the excavated remains over to the federal government, leaving just more than 100 acres as city property, but as administrative land in the national park system.

Under the 1906 Antiquities Act the President bypassed Congress and issued the executive order for the designation.

U.S. Secretary of the Interior Sally Jewell will visit the Waco Mammoth National Monument to celebrate its recent designation as part of the national park system.

Jewell and National Park Service director Jon Jarvis will tour the site and participate in a 10 a.m. dedication ceremony with local leaders, including Baylor University President Ken Starr, Mayor Malcolm Duncan Jr. and Waco Mammoth Foundation founder Gloria Young. The event is by invitation only.

President Barack Obama in July designated the site at 6220 Steinbeck Bend Drive as a national monument, capping a yearslong effort by local officials to win the designation. The Waco Mammoth Foundation raised \$4.2 million to turn the mammoth dig site into an educational tourism attraction, built to National Park Service standards.

Secretary of Interior Jewell Expected at Waco Monument Event

□

Dedication ceremonies are planned next week for the recently designated Waco Mammoth National Monument in

Central Texas.

Organizers say U.S. Secretary of the Interior Sally Jewell and National Park Service Director Jonathan Jarvis are expected to attend Monday's event.

President Barack Obama in July proclaimed Waco Mammoth as one of three new national monuments. The others are Berryessa Snow Mountain in California and Basin and Range in Nevada.

The Texas site includes well-preserved fossils of a herd of Columbian Mammoths and remains of other Ice Age animals. Experts say some fossils identified at the site are thought to be more than 65,000 years old.

SECRETARY JEWELL TOUTS PARTNERSHIP AT WACO MAMMOTH NATIONAL MONUMENT DEDICATION. The [Waco \(TX\) Tribune-Herald](#) (10/6, 111K) reports that Interior Secretary Sally Jewell "headlined the dedication of the Waco Mammoth National Monument on Monday, marveling at the local partnership that developed it and persevered to win the site national park status." She said, "From this point forward, Waco will be known for its mammoths, which it should be known for, and for its community stewardship and philanthropy that has been so well demonstrated." Jewell added, "I haven't ever been to an event like this where the community pulled together and recognized that the future is about partnerships. It's not about the federal government coming in and deciding everything and paying for everything." Jewell "joined former First Lady Laura Bush at the event, along with National Park Service Director Jon Jarvis, Baylor University President Ken Starr, city and state elected officials, former U.S. Rep. Chet Edwards, D-Waco, and current U.S. Rep. Bill Flores, R-College Station."

The [Waco \(TX\) Tribune-Herald](#) (10/6, 111K) editorializes that while Jewell and Jarvis "touted the prehistoric story of the site — the almost human behavior of a nursery herd of Columbian mammoths caught in a flood or mudslide, with some apparently trying to save their babies — they also savored the story of commitment and homegrown ingenuity by local folks who recognized the treasure in their midst and worked in unison to preserve and champion it."

Additional coverage was provided by [KXXV-TV Waco \(TX\)](#) Waco, TX (10/6, 30K), [KWTX-TV Waco \(TX\)](#) Waco, TX (10/6, 85K), and [KCEN-TV Waco \(TX\)](#) Waco, TX (10/6, 98K).

SECRETARY JEWELL TO VISIT WITH OKLAHOMA INDIAN NATIONS. The [AP](#) (10/6, 344K) reports that Interior Secretary Sally Jewell is "planning to visit with leaders of the Choctaw and Chickasaw nations in Oklahoma to participate in a ceremonial signing of an agreement over tribal lands." Jewell will "visit Durant on Tuesday to recognize the settlement of a nine-year lawsuit alleging the federal government mismanaged 1.3 million acres of timberlands in southeastern and south-central Oklahoma." The article notes that "the case had been scheduled to go to trial in July, but all sides entered into a settlement agreement approved by a federal judge last month in which the tribal nations agreed to receive a cash payment of \$186 million."

Additional coverage was provided by [KXII-TV Sherman \(TX\)](#) Sherman, TX (10/6, 46K), [KOTV-TV Tulsa \(OK\)](#) Tulsa, OK (10/6, 81K), and [KTEN-TV Sherman \(TX\)](#) Sherman, TX (10/6, 1K).

SECRETARY JEWELL SUPPORTS TPP AGREEMENT. [Grist](#) (10/6, 6K) reports that "last night, the United States and 11 other countries (Australia, Canada, Japan, Malaysia, Mexico, Peru, Vietnam, Brunei, Chile, New Zealand, Singapore) finished drawing up what is now the largest trade agreement in history — covering 40 percent of the world's economy." Interior Secretary Sally Jewell "posted a photo of a cute elephant family on Twitter this morning with this message: Our kids should have a chance to see elephants & rhinos roaming the wild; trade deal can help that happen."

US ANNOUNCES PLANS TO COMBAT ILLEGAL FISHING, PROTECT OCEANS. The [New York Times](#) (10/6, Urbina, Subscription Publication, 11.82M) reports the Administration on Monday announced plans to "step up the fight against illegal fishing, pollution and other crimes at sea," including the creation of two new national marine sanctuaries — one in Maryland and the other in Lake Michigan. According to Administration officials, they also plan to "expand the use of satellites that track illegal activity." Stressing the "urgency of the crisis," Secretary of State Kerry told an international conference in Chile "that the sea was acidifying 10 times faster than at any other point in history, and that one-third of the world's fish stocks were overexploited."

[AFP](#) (10/6, Clark) quotes Kerry as saying, "The problem is there are people fishing illegally, unregulated, vast areas of the ocean where people use fishing methods that have been prohibited."

[McClatchy](#) (10/6, Adams, 28K) reports that in a video message to conference participants, the President launched a program called "Sea Scout," which is "designed to increase cooperation among nations seeking to identify and prosecute illegal, unreported and unregulated fishing around the globe." The [AP](#) (10/6) reports Obama also recalled his childhood in Hawaii and Indonesia and said he always maintained "a special love for the ocean," and "said he would seek to protect more American waters in the coming months." The AP notes that Chile "made its own ambitious declaration, cordoning off a vast expanse of the South Pacific Ocean" near Easter Island. [Reuters](#) (10/6, Wroughton, Slattery) reports Chilean President Michelle Bachelet said the protected area would include some 3,800 km (2,361 miles) in the middle of the Pacific Ocean.

According to the [Washington Post](#) (10/6, Harvey, 6.76M), the two areas designated US sanctuaries "were nominated.. last year after the National Oceanic and Atmospheric Administration (NOAA) reopened the public nomination process for the first time in 20 years."

TRIBES PUSH FOR BEARS EARS NATIONAL MONUMENT. The [Indian Country Today Media Network](#) (10/5, 32K) reports that "five Four Corners-area tribes have united to propose a 1.9 million-acre Bears Ears National Monument that would be the first truly collaborative land management effort between Native Americans and the federal government." According to the article, "the Coalition is minting a blueprint for a degree of co-management that has never been tried before." The plan "embodies true government-to-government relations and truly collaborative decision-making on all aspects of running a protected mass of land."

RESEARCHER FINDS WAY TO FIGHT CHEATGRASS. The [New York Times](#) (10/6, Solomon, Subscription Publication, 11.82M) reports that the "profusion" of cheatgrass is "a big reason today's Western fires burn more land, more frequently and with more ferocity than in the past, scientists say." Now, "after more than a half-century of largely failed efforts to thwart the Sherman's march of cheatgrass, a researcher may have a powerful new weapon against it." Ann Kennedy, a soil scientist with the Agricultural Research Service of the United States Department of Agriculture, has "discovered naturally occurring soil bacteria that inhibit the growth of the weed's deep root system, its competitive advantage, even as those bacteria leave native plants untouched."

HAWAII SECESSIONISTS DEMAND NEW NAME FOR HONOLULU'S MCKINLEY HIGH SCHOOL. The [Daily Caller](#) (10/6, Owens, 375K) reports that "now that President Barack Obama has decided to call Mount McKinley by the name Denali instead, NBC News has seen fit to call attention to an obscure MoveOn.org petition seeking to change the name of President William McKinley High School in Honolulu, Hawaii." The creator of the petition, Aoloa Patao, says that "the name of McKinley High must be changed because it is a sad reminder of the prolonged illegal occupation of the Hawaiian Kingdom by the United States." The article notes that "the online petition to rename McKinley High hosted by Moveon.org — a progressive advocacy group and political action committee — has garnered 1,080 signatures as of early Monday morning."

Additional coverage of the Denali name change was provided by the [National Review](#) (10/6, 504K).

ADDITIONAL COVERAGE SECRETARY JEWELL LAUNCHES GRID ALTERNATIVES TRIBAL SOLARTHON. Additional coverage of the GRID Alternatives' Tribal Solarthon was provided by the [East Hampton \(NY\) Press](#) (10/6, 21K).

EXPIRATION OF LWCF CRITICIZED. For the "Congress" blog of [The Hill](#) (10/6, Simon, Arce, 471K), Camilla Simon and Maite Arce, co-chairs of the Latino Conservation Alliance, criticizes Congress for allowing the Land and Water Conservation Fund to expire. They note that "the LWCF has also been an important economic driver supporting jobs and the revitalization of local communities." They are also "concerned about the playgrounds, recreation centers, ball fields, and state park projects for future generations that hang in the balance."

Additional coverage of the LWCF was provided by the [Peninsula \(WA\) Daily News](#) (10/5, 41K) and the [Bozeman \(MT\) Daily Chronicle](#) (10/6, 54K).

PRESIDENT OBAMA URGED TO ESTABLISH MOJAVE TRAILS NATIONAL MONUMENTS. In an op-ed for the [Palm Springs \(CA\) Desert Sun](#) (10/5, 99K), Margit Chiriaco Rusche, vice president and founder of the General Patton Museum, writes that “the lands in the proposed Mojave Trails National Monument hold a significant piece of our nation’s World War II history, which is still marked on these desert landscapes.” Rusche wants “to protect the stories and artifacts in this unique expanse of California desert I call home so that we can share this piece of our heritage.” She encourages “President Obama to use the Antiquities Act to establish the Mojave Trails National Monuments.”

Empowering Native American Communities:

TRIBE SUES OVER BIE RESTRUCTURING. [Law 360](#) (10/6, 21K) reports that “the Cheyenne River Sioux Tribe on Friday sued the U.S. Department of the Interior over a planned restructuring of the Bureau of Indian Education, claiming the proposal violates a settlement agreement and will disrupt essential education services provided to Native American schools.” The South Dakota tribe claimed that “the BIE decided to reduce the number of educational line offices under its Blueprint for Reform without ‘meaningfully consulting’ with affected tribes and failed to secure congressional appropriations or authorization.”

BIA SAYS COMPLAINT BY TRIBE MEMBER IS PREMATURE. [Law 360](#) (10/6, 21K) reports that the BIA “told a federal court Friday that a Kiowa Tribe of Oklahoma member who is trying to revive her petition to change the tribe’s constitution brought her suit prematurely, since her administrative appeal challenging the BIA’s denial of the petition is still being considered.” According to the article, “the government told an Oklahoma federal court that it lacks jurisdiction to consider Anita Onco Johnson’s complaint until the Interior Board of Indian Appeals finishes evaluating her appeal.”

TRUMP SAYS WASHINGTON FOOTBALL TEAM SHOULD KEEP THEIR NAME. The [Daily Mail \(UK\)](#) (10/6, Rushing, 5.59M) reports that “Donald Trump and Jeb Bush have agreed on precious little throughout the 2016 Republican presidential primary race, but on this they agree: The Washington Redskins team name should stay where it is.” Trump on Monday said that “he disagreed with calls for the removal and retirement of the team name, as the former Florida governor had said last week on a new SiriusXM show intended to combine sports with politics.” Trump said “any controversy over the team name was simply an issue of political correctness run amok.”

Tackling America’s Water Challenges:

CENTRAL ARIZONA PROJECT WORKING TO AVOID WATER SHORTAGE. In an op-ed for the [Arizona Republic](#) (10/5, 1.12M), Lisa Atkins, president of the Central Arizona Project Board of Directors, writes that the Central Arizona Project has “stored enough water underground to fill Yankee Stadium more than 500 times.” According to Atkins, “anticipating a shortage, CAP and the Arizona Department of Water Resources is now working with others to store an additional 740,000 acre-feet of new water in Lake Mead.” She argues that “storing extra water in Lake Mead is critical in our efforts to avert a potential shortage in 2017.”

Securing America’s Energy Future:

Onshore Energy Development:

INTERIOR OPPOSES NATIVE AMERICAN ENERGY ACT. The [Washington Free Beacon](#) (10/6, 65K) reports that “House Democrats are expected to oppose legislation this week that would remove regulatory burdens for energy production on Native American land that tribes say have cost them tens of millions of dollars.” The Native American Energy Act would “vest more regulatory authority over tribal energy production with the tribes themselves, rather federal regulators that have recently sought more stringent regulations on oil and gas production on federal land.” The article notes that “among its provisions is language that would exempt tribal land from new Interior Department regulations on hydraulic fracturing, an innovative oil and gas extraction technique commonly known as fracking.” Interior “opposes the bill in part due to that language.”

BLM PROPOSES TO UPDATE RULES AND FEES ON OIL AND GAS. The [Farmington \(NM\) Daily Times](#) (10/5, 44K) reports that the BLM has announced that it is updating the rules and fees governing oil and natural gas extraction in an effort to catch up to advances in technology used by the energy industries.” Last week, the BLM announced a proposed rule updating and replacing its regulations, which have not been revised since 1989, related to the measurement of oil produced from federal and Indian onshore leases.” The article notes that “the proposed rule would replace Onshore Oil and Gas Order Number 4 (Order 4), which sets minimum standards for the measurement of oil extracted from public lands.”

MURRAY SUING OVER FOIA REQUEST. The [Wheeling \(WV\) Intelligencer](#) (10/6, 55K) reports that “Murray Energy Corp. is suing the federal government over alleged failure to comply with the Freedom of Information Act.” The firm says the Interior Department and the Office of Surface Mining and Reclamation and Enforcement “have completely ignored” its “request for information about a new rule opponents have said will be detrimental to underground coal mines such as those the firm operates in West Virginia, Ohio, Kentucky, Illinois and Utah.” According to the article, “in revealing its lawsuit, Murray stated that it filed an FOIA request on Sept. 4, seeking information about the OSMRE’s Stream Protection Rule.”

Additional coverage was provided by the [Morgantown \(WV\) Dominion Post](#) (10/6, 52K), [Law 360](#) (10/6, 21K), [WAJR-AM Morgantown \(WV\)](#) Morgantown, WV (10/6), and [WBKO-TV Bowling Green \(KY\)](#) Bowling Green, KY (10/6, 45K).

GREEN GROUP STUDY GAS PRODUCERS BENEFIT FROM BLM SUBSIDIES. [Inside Climate News](#) (10/6, McKenna) reports that according to a new study by Friends of the Earth, natural gas producers in North Dakota essentially receive a hidden federal subsidy worth tens of millions of dollars from “royalty-free flaring of natural gas from wells on public and tribal lands.” The article said the group’s study shows that over a six year period, “BLM subsidized the burning of \$524 million of natural gas by oil and gas companies operating on public and tribal lands in North Dakota.” Continental Resources, however, criticized the research, with Jeff Hume, the company’s vice chairman of strategic growth initiatives, saying the group had “obtained flare volume reports which are accurate, [but] what they don’t realize is the majority of gas that is reported as flared is inert gas, not hydrocarbons.” BLM spokesman Bradford Purdy also challenged the group’s claims, “saying producers that wish to flare must prove that capturing the gas would lead to a premature abandonment of recoverable oil reserves. Companies must also submit a plan that eliminates flaring within one year.”

WSJOURNAL BLASTS EPA’S REJECTION OF PEBBLE MINE PROJECT. The [Wall Street Journal](#) (10/6, Subscription Publication, 5.95M) says a new report on the EPA’s rejection of Alaska’s proposed Pebble Mine project demonstrates an abuse of government power and disregard for the law and calls on the agency’s inspector general and Congress to look into the matter.

Offshore Energy Development:

DOJ ANNOUNCES RECORD \$20.8 BILLION SETTLEMENT WITH BP OVER GULF OIL SPILL. [USA Today](#) (10/6, Johnson, 5.23M) reports that the Justice Department announced a record \$20.8 billion settlement on Monday “with British energy giant BP Monday, more than five years after the Deepwater Horizon oil spill stained more than 1,300 miles of the Gulf of Mexico’s coastline in the largest environmental disaster in U.S. history.” Attorney General Loretta Lynch said “the resolution marks the largest settlement against a single entity in U.S. history and will finance an unprecedented project to restore plant and wildlife habitats that were fouled by the spill of 3 million barrels of oil into the Gulf.” BP has agreed to pay a \$5.5 billion civil penalty, “the largest such penalty in the history of environmental law, and \$7.1 billion in damage claims under the Oil Pollution Act.”

The [New York Times](#) (10/6, Davenport, Subscription Publication, 11.82M) reports that the final settlement of \$20.8 billion raises the total from the initial \$18.7 billion settlement announced in July, and notes that “at either amount, it is the largest environmental settlement – and the largest civil settlement with any single entity – in the nation’s history.” Lynch called the final settlement “a major step forward in our effort to deliver justice to the Gulf region in the wake of the Deepwater Horizon tragedy – the largest environmental disaster our nation has ever endured.”

The [Washington Post](#) (10/5, Mufson, 6.76M) reports that “the highlights of the settlement include \$8.1 billion in natural resource damages, including \$1 billion BP agreed to pay earlier; \$5.5 billion plus interest for Clean Water Act penalties; and \$5.9 billion under a separate agreement to cover state and local government claims.” In July, “when the outlines of the deal were announced, BP put the cost of the settlement at \$18.7 billion,” and Attorney General Lynch “said the government was counting some coastline restoration money that BP did not count.” The Post notes that the settlement “does not, however, include \$4 billion BP agreed to pay earlier to settle criminal charges or the billions more it has spent cleaning up the oil spill and settling separate civil claims with private individuals.”

The [Wall Street Journal](#) (10/6, Barrett, Subscription Publication, 5.95M) adds that a number of civil suits against BP remain pending, including a securities fraud trial set for January in which investors who bought BP shares claim that the company underestimated how much oil was spilled into the Gulf of Mexico, an estimate used to determine the fines BP would later pay.

The [AP](#) (10/5, Tucker) reports that the settlement, “once approved by a judge, would resolve all civil claims against BP and end five years of legal fighting over a 134-million gallon spill that affected 1,300 miles of shoreline,” and also “would bind the company to a massive cleanup project in the Gulf Coast area aimed at restoring wildlife, habitat and water quality.” BP is receiving the punishment it deserves, while also providing critical compensation for the injuries that it caused to the environment and the economy of the Gulf

region," Lynch said.

[Bloomberg News](#) (10/5, Katakey, 2.66M) reports that the settlement "takes BP's total budget for the spill to more than \$54 billion, five years after an explosion at the Macondo well polluted the Gulf of Mexico and forced the company to shed more than third of its market value and assets to pay for the accident." [AFP](#) (10/5, Oberman) reports that Lynch said "she hopes the settlement will serve as a warning to companies about the need to operate 'in as safe a manner as possible.'"

[The Hill](#) (10/5, Henry, 471K) reports that BP "will pay \$4.9 million to Gulf Coast states affected by the spill, as well as \$1 billion to local communities there." The [Orlando \(FL\) Sentinel](#) (10/5, 769K) reports that Florida "stands to receive \$2 billion for economic damages, the most of any Gulf Coast state, and \$680 million for restoration projects." The state "is also in line for \$572 million as part of the 2012 Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act, with that figure potentially growing to \$1.25 billion."

In his "The Economic Hub" column for the [Los Angeles Times](#) (10/5, 4.07M), Michael Hiltzik writes that "the estimate that more than \$15 billion of the final settlement will be tax deductible sounds correct to University of Michigan law professor David Uhlmann, former chief of the Justice Department's environmental crimes section." Restitution "on damage claims and restoration of the damaged environment have long been designated by the IRS as deductible charges. 'That makes sense,' he told me. 'They're business expenses.'"

The [Financial Times](#) (10/5, Chon, Subscription Publication, 1.37M), the [Washington Times](#) (10/5, Wolfgang, 344K), the [New Orleans Times-Picayune](#) (10/6, Alpert, 718K), [Reuters](#) (10/5, Heavey, Rucker, Stephenson) and [Fuel Fix \(TX\)](#) (10/5, Eaton, 7K) also report.

NOAA To Hold Public Meetings On BP Oil Spill Restoration Plan. The [AP](#) (10/6) reports that the National Oceanic and Atmospheric Administration has released an \$8.8 billion plan to restore Gulf of Mexico areas damaged by the BP oil spill. Public meetings seeking comment "are scheduled across the Gulf and in Washington for public comment on the 690-page plan," the AP reports.

DESPITE SHELL'S DEPARTURE, OBAMA ADMINISTRATION STILL PLANS TO ISSUE ARCTIC DRILLING REGULATIONS. [The Hill](#) (10/5, Cama, 471K) reported that the Obama Administration "still plans to issue regulations for oil and natural gas drilling in the Arctic Ocean despite Royal Dutch Shell's decision to abandon its drilling efforts 'for the foreseeable future.'" Brian Salerno, director of the Interior Department's Bureau of Safety and Environmental Enforcement, "said regulators are moving forward with their rules, even though drilling is not likely to return to the Arctic for years, or even decades." The agency "wants to require drillers to keep a backup rig nearby to drill relief wells for blowouts, be able to contain spills through mechanical means and restrict the drilling season based on ice cover, among other provisions." The oil industry and Republicans "have sharply criticized the proposal as overly prescriptive, expensive and unnecessary, while Democrats and environmentalists say the rules don't go nearly far enough to prevent oil spills."

Additional coverage of Shell's exit was provided by [Platts](#) (10/6, 1K) and [Knowledge@Wharton](#) (10/5, 4K).

Moody's: Shell's Departure Could Have Negative Impact On Alaska's Economy. [Reuters](#) (10/5, Carroll) reported that in a note released on Monday, Moody's said that Shell's departure from its Arctic oil exploration could have a negative impact on Alaska's economy. Shell's decision is considered credit negative for Alaska, despite the project occurring in federal waters, because it would have had indirect benefits to Alaska's economy, including job generation and improving the Trans-Alaska Pipeline System's economic viability.

Seattle Times Endorses Yoshino For Port of Seattle Commission Position. In an editorial, the [Seattle Times](#) (10/5, 962K) endorsed Marion Yoshino for Port of Seattle Commission Position 5. While presenting its reasons for the endorsement, the Times wrote that while both candidates "say the Port should have been more transparent regarding Shell," Yoshino "is more pragmatic, suggesting that revenue from today's oil projects can be used to research and invest in alternatives."

Commentary. In commentary carried by [The Hill](#) (10/5, Shogan, 471K), Cindy Shogan, executive director of the Alaska Wilderness League, praised Rep. Jared Huffman (D-Calif.) for introducing the Stop Arctic Ocean Drilling Act in the House and urged Congress to support the bill. Shogan mentioned Shell's press release explaining the company's withdrawal from the Arctic, adding that "what Shell didn't mention in its statement was the growing opposition to Arctic drilling and the beating the company was taking in the court of public opinion."

America's Great Outdoors:

Bureau of Land Management:

BLM DIRECTOR KORNZE UNVEILS NEW INTERACTIVE MOUNTAIN BIKE MAPS AT OUTERBIKE 2015. [KCSG-TV](#) St. George, UT (10/6, 43) reports that BLM Director Neil Kornze "attended one of the nation's most important mountain bike events to introduce a new access tool for trail riders all across the country." According to the article, "developed by the BLM, in partnership with the International Mountain Biking Association (IMBA) and the MTB Project, the mobile-friendly online tool features interactive maps for 20 of the nation's most popular trails on public lands." Kornze said, "The BLM is proud to manage some of the world's best mountain bike trails. This new, mobile-friendly tool will help the public get a glimpse of these amazing places and plan their rides."

BLM DECISION COMPLICATES CADIZ PLAN TO SELL MOJAVE GROUNDWATER. The [Los Angeles Times](#) (10/6, 4.07M) reports that "Cadiz Inc.'s plans to sell Mojave Desert groundwater to Southern California communities have hit a major federal roadblock." The BLM says "Cadiz cannot use an existing railroad right-of-way for a new water pipeline that would carry supplies from the project's proposed well field to the Colorado River Aqueduct." According to the article, "by using the railroad right-of-way, Cadiz had hoped to escape federal environmental review of the 43-mile pipeline, one of the project's most expensive components." However, "in a letter to Cadiz on Friday, BLM's California director informed the company that it needs U.S. approval for a separate pipeline right-of-way over federal land," and "that would trigger review under federal environmental law, a potentially lengthy and costly process that could impose new conditions on the project."

Additional coverage was provided by [KCET-TV Los Angeles \(CA\)](#) Los Angeles (10/6, 15K).

ENVIRONMENTALISTS HALT GRAZING ON CANYONS OF THE ANCIENTS NATIONAL MONUMENT. The [AP](#) (10/6, 2.28M) reports that "a coalition of environmental groups has forced public land managers to delay a permit for grazing on Canyons of the Ancients National Monument." According to the article, "the seven groups collectively filed a protest against proposed grazing allotments in the Flodine and Yellow Jacket areas." They claim "drought condition data is out of date and that grazing doesn't fit with the monument's mission to protect ancient ruins."

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/6, 344K) and the [Denver \(CO\) Post](#) (10/6, 787K).

PLAN TO LIMIT GRAZING TRIGGERS BACKLASH IN UTAH. The [AP](#) (10/6, 2.28M) reports that "a proposal from the federal government to limit livestock grazing in parts of southern Utah's Washington County is triggering backlash from local officials." The proposed plan from the BLM is "intended to restore native vegetation and create habitat for the protected Mojave Desert Tortoise on two national conservation areas in the county." But "government officials argue the plan unfairly hurts ranchers, and could damage the economy."

BLM RANGERS FIND TWO MARIJUANA GROWS IN COLORADO. The [AP](#) Salt Lake City (10/6, 494K) reports that "authorities have arrested 10 people after the discovery of two large, unrelated marijuana grows on public land in western Colorado." The Department of Justice announced Monday that BLM rangers "acting on two separate tips found the grows south of Gateway near the Utah border." The rangers discovered "more than 1,200 fully mature marijuana plants, 211 kilograms of dried marijuana and a rifle at a site on the Dolores River corridor between Gateway and Naturita on Sept. 15." Also, "a second illegal grow was discovered nearby on Sept. 30."

Additional coverage was provided by the [Denver \(CO\) Post](#) (10/6, Paul, 787K), [KXRM-TV Colorado Springs \(CO\)](#) Colorado Springs, CO (10/6, Case, 2K), and [KCNC-TV Denver \(CO\)](#) Denver (10/5, 79K).

Fish and Wildlife Service:

SAGE GROUSE DECISION REFLECTS SHIFTING APPROACH TO SAVING ENDANGERED SPECIES. The [New York Times](#) (10/6, Goode, Subscription Publication, 11.82M) reports that "to many conservationists," the Interior Department's "decision to avoid listing the grouse reflects a larger shift in thinking that is taking hold in academic departments and advocacy circles around the country, even as it stirs controversy." Some conservationists call "traditional approaches to species conservation have focused on saving individual animals or plants in specific locations" as "too narrow," and they argue that conservation efforts "must work on a larger scale, focusing not on preserving single species in small islands of wilderness but on large landscapes and entire ecosystems, and the benefits that nature provides to humans." According to this view, conservation efforts will "be more effective if they accept humans as a part of nature and come to terms with the fact that they have irrevocably altered the landscape."

Additional coverage was provided by [Law 360](#) (10/6, 21K).

FWS RELEASES RARE FERRETS AT ROCKY MOUNTAIN ARSENAL NATIONAL WILDLIFE REFUGE. The [AP](#) (10/6, 2 28M) reports that “rare black-footed ferrets chattered angrily before dashing out of pet carriers and ducking into burrows Monday at the Rocky Mountain Arsenal National Wildlife Refuge — a milestone for the highly endangered animals and for the former toxic waste site on the industrial edge of Denver.” The FWS “released 30 ferrets at the site, part of a program to reintroduce them in 12 states where they once thrived, from Montana to Texas.” The article notes that “chemical weapons and pesticides were once manufactured there, but it became a wildlife refuge in 2010 after a \$2.1 billion cleanup.” FWS Director Dan Ashe said, “This remarkable place shows that nature will recover and will thrive if given a chance.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (10/6, Dan Elliott |, Ap, 6.76M), [NPR](#) (10/5, 1 85M), the [Fort Collins \(CO\) Coloradoan](#) (10/5, 59K), the [San Francisco \(CA\) Chronicle](#) (10/6, Subscription Publication, 3.35M), the [Seattle \(WA\) Times](#) (10/6, 962K), the [Denver \(CO\) Post](#) (10/6, Press, 787K), the [Washington \(DC\) Times](#) (10/6, Elliott, 344K), the [Denver \(CO\) Post](#) (10/6, 787K), the [Quincy \(IL\) Herald-Whig](#) (10/6, 99K), the [Daily Mail \(UK\)](#) (10/6, 5 59M), [Yahoo! News](#) (10/6, Elliott, 5.98M), and [KUSA-TV Denver \(CO\)](#) Denver (10/5, 222K).

FWS PROPOSES PROTECTIONS FOR BLACK PINESNAKES, MUSSELS. [The Hill](#) (10/5, Devaney, 471K) reports that the FWS is “moving forward with new protections for black pinesnakes.” The service is “listing the black pinesnake, which is endemic to Alabama, Louisiana, and Mississippi, as a threatened species.” The agency is also “proposing to protect certain freshwater mussels.” The agency “proposed Monday listing the Suwannee moccasinshell, which is endemic to Florida and Georgia, as a threatened species.”

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (10/6, 2 28M), the [Biloxi \(MS\) Sun Herald](#) (10/5, 129K), [Washington \(DC\) Times](#) (10/6, McConnaughey, 344K), and the [Hattiesburg \(MS\) American](#) (10/5, 34K).

FWS SAYS DESERT TORTOISE NO LONGER CANDIDATE FOR PROTECTION. The [AP](#) (10/6, 2.28M) reports that “the Sonoran desert tortoise is not at risk for extinction and will no longer be listed as a candidate for Endangered Species Act protections, the U.S. Fish and Wildlife Service announced Monday.” The service says “the decision is partly because of the commitments various government agencies have made to protect the animal in Arizona.” Spokesman Jeff Humphrey said, “We and our federal and state partners will continue to monitor the tortoises. However the current modeling in science demonstrates that there’s virtually no probability of extinction over the next decade.”

Additional coverage was provided by [ABC News](#) (10/6, 3.97M), the [Daily Mail \(UK\)](#) (10/6, 5 59M), the [Washington \(DC\) Post](#) (10/6, Astrid Galvan |, Ap, 6.76M), and the [Washington \(DC\) Times](#) (10/6, Galvan, 344K).

FWS PROPOSE DOWNGRADING PROTECTION FOR COLUMBIAN WHITETAILED DEER. The [Oregon Public Broadcasting](#) (10/6, 20K) reports that “one of the original endangered species – the Columbian white-tailed deer – is slowly making its way toward recovery.” On Tuesday, the FWS “proposed downgrading its protected status from endangered to threatened.” The article notes that “their numbers along the Columbia River were down to around 450 back in 1967 when they joined the bald eagle and California condor in the first group of animals protected under the Endangered Species Act,” and “now there are more than 900 deer in the lower Columbia River area.”

TRIBES CONTINUE PUSH TO MANAGE, OPERATE NATIONAL BISON RANGE. The [Ravalli \(MT\) Republic](#) (10/6, 19K) reports that “the Confederated Salish and Kootenai Tribes continue to talk with the U.S. Fish and Wildlife Service about another annual funding agreement that would transfer various degrees of management and operation of the National Bison Range to them, one of their attorneys said Thursday.” However, “a group called Public Employees for Environmental Responsibility has opposed CSKT’s efforts at the Bison Range at every turn, saying it opens up 80 percent of the National Wildlife Refuge System and 57 national parks in 19 states to similar agreements with other Indian tribes.”

SURVEY FINDS FWS SCIENTISTS CONCERNED ABOUT POLITICAL MEDDLING IN WILDLIFE DECISIONS. For “The Blog” of the [Huffington Post](#) (10/6, Greenwald, 164K), Noah Greenwald writes that “a survey issued this week by the Union of Concerned Scientists finds that 74 percent of U.S. Fish and Wildlife Service scientists reported that consideration of political interests was too high at the agency.” He says that “the survey comes as no surprise” as “we’ve witnessed a score of politically driven decisions by the Fish and Wildlife Service in recent years to deny or weaken protections for endangered species.” He argues that “the Endangered Species Act is clear that decisions about how best to protect wildlife on the verge of extinction must be based solely on the best available science,” but “time and again, political and economic interests worm their way in and influence decisions to the detriment of our most at risk plants and animals.” Greenwald hopes that President Obama will “take this survey to heart – after all, it’s his administration’s own scientists raising the alarm – and use his time left in office to reform the Fish and Wildlife Service and other agencies being unduly influenced.”

National Park Service:

NPS DIRECTOR JARVIS TO VISIT ULM. The [Monroe \(LA\) News Star](#) (10/5, 67K) reports that NPS Director Jarvis will “visit ULM on Oct. 6th and attend a variety of local events while sharing the importance of preservation.” Jarvis said, “Leading up to the National Park centennial anniversary in 2016, my visit to Monroe is a great opportunity to invite a new generation of Americans to visit their national parks and historic sites, as well as highlight the relevance of the park system in our nation. The centennial goal of the National Park Service is to create and connect with the next generation of park visitors, supporters, and advocates. I am looking forward to spending time with several classes of students from the area at a local park and Natural History Museum, amplifying the message of the Every Kid in the Park initiative and later speaking with college students and community members, inviting them all to learn, explore and engage with the natural and cultural resources of the park system. The National Park Service has something to offer everyone, in every corner of the country. We want everyone to know that and to benefit from America’s public lands.”

NATIONAL PARK FOUNDATION UNVEILS AD CAMPAIGN. [Fast CoCreate](#) (10/6, 100K) reports that “to show Americans that they are personally part of the country’s more than 400 national parks, the National Park Foundation and agency Grey New York enlisted the stunning work of body painter Natalie Fletcher.” According to the article, “in a new PSA and ad campaign, the official charity of America’s national parks shows visitors blending seamlessly into the incredible landscapes of national parks like Zion National Park to Federal Hall National Memorial.” The campaign seeks “to be a companion to the ‘Find Your Park’ movement for the upcoming National Park Service Centennial.”

NPS UNDER PRESSURE TO RENAME WASHINGTON’S “COON LAKE”. The [Raw Story](#) (10/6, 896K) reports that “the federal government is under pressure to rename a Washington lake for a black prospector instead of the racial slur that likely refers to him.” According to the article, “state officials agreed to change the name of Coon Lake and Coon Creek after a Seattle man convinced them the designation was intended as a racial slur against Wilson Howard, who worked claims and lived in the area in the 1890s.” The article notes that “the state’s board of geographic names officially changed the names to Howard Lake and Howard Creek in 2008, but the National Park Service continues to oppose the changes.” NPS officials said “they aren’t certain ‘coon’ referred to a black miner in an almost entirely white community more than 100 years ago — when newspapers regularly used the racial slur in reference to black people.”

Additional coverage was provided by [Mic](#) (10/6, 1.5M) and [Crosscut \(WA\)](#) (10/6).

NPS RESTORING PAINTING OF LINCOLN ASSASSINATION. The [Washington Post](#) (10/6, Ruane, 6.76M) reports that the NPS is having Carl Bersch’s 1865 painting of the assassination of Abraham Lincoln “cleaned and restored for the first time in 35 years.” According to Laura Anderson, a NPS museum curator, “the piece, which depicts Lincoln being carried out of Ford’s Theatre in Washington after being shot by John Wilkes Booth, is thought to be the only image of the assassination painted by an eyewitness.” The painting eventually will be exhibited in the Ford’s Theatre complex.

ZION NATIONAL PARK INVESTIGATES CIRCUMSTANCES OF FLOODING DEATHS. The [AP](#) (10/6, 2.28M) reports that Zion National Park officials are “retracing what led up to the deaths of seven people in a flooded canyon last month before a panel convenes to assess what can be done to keep a growing number of visitors safe when spectacular natural settings turn perilous.” According to Zion National Park Superintendent Jeff Bradybaugh, “investigators are talking to family members and examining the communications the group made in the hours before they canyon filled with fast-moving water from a powerful storm on Sept. 14.” The article notes that “the investigation could lead to changes in the permit system that controls who enters the park’s 21 narrow slot canyons, whose unique geological quirks also make them deadly.”

FLASH FLOODING CLOSES DEATH VALLEY ROADS. The [AP](#) (10/6, 2 28M) reports that “authorities say an intense wet rainstorm created flash flooding that closed roads in Death Valley National Park in California.” Death Valley National Park spokeswoman Linda Slater said Monday that “rangers toured remote roads and campsites and no injuries were reported after cloudbursts Sunday in the vast park near the Nevada-California state line.” The article notes that “all dirt roads in the park remained closed Monday, along with paved roads including Highway 178, or Badwater Road, between Furnace Creek and Shoshone, Dantes View Road, Greenwater Road and Scotty’s Castle Road.”

SHENANDOAH NATIONAL PARK CONSIDERS USING BEETLES TO FIGHT DESTRUCTIVE INSECT. The [AP](#) (10/6, 2.28M) reports that “predatory beetles could become a new tool in Shenandoah National Park’s effort to combat a destructive insect.” The park “plans to release predatory beetles at four locations within its boundaries.” Public input on the plan will be accepted through Oct. 15.

