Scheduled Floor Action

House

Friday, Sept. 25, 9 a.m.

The House reconvenes at 9 a.m. for legislative business and is expected to consider a bill (HR 348) that would expedite the approval process of certain projects.

Agenda

HR 348 — Responsibly And Professionally Invigorating Development (RAPID) Act

Senate

Friday, Sept. 25

The Senate is expected to be in session

Recent Legislative Activity of Interest

Senate:

By Mr. **UDALL** (for himself, Mr. **HEINRICH**, and Mr. **BENNET**):

S. 2063. A bill to provide compensation to injured persons relating to the Gold King Mine spill, to amend the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 to address mining-related issues, and for other purposes; to the Committee on the Judiciary.

By Mr. **WYDEN** (for himself and Mr. **MERKLEY**):

S. 2069. A bill to amend the Omnibus Public Land Management Act of 2009 to modify provisions relating to certain land exchanges in the Mt. Hood Wilderness in the State of Oregon; to the Committee on Energy and Natural Resources.

Measures Reported:

H.R. 34, to authorize and strengthen the tsunami detection, forecast, warning, research, and mitigation program of the National Oceanic and Atmospheric Administration, with an amendment in the nature of a substitute. (S. Rept. No. 114-146)

Albuquerque Indian School Land Transfer Act: Senate passed S. 986, to require the Secretary of the Interior to take into trust 4 parcels of Federal land for the benefit of certain Indian Pueblos in the State of New Mexico.

House:

By Mrs. **MILLER** of Michigan (for herself and Mr. **MCCAUL**):

H.R. 3586. A bill to amend the Homeland Security Act of 2002 to improve border and maritime security coordination in the Department of Homeland Security, and for other purposes; to the Committee on Homeland Security, and in addition to the Committee on Transportation and Infrastructure, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. **SCHWEIKERT**:

H.R. 3592. A bill to establish a pilot program to reduce the number of vehicles owned by certain Federal departments and increase the use of ride-sharing services; to the Committee on Oversight and Government Reform.

By Mr. **SCHWEIKERT**:

H.R. 3593. A bill to direct the Administrator of the Federal Aviation Administration to issue or revise regulations to ensure that a person who holds a private pilot certificate may communicate with the public to facilitate certain shared cost flights, and for other purposes; to the Committee on Transportation and Infrastructure.

Hello –

As discussed, Ranking Member Grijalva will be inviting the Secretary to AZ for a public meeting, as well as a meeting with Tribal leaders, to discuss the merits of a possible national monument designation for the Grand Canyon area.

Below are potential dates for these events. Please let us know if any of these might work and we will get going on a formal invitation.

Thanks.

Subject: FW: Public/Tribal meeting in AZ

Good evening –

I discussed the various strategic reasons for delaying a public meeting on this with Mr. Grijalva and he is fine with playing this in whatever way works best. I would raise the possibility of timing a possible designation to coincide with the NPS Centennial in August – is that something to shoot for and if so, would that mean doing the public/tribal meetings before summer?

Also – if we are delaying a public/tribal meeting with the Secretary until summer, is there something we can do in the interim to keep Tribal stakeholders engaged? For example, would a meeting with an appropriate DoI official, either in AZ or in DC, be possible in the interim?

Thanks.

Hmmm. We don't have any authority to do this. We need to direct him to CEQ. Happy to do so unless one of you will.

Good evening –

I discussed the various strategic reasons for delaying a public meeting on this with Mr. Grijalva and he is fine with playing this in whatever way works best. I would raise the possibility of timing a possible designation to coincide with the NPS Centennial in August – is that something to shoot for and if so, would that mean doing the public/tribal meetings before summer?

Also – if we are delaying a public/tribal meeting with the Secretary until summer, is there something we can do in the interim to keep Tribal stakeholders engaged? For example, would a meeting with an appropriate Dol official, either in AZ or in DC, be possible in the interim?

Thanks.

David--

We're starting to prepare for the meeting with Ranking Member Grijalva on the 7th of December. Are there specific issues you want us to flag for Secretary Jewell in this meeting? I believe you mentioned some Grand Canyon Mining Withdrawal issues and obviously Gold King Mine, but wanted to see if there were other items.

Thanks,
Stephenne

Subject: RE: Meeting with Ranking Member Grijalva

Good morning.

His main focus will be the proposal for a National Monument around GRCA. He has introduced a legislative proposal (H.R. 3882), developed with the Tribes, but we are also focused on a designation under the

Antiquities Act. We have been working with Christy Goldfuss and Nicole Buffa (the majority of the area is FS, but not all).

Beyond that: LWCF, ESA, Gold King, NPS 100th.

<<a>Cristina.Villa@mail.house.gov>

Good morning.

Ranking Member Grijalva would like to arrange a phone call with the Secretary. The agenda would include: the NPS Centennial, the Grand Canyon, and various BLM issues in Arizona.

Please let us know.

Thanks.

Subject: Call with the Ranking Member

To: "Neimeyer, Sarah" <<a>sarah_neimeyer@ios.doi.gov>, "Stephenne Harding (<a>stephenne_harding@ios.doi.gov)"

<<a>stephenne_harding@ios.doi.gov>

Cc: "Guerrero, Bertha" <<a>Bertha.Guerrero@mail.house.gov>, "Villa, Cristina" <<a>Cristina.Villa@mail.house.gov>

Good morning.

Ranking Member Grijalva would like to arrange a phone call with the Secretary. The agenda would include: the NPS Centennial, the Grand Canyon, and various BLM issues in Arizona.

Please let us know.

Thanks.

DOI in the News:

SECRETARY JEWELL AMONG CABINET OFFICIALS TO ATTEND PARIS CLIMATE TALKS.

E&E Publishing (11/24, 705) reports that President Obama will “kick off his trip to Paris for the upcoming international climate negotiations by meeting with Chinese President Xi Jinping,” White House officials announced on Tuesday. Following the meeting with Xi, “Obama will participate in the opening ceremony and session of the climate talks where several heads of state are scheduled to speak, officials said.” Interior Secretary Sally Jewell will be among the Cabinet officials that will be present “throughout the two-week U.N. negotiations.”

Additional coverage was provided by **Reuters** (11/25, Volcovici), **Voice Chronicle** (11/25), and the **Tri-State Livestock News (SD)** (11/25).

INTERIOR NETWORKS HACKED 19 TIMES IN RECENT YEARS.

NextGov (11/25, 2K) reports that “foreign intelligence agents and other hackers attacked Interior Department networks 19 times in recent years,” and retrieved “unknown amounts of stolen data, according to agency inspectors.” The attacks are “unrelated to a previously disclosed assault on Interior networks connected to Office of Personnel Management systems, the agency says.” According to the article, “in the 19 previously undisclosed cybersecurity incidents, Chinese attackers and hackers with European network addresses copied data strictly from Interior systems.”

MOVEMENT PUSHES OUTDOOR ALTERNATIVE TO BLACK FRIDAY.

The **Las Vegas Review-Journal** (11/25, 403K) reports on Opt Outside, an “idea was spawned by outdoor retailer REI, which announced plans earlier this year to close all 143 of its stores the day after Thanksgiving and give its workers a paid day off to enjoy nature.” The company, once led by Interior Secretary Sally Jewell, is also “encouraging its employees and customers to post pictures of their Black Friday adventures on social media using the hashtag #OptOutside.” The article notes that Lake Mead National Recreation Area and Red Rock Canyon National Conservation Area are “getting in on the act, pitching themselves as ideal places to escape the annual retail rampage.”

LAWMAKERS PRESS FOR FULL PILT FUNDING. The **Missoulian (MT)** (11/25, 118K) reports that “Montana’s congressional delegation is joining with dozens of other U.S. senators and representatives in urging their leaders to figure out quickly how to fully fund” the Payments In Lieu of Taxes program. Sens. Steve Daines and Jon Tester “joined 33 fellow senators in signing a letter sent Friday” to Majority Leader Mitch McConnell and Minority Leader Harry Reid. Also, Rep. Ryan Zinke is “among those signing onto a similar letter going to House Speaker Paul Ryan and Minority Leader Nancy Pelosi.”

Additional coverage was provided by the **Billings (MT) Gazette** (11/25, 200K) and the **Ravalli (MT) Republic** (11/25, 19K).

JUDGE WON’T ISSUE DECISION IN NEVADA SAGE GROUSE CASE BEFORE CHRISTMAS.

The **AP** (11/25, 2.15M) reports that U.S. District Judge Miranda Du is “postponing a decision on whether to block U.S. regulations protecting the greater sage grouse, partly because she’s not clear if the rules are really to blame for delays in construction of a rural water supply tank near Great Basin National Park along the border with Utah.” Du “granted an extension so lawyers can file additional briefs to supplement arguments they made last week during a two-day hearing in Reno.” The article notes that “that means she won’t rule before Christmas on the request by nine Nevada counties and two mining companies to issue a temporary injunction freezing the regulations.”

Additional coverage was provided by the **Sacramento (CA) Bee** (11/25, 515K), the **Provo (UT) Daily Herald** (11/25, 155K), the **Washington (DC) Times** (11/25, Sonner, 283K), the **Denver (CO) Post** (11/25, Press, 825K), the **Fresno (CA) Bee** (11/25, 270K), and **Natural Gas Intelligence** (11/25, Subscription Publication).

IDAHO OFFICIALS APPROVE SAGE GROUSE PLAN.

The **AP** (11/25, Ridler) reports that the Idaho Land Board has approved “the state’s plan to protect habitat for greater sage grouse on endowment lands, despite frustration with federal land managers.” The AP explains that “implementation of the plan for endowment lands was made contingent in April on federal agencies incorporating a much larger Idaho plan called the Governor’s Sage-Grouse Alternative concerning federal lands in Idaho.” The AP says that “Federal officials did include the governor’s plan but added more restrictions in late September when the Obama administration said greater

sage grouse didn't require federal protections under the Endangered Species Act." Gov. C.L. "Butch" Otter said just before Tuesday's vote, "I'm convinced that, like many federal agencies, it's not about saving the bird, it's about control. And that kind of control is just unwarranted in this case."

PEW SURVEY: AMERICANS DISTRUST FEDERAL GOVERNMENT. The [Washington Post](#) (11/25, Davidson, 7.78M) "Federal Eye" blog reports that a new Pew Research Center survey, titled "Beyond Distrust," found Americans' overall views of the federal government "are very negative." Only one-fifth of those surveyed said they trust government "at least most of the time and think government programs are well run." Out of 17 Federal agencies listed, 13 received favorable views – with the US Postal Service at the top and the VA and IRS ranked at the bottom. The NPS, the Centers for Disease Control and Prevention and NASA "all have favorability ratings of 70 percent or more."

UTAH LAW SCHOOL LAUNCHES ENVIRONMENTAL, NATURAL RESOURCES COLLABORATION INITIATIVE. [Newswise](#) (11/25, 1K) reports that "a new 3-part initiative launched this month by the University of Utah S.J. Quinney College of Law Environmental Dispute Resolution Program aims to support the use of collaboration by agencies working on environmental and natural resource issues in the west." Newswise explains that "the first part occurred recently, when more than 40 leaders from nearly 30 state and federal agencies gathered at the law school for a one-day 'Forum on Collaboration.'" The forum included representatives from various state and Federal agencies, including "the Bureau of Land Management, US Forest Service, US EPA, Federal Highway Administration, Natural Resources Conservation Service, National Parks Service, Bureau of Reclamation, US Geological Survey, US Fish and Wildlife Service, and Bureau of Indian Affairs."

ENVIRONMENTALISTS WORK TO PROTECT FIVE NEW AREAS IN WASHOE COUNTY, NEVADA. The [Reno \(NV\) News & Review](#) (11/25, Fitzgerald, 75K) reports that "for all who appreciate Nevada for its wildlife and wide-open spaces, Friends of Nevada Wilderness are working to protect five new wilderness areas in 2016 through their Wild Washoe Wilderness Campaign." The News & Review explains that "the proposed wilderness areas, which range in size from 23,600 to 235,000 acres, are located in northern Washoe County, west of the Black Rock Desert and Sheldon National Wildlife Refuge." The report says that "to be eligible for federal protection under the Wilderness Act of 1964, a proposed wilderness area must consist of a parcel of at least 5,000 acres of undeveloped land with 'outstanding opportunities' for solitude and primitive recreation, such as hiking or hunting."

ADDITIONAL COVERAGE: SECRETARY JEWELL VISITS TOUTS EDUCATIONAL INITIATIVES IN ARIZONA. Additional coverage of the Interior Secretary Sally Jewell's visit to Winslow, Arizona was provided by the [Flagstaff \(AZ\) Navajo-Hopi Observer](#) (11/25, 43K).

ADVOCATE SAYS ALASKANS "HAVE A RIGHT TO SNOW AND ICE." Robin Bronen, Executive Director of Alaska Institute for Justice, writes at the [Huffington Post](#) (11/25, Bronen, 251K) that "September and October were traditionally the months when the Bering and Chukchi seas began to freeze for the winter," however, "now these seas may not freeze until December or later." She explains that "loss of sea ice causes coastal villages to be exposed and vulnerable when storms occur." Bronen says that "we deserve the attention and help of the American people and the federal government" and that "due to intense and prolonged advocacy efforts, Interior Secretary Sally Jewell traveled to Kivalina to meet community residents in February 2015" with President Obama following in August. However, "despite these visits, no community knows when or if it will be able to relocate to higher ground and protect their unique way of life and connection to the land of their ancestors."

Empowering Native American Communities:

GROUP OF HAWAIIANS ASK SUPREME COURT TO BLOCK VOTE ON FUTURE TRIBAL PLAN. The [SCOTUSblog](#) (11/25, 7K) reports that "a group of Hawaiians, some of whom won't be able to vote in a special election that ends on November 30 that is a prelude to recognizing a new Indian-like tribe including many residents, asked the Supreme Court to temporarily stop the completion of that election until their challenge can be decided." They argued that "the election is based along strict racial lines, and is thus unconstitutional under the Fifteenth Amendment."

PROFESSOR SAYS DOLLAR GENERAL CASE THREATENS TRIBAL AUTHORITY. Ned Blackhawk, a professor of history and American studies at Yale, writes at the [New York Times](#) (11/25, Blackhawk,

Subscription Publication, 11.64M) that Thanksgiving began in partnership between Native American communities and their neighbors but that “tribal governments now face a grave threat to this kind of partnership and to their very sovereignty.” He says that “the Supreme Court is scheduled to hear oral arguments in a case regarding alleged sexual assaults by a Dollar General manager against a tribal minor, a 13-year-old who apprenticed in a store on Choctaw tribal lands in Mississippi.” Blackhawk explains that Dollar General is challenging tribal governments’ jurisdiction over businesses in Indian country. He concludes that “the Supreme Court should affirm the lower court rulings and preserve tribal authority in tribal lands.”

Tackling America’s Water Challenges:

SEN. HEINRICH: DAMMING OR DIVERTING THE GILA RIVER IS NOT A FISCALLY RESPONSIBLE.

[KRWG-FM](#) Las Cruces, NM (11/25, 1K) reports that Sen. Martin Heinrich issued a statement after the Interior Department approved the Gila River agreement. Heinrich said, “We owe New Mexico’s taxpayers cost effective, science-based solutions if we are to manage our limited water supplies in this era of drought, climate change, and constrained budgets. Damming or diverting the Gila River simply does not meet that standard. I believe that now would be a good time for the state to put forward a more fiscally responsible alternative.”

Additional coverage of the agreement was provided by the [Silver City \(NM\) Daily Press](#) (11/24) and the [Santa Fe \(NM\) Reporter](#) (11/25, 69K).

Securing America’s Energy Future:

Renewable Energy:

ADDITIONAL COVERAGE: INTERIOR TO ASSESS WIND ENERGY OFF SOUTH CAROLINA COAST.

Additional coverage that the Interior Department is “assessing the offshore wind industry’s interest in acquiring commercial wind leases off the coast of South Carolina” was provided by [reNews](#) (11/25), the [Columbia \(SC\) State](#) (11/25, 322K), the [Charleston \(SC\) Post and Courier](#) (11/24, Slade, 291K), [Clean Energy](#) (11/24), and [Recharge News](#) (11/25, 633).

Onshore Energy Development:

INTERIOR PLANS TO CANCEL BADGER-TWO MEDICINE LEASE. [EnergyWire](#) (11/24, Subscription Publication) reports that “federal officials seem poised to cancel plans for oil and gas development in a prized area of Lewis and Clark National Forest in Montana, likely ending decades of delays and indecision over drilling on a site considered sacred by some in the Blackfeet Indian Nation.” The Interior Department wrote in a legal filing that it would “initiate the process for cancellation” of the contested lease in the Badger-Two Medicine area of the national forest. According to the article, “the filing notes that the agency has not yet made a final decision but that initial findings indicate the lease was issued without full compliance with the National Environmental Policy Act and National Historic Preservation Act.”

Additional coverage was provided by the [Indian Country Today Media Network](#) (11/24, 47K), the [Montana Standard](#) (11/25, 36K), the [Missoula \(MT\) Independent](#) (11/25, 65K), the [Marietta \(GA\) Daily Journal](#) (11/25, 44K), the [Fuel Fix \(TX\)](#) (11/24, 28K), [Montana Public Radio](#) (11/25), the [Navajo Times \(AZ\)](#) (11/25, 66K), and [Manufacturing](#) (11/24, 4K).

HOUSE PANEL LEADERS PRESS FOR EXTENSION OF PUBLIC COMMENT PERIOD ON METHANE RULES. [Politico Pro](#) (11/24) reports that two senior House Republicans on Tuesday urged the EPA and the Interior Department “to further extend the public comment period for its proposed methane rules for the oil and gas sector and to more closely align their respective processes for reining in the greenhouse gas.” Reps. Ed Whitfield and Doug Lamborn, who chair Energy and Commerce and Natural Resources Committee subpanel, in a letter to EPA chief Gina McCarthy and Interior Secretary Sally Jewell, wrote that “the parallel methane regulations ‘have the potential to propose requirements that are conflicting or duplicative, and to create significant uncertainty for future operations in the oil and gas sector.’”

Additional coverage was provided by [Law360](#) (11/25, 30K).

PHILLIPS 66 MAKES NEW QUAKE PLANS IN OKLAHOMA. [NPR](#) (11/24, Wertz, 1.78M) reports that Phillips 66, a refiner with 700,000 barrels of storage capacity in Cushing, Okla., “has overhauled how it plans for

earthquakes, a sign U.S. energy companies are starting to react to rising seismicity around the world's largest crude hub." NPR says that "the changes include new protocols for inspecting the health of crude tanks, potentially halting operations after temblors, and monitoring quake alerts." NPR points out that "in October, David McNamara with the U.S. Geological Survey warned in a peer-reviewed paper that the faults in Cushing are similar to those that have produced earthquakes strong enough to damage oil storage tanks and other infrastructure at the hub, which currently holds more than 50 million barrels of crude."

Additional coverage was provided by [Reuters](#) (11/24, Hampton).

SALT LAKE TRIBUNE: MOAB LEASING PLAN REPRESENTS REALISTIC COMPROMISE. In an editorial, the [Salt Lake \(UT\) Tribune](#) (11/25, 339K) reports that due to the uniqueness of the area, the debate between Utah's extractive and tourist industries is more of an even fight in Moab and Grand County than it is in some other counties. However, the Tribune says that "the stakes of a Master Leasing Plan are much lower than they are in public lands legislation like the Public Lands Initiative that Reps. Rob Bishop and Jason Chaffetz have pursued, which would include land swaps and wilderness designations." The paper concludes that "Utah's biggest public lands battles are still ahead, but give the players in the Moab Master Leasing Plan credit for biting off what they can chew. If it's going to be a model, then other players will need to have similarly realistic appetites."

Offshore Energy Development:

BSEE HOLDS MEETING ON TECHNOLOGY READINESS LEVELS. The [Marine Link](#) (11/25, 1K) reports that BSEE "staff participated in a workgroup meeting at the bureau's Ohmsett facility in Leonardo, N.J., as part of the workgroup's efforts to define Technology Readiness Levels for use in the oil spill response community." BSEE staff "discussed the criteria that could be used to determine the readiness of technology with equipment manufacturers, industry, and facility representatives, drawing from their different perspectives and expertise." The discussions are part of the BSEE-funded project Technology Readiness Level Definitions for Oil Spill Response Technologies and Equipment.

America's Great Outdoors:

Bureau of Land Management:

BLM SOUTH DAKOTA FIELD OFFICE TO MOVE TO BELLE FOURCHE INDUSTRIAL & RAIL PARK. The [Rapid City \(SD\) Journal](#) (11/25, 171K) reports that the BLM's South Dakota Field Office will "anchor the eastern gateway to the Belle Fourche Industrial & Rail Park with new office and storage facilities." According to the article, "the 18 full time and summer seasonal employees will be moving from several facilities in Belle Fourche into a 5,600 square foot office facility with another 3,300 square feet of warehouse and 32,000 square feet of storage yard." According to Diane Friez, district manager for the BLM Eastern Montana/Dakotas district, "the new facility will consolidate employees in three locations, supplies and equipment from two more locations in Belle Fourche."

PHOTOGRAPHER SHAPES PUBLIC'S VIEW OF BLM. The [Greenwire](#) (11/24, Subscription Publication) profiles BLM wilderness specialist Bob Wick, the agency's unofficial photographer. Wick's images have "exposed thousands of Americans to the agency's National Conservation Lands." According to the article, "photos are shaping the public's view of BLM, an agency long known for promoting oil drilling, mining and grazing but less known for supporting outdoor recreation."

BLM ALLOWS HARVEST OF OREGON TRUFFLES WITH PERMIT. The [Salem \(OR\) Statesman Journal](#) (11/24, 141K) reports that the Salem District of BLM earlier this month "became the first agency to allow harvest of truffles on public land with a permit." According to the article, "the permits are only open to those who hunt truffles with a trained dog on specific patches of Salem BLM's 403,000 acres in the Coast Range and Cascade foothills." The article notes that "it will remain illegal to dig them up with a rake, which is popular but is seen as damaging to the environment."

TWO INDICTED FOR GROWING MARIJUANA IN COLORADO. The [Denver Post](#) (11/25, Mcghee, 825K) reports that the US Attorney's Office said a grand jury in Denver indicted Luis Adolfo Garcia and Luis Rios-Cortes on allegations they tended large, illegal marijuana grows near the Dolores River in western Colorado. The Bureau of Land Management found the grows, and about 1,720 pounds of marijuana was recovered in

the raids that led to the charges. US Attorney John Walsh said, “As we work with the DEA, BLM and our local law enforcement partners, we are seizing large amounts of marijuana.”

Fish and Wildlife Service:

SCIENTISTS DIFFER ON GREAT LAKES WOLF PROTECTIONS. The [AP](#) (11/25, 2.15M) reports that “gray wolves in the western Great Lakes region should not yet be removed from the federal endangered species list, a group of scientists and scholars said Tuesday, disagreeing with colleagues who said the population has rebounded sufficiently.” According to the article, “lifting government protection from wolves in Michigan, Minnesota and Wisconsin could be justified if and when the U.S. Fish and Wildlife Service ‘uses the best available science that justifies delisting.’ Currently it does not.” They said that “they were responding to 26 colleagues who sent a letter last week to U.S. Interior Secretary Sally Jewell saying it was time for wolves to lose their endangered status in the western Great Lakes, where their combined population is estimated at 3,700.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (11/25, Flesher, 283K), the [Milwaukee \(WI\) Journal Sentinel](#) (11/25, 691K), the [Minneapolis \(MN\) Star Tribune](#) (11/25, Flesher, 1.15M), [WISC-TV Madison \(WI\) Madison, WI](#) (11/25, 188K), [WWJ-TV Detroit \(MI\) Detroit](#) (11/24, 34K), [WHBL-AM Sheboygan \(WI\) Sheboygan, WI](#) (11/25, 1K), [WTAQ-AM Green Bay \(WI\) Green Bay, WI](#) (11/25, 4K), [WDIO-TV Duluth \(MN\) Duluth, MN](#) (11/25, 860), [WISN-TV Milwaukee \(WI\) Milwaukee](#) (11/25, 72K), and [WCCO-AM Minneapolis \(MN\) Minneapolis](#) (11/24, 70K).

Tribes Oppose Researchers’ Call For Delisting Gray Wolves. The [Indian Country Today Media Network](#) (11/24, 47K) reports that “more than two dozen wolf researchers—including the founder of the International Wolf Center—sent a letter on November 18 to the U.S. Secretary of the Interior calling for the gray wolf to again be delisted in the Minnesota, Michigan and Wisconsin.” However, Lacey Hill, wildlife specialist for the Bad River Band of Lake Superior Ojibwe in Wisconsin, said, “The tribes already have a stance that we want the wolves protected, we don’t want the wolves harvested.” The article notes that “the letter to Interior cites tribal governments among other agencies in the recovery of the gray wolf, but the philosophy of public hunting or trapping is not the philosophy endorsed by most tribes.” In fact, “for the Ojibwe in the area, the health of the wolf population has a unique cultural significance, tying the thriving of wolves to the thriving of the Ojibwe people.”

NEW WOLF PACK APPEARS IN WASHINGTON. The [Spokane \(WA\) Spokesman-Review](#) (11/24, 174K) reports that a new wolf pack – the Loup Loup Pack – has been “confirmed in north-central Washington near the towns of Omak and Twisp.”

The [Seattle Times](#) (11/25, 1.17M) reports that the new pack was confirmed by the FWS “on Tuesday, following a cluster of public wolf sightings.” Ann Froschauer, spokeswoman for the FWS, said “the precise number of animals in the Loup Loup Pack is not yet known, but biologists tracked up to six animals traveling together in recent snows.”

Additional coverage was provided by the [Salem \(OR\) Capital Press](#) (11/24, 113K).

FWS AWARDS GRANT TO BORDERLANDS RESEARCH INSTITUTE TO STUDY QUAIL, GRASSLANDS. The [Fort Stockton \(TX\) Pioneer](#) (11/25) reports that the FWS has “awarded a grant to the Borderlands Research Institute (BRI) at Sul Ross State University for a research project using quail as indicators of the health of Chihuahuan Desert grasslands.” The study is “to quantify grassland health using Montezuma, scaled, and Gambel’s quail as indicators.”

EFFORT SEEKS TO HELP ENDANGERED FISH RECOVER IN COLORADO RIVER BASIN. [KVNF-FM Paonia, CO](#) (11/25) reports on “a multi-state effort to save four species of fish native to the Colorado River Basin: humpback chub, Colorado pikeminnow, razorback sucker and bonytail.” The effort began “in 1988 when the federal government signed an agreement with Colorado, Utah and Wyoming, establishing what’s called the Upper Colorado River Endangered Fish Recovery Program.”

FRANCE’S BAN ON LION TROPHIES MAY SPREAD TO US. [Take Part](#) (11/24, Kirby, 154K) reports that “wild lions scored a win last week, as the French government announced that it would ban the import of lion parts from animals killed as trophies.” Meanwhile, “Carney Anne Nasser, an attorney at the Animal Legal Defense Fund, said the U.S. Fish and Wildlife Service has committed to relisting lions as ‘threatened’ under

the Endangered Species Act.” In addition, “there is the CECIL Act, introduced in Congress last July after an American dentist and trophy hunter killed the famous big cat.”

EARTHJUSTICE: CONGRESS SEEKS TO STRIP PROTECTIONS FOR ENDANGERED SPECIES. Marjorie Mulhall, Legislative Counsel for Earthjustice, writes at the [Huffington Post](#) (11/25, 251K) that “more than 80 bills and amendments have already been introduced this year in the U.S. House and Senate to weaken” the Endangered Species Act. She says that “there is a very real threat that some of these anti-species riders could become law, unless President Obama and Democratic leaders in Congress stand firm in rejecting them.” She points out in particular that there are riders that would remove Federal protections for gray wolves, the greater sage grouse, and the lesser prairie chicken. Mulhall says that this legislation “would prevent the U.S. Fish and Wildlife Service from even considering protecting the greater sage grouse, a species whose population has plummeted by as much as 90 percent due to development, including mining and drilling operations.”

National Park Service:

MUPPETS’ MISS PIGGY TO JOIN PERFORMERS FOR DC TREE LIGHTING. The [AP](#) (11/25, 2.15M) reports that “Miss Piggy of ‘The Muppets’ will join other performers at the lighting of the National Christmas Tree in Washington next week.” The NPS and the National Park Foundation announced Tuesday that Miss Piggy will “help kick off the holiday season at the lighting on Dec. 3 on the Ellipse near the White House.” According to the article, “other performers set to appear include Fall Out Boy; Trombone Shorty; Crosby, Stills & Nash; Andra Day; Tori Kelly; Aloe Blacc; Kelsea Ballerini; and the Joyous String Quartet.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (11/25, Press, 7.78M), the [Washington \(DC\) Times](#) (11/25, 283K), and the [Daily Mail](#) (11/25, 5.31M).

PARTNERSHIP WITH PHOTOGRAPHER TO BOOST NATIONAL PARK TOURISM. [WLRN-FM](#) Miami (11/25, 10K) reports that to celebrate the NPS Centennial, Miami-Dade County “partnered with award-winning photographer Clyde Butcher to showcase some of South Florida’s national parks in photographs throughout Miami International Airport.” According to the article, “close to 40 million people fly into Miami International Airport every year, so it seemed like the perfect place to attract potential park visitors.” Bob DeGross, spokesperson for the Big Cypress National Preserve, said, “We decided to use the airport because that’s where the majority of the visitors from across the country and around the world come into Miami.”

NPS OFFERING LEASES ON C&O PROPERTIES. The [AP](#) (11/25, 2.15M) reports that the NPS is “seeking applicants for the agricultural use of land in the Chesapeake and Ohio Canal National Historical Park.” The service said Monday “it’s offering long-term lease agreements on 25 properties in Allegany, Frederick, Montgomery and Washington counties. The leases will be for up to 10 years, starting in April.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (11/25, Press, 7.78M), the [Franklin \(IN\) Daily Journal](#) (11/25, 51K), and [WJZ-TV Baltimore \(MD\)](#) Baltimore (11/24, 68K).

YOSEMITE NATIONAL PARK OPENS PUBLIC SCOPING FOR WILDERNESS STEWARDSHIP PLAN. The [Fresno \(CA\) Bee](#) (11/25, 270K) reports that Yosemite National Park “opened public scoping for planning and environmental impact analysis for the Yosemite Wilderness Stewardship Plan. Public scoping comments will be accepted through Jan. 29, 2016.” According to the article, Yosemite Wilderness Stewardship Plan, “currently managed under the 1989 Wilderness Management Plan, needed an update to incorporate current information about visitor use patterns, methods of managing visitor use, techniques for trail design and construction, and concepts for managing stock in wilderness.” The new plan will “provide management direction and a framework that preserves wilderness in Yosemite.”

EXPLORERS EXTEND KNOWN LENGTH OF JEWEL CAVE TO MORE THAN 180 MILES. The [AP](#) (11/25, 2.15M) reports that “explorations of Jewel Cave in western South Dakota in the past two months have extended the known length of the cave from about 177 miles to a little more than 180 miles,” the NPS said Tuesday. Volunteer explorers also “discovered two small lakes, the first encountered in the cave.”

NPS AWARDS NEW 10-YEAR CONTRACT FOR FERRY SERVICE TO CUMBERLAND ISLAND. The [Florida Times-Union](#) (11/24, 226K) reports that “longtime operator Lang Seafood Inc. has been awarded the contract to provide ferry and other services beginning Jan. 1,” the NPS announced Tuesday. According to the article, “Lang’s previous 10-year contract expired in July 2014,” but the NPS “extended it as it issued a new prospectus and sought bids that included the privatization of some services on the island.”

CABLE TV HUNTING SHOW HOST PLEADS GUILTY IN POACHING CASE. The [AP](#) (11/25) reports that “the host of a cable TV hunting show has pleaded guilty as part of an investigation into poaching on a remote national preserve in Alaska.” According to the article, “the terms of a plea deal signed by Clark W. Dixon on Monday call for an 18-month prison sentence, a \$75,000 fine and forfeiture of trophies and weapons that the U.S. attorney’s office says were used in the illegal taking of game.” The article notes that “the charges involve activities between 2008 and 2013 at Noatak National Preserve in northwest Alaska.”

GERMAN WOMAN INJURED BY FALLING TREE IN GRAND TETON FILES LAWSUIT. The [AP](#) (11/25, Gruver, 283K) reports that “a German woman who was severely injured when part of a tree fell on her in breezy weather in Grand Teton National Park has sued the federal government, claiming park workers failed to remove the pine despite a policy to take hazardous trees from developed areas.” The incident occurred in 2013, “minutes after Anna Schneider of Koblenz, Germany, and her then-fiance arrived at a campsite in Colter Bay Campground.” According to her lawsuit, “Schneider suffered blood loss and several fractures when hit by a section of a tree measuring 41 feet long and 10 inches in diameter.”

NPS TO CELEBRATE AT AMISTAD NATIONAL RECREATION AREA. The [Del Rio \(TX\) News Herald](#) (11/25, 14K) reports that the NPS of the Amistad National Recreation Area will “celebrate the 25th birthday of the most well known geographical section of Val Verde County Saturday at the visitor center off U.S. Highway 90 West.”

FIND YOUR STORY FEATURES NPS LAW ENFORCEMENT RANGER. On [YouTube](#) (11/24), a Find Your Story features NPS Law Enforcement Ranger Cole Goodman who has a unique connection to Mammoth Cave National Park.

EL PASO OFFICIALS UNVEIL EL CAMINO REAL DE TIERRA ADENTRO NATIONAL HISTORIC TRAIL SIGNS. The [El Paso \(TX\) Times](#) (11/24, Martinez, 199K) reports that “County officials Tuesday unveiled the new signs that will be placed throughout the El Paso area as part of a \$1.5 million effort to promote the historical route of El Camino Real de Tierra Adentro National Historic Trail.” El Paso County Commissioner Vince Perez, “along with other city and county representatives, unveiled the three designs for the National Park Service Historic Trail Signs that will be placed along major roadways stretching from Anthony, Texas, to San Elizario, indicating the route of El Camino Real de Tierra Adentro National Historic Trail, the oldest Euro-American trade route ever established in the United States.” The Times explains that “the effort to get the signs made and installed on the trail was started in 2006 by the National Park Service, the El Paso Community Foundation, the El Paso County Historical Commission and the Texas Department of Transportation, officials said.”

NPS SEEKS PUBLIC INPUT ON GRAND CANYON NATIONAL PARK BACKCOUNTRY MANAGEMENT PLAN. The [Payson \(AZ\) Roundup](#) (11/24, 21K) reports that the National Park Service has announced another opportunity for the public to weigh in on revisions to Grand Canyon National Park’s Backcountry Management Plan. The Roundup says that NPS is hosing open house meetings on December 2 and 7. In addition, “the NPS will also hold at least one webinar to reach the broadest range of stakeholders and interested public.”

ACADIA NATIONAL PARK SUPERINTENDENT ANNOUNCES RETIREMENT. The [Mount Desert \(ME\) Islander](#) (11/25, Kozak) reports that “after 12 years as superintendent of Acadia and 38 years with the National Park Service, Sheridan Steele is retiring.” The Islander says that Steele called the growing popularity of Acadia a serious challenge and “feels he has had only mixed success in improving the quality of the visitor experience.” The Islander says that visitation was up by 12% in 2014 and preliminarily up by 8% in 2015. “Our budget is going down, and the demand for services is going up. Maintaining a quality visitor experience is a real problem,” said Steele. He also said, “Several of my goals were wrapped into one with the development of Schoodic Woods, for me a major accomplishment.”

POLLY HILL ARBORETUM JOINS NATIONAL REGISTER OF HISTORIC PLACES. The [Martha’s Vineyard Times](#) (11/24, 47K) reports that the Polly Hill Arboretum announced its inclusion on the National Register of Historic Places as the Polly Hill Arboretum Historic District. It was added to the list in June.

MAINE’S CONGRESSIONAL DELEGATION PRAISED FOR RAISING CONCERNS ABOUT CREATION OF NATIONAL PARK. In an editorial, the [Bangor \(ME\) Daily News](#) (11/24, 165K) praises members of Maine’s congressional delegation for “seeking a sensible way forward on the contentious issue of a establishing a national park in northern Maine.” According to the paper, their letter “offers a reasonable starting point for

negotiations on preservation of this land while allowing public access and promoting regional economic development.” It also notes that “the letter is especially helpful because the two Republicans and independent have varying levels of support for the national park proposal from Elliottsville Plantation Inc.”

Additional coverage that three members of Maine’s congressional delegation have expressed “serious reservations” about the creation of “a national monument in the Katahdin region” was provided by the [Bangor \(ME\) Daily News](#) (11/23, 165K) and the [Lewiston \(ME\) Sun Journal](#) (11/24, 17K).

Top National News:

AFTER RUSSIAN JET IS SHOT DOWN, OBAMA SAYS TURKEY HAS RIGHT TO DEFEND ITS AIRSPACE. Media reports indicate that Turkey’s downing Tuesday of a Russian jet it said crossed into its airspace could further complicate the situation in Syria, as well as French efforts to unite the US and Russia in fighting ISIL. All three network newscasts noted the story, though only [ABC World News](#) (11/24, story 6, 0:25, Muir, 5.84M) reported the President’s reaction. Media analyses portray Obama as weighing in on Turkey’s side, even as he urged both sides to avoid a potential escalation of hostilities.

Calling it an incident that “has major implications for the war on ISIL and peace in Europe,” the [CBS Evening News](#) (11/24, lead story, 2:30, Pelley, 5.08M) reported in its lead story that NATO is “calling for calm...after Turkey shot down a Russian warplane.” Russian President Vladimir Putin “insists the plane was in Syrian airspace, but the Turks released...radar image, which they say shows the path of the plane...as it briefly entered Turkey.” After issuing “10 warnings without a response, a Turkish fighter jet shot it down.” [AFP](#) (11/25) reports the Pentagon “backed up Turkey’s claim” that the Russian jet had been warned “10 times – but failed to get a response,” and the [Washington Times](#) (11/25, Scarborough, 283K) reports spokesman Col. Steve Warren used the word “incursion” to describe the Russian flight.

[NBC Nightly News](#) (11/24, story 3, 2:20, Holt, 7.86M) said the incident has “ratcheted up tensions” in the region and the US is “calling for calm and warning against an escalation,” and [ABC World News](#) (11/24, story 6, 0:25, Muir, 5.84M) reported the President said yesterday that Turkey “has the right to defend itself.” The [Los Angeles Times](#) (11/25, Parsons, 3.6M) reports the President “sought...to both defend a longtime NATO ally and keep the Syrian war from spiraling into an even deeper conflict” by acknowledging that Turkey “had the right to defend itself but also urged the two countries to ‘step back’ from the brink of conflict and seek out common interests.” The [Washington Post](#) (11/25, A1, Eilperin, DeYoung, 7.78M) quotes the President as saying, “Turkey, like every country, has the right to defend its territory and its airspace,” but called on all sides to “take measures to discourage any escalation.”

The [Washington Times](#) (11/25, Boyer, 283K), however, says the President used the incident to highlight that it “points to an ongoing problem with the Russian operations” in Syria. If Russia were targeting ISIL, Obama said, such mistakes “are less likely to occur.” The [Washington Post](#) (11/25, Naylor, Roth, Deane, 7.78M) reports the incident “marked a serious escalation that is likely to further strain relations between Russia and the NATO alliance,” which is “being thrust into a new Middle Eastern crisis.” Turkey, [Bloomberg News](#) (11/24, Neuger, 3.4M) reports, called an emergency meeting of NATO to discuss the incident.

James Rosen reported on [Fox News’ Special Report](#) (11/24, 1.53M) that Obama spoke with Turkish President Recep Tayyip Erdoğan after the incident, with the two leaders “discussing how to avoid incidents like [this] in the future.” Barbara Starr reported on [CNN’s Situation Room](#) (11/24, 554K) that US military made “it clear” that it wants Russian and Turkish officials to sit down and talk things out.

The [CBS Evening News](#) (11/24, lead story, 2:30, Pelley, 5.08M) reported that a “visibly angry” Putin called Turkey’s actions a “stab in the back,” and [USA Today](#) (11/25, Bacon, Onyanga-Omara, 5.56M) reports he vowed that Turkey will pay “tragic consequences,” denying Turkish claims that the Russian jet had breached its airspace, and [The Hill](#) (11/24, Fabian, 654K) reports on its “Blog Briefing Room” blog that Foreign Minister Sergey Lavrov on Tuesday “canceled a previously scheduled visit to Turkey.”

[ABC World News](#) (11/24, story 5, 2:45, Muir, 5.84M) reported both Russian pilots ejected, but are believed to be dead after landing in Syria and killed by rebels. The [Huffington Post](#) (11/24, Jones, 251K) reports that a Russian marine was also killed during a search-and-rescue mission for the pilots when the helicopter he was riding in was brought down by Syrian rebels. [USA Today](#) (11/25, Dorell, 5.56M) reports that according to the Syrian Observatory for Human Rights, the rebels “used a TOW missile to force the helicopter to crash land,

and then hit it again with a second missile.”

[McClatchy](#) (11/24, Prothero, 27K) says the incident “could not have come at a worse time for the complex relationship between Russia, Turkey and a US-led coalition,” and [Bloomberg News](#) (11/24, Biryukov, 3.4M) says it “threatened to undermine efforts for a united front against Islamic State,” while the [New York Times](#) (11/25, Yeginsu, Nechepurenko, Subscription Publication, 11.64M) reports the “tensions immediately took on Cold War overtones.” The [Wall Street Journal](#) (11/25, A1, Nissenbaum, Peker, Marson, Subscription Publication, 6.23M) notes that the incident marked the first time since 1952 that a NATO member shot down a Russian warplane.

On the [CBS Evening News](#) (11/24, story 2, 2:05, Pelley, 5.08M), David Martin said the incident “has the potential to draw NATO allies into a conflict with Russia.” Noting Putin’s “angry reaction,” Martin said Russia sent a cruiser armed with surface-to-air missiles off the Syrian coast “ready to shoot down any planes that threatened its aircraft.” Jennifer Griffin similarly reported on [Fox News’ Special Report](#) (11/24, 1.53M) that the incident has elicited “promises of retaliation” from Putin, who ordered a Russian cruiser deployed off the Syrian coast.

In an interview with the [CBS Evening News](#) (11/24, story 4, 2:15, Pelley, 5.08M), former Ambassador Nick Burns warned the incident “could escalate,” but the Administration is “going to work very hard to see that it doesn’t.” Burns said it was “a gross violation of international law for the Russians even to fly close to that border, but to cross it, that’s a red line that can’t be crossed.”

Meanwhile, Steven A. Cook of the Council on Foreign Relations, writing in [Politico Magazine](#) (11/25, Cook), says that “when it comes to fighting the Islamic State and extremism more generally, Turkey – and President Recep Tayyip Erdogan – has become a significant part of the problem, rather than part of the solution.” In fact, Cook says, “there are few within the Obama administration who genuinely seem to believe Turkey can be part of the solution in Syria,” and “Washington appears happy just to have access” to its airbase at Incirlik. The [Wall Street Journal](#) (11/25, Subscription Publication, 6.23M), meanwhile, argues in an editorial that Russia is testing Turkey, and calls on the Administration to support Ankara.

CHICAGO OFFICER CHARGED WITH MURDER, DASHCAM VIDEO RELEASED. In its lead story, [ABC World News](#) (11/24, lead story, 2:30, Muir, 5.84M) reported that Chicago officials on Tuesday night were “urging calm” after white police officer Jason Van Dyke was charged with first degree murder in the death of 17-year-old Laquan McDonald, who was black. McDonald was shot 16 times, with Van Dyke continuing to fire even after the teen fell to the ground. Van Dyke turned himself in, and city leaders said he will be held accountable for his actions.

[NBC Nightly News](#) (11/24, lead story, 2:55, Holt, 7.86M) reported in its lead story that “urgent calls for calm” came from officials and community leaders as the city “braces...for the public release” of the dashcam footage from the murder. NBC showed a clip of the footage, which Cook County States Attorney Anita Alvarez described as “graphic...violent” and chilling. Alvarez added that Van Dyke’s actions “were not justified...and not a proper use of deadly force by police officer.” Gosk said authorities “anticipate” protests, and some local leaders are concerned about violence. Rahm Emanuel, Chicago Mayor: “Will we use this episode and this moment to build bridges that bring us together as a city or will we allow it to become a way that erects barriers that tear us apart as a city.”

On the [CBS Evening News](#) (11/24, story 6, 2:25, Pelley, 5.08M), Dean Reynolds similarly reported that there is “concern” that once the video is publicly available, “it could provoke a violent reaction and painful questions about why it took so long to arrest the shooter seen on the tape.” Reynolds added that Emanuel and the superintendent of police held a press conference at police headquarters where they “insisted” Van Dyke is “is in no way representative of the Chicago police department.”

[USA Today](#) (11/25, Madhani, 5.56M) reports that Mayor Emanuel said in a statement Tuesday that as Alvarez made clear, Van Dyke’s actions “violated those standards and also the moral standards that bind our community together. Rather than uphold the law, he took the law into his own hands and it’s now up to the justice system to hold him accountable.” Van Dyke’s attorney, Dan Herbert, criticized Emanuel for being “irresponsible” with his public statements against the officer. Meanwhile, Emanuel met with pastors, community leaders, and activists on Monday, urging peaceful protests. However, Gov. Bruce Rauner said Tuesday after watching the footage that he expected public reaction to be “strong.”

In a 1,300-word article, the [New York Times](#) (11/25, Davey, Smith, Subscription Publication, 11.64M) reports that Judge Donald Panerese Jr. ordered Van Dyke held without bail. Panerese said he wanted to see the video prior to “revisiting the question of bond at a hearing on Monday.” The Times, which reported prior to the release of the video, said the charges against Van Dyke “seemed likely to blunt reaction to the release of the video.” The [Wall Street Journal](#) (11/25, Elinson, Peters, Subscription Publication, 6.23M) reports that Herbert argued that the case needs to be tried in a court room, not in the streets, in the media, or on Facebook. Herbert said he expects to prevail in defending Van Dyke, claiming the officer was defending himself and others.

In a 1,500-word article, the [Chicago Sun-Times](#) (11/25, Hussain; Grimm, 758K) reports that Alvarez acknowledged Tuesday that she moved up the public announcement of the murder charge because of the imminent release of the video. She said her action was “in interests of public safety” and to assure the public that authorities “are bringing a full measure of justice that this demands.” The Sun-Times mentions that Chicago Police Supt. Garry McCarthy, during a police graduation ceremony, appeared craft his remarks with Van Dyke in mind. McCarthy said that police officers have the “awesome responsibility” under the US Constitution to, “where appropriate, take away somebody’s life,” adding, “and it will be examined in retrospect over and over again.”

The [Chicago Tribune](#) (11/25, 2.33M) reports that dozens of black activists protested in the streets after watching the dashcam footage. The protests eventually grew to more than 300 people, and a confrontation with police on bicycles ensued “away from crossing the Balbo Avenue bridge toward Columbus Drive.” Three people were arrested, and an officer was taken to an ambulance. Meanwhile, parents and guardians of students in Chicago Public Schools received an email from the district’s chief education officer, Janice Jackson, alerting them of the video’s release. Schools won’t show the video, but Jackson said it could be a point of discussion.

Mitchell: Video Shows Police Lied About Shooting. The [Chicago Sun-Times](#) (11/25, Mitchell, 758K) columnist Mary Mitchell said that one cannot watch the video of McDonald’s death “and hold onto any illusion that black people are exaggerating police brutality.” She said the footage shows that “everything that police said after the shooting was a lie.” She also criticized the length of the overall investigation, stating that “nothing on the tape that would shed any light” on why it took agencies a year to figure the case out.

Baltimore Sun: Blocked Video A Lesson For Baltimore About Accountability. The [Baltimore Sun](#) (11/25, 700K) editorializes that the Chicago police department and Mayor Emanuel made the situation regarding McDonald’s death “far more tense” by trying to prevent the release of the video. In the last few days, Emanuel “found himself scrambling to tamp down the possibility of violent unrest,” a lesson Baltimore officials “should heed as the city embarks on its program to equip police with body cameras.” While Van Dyke’s indictment “may have come just in time” to stop any “serious unrest,” it didn’t “repair the damage done” by the city’s “long effort” to block the release of the “only objective record of what happened that night.” If Baltimore police can taken anything from this situation, it’s that when “residents are promised accountability and transparency, they will accept nothing less.”

ECONOMY GREW FASTER THAN PREVIOUSLY ESTIMATED IN THIRD QUARTER. The Commerce Department reported Tuesday that the gross domestic product grew at an upwardly revised rate of 2.1 percent in the third quarter of 2015, in line with economists’ forecasts. The third estimate is up from the second estimate of 1.5 percent growth, but is still weaker than the 3.9 percent GDP growth in the second quarter. The [AP](#) (11/24, Crutsinger) reports the upward revision is attributed to stronger business inventory numbers. The initial estimate of third quarter GDP indicated business inventories reduced growth by 1.4 percent, but the Commerce Department reduced that drag to 0.6 percent. The AP adds that the new estimate “should give the Federal Reserve confidence as it considers an interest rate hike at its next meeting in December.”

[Reuters](#) (11/24, Mutikani) reports MUFJ Union Bank economist Chris Rupkey said, “The economy continues to move along at a good clip relative to its potential. With growth like this, the Fed has the data it needs to light the candle finally and lift off on December 16.” [Bloomberg News](#) (11/24, Stilwell, 3.4M) reports the new estimate reflects “a smaller hit from efforts to rein in bloated inventories,” which “grew at a \$90.2 billion annualized rate from July through September, almost twice as much as previously estimated.”

[USA Today](#) (11/25, Davidson, 5.56M) reports trade “was more of a drag on the economy than initially estimated as a strong dollar made exports more expensive for foreign customers and imports cheaper for US consumers. Exports increased just 0.9%, while imports rose 2.1%.” The [Wall Street Journal](#) (11/24,

Subscription Publication, 6.23M) and the [New York Times](#) (11/25, Schwartz, Subscription Publication, 11.64M) also report the story.

Consumer Confidence Falls Unexpectedly In November. The Conference Board reported Tuesday that its index of consumer confidence fell to 90.4 in November from 99.1 in October. Economists had expected the index to come in at 99.5. [Bloomberg News](#) (11/24, Donaldson, 3.4M) says the index found the “share of Americans who see greater job availability in the next six months declined to the lowest level since October 2011, and more expect their incomes to decline.” However, while consumers “were less upbeat about the labor market, the report showed buying plans held up and suggested steady spending as the holiday-shopping season begins.” The [Wall Street Journal](#) (11/25, Torry, Subscription Publication, 6.23M) reports consumers’ lack of confidence in the job market is a cautionary signal for retailers as the holiday shopping season approaches. [RTT News](#) (11/24, 4K) also reports the story.

Home Ownership Has Declined Since Peaking 10 Years Ago. [USA Today](#) (11/25, Hampson, 5.56M) reports that there is “a national shift away from home ownership and toward renting.” After peaking 10 years ago, the US home ownership rate “has dropped from over 69% to under 64%, where it was a half century ago, with each percentage point representing more than a million households.” According to an Urban Institute study, “in 15 years the home-owning rate will sink to 61%.”

Economists Concerned By Leveling Off Of “Job Quits.” [USA Today](#) (11/25, Davidson, 5.56M) reports that after a steady rise after “the labor market bottomed out in January 2010,” the “number of workers switching jobs has leveled off this year,” which is causing concern among some economists “because a large number of ‘quits’ reflects a dynamic economy in which workers feel confident enough to leave one job for another.” the latest Labor Department data show that about “2.7 million Americans quit jobs in September.” While that is “a solid total,” it has “held steady for the past 13 months despite an unemployment rate that fell to 5.1% from 5.9% during that period.”

USDA: Farm Income To Fall 38% This Year. The [Wall Street Journal](#) (11/25, Newman, Subscription Publication, 6.23M) reports that USDA forecasters said Tuesday that net US farm income will decline 38% this year to \$55.9 billion, marking its lowest level since 2002.

Stocks Post Modest Gains. The [AP](#) (11/25, Jay) reports that stocks posted modest gains Tuesday “as investors shook off concerns about heightened tensions in the Middle East and a drop in consumer confidence.” The Dow added 19.51 points to close at 17,812.19. The S&P 500 finished 2.55 points higher at 2,089.14. The Nasdaq edged up 0.33 points to 5,102.81.

Poole: Obama To Blame For Low Rates. In a [Wall Street Journal](#) (11/25, Poole, Subscription Publication, 6.23M) op-ed, William Poole, retired president and CEO of the Federal Reserve Bank of St. Louis, writes that despite the criticism of the Fed for the continuing low interest rates, the President truly deserves the blame as long-term rates are a reflection of weak job creation and demand for credit. Poole argues that the Administration has not corrected its inherited economic problems and has added disincentives to growth that have kept long-term rates low.

Editorial Wrap-Up:

NEW YORK TIMES. “The Case Against Woodrow Wilson At Princeton.” In an editorial, the [New York Times](#) (11/25, Subscription Publication, 11.64M) says Princeton’s student protesters “performed a valuable public service last week when they demanded that the administration acknowledge the toxic legacy of Woodrow Wilson.” Wilson, the Times argues, “was an unapologetic racist whose administration rolled back the gains that African-Americans achieved just after the Civil War, purged black workers from influential jobs and transformed the government into an instrument of white supremacy.” Noting that the protesters want the university to “rename the Woodrow Wilson School of Public and International Affairs and the residential complex known as Wilson College,” the Times argues that the “overwhelming weight of the evidence argues for rescinding the honor that the university bestowed decades ago on an unrepentant racist.”

“A Better Way To Screen For Prostate Cancer.” The [New York Times](#) (11/25, Subscription Publication, 11.64M) editorializes that “A new study points to what may be a better approach” to prostate screening: “screen smarter.” The Times says “there has been vigorous debate about who should be tested” as “screening too many people leads to unnecessary treatment” and examining “too few” will result in “miss[ing] cancers that

could have been stopped.”

“One Jet Closer To A Wider Confrontation.” In an editorial, the [New York Times](#) (11/25, Board, Subscription Publication, 11.64M) says “Turkey’s downing of a Russian fighter jet on Tuesday is just the kind of volatile incident that has been feared” since Moscow’s intervention in Syria and it creates “new uncertainty” in the conflict. The Times says “the situation cannot be allowed to escalate.”

WASHINGTON POST. “To Prevent Corporate ‘Inversions,’ The American Tax Code Needs To Be Fixed.” The [Washington Post](#) (11/25, 7.78M) editorializes that it is “unrealistic” to expect multinational firms to “follow patriotism rather than their bottom-line interests” given the current US corporate tax rate and fact that the US “tries to apply that rate to all global income.” The problem is not necessarily multinational mergers – it is mergers that are “driven by tax considerations rather than economic fundamentals.” The Post therefore argues that Congress should reform tax laws “to better align private-sector incentives with national interests.”

“Argentina’s Chance For A Fresh Start.” The [Washington Post](#) (11/25, 7.78M) editorializes that Argentina’s conservative president-elect Mauricio Macri not only gives the country opportunity for development and improved relations with the West, but also could “forge a path” for new leaders in Venezuela and other Latin American countries to follow, as they witness the success of free market and trade-promoting policies in countries such as Chile, Mexico, and Colombia. Macri’s economic reforms will be an “uphill battle,” facing obstruction from the National Congress and unions. The Post says that Macri could have a quick impact in foreign policy and that his “willingness to take a stand” could pressure the Venezuelan government against trying to impede upcoming elections.

“A Harvest Of Anti-Muslim Hatred.” An editorial in the [Washington Post](#) (11/25, 7.78M) decries the “language of hatred” from protesters opposed to allowing the Islamic Center of Fredericksburg, VA “build a larger facility than the one it has inhabited peaceably for 15 years.” The Post says the “bigotry” which “showed its snarling face” is not surprising given “the toxic rhetoric of presidential candidates and governors, mainly Republicans, who have vilified Muslims since” the Paris attacks, and argues that Spotsylvania County should base its decision about the center on the merits, “not on the bigotry and intolerance that national leaders are cynically bringing into the mainstream.”

WALL STREET JOURNAL. “Turkey’s Warning Shot.” The [Wall Street Journal](#) (11/25, Subscription Publication, 6.23M) argues in an editorial that Russia is testing Turkey, and calls on the Administration to support Ankara.

“The Desolate Wilderness.” A [Wall Street Journal](#) (11/25, Subscription Publication, 6.23M) editorial.

“And The Fair Land.” A [Wall Street Journal](#) (11/25, Subscription Publication, 6.23M) editorial.

US Senate: Senate on recess from 20 Nov – 30 Nov

US House: House of Representatives on recess from 20 Nov – 30 Nov

Other: 11:00 AM Annual Feast of Sharing in Washington, DC – Annual Safeway Feast of Sharing at the Walter E. Washington Convention Center, with around 5,000 city residents expected to attend, including Washington, DC, Mayor Muriel Bowser, DC Councilmembers Charles Allen, Jack Evans, and Brandon Todd, and EventsDC President and CEO Greg O'Dell Location: Walter E. Washington Convention Center, Washington, DC eventsdc.com <https://twitter.com/dcsportsent>

2:30 PM President Obama pardons National Thanksgiving Turkey – President Barack Obama pardons the National Thanksgiving Turkey via a ceremony in the White House Rose Garden. He celebrates the 68th anniversary of the National Thanksgiving Turkey presentation, reflects on 'the time-honored traditions of Thanksgiving', and wishes American families a safe and healthy holiday * After the pardoning, the turkey and its alternate travel to their permanent home at Morven Park's 'Turkey Hill' turkey farm in Leesburg, VA Location: Washington, DC <http://www.whitehouse.gov> <https://twitter.com/WhiteHouse>

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "Some more trouble for Ben Carson. Yeah, in a recent interview, he said that Thomas Jefferson wrote the US Constitution, when he actually in fact wrote the Declaration of Independence. Or as Carson's campaign staff put it, 'It's close enough. We'll take that one. It's not as bad. It could be much worse. He didn't say aliens.'"

Jimmy Fallon: "Meanwhile, Donald Trump was recently being interviewed and he said that he is not a fan of the man bun trend. He wouldn't want to wear his hair that way. You know it's bad when even Donald Trump is like, 'I'm not putting that on my head.'"

Jimmy Fallon: "I saw that NBC has officially granted Mike Huckabee, John Kasich, Jim Gilmore, and Lindsey Graham free air time to equal Donald Trump's recent 'Saturday Night Live' appearance. When asked how they'll feature the candidates, NBC was like, 'Well let's just say the Thanksgiving Parade just got a few more clowns.'"

Jimmy Fallon: "Over on the Democratic side, it was announced that Sting is going to perform at a fundraiser for Hillary Clinton next month. Hillary said she's been a huge Sting fan ever since he agreed to perform at her fundraiser."

Jimmy Fallon: "Rapper Killer Mike sat down to eat with Bernie Sanders at a soul food restaurant in Atlanta before intro

LAST LAUGHS:

+ [Late Night Political Humor](#).

DOI in the News:

INTERIOR PLANS TO CANCEL LEASE ON LAND BLACKFOOT INDIAN TRIBES BELIEVE IS SACRED.

The [AP](#) (11/24, Brown, 283K) reports the Interior Department is planning “to cancel a long-suspended oil and gas drilling lease near Glacier National Park” located “on land considered sacred to the Blackfoot tribes of the U.S. and Canada, according to court documents filed Monday.” Leaders with the tribes “said such a move would make up for a wrong done to them in 1982, when the government issued the lease without consulting the tribes.” However, “the legal maneuvering in the case might not be over: The law firm representing the lease owner, Solenex LLC of Baton Rouge, Louisiana, indicated it would challenge any attempt to cancel the lease.” Government lawyers “said the lease was improperly sold more than three decades ago, in part because an environmental study did not consider the impact of drilling on the tribes.”

Additional coverage was provided by the [Minneapolis \(MN\) Star Tribune](#) (11/23, Brown, 1.15M), the [Daily Mail](#) (11/24, 5.31M), the [Washington \(DC\) Post](#) (11/24, Matthew Brown |, Ap, 7.78M), the [Missoulian \(MT\)](#) (11/24, 118K), the [Flathead \(MT\) Beacon](#) (11/23, 15K), the [Daily Inter Lake \(MT\)](#) (11/24, 51K), the [Salt Lake \(UT\) Tribune](#) (11/23, 339K), [ABC News](#) (11/23, 3.35M), the [Bluefield \(WV\) Daily Telegraph](#) (11/24, 44K), the [Fresno \(CA\) Bee](#) (11/24, 270K), the [Albuquerque \(NM\) Journal](#) (11/24, 263K), the [Bluefield \(WV\) Daily Telegraph](#) (11/24, 44K), the [Pittsburgh \(PA\) Post-Gazette](#) (11/24, Press, 552K), the [Houston \(TX\) Chronicle](#) (11/24, 2.15M), the [Montana Standard](#) (11/24, 36K), the [Thibodaux \(LA\) Daily Comet](#) (11/23, 42K), the [Daily Inter Lake \(MT\)](#) (11/24, 51K), the [Province \(CAN\)](#) (11/24, 461K), the [Law360](#) (11/24, 30K), [Yahoo! News](#) (11/24, Brown, 6.43M), [Yahoo! INTERIOR APPROVES GILA RIVER AGREEMENT. The [AP](#) (11/24, 64K) reports that the Interior Department on Monday approved the Gila River agreement, with officials describing “the signing of the agreement as procedural, saying the agency does not have the discretion to deny further evaluation of the Gila project.” The article notes that “a decision on whether to move forward will follow extensive environmental and economic feasibility reviews, which could take years to complete.” Interior Deputy Secretary Mike Connor said, “There is no green light for any project at this point in time. There are a lot of controlling laws that have to be followed now, and this is kicking off that process.”

Additional coverage was provided by the [Albuquerque \(NM\) Journal](#) (11/24, 263K), the [Houston \(TX\) Chronicle](#) (11/24, 2.15M), the [Silver City \(NM\) Sun-News](#) (11/23, 24K), the [Silver City \(NM\) Daily Press](#) (11/23), the [Tacoma \(WA\) News Tribune](#) (11/24, 254K), the [Albuquerque \(NM\) Journal](#) (11/24, 263K), the [Rio Rancho \(NM\) Observer](#) (11/24, 35K), the [Washington \(DC\) Times](#) (11/24, Bryan, 283K), the [New Mexico Political Report](#) (11/24), [Yahoo! News](#) (11/24, Bryan, Press, 6.43M), [Public News Service](#) (11/23, 306), [KRQE-TV](#) Albuquerque, NM (11/23, 34K), [KUNM-FM](#) Albuquerque, NM (11/24, 4K), and [KRWG-FM](#) Las Cruces, NM (11/24, 1K).

INTERIOR TO VIEW WIND ENERGY AT NORTH MYRTLE BEACH. [Myrtle Beach \(SC\) Online](#) (11/24, Hudson, 33K) reports the Interior Department will “include North Myrtle Beach in new reviews to determine whether wind energy should be developed in federal waters along South Carolina’s coast.” The article reports Interior Secretary Sally Jewell has said offshore wind farms are part of President Obama’s renewable energy plan. The piece says the Obama Administration has touted wind energy as a source of jobs that could provide power for 14 million homes along the Atlantic coast.

[E&E Publishing](#) (11/23, 705) reports that Jewell said in a statement, “We know South Carolina has important wind energy potential, and we will work with stakeholders through a collaborative effort to identify high potential/low conflict areas for development, supporting investment and jobs in South Carolina.”

Additional coverage was provided by [North American Windpower](#) (11/24, 43K).

SECRETARY JEWELL LISTS WOMEN HEROES AND MODELS DURING SPEECH. The [Seattle Post-Intelligencer](#) (11/23, Connelly, 767K) reports that “Interior Secretary Sally Jewell on Monday took a route rarely traveled at political fundraisers, [giving] an often-emotional talk about women who directly and indirectly influenced her life as she rose from bank executive to Recreational Equipment, Inc., boss to Cabinet secretary and overseer of 400 million acres of public land.” The Post-Intelligencer explains that Jewell was marquee speaker at Sen. Maria Cantwell’s annual “Women of Valor” luncheon, “an honors ceremony that also refills the three-term senator’s political coffers.” The paper says that Jewell spoke of her mother (a nurse practitioner at a Planned Parenthood clinic), Rachel Carson (producer of *The Sea Around Us* and *Silent Spring*), and EPA Administrator Gina McCarthy, among others.

INTERIOR’S IG TOUTS INVESTIGATIVE ACTIVITIES IN REPORT TO CONGRESS. The [Greenwire](#) (11/23, Subscription Publication) reports that the Interior Department’s acting inspector general on Monday “told Capitol Hill that her office’s investigative activities resulted in 242 months of jail time, \$5.6 million in criminal penalties and \$1.3 million in civil settlements and recoveries over the past six months.” According to the article, “from uncovering child pornography on a U.S. Geological Survey employee’s computer to investigating fraud allegations involving Chippewa Cree Tribe officials, the watchdog’s semiannual report to Congress touts the IG’s achievements from April 1 to Sept. 30.” Acting Deputy Inspector General Mary Kendall said “the office’s audit-related activities resulted in monetary impacts of more than \$6.9 million during that period, a fraction of the \$39 million the IG reported in the first half of the fiscal year.” Kendall, “who has been nominated to lead the office permanently but has faced criticism from Republicans and watchdog groups for being too cooperative with Interior management, used the report to highlight her focus on public corruption within Interior.”

House Watchdogs Question Inspectors General On Access. The [Greenwire](#) (11/23, Subscription Publication) reports that “the House’s top watchdogs are questioning inspectors general from across the government on whether agencies are blocking their probes.” Oversight and Government Reform Chairman Jason Chaffetz and ranking member Elijah Cummings “sent letters in August to the IGs, asking whether they were being given full access to agency documents and staff for their probes.” One of the letters was sent to Mary Kendall, the acting IG for the Interior Department. Kendall’s response “notes one investigation ran into ‘excessive delay’ by the National Park Service, which was slow to respond to her investigators’ request during one probe.” In response to Kendall’s letter to Chaffetz and Cummings, a NPS spokeswoman said the agency is committed to working with the Interior IG.

GROUNDBREAKING CEREMONY HELD ON C-44 RESERVOIR PROJECT. The [Florida Water Daily](#) (11/23) reports that “the U.S. Army Corps of Engineers, alongside federal, state and local officials, celebrated the start of a major construction contract today for the reservoir component of the C-44 Reservoir and Stormwater Treatment Area project, a critical restoration project to restore America’s Everglades.” Interior Department Principal Deputy Assistant Secretary for Fish and Wildlife and Parks Michael Bean was among those who attended the ceremony.

FEDERAL GOVERNMENT TO CUT GREENHOUSE GAS EMISSIONS NEARLY 42 PERCENT. [Reuters](#) (11/23, Volcovici) reports that the White House on Monday announced that the Federal government will cut greenhouse gas emission from its operations to 41.8 percent below 2008 levels by 2025. Solar projects by NASA and DHS will be among the efforts which cover the government’s 360,000 buildings, 650,000 vehicles, and extensive supply chain.

FORMER INTERIOR OFFICIAL TO RETIRE FROM CONSERVATIONIST GROUP. [E&E Publishing](#) (11/23, 705) reports that Don Barry, “a former high-ranking Interior Department official who has spent the past 15 years working for conservation nonprofits, will retire from full-time employment next March, he announced last week in an email to colleagues.” Barry has “spent the past 4 ½ years as a leading executive at Defenders of Wildlife working alongside his longtime conservationist colleague Jamie Rappaport Clark, the group’s president.” Barry said “he intends to stay involved with wildlife conservation issues but that he looks forward to ‘doing less and spending more time with my wife, Teiko.’”

CONGRESS URGED TO RESTORE LWCF. In an editorial, the [Bainbridge Island \(WA\) Review](#) (11/24, 19K) urges Congress to reauthorize the Land and Water Conservation Fund. The paper supports a bipartisan reauthorization bill by Sens. Maria Cantwell and Lisa Murkowski, and opposes Rep. Rob Bishop’s bill. It argues that “Cantwell and Murkowski’s bill provides a fair and equal distribution between federal and state land projects.”

Additional coverage of the LWCF was provided by the [Daily Kos](#) (11/23, 391K) and the [Public News Service](#) (11/23, 306).

CONGRESS URGED TO PASS WILDFIRE DISASTER FUNDING ACT. For the “Congress” blog of [The Hill](#) (11/24, Tidwell, 654K), Tom Tidwell, chief of the U.S. Forest Service, writes about the benefits of forest restoration and the spiraling costs of fire suppression. Tidwell expresses support for bipartisan Wildfire Disaster Funding Act. He says that the legislation would “provide a fiscally responsible mechanism to treat wildfires more like other natural disasters, end ‘fire transfers’ and partially replenish the ability to restore resilient forests and protect against future fire outbreaks.”

In an editorial, the [Everett \(WA\) Herald](#) (11/24, 139K) also calls for wildfire reforms.

Additional coverage of wildfires was provided by the [Twin Falls \(ID\) Times-News](#) (11/24, 81K).

PEOPLE URGED TO GO OUTDOORS ON BLACK FRIDAY. For “The Blog” of the [Huffington Post](#) (11/24, Klasky, 251K), Ben Klasky, President and CEO, IslandWood, writes that “REI plans to close all 140+ of its stores on” Black Friday, “paying its employees to take the day off and enjoy the great outdoors.” Although “cynics” have questioned REI’s “motives,” Klasky argues that “to characterize this decision as a PR stunt is shortsighted, and it discounts the magic that is taking place both at REI and in the larger world surrounding them.” He observes that “it’s extraordinary to think that on a single day, a Black Friday, a day that has been defined in the past by traffic accidents and trampled shoppers...nearly a million people have already signed up to spend the day outside.”

Additional coverage was provided by [Mashable](#) (11/23, 1.8M).

UDALL: PRESIDENT MUST BAN GRAND CANYON URANIUM MINING. Former Sen. Mark Udall (D-CO) writes at the [Huffington Post](#) (11/23, Udall, 251K) that when the president of the National Mining Association says that the impact of uranium mining on Grand Canyon National Park is “virtually nonexistent,” it’s “about as reassuring as BP saying that deep water oil drilling poses virtually no risk to the Gulf of Mexico.” Udall says that samples taken by the US Geological Survey “show that mining has already polluted 15 springs and five wells within the Grand Canyon’s watershed with toxic levels of uranium” and that “the National Park Service reports that existing uranium mines, including some closed more than two decades ago, have fouled the regional aquifer in their vicinity with uranium levels considered unsafe to drink.” Udall concludes that President Obama “should act now to protect the Grand Canyon from irresponsible development around this national treasure.”

PROFESSOR SAYS CHRISTIANS SHOULD CARE ABOUT CLIMATE CHANGE. [CNN](#) (11/23, 3.54M) offers opinions from a number of different experts on the question, “Can we avoid climate apocalypse?” Katharine Hayhoe, associate professor in the Department of Political Science and director of the Climate Science Center at Texas Tech University, part of the Department of Interior’s South Central Climate Science Center, writes that “to care about climate change, all we need to be is a human living on this planet, a human who needs food, water and air to survive and a safe, healthy environment in which to thrive.” She goes on to state that Christians “have even more reason to care” because “the Bible reminds us that humans have been given responsibility to care for every living thing on the planet.” She concludes that “we need our science to tell us that climate is changing, and that our choices matter,” while “we need our faith to make sure we make the right choice.”

MEDAL OF FREEDOM SELECTION PROCESS EXAMINED. The [Washington Post](#) (11/24, Eilperin, 7.78M) examines how Yogi Bera, who will be awarded a posthumous Medal of Freedom on Tuesday “ended up on the list of awardees,” saying the story “offers a glimpse into the quirky and secretive process surrounding one of the nation’s highest honors.” The selection process has no rules “aside from the fact that the president makes the final call.” The White House staff secretary “has run the process,” in recent decades “with input from the president’s senior advisers, Cabinet secretaries and the first lady’s office.” The Post also points out that William D. Ruckelshaus “is being honored in part because he refused to bow to pressure from Nixon as deputy attorney general” but “is also being honored because the lifelong Republican helped launch the Environmental Protection Agency.” The Post notes that that Administration’s “two Cabinet members with chief responsibility for the environment, EPA Administrator Gina McCarthy and Interior Secretary Sally Jewell, also wrote letters on Ruckelshaus’s behalf.”

Empowering Native American Communities:

NATIVE HAWAIIANS URGED TO SPEAK OUT ON SELF GOVERNANCE. The [Honolulu Civil Beat](#) (11/24, 41) reports that “with just a little more than five weeks left before the deadline for public comments on a proposed rule that would govern relations between the U.S. government and a potential Native Hawaiian government, leaders of multiple Hawaiian organizations and the larger Hawaiian community are urging people to make their voices heard.” Members of Imua Hawaii said that “it’s critical to take part in this once-in-a-lifetime opportunity to leverage a formal government-to-government relationship.”

Additional coverage of the issue was provided by the [Indian Country Today Media Network](#) (11/23, 47K).

PANEL TALKS ABOUT HISTORY OF INDIAN GAMING AT NIGA MID-YEAR CONFERENCE. The [Indian Country Today Media Network](#) (11/23, 47K) reports that “to close out the National Indian Gaming Association’s (NIGA) 30-year anniversary, a history panel came together to share the unique beginnings of Indian gaming during the NIGA Mid-Year Conference, held November 2-4 at the Seminole Hard Rock Hotel & Casino in Hollywood, Florida.” NIGA Chairman Ernie Stevens, Jr. reminded the crowd: “Many of us in Indian country have lived and worked in a world of advocacy standing up for tribal sovereignty and advocating for tribal governments rights to govern their communities. With that in mind, we come together today to learn about the importance of the history of Indian gaming and where it came from.”

BILL TO MAKE CONGRESS THE SOLE DETERMINANT OF INDIAN SOVEREIGNTY CRITICIZED. In a letter to the [Indian Country Today Media Network](#) (11/23, 47K), John Yellow Bird Steele, the president of the Oglala Sioux Tribe, criticizes legislation that would make Congress “the only body with authority to Federally acknowledge Indian nations and tribes.” He argues “HR 3764 misreads the Constitution, overturns longstanding historical precedent, increases the bureaucracy and legislative burden on Indian tribes and politicizes the Federal Acknowledgment Process.”

Tackling America’s Water Challenges:

BOR TO ANNOUNCE BERRYESSA RESORT BID RESULTS IN JANUARY. The [Napa Valley \(CA\) Register](#) (11/24, 73K) reports that “winners in the Lake Berryessa competition to revitalize resorts with new marinas, campgrounds, stores, restaurants and lodgings should be known in January.” The BOR is expected “to announce its picks to rebuild and operate up to five resorts” then.

Securing America’s Energy Future:

Renewable Energy:

PROJECT SHOWS THE RISK SOLAR THERMAL POSES TO BIRDS. Judith Lewis Mernit writes in a 5,039-word story for the [Denver Post](#) (11/21, Mernit, 825K) about the impacts of the Ivanpah solar thermal project on birds in the Mojave Desert. Ecologist Shawn Smallwood said Ivanpah “was the first time people really understood the magnitude of the issue.” Mernit writes that NextEra, BrightSource and NRG “all claim to be monitoring their plants to assess their impact on birds,” adding that NextEra and Brightsource have enlisted help from Sandia National Laboratory engineer Clifford Ho “to argue that it’s physically impossible for flux to vaporize birds.” However, the piece says Bureau of Land Management personnel and biologists differ in their assessment, as they “watched as 130 birds combusted mid-flight during a six-hour test of a power-tower plant, SolarReserve’s Crescent Dunes facility near Tonopah, Nevada” last January.

DEEPWATER WIND PLANNING WIND FARM OFF THE ROCKAWAYS. [Crain’s New York Business](#) (11/23, Geiger, 180K) has a profile of Clint Plummer, vice president of development of Deepwater Wind. The company wants to build what could be the largest offshore wind farm in the US 20 miles off the coast of the Rockaways. Crain’s says that that first phase could power a quarter of the state of Delaware and eventually could produce a quarter of New York City’s power. Crain’s explains that “Plummer thinks the federal Bureau of Ocean Energy Management will hold an auction for the plot off the Rockaways sometime in 2016, opening the door for wind energy in the city.” Meanwhile, “auctions of three neighboring sites could allow the wind farm there to eventually be expanded to 500 turbines or more.”

Onshore Energy Development:

OBAMA ADMINISTRATION OFFERS AID TO HELP COMMUNITIES DEPENDENT ON COAL INDUSTRY.

The [Washington Times](#) (11/24, Wolfgang, 283K) reports on “the coal business” which has been in a “steep decline,” having “lost about 50,000 jobs,” from 2008 to 2012 due to “both Obama administration environmental regulations and the rise of cheaper, cleaner natural gas.” Altogether, “fewer than 70,000 people now work in the coal-mining industry.” The industry is expected to continue to lose jobs “as the administration moves ahead,” on its Clean Power Plan. In response to concerns about regional unemployment, the Administration has developed the “POWER + Plan” that would “pour billions of dollars into coal communities for job training, infrastructure investments and other efforts.” Presidential candidate Hillary Rodham Clinton “has embraced” the idea with her own “detailed plan to keep coal communities from sinking into an economic abyss.”

MINING INDUSTRY PETITIONS LAWMAKERS TO DEFUND STREAM PROTECTION RULE. [E&E](#)

[Publishing](#) (11/23, 705) reports that the National Mining Association is “circulating a petition urging lawmakers to block the Interior Department’s proposed stream protection rule.” NMA’s Count on Coal site allows supporters to tell lawmakers to “please make sure any appropriations legislation bars OSM from adopting this job-killing regulation.” The petition says, “This is a rule in search of a problem, a textbook example of punitive, unnecessary and counterproductive regulations designed to destroy high-wage jobs and drive up energy costs for families and businesses.”

BLM PRESSES COMPANIES ON LEASE PLANS. The [E&E](#) (11/23) reports that the BLM “wants coal companies to say whether they still plan to pursue long-pending mining leases amid sustained weak market conditions, according to documents obtained by Greenwire.” The lease-by-application system “allows companies to request tracts containing government-owned coal reserves, usually to extend the life of existing mines.” However, “industry troubles have slowed production and lowered needs for coal companies to bring more reserves online.”

NPS ADVANCING PROPOSAL TO SEARCH FOR OIL IN BIG CYPRESS NATIONAL PRESERVE. The [Greenwire](#) (11/23, Subscription Publication) reports that “a Texas company’s proposal to search for oil deposits across a 110-square-mile section of Florida’s Big Cypress National Preserve is advancing through the federal environmental review process, much to the chagrin of environmentalists who say the project would cause permanent damage.” The NPS has released an environmental assessment of a proposal by Burnett Oil Co. Inc. to “use so-called thumper trucks that would vibrate the ground, creating ‘seismic acoustical signals’ to help the company map out the subsurface geology across more than 70,000 acres in the north-central portion of the national preserve.” The document notes that while the preserve “consists almost entirely of wetlands,” the company’s survey teams “cannot avoid going into wetlands.” They also “cannot obtain the acoustical signals they need to map the subsurface geology to look for oil deposits ‘without physically touching the ground within the wetlands.’”

Additional coverage was provided by the [South Florida Sun Sentinel](#) (11/20, 720K).

SEN. BARRASSO CRITICIZES BIA ON TRIBAL ENERGY DEVELOPMENT. The [Law360](#) (11/24, 30K) reports that Senate Committee on Indian Affairs Chairman John Barrasso on Friday “slammed” the BIA for “dramatically” hindering energy development in Indian Country, claiming that “increased local control and simplified federal regulations would boost tribal prosperity.” Barrasso highlighted the BIA’s “red tape” and “inefficiency” as reasons for missed energy development opportunities in an op-ed published by Indian Country Today.

BLM EXTENDS COMMENT PERIODS FOR PROPOSED CHANGES FOR ONSHORE OIL, GAS REGULATIONS. The [Oil and Gas Journal](#) (11/24, 1K) reports that the BLM “extended the comment period for three proposed rulemakings that would replace or revise significant federal onshore oil and gas regulations.” According to the article, “comments on proposals that would affect Onshore Oil and Gas Orders 3, 4, and 5 now will be accepted until Dec. 14, it said in a Nov. 23 Federal Register notice.”

THREE MORE EARTHQUAKES HIT PARTS OF OKLAHOMA NEAR LAST WEEK’S TEBLOR. The [AP](#) (11/24) reports that three earthquakes, measuring 4.4, 3.5, and 3.0 on the Richter scale, were recorded Monday on “parts of Oklahoma near the site of last week’s 4.7 magnitude temblor.” No damage was reported. After last week’s quake, notes the AP, “the Oklahoma Corporation Commission’s oil and gas division released a plan calling for changes to oil and gas wastewater disposal wells in the area near the towns of Cherokee and Carmen.”

Offshore Energy Development:

REPORT EXAMINES FORCES SHAPING FUTURE OF NORTH CAROLINA COAST. In an extensive piece, the [Jacksonville \(NC\) Daily News](#) (11/23, Bellamy, 1K) reports on the political forces that are shaping the North Carolina coast. The Daily News notes that “as the federal government pushes energy independence, oil and wind companies are eyeing North Carolina waters.” Meanwhile, the Federal Bureau of Ocean Energy Management “plans to open two local areas to turbine leasing,” including the Wilmington West Wind Energy Area. The report says that “an environmental review completed this year found the plan would not cause significant environmental harm” but some, including NC Department of Environmental Quality Secretary Donald van der Vaart, “worry about what turbines could cost in property values and tourism dollars.” The report also goes into great detail about the potential impacts of climate change on the coast.

COLUMBIA’S ECOPETROL, ANADARKO TO EXPLORE FOUR GULF OF MEXICO BLOCKS. [Reuters](#) (11/23, Cobb, Acosta) reports that Columbian state-run oil company Ecopetrol, partially in partnership with a unit of Anadarko Petroleum Corp., will explore for oil in four blocks in the Gulf of Mexico.

America’s Great Outdoors:

Bureau of Land Management:

BLM TO HOST HEARING ON ROUNDING UP WILD HORSES, BURROS IN UTAH. The [Deseret \(UT\) News](#) (11/24, 476K) reports that the BLM in Utah will “host its annual statewide public hearing on the use of helicopters and motorized vehicles in the management of wild horses and burros on public lands.” The hearing will be held Tuesday, Dec. 8 in Price.

Additional coverage was provided by the [Horse](#) (11/24, 4K).

BLM SET TO BURN HUNDREDS OF SLASH PILES. The [Durango \(CO\) Herald](#) (11/23, 31K) reports that the BLM’s Tres Rios Field Office is “set to begin burning slash piles as early as Monday, conditions permitting.” According to the article, “four project sites located on BLM lands in Southwest Colorado will see burns.” BLM Fire Mitigation Specialist Chris Barth said, “There might be temporary signs up depending on the site telling people there are prescribed burns, but none of them will impact travel or folks in any way.”

Fish and Wildlife Service:

FWS CONSIDERS LIMITATIONS ON SWIMMING WITH MANATEES IN CRYSTAL RIVER. The [AP](#) (11/24, 2.15M) reports that “federal wildlife officials could further limit the number of swimmers allowed in Crystal River’s Three Sisters Springs during peak manatee season in Citrus County.” The FWS has “tentatively decided to reduce the number of swimmers to 13 at any one time after conducting a study and consulting with other officials, including the U.S. Coast Guard.” Crystal River City Manager Dave Burnell said the FWS will “decide by the end of December or early next year whether to make the number official.”

Additional coverage was provided by the [Lakeland \(FL\) Ledger](#) (11/23, 135K), the [Washington \(DC\) Times](#) (11/24, 283K), and [WOFL-TV Orlando \(FL\)](#) Orlando, FL (11/24, 90K).

HUNTER WHO SHOT PROTECTED GRAY WOLF WON’T FACE PROSECUTION. [E&E Publishing](#) (11/23, 705) reports that “a Colorado man who shot a protected gray wolf in the spring will not face federal criminal charges after an investigation determined he legitimately thought he was shooting a coyote.” According to an investigation by the FWS, Colorado Parks and Wildlife, and the Department of Justice, “the hunter, who was not identified, was legally shooting coyotes in April in north-central Colorado near Kremmling along the Colorado River.” Dan Rolince, FWS Mountain-Prairie Region assistant special agent in charge, said, “Our investigation determined that the shooting resulted from misidentification rather than the intentional take of a protected species. Although the hunter did the right thing by reporting his mistake immediately, this is a good reminder to hunters to properly identify their targets before pulling the trigger.”

Additional coverage was provided by [Reuters](#) (11/24, Coffman), the [Albuquerque \(NM\) Journal](#) (11/24, 263K), the [Houston \(TX\) Chronicle](#) (11/24, 2.15M), the [Washington \(DC\) Times](#) (11/24, 283K), the [Denver \(CO\) Post](#) (11/24, 825K), and [Colorado Public Radio](#) (11/24).

SEN. BARRASSO INTRODUCES LEGISLATION REMOVING WOLF PROTECTIONS. The [Jackson Hole \(WY\) News & Guide](#) (11/24, 1K) reports that Sen. John Barrasso has introduced “a companion bill to existing legislation in the U.S. House of Representatives that would strip federal protection for Wyoming’s wolves.” The legislation would “reissue a rule that in 2012 removed Endangered Species Act protection for wolves in Wyoming and gave management to the state.” The measure would “also give management of wolves in Minnesota, Wisconsin and Michigan back to the states, allowing hunting.”

FWS REJECTS REQUEST TO EXTEND COMMENT PERIOD ON PLAN TO BRING ELEPHANTS TO OMAHA ZOO. The [Omaha \(NE\) World-Herald](#) (11/24, 579K) reports that the FWS has “denied an extension sought by animal rights groups trying to delay the import of six elephants.” The groups asked the FWS “to extend the public comment period on the Henry Doorly Zoo & Aquarium’s application to bring the elephants to Omaha.” Laury Parramore, a spokeswoman for the FWS, said, “We believe the 30-day comment period provides sufficient time for comments to be submitted.”

AMAZON’S WILDLIFE THREATENED BY TRAFFICKERS. The [Mongabay](#) (11/23, 6K) reports that many species, “already under pressure from Amazon habitat loss and development, are now threatened by a growing wave of animal trafficking.” According to the article, “uncounted numbers of animals, and animal parts, are smuggled into the U.S. annually, with America’s 130 US Fish and Wildlife Service agents overwhelmed by the millions of tons of imported goods entering the nation.”

FWS INVESTIGATING DEATH OF BALD EAGLE. [KXMC-TV](#) Minot, ND (11/24, 1K) reports that the FWS is “investigating the shooting death of a bald eagle near Bantry in McHenry County.”

ADDITIONAL COVERAGE: SCIENTISTS SAY GREAT LAKES WOLVES SHOULD BE REMOVED FROM ENDANGERED LIST. Additional coverage of the letter signed by 26 wildlife scientists urging the federal government “to reconsider federal protections for the gray wolf in Michigan, Minnesota, and Wisconsin” was provided by the [Gaylord \(MI\) Herald Times](#) (11/24, 38K) and the [OutdoorHub](#) (11/23, 39K).

National Park Service:

DESPITE SLOW START, NPS OPTIMISTIC ABOUT “EVERY KID IN A PARK” PROGRAM. The [National Parks Traveler](#) (11/24, 989) reports that “nine months after President Obama heralded his Every Kid In A Park program, the initiative is showing some growing pains, but National Park Service officials are optimistic about the long-term benefits of the program.” NPS officials say that “they’ve had challenges to launch the program in the handful of months between the president’s announcement and September 1, when year-long passes for fourth graders that get them into all national parks and other public lands that require an entrance fee became available.” But “with more publicity about the program coming through partnerships with groups such as Scholastic, the Boy and Girl Scouts and Boys and Girls clubs, with transportation grants through the National Park Foundation intended to make it easier for fourth graders and their families to get to public lands, and with school field trips and next summer’s traditional vacation season yet to come,” Julia Washburn, the Every Kid in a Park team education lead for the Park Service, was “optimistic more and more youngsters would get involved with the program.”

LEGISLATION WOULD PROVIDE \$150M ANNUALLY FOR MAINTENANCE OF NATIONAL PARKS. [National Parks Traveler](#) (11/22, 989) reports that legislation sponsored by Sen. Lisa Murkowski “calls for \$150 million annually to be deposited into an account the National Park Service could tap for ‘critical deferred maintenance’ in the National Park System.” The measure, the Sportsmen’s Act of 2015, passed out of the Senate Energy and Natural Resources Committee last Wednesday. Under Murkowski’s bill, “the \$150 million earmarked for Park Service maintenance work, would come from revenues generated by energy exploration on the Outer Continental Shelf and be spent on maintenance projects ‘that support critical infrastructure and visitor services.’”

CONCERNS RAISED ABOUT CREATION OF NATIONAL PARK IN MAINE. The [AP](#) (11/24, 2.15M) reports that “three members of Maine’s congressional delegation told President Barack Obama they have serious reservations about a proposal to have more than 100,000 acres of Maine’s northern woods designated a national monument.” In the letter to Obama, Sens. Susan Collins, Angus King and Rep. Bruce Poliquin said “no decision about the future of the land should be made without taking into account the opinions of Maine residents who live near the land in the Mount Katahdin region.” The letter stated, “While we acknowledge the right of private land owners to donate their land, we have serious concerns about the executive branch using its power to unilaterally designate a national monument in our state. Mainers have a long and proud history of

private land ownership, independence and local control, and do not take lightly any forced action by the federal government to increase its footprint in our state.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (11/24, 283K), the [Portland \(ME\) Press Herald](#) (11/23, 158K), the [Oklahoman](#) (11/24, 470K), [WAGM-TV Presque Isle \(ME\)](#) Presque Isle, ME (11/24, 78), and [WMEA-FM Portland \(ME\)](#) Portland, ME (11/24, 333).

SUPREME COURT AGREES TO HEAR HUNTER’S HOVERCRAFT CASE. [E&E Publishing](#) (11/24, 705) reports that John Sturgeon “is at the heart of an obscure legal battle over whether he can use his hovercraft to hunt along Yukon River tributaries within” the Yukon-Charley Rivers National Preserve and “in a move that stunned legal experts and Sturgeon himself, the Supreme Court has agreed to hear his appeal.” E&E explains that the case began when National Park Service enforcement agents told Sturgeon that his hovercraft and jet boat “were banned from waters inside the Yukon-Charley Rivers National Preserve in Alaska.” He sued NPS and Interior Department officials, arguing “that navigable waterways within the Yukon-Charley preserve belong to the state and that the NPS rules don’t apply.” However, the government argues that NPS has the authority to regulate craft on waterways within national parks. E&E notes that the courts have sided with the government thus far.

Additional coverage was provided by the [Law360](#) (11/24, 30K).

OLDEST ACTIVE NPS RANGER TO INTRODUCE FIRST FAMILY AT NATIONAL TREE LIGHTING CEREMONY. The [Contra Costa \(CA\) Times](#) (11/24, Karina Ioffe Kioffee@, bayareanewsgroup.com, 263K) reports that Betty Reid Soskin, the oldest active ranger in the NPS, next week will travel to Washington, D.C. “where she has been invited to introduce President Barack Obama and his family during the White House’s annual Christmas tree lighting ceremony on Dec. 3.” According to the article, Soskin was “in the middle of one of her presentations to a group of students” at Rosie the Riveter/World War II Home Front National Historical Park “when she received an urgent call from National Park Service Director Jon Jarvis telling her she had been invited to spend time with the first family.”

DEL. NORTON, NPS OFFICIALS TO HOLD MEETING ON BUZZARD POINT MARINA CLOSING. The [Hill Now \(DC\)](#) (11/23) reports that representatives from the NPS will “attend a meeting held by District Del. Eleanor Holmes Norton tonight to hear resident’s questions and concerns about the planned closing of the Buzzard Point Marina in Southwest.” The NPS, “which owns the Buzzard Point Marina, announced in September that they plan to close the marina at the end of the year, citing the need for costly renovations.” After members of the Buzzard Point Marina Boat Owner’s Association contacted Norton, “she requested that the NPS schedule a meeting to hear concerns from boat owners and other neighbors of the marina.”

MOUNTAIN LIONS IN LOS ANGELES AREA TRAPPED BY URBAN DEVELOPMENT. The [Scientific American](#) (11/24, 3M) reports that “there’s only around a dozen lions left in the Santa Monica Mountains, the range running from the Pacific Ocean through Los Angeles, America’s second-largest metropolis.” The animals are “trying to escape because they’re trapped on an island of habitat, fenced in by freeways, hostage to urban development and isolated from the rest of their population.” The article notes that “to further complicate matters, inbreeding, lions killing one another over territory and for mates and rodenticide from eating animals infected by poison are also destroying their population.”

LAND ACQUISITION PRESERVES VIEW AT WIND CAVE NATIONAL PARK. [KELO-TV](#) Sioux Falls, SD (11/24, 29K) reports that “a 40-acre land deal on the southern boundary of Wind Cave National Park near Hot Springs is small in size but larger in what it represents about the future of the Black Hills and preserving a natural resource.” Park officials “recently purchased the property from a willing seller – a private landowner who actually initiated the buy – for \$280,000.” The NPS acquired “the property using Land & Water Conservation Fund money.”

NPS OFFERING LEASES ON C&O PROPERTIES. [WFMD-AM](#) Frederick, MD (11/24, 628) reports that the C&O National Historical Park is “taking bids for the agricultural use of properties in various locations in Frederick, Montgomery, Washington and Allegheny Counties.” NPS officials say “they plan to lease 25 tracts of land along the C&O Canal for a ten-year period beginning in April, 2016.”

PHONE BOOTH IN ARKANSAS ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. [Reuters](#) (11/23, Barnes) reports that a telephone booth in Arkansas has been added to the National Register of Historic Places.

ADDITIONAL COVERAGE: COINS TO COMMEMORATE NPS CENTENNIAL. Additional coverage of the special coins to help commemorate the NPS Centennial in 2016 was provided by the [Cody \(WY\) Enterprise](#) (11/24, 20K) and the [National Parks Traveler](#) (11/24, 989).

ADDITIONAL COVERAGE: NPS DIRECTOR JARVIS OPPOSES YELLOWSTONE-GRAND TETON PADDLING BILL. Additional coverage of the NPS Director Jon Jarvis' "letter staunchly opposing the proposed Yellowstone and Grand Teton Paddling Act" was provided by the [Yellowstone Insider](#) (11/23).

FUNDING SOLUTION SUGGESTED FOR MANHATTAN PROJECT NATIONAL PARK. In an op-ed for the [Oak Ridge \(TN\) Today](#) (11/23, Abbatiello), Leonard Abbatiello is a former Oak Ridge City Council member, lauds "the recent creation of the Manhattan Project National Park," but notes that "there will be little done until it is funded." Abbatiello suggests that "it could all be funded by a small DOE 'internal tax' on each and every science and production program that DOE supports in these cities."

US Geological Survey:

SOUTH CENTER CLIMATE SCIENCE CENTER RECEIVES ACHIEVEMENT AWARD. The [Norman \(OK\) Transcript](#) (11/22, 27K) reports that the South Center Climate Science Center on the University of Oklahoma's Research Campus is the recipient of the Department of Interior 2015 Environmental Achievement Award, an award for "Climate Science and Partnerships — Increasing the Tribal Capacity for Climate Change Adaptation." The center "received the award as a result of its partnerships with other agencies to develop programs for building tribal capabilities and conducting climate science research." The center is a consortium co-directed by the USGS and the University of Oklahoma.

Top National News:

OBAMA TEAM SPLIT AS US MOVES TO STEP UP EFFORTS AGAINST ISIL. While reports indicate that the Administration on Monday began a multipronged effort to step up its fight against ISIL, the [New York Times](#) (11/24, Sanger, Subscription Publication, 11.64M) reports that "in interviews...White House, State Department and Pentagon officials have described fierce debates within the administration over how deeply to involve American forces" in its strategy. Despite the debate, "so far" the President "appears to be sticking to his incremental approach." On the ground in Syria, the US, France, and Russia all stepped up airstrikes targeting ISIL yesterday. Secretary of State Kerry, in Abu Dhabi, consulted with officials from the UAE and Saudi Arabia. Back in Washington, Vice President Biden met with diplomats from the coalition fighting ISIL as the President prepares to sit down later today with French President Francois Hollande. Coverage is heavy, though the moves are noted in the context of broader reports on the attacks in Paris and heightened security in Brussels and the US.

Meanwhile, the [CBS Evening News](#) (11/23, story 4, 2:15, Pelley, 5.08M) reported that the Administration's actions come as a new CBS News poll finds that "only 23 percent of Americans believe the President has a clear plan for dealing with ISIL." Facing "pressure from politicians at home and Russian maneuvering abroad," [McClatchy](#) (11/24, Allam, Kumar, 27K) says, the Administration is "moving this week to reassert leadership of the international fight against the Islamic State."

The [Washington Post](#) (11/24, Gibbons-Neff, 7.78M) reported in its "Checkpoint" blog that the President's strategy for combating ISIL is drawing questions from within his own party, "and now some of his former advisers have taken to calling for a stronger approach." The piece goes on to list criticism of the President's policy from Hillary Clinton, former CIA Director and Defense Secretary Leon Panetta, and former Defense Secretary Gates, among others.

In his [Washington Post](#) (11/24, Pincus, 7.78M) column, Walter Pincus examines the goals of the US-led coalition's "military and diplomatic activities" in Syria, writing that according to Brett McGurk, the President's special envoy to the Global Coalition to Counter ISIL, "'suffocating the core' territory that the Islamic State had seized over the past two years and 'shrinking that area' were the focus" of coalition efforts. McGurk described the peshmerga retaking Sinjar "and cutting the main highway between Raqqa and Mosul as 'part of the suffocation. ... We want to isolate them in Raqqa; we want to isolate them in Mosul; and then continue to strangle and increase the pressure, and that's going to continue.'" Gates, Pincus adds, "said basically the Obama strategy was correct, but working too slowly," and called for "intensification of things we're already

doing...identifying tribes and others like Kurds who are willing to defend their own territory, their own villages, their own tribal lands and help them directly with military equipment and support.”

In a [National Journal](#) (11/23, Subscription Publication, 53K) op-ed, Ron Fournier is critical of the President’s handling of the fight against ISIL, writing that he is “stubbornly clinging to a strategy against ISIS that lacks clarity, creativity, and urgency” and “doesn’t seem to know how to rally us to a common cause.” Fournier notes that in a July 2013 column, he asked, “What if Obama can’t lead,” and adds, “I now have my answer.”

Kerry, the [AP](#) (11/24, Klapper) reports, said Monday that the US is seeking “new military, counterterrorism and diplomatic ideas to destroy” ISIL “faster.” He also said greater military cooperation with Russia “was possible under the right circumstances.” Speaking to reporters, Kerry said, “I’d like to see us go faster. The president would like to see us go faster.” But he “didn’t outline any specific...additions to the strategy.”

The [Wall Street Journal](#) (11/24, Schwartz, Subscription Publication, 6.23M) quotes Kerry as saying, “The goal is to accelerate everything. Everything helps move everything else. If we can get a cease-fire, if we can get a political process, that greatly facilitates what we can then talk to Russians and others about in terms of coordination.” Kerry, the [Washington Post](#) (11/24, Morello, 7.78M) reports, cited the recent attacks in Paris as “adding urgency to bids for Syrian peace talks.” The Post notes that “one sticking point” of the talks is whether the Islamist group Ahrar al-Sham should be invited. Kerry “said he had discussed the group in his talks on Monday and suggested that the United States could be willing to have the group be part of a possible resolution,” but it is “too soon to make a determination.”

[AFP](#) (11/24, Clark) reports Kerry traveled to Abu Dhabi to “encourage his Emirati and Saudi allies in their efforts to convince Syria’s rebel factions to agree a ceasefire” with the Assad regime. “That’s why I’m here,” he told reporters, repeating his hope that a ceasefire could be struck “in a few weeks.”

Kerry, [Reuters](#) (11/24, Wroughton) reports, told reporters that US efforts to topple ISIL should not be seen as helping to keep President Bashar al-Assad in power. “If certain entities perceive that whatever we’re doing is going to help Assad to stay, that complicates issues. So it has to be done in a way that manages the passions...among people who have been fighting Assad for four years,” he said.

[Politico](#) (11/23, Gass, 1.19M) reports that a “defiant” Kerry appeared Monday on [NBC’s Today Show](#) to “describe how the US is not being complacent but that the Islamic State...is not an invincible force.” Asked about criticism of the Administration’s strategy, Kerry said, “I believe ISIS is going to be defeated. ISIS is not 10 feet tall.”

[Voice of America](#) (11/23, 64K) reports in Abu Dhabi, Kerry met with Crown Prince Sheikh Mohammed Bin Zayed Al Nahyan, the [Kuwait News Agency](#) (11/23) reports that following talks with Foreign Minister Abdullah bin Zayed Al Nahyan, Kerry told reporters, “We agreed today on a number of things that we will work on specifically to try to accelerate the defeat of Daesh and to bring about the peace and stability that the region wants.” [Gulf Today](#) (11/23) reports the two sides “stressed the importance of coordination, cooperation and consultation about intensifying efforts to fight” ISIL, while the [Khaleej Times](#) (11/23, 220K) says Kerry “was clearest in outlining his focus in the overall strategy: Getting Assad and moderate rebels into a political transition process.”

White House: US “Pulling More Than Our Weight” In Fight Against ISIL. The [Washington Times](#) (11/24, Boyer, 283K) reports that ahead of today’s meeting between the President and French President Francois Hollande, the White House “said Monday that the US is contributing more than its share to the fight against the Islamic State.” With Hollande expected to call on the Administration to do more, press secretary Josh Earnest said, “The United States is certainly pulling more than our own weight” in the 65-nation coalition.

[USA Today](#) (11/24, Jackson, 5.56M) quotes Earnest as saying, “There is a comprehensive strategy that is being implemented by the United States and the 64 other members of our coalition.” Meanwhile, Vice President Biden on Monday met with representatives from 59 of the 65 nations. Earnest said the conversation “focused on how countries who are part of our coalition can ramp up their contributions to our efforts.” [Politico](#) (11/23, Toosi, 1.19M) reports that according to an Iraqi diplomat who attended, Monday’s meeting covered “a range of topics, including the need to support Iraq’s current government and the United Nations’ stabilization fund for Iraq.”

Meanwhile, Hollande, the [Washington Post](#) (11/24, DeYoung, 7.78M) reports, on Monday, launched “a

diplomatic blitz designed to boost international cooperation and intensify efforts” against ISIL. He started the day by meeting with British Prime Minister David Cameron in Paris, and “will spend Tuesday in Washington with President Obama before meeting later in the week with the leaders of Germany, Italy and Russia.”

On [NBC Nightly News](#) (11/23, story 3, 2:25, Holt, 7.86M), Andrea Mitchell reported that Hollande will reportedly “ask [the US] for more special forces in Syria,” but Barbara Starr reported on [CNN's Situation Room](#) (11/23, 554K) that the US will “press for France and Britain to send special forces to join with US commandos due to arrive in northern Syria at any time.” Hollande, the [New York Times](#) (11/24, Erlanger, Subscription Publication, 11.64M) reports, is also seeking “a faster political resolution to the Syrian civil war, a senior French official said, hoping that Moscow will be more willing now to push President Bashar al-Assad aside.”

Pentagon Investigating Whether Analysts Manipulated ISIL Intel. On [NBC Nightly News](#) (11/23, story 3, 2:25, Holt, 7.86M), Andrea Mitchell reported that the Pentagon is looking into “whether intelligence was manipulated” to make the Administration’s strategy against ISIL “appear more successful.” Mitchell said that even after the Paris attacks, both President Obama and Secretary of State Kerry were “downplaying the ISIL threat,” but even some “leading Democrats” – including former Defense Secretary Panetta, Sen. Dianne Feinstein, and former US Ambassador to Iraq James Jeffrey – say the Administration’s rhetoric “doesn’t match the reality.”

On [Fox News' Special Report](#) (11/23, 1.53M), Katherine Herridge said the White House “insisted” that Obama “would rather get that information and make changes to the strategy where necessary than not.” However, Herridge said that despite “multiple intelligence assessments” warning of ISIL’s rise, an official who was part of the White House discussion said the Administration kept “kicking the can down the road.” Furthermore, pressure on Centcom analysts reportedly included “at least two e-mails, now in the hands of the inspector general,” that suggested that analysts “cut it out” on the negative assessments and “toe the line.”

Iraqi Sunnis Lament Lack Of US Help In Fight Against ISIL. The [Washington Times](#) (11/24, Taylor, 283K) reports that “key” Sunni tribal leaders in Iraq “say US officials have failed to work with them in the fight against the Islamic State and assert that Russia is now increasingly eager to fill the void.” Sheikh Sabah Almahlawi, leader of the Albu Mahal tribe which played a central role in the first Sunni “awakening,” said, “The Americans are not connecting with the most important tribal leaders.”

US, France, And Russia Step Up Airstrikes. The [CBS Evening News](#) (11/23, story 4, 2:15, Pelley, 5.08M) reported that US airstrikes have now destroyed nearly 500 tanker trucks ISIL uses to smuggle oil, and by “one estimate, the attacks have destroyed roughly half the trucks ISIL uses to bring in \$1 million a day in revenues.” The [AP](#) (11/24, Burns) reports the Pentagon said Monday that US airstrikes over the weekend “destroyed 283 tanker trucks used by the militants to transport oil from producing fields in eastern Syria to smuggling points.” The AP notes that the strikes are part of an “accelerated” campaign targeting a key source of income for ISIL. [AFP](#) (11/24) calls the strikes “another milestone as the US-led coalition intensifies its campaign” against ISIL and “focuses on their oil-smuggling infrastructure.”

Barbara Starr reported on [CNN's Situation Room](#) (11/23, 554K) that the Pentagon was “stepping up the targeting of ISIS’ oil infrastructure inside Syria over the weekend,” focusing on a “specific area in eastern Syria where the oil smuggling trucks had been assembling.”

Also on Monday, [AFP](#) (11/24, Jackson, Randolph) reports, France launched airstrikes from an aircraft carrier in the Mediterranean, striking ISIL targets in Ramadi and Mosul. Russia said Monday that it had hit 472 targets in Syria “in the past two days, including tanker trucks and oil infrastructure” in ISIL-held territory, [AFP](#) (11/24) reports separately, but [Fox News' Special Report](#) (11/23, 1.53M) said the Pentagon is “pushing back” on Russian claims that its airstrikes have targeted over 1,000 ISIL oil tankers in the past few days. US officials say that claim is “nearly impossible with the kind of unguided bombs used by Moscow.”

Cameron To Seek Parliamentary Support For Expanding Airstrikes. The [Washington Post](#) (11/24, Morris, Ryan, 7.78M) reports British Prime Minister David Cameron visited Paris on Monday in a show of support and also “pledged to seek parliamentary support for expanding British airstrikes into Syria.” Cameron, [AFP](#) (11/24) reports, is expected to “make his case for strikes to parliament this week, and the indications are that dozens of opposition Labour MPs rebelling against their party leader could swing a subsequent vote in his favour.” The [AP](#) (11/24, Kirka) reports that during his visit to Paris, the British leader also “called for greater European Union-wide efforts to share intelligence to stop extremists and offered the use of the air base at Akrotiri on Cyprus for actions in Syria” against ISIL.

Calling it a “significant reversal of British government policy,” the [New York Times](#) (11/24, Castle, Subscription Publication, 11.64M) reports Cameron promised Monday to “bolster military spending, ending years of cutbacks that had prompted critics to claim that Britain was retreating from its global role.” [USA Today](#) (11/24, Onyanga-Omara, 5.56M) reports Cameron and French President Francois Hollande visited the Bataclan theater, where 89 were killed in this month’s attacks.

US ISSUES WORLDWIDE TRAVEL WARNING IN WAKE OF PARIS ATTACKS. The [AP](#) (11/24) reports the State Department is “alerting Americans to the possible risks of travel due to increased terrorist threats around the world” in the wake of this month’s attacks in Paris. The alert issued Monday “says current information suggests that Islamic State militants, al-Qaida, Boko Haram and other terrorist groups continue to plan attacks in multiple regions.” [Reuters](#) (11/23) reports that a State Department official noted the agency has issued worldwide travel alerts in the past and this latest alert updated previous warnings. The [Washington Times](#) (11/24, Morton, 283K) also reports on the alert, noting that the State Department cited “increased terrorism threats worldwide.”

Pete Williams reported in the lead story for [NBC Nightly News](#) (11/23, lead story, 1:35, Holt, 7.86M) that State Department officials “say this is not based on any intelligence, but it is intend to reinforce the message that the world is a dangerous place.” [ABC World News](#) (11/23, lead story, 2:55, Muir, 5.84M) reported in its lead story that the State Department did not list “specific locations, but here in New York, they’ve already taken added measures.” In the lead story for the [CBS Evening News](#) (11/23, lead story, 2:15, Pelley, 5.08M), Jeff Pegues reported that the alert “says terror groups such as ISIL and al Qaeda continue to plan attacks using conventional and non-conventional weapons,” and in a separate story on [ABC World News](#) (11/23, story 2, 1:30, Muir, 5.84M), Jonathan Karl reported that the alert “comes specifically in response to the attacks that we have seen in Paris, in Mali, in Egypt and elsewhere.”

The [Los Angeles Times](#) (11/24, 3.6M) says that according to US authorities, “the likelihood of terrorist attacks would continue as members of the Islamic State returned from Syria and Iraq, and other individuals not affiliated with terrorist groups engaged in violence on their own.”

Safety Of US Air Travel Debated. In an editorial, [USA Today](#) (11/24, 5.56M) argues that while air passengers are “perhaps more nervous than they’ve been since those terrible months after 9/11,” a “little perspective should give travelers some comfort: Despite the holes, airports and airlines today are not the same soft, flabby targets they were in 2001.” Saying the TSA “is miles ahead of what passed for screening before that Sept. 11,” USA Today goes on to list key security improvements implemented since the 9/11 attacks, and argues that while “holes remain that need to be filled,” a “net that was tragically loose 14 years ago is considerably tighter today.”

In an accompanying op-ed in [USA Today](#) (11/24, Roman, 5.56M), Anthony C. Roman, CEO of Roman & Associates, investigation, risk management and counterterrorism consultants, takes a less optimistic view, arguing that he would like to “say we are ‘perfectly safe,’ but we are not.” Roman cites problems with the TSA including its “95% screening failure rate,” and “corrupt TSA luggage screening contractors,” among others and argues that the agency’s “middle management needs an overhaul” and training “needs to be better and performed more often.”

DEMOCRATS OUTRAGED AS PFIZER ANNOUNCES MERGER, MOVE TO IRELAND. [ABC World News](#) (11/23, story 7, 0:25, Muir, 5.84M) reported on the “mega-merger” between Pfizer and Allergan that “will create the largest drug company in the world.” The merged companies will be headquartered in Dublin, Ireland, the home of Allergan, “reducing how much they would have to pay in US taxes.” The [CBS Evening News](#) (11/23, story 7, 0:25, Pelley, 5.08M) reported the move will reduce Pfizer’s “corporate taxes by hundreds of millions of dollars,” and will be “the biggest move yet in a trend of US companies moving their headquarters abroad.” [NBC Nightly News](#) (11/23, story 7, 0:30, Holt, 7.86M) called it “controversial,” and “a practice the Obama Administration wants to curb,” adding that “Pfizer could pay billions less in corporate taxes.”

[USA Today](#) (11/24, McCoy, 5.56M) reports that the Administration’s “stepped-up regulatory attack on tax inversions,” is unlikely to prevent the merger, because Allergan is, according to the arrangement, “acquiring Pfizer,” and because Pfizer shareholders would own 56% of the new company, it will be “below the 60% threshold to qualify as a tax inversion under the U.S. tax code.” Treasury Secretary Jacob Lew said that he hoped “to work with Congress in a bipartisan manner...to eliminate inversions for good.” Sen. Orrin Hatch (R-UT), chairman of the Senate Committee on Finance, has recommended a reduced corporate tax rate and “a

territorial tax system with base erosion protections.” Senate Minority Leader Harry Reid accused Pfizer of avoiding “its responsibility to pay its fair share,” and former Secretary of State Hillary Clinton said that Pfizer “will leave U.S. taxpayers holding the bag,” while Sen. Bernie Sanders (I-VT) said the merger “would allow another major American corporation to hide its profits overseas.”

The [New York Times](#) (11/24, Moyer, Subscription Publication, 11.64M) also reports that the Treasury’s proposed rules “would not have affected” the merger, because Pfizer shareholders will own less than 60% of the merged companies. Sen. Chuck Schumer called the merger “truly disappointing.” Sen. Sanders said, “The Obama administration has the authority to stop this merger, and it should exercise that authority.” Former secretary Clinton said, “We cannot delay in cracking down on inversions that erode our tax base.”

The [Washington Post](#) (11/24, A1, Johnson, Merle, 7.78M) reports the announced merger “immediately sparked criticism from Democrats and Republicans in Congress.” Sen. Reid urged “Congress to get serious,” to “prevent these kind of inversions.” While, “Republicans also denounced the deal,” at least “some were reluctant to place the blame on companies.” As an example, Rep. Patrick J. Tiberi (R-OH), a member of the Ways and Means Committee, said, “Other nations have restructured their tax code to make themselves more attractive to multinational corporations and we must do the same.” But Donald Trump called the deal “disgusting.” The Post notes that the US corporate tax rate is “one of the highest rates in the world.”

[Reuters](#) (11/24, Drawbaugh, Stephenson) reports on condemnations of the merger by Clinton, Sanders, and former Maryland Gov. Martin O’Malley, while noting that the White House did not comment. The [Washington Times](#) (11/24, Wolfgang, 283K) reports on Clinton’s criticism, in which she said, “For too long, powerful corporations have exploited loopholes that allow them to hide earnings abroad to lower their taxes.”

[Bloomberg Politics](#) (11/23, Epstein, 303K) reports that Clinton “attacked” the merger, as did Sanders and O’Malley. Bloomberg notes that the merger “plays into the campaign themes of the Democratic candidates,” but adds that some Republicans “including Donald Trump,” support lowering rates to end “to get rid of the incentive” for such mergers. White House press secretary Josh Earnest said that “he wouldn’t comment directly” on the merger, though he said that the President has a “longstanding concern and outright criticism” of such moves.

[Politico](#) (11/24, Karlin, 1.19M) also focuses its report on Clinton’s criticism, but quotes Earnest saying that such a move “essentially allows [companies] to renounce their citizenship, while continuing to benefit from all that America has to offer.”

The [AP](#) (11/23, Thomas) reports that Clinton and Sanders both “are bashing” the merger.

Pfizer CEO Calls Lawmaker, Administration Officials. The [New York Times](#) (11/24, A1, De La Merced, Gelles, Picker, Subscription Publication, 11.64M) reports on calls from Pfizer CEO Ian Read “to Washington lawmakers and Obama administration officials,” in which he argued that the merger “was actually good for the United States,” in that the company would have “more cash that it could invest in the United States and ultimately add jobs.”

Merger Said To Increase Pressure For Tax Reform. The [New York Times](#) (11/24, B1, Calmes, Subscription Publication, 11.64M) reports that the merger “has put new pressure on all sides” to move on tax reform, pointing out that “lawmakers in both parties condemned Pfizer’s move and reiterated their calls for comprehensive tax reform.” The Times adds that in 2012, the Treasury Department issued “a detailed framework” for reform, and “senior congressional Republicans were broadly on board with that approach,” but the President “has hardly made corporate tax reform a priority.”

Editorial Wrap-Up:

NEW YORK TIMES. ***“Iran Sentences An American Journalist.”*** In an editorial, the [New York Times](#) (11/24, Subscription Publication, 11.64M) similarly says Iran has shown zero transparen

LAST LAUGHS:

+ [Late Night Political Humor](#).

DOI in the News:

SENATE PANEL ADVANCES ONE INTERIOR NOMINEE, BUT HOLDS OFF ON VOTE FOR TWO. [Politico Pro](#) (11/19, Subscription Publication) reports that the Senate Energy and Natural Resources Committee approved Suzette Kimball to be the new USGS director.

However, [Politico Pro](#) (11/19) reports that the panel did not vote on two Interior Department appointees: Kristen Sarri for assistant interior secretary for policy, management and budget, and Mary Kendall, the longtime acting interior inspector general who's up for the permanent position. Chairwoman Lisa Murkowski has "had a long-running feud with Interior and last month she told Sarri that she needed to be convinced that agency hopeful would be 'part of the solution and not part of the problem for Alaska.'"

Senate Panel Approves Sportsmen's Package With LWCF Renewal. The [Greenwire](#) (11/19, Subscription Publication) reports that the Senate Energy and Natural Resources Committee on Thursday "passed by voice vote a sportsmen's package with language to permanently extend the Land and Water Conservation Fund with modest funding reforms." Chairwoman Lisa Murkowski (R-Alaska) said she hoped the markup would be "quick, easy and ... painless."

Additional coverage was provided by the [E&E Daily](#) (11/19, Subscription Publication), the [Albuquerque \(NM\) Journal](#) (11/20, 263K), and the [Los Alamos \(NM\) Daily Post](#) (11/20).

Senators Press For LWCF Reauthorization. [Politico Pro](#) (11/19) reports that "the Colorado Senate delegation along with North Carolina Sen. Richard Burr are asking Senate leadership to bring a bill to the Senate floor that would permanently reauthorize the Land and Water Conservation Fund." In their letter to McConnell, they also "asked to fully fund the program in year-end bills."

Additional coverage of the LWCF was provided by the [Portland \(OR\) Tribune](#) (11/20, 122K), the [Missoulian \(MT\)](#) (11/19, 118K), the [Alaska Dispatch News](#) (11/18, 203K), and the [Salinas Californian](#) (11/19, 27K).

WESTERN INVASIVE WEED SUMMIT CONCLUDES. The [AP](#) (11/20, Ridler) reports that "more than 200 federal and state land managers and scientists" participated in the 2015 Western Invasive Weed Summit that concluded Thursday in Boise. Janice Schneider, the Interior Department's assistant secretary for Land and Minerals Management, said "a key to any success will be state and federal agencies as well as other entities finding ways to work collaboratively." She said, "It's critically important from an ecological perspective as well as an economic perspective. This is going to remain a top priority for this administration."

Additional coverage was provided by the [Idaho Statesman](#) (11/20, 218K), the [Twin Falls \(ID\) Times-News](#) (11/20, 81K), the [Washington \(DC\) Times](#) (11/20, Ridler, 283K), the [Houston \(TX\) Chronicle](#) (11/20, 2.15M), and [KSL-TV Salt Lake City \(UT\)](#), Salt Lake City (11/20, 464K).

REPORT TOUTS ECONOMIC BENEFITS OF NATIONAL MONUMENT NEAR GRAND CANYON. [E&E Publishing](#) (11/19, 705) reports that "a conservation-group-commissioned economic analysis of a long-shot national monument bill that would permanently protect 1.7 million acres around the Grand Canyon found the proposal would preserve about \$51 million per year in economic activity." The BBC Research & Consulting study, paid for by the Center for Western Priorities, notes that the "Greater Grand Canyon Heritage National Monument Act" (H.R. 3882) would also benefit "the region by preserving lands that are historically and culturally significant, as well as an invaluable natural resource." The BLM and Forest Service lands that the legislation would "turn into a monument contain thousands of Native American archaeological sites and rock art from as early as 11,000 B.C." Also, "the proposal would protect old-growth ponderosa pine forests, imperiled wildlife like mountain lions and California condors, and the Colorado River watershed relied upon for drinking water by much of the Southwest."

INTERIOR SHARES PHOTO OF BIGHORN SHEEP'S STEEP DESCENT. [CBS News](#) (11/20, 4.1M) reports that a picture of “a bighorn sheep making a steep descent down a mountain” in the National Elk Refuge “made the rounds on social media after it was posted to Twitter by the U.S. Department of Interior on Wednesday.” According to the article, “while bighorn sheep are known for their agility in traversing steep terrain, some Twitter users didn’t believe the photo was real.” The Interior Department “tweeted back with a series of four images showing the sheep’s journey down the cliffside – no special effects or fakery involved, they insisted.”

INTERIOR SHOWS IMPROVEMENT IN 2015 FEDERAL PLAIN LANGUAGE REPORT CARD.