NPS APPROVES YELLOWSTONE TRAIL AND OVERLOOK IMPROVEMENTS. The [AP](#) (10/6, 2 28M) reports that the NPS has “approved a project to repair and improve many of the overlooks and trails located along the rim of the Grand Canyon of the Yellowstone River in Yellowstone National Park.” The NPS “found that the project would not cause any harm to historic and cultural resources in the area.” The project will improve overlooks and trails “as well as improve accessibility, pedestrian flow and safety.”

PYTHON CHALLENGE 2016 WON’T BE HELD EVERGLADES NATIONAL PARK. The [South Florida Sun Sentinel](#) (10/5, 651K) reports that “despite earlier reports to the contrary, Python Challenge 2016 will not be coming to Everglades National Park.” According to the article, “only a handful of authorized python removal agents will be participating

in the park come January 16, when the Python Challenge is set to begin."

ALCATRAZ ISLAND LIGHTHOUSE REHABILITATION PLANNED. The [Inside Bay Area \(CA\)](#) (10/6, 42K) reports that the NPS, "Coast Guard, the United States Lighthouse Society and the Land's End clothing company jointly announced Monday the first step toward restoring the lighthouse" on Alcatraz Island. The article notes that "lighthouse backers commissioned a \$25,000 architectural study to determine the scope and cost of the work – laying the groundwork for a major fundraising campaign to pay for it."

YELLOWSTONE NATIONAL PARK SETS RECORD YEAR FOR VISITATION. [Reuters](#) (10/5, Prevost) reports that Yellowstone National Park has set a new annual visitation record. According to data compiled by the NPS, more than 3.8 million people have visited Yellowstone through the end of September. The figure breaks the previous annual record of 3.6 million visitors set in 2010.

VOLUNTEERS RECOGNIZED WITH AWARDS. The [AP](#) (10/6, 2.28M) reports that "Sterling Fisher started volunteering at the Great Smoky Mountains National Park when he was only 6 years old." On Friday, Fisher, now 18 year-old was "recognized as the recipient of the National Park Service's Hartzog Youth Volunteer Award." Fisher had "already contributed 300 hours of service to the park by the time he was 16," and "in high school, he organized a junior chapter of Friends of the Smokies whose 20 members have completed more than 400 hours of volunteer service." Also recognized on Friday was "longtime volunteer Tom Harrington." Harrington has "been a park volunteer for 17 years and has contributed more than 20,000 hours of service." He was "selected as the southeast regional winner for the Enduring Service Award."

US Geological Survey:

USGS, SIOUX FALLS SURVEYING GROUNDWATER. The [Rapid City \(SD\) Journal](#) (10/6, 126K) reports that "the City of Sioux Falls and the United States Geological Survey will begin conducting a state-of-the-art groundwater survey this week." Sioux Falls has "contracted with CGG Canada Services to be flying a helicopter over the Big Sioux Aquifer to collect, record and map its geophysical measurements." Officials say "the study will determine groundwater, soil, and sand characteristics to help in the future planning of water access points."

Top National News:

MEDIA ANALYSES PENDING HILL DEBATE, TPP DEAL A "LEGACY-MAKING" WIN FOR OBAMA. While much of the reporting on the TPP agreement cautions about a potentially bruising fight ahead on Capitol Hill, media coverage overwhelmingly casts yesterday's announcement as historic, and as a major victory for President Obama. All three network newscasts, however, ignored the story last night.

This morning, the [New York Times](#) (10/5, A1, Calmes, Subscription Publication, 11.82M) refers on its front page to a "potentially legacy-making achievement for...Obama," the "capstone for his foreign policy 'pivot' toward closer relations with fast-growing eastern Asia." The [Los Angeles Times](#) (10/6, Lee, 4.07M) similarly states the pact brings the President closer to his "legacy-making goal to expand America's influence in the Asia-Pacific region," and the [Washington Post](#) (10/6, A1, Nakamura, 6.76M) reports in a front-page piece that the deal "potentially" handed him "a legacy-defining victory late in his presidency."

Along similar lines, [Foreign Policy](#) (10/5, Francis, Hudson, 364K) indicated on its website that the TPP "could become the most significant foreign-policy legacy" of the Obama Administration, while the [Washington Times](#) (10/6, Boyer, 344K) calls the agreement "the biggest free trade triumph of...Obama's presidency," and the [AP](#) (10/6, Wiseman, Rugaber, Yamaguchi) terms it "a major victory on a centerpiece of" his "international agenda."

[AFP](#) (10/6, Handley) reports that "Obama, who made the TPP a priority of his second term," said yesterday that the accord "reflects America's values and gives our workers the fair shot at success they deserve." Added Obama, "When more than 95 percent of our potential customers live outside our borders, we can't let countries like China write the rules of the global economy. ... We should write those rules, opening new markets to American products while setting high standards for protecting workers and preserving our environment."

[USA Today](#) (10/6, Jackson, 5.23M) reports that Obama "plans to sell the deal in person Tuesday at a meeting with business leaders who will gather at the Agriculture Department in Washington." Yesterday, Agriculture Secretary Vilsack said the agreement "would 'eliminate or significantly reduce tariffs on our products and deter non-science based sanitary and phytosanitary barriers that have put American agriculture at a disadvantage' to other countries." In a statement yesterday, the President said the TPP "levels the playing field for our farmers, ranchers, and manufacturers by eliminating more than 18,000 taxes that various countries put on our products," even as it "puts American workers first and will help middle-class families get ahead."

The [AP](#) (10/6, Wiseman, Rugaber, Yamaguchi) quotes USTR Froman as saying of the deal, "We think it helps define the rules of the road for the Asia-Pacific region." [USA Today](#) (10/6, Jackson, 5.23M) notes that Froman also said the deal "will 'promote economic growth' and 'support higher paying jobs.'"

The [Christian Science Monitor](#) (10/5, Fredrikson, 455K) said that for the President, "the deal could represent a historic effort to protect not only commerce, but the economy and the environment as well and specifically ensure US competitiveness amid a growing China." The [Los Angeles Times](#) (10/6, Makinen, 4.07M) notes that China "has been pursuing its own bilateral trade deals with countries including Australia and South Korea," and "is also participating in talks on the Regional Comprehensive Economic Partnership (RCEP), which would link the 10 members of the Assn. of Southeast Asian Nations with Australia, China, India, Japan, New Zealand and South Korea, accounting for about 30% of global gross domestic product."

Ian Bremmer, in an online analysis for [TIME](#) (10/5, 19 55M), indicated that in addition to the US, "all the other countries" involved "are expected to pass it, as well," though "the main remaining question is Canada, where the matter might be decided by an upcoming election." Bremmer concludes that "on balance, this is a good deal for the United States and an important win for the Obama administration."

The debate now moves to the US Congress, where, according to [Politico](#) (10/5, Gass, 942K), the "dysfunction and unpredictable nature of the US political system" mean the pact "could still conceivably unravel." For one thing, "with populism animating the base of both parties, a trade pact is bound to be unpopular with many early primary voters." The [Boston Globe](#) (10/6, Horowitz, 1.1M) sees "no guarantee" Congress "will pass" the agreement, as "Democratic support...has always been weak" and Republicans would have "to have to line up behind Obama, burnishing his legacy in the run-up to the 2016 presidential contest."

As the [Atlanta Journal-Constitution](#) (10/5, Trubey, 1.05M) notes, Obama "has to wait 90 days after agreement before signing the pact, and only then will Congress begin to debate it," and "as a result, a vote on the agreement likely will not happen until well into 2016." The [Washington Post](#) (10/6, A1, Nakamura, 6.76M) also reports that "the vote will come during the presidential primary nominating contests," and notes that "opponents of the deal, including labor unions, environmental groups and liberal Democrats, have pledged to mount a final campaign to block the accord."

More optimistic is the [Dallas Morning News](#) (10/6, Lindenberger, 1.15M), which indicates in an analysis piece that the President "has the upper hand in the negotiations in Congress, as that body has already renewed presidential fast-track negotiation authority," and concludes that "the weight of the momentum, after years of negotiations, will likely be in favor of ratifying the agreement." Congressional approval, however, won't come "without significant opposition." On its website, [The Atlantic](#) (10/5, Berman, 2 69M) reported that "Administration officials sounded confident that Congress would ultimately ratify" the deal it, pointing out that the Administration "would be spending months going over it with lawmakers point by point."

According to [The Guardian](#) (10/5, Roberts, 3.3M), "the White House began lobbying Democrats" yesterday. Said press secretary Josh Earnest, "Our goal here is to talk about the benefits of the agreement. ... There are well-known differences of opinion on this and I don't anticipate we are going to persuade every member of Congress." In fact, the [New York Times](#) (10/6, Granville, Subscription Publication, 11.82M) reports, "many Democrats said the president would have to address their concerns over labor and environmental standards and investor protections when he returns to Congress seeking approval of the trade deal."

The [Huffington Post](#) (10/5, Carter, 164K), meanwhile, said that when it comes to the TPP, "Obama has the Senate sewn up," but cautioned that "Congressional Democrats...loathe the agreement" and that yesterday, "Republican leaders didn't exactly celebrate the administration's announcement." [The Hill](#) (10/5, Carney, 471K) noted on its website that Senate Majority Leader McConnell "warned...that Congress will give 'intense scrutiny'" to the deal, and said, "Serious concerns have been raised on a number of key issues." [Roll Call](#) (10/5, Lesniewski, Flemming, 113K) reported that McConnell also said, "In the months ahead, the Senate will review this agreement to determine if it meets the high standards Congress and the American people have demanded."

The [Huffington Post](#) (10/5, Reilly, 164K) reported that Sen. Orrin Hatch and Rep. Paul Ryan, "who co-sponsored legislation earlier this year to give Obama fast-track authority to expedite trade negotiations," yesterday "were hesitant to praise the agreement." Hatch "expressed concern that the deal squanders a 'historic opportunity to break down trade barriers for American-made products,'" and Ryan "said he is reserving judgment" on the deal until he can further review the agreement." [Reuters](#) (10/6, Cowan, Lawder) quotes Hatch as saying, "I am afraid this deal appears to fall woefully short." The [Wall Street Journal](#) (10/6, Mauldin, Subscription Publication, 5.95M) notes that Hatch also said, "I will carefully scrutinize it to see whether my concerns about rushing into a deal before meeting all US objectives are justified."

The [Atlanta Journal-Constitution](#) (10/5, Trubey, 1.05M) notes that National Council of Textile Organizations President Augustine Tantillo said yesterday, "Though we are waiting to examine the final details, our briefings at the Atlanta TPP round lead us to believe that US negotiators were able to achieve a well-balanced and reasonable outcome." The AFL-CIO, however, said in a statement, "We ask the Administration to release the text immediately, and urge legislators to exercise great caution in evaluating the TPP."

The [Washington Post](#) (10/6, A1, Nakamura, 6.76M) reports that the Sierra Club's Ilana Solomon charged that the Administration "is pursuing policies under extreme secrecy," adding, "The entire TPP has been negotiated behind closed doors. ... The lack of dialogue is abysmal." The [New York Times](#) (10/6, Nixon, Davenport, Subscription Publication, 11.82M), however, says "environmentalists praised wildlife protections included in the sweeping Trans-Pacific Partnership trade deal announced Monday, calling them groundbreaking." The Times quotes the World Wildlife Fund's David McCauley as saying, "The provisions in the Trans-Pacific Partnership go beyond what we have seen in other trade agreements."

The [Atlanta Business Chronicle](#) (10/5, Williams, Subscription Publication, 118K) reports that Atlanta Mayor Kasim Reed came out in favor of the agreement, while UPS CEO David Abney called it "a historic agreement that represents real market opportunities for US companies of all sizes and a chance to compete on a more level playing field."

[USA Today](#) (10/6, Davidson, 5.23M) reports that the deal "should boost the US economy and lower consumer prices on some imports," according to experts such as "Eswar Prasad, a professor of trade policy at Cornell University." The [Los Angeles Times](#) (10/6, Lee, 4.07M), meanwhile, reports that "private studies suggest that the Pacific accord would add only modestly to US economic growth and have little overall effect on jobs," but "would have a proportionately larger effect in California." [McClatchy](#) (10/5, Hall, 28K) similarly indicates that "the immediate trade benefits are likely to fall largely on the West Coast because of geography and existing rail and port connections." However, "the agreement has broader importance because it encompasses countries that together account for about 40 percent of the global economy."

Sanders Blasts "Disastrous" TPP Amid Media Speculation About Clinton's Stance. The [Hill](#) (10/5, Needham, 471K) reports that Sen. Bernie Sanders yesterday called the pact "disastrous," and declared himself "disappointed but not surprised" by it. Added Sanders, "Wall Street and other big corporations have won again." The [New York Observer](#) (10/5, Barkan, 203K) further quotes Sanders as saying, "It is time for the rest of us to stop letting multi-national corporations rig the system to pad their profits at our expense." [Politico](#) (10/5, Strauss, 942K) also notes Sanders' comments.

According to [USA Today](#) (10/6, Jackson, 5.23M), "Sanders' opposition to the Trans-Pacific Partnership could put political pressure on Hillary Clinton." In the [New York Daily News](#) (10/5, 3.75M), Cameron Joseph writes, "It will be interesting to see what stance...Clinton takes on the deal." Clinton "originally praised early versions as the 'gold standard' of trade agreements but has been more critical of it since she became a candidate – and it became an issue on the campaign trail." The [Guardian](#) (10/5, Roberts, 3.3M), meanwhile, indicated that "a key determining factor in whether TPP does pass Congress is likely to be...Clinton."

[Politico](#) (10/5, Guida, 942K) reports that "if Clinton supports the pact, she is sure to anger her party's base, especially labor and environmental groups." However, "opposing the deal is also a problem because it opens her to charges of flip-flopping."

Many Industries Back Deal, But Some Point To Shortcomings. In an analysis, the [Wall Street Journal](#) (10/5, A2, Kesmodel, Mauldin, Rockoff, Subscription Publication, 5.95M) breaks down industries seen as winning and potentially losing from the Trans-Pacific Partnership. On the winning side are agriculture, aerospace, and apparel, while the pharma and tobacco industries pointed to shortfalls in the agreement. The Journal says that the agriculture sector strongly backs the deal, as do some industry groups such as the National Association of Manufacturers. Boeing and Intel also voiced support. Meanwhile, Ford raised concerns about currency manipulation, and the pharmaceutical trade group PhRMA pointed to what it said were insufficient intellectual property provisions.

The [New York Times](#) (10/5, Bradsher, Pollack, Subscription Publication, 11.82M) similarly reports, "Dairy farmers in Pennsylvania. Auto-parts workers in the Midwest. Pharmaceutical companies concentrated around New Jersey." These are the "pivotal groups, not to mention consumers across the country," who "can expect a wide range of changes in the years ahead from the newly concluded Trans-Pacific Partnership trade deal."

[Bloomberg News](#) (10/5, 2.66M), meanwhile, reports that Darci Vetter, the Chief Agricultural Negotiator for the USTR, said the accord "will boost sales by 'billions,'" and added, "Our meat industry is a big winner."

The [Detroit News](#) (10/6, Shepardson, 493K) reports that it "has learned that under the deal, America's 25 percent tariffs on imported light trucks would remain in place for 30 years." Meanwhile, "the 2.5 percent tariffs on cars would be in place for 25 years, and begin to be phased out after 15 years – falling first to 2.25 percent, and then to 1.25 percent in year 20." [Reuters](#) (10/6, Hughes, Krolicki), meanwhile, says the pact will give Japan more flexibility to purchase parts from Asia for cars sold in the US.

[Bloomberg News](#) (10/6, 2.66M) indicates that "US lawmakers sought strong and enforceable language on currency manipulation, but that wasn't in the TPP agreement and will have to be negotiated separately, Representative Sander Levin of Michigan said in a memo to fellow Democrats in the House Advisory Group for Negotiations prior to the deal's announcement." Bloomberg adds that the Treasury Department "will handle those talks."

WPost Praises TPP Deal. In an editorial, the [Washington Post](#) (10/6, 6.76M) writes that "what's emerged from the talks suggests that the TPP will indeed live up to Mr. Obama's promise of a '21st-century' agreement: one that anchors the United States in a key region for decades to come, while increasing the scope of trade policy beyond just tariffs." Looking at the upcoming congressional debate, the Post concludes that "it's enough to note the fact that Washington can still get something done, and to celebrate that."

White House Hopeful About TTIP Talks. The [Washington Times](#) (10/6, Boyer, 344K) reports that the TPP agreement "could provide a boost for a second major trade deal with the European Union that is still being negotiated." Earnest, notes [Reuters](#) (10/6, Edwards), said of the European trade deal, or TTIP, "The negotiations around TTIP are not quite as advanced, but if there is an opportunity for us, based on our consultations with our friends in Europe, to reach an agreement that would have the same kind of economic potential for American businesses and American workers, then we wouldn't hesitate to pursue it."

OBAMA WILL MEET WITH SHOOTING VICTIMS' FAMILIES IN OREGON FRIDAY. The [New York Times](#) (10/6, Shear, Subscription Publication, 11.82M) reports the White House said Monday that President Obama will travel to Roseburg, Oregon on Friday to meet privately with the families of those shot at Umpqua Community College last week. The [Washington Post](#) (10/6, Eilperin, 6.76M) reports that "according to one White House official, who asked for anonymity to discuss the event in advance, 'further details about the president's travel to Oregon will be made available in the coming days.'" The President "was headed to the Pacific Northwest already on Friday" for a Seattle fundraiser for Sen. Patty Murray. [USA Today](#) (10/6, Korte, 5.23M) says it will be Obama's second visit to the town; "in 2008, he made an unscheduled campaign stop" there.

On the [CBS Evening News](#) (10/5, story 5, 2:15, Pelley, 5.08M), John Blackstone reported that "students and staff returned to the community college campus today not for classes but for counseling and to retrieve things left behind in the rush to escape." CBS, as well as [ABC World News](#) (10/5, story 7, 1:25, Muir, 5.84M) and [NBC Nightly News](#) (10/5, story 5, 1:35, Holt, 7.86M), profiled some of the victims and spoke to family members.

Earnest Says White House Looking Into Executive Action On Guns. The [Daily Caller](#) (10/5, Ross, 375K) reports White House Press Secretary Josh Earnest said Monday that the White House "is considering whether President Obama can take executive action to enforce stronger gun control measures." Earnest said, "The President has frequently pushed his team to consider a range of executive actions that could more effectively keep guns out of the hands of criminals and others who shouldn't have access to them. That's something that is ongoing here." The [Washington Times](#) (10/6, Wolfgang, 344K) reports Earnest also said "voters who feel passionately about the issue may have to cast their ballots solely based on a candidate's position on guns." He said, "It may be time for some voters to decide they're single-issue voters."

[USA Today](#) (10/6, Reynolds, 5.23M) contributor Glenn Harlan Reynolds writes that President Obama "issued a bold call" in saying it is time "to politicize" mass shootings "in service of getting rid of guns." But "no significant gun legislation" will make it through Congress, and gun control is "a bad electoral issue for Democrats." Reynolds says Obama is stressing the issue to draw attention away from other matters like foreign policy troubles and Hillary Clinton's campaign difficulties.

Bloomberg Group Proposes Five Gun-Control Executive Actions. The [Hill](#) (10/5, Devaney, 471K) reports Everytown for Gun Safety, former New York Mayor Michael Bloomberg's gun control group, "is pushing President Obama to issue new gun regulations in the absence of congressional action." The group "released a list of five executive actions it says Obama could take to reduce gun violence."

According to the [New York Daily News](#) (10/5, Siemaszko, 3.75M), the proposals include "enforcing the federal Gun-Free School Zones Act by barring people from carrying guns within 1,000 feet of a school," requiring all "high-volume gun sellers – including private sellers" – to "obtain dealer licenses and comply with applicable laws, including background checks" on all sales, reporting "every would-be gun purchaser who fails a federal background check to local law enforcement for follow-up," helping states that currently require background checks "by giving them access to FBI data," and "barring anybody convicted of domestic abuse...from owning a gun."

Reid Pushes For Background Checks, Calls Republicans "Puppets Of The NRA." [Politico](#) (10/5, Kim, Everett, 942K) reports Senate Minority Leader Reid said Monday "that he is reaching out to other Democratic senators on moving background checks legislation," and criticized Republicans. He said, "One thing is clear: To pass background checks, we need Republicans to stop acting as puppets of the NRA."

Clinton Says She Would Seek Tighter Gun Restrictions As President The [CBS Evening News](#) (10/5, story 5, 2:10, Pelley, 5.08M) reported that Hillary Clinton "added her

voice to the conversation about gun violence" Monday.

Waco Mammoth National Monument Dedicated

WACO (October 5, 2015) Former first lady Laura Bush, U.S. Secretary of the Interior Sally Jewell and National Park Service Director Jonathan B. Jarvis took part in a dedication ceremony Monday morning to mark the designation of Waco Mammoth National Monument.

"It's our duty to protect places like this that will inspire the next generation of archaeologists, paleontologists, and historians, and show the rich diversity of our country's natural heritage," Jewell said.

The invitation-only ceremony was not open to the public.

On July 10 President Barack Obama designated the site as one of three new national monuments.

It's now managed by the National Park Service in cooperation with the City of Waco and Baylor University.

"The National Park Service has worked seamlessly with our partners at the City of Waco, Baylor University, and the Waco Mammoth Foundation to lay the groundwork for the continued success of the Waco Mammoth National Monument," Jarvis said.

A painstaking excavation of the site, which was discovered in 1978, has uncovered the remains of 25 Columbian mammoths that died nearly 68,000 years ago, probably after the nursery herd was caught in a flash flood.

In 2002, then U.S. Rep. Chet Edwards, D-Waco authored legislation which later became a law that directed the National Park Service to determine the feasibility of establishing a national park at the Waco Mammoth Site.

Three years later he secured \$200,000 for preservation efforts at the site and an additional \$200,000 for the Baylor Mayborn Museum's Mammoth Exhibit.

In March 2009 the U.S. Department of the Interior recommended including the site as part of the National Park Service, and Edwards introduced the "Waco Mammoth National Monument Establishment Act of 2009," which would have implemented the Department of Interior proposal and authorized appropriations for the project.

The original U.S. Department of the Interior recommendation called for giving the Park Service the lead responsibility for protection, scientific study and visitor enjoyment of the site in partnership with the City of Waco and Baylor University, which was the option local leaders preferred.

The House passed the bill, but the measure later died in the U.S. Senate, the victim of a maneuver called an anonymous hold.

Subsequent measures introduced by Edwards' successor, U.S. Rep. Bill Flores, R-Bryan, called for designating the site as a National Monument.

The new bill didn't provide funding for the monument, but the authors said local support would make the national recognition possible without additional federal spending.

Ground was broken in 2008 for \$3.2 million visitor center and pavilion to protect the site, which has been operated since 2009 by the city in partnership with Baylor University and support from the nonprofit Waco Mammoth Foundation.

In April Jarvis toured the site and later said he would ask the Interior Department to seek Mr. Obama's approval to designate the site a national monument.

Two weeks later the Waco City Council voted to turn five acres of the site and the excavated remains over to the federal government, leaving just more than 100 acres as city property, but as administrative land in the national park system.

Under the 1906 Antiquities Act the President bypassed Congress and issued the executive order for the designation.

City parks workers Mike Fields, left, and David May, right, prepare to attach a National Park Service sign to the entrance of the Waco Mammoth Site.

By **J.B. SMITH** jbsmith@wacotrib.com

U.S. Secretary of the Interior Sally Jewell will visit the Waco Mammoth National Monument to celebrate its recent designation as part of the national park system.

Jewell and National Park Service director Jon Jarvis will tour the site and participate in a 10 a.m. dedication ceremony with local leaders, including Baylor University President Ken Starr, Mayor Malcolm Duncan Jr. and Waco Mammoth Foundation founder Gloria Young. The event is by invitation only.

President Barack Obama in July designated the site at 6220 Steinbeck Bend Drive as a national monument, capping a yearslong effort by local officials to win the designation. The Waco Mammoth Foundation raised \$4.2 million to turn the mammoth dig site into an educational tourism attraction, built to National Park Service standards.

Since 1978, the remains of 24 Columbian mammoths have been discovered at the site, some dating back 65,000 years. Among them are the nation's only known "nursery" herd of mammoths, thought to be buried in a cataclysmic flood.

the Interior Secretary Sally Jewell and National Park Service Director Jonathan B. Jarvis will take part in a dedication ceremony Monday to mark the designation of Waco Mammoth National Monument.

Waco Mammoth Site (File)

The invitation-only ceremony is not open to the public.

In July President Barack Obama designated the site as one of three new national monuments.

Jewell and Jarvis also plan to meet with local fourth graders in support of the administration's Every Kid in a Park initiative.

The site, which was discovered more than 30 years ago, contains the largest known concentration of mammoths that died in a single event.

A painstaking excavation of the site has uncovered the remains of 25 Columbian mammoths that died nearly 68,000 years ago, probably after they were caught in a flash flood.

In 2002, then U.S. Rep. Chet Edwards, D-Waco authored legislation which later became a law that directed the National Park Service to determine the feasibility of establishing a national park at the Waco Mammoth Site.

Three years later he secured \$200,000 for preservation efforts at the site and an additional \$200,000 for the Baylor Mayborn Museum's Mammoth Exhibit.

In March 2009 the U.S. Department of the Interior recommended including the site as part of the National Park Service, and Edwards introduced the "Waco Mammoth National Monument Establishment Act of 2009," which would have implemented the Department of Interior proposal and authorized appropriations for the project.

The original U.S. Department of the Interior recommendation called for giving the Park Service the lead responsibility for protection, scientific study and visitor enjoyment of the site in partnership with the City of Waco and Baylor University, which was the option local leaders preferred.

The House passed the bill, but the measure later died in the U.S. Senate, the victim of a maneuver called an anonymous hold.

Subsequent measures introduced by Edwards' successor, U.S. Rep. Bill Flores, R-Bryan, called for designating the site as a National Monument.

The new bill didn't provide funding for the monument, but the authors said local support would make the national recognition possible without additional federal spending.

Ground was broken in 2008 for \$3.2 million visitor center and pavilion to protect the site, which has been operated since 2009 by the city in partnership with Baylor University and support from the nonprofit Waco Mammoth Foundation.

In April National Park Service Director Jon Jarvis toured the site and later said he would ask the Interior Department to seek Mr. Obama's approval to designate the site a national monument.

Two weeks later the Waco City Council voted to turn five acres of the site and the excavated remains over to the federal government, leaving just more than 100 acres as city property, but as administrative land in the national park system.

Under the 1906 Antiquities Act the President bypassed Congress and issued the executive order for the designation.

Secretary of Interior Jewell Expected at Waco Monument Event

▫

Dedication ceremonies are planned next week for the recently designated Waco Mammoth National Monument in Central Texas.

Organizers say U.S. Secretary of the Interior Sally Jewell and National Park Service Director Jonathan Jarvis are expected to attend Monday's event.

President Barack Obama in July proclaimed Waco Mammoth as one of three new national monuments. The others are Berryessa Snow Mountain in California and Basin and Range in Nevada.

The Texas site includes well-preserved fossils of a herd of Columbian Mammoths and remains of other Ice Age animals. Experts say some fossils identified at the site are thought to be more than 65,000 years old.

Secretary Jewell, Former First Lady Laura Bush Join Texas Community to Celebrate Waco Mammoth National Monument Designation

President's Proclamation protects rare Mammoth fossils, first and only recorded discovery of a nursery herd

WACO, TEXAS – U.S. Secretary of the Interior Sally Jewell and Former First Lady Laura Bush today joined community members to celebrate the President's designation of the [Waco Mammoth National Monument](#) as one of the nation's newest national monuments, permanently protecting the site where the extremely well-preserved fossils of a herd of Columbian Mammoths and other Ice Age animals have been found. President Obama [designated the area as a national monument](#) on July 10, 2015, as part of the Administration's commitment to protect our country's significant natural, historical and cultural treasures for the benefit of future generations.

The celebration took place at the new national monument, where Secretary Jewell and former First Lady Laura Bush were joined by National Park Service Director Jonathan B. Jarvis, City of Waco Mayor Malcolm Duncan, Baylor University President and Chancellor Ken Starr, and many local, state and national conservation and community leaders.

"Today we celebrate decades of hard work and partnerships between the City of Waco, Baylor University, the Waco Mammoth Foundation and now the National Park Service," said Secretary Jewell. "It's our duty to protect places like this that will inspire the next generation of archaeologists, paleontologists, and historians, and show the rich diversity of our country's natural heritage."

The area in Texas provides a rare chance to understand and interpret the behavior and ecology of the extinct Columbian Mammoth. The oldest fossils identified at the site are thought to be more than 65,000 years old. In addition, both the excavation area and the land around it offer an excellent opportunity for further exploration and paleontological and geological research. In a nod to the recently launched [Every Kid in a Park initiative](#), which aims to get fourth graders nationwide to visit public lands, today, a group of fourth grade students were onsite to participate in an interactive learning activity.

"America will celebrate the 100th anniversary of the National Park Service on August 25, 2016. Michelle Obama and I serve as the Honorary Co-Chairs of the Centennial Campaign, and our centennial campaign theme is Find Your Park," said Mrs. Laura Bush. "Today, as we designate the newest national park unit, it seems like the perfect moment to invite you to join me and Find Your Park. Everyone in Waco can find your own park right here at home at the Waco Mammoth National Monument."

The site remains the nation's first and only recorded discovery of a nursery herd, including females and their offspring, of mammoths from the Ice Age, an era defined as 2.5 million to 10,000 years ago. Of the 24 mammoths uncovered to date, at least 18 were part of the nursery herd. As a result of an unknown natural catastrophic event, the entire nursery herd died at the same moment in time, which left the skeletons relatively intact. The site offers a one-of-a-kind opportunity to examine the matriarchal herd structure and behavior of this extinct species.

The site is now managed by the National Park Service in cooperation with the City of Waco and Baylor University. The National Park Service is conducting a [management planning process](#), working closely with partners, community members, and other groups that have devoted themselves to preserving the site for many years.

"The National Park Service has worked seamlessly with our partners at the City of Waco, Baylor University, and the Waco Mammoth Foundation to lay the groundwork for the continued success of the Waco Mammoth National Monument," said National Park Service Director Jonathan B. Jarvis. "We are proud to celebrate this special place, and thank the people of Waco for welcoming the National Park Service so warmly."

The site was discovered in 1978, when Waco residents Paul Barron and Eddie Bufkin were looking for arrowheads and fossils along the Bosque River and found a large bone protruding from the earth. Realizing the possible significance of this discovery, Mr. Barron and Mr. Bufkin immediately took the bone to the Strecker Museum at Baylor University where it was identified as the upper leg bone of a Columbian Mammoth.

Over the next 20 years, Baylor University oversaw the excavation of the site, where they found the remains of 24 Columbian Mammoths, including adults and juveniles, as well as a western camel, saber-toothed cat, dwarf antelope, American alligator, and giant tortoise. The Columbian Mammoths are the largest mammoth species – larger than its relative, the Woolly mammoth – and stood 12 to 14 feet tall and weighed seven to eight tons. Many of the discovered bones, including the remains of four Columbian Mammoths, as well as the skeleton of the camel, remain in place, providing visitors an opportunity to view them.

The City of Waco has operated the Waco Mammoth Site as a park since 2009, in partnership with Baylor University and with support from the nonprofit Waco Mammoth Foundation, Inc. The city donated to the United States approximately five acres, which includes the excavation site and the dig shelter, making it possible to establish the monument. Nearly the entire Waco Mammoth Site is within the boundary of the national monument.

The Antiquities Act was first used by President Theodore Roosevelt in 1906 to designate Devils Tower National Monument in Wyoming. Since then, 16 presidents have used this authority to protect unique natural and historic features in America, such as the Grand Canyon, the Statue of Liberty, and Colorado's Canyons of the Ancients.

The Waco Mammoth National Monument is one of three new national monuments announced by President Obama in July that help tell the story of significant events in American history and protect unique natural resources for the benefit of all Americans. The new monuments also include [Berryessa Snow Mountain](#) in California, and [Basin and Range](#) in Nevada.

With these new designations, President Obama will have used the Antiquities Act to establish or expand 19 national monuments. In total, he has protected more than 260 million acres of public lands and waters – more than any other President – as well as preserved sites that help tell the story of significant people or extraordinary events in American history, such as [César E. Chávez National Monument](#) in California, [Harriet Tubman Underground Railroad National Monument](#) in Maryland, and [Charles Young Buffalo Soldiers National Monument](#) in Ohio.

DOI in the News:

JEWELL, JARVIS TO ATTEND DEDICATION OF WACO MAMMOTH NATIONAL MONUMENT. [KWTX-TV](#) Waco, TX (10/2, 85K) reports that Interior Secretary Sally Jewell and National Park Service Director Jonathan B. Jarvis will be at the dedication of the Waco Mammoth National Monument on Monday. They will also "meet with local fourth graders in support of the administration's Every Kid in a Park initiative." The site has the "largest known concentration of mammoths that died in a single event" at 25. They were apparently "caught in a flash flood" about 68,000 years ago. Similar coverage appears at [KXXV-TV](#) Waco, TX (10/2, Garcia, 30K). The [Waco \(TX\) Tribune-Herald](#) (10/4, Smith, 111K) reports that in addition to Jewell and Jarvis, Baylor University President Ken Starr, Mayor Malcolm Duncan Jr., and Waco Mammoth Foundation founder Gloria Young will all be there.

[KBTX-TV](#) Waco, TX (10/2, 81K) carried an Associated Press report, which also appeared at [KXAS-TV](#) Dallas (10/2, 363K), the [Longview \(TX\) News-Journal](#) (10/2, 64K), [Las Vegas Sun](#) (10/2, 199K), [Albuquerque \(NM\) Journal](#) (10/5, 259K), [San Francisco Chronicle](#) (10/2, Subscription Publication, 3.35M), [Houston Chronicle](#) (10/2, 2 28M) and [Washington Times](#) (10/2, 344K).

JEWELL LAUNCHES GRID ALTERNATIVES TRIBAL SOLARTHON. [E&E](#) (10/1, Brown) reports in continuing coverage that Interior Secretary Sally Jewell on Thursday, at "Shinnecock Indian Nation on the eastern end of Long Island," launched the "GRID Alternatives' Tribal Solarthon," which will "provide photovoltaic cells and solar job training" to American Indian tribes in Arizona, California, New York, and South Dakota. Jewell said, "This partnership shows how the tribal, federal and private sectors can work together to remove barriers to economic development, advance tribal self-determination and add clean energy to the grid."

The [Indian Country Today Media Network](#) (10/2, 32K) reports on Secretary Jewell's week, noting that she "managed to meet the Pope," to "pay a visit to the Shinnecock Nation," and "announced a partnership with The North Face." Regarding the Shinnecock Nation visit, it quotes Jewell saying that the Tribal Solarthon "shows how the tribal, federal and private sectors can work together to remove barriers to economic development, advance tribal self-determination and add clean energy to the grid."

CONGRESS CRITICIZED FOR ALLOWING LWCF TO LAPSE. The [Houston Chronicle](#) (10/5, 2.28M) carried an Associated Press story about the benefits to Wyoming of the Land and Water Conservation Fund, which was allowed to lapse by Congress. The AP also notes that Sen. John Barrasso (R-WY) said that it can continue to "operate on about \$20 billion in its reserves."

Joel Connelly writes at the [Seattle Post-Intelligencer](#) (10/1, Connelly, 560K) lists several of the purchases made in the area by the fund and quotes a number of people praising the fund and criticizing the Congress.

The [Milwaukee Journal Sentinel](#) (10/3, Smith, 564K) writes that "conservation, hunting and environmental groups voiced strong displeasure" with the failure to reauthorize the fund.

Ron Pitz, executive director of KNOX Inc., writes at the [Hartford \(CT\) Courant](#) (10/2, 606K), "Overnight, the nation lost funding for our parks and the future protection of our land."

David Nickum, executive director of Colorado Trout Unlimited, at the [Denver Post](#) (10/4, 787K) writes that the fund's "future is now under a cloud."

REACTION TO SAGE GROUSE DECISION. [Outdoor Life Magazine](#) (10/5, Stemler, 41K) reports in its "Open Country" blog, on hunting "on Bureau of Land Management land in northwest Colorado to see if we could find sage grouse," describing it as "beautiful sagebrush country," that was "clearly well managed to benefit sage grouse—and the hundreds of other species that depend on sagebrush systems." The author also describes hearing Secretary Jewell speak at the Rocky Mountain Arsenal National Wildlife Refuge regarding the greater sage grouse and describes "seeing friends posting pictures from their own sage grouse hunts in other states" as evidence that Secretary Jewell was right in saying that conservation efforts have been successful.

Phil Rostad, a board member of the Montana Land Reliance, writes at the [Helena \(MT\) Independent Record](#) (10/2, Rostad, 39K) that "Montana's private landowners can breathe a sigh of relief" because the sage grouse is not being listed. And the reason is that "Montana stepped up to the plate and wrote a plan to manage the bird that showed the feds we could do it without them." The story quotes Secretary Jewell saying, "Montana Governor Bullock has been critical in our efforts to demonstrate that the Endangered Species Act can be a vital catalyst for conservation."

The [Gillette \(WY\) News Record](#) (10/5, Johnson, 19K) in an editorial says that the decision "not to list the greater sage grouse" is "an example of the federal government recognizing the efforts taken on the state level."

The [Bend \(OR\) Bulletin](#) (10/5, 94K) said that the decision "was a substantial victory," but also says that some other decisions "could add up to a de facto listing." The paper cites Secretary Jewell's announcement as containing "plans to establish official buffer zones around mating areas." The paper says that depending on what that means in practice, it "could be just like listing the bird as endangered."