[FierceGovernmentIT](#) (11/20, Kanowitz, 277) reports that “more agencies are making the grade when it comes to providing the public with easily understandable information, the 2015 Federal Plain Language Report Card finds.” According to a report by the Center for Plain Language, “scores for complying with The Plain Writing Act of 2010 increased overall, and more agencies improved in the area of writing and information design than dropped.” The article notes that the Interior Department “went from an F to an A in compliance.”

RETIRED LAWMAKER SEES REPUBLICANS FAILING IN ATTACK AGAINST CLEAN POWER PLAN, WATERS OF THE US RULE. [E&E Daily](#) (11/19, Subscription Publication) reports that Rep. Jim Moran, who retired at the end of the last Congress predicted that Republicans will “fall short in attacking the Clean Power Plan (CPP) and the Waters of the U.S. (WOTUS) rule in the omnibus appropriations measure under development.” Moran said “GOP efforts to halt the EPA climate rule through riders are a non-starter for the Obama administration.”

ADDITIONAL COVERAGE OF SECRETARY JEWELL’S VISIT TO ARIZONA. Additional coverage of Interior Secretary Sally Jewell’s visit to Arizona was provided by the [Oklahoman](#) (11/20, 470K), the [Cherokee \(OK\) Phoenix](#) (11/20, 442), the [Navajo Times \(AZ\)](#) (11/20, 66K), the [Lake Powell Life](#) (11/20), [Arizona Public Media](#) (11/18, 2K), [Native News Online](#) (11/20), and the [Miami Herald](#) (11/20, 620K).

CONGRESS URGED TO ACT ON FUNDING WILDFIRE SUPPRESSION. For the “Congress” blog of [The Hill](#) (11/19, Sprenkel, 654K), Mary Ellen Sprenkel, CEO of The Corps Network, writes that “the current funding mechanism for fighting wildfires forces land management agencies to divert funds that otherwise would support routine maintenance and improvement projects.” According to Sprenkel, “the solution to this problem is to make federal disaster funding available for wildfire suppression.” She urges Congress to act “to ensure that the U.S. Forest Service has the funding it needs to fight wildfire and that we are able to continue to maintain and protect our natural resources by reauthorizing and fully funding LWCF.”

COLLABORATION URGED AS KEY TO BIODIVERSITY. For the “Congress” blog of [The Hill](#) (11/20, Knight, 654K), Bruce I. Knight, principal of Strategic Conservation Solutions, writes that “the unprecedented collaboration among landowners, states, federal agencies, industries, conservation groups and individuals involved in sage-grouse conservation across the vastness of eleven Western states should not be an isolated instance, but the norm.” Knight emphasizes the “need to view it as a model for effectively protecting biodiversity.” He argues that “as policymakers consider the future of the Endangered Species Act, lessons from the Greater Sage-Grouse resurgence and other conservation successes should be central to managing species.”

NEW MEXICO PAPER URGES SECRETARY JEWELL TO REJECT GILA DIVERSION. In an editorial, the [Santa Fe New Mexican](#) (11/20, 67K) says that “the proposed diversion of the Gila River is bad for the river, bad for the wilderness that surrounds it and bad for New Mexico.” They also claim that the project is too costly at a billion dollars. The New Mexican urges that “Secretary of the Interior Sally Jewell still has time to stop this misuse of money, land and water, with Monday the deadline for her to sign an agreement with New Mexico allowing the diversion to go forward.”

Empowering Native American Communities:

TRIBAL NATIONS GRATEFUL FOR OBAMA’S EFFORTS. Anna Wilding writes at the [Huffington Post](#) (11/20, Wilding, 251K) about the 7th Annual White House Tribal Nations Conference, which “centered on the president and members of his cabinet that discussed issues of importance to tribal leaders, with an emphasis on ways the Administration can continue to make progress on improving the nation-to-nation relationship and ensure these gains continue in future administrations.” Wilding notes that “a slew of new initiatives and funding programs were announced for the Tribal Nations, touching on areas of import such as Reducing Systemic homelessness, collaborating to increase protections for sacred sites, providing opportunities for native youth,

secondary and college education, drug rehabilitation, poverty, job growth, water supplies, environmental concerns and many others.” She says that “the mood in the auditorium was positive with an overwhelming sense of gratitude by Tribal Nations for the efforts the Obama administration has done to progress their cause.”

SENATE PANEL ADVANCES BILLS TO EXPAND TRIBAL LANDS IN OREGON. [E&E Daily](#) (11/19, Subscription Publication) reports that “two bills that would take land into trust for a pair of Oregon Native American tribes” has advanced through the Senate Indian Affairs Committee. The article notes that “the markup took less than five minutes before Chairman John Barrasso (R-Wyo.) segued into a separate hearing, with both pieces of legislation passing by voice vote.”

COURT BLOCKS SECOND ATTEMPT TO STOP NATIVE HAWAIIAN ELECTION. [Big Island \(HI\) Now](#) (11/19) reports that “for the second time, an attempt to put a stop to the Native Hawaiian election being led by the private non-profit organization Na’i Aupuni was rejected.” On Thursday, the United States Ninth Circuit Court of Appeals tossed “a challenge to the ruling handed down by U.S. District Court Judge J. Michael Seabright, who ruled against two non-Hawaiians and four Native Hawaiians, who argued that their First Amendment rights were violated by the election, allowing the election to proceed”

TRIBAL TAKEOVER OF BIE SCHOOLS STILL CONTROVERSIAL. The [Navajo Times \(AZ\)](#) (11/20, 66K) reports that “in the year-and-a-half since it was first presented to the public, the proposed tribal takeover of the Navajo Nation’s Bureau of Indian Education and grant schools has not gotten any more popular, at least if last Thursday’s public hearing here is any indication.” According to the article, “of the 10 or so people who spoke between 10 a.m. and 3 p.m., only two were in favor of the plan and one cautiously optimistic.” The article notes that “the idea is still so unpopular that the Department of Diné Education is not revealing the names of the consultants working on the plan under the tribe’s Sovereignty in Indian Education grant, fearing retaliation.”

DOE GRANT TO HELP LITTLE WOUND SCHOOL RESPOND TO SUICIDES. The [AP](#) (11/20, 283K) reports that the U.S. Department of Education has “awarded Little Wound School on the Pine Ridge Reservation a \$325,000 grant to help the school recover from 12 suicide deaths on the reservation.” The Project School Emergency Response to Violence grant “aims to help the Oglala Sioux Tribe deal with the deaths of current and former Little Wound School students and relatives and friends of the students.” According to Education Secretary Arne Duncan, “the grant will help the community receive the services it needs to move forward in restoring the learning environment.”

Additional coverage was provided by the [Rapid City \(SD\) Journal](#) (11/20, 171K) and [KDLT-TV Sioux Falls \(SD\)](#) Sioux Falls, SD (11/20, 1K).

Office of Insular Affairs:

ASSISTANT SECRETARY KIA’AINA TO SPEAK AT CLIMATE CHANGE CONFERENCE IN PUERTO RICO. The [Marianas Variety](#) (11/20) reports that Assistant Secretary for Insular Areas Esther Kia’aina is visiting Puerto Rico and the U.S. Virgin Islands this week. In Puerto Rico, Kia’aina will “provide remarks at the Climate Change in the Caribbean 2015 Conference for Puerto Rico and the U.S. Virgin Islands.” After the conference, Kia’aina will travel to the U.S. Virgin Islands. Kia’aina said, “I look forward to learning about mutual efforts that can be undertaken between Puerto Rico, the U.S. Virgin Islands, and the Caribbean region on climate change initiatives and sharing the President’s adaptation strategies and Interior’s efforts on community resiliency. Similar to the Pacific islands, it will take collaborative effort by all to combat the adverse impacts of climate change on island communities.”

Tackling America’s Water Challenges:

COLORADO RELEASES WATER MANAGEMENT PLAN. The [AP](#) (11/19, Elliott) reports that Colorado released its first-ever water management plan Thursday to cope with increasing competition for water as the West grows drier. The AP notes that “the plan sets conservation goals, outlines ways to share water during droughts and suggests ways to preserve the environment, recreation and agriculture while accommodating rapid population growth.” Meanwhile, it has controversial elements, including suggestions that could lead to building more dams and reservoirs. The AP points out that “the plan doesn’t have teeth — it will be up to state and local governments, water utilities, irrigation districts and others to provide the money and muscle to make it work. But it won’t be praised as a good step toward preparing for inevitable shortages in the future.”

BOR DRAWS DOWN WATER AT BLACK CANYON RESERVOIR. The [Emmett \(ID\) Messenger-Index](#) (11/20, 22K) reports that the BOR has “drawn down the Black Canyon Reservoir water to clean out debris.” During the drawdown, BOR crews will “clean the trash racks of accumulated wood and other debris and branches.”

FORMER BUREAU OF RECLAMATION COMMISSIONER CRITICIZES DAM PROJECTS. Sandra Postel, director of the Global Water Policy Project, writes at [National Geographic](#) (11/19, 31.87M) about Daniel P Beard, former commissioner of the U.S. Bureau of Reclamation and author of *Deadbeat Dams*. He says that political leaders “appear to be ostriches with their heads stuck in the bottom of empty reservoirs” and that “we seem to have a need to build something – anything – even when the project makes no sense at all.” Postel notes that this is a timely message in New Mexico where there is a November 23 deadline by which “Secretary of Interior Sally Jewel must decide whether to green-light the development of a major diversion project on the Gila, New Mexico’s last undammed river.” Postel says that the project has been “dalled a billion-dollar boondoggle by conservationists” and that “no one has identified who would foot the project’s bill, even as state officials continue to give the project a thumbs up.”

Securing America’s Energy Future:

Renewable Energy:

JUDGES REJECT ENVIRONMENTALISTS’ CHALLENGE TO SAN DIEGO TURBINES. The [E&E](#) (11/19) reports that federal judges on Thursday tossed “an environmental challenge to a major wind farm in Southern California.” The 9th U.S. Circuit Court of Appeals held that “environmental groups including the Desert Protective Council had not shown that the Bureau of Land Management acted arbitrarily in greenlighting the Ocotillo Wind Energy Facility project in the desert east of San Diego.” The court said the BLM did not violate the National Environmental Policy Act as the environmentalists claimed, because BLM “sufficiently evaluated and disclosed the environmental impacts of the Ocotillo wind energy project.”

Onshore Energy Development:

HEARINGS HELD ON PROPOSED FRACKING IN WAYNE NATIONAL FOREST . The [AP](#) (11/20, 2.15M) reports that “both opponents and supporters of opening” Wayne National Forest to oil and gas drilling have been “out in force at public hearings this week.” The BLM has “proposed allowing drilling beneath about 31,900 acres of the forest through hydraulic fracturing.” According to the article, “an activist coalition including the Buckeye Forest Council, Sierra Club and other fracking opponents has called for a ‘full-scale environmental report’ before proceeding.” But “many landowners and companies favorable to fracking also have spoken out.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (11/20, 283K), the [Athens \(OH\) Messenger](#) (11/20, 142), and the [Willoughby \(OH\) News-Herald](#) (11/19, 107K).

OIL, GAS GROUP WANTS BIA TALKS ON RIGHT-OF-WAY RULE. [Law360](#) (11/20, 30K) reports that the Western Energy Alliance urged the BIA on Tuesday to “give stakeholders more time to weigh in on the agency’s new rule for rights of way on tribal lands, saying the group and the government need to discuss the major changes the rule would make.”

BLM MASTER LEASING PLANS EXAMINED. The [High Country \(CO\) News](#) (11/19, Gilman, 74K) reports that “in August, the BLM released a draft master leasing plan for nearly 800,000 federal acres here that would significantly curtail future development near national parks, trails and other sensitive sites.” The News explains that “proponents say its zoning-style approach is a model for how to resolve conflicts between drilling and other values...by heading them off before they start.” However, only seven of the dozen master leasing plans underway have been finalized and “none have been implemented, raising questions about how the approach will fare in the next administration.”

OKLAHOMA OFFICIALS RELEASE WELL SHUTDOWN PLAN FOLLOWING THURSDAY EARTHQUAKE. The [CBS Evening News](#) (11/19, story 11, 0:25, Pelley, 5.08M) broadcast that while an earthquake in Oklahoma yesterday did not cause serious damage, it “was felt for hundreds of miles.” Officials in the state “now want to close a couple of wells in the area” where the quake happened. Geologists, according to the

CBS report, “say an outbreak of quakes is likely caused by the underground injection of waste water from oil well fracking.”

The [AP](#) (11/20), reports that after yesterday’s quake, officials with the Oklahoma Corporation Commission released a plan that calls for shutting down two disposal wells in the state and reducing volume at 23 others. [Reuters](#) (11/20) and the [Oklahoman](#) (11/20, Wilmoth, 470K) publish similar reports.

ADDITIONAL COVERAGE OF BLM DRAFT PROPOSALS FOR THOMPSON DIVIDE, ROAN PLATEAU.

Additional coverage of the BLM’s two draft environmental proposals for the Thompson Divide and Roan Plateau was provided by [Natural Gas Intelligence](#) (11/20, Subscription Publication), the [Durango \(CO\) Herald](#) (11/18, 31K), and the [Aspen \(CO\) Daily News](#) (11/19, 27).

ADDITIONAL COVERAGE: CONOCOPHILLIPS MOVES AHEAD WITH DRILLING PROJECT IN NPR-A.

Additional coverage that ConocoPhillips has “approved funding for a \$900 million drilling project on Alaska’s North Slope” was provided by the [Houston Chronicle](#) (11/20, 2.15M), the [Washington \(DC\) Times](#) (11/20, 283K), and the [Fairbanks \(AK\) News-Miner](#) (11/20, 42K).

SALT LAKE TRIBUNE DECRIES UTAH’S “DEAL WITH THE CARBON DEVIL.” In an editorial, the [Salt Lake \(UT\) Tribune](#) (11/20, 339K) asks if we must “continue to tolerate political leaders and government managers who just can’t do enough to make sure that the part of the economy that is devoted to literally setting fire to the here and now — and to hell with the future — continues to get everything it wants?” The Tribune says that the Utah managers of the US Bureau of Land Management have “Put off a scheduled oil lease auction for 39 spots on 37,580 acres of public land” but only “because they were expecting so many people to bid on those parcels that they needed to find a bigger room.” The Tribune also decries Rep. Rob Bishop’s (R-UT) plan to use royalty money from the extractive economy “to preserve less land and kick back more money to the oil and gas drillers to fund job training in the industry.”

Offshore Energy Development:

BOEM DIRECTOR HOPPER ATTENDS PANEL DISCUSSION ON OFFSHORE DRILLING. The [Florida Times-Union](#) (11/19, 226K) reports that “the possibility of oil wells off Georgia’s coast brought advocates and opponents to a state office building Thursday for the chance to sway the federal official who’ll make decisions on testing and drilling.” At the panel discussion organized by the Consumer Energy Alliance, BOEM Director Abigail Hopper said “she shares the president’s views on climate change, but her agency has a legal requirement to facilitate development of domestic energy resources.” Hopper said “her decision about whether to allow sonic testing and drilling along the Georgia coast won’t be released until the end of next year.” Also providing coverage is the [Savannah \(GA\) Morning News](#) (11/20, 150K).

Additional coverage of offshore drilling was provided by the [Hilton Head Island \(SC\) Packet](#) (11/20, 77K) and the [Coastal Observer \(SC\)](#) (11/20).

CHARGES FILED IN CONNECTION WITH 2012 FATAL OFFSHORE EXPLOSION. [Politico Pro](#) (11/19, Subscription Publication) reports that federal and state prosecutors on Thursday “filed charges against three companies and three men stemming from a fatal 2012 explosion on a Gulf of Mexico offshore drilling platform operated by Black Elk Energy.” Black Elk and Grand Isle Shipyards were charged with three counts of manslaughter. They also “face separate charges of violating the Outer Continental Shelf Lands Act and the Clean Water Act, along with Wood Group PSN and the three individuals.”

Additional coverage was provided by the [Minneapolis \(MN\) Star Tribune](#) (11/20, 1.15M), the [Houston \(TX\) Chronicle](#) (11/20, 2.15M), the [Washington \(DC\) Post](#) (11/19, Kunzelman Kevin McGill |, Ap, 7.78M), the [New Orleans \(LA\) Times-Picayune](#) (11/19, 661K), [KATC-TV Lafayette \(LA\)](#) Lafayette, LA (11/20, 55K), [WWL-TV New Orleans \(LA\)](#) New Orleans (11/19, 163K), and [WGNO-TV New Orleans \(LA\)](#) New Orleans (11/19, 37K).

ATP OIL & GAS AGREES TO \$41M POLLUTION SETTLEMENT. [E&E Publishing](#) (11/19, 705) reports that ATP Oil & Gas Corp. has “agreed to pay more than \$41 million to settle claims that it violated clean water laws,” the Justice Department announced Thursday. The Obama Administration sued the company in 2013, claiming that ATP “illegally discharged oil and a chemical dispersant into the Gulf of Mexico from a floating platform located about 45 miles off southeastern Louisiana’s coast.” A settlement agreement lodged Thursday in the U.S. District Court for the Eastern District of Louisiana “imposes a Clean Water Act civil penalty of \$38 million and resolves all U.S. claims against ATP in that case, DOJ said.”

Additional coverage was provided by [Politico Pro](#) (11/19, Subscription Publication), the [Oil and Gas Journal](#) (11/20, 1K), the [Maritime Executive](#) (11/20, 21), and [Law360](#) (11/20, 30K).

COMMENTARY: SUPPOSED ENVIRONMENTAL VICTORY IN ARCTIC IS HOLLOW. In commentary carried by the [Seattle Times](#) (11/19, 1.17M), Andreas Kuerste, a fellow with the Arctic Summer College, discussed Greenpeace's declaration of victory after Shell abandoned its exploratory drilling in the Alaskan Arctic, writing that "upon closer inspection, this supposed triumph is actually quite hollow." Shell "halted its Arctic oil exploration because the current economics of such activity just don't make sense." Moreover, added Kuerste, "the ultimate foundation of Shell's decision matrix is actually incredibly detrimental to the very environmental interests that groups like Greenpeace claim have been furthered by the company's Arctic exit: the low price of oil." Said Kuerste, "Environmental joy at the cessation of Alaskan offshore oil exploration is in fact the result of the overall striking intensification of global oil extraction."

America's Great Outdoors:

Bureau of Land Management:

FORMER BLM UTAH CHIEF SEEKS TO GET LATINO YOUTH OUTDOORS. The [Moab \(UT\) Sun News](#) (11/20) reports that Juan Palma, the former Utah state director of the BLM, "recounted his boyhood impressions during a Nov. 7 hike to Delicate Arch, as a group of school-aged children from Moab rushed up the trail ahead of him." He "organized the four-hour trip with the hope that it will strengthen the students' connections to public lands." The article notes that "it was the first of several planned outings that the now-retired civil servant will lead in his new role as the chief conservation officer of HECHO, which stands for 'Hispanics Enjoying Camping, Hunting, and the Outdoors.'"

PINAL COUNTY SEEKS INPUT ON NEW REGIONAL PARK. The [AP](#) (11/20, 283K) reports that Pinal County will hold a public open house on Dec. 10 on the proposed Palo Verde Regional Park. The proposed park would "consist of over 31 square miles of mostly federal Bureau of Land Management land on the county's far west side."

Additional coverage was provided by [KNXV-TV](#) Phoenix (11/20, 184K).

EDITORIAL ADVOCATES FOR "REALISTIC WILD HORSE POPULATION CONTROL." Thomas Mitchell writes at the [Mesquite \(NV\) Local News](#) (11/20, 16K) that 20 "Republican members of Congress...sent a letter earlier this month to Neil Kornze, the director of the Bureau of Land Management, asking him to provide suggestions for how to rein in the exploding wild horse population in the West, which is damaging water resources, overgrazing the range and jeopardizing their own health, as well as that of other wildlife and the livelihoods of ranchers." Mitchell says that the letter does not "lay the entire blame for the current situation on the managers of the BLM, and asks guilelessly what congressional action could be taken to give the agency the flexibility it needs to accomplish herd management." He points out that the letters asks rhetorically whether "humane euthanasia" might be among the population control methods and Mitchell concludes that it "is the only workable solution that will allow contraceptive efforts to work in the long- run."

Fish and Wildlife Service:

NIH RETIRES RESEARCH CHIMPS. The [New York Times](#) (11/20, Fleur, Subscription Publication, 11.64M) reports in continuing coverage that NIH Director Francis Collins announced that agency would retire the remaining 50 chimpanzees set aside for biomedical research and would end support of invasive research on chimps. Dr. Collins said, "We find no evidence that there is a need to continue to do research of an invasive sort on chimpanzees, not now and not going into the future."

Also reporting on the story are [ABC News](#) (11/20, 3.35M), [CNN](#) (11/20, Cohen, Bonifield, 3.54M), [Christian Science Monitor](#) (11/19, 496K), [The Hill](#) (11/20, Ferris, 654K), the [Lafayette \(LA\) Daily Advertiser](#) (11/19, 112K), the [Daily Intelligencer \(NY\)](#) (11/20, 600K), the [Business Insider](#) (11/20, 3M), the [Daily Mail](#) (11/20, Afp, 5.31M), [The Guardian \(UK\)](#) (11/20, Milman, 3.48M), [Ars Technica](#) (11/20, 1.15M), [Phys \(UK\)](#) (11/20, 74K), the [Times of India](#) (11/20, 672K), and [WBUR-FM Boston \(MA\)](#) Boston (11/19, 104K).

BOARDWALK UPGRADED AT SUNKHAZE MEADOWS NATIONAL WILDLIFE REFUGE. The [Bangor \(ME\)](#)

[Daily News](#) (11/20, 165K) reports that the FWS recently announced “the upgrade and replacement of 630 feet of boardwalk sections along the Johnson Brook Trail at the Sunhaze Meadows National Wildlife Refuge in Milford.” According to the article, “the five-foot-wide aluminum and recycled plastic boardwalks will allow visitors to experience miles of trails that traverse through unique wetland habitats and forested uplands.”

US ZOOS WANT TO IMPORT 18 AFRICAN ELEPHANTS. [National Geographic](#) (11/20, Russo, 31.87M) reports that “three zoos in the United States—Omaha’s Henry Doorly Zoo, Wichita’s Sedgwick County Zoo and the Dallas Zoo—intend to import 18 African elephants from Swaziland.” National Geographic says that “the zoos say the move is essential because the elephants are crowding out rhinos and other animals in Swaziland—and if they don’t come to the U.S., they’ll have to be killed” but “in an open letter, 80 conservationists, scientists, and animal welfare advocates around the world have condemned the plan,” arguing “that elephants confined in zoos display abnormal behavior, suffer physical disabilities, and die young—and too often.” Fish and Wildlife Service spokeswoman Laury Parramore said the service “may authorize the import of live African elephants from Swaziland if regulatory requirements under the Endangered Species Act and the Convention on International Trade in Endangered Species [CITES] are met.” National Geographic says FWS is accepting public comments until November 23.

ADDITIONAL COVERAGE: SCIENTISTS SAY GREAT LAKES WOLVES SHOULD BE REMOVED FROM ENDANGERED LIST. Additional coverage of the letter signed by 26 wildlife scientists urging “the federal government to remove gray wolves in the western Great Lakes region from the endangered species list” was provided by the [Marquette \(MI\) Mining Journal](#) (11/20, 1K), the [St. Paul \(MN\) Pioneer Press](#) (11/20, 507K), the [Washington \(DC\) Times](#) (11/20, 283K), [KSTP-TV Minneapolis-St. Paul \(MN\)](#) Minneapolis-St. Paul, MN (11/20, 130K), [WEAU-TV Eau Claire \(WI\)](#) Eau Claire, WI (11/20, 62K), [WMTV-TV Madison \(WI\)](#) Madison, WI (11/20, 49K), and [WWJ-TV Detroit \(MI\)](#) Detroit (11/19, 34K).

National Park Service:

2016 NPS CENTENNIAL COIN DESIGNS UNVEILED. [Coin World](#) (11/20, 4K) reports that “approved designs for the 2016 National Park Service Centennial gold \$5 half eagle, silver dollar and copper-nickel clad half dollar were unveiled Nov. 19 in ceremonies at 11:30 a.m. Eastern Time at the U.S. Department of the Interior.” According to the article, “net surcharges, after the U.S. Mint recoups all production and associated costs, are to be distributed to the National Park Foundation ‘for projects and programs that help preserve and protect resources under the stewardship of the National Park Service and promote public enjoyment and appreciation of those resources.’” The article notes that “none of the net surcharges may be used for land acquisition, according to provisions of the coin program’s authorizing legislation.”

REPORT FINDS GRAND CANYON INFRASTRUCTURE NEED REPAIRS. The [E&E](#) (11/19) reports that that “Grand Canyon utilities that provide drinking water and treat sewage are failing and need urgent repairs, according to an internal report and former employees.” The article notes that “a move to automate the water systems around the turn of the 21st century increased their efficiency.” However, “federal investigators have found those electronic controls are now outdated and at risk of attack.”

YELLOWSTONE RECONSIDERS BISON SLAUGHTER TARGETS. The [AP](#) (11/20, 2.15M) reports that Yellowstone National Park is “backing off its proposal to kill roughly 1,000 wild bison this winter as officials seek to reduce the animals’ annual migration into Montana.” Park officials “met with representatives of American Indian tribes, the state and other federal agencies Thursday.” The park “proposed delaying trapping until Feb. 15 and eliminating a target number to be removed from the herd.”

Additional coverage of Yellowstone Park’s proposal to cull 1,000 bison this winter was provided by [NPR](#) (11/19, 1.78M), the [Christian Science Monitor](#) (11/19, 496K), [Forbes](#) (11/19, 7.28M), and the [Albuquerque \(NM\) Journal](#) (11/20, 263K).

IG REPORT FINDS NPS RANGERS BOUGHT AUTOMATIC WEAPONS, FLASHBANGS. The [Daily Caller](#) (11/20, Bastasch, 366K) reports that “National Park rangers may have gone a little overboard this year when they bought ‘flashbangs’ and automatic weapons,” according to an Interior Department inspector general report detailing how the Department is struggling with “weapons accountability.” The report states, “In FY 2015, we issued a management advisory to the NPS Director when we found that law enforcement rangers had purchased automatic weapons and ‘flashbang’ distraction devices, in violation of NPS policy, indicating that NPS continues to struggle with weapons accountability issues.” The report also said that “Interior law enforcement officials are increasingly at odds with national park visitors and those working or living on federal

lands” with Interior experiencing “a recent increase in complaints concerning law enforcement personnel, many of them involving use of force incidents.”

WASHINGTON POST NOTES FALL CHERRY BLOSSOMS BLOOMING ON NATIONAL MALL. The [Washington Post](#) (11/19, Fritz, 7.78M) reports in its “Capital Weather Gang” blog that there are cherry trees blossoming on the National Mall, seemingly out of season. The Post says that no tree experts were available at the National Park Service. The Post rejects that theory that weird weather has caused the trees to blossom in the fall. The Post says that “the more plausible explanation for this spring-like emergence is that this tree is one of the very few autumn-blossoming trees on the National Mall and around the Tidal Basin.” The Post notes that NPS “lists the ‘Autumn Flowering Cherry,’ or *prunus subhirtella* on their species list, and it’s included in the species location maps.”

GLACIER NATIONAL PARK GETS NEW STORAGE FACILITY, GARAGE FOR BUSES. The [Columbia Falls \(MT\) Hungry Horse News](#) (11/20, Peterson) reports that “Xanterra Parks and Resorts recently completed a brand new state-of-the-art, climate-controlled storage facility and garage on Highway 206 south of Columbia Falls.” The News explains that “work on the \$2-million-plus garage began last March and mechanics and staff moved in Oct. 1.” The News says that all of the company’s buses and other vehicle’s from the company’s fleet will be stored there. “It’s the first time the buses have been stored in a heated space during the winter,” said Dave Eglsaer, director of transportation for Glacier Park Lodges.

HUMAN-BEAR INCIDENTS AT RECORD LOW IN YOSEMITE. The [AP](#) (11/20) reports that Yosemite National Park “recorded the lowest number of human-bear incidents since 1975, when officials started tracking bears, who damage property, steal food, injure or kill people or act aggressively.” The AP notes that this marked the fourth year without an injury or fatality. The AP explains that “in 2015, there were 76 incidents, which resulted in roughly \$5,000 in property damage,” a 95% drop in the number of incidents and a 99% “dip in property damage from the record high in 1998, when there were approximately 1,600 incidents resulting in \$660,000 in property damage.” The AP says that “Park spokesman Scott Gediman credits a public education campaign for the reduction.”

ROCKY MOUNTAIN NATIONAL PARK TO GET RECORD NUMBER OF VISITORS IN 2015. The [Denver Post](#) (11/20, Johnson, 825K) reports that “Rocky Mountain National Park has already set a new record with 3.9 million people visiting the park by the end of October — a half million more visitors than all of 2014.” The Post says that “with this pace, the park likely will surpass 4 million visitors this year due to several factors including the park’s 100th birthday, dropping gas prices and increasing population along the Front Range.” In addition, “one of the major reasons for the increase in visitation is Rocky Mountain National Park’s centennial celebration, which included a year of events culminating in a Sept. 4 rededication.”

NEW COMPANY TO TAKE OVER CONCESSIONS SERVICES AT PETRIFIED FOREST NATIONAL PARK. The [AP](#) (11/20, 2.15M) reports that Ortega National Parks is “taking over concessions services” at the Petrified Forest National Park. It will “open a new ice cream and refreshment shop at the Painted Desert Inn.” However, “a gas station and convenience store at the park will close.”

Additional coverage was provided by the [Denver \(CO\) Post](#) (11/20, 825K) and the [Albuquerque \(NM\) Journal](#) (11/20, 263K).

LIGHT POLLUTION WEIGHED AGAINST SAFETY CONCERNS. Richard Brock writes at the [Palm Springs \(CA\) Desert Sun](#) (11/19, 98K) reports in response to an opinion piece from Judith Fein that urged officials to “light up our streets to make them safer for pedestrians.” However, Broke says that while he empathizes with her safety concerns, he is also concerned about potential light pollution. He says that according to NPS Night Sky project manager Chad Moore (Bryce Canyon National Park, Utah), “At every park we have surveyed, we have detected artificial lights.” He concludes that “the important thing is to strike a balance, and that is what some desert cities are trying to do.”

US Geological Survey:

SEA ICE LOSS DRIVING CHUKCHI SEA POLAR BEARS TO LAND DURING SUMMER. The [Washington Post](#) (11/18, Harvey, 7.78M) reports that “a new study in PLOS One has brought to light” a problem for polar bears in the Chukchi Sea region. Bears are “spending more time on land in the summers as the amount of summer sea ice in the Chukchi Sea continues to shrink.” Karyn Rode, a research wildlife biologist with the USGS and lead author of the new paper, said, “For this particular population of polar bears, there’s been very

little study of land use.”

Additional coverage was provided by [Science Codex](#) (11/20, 1K).

CONNECTICUT LAWMAKER SEEK TO CHANGE NAME OF LANDMARK. The [Connecticut Post](#) (11/20, 270K) reports that Ted Kennedy Jr., a freshman state senator, is petitioning Connecticut’s environmental protection agency “to change the name of a navigational buoy and rock outcropping off his hometown of Branford shown on maps as ‘Negro Heads.’” Kennedy says “the landmark’s moniker is racist.” The article notes that “the change will likely to require the approval of a number of state and federal agencies, including the Coast Guard, the National Oceanic and Atmospheric Administration and the U.S. Department of Interior.”

WATER STUDIES FOR 34 LOUISIANA PARISHES MADE AVAILABLE ONLINE. The [Baton Rouge \(LA\) Advocate](#) (11/20, 70K) reports that “information about water, from its quality to how it’s used, is available online for 34 of Louisiana’s 64 parishes via a program that joins federal and state resources to produce local fact sheets.” The USGS says that “work to complete the rest of the parish information continues and should be done in the coming years.” Vincent White, a USGS civil engineer leading the project, said, “We’ve published 10 per year, so the ones that are public are made available almost immediately online.”

USGS ANALYZING COTTER-RELATED DOCUMENTS. The [Canon City \(CO\) Daily Record](#) (11/20, 22K) reports that the USGS is “about a quarter of the way through sorting environmental documents relevant to the Cotter Corp./Lincoln Park Superfund Site.” Suzanne Paschke, associate director for the Hydrologic Studies with the USGS Colorado Water Science Center, “updated Community Advisory Group members and officials involved in the project during Thursday’s monthly CAG meeting.” According to Mark Aguilar, Region 8 Superfund Remedial Program project manager, “once that process is complete, the agencies involved in the clean-up will talk to Cotter and allow the corporation to respond to the documents that were added by USGS.”

Top National News:

HOUSE PASSES TOUGHER REFUGEE SCREENING STANDARDS WITH SUPPORT OF 47 DEMOCRATS. The House on Thursday voted to approve tougher screening standards for Syrian and Iraqi refugees, intensifying the conflict with President Obama over his plans to admit 10,000 Syrian refugees by the end of the year. Media coverage overwhelmingly portrays the vote – in which 47 Democrats joined GOP lawmakers to achieve veto-proof support – as an embarrassment for the White House.

The [AP](#) (11/20, Lederman, Hennessey) reports 47 Democrats “weren’t buying” Obama’s defense of his refugee policy and in a “major embarrassment” to the President, they “abandoned” him as the House “approved fresh barriers for Syrian and Iraqi refugees.” [McClatchy](#) (11/20, Douglas, 27K) explains the House voted 289-137 in favor of a bill that bars the refugees from entering the US “unless the heads of the FBI, Department of Homeland Security, and the Director of National Intelligence certify that each” individual does not pose a risk to the country. The [CBS Evening News](#) (11/19, story 5, 0:35, Pelley, 5.08M) notes the votes are enough to override a presidential veto.

[Politico](#) (11/19, Wheaton, 1.19M) reported the White House has been “caught flat-footed this week” and the vote leaves it “scrambling to regain control of the debate” around the refugee policy. The Administration, according to Politico, “has cranked up a multi-front effort to halt the legislation and try to reclaim the conversation” on the issue. A [Washington Post](#) (11/20, Jaffe, 7.78M) analysis says the Paris attacks raise the question of why Obama has not “done more to address the fear the attacks instill in ordinary Americans?” The Post says the “fear is evident in the efforts” of governors to prevent refugees from settling in their states and the congressional efforts to tighten restrictions on Syrians attempting to reach the US. The Post says Obama’s “steadfastness – some call it stubbornness – reflects lessons he took from the aftermath of the 9/11 attacks” when he feels the country fell into a “season of fear” and leaders chose “to betray core American values.”

On [ABC World News](#) (11/19, story 7, 1:50, Muir, 5.84M), Jonathan Karl reported that Obama said Thursday that refugees face tougher security screening than any other foreign visitors to the US. The [New York Times](#) (11/20, Steinhauer, Shear, Subscription Publication, 11.64M) quotes Obama as saying refugees must undergo a process that takes as long as two years and includes background checks by the National Counterterrorism Center, the FBI, and the Defense Department. Obama said, “That somehow they pose a more significant threat than all the tourists who pour into the United States every single day just doesn’t jive with reality.”

The [Washington Times](#) (11/20, Boyer, 283K) reports Obama also “accused Republican presidential candidates of stoking fears about the refugees and closing the Guantanamo Bay terrorist detention center to score political points.” The President said that “in the aftermath” of the Paris attacks, there is “a very strong tendency for us to get worked up around issues that don’t actually make us safer but make for good political soundbites.” Obama added, according to a separate [Washington Times](#) (11/20, Dinan, 283K) article, that “after the initial spasm of rhetoric, the people will settle down, take a look at the facts, and we’ll be able to proceed.”

[Politico](#) (11/19, Gass, 1.19M) reported Vice President Biden “used sharp language” on Thursday, during a speech at the Newseum, when he “warn[ed] that the United States’ promise of possibility and optimism” is fading. Biden said, “And if we ever lose that, then we will have lost something incredibly special and consequential here in the United States,” adding, “We’ll have lost the soul of the country, and I would argue we’re in danger of losing it now.”

The [AP](#) (11/20, Werner) reports House Republicans “said it was simply prudent to place new controls on the refugee system, without ending it entirely or requiring religious tests.” House Speaker Ryan said, “It just is common sense that we pause, re-evaluate and make sure that we have the proper standards in place to make sure something like what happened in Paris doesn’t happen here.” [USA Today](#) (11/20, Kelly, 5.56M) reports bill co-sponsor Michael McCaul, the Homeland Security Committee Chairman, said, “We are a nation at war. The streets of Paris could just as easily have been the streets of New York, Chicago, Houston or Los Angeles.”

The [Washington Post](#) (11/20, Debonis, 7.78M) reports “the bill’s fate, however, is uncertain” following a Wednesday veto threat from Obama and comments from “key senators” that they “are more concerned about security vulnerabilities other than the refugee program.” However, the Post says “efforts to place new security constraints” on Obama’s program “could bleed into negotiations” on a spending bill that must be in place by December. [Bloomberg News](#) (11/20, House, 3.4M) reports Ryan called the bill a “first step” in efforts to enact stronger security measures in response to the Paris attacks, adding that lawmakers could use the spending bill to force other changes in a move the [Los Angeles Times](#) (11/20, Mascaro, 3.6M) says is “raising the specter of another government shutdown.”

[The Hill](#) (11/20, Carney, 654K) “Floor Action” blog, meanwhile, reported that Senate Majority Leader McConnell “is setting up the Senate to wade into a battle” over refugees as he “started the fast-track process” on the House-passed bill. McConnell said Americans “are concerned about the Administration’s ability to vet thousands of individuals from Syria” and “it simply makes sense to take a step back for now – to press ‘pause’ – so we can determine the facts” and ensure a proper screening process is in place. However, [AFP](#) (11/20, Mathes) reports Senate Minority Leader Reid “said the measure would face fierce opposition from Democrats” in his chamber. Reid said, according to [Politico](#) (11/20, French, Bresnahan, 1.19M), “the problem is not with refugees.” Reid added, “I haven’t read the House language,” but “I don’t think we’re going to be dealing with it over here.”

In an interview on [CNN’s Situation Room](#) (11/19, 554K), Senate Intelligence committee member Mark Warner said that the House bill is “an overreaction.” Warner said that if necessary, “I absolutely believe we should improve the process, but we ought to let the law enforcement and intelligence professionals give us this guidance.”

[Politico](#) (11/19, Kim, 1.19M) reported Sen. Chuck Schumer, who previously said he would consider a pause in the refugee program, said on Thursday that is no longer the case. Schumer said that a briefing from the Administration eased his concerns as it showed that none of the 2,000 Syrian refugees over the past year had “been arrested or deported for terrorism.” According to Politico, Schumer and other Democrats “want to focus congressional scrutiny” on reforming the visa waiver program and “closing the so-called terror gap” that allows individuals on the FBI’s terrorist watch list to obtain firearms. [McClatchy](#) (11/20, Gordon, 27K) reports that despite the controversy, “experts say” that sneaking in among refugees “is hardly the easiest route for Islamic State terrorists to slip into the country.” According to McClatchy, the “Visa Waiver Program offers another option” for the extremist group as it “permits people holding European passports – including all the Islamic State-linked assailants” involved in the Paris attacks – to enter the US for up to 90 days without a visa. In an editorial, the [Washington Post](#) (11/20, 7.78M) addresses the threat from Europeans, saying “It is legitimate to demand thorough screening of refugees,” but the House vote on Thursday “was political posturing.” According to the Post, “A reality-based response” to the ISIL threat “would direct extra security at the estimated 3,000 Europeans...who have traveled to Syria in the past two years.”

Despite Schumer's turnaround, [The Hill](#) (11/20, Lillis, Wong, 654K) reported that "several lawmakers and aides" indicated the White House's "eleventh-hour bid to rally Democrats...backfired." According to the Hill, "a number of Democrats who were on the fence...decided to vote yes after hearing" the Administration's argument. Rep. Steve Israel, who voted for the bill, said, "I've seen better presentations in my time."

The [Huffington Post](#) (11/20, Foley, 251K) reported "a number of Democrats peeled off" despite Obama's veto threat, as they are "under significant pressure from constituents to act after" the Paris attacks. The result was enough votes, according to the Post, "to override a veto, should there be one." The [Wall Street Journal](#) (11/20, Schwartz, Subscription Publication, 6.23M) reports that Democrats indicated that while they trust the Administration's assurances about the vetting process, the legislation added reasonable steps in light of concerns brought on by the Paris attacks. Rep. Gerald Connolly said the White House did not provide "a compelling reason to vote no." Addressing the vetting process, Connolly said "the public wants to be reassured it's especially sufficient," adding, "We shouldn't put ourselves in the position of having to defend something—a 'no' vote—that doesn't really make sense."

[Roll Call](#) (11/20, Pathé, Cahn, 139K) reported "Nearly every member of the Democratic Congressional Campaign Committee's Frontline Program for vulnerable members voted Thursday" for the new steps. Only one of the 14 members, Rep. Ann Kirkpatrick, did not vote for the legislation. According to Roll Call, the vote gives the members "an opportunity to appear tough on national security, an issue they often struggle with." A House Democratic chief of staff said "the politics of it were difficult for some people because of the way that it could be construed."

Eight Syrians Arrive At Southern Border. The [Los Angeles Times](#) (11/20, Hennessy-Fiske, 3.6M) reports eight Syrians "showed up at a Texas border crossing seeking asylum this week, sparking concern that the US could soon be facing a wave of Syrian migrants" at the southern border. According to the Times, while lawmakers and officials are dealing with the refugee issue, "they have yet to address" asylum seekers.

The [New York Times](#) (11/20, Pérez-Peña, Subscription Publication, 11.64M) reports that in addition to the individuals from Syria, groups from Pakistan and Afghanistan also tried to enter the US through the border with Mexico this week. Customs and Border Protection said that its agents "processed" the individuals and conducted checks "against numerous law enforcement and national security related databases," adding, "Records checks revealed no derogatory information about the individuals."

Poll: Americans Not Convinced US Should Be Part Of Refugee Solution. The [Huffington Post](#) (11/19, Edwards-Levy, 251K) cites a new [HuffPost/YouGov poll](#) as showing "there's considerably more support for sending US ground troops to fight the Islamic State than there is for accepting" Syrian refugees. According to the Post, "Americans are broadly sympathetic to the plight of refugees" and believe there is an obligation to help, but "there's less consensus that the US should be part of the solution." The survey shows 38 percent of Americans say the US should take in refugees, 39 percent say it should not.

Media: Republicans Respond To Paris Attacks With Anti-Refugee, Anti-Muslim Positions. The [Washington Post](#) (11/20, Fahrenthold, Delreal, 7.78M) reports that "some Republican politicians have responded" to the Paris attacks with anti-Muslim rhetoric. On [NBC Nightly News](#) (11/19, story 5, 2:25, Holt, 7.86M), Andrea Mitchell similarly reported "the fear about Syrian refugees got ugly on the campaign trail." Donald Trump is shown saying, "Syrians are now being caught at the southern border just like I said. They're going to be pouring in. We don't know who they are, could be ISIS."

According to [Reuters](#) (11/20, Wise, Mcpike) and the [Huffington Post](#) (11/19, Bobic, 251K), Ben Carson compared Syrian refugees to "rabid dogs," saying that allowing them into the US would place the country at risk. While speaking at a campaign event in Alabama, Carson said, "If there is a rabid dog running around your neighborhood, you're probably not going to assume something good about that dog." The [AP](#) (11/20, Barrow) says Carson also urged a tougher screening process. He said, "By the same token, we have to have in place screening mechanisms that allow us to determine who the mad dogs are, quite frankly. Who are the people who want to come in here and hurt us and want to destroy us?"

The [Washington Post](#) (11/20, Sargent, 7.78M) "Plum Line" blog reported that Trump "once again upped the ante when it comes to how the US should respond" to the Paris attacks when he told Yahoo News that he would consider warrantless searches of Muslims and would not rule out registering members of the religion in a database or issuing them special identification. Trump said it will be necessary "to look at a lot of things very closely. We're going to have to look at the mosques. We're going to have to look very, very carefully." The [AP](#)

(11/20, Lucey, Colvin) reports that while in Iowa, Trump said he “would certainly implement” a mandatory database.

[Politico](#) (11/19, Strauss, 1.19M) reported Sen. Rand Paul’s libertarian support base “isn’t happy with his response” to the Paris attacks. According to Politico, Paul’s decision to propose “a dead-on-arrival bill to deny visas to anyone from countries with an active ‘jihadist movement’ – is rubbing many libertarians, who tend to favor open borders, the wrong way.”

Holocaust Museum Expresses Concern Over House Vote. The [Washington Times](#) (11/20, Howell, 283K) reports the Holocaust Museum issued a statement on Thursday that “voiced concern” over the House vote, saying Americans should not “turn our backs” on refugees. The statement said, “Acutely aware of the consequences to Jews who were unable to flee Nazism, the United States Holocaust Memorial Museum looks with concern upon the recent refugee crisis.”

UNHCR: US, Other Countries Should “Welcome” Refugees. In a [USA Today](#) (11/20, 5.56M) op-ed, UN High Commissioner for Refugees Antonio Guterres says the US and other countries “must welcome” refugees, “in the best of humanitarian traditions, and keep the gates of freedom open.” Guterres also defends the UN’s “resettlement process” as “stringent,” saying it “includes the collection of biometric data, detailed face-to-face interviews and cross-checking of stories” by the UN and governments.

USAToday: Syrian Refugees Part Of “Troubling Trend.” [USA Today](#) (11/20, Onyanga-Omara, 5.56M) reports the Syrian conflict and the refugees it is creating “is only part of a troubling trend that has reached unprecedented levels.” USA Today says more people worldwide “have been uprooted by war, persecution or natural disasters than ever before in history.” The UN Refugee Agency says that 55 million people were “forcibly displaced” at the end of 2014.

CBS Shows Images Of “Youngest Refugees” Trying To Sleep. The [CBS Evening News](#) (11/19, story 12, 0:35, Pelley, 5.08M) showed images of “some of the youngest refugees from the wars in the Middle East.” Swedish photographer Magnus Wennman “captures them as they sleep or try to far from the homes that they fled.”

COMEY: NO “CREDIBLE THREAT” OF PARIS-STYLE ATTACK IN US. [Politico](#) (11/19, Gass, Gerstein, 1.19M) reported that during “an unusual press briefing” at Justice Department headquarters Thursday, FBI Director Comey and Attorney General Lynch sought to “reassure Americans jittery” that ISIL might carry out similar attacks in the US. Comey said, “We are not aware of any credible threat here of a Paris-type attack, and we have seen no connection at all between the Paris attackers and the United States,” adding that “his agents investigate ISIL ‘propaganda’ such as a recent video with scenes of Times Square in New York, although he dismissed the significance of such messages.” [Reuters](#) (11/20, Edwards) notes that Comey said, “The threat here focuses primarily on troubled souls in America who are being inspired or enabled online to do something violent for ISIL. ... We have stopped a lot of those people this year.” Comey also noted that since the Paris attacks, his agency had taken its terrorism investigations “up a notch.” Comey, [USA Today](#) (11/20, Johnson, 5.56M) reports, said that “federal investigators have intensified surveillance on ‘dozens’ of potential suspects who might be at risk of attempting to mount” a Paris-style attack.

Jeff Pegues reported in the lead story for the [CBS Evening News](#) (11/19, lead story, 2:30, Pelley, 5.08M) that Comey “tried to tamp down fear today” when he said, “We are not aware of any credible threat here of a Paris-type attack. And we have seen no connection at all between the Paris attackers and the United States.” Pegues noted that officials are still concerned about lone-wolf attacks, mentioning that Comey says ISIL “propaganda influences what he calls troubled souls.” [NBC Nightly News](#) (11/19, story 4, 2:20, Holt, 7.86M) similarly reported that Comey “tried to calm the fears,” saying that “he’s seen no sign of ISIS members coming to the US in the past days or weeks.”

The [New York Times](#) (11/20, Lichtblau, Subscription Publication, 11.64M) notes that both Comey and Lynch said they “remained alert to the possibility of ‘copycat’ attacks inspired by the Paris killings.” On [ABC World News](#) (11/19, story 2, 0:40, Muir, 5.84M), Pierre Thomas reported that US authorities are aware of “dozens of people” with suspected terror ties inside the US, and authorities know where those people are. Comey said those suspects “are being covered like a blanket right now.”

US Cities Taking Extra Security Precautions. The [Huffington Post](#) (11/19, Grenoble, 251K) examined how “major US cities” have reacted to the Paris attacks and outlined extra precautions being taken in Washington,

New York, Chicago, Los Angeles, and San Francisco. On [CNN's Situation Room](#) (11/19, 554K), Deborah Feyerick reported that the NYPD is deploying counterterror tactical teams "to cover a range of potential threats."

Counterterrorism Officials Focus On "Homegrown Violent Extremists." The [New York Times](#) (11/20, Schmidt, Schmitt, Apuzzo, Subscription Publication, 11.64M) reports that US counterterrorism officials are concerned the Paris attack "could provide the spark to inspire angry, troubled people to finally do something violent." This year, they have focused their resources on "homegrown violent extremists" as ISIL "altered its tactics" and "began using social media to urge its sympathizers in the United States to stay put and plot violence here." Agents "watch and wait, looking for some sign that yesterday's angry man with a gun is about to become today's terrorist."

WPost Analysis: Real, Imagined Threats Multiply In Wake Of Attacks. A [Washington Post](#) (11/20, Kunkle, Aratani, Lazo, 7.78M) analysis reports that since the Paris attacks, "threats — real or imagined — have multiplied almost everywhere." As "law enforcement officials have tightened security for the nation's trains, subways and airports" and "Americans are scared," the "heightened vigilance ha[s] also led to instances in which jittery travelers or security officials have singled out Muslims and others for special scrutiny." As the Thanksgiving holiday approaches, "law enforcement and transportation officials face the challenges of keeping people moving and identifying potential threats while reassuring the public that no one will be subjected to racial or religious profiling," a task which "means balancing the notion that it's better to be safe than sorry with the principle that people should not be singled out based on stereotypes."

Ryan: Paris Attacks Likely Not A "One-Time Event." [Politico](#) (11/19, Sherman, 1.19M) reported that on Thursday, House Speaker Ryan warned that it is "wrong to assume that Paris is a one-time event." Speaking to a group of Capitol Hill reporters, Ryan said, "common sense and prudence dictate that we be on higher alert," adding, "We cannot assume that Paris was a one-and-done event. ... And I think most members are taking their jobs very seriously, and trying to act as responsibly as possible."

MASTERMIND OF PARIS ATTACKS CONFIRMED DEAD. French prosecutors have confirmed the death of Abdelhamid Abaaoud, the ringleader of the Paris attacks, in a pre-dawn raid on Wednesday. The [Washington Post](#) (11/20, Mekhennet, Faiola, Booth, 7.78M) says that while news of the Belgian militant's death "capped one of the highest-profile manhunts after last week's bloodshed in the French capital," at least "two other suspects believed closely linked to the carnage remained at large." Moreover, confirmation of Abaaoud's killing "did not allay concerns surrounding his ability to apparently move undetected from Syria back to Europe."

The [Wall Street Journal](#) (11/20, A1, Bisserbe, Meichtry, Subscription Publication, 6.23M) also reports on the confirmation of Abaaoud's death, and on the [CBS Evening News](#) (11/19, story 2, 2:25, Pelley, 5.08M), Elizabeth Palmer reported that authorities are unclear whether Abaaoud was shot or if he blew himself up. Palmer said forensic officers "had to rely on skin samples and fingerprints to identify his dismembered body." Allen Pizzey added on the [CBS Evening News](#) (11/19, story 3, 1:50, Pelley, 5.08M) that Abaaoud's father "said he was relieved his son is dead."

The [New York Times](#) (11/20, De Freytas-Tamura, Peltier, Schreuer, Subscription Publication, 11.64M) notes that while Abaaoud's death "ended one chapter of the intense criminal investigation," many questions "remained unanswered: how Mr. Abaaoud planned and organized the attacks; whether the Islamic State is planning additional assaults outside its stronghold in Syria and Iraq; and the identities of at least two other attackers." [ABC World News](#) (11/19, story 5, 2:15, Muir, 5.84M) reported that French authorities on Thursday admitted that they "had no idea" Abaaoud was in Europe. While Abaaoud was on terror watch-lists "everywhere," authorities say he was able to travel undetected over the last year "in and out of Syria, all across Europe, to set in motion at least four different plots." [NBC Nightly News](#) (11/19, story 3, 2:30, Holt, 7.86M) noted that Abaaoud's death "is only raising new concerns about what's being viewed as a massive intelligence failure."

DOI in the News:

SECRETARY JEWELL TO MEET WITH BIE STUDENTS IN ARIZONA. The [Nation Sun News](#) (11/16) reports that Interior Secretary Sally Jewell will travel to Arizona this week to meet with Bureau of Indian Education students. On Tuesday, Jewell is scheduled to visit the Winslow Residential Hall on the Navajo Nation. She will “highlight a new public-private partnership to bring high-speed wireless Internet and Microsoft Nokia tablets to 10 BIE dormitories.” Then, on Wednesday, Jewell will join fourth-grade students from the Santa Rosa Ranch School on the Tohono at Saguaro National Park to highlight the Every Kid in a Park initiative.

The [AP](#) (11/17, 283K) reports that in Winslow, Jewell will highlight a partnership with Verizon and Microsoft “to improve digital learning.”

Additional coverage was provided by the [Rock Hill \(SC\) Herald](#) (11/17, 96K), the [Tacoma \(WA\) News Tribune](#) (11/17, 254K), and the [Wichita \(KS\) Eagle](#) (11/17, 257K).

DUWAMISH STILL WAITING FOR MEETING WITH SECRETARY JEWELL. The [Indian Country Today Media Network](#) (11/16, 47K) reports that Interior Secretary Sally Jewell told Duwamish Chairwoman Cecile Hansen and others “two months ago” that she would look over letters seeking a meeting regarding restoring Duwamish’s federal recognition and would talk about the issue with Assistant Secretary – Indian Affairs Kevin K. Washburn. With no update, “Hansen and more than 50 community members returned to Jewell’s home in West Seattle on October 24 for a peaceful demonstration and to deliver a letter and petition requesting a meeting.” But there has still been “no response.”

GROUP ON EARTH OBSERVATIONS COMMITS TO SHARING DATA. The [Canadian Underwriter](#) (11/17) reports that the intergovernmental Group on Earth Observations announced last Friday that “members are committed to sharing data on Earth observations.” Interior Secretary Sally Jewell said, “As we near the historic Paris climate talks, it’s clear open data and international collaboration are key to countries moving the needle on climate change. We can and should share Earth observation data to help address climate challenges because science and open data are critical to understanding land, water, wildlife and climate change. They must be at the heart of every policy decision – no country can solve it alone.”

SENATE PANEL TO VOTE ON SPORTSMEN’S PACKAGE, INTERIOR NOMINEES. The [Greenwire](#) (11/16, Subscription Publication) reports that a Senate panel will vote Thursday “to advance part of a sweeping sportsmen’s package that would promote hunting, fishing and shooting access on federal lands and reauthorize a popular land sales and conservation program, among other provisions.” The Energy and Natural Resources Committee will also vote on four nominees for the Interior and Energy departments. However, “missing from the docket” are White House nominees Kris Sarri for Interior assistant secretary and Mary Kendall for Interior inspector general, “a sign of continued GOP concerns with Interior’s energy and lands policies, as well as Kendall’s performance as acting IG.”

HOUSE COMMITTEE TO REVIEW DRAFT BILL TO OVERHAUL LWCF. [E&E Daily](#) (11/16, Subscription Publication) reports that the House Natural Resources Committee on Wednesday will review a draft bill to overhaul the Land and Water Conservation Fund. Members will review committee Chairman Rob Bishop’s draft measure that would “funnel a greater portion of LWCF money to states to invest in projects like ballparks, boat ramps and trails, while setting strict limits on the purchase of new federal lands.”

[Politico Pro](#) (11/16) reports that “the political clash over reviving” the LWCF “escalated even further on Thursday,” as Bishop “released a reform proposal that greens and liberals slammed as a giveaway to the oil industry.” According to the article, “green groups are aghast at the LWCF overhaul plan Bishop released on Thursday, but the future of the program likely rests in the hands of the GOP senators who have pushed all year for a vote on reauthorizing it without changes.”

Rep. Bishop Requested \$500k For Land Acquisition In Utah In 2009. [E&E Publishing](#) (11/13, 705) reports that House Natural Resources Chairman Rob Bishop in 2009 sought \$500,000 to be “spent to acquire federal lands at the Bear River Migratory Bird Refuge in his district, according to a House Appropriations Committee report.” According to the article, “the request is notable considering Bishop has recently introduced a draft bill that would significantly curb land acquisitions” under the LWCF.

Congress Urged To Reauthorize LWCF. In an op-ed for the [Ellensburg \(WA\) Daily Record](#) (11/17, 16K), Rep. Dave Reichert urges Congress to reauthorize the LWCF. He asserts that the LWCF is “the most successful conservation initiative in this nation’s history and the need to maintain funding levels is real and urgent.”

Additional Coverage. Additional coverage of the LWCF was provided by the [Santa Fe New Mexican](#) (11/17, 67K), the [Tri-City Herald \(WA\)](#) (11/17, 100K), and the [American Thinker](#) (11/17, 27K).

REPUBLICANS MAY ATTACH RIDERS TO INTERIOR, ENVIRONMENT AND RELATED AGENCIES SPENDING BILL. [E&E Publishing](#) (11/17, 705) reports that both parties are arguing over policy riders while another government shutdown looms. E&E says that “House Republicans this week are planning a series of member-only ‘listening sessions’ on the six appropriations bills that did not pass the lower chamber this month, including the always thorny Interior, Environment and Related Agencies spending bill.” E&E explains that “in 2011, House Republicans inserted a rider into a budget deal blocking funding for the Bureau of Land Management’s ‘wildlands’ initiative to preserve wilderness-quality public lands across the West, prompting the Interior Department to scrap the plan.” Meanwhile, Senate Majority Leader Mitch McConnell (R-KY) has made clear that EPA’s Clean Power Plan and Waters of the US “rule are in Republicans’ sights during the current appropriations talks”, ClearView Energy Partners LLC’s Kevin Book “said brinkmanship over riders is likely to be muted by political constraints – including the need to demonstrate Republicans can govern.”

NEVADA MIDDLE SCHOOL AT CENTER OF SAGE GROUSE CHALLENGE. The [Greenwire](#) (11/16, Subscription Publication) reports that a Nevada middle school is “at the center of the latest legal challenge to new protections for the imperiled greater sage grouse set to go before a federal judge” Monday. According to the article, “while federal lawyers have called other grievances ‘speculative, at best,’ Washoe County’s complaint about having to find an alternative location for a new middle school is one that prompted the Bureau of Land Management to reopen the comment period on new regulations to protect sage grouse in lieu of an Endangered Species Act listing.” BLM spokesman Chris Rose said Friday that the agency “will be working with municipalities, industry and others on a case-by-case basis to address specific projects and identify actions that will preserve and enhance sage grouse habit and provide opportunities for development.”

Additional coverage of the case was provided by the [Elko \(NV\) Daily Free Press](#) (11/17, 22K) and the [Daily Times Gazette \(ISR\)](#) (11/17).

Environmental Groups Seeks To Intervene In Sage Grouse Case. The [AP](#) (11/17) reports that three national environmental organizations are seeking to wade into the legal battle over sage grouse regulations in Nevada. The Wilderness Society, National Wildlife Federation and mining watchdog group Earthworks “filed a motion late last week seeking formal intervenor status in the case.”

Additional coverage was provided by the [Modesto \(CA\) Bee](#) (11/17, 198K), the [Washington \(DC\) Times](#) (11/17, Sonner, 283K), the [San Francisco \(CA\) Chronicle](#) (11/17, Subscription Publication, 3.44M) and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (11/17, 464K).

Nevada Attorney General Prevented From Arguing At Sage Grouse Lawsuit Hearing. The [Las Vegas Review-Journal](#) (11/17, 403K) reports that Nevada Attorney General Adam Laxalt “won’t be allowed to argue Tuesday when a federal judge considers an injunction to block new public lands regulations, the judge ruled.” U.S. District Judge Miranda Du, “in an order issued Friday, said only the original plaintiffs in the case — Elko and Eureka counties, Quantum Minerals LLC and Western Exploration LLC — will be permitted to present issues and arguments.”

Additional Coverage. Additional coverage of the sage grouse land use plan was provided by the [National Law Review](#) (11/17).

FOREST SERVICE URGES CONGRESS TO OVERHAUL WILDFIRE BUDGET. The [Payson \(AZ\) Roundup](#) (11/14, 21K) reports that the U.S. Forest Service “remains in something approaching bureaucratic and budget meltdown, with wildfires torching the budget and thinning projects languishing.” The Forest Service “quickly exhausted its firefighting budget this year, spending a record \$243 million in a single week in a desperate effort to contain fires that consumed more than 750 California homes in a single, catastrophic week.” Forest Service officials have “appealed to Congress to completely overhaul the wildfire budget, to keep the predictable disaster of each fire season from consuming money for everything else the Forest Service does.”

Senate Panel To Hold Hearing On Wildfires. [E&E Daily](#) (11/17, Subscription Publication) reports that the Senate Energy and Natural Resources Committee on Tuesday will “hold a hearing to discuss past wildfire seasons and how to improve future management.”

CONTINUING COVERAGE OF MANHATTAN PROJECT NATIONAL HISTORICAL PARK. In continuing coverage, the [Los Angeles Times](#) (11/16, 3.6M) reported that Energy Secretary Ernest Moniz and Interior Secretary Sally Jewell signed an agreement last week creating the Manhattan Project National Historical Park. Moniz and Jewell said the park “would span three key parts of U.S. atomic bomb development: the Hanford Site in Washington, where plutonium was manufactured; Los Alamos National Laboratory in New Mexico, where the bomb was designed and assembled;” and Y-12 in Tennessee, “where uranium was separated.”

Additional coverage of the establishment of the Manhattan Project National Historical Park was provided the [Paris \(TN\) Post-Intelligencer](#) (11/17, 25K) and [Gizmodo \(IND\)](#) (11/17, 12K).

ADDITIONAL COVERAGE OF JOIN CONSERVATION EFFORT TO HELP MONARCH BUTTERFLIES. Additional coverage of the cooperation between the US and Mexico to help the monarch butterfly population was provided by [Fusion](#) (11/17, 280K).

OBAMA URGED TO DESIGNATE DESERT PUBLIC LANDS AS NATIONAL MONUMENTS. Michael Madrigal, president of the Native American Land Conservancy, writes at the [Palm Springs \(CA\) Desert Sun](#) (11/16, 98K) to urge President Obama to act “on Sen. Dianne Feinstein’s request that he designate select desert public lands as the Mojave Trails, Sand to Snow, and Castle Mountains national monuments.” Madrigal says that “the proposed national monuments include a vast range of cultural and archaeological treasures, unique flora and fauna, and a rich connection to the history of Native American tribes in the area.” He concludes that “these lands are a real-life history book, and deserve the protection of national monument status to preserve our legacy and ongoing relationship with the land.”

Empowering Native American Communities:

MEASURE TO BLOCK ARIZONA CASINO FAILS IN HOUSE. In its “Floor Action” blog, [The Hill](#) (11/17, Cama, Marcos, 654K) reports that “a contentious and heavily lobbied bill” that would “block construction of a controversial casino in a Phoenix suburb” failed to pass in the House on Monday. According to the article, “House GOP leaders brought the bill to the floor under a fast-track process typically reserved for noncontroversial measures,” but “the bill narrowly fell short in securing the necessary two-thirds supermajority to move forward under the procedure in the 263-146 vote.”

Additional coverage was provided by the [Arizona Republic](#) (11/16, 960K) and the [Sun City \(AZ\) Daily Sun](#) (11/17, 17K).

ADDITIONAL COVERAGE: INTERIOR RELEASES 2015 STATUS REPORT FOR LAND BUY-BACK PROGRAM. Additional coverage of the 2015 Status Report for the Land Buy-Back Program for Tribal Nations was provided by the [Char-Koosta News](#) (11/17, 12K).

Office of Insular Affairs:

MARSHALLS RECEIVES \$8.9M IN COMPACT PAYMENTS. The [Saipan \(MNP\) Tribune](#) (11/17, 641) reports that the Interior Department’s Office of Insular Affairs “recently released to the government of the Republic of the Marshall Islands’ U.S. Compact grant payments for October totaling \$8,986,600.”

Tackling America’s Water Challenges:

BOR STANDS BEHIND REPORT THAT COLORADO AGREED TO MINE PLAN. The [AP](#) (11/17, 1.15M) reports that the BOR on Monday “stood behind its assertion that Colorado officials signed off on a cleanup project that led to a 3 million-gallon toxic waste spill from an inactive gold mine.” BOR spokesman Peter Soeth said “the information in the report came from the Division of Reclamation, Mining and Safety.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (11/17, Elliott, 283K), the [Albuquerque \(NM\) Journal](#) (11/17, 263K), the [Daily Mail](#) (11/17, 5.31M), the [Denver \(CO\) Post](#) (11/17, 825K), the [Houston \(TX\)](#)

[Chronicle](#) (11/17, 2.15M), the [US News & World Report](#) (11/16, 996K), the [Washington \(DC\) Post](#) (11/16, 7.78M), [Yahoo! News](#) (11/17, Elliott, 6.43M), [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (11/17, 464K), and [WKBN-TV Youngstown \(OH\)](#) Youngstown, OH (11/16, 70K).

Additional Coverage Of Gold King Mine Spill. Additional coverage of the Gold King Mine spill was provided by the [Indian Country Today Media Network](#) (11/15, 47K).

BOR BLASTS LOWER REPUBLICAN NATURAL RESOURCES DISTRICT WATER PLAN. The [Hastings \(NE\) Tribune](#) (11/17, 37K) reports that “surface water irrigation interests, including a key federal agency, had tough words for the Lower Republican Natural Resources District Thursday in assessing its proposed new integrated water management plan.” Representatives of the BOR and two regional surface irrigation districts “arose at a public hearing here to criticize plans for a relaxed pumpage reduction target contained in the proposed IMP.” According to the article, “while officials have said surface water irrigators will benefit from the new plan by being assured of at least some water deliveries each year, the irrigation districts and BOR are reacting negatively to what the plan says about groundwater pumping targets.”

Securing America’s Energy Future:

Onshore Energy Development:

BLM DEVELOPING MITIGATION STRATEGY TO SPEED NPR-A DEVELOPMENT. [EnergyWire](#) (11/16, Subscription Publication) reports that “in early fall,” the BLM “met with an impressive group of Native leaders, conservationists, university experts, and state and federal regulators in Barrow, Alaska, to help hammer out proposals for offsetting the environmental impacts of future oil and gas development in the National Petroleum Reserve in Alaska (NPR-A).” The workshop was “one of a series of meetings BLM is holding to develop an all-encompassing, regional mitigation strategy for balancing environmental protection versus energy development in the oil-rich northeastern corner of the NPR-A, a 22.5-million-acre reserve in northern Alaska.” According to the article, “once the Alaska strategy is completed, it will be the first to focus on oil and gas development under an Interior Department initiative to write broad, regional management blueprints for energy development on thousands of acres of public lands across the nation. “

STATE, FEDERAL OFFICIALS FIGHTING OVER UTAH MINE PROPOSAL, SAGE GROUSE. [Politico Pro](#) (11/16) reports that a proposed coal project in Utah is “straining the compromise between states and the federal government over protecting the greater sage grouse.” Alton Coal is seeking to expand its operations into an area occupied by a group of grouse. The BLM is “expected to make a final decision by the end of the month.”

BLM TO HOLD MEETINGS TO DISCUSS POSSIBLE FRACKING LEASES IN WAYNE NATIONAL FOREST. The [Columbus \(OH\) Dispatch](#) (11/16, 518K) reports that “the federal government will hold three meetings this week concerning the possibility of opening Wayne National Forest to fracking.” Oil and gas companies have “formally expressed interest to the U.S. Bureau of Land Management in hydraulically fracturing about 31,900 acres of the Wayne.” The BLM is “reviewing those requests to see if the federal government owns the mineral rights beneath those sections of the forest, and it plans to assess potential environmental risks.”

Additional coverage was provided by the [News Center \(WV\)](#) (11/17).

BLM AUCTIONS DRILLING RIGHTS TO GRASSLANDS AMID PROTESTS. The [Colorado Independent](#) (11/17, Ray, 1K) reports at the BLM office Thursday buyers “purchased 93 percent of nearly 90,000 acres up for sale for oil and gas drilling, most within the Pawnee National Grassland,” while outside protesters implored the government agency to “Keep it in the ground.” The Independent notes that the sale netted over \$5 million. The report says that “the Rainforest Action Network joined several groups, including the Center for Biological Diversity, Coloradans Against Fracking and 350 Colorado, in organizing the protest,” which includes “six activists linked arms to block the public entrance of the BLM office.”

BLM POSTPONES OIL, GAS LEASING AUCTION. The [Salt Lake \(UT\) Tribune](#) (11/17, 339K) reports that the BLM has “postponed a controversial auction of oil and gas leases that multiple groups had planned to protest Tuesday morning.” In a statement, the BLM said that the auction “has been postponed to allow the time needed to better accommodate the high level of public interest in attending the sale.” The Southern Utah

Wilderness Alliance had “planned to file protests on 15 parcels in and near the Mussentuchit basin, south of Emery, and another three in the Book Cliffs.”

BLM TO HOST PUBLIC MEETINGS ON MINING WITHDRAWAL IN SAGE GROUSE AREAS. The [Elko \(NV\) Daily Free Press](#) (11/17, 22K) reports that the BLM “will host public meetings next month on the possible 20-year withdrawal of lands from new mining claims in sage grouse focal areas.” The Free Press notes that the public comment period on the proposal has also been extended until January 15. According to the BLM, “neither the segregation for up to two years, nor any subsequent withdrawal, would prohibit ongoing or future mineral exploration or extraction operations on valid pre-existing mining claims, or any other authorized uses on these lands.” However, local and state officials say the withdrawal would harm the economies of rural Nevada.

BANKRUPTCIES STIR CONCERNS OVER COAL MINE CLEANUPS. [Wyoming Public Radio](#) (11/17, Paterson) reports that there are concerns about cleanup of the Eagle Butte Mine after owner Alpha Natural Resources filed for bankruptcy in August. WPR explains that “regulators estimate it would cost over \$400 million to restore the land that Alpha has mined in Wyoming,” however, “in its most recent financial filings, the company listed nationwide liabilities two-and-a-half times greater than its assets.” WPR explains that data from the Office of Surface Mining, Reclamation, and Enforcement show that in the top ten coal producing states, “over one million acres of land has been ‘disturbed’ for coal mining operations.” WPR says that reclaiming those mines is expansive and as the industry-wide downturn advances there may no longer be cash to pay for clean-up costs.

COAL COMPANIES ABANDON FUTURE PROJECTS. The [Casper \(WY\) Star-Tribune](#) (11/17, Storrow, 81K) reports that “coal companies have abandoned applications for federal leases boasting nearly 2 billion tons in reserves this year, offering further evidence of the industry’s deteriorating financial condition and raising doubts over its future.” The Star-Tribune notes that roughly 40 percent of American coal is mined on land overseen by the BLM but the Bureau has not approved any leases since 2012, “largely at the behest of companies that have held back as market conditions deteriorated.” Analysts say that “firms’ hesitancy to lease reflects the short and long-term challenges facing the industry.”

URANIUM MINES REOPEN NEAR GRAND CANYON. [KJZZ-FM](#) Phoenix (11/17, Sevigny, 8K) reports online that the Federal government has halted uranium mining near the Grand Canyon but that old mines can still reopen, including Canyon Mine on the Kaibab National Forest. KJZZ explains that the mine was shut down in the early 1990s but was reopened a few months ago. According to Donald Bills, a hydrologist with the US Geological Survey, scientists are “still in the process of building a database that will provide” evidence on the impact of these mines. Meanwhile, “the Grand Canyon Trust wants activity at Canyon Mine to halt until the U.S. Forest Service completes new environmental reviews.”

BLM POSTS PROPOSED PARCEL LIST FOR FEBRUARY 2016 LEASE SALE. The [Lake Powell Life](#) (11/17) reports that the BLM Utah Canyon Country District Office on Monday “posted the list of parcels proposed for auction at the quarterly competitive oil and gas lease sale scheduled for Feb. 16, 2016, in Salt Lake City.”

RESEARCH FELLOW: LINK BETWEEN INDUCED SEISMICITY, OIL AND GAS PRODUCTION IMPORTANT TO STUDY. In commentary carried by the [Fort Worth \(TX\) Star-Telegram](#) (11/17, 463K), Isaac Orr, a research fellow with the Heartland Institute, wrote that an increase in earthquake activity in Oklahoma and Texas “spurred a coalition of scientists, regulators, industry experts and environmentalists to produce a 148-page report exploring why these earthquakes are occurring and how to prevent future incidents.” Said Orr, “Understanding the historical relationship between induced seismicity and oil and natural gas production is important for scientists and state regulators because it provides a road map for determining the causes of the current tremors and a toolbox of approaches to limit their occurrence in the future.”

Offshore Energy Development:

BUSINESS OWNER DISCUSSES OPPOSITION TO OIL DRILLING OFF US EAST COAST. In commentary carried by [The Hill](#) (11/16, 654K), Charles Robbins, owner of Cape Fear River Adventures, discussed a proposal to open the US East Coast to offshore oil and gas drilling. Wrote Robbins, “By announcing a leasing plan for oil drilling from Virginia to Georgia, the U.S. Department of the Interior is putting our pristine shoreline – and our coastal economy – at grave risk. It’s no surprise, then, that communities along the Southeastern coast are rising up to oppose drilling off our beaches.” Robbins wrote that “shockingly, since the BP blowout,

not a single law has been changed to make drilling any safer,” adding, “This remained the case this summer even as Shell actively drilled in the remote, dangerous Arctic Ocean. (Fortunately, this fall the Obama administration canceled the remaining two years of leases in Arctic, granting a much-needed reprieve for a pristine ocean wilderness the oil industry has long hoped to exploit.)”

ST. PETERSBURG COMMITTEE VOTES TO SPEND PART OF BP SETTLEMENT ON SEWER REPAIRS.

The [Tampa Bay \(FL\) Times](#) (11/17, Frago, 844K) reported, “A St. Petersburg City Council committee voted unanimously Monday to spend \$1.5 million of cash from the BP settlement on sewer system repairs.” The action “was the first slice taken from the \$6.5 million pot of money from the 2010 Deepwater Horizon spill settlement,” and “might just be the first step in spending the BP cash.”

America’s Great Outdoors:

Bureau of Land Management:

RED ROCK NATIONAL CONSERVATION AREA MARKS 25TH ANNIVERSARY. The [Las Vegas Review-Journal](#) (11/17, 403K) reports that the Red Rock National Conservation Area celebrated its 25th anniversary on Monday.

BLM CRITICIZED FOR SEIZURE OF PROPERTY ALONG RED RIVER. Leigh Thompson, attorney and policy analyst at Center for the American Future and the Armstrong Center for Energy and the Environment at the Texas Public Policy Foundation, writes at the [Austin \(TX\) American Statesman](#) (11/17, Subscription Publication, 405K) that the BLM “has come under fire for its brazen attempt to seize approximately 90,000 acres from private landowners along the Red River. And it should.” Thompson says that BLM has offered to let property owners claim property for title under the Color of Title Act but Thompson says that this is no real solution for several reasons, including that only 160 acres can be awarded under the act. Thompson also takes issue with the fact that this process would leave the mineral estate in the possession of the Federal government.

Fish and Wildlife Service:

PLAN TO EXPORT CHIMPS PUT TO THE TEST. The [Greenwire](#) (11/16, Subscription Publication) reports that five months after the FWS “moved to extend endangered species status to captive chimpanzees, a permit application by a Georgia research center will test the implications of the new rule.” Emory University’s Yerkes National Primate Research Center is “seeking to transfer eight chimpanzees to the Wingham Wildlife Park in southeastern England because of ‘changing research priorities.’” The federal Endangered Species Act requires the FWS “to consider whether the move will benefit the chimpanzee species, and the quality of any new facility.”

APPEALS COURT CONSIDERS ARGUMENTS IN DUNES SAGEBRUSH LIZARD CASE. [E&E Publishing](#) (11/16, 705) reports that federal judges “grappled” Monday with “the details of Texas’ plan to protect the dunes sagebrush lizard, as they considered whether to uphold the Fish and Wildlife Service’s decision to withdraw a proposed endangered listing of the species.” Attorneys for “both FWS and Defenders made their oral arguments in front of a three-judge panel for the U.S. Court of Appeals for the District of Columbia Circuit.”

COURT ORDERS ADDITIONAL BRIEFS IN FAIRY SHRIMP CASE. [Courthouse News](#) (11/16, 7K) reports that “the government and three California developers must provide more information to determine whether a rule designating 57 acres of critical habitat for the endangered Riverside fairy shrimp will stand, a federal judge ruled.” U.S. District Judge Ketanji Brown Jackson in the District of Columbia “declined to award either party summary judgment, dismissing their motions without prejudice.” Though Jackson “found both party’s arguments compelling, she ruled on Nov. 13 that the administrative record contains insufficient evidence to decide the matter and ordered both sides to submit additional briefs.”

GROUP QUESTIONS COST OF ARCTIC SEABIRD REINTRODUCTION PLAN. [E&E Publishing](#) (11/16, 705) reports that Public Employees for Environmental Responsibility on Monday “raised concerns about the cost and analysis behind a Fish and Wildlife Service effort to reintroduce a threatened species of seabird to western Alaska.”

PETITION SEEKS ASKS FWS TO ADD WOOD TURTLES TO ENDANGERED SPECIES LIST. [WCAV-TV](#)

Charlottesville, VA (11/17, 4K) reports that Wild Virginia is petitioning to add the Wood Turtle to the Endangered Species List. According to Wild Virginia, the Wood Turtle is “considered imperiled in almost all 18 states in which it appears.”

ADDITIONAL COVERAGE: DELMARVA FOX SQUIRREL REMOVED FROM ENDANGERED LIST.

Additional coverage of the delisting of the Delmarva Peninsula fox squirrel was provided by [Nature World News](#) (11/16), the [Steelers Lounge \(PA\)](#) (11/17), [Discovery Channel](#) (11/17, 395K), and [Mongabay](#) (11/17, 6K).

WRITER DECRIES OREGON’S DECISION TO REMOVE WOLF PROTECTIONS. Brenda Peterson writes at the [Huffington Post](#) (11/17, Peterson, 251K) that wolves are “trapped along a cultural fault line between the Old and the New West.” She says that Oregon as “regressed to Old West prejudices by delisting the wolf from the state’s endangered species protection” and allowing ranchers to “apply for permits to shoot wolves if they suffer livestock loss.” Meanwhile, “there are movements to sue the state’s Wildlife Commission for the delisting, calling it unlawful and premature; they are asking the state legislature and Governor Kate Brown to reverse this decision.” Peterson concludes that “instead of regressing to prejudices of the Old West, the rest of us in the West can forge new win-win alliances between more far-sighted ranchers and hunters and conservationists.”

National Park Service:

“FIND YOUR PARK, LOVE YOUR PARK” INITIATIVE ENCOURAGE YOUTH TO VISIT NATIONAL PARKS. The [National Geographic](#) (11/17, 31.87M) reports that Find Your Park, Love Your Park is a new initiative by National Geographic with support from Subaru. The program, “timed to coincide with the National Park Service centennial in 2016,” features “five free downloadable activity modules for educators, each developed by National Geographic’s education specialists to empower students to claim their parks as places for recreation, conservation, and discovery.”

STUDENTS CREATE HUMAN BANNER TO CELEBRATE NPS CENTENNIAL. The [Golden Gate Xpress](#) (11/16) reports that “draped in blazing colors of orange and red to match the Golden Gate Bridge behind them, a crowd of more than 200 people formed a human sign reading ‘100!’ at Crissy Park Saturday in celebration of the National Park Service’s centennial anniversary.”

NPS OPPOSES STORE NEAR CHANCELLORSVILLE BATTLEFIELD. The [AP](#) (11/17, 2.15M) reports that the NPS “opposes a plan to build a country store with a bakery and deli across the street from a major Civil War battlefield in Spotsylvania County.” NPS Historian Eric Mink “recently wrote to the county that approving the store could lead to other development near the Chancellorsville battlefield.” According to Mink, the store would result in “visual intrusions” that would hurt visitors’ experience.

Additional coverage was provided by the [Washington \(DC\) Post](#) (11/16, 7.78M), the [Washington \(DC\) Times](#) (11/17, 283K), the [Casper \(WY\) Star-Tribune](#) (11/17, 81K), the [Bismarck \(ND\) Tribune](#) (11/17, 54K), and the [Decatur \(IL\) Herald & Review](#) (11/17, 118K).

NEW SECTION OF COLD HARBOR BATTLEFIELD SET TO OPEN. The [AP](#) (11/16, 7.78M) reports that “a recently preserved section of the Cold Harbor Civil War battlefield is set to be opened to the public.” The battlefield will “open Saturday following a dedication ceremony at 10 a.m.” The article notes that “funding from the National Park Service Centennial Initiative made the project possible, providing the necessary archaeology, maintenance, interpretive waysides, parking area and removal of non-historic structures needed to restore the battlefield landscape.”

YELLOWSTONE BREAKS OCTOBER VISITATION RECORD. The [AP](#) (11/17, 2.15M) reports that the NPS says “just over 252,000 people” visited Yellowstone National Park in October. The article notes that “that is 29 percent more than the previous October record.” The NPS says “the record visitation in October may be the result of unseasonably warm weather during the month and marketing.”

BROKEN TOILET SEATS AT NATIONAL PARK BLAMED ON ASIAN TOURISTS. The [Spokane \(WA\) Spokesman-Review](#) (11/16, Landers, 174K) reports that “the influx of Asian tourists in Jackson Hole has resulted in some cultural problems involving pit toilets around Yellowstone and Grand Teton national parks.” Grand Teton park spokesman Andrew White says that about a dozen toilets had broken seats this summer after “park officials discovered that tourists from Asian countries were squatting, with their feet on the lids,

while using the facilities.”

HOWARD DUNCAN, RANGER AT BIG SOUTH FORK FOR 30 YEARS, TO RETIRE. The [Knoxville \(TN\) News Sentinel](#) (11/17, Simmons, 229K) reports that in 1985 Big South Fork National River and Recreation Area “hired a 29-year-old former elementary school teacher and principal from Fentress County named Howard Duncan to be a part time ranger.” The News Sentinel explains that on December 31 Duncan will retire as an interpretive ranger with the NPS and “unlike many park service employees, Duncan spent his entire career at one park.” The report points out that “for 30 years he has been a walking library on all things Big South Fork — a gifted storyteller whose favorite subjects range from the geology of the Big South Fork’s river gorges to how the region was first settled.”

MAINE PARK PROPONENTS SAY NATIONAL MONUMENT COULD BE STEP TOWARD PARK DESIGNATION. The [Bangor \(ME\) Daily News](#) (11/16, Sambides, 165K) reports that “efforts to form a national park in Maine’s Katahdin region continue and include a formal lobbying effort in Washington, D.C., according to the park’s leading proponent, who says he has discussed but is not pursuing an interim ‘national monument’ designation on land adjacent to Baxter State Park.” The Daily News explains that “Lucas St. Clair, whose family owns the property eyed for the park, said the national monument tag would be sought only as a temporary step toward securing the national park designation.” Meanwhile, 63 pages of documents released by the Department of the Interior in response to a FOIA request show that lobbyist George Cooper “has held phone conferences, met or corresponded with Interior Department officials about a half-dozen times on behalf of the park effort since April 13.”

US Geological Survey:

USGS RESEARCH SHOWS TREATED LEACHATE STILL CONTAINS CONTAMINANTS. The [Waste Dive](#) (11/17) reports that new research from the USGS “shows that even after leachate is treated, it can contain multiple chemicals from residential, industrial, and commercial waste discarded into US landfills.” According to the article “scientists collected and analyzed treated and stored liquid waste samples from 22 landfills looking for 190 ‘contaminants of emerging concern’ (CEC), including pharmaceuticals, household products, and industrial chemicals.” Mike Focazio, coordinator for the USGS Toxics Substances Hydrology Program said that “this research is the first step in understanding environmental exposures to contaminants originating from liquid wastes in landfills.”

Top National News:

UNDER MEDIA PRESSURE, OBAMA DEFENDS ANTI-ISIL STRATEGY, POLICY ON REFUGEES.

Coverage of the President’s remarks in Antalya, Turkey highlighted not just his strong criticism of GOP positions on ISIL threat, but also what reports cast as the palpable tension between him and the news media. The [New York Times](#) (11/17, Shear, Baker, Subscription Publication, 11.64M), for example, reports that during “a sometimes tense news conference” in which he “sounded weary and defensive,” the President “forcefully” rejected “calls for escalating the use of military force...or turning away Syrian refugees at home.” The [Washington Post](#) (11/16, Eilperin, 7.78M) said on its website that Obama “appeared annoyed” at reporters, while [McClatchy](#) (11/17, Recio, 27K) reports that he “responded testily” and [Bloomberg Politics](#) (11/16, Olorunnipa, 303K) describes him as “doubling down on his strategy...in the face of rising calls from domestic allies and critics alike” that he doesn’t have one. In an editorial, meanwhile, the [Washington Post](#) (11/17, Board, 7.78M) refers to “a petulant-sounding...Obama,” and concludes that he “would be wise to set aside his defensiveness.”

[NBC Nightly News](#) (11/16, story 4, Holt, 7.86M) similarly reported last night that Obama was “sounding defensive.” On [CNN’s Situation Room](#) (11/16, 554K), Wolf Blitzer similarly indicated that the President was “visibly annoyed,” the [New York Post](#) (11/17, Earle, 2.59M) describes him as “defensive,” [Bloomberg Politics](#) (11/16, Olorunnipa, 303K) says “his exasperation was evident” and [The Blaze](#) (11/16, Howerton, 1.89M) portrayed him as “visibly annoyed.” The [New York Daily News](#) (11/17, Edelman, 3.59M) reports that the President faced “intense criticism” yesterday, and [Politico](#) (11/16, Gass, Toosi, 1.19M) says “at times” he “appeared to lose patience.”

The [CBS Evening News](#) (11/16, story 10, Pelley, 5.08M) showed Obama saying, “No, we haven’t underestimated their abilities. This is precisely why we’re in Iraq as we speak and why we’re operating in Syria as we speak. If you have a handful of people who don’t mind dying, they can kill a lot of people. That’s one of

the challenges of terrorism. It's not their sophistication or the particular weaponry that they possess, but it is the ideology that they carry with them and their willingness to die."

Mentioned in virtually all reports is Obama's [exchange](#) with CNN's Jim Acosta, who pointedly asked him, "Why can't we take out these bastards?" [NPR](#) (11/16, Naylor, 1.78M), meanwhile, noted that Obama has come under criticism over the last few days "for remarks he made in a broadcast interview that aired just before the attacks, in which he said ISIS had been 'contained.'"

At any rate, Howard Kurtz, in an online analysis for [Fox News](#) (11/16, 9.42M), detected "a new and darker mood in the media...and a far greater willingness to take on...Obama for the lack of progress against" ISIL. Kurtz called "the shift in tone" in Obama's relationship with reporters "remarkable" for "a president who has often received soft treatment in the past." The [Huffington Post](#) (11/16, Calderone, 251K) also referred to "an unusually blunt" media "approach...in questioning...Obama," while the [Talking Points Memo](#) (11/16, Cruz, 388K) described the President as "openly frustrated," "exasperated," and "testy." Jack Mirkinson, writing for [Salon](#) (11/16, Mirkinson, 868K), said that "Acosta's language may have been rougher than some might have used, but he was speaking for a press corps whose thirst for an apocalyptic confrontation with ISIS has been let loose," with the "establishment media...eagerly" reverting "to its default position when it comes to foreign policy: the more hawkish, the better."

David Corn, writing for [Mother Jones](#) (11/16, Corn, 1.05M), said, however, that "Obama was right. He does have a strategy, and for more than a year the United States has taken many actions to thwart ISIS." Michael Tomasky, in a similar [Daily Beast](#) (11/16, Tomasky, 1.26M) piece titled "Obama Takes On a Newly Hawkish Press," wonders whether the US is "seriously going to repeat the same damn mistakes we made after 9/11," and answers that "if the media gets its way, it seems the answer is an emphatic yes." To Tomasky, the press conference "was a disaster. Not for...Obama," who "did fine" even if his "Syria policy has been a failure." Rather, "it was a disaster for the press, for America, for the world. The media are going to help push us back into war."

[Voice of America](#) (11/16, Ramirez, 64K) reported that "ending wars and avoiding new ones has been a cornerstone of Obama's presidency," and yesterday he "indicated he wanted to avoid a repeat of the US-led war in Iraq, 'not because our military could not march into Mosul or Raqqa or Ramadi and temporarily clear out ISIL but because we would see a repetition of what we have seen before.'" Yesterday, notes the [AP](#) (11/17), Obama reiterated that "putting large numbers of US troops on the ground to combat the threat from the Islamic State would be 'a mistake.'" Instead, the [Wall Street Journal](#) (11/17, A1, Lee, Panetta, Sonne, Subscription Publication, 6.23M) quotes the President as saying, "There will be an intensification of the strategy that we've put forward," and "the strategy that we've put forward is ultimately the strategy that's going to work. ... It's going to take time." Obama, says the [Washington Post](#) (11/17, Jaffe, 7.78M), is now "in the unenviable position of championing a strategy that even he admits could take years to work, and could be marked by significant setbacks and more terrorist attacks like those in Paris."

[USA Today](#) (11/16, Michaels, 5.56M) notes that "critics countered that it is Obama's approach that's a mistake." Said Sen. John McCain, "Obama stands alone in his commitment to a failed strategy." In an interview on [CNN's Situation Room](#) (11/16, 554K), McCain also said he would like to see a no-fly zone instituted in Syria. [The Blaze](#) (11/16, Lucas, 1.89M) noted that Obama said yesterday that likely wouldn't work, stating, "A true safe zone requires us to set up ground operations, and the bulk of the deaths that have occurred in Syria, for example, have come about not because of regime bombing but because of on-the-ground casualties. ... Who would come in? Who would come out of that safe zone? How would it work? Would it become a magnet for further terrorist attacks? How many personnel would be required and how would it end? There's a whole set of questions that have to be answered there."

Moreover, says the [Washington Times](#) (11/17, Boyer, 283K), Obama "showed a flash of anger...with Republican critics of his anti-terrorism strategy, saying he is 'too busy' to engage in a rhetorical debate with them." [USA Today](#) (11/17, Jackson, 5.56M) notes that during the press conference, Obama "denounced some Republicans' 'shameful' calls to give preference to Christian refugees from Syria." Obama "said there should not be a 'religious test' applied to people who fleeing persecution," and Obama indicated that he "disagreed with his predecessor, Republican President George W. Bush, on many issues," but he "applauded his statements after the 9/11 attacks that the United States is not engaged in a war with Islam." On its website, [TIME](#) (11/16, Berenson, 19.1M) said Obama "sharply criticized Jeb Bush and Ted Cruz," while the [AP](#) (11/16, Woodward) says the attacks "are rapidly weakening US support for bringing in thousands more Syrian refugees."

[ABC World News](#) (11/16, story 7, Muir, 5.84M) reported that President Obama on Monday “declared America has a moral responsibility to allow some Syrian refugees to settle” in the US, but Republicans are “attacking” Obama’s plan to allow as many as 10,000 Syrian refugees into America. Sen. Ted Cruz said there is “no meaningful risk of Christians committing acts of terror,” and he and Jeb Bush “insist the emphasis should be on allowing Syrian Christians into the US.” [Reuters](#) (11/17, McPike) quotes Obama as saying, “When I hear folks say that, ‘Well, maybe we should just admit the Christians but not the Muslims,’ when I hear political leaders suggesting that there would be a religious test for which person who’s fleeing from a war-torn country is admitted, when some of those folks themselves come from families who benefited from protection when they were fleeing political persecution, that’s shameful.” [Politico](#) (11/16, Gass, 1.19M) notes that the President added, “That’s not American. That’s not who we are. We don’t have a religious test for our compassion.”

Dana Milbank, in the [Washington Post](#) (11/17, Milbank, 7.78M), denounces the “xenophobic bidding war among Republican presidential candidates,” and terms Bush and Cruz’s call for “admitting Christian refugees from Syria but not Muslims” a “particularly pernicious twist.” David Ignatius writes in the [Washington Post](#) (11/17, Ignatius, 7.78M) that Obama “rightly called such intolerant rhetoric ‘shameful.’ It’s also unwise. The same goes for Sen. Mario Rubio’s...argument that there is a “clash of civilizations” underway. What does he say to the Muslim victims in Beirut and Baghdad?”

On [Fox News’ The O’Reilly Factor](#) (11/16, 767K), Bill O’Reilly said Obama is “unrepentant and unwilling to admit that his strategy has failed.” O’Reilly added that Republicans “now have an opportunity to make a campaign issue out of” ISIL because it is “clear most Democrats will not stop backing Mr. Obama on the issue.” Charles Krauthammer [added](#) that the kindest way to explain Obama’s remarks on Monday “is that he is delusional.” Krauthammer added that Obama “has never thought the war on terror was important or existential.” On [CNN’s Anderson Cooper 360](#) (11/16, 686K), Christiane Amanpour said that “most people” who have been looking at the Administration’s strategy “say now is the moment for everybody to agree that the strategy is not working.” She added, that there “needs to be...a ‘come to Jesus’ moment.” Blitzer said during [CNN Wolf](#) (11/16, 224K) that Obama’s “critics...are pounding on him right now, that his strategy has not worked.”

On [Fox News’ The Five](#) (11/16, 408K), Dana Perino said that whenever Obama “gets a chance to talk about these situations, he always starts with what he will not do rather than telling us what he will do. I find that strange.” Eric Bolling [added](#) that Obama has “completely lost control. He’s out in the woods.” Bolling later asked, “How many Americans are going to have to die before president Obama wakes up and starts taking [ISIL] seriously the way French President Hollande is doing?” Also on [Fox News’ The Five](#) (11/16, 408K), Kimberly Guilfoyle said Obama is “completely committed to his ideology and the decisions that he made previously without showing any capability to pivot, evaluate the new fact pattern, the new situation and the current dynamics.”

In an interview on [Fox News’ On The Record](#) (11/16, 654K), Rep. Adam Kinzinger called Obama’s remarks “a joke,” adding that the way Obama discussed those who disagree with his strategy came off in a “very immature way.” Kinzinger said, “I would have thought, in seven years he would have a lot thicker skin than he does but only seems to be getting thinner when he realizes his strategy is failing and people call him out on it.”

Rick Grenell, former US spokesman to the UN, said on [Fox News’ On The Record](#) (11/16, 654K) that “what we saw today is that...Obama was more interested in fighting his political battle back home rather than try to lead the world at this important time.”

In an interview on [MSNBC Live](#) (11/16, 232K), Marc Ginsberg, a former US Ambassador to Morocco, said Obama is “setting up a political straw-man” because he’s unwilling to put boots on the ground. Ginsberg said the current Administration “is not qualified to take on ISIS and develop an effective strategy.”

In an interview on [Fox News’ Special Report](#) (11/16, 1.53M), Rep. Devon Nunes, chairman of the House Intelligence committee, criticized Obama’s strategy, saying there is a “lot of disconnect” between what the President has said and the “reality,” which is that ISIL has “just gotten bigger and better and deploying the same tactics that Al Qaeda was doing.” Nunes added that it seems the Administration “is surrounding themselves with a bunch of ‘yes men.’” On [Fox News’ Special Report](#) (11/16, 1.53M), Kevin Corke said that critics have accused Obama of “being isolated and allowing other countries to lead the way when it comes” to ISIL.

Officials Confirm One Paris Gunman Entered Greece Posing As Syrian Refugee. The [CBS Evening News](#) (11/16, story 4, Pelley, 5.08M) reported that Greek Interior Minister Ioannis Mouzalas said that when Ahmad Al Mohammad, one of the Paris attackers, came to Greece claiming to be a Syrian refugee on Oct. 3, he had no criminal record and gave no indication that he could have been an extremist. CBS reported that because Mohammad wasn't on any international watch list, he was registered by Greek authorities and allowed to enter Europe.

The [Washington Post](#) (11/17, Adam, Kirchner, 7.78M) reports French prosecutors confirmed Monday that Mohammad's fingerprints "matched those taken in Greece last month in the clearest sign yet that one of the attackers blended in among the hundreds of thousands of migrants who have arrived in Europe this year." The [Wall Street Journal](#) (11/17, Walker, Bisserbe, Subscription Publication, 6.23M) reports Mohammad used a fake Syrian passport to enter Greece and that passport was found on his remains outside the Stade de France, where he detonated a suicide bomb.

GOP Lawmakers, Governors, White House Hopefuls Move To Block Refugee Influx. The [New York Times](#) (11/17, Healy, Bosman, Subscription Publication, 11.64M) reports that GOP "fury over illegal immigration and border security took on a new dimension Monday as a growing number of governors, presidential candidates and members of Congress rushed to oppose or even defy...Obama's plan to resettle 10,000 Syrian refugees." [USA Today](#) (11/16, Kelly, 5.56M) says that "Congressional Republicans moved Monday to try to block funding for...Obama's plan" because of "growing concerns by lawmakers that those refugees could include Islamic State terrorists." Sen. Jeff Sessions, chairman of the Judiciary Subcommittee on Immigration and the National Interest, "sent a letter Monday to the Senate Appropriations Committee requesting that any upcoming spending bills require congressional approval for the president's refugee plan and for the funds to carry it out." Meanwhile, notes [Reuters](#) (11/16, Zengerle, Cornwell), GOP Rep. Bruce Babin circulated a letter yesterday requesting that Congress defund spending provisions allowing for the Syrian refugees' move to the US.

[USA Today](#) (11/16, Lyman, 5.56M) reports that Alabama Gov. Robert Bentley on Sunday "announced the state of Alabama" will "not accept refugees from the Syrian civil war," and "several other Republican governors" also "questioned plans to increase the number of refugees resettling in Alabama, including Louisiana Gov. Bobby Jindal." The [Huffington Post](#) (11/16, Foley, 251K) noted other governors "said Sunday and Monday that they will block Syrian refugees from resettling in their states, based on concerns about terrorism after attacks in Paris last week." The states in question are – in addition to Alabama and Louisiana – Arkansas, Indiana, Massachusetts, Michigan and Texas. Later last night, [Politico](#) (11/16, McCaskill, 1.19M) reported that "what started as a trickle of opposition turned into a deluge by late Monday as GOP governors from...Florida, Georgia, Tennessee, North Carolina, Arizona, Maine," Wisconsin, Mississippi, Illinois and Ohio, as well as "Democratic Govs. Maggie Hassan of New Hampshire and Steve Bullock of Montana – joined...Bentley and Michigan Gov. Rick Snyder in refusing to accept refugees from Syria."

[CNN's Situation Room](#) (11/16, 554K) reported that the number of governors saying they don't want Syrian refugees in their states has reached 23. Dana Bash reported that despite "all of that opposition," a State Department spokesman "is saying they believe they can steadfastly bring in refugees and are committed to doing and they believe they can do it in a way that represents American values and keep Americans safe." The [CBS Evening News](#) (11/16, story 5, Pelley, 5.08M) noted that the governors said they will "direct state agencies not to provide Syrians the types of relocation services normally supplied to refugees." The [Washington Times](#) (11/16, Dinan, 283K) runs a similar story this morning, while [USA Today](#) (11/16, Korte, 5.56M) cautions that "despite protests from more than a dozen Republican governors who want to close their states to Syrian refugees, those governors probably have little power to stop them from coming," according to "legal scholars."

The [Washington Post](#) (11/17, 7.78M), [Los Angeles Times](#) (11/17, Hennessy-Fiske, Mascaro, 3.6M), [Wall Street Journal](#) (11/17, A1, Tau, Peterson, Subscription Publication, 6.23M), [Chicago Tribune](#) (11/17, Garcia, Briscoe, Pearson, 2.33M) and [Milwaukee Journal Sentinel](#) (11/17, Stein, 691K), among other news outlets, run similar reports. Reporting from Royal Oak, MI, meanwhile, the [Washington Post](#) (11/17, Friess, Morello, 7.78M) says that the debate has "startled Arab Americans nationwide, particularly in communities such as Detroit, where the new flow of refugees had been welcomed for its potential to boost local economic fortunes." State Department deputy spokesman Mark Toner "said families from Syria are subject to a rigorous, 18-to-24-month security screening before they are accepted into the refugee program. He declined to address the complaints of governors, saying, 'We believe it's incumbent on us to sit with them, consult with them, explain to them the process.'"

[Politico](#) (11/16, Kim, Sherman, Everett, 1.19M) reports that House Homeland Security Chairman Mike McCaul, meanwhile, “wrote a letter to Obama asking him to ‘temporarily suspend the admission of all additional Syrian refugees into the United States pending a full review of the Syrian refugee resettlement program, including of the aforementioned security risks.’”

[The Hill](#) (11/16, Carney, 654K) noted that GOP Sen. Sen. Rob Portman, “who faces a tough reelection battle next year, said the administration should stop resettling Syrian refugees in the United States ‘until there has been a thorough review of DHS and State Department vetting procedures to endure that no terrorists or individuals with links to Islamist extremist groups make it into the United States.’” Republican Sens. Mark Kirk, Kelly Ayotte, Dan Coats, Joni Ernst, Shelly Moore Capito and Democratic Sen. Joe Manchin also “sent a letter to Obama saying that ‘our first and most important priority’ should be making sure that refugees aren’t a threat to the United States.”

[Politico](#) (11/16, Strauss, 1.19M) notes that Sen. Rand Paul “announced Monday that he was introducing legislation calling for an ‘immediate moratorium’ on the United States issuing visas to refugees from about 30 countries with a ‘significant jihadist movement.’” The [Washington Times](#) (11/16, Miller, 283K) quotes Paul as saying, “The time has come to stop terrorists from walking in our front door.”

Ben Carson, notes the [Washington Times](#) (11/17, Mclaughlin, 283K), also weighed in, calling on Congress “to immediately strip funding for the resettlement of Syrian refugees in the United States.”

On its website, [The Hill](#) (11/16, Hagen, 654K) reported that former Gov. Mike Huckabee “called on Speaker Paul Ryan...to oppose Syrian refugees from entering the United States or resign from his leadership post.”

Rep. Devon Nunes, chairman of the House Intelligence committee, appearing on [Fox News' Special Report](#) (11/16, 1.53M), said the US shouldn’t take any Syrian refugees right now, “especially with the threat that we face,” because those coming are “young men with absolutely no information on them, how do you vet them?”

In an interview on [CNN's Situation Room](#) (11/16, 554K), Rep. Tulsi Gabbard called for the suspension of a visa waiver program for European citizens that she said “does not address the vulnerability of the open and porous borders between Syria and Turkey.” She added that the program should be suspended “until the intelligence community gets a handle on this.”

[McClatchy](#) (11/16, Allam, 27K) reports that according to the State Department, “Syrian refugees are subjected to the most intensive screening of any group, given the murkiness of the civil war they’re fleeing. Unlike in Iraq, where US officials had access to the former government’s files and their own intelligence records, such background materials are much scarcer for Syria. Most details about the Syrian screening process are classified.”

In an editorial, the [Wall Street Journal](#) (11/17, Subscription Publication, 6.23M) blames the President for the country’s apparent shift against the refugees, arguing that if he had shown a stronger commitment to defeating ISIL, he would not be facing a state of growing fear among Americans. The [Washington Post](#) (11/17, 7.78M) editorializes, meanwhile, that “the Paris attacks have shaken up the discussion on Syria,” but “the moral calculus regarding refugees who have been driven from their homes, beaten, tortured, gassed and raped hasn’t changed,” because “the humanitarian necessity is overwhelming” and “there is no excuse to sit by.”

Chris Matthews reported on [MSNBC's Hardball](#) (11/17, 713K) that Obama’s policy regarding Syrian refugees was “met with fierce resistance from the right in this country.” Matthews asked who will win this political fight. The Huffington Post’s Howard Fineman responded that the Republican “aim is to stoke as much fear as they can.” He said that Republicans “clearly think they have the upper hand. I’m not sure they don’t.”

Rachel Maddow said on [MSNBC's Rachel Maddow Show](#) (11/16, 769K) that while Republican governors “slammed the door” on Syrian refugees, the “leading lights of the Democratic party” in foreign policy are “proposing something quite different.” Maddow said that represents a “truly useful partisan divide for once.” Maddow also [said](#) that conservative politicians like Ted Cruz are “trying to outdo each other” in announcing that Syrian refugees shouldn’t be allowed in the US. She added that Cruz is introducing a bill to the Senate that would specifically ban Syrian Muslim refugees, but not Christians. Maddow added that Cruz “presumably...has invented a magic litmus paper that derives a person’s religion on their forehead.”

The [New York Times](#) (11/17, Hulse, Subscription Publication, 11.64M) reports, meanwhile, that “Congress has come a long way from ‘freedom fries.’” Both parties, even as they disagree on the ideal policy course, are “expressing a new solidarity with France.”

Feinstein Calls For US Ground Troops In Fight Against ISIL. [Bloomberg Politics](#) (11/16, Olorunnipa, 303K) reports that Sen. Dianne Feinstein, “usually an administration ally, joined the call for more force beyond the several dozen special operations advisers Obama has said the US was deploying in Syria after the failure of a Defense Department program to train ‘moderate’ rebels.” Feinstein told MSNBC, “I can’t tell you how many troops on the ground we need. ... But we certainly need more than 50 special ops, and we need the ability to really make a difference on the ground.” Feinstein, says [Politico](#) (11/16, Collins, 1.19M), “sharply contradicted...Obama on Monday.”

Sen. Johnson Calls On US To Invade ISIL Territory. [USA Today](#) (11/16, Slack, 5.56M) reports that Sen. Ron Johnson, chairman of the Senate Homeland Security and Governmental Affairs Committee, “said Monday the United States should invade territory held by the Islamic State in Iraq and Syria.” Said Johnson, “It’s high time that we make a commitment in the world that Islamic terrorists have got to be wiped off the face of the planet. ... Because if we don’t, every day that ISIS survives, every day that they are not overtly losing, they are perceived as winners and perceived as winning and they’ll continue to inspire adherents to this barbarity.”

Gabbard: US Should Stop Targeting Assad, Focus On ISIL. In an interview on [CNN’s Situation Room](#) (11/16, 554K), Rep. Gabbard argued that the Administration needs to stop the “illegal” war against Syria’s “sovereign government.” She said that the cause of chaos in Syria is that US, Saudi Arabia, and other countries have been arming rebel forces against President Bashar al-Assad, adding that this strategy counterproductive and is only working to strengthen our enemies. Instead, Gabbard argued that the US should “focus more pointedly” on ISIL. However, she said it would be “counterproductive” to send US troops on the ground in Syria. She believes the US must do more to equip “partners on the ground” like Kurdish forces, while also continuing to use our air assets. Gabbard also argued that the reason US allies have diminished their air strikes because they have become distracted by the mission of ousting Assad.

Reuters Poll Finds Ambivalence About US Military Commitment, Increased Terrorism Fear. [Reuters](#) (11/16, Gibson) reports that a new Reuters/Ipsos poll has found that most Americans want the US to intensify its assault on ISIL, though a majority also opposes sending US ground troops to Iraq or Syria. The story does not cite the actual polling numbers on that issue, but it notes that 63% expressed fear that a Paris-style terrorist attack could take place near them.

BRENNAN RENEWS SURVEILLANCE DEBATE, WARNS OF MORE ISIL ATTACKS. The [New York Times](#) (11/17, Shane, Subscription Publication, 11.64M) reports that in the wake of the Paris attacks, CIA Director Brennan has “renewed a debate on government surveillance and privacy, denouncing ‘hand-wringing’ over intrusive spying and saying that leaks of classified information had made it harder to identify terrorists.” Speaking at the Center for Strategic and International Studies, Brennan said, “In the past several years, because of a number of unauthorized disclosures, and a lot of hand-wringing over the government’s role in the effort to try to uncover these terrorists, there have been some policy and legal and other actions that have been taken that make our ability collectively, internationally, to find these terrorists much more challenging.”

[Reuters](#) (11/16, Landay) reports that Brennan also warned of future ISIL attacks, saying, “I would anticipate that this is not the only operation that ISIL has in the pipeline. And security intelligence services right now in Europe and other places are working feverishly to see what else they can do in terms of uncovering it.” [Politico](#) (11/16, Gerstein, Gass, 1.19M) reports Brennan also said “the Friday attacks were not likely a ‘one-off event’” in his “blunt comments.”

Morell: We’re In A “Whole New World” After Paris Attacks. The [CBS Evening News](#) (11/16, story 6, Pelley, 5.08M) reported, “After Paris, we’re in a ‘whole new world,’” according to former deputy CIA director Michael Morell. Morell, now a CBS analyst, said, “I say ‘whole new world’ for two reasons. One is ISIS now has developed an attack capability in the West. They told us that they would do that. ... The second whole new world here is the targets they’ve chosen to attack. People don’t sympathize with, but they certainly understand, when ISIS attacks a government target or a military target or even Charlie Hebdo. ... It’s much more difficult to understand an attack on our very way of life that sows fear and terror.”

US, MEXICO SIGN AGREEMENT ON SHARING SATELLITE DATA DIRECTLY. The [AP](#) (11/15, 2.15M) reports that the United States and Mexico signed an agreement last Friday "for Mexico to capture and process land-surface imagery and data directly from a U.S.-operated satellite." The deal "means Mexico will be able to get the raw information from the Landsat 8 satellite immediately instead of waiting for filtered data to be released by U.S. authorities." Interior Secretary Sally Jewell said that the agreement "acknowledges Mexico's capability and hunger, really, for this real-time data to address the challenges and the opportunities that they have on the ground. If you look at Hurricane Patricia ... that's the kind of information that Mexico could have been using in real time to help it prepare." She added, "And it lessens its dependence on the United States for interpretation of that data and enables it to directly integrate it with the data that it has, which can provide it more useful information than perhaps what they could do without that direct download."

Additional coverage was provided by the [Salina \(KS\) Journal](#) (11/15, 88K), [US News & World Report](#) (11/13, 996K), the [Washington \(DC\) Post](#) (11/13, Peter Orsi |, Ap, 7.78M), the [Salt Lake \(UT\) Tribune](#) (11/15, 339K), the [Albuquerque \(NM\) Journal](#) (11/13, Orsi), the [Daily Mail](#) (11/15, 5.31M), the [Oklahoman](#) (11/15, 470K), [Sudan Vision](#) (11/15), and [Yahoo! News](#) (11/13, Orsi, 6.43M).

Additional Coverage Of Secretary Jewell's Visit To Mexico. Additional coverage of Interior Secretary Sally Jewell's Mexico trip was provided by the [Dubuque \(IA\) Telegraph Herald](#) (11/15, 88K), [ABC News](#) (11/15, 3.35M), the [Lewiston \(ID\) Tribune](#) (11/15, 57K), [Yahoo! News](#) (11/13, Stevenson, 6.43M), the [Japan Times](#) (11/13, 5K), [Sudan Vision](#) (11/15), [Milenio \(MEX\)](#) (11/15, 42K), the [Mexico News Daily \(MEX\)](#) (11/15), [ANSA \(ITA\)](#) (11/15), [USA Hispanic](#) (11/13), [Milenio \(MEX\)](#) (11/15, 42K), [ABC News](#) (11/15, 3.35M), and

[Univision](#) (11/15, 798K).

REP. BISHOP SAYS ATTACK AD MEANS HE'S ON RIGHT TRACK WITH LWCF BILL. The [Deseret \(UT\) News](#) (11/15, 476K) reports that Rep. Rob Bishop “reacted” last Thursday to a television ad targeting his proposal to overhaul the Land and Water Conservation Fund. He said, “I think I’ve hit a nerve or at least pocketbook issue somewhere. Anytime somebody becomes vitriolic or vicious on attack ads or personal, I think it means I’m on the right path.” The spot, which aired during the Republican presidential debate Tuesday, says “the fund has helped protect parks, playgrounds and trails across the country without costing taxpayers a dime and has support from Republicans and Democrats in Congress.”

Additional coverage was provided by the [National Review](#) (11/15, 533K) and the [New Bedford \(MA\) Standard-Times](#) (11/15, 57K).

In an op-ed for the [Raleigh \(NC\) News & Observer](#) (11/15, 356K), Cassandra Carmichael, Executive Director of The National Religious Partnership for the Environment, urges Senate leadership to work together on “reaching an agreement to save the LWCF and to ensure that efforts to weaken LWCF’s impact by Bishop do not move forward.”

Additional commentary appeared in the [Santa Fe New Mexican](#) (11/15, 67K), the [Seattle \(WA\) Times](#) (11/15, 1.17M) and the [Everett \(WA\) Herald](#) (11/13, 139K).

BATTLE OVER SAGE GROUSE IN NEVADA HEADS TO FEDERAL COURT. The [Las Vegas Review-Journal](#) (11/15, 403K) reports that “the showdown over sage grouse in Nevada heads to a federal courtroom, where lawyers for the attorney general’s office and rural interests will ask a judge to block federal land-use restrictions intended to protect the bird and its habitat.” However, Justice Department lawyers argue that “granting an injunction could prompt the U.S. Fish and Wildlife Service to reconsider its decision not to list the chicken-sized bird under the Endangered Species Act. States have been working for years to prevent a listing.” U.S. District Judge Miranda Du will “consider a motion for an injunction at a 9 a.m. hearing Tuesday in Reno.”

Additional coverage was provided by the [Provo \(UT\) Daily Herald](#) (11/15, 155K), the [Houston \(TX\) Chronicle](#) (11/15, 2.15M), the [Denver \(CO\) Post](#) (11/15, Press, 825K), the [Washington \(DC\) Post](#) (11/15, Scott Sonner |, Ap, 7.78M), the [Durango \(CO\) Herald](#) (11/14, 31K), the [Las Vegas \(NV\) Sun](#) (11/14, 179K), the [Pittsburgh \(PA\) Tribune-Review](#) (11/15, 318K), [Fox News](#) (11/15, 9.42M), and [Yahoo! News](#) (11/15, Sonner, 6.43M).

BLM Proposes Strengthening Protections For Sage Grouse In Nevada. The [Greenwire](#) (11/13, Subscription Publication) reports that the BLM is “proposing to significantly strengthen protections for a subpopulation of greater sage grouse in Nevada in part due to protests from conservation groups.” The BLM published a formal notice in last week’s “Federal Register outlining potential changes to proposed amendments to the agency’s Carson City Field Office Consolidated Resource Management.”

COLORADO DISPUTES EPA CLAIM OF STATE AUTHORIZATION FOR GOLD KING CLEAN-UP. [The Hill](#) (11/13, Cama, 654K) reported that officials from Colorado have challenged the EPA’s “account of the state’s role in the August mine waste spill that the EPA caused.” The EPA has claimed that waste clean up at the Gold King Mine was approved by the Colorado Division of Reclamation Mining and Safety, which Mike King, Colorado’s natural resource director, denied. King said “no one at DRMS directed any work at Gold King, nor did any DRMS personnel approve or disapprove any of the work EPA was conducting there.”

[Politico Pro](#) (11/13) notes that the Durango Herald reports that the “letter is a blow to the EPA’s contention that outside technical experts supported its plan to push a drainage pipe through debris covering the entrance to the Gold King Mine in Silverton on Aug. 5.”

Also providing coverage are [The Hill](#) (11/13, Cama, 654K), the [New York \(NY\) Times](#) (11/13, Press, Subscription Publication, 11.64M), the [Durango \(CO\) Herald](#) (11/12, 31K), the [Houston \(TX\) Chronicle](#) (11/15, 2.15M), [US News & World Report](#) (11/13, 996K), the [Minneapolis \(MN\) Star Tribune](#) (11/13, Elliott, 1.15M), the [Daily Mail](#) (11/15, 5.31M), the [Arizona Republic](#) (11/12, 960K), the [Albuquerque \(NM\) Journal](#) (11/15, 263K), the [Los Angeles \(CA\) Times](#) (11/15, 3.6M), the [Durango \(CO\) Herald](#) (11/14, 31K), the [Navajo Times \(AZ\)](#) (11/15, 66K), [KJZZ-FM Phoenix \(AZ\)](#) Phoenix (11/15, 8K), and [KRQE-TV Albuquerque \(NM\)](#) Albuquerque, NM (11/13, 34K).

Link Between Navajo Suicides, Mine Spill Unclear. The [AP](#) (11/15, 2.15M) reports that Navajo Nation President Russell Begaye and his vice president have been highlighting “recent tragedies” they tie to the Gold King mine spill that have “shaken some reservation towns to their cores.” They said “eight people killed themselves in communities impacted by the unleashing of toxic waste from a Colorado gold mine into the San Juan River on the Navajo Nation, burdened by the stress of seeing a sacred waterway polluted.” But “some residents in the affected communities were skeptical, wondering whether there’s a direct correlation between the mine spill and suicides” and “some saw the suggested link as an effort for tribal leaders to score political points on a national stage.” The article notes that “the communities also suffer deep hardships like rampant unemployment, poverty, alcoholism and domestic violence that are major contributors to high suicide rates — an issue on American Indian reservations nationwide.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (11/15, Felicia Fonseca |, Ap, 7.78M), the [Arizona Republic](#) (11/15, 960K), and the [Denver \(CO\) Post](#) (11/15, Fonseca, 825K).

Additional Coverage Of Spill. Additional coverage of the spill was provided by the [Ely \(NV\) Daily Times](#) (11/13, 776) and the [Indian Country Today Media Network](#) (11/15, 47K).

SECRETARY JEWELL INTERVIEWED AT 7TH ANNUAL WHITE HOUSE TRIBAL NATIONS CONFERENCE. At the 7th Annual White House Tribal Nations Conference, the [Indian Country Today Media Network](#) (11/12, 47K) asked Interior Secretary Sally Jewell about good and bad news in Indian Country. According to Jewell, “the bad news in Indian Country is that we have hundreds of years to make up for [with issues such as] oppression and people in tribal communities not being respected. I think that that has manifested itself in multiple generations of young people that have grown up ... with a sense of ‘we don’t matter,’” she said. But “the good news,” says Jewell, “is that I think we have turned the corner on that in a very significant way.”

SECRETARY JEWELL SPEAKS TO STUDENTS AT SACNAS EVENT. The [Forum of Fargo-Moorhead \(ND\)](#) (11/15, 29K) reports that students “took part in the largest multicultural and multidisciplinary science, technology, engineering and math conference in the country recently in Washington, D.C.” The event was sponsored by the Society for Advancement of Chicano/Hispanic and Native Americans in Sciences. Interior Secretary Sally Jewell was among the speakers at the event.

K-MAX DEMONSTRATION TO BE HELD IN NEW YORK. [Fortune](#) (11/13, 4.24M) reports that Lockheed is “placing a particular emphasis on what K-MAX has to offer civil authorities battling wildfires from the air.” The article notes that last month, the company hosted a demo for the Interior Department outside of Boise, Idaho, “in which an unmanned K-MAX repeatedly filled a bucket slung from its belly with water from a pond and dropped it at precise points around a simulated wildfire.” Next week, “another demo in upstate New York will demonstrate K-MAX’s ability to autonomously work alongside a smaller spotting drone to seek out and suppress hot spots in another simulated wildfire environment.”

UTAH GOVERNOR MULLS SUPPORT OF NEW NATIONAL MONUMENT. The [Greenwire](#) (11/13, Subscription Publication) reports that Utah Gov. Gary Herbert “hinted” last week “he could support a new national monument if it meant a compromise on the protracted debate over public lands management in his state.” At a monthly local news conference, Herbert said he was not specifically referring to the proposed Bears Ears National Monument. However, Herbert said a national monument and Utah Reps. Rob Bishop and Jason Chaffetz’s Public Lands Initiative, “a push for a partial state takeover of many federal lands, are not ‘mutually exclusive.’”

FEDERAL WORKERS RECEIVE GUIDELINES ON POLITICAL VIEWS AND SOCIAL MEDIA. [The Hill](#) (11/13, McCabe, 654K) reported that the Office of Special Counsel on Thursday issued guidelines on how Federal workers can use social media to express their political views without violating the Hatch Act. [Roll Call](#) (11/13, Cahn, 139K) reported that the Office of Special Council said it was issuing the guidelines because “social media and email — and the ease of accessing those accounts at work, either on computers or smartphones — have made it easier for federal employees to violate the Hatch Act.”

JOURNALISTS TO MEET WITH WHITE HOUSE PRESS SECRETARY ON TRANSPARENCY. The [Greenwire](#) (11/13, Subscription Publication) reports that “journalists have scored a meeting with the White House press secretary to discuss their complaints about access and transparency in the Obama administration.” According to the article, “representatives for the Society of Professional Journalists and the Society of Environmental Journalists will meet with White House spokesman Josh Earnest on Dec. 15.”

ADDITIONAL COVERAGE OF ESTABLISHMENT OF MANHATTAN PROJECT NATIONAL HISTORICAL PARK. Additional coverage of the establishment of the Manhattan Project National Historical Park was provided by the [Los Angeles Times](#) (11/16, 3.6M), the [Los Alamos \(NM\) Monitor](#) (11/15), the [Herald Voice Daily News](#) (11/15), and the [Lewiston \(ID\) Tribune](#) (11/15, 57K).

OBAMA ADMINISTRATION'S MITIGATION POLICY SUPPORTED. For "The Blog" of the [Huffington Post](#) (11/13, Morgan, 251K), Ann Morgan, a public lands advocate, writes that "last week President Obama ordered five federal agencies to ensure that development on national public lands results in a net benefit, or at a minimum no net loss, of land, water, wildlife and other ecological resources." She notes that "while it is far too early to understand the full impact of this new administrative policy, predictions of economic doom, as well as boom, were quick to materialize." Morgan ages that "it may be confusing, but it is an important step forward."

CONGRESS URGED TO ACT ON WILDFIRE FUNDING. In an editorial, the [Walla Walla \(WA\) Union-Bulletin](#) (11/15, 38K) notes that "earlier this year, U.S. Secretary of the Interior Sally Jewell said wildfires — suppression and prevention — should be funded just as the federal government funds relief efforts involving other natural disasters such as tornadoes in the Midwest and hurricanes in the South." The paper supports "a new framework to allow agencies such as FEMA to respond in the same way it does with hurricanes and tornadoes." It argues that "if this came to fruition it could provide more certainty in funding wildfire suppression so the state would save cash that could be used to fund fire prevention and forest rehabilitation efforts."

Empowering Native American Communities:

BIE UNDERGOING REFORM. [Education Dive](#) (11/16) reports on the effort to "reform the BIE." In June 2014, the Obama Administration "announced a structural overhaul of the BIE, based on recommendations from the American Indian Education Study Group report 'Blueprint for Reform.'" Recently, "on November 5, 2015, a new pair of federal grants totaling approximately \$2.5 million dollars was announced, to help eight specific tribes."

MASHPEE WAMPANOAG TRIBE CONVEYS LAND TO INTERIOR. The [Taunton \(MA\) Daily Gazette](#) (11/13, 39K) reports that "less than two weeks after finalizing a purchase deal with property owners worth \$34.5 million," the Mashpee Wampanoag tribe has "conveyed the 151 acres of East Taunton real estate to the federal government." According to the article, "by doing so, the Department of the Interior is able to officially place the land into trust as a tribal reservation for the Mashpee Wampanoag, which also has more than 170 acres of land in Mashpee designated as its homeland."

MAINE NATIVE AMERICAN TRIBES SAY RELATIONS WITH STATE GOVERNMENT ARE ABYSMAL. The [AP](#) (11/15) reports Maine Native American tribes say their trust in the state government "is at a new low. What has long been an uneasy peace...has degraded with clashes on issues such as fishing rights and new casinos." Earlier this year, Gov. Paul LePage rescinded an order "directing state agencies and departments to create policies recognizing the sovereignty" of four tribes, and two of the tribes responded by giving up their seats in the state legislature. A third, the Aroostook Band of Micmacs, "issued a document saying they would no longer recognize the authority of state officials to interfere with their 'self-governing rights.'"

TOHONO O'ODHAM NATION URGES CONGRESS TO REJECT "KEEP THE PROMISE ACT OF 2015." For the "Congress" blog of [The Hill](#) (11/15, Manuel, 654K), chairman of the Tohono O'odham Nation of Arizona, writes that "if passed, H.R. 308 will not only renege on the United States' promises to the Tohono O'odham Nation, it will hand pink slips to the 1,800 men and women working on site and, according to the non-partisan Congressional Budget Office, will cost the American taxpayers as much as \$1 billion in liability." The Tohono O'odham Nation "urges Congress keep its word to the Nation and reject this deeply dishonorable legislation."

CONGRESS URGED TO SUPPORT THE TRIBAL LABOR SOVEREIGNTY ACT. In an op-ed for the "Congress" blog of [The Hill](#) (11/15, Allen, Melendez, 654K), W. Ron Allen, chairman/CEO of the Jamestown S'Klallam Tribe in Sequim, Washington, and Arlan Melendez, chairman of the Reno-Sparks Indian Colony of Nevada, urges Congress to support the Tribal Labor Sovereignty Act. The legislation "would provide much-needed guidance to the National Labor Relations Board in the wake of its decisions that treat Indian tribal governments like second-class citizens and ignore our governmental status when it comes to the National Labor Relations Act."

PAPER SUPPORTS FRUITPORT TOWNSHIP CASINO. In an editorial, the [MLive \(MI\)](#) (11/15, 698K) supports moving forward with the Little River Band of Ottawa Indians plans for a casino in Fruitport Township. According to the paper, “public opinion now appears heavily in favor of getting the casino built and operating.” However, it observes that “moving the U.S. Bureau of Indian Affairs is a slow process to say the least.”

Office of Insular Affairs:

MARSHALLS RECEIVES \$8.9M IN COMPACT FUNDING PAYMENTS. The [Marianas Variety](#) (11/15) reports that “the U.S. Department of the Interior’s Office of Insular Affairs recently released to the Government of the Republic of the Marshall Islands’ Ministry of Finance, U.S. Compact grant payments for October totaling \$8,986,600.”

INTERIOR HOLDS UP BIKINI LOCAL GOVERNMENT BUDGET. [Marianas Variety](#) (11/16) reports that for the first time in several decades, the Interior Department did not approve prior to October 1 the Bikini Local Government’s “annual budget, which generally amounts to somewhere between \$6 and \$7 million depending on the results of its trust fund investments from year to year.” However, the report notes that “there were indications that budget approval is now on course for being resolved, possibly this week.” [Marianas Variety](#) says that the new factor in the equation is Interior Assistant Secretary for Insular Affairs Esther Kia’aina, “who stepped into the process usually handled at Interior staff level, holding up budget approval and sending critical letters to both Bikini Mayor Wilson Note and President Christopher Loeak and Foreign Minister Tony deBrum raising concerns about Bikini budget issues last month.”

Tackling America’s Water Challenges:

BOR RELEASES STUDY ON COST OF GILA RIVER DIVERSION PROJECT. [KRWG-FM](#) Las Cruces, NM (11/15, 1K) reports that the BOR “released its final Value Planning Study that provides preliminary cost estimates of alternatives for a Gila River diversion project.” According to the article, “the final report confirmed estimates that the Gila River diversion project is likely to cost \$1B or more when including costs for operations and maintenance over the life of the project.”

[KRWG-FM](#) Las Cruces, NM (11/15, 1K) reports that “Albuquerque’s Inaugural Poet Laureate (2012-2014), Hakim Bellamy, released his latest song, Everywhere is a Gila, to draw attention the looming deadline for Secretary of the Interior Sally Jewell to sign an agreement with New Mexico that would allow a billion-dollar diversion of the Gila River to go forward.” The piece, “accompanied by aerial and ground shots of America’s first wilderness area and the adjacent area slated for diversion, encourages listeners to take action by writing to Jewell in opposition to the project.”

Additoinal coverage of the River diversion project was provided by the [Las Cruces \(NM\) Sun-News](#) (11/15, 47K).

FEDERAL GOVERNMENT URGES STATES TO COOPERATE ON COLORADO RIVER WATER. The [San Diego Union-Tribune](#) (11/14, 534K) reports that California, Arizona and Nevada are “slowly moving to a new model of cooperation” on Colorado River water. The article notes that “the federal government is encouraging them to think about renegotiating the historic agreements and legal decisions known as the Law of the River.”

BOR DETAILS PLANS FOR HYRUM DAM SPILLWAY REPLACEMENT. The [Logan \(UT\) Herald Journal](#) (11/15, 47K) reports that “preliminary plans for the replacement of Hyrum Dam’s spillway show it will cost between \$20 million and \$25 million, and the project is expected to be complete by 2020, a U.S. Bureau of Reclamation representative told an audience in a meeting Thursday night in Wellsville.” Mike Talbot, resident engineer with the BOR, “detailed preliminary plans for the spillway’s replacement and shedding additional light on concerns about the spillway’s shape.” He said, “Risk mitigation means a lot to the bureau. We’re responsible for the safety of the project, especially if it fails and wipes out people’s property, or even kills people. If we do nothing, that is a possibility.”

PROJECT INTRODUCES ZERO-EMISSION CARS TO GRAND COULEE DAM. [KREM-TV](#) Spokane, WA (11/13, 43K) reports that “a pilot project will introduce more than two dozen zero-emission, low-maintenance utility vehicles to the Grand Coulee Dam.” Matt Tillman, Grand Coulee’s Administrative Officer, said, “In the last couple of years, Grand Coulee has added about 130 employees. We’re trying to introduce these electric vehicles as a way to offset our current gas fleet vehicles. Grand Coulee spends over \$100,000 on fossil fuel

each year. We're expecting to be able to cut that consumption by 10 to 15 percent."

CALIFORNIA GOVERNOR EXTENDS WATER CONSERVATION ORDER. The [AP](#) (11/15, Press) reports that California Gov. Jerry Brown on Friday extended his water conservation order, allowing the measures "to continue through October if California still faces a drought in January." The AP reports that the "order also extends the suspension of some environmental rules, expedites permits to rebuild power plants that were damaged by wildfires and allows some Californians to capture more water."

FISH LADDERS URGED TO BRING SALMON OVER THE FOLSOM DAM. In an op-ed for the [Auburn \(CA\) Journal](#) (11/15, 32K), Jack Sanchez, president of the Auburn-based Save Auburn Ravine Salmon and Steelhead, writes that "Californians must get salmon and steelhead over rim dams in order to prevent extinction." He argues that "fish ladders or some counterparts like fish elevators or fish pipelines over Folsom Dam and the North Fork Dam on the North Fork of American River would help reopen the dams now blocking natural passage for the fish."

Securing America's Energy Future:

Renewable Energy:

SOUTHERN UTE INDIAN TRIBE PLANS TO BUILD SOLAR PROJECT. The [AP](#) (11/16, 825K) reports that the Southern Ute Indian tribe plans to build a solar plant that will power about 10 tribal buildings in the capital of their Colorado reservation, "just in time to meet an end-of-the-year deadline to use a \$1.5 million Department of Energy grant" covering half of the project's cost.

ADDITIONAL COVERAGE OF DESERT RENEWABLE ENERGY CONSERVATION PLAN. Additional coverage of the Desert Renewable Energy Conservation Plan was provided by the [Imperial \(CA\) Valley Press](#) (11/15, 46K) and the [Daily Caller](#) (11/13, Follett, 366K).

Onshore Energy Development:

STATE, FEDERAL OFFICIALS FIGHTING OVER UTAH MINE PROPOSAL, SAGE GROUSE. The [Washington Post](#) (11/15, Fears, 7.78M) reports that Utah and Federal "officials are in a tense standoff over a coal-mining operation's proposed expansion near the habitat of the sage grouse in the area." The Post explains that the Bureau of Land Management claims that a move by Alton Coal to expand mining operations "onto 3,600 acres controlled by the Interior Department could decimate the tiny population of sage grouse there." However, state officials claim the development would create jobs with displaced sage grouse easily moving nearby. The Post says that a decision by the BLM is expected by the end of the month. "It's definitely the first big test post-listing decision," said Allison Jones, a wildlife biologist and director of the nonprofit Wild Utah Project, which opposes the expansion. "A lot of promises were made to keep the sage grouse from being listed. Let's see if those promises are kept."

TRAPPER MINE TOUTS RECLAMATION EFFORT. The [Grand Junction \(CO\) Daily Sentinel](#) (11/15, 73K) reports that mine reclamation efforts can create "an inviting place for many animals, from iconic species such as pronghorn and elk to less familiar ones such as the Columbian sharp-tailed grouse and the grasshopper sparrow," according to people at the Trapper Mine and experts at Colorado Parks and Wildlife. Trapper's efforts "led to be it being recognized in 2002 by the federal Office of Surface Mining Reclamation and Enforcement as one of the top three examples nationally for mined-land reclamation in the modern history of coal mining." Forrest Luke, the mine's environmental manager, said, "Here at Trapper we mine on steep slopes, so a lot of work goes into re-establishing drainages that are hydrologically stable."

CLINTON LIKELY WILL NOT ENDORSE SANDERS' FOSSIL FUEL BILL. [The Hill](#) (11/13, Henry, 654K) reported Hillary Clinton's top advisers on Friday indicated that she likely will not endorse the newest campaign to block fossil fuel production on federal land introduced by Sen. Bernie Sanders and other senators last week. The Hill states that Clinton won't "rule out letting companies extract fossil fuel from public land," but that there should be increasing royalties and revenue paid out to the government.

BLM LEASES 90,000 ACRES OF PUBLIC LAND IN COLORADO FOR OIL, GAS WELLS. The [Examiner](#) (11/15, 616K) reports that "despite protests from environmental groups, the Bureau of Land Management (BLM) in Denver leased 90,000 acres of public land for oil and gas development (fracking) in Colorado on

Thursday.” According to the article, “dozens of protesters with giant puppets, polar bears, oil derricks, signs and banners staged a climate rally Thursday outside of the BLM’s oil and gas lease sale in Lakewood, Colorado, urging President Obama to ‘keep it in the ground.’” It was “part of a national movement calling on the president to define his climate legacy by stopping new federal fossil fuel leases on public lands and oceans.”

CLINTON PROPOSES PLAN TO REVITALIZE COAL COMMUNITIES. The [Greenwire](#) (11/13, Subscription Publication) reports that “Democratic presidential candidate Hillary Clinton’s new plan for revitalizing coal communities is the latest in a string of proposals aimed at hard-hit Appalachia.” However, “it’s unclear whether the plan will be enough to undo years of growing skepticism about national Democrats in states like Kentucky and West Virginia, which have felt the brunt of the changing energy markets and increased regulation.”

WSJournal Criticizes Clinton’s Climate Policy To Eliminate Coal Jobs, Subsidize Miners. In an editorial, the [Wall Street Journal](#) (11/14, Subscription Publication, 6.23M) criticizes Hillary Clinton’s new \$30 billion proposal designed to offset environmental policies that would hurt the coal industry by allocating tax revenues to help coal miners who will lose their jobs.

Additional coverage of the plan was provided by [TIME](#) (11/12, 19.1M) and the [Christian Science Monitor](#) (11/13, 496K).

EXPERTS ARGUE FOR, AGAINST OIL COMPANY LIABILITY IN EARTHQUAKE LAWSUITS. The [Wall Street Journal](#) (11/16, Subscription Publication, 6.23M) reports on lawsuits pending in Oklahoma, Texas and Arkansas against oil and gas companies over damages caused by earthquakes linked to injection wells. The article includes contrasting arguments regarding liability from law professor Blake Watson from the University of Dayton and Katrina Rorke, director of energy policy and a senior fellow at the R Street Institute in Washington. Watson argues that assigning liability to the oil and gas companies follows a logical progression while Rorke argues that holding the energy companies liable is an unreliable way to manage the risk of damage from fracking-inducing earthquakes.

USGS RECORDS 4.3 MAGNITUDE EARTHQUAKE IN OKLAHOMA SUNDAY. The [AP](#) (11/15) reported that the US Geological Survey “recorded a 4.3 magnitude earthquake near Fairview in northwestern Oklahoma” at 3:45 a.m. on Sunday. No injuries or damages were reported. The AP added, “A recent paper by the Geological Survey singled out Oklahoma, concluding that quakes are induced by injecting deep into the earth massive amounts of wastewater that are the byproduct of oil and gas production.”

ACTIVISTS: OIL, GAS “BELONG TO ALL CITIZENS EQUALLY.” [The Hill](#) (11/13, Molvar, Contributor, 654K) “Pundits Blog” reported that Sen Bernie Sanders, along with four other senators, have sponsored the Keep it in the Ground act, “which would end all new leasing of coal, oil and gas on public lands and waters.” The article indicates that this move, along with a recent protest on BLM land against the “most recent oil and gas lease auction,” signals the growing progress being made toward “address[ing] climate change and amplifying the national debate over whether the federal government should be in the fossil fuels business at all.” The Hill states that both events also point toward how activists view “deposits of oil, gas and coal belong to all citizens equally, not to the fossil-fuel industry.”

In her column for the [Casper \(WY\) Star-Tribune](#) (11/15, 81K), Edith Cook supports “high-level action on climate and on protecting the land.” The piece also appears in the [Wyoming Tribune Eagle](#) (11/15, 44K).

WEST VIRGINIA ATTORNEY GENERAL DECRIES “ATTACKS ON COAL.” In an op-ed for the [Williamson \(WV\) Daily News](#) (11/15, 1K), West Virginia Attorney General Patrick Morrisey decries the Obama Administration’s “attacks on coal.” As one example, he points to “President Obama’s Office of Surface Mining recently proposed to adopt a disastrous rule relating to streams near mines.” He claims that “this rule is specifically designed to make coal-mining activity impossible, costing many thousands of coal-mining jobs.”

MISSOULIAN: BLM SHOULD CANCEL LEASES IN BADGER-TWO MEDICINE. In an editorial, the [Missoulian \(MT\)](#) (11/15, 118K) says that the Badger-Two Medicine, 130,000 acres of roadless wildlands, is a sacred place to the Blackfeet people but “for the past 30 years, the U.S. government has allowed oil development interests to hold drilling leases in this sacred place; leases that never should have been issued in the first place.” The paper says that the leases were issued without the tribe’s input and without consideration for any environmental or cultural impacts, “eventually leading the Forest Service to prohibit any additional leases and the federal government to suspend the existing ones.” The Missoulian criticizes the Federal

government for allowing the leases to remain suspended and says that one lease, held by Sidney Longwell, “may determine whether leases covering more than 40,000 acres in the Badger-Two Medicine can be developed.” The paper concludes that the Bureau of Land Management should cancel the leases.

Offshore Energy Development:

OFFSHORE INDUSTRY BLASTS PROPOSED WELL CONTROL RULE. [Platts](#) (11/15, Magill, 1K) reports that Dan Naatz, senior vice president of government affairs with the Independent Petroleum Association of America, said that a rule, which the US Bureau of Safety and Environmental Enforcement is proposing to improve well control in offshore operations, “not only would make it harder to operate” in the offshore environment, but also would “put standards in place that don’t enhance safety.” He cited an analysis by the American Petroleum Institute that found the rule would result in 26% fewer wells drilled per year in the Gulf of Mexico, a 10% reduction in capital investment, and a loss of 50,000 jobs by 2027. BSEE spokesman Gregory Julian responded, “We believe that this rule will drive down risks associated with drilling operations to help ensure the safety of personnel and the protection of the environment.”

LOUISIANA CONGRESSMEN OPPOSE WELL CONTROL PROPOSAL. The [Houma \(LA\) Courier](#) (11/13, Batte, 53K) reports that “Louisiana’s House delegation is making another push to halt the Obama Administration’s effort to revamp offshore equipment standards and well designs aimed at avoiding another BP Spill.” The Courier says that in a letter to Secretary of the Interior Sally Jewell, written by Rep. Charles Boustany (R-LA) and co-signed by the rest of the state’s House delegation, congressmen argue that the “one-size-fits-all approach” would increase the risk of another incident. “It will also stifle innovation and delay implementation of new technologies which would improve safety and operations,” Boustany wrote. “We know this is not BSEE’s intent, and we urge re-evaluation of the proposed rule.”

ENVIRONMENTALISTS, SOUTH CAROLINA COASTAL REPUBLICANS OPPOSE ATLANTIC DRILLING. The [Charleston \(SC\) Post and Courier](#) (11/15, 291K) reports that “proposals to allow testing for oil and gas off the Eastern Seaboard and possibly open the Atlantic to offshore drilling have made for unlikely allies among environmentalists and conservative Republicans.” Reps. Mark Sanford and Tom Rice, “Republicans who represent the South Carolina coast from North Carolina to the Georgia state line, have come out publicly against exploration off the state’s shores.” According to the article, “their opposition reflects the sentiment in their coastal communities, nearly all of which are against the proposal, but it puts them at odds with others in their party and the GOP’s ‘all of the above’ energy policy that supports new pipelines and offshore testing and drilling.”

BP SETTLEMENT FUNDS NOT ALLOCATED AMID LOCAL ELECTIONS. The [Tampa Bay \(FL\) Times](#) (11/16, McManus, 844K) reports that \$6.4 million of BP settlement money in Clearwater’s coffers “is off-limits until after the March election over fear that officials’ ideas for the money could be misinterpreted as campaign promises” for local officials.

JUDGE DENIES NEW ORLEANS TRUST ACCESS TO SECRET BP DOCUMENTS. The [AP](#) (11/16, 2.15M) reports that attorneys for the Wisner Donation Trust seeking “copies of three projects labeled ‘BP Secret’ and up to 15 scientific reports prepared for BP’s lawyers” have been denied by a Federal magistrate. “Magistrate Judge Joseph Wilkinson ruled Friday that the ‘BP Secret’ documents are irrelevant to Wisner’s lawsuit.”

The [New Orleans Times-Picayune](#) (11/16, 661K) adds background on the three BP projects.

HOPKINS: DRILLING OFF GEORGIA SHORE WOULD BENEFIT US. Hunter Hopkins, the executive director of the Georgia Petroleum Council, writes at the [Savannah \(GA\) Morning News](#) (11/15, 150K) that the Bureau of Ocean Energy Management has recently decided to allow energy firms to survey off Georgia’s coastline, where at least 4.7 billion barrels of oil and 37.5 trillion cubic feet of gas lie. He said that this “could drive investment and job growth throughout Georgia — and bring the United States even closer to true energy security.” He says that “a recent poll shows that 77 percent of Georgians are in favor of opening up coastal territories for drilling” and that the state’s political leaders are in favor as well.

America’s Great Outdoors:

Bureau of Land Management:

BLM'S PLANS SPARK MORE DEBATE ON UTAH'S PUBLIC LANDS. The [St. George \(UT\) Spectrum](#) (11/13, 48K) reports that "Monday is the deadline for public comment on the Bureau of Land Management's proposed resource management plans for a pair of national conservation areas in Washington County." The plans have "sparked intense debate over a slew of issues, from grazing permits to access to water, from open access for off-road vehicles to whether the endangered California Condor should be reintroduced to the area." The article notes that "they could also help determine the future of plans to build a 'Northern Corridor' highway across sensitive tortoise habitat in the Red Cliffs Desert Reserve."

REP. THORNBERRY HEARS CONCERNS ABOUT RED RIVER DISPUTE. [KAUZ-TV](#) Wichita Falls, TX (11/15, 447) reports that Rep. Mac Thornberry visited Wichita Falls last week and "spoke about his Red River Private Property Protection Act, along with the Bureau of Land Management Lawsuit." The article notes that "Wichita County's decision to join Clay County, Wilbarger County and private landowners in the lawsuit over tens of thousands of acres along The Red River was announced Thursday."

SOLUTIONS PROPOSED TO CONTROL WILD HORSE POPULATION. The [Las Vegas Review-Journal](#) (11/15, 403K) editorializes that "wild horses, as beautiful as they are, should qualify as an invasive species." It argues that the current "arrangement is unsustainable." The paper supports "humane euthanasia" as a solution.

In an op-ed for the [Denver Post](#) (11/15, Roy, 825K), Suzanne Roy, director of the American Wild Horse Preservation Campaign, supports a contraceptive called PZP as "a humane, cost-effective and publicly supported approach to wild horse management."

Additional commentary appears in the [Taos \(NM\) News](#) (11/16, 31K).

Fish and Wildlife Service:

DELMARVA FOX SQUIRREL REMOVED FROM ENDANGERED LIST. [The Hill](#) (11/15, Cama, 654K) reports that the Delmarva Peninsula fox squirrel "no longer needs federal protection, officials ruled Friday." The squirrel was "removed from the list after it was determined to not be at risk of extinction." Obama Administration officials are "touting the removal as an example of the success of the Endangered Species Act." Michael Bean, the Interior Department's principal deputy assistant secretary for fish, wildlife and parks, said in a statement, "The fox squirrel's return to this area, rich with farmland and forest, marks not only a major win for conservationists and landowners, but also represents the latest in a string of success stories that demonstrate the Endangered Species Act's effectiveness."

Additional coverage was provided by the [Greenwire](#) (11/13, Subscription Publication), the [Easton \(MD\) Star Democrat](#) (11/16, 49K), the [Lewes \(DE\) Cape Gazette](#) (11/15, 42K), the [Houston \(TX\) Chronicle](#) (11/15, 2.15M), the [Washington \(DC\) Post](#) (11/13, Press, 7.78M), the [Washington \(DC\) Times](#) (11/13, 283K), the [Wilmington \(DE\) News Journal](#) (11/13, 387K), the [Richmond \(VA\) Times-Dispatch](#) (11/15, 338K), the [Courthouse News](#) (11/13, 7K), [CNS News](#) (11/15, 132K), the [Tech Times](#) (11/15, 211K), [Bloomberg Research](#) (11/15, 3.4M), [WBOC-TV Salisbury \(MD\)](#) Salisbury, MD (11/15, 69K), and [WBOC-TV](#) Salisbury, MD (11/15, 69K).

FWS SUED OVER RED WOLF PROTECTIONS. The [Greenwire](#) (11/13, Subscription Publication) reports that conservation groups filed a complaint last week "in federal court asserting that the Fish and Wildlife Service has failed to protect a population of rare red wolves." The plaintiffs "argue that FWS has not fulfilled its legal responsibility to protect the wolves now living in North Carolina." Specifically, the agency "halted the reintroductions of captive-bred wolves without conducting a five-year review status and allowed a landowner to shoot a 6-year-old female wolf that may have been caring for wolf pups."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (11/15, 2.15M), the [Washington \(DC\) Post](#) (11/13, Jonathan Drew |, Ap, 7.78M), the [Washington \(DC\) Times](#) (11/13, Drew, 283K), the [Charleston \(SC\) Post and Courier](#) (11/15, 291K), [ABC News](#) (11/15, 3.35M), the [Daily Mail](#) (11/15, 5.31M), the [Raleigh \(NC\) News & Observer](#) (11/15, 356K), and [Take Part](#) (11/13, 154K).

SENATE BILL WOULD DROP PROTECTIONS FOR WOLVES IN FOUR STATES. The [AP](#) (11/13, 113K) reports that "two U.S. senators announced a renewed push Thursday to strip federal protection from gray wolves in the western Great Lakes region and Wyoming — and to prohibit courts from intervening in those states on the embattled predator's behalf." Legislation introduced last "week would order the Department of

the Interior to reissue orders from 2011 and 2012 that dropped wolves in Michigan, Minnesota, Wisconsin and Wyoming from the endangered species list.”

Additional coverage was provided by the [Monroe \(MI\) Evening News](#) (11/13, 50K) and [WWJ-TV Detroit \(MI\)](#) Detroit (11/14, 34K).

TRIBES OPPOSE LIFTING OF PROTECTIONS FOR GRIZZLY BEARS. The [AP](#) (11/13, Brown, 1.15M) reports that “American Indians across the Western U.S. are challenging moves by federal wildlife officials to lift protections for grizzly bears that roam a vast wilderness centered on Yellowstone National Park, citing worries over potential trophy hunting of a species many tribes consider sacred.” According to the article, “U.S. wildlife officials and their state counterparts in Montana, Idaho and Wyoming contend the region’s 700 to 1,000 bears are biologically recovered.” FWS spokeswoman Serena Baker says “the agency will try to balance the tribes’ concerns against science that shows the grizzly bear population has rebounded in the Yellowstone region since protections were imposed in 1975.”

Also providing coverage are the [Albuquerque \(NM\) Journal](#) (11/15, 263K), the [Huron \(MI\) Daily Tribune](#) (11/15, 19K), the [Denver \(CO\) Post](#) (11/15, Press, 825K), the [Washington \(DC\) Post](#) (11/13, Matthew Brown |, Ap, 7.78M), [KCPQ-TV Seattle \(WA\)](#) Seattle (11/13, 114K), and [KOLD-TV Tucson \(AZ\)](#) Tucson, AZ (11/15, 49K).

STUDY IDENTIFIES GULF COAST ECOSYSTEMS AT RISK FROM CLIMATE CHANGE. The [Summit County \(CO\) Citizens Voice](#) (11/14, 506) reports that “sea turtles breeding along the Gulf Coast are among the species deemed most vulnerable to climate change and rising sea level, the U.S. Fish and Wildlife Service concluded in a new vulnerability assessment that looked at four Gulf ecosystems and 11 species dependent on them.” FWS Director Dan Ashe said, “The Gulf Coast region supports some of the most diverse species and ecosystems in the world. It also faces some of the most pressing environmental challenges of our time. The Gulf Coast Vulnerability Assessment will help our agency identify and assess areas that are susceptible to climate change and other stressors while working with our partners to protect and conserve this ecological safe haven for generations to come.”

NATIONAL FISH AND WILDLIFE FOUNDATION ANNOUNCES \$20M FOR FLORIDA GULF COAST RESTORATION PROJECTS. [Florida Water Daily](#) (11/13) reports that “the National Fish and Wildlife Foundation is awarding nearly \$20 million from its Gulf Environmental Benefit Fund to six state projects designed to remedy harm and reduce the risk of future harm to natural resources affected by the 2010 BP Deepwater Horizon oil spill.” FWS Director Dan Ashe said, “The Gulf Coast supports some of the world’s most diverse wildlife habitats, including coastal wetlands and estuaries that are critical for millions of migratory birds, as well as some of the world’s largest fisheries. Helping these vital areas recover from the impacts of the Deepwater Horizon oil spill is a monumental task – one made easier by these and other strategic, partnership-driven restoration projects supported by the GEBF. Working together, we’re making a difference for the Gulf and its wildlife, as well as millions of people who share the landscape and make their living from it.”

FOWLER BEACH SITE OF RESTORATION PROJECT AT PRIME HOOK NATIONAL WILDLIFE REFUGE. [Delaware State News](#) (11/15, 729) reports that “Prime Hook National Wildlife Refuge is the site of a \$38 million restoration project currently being undertaken by the U.S. Fish and Wildlife Service.” On Friday, “members of the media, wildlife observers and state and federal officials came out to witness the work being done.” According to the article, “officials aim to create new mud flats and pools of water, with the goal of attracting all sorts of wildlife.”

PLAN TO EXPORT CHIMPS PUT TO THE TEST. The [New York Times](#) (11/15, Gorman, Subscription Publication, 11.64M) reports that “when the Fish and Wildlife Service decided in June to classify all chimpanzees, captive or wild, as endangered, the ruling meant that any biomedical experiment or export of chimps from the United States, whoever owned them, would be subject to a strict permit process under the Endangered Species Act.” However, “for many chimps still in research institutions, a future as happy retirees in sanctuaries has yet to materialize.” Also, “how the new rules will play out is an open question.” According to the article, “a partial answer is about to come in the first test of the new endangered listing, a permit application now before the Fish and Wildlife Service.” The article notes that “the application is not to conduct experiments, but to transfer eight chimpanzees from the Yerkes National Primate Research Center at Emory University in Atlanta to the Wingham Wildlife Park in southeast England.”

QUESTIONS RAISED OVER TROPHY HUNTING. [KNTV-TV](#) San Jose, CA (11/15, 142K) reports that “a

former top U.S. official is raising questions over America's ability to vet trophy-hunting programs abroad before determining whether certain trophy shipments should be granted approval to enter the U.S." David Hayes, a former Deputy Secretary of the U.S. Department of the Interior, said, "Major wildlife populations, iconic populations – elephants, rhinos – are being decimated by sophisticated international syndicates that are taking the wildlife products – the rhino horn, the ivory and the tiger bone – and are selling them globally." The article notes that "since 2010, the federal government has documented 2,963 violations relating to the import of sport-hunted trophies into the United States, according to records obtained from the U.S. Fish and Wildlife Service."

Additional coverage of trophy hunting was provided by the [Washington Post](#) (11/13, Harvey, 7.78M).

NEW MEXICAN GAME COMMISSION WANTS NEW FEDERAL PLAN FOR WOLVES AHEAD OF ANY RELEASES. The [Santa Fe New Mexican](#) (11/15, 67K) reports that "the New Mexico State Game Commission has said it doesn't want more captive Mexican wolves released until the U.S. Fish and Wildlife Service has an updated recovery plan for the endangered species." According to the article, "the commission's stance doesn't bode well for an appeal by Ted Turner's staff at the Ladder Ranch to continue importing and housing captive Mexican wolves at a facility there."

\$4 MILLION MADE AVAILABLE TO FARMERS TO BOOST MONARCH HABITAT. The [St. Louis Post-Dispatch](#) (11/15, 932K) reports that "the Department of Agriculture is devoting \$4 million for technical assistance to farmers in 10 states, including Missouri and Illinois, to help them plant milkweed and other plants critical to the monarch butterfly." According to the article, "the iconic butterfly is under pressure from the loss of milkweed that is essential to its reproduction and survival in its annual migration across the United States, and on monarch wintering grounds in Mexico."

Additional coverage was provided by the [Lake Expo Online \(MO\)](#) (11/15) and the [Decatur \(IL\) Herald & Review](#) (11/15, 118K).

Also providing coverage of the butterfly are [My Mother Lode \(CA\)](#) (11/15, 1K) and [Switchboard](#) (11/15, 116K).

GROUPS SEEK DELAY ON ELEPHANT IMPORT DECISION. The [Wichita \(KS\) Eagle](#) (11/16, Salazar, 257K) reports that animal welfare groups are asking the Fish and Wildlife Service "to give the public more time to comment on the Sedgwick County Zoo's request to get six new elephants." The Eagle says that this would delay the approval of the importation of 18 elephants from Africa to three American zoos until January, at the earliest. Meanwhile, Sedgwick County Zoo director Mark Reed "says that could put off the planned Memorial Day weekend opening of the Elephants of the Zambezi River Valley exhibit." The Eagle explains that the groups are asking the Department of the Interior to "release all of the documents the zoos submitted to the government when they applied for the permits."

Additional coverage was provided by the [AP](#) (11/16, 2.15M).

CANADIAN CITIZEN SENTENCED FOR RHINO-SMUGGLING. The [Greenwire](#) (11/13, Subscription Publication) reports that "a Canadian man was sentenced to two years in U.S. federal prison for trafficking more than a dozen cups carved from endangered rhinoceros horns, federal officials announced today." According to the article, "Linxun Liao, 35, admitted to purchasing 16 rhino horn libation cups worth more than \$1 million at American auction houses before arranging to smuggle them into China."

Additional coverage was provided by the [Global News \(CAN\)](#) (11/15, 55K), [ENews Park Forest](#) (11/13, 2K), and [Law Fuel](#) (11/15).

SCHWARZENEGGER STARS IN VIDEO CAMPAIGN FOR ANTI-POACHING CAMPAIGN. The [Tech Times](#) (11/15, 211K) reports that Arnold Schwarzenegger "stars in Wildlife Conservation Society's (WCS) new video as part of a campaign to save African elephants from illegal poaching." According to the article, "the video shows Schwarzenegger blowing up an elephant tusk with explosives in order to get rid of the demand for ivory tusks."

Additional coverage was provided by [The Guardian \(UK\)](#) (11/13, Neslen, 3.48M) and the [Drum \(UK\)](#) (11/14, 261).

WYOMING GOVERNOR PUSHES FOR ENDANGERED SPECIES ACT REFORM. The [AP](#) (11/15) reports that Wyoming Gov. Matt Mead said at the outset of a workshop on the Endangered Species Act that "imperiled

plants and animals have had an unacceptably low rate of recovery and removal from Endangered Species Act protections.” He said, “We need better than a 1 percent success rate.” The AP notes that Mead has made reforming the act a priority of his term as Chairman of the Western Governors’ Association. Mead also pointed out that Wyoming officials and the US Fish and Wildlife Service “agree that some animals that remain protected under the act, such as grizzly bears and Wyoming’s wolf population, have recovered.” He pointed to the recovery of the black-footed ferret and greater sage grouse as successful examples of cooperation between property owners and government.

CRAIGHEAD URGES LAWMAKERS TO SUPPORT ENDANGERED SPECIES ACT. Lance Craighead, executive director of the Craighead Institute in Bozeman, writes at the [Billings \(MT\) Gazette](#) (11/15, 200K) that “the Endangered Species Act is the most effective tool I’ve seen for protecting endangered animals and promoting biodiversity.” He says that members of Congress have tried to dilute the act even though the American public overwhelmingly support the act. Craighead argues that Congressional end-runs around the Act are unpopular, misguided, and shortsighted. He concludes Montana’s delegation should “stop attacking the Endangered Species Act and start letting scientists make the decisions about which species need its protection.”

CATTELINO URGES COLORADO SENATORS TO PROTECT ENDANGERED SPECIES ACT. Caitlin Cattelino, of Defenders of Wildlife, writes at the [Boulder \(CO\) Daily Camera](#) (11/16, 122K) that 80% of Coloradans support the Endangered Species Act but it is still “facing constant attacks in Congress.” She says that there have been 80 bills and amendments introduced this year that would ship away at the ESA. She concludes by urging Sens. Michael Bennet and Cory Gardner to listen “to the citizens of Colorado and help protect Colorado’s wildlife for future generations.”

National Park Service:

INTERIOR ANNOUNCES PARTNERSHIP WITH JACK JOHNSON. [KHON-TV](#) Honolulu (11/13, 47K) reports that the Interior Department has “announced a partnership with Jack Johnson that will give fourth-grade students in Hawaii a chance to visit national parks under the Every Kid in a Park program.” According to the article, “Johnson and his wife Kim have made a commitment via their Kokua Hawaii Foundation to fund \$100,000 worth of field trip grants, with the goal of reaching all 17,000 fourth-grade students in the state.” Interior Deputy Secretary Michael Connor said, “Thanks to Jack Johnson’s generous support and commitment to conservation, Hawaii’s fourth-graders will be able to visit the federal lands in their backyards.”

Also providing coverage are the [Honolulu Star-Advertiser](#) (11/16, 349K), [Design & Trend](#) (11/14, 68K), [KHON-TV](#) Honolulu (11/12, 47K), and [KITV-TV](#) Honolulu (11/15, 47K).

National Geographic Launches Free “Find Your Park, Love Your Park” Initiative. [JustMeans](#) (11/13, 1K) reports that “to celebrate the 100th anniversary of the founding of the National Park Service in 2016, the National Geographic Society, with support from Subaru of America, Inc., has launched the ‘Find Your Park, Love Your Park’ educational initiative ([www. NatGeoEd.org/LoveYourPark](http://www.NatGeoEd.org/LoveYourPark)), developed to teach fourth graders across the United States about the importance of U.S. national parks and to empower students to preserve and protect them.” According to the article, “National Geographic has developed five free downloadable activity modules for educators, including an interactive map of all U.S. national parks, which invite kids to visit, explore and protect national parks.”

NPS PROPOSES NEW MUSEUM AT STATUE OF LIBERTY. The [AP](#) (11/15, 2.15M) reports that the NPS has “proposed building a larger museum on Liberty Island that would be available to all of the approximately 4 million annual visitors to the site, not just the 20 percent or so who have statue tickets.” The agency “earlier this month announced the opening of public comment on the idea, among the initial steps to making it a reality.” According to the article, “the next step would be working with a private foundation to raise money for the planned 20,000-square-foot museum, since no federal dollars would be used for the project.”

Additional coverage was provided by the [Seattle \(WA\) Times](#) (11/15, 1.17M), the [Washington \(DC\) Post](#) (11/15, Deepti Hajela |, Ap, 7.78M), the [Christian Science Monitor](#) (11/14, 496K), the [Arkansas Democrat Gazette](#) (11/15, 294K), the [Northwest Arkansas Democrat-Gazette](#) (11/15, 54K), the [Vancouver \(CAN\) Sun](#) (11/15, 539K), and [New Europe](#) (11/15, 67K).

HOMESTEAD NATIONAL MONUMENT TO DISPLAY QUILTS TO CELEBRATE CENTENNIAL. The [Beatrice \(NE\) Daily Sun](#) (11/15, 14K) reports that Homestead National Monument of America will be

“displaying 13 art quilts, created to celebrate the centennial of the National Park Service, during December 2015 at the Homestead Education Center.” The exhibition, “National Parks in Quilts,” will open Dec. 1, with a reception on Dec. 6 at 1 p.m.

QUESTIONS RAISED ABOUT ISLE ROYALE WOLVES. The [Detroit Free Press](#) (11/14, 921K) reports that “over the past few years, varied proposals have been floated and considered for saving the Isle Royale wolves: from taking no action and letting nature decide, to adding wolves to prevent inbreeding that can produce unhealthy pups, or culling a burgeoning moose herd — growing because of the steep drop in predator wolves — without adding wolves.” According to the article, “wary of setting a precedent and aware of the threat posed by litigious wilderness groups urging a hands-off approach, the National Park Service this summer launched a \$250,000 study to help decide the future of the island’s three remaining wolves.” However, “coming nearly five years after the Park Service was alerted to the dire prospects for the 16 or so wolves left then, and two years after park managers began asking geneticists how to respond, questions are being raised now as to whether the bureaucracy poses as much a threat to the wolves of Isle Royale as climate change does.”

YELLOWSTONE RECEIVES CRITICISM FOR EUTHANIZING GRIZZLY BEAR. The [AP](#) (11/15, 2.15M) reports that “Yellowstone National Park officials have received much criticism — some based on inaccurate information posted on social media — for their decision to euthanize a grizzly bear that killed a Montana man this past summer, a park wildlife manager said.” Kerry Gunther, Yellowstone’s lead bear management biologist, said, “People posted my phone number and my email, as well as other park staff, and we got hundreds and hundreds of emails and phone calls. My voicemail was overloaded, my email was overloaded.” He added, “A lot of it I would classify as hate mail and some of it thinly veiled threats, not only to me but to other park staff. This really kind of took us by surprise. I think it’s a wave of the future: People have learned to use social media as a weapon, and a few people putting out false information can really stir up lots and lots of people who may not know any of the real facts of the situation.”

SHARPSHOOTERS PREPARING FOR REDUCTION OF CATOCTIN MOUNTAIN PARK DEER. The [AP](#) Washington (11/16, 378K) reports that the NPS says “government sharpshooters are preparing for the seventh season of deer-herd reduction at Catoctin Mountain Park near Thurmont.” The NPS says “Park Central and Manahan roads will be closed intermittently from Monday through Dec. 17 while shooting occurs.”

SMOKY MOUNTAINS PARK HAS SECOND BUSIEST OCTOBER IN ITS HISTORY. The [AP](#) (11/16, 2.15M) reports that “the Great Smoky Mountains National Park had its second busiest October in the park’s history this year.” The NPS says “1,370,640 people visited last month.” The agency says “only October 1987 registered more visitors.”

DOI in the News:

TWO FEDERAL OFFSHORE WIND DEVELOPMENT LEASES AWARDED OFF NEW JERSEY. [Bloomberg News](#) (11/9, Martin, 3.4M) reports that RES Americas Developments and US Wind, a unit of Italy's Toto, "won leases to build wind farms off the coast of New Jersey in a U.S. Interior Department auction Monday." Interior Secretary Sally Jewell said in the statement that the auction "underscores the emerging market demand for renewable energy and marks another major step in standing up a sustainable offshore wind program for Atlantic coast communities."

[E&E Publishing](#) (11/9, 705) reports that the BOEM's "online auction lasted seven rounds and drew competitive bidding from three companies." RES America Developments Inc. "submitted a winning bid of \$881,000 for the rights to develop 160,000 acres in the southern half of a wind energy area about 8 miles from Atlantic City." US Wind Inc. "submitted a winning bid of \$1 million to develop 183,000 acres in the northern half." Fishermen's Energy, "whose efforts to build a 25-MW pilot offshore wind farm nearer the Garden State shores have been stymied by the state's Board of Public Utilities, was the third bidder."

[The Hill](#) (11/10, Henry, 654K) adds that offshore wind energy development "been a priority for the Obama administration" and that Monday's auction was the Federal government's fifth such auction to date.

The [AP](#) (11/10, Parry, 2.15M) adds that director of Environment New Jersey Doug O'Malley said that the auction "is the best news for off-shore wind in New Jersey" since Gov. Christie signed a bill five years ago advancing off-shore wind in the state.

Additional coverage was provided by the [Washington \(DC\) Times](#) (11/10, Parry, 283K), the [Washington \(DC\) Post](#) (11/10, Wayne Parry |, Ap, 7.78M), the [North Jersey \(NJ\) Media Group](#) (11/10, 77K), the [South Jersey \(NJ\) Times](#) (11/10, 55K), [NJ Spotlight](#) (11/10), [North American Windpower](#) (11/10, 43K), [reNews](#) (11/10), [Law360](#) (11/10, 30K), [Yahoo! News](#) (11/10, Parry, Press, 6.43M), [WJZ-TV Baltimore \(MD\)](#) Baltimore (11/9, 68K), [KCNC-TV Denver \(CO\)](#) Denver (11/9, 57K), and [WHYY-FM Philadelphia \(PA\)](#) Philadelphia (11/10, 23K).

SIGNING CEREMONY TO BE HELD FOR MANHATTAN PROJECT NATIONAL HISTORIC PARK. The [Knoxville \(TN\) News Sentinel](#) (11/10, Collins, 229K) reports Interior Secretary Jewell and Energy Secretary Moniz will participate in a signing ceremony today to "formally establish the Manhattan Project National Historic Park." Jewell and Moniz "will sign a Memorandum of Agreement establishing the park, which will have locations in Oak Ridge; Los Alamos, New Mexico; and Hanford, Washington." The [Atomic City Underground](#) (11/9, Munger) reports that "a bunch of happenings" are slated "this week in Oak Ridge to celebrate the park creation, including 'special access' tours at Oak Ridge National Laboratory and the Y-12 National Security Complex — two of the facilities that contributed to the World War II project that developed the first atomic bombs."

The [Seattle Post-Intelligencer](#) (11/9, Connelly, 767K) reports the agreement "provides for the National Park Service to welcome visitors and develop interpretive services." The Department of Energy "at Hanford would soldier on with its perpetually-behind-schedule cleanup of the nation's largest concentration of high-level nuclear waste."

The [Tri-City Herald \(WA\)](#) (11/10, 100K) gives a "thumbs up to all of the people of the Tri-Cities who made this happen."

The [Chattanooga \(TN\)](#) (11/10, 5K), the [Los Alamos \(NM\) Monitor](#) (11/10, McKenna), the [Los Alamos \(NM\) Daily Post](#) (11/10), the [Oak Ridge \(TN\) Today](#) (11/9), and [KNDU-TV](#) Yakima, WA (11/10) also provide coverage of the upcoming signing ceremony.

FIRST PART OF DESERT RENEWABLE ENERGY CONSERVATION PLAN TO BE RELEASED TUESDAY.

The [Palm Springs \(CA\) Desert Sun](#) (11/9, 98K) reports that “state and federal officials plan to release part one of the Desert Renewable Energy Conservation Plan on Tuesday, nearly seven years to the day after then-Gov. Arnold Schwarzenegger called for such a plan.” Interior Secretary Sally Jewell will “speak to reporters on a press call at 10 a.m. Tuesday.” Joining her on the call will be John Laird, California Secretary for Natural Resources, BLM Director Neil Kornze and California Energy Commission Karen Douglas.

REP. MEEHAN OPPOSES OVERHAUL OF LWCF. [Politico Pro](#) (11/9) reports that Rep. Pat Meehan will have “no truck with Rep. Rob Bishop’s bill to revise the Land and Water Conservation Fund.” In a statement, Meehan said, “The draft is a radical departure for the LWCF, America’s most successful conservation program. It diverts money away from conservation, throws up roadblocks to preservation and sets top-down, arbitrary funding formulas.”

FWS Director Ashe Urges Congress To Reauthorize LWCF. In an op-ed for the [Riverside \(CA\) Press Enterprise](#) (11/10, 291K), FWS Director Dan Ashe urges Congress to “step up and act to ensure that the LWCF is reauthorized and permanently funded at \$900 million per year, consistent with the promises made to the American public 50 years ago.” Ashe highlights that “cooperative conservation tools employed by the U.S. Fish and Wildlife Service and leveraged with Land and Water Conservation Fund dollars are easing land conflicts in 22 counties” in California. Also, “in Riverside, one of the largest, most complex regional habitat conservation plans in the United States is funded by the LWCF.”

Congress Urged To Reauthorize LWCF. For “The Blog” of the [Huffington Post](#) (11/6, Rogers, 251K), Will Rogers, President of The Trust for Public Land, commends REI “for closing its stores and urging people to get outdoors on the traditional post-Thanksgiving shopping day widely known as Black Friday.” According to Rogers, “of the more than 800,000 people who have clicked to join REI’s ‘#OptOutside’ campaign, it’s a good bet that many of them are planning to spend Black Friday in an outdoor place protected with help from the federal Land and Water Conservation Fund (LWCF).” Rogers urges Congress to “show that it understands the contributions of parks and conserved lands to the nation’s health and wellbeing” by reauthorizing the LWCF.

MESA COUNTY RECEIVES PILT PAYMENT. The [Grand Junction \(CO\) Daily Sentinel](#) (11/10, 73K) reports that “the Interior Department last week sent out \$34.5 million in checks to more than 1,900 local governments, including Mesa County.” Mesa County received its 2015 payment in lieu of taxes of \$3.3 million.

LAWMAKERS ASK AGENCIES IF THEY ARE USING STINGRAYS. The [National Journal](#) (11/10, Subscription Publication, 53K) reports that “a bipartisan group of House lawmakers wants to know just how many federal agencies are using Stingrays.” According to the article, “in a letter sent Monday, House Oversight Committee Chairman Jason Chaffetz, ranking member Elijah Cummings, and the top two members of the panel’s IT subcommittee—Reps. Will Hurd and Robin Kelly—asked 24 key agencies to share their policies for using the surveillance technology.” The lawmakers “cast a wide net, targeting agencies likely to operate the devices—the Defense Department, for example—as well as agencies like the Agriculture Department, the Interior Department, the Veterans Affairs Department, and the General Services Administration.”

AGRICULTURE OFFICIAL SAYS COOPERATION CAN SAVE BIG-GAME MIGRATION ROUTES. The [AP](#) (11/10, 2.15M) reports that “more cooperation between government and private landowners, such as that which has kept the greater sage grouse off the endangered species list, can help protect big-game migration corridors in Wyoming, a federal official who oversees the U.S. Forest Service and Natural Resources Conservation Service said Monday.” U.S. Department of Agriculture Undersecretary Robert Bonnie “made a pitch for federal programs that encourage private landowners to conserve wildlife habitat.” Bonnie “pointed to the Interior Department’s announcement in September that the greater sage grouse didn’t need protection under the Endangered Species Act as a success made possible by cooperation between landowners and government.”

OBAMA URGED TO DESIGNATE THREE NEW NATIONAL MONUMENTS IN CALIFORNIA DESERT. For the “Congress” blog of [The Hill](#) (11/10, Viek, 654K), Claudia Viek, CEO of CAMEO (California Association for Micro Enterprise Opportunity), makes “the business case that President Obama heed Sen. Feinstein’s (D-Calif.) request that he designate three new national monuments in this region – Castle Mountains, Mojave Trails, and Sand to Snow – and protect one of the richest landscapes in North America.” She claims that “many businesses in this region depend on tourists, outdoor adventure seekers, and travelers for their

livelihood.” Viok argues that “national monument designations will attract new attention and enhance tourism and recreation in the region, thus increasing the dependability of customer flow, a must-have ingredient for these businesses.”

Sen. Feinstein’s Desert Protection Legislation Supported. In an op-ed for the [Los Angeles Daily News](#) (11/9, 310K), John Shepard, senior director of programs with the Sonoran Institute; writes in support of Sen. Dianne Feinstein’s California Desert Conservation and Recreation Act (CDCRA) of 2015. He claims that research has “found that the CDCRA will have minimal impact on mining and builds on the natural and cultural attractions that have been significant drivers of the economy.” Shepard argues that “that the legislation’s proposed protective designations represent the highest and best economic use of the region’s public lands.”

Empowering Native American Communities:

ASSISTANT SECRETARY WASHBURN ANNOUNCES TWO INITIATIVES TO PROVIDE LEARNING, TRAINING OPPORTUNITIES FOR NATIVE YOUTH. The [RealEstateRama](#) (11/9, 210) reports that Assistant Secretary – Indian Affairs Kevin K. Washburn “announced two Indian Affairs initiatives offering learning and training opportunities to Native youth: the Native American Water Corps internships and the Energy Challenge for Native Youth.” Washburn said, “The Water Corps internships and Energy Challenge are two examples of how we are striving to meet President Obama’s commitment to Native youth and to supporting tribal nations. These programs provide secondary and post-secondary Native students with opportunities to stretch themselves academically, contribute to improving their communities, and test themselves and their ideas in real-world situations that will help them grow personally and professionally.”

ASSISTANT SECRETARY WASHBURN ANNOUNCES UPDATED REGULATIONS TO HELP END HOMELESSNESS IN TRIBAL COMMUNITIES. The [RealEstateRama](#) (11/9, 210) reports that “as part of the 7th Annual Tribal Nation’s Conference, the White House announced yesterday an Interagency Memorandum of Understanding (MOU) for setting a Path to End Homelessness in Native American communities.” According to the article, “in support of that interagency effort, the Bureau of Indian Affairs has finalized updates to regulations on the Housing Improvement Program (HIP), as an important part of the Obama Administration’s Tiwahe initiative, which is designed to promote the stability and security of American Indian families.” Assistant Secretary – Indian Affairs Kevin K. Washburn said, “The Bureau of Indian Affairs’ Housing Improvement Program final rule takes into account the comments we received to make the program more effective in increasing housing in tribal communities, which is an important goal of the Tiwahe Initiative to support families in Indian Country. I’m also pleased that the final rule goes further in supporting the housing needs of our Native veterans, who have long served to protect their tribal homelands and the nation, and supports President Obama’s initiative seeking to end homelessness in Indian Country.”

AMERICAN INDIAN STUDENTS THRIVE AT BEMIDJI CHARTER SCHOOL. The [Minneapolis Star Tribune](#) (11/10, 1.15M) reports on the success of TrekNorth Junior and Senior High, a charter school in Bemidji. The article notes that American Indian students at the school “— nearly half of the school’s 250 students — outperform their peers statewide.” According to the article, “the school has won attention from the state for its excellence and significant progress toward closing the achievement gap between white and Indian students.”

SOUTH DAKOTA TRIBE BURNED POT CROP OVER FEARS OF FEDERAL RAID. The [AP](#) (11/10, Cano) reports from Flandreau, SD that a South Dakota American Indian tribe “that sought to open the nation’s first marijuana resort burned its crop after federal officials signaled a potential raid, the tribal president said Monday.” Flandreau Santee Sioux President Anthony Reider told the AP that “the tribe had three weeks of discussions with authorities that culminated with a meeting in Washington that included a Justice Department official and U.S. Attorney for South Dakota Randolph Seiler.” Reider “said the tribe wasn’t told a raid was imminent – only that one was possible if the government’s concerns weren’t addressed.” Justice Department spokesman Wyn Hornbuckle “declined to comment on specific discussions that may have taken place with tribes,” but he said federal prosecutors “have been directed to assess the threats and circumstances in their districts and consult closely with tribal partners and the Justice Department.”

ADDITIONAL COVERAGE: EIGHT TRIBES RECEIVING FEDERAL EDUCATION GRANTS. Additional coverage that “eight Indian tribes will collectively receive nearly \$2.5 million in grant awards from the U.S. Departments of Education and Interior, aimed to help prepare Indian students for college” was provided by the [iSchoolGuide](#) (11/6).

Office of Insular Affairs:

HOFSCHEIDER OPPOSES ENDANGERED SPECIES LISTING FOR TINIAN MONARCH. The [Marianas Variety](#) (11/10) reports that Senator Jude U. Hofschneider “opposes a petition to include the Tinian Monarch or the Tinian flycatcher on the list of endangered species, saying the bird is no longer endangered.” In a letter to Robyn Thorson, Pacific regional director of FWS, Hofschneider said “he saw an announcement published in the Federal Register dated Sept. 18 indicating that U.S. Fish and Wildlife Service was proposing a status review of the bird commonly known in Chamorro as Chuchurikan Tinian and whose scientific name is *Monarcha takatsukasae*.” Hofschneider said “since the issuance of the petition by the Center for Biological Diversity, biologists from CNMI Fish and Wildlife have ‘worked arduously’ to address the issue of the Tinian Monarch.”

Tackling America’s Water Challenges:

STAKEHOLDERS OF ANIMAS-LA PLATA PROJECT REACH SETTLEMENT. The [Durango \(CO\) Herald](#) (11/9, 31K) reports that “stakeholders of the Animas-La Plata Project reached a settlement Monday over disputed water rights in the reservoir southeast of Durango.” Chief District Judge Gregory Lyman will “review the details of the settlement in the coming weeks, and the court will reconvene 1:30 p.m. Dec. 10 to hear his ruling.”

BOR ALLOCATES MORE WATER FOR MIGRATORY BIRDS IN SACRAMENTO VALLEY. [KXJZ-FM](#) Sacramento, CA (11/9, 6K) reports that the BOR is “releasing 50,000 acres of water for rice fields in the Sacramento Valley between now and December 10th.” According to the article, “with the release, migrating birds will have about one-third of the water they normally have for the winter.”

Securing America’s Energy Future:

Renewable Energy:

HUGE WIND FARM PROPOSED OFF MARTHA’S VINEYARD. The [Boston Globe](#) (11/9, Fitzgerald, 1M) reports that “a major European energy company is proposing what could be North America’s largest offshore wind farm 15 miles south of Martha’s Vineyard, outlining its plans less than a year after the proposed Cape Wind project in Nantucket Sound suffered a stunning financial setback.” DONG Energy A/S on Monday said “it would build up to 100 giant wind turbines, generating as much as 1,000 megawatts of electricity — more than double the output Cape Wind had proposed for its site off Cape Cod.” But “DONG Energy faces lengthy Massachusetts and US permitting processes that include environmental reviews and approvals for where its power lines would come ashore.” The article notes that “other than getting the transfer of the lease approved by the US Bureau of Ocean Energy Management, DONG Energy has yet to file any applications for the projects with the federal or state government.”

Onshore Energy Development:

TWENTY-SIX NATIONAL PARKS OUT OF COMPLIANCE WITH EPA OZONE MANDATES, NPS BLAMES COAL PLANTS. [Fox News](#) (11/9, Richards, 9.42M) reports on its website that the EPA’s newest ozone pollution rules have placed 26 national parks out of compliance and the National Park Service “is pointing the finger at power plants.” Scientists and officials from California point to vehicles, tourism, and wildfires, Fox reports.

ARKANSAS ATTORNEY GENERAL VOICES RAISES ABOUT PROPOSED BLM OIL, GAS RULES. The [Legal Newsline](#) (11/10, 108) reports that Arkansas Attorney General Leslie Rutledge “issued a letter to the director of the Bureau of Land Management (BLM) Neil Kornze voicing concerns over proposed rules for onshore oil and gas operations.” Rutledge’s letter claims that “the new BLM rules violate the state’s rights to control their own lands under the Mineral Leasing Act of 1920.” The letter also raises concerns that “state entities were not contacted to advise of potential impacts in the state when the policies were being considered.”

GARFIELD COUNTY SUPPORTS PARTIAL LIMIT ON THOMPSON DIVIDE LEASING. The [Glenwood Springs \(CO\) Post Independent](#) (11/10, 32K) reports that “Garfield County commissioners took a big step

Monday in the effort to protect at least part of the Thompson Divide area from future federal mineral leasing, endorsing permanent withdrawal of some acreage in conjunction with a proposed lease exchange." Commissioner Tom Jankovsky "put forward a letter, to which his fellow commissioners agreed, expressing continued support for a legislative lease exchange proposed by energy companies SG Interests and Ursa Resources." Also, "the commissioners said they support the withdrawal of about 39,000 acres in the Garfield County portion of the larger Thompson Divide region from consideration for future oil and gas leases."

Offshore Energy Development:

BSEE URGED TO RECONSIDER WELL-CONTROL RULES. The [Lafayette \(LA\) Daily Advertiser](#) (11/9, 112K) reports that Rep. Charles Boustany opposes the Interior Department's "pending new guidelines for those who would drill in the Gulf of Mexico." Boustany "lodged his concerns in a Nov. 6 letter to Interior Secretary Sally Jewell, whose department, through the Bureau of Safety and Environmental Enforcement, is responsible for proposed new mandates for drillers." The article notes that "Boustany's six Louisiana colleagues in the House of Representatives co-signed the letter, which characterized the department's pending regulations, developed in the five years since the Deepwater Horizon disaster, as a 'one-size-fits-all' approach that would undermine safety and production."

STUDY: DISPERSANTS INEFFECTIVE ON BP DEEPWATER HORIZON SPILL. The [AP](#) (11/10, Borenstein, 844K) reports that the chemical dispersant Corexit 9500 used on the 2010 BP oil spill "may not have helped crucial petroleum-munching microbes get rid of the slick," a new study published Monday in the journal *Proceedings of the National Academy of Sciences* suggests. "The dispersants did a great job in that they got the oil off the surface," University of Georgia marine scientist Samantha Joye said. "What you see is the dispersants didn't ramp up biodegradation." Joye's team chronicled nearly 50,000 species of bacteria in the gulf and their reactions to oil with and without the dispersant, finding that bacteria was more effective without the dispersant. Joye suggests that oil not degraded by bacteria in 2010 may still be coating the floor of the gulf.

MEETING FOR PUBLIC TO PROPOSE USES FOR \$8.8 BILLION FROM BP TO RESTORE GULF OF MEXICO. The [Houston Chronicle](#) (11/10, 2.15M) reports that a meeting will be held in Galveston on Tuesday evening for "Houston-area residents" to have an opportunity "to offer opinions" on the use of \$8.8 billion from BP "to restore the Gulf of Mexico." The existing plan contains "five goals" but no details as to how to achieve those goals.

SEISMIC SURVEYS IN ATLANTIC OPPOSED. In a letter to the [Columbia \(SC\) State](#) (11/10, 322K), William Achurch writes in opposition to seismic testing in the Atlantic. He notes that "a letter to President Obama signed by 75 doctoral and research scientists says there would be 20 million blasts in all and describes the devastating impacts to marine mammals, sea turtles and fish." Achurch says that "if there is a material supply off our coast, it is not going anywhere, and we can leave it for another day when we might actually need it. This is what a true conservative would do."

America's Great Outdoors:

Bureau of Land Management:

GOV. SANDOVAL SUPPORTS SAGE GROUSE SUIT, BUT NOT TIMING. The [AP](#) (11/10, 283K) reports that "several Nevada counties are acting prematurely in suing to block U.S. regulations intended to protect the greater sage grouse, said Gov. Brian Sandoval, who says he supports the lawsuit but not its timing." Sandoval, "who is at odds with the state attorney general, said he won't rule out joining the claim that will go before a federal judge in Reno on Nov. 17." However, "the best approach for now is to present the state's objections as public comment through administrative channels," said Sandoval.

Additional coverage was provided by the [San Francisco \(CA\) Chronicle](#) (11/10, Subscription Publication, 3.44M), the [Salt Lake \(UT\) Tribune](#) (11/10, 339K), the [Montana Kaimin](#) (11/10, 11K), and the [Idaho Statesman](#) (11/10, 218K).

BLM RELEASES ENVIRONMENTAL STUDY ON SOUTHLINE TRANSMISSION PROJECT. The [AP](#) (11/10, 283K) reports that "federal officials say the impacts of a proposed transmission line between New Mexico and Arizona would be minimized under an alternative supported by agencies in both states." The BLM "released its

environmental impact statement for the Southline Transmission Line Project on Monday.” Officials say “the preferred alternative would avoid negative effects on grape growers and national defense operations near Wilcox, Arizona.”

Additional coverage was provided by the [Albuquerque \(NM\) Journal](#) (11/10, 263K) and [KOLD-TV Tucson \(AZ\) Tucson, AZ](#) (11/10, 49K).

BLM FUNDS ARCHAEOLOGIST’S SEARCH FOR ARTIFACTS FROM 1877 ARMY CAMPSITES. The [Billings \(MT\) Gazette](#) (11/10, 200K) reports that “this summer, archaeologist Dan Eakin’s work investigating the route and campsites of the Nez Perce Indians as they fled the U.S. Army in 1877 across Yellowstone National Park was extended to the sagebrush plains close to the Wyoming-Montana border.” Eakin “coordinated the effort that also included personnel from the Bureau of Land Management Cody Field Office, the Forest Service, a Nez Perce tribal member and volunteers.” The work was funded by the BLM.

BLM SEEKS PUBLIC COMMENTS ON PROPOSED WATER LOAD OUT FACILITY NEAR MOAB. The [Deseret \(UT\) News](#) (11/10, 476K) reports that the BLM’s Moab field office is seeking public comments “on Grand County’s proposed water load out facility adjacent to state Route 279 (Potash Road) on the north side of the Colorado River.” According to the article, “following the public input period, which ends Dec. 4, the BLM will prepare an environmental assessment to analyze potential impacts associated with the project.”

Fish and Wildlife Service:

FARM FOUNDATION’S 2015 FORUM ON ENDANGERED SPECIES ACT BEGINS TUESDAY. [Bloomberg BNA](#) (11/10, 7K) reports that “the Farm Foundation’s 2015 forum on the Endangered Species Act starting at 9 a.m. Tuesday at the National Press Club will focus on key elements to protect the Greater Sage Grouse, and similar collaborative efforts to preserve other species.” The article notes that “Jason Weller, chief of the Agriculture Department’s Natural Resources Conservation Service will speak, along with Michael Bean of the Interior Department.”

WAYNE COUNTY APPROVES DEAL TO CONSTRUCT DOCK, FISHING PIER AT DETROIT RIVER INTERNATIONAL WILDLIFE REFUGE GATEWAY. The [AP](#) (11/10, 283K) reports that “Wayne County officials have approved a deal to construct a dock and fishing pier at a wildlife refuge along the Detroit River.” On Monday, “county commissioners OK’d the use \$500,000 from a parks fund and another \$500,000 in a state Natural Resources grant for the project with the 20 cities and townships in the Downriver Community Conference.” The article notes that “remaining funds for the \$2.8 million project at the Detroit River International Wildlife Refuge Gateway in Trenton and Gibraltar are to come from other sources.”

Additional coverage was provided by the [Escanaba \(MI\) Daily Press](#) (11/10, 781).

ENVIRONMENTALISTS SUPPORT SMALLER OF TWO EXPANSION PLANS FOR SILVIO O. CONTE NATIONAL FISH AND WILDLIFE REFUGE. The [Daily Hampshire \(MA\) Gazette](#) (11/10, 3K) reports that “local environmentalists who testified during a hearing Monday on management options for the Silvio O. Conte National Fish and Wildlife Refuge said they prefer the smaller of two expansion plans.” According to the article, “roughly 60 people attended the hour-long session at the U.S. Fish and Wildlife Service on a draft comprehensive conservation plan and environmental impact statement that would guide management of the 36,000-acre refuge for the next 15 years.” Alternative C, “which seeks to expand the refuge by adding up to 197,296 acres, is the preferred option of the Fish and Wildlife Service, said Andrew French, the refuge manager,” and “it is also the option that was supported by all of the environmental organizations attending the hearing.”

FEDERAL SUBSISTENCE BOARD REVIEWS PUBLISHES NEW RULES. The [Kenai \(AK\) Peninsula Clarion](#) (11/5, 18K) reports that “the Federal Subsistence Board, the ruling body of the U.S. Fish and Wildlife Service’s Office of Subsistence Management, published two new rules on Nov. 2. and Nov. 4, seeking to allow for more flexibility in determining which areas of the state are considered to be rural.” The article notes that “parts of Sterling, Fritz Creek and Anchor Point are now classified as rural and thus have subsistence priority.” Theo Matuskowitz, the supervisor and regulation specialist for the Office of Subsistence Management, said the office is “preparing a final recommendation for a determination process in January.”

SPEAKER RYAN’S SUPPORT OF HUNTING CRITICIZED. For the “Congress” blog of [The Hill](#) (11/10, Newkirk, 654K), Ingrid Newkirk, president of People for the Ethical Treatment of Animals, criticizes Speaker

Paul Ryan's support of hunters. Newkirk notes that fewer Americans are hunting, and claim that "the panicky last gasps of the hunting industry can also be seen in the 'right to hunt' amendments that it has been sending to state legislatures in hopes of protecting hunting despite public opinion against it." She hopes that Ryan will "stop doing the hunting industry's bidding and shift his support away from the cruel blood sport."

National Park Service:

CÉSAR E. CHÁVEZ NATIONAL MONUMENT HOSTS STUDENTS FOR "EVERY KID IN A PARK" EVENT. The [National Park Foundation](#) (11/10) says it is "excited to support the White House youth initiative Every Kid in a Park." It notes that "on October 8, 2015, César E. Chávez National Monument hosted 130 youth from two schools for an Every Kid in a Park event." Through a grant from the National Park Foundation, "students traveled to the park where they were introduced to stories about civil rights leader César E. Chávez."

TENSIONS FLARE OVER OREGON IRRIGATION CANAL OWNERSHIP. The [AP](#) (11/10, 64K) reports that "a National Park Service decision has reignited century-old tensions over the ownership of irrigation canals that bring water to central Oregon." The agency "recently decided not to recognize the Central Oregon Irrigation District as the owner of Pilot Butte Canal." According to the article, "that decision will prevent the district from formally objecting to a 1 ½ -mile section of the canal being listed on the National Register of Historic Places."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (11/10, 2.15M), the [Washington \(DC\) Times](#) (11/10, 283K), and [KTVZ-TV Bend \(OR\)](#) Bend, OR (11/10, 32K).

AFTER HISTORIC FLOODING, DEATH VALLEY ASSESSES DAMAGE. The [Los Angeles Times](#) (11/10, 3.6M) reports that the northern section of Death Valley this year was "hammered by back-to-back storms, followed by a powerful weather system that dropped nearly 3 inches of rain in five hours, triggering a 1,000-year flood event that battered historic structures, chewed through roadways and altered the rugged landscape with layers of mud and rocks." The article notes that "hardest hit was one of the park's best-known tourist stops, the area surrounding Scotty's Castle, a rambling medieval-style villa erected in steep and narrow Grapevine Canyon in the 1920s." Now, park Supt. Mike Reynolds said, "we're gearing up for a long, hard recovery."

EVENT OFFERS RETROSPECTIVE OF CIVIL WAR SESQUICENTENNIAL. The [AP](#) (11/10, 2.15M) reports that a state-sponsored tourism group is presenting "an audiovisual retrospective of 150th anniversary events" of the Civil War "from the last five years." The re-enactments are "part of the annual meeting of the Heart of the Civil War Heritage Area at Antietam National Battlefield near Sharpsburg." The article notes that "the program includes slides and video compiled by the National Park Service from nearly 30 sesquicentennial events."

Additional coverage was provided by the [Washington \(DC\) Post](#) (11/10, Press, 7.78M) and the [Washington \(DC\) Times](#) (11/10, 283K).

NPS INVOLVED IN OLYMPEX PROJECT. The [AP](#) (11/10, Phuong Le |, Ap, 7.78M) reports that "using everything from a customized DC-8 jetliner to ground radars to four-inch rain gauges, scientists are fanning out across one of the soggiest places in the United States this month to measure raindrops and snowflakes like never before." Led by NASA and the University of Washington, "the field experiment on the Olympic Peninsula attempts to validate, on the ground, how well global satellites measure precipitation from space, which is crucial for areas of the world that lack rain gauges or other equipment." The article notes that a number of partners are involved in the OLYMPEX project, "including the Quinault Indian Nation, Environment Canada, the National Park Service and the U.S. Forest Service."

TRIBE BUTTS HEADS WITH NPS OVER WILDFIRE POLICIES. The [Indian Country Today Media Network](#) (11/9, 47K) reports that "nearly two months" after the "Spotted Eagle" fire, Heart Butte "residents are still visibly shaken and traumatized by their close call with the wildfires." The article notes that "there is a history of bad blood between the Blackfeet tribe and the National Park Service about wildfire and forest management policies." According to the article, "the tribe is seeking \$60 million in damages caused by a fire that started in Glacier National Park and burned 19,000 acres on the reservation."

CUYAHOGA VALLEY NATIONAL PARK WINS GRANT FOR MOUNTAIN BIKE TRAIL. The [Cleveland Plain Dealer](#) (11/10, 1.07M) reports that Cuyahoga Valley National Park "won \$120,000 to help pay for the second

phase of a three-part mountain bike trail system.” Ohio Department of Natural Resources Director Jim Zehringer “handed out over \$1 million in grants Monday morning: one for the national park, a \$362,000 grant for Akron’s Adams Run Trail, \$255,000 for Springfield Township trails and playgrounds, \$500,000 for a Towpath extension in Independence and \$36,000 for new restrooms at Cuyahoga Falls’ Water Works Park.” According to the article, “the mountain bike trail grant will help complete a 6.2-mile loop on the opposite side of the Ohio Turnpike from the park’s first 2.3-mile East Rim Mountain Bike Trail, which opened last month.”

WORK ON ALUM CAVE TRAIL IN SMOKIES PROGRESSING. The [Knoxville \(TN\) News Sentinel](#) (11/10, Simmons, 229K) reports that last week, the Alum Cave Trail “received some finishing touches, and closer to the trailhead, crews took advantage of the dry weather to fill in mud holes with gravel manufactured on site by breaking large rocks with sledgehammers.” On Nov. 19, “the crew will wind up its first season of intensive trail rehabilitation along the 5.5-mile Alum Cave Trail in the Great Smoky Mountains National Park.”

WORLD WAR I NATIONAL MEMORIAL FACES UPHILL BATTLE. In a piece published in [TIME](#) (11/10, 19.1M), Marilyn Shevin-Coetzee and Frans Coetzee examine why World War I is “lacking an official national memorial on Washington D.C.’s National Mall.” According to the article, “prompted by the upcoming centenary of the war’s end to be celebrated in 2018, and by the poignant fact that no American veterans of the conflict could be on hand to mark that event (Frank Buckles, the last survivor, died in 2011 at the age of 110), renewed efforts over the past few years have sought to focus public attention on the importance of properly commemorating America’s involvement in World War I.” However, “it has been an uphill struggle.”

TYLER COUNTY COURTHOUSE JOINS NATIONAL REGISTER OF HISTORIC PLACES. [KSLA-TV](#) Shreveport, LA (11/10, 62K) reports that the Tyler County Courthouse has been added to the National Register of Historic Places.

US Geological Survey:

STUDY: WILDFIRES ON ARCTIC TUNDRA INDUCE PERMAFROST MELT, LAND CHANGE. The [Alaska Public Radio Network](#) (11/9, 2K) reports that “wildfire on Arctic tundra can cause permafrost melt from the top down, contributing to landscape slumping, known as thermokarst.” The USGS “study used airborne technology called LIDAR to collect billions of data points on the landscape surface.”

USGS STUDY SHOWS ANAMMOX CAN REMOVE NITROGEN FROM GROUNDWATER. [Water Technology Online](#) (11/10) reports that “scientists demonstrated that nitrogen can be removed from groundwater through the action of naturally occurring bacteria.” The study was “carried out by researchers from the U.S. Geological Survey (USGS) in collaboration with partners from the Virginia Institute of Marine Science and the University of Connecticut.” Together, researchers “conducted the first-ever field measurements of anammox activity in groundwater.”

Top National News:

OBAMA, NETANYAHU SEEK TO NARROW DIFFERENCES IN FIRST TALKS SINCE IRAN DEAL. Media reports of the President’s meeting Monday with Israel’s Benjamin Netanyahu – their first since a nuclear deal vehemently opposed by the Israeli leader was signed between Iran and world powers – cast the talks as an effort by the two to overcome their differences. The [Washington Post](#) (11/10, Eglash, 7.78M) , for example, says the two leaders “sounded conciliatory notes,” with Netanyahu noting “shared values,” “shared interests,” and “a shared destiny.” Both US and Israeli officials, the [New York Times](#) (11/10, Davis, Subscription Publication, 11.64M) reports, “were hoping the meeting would...help them move past the fireworks of previous confrontations.”

The [Wall Street Journal](#) (11/10, Lee, Subscription Publication, 6.23M) reports the two appeared to be more cordial than in previous meetings, and the [Daily Intelligencer](#) (11/9, Kirby, 600K) says they “appeared to be ready to make up, or at least start trying to work past their differences.” Dana Milbank, however, writes in his [Washington Post](#) (11/10, Milbank, 7.78M) column that the meeting “was a tense and perfunctory affair,” and they didn’t hold a customary press conference. Instead, the White House “allowed only a small pool of journalists to film the two leaders’ trade statements in the Oval Office.” Obama, who he describes as “grim and barely glancing at Netanyahu, acknowledged the ‘strong disagreement’ on the nuclear deal,” while Netanyahu “didn’t mention” it at all. The [New York Daily News](#) (11/10, Joseph, 3.59M) also notes that they “largely avoided talking about the Iran nuclear deal – Netanyahu, who railed against it for months, didn’t mention it at

all, while Obama made a brief reference to their 'narrow' differences on the issue." Kevin Corke said on [Fox News' Special Report](#) (11/9, 1.53M) that they both "acknowledged the elephant in the room: that the Iran nuclear deal drove a huge wedge between them, but wouldn't keep them from moving forward together." The President, reports [Bloomberg Politics](#) (11/10, Talev, 303K), told Netanyahu that while their differences on the deal are "no secret," they must work together in fighting terrorism and seeking peace with the Palestinians. According to [NBC Nightly News](#) (11/9, story 5, 0:30, Holt, 7.86M) – the only network to report on the talks last night – the violence between Palestinians and Israelis was "a main topic of discussion." [USA Today](#) (11/10, Korte, 5.56M) reports the two leaders "insisted that they haven't given up hope for peace...despite a changing political and diplomatic environment that seems to make such an accomplishment impossible for the remainder of Obama's presidency."

Netanyahu, the [Washington Post](#) (11/10, Eglash, 7.78M) reports, "reiterated his commitment to a two-state solution," and Obama said he would seek from Netanyahu "his thoughts on how we can lower the temperature between Israelis and Palestinians, how we can get back on a path towards peace, and how we can make sure that legitimate Palestinian aspirations are met through a political process, even as we make sure that Israel is able to secure itself." The [Los Angeles Times](#) (11/10, 3.6M) reports that while the two "said...they hope to lower tensions in the Israeli-Palestinian conflict and get both sides back on a path toward peace," that "goal seemed far from reach," and [Reuters](#) (11/10, Edwards, Heavey) reports the White House on Monday reiterated its belief that a peace deal is unlikely during the President's remaining time in office.

According to the [AP](#) (11/10, Pace), Netanyahu "was said to be offering a series of confidence-building measures toward the Palestinians," but "documents revealed Monday" showed that Israel has given "preliminary approval for a new settlement project in the West Bank." Jeffrey Goldberg writes for [The Atlantic](#) (11/9, 2.66M) that Netanyahu "has shown very little interest in changing, in any sort of dramatic way, the reality on the ground, in particular the reality of slow but inexorable settlement growth on the West Bank." Meanwhile, Bret Stephens, writing in his [Wall Street Journal](#) (11/10, Stephens, Subscription Publication, 6.23M) column, argues that Palestinian hatred for Israelis – and not Israeli settlements – is to blame for the failure to reach a peace deal.

[Reuters](#) (11/10, Heller, Spetalnick) reports the President and the Israeli leader also discussed a new military aid package for Israel, which [AFP](#) (11/10, Beatty) reports is "worth more than \$30 billion" and "will only come into effect after a current accord expires in 2017." Officials told AFP the deal will include the sale of "advanced US weapon systems, perhaps including hi-tech F-35 jets, precision munitions and V-22 Ospreys." According to the [Times Of Israel](#) (11/10, 33K), they "agreed on an increase to Israeli defense aid," but "the particulars...still need to be hammered out." The [Washington Times](#) (11/10, Boyer, 283K) reports Netanyahu "thanked" the Administration for its aid to help "maintain Israel's qualitative military edge," and [Politico](#) (11/9, Toosi, 1.19M) too says he "repeatedly thanked...Obama for his commitment to Israel's security." [Voice of America](#) (11/9, Bredemeier, 64K) similarly notes they "embraced the long-standing military and security alliance between their countries." [Al Arabiya](#) (11/9, 22K) also reports on the meeting.

Obama Will Not "Intervene" To Allow Pollard To Leave For Israel. The [Washington Post](#) (11/10, Deyoung, 7.78M) reports the President "will not intervene" to allow Jonathan Pollard to travel to Israel after his scheduled parole from federal prison next week, Administration officials said. Under the terms of his release, Pollard must remain in the US for five years. Last week, deputy national security adviser Ben Rhodes said he "wouldn't be surprised" if Netanyahu raised the Pollard case during Monday's meeting, but the Israeli leader "did not respond" to reporters' questions yesterday about Pollard.

Think Tank Under Fire For Inviting Netanyahu. The [Washington Post](#) (11/10, Mufson, 7.78M) reports on its "Post Politics" blog that the Center for American Progress is under fire for hosting a speech by Israeli Prime Minister Benjamin Netanyahu. Eighteen organizations and 117 individuals – "largely from academia and non-governmental organizations" – have signed an open letter circulated by the Jewish Voice for Peace and the Arab American Institute saying they are "dismayed that CAP will sponsor an address by Netanyahu" this week.

McConnell, Reid To Meet With Netanyahu Today. [The Hill](#) (11/9, Carney, 654K) reports on its "Floor Action" blog that Senate Majority Leader McConnell and Minority Leader Reid will meet with Netanyahu later today.

Arab League Seeks End To Israel's "Escalation" Of Violence. [AFP](#) (11/10, 6.43M) reports Arab League foreign ministers "searched on Monday for ways to halt what one called Israel's 'dangerous escalation' of violence against Palestinians." Secretary-General Nabil al-Arabi urged the UN Security Council "and others to

work towards an end to the conflict.”

Bachmann Urges Jews To Convert To Christianity During Trip To Israel. The [Washington Times](#) (11/10, Blake, 283K) reports, “Citing an imminent end of times,” former presidential candidate Michele Bachmann “rounded out a recent tour of Israel by urging Jews to convert to Christianity.”

OBAMA LAUNCHES PERSONAL FACEBOOK PAGE WITH MESSAGE ON CLIMATE CHANGE. The [AP](#) (11/10, Hennessey) reports President Obama “launched his own [personal Facebook page](#) Monday, in a fresh attempt from the social media-savvy president to spread his message through nontraditional channels.” The page “gained more than 200,000 likes in the first three hours.” While there has been an official “Barack Obama” Facebook page for years, it has been run by his campaigns and political operation. [Reuters](#) (11/10, Edwards) says the new page, like the President’s Twitter account, lets the President address followers in the first person in a more conversational style.

The [New York Times](#) (11/10, Hauser, Subscription Publication, 11.64M) writes that “it seems unlikely that a man whose daily schedule often includes meetings with world leaders and briefings on national security will have much time to post pictures of his meals or comment on pet photos.” But the page is a part of a White House social media push “to bring more spontaneity and accessibility to the presidency.”

[McClatchy](#) (11/10, Kumar, 27K) reports that in his first post, the President wrote, “Hello, Facebook! I finally got my very own page. I hope you’ll think of this as a place where we can have real conversations about the most important issues facing our country – a place where you can hear directly from me, and share your own thoughts and stories.” The [New York Daily News](#) (11/10, Alba, 3.59M) says the post contained “a video of him walking through the White House’s backyard – something Obama does every night before dinner.”

The [New York Post](#) (11/10, 2.59M) reports that there was a policy angle to the post as well, with the President “calling on citizens to speak out about climate change, and educate friends on the issue.” He wrote, “Now, we’ve made a lot of progress to cut carbon pollution here at home, and we’re leading the world to take action as well. But we’ve got to do more.”

[KCTV-TV](#) Kansas City, MO (11/9, 10:14 p.m. CST, 381K) reported, “It’s never too late to join Facebook. President Obama made his very own page today. His first post was a two-minute video showing the President in the backyard of the White House. The message pushes viewers to fight climate change and preserve the planet.” [WTTG-TV](#) Washington (11/9, 10:54 p.m. EST) reported that the President “joined the masses and created his own Facebook page. But there’s got to be a political motivation behind it.” [WPSG-TV](#) Philadelphia (11/9, 10:14 p.m. EST, 74) noted that “the President has been more active on social media as the end of his second term gets closer. He joined Twitter back in May.” [KING-TV](#) Seattle (11/9, 9:14 p.m. PST, 457K) and [WFXT-TV](#) Boston (11/9, 10:42 p.m. EST, 269K) are among the other local stations that had reports on Obama’s new Facebook page.

[The Hill](#) (11/9, Trujillo, 654K) says Facebook “by far has the most users of any social media site,” and [Politico](#) (11/9, Gass, 1.19M) says Obama “is upping his social media game.” [Fortune](#) (11/10, Zillman, 4.24M) reports on its website that “the President’s profile identifies him as ‘Dad, husband, and 44th President of the United States.’” [USA Today](#) (11/10, Korte, 5.56M) writes on its website, “President Obama is now on Facebook. But no, you can’t be his ‘friend.’”

[TIME](#) (11/10, Frizell, 19.1M) reports on its website that White House spokesman Eric Schultz said the page will ultimately be turned over to Obama’s successor. Schultz said, “The President Obama account, like other institutional social media accounts, will be passed over to the next administration.”

Additional online coverage appeared at [Bustle](#) (11/9, Yurcaba, 1.62M), [Mic](#) (11/9, Eggert, 969K), [New York Magazine](#) (11/10, Evans, 2.26M), [NPR](#) (11/9, Detrow, 1.78M), [Rolling Stone](#) (11/9, Stuart, 13.32M), [US News & World Report](#) (11/9, Dicker, 996K), [Vanity Fair](#) (11/9, Nguyen, 7.19M), and [The Verge](#) (11/9, Plaugic, 1.13M), among other sources.

Obama To Attend Paris Climate Talks For Two Days. [Reuters](#) (11/10, Edwards, Heavey) reports the White House said Monday that President Obama will seek ambitious climate targets in international talks in Paris later this month. [The Hill](#) (11/9, Cama, 654K) reports White House Press Secretary Josh Earnest said Obama will be in Paris for two days of the two-week event, November 30 and December 1.

Biden Addresses Climate Change At Event With Fire Chiefs. [USA Today](#) (11/10, Korte, 5.56M) reports the Administration “enlisted Western fire chiefs in its campaign to fight the effects of climate change Monday, arguing that changing weather patterns will result in more intense and frequent wildfires.” At a Monday White House event, Vice President Biden said, “I can’t prove any one fire is a consequence of climate change. But you don’t have to be a climatologist, you don’t have to be a nuclear engineer to understand that things have changed, they’ve changed rapidly.”

Some States Going Farther Than Obama On Climate. [McClatchy](#) (11/10, Adams, 27K) reports that while 24 states have filed a lawsuit challenging the President’s Clean Power Plan as an overreach of federal authority, some states are going farther than the White House on the climate. In California, Rhode Island, and Washington state, among others, “state officials already are deploying strategies that could slow some of the impact of climate change.”

Greenhouse Gas Levels Hit Record High In 2014. [Reuters](#) (11/10, Monier) reports the World Meteorological Organization said on Monday that atmospheric greenhouse gas levels hit a record high last year, with carbon dioxide levels averaging 397.7 parts per million.

Meat/Cancer Connection Said To Be Linked To Climate Debate. Jeff Stier of the National Center for Public Policy Research and food writer/cooking instructor Julie Kelly write in the [Wall Street Journal](#) (11/10, Subscription Publication, 6.23M) that the recent warning about a link between processed and red meat and cancer is really a part of the climate change debate, since supporters of stricter regulation of emissions have long pointed out the impact of meat production on emissions.

OBAMA SAYS KEYSTONE AND SIMILAR PROJECTS WOULD MAKE PLANET “UNINHABITABLE.” The [Washington Times](#) (11/10, Boyer, 283K) reports President Obama said on Monday “that the Keystone pipeline and other such fossil-fuel development projects would make Earth ‘uninhabitable.’” The President told a group of activists, “As long as I’m president and as long as you’re out there organizing, America’s going to hold ourselves to the same high standards with which we want to hold the rest of the world.”

In an analysis, the [AP](#) (11/10, Werner) writes that President Obama’s “decision to block the Keystone XL oil pipeline has exposed an endlessly polarized Washington, and likely hardened its divides.” While the President is “being praised to the skies by environmentalists and most Democrats, and denounced in apocalyptic terms by Republicans and the business community,” any consensus on climate change or new energy policy “looks farther away than ever.” Jason Grumet of the Bipartisan Policy Center said, “This became a tribal issue of bizarre proportion.”

The [Daily Intelligencer \(NY\)](#) (11/9, Danner, 600K) writes that “key questions in the wake of the decision include what the Keystone fight has meant, and potentially will mean, for American environmentalism, as well as how it will come to define Obama’s legacy on climate change.” The Keystone decision is the President’s “most significant, if symbolic, move to limit the growth of the world’s fossil fuel supply.”

In a [USA Today](#) (11/10, 5.56M) op-ed, Robert Bryce of the Manhattan Institute and Steven Hayward of the Pepperdine University School of Public Policy write that the Keystone decision is actually “a Pyrrhic victory” for environmentalists because something they “hate even more than Keystone: hydraulic fracturing, or fracking,” made it possible by introducing new sources of oil and lowering the price of gas. Without it, “the political cost of stopping Keystone would have been prohibitive.”

Coal, Other Pipelines Next In Environmentalists’ Sights. [Bloomberg News](#) (11/10, Roston, 3.4M) says Keystone was a “political symbol,” and emboldened activists will next take on other pipelines as well as coal production. [Politico](#) (11/9, Grunwald, 1.19M) says coal is actually a bigger issue than pipelines – coal “produced about half of America’s power in 2005, but it’s down to 36 percent and falling fast,” due mainly to Administration rules. Politico says that even though Obama “officially favors an ‘all-of-the-above’ energy policy,” his presidency “has been a catastrophe for coal.”

TransCanada Says It Could Resubmit Keystone Application Under Next President. The [Washington Times](#) (11/10, Wolfgang, 283K) reports TransCanada “said Monday that it theoretically could resubmit its Keystone application in January 2017, assuming the next president is more favorable to new American oil and gas infrastructure projects,” but stressed that it has not yet made such a decision.

Editorial Wrap-Up:

NEW YORK TIMES. “A Rebuke To India’s Prime Minister Narendra Modi.” In an editorial, the [New York Times](#) (11/10, Subscription Publication, 11.64M) says that members of Indian Prime Minister Narendra Modi’s government and Bharatiya Janata Party have “shredded his promise of inclusion by inflaming sectarian tensions.” According to the Times, by electing a “‘grand alliance’ of secular parties united by their antipathy to the Hindu nationalist B.J.P.” to “178 constituencies in the 243-member legislative assembly to the B.J.P.’s 53,” voters in the northern state of Bihar “have sent Mr. Modi a message: Put an end to the hatemongering.”

“Egypt’s Brazen Crackdown On Critics.” The [New York Times](#) (11/10, Subscription Publication, 11.64M) says in an editorial that “the arbitrary detention of civilians in Egypt, and their prosecution in military courts, have become appallingly routine in recent years as the government has cracked down on all forms of dissent under the guise of fighting terrorism,” and the Obama Administration “has done too little to confront” Egypt’s “expanding authoritarianism.”

“Gov. Christie Doesn’t Want Your Vote.” In an editorial, the [New York Times](#) (11/10, Subscription Publication, 11.64M) criticizes New Jersey Gov. Chris Christie for his Monday veto of “a bill that would make voting easier by, among other things, expanding early-voting opportunities, introducing online registration and, perhaps most significant, automatically registering eligible voters when they get a driver’s license, unless they decline.” In vetoing the measure, Christie argued that “that it would cost too much, that residents already have plenty of ways to register and that automatic registration would encourage...voter fraud.” However, Christie offered no “actual evidence of fraud. That’s because there isn’t any.” The Times adds that Christie “seems persuaded, as many other Republicans are, that the party’s odds are better when fewer Americans vote.”

WASHINGTON POST. “Burma’s Elections Represent A Triumph Of Hope.” An editorial in the [Washington Post](#) (11/10, 7.78M) calls Burma’s elections and the “surge of voting” for opposition leader Aung San Suu Kyi and her NLD party “a triumph,” but notes that the country “has not rid itself of the army’s heavy-handed influence.” If the NLD secures a majority, the Post notes, it will still “have to contend with the generals, who also retain control over key security posts.” Moreover, the winning party “must lift up the disenfranchised and persecuted ethnic communities, including the Rohingya Muslims,” which is an issue Suu Kyi was “reluctant to face” during the campaign.

“The Truth Still Matters, Mr. Carson.” In an editorial, the [Washington Post](#) (11/10, 7.78M) says that Ben Carson has said that he is receiving more scrutiny than past presidential candidates. The Post adds, “Ask anyone from Gary Hart to Hillary Clinton about media scrutiny of his or her biographical claims.” The Post adds that Carson’s “false claim that he was offered a full scholarship to West Point, among other statements, makes one wonder about his honesty and self-regard.” The Post concludes, “The whole episode is notable not for what is different about Mr. Carson and his treatment — but about what is the same. When you are running for president, it generally has mattered whether you tell the truth. We hope it still does.”

“Russia’s Doping Game Gets Exposed.” In an editorial, the [Washington Post](#) (11/10, 7.78M) says that Russia’s mentality, as described in the World Doping Agency’s report, “is that cheating is justified — and patriotically obligatory — on the assumption that every other country must be cheating too.” The Post says that’s why, on top of calling for various Russian athletes and sports officials to be banned, the agency is recommending that the International Olympic Committee “consider disqualifying Russia completely” from the Rio Olympics until Russian authorities begin complying with anti-doping regulations. The Post says that is a “harsh sanction,” but is “justified by the nauseating extent of Russia’s contempt for international norms.”

WALL STREET JOURNAL. “ObamaCare’s Failure Contagion.” In an editorial, the [Wall Street Journal](#) (11/10, Subscription Publication, 6.23M) says the failure of the majority of the ACA’s co-ops is spreading as their pending or outstanding obligations to policyholders, doctors or hospitals after their liquidation are passed on to other insurers doing business in the same state and consumers will ultimately pay the cost.

“Little Sisters Of the Government.” The [Wall Street Journal](#) (11/10, Subscription Publication, 6.23M) editorializes that with the Little Sisters of the Poor’s challenge to the ACA’s birth control mandate before the Supreme Court, the law faces an important test of whether America’s tradition of religious pluralism can withstand a resurgent cultural liberalism.

“Yale’s Little Robespierres.” The [Wall Street Journal](#) (11/10, Subscription Publication, 6.23M) editorializes

about racial concerns at Yale University. The Journal points out that on October 28, Yale Dean Burgwell Howard and Yale's Intercultural Affairs Committee sent out an email advising students against "culturally unaware" Halloween costumes, and provided students with some guidance in the matter, which raised concerns from some about political correctness and censorship. The Journal also notes protests on campus over why the school has not addressed allegations that a black woman had been kept out of a fraternity party. The Journal argues that the racial concerns are evidence that universities stifle free speech in the name of sensitivity.

DOI in the News:

WHITE HOUSE HOSTS SEVENTH ANNUAL TRIBAL NATIONS CONFERENCE. The [National Journal](#) (11/8, Subscription Publication, 53K) reports that "Native American leaders from across the country met Thursday at the White House for the seventh annual Tribal Nations Conference, where much of the focus was on youth, education, and the startling number of suicides on Native American land." According to the article, "more than 160 federally recognized tribes sent leaders to the conference, an all-day event that began with speeches from Interior Secretary Sally Jewell and White House Senior Adviser Valerie Jarrett." The article notes that "the main focus of the conference was Obama's Generation Indigenous, or Gen-I, program, which he launched in 2014 after a June trip to the Standing Rock Sioux Tribal Nation brought him to tears."

The [Indian Country Today Media Network](#) (11/6, 47K) reports that President Barack Obama "surprised an auditorium filled with tribal leaders, government department officials, reporters and Native youth on Thursday when arrived earlier than expected and walked on stage to join five native youth at the closing of the 7th Annual White House Tribal Nations Conference." Obama "also took part in a sit-down panel discussion with Native youth." Obama said "he knew it was traditional for him to deliver a long speech, but instead he cut it short because he wanted to hear from the youth."

[E&E Daily](#) (11/6, Subscription Publication) reports that Obama pledged "to keep working on climate change, trust land consolidation and other challenges facing Native Americans through the end of his final term – a deadline that unnerves many tribal leaders who praise his administration's work in Indian Country." According to the article, "having visited Indian Country more than any sitting president in history, Obama said his administration has made considerable progress, but with plenty of work still undone, he asked Congress for another \$1.5 billion for tribal programs for the upcoming year."

[Al Jazeera America](#) (11/8, 138K) reports that "the president's push for education is part of a larger effort to engage Native American communities around the country with major policy changes related to employment, health care and crime."

Additional coverage was provided by the [Hermiston \(OR\) Herald](#) (11/6, 676), the [Watertown \(NY\) Daily Times](#) (11/9, 66K), and [KDAL-AM](#) Duluth, NM (11/6).

Eight Tribes Receiving Federal Education Grants. [US News & World Report](#) (11/6, 996K) reports that "on Thursday, the administration announced another \$2.5 million in grants that will be awarded to eight different tribes to lay the groundwork for them to assume control of the schools in their communities." William Mendoza, appointed director of the White House Initiative on American Indian and Alaska Native Education, said, "Through these partnerships, we will be putting tribes in the driver's seat by designing culturally responsive programs to help Native children reach their education potential. These efforts will help reduce the achievement gap and make our Indian students more college and career-ready."

Additional coverage was provided by [Education Week](#) (11/6, 130K) and the [Sault Ste. Marie \(MI\) Evening](#)

[News](#) (11/6, 18K).

Adidas Offers To Help Schools Drop Native American Mascots. [Yahoo! Sports](#) (11/6, 7.72M) reports that “sports team mascots using Native American imagery and logos are coming under ever-increasing scrutiny for racial insensitivity, and now apparel manufacturer adidas has upped the ante: the company is offering both design assistance and financial aid to high schools that wish to change their mascots.”

Also providing coverage is [Reuters](#) (11/6).

Obama: Teams Should Drop Native American Mascots. The [Huffington Post](#) (11/6, Klein, 251K) reports that Obama “praised Adidas’ offer to help schools rebrand.” He said, “In terms of eliminating racism or stereotypes, that’s an obligation of the entire society, but it’s especially important in the school. If you walk into a school on the first day and you’re already feeling that stereotypes are embedded in the culture and the cheers and all that, that kid is feeling set apart and different.”

Interior To Sign MOU With DOE To Assist Indian Tribes To Develop Energy Resources. [Breaking Energy](#) (11/6) reports that “at the White House Tribal Nations Conference, the U.S. Department of Energy (DOE) announced that it will sign a Memorandum of Understanding with the U.S. Department of the Interior to assist Indian Tribes throughout the United States to develop their energy resources.” According to the article, “DOE and Interior will develop and share policies, technical information, strategic plans and best practices in Indian Country in the lower 48 states and Alaska to enhance the reliability and security of the North American energy infrastructure to better serve and create market opportunities for Indian Country.”

Tribes Protest Coal Export Terminal Project. [E&E Publishing](#) (11/5, 705) reports that “leaders from 10 Northwest tribes rallied outside the White House Tribal Nations Conference today, urging President Obama to block the proposed construction of a coal export terminal in Washington state.” According to the article, “with many in traditional attire, council members urged the Obama administration and Army Corps of Engineers to kill the Gateway Pacific Terminal project in Bellingham.” The Lummi Nation has “assembled a coalition of neighboring tribes to oppose the project, which it argues would be built atop a sacred ancient village site and imperil its treaty fishing rights along the Pacific Coast.”

Klamath Basin Water Deal Faces December Deadline. [Public News Service](#) (11/9, 306) reports that “a decade of negotiations between more than 40 parties for water rights, river health and salmon survival expires at the end of December if it isn’t approved by Congress.” In fact, “Congress may be the biggest challenge yet for the Klamath Basin Restoration Agreement, which covers water use in northern California and southern Oregon.” At last week’s White House Tribal Nations Conference, “Kathy Hill – a member of the Klamath Tribal Council who was on the negotiating team for the agreement – said she heard mixed views about the future of the agreement.” Hill said, “[U.S. Interior Secretary] Sally Jewell was optimistic. But then another person, not with the administration, told me, ‘You know, nothing’s going to get through this House this year.’ And that’s the mood, I think maybe, in Washington, D.C.”

Additional coverage was provided by [Public News Service](#) (11/9, 306).

PUBLIC MEETING ON MANHATTAN PROJECT NATIONAL PARK THIS WEEK. Drawing from the Tri-City Herald, the [AP](#) (11/9) reports on a public meeting on the new Manhattan Project National Historical Park scheduled in Kennewick for Thursday. Federal officials on Tuesday will attend “a signing ceremony in Washington, D.C., to establish the new national park, which will include Hanford’s historic B Reactor.”

Energy Department Halts Registration For ‘Special Access’ Tours At Y-12, ORNL. The [Knoxville \(TN\) News Sentinel](#) (11/6, Munger, 229K) reported that the Energy Department on Friday decided to halt “registration for ‘special access’ tours of historical sites after demand far exceeded the plan to limit participants to 140.” The tours slated for Nov. 12 “will include stops at Manhattan Project facilities at Y-12 and Oak Ridge National Laboratory.” The special event is a part of Oak Ridge’s “celebration of the Manhattan Project National Historical Park, which will be formally established during a signing ceremony next week in Washington, D.C.” Y-12 spokesman Steven Wyatt “said about 300 people registered online for the bus tours, which will include stops at the original pilot facility (Building 9731) and Beta-3 uranium-enrichment facility at Y-12 as well as the ORNL’s Graphite Reactor.” On Tuesday, Energy Secretary Moniz and Interior Secretary Jewell “are scheduled to sign a memorandum of agreement creating the park at three sites – Oak Ridge, Los Alamos, N.M., and Hanford, Wash. – that were critical to the World War II development of the first atomic bombs.” The [Atomic City Underground](#) (11/6, Munger) also provided coverage of this story.

REP. BISHOP PROPOSES OVERHAUL OF LWCF. [E&E Daily](#) (11/6, Subscription Publication) reports that House Natural Resources Chairman Rob Bishop last week “unveiled his long-awaited proposal to overhaul the Land and Water Conservation Fund, setting the stage for what could be a long-term battle to reauthorize the 50-year-old program.” According to the article, “Bishop’s draft bill would greatly curtail the purchase of new federal lands, roughly triple the portion of money that has gone to states, and require that at least 20 percent of the money support offshore energy permitting and workforce development and at least 15 percent go to counties with large amounts of federal lands, among many other provisions.” The “legislation drew cautious praise from some Republican lawmakers, state park advocates and the oil and gas industry, but was roundly panned by a conservationists, sportsmen and some urban parks proponents.”

Proposed Changes To LWCF Criticized. The [National Parks Traveler](#) (11/8, 989) criticizes Rep. Rob Bishop “overhaul of the federal Land and Water Conservation Fund.” According to the Traveler, “while he argues that over the last five decades the original intent of the LWCF was skewed, that more money was going to federal land acquisition than for state projects, he doesn’t try to rebalance the funding flow as he sees it but rather would redirect a large portion of the revenues raised through fees from off-shore drilling projects to open up more off-shore drilling.”

Additional Coverage. Additional coverage of the LWCF was provided by the [Summit \(CO\) Daily News](#) (11/9, 37K), the [Hendersonville \(NC\) Times-News](#) (11/8, 31K), the [Plattsburgh \(NY\) Press Republican](#) (11/9, 59K), and the [Beckley \(WV\) Register-Herald](#) (11/9, 70K).

INTERIOR WOULD “WELCOME” RULE REVIEW COMMISSION, OFFICIAL SAYS. [E&E Daily](#) (11/6, Subscription Publication) reports that the Interior Department “would ‘welcome’ the creation of an independent commission to review and potentially appeal federal regulations,” Associate Deputy Secretary Elizabeth Klein told a Senate Homeland Security and Governmental Affairs subcommittee last week. During a hearing of the Subcommittee on Regulatory Affairs and Federal Management, Klein said, “We would welcome outside expertise on how to better quantify relative costs and benefits and do that kind of analysis. Having an outside commission to provide us with that expertise is a great idea and one we would welcome working with.”

ALASKANS APPEAL DECISION IN IZEMBEK ROAD CASE. The [Greenwire](#) (11/6, Subscription Publication) reports that “Alaskan governments and tribal groups announced they will appeal a federal judge’s ruling that upheld Interior Secretary Sally Jewell’s rejection of a proposed gravel road through wilderness in the Izembek National Wildlife Refuge.” According to the article, “the city of King Cove, Aleutians East Borough, tribal groups and the state of Alaska filed the appeal notice Wednesday in the U.S. District Court for the District of Alaska.”

ENVIRONMENTAL GROUPS SEEK MOVEMENT AGAINST FOSSIL FUEL PRODUCTION ON FEDERAL LAND. [The Hill](#) (11/7, Henry, 654K) reported that environmental groups that are backing a bill introduced on Wednesday by Sens. Bernie Sanders and Jeff Merkley that would “block all future lease sales for coal, oil, natural gas and other energy development” are hoping to parlay this legal measure into a broader movement toward “ending future fossil fuel production on federal land.” While energy companies have “scoffed at the effort” to move the bill through Congress, environmental groups believe they may have a chance at achieving their goal.

Sen. Sanders Introduces Bill To Protect Oak Flat. The [Black Star News](#) (11/8, 146K) reports that Sen. Bernie Sanders and Sen. Tammy Baldwin have introduced legislation “to stop the transfer of federal land to a foreign-owned corporation, which plans to develop the largest copper mine in North America.” The land, “known as Oak Flat, is located in the Tonto National Forest and has significant religious and cultural value to Apaches, Yavapais, and other Native Americans in the region.”

OPPOSITION TO COAST DAIRIES NATIONAL MONUMENT PROPOSAL WANTS CAMPAIGN TO SLOW DOWN. The [Santa Cruz \(CA\) Sentinel](#) (11/7, 100K) reports that “the effort to turn the rolling hills of Coast Dairies near the tiny town of Davenport into a national monument is still moving too fast say many on the ‘Slow Coast,’ a nickname for the stretch of quiet coastline north of Santa Cruz to Half Moon Bay.” However, the article notes that while “the campaign has drummed up a lot of excitement, gathered 14,500 signatures of support since it kicked off in February and has political backing, a small vocal minority persists.” The group “raised the question of whether its opposition could halt the monument since public support is part of the designation process.”

ANDRUS CENTER TO HOST WESTERN INVASIVE WEED SUMMIT. The [Idaho Statesman](#) (11/9, 218K)

reports that “this month the Andrus Center for Public Policy and the Western Association of Fish and Wildlife Agencies are hosting a Western Invasive Weed Summit from Nov. 17-19 at the Wyndham Garden Airport Hotel at 3300 S Vista.” Assistant Secretary for Land and Minerals Management, Janice M. Schneider will be “a keynote speaker, providing an update from a national perspective.”

Additional coverage was provided by the [Boise \(ID\) Weekly](#) (11/9, 103K).

GERMAN MAGAZINE: GERMAN INTELLIGENCE SPIED ON US, OTHER ALLIES. According to [USA Today](#) (11/8, Stanglin, 5.56M), the German weekly Der Spiegel reported Saturday that Germany’s foreign intelligence service, BND, “has systematically spied on its closest allies and friendly countries across the world, including snooping on US, French and British embassies, the US Department of the Interior, US diplomatic offices at the United Nations and even the Vatican.” The magazine said the BND conducted the spying operations “despite German Chancellor Angela Merkel’s angry response to reports in 2013 that the US had spied on her mobile phone.”

Additional coverage was provided by [PJ Media](#) (11/8, 69K), [Iran English Radio](#) (11/9), [Press TV \(IRN\)](#) (11/7, 7K), [Sputnik News](#) (11/7, 46K), [RT](#) (11/9, 297K), and [Der Spiegel \(DEU\)](#) (11/9, 3.08M).

NEVADA’S PILT PAYMENT CRITICIZED. In a piece for the [Las Vegas Review-Journal](#) (11/9, 403K), editorial writer Glenn Cook criticizes the PILT payments that Nevada receives. He notes that “although Nevada has a higher percentage of federal land than any other state — more than 80 percent — it gets less for that land than any other state in the West.” Cook argues that “the lack of state-controlled and privately owned land greatly limits Nevada’s economic growth.” He concludes that “PILT will never provide adequate compensation for that.”

REP. WALDEN OPPOSES ANTIQUITIES ACT DESIGNATION FOR OWYHEE RIVER CANYON. Rep. Greg Walden’s op-ed opposing a declaration under the Antiquities Act to protect the Owyhee River canyon in Eastern Oregon was printed in the [East Oregonian](#) (11/6, 24K).

Empowering Native American Communities:

NAVAJO LEADERS BLAST EPA’S HANDLING OF GOLD KING MINE SPILL. The [Albuquerque \(NM\) Journal](#) (11/9, 263K) reports that almost two months after his congressional testimony on the Gold King Mine spill, Navajo Nation President Russell Begaye said that “the EPA has been slow to mitigate the damage and compensate tribal victims, which he said threatens to undermine decades of hard-won progress in the Navajo Nation’s relationship with the federal government.” Begaye said, “We’re not seeing any action. If we were seeing the cleaning of the canals, if we were seeing some of the deposits of minerals along the river being removed or compensation to farmers right now because they have expended dollars they don’t have, then, yeah, we’d believe them. But they haven’t done anything yet. Nothing has been done.” EPA officials said that “the agency is working in good faith to fix the damage from the spill, compensate those who suffered financial harm and ensure future water quality.”

INTERIOR ORDERED TO PAY ATTORNEY FEES TO NOOKSACK TRIBAL MEMBERS. The [Bellingham \(WA\) Herald](#) (11/9, 101K) reports that the Interior Department “must pay \$22,000 in attorney fees to members of the Nooksack Indian Tribe following their fight to get public documents about a tribal election.” U.S. District Court Judge Richard Jones “awarded the fees to Rudy St. Germain and Michelle Roberts as part of the final decision in their two-year case to get information under the Freedom of Information Act.” The case was then dismissed Friday, Oct. 30.

LAND FORMALLY RECOGNIZED AS RESERVATION FOR COWLITZ TRIBE. The [Daily News \(WA\)](#) (11/9, 72K) reports that “the federal government Friday officially declared 156 acres of land as the Cowlitz Indian Tribe’s initial reservation.” The decision was “largely expected after the Department of Interior took the land into trust on behalf of the tribe in March, said Bill Iyall, Tribal Chairman.” But “this proclamation was a formal step needed to seal the fate of the land as the tribe’s ‘initial reservation,’ he said.”

AMERICAN INDIAN STUDENTS THRIVE AT BEMIDJI CHARTER SCHOOL. The [Minneapolis Star Tribune](#) (11/9, 1.15M) reports on the success of TrekNorth Junior and Senior High, a charter school in Bemidji. The article notes that American Indian students at the school “— nearly half of the school’s 250 students — outperform their peers statewide.” According to the article, “the school has won attention from the state for its

excellence and significant progress toward closing the achievement gap between white and Indian students.”

APPEALS COURT BACKS TOHONO O’ODHAM NATION’S CASINO LAND CLAIM. The [AP](#) (11/6, 283K) reports that “a federal appeals court panel says an Arizona law designed to block a southern Arizona tribe’s plans to build a casino in Glendale is unconstitutional.” The ruling by the 9th U.S. Circuit Court of Appeals says the Tohono O’odham Nation is “now free to ask for more land it owns in Glendale to be taken into federal trust as a reservation.”

Additional coverage was provided by the [Arizona Republic](#) (11/6, 960K), the [Albuquerque \(NM\) Journal](#) (11/9, 263K), and the [Navajo Times \(AZ\)](#) (11/9, 66K).

MASHPEE WAMPANOAG CASINO LAND DEAL FINALIZED. The [Taunton \(MA\) Daily Gazette](#) (11/6, 39K) reports that “a 115-acre East Taunton land deal worth \$34.5 million between the Mashpee Wampanoag Indian tribe and a half-dozen property owners was finalized this week.” The tribe acquired “the land in anticipation of building a more than \$500 million casino and resort on the site, located off Stevens Street near Route 140, across from Silver City Galleria mall.” The Mashpee Wampanoag “received word in September from the U.S. Department of Interior and its Bureau of Indian Affairs that it would allow 151 acres in East Taunton and 170 acres in Mashpee to be placed into trust as the tribe’s reservation.”

Additional coverage was provided by the [Taunton \(MA\) Daily Gazette](#) (11/5, 39K) and the [Taunton \(MA\) Daily Gazette](#) (11/8, 39K).

ADDITIONAL COVERAGE: NEW NIGC COMMISSIONER NAMED. Additional coverage that E. Sequoyah Simermeyer has joined the National Indian Gaming Commission was provided by the [Indian Country Today Media Network](#) (11/7, 47K) and [Law360](#) (11/9, 30K).

NATIVE HAWAIIAN ELECTION CRITICIZED. In an op-ed for the [National Review](#) (11/9, 533K), Hans A. von Spakovsky, a senior legal fellow at The Heritage Foundation, criticizes the “election in Hawaii to set up a separate government that excludes anyone who doesn’t meet the state’s definition of ‘Native Hawaiian.’” According to Spakovsky, “this is the second time that Hawaii has tried to conduct such a restrictive election, which resembles the whites-only elections held in some parts of the South before the Civil Rights movement began in the 1950s.” Spakovsky argues that “since the voting is already ongoing in an election that has excluded hundreds of thousands of Hawaiians from participating, the Ninth Circuit should immediately apply the Supreme Court’s precedent in *Rice* and enjoin the election.”

Additional coverage of the election was provided by the [Honolulu \(HI\) Star-Advertiser](#) (11/9, 349K).

Tackling America’s Water Challenges:

BOR SEEKS TO AVOID SALMON KILL FROM WARMING WATERS AT SHASTA LAKE. The [Greenwire](#) (11/5, Subscription Publication) reports that “a historic drought is testing the limits of technology and water policy at the state’s largest reservoir, with the fate of endangered salmon hanging in the balance.” At issue at Shasta Lake is “how baby salmon fare in warmer water.” The BOR is “aiming to avoid a repeat of last year, as water levels fell and grew warmer behind Shasta Dam, leading to unusually high mortality of winter-run chinook salmon.”

Additional coverage was provided by [NPR](#) (11/6, 1.78M), [WAMU-FM](#) Washington (11/9, 30K), and [KSJR-FM](#) Collegeville, MN (11/6, 56K).

MAMMOTH TUSK UNEARTHED AT AMERICAN FALLS RESERVOIR. The [AP](#) (11/6, Ridler, 1.15M) reports that “a 12-foot Columbian mammoth tusk has been unearthed in Idaho and scientists say more of the fossil skeleton might still be buried at the site.” The “left tusk was found earlier this year at American Falls Reservoir.” Researchers with the Idaho State University “unearthed about 60 percent of the skull last year and about 8 feet of the right tusk after a volunteer with the U.S. Bureau of Reclamation spotted the fossil.”

Additional coverage was provided by [CBS News](#) (11/9, 4.1M), the [Daily Mail \(UK\)](#) (11/9, 5.31M), the [Houston \(TX\) Chronicle](#) (11/9, 2.15M), [US News & World Report](#) (11/6, 996K), the [Washington \(DC\) Post](#) (11/6, Keith Ridler |, Ap, 7.78M), the [Washington \(DC\) Times](#) (11/6, Ridler, 283K), the [Quincy \(IL\) Herald-Whig](#) (11/9, 81K), the [Idaho State Journal](#) (11/9, 59K), the [Telegraph \(UK\)](#) (11/6, Ap, 1.18M), [Yahoo! News](#) (11/6, Ridler, 6.43M),

[KIFI-TV Idaho Falls \(ID\)](#) Idaho Falls, ID (11/9, 3K), [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (11/9, 464K), and [KXLY-TV Spokane \(WA\)](#) Spokane, WA (11/9, 69K).

GOV. BROWN'S STANDS FIRM ON DELTA TUNNELS DESPITE FLURRY OF CRITICISM. The [Sacramento \(CA\) Bee](#) (11/9, 515K) reports that "Gov. Jerry Brown's response to the latest volley of opposition to his plan to divert water under the Sacramento-San Joaquin Delta lacked the cheekiness he exhibited in May, when he playfully told his critics to 'shut up.'" Brown "accused opponents of doing a 'profound disservice to California's future,' but the subtext was the same: No matter how difficult the financing or loud resistance to the project may grow, the fourth-term governor is plowing ahead." Brown says "the \$15.5 billion project, with implications for everything from the area's farming community to its scenic drives, will bring stability to a water system on which millions of Californians rely."

Securing America's Energy Future:

Renewable Energy:

JUDGE RULES AGAINST PROPOSED NEVADA WIND PROJECT OVER THREATENED WILDLIFE.

Drawing on reporting by the Las Vegas Sun, the [AP](#) (11/9, 2.15M) reports that a US District Judge in Las Vegas "said the federal Bureau of Land Management failed to fully determine the effect that 87 wind turbines" proposed by Apex Clean Energy south of Las Vegas could have on "sensitive and threatened species." The decision comes after a three-year legal fight by environmentalists, the AP adds. The plaintiffs' attorney, Dave Becker "said the ruling highlights a dilemma for environmental advocates who generally support renewable energy projects including solar and wind, but also want to protect threatened species and sensitive habitats," the AP reports.

Additional coverage was provided by the [Washington \(DC\) Times](#) (11/9, 283K), the [St. George \(UT\) Spectrum](#) (11/8, 48K), and [KTVN-TV Reno \(NV\)](#) Reno, NV (11/9, 80K).

BLM ADVANCES SOUTHLINE TRANSMISSION PROJECT. [E&E Publishing](#) (11/6, 705) reports that the Obama Administration has "completed a yearslong environmental review of a 360-mile transmission line project across southern New Mexico and Arizona that is expected to promote renewables in the West." According to the article, "a notice announcing completion of the final environmental impact statement (EIS) for the Southline Transmission Project conducted by the Bureau of Land Management was published in today's Federal Register but under U.S. EPA's section." The "notice begins a 30-day public review period running through Dec. 7."

BOEM SEEKS COMMENTS ON WIND FARM PLAN OFF LONG ISLAND'S SOUTH SHORE. [Newsday \(NY\)](#) (11/9, 1.42M) reports that "a proposed wind farm off Long Island's South Shore isn't likely to start construction until at least 2022, but fishing interests at a hearing in Montauk on Friday questioned whether it should be built at all." The BOEM was "on Long Island last week soliciting comments about the project, stalled in lease approvals since it was first proposed in 2009."

NORTH CAROLINA CONSIDERS IMPACT OF WIND TURBINES. The [Wilmington \(NC\) Star News](#) (11/7, 110K) reports that the BOEM "plans to open two local areas to turbine leasing." Although an "environmental review completed this year found the plan would not cause significant environmental harm," some "worry about what turbines could cost in property values and tourism dollars."

TRIDENT WINDS AIMS TO BUILD 1-GIGAWATT OFFSHORE WIND PROJECT OFF CALIFORNIA. The [San Jose \(CA\) Mercury News](#) (11/9, Rogers, 634K) reports that Trident Winds has submitted a filing with Morro Bay city officials for a 100-turbine, 1-gigawatt offshore wind project 15-miles off the San Luis Obispo County shoreline. "It's not oil. It's not fossil fuel. It doesn't spill," said CEO Alla Weinstein who sees permitting taking six or seven years. "Some environmentalists are taking a wait-and-see attitude," such as the Sierra Club, while others "are already girding for a fight," the Mercury News reports.