CONNOR PRAISES PUBLIC/PRIVATE PARTNERSHIPS AT ANTIETAM. The [Frederick \(MD\) News-Post](#) (10/2, Anderson, 78K) reports, "Last Wednesday, Deputy Secretary of the Interior Michael Connor and members of the Civil War Trust met at Antietam National Battlefield to celebrate the Trust's successful preservation of 44 acres" as well as launching "a new fundraising push to preserve another 49 acres." Connor said, "The preservation of this tract at the center of the Antietam Battlefield is just an incredible accomplishment in the history of conservation," adding, "This land will become part of an outdoor classroom. It'll teach old and young alike about the momentous events that occurred, and that is invaluable." He also said, "These public/private partnerships are critical to our protection efforts."

JEWELL DOES NOT HAVE REGULAR PERSONAL AIDE. [E&E Publishing](#) (10/2, 705) reports on the "body men" who work as top aides to official's in order to keep them on schedule. It reports that according to Interior Department spokeswoman Emily Beyer, Secretary Jewell "always travels with members of her U.S. Park Police security detail and usually with a communications staff member," but does not "have a dedicated personal aide who travels with her to events in town and on the road."

AUTHOR WARNS SHUTDOWN COULD HARM ARIZONA. Christopher Fox Graham writes at [Journal Arizona](#) (10/1, Graham), criticizing Congress for the possibility that the government could be "shut down" noting that such an event would close the Tuzigoot and Montezuma Castle national monuments as well as Grand Canyon National Park. He reminds readers that in 2013, Secretary Jewell and then-Arizona Gov. Jan Brewer "negotiated a deal to temporarily reopen Grand Canyon National Park using state money."

KENDALL MAY FACE "ACRIMONIOUS CONFIRMATION FIGHT." [E&E Daily](#) (10/2, Bogardus, Subscription Publication) reports on Mary Kendall's nomination as Interior Department inspector general, saying it "could be an acrimonious confirmation fight." A hearing has been scheduled by the Senate Energy and Natural Resources Committee for October 20.

GROWTH OF NEW ENGLAND COTTONTAIL NOTED. Cheryl Kimball writes in the [New Hampshire Union Leader](#) (10/3, Kimball, 131K) about the New England cottontail, noting its decline since the 1960s which she attributes to the reforestation of New England farmlands. The population of the rabbit "has rebounded to a noticeable degree"

apparently due to work by conservationists in providing more habitat. Kimball also points out that Secretary Jewell in September “was going to be in Dover to release specimens raised in captivity on private land with the appropriate habitat.”

Empowering Native American Communities:

ED GIVES CIRCLE OF NATIONS SCHOOL GRANT. The [Wahpeton \(ND\) Daily News](#) (10/2, Stanko, 9K) reports that ED is giving a \$440,000 grant to Circle of Nations School in Wahpeton, North Dakota, noting that Superintendent Leroy Chief said “the grant will go toward young peoples’ education through an improved high school and college preparation program, with the exploration of future careers.”

Tackling America’s Water Challenges:

USGS, SIOUX FALLS PARTNER ON GROUNDWATER SURVEY. [KDLT-TV](#) Sioux Falls, SD (10/4, 1K) reports in an Associated Press story that the City of Sioux Falls and the United States Geological Survey this week “will begin conducting a state-of-the-art groundwater survey.” The AP story also appears at the [Yankton \(SD\) Press & Dakotan](#) (10/5, 25K), [Rapid City \(SD\) Journal](#) (10/3, 126K), and [Washington Times](#) (10/5, 344K).

BUREAU OF RECLAMATION GRANT TO PROVIDE SUPPORT FOR CONSERVATION EFFORTS. The [Havasu \(AZ\) News-Herald](#) (10/5, 27K) reports, “Lake Havasu City has received a \$70,000 grant from the Bureau of Reclamation to help fund a water conservation rebate program” until March 31. The money will be used to support “low flush volume (1 6 gallon or less) toilets” as well as “swimming pool covers,” “hot water recirculation pumps,” and “smart irrigation controllers with rain or moisture sensor.”

NEW MANAGER OF BUREAU OF RECLAMATION’S SNAKE RIVER OFFICE NAMED. The [Idaho Business Review](#) (10/2, 35K) reports, “Roland Springer will serve as the new area manager for the Bureau of Reclamation’s Snake River Area office,” and will start October 19.

TUMALO IRRIGATION DISTRICT WORKS WITH BUREAU OF RECLAMATION ON PIPING PROJECT. The [Bend \(OR\) Bulletin](#) (10/3, Shorack, 94K) reports on a piping project being carried out by the Tumalo Irrigation District in partnership with the “Oregon Watershed Enhancement Board, the U.S. Bureau of Reclamation, the city of Bend and the Deschutes River Conservancy.”

Securing America’s Energy Future:

Renewable Energy:

DEMOCRATS ON HOUSE NATURAL RESOURCES COMMITTEE SEEK HEARING ON CLEAN ENERGY PRODUCTION ON PUBLIC LANDS. [E&E Daily](#) (10/2, Bush, Subscription Publication) reports that Democrats on the House Natural Resources Committee “are demanding” a hearing on “clean energy production on public lands” to be held by the Subcommittee on Energy and Minerals. It has not held a hearing on the topic since 2011. All 17 Democratic members of the committee signed a letter requesting a hearing. The letter also points out that the BLM “has approved more than 10,000 megawatts of clean energy” since the 2011 hearing.

PROGRESS ON DEEPWATER WIND OFFSHORE WIND FARM “A SIGN OF HOPE.” [ClimateWire](#) (10/2, von Kaenel, Subscription Publication) reports that supporters of offshore wind energy are pointing to progress with Deepwater Wind’s offshore wind farm that has begun construction of the coast of Rhode Island as “a sign of hope.” Jeff Grybowski, CEO of Deepwater Wind, said, “With other states, when they see pictures of an actual vessel putting it in the water in the U.S., the light goes off – we can do this, it is possible.” The story also reports there are “new collaborative efforts” launched by the federal government, adding that the Bureau of Ocean Energy Management “continues to auction off new leases.”

BOEM To Study Effects Of Wind Farm Construction Off Rhode Island. [WRNI-FM](#) Providence, RI (10/2, Espinoza) reports that the Bureau of Ocean Energy Management will carry out a study of “real-time data on sounds and seafloor vibrations, among other disturbances, caused by the wind farm’s construction.” Rodney Cluck, BOEM’s chief of the Environmental Sciences Division, said, “When you’re pounding in the monopoles that go into the ground for the wind turbines, they have to use big hammers to pound them into the ground, that creates noise,” adding, “you need to know the decibel levels and you need to know that physics before you can know the impacts on a whale for example.”

BOEM TO HOLD MEETING ON POSSIBLE OFF SHORE WIND FARMS. The [Wilmington \(NC\) Star News](#) (10/4, Bellamy, 111K) reports that the Bureau of Ocean Energy Management on Wednesday will hold a meeting in Wilmington, North Carolina to “discuss plans to open two areas off Brunswick and south New Hanover counties to leasing by wind energy companies.”

ELIAS SOLAR FACILITIES CAUSE ENERGY POVERTY. Columnist Thomas Elias writes for the [Los Angeles Daily News](#) (10/2, Elias, 288K) that the expense of large solar facilities – of which several were built with federal grants but produce for private utilities like Southern California Edison – is causing an increase in California energy prices. Elias writes that “the cost of that energy comes to about \$84 per megawatt hour, compared to the average \$46 per megawatt hour wholesale cost of electricity,” helping to drive “energy poverty” when the price of electricity exceed 10 percent of household income. He calls for a greater focus on rooftop solar and a move away from utility-scale projects.

The column was also carried by the [Marysville \(CA\) Appeal-Democrat](#) (10/3, Elias, 69K) and the [Inland Valley \(CA\) Daily Bulletin](#) (10/2, Elias, 111K).

Onshore Energy Development:

INTERIOR’S LEITER EXPLAINS ADMINISTRATION’S OPPOSITION TO CUT IN SODA ASH ROYALTY RATE. [E&E Daily](#) (10/2, Quiñones, Subscription Publication) reports that the Administration is “strongly opposing” bills that would “reduce the royalty rate for mining soda ash on public lands.” The bills, S. 2031 and H.R. 1992, would cut the rate from 6 percent to 2 percent. Amanda Leiter, Interior Department assistant secretary for lands and minerals management, is quoted saying the bills would lead to a “substantial loss of royalty revenue.” Sen. John Barrasso (R-WY) defended his bill, saying, “America’s soda ash producers continue to battle unfair trade practices imposed by other nations.”

BLM ISSUES DRAFT RULE ON MEASURING NATURAL GAS PRODUCED ON FEDERAL AND TRIBAL LANDS. [E&E Publishing](#) (10/2, Taylor, 705) reports that the Bureau of Land Management has released “a draft rule updating standards for how companies measure natural gas produced on federal and tribal lands,” in response to “concerns raised by the Government Accountability Office and the Interior Department inspector general.”

The [St. George \(UT\) News](#) (10/4, 3K) reports on the announcement, quoting BLM Director Neil Kornze saying, “It’s been almost 30 years since the standards in Onshore Order 4 have been revised,” adding, “The industry has taken major strides in recent decades and this update reflects those changes in addition to making our regulations more adaptable for the future.”

Leland Gould, Chairman, New Mexico Oil And Gas Association, writes in the [Albuquerque \(NM\) Journal](#) (10/5, Gould, 259K), that “new Bureau of Land Management regulations are not needed.” He argues that the new rules will overburden BLM employees, and may “lead to the closure of marginally economical wells and the state will lose hundreds of millions of dollars in revenue.”

CONTINENTAL RESOURCES DEMANDS FRIENDS OF THE EARTH RETRACT CLAIMS ABOUT ITS FLARING. [Greenwire](#) (10/2, Taylor, Subscription Publication) reports that Continental Resources Inc., “is demanding” that Friends of the Earth “retract” a claim that Continental was “flaring more gas than all other companies combined.” The company’s counsel wrote that in the absence of an apology, it would “pursue appropriate actions against all responsible parties.” The report “A Flaring Shame,” was released on Wednesday, and claims that Continental flared “nearly eight times as much gas as the next highest company.”

BLM PROCESS RAISES CONCERNS ABOUT ENERGY DEVELOPMENT IN SOUTH PARK, COLORADO. The [Denver Post](#) (10/5, Handy, 787K) reports that South Park, Colorado is “on the radar of the Bureau of Land Management” for its potential energy development, but some worry that energy development could be “a serious economic threat,” because it may spoil “one of the state’s unparalleled playgrounds.” The Post also notes that “Denver, Aurora and Centennial get water from South Park’s rivers, streams and reservoirs.” BLM spokeswoman Vanessa Lacayo said that to date, “South Park has seen minimal drilling.” She added that “the BLM triggered the process without active interest in energy development” in the area. The [Washington Times](#) (10/3, Handy) carries an Associated Press story reporting that the area is known for the “South Platte River and for its native elk herds.” The AP story also appears at the [Houston Chronicle](#) (10/3, Handy, 2.28M).

GROUPS WANT END TO FOSSIL FUEL EXTRACTION ON PUBLIC LANDS. [Public Radio International](#) (10/4, 3K) reports, “A coalition of 400 groups...is demanding President Barack Obama end fossil fuel leasing on public lands.” They also maintain that he could end the practice himself.

America’s Great Outdoors:

Bureau of Land Management:

BLM TAKING PUBLIC COMMENT ON PROPOSED EXPANSION OF PHOENIX, ROSSI MINES. The [Elko \(NV\) Daily Free Press](#) (10/1, 22K) reports that the Bureau of Land Management is seeking "public comment" on Newmont Mining Corp.'s proposed Greater Phoenix Mine Project, under which it would "expand and continue to operate the mine." In other news, the BLM has also had "two public meetings this week concerning a possible expansion of the Rossi Mine."

BLM PLANS LEAD TO CONFUSION IN UTAH. The [St. George \(UT\) News](#) (10/3, 3K) reports that in response to "fear and confusion" regarding the BLM's "proposed resource management plans for the Red Cliffs and Beaver Dam Wash national conservation areas," the St. George Field Office of the Bureau of Land Management is "trying to clear up some of what they call big misunderstandings among county residents and officials." Field Office Manager Brian Tritle said that the environmental impact statement "and any proposed restrictions apply mostly to the Red Cliffs and Beaver Dam Wash national conservation areas." He also said that the plans are subject to revision.

The [St. George \(UT\) Spectrum](#) (10/4, 46K) reports that one result of the plans may be "to reduce livestock grazing within parts of Washington County's designated conservation areas." At present the BLM "is taking public comments" on the plans.

Fish and Wildlife Service:

USF& W REVIEWING 5TH CIRCUIT'S RULING ON MIGRATORY BIRD TREATY ACT. The [AP](#) (10/4, Schmall, 2.28M) reports that the 5th US Circuit Court of Appeals has found that the 1918 Migratory Bird Treaty Act requires that the killing of a bird must be "intentional" in order to be a violation of the act. The US Fish and Wildlife Service "has maintained that no intent is required to violate the law." Fish and Wildlife Service spokeswoman Laury Parramore said that the service and the US Justice Department are reviewing the decision. The AP story also appears at the [Washington Post](#) (10/5, Schmall, 6.76M), [Boston Herald](#) (10/5, Schmall, 548K), [Houston Chronicle](#) (10/5, Schmall, 2.28M), [Washington Times](#) (10/5, Schmall, 344K), and [Philly \(PA\)](#) (10/5, Schmall).

USF& W SAYS WALRUS DEATHS CAUSED BY HUMANS. The [Houston Chronicle](#) (10/2, 2.28M) carries an Associated Press story reporting that the US Fish and Wildlife Service says that "the death of some of the walrus at a haul-out site in northwest Alaska were caused by humans," and it "believes it has identified those responsible." The AP story also appeared at the [Washington Post](#) (10/2, 6.76M), [Philly \(PA\)](#) (10/2, 1.06M), and [Washington Times](#) (10/2, 344K).

WARNING ISSUED ABOUT ALGAE IN DEER FLAT'S LAKE LOWELL. The [Houston Chronicle](#) (10/5, 2.28M) carries an Associated Press story reporting that a health warning has been issued regarding "Canyon County's Lake Lowell," which is "part of the Deer Flat National Wildlife Refuge, which is managed by the U. S. Fish and Wildlife Services." The AP story also appears at the [Washington Times](#) (10/3, 344K).

USF& W GRANT TO FUND REPLANTING WITH NATIVE SPECIES. The [El Defensor Chieftain \(NM\)](#) (10/4, Turner, 10K) reports that \$297,000 grant U.S. Fish and Wildlife Service's Cooperative Recovery Initiative is helping to fund the removal of alien species and their replacement with native species in the plantings around the Sevilletta National Wildlife Refuge where Manager Kathy Granillo said, "We're sure they'll be pleased with the results."

National Park Service:

JARVIS TO PROMOTE PARKS IN VISIT TO LOUISIANA. [KNOE-TV](#) Monroe, LA (10/5, 1K) reports that National Parks Service Director Jonathan Jarvis "is set to visit ULM and make appearances at several events on Tuesday, leading up to the National Parks centennial anniversary in 2016." Jarvis will "promote the importance of the park system in our country to ULM students."

YOSEMITE NATIONAL PARK REACHES 125. The [Houston Chronicle](#) (10/2, 2.28M) carries an Associated Press story reporting that on Thursday, about 1,500 people were in attendance at Yosemite National Park's 125th anniversary. The AP story also appears at [KHSL-TV](#) Chico, CA (10/5, 3K), the [Washington Times](#) (10/2, 344K), [Washington Post](#) (10/2, Press, 6.76M), and [Philly \(PA\)](#) (10/2, 1.06M).

RADIO SHOW TAKES UP QUESTION OF CLOSING OFF PART OF NATIONAL PARK FOR "PAYING CUSTOMERS ONLY." The [Kojo Nnamdi Show](#) (10/1) took up the question of whether it was "right to cordon off part of a national park for paying customers only" in the wake of a music festival on the National Mall, for which "people paid upwards of \$100."

ROCKY MOUNTAIN NATIONAL PARK SUPERINTENDENT RETIRES. The [Houston Chronicle](#) (10/2, 2.28M) carries an Associated Press story reporting that "Rocky Mountain National Park Superintendent Vaughn Baker has retired after 42 years," and will "stay in nearby Estes Park." He was at the park for 13 years, having started at the National Park Service in 1984. The AP story also appears at the [Washington Times](#) (10/2, 344K). The [Estes Park \(CO\) News](#) (10/2) also reports the retirement.

SHENANDOAH NATIONAL PARK SEEKS PUBLIC COMMENT ON PROPOSED RELEASE OF PREDATORY BEETLE. The [Augusta \(VA\) Free Press](#) (10/4, 280) reports that officials at the Shenandoah National Park "are seeking public opinion on a plan to release a predatory beetle" to combat "hemlock woolly adelgid," which is "an invasive insect that has devastated hemlock forests throughout the eastern United States." The park, so far, has seen "positive effects" with "subsurface soil injections of systemic insecticides." The hope is that the beetle could be effective with much less labor. The beetle is from the same area of Japan as the adelgid, and is its "primary predator." The beetle has been released in a number of other parks including Great Smoky Mountains National Park. The [Washington Post](#) carries an Associated Press story on the beetle proposal, citing the [Northern Virginia Daily](#) (10/5, Green, 48K).

NPS SEEKS PUBLIC COMMENT ON MOCCASIN BEND PROPOSALS. The [Chattanooga \(TN\) Times Free Press](#) (10/4, Cobb, 179K) reports that the National Park Service is seeking public comment on "four proposed Moccasin Bend management concepts" through November 13.

OLYMPIC NATIONAL PARK REMOVING BOULDERS FROM RIVER CHANNEL. The [Peninsula \(WA\) Daily News](#) (10/3, 41K) reports that the National Park Service has contracted with Sealaska Constructors to remove boulders from the Elwha River channel in Olympic National Park in order to "ease fish passage."

NATIONAL PARK SERVICE, APPALACHIAN TRAIL OFFICIALS MEET IN MAINE TO DISCUSS PROBLEMS WITH HIKERS. The [Houston Chronicle](#) (10/3, 2.28M) carries an Associated Press story reporting that "officials with the Appalachian Trail Conservancy and the National Park Service say they will work to address bad behavior by long-distance hikers" with respect to Baxter State Park in Maine. The officials met on Friday in Maine. The AP story also appeared at the [Denver Post](#) (10/5, 787K), [Washington Post](#) (10/3, 6.76M), [Daily Mail \(UK\)](#) (10/3, 5.59M), [Philly \(PA\)](#) (10/3, 1.06M), and [Washington Times](#) (10/3, 344K).

CALIFORNIA MAN INDICTED ON 21 COUNTS OF LOOTING NATIVE AMERICAN ARTIFACTS FROM PUBLIC LANDS. The [Los Angeles Times](#) (10/4, Sahagun, 4.07M) reports that Jonathan Bourne, 59, "has been indicted on 21 felony counts related to the alleged looting of Native American artifacts from tribal and public lands including Death Valley National Park." He could be imprisoned for up to 98 years on the charges.

MISSISSIPPI DEDICATES SHILOH PARK, TURNS IT OVER TO NPS. The [Houston Chronicle](#) (10/4, 2.28M) carries an Associated Press story reporting on the dedication of Shiloh National Military Park in Corinth, Mississippi on Saturday. Mississippi dedicated the park and then "turn[ed] it over to the National Park Service." The AP story also appeared at the [Washington Times](#) (10/5, 344K).

PLAYWRIGHT WORKING ON STORY OF HOMESTEAD MOVEMENT. The [Houston Chronicle](#) (10/5, Bohling, 2.28M) carries an Associated Press story about the Homestead National Monument of America in Beatrice, Nebraska, where Michael Cansfield, artist in residence, is writing a play, titled "The Awakening Land: Stories of National Expansion and the Homestead Movement." The AP story also appears at the [Washington Times](#) (10/4, Bohling, 344K).

NPS SAYS LOGAN PASS CLOSED FOR WINTER. The [Houston Chronicle](#) (10/3, 2.28M) carries an Associated Press story reporting that the National Park Service announced that Sunday was "the last day to access Logan Pass by vehicle from the east side of Glacier National Park." The AP story also appeared at the [Washington Post](#) (10/5, 6.76M), [Philly \(PA\)](#) (10/3, 1.06M), and [Washington Times](#) (10/3, 344K).

VISITOR TO GRAND CANYON INFECTED WITH TICK BORNE FEVER. The [Houston Chronicle](#) (10/3, 2.28M) carries an Associated Press story reporting that a person who visited the North Rim of the Grand Canyon was diagnosed with "a rare tick-borne bacterial infection" according to National Park Service and Coconino County officials. They are investigating the case. The patient was successfully treated with antibiotics. The AP story also appears at the [Washington Times](#) (10/3, 344K), [Philly \(PA\)](#) (10/3, 1.06M), and [Washington Post](#) (10/5, 6.76M).

FORMER NEVADA STATE PRISON LISTED ON NATIONAL REGISTER OF HISTORIC PLACES. The [Las Vegas Review-Journal](#) (10/3, Whaley, 378K) reports that the closed Nevada State Prison "was listed Friday on the National Register of Historic Places by the National Park Service." It opened in 1862. The [Reno \(NV\) Gazette-Journal](#) (10/2, 179K) also reports on the listing.

SHREVEPORT'S BOOKER T WASHINGTON HIGH SCHOOL ON NATIONAL REGISTER. The [Washington Times](#) (10/3, 344K) carries an Associated Press story reporting that Booker T. Washington High School in Shreveport, Louisiana has now been approved to be listed on the National Register of Historic Places.

DEARBORN NEIGHBORHOOD ON NATIONAL REGISTER. [WDIV-TV](#) Detroit (10/5, 348K) reports the Springwells Park neighborhood is "the first neighborhood in Dearborn to be included in the National Register of Historic Places."

US Geological Survey:

USGS, USF& W STUDY ST. FRANCIS RIVER CRAYFISH. The [Farmington \(MO\) Daily Journal](#) (10/3, Black, 1K) reports on the conclusion of a USGS "summer-long study of St. Francis River crayfish," citing the USGS' Ann Allert saying, "It's a very special crayfish. It's only found here in this one particular part of the world." The study was a joint effort of the USGS, US Fish and Wildlife, Missouri Department of Conservation, and Missouri Department of Natural Resources. The study was in response to mining in the area and was focused on the amount of metal in the crayfish.

USGS HOPED TO USE JOAQUIN TO TEST NETWORK. [Newsday \(NY\)](#) (10/2, 1.3M) reports on the US Geological Survey's Surge, Wave and Tide Hydrodynamic Network that will "provide real-time information about water conditions" during storms. Joaquin was supposed to offer an occasion to test the system.

USGS CONDUCTING LOW FLOW SURVEY IN WESTERN STATES. The [Skagit Valley \(WA\) Herald](#) (10/3, Cauvel, 31K) reports on the USGS Western U.S. Low Flow Survey, which is measuring streamflow over time, in order to "better prepare communities throughout the region for drought." The study covers California, Idaho, Nevada, Oregon, Utah, and Washington.

Top National News:

US OFFICIALS HOPEFUL TPP DEAL IS NEAR AS TRADE TALKS CONTINUE. Media reports of continuing trade talks in Atlanta cast US officials as hopeful and indicate that a deal may be announced soon. The [New York Times](#) (10/5, Calmes, Subscription Publication, 11.82M), for example, says negotiators from the US "and 11 other Pacific Rim nations neared agreement on Sunday night on the largest regional trade accord in history, a potentially precedent-setting model for global commerce." According to the Times, announcement of a deal was delayed Sunday due to "final haggling over the arcane details of opening dairy markets," but US officials "said they were confident that a deal was imminent."

[Reuters](#) (10/5, Hughes) reports Australian Trade Minister Andrew Robb too said the deal was "largely completed," and Japanese Economy Minister Akira Amari said he had called Prime Minister Shinzo Abe to inform him that a deal was within sight. The [Washington Post](#) (10/5, A1, Nakamura, 6.76M) similarly says on its front page that US officials "said they were confident that meetings late Sunday and early Monday would produce a final agreement," and other nations "also expressed optimism that a deal would be reached." The [Wall Street Journal](#) (10/5, A1, Mauldin, Subscription Publication, 5.95M), [Politico](#) (10/4, Palmer, 942K), and the [Washington Times](#) (10/5, Boyer, 344K) also report that a deal is near.

DESPITE VETO THREAT, SENATE TO TAKE UP DEFENSE AUTHORIZATION BILL THIS WEEK. In its "Floor Action" blog, [The Hill](#) (10/4, Carney, 471K) predicted a "veto showdown" between the President and Republicans over the National Defense Authorization Act, noting that Senate Majority Leader McConnell "has teed up the Senate to turn to the" measure this week "despite a looming veto threat from the White House." While White House press secretary Josh Earnest called the bill "an 'irresponsible bluff to fund our national defense priorities,' reiterating that 'if the president got this bill he'd veto it,'" Senate Republicans "appear poised to try to either the call the president's bluff [sic] or force him to issue his fifth veto on legislation that they argue is vital for helping troops and protecting national security."

OBAMA HONORS FALLEN FIREFIGHTERS. The President addressed the 34th annual National Fallen Firefighters Memorial Service in Emmitsburg, MD on Sunday, where he praised the "courage, fortitude, and strength" of firefighters who made the ultimate sacrifice, giving their lives in order to save people they have never met." [USA Today](#) (10/5, Jackson, 5.23M) reports. The President offered "prayers and condolences to the families of 87 firefighters who have died in recent months," and "said the profession of firefighting holds a 'special place' in the imaginations of Americans because of the risks involved."

The [Hagerstown \(MD\) Herald-Mail Media](#) (10/5, Fitch, 10K) notes that during the service, which recognized "84 firefighters who died in the line of duty in 2014 and three others who died in previous years," the President told those gathered "that they were honoring 'extraordinary Americans,'" adding, "We can never repay them fully for their sacrifices."

In its "Blog Briefing Room" blog, [The Hill](#) (10/4, Richardson, 471K) reported that the President also "called for action to prevent wildfires before they start," saying, "So far this year, nearly 50,000 wildfires have burned more than 9 million acres – an area larger than the entire state of Maryland. ... At the season's peak, 32,000 firefighters were battling blazes from California to North Carolina. Thirteen have lost their lives. And today, we honor them as well."

The [Baltimore Sun](#) (10/4, Parker, 834K) says that during his 12-minute address, the President "asked the nation to renew its commitment to preventing fires and making sure to supply firefighters with 'equipment and the support that they need to get the job done and to come home safe. That's what we owe every one of you.'" The Sun adds that the President "remained for more than an hour" after his speech, "greeting each of the late firefighters' families before returning to a motorcade where he was joined by Rep. Steny Hoyer, a Maryland Democrat." The [Hanover \(PA\) Evening Sun](#) (10/4, Reed, 59K) notes that the ceremony was attended by "scores of fire personnel from all over the country."

The [AP](#) (10/4) notes that among the firefighters honored in the ceremony were Hartford, CT firefighter Kevin Bell and New Britain, CT Deputy Chief David Fiori. Bell "was killed in a house blaze and Fiori suffered a heart attack while on duty" last year. [WFSB-TV](#) New Haven, CT (10/4, Jain, Polansky, 269K) also reported on the two fallen Connecticut firefighters on its website.

Editorial Wrap-Up:

NEW YORK TIMES. "*The Biggest Questions Awaiting The Supreme Court.*" A [New York Times](#) (10/5, Subscription Publication, 11.82M) editorial says the Supreme Court's new term "will jump right back into high-profile constitutional battles," and says its decisions last term "showed a court willing to take into account the effects of the law on individual lives. This term, the justices have many opportunities to show that same type of awareness."

"Rein In Online Fantasy Sports Gambling." In an editorial, the [New York Times](#) (10/5, Subscription Publication, 11.82M) says online sport gambling sites "have grown rapidly" because the Unlawful Internet Gambling Enforcement Act of 2006, "which prevented payment processors from working with gambling websites, included an exemption for fantasy sports." The Times says "giving people more ways to bet on the outcomes of sports is sure to threaten the integrity of sports and create more gambling addicts, especially among young people who are already more likely to engage in risky behaviors."

WASHINGTON POST. "*The Price We Pay.*" In an editorial, the [Washington Post](#) (10/5, 6.76M) lists the names of those killed in mass shootings in recent years.

"Jeb Bush's Energy Plan." The [Washington Post](#) (10/5, 6.76M) says in an editorial that Jeb Bush's energy plan is "breathtakingly irresponsible" as it is "silent" on climate change. The Post approves of his call to push back "against the excesses of environmental activists," lift the crude export ban, and approve Keystone XL, but condemns his call for repealing the Administration's greenhouse gas regulations.

WALL STREET JOURNAL. "*Trust Busting Higher Ed.*" In an editorial, the [Wall Street Journal](#) (10/5, Subscription Publication, 5.95M) hails an effort by Sens. Marco Rubio and Michael Bennett for pushing legislation that would limit the ability of existing colleges and universities, operating under various agencies chartered by the Education Department, to block the emergence of alternative low-cost competitors by denying them access to federal aid.

"The Taliban And The Hospital." In an editorial, the [Wall Street Journal](#) (10/5, Subscription Publication, 5.95M) argues that while the bombing of a Doctors Without Borders hospital in Kunduz was a mistake, the Taliban, which has been trying to take Kunduz by force, is responsible for the lives lost.

"Supreme Court Plaintiff's Play." In an editorial, the [Wall Street Journal](#) (10/5, Subscription Publication, 5.95M) highlights a challenge to arbitration agreements in class-action suits that the Supreme Court will hear. The Journal argues that if the justices weaken the 1925 Federal Arbitration Act, it would be a payday for trial lawyers.

Secretary of Interior Jewell Expected at Waco Monument Event

Dedication ceremonies are planned next week for the recently designated Waco Mammoth National Monument in Central Texas.

Organizers say U.S. Secretary of the Interior Sally Jewell and National Park Service Director Jonathan Jarvis are expected to attend Monday's event.

President Barack Obama in July proclaimed Waco Mammoth as one of three new national monuments. The others are Berryessa Snow Mountain in California and Basin and Range in Nevada.

The Texas site includes well-preserved fossils of a herd of Columbian Mammoths and remains of other Ice Age animals. Experts say some fossils identified at the site are thought to be more than 65,000 years old.

Waco: Interior Secretary To Attend Mammoth Site Dedication.

WACO (October 2, 2015) U.S. Secretary of the Interior Sally Jewell and National Park Service Director Jonathan B. Jarvis will take part in a dedication ceremony Monday to mark the designation of Waco Mammoth National Monument.

Waco Mammoth Site (File)

The invitation-only ceremony is not open to the public.

In July President Barack Obama designated the site as one of three new national monuments.

Jewell and Jarvis also plan to meet with local fourth graders in support of the administration's Every Kid in a Park initiative.

The site, which was discovered more than 30 years ago, contains the largest known concentration of mammoths that died in a single event.

A painstaking excavation of the site has uncovered the remains of 25 Columbian mammoths that died nearly 68,000 years ago, probably after they were caught in a flash flood.

In 2002, then U.S. Rep. Chet Edwards, D-Waco authored legislation which later became a law that directed the National Park Service to determine the feasibility of establishing a national park at the Waco Mammoth Site.

Three years later he secured \$200,000 for preservation efforts at the site and an additional \$200,000 for the Baylor Mayborn Museum's Mammoth Exhibit.

In March 2009 the U.S. Department of the Interior recommended including the site as part of the National Park Service, and Edwards introduced the "Waco Mammoth National Monument Establishment Act of 2009," which would have implemented the Department of Interior proposal and authorized appropriations for the project.

The original U.S. Department of the Interior recommendation called for giving the Park Service the lead responsibility for protection, scientific study and visitor enjoyment of the site in partnership with the City of Waco and Baylor University, which was the option local leaders preferred.

The House passed the bill, but the measure later died in the U.S. Senate, the victim of a maneuver called an anonymous hold.

Subsequent measures introduced by Edwards' successor, U.S. Rep. Bill Flores, R-Bryan, called for designating the site as a National Monument.

The new bill didn't provide funding for the monument, but the authors said local support would make the national recognition possible without additional federal spending.

Ground was broken in 2008 for \$3.2 million visitor center and pavilion to protect the site, which has been operated since 2009 by the city in partnership with Baylor University and support from the nonprofit Waco Mammoth Foundation.

In April National Park Service Director Jon Jarvis toured the site and later said he would ask the Interior Department to seek Mr. Obama's approval to designate the site a national monument.

Two weeks later the Waco City Council voted to turn five acres of the site and the excavated remains over to the federal government, leaving just more than 100 acres as city property, but as administrative land in the national park system.

Under the 1906 Antiquities Act the President bypassed Congress and issued the executive order for the designation.

Secretary of Interior Jewell Expected at Waco Monument Event

Dedication ceremonies are planned next week for the recently designated Waco Mammoth National Monument in Central Texas.

Organizers say U.S. Secretary of the Interior Sally Jewell and National Park Service Director Jonathan Jarvis are expected to attend Monday's event.

President Barack Obama in July proclaimed Waco Mammoth as one of three new national monuments. The others are Berryessa Snow Mountain in California and Basin and Range in Nevada.

The Texas site includes well-preserved fossils of a herd of Columbian Mammoths and remains of other Ice Age animals. Experts say some fossils identified at the site are thought to be more than 65,000 years old.

U.S. Secretary of the Interior Sally Jewell will visit the Waco Mammoth National Monument to celebrate its recent designation as part of the national park system.

Jewell and National Park Service director Jon Jarvis will tour the site and participate in a 10 a.m. dedication ceremony with local leaders, including Baylor University President Ken Starr, Mayor Malcolm Duncan Jr. and Waco Mammoth Foundation founder Gloria Young. The event is by invitation only.

President Barack Obama in July designated the site at 6220 Steinbeck Bend Drive as a national monument, capping a yearslong effort by local officials to

mammoth ra5

win the designation. The Waco Mammoth Foundation raised \$4.2 million to turn the mammoth dig site into an educational tourism attraction, built to National Park Service standards.

Since 1978, the remains of 24 Columbian mammoths have been discovered at the site, some dating back 65,000 years. Among them are the nation's only known "nursery" herd of mammoths, thought to be buried in a cataclysmic flood.

the Interior Sally Jewell and National Park Service Director Jonathan B. Jarvis will take part in a dedication ceremony Monday to mark the designation of Waco Mammoth National Monument.

The invitation-only ceremony is not open to the public.

In July President Barack Obama designated the site as one of three new national monuments.

Jewell and Jarvis also plan to meet with local fourth graders in support of the administration's Every Kid in a Park initiative.

Secretary Jewell, Former First Lady Laura Bush Join Texas Community to Celebrate Waco Mammoth National Monument Designation

President's Proclamation Protects Rare Mammoth Fossils, First and Only Recorded Discovery of a Nursery Herd

WACO, TEXAS – U.S. Secretary of the Interior Sally Jewell and Former First Lady Laura Bush today joined community members to celebrate the President's designation of the [Waco Mammoth National Monument](#) as one of the nation's newest national monuments, permanently protecting the site where the extremely well-preserved fossils of a herd of Columbian Mammoths and other Ice Age animals have been found. President Obama [designated the area as a national monument](#) on July 10, 2015, as part of the Administration's commitment to protect our country's significant outdoor spaces for the benefit of future generations.

The celebration took place at the new national monument, where Secretary Jewell and former First Lady Laura Bush were by joined National Park Service Director Jonathon B. Jarvis, City of Waco Mayor Malcolm Duncan, Baylor University President and Chancellor Ken Starr, and many local, state and national conservation and community leaders to celebrate the designation.

"Today we celebrate decades of hard work and partnerships between the City of Waco, Baylor University, and now the National Park Service," said Secretary Jewell. "It's our duty to protect places like this that will inspire the next generation of archaeologists, paleontologists, and historians, and show the rich diversity of our country's natural heritage."

The area in Texas provides a rare chance to understand and interpret the behavior and ecology of the extinct Columbian Mammoth. The oldest fossils identified at the site are thought to be more than 65,000 years old. In addition, both the excavation area and the land around it offer an excellent opportunity for further exploration and paleontological and geological research. In a nod to the recently launched Every Kid in a Park initiative which aims to get fourth graders nationwide to visit public lands, today, a group of fourth grade students were onsite to participate in an interactive learning activity.

Quote from Former First Lady Laura Bush

The site remains the nation's first and only recorded discovery of a nursery herd, including females and their offspring, of mammoths from the Ice Age, an era defined as 2.5 million to 10,000 years ago. Of the 24 mammoths uncovered to date, at least 18 were part of the nursery herd. As a result of an unknown natural catastrophic event, the entire nursery herd died at the same moment in time, which left the skeletons relatively intact. The site offers a one-of-a-kind opportunity to examine the matriarchal herd structure and behavior of this extinct species.

The site is now managed by the National Park Service in cooperation with the City of Waco and Baylor University. The National Park Service is conducting a

[management planning process](#), working closely with partners, community residents, and other groups that have devoted themselves to preserving the site for many years.

“The National Park Service has worked seamlessly with our partners at the City of Waco, Baylor University, and the Waco Mammoth Foundation to lay the groundwork for the continued success of the Waco Mammoth National Monument,” said National Park Service Director Jonathan B. Jarvis. “We are proud to celebrate this special place and thank the people of Waco for welcoming the National Park Service so warmly.”

The site was discovered in 1978, when Waco residents Paul Barron and Eddie Bufkin were looking for arrowheads and fossils along the Bosque River and found a large bone protruding from the earth. Realizing the possible significance of this discovery, Mr. Barron and Mr. Bufkin immediately took the bone to the Strecker Museum at Baylor University where the bone was identified as the upper leg bone of a Columbian Mammoth.

Over the next 20 years, Baylor University oversaw the excavation of the site, where they found the remains of 24 Columbian Mammoths, including adults and juveniles, as well as a Western Camel, saber-toothed cat, dwarf antelope, American Alligator, and giant tortoise. The Columbian Mammoths are the largest mammoth species – larger than its relative, the Woolly mammoth – and stood 12 to 14 feet tall and weighed seven to eight tons. Many of the discovered bones, including the remains of four Columbian Mammoths as well as the skeleton of the camel, remain in place, providing visitors an opportunity to view them.

The City of Waco has operated the Waco Mammoth Site as a park since 2009, in partnership with Baylor University and with support from the nonprofit Waco Mammoth Foundation, Inc. The city donated to the United States approximately five acres, which includes the excavation site and the dig shelter, making it possible to establish the monument. Nearly the entire Waco Mammoth Site is within the boundary of the national monument.

The Antiquities Act was first used by President Theodore Roosevelt in 1906 to designate Devils Tower National Monument in Wyoming. Since then, 16 presidents have used this authority to protect unique natural and historic features in America, such as the Grand Canyon, the Statue of Liberty, and Colorado's Canyons of the Ancients.

The Waco Mammoth National Monument is one of three new national monuments announced by President Obama in July that help tell the story of significant events in American history and protect unique natural resources for the benefit of all Americans. The designations include [Berryessa Snow Mountain](#) in California and [Basin and Range](#) in Nevada.

With these new designations, President Obama will have used the Antiquities Act to establish or expand 19 national monuments. In total, he has protected more than 260 million acres of public lands and waters – more than any other President – as well as preserved sites that help tell the story of significant people or extraordinary events in American history, such as [César E. Chávez National Monument](#) in California, [Harriet Tubman Underground Railroad National Monument](#) in Maryland, and [Charles Young Buffalo Soldiers National Monument](#) in Ohio.

Hello,

I wanted to inform you that on Monday, October 5, Secretary of the Interior Jewell and National Park Service Director Jonathan Jarvis will attend a celebration in Waco, Texas to commemorate the recent designation of Waco Mammoth National Monument. Secretary Jewell and others will tour the site before the dedication ceremony and will also meet with local fourth grade students in support of President Obama's Every Kid in a Park initiative to distribute free passes to America's federal lands and waters.

Thank you,

Subject Secretary Jewell travel to Waco on 10/5

Hello,

I wanted to inform you that on Monday, October 5, Secretary of the Interior Jewell and National Park Service Director Jonathan Jarvis will attend a celebration in Waco, Texas to commemorate the recent designation of Waco Mammoth National Monument. Secretary Jewell and others will tour the site before the dedication ceremony and will also meet with local fourth grade students in support of President Obama's Every Kid in a Park initiative to distribute free passes to America's federal lands and waters.

Thank you,

Jeremy Bratt

Secretary Jewell to Celebrate Designation of Waco Mammoth National Monument in Texas

WACO, TEXAS – On Monday, October 5, U.S. Secretary of the Interior Sally Jewell and National Park Service Director Jonathan B. Jarvis will attend a celebration in Waco, Texas to commemorate the recent designation of [Waco Mammoth National Monument](#). Secretary Jewell and others will tour the site before the dedication ceremony.

In July, President Obama [designated Waco Mammoth as one of three new national monuments](#), including Berryessa Snow Mountain in California and Basin and Range in Nevada. Waco Mammoth permanently protects the site where the extremely well-preserved fossils of a herd of Columbian Mammoths and remains of other Ice Age animals have been found. The National Park Service works in partnership with the City of Waco, Baylor University, and the Waco Mammoth Foundation to manage the Waco Mammoth National Monument.

The site provides a rare chance to understand and interpret the behavior and ecology of the extinct Columbian Mammoth. The oldest fossils identified at the site are thought to be more than 65,000 years old. In addition, both the excavation area and the land around it offer an excellent opportunity for further exploration and paleontological and geological research.

Secretary Jewell and Director Jarvis will also meet with local fourth grade students in support of President Obama's Every Kid in a Park initiative to distribute free passes to America's federal lands and waters. The Every Kid in a Park program seeks to connect young people with the great outdoors. As of September 1, the program allows fourth graders nationwide to go to www.everykidinapark.gov and obtain a pass for free entry for them and their families to more than 2,000 federally managed lands and waters nationwide for an entire year.

Bone Site Tour

Who: Ceremony participants and confirmed members of the media

What: Waco Mammoth National Monument bone site tour and opportunity for b-roll

When: Monday, October 5, 2015
8:20 a.m. CDT – Media check-in
8:30 a.m. CDT – Bone site tour begins
9:20 a.m. CDT – Bone site tour ends

Where: Waco Mammoth National Monument
6220 Steinbeck Bend Drive
Waco, TX 76708

Media: Credentialed members of the media [MUST RSVP here](#) by 6 PM EDT today, October 2, 2015.

Dedication Ceremony:

Who: **Sally Jewell**, U.S. Secretary of the Interior
Jonathan B. Jarvis, Director, National Park Service
Russ Whitlock, Superintendent, Lyndon B. Johnson National Historical Park
Larry Groth, Former Waco City Manager, City of Waco
Gloria Young, Chair, Secretary/Treasurer, Waco Mammoth Foundation, Inc.
Malcolm Duncan, Mayor, City of Waco
Ken Starr, President and Chancellor, Baylor University

What: Waco Mammoth National Monument celebration

When: Monday, October 5, 2015
9:45 a.m. CDT – Media check-in
10:00 a.m. CDT – Dedication ceremony
10:45 a.m. CDT – Media availability
11:00 a.m. CDT – Distribution of Every Kid in a Park passes

Where: Waco Mammoth National Monument
6220 Steinbeck Bend Drive
Waco, TX 76708

Media: Credentialed members of the media [MUST RSVP here](#) by 6 PM EDT today, October 2, 2015.

DOI in the News:

SECRETARY JEWELL HELPS LAUNCH TRIBAL SOLARTHON. [Newsday \(NY\)](#) (10/1, Harrington, 1.3M) reports that "the Shinnecock Indian Nation marked five years of federal recognition Thursday with Secretary of the Interior Sally Jewell to kick off a sustainable solar-energy program on the Southampton reservation." Jewell was "on Long Island to help launch a program called the Tribal Solarthon, a \$2-million initiative by nonprofit Grid Alternatives to expand renewable energy and job opportunities on Native American lands." According to the article, "at Shinnecock, the program begins with the installation of rooftop solar at two homes, including that of James H. and Marion Phillips, whose \$170 monthly energy bill is expected to be cut more than half by the system."

[Solar Industry Magazine](#) (10/1, Staff) reports that Jewell said, "GRID Alternatives' partnership with the Shinnecock Nation and other tribal communities serves as a model for helping to build a sustainable energy future and solar technology workforce in Indian country. This partnership shows how the tribal, federal and private sectors can work together to remove barriers to economic development, advance tribal self-determination and add clean energy to the grid."

SECRETARY JEWELL TO SPEAK AT NATIONAL SACNAS CONFERENCE. The [Native American Times](#) (10/2, 337) reports that "thousands of Chicano/Hispanic and Native American scientists will come to the National Harbor for one of the largest and most diverse gatherings of STEM professionals across the country next month, October 29th-31st." According to the article, "hosted by SACNAS (Society for Advancement of Chicanos/Hispanics & Native Americans in Science, <http://sacnas.org>), over 3,000 students and science professionals of color will convene for a three-day conference of cutting-edge science, mentoring, networking, and professional development." The article notes that "this year's conference will be keynoted by top tier White House advisors, current and former public officials, and business leaders including" Interior Secretary Sally Jewell.

LAND AND WATER CONSERVATION FUND EXPIRES. The [E&E Daily](#) (10/1, Subscription Publication) reports that the Land and Water Conservation Fund expired midnight Wednesday. However, "the political battle over the Land and Water Conservation Fund is sure to rage on into the fall, as lawmakers debate how to divvy up the hundreds of millions of dollars it receives each year." The article notes that "appropriators will still be able to draw from that fund when it comes time to pass another spending bill Dec. 11," but "the program's expiration means oil and gas companies have stopped paying into it."

[The Hill](#) (10/2, Henry, 471K) reports that Senate Minority Leader Harry Reid "blasted Republicans on Thursday for refusing to take up a bill" to reauthorize the LWCF. In a floor speech, Reid said, "It is a program supported by Democrats and Republicans, by rural communities and urban communities." He added, "But on Republicans' watch, one of the most important programs and one of the best programs to our nation's parks, and one of the most broadly supported programs in the country, has been allowed to lapse. It's gone."

The [Maryville \(TN\) Daily Times](#) (10/1, 64K) reports that Sen. Lamar Alexander "hopes that Congress will act soon to reauthorize the federal Land and Water Conservation Fund (LWCF), which expired Wednesday."

Additional coverage was provided by [Outside](#) (10/1, 258K), the [Santa Fe New Mexican](#) (10/2, 67K), the [High Country \(CO\) News](#) (10/2, 74K), [Slate](#) (10/2, 1 38M), and the [Knoxville \(TN\) News Sentinel](#) (10/2, 235K).

"LIVE MONUMENTAL" CAMPAIGN PUSHES FOR NEW MONUMENTS. [KKOH-AM](#) Reno, NV (10/1) reports "while many Nevadans are uncomfortable with keeping development off the state's lands, outdoor recreation advocates are asking the President to create four new national monuments – including one that would protect 350 thousand acres of desert northeast of Las Vegas." According to the article, "they're part of the 'Live Monumental' campaign sponsored by KEEN Footwear, the culmination of a two month-long, RV road trip across the U.S. to gather support and signatures for petitions to be delivered to the nation's capital."

For the "Congress" blog of [The Hill](#) (10/2, Richardson, 471K), Kirk Richardson, executive director of the KEEN Effect Team, writes that "Live Monumental, supported by groups such as The Pew Charitable Trusts and The Wilderness Society, as well as hundreds of groups and thousands of individuals across our country has one goal: To safeguard these wild places for generations to come." He notes that "studies show that protecting these places is good for local business and helps their bottom line."

Rep. Cook Introduces Desert Conservation Bill. The [Twentynine Plams \(CA\) The Desert Trail](#) (10/2, 10K) reports that Rep. Paul Cook "introduced his own desert conservation, mining and recreation bill Thursday in the House of Representatives." The California Minerals, Off-Road Recreation and Conservation Act would "add land to the Johnson Valley off-roading area and give several other places in the Morongo Basin added government protection." Cook's legislation has "several points in common with a desert conservation bill Diane Feinstein introduced in Congress in February, but Cook's alternative allows more uses, including mining, in the Mojave Trails area and offers more protection to the Johnson Valley OHV area."

Utah State Sen. Dabakis Advocates For New National Monument In DC. [KUER-FM](#) Salt Lake City (10/2, 4K) reports that "Democratic State Senator Jim Dabakis is in Washington D.C. this week and will be meeting with White House officials on Friday to give his unique perspective on public lands." Dabakis is seeking protection of "more than 1 million acres in southeastern Utah known as Bears Ears." He said, "This is one of the great cultural heritage spots in America. You cannot touch that land, you can't plant a garden without coming up shards of one of the great civilizations that's ever been here."

MARSHALL ISLANDS PRESIDENT BRINGS CLIMATE PLEA TO DC. [Politico Pro](#) (10/1, Subscription Publication) reports that "the president of the Marshall Islands is worried about his country's literal survival." According to the article, "the chain of South Pacific atolls is in danger of sinking beneath the waves as climate change causes sea levels to rise." Marshall Islands President Christopher Loeak and "his top aides will be D.C. this week to meet with Interior Secretary Sally Jewell, Obama Senior Advisor Brian Deese, and Sens. Lisa Murkowski and Jeff Flake." His hope is to "get the United States to throw its weight behind significant carbon restriction at negotiations in Paris and to persuade Congressional Republicans to follow through with Obama's \$3 billion green fund commitment."

[Politico Pro](#) (10/1) reports that Loeak said, "I'm not just here for ceremony – this particular trip to Washington is deeply personal for me. There is now less than two months to go until Paris, where the future of my country hinges on the leadership of countries like the United States."

DEFENSE AUTHORIZATION BILL DROPS ENVIRONMENTAL PROVISIONS. The [E&E Daily](#) (10/1, Subscription Publication) reports that “the sage grouse rider wasn’t the only controversial environmental provision slashed from the final version of this year’s defense authorization bill.” The article notes that “the conference committee also cut language that would restrict Pentagon investments in the biofuel industry and endangered listings for the lesser prairie chicken and American burrowing beetle.” Legislators also “dropped a provision to transfer jurisdiction over the National Desert Wildlife Refuge from the Interior Department to the Department of Defense.”

WESTERN GOVERNORS DECRY FEDERAL INTRUSION. The [E&E Daily](#) (10/1, Subscription Publication) reports that “Western states are too often ignored in federal decisions affecting lands, water and wildlife that are crucial to state economies, governors told the House Natural Resources Committee yesterday.” According to the article, “governors aired complaints about the Obama administration’s regulations for sage grouse, oil and gas drilling, climate change and wolves, and demanded they be given a ‘meaningful’ seat at the table in future federal decisions.” The article notes that “the hearing on ‘respecting state authority’ served as a forum for governors and members – mostly Republicans – to highlight ways in which they feel the federal government has overstepped its bounds.”

REPORT FEDERAL GOVERNMENT OWNS 28 PERCENT OF LAND IN US. The [Washington Free Beacon](#) (10/2, 65K) reports that “the federal government owns 28 percent of the land in the United States, according to a report from the Congressional Research Service.” The article notes that “there has been a growing movement to transfer land from the federal government to states.” It also mentions the controversy over the King Cove road.

FEDERAL AGENCIES USE UP FUNDS TO END FISCAL YEAR. The [Washington Times](#) (10/2, Howell, 344K) reports that “federal agencies went on a spree last month, spending whatever leftover federal funds they had rather than give back the excess money to taxpayers before the federal fiscal year ended Wednesday.” Notably, the Interior Department “spent \$33,472 on toilet paper.”

ADDITIONAL COVERAGE INTERIOR PROPOSES NEW PATH TO SOVEREIGNTY FOR NATIVE HAWAIIANS. Additional coverage of the proposal to create a procedure for Native Hawaiian recognition was provided by the [Big Island \(HI\) Now](#) (9/30), the [Hawaii Tribune-Herald](#) (10/2, 48K), the [West Hawaii Today](#) (10/2, 24K), and the [Maui \(HI\) News](#) (10/1, 52K).

CONGRESS URGED TO FIND PERMANENT FIX TO WILDFIRE FUNDING. The [Bend \(OR\) Bulletin](#) (10/2, 94K) welcomes that “\$700 million in emergency funding to help with this year’s wildfire season costs” included in the spending bill. But it says that “what Congress really needs to do, though, is make progress on a permanent fix for wildfire funding.” It urges Congress to “stop the cycle” and “find a funding compromise.”

Empowering Native American Communities:

INTERIOR TRANSFERS ADDITIONAL \$10 MILLION TO COBELL EDUCATION SCHOLARSHIP FUND. The [Native American Times](#) (10/2, 337) reports that the Interior Department on Thursday “announced that an additional \$10 million has been transferred to the Cobell Education Scholarship Fund (the Fund), bringing the total amount contributed so far to nearly \$30 million.” Interior Solicitor Hilary Tompkins said, “I am thrilled that the first Cobell scholarships have been awarded. Graduating from college and law school was life changing for me, and wouldn’t have been possible without financial support. The Cobell scholarship program is key to advancing self-determination by opening doors to the next generation of leaders in Indian Country.”

DOJ IG FINDS PROBLEMS WITH CONSTRUCTION OF TRIBAL JAILS. The [Washington Post](#) (10/2, Rein, 6.76M) reports in its “Federal Eye” blog that the Justice Department’s Inspector General said in a report released on Wednesday that “two brand new tribal jails built by the Navajo Nation in Arizona and paid for by the federal government are sitting almost empty because they’re more than twice as large as planned – and now there’s not enough money to run them.” The IG report “shows how \$70.3 million in economic stimulus grants turned a crucial need in Indian country to incarcerate and rehabilitate adult offenders into two white elephants.” The audit by Inspector General Michael E. Horowitz “says about half of that money went out the door improperly, more than \$32 million of it on the jails’ ‘excessive’ and ‘larger than planned’ size,” and that “the construction lacked proper oversight not just by the Navajo Nation but the Justice Department itself.”

BIA ASKED TO INTERVENE IN DISPUTE OVER UTILITY LINES. The [Rio Grande \(NM\) Sun](#) (10/1, 33K) reports that “City of Española leaders are refusing to pay a \$1 million demand imposed by Santa Clara Pueblo officials, who allege the city’s utility lines trespass on tribal land.” Pueblo officials have “requested the United States Attorney’s Office for the District of New Mexico and the Bureau of Indian Affairs intervene on an ongoing dispute regarding the city’s utility lines running under the area’s roadways.”

GOV. INSLEE SAYS NO DECISION HAS BEEN MADE ON SPOKANE TRIBE CASINO. The [Spokane \(WA\) Spokesman-Review](#) (10/1, 183K) reports that “Gov. Jay Inslee hasn’t made a decision yet on a request by the Spokane Tribe to open a casino near Airway Heights.” According to the article, “asked at a press conference Thursday about a time line for the pending decision, Inslee would only say: ‘When we make that decision, and at the right time. I can’t give you a specific date.’”

JUDGE RATIFIES DECISION TO TAKE AMADOR COUNTY LAND INTO TRUST. The [Sacramento \(CA\) Bee](#) (10/2, 535K) reports that “a Sacramento federal judge has ratified the federal government’s decision to take 228 acres of Amador County land into trust so an Indian tribe can build a casino on it.” The decision by U.S. District Judge Troy L. Nunley is “a seminal development in a fight that has stretched over at least 11 years and a tangle of litigation, and pits the lone Band of Miwok Indians against the county and a majority of its residents.”

Office of Insular Affairs:

US PUT TERRITORY CLIMATE MEASURES AT HIGH PRIORITY. The [Radio New Zealand](#) (10/2, 1K) reports that “the US government says climate change measures will get the highest priority when it comes to technical assistance funding for the island territories and associated states.” The Office of Insular Affairs is “accepting applications for 2016 technical assistance which will be processed on a first-come, first-serve basis until funds are exhausted.” According to Assistant Secretary Esther Kia’aina, “the island communities continue to face extreme climate events, including typhoons and hurricanes, storm surges, high winds and king tides.”

Tackling America’s Water Challenges:

BOR EXPECTED TO CREATE POSITION FOR SALTON SEA RESTORATION. The [Los Angeles Times](#) (10/1, 4.07M) reports on the push to “avoid a ‘looming catastrophe’ at the Salton Sea.” The article notes that “in September, the state named Bruce Wilcox, an Imperial Irrigation District employee, as assistant secretary for Salton Sea policy at the California Natural Resources Agency.” The BOR is “expected to create a similar position in coming weeks.”

Additional coverage was provided by [Bloomberg BNA](#) (10/2, 3K).

EL NIÑO COULD IMPROVE WATER SUPPLY CONDITIONS AT FOLSOM LAKE. The [Los Angeles Times](#) (10/1, 4.07M) reports that “in Folsom Lake, docks are sitting on dry, cracked land,” and “the main water source for the Sacramento suburbs is at 18% capacity.” A BOR spokesman said, “El Niño predictions for reservoirs like Folsom are speculative at this point, but it is possible that the El Niño could significantly improve water supply conditions.”

PADDLERS SET OUT TO RAISE AWARENESS FOR SACRAMENTO RIVER. The [Redding \(CA\) Record-Searchlight](#) (10/2, 81K) reports that “nearly 40 people set out on a four-day, three-night trip down the Sacramento River from Redding to Chico on Thursday” to “raise awareness of the Sacramento River.” On Thursday night, the paddlers “planned to stay at Rooster’s Landing south of Anderson.” Guest speaker was Bill Kuntz, a recreation planner for the BOR office in Redding.

PROPOSED WESTLANDS SETTLEMENT CRITICIZED. In a piece for the [Fresno \(CA\) Bee](#) (10/2, 265K), Lloyd G. Carter criticizes the proposed settlement of the Westlands Water District federal lawsuit. He notes that Taxpayers for Common Sense “described the closed-door negotiations between Westlands and attorneys for the Departments of Interior and Justice” disparagingly. Also, “north state members of Congress, commercial and recreational fishing groups, and virtually all environmental groups are calling it another example of Westlands’ political muscle.”

Securing America’s Energy Future:

Renewable Energy:

SUPPORT FOR OFFSHORE WIND ENERGY BUILDS. The [ClimateWire](#) (10/1, Subscription Publication) reports that “New Jersey still has not fully developed a mechanism to get power from offshore wind turbines to the electricity market, but developers, state lawmakers and the federal government are all backing a new push to establish the offshore wind industry there.” Supporters of “offshore wind in the state have had to confront legal challenges and lukewarm political support.” In the US, “the offshore wind industry has suffered major setbacks in the past,” but “several recent moves have fueled hopes that the industry might pick up again to catch up with Europe’s thriving offshore wind market.”

CAPE WIND DISPUTES CLAIMS OF ITS DEMISE. The [North American Windpower](#) (10/2, 43K) reports that “reports of Cape Wind’s demise are not only greatly exaggerated, but they are also patently false, explains Dennis Duffy, vice president of regulatory affairs for Cape Wind, the embattled 468 MW offshore wind project proposed off the coast of

Nantucket Island, Mass." According to the article, "speaking during the developer's roundtable at the American Wind Energy Association's recently completed Offshore Windpower 2015 conference held in Baltimore, Duffy set the record straight for attendees, many of whom assumed the project was dead following the termination of two power contracts in January."

FEDERAL JUDGE DISMISSES OSAGE NATION WIND TURBINE LAWSUIT. The [AP](#) (10/2) reports that a federal judge in Oklahoma has dismissed a lawsuit from the Osage Nation and the Department of Interior that argued that excavating foundations for wind power turbines violates tribal mineral rights. The lawsuit, filed in November against Italy-based Enel Green Power, contended that the process of digging foundations for wind turbines removed limestone and other minerals that belong to the tribe. However, the judge determined that the interpretation put forth by the tribe was too broad, saying in his ruling, "A broader reading would mean that any time a surface owner digs a hole on his or her land that would disturb any quantity of common minerals, he or she would have to obtain either a permit or a lease for any digging and backfilling."

Onshore Energy Development:

REPORT CRITICIZES BLM'S HANDLING OF FLARING ABUSES. [Natural Gas Intelligence](#) (10/2, Subscription Publication) reports that the BLM's "handling of flaring of associated natural gas on public and tribal lands was criticized in a report released Wednesday by Friends of the Earth, which said too much gas is being flared royalty-free." According to the article, "centered on North Dakota's robust Bakken Shale production and called 'A Flaring Shame,' the report alleges that because of BLM's lack of vigilance between 2007 and April 2013 some 107 Bcf of gas was flared at the government's expense (\$524 million worth of resources), resulting in annual carbon dioxide (CO2) emissions equal to what would be produced by 1.3 million cars." The report said, "BLM has the discretion to determine when flaring is or is not economically justified. Using this discretion, the BLM has approved the flaring of millions of cubic feet – and millions of dollars worth – of taxpayer-owned resources."

GROUPS WEIGH IN ON MOAB MASTER LEASING PLAN. The [Moab \(UT\) Sun News](#) (10/2) reports that "stakeholders and local officials have begun to weigh in on the long-awaited Moab Master Leasing Plan, which, when finalized, will regulate future oil, gas and potash development on public lands within Grand and San Juan counties." The article notes that "the plan has garnered additional support from recreation and environmental interests, and is being met with caution from the resource extraction industry."

GOV. FALLIN SAYS STATES BEST POSITIONED TO RESPOND TO FRACKING CONCERNS. The [Oklahoman](#) (10/2, Monies, 408K) reports that in a speech Wednesday, Gov. Mary Fallin said that states should be trusted to formulate solutions to energy development and water usage issues. Fallin pointed to the success of FracFocus.org, calling it "a solution that came from the states and spread throughout the country to make that information public."

Offshore Energy Development:

SHELL DECISION TO HALT ARCTIC OIL EXPLORATION DISCUSSED. [The Economist](#) (10/2, 462K) reports on Shell's decision to halt its exploratory drilling for oil in the Arctic, reporting that the decision "boiled down to costs, financial and reputational." The article looks at how Shell's decision was impacted by low oil prices, the need to shore up its reserve base, and how "a company that was among the first oil majors to acknowledge the risk of human-induced global warming in the 1990s...was embarrassed to be pilloried for its Arctic drilling by environmental groups and politicians." The article writes that the "stockmarket is taking the news in its stride," although "internally, the abandonment of the Arctic project will lead to soul-searching," concluding that "if one day Arctic oil and gas look promising once more, don't expect much enthusiasm from Shell."

Additional coverage was provided by [Fortune](#) (10/1, 4.14M).

After Shell's Departure From Arctic, Anti-Drilling Activists Plan To Keep Up Pressure. [Fast Company](#) (10/1, Peters, 2.4M) examined the environmental anti-drilling movement, which considered Shell's announcement "a huge win." Although "Shell's Arctic division head said that it will likely be 25 years before they, or anyone else, tries again...activists plan to keep fighting." Organizations such as Oil Change International, Greenpeace and 350.org "plan to keep up the pressure, and push governments to refuse permits and perhaps eventually ban drilling."

In commentary carried by the [Huffington Post](#) (10/1, Sakashita, 164K), Miyoko Sakashita of the Center for Biological Diversity wrote that the "huge win" of Shell leaving the Arctic "will only be a temporary reprieve unless we can permanently ban offshore oil drilling in the Arctic." Sakashita added that "more than Congress or President Obama, the key to permanently ending Arctic oil drilling is the broad-based public movement that grew over years and rose up against Shell's dangerous project this summer."

The [Seattle Post-Intelligencer](#) (10/1, 560K) carried a piece from community issues writer Charlette LeFevre on the "kayakivists" who protested Shell's plans to drill in the Arctic.

Alaskan Impact Of Shell's Departure, Low Oil Prices Considered. The [Daily Caller](#) (10/1, Ambrose, 375K) reported that businesses in Unalaska, Alaska "are preparing for any potential economic hit" after Shell's announcement that it is withdrawing from the Arctic. Unalaska Mayor Shirley Marquardt said the "community will notice it, our business community will notice it because they utilized a lot of local businesses and hired a lot of folks," although she also "maintained an overall positive outlook for the town of Unalaska." Peggy McLaughlin, port director for Dutch Harbor, said, "The bottom line, I don't see that it's going to have a huge impact on us. We didn't budget for it either operationally or in terms of revenue."

[Bloomberg News](#) (10/1, 2.66M) reported on the impact of low oil prices on the state of Alaska, where the legislature "is readying for a fierce debate over" capping the state's oil dividend payments as well as levying taxes.

JACKSON, MISSISSIPPI RECEIVES \$958K FROM DEEPWATER HORIZON CLAIM. The [AP](#) (10/2) reports that the city of Jackson, Mississippi "has received \$958,000 from a Deepwater Horizon claim even though the city was more than 150 miles from where any oil washed ashore." Jackson's claim "isn't part of the \$1.5 billion the state is receiving from the BP oil spill settlement." Jackson officials "say they hope some of the settlement will help with the \$400 million federal consent decree the city is under for improvements to wastewater treatment plants."

EDITORIAL GULF COAST STATES NEED OFFSHORE ROYALTIES. In an editorial, the [New Orleans Times-Picayune](#) (10/2, 718K) criticizes Senate Democrats and President Obama for their attempts to repeal a 2006 law authorizing Gulf Coast states to receive a portion of offshore oil and gas royalties, calling on Congress to "make good on the promise made to us." The Times-Picayune says the state is relying on the money for coastal restoration projects, adding "President Obama and Congress should understand how important that is."

America's Great Outdoors:

Bureau of Land Management:

FEDERAL AUTHORITIES INVESTIGATING REPORT OF ARMED RESIDENT CONFRONTING FIREFIGHTERS. The [AP](#) (10/1, 811K) reports that "federal authorities are investigating an anonymous report that an armed landowner confronted firefighters battling an Idaho wildfire and accused them of not properly protecting a private elk-hunting ranch." According to the article, "the report recently posted on the National Interagency Fire Center's website said two hotshot crews refused an order to fight the fire because of safety concerns." An probe "into the report is underway and involves the U.S. Forest Service, U.S. Bureau of Land Management and the Idaho Department of Lands, the fire center said."

ENVIRONMENTAL REVIEW UNDER WAY FOR HELI-SKIING PLAN. The [AP](#) (10/2, 344K) reports that "an environmental review is under way as the owners of Silverton Mountain pursue a proposal to diversify terrain for helicopter skiing on federal land." Silverton Mountain owners Aaron and Jen Brill were "hoping they could avoid an environmental assessment since one had been in 2008." Aaron Brill says "the delays from this new review will make it unlikely that their proposal will be approved by the Bureau of Land Management's Tres Rios Field Office in time for the ski season."

LAS VEGAS NATURAL HISTORY MUSEUM COLLECTS ANCIENT ARTIFACTS. The [Las Vegas Review-Journal](#) (10/2, 378K) reports that "roughly 800 boxes of pottery shards, woven baskets and other artifacts collected across Southern Nevada are now in the hands of the Las Vegas Natural History Museum, which recently won federal approval to store such ancient treasures." Earlier this year, the BLM "declared the museum a repository for all archaeological and paleontological finds on public land in the area."

Fish and Wildlife Service:

FWS, LULAC SIGN PARTNERSHIP AGREEMENT ON LATINO HEALTH AND WILDLIFE CONSERVATION. [Bloomberg Research](#) (10/2, 2.66M) reports that the FWS has "signed an historic partnership agreement with the oldest and largest Latino advocacy organization in the United States, the League of United Latin American Citizens (LULAC)." The FWS and LULAC will "work together to engage Latino families in outdoor recreational sports on public lands and raise awareness and action on wildlife conservation issues that impact Latino health."

DESERT TORTOISE RELEASED ON MARINE CORPS BASE AT TWENTYNINE PALMS. The [AP](#) (10/2, 2.28M) reports that "researchers have released a desert tortoise raised on a Marine Corps base as part of efforts aimed at reinvigorating the threatened population in the western Mojave Desert." The article notes that "the female tortoise

released Wednesday is the 35th one set free this year on the Marine Corps base at Twentynine Palms." According to the article, "the release ceremony was attended by Marine Corps officials along with authorities from the U.S. Fish and Wildlife Service, California Department of Fish and Wildlife, and researchers from the University of California Los Angeles."

Additional coverage was provided by the [San Francisco \(CA\) Chronicle](#) (10/2, Subscription Publication, 3.35M), the [Washington \(DC\) Post](#) (10/2, Press, 6.76M), the [Washington \(DC\) Times](#) (10/2, 344K), and the [Daily Mail \(UK\)](#) (10/2, 5.59M).

FWS ADDS TWO MACAWS TO ENDANGERED SPECIES LIST. The [Phys \(UK\)](#) (10/2, 530) reports that "poaching and habitat loss have landed the military macaw and the great green macaw, two birds typically found in Central and South America, on the US endangered species list, officials said Thursday." The decision "makes it illegal to kill, harass or injure the birds; import or export them from the United States; or carry them across state and national borders."

NEW RECOVERY PLAN FOR WYOMING TOAD ANNOUNCED. The [AP](#) (10/2, 2 28M) reports that "a new recovery plan for the Wyoming toad announced Thursday seeks to carry forward recent success in finally getting the critically endangered amphibian to survive in the wild." The article notes that "three self-sustaining populations could enable the toad's downlisting to a threatened species." And "five could allow removal from the endangered species list altogether as soon as 2030, according to the U.S. Fish and Wildlife Service recovery plan."

FWS ISSUES PERMIT TO HELP IN RECOVERY OF RELICT LEOPARD FROG. The [St. George \(UT\) Spectrum](#) (10/1, 46K) reports that "in a landmark agreement the U.S. Fish and Wildlife Service has issued the first permit in Nevada to the Nevada Department of Wildlife for implementing a Candidate Conservation Agreement with Assurances (CCAA) in an effort to recover the relict leopard frog, a NDOW release said." The CCAA process "allows private landowners to voluntarily participate in the conservation of the relict leopard frog in an effort to recover the species, and hopefully, preclude the need to list the frog under the Endangered Species Act." Mike Senn, Field Supervisor with FWS, said, "We are excited about this landmark agreement and partnership with the Nevada Department of Wildlife, as it will help pave the way for important conservation efforts on private lands, that are vital to the recovery of the relict leopard frog."

EPA SAY GE CAN DISMANTLE HUDSON PCB CLEANUP PLANT. The [AP](#) (10/2, George M. Walsh |, Ap, 6.76M) reports that "federal regulators said Thursday they have no problem with General Electric dismantling a Hudson River PCB cleanup plant as six years of dredging wraps up, even though government advisers had asked to keep it in place while they assess results of the \$2 billion cleanup." The EPA said "the company could use a new, temporary facility if additional dredging is required."

RESEARCH PAPER RELEASED ON WHITE-NOSE SYNDROME. The [Washington Post](#) (10/2, Fears, 6.76M) reports that "more than 7 million bats have perished from white-nose since it was discovered in an Albany, N.Y. cave nine years ago, and a new research paper provides insight into why." According to Kenneth A. Field, the lead author of the research released Thursday, "as little brown bats observed for the study dozed in a coma-like sleep, their immune systems recognized the attacking disease but never didn't lift a finger to stop it." Field's "understanding of what was happening was limited by the step-by-step nature of research" and "more observation was needed to know exactly why the bats were so easily taken out."

ILLINOIS AG ASKS INDIANA TO RESCIND QUARRY PERMIT. The [AP](#) (10/2, 2 28M) reports that "Illinois Attorney General Lisa Madigan has asked an Indiana environmental agency to cancel a permit given to build a quarry in northwest Indiana, arguing there are potential impacts on the Kankakee River." Madigan "filed the legal appeal with the Indiana Office of Environmental Review on Tuesday and said the U.S. Environmental Protection Agency should have reviewed it because water will be discharged across state lines." The FWS has "opposed the permit, saying fish and freshwater mussels could be endangered."

CALTRANS RECEIVES APPROVAL TO IMplode PIER ON OLD BAY BRIDGE. The [San Francisco Chronicle](#) (10/2, Subscription Publication, 3.35M) reports that "the U.S. Army Corps of Engineers has given Caltrans final permission to carry out a \$160 million implosion of the largest concrete pier of the old Bay Bridge eastern span next month, the state agency said Thursday." The article notes that "the project had already gotten the go-ahead from the state boards of water quality, fish and wildlife as well as federal agencies, including the National Oceanic and Atmospheric Administration and the National Marine Fisheries Service, the Fish and Wildlife Service and the U.S. Coast Guard."

SAGE GROUSE PROTECTION PLAN PRAISED. For the "Congress" blog of [The Hill](#) (10/1, Rait, 471K), Ken Rait, who directs the U.S. public lands project at The Pew Charitable Trusts, praises the plan to protect sage grouse habitat. According to Rait, "in the end, the BLM found a workable solution to balance the needed levels of protection for the greater sage-grouse and its habitat with other multiple uses of these public lands." He says that "the administration deserves praise for developing strong plans that protect sage-grouse and other wildlife while balancing the interests of companies seeking to develop natural resources, people who want to enjoy recreational pursuits, and ranchers whose herds graze the public domain."

Additional coverage of the sage grouse was provided by [The Hill](#) (10/2, Devaney, 471K), [Bloomberg BNA](#) (10/2, 3K), the [Salem \(OR\) Capital Press](#) (10/1, 113K) and the [Wyoming Tribune Eagle](#) (10/1, 44K).

EDITORIAL: FEDERAL PROTECTIONS FOR GRIZZLIES SHOULD BE REMOVED. In an editorial, the [Powell \(WY\) Tribune](#) (10/2, 13K) gives a "thumbs down to the increase in grizzly bear relocations this fall." It notes that "even though the grizzly population has rebounded significantly over the past few decades, the animal is still considered threatened under the Endangered Species Act." It concludes that "for those of us in Wyoming, it's clear that grizzly bears are thriving and federal protections should be removed."

National Park Service:

SENIORS GET FREE DAY AT NATIONAL PARKS. [USA Today](#) (10/1, 5.23M) reports that "on Oct. 8, all national parks will grant complimentary access to seniors 62 and older." NPS Director Jonathan Jarvis said, "Spending time in parks has demonstrated benefits for physical and mental health, and the National Park Service is helping Americans make this connection." The article notes that "it's part of a partnership with Humana Inc., a Louisville-based health and well-being company that is serving as the official sponsor of the National Park Service's Centennial celebration."

Additional coverage was provided by the [Miami \(FL\) Herald](#) (10/2, 651K) and [KHOU-TV Houston \(TX\)](#) Houston (10/1, 308K).

SUPREME COURT TO HEAR MOOSE HUNTER'S CHALLENGE TO HOVERCRAFT BAN. The [Greenwire](#) (10/1, Subscription Publication) reports that the Supreme Court has "agreed to hear an Alaska moose hunter's challenge to a federal ban on using hovercraft on National Park Service waterways." John Sturgeon has "taken annual moose hunting trips near Alaska's Canadian border on the Yukon River and its tributary the Nation River since 1971." In 2007, Sturgeon was "operating his personal hovercraft in the Yukon-Charley Rivers National Preserve during a hunting trip when National Park Service enforcement agents told him the vehicle was banned in waters inside the preserve."

Additional coverage was provided by the [Washington \(DC\) Post](#) (10/2, Barnes, 6.76M), the [Houston \(TX\) Chronicle](#) (10/2, 2.28M), the [Lincoln \(NE\) Journal Star](#) (10/2, 231K), [US News & World Report](#) (10/1, 811K), the [Washington \(DC\) Post](#) (10/2, Press, 6.76M), the [Washington \(DC\) Times](#) (10/2), the [Daily Mail \(UK\)](#) (10/2, 5.59M), and [Reuters](#) (10/1, Hurley).