Onshore Energy Development:

US WON'T CHALLENGE JUDGE WHO WANTS NEW LOOK AT MONTANA COAL MINE. The [AP](#) (11/9, 2.15M) reports that the Interior Department "won't fight a court recommendation for the agency to take a new look at the environmental effects of burning fuel from Montana's largest coal mine." U.S. Magistrate Judge

Carolyn Ostby said “in October that federal officials improperly approved a 117-million ton expansion of the Spring Creek Mine on federal leases near the Montana-Wyoming border.” However, “re-analyzing the Montana mine will take longer than the 180 days proposed by Ostby, U.S. Justice Department attorney John Most wrote in a Friday court filing.”

Additional coverage was provided by the [Flathead \(MT\) Beacon](#) (11/7, 15K), the [Great Falls \(MT\) Tribune](#) (11/7, 76K), the [Missoulian \(MT\)](#) (11/9, 118K), the [Washington \(DC\) Times](#) (11/7, Brown, 283K), the [Gillette \(WY\) News Record](#) (11/9, 19K), and [KGWN-TV Cheyenne \(WY\)](#) Cheyenne, WY (11/9, 519).

MASTER LEASING PLANS FACE UNCERTAIN FUTURE. The [High Country \(CO\) News](#) (11/9, 74K) reports that “hoping to strike a better balance, in August, the BLM released a draft ‘master leasing plan’ for nearly 800,000 federal acres here that would significantly curtail future development near national parks, trails and other sensitive sites.” The article notes that “only seven of the dozen master leasing plans underway in Wyoming, Colorado and Utah have been finalized, most this summer.” According to the article, “none have yet been implemented, raising questions about how the approach will fare if the next administration swings right.”

REPUBLICANS “TAPPING INTO THE DISCONTENT” IN KENTUCKY’S COAL COUNTRY. The [AP](#) (11/8, Schreiner) reports that Republican candidates are “tapping into the discontent” emerging in Kentucky’s coal country, which has historically been deeply Democratic. The article highlights shifting political loyalties as the future of coal looks increasingly uncertain. Support for Democrats has waned and the AP notes that “There is visceral disgust with President Barack Obama, and his environmental policies have been widely denounced by locals as anti-coal.” In this climate, Republicans have “stirred the backlash, denouncing Obama for waging a ‘war on coal.’”

THREE AFFILIATED TRIBES CHANGES PLANS AMID DROP IN OIL PRICES. The [AP](#) (11/8, Ogden, 283K) reports that “the decline in oil prices in past months is having an impact on the Three Affiliated Tribes and their oil-rich Fort Berthold Reservation.” More than a year ago, the tribe “broke ground for a refinery, Thunder Butte Petroleum Services Inc., to be constructed on reservation land west of Makoti.” But after Mark Fox took office in late 2014 as tribal chairman, the refinery plans were “revamped.”

TWO TRAINS DERAIL IN WISCONSIN IN TWO DAYS, SPILLING OIL, ETHANOL. The [AP](#) (11/8) reports that a Canadian Pacific Railway train derailed Sunday in Watertown, Wisconsin, spilling less than 1,000 gallons of crude oil and prompting evacuations, “the second day in a row a freight train derailed in the state.” The Federal Railroad Administration tweeted that investigators were at the scene. The Jefferson County Office of Emergency Management said that residents of 35 homes were asked to evacuate. The AP explains that the derailment “came a day after a freight train derailed near Alma in western Wisconsin,” spilling thousands gallons of ethanol. Meanwhile, BNSF said railroad crews stopped the leaks from five tanker cars and placed containment booms along the shoreline. A statement from the FRA said officials from the EPA, Coast Guard, Fish and Wildlife Service, and the state Department of Natural Resources were responding.

The [New York Daily News](#) (11/9, Chiusano, 3.59M) reports that the derailment near Alma led to a voluntary evacuation uprooted 150 people from their homes but that it was “lifted around 2 p.m. on Saturday and all families affected have returned to their homes.” BNSF said that “there were no reports of fire, smoke or injuries.”

The [Watertown \(WI\) Daily Times](#) (11/8, 27K) reports that Watertown Police Chief Tim Roets said, “So far today we’ve avoided what could have been a major disaster. I’m hoping it’s a wakeup call for improving safety in the movement of these materials.” The Daily Times points out that “long trains of tanker cars filled with oil are regularly seen passing through Watertown” and that “the trains are usually 100 or more cars long and all or nearly all of them contain oil which can be highly explosive in the event of an accident.”

[WITI-TV](#) Milwaukee (11/8, 215K) reports that the FRA said, “A Canadian Pacific train has derailed near Watertown, Wisconsin, and Federal Railroad Administration investigators and hazmat specialists are en route. Some of the tank cars were carrying crude oil.” Meanwhile, Sarah Zarling, an oil train activist, said that she “has been warning about train derailments – and Sunday’s incident happened a few blocks from her home.”

Also reporting are [CBS News](#) (11/9, 4.1M), [Reuters](#) (11/8, Goldberg, Bernstein), [WKOW-TV](#) Madison, WI (11/8, 86K), [WKOW-TV](#) Madison, WI (11/8, 86K), [WKBT-TV](#) La Crosse, WI (11/9, 32K), and [WISC-TV](#) Madison, WI (11/9, 188K).

MODERATE EARTHQUAKES CONTINUE OVER WEEKEND IN NORTHERN OKLAHOMA. The [AP](#) (11/9, 283K) reports that a “series of moderate earthquakes continues to shake northern Oklahoma,” with the US Geological Survey recording 22 quakes recorded from Friday through Sunday, “including magnitude 4.2 and 4.1 temblors near Medford.” The AP adds, “The Oklahoma Geological Survey has said many recent earthquakes in the state likely were triggered by the injection of wastewater from oil and natural gas drilling operations.”

CATTLE RANCHER SUPPORTS STREAM PROTECTION RULE. For the “Congress” blog of [The Hill](#) (11/9, Pfister, 654K), Ellen Pfister, a cattle rancher, writes that “the proposed Stream Protection Rule would safeguard communities from destructive coal mining practices like long walling and keep pace with current science and modern mining practices.” Pfister says that “these new rules would minimize impacts to surface and groundwater such as the springs on my property by requiring companies to avoid mining practices that permanently pollute and diminish streams, and require coal companies to test and monitor the condition of streams that their mining might impact before, during and after their operations.” She concludes that “the Interior Department’s work to update and modernize these three decades old rules and regulations is absolutely essential if we are to keep a bad situation from getting worse.”

SUPPORT URGED FOR TRAPPER MINE. In an editorial, the [Craig \(CO\) Daily Press](#) (11/6, 10K) urges the community to submit comments in support of Trapper Mine. The paper warns that “if the mine’s supporters don’t tell the government why the mine should stay open, it puts another economic driver in our community at risk of closing.” It emphasizes that “this public comment period is vital to ensuring that OSM understands Trapper Mine’s social, economic and environmental impacts.”

Offshore Energy Development:

BSEE MAKES LEADERSHIP CHANGE FOLLOWING INVESTIGATIVE REPORT. [WWL-TV](#) New Orleans (11/6, 163K) reports that its investigation into problems at the BSEE have “helped lead to a leadership change.” The bureau said “in an internal email last week that it has replaced the head of its Environmental Enforcement Division.” That move came shortly after a report by WWL-TV “showed the division was understaffed, faced massive work backlogs and for years failed to hire new people to fill positions that were fully funded in the federal budget.”

COASTAL COMMUNITIES MULL OFFSHORE OIL, SEISMIC SURVEYING. The [Delmarva \(MD\) Daily Times](#) (11/7, 1K) reports that “municipalities along the Delmarva coast are considering resolutions regarding seismic surveying, a method for detecting oil and gas beneath the ocean floor.” The article notes that “on the state level, Delaware is opposed to the surveying” and “Virginia just confirmed its support for surveying and requested that the federal government prevent further delay of permit approval.” However, “in Maryland, where Ocean City just passed a resolution opposing seismic surveys in September, the state has no stance.”

SHELL OIL REPRESENTATIVE DISCUSSES ATLANTIC DRILLING IN GEORGIA. The [Savannah \(GA\) Morning News](#) (11/6, Landers, 150K) reported Shell Oil geological advisor and regional manager Gary Steffens told “about 25 business people and environmentalists” at a downtown Savannah, Georgia forum Thursday that drilling in the Atlantic from Virginia through Georgia could result in at least nine billion barrels of oil. The US Department of Interior released a five-year draft plan for drilling in the Atlantic in January that is expected to be finalized in the first quarter of 2016 to be sent off for approval by Congress. Brydon Ross, of forum sponsor Consumer Energy Alliance, said the plan in its current form would allow exploration and drilling 50 miles or farther offshore from Virginia, the Carolinas and Georgia.

EX-BP ENGINEER CLEARED OF OBSTRUCTION IN BP OIL SPILL CASE. [Bloomberg News](#) (11/6, Hasselle, Brubaker Calkins, 3.4M) reports that former BP engineer Kurt Mix “pleaded guilty to deleting text messages in what the U.S. said was a bid to hide spill rate estimates” during the 2010 Deepwater Horizon oil spill. Mix faced 20 years in prison and was the first of four men charged. Mix received 6 months of probation and must perform 60 hours of community service. [Reuters](#) (11/7, Finn) reports that Mix’s lawyer Joan McPhee said the resolution of the case has vindicated Mix and that the case should never have been brought. The [AP](#) (11/7, 825K) adds that Mix’s attorney said the plea agreement resulted from an “unraveling” government case.

BP Engineer: Aggressive Prosecution Could Deter Future Disaster Response. In an op-ed for the [Wall Street Journal](#) (11/9, Subscription Publication, 6.23M), Kurt Mix, a BP project engineer from 2006-2012, says he was wrongly targeted by the Department of Justice following his work to stop the 2010 oil spill. Two years after the spill, Mix faced two felony charges of obstruction of justice. After three years of trials, the DOJ

extended an offer to drop the felony charges on the condition that Mix accept guilt of a misdemeanor for deleting text message conversations from his phone without BP's permission. Mix said the DOJ had acted out of control, speculating that fear of prosecution could deter people from responding to disasters in the future.

[Fuel Fix \(TX\)](#) (11/8, 28K) provides coverage of the op-ed on its website.

BP ENGINEER: AGGRESSIVE PROSECUTION COULD DETER FUTURE DISASTER RESPONSE. In an op-ed for the [Wall Street Journal](#) (11/9, Subscription Publication, 6.23M), Kurt Mix, a BP project engineer from 2006-2012, says he was wrongly targeted by the Department of Justice following his work to stop the 2010 oil spill. Two years after the spill, Mix faced two felony charges of obstruction of justice. After three years of trials, the DOJ extended an offer to drop the felony charges on the condition that Mix accept guilt of a misdemeanor for deleting text message conversations from his phone without BP's permission. Mix said the DOJ had acted out of control, speculating that fear of prosecution could deter people from responding to disasters in the future.

America's Great Outdoors:

Bureau of Land Management:

BLM OPEN TO SAGE-GROUSE MAPPING CHANGES. The [Glenwood Springs \(CO\) Post Independent](#) (11/9, 32K) reports that "Garfield County officials remain optimistic over possible changes to habitat mapping for the greater sage-grouse in Colorado, changes that those officials said could ease restrictions on development, specifically in the oil and gas industry, while protecting the bird's habitat in an area northwest of Parachute." The article notes that "the optimism stems from two recent developments: an assurance from the Bureau of Land Management that habitat mapping can change as new data becomes available; and an effort by Colorado's northwest communities to conduct new habitat mapping across the region." David Boyd, public affairs specialist for the BLM Northwest Colorado District, said Friday, "As new information becomes available that changes the maps, we can incorporate that into the plan. The process we use will just depend on what those changes are."

DEBATE ERUPTS OVER BLM'S PLAN FOR RED CLIFFS NATIONAL CONSERVATION AREA. The [Salt Lake \(UT\) Tribune](#) (11/9, 339K) reports that "a cantankerous debate has erupted over a thoroughfare local officials want to cut through" the Red Cliffs National Conservation Area. The BLM is "wrapping up long-anticipated management plans for Red Cliffs, which holds 44,859 acres of public land, and a new NCA in Utah's very southwest corner, called Beaver Dam Wash, covering 63,480 BLM acres." According to the article, "with the recent release of a draft Environmental Impact Statement, county officials are steaming mad with what they see as a lack of 'balance' in the various alternatives of the plan," and "even worse, the BLM's 'preferred' alternative does not feature the so-called northern transportation corridor, which officials say is needed to accommodate future traffic loads and alleviate pressure on St. George's roads."

ACTION URGED TO END HORSE SLAUGHTER. For "The Blog" of the [Huffington Post](#) (11/6, Bershader, 251K), Matthew Bershader, ASPCA President and CEO, writes that recent news have "brought new attention to the horrific practice of slaughtering horses for human consumption and make clear the imperative behind ending horse slaughter decisively and permanently in the United States." Bershader supports the Safeguard American Food Exports (SAFE) Act, H.R. 1942/S. 1214, which he calls "common sense legislation that would permanently ban the slaughter of horses for human consumption in the U.S., as well as prohibit the export of horses to other countries for slaughter." He urges readers to "tell representatives that the slaughter of animals like Phedras has to end, and criminals like Tom Davis have to be stopped once and for all."

Additional coverage that the BLM has "been implicated in a scheme to illegally sell captured wild horses to a Colorado rancher, who then sold the animals for slaughter" was provided by the [Raw Story](#) (11/9, 1.24M) and the [Santa Fe New Mexican](#) (11/9, 67K).

Fish and Wildlife Service:

SENATE DEMOCRATS PRESS OBAMA ON ENDANGERED SPECIES PROTECTIONS. [E&E Daily](#) (11/6, Subscription Publication) reports that Senate Democrats last week "called on President Obama to oppose attempts to attach provisions to spending bills that would weaken the Endangered Species Act or remove federal protections from any species listed under the law." A letter signed by 24 Democratic senators and

Vermont's Bernie Sanders, said, "The extinction of earth's species is now at its highest rate since the extinction of the dinosaurs 65 million years ago, with human activity – including significant ecological impacts from climate change – initiating an extinction crisis on our planet." They added, "Unfortunately, some in Congress are seeking to undermine the Endangered Species Act." They claimed that "the fiscal 2016 Interior appropriations bills from the House and Senate contain 'a record number of anti-environmental provisions.'"

SALTON SEA RESTORATION BEGINS AT RED HILL BAY. The [Los Angeles Times](#) (11/8, 3.6M) reports that "officials last week took a step – albeit a modest one – toward restoring the beleaguered Salton Sea and possibly avoiding a predicted environmental and health catastrophe." A ceremony held Thursday and "attended by officeholders and others concerned with issues of water, wildlife and public health marked the beginning of a \$3.5-million project to restore 420 acres of Red Hill Bay on the southeastern shore of the Salton Sea." Christian Schoneman, a project manager with the FWS, "hopes that the project, by reducing 'fugitive dust released during wind events,' will be a guide for other projects."

The [Palm Springs \(CA\) Desert Sun](#) (11/6, 98K) gives the "ambitious Salton Sea wetlands work" a "thumbs up."

HUGE FISHING PIER, OUTDOOR CENTER PLANNED AT RIVER INTERNATIONAL WILDLIFE REFUGE GATEWAY. The [Detroit Free Press](#) (11/9, 921K) reports that "plans are in the works for a dock and fishing pier at the Detroit River International Wildlife Refuge Gateway." The project will "extend 775 feet into the Detroit River and include a fishing pier that can accommodate 100 people, a floating dock for the Michigan Sea Grant educational program boat, seating areas, shade structures and interpretive signs." The article notes that "the \$2.85-million project is expected to be completed by the end of 2016."

CALIFORNIA DROUGHT LEAVES LESS SHELTER FOR MIGRATORY BIRDS. [Reuters](#) (11/7, Bernstein) reports that the California's ongoing drought has left migrating waterfowl with fewer places to land, threatening their health due to overcrowding. Meghan Hertel, who works on habitat issues for the Audubon Society in California, said, "They're left with fewer and fewer places to go, which will start to have impacts on their population. They can die here from starvation or disease or be weaker for their flight back north."

FWS STUDYING RARE SALAMANDER IN MISSISSIPPI RIVER. The [AP](#) (11/9, 2.15M) reports that "one fortunate byproduct of a 2008 train derailment is that scientists are gaining a better understanding of a rare salamander species that lives in the Mississippi River." The FWS is "working on a long-term survey of mudpuppies in the river near Guttenberg." The article notes that "already, five mudpuppies have been captured as part of the survey, so the work is off to a good start."

Additional coverage was provided by the [Dubuque \(IA\) Telegraph Herald](#) (11/9, 88K).

FWS RECOMMENDS PHASING OUT ULTRALIGHT ASSISTANCE FOR WHOOPING CRANES. The [AP](#) (11/9, 2.15M) reports that "whooping cranes migrating south with the help of ultralight planes may have to start fending for themselves." The FWS is "recommending phasing out the use of ultralight aircraft that have been shepherding a reintroduced population of juvenile cranes to their southern wintering grounds, including the St. Marks National Wildlife Refuge along Florida's Gulf coast." An Oct. 15 report "detailing the agency's five-year plan for whooping cranes, says the use of the planes and humans costumed as cranes creates artificial conditions that eventually could make the birds less self-sustaining." But the report "also notes the practice, started in 2001, has proven invaluable to maintaining the growing population."

COURT GRANTS EXTENSION IN WOLF CREEK LAWSUIT. The [Farmington \(NM\) Daily Times](#) (11/8, 44K) reports that "the U.S. District Court for the District of Colorado granted the U.S. Forest Service and U.S. Fish and Wildlife Service an extension on Monday to release documents related to a decision to exchange more than 200 acres of federally managed land at Wolf Creek Pass for 177 acres of private land, according to court documents." The federal agencies "requested the extension because the requested information is 'extremely voluminous' and includes decisions by two federal agencies, according to court documents." The court ordered the agencies "to release the documents in two phases. The first phase of documents will be released Nov. 9, followed by a second phase on Nov. 13."

FWS TO DISCUSS PLANS FOR BUILDING AT FORSYTHE. The [Press of Atlantic City \(NJ\)](#) (11/9, 216K) reports that the FWS will "hold a public meeting" on Nov. 17 "to discuss plans for the construction of a new administrative office building at the Edwin B. Forsythe National Wildlife Refuge."

COMMENTS SHOW SUPPORT FOR RATTLESNAKE MOUNTAIN ACCESS. The [Tri-City Herald \(WA\)](#)

(11/9, Cary, 100K) reports that “a request for public comments on how the federal government should manage public access to Rattlesnake Mountain has been met with enthusiasm.” The FWS had “received 90 written responses by Friday, with a week left for the public to submit comments.” According to the article, “the appreciation for the mountain, whether from people who want to finally see the view from the top or those who think it is too special to be spoiled by people, is evident.” However, “the comments are light on creative suggestions as to how required public access to the mountain could be managed by the limited staff of the Mid-Columbia River National Wildlife Refuge Complex.”

ADDITIONAL COVERAGE: WOLF OR-7’S COLLAR NO LONGER WORKING. Additional coverage that wolf OR-7’s collar has stopped working was provided by the [Los Angeles Times](#) (11/8, 3.6M).

PLANS FOR ASSATEAGUE ISLAND CRITICIZED. In a piece for the [Fredericksburg \(VA\) Free Lance-Star](#) (11/9, 93K), Linda J. White criticizes the proposal by the FWS to move the beach at Assateague Island. Chincoteague officials have “sent letters to federal and state officials asking some pretty good questions about Fish and Wildlife’s 1,123-page plan.” According to White, the questions “illustrate the problems that occur when large federal agencies with big-picture mandates interface with small communities whose traditions and history pre-date not only the agencies, but the United States itself.”

National Park Service:

NPS REOPENS USS ARIZONA MEMORIAL AFTER INSPECTION SHOWS DOCK IS SAFE. The [AP](#) (11/9, 64K) reports that the NPS is “reopening the USS Arizona Memorial to visitors after engineers determined its dock is safe.” The agency said Friday that “only minor repairs are needed.” The NPS “on Thursday suspended memorial visits after officials noticed bolts connecting the dock to the memorial were stressed.”

Additional coverage was provided by the [Daily Mail \(UK\)](#) (11/9, 5.31M), the [Houston \(TX\) Chronicle](#) (11/9, 2.15M), the [Washington \(DC\) Post](#) (11/7, Press, 7.78M), and the [Washington \(DC\) Times](#) (11/6, 283K).

NPS PROPOSES NEW MUSEUM FOR STATUE OF LIBERTY. [USA Today](#) (11/6, 5.56M) reports that the NPS is “proposing a new Statue of Liberty museum to replace the one located inside Lady Liberty.” Currently, the museum is “only accessible to visitors who buy a ticket to the statue’s pedestal or crown.”

Additional coverage was provided by the [National Parks Traveler](#) (11/9, 989).

CHATTANOOGA MOVING POLICE FIRING RANGE TO ACCOMMODATE NPS PLAN. The [AP](#) (11/9, 2.15M) reports that “the city of Chattanooga is moving a police firing range to make way for a National Park Service management plan in the area.” According to the article, “keeping the range on the Tennessee riverbank at Moccasin Bend would delay the National Park Service’s long-term plans for the area.” The service “plans to incorporate the 33-acre area into an existing park.”

NPS REMOVES GARBAGE BINS TO REDUCE OCEAN BEACH TRASH. The [San Francisco Chronicle](#) (11/9, Subscription Publication, 3.44M) reports that “in a seemingly counterintuitive move, the National Park Service has removed most of the garbage cans along Ocean Beach — in hopes of reducing litter.” According to the article, “park officials say the move has been successful, but neighbors and beachgoers call it a failure.” Adrienne Freeman, public affairs specialist for the Golden Gate National Recreation Area, said, “If trash really starts to accumulate, we are going to put the trash cans back. But we are seeing a cleaner beach. People have started taking personal responsibility for the beach that they use.”

Additional coverage was provided by [KRON-TV](#) San Francisco (11/6, 85K).

NPS EXPLAINS TREE REMOVAL ALONG C&O CANAL. [WTOP-FM](#) Washington (11/9, 378K) reports that “in response to community outcry over eight trees chopped down along the C&O Canal towpath near Swain’s Lock, the National Park Service is admitting it did not communicate well with park lovers its plan to reforest the area.” Kevin Brandt, the park superintendent, said, “We didn’t meet the standard of communication. What we’re really trying to do here is communicate visitor safety is truly important to the Park Service.” The NPS will “take the comments under advisement and decide how to move forward.”

YELLOWSTONE BREAKS VISITATION RECORD. The [AP](#) (11/9, 2.15M) reports that “park officials say Yellowstone National Park attracted an unexpectedly large amount of visitors this year.” According to park spokeswoman Amy Bartlett, “there were more than 4 million recreational visits by the end of October, when

roads to many popular attractions close for the season.” The article notes that “crowds could also pour in next year, as the National Park Service turns 100 years old.”

More Chinese Tourists Visiting Yellowstone National Park Area. The [Seattle Times](#) (11/9, 1.17M) reports that “merchants in downtown Jackson say they noticed an increase in the number of Chinese tourists who are making the Yellowstone National Park region a destination.”

NPS IMPLEMENTS NEW PERMITTING SYSTEM AT CANYONLANDS NATIONAL PARK. [KSL-TV](#) Salt Lake City (11/9, 464K) reports that since Sept. 1, the NPS “requires permits for day use on two major backcountry roads in Canyonlands: The White Rim Road through the Island in the Sky District and the Elephant Hill Road through the Needles District.” Kate Cannon, the superintendent of four parks in Utah including Canyonlands says “this was a preemptive decision, based on growing interest in driving these dirt roads.” According to the article, “permits for overnight use of the two roads have been required for years, but Cannon says day use — those who want to go out and come back the same day — has been on the rise.” Cannon says “it’s not just a matter of preserving the environment, but saving the solitary experience the overnight campers savor.”

STUDENTS CREATE MOBILE APP FOR MOUNT RAINIER NATIONAL PARK. The [Centralia \(WA\) Chronicle](#) (11/9, 903) reports that “this July, 20 students from the University of West Florida collaborated with the National Park Service and Next Exit History to create a number of digital tours for Mount Rainier National Park.” The article notes that “the project was meant to coordinate with the 2016 Centennial celebration of the establishment of the National Park Service.”

NORTH JEFFERSON FOURTH GRADERS RECEIVE FREE PASSES. The [Martinsburg \(WV\) Journal](#) (11/9, 38K) reports that “North Jefferson Elementary School’s fourth graders gathered in the school’s gymnasium Nov. 2 to receive, from the National Park Service, free passes that entitle them to visit any national park in the United States free of charge for one year.”

DROUGHT DRIVES BEARS DOWN TO TOWN NEAR SEQUOIA NATIONAL PARK. The [AP](#) (11/9, 2.15M) reports that “Three Rivers is literally crawling with hungry bears driven down from” the mountains in Sequoia National Park “by drought in search of food to fatten up for winter. Everyone seems to have photos of the creatures on their phones or anecdotes of encounters.” According to the article, “the four-year drought shriveled the berry crop in the Sierra Nevada and oaks on parched hillsides produced fewer acorns, forcing the bears into the valleys carved by the branches of the Kaweah River that give this town its name.”

SEVERE STORMS SHUT DOWN FORT PICKENS. The [Pensacola \(FL\) News Journal](#) (11/7, 124K) reports that “Gulf Islands National Seashore shut down the Fort Pickens area for 10 days after severe storms struck last week.” According to the article, “the closure negatively impacted the National Park Service unit, but only to an extent.”

STURGEON CASE SEEN AS CRUCIAL FOR ALASKA’S SOVEREIGNTY. The [Fairbanks \(AK\) News-Miner](#) (11/9, 42K) editorializes that “the case of John Sturgeon versus the National Park Service and the Department of the Interior is strikingly important with regard to the sovereignty of the state of Alaska.” According to the paper, the decision by the Supreme Court will, “regardless of which way the decision comes down, have a direct affect on Alaskans traveling on state waterways that transit units of the National Park System.” It hopes that “the justices read the language as Congress intended” because “if not, the Last Frontier, with its promise of freedom and expanse, will lose a little more of itself to the multitudinous pages of a rulebook.”

NATIONAL PARK IN MAINE’S NORTH WOODS DEBATED. The [Bangor \(ME\) Daily News](#) (11/6, 165K) editorializes that “a Maine North Woods national park has been the subject of debate for more than two decades.” It notes that during that “time, the economic landscape of the Katahdin region has shifted dramatically — for the worse — and the ownership of much of the timberland stretching from Millinocket to the Canadian border has changed hands,” and “the park plan, too, has changed.” The paper argues that “the proposed national park and recreation area will not cure the Katahdin region’s economic woes, but it can be a focal point of its remaking with benefits spreading to Bangor and beyond.”

In an op-ed for the [Bangor \(ME\) Daily News](#) (11/6, 165K), Patricia Callahan wishes that “the whole debate would just go away” because she is “just sick about so many people not getting along.” She questions whether “all this division, acrimony, animosity and mistrust worth it.” Callahan asks, “If all parties can’t enjoy, share and benefit from a resource intended for them, then what good is the resource?”

Top National News:

OBAMA REJECTS KEYSTONE XL PIPELINE. President Obama on Friday announced that he was rejecting the application to build the Keystone XL pipeline in the US, saying that it does not benefit either US national security or the economy. However, media coverage – which includes less than two minutes on the three broadcast networks combined – overwhelmingly focuses on Obama's statement that the decision will improve the US' standing in climate change discussions, which reporting generally views sympathetically.

The [AP](#) (11/7, Lederman) reports Obama on Friday denied TransCanada's application to build the Keystone pipeline, "declaring the proposed project wouldn't serve US national interests and would have undercut" American leadership on climate change. [ABC World News](#) (11/6, story 7, 0:20, Muir, 5.84M) reported the President said the pipeline wouldn't "help the environment, the economy, or lower gas prices."

On [Fox News' Special Report](#) (11/6, 1.53M), Kevin Corke reported that "it was an abrupt ending for a seven years-long review," noting that the decision came just "days" after TransCanada "asked the US State Department to pause its review." According to [McClatchy](#) (11/6, Cockerham, 27K), Obama said he made the decision after Secretary of State Kerry informed him on Friday that the State Department's review of the project determined it was not in the US' national interest. Obama said, "The pipeline would not have made a meaningful long-term contribution to our economy" and "Shipping dirtier crude oil into our country would not have increased America's energy security." In an editorial, the [Los Angeles Times](#) (11/7, 3.6M) says Obama's decision "takes an important stand for the safety and quality of drinking water, the health of wilderness areas and the future of the world's climate." The Times adds that approving the pipeline would have been "an ever-more-desperate push to produce fossil fuels to burn will not get the world where it needs to be on its biggest environmental threat."

[CNN](#) (11/6, Labott, Berman, 3.54M) reported on its website that the decision "comes as the White House continues to promote its environmental agenda and efforts to fight climate change" and Obama plans to "attend the Paris climate talks." According to the [Washington Post](#) (11/7, Eilperin, Mufson, 7.78M), Obama said, "America's now a global leader when it comes to taking serious action to fight climate change. And frankly, approving this project would have undercut that global leadership. And that's the biggest risk we face, not acting." [Bloomberg Politics](#) (11/7, Drajem, 303K) reports the President "has given himself the job of cajoling commitments from other countries" at the talks "for a deal that would for the first time bind all nations to limit their greenhouse gas emissions." Bloomberg says "the rejection of Keystone adds one more notch to his climate record, enhancing his authority in pressuring fellow world leaders."

[USA Today](#) (11/7, Jackson, 5.56M) reports that Obama on Friday confirmed his upcoming attendance at the Paris talks. The President is expected to be in Paris for only a day and stated, "Three weeks from now, I look forward to joining my fellow world leaders in Paris, where we've got to come together around an ambitious framework to protect the one planet that we've got while we still can." The [Washington Post](#) (11/7, Mooney, 7.78M) says the announcement's timing, less than a month before the Paris talks, "can hardly be coincidental." The Post says "There's no doubt that President Obama is trying to shape a climate legacy and that showing leadership on all things climate related is his way of doing so." According to the Post, the rejection "is likely to give those talks major momentum."

The [New York Times](#) (11/7, Subscription Publication, 11.64M) agrees with Obama in an editorial, saying that the President "already has strong credentials on climate change," but "Rejecting the Keystone pipeline should further enhance his credibility and that of the United States on this issue." However, the [Washington Post](#) (11/7, 7.78M) editorializes that "world governments are smart enough to recognize what many activists apparently have not: The Keystone XL fight hardly matters in the grand scheme of the global climate." Instead, according to the Post, "Perceptions of US climate leadership depend" on the Environmental Protection Agency's rules that lead to reducing remissions, "not on domestic political psychodrama."

The [Los Angeles Times](#) (11/7, Parsons, Richter, 3.6M) reports some opponents of the pipeline "long warned about the negative effects of tar sands oil mining on wildlife and people," while others said it "would lock the US into dependence on an oil that is destructive and hard to extract." Meanwhile, supporters "argued in favor of the economic benefits" and "pointed to the jobs that the construction of the pipeline would create" and reducing of reliance on Middle Eastern oil sources.

[The Hill](#) (11/6, Cama, Fabian, 654K) reported that Obama felt some of those arguments were exaggerated and being exploited by both sides of the debate. Obama said the Keystone pipeline “has occupied what I, frankly, consider an overinflated role in our political discourse,” adding, “It became a symbol too often used as a c

WHITE HOUSE TRIBAL CONFERENCE TO FOCUS ON YOUTH. [McClatchy](#) (11/5, 27K) reports that “the seventh annual White House Tribal Nations Conference on Thursday will focus on Native American youth.” The article notes that “the conference’s major focus will be on the impact of Generation Indigenous, or Gen-I, an initiative launched last December to connect and empower Native youth following Obama’s visit to the Standing Rock Sioux Indian Reservation.” Interior Secretary Sally Jewell said that “the administration’s 2016 budget proposal ‘makes Indian Country a priority,’ dedicating \$20.5 billion to Native American services such as education, social services, health, justice, infrastructure and natural resources.”

Additional coverage of the White House Tribal Nations Conference was provided by the [Alaska Dispatch News](#) (11/4, 203K), the [Oklahoman](#) (11/5, 470K), the [Oregonian](#) (11/5, 769K), and the [Hermiston \(OR\) Herald](#) (11/4, 676).

REP. BISHOP TO RELEASE LANGUAGE TO REFORM LWCF. [Politico Pro](#) (11/4, Subscription Publication) reports that Rep. Rob Bishop will “release language to reform the Land and Water Conservation Fund this week, a step that he has said must proceed reauthorization of the 50-year-old program.” The House Natural Resources chairman also “criticized lawmakers who called to make the fund permanent since its authorization lapsed in September.” Bishop said in a statement, “Those who want to simply reauthorize and make permanent the program would forever subject the American people to government bureaucrats that want their land and have the means to take it. I will introduce reform language this week that will prohibit LWCF funds from going to eminent domain projects and restores funding to the Stateside program.”

States Lost LWCF Cash In 1976. The [E&E Daily](#) (11/4, Subscription Publication) reports that in 1976, lawmakers “voted to nix an existing provision that, unless appropriators decided otherwise, ensured 60 percent of LWCF money went to states and 40 percent to federal land acquisition.” As a result, “the state guarantee disappeared, but the federal share was kept intact.”

Oceana Gets Grant From LWCF For Park. The [Pineville \(WV\) Independent Herald](#) (11/5) reports that “the Town of Oceana is receiving a \$30,000 grant to continue upgrades on Gilliland Park.” Oceana City Clerk Clark Manning said “the grant application was submitted and was approved by the Land and Water Conservation Fund ‘after a lot of work.’”

Congress Urged To Reauthorize LWCF. In a piece for the [Jonesborough \(TN\) Herald and Tribune](#) (11/5, 13K), Frances Lamberts urges Congress to reauthorize the LWCF. He asserts that “the LWCF has been one of the most successful and popular conservation programs in modern U.S. history.”

SENATORS UNVEIL BILL TO STOP DRILLING ON PUBLIC LANDS. [Politico Pro](#) (11/4, Subscription Publication) reports that “Democratic presidential hopeful Bernie Sanders and green allies want to build on the so-far successful effort to block the Keystone XL pipeline by getting the U.S. government out of the coal, oil and gas business in the name of fighting climate change.” Sanders “on Wednesday will help unveil a Senate bill that would bar any new federal lands or waters from being leased for fossil energy development, a move that allows Sanders to further stake out territory to the left of Democratic front-runner Hillary Clinton on climate change.” According to the article, “while the Keep it in the Ground Act stands virtually no chance of passing a Republican-controlled Congress, its title evokes an emerging rallying cry among the activists who are on the cusp of defeating the controversial oil pipeline and who persuaded the Obama administration to scale back plans for offshore drilling in the Arctic last month.”

The [E&E Daily](#) (11/4, Subscription Publication) reports that Sen. Jeff Merkley said, “This bill is about recognizing that the fossil fuel reserves that are on our public lands should be managed in the public interest. And the public interest is for us to help drive a transition from fossil fuels to a clean-energy future.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (11/5, Wolfgang, 283K), the [Washington \(DC\) Examiner](#) (11/5, 112K), [Reuters](#) (11/4, Becker), [Oregon Public Broadcasting](#) (11/4, 10K), [UPI](#) (11/4), [Think Progress](#) (11/4, 293K), [Vox](#) (11/4, 874K), and [Between the Lines](#) (11/5).

REPUBLICANS SLAM REP. GRIJALVA’S GRAND CANYON BILL. The [E&E Daily](#) (11/4, Subscription Publication) reports that House Republicans on Tuesday “slammed” a bill by Rep. Raúl Grijalva “to designate a 1.7-million-acre national monument around the Grand Canyon, signaling trouble for the measure and making

it likely its supporters would ask President Obama to protect the land using the Antiquities Act.” Grijalva’s “Greater Grand Canyon Heritage National Monument Act” would “permanently ban mining and other industrial uses north and south of Grand Canyon National Park.” The legislation “aims to protect tribal sacred sites and safeguard a watershed that provides drinking water to major cities including Las Vegas and Los Angeles.” The measure has “been formally endorsed by the Hualapai, Havasupai and Hopi tribes and Navajo Nation President Russell Begaye and has garnered support from other tribal leaders.”

Additional coverage was provided by the [Summit County \(CO\) Citizens Voice](#) (11/4, 506).

Tribal Leaders Want Help In Protection Of Sacred Sites. [E&E Publishing](#) (11/4, 705) reports that “a trio of tribal leaders from Montana, Washington state and Arizona want President Obama’s help protecting their sacred lands from development.” The chairmen of the Blackfeet Nation, Lummi Nation and Colorado River Indian Tribes “sent a letter to the administration earlier this week demanding action on their individual but unified concerns ahead of the White House Tribal Nations Conference.” They wrote, “For decades, cultural and sacred areas have been targets for development. While we make decisions to benefit our people and our tribal economies, it isn’t about development and profit at any cost. ... Once these lands are desecrated, there’s no turning back.”

INTERIOR SHARES VIDEO OF SKUNK DOING HANDSTAND AT SAGUARO NATIONAL PARK. [KCPQ-TV](#) Seattle (11/4, 114K) reports that “a spotted skunk was recently caught doing a handstand at the Saguaro National Park in Arizona, the Interior Department said on its Instagram site.” The department said “this ‘strange interaction’ was captured by Saguaro’s wildlife camera in Happy Valley, Ariz.” The agency said, “Like the other three groups of skunks, spotted skunks are capable of spraying a strong unpleasant scent as a form of defense. But before spraying, spotted skunks will sometimes go into a handstand and attempt to intimidate any would be aggressors like this skunk is doing with the wildlife camera.”

Additional coverage was provided by the [Huffington Post](#) (11/5, Mazza, 251K) and [KTLA-TV](#) Los Angeles (11/4, 368K).

ADDITIONAL COVERAGE: INTERIOR ANNOUNCES ADDITIONAL PILT PAYMENTS. Additional coverage of the additional PILT payments announced by the Interior Department was provided by the [Flathead \(MT\) Beacon](#) (11/4, 15K), the [Billings \(MT\) Gazette](#) (11/5, 200K), the [Las Vegas \(NV\) Review-Journal](#) (11/5, 403K), and the [Nevada Appeal](#) (11/5, 51K).

USE OF ANTIQUITIES ACT TO ESTABLISH ATLANTIC MARINE MONUMENT OPPOSED. For the “Congress” blog of [The Hill](#) (11/5, Williams, 654K), Jon Williams, president of the Atlantic Red Crab Company of New Bedford, Massachusetts, writes that “an ongoing campaign led by large, well-funded environmental organizations is urging President Obama to use the 1906 Antiquities Act to designate parts of the Atlantic Ocean—such as Cashes Ledge in the Gulf of Maine and the New England Canyons and Seamounts—as marine National Monuments.” He argues that the Antiquities Act, “while undoubtedly created in good faith, has been misused in the case of marine monuments to a frightening extent.” Instead, he says that “the best way to manage our nation’s public resources is to involve the public.” Williams concludes that “those of us whose livelihoods could be devastated by the proposed marine monument designations can only hope that the administration will heed its own guidelines.”

Empowering Native American Communities:

REPORT: LAND BUY-BACK PROGRAM HAS RESTORED 1.5M ACRES TO TRIBAL GOVERNMENTS SINCE 2012. [KJZZ-FM](#) Phoenix (11/5, 8K) reports that “the federal Land Buy-Back program for tribal nations has restored about 1.5 million acres of land into trust for tribal governments since launching in 2012,” according to a new status report released by the Interior Department. According to Interior Deputy Secretary Mike Connor, “the department has paid about \$715 million to landowners to buy back their land since the program began.” He said, “The real value that I see, particularly to Indian Country, is its giving economic return to those individual land owners who own an interest who are getting some return. Whereas the tiny fractionated interests that some of them hold, it’s hard to get an economic return.”

Additional coverage was provided by the [Law360](#) (11/5, 30K).

INTERIOR TO ISSUE NEW RULES ON NATIVE AMERICAN REMAINS. [The Hill](#) (11/5, Devaney, Wheeler, 654K) reports that the Interior Department will “issue new rules for disposing of unclaimed Native American remains, funeral objects, sacred objects, and other cultural items found on federal lands.” The rules stem from the Native American Graves Protection and Repatriation Act. According to the article, “the federal government would be allowed to dispose of the remains only after making attempts to find the Indian tribes to which they belong.”

SCHOOLS INCREASINGLY BANNING ATTIRE WITH NATIVE AMERICAN MASCOTS. The [Washington Post](#) (11/5, George, 7.78M) reports that Jared Hautamaki, whose 5-year-old son attends school in Silver Spring, Md., has “testified before the county school board, started a petition drive and stirred community debate about what constitutes offensive attire at school.” Hautamaki is “calling on county school officials to ban students and staff in the district from wearing clothing with the name or logo of sports teams with Native American mascots, including Washington’s NFL team.” The article notes that “his efforts come after a Maryland private school recently ended the use of the ‘R-word’ on campus, including on student attire, and as an increasing number of schools nationally drop the Redskins name and others linked to Native American culture.”

[Tackling America’s Water Challenges:](#)

BOR SEEKS COMMENTS ON PROPOSED NEW BULKHEAD AT GRAND COULEE DAM. The [Star of Grand Coulee \(WA\)](#) (11/4, 41) reports that “Grand Coulee Dam could get a new fixture for help in repairing the big gates at the top of its spillway, one of which has been leaking since last summer.” The BOR is “seeking public comment to identify issues and concerns to be addressed in an Environmental Assessment for a proposed drum gate maintenance structure at Grand Coulee Dam.”

EDITORIAL: CALIFORNIA’S WATER ISSUES WOULD BE BETTER ADDRESSED THROUGH MARKET MECHANISMS. [Bloomberg View](#) (11/4, 86K) editorializes that “California’s cities are adapting to the state’s worst-in-a-century drought, hitting aggressive targets for water reduction set by Governor Jerry Brown in April.” But “the bigger challenge is to change the behavior of farmers, who consume 80 percent of the state’s water and have so far been spared the same magnitude of restrictions.” It argues that “the way to see that California’s increasingly scarce water is well-allocated is to stop sheltering it from the laws of supply and demand.”

[Securing America’s Energy Future:](#)

Renewable Energy:

FEDERAL JUDGE REJECTS APPROVAL OF SEARCHLIGHT WIND ENERGY PROJECT. The [Greenwire](#) (11/4, Subscription Publication) reports that “a federal judge in Nevada has thrown out the Obama administration’s approval of what was projected to be the Silver State’s largest wind power project, ruling that the Interior Department did not properly evaluate potential impacts to golden eagles and Mojave Desert tortoises.” U.S. District Judge Miranda Du’s “seven-page order issued late Friday is a sharp rebuke of the final environmental impact statement (EIS) for the 200-megawatt Searchlight Wind Energy Project conducted by the Bureau of Land Management and a biological opinion conducted by the Fish and Wildlife Service.” The article notes that “legal experts say this is the first time a court has formally ruled invalid a final EIS, biological opinion and record of decision for a renewable energy project.”

NRG SEEKS EAGLE TAKE PERMIT. The [reNews](#) (11/5) reports that the FWS has “released a draft environmental assessment for an ‘eagle take permit’ for NRG Yield’s 150MW Alta East wind farm in California.” The FWS said “the project could kill up to three golden eagles over five years without having a significant impact on eagle populations in the area.”

Onshore Energy Development:

DRAFT MEMO SEEKS TO IMPROVE PROTECTIONS FOR ENDANGERED SPECIES IN COAL MINING PERMITS. The [Greenwire](#) (11/4, Subscription Publication) reports that the Interior Department is “moving to coordinate interagency efforts to protect endangered species in coal mining permitting.” A draft memorandum

of understanding between the OSMRE and the FWS is “meant to help mining regulators boost scrutiny of species impacts in mine permitting.” OSMRE spokesman Chris Holmes said, “When completed, this MOU will serve as a model for state regulatory agencies to use in streamlining the coordination process for the protection, conservation and enhancement of threatened and endangered species and associated critical habitat at coal mining sites.”

ADVOCATES MOVE TO REOPEN CASE TO BLOCK DRILLING NEAR GLACIER NATIONAL PARK. The [EnergyWire](#) (11/4, Subscription Publication) reports that “conservation groups and tribal advocates are trying a new approach to block oil and gas development near Glacier National Park: asking a federal court to reopen a 20-year-old case on the matter.” The Pikuni Traditionalist Association and Brave Dog Society, “tribal heritage groups, partnered with a coalition of national and state conservation organizations in Montana for last week’s legal action, which seeks to revive a lawsuit that would block development in an area considered both ecologically and culturally important.” The groups argued in a legal brief filed Friday, “Road and bridge construction, well pad development, and the industrial activity associated with oil and gas drilling are fundamentally antithetical to and incompatible with Plaintiffs’ interests and represent a direct threat to those interests.”

Additional coverage was provided by the [Cut Bank \(MT\) Pioneer Press](#) (11/5, 237).

WAYNE NATIONAL FOREST COULD BE OPENED TO FRACKING. The [Columbus \(OH\) Dispatch](#) (11/4, 518K) reports that “the federal government is considering, again, opening Wayne National Forest to fracking.” According to the article, “oil and gas companies have formally expressed interest to the U.S. Bureau of Land Management in hydraulically fracturing about 31,900 acres of the Wayne.” The BLM is “reviewing those requests to see if the federal government owns the mineral rights beneath those sections of the forest, and it plans to assess potential environmental risks.”

The [AP](#) (11/5) and the [Wheeling \(WV\) Intelligencer](#) (11/5, Junkins, 55K) also covered the story.

SAGE GROUSE DECISION CLARIFIES PLAN FOR BOARDMAN-TO-HEMINGWAY TRANSMISSION LINE. The [Ontario \(OR\) Argus Observer](#) (11/5, 19K) reports that “with the decision not to list greater sage grouse as an endangered species, Idaho Power has a clearer picture of the direction for its proposed Boardman-to-Hemingway transmission line.” Idaho Power officials are “evaluating the effects of Bureau of Land Management and U.S. Forest Service land-use plan amendments on sage grouse conservation measures in relationship to its operations and maintenance of facilities in sage grouse habitat.”

COLORADO GOV. HICKENLOOPER SEEKS HIGH COURT RULE ON ATTORNEY GENERAL LAWSUITS. The [Grand Junction \(CO\) Daily Sentinel](#) (11/5, 73K) reports that “attorneys for Gov. John Hickenlooper filed a petition with the Colorado Supreme Court on Wednesday to ask it to determine if the governor, and not the state’s attorney general, has the ultimate authority to decide when the state can sue the federal government.” According to the article, “the petition was spurred because Colorado Attorney General Cynthia Coffman has filed three such cases against federal agencies without approval from the governor, something Hickenlooper said is a separation-of-powers issue between his office and hers. Both offices are elected directly by Colorado voters.” One of the “cases involve a suit against the Bureau of Land Management over hydraulic fracturing rules.”

Additional coverage as provided by the [Denver Post](#) (11/5, Finley, 825K).

Offshore Energy Development:

ACTIVISTS SEEKS TO MAKE OFFSHORE OIL DRILLING CENTRAL THEME OF 2016 CAMPAIGN. The [Fort Myers \(FL\) News-Press](#) (11/5, 177K) reports that “environmental activists hope to make opposition to offshore oil drilling a central theme of the 2016 campaign, spotlighting an issue that resonates throughout the nation’s most important swing state of Florida.” The anti-drilling coalition Sea Party 2016 “has enlisted a broad range of advocates, including liberal environmental organizations and tea-party backed conservatives from coastal states.” Coalition members “say drilling off the U.S. coastline isn’t just bad for the environment, it’s bad for business, too.”

ALASKA HOUSE APPROVES COMPLAINT AGAINST DECISION TO CANCEL ARCTIC LEASE SALES. The [Kenai \(AK\) Peninsula Clarion](#) (11/4, Brooks, 18K) reported that the Alaska House “approved a formal complaint against the Obama administration’s decision to cancel oil and gas lease sales in the Arctic.” Unlike a

bill agreeing to purchase TransCanada's stake in an LNG project, which passed the House unanimously Wednesday, "the Arctic complaint broke mostly along majority/minority lines as it passed 27-12, with one representative absent." Senate Joint Resolution 301 "declares that the Alaska Legislature is unhappy with the federal government's decision to cancel Arctic Ocean lease sales, saying in part, the 'Alaska State Legislature urges the United States Department of the Interior to reconsider its actions and continue to promote oil and gas exploration in the Chukchi and Beaufort Seas.'" The decision to cancel the lease sales followed Shell's announcement that it would not continue its exploratory oil drilling in the Alaskan Arctic.

JEFFERSON PARISH TO SPEND BP SETTLEMENT MONEY ON COASTAL RESTORATION, FLOOD PROTECTION. The [New Orleans Times-Picayune](#) (11/5, 661K) reports that the Jefferson Parish Council has broken a months-long stalemate by deciding to divide its \$35 million in BP settlement money between the council's five districts for flood protection and coastal restoration.

ADDITIONAL COVERAGE: BOEM DIRECTOR HOPPER SPEAKS AT COLUMBIA CONFERENCE.

Additional coverage of BOEM Director Abigail Ross Hopper's comments before a Columbia conference sponsored by Consumer Energy Alliance on offshore energy development was provided by the [Myrtle Beach \(SC\) Online](#) (11/5, 33K).

BP OIL SETTLEMENT CRITICIZED. In an op-ed for the [Alabama Live](#) (11/4, 855K), Jeff Dute, former Outdoors Editor of the Mobile Press-Register, writes that "done the right way, thinking outside the box and with an eye to the future, there is no reason Alabama's share of the BP oil spill settlement cannot be the foundation of a legacy of unparalleled job creation, land acquisition and environmental protection." But he argues that "as the settlement now stands, it will accomplish neither." Dute says that "Alabama should create a non-governmental trust fund or endowment and place all of the money into whichever account can be guaranteed to earn the highest interest rate."

America's Great Outdoors:

Bureau of Land Management:

CONGRESSIONAL HEARING ON BILL FOR RURAL NEVADA ECONOMIC DEVELOPMENT. The [Las Vegas Review-Journal](#) (11/5, 403K) reports that "Republicans on the House Natural Resources Committee lined up Wednesday behind legislation aimed at expediting economic development in rural Lincoln, Nye and White Pine counties and in the city of Mesquite." At a hearing on the bill, Committee Chairman Rob Bishop "indicated that he plans to move forward with the legislation within the next month, telling Bureau of Land Management Deputy Director Steven Ellis that if the BLM has concerns about the proposal he should hurry up with an alternative." Rep. Cresent Hardy "testified Wednesday in favor of the bill." Ellis "testified that BLM supports much of what Hardy sought to accomplish in the legislation but objects to some specific provisions."

ELK BASIN DINOSAUR BONES DUG UP. The [AP](#) (11/5, 2.15M) reports that "for more than 70 million years, it sat preserved underground until the front leg and shoulder of a hadrosaur, a type of duck-billed dinosaur, was dug up in Elk Basin." According to the article, "the bones were initially discovered around 15 years ago by Marilyn Wagweisner, about 15 miles outside of Powell and a few miles northwest of the gas plant in Elk Basin." The BLM contacted Collections manager for the Tate Geological Museum, J-P Cavigelli, "in the spring of 2014 and asked if he was interested in collecting the remainder of the dinosaur." Now, "Cavigelli is digging up the remainder of the hadrosaur bones."

BLM BEGINS DEMOLITION OF HINSDALE HOUSE. The [Coos Bay \(OR\) World](#) (11/5, 32K) reports that the BLM "began dismantling the Hinsdale House, north of Dean Creek Elk Viewing Area on Spruce Reach Island, the week of Oct. 26." According to the article, "the home is in disrepair and the agency is removing it to protect the health and safety of the public."

BLM BEGINS WHITE RIVER TRAVEL BLUEPRINT. The [Grand Junction \(CO\) Daily Sentinel](#) (11/5, 73K) reports that the BLM has "scheduled two public meetings as it begins to evaluate how travel should be managed on lands within its White River Field Office's jurisdiction." The bureau is "starting an environmental assessment to amend its resource management plan to determine areas open to cross-country travel by motorized and mechanized vehicles, closed altogether to such vehicles, or open to them only on designated routes." White River Field Manager Kent Walter said, "Our ultimate goal is to identify a comprehensive travel network that balances current and future transportation needs while managing for other resources and uses."

BLM OFFERING HORSES FOR ADOPTION AT BOISE WILD HORSE CORRALS. The [AP](#) (11/5, 283K) reports that “horses rounded up following a giant wildfire in southwestern Idaho are being offered for adoption.” The BLM is “making 38 horses available for viewing Friday and then adoption on Saturday at the Boise BLM Wild Horse Corrals located south of Boise.” Also, “two more halter-trained horses captured elsewhere are...being offered.”

Fish and Wildlife Service:

STUDY FINDS ILLEGAL POT FARMING OPERATIONS ARE POISONING THREATENED WEASELS. The [Washington Post](#) (11/5, Harvey, 7.78M) reports that “a new study, released Wednesday in the journal PLOS ONE, investigated the causes behind fisher mortality in California and identified a common form of rat poison — which you wouldn’t normally expect to find in the middle of their remote forest habitat — as an ‘emerging threat’ to the species.” Researchers “concluded that 10 percent were killed by rodenticide poisoning.” The toxicants were discovered to be associated with marijuana cultivation sites.

Additional coverage was provided by the [Phys \(UK\)](#) (11/5, 530) and [KCET-TV](#) Los Angeles (11/5, 15K).

NO DECISIONS HAVE BEEN MADE ON GRIZZLY BEAR DELISTING. The [Jackson Hole \(WY\) News & Guide](#) (11/5, 1K) reports that “federal wildlife managers meeting in Teton Village on Tuesday said there are no immediate plans to propose a rule that could return management of the Greater Yellowstone’s grizzly bears to the states.” According to the article, “speculation has been that the process to pull Endangered Species Act protections for the ecosystem’s grizzlies would be underway by the end of the year.” FWS “personnel admitted Tuesday there have been talks, but said no decisions have been made.”

FWS STUDIES STATUS OF RARE GLACIER INSECTS. The [Daily Inter Lake \(MT\)](#) (11/5, 51K) reports that “two stoneflies found in high-elevation coldwater streams in and near Glacier National Park are being considered for protection under the Endangered Species Act by the U.S. Fish and Wildlife Service.” According to the article, “the joint status review will examine the condition of the meltwater lednian stonefly and the western glacier stonefly, found only in a handful of streams in Montana.”

COLORADO HUNTERS BENEFIT FROM SAGE GROUSE PROTECTIONS. The [Public News Service](#) (11/5, 306) reports that “the third combined season for deer and elk kicked off last weekend, and Colorado hunters are taking full advantage of the U.S. Interior Department’s decision not to list the greater sage-grouse as an endangered species.” Kent Ingram, president with the Colorado Wildlife Federation, is “hopeful the conservation tactics and partnerships that helped avoid a listing will continue to protect wildlife in Colorado.” Ingram notes “the sage sea and the Piceance Basin in particular is critical for deer and elk numbers as they move down from higher elevations when the weather turns.”

ACTION URGED TO RESTORE SALTON SEA. In an op-ed for the [Palm Springs \(CA\) Desert Sun](#) (11/4, 98K), Rep. Raul Ruiz writes that “the longer we wait to act” for the Salton Sea, “the costlier it becomes to fix the problem, harming the public’s health and the economic well-being of our communities.” The Red Hill Bay Restoration Project is “the first large scale project to help prevent the dust exposure.” He notes that “the Red Hill Bay project was a collaborative effort between Sens. Boxer and Dianne Feinstein, Congressman Juan Vargas, state Sen. Ben Hueso, Assembly member Eduardo Garcia, Supervisor John Benoit, U.S. Fish and Wildlife Service, the Imperial Irrigation District (IID), the State of California, and the Salton Sea Authority.”

GOV. MEAD TESTIFIES ABOUT ENDANGERED SPECIES ACT. In a piece for the [Jackson Hole \(WY\) News & Guide](#) (11/5, 1K), Todd Wilkinson writes that “several weeks ago, Wyoming Gov. Matt Mead joined his counterpart from Montana, Steve Bullock, in testifying before a U.S. Senate Committee about the federal Endangered Species Act.”

National Park Service:

CAMPAIGN PUSHES FOR PROTECTION OF NINE “CROWN JEWEL” PARKS. The [Greenwire](#) (11/4, Subscription Publication) reports that the National Parks Conservation Association on Wednesday “launched a new campaign urging the Obama administration to protect nine parks the group sees as threatened by oil and gas drilling, transmission lines, real estate development, and overfishing, among other threats.” The #ParksInPeril campaign will “use social media, mailings and potential advertisements to galvanize public support for protecting ‘crown jewel’ parks – Grand Canyon, Grand Teton, Arches, Glacier, Yosemite, Biscayne

and Yellowstone national parks; the Mojave National Preserve; and the Colonial National Historic Park.” NPCA is also “lobbying directly with top officials at the National Park Service, Bureau of Land Management, Forest Service and other agencies to issue long-term protections for those parks.”

NATIONAL PARK NON-COMPLIANT WITH EPA OZONE STANDARDS, DISAGREEMENT EMERGES

OVER WHY. [US News & World Report](#) (11/5, Richards, 996K) reports that while communities across the nation “spend billions conforming to” the Environmental Protection Agency’s new ozone standards, the 26 national parks that have fallen into “non-compliant levels” under the new standards “may be off the hook.” The article discusses the dispute over the origin of the ozone causing non-compliance, with the National Parks Service “blam[ing] power plants,” while California officials and scientists saying emissions from park tourism “are mostly to blame.” Meanwhile, the piece notes that critics of the new standards say it will be “the most costly regulation in history,” with NAM President and CEO Jay Timmons stating, “The costs of compliance with this regulation would largely be borne by manufacturers, and the EPA can only identify a little more than a third of the controls we would need to install to comply. It calls the rest ‘unknown controls,’ because it simply cannot tell us what we will have to do.” Timmons added, “This regulation’s strict mandates will force manufacturers to shut down, scrap or modify existing facilities. This means higher costs for consumers and lost jobs.”

DUNES NATIONAL LAKESHORE TO KICK OFF ANNIVERSARY COUNTDOWN. The [AP](#) (11/5, 283K) reports that “the Indiana Dunes National Lakeshore is kicking off a yearlong countdown to the park’s 50th anniversary as a top Lake Michigan tourist attraction.” The NPS and “its partners will host a 49th birthday party Thursday for the park at the Dorothy Buell Memorial Visitor Center in Porter.” According to the article, “that party will feature at least 10 birthday cakes to kick off the yearlong celebration of the 15,000-acre national park that Congress created in 1966 along 15 miles of Lake Michigan’s northwestern Indiana shoreline.”

NPS SEEKS INPUT ON NEW STATUE OF LIBERTY MUSEUM. [NY1-TV](#) New York (11/5, 35K) reports that the NPS is seeking input “on a proposal to build a new museum on Liberty Island.” The 20,000-square-foot facility, located on the northwest part of the island, would “replace the existing Statue of Liberty Museum on the statue’s pedestal.” The NPS says “only 20 percent of the island’s visitors get to visit the museum and are required to reserve tickets in advance,” and “the new building would allow more people to visit the museum at a time.”

CUYAHOGA VALLEY NATIONAL PARK OPENS FIRST MOUNTAIN BIKE TRAIL.. The [Akron \(OH\) Beacon Journal](#) (11/5, 278K) reports that “the first mountain bike trail in the Cuyahoga Valley National Park is now open.” The NPS has “announced a 2.3-mile loop in northern Summit County is open to mountain bikers, hikers and runners.” Superintendent Craig Kenkel said, “With the opening of the first phase of the East Rim Trail, I’m thrilled that visitors will have a new way to explore our national park.”

COLLEGE STUDENTS HELP GLACIER NATIONAL PARK TO CREATE NEW MOBILE APP. [KPAX-TV](#) Missoula, MT (11/5, 1K) reports that “a group of 20 college students from the University of West Florida traveled across the United States in 2015, visiting and working with over 20 different National Park Service units.” According to the article, “the students, in collaboration with Next Exit History™ (NEH), worked with NPS staff to create engaging digital tours of each park they visited, including the creation of content for Glacier National Park.” Next Exit History™ is a “free GPS-based mobile app developed by the UWF in partnership with Historical Research Associates (HRA), of Missoula Montana.”

ADDITIONAL COVERAGE: NPS AWARDS FUNDS FOR BATTLEFIELD ACQUISITIONS. Additional coverage of the grants announced by the NPS “to help preserve land at three Civil War battlefields threatened with damage or destruction by urban and suburban development” was provided by [WYMT-TV](#) Hazard, KY (11/5).

US Geological Survey:

USGS WORKING ON EARLY WARNING SYSTEM FOR LANDSLIDES. The [Los Angeles Times](#) (11/4, 3.6M) reports that the USGS is “working on an early warning system that would alert Californians to landslides.” The project arrives “as the state prepares for what is likely to be a wet winter.” Jonathan Stock, a USGS geomorphologist, said, “We wanted to be in a position where we could answer the questions of what rains cause widespread landsliding before they’re asked.”

SCIENTISTS FIND SOIL HEALTH IMPROVING IN US AND CANADA, DUE TO ACID RAIN DECLINE. The [Christian Science Monitor](#) (11/4, 496K) reports that “a group of scientists from the United States and Canada

have found that the acidity of soils in some parts of the continent has declined, abating years of harm to plants and aquatic life by reversing the depletion of a critical nutrient in soil: calcium.” Researchers have “determined this by testing soil samples collected in 27 locations between 2009 and 2014, in the forests of Maine, New Hampshire, Vermont, Ontario and elsewhere in the northeastern US and eastern Canada” and “they compared their results to those compiled by the same group of scientists working at the same locations between eight and 24 years ago.” Gregory Lawrence, a USGS soil and water chemist, said in a statement, “The start of widespread soil recovery is a key step to remedy the long legacy of acid rain impacts on terrestrial and aquatic ecosystems.”

Top National News:

MEDIA ANALYSES: STATE’S REJECTION OF KEYSTONE REVIEW SUSPENSION LIKELY DOOMS PIPELINE. The State Department formally said Wednesday that it will not suspend its review of the proposed Keystone XL pipeline project as TransCanada requested earlier this week. While the White House did not comment Wednesday, media reports are portraying State’s decision as an indication that President Obama plans to rule on the project before he leaves office, almost certainly opting to kill the controversial pipeline.

The [AP](#) (11/4, Daly) reports the State Department said “it is continuing a review” of the pipeline despite the request. Spokesman John Kirby said State “advised TransCanada on Wednesday of its decision to continue the review,” saying “there was no legal requirement for officials to suspend the review.” [Reuters](#) (11/4, Volcovici) says the White House declined to comment.

The [Washington Post](#) (11/5, Warrick, 7.78M) reports TransCanada said it “respected the decision and would ‘continue to demonstrate that Keystone XL is in the national interest of the United States.’” The statement continued, “We will continue to focus on building a pipeline that will put 2,200 Canadian construction workers and 9,000 in the United States to work, not to mention tens of thousands more on the full value chain that the State Department itself identified in its review.” The [Omaha \(NE\) World-Herald](#) (11/5, Morton, 579K) also reports on TransCanada’s statement. [Fuel Fix](#) (11/5, Dlouhy, 28K) says a Nebraska commission is evaluating “the proposed route through that state, a process that could take seven months to a year.”

On [CNBC’s Closing Bell](#) (11/4, 4:19 p.m. EST, 142K), CNBC’s Eamon Javers said, “All of this is about running out the clock on the end of the Obama Administration. The Obama Administration has signaled that it would like to make a decision, probably likely rejecting the Keystone pipeline before the end of President Obama’s term. The company obviously doesn’t want that to happen and would like to delay this regulatory procedure until a new administration comes in Washington after the 2016 elections.” [Fox News’ Special Report](#) (11/4, Baier, 1.53M) briefly reported on the decision.

[McClatchy](#) (11/5, Cockerham, 27K) reports environmental groups “cheered the decision.” Tiernan Sittenfeld of the League of Conservation Voters said, “We couldn’t agree more with the State Department’s decision. After such a long review process this was a ridiculous ploy from TransCanada. We’re confident that President Obama will build on his climate leadership once again by swiftly rejecting this dirty pipeline.”

The [Wall Street Journal](#) (11/5, Tau, Subscription Publication, 6.23M) says the project has been a political football throughout the Obama presidency. The President has been skeptical of the project, saying most of the economic benefits will go to Canadian oil producers, not US workers. [The Hill](#) (11/4, Cama, 654K) says a delay “would have almost certainly pushed the federal decision into the next president’s term – a potential win for TransCanada if a Republican is elected.” The [Washington Times](#) (11/5, Wolfgang, 283K) says State’s decision “seems to eliminate the possibility a potential Republican president...would be the one to decide Keystone’s fate.”

The [Daily Intelligencer \(NY\)](#) (11/5, Fuller, 600K) called the State Department’s decision a “not-so-big shocker.” The [Canadian Press](#) (11/5, Panetta) says the decision was “unwanted news” for TransCanada. [AFP](#) (11/5), the [Huffington Post](#) (11/4, Barron-Lopez, 251K), and the [Globe and Mail](#) (11/5, Liebert, Sink, 1.12M) are among the other sources reporting on the rejection.

Sanders Says Obama Should Reject Keystone Immediately. [The Hill](#) (11/4, Henry, 654K) reports Sen. Bernie Sanders said Wednesday that Obama should “reject the Keystone XL pipeline immediately to strengthen the U.S. hand going into the upcoming Paris climate talks.” At a news conference, Sanders said, “I would hope very much that President Obama will stand up as soon as possible and say that the Keystone

pipeline is a no brainer, that you do not extract and transport some of the dirtiest fuel on earth, end of discussion.”

Maddow: State Decision “Kind Of Amazing.” On [MSNBC’s Rachel Maddow Show](#) (11/4, 9:32 p.m. EST, 769K), host Maddow said, “A funny thing happened on the way to TransCanada asking the Obama Administration to please suspend their application for Keystone. The Obama Administration has now said no, we will not suspend your application. This is kind of amazing. ... I’m not sure what TransCanada was expecting for a response when they tried to pull their project, but I imagine this wasn’t it.”

Keystone Opponent: “They Know They Are Beaten.” Keystone opponent Bill McKibben of 350.org said on [Bloomberg TV’s Markets](#) (11/4, 2:18 p.m. EST, 50K), “Keystone’s throwing in the towel. They know that they are beaten, at least until they can get a friendly face in the White House. ... This is an astonishing victory for the people’s movement. When we talked four years ago, it seemed like this pipeline was a done deal, because a pipeline had never been blocked before. Now, not only is Keystone in abeyance, but...there has been the ‘Keystone-ization’ of pretty much every fossil fuel project on the continent as people have risen up in real resistance.”

Scientific American: “Tough Times” For Alberta Tar Sands. [Scientific American](#) (11/5, Biello, 3M) says on its website that “tough times have come to Alberta’s tar sands,” which “enjoyed a long boom” before the collapse in oil prices. With oil “hovering around \$50 per barrel, companies working the oil sands could barely make existing projects worthwhile, let alone start new ones.” Scientific American says if TransCanada had simply followed the new route that “follows existing easements rather than cutting a new swath through private properties” from the start in 2008, “the \$8 billion, nearly 2,000 kilometer-long pipeline would likely be up and running today.”

WHITE HOUSE: OBAMA NOT TO BLAME FOR GOP VICTORIES. As the White House sought to direct blame for Republican victories in Tuesday’s elections away from the President, a number of reports are casting the results as a rebuke of the President and Democrats.

The [Washington Times](#) (11/5, Boyer, 283K) reports that the White House said Wednesday that the President is not blame for Republican victories in Tuesday’s elections. White House press secretary Josh Earnest tried “to explain those election results, which included GOP victories in the only gubernatorial contests in the nation, in Kentucky and Mississippi,” saying “that both states are ‘red,’” and noting that Democrats “did well in ‘blue’ states such as New Jersey and Pennsylvania.” Earnest said the results are “not the president’s fault, adding, ‘Obviously the president would like to see Democrats do better.’” Earnest also said there are “a variety of explanations’ for Republicans’ success in states elections under Mr. Obama, including GOP-controlled redistricting, the tendency of Democrat to live in big cities, and the success of Republicans in get-out-the-vote campaigns.”

On its website, [NPR](#) (11/5, 1.78M) took a different view, calling the results “a stinging rebuke to President Obama and the Democratic Party,” and adding that the results “cap off yet another disappointing election cycle for Democrats since President Obama entered the White House.” Greg Sargent noted in his “Plum Line” blog for the [Washington Post](#) (11/4, 7.78M) that under the President, Democrats “are down five Senate seats (from 51 in 2006 to a likely 46 today, counting independents who caucus with them) and around 45 House seats, depending on final recounts.”

On [Vox](#) (11/5, 874K), Ezra Klein cited a post on the Washington Post’s “Plum Line” [blog](#) on which Sargent called the results a “brutal reality check for the Democratic Party” along with other negative tweets from commentators about Democrats’ fortunes, including a tweet from Republican operative Rory Cooper, who wrote, “Under President Obama, Democrats have lost 900+ state legislature seats, 12 governors, 69 House seats, 13 Senate seats. That’s some legacy.” The [Daily Caller](#) (11/4, Stoltzfoos, 366K) also highlighted Cooper’s tweet.

A [USA Today](#) (11/5, 5.56M) editorial casts the results in a more positive light for Democrats, saying that while they “represent another strong off-year showing for Republicans,” the GOP “shouldn’t gloat” because “a larger, younger and more diverse electorate expected next year” means they “face a demographic challenge in winning the White House, and they are in danger of losing the Senate majority they just won in 2014.”

WPost Analysis: Results Give Democrats Reasons For Confidence About 2016. A [Washington Post](#) (11/5, Weigel, 7.78M) analysis says that Tuesday’s results suggest that “the country’s partisan divide has

deepened.” While Republicans saw “the big wins,” Democrats “walked away with fresh confidence that their map can win a third presidential election.” Democrats “finished Tuesday with confidence that they’d cracked the suburbs.” In addition, turnout in urban areas “a key to Democratic hopes in 2016, was strong enough to notch wins” as Democrats “took back city hall in Indianapolis and held it in Charlotte.” Democratic strategists “suggested that they benefited from anger at Republican control, epitomized by Indiana’s bungle of a Religious Freedom Restoration Act,” a strategy which, “if applied to 2016...points to an election fought by inches, on the issues most likely to drive out the base.”

In his [Washington Post](#) (11/5, 7.78M) column, E.J. Dionne writes that the biggest lesson from Tuesday’s results is that “the red parts of the country are getting even redder while the blue and some of the purple parts get bluer.”

Ball: Democrats Misread Voters’ “Enthusiasm For Social Change.” On the website of [The Atlantic](#) (11/5, 2.66M), Molly Ball wrote that voters on Tuesday “rejected recreational marijuana, transgender rights, and illegal-immigrant sanctuaries; they reacted equivocally to gun-control arguments; and they handed a surprise victory to a Republican gubernatorial candidate who emphasized his opposition to gay marriage.” Ball noted that while Democrats “have become increasingly assertive in taking liberal social positions in recent years,” Tuesday’s results “suggest that the left has misread the electorate’s enthusiasm for social change, inviting a backlash from mainstream voters invested in the status quo.”

Louisville Courier-Journal Analysis: Kentucky Is A GOP “Stronghold.” In an analysis, the [Louisville \(KY\) Courier-Journal](#) (11/5, Gerth, 433K) calls Kentucky Gov.-elect Matt Bevin’s victory on Tuesday “stunning,” and says “it has become abundantly clear” that Kentucky “is a Republican stronghold.” The [Huffington Post](#) (11/4, Jackson, 251K) called the results of the Kentucky governor’s race “a surprise to many,” noting that “polls showed a close race when the result was a 9-point victory for Bevin.” While the polls “actually did correctly project Conway’s proportion of the vote correctly,” the “miss was a substantial underestimate of Bevin’s support – he ended up with 52.5 percent of the vote, compared to an average of 41 percent in the polls.”

The [New York Times](#) (11/5, Stolberg, Subscription Publication, 11.64M) calls Bevin “a big question mark,” adding that Democrats “are terrified that he will not work with them,” and Republicans, “who have heard him say he is ‘not beholden to any party per se,’ worry about who he will bring with him to the State Capitol in Frankfort. One thing seems certain: He is going to shake things up.”

Opponents Of Houston Anti-Discrimination Measure Focused On Bathrooms. The [New York Times](#) (11/5, Fernandez, Blinder, Subscription Publication, 11.64M) reports on the efforts of a “coalition of social conservatives, Republican officials and pastors” to repeal a Houston measure “banning discrimination based on factors like age, race and sex,” noting that they “focused on what public facilities a transgender person could use.” The Times calls it “something of a triumph for political messaging” that voters “did not talk about the tools that supporters said the ordinance would have provided to fight discrimination” or gay rights, but “often focused on bathrooms.” On the [CBS Evening News](#) (11/4, story 8, 2:15, Pelley, 5.08M), Omar Villafranca noted that “opponents dubbed it ‘The Bathroom Bill’ and made the name stick through a series of ads that claimed women and children would become vulnerable to sexual predators in ladies’ rooms.” Although the ordinance “made no mention of bathrooms,” it was “the inclusion of gender identity that opponents like Lieutenant Governor Dan Patrick seized upon.”

[Reuters](#) (11/5, Ortiz) says that according to political experts, the 61 percent to 39 percent vote against the measure is an indication that Democrats and progressive voters joined social conservatives in opposing it.

The [New York Times](#) (11/5, Fernandez, Blinder, Subscription Publication, 11.64M) also notes that opponents of the measure called its defeat “a blow to President Obama and Hillary Rodham Clinton, who both endorsed it.” The [Washington Post](#) (11/5, Somashekhar, 7.78M) calls the measure’s defeat “a setback for the gay rights movement,” and adds that the vote showed “the movement is still finding its footing on its next big priority: ending discrimination against gay and transgender people.”

An editorial in the [New York Times](#) (11/5, Subscription Publication, 11.64M) says the defeat of the measure is a “painful setback” which shows that “vilifying people for their gender identity remains politically acceptable in America.” The Times says transgender people “should take comfort in knowing that history will not be kind to the haters who won on Tuesday.”

WPost Analysis: Backlash Over Guns May Have Cost Virginia Democrats The Election. A [Washington](#)

[Post](#) (11/5, McCartney, 7.78M) analysis reports that “aggressive advocacy of gun control” by Virginia Gov. Terry McAuliffe and state Democrats in a key Senate race in the Richmond area “may have backfired by producing a pro-Republican backlash.” In the District 10 Senate race, which “proved decisive” in Republicans’ keeping control of the Senate, Republican Glen Sturtevant benefited from “huge turnout in the conservative Powhatan area that analysts attributed to the gun issue.” Republicans ran ads saying Democrat Daniel A. Gecker was “trying to win the seat with \$700,000 of outside help from pro-gun-control TV advertisements paid for by a group linked to former New York mayor Michael Bloomberg.”

San Francisco’s “Sanctuary Sheriff” Loses Re-Election Vote. The [Washington Times](#) (11/5, Dinan, 283K) reports a California group “launched a ballot initiative to eliminate sanctuary cities, hoping to take power away from state and local lawmakers” who are preventing their police departments from cooperating with deportation orders. The effort, according to the Times, “got a boost Tuesday when San Francisco’s ‘sanctuary sheriff’ lost his reelection bid. Ted Hilton, “the man behind the new ballot initiative,” said Sheriff Ross Mirkarimi’s loss “should be a warning sign to elected officials in other sanctuary cities that the majority are opposed to their refusing to cooperate with federal authorities.”

The [New York Times](#) (11/5, Holson, Subscription Publication, 11.64M) reports Vicki Hennessy was elected San Francisco’s first female sheriff on Tuesday after she “pledged to work with the whole criminal justice system...to build better relationships.” Hennessy “will succeed” Mirkarimi, whose term “was marked by personal scandals, confrontations Mayor Edwin M. Lee, and...the release of an illegal immigrant in his jail who had several felonies.” Hennessy “said she would take a more inclusive approach in work federal immigration officials,” making decisions on a “case-by-case basis” regarding the question of whether to provide notice when an illegal immigrant with a criminal records was due for release.

SENATE BACKS RESOLUTION TO SCRAP EPA CLEAN WATER RULES. Over the objections from the White House the Senate voted 53-44 Wednesday for a “resolution of disapproval” that would, “scrap new federal rules to protect smaller streams, tributaries and wetlands from development and pollution,” the [AP](#) (11/5, Jalonick) reports. The House has yet to vote on the measure, which the White House said it will veto. [The Hill](#) (11/4, Henry, 654K) said Sen. Susan Collins was the only Republican to oppose the measure, adding that three Democrats voted for it.

The [St. Louis Post-Dispatch](#) (11/5, 932K) says the vote “was a foreshadowing of the final 14 months of Obama’s presidency, with the Republican Congress seeking every opportunity to push back against broad Obama initiatives whose resolutions may come only in court — and after Obama leaves office in 2017.”

Editorial Wrap-Up:

NEW YORK TIMES. “In Houston, Hate Trumped Fairness.” An editorial in the [New York Times](#) (11/5, Subscription Publication, 11.64M) says the defeat of an equal rights measure in Houston “that opponents maliciously and misleadingly characterized as a boon for cross-dressing sex offenders,” shows that “vilifying people for their gender identity remains politically acceptable in America.” The Times says transgender people “should take comfort in knowing that history will not be kind to the haters who won on Tuesday.”

“Death Among Middle-Aged Whites.” A [New York Times](#) (11/5, Subscription Publication, 11.64M) editorial notes a recent Princeton study that found between 1999 and 2013, white middle-aged Americans “began dying at a sharply increased rate, largely a result of problems with legal and illegal drugs, alcohol-related liver disease and suicide.” The Times calls for action, warning that “if sickness and death rates continue to rise in this age group, an influx of chronically ill people will strain Medicare, Medicaid and the Social Security disability insurance program...and the next generation to hit that age could suffer a similar fate.”

“Democrats Undermine Efforts To Protect Retirement Savers.” In an editorial, the [New York Times](#) (11/5, Subscription Publication, 11.64M) criticizes 47 House Democrats that are threatening to derail the Administration’s effort to “protect Americans from retirement advisers who put their own interest in earning commissions above their clients’ need for expert advice.” The Times says the President, “who has pledged to veto the Republican bill to block the rules, should also be forthright in disagreeing with House Democrats who now seek to delay” the measure and “with any Senate Democrats who go along with them.”

WASHINGTON POST. “Congress Misses A Chance To Improve The Transportation Bill.” In an editorial, the [Washington Post](#) (11/5, 7.78M) questions House Speaker Ryan’s claims of running a more open

House, arguing that “the process apparently isn’t open enough to allow for a vote on the most obvious transportation solution: raising the gasoline tax to pay for the country’s roads and rails.” The Post says that during debate of the transportation bill, two proposed gas tax amendments were blocked by the House Rules Committee.

“Increase Transparency Surrounding The Export-Import Bank.” In an editorial, the [Washington Post](#) (11/5, 7.78M) says that with the exception of a mandate to create a “new chief risk officer,” the Ex-Im re-authorization bill contains “precious little in the way of structural reform.” According to the Post, “What’s needed is a shift to ‘fair-value reporting’ – in effect, a line in the federal budget recording the true value to taxpayers of the financial risk Ex-Im incurs on their behalf.”

“Metro’s Attempt To Pick A New Leader Falls Apart.” A [Washington Post](#) (11/5, Board, 7.78M) editorial.

WALL STREET JOURNAL. “The ObamaCare Albatross.” In an editorial, the [Wall Street Journal](#) (11/5, Subscription Publication, 6.23M) cites Matt Bevin’s victory in the Kentucky governor’s race as evidence that the ACA is a political disaster for Democrats. Noting the low turnout in Tuesday’s elections, the Journal warns Republicans against taking too many lessons for 2016, but adds that they should not repeat their 2012 error of nominating a candidate who will not argue for replacing the ACA.

“Iran’s Clenched Fist To America.” A [Wall Street Journal](#) (11/5, Subscription Publication, 6.23M) editorial says the recent arrest of Iranian-American Siamak Namazi and the continued detention of four other Americans in Iran are a sign that Tehran is not likely to cooperate with US, despite the nuclear agreement.

“Show Us Your Donors.” The [Wall Street Journal](#) (11/5, Subscription Publication, 6.23M) editorializes that a case challenging California’s requirement that groups seeking to solicit charitable funds in the state disclose the names of their donors goes to both the First Amendment’s right to assembly and to free speech, and also urges the Supreme Court to hear the case and rule against California.

Scheduled Floor Action

House Floor

Thursday, Nov. 5, 9 a.m.

The House reconvenes at noon for legislative business. The chamber is expected to consider a bill related to the National Defense Authorization Act (HR 1735)

Agenda

HR 1735 — Fiscal 2016 Defense Authorization (NDAA)

Friday, Nov. 6

No votes are expected.

Senate Floor

During the balance of the week, Senate may consider any cleared legislative and executive business.

Recent Legislative Activity of Interest

Senate:

Measures Reported:

[S. 1550](#), to amend title 31, United States Code, to establish entities tasked with improving program and project management in certain Federal agencies, with an amendment in the nature of a substitute. (S. Rept. No. 114-162)

[S. 2138](#), to amend the Small Business Act to improve the review and acceptance of subcontracting plans, with amendments.

Measures Considered:

Federal Water Quality Protection Act: Senate resumed consideration of the motion to proceed to consideration of [S. 1140](#), to require the Secretary of the Army and the Administrator of the Environmental Protection Agency to propose a regulation revising the definition of the term ``waters of the United States''.

Waters of the United States--Agreement: By 55 yeas to 43 nays (Vote No. 296), Senate agreed to the motion to proceed to consideration of [S.J. Res. 22](#), providing for congressional disapproval under chapter 8 of title 5, United States Code, of the rule submitted by the Corps of Engineers and the Environmental Protection Agency relating to the definition of ``waters of the United States'' under the Federal Water Pollution Control Act.

House:

By Mr. **THOMPSON** of Pennsylvania (for himself and Mr. **LAMALFA**):

H.R. 3881. A bill to amend the Mineral Leasing Act to repeal provisions relating only to the Allegheny National Forest; to the Committee on Natural Resources.

By Mr. **GRIJALVA**:

H.R. 3882. A bill to designate the Greater Grand Canyon Heritage National Monument in the State of Arizona, and for other purposes; to the Committee on Natural Resources.

By Mr. **GRAYSON**:

H.R. 3898. A bill to amend the Internal Revenue Code of 1986 to extend for two years the credit for qualified small wind energy property; to the Committee on Ways and Means.

By Mr. **GRAYSON**:

H.R. 3900. A bill to amend the Internal Revenue Code of 1986 to extend for two years the credit for solar energy property; to the Committee on Ways and Means.

By Mr. **GRAYSON**:

H.R. 3901. A bill to amend the Internal Revenue Code of 1986 to extend for two years the credit for thermal energy property; to the Committee on Ways and Means.

By Mr. **GRAYSON**:

H.R. 3904. A bill to amend the Internal Revenue Code of 1986 to extend for one year the credit for qualified microturbine property; to the Committee on Ways and Means.

By Mr. **GRAYSON**:

H.R. 3905. A bill to amend the Internal Revenue Code of 1986 to extend for one year the credit for qualified small wind energy property; to the Committee on Ways and Means.

By Mr. **GRAYSON**:

H.R. 3907. A bill to amend the Internal Revenue Code of 1986 to extend for one year the credit for solar energy property; to the Committee on Ways and Means.

By Mr. **GRAYSON**:

H.R. 3908. A bill to amend the Internal Revenue Code of 1986 to extend for one year the credit for thermal energy property; to the Committee on Ways and Means.

By Mrs. **KIRKPATRICK**:

H.R. 3911. A bill to make technical amendments to the Act of December 22, 1974, relating to lands of the Navajo Tribe, and for other purposes; to the Committee on Natural Resources.

By Ms. **TSONGAS**:

H.R. 3916. A bill to prohibit entities from using Federal funds to contribute to political campaigns or participate in lobbying activities; to the Committee on the Judiciary, and in addition to the Committee on House Administration, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

DOI in the News:

SECRETARY JEWELL ASKED TO ADDRESS COAL'S CONTRIBUTION TO CLIMATE CHANGE. [Politico Pro](#) (11/2, Subscription Publication) reports that "the Senate Energy and Natural Resources Committee's top Democrat today led seven fellow Democrats in urging Interior Secretary Sally Jewell to address the extent to which coal leased on federal lands contributes to climate change." Sen. Maria Cantwell and her colleagues "asked Jewell to take steps beyond those proposed in a pending reassessment of the leasing program to ensure 'its obligation to mitigate the negative impacts of' coal from federal lands." They said, "Until the market price for coal reflects its true cost to society, taxpayers will continue to bear the costs of more extreme weather, collapsed ecosystems, stranded infrastructure, increased incidences of heart and lung disease, and other effects of climate change."

The [Greenwire](#) (11/2, Subscription Publication) reports that "the lawmakers – also including Sens. Al Franken of Minnesota, Martin Heinrich of New Mexico, Ed Markey of Massachusetts, Jeff Merkley of Oregon, Patty Murray of Washington, Elizabeth Warren of Massachusetts and Sheldon Whitehouse of Rhode Island – say coal leasing is ripe for deep reforms."

[The Hill](#) (11/3, Cama, 654K) reports that "Jewell called this year for an 'honest and open conversation about modernizing the federal coal program,' including its contribution to climate and whether taxpayers are getting a commensurate price for coal." However, "communities that rely on coal for jobs and cheap power have pushed back in federal listening sessions, as has the coal industry."

Additional coverage was provided by [Reuters](#) (11/2, Gardner), the [Seattle \(WA\) Times](#) (11/2, 1.17M), and [Law360](#) (11/3, 30K).

SECRETARY JEWELL TO DELIVER OPENING REMARKS AT WHITE HOUSE TRIBAL NATIONS CONFERENCE. The [Farmington \(NM\) Daily Times](#) (11/2, 44K) reports that the Interior Department announced Monday that Interior Secretary Sally Jewell will deliver the opening remarks at the White House Tribal Nations Conference on Thursday in Washington, D.C. and "participate in one of three town hall sessions."

OBAMA ADMINISTRATION ANNOUNCES RULE TO PROTECT SUBSISTENCE PRIORITY. [E&E Publishing](#) (10/30, 705) reports that the Obama Administration on Monday "released a final rule that it says provides more flexibility for determining which Alaskans get special rights to hunt and fish on federal lands." The joint rule by the Interior and Agriculture departments will "update the government's procedure for determining which areas of the state qualify as 'rural' under the Alaska National Interest Lands Conservation Act of 1980."

[Alaska Dispatch News](#) (10/30, 203K) reports that Interior Deputy Secretary Michael Connor said, "The Obama administration is fully committed to protecting the subsistence rights of rural Alaskans." Sen. Lisa Murkowski, "who had introduced legislation to reverse the Saxman decision along with Rep. Don Young, said she's pleased with the changes."

Additional coverage was provided by the [Ketchikan \(AK\) SitNews](#) (11/2) and [Law360](#) (11/3, 30K).

FIGHT CONTINUES FOR LAND AND WATER CONSERVATION FUND. The [Public News Service](#) (11/2, 306) reports that "advocates for the Land and Water Conservation Fund, which Congress allowed to expire last month, say the fight is not over to restore funding." The article notes that "in a recent weekly address, President Obama called on Congress to reauthorize the LWCF." Also, Richard Mode, an affiliate representative for the North Carolina Wildlife Federation, said, "There is a concerted effort by a group of legislators who see the value of the Land and Water Conservation Fund and are trying to get it reauthorized

with dedicated, full funding.”

WSJournal: Feds Should Give Money To States, Focus On Upkeep Instead Of Buying Land. In an editorial, the [Wall Street Journal](#) (11/3, Subscription Publication, 6.23M) argues the Land and Water Conservation Fund should only be reauthorized with restrictions, condemning the Administration’s purchase of land using it. The Journal argues the federal government already has enough land and isn’t managing it well. Additionally, the Journal suggests that environmental groups profit by purchasing land the government is considering buying and then selling it at a premium. The Journal argues that purchases by the fund should be suspended and its money given to states and used for upkeep of Interior Department lands.

Congress Urged To Reauthorize LWCF. In an op-ed for the [Salt Lake \(UT\) Tribune](#) (11/2, 339K), Michael Bean, principal deputy assistant secretary for Fish and Wildlife and Parks in the U.S. Department of the Interior, urges Congress to reauthorize the LWCF and the Historic Preservation Fund. He argues that “the Land and Water Conservation Fund has been instrumental in the state of Utah to protecting land, water and wildlife.” Beans notes that “as U.S. Secretary of the Interior Sally Jewell has said many times, failure to reauthorize these funds will result in needless uncertainty and deprive local communities of future conservation, historic preservation, and recreation opportunities, not just in Utah but throughout the nation.”

In an op-ed for the [Central Kitsap \(WA\) Reporter](#) (11/3, 53K), Rep. Derek Kilmer writes in support of the LWCF. He says that “renewing this program gives Congress the opportunity to focus, at least for a little while, on progress rather than on partisanship.”

K-MAX HELICOPTER COULD HELP IN FIGHT AGAINST WILDFIRES. The [Aviation Week](#) (11/3, 1K) reports that optionally piloted aircraft can “fly unmanned at night and through the morning, using sensors to locate and attack fires.” Lockheed Martin and Kaman have “conducted a demonstration of the concept for the U.S. Interior Department and the U.S. Agriculture Department’s Forest Service using the unmanned K-Max helicopter—piloted versions of which are already used to fight wildland fires.” According to Mark Bathrick, director of the Interior Department’s Office of Aviation Services, “the concept of using OPAs grew out of frustration at only supporting firefighters on the ground for a third of the available day.”

Additional coverage was provided by [KING-TV](#) Seattle (11/2, 457K) and [KREM-TV](#) Spokane, WA (11/2, 43K).

NAVAJO COUNCIL SUPPORTS PROPOSED BEARS EARS NATIONAL MONUMENT. The [Lake Powell Life](#) (11/3) reports that “the Navajo Nation Council has reiterated its support for the Bears Ears National Monument proposed for Utah.” The article notes that “the council’s clarification came after several Republican lawmakers commented in October that Native American tribes did not back the monument designation, which would keep the land from resource development.”

AS PRESIDENT, KASICH WOULD PUSH TO ELIMINATE COMMERCE DEPARTMENT. The [Cincinnati Enquirer](#) (11/2, Thompson, 577K) reports that Republican presidential hopeful John Kasich on Monday said that “he wants to eliminate the 47,000-person Commerce Department if he becomes president in 2016, renewing a call he took up when he served in Congress.” Referring to “the department a ‘Franken-agency,’ Kasich’s campaign said his plan would help ‘dismantle the Washington bureaucracy’ and could lead to savings that would help balance the federal budget.” According to the article, “the Kasich plan to eliminate the Commerce Department would reassign its weather-related components, such as the National Weather Service, to the Department of the Interior.”

Additional coverage was provided by the [Columbus \(OH\) Dispatch](#) (11/2, 518K), [Bloomberg Politics](#) (11/2, 303K), [Yahoo! Finance](#) (11/3, 6.15M), and [WOSU-FM Columbus \(OH\)](#) Columbus, OH (11/3).

REP. WALDEN OPPOSES ANTIQUITIES ACT DESIGNATION FOR OWYHEE RIVER CANYON. In an op-ed for the [Salem \(OR\) Capital Press](#) (11/2, 113K), Rep. Greg Walden opposes a declaration under the Antiquities Act to protect the Owyhee River canyon in Eastern Oregon. Walden asserts that “residents of Eastern Oregon don’t want another ‘Washington, D.C. knows best’ federal designation that would further destroy our way of life.” Walden doesn’t want “a presidential declaration locking up more of our public lands and choking our local ranch economy.”

In an editorial, the [Bend \(OR\) Bulletin](#) (11/3, 94K) urges Obama to not use “executive authority to declare the Owyhee Canyonlands a national monument.” It notes that “those near the Owyhee don’t have that confidence that a designation would be an economic spur and also preserve everything they love.” By encouraging

debate, the paper advises, the proposal could win support.

ACTION URGED ON REDUCING WILDFIRE RISK, PROTECTING WATER SUPPLY. In an op-ed for [Roll Call](#) (11/3, 139K), Tom Martin, president and CEO of the American Forest Foundation, writes about addressing “two serious issues in the West: reducing wildfire risk on private and family lands and protecting the limited clean water supply.” He argues that “if we are to protect the limited water supply for westerners, we must protect the forests that support clean water from being decimated by wildfire.”

NAVAJO NATION WANTS EPA TO FOCUS ON CLEANING UP GOLD KING MINE SPILL. In an op-ed for the [Daily Caller](#) (11/3, Begaye, 366K), Russell Begaye, President, Navajo Nation, writes that “last week investigators from the U.S. Department of Interior concluded that the U.S. Environmental Protection Agency could have prevented the Gold King Mine spill that has devastated the Navajo Nation.” Begaye says “we’ve lost trust in the EPA, whose response has been marked by a lack of transparency.” Now, he says “what we need is for the EPA to spend less time worrying about itself and more time focused on cleaning up the Animas and San Juan rivers.”

Empowering Native American Communities:

NATIVE HAWAIIANS VOTING ON DELEGATES FOR INDEPENDENT GOVERNMENT. The [ColorLines](#) (11/3) reports that polls have opened for a “30-day voting period” in which Native Hawaiians “will have the opportunity to elect delegates” for their “own government, independent of the United States.” According to the article, “the delegates will then meet for eight weeks this winter to draft a constitution that—if ratified by the people—will guide them toward self-governance, deciding everything from the structure to how it will interact with folks in Washington, D.C.”

INDIAN CHILD WELFARE ACT OF 1978 CRITICIZED. In an op-ed for [Newsweek](#) (11/3, 164K), Clint Bolick, a research fellow at the Hoover Institution, writes that the Indian Child Welfare Act of 1978 was “intended to protect the best interests of Indian children and the stability of Indian tribes by setting minimum federal standards for termination of parental rights, foster care and adoptions,” but “unfortunately, ICWA elevated the interests of tribes above those of individual children, and it weakened the protections of children that state laws provide.” He claims that as “long as ICWA stands, countless children will be left in abusive homes and prevented from or delayed in becoming part of a permanent loving homes.” By filing a class action lawsuit, Bolick hopes “to avoid the possibility that our case will be decided on narrow factual grounds, and instead secure a precedent that invalidates ICWA and the regime of subjecting children to adverse treatment because of the racial quantum of their blood.”

TRIBAL, RESERVATION SYSTEMS CRITICIZED. Letters to the [Wall Street Journal](#) (11/3, Subscription Publication, 6.23M) call for the end of the tribal and reservation systems and the abolishment of the BIA.

Tackling America’s Water Challenges:

BOR TREATS CYBERSECURITY AS HIGH PRIORITY. [Federal Computer Week](#) (11/2, 263K) reports that “after the Office of Personnel Management data breach, agencies embarked on a governmentwide cybersecurity sprint that produced measurable improvements in two-factor authentication and, more recently, a new cybersecurity strategy.” The BOR “offers a peek at how the sprint’s urgency has filtered down to smaller agencies.” Last month, the BOR “justified awarding three contracts in September without competition on the basis of ‘urgent and compelling’ cybersecurity needs.” According to BOR officials, “the contracts reflect the new federal reality of treating cybersecurity as an urgent, serious concern.”

CALIFORNIANS WEIGH BALLOT MEASURE THAT WOULD REQUIRE VOTER APPROVAL OF DELTA TUNNELS. The [Los Angeles Times](#) (10/30, Mcgreevy, 3.6M) reports that “Californians will act on a ballot measure next year that would require voter approval of many large public works projects, including Gov. Jerry Brown’s twin-tunnel plan to divert water south around the Sacramento-San Joaquin Delta.” The initiative would “require voter approval before the state could fund projects costing more than \$2 billion with revenue bonds, those repaid using receipts from projects they pay for rather than taxpayers in general.” Brown is “proposing such bonds for the \$15-billion twin-tunnel project to be repaid by water users.”

Meanwhile, the [Sacramento \(CA\) Bee](#) (11/3, 515K) reports that “with the future of the Sacramento-San Joaquin Delta approaching a critical stage, a group of Southern California water agencies is working to buy

four Delta islands, a move that has drawn accusations that the parcels could be used to orchestrate a south-state water grab.” The article notes that “the powerful Metropolitan Water District of Southern California and three water agencies in Kern County are working on a joint plan to buy the four agricultural islands, according to the head of the Rosedale-Rio Bravo Water Storage District in Bakersfield, one of the participants.” Eric Averett, general manager of the Rosedale district, said “the islands could be useful in forging ahead with the Delta tunnels project – officially known as California WaterFix.”

Securing America’s Energy Future:

Renewable Energy:

EXPERTS DEBATE SOLAR ENERGY’S ENVIRONMENTAL COSTS. In the “Room For Debate” section of the [New York Times](#) (11/3, Subscription Publication, 11.64M) opinion pages three energy experts examine “The Environmental Costs of Solar Energy.” [Janine Blaeloch](#) of the Western Lands Project makes the case that “the U.S. government is committed to a mistaken and damaging renewable-energy policy that promotes and heavily subsidizes industrial-scale solar and wind development on public lands.” However, environmental lawyer [Philip Warburg](#) writes that “if we’re serious about shifting America’s power base to renewable energy, we need to regard our open lands as a valued energy resource, not a no-go zone.” [Erica Brand](#) of Nature Conservancy believes “new tools and scientific planning allow us to prioritize where we put solar energy to create a successful blueprint for exploiting the sun” and that scientists, governments and industry “must consider nature upfront, in the early stages of planning.”

MONTANA WATER DISTRICT AIMS TO PRODUCE HYDROPOWER AT PUMP SITE. Drawing on reporting by the Helena Independent Record, the [AP](#) (11/3, 2.15M) reports that the Helena Valley Irrigation District “is looking to retrofit its existing pump plant at Canyon Ferry Dam to produce hydropower.” The BOR is accepting public comment on the environmental assessment of the 9.4-megawatt project, the AP adds.

Additional coverage was provided by the [Billings \(MT\) Gazette](#) (11/3, 200K), the [Washington \(DC\) Times](#) (11/3, 283K), the [Helena \(MT\) Independent Record](#) (11/3, 38K), and [KECI-TV Missoula \(MT\)](#) Missoula, MT (11/3, 1K).

ALTAMONT TO REPLACE TURBINES BLAMED FOR KILLING BIRDS. The [San Francisco Chronicle](#) (11/3, Subscription Publication, 3.44M) reports Altamont Winds Inc., “a wind farm company with out-of-date turbines that wildlife biologists blame for the deaths of scores of raptors on the Altamont Pass has agreed” that following “years of squawking from environmentalists and regulators to replace the bird-killing blades.” The company “closed down its turbines for the season, and wrote in a letter to the U.S. Fish & Wildlife Service that it had decided to ‘permanently shut down and cease operations’ of all 828 of the power generators.” Altamont “has applied with Alameda County for a permit to replace the old equipment with 33 larger, state-of-the-art turbines that kill far fewer birds.” The move was praised “by environmental organizations as a big victory in the battle to protect golden eagles and other raptors, thousands of which are pulverized every year by the spinning blades that are visible to drivers in the hills between Tracy and Livermore.”

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (11/3, 2.15M), the [Washington \(DC\) Times](#) (11/3, 283K), [KCRA-TV Sacramento \(CA\)](#) Sacramento, CA (11/3, 227K), and [KXMC-TV Minot \(ND\)](#) Minot, ND (11/3, 1K).

CRIT APPEALS TO OBAMA IN DISPUTE OVER SOLAR PROJECTS. The [Havasu \(AZ\) News-Herald](#) (11/3, 27K) reports that “representatives from the Colorado River Indian Tribes have sent a letter to President Obama, requesting immediate protection for lands threatened by development.” The tribes “protested the utility-scale Genesis Solar PV project on BLM land about 30 miles west of their tribal reservation, which was approved by the California Energy Commission five years ago.” According to CRIT, “the project unearthed approximately 3,000 sacred objects. CRIT’s cultural practice was to rebury those artifacts, but federal government officials required that those objects to be stored and studied.”

BANS ON WIND PROJECTS IN CALIFORNIA CRITICIZED. In an op-ed for the [Sacramento \(CA\) Bee](#) (11/3, 515K), Michael B. Gerrard, director of the Sabin Center for Climate Change Law at Columbia Law School, and Nancy Rader, executive director of the California Wind Energy Association, write that “wind energy projects are being banned or severely restricted in several California counties and, more significantly, across vast federal lands in the state.” They note that “under a draft plan from the federal Bureau of Land Management, 80

percent of the high-quality wind resources on remote federal lands in the vast deserts of Southern California would be permanently off-limits.” They argue that “bans on wind projects cannot be part of a responsible solution to the climate problem.”

NEW YORK URGED TO VETO OFFSHORE LNG TERMINAL IN FAVOR OF OFFSHORE WIND POWER.

For her blog at the [Switchboard](#) (11/3, 116K), Kit Kennedy urges New York to reject “an offshore LNG terminal, called the Port Ambrose project, in the same area proposed for an offshore wind power project.” She argue that “when there’s a conflict between clean energy and dirty fossil fuels, clean energy should always prevail.” According to Kennedy, “not only would the offshore wind power project eventually generate enough clean electricity to power 125,000 homes, and create more than 2,000 good jobs, it would improve grid reliability in the overstressed New York-Long Island area, because offshore wind power projects generate the most electricity when we need it most: on cold winter days and hot summer afternoons.”

Onshore Energy Development:

AGRICULTURE SECRETARY VILSACK RECOMMENDS CANCELING DRILLING LEASES ON SACRED LAND. The [AP](#) (11/3, 2.15M) reports that U.S. Agriculture Secretary Thomas Vilsack “has recommended the cancellation of long-suspended oil and gas drilling leases near Glacier National Park, federal officials disclosed Monday.” The 18 leases “are on land considered sacred to the Blackfoot Indian tribes of the United States and Canada.”

The [AP](#) (11/3, 118K) reports that “conservation groups are asking a judge to revive a lawsuit ahead of a U.S. government decision on whether to cancel long-suspended drilling leases on the Rocky Mountain Front.” According to the article, “the lawsuit filed by the National Wildlife Federation and others was terminated in 1997 after the government suspended the exploratory oil and gas leases owned by Solenex LLC in the Badger-Two Medicine area of the Helena National Forest.” EarthJustice attorney Timothy Preso said, “If they do anything other than cancel these leases, we want to be able to move ahead with our legal challenge.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (11/3, 283K), the [Missoulian \(MT\)](#) (11/3, 118K), the [Colorado Springs \(CO\) Gazette](#) (11/3, 150K), the [Flathead \(MT\) Beacon](#) (11/2, 15K), the [Great Falls \(MT\) Tribune](#) (11/2, 76K), the [Bozeman \(MT\) Daily Chronicle](#) (11/3, 54K), the [Great Falls \(MT\) Tribune](#) (11/2, 76K), [Montana Public Radio](#) (11/3), and [Truth-Out](#) (11/3, 8K).

HOUSE OVERSIGHT PANEL TO PROBE STREAM PROTECTION RULE. The [E&E Daily](#) (11/2, Subscription Publication) reports that “the House Oversight and Government Reform Committee will pick up the baton this week in Congress’ ongoing scrutiny of the Interior Department’s proposal to protect waterways from coal mining.” The House Natural Resources Committee has “long been the main venue of discussion for the Office of Surface Mining Reclamation and Enforcement’s stream protection rule.” However, “last week, the Senate Energy and Natural Resources Committee held a hearing scrutinizing the proposal’s potential impacts, and this week the Oversight Subcommittee on Interior will probe further.” The article notes that “the main issue will likely continue to be the significant divide between states and mining companies and environmental groups on the rule’s soundness and impact.”

Additional coverage was provided by [The Hill](#) (11/3, Cama, 654K) and [Politico](#) (11/2, Glueck, 1.19M).

Coal Industry Study Finds Stream Protection Rule Could Cost 78,000 Jobs. The [Bluefield \(WV\) Daily Telegraph](#) (11/3, 44K) reports that “Senate Republicans are challenging the number of coalfield jobs that could be lost as a result of implementing the Obama administration’s stream protection rule.” The Office of Surface Mining and Reclamation Enforcement “believes the rule would shed less than 300 jobs — most would be replaced.” But “a new study paid for by the coal industry’s lobbying group found upwards of 78,000 job could be lost in the coalfields if the rule is implemented.”

Additional coverage was provided by the [Beckley \(WV\) Register-Herald](#) (11/3, 70K).

SEN. MURKOWSKI CRITICIZES ENERGY POLICIES THAT RESTRICT DRILLING. The [E&E Daily](#) (11/2, Subscription Publication) reports that Sen. Lisa Murkowski “hammered the Obama administration over the weekend for energy policies she claimed threaten the nation’s security and jobs.” Murkowski said “the administration’s decisions ‘ignore the will of hard-working Alaskans’ by closing the door to new oil production needed to sustain the Trans-Alaska pipeline.” In the weekly Republican address to the nation, which aired Saturday, she said, “These decisions mean fewer jobs, less security for our country, and more of our dollars

going overseas. It is only a matter of time until the administration applies this shortsighted strategy to the rest of our nation.”

Additional coverage was provided by [World Oil](#) (11/2).

USGS REPORTS TWO EARTHQUAKES IN CENTRAL OKLAHOMA. The US Geological Survey, the [AP](#) (11/3, 283K) reports, “says two earthquakes struck central Oklahoma on Monday, including one with a 4.1 magnitude.” Originally, the USGS “reported the quake with a magnitude of 4.4, but revised it downward.” The quake “was recorded at 10:57 a.m. Monday 4 miles west of Langston.” The AP adds that “the Oklahoma Geological Survey has said it is likely that many recent earthquakes in the state have been triggered by the injection of wastewater from oil and natural gas drilling operations.”

CONGRESS URGED TO ALLOW OIL EXPORTS IN EXCHANGE FOR FLARING BAN. In a piece for [Forbes](#) (11/2, 7.28M), Jim Krane, the Wallace S. Wilson Fellow for Energy Studies at Rice University’s Baker Institute for Public Policy, argues that “Congress should allow US producers to export crude oil – as long as they capture and market the associated natural gas they produce, rather than waste it.” Kane says that “by predicating a lifting of the export ban on an end to flaring, the Obama administration would be in the enviable position of having it both ways: creating an immediate environmental benefit while supporting economic activity in the US oil sector.”

Offshore Energy Development:

BOEM DIRECTOR HOPPER TO ATTEND 2015 ATLANTIC ENERGY FORUM. The [Columbia \(SC\) State](#) (11/3, 322K) reports that the 2015 Atlantic Energy Forum will feature BOEM Director Abigail Ross Hopper “as well as other federal, state, and local public policy leaders, members of the business community, environmental organizations and key stakeholders that will discuss offshore energy development in the Atlantic and implications for South Carolina’s economy, jobs and environment.”

Additional coverage was provided by [WBT-AM Charlotte \(NC\)](#) Charlotte, NC (11/3, 4K) and [WOLO-TV Columbia \(SC\)](#) Columbia, SC (11/3).

JEFFERSON PARISH COUNCIL NEARS AGREEMENT ON BP SETTLEMENT MONEY. The [New Orleans Times-Picayune](#) (11/3, Samuels, 661K) reports that the Jefferson Parish Council is considering two separate but similar resolutions on what to do with the approximately \$35 million it received from the BP oil spill settlement. Councilman Paul Johnston said he would back either resolution, but that whichever one is approved, it should be passed with a 7-0 vote.

CONFERENCE PARTICIPANTS SEE AVENUES TO US-CUBA OIL DRILLING IN FUTURE. [USA Today](#) (11/3, Loveless, 5.56M) reports that participants of the recent conference in Havana say that US companies can “probably” still participate in Cuba’s plans to resume offshore oil drilling. Robert Muse, a Washington attorney and specialist in the legalities of US-Cuba trade, said that there is “tremendous presidential discretion under the embargo. ... [Obama] could license any imaginable export from the United States to Cuba.” Muse also said that the Commerce Department’s “Safe Seas, Clean Seas” policy announced in January appears to invite US companies to “seek approval for all sorts of activities in Cuba’s oil sector, including drilling for oil.”

America’s Great Outdoors:

Bureau of Land Management:

HOUSE SUBCOMMITTEE TO CONSIDER BILLS ON LOUISIANA PROPERTY DISPUTE, NEVADA WILDERNESS. The [E&E Daily](#) (11/2, Subscription Publication) reports that “this week, the House Natural Resources Subcommittee on Federal Lands will consider two bills – one aimed at conservation projects and wilderness areas in eastern Nevada and another to invalidate a Bureau of Land Management re-survey in Louisiana.” H.R. 3342 would “invalidate a 1960s BLM re-survey of land in northwestern Louisiana that has long been the object of dispute – and prevent further re-surveys of the land.” According to the legislation, the BLM had “told private landowners near Lake Bistineau that their properties “appear to be still vested in the United States” – in other words, on government property – according to a 1967 re-survey of land that had previously been mapped and titled based on an 1842 federal survey.” The bill “charges that BLM never notified potentially affected landowners after the re-survey was approved in 1969 and that the disputed 200 acres of

land contain more than 50 homes.”

BLM BEGINS LARGE OREGON WILD HORSE ROUNDUP. The [AP](#) (11/3, 2.15M) reports that “wild horse advocates are calling for a stop to one of the largest roundups of wild mustangs in Oregon history.” The BLM “on Monday began preparations to gather up to 1,500 wild horses roaming freely on about 625 square miles of the Beatys Butte herd management area east of Lakeview in southern Oregon.” The article notes that “wild horses are protected under federal law, and selling them for slaughter is illegal.” The BLM said it has taken additional steps to “prevent this type of situation from happening.”

Additional coverage was provided by the [Salem \(OR\) Statesman Journal](#) (11/2, 141K), the [Washington \(DC\) Times](#) (11/3, Wozniacka, 283K), and the [Oregonian](#) (11/3, 769K).

BIDDING TOPS \$6,500 FOR OLD, BATTERED WILD HORSE. The [Reno \(NV\) Gazette-Journal](#) (11/2, 194K) reports that “bidding has reached unprecedented heights for a battered old horse at the National Wild Horse and Burro Center at Palomino Valley, just north of Reno.” At the time of the article’s publication, “bidding for the 15-year-old stud stallion stands at \$6,530, based on 467 bids.” The online auction ends Tuesday morning.

COLORADO COUNTIES SEEK FUNDS FOR MAPPING SAGE GROUSE. The [Grand Junction \(CO\) Daily Sentinel](#) (11/3, 73K) reports that “a coalition of northwest Colorado counties is seeking a \$380,000 state Department of Local Affairs grant for more detailed mapping of greater sage-grouse in the region.” Associated Governments of Northwest Colorado “hopes to tap money that’s being made available through a new state law aimed at improving cooperation between the federal government and local communities on public lands issues.” The article notes that “the mapping push comes in response to the Bureau of Land Management’s recently finalized land-management plans for sage-grouse habitat in northwest Colorado and 10 other states.”

ADDITIONAL COVERAGE: PROBE SAYS BLM SOLD NEARLY 1,800 WILD HORSES FOR SLAUGHTER. Additional coverage of the report that says “the government’s largest sale of wild horses was to a rancher who sent almost 1,800 mustangs to slaughterhouses across the Mexican border and lied to federal officials” was provided by the [Washington Post](#) (11/3, Rein, 7.78M), the [Examiner](#) (11/3, 616K), and the [Natural News](#) (11/3, 78K).

BLM PRAISED FOR MANAGEMENT OF GRAND STAIRCASE-ESCALANTE NATIONAL MONUMENT. The [High Country \(CO\) News](#) (11/3, 74K) reprints a letter from Collin Smith, an aspiring geologist, to the BLM in Utah. Smith talks about his “first trip to Utah’s Grand Staircase-Escalante National Monument.” He praises the BLM for doing “a fantastic job making the monument a wonderland for a geologist-in-training such as myself.”

Fish and Wildlife Service:

HOUSE SET TO CLEAR GLOBAL ANTI-POACHING BILL. The [E&E Daily](#) (11/2, Subscription Publication) reports that the “Global Anti-Poaching Act” (H.R. 2494), “a popular bipartisan bill to curb wildlife trafficking is likely to clear the House this week.” The legislation would “name and shame countries involved in the illicit trade and provide increased assistance to nations attempting to fight it.” The article notes that “provisions to make the penalties for smuggling or selling endangered species and products made from them equivalent to the ones for weapons and drug trafficking are also included in the bill.”

ASIAN CARP FOUND 12 MILES CLOSER TO LAKE MICHIGAN. The [AP](#) (11/3, 2.15M) reports that “federal crews have discovered two Asian carp in the Illinois River, 12 miles closer to Lake Michigan than where others of that size previously were seen.” FWS “teams found two silver carp about 6 ½ inches long late last month in the river’s Marseilles Pool near Seneca, Illinois.” The article notes that “that means the leading edge of the river’s juvenile Asian carp population is about 66 miles closer to Lake Michigan than it was at the beginning of this year.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (11/3, 283K), the [Columbus \(OH\) Dispatch](#) (11/2, 518K), [USA Today](#) (11/2, Spangler, 5.56M), the [Christian Science Monitor](#) (11/2, 496K), [UPI](#) (11/2), [WWJ-TV Detroit \(MI\)](#) Detroit (11/2, 34K), [WPBN-TV Traverse City \(MI\)](#) Traverse City, MI (11/3, 14K), and [WOOD-TV Grand Rapids \(MI\)](#) Grand Rapids, MI (11/2, 129K).

FWS REVIEWING EASTERN MASSASAUGA RATTLESNAKE. The [Detroit Free Press](#) (11/2, 921K) reports that the FWS “last month recommended” that the Eastern Massasauga rattlesnake be “moved to the threatened species list, starting a review that will take as long as a year.” The decline in their population has

been “spurred by both habitat loss and the fact that people fear them, said Jennifer Moore, professor of biology at Grand Valley State University.”

Additional coverage was provided by the [Lansing \(MI\) State Journal](#) (11/2, 238K) and the [Livingston County \(MI\) Daily Press & Argus](#) (11/2, 4K).

CONTINUING COVERAGE OF NEW MEXICO JEWELRY STORE RAIDS. [KOB-TV](#) Albuquerque, NM (11/3, 78K) reports that “a newly-unsealed search warrant related to the federal raids of several New Mexico jewelry shops that were allegedly selling fake Native American goods shows federal agents have pursued the case for the last three years.” According to the article, “the warrants also show how investigators followed the money to prove how the stores sold jewelry claiming to be Native American, which actually came from the Philippines.” The warrants “include picture proof from the US Fish and Wildlife Service that outlined their evidence.”

RESEARCHERS FIND BATS INFECTED WITH WHITE-NOSE SYNDROME IN CHINA. [Science Daily](#) (11/3, 59K) reports that “bats in northeast China are infected with the fungus that causes white-nose syndrome,” according to a team of American and Chinese researchers. As a result of the new findings, Marm Kilpatrick, associate professor of ecology and evolutionary biology at UC Santa Cruz., and Winifred Frick, who lead several research projects on white-nose syndrome at UC Santa Cruz, have received funding from the FWS “to study the dynamics of the disease in China.”

PLAN CALLS FOR KILLING BARRED OWLS TO TRY TO SAVE ENDANGERED SPOTTED OWLS. The [Yakima \(WA\) Herald-Republic](#) (11/3, 91K) reports that “federal and state wildlife agencies had frequently killed members of one animal species on behalf of another, but none of the National Environmental Policy Act processes leading to those campaigns had included an ethics review.” The article analyzes the decision to kill “3,600 barred owls in four carefully chosen areas known to be home to previously healthy populations of spotted owls — one in the wooded slopes around Cle Elum — to see if the spotted owls would rebound.”

Additional coverage was provided by the [Yakima \(WA\) Herald-Republic](#) (11/3, 91K).

WASHINGTON STATE WEIGHS MEASURE TO COMBAT ANIMAL TRAFFICKING. The [Greenwire](#) (11/2, Subscription Publication) reports that Washington state will vote Tuesday “on whether to approve the broadest restrictions on endangered species trafficking of any state to date.” According to the article, “the first such ballot initiative anywhere in the country, I-1401 would establish sentences of up to five years in prison for anyone convicted of trading in animal products, including those from tigers, lions, sea turtles, elephants and rhinoceroses.” Proponents say that the measure, “backed and funded by Microsoft co-founder Paul Allen, would help crack down on the smuggling of animal parts that occurs in the state’s major ports.”

RECOVERY PLAN RELEASED FOR SNAKE RIVER FALL CHINOOK SALMON. [E&E Publishing](#) (11/2, 705) reports that the National Marine Fisheries Service “released a recovery plan today for Snake River fall Chinook salmon that suggests re-establishing a long-gone population to increase the fish’s chance of survival.” According to the article, “the draft plan details several options for rebuilding the population of salmon that spawn in the main stem of Snake River and its major tributaries.” The plan “emphasized that recovery is ‘very possible’ with one population,” but “a second population above Hells Canyon Dam would ‘safeguard against further decline.’”

JUDGE TO HEAR ARGUMENTS OVER FISH PASSAGE AT CONOWINGO DAM. The [Seven Valleys \(PA\) Bay Journal](#) (11/3, 146K) reports that “Exelon Corp. has taken the unusual step of requesting a ‘trial-type hearing’ to challenge recommendations made by federal biologists who are calling for a massive upgrade to fish passage operations at its Conowingo Dam.” According to the article, “the request is in response to a ‘preliminary prescription’ from the U.S. Department of Interior in August.”

ADDITIONAL COVERAGE: NEW STUDY FINDS YELLOWSTONE GRIZZLY BEARS THRIVING. Additional coverage of the new study that found that “grizzly bears in Yellowstone National Park area saw unprecedented growth this year” was provided by the [Christian Science Monitor](#) (11/2, 496K).

AUDOBON SOCIETY COMMITTED TO GREATER SAGE-GROUSE PLAN. For the [Audubon Society](#) (11/2, 1.65M), David Yarnold notes that “when the U.S. Fish and Wildlife Service recently made a major announcement about its decision not to list the Greater Sage-Grouse under the Endangered Species Act, Audubon’s Brian Rutledge was the only representative from a national conservation organization on the stage with Interior Secretary Sally Jewell.” According to Yarnold, “that’s because Brian pioneered the win-win

formula that will lock in new protective management plans on 60 million acres of public land across the West.” Yarnold vows that Audubon will “continue to play a central, pivotal role in ensuring this plan’s future success.”

ELIMINATION OF FURBEARER TRAPPING URGED. For “The Blog” of the [Huffington Post](#) (11/3, Eisenberg, 251K), Cristina Eisenberg, an ecologist, writes that In 2013, three environmental groups filed “a lawsuit to protect lynx in Montana and uphold the ESA.” The lawsuit “focused on unintentional lynx capture in traps set for other furbearers.” According to Eisenberg, “the Montana-aimed lynx lawsuit established powerful case law for large carnivores threatened by furbearer trapping.” While “other states that allow furbearer trapping are more proactively self-regulating to avoid litigation,” she argues that “the most sensible and ethical solution would be for our society to eliminate furbearer trapping entirely, the way we banned slavery. “

National Park Service:

NEW MEXICO STATE PARKS ANNOUNCE PARTNERSHIP WITH “EVERY KID IN A PARK” PROGRAM. The [Sangre De Cristo \(NM\) Chronicle](#) (11/3, 8K) reports that New Mexico State Parks has “announced a plan to provide every fourth grader with a day pass, which will allow them to explore 11 New Mexico state parks for free.” The article notes that “the partnership with the U.S. Department of the Interior and the U.S. Army Corp of Engineers is part of the Every Kid in a Park program, which encourages kids and their families to explore the outdoors.”

Grant Benefits St. John Students. The [Virgin Islands Daily News](#) (11/3, 333) reports that “St. John students learned about environmental services and native wildlife as they snorkeled and kayaked through the mangrove ecosystem on Wednesday during the first in a series of field trips to the Virgin Islands Coral Reef National Monument with the National Park Service.” The St. John division of the NPS “received an \$8,000 grant from the National Park Foundation as part of President Barack Obama’s ‘Every Kid in a Park’ initiative, which is aimed at getting every fourth-grader to visit a national park this year, according to National Park Service ranger Laurel Brannick.”

AD PROMOTES NPS CENTENNIAL. The [Reading \(PA\) Eagle](#) (11/3, 160K) reports that “Richard Nickel and four others were chosen to promote the 100th anniversary of the National Park Service in 2016.”