HURRICANE JOAQUIN COULD TEST NEW WASHINGTON LEVEE. The [AP](#) (10/2, 344K) reports that "a new levee could be tested if Hurricane Joaquin hits the nation's capital." The NPS, "which operates the structure, says it's ready to erect the levee if a storm surge appears imminent."

Meanwhile, [WTOP-FM](#) Washington (10/2, 511K) reports that the NPS is "closing turf fields and canceling events around the Washington area as the region prepares for heavy rainfall and the possible arrival of Hurricane Joaquin." Park rangers and U.S. Park Police are also "clearing storm drains, setting up flood barriers and doing other prep work for major rainfall."

YOSEMITE CELEBRATES 125TH ANNIVERSARY. [CNN](#) (10/2, Hetter, 5.17M) reports that Yosemite National Park celebrates its 125th anniversary on Thursday. The park's "celebrations will honor the land's heritage and its future." According to the article, "a blessing will be offered by descendants of the Ahwahneechee, the native peoples of the Yosemite Valley (the valley is also called Ahwahnee)." Also, "the celebration's honorary chairman is 9-year-old Gabriel Lavan-Ying, a Gainseville, Florida, boy who became a Yosemite National Park Ranger through the Make-A-Wish Foundation last year."

PROJECT LAUNCHED CONNECTING GREAT FALLS NATIONAL PARK WITH PATERSON RESTAURANTS. [Paterson \(NJ\) Times](#) (10/1) reports that "the Great Falls National Park, represented by a multidisciplinary team of young professionals, won the National Parks Now competition." The six-person team "submitted an initiative that is connecting Paterson restaurants to the park." The team "designed a campaign that is seeking to blur the line between the national park and the surrounding neighborhoods in order to motivate visitors through the lure of food to explore the Silk City."

APPROACHING STORM CANCELS BUXTON BEACH NOURISHMENT PLAN. The [AP](#) (10/2, 344K) reports that "a meeting about a beach nourishment plan for Buxton on Hatteras Island has been postponed because of the approaching storm." The meeting had been scheduled Thursday. The NPS says "the meeting on the environmental assessment of the beach plan will be rescheduled."

ADDITIONAL COVERAGE OF "EVERY KIND OF PARK" INITIATIVE AVAILABLE AT: [http://www.nps.gov/pressroom/pressreleases/2014/10/02/14-102.htm](#)

[Magazine](#) (9/25).

ADDITIONAL COVERAGE NATIONAL PARKS INCREASING FEES. Additional coverage that the NPS is "raising entry fees for 100 parks, in some cases doubling or tripling them" was provided by the [Christian Science Monitor](#) (10/1, 455K) and the [Consumerist](#) (10/1, 57K).

US Geological Survey:

USGS DEPLOYING TIDE SENSORS ALONG VIRGINIA COAST. [WVEC-TV](#) Hampton Roads, VA (10/1, 44K) reports that USGS "field crews are deploying storm tide sensors along the Virginia coast ahead of Hurricane Joaquin." According to the article, "sensors will be deployed near Virginia Beach, along the Western Chesapeake Bay and on the Eastern Shore."

US BOARD ON GEOGRAPHIC NAMES ACCEPTS "MARDI GRAS PASS" NAME. [WWL-TV](#) New Orleans (10/2, 105K) reports that "The federal government has officially adopted the name 'Mardi Gras Pass' for a highly disputed Mississippi River offshoot near Pointe à la Hache, marking a new twist in the contentious debate over who should control the waterway." The U.S. Board on Geographic Names, a division of the USGS, "accepted the name Mardi Gras Pass at the urging of the Louisiana Department of Transportation and John Lopez of the Lake Pontchartrain Basin Foundation, who coined the name when he saw the channel break through the river bank on Mardi Gras Day, 2012." However, "a group of landowners have filed a complaint with USGS asking the board to reconsider."

Top National News:

FRUSTRATED OBAMA PLEAS FOR LEGISLATION TO CURTAIL RASH OF MASS SHOOTINGS. The President's [remarks](#) in the wake of the mass shooting at Umpqua Community College in Roseburg, Oregon are the subject of very heavy media coverage. The network news broadcasts, for example, spent nearly 26 minutes on the shooting. Almost universally, reports describe the President as visibly angry and frustrated as he called for "common sense" legislation to address gun violence, but many reports also note that passage of such legislation is unlikely since Republican leaders in Congress have shown no interest in pushing it.

The [CBS Evening News](#) (10/1, story 2, 0 50, Pelley, 5.08M) showed a clip of the President's comments, while in the lead story for [NBC Nightly News](#) (10/1, lead story, 1:40, Holt, 7.86M), Lester Holt said "a visibly emotional, angry, and frustrated President Obama echoed the nation's sorrow." The [Washington Times](#) (10/2, Wolfgang, 344K) says that as the President delivered his "15th statement in the wake of a mass shooting," he was "visibly shaken and angry," adding that he "attacked the American gun lobby, scolded the media and demanded that Congress take concrete action to stop the rash of recent mass shootings." The President "said news outlets should highlight that fewer Americans are killed by radical terrorists than by deranged gunmen in America."

Noting that "responding to mass shootings has been an unfortunate theme" of the Obama presidency, the [Huffington Post](#) (10/2, McLaughlin, 164K) said the President "sounded exasperated" as he "expressed frustration that it was necessary for him to frequently console victims' families and that he was again calling for new gun control regulations."

This year, the President has "already...given national statements in response to the movie theater shooting in Lafayette, Louisiana, and the Charleston, South Carolina, church massacre," the [Oregonian](#) (10/2, Theen, 756K) reports, adding that he said such shootings have "become routine," and "We've become numb to this." However, he added that this time "the nation's grief isn't enough," and "urged the Americans and Congress to take action on 'sufficient common sense gun safety laws.'" The [Washington Post](#) (10/2, Eilperin, 6.76M) notes that the President "bemoaned the fact that these tragedies had become so frequent...they no longer shocked the public," and said that "the 'routine' nature of mass shootings in America will continue unless the country's politics changes."

[USA Today](#) (10/2, Jackson, 5.23M) describes the President as "visibly frustrated," as he "again called for 'common sense' legislation aimed at preventing gun violence," adding that he "mocked opponents of gun control legislation, including those who say the solution is 'more guns,'" asking, "Who believes that?" The [New York Times](#) (10/2, Harris, Shear, Subscription Publication, 11.82M) says the President was "visibly angry and frustrated" as he "lashed out at those who oppose gun limits by saying that their answer to such tragedies are more guns, not fewer." The President "pointed out that states with more gun restrictions tended to have fewer gun deaths, and countries like Britain and Australia with far stricter gun laws have much fewer gun deaths," adding, "So we know there are ways to prevent it."

The [AP](#) (10/2, Freking) also describes the President as "visibly frustrated," and notes that he had "some anger in his voice" as he "called for changes in the nation's gun laws." [AFP](#) (10/2) says the President "voiced his anger and sadness" over the shooting, as he "reiterated his frustration at the failure of the Republican-controlled US Congress to back new gun control measures," he "threw down the gauntlet to lawmakers," saying, "This is not something I can do myself. I have to have a Congress and state legislatures and governors who are willing to work with me on this." The [Wall Street Journal](#) (10/2, Tau, Subscription Publication, 5.95M) notes that the President said shooting tragedies like the one in Oregon are "a political choice that we make – to allow this to happen every few months in America."

[Reuters](#) (10/2, Mason, Rampton) also notes the President's anger and reports that while he said anyone who commits a mass shooting has a "sickness in their minds," he added that "we are not the only country on Earth who has people with mental illnesses who want to do harm to other people. ... We are the only advanced country on Earth who sees these kinds of mass shootings every few months."

[People](#) (10/2, Fowler, 46.16M) said the "visibly shaken" President compared "gun control to the issue of terrorism," saying, "We spend over a trillion dollars and pass countless laws and devote entire agencies to preventing terrorist attacks on our soil and rightfully so. And yet we have a Congress that explicitly blocks us from even collecting data on how we could potentially reduce gun violence. How can that be? ... We collectively are answerable to those families who lose their loved ones."

Noting that the President challenged the media to "tally up the number of Americans who've been killed through terrorist attacks in the last decade and the number of Americans who've been killed by gun violence, and post those side-by-side on your news reports," [Vox](#) (10/2, Beauchamp, 1.1M) posted a chart showing that more than "ten thousand Americans are killed every year by gun violence" while "so few Americans have been killed by terrorist attacks since 9/11 that, when you chart the two together, the terrorism death count approximates zero for every year except 2001."

David Wright noted on [ABC World News](#) (10/1, story 3, 1 20, Muir, 5.84M) that "there have been at least ten fatal shootings on US campuses this year and many more close calls," adding that schools across the nation now "hold drills for campus shootings." Lester Holt reported on [NBC Nightly News](#) (10/1, story 4, 2:00, Holt, 7.86M) that the group Every Town for Gun Safety says "there have been 142 incidents in which a gun was fired on a school campus in this country since the massacre in Newtown in December of 2012 and this is the fourth shooting on a college campus just since the start of this school year in August."

[Newsweek](#) (10/2, Richinick, 198K) cast the President's comments as an "emotional yet exhausted plea to the country," and the [New York Daily News](#) (10/2, Slattery, 3.75M) says the President was "shaking at times as he gathered his thoughts." [McClatchy](#) (10/2, Clark, 28K) notes the President was "visibly upset" as he said "he 'hoped and prayed' it would be the last shooting he has to address as president, but added that, based on his experience 'there is no guarantee.'" While he did not mention the NRA by name, the President "asked responsible gun owners whether their views are reflected by 'the organization that suggests it's speaking' for them."

[Bloomberg Politics](#) (10/1, Sink, 247K) notes that the "visibly angry" President "said he embraced criticism that he was politicizing the violence, and that Americans need to make clear to lawmakers whether they wanted new gun laws," and [Mic](#) (10/2, Krieg, 1 5M) reported that the President said he "welcomed a pitched partisan debate over the future of gun control in the United States," and "challenged Americans to respond more forcefully to this shooting."

Earlier in the day, White House press secretary Josh Earnest said that "tougher gun laws remained a 'top priority' for the administration, while the president remained 'realistic' about the prospect for new legislation." According to [Politico](#) (10/1, Gass, 942K), Earnest told reporters, "We've not yet seen that kind of strong bipartisan support across the country translate into legislative support in the United States Congress that's sufficient to pass legislation that would, again, implement these kinds of common-sense solutions." [The Hill](#) (10/2, Fabian, 471K) reported that Earnest said the "vast majority of Americans' support stricter gun laws, including closing the so-called gun-show loophole," but added that the President is "'realistic' about the dim prospects of congressional action on gun control," saying, "The president has been quite candid about how this is and has been a source of frustration for him."

Likewise, [Vox](#) (10/2, Lee, 1.1M) reported that Earnest "acknowledged that President Obama was unlikely to get his wish," because while he "favors passing new gun regulations, Republican leaders in Congress have shown no interest in doing so." Nancy Cordes noted on the [CBS Evening News](#) (10/1, story 4, 2 00, Pelley, 5.08M), "Sympathy and best wishes are about all that the victims' families can expect from Congress which has not seriously debated strengthening gun laws since 2013," following the Sandy Hook massacre, and "even then, the Senate easily defeated legislation that would have increased punishment for gun trafficking and expanded background checks." Also on the [CBS Evening News](#) (10/1, story 10, 2 05, Pelley, 5.08M), Jim Axelrod reviewed the unsuccessful efforts by Newtown families "to push for stricter gun control measures," and noted that "Americans are wondering what may come out of another massacre – shock, horror, sadness? Sure, but chances are, if history is any guide, you won't see change on that list."

In an editorial, the [Washington Post](#) (10/2, 6.76M) argues that while many details of the attack remain unknown, "one factor in the tragedy that unfolded on this college campus is the all-too-easy availability of guns in this country," and "we shouldn't have to wait for Congress to enact laws to combat what is clearly a crisis of gun violence." Noting that Congress "refuses to enact sensible gun control laws," the Post decries lawmakers' "cowardly obedience to the National Rifle Association."

[The Atlantic](#) (10/2, Calamur, Koren, 2.69M), which also described the President as “visibly frustrated,” noted that Oregon Gov. Kate Brown “expressed her ‘profound dismay’ at the incident,” while Rep. Pete DeFazio, whose district includes Roseburg, “said in a statement that ‘once we know more about what happened today, I plan to work with my colleagues in Congress to find ways to prevent tragedies such as these.’” In another segment on the [CBS Evening News](#) (10/1, story 6, 1:15, Pelley, 5.08M), Dr. Jon Lapook discussed mental illness, noting that while “early intervention works,” the “big problem in the US and elsewhere is access to care.”

A number of reports focus on the details of the shooting, which the [Oregon Herald](#) (10/2, Gufferson) says left at least nine people dead and more than 20 others injured. According to Oregon Gov. Kate Brown, the gunman was a 20-year-old man, and Sheriff John Hanlin said at a press conference Thursday afternoon that “officers had ‘neutralized’” him “during an exchange of gunfire in a campus building at Umpqua Community College.” However, the [Washington Post](#) (10/2, Markon, 6.76M) cites a “law enforcement official,” who “identified the gunman as 26-year-old Chris Harper Mercer of Winchester, Ore.” The Post adds that while police “have refused to identify the shooter so far,” a “US official gave his name as Chris Harper Mercer.” On [NBC Nightly News](#) (10/1, story 2, 2:30, Holt, 7.86M), Gadi Schwartz noted that the “rampage” lasted “about ten minutes until police finally made contact” with the shooter. On [ABC World News](#) (10/1, story 2, 0:35, Muir, 5.84M), Pierre Thomas described a “massive” presence of federal agents, noting that “local law enforcement is getting all the support they need from the federal government.” Reporting for [NBC Nightly News](#) (10/1, story 3, 0:45, Holt, 7.86M) from Roseburg, Jacob Soboroff similarly noted that “the FBI, the Douglas County sheriff, ATF and many other law enforcement agencies are here.”

In the lead story for the [CBS Evening News](#) (10/1, lead story, 2:50, Pelley, 5.08M), Pelley noted that this was “the fifth mass shooting to lead this broadcast since June,” and, in a [separate story](#), noted that the website ShootingTracker.com says “there have been 294 mass shootings in the first 274 days of this year.” Pelley also [interviewed](#) an eyewitness to the shooting, while in its lead story, [ABC World News](#) (10/1, lead story, 3:35, Muir, 5.84M) detailed the events and described “scenes of incredible grief” on the campus. The [Roseburg \(OR\) News-Review](#) (10/2, 53K) reports that a “relief fund for those impacted” by the shooting has been established by Greater Douglas United Way and Umpqua Bank.

COMEY CONFIRMS INQUIRY INTO CLINTON EMAIL SYSTEM. The [AP](#) (10/1, Tucker) reports that FBI Director Comey on Thursday “confirmed” that the agency “is looking into the security of the setup of Hillary Rodham Clinton’s email and that the agency has the appropriate ‘resources and personnel assigned to this matter.’” Speaking with reporters, Comey “acknowledged for the first time the existence of the FBI inquiry,” though “he declined to discuss details of the investigation and would not answer questions about when the inquiry might end or exactly what steps the FBI is taking as part of its review.”

The [New York Times](#) (10/2, Schmidt, Subscription Publication, 11.82M) reports that Comey said “that he was certain the bureau would be able to complete the” probe of “Clinton’s personal email account in a timely manner and that he would make sure politics did not interfere with it.” Comey is quoted as saying, “I am confident we have the resources and the personnel assigned to the matter, as we do all our work, so that we are able to do it in a professional, prompt and independent way.”

In her [Wall Street Journal](#) (10/2, Subscription Publication, 5.95M) column, Kimberley Strassel writes that nearly every claim made by Clinton when she first discussed the email controversy during a news conference in March has proven to be untrue. Strassel goes on to highlight the various Clinton claims that she says have turned out to be false.

Russian Hackers Attempted To Infiltrate Clinton Emails. [ABC World News](#) (10/1, story 9, 0:20, Muir, 5.84M) reported that Russian-based hackers attempted to infiltrate Clinton’s private email server during her tenure as secretary of state “at least five times.” Critics say the revelation is “a sign of just how insecure” Clinton’s server was.

The [New York Times](#) (10/2, Sanger, Schmidt, Subscription Publication, 11.82M) reports that “Clinton’s private email” was a target of “spam sent to try to lure her into clicking on a malicious link — one that could have compromised the security of her communications.” The Times adds that “the evidence that Mrs. Clinton’s personal account had been on the receiving end of a ‘spear phishing’ attempt...raises the same question the F.B.I. is trying to answer as it” examines “the server that was once in Mrs. Clinton’s basement. And that is whether the attackers who successfully got into the unclassified systems at the State Department and the White House [in 2014] also got into Mrs. Clinton’s.”

[Politico](#) (10/2, Gerstein, Marks, 942K) reported that “the five fake speeding-ticket notices sent to Clinton and released by the State Department Wednesday were likely just a fraction of the spam and phishing messages she received on her so-called homebrew server.” Politico noted that a statement earlier this year from Clinton’s office said, “After her work-related emails were identified and preserved, Secretary Clinton chose not to keep her private, personal messages [including] items one would typically find in their own email account, such as offers from retailers, spam, etc.” Politico added that officials with the Clinton camp “declined to quantify how many of the roughly 30,000 erased messages were considered ‘spam’ akin to the five messages released Wednesday.”

[Fox News’ Special Report](#) (10/1, 1.53M) reported that Obama Senior Adviser Valerie Jarrett “is raising more doubts about Clinton’s email.” Jarrett said that the White House provided guidance to cabinet secretaries that “government business should be done on government emails and that if you did use a private email, that it should be turned over. That’s what [Clinton is] doing.” Fox noted that the number of Clinton’s emails with classified information “has now reached 403.”

WTimes Analysis: Clinton Has Used Her Campaign To “Raise The Profile” Of Abedin. The [Washington Times](#) (10/2, Miller, 344K) reports that with her 2016 White House run, Clinton has sought “to rehabilitate the battered image of longtime aide and confidante Huma Abedin. The steps Mrs. Clinton has taken to raise the profile of Ms. Abedin in the campaign include using her prominently in a fundraising email and deploying her to Twitter for the first time.”

“60 Minutes” Spokesperson Says State Didn’t “Plant” Questions. [Politico](#) (10/1, Gold, 942K) reported that CBS “is pushing back against an allegation in one of the newly released...Clinton emails that the State Department had successfully planted questions for an interview with Wikileaks’ Julian Assange. In an email sent to...Clinton on Jan. 28, 2011, Assistant Secretary for Public Affairs at the State Department P.J. Crowley said he had confirmed that ‘60 Minutes’ was planning to air an interview with Assange, but that he was assured that the interviewer would ask some questions ‘planted’ by the State Department.” In a statement, a spokesperson for “60 Minutes” said, “The idea of a ‘plant’ is as preposterous as this email writer’s attempt to get credit from his boss. We spoke to many sources for this story.”

BOEHNER BENGHAZI INVESTIGATION “HAS NEVER BEEN ABOUT” CLINTON. The [Huffington Post](#) (10/1, Barron-Lopez, 164K) reported that House Speaker Boehner on Thursday began “damage control” as he sought “to quell calls for Republicans to disband the Select Committee on Benghazi” in the wake of House Majority Leader McCarthy’s remarks. In a statement, Boehner said, “This investigation has never been about former Secretary of State Clinton and never will be.” Boehner added that the panel’s “very existence is only the result of the Obama administration’s obstruction of routine congressional investigations and its failure to properly comply with subpoenas and document requests.”

[McClatchy](#) (10/2, Douglas, 28K) reports that while Democrats have now called for the panel to “be disbanded,” Boehner “dismissed” those “complaints, saying ‘the fact remains that Secretary Clinton and the Obama administration have done everything they can do to delay, derail, and stop this investigation. The members of this committee have worked diligently and professionally to fulfill this important mission and they will continue to do so.’”

[USA Today](#) (10/2, Troyan, 5.23M) reports that in the wake of McCarthy’s remarks, Benghazi Committee Chairman Rep. Trey Gowdy, “who has insisted for months that his panel’s” probe “is non-political, was forced to play defense once again.” Gowdy is quoted as having said on Wednesday, “I would just encourage people to look at what is done as opposed necessarily to what is said. If you look at what we’ve done, I never mentioned [Clinton’s] name during a committee hearing. We’ve interviewed 54 people, and not a single one named Clinton. Of the next 50, one will be named Clinton.”

Meanwhile, the [Washington Times](#) (10/2, Dinan, Miller, 344K) reports that Minority Leader Pelosi on Thursday said that the Benghazi “probe should be shut down” and that “Republicans may have violated the House ethics rules by establishing what she said has now become a ‘political’ committee. I do believe this could be an ethical issue in the House,” she said.”

McCarthy: I Didn’t Intend “To Imply Anything” With Benghazi Comments. In an interview on [Fox News’ Special Report](#) (10/1, 1.53M), Rep. Kevin McCarthy said “it was never my intention to imply anything” with his recent comments that the House Select Committee on Benghazi’s probe of the 2012 terrorist attack in Libya was hurting Democratic presidential candidate Hillary Clinton in the polls. McCarthy said the Benghazi investigation has “one sole purpose” – to find the truth, and added that the comments shouldn’t make it harder for the committee to interview Clinton, because “no one questions the integrity of the committee.”

Politico, WPost Analyses: For Clinton, McCarthy’s Remarks A “Gift.” Under the headline “McCarthy’s Benghazi Gift To Team Hillary,” [Politico](#) (10/1, Bade, 942K) reported that with McCarthy’s remarks on the Benghazi panel, the Clinton campaign “has found its opening. After months of being dogged by the controversy surrounding her private email account,” Clinton and her backers “are taking the offensive,” asserting that McCarthy’s comments validate “their view that the panel is a politically motivated effort to damage her campaign.”

And under the front-page headline “McCarthy’s Comments On Benghazi Probe May Be A Political Gift To Clinton,” the [Washington Post](#) (10/2, A1, Rucker, Costa, 6.76M) similarly reports that “Clinton’s upcoming appearance before the” Benghazi panel “was supposed to be a crucible: a chance for Republicans to prosecute the former secretary of state for her handling of the 2012 terrorist attacks” and “for her use of a private e-mail server.” However, because of McCarthy’s remarks, says the Post, “it may have turned into a political gift for” the Democratic presidential frontrunner, whose supporters assert the Republican’s “comments will help recast Clinton’s scheduled Oct. 22 hearing as a partisan inquisition rather than a fact-finding mission about the attacks in Libya.”

Editorial Wrap-Up:

NEW YORK TIMES. "Russia's Dangerous Escalation In Syria." A [New York Times](#) (10/2, Subscription Publication, 11.82M) editorial says Russia's airstrikes in Syria "cross a dangerous line...that escalates the bloody conflict and risks bringing Russia into direct confrontation" with the US. The argues that the Russian strikes will also "certainly make a political settlement even harder to achieve."

"Mahmoud Abbas Gives Up On Peace." In an editorial regarding President Mahmoud Abbas' assertion that the Palestinians will no longer be bound by the Oslo Peace Accords, the [New York Times](#) (10/2, Subscription Publication, 11.82M) says that because of the "failure of everyone — Palestinians, Israelis and Americans — to build on the promise of Oslo," the "sad political reality behind" Abbas' declaration is "that there was so little left to disown." Still, while Abbas "has effectively given up on ever achieving a negotiated Palestinian state" the Times argues that his speech "is not.. to be lightly dismissed."

"William Bratton's Shift On The Use Of Force." In an editorial, the [New York Times](#) (10/2, Board, Subscription Publication, 11.82M) says that NYPD Commissioner William Bratton's announcement that the department is "reforming its policies on the use of force" is a "good first step," and says the proposed new system is a "big improvement over the current system, which generally documents aggression only when an officer fires a weapon or happens to attack somebody in front of a cellphone camera."

WASHINGTON POST. "Another Infuriating, But Unsurprising Gun Tragedy." In an editorial, the [Washington Post](#) (10/2, 6.76M) argues that while many details of Thursday's shooting in Oregon remain unknown, "one factor in the tragedy that unfolded on this college campus is the all-too-easy availability of guns in this country," and "we shouldn't have to wait for Congress to enact laws to combat what is clearly a crisis of gun violence." Noting that Congress "refuses to enact sensible gun control laws," the Post decries lawmakers' "cowardly obeisance to the National Rifle Association."

"Yet Another Blot On The Secret Service." In an editorial, the [Washington Post](#) (10/2, 6.76M) says that Secret Service officials' improperly accessing Rep. Jason Chaffetz's job application "reflect

Dear all--

Please find attached a draft for review which announces that Secretary Jewell and former first lady Laura Bush will help celebrate the designation of Waco Mammoth National Monument in Waco, Texas.

Please send edits back to me by Friday at Noon.

Thank you!

Secretary Jewell, Former First Lady Laura Bush Join Texas Community to Celebrate Waco Mammoth National Monument Designation

President's Proclamation Protects Rare Mammoth Fossils, First and Only Recorded Discovery of a Nursery Herd

WACO, TEXAS – U.S. Secretary of the Interior Sally Jewell and Former First Lady Laura Bush today joined community members to celebrate the President's designation of the [Waco Mammoth National Monument](#) as one of the nation's newest national monuments, permanently protecting the site where the extremely well-preserved fossils of a herd of Columbian Mammoths and other Ice Age animals have been found. President Obama [designated the area as a national monument](#) on July 10, 2015, as part of the Administration's commitment to protect our country's significant outdoor spaces for the benefit of future generations.

The celebration took place at the new national monument, where Secretary Jewell and former First Lady Laura Bush were joined National Park Service Director Jonathan B. Jarvis, City of Waco Mayor Malcolm Duncan, Baylor University President and Chancellor Ken Starr, and many local, state and national conservation and community leaders to celebrate the designation.

"Today we celebrate decades of hard work and partnerships between the City of Waco, Baylor University, and now the National Park Service," said Secretary Jewell. "It's our duty to protect places like this that will inspire the next generation of archaeologists, paleontologists, and historians, and show the rich diversity of our country's natural heritage."

The area in Texas provides a rare chance to understand and interpret the behavior and ecology of the extinct Columbian Mammoth. The oldest fossils identified at the site are thought to be more than 65,000 years old. In addition, both the excavation area and the land around it offer an excellent opportunity for further exploration and paleontological and geological research.

The site remains the nation's first and only recorded discovery of a nursery herd, including females and their offspring, of mammoths from the Ice Age, an era defined as 2.5 million to 10,000 years ago. Of the 24 mammoths uncovered to date, at least 18 were part of the nursery herd. As a result of an unknown natural catastrophic event, the entire nursery herd died at the same moment in time, which left the skeletons relatively intact. The site offers a one-of-a-kind opportunity to examine the matriarchal herd structure and behavior of this extinct species.

Quote from Former First Lady Laura Bush

The site is now managed by the National Park Service in cooperation with the City of Waco and Baylor University. The National Park Service is conducting a [management planning process](#), working closely with partners, community residents, and other groups that have devoted themselves to preserving the site for many years.

Quote from National Park Service Director Jonathan B. Jarvis

The site was discovered in 1978, when Waco residents Paul Barron and Eddie Bufkin were looking for arrowheads and fossils along the Bosque River and found a large bone protruding from the earth. Realizing the possible significance of this discovery, Mr. Barron and Mr. Bufkin immediately took the bone to the Strecker Museum at Baylor University where the bone was identified as the upper leg bone of a Columbian Mammoth.

Over the next 20 years, Baylor University oversaw the excavation of the site, where they found the remains of 24 Columbian Mammoths, including adults and juveniles, as well as a Western Camel, saber-toothed cat, dwarf antelope, American Alligator, and giant tortoise. The Columbian Mammoths are the largest mammoth species – larger than its relative, the Woolly mammoth – and stood 12 to 14 feet tall and weighed seven to eight tons. Many of the discovered bones, including the remains of four Columbian Mammoths as well as the skeleton of the camel, remain in place, providing visitors an opportunity to view them.

The City of Waco has operated the Waco Mammoth Site as a park since 2009, in partnership with Baylor University and with support from the nonprofit Waco Mammoth Foundation, Inc. The city donated to the United States approximately five acres, which includes the excavation site and the dig shelter, making it possible to establish the monument. Nearly the entire Waco Mammoth Site is within the boundary of the national monument.

The Antiquities Act was first used by President Theodore Roosevelt in 1906 to designate Devils Tower National Monument in Wyoming. Since then, 16 presidents have used this authority to protect unique natural and historic features in America, such as the Grand Canyon, the Statue of Liberty, and Colorado's Canyons of the Ancients.

The Waco Mammoth National Monument is one of three new national monuments announced by President Obama in July that help tell the story of significant events in American history and protect unique natural resources for the benefit of all Americans. The designations include [Berryessa Snow Mountain](#) in California and [Basin and Range](#) in Nevada.

With these new designations, President Obama will have used the Antiquities Act to establish or expand 19 national monuments. In total, he has protected more than 260 million acres of public lands and waters – more than any other President – as well as preserved sites that help tell the story of significant people or extraordinary events in American history, such as [César E. Chávez National Monument](#) in California, [Harriet Tubman Underground Railroad National Monument](#) in Maryland, and [Charles Young Buffalo Soldiers National Monument](#) in Ohio.

Secretary Jewell, Former First Lady Laura Bush to Celebrate Designation of Waco Mammoth National Monument in Texas

WACO, TEXAS – On Monday, October 5, U.S. Secretary of the Interior Sally Jewell and Former First Lady Laura Bush will host a celebration at Waco Mammoth to celebrate its recent designation as a National Monument.

In July, President Obama [designated Waco Mammoth as one of three new national monuments](#), including Berryessa Snow Mountain in California and Basin and Range in Nevada. Waco Mammoth permanently protects the site where the extremely well-preserved fossils of a herd of Columbian Mammoths and other Ice Age animals have been found.

The area provides a rare chance to understand and interpret the behavior and ecology of the extinct Columbian Mammoth. The oldest fossils identified at the site are thought to be more than 65,000 years old. In addition, both the excavation area and the land around it offer an excellent opportunity for further exploration and paleontological and geological research.

Secretary Jewell and National Park Service Director Jonathan B. Jarvis will also meet with local fourth grade students in support of President Obama's Every Kid in a Park initiative to distribute free passes to America's federal lands and waters. The Every Kid in a Park program seeks to connect young people with the great outdoors. As of September 1, the program allows fourth graders nationwide to go to www.everykidinapark.gov and obtain a pass for free entry for them and their families to more than 2,000 federally managed lands and waters nationwide for an entire year.

Bone Site Tour

Who: Ceremony participants and confirmed members of the media
What: Waco Mammoth National Monument bone site tour and opportunity for b-roll
When: Monday, October 5, 2015
8:20 a.m. CDT – Media check-in

8:30 a.m. CDT – Bone site tour begins
9:20 a.m. CDT – Bone site tour ends

Where: Waco Mammoth National Monument
6220 Steinbeck Bend Drive
Waco, TX 76708

Media: Credentialed members of the media [MUST RSVP here](#). After the tour, transportation will be provided to the dedication ceremony.

Dedication Ceremony:

Who: **Sally Jewell**, U.S. Secretary of the Interior

DOI in the News:

INTERIOR PROPOSES NEW PATH TO SOVEREIGNTY FOR NATIVE HAWAIIANS. [KGMB-TV](#) Honolulu (9/29, 76K) reports that the Interior Department on Tuesday "announced a proposal to create an administrative procedure that would apply if the Native Hawaiian community forms a unified government that then seeks a formal government-to-government relationship with the United States." Under the new proposal, "the Native Hawaiian community – not the Federal government – would decide whether to reorganize a Native Hawaiian government, what form that government would take, and whether it would seek a government-to-government relationship with the United States." Interior Secretary Sally Jewell said, "The United States has a long-standing policy of supporting self-governance for Native peoples, yet the benefits of the government-to-government relationship have long been denied to Native Hawaiians, one of our nation's largest indigenous communities. Today's proposal is a testament to the Obama Administration's strong support for our nation's Native peoples' right to self-determination."

The [Honolulu Star-Advertiser](#) (9/29, 349K) reports that "Hawaii's Congressional delegation unanimously hailed today's announcement." Sen. Mazie Hirono said, "The Native Hawaiian community's ongoing work toward self-determination takes a significant step forward today, and I applaud the Obama administration for its commitment to this effort." Sen. Brian Schatz said, "Native Hawaiians have the right to reorganize a government that they determine is best for them. With today's publication of proposed rules from the Department of the Interior, I urge Native Hawaiians and other interested individuals to stay engaged and to contribute their comments and concerns as the process moves forward."

Additional coverage was provided by the [Big Island \(HI\) Video News](#) (9/29), the [Maui \(HI\) Now](#) (9/29), the [Honolulu \(HI\) Civil Beat](#) (9/30, 41), the [Big Island \(HI\) Now](#) (9/29), the [Hawaii 24/7](#) (9/29), the [Daily Mail \(UK\)](#) (9/30, 5.59M), the [Houston \(TX\) Chronicle](#) (9/30, 2.28M), the [Washington \(DC\) Post](#) (9/30, Kelleher Cathy Bussewitz |, Ap, 6.76M), [Yahoo! News](#) (9/30, Kelleher, Bussewitz, 5.98M), the [Quincy \(IL\) Herald-Whig](#) (9/30, 99K), the [Minneapolis \(MN\) Star Tribune](#) (9/30, Kelleher, Bussewitz, 1.19M), [KITV-TV Honolulu \(HI\)](#) Honolulu (9/30, 44K), [KHON-TV Honolulu \(HI\)](#) Honolulu (9/29, 72K), [KFVE-TV Honolulu \(HI\)](#) Honolulu (9/30), and [KHON-TV](#) Honolulu (9/29, 72K).

INTERIOR ANNOUNCES PARTNERSHIP WITH THE NORTH FACE TO SUPPORT 21ST CENTURY CONSERVATION CORPS. The [Huffington Post](#) (9/29, 164K) reports that the Interior Department "announced a new partnership on Tuesday with outdoor retailer The North Face to promote the work of citizen conservation corps across the country." Through the partnership, North Face is "providing \$25,000 grants to four corps, which are part of the 21st Century Conservation Corps." The article notes that "the announcement is part of the Department of Interior's larger effort to attract private and corporate money to support getting more young people engaged in the outdoors and in conservation work."

Meanwhile, [Fast CoCreate](#) (9/29, 100K) reports that The North Face is "launching its first-ever global campaign, and is moving its lens from the land to focus on the people adventuring out in the world." According to the article, "created by agency Mekanism, the new commercial seamlessly moves from action sports to outdoor professionals like a photographer and marine biologist, all to spread the spirit of adventure."

Additional coverage was provided by the [Business Wire](#) (9/29), [MediaPost](#) (9/30, 5K), [CSR Wire](#) (9/30, 1K), and [Yahoo! Finance](#) (9/30, 5.57M).

SAGE GROUSE LANGUAGE DROPPED FROM NATIONAL DEFENSE AUTHORIZATION ACT. [E&E Publishing](#) (9/29, 705) reports that "lawmakers have agreed not to interfere with the Interior Department's management of the greater sage grouse in the final version of the National Defense Authorization Act." According to the article, "the conference committee's report drops language that had been included in the House version preventing Interior from listing the greater sage grouse under the Endangered Species Act for 10 years." Senate Armed Services Chairman John McCain said "during a news conference about the bill that Interior's decision earlier this month not to list the bird made dropping the House language 'more palatable because there is a commitment on the part of the administration to negotiate with the governors and the legislators in the respective states.'"

[Politico Pro](#) (9/29) reports that the Interior Department announced last week that the sage grouse does not require federal endangered species protections, but Sen. Jim Inhofe and House Natural Resources Chairman Rob Bishop "argued in a letter to Armed Services leaders last week that the language still should have been in the final bill."

Lawsuit Seeks To Block Sage Grouse Plan In Nevada. The [Greenwire](#) (9/29, Subscription Publication) reports that "a coalition of Nevada counties and mining companies that last week filed the first lawsuit challenging federal protection plans for the greater sage grouse is now asking a federal court to block the Obama administration from implementing them in the state." The 30-page motion "asks the U.S. District Court for the District of Nevada to issue a preliminary injunction barring the Bureau of Land Management and Forest Service from implementing the federal sage grouse plans in Nevada until the legal issues are resolved." Jessica Kershaw, an Interior spokeswoman, said "the agency cannot comment on pending litigation." However, "in an email, she said the federal grouse plans 'follow the best available science' and 'are both balanced and effective – protecting key sage-grouse habitat and providing for sustainable development.'"

Additional Coverage. Additional coverage of the sage grouse was provided by the [Salt Lake \(UT\) Tribune](#) (9/29, 492K), the [Grand Junction \(CO\) Daily Sentinel](#) (9/29, 73K), the [Denver \(CO\) Post](#) (9/29, 787K), the [Sidney \(MT\) Herald](#) (9/30, 10K), the [Mitchell \(SD\) Daily Republic](#) (9/30, 37K), the [Uintah Basin Standard \(UT\)](#) (9/30), [Platts](#) (9/30, 1K), the [WyoFile](#) (9/30), and the [WyoFile](#) (9/29).

NATIONAL GOVERNORS ASSOCIATION URGES CONGRESS TO REAUTHORIZE LWCF. [E&E Publishing](#) (9/29, 705) reports that the National Governors Association on Tuesday "urged congressional leaders to reauthorize the Land and Water Conservation Fund before it expires tomorrow night, marking the latest show of bipartisan support for the 50-year-old law." The governors "sent a letter to the leaders of the Senate Energy and Natural Resources and House Natural Resources committees, warning that expiration would create funding uncertainties for states that receive grant money from LWCF." The letter stated, "Governors have used LWCF matching grants through the state assistance program for decades to fund parks and other outdoor recreation initiatives, and this program has been an instrumental tool for states to address their conservation needs."