NPS RELEASES MANAGEMENT PLAN FOR GRAND TETON CORRIDOR. [E&E Publishing](#) (10/30, 705) reports that the NPS has “released a long-awaited management plan for a popular and scenic corridor within Grand Teton National Park to address increased vehicle traffic and growing human-bear interactions.” The NPS “this week released a nearly 700-page draft comprehensive management plan and draft environmental impact statement (EIS) for the Moose-Wilson corridor that, among other things, proposes ‘limiting the number of vehicles entering the corridor at any one time during peak use periods using timed sequencing techniques.’”

NPS REMOVES OCEAN BEACH TRASH CANS IN EFFORT TO REDUCE LITTER. The [SFist](#) (11/2, 124K) reports that the NPS has “removed a series of garbage cans along the Ocean Beach promenade with the intended goal of reducing litter.” The agency, “which manages the popular stretch of Ocean Beach, believes that the previously existing trash cans encouraged beach-goers to leave behind their garbage, and that by removing the cans people will be inclined to pack out what they have packed in.” The NPS has “posted signs calling the removal of the trash cans an experiment, but has not provided details as to when the experiment will end.”

OJIBWE WANT MADELINE ISLAND ON NATIONAL REGISTER OF HISTORIC PLACES. The [Indian Country Today Media Network](#) (11/2, 47K) reports that “the Ojibwe of the broad Lake Superior region don’t need a federal designation to verify to them the cultural, spiritual and historical importance of the Lake Superior island called Mooningwanekaaning, the Place of the Golden-Breasted Flicker Woodpecker.” However, “several Ojibwe bands, with help from the U.S. Army Corps of Engineers...hope that gaining nomination, and perhaps ultimately a listing, on the National Register of Historic Places will help protect Madeline Island.”

US Geological Survey:

USGS USING MONITORING SYSTEM TO PREDICT LANDSLIDES. [KPIX-TV](#) San Francisco (11/2, 89K) reports that “high above the hills of Marin County, U.S. Geological Survey geologist Jonathan Stock is installing a new transmitter.” According to the article, “it is one of four landslide monitoring stations the USGS maintains in the Bay Area’s slide ‘hot zones.’” The article notes that “this winter could be see a lot of landslides

with the largest El Niño California has seen in over 50 years on its way.”

RESEARCHERS SAY EARTHQUAKE WARNING SYSTEM COULD PROVIDE CRUCIAL HEADS-UP. The [Washington Post](#) (11/3, Niiler, 7.78M) reports that “the United States has avoided the strongest temblors in recent years, but West Coast residents and earthquake scientists continue to worry about ‘the big one’ there.” Now, “researchers say that with a combination of ground sensors and satellite-based instruments, they are getting closer to giving people a crucial minute or two of warning, though they acknowledge that predicting exactly where and when an earthquake will strike remains an elusive goal.”

Top National News:

OBAMA TAKES PUSH FOR CRIMINAL JUSTICE REFORM TO NEWARK. President Obama’s appearance in Newark, New Jersey to address criminal justice reform received generally sympathetic coverage, noting that Obama has made the issue a key agenda point in his final years in office and that some sort of reform has bipartisan support. ABC had just a brief report Monday evening and CBS none at all, but NBC devoted five minutes to an interview with Obama, in which the President went into great detail about his motives for seeking reform. A secondary story is Gov. Chris Christie’s own event on law enforcement in Camden on Monday, which is being portrayed as an intentional contrast to Obama’s events in Newark. The New Jersey governor criticized Obama’s crime policies, and the White House said Christie’s remarks are those of a desperate and fading presidential candidate – a narrative that the coverage essentially agrees with.

[ABC World News](#) (11/2, story 7, 0:30, Muir, 5.84M) briefly reported that the President “gave a push to give former prison inmates a second chance,” touring “a drug rehab facility in Newark. He wants to make it easier for them to receive training, find jobs and housing.” The [AP](#) (11/2, Lederman, Colvin, 996K) reports the President “toured a drug rehab and met with former inmates” in “rough-and-tumble” Newark, “calling on the nation to ensure those regaining their freedom get a second chance instead of a return ticket to prison.” Speaking at the Rutgers law school, Obama said, “There are people who have gone through tough times, they’ve made mistakes, but with a little bit of help, they can get on the right path.”

The [New York Times](#) (11/2, Baker, Subscription Publication, 11.64M) says the President, accompanied by Sen. Cory Booker and Newark Mayor Ras Baraka, visited Integrity House “to highlight efforts to ease the re-entry of offenders leaving prison.” [Reuters](#) (11/3, Mason) says the President has made criminal justice reform a priority for the final stretch of his term.

The [Newark \(NJ\) Star-Ledger](#) (11/3, Salant, 785K) reports the President, addressing a crowd of more than 200, announced several initiatives, “including naming Newark one of five new municipalities that will work with local colleges and employers to offer job training and placement for former prisoners” and programs “to help juveniles seal criminal records and to improve the chances of former prisoners to get government jobs.” The [Bergen \(NJ\) Record](#) (11/3, Rizzo) reports the President “said too many employers dismiss applicants because they’ve checked a box stating they have a criminal history.”

[USA Today](#) (11/3, Korte, 5.56M) says it is “unclear how many federal agencies would be affected” by Obama’s directing agencies to “ban the box.” Many “already delay asking about criminal history until later in the hiring process, but Obama is directing the Office of Personnel Management to issue guidance making that practice universal” across the government. Civil rights groups “applauded the move, many had hoped for an even more sweeping executive order” that would have required federal contractors to make the same commitment. [Slate](#) (11/2, Neyfakh, 1.24M) reports under the headline “Barack Obama Takes Executive Action To ‘Ban The Box.’”

The [New York Daily News](#) (11/3, Joseph, 3.59M) says the Newark trip “is the latest public effort by Obama to try to bring attention – and reform – to the criminal justice system.” The [Washington Times](#) (11/3, Boyer, 283K) says the issue “holds a rare chance of bipartisan cooperation,” and [The Blaze](#) (11/2, Lucas, 1.89M) says the President “cited several prominent businesses, including Koch Industries,” as examples of those that have banned the box.

On its website, [Al Jazeera America](#) (11/3, 138K) calls the speech Obama’s “broadest push for criminal justice reform.” [Bustle](#) (11/3, Barbato, 1.62M) writes, “It only took about seven years, but the president finally made it to Newark.” [New Jersey Local News](#) (11/2, Wilchert, 785K) also reports on the event.

In an analysis, the [AP](#) (11/3, Hennessey) writes that “in the national conversation about crime and punishment,

Obama hasn't been afraid to identify with the people being policed, as well as with the police," in "a remarkable shift in tone after decades of politicians worrying more about being labeled soft on crime than too hard on criminals." He has discussed his own youthful drug use and his concerns as a father of teenagers, and has "told stories of being pulled over for speeding – and not always deserving the ticket." Sentencing Project Executive Director Marc Mauer said, "He's the first African-American president and his life experiences are different than others. He's lived it – directly or indirectly – more than other presidents have."

In his interview with [NBC Nightly News](#) (11/2, story 6, 5:00, Holt, 7.86M), the President said, "Pretty much up and down the line what we see is disparities in how white, black, Hispanic suspects are treated. Higher arrest rates, tougher sentencing, longer sentences. Where it is happening, you can't always isolate within the system. There may be several biases that take place. There may be predispositions that end up resulting in these disparities but we know they are happening."

However, [Politico](#) (11/2, Wheaton, 1.19M) wrote that Obama "is hoping there's no Willie Horton among the 6,000 inmates he just released early from federal prison." While "reducing the prison population is a key part of Obama's push for criminal justice reform in his last year as president," the "infamous Willie Horton ad" of the 1988 presidential campaign is "on the minds of activists on both sides." But those being released "are not first degree murderers – they're low-level drug offenders, and almost a third are immigrants just headed for a different type of pre-deportation detention." Still, those opposed to Obama's action "are already looking for the next Horton."

Obama Says Reform Does Not Mean Not Punishing Violent Criminals. [NBC Nightly News](#) (11/2, story 6, 5:00, Holt, 7.86M) ran a five-minute interview with Obama on criminal justice reform. The President said, "Nobody is talking about no jail in all circumstances. The question is just how do we go through the various levels of the criminal justice system and tailor it so we are getting the best results, which is safe streets and a reduce incarceration that results in us as a society spending \$80 billion a year. And some of it is necessary. ... If you have violent criminals out there, they need to be incapacitated and taken off the streets."

Christie Criticizes Obama, Saying He Is Taking Credit For Others' Achievements. The [AP](#) (11/3, Colvin) reports that Christie, who made an appearance at Camden County Police Headquarters on Monday, accused the President "of trying to take credit for criminal justice reforms that Christie put into place." Christie said, "I think it's wonderful for the President to come to New Jersey and acknowledge the work that's been done in New Jersey by leaders of New Jersey." He later told the AP, "I think for the President to come and you know try to take a victory lap here is beneath him. But it's his call."

The [Washington Post](#) (11/3, Nakamura, 7.78M) says the last time both men were in New Jersey at the same time, they "merrily strolled the boardwalk in Asbury Park and even played an arcade game." But "with Christie desperate to rejuvenate a moribund 2016 presidential campaign, Obama has become a convenient political foil, never mind that three years ago they had forged an unlikely cross-party alliance to respond to the devastation of Hurricane Sandy." [Politicker \(NJ\)](#) (11/2, Aregood, 843) reports Christie said, "I think I have a history of welcoming the president of the United States here, a well-documented one. But that doesn't mean I can't disagree with him when he's wrong and I believe he's wrong, and it is nice of him to show up on the law enforcement issue. He really hasn't much."

The [Philadelphia Inquirer](#) (11/2, Hanna, 641K) says Christie pledged "to stand with law enforcement while pushing his campaign-trail accusations that President Obama – who was in New Jersey to address criminal justice reform – has failed to support police." The [Burlington County \(NJ\) Times](#) (11/2, Levinsky, 52K) reports Christie designated November 5 Law Enforcement Appreciation Day in the state, saying, "It's important for the state to recognize and acknowledge the great sacrifice and contribution all of you are making and as governor I want to help to lead that effort."

The White House said in response that Christie was trying to use the issue to benefit his presidential campaign. The [Wall Street Journal](#) (11/3, Haddon, Subscription Publication, 6.23M) reports White House Press Secretary Josh Earnest said the remarks were not surprising for "somebody whose poll numbers are closer to an asterisk than they are double digits," a remark also quoted by the [New York Daily News](#) (11/3, Edelman, 3.59M) and [The Hill](#) (11/2, Fabian, 654K). The [Washington Times](#) (11/3, Boyer, 283K) reports Earnest said, "Clearly this is part of his strategy to turn this [campaign] around. We'll see how that works out."

OBAMA MOCKS GOP IN COMMENTS AT BROADWAY DNC FUNDRAISER. The [AP](#) (11/3, Lederman) says President Obama offered "a solo comedy act roasting the Republican Party" at a Democratic National

Committee fundraiser at Broadway's Richard Rodgers Theatre. The President set aside "his typical fundraiser spiel" and "left a crowd of more than 1,300 in stitches" with his remarks about the GOP and its presidential candidates in particular. [Bloomberg Politics](#) (11/3, Wingfield, Banks, 303K) reports Obama said, "Unemployment and uninsured rates were up and we were hopelessly addicted to foreign oil and bin Laden was still on the loose. This apparently was the golden age that I messed up."

[Reuters](#) (11/3, Mason) reports the President also joked that the GOP presidential contenders say they could face down Russian President Vladimir Putin, "and then it turns out they can't handle a bunch of CNBC moderators." The [Washington Post](#) (11/3, Nakamura, 7.78M) reports the President continued, "If you can't handle those guys then I don't think the Chinese and the Russians are going to be too worried about it." The Post calls Obama's remarks "some of his most barbed comments to date" about the presidential race, and said he "appeared to relish poking fun at his rivals."

The [Huffington Post](#) (11/3, Fang, 251K) reports the President also "took specific aim at climate-change deniers," calling the time Sen. Jim Inhofe "brought a snowball onto the Senate floor to attempt to disprove the existence of climate change 'cray.'"

[Variety](#) (11/3, Johnson, 535K) says the fundraiser "was tied to a performance of 'Hamilton,' the hit Broadway musical that is a hip-hop take on the life of Alexander Hamilton and has won praise from many D.C. politicians." The President said of the show, "Michelle and I love this show. It also happens to be the only thing Dick Cheney and I agree on...that is a cultural landmark."

[Politico](#) (11/2, Trudo, 1.19M) says Obama "made jokes ranging from climate change to the recently defeated New York Mets, but it was his joke about the last GOP presidential debate...that made the most impact." The [New York Times](#) (11/3, Baker, Subscription Publication, 11.64M) says the President "was in campaign mode even though he is not running." The [Washington Times](#) (11/3, Boyer, 283K) also covers the President's remarks.

WPost's Milbank, Robinson Blast GOP Candidates Over Debate Criticism. In his [Washington Post](#) (11/3, Milbank, 7.78M) column, Dana Milbank mocks the GOP campaigns over their complaints about the CNBC-hosted debate and the campaigns' proposed "requirements for future debate moderators." Milbank sarcastically offers a list of promises that he'll adhere to if he is chosen to moderate the next debate, writing, for example, "Candidates will be seated in Barcaloungers. If candidates feel overheated, the moderator will fan them while they answer and provide them with their choice of lemon or cucumber ice water."

In his [Washington Post](#) (11/3, Robinson, 7.78M), Eugene Robinson also criticizes the Republican candidates over their outcry about the CNBC debate moderators, writing that the GOP "is in chaos and the candidates, led by Trump and [Ben] Carson, are driving the bus. We'll face down Vladimir Putin and the leaders of Iran, the contenders all say, but somebody save us from reporters asking rude questions."

McGurn: CNBC Debate Showed Viewers That Republicans' Claims Of Media Bias Are True. In his [Wall Street Journal](#) (11/3, McGurn, Subscription Publication, 6.23M) column, William McGurn says that Republicans have long complained that the mainstream media is biased against their party and candidates, and that last week's CNBC-hosted debate showed the millions of viewers that tuned into the event that the Republicans' claims are true.

Trump To Negotiate Debate Changes Directly With TV Networks. On [ABC World News](#) (11/2, story 6, 2:20, Muir, 5.84M), Tom Llamas reported, "Tonight, as many of the Republican presidential candidates unite, hoping to take control of future debates, Donald Trump says he'll negotiate for himself." Trump was shown saying, "The networks are making a fortune with the debates. We should be like a basketball player. We should go on strike and say, 'We want money for Wounded Warriors, or we want money for a great charity.'" Llamas added, "Trump isn't signing a letter many other campaigns plan to send to television networks. An early draft including demands for at least 30 seconds of opening and closing statements. No 'gotcha' lightning rounds. And no show-of-hands questions."

The [Washington Post](#) (11/3, Costa, Weigel, Farhi, 7.78M) reports, "The format and content of upcoming debates became increasingly uncertain on Monday after...Trump's campaign said" he "would negotiate his terms directly with television executives instead of as part of a joint effort with his rivals. The move by Trump, coming just hours after his and other campaigns" met "to craft a three-page letter of possible demands, thwarts an effort to find consensus after what most candidates agreed was a debacle hosted by CNBC last week."

Trump Jabs At Rubio While Discussing Proposed Debate Changes. [Bloomberg Politics](#) (11/2, Breitman, 303K) reported that during a Monday interview with Bloomberg Politics' "With All Due Respect," Trump jabbed at Sen. Marco Rubio while talking about "proposed changes to the party's presidential debates...saying he hoped the debate venues would be better air conditioned in the future. '[Rubio] is the one that sweats the most,' Trump said," adding, "He's the youngest but I have never seen any human being sweat like that." Bloomberg Politics added that Trump "repeatedly jabbed at Rubio, calling him 'highly overrated.'"

Trump: DNC's Wasserman Schultz "Crazy" And "Highly Neurotic." [Politico](#) (11/2, Gass, 1.19M) reported that during a Monday appearance on Sirius XM's "Breitbart News Daily," Trump said that DNC chief Debbie Wasserman Schultz "is a 'crazy,' 'highly neurotic woman' but" she "negotiated a great deal" for Democratic debates." In response to a question about "whether he or" RNC chief Reince Priebus "would do a better job hammering out a television deal for debates," Trump said, "Well, I'm not allowed to say that, OK? But I can tell you [Priebus is] a very good guy." Turning his focus to the Democrats, Trump "said, '[y]ou have this crazy Wasserman Schultz — Deborah Wasserman Schultz — who is in there, a highly neurotic woman.'" Trump added, "This is a woman that is a terrible person," but "in all fairness, she negotiated a great deal for Hillary [Clinton] because they gave Hillary all softballs" during the first Democratic presidential debate.

WHITE HOUSE: OBAMA WILL MAKE KEYSTONE DECISION BEFORE LEAVING OFFICE. [Reuters](#) (11/2) reports the White House said Monday that the President will make a decision on whether to grant a permit to TransCanada to build the Keystone XL pipeline before he leaves office. "Our expectation at this point is that the president will make a decision before the end of his administration on the Keystone pipeline, but when exactly that will be, I don't know at this point," White House spokesman Josh Earnest told reporters. Asked whether the decision could come this year, Earnest said, "It's possible. It's also possible it could happen next year."

TransCanada Requests US Suspend Permit Application. The [Wall Street Journal](#) (11/3, A6, Harder, Subscription Publication, 6.23M) reports TransCanada on Monday asked the State Department to suspend its permit application. "In order to allow time for certainty regarding the Nebraska route, TransCanada requests that the State Department pause in its review of the Presidential Permit application for Keystone XL," the company said in the request. "This will allow a decision on the Permit to be made later based on certainty with respect to the route of the pipeline."

The [Washington Post](#) (11/3, Eilperin, 7.78M) notes that the Nebraska Public Service Commission is "reviewing the pipeline's route in the state, after residents there challenged the state's approval process for the project," and the company argued that it would be "appropriate" to delay any federal decision until the Nebraska route is settled.

The [New York Times](#) (11/3, Davis, Subscription Publication, 11.64M) says a delay "would be almost certain to put off a final decision on the pipeline until Mr. Obama left office, making it likely that the pipeline would be a hotly debated topic in the 2016 presidential race." The [Washington Times](#) (11/3, Wolfgang, 283K) similarly says the move "raises a real possibility Mr. Obama will not be the one to make a decision on the pipeline and that the next president, perhaps one more inclined to back new oil-and-gas infrastructure in the US, will be the final arbiter." Environmental groups, [USA Today](#) (11/3, Dorell, 5.56M) reports, "cheered" the announcement and urged the President "to kill the project for good."

Editorial Wrap-Up:

NEW YORK TIMES. "The Scare Tactics Of Turkey's President Erdogan Pay Off." A [New York Times](#) (11/3, Subscription Publication, 11.64M) editorial says in a "chilling taste of what may be coming, on the day after Turkey's election Turkish police officers raided a weekly magazine charged with 'insulting the Turkish president,'" and the editor was detained and distribution was halted. The Times says the "question now is whether" Turkish President Recep Tayyip Erdogan "will use his office to ensure the survival of democracy."

"Support Houston's Equal Rights Ordinance." The [New York Times](#) (11/3, Subscription Publication, 11.64M) editorializes that Houston voters will be asked today "if they want to keep or repeal the city's strong and enlightened equal rights ordinance, which was approved by the City Council last year and put on hold pending this week's vote." Opponents of the law "have perversely turned a broad, sensible measure that protects people from discrimination in employment, city services, housing and public accommodations, among

other things, into a debate about sexual predators in women's restrooms." The Times argues that Houston residents "should not succumb to that ugly fearmongering," and it contends that "those who vote 'yes' to retaining the ordinance will be affirming the city's most valuable asset: its longstanding culture of inclusiveness."

"G.O.P.: Save Your Candidates From Themselves." The [New York Times](#) (11/3, Board, Subscription Publication, 11.64M) editorializes against the effort by Republican presidential candidates to change the arrangement of debates, alleging that they are seeking to avoid difficult questions, and that they objected to being "asked to explain a policy proposal or past action that's of legitimate concern to voters." [It's time for the Obama administration to come clean on potential national monument](#)

By Greg Walden
For the Capital Press

We don't need a presidential declaration locking up more of our public lands and choking our local ranch economy.

We've seen this movie before. A lame duck president uses the Antiquities Act to declare huge swaths of public lands off limits so he can have an environmental legacy. Right up until the night before he declared the Grand Staircase Escalante a national monument, the Clinton White House told the Utah congressional delegation no such plans were in the works. And in his final month in office, President Clinton declared seven national monuments.

I fear the Obama administration — urged on by outside interests groups and wealthy corporations seeking a marketing niche — is up to the same "dark-of-night" declaration on the Owyhee River canyon in Eastern Oregon.

Last Thursday night, in Adrian (population 177), more than 500 people turned out to a public meeting organized by state Rep. Cliff Bentz to voice their deep concerns about this possibility. Extra chairs had to be brought in to the local gymnasium, and people were still standing in the aisles.

One person who wasn't there? Secretary of the Interior Sally Jewell. Although I called on her or a senior representative to attend the meeting, no senior members of the administration attended.

If they had, they would have heard a message loud and clear: Residents of Eastern Oregon don't want another "Washington, D.C. knows best" federal designation that would further destroy our way of life.

Yet, despite this public outcry, I believe the administration is playing hide the ball from the public. The Obama administration needs to come clean about what it has planned for these millions of acres of land in Eastern Oregon.

Those of us familiar with Eastern Oregon know that the Owyhee River canyon in Malheur County is home to some of the most beautiful landscapes in the country. We also know that these lands are an important part of the economic base for Malheur County, which generates more than \$370 million annually in agriculture business according to Oregon State University, of which \$134 million comes from cattle.

The Bureau of Land Management and other federal agencies manage 4.5 million acres, or 73 percent of the land in the county, making public lands grazing an integral part of most local family ranch operations, many of whom have cared for this high desert country since the 1860s. For generations, these local families have been good stewards of the lands. They've worked cooperatively and collaboratively with federal agencies to manage these lands with an eye towards the long-term viability of the range and their family's livelihood.

Much like thinning an overstocked forest, grazing helps reduce the amount of fuel available to large rangeland fires that threaten watersheds and sage grouse habitat in the arid climates of southeastern Oregon. When fires do start, the volunteers in the Rural Fire Protection Association are positioned to respond promptly and are highly effective, thanks to their intimate knowledge of local terrain and weather.

Over the years, these ranchers have developed springs and other water sources that have supported their cattle, but also countless numbers of wildlife that share the range. The latter benefit has been particularly valuable during recent droughts.

In towns like Adrian and Jordan Valley, ranching is the base of the community. Whether through hiring employees, or buying needed supplies for the ranch or their family, they are injecting money into the local community.

A monument designation larger than the states of Rhode Island and Connecticut would greatly restrict or eliminate grazing and other productive uses of the land. It will shake the foundation of these communities and cause harmful economic impacts to the county and the surrounding region.

I've worked with my colleagues in the House to include language in the funding bill for the Department of Interior prohibiting the creation of this national monument. Our farmers, ranchers and rural communities are most affected by the decisions made on public lands. I will continue to work to return the focus on locally driven management efforts, and stop these unilateral actions that lock up our public lands and negatively impact our communities.

The Obama administration has done enough damage to the West through their overzealous regulations. We don't need a presidential declaration locking up more of our public lands and choking our local ranch economy.

U.S. Rep. Greg Walden represents Oregon's Second Congressional District, which covers 20 counties in Southern, Central and Eastern Oregon.

Members of Oregon's congressional delegation are weighing in on a proposal to set aside 2.5 million acres of Malheur County through national monument or wilderness designations. Other Eastern Oregon counties are also supporting Malheur County residents in their opposition to the plan.

ADRIAN, Ore. — Rep. Greg Walden, R-Ore., has asked Department of Interior Secretary Sally Jewell to formally outline where the federal government stands on a proposal to designate 2.5 million acres in Malheur County as a national monument or wilderness area.

The Owyhee Canyonlands Conservation Proposal, which would impact about 33 percent of the county's total grazing land, is strongly opposed by the county's ranchers and farmers.

Walden hopes to receive a response to that Oct. 28 request soon and will keep pushing until he gets one, said Andrew Malcolm, Walden's communications director.

"We want them to make clear what their intentions are on this proposal," he said.

In his letter to Jewell, Walden said locking up that much land, which is equal to 43 percent of the county, is "understandably concerning to local communities."

"These hard-working local residents deserve to know where the federal government stands on the proposal that would affect their daily lives far beyond anyone else's," Walden stated.

He also said the proposal could harm agriculture, which "provides the economic base for Malheur County."

Agriculture generates \$370 million annually in farm-gate receipts in the county, and \$134 million of that total comes from the livestock industry.

Because the U.S. Bureau of Land Management and other federal agencies manage 73 percent of the county's lands, "public lands grazing (is) an integral part of most local family ranch operations," Walden stated. "Greatly restricting use of that land through a monument designation could have disastrous economic impacts to the county and the surrounding region."

Walden told Jewell that "it's very important that you ... outline formally to Malheur County (residents) where the DOI stands on this proposal...."

Oregon Sens. Ron Wyden and Jeff Merkley, both Democrats, have also weighed in on the issue and, in a joint statement, said any proposal needs to protect ranching families as well as other existing rights in the area.

"Malheur County has been home to ranch families for generations," their Oct. 29 letter states. "We want to ensure that agriculture, ranching and other uses of this landscape continue into Oregon's future."

Five other Eastern Oregon counties also support Malheur County in its opposition to the proposal.

A Harney County Court resolution opposing the plan said it could reduce ranching operations in

Southeastern Oregon, "as the majority of ranches are tied to federal grazing."

The proposal is being spearheaded by the Oregon Natural Desert Association and the group's executive director, Brent Fenty, said the plan's supporters would be happy to work with Malheur County residents to help craft a proposal palatable to both sides.

"We're certainly ready and willing to have those conversations," he said.

According to Fenty, 100 Oregon businesses have signed letters urging Wyden to support the proposal and more than 10,500 petition signatures favoring the plan have been collected.

Fenty said proposal proponents support congressional action to approve the plan but opponents say they anticipate supporters will ask President Barack Obama to use his powers under the Antiquities Act to designate the land as a national monument or wilderness area.

Members of Oregon's congressional delegation are weighing in on a proposal to set aside 2.5 million acres of Malheur County through national monument or wildernes designations. Other Eastern Oregon counties are also supporting Malheur County residents in their opposition to the plan.

ADRIAN, Ore. — Rep. Greg Walden, R-Ore., has asked Department of Interior Secretary Sally Jewell to

formally outline where the federal government stands on a proposal to designate 2.5 million acres in Malheur County as a national monument or wilderness area.

The Owyhee Canyonlands Conservation Proposal, which would impact about 33 percent of the county's total grazing land, is strongly opposed by the county's ranchers and farmers.

Walden hopes to receive a response to that Oct. 28 request soon and will keep pushing until he gets one, said Andrew Malcolm, Walden's communications director.

"We want them to make clear what their intentions are on this proposal," he said.

In his letter to Jewell, Walden said locking up that much land, which is equal to 43 percent of the county, is "understandably concerning to local communities."

"These hard-working local residents deserve to know where the federal government stands on the proposal that would affect their daily lives far beyond anyone else's," Walden stated.

He also said the proposal could harm agriculture, which "provides the economic base for Malheur County."

Agriculture generates \$370 million annually in farm-gate receipts in the county, and \$134 million of that total comes from the livestock industry.

Because the U.S. Bureau of Land Management and other federal agencies manage 73 percent of the county's lands, "public lands grazing (is) an integral part of most local family ranch operations," Walden stated. "Greatly restricting use of that land through a monument designation could have disastrous economic impacts to the county and the surrounding region."

Walden told Jewell that "it's very important that you ... outline formally to Malheur County (residents) where the DOI stands on this proposal...."

Oregon Sens. Ron Wyden and Jeff Merkley, both Democrats, have also weighed in on the issue and, in a joint statement, said any proposal needs to protect ranching families as well as other existing rights in the area.

"Malheur County has been home to ranch families for generations," their Oct. 29 letter states. "We want to ensure that agriculture, ranching and other uses of this landscape continue into Oregon's future."

Five other Eastern Oregon counties also support Malheur County in its opposition to the proposal.

A Harney County Court resolution opposing the plan said it could reduce ranching operations in Southeastern Oregon, "as the majority of ranches are tied to federal grazing."

The proposal is being spearheaded by the Oregon Natural Desert Association and the group's executive director, Brent Fenty, said the plan's supporters would be happy to work with Malheur County residents to help craft a proposal palatable to both sides.

"We're certainly ready and willing to have those conversations," he said.

According to Fenty, 100 Oregon businesses have signed letters urging Wyden to support the proposal and more than 10,500 petition signatures favoring the plan have been collected.

Fenty said proposal proponents support congressional action to approve the plan but opponents say they

anticipate supporters will ask President Barack Obama to use his powers under the Antiquities Act to designate the land as a national monument or wilderness area.

DOI in the News:

INTERIOR ANNOUNCES DISTRIBUTION OF ADDITIONAL PILT FUNDS. The [Ontario \(OR\) Argus Observer](#) (11/2, 19K) reports that the Interior Department announced Friday that “more than 1,900 local governments” are “receiving additional Payments in Lieu of Taxes funds,” totaling about \$34.5 million.

The [Alaska Dispatch News](#) (10/31, 203K) reports that “rural communities in Alaska will get \$2.2 million from the Interior Department as part of a Payments in Lieu of Taxes (PILT) program.” Interior Deputy Secretary Michael L. Connor said, “Rural communities help define the character of our diverse and beautiful country, contributing significantly to our nation’s economy.”

REP. BISHOP SAYS HE WANTS TO FIX LWCF. The [Salt Lake \(UT\) Tribune](#) (11/2, 339K) reports that Rep. Rob Bishop, chairman of the House Natural Resources Committee, allowed the Land and Water Conservation Fund “to expire at the end of September by blocking movement on a bipartisan bill to renew it.” Bishop “says the program, while well-intentioned when it began, has become a ‘slush fund’ for the Interior Department secretary and that local and state governments are receiving a pittance of what they should get.” But While Bishop “works to reform the fund’s goals, communities across America that had been hoping for federal dollars to buy up and preserve space are out in the cold.”

Congress Urged To Reauthorize LWCF. In an editorial, the [Grand Junction \(CO\) Daily Sentinel](#) (11/1, 73K) calls on Congress to reauthorize the Land and Water Conservation Fund., The paper says that “it’s hard to think of a state that benefits more from the LWCF than Colorado.” It asserts that “the LWCF is working just fine and shouldn’t be crimped in any way.”

Additional coverage of the LWCF was provided by the [Clark County \(WA\) Columbian](#) (11/1, 87K).

FEDERAL GOVERNMENT, STATES AT ODDS OVER LAND MANAGEMENT. The [San Angelo \(TX\) Standard-Times](#) (11/2, 2K) reports that “in 2015, all 11 Western states considered measures calling for the transfer of federal land to state control,” but “only a handful of bills passed, and none resulted in a transfer of land.” According to the article, “those long odds, and a reluctance to spend state money on land management, have spurred some states to try a different approach.” The article notes that “instead of taking on the federal government in a futile fight for ownership, they are arming counties with money and expertise to help them

convince federal officials to hew more closely to residents' interests.”

In an op-ed for the [Arizona Republic](#) (11/1, 960K), Sen. Steve Pierce, chairman of the Senate Natural Resources and Rural Affairs Committee, criticizes “federal land management in the West.” He claims that “the desk jockeys in Washington, D.C., not only seem to lack empathy for all the families in Arizona and the West who make a living working the land, we often are under downright attack from this administration.” However, Piece is hopeful because “we have at least one presidential candidate paying attention to the West and has laid out a plan to turn things around.” According to Pierce, “Jeb Bush proposed a set of policies touching on everything from water storage to hunting rights that shows he understands the relationship between Washington, D.C., and the West is broken.”

In an op-ed for the [Las Vegas Review-Journal](#) (11/2, 403K), Mark Hutchison, Nevada’s lieutenant governor, writes that the Nevada Association of Counties on Sept. 29 hosted the Summit on Public Lands in Nevada. According to Hutchison, “the purpose of this event was to have a detailed and open conversation to identify opportunities and recommendations for Nevada to strengthen its role in the health, sustainability and management of our public lands.” He says that “there were frank discussions on how wildfires, access, multiple use and permitting processes are managed on our public lands and the effects they have on our communities.”

In an editorial, the [Reno \(NV\) Gazette-Journal](#) (10/31, 194K) opposes the growing movement in the West “to turn federal lands over to states.” It argues that “doing this would be the wrong way to address growth concerns, has the potential to harm Nevada taxpayers, and goes against the wishes of many hunters, hikers and other outdoor recreationists who fear losing access to currently public lands.”

Additional coverage of the tension between states and the federal government over land management policies was provided by the [Laramie \(WY\) Boomerang](#) (11/2, 17K).

REP. WALDEN SEEKS INFORMATION ON MALHEUR MONUMENT PROPOSAL. The [Salem \(OR\) Capital Press](#) (11/1, 113K) reports that Rep. Greg Walden has asked Interior Secretary Sally Jewell to “formally outline where the federal government stands on a proposal to designate 2.5 million acres in Malheur County as a national monument or wilderness area.” The Owyhee Canyonlands Conservation Proposal, “which would impact about 33 percent of the county’s total grazing land, is strongly opposed by the county’s ranchers and farmers.” Walden “hopes to receive a response to that Oct. 28 request soon and will keep pushing until he gets one, said Andrew Malcolm, Walden’s communications director.”

BLM PONDERES ENERGY DEVELOPMENT IN SAGE GROUSE HABITAT. The [High Country \(CO\) News](#) (11/1, 74K) reports that the BLM is considering “oil and gas development leases on some 5.2 million acres in prime sage grouse habitat in the West.” Approval of the parcels had been postponed because the bureau’s “intention was to wait until regulations were in place that would allow operators to move ahead with minimal impact on the bird’s shrub-steppe habitat.” Following the recent decision not to list the bird, “those parcels of land could go back on the auction block – and environmental groups say that could result in harm to grouse populations, which had been slowly recovering.” According to the article, “though no decisions have been made yet, the BLM hopes to determine what to do with the land — which is more than twice the size of Yellowstone — by the end of the year.”

FIREFIGHTING COSTS TOP \$45 MILLION IN NORTHWEST MONTANA. The [AP](#) (11/2, 283K) reports that “wildfires in northwest Montana cost more than \$45.7 million to fight this year.” According to the article, “preliminary tallies from the Northern Rockies Coordination Center counted at least 529 wildfires that scorched more than 219,000 acres in the region.”

FREEDOM CAUCUS COULD SOON TURN EYE TO ENERGY ISSUES. The [E&E Daily](#) (10/30, Subscription Publication) reports that Rep. Cynthia Lummis is hoping to focus the Freedom Caucus’ “newfound political muscle on energy issues.” According to the article, “during an interview on Capitol Hill last week, Lummis, who hails from Wyoming – the country’s top coal producer – said that while energy isn’t a focus for the caucus now, she’s hopeful the group will turn its powerful gaze to those issues in the West.”

REPORT FINDS ERRORS IN COST-BENEFIT ANALYSES BY AGENCIES. The [Greenwire](#) (10/30, Subscription Publication) reports that “federal agencies need to ‘step up their game’ when it comes to analyzing the costs and benefits of prospective regulations, according to a new report from the nonprofit group Resources for the Future.” The report looked at “nine case studies of 34 environmental regulations and found

few instances where agencies' predictions were realized." Written by Richard Morgenstern, the report illustrates "a number of common analytical mistakes made by agencies."

PRESIDENT OBAMA URGED TO CREATE GREATER GRAND CANYON HERITAGE NATIONAL MONUMENT. In an op-ed for the [Arizona Republic](#) (11/1, 960K), Danny Giovale writes that Rep. Raul Grijalva and "leaders from the Havasupai, Hualapai, Hopi and Navajo tribal nations recently announced the next step in the tribal-led effort to permanently protect the area around the Grand Canyon." Giovale, "as the owner of the outdoor gear company Kahtoola, who makes a living selling products to help folks enjoy the outdoors, and as a lifelong explorer of the Grand Canyon area," adds his "support to the tribal effort and attest to the value of protecting this area." Giovale says that "President Obama has an opportunity to ensure that all Americans have the chance to experience the grandeur of Grand Canyon's watershed through the creation of the Greater Grand Canyon Heritage National Monument."

WPOST: CONGRESS MUST PASS LEGISLATION ENSURING IG ACCESS. The [Washington Post](#) (11/1, 7.78M) editorializes that Congress should move forward on bipartisan legislation that "deserves to be passed" and would guarantee that inspectors general have access to all records and "remain an important mechanism of accountability and oversight." The Post criticizes the Justice Department's "foot-dragging" on releasing FBI records to IG Michael Horowitz as part of "a larger problem" of IGs facing "hurdles to their independent investigations created by the very departments they are supposed to keep an eye on."

DOLE: CONGRESS SHOULD APPROPRIATE FUNDING FOR NATIONAL EISENHOWER MEMORIAL. In a [Washington Times](#) (11/1, Dole, 283K) op-ed, former Sen. Bob Dole highlights the importance of completing the Eisenhower National Memorial and criticizes "a handful of Republican members of Congress" for blocking Federal funding of the project. Dole urges Congress to "appropriate the necessary funds that will, at last, bring alive the vision of the 1999 legislation establishing the memorial."

Veterans Group Criticizes Eisenhower Memorial Design. The [Military](#) (10/31, 209K) reports that Concerned Veterans for America is "criticizing plans for a multi-million memorial to Dwight D. Eisenhower, the country's 34th President who led U.S. and Allied forces in Europe in World War II as Supreme Allied Commander." The group said "the memorial design – to feature 80-foot high columns, metal-sculpted tapestries and statues depicting Eisenhower as President and as a 5-star Army general – is 'a disgrace,' and also hit the project over costs, recently estimated to be about \$144 million." Concerned Veterans for America Outreach and Research Analyst Shaun Rieley said in a statement on Thursday, "The ugly, confusing, and grandiose design does not befit a man who asked to be buried in the same \$80 government-issued casket provided to the common soldier."

Empowering Native American Communities:

NATIVE HAWAIIANS FACE "MONUMENTAL DECISIONS." In an op-ed for the [Honolulu Star-Advertiser](#) (11/2, 349K), Kawika K. Burgess writes that "the Native Hawaiian community is at a historic crossroad" with the "opportunity, being facilitated by Nai Aupuni, to reorganize our lahui (community of people) and take the first steps on the long road toward rebuilding the nation." Burgess notes that "at the same time we also face a separate question from the United States Department of Interior as to whether or not our lahui should pursue a federal rule, which would allow for federal recognition of our lahui if we so chose." Burgess stresses that "these monumental decisions will not only impact us, but also our children and the future generations of Hawaiians, as well as the broader community in Hawaii."

Additional coverage of the election was provided by [BBC News \(UK\)](#) (11/2, Brown, 1.57M).

DECISIONS ON TIGUA GAMING EXPECTED TO BE CONTESTED. The [El Paso \(TX\) Times](#) (11/1, 199K) editorializes that "El Paso's Tigua Indians received a rare dose of positive news in its decades-long efforts to legally operate a casino on tribal land" when "the National Indian Gaming Commission and the solicitor general of the U.S. Department of the Interior issued opinions that said the tribe could offer what's known as Class II gaming at Speaking Rock Casino." However, it says that "those opinions, filed under seal with an El Paso federal court in early October and unsealed last week, are unlikely to be the final word on the subject." Instead, "the rulings could set the stage for another Tigua legal battle with the state, and another fight between Texas Gov. Greg Abbott and the Obama administration."

Additional coverage was provided by the [Indian Country Today Media Network](#) (10/30, 47K).

ADDITIONAL COVERAGE: HEARING HELD ON TRIBAL RECOGNITION BILL. Additional coverage that “a congressional subcommittee heard testimony last week on a bill providing that Indian tribes only be recognized by an act of Congress rather than by the executive branch of the U.S. government” was provided by the [New London \(CT\) Day](#) (10/31, 77K).

Office of Insular Affairs:

MIGRANT FUNDING REQUEST HELD UP IN CONGRESS. The [Pacific \(GUM\) Daily News](#) (11/1, 61K) reports that “legislation that Guam and Hawaii representatives proposed to raise federal government funding to help the islands pay for public services to regional migrants remains stuck in committee.” The article notes that “it’s been eight months since the introduction of H.R. 854, also called the Compact Impact Aid Act of 2015, which proposes to raise the annual funding for Guam, Hawaii, the Northern Marianas and American Samoa from \$30 million to \$185 million.” The legislation “awaits consideration in the Subcommittee on Indian, Insular and Alaska Native Affairs of the Natural Resources Committee, according to Guam Delegate Madeleine Bordallo’s office.”

PACIFIC ISLAND NATIONS MAKE LAST PLEA BEFORE PARIS CLIMATE TALKS. [The Guardian \(UK\)](#) (11/2, Milman, 3.48M) reports that at a summit last week in Fiji, “islanders thrashed out their collective plea to the world to help address the health impacts of climate change, particularly upon women, infants and adolescents.” Fijian prime minister Frank Bainimarama said, “We in the Pacific are innocent bystanders in the greatest act of folly of any age,” lamenting what he sees as a lack of “necessary political will” among rich countries.

Tackling America’s Water Challenges:

CALIFORNIA DISTRICTS FINED OVER WATER USE. The [CBS Evening News](#) (10/31, story 5, 1:45, Pelley, 5.08M) reported that California is going to assess \$61,000 fines against Beverly Hills, Coachella, and other districts that have failed to decrease water consumption during the drought.

GROUP OPPOSES DELTA TUNNELS PLAN. The [Sacramento \(CA\) Bee](#) (11/2, 515K) reports that “Barbara Barrigan-Parrilla, executive director of Restore the Delta, addressed reporters Friday on the steps of the state Capitol, speaking in opposition to a plan pushed by Gov. Jerry Brown to build a pair of massive tunnels in the Sacramento-San Joaquin Delta.” The article notes that “Friday marked the deadline to submit comments on the project’s environmental impact documents.”

BOR TO DISCUSS BIGHORN RESERVOIR WATER SUPPLY CONDITIONS. The [Billings \(MT\) Gazette](#) (11/2, 200K) reports that the BOR will “discuss water supply conditions in the Bighorn Basin and the agency’s proposed fall/winter operating plan for Yellowtail Dam/Bighorn Lake at a public meeting on Thursday.”

EFFORT TO EXPAND RANGE OF SALMON IN CALIFORNIA CRITICIZED. The [Fresno \(CA\) Bee](#) (11/2, 270K) editorializes that “the fate of the Chinook salmon in California” has been impacted by global warming. However, it argues that “the herculean effort to get water flowing through dried-up sections of California’s second-longest river has been tied completely to bringing back salmon.” The paper says that this “is a colossal mistake. The focus instead should be on the river’s overall health.” It concludes that “in the midst of global warming, trying to expand the range of salmon – instead of saving them where they are – is a fool’s errand.”

Securing America’s Energy Future:

Renewable Energy:

ALTAMONT WINDS SHUTTING DOWN IN NORTHERN CALIFORNIA PASS. Drawing on coverage from the Contra Costa Times, the [AP](#) (11/2) reports Altamont Winds, a company that some environmentalists have “blamed for thousands of bird deaths in Northern California’s Altamont Pass,” is “shutting down.” The wind power company “notified the U.S. Fish and Wildlife Service it will cease operations on Sunday in an effort to reduce bird deaths.” The company “is one of four operating some 3,000 turbines in the pass.” Alameda County has “found that up to 4,600 birds, including golden eagles, died in the wind farm area each year from 2005 to 2012 – although many deaths occurred when the turbines were powered down.”

BLM RENEWABLE ENERGY HEAD RETIRES AT 67. [E&E Publishing](#) (10/30, 705) profiles retiring manager of the Bureau of Land Management's National Renewable Energy Coordination Office, Ray Brady. He "implement the president's 'New Energy for America' agenda, calling for using public lands to drive a sweeping expansion of renewable energy production," E&E reports and chronicles that effort.

Onshore Energy Development:

HOUSE SUBCOMMITTEE TO HOLD HEARING ON STREAM PROTECTION RULE. The [National Journal](#) (11/2, Subscription Publication, 53K) reports that "the House Oversight and Government Reform Committee's Subcommittee on Interior holds a hearing Wednesday on a proposed Interior Department rule placing limits on coal producers operating near streams." According to the article, "the stream protection rule has been criticized by the industry for being too restrictive, but the administration says it will protect drinking water and nearby land."

Fourteen States Say New Waterway Rules Will Hurt Mining. The [AP](#) (10/31, 2.15M) reports that "the attorneys general of Ohio and West Virginia are leading an effort to oppose new federal rules that clarify which small streams, wetlands and other waterways the government can shield from pollution and development." According to the article, "Ohio Attorney General Mike DeWine and West Virginia Attorney General Patrick Morrisey — along with their counterparts from a dozen other states — signed a letter to the Office of Surface Mining Reclamation and Enforcement this week saying that the rules will hurt coal mining operations." The letter says "the rules immensely broaden the federal government's authority at the expense of mining and fail to respect state control over the industry."

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/31, 283K), the [Bristol \(VA\) Herald Courier](#) (11/2), and [WFMJ-TV Youngstown \(OH\)](#) Youngstown, OH (11/2, 70K).

Stream Protection Rule Criticized. In an op-ed for the [Grand Junction \(CO\) Daily Sentinel](#) (11/2, 73K), Brent Wahluquist, a former director of the U.S. Office of Surface Mining, writes that the Obama Administration's "assault on the production and use of coal in the United States has been relentless and is showing no signs of letting up despite the fact that coal production has already dropped by well over 15% since the administration took office." He criticizes the Interior Department's "new so called Stream Protection Rule (SPR) designed to curb the production of coal and increase federal intervention into state run regulatory programs." He claims that "Interior is proposing to fix problems that simply don't exist."

The piece also appears in the [Pueblo \(CO\) Chieftain](#) (11/2, 87K).

SEN. MURKOWSKI CRITICIZES ENERGY POLICIES THAT RESTRICT DRILLING. [The Hill](#) (10/31, Richardson, 654K) "Briefing Room" blog reported that Sen. Lisa Murkowski used the Republican weekly address on Saturday to criticize President Obama's energy policies that restrict drilling in her home state of Alaska. Murkowski said the Administration has "repeatedly denied Alaska's best opportunities to produce energy for our nation and the world." According to Murkowski, the Environmental Protection Agency and other agencies "are issuing a barrage of regulations that will have limited environmental benefit, but will absolutely reduce our ability to produce energy here at home."

COURT REJECTS REQUEST TO BLOCK DRILLING IN CHACO CANYON REGION. The [EnergyWire](#) (10/30, Subscription Publication) reports that "environmentalists suffered another loss in court this week, as a federal judge denied their request to block oil and gas drilling in the Chaco Canyon region of New Mexico while litigation on the issue continues." The Navajo group Diné Citizens Against Ruining our Environment, "along with the Natural Resources Defense Council, WildEarth Guardians and the San Juan Citizens Alliance, requested the injunction in September – essentially asking for a pause on development while the 10th U.S. Circuit Court of Appeals considers whether a lower court was correct in denying a similar request." However, "the court denied the request, noting in a short order that the groups had not met the basic standards for injunction, which include a likelihood of success on the merits of the case and irreparable harm without an injunction."

REPORT SEEKS TRANSPARENCY IN COAL REGULATIONS. The [Richmond \(KY\) Register](#) (11/2, 16K) reports that "a House of Representatives committee recently filed legislation aimed at amending the Surface Mining Control and Reclamation Act to ensure transparency in the creation of environmental regulation after an extensive report called into question the regulatory effect of the Office of Surface Mining Reclamation and

Enforcement.” The House Natural Resources Committee said “the legislation seeks to improve overall transparency in the Office of Surface Mining Reclamation and Enforcement’s (OSMRE) regulatory actions.” According to the article, “this legislation would ensure the publication of all scientific products used by OSMRE, thereby providing stakeholders the opportunity to comment on the validity of such products, committee members contend.”

ENVIRONMENTALISTS CALL FOR FEDERAL INTERVENTION IN WYOMING MINE RECLAMATION. The [Billings \(MT\) Gazette](#) (11/2, 200K) reports that “there are growing calls for Washington to intervene following a deal” between Wyoming regulators and “the bankrupt coal miner Alpha Natural Resources that left the vast majority of the company’s \$411 million cleanup bill unsecured.” According to the article, “environmentalists question the legality of the agreement, which allowed Alpha to continue mining in exchange for a \$61 million super-priority claim in the company’s bankruptcy proceedings.” The Office of Surface Mining, Reclamation and Control “notably reserved its enforcement rights as part of the Alpha-Wyoming agreement, but department officials have been tight lipped in public about the subject.”

BLM CLEARS LEASES FOR DRILLING ON PUBLIC LAND. The [AP](#) (11/2, Bryan) reports that the Bureau of Land Management last week “cleared the way for drilling on more than a dozen parcels of national forest land in northern New Mexico,” despite opposition from environmentalists. “The team determined that the environmental analysis completed for the lease sale was in conformance with the BLM’s resource management plan and the Forest Service’s oil and gas environmental impact statement and therefore the BLM will be issuing the leases,” BLM spokeswoman Donna Hummel said.

NATURAL GAS PIPELINE BUILDER ANNOUNCES ROUTE CHANGES. The [AP](#) (11/2, 2.15M) reports that “energy companies behind the Atlantic Coast Pipeline are proposing changes in the route of the proposed 564-mile natural gas pipeline.” According to the article, “in a filing Friday with federal regulators, Dominion Energy said the changes would reduce the potential impacts on salamander habitats in the Monongahela National Forest in West Virginia and the George Washington National Forest in Virginia.” Dominion also said “it is proposing an alternative to avoid crossing the Great Dismal Swamp National Wildlife Refuge.” The change was made at the request of the FWS.

COAL FACILITIES TRANSITION TO CLEAN ENERGY. [POWER](#) (11/2, 1K) profiles several coal facilities which are being “repurposed for cleaner energy projects that benefit multiple stakeholders.” The article shows that “several existing and planned projects demonstrate that there may be multiple paths toward that transition.”

MAYORS WORRIED BLM REGULATIONS WILL HURT OIL, GAS PRODUCTION. In an op-ed for the [Albuquerque \(NM\) Journal](#) (11/2, 263K), Bloomfield Mayor Scott Eckstein, Farmington Mayor Tommy Roberts, Kirtland Mayor Mark Duncan, Aztec Mayor Sally Burbridge and San Juan County Commission Chair Keith Johns write that “a wave of new Bureau of Land Management regulations is coming that will likely reduce New Mexico’s oil and natural gas production and lead to a loss of billions of dollars to the state and federal government over the next two decades.” Of particular concern are the venting and flaring rule and the proposed update of BLM’s Onshore Order 3. They “believe that BLM must – and can – carefully balance environmental protection and royalty issues with revenue and job concerns.”

FEDERAL AGENCIES CRITICIZED FOR LACK OF URGENCY ON RARE EARTH MINERALS. In an op-ed for the [Washington Times](#) (11/2, Pendley, 283K), William Perry Pendley, a lawyer, is president of Mountain States Legal Foundation, writes that “despite the declaration by six federal agencies (Defense, Energy, U.S. Geological Survey, National Academies of Science, Congressional Research Service, and the Government Accountability Office) that rare earths present a ‘crisis,’ the bureaucracy plods along.” In response, “Senate and House legislation is pending to require timely action by federal agencies — not on all major projects — only those involving critical minerals, including rare earths.”

Offshore Energy Development:

AD CAMPAIGN LOBBIES FOR OFFSHORE DRILLING. The [UPI](#) (10/30) reports that “industry supporters have started an ad blitz in southern U.S. states, arguing offshore oil and gas exploration can exist side-by-side with the environment.” The campaign organized with the help of the American Petroleum Industry. Drilling proponents say “opening Atlantic basins up to oil and gas drillers would bring net benefits to the region.”

Offshore Drilling In Atlantic Opposed. In an op-ed for the [Delmarva \(MD\) Daily Times](#) (10/30, 1K), Chris Bason opposes offshore drilling in the Atlantic Ocean. He notes that “according to the Bureau of Ocean

Energy Management, 34 species of marine mammals may be impacted by these activities.” Bason asserts that “we cannot gamble on a disaster like Deep Water Horizon off our coast.”

BP FILES MOTION TO WITHDRAW APPEAL OVER GULF OIL SPILL OVERPAYMENTS. The [AP](#) (10/31) reported that BP “is ending its effort to recoup money it paid in economic damage claims to businesses and individuals under a settlement arising from the 2010 Gulf of Mexico oil spill.” BP on Friday “filed a motion to withdraw an appeal over what it said were overpayments worth hundreds of millions of dollars and involving more than 790 businesses.”

SHIPWRECKS HOLDING OIL POSE LEAK THREAT TO US WATERS. The [AP](#) (10/31, Seewer) reported that “dozens of shipwrecks scattered along America’s coasts are thought to be holding oil and certainly will start leaking someday as corrosion eats away at their tanks.” Preventing that “just isn’t possible, experts say, because funding for such a huge effort doesn’t exist and there are too many unknowns about the locations of those wrecks and the cargo left inside.” According to the AP, there are “87 shipwrecks on a federal registry that identifies the most serious pollution threats to U.S. waters,” with “most of those wrecks are along the Atlantic seaboard, torpedoed by German submarines during World War II.”

ARCTIC DISAPPOINTMENT REFLECTED IN SHELL’S Q3 RESULTS. [KTOO-FM](#) Juneau, AK (10/29) reports that Royal Dutch Shell’s most recent quarterly financial results, and “Shell’s dry hole in the Chukchi Sea is just one factor.” The article notes that “for its canceled Arctic project, Shell wrote off \$2.6 billion this quarter.” CEO Ben Van Beurden, “in a conference call with reporters, repeated the reasons Shell halted work on its Arctic leases after drilling a single dry hole.” He said, “Due to the high cost and the challenging and unpredictable regulatory environment, we have decided to just cease further exploratory activity offshore Alaska for the foreseeable future.”

America’s Great Outdoors:

Bureau of Land Management:

BILL WOULD REVAMP FEDERAL AGENCIES’ LAW ENFORCEMENT. The [Greenwire](#) (10/30, Subscription Publication) reports that a new bill by Rep. Cresent Hardy would “overhaul the Forest Service’s law enforcement program, shifting authority away from Washington, D.C., to local foresters and district rangers.” Hardy’s H.R. 3824, “which he introduced late last week, comes months after a Western sheriff complained to a House committee that the current law enforcement command structure creates a disconnect with local communities. “

COLORADO SUPREME COURT REJECTS CHALLENGE TO “OVER THE RIVER” PROJECT. The [AP](#) (11/2, 2.15M) reports that “an art project to drape fabric panels along a 42-mile stretch of the Arkansas River has passed another hurdle.” The Colorado Supreme Court has “denied a request for further review of the Colorado State Parks agreement that allows artist Christo’s ‘Over The River’ temporary work of art to move forward.” The article notes that “the case is also on appeal in federal court challenging a ruling that upheld the federal Bureau of Land Management’s approval of Over The River.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/31, 283K) and the [Denver \(CO\) Post](#) (11/2, Blevins, 825K).

FAMILY DONATES HISTORIC SITE ALONG OREGON TRAIL TO BLM. The [AP](#) (10/30, 283K) reports that “tourists, school groups and history fans will soon be able to visit a historic site along the Oregon Trail after the owners have donated it to the Bureau of Land Management.” The Norstebon family has “donated the Canyon Creek Station in Elmore County to the agency.”

Additional coverage was provided by the [Idaho Statesman](#) (11/2, 218K).

ARIZONA RANCHER INSPIRED BY BUNDY. The [St. George \(UT\) News](#) (11/1, 3K) reports that “inspired by the actions of Nevada rancher Cliven Bundy and his stance against federal control of public lands, a rancher on the Arizona Strip has also declared the Bureau of Land Management to be an illegitimate agency and said he will no longer comply with or recognize it.” LaVoy Finicum, of Cane Beds, Arizona, has “chosen to discontinue paying grazing permit fees and to ignore when the BLM allows certain allotments – or pasture areas – to be used for grazing.” But “unlike Bundy, who has had a strained relationship with the BLM and

similar federal agencies for over 20 years now, Finicum's relationship with the local BLM has been largely positive and civil."

GRAZING IN CANYONS OF THE ANCIENTS NATIONAL MONUMENT DEBATED. The [Durango \(CO\) Herald](#) (11/1, 31K) reports that "ranchers and environmentalists were briefed on grazing plans in McElmo Canyon by officials from the Bureau of Land Management." During a recent public tour of the Canyons of the Ancients National Monument's "controversial Flodine allotment, the pros and cons of cattle grazing were debated between environmentalists who argue it is inappropriate in a fragile desert with ruins, and local ranchers who depend on it for their livelihood."

BLM BEGINS ASSESSMENT FOR TRANSPORTATION AND TRAVEL MANAGEMENT PLAN. The [Rifle \(CO\) Citizen Telegram](#) (11/2, 8K) reports that the BLM "recently announced a public scoping period for travel and transportation management in the White River Forest." According to the article, "the White River Field Office is beginning an environmental assessment that would amend its 1997 resource management plan to determine which areas within the 1.5 million-acre field office would be open to cross-country motorized and mechanized use, which would be limited to designated routes, and which would be closed to motorized and mechanized vehicles." White River Field Manager Kent Walter said, "Our ultimate goal is to identify a comprehensive travel network that balances current and future transportation needs while managing for other resources and uses."

BLM HOLDS FINAL WILD HORSE ADOPTION EVENT OF THE YEAR. The [AP](#) (11/2, 2.15M) reports that the BLM said that "it processed 179 wild horse adoptions in Wyoming this year." The bureau "hosted its final horse adoption of the year Friday at the Rock Springs Wild Horse Holding Facility." Five horses were adopted.

BLM HOSTING LEARNING SESSIONS ON SAGE GROUSE HABITAT IN UTAH. The [St. George \(UT\) Spectrum](#) (10/31, 48K) reports that "a 'highly fragmented' greater sage-grouse habitat in Utah has the Bureau of Land Management scrambling to address the threat to the species." According to the article, "the public will be able to attend two Steppe Forward learning sessions to learn about the greater sage-grouse and the BLM's conservation plans in relation to the birds."

ADDITIONAL COVERAGE OF RED RIVER DISPUTE. Additional coverage of the Red River dispute was provided by the [Texas Tribune](#) (11/1, 6K).

ADDITIONAL SCRUTINY URGED FOR MOJAVE DESERT AQUIFER PLAN. The [Palm Springs \(CA\) Desert Sun](#) (10/31, 98K) editorializes that Cadiz Inc., which "owns a vast swath of land in the Mojave Desert northeast of Palm Springs is looking to pump billions of gallons of groundwater per year to sell to Southern California water districts." According to the paper, "despite the need for new water supplies as the state continues to suffer well into the fourth year of an historic drought, there should be clarity on this issue before the project is allowed to move forward." It says that "one way to answer these questions would be for an independent agency to study the aquifer recharge question." The paper notes that "environmentalists have suggested that the U.S. Geological Survey do a survey of its own to clear up the discrepancy between the studies done by Cadiz and the opponents of the project."

In an op-ed for the [San Bernardino \(CA\) Sun](#) (10/31, 143K), Adell L. Amos, Associate Dean for Academic Affairs at the University of Oregon School of Law, and Sam Kalen, co-director of the Center for Law and Energy Resources in the Rockies at the University of Wyoming School of Law, argues that the BLM's "recent decision that a 43-mile, 7-foot diameter groundwater pipeline does not further the purpose of an 1875 railroad right-of-way should not be controversial." They says that "in the end, BLM exercised sound professional judgment in a climate where water is becoming increasingly scarce and highly valuable."

Fish and Wildlife Service:

NATIONAL EAGLE AND WILDLIFE PROPERTY REPOSITORY SHOWS CASUALTIES OF ILLEGAL WILDLIFE TRAFFICKING. [ABC News](#) (11/1, 3.35M) reports on the National Eagle and Wildlife Property Repository, which houses "approximately 1.5 million seized and confiscated illegal wildlife products." Supervisory Wildlife Repository Specialist Coleen Schaefer said that "while Americans may be familiar with isolated wildlife hunting incidents like Cecil the lion, Schaefer explained that commercialized, illegal trafficking is a larger issue at the moment because it's increasing." She added, "Wildlife trafficking as I mentioned has changed from a crime of opportunity to a well-structured organized crime operation. It is a multi-billion dollar operation where it's funding insurgencies. It's third to trafficking humans and drugs and firearms."

FWS INVESTING IN PROJECTS TO STRENGTHEN ATLANTIC COASTAL DEFENSES AGAINST FUTURE STORMS. In an op-ed for the [New Jersey Local News](#) (11/2, 785K), Wendi Weber, Northeast Regional Director for the FWS, writes that “federal funding for Hurricane Sandy recovery has spurred an unprecedented effort to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms.” She notes that the FWS and other Interior Department agencies are “investing \$787 million in hundreds of projects to clean up and repair damaged refuges and parks; restore coastal marshes, wetlands and shoreline; connect and open waterways to improve flood control; and increase our scientific understanding of how these natural areas are changing.” According to Weber, “these investments support the goal of President Obama’s Climate Action Plan to make communities more resilient to increasingly intense storms predicted with a changing climate.”

The [Wilmington \(DE\) News Journal](#) (10/29, Murray, 387K) reports that Hurricane Sandy marked “a shift in the approach state, federal and local regulators take to make shorelines storm ready and resilient.” According to the article, “from New England to the Carolinas, dredges have pumped millions of cubic yards of sand, in the three years since Sandy struck, to build storm-ready beaches and form engineered sand dunes.” The article notes that “Delaware alone received \$30 million in federal Sandy relief money to restore sand that was swept away during the hurricane in 2012” and “another \$38 million is being spent at Prime Hook National Wildlife Refuge to restore wetlands and fill shoreline breaches that Sandy worsened.”

Meanwhile, [WYPR-FM](#) Baltimore (11/1, 3K) reports that “some of the Chesapeake Bay’s pristine wildlife refuges are drowning, casualties of erosion and the rising waters caused by climate change.” So, the FWS is “moving to save to of Maryland’s prized refuges with money allocated for recovery from superstorm Sandy and new science techniques.” The article notes that “part of the solution is found in a partnership of Fish and Wildlife, the Conservation Fund and the National Audubon Society to map where the largest marshes are likely to migrate without running into roads or future developments.”

NEW STUDY FINDS YELLOWSTONE GRIZZLY BEARS THRIVING. The [AP](#) (11/2, 2.15M) reports that “grizzly bears in the Yellowstone National Park region are thriving and have the potential to continue to thrive in the long term, according to a study by the Interagency Grizzly Bear Study Team.” The study, “published in *Molecular Ecology*, looked at 729 bears and found that estimates of effective population — the number of bears passing genes to the next generation — in the Greater Yellowstone Ecosystem has quadrupled since the 1980s, growing from 100 to about 450.” Researchers also “found that genetic diversity in the population was stable.”

Additional coverage was provided by the [Great Falls \(MT\) Tribune](#) (11/1, 76K), the [San Luis Obispo \(CA\) Tribune](#) (11/2, 111K), and the [Washington \(DC\) Times](#) (11/2, 283K).

Interagency Grizzly Bear Subcommittee To Discuss Delisting. The [AP](#) (11/2, Ridler, 283K) reports that “members of an Interagency Grizzly Bear subcommittee are meeting Tuesday and Wednesday in Jackson, Wyoming, where delisting will be one of the topics.” Chris Servheen, grizzly bear recovery coordinator with the FWS said, “We’ve talked about the idea of doing that and we all agree that the population is recovered. But there’s no proposal that it be delisted.”

Removals Of Grizzly Bears Up In Yellowstone So Far In 2015. The [AP](#) (11/2, 2.15M) reports that “wildlife managers have euthanized 24 grizzly bears in the Greater Yellowstone Ecosystem so far this year, the highest number in the past five years.” The article notes that “most of the bears, which are a protected species under federal law, had killed livestock or had become habituated to human food sources, according to information posted on the Interagency Grizzly Bear Study Team’s website.” According to the article, “factors that influence the situation include a larger population of bears pushing to the fringes of its core recovery area and a reduction in the availability of natural food sources.”

Additional coverage was provided by the [US News & World Report](#) (10/31, 996K), the [Washington \(DC\) Post](#) (11/2, Press, 7.78M), and the [Daily Mail \(UK\)](#) (11/2, Dailymail.com, 5.31M).

EVENTS ACROSS US MARK “BAT WEEK”. The [Minneapolis Star Tribune](#) (11/2, 1.15M) reports that “Saturday was the last day of Bat Week, an event held across the U.S. and beyond, and workshop participants at the Minnesota Valley National Wildlife Refuge Center in Bloomington assembled bat houses, lots of them.” According to the article, “they were contributing to an international attempt to set a world record by making 5,000 homes for the furry flying creatures.” The article notes that “Saturday’s event also aimed to educate

residents about fungal diseases like white-nose syndrome, which has killed up to 6 million bats since its 2006 discovery in New York.”

OBAMA ADMINISTRATION URGED TO TAKE “IMMEDIATE ACTION” AGAINST ASIAN CARP. The [Detroit Free Press](#) (11/1, 921K) reports that Sen. Debbie Stabenow “on Sunday urged the Obama administration to take ‘immediate action’ to respond to the threat of Asian carp after U.S. Fish and Wildlife said the species has been found 12 miles nearer to Lake Michigan.” Stabenow said, “I remain extremely concerned that Asian carp are getting closer and closer to Lake Michigan. Time is running out.” The article notes that “late last week, the Asian Carp Regional Coordinating Committee, a group of federal and state agencies monitoring the spread of the invasive carp, reported that Fish and Wildlife crews detected two small silver carp upstream of Seneca, Ill., in the Illinois River, on Oct. 22.”

TISHOMINGO HATCHERY WORKING TO REPLENISH ALLIGATOR SNAPPING TURTLE POPULATIONS. The [Oklahoman](#) (11/2, 470K) reports that The Tishomingo National Fish Hatchery is working to replenish alligator snapping turtle populations. Under the hatchery’s captive-rearing program, “alligator snapping turtles from Tishomingo were tagged, stocked in the Caney River and Pond Creek in northeastern Oklahoma, and later re-caught.”

NORTH CAROLINA ZOO RECEIVES GRANT FOR GORILLA CONSERVATION. The [AP](#) (11/2, 2.15M) reports that “the North Carolina Zoo’s conservation program has received a \$51,460 federal grant to help conserve gorillas in the wild.” The zoo said in a statement Friday that the money from the FWS will “go toward researching Cross River gorillas, the most endangered type of gorillas in the world.” According to the article, “a team of scientists and field biologists will work to determine patterns that cause parasite infections in the gorillas; determine how diseases found in humans can impact gorillas; establish health and disease threat monitoring protocols.”

INTERIOR WORKING TO RESTORE BISON. The [Denver Post](#) (11/2, Finley, 825K) reports that “ten pure bison bolted from a pen into open space Sunday — cheered by 400 supporters and reproduction managers — hoof steps forward in a growing national project of restoring bison to the prairie.” According to the article, “bringing back bison here marks a fresh use of city and county land preserved for recreation at a time when U.S. bison recovery efforts rely on insufficiently large federal refuges and tribal lands.” The article notes that the Interior Department is “building 17 restoration herds — about 10,000 bison overall on 4.6 million acres in 12 states.”

WASHINGTON STATE WEIGHS MEASURE TO COMBAT ANIMAL TRAFFICKING. The [New York Times](#) (11/2, Johnson, Subscription Publication, 11.64M) reports that “on Tuesday, what wildlife experts say could be the most far-reaching statewide law on animal trafficking in the nation — and the first such proposal to go to a statewide vote — will be on the ballot here in Washington State.” The new law would “condemn and criminalize the modern trade that is wiping out many threatened species but would allow, with strict rules, the antiques that echo an earlier time and fashion sensibility.” Supporters claim “the measure, backed and funded by Paul Allen, a co-founder of Microsoft, would strike a crucial blow against trafficking in animal products, with protections for tigers, lions and marine turtles as well as elephant tusks and rhino horns. Convicted offenders could face up to five years in prison.” But “opponents say that however earnest the intentions behind it, the Washington initiative, I-1401, is too strict in looking back at what antiques would be considered legal.”

MASSACHUSETTS URGED TO BAN SALE OF IVORY. [WCVB-TV](#) Boston (11/2, 436K) reports that “animal protection groups are joining Massachusetts lawmakers to urge the state to ban the sale of ivory and rhinoceros horn.” Supporters argue “elephants and rhinos are being killed in growing numbers for their tusks and horns, and anti-trafficking laws can help to discourage poaching and save the animals from extinction.” The article notes that “a bill sponsored by Sen. Jason Lewis of Winchester and Rep. Lori Ehrlich of Marblehead that would outlaw the import, sale or purchase of ivory and rhino horn was heard earlier this month by a legislative committee.”

ADDITIONAL COVERAGE: WOLF OR-7’S COLLAR NO LONGER WORKING. Additional coverage that wolf OR-7’s collar has stopped working was provided by the [Houston \(TX\) Chronicle](#) (11/2, 2.15M), the [Washington \(DC\) Post](#) (10/30, Press, 7.78M), the [Washington \(DC\) Times](#) (10/30, 283K), the [Daily Mail \(UK\)](#) (11/2, 5.31M), and the [San Francisco \(CA\) Chronicle](#) (11/2, Subscription Publication, 3.44M).

FEDERAL GOVERNMENT URGED TO VIEW STATES AS PARTNERS ON ENDANGERED SPECIES ISSUES. In an op-ed for the [Sioux Falls \(SD\) Tri-State Neighbor](#) (11/2, 79K), South Dakota Gov. Dennis

Daugaard argues in favor of “allowing states to play a more active role in the administration” of the Endangered Species Act. He asserts that “in a state such as South Dakota, where 80 percent of the land is privately owned, it should be standard practice to gather input from landowners early in the process.” Daugaard hopes “the federal government will come to see the states as partners in accomplishing this goal.”

National Park Service:

“EVERY KID IN A PARK” PROGRAM TOUTED. The [West Side \(OH\) Leader](#) (11/1, 31K), Jennie Vasarhelyi, chief of interpretation, education and visitor services for Cuyahoga Valley National Park” writes that on Sept. 1, the NPS launched a new program to invite the next generation to parks.” According to Vasarhelyi, “Every Kid in a Park is more than a centennial-year program; we expect it to continue into the future.”

Fourth-graders Visit Cape Cod National Seashore. The [Wicked Local Cape Cod \(MA\)](#) (10/29, 12K) reports that “Eastham Elementary School fourth graders spent last Thursday morning, Oct. 22, at Salt Pond Visitor Center where they were feted like royalty as part of the national ‘Every Kid in a Park’ program that will grant fourth graders from all over the U.S. admission into national parks for a year.” Kathy Tevyaw, deputy superintendent of the Cape Cod National Seashore, told the students “your teachers, and all the rangers here, have done a fabulous job in teaching you who we are, about our uniforms and why we do the things we do every day to save special places like this so 30 years from now, you can look back and say 2015 ‘was a really special year because I took a pass home to my family that allowed me to get into every National Park in the country, that allowed me to visit every national park for free.”

With Help Of “Every Kid In A Park” Initiative, Family Spends Six Months Visiting National Parks. The [Petoskey \(MI\) News-Review](#) (11/1, 30K) reports that “when it was announced last winter that all fourth-grade students and their families could receive free passes to National Park Service parks and attractions, a local family planned an adventure.” According to the article, “Rich Bachus, Carol Johnston and their 9-year-old daughter, Laney Johnston-Bachus, have spent the last six months traveling around the country exploring as many national parks as they possibly could.” The article notes that “the family has traversed the country with the help of the ‘Every Kid in a Park’ initiative.”

SOLAR CHALLENGE CARS TO STOP AT HOMESTEAD MONUMENT IN 2016. The [AP](#) (11/2, 2.15M) reports that “officials say Homestead National Monument in southeast Nebraska will serve as a stop for American Solar Challenge cars next year.” The rally is part of the NPS’ centennial celebration.

Additional coverage was provided by the [Washington \(DC\) Times](#) (11/2, 283K) and the [Lincoln \(NE\) Journal Star](#) (11/2, 283K).

COLLEGES TO COMMEMORATE 70TH ANNIVERSARY OF CLOSING OF JAPANESE-AMERICAN INTERNMENT CAMPS. The [Arkansas Democrat Gazette](#) (11/1, 294K) reports that “the University of Central Arkansas and Hendrix College will be in the spotlight in the coming days.” According to the article, “the two college campuses, along with other venues in Conway and throughout the state, will host several events to commemorate the 70th anniversary of the closing of the Japanese-American internment camps.” Gayle Seymour, professor of art history and associate dean of the UCA Department of Fine Arts and Communication, said “her department received a ‘major’ grant from the U.S. Department of the Interior, National Park Service, Japanese-American Confinement Sites Grant Program, to host an expansive, multicity art and history initiative to commemorate the 70th anniversary of the closing of the camps.”

EVERGLADES NATIONAL PARK’S UPDATED MANAGEMENT PLAN NOW IN EFFECT. The [Key West \(FL\) Keynoter](#) (10/31, 28K) reports that “Everglades National Park’s updated general management plan, including new rules for the park’s Florida Bay waters, became official Oct. 23.” NPS Southeast Regional Director Stan Austin said, “This is an important milestone to guide park decisions and priorities for many years to come.” Everglades Park Superintendent Pedro M. Ramos noted, “The more complex projects, especially those changing visitor use and access ... will not start before 2016, and may take several years to complete.”

NPS OFFICIALS LOOKING AT MESA VERDE OPTIONS. The [AP](#) (11/2, 2.15M) reports that “officials at Mesa Verde National Park are looking for someone to take over the old visitor center at Mesa Verde’s Far View Center after it was abandoned in 2013 in favor of a new facility at the park’s entrance.” According to the article, “suggestions include using the Far View Center as a performance hall, conference space, restaurant or Native American cultural center.” The article notes that “the park doesn’t have the money to run both the Far View Center and the new visitors and research center.”

ARCHES NATIONAL PARK ASKS FOR PUBLIC INPUT ON HANDLING MASSIVE CROWDS. [KSL-TV](#) Salt Lake City (11/2, 464K) reports that Arches National Park is looking for the public's help in addressing overcrowding at Arches. The NPS has been "working on the problem for years, studying overcrowding at Arches since 2006." However, "accommodating visitors is only half of the job." Kate Cannon, the superintendent for Arches and three other Utah parks, says "it's a balancing act: weighing the needs and safety of visitors against those of the landscape."

NPS FINDS PROCESS OF GETTING EXHIBITS SITUATED IN GREENEVILLE A "CHALLENGE." The [Greeneville \(TN\) Sun](#) (11/2, 43K) reports that "two exhibits, crafted and designed by the Andrew Johnson National Historic Site and the National Park Service's exhibit shop in Virginia, have yet to be placed in Greeneville." The article notes that "one of the exhibits reflected the county and region's pro-Union stance during the secession crisis" and "the other exhibit, called a wayside by the National Park Service, was about the role of the abolitionist newspaper, The Emancipator." NPS spokesman Bill Reynolds said that "the process to get those waysides situated in Greeneville 'proved a challenge.'"

NPS RAISES CONCERNS ABOUT SAUSALITO RIDGELINE HOME PROPOSAL. The [Marin \(CA\) Independent Journal](#) (11/1, 66K) reports that "a proposal to build a home on the edge of a national park in Sausalito is troubling the National Park Service and has raised the hackles of those who fought to keep the area from being developed during a historic and pitched battle in the 1960s." The article notes that "story poles erected at the site make it clear the home at 44 Wolfback Ridge Road would become a dominant feature on the edge of the Gerbode Valley, land that is part of the Golden Gate National Recreation Area near Rodeo Beach." In a letter to the Sausalito Planning Commission, park Superintendent Chris Lehnertz wrote the home would be "visible to the hundreds of thousands of annual visitors to the Marin Headlands, would constitute a glaring visual intrusion on the park, and would diminish the experience of park visitors."

FRIJOLE RANCH AT GUADALUPE MOUNTAINS NATIONAL PARK CLOSED FOR RESTORATION. The [Carlsbad \(NM\) Current-Argus](#) (11/1, 18K) reports that "the Frijole Ranch History Museum at Guadalupe Mountains National Park will be closed through Dec. 12 for restoration work on the historic building." According to the article, "wood components used in the windows and doors of the structure would be repaired."

PEDESTRIAN KILLED AFTER BEING STRUCK BY TRAIN AT CUYAHOGA VALLEY SCENIC RAILROAD. The [Cleveland Plain Dealer](#) (11/2, 1.07M) reports that "a train struck and killed a woman at Cuyahoga Valley National Park, according to a park spokesperson."

Additional coverage was provided by [WJW-TV](#) Cleveland (11/1, 266K).

NPS HOLDING YOUTH ART CONTEST PART DURING NEW RIVER GORGE WILDFLOWER WEEKEND. The [AP](#) (11/2, 2.15M) reports that the NPS is "holding a youth art contest for students in Fayette, Nicholas, Raleigh and Summers counties." The contest is part of the New River Gorge Wildflower Weekend.

US Geological Survey:

RACIAL SLURS NOT UNCOMMON IN FEDERALLY RECOGNIZED SITES. [Yahoo! News](#) (10/30, Brown, Rich, Vocativ, 6.43M) reports that "the United States is literally covered in racial slurs from Dead Negro Hollow, Tennessee, to Wetback Tank, New Mexico, to Dead Injun Creek, Oregon." It notes that "at least 1,441 federally recognized places across the nation include slurs in their official name, a Vocativ data analysis of millions of records reveals." According to the article, "the U.S. Geographic Names Board only changes names in wilderness areas if there is a strong overriding need, so many offensive place names are in federally owned boondocks."

USGS UNVEILS NEW GUIDELINES TO MONITOR SOLAR STORMS. The [redOrbit](#) (11/2, 5K) reports that "citing the need for 'enhanced monitoring' of solar storms capable of disrupting the power grid, interfering with satellites and knocking out GPS systems, the US Geological Survey (USGS) has unveiled a new set of guidelines to monitor and deal with powerful space weather events." According to the article, "the guidelines, developed in collaboration with the US Office of Science and Technology Policy (OSTP) and other federal agencies, looks to limit the potential damage caused by solar flares and coronal mass ejections, include coming up with new benchmarks for geoelectric fields induced in the Earth during magnetic storms, which can in turn be used to strengthen the power grid."

USGS POSTS PHOTOS SHOWING 1,000-YEAR FLOOD STRIKING DEATH VALLEY. The [Huffington Post](#) (11/2, 251K) reports that “in October, a system of storms caused what the U.S. Geological Survey dubbed a ‘1,000-year flood event’ in Death Valley National Park, California.” The USGS has “posted dramatic new satellite imagery of the flooding.”

Top National News:

RYAN SAYS HE WILL UNIFY HOUSE GOP, WARNS HE WON'T DEAL WITH OBAMA ON IMMIGRATION.

House Speaker Ryan made the rounds of the Sunday political talk shows yesterday to discuss his new role as Speaker and his plans for uniting the divided House Republican caucus. While the network news broadcasts did not cover Ryan's comments, print, wire, and online coverage are fairly heavy. Much of the coverage focuses on Ryan's comments about his vision for his Speakership, including his desire to unify the GOP caucus and lead it to consensus. However, his comments on other issues are also covered, with particular attention being paid to his assertion that an immigration reform measure will not be considered while President Obama is in office.

The [Los Angeles Times](#) (11/2, Savage, 3.6M) reports that Ryan said “he will not consider or negotiate an immigration reform bill during President Obama's tenure,” noting that he “had promised the conservative House Freedom Caucus, which opposes easing immigration laws, that he would not move forward on the issue before a new president takes office.” Ryan blamed the President, saying on NBC's “Meet the Press,” “The president has proven himself untrustworthy on this issue because he tried to unilaterally rewrite the law himself. Presidents don't write laws. Congress does.” [Reuters](#) (11/1, Dunham) notes that on [CBS' Face The Nation](#), Ryan said, “I think it would be a ridiculous notion to try and work on an issue like this with a president we simply cannot trust on this issue. ... He tried to go it alone, circumventing the legislative process with his executive orders, so that is not in the cards.”

A brief report from [The Hill](#) (11/1, Wong, 654K) also highlighted Ryan's comments on the President's trustworthiness on the immigration issue and noted that Ryan “said he won't bring other immigration bills to the floor unless they have backing from a majority of House Republicans.” The [Huffington Post](#) (11/1, Stein, 251K) said Ryan's point “is complicated by one minor factor: Obama didn't just try to go it alone.” The President, “along with senators from both parties, passed a comprehensive bill in the Senate.” The measure was never considered in the House, and it was “only then that the president issued his executive actions, which House Republicans have since sued him over.”

The [AP](#) (11/1, Welsh) notes that the move “removes the prospects of a clash with the same House conservatives who made John Boehner's life difficult and helped push Boehner into retirement.” Ryan “suggested” that “clashing with Obama over an issue as complex and volatile as comprehensive immigration reform...is not helpful for the GOP now,” adding that it's “possible to get smaller immigration-related policy passed.” On ABC's “This Week,” Ryan said, “If we believe and have consensus on things like border enforcement and interior security, then fine.” The [New York Times](#) (11/1, A14, Fandos, Subscription Publication, 11.64M) says Ryan's comments “effectively push[ed] off the issue to at least 2017,” and notes that his message “signaled an antagonism toward the White House that both echoed his predecessor, John A. Boehner, and is likely to appeal to the conservatives within the party that forced the previous speaker's resignation.”

[Roll Call](#) (11/1, McPherson, Dumain, 139K) said Ryan “will face difficulties uniting the conference on an approach to overhauling the immigration system, especially since he has said in the past that he supports providing a path for unauthorized immigrants to obtain legal status.”

The [New York Times](#) (11/1, A14, Fandos, Subscription Publication, 11.64M) says Ryan “laid out an agenda for unifying his party and outlined his approach to relationships with congressional colleagues, Mr. Obama and the Republican presidential candidates.” Ryan, the Times adds, “repeatedly made clear that he will take a different approach than Mr. Boehner, whose almost five years as speaker were fraught with Republican Party infighting.” The [New York Daily News](#) (11/1, Durkin, 3.59M) says Ryan told CBS, “I'm redesigning this job. I don't think it can work going forward like it's worked in the past. I can't pick up where John let off. It has to be done differently.” However, he “acknowledged the limits of what Congress can do in a divided government — saying he doubts they'll be able to strip federal funding from Planned Parenthood.” Ryan said on CNN's “State of the Union,” “I think we need to be very clear about what we can and cannot achieve and not set expectations that we know we can't reach given the constraints of the Constitution.”

[Politico](#) (11/1, Shutt, 1.19M) noted that Ryan said he was “not elected speaker to dictate, but to work alongside fellow Republicans to set the House agenda,” telling CBS’ “Face the Nation,” “I was not elected dictator of the House. I was elected speaker of the House. And that means we do it in a bottom up approach. We reach consensus. ... As Republicans, we have common principles. We need to take those common principles and apply them to the problems of the day through consensus to show the country a better way forward. And it’s my job to lead to that consensus, but not to dictate that consensus.” Similarly, the [Daily Caller](#) (11/1, Guest, 366K) reported that Ryan told NBC, “I was elected Speaker of the House to unify the Republican Conference, not to dis-unify the Republican Conference. ... That means, my job is to lead us to consensus and to on big controversial issues, operate on that consensus. And that is exactly how I intend to serve as Speaker.”

Asked how he can control members of the Freedom Caucus on [CNN’s State Of The Union](#) (11/1, Bash, 420K), Ryan stated, “I think members were frustrated that they did not have the opportunity to express their own views on the floor. I think the legislative process has been too tightly controlled and has to be reopened up. I want members of Congress representing their constituents, having the ability in the process to advance ideas.” Ryan told [ABC’s This Week](#) (11/1, Raddatz, 2.73M), “There are basically a number of things I think we need to do to get the House working again like the Founders intended it to work. To make it a more open and participatory process, and that is why I told my colleagues if you want me to do this job then I have to do it differently than it has been done.”

The [Washington Post](#) (11/2, Debonis, 7.78M) says Ryan “blamed a policy vacuum for causing months of Republican infighting on Capitol Hill,” telling [Fox News Sunday](#), “We fight over tactics because we don’t have a vision.” Ryan told Fox and the other networks that he “would put forth a more robust GOP agenda that would serve as a blueprint for Republican candidates going into the 2016 presidential and congressional elections.” Ryan added, “We have to have a vision and offer an alternative to this country so that they can see that if we get the chance to lead, if we get the presidency and if we keep Congress, this is what it will look like, this is how we’ll fix the problems working families are facing.” Ryan said on [CBS’ Face The Nation](#) (11/1, Dickerson, 2.64M), “We’ve taken plenty of tactical risks here in Congress, I think it’s time we take some policy risks by showing people what we really believe, who we are and how we can fix this country’s problems. We have been timid around here for too long, in my judgment. And I think we have to offer people a bold agenda.”

Ryan told [NBC’s Meet the Press](#) (11/1, Todd, 3.08M) that there are four things he believes need to be done: get the House working like it was intended to work, find common ground to advance the nation’s principles, become a more effective opposition party, and to be a proposition party. The [Wall Street Journal](#) (11/1, Hughes, Subscription Publication, 6.23M) says Ryan has offered broad ideas on how he would push a GOP agenda, including an overhaul of the tax system and replacing the ACA, and in Sunday’s interviews, he did not elaborate on the ideas, which, the Journal notes, will be difficult to pass during the current Administration and when Senate Republicans are six votes shy of the 60 they need to get past procedural obstacles.

A [USA Today](#) (11/1, Jackson, 5.56M) analysis says that at the same time Ryan is going “up against congressional Democrats and the Obama administration, he faces suspicious conservative House members who question his commitment to their cause.” While he was elected with the support of the Freedom Caucus, “some conservatives continued to question his views, citing his support for free trade legislation and past backing of some form of legal status for immigrants who are in the country illegally.” The [Huffington Post](#) (11/1, Barron-Lopez, Delaney, McAuliff, 251K) notes that “Republicans and Democrats see in Ryan someone who actually has a chance, slim as it may be, to repair the divides in Congress.” While Ryan’s work on the House Budget Committee made him “a hero to the right, the rare policy wonk who was willing to challenge GOP complacency on the budget, and even take credit for Social Security and Medicare reform ideas that Democrats felt sure would doom him,” he “also seems to have acquired enough perspective on how the other half lives to at least include them in his vision.” Democrats “have responded positive

BASIN AND RANGE NATIONAL MONUMENT DESIGNATION CELEBRATED. [El Mundo Las Vegas](#) (10/30) reports that “We not only support the conservation of national parks but also other activities; we preserve some areas but also support development,” Interior Secretary Sally Jewell told El Mundo in an interview at the Basin and Range land designation celebration last Saturday, October 17th. “I supervise things related to the public lands and water that belong to all Americans,” said Jewell. “I am also responsible for overseeing agreements with Native Americans. A large part of my duties relate to the development of agreements with the U.S. Geographical Survey, which pertain to earthquakes, volcanos, etc.,” she added. “Nevada is the state with the greatest number of federal lands; 87 percent, the majority of these lands, fall under the Bureau of Land Management, and they must, under law, be managed for multiple and sustainable uses. I believe it’s important to note that federal lands were given to the federal government by the states, so it’s in the Nevada constitution that the lands would become federal lands, and it’s our responsibility to manage them and support development in their use,” highlighted Jewell. She also mentioned that although the Latino population is strong, not very many Latinos visit protected areas. “I would like to invite El Mundo readers to visit these places,” said the Interior Secretary.

[El Mundo Las Vegas](#) (10/30) reports that “I cannot express my great appreciation to President Barack Obama for what he has done to preserve the beauty of the Nevada desert for our grandchildren and future generations,” said Senator Harry Reid at Springs Preserve last Saturday, October 17th. During the formal announcement of President Obama’s decision to designate “Basin and Range” as a national monument, the [crowd’s] applause reflected [their] approval of Reid’s heartfelt words. “I love Nevada,” he continued, “and with it, the raw and beautiful desert. The President’s designation protects more than 700 acres of desert and can already be considered a historic, transcendent decision to preserve what we have – its flora, its fauna, its natural treasures – for future generations.” It was mentioned at the event that Nevada environmental groups pushed for the designation and that both Reid and Congresswoman Dina Titus spoke to President Obama about the site and influenced the designation. Interior Secretary Sally Jewell also highlighted Reid’s leadership and his actions alongside Titus to defend the environment and protected areas.

SECRETARY JEWELL URGED TO END TO KLAMATH IMPASSE. The [Oregonian](#) (10/30, 769K) reports that “former Oregon Gov. John Kitzhaber has petitioned U.S. Interior Secretary Sally Jewell and the Obama administration to finally calm the water management issues in the Klamath Basin.” In a letter dated Oct. 21 Kitzhaber “implored Jewell to end the five-year congressional deadlock over the Klamath Basin Restoration Agreement.”

FUTURE OF COLORADO TRAIL PROJECTS UNCERTAIN WITH EXPIRATION OF LWCF. The [Fort Collins \(CO\) Coloradoan](#) (10/29, 59K) reports that “a hefty chunk of annual funding for Colorado trails hangs in the balance because of the jeopardized Land and Water Conservation Fund, which recently expired and faces obstacles for renewal in Congress.” The article notes that “the state’s annual allocation has waned as the average size of the fund has declined, but grant-matching funds from the LWCF have paid for Rolland Moore Park off South Shields Street, Edora Park off East Prospect Road and campgrounds at Horsetooth Reservoir, among other projects.” Colorado began “using the money almost exclusively for trail projects about 12 years ago.”

Congress Urged To Reauthorize LWCF. In an op-ed for the [Seacoast Online \(NH\)](#) (10/28, King, 28K), Sen. Angus King says that he is “committed” to reauthorizing the LWCF. He says that the fund has helped “areas increase accessibility to visitors and enhance their positive impact on the local economy.” According to King,

the fund “supports local recreational efforts that benefit Maine communities.”

HOUSE REPUBLICANS REVIVE BILL ENCOURAGING CLEAN UP OF MINES. The [AP](#) (10/30, 2.15M) reports that “Congressional Republicans revived ‘Good Samaritan’ legislation Thursday designed to encourage companies and nonprofits to help clean up thousands of abandoned mines across the nation by protecting them from liability for environmental accidents.” The article notes that “the proposal was one of three the House Natural Resources Committee unveiled after the Environmental Protection Agency inadvertently unleashed 3 million gallons of wastewater laced with heavy metals from an inactive Colorado gold mine in August.” A second measure would allow the BLM and “nonprofits to solicit donations to clean up abandoned mines and oil and gas wells. The BLM oversees more than 380,000 square miles of federal land.” Finally, “the third would funnel more money toward training mining engineers as the current generation nears retirement.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/30, Elliott, 283K), the [Denver \(CO\) Post](#) (10/30, Press, 825K), the [Albuquerque \(NM\) Journal](#) (10/30, 263K), the [Boulder \(CO\) Daily Camera](#) (10/30, 122K), [KCNC-TV Denver \(CO\)](#) Denver (10/29, 57K), and [KUSA-TV Denver \(CO\)](#) Denver (10/29, 559K).

BILL WOULD REQUIRE BUREAU OF ECONOMIC ANALYSIS TO ASSESS FINANCIAL VALUE OF OUTDOOR RECREATION. [Politico Pro](#) (10/29) reports that Sens. Jeanne Shaheen and Cory Gardner say “the federal government doesn’t measure the economic value” of outdoors activities, “and the two senators are out to fix it.” The lawmakers are “introducing a bill today that would require the Bureau of Economic Analysis to assess the financial value of outdoor recreation in the economy.” Shaheen said, “The outdoor recreation sector is a critical sector of our economy – and it’s time we start counting it.”

Also reporting on the story is the [E&E Daily](#) (10/29, Subscription Publication).

FOUR REPUBLICAN SENATORS LAUNCHES NEW COALITION WITH NEW APPROACH TO ENVIRONMENT. [Politico Pro](#) (10/29, Subscription Publication) reports that “four moderate Senate Republicans – including two facing tough reelection bids – are joining forces to rethink how the GOP approaches environmental issues.” Sens. Kelly Ayotte, Mark Kirk, Lindsey Graham and Lamar Alexander will “launch a new informal coalition on Thursday in an effort to broaden the Republican conference’s approach to environmental policy beyond its crusade to overturn EPA regulations.” The Energy and Environmental Working Group will “be a way for us to bring together members of our party and start an ongoing conversation about these topics – like how we can best protect our environment and climate, pursue common sense and market-based reforms to grow our economy and promote cleaner energy production,” Ayotte said in a statement.

Additional coverage was provided by [The Hill](#) (10/29, Cama, 654K).

HOUSE PANEL HOLDS HEARING ON BILL REFORMING FEDERAL LANDS RECREATION ENHANCEMENT ACT. The [E&E](#) (10/29) reports that “Obama administration officials joined Democrats and a conservationist yesterday in opposing provisions in a draft bill that would require Congress to approve any new or increased fees to visit national parks, refuges or federal recreation areas.” The comments came as “part of a broader debate at a hearing before a House Natural Resources panel on the future of recreation fees on public lands.” At issue before the Subcommittee on Federal Lands was “a draft bill by full committee Chairman Rob Bishop (R-Utah) that would extend and reform the Federal Lands Recreation Enhancement Act, which is set to expire in less than two years.”

BILL WOULD EXPAND SAN GABRIEL MOUNTAINS MONUMENT. The [Santa Clarita Valley \(CA\) Signal](#) (10/30, 23K) reports that “the boundaries of the San Gabriel Mountains National Monument could creep farther into the Santa Clarita Valley under a bill recently introduced by Pasadena Congresswoman Judy Chu.” Chu announced “last week she has introduced a bill to expand its boundaries and create a new national recreation area around the San Gabriel River corridor.” She said, “The designation of the San Gabriel Mountains as a national monument was an important step towards making our mountains healthy again, but we still have a long road ahead in order to see that goal through.” Her bill, H.R. 3820, would “expand the monument’s boundaries by about 109,000 acres in the western Angeles National Forest — stretching into areas near Placerita Canyon, Elsmere Canyon and Sand Canyon Road in the Santa Clarita Valley.”

GROUPS PRESS CONGRESS ON ENVIRONMENTAL PROVISIONS OF TRANS-PACIFIC PARTNERSHIP. [Politico Pro](#) (10/29, Subscription Publication) reports that “a coalition of environmental and consumer groups are laying out their vision for what the Trans-Pacific Partnership should look like and urging members of

Congress to vote against the deal if it doesn't meet those standards." According to the article, "in a letter today to lawmakers, Food and Water Watch, Greenpeace USA, the Sierra Club and other groups highlighted their demands for the environmental chapter as well as enforcement provisions and rules overall." The article notes that "the pact, reached in Atlanta earlier this month, will likely meet some, but not all, of their demands on the environment."

Additional coverage was provided by [The Hill](#) (10/30, Cama, Needham, 654K).

OBAMA URGED TO DECLARE NEW ENGLAND CANYONS AND SEAMOUNTS NATIONAL MONUMENT.

For the "Congress" blog of [The Hill](#) (10/30, Sancho, 654K), Gorka Sancho, Ph.d., a professor of Biology at the Grice Marine Laboratory of the College of Charleston, writes that more should be done to protect "vitally important areas" in the Atlantic Ocean. Sancho notes that "more than 140 marine scientists across the country have voiced their support for the permanent protection of the biologically diverse and vulnerable ocean habitats found in the New England Canyons and Seamounts as a marine monument." Sancho urges President Obama "to reclaim the United States' leading role in protecting our oceans by declaring the New England Canyons and Seamounts National Monument."

Empowering Native American Communities:

CONGRESS STRUGGLES WITH CARCIERI FIX. [Politico](#) (10/30, 1.19M) reports on "how the Supreme Court and a divided Congress have stymied efforts by poor tribes to recover long-lost lands." The issue at hand is "how Congress should respond to a 2009 ruling in which the justices narrowed the mandate of the Indian Reorganization Act that has guided federal policy since the New Deal." According to the article, "getting a simple legislative fix is anything but simple in Congress, as major stakeholders have seized the chance to demand larger changes — not just in IRA but also the direction of Indian gaming."

HOUSE SUBCOMMITTEE HOLDS HEARING ON TRIBAL RECOGNITION BILL. The [E&E Daily](#) (10/29, Subscription Publication) reports that "a House Natural Resources subcommittee squabbled yesterday at a contentious hearing on legislation that would give Congress control over tribal recognition, a process that's now managed by the Interior Department." Natural Resources Chairman Rob Bishop is "making a bid to fix what he sees as Interior overstepping its bounds." His bill would "give final authority for all approvals of tribal recognition to Congress."

CHINOOK INDIAN NATION CONTINUES FIGHT FOR FEDERAL RECOGNITION. The [Courthouse News](#) (10/29, 7K) reports on the Chinook Indian Nation's quest for federal recognition. Chinook Tribal Chairman Tony Johnson "launched the Executive Recognition Project in June of this year." The article notes that "every day since June 8, the tribe has sent a letter to President Barack Obama, asking him to take another look at their situation."

ACTIVIST CALLS FOR BOYCOTT OF NATIVE HAWAIIAN ELECTION. The [Maui \(HI\) News](#) (10/30, 52K) reports that "Native Hawaiian activist and Molokai resident Walter Ritte Jr. announced Wednesday that he is no longer seeking to be a delegate to a Native Hawaiian constitutional convention, calling the process 'not pono' and asking others to boycott the election of delegates beginning next month." In remarks at a news conference at the University of Hawaii-Manoa on Wednesday morning, Ritte said "he 'concluded' that the 'aha or constitutional convention being funded and promoted by the state Office of Hawaiian Affairs is 'a continuation of the U.S. goal to illegally occupy the Hawaiian Islands and have been unprincipled, defective and divisive.'" Ritte said, "I cannot participate in a process that is not pono and have decided to remove my name from consideration to be a delegate in the 'aha. We need to be steadfast and remain on the path that our kupuna have laid because we are still a sovereign and independent state."

Additional coverage of the election was provided by [Al Jazeera America](#) (10/30, 138K).

SEQUOYAH HIGH SCHOOL STUDENTS RETURN TO DORMS AFTER RENOVATIONS. The [Cherokee \(OK\) Phoenix](#) (10/30, 442) reports that "after temporarily being relocated to the old Jack Brown Center for approximately six weeks, Sequoyah High School students recently moved back into school dormitories after the dorms underwent renovations." According to the article, "with Bureau of Indian Education funding, each dorm building received a new roof as well as fresh paint, any repairs that were needed and new furnishings including washing machines and showers."

US INDICTS 17 IN PROBE OF ARIZONA RESERVATION DRUG TRAFFICKING. The [AP](#) (10/30) reports from Phoenix that federal prosecutors “have announced a joint law enforcement operation targeting drug trafficking on an American Indian reservation in western Arizona.” The Arizona US Attorney’s office announced on Thursday that “a federal grand jury indicted 17 people in the investigation focused on the Colorado River Indian Tribes’ reservation.” Prosecutors said “charges against those indicted include drug trafficking and conspiracy to commit trafficking.”

Office of Insular Affairs:

GUAM MEMORIAL HOSPITAL RECEIVES GRANT MONEY. The [Pacific \(GUM\) Daily News](#) (10/29, 61K) reports that “federal funds will help move forward the renovation of a maternity ward at the island’s public hospital.” Guam Memorial Hospital will “receive \$2.26 million in compact-impact money to be used as initial funding for the renovation of its Family Birth Center and to help finance a related bank loan.” Interior Assistant Secretary for Insular Areas Esther Kia’aina “this week announced the release of \$7.6 million in grant funding to the government of Guam through the Office of Insular Affairs’ Compact Impact Assistance Program.”

Tackling America’s Water Challenges:

FARMERS NEAR SACRAMENTO RIVER STRIKE DEAL TO USE WATER FOR WINTER BIRDS. The [Chico \(CA\) Enterprise-Record](#) (10/29, 90K) reports that, “migrating waterfowl are looking for wet places to land and feed,” but the drought in California “means less winter water available for fields and less water for those hungry birds.” This week, “several Sacramento River farm water districts finalized a deal with the federal Bureau of Reclamation to use water later in the year, to provide water for birds in November.”

Additional coverage was provided by the [Oroville \(CA\) Mercury-Register](#) (10/29, 1K).

JUDGE CONSIDERS MOTION TO DISMISS IRRIGATOR LAWSUIT AGAINST BOR. The [Salem \(OR\) Capital Press](#) (10/29, 113K) reports that “a U.S. District Court judge will decide in the next two months whether to dismiss a lawsuit filed by group of Eastern Washington irrigators against the U.S. Bureau of Reclamation.” Lawyers for the Columbia-Snake River Irrigators Association and the agency “made their arguments before Chief Judge Rosanna Malouf Peterson at a hearing Oct. 28 in Richland, Wash.”

ADDITIONAL COVERAGE: CALIFORNIA DROUGHT KILLING OFF SALMON. Additional coverage of the drop in Chinook salmon numbers in the Sacramento River was provided by [Reuters](#) (10/30, Bernstein).

Securing America’s Energy Future:

Renewable Energy:

BOEM DIRECTOR HOPPER SAYS OFFSHORE WIND IN NEW YORK IS TOP PRIORITY. The [Albany \(NY\) Times Union](#) (10/30, 344K) reports that speaking at the fall conference of the Alliance for Clean Energy New York, BOEM Director Abigail Ross Hopper said Thursday that “helping New York state develop offshore wind projects is a top priority right now.” Hopper said that “she would like to see offshore wind projects get off the ground by the time Obama leaves office, but there is no set timeline.”

Onshore Energy Development:

REPORT CONDEMNS OSMRE PRACTICES. The [Beckley \(WV\) Register-Herald](#) (10/30, 70K) reports that “a House of Representatives committee recently filed legislation aimed at amending the Surface Mining Control and Reclamation Act to ensure transparency in the creation of environmental regulation after an extensive report called into question the regulatory effect of the Office of Surface Mining Reclamation and Enforcement.” The House Natural Resources Committee said “the legislation seeks to improve overall transparency in the Office of Surface Mining Reclamation and Enforcement’s (OSMRE) regulatory actions.” The bill was “drafted partly in response to the OSMRE’s ongoing rule-making process governing the interaction between surface mining operations and streams — known as the Stream Buffer Zone rule (SBZ) which requires OSMRE to make publicly available all scientific products used in its regulatory actions and also calls for a study to investigate the regulatory efficiencies of the rule the OSMRE seeks to amend.”

TRAPPER PUBLIC COMMENT OPENS. The [Steamboat \(CO\) Pilot & Today](#) (10/29, 30K) reports that “on Thursday, the beginning of the public comment period on the environmental assessment for Trapper Mine coincided with a visit to the area by Colorado Attorney General Cynthia Coffman.” The Office of Surface Mining and Reclamation “kicked off the 30-day comment period with a well-attended public outreach meeting at Moffat County Fairgrounds Pavilion.”

CLOUD PEAK CUTS PRODUCTION. The [Bellingham \(WA\) Herald](#) (10/30, 101K) reports that “Montana’s largest coal producer expects to reduce shipments to Asia next year through a West Coast port, which should reduce coal-train traffic through Bellingham and other Whatcom County cities.” Cloud Peak Energy Inc. announced Wednesday that “it had renegotiated its long-term agreement to ship coal through British Columbia’s Westshore Terminals.” Cloud Peak said “production volumes at its Spring Creek Mine near Decker, Montana, would be reduced accordingly.”

BLM’s Coal Policy Analyzed. [The Atlantic](#) (10/30, 2.66M) reports that “as many government agencies have changed how they address climate change, the BLM has not: It remains the BLM’s statutory imperative to find a fair market price for coal.” According to the article the “unreformed” BLM can sell its minerals abroad, “becoming a kind of global coal slumlord.”

SENATE TO HOLD HEARING ON OKLAHOMA EARTHQUAKES. The [AP](#) (10/30) reports regulators from the oil and gas industry and seismologists “are scheduled to testify about a dramatic rise in the number of earthquakes in Oklahoma.” The Senate Energy Committee has slated “a hearing on Friday to study the increase in seismic activity.” The AP adds “growing scientific evidence suggests the sharp rise in earthquakes in Oklahoma is linked to the injection of wastewater from oil and gas drilling deep into the earth.”

Offshore Energy Development:

SHELL CONSIDERING OPTIONS ON ALASKA ASSETS, LEASES. The [Houston \(TX\) Chronicle](#) (10/29, 2.15M) reported that “in a statement released with its third quarter earnings Thursday, Shell said it was ‘considering our options in order to protect the remaining value of our assets and leases’ in Alaska.” Shell CEO Ben van Beurden “also suggested Shell wants to keep its options open in the U.S. Arctic,” saying on an earnings call, “While Burger turned out to be uneconomic, there are of course other potential prospects in Shell’s Chukchi leasehold as well as other areas offshore Alaska.” The Interior Department “just rejected Shell’s bid to ‘suspend’...its Beaufort and Chukchi sea leases, which otherwise expire between 2017 and 2020,” but Shell could appeal that decision. The article noted, however, that holding onto the territory comes with escalating annual rental payments.

Additional coverage was provided by [Fuel Fix \(TX\)](#) (10/29, 28K) and the [UPI](#) (10/29).

OIL COMPANIES SAY OFFSHORE DRILLING IS SAFE. The [Myrtle Beach \(SC\) Online](#) (10/29, 33K) reports that “Briarcliffe Acres last week became the latest municipality to pass a resolution against offshore drilling, joining 23 other S.C. coastal towns including Myrtle Beach and North Myrtle Beach in a stance against oil exploration.” Critics have “lobbied against drilling and exploration, resurrecting images of the Deepwater Horizon disaster in the Gulf of Mexico, which they say can happen here if a deepwater rig is on the way.” However, “representatives of Shell Oil, ION Geophysical Corp. and Consumer Energy Alliance told a small group in a Myrtle Beach Area Chamber of Commerce conference room Thursday that much has changed since Deepwater Horizon.” They said “tapping into the oil could keep jobs at home, bring billions to the state, won’t be seen from the coast and the whole process is safer now.”

CONOCOPHILLIPS ENDS DEEPWATER EXPLORATION TO FOCUS ON US SHALE PLAYS. The [Houston Chronicle](#) (10/29, Eaton, 2.15M) reports that ConocoPhillips will withdraw from its deep-water exploration by 2017 in order to focus on “other potential investments, especially onshore shale plays,” particularly the Texas and Midwestern shale plays.

TRANSOCEAN SUIT OFFICIALLY ENDED AFTER SETTLEMENT WITH FIVE GULF STATES. The [AP](#) (10/30) reports that Federal lawsuits filed by Alabama, Florida, Mississippi, Louisiana and Texas against Transocean were officially dismissed Thursday by the request of all parties after reaching a settlement. The four Gulf states will receive a combined \$31 million, with Florida’s share not yet disclosed, the AP adds. The [Chicago Sun-Times](#) (10/30, 758K) adds that Transocean admitted no guilt in the settlement of the 2011 oil spill.

TEXAS LAWYER AMONG SEVEN ACCUSED OF FRAUD LINKED TO BP OIL SPILL CLAIMS. [AP](#) (10/29) reports Texas lawyer Mikal Watts is among seven people “accused of faking more than 40,000 damage claims after the BP oil spill in 2010, federal prosecutors said Thursday.” The charges include conspiracy, mail and wire fraud, and identity theft and involve 41 alleged victims, US Attorney Gregory Davis said, urging potential additional victims to come forward. The Federal investigation began in 2011, two years before BP sued Watts and his firm claiming that “more than half of Watts’ clients were not commercial fishermen, were never properly signed up or were dead,” the AP reports.

America’s Great Outdoors:

Bureau of Land Management:

WILD HORSE ADVOCATES OUTRAGED BY SLAUGHTER OF 1,800 HORSES. The [Los Angeles Times](#) (10/29, Glionna, 3.6M) reports that wild-horse activists are outraged by a government report that has “confirmed their suspicions: The Bureau of Land Management sold 1,794 federally protected wild horses to a Colorado rancher who sent them to slaughter.” Horse advocates claim that the report by the U.S. Interior Department Office of Inspector General shows “a picture of government incompetence and a willful evasion of the law.” They are now “collecting petition signatures to pressure Western legislatures to overhaul the government program that removes wild horses from the range.”

Additional coverage was provided by [Wyoming Public Radio](#) (10/30).

Crowdfunding Set Up For Old Wild Horse In BLM Auction. The [Reno \(NV\) Gazette-Journal](#) (10/29, 194K) reports that “a battered and scarred wild horse named Sarge who has been rounded up twice off the Nevada range is up for auction by the BLM, and Ann Marie Yow has started a crowdfunding page because she fears he will go to a buyer who will not care for him well or maybe even sell him for slaughter.” The article notes that “even though Sarge is relatively old and pretty beat up, the BLM’s adoption site already has 238 bids for him, with a current high bid of \$2,580.” According to the article, “the interest likely stems from his notoriety in wild horse advocacy and ranching circles.”

JUDGE ORDERS RECAPTURE CANYON ATV PROTEST RIDERS TO PAY \$96K IN DAMAGES. [E&E Publishing](#) (10/29, 705) reports that a federal judge on Wednesday “ordered a Utah county commissioner and his co-defendant to pay \$95,956 for damage caused in an illegal all-terrain vehicle protest ride through Recapture Canyon in May 2014.” Federal attorneys argues that “while San Juan County Commissioner Phil Lyman and Monte Wells did not cause the damage themselves, they were responsible because they organized and publicized the ride through social media, radio, newspapers and television” and District Judge David Nuffer agreed.

JUDGE CONSIDERS LAWSUIT OVER SUICIDE IN ARTIFACT LOOTING CASE. The [AP](#) (10/30, 2.15M) reports that “a federal judge peppered attorneys with questions Thursday that suggested he’s struggling to decide if federal agents unleashed excessive force against a southern Utah doctor who killed himself a day after his 2009 arrest in a multistate artifact looting investigation.” During a hearing in Salt Lake City, U.S. District Judge Robert Shelby “told an attorney for James Redd’s family that he doesn’t see sufficient evidence to suggest the action taken by federal Bureau of Land Management agents necessarily violated Redd’s constitutional rights.” However, “Shelby also told a Department of Justice attorney representing the agent being sued that the case alarms him, making him consider asking a jury to determine if agents crossed the line during the raid.” Shelby said “he would issue a ruling at a later date.”

Additional coverage was provided by the [New York \(NY\) Times](#) (10/30, Press, Subscription Publication, 11.64M), the [Salt Lake \(UT\) Tribune](#) (10/30, 339K), the [Washington \(DC\) Post](#) (10/30, Brady Mccombs |, Ap, 7.78M), the [Washington \(DC\) Times](#) (10/30, Mccombs, 283K), the [Daily Mail \(UK\)](#) (10/30, 5.31M), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (10/30, 464K).

HISTORIC CANYON CREEK STATION DONATED TO BLM. [KTVB-TV](#) Boise, ID (10/29, 131K) reports that the Canyon Creek Station in Elmore County has been donated to the BLM. Anita Fickle said “her family decided the site of so many stories should be public property.” The article notes that “handing the station over to the BLM means the agency, with help from the Idaho Heritage Trust, can restore the station and open it up for school groups, tourists and history buffs alike.”

DINOSAUR FOSSILS HELICOPTERED OUT OF BISTI WILDERNESS. [KRQE-TV](#) Albuquerque, NM (10/29, 34K) reports that “two dinosaurs were pulled out of New Mexico’s northwestern badlands with the help of helicopters” on Thursday. The fossils were airlifted “so they could begin their journey to the museum in Albuquerque.” The article notes that “the massive effort was a collaboration between museum staff, the BLM and the NM National Guard with the use of their Blackhawk helicopters.”

BLM EMPLOYEE VIOLATED POLICY IN POSTING ONLINE COMMENTS. The [Salem \(OR\) Capital Press](#) (10/29, 113K) reports that “a BLM employee who impersonated an agency retiree to make comments on a story on the Capital Press website violated agency policy, according to an agency spokesperson.” But “it’s unclear...how seriously the agency is taking the violation.” The BLM has “identified an employee who used a government computer to impersonate a former coworker and post comments on an article on [capitalpress.com](#) about the arson convictions of two Oregon ranchers.”

BLM EDUCATION SPECIALIST RETIRES AFTER 23 YEARS. The [Durango \(CO\) Herald](#) (10/28, 31K) reports that “education specialist Megg Heath is retiring from the Bureau of Land Management’s Dolores field office after 23 years of service.” According to the article, “as BLM’s National Lead for Education, Heath connected teachers with curriculum focused on the science and cultural resources of public lands.”

NEVADA’S SAGE GROUSE LAWSUIT SUPPORTED. In an op-ed for the [Lahontan Valley \(NV\) News](#) (10/30, 11K), Bob Clifford, chairman of the Fallon Tea Party, writes that “Attorney General Adam Laxalt has taken exactly the right action in joining, and now leading, the lawsuit against the Bureau of Land Management, the Department of the Interior and other DOI agencies.” He claims that “the direction is clearly to use greater sage grouse actions to shut down as much of land in the western states as possible, legal and ethical, or not.”

Fish and Wildlife Service:

FWS AWARDS \$2.5M IN GRANTS TO COMBAT DEADLY BAT DISEASE. The [JAVMA News](#) (10/29, 4K) reports that the FWS has “awarded an additional \$2.5 million in grants in the ongoing effort to combat white-nose syndrome, the lethal fungal disease that has killed millions of North American bats since its 2007 discovery in New York.” The agency “announced the new funds Sept. 29.” FWS Director Dan Ashe said, “Previous research funded by the U.S. Fish and Wildlife Service has led to major breakthroughs in our understanding of white-nose syndrome, providing a measure of hope that we can defeat this devastating disease.”

FWS ISSUES NEW RULE OPENING WYOMING FOR REINTRODUCTION OF BLACK-FOOTED FERRETS. [E&E Publishing](#) (10/29, 705) reports that the FWS announced Thursday “it will finalize a rule that opens all of Wyoming up to low-risk reintroductions of black-footed ferrets, one of the most endangered mammals in North America.” According to the article, “issued under a section of the Endangered Species Act that allows for experimental reintroduction efforts, the rule would designate captive-bred ferrets released into Wyoming as ‘nonessential’ to the survival of the species.” Under the rule, “landowners wouldn’t need to ask Fish and Wildlife for permission to incidentally harass or kill black-footed ferrets found on their property.”

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (10/30, 2.15M), the [Mattoon \(IL\) Journal Gazette & Times Courier](#) (10/30, 37K), the [Washington \(DC\) Times](#) (10/30, Gruver, 283K), the [Casper \(WY\) Star-Tribune](#) (10/30, 81K), [KGAB-AM Cheyenne \(WY\)](#) Cheyenne, WY (10/30, 274), and [KGWN-TV Cheyenne \(WY\)](#) Cheyenne, WY (10/30, 519).

THREE CHARGED IN CONNECTION WITH NEW MEXICO RAIDS. The [Albuquerque \(NM\) Journal](#) (10/30, 263K) reports that “an indictment unsealed this morning in federal court names three individuals with criminal violations of the Indian Arts and Crafts Act, which makes it illegal to sell products in a manner that falsely suggests it is Indian-produced if it is not.” According to the article, “details of the investigation aren’t yet known, but federal agents executed search warrants in Albuquerque, Santa Fe and other locations — more than a dozen— in New Mexico and elsewhere on Wednesday.”

The [Albuquerque \(NM\) Journal](#) (10/30, 263K) reports that “U.S. Attorney Damon Martinez and Nicholas Chavez, regional law enforcement chief for U.S. Fish and Wildlife, announced 16 search warrants executed and the unsealing of an indictment, though copies of both remained unavailable many hours after the documents had been unsealed by U.S. District Court.” The article notes that “the indictment charges Nael Ali, 53, of Albuquerque; Christina Bowen (Sandoval), 41, of Los Lunas; and Mohammed Abed Manasra, 53, of Albuquerque.”

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (10/30), the [Washington \(DC\) Times](#) (10/30, Contreras, 283K), the [Albuquerque \(NM\) Journal](#) (10/30, 263K), [ABC News](#) (10/30, 3.35M), the [Daily Mail \(UK\)](#) (10/30, 5.31M), the [Washington \(DC\) Post](#) (10/30, Russell Contreras |, Ap, 7.78M), [KOAT-TV Albuquerque \(NM\)](#) Albuquerque, NM (10/30, 56K), and [KOB-TV Albuquerque \(NM\)](#) Albuquerque, NM (10/30, 78K).

FWS PLACING NEW RESTRICTIONS ON IMPORTATION OF 11 SPECIES OF INJURIOUS FISH. [The Hill](#) (10/30, Devaney, 654K) reports that the FWS is “placing new restrictions on the importation of 11 species of injurious fish that could either harm people or have a negative impact on agriculture.” According to the article, “the injurious fish include the crucian carp, Eurasian minnow, Prussian carp, roach, stone moroko, Nile perch, Amur sleeper, European perch, zander and wels catfish.”

PLANS FOR DOCK, FISHING PIER AT DETROIT RIVER INTERNATIONAL WILDLIFE REFUGE PROGRESS.. The [AP](#) (10/30, 2.15M) reports that “plans are moving forward for a dock and a fishing pier at the Detroit River International Wildlife Refuge.” The DTE Energy Foundation has “awarded \$25,000 toward construction of the dock and pier at the Refuge Gateway in Trenton.” According to the article, “those involved say the grant helped the project to recently go to bid.”

SOME OFFICIALS UNSATISFIED WITH SAGE GROUSE DECISION. The [Price \(UT\) Sun Advocate](#) (10/30, 19K) reports that “local government officials across the west are somewhat relieved, but not entirely satisfied with the U.S. Fish and Wildlife Service decision that the greater sage-grouse does not warrant protection under the Endangered Species Act.” For example, Utah Gov. Gary Herbert “released a statement in reaction to the announcement, saying local efforts were ignored in the decision making process.” Also, Carbon County Lands and Access Administrator Rex Sacco said, “The federal government has gone further than their authority allows in trying to control more land.”

ENDANGERED WOODPECKER SPECIES RELOCATED TO GREAT DISMAL SWAMP. The [AP](#) (10/30, 2.15M) reports that “four pairs of endangered red-cockaded woodpeckers have been relocated to Virginia’s Great Dismal Swamp National Wildlife Refuge.” The FWS says “the woodpecker hadn’t been seen in the refuge since 1974 and was re-established there earlier this month.”

ENDANGERED WOLF PACK BEING SLAUGHTERED AFTER FALSE STORY OF AN ATTACK. The [Wisconsin Gazette](#) (10/30) reports that “in the wake of a discredited claim of an alleged ‘attack’ against a hunter and NRA cheerleader last month in Adams County, the Wisconsin DNR and U.S. Fish and Wildlife Service are slaughtering protected wolves in the 4,965-acre Colburn Wildlife Area.” The article notes that “the eradication has been ordered despite the fact that Great Lakes wolves were relisted last year under the Endangered Species Act, thus making it illegal to hunt the animals.”

PETITION DRIVE SEEKS TO PRESERVE ULTRALIGHTS IN WHOOPING CRANE MIGRATIONS. The [Milwaukee Journal Sentinel](#) (10/30, 691K) reports that “an organization that leads young migrating whooping cranes from Wisconsin to Florida with ultralight aircraft is mounting an online petition drive to protest plans by federal authorities to phase out the planes.” According to the article, “efforts for a full recovery of the cranes has faltered and prompted the U.S. Fish and Wildlife Service this month to recommend that the slow-flying aircraft be grounded — possibly as early as next year.” Operation Migration, “a nonprofit organization that pioneered the use of ultralights in 2001, is going on the offensive after the agency recommended that its program come to an end.”

ADDITIONAL COVERAGE: ANIMAL ADVOCATES OPPOSE IMPORTATION OF ELEPHANTS FROM SWAZILAND. Additional coverage that “seventy-five scientists, conservationists and animal welfare advocates wrote a letter opposing the federal approval of import permits that would send 18 elephants from the South African country of Swaziland to zoos in Wichita, Dallas and Omaha” was provided by the [Wichita \(KS\) Eagle](#) (10/30, 257K).