Additional coverage of the LWCF was provided by the [Boston \(MA\) Globe](#) (9/30, Tsongas, 1.1M), the [Tallahassee \(FL\) Democrat](#) (9/28, 146K), the [Huffington Post](#) (9/29, Thakar, 164K), [Maine Wire](#) (9/29), and [Think Progress](#) (9/29, 453K).

GOVERNMENT SHUTDOWN LIKELY AVERTED FOR NOW. [Politico Pro](#) (9/29) reports that "Congress is one step closer to dodging a government shutdown." According to the article, "on a 77-19 vote Monday night, the Senate advanced a short-term spending bill that will keep federal government agencies operating through Dec. 11, defusing the latest

shutdown scare powered by conservative rage against funding for Planned Parenthood – for now.” The article notes that “once the spending measure passes the Senate – likely sometime Tuesday – the House will quickly take up the bill and send it to President Barack Obama, just in time to avoid a government shutdown.” However, “the stopgap bill sets up an even bigger spending fight on Capitol Hill in December, when Democrats and Republicans will battle over a broader budget deal.”

Additional coverage of the potential shutdown was provided by the [Frederick \(MD\) News-Post](#) (9/30, Carignan, 78K).

SIGNING CEREMONY FOR MANHATTAN PROJECT PARK TO BE HELD NOVEMBER 10 IN DC. The [Oak Ridge \(TN\) Today](#) (9/30) reports that “the birthday of the Manhattan Project National Historical Park, which includes Oak Ridge, is now set for November 10, 2015.” Secretary of Interior Sally Jewell and Secretary of Energy Ernie Moniz “are scheduled to have a signing ceremony on Tuesday, November 10, in Washington, D.C.”

Additional coverage was provided by the [Oak Ridge \(TN\) Today](#) (9/30).

CALIFORNIA WILDERNESS COALITION DIVIDED ON REP COOK’S DESERT PROTECTIONS ALTERNATIVE. The [Victorville \(CA\) Daily Press](#) (9/29, Writer, 2K) reports that “working closely for nine months with Rep. Paul Cook’s office on draft legislation to safeguard the state’s desert regions, an official with the California Wilderness Coalition said recently the organization is split on Cook’s proposed alternative to Sen. Dianne Feinstein’s desert protections bill.” Monica Argandona said, “We are very happy that Congressman Cook is including all of the wilderness and rivers in his bill and included an addition to the Malpais Mesa wilderness that is not in Senator Feinstein’s bill, but is very threatened and especially worthy of a wilderness designation.” However, “Argandona, the coalition’s Southern California conservation director, also said the group was ‘disappointed’ Cook’s draft bill didn’t include all of the 21,000 acres of Castle Mountain as an addition to the Mojave National Preserve.”

UTAH LEGISLATORS HEAD TO DC TO PUSH FOR MONUMENT. The [Deseret \(UT\) News](#) (9/30, 407K) reports that Utah Sen. Jim Dabakis said “the ‘local’ process to garner land protections for areas like Bears Ears in southeastern Utah is not working so he and a group of Democratic legislators are headed to Washington, D.C., this week to encourage the Obama administration to use executive authority to declare the area a national monument.” the article notes that “Dabakis’ trip flies in the face of a three-year Public Lands Initiative process being shepherded by Reps. Rob Bishop and Jason Chaffetz, both R-Utah, that includes a national park and a national monument.” Dabakis “attacked the effort Tuesday.” He said, “Rep. Bishop has been seeking local input for two years, but he has only been talking to local county commissions. He has not been talking to the tribes; he has not been talking to people along the Wasatch Front; he has not been talking to the rest of America. He can’t even make a deal with his own local county commissions.”

AUTHOR SUGGESTS COMPROMISE IN DENALI NAMING CONTROVERSY. [Alaska Dispatch News](#) (9/29, 219K) reports that “author Ron Lizzi of Connecticut is proposing what he’s billing as a compromise to the disagreement over the name of North America’s tallest peak.” Interior Secretary Sally Jewell recently “replaced the name Mount McKinley with what many, but not all, Alaskans have long called it: Denali.” Lizzi “suggests calling the South Peak, elevation 20,310 feet, McKinley Peak, but leaving the name of the mountain Denali.”

SUMMIT ON CONTROL OF PUBLIC LAND HELD IN NEVADA. The [Eiko \(NV\) Daily Free Press](#) (9/30, 22K) reports that Nevada Lt. Gov. Mark Hutchison said Tuesday “it’ll be important for ranchers, miners, power companies and recreational users to keep building momentum if they want states to gain control over vast Western rangeland currently managed by the federal government.” Hutchison “convened a meeting about public lands promising a push to acquire some of the more than 85 percent of Nevada currently administered by federal agencies including the military, forest service, park service and the Bureau of Land Management.” He said, “Western states are going to have to collaborate and bring a lot of pressure on Congress, because nothing happens in Congress without a lot of pressure.”

Additional coverage was provided by the [Las Vegas \(NV\) Sun](#) (9/29, 199K).

SECRETARY JEWELL TALKS ABOUT INFLUENCE OF THE ARTS ON HER LIFE. On the website of the [National Endowment For The Arts](#) (9/29), Interior Secretary Sally Jewell discussed “the role of the arts in her life.”

Additional coverage was provided by the [Playbill](#) (9/30, 27K).

REP. KIND PRAISED FOR SUPPORTING ENVIRONMENT. In an op-ed for the [La Crosse \(WI\) Tribune](#) (9/29, 87K), Vicki Burke, a La Crosse County Board supervisor, praises Rep. Ron Kind for working to protect the outdoors. Kind has “introduced the bipartisan Sportsmen’s Conservation and Outdoor Recreation Enhancement Act.” And “several weeks ago, Kind brought Secretary of the Interior Sally Jewell to tour part of the Upper Mississippi River National Fish and Wildlife Refuge.”

Empowering Native American Communities:

MONTANA, VIRGINIA TRIBES PUSH FOR FEDERAL RECOGNITION. The [AP](#) (9/30, 2.28M) reports that “seven Native American tribes in Montana and Virginia made their case Tuesday before a congressional panel to grant them federal recognition that would give them tribal sovereignty and make them eligible for U.S. government benefits from education to health care.” According to the article, “the hearing before the House Subcommittee on Indian, Insular and Alaska Native Affairs was on legislation sponsored by U.S. Rep. Ryan Zinke, R-Montana, and U.S. Rep. Robert Wittman, R-Virginia.” The article notes that “if they pass, the bills would make the members of the seven tribes eligible for government services and benefits from the U.S. Interior Department and its Bureau of Indian Affairs, whether or not they have tribal reservations.”

JUDGE SIDES WITH BIA IN DECISION TO TAKE LAND INTO TRUST FOR ENTERPRISE RANCHERIA OF ESTOM YUMEKA MAIDU. The [Courthouse News](#) (9/29, 7K) reports that “the small Estom Yumeka Maidu Tribe can build a casino in a neighboring county after a federal judge rejected challenges brought by neighbors, including other tribal casinos.” U.S. District Judge Troy Nunley “sided with the Department of the Interior and the Bureau of Indian Affairs in their decision take 40 acres of land into trust for the Enterprise Rancheria of Estom Yumeka Maidu to build a 105,750-square-foot Class II casino in Yuba County.” Nunley “determined that government fulfilled its duties under the National Environmental Policy Act by considering a reasonable number of alternative sites for the casino before granting approval.”

FEDERAL JUDGES UPHOLD LAND TRUST DECISION IN FAVOR OF GRAND TRAVERSE BAND OF OTTAWA AND CHIPPEWA INDIANS. The [Traverse City \(MI\) Record-Eagle](#) (9/30, 70K) reports that “federal administrative judges upheld a decision to place a parcel of Acme Township land into a tax-exempt trust on behalf of the Grand Traverse Band of Ottawa and Chippewa Indians.” According to the article, “the order from a pair of Department of Interior judges issued this week comes after Grand Traverse County officials in 2013 formally challenged a decision by federal officials to place the land into trust.”

OBAMA ADMINISTRATION PRAISED FOR WORK ON NATIVE AMERICAN ISSUES. In a piece that appears in the [Bethel \(AK\) Delta Discovery](#) (9/23, 14K), Gloria Simeon writes that “because of President Obama and his cabinet appointees, in particular, Secretary Sally Jewell, our tribes have gained attention and recognition from the highest level possible.” She provides examples including “the annual gathering of nations, hosted by the White House for 6 years now, the youth conference held in July and most recently, a trip to Alaska by the President himself.”

Tackling America’s Water Challenges:

ELSINORE VALLEY MUNICIPAL WATER DISTRICT RECEIVES \$115,000 IN WATERSMART FUNDING. The [Fallbrook \(CA\) Valley News](#) (9/30, 1K) reports that “to further foster water supply planning efforts and engage community stakeholders in preparation for drought emergencies in the future, Elsinore Valley Municipal Water District received \$115,000 to expand its drought contingency plan.” According to the article, “the funding, which was made available through the U.S. Department of the Interior Bureau of Reclamation, will allow EVMWD to address several factors to sustain water supply security and reliability within the region over the next several years.” The article notes that “the grant was received through the Department of the Interior’s WaterSMART Program, which focuses on improving water conservation and sustainability, while helping water resource managers make sound decisions about water use.”

GROWERS IN ROZA IRRIGATION DISTRICT GET AN EXTRA WEEK OF WATER. The [Yakima \(WA\) Herald-Republic](#) (9/30, 92K) reports that “the water will stay on one week longer than expected for growers served by the Roza Irrigation District, the Bureau of Reclamation said on Tuesday.” According to the article, “the district, which has junior water rights and received 47 percent of its normal allocation this season, had planned to shut down its system on Oct. 5 but it ended up having enough water to stay on until Oct. 12.”

KITTITAS RECLAMATION DISTRICT IRRIGATORS TO GET A LITTLE MORE WATER. The [Ellensburg \(WA\) Daily Record](#) (9/30, 16K) reports that the BOR has “informed the Kittitas Reclamation District that a small amount of irrigation water will be available to the district between Oct. 1 and Oct. 15.” KRD officials said “the countywide irrigation system is being readied for the small flow that will only be available to those KRD customers who haven’t used up their annual allotment (as set earlier this year) when the district shutdown in early August because of drought conditions.”

Securing America’s Energy Future:

Renewable Energy:

OBAMA ADMINISTRATION PROMOTES OFFSHORE WIND DEVELOPMENT. The [ClimateWire](#) (9/29, Subscription Publication) reports that "the Department of Energy has awarded around a half-million dollars to New York, Maine, Rhode Island and Massachusetts state organizations to cooperate on scaling up the offshore wind industry in the region." Also, the BOEM has "begun organizing a multilateral group to collect and share expertise on offshore wind regulations and technology from industry leaders in Germany, Denmark and the United Kingdom." According to the article, "experts from abroad and from the United States shared strategies on scaling up the industry at a hearing held by the Environmental and Energy Study Institute."

Additional coverage was provided by [Renewable Energy News Europe](#) (9/30), [North American Windpower](#) (9/30, 43K), and the [Scientific American](#) (9/30, Von Kaenel, 2.99M).

ADDITIONAL COVERAGE INTERIOR TO HOLD OFFSHORE WIND AUCTION FOR 344,000 ACRES OFF NEW JERSEY. Additional coverage that the Interior Department will hold an offshore wind auction for 344,000 Acres off the New Jersey coast was provided by [POLITICO New York](#) (9/30, 51K), the [Windpower Engineering & Development](#) (9/30), the [Aberdeen \(NJ\) Independent](#) (10/1, 2K), and the [Old Bridge \(NJ\) Suburban](#) (10/1, 35).

Onshore Energy Development:

BLM PROPOSES UPDATES TO REGULATIONS ON HOW DRILLING COMPANIES MEASURE CRUDE PRODUCTION. The [Greenwire](#) (9/29, Subscription Publication) reports that the BLM is "proposing updates to how drilling companies measure the oil they produce from federal and tribal lands, an effort to ensure taxpayers receive every royalty dollar they're due." The BLM will "post the proposed rule in tomorrow's Federal Register, kicking off 60 days of public comment." According to the BLM, "the rule would replace regulations last updated in 1989 and reflects considerable changes in technology and industry practices."

Additional coverage was provided by the [Wyoming Business Report](#) (9/30, 24K).

BLM ISSUES FINAL MINERAL COST RECOVERY FEE. The [Dickinson \(ND\) Press](#) (9/30, 1K) reports that the BLM "issued a final rule Tuesday implementing the required annual adjustment to the fee schedule for mineral cost recovery projects, according to a statement." It will become effective Thursday.

WILDEARTH GUARDIANS CHALLENGES VALIDITY OF MINING PLANS IN THREE STATES. The [Craig \(CO\) Daily Press](#) (9/29, 10K) reports that WildEarth Guardians' "most recent foray into the courtroom — strikingly similar to the one that threatened to halt operations at Colowyo Coal Mine — challenges the validity of mining plans in three states." According to the article, "filed in the U.S. Court for the District of Colorado on Sept. 15, Guardians alleges the Office of Surface Mining Reclamation and Enforcement did not apply federal law when recommending the approval of mining plans in Colorado, Wyoming and New Mexico." The article notes that "a national assessment could set a bar for the approval of any mining operations anywhere in the U.S., leading to a more robust evaluation before mining plan approval."

CANCELLATION OF SOLENEX LEASE WOULD TRIGGER "TAKINGS" CASE. The [Fairfield \(MT\) Sun Times](#) (9/30) reports that "as Judge Richard Leon of the United States District Court for the District of Columbia as well as the attorneys involved prepare for the next hearing set for October 6, the question that has not been answered — or even asked — is 'what happens if the Solenex lease is cancelled?'" According to the article, "even though the Secretary of Interior Sally Jewell may cancel the lease it would go before the U.S. Congress." And "if the Congress were to cancel the lease, an entirely different legal process would be triggered: a 'Takings' case."

TOUGH GLOBAL MARKET FOR COAL HITS TWO PROPOSED MINES IN ALASKA. [Alaska Dispatch News](#) (9/29, 219K) reports that "a sagging global coal market is dragging down prospects for two proposed mines in Southcentral Alaska." According to the article, "both the Chuitna and Wishbone Hill coal projects are intended to profit off coal consumption in Asia, but formerly promising markets in China, Japan and South Korea have slumped amid stricter pollution controls, cheaper natural gas, a slowdown in manufacturing and an oversupply of coal."

PENNSYLVANIA TO MONITOR SEISMIC ACTIVITY. The [Pittsburgh Tribune-Review](#) (9/30, Parrish, 296K) reports that the Pennsylvania Department of Conservation and Natural Resources and the Department of Environmental Protection announced on Tuesday it will install a system to monitor seismic activity across the state to gather real-time information "for all DEP decisions, not just oil and gas." The Tribune-Review notes that "the state has not had earthquakes connected to fracking or the deep wastewater injection wells blamed for tremors" in other states.

Offshore Energy Development:

CONTINUING COVERAGE SHELL HALTS ARCTIC OIL EXPLORATION. Royal Dutch Shell's announcement that it is halting its oil exploration in the Alaskan Arctic "for the foreseeable future" due to disappointing results from a test well in the Chukchi sea continues to receive significant media coverage. The [AP](#) (9/30, 962K) reported that Shell "spent more than \$7 billion on Arctic offshore development in the Chukchi and Beaufort seas and was dogged at every regulatory level by environmental groups." Environmentalists "said Tuesday that they will seize the opportunity to seek an end to all drilling in the region," the AP reports, but while Shell's decision "is a definite setback for oil companies, it does not mean offshore drilling is dead or that the Arctic Ocean has any greater protection now than it had last week."

[Inside Climate News](#) (9/29) examines the highs and lows of Shell's Arctic drilling program and includes a timeline of the events.

Alaska Reacts To Shell Decision. [E&E Publishing](#) (9/30, 705) reports that Shell's decision "shocked and angered Alaska state officials and Native group leaders who have been among the oil giant's most vocal supporters." Alaska House Speaker Mike Chenault (R) "spoke for many state oil supporters in describing Shell's decision as 'a punch in the gut.'"

The [Houston Chronicle](#) (9/29, 2.28M) reported that Shell's decision "shuts down an easy fix" for the Trans-Alaska Pipeline System, which is carrying about a quarter of the 2 million barrels of crude a day it was built to carry. The smaller amount is problematic as oil in the pipeline moves slower and gets colder as the pipeline carries less oil. The Trans-Alaska Pipeline "lays a critical role for...ConocoPhillips and Hilcorp, along with BP," which are extracting oil on the North Slope. Alaska Gov. Bill Walker "described the situation as urgent," saying Monday, "We need to get some oil in the pipeline. ... We need to do it as quickly as possible." [Fortune](#) (9/29, 4.14M) adds that Walker "has even suggested that the federal government allow natural gas drilling in the Arctic National Wildlife Refuge."

[The Guardian \(UK\)](#) (9/29, 3.3M) reported that "some Alaskans expressed dire worries about the ripple effect" of Shell's decision "on the state's oil-dependent economy, which has already suffered a blow from low oil prices." Meanwhile, "others saw the move as a reprieve for the state's fragile northern ecosystem that many Alaska Native communities rely on for food."

[Alaska Dispatch News](#) (9/29, DeMarban, 219K) reported that despite Shell's departure, "the call for new icebreakers and the region's first deep-water port isn't diminishing." Shell's 30 ships this summer "provided an added measure of safety that will be gone next year, but international traffic is expected to continue rising even in the oil giant's absence, said Reggie Joule, mayor of the Northwest Arctic Borough." Without Shell, "the region is more at risk of a dangerous oil spill or a life-threatening tragedy at sea, he argued."

On its website, the [Alaska Public Radio Network](#) (9/29, 2K) reported on this week's Arctic Energy Summit in Fairbanks, which drew representatives from Canada, Russia, Iceland, Finland and Norway. Shell's announcement "has hovered at the edge of the proceedings — organizer Nils Andreassen of the Institute of the North asked for a moment of silence Monday morning to 'recognize the complexities' of operating in the region." However, Andreassen said, "This is still the decade of the Arctic. ... Whether Shell is here or not. I think you had President Obama in the state for a reason, and an attention to the Arctic by the U.S. that we've never seen before. And I don't think that's going away."

[KATN-TV](#) Fairbanks, AK (9/29, 5 05 a.m. AKDT, 1K), [KJUD-TV](#) Juneau, AK (9/29, 5 05 p.m. AKDT, 617), and [KTVE-TV](#) Fairbanks, AK (9/29, 11:28 a.m. AKDT, 76) also broadcast coverage of the story.

Oil Prices Considered As Possible Influence On Shell's Decision. On its website, [CNBC](#) (9/30, 1.79M) reported that "several big oil players have pulled back from the Arctic following a slump in oil prices that has seen the cost of a barrel of crude tumble to below \$50 by January 2015 from \$110 in June 2014." Shell "insisted on Monday that its reasons for pulling out of the Arctic were 'purely technical' and did not reflect either pressure from weak prices or fears of repercussions from any oil spill in a fragile environment.... However, energy analysts said that oil prices would have played a role in the decision, with some also citing concerns about lawsuits from environmental groups and the burden of increasing federal regulations."

[Wired](#) (9/29, 4.12M) added "don't give the environmentalists all the credit (or blame)," reporting that "where 2008 was a great year to start drilling, 2015 is a great year to quit," as oil has fallen below \$50 a barrel. On its website, the [CBC](#) (9/30, 225K) adds that "for the time being, analysts say oil and gas companies are more likely to stick with what works — shunning risky exploration on 'the frontier' in favour of established sources like the Alberta oilsands and the Mideast."

In contrast, Ken Silverstein of [Forbes](#) (9/29, 7.42M) said that at least one analyst "says cheap oil has little to do with Royal Dutch Shell's decision to temporarily discontinue operations.. because it would have been a long-term endeavor — 10 years or more — and that oil prices would certainly rise by then." Silverstein said that "instead, it has more to do with the associated resource finding, which is natural gas that is uneconomical at present to bring to market."

The [Seattle \(WA\) Weekly](#) (9/29, 208K) reported that if low oil prices are the cause of Shell leaving the Arctic, "it should temper some excitement about Shell's decision" because "when it comes to climate change, it doesn't matter whether oil is pulled out of the Chukchi Sea in Alaska or the Bakken formation in North Dakota," adding "carbon is carbon."

Difficulties Of Drilling Discussed. Fuel Fix (9/29, 7K) reported that Shell "is far from alone in making a big bet on an offshore play only to end up with disappointing results," as "from the Gulf of Mexico to the shores of Angola, offshore exploration has yielded plenty of dry holes." Said Dave Pursell with Tudor Pickingering Holt & Co, "It's hard to find oil and gas — that's the bottom line. ... It doesn't matter how much technology you throw at it, you have to put a drill bit in to see what's there."

[Alaska Dispatch News](#) (9/29, Rosen, 219K) reports that Shell leaving is "the latest in a long series of dashed dreams for offshore oil development in the U.S. Arctic." The article looks at earlier attempts to drill offshore in the Arctic, such as BP's "notorious Mukluk flop" in the 1980s, and also examines some of the challenges potential offshore drillers face.

Additional Coverage. Additional coverage was provided by the [Kenai \(AK\) Peninsula Clarion](#) (9/30, 18K), [TIME](#) (9/29, 19.55M), [T ME](#) (9/30, 19.55M), the [Sacramento \(CA\) Bee](#) (9/29, 535K), the [Quincy \(IL\) Herald-Whig](#) (9/30, 99K), [UPI](#) (9/29), [Yahoo! News](#) (9/30, Joling, 5 98M), [Yahoo! Finance](#) (9/29, 5.57M), [Common Dreams](#) (9/29, 12K), and [ENews Park Forest](#) (9/30, 2K).

BILL THAT WOULD UNDO OIL REVENUE SHARING PLAN CRITICIZED. In a piece for the [New Orleans Times-Picayune](#) (9/30, 718K), Jarvis DeBerry writes that "Louisiana has not been compensated for the destructive side effects of oil-and-gas exploration." He notes that "there are some politicians — and their ranks seem to include President Barack Obama — who stand opposed to a law that promises to give Louisiana a fraction of oil-and-gas exploration royalties that the feds are now taking in whole." As of Tuesday, a "clean energy" bill that would "undo a plan that would give Gulf Coast states a share of off-shore drilling revenue had 30 sponsors, all of them Democrats or independents who vote with Democrats." According to DeBerry, "it's not just the bill that needs to be defeated, it's the mindset behind it: a mindset that ignores the losses Louisiana has suffered over the decades and characterizes the state's demand for compensation as a money grab."

America's Great Outdoors:

Bureau of Land Management:

BLM'S CONDITIONS COMPLICATE SALE OF OREGON PARK TO GOLF COURSE. The [Greenwire](#) (9/29, Subscription Publication) reports that "an Oregon developer hoping to buy state parkland to build a golf course must pay about \$450,000 more under conditions imposed by the Bureau of Land Management." Developer Mike Keiser is "seeking to buy a 280-acre portion of the Bandon State Natural Area, but the deal to turn the land over to his company, Bandon Biota LLC, may face complications from the new conditions."

Additional coverage was provided by the [Bend \(OR\) Bulletin](#) (9/30, 94K), the [Houston \(TX\) Chronicle](#) (9/30, 2.28M), the [Washington \(DC\) Times](#) (9/30, House, 344K), and [WRAL-TV Raleigh \(NC\)](#) Raleigh, NC (9/30, 193K).

CEMEX APPEALS DECISION TO CANCEL SOLEDAD CANYON MINING CONTRACTS. The [Santa Clarita Valley \(CA\) Signal](#) (9/30, 23K) reports that "Cemex has appealed last month's Bureau of Land Management decision to cancel its mining contracts in Soledad Canyon, a spokeswoman for the BLM said Tuesday." Martha Maciel, deputy state director for the BLM's office of communications, said, "The appeal was filed with the Interior Board of Land Appeals, who now has jurisdiction over the case." According to the article, "in a statement released Tuesday, Cemex accused the BLM of an 'improper decision' and 'arbitrary actions,' noting the company has devoted 'considerable time' and money working with stakeholders over the past several years for a resolution to the dispute between the mining firm and the community opposed to the mine."

Additional coverage was provided by [KHTS-AM Santa Clarita \(CA\)](#) Santa Clarita, CA (9/30, 2K).

BLM PREPARING FOR SODA FIRE REHABILITATION. [KTVB-TV](#) Boise, D (9/29, 191K) reports that the BLM is "putting together a rehabilitation plan for land burned by the Soda Fire." According to the article, "crews at the BLM's regional seed warehouse in Boise are loading up trucks with hundreds of thousands of pounds of seed to rehab the area." The article notes that "the planting process will take several months and is expected to start in the next week or so." BLM spokesperson Jessica Gardetto said, "We immediately need to get into those areas and stabilize them, make sure we don't lose some of that valuable soil from erosion and then start planting seed as soon as possible so that we can combat any invasive weeds that may come in."

OPPONENTS OF WILD HORSE ROUNDUP CRITICIZED. In an editorial, the [Fort Morgan \(CO\) Times](#) (9/30, 3K) supports a roundup by the BLM that is "attempting to remove 167 excess horses from the more than 500 estimated to roam on BLM land in Rio Blanco County near Meeker." The paper acknowledges that "while it may be heart-wrenching to consider these wild animals are having their freedom curtailed," it questions "what are the options?" The editorial says that "the government should continue to explore ways to make fertility control a viable option." However, it concludes that "until a better system is developed, the only method that seems to be humane and effective as a management tool is roundups."

Fish and Wildlife Service:

GOVERNORS WANT SPECIES DELISTING PROCESS TO BE MORE PREDICTABLE. The [AP](#) (9/30, Gruver) reports that "the process of removing Endangered Species Act protections from recovered species should be made more straightforward and predictable not only for the benefit of business but of animals and plants still imperiled," Wyoming Gov. Matt Mead and Montana Gov. Steve Bullock told a subcommittee of the U.S. Senate Environment and Public Works Committee on Tuesday. Republican committee members "suggested changes to the law, such as requiring states to agree to endangered species listings, might be in order." FWS Director Dan Ashe testified that "providing enough funding for Fish and Wildlife would do the most good for the Endangered Species Act."

Additional coverage was provided by the [Casper \(WY\) Star-Tribune](#) (9/30, 115K), the [Houston \(TX\) Chronicle](#) (9/30, 2.28M), the [Washington \(DC\) Times](#) (9/30, Gruver, 344K), and the [Flathead \(MT\) Beacon](#) (9/29, 15K).

HOUSE DEMOCRATS ASK OBAMA TO VETO BILLS WITH ANTI-ESA RIDERS. The [E&E Daily](#) (9/29, Subscription Publication) reports that House Natural Resources ranking member Raúl Grijalva and "91 other Democrats yesterday called on President Obama to block any legislation that would weaken the Endangered Species Act." The letter "raised particular concerns about the stalled Interior-U.S. EPA appropriations bill (H.R. 2822)." The article notes that "in addition to provisions that would affect the greater sage grouse, northern long-eared bat and certain gray wolf populations, measures added on the House floor 'include language detrimental to the survival and recovery of the Sonoran Desert tortoise and several species of freshwater mussels,' they wrote."

Congress Urged To Stop Assault On Endangered Species Act. For "The Blog" of the [Huffington Post](#) (9/29, Clark, 164K), Jamie Rappaport Clark, President & CEO, Defenders of Wildlife, writes that "since January, over 80 legislative proposals have been proposed in Congress to dramatically reduce protections for imperiled wildlife protected under the Endangered Species Act." But Clark claims that "Congressional action is directly contradicting public opinion." She notes that "a nationwide poll released this summer found an overwhelming majority of Americans, 90 percent of the registered voters polled, support the Endangered Species Act." She urges Congress to "remember where the public stands on these issues and represent their constituents instead of special interests."

FWS PROPOSES PROTECTIONS FOR SPECIES FOUND IN HAWAII, GUAM, COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS. The [AP](#) (9/30, 2 28M) reports that the FWS "wants to add 49 species from Hawaii to the Endangered Species Act." The FWS also said Tuesday that "it wants to list 23 species of plants and animals on Guam and the Commonwealth of the Northern Mariana Islands as threatened or endangered."

Additional coverage was provided by the [Washington \(DC\) Times](#) (9/30, 344K), the [Pacific News Center](#) (9/30), [KITV-TV Honolulu \(HI\)](#) Honolulu (9/30, 44K), and [KUAM-TV Dededo \(GUM\)](#) Dededo, GUM (9/29, 171).

FWS MOVES TO EXTEND PROTECTIONS FOR FOUR SOUTHERN FLORIDA PLANTS. The [Greenwire](#) (9/29, Subscription Publication) reports that the FWS has "moved to extend Endangered Species Act protections to four southern Florida plants that are under threat from development and the effects of climate change." The service "called for adding a shrub, the Big Pine partridge pea, and two herbs, wedge spurge and sand flax, to the endangered species list because the plants are in danger of becoming extinct." The agency's "proposal also said another shrub, the Blodgett's silverbush, is likely to become endangered in the foreseeable future and therefore should be added to the threatened species list."

FWS PROPOSES TO LIST EASTERN MASSASAUGA RATTLESNAKE. [The Hill](#) (9/30, Devaney, 471K) reports that the FWS is "proposing new protections" for the eastern massasauga rattlesnake. The snake would be "listed as a threatened species under the agency's proposal."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (9/30, 2 28M), the [Washington \(DC\) Times](#) (9/30, 344K), and the [Lodi \(WI\) Enterprise](#) (9/30).

GRANTS ANNOUNCED FOR MONARCH BUTTERFLY PROTECTION. The [St. Louis Post-Dispatch](#) (9/29, 968K) reports that "a consortium that includes Monsanto and the

National Fish and Wildlife Foundation announced Monday the first grants to improve monarch butterfly habitat on 33,000 acres in the United States." The article notes that "matching funds will come from the U.S. Fish and Wildlife Service, the city of St. Louis, the Missouri Department of Conservation, Great Rivers Greenway, the St. Louis Zoo, and the Missouri Botanical Garden." According to the NFWF, "the consortium will give a total \$3.3 million for the grants, and they will be matched by \$6.7 million in grantee contributions."

Additional coverage of the effort to save monarchs was provided by the [Christian Science Monitor](#) (9/29, 455K), the [Dispatch Times](#) (9/30), and the [Examiner](#) (9/30, 1.34M).

DEATH OF CECIL THE LION PUTS SPOTLIGHT ON SPORT HUNTING, POACHING. The [Stanford University \(CA\) Daily](#) (9/29, 1K) reports that "when Cecil the lion was killed illegally this summer, it brought the international spotlight on the issues of sport hunting and poaching in Africa." According to the article, "scholars and conservationists like David J. Hayes J.D. '78, a distinguished visiting lecturer in law at Stanford Law School, have urged the U.S. government to take action." Hayes has "joined the collection of voices pointing out that the killing of Cecil is part of a larger problem." Hayes believes "hunting must be compatible with the health of the species and that there are steps the American government can take to discourage trophy hunting."

Additional coverage of the debate over trophy hunting was provided by the [Huffington Post](#) (9/29, Clark, 164K).

US, DOMINICAN EXPERTS WORK TO PROTECT BICKNELL'S THRUSH. The [Dominican Today](#) (9/30) reports that "environment Ministry officials on Tuesday met with a high-level mission of the US Fish and Wildlife Service to coordinate actions to protect the migratory bird Bicknell's Thrush which is in danger of extinction and a resource that both countries share." According to the article, "the meeting at Environment headquarters was headed by US Fisheries Service regional director Cindy Dohner and Protected Areas and Biodiversity deputy minister Daneris Santana, who said among the actions to protect the migratory species figure construction of new watchtowers, more park rangers in areas where the bird winters and continued research and analysis of its habits." The article notes that "as part of the joint strategy to protect Bicknell's Thrush the experts will tour the bird's ranges starting Wednesday, and promote it as an attraction for birdwatchers and those who enjoy ecotourism adventures."

NEW MEXICO WILDLIFE PANEL DENIES FEDERAL WOLF PERMIT APPEAL. The [AP](#) (9/30, 2.28M) reports that "a showdown over the Mexican gray wolf left the federal government vowing Tuesday to move ahead with plans to recover the endangered species despite the refusal of state wildlife officials to issue permits allowing for the release of wolves in New Mexico." The New Mexico Game Commission "denied an appeal" by the FWS "during a packed meeting in Albuquerque." The decision "prompted a chorus of boos from the dozens of people in the audience who were holding signs that read 'More wolves, less politics.'" Officials with the FWS said "they were disappointed with the outcome given that delaying releases could compromise the genetics of the wild population in New Mexico and Arizona."

Additional coverage was provided by the [Arizona Daily Sun](#) (9/30, 34K), the [Albuquerque Journal](#) (9/30, 259K), the [Las Cruces \(NM\) Sun-News](#) (9/29, 47K), the [Farmington \(NM\) Daily Times](#) (9/29, 44K), the [Washington \(DC\) Times](#) (9/30, Bryan, 344K), and the [Santa Fe \(NM\) Reporter](#) (9/30, 69K).

FEDERAL AGENCIES WANT GENERAL ELECTRIC TO CONTINUE CLEANING UP ITS HUDSON RIVER POLLUTION. [International Business Times](#) (9/30, 835K) reports that "two federal agencies on Tuesday requested that the Obama administration postpone General Electric's plan to end its cleanup of the Hudson River without removing all the related pollution." According to the article, "while GE has said it is satisfied with its cleanup and is consequently shuttering its dredging operations this year, the Department of the Interior and the National Oceanic and Atmospheric Administration (NOAA) said in a letter that GE's current plan would leave fish in the river 'unacceptably contaminated' with the toxic chemicals called PCBs that the company spewed into the river decades ago." Following the letter, "the Environmental Protection Agency announced that it is extending the period of time the public can comment on General Electric's decommissioning plan."

Additional coverage was provided by the [AP](#) (9/30, Hill, Press, 5.98M) and the [Albany \(NY\) Times Union](#) (9/30, 530K).

APPEAL COURT HEARS ARGUMENTS IN UTAH PRAIRIE DOG CASE. The [AP](#) (9/30, 2.28M) reports that "a lawyer for the U.S. Fish and Wildlife Service told an appeals court Monday that a federal judge in Utah went too far when he struck down protections for a kind of prairie dog found only in that state." Attorney Anna Katselas asked the 10th U.S. Circuit Court of Appeals "to overturn the decision and restore protection for the prairie dogs under the Endangered Species Act." However, "Jonathan Wood, an attorney for residents of Cedar City, Utah, who challenged the prairie dog rules, argued the federal government has no constitutional authority to protect a species found in only one state."

TWO GROUPS FILE LAWSUIT OVER LEAVENWORTH FEDERAL FISH HATCHERY. The [AP](#) (9/30, 2.28M) reports that "two conservation groups have sued the U.S. Fish and Wildlife Service, alleging its fish hatchery near Leavenworth violates federal clean-water rules." The Wild Fish Conservancy and the Center for Environmental Law & Policy claim "the hatchery is discharging pollutants into nearby Icicle Creek without a necessary permit and that it has not had a permit for 35 years, in violation of federal laws clean-water." They also allege "the hatchery releases chemicals, phosphorus, antibiotics and other pollutants into the waters."

BALD EAGLE SHOT AND KILLED NEAR STATE PARK IN NEW YORK. [USA Today](#) (9/29, 5.23M) reports that "a bald eagle was shot and killed this month near a state park in Chenango Forks, according to the U.S. Fish and Wildlife Service." The service is "offering a \$2,500 reward for information leading to an arrest and conviction." According to the FWS, "the mature bald eagle was found dead in Chenango Valley State Park on Sept. 19."

Additional coverage was provided by the [Syracuse \(NY\) Post-Standard](#) (9/30, 510K), the [Greater Binghamton \(NY\) Press & Sun-Bulletin](#) (9/29, 81K), and [WBNB-TV Binghamton \(NY\)](#) Binghamton, NY (9/30, 10K).

FORMER PH.D STUDENT AT THE UNIVERSITY OF MINNESOTA SUES OVER SEXUAL HARASSMENT. The [Minneapolis Star Tribune](#) (9/30, 1.19M) reports that a "2011 incident is one of a series recounted in a sexual harassment lawsuit" by Stephanie Jenkins, a former Ph.D. candidate, against the University of Minnesota, and Ted Swem, the endangered-species branch chief at the FWS in Fairbanks, Alaska, is "scheduled to go to trial in federal court Nov. 2." Swem "denies he sexually harassed her, and the U says Swem was not a university employee, but U.S. District Judge John Tunheim this month rejected a motion to dismiss the suit."

National Park Service:

PROPOSALS BY NPS UPSET ASSATEAGUE ISLAND NATIONAL SEASHORE'S NEIGHBORS. The [Greenwire](#) (9/29, Subscription Publication) reports that "residents living near Virginia's Assateague Island National Seashore are frustrated by a pair of federal proposals to slowly eliminate the local fishing industry and relocate an eroding beach a mile and a half north." Jack Tarr, "mayor of Chincoteague Island for the past 17 years, worries that moving the beach north on Assateague Island could cut off tourism, and that ending commercial fishing of clams and oysters would eliminate part of the area's economy and heritage." Debbie Darden, superintendent of the Assateague Island National Seashore, said the NPS is "trying to enforce federal law that forbids the kind of oyster and clam 'farming' practiced by commercial fishermen in the national park – something the agency has admittedly never done."

Additional coverage was provided by the [Washington Post](#) (9/29, Shapira, 6.76M).

C& O CANAL NATIONAL HISTORIC PARK AMONG RECIPIENTS OF GRANTS FOR MARYLAND TRAIL PROJECTS. The [Baltimore Sun](#) (9/29, 834K) reports that "bicycle and pedestrian trails will be the primary beneficiaries of \$14.9 million in grants by the Maryland Department of Transportation, Gov. Larry Hogan announced Tuesday." The article notes that "the largest grants, totaling \$7 million, will go to the C&O Canal Aqueduct at Williamsport in Washington County." The funds will go to the NPS and its C&O Canal National Historic Park for "repairing a wall of the historic aqueduct to let it hold water again as well as other improvements."