National Park Service:

LAURA BUSH, DAUGHTER JENNA CO-WRITING CHILDREN’S BOOK ABOUT NATIONAL PARKS. The [AP](#) (10/30, 2.15M) reports that “former first lady Laura Bush and daughter Jenna Bush Hager are working on another children’s book.” The Bushes are “collaborating with illustrator Jacqueline Rogers on ‘Our Great Big Backyard,’ a picture story about a girl named Jane whose family road trip to the country’s national parks leads

to her ‘paying attention to the majestic sights and spending less time looking at her screen.’” The article notes that “the book is coming out in May to coincide with the centennial of the National Park Service.” Laura Bush and first lady Michelle Obama are honorary co-chairwomen of the centennial.

Additional coverage was provided by [US News & World Report](#) (10/29, 996K), the [Washington \(DC\) Post](#) (10/30, Hillel Italie |, Ap, 7.78M), the [Daily Mail \(UK\)](#) (10/30, 5.31M), [People](#) (10/30, 45.92M), and [Yahoo! News](#) (10/30, Italie, 6.43M).

SOUTH DAKOTA LOOKS FORWARD TO LANDMARK EVENTS NEXT YEAR. The [AP](#) (10/30, 2.15M) reports that “tourism in South Dakota got a boost this year with two landmark anniversaries, and officials hope next year will see the same.” The article notes that “two key anniversaries next year” are the 75th anniversary of the Mount Rushmore National Memorial and the NPS’ centennial.

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/30, 283K) and [Skift](#) (10/29).

BRIGHT STAR THEATRE PARTNERS WITH NPS. The [Broadway World](#) (10/30, 97K) reports that “Bright Star Touring Theatre based in Asheville, North Carolina is partnering with the National Park Service to provide performances for National Park patrons in 2016. “The company was “awarded a federal contract to create an original play entitled The Black Experience in the Heartland.” The article notes that “the partnership coincides with the 100th Anniversary of the National Park Service and is intended to draw diverse audiences to National Parks in honor of the Centennial.”

SHELBURNE BOY SCOUT TROOP 602 PLAN NATIONAL PARK TRIPS. The [Shelburne \(VT\) News](#) (10/29) reports that “the highlight of the 2015-16 season” for Shelburne Boy Scout Troop 602 will be “a trip to three national parks in northern California and southern Oregon.” The article notes that “the trip is in conjunction with the 100th anniversary of the National Park Service (NPS) in 2016.” According to the article, “the troop began preparing for the trip last April when the boys visited Washington D.C. to learn about the roles of the NPS in conserving our national treasures.” The scouts “met with NPS Director Jon Jarvis and toured the National Mall with an interpretive ranger—a visit that ended with a special trip to the top of the Washington Monument.”

WATCHDOG RELEASES INFORMATION ON HIRING PRACTICES AT NPS. The [Greenwire](#) (10/29, Subscription Publication) reports that “an internal government watchdog yesterday publicly released information about questionable hiring, contracting and spending at the National Park Service.” The disclosures were “included in a batch of a dozen report summaries released by the Department of the Interior’s Office of Inspector General.” The article note that “the most significant report summary included in yesterday’s releases concerned a partially substantiated allegation that the superintendent of an unnamed park improperly hired her lover.” The OIG “confirmed in a December 2014 report that the anonymous superintendent had ‘selected her roommate (with whom she shared a two-bedroom apartment) to fill a 1-year term position as a seasonal law enforcement training program manager.’” However, “the investigators ‘found no evidence’ that the two were romantically involved with each other.”

NPS DEVELOPING PLANS FOR THE MISSOURI RIVER. [WNAX-AM](#) Yankton, SD (10/30) reports that the NPS is “developing management plans for three areas of the Missouri National Recreational River near Yankton.” According to the article, “the changes could include more signs, picnic tables, restrooms and more camping areas.” A series of public input meetings are being held this week.

ESPN RECEIVES PERMIT FOR LIVE COLLEGE FOOTBALL PREGAME SHOW NEAR INDEPENDENCE MALL. The [Philadelphia Inquirer](#) (10/30, Laughlin, 641K) reports that Philadelphia has “allowed ESPN to close for more than 48 hours a block of Market Street – a major city thoroughfare – near Independence Mall to set up its roving weekly college football GameDay live telecast.” Also, “a permit issued Wednesday by the U.S. Department of the Interior’s National Park Service gave ESPN Productions Inc. permission to operate from 6 a.m. Thursday to 7 p.m. Saturday.”

ADDITIONAL COVERAGE: ONE ACRE ADDED TO FIRE ISLAND NATIONAL SEASHORE BECAUSE OF HURRICANE SANDY. Additional coverage that one acre has been added to Fire Island National Seashore was provided by [Newsday \(NY\)](#) (10/30, 1.42M).

ADDITIONAL COVERAGE: FLOODING DAMAGES DEATH VALLEY. Additional coverage of the damaged caused by flooding in Death Valley was provided by the [Washington Post](#) (10/30, Fritz, 7.78M).

US Geological Survey:

RESEARCHERS SAY ALLIGATOR POPULATION IN EVERGLADES DECLINE DURING DRY SEASONS.

The [Gainesville \(FL\) Sun](#) (10/29, 86K) reports that “alligator populations in the Everglades decline during dry seasons, a team of researchers from the University of Florida, U.S. Geological Survey, and the U.S. Fish and Wildlife Service have discovered.” Examining “a decade of night spotlight counts in the Loxahatchee National Wildlife Refuge, the researchers found that alligator populations declined in large numbers after dry years, and rebounded during wet seasons.” USGS research ecologist Hardin Waddle, lead author of the study, said, “They don’t need it wet all the time, but if dry events increase in frequency and intensity, this could be problematic for alligator numbers in the greater Everglades ecosystem.”

Top National News:

RYAN SWORN IN AS SPEAKER, VOWS TO FIX “BROKEN” HOUSE. Rep. Paul Ryan’s election to House Speaker on Thursday garners extensive print and online coverage, receiving four and half minutes of coverage on the network news broadcasts. While reports almost universally note that Ryan, who promised to fix the “broken” House, was elected to unite a deeply divided GOP caucus, they also indicate that he will have to act quickly to show hardliner conservatives in the caucus that his speakership will be different than that of former Speaker Boehner.

The [New York Times](#) (10/30, Steinhauer, Subscription Publication, 11.64M) notes that among the 236 lawmakers who voted for Ryan were “several of the hardline conservatives who had worked to oust” former Speaker Boehner, adding that the “personal jubilation and high expectations felt by Mr. Boehner” when he was elected to the post, “have been replaced with a grim recognition that Mr. Ryan’s ascent stems not from electoral victory but rather the chaos in the ranks of his party’s sizable majority.” [NBC Nightly News](#) (10/29, story 5, 1:45, Holt, 7.86M) said that while Boehner’s exit “clears the way for a fresh start,” the “handover comes from a deep conflict” within the GOP, and the [AP](#) (10/30, Werner) says Ryan has is “charged with healing Republican divides and quieting the chaos of Capitol Hill.”

[Bloomberg Politics](#) (10/29, House, 303K) says Ryan was elected “with a mandate to unite his fractious caucus – and no clear path to do it,” and notes that while Ryan “is being promoted as someone who as speaker can help resolve internal party differences,” he “has much to prove and perhaps little time to prove it.” Reporting that Ryan vowed to mend differences within the party and repair the “broken” House, [Reuters](#) (10/29, Lawder, Cornwell) quotes him as saying, “We’re not solving problems, we’re adding to them and I am not interested in laying blame. ...We are not settling scores, we are wiping the slate clean.” The [CBS Evening News](#) (10/29, story 4, 2:15, Pelley, 5.08M) said Ryan “started out with some tough talk for the members he now leads,” and a brief report on [ABC World News](#) (10/29, story 4, 0:30, Muir, 5.84M) noted that Ryan promised “to restore order to Congress.”

[AFP](#) (10/30, Mathes) says Ryan’s ascent to the Speaker’s chair “puts a conservative ideas man at the helm of the House during a crucial period,” but [McClatchy](#) (10/30, Douglas, Toohey, 27K) reports that Ryan, who was “elected to be the savior of a House Republican conference at war with itself,” is not “likely to have much of a honeymoon as speaker” as there is “plenty of stuff in there that could put Ryan knee-deep in early challenges.” Bloomberg says Ryan “must quickly show hard-line conservatives that his speakership will be different from Boehner’s.”

[USA Today](#) (10/30, Kelly, 5.56M) says Ryan vowed to “give committee chairman and rank-and-file members more power over crafting the legislation that comes before the House,” which was “a key demand of the rebellious Freedom Caucus.” In addition he “promised a return to ‘regular order,’ where bills come to the House floor for a vote only after a committee has held hearings on the legislation and voted to recommend the bill to the full House.” The [New York Times](#) (10/30, Huetteman, Subscription Publication, 11.64M) notes that Ryan “is striking many of the notes [conservatives] want to hear: a more inclusive style of leadership, a devolution of power from the leadership suites to the committee rooms and a House of Representatives that is truly representative,” and they “must decide whether they will give him a chance to make good on those promises — or continue their rebellious ways and possibly be crushed.”

The [Washington Times](#) (10/30, Howell, Miller, Shastry, 283K) says Ryan’s election “turn[s] the page on a lengthy period of GOP tumult,” adding that he “heralded a new era in which every member would have a say in legislation that pursues a new kind of American ideal.” Said Ryan, “How reassuring it would be if we actually

fixed the tax code, put patients in charge of their health care, grew our economy, strengthened our military, lifted people out of poverty and paid down the debt. ... At this point, nothing could be more inspiring than a job well done. Nothing could stir the heart more than real, concrete results.”

The [Wall Street Journal](#) (10/30, McKinnon, Subscription Publication, 6.23M) reports that following his loss as Mitt Romney’s running mate in the 2012 presidential election, Ryan has focused on making the Republican Party appeal to a wider range of voters, and speaks often of trying to make the party more inclusive and its message more hopeful, including overhauling the tax system to foster economic growth and increase wages and employment, and reforming poverty programs to make them more fair and more effective. As Speaker, Ryan’s colleagues say, he will have greater power to highlight those policies. However, a [New York Times](#) (10/30, Herszenhorn, Subscription Publication, 11.64M) analysis questions whether Ryan’s “big ideas” will “ultimately weigh him down in an era defined by confrontation and small-bore compromise.” The Times says that “recent experience...suggests that he will continue to harbor expansive aspirations, but will set more modest goals.” In his [Washington Post](#) (10/30, 7.78M) column, Dana Milbank says that while it “may not be long before Ryan winds up in the same position Boehner was for five years,” he “may be the only one who has a shot at repairing the chamber, because of his youth (he’s 45), his renown...and his popularity.”

The President called Ryan to offer his congratulations, the White House said Thursday, adding that “he hopes they will be able to work across party lines,” [The Hill](#) (10/29, Fabian, 654K) reported. White House press secretary Josh Earnest “described the call as ‘cordial’ and said the two leaders discussed the bipartisan budget agreement.” Said Earnest, “The president is hopeful he will be able to work with Congressman Ryan on behalf of the American people.”

Republicans Who Voted Against Ryan Received Thousands From His Leadership PAC. [Roll Call](#) (10/29, Cahn, Kelly, 139K) reported that of the 10 Republicans voted for a candidate other than Ryan, five “took thousands of dollars from the new speaker’s leadership political action committee since the 2010 election, a CQ Roll Call analysis shows.” Ryan’s Prosperity Action PAC “gave \$35,000 spread among those five members who did not vote for him for speaker.”

“Loyalists” Tout Boehner’s Legacy. [Politico](#) (10/29, Bresnahan, 1.19M) reported that “Boehner loyalists” say the “unhappy and premature” end to his political career “masks a string of real accomplishments that will become clearer later.” Among them, they say, are “ushering in the biggest House GOP majority in eight decades, making the Bush tax cuts permanent and reforming Medicare.” They add that “in time it will become clear that governing is no easier for Paul Ryan than it was for Boehner — and, in some ways, it could be worse.”

The [Washington Post](#) (10/30, Kane, 7.78M) says Boehner’s exit breaks up Capitol Hill’s “Big Four,” noting that he, House Minority Leader Pelosi, Senate Majority Leader McConnell, and Senate Minority Leader Reid have, “for almost nine straight years...led their respective caucuses together — longer than any other quartet of party leaders in congressional history,” and have “have overseen a historically unpopular Congress, no matter which party held the majority.”

MEDIA ANALYSES: IN WAKE OF GOP DEBATE, RUBIO ASCENDING, BUSH ON THE ROPES.

Wednesday’s GOP presidential debate continued to receive widespread media coverage, including reports on all three network newscasts. The bulk of the coverage focuses on the clash between Jeb Bush and Sen. Marco Rubio over the Florida lawmaker’s missed votes in the Senate, and the impact of that exchange. The clash specifically, and Bush’s debate performance in general, is depicted in reports and analyses as having left the former Florida governor’s White House hopes badly damaged. Rubio, meanwhile, is cast as having emerged from the debate with a good deal of momentum.

For example, on [NBC Nightly News](#) (10/29, story 2, 2:30, Holt, 7.86M), Lester Holt reported on what he described as “fast-moving fallout from” Wednesday’s debate, saying that Bush’s targeting of Rubio resulted in “a devastating swing and a miss, leaving Bush reeling, donors frustrated, and some wondering if his campaign is nearly over.” NBC’s Hallie Jackson added that “NBC News has learned Jeb Bush promised his donors today he will work to get better as a candidate and as a debater. That conference call an attempt to calm donors’ nerves as Marco Rubio’s team looks to recruit any shaky Bush support.”

On the [CBS Evening News](#) (10/29, story 3, 2:25, Pelley, 5.08M), Major Garrett reported that the debate clash between the two Floridians “deepened the impression of Rubio on the rise and Bush on the decline.” The [Washington Post](#) (10/30, Delreal, 7.78M) reports that following Wednesday’s debate, “Bush’s once-formidable

campaign appears to be nearing a state of collapse,” which “has provided an opening to...Rubio...who is getting a new look from the party establishment.” On [NBC Nightly News](#) (10/29, story 3, 2:05, Alexander, 7.86M), Peter Alexander said that in the wake of the debate, “NBC News has learned both [Sen. Ted] Cruz and Marco Rubio’s campaigns have seen a fundraising spike, roughly a million dollars each, since last night.”

The [Washington Post](#) (10/30, Tumulty, 7.78M) reported that in Wednesday’s debate, Rubio demonstrated “that he could take a hit, and swing back — something that might have been in doubt, given his youth and the roughness of this election cycle.” The Post adds that Rubio’s “strategists have said he was waiting for a moment to put his natural political talents on display. It came Wednesday night.”

The [New York Times](#) (10/30, Peters, Haberman, Subscription Publication, 11.64M) reports that in the wake of the debate, Rubio on Thursday “stepped into the national spotlight he always feared would come too early and prepared for a bruising collision with Jeb Bush.” At the same time, “the mood among Mr. Bush’s supporters was despondent, with some questioning in private conversations whether the accumulation of three unsteady” debate performances “had finally blocked his path to the nomination.”

In a report that was published not long after the conclusion of Wednesday’s debate, the [Huffington Post](#) (10/29, Conroy, Stein, 251K) focused on the Bush-Rubio clash, saying that when the exchange was over, “it was hard not to feel sympathy for Bush, his once promising campaign appearing to hit a new low in front of a live audience assumed to be in the tens of millions.” The Post added that if the debate “will be remembered for one thing, it will likely be as the moment when the hierarchy for the campaign’s two Florida Republicans was rearranged.”

The [AP](#) (10/30, Barrow, Bustos) reports that the “testy exchange between Rubio and Bush” during Wednesday’s debate “could help reshape the GOP race as Rubio tries to capitalize on Bush’s struggles.” Appearing Thursday on ABC’s “Good Morning America,” however, Rubio said “that he has ‘admiration’ for Bush and wants only to underscore policy differences between the two.”

With the GOP candidates slated to face off in another debate in three weeks, “Meet the Press” moderator Chuck Todd. Chuck said on [NBC Nightly News](#) (10/29, story 4, 1:15, Holt, 7.86M), “I think what we’re going to learn the next three weeks, can Jeb Bush right his ship? The pressure really is on him. It’s on him to perform with donors, on him to perform with voters. And the next debate, as important as this one was, now this next one is even that much more important.” On [ABC World News](#) (10/29, story 3, 2:55, Muir, 5.84M), Tom Llamas reported on the Bush-Rubio clash in Wednesday’s debate, saying, “Tonight many calling [it] a game-changing moment in the Republican race. An attack that backfired.” Llamas added, “Bush now facing tough questions about his campaign’s future.”

The [Washington Post](#) (10/30, Rucker, Balz, O’Keefe, 7.78M) reports that “Bush faces the real possibility that a substantial amount of money and momentum would move to...Rubio...as the party’s mainstream conservative wing’s favored candidate unless he moves quickly to rebalance his candidacy.” The Post adds that Bush’s “debilitating [debate] performance was for many allies a cause of alarm,” sowing “serious doubts about his ability to effectively prosecute the case against not only his” GOP opponents, “but also the potential Democratic nominee, Hillary Rodham Clinton, in what is expected to be a brutal general election campaign.”

Writing in “The Fix” blog on the website of the [Washington Post](#) (10/29, 7.78M), Chris Cillizza – in the wake of Bush’s widely panned debate performance – wrote that the former Florida governor “just isn’t all that good at this. And he knows it,” referring to campaigning for president. Cillizza added, “If Bush wasn’t having much fun before, he really won’t be having any fun now. And for a candidate who pledged that he would run ‘joyfully,’ he looks anything but that right now.”

Writing for [Bloomberg Politics](#) (10/29, Heilemann, 303K), John Heilemann said that in the wake of “the sheer and epic awfulness of Bush’s debate performance” on Wednesday, “the scale of the failure is now evident for anyone with eyes to see. Coupled with his dismal standing in the public polls nationally and in the early states, the fund-raising difficulties he now faces, and the cutbacks to his organization that have recently taken place, it’s impossible to overstate the severity of the malady that now afflicts him.”

[Reuters](#) (10/30, Oliphant) reports that Bush’s debate performance will likely increase skepticism about his odds of winning the GOP nomination. The [AP](#) (10/30, Pace, Beaumont, Ronayne) reports that “Bush emerged from” Wednesday’s “debate as a candidate in crisis, with supporters struggling to understand why he keeps underperforming and advisers promising a turnaround before it’s too late.” Stumping yesterday in New

Hampshire, Bush “insisted his White House bid was ‘not on life support.’” Even so, his “advisers concede November will be his campaign’s most crucial period to date, a stark contrast to their previous assertions that Bush was best-positioned to outlast rivals in a long campaign.”

In her [Wall Street Journal](#) (10/30, Subscription Publication, 6.23M) column, Peggy Noonan similarly says that Bush’s debate performance was just the latest example illustrating that he’s not well-suited to be a national candidate. In his [Washington Post](#) (10/30, 7.78M) column, Eugene Robinson – pointing to the Bush-Rubio exchange over Rubio’s missed votes in the Senate – says that “the most significant impact” of Wednesday’s debate “may have been to dramatically lengthen the odds that Bush” will win the presidency.

USA Today: This Week, “Hopeful Signs” From GOP. In an editorial, [USA Today](#) (10/30, 5.56M) says that during Wednesday’s debate, “it was not impossible to see some glimmers of hope for the GOP. For the first time, a candidate who could have a reasonable chance of winning” the presidency, Rubio, “had a breakout performance.” USA Today adds, “Hopeful signs also emerged in recent days beyond the debate,” with House Republicans finding “a way to keep the government open and to pay its bills on time.” In addition, House Republicans chose the “sensible, if highly conservative,” Rep. Paul Ryan to replace Speaker Boehner. USA Today adds, “These developments signal a good week for Republicans and for the country, which needs two vigorous parties for the simple reason that neither has all the answers.”

Writer: Bush Backtrack On Tax Hike In A Budget Deal Bodes Ill For GOP. In a column for [Bloomberg View](#) (10/29, Wilkinson, 86K), Francis Wilkinson wrote that during Wednesday’s debate, moderator John Harwood said that during a 2011 GOP presidential debate, all of the candidates “pledged to oppose a budget deal containing any tax increase even if it had spending cuts ten times as large.” Wilkinson wrote, “That 2011 pledge was prime evidence that the” GOP “had departed the realm of politics for religion, where doctrinal devotion trumps the crass realities of the material world.” Wilkinson wrote that in 2011, Bush “had suggested that he would embrace such a preposterously bountiful political windfall in a hurry.” However, said Wilkinson, when Harwood on Wednesday asked Bush if he still stood by his 2011 position, the candidate “demurred,” signaling that he’s no longer “a bridge to a time when the Republican Party wasn’t a danger to itself and others.”

Bush Continues To Criticize Rubio Over Missed Senate Votes. In a brief item, the [Washington Times](#) (10/29, Riddell, 283K) reports that Bush on Thursday “doubled-down on his attacks against...Rubio for missing Senate votes.” Appearing on Fox News, Bush was “asked if he was wrong to question Mr. Rubio.” Bush replied, “No, it wasn’t a mistake. It’s a mistake to run for office and not serve. He can do both, but the simple fact is he’s not doing that.”

Reid: Rubio Should Resign From Senate. [Politico](#) (10/29, Kim, Everett, Bresnahan, 1.19M) reported that Senate Minority Leader Harry Reid on Thursday called on Rubio “to resign his Senate seat as he racks up no-shows on his voting record while campaigning for the White House.” Speaking with Politico, Reid said of Rubio, “Why shouldn’t he [resign]? He hates the Senate.” Reid added, “Why should the taxpayers of this country and people of Florida put up with having only one senator? Doesn’t seem fair to me.”

[USA Today](#) (10/30, King, 5.56M), in a report focusing on why Rubio, who “says he’s frustrated with the job, and he hardly bothers to show up for work,” chooses not to resign from the Senate, says that “the short answer is that probably wouldn’t help” his “campaign to be labeled a quitter. And his Senate seat gives Rubio a high-profile platform to weigh in on high-profile issues.”

Politico: French Upset Over Bush’s “French Work Week” Remark. Meanwhile, [Politico](#) (10/29, Gass, 1.19M) reported that Bush’s jab at Rubio during Wednesday’s debate, when the former governor said “that the Senate has a ‘French work week’ of ‘three days,’” seems “to have earned the consternation of the French media.” Yesterday, “French Canal+ journalist Laura Haim asked press secretary Josh Earnest what President Barack Obama thought of that remark,” and mentioned “that the French ambassador to the U.S. had made a fuss over the statement.” Politico added that French Ambassador to the US Gérard Araud “tweeted his complaints about Bush’s statement during the debate,” saying, “A French work week of 3 days? No but a pregnancy paid leave of 16 weeks yes! And proud of it.”

Report: Internal Bush Campaign Document Questions Rubio’s “Character And Ethics.” In a blog entry that was featured as the lead story Thursday on Drudge Report, [US News & World Report](#) (10/30, Catanese, 996K) reported that it had “obtained” what it described as, “The full [PowerPoint] presentation” that Bush aides earlier this week shared their campaign donors. The presentation, said US News & World Report,

includes “biting, detailed slights” of Rubio, “pointedly questioning” his “character and ethics.” For example, said US News & World Report, one page of the presentation is “titled ‘Marco Is A Risky Bet,’ and it bullet-points Rubio’s ‘misuse of state party credit cards, taxpayer funds and ties to scandal-tarred former Congressman David Rivera.’” US News & World Report also quoted the document as saying, “Those who have looked into Marco’s background in the past have been concerned with what they have found.”

CNBC, Debate Moderators Continue To Draw Criticism. Meanwhile, another focus of the continuing coverage of Wednesday’s GOP presidential debate is the criticism of the CNBC debate moderators – John Harwood, Becky Quick and Carl Quintanilla – by the candidates and party officials. Moreover, the moderators and the network itself are drawing critical scrutiny from some other media outlets. For example, the [Washington Post](#) (10/30, Zezima, 7.78M) reports, “The moderators, their questions and their lack of control over” the GOP contenders “became a central part of the debate’s narrative,” with “the shower of criticism that followed” demonstrating “how powerfully anti-media rhetoric can resonate with the Republican base. The debate’s host, cable network CNBC, gave them plenty of material.”

On its website, the [New York Times](#) (10/30, Parker, Subscription Publication, 11.64M) reported that during the debate, CNBC “and its moderators were roundly criticized by both the candidates onstage and even some of their own colleagues.” And on Thursday, the GOP “campaigns called for an overhaul of the debates.” For example, yesterday in Colorado, GOP presidential hopeful Ben Carson told reporters that “he had asked his staff to reach out to the other campaigns ‘to talk about a change’ in how Republican debates are conducted,” saying “of CNBC and its moderators, ‘You’ve got to be really bad for the whole audience to boo you.’”

[Politico](#) (10/29, Strauss, 1.19M) reported that during a Thursday appearance on Fox News, Sen. Marco Rubio “blasted the CNBC moderators for the questions they asked” during the GOP debate. Rubio is quoted as saying the questions asked by the moderators “were clearly designed to get us to fight against each other or get us to say something embarrassing about us and then get us to react.” Rubio added, “And that’s the purpose of what these questions were. And it became irritating.” Under the headline “High Ratings, Criticism, Give CNBC Mixed Victory In Republican Debate,” [Reuters](#) (10/30, Gibson, Toonkel) reports that while the debate moderators were criticized over their questions, CNBC drew its largest audience ever, as 14 million viewers watched the event.

In his column for [USA Today](#) (10/30, 5.56M), Rem Rieder writes that “the biggest loser of the Wednesday night GOP d

Feinstein bill would not diminish SoCal mining -- report

Phil Taylor, E&E reporter

Published: Wednesday, October 28, 2015

A bill to protect more than 1.4 million acres of public lands in Southern California would not diminish the region's mining sector, according to a report released yesterday by the Sonoran Institute, a regional conservation group based in Tucson, Ariz.

The bill's proposed national monuments, parks and wilderness expansions would bolster jobs in the service, government and professional sectors, which play a much larger role than mining in the region's economy, the [report](#) found. Those jobs -- which drive what's known as "amenity-based" economic growth -- depend heavily on protected public lands, the report found.

Protections in Sen. Dianne Feinstein's (D-Calif.) [S. 414](#) "represent the highest and best economic use of public lands," said John Shepard, senior director of programs at the Sonoran Institute. "Mining is overshadowed by other economic sectors and trends that benefit from preserving the California desert's natural, cultural and other community benefits."

While the institute has taken no official position on Feinstein's bill, its report offers a ringing endorsement.

Feinstein's bill would designate two new national monuments, six new wilderness areas and expand three national parks while setting aside a handful of areas for off-highway vehicle recreation. The bill received a hearing this month before the Senate Energy and Natural Resources Committee, where its prospects for passage are unclear ([E&E Daily](#), Oct. 9).

In a parallel track, Feinstein is asking President Obama to designate lands in her bill -- Mojave Trails, Sand to Snow and Castle Mountains -- as national monuments using his authority under the Antiquities Act.

Mining access has emerged as a major sticking point for opponents of Feinstein's bill and Obama's use of the act.

San Bernardino County Supervisor Robert Lovingood told the committee the legislation could stifle mining opportunities and hamper a gold mine that could become California's second largest. Feinstein's bill would ban new mining claims within conservation areas, while honoring existing claims.

The minerals industry is "one of our most significant economic drivers," Lovingood said, adding that the county oversees roughly 100 mines. The federal government already owns 80 percent of the county, which prevents the collection of millions of dollars in property taxes, he said.

"The proposed national monument status withdraws public lands from mineral entry," he said. "This prevents the extraction of important mineral materials, such as aggregates, which are the basic materials necessary for maintaining roads, bridges and local infrastructure."

But the Sonoran Institute report -- which looked at the seven counties covered in the bill: San Bernardino, Inyo, Riverside, Imperial, Kern, Los Angeles and San Diego -- came to an opposite conclusion.

In the last 25 years, mining has represented no more than 0.25 percent of the region's overall employment, the report said, citing Department of Commerce data. In addition, mining's contribution to labor-related income never exceeded 1 percent and trended neither up nor down between 1970 and 2013, it said.

In 2013, the mining industry employed between 3,000 and 5,600 people.

However, mining and oil and gas jobs have made up a higher portion of jobs in some individual counties, representing 6 percent in Kern and 4 percent in Inyo. In San Bernardino, which would be home to the largest amount of protected lands, mining and oil and gas represent 0.2 percent of jobs, the report found.

While Feinstein's bill would withdraw more than 1 million acres from future mining claims, it would honor the 1,176 active claims inside the proposed designation areas. In San Bernardino alone, there are 8,803 active mining claims and 600 square miles of high mineral potential areas outside the proposed designation areas, the report found.

The report cited mining research commissioned by the Bureau of Land Management to support its identification of renewable energy zones in the California desert.

"There is extensive ground outside of the legislation to continue to look for and develop mineral resources of all kinds," said Joe Marlow, a resource economist at the Sonoran Institute.

As mining and other extractive and agricultural jobs remained flat, service-based sectors emerged, a trend common across the West, the report said.

In addition, non-labor income -- which is an indicator of the presence of retirees -- shot up nearly threefold in the seven counties between 1970 and 2013, the report found.

Roughly 3.2 million people visited Death Valley and Joshua Tree national parks and the Mojave National Preserve in 2014, and nearly 4.2 million visited BLM lands in 2013.

"We think conservation has a stronger economic argument" than mining and industrial projects, Shepard said. "The additional designations [in Feinstein's bill] are likely to encourage similar growth trends going forward into the future."

Imperial and Riverside counties have endorsed Feinstein's bill, though supervisors in San Bernardino remain split.

Some critics of the bill, including Lovingood, have backed [H.R. 3668](#) by Rep. Paul Cook (R-Calif.), a companion to Feinstein's bill that would allow more mining opportunities within the Mojave Trails National Monument and bar presidents from protecting the lands using the Antiquities Act.

On Tue, Oct 13, 2015 at 10:59 AM, Duran, Leah <leah_duran@ios.doi.gov> wrote:

[Sen. Feinstein asks Obama to designate monuments in the Mojave Desert](#)

LA Times // Julie Cart // Oct. 13, 2015

Sen. Dianne Feinstein, champion of the California desert, is asking President Obama to take executive action to protect hundreds of thousands of acres in the Mojave Desert.

Since 2009, Feinstein has been unsuccessfully trying to convince her colleagues in Congress to designate the Mojave Trails, Sand to Snow and Castle Mountains areas as new national monuments. Now, the Democratic senator is calling on Obama to use the Antiquities Act to set aside desert tracts near Mojave National Preserve and Death Valley National Park.

In a public meeting scheduled for today in Palm Springs, Feinstein and other national, state and local officials will listen to public comment on setting aside the disparate pieces of public land for heightened protection.

All of the land proposed for monument designation is in federal hands and no transfers are required.

Obama has invoked the Antiquities Act sparingly. Most recently he designated the Berryessa-Snow Mountains National Monument in Northern California.

Monument designations can be controversial because they sometimes place restrictions on hunting, off-road recreation and other uses. But Feinstein's proposal would preserve existing recreational activities.

Obama has the option to designate the new monuments without consulting Congress, but Feinstein said she will continue trying to gain support for her legislation.

DOI in the News:

FEDERAL GOVERNMENT SAYS EFFORTS TO BLOCK SAGE GROUSE PROTECTION COULD BACKFIRE. The [AP](#) (10/28, 2.15M) reports that “attempts by rural Nevada counties, mining companies and others to block new U.S. policies intended to protect the greater sage grouse could backfire on the critics and ultimately force the reconsideration of a recent decision to keep the bird off the list of endangered species, federal land managers warn.” Justice Department lawyers “representing three U.S. agencies say it took an unprecedented effort by officials in 11 western states from California to the Dakotas to persuade the Fish and Wildlife Service last month to reverse its 2010 conclusion that protection of the grouse was warranted under the Endangered Species Act.” In a brief filed Friday in U.S. District Court in Reno, U.S. Attorney Daniel Bogden wrote that “any injunction blocking implementation would ‘diminish the protections for sage grouse ... undo four years of collaboration and could undermine FWS’ finding.” U.S. District Judge Miranda Du has “set a hearing for Nov. 12 in Reno to consider granting a preliminary injunction blocking the amendments.”

Additional coverage was provided by the [New York \(NY\) Times](#) (10/28, Press, Subscription Publication, 11.64M), the [Vallejo \(CA\) Times Herald](#) (10/27, 49K), the [Washington \(DC\) Post](#) (10/28, Scott Sonner |, Ap, 7.78M), the [Minneapolis \(MN\) Star Tribune](#) (10/28, Sonner, 1.15M), the [Tacoma \(WA\) News Tribune](#) (10/28, 254K), the [Spokane \(WA\) Spokesman-Review](#) (10/27, 174K), the [Twin Falls \(ID\) Times-News](#) (10/28, 81K), the [Nevada Appeal](#) (10/28, 51K), the [Washington \(DC\) Times](#) (10/28, Sonner, 283K), the [Daily Mail \(UK\)](#) (10/28, 5.31M), [Yahoo! News](#) (10/28, Sonner, 6.43M), and [KATU-TV Portland \(OR\)](#) Portland, OR (10/28, 184K).

Utah Agency Releases Plan To Help Sage Grouse. The [Deseret \(UT\) News](#) (10/28, 476K) reports that “the Utah Natural Resources Conservation Service plans to continue removing juniper from more than 25,000 acres throughout Utah with its partners as part of its efforts to help the sage grouse and its habitat.” Also, “a strategy unveiled Tuesday includes installing fire breaks on some 2,500 acres and working with land owners and other agencies to secure nearly 11,000 acres of agriculture conservation easements so high development-prone areas remain protected.” The article notes that “the rangewide effort involves a commitment of Utah Natural Resources Conservation Service funding of \$211 million and continues local partnerships that include the Utah Division of Forestry, Fire and State Lands, the Utah Division of Wildlife Resources, the state water resources agency and the Bureau of Land Management.”

USGS Releases Handbook On Restoration Of Sagebrush. [E&E Publishing](#) (10/26, 705) reports that federal regulators on Tuesday “released the first of a three-part handbook designed to help land managers across the West restore dwindling sagebrush steppe ecosystems that support greater sage grouse and hundreds of other species.” The 56-page handbook released by the USGS “takes a broad look at sagebrush landscapes, with a focus on helping land managers prioritize areas where reseeding or planting would be most successful and identifying the best strategies for restoring these specific areas.” According to the article, “the subsequent two parts of the handbook will provide guidance for how to restore habitat at a landscape level and at a site-specific level, respectively.”

EIGHT NEW HAMPSHIRE PROJECTS GET LWCF GRANT FUNDING. [New Hampshire Public Radio](#) (10/28, 2K) reports that “projects in eight New Hampshire communities have been awarded federal Land and Water Conservation grants totaling \$930,000.” The article notes that the future of the LWCF is “up in the air, after Congress allowed the program to expire at the end of last month.”

An op-ed for the [Lewiston \(ME\) Sun Journal](#) (10/27, 17K) calls on Congress to reauthorize the LWCF. The piece notes that “since the program was created by Congress 50 years ago, projects in Maine have received more than \$172 million to help maintain and expand places such as Acadia National Park and the Saint Croix Island International Historic Site – support that has helped these areas increase accessibility to visitors and enhance their positive impact on the local economy.”

Additional coverage of the LWCF was provided by the [Fairfield \(MT\) Sun Times](#) (10/28).

OBAMA URGED TO PROTECT CALIFORNIA DESERT. The [Palm Springs \(CA\) Desert Sun](#) (10/27, 98K) reports that conservancy groups have “successfully lobbied Sen. Dianne Feinstein to include Camp Iron Mountain in her request to President Barack Obama to designate three national monuments in the California desert: Mojave Trails, Sand to Snow and Castle Mountains.” Feinstein has “introduced three desert protection bills over the past six years, but they’ve gone nowhere – victims of the Senate’s chronic gridlock.” Then, “earlier this year, Feinstein changed tactics, urging President Obama to create the monuments using executive authority.”

In an op-ed for the [Sacramento \(CA\) Bee](#) (10/28, 515K), Xavier Morales, executive director of the Latino Coalition for a Healthy California, writes that “members of the Latino Coalition for a Healthy California recently trekked to Whitewater to express our strong support for Sen. Dianne Feinstein’s efforts to secure national monument status for the Mojave Trails, Castle Mountains and Snow to Sand.” He asserts that “preserving open spaces like these in our magnificent desert is important for the health of Californians and Latinos in particular.” Morales urges President Barack Obama to “use the Antiquities Act to swiftly protect our California desert.”

CONSERVATIONIST WARNS ABOUT BUILDING MOMENTUM FOR PUSH TO TRANSFER FEDERAL LANDS. The [WyoFile](#) (10/28) reports that “efforts to wrest federal lands from public ownership are an orchestrated, multi-layered strategy that can’t be brushed off as a fringe idea, a leading conservationist warns.” According to Whit Fosburgh, president and CEO of the Theodore Roosevelt Conservation Partnership, “the federal-lands transfer movement has built momentum to the point it can’t be ignored.” The article notes that “a revived Sagebrush Rebellion has seen legislators in 11 Western states introduce 37 land transfer bills with six of them passing and another four finalized as ‘study’ legislation.”

Utah’s Position On Federal Lands Criticized. For [Hatch Magazine](#) (10/28), Ty Hansen criticizes Utah for its push to take over federal lands. He says that “the anti-federal sentiment in Utah is pretty serious, and the flames of that trumped-up, industry-funded ‘rebellion’ are troublesome, so much so that they’re part of the rural culture of the state (see Phil Lyman’s middle-finger ride into Recapture Canyon).”

OUTDOOR RETAILER REI WILL CLOSE ON BLACK FRIDAY. [Politico Pro](#) (10/27) reports that REI, the outdoor retailer which was formerly headed by Interior Secretary Sally Jewell, has “decided to [ditch](#) (10/27) the Black Friday mayhem and close for the day, proposing instead that people go outside.”

Also reporting on the story are the [Albuquerque \(NM\) Business First](#) (10/28) and the [Denver \(CO\) Post](#) (10/28, 825K).

EX-INTERIOR SECRETARY CALLS FOR CLIMATE CHANGE DISCUSSION IN REPUBLICAN DEBATE. The [Denver Post](#) (10/28, Finley, 825K) reports that Democrat leaders led by former Interior Secretary Ken Salazar on Tuesday “challenged Republican presidential candidates...to tackle climate change, public lands and needs of the recreation economy” in their Wednesday debate. Colorado’s \$13 billion-a-year, 125,000-job recreation industry “requires a healthy environment with well-funded care for public lands, Salazar said.” The Post also reports that Salazar called Attorney General Cynthia Coffman’s legal challenge of the Clean Power Plan “out of step with the role and responsibilities of an attorney general.”

JEB BUSH’S PROPOSED PUBLIC LAND POLICIES LAUDED. In an op-ed for the [Colorado Statesman](#) (10/28, 17K), Rob Sisson, executive director of ConservAmerica, argues that “a bloated and distant bureaucracy in Washington, D.C., manages our public lands as if they were Crown holdings in medieval England.” According to Sisson, “with the announcement of his Western Land and Resource Management platform, former Florida Gov. Jeb Bush proves he is an excellent fit for the Roosevelt conservation mantle.” He adds that “with his call to relocate the Department of the Interior to the West, Bush shows he isn’t just a capable manager but a visionary, too.”

Empowering Native American Communities:

BIE UNDERGOING OVERHAUL. [Education Week](#) (10/28, 130K) reports that “while Congress and the Obama administration have pressed the Bureau of Indian Education to overhaul operations at the schools it oversees on or near American Indian reservations, more than 90 percent of the 950,000 American Indian children attend traditional public schools run by local districts.” One central goal of “the ongoing overhaul” of the Bureau of

Indian Education, “known as the Blueprint for Reform, is to shift the agency’s role from provider to partner, paving the way for tribes to eventually run their own schools.” Although “the overhaul has hit snags and missed deadlines,” BIE Director Charles “Monty” Roessel “remains optimistic.” He said, “It’s given us an opportunity to engage with tribes more. Our system is broken, and we need to fix it.”

CLATSOP-NEHALEM TRIBE SEEKS FEDERAL RECOGNITION FOR SECOND TIME. The [Daily Astorian \(OR\)](#) (10/27, 23K) reports that “a resolution to restore federal recognition of the Clatsop-Nehalem Confederated Tribes is making its way through the U.S. Congress for a second time.” Rep. Suzanne Bonamici “introduced the legislation, known as House Resolution 3736, or the Clatsop-Nehalem Restoration Act on Oct. 9.” the measure was “assigned to the House Natural Resources Committee and is expected to go to a subcommittee.”

Additional coverage was provided by the [Chinook \(WA\) Observer](#) (10/27, 19K).

COURT URGED TO BLOCK CHEROKEE NATION OF OKLAHOMA’S BID TO BLOCK DECISION TO TAKE LAND INTO TRUST. [Law360](#) (10/28, 30K) reports that “the federal government on Monday urged an Oklahoma federal court to reject the Cherokee Nation of Oklahoma’s bid to block the government from taking former reservation land into trust for another tribe, arguing the U.S. Department of the Interior didn’t need the Cherokees’ approval to make the acquisition.”

DEA RAID OF WISCONSIN TRIBE’S CANNABIS CROP RAISES CONCERNS. [US News & World Report](#) (10/26, 996K) reports that federal agents “swarmed the Menominee Indian tribe’s Wisconsin reservation Friday and eradicated 30,000 cannabis plants, confusing and alarming tribal leaders, policy reformers and attorneys who work with other American Indian tribes considering growing marijuana or hemp.” Menominee leaders “say the plants were intended for lawful research into growing industrial hemp, which is processed and utilized for fiber, food and oil and is distinguishable from marijuana by its lower levels of the high-inducing compound tetrahydrocannabinol (THC).” The Drug Enforcement Administration “and acting U.S. Attorney Gregory Haanstad contend the seized plants were in fact marijuana, but a search warrant affidavit filed last week by a DEA agent does not identify a specific THC level as grounds for the search-and-seizure operation.”

EAST TEXAS TRIBE PLANS TO OFFER ELECTRONIC BINGO AFTER CLARIFICATION.. The [AP](#) (10/28) reports that “a Native American tribe in East Texas says it plans to offer electronic bingo on its tribal land after receiving clarification on the issue from a federal agency.” The Interior Department and the National Indian Gaming Commission on Tuesday “affirmed the right of the Alabama-Coushatta Tribe of Texas to operate gaming activities on its 10,200-acre reservation east of Livingston.”

[KFOX-TV](#) El Paso, TX (10/28, 13K) reports that the Interior Department has “confirmed that gaming operations on tribal lands are under the jurisdiction of the National Indian Gaming Commission said the Tigua Governor Carlos Hisa Tuesday.”

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (10/28, 2.15M), the [San Antonio \(TX\) Express-News](#) (10/28, 1.46M), the [Washington \(DC\) Times](#) (10/28, 283K), and [KRIS-TV Corpus Christi \(TX\)](#) Corpus Christi, TX (10/28, 2K).

NAVAJO PRESIDENT BEGAYE CALLS FOR ACTION ON BENNETT FREEZE. The [Indian Country Today Media Network](#) (10/27, 47K) reports that Navajo President Russell Begaye is “calling for less talk and more action when it comes to rehabilitation of the former Bennett Freeze.” Since the freeze was lifted in 2006, “very little progress has been made and the estimated 6,700 residents of the former Bennett Freeze still live in conditions that have not changed in nearly half a century.” Begaye said, “People are suffering from substandard homes. People are living with roof leaks, with sheetrock hanging down, with dirt floors. I just can’t imagine how cold it would get out there in the wintertime.”

BISHOP: AMERICAN INDIANS DESERVE TO DECIDE ACTIONS ON THEIR LANDS. In an op-ed for the [Wall Street Journal](#) (10/28, Bishop, Subscription Publication, 6.23M), GOP Rep. Rob Bishop, chairman of the House Committee on Natural Resources, argues that special interest groups with ties to the White House will be able to influence what is permitted on tribal lands as long as Indian land titles are Federally owned. Bishop specifically focuses on how this has affected tribal abilities to profit from opportunities of energy production. He therefore calls for the Native American Energy Act, which seeks to reduce “Federal regulations that impede tribal development of Indian lands,” and the Tribal Recognition Act, which would give Congress sole power in giving a tribe Federal acknowledgment, to be voted on and signed into law by President Obama or the next

president.

Office of Insular Affairs:

ASSISTANT SECRETARY KIA'AINA ANNOUNCES \$7.6M IN FUNDING FOR GUAM. The [Pacific News Center](#) (10/28) reports that Interior Assistant Secretary for Insular Areas Esther Kia'aina "this week announced the release of \$7.6 million in grant funding to the Government of Guam through the Office of Insular Affairs' Compact Impact Assistance Program." The article notes that "the funding will support, in part, Guam Governor Eddie Calvo's proposed Compact Impact projects for fiscal year 2016, which total \$14.9 million." Kia'aina said, "Social services at Guam's hospital and correctional facilities are heavily impacted by migrants from the Freely Associated States. While we continue to work with the Government of Guam to address long-term solutions requiring federal statutory changes, we are pleased nonetheless to support the Governor's budgetary priorities for this allocation of Compact Impact funding."

Also providing coverage is [KUAM-TV Dededo \(GUM\)](#) Dededo, GUM (10/28, 171).

BIKINI ISLANDERS SEEK REFUGE IN US FROM RISING SEA LEVELS. [BBC News](#) (10/28, 1.57M) reports that "about 1,000 Bikini islanders have applied to relocate to the United States as rising seas threaten their adopted home." They were "moved from their Pacific atoll as result of atomic bomb tests in the 1940s," but "their new home, on another of the Marshall Islands, is struggling against huge tides and increasing storms." The islanders have "asked Washington to change the terms of a trust fund to allow them settle in the US."

Also providing coverage are the [Washington \(DC\) Post](#) (10/28, 7.78M), the [Daily Express \(UK\)](#) (10/28, 217K) and the [Discovery Channel](#) (10/28, 395K).

PALAU DECLARES WORLD'S SIXTH LARGEST MARINE RESERVE. The [Independent \(UK\)](#) (10/28, 1.02M) reports that "the Pacific island nation of Palau's announced on Thursday that it is designating a 193,000-square-mile fully protected marine reserve that would be the sixth largest such area in the world and would help protect over a thousand species of fish and some 700 species of coral." The article notes that "the news is even more momentous given that plans to set aside over 1 million square miles of highly protected ocean have now been announced in 2015 alone, more than during any prior year, according to figures provided by the Pew Charitable Trusts."

Tackling America's Water Challenges:

BOR MUST DISCLOSE SOME CALIFORNIA WATER WELL INFORMATION. The [Salem \(OR\) Capital Press](#) (10/27, 113K) reports that "geological data about water wells in California cannot be turned over to an environmental group, but the names and addresses of owners must, a federal judge ruled." Federal authorities will "not have to disclose the location, construction or depth of California water wells to an environmental group under a recent federal court ruling." But the decision does require the BOR "to turn over the names and addresses of the well owners and water transfer participants to AquAlliance, which advocates for 'hydrological health' in Northern California."

Securing America's Energy Future:

Renewable Energy:

FWS CONSIDERING FIVE-YEAR EAGLE "TAKE" PERMIT FOR CALIFORNIA WIND FARM. The [Greenwire](#) (10/27, Subscription Publication) reports that the FWS is "considering whether to allow a California wind farm to incidentally kill up to three federally protected golden eagles over the next five years." The permit would require NRG Yield Inc., "which owns the 153-megawatt Alta East Wind Project in Kern County, to retrofit at least 74 area power poles within a year to prevent electrocutions of birds and take other steps to reduce mortality."

PAPER SUPPORTS ADDING EAGLE MOUNTAIN TO JOSHUA TREE NATIONAL PARK. The [Palm Springs \(CA\) Desert Sun](#) (10/27, 98K) editorializes that "the Federal Energy Regulatory Commission has given a second vote of confidence to a proposed 1,300-megawatt hydropower plant proposed for the open pits of the Eagle Mountain iron ore mine." The commission "last week denied two appeals – from the National Park

Service and a local group known as the Desert Protection Society – of its June 2014 granting of a license for the project proposed by Eagle Crest Energy of Los Angeles.” But “despite FERC’s support,” the paper argues that “this remains a flawed idea.” Instead, it argues that “adding Eagle Mountain to Joshua Tree National Park would best serve the public by conserving valuable resources and protecting the local ecosystem with the bonus of adding the historical attraction that is the old mining town to the park.”

Onshore Energy Development:

SENATE HOLDS HEARING ON STREAM PROTECTION RULE. [Politico Pro](#) (10/21) reports that Interior Department and industry officials “clashed” Tuesday “over the potential job losses from the administration’s proposed stream protection rule.” During a hearing on the rule, Senate Energy and Natural Resources Chairwoman Lisa Murkowski “questioned the difference between the administration’s estimation that the rule would lead to the loss of about 200 net jobs lost with the National Mining Association’s new study concluding that the rule would kill between 40,038 and 77,520 jobs in the mining sector.” Assistant Interior Secretary Janice Schneider said “the study’s ‘extraordinary overestimate’ of lost jobs and coal production rested on assumptions not supported by the rule, including that it would prohibit long-wall mining.” National Mining Association President and CEO Hal Quinn “replied that Interior’s calculations were based on hypothetical mine scenarios, and that the firm that conducted NMA’s analysis based its conclusions on discussions with 36 operating mines.”

Also reporting on the story are the [Greenwire](#) (10/27, Subscription Publication), the [Greenwire](#) (10/26, Subscription Publication), [The Hill](#) (10/28, Cama, 654K), the [Washington Times](#) (10/28, Sherfinski, 283K), and [Big Horn Radio Network](#) (10/28).

Senators Ask About Mine Cleanup. The [AP](#) (10/28, 470K) reports that “the risk that coal companies in Wyoming and elsewhere could leave the public responsible for millions of dollars in mine-cleanup costs is a serious issue being examined by the Interior Department,” Schneider said. She said that Interior has been “working with state agencies to make sure adequate financial arrangements exist to cover reclamation costs for any coal mines that shut could down.” Schneider added that “proposed federal regulations that seek to protect streams from coal mining could help some because they contain stricter bonding requirements to cover costs.”

Additional coverage was provided by the [Flathead \(MT\) Beacon](#) (10/27, 15K), the [Casper \(WY\) Star-Tribune](#) (10/28, 81K), the [Washington \(DC\) Times](#) (10/28, Gruver, 283K), the [Houston \(TX\) Chronicle](#) (10/28, 2.15M), and the [Montana Standard](#) (10/28, 36K).

Attorneys General Oppose Stream Protection Rule. The [West Virginia Record](#) (10/28, 313) reports that “West Virginia Attorney General Patrick Morrisey and Ohio Attorney General Mike DeWine are leading an effort opposed to the federal government’s proposed Stream Protection Rule, which would regulate coal-mining activities near streams.” According to the article, “in the letter signed by attorneys general in 14 states, they call the proposal a one-size-fits-all plan that broadens the federal government’s authority at the expense of coal mining operations in West Virginia and across the country.” The AGs claim that “the proposal violates multiple federal laws, including the Surface Mining Control and Reclamation Act, the Clean Water Act and the U.S. Constitution.”

NAVAJO NATION GROUPS SUE OVER HAZE PLANE. [E&E Publishing](#) (10/27, 705) reports that “Navajo Nation groups are suing U.S. EPA and the Department of the Interior over a plan to curb haze-causing emissions from the Navajo Generating Station.” The coalition says “it obtained documents showing EPA and Interior met in secret to develop the plan with a group that included owners of the station.” To’ Nizhoni Ani, Black Mesa Water Coalition and Diné Citizens Against Ruining Our Environment filed the lawsuit in the U.S. District Court for the Northern District of California.

Additional coverage was provided by the [Summit County \(CO\) Citizens Voice](#) (10/27, 506), the [Deseret \(UT\) News](#) (10/28, 476K), the [Houston \(TX\) Chronicle](#) (10/28, Fonseca, 2.15M), the [Provo \(UT\) Daily Herald](#) (10/28, 155K), the [Washington \(DC\) Times](#) (10/28, Fonseca, 283K), [Courthouse News](#) (10/27, 7K), and [KOLD-TV Tucson \(AZ\)](#) Tucson, AZ (10/28, 49K).

POWDER RIVER BASIN COAL SHIPPED OVERSEAS. The [Washington Post](#) (10/16, A1, Warrick, 7.78M) reports that the Obama Administration is “seeking to curb the United States’ appetite” for the Powder River Basin’s coal, “which scientists say must remain mostly in the ground to prevent a disastrous warming of the

planet.” But “each year, nearly half a billion tons of this U.S.-owned fuel are hauled from the region’s vast strip mines and millions of tons are shipped overseas for other countries to burn.” In fact, “government and industry reports predict a surge in exports of Powder River coal over the next decade, at a time when climate experts are warning of an urgent need to reduce coal burning to prevent global temperatures from soaring.”

GROUPS TO APPEAL IN CASE SEEKING TO FORCE BLM TO REVIEW EFFECT OF COAL LEASING ON CLIMATE CHANGE. [Politico](#) (10/28, 1.19M) reports that Microsoft billionaire Paul Allen’s foundation is “underwriting a case brought last year by Friends of the Earth and The Western Organization of Resource Councils against the Department of the Interior intended to compel BLM to review the effect of coal leasing on climate change.” The lawsuit was “dismissed in the D.C. District Court in August, but yesterday the two groups filed a notice of appeal to the D.C. Circuit Court of Appeals.”

COMMERCIAL OIL PRODUCTION BEGINS IN NPR-A. The [Alaska Dispatch News](#) (10/27, 203K) reports that “commercial oil production has begun in the National Petroleum Reserve-Alaska.” ConocoPhillips Alaska made that announcement on Tuesday, “saying oil has begun flowing at its CD5 drill site, part of the Alpine field on the North Slope.” According to the article, “the production is coming from Alaska Native lands within the boundaries of the Indiana-sized reserve, created as a naval petroleum reserve after World War I.”

POWER PLANTS IN NEW MEXICO INSTALL EMISSIONS CONTROLS. The [Albuquerque \(NM\) Journal](#) (10/28, Fenton, 263K) reports that the San Juan Generating Station and Four Corners Power Plant have “begun installing pollution controls to comply with federal regulations intended to reduce atmospheric haze.” According to the article, “the multi-million-dollar retrofitting projects underway at both coal-fired power plants [are] to be completed by 2018.” The article notes that “the retrofitting work aims to reduce emissions, especially of pollutants like nitrogen oxides, sulfur dioxides and particulate matter, which impact visibility.”

TRAPPER COMMENT PERIOD BEGINS THURSDAY. The [Craig \(CO\) Daily Press](#) (10/27, 10K) reports that “the Office of Surface Mining Reclamation and Enforcement will begin the 30-day public comment period on Trapper Mine’s environmental assessment with a community outreach meeting on Thursday.” Representatives from OSMRE and Trapper Mining, Inc., will be “present to explain the National Environmental Policy Act and answer questions on the process.”

KANSAS SEES SPIKE IN EARTHQUAKES ALONG OKLAHOMA BORDER, RAISING FRACKING QUESTIONS. The [Washington Post](#) (10/28, Schuessler, 7.78M) reports that “a sudden spike of earthquakes in southern Kansas is raising eyebrows in the region.” Between Oct. 15 and Oct. 26 there were 52 earthquakes in Kansas, while Kansas experienced only 19 earthquakes total between 1990 and 2010 and no recorded earthquakes in 2011 or 2012. Earthquakes in Kansas “jumped from four in 2013 to 817 in 2014, according to the U.S. Geological Survey.” The Post reports that “all of the state’s earthquakes over the past stretch occurred in just two southern counties that run along the Kansas-Oklahoma border, raising questions about the quakes’ ties to hydraulic fracking in the region – although industry disputes the connection.”

ADDITIONAL COVERAGE: NPS PROPOSES UPDATE OF OIL, GAS REGULATIONS. Additional coverage that the NPS is proposing to update its oil and gas regulations was provided by [Natural Gas Intelligence](#) (10/28, Subscription Publication) and the [High Country \(CO\) News](#) (10/28, 74K).

Offshore Energy Development:

GREEN GROUPS CALL FOR ADDITIONAL ANALYSIS OF SEISMIC SURVEYS. The [Greenwire](#) (10/27, Subscription Publication) reports that “environmental groups say the Obama administration has ‘grossly underestimated’ the risks of seismic surveys on marine mammals, citing new data that update the distribution of whales and dolphins along the East Coast.” The BOEM estimates seismic surveys will “result in as many as 138,000 injuries to marine mammals and 13.5 million disturbances, which can be anything from disrupting communication to changing swimming direction.” However, “environmental groups say updated government data indicate that many more marine mammals are in the survey area than previously estimated.” In a letter to BOEM yesterday, the Natural Resources Defense Council, the Center for Biological Diversity, Oceana and “more than a dozen other groups call for a new analysis.”

ADDITIONAL COVERAGE: US, MEXICO SEEK TO STRENGTHEN OFFSHORE SAFETY. Additional coverage that the US and Mexico signed a letter of intent Oct. 20 “to strengthen cooperation, coordination and information sharing related to the development, oversight, and enforcement of safety and environmental regulations for development of offshore hydrocarbon resources” was provided by the [E&P Magazine](#) (10/28).

STUDY: CORAL DAMAGE FROM BP OIL SPILL WORSE THAN PREVIOUSLY THOUGHT. The [AP](#) (10/28, Burdeau, 7.78M) reports that a new study claims “gulf coral damage from the massive BP oil spill is more extensive than previously thought.” Researchers from Florida State University researchers and federal scientists with the National Oceanic and Atmospheric Administration concluded that damage to the coral is the result of an “acute, isolated event rather than ongoing natural processes.”

America’s Great Outdoors:

Bureau of Land Management:

BLM OPENS INVESTIGATION AFTER COMPANY SPRAYS PESTICIDE ON PUBLIC LAND WITHOUT LICENSE. The [Oregon Public Broadcasting](#) (10/28, 10K) reports that the BLM has “opened an internal investigation after the federal agency allowed an Oregon-based contractor to spray pesticides on public land without a valid license.” According to the article, “the spraying in early October prompted the Oregon Department of Agriculture to secure a restraining order to stop Applebee Aviation from operating while its license was suspended.” According to spokesman Michael Campbell, “BLM investigators now want to know how the company was able to spray pesticides on BLM land without a valid license.”

TWO KILLED IN EXPLOSION INSIDE WORLD WAR II-ERA TANK AT GUN RANGE IN OREGON. The [New York Daily News](#) (10/28, Salinger, 3.59M) reports that “an explosion inside a World War II-era tank killed two people at a gun range in central Oregon Tuesday afternoon, police said.” The article notes that “the gun range, which operates on 600 acres of land leased from the Bureau of Land Management, noted a high level of fire danger on its website Tuesday.”

Fish and Wildlife Service:

FWS DELAYS DECISION ON RED WOLF RECOVERY PROGRAM. [E&E Publishing](#) (10/27, 705) reports that “for the third time in just over a year, the Fish and Wildlife Service today pushed back the date by which it aims to decide the fate of its troubled red wolf recovery effort.” The agency “initially said late last year that an internal review of the program would be completed ‘in early 2015,’” and “then this summer, the agency said the evaluation wouldn’t be done until the end of the year.” But “now, top officials say it won’t be completed until the middle of next year.”

Also reporting on the story is the [Raleigh \(NC\) News & Observer](#) (10/28, 356K).

Team Formed To Examine Red Wolf Population. The [AP](#) (10/28, 2.15M) reports that “federal officials overseeing the only wild population of red wolves announced the formation Tuesday of a planning team that includes representatives on different sides of the issue.” The team includes staff members from the North Carolina Wildlife Resources Commission, a representative from Defenders of Wildlife, “a county official, a landowner and several researchers.” FWS regional director Cindy Dohner said “the new team will address shortcomings related to landowner input and bring together a wide range of expertise.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/28, Drew, 283K), the [Hampton Roads \(VA\) Virginian-Pilot](#) (10/28, 374K), and [WBT-AM Charlotte \(NC\)](#) Charlotte, NC (10/28, 4K).

ANIMAL ADVOCATES OPPOSE IMPORTATION OF ELEPHANTS FROM SWAZILAND. [E&E Publishing](#) (10/26, 705) reports that “more than 70 animal welfare advocates today called on the Fish and Wildlife Service to reject a permit from three U.S. zoos to import 18 wild African elephants from Swaziland.” They said, “The proposed importation has no single redeeming virtue.” The advocates said, “We call on the Kingdom of Swaziland and the zoos involved in the import to do what is in the best interests of these elephants and relocate them to a protected park or sanctuary in Africa.”

NORTH AMERICAN BAT MONITORING PROGRAM SPURRED BY DEADLY BAT DISEASE. The [AP](#) (10/27, 996K) reports that “an effort spanning 31 states and 10 Canadian provinces has been working to better understand the ecological role that bats play, and the threats they face from climate change, habitat loss and wind energy development.” The North American Bat Monitoring Program “involves acoustic surveys to detect the high-pitched frequencies emitted by the flying mammals as they capture bugs and navigate in the dark.” According to researchers, “the monitoring program has been spurred by a disease called white-nose

syndrome that has killed millions of bats and is spreading.”

OREGON VOTERS MAY DECIDE WHETHER TO BAN IVORY SALES. The [AP](#) (10/28, Cooper, 283K) reports that “animal welfare advocates said they will push for a ballot measure asking Oregon voters to outlaw ivory sales after a bill seeking a ban stalled earlier this year in the Legislature.” The ballot initiative would “end the sale of products derived from a variety of endangered or heavily poached animals, including elephants, rhinos, lions, sea turtles and sharks.” Supporters “hope to tamp down demand for exotic animal parts and discourage poaching in Africa and Asia,” but “critics countered that criminalizing the sales of parts from animals killed long ago will do nothing to stop the poachers responsible for the killing of elephants today.”

Additional coverage was provided by the [Oregonian](#) (10/28, 769K) and [KVAL-TV](#) Eugene, OR (10/28, 69K).

BIG CANOE CREEK FLOWING FREE AFTER 130-YEAR OLD DAM REMOVED IN SPRINGVILLE. The [Alabama Live](#) (10/28, 855K) reports that the Coosa Riverkeeper will hold an event in Birmingham on Wednesday to commemorate the second anniversary of the “removal of Goodwin’s Mill Dam.” The FWS is listed among the organizations which supported the dam removal project.

ADDITIONAL COVERAGE: FWS PROPOSES RECOVERY PLAN FOR GILA CHUB. Additional coverage that the FWS has proposed a recovery plan for the endangered Gila chub was provided by the [Arizona State University Cronkite News](#) (10/27).

ADDITIONAL COVERAGE: AFRICA’S LION POPULATION AT RISK OF BEING HALVED, STUDY SAYS. Additional coverage of the decline in Africa’s lion population was provided by [TIME](#) (10/28, 19.1M), the [Christian Science Monitor](#) (10/27, 496K), the [Houston \(TX\) Chronicle](#) (10/28, 2.15M), the [Duluth \(MN\) News Tribune](#) (10/28, 136K), the [New York Post](#) (10/27, 2.59M), the [Sydney \(AUS\) Morning Herald](#) (10/27, 39K), and the [Toronto \(CAN\) Star](#) (10/27, 119K).

National Park Service:

GATEWAY ARCH TO CELEBRATE FIFTIETH ANNIVERSARY. The [AP](#) (10/28, Press, 7.78M) reports that the NPS on Wednesday will celebrate the fiftieth anniversary of the Gateway Arch. St. Louis’s mayor and NPS officials will “speak about the anniversary, and visitors can get a glimpse of the grounds’ renovations.” The article notes that “up to 1,000 free cupcakes will be distributed, and rides to the top of the Arch will cost just \$1 — the price of tram tickets from 50 years earlier.”

Additional coverage was provided by [NPR](#) (10/28, 1.78M).

REPORT ESTIMATES COST OF RISING SEAS ON NATIONAL PARKS. The [Huffington Post](#) (10/27, Xprize, 251K) reports that in June, the NPS, “in partnership with the Program for the Study of Developed Shorelines at Western Carolina University, put out a Coastal Assets Report listing thousands of National Park properties that would be damaged by a one meter rise in sea level by the end of this century and calculating its current replacement value.” The article notes that “the grand total for the 10,000 assets in harm’s way” is \$40 billion. Moreover, “this phase of the study covered just 40 of a total of 118 “coastal units” that the NPS is responsible for, so the grand total could easily double or almost triple if a full survey were completed.”

DEATH VALLEY NATIONAL PARK HIT BY FLOODING. The [Riverside \(CA\) Press Enterprise](#) (10/28, 291K) reports that “a series of storms in recent days dropped more than 3 inches” on Death Valley National Park, “sending a wall of water down a picturesque canyon, snapping two dozen power poles and swamping historic buildings 2 feet deep in mud.” The result is “a massive mess, a major cleanup effort and the closing of some significant attractions, including one site that’ll be shut for as long as a year.” The article notes that “Scotty’s Castle and Grapevine Canyon in the park’s northern reach are closed.”

Additional coverage was provided by the [Los Angeles \(CA\) Times](#) (10/27, 3.6M).

MESA VERDE’S HISTORIC FAR VIEW CENTER SEEKS NEW TENANT. The [Durango \(CO\) Herald](#) (10/27, 31K) reports that “Mesa Verde’s Far View Visitors Center sits abandoned and needs a new tenant.” However, “despite a plethora of ideas for a new use at Far View — including a performance hall, conference space, restaurant, or a Native American cultural center — nothing has gained traction, said park superintendent Cliff Spencer.” He said, “We’ve been looking for four years and are still trying to find a use for it. Right now, we’re looking at leasing it. Whatever the alternative, it will have to pay for itself.”

ACTION TAKEN AGAINST INVASIVE GREEN SUNFISH. The [St. George \(UT\) News](#) (10/27, 3K) reports that the NPS and Arizona Game and Fish Department will “administer two treatments of the fish toxin rotenone to eliminate invasive Green Sunfish (*Lepomis cyanellus*) from a backwater slough.” The slough is “located on the Colorado River within Glen Canyon National Recreation Area, three miles below the Glen Canyon Dam.” According to the article, “the first treatment is planned between Nov. 2 and 6, followed by a second treatment ten days later to address fish that may have hatched after the first treatment.”

OLYMPIC HOT SPRINGS CLOSED TO VISITORS DUE TO FATALITY. The [AP](#) (10/28, 2.15M) reports that “officials say a Silverdale man has died in a hot spring pool within Olympic National Park, prompting the closure of Olympic Hot Springs.” Park officials said that “rangers responded to a report of a fatality Monday and found 61-year-old Bruce Gunderson had died in a pool.” Olympic National Park Superintendent Sarah Creachbaum said “although use has always been at the visitor’s discretion, the pools are closed until further notice due to health and safety concerns.”

MAN ACCUSED OF ILLEGALLY KILLING ELK IN GRAND TETON. The [AP](#) (10/28, 2.15M) reports that “a Wilson man who holds a cow-elk only tag has been cited for killing a bull elk in a portion of Grand Teton National Park that is closed for hunting.” Robert Baltensperger was “cited for four infractions related to the illegal killing of a bull Saturday near Schwabachers Landing.”

US Geological Survey:

STUDY SAYS GLOBAL WARMING UNLOCKING CARBON STORES IN PERMAFROST. The [Christian Science Monitor](#) (10/27, 496K) reports that “for thousands of years, a large percentage of the world’s carbon stores have been safely locked in permafrost, the frozen layer of soil and organic matter that covers much of the planet’s northernmost latitudes,” but “as temperatures rise and some permafrost melts, that carbon is being released into the atmosphere as carbon dioxide at an alarming rate.” The article notes that “for some ancient permafrost, about half its carbon could decompose in just one week after a thaw, according to a new study by the US Geological Survey, which analyzed 35,000-year-old permafrost soils found in Alaska and Siberia known as yedoma.” Kim Wickland, the USGS scientist who led the team said, “It had previously been assumed that permafrost soil carbon this old was already degraded and not susceptible to rapid decomposition upon thaw.”

USGS PUBLISHES NEW LUNAR MAPS. [Digital Trends](#) (10/28, 429K) reports that “new lunar maps published recently by the USGS provide an unprecedented look at the moon’s surface, allowing you to couch surf your way across moon craters, volcanoes and Apollo landing sites.” The two maps were “assembled using information from NASA’s Lunar Reconnaissance Orbiter (LRO) spacecraft and recently published in high-resolution format on the USGS website for printing or download.”

Top National News:

MEDIA ANALYSES: OBAMA DEFENSE OF POLICE OFFICERS CONTAINED REBUKE OF FBI CHIEF.

The President’s [speech](#) in Chicago before the International Association of Chiefs of Police generated one report on the [CBS Evening News](#) (10/27, story 3, 2:10, Pegues, 5.08M), as well as extensive print, online, and local TV coverage. Most stories highlighted Obama’s defense of police officers, and nearly every report framed his message as a response to comments last week by FBI Director James Comey. As the [AP](#) (10/28, Superville) notes, the FBI chief “said that police anxiety over cellphone cameras and viral videos partly explains why violent crime has climbed recently in several large US cities.” The [Washington Post](#) (10/28, Ross, 7.78M) says Comey “is in a spot of trouble with the boss,” and “it is an understatement to say that the White House and officials inside the Justice Department...weren’t happy” with his theory.

[NPR](#) (10/27, Peralta, 1.78M) noted that “the White House sought to distance itself from” Comey even before the speech, with White House spokesman Eric Schultz telling reporters “crime has spiked in some places and declined in others,” and adding, “The available body of evidence does not support the notion that law enforcement officers around the country are shying away from doing their job.” The [Christian Science Monitor](#) (10/27, Chen, 496K), meanwhile, quoted Press Secretary Josh Earnest as saying “the evidence ‘does not support the notion that law enforcement officers around the country are shying away from fulfilling their

responsibilities.”

The [CBS Evening News](#) (10/27, story 3, 2:10, Pegues, 5.08M) reported that Obama also “cautioned against jumping to conclusions about why crime has spiked in some major cities.” Obama was shown saying, “We do have to stick with the facts. We – what we can’t do is cherry pick data or use anecdotal evidence to drive policy or to feed political agendas.” [USA Today](#) (10/28, Korte, 5.56M) reports that Obama also argued that police “can reduce violent crime while also being more sensitive to minority communities.” [WCIU-TV Chicago](#) (10/28, 7:03 p.m. CDT) showed the President saying, “I want to be as clear as I can be. I reject any narrative that seeks to divide police and the communities that they serve. And I reject the story line that says when it comes to public safety, there’s an us and a them.”

The [Chicago Tribune](#) (10/28, Pearson, 2.33M) notes that the President further “defended police officers who have come under intense scrutiny amid a breakdown in relations between law enforcement and minority communities, and said police can’t be expected to contain problems that society refuses to solve.” The Tribune also says Obama’s words “came as the White House sought to distance Obama from comments by his FBI director.” The [New York Daily News](#) (10/28, Edelman, 3.59M), meanwhile, refers to a “passionate defense of police officers” by the President and quotes him asserting that “too often, law enforcement gets scapegoated for the broader failures of our society and criminal justice system.” [WLS-TV Chicago](#) (10/28, 6:03 p.m. CDT, 354K) similarly indicated that the President “was very sympathetic to the plight of law enforcement officers in the United States,” and [WBBM-TV Chicago](#) (10/28, 6:02 p.m. CDT, 61K) reported that he “sought to build a bridge between law enforcement and the communities they serve.” Greg Gutfeld said on [Fox News’ The Five](#) (10/27, 408K), “I have to commend...Obama for saying one thing that goes against Black Lives Matter.”

[Slate](#) (10/27, Neifakh, 1.24M) saw a “veiled rebuke to...Comey” in Obama’s comments, while [TIME](#) (10/27, Rhodan, 19.1M) said Obama “tiptoed” into the “discussion on the issue of increased scrutiny on police by suggesting that the media does officers a disservice by focusing attention on instances of wrongdoing.” Said Obama, “Let’s face it, the media tends to focus on the sensational and the controversial and folks on both sides who say stuff that’s not designed to bring folks together.”

In his remarks, the [New York Times](#) (10/28, Shear, Subscription Publication, 11.64M) reports, the President also “made his case on Tuesday for an overhaul of the nation’s sentencing laws, telling a gathering of top law enforcement officials here that putting large numbers of nonviolent drug offenders in prison was neither fair nor an effective way of combating crime.” To the Times, Obama is “seeking to shift the conversation about policing and racial bias away from charges of police abuse to a larger discussion about ways to improve the fairness and effectiveness of the criminal justice system.” [Al Jazeera America](#) (10/27, Kahn, 138K) noted that the President went on to say, “This is not some bleeding heart attitude here. Violence is real in this city and around the country, and I have seen firsthand the devastation the drug trade has wrought on individual lives and entire communities. ... It is possible for us to come up with strategies that effectively reduce the damage of the drug trade without relying solely on incarceration.”

The [Huffington Post](#) (10/27, Reilly, 251K) similarly reported that Obama “said ‘our divides are not as deep as some would like to suggest,’ and called for more understanding between citizens and police.” David A. Graham, writing for [The Atlantic](#) (10/27, Graham, 2.66M), said the President was trying “to strike a balance between those two perspectives: those of the activists, and those of law-enforcement officers like Comey.” However, “the conversation was fairly soft. It was classic Obama: Admitting that every side had something to offer, steering a moderate path, and calling on all sides to step up and compromise.” Mary Mitchell writes in the [Chicago Sun-Times](#) (10/28, Mitchell, 758K) that “Charlene Carruthers, national director of the Black Youth Project 100, wasn’t impressed” with Obama’s tone yesterday. Said Carruthers, “Once again there is too much focus on improving relations between the police and the black community. I believe police are complicit in the marginalization and oppression of our people.”

The [Christian Science Monitor](#) (10/27, Jonsson, 496K), meanwhile, reported that “for those convinced that US cops are switching to more laid-back tactics, Comey’s decision to wade into the debate is significant.” Heather MacDonald, “a Manhattan Institute scholar who documented evidence of the Ferguson effect for an influential Wall Street Journal story in May,” told the Monitor, “It’s a huge deal that Comey is acknowledging this, because he’s the nation’s keeper of the most official crime data that we’ve got.”

Before the President’s speech, Ron Allen said on [MSNBC](#) (10/27, 733K), “It’s clear he and the FBI Director disagree about this ‘Ferguson effect’ and the impact it may or may not be having on police officers.” Allen added that it is “very unusual for a sitting president to address the group,” but “clearly, this issue of criminal

justice reform, gun control, gun safety, whatever you want to call it, is something that's very much on the President's mind."

The [Daily Northwestern](#) (10/27, Jacobs, 44K) reports that Obama also "said claims of racial bias in law enforcement are not unfounded," and argued that "violent crime is...preventable with stricter gun laws ensuring weapons don't get in the hands of criminals." [WCIU-TV Chicago](#) (10/28, 7:03 p.m. CDT), however, showed Obama saying, "Please do not believe this notion that somehow I am out to take everybody's guns away. Nobody is doing that. We are talking about commonsense measures to make sure criminals don't get them."

Obama, notes the [Los Angeles Times](#) (10/28, Parsons, 3.6M), had met previously with "families of slain police officers while in Chicago to try to persuade law enforcement officials to work more closely with communities they police," and with "the families of children who have died in Chicago's epidemic of violence as he attempts to focus attention on all victims – police and community alike." [The Blaze](#) (10/27, Lucas, 1.89M) quoted Obama as saying, "Fewer gun safety laws don't mean more freedom, they mean more fallen officers. ... They mean more grieving families, and more Americans terrified that they or their loved ones could be next." [The Hill](#) (10/27, Fabian, 654K) and [Reuters](#) (10/28, Harte) run similar accounts of Obama's comments.

Don Lemon said on [CNN's Situation Room](#) (10/27, 554K) that the President "needs to continue to do exactly what he's doing, and I think he needs to go in even harder. I thought his speech today was brilliant," adding, "But I think that he needs to, while he has the executive power, while he is the chief executive, he needs to figure out what to do next and how he can make a difference."

Obama Recalls Being Profiled. The [Huffington Post](#) (10/27, Bendery, 251K) reported that the President "said Tuesday that he knows racial profiling by police is a real concern – in part because he's experienced it firsthand." Recounting incidents when "he'd been pulled over in his car by police," Obama said, "Most of the time I got a ticket, I deserved it. I knew why I was pulled over. ... But there were times when I didn't." Obama then "cited a report released this week showing that many African Americans have similarly been pulled over or frisked for no clear reason."

Study: Drivers Less Likely To Yield To Black Pedestrians. The [Washington Times](#) (10/28, Chasmar, 283K) reports that a new study by researchers at Portland State University and the University of Arizona claims that drivers "are less likely to yield for black pedestrians than white pedestrians, contributing to disproportionate safety outcomes for minorities." According to the study, "a black pedestrian's wait time at the curb was about 32 percent longer than a white person's, and black participants were about twice as likely to be passed by multiple cars," a finding the study says supports "its hypothesis that minority pedestrians experience discriminatory treatment by drivers at crosswalks."

Rubio: White House Hasn't Defended Police Enough. Sen. Marco Rubio said on [Fox News' The O'Reilly Factor](#) (10/27, 767K) that while "there is a legitimate issue in this country with especially young African-American males with minority communities in general that feel like they are targeted or they have a bad relationship with local law enforcement," there is "another issue at play here, that is the overwhelming and vast majority of law enforcement officers in this country are just trying to do their jobs," and "it is troubling that there are groups and rhetoric out there now encouraging people to demonize law enforcement." Rubio continued, "I think it's unfortunate that the White House has not acknowledged that enough."

Pence Aide Objects To Obama Comment On Guns. The [Indianapolis Star](#) (10/27, Cook, 570K) reports that in his remarks, "Obama suggested Tuesday that Indiana and other states with few gun restrictions are to blame for Chicago's homicide problem." Said the President, "There are those who criticize any gun safety reforms by pointing to my hometown as an example. ... The problem with that argument, as the Chicago Police Department will tell you, is that 60 percent of guns recovered in crimes come from out of state. You've just got to hop across the border." Matt Lloyd, a spokesman for Indian Gov. Mike Pence, said in response, "Blaming Chicago's crime problems on Indiana is unfortunate and inaccurate."

Report: One In 14 Children Has A Parent In Prison. A report from the national research organization Child Trends says one in 14 children has "at least one parent behind bars," [USA Today](#) (10/28, Eversley, 5.56M) reports. According to the report, "Parents Behind Bars: What Happens to Their Children," children in this situation "suffer from low self esteem, poor mental and physical health, and other problems." USA Today notes that the group hopes its findings "will prod prisons, schools and lawmakers to make changes that will help young people who have incarcerated parents."

Obama Attends Bulls Game. The [Chicago Sun-Times](#) (10/28, Ogden, 758K) noted on its website that the President attended the game between the Bulls and Cavaliers last night, taking “his courtside seat across from the Cleveland bench with just under three minutes remaining in the first quarter.”

OBAMA ENDORSES BIPARTISAN BUDGET DEAL AS HOUSE CONSERVATIVES EXPRESS DISMAY.

Media analyses are offering cautious but largely favorable reviews of the budget deal between the White House and Hill leaders, which is being cast as a victory for the White House and a defeat for House conservatives. The [New York Times](#) (10/28, Davis, Subscription Publication, 11.64M), for example, calls the agreement “a major victory” for the President, which vindicates “his hard line this year against spending limits that he argued were a drag on the economy” and buys him “freedom for the final 14 months of his term from the fiscal dysfunction that has plagued his presidency.” To the [AP](#) (10/28, Werner), meanwhile, the package means that Speaker Boehner, “all but forced to resign under conservative pressure,” has managed to craft “an in-your-face rebuttal to his hardline antagonists.”

All three network newscasts briefly covered the story for a combined 80 seconds. The [CBS Evening News](#) (10/27, story 7, 0:30, Pelley, 5.08M) said that “those frustrated by Washington gridlock might be surprised to hear that the White House...has reached a budget agreement with House Republican leaders led by...Boehner,” and as a result “there will be no more government cliffhangers in the Obama Administration.” [ABC World News](#) (10/27, story 8, 0:20, Muir, 5.84M) referred to “a breakthrough in the budget stalemate between Congress and the White House” which made “some conservatives unhappy,” and [NBC Nightly News](#) (10/27, story 4, 0:30, Holt, 7.86M) said “the threat of shutdown” is now “on the next president’s plate.”

Obama endorsed the deal yesterday during a news conference in Chicago. [Reuters](#) (10/28) notes that he urged both parties to “come together to pass this agreement without delay,” and not “get sidetracked by ideological debates that have no place in America’s budget process.” On its website, [USA Today](#) (10/28, Korte, 5.56M) quotes Obama as saying, “It’s the right thing to do,” and “it’s an actual bipartisan compromise, which hasn’t been happening in Washington a lot lately.” The [Washington Times](#) (10/28, Boyer, 283K) notes that the President also said the agreement “reflects our values,” and expressed satisfaction that it “will finally free us from this cycle of shutdown threats, last-minute patchwork fixes.” Moreover, said [The Hill](#) (10/27, Fabian, 654K), Obama celebrated the fact that the deal is “paid for, in part, by a measure that makes sure private equity firms and hedge funds pay what they owe in taxes, just like everybody else.” The Hill added that “putting aside fiscal fights with Republicans could...free Obama to focus priorities such as trade and criminal justice reform during his last 15 months in office.”

[The Blaze](#) (10/27, Lucas, 1.89M) noted that White House spokesman Eric Schultz yesterday touted the President’s role in crafting the agreement, saying, “Unlike in previous budget agreements, this was a process that the president and the White House was heavily engaged in. The president made a number of calls throughout this process to leaders of both parties in the House and in the Senate. ... Those calls started in earnest around early- to mid-September.”

The [Washington Times](#) (10/28, Boyer, 283K) reports that Vice President Biden also weighed in on what he dubbed “a good deal,” adding, “I want to compliment John [Boehner] and the entire Congress on coming up with” it. [Voice of America](#) (10/27, 64K) noted that “Treasury Secretary Jack Lew said the new deal will help the middle class, keep the nation safe, and create an additional 340,000 jobs.” [Politico](#) (10/27, White, 1.19M) tends to agree, arguing that “the sudden breakout of fiscal peace in Washington could produce one clear winner: The US economy.”

Also defending the agreement yesterday was Senate Majority Leader Mitch McConnell. [Politico](#) (10/27, Kim, 1.19M) reports that he said, “I think the agreement speaks for itself. ... The debt ceiling is a part of it, and it has along with it, other matters, including what we have said from the beginning was essential to get Republican support for raising the debt ceiling, which is entitlement reform of some significance.”

The [Washington Post](#) (10/28, Snell, 7.78M) reports that Boehner yesterday called the agreement “a good deal,” and “added that the alternative was a clean debt-ceiling suspension with no extra funding for troops.” Boehner also “conceded that he was cleaning a ‘dirty barn’ for his likely replacement as speaker,” Rep. Paul Ryan, who “wasn’t involved in the secretive negotiations.” [Reuters](#) (10/28, Lawder, Cornwell) quotes the outgoing speaker predicting that the measure will “pass with a bipartisan majority, and I’ll be really happy.”

Yesterday, noted [Voice of America](#) (10/27, 64K), Ryan “joined” in the conservative “criticism” of the agreement, saying, “I think this process stinks. ... This is not the way to do the people’s business. Under new

management, we're not going to do the people's business this way." [Bloomberg Politics](#) (10/27, Dopp, House, 303K) reports that Senate Minority Leader Harry Reid "dismissed Ryan's" criticism, asserting that "the negotiations were held under the 'same process he used with Patty Murray two years ago, so he should go back and look at his clippings.'"

With his comments, says the [Washington Post](#) (10/28, Debonis, 7.78M), Ryan "started walking a fine line between appeasing the conservative lawmakers he will routinely have to corral in his new job and endorsing budget legislation that those conservatives oppose." His "message appears calibrated to avoid alienating GOP lawmakers who have pressed for a more bottom-up approach to House management while also steering clear of the deal's specifics," and "so far, it appears to be working," as "exiting the conference meeting Tuesday, most conservative Republicans said they did not blame Ryan for the...deal." [Politico](#) (10/27, French, 1.19M) similarly reports that "conservative lawmakers in the House Freedom Caucus say they're satisfied that" Ryan "is just as aggravated as they are with how the \$80 billion budget and debt ceiling deal set to pass Congress this week was negotiated." Said Rep. Raul Labrador, "I think we have to take him at his word and he is being sincere." The [Wall Street Journal](#) (10/28, Peterson, Subscription Publication, 6.23M) quotes Rep. Matt Salmon as saying, "My understanding is...Paul wants to do things completely differently: He wants to build things from the ground up." Rep. Ken Buck, meanwhile, said, "This is John Boehner's deal."

[Bloomberg Politics](#) (10/27, Dopp, House, 303K) reports that Ryan did not disclose how he will actually vote on the agreement, "because I quite frankly haven't seen it."

[The Hill](#) (10/27, Swanson, Wong, 654K) described Ryan as "distancing himself from a pending...deal," which [Roll Call](#) (10/27, Lesniewski, 139K) said could give him "some breathing space to foster an environment of empowering committees and members, at least until the beginning of December." On the other hand, the [Los Angeles Times](#) (10/28, Mascaro, 3.6M) estimates that the deal "may set the Wisconsin Republican on a collision course with the same conservative faction that nudged Boehner to early retirement."

[Bloomberg Politics](#) (10/27, Kapur, 303K) reports that Rep. John Fleming, "a founding member of the hardline group House Freedom Caucus," yesterday called the agreement "the worst of the worst," while Salmon "objected to the spending hikes, describing the deal as 'robbing Peter to pay Paul.'"

[Politico](#) (10/27, Everett, 1.19M) reports that Ted Cruz "launched a searing critique" of the deal, "slamming outgoing House Speaker John Boehner for leaving Congress via a 'golden parachute' and accusing GOP leaders of capitulating to...Obama." Said Cruz, "It is complete and utter surrender. ... We now have a GOP Congress, but no one watching this budget surrender would know it." Stephen Moore, a [Fox News](#) (10/27, 9.42M) contributor, similarly described the deal as "unconditional fiscal surrender" and "the worst budget deal to be negotiated by the GOP since George H.W. Bush agreed to violated his no new taxes pledge in 1990 at Andrews Air Force Base."

In an analysis piece, the [Washington Times](#) (10/28, Dinan, 283K) says Democrats "said the deal meets all their goals: It boosts domestic spending by the same amount as defense spending, and it forced the GOP to back away from major entitlement cuts that Republicans had insisted be part of any deal." Meanwhile, Republicans "said they pushed back against Mr. Obama by attaching conditions to the debt ceiling increase and winning a boost in defense spending, saying it was worth the increase in domestic spending if it meant giving the Pentagon more money, too."

The [Military Times](#) (10/27, Shane III, Gould, 792K) reports that the deal "would give Pentagon planners the fiscal stability they have been begging for, but falls about \$5 billion short of what they hoped to receive in fiscal 2016." The [Stars And Stripes \(DC\)](#) (10/27, Tritten, 11K) notes that Rep. Mac Thornberry, chairman of the House Armed Services Committee, "said he will support" it, "though it provides less than Congress had planned for the military and sets another spending limit next year." Dr. Tom Coburn, a former US senator, and William Ruger, Vice President for Research and Policy at the Charles Koch Institute and a veteran of the war in Afghanistan, write in [USA Today](#) (10/27, Coburn, Ruger, 5.56M) that "lost in the debate over the right amount of money to add to the defense budget, it seems, is a thoughtful consideration of whether we could more wisely spend what has already been allocated," and cautions that "as long as we keep talking about adding to the budget without first asking what we're paying for, we undercut any wide

REP. WALDEN INVITES SECRETARY JEWELL TO OWYHEE MEETING TO DISCUSS POSSIBLE NATIONAL MONUMENT DESIGNATION. The [Bend \(OR\) Bulletin](#) (10/25, 94K) reports that Rep. Greg Walden “wants to know what Interior Secretary Sally Jewell thinks about a potential national monument designation for the Owyhee Canyonlands in Malheur County.” Walden “opposes the idea, and sent a letter Friday to Jewell, asking her or a high-level Department of Interior official to come to a Thursday meeting on the topic in Adrian, near the Oregon-Idaho border on the Snake River.” He wrote, “I invite you (or a senior representative of your choosing) to attend this important forum to provide information on the (Obama) Administration’s consideration of this proposal and hear directly from the communities that would be directly impacted by the Department of the Interior’s (DOI) actions.”

Additional coverage was provided by [My Central Oregon](#) (10/23).

More National Monument Designations Urged. For the “Congress” blog of [The Hill](#) (10/25, Richardson, 471K), Kirk Richardson, executive director of KEEN Effect, writes in support of new national monument designations for the Mojave Trails, California; Owyhee Canyonlands, Oregon; Gold Butte, Nevada; and Birthplace of Rivers, West Virginia. He argues that “protecting these four places is critical to building healthy communities and enhancing quality of life for millions of Americans.” Richardson also claims that “energy development and other extractive industries pose a threat to clean air and water, and damage recreation—a key economic engine.”

Sen. Feinstein Pushing For Protection Of Public Lands. In an op-ed for the [Palm Springs \(CA\) Desert Sun](#) (10/24, 99K), Sen. Dianne Feinstein writes about the public meeting held last week at the Wildlands Conservancy’s Whitewater Preserve to discuss three new national monuments. She “left the meeting even more convinced that we must do everything we can to preserve this special land for generations to come.” Feinstein says that “whether or not President Obama designates the monuments, I remain committed to doing all I can to get the entirety of my legislation enacted.”

OBAMA: CONGRESS SHOULD REAUTHORIZE LWCF “WITHOUT DELAY.” [The Hill](#) (10/24, Richardson, 471K) “Briefing Room” blog reported President Obama “is calling for Republicans in Congress to reauthorize the Land and Water Conservation Fund ‘without delay.’” During his weekly address on Saturday, Obama said, “For more than half a century, this fund has protected more than five million acres of land – from playgrounds to parks to priceless landscapes – all without costing taxpayers a dime.”

[Voice of America](#) (10/24, 32K) quoted Obama as saying the US is “home to some of the most beautiful God-given landscapes in the world,” adding, “it’s our responsibility to protect these treasures for future generations, just as previous generations protected them for us.”

Additional coverage of the LWCF was provided by the [Daily Mail \(UK\)](#) (10/25, 5.59M) and the [High Country](#)

[\(CO\) News](#) (10/26, 74K).

Congress Urged To Reauthorize LWCF. In an op-ed for the [Agri-Pulse](#) (10/25), John Larson, the Executive Director of Programs for American Farmland Trust, urges Congress to reauthorize the LWCF. He writes, “As we search for strategies and monies to preserve our nation’s productive farm and forest lands, the LWCF offers a critical opportunity to increase voluntary conservation easements that help keep private working lands in production and benefit both wildlife and the environment.”

INTERIOR’S MINE SPILL REPORT INTENSIFIES PRESSURE ON EPA. The [Greenwire](#) (10/23, Subscription Publication) reports that the release last week of the Interior Department’s of its “investigation into this summer’s abandoned mine spill in Colorado is intensifying scrutiny of U.S. EPA’s role in the accident.” EPA critics are “intensifying their questions after its release.” Navajo Nation President Russell Begaye said, “This report exposes the role the EPA’s gross negligence had in triggering a disaster that has culturally and economically devastated the Navajo Nation. The EPA and all responsible parties must be held accountable.”

Additional coverage was provided by the [Salt Lake \(UT\) Tribune](#) (10/25, 492K), the [Summit County \(CO\) Citizens Voice](#) (10/23, 506), the [Denver \(CO\) Post](#) (10/25, Paul, 787K), the [Denver \(CO\) Post](#) (10/25, Paul, 787K), the [Government Executive](#) (10/25, 3K), and [Sputnik News](#) (10/24, 33K).

NEVADA, SEVEN COUNTIES JOIN LAWSUIT AGAINST FEDERAL SAGE GROUSE PLANS. The [Greenwire](#) (10/23, Subscription Publication) reports that “the state of Nevada and seven more counties in that state have joined a federal lawsuit seeking to overturn sweeping federal land-use plan amendments designed to protect the greater sage grouse – a move that appeared to upset Gov. Brian Sandoval (R).” The amended complaint filed last week “adds Nevada Attorney General Adam Laxalt (R) and the seven Nevada counties – Lander, White Pine, Lincoln, Humboldt, Washoe, Churchill and Pershing – along with Paragon Precious Metals LLC and Ninety-Six Ranch LLC to the original lawsuit filed last month in the U.S. District Court for the District of Nevada.”

Additional coverage was provided by the [Las Vegas \(NV\) Review-Journal](#) (10/25, 378K) and the [Reno \(NV\) Gazette-Journal](#) (10/25, 179K).

Sage Grouse Rules Explained. In his column for the [Elko \(NV\) Daily Free Press](#) (10/25, 22K), Larry Hyslop tries to explain the “very complex restrictions” of the Greater Sage-grouse Conservation Effort “in a general way, with help from Lauren Mermejo, the BLM’s Great Basin sage grouse project manager.”

OUTDOORS INDUSTRY MUSCLES PUSHES PUBLIC LANDS AS POLITICAL ISSUE. The [Reno \(NV\) Gazette-Journal](#) (10/23, 179K) reports that in western political battlegrounds, such as Nevada and Colorado, “political experts and special interest groups are already trying to galvanize allies and marginalize enemies for the 2016 campaign cycle” and “when it comes to winning votes from outdoors enthusiasts public lands become the political battlefield.” The article points to “a recent push from the Outdoor Industry Association to highlight swing state voters’ affinity for keeping public land in Nevada and Colorado in the hands of the federal government.” The association, “which represents about 4,000 outdoor recreation supply manufacturers, distributors, retailers and others, hired the polling firm Public Opinion Strategies to highlight opposition among likely voters to proposals that would prompt the federal government to unload public land holdings.”

REPUBLICAN SENATORS INTRODUCE BILL TO LIMIT ADMINISTRATION’S REGULATIONS. [The Hill](#) (10/23, Carney, 471K) “Floor Action” blog reported that Sens. Mike Enzi, Mike Crapo, Kelly Ayotte, and Steve Daines “introduced legislation that would allow lawmakers to pass concurrent resolutions to explain the meaning of a law and what authority it gives to federal agencies” in order to “help curb incorrect interpretations by the Obama administration.”

NATIONAL PARKS ARE MOST INSTAGRAMMED SPOTS IN SEVEN STATES, DC. The [Los Angeles Times](#) (10/22, 4.07M) reports that “going state by state, the website Busbud last month looked at the most Instagrammed places in America.” The article notes that “in seven states plus the District of Columbia, national parks were the top picks for those posting Instagram photographs.” The article highlights Interior’s Instagram account, “where photos of America’s public lands are posted every day.”

ADDITIONAL COVERAGE: AGREEMENT FOR MANHATTAN PROJECT PARK TO BE SIGNED ON NOVEMBER 10. Additional coverage that “the U.S. Department of the Interior and U.S. Department of Energy will sign an agreement on Tuesday, November 10, that establishes the Manhattan Project National Historical

Park” was provided by the [Oak Ridge \(IN\) Today](#) (10/25). Also, the [Oak Ridge \(IN\) Today](#) (10/25) reports that “Oak Ridge will have two community events on November 12 to celebrate the establishment of the Manhattan Project National Historical Park.”

Empowering Native American Communities:

FEDERAL JUDGE RULES NATIVE HAWAIIAN ELECTION MAY PROCEED. [KITV-TV Honolulu](#) (10/25, 44K) reports that “in an extensive oral ruling that lasted more than 40 minutes, federal Judge Michael Seabright said a scheduled election by the group Na’i Aupuni can move forward on Nov. 1.” According to the article, “although the Office of Hawaiian Affairs provided the group a \$2.6 million grant to conduct the election as well as the ensuing ‘Aha, or constitutional convention, Seabright said the registration of more than 95,000 native Hawaiians by Na’i Aupuni is a private matter not governed by state election laws.” Seabright said, “I believe the evidence demonstrates that the Na’i Aupuni election is a private election and not a state election. No public official will be elected or nominated, (and) no matters of federal, state or local law will be determined through this election process by itself.”

Office of Insular Affairs:

PALAU MOVES TOWARD CREATION OF NEW OCEAN RESERVE. The [National Geographic](#) (10/25, 31.65M) reports that the nation of Palau has “approved the creation of an enormous marine reserve that’s bigger than the U.S. state of California.” On Thursday, “Palau’s Congress signed off on keeping 80 percent of its territorial waters from any extractive activities, including fishing and mining.” The other “20 percent will remain open to fishing by locals and a limited number of small commercial operations.”

DHS CRITICIZED FOR ACCOMMODATING MARIANAS EMPLOYERS. For the blog at the [Center For Immigration Studies](#) (10/26), David North writes that “the Department of Homeland Security under the Obama administration is going out of its way to be super nice to employers in the Commonwealth of the Northern Mariana Islands (Saipan).” The agency has “announced in the Federal Register that it has reduced the ceiling on the number of temporary alien workers in these islands by 1,000, down to 12,999.” North criticizes the move, arguing that “the CNMI, where the unemployment rate is three times as high as it is on the mainland, does not need anything like 12,999 foreign workers, if it needs any at all.”

Tackling America’s Water Challenges:

CALIFORNIA’S GOP DELEGATION DEMANDS PLAN TO STORE EL NIÑO WATER. The [E&E Daily](#) (10/23, Subscription Publication) reports that House Republicans from California last week “urged Gov. Jerry Brown (D) and President Obama to direct actions that will help save water if El Niño-driven storms bring heavy rains this winter.” The National Oceanic and Atmospheric Administration’s Climate Prediction Center has “estimated that the current El Niño climate pattern will rank among the top three most severe the country has ever experienced.” The letter asked “whether the U.S. Bureau of Reclamation, Fish and Wildlife Service, and the National Marine Fisheries Service ‘have plans in place to capture El Niño-related precipitation for human use?’”

BOR REACHES SETTLEMENT ON DEAD STEELHEAD LAWSUIT. The [Santa Barbara \(CA\) Independent](#) (10/24, 119K) reports that when the BOR “accidentally killed an alleged 393 juvenile trout two years ago along a short stretch of creek right below Lake Cachuma, the Bureau got off by agreeing to do what it had already been mandated to do 15 years before: keep enough water in the creek to prevent the fish from croaking.” The BOR “agreed to install two functioning electrically powered pumps to keep the creek — Hilton Creek — flowing with two cubic feet of dam water a second and two diesel powered emergency back-up pumps in case the two main pumps failed.” Also, the BOR “agreed to install the electronics necessary to automatically activate the back-up pumps whenever the main pumps fail, which they reportedly did at least nine times in 2013.” The agreement was “announced this past week in response to a lawsuit filed by Cal Trout, a steelhead advocacy group represented by the Environmental Defense Center (EDC), and joined a handful of water agencies who depend on Lake Cachuma — aka Bradbury Dam — for their supplies.”

Securing America’s Energy Future:

Renewable Energy:

CONCERNS SURROUND DESERT RENEWABLE ENERGY CONSERVATION PLAN. The [Palm Springs \(CA\) Desert Sun](#) (10/23, 99K) reports that “state and federal officials are expected to release part one of the Desert Renewable Energy Conservation Plan in November, designating energy development zones and conservation zones across 17 million acres of California desert.” The article notes that “it’s not yet clear how the plan will differ from a draft released last year, but conservationists and renewable energy groups already have major concerns about how effective it will be — even after nearly seven years of work, tens of millions of dollars in consultants’ fees and more than 12,000 public comments.” Some of the concerns are “the possibility that huge swaths of land won’t get designations of any kind, for conservation or for clean energy,” and “continued confusion over the legal process for permitting energy projects,” and “most of all, uncertainty over several million acres of private land, whose collective fate won’t be decided until some unknown point in the future.”

Editorial: State Must Ensure Protection Of Land For Renewable Energy Facilities. The [Sacramento \(CA\) Bee](#) (10/25, 535K) editorialized that the Desert Renewable Energy Act, which has received more attention in California than elsewhere in the country, critically “balances the environmental impact of dramatically expanded solar, wind and geothermal power infrastructure with the ramped-up demand for clean energy.” However, the Bee cautions that as infrastructure grows it will “consume” and “disrupt” thousands of acres of habitat for a variety of California species. The Bee urges the state to identify what land will and will not work for new facilities and calls on the BLM to ensure such land is protected.

The piece also appears at the [Fresno \(CA\) Bee](#) (10/25, 265K).

BOEM DIRECTOR HOPPER TO ADDRESS ALLIANCE FOR CLEAN ENERGY NEW YORK ON OFFSHORE WIND OPPORTUNITIES. The [Albany \(NY\) Times Union](#) (10/25, 530K) reports that BOEM Director Abigail Ross Hopper will speak about “offshore wind opportunities in New York” when the Alliance for Clean Energy New York meets Thursday.

FEDERAL PERMITTING SYSTEM FOR WIND PROJECTS TO PROTECT BIRDS URGED. In an op-ed for the [Philadelphia Inquirer](#) (10/26, 641K), Michael Parr, vice president and chief conservation officer of American Bird Conservancy, writes that “a major problem with ‘green’ wind power is the flawed voluntary system by which wind companies are permitted to assess bird impacts and develop bird protection plans.” According to Parr, “under regulations promulgated by the U.S. Fish and Wildlife Service, compliance with siting and operational considerations that take bird mortality into account are wholly voluntary.” As a solution, Parr suggests establishing and funding “a federal permitting system for wind projects that requires siting and operational input from federal wildlife biologists, both during the assessment process, and in response to any recorded bird mortality.”

Onshore Energy Development:

BLM APPROVES PERMIT FOR GREATER MOOSE’S TOOTH PROJECT. The [Greenwire](#) (10/23, Subscription Publication) reports that the BLM has “formally issued a permit that will allow ConocoPhillips Co. to drill the first oil production well in the National Petroleum Reserve in Alaska (NPR-A).” The bureau “already approved in February a record of decision for the \$890 million Greater Mooses Tooth-1 (GMT1) project, which calls for up to 33 development and injection wells on a single, nearly 12-acre drilling pad on the reserve’s northeast corner (Greenwire, Feb. 16).” However, the BLM “needed to issue a formal drilling permit, along with a right-of-way (ROW) grant before production could begin at the reserve, said agency spokesman Mitch Snow.”

[Politico Pro](#) (10/23) reports, “Senate Energy and Natural Resources Chairwoman Lisa Murkowski also hailed the permit approval in a statement ... But also warned that the process took too long.”

Additional coverage was provided by [The Hill](#) (10/23, Cama, 471K) and [E&P Magazine](#) (10/23).

BLM CONSIDERING AUCTIONING DEFERRED LEASES IN SAGE GROUSE HABITAT. The [Greenwire](#) (10/23, Subscription Publication) reports that “for several years, the Bureau of Land Management imposed a de facto moratorium on oil and gas leasing in prime sage grouse habitat, deferring the sale of more than 5 million acres industry had nominated to drill in seven Western states.” According to the article, “the idea was to wait until BLM had regulations in place that could allow drilling to proceed without destroying the bird’s sage-steppe habitat.” But “now that sage grouse have been deemed safe from extinction, BLM is considering which

of those lands to put on the auction block.”

FORMER FOREST SERVICE LEADERS BLAST BADGER-TWO MEDICINE LEASES. The [Greenwire](#) (10/23, Subscription Publication) reports that “the Interior Department should cancel all the natural gas drilling leases in the Badger-Two Medicine area of Montana’s Lewis and Clark National Forest, according to 19 retired Forest Service leaders, including former agency Chief Dale Bosworth.” The letter “calls on Interior to heed the advice of the federal historical preservation council, which determined exploratory wells on land east of Glacier National Park considered sacred by the Blackfeet Tribe would lead to the ‘serious and irreparable degradation’ of the Badger-Two Medicine area.”

NPS PROPOSES NEW OIL, GAS REGULATIONS. [The Hill](#) (10/24, Devaney, 471K) reports that the NPS is “proposing new oil and gas regulations to protect national parks.” The new regulations will “protect park resources, values, and visitors” from oil and gas operations that occur on national parks, the agency said.

SENATE COMMITTEE TO HOLD HEARING ON STREAM PROTECTION RULE. [Bloomberg BNA](#) (10/25, 3K) reports that on Tuesday, the Senate Energy and Natural Resources Committee will hold “a hearing on the Interior Department’s stream protection rule.” The article notes that “witnesses are: Assistant Interior Secretary Janice Schneider; West Virginia Environmental Protection Cabinet Secretary Randy Huffman; Wyoming Environmental Quality Director Todd Parfitt; and National Mining Association President Hal Quinn.”

Additional coverage was provided by the [National Journal](#) (10/26, Subscription Publication, 144K).

HOUSE APPROVES BILL TO EXPEDITE PERMITS FOR STRATEGIC MINING. The [E&E Daily](#) (10/23, Subscription Publication) reports that the House passed legislation last week “to significantly streamline the processing of mining permits on federal lands, a top industry priority.” Legislators “voted 254-177 for Nevada Republican Rep. Mark Amodei’s H.R. 1937, which would set permitting timelines, give states more power in approving projects and limit litigation.” The measure, “versions of which have passed in previous Congresses, stems from U.S. reliance on imports for key minerals, including rare earth elements.”

TRAPPER MINE SEEKS TO RALLY SUPPORT. The [Grand Junction \(CO\) Daily Sentinel](#) (10/25, 73K) reports that “representatives of the Trapper Mine are taking nothing for granted as a new federal environmental review of its expansion area begins following a court ruling earlier this year.” According to the article, “mine officials aren’t even sure the Office of Surface Mining Reclamation and Enforcement can get the job done on time, and that’s got them worried.” Trapper also isn’t “assuming that just because a similar review based on the same ruling resulted in the Colowyo Coal Mine between Craig and Meeker being able to continue mining, Trapper will enjoy the same outcome” and “that’s why the mine is launching a ‘Stand With Trapper’ campaign aimed at rallying support for the mine as the review gets underway.”

The [Grand Junction \(CO\) Daily Sentinel](#) (10/26, 73K) reports that “Colorado coal production in 2015 continues to fall after dropping to a 20-year low last year, state data shows.” The article notes that “Trapper has been able to keep mining” while the “review begins.”

EARTHQUAKES NEAR CUSHING, OKLAHOMA SAID TO BE NATIONAL SECURITY THREAT. [Bloomberg News](#) (10/24, Philips, 2.66M) reported that the oil stockpile in Cushing, Oklahoma, which is second in size only to the federal government’s Strategic Petroleum Reserve, now “faces an emerging threat: earthquakes.” The rise of earthquakes in Oklahoma “has corresponded to increased fracking activity and oil production in the state,” and “seismologists believe the quakes are the result of wastewater injection wells used by the fracking industry.” As the earthquakes “appear to have migrated closer to Cushing, the issue of what to do about them has morphed from a state issue to one of national security,” as Cushing and its stored oil are not only “crucial to the financial side of the oil market” but “integral to the way physical crude flows around the country.”

FRACKING, REGULATIONS DRIVING SURGE IN NATURAL GAS USE. Under the headline “Fracking Topples Old King Coal,” the [Washington Examiner](#) (10/26, 213K) explores how domestically-produced natural gas is “replacing coal as the dominant way Americans receive electricity.” Record-low prices have particularly helped to drive the trend; indeed, Black & Veatch managing director Peter Abt “said ‘with respect to growth, we are in a period of sustained low prices,’ with enough gas reserves to last a century.” Also responsible are the EPA’s recent establishment of its Clean Power Plan, and “anticipation” by companies and states “of a climate deal in Paris in December requiring emissions to be lower.” The Examiner goes on to note that the share of electricity obtained from natural gas “exceeded that of coal for the second time in history this year, according to the Energy Information Administration, the Department of Energy’s analysis arm.”

OIL BOOM LEADS TO INCREASE IN WORKER DEATHS. In an in-depth piece, the [San Antonio Express-News](#) (10/26, Hiller, 884K) reported that on the increase in worker deaths as a result of the oil boom, particularly in Texas. According to the Express-News, “open-records requests, thousands of pages of federal safety investigations, lawsuits and police reports document the human price of the state’s most recent oil boom, when soaring crude prices set off a multiyear drilling frenzy.” Texas “had half of the country’s oil field deaths last year — 71 of the 142 workers who died in the hunt for hydrocarbons, new data from the U.S. Bureau of Labor Statistics and the Texas Department of Insurance indicate.”

Offshore Energy Development:

DEBATE CONTINUES OVER OFFSHORE DRILLING IN ATLANTIC. The [Charleston \(SC\) Post and Courier](#) (10/25, 365K) reports that the debate continues over offshore drilling in the Atlantic. South Carolina Gov. Nikki Haley “continues to push for it, even as coastal residents rally against it and nearly every local government has come out against it.” Opponents “point to high-profile oil-production messes such as the Deepwater Horizon spill in the Gulf of Mexico in 2010, and say the fragile South Carolina coast and its multimillion-dollar tourism and fishing economy could be crippled by a similar mishap.” But “supporters point to the day-by-day operations taking place in other states without major incidents and say the potential for jobs and revenue outweighs any real risks.”

US, CUBA GATHER FOR SYMPOSIUM ON OFFSHORE OIL DEVELOPMENT. [USA Today](#) (10/25, Loveless, 5.23M) reported that more than 120 people from the U.S., Cuba and other countries gathered last week for the Safe Seas Clean Seas Symposium on offshore oil development. The conference “was organized by the Houston consulting firm Hunt Petty LLC to promote cooperation in preventing and responding to spills in Cuban waters as Havana plans to resume drilling next year, following unsuccessful exploration in recent years.”

ANALYSIS: ENERGY EFFICIENCY, ENVIRONMENTAL SAFETY CAN “GO HAND-IN-HAND.” The [Richmond \(VA\) Times-Dispatch](#) (10/25, Holt, 326K) argued that in order for Americans to continue seeing low energy prices, it is imperative that we “develop and sustain a responsible yet effective long-term, all-of-the-above energy policy that utilizes each and every resource available to us — fossil fuels, nuclear, solar, winds and biofuels — regardless of where they come from, onshore and off.” Citing the Director of the U.S. Bureau of Ocean Energy Management Abigail Ross Hopper, the Times-Dispatch contends that energy efficiency and concern for the environment are not necessarily opposed. Ross Hopper said, “It is not one or the other ... We are trying to address these issues from all fronts.”

BP EARNINGS MAY DISCLOSE EFFECT OF OIL SPILL SETTLEMENT. The [Houston Chronicle](#) (10/23, Eaton, 2.28M) reports that when BP announces its third quarter earnings on Tuesday, executives may hint at how the company’s \$2.8 billion settlement with the Department of Justice will shape the company’s corporate future. The Chronicle adds that “from 2003 to 2008, BP’s organic reserve replacement ratio...was well ahead of Exxon Mobil, Chevron, Shell, Total, Statoil and Eni. In the years after the spill, it outpaced only Shell.” However, “BP’s shareholder returns, down 18 percent from the beginning of the year to Sept. 21, haven’t fallen as far as returns for Chevron, ConocoPhillips, Exxon Mobil, or Shell, in part because of the cost cutting, according to JPMorgan.”

OIL INDUSTRY COMPANY WORKS ON OIL-EATING BACTERIA TO CLEAN OIL SPILLS. The [AP](#) (10/26) reports that oil industry company Compliant Resources “is trying to establish a biological process in which oil-eating bacteria are used to clean up a spill with the help of a Williston-based research center.” Compliant Resources CEO Rick Reese “calls his method aggressive bioremediation instead of land farming, a similar concept, mainly because it’s seen limited success.”

COMMENTARY DISCUSSES INTERIOR’S DECISION TO CANCEL ARCTIC LEASE SALES. In commentary for [The Hill](#) (10/23, Hein, Contributor, Livermore, 471K), Jayni Hein, policy director at the Institute for Policy Integrity at New York University School of Law, and Michael A. Livermore, associate professor of law at the University of Virginia School of Law, discussed the US Department of the Interior’s recent decision to cancel two upcoming Arctic lease sales slated for 2016 and 2017. The authors wrote that the decision “signals a clear shift in Arctic offshore leasing policy and marks a victory for environmentalists who have long highlighted the risks inherent in leasing in this remote and unpredictable region.” However, it also “makes good economic sense: It reflects the value of delay in light of the significant economic, environmental and social uncertainties associated with offshore drilling in the Arctic.” The authors added that “Shell’s own decision to

abandon drilling reflects an understanding of the value of waiting for more information about oil prices, operational costs and risks.”

Additional coverage of Arctic drilling was provided by the [Arctic \(AK\) Sounder](#) (10/23, 6K), the [Bristol Bay \(AK\) Times](#) (10/23, 4K), and the [Chicago \(IL\) Daily Herald](#) (10/25, 397K).

America’s Great Outdoors:

Bureau of Land Management:

REPORT: BLM SOLD NEARLY 1,800 WILD HORSES FOR SLAUGHTER. The [Washington Times](#) (10/25, Howell, 344K) cites a new report the by the Interior Department’s Office of Inspector General that found the Bureau of Land Management’s (BLM) Wild Horse and Burro Program (WH&B) “wrongfully” sold 1,794 wild horses to Colorado rancher Tom Davis, “who sent them to slaughter.” The Times adds BLM officials have subsequently “said they are taking the matter very seriously and have taken preventative measures to ensure horses sold by the agency do not end up at slaughterhouses in the future.”

Additional coverage was provided by the [Greenwire](#) (10/23, Subscription Publication), the [Washington \(DC\) Times](#) (10/25, Howell, 344K), the [Canon City \(CO\) Daily Record](#) (10/25, 22K), the [Denver \(CO\) Post](#) (10/25, Ingold, 787K), the [Albuquerque \(NM\) Journal](#) (10/25, 259K), the [Houston \(TX\) Chronicle](#) (10/25, 2.28M), the [Salina \(KS\) Post](#) (10/25), [USA Today](#) (10/24, Hughes, 5.23M), [Bay Area \(CA\) Indymedia](#) (10/24, 2K), the [Inquisitr](#) (10/25, 527K), and [Newsweek](#) (10/25, 198K).

EVENT CELEBRATES PREHISTORIC TRACKWAYS MONUMENT. The [Las Cruces \(NM\) Sun-News](#) (10/24, 47K) reports that “about 75 outdoor enthusiasts gathered Saturday morning to celebrate a bundle of milestones for the nearly 7-year-old Prehistoric Trackways National Monument, located northwest of Las Cruces.” For one, “a new entrance sign — the monument’s first — was installed and unveiled at the site.” Also, “a plaque was unveiled to commemorate a donor who gave a land easement that clears legalities for a road that accesses the monument.” The BLM also is “set to soon sign off upon a finalized management plan for the monument.” In addition to unveiling the new sign and plaque, the BLM said “Saturday’s events also were to mark the 15th anniversary of its National Landscape Conservation System, the BLM unit which manages sites like the national monument.”

BLM PLANS TO CAPTURE WILD HORSES IN SOUTHWESTERN IDAHO. The [AP](#) (10/23, 344K) reports that “federal officials hope to capture an estimated 31 wild horses in southwestern Idaho that eluded an emergency helicopter gather following a giant wildfire.” BLM officials say “the horses need to be captured because there’s not enough forage to sustain them.” Officials also “say the horses need to be temporarily removed to help rehabilitation efforts in the 436-square-mile area that burned in August.”

AUSTRALIAN BIOLOGIST VISITS HAVASU TO LEARN FROM BLM. The [Havasu \(AZ\) News-Herald](#) (10/25, 27K) reports that Australian biologist Andrew Norris arrived in Lake Havasu City on Wednesday “to learn all he can from the Bureau of Land Management’s fish and wildlife conservation programs, at the behest of Queensland, Australia’s Department of Agriculture and Fisheries.” Norris “toured fisheries in North Carolina, Missouri, Nebraska, Oklahoma and Arizona this month in an attempt to learn from U.S. agencies and installations.” According to the article, “his research may be used to institute conservation programs within Queensland, which comprises the Island-continent’s northeastern region.”

CYCLING GROUP BLAZING TRAILS IN ACTON RECREATION AREA. The [Billings \(MT\) Gazette](#) (10/25, 179K) reports that a partnership has formed between the BLM and cyclists, and Pedal United, a local group of cyclists are “blazing new trails” in the Acton Recreation Area. According to the article, “they hope to bring more mountain bikers to the area with the larger goal of multi-use development in mind.”

BLM TRUCK LEFT ON ITS SIDE AFTER CAR CRASH IN LAS VEGAS. The [AP](#) (10/25, 344K) reports that a BLM “pickup truck was left straddling a wall on a Las Vegas overpass after a three-car crash.” According to the article, “the accident happened on West Sahara Avenue above Interstate 215 on Saturday around 11:15 a.m.” The two BLM employees in the truck were “taken to the hospital with minor injuries.” No other injuries were reported.

FIVE CHARGED WITH CONSPIRING TO STEAL BLM EQUIPMENT. The [Eugene \(OR\) Register-Guard](#)

(10/25, 172K) reports that “a prolific thief from Springfield who was last released from prison in early 2014 is back behind bars, facing a variety of federal charges that accuse him of illegal gun possession and the theft of equipment from a Bureau of Land Management maintenance yard near Marcola.” According to the article, “federal indictments unsealed this past week charge Larry Alan Larsen, 45, and four others with conspiring to steal a tractor and a flatbed trailer from the BLM facility on Shotgun Creek Road during the early morning hours of April 13.”

Fish and Wildlife Service:

FWS RECOMMENDS PHASE-OUT OF WHOOPING CRANE ULTRALIGHT FLIGHTS. The [AP](#) (10/25, 1.19M) reports that the FWS is “recommending an end to the use of ultralight aircraft to lead endangered whooping cranes from Wisconsin on their first fall migrations to Florida, and the phase-out could happen as early as next fall.” The FWS said “in a report this month that the birds in Wisconsin and other eastern states could go extinct within 75 years without better management.” So the agency “wants to end or scale back on strategies that rely heavily on captivity and other artificial means, saying they don’t appear to yield better results than other methods.”

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (10/25, 2.28M), the [Washington \(DC\) Times](#) (10/25, 344K), the [Milwaukee \(WI\) Journal Sentinel](#) (10/23, Bergquist, 564K), and [WMTV-TV Madison \(WI\)](#) Madison, WI (10/25, 43K).

RELEASE OF MEXICAN WOLVES CLEARED. The [Christian Science Monitor](#) (10/23, 455K) reports that “after decades of depleted numbers, many wolf species are making a slow comeback despite some opposition to their reintroduction.” The article notes that “the controversial topic represents a shift in the perception that wolves represent a danger to mankind.” However, “even with the backing of the federal government, reintroducing wolves doesn’t always have an easy solution.” A permit request by the FWS “to reintroduce the Mexican gray wolf into parts New Mexico this year was denied by the state-controlled New Mexico Department of Fish and Game.” The FWS announced in “mid-October it would use its federal authority to subvert opposition and push to install the wolf recovery program.”

The [El Defensor Chieftain \(NM\)](#) (10/25, 10K) reports that the Interior Department has “granted permission for the release of Mexican wolves into the state despite objections by the New Mexico Department of Game and Fish and the Socorro County Board of Commissioners.” Last week the director of the FWS “notified the director of New Mexico Department of Game and Fish that the Mexican Wolf Recovery Program is being exempted from the DOI Fish and Wildlife policy to comply with New Mexico’s permitting requirements.” FWS Public Affairs Specialist Jeff Humphrey said, “The Mexican wolf is still at risk of extinction. It is the U.S. Fish and Wildlife Service’s obligation under the law to recover this species, and reintroductions into the wild from the more genetically diverse captive population are an essential part of that recovery process. Our preference is always to work collaboratively with states and we ask New Mexico to reengage with us in these efforts. We look forward to continuing our productive species recovery work with New Mexico Department of Game and Fish on a host of other threatened and endangered species in the state.”

REPORT RECOMMENDS NEW CATEGORY UNDER ENDANGERED SPECIES ACT. [Think Progress](#) (10/25, 453K) reports that “a new report from the Center for American Progress recommends that the federal government create a new category under the Endangered Species Act — ‘at risk.’” According to the article, “an at risk species would be a lower category than the ESA’s threatened or endangered listing, and wouldn’t afford a species any legal protections.” However, “it would encourage voluntary efforts to conserve the at-risk species’ habitat, and would prioritize federal funding for incentives for this voluntary conservation.”

PROJECT SEEKS TO PROTECT SHORELINE OF GLENN MARTIN NATIONAL WILDLIFE REFUGE. The [Baltimore Sun](#) (10/24, 834K) reports that “rocks, boulders and sand are being spread along nearly four miles of eroding shoreline to protect the Glenn Martin National Wildlife Refuge on the north end of Smith Island.” The article notes that “the \$8.5 million project” will also “help shield a portion of Ewell, the largest of three small villages here, from wind-driven waves.”