GROUP SEEKS REVIEW OF MINING SITE NEAR TEDDY ROOSEVELT'S ELKHORN RANCH. The [AP](#) (9/30, 2.28M) reports that "an environmental group filed a federal lawsuit Tuesday against the U.S. Forest Service over the agency's decision to allow a man to mine gravel near former President Theodore Roosevelt's historic western North Dakota ranch." The lawsuit filed by the National Parks Conservation Association in U.S. District Court in Washington, D.C., contests "the Forest Service's decision to issue the mining permit." The suit "requests a more thorough analysis of how the proposed 25-acre gravel pit could affect Roosevelt's Elkhorn Ranch, located within the Theodore Roosevelt National Park, and park visitors."

Additional coverage was provided by the [Grand Forks \(ND\) Herald](#) (9/30, 100K) and the [Daily Mail \(UK\)](#) (9/30, 5.59M).

ARCHAEOLOGISTS MAPPING REVOLUTIONARY WAR SITE. The [AP](#) (9/30, 2.28M) reports that "archaeologists using 21st-century technology are mapping out the exact spots British soldiers and Colonial militiamen were standing as they fired at each other during a pivotal skirmish on the first day of the American Revolution." Parker's Revenge, "as the fight is known, occurred on April 19, 1775, after the battles of Lexington and Concord as the redcoats retreated to Boston." The nonprofit Friends on Minute Man National Park is "financing the project in a partnership with the National Park Service."

Additional coverage was provided by the [Boston \(MA\) Herald](#) (9/30, 548K), the [Washington \(DC\) Post](#) (9/30, Mark Pratt |, Ap, 6.76M), and the [Washington \(DC\) Times](#) (9/30, Pratt, 344K).

TWO MEN INVOLVED IN SHOOTING BY NPS RANGER SEEK DAMAGES. The [Spokane \(WA\) Spokesman-Review](#) (9/29, 183K) reports that "two men involved in a shooting

million, according to their civil lawsuit." Michael Franklin, attorneys for the two, said "medical records prove the pair weren't drunk when approached by National Park Service rangers prior to a shooting in September 2013."

OLYMPIC NATIONAL PARK REMOVING BOULDERS OUT OF ELWHA RIVER TO EASE WAY FOR FISH PASSAGE. The [Peninsula \(WA\) Daily News](#) (9/30, 41K) reports that "several large boulders in the Elwha River channel just downstream of the Glines Canyon are being removed to ease fish passage." The NPS has "contracted Sealaska Constructors LLC to remove the boulders, said Barb Maynes, Olympic National Park spokeswoman." According to the article, "workers have detonated three controlled blasts to date, with at least one additional explosion still to come, she said, adding that the contract is included in the \$325 million Elwha River Restoration project cost."

WORKERS REPAIRING BREAK IN WATER PIPELINE IN GRAND CANYON. The [AP](#) (9/30, 2.28M) reports that "another break in the pipeline in Grand Canyon National Park means several areas below the North Rim will temporarily be without drinking water pending repairs." Park officials said Tuesday that "repairs should be completed by the end of the week if the work goes smoothly."

YELLOWSTONE GIANT GEYSER ERUPTS FOR NEARLY AN HOUR. The [AP](#) (9/30, 2.28M) reports that "one of Yellowstone National Park's largest geysers shot to life early Monday morning, an eruption that would have occurred in the dark if not for a full moon." According to the article, "a park webcam captured Giant Geyser blowing steam and water into the air at about 5:03 a.m. and lasting for nearly an hour."

FEES AT BANDELIER NATIONAL MONUMENT TO INCREASE. The [Albuquerque \(NM\) Journal](#) (9/30, 259K) reports that "fees to enter Bandelier National Monument are going up." According to the park, "the increases will be used 'fund important maintenance and improvement projects within the park.'" Bandelier Superintendent Jason Lott said, "Fees at Bandelier and most other National Park Service areas that collect fees have not been updated since 2006. Park costs continue to rise, and comments we received during a formal public comment period were supportive of the proposed new fee structure. After careful consideration, and with the support of those public comments, we came to the conclusion that this is the right approach to improve facilities and services important to visitors. We particularly want to spruce things up as we approach 2016, the centennial of Bandelier and also the National Park Service"

COHEN RESEARCH SHOWS E-CIGARETTES "A SAFER ALTERNATIVE." Joanna Cohen, director of the Institute for Global Tobacco Control, and professor at the Johns Hopkins Bloomberg School of Public Health, writes in [USA Today](#) (9/29, 5.23M) that she cannot "with any degree of certainty — say e-cigarettes are good or bad." She argues for "immediate regulation," and suggests that the FDA could limit "advertising and promotion directed toward young people," as well as requiring child-resistant caps on nicotine liquids. She also calls for manufacturing standards. Finally, she urges authorities to prohibit the use of e-cigarettes anywhere that smoking is prohibited. She concludes the piece by saying that "all available research shows that e-cigarettes are a safer alternative" to cigarettes.

Top National News:

OBAMA DEFEATING ISIL WILL REQUIRE ASSAD TO STEP DOWN. Coverage of the President's remarks at a summit meeting on terrorism on the sidelines of the UN General Assembly focused heavily on his remarks on Syria. The story was covered on all three network newscasts, and generated extensive print and online reporting. Media analyses placed Obama's speech in the context of his disagreement with Russia's Vladimir Putin, which is widely seen — despite Secretary of State Kerry's assertions to the contrary — as complicating the Administration's task in Syria.

On [CNN's Situation Room](#) (9/29, 554K), Jim Acosta reported, "If there's one big takeaway in" Obama's trip to the UN, it's that "his plan for ISIS got a lot more complicated." Acosta said that Obama yesterday "defended his plan" for defeating ISIL, which "includes removal" of Assad, but he also "conceded" that it "will take time." The [AP](#) (9/30, Karam) quotes the President as saying, "I have repeatedly said that our approach will take time. This is not an easy task," adding that he was "ultimately optimistic" IS L would be defeated.

[ABC World News](#) (9/29, story 5, 0:40, Muir, 5.84M) said the Administration's plan is "very complicated" because Putin "supports.. Assad." On [Fox News' Special Report](#) (9/29, 1.53M), Kevin Corke reported that Obama said his private meeting on Monday with Putin "gave the Administration much needed clarity about [its] efforts to fight" IS L. The [Los Angeles Times](#) (9/30, Richter, Williams, 4 07M) says that "despite their bitter face-off" this week, Obama and Putin are "likely to be uneasy collaborators, rather than adversaries," in the fight against ISIL. While they "disagree bitterly" over Assad's future, "US officials have signaled their willingness to accept Assad's rule for now, given that his departure could lead to a total collapse of Syria and open the gates of Damascus to the extremist Islamist groups."

According to the [Washington Post](#) (9/30, Eilperin, 6.76M), the President "focused most of his comments" on IS L, "saying the practices of Syrian President Bashar al-Assad has given the terrorists an opening." Said Obama, "We have IS L taking root in areas that already are suffering from failed governance in some cases — in some cases, civil war or sectarian strife. And as a consequence of the vacuum that exists in many of these areas, ISIL has been able to dig in."

The [CBS Evening News](#) (9/29, story 5, 2:50, Pelley, 5.08M) reported that the President reiterated his view that defeating ISIL "will require the end of the Syrian dictatorship." The [Washington Times](#) (9/30, Boyer, 344K) notes that Obama also said the US is "prepared to work with all countries, including Russia and Iran, to find a political mechanism" to oust Assad. The [Wall Street Journal](#) (9/30, Lee, Fassihi, Solomon, Subscription Publication, 5.95M) too says the President said he is willing to work with Russia and Iran to reach a resolution.

At yesterday's meeting, [McClatchy](#) (9/30, Landay, 28K) reports the President "and other world leaders conceded" that ISIL "and other militants are expanding to new parts of the globe" as they "pledged to step up efforts to fight the spread of extremism." UN Secretary-General Ban Ki-moon said, "We know the crucial ingredients for success: Good governance, the rule of law, open, pluralistic societies, quality education and decent jobs, full respect for human rights." The President, reports the [New York Times](#) (9/30, Harris, Schmitt, Subscription Publication, 11.82M), called on world leaders "to fight violent extremism with not only weapons, but also ideas, jobs and good governance, a strategy he has long advocated." Military pressure alone, he argues, "will be insufficient to vanquish groups like...ISIL." The Times says the meeting "seemed to highlight the bewilderment of world leaders over how a movement like" ISIL "can continue to attract followers from around the world," and Vice President Biden "even...acknowledged in a candid moment...that little would come of Tuesday's meeting."

A [Washington Post](#) (9/30, Eilperin, 6.76M) analysis says that while the President came to the UN this week to "argue that the era of global superpower rivalry should be relegated to the past, and that only broad, international coalitions can tackle the dangers facing an interconnected world," his "optimistic, multilateralist vision ran into the harsh reality of world events." The Post says that "at each United Nations stop, the president's words and gestures reflected his determination to change the old calculus."

In an analysis titled "In Year Of Diplomatic Triumphs, Obama Still Dogged By Syria," the [AP](#) (9/30, Pace) says that despite several other "diplomatic breakthroughs" this year, the President "can't escape the shadow of Syria's intractable crisis," and he "returned to Washington Tuesday with the path forward no clearer than when he arrived in New York." The [Washington Post](#) (9/30, Deyoung, 6.76M), however, says that "after endless debates and years of numbing news, there is a sense" at the UN that the world's response to the Syrian war is "approaching a turning point, a pivot from which it could descend into an even more hellish conflict or move toward a plan that might eventually stem the carnage and the extremist legions it has spawned." According to the Post, "two new phenomena have jolted the status quo. The first is the streaming of hundreds of thousands of Syrian refugees into Western Europe," and the second is "Russia's direct entry into the fray."

British Prime Minister David Cameron, the [Washington Times](#) (9/30, Boyer, 344K) reports, "challenged President Obama with some blunt talk on Islamist extremism" during yesterday's meeting. According to the Times, Cameron "reacted strongly" when the President "advised the assembled foreign leaders to avoid profiling Muslims because 'violent extremism is not unique to any one faith.'" Said the British leader, "Barack, you said it and you're right — every religion has its extremists. But we have to be frank that the biggest problem we have today is the Islamist extremist violence that has given birth to ISIL, to al Shabaab, to al Nusra, al Qaeda, and so many other groups."

[AFP](#) (9/30), meanwhile, reports Russia today will propose a UN Security Council resolution on fighting "terrorism," Deputy Foreign Minister Mikhail Bogdanov said. AFP notes that President Vladimir Putin during his speech to the UN General Assembly on Monday "urged its members to unite to fight IS and proposed a Security Council resolution on a coalition to include Assad and Iran," but it was "not immediately clear whether this draft resolution was the one referred to by Putin."

Kerry: Russian Involvement In Syria "Opens Up Options" For US. In an interview with [CNN's Situation Room](#) (9/29, 554K), Secretary of State Kerry said that Russian involvement in Syria "opens up more options" for the US and "makes life more complicated for Putin." Kerry said Putin will have "a very serious problem with the Sunni countries in the region" if he continues to side with Assad. Kerry argued that Russia's presence is "an opportunity for us to force this question of how you actually resolve the question in Syria. The bottom line is, you cannot resolve it without including the Sunni political solution." He added, "That will mean you have to have some kind of transition, some kind of timing. As long as Assad is there, you simply can't make peace, period."

On [NBC Nightly News](#) (9/29, story 4, 2:15, Holt, 7.86M), Kerry was similarly shown saying: "I had a chance to talk with President Putin at the end of the meeting. Look this is not easy for Putin. Everybody said he's made a big move. Well, Putin is there now. And if he wants to fight ISIL alone, that is a challenge."

Later on [CNN's Situation Room](#) (9/29, 554K), Wolf Blitzer said that Kerry's assertion that there needs to be a gradual transition of power away from Assad "sounds like a significant shift over these past few years." The [New York Times](#) (9/30, A1, Baker,

DOI in the News:

SHELL HALTS EFFORTS TO FIND OIL, GAS IN ARCTIC. In news that continued to draw heavy media coverage, Royal Dutch Shell announced on Monday that it is ending its exploration for oil in Arctic waters near Alaska for the near future after disappointing findings from a test well. The move is being broadly viewed a judgment on the viability of drilling in the American Arctic, as well as a win for green groups.

[ABC World News](#) (9/28, story 8, 0:20, Muir, 5.84M) broadcast a segment on a "major reversal" by Shell. Shell's "decision to drill in Alaska was controversial in part because of environmental concerns. Tonight, many environmentalists declaring victory." [NBC Nightly News](#) (9/28, story 8, 0:35, Holt, 7.86M) broadcast that their Cynthia McFadden "toured Alaska with Shell's North America president [Marvin Odum] four weeks ago. At the time, he was cautiously optimistic about the operation. Today, he said the news was disappointing. Shell won approval to drill from the Obama Administration in mid-August for the first time in 24 years. It was a move fiercely fought by environmentalists and some of the locals."

The [New York Times](#) (9/29, A1, Krauss, Reed, Subscription Publication, 11.82M) reports that the decision "came after the Burger J well, which the company drilled this summer, produced disappointing results." Shell said the well had "found indications of oil and gas, but these are not sufficient to warrant further exploration" of the Burger prospect, a "geological structure." The [Wall Street Journal](#) (9/29, Kent, Subscription Publication, 5.95M) reports that Shell president Odum said, "This is a clearly disappointing exploration outcome for this part of the basin."

The [AP](#) (9/29, Joling, Fahey) reports that Shell "spent more than \$7 billion on the effort" and required the company to work through a "regulatory gauntlet" and fight green groups. [The Guardian \(UK\)](#) (9/28, 3.3M) reports that "publicly, Shell blames disappointing exploratory results, high operating costs and strict US environmental regulations for its decision to quit. ... But company sources also accept that Arctic oil polarised debate in a way that damaged the firm." Said one source, "We were acutely aware of the reputational element to this programme."

The [Washington Post](#) (9/29, Mufson, 6.76M) reports that "many Republicans seized on the announcement as evidence that Interior Department regulations had made it more difficult and costly for Shell to continue," while some activists claimed credit for the halting. The Post reports, "But a Shell official, who asked for anonymity to preserve working relationships, said 'Our decision to stop exploration for the foreseeable future was based purely on the well results of Burger J.'"

[Politico Pro](#) (9/28) reports that Interior spokeswoman Jessica Kershaw defended the administration's work "on making sure that Shell's exploration activities are performed as safely as possible." According to the article, "as the company winds down operations in the Arctic region, she added by email, 'Interior will work to ensure that de-mobilization activities are done safely and responsibly, in accordance with these strong safety, environmental and emergency response standards.'"

[Alaska Dispatch News](#) (9/28, Martinson, 219K) reports that Shell spokesman Curtis Smith "said Monday that current oil prices were not a significant driver in the decision." Said Smith, "At any given time we have a suite of investment options in our portfolio and not all of them can be funded." Shell "based the long-term feasibility of the project on expectations of prices 10 to 15 years from now, 'not the price environment we are experiencing today,'" he said. In a separate article, [Alaska Dispatch News](#) (9/28, 219K) also carries a timeline of Shell's presence in Alaska.

Environmentalists "Elated." [PBS NewsHour](#) (9/28, 7:08 p.m. EDT, 947K) broadcast that "environmentalists had condemned the project, saying a spill would devastate wildlife in the region." The [Washington Post](#) (9/29, Wang, 6.76M) called Shell's decision a "serendipitous moment" for environmentalists and reported that the "conservation community" responded to the announcement "with elation." [Mashable](#) (9/28, 2.12M), however, reports that "environmentalists are celebrating the announcement as a major victory over the Obama administration and the oil industry, although cost issues were most likely the main driver of this decision."

The [Los Angeles \(CA\) Times](#) (9/26, Yardley, 4.07M) reports that many environmental groups "were quick to declare victory – and momentum, arguing that the decision affirmed the need to shift away from fossil fuels to fight climate change."

The [Seattle \(WA\) Post-Intelligencer](#) (9/28, 560K) reports that Greenpeace "claimed credit for the Shell decision to pull the plug." Annie Leonard, leader of Greenpeace USA, said, "This is a victory for everyone who had stood up for the Arctic whether they took to kayaks or canoes, rappelled from bridges, or spread the news in their own communities: Millions of people around the world have taken action against Arctic drilling and today they have made history."

[Slate](#) (9/28, 1.38M) reports that it's "unclear how central [the environmental] protests were in motivating Shell's turnaround, but...Shell has 'privately made clear it is taken aback by the public protests against the drilling which are threatening to seriously damage its reputation.'" Slate reports that environmentalists are "taking credit" but the "primary reason Shell gave for its decision was that it just didn't find enough oil." Shell also "cited an 'unpredictable federal regulatory environment'—likely a nod to Democratic presidential candidate Hillary Clinton's recent decision to break with the 'Obama administration and oppose the project."

[Inside Climate News](#) (9/28) reports that "whether or not Shell is really done with the Arctic is unknown," as Shell president Odum said, "Shell continues to see important exploration potential in the basin, and the area is likely to ultimately be of strategic importance to Alaska and the U.S." The article reports, "That's why activists...have told InsideClimate News they plan to keep pressuring the Obama administration to block future Arctic drilling."

The [Christian Science Monitor](#) (9/28, 455K) reports that "there has been doubt expressed from within Shell's own leadership, as Ben van Beurden Shell's CEO is reportedly worried that Arctic drilling would damage the company's stance on climate change." The Monitor adds that "because van Beurden has previously promoted natural gas as a "transitional fuel" towards a lower carbon future, Shell's operations in the Arctic have challenged his reputation."

The [Financial Times](#) (9/28, Clark, Subscription Publication, 1.37M) reports that Shell's decision will make it easier for the company to back industry initiatives that address global warming, such as the new Energy Transitions Commission, which Shell helped launch.

Clinton Opposition To Arctic Drilling Considered As Factor In Decision. [Bloomberg News](#) (9/28, Barrett, 2.66M) reports that "possibly more significant than the immediate environmental activism is Shell's concern about who will oversee Arctic regulation come January 2017," noting an August tweet in which Democratic presidential hopeful Hillary

Clinton announced her opposition to Arctic drilling, tweeting, "Given what we know, it's not worth the risk." Bloomberg reports that Shell "may fear that a Clinton presidency would doom its chancy northern exploration."

Decision A "Disappointment" For Alaska Gov. Walker, Sen. Murkowski. The [New York Times](#) (9/28, Johnson, Subscription Publication, 11.82M) reports that "for many Alaskans, Monday was 'a huge disappointment, a really big disappointment,' as Gov. Bill Walker put it, reflecting on the tax revenue, jobs and investments that may be lost as Royal Dutch Shell abandons its plan to drill for oil in the Alaskan Arctic." Walker "said in an interview that any benefit from Shell's program was years in the future at best. But in the short term, he said, he feared ripple effects on the many subcontractors supplying Shell with goods or services."

The [AP](#) (9/29) reports that Shell's decision "may be disappointing to shareholders, but it's potentially devastating to Alaska." The decision "means the state must find another source to fill the 800-mile trans-Alaska pipeline and solve its economic woes...Walker said." Said Walker, "We need to get some oil in the pipeline, and we need to do it as quickly as possible and in the safest method possible." The AP reports that Walker "is suggesting the federal government open the Arctic National Wildlife Refuge to natural gas drilling."

[The Hill](#) (9/28, Henry, 471K) reports that Sen. Lisa Murkowski (R-Alaska), the chairwoman of the Senate Energy and Natural Resources Committee, "said she was 'extremely disappointed' by Shell's decision" and "blamed tight federal regulations." [The Hill](#) (9/28, Henry, 471K) reports in a separate article that Murkowski "said the Obama administration should look to stabilize federal regulations on Arctic energy production and clear the way for more development in the future." Said Murkowski in a statement, "What we have here is a case in which a company's commercial efforts could not overcome a burdensome and often contradictory regulatory environment. ... [The Interior Department] placed significant limits on this season's activities, which resulted in a drilling rig sitting idle, and is widely expected to issue additional regulations in the coming weeks that will make it even harder to drill."

On its website, [Alaska Public Radio Network](#) (9/28, 2K) says Murkowski "says forcing the company to use just one rig at a time was big blow to Shell." Said Murkowski, "That wasn't part of what they had anticipated. That was a huge financial setback for them — having that rig on standby."

[Mother Jones](#) (9/28, 758K) reports that decision "is a heavy blow to future offshore drilling projects in the Arctic, said Robert Dillon, a spokesman for Sen. Lisa Murkowski (R-Alaska), who has been one of the biggest congressional proponents of offshore oil drilling." Said Dillon, "it's certainly a disappointment. ... it's now becoming more and more questionable whether there's going to be offshore activity at all. A lot of uncertainty of how we go forward in Alaska."

On its website, [CBS News](#) (9/29, 7 05M) reported that Alaska's junior senator, Republican Dan Sullivan, "noted that environmental groups are cheering the news, but he said it's a sad day for Alaska and working Americans."

Shell Bracing For Financial Fallout. [US News & World Report](#) (9/28, 811K) reports that Shell "told investors it is already bracing for financial fallout from its Monday announcement, expecting a \$4.1 billion hit on its balance sheets." The [Motley Fool](#) (9/28, 631K) adds that the \$4.1 billion is "an enormous amount of money for a company that's already struggling under the weight of a 50% drop in crude prices" and "represents more than the company's entire net profit of \$3.4 billion last quarter." The "Investor Takeaway" is that despite the economic risks posed by offshore drilling, "the prize, which is a bounty of oil and gas resources, is often too tempting to pass up," which is "why it's unlikely that we've heard the last of Shell's attempts at finding oil in the region as that oil will be needed by our energy hungry world at some point in the not-so-distant future."

The [Wall Street Journal](#) (9/29, Thomas, Subscription Publication, 5.95M) reports that Shell's announcement should be welcomed by investors as well as environmentalists because it is a welcome signal that Shell is bracing for sustained low oil prices. The Journal reports that Shell will now save the money it would have spent in Alaska, which the paper says accounted for about a fifth of Shell's \$35 billion exploration spending.

The [Daily Caller](#) (9/28, Bastasch, 375K) reports that the decision "shouldn't be too surprising given that low oil prices make it much less attractive to spend billions on oil and uncertain Arctic plays."

The [Financial Times](#) (9/28, Butler, 1 37M) reports that Shell can financially afford the money lost with the unsuccessful Burger J well, with Shell needing to face the bigger problem of a declining reserves base.

Shell Move Casts Doubt On Future Of Arctic Oil Exploration. [E&E Publishing](#) (9/29, 705) reports that Shell's decision "could play a major role in the Obama administration's decision whether to hold additional oil and gas lease sales in the region." Shell's decision "offered a political boost to Democrats and conservation groups that are lobbying the administration to cancel the Arctic lease sales it scheduled for 2016 and 2017 in the Chukchi and Beaufort seas, respectively, and to yank additional sales the administration included in its draft 2017-2022 leasing plan." Also noting Clinton's tweet about opposing Arctic drilling, Greenwire reports that these "two developments, combined with the low price of oil and tepid interest from other major companies to explore the U.S. Arctic, may provide political cover if the administration decides to pull back on its Arctic energy ambitions."

[McClatchy](#) (9/28, Cockerham, 28K) reported that the move "casts doubt on the future of offshore oil exploration in the American Arctic," as industry players globally were "closely watching Shell's pioneering efforts to see whether drilling would succeed in the remote and harsh environment off the northern coast of Alaska." McClatchy says the result of the exploration was a "disaster" that incurred "a loss of billions of dollars."

[Fortune](#) (9/28, 4.14M) reports that the news "will dismay shareholders, who have seen the company plow \$7 billion into a high-risk, high-return bet that has failed to pay off." Fortune adds that "it illustrates the souring climate for high-cost oil production against a backdrop of low prices around the world." [Vox](#) (9/28, 1.1M) reports that Shell's decision "means that no one is likely to drill off the Arctic coast of Alaska anytime soon," adding that "all of Shell's competitors, including Total and Statoil, had long ago shelved their plans to drill in the Chukchi and Beaufort Seas, deeming it too risky and difficult."

[Bloomberg News](#) (9/28, Katakey, 2.66M) reports that Shell's decision "means billions of barrels of crude will probably remain locked away in Arctic waters from the U.S. to Russia — at least as long as prices remain near \$50 a barrel." Said one analyst, "This effectively ends exploration for new Arctic oil until prices recover. ... Shell was the only company with a strong enough balance sheet that was currently exploring in the Arctic." [Bloomberg News](#) (9/28, Murtaugh, 2.66M) reports separately that Shell's decision "is the latest bit of bad news for" Alaska, which "went from producing one in every four barrels in the U.S. to an afterthought during the shale boom."

Shell: Too Early To Understand Seattle's Role In Demobilization. The [Seattle Times](#) (9/28, 962K) reports that Shell's "quest for offshore oil had raised the hopes of leaders of Seattle's maritime industry for years of business in servicing the fleets that would be working off Alaska." Said Shell spokesman Smith, "it's still too early to understand what the demobilization will look like, and what role Seattle will play — if at all," said Paul Queary, spokesman for Foss Maritime, which had a contract with Shell to use Terminal 5, "Obviously, we're disappointed. ... It was a big project with a lot of back-end potential for us."

The [Puget Sound \(WA\) Business Journal](#) (9/28, Subscription Publication, 59K) adds that Queary "said that Shell hasn't yet given Foss any details about what vessels might return to Seattle's port."

Shell Decision Discouraging For Those In Favor Of Developing Canadian Arctic Resources. The [Canadian Press](#) (9/29) reports that Shell's decision "is sending a discouraging signal to those who want to see Canada's Arctic offshore resources developed." Said energy consultant Doug Matthews, "The loss for Canada is we really could have learned something from the Shell operation about how to better operate in the Arctic waters." The article adds that "the probability that Canadian Beaufort resources will one day be exploited was already looking dicey."

New Environmental Group Wants Shell Capping Stack Sent To Nova Scotia. The [Halifax \(CAN\) Chronicle Herald](#) (9/29, MacIntyre, 336K) reports that John Davis, director of the newly-formed Clean Ocean Action Commission said on Monday that the capping stack at Shell USA's drill site off the coast of Alaska, which is used if a blowout preventer fails at an offshore drill site, should be sent to the East Coast now that Shell will not be drilling further in the Alaskan Arctic. Davis "said Monday the capping stack...would be insurance against environmental devastation off Nova Scotia."

Commentary. In an editorial, the [Wall Street Journal](#) (9/29, Subscription Publication, 5.95M) notes that Shell cited not just the weak results from drilling, but the unpredictable Federal regulatory environment in the region. The Journal adds that Shell's effort wasn't about the price of oil today, but about establishing a solid foundation a decade from now, and hopes that the next president will be friendlier to Arctic exploration.

In an editorial, the [Los Angeles Times](#) (9/28, Board, 4.07M) writes that "certainly, Shell's withdrawal is a victory — although perhaps a temporary one — for the environment. ... But in terms of policy, the environment has not won." The Times says Shell "is talking about the economic costs, while the bigger concern should be the environmental risks," and argues that "this is an opportunity for the federal government, which never should have allowed the Shell project to go forward, to reevaluate its policies in the still-pristine waters off Alaska."

In the [New York Times's](#) (9/28, 11.82M) "Dot Earth Blog," Andrew Revkin examines the factors that may have been involved in Shell's decision to halt the Arctic exploration, including low oil prices.

Writing for the [BBC News](#) (9/29, 1.68M) website, business editor Kama Ahmed said it "could have been Hillary Clinton's tweet that did it." Ahmed writes that Royal Dutch Shell CEO Ben van Beurden was "certainly bullish on Alaska" during an interview between the two earlier this year. Ahmed says that what has changed since then are that the first findings from Burger J were not promising, that Clinton's tweet "revealed that political risks were still substantial," and that Shell had other issues to deal with, including a pending takeover of BG Group, falling oil prices and falling Shell share prices.

In commentary for the [Rolling Stone](#) (9/28, 13.52M), Andy Bichlbaum of activist group the Yes Men, said in partnership with Funny or Die and stars Alexander Skarsgard and Jack McBrayer, his group "was to produce some short films that would lightheartedly popularize the beauty, value and importance of the fast-melting Arctic." Bichlbaum says "one of the main reasons the company failed was activists," adding that "the Yes Men did our part as well, working with Greenpeace on a (fake) Shell campaign to promote the company's (real) crazy plans, as well as on an iceberg-distribution scheme on the streets of Manhattan."

Writing for the [Houston \(TX\) Chronicle](#) (9/28, 2.28M), Chris Tomlinson, writes that "there is no doubt that drilling" in the Arctic "makes no sense at \$45 a barrel," but Shell executives "apparently wanted to make a point," adding that Shell "wanted to stake its claim and set a precedent for drilling in those water." Tomlinson says that "only real way to prevent drilling in the Arctic is to find an economic transportation fuel to replace gasoline," a "battle environmentalists need to win, if they want to stop oil companies to stop drilling."

In commentary carried by the [Seattle \(WA\) Times](#) (9/28, 962K), Jon Talton writes that the "big winners" in Shell's decision "are the planet, the Arctic environment, but even Shell shareholders." He adds that "shareholders will be hit with a charge but it's better than continuing to drill dry holes in the most challenging environment in the world."

Additional Coverage. Additional coverage of the story is carried by [Reuters](#) (9/28, Schaps), [Agencia EFE \(ESP\)](#) (9/28), [AFP](#) (9/29), [Vice](#) (9/29, 1.29M), [USA Today](#) (9/28, Jones, 5.23M), [Investors Business Daily](#) (9/28, 542K), [National Geographic](#) (9/28, 31.65M), [Popular Science](#) (9/28, 6.51M), the [Discovery Channel](#) (9/28, 767K), the [Financial Times](#) (9/28, Adams, Crooks, Farchy, Subscription Publication, 1.37M), the [Portland \(OR\) Tribune](#) (9/28, 122K), the [Irish Times](#) (9/29, 371K), and on the websites of [MTV](#) (9/28, 1.27M), [MSNBC](#) (9/28, 545K) and the [Alaska Public Radio Network](#) (9/28, 2K).

Additional coverage was provided by the [Associated Press](#) (9/29), the [Houston \(TX\) Chronicle](#) (9/29, 2.28M), the [Wall Street Journal](#) (9/29, Thomas, Subscription Publication, 5.95M), the [Greenwire](#) (9/28, Subscription Publication), the [EnergyWire](#) (9/28, Subscription Publication), the [Washington \(DC\) Post](#) (9/29, Wang, 6.76M), [US News & World Report](#) (9/28, 811K), the [Alaska Dispatch News](#) (9/28, 219K), the [Alaska Dispatch News](#) (9/28, 219K), the [Cordova \(AK\) Times](#) (9/28, 2K), [Newsweek](#) (9/28, 198K), [US News & World Report](#) (9/28, 811K), the [Christian Science Monitor](#) (9/28, 455K), the [Christian Science Monitor](#) (9/28, 455K), the [Natural Gas Intelligence](#) (9/29, Subscription Publication), [The Atlantic](#) (9/29, 2.69M), [UPI](#) (9/28), the [Maritime Executive](#) (9/28, 21), the [Huffington Post](#) (9/28, 164K), [KTVA-TV Anchorage \(AK\)](#) Anchorage, AK (9/29, 1K), [KRCR-TV Redding \(CA\)](#) Redding, CA (9/29, 43K).

POPE FRANCIS DELIVERS SPEECH ON IMMIGRATION IN PHILADELPHIA. The [Philly \(PA\)](#) (9/28, 1.06M) reported on Pope Francis speech on immigration in Philadelphia. Interior Secretary Sally Jewell, "who emigrated to the US from England when she was 3, said the opportunities in the states are unmatched." She said, "Here it doesn't matter what your accent is, you can come from just about anywhere and be successful." NPS Director Jon Jarvis said that "when he greets the pope, he will thank him for visiting this place and for his encyclical on the environment." He said, "Independence Hall is a representation for the nation and for the world of the place where this nation was formed and where principles of freedom, civil rights."

The [Hanover \(PA\) Evening Sun](#) (9/29, 59K) reports that 300 NPS employees served "on an incident management team during and leading up to the papal address in Philadelphia this week." According to Katie Lawhon, an employee of Gettysburg National Military Park, "because Pope Francis spoke at a national park — Independence Hall — and his visit drew more than 40,000 people, the Park Service called in a team consisting of employees from nearly 60 parks and park offices."

Pope Francis' Water Glass Won't Be Protected As An Artifact. The [Washington Post](#) (9/29, Itkowitz, 6.76M) reports that Rep. Bob Brady "last week snatched Pope Francis's still mostly full glass from the House chamber podium and later shared sips of the leftover water with his wife and staffers." According to the article, some wonder whether "the glass should be considered an artifact, perhaps protected by the National Historic Preservation Act of 1966." But NPS spokeswoman April Slayton said, "Even if such laws were to apply to the glass, (the law) does not establish the National Park Service as the repository of historic personal property, and there is no basis to require that historic property be turned over to it."

HOUSE PANEL TO HOLD HEARING ON MARINE MONUMENTS. The [E&E Daily](#) (9/28, Subscription Publication) reports that "House Republicans are focusing their ire over executive power on marine monuments this week, with a hearing that promises to stoke controversy over a proposal to protect deep-sea canyons in the Northeast." A House Natural Resources Subcommittee on Water, Power and Oceans spokeswoman said "lawmakers will discuss both existing marine monuments and proposals for new ones in New England and Alaska."

HOUSE PANEL TO HOLD HEARING ON FEDERAL TIMBER POLICY. The [E&E Daily](#) (9/28, Subscription Publication) reports that a House Natural Resources panel on Tuesday will "examine state, tribal and local forest policies with an eye toward improving the federal government's timber programs." The oversight hearing before the Subcommittee on Federal Lands is "the committee's latest move to improve federal forest policy that the panel's Republican leaders say is hobbled by excessive planning and environmental litigation." Members will "hear from a timberland owner in Idaho, an Alaska state official and business leader, the head of a tribal forestry group, and a Colorado county commissioner."

FEDERAL AGENCIES RELEASE SHUTDOWN PLANS. The [Greenwire](#) (9/28, Subscription Publication) reports that "federal agencies' contingency plans in the event of a government shutdown would send thousands of federal employees home with no pay." Last Friday, "every federal government entity, big or small, released its latest shutdown plans." According to the article, "the documents outline which vital government functions would be kept up and running as well as which services would fall by the wayside during a lapse of appropriations." Also, "many of the plans flesh out who would be furloughed and who would have to work during a government shutdown."

EMPLOYEE MORALE INCHES UP AT INTERIOR. [E&E Publishing](#) (9/28, 705) reports that "federal employees' morale across the government inched upward this year, including at several environmental and energy agencies." The Office of Personnel Management released on Monday "engagement and job satisfaction scores from the 2015 Federal Employee Viewpoint Survey." The article notes that "employee morale at U.S. EPA as well as at the Departments of Energy and the Interior crept upward...following the governmentwide trend of improved job satisfaction." According to the article, "at 61 percent, Interior posted a 1-point spike from 2014, too, on its job satisfaction score."

GLACIER MELT SHOWS NEED TO ADDRESS CLIMATE CHANGE. In a piece for [The Guardian \(UK\)](#) (9/28, 3.3M), Wendell Tangborn argues that "fossil fuel burning must taper off dramatically and be replaced with renewable sources of energy if we are going to survive as a species on this planet." He says that "the earth's 190,000 glaciers, sentinels of climate change that appear to be more sensitive to the climate than are humans, are disappearing at an unprecedented pace, the canaries in climate change's coal mine." He notes that "the recent visit of President Barack Obama, Secretary of State John Kerry and Secretary of the Interior Sally Jewell to Alaska to observe glaciers and the effect of climate change symbolically emphasized the problem of global warming and its impact on the well-being of humans."

CONGRESS URGED TO RENEW LWCF. In an op-ed for the [Albuquerque \(NM\) Journal](#) (9/29, 259K), Dede Feldman, a former state senator, writes that "in just two days, New Mexicans may lose the most powerful tool the state has for preserving public lands and creating national parks and open spaces across the state, from the Petroglyph National Monument to local Little League fields." Feldman urges Congress to renew the Land and Water Conservation Fund Act. Feldman argues that letting the fund expire "wouldn't only be a major blow to New Mexico's natural, historic and recreational outdoor areas, but it would also adversely impact the local economy."

Empowering Native American Communities:

CHOCTAW AND CHICKASAW ACCEPT LAND-TRUST-MANAGEMENT SETTLEMENT. The [Indian Country Today Media Network](#) (9/28, 32K) reports that "the Choctaw and Chickasaw nations have accepted a combined \$186 million in a settlement with the U.S. Department of the Interior for the government's alleged failure to protect trust land in the sale of 1.3 million acres of timberland between 1908 and 1940." Under the settlement, "the Choctaw will receive \$139.5 million and the Chickasaw Nation \$46.5 million from the U.S. Department of the Interior for a 2005 land-trust-management suit they filed against that agency and other parties."

Additional coverage was provided by [KTEN-TV](#) Sherman, TX (9/29, 1K).

SEN. MCCAIN UNDER FIRE FOR SUPPORTING SALE OF OAK FLAT. The [Huffington Post](#) (9/29, 164K) reports that Sen. John McCain has "been the subject of intense criticism from Native activists and their supporters over the past year for his role in orchestrating the sale of Oak Flat — an Apache holy site located in Arizona's Tonto National

Forest, to foreign mining conglomerates Rio Tinto and BHP Billiton." According to the article, "Congress' move to sell off Oak Flat, which continues a long history of taking land from the Apache, provoked outrage and protests among Native activists and their supporters."

The [Indian Country Today Media Network](#) (9/28, 32K) provides examples of "devastating tribal land grabs from the past 80 years," including the sale of Oak Flat.