FLORIDA’S FIRST BEAR HUNT IN 21 YEARS BEGINS. The [Greenwire](#) (10/23, Subscription Publication) reports that “with Florida’s first bear hunt in 21 years set to start Saturday, the number of bear hunting licenses the state has sold has now passed the 3,000 mark.” The article notes that “despite the ongoing controversy over the state wildlife commission’s decision to allow the hunting of bears for the first time since 1994, one thing is clear: The license sales have been a huge financial boon for the agency.” According to the article, “so

far, the Florida Fish and Wildlife Conservation Commission has raked in more than \$300,000 for the licenses.”

Additional coverage was provided by the [Fort Myers \(FL\) News-Press](#) (10/23, 171K) and [Reuters](#) (10/24, Stein, Liston).

GROUP THREATENS ANOTHER LAWSUIT OVER MOAPA DACE. The [Las Vegas Review-Journal](#) (10/25, 378K) reports that “for the second time in six years, an environmental group is threatening to sue federal regulators over an endangered fish it says could be wiped out by proposed groundwater development in Clark and Lincoln counties.” The Center for Biological Diversity on Friday “filed a 60-day notice of intent to sue the U.S. Fish & Wildlife Service and Bureau of Land Management over the Moapa dace.” Rob Mrowka, a senior scientist with the Center for Biological Diversity, said “large-scale pumping by the authority and others, including developers hoping to build a master-planned community at Coyote Springs, ‘will spell disaster for one of the rarest native fishes in Nevada.’”

PLAN SEEKS TO INTRODUCE SANTA ANA SUCKER FISH INTO NEW STREAMS. The [San Bernardino \(CA\) Sun](#) (10/24, 142K) reports that the Santa Ana sucker fish will be “introduced into three mountain streams in the San Bernardino Mountains, under a recently proposed plan by the San Bernardino Valley Municipal Water District.” According to the article, “the district’s board of directors recently approved spending \$140,000 to hire Dudek, a San Diego-based environmental and engineering firm, to develop a ‘translocation plan’ that would initially involve breeding about 1,500 sucker fish at a fish farm and placing them in the streams where they could flourish and multiply.”

MICHIGAN SENATORS SAY JUVENILE FISH STUDY HIGHLIGHTS ASIAN CARP THREAT. The [AP](#) (10/23, 344K) reports that “Michigan’s U.S. senators say a recent discovery about small fish and electric barriers shows the need for quick action to prevent Asian carp from reaching the Great Lakes.” The FWS “reported last week that some juvenile fish could be caught in underwater spaces beneath commercial barges and pulled across electric barriers near Chicago meant to keep the invasive carp away from Lake Michigan.” In a letter Thursday to the Office of Management and Budget, Sens. Debbie Stabenow and Gary Peters “request funding of interim measures while the Army Corps of Engineers studies whether defenses could be upgraded at a nearby lock and dam complex.”

THOUSANDS OF EXOTIC ANIMALS ARE SHIPPED THROUGH SEATTLE EACH YEAR. The [Seattle Times](#) (10/25, 962K) reports that “Americans routinely hunt animals in far-off lands, especially Africa, and ship their kills home.” The article notes that “Seattle, as one of 18 ports where wildlife is typically imported, plays a quiet but substantial role in bringing those trophies back.” According to the article, “since 1999, more than 39,000 African trophy animals have been legally shipped through Seattle.”

GRIZZLY BEAR EUTHANIZED AFTER REPEATED ENCOUNTERS IN WYOMING. The [AP](#) (10/25, 2.28M) reports that “Wyoming wildlife officials have euthanized a 2-year-old grizzly bear that repeatedly roamed into populated areas.” The FWS “had to weigh in on the problem because Yellowstone-area grizzlies are listed as a threatened species.” Game and Fish educational specialist Tara Hodges, “the state and federal officials a decided the bear should be euthanized because it had become used to humans and was spending time in developed areas.”

WYOMING COMMISSION URGES DELISTING OF GRIZZLY BEAR. The [AP](#) (10/25, 15K) reports that “the Park County Commission in northern Wyoming has passed a resolution urging the federal government to remove Endangered Species Act protections for the grizzly bear as soon as possible.” The resolution approved unanimously last week urged the FWS “to ‘move forward with all due haste’ in removing Greater Yellowstone Area grizzlies from the list of ‘threatened’ species.”

Additional coverage was provided by the [Great Falls \(MT\) Tribune](#) (10/25, 75K), the [Houston \(TX\) Chronicle](#) (10/26, 2.28M), and the [Washington \(DC\) Times](#) (10/26, 344K).

MAN FACES PRISON AGAIN FOR STEALING SEA TURTLE EGGS. The [AP](#) (10/25, 2.28M) reports that Lewis Jackson was “arrested July 7 in coastal Georgia with 84 sea turtle eggs swiped from a turtle nest on” Sapelo Island’s “unspoiled beach.” This “wasn’t his first offense.” Jackson had “served six months in federal prison after pleading guilty to stealing 156 loggerhead eggs in May 2012.” Now he “could return to prison for up to five years.”

Additional coverage was provided by the [Boston \(MA\) Globe](#) (10/25, Bynum, 1.1M), the [Daily Mail \(UK\)](#) (10/25,

5.59M), the [Los Angeles \(CA\) Times](#) (10/24, Press, 4.07M), the [Washington \(DC\) Post](#) (10/25, Russ Bynum |, Ap, 6.76M), and the [Washington \(DC\) Times](#) (10/25, Bynum, 344K).

ADDITIONAL COVERAGE: NATIONAL WILDLIFE PROPERTY REPOSITORY EXPOSES COST OF ILLEGAL WILDLIFE TRADE. Additional coverage of the National Wildlife Property Repository was provided by the [Atlanta \(GA\) Journal-Constitution](#) (10/25, 1.05M), the [Yakima \(WA\) Herald-Republic](#) (10/25, 92K), the [Chicago \(IL\) Tribune](#) (10/23, 2.46M), the [Summit \(CO\) Daily News](#) (10/25, 35K), and [MLive \(MI\)](#) (10/25, 739K).

National Park Service:

NPS BANS SEVERAL CONTROVERSIAL HUNTING PRACTICES ON PRESERVES IN ALASKA. The [Alaska Dispatch News](#) (10/23, 219K) reports that “driving a deeper wedge between state and federal game managers, the National Park Service on Friday banned a handful of controversial hunting practices on the 20 million acres of Alaska’s national preserves where sport hunting is allowed.” The new regulations, “published Friday, override Alaska regulations, and officials contend they subjugate the state’s role, established under the Alaska National Interest Lands Act, as the managing authority of fish and wildlife on all Alaska lands.” However, the NPS “countered that the new rules only cement temporary regulations that have been imposed annually for several years.”

Additional coverage was provided by the [National Parks Traveler](#) (10/25, 989) and [KTUU-TV Anchorage \(AK\)](#) Anchorage, AK (10/25, 128K).

LEWIS AND CLARK NATIONAL HISTORIC TRAIL TO FOCUS ON VOLUNTEERISM TO MARK CENTENNIAL. The [Daily Nonpareil \(IA\)](#) (10/25) reports that “along with free park passes for fourth graders, the Lewis and Clark National Historic Trail will mark the 100th anniversary of the National Park Service with a focus on volunteerism.” The article note that “Chalotte Murtishaw will serve as one of 70 Centennial Volunteer Ambassador interns across the country working to connect communities to parks through volunteer group service opportunities.”

MISSOURI COUPLE VISITING ALL 59 NATIONAL PARKS AHEAD OF CENTENNIAL. The [AP](#) (10/25, 2.28M) reports on Cole and Elizabeth Donelson, “both 26,” who “plan to visit all 59 national parks before the park system celebrates its 100th anniversary next summer, finishing Aug. 18 at St. Louis’ national park, the Jefferson National Expansion Memorial, which includes the Gateway Arch.”

GATEWAY ARCH MONUMENT UNDERGOING RENOVATIONS. [Reuters](#) (10/24, Bailey) reports on the history of St. Louis’ Gateway Arch. The article notes that The Arch grounds and underground museum are now undergoing major renovations, with \$380 million in public and private funding. For the 50th anniversary, the NPS plans to celebrate with 1,000 free cupcakes and \$1 rides to the top of the Arch, the original price.

NPS TAKES OVER VALLES CALDERA. The [High Country \(CO\) News](#) (10/26, 74K) reports that “on Oct. 1, the Park Service announced it would assume management of Valles Caldera, thereby ending a failed experiment in privatizing land management.” New Superintendent Jorge Silva-Banuelos, “the trust’s former executive director, promises increased access to tourists, hunters and fishermen.” On Oct. 10, Interior Secretary Sally Jewell “dedicated Valles Caldera — one of the country’s newest national parks.”

SAGE GROUSE SURGE AT JACKSON HOLE LEKS. The [AP](#) (10/26, 344K) reports that “the sage grouse population in Jackson Hole increased nearly 50 percent at eight active breeding sites.” According to the article, “grouse counts jumped from an average of 17 males to 25 per lek.” The article notes that “a lek in Grand Teton National Park stood out in particular.” This year, “its peak of 103 males accounted for nearly half of the 211 displaying male grouse observed in the region.”

BASE JUMPING ALLOWED AT NEW RIVER GORGE BRIDGE ONCE A YEAR. [CNN](#) (10/23, Moody, Moorhead, Rosen, 5.17M) reports that “every year on the third Saturday in October, adrenaline junkies from around the world flock here to jump legally from the New River Gorge Bridge.” BASE jumping is allowed “as part of an annual festival celebrating the bridge.” According to the article, “enjoying what is a crime every other day, jumpers free fall from the bridge before parachuting into the gorge, where National Park Service rangers and safety crews provide support--instead of citations--below.” Dave Bieri, a National Park Service ranger, said, “When we do it here one day a year we can monitor it. We can make it as safe as we possibly can.”

NPS TO CLOSE UNSANCTIONED FOOTPATHS ALONG BLUE RIDGE PARKWAY. The [Roanoke \(VA\)](#)

[Times](#) (10/25, 257K) reports that “more than 40 short, unsanctioned footpaths that connect the Blue Ridge Parkway to nearby roads and neighborhoods in the Roanoke Valley would be closed under a plan that recently passed a major milestone.” The plan also “calls for construction of a 3.5-mile network of mountain bike trails at Explore Park, while keeping bikes off the Chestnut Ridge Loop Trail.” According to the article, “in the works for years, the trail management plan recently was completed with a finding by the National Park Service that it would not pose an environmental or public safety risk to a network of paths that follow the parkway’s roughly 16-mile route along the southern edge of Roanoke.”

FLOODING CLOSURES OF DEATH VALLEY’S SCOTTY’S CASTLE. The [Las Vegas Review-Journal](#) (10/25, 378K) reports that “Scotty’s Castle, a palatial ranch named for a con man that’s become one of the most popular tourist attractions here, could remain closed until spring 2016 or later after its grounds sustained extensive damage from flash floods over the weekend.” Last week, “crews were working to fix the road to Scotty’s Castle enough that employees will be able to get there Friday to start assessing damage and planning repairs.” However, “it will be much longer until the site is reopened to the public — perhaps six months or more, park spokeswoman Abby Wines said.”

GRAND TETON HOLDING ANNUAL ELK HUNT. The [AP](#) (10/25, 2.28M) reports that “all the 650 permits available for the elk hunt at Grand Teton National Park have been issued ahead of this year’s annual event.” The elk hunt, also known as an elk reduction program, was set to begin Saturday.

GREAT SMOKY MOUNTAINS NATIONAL PARK ISSUES WARNINGS ABOUT FORAGING BEARS. The [AP](#) (10/25, 2.28M) reports that “officials with the Great Smoky Mountains National Park have issued warnings and at least one closure because of increased activity by bears foraging for scarce food.”

NPS TO MARK BIRTHDAY OF TEDDY ROOSEVELT. The [Arlington \(VA\) Sun Gazette](#) (10/25, 119K) reports that the NPS will “celebrate the 157th anniversary of the birth of Theodore Roosevelt Nov. 1 with a day of activities at Roosevelt Island.”

PHOTOS SHOW AMERICA’S IMMIGRANTS AS THEY ARRIVED ON ELLIS ISLAND. The [Washington Post](#) (10/25, Swanson, 6.76M) highlights pictures “of people in their native costume passing through Ellis Island in the early 20th Century.” The pictures were “taken by Augustus Sherman, an amateur photographer who worked as the chief registry clerk on Ellis Island from 1892 until 1925.”

ADDITIONAL COVERAGE: NPS CHANGES STANCE ON CONTROVERSIAL LAKE NAME IN WASHINGTON. Additional coverage that Coon Lake will be renamed to Howard Lake was provided by [The East Oregonian](#) (10/23, 24K), the [Houston \(TX\) Chronicle](#) (10/25, 2.28M), the [Washington \(DC\) Times](#) (10/23, 344K), and the [Crosscut \(WA\)](#) (10/25).

US Geological Survey:

LOS ANGELES SCHOOL TO TEST EARTHQUAKE ALERT SYSTEM . The [Los Angeles Times](#) (10/24, Xia, 4.07M) reports that “in a major sign that California’s earthquake early warning system is moving forward, officials announced Friday that Eagle Rock High School will provide the first classrooms to test the program developed by the U.S. Geological Survey and a team of scientists.” USGS seismologist Lucy Jones said Friday, “This is really about helping us understand what works, what doesn’t. By putting it in with ordinary people — with not geeks, not Caltech — we can start seeing ... how people hear the information, how they process it, how they make decisions.”

Additional Coverage: Study Finds 99.9 Percent Chance Of Major Los Angeles Earthquake In 3 Years. Additional coverage of the study that said “there was a 99.9% chance of a magnitude 5 or larger earthquake in the greater Los Angeles area by April 2018” was provided by the [Los Angeles Times](#) (10/23, Lin, 4.07M).

USGS RELEASES REPORT ON GROUNDWATER FLOW IN YAKIMA VALLEY. The [Salem \(OR\) Capital Press](#) (10/24, 113K) reports that a new USGS “report on groundwater flow in the Yakima Valley may not be all that meaningful because it contains a lot of assumptions and vague conclusions, says an attorney for four dairies that settled a lawsuit last May over nitrate contamination.” However, “the attorney, Brendan Monahan, also says the report could help show dairies were not significant sources of contamination.” Matt Bachmann, a USGS hydrologist in Tacoma and author of the report, said “the study wasn’t designed to blame anyone but determine where nitrates are coming from and that they are coming from a large area that includes the dairies.”

Editorial Wrap-Up:

NEW YORK TIMES. “The Concealed-Carry Fantasy.” The [New York Times](#) (10/26, Subscription Publication, 11.82M) editorializes that “sensational gun violence” appears to encourage “the myth of the vigilant citizen packing a legally permitted concealed weapon,” as a solution. Instead, the Times cites a study indicating that “concealed-carry, licensed shooters killed themselves or others” rather than a dangerous criminal. The Times says that “dangerous vigilantism” is more likely than “the mythic self-defense being peddled as concealed carry.”

“F.C.C. Makes Telephone Calls For Inmates Cheaper.” The [New York Times](#) (10/26, Board, Subscription Publication, 11.82M) in an editorial says the FCC has now taken two steps toward lowering the cost of phone service for inmates in jails and prisons, saying “there is one left: to apply similar rules to newer technologies — like email, voice mail and person-to-person video.” The Times also says that the new rules do not touch the problem of corrections departments receiving commissions from communications companies.

“Shifting Advice On Mammograms.” The [New York Times](#) (10/26, Subscription Publication, 11.82M) editorializes on updated guidelines from the American Cancer Society regarding mammograms, calling it “another wrinkle for women who are trying to make informed decisions about their health care.” The Times says that with differing conclusions from the ACS, and the United States Preventive Services Task Force, insurers should still be required “to continue covering all women starting at 40” for the cost of mammograms.

“Auto Workers Point The Way To Higher Pay.” The [New York Times](#) (10/26, Board, Subscription Publication, 11.82M) in an editorial says that higher pay for employees at American automobile manufacturers means that “non-union foreign carmakers in the United States” will probably offer similar benefits. The Times says that the new UAW contract “implicitly defines \$30 an hour as a decent middle-class wage.” The Times argues that if such contracts become more common, the country could be moving towards “a future of higher pay and rising living standards.”

WASHINGTON POST. “Progress On Antibiotics.” A [Washington Post](#) (10/26, 6.76M) editorial praises what it says is “real movement away from the practice” of using antibiotics in farm animals “for growth promotion.” As examples, the Post cites a law signed by California Gov. Jerry Brown to “impose restrictions on the use of farm antibiotics starting in 2018” and “the announcement by the food chain Subway that next year it would start serving chicken and turkey raised without antibiotics.”

“Too Many Behind Bars.” The [Washington Post](#) (10/26, 6.76M) editorializes that the federal Bureau of Prisons “will release 6,000 inmates locked up for nonviolent drug crimes at the end of the month,” and “if a bipartisan group of senators gets its way, that will be just the beginning.” The group last week “pushed a criminal justice reform bill through the Judiciary Committee that backers say would reduce the federal prison population by tens of thousands.” The Post lauds the “progress,” but adds that “even if the bill passes, the number of people in prison in the United States would still be astoundingly high,” and would “remain far higher than that of most other nations.” About half of federal offenders “are incarcerated on drug crimes, but the vast majority of prisoners are in state, not federal, prisons, where the proportion of drug offenders is significantly lower,” so “even if states adopted similar reforms focusing on nonviolent drug offenders, the effect would be limited.”

“For Fairfax School Board.” A [Washington Post](#) (10/26, Board, 6.76M) editorial.

WALL STREET JOURNAL. “The Decline Of ObamaCare.” In an editorial, the [Wall Street Journal](#) (10/26, Subscription Publication, 5.95M) cites HHS estimates that ACA enrollment will grow to between 9.4 million and 11.4 million in 2016, which is a significant reduction from original estimates of 20 million, as evidence that the ACA is not performing well, and argues that if the law continues to do so, voters will be a different model in 2017.

“Preet’s Insider-Trading Retreat.” The [Wall Street Journal](#) (10/26, Subscription Publication, 5.95M) editorializes that media are underplaying a recent decision by Manhattan US Attorney Preet Bharara to dismiss insider-trading charges against seven defendants after the Second Circuit Court of Appeals ruled that the charges were unfounded. The Journal argues that Bharara owes the defendants an apology for bringing the charges, which resulted in convictions or guilty pleas that are now overturned.

“The Oncoming Train Crash.” In an editorial that is highly critical of the requirement that railroads install positive train control technology, the [Wall Street Journal](#) (10/26, Journal, Subscription Publication, 5.95M) argues the deadline for implementation should be extended, and faults Sen. Barbara Boxer for preventing the inclusion of an extension in a measure to temporarily extend the Highway Trust Fund.

SEN. MURKOWSKI SEES TOUGH ROAD FOR INTERIOR NOMINEE. [Politico Pro](#) (10/20, Subscription Publication) reports that Senate Energy and Natural Resources Committee Lisa Murkowski said that Interior Department pick Kristen Sarri would “have a lot of explaining to do at a hearing on six nominees today.” While Murkowski was “pleased that President Barack Obama had renamed Mount McKinley this summer to Denali, the Alaska Republican said she was still frustrated with the Interior Department’s ‘heartless decision’ to deny a road in King Cove.” Murkowski also “criticized Interior for closing off oil production in Alaska and last week’s cancellation of offshore sales and lease extension.”

Meanwhile, the [Daily Caller](#) (10/21, Barton, 375K) reports that Murkowski is “torn between leaving the Department of the Interior’s independent watchdog post vacant, or confirming President Barack Obama’s nominee crippled by recurring allegations of ‘playing games with Congress.’” She said, “I strongly believe that Interior needs a permanent [inspector general], and I’m disappointed the administration has let the position go unfilled for six and a half years.” Murkowski continued, “But I am also committed to ensuring that the individual

we confirm is fully independent ... The tenure that you have been involved with thus far in this position has been marked by controversy.”

Additional coverage was provided by [The Hill](#) (10/21, Henry, 471K), [KTOO-FM](#) Juneau, AK (10/20), and [Alaska Public Radio Network](#) (10/20, 2K).

HISTORIC \$186 MILLION SETTLEMENT WITH CHOCTAW, CHICKASAW NATIONS LAUDED. The [Indian Country Today Media Network](#) (10/20, 32K) reports that “tribes and the U.S. Department of the Interior heralded the outcome of a \$186 million settlement signed earlier this month between the federal government, the Choctaw and the Chickasaw nations to solve a longstanding land trust dispute as a new chapter in relations.” During the October 5 signing ceremony, Chickasaw Nation Governor Bill Anoatubby “gave a nod to the impetus provided” by Interior Secretary Sally Jewell. He said, “We respect the vital role Secretary Jewell has taken in helping make this historic settlement a reality. We are confident she will play an essential role in our efforts to continue strengthening the relationship between our governments, because we believe she has a unique appreciation for the mutual benefits of a positive government-to-government relationship.” Jewell said, “Today’s agreement is the latest addition to a record number of longstanding settlements resolved under this Administration. This historic settlement is the start of a new chapter in our trust relationships with the Chickasaw and Choctaw Nations, and underscores our commitment to fulfilling those responsibilities to Native communities across the country.”

U.S. TREASURY CONFIRMS \$20B BALANCE FOR LWCF. [E&E Publishing](#) (10/21, 705) reports that “the Land and Water Conservation Fund that expired earlier this month for the first time in its 50-year history currently contains nearly \$20 billion, according to the U.S. Treasury, which maintains the program’s balance sheets.” But “whether that is ‘real’ money available to be spent on federal land acquisitions, private land easements and state recreation projects depends on whom you ask.” The article notes that “the \$19.8 billion can only be reduced until Congress reauthorizes the program.”

Additional coverage of the LWCF was provided by the [Durango \(CO\) Herald](#) (10/20, 31K).

PROPOSED DESIGNATIONS OF THREE NATIONAL MONUMENTS IN CALIFORNIA DESERT RAISES CONCERNS ABOUT “LAND GRAB.” [Fox News](#) (10/20, 8.91M) reports that “a group of off-roaders and others are attempting to fight a proposed designation of three national monuments in the California desert under the Antiquities Act.” The Obama Administration is “considering using the federal Antiquities Act to bypass the legislative process at the request of Sen. Dianne Feinstein, whose efforts to have the Mojave Trails and Castle Mountain, both in the Mojave Desert, and a section of the Sonoran Desert named federal sites were repeatedly blocked by Republicans.” According to the article, “a White House move could put the land under federal control, which critics say could cut funding for upkeep or even restrict access.”

UNMANNED HELICOPTER OFFERS NEW WAY TO FIGHT WILDFIRES. The [Voice of America](#) (10/21, Banse, 32K) reports that the K-MAX “unmanned, water-dropping” helicopter was tested by the US government. The helicopter can fly through limited visibility. Brad Koeckertiz, the unmanned aircraft program manager with the US Department of Interior, says that unmanned helicopters such as the K-MAX will be integrated into routine measures to fight wildfires over the next few of years. The article notes that the K-MAX helicopters have already been used by the US Marines in Afghanistan, to “resupply remote outposts at night” and replace “dangerous convoys on the ground.” The article notes that the growing uses for drones is also why the FAA is seeking to register all drones.

Additional coverage was provided by [Vertical Magazine \(CAN\)](#) (10/21).

JEB BUSH PROPOSES MOVING INTERIOR DEPARTMENT FROM D.C. TO WESTERN CITY. The [Las Vegas Sun](#) (10/20, Lucas, 199K) reports that “Republican presidential candidate Jeb Bush will unveil his proposals for Western land and resource management in a campaign stop in Reno on Wednesday morning, in a speech likely to resonate with conservative voters opposed to what they see as federal overreach in the Western states.” Bush is “expected to speak at 11 a.m. Wednesday at Rancho San Rafael Regional Park before appearing at a forum sponsored by the LIBRE Initiative at the College of Southern Nevada Cheyenne Campus in North Las Vegas at 6 p.m.” In the proposal, Bush will “call for moving the headquarters of the Department of Interior from Washington, D.C., to a city in the western United States like Denver, Salt Lake City or Reno and will say that as president he would direct federal agencies to give broad latitude to states to determine land-use issues.”

STUDY: ALASKAN WILDFIRES COULD EXACERBATE GLOBAL WARMING. The [Washington Post](#) (10/21, Mooney, 6.76M) reports that some greenhouse gas sources outside the scope of forthcoming UN climate talks are beyond governments' control, such as raging peat fires in Indonesia this year, emitting "as much as Japan produces in a year from fossil fuels." Elsewhere, a new study in Nature Climate Change reaffirms concerns about the emissions of northern fires in Alaska. The Post reports that "climate researchers are still trying to figure out how all of these factors will interrelate," but fire is a "powerful determinant of how much carbon resides in land, rather than in the air, across our globe."

INTERIOR'S VINE ACCOUNT HIGHLIGHTED. [Politico](#) (10/21, 942K) highlights the Interior Department has a great Vine account. Providing a link, Politico says "this is Internet gold."

Empowering Native American Communities:

BIA RULE ANNOUNCES RULE GIVING TRIBES MORE CONTROL OVER ELECTIONS. [Law360](#) (10/20, 21K) reports that the BIA "on Monday announced its final rule for Native American tribal elections conducted by the U.S. Department of the Interior, saying the new rule will encourage tribes to take control of their elections and help protect the voting rights of tribe members living in urban areas." Assistant Secretary of Indian Affairs Kevin K. Washburn said "in a statement Monday that the rule will allow tribes to opt out of having the interior secretary conduct their elections."

The [Native American Times](#) (10/20, 337) reports that Washburn said, "Though many federal responsibilities concern the lands we hold in trust for tribes and Indian people, more than 55 million acres nationwide, the United States has a moral obligation to preserve connections between Indian people and their tribes that it once sought to destroy. For the future of Native nations and the health of Indian Country, American Indians in urban areas must work harder to maintain connections with their tribes. One important aspect of that relationship is participation in the civic and political life of their tribal governments. For that reason, our Secretarial election amendments seek to prevent tribal members living in urban areas from being inadvertently disenfranchised in Secretarial elections."

HEARING FOCUSES ON NATIVE HAWAIIAN ELECTION. The [AP](#) (10/21, Kelleher) reports from Honolulu that a federal court hearing began on Tuesday "in a lawsuit by people who want to put a stop to an election process that is underway for Native Hawaiians." The lawsuit, filed in August, "says it's unconstitutional for the state to be involved in a race-based election." The state "argues in court documents that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it's not involved in next month's vote to elect delegates for a convention to determine self-governance for Native Hawaiians." Tuesday's hearing "is focused on the plaintiffs' motion for a preliminary injunction," and the plaintiffs "want the judge to limit voter registration activities or stop the election altogether."

Additional coverage was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Navajo Times \(AZ\)](#) (10/21, 66K), and [Yahoo! News](#) (10/21, Kelleher, 5.98M).

INTERIOR SIDES WITH ALASKA NATIVE GROUP IN INVESTIGATION OF MASSACHUSETTS COLLEGE TRIBAL COLLECTION. The [AP](#) (10/21, 2.28M) reports that "a Massachusetts college was found in violation of a federal law regulating the possession and sale of potentially sacred artifacts following a complaint from an organization of Alaska Natives." The Interior Department said "an investigation substantiated the complaint against Andover Newton Theological School filed in June by the Sealaska Heritage Institute." The institute's president, Rosita Worl, said "the school possesses at least two southeast Alaska artifacts, including a Tlingit halibut hook that is considered sacred."

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/21, D'oro, 344K), the [Boston \(MA\) Herald](#) (10/21, 548K), the [Daily Mail \(UK\)](#) (10/21, 5.59M), the [Miami \(FL\) Herald](#) (10/21, 651K), [Minneapolis \(MN\) Star Tribune](#) (10/21, D'oro, 1.19M), [ABC News](#) (10/21, 3.97M), and the [Alaska Dispatch News](#) (10/20, 219K).

US ATTORNEY SAYS BIA OFFICER WAS JUSTIFIED IN DEADLY SPIRIT LAKE SHOOTING. The [AP](#) (10/21) reports that US Attorney Chris Myers "says" that an investigation by his office came to the conclusion that BIA Officer Terry Morgan was justified in shooting and killing "31-year-old Joseph Charboneau during a standoff with officers on June 16." The [Grand Forks \(ND\) Herald](#) (10/21, 100K) reports that the US Attorney's Office "said" the shooting was justified because Charboneau posed a "real and immediate" threat to officers

and another person at the scene after he refused to put down his gun, which was pointed at the officers. The Grand Forks Herald reports that, as a result of the investigation, Federal prosecutors “will not file charges against” Morgan.

Additional coverage was provided by the [Dickinson \(ND\) Press](#) (10/21, 1K), the [Forum of Fargo-Moorhead \(ND\)](#) (10/21, 14K), [KXJB-TV Fargo \(ND\)](#) Fargo, ND (10/21, 18K), [KFGO-AM Fargo \(ND\)](#) Fargo, ND (10/20, 3K), [KXMC-TV Minot \(ND\)](#) Minot, ND (10/21, 1K), and [KFYR-TV Bismarck \(ND\)](#) Bismarck, ND (10/21, 1K).

CRIME JUMPS AFTER TRIBES CUT FROM BIA FUNDING. The [Los Angeles Times](#) (10/20, Romney, 4.07M) reports on a “time of crisis for public safety on tribal lands.” According to the article, “a federal law decades ago shifted the primary burden of criminal law enforcement on tribal lands in California and five other states to local authorities,” but “many lack the resources to do the job and, in some cases, sufficient knowledge of tribal law and culture to win the trust of tribal members.” After “tribes were cut off from steady funding for their own justice systems,” crime has “flourished.”

ADDITIONAL COVERAGE: YAKAMA NATION’S PETITION TO SELF-GOVERN APPROVED. Additional coverage that the BIA on Monday granted the Yakama Nation’s petition for “retrocession” was provided by the [Bellingham \(WA\) Herald](#) (10/21, 101K), the [Clark County \(WA\) Columbian](#) (10/20, 86K), the [Washington \(DC\) Times](#) (10/21, 344K), the [Spokane \(WA\) Spokesman-Review](#) (10/20, 183K), the [Native American Times](#) (10/21, 337), the [Law360](#) (10/21, 21K), [KNDU-TV Yakima \(WA\)](#) Yakima, WA (10/21, 3K), and [KUOW-FM Seattle \(WA\)](#) Seattle (10/21, 15K).

GILLETTE’S SERVICE IN OBAMA ADMINISTRATION PRAISED. In an editorial, the [Bismarck \(ND\) Tribune](#) (10/21, 37K) lauds Jodi Gillette’s service in the Obama Administration. According to the paper, Gillette’s “positions gave her a voice in a White House that has seemed genuinely concerned about Native American issues.”

Office of Insular Affairs:

ASSISTANT SECRETARY KIA’AINA PROPOSES MARSHALLS FUND CHANGES. [Radio New Zealand](#) (10/21, 1K) reports that “a top US official has submitted a proposal to the Senate and House to allow the people of Bikini to use resettlement and relocation funds outside of the Marshall Islands.” Assistant Secretary for Insular Areas Esther Kia’aina says “it is an appropriate course of action to take regarding the welfare and livelihood of the Bikinian people.” The Bikinians were “displaced by US nuclear weapons testing 70 years ago but are now looking at relocating again because of deteriorating conditions on Kili and Ejit Islands.” According to the article, “in addition to cramped living quarters and a lack of suitable sustainable resources, the islands have been experiencing more frequent storms and king tides resulting in salt water inundation and the destruction of crops.”

[Radio New Zealand](#) (10/21, 1K) reports that “a representative from Bikini Atoll says a proposal to allow people to use resettlement and relocation funds outside of the Marshall Islands is not wanted.” Bikini liaison officer Jack Niedenthal says “the US should take full responsibility for any resettlement including providing extra financing.” Niedenthal said, “We still got a ways to go, we still have to do some more lobbying and some more talking to people in Washington to make them understand that what’s being proposed by the assistant secretary is what we view as ‘Plan B’. It’s not ultimately what we want in terms of helping our people.”

CHINA STRENGTHENS RELATIONSHIP WITH PACIFIC REGION. The [Marianas Variety](#) (10/21) reports that “China and the Pacific Islands Forum Secretariat further strengthened their relationship on Friday when the two met at a ceremony to hand over \$1.05 million to assist the Pacific region.” Forum Secretariat Secretary General Meg Taylor and Chinese Ambassador to Fiji Zhang Ping “attended the ceremony and delivered speeches respectively.” Zhang “reiterated his nation’s ongoing interest in the region saying, ‘China attaches great importance to the South Pacific region. The Chinese side stands ready to enhance mutual understanding and cooperation with Pacific Island Countries and contribute to the development and capacity building in the region.’”

COUNTRIES IN PACIFIC URGED TO BEGIN TALKS ON CLIMATE MIGRATION. [Radio New Zealand](#) (10/21, 1K) reports that “all countries in the Pacific are being urged to start discussions on how to help people forced to move from low lying atoll nations like Kiribati and Tuvalu.” According to the article, “184 million people worldwide were displaced by disaster between 2008 and 2014 and at special meetings in Geneva last

week 110 countries gave the nod to a Protection Agenda for dealing with future migration challenges.” The article notes that “the experiences of small island countries which face rising seas due to climate change helped form the global action plan under the Swiss Norwegian Nansen Initiative.”

JOURNALIST SPEAKS AT UNIVERSITY OF GUAM ON CLIMATE ISSUES, CORRUPTION IN PACIFIC ISLANDS. The [Marianas Variety](#) (10/21) reports that “author and journalist Giff Johnson spoke to students at the University of Guam on Monday evening about climate change and development in the Pacific islands.” Johnson’s “lecture, entitled ‘Idyllic No More: Pacific Island Climate, Corruption and Development Dilemmas,’ is based on his latest book — a compilation of essays detailing the looming climate threat to the region, its booming fishing industry, and the U.S. nuclear test legacy in the Marshall Islands.” Johnson called attention to “climate-driven migration from remote Pacific islands to Guam and mainland U.S.”

RISING SEA LEVELS THREATEN KIRIBATI. The [National Geographic](#) (10/21, 31.65M) provides a picture gallery of the threat of rising sea levels driven by climate change on Kiribati.

Tackling America’s Water Challenges:

WATER SCHEDULED TO BE RELEASED FROM NEW MELONES. The [Sonora \(CA\) Union Democrat](#) (10/21, 28K) reports that “more than 7 billion gallons of water is scheduled to be released from New Melones Reservoir beginning today to ensure flows in the Stanislaus River will keep temperatures cool enough for adult salmon migrating up the river to spawn this fall.” Oakdale Irrigation District and South San Joaquin Irrigation District said “it would benefit river conditions and fisheries, as well as the needs of agriculture and more than 200,000 residential customers downstream.” The article notes that “earlier this year, the irrigation districts sparred with the U.S. Bureau of Reclamation — which manages New Melones Reservoir — over spring pulse flows that they feared would leave as little as 147,000 acre-feet in the reservoir by the end of September.”

SAN JOAQUIN COUNTY BOARD OF SUPERVISORS VOTE TO OPPOSE DELTA TUNNELS PLAN. The [Lodi \(CA\) News-Sentinel](#) (10/21, 14K) reports that “at a meeting on Tuesday, the San Joaquin County Board of Supervisors voted to adopt a resolution in formal opposition of California WaterFix, also known as the twin tunnels plan.” Supervisor Kathy Miller said, “The WaterFix is just a thinly veiled version of the former (Bay Delta Conservation Plan) and continues to push the fatally flawed twin tunnels, which will simply sacrifice one region of California for the benefit of another.”

Securing America’s Energy Future:

Renewable Energy:

ENVIRONMENTALISTS, DOMINION BOTH SUPPORT OFFSHORE WIND DEVELOPMENT. On his [Bacon’s Rebellion \(VA\)](#) (10/21, Bacon) blog, James Bacon reports on an Environment Virginia-sponsored webinar held Tuesday morning in which representatives from Dominion, environmental groups, and the McAuliffe Administration all voiced support for the utility’s experimental offshore wind farm project. For environmentalists, Bacon writes, the project represents the beginning of an industry that would increase the use of green energy along the Atlantic and displace fossil fuels. For the Governor’s office, it represents increased green energy coupled with economic development that takes advantage of the Newport News area’s shipbuilding industry.

Onshore Energy Development:

CHESAPEAKE ENERGY FINED \$2.1 MILLION FOR UNDER-REPORTING NATURAL GAS. The [Greenwire](#) (10/20, Subscription Publication) reports that the Interior Department on Monday “announced a \$2.1 million civil penalty against Chesapeake Energy Corp. for misreporting the amount of gas it produced and sold from American Indian lands in Oklahoma.” Chesapeake “failed to comply with a 2011 order that found ‘systemic errors’ in the company’s monthly production reports for more than 100 Indian leases, according to Interior’s Office of Natural Resources Revenue.” The company “agreed to amend the monthly reports, but it continued to maintain inaccurate information on the agency’s data systems, ONRR said.” The firm was “assessed a penalty based on ‘knowing or willful maintenance’ of the inaccurate information, ONRR said.”

Additional coverage was provided by [Politico](#) (10/21, 942K), [Natural Gas Intelligence](#) (10/21, Subscription Publication), the [Native American Times](#) (10/21, 337), and [KOKC-AM Oklahoma City \(OK\)](#), Oklahoma City

(10/20, 1K).

TEXAS ENERGY REGULATOR OPPOSES STREAM PROTECTION RULE. [Law360](#) (10/21, 21K) reports that “Texas’ top energy regulator on Tuesday said the agency will oppose a U.S. Department of the Interior proposed rule aimed at better protecting streams and other waterways from nearby mining activity, saying the regulation encroaches on ground better left to the state.” Texas Railroad Commission Chairman David Porter on Tuesday said “the state would sign on to the multistate Interstate Mining Compact Commission’s comments opposing the proposed waterway regulation.”

USGS REPORT STATES EARTHQUAKES COINCIDE WITH OKLAHOMA OIL BOOMS. [KOCO-TV](#) Oklahoma City (10/21, 93K) reports that “a study by the United States Geological Survey states that the earthquakes from the past 100 years seem to coincide with the oil boom in Oklahoma.”

OKLAHOMA REGULATORS SHUT DOWN THREE MORE DISPOSAL WELLS. The [EnergyWire](#) (10/21, Subscription Publication) reports that “Oklahoma oil and gas regulators dealing with a dramatic increase in earthquakes near the pipeline hub of Cushing have shut down three more disposal wells.” Also, “another well was shut down by the company that owns it after regulators said they were concerned it was drilled too deep.” In addition, “the operators of seven other wells were told in a letter written Friday and released yesterday that they must reduce the volume of drilling waste that they inject deep underground.”

OKLAHOMA LIMITS DISPOSAL WELLS AMID CUSHING QUAKE. [Reuters](#) (10/21, Hampton, Brandes) reports that Oklahoma’s oil and gas regulator on Monday said it could impose new limits on all saltwater disposal wells within a 10-mile radius of Cushing. Reuters reports that Oklahoma now experiences as many as two magnitude 3.0 quakes per day, up from two per year. Thirteen wells have been ordered shut and approvals for new wells have been halted, Reuters reports. Scientists told Reuters that shutting wells could ease tectonic disruption in Oklahoma.

STUDY: FRACKING CAN CAUSE METHANE LEAKS IN NEARBY ABANDONED OIL WELLS. [Reuters](#) (10/20, Valdmanis) reported that according to a study published Tuesday in the Water Resources Research journal, fracking can cause methane leaks in nearby abandoned oil wells. The methane leaks could be a large source of unrecorded greenhouse gas emissions, according to the study. The study said that energy companies could reduce the probability of such methane leaks by trying to identify abandoned wells before they begin fracking, although the task could be difficult due to large numbers of unmarked abandoned wells.

BLM CRITICIZED FOR FAILING TO PRODUCE PICTURES UNDER FOIA REQUEST. For the [Fairfield \(MT\) Sun Times](#) (10/21), Darryl L. Flowers criticizes the BLM for failing to provide pictures in connection with “the proposed Solenex, LLC natural gas well on public lands in the Lewis and Clark National Forest” that were requested under the Freedom of Information Act. The paper received “sixteen photos” and “two photos were missing.” He notes that “curiously, the two omitted photos were the only ones that included a person in the photos.”

Offshore Energy Development:

FEDS INVESTIGATE WORKER’S DEATH ON DRILLSHIP CONTRACTED BY CHEVRON. [Fuel Fix \(TX\)](#) (10/20, Dlouhy, 7K) reports that officials from the Bureau of Safety and Environmental Enforcement and the Coast Guard are investigating “the death of a worker on a drillsip in the Gulf of Mexico that was preparing to bore a well for Chevron.” Fuel Fix says that “the Pacific Santa Ana drillsip was just beginning operations for Chevron in about 4,800 feet of water at the site and had not yet penetrated the sea floor when an employee of that drilling contractor was fatally injured.” Fuel Fix adds that Chevron has a 36 percent working interest in the Keathley Canyon well-leasing block where the incident occurred, an area where “Chevron outlined ambitions to drill up to seven wells” earlier this year.

The [AP](#) (10/21) reports that Amy Roddy, spokeswoman for Pacific Drilling SA, the ship’s owner, “said the company is not releasing any details about the man to respect his family’s privacy. She also refused to disclose how the man died or details of the accident, citing an ongoing investigation.”

[NASDAQ](#) (10/20, Sider) reports that Chevron has contracted the ship since 2012. The [New Orleans Times-Picayune](#) (10/21, Larino, 718K) adds that “operations have been shut down and personnel remain onboard, according to the drillsip’s operator.”

[Offshore Engineer](#) (10/20, Leon) reports that “the ship was to use its dual gradient drilling functions for Chevron’s Anchor-1 prospect last year in Green Canyon block 807, but the well was junked due to mechanical failures. However, in January of this year, Chevron hit high quality oil pay in multiple Lower Tertiary Wilcox Sands at a second Anchor well also drilled by the Pacific Santa Ana.”

The [Dow Jones Newswires](#) (10/21, Sider) reports that this is the first death related to offshore drilling operations in the Gulf of Mexico this year.

[Reuters](#) (10/21), [gCaptain](#) (10/21, 2K), [Upstream Online](#) (10/21, Schmidt, Brenner, 20K), and [Maritime Executive](#) (10/20, 21) also cover the story.

BRIARCLIFFE ACRES VOTES AGAINST OFFSHORE DRILLING. The [Myrtle Beach \(SC\) Online](#) (10/21, 36K) reports that “in a storm of debate over offshore drilling, Briarcliffe Acres surfaced as the latest coastal town to join a united front against seismic testing and drilling for oil and natural gas off of South Carolina’s beaches.” According to the article, “missing councilwoman Abby Stewart, who has been with family on the west coast, the town council unanimously passed a resolution Monday, joining 23 other S.C. coastal towns in a stance against offshore drilling.”

SHELL VESSEL RESCUES FRENCHMAN, CAT FROM SAILBOAT STRANDED IN SEAS NEAR ALASKA.

The [AP](#) (10/21, Thiessen) reports that a Frenchman and the cat tucked inside his clothing were rescued on Tuesday after he leapt from his sailboat to a waiting rescue ship sent by Shell. The man activated a location beacon in the high seas south of Alaska and told the Coast Guard his sailboat had lost its rudder and rigging in the high winds and 20-foot waves. The Coast Guard contacted Shell’s oil drilling rig, the Polar Pioneer, which is on its way to Port Angeles, and the rig “sent a support ship, the Tor Viking, to rescue the sailor.” The AP reports that “it wasn’t immediately clear if the man would continue with the Shell ships to Washington state.”

CUNNINGHAM: INTERIOR DEPARTMENT OFFICIAL SHUTS THE DOOR ON ARCTIC DRILLING. In an analysis of the Interior Department’s recent decision on the future of Arctic drilling, [Oil Price](#) (10/21, 2K) reporter Nick Cunningham writes the Interior Department’s decision to cancel lease sales through 2017 “leaves almost no possible pathway for an oil company to drill in the Arctic for years to come, perhaps killing off drilling for a decade or so at a minimum.” Cunningham goes on to write that “it was likely that there wouldn’t have been new drilling in any event, given Shell’s decision and current market conditions, but Interior’s decision officially shuts the door on the Arctic in the medium-term.”

Casey: Interior’s Actions On Arctic Drilling Trends “Toward A Permanent Clampdown.”

[CleanTechnica’s](#) (10/20, 15K) Tina Casey writes that “in the absence of local regulations, the Feds are the only game in town and it seems that the Arctic’s role in the US economy is too important to trust to compliance by oil companies.” Casey adds that, even though the Interior’s actions last week on Arctic drilling may be “only temporary, but the trend is toward a permanent clampdown.”

4-Traders: Federal Government To Blame For Low Arctic Drilling Interest. In an op-ed piece on the Interior’s Arctic drilling decision, [4-Traders](#) (10/21, 5K) writes the Federal government’s “difficult” regulatory obstacles is to blame for the lack of interest among oil companies to explore for oil and natural gas in the Arctic. 4-Traders writes that the “demand for oil and natural gas isn’t going away, so energy domestic exploration must continue in the Arctic and elsewhere. But as we’ve seen, by putting up unnecessary regulatory hurdles, regulators can cause job and economic growth opportunities to be missed.”

America’s Great Outdoors:

Bureau of Land Management:

BLM TO REVIEW HAGERMAN-HAILEY TRANSMISSION LINE. [Boise \(ID\) State Public Radio](#) (10/21) reports that the BLM will review the Hagerman to Hailey transmission line, paying “special attention to the greater sage grouse in the area.” Stacey Baczkowski, a biologist with Idaho Power, says “the company has been working with the BLM for the last few years to make sure the line is built with the bird in mind.” Baczkowski says “the power company plans to build the new transmission line as close to the current one as possible, and will follow BLM rules about construction during sage grouse mating times.”

UTAH WATER DISTRICT RAISES CONCERNS ABOUT BLM REVISION TO LAND-USE PLAN. The

[Deseret \(UT\) News](#) (10/21, 407K) reports that “federal policies that either aim to instill more oversight or water or deny access altogether have some Utah leaders frothing over what they say is a repeated pattern of overreach that threatens local economies and livelihoods.” Ron Thompson, general manager of the Washington County Water Conservancy District, said “possible revisions to a land-use plan by the Bureau of Land Management in Washington County have severe ramifications should one particular approach be adopted.” Thompson said “the BLM — under one option — is ignoring key considerations that went into the passage of the bill, including water supplies being left unhindered and right of way corridors left intact.”

ADDITIONAL COVERAGE: HELICOPTER CRASHES NEAR SEARCHLIGHT DURING CATTLE ROUNDUP. Additional coverage of the helicopter crash near Searchlight during a cattle roundup was provided by the [Las Vegas Review-Journal](#) (10/21, 378K).

Fish and Wildlife Service:

CONSERVATION LEADERS ATTEND NATIONAL CONSERVATION SUMMIT. [KYTV-TV](#) Springfield, MO (10/21, 135K) reports that “more than 40 leaders from the leading conservation groups in America are meeting in Springfield this week for a National Conservation Summit hosted by The Johnny Morris Foundation.” According to the article, “participants include the U.S. Fish and Wildlife Service, National Geographic, Audubon Society, and Ducks Unlimited.” The article notes that “the purpose of the historic gathering is to collectively discuss opportunities to educate and engage the public in efforts to protect wildlife and natural habitats in preparation for the grand opening of America’s Wildlife Museum and Aquarium in 2016.”

The [Springfield \(MO\) News-Leader](#) (10/20, 49K) reports that “three exhibits of America’s Wildlife Museum & Aquarium, formerly Wonders of Wildlife, were open to media for a tour on Oct. 20, 2015 at the museum located next to the Bass Pro Shops flagship store in Springfield, Mo.” More than 40 conservation leaders attending a National Conservation Summit “hope the new Bass Pro Shops wildlife museum and aquarium will convey to visitors when it opens in mid 2016.” FWS Director Dan Ashe, “one of the summit attendees,” called the museum “one of the foremost conservation attractions in the world.” He said, “Through conservation efforts, we can be successful in sustaining these populations of animals that are threatened or endangered. People hear about the industrial-scale poaching of elephants that’s happening in Africa. That’s not hunting. With this museum, here’s an opportunity to tell the story of how we can protect wildlife habitat, and that when hunting is done well, with appropriate regulations, it sustains wildlife populations.”

Additional coverage was provided by [KOLR-TV](#) Springfield, MO (10/21, 6K), [KYTV-TV](#) Springfield, MO (10/21, 135K), and [KOLR-TV](#) Springfield, MO (10/21, 6K).

CNMI QUESTIONS INCLUSION OF SOME SPECIES ON ENDANGERED LIST. The [Radio New Zealand](#) (10/21, 1K) reports that “the Northern Marianas government says the decision to list 23 species in Guam and the CNMI as threatened or endangered was rushed.” The government says “it supports the US Fish and Wildlife Service’s listing of seven of the 17 CNMI species, but it questions the inclusion of some of the other species.” The Department of Land and Natural Resources says “a number of the species do not meet the definitions of threatened or endangered and don’t require federal protection.”

FWS LOOKS TO RESTORE HABITAT ON ROOT RIVER. The [Rochester \(MN\) Post-Bulletin](#) (10/21, 28K) reports that “federal wildlife officials are seeking public input on a plan to restore and enhance habitat on 825 acres of Minnesota land along the Root River in Houston County.” Managed by the FWS “as part of the Upper Mississippi River National Wildlife and Fish Refuge, the Root River Tract sits to the east of Hwy. 26 between La Crescent and Brownsville.” The article notes that “the site includes 664 acres of hunting and farmland purchased in 2009 with money from the Land and Water Conservation Fund.”

SHOOTING OF CALIFORNIA CONDOR IN ARIZONA UNDER INVESTIGATION. [Grand Canyon \(AZ\) News](#) (10/21) reports that FWS special agents and Arizona Game and Fish Department “law enforcement personnel are investigating the lethal shooting of an endangered California condor that occurred on the Kaibab Plateau in northern Arizona Oct. 8.”

MAN CLAIMS HE BLOCKED ARIZONA BIKE TRAIL TO PROTECT OWLS. The [AP](#) (10/21, 344K) reports that “the 81-year-old man who blocked a Flagstaff-area mountain bike race says he did it to protect an endangered owl species.” J.D. Protiva “appeared in federal court Monday on misdemeanor charges related to blocking the Elden Springs Trail before the August race.” Protiva says “the path goes through protected Mexican spotted owl habitat.”

ADDITIONAL COVERAGE: MONARCHS GET HELP AS CALIFORNIANS PLANT DROUGHT-TOLERANT MILKWEED. Additional coverage that monarch butterflies could benefit from the California drought was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Albuquerque \(NM\) Journal](#) (10/21, 259K), [KABC-TV Los Angeles \(CA\)](#) Los Angeles (10/21, 413K), and [WRC-TV Washington \(DC\)](#) Washington (10/21, 345K).

FWS INVESTING IN PROJECTS TO STRENGTHEN ATLANTIC COASTAL DEFENSES AGAINST FUTURE STORMS. In an op-ed for the [New Haven \(CT\) Register](#) (10/20, 172K), Wendi Weber is Northeast regional director for the FWS, writes that “federal money for Hurricane Sandy recovery has spurred an unprecedented effort to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms.” She notes that the FWS and other Interior Department “agencies are investing \$787 million in hundreds of projects to clean up and repair damaged refuges and parks; restore coastal marshes, wetlands and shoreline; connect and open waterways to improve flood control; and increase our scientific understanding of how these natural areas are changing.” According to Weber, “these investments support the goal of President Barack Obama’s Climate Action Plan to make communities more resilient to increasingly intense storms predicted with a changing climate.”

National Park Service:

MUSIC VIDEO CELEBRATES 100 YEARS OF NPS. The [New Bedford \(MA\) Standard-Times](#) (10/20, 53K) reports on “a locally made music video that celebrates 100 years of the National Park Service.” According to the article, “published on Oct. 15, the Centennial video has more than 18,500 views on the NPS facebook page and more than 530 on the Youth Ambassador Program’s YouTube page, the group that made it.” NPS Director Jon Jarvis, “who met the traveling crew in Washington, D.C., makes a cameo appearance in the video to say, ‘It’s great to celebrate a hundred years with YAP!’”

Kentucky Lieutenant Gov. Luallen Touts National Parks. The [Louisville \(KY\) Courier-Journal](#) (10/20, 414K) reports that Kentucky Lieutenant Governor Crit Luallen on Tuesday “touted the economic impact of Kentucky’s travel and tourism industry” in “an address to the Kentucky Travel Industry’s annual conference in Bowling Green.” Following her remarks, Luallen “recognized five national parks in Kentucky as part of the National Park Service Centennial in 2016.” She “presented proclamations to representatives of the parks.”

Couple Visiting 59 National Parks In 12 Months. The [Cleveland Plain Dealer](#) (10/21, 1.03M) reports that “Cole and Elizabeth Donelson, St. Louis natives, are two months into their grand adventure: 59 parks in 12 months – part celebration of the National Park Service’s 100th anniversary, part exercise in youthful spontaneity.” Their goal is to “see the best of the United States, and inspire others – particularly other millennials – to do the same.” The article notes that “their mission meshes well with a new campaign of the Park Service, which celebrates its centennial anniversary in 2016.”

WATCHDOG RELEASES REPORT ON NPS CONSTRUCTION FUNDS. The [Greenwire](#) (10/20, Subscription Publication) reports that “a federal watchdog yesterday released a disputed report alleging that the National Park Service is violating congressional intent by dipping into its construction account to cover security, air testing and other reimbursable expenses that should have been paid up front by other agencies.” The NPS construction account is “only for expenses that relate to ‘construction, improvements, repair or replacement of physical facilities,’” the Department of the Interior’s Office of Inspector General report said, “citing the language of the agency’s appropriation.” However, “the OIG found that 17 out of a sample of 21 interagency agreements that used Park Service construction funds to cover reimbursable costs did not appear to include ‘a valid construction purpose.’” The article notes that “these included \$4.9 million that NPS spent from its construction account on security at the Department of the Army’s Memorial Day and Independence Day concerts at the Capitol in 2014 and \$37.5 million over seven years on air quality monitoring at national parks that will be paid back to NPS by U.S. EPA.”

HOUSE COMMITTEE PASSES GRAND CANYON BISON MANAGEMENT ACT. [Grand Canyon \(AZ\) News](#) (10/21) reports that the U.S. House Natural Resources Committee approved the Grand Canyon Bison Management Act “allowing the Arizona Game and Fish Department (AZGFD) to better manage and conserve the bison population within the park Oct. 8.” The legislation “requires the U.S. Department of Interior and the Arizona Game and Fish Commission to coordinate on a plan that allows sportsmen holding a valid state-issued hunting license to assist in management of the bison population within the park.”

THUNDERSTORMS CAUSE FLOODING, MUDSLIDES IN DEATH VALLEY NATIONAL PARK. The

[Greenwire](#) (10/20, Subscription Publication) reports that “mudslides and flooding after severe thunderstorms in Death Valley National Park on Sunday trapped three park rangers and about 20 visitors – many out to see a clear night sky – in a volcanic crater overnight.” Park spokeswoman Abby Wines said “the stranded people spent the night in Ubehebe Crater, maintaining contact with park headquarters until they were able to reach safety yesterday morning.” The article notes that “no injuries were reported, but Wines said the unexpectedly severe storms knocked out power in the area, damaged and closed several roads, and filled a historic visitor’s center with several feet of mud and debris.”

NPS SET TO CONTINUE WITH TREE-CUTTING AT POTOMAC CAMPGROUND. The [Bethesda \(MD\) Magazine](#) (10/21) reports that “after complaints from two nearby residents and a call from County Council member Roger Berliner temporarily halted tree-cutting operations Friday at a Potomac campground, the National Park Service said it plans to resume the tree-cutting and will probably do so in the next few days.” John Noel, deputy superintendent for the C&O Canal National Historical Park, said that “he went to the Swain’s Lock Recreation Site to examine the 26 trees proposed to be removed and 32 others proposed to be pruned at the site’s campground.” Noel “agreed that the trees are rotting and in danger of falling on park users below.”

STUDENTS GO ON CANOE TRIP AROUND WOLF LAKE. The [Merrillville \(IN\) Post-Tribune](#) (10/20, 105K) reports that “all classes in Grades 6 through 9 at George Rogers Clark Junior-Senior High School in Hammond recently experienced a unique field trip right in their own back yard — a canoe trip around Wolf Lake located only a few blocks from the school.” The trip was “made available through a partnership with the National Park Service, Dunes Learning Center and Wilderness Inquiry.”

NEW COLONIAL PARK SUPERINTENDENT THANKS COMMUNITY FOR ADVOCACY. The [Newport News \(VA\) Daily Press](#) (10/20, Williams, Subscription Publication, 201K) reports that the Colonial National Historical Park’s new Superintendent, Kym Hall, thanked the community for its opposition to Dominion’s Skiffes Creek transmission project in her first appearance before the York County Board of Supervisors on September 1. “The view should be protected,” she said.

DEVILS TOWER TO HOST STAR VIEWING PARTIES. The [Casper \(WY\) Star-Tribune](#) (10/21, 115K) reports that the NPS “announced that Devils Tower will host a series of star viewing parties October through December.” The article notes that “the eight parties are free of charge, and will last approximately two hours.”

NPS URGED TO RECONSIDER RACIST NAME FOR A WASHINGTON LAKE. In an op-ed for the [High Country \(CO\) News](#) (10/21, 74K), Glenn Nelson writes that Washington state officially calls Howard Lake “by what is believed to be its oldest known name,” but the federal government “recognizes the lake by a name that causes the jaws of most people of color to drop: Coon Lake.” Nelson notes that “the federal government did not follow the usual course of supporting the state’s action, mostly because of opposition from the National Park Service, which manages the area that contains the lake.” The NPS, “acting on research from its North Cascades unit, originally defended its stance by claiming that there was ambiguity around the use of the term ‘coon.’” According to Nelson, “in the years leading up to its 2016 centennial, the Park Service has done a lot of talking and writing about the need for diversity and inclusiveness.” He concludes that “it’s past time for the Park Service to back away from its misguided opposition, encourage Secretary Jewell to come to its rescue, and allow another black life to matter.”

US Geological Survey:

USGS SEISMOLOGIST QUESTIONS PREDICTION OF 99.9 PERCENT CHANCE OF MAJOR LOS ANGELES EARTHQUAKE IN 3 YEARS. The [Southern California Public Radio](#) (10/20, 68K) reports that “a controversial new study from NASA’s Jet Propulsion Laboratory” claims “there is a 99.9 percent chance of an earthquake” in Los Angeles “between magnitude 5 and 6.3 in less than three years.” The study, published earlier this month by the American Geophysical Union’s Earth and Space Science journal, has “taken many in the seismic community by surprise.” Lucy Jones with the USGS said the “methodology doesn’t fully explain the prediction, and the study doesn’t adequately address this either.” Jones said that, according to the USGS’ “models, there is only an 85 percent chance of a magnitude 5 or 6 quake in the same region over a three-year period.”

Top National News:

MEDIA ANALYSES: TRUDEAU'S ELECTION LIKELY TO FOSTER IMPROVED US-CANADA TIES. On the day after Justin Trudeau became Canada's Prime Minister-designate, media reporting universally characterized the election results as a likely boost for US-Canada relations. Coverage focuses on Trudeau's promise of a less combative foreign policy style and the perception that he will be more willing to accept a US rejection of the Keystone pipeline. Reporting – including a combined 2 minutes and 50 seconds on the three broadcast networks – also indicates that despite Trudeau's decision to withdraw his aircraft from the US-led coalition against ISIL, he is likely to be a more willing partner on climate change and other issues.

[ABC World News](#) (10/20, story 9, 0:20, Muir, 5.84M) reported President Obama on Tuesday congratulated Trudeau, who “swept into power with a message of optimism saying Canada beat fear with hope.” [USA Today](#) (10/21, Korte, 5.23M) reports Obama made the phone call “in an attempt to lock down continued cooperation with the northern neighbor on trade, terrorism, and climate change.” The White House, according to USA Today, “signaled that not much would change in the relationship” between the neighbors following the Liberal party's victory. [CBC News](#) (10/20, Fitzpatrick, 225K) reported on its website that the White House indicated Obama and Trudeau “agreed on the importance of deepening the ‘already strong’ bilateral relationship” between the countries “and committed to strengthen joint efforts to promote trade and to combat terrorism and climate change.”

[AFP](#) (10/21) reports the White House and current Prime Minister Stephen Harper “clashed over climate policy” and the Keystone pipeline. While White House spokesman Josh Earnest on Tuesday said “it would be shortsighted to reduce the relationship between our two countries to just one issue,” Chuck Todd reported on [NBC Nightly News](#) (10/20, story 5, 2:05, Holt, 7.86M) that “we now have a Canadian government that is politically more in line with the American government.” According to Todd, “Relations have been good but they have not been so great of late. Will they now get better? That is why Americans should care.”

In an article entitled “5 Reasons The US Should Care About Canada's New Prime Minister,” [USA Today](#) (10/21, Hjelmgard, 5.23M) lists ways in which Trudeau “is likely to affect policies in Canada and the United States.” According to USA Today, Trudeau “promised to improve strained relations” with Obama and said “he wants to find constructive ways of working with Washington on other issues.” Another [USA Today](#) (10/21, Kovac, 5.23M) article reports that Trudeau and Harper “differ in their approach to foreign policy,” with the incoming leader being less vocally pro-Israel and more focused on environmental issues.

In an analysis piece, [Bloomberg News](#) (10/21, 2.66M) says “a prompt rejection” of the Keystone pipeline by Obama “would make the job easier” for Trudeau “as he seeks to reset the country's relationship with the US, which he says was damaged” by Harper. According to Bloomberg, Trudeau “could use a quick US denial” of the pipeline “to focus discussions” with Obama “on issues such as trade and climate.” Bloomberg notes there has been “speculation” that Obama “would reject the pipeline shortly after the Canadian election.” However, [The Hill](#) (10/20, Cama, 471K) reported, Secretary of State Kerry said Tuesday that Canada's election results will not change the White House's approach to the Keystone issue. Kerry said the decision “is being based on the merits and countervailing balance of all the input that has come from a very exhaustive agency review.” Kerry reiterated that he seeks a decision “as fast as possible.”

[Reuters](#) (10/21, Mason, Rampton) reports the White House indicated it would like the new Canadian government to take increased actions to address climate change. Earnest said that while Canada has “made a substantial and important commitment” ahead of the Paris climate talks, “We believe that it's possible that there is more that Canada can do in this regard.”

However, writing for [Mother Jones](#) (10/20, 758K), Suzanne Goldenberg claimed “those hoping for a U-turn in Canada's climate change policy...are in for a reality check.” According to Goldenberg, while Trudeau does not align directly with many of Harper's views or policies, “it would be a mistake” to see the new Canadian leader or his party “as climate champions.” In [Slate](#) (10/20, 1.38M), Joshua Keating argued that at least with regard to the Keystone pipeline, Trudeau does present a change from Harper. Keating characterizes Trudeau as “a very different leader” from Harper and says he will make the Keystone pipeline less of a focal point of US-Canada relations. According to Keating, Trudeau “has described his support for the pipeline as ‘steadfast,’ but it's clearly not the make-or-break issue for him that it was for Harper.”

The [Wall Street Journal](#) (10/21, Vieira, Subscription Publication, 5.95M) reports Trudeau said he will work to restore Canada's reputation of defending minorities and become more involved in multilateral policy making. At a rally in Ottawa, Trudeau said, “To this country's friends around the world, I want to say this: Many of you have worried Canada has lost its compassionate and constructive voice in the world over the past 10 years. I

have simple message for you: We're back." The [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) similarly reports that Trudeau "is likely to present a very different face to the world" than Harper, "but the most noticeable difference will probably be in tone." Trudeau has vowed to "put an end to Mr. Harper's often belligerent style of politics and diplomacy." Trudeau said Tuesday that "a positive, optimistic, hopeful vision of public life isn't a naïve dream – it can be a powerful force for change." The Times says Trudeau has previously indicated a desire to end Harper's reliance on military solutions and tough rhetoric, and instead focus on working within international organizations, such as the United Nations.

The [CBS Evening News](#) (10/20, story 10, 0:25, Pelley, 5.08M) reported, "Canada took a left turn" as "Trudeau and the Liberal Party rode in on a landslide." In a [USA Today](#) (10/21, 5.23M) op-ed, author David Andelman says "most of the reasons" Canadian voters chose Trudeau to lead the country "boiled down to one fundamental: The Liberal Party leader was simply nicer than his opponent. And most Canadians believe they are, too." Similarly, the [Wall Street Journal](#) (10/21, Subscription Publication, 5.95M) editorializes that Canadians wanted a change from the Harper government, which had become isolated and sought to restrict debate. The [New York Times](#) (10/21, Subscription Publication, 11.82M) agrees, editorializing that Trudeau's election "shows how ready Canadians were to emerge from a decade under the Conservative government of the secretive and combative Stephen Harper."

[AFP](#) (10/21) reports Trudeau told Obama on Tuesday that Canadian fighter aircraft will withdraw from the US-led coalition against ISIL, but the new Canadian leader did not present a timeline for the move. In a front-page story, the [Washington Post](#) (10/21, A1, Brown, 6.76M) reports Trudeau said, "I committed that we would continue to engage in a responsible way that understands how Canada has a role to play in the fight against ISIL," adding, that Obama "understands the commitments I've made around ending the combat mission." According to the Post, a "senior Administration official," said Obama and Trudeau discussed joint anti-terrorism efforts and, "We expect Canada will continue to be a valuable contributor to the 65-member global coalition" against ISIL.

Trudeau's Win Could "Lead To Full Marijuana Legalization" In Canada. [USA Today](#) (10/21, Hughes, 5.23M) reports Trudeau's win "may lead to full marijuana legalization" for Canada. According to USA Today, Trudeau promised during his campaign that "Canada would create a system to tax, regulate and sell marijuana, along with stiff penalties for anyone giving pot to children or caught driving while stoned." USA Today says American "cannabis activists hailed Tuesday's election as a milestone, suggesting that a day may soon come when cross-border trade talks include...legal weed."

[AFP](#) (10/21) reports Trudeau's "promise to legalize recreational cannabis" will likely "help the nation's nascent medical marijuana industry." Investors, according to AFP, "are betting" they could build on companies' current production of marijuana for medical use and "quickly scale up to serve recreational pot users too, once Trudeau makes good on his promise."

NYTimes Analysis: Trudeau Is "No Dynast" Despite Father Being Former Prime Minister. In a 1,350-world profile piece, the [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) reports that despite there being "many easy parallels to draw between" Trudeau and his father, former Prime Minister Pierre Elliott Trudeau, Canada's incoming leader "is no dynast who slipped effortlessly into a family political machine." The Times notes that Trudeau "did not even enter politics until 18 years after his father gave it up, and seven year after his father's death." According to the Times, Trudeau "built his own cadre of advisers, mostly from his own generation" and sometimes "chose more difficult roads – partly, it appears, to show he had not been handed a life in politics on a platter."

In the [Washington Post](#) (10/21, 6.76M) "Reliable Source" blog, Emily Heil says Trudeau and his wife, Sophie Grégoire-Trudeau, "have a lot in common with the Obamas." According to Heil, "they'd have lots to talk about, apart from liberal politics, like fitness!"

IN APPARENT REVERSAL, BIDEN SAYS HE PRIVATELY URGED OBAMA TO AUTHORIZE UBL RAID.

Vice President Biden did not reveal Tuesday whether or not he will enter the Democratic presidential race, but his remark that he privately advised President Obama to launch the 2011 raid that led to the death of Osama Bin Laden – which contradicted Biden's past public comments that he advised against the raid – is being interpreted as a possible line of attack against Hillary Clinton. All three broadcast networks reported on the statement, combining for nearly eight minutes of coverage, and ABC led with it. The tone of the coverage is mixed, with most reports calling it a reversal, and some concluding that Biden may be undercutting his own reputation for candor.

There was also Twitter discussion of Biden's remarks. Anthony De Rosa, a digital producer for The Daily Show who has nearly 89,000 followers, [tweeted](#), "Biden sounds like Brian Williams with his evolving recollection of the Bin Laden raid." Jonathan Martin of the New York Times [tweeted](#), "@vp today signals: he'll run & it'll get negative FAST or: he's not happy about being sidelined." His Times colleague Maggie Haberman [tweeted](#), "Biden's subtle digs at Clinton indicate that if he runs it'll be ugly." In addition, the hashtag [#BidenWatch](#) emerged on Twitter, with Fox Business Network's Trish Regan [tweeting](#), "Sure sounds like he's running...", Mashable's Juana Summers [tweeting](#) Biden's Wednesday official schedule, and Al Jazeera America's David Shuster [tweeting](#) that "Hallie Biden, widow of the late Beau Biden, says her family supports a Presidential campaign '100%'".

[ABC World News](#) (10/20, lead story, 2:50, Muir, 5.84M) reported that "as the pressure mounts for Joe Biden to decide whether he'll run...many [are] now asking, did he change his story?" ABC (Karl) added, "Biden has described Obama's decision as especially courageous because in that key meeting when it came time to decide, most of the President's advisers, including Biden himself, were not in favor of the raid." On Tuesday, he "offered an entirely different account of what happened on that fateful day." Biden was shown saying, "So as we walked out of the room and we walked upstairs, I told him my opinion that I thought he should go but to follow his own instincts. But it would have been a mistake, imagine if I had said in front of everyone, 'don't go, or go,' and his decision was a different decision." Karl: "But until today, Biden has said he told Obama and his team that night to hold off on the raid."

The [CBS Evening News](#) (10/20, story 6, 2:05, Pelley, 5.08M) reported that Biden "sounded more like a presidential candidate, talking up his foreign policy credentials, doing some rewriting of his own history and firing a shot over the bow of the Democratic frontrunner." CBS' Nancy Corden added that Biden "never mentioned" Clinton by name, "but it was all too clear the comparison he was making when he said this about his stature overseas." Biden: "I will get sent to go speak to Putin or go speak to whomever, and it's because the secretary of state, we've had two great secretaries of state, but when I go, they know that I am speaking for the President." Cordes added that Biden left Clinton "out of his story" about the Bin Laden raid.

[NBC Nightly News](#) (10/20, story 3, 2:35, Holt, 7.86M) also said of Biden, "If anything, he is beginning to sound more like a candidate, taking not-so-veiled swipes" at Clinton. NBC (Welker) added that Biden "said he and the President were in lock-step when it came to authorizing the raid against Bin Laden." The [AP](#) (10/21, Lederman) says Biden "backtracked on his previous claims to have advised Obama against the raid" in "an unusual reversal."

[Bloomberg Politics](#) (10/21, Talev, 247K) reports that in his remarks at an event honoring his vice presidential predecessor Walter Mondale, Biden "portrayed himself as the central player" in the Administration "on everything from working with congressional Republicans to the killing" of Bin Laden. [USA Today](#) (10/21, Singer, 5.23M) says Biden "revised his account of his advice" to Obama after Mondale said he "would only disagree with President Jimmy Carter in private during his tenure as vice president."

The [New York Times](#) (10/21, Harris, Martin, Subscription Publication, 11.82M) says with the remark, Biden "sought...to dispel" the notion that he had opposed the raid, which "might dog him on the campaign trail." Biden said he "never gave his own views on controversial issues until the rest of the cabinet had spoken, mindful that he did not want the rest of the team to see a difference between his opinion and that of the president." Biden said only then-Defense Secretary Robert Gates and then-CIA Director Leon Panetta "had expressed definitive views on the raid," and "pointedly did not mention" Clinton, who "has said that she was in favor of the raid."

The [Washington Post](#) (10/21, Jaffe, 6.76M) says Biden "seemed to change his account" with a revision that "seems designed to buttress his qualifications to serve as commander-in-chief." But Biden "seems to have contradicted his earlier memories of the final meeting before the bin Laden raid." The [Wall Street Journal](#) (10/21, Nelson, Nicholas, Subscription Publication, 5.95M) says Biden cast himself as Obama's chief adviser on many issues, and sought to downplay Clinton's advisory role as secretary of state. The [Los Angeles Times](#) (10/21, Memoli, 4.07M) says Biden used the event "to highlight his close relationship with President Obama that would be at the heart of Biden's potential presidential campaign."

The [New York Daily News](#) (10/21, Joseph, 3.75M) says Biden's "new details make him out to be a supporter of the high-stakes raid that killed Bin Laden – a big shift from the common narrative that he resisted it, one Clinton's allies have hinted could be a main attack line if Biden does jump into the race." The [Boston Globe](#) (10/21, Linskey, 1.1M) says Biden "has been on record recommending against the move."

[Politico](#) (10/20, Dove, 942K) says Biden “contradicted” his own previous accounts as well as “what Obama himself said about the decision during his third 2012 debate with Mitt Romney.” The President said at the time, “Even some in my own party, including my current vice president, had the same critique as you did.” [The Hill](#) (10/20, Fabian, 471K) reports White House Press Secretary Josh Earnest “dodged multiple questions” about Biden’s remarks, “saying he would not comment on private conversations between the president and the vice president.”

[Politico](#) (10/20, Wheaton, 942K) writes that “for a politician who projects authenticity,” Biden “seemed to stumble around the truth” Tuesday, not just on the Bin Laden raid but also in claiming “to have veto power over nominations and to speak for the president with more authority than other top officials do.” [TIME](#) (10/20, 19.55M) says on its website that Biden’s “narrative runs in the face of the one Biden himself offered in 2012.” The [Daily Caller](#) (10/20, Ross, 375K) says Biden “contradicted himself” with the remarks. Gregory Krieg of [Mic](#) (10/20, 1.5M) writes that Biden “really sounds like someone who is running for president.” [The Blaze](#) (10/20, 1.66M), the [CNN](#) (10/20, Koran, 5.17M) website, [Roll Call](#) (10/20, Bennett, 113K), and [Yahoo! Politics](#) (10/20, Knox, 582K) are among the other outlets reporting on Biden’s remarks.

Ex-Administration Official Says Biden Opposed Raid. [The Hill](#) (10/20, Parnes, 471K) reports that “a former senior Administration official involved in deliberations” on the raid “said Biden did not back the operation,” remarking, “Both then-CIA Director Leon Panetta and Secretary of State Hillary Clinton favored the raid and they did so in presentations made in the Situation Room. Secretary Clinton made her views known. Leon made his position known. And I don’t recall the Vice President sharing the same view.”

Biden Says He Used Mondale As Vice Presidential Example. The [St. Paul \(MN\) Pioneer Press](#) (10/21, Davis, 447K) reports Biden said he used Mondale “as an example when he became vice president.” Biden said that when he was asked to be Obama’s running mate, “The first person I called was Fritz.” Biden and Mondale “talked for an hour to open a daylong celebration of the 87-year-old Mondale’s career.”

Biden Says He Would “Develop Prostate Cancer Or Something” If He Disagreed With Obama. The [Washington Times](#) (10/21, Wolfgang, 344K) reports Biden joked at the event “that he would ‘develop prostate cancer or something’ if he had a fundamental disagreement with President Obama and was forced to resign from his post.” The [Washington Times](#) (10/21, Wolfgang, 344K) says in another article that “Biden’s list of gaffes got longer” with the “awkward joke.”

Biden, At 10%, A Distant Third In New Hampshire Poll. [Bloomberg Politics](#) (10/21, Epstein, 247K) reports that a Bloomberg Politics/Saint Anselm New Hampshire Poll shows Biden a distant third among likely voters in the lead-off primary. Sen. Bernie Sanders leads with 41%, followed by Clinton at 36%, and Biden 10%, with other candidates each at one percent or less.

SEN. MURKOWSKI SEES TOUGH ROAD FOR INTERIOR NOMINEE. [Politico Pro](#) (10/20, Subscription Publication) reports that Senate Energy and Natural Resources Committee Lisa Murkowski said that Interior Department pick Kristen Sarri would “have a lot of explaining to do at a hearing on six nominees today.” While Murkowski was “pleased that President Barack Obama had renamed Mount McKinley this summer to Denali, the Alaska Republican said she was still frustrated with the Interior Department’s ‘heartless decision’ to deny a road in King Cove.” Murkowski also “criticized Interior for closing off oil production in Alaska and last week’s cancellation of offshore sales and lease extension.”

Meanwhile, the [Daily Caller](#) (10/21, Barton, 375K) reports that Murkowski is “torn between leaving the Department of the Interior’s independent watchdog post vacant, or confirming President Barack Obama’s nominee crippled by recurring allegations of ‘playing games with Congress.’” She said, “I strongly believe that Interior needs a permanent [inspector general], and I’m disappointed the administration has let the position go unfilled for six and a half years.” Murkowski continued, “But I am also committed to ensuring that the individual we confirm is fully independent ... The tenure that you have been involved with thus far in this position has been marked by controversy.”

Additional coverage was provided by [The Hill](#) (10/21, Henry, 471K), [KTOO-FM](#) Juneau, AK (10/20), and [Alaska Public Radio Network](#) (10/20, 2K).

HISTORIC \$186 MILLION SETTLEMENT WITH CHOCTAW, CHICKASAW NATIONS LAUDED. The [Indian Country Today Media Network](#) (10/20, 32K) reports that “tribes and the U.S. Department of the Interior heralded the outcome of a \$186 million settlement signed earlier this month between the federal government, the Choctaw and the Chickasaw nations to solve a longstanding land trust dispute as a new chapter in relations.” During the October 5 signing ceremony, Chickasaw Nation Governor Bill Anoatubby “gave a nod to the impetus provided” by Interior Secretary Sally Jewell. He said, “We respect the vital role Secretary Jewell has taken in helping make this historic settlement a reality. We are confident she will play an essential role in our efforts to continue strengthening the relationship between our governments, because we believe she has a unique appreciation for the mutual benefits of a positive government-to-government relationship.” Jewell said, “Today’s agreement is the latest addition to a record number of longstanding settlements resolved under this Administration. This historic settlement is the start of a new chapter in our trust relationships with the Chickasaw and Choctaw Nations, and underscores our commitment to fulfilling those responsibilities to Native communities across the country.”

U.S. TREASURY CONFIRMS \$20B BALANCE FOR LWCF. [E&E Publishing](#) (10/21, 705) reports that “the Land and Water Conservation Fund that expired earlier this month for the first time in its 50-year history currently contains nearly \$20 billion, according to the U.S. Treasury, which maintains the program’s balance sheets.” But “whether that is ‘real’ money available to be spent on federal land acquisitions, private land

easements and state recreation projects depends on whom you ask.” The article notes that “the \$19.8 billion can only be reduced until Congress reauthorizes the program.”

Additional coverage of the LWCF was provided by the [Durango \(CO\) Herald](#) (10/20, 31K).

PROPOSED DESIGNATIONS OF THREE NATIONAL MONUMENTS IN CALIFORNIA DESERT RAISES CONCERNS ABOUT “LAND GRAB.” [Fox News](#) (10/20, 8.91M) reports that “a group of off-roaders and others are attempting to fight a proposed designation of three national monuments in the California desert under the Antiquities Act.” The Obama Administration is “considering using the federal Antiquities Act to bypass the legislative process at the request of Sen. Dianne Feinstein, whose efforts to have the Mojave Trails and Castle Mountain, both in the Mojave Desert, and a section of the Sonoran Desert named federal sites were repeatedly blocked by Republicans.” According to the article, “a White House move could put the land under federal control, which critics say could cut funding for upkeep or even restrict access.”

UNMANNED HELICOPTER OFFERS NEW WAY TO FIGHT WILDFIRES. The [Voice of America](#) (10/21, Banse, 32K) reports that the K-MAX “unmanned, water-dropping” helicopter was tested by the US government. The helicopter can fly through limited visibility. Brad Koeckertiz, the unmanned aircraft program manager with the US Department of Interior, says that unmanned helicopters such as the K-MAX will be integrated into routine measures to fight wildfires over the next few of years. The article notes that the K-MAX helicopters have already been used by the US Marines in Afghanistan, to “resupply remote outposts at night” and replace “dangerous convoys on the ground.” The article notes that the growing uses for drones is also why the FAA is seeking to register all drones.

Additional coverage was provided by [Vertical Magazine \(CAN\)](#) (10/21).

JEB BUSH PROPOSES MOVING INTERIOR DEPARTMENT FROM D.C. To Western City. The [Las Vegas Sun](#) (10/20, Lucas, 199K) reports that “Republican presidential candidate Jeb Bush will unveil his proposals for Western land and resource management in a campaign stop in Reno on Wednesday morning, in a speech likely to resonate with conservative voters opposed to what they see as federal overreach in the Western states.” Bush is “expected to speak at 11 a.m. Wednesday at Rancho San Rafael Regional Park before appearing at a forum sponsored by the LIBRE Initiative at the College of Southern Nevada Cheyenne Campus in North Las Vegas at 6 p.m.” In the proposal, Bush will “call for moving the headquarters of the Department of Interior from Washington, D.C., to a city in the western United States like Denver, Salt Lake City or Reno and will say that as president he would direct federal agencies to give broad latitude to states to determine land-use issues.”

STUDY: ALASKAN WILDFIRES COULD EXACERBATE GLOBAL WARMING. The [Washington Post](#) (10/21, Mooney, 6.76M) reports that some greenhouse gas sources outside the scope of forthcoming UN climate talks are beyond governments’ control, such as raging peat fires in Indonesia this year, emitting “as much as Japan produces in a year from fossil fuels.” Elsewhere, a new study in Nature Climate Change reaffirms concerns about the emissions of northern fires in Alaska. The Post reports that “climate researchers are still trying to figure out how all of these factors will interrelate,” but fire is a “powerful determinant of how much carbon resides in land, rather than in the air, across our globe.”

INTERIOR’S VINE ACCOUNT HIGHLIGHTED. [Politico](#) (10/21, 942K) highlights the Interior Department has a great Vine account. Providing a link, Politico says “this is Internet gold.”

Empowering Native American Communities:

BIA RULE ANNOUNCES RULE GIVING TRIBES MORE CONTROL OVER ELECTIONS. [Law360](#) (10/20, 21K) reports that the BIA “on Monday announced its final rule for Native American tribal elections conducted by the U.S. Department of the Interior, saying the new rule will encourage tribes to take control of their elections and help protect the voting rights of tribe members living in urban areas.” Assistant Secretary of Indian Affairs Kevin K. Washburn said “in a statement Monday that the rule will allow tribes to opt out of having the interior secretary conduct their elections.”

The [Native American Times](#) (10/20, 337) reports that Washburn said, “Though many federal responsibilities concern the lands we hold in trust for tribes and Indian people, more than 55 million acres nationwide, the United States has a moral obligation to preserve connections between Indian people and their tribes that it

once sought to destroy. For the future of Native nations and the health of Indian Country, American Indians in urban areas must work harder to maintain connections with their tribes. One important aspect of that relationship is participation in the civic and political life of their tribal governments. For that reason, our Secretarial election amendments seek to prevent tribal members living in urban areas from being inadvertently disenfranchised in Secretarial elections.”

HEARING FOCUSES ON NATIVE HAWAIIAN ELECTION. The [AP](#) (10/21, Kelleher) reports from Honolulu that a federal court hearing began on Tuesday “in a lawsuit by people who want to put a stop to an election process that is underway for Native Hawaiians.” The lawsuit, filed in August, “says it’s unconstitutional for the state to be involved in a race-based election.” The state “argues in court documents that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it’s not involved in next month’s vote to elect delegates for a convention to determine self-governance for Native Hawaiians.” Tuesday’s hearing “is focused on the plaintiffs’ motion for a preliminary injunction,” and the plaintiffs “want the judge to limit voter registration activities or stop the election altogether.”

Additional coverage was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Navajo Times \(AZ\)](#) (10/21, 66K), and [Yahoo! News](#) (10/21, Kelleher, 5.98M).

INTERIOR SIDES WITH ALASKA NATIVE GROUP IN INVESTIGATION OF MASSACHUSETTS COLLEGE TRIBAL COLLECTION. The [AP](#) (10/21, 2.28M) reports that “a Massachusetts college was found in violation of a federal law regulating the possession and sale of potentially sacred artifacts following a complaint from an organization of Alaska Natives.” The Interior Department said “an investigation substantiated the complaint against Andover Newton Theological School filed in June by the Sealaska Heritage Institute.” The institute’s president, Rosita Worl, said “the school possesses at least two southeast Alaska artifacts, including a Tlingit halibut hook that is considered sacred.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/21, D’oro, 344K), the [Boston \(MA\) Herald](#) (10/21, 548K), the [Daily Mail \(UK\)](#) (10/21, 5.59M), the [Miami \(FL\) Herald](#) (10/21, 651K), [Minneapolis \(MN\) Star Tribune](#) (10/21, D’oro, 1.19M), [ABC News](#) (10/21, 3.97M), and the [Alaska Dispatch News](#) (10/20, 219K).

US ATTORNEY SAYS BIA OFFICER WAS JUSTIFIED IN DEADLY SPIRIT LAKE SHOOTING. The [AP](#) (10/21) reports that US Attorney Chris Myers “says” that an investigation by his office came to the conclusion that BIA Officer Terry Morgan was justified in shooting and killing “31-year-old Joseph Charboneau during a standoff with officers on June 16.” The [Grand Forks \(ND\) Herald](#) (10/21, 100K) reports that the US Attorney’s Office “said” the shooting was justified because Charboneau posed a “real and immediate” threat to officers and another person at the scene after he refused to put down his gun, which was pointed at the officers. The Grand Forks Herald reports that, as a result of the investigation, Federal prosecutors “will not file charges against” Morgan.

Additional coverage was provided by the [Dickinson \(ND\) Press](#) (10/21, 1K), the [Forum of Fargo-Moorhead \(ND\)](#) (10/21, 14K), [KXJB-TV Fargo \(ND\)](#) Fargo, ND (10/21, 18K), [KFGO-AM Fargo \(ND\)](#) Fargo, ND (10/20, 3K), [KXMC-TV Minot \(ND\)](#) Minot, ND (10/21, 1K), and [KFYR-TV Bismarck \(ND\)](#) Bismarck, ND (10/21, 1K).

CRIME JUMPS AFTER TRIBES CUT FROM BIA FUNDING. The [Los Angeles Times](#) (10/20, Romney, 4.07M) reports on a “time of crisis for public safety on tribal lands.” According to the article, “a federal law decades ago shifted the primary burden of criminal law enforcement on tribal lands in California and five other states to local authorities,” but “many lack the resources to do the job and, in some cases, sufficient knowledge of tribal law and culture to win the trust of tribal members.” After “tribes were cut off from steady funding for their own justice systems,” crime has “flourished.”

ADDITIONAL COVERAGE: YAKAMA NATION’S PETITION TO SELF-GOVERN APPROVED. Additional coverage that the BIA on Monday granted the Yakama Nation’s petition for “retrocession” was provided by the [Bellingham \(WA\) Herald](#) (10/21, 101K), the [Clark County \(WA\) Columbian](#) (10/20, 86K), the [Washington \(DC\) Times](#) (10/21, 344K), the [Spokane \(WA\) Spokesman-Review](#) (10/20, 183K), the [Native American Times](#) (10/21, 337), the [Law360](#) (10/21, 21K), [KNDU-TV Yakima \(WA\)](#) Yakima, WA (10/21, 3K), and [KUOW-FM Seattle \(WA\)](#) Seattle (10/21, 15K).

GILLETTE’S SERVICE IN OBAMA ADMINISTRATION PRAISED. In an editorial, the [Bismarck \(ND\) Tribune](#) (10/21, 37K) lauds Jodi Gillette’s service in the Obama Administration. According to the paper, Gillette’s

positions gave her a voice in a White House that has seemed genuinely concerned about Native American issues.”

Office of Insular Affairs:

ASSISTANT SECRETARY KIA’AINA PROPOSES MARSHALLS FUND CHANGES. [Radio New Zealand](#) (10/21, 1K) reports that “a top US official has submitted a proposal to the Senate and House to allow the people of Bikini to use resettlement and relocation funds outside of the Marshall Islands.” Assistant Secretary for Insular Areas Esther Kia’aina says “it is an appropriate course of action to take regarding the welfare and livelihood of the Bikinian people.” The Bikinians were “displaced by US nuclear weapons testing 70 years ago but are now looking at relocating again because of deteriorating conditions on Kili and Ejit Islands.” According to the article, “in addition to cramped living quarters and a lack of suitable sustainable resources, the islands have been experiencing more frequent storms and king tides resulting in salt water inundation and the destruction of crops.”

[Radio New Zealand](#) (10/21, 1K) reports that “a representative from Bikini Atoll says a proposal to allow people to use resettlement and relocation funds outside of the Marshall Islands is not wanted.” Bikini liaison officer Jack Niedenthal says “the US should take full responsibility for any resettlement including providing extra financing.” Niedenthal said, “We still got a ways to go, we still have to do some more lobbying and some more talking to people in Washington to make them understand that what’s being proposed by the assistant secretary is what we view as ‘Plan B’. It’s not ultimately what we want in terms of helping our people.”

CHINA STRENGTHENS RELATIONSHIP WITH PACIFIC REGION. The [Marianas Variety](#) (10/21) reports that “China and the Pacific Islands Forum Secretariat further strengthened their relationship on Friday when the two met at a ceremony to hand over \$1.05 million to assist the Pacific region.” Forum Secretariat Secretary General Meg Taylor and Chinese Ambassador to Fiji Zhang Ping “attended the ceremony and delivered speeches respectively.” Zhang “reiterated his nation’s ongoing interest in the region saying, ‘China attaches great importance to the South Pacific region. The Chinese side stands ready to enhance mutual understanding and cooperation with Pacific Island Countries and contribute to the development and capacity building in the region.’”

COUNTRIES IN PACIFIC URGED TO BEGIN TALKS ON CLIMATE MIGRATION. [Radio New Zealand](#) (10/21, 1K) reports that “all countries in the Pacific are being urged to start discussions on how to help people forced to move from low lying atoll nations like Kiribati and Tuvalu.” According to the article, “184 million people worldwide were displaced by disaster between 2008 and 2014 and at special meetings in Geneva last week 110 countries gave the nod to a Protection Agenda for dealing with future migration challenges.” The article notes that “the experiences of small island countries which face rising seas due to climate change helped form the global action plan under the Swiss Norwegian Nansen Initiative.”

JOURNALIST SPEAKS AT UNIVERSITY OF GUAM ON CLIMATE ISSUES, CORRUPTION IN PACIFIC ISLANDS. The [Marianas Variety](#) (10/21) reports that “author and journalist Giff Johnson spoke to students at the University of Guam on Monday evening about climate change and development in the Pacific islands.” Johnson’s “lecture, entitled ‘Idyllic No More: Pacific Island Climate, Corruption and Development Dilemmas,’ is based on his latest book — a compilation of essays detailing the looming climate threat to the region, its booming fishing industry, and the U.S. nuclear test legacy in the Marshall Islands.” Johnson called attention to “climate-driven migration from remote Pacific islands to Guam and mainland U.S.”

RISING SEA LEVELS THREATEN KIRIBATI. The [National Geographic](#) (10/21, 31.65M) provides a picture gallery of the threat of rising sea levels driven by climate change on Kiribati.

Tackling America’s Water Challenges:

WATER SCHEDULED TO BE RELEASED FROM NEW MELONES. The [Sonora \(CA\) Union Democrat](#) (10/21, 28K) reports that “more than 7 billion gallons of water is scheduled to be released from New Melones Reservoir beginning today to ensure flows in the Stanislaus River will keep temperatures cool enough for adult salmon migrating up the river to spawn this fall.” Oakdale Irrigation District and South San Joaquin Irrigation District said “it would benefit river conditions and fisheries, as well as the needs of agriculture and more than 200,000 residential customers downstream.” The article notes that “earlier this year, the irrigation districts sparred with the U.S. Bureau of Reclamation — which manages New Melones Reservoir — over spring pulse

flows that they feared would leave as little as 147,000 acre-feet in the reservoir by the end of September.”

SAN JOAQUIN COUNTY BOARD OF SUPERVISORS VOTE TO OPPOSE DELTA TUNNELS PLAN. The [Lodi \(CA\) News-Sentinel](#) (10/21, 14K) reports that “at a meeting on Tuesday, the San Joaquin County Board of Supervisors voted to adopt a resolution in formal opposition of California WaterFix, also known as the twin tunnels plan.” Supervisor Kathy Miller said, “The WaterFix is just a thinly veiled version of the former (Bay Delta Conservation Plan) and continues to push the fatally flawed twin tunnels, which will simply sacrifice one region of California for the benefit of another.”

Securing America’s Energy Future:

Renewable Energy:

ENVIRONMENTALISTS, DOMINION BOTH SUPPORT OFFSHORE WIND DEVELOPMENT. On his [Bacon’s Rebellion \(VA\)](#) (10/21, Bacon) blog, James Bacon reports on an Environment Virginia-sponsored webinar held Tuesday morning in which representatives from Dominion, environmental groups, and the McAuliffe Administration all voiced support for the utility’s experimental offshore wind farm project. For environmentalists, Bacon writes, the project represents the beginning of an industry that would increase the use of green energy along the Atlantic and displace fossil fuels. For the Governor’s office, it represents increased green energy coupled with economic development that takes advantage of the Newport News area’s shipbuilding industry.

Onshore Energy Development:

CHESAPEAKE ENERGY FINED \$2.1 MILLION FOR UNDER-REPORTING NATURAL GAS. The [Greenwire](#) (10/20, Subscription Publication) reports that the Interior Department on Monday “announced a \$2.1 million civil penalty against Chesapeake Energy Corp. for misreporting the amount of gas it produced and sold from American Indian lands in Oklahoma.” Chesapeake “failed to comply with a 2011 order that found ‘systemic errors’ in the company’s monthly production reports for more than 100 Indian leases, according to Interior’s Office of Natural Resources Revenue.” The company “agreed to amend the monthly reports, but it continued to maintain inaccurate information on the agency’s data systems, ONRR said.” The firm was “assessed a penalty based on ‘knowing or willful maintenance’ of the inaccurate information, ONRR said.”

Additional coverage was provided by [Politico](#) (10/21, 942K), [Natural Gas Intelligence](#) (10/21, Subscription Publication), the [Native American Times](#) (10/21, 337), and [KOKC-AM Oklahoma City \(OK\)](#) Oklahoma City (10/20, 1K).

TEXAS ENERGY REGULATOR OPPOSES STREAM PROTECTION RULE. [Law360](#) (10/21, 21K) reports that “Texas’ top energy regulator on Tuesday said the agency will oppose a U.S. Department of the Interior proposed rule aimed at better protecting streams and other waterways from nearby mining activity, saying the regulation encroaches on ground better left to the state.” Texas Railroad Commission Chairman David Porter on Tuesday said “the state would sign on to the multistate Interstate Mining Compact Commission’s comments opposing the proposed waterway regulation.”

USGS REPORT STATES EARTHQUAKES COINCIDE WITH OKLAHOMA OIL BOOMS. [KOCO-TV](#) Oklahoma City (10/21, 93K) reports that “a study by the United States Geological Survey states that the earthquakes from the past 100 years seem to coincide with the oil boom in Oklahoma.”

OKLAHOMA REGULATORS SHUT DOWN THREE MORE DISPOSAL WELLS. The [EnergyWire](#) (10/21, Subscription Publication) reports that “Oklahoma oil and gas regulators dealing with a dramatic increase in earthquakes near the pipeline hub of Cushing have shut down three more disposal wells.” Also, “another well was shut down by the company that owns it after regulators said they were concerned it was drilled too deep.” In addition, “the operators of seven other wells were told in a letter written Friday and released yesterday that they must reduce the volume of drilling waste that they inject deep underground.”

OKLAHOMA LIMITS DISPOSAL WELLS AMID CUSHING QUAKES. [Reuters](#) (10/21, Hampton, Brandes) reports that Oklahoma’s oil and gas regulator on Monday said it could impose new limits on all saltwater disposal wells within a 10-mile radius of Cushing. Reuters reports that Oklahoma now experiences as many as two magnitude 3.0 quakes per day, up from two per year. Thirteen wells have been ordered shut and

approvals for new wells have been halted, Reuters reports. Scientists told Reuters that shutting wells could ease tectonic disruption in Oklahoma.

STUDY: FRACKING CAN CAUSE METHANE LEAKS IN NEARBY ABANDONED OIL WELLS. [Reuters](#) (10/20, Valdmanis) reported that according to a study published Tuesday in the Water Resources Research journal, fracking can cause methane leaks in nearby abandoned oil wells. The methane leaks could be a large source of unrecorded greenhouse gas emissions, according to the study. The study said that energy companies could reduce the probability of such methane leaks by trying to identify abandoned wells before they begin fracking, although the task could be difficult due to large numbers of unmarked abandoned wells.

BLM CRITICIZED FOR FAILING TO PRODUCE PICTURES UNDER FOIA REQUEST. For the [Fairfield \(MT\) Sun Times](#) (10/21), Darryl L. Flowers criticizes the BLM for failing to provide pictures in connection with “the proposed Solenex, LLC natural gas well on public lands in the Lewis and Clark National Forest” that were requested under the Freedom of Information Act. The paper received “sixteen photos” and “two photos were missing.” He notes that “curiously, the two omitted photos were the only ones that included a person in the photos.”

Offshore Energy Development:

FEDS INVESTIGATE WORKER’S DEATH ON DRILLSHIP CONTRACTED BY CHEVRON. [Fuel Fix \(TX\)](#) (10/20, Dlouhy, 7K) reports that officials from the Bureau of Safety and Environmental Enforcement and the Coast Guard are investigating “the death of a worker on a drillsip in the Gulf of Mexico that was preparing to bore a well for Chevron.” Fuel Fix says that “the Pacific Santa Ana drillsip was just beginning operations for Chevron in about 4,800 feet of water at the site and had not yet penetrated the sea floor when an employee of that drilling contractor was fatally injured.” Fuel Fix adds that Chevron has a 36 percent working interest in the Keathley Canyon well-leasing block where the incident occurred, an area where “Chevron outlined ambitions to drill up to seven wells” earlier this year.

The [AP](#) (10/21) reports that Amy Roddy, spokeswoman for Pacific Drilling SA, the ship’s owner, “said the company is not releasing any details about the man to respect his family’s privacy. She also refused to disclose how the man died or details of the accident, citing an ongoing investigation.”

[NASDAQ](#) (10/20, Sider) reports that Chevron has contracted the ship since 2012. The [New Orleans Times-Picayune](#) (10/21, Larino, 718K) adds that “operations have been shut down and personnel remain onboard, according to the drillsip’s operator.”

[Offshore Engineer](#) (10/20, Leon) reports that “the ship was to use its dual gradient drilling functions for Chevron’s Anchor-1 prospect last year in Green Canyon block 807, but the well was junked due to mechanical failures. However, in January of this year, Chevron hit high quality oil pay in multiple Lower Tertiary Wilcox Sands at a second Anchor well also drilled by the Pacific Santa Ana.”

The [Dow Jones Newswires](#) (10/21, Sider) reports that this is the first death related to offshore drilling operations in the Gulf of Mexico this year.

[Reuters](#) (10/21), [gCaptain](#) (10/21, 2K), [Upstream Online](#) (10/21, Schmidt, Brenner, 20K), and [Maritime Executive](#) (10/20, 21) also cover the story.

BRIARCLIFFE ACRES VOTES AGAINST OFFSHORE DRILLING. The [Myrtle Beach \(SC\) Online](#) (10/21, 36K) reports that “in a storm of debate over offshore drilling, Briarcliffe Acres surfaced as the latest coastal town to join a united front against seismic testing and drilling for oil and natural gas off of South Carolina’s beaches.” According to the article, “missing councilwoman Abby Stewart, who has been with family on the west coast, the town council unanimously passed a resolution Monday, joining 23 other S.C. coastal towns in a stance against offshore drilling.”

SHELL VESSEL RESCUES FRENCHMAN, CAT FROM SAILBOAT STRANDED IN SEAS NEAR ALASKA. The [AP](#) (10/21, Thiessen) reports that a Frenchman and the cat tucked inside his clothing were rescued on Tuesday after he leapt from his sailboat to a waiting rescue ship sent by Shell. The man activated a location beacon in the high seas south of Alaska and told the Coast Guard his sailboat had lost its rudder and rigging in the high winds and 20-foot waves. The Coast Guard contacted Shell’s oil drilling rig, the Polar Pioneer, which is on its way to Port Angeles, and the rig “sent a support ship, the Tor Viking, to rescue the sailor.” The AP

reports that “it wasn’t immediately clear if the man would continue with the Shell ships to Washington state.”

CUNNINGHAM: INTERIOR DEPARTMENT OFFICIAL SHUTS THE DOOR ON ARCTIC DRILLING. In an analysis of the Interior Department’s recent decision on the future of Arctic drilling, [Oil Price](#) (10/21, 2K) reporter Nick Cunningham writes the Interior Department’s decision to cancel lease sales through 2017 “leaves almost no possible pathway for an oil company to drill in the Arctic for years to come, perhaps killing off drilling for a decade or so at a minimum.” Cunningham goes on to write that “it was likely that there wouldn’t have been new drilling in any event, given Shell’s decision and current market conditions, but Interior’s decision officially shuts the door on the Arctic in the medium-term.”

Casey: Interior’s Actions On Arctic Drilling Trends “Toward A Permanent Clampdown.”

[CleanTechnica’s](#) (10/20, 15K) Tina Casey writes that “in the absence of local regulations, the Feds are the only game in town and it seems that the Arctic’s role in the US economy is too important to trust to compliance by oil companies.” Casey adds that, even though the Interior’s actions last week on Arctic drilling may be “only temporary, but the trend is toward a permanent clampdown.”

4-Traders: Federal Government To Blame For Low Arctic Drilling Interest. In an op-ed piece on the Interior’s Arctic drilling decision, [4-Traders](#) (10/21, 5K) writes the Federal government’s “difficult” regulatory obstacles is to blame for the lack of interest among oil companies to explore for oil and natural gas in the Arctic. 4-Traders writes that the “demand for oil and natural gas isn’t going away, so energy domestic exploration must continue in the Arctic and elsewhere. But as we’ve seen, by putting up unnecessary regulatory hurdles, regulators can cause job and economic growth opportunities to be missed.”

America’s Great Outdoors:

Bureau of Land Management:

BLM TO REVIEW HAGERMAN-HAILEY TRANSMISSION LINE. [Boise \(ID\) State Public Radio](#) (10/21) reports that the BLM will review the Hagerman to Hailey transmission line, paying “special attention to the greater sage grouse in the area.” Stacey Baczkowski, a biologist with Idaho Power, says “the company has been working with the BLM for the last few years to make sure the line is built with the bird in mind.” Baczkowski says “the power company plans to build the new transmission line as close to the current one as possible, and will follow BLM rules about construction during sage grouse mating times.”

UTAH WATER DISTRICT RAISES CONCERNS ABOUT BLM REVISION TO LAND-USE PLAN. The [Deseret \(UT\) News](#) (10/21, 407K) reports that “federal policies that either aim to instill more oversight of water or deny access altogether have some Utah leaders frothing over what they say is a repeated pattern of overreach that threatens local economies and livelihoods.” Ron Thompson, general manager of the Washington County Water Conservancy District, said “possible revisions to a land-use plan by the Bureau of Land Management in Washington County have severe ramifications should one particular approach be adopted.” Thompson said “the BLM — under one option — is ignoring key considerations that went into the passage of the bill, including water supplies being left unhindered and right of way corridors left intact.”

ADDITIONAL COVERAGE: HELICOPTER CRASHES NEAR SEARCHLIGHT DURING CATTLE ROUNDUP. Additional coverage of the helicopter crash near Searchlight during a cattle roundup was provided by the [Las Vegas Review-Journal](#) (10/21, 378K).

Fish and Wildlife Service:

CONSERVATION LEADERS ATTEND NATIONAL CONSERVATION SUMMIT. [KYTV-TV](#) Springfield, MO (10/21, 135K) reports that “more than 40 leaders from the leading conservation groups in America are meeting in Springfield this week for a National Conservation Summit hosted by The Johnny Morris Foundation.” According to the article, “participants include the U.S. Fish and Wildlife Service, National Geographic, Audubon Society, and Ducks Unlimited.” The article notes that “the purpose of the historic gathering is to collectively discuss opportunities to educate and engage the public in efforts to protect wildlife and natural habitats in preparation for the grand opening of America’s Wildlife Museum and Aquarium in 2016.”

The [Springfield \(MO\) News-Leader](#) (10/20, 49K) reports that “three exhibits of America’s Wildlife Museum & Aquarium, formerly Wonders of Wildlife, were open to media for a tour on Oct. 20, 2015 at the museum

located next to the Bass Pro Shops flagship store in Springfield, Mo.” More than 40 conservation leaders attending a National Conservation Summit “hope the new Bass Pro Shops wildlife museum and aquarium will convey to visitors when it opens in mid 2016.” FWS Director Dan Ashe, “one of the summit attendees,” called the museum “one of the foremost conservation attractions in the world.” He said, “Through conservation efforts, we can be successful in sustaining these populations of animals that are threatened or endangered. People hear about the industrial-scale poaching of elephants that’s happening in Africa. That’s not hunting. With this museum, here’s an opportunity to tell the story of how we can protect wildlife habitat, and that when hunting is done well, with appropriate regulations, it sustains wildlife populations.”

Additional coverage was provided by [KOLR-TV](#) Springfield, MO (10/21, 6K), [KYTV-TV](#) Springfield, MO (10/21, 135K), and [KOLR-TV](#) Springfield, MO (10/21, 6K).

CNMI QUESTIONS INCLUSION OF SOME SPECIES ON ENDANGERED LIST. The [Radio New Zealand](#) (10/21, 1K) reports that “the Northern Marianas government says the decision to list 23 species in Guam and the CNMI as threatened or endangered was rushed.” The government says “it supports the US Fish and Wildlife Service’s listing of seven of the 17 CNMI species, but it questions the inclusion of some of the other species.” The Department of Land and Natural Resources says “a number of the species do not meet the definitions of threatened or endangered and don’t require federal protection.”

FWS LOOKS TO RESTORE HABITAT ON ROOT RIVER. The [Rochester \(MN\) Post-Bulletin](#) (10/21, 28K) reports that “federal wildlife officials are seeking public input on a plan to restore and enhance habitat on 825 acres of Minnesota land along the Root River in Houston County.” Managed by the FWS “as part of the Upper Mississippi River National Wildlife and Fish Refuge, the Root River Tract sits to the east of Hwy. 26 between La Crescent and Brownsville.” The article notes that “the site includes 664 acres of hunting and farmland purchased in 2009 with money from the Land and Water Conservation Fund.”

SHOOTING OF CALIFORNIA CONDOR IN ARIZONA UNDER INVESTIGATION. [Grand Canyon \(AZ\) News](#) (10/21) reports that FWS special agents and Arizona Game and Fish Department “law enforcement personnel are investigating the lethal shooting of an endangered California condor that occurred on the Kaibab Plateau in northern Arizona Oct. 8.”

MAN CLAIMS HE BLOCKED ARIZONA BIKE TRAIL TO PROTECT OWLS. The [AP](#) (10/21, 344K) reports that “the 81-year-old man who blocked a Flagstaff-area mountain bike race says he did it to protect an endangered owl species.” J.D. Protiva “appeared in federal court Monday on misdemeanor charges related to blocking the Elden Springs Trail before the August race.” Protiva says “the path goes through protected Mexican spotted owl habitat.”

ADDITIONAL COVERAGE: MONARCHS GET HELP AS CALIFORNIANS PLANT DROUGHT-TOLERANT MILKWEED. Additional coverage that monarch butterflies could benefit from the California drought was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Albuquerque \(NM\) Journal](#) (10/21, 259K), [KABC-TV Los Angeles \(CA\)](#) Los Angeles (10/21, 413K), and [WRC-TV Washington \(DC\)](#) Washington (10/21, 345K).

FWS INVESTING IN PROJECTS TO STRENGTHEN ATLANTIC COASTAL DEFENSES AGAINST FUTURE STORMS. In an op-ed for the [New Haven \(CT\) Register](#) (10/20, 172K), Wendi Weber is Northeast regional director for the FWS, writes that “federal money for Hurricane Sandy recovery has spurred an unprecedented effort to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms.” She notes that the FWS and other Interior Department “agencies are investing \$787 million in hundreds of projects to clean up and repair damaged refuges and parks; restore coastal marshes, wetlands and shoreline; connect and open waterways to improve flood control; and increase our scientific understanding of how these natural areas are changing.” According to Weber, “these investments support the goal of President Barack Obama’s Climate Action Plan to make communities more resilient to increasingly intense storms predicted with a changing climate.”

National Park Service:

MUSIC VIDEO CELEBRATES 100 YEARS OF NPS. The [New Bedford \(MA\) Standard-Times](#) (10/20, 53K) reports on “a locally made music video that celebrates 100 years of the National Park Service.” According to the article, “published on Oct. 15, the Centennial video has more than 18,500 views on the NPS facebook page and more than 530 on the Youth Ambassador Program’s YouTube page, the group that made it.” NPS Director Jon Jarvis, “who met the traveling crew in Washington, D.C., makes a cameo appearance in the video

to say, 'It's great to celebrate a hundred years with YAP!'"

Kentucky Lieutenant Gov. Luallen Touts National Parks. The [Louisville \(KY\) Courier-Journal](#) (10/20, 414K) reports that Kentucky Lieutenant Governor Crit Luallen on Tuesday "touted the economic impact of Kentucky's travel and tourism industry" in "an address to the Kentucky Travel Industry's annual conference in Bowling Green." Following her remarks, Luallen "recognized five national parks in Kentucky as part of the National Park Service Centennial in 2016." She "presented proclamations to representatives of the parks."

Couple Visiting 59 National Parks In 12 Months. The [Cleveland Plain Dealer](#) (10/21, 1.03M) reports that "Cole and Elizabeth Donelson, St. Louis natives, are two months into their grand adventure: 59 parks in 12 months – part celebration of the National Park Service's 100th anniversary, part exercise in youthful spontaneity." Their goal is to "see the best of the United States, and inspire others – particularly other millennials – to do the same." The article notes that "their mission meshes well with a new campaign of the Park Service, which celebrates its centennial anniversary in 2016."

WATCHDOG RELEASES REPORT ON NPS CONSTRUCTION FUNDS. The [Greenwire](#) (10/20, Subscription Publication) reports that "a federal watchdog yesterday released a disputed report alleging that the National Park Service is violating congressional intent by dipping into its construction account to cover security, air testing and other reimbursable expenses that should have been paid up front by other agencies." The NPS construction account is "only for expenses that relate to 'construction, improvements, repair or replacement of physical facilities,'" the Department of the Interior's Office of Inspector General report said, "citing the language of the agency's appropriation." However, "the OIG found that 17 out of a sample of 21 interagency agreements that used Park Service construction funds to cover reimbursable costs did not appear to include 'a valid construction purpose.'" The article notes that "these included \$4.9 million that NPS spent from its construction account on security at the Department of the Army's Memorial Day and Independence Day concerts at the Capitol in 2014 and \$37.5 million over seven years on air quality monitoring at national parks that will be paid back to NPS by U.S. EPA."

HOUSE COMMITTEE PASSES GRAND CANYON BISON MANAGEMENT ACT. [Grand Canyon \(AZ\) News](#) (10/21) reports that the U.S. House Natural Resources Committee approved the Grand Canyon Bison Management Act "allowing the Arizona Game and Fish Department (AZGFD) to better manage and conserve the bison population within the park Oct. 8." The legislation "requires the U.S. Department of Interior and the Arizona Game and Fish Commission to coordinate on a plan that allows sportsmen holding a valid state-issued hunting license to assist in management of the bison population within the park."

THUNDERSTORMS CAUSE FLOODING, MUDSLIDES IN DEATH VALLEY NATIONAL PARK. The [Greenwire](#) (10/20, Subscription Publication) reports that "mudslides and flooding after severe thunderstorms in Death Valley National Park on Sunday trapped three park rangers and about 20 visitors – many out to see a clear night sky – in a volcanic crater overnight." Park spokeswoman Abby Wines said "the stranded people spent the night in Ubehebe Crater, maintaining contact with park headquarters until they were able to reach safety yesterday morning." The article notes that "no injuries were reported, but Wines said the unexpectedly severe storms knocked out power in the area, damaged and closed several roads, and filled a historic visitor's center with several feet of mud and debris."

NPS SET TO CONTINUE WITH TREE-CUTTING AT POTOMAC CAMPGROUND. The [Bethesda \(MD\) Magazine](#) (10/21) reports that "after complaints from two nearby residents and a call from County Council member Roger Berliner temporarily halted tree-cutting operations Friday at a Potomac campground, the National Park Service said it plans to resume the tree-cutting and will probably do so in the next few days." John Noel, deputy superintendent for the C&O Canal National Historical Park, said that "he went to the Swain's Lock Recreation Site to examine the 26 trees proposed to be removed and 32 others proposed to be pruned at the site's campground." Noel "agreed that the trees are rotting and in danger of falling on park users below."

STUDENTS GO ON CANOE TRIP AROUND WOLF LAKE. The [Merrillville \(IN\) Post-Tribune](#) (10/20, 105K) reports that "all classes in Grades 6 through 9 at George Rogers Clark Junior-Senior High School in Hammond recently experienced a unique field trip right in their own back yard — a canoe trip around Wolf Lake located only a few blocks from the school." The trip was "made available through a partnership with the National Park Service, Dunes Learning Center and Wilderness Inquiry."

NEW COLONIAL PARK SUPERINTENDENT THANKS COMMUNITY FOR ADVOCACY. The [Newport News](#)

[\(VA\) Daily Press](#) (10/20, Williams, Subscription Publication, 201K) reports that the Colonial National Historical Park's new Superintendent, Kym Hall, thanked the community for its opposition to Dominion's Skiffes Creek transmission project in her first appearance before the York County Board of Supervisors on September 1. "The view should be protected," she said.

DEVILS TOWER TO HOST STAR VIEWING PARTIES. The [Casper \(WY\) Star-Tribune](#) (10/21, 115K) reports that the NPS "announced that Devils Tower will host a series of star viewing parties October through December." The article notes that "the eight parties are free of charge, and will last approximately two hours."

NPS URGED TO RECONSIDER RACIST NAME FOR A WASHINGTON LAKE. In an op-ed for the [High Country \(CO\) News](#) (10/21, 74K), Glenn Nelson writes that Washington state officially calls Howard Lake "by what is believed to be its oldest known name," but the federal government "recognizes the lake by a name that causes the jaws of most people of color to drop: Coon Lake." Nelson notes that "the federal government did not follow the usual course of supporting the state's action, mostly because of opposition from the National Park Service, which manages the area that contains the lake." The NPS, "acting on research from its North Cascades unit, originally defended its stance by claiming that there was ambiguity around the use of the term 'coon.'" According to Nelson, "in the years leading up to its 2016 centennial, the Park Service has done a lot of talking and writing about the need for diversity and inclusiveness." He concludes that "it's past time for the Park Service to back away from its misguided opposition, encourage Secretary Jewell to come to its rescue, and allow another black life to matter."

US Geological Survey:

USGS SEISMOLOGIST QUESTIONS PREDICTION OF 99.9 PERCENT CHANCE OF MAJOR LOS ANGELES EARTHQUAKE IN 3 YEARS. The [Southern California Public Radio](#) (10/20, 68K) reports that "a controversial new study from NASA's Jet Propulsion Laboratory" claims "there is a 99.9 percent chance of an earthquake" in Los Angeles "between magnitude 5 and 6.3 in less than three years." The study, published earlier this month by the American Geophysical Union's Earth and Space Science journal, has "taken many in the seismic community by surprise." Lucy Jones with the USGS said the "methodology doesn't fully explain the prediction, and the study doesn't adequately address this either." Jones said that, according to the USGS' "models, there is only an 85 percent chance of a magnitude 5 or 6 quake in the same region over a three-year period."

Top National News:

MEDIA ANALYSES: TRUDEAU'S ELECTION LIKELY TO FOSTER IMPROVED US-CANADA TIES. On the day after Justin Trudeau became Canada's Prime Minister-designate, media reporting universally characterized the election results as a likely boost for US-Canada relations. Coverage focuses on Trudeau's promise of a less combative foreign policy style and the perception that he will be more willing to accept a US rejection of the Keystone pipeline. Reporting – including a combined 2 minutes and 50 seconds on the three broadcast networks – also indicates that despite Trudeau's decision to withdraw his aircraft from the US-led coalition against ISIL, he is likely to be a more willing partner on climate change and other issues.

[ABC World News](#) (10/20, story 9, 0:20, Muir, 5.84M) reported President Obama on Tuesday congratulated Trudeau, who "swept into power with a message of optimism saying Canada beat fear with hope." [USA Today](#) (10/21, Korte, 5.23M) reports Obama made the phone call "in an attempt to lock down continued cooperation with the northern neighbor on trade, terrorism, and climate change." The White House, according to USA Today, "signaled that not much would change in the relationship" between the neighbors following the Liberal party's victory. [CBC News](#) (10/20, Fitzpatrick, 225K) reported on its website that the White House indicated Obama and Trudeau "agreed on the importance of deepening the 'already strong' bilateral relationship" between the countries "and committed to strengthen joint efforts to promote trade and to combat terrorism and climate change."

[AFP](#) (10/21) reports the White House and current Prime Minister Stephen Harper "clashed over climate policy" and the Keystone pipeline. While White House spokesman Josh Earnest on Tuesday said "it would be shortsighted to reduce the relationship between our two countries to just one issue," Chuck Todd reported on [NBC Nightly News](#) (10/20, story 5, 2:05, Holt, 7.86M) that "we now have a Canadian government that is politically more in line with the American government." According to Todd, "Relations have been good but they have not been so great of late. Will they now get better? That is why Americans should care."

In an article entitled “5 Reasons The US Should Care About Canada’s New Prime Minister,” [USA Today](#) (10/21, Hjelmggaard, 5.23M) lists ways in which Trudeau “is likely to affect policies in Canada and the United States.” According to USA Today, Trudeau “promised to improve strained relations” with Obama and said “he wants to find constructive ways of working with Washington on other issues.” Another [USA Today](#) (10/21, Kovac, 5.23M) article reports that Trudeau and Harper “differ in their approach to foreign policy,” with the incoming leader being less vocally pro-Israel and more focused on environmental issues.

In an analysis piece, [Bloomberg News](#) (10/21, 2.66M) says “a prompt rejection” of the Keystone pipeline by Obama “would make the job easier” for Trudeau “as he seeks to reset the country’s relationship with the US, which he says was damaged” by Harper. According to Bloomberg, Trudeau “could use a quick US denial” of the pipeline “to focus discussions” with Obama “on issues such as trade and climate.” Bloomberg notes there has been “speculation” that Obama “would reject the pipeline shortly after the Canadian election.” However, [The Hill](#) (10/20, Cama, 471K) reported, Secretary of State Kerry said Tuesday that Canada’s election results will not change the White House’s approach to the Keystone issue. Kerry said the decision “is being based on the merits and countervailing balance of all the input that has come from a very exhaustive agency review.” Kerry reiterated that he seeks a decision “as fast as possible.”

[Reuters](#) (10/21, Mason, Rampton) reports the White House indicated it would like the new Canadian government to take increased actions to address climate change. Earnest said that while Canada has “made a substantial and important commitment” ahead of the Paris climate talks, “We believe that it’s possible that there is more that Canada can do in this regard.”

However, writing for [Mother Jones](#) (10/20, 758K), Suzanne Goldenberg claimed “those hoping for a U-turn in Canada’s climate change policy...are in for a reality check.” According to Goldenberg, while Trudeau does not align directly with many of Harper’s views or policies, “it would be a mistake” to see the new Canadian leader or his party “as climate champions.” In [Slate](#) (10/20, 1.38M), Joshua Keating argued that at least with regard to the Keystone pipeline, Trudeau does present a change from Harper. Keating characterizes Trudeau as “a very different leader” from Harper and says he will make the Keystone pipeline less of a focal point of US-Canada relations. According to Keating, Trudeau “has described his support for the pipeline as ‘steadfast,’ but it’s clearly not the make-or-break issue for him that it was for Harper.”