APPEALS COURT TO HEAR ARGUMENTS IN POJOAQUE PUEBLO'S CASINO DISPUTE. The [AP](#) (9/29) reports that "attorneys for an American Indian community in New Mexico were to present oral arguments Monday in an appeal of a case they say could affect the way tribes and states negotiate gambling compacts." The 10th U.S. Circuit Court of Appeals was "hearing Pojoaque Pueblo's appeal of a court ruling that blocked its efforts to have the U.S. Interior Department approve a gambling compact, rather than the state of New Mexico."

ADDITIONAL COVERAGE GRANTS AWARDED UNDER NATIVE YOUTH COMMUNITY PROJECTS PROGRAM. Additional coverage that "the U.S. Department of Education is investing \$5.3 million to help Native American youth prepare for post-secondary opportunities in higher education and in the job market" was provided by the [Indian Country Today Media Network](#) (9/28, 32K) and the [Cherokee \(OK\) Phoenix](#) (9/29, 442).

Office of Insular Affairs:

\$7 MILLION IN GRANT FUNDS AWARDED FOR INFRASTRUCTURE PROJECTS IN AMERICAN SAMOA. The [RealEstateRama](#) (9/28, 210) reports that on Friday, Congresswoman Aumua Amata "announced the release of more than \$7 million in grant funding to American Samoa through the Office of Insular Affairs' (OIA) Capital Improvement Project (CIP) Program." The money will "be used to support priorities and much needed improvements to critical infrastructure in the territory." Amata said, "These infrastructure projects are essential to strengthening economic development in American Samoa. The territory's transportation, health, education, and water systems are outdated and in need of extensive refurbishing and repair. These funds will directly and positively affect our local schools, roads and health care."

Tackling America's Water Challenges:

HUNGRY HORSE DAM TO UPGRADE VISITOR CENTER. The [Columbia Falls \(MT\) Hungry Horse News](#) (9/29) reports that "visitor facilities at Hungry Horse Dam will receive accessibility improvements starting in April." The BOR "awarded a \$1.2 million construction contract Aug. 27 to Advanced Solutions Group, LLC, a small business based in Kaysville, Utah." The article notes that "the work includes replacing the visitor center overlook, adding a walkway from the overlook to the visitor center, improving the parking lot, adding two viewing windows in the parapet wall of the dam and constructing a multi-purpose pad for viewing the Hungry Horse Reservoir."

CENTRAL VALLEY PROJECT CRITICIZED. In an op-ed for the [San Francisco Examiner](#) (9/29, 412K), Trent W. Orr, an attorney based in San Francisco at Earthjustice, writes that "California's persistent drought has prompted elected officials, agency decision-makers and the concerned public to consider seriously innovative ways to stretch our finite water resources." However, "in the midst of this forward thinking, the Bureau of Reclamation, the federal agency that operates the Central Valley Project (CVP), has stubbornly set its sights on the 'solutions' of the past. The CVP and its state counterpart, the State Water Project (SWP), together form one of the world's largest water projects." He argues that "the wholesale re-plumbing of the Central Valley watershed to create the CVP-SWP has wreaked havoc on the environment, drowning wild rivers, blocking salmon from reaching their former spawning grounds, and rendering flows below the dams too low and too warm to support healthy populations of native fish."

Securing America's Energy Future:

Renewable Energy:

WHITE HOUSE ANNOUNCES NEW OFFSHORE WIND ENERGY LEASES. [E&E Publishing](#) (9/28, 705) reports that the White House on Monday "announced new offshore wind energy leases and increased federal and international collaboration in an effort to meet President Obama's commitment to obtain 20 percent of non-hydropower renewable energy generation by 2030." The article notes that "the announcements kicked off the first-ever offshore wind summit hosted by the White House, which included representatives from federal and state offices and stakeholders." The BOEM will "exchange lessons learned, best practices and scientific information with offshore wind regulators from the United Kingdom, Denmark and Germany as part of an effort to create an International Offshore Wind Regulators Forum, the White House said."

Additional coverage was provided by [reNews](#) (9/29).

BOEM MEASURES ENVIRONMENTAL EFFECTS OF OFFSHORE WIND TURBINE CONSTRUCTION. The [Recharge News](#) (9/29, 633) reports that the BOEM has "begun a new study to conduct real-time, independent observations and data collection during construction of US offshore wind turbines."

The [North American Windpower](#) (9/29, 43K) reports that according to the bureau, "field work took place in August and September through the Real-Time Opportunity for Development Environmental Observations (RODEO) study, which is taking direct measurements of visual effects, sound produced by various activities, and seafloor disturbances caused by cabling or anchoring. It is also evaluating different types of monitoring equipment." Starting with "Rhode Island's Block Island project, the study will be ongoing during the next five years and will take measurements from projects as they come online."

Additional coverage was provided by the [reNews](#) (9/29).

ORR ADMINISTRATION'S PROMOTION OF SOLAR ENERGY IS HARMFUL TO US ECONOMY. In [The Hill](#)'s (9/28, Orr, 471K) "Congress Blog" blog, Isaac Orr, a research fellow for energy and environmental policy at The Heartland Institute, criticizes what he refers to as the Obama Administration's "solar energy socialism," in which "inefficient and costly forms of energy" like solar and wind continue to be promoted. Orr notes that a report by the Cato Institute, which used the EPA's own climate models, found that the Clean Power Plan would only reduce carbon dioxide emissions by 0.02 degrees C by the year 2100, "an amount so small it falls below the margin of error for the model." He concludes that further promotion of solar energy "will not lead to a utopia of cheap energy but will instead drive up costs for U.S. households and businesses and further tank the nation's economy along with the forms of energy," such as oil and natural gas, that "we depend on to power our hospitals, schools, and refrigerators."

Onshore Energy Development:

NEW REPORT SERVES AS PRIMER FOR STATES REGARDING EARTHQUAKES CAUSED BY FRACKING. The [AP](#) (9/29, Smyth, 6.76M) reports that the StatesFirst initiative, a group made up of "U.S. drilling states, seismologists, academics and industry experts," issued a 150-page report on Monday on human-caused earthquakes induced by hydraulic fracturing or the disposal of fracking wastewater. It "represents perhaps the most candid discussion" on the topic since tremors "began being linked to fracking and deep-injection wastewater disposal around 2009." The report "matter-of-factly references links between fracking or deep-injection wastewater disposal and earthquakes," but it "stopped short of suggesting model regulations." The report, which also included input from the Interstate Oil and Gas Compact Commission and the Ground Water Protection Council, gathered information on the issue from 13 participating states. Many of those states have not seen human-induced earthquakes, but the report "urges them to put regulations and procedures in place for dealing with any eventual incidents."

The [Christian Science Monitor](#) (9/28, Gass, 455K) says StatesFirst's report "conclusively links hydraulic fracturing and fracking wastewater disposal to local seismic activity, but stops short of prescribing model regulations." Ohio Oil & Gas Chief Rick Simmers, who co-chaired StatesFirst, said that differences in each state's drilling laws and geology differs, which is why the report says that means that "A one-size-fits-all approach would not be an effective tool for state regulators." Simmers also said that while there is a link between seismicity and both fracking and deep-injection wastewater disposal, the amount of tremors is "very rare" relative to the amount of drilling that takes place. Simmers said the main function of the report is to serve as a "primer for states, providing up-to-date scientific and technical data, along with suggested approaches for detecting and managing earthquakes." These suggestions included improving how seismic activity is monitored and developing new procedures to halt wastewater injection at times when seismic activity is at alarming levels, according to [Reuters](#) (9/29, Gillam). The article mentions that Rex Buchanan, interim director of the Kansas Geological Survey and co-chair of the group that issued the report, said the group has not previously seen the amount of seismicity discovered while creating the report.

The [Topeka \(KS\) Capital-Journal](#) (9/28, Hart, 109K) reports that Leslie Savage, chief geologist with the Railroad Commission of Texas, said that because fault lines and other geological formations differ from state to state, each state must individually determine "what hazards it may be susceptible to, the risk of those hazards impacting people living there and what measures to take." Furthermore, Buchanan said that faults in the deep subsurface aren't well known, and that it's unclear which faults "are under enough stress to produce earthquakes if injection increases the pressure around them." In addition, Ivan Wong, principal seismologist with consulting company AECOM, cautioned states to "be careful to sort out which earthquakes actually are caused by human activities."

The [AP](#) (9/29, Callahan) reports that Herschel McDivitt, a member of StatesFirst and director of Indiana's Department of Natural Resources' oil and gas division, said that while no human-caused earthquakes have occurred in the state, "We felt that it's important for us to learn about what these other states are learning." McDivitt said a study conducted by his department in conjunction with the Indiana University-based Indiana Geological Survey is focusing on whether deep-injection activities in the state can cause such quakes. The article notes that there are several fracking operations took place at vertical oil wells in Indiana's Gibson County between 2011 and 2014, but McDivitt said "that's still a small

volume compared with operations in other states.”

ENVIRONMENTAL GROUP’S LAWSUIT CHALLENGES APPROVALS OF MINES. The [Grand Junction \(CO\) Daily Sentinel](#) (9/29, 73K) reports that “a conservation group that forced the federal government to fully account for the greenhouse-gas impacts of coal-mine expansions near Craig now is seeking to have the same occur in the case of a mine near Paonia.” WildEarth Guardians “recently sued the Interior Department and its Office of Surface Mining Reclamation and Enforcement to challenge the government’s approvals of expanded mining at the Bowie No. 2 mine in the North Fork Valley, a mine in New Mexico and two in Wyoming.” The group claims “the government failed to provide public notice of its decisions or account for the climate impacts of approving expanded coal mining — including the impacts from burning that coal.”

OSAGE MINERALS COUNCIL FILES LAWSUIT OVER REGULATIONS. The [Bartlesville \(OK\) Examiner-Enterprise](#) (9/29, 602) reports that “the Osage Minerals Council filed suit against the U.S. government June 30, claiming the burdensome regulations proposed under the new rules would cause ‘irreversible damage’ to the mineral estate.” The council said, “In fact, producers are plugging and abandoning their wells, rather than attempting to comply and continue to drill.” According to the article, “a temporary restraining order on the new regulations has been placed, allowing some oil producers to go back to work.”

OSM TO INSPECT SAGINAW ABANDONED MINE SHAFTS. [WSGW-AM](#) Saginaw, MI (9/29, 3K) reports that “the U.S. Department of Interior Office of Surface Mining Reclamation and Enforcement (OSM) will conduct an assessment of a couple of abandoned mine shafts in the city of Saginaw.” On Monday, “the Saginaw City Council approved Municipal Consent for Right of Entry forms, giving the OSM permission to perform the inspections on the Cass River Shaft in Wickes Park and the Buena Vista Shaft located in the right of ways of Hampshire and Treanor Streets and Livingstone Drive.”

Offshore Energy Development:

DEMOCRATIC BILL WOULD BLOCK OFFSHORE REVENUE SHARING FOR LOUISIANA. The [New Orleans Times-Picayune](#) (9/29, Alpert, 718K) reports that “Senate Democrats are proposing legislation that would repeal a 2006 law that provides revenue sharing to Louisiana and three other Gulf States from off-shore oil and gas production, starting in 2017.” According to the article, “the Democratic proposal would repeal oil and gas subsidies, invest in clean energy technologies and move to modernize the electricity grid.” The article notes that “it is consistent with an Obama administration budget proposal, which also would repeal off-shore oil and gas revenue sharing with the four Gulf States – Louisiana, Mississippi, Alabama and Texas.”

WETLANDS ADVOCATES OPPOSE JINDAL’S REQUEST FOR BP FINES TO FUND INFRASTRUCTURE. The [New Orleans Times-Picayune](#) (9/29, Schleifstein, 718K) reports that on Saturday the America’s WETLAND Foundation announced its opposition to Gov. Bobby Jindal’s (R-LA) request that BP oil spill fine money be used for infrastructure. Jindal had “asked the state Coastal Protection and Restoration Authority to change state policy” so the money could pay for part of a \$350 million highway bridge project, and the vote on the request has been tabled. The foundation’s chair, King Milling, asserted the need for restoration money to be used for restoration.

America’s Great Outdoors:

Bureau of Land Management:

ENVIRONMENTAL GROUPS PROTEST BENTON TIMBER SALE. The [Corvallis \(OR\) Gazette-Times](#) (9/29, 31K) reports that “several environmental organizations are protesting a timber sale in south Benton County even though it uses an approach touted as providing important environmental benefits.” On Sept. 16, the BLM “awarded the Rainbow Ridge timber sale to Freres Lumber for \$2.6 million.” But “the sale won’t become final.. until a resolution is reached on a protest filed by Oregon Wild, Cascadia Wildlands and the Benton Forest Coalition.”

NEW REQUIREMENTS BY BLM COMPLICATE GOLF DEVELOPER’S PLAN TO BUY STATE PARK LAND IN OREGON. The [Oregonian](#) (9/29, 756K) reports that “add about \$450,000 to the price Mike Keiser must pay if he wants buy state parkland on Oregon’s south coast and turn it into a golf course,” and “then subtract the college scholarships and environmental restoration work he vowed to provide with revenue from the course.” The BLM, “which controls the fate of the 280-acre chunk of the Bandon State Natural area, has included those details in a list of hurdles Keiser must clear in order to buy the land.” According to the article, “the requirements cast a new layer of uncertainty over the controversial deal.”

BLM TO HOLD MEETING ON SLOAN CANYON PLANS. The [Las Vegas Review-Journal](#) (9/29, 378K) reports that “a paved road and parking lot, restrooms and hiking trails are part of the plans for Sloan Canyon National Conservation Area, and the Bureau of Land Management wants to know your thoughts about it.” BLM “officials will hold a meeting from 6 p.m. to 8 p.m. Thursday to present the proposal and answer questions.” Officials also will “discuss other alternatives for the 48,438-acre conservation area about 25 miles southeast of Las Vegas, BLM said.”

BLM SEEKS FEEDBACK ON ROSSI MINE EXPANSION. The [Elko \(NV\) Daily Free Press](#) (9/29, 22K) reports that the BLM has “scheduled public scoping meetings to identify issues relevant to a Halliburton Energy Services proposal to expand the Rossi barite mine 50 miles east of Battle Mountain.” According to the article, “the proposed expansion would extend the life of the mine for eight additional years, enlarging existing pits and digging new ones, as well as expanding existing waste rock dumps and creating new ones.” The BLM has “identified the following preliminary issues and concerns: archaeological and cultural resources, Native American traditional and cultural values, pit lakes, benefits of backfilling open pits, and wildlife issues, including mule deer migration corridor and sage-grouse habitat.”

NEW BLM FIELD MANAGER NAMED FOR COLORADO RIVER VALLEY FIELD OFFICE. The [Glenwood Springs \(CO\) Post Independent](#) (9/29, 32K) reports that the BLM has “named Karl Mendonca as the new field manager for the Colorado River Valley Field Office based in Silt.” Northwest District Manager Joe Meyer said, “Karl was selected based on his experience, skills as a leader, and familiarity with the issues in the field office. He has excelled in a series of positions since he began at the Colorado River Valley Field Office in 2003.”

PARTNERSHIPS SEEK TO PROMOTE ORGAN MOUNTAINS-DESERT PEAKS NATIONAL MONUMENT. In an op-ed for the [Las Cruces \(NM\) Sun-News](#) (9/28, 47K), Carrie Hamblen, the executive director of the Las Cruces Green Chamber of Commerce, writing about meeting with several legislators and officials in Washington, D.C. “about what this community has accomplished since the designation of the Organ Mountains-Desert Peaks National Monument in 2014.” She notes that “over the next five years, the Bureau of Land Management must gather public input as they develop a management plan.” In the meantime, “agencies like the Las Cruces Green Chamber are working with others to create more awareness about OMDP, create more activity on the monument, and continue to develop partnerships that can capitalize on the economic, quality of life, and health benefits from our open spaces.”

Fish and Wildlife Service:

GREATER SAGE GROUSE DECISION UPSETS GUNNISON COUNTY. The [Colorado Public Radio](#) (9/29) reports that “the federal government’s decision not to list the greater sage grouse as endangered has upset officials in Gunnison County.” The article notes that “that area has a separate species of sage grouse that was listed under the Endangered Species Act last year.” Jonathan Houck, a Gunnison County commissioner, said, “92 percent of occupied habitat on private land in the Gunnison basin has some kind of protective measure. When I look at those numbers and those efforts that to me says ‘unprecedented amount of work.’ At a personal level, it just seemed kind of dismissive.”

Russell: Federal Land Use Plans For Sage-Grouse Will Hinder Western States’ Economic Development. Barry Russell, president and CEO of the Independent Petroleum Association of America, writes in [The Hill’s](#) (9/29, Russell, 471K) “Congress Blog” blog critically of the Interior Department’s “non-warranted” proposed land use plans for the greater sage-grouse’s habitat, arguing that they “stand to have a severe economic impact on private land use and energy development across the American West.” Furthermore the plans “largely ignore the great strides made by state regulators, local officials, ranchers, and energy developers alike to protect the sage-grouse and its habitat.” Russell concludes that while the Interior’s plans are a “step in the right direction for the grouse,” the impact the plans have “on energy development must still be addressed.”

Additional Coverage. Additional coverage of the sage grouse decision was provided by the [Digital Journal](#) (9/29, 28K), the [Salem \(OR\) Capital Press](#) (9/28, 113K), the [Naples \(FL\) Herald](#) (9/28), the [Riverton \(WY\) Ranger](#) (9/29, 167), the [Cortez \(CO\) Journal](#) (9/28, 646), [Platts](#) (9/29, 1K), the [Riverton \(WY\) Ranger](#) (9/29, 167), the [Mini-Cassia \(ID\) Weekly News Journal](#) (9/29), [Northwest Aq Information Network](#) (9/29), [Sci-Tech Today](#) (9/29, 825), and [KIVI-TV Boise \(ID\)](#) Boise, ID (9/29, 861).

SENATE PANEL TO HOLD HEARING ON ENDANGERED SPECIES ACT. [Politico](#) (9/29, Purdy, 942K) reports that the Senate Environment and Public Works Subcommittee on Fisheries, Wildlife, and Water will “look at ways to improve the Endangered Species Act.” FWS Director Dan Ashe, Montana Gov. Matt Mead and Wyoming Gov. Steve Bullock will “address lawmakers at a hearing on the issue Tuesday.”

Additional coverage was provided by [The Hill](#) (9/28, Henry, 471K).

FEDERAL OFFICIALS TO RELEASE FINAL BULL TROUT RECOVERY PLAN FOR FIVE STATES. The [AP](#) (9/29, Ridler) reports federal officials will on Wednesday “release their final plan” to “recover struggling bull trout in five Western states with the goal of lifting Endangered Species Act protections.” The FWS “says the Bull Trout Recovery Plan outlines conservation actions needed to boost populations in six recovery units spread over Idaho Oregon Washington California and a tiny portion of northern Nevada.” Bull

trout recovery planning coordinator for FWS Steve Duke "said the plan can be used by the U.S. Forest Service, U.S. Bureau of Land Management, Bonneville Power Administration, U.S. Bureau of Reclamation as well as other entities to guide conservation efforts." Duke said, "Beginning Wednesday, they'll know what the roadmap is for achieving recovery and fixing what's going on in their areas of recovery. ... I feel really good about what we've put out."

Additional coverage was provided by the [Columbus \(N\) Republic](#) (9/29, 75K), the [Minneapolis \(MN\) Star Tribune](#) (9/29, 1.19M), the [Seattle \(WA\) Times](#) (9/29, 962K), the [Houston \(TX\) Chronicle](#) (9/29, 2.28M), the [Clark County \(WA\) Columbian](#) (9/28, 86K), the [Reno \(NV\) Gazette-Journal](#) (9/28, 179K), and [Yahoo! News](#) (9/29, Ridler, 5.98M).

FWS PROPOSES NEW PROTECTIONS FOR FOUR PLANTS. [The Hill](#) (9/29, Devaney, 471K) reports that the FWS is "proposing new protections for four plants." According to the article, "the Big Pine partridge pea, wedge spurge, and sand flax would be listed as endangered species, while the Blodgett's silverbush would be listed as a threatened species, under the agency's proposal."

FWS PROPOSES PROTECTIONS FOR 49 HAWAII SPECIES. The [Honolulu Civil Beat](#) (9/29, 41) reports that "yellow-faced bees, pool shrimp and band-rumped storm petrels are among the 49 species that the U.S. Fish and Wildlife Service has proposed adding to the Endangered Species Act." The article notes that "in all, 10 animals and 39 plants are being proposed," and "of those, 48 are found only in Hawaii — some only on one island."

NATIONAL FISH AND WILDLIFE FOUNDATION RAISES FUNDS TO PROTECT MONARCH BUTTERFLY HABITAT. The [Greenwire](#) (9/28, Subscription Publication) reports that "the National Fish and Wildlife Foundation has quickly raised the equivalent of \$10 million to protect the imperiled monarch butterfly, the organization announced today." According to the article, "donors have offered more than \$6.7 million in financial and in-kind donations to the foundation's \$3.3 million for 22 grants to support the restoration of up to 33,000 acres of nesting and feeding grounds for the monarch, whose populations have dwindled dramatically over the past 20 years." NFWF "worked with four federal agencies — the Fish and Wildlife Service, the Forest Service, the Natural Resources Conservation Service and the Bureau of Land Management — and agribusiness giant Monsanto Co. to raise the funds."

Meanwhile, the [Dayton \(OH\) Daily News](#) (9/29, 117K) reports that "a project that should give a lift to the 2,000-mile annual flight of the Monarch butterfly across North America is underway at Fiver Rivers MetroParks." According to the article, "a grant from the Clean Ohio Fund, along with money from the U.S. Fish and Wildlife Service and local funds, will pay for the purchase within the next month of a 147-acre tract of farmland adjacent to Germantown MetroPark."

Additional coverage was provided by the [Denver \(CO\) Post](#) (9/29, Suhr, 787K), the [Seattle \(WA\) Times](#) (9/29, 962K), and [Agri-Pulse](#) (9/29).

FWS WANTS PROTECTION RESTORED FOR UTAH PRAIRIE DOGS. The [AP](#) (9/29, 2.28M) reports that "a lawyer for the U.S. Fish and Wildlife Service told an appeals court Monday that a federal judge in Utah went too far when he struck down protections for a kind of prairie dog found only in that state." Attorney Anna Katselas urged the 10th U.S. Circuit Court of Appeals "to overturn the decision and restore protection for the prairie dogs under the Endangered Species Act." But Jonathan Wood, "an attorney for residents of Cedar City, Utah, who challenged the prairie dog rules, argued the federal government has no constitutional authority to protect a species found in only one state."

FWS SETS ASIDE FUNDS FOR WOLF-LIVESTOCK CONFLICT. The [East Oregonian](#) (9/28, 24K) reports that the FWS has "set aside \$356,000 to help ranchers in Oregon, Washington and Idaho deal with wolves around their livestock." The article notes that "a total of \$190,000 will be awarded for livestock losses, with \$100,000 to Idaho, \$83,690 to Washington and \$6,310 to Oregon." Oregon will "also receive \$66,000 for non-lethal prevention, along with \$100,000 to Washington."

FWS TO AWARD FUNDING TO SUPPORT NONLETHAL METHODS OF PROTECTING WOLVES AND LIVESTOCK. [KNAU-FM](#) Flagstaff, AZ (9/29, 1K) reports that the FWS will "award more than a quarter-million dollars to Arizona and New Mexico wildlife agencies." The grant is "designed to develop nonlethal methods of protection of Mexican gray wolves and livestock." The Wolf Livestock Demonstration Project will "allow ranchers to monitor wolf movements with radio telemetry equipment."

FWS PLANS CHEMICAL LAMPREY TREATMENT THROUGH OWASCO RIVER. The [Auburn \(NY\) Citizen](#) (9/29, 53K) reports that "representatives with the federal Fish and Wildlife Service will chemically treat a large section of the Owasco River to control its lamprey population." The lampricides are "designed to kill sea lamprey larvae burrowed at the stream bottom as part of the Lake Ontario tributary."

ADDITIONAL COVERAGE NEW ENGLAND COTTONTAIL RABBIT POISED FOR A COMEBACK. Additional coverage that the Interior Department "took the New England cottontail off the list of species under consideration for protection under the Endangered Species Act" was provided by the [Bangor \(ME\) Daily News](#) (9/28, 223K).

OP-ED MOVE TO PROTECT CHIMPANZEES COULD BACKFIRE. In an op-ed for the [New York Times](#) (9/27, Walsh, Subscription Publication, 11.82M), Peter D. Walsh, a lecturer in primate ecology at Cambridge University, writes that a new listing under the Endangered Species Act that "effectively bans the use of captive chimpanzees in human biomedical research" could "unintentionally deliver a serious blow to wild apes." Walsh claims that "efforts to develop and deploy vaccines against Ebola and other infectious diseases ravaging these animals could grind to a halt." He notes that "commercial bushmeat hunting and habitat loss have caused catastrophic declines in chimpanzee and gorilla populations." However, "disease has become a third driver of the unfolding African ape apocalypse."

National Park Service:

NPS PREPARES FOR CENTENNIAL CELEBRATION. The [West Chester \(PA\) Daily Local News](#) (9/28, 50K) reports that NPS Jonathan B. Jarvis recently delivered an address at the Outdoor Writers Association of America conference in Knoxville, TN. After the speech, Jarvis "discussed some of the plans his agency has to celebrate their upcoming centennial anniversary." Jarvis emphasized that the NPS' mission is "to connect the next generation to our National Parks."

West Virginia Fourth Graders Taking Part In "Every Kid In A Park" Initiative. The [AP](#) (9/29, 51K) reports that "hundreds of students in southern West Virginia will see a performance at Theatre West Virginia as part of a federal government campaign to get children to enjoy the outdoors." The NPS says "nearly 1,100 fourth graders from Fayette, Nicholas, Raleigh and Summers counties are signed up to attend the live show at the Cliffside Amphitheatre in Grandview on Wednesday." The article notes that "the field trip was made possible through a National Park Foundation transportation grant with help from the Hinton Area Foundation and Theatre West Virginia."

Additional coverage of the "Every Kid in a Park" initiative was provided by the [Casper \(WY\) Star-Tribune](#) (9/28, 115K).

NPS MONITORING ARCH RENOVATION PROJECT. The [St. Louis Post-Dispatch](#) (9/29, 968K) reports that "the \$380 million renovation of the Gateway Arch grounds" is "the largest single project in National Park Service history." The article notes that "it is the first renovation to rely on a local tax, Park Service officials say." It is also "one of the most complicated projects ever — with six partners and at least three land owners." And "at the same time, it's a national model for one of the Park Service's most important current initiatives: Connecting urban residents to their national parks."

ZION NATIONAL PARK REVIEWING RESPONSE TO FLOOD. [KSTU-TV](#) Salt Lake City (9/28, 180K) reports that "Zion National Park is considering changing its permit system when it comes to back-country exploration." The park is "also reevaluating the whole operation, from what information it gathers from the National Weather Service to what information it supplies to those who visit." Parks rangers said "they are performing an 'after-action review' to check to see if they believe the park may have done anything wrong."

ROCKY MOUNTAIN NATIONAL PARK TO RAISE FEES THURSDAY. The [AP](#) (9/29, 2.28M) reports, Rocky Mountain National Park is "introducing increased entrance fees this week, including a new day use pass." Also, "next year the park will increase campground fees to \$26."

ARCHES NATIONAL PARK ASKS VISITORS NOT TO THROW COINS IN DESERT POTHoles. The [AP](#) (9/29, 2.28M) reports that "Arches National Park officials are asking visitors not to throw coins in ephemeral pools, reminding them that desert potholes are not wishing wells." Park rangers "found a number of coins Sept. 22, they believe they were left there by passing hikers."

TWO MEN, DOG RESCUED FROM SAILBOAT OFF OCEAN BEACH. The [San Francisco Chronicle](#) (9/29, Subscription Publication, 3.35M) reports that "two men and a dog were rescued Monday after their sailboat was in distress off Ocean Beach, leading to the arrest of one of the men for unrelated outstanding warrants, U.S. Park officials said." According to Golden Gate National Recreation Area spokeswoman Alexandra Picavet, "the arrested man, of San Francisco, was in a 36-foot sailboat with a man from Texas when National Park Service Rangers and U.S. Park Police retrieved the men."

Additional coverage was provided by [KPIX-TV](#) San Francisco (9/28, 116K).

HIKER RESCUED AFTER NIGHT IN JOSHUA TREE NATIONAL PARK. The [Palm Springs \(CA\) Desert Sun](#) (9/28, 99K) reports that "after spending a night in Joshua Tree National Park, a 21-year-old man from Great Britain was found by rescuers and transported to Hi-Desert Medical Center on Sunday morning." According to the NPS, "the man had been hiking in the park's Rattlesnake Canyon with a group on Saturday evening, but they were separated."

OP-ED NPS CAN'T AFFORD NEW GRAND CANYON MONUMENT. In an op-ed for the [Arizona Republic](#) (9/28, 1.12M), Kurt R. Davis, chairman of the Arizona Game and

"while the infrastructure, facilities and visitor experience at our national parks continue to deteriorate, groups like the Sierra Club should bear responsibility for adding to this bloated backlog if their proposal to create the 1.7-million-acre Grand Canyon Watershed National Monument becomes reality." Davis claims that the proposed Grand Canyon Watershed National Monument would cause "further damage to the foundation of our National Park Service system."

Scheduled Floor Action

House

Tuesday, Sept. 29, Noon

The House reconvenes at noon for legislative business and is expected to consider measures under suspension of the rules. The chamber is also expected to consider a bill (HR 3495) that would allow states to exclude from Medicare reimbursement any health care providers that are involved in abortions.

Agenda

HR 3495 — Women's Public Health and Safety Act

HR 3596 — A bill to amend title 38, United States Code, to extend certain expiring provisions of law administered by the Secretary of Veterans Affairs, and for other purposes

HR 3595 — A bill to extend the authorization to carry out the replacement of the existing medical center of the Department of Veterans Affairs in Denver, Colorado, and for other purposes.

Wednesday, Sept. 30, Noon

The House reconvenes at noon for legislative business and is expected to consider a bill (HR ?) that would prohibit sanctions relief for Iran unless it first pays the court-ordered damages it owes to victims of Iranian-backed acts of terrorism and a measure (Senate amendment to HR 719) that would continue government funding for FY2016.

Agenda

HR 719 — TSA Office of Inspection Accountability Act

Thursday, Oct. 1, 9 a.m.

The House reconvenes at 9 a.m. for legislative business. The chamber may consider a conference report to accompany a bill (HR 1735) that would authorize national defense programs and funding for FY2016.

Agenda

HR 1735 — Fiscal 2016 Defense Authorization (NDAA)

Friday, Oct. 2

No votes are expected

Senate

During the balance of the week, Senate may consider any cleared legislative and executive business.

Recent Legislative Activity of Interest

Senate:

By Mr. **MURPHY** (for himself and Ms. **COLLINS**):

S. 2076. A bill to establish a task force to review policies and measures to promote, and to develop best practices for, reduction of short-lived climate pollutants, and for other purposes; to the Committee on Environment and Public Works.

By Mr. **PETERS** (for himself and Ms. **STABENOW**):

S. 2080. A bill to amend title 49, United States Code, to enhance pipeline safety, to provide communities with access to improved information concerning the equipment and operations of pipeline facilities, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Measures Passed:

National Estuaries Week: Senate agreed to [S. Res. 269](#), designating the week of September 19 through September 26, 2015, as ``National Estuaries Week".

House:

By Mr. **FLEISCHMANN**:

H.R. 3599. A bill to take certain Federal lands in Tennessee into trust for the benefit of the Eastern Band of Cherokee Indians, and for other purposes; to the Committee on Natural Resources.

By Mr. **BEN RAY LUJÁN** of New Mexico (for himself, Ms. **MICHELLE LUJAN GRISHAM** of New Mexico, Mr. **POLIS**, Mr. **PERLMUTTER**, and Ms. **DEGETTE**):

H.R. 3602. A bill to provide compensation to injured persons relating to the Gold King Mine spill, to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 to address mining-related issues, and for other purposes; to the Committee on Transportation and Infrastructure, and in addition to the Committees on the Judiciary, and Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mrs. **NOEM**:

H.R. 3603. A bill to grant a Federal charter to the National American Indian Veterans, Incorporated; to the Committee on the Judiciary.

By Ms. **NORTON**:

H.R. 3604. A bill to establish a grant program to assist States to establish or expand universal prekindergarten in public schools and public charter schools; to the Committee on Education and the Workforce.

By Mr. **SABLAN** (for himself, Ms. **BORDALLO**, and Ms. **PLASKETT**):

H.R. 3607. A bill to increase from 10 to 15 years the term of office of the judges of the district courts of the Northern Mariana Islands, Guam, and the United States Virgin Islands, and for other purposes; to the Committee on the Judiciary.

By Ms. **VELÁZQUEZ** (for herself, Ms. **MAXINE WATERS** of California, and Mr. **SERRANO**):

H.R. 3610. A bill to amend the Investment Company Act of 1940 to terminate the exemption of companies located in Puerto Rico, the Virgin Islands, and any other possession of the United States; to the Committee on Financial Services.

By Mr. **GUINTA**:

H.R. 3615. A bill to delay enforcement and establishment of certain water quality standards within the Great Bay Estuary, and for other purposes; to the Committee on Transportation and Infrastructure.

By Mr. **GRAVES** of Missouri:

H.R. 3617. A bill to improve efficiency by consolidating some duplicative and overlapping Government programs; to the Committee on Oversight and Government Reform, and in addition to the Committee on Appropriations, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. **NORTON**:

H.R. 3619. A bill to redesignate Rock Creek Park in the District of Columbia as Rock Creek National Park; to the Committee on Natural Resources.

Report Filed: A report was filed today as follows:

[H.R. 1613](#), to reduce the operation and maintenance costs associated with the Federal fleet by encouraging the use of remanufactured parts, and for other purposes (H. Rept. 114-266).

[H.R. 702](#), to adapt to changing crude oil market conditions, with an amendment (H. Rept. 114-267, Part 1).

Passed the House:

RAPID Act: The House passed [H.R. 348](#), to provide for improved coordination of agency actions in the preparation and adoption of environmental documents for permitting determinations, by a recorded [D1013](#) vote of 233 ayes to 170 noes, Roll No. 518. Consideration began yesterday, September 24th.

Senate:

By Mr. **MURPHY** (for himself and Ms. **COLLINS**):

S. 2076. A bill to establish a task force to review policies and measures to promote, and to develop best practices for, reduction of short-lived climate pollutants, and for other purposes; to the Committee on Environment and Public Works.

By Mr. **PETERS** (for himself and Ms. **STABENOW**):

S. 2080. A bill to amend title 49, United States Code, to enhance pipeline safety, to provide communities with access to improved information concerning the equipment and operations of pipeline facilities, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Measures Passed:

National Estuaries Week: Senate agreed to S. Res. 269, designating the week of September 19 through September 26, 2015, as ``National Estuaries Week'`.

House:

By Mr. **FLEISCHMANN**:

H.R. 3599. A bill to take certain Federal lands in Tennessee into trust for the benefit of the Eastern Band of Cherokee Indians, and for other purposes; to the Committee on Natural Resources.

By Mr. **BEN RAY LUJÁN** of New Mexico (for himself, Ms. **MICHELLE LUJAN GRISHAM** of New Mexico, Mr. **POLIS**, Mr. **PERLMUTTER**, and Ms. **DEGETTE**):

H.R. 3602. A bill to provide compensation to injured persons relating to the Gold King Mine spill, to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 to address mining-related issues, and for other purposes; to the Committee on Transportation and Infrastructure, and in addition to the Committees on the Judiciary, and Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mrs. **NOEM**:

H.R. 3603. A bill to grant a Federal charter to the National American Indian Veterans, Incorporated; to the Committee on the Judiciary.

By Ms. **NORTON**:

H.R. 3604. A bill to establish a grant program to assist States to establish or expand universal prekindergarten in public schools and public charter schools; to the Committee on Education and the Workforce.

By Mr. **SABLAN** (for himself, Ms. **BORDALLO**, and Ms. **PLASKETT**):

H.R. 3607. A bill to increase from 10 to 15 years the term of office of the judges of the district courts of the Northern Mariana Islands, Guam, and the United States Virgin Islands, and for other purposes; to the Committee on the Judiciary.

By Ms. **VELÁZQUEZ** (for herself, Ms. **MAXINE WATERS** of California, and Mr. **SERRANO**):

H.R. 3610. A bill to amend the Investment Company Act of 1940 to terminate the exemption of companies located in Puerto Rico, the Virgin Islands, and any other possession of the United States; to the Committee on Financial Services.

By Mr. **GUINTA**:

H.R. 3615. A bill to delay enforcement and establishment of certain water quality standards within the Great Bay Estuary, and for other purposes; to the Committee on Transportation and Infrastructure.

By Mr. **GRAVES** of Missouri:

H.R. 3617. A bill to improve efficiency by consolidating some duplicative and overlapping Government programs; to the Committee on Oversight and Government Reform, and in addition to the Committee on Appropriations, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Ms. **NORTON**:

H.R. 3619. A bill to redesignate Rock Creek Park in the District of Columbia as Rock Creek National Park; to the Committee on Natural Resources.

Report Filed: A report was filed today as follows:

H.R. 1613, to reduce the operation and maintenance costs associated with the Federal fleet by encouraging the use of remanufactured parts, and for other purposes (H. Rept. 114-266).

H.R. 702, to adapt to changing crude oil market conditions, with an amendment (H. Rept. 114-267, Part 1).

Passed the House:

RAPID Act: The House passed H.R. 348, to provide for improved coordination of agency actions in the preparation and adoption of environmental documents for permitting determinations, by a recorded D1013vote of 233 ayes to 170 noes, Roll No. 518. Consideration began yesterday, September 24th.