The [Wall Street Journal](#) (10/21, Vieira, Subscription Publication, 5.95M) reports Trudeau said he will work to restore Canada’s reputation of defending minorities and become more involved in multilateral policy making. At a rally in Ottawa, Trudeau said, “To this country’s friends around the world, I want to say this: Many of you have worried Canada has lost its compassionate and constructive voice in the world over the past 10 years. I have simple message for you: We’re back.” The [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) similarly reports that Trudeau “is likely to present a very different face to the world” than Harper, “but the most noticeable difference will probably be in tone.” Trudeau has vowed to “put an end to Mr. Harper’s often belligerent style of politics and diplomacy.” Trudeau said Tuesday that “a positive, optimistic, hopeful vision of public life isn’t a naïve dream – it can be a powerful force for change.” The Times says Trudeau has previously indicated a desire to end Harper’s reliance on military solutions and tough rhetoric, and instead focus on working within international organizations, such as the United Nations.

The [CBS Evening News](#) (10/20, story 10, 0:25, Pelley, 5.08M) reported, “Canada took a left turn” as “Trudeau and the Liberal Party rode in on a landslide.” In a [USA Today](#) (10/21, 5.23M) op-ed, author David Andelman says “most of the reasons” Canadian voters chose Trudeau to lead the country “boiled down to one fundamental: The Liberal Party leader was simply nicer than his opponent. And most Canadians believe they are, too.” Similarly, the [Wall Street Journal](#) (10/21, Subscription Publication, 5.95M) editorializes that Canadians wanted a change from the Harper government, which had become isolated and sought to restrict debate. The [New York Times](#) (10/21, Subscription Publication, 11.82M) agrees, editorializing that Trudeau’s election “shows how ready Canadians were to emerge from a decade under the Conservative government of the secretive and combative Stephen Harper.”

[AFP](#) (10/21) reports Trudeau told Obama on Tuesday that Canadian fighter aircraft will withdraw from the US-led coalition against ISIL, but the new Canadian leader did not present a timeline for the move. In a front-page story, the [Washington Post](#) (10/21, A1, Brown, 6.76M) reports Trudeau said, “I committed that we would continue to engage in a responsible way that understands how Canada has a role to play in the fight against ISIL,” adding, that Obama “understands the commitments I’ve made around ending the combat mission.” According to the Post, a “senior Administration official,” said Obama and Trudeau discussed joint anti-terrorism

efforts and, "We expect Canada will continue to be a valuable contributor to the 65-member global coalition" against ISIL.

Trudeau's Win Could "Lead To Full Marijuana Legalization" In Canada. [USA Today](#) (10/21, Hughes, 5.23M) reports Trudeau's win "may lead to full marijuana legalization" for Canada. According to USA Today, Trudeau promised during his campaign that "Canada would create a system to tax, regulate and sell marijuana, along with stiff penalties for anyone giving pot to children or caught driving while stoned." USA Today says American "cannabis activists hailed Tuesday's election as a milestone, suggesting that a day may soon come when cross-border trade talks include...legal weed."

[AFP](#) (10/21) reports Trudeau's "promise to legalize recreational cannabis" will likely "help the nation's nascent medical marijuana industry." Investors, according to AFP, "are betting" they could build on companies' current production of marijuana for medical use and "quickly scale up to serve recreational pot users too, once Trudeau makes good on his promise."

NYTimes Analysis: Trudeau Is "No Dynast" Despite Father Being Former Prime Minister. In a 1,350-world profile piece, the [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) reports that despite there being "many easy parallels to draw between" Trudeau and his father, former Prime Minister Pierre Elliott Trudeau, Canada's incoming leader "is no dynast who slipped effortlessly into a family political machine." The Times notes that Trudeau "did not even enter politics until 18 years after his father gave it up, and seven years after his father's death." According to the Times, Trudeau "built his own cadre of advisers, mostly from his own generation" and sometimes "chose more difficult roads – partly, it appears, to show he had not been handed a life in politics on a platter."

In the [Washington Post](#) (10/21, 6.76M) "Reliable Source" blog, Emily Heil says Trudeau and his wife, Sophie Grégoire-Trudeau, "have a lot in common with the Obamas." According to Heil, "they'd have lots to talk about, apart from liberal politics, like fitness!"

IN APPARENT REVERSAL, BIDEN SAYS HE PRIVATELY URGED OBAMA TO AUTHORIZE UBL RAID.

Vice President Biden did not reveal Tuesday whether or not he will enter the Democratic presidential race, but his remark that he privately advised President Obama to launch the 2011 raid that led to the death of Osama Bin Laden – which contradicted Biden's past public comments that he advised against the raid – is being interpreted as a possible line of attack against Hillary Clinton. All three broadcast networks reported on the statement, combining for nearly eight minutes of coverage, and ABC led with it. The tone of the coverage is mixed, with most reports calling it a reversal, and some concluding that Biden may be undercutting his own reputation for candor.

There was also Twitter discussion of Biden's remarks. Anthony De Rosa, a digital producer for The Daily Show who has nearly 89,000 followers, [tweeted](#), "Biden sounds like Brian Williams with his evolving recollection of the Bin Laden raid." Jonathan Martin of the New York Times [tweeted](#), "@vp today signals: he'll run & it'll get negative FAST or: he's not happy about being sidelined." His Times colleague Maggie Haberman [tweeted](#), "Biden's subtle digs at Clinton indicate that if he runs it'll be ugly." In addition, the hashtag [#BidenWatch](#) emerged on Twitter, with Fox Business Network's Trish Regan [tweeting](#), "Sure sounds like he's running...", Mashable's Juana Summers [tweeting](#) Biden's Wednesday official schedule, and Al Jazeera America's David Shuster [tweeting](#) that "Hallie Biden, widow of the late Beau Biden, says her family supports a Presidential campaign '100%'".

[ABC World News](#) (10/20, lead story, 2:50, Muir, 5.84M) reported that "as the pressure mounts for Joe Biden to decide whether he'll run...many [are] now asking, did he change his story?" ABC (Karl) added, "Biden has described Obama's decision as especially courageous because in that key meeting when it came time to decide, most of the President's advisers, including Biden himself, were not in favor of the raid." On Tuesday, he "offered an entirely different account of what happened on that fateful day." Biden was shown saying, "So as we walked out of the room and we walked upstairs, I told him my opinion that I thought he should go but to follow his own instincts. But it would have been a mistake, imagine if I had said in front of everyone, 'don't go, or go,' and his decision was a different decision." Karl: "But until today, Biden has said he told Obama and his team that night to hold off on the raid."

The [CBS Evening News](#) (10/20, story 6, 2:05, Pelley, 5.08M) reported that Biden "sounded more like a presidential candidate, talking up his foreign policy credentials, doing some rewriting of his own history and firing a shot over the bow of the Democratic frontrunner." CBS' Nancy Corden added that Biden "never

mentioned Clinton by name, "but it was all too clear the comparison he was making when he said this about his stature overseas." Biden: "I will get sent to go speak to Putin or go speak to whomever, and it's because the secretary of state, we've had two great secretaries of state, but when I go, they know that I am speaking for the President." Cordes added that Biden left Clinton "out of his story" about the Bin Laden raid.

[NBC Nightly News](#) (10/20, story 3, 2:35, Holt, 7.86M) also said of Biden, "If anything, he is beginning to sound more like a candidate, taking not-so-veiled swipes" at Clinton. NBC (Welker) added that Biden "said he and the President were in lock-step when it came to authorizing the raid against Bin Laden." The [AP](#) (10/21, Lederman) says Biden "backtracked on his previous claims to have advised Obama against the raid" in "an unusual reversal."

[Bloomberg Politics](#) (10/21, Talev, 247K) reports that in his remarks at an event honoring his vice presidential predecessor Walter Mondale, Biden "portrayed himself as the central player" in the Administration "on everything from working with congressional Republicans to the killing" of Bin Laden. [USA Today](#) (10/21, Singer, 5.23M) says Biden "revised his account of his advice" to Obama after Mondale said he "would only disagree with President Jimmy Carter in private during his tenure as vice president."

The [New York Times](#) (10/21, Harris, Martin, Subscription Publication, 11.82M) says with the remark, Biden "sought...to dispel" the notion that he had opposed the raid, which "might dog him on the campaign trail." Biden said he "never gave his own views on controversial issues until the rest of the cabinet had spoken, mindful that he did not want the rest of the team to see a difference between his opinion and that of the president." Biden said only then-Defense Secretary Robert Gates and then-CIA Director Leon Panetta "had expressed definitive views on the raid," and "pointedly did not mention" Clinton, who "has said that she was in favor of the raid."

The [Washington Post](#) (10/21, Jaffe, 6.76M) says Biden "seemed to change his account" with a revision that "seems designed to buttress his qualifications to serve as commander-in-chief." But Biden "seems to have contradicted his earlier memories of the final meeting before the bin Laden raid." The [Wall Street Journal](#) (10/21, Nelson, Nicholas, Subscription Publication, 5.95M) says Biden cast himself as Obama's chief adviser on many issues, and sought to downplay Clinton's advisory role as secretary of state. The [Los Angeles Times](#) (10/21, Memoli, 4.07M) says Biden used the event "to highlight his close relationship with President Obama that would be at the heart of Biden's potential presidential campaign."

The [New York Daily News](#) (10/21, Joseph, 3.75M) says Biden's "new details make him out to be a supporter of the high-stakes raid that killed Bin Laden – a big shift from the common narrative that he resisted it, one Clinton's allies have hinted could be a main attack line if Biden does jump into the race." The [Boston Globe](#) (10/21, Linskey, 1.1M) says Biden "has been on record recommending against the move."

[Politico](#) (10/20, Doveve, 942K) says Biden "contradicted" his own previous accounts as well as "what Obama himself said about the decision during his third 2012 debate with Mitt Romney." The President said at the time, "Even some in my own party, including my current vice president, had the same critique as you did." [The Hill](#) (10/20, Fabian, 471K) reports White House Press Secretary Josh Earnest "dodged multiple questions" about Biden's remarks, "saying he would not comment on private conversations between the president and the vice president."

[Politico](#) (10/20, Wheaton, 942K) writes that "for a politician who projects authenticity," Biden "seemed to stumble around the truth" Tuesday, not just on the Bin Laden raid but also in claiming "to have veto power over nominations and to speak for the president with more authority than other top officials do." [TIME](#) (10/20, 19.55M) says on its website that Biden's "narrative runs in the face of the one Biden himself offered in 2012." The [Daily Caller](#) (10/20, Ross, 375K) says Biden "contradicted himself" with the remarks. Gregory Krieg of [Mic](#) (10/20, 1.5M) writes that Biden "really sounds like someone who is running for president." [The Blaze](#) (10/20, 1.66M), the [CNN](#) (10/20, Koran, 5.17M) website, [Roll Call](#) (10/20, Bennett, 113K), and

SEN. MURKOWSKI SEES TOUGH ROAD FOR INTERIOR NOMINEE. [Politico Pro](#) (10/20, Subscription Publication) reports that Senate Energy and Natural Resources Committee Lisa Murkowski said that Interior Department pick Kristen Sarri would “have a lot of explaining to do at a hearing on six nominees today.” While Murkowski was “pleased that President Barack Obama had renamed Mount McKinley this summer to Denali, the Alaska Republican said she was still frustrated with the Interior Department’s ‘heartless decision’ to deny a road in King Cove.” Murkowski also “criticized Interior for closing off oil production in Alaska and last week’s cancellation of offshore sales and lease extension.”

Meanwhile, the [Daily Caller](#) (10/21, Barton, 375K) reports that Murkowski is “torn between leaving the Department of the Interior’s independent watchdog post vacant, or confirming President Barack Obama’s nominee crippled by recurring allegations of ‘playing games with Congress.’” She said, “I strongly believe that Interior needs a permanent [inspector general], and I’m disappointed the administration has let the position go unfilled for six and a half years.” Murkowski continued, “But I am also committed to ensuring that the individual we confirm is fully independent ... The tenure that you have been involved with thus far in this position has been marked by controversy.”

Additional coverage was provided by [The Hill](#) (10/21, Henry, 471K), [KTOO-FM](#) Juneau, AK (10/20), and [Alaska Public Radio Network](#) (10/20, 2K).

HISTORIC \$186 MILLION SETTLEMENT WITH CHOCTAW, CHICKASAW NATIONS LAUDED. The [Indian Country Today Media Network](#) (10/20, 32K) reports that “tribes and the U.S. Department of the Interior heralded the outcome of a \$186 million settlement signed earlier this month between the federal

government, the Choctaw and the Chickasaw nations to solve a longstanding land trust dispute as a new chapter in relations.” During the October 5 signing ceremony, Chickasaw Nation Governor Bill Anoatubby “gave a nod to the impetus provided” by Interior Secretary Sally Jewell. He said, “We respect the vital role Secretary Jewell has taken in helping make this historic settlement a reality. We are confident she will play an essential role in our efforts to continue strengthening the relationship between our governments, because we believe she has a unique appreciation for the mutual benefits of a positive government-to-government relationship.” Jewell said, “Today’s agreement is the latest addition to a record number of longstanding settlements resolved under this Administration. This historic settlement is the start of a new chapter in our trust relationships with the Chickasaw and Choctaw Nations, and underscores our commitment to fulfilling those responsibilities to Native communities across the country.”

U.S. TREASURY CONFIRMS \$20B BALANCE FOR LWCF. [E&E Publishing](#) (10/21, 705) reports that “the Land and Water Conservation Fund that expired earlier this month for the first time in its 50-year history currently contains nearly \$20 billion, according to the U.S. Treasury, which maintains the program’s balance sheets.” But “whether that is ‘real’ money available to be spent on federal land acquisitions, private land easements and state recreation projects depends on whom you ask.” The article notes that “the \$19.8 billion can only be reduced until Congress reauthorizes the program.”

Additional coverage of the LWCF was provided by the [Durango \(CO\) Herald](#) (10/20, 31K).

PROPOSED DESIGNATIONS OF THREE NATIONAL MONUMENTS IN CALIFORNIA DESERT RAISES CONCERNS ABOUT “LAND GRAB.” [Fox News](#) (10/20, 8.91M) reports that “a group of off-roaders and others are attempting to fight a proposed designation of three national monuments in the California desert under the Antiquities Act.” The Obama Administration is “considering using the federal Antiquities Act to bypass the legislative process at the request of Sen. Dianne Feinstein, whose efforts to have the Mojave Trails and Castle Mountain, both in the Mojave Desert, and a section of the Sonoran Desert named federal sites were repeatedly blocked by Republicans.” According to the article, “a White House move could put the land under federal control, which critics say could cut funding for upkeep or even restrict access.”

UNMANNED HELICOPTER OFFERS NEW WAY TO FIGHT WILDFIRES. The [Voice of America](#) (10/21, Banse, 32K) reports that the K-MAX “unmanned, water-dropping” helicopter was tested by the US government. The helicopter can fly through limited visibility. Brad Koeckertiz, the unmanned aircraft program manager with the US Department of Interior, says that unmanned helicopters such as the K-MAX will be integrated into routine measures to fight wildfires over the next few of years. The article notes that the K-MAX helicopters have already been used by the US Marines in Afghanistan, to “resupply remote outposts at night” and replace “dangerous convoys on the ground.” The article notes that the growing uses for drones is also why the FAA is seeking to register all drones.

Additional coverage was provided by [Vertical Magazine \(CAN\)](#) (10/21).

JEB BUSH PROPOSES MOVING INTERIOR DEPARTMENT FROM D.C. To Western City. The [Las Vegas Sun](#) (10/20, Lucas, 199K) reports that “Republican presidential candidate Jeb Bush will unveil his proposals for Western land and resource management in a campaign stop in Reno on Wednesday morning, in a speech likely to resonate with conservative voters opposed to what they see as federal overreach in the Western states.” Bush is “expected to speak at 11 a.m. Wednesday at Rancho San Rafael Regional Park before appearing at a forum sponsored by the LIBRE Initiative at the College of Southern Nevada Cheyenne Campus in North Las Vegas at 6 p.m.” In the proposal, Bush will “call for moving the headquarters of the Department of Interior from Washington, D.C., to a city in the western United States like Denver, Salt Lake City or Reno and will say that as president he would direct federal agencies to give broad latitude to states to determine land-use issues.”

STUDY: ALASKAN WILDFIRES COULD EXACERBATE GLOBAL WARMING. The [Washington Post](#) (10/21, Mooney, 6.76M) reports that some greenhouse gas sources outside the scope of forthcoming UN climate talks are beyond governments’ control, such as raging peat fires in Indonesia this year, emitting “as much as Japan produces in a year from fossil fuels.” Elsewhere, a new study in Nature Climate Change reaffirms concerns about the emissions of northern fires in Alaska. The Post reports that “climate researchers are still trying to figure out how all of these factors will interrelate,” but fire is a “powerful determinant of how much carbon resides in land, rather than in the air, across our globe.”

INTERIOR’S VINE ACCOUNT HIGHLIGHTED. [Politico](#) (10/21, 942K) highlights the Interior Department

has a great vine account. Providing a link, Politico says "this is internet gold."

Empowering Native American Communities:

BIA RULE ANNOUNCES RULE GIVING TRIBES MORE CONTROL OVER ELECTIONS. [Law360](#) (10/20, 21K) reports that the BIA "on Monday announced its final rule for Native American tribal elections conducted by the U.S. Department of the Interior, saying the new rule will encourage tribes to take control of their elections and help protect the voting rights of tribe members living in urban areas." Assistant Secretary of Indian Affairs Kevin K. Washburn said "in a statement Monday that the rule will allow tribes to opt out of having the interior secretary conduct their elections."

The [Native American Times](#) (10/20, 337) reports that Washburn said, "Though many federal responsibilities concern the lands we hold in trust for tribes and Indian people, more than 55 million acres nationwide, the United States has a moral obligation to preserve connections between Indian people and their tribes that it once sought to destroy. For the future of Native nations and the health of Indian Country, American Indians in urban areas must work harder to maintain connections with their tribes. One important aspect of that relationship is participation in the civic and political life of their tribal governments. For that reason, our Secretarial election amendments seek to prevent tribal members living in urban areas from being inadvertently disenfranchised in Secretarial elections."

HEARING FOCUSES ON NATIVE HAWAIIAN ELECTION. The [AP](#) (10/21, Kelleher) reports from Honolulu that a federal court hearing began on Tuesday "in a lawsuit by people who want to put a stop to an election process that is underway for Native Hawaiians." The lawsuit, filed in August, "says it's unconstitutional for the state to be involved in a race-based election." The state "argues in court documents that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it's not involved in next month's vote to elect delegates for a convention to determine self-governance for Native Hawaiians." Tuesday's hearing "is focused on the plaintiffs' motion for a preliminary injunction," and the plaintiffs "want the judge to limit voter registration activities or stop the election altogether."

Additional coverage was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Navajo Times \(AZ\)](#) (10/21, 66K), and [Yahoo! News](#) (10/21, Kelleher, 5.98M).

INTERIOR SIDES WITH ALASKA NATIVE GROUP IN INVESTIGATION OF MASSACHUSETTS COLLEGE TRIBAL COLLECTION. The [AP](#) (10/21, 2.28M) reports that "a Massachusetts college was found in violation of a federal law regulating the possession and sale of potentially sacred artifacts following a complaint from an organization of Alaska Natives." The Interior Department said "an investigation substantiated the complaint against Andover Newton Theological School filed in June by the Sealaska Heritage Institute." The institute's president, Rosita Worl, said "the school possesses at least two southeast Alaska artifacts, including a Tlingit halibut hook that is considered sacred."

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/21, D'oro, 344K), the [Boston \(MA\) Herald](#) (10/21, 548K), the [Daily Mail \(UK\)](#) (10/21, 5.59M), the [Miami \(FL\) Herald](#) (10/21, 651K), [Minneapolis \(MN\) Star Tribune](#) (10/21, D'oro, 1.19M), [ABC News](#) (10/21, 3.97M), and the [Alaska Dispatch News](#) (10/20, 219K).

US ATTORNEY SAYS BIA OFFICER WAS JUSTIFIED IN DEADLY SPIRIT LAKE SHOOTING. The [AP](#) (10/21) reports that US Attorney Chris Myers "says" that an investigation by his office came to the conclusion that BIA Officer Terry Morgan was justified in shooting and killing "31-year-old Joseph Charboneau during a standoff with officers on June 16." The [Grand Forks \(ND\) Herald](#) (10/21, 100K) reports that the US Attorney's Office "said" the shooting was justified because Charboneau posed a "real and immediate" threat to officers and another person at the scene after he refused to put down his gun, which was pointed at the officers. The Grand Forks Herald reports that, as a result of the investigation, Federal prosecutors "will not file charges against" Morgan.

Additional coverage was provided by the [Dickinson \(ND\) Press](#) (10/21, 1K), the [Forum of Fargo-Moorhead \(ND\)](#) (10/21, 14K), [KXJB-TV Fargo \(ND\)](#) Fargo, ND (10/21, 18K), [KFGO-AM Fargo \(ND\)](#) Fargo, ND (10/20, 3K), [KXMC-TV Minot \(ND\)](#) Minot, ND (10/21, 1K), and [KFYR-TV Bismarck \(ND\)](#) Bismarck, ND (10/21, 1K).

CRIME JUMPS AFTER TRIBES CUT FROM BIA FUNDING. The [Los Angeles Times](#) (10/20, Romney,

4.0/M) reports on a "time of crisis for public safety on tribal lands." According to the article, "a federal law decades ago shifted the primary burden of criminal law enforcement on tribal lands in California and five other states to local authorities," but "many lack the resources to do the job and, in some cases, sufficient knowledge of tribal law and culture to win the trust of tribal members." After "tribes were cut off from steady funding for their own justice systems," crime has "flourished."

ADDITIONAL COVERAGE: YAKAMA NATION'S PETITION TO SELF-GOVERN APPROVED. Additional coverage that the BIA on Monday granted the Yakama Nation's petition for "retrocession" was provided by the [Bellingham \(WA\) Herald](#) (10/21, 101K), the [Clark County \(WA\) Columbian](#) (10/20, 86K), the [Washington \(DC\) Times](#) (10/21, 344K), the [Spokane \(WA\) Spokesman-Review](#) (10/20, 183K), the [Native American Times](#) (10/21, 337), the [Law360](#) (10/21, 21K), [KNDU-TV Yakima \(WA\)](#) Yakima, WA (10/21, 3K), and [KUOW-FM Seattle \(WA\)](#) Seattle (10/21, 15K).

GILLETTE'S SERVICE IN OBAMA ADMINISTRATION PRAISED. In an editorial, the [Bismarck \(ND\) Tribune](#) (10/21, 37K) lauds Jodi Gillette's service in the Obama Administration. According to the paper, Gillette's "positions gave her a voice in a White House that has seemed genuinely concerned about Native American issues."

Office of Insular Affairs:

ASSISTANT SECRETARY KIA'AINA PROPOSES MARSHALLS FUND CHANGES. [Radio New Zealand](#) (10/21, 1K) reports that "a top US official has submitted a proposal to the Senate and House to allow the people of Bikini to use resettlement and relocation funds outside of the Marshall Islands." Assistant Secretary for Insular Areas Esther Kia'aina says "it is an appropriate course of action to take regarding the welfare and livelihood of the Bikinian people." The Bikinians were "displaced by US nuclear weapons testing 70 years ago but are now looking at relocating again because of deteriorating conditions on Kili and Ejit Islands." According to the article, "in addition to cramped living quarters and a lack of suitable sustainable resources, the islands have been experiencing more frequent storms and king tides resulting in salt water inundation and the destruction of crops."

[Radio New Zealand](#) (10/21, 1K) reports that "a representative from Bikini Atoll says a proposal to allow people to use resettlement and relocation funds outside of the Marshall Islands is not wanted." Bikini liaison officer Jack Niedenthal says "the US should take full responsibility for any resettlement including providing extra financing." Niedenthal said, "We still got a ways to go, we still have to do some more lobbying and some more talking to people in Washington to make them understand that what's being proposed by the assistant secretary is what we view as 'Plan B'. It's not ultimately what we want in terms of helping our people."

CHINA STRENGTHENS RELATIONSHIP WITH PACIFIC REGION. The [Marianas Variety](#) (10/21) reports that "China and the Pacific Islands Forum Secretariat further strengthened their relationship on Friday when the two met at a ceremony to hand over \$1.05 million to assist the Pacific region." Forum Secretariat Secretary General Meg Taylor and Chinese Ambassador to Fiji Zhang Ping "attended the ceremony and delivered speeches respectively." Zhang "reiterated his nation's ongoing interest in the region saying, 'China attaches great importance to the South Pacific region. The Chinese side stands ready to enhance mutual understanding and cooperation with Pacific Island Countries and contribute to the development and capacity building in the region.'"

COUNTRIES IN PACIFIC URGED TO BEGIN TALKS ON CLIMATE MIGRATION. [Radio New Zealand](#) (10/21, 1K) reports that "all countries in the Pacific are being urged to start discussions on how to help people forced to move from low lying atoll nations like Kiribati and Tuvalu." According to the article, "184 million people worldwide were displaced by disaster between 2008 and 2014 and at special meetings in Geneva last week 110 countries gave the nod to a Protection Agenda for dealing with future migration challenges." The article notes that "the experiences of small island countries which face rising seas due to climate change helped form the global action plan under the Swiss Norwegian Nansen Initiative."

JOURNALIST SPEAKS AT UNIVERSITY OF GUAM ON CLIMATE ISSUES, CORRUPTION IN PACIFIC ISLANDS. The [Marianas Variety](#) (10/21) reports that "author and journalist Giff Johnson spoke to students at the University of Guam on Monday evening about climate change and development in the Pacific islands." Johnson's "lecture, entitled 'Idyllic No More: Pacific Island Climate, Corruption and Development

Uilemmas, is based on his latest book — a compilation of essays detailing the looming climate threat to the region, its booming fishing industry, and the U.S. nuclear test legacy in the Marshall Islands.” Johnson called attention to “climate-driven migration from remote pacific islands to Guam and mainland U.S.”

RISING SEA LEVELS THREATEN KIRIBATI. The [National Geographic](#) (10/21, 31.65M) provides a picture gallery of the threat of rising sea levels driven by climate change on Kiribati.

Tackling America’s Water Challenges:

WATER SCHEDULED TO BE RELEASED FROM NEW MELONES. The [Sonora \(CA\) Union Democrat](#) (10/21, 28K) reports that “more than 7 billion gallons of water is scheduled to be released from New Melones Reservoir beginning today to ensure flows in the Stanislaus River will keep temperatures cool enough for adult salmon migrating up the river to spawn this fall.” Oakdale Irrigation District and South San Joaquin Irrigation District said “it would benefit river conditions and fisheries, as well as the needs of agriculture and more than 200,000 residential customers downstream.” The article notes that “earlier this year, the irrigation districts sparred with the U.S. Bureau of Reclamation — which manages New Melones Reservoir — over spring pulse flows that they feared would leave as little as 147,000 acre-feet in the reservoir by the end of September.”

SAN JOAQUIN COUNTY BOARD OF SUPERVISORS VOTE TO OPPOSE DELTA TUNNELS PLAN.

The [Lodi \(CA\) News-Sentinel](#) (10/21, 14K) reports that “at a meeting on Tuesday, the San Joaquin County Board of Supervisors voted to adopt a resolution in formal opposition of California WaterFix, also known as the twin tunnels plan.” Supervisor Kathy Miller said, “The WaterFix is just a thinly veiled version of the former (Bay Delta Conservation Plan) and continues to push the fatally flawed twin tunnels, which will simply sacrifice one region of California for the benefit of another.”

Securing America’s Energy Future:

Renewable Energy:

ENVIRONMENTALISTS, DOMINION BOTH SUPPORT OFFSHORE WIND DEVELOPMENT. On his [Bacon’s Rebellion \(VA\)](#) (10/21, Bacon) blog, James Bacon reports on an Environment Virginia-sponsored webinar held Tuesday morning in which representatives from Dominion, environmental groups, and the McAuliffe Administration all voiced support for the utility’s experimental offshore wind farm project. For environmentalists, Bacon writes, the project represents the beginning of an industry that would increase the use of green energy along the Atlantic and displace fossil fuels. For the Governor’s office, it represents increased green energy coupled with economic development that takes advantage of the Newport News area’s shipbuilding industry.

Onshore Energy Development:

CHESAPEAKE ENERGY FINED \$2.1 MILLION FOR UNDER-REPORTING NATURAL GAS. The [Greenwire](#) (10/20, Subscription Publication) reports that the Interior Department on Monday “announced a \$2.1 million civil penalty against Chesapeake Energy Corp. for misreporting the amount of gas it produced and sold from American Indian lands in Oklahoma.” Chesapeake “failed to comply with a 2011 order that found ‘systemic errors’ in the company’s monthly production reports for more than 100 Indian leases, according to Interior’s Office of Natural Resources Revenue.” The company “agreed to amend the monthly reports, but it continued to maintain inaccurate information on the agency’s data systems, ONRR said.” The firm was “assessed a penalty based on ‘knowing or willful maintenance’ of the inaccurate information, ONRR said.”

Additional coverage was provided by [Politico](#) (10/21, 942K), [Natural Gas Intelligence](#) (10/21, Subscription Publication), the [Native American Times](#) (10/21, 337), and [KOKC-AM Oklahoma City \(OK\)](#) Oklahoma City (10/20, 1K).

TEXAS ENERGY REGULATOR OPPOSES STREAM PROTECTION RULE. [Law360](#) (10/21, 21K) reports that “Texas’ top energy regulator on Tuesday said the agency will oppose a U.S. Department of the Interior proposed rule aimed at better protecting streams and other waterways from nearby mining activity, saying the regulation encroaches on ground better left to the state.” Texas Railroad Commission Chairman David

Porter on Tuesday said the state would sign on to the multistate Interstate Mining Compact Commission's comments opposing the proposed waterway regulation."

USGS REPORT STATES EARTHQUAKES COINCIDE WITH OKLAHOMA OIL BOOMS. [KOCO-TV](#)

Oklahoma City (10/21, 93K) reports that "a study by the United States Geological Survey states that the earthquakes from the past 100 years seem to coincide with the oil boom in Oklahoma."

OKLAHOMA REGULATORS SHUT DOWN THREE MORE DISPOSAL WELLS. The [EnergyWire](#) (10/21, Subscription Publication) reports that "Oklahoma oil and gas regulators dealing with a dramatic increase in earthquakes near the pipeline hub of Cushing have shut down three more disposal wells." Also, "another well was shut down by the company that owns it after regulators said they were concerned it was drilled too deep." In addition, "the operators of seven other wells were told in a letter written Friday and released yesterday that they must reduce the volume of drilling waste that they inject deep underground."

OKLAHOMA LIMITS DISPOSAL WELLS AMID CUSHING QUAKES. [Reuters](#) (10/21, Hampton, Brandes) reports that Oklahoma's oil and gas regulator on Monday said it could impose new limits on all saltwater disposal wells within a 10-mile radius of Cushing. Reuters reports that Oklahoma now experiences as many as two magnitude 3.0 quakes per day, up from two per year. Thirteen wells have been ordered shut and approvals for new wells have been halted, Reuters reports. Scientists told Reuters that shutting wells could ease tectonic disruption in Oklahoma.

STUDY: FRACKING CAN CAUSE METHANE LEAKS IN NEARBY ABANDONED OIL WELLS. [Reuters](#) (10/20, Valdmanis) reported that according to a study published Tuesday in the Water Resources Research journal, fracking can cause methane leaks in nearby abandoned oil wells. The methane leaks could be a large source of unrecorded greenhouse gas emissions, according to the study. The study said that energy companies could reduce the probability of such methane leaks by trying to identify abandoned wells before they begin fracking, although the task could be difficult due to large numbers of unmarked abandoned wells.

BLM CRITICIZED FOR FAILING TO PRODUCE PICTURES UNDER FOIA REQUEST. For the [Fairfield \(MT\) Sun Times](#) (10/21), Darryl L. Flowers criticizes the BLM for failing to provide pictures in connection with "the proposed Solenex, LLC natural gas well on public lands in the Lewis and Clark National Forest" that were requested under the Freedom of Information Act. The paper received "sixteen photos" and "two photos were missing." He notes that "curiously, the two omitted photos were the only ones that included a person in the photos."

Offshore Energy Development:

FEDS INVESTIGATE WORKER'S DEATH ON DRILLSHIP CONTRACTED BY CHEVRON. [Fuel Fix \(TX\)](#) (10/20, Dlouhy, 7K) reports that officials from the Bureau of Safety and Environmental Enforcement and the Coast Guard are investigating "the death of a worker on a drillship in the Gulf of Mexico that was preparing to bore a well for Chevron." Fuel Fix says that "the Pacific Santa Ana drillship was just beginning operations for Chevron in about 4,800 feet of water at the site and had not yet penetrated the sea floor when an employee of that drilling contractor was fatally injured." Fuel Fix adds that Chevron has a 36 percent working interest in the Keathley Canyon well-leasing block where the incident occurred, an area where "Chevron outlined ambitions to drill up to seven wells" earlier this year.

The [AP](#) (10/21) reports that Amy Roddy, spokeswoman for Pacific Drilling SA, the ship's owner, "said the company is not releasing any details about the man to respect his family's privacy. She also refused to disclose how the man died or details of the accident, citing an ongoing investigation."

[NASDAQ](#) (10/20, Sider) reports that Chevron has contracted the ship since 2012. The [New Orleans Times-Picayune](#) (10/21, Larino, 718K) adds that "operations have been shut down and personnel remain onboard, according to the drillship's operator."

[Offshore Engineer](#) (10/20, Leon) reports that "the ship was to use its dual gradient drilling functions for Chevron's Anchor-1 prospect last year in Green Canyon block 807, but the well was junked due to mechanical failures. However, in January of this year, Chevron hit high quality oil pay in multiple Lower Tertiary Wilcox Sands at a second Anchor well also drilled by the Pacific Santa Ana."

The [Dow Jones Newswires](#) (10/21, Sider) reports that this is the first death related to offshore drilling operations in the Gulf of Mexico this year.

[Reuters](#) (10/21), [gCaptain](#) (10/21, 2K), [Upstream Online](#) (10/21, Schmidt, Brenner, 20K), and [Maritime Executive](#) (10/20, 21) also cover the story.

BRIARCLIFFE ACRES VOTES AGAINST OFFSHORE DRILLING. The [Myrtle Beach \(SC\) Online](#) (10/21, 36K) reports that “in a storm of debate over offshore drilling, Briarcliffe Acres surfaced as the latest coastal town to join a united front against seismic testing and drilling for oil and natural gas off of South Carolina’s beaches.” According to the article, “missing councilwoman Abby Stewart, who has been with family on the west coast, the town council unanimously passed a resolution Monday, joining 23 other S.C. coastal towns in a stance against offshore drilling.”

SHELL VESSEL RESCUES FRENCHMAN, CAT FROM SAILBOAT STRANDED IN SEAS NEAR ALASKA. The [AP](#) (10/21, Thiessen) reports that a Frenchman and the cat tucked inside his clothing were rescued on Tuesday after he leapt from his sailboat to a waiting rescue ship sent by Shell. The man activated a location beacon in the high seas south of Alaska and told the Coast Guard his sailboat had lost its rudder and rigging in the high winds and 20-foot waves. The Coast Guard contacted Shell’s oil drilling rig, the Polar Pioneer, which is on its way to Port Angeles, and the rig “sent a support ship, the Tor Viking, to rescue the sailor.” The AP reports that “it wasn’t immediately clear if the man would continue with the Shell ships to Washington state.”

CUNNINGHAM: INTERIOR DEPARTMENT OFFICIAL SHUTS THE DOOR ON ARCTIC DRILLING. In an analysis of the Interior Department’s recent decision on the future of Arctic drilling, [Oil Price](#) (10/21, 2K) reporter Nick Cunningham writes the Interior Department’s decision to cancel lease sales through 2017 “leaves almost no possible pathway for an oil company to drill in the Arctic for years to come, perhaps killing off drilling for a decade or so at a minimum.” Cunningham goes on to write that “it was likely that there wouldn’t have been new drilling in any event, given Shell’s decision and current market conditions, but Interior’s decision officially shuts the door on the Arctic in the medium-term.”

Casey: Interior’s Actions On Arctic Drilling Trends “Toward A Permanent Clampdown.” [CleanTechnica’s](#) (10/20, 15K) Tina Casey writes that “in the absence of local regulations, the Feds are the only game in town and it seems that the Arctic’s role in the US economy is too important to trust to compliance by oil companies.” Casey adds that, even though the Interior’s actions last week on Arctic drilling may be “only temporary, but the trend is toward a permanent clampdown.”

4-Traders: Federal Government To Blame For Low Arctic Drilling Interest. In an op-ed piece on the Interior’s Arctic drilling decision, [4-Traders](#) (10/21, 5K) writes the Federal government’s “difficult” regulatory obstacles is to blame for the lack of interest among oil companies to explore for oil and natural gas in the Arctic. 4-Traders writes that the “demand for oil and natural gas isn’t going away, so energy domestic exploration must continue in the Arctic and elsewhere. But as we’ve seen, by putting up unnecessary regulatory hurdles, regulators can cause job and economic growth opportunities to be missed.”

America’s Great Outdoors:

Bureau of Land Management:

BLM TO REVIEW HAGERMAN-HAILEY TRANSMISSION LINE. [Boise \(ID\) State Public Radio](#) (10/21) reports that the BLM will review the Hagerman to Hailey transmission line, paying “special attention to the greater sage grouse in the area.” Stacey Baczkowski, a biologist with Idaho Power, says “the company has been working with the BLM for the last few years to make sure the line is built with the bird in mind.” Baczkowski says “the power company plans to build the new transmission line as close to the current one as possible, and will follow BLM rules about construction during sage grouse mating times.”

UTAH WATER DISTRICT RAISES CONCERNS ABOUT BLM REVISION TO LAND-USE PLAN. The [Deseret \(UT\) News](#) (10/21, 407K) reports that “federal policies that either aim to instill more oversight of water or deny access altogether have some Utah leaders frothing over what they say is a repeated pattern of overreach that threatens local economies and livelihoods.” Ron Thompson, general manager of the Washington County Water Conservancy District, said “possible revisions to a land-use plan by the Bureau

or Land Management in Washington County have severe ramifications should one particular approach be adopted.” Thompson said “the BLM — under one option — is ignoring key considerations that went into the passage of the bill, including water supplies being left unhindered and right of way corridors left intact.”

ADDITIONAL COVERAGE: HELICOPTER CRASHES NEAR SEARCHLIGHT DURING CATTLE ROUNDUP. Additional coverage of the helicopter crash near Searchlight during a cattle roundup was provided by the [Las Vegas Review-Journal](#) (10/21, 378K).

Fish and Wildlife Service:

CONSERVATION LEADERS ATTEND NATIONAL CONSERVATION SUMMIT. [KYTV-TV](#) Springfield, MO (10/21, 135K) reports that “more than 40 leaders from the leading conservation groups in America are meeting in Springfield this week for a National Conservation Summit hosted by The Johnny Morris Foundation.” According to the article, “participants include the U.S. Fish and Wildlife Service, National Geographic, Audubon Society, and Ducks Unlimited.” The article notes that “the purpose of the historic gathering is to collectively discuss opportunities to educate and engage the public in efforts to protect wildlife and natural habitats in preparation for the grand opening of America’s Wildlife Museum and Aquarium in 2016.”

The [Springfield \(MO\) News-Leader](#) (10/20, 49K) reports that “three exhibits of America’s Wildlife Museum & Aquarium, formerly Wonders of Wildlife, were open to media for a tour on Oct. 20, 2015 at the museum located next to the Bass Pro Shops flagship store in Springfield, Mo.” More than 40 conservation leaders attending a National Conservation Summit “hope the new Bass Pro Shops wildlife museum and aquarium will convey to visitors when it opens in mid 2016.” FWS Director Dan Ashe, “one of the summit attendees,” called the museum “one of the foremost conservation attractions in the world.” He said, “Through conservation efforts, we can be successful in sustaining these populations of animals that are threatened or endangered. People hear about the industrial-scale poaching of elephants that’s happening in Africa. That’s not hunting. With this museum, here’s an opportunity to tell the story of how we can protect wildlife habitat, and that when hunting is done well, with appropriate regulations, it sustains wildlife populations.”

Additional coverage was provided by [KOLR-TV](#) Springfield, MO (10/21, 6K), [KYTV-TV](#) Springfield, MO (10/21, 135K), and [KOLR-TV](#) Springfield, MO (10/21, 6K).

CNMI QUESTIONS INCLUSION OF SOME SPECIES ON ENDANGERED LIST. The [Radio New Zealand](#) (10/21, 1K) reports that “the Northern Marianas government says the decision to list 23 species in Guam and the CNMI as threatened or endangered was rushed.” The government says “it supports the US Fish and Wildlife Service’s listing of seven of the 17 CNMI species, but it questions the inclusion of some of the other species.” The Department of Land and Natural Resources says “a number of the species do not meet the definitions of threatened or endangered and don’t require federal protection.”

FWS LOOKS TO RESTORE HABITAT ON ROOT RIVER. The [Rochester \(MN\) Post-Bulletin](#) (10/21, 28K) reports that “federal wildlife officials are seeking public input on a plan to restore and enhance habitat on 825 acres of Minnesota land along the Root River in Houston County.” Managed by the FWS “as part of the Upper Mississippi River National Wildlife and Fish Refuge, the Root River Tract sits to the east of Hwy. 26 between La Crescent and Brownsville.” The article notes that “the site includes 664 acres of hunting and farmland purchased in 2009 with money from the Land and Water Conservation Fund.”

SHOOTING OF CALIFORNIA CONDOR IN ARIZONA UNDER INVESTIGATION. [Grand Canyon \(AZ\) News](#) (10/21) reports that FWS special agents and Arizona Game and Fish Department “law enforcement personnel are investigating the lethal shooting of an endangered California condor that occurred on the Kaibab Plateau in northern Arizona Oct. 8.”

MAN CLAIMS HE BLOCKED ARIZONA BIKE TRAIL TO PROTECT OWLS. The [AP](#) (10/21, 344K) reports that “the 81-year-old man who blocked a Flagstaff-area mountain bike race says he did it to protect an endangered owl species.” J.D. Protiva “appeared in federal court Monday on misdemeanor charges related to blocking the Elden Springs Trail before the August race.” Protiva says “the path goes through protected Mexican spotted owl habitat.”

ADDITIONAL COVERAGE: MONARCHS GET HELP AS CALIFORNIANS PLANT DROUGHT-TOLERANT MILKWEED. Additional coverage that monarch butterflies could benefit from the California

drought was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Albuquerque \(NM\) Journal](#) (10/21, 259K), [KABC-TV Los Angeles \(CA\)](#) Los Angeles (10/21, 413K), and [WRC-TV Washington \(DC\)](#) Washington (10/21, 345K).

FWS INVESTING IN PROJECTS TO STRENGTHEN ATLANTIC COASTAL DEFENSES AGAINST FUTURE STORMS. In an op-ed for the [New Haven \(CT\) Register](#) (10/20, 172K), Wendi Weber is Northeast regional director for the FWS, writes that “federal money for Hurricane Sandy recovery has spurred an unprecedented effort to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms.” She notes that the FWS and other Interior Department “agencies are investing \$787 million in hundreds of projects to clean up and repair damaged refuges and parks; restore coastal marshes, wetlands and shoreline; connect and open waterways to improve flood control; and increase our scientific understanding of how these natural areas are changing.” According to Weber, “these investments support the goal of President Barack Obama’s Climate Action Plan to make communities more resilient to increasingly intense storms predicted with a changing climate.”

National Park Service:

MUSIC VIDEO CELEBRATES 100 YEARS OF NPS. The [New Bedford \(MA\) Standard-Times](#) (10/20, 53K) reports on “a locally made music video that celebrates 100 years of the National Park Service.” According to the article, “published on Oct. 15, the Centennial video has more than 18,500 views on the NPS facebook page and more than 530 on the Youth Ambassador Program’s YouTube page, the group that made it.” NPS Director Jon Jarvis, “who met the traveling crew in Washington, D.C., makes a cameo appearance in the video to say, ‘It’s great to celebrate a hundred years with YAP!’”

Kentucky Lieutenant Gov. Luallen Touts National Parks. The [Louisville \(KY\) Courier-Journal](#) (10/20, 414K) reports that Kentucky Lieutenant Governor Crit Luallen on Tuesday “touted the economic impact of Kentucky’s travel and tourism industry” in “an address to the Kentucky Travel Industry’s annual conference in Bowling Green.” Following her remarks, Luallen “recognized five national parks in Kentucky as part of the National Park Service Centennial in 2016.” She “presented proclamations to representatives of the parks.”

Couple Visiting 59 National Parks In 12 Months. The [Cleveland Plain Dealer](#) (10/21, 1.03M) reports that “Cole and Elizabeth Donelson, St. Louis natives, are two months into their grand adventure: 59 parks in 12 months – part celebration of the National Park Service’s 100th anniversary, part exercise in youthful spontaneity.” Their goal is to “see the best of the United States, and inspire others – particularly other millennials – to do the same.” The article notes that “their mission meshes well with a new campaign of the Park Service, which celebrates its centennial anniversary in 2016.”

WATCHDOG RELEASES REPORT ON NPS CONSTRUCTION FUNDS. The [Greenwire](#) (10/20, Subscription Publication) reports that “a federal watchdog yesterday released a disputed report alleging that the National Park Service is violating congressional intent by dipping into its construction account to cover security, air testing and other reimbursable expenses that should have been paid up front by other agencies.” The NPS construction account is “only for expenses that relate to ‘construction, improvements, repair or replacement of physical facilities,’” the Department of the Interior’s Office of Inspector General report said, “citing the language of the agency’s appropriation.” However, “the OIG found that 17 out of a sample of 21 interagency agreements that used Park Service construction funds to cover reimbursable costs did not appear to include ‘a valid construction purpose.’” The article notes that “these included \$4.9 million that NPS spent from its construction account on security at the Department of the Army’s Memorial Day and Independence Day concerts at the Capitol in 2014 and \$37.5 million over seven years on air quality monitoring at national parks that will be paid back to NPS by U.S. EPA.”

HOUSE COMMITTEE PASSES GRAND CANYON BISON MANAGEMENT ACT. [Grand Canyon \(AZ\) News](#) (10/21) reports that the U.S. House Natural Resources Committee approved the Grand Canyon Bison Management Act “allowing the Arizona Game and Fish Department (AZGFD) to better manage and conserve the bison population within the park Oct. 8.” The legislation “requires the U.S. Department of Interior and the Arizona Game and Fish Commission to coordinate on a plan that allows sportsmen holding a valid state-issued hunting license to assist in management of the bison population within the park.”

THUNDERSTORMS CAUSE FLOODING, MUDSLIDES IN DEATH VALLEY NATIONAL PARK. The [Greenwire](#) (10/20, Subscription Publication) reports that “mudslides and flooding after severe thunderstorms in Death Valley National Park on Sunday trapped three park rangers and about 20 visitors –

many out to see a clear night sky – in a volcanic crater overnight.” Park spokeswoman Abby Wines said “the stranded people spent the night in Ubehebe Crater, maintaining contact with park headquarters until they were able to reach safety yesterday morning.” The article notes that “no injuries were reported, but Wines said the unexpectedly severe storms knocked out power in the area, damaged and closed several roads, and filled a historic visitor’s center with several feet of mud and debris.”

NPS SET TO CONTINUE WITH TREE-CUTTING AT POTOMAC CAMPGROUND. The [Bethesda \(MD\) Magazine](#) (10/21) reports that “after complaints from two nearby residents and a call from County Council member Roger Berliner temporarily halted tree-cutting operations Friday at a Potomac campground, the National Park Service said it plans to resume the tree-cutting and will probably do so in the next few days.” John Noel, deputy superintendent for the C&O Canal National Historical Park, said that “he went to the Swain’s Lock Recreation Site to examine the 26 trees proposed to be removed and 32 others proposed to be pruned at the site’s campground.” Noel “agreed that the trees are rotting and in danger of falling on park users below.”

STUDENTS GO ON CANOE TRIP AROUND WOLF LAKE. The [Merrillville \(IN\) Post-Tribune](#) (10/20, 105K) reports that “all classes in Grades 6 through 9 at George Rogers Clark Junior-Senior High School in Hammond recently experienced a unique field trip right in their own back yard — a canoe trip around Wolf Lake located only a few blocks from the school.” The trip was “made available through a partnership with the National Park Service, Dunes Learning Center and Wilderness Inquiry.”

NEW COLONIAL PARK SUPERINTENDENT THANKS COMMUNITY FOR ADVOCACY. The [Newport News \(VA\) Daily Press](#) (10/20, Williams, Subscription Publication, 201K) reports that the Colonial National Historical Park’s new Superintendent, Kym Hall, thanked the community for its opposition to Dominion’s Skiffes Creek transmission project in her first appearance before the York County Board of Supervisors on September 1. “The view should be protected,” she said.

DEVILS TOWER TO HOST STAR VIEWING PARTIES. The [Casper \(WY\) Star-Tribune](#) (10/21, 115K) reports that the NPS “announced that Devils Tower will host a series of star viewing parties October through December.” The article notes that “the eight parties are free of charge, and will last approximately two hours.”

NPS URGED TO RECONSIDER RACIST NAME FOR A WASHINGTON LAKE. In an op-ed for the [High Country \(CO\) News](#) (10/21, 74K), Glenn Nelson writes that Washington state officially calls Howard Lake “by what is believed to be its oldest known name,” but the federal government “recognizes the lake by a name that causes the jaws of most people of color to drop: Coon Lake.” Nelson notes that “the federal government did not follow the usual course of supporting the state’s action, mostly because of opposition from the National Park Service, which manages the area that contains the lake.” The NPS, “acting on research from its North Cascades unit, originally defended its stance by claiming that there was ambiguity around the use of the term ‘coon.’” According to Nelson, “in the years leading up to its 2016 centennial, the Park Service has done a lot of talking and writing about the need for diversity and inclusiveness.” He concludes that “it’s past time for the Park Service to back away from its misguided opposition, encourage Secretary Jewell to come to its rescue, and allow another black life to matter.”

US Geological Survey:

USGS SEISMOLOGIST QUESTIONS PREDICTION OF 99.9 PERCENT CHANCE OF MAJOR LOS ANGELES EARTHQUAKE IN 3 YEARS. The [Southern California Public Radio](#) (10/20, 68K) reports that “a controversial new study from NASA’s Jet Propulsion Laboratory” claims “there is a 99.9 percent chance of an earthquake” in Los Angeles “between magnitude 5 and 6.3 in less than three years.” The study, published earlier this month by the American Geophysical Union’s Earth and Space Science journal, has “taken many in the seismic community by surprise.” Lucy Jones with the USGS said the “methodology doesn’t fully explain the prediction, and the study doesn’t adequately address this either.” Jones said that, according to the USGS’ “models, there is only an 85 percent chance of a magnitude 5 or 6 quake in the same region over a three-year period.”

Top National News:

MEDIA ANALYSES: TRUDEAU’S ELECTION LIKELY TO FOSTER IMPROVED US-CANADA TIES. On

the day after Justin Trudeau became Canada's Prime Minister-designate, media reporting universally characterized the election results as a likely boost for US-Canada relations. Coverage focuses on Trudeau's promise of a less combative foreign policy style and the perception that he will be more willing to accept a US rejection of the Keystone pipeline. Reporting – including a combined 2 minutes and 50 seconds on the three broadcast networks – also indicates that despite Trudeau's decision to withdraw his aircraft from the US-led coalition against ISIL, he is likely to be a more willing partner on climate change and other issues.

[ABC World News](#) (10/20, story 9, 0:20, Muir, 5.84M) reported President Obama on Tuesday congratulated Trudeau, who “swept into power with a message of optimism saying Canada beat fear with hope.” [USA Today](#) (10/21, Korte, 5.23M) reports Obama made the phone call “in an attempt to lock down continued cooperation with the northern neighbor on trade, terrorism, and climate change.” The White House, according to USA Today, “signaled that not much would change in the relationship” between the neighbors following the Liberal party's victory. [CBC News](#) (10/20, Fitzpatrick, 225K) reported on its website that the White House indicated Obama and Trudeau “agreed on the importance of deepening the ‘already strong’ bilateral relationship” between the countries “and committed to strengthen joint efforts to promote trade and to combat terrorism and climate change.”

[AFP](#) (10/21) reports the White House and current Prime Minister Stephen Harper “clashed over climate policy” and the Keystone pipeline. While White House spokesman Josh Earnest on Tuesday said “it would be shortsighted to reduce the relationship between our two countries to just one issue,” Chuck Todd reported on [NBC Nightly News](#) (10/20, story 5, 2:05, Holt, 7.86M) that “we now have a Canadian government that is politically more in line with the American government.” According to Todd, “Relations have been good but they have not been so great of late. Will they now get better? That is why Americans should care.”

In an article entitled “5 Reasons The US Should Care About Canada's New Prime Minister,” [USA Today](#) (10/21, Hjelmgaard, 5.23M) lists ways in which Trudeau “is likely to affect policies in Canada and the United States.” According to USA Today, Trudeau “promised to improve strained relations” with Obama and said “he wants to find constructive ways of working with Washington on other issues.” Another [USA Today](#) (10/21, Kovac, 5.23M) article reports that Trudeau and Harper “differ in their approach to foreign policy,” with the incoming leader being less vocally pro-Israel and more focused on environmental issues.

In an analysis piece, [Bloomberg News](#) (10/21, 2.66M) says “a prompt rejection” of the Keystone pipeline by Obama “would make the job easier” for Trudeau “as he seeks to reset the country's relationship with the US, which he says was damaged” by Harper. According to Bloomberg, Trudeau “could use a quick US denial” of the pipeline “to focus discussions” with Obama “on issues such as trade and climate.” Bloomberg notes there has been “speculation” that Obama “would reject the pipeline shortly after the Canadian election.” However, [The Hill](#) (10/20, Cama, 471K) reported, Secretary of State Kerry said Tuesday that Canada's election results will not change the White House's approach to the Keystone issue. Kerry said the decision “is being based on the merits and countervailing balance of all the input that has come from a very exhaustive agency review.” Kerry reiterated that he seeks a decision “as fast as possible.”

[Reuters](#) (10/21, Mason, Rampton) reports the White House indicated it would like the new Canadian government to take increased actions to address climate change. Earnest said that while Canada has “made a substantial and important commitment” ahead of the Paris climate talks, “We believe that it's possible that there is more that Canada can do in this regard.”

However, writing for [Mother Jones](#) (10/20, 758K), Suzanne Goldenberg claimed “those hoping for a U-turn in Canada's climate change policy...are in for a reality check.” According to Goldenberg, while Trudeau does not align directly with many of Harper's views or policies, “it would be a mistake” to see the new Canadian leader or his party “as climate champions.” In [Slate](#) (10/20, 1.38M), Joshua Keating argued that at least with regard to the Keystone pipeline, Trudeau does present a change from Harper. Keating characterizes Trudeau as “a very different leader” from Harper and says he will make the Keystone pipeline less of a focal point of US-Canada relations. According to Keating, Trudeau “has described his support for the pipeline as ‘steadfast,’ but it's clearly not the make-or-break issue for him that it was for Harper.”

The [Wall Street Journal](#) (10/21, Vieira, Subscription Publication, 5.95M) reports Trudeau said he will work to restore Canada's reputation of defending minorities and become more involved in multilateral policy making. At a rally in Ottawa, Trudeau said, “To this country's friends around the world, I want to say this:

many of you have worried Canada has lost its compassionate and constructive voice in the world over the past 10 years. I have simple message for you: We're back." The [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) similarly reports that Trudeau "is likely to present a very different face to the world" than Harper, "but the most noticeable difference will probably be in tone." Trudeau has vowed to "put an end to Mr. Harper's often belligerent style of politics and diplomacy." Trudeau said Tuesday that "a positive, optimistic, hopeful vision of public life isn't a naïve dream – it can be a powerful force for change." The Times says Trudeau has previously indicated a desire to end Harper's reliance on military solutions and tough rhetoric, and instead focus on working within international organizations, such as the United Nations.

The [CBS Evening News](#) (10/20, story 10, 0:25, Pelley, 5.08M) reported, "Canada took a left turn" as "Trudeau and the Liberal Party rode in on a landslide." In a [USA Today](#) (10/21, 5.23M) op-ed, author David Andelman says "most of the reasons" Canadian voters chose Trudeau to lead the country "boiled down to one fundamental: The Liberal Party leader was simply nicer than his opponent. And most Canadians believe they are, too." Similarly, the [Wall Street Journal](#) (10/21, Subscription Publication, 5.95M) editorializes that Canadians wanted a change from the Harper government, which had become isolated and sought to restrict debate. The [New York Times](#) (10/21, Subscription Publication, 11.82M) agrees, editorializing that Trudeau's election "shows how ready Canadians were to emerge from a decade under the Conservative government of the secretive and combative Stephen Harper."

[AFP](#) (10/21) reports Trudeau told Obama on Tuesday that Canadian fighter aircraft will withdraw from the US-led coalition against ISIL, but the new Canadian leader did not present a timeline for the move. In a front-page story, the [Washington Post](#) (10/21, A1, Brown, 6.76M) reports Trudeau said, "I committed that we would continue to engage in a responsible way that understands how Canada has a role to play in the fight against ISIL," adding, that Obama "understands the commitments I've made around ending the combat mission." According to the Post, a "senior Administration official," said Obama and Trudeau discussed joint anti-terrorism efforts and, "We expect Canada will continue to be a valuable contributor to the 65-member global coalition" against ISIL.

Trudeau's Win Could "Lead To Full Marijuana Legalization" In Canada. [USA Today](#) (10/21, Hughes, 5.23M) reports Trudeau's win "may lead to full marijuana legalization" for Canada. According to USA Today, Trudeau promised during his campaign that "Canada would create a system to tax, regulate and sell marijuana, along with stiff penalties for anyone giving pot to children or caught driving while stoned." USA Today says American "cannabis activists hailed Tuesday's election as a milestone, suggesting that a day may soon come when cross-border trade talks include...legal weed."

[AFP](#) (10/21) reports Trudeau's "promise to legalize recreational cannabis" will likely "help the nation's nascent medical marijuana industry." Investors, according to AFP, "are betting" they could build on companies' current production of marijuana for medical use and "quickly scale up to serve recreational pot users too, once Trudeau makes good on his promise."

NYTimes Analysis: Trudeau Is "No Dynast" Despite Father Being Former Prime Minister. In a 1,350-world profile piece, the [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) reports that despite there being "many easy parallels to draw between" Trudeau and his father, former Prime Minister Pierre Elliott Trudeau, Canada's incoming leader "is no dynast who slipped effortlessly into a family political machine." The Times notes that Trudeau "did not even enter politics until 18 years after his father gave it up, and seven year after his father's death." According to the Times, Trudeau "built his own cadre of advisers, mostly from his own generation" and sometimes "chose more difficult roads – partly, it appears, to show he had not been handed a life in politics on a platter."

In the [Washington Post](#) (10/21, 6.76M) "Reliable Source" blog, Emily Heil says Trudeau and his wife, Sophie Grégoire-Trudeau, "have a lot in common with the Obamas." According to Heil, "they'd have lots to talk about, apart from liberal politics, like fitness!"

IN APPARENT REVERSAL, BIDEN SAYS HE PRIVATELY URGED OBAMA TO AUTHORIZE UBL RAID. Vice President Biden did not reveal Tuesday whether or not he will enter the Democratic presidential race, but his remark that he privately advised President Obama to launch the 2011 raid that led to the death of Osama Bin Laden – which contradicted Biden's past public comments that he advised against the raid – is being interpreted as a possible line of attack against Hillary Clinton. All three broadcast networks reported on the statement, combining for nearly eight minutes of coverage, and ABC led with it. The tone of

the coverage is mixed, with most reports calling it a reversal, and some concluding that Biden may be undercutting his own reputation for candor.

There was also Twitter discussion of Biden's remarks. Anthony De Rosa, a digital producer for The Daily Show who has nearly 89,000 followers, [tweeted](#), "Biden sounds like Brian Williams with his evolving recollection of the Bin Laden raid." Jonathan Martin of the New York Times [tweeted](#), "@vp today signals: he'll run & it'll get negative FAST or: he's not happy about being sidelined." His Times colleague Maggie Haberman [tweeted](#), "Biden's subtle digs at Clinton indicate that if he runs it'll be ugly." In addition, the hashtag [#BidenWatch](#) emerged on Twitter, with Fox Business Network's Trish Regan [tweeting](#), "Sure sounds like he's running...", Mashable's Juana Summers [tweeting](#) Biden's Wednesday official schedule, and Al Jazeera America's David Shuster [tweeting](#) that "Hallie Biden, widow of the late Beau Biden, says her family supports a Presidential campaign '100%'".

[ABC World News](#) (10/20, lead story, 2:50, Muir, 5.84M) reported that "as the pressure mounts for Joe Biden to decide whether he'll run...many [are] now asking, did he change his story?" ABC (Karl) added, "Biden has described Obama's decision as especially courageous because in that key meeting when it came time to decide, most of the President's advisers, including Biden himself, were not in favor of the raid." On Tuesday, he "offered an entirely different account of what happened on that fateful day." Biden was shown saying, "So as we walked out of the room and we walked upstairs, I told him my opinion that I thought he should go but to follow his own instincts. But it would have been a mistake, imagine if I had said in front of everyone, 'don't go, or go,' and his decision was a different decision." Karl: "But until today, Biden has said he told Obama and his team that night to hold off on the raid."

The [CBS Evening News](#) (10/20, story 6, 2:05, Pelley, 5.08M) reported that Biden "sounded more like a presidential candidate, talking up his foreign policy credentials, doing some rewriting of his own history and firing a shot over the bow of the Democratic frontrunner." CBS' Nancy Corden added that Biden "never mentioned" Clinton by name, "but it was all too clear the comparison he was making when he said this about his stature overseas." Biden: "I will get sent to go speak to Putin or go speak to whomever, and it's because the secretary of state, we've had two great secretaries of state, but when I go, they know that I am speaking for the President." Cordes added that Biden left Clinton "out of his story" about the Bin Laden raid.

[NBC Nightly News](#) (10/20, story 3, 2:35, Holt, 7.86M) also said of Biden, "If anything, he is beginning to sound more like a candidate, taking not-so-veiled swipes" at Clinton. NBC (Welker) added that Biden "said he and the President were in lock-step when it came to authorizing the raid against Bin Laden." The [AP](#) (10/21, Lederman) says Biden "backtracked on his previous claims to have advised Obama against the raid" in "an unusual reversal."

[Bloomberg Politics](#) (10/21, Talev, 247K) reports that in his remarks at an event honoring his vice presidential predecessor Walter Mondale, Biden "portrayed himself as the central player" in the Administration "on everything from working with congressional Republicans to the killing" of Bin Laden. [USA Today](#) (10/21, Singer, 5.23M) says Biden "revised his account of his advice" to Obama after Mondale said he "would only disagree with President Jimmy Carter in private during his tenure as vice president."

The [New York Times](#) (10/21, Harris, Martin, Subscription Publication, 11.82M) says with the remark, Biden "sought...to dispel" the notion that he had opposed the raid, which "might dog him on the campaign trail." Biden said he "never gave his own views on controversial issues until the rest of the cabinet had spoken, mindful that he did not want the rest of the team to see a difference between his opinion and that of the president." Biden said only then-Defense Secretary Robert Gates and then-CIA Director Leon Panetta "had expressed definitive views on the raid," and "pointedly did not mention" Clinton, who "has said that she was in favor of the raid."

The [Washington Post](#) (10/21, Jaffe, 6.76M) says Biden "seemed to change his account" with a revision that "seems designed to buttress his qualifications to serve as commander-in-chief." But Biden "seems to have contradicted his earlier memories of the final meeting before the bin Laden raid." The [Wall Street Journal](#) (10/21, Nelson, Nicholas, Subscription Publication, 5.95M) says Biden cast himself as Obama's chief adviser on many issues, and sought to downplay Clinton's advisory role as secretary of state. The [Los Angeles Times](#) (10/21, Memoli, 4.07M) says Biden used the event "to highlight his close relationship with President Obama that would be at the heart of Biden's potential presidential campaign."

The [New York Daily News](#) (10/21, Joseph, 3.75M) says Biden's "new details make him out to be a

supporter of the high-stakes raid that killed Bin Laden – a big shift from the common narrative that he resisted it, one Clinton's allies have hinted could be a main attack line if Biden does jump into the race." The [Boston Globe](#) (10/21, Linskey, 1.1M) says Biden "has been on record recommending against the move."

DOI in the News:

SEN. MURKOWSKI SEES TOUGH ROAD FOR INTERIOR NOMINEE. [Politico Pro](#) (10/20, Subscription Publication) reports that Senate Energy and Natural Resources Committee Lisa Murkowski said that Interior Department pick Kristen Sarri would “have a lot of explaining to do at a hearing on six nominees today.” While Murkowski was “pleased that President Barack Obama had renamed Mount McKinley this summer to Denali, the Alaska Republican said she was still frustrated with the Interior Department’s ‘heartless decision’ to deny a road in King Cove.” Murkowski also “criticized Interior for closing off oil production in Alaska and last week’s cancellation of offshore sales and lease extension.”

Meanwhile, the [Daily Caller](#) (10/21, Barton, 375K) reports that Murkowski is “torn between leaving the Department of the Interior’s independent watchdog post vacant, or confirming President Barack Obama’s nominee crippled by recurring allegations of ‘playing games with Congress.’” She said, “I strongly believe that Interior needs a permanent [inspector general], and I’m disappointed the administration has let the position go unfilled for six and a half years.” Murkowski continued, “But I am also committed to ensuring that the individual we confirm is fully independent ... The tenure that you have been involved with thus far in this position has been marked by controversy.”

Additional coverage was provided by [The Hill](#) (10/21, Henry, 471K), [KTOO-FM](#) Juneau, AK (10/20), and [Alaska Public Radio Network](#) (10/20, 2K).

HISTORIC \$186 MILLION SETTLEMENT WITH CHOCTAW, CHICKASAW NATIONS LAUDED. The [Indian Country Today Media Network](#) (10/20, 32K) reports that “tribes and the U.S. Department of the Interior heralded the outcome of a \$186 million settlement signed earlier this month between the federal government, the Choctaw and the Chickasaw nations to solve a longstanding land trust dispute as a new chapter in relations.” During the October 5 signing ceremony, Chickasaw Nation Governor Bill Anoatubby “gave a nod to the impetus provided” by Interior Secretary Sally Jewell. He said, “We respect the vital role Secretary Jewell has taken in helping make this historic settlement a reality. We are confident she will play an essential role in our efforts to continue strengthening the relationship between our governments, because we believe she has a unique appreciation for the mutual benefits of a positive government-to-government relationship.” Jewell said, “Today’s agreement is the latest addition to a record number of longstanding settlements resolved under this Administration. This historic settlement is the start of a new chapter in our trust relationships with the Chickasaw and Choctaw Nations, and underscores our commitment to fulfilling those responsibilities to Native communities across the country.”

U.S. TREASURY CONFIRMS \$20B BALANCE FOR LWCF. [E&E Publishing](#) (10/21, 705) reports that “the Land and Water Conservation Fund that expired earlier this month for the first time in its 50-year history currently contains nearly \$20 billion, according to the U.S. Treasury, which maintains the program’s balance sheets.” But “whether that is ‘real’ money available to be spent on federal land acquisitions, private land easements and state recreation projects depends on whom you ask.” The article notes that “the \$19.8 billion can only be reduced until Congress reauthorizes the program.”

Additional coverage of the LWCF was provided by the [Durango \(CO\) Herald](#) (10/20, 31K).

PROPOSED DESIGNATIONS OF THREE NATIONAL MONUMENTS IN CALIFORNIA DESERT RAISES CONCERNS ABOUT “LAND GRAB.” [Fox News](#) (10/20, 8.91M) reports that “a group of off-roaders and others are attempting to fight a proposed designation of three national monuments in the California desert under the Antiquities Act.” The Obama Administration is “considering using the federal Antiquities Act to bypass the legislative process at the request of Sen. Dianne Feinstein, whose efforts to have the Mojave Trails and Castle Mountain, both in the Mojave Desert, and a section of the Sonoran Desert named federal sites were repeatedly blocked by Republicans.” According to the article, “a White House move could put the land under federal control, which critics say could cut funding for upkeep or even restrict access.”

UNMANNED HELICOPTER OFFERS NEW WAY TO FIGHT WILDFIRES. The [Voice of America](#) (10/21, Banse, 32K) reports that the K-MAX “unmanned, water-dropping” helicopter was tested by the US government. The helicopter can fly through limited visibility. Brad Koeckertiz, the unmanned aircraft program manager with the US Department of Interior, says that unmanned helicopters such as the K-MAX will be integrated into routine measures to fight wildfires over the next few of years. The article notes that the K-MAX helicopters have already been used by the US Marines in Afghanistan, to “resupply remote outposts at night” and replace “dangerous convoys on the ground.” The article notes that the growing uses for drones is also why the FAA is seeking to register all drones.

Additional coverage was provided by [Vertical Magazine \(CAN\)](#) (10/21).

JEB BUSH PROPOSES MOVING INTERIOR DEPARTMENT FROM D.C. To Western City. The [Las Vegas Sun](#) (10/20, Lucas, 199K) reports that “Republican presidential candidate Jeb Bush will unveil his proposals for Western land and resource management in a campaign stop in Reno on Wednesday morning, in a speech likely to resonate with conservative voters opposed to what they see as federal overreach in the Western states.” Bush is “expected to speak at 11 a.m. Wednesday at Rancho San Rafael Regional Park before appearing at a forum sponsored by the LIBRE Initiative at the College of Southern Nevada Cheyenne Campus in North Las Vegas at 6 p.m.” In the proposal, Bush will “call for moving the headquarters of the Department of Interior from Washington, D.C., to a city in the western United States like Denver, Salt Lake City or Reno and will say that as president he would direct federal agencies to give broad latitude to states to determine land-use issues.”

STUDY: ALASKAN WILDFIRES COULD EXACERBATE GLOBAL WARMING. The [Washington Post](#) (10/21, Mooney, 6.76M) reports that some greenhouse gas sources outside the scope of forthcoming UN climate talks are beyond governments’ control, such as raging peat fires in Indonesia this year, emitting “as much as Japan produces in a year from fossil fuels.” Elsewhere, a new study in Nature Climate Change reaffirms concerns about the emissions of northern fires in Alaska. The Post reports that “climate researchers are still trying to figure out how all of these factors will interrelate,” but fire is a “powerful determinant of how much carbon resides in land, rather than in the air, across our globe.”

INTERIOR’S VINE ACCOUNT HIGHLIGHTED. [Politico](#) (10/21, 942K) highlights the Interior Department has a great Vine account. Providing a link, Politico says “this is Internet gold.”

Empowering Native American Communities:

BIA RULE ANNOUNCES RULE GIVING TRIBES MORE CONTROL OVER ELECTIONS. [Law360](#) (10/20, 21K) reports that the BIA “on Monday announced its final rule for Native American tribal elections conducted by the U.S. Department of the Interior, saying the new rule will encourage tribes to take control of their elections and help protect the voting rights of tribe members living in urban areas.” Assistant Secretary of Indian Affairs Kevin K. Washburn said “in a statement Monday that the rule will allow tribes to opt out of having the interior secretary conduct their elections.”

The [Native American Times](#) (10/20, 337) reports that Washburn said, “Though many federal responsibilities concern the lands we hold in trust for tribes and Indian people, more than 55 million acres nationwide, the United States has a moral obligation to preserve connections between Indian people and their tribes that it once sought to destroy. For the future of Native nations and the health of Indian Country, American Indians in urban areas must work harder to maintain connections with their tribes. One important aspect of that relationship is participation in the civic and political life of their tribal governments. For that reason, our Secretarial election amendments seek to prevent tribal members living in urban areas from being inadvertently disenfranchised in Secretarial elections.”

HEARING FOCUSES ON NATIVE HAWAIIAN ELECTION. The [AP](#) (10/21, Kelleher) reports from Honolulu that a federal court hearing began on Tuesday “in a lawsuit by people who want to put a stop to an election process that is underway for Native Hawaiians.” The lawsuit, filed in August, “says it’s unconstitutional for the state to be involved in a race-based election.” The state “argues in court documents that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it’s not involved in next month’s vote to elect delegates for a convention to determine self-governance for Native Hawaiians.” Tuesday’s hearing “is focused on the plaintiffs’ motion for a preliminary injunction,” and the plaintiffs “want the judge to limit voter registration activities or stop the election altogether.”

Additional coverage was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Navajo Times \(AZ\)](#) (10/21, 66K), and [Yahoo! News](#) (10/21, Kelleher, 5.98M).

INTERIOR SIDES WITH ALASKA NATIVE GROUP IN INVESTIGATION OF MASSACHUSETTS COLLEGE TRIBAL COLLECTION. The [AP](#) (10/21, 2.28M) reports that “a Massachusetts college was found in violation of a federal law regulating the possession and sale of potentially sacred artifacts following a complaint from an organization of Alaska Natives.” The Interior Department said “an investigation substantiated the complaint against Andover Newton Theological School filed in June by the Sealaska Heritage Institute.” The institute’s president, Rosita Worl, said “the school possesses at least two southeast Alaska artifacts, including a Tlingit halibut hook that is considered sacred.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/21, D'oro, 344K), the [Boston \(MA\) Herald](#) (10/21, 548K), the [Daily Mail \(UK\)](#) (10/21, 5.59M), the [Miami \(FL\) Herald](#) (10/21, 651K), [Minneapolis \(MN\) Star Tribune](#) (10/21, D'oro, 1.19M), [ABC News](#) (10/21, 3.97M), and the [Alaska Dispatch News](#) (10/20, 219K).

US ATTORNEY SAYS BIA OFFICER WAS JUSTIFIED IN DEADLY SPIRIT LAKE SHOOTING. The [AP](#) (10/21) reports that US Attorney Chris Myers “says” that an investigation by his office came to the conclusion that BIA Officer Terry Morgan was justified in shooting and killing “31-year-old Joseph Charboneau during a standoff with officers on June 16.” The [Grand Forks \(ND\) Herald](#) (10/21, 100K) reports that the US Attorney’s Office “said” the shooting was justified because Charboneau posed a “real and immediate” threat to officers and another person at the scene after he refused to put down his gun, which was pointed at the officers. The Grand Forks Herald reports that, as a result of the investigation, Federal prosecutors “will not file charges against” Morgan.

Additional coverage was provided by the [Dickinson \(ND\) Press](#) (10/21, 1K), the [Forum of Fargo-Moorhead \(ND\)](#) (10/21, 14K), [KXJB-TV Fargo \(ND\)](#) Fargo, ND (10/21, 18K), [KFGO-AM Fargo \(ND\)](#) Fargo, ND (10/20, 3K), [KXMC-TV Minot \(ND\)](#) Minot, ND (10/21, 1K), and [KFYR-TV Bismarck \(ND\)](#) Bismarck, ND (10/21, 1K).

CRIME JUMPS AFTER TRIBES CUT FROM BIA FUNDING. The [Los Angeles Times](#) (10/20, Romney, 4.07M) reports on a “time of crisis for public safety on tribal lands.” According to the article, “a federal law decades ago shifted the primary burden of criminal law enforcement on tribal lands in California and five other states to local authorities,” but “many lack the resources to do the job and, in some cases, sufficient knowledge of tribal law and culture to win the trust of tribal members.” After “tribes were cut off from steady funding for their own justice systems,” crime has “flourished.”

ADDITIONAL COVERAGE: YAKAMA NATION’S PETITION TO SELF-GOVERN APPROVED.

Additional coverage that the BIA on Monday granted the Yakama Nation’s petition for “retrocession” was provided by the [Bellingham \(WA\) Herald](#) (10/21, 101K), the [Clark County \(WA\) Columbian](#) (10/20, 86K), the [Washington \(DC\) Times](#) (10/21, 344K), the [Spokane \(WA\) Spokesman-Review](#) (10/20, 183K), the [Native American Times](#) (10/21, 337), the [Law360](#) (10/21, 21K), [KNDU-TV Yakima \(WA\)](#) Yakima, WA (10/21, 3K), and [KUOW-FM Seattle \(WA\)](#) Seattle (10/21, 15K).

GILLETTE’S SERVICE IN OBAMA ADMINISTRATION PRAISED. In an editorial, the [Bismarck \(ND\) Tribune](#) (10/21, 37K) lauds Jodi Gillette’s service in the Obama Administration. According to the paper, Gillette’s “positions gave her a voice in a White House that has seemed genuinely concerned about Native American issues.”

Office of Insular Affairs:

ASSISTANT SECRETARY KIA’AINA PROPOSES MARSHALLS FUND CHANGES. [Radio New Zealand](#) (10/21, 1K) reports that “a top US official has submitted a proposal to the Senate and House to allow the people of Bikini to use resettlement and relocation funds outside of the Marshall Islands.” Assistant Secretary for Insular Areas Esther Kia’aina says “it is an appropriate course of action to take regarding the welfare and livelihood of the Bikinian people.” The Bikinians were “displaced by US nuclear weapons testing 70 years ago but are now looking at relocating again because of deteriorating conditions on Kili and Ejit Islands.” According to the article, “in addition to cramped living quarters and a

lack of suitable sustainable resources, the islands have been experiencing more frequent storms and king tides resulting in salt water inundation and the destruction of crops.”

[Radio New Zealand](#) (10/21, 1K) reports that “a representative from Bikini Atoll says a proposal to allow people to use resettlement and relocation funds outside of the Marshall Islands is not wanted.” Bikini liaison officer Jack Niedenthal says “the US should take full responsibility for any resettlement including providing extra financing.” Niedenthal said, “We still got a ways to go, we still have to do some more lobbying and some more talking to people in Washington to make them understand that what’s being proposed by the assistant secretary is what we view as ‘Plan B’. It’s not ultimately what we want in terms of helping our people.”

CHINA STRENGTHENS RELATIONSHIP WITH PACIFIC REGION. The [Marianas Variety](#) (10/21) reports that “China and the Pacific Islands Forum Secretariat further strengthened their relationship on Friday when the two met at a ceremony to hand over \$1.05 million to assist the Pacific region.” Forum Secretariat Secretary General Meg Taylor and Chinese Ambassador to Fiji Zhang Ping “attended the ceremony and delivered speeches respectively.” Zhang “reiterated his nation’s ongoing interest in the region saying, ‘China attaches great importance to the South Pacific region. The Chinese side stands ready to enhance mutual understanding and cooperation with Pacific Island Countries and contribute to the development and capacity building in the region.’”

COUNTRIES IN PACIFIC URGED TO BEGIN TALKS ON CLIMATE MIGRATION. [Radio New Zealand](#) (10/21, 1K) reports that “all countries in the Pacific are being urged to start discussions on how to help people forced to move from low lying atoll nations like Kiribati and Tuvalu.” According to the article, “184 million people worldwide were displaced by disaster between 2008 and 2014 and at special meetings in Geneva last week 110 countries gave the nod to a Protection Agenda for dealing with future migration challenges.” The article notes that “the experiences of small island countries which face rising seas due to climate change helped form the global action plan under the Swiss Norwegian Nansen Initiative.”

JOURNALIST SPEAKS AT UNIVERSITY OF GUAM ON CLIMATE ISSUES, CORRUPTION IN PACIFIC ISLANDS. The [Marianas Variety](#) (10/21) reports that “author and journalist Giff Johnson spoke to students at the University of Guam on Monday evening about climate change and development in the Pacific islands.” Johnson’s “lecture, entitled ‘Idyllic No More: Pacific Island Climate, Corruption and Development Dilemmas,’ is based on his latest book — a compilation of essays detailing the looming climate threat to the region, its booming fishing industry, and the U.S. nuclear test legacy in the Marshall Islands.” Johnson called attention to “climate-driven migration from remote pacific islands to Guam and mainland U.S.”

RISING SEA LEVELS THREATEN KIRIBATI. The [National Geographic](#) (10/21, 31.65M) provides a picture gallery of the threat of rising sea levels driven by climate change on Kiribati.

Tackling America’s Water Challenges:

WATER SCHEDULED TO BE RELEASED FROM NEW MELONES. The [Sonora \(CA\) Union Democrat](#) (10/21, 28K) reports that “more than 7 billion gallons of water is scheduled to be released from New Melones Reservoir beginning today to ensure flows in the Stanislaus River will keep temperatures cool enough for adult salmon migrating up the river to spawn this fall.” Oakdale Irrigation District and South San Joaquin Irrigation District said “it would benefit river conditions and fisheries, as well as the needs of agriculture and more than 200,000 residential customers downstream.” The article notes that “earlier this year, the irrigation districts sparred with the U.S. Bureau of Reclamation — which manages New Melones Reservoir — over spring pulse flows that they feared would leave as little as 147,000 acre-feet in the reservoir by the end of September.”

SAN JOAQUIN COUNTY BOARD OF SUPERVISORS VOTE TO OPPOSE DELTA TUNNELS PLAN. The [Lodi \(CA\) News-Sentinel](#) (10/21, 14K) reports that “at a meeting on Tuesday, the San Joaquin County Board of Supervisors voted to adopt a resolution in formal opposition of California WaterFix, also known as the twin tunnels plan.” Supervisor Kathy Miller said, “The WaterFix is just a thinly veiled version of the former (Bay Delta Conservation Plan) and continues to push the fatally flawed twin tunnels, which will simply sacrifice one region of California for the benefit of another.”

Securing America's Energy Future:

Renewable Energy:

ENVIRONMENTALISTS, DOMINION BOTH SUPPORT OFFSHORE WIND DEVELOPMENT. On his [Bacon's Rebellion \(VA\)](#) (10/21, Bacon) blog, James Bacon reports on an Environment Virginia-sponsored webinar held Tuesday morning in which representatives from Dominion, environmental groups, and the McAuliffe Administration all voiced support for the utility's experimental offshore wind farm project. For environmentalists, Bacon writes, the project represents the beginning of an industry that would increase the use of green energy along the Atlantic and displace fossil fuels. For the Governor's office, it represents increased green energy coupled with economic development that takes advantage of the Newport News area's shipbuilding industry.

Onshore Energy Development:

CHESAPEAKE ENERGY FINED \$2.1 MILLION FOR UNDER-REPORTING NATURAL GAS. The [Greenwire](#) (10/20, Subscription Publication) reports that the Interior Department on Monday "announced a \$2.1 million civil penalty against Chesapeake Energy Corp. for misreporting the amount of gas it produced and sold from American Indian lands in Oklahoma." Chesapeake "failed to comply with a 2011 order that found 'systemic errors' in the company's monthly production reports for more than 100 Indian leases, according to Interior's Office of Natural Resources Revenue." The company "agreed to amend the monthly reports, but it continued to maintain inaccurate information on the agency's data systems, ONRR said." The firm was "assessed a penalty based on 'knowing or willful maintenance' of the inaccurate information, ONRR said."

Additional coverage was provided by [Politico](#) (10/21, 942K), [Natural Gas Intelligence](#) (10/21, Subscription Publication), the [Native American Times](#) (10/21, 337), and [KOKC-AM Oklahoma City \(OK\)](#) Oklahoma City (10/20, 1K).

TEXAS ENERGY REGULATOR OPPOSES STREAM PROTECTION RULE. [Law360](#) (10/21, 21K) reports that "Texas' top energy regulator on Tuesday said the agency will oppose a U.S. Department of the Interior proposed rule aimed at better protecting streams and other waterways from nearby mining activity, saying the regulation encroaches on ground better left to the state." Texas Railroad Commission Chairman David Porter on Tuesday said "the state would sign on to the multistate Interstate Mining Compact Commission's comments opposing the proposed waterway regulation."

USGS REPORT STATES EARTHQUAKES COINCIDE WITH OKLAHOMA OIL BOOMS. [KOCO-TV](#) Oklahoma City (10/21, 93K) reports that "a study by the United States Geological Survey states that the earthquakes from the past 100 years seem to coincide with the oil boom in Oklahoma."

OKLAHOMA REGULATORS SHUT DOWN THREE MORE DISPOSAL WELLS. The [EnergyWire](#) (10/21, Subscription Publication) reports that "Oklahoma oil and gas regulators dealing with a dramatic increase in earthquakes near the pipeline hub of Cushing have shut down three more disposal wells." Also, "another well was shut down by the company that owns it after regulators said they were concerned it was drilled too deep." In addition, "the operators of seven other wells were told in a letter written Friday and released yesterday that they must reduce the volume of drilling waste that they inject deep underground."

OKLAHOMA LIMITS DISPOSAL WELLS AMID CUSHING QUAKES. [Reuters](#) (10/21, Hampton, Brandes) reports that Oklahoma's oil and gas regulator on Monday said it could impose new limits on all saltwater disposal wells within a 10-mile radius of Cushing. Reuters reports that Oklahoma now experiences as many as two magnitude 3.0 quakes per day, up from two per year. Thirteen wells have been ordered shut and approvals for new wells have been halted, Reuters reports. Scientists told Reuters that shutting wells could ease tectonic disruption in Oklahoma.

STUDY: FRACKING CAN CAUSE METHANE LEAKS IN NEARBY ABANDONED OIL WELLS. [Reuters](#) (10/20, Valdmanis) reported that according to a study published Tuesday in the Water Resources Research journal, fracking can cause methane leaks in nearby abandoned oil wells. The methane leaks could be a large source of unrecorded greenhouse gas emissions, according to the

study. The study said that energy companies could reduce the probability of such methane leaks by trying to identify abandoned wells before they begin fracking, although the task could be difficult due to large numbers of unmarked abandoned wells.

BLM CRITICIZED FOR FAILING TO PRODUCE PICTURES UNDER FOIA REQUEST. For the [Fairfield \(MT\) Sun Times](#) (10/21), Darryl L. Flowers criticizes the BLM for failing to provide pictures in connection with “the proposed Solenex, LLC natural gas well on public lands in the Lewis and Clark National Forest” that were requested under the Freedom of Information Act. The paper received “sixteen photos” and “two photos were missing.” He notes that “curiously, the two omitted photos were the only ones that included a person in the photos.”

Offshore Energy Development:

FEDS INVESTIGATE WORKER’S DEATH ON DRILLSHIP CONTRACTED BY CHEVRON. [Fuel Fix \(TX\)](#) (10/20, Dlouhy, 7K) reports that officials from the Bureau of Safety and Environmental Enforcement and the Coast Guard are investigating “the death of a worker on a drillsip in the Gulf of Mexico that was preparing to bore a well for Chevron.” Fuel Fix says that “the Pacific Santa Ana drillsip was just beginning operations for Chevron in about 4,800 feet of water at the site and had not yet penetrated the sea floor when an employee of that drilling contractor was fatally injured.” Fuel Fix adds that Chevron has a 36 percent working interest in the Keathley Canyon well-leasing block where the incident occurred, an area where “Chevron outlined ambitions to drill up to seven wells” earlier this year.

The [AP](#) (10/21) reports that Amy Roddy, spokeswoman for Pacific Drilling SA, the ship’s owner, “said the company is not releasing any details about the man to respect his family’s privacy. She also refused to disclose how the man died or details of the accident, citing an ongoing investigation.”

[NASDAQ](#) (10/20, Sider) reports that Chevron has contracted the ship since 2012. The [New Orleans Times-Picayune](#) (10/21, Larino, 718K) adds that “operations have been shut down and personnel remain onboard, according to the drillsip’s operator.”

[Offshore Engineer](#) (10/20, Leon) reports that “the ship was to use its dual gradient drilling functions for Chevron’s Anchor-1 prospect last year in Green Canyon block 807, but the well was junked due to mechanical failures. However, in January of this year, Chevron hit high quality oil pay in multiple Lower Tertiary Wilcox Sands at a second Anchor well also drilled by the Pacific Santa Ana.”

The [Dow Jones Newswires](#) (10/21, Sider) reports that this is the first death related to offshore drilling operations in the Gulf of Mexico this year.

[Reuters](#) (10/21), [gCaptain](#) (10/21, 2K), [Upstream Online](#) (10/21, Schmidt, Brenner, 20K), and [Maritime Executive](#) (10/20, 21) also cover the story.

BRIARCLIFFE ACRES VOTES AGAINST OFFSHORE DRILLING. The [Myrtle Beach \(SC\) Online](#) (10/21, 36K) reports that “in a storm of debate over offshore drilling, Briarcliffe Acres surfaced as the latest coastal town to join a united front against seismic testing and drilling for oil and natural gas off of South Carolina’s beaches.” According to the article, “missing councilwoman Abby Stewart, who has been with family on the west coast, the town council unanimously passed a resolution Monday, joining 23 other S.C. coastal towns in a stance against offshore drilling.”

SHELL VESSEL RESCUES FRENCHMAN, CAT FROM SAILBOAT STRANDED IN SEAS NEAR ALASKA. The [AP](#) (10/21, Thiessen) reports that a Frenchman and the cat tucked inside his clothing were rescued on Tuesday after he leapt from his sailboat to a waiting rescue ship sent by Shell. The man activated a location beacon in the high seas south of Alaska and told the Coast Guard his sailboat had lost its rudder and rigging in the high winds and 20-foot waves. The Coast Guard contacted Shell’s oil drilling rig, the Polar Pioneer, which is on its way to Port Angeles, and the rig “sent a support ship, the Tor Viking, to rescue the sailor.” The AP reports that “it wasn’t immediately clear if the man would continue with the Shell ships to Washington state.”

CUNNINGHAM: INTERIOR DEPARTMENT OFFICIAL SHUTS THE DOOR ON ARCTIC DRILLING. In an analysis of the Interior Department’s recent decision on the future of Arctic drilling, [Oil Price](#) (10/21, 2K) reporter Nick Cunningham writes the Interior Department’s decision to cancel lease sales through

2017 leaves almost no possible pathway for an oil company to drill in the Arctic for years to come, perhaps killing off drilling for a decade or so at a minimum.” Cunningham goes on to write that “it was likely that there wouldn’t have been new drilling in any event, given Shell’s decision and current market conditions, but Interior’s decision officially shuts the door on the Arctic in the medium-term.”

Casey: Interior’s Actions On Arctic Drilling Trends “Toward A Permanent Clampdown.”

[CleanTechnica’s](#) (10/20, 15K) Tina Casey writes that “in the absence of local regulations, the Feds are the only game in town and it seems that the Arctic’s role in the US economy is too important to trust to compliance by oil companies.” Casey adds that, even though the Interior’s actions last week on Arctic drilling may be “only temporary, but the trend is toward a permanent clampdown.”

4-Traders: Federal Government To Blame For Low Arctic Drilling Interest. In an op-ed piece on the Interior’s Arctic drilling decision, [4-Traders](#) (10/21, 5K) writes the Federal government’s “difficult” regulatory obstacles is to blame for the lack of interest among oil companies to explore for oil and natural gas in the Arctic. 4-Traders writes that the “demand for oil and natural gas isn’t going away, so energy domestic exploration must continue in the Arctic and elsewhere. But as we’ve seen, by putting up unnecessary regulatory hurdles, regulators can cause job and economic growth opportunities to be missed.”

America’s Great Outdoors:

Bureau of Land Management:

BLM TO REVIEW HAGERMAN-HAILEY TRANSMISSION LINE. [Boise \(ID\) State Public Radio](#) (10/21) reports that the BLM will review the Hagerman to Hailey transmission line, paying “special attention to the greater sage grouse in the area.” Stacey Baczkowski, a biologist with Idaho Power, says “the company has been working with the BLM for the last few years to make sure the line is built with the bird in mind.” Baczkowski says “the power company plans to build the new transmission line as close to the current one as possible, and will follow BLM rules about construction during sage grouse mating times.”

UTAH WATER DISTRICT RAISES CONCERNS ABOUT BLM REVISION TO LAND-USE PLAN. The [Deseret \(UT\) News](#) (10/21, 407K) reports that “federal policies that either aim to instill more oversight of water or deny access altogether have some Utah leaders frothing over what they say is a repeated pattern of overreach that threatens local economies and livelihoods.” Ron Thompson, general manager of the Washington County Water Conservancy District, said “possible revisions to a land-use plan by the Bureau of Land Management in Washington County have severe ramifications should one particular approach be adopted.” Thompson said “the BLM — under one option — is ignoring key considerations that went into the passage of the bill, including water supplies being left unhindered and right of way corridors left intact.”

ADDITIONAL COVERAGE: HELICOPTER CRASHES NEAR SEARCHLIGHT DURING CATTLE ROUNDUP. Additional coverage of the helicopter crash near Searchlight during a cattle roundup was provided by the [Las Vegas Review-Journal](#) (10/21, 378K).

Fish and Wildlife Service:

CONSERVATION LEADERS ATTEND NATIONAL CONSERVATION SUMMIT. [KYTV-TV](#) Springfield, MO (10/21, 135K) reports that “more than 40 leaders from the leading conservation groups in America are meeting in Springfield this week for a National Conservation Summit hosted by The Johnny Morris Foundation.” According to the article, “participants include the U.S. Fish and Wildlife Service, National Geographic, Audubon Society, and Ducks Unlimited.” The article notes that “the purpose of the historic gathering is to collectively discuss opportunities to educate and engage the public in efforts to protect wildlife and natural habitats in preparation for the grand opening of America’s Wildlife Museum and Aquarium in 2016.”

The [Springfield \(MO\) News-Leader](#) (10/20, 49K) reports that “three exhibits of America’s Wildlife Museum & Aquarium, formerly Wonders of Wildlife, were open to media for a tour on Oct. 20, 2015 at the museum located next to the Bass Pro Shops flagship store in Springfield, Mo.” More than 40 conservation leaders attending a National Conservation Summit “hope the new Bass Pro Shops wildlife

museum and aquarium will convey to visitors when it opens in mid 2016.” FWS Director Dan Ashe, “one of the summit attendees,” called the museum “one of the foremost conservation attractions in the world.” He said, “Through conservation efforts, we can be successful in sustaining these populations of animals that are threatened or endangered. People hear about the industrial-scale poaching of elephants that’s happening in Africa. That’s not hunting. With this museum, here’s an opportunity to tell the story of how we can protect wildlife habitat, and that when hunting is done well, with appropriate regulations, it sustains wildlife populations.”

Additional coverage was provided by [KOLR-TV](#) Springfield, MO (10/21, 6K), [KYTV-TV](#) Springfield, MO (10/21, 135K), and [KOLR-TV](#) Springfield, MO (10/21, 6K).

CNMI QUESTIONS INCLUSION OF SOME SPECIES ON ENDANGERED LIST. The [Radio New Zealand](#) (10/21, 1K) reports that “the Northern Marianas government says the decision to list 23 species in Guam and the CNMI as threatened or endangered was rushed.” The government says “it supports the US Fish and Wildlife Service’s listing of seven of the 17 CNMI species, but it questions the inclusion of some of the other species.” The Department of Land and Natural Resources says “a number of the species do not meet the definitions of threatened or endangered and don’t require federal protection.”

FWS LOOKS TO RESTORE HABITAT ON ROOT RIVER. The [Rochester \(MN\) Post-Bulletin](#) (10/21, 28K) reports that “federal wildlife officials are seeking public input on a plan to restore and enhance habitat on 825 acres of Minnesota land along the Root River in Houston County.” Managed by the FWS “as part of the Upper Mississippi River National Wildlife and Fish Refuge, the Root River Tract sits to the east of Hwy. 26 between La Crescent and Brownsville.” The article notes that “the site includes 664 acres of hunting and farmland purchased in 2009 with money from the Land and Water Conservation Fund.”

SHOOTING OF CALIFORNIA CONDOR IN ARIZONA UNDER INVESTIGATION. [Grand Canyon \(AZ\) News](#) (10/21) reports that FWS special agents and Arizona Game and Fish Department “law enforcement personnel are investigating the lethal shooting of an endangered California condor that occurred on the Kaibab Plateau in northern Arizona Oct. 8.”

MAN CLAIMS HE BLOCKED ARIZONA BIKE TRAIL TO PROTECT OWLS. The [AP](#) (10/21, 344K) reports that “the 81-year-old man who blocked a Flagstaff-area mountain bike race says he did it to protect an endangered owl species.” J.D. Protiva “appeared in federal court Monday on misdemeanor charges related to blocking the Elden Springs Trail before the August race.” Protiva says “the path goes through protected Mexican spotted owl habitat.”

ADDITIONAL COVERAGE: MONARCHS GET HELP AS CALIFORNIANS PLANT DROUGHT-TOLERANT MILKWEED. Additional coverage that monarch butterflies could benefit from the California drought was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Albuquerque \(NM\) Journal](#) (10/21, 259K), [KABC-TV Los Angeles \(CA\)](#) Los Angeles (10/21, 413K), and [WRC-TV Washington \(DC\)](#) Washington (10/21, 345K).

FWS INVESTING IN PROJECTS TO STRENGTHEN ATLANTIC COASTAL DEFENSES AGAINST FUTURE STORMS. In an op-ed for the [New Haven \(CT\) Register](#) (10/20, 172K), Wendi Weber is Northeast regional director for the FWS, writes that “federal money for Hurricane Sandy recovery has spurred an unprecedented effort to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms.” She notes that the FWS and other Interior Department “agencies are investing \$787 million in hundreds of projects to clean up and repair damaged refuges and parks; restore coastal marshes, wetlands and shoreline; connect and open waterways to improve flood control; and increase our scientific understanding of how these natural areas are changing.” According to Weber, “these investments support the goal of President Barack Obama’s Climate Action Plan to make communities more resilient to increasingly intense storms predicted with a changing climate.”

National Park Service:

MUSIC VIDEO CELEBRATES 100 YEARS OF NPS. The [New Bedford \(MA\) Standard-Times](#) (10/20, 53K) reports on “a locally made music video that celebrates 100 years of the National Park Service.” According to the article, “published on Oct. 15, the Centennial video has more than 18,500 views on the NPS facebook page and more than 530 on the Youth Ambassador Program’s YouTube page, the group

that made it." NPS Director Jon Jarvis, who met the traveling crew in Washington, D.C., makes a cameo appearance in the video to say, "It's great to celebrate a hundred years with YAP!"

Kentucky Lieutenant Gov. Luallen Touts National Parks. The [Louisville \(KY\) Courier-Journal](#) (10/20, 414K) reports that Kentucky Lieutenant Governor Crit Luallen on Tuesday "touted the economic impact of Kentucky's travel and tourism industry" in "an address to the Kentucky Travel Industry's annual conference in Bowling Green." Following her remarks, Luallen "recognized five national parks in Kentucky as part of the National Park Service Centennial in 2016." She "presented proclamations to representatives of the parks."

Couple Visiting 59 National Parks In 12 Months. The [Cleveland Plain Dealer](#) (10/21, 1.03M) reports that "Cole and Elizabeth Donelson, St. Louis natives, are two months into their grand adventure: 59 parks in 12 months – part celebration of the National Park Service's 100th anniversary, part exercise in youthful spontaneity." Their goal is to "see the best of the United States, and inspire others – particularly other millennials – to do the same." The article notes that "their mission meshes well with a new campaign of the Park Service, which celebrates its centennial anniversary in 2016."

WATCHDOG RELEASES REPORT ON NPS CONSTRUCTION FUNDS. The [Greenwire](#) (10/20, Subscription Publication) reports that "a federal watchdog yesterday released a disputed report alleging that the National Park Service is violating congressional intent by dipping into its construction account to cover security, air testing and other reimbursable expenses that should have been paid up front by other agencies." The NPS construction account is "only for expenses that relate to 'construction, improvements, repair or replacement of physical facilities,'" the Department of the Interior's Office of Inspector General report said, "citing the language of the agency's appropriation." However, "the OIG found that 17 out of a sample of 21 interagency agreements that used Park Service construction funds to cover reimbursable costs did not appear to include 'a valid construction purpose.'" The article notes that "these included \$4.9 million that NPS spent from its construction account on security at the Department of the Army's Memorial Day and Independence Day concerts at the Capitol in 2014 and \$37.5 million over seven years on air quality monitoring at national parks that will be paid back to NPS by U.S. EPA."

HOUSE COMMITTEE PASSES GRAND CANYON BISON MANAGEMENT ACT. [Grand Canyon \(AZ\) News](#) (10/21) reports that the U.S. House Natural Resources Committee approved the Grand Canyon Bison Management Act "allowing the Arizona Game and Fish Department (AZGFD) to better manage and conserve the bison population within the park Oct. 8." The legislation "requires the U.S. Department of Interior and the Arizona Game and Fish Commission to coordinate on a plan that allows sportsmen holding a valid state-issued hunting license to assist in management of the bison population within the park."

THUNDERSTORMS CAUSE FLOODING, MUDSLIDES IN DEATH VALLEY NATIONAL PARK. The [Greenwire](#) (10/20, Subscription Publication) reports that "mudslides and flooding after severe thunderstorms in Death Valley National Park on Sunday trapped three park rangers and about 20 visitors – many out to see a clear night sky – in a volcanic crater overnight." Park spokeswoman Abby Wines said "the stranded people spent the night in Ubehebe Crater, maintaining contact with park headquarters until they were able to reach safety yesterday morning." The article notes that "no injuries were reported, but Wines said the unexpectedly severe storms knocked out power in the area, damaged and closed several roads, and filled a historic visitor's center with several feet of mud and debris."

NPS SET TO CONTINUE WITH TREE-CUTTING AT POTOMAC CAMPGROUND. The [Bethesda \(MD\) Magazine](#) (10/21) reports that "after complaints from two nearby residents and a call from County Council member Roger Berliner temporarily halted tree-cutting operations Friday at a Potomac campground, the National Park Service said it plans to resume the tree-cutting and will probably do so in the next few days." John Noel, deputy superintendent for the C&O Canal National Historical Park, said that "he went to the Swain's Lock Recreation Site to examine the 26 trees proposed to be removed and 32 others proposed to be pruned at the site's campground." Noel "agreed that the trees are rotting and in danger of falling on park users below."

STUDENTS GO ON CANOE TRIP AROUND WOLF LAKE. The [Merrillville \(IN\) Post-Tribune](#) (10/20, 105K) reports that "all classes in Grades 6 through 9 at George Rogers Clark Junior-Senior High School in Hammond recently experienced a unique field trip right in their own back yard — a canoe trip around Wolf Lake located only a few blocks from the school." The trip was "made available through a

partnership with the National Park Service, Dunes Learning Center and Wilderness Inquiry.”

NEW COLONIAL PARK SUPERINTENDENT THANKS COMMUNITY FOR ADVOCACY. The [Newport News \(VA\) Daily Press](#) (10/20, Williams, Subscription Publication, 201K) reports that the Colonial National Historical Park’s new Superintendent, Kym Hall, thanked the community for its opposition to Dominion’s Skiffes Creek transmission project in her first appearance before the York County Board of Supervisors on September 1. “The view should be protected,” she said.

DEVILS TOWER TO HOST STAR VIEWING PARTIES. The [Casper \(WY\) Star-Tribune](#) (10/21, 115K) reports that the NPS “announced that Devils Tower will host a series of star viewing parties October through December.” The article notes that “the eight parties are free of charge, and will last approximately two hours.”

NPS URGED TO RECONSIDER RACIST NAME FOR A WASHINGTON LAKE. In an op-ed for the [High Country \(CO\) News](#) (10/21, 74K), Glenn Nelson writes that Washington state officially calls Howard Lake “by what is believed to be its oldest known name,” but the federal government “recognizes the lake by a name that causes the jaws of most people of color to drop: Coon Lake.” Nelson notes that “the federal government did not follow the usual course of supporting the state’s action, mostly because of opposition from the National Park Service, which manages the area that contains the lake.” The NPS, “acting on research from its North Cascades unit, originally defended its stance by claiming that there was ambiguity around the use of the term ‘coon.’” According to Nelson, “in the years leading up to its 2016 centennial, the Park Service has done a lot of talking and writing about the need for diversity and inclusiveness.” He concludes that “it’s past time for the Park Service to back away from its misguided opposition, encourage Secretary Jewell to come to its rescue, and allow another black life to matter.”

US Geological Survey:

USGS SEISMOLOGIST QUESTIONS PREDICTION OF 99.9 PERCENT CHANCE OF MAJOR LOS ANGELES EARTHQUAKE IN 3 YEARS. The [Southern California Public Radio](#) (10/20, 68K) reports that “a controversial new study from NASA’s Jet Propulsion Laboratory” claims “there is a 99.9 percent chance of an earthquake” in Los Angeles “between magnitude 5 and 6.3 in less than three years.” The study, published earlier this month by the American Geophysical Union’s Earth and Space Science journal, has “taken many in the seismic community by surprise.” Lucy Jones with the USGS said the “methodology doesn’t fully explain the prediction, and the study doesn’t adequately address this either.” Jones said that, according to the USGS’ “models, there is only an 85 percent chance of a magnitude 5 or 6 quake in the same region over a three-year period.”

Top National News:

MEDIA ANALYSES: TRUDEAU’S ELECTION LIKELY TO FOSTER IMPROVED US-CANADA TIES.

On the day after Justin Trudeau became Canada’s Prime Minister-designate, media reporting universally characterized the election results as a likely boost for US-Canada relations. Coverage focuses on Trudeau’s promise of a less combative foreign policy style and the perception that he will be more willing to accept a US rejection of the Keystone pipeline. Reporting – including a combined 2 minutes and 50 seconds on the three broadcast networks – also indicates that despite Trudeau’s decision to withdraw his aircraft from the US-led coalition against ISIL, he is likely to be a more willing partner on climate change and other issues.

[ABC World News](#) (10/20, story 9, 0:20, Muir, 5.84M) reported President Obama on Tuesday congratulated Trudeau, who “swept into power with a message of optimism saying Canada beat fear with hope.” [USA Today](#) (10/21, Korte, 5.23M) reports Obama made the phone call “in an attempt to lock down continued cooperation with the northern neighbor on trade, terrorism, and climate change.” The White House, according to USA Today, “signaled that not much would change in the relationship” between the neighbors following the Liberal party’s victory. [CBC News](#) (10/20, Fitzpatrick, 225K) reported on its website that the White House indicated Obama and Trudeau “agreed on the importance of deepening the ‘already strong’ bilateral relationship” between the countries “and committed to strengthen joint efforts to promote trade and to combat terrorism and climate change.”

[AFP](#) (10/21) reports the White House and current Prime Minister Stephen Harper “clashed over climate

policy and the keystone pipeline. White House spokesman Josh Earnest on Tuesday said "it would be shortsighted to reduce the relationship between our two countries to just one issue," Chuck Todd reported on [NBC Nightly News](#) (10/20, story 5, 2:05, Holt, 7.86M) that "we now have a Canadian government that is politically more in line with the American government." According to Todd, "Relations have been good but they have not been so great of late. Will they now get better? That is why Americans should care."

In an article entitled "5 Reasons The US Should Care About Canada's New Prime Minister," [USA Today](#) (10/21, Hjelmgard, 5.23M) lists ways in which Trudeau "is likely to affect policies in Canada and the United States." According to USA Today, Trudeau "promised to improve strained relations" with Obama and said "he wants to find constructive ways of working with Washington on other issues." Another [USA Today](#) (10/21, Kovac, 5.23M) article reports that Trudeau and Harper "differ in their approach to foreign policy," with the incoming leader being less vocally pro-Israel and more focused on environmental issues.

In an analysis piece, [Bloomberg News](#) (10/21, 2.66M) says "a prompt rejection" of the Keystone pipeline by Obama "would make the job easier" for Trudeau "as he seeks to reset the country's relationship with the US, which he says was damaged" by Harper. According to Bloomberg, Trudeau "could use a quick US denial" of the pipeline "to focus discussions" with Obama "on issues such as trade and climate." Bloomberg notes there has been "speculation" that Obama "would reject the pipeline shortly after the Canadian election." However, [The Hill](#) (10/20, Cama, 471K) reported, Secretary of State Kerry said Tuesday that Canada's election results will not change the White House's approach to the Keystone issue. Kerry said the decision "is being based on the merits and countervailing balance of all the input that has come from a very exhaustive agency review." Kerry reiterated that he seeks a decision "as fast as possible."

[Reuters](#) (10/21, Mason, Rampton) reports the White House indicated it would like the new Canadian government to take increased actions to address climate change. Earnest said that while Canada has "made a substantial and important commitment" ahead of the Paris climate talks, "We believe that it's possible that there is more that Canada can do in this regard."

However, writing for [Mother Jones](#) (10/20, 758K), Suzanne Goldenberg claimed "those hoping for a U-turn in Canada's climate change policy...are in for a reality check." According to Goldenberg, while Trudeau does not align directly with many of Harper's views or policies, "it would be a mistake" to see the new Canadian leader or his party "as climate champions." In [Slate](#) (10/20, 1.38M), Joshua Keating argued that at least with regard to the Keystone pipeline, Trudeau does present a change from Harper. Keating characterizes Trudeau as "a very different leader" from Harper and says he will make the Keystone pipeline less of a focal point of US-Canada relations. According to Keating, Trudeau "has described his support for the pipeline as 'steadfast,' but it's clearly not the make-or-break issue for him that it was for Harper."

The [Wall Street Journal](#) (10/21, Vieira, Subscription Publication, 5.95M) reports Trudeau said he will work to restore Canada's reputation of defending minorities and become more involved in multilateral policy making. At a rally in Ottawa, Trudeau said, "To this country's friends around the world, I want to say this: Many of you have worried Canada has lost its compassionate and constructive voice in the world over the past 10 years. I have simple message for you: We're back." The [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) similarly reports that Trudeau "is likely to present a very different face to the world" than Harper, "but the most noticeable difference will probably be in tone." Trudeau has vowed to "put an end to Mr. Harper's often belligerent style of politics and diplomacy." Trudeau said Tuesday that "a positive, optimistic, hopeful vision of public life isn't a naïve dream – it can be a powerful force for change." The Times says Trudeau has previously indicated a desire to end Harper's reliance on military solutions and tough rhetoric, and instead focus on working within international organizations, such as the United Nations.

The [CBS Evening News](#) (10/20, story 10, 0:25, Pelley, 5.08M) reported, "Canada took a left turn" as "Trudeau and the Liberal Party rode in on a landslide." In a [USA Today](#) (10/21, 5.23M) op-ed, author David Andelman says "most of the reasons" Canadian voters chose Trudeau to lead the country "boiled down to one fundamental: The Liberal Party leader was simply nicer than his opponent. And most Canadians believe they are, too." Similarly, the [Wall Street Journal](#) (10/21, Subscription Publication, 5.95M) editorializes that Canadians wanted a change from the Harper government, which had become

isolated and sought to restrict debate. The [New York Times](#) (10/21, Subscription Publication, 11.82M) agrees, editorializing that Trudeau's election "shows how ready Canadians were to emerge from a decade under the Conservative government of the secretive and combative Stephen Harper."

[AFP](#) (10/21) reports Trudeau told Obama on Tuesday that Canadian fighter aircraft will withdraw from the US-led coalition against ISIL, but the new Canadian leader did not present a timeline for the move. In a front-page story, the [Washington Post](#) (10/21, A1, Brown, 6.76M) reports Trudeau said, "I committed that we would continue to engage in a responsible way that understands how Canada has a role to play in the fight against ISIL," adding, that Obama "understands the commitments I've made around ending the combat mission." According to the Post, a "senior Administration official," said Obama and Trudeau discussed joint anti-terrorism efforts and, "We expect Canada will continue to be a valuable contributor to the 65-member global coalition" against ISIL.

Trudeau's Win Could "Lead To Full Marijuana Legalization" In Canada. [USA Today](#) (10/21, Hughes, 5.23M) reports Trudeau's win "may lead to full marijuana legalization" for Canada. According to USA Today, Trudeau promised during his campaign that "Canada would create a system to tax, regulate and sell marijuana, along with stiff penalties for anyone giving pot to children or caught driving while stoned." USA Today says American "cannabis activists hailed Tuesday's election as a milestone, suggesting that a day may soon come when cross-border trade talks include...legal weed."

[AFP](#) (10/21) reports Trudeau's "promise to legalize recreational cannabis" will likely "help the nation's nascent medical marijuana industry." Investors, according to AFP, "are betting" they could build on companies' current production of marijuana for medical use and "quickly scale up to serve recreational pot users too, once Trudeau makes good on his promise."

NYTimes Analysis: Trudeau Is "No Dynast" Despite Father Being Former Prime Minister. In a 1,350-world profile piece, the [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) reports that despite there being "many easy parallels to draw between" Trudeau and his father, former Prime Minister Pierre Elliott Trudeau, Canada's incoming leader "is no dynast who slipped effortlessly into a family political machine." The Times notes that Trudeau "did not even enter politics until 18 years after his father gave it up, and seven year after his father's death." According to the Times, Trudeau "built his own cadre of advisers, mostly from his own generation" and sometimes "chose more difficult roads – partly, it appears, to show he had not been handed a life in politics on a platter."

In the [Washington Post](#) (10/21, 6.76M) "Reliable Source" blog, Emily Heil says Trudeau and his wife, Sophie Grégoire-Trudeau, "have a lot in common with the Obamas." According to Heil, "they'd have lots to talk about, apart from liberal politics, like fitness!"

IN APPARENT REVERSAL, BIDEN SAYS HE PRIVATELY URGED OBAMA TO AUTHORIZE UBL RAID. Vice President Biden did not reveal Tuesday whether or not he will enter the Democratic presidential race, but his remark that he privately advised President Obama to launch the 2011 raid that led to the death of Osama Bin Laden – which contradicted Biden's past public comments that he advised against the raid – is being interpreted as a possible line of attack against Hillary Clinton. All three broadcast networks reported on the statement, combining for nearly eight minutes of coverage, and ABC led with it. The tone of the coverage is mixed, with most reports calling it a reversal, and some concluding that Biden may be undercutting his own reputation for candor.

There was also Twitter discussion of Biden's remarks. Anthony De Rosa, a digital producer for The Daily Show who has nearly 89,000 followers, [tweeted](#), "Biden sounds like Brian Williams with his evolving recollection of the Bin Laden raid." Jonathan Martin of the New York Times [tweeted](#), "@vp today signals: he'll run & it'll get negative FAST or: he's not happy about being sidelined." His Times colleague Maggie Haberman [tweeted](#), "Biden's subtle digs at Clinton indicate that if he runs it'll be ugly." In addition, the hashtag [#BidenWatch](#) emerged on Twitter, with Fox Business Network's Trish Regan [tweeting](#), "Sure sounds like he's running...", Mashable's Juana Summers [tweeting](#) Biden's Wednesday official schedule, and Al Jazeera America's David Shuster [tweeting](#) that "Hallie Biden, widow of the late Beau Biden, says her family supports a Presidential campaign '100%'".

[ABC World News](#) (10/20, lead story, 2:50, Muir, 5.84M) reported that "as the pressure mounts for Joe Biden to decide whether he'll run...many [are] now asking, did he change his story?" ABC (Karl) added, "Biden has described Obama's decision as especially courageous because in that key meeting when it

came time to decide, most of the President's advisers, including Biden himself, were not in favor of the raid." On Tuesday, he "offered an entirely different account of what happened on that fateful day." Biden was shown saying, "So as we walked out of the room and we walked upstairs, I told him my opinion that I thought he should go but to follow his own instincts. But it would have been a mistake, imagine if I had said in front of everyone, 'don't go, or go,' and his decision was a different decision." Karl: "But until today, Biden has said he told Obama and his team that night to hold off on the raid."

The [CBS Evening News](#) (10/20, story 6, 2:05, Pelley, 5.08M) reported that Biden "sounded more like a presidential candidate, talking up his foreign policy credentials, doing some rewriting of his own history and firing a shot over the bow of the Democratic frontrunner." CBS' Nancy Corden added that Biden "never mentioned" Clinton by name, "but it was all too clear the comparison he was making when he said this about his stature overseas." Biden: "I will get sent to go speak to Putin or go speak to whomever, and it's because the secretary of state, we've had two great secretaries of state, but when I go, they know that I am speaking for the President." Cordes added that Biden left Clinton "out of his story" about the Bin Laden raid.

[NBC Nightly News](#) (10/20, story 3, 2:35, Holt, 7.86M) also said of Biden, "If anything, he is beginning to sound more like a candidate, taking not-so-veiled swipes" at Clinton. NBC (Welker) added that Biden "said he and the President were in lock-step when it came to authorizing the raid against Bin Laden." The [AP](#) (10/21, Lederman) says Biden "backtracked on his previous claims to have advised Obama against the raid" in "an unusual reversal."

[Bloomberg Politics](#) (10/21, Talev, 247K) reports that in his remarks at an event honoring his vice presidential predecessor Walter Mondale, Biden "portrayed himself as the central player" in the Administration "on everything from working with congressional Republicans to the killing" of Bin Laden. [USA Today](#) (10/21, Singer, 5.23M) says Biden "revised his account of his advice" to Obama after Mondale said he "would only disagree with Pr

SEN. MURKOWSKI SEES TOUGH ROAD FOR INTERIOR NOMINEE. [Politico Pro](#) (10/20, Subscription Publication) reports that Senate Energy and Natural Resources Committee Lisa Murkowski said that Interior Department pick Kristen Sarri would “have a lot of explaining to do at a hearing on six nominees today.” While Murkowski was “pleased that President Barack Obama had renamed Mount McKinley this summer to Denali, the Alaska Republican said she was still frustrated with the Interior Department’s ‘heartless decision’ to deny a road in King Cove.” Murkowski also “criticized Interior for closing off oil production in Alaska and last week’s cancellation of offshore sales and lease extension.”

Meanwhile, the [Daily Caller](#) (10/21, Barton, 375K) reports that Murkowski is “torn between leaving the Department of the Interior’s independent watchdog post vacant, or confirming President Barack Obama’s nominee crippled by recurring allegations of ‘playing games with Congress.’” She said, “I strongly believe that Interior needs a permanent [inspector general], and I’m disappointed the administration has let the position go unfilled for six and a half years.” Murkowski continued, “But I am also committed to ensuring that the individual we confirm is fully independent ... The tenure that you have been involved with thus far in this position has been marked by controversy.”

Additional coverage was provided by [The Hill](#) (10/21, Henry, 471K), [KTOO-FM](#) Juneau, AK (10/20), and [Alaska Public Radio Network](#) (10/20, 2K).

HISTORIC \$186 MILLION SETTLEMENT WITH CHOCTAW, CHICKASAW NATIONS LAUDED.

The [Indian Country Today Media Network](#) (10/20, 32K) reports that “tribes and the U.S. Department of the Interior heralded the outcome of a \$186 million settlement signed earlier this month between the federal government, the Choctaw and the Chickasaw nations to solve a longstanding land trust dispute as a new chapter in relations.” During the October 5 signing ceremony, Chickasaw Nation Governor Bill Anoatubby “gave a nod to the impetus provided” by Interior Secretary Sally Jewell. He

said, we respect the vital role Secretary Jewell has taken in helping make this historic settlement a reality. We are confident she will play an essential role in our efforts to continue strengthening the relationship between our governments, because we believe she has a unique appreciation for the mutual benefits of a positive government-to-government relationship.” Jewell said, “Today’s agreement is the latest addition to a record number of longstanding settlements resolved under this Administration. This historic settlement is the start of a new chapter in our trust relationships with the Chickasaw and Choctaw Nations, and underscores our commitment to fulfilling those responsibilities to Native communities across the country.”

U.S. TREASURY CONFIRMS \$20B BALANCE FOR LWCF. [E&E Publishing](#) (10/21, 705) reports that “the Land and Water Conservation Fund that expired earlier this month for the first time in its 50-year history currently contains nearly \$20 billion, according to the U.S. Treasury, which maintains the program’s balance sheets.” But “whether that is ‘real’ money available to be spent on federal land acquisitions, private land easements and state recreation projects depends on whom you ask.” The article notes that “the \$19.8 billion can only be reduced until Congress reauthorizes the program.”

Additional coverage of the LWCF was provided by the [Durango \(CO\) Herald](#) (10/20, 31K).

PROPOSED DESIGNATIONS OF THREE NATIONAL MONUMENTS IN CALIFORNIA DESERT RAISES CONCERNS ABOUT “LAND GRAB.” [Fox News](#) (10/20, 8.91M) reports that “a group of off-roaders and others are attempting to fight a proposed designation of three national monuments in the California desert under the Antiquities Act.” The Obama Administration is “considering using the federal Antiquities Act to bypass the legislative process at the request of Sen. Dianne Feinstein, whose efforts to have the Mojave Trails and Castle Mountain, both in the Mojave Desert, and a section of the Sonoran Desert named federal sites were repeatedly blocked by Republicans.” According to the article, “a White House move could put the land under federal control, which critics say could cut funding for upkeep or even restrict access.”

UNMANNED HELICOPTER OFFERS NEW WAY TO FIGHT WILDFIRES. The [Voice of America](#) (10/21, Banse, 32K) reports that the K-MAX “unmanned, water-dropping” helicopter was tested by the US government. The helicopter can fly through limited visibility. Brad Koeckertiz, the unmanned aircraft program manager with the US Department of Interior, says that unmanned helicopters such as the K-MAX will be integrated into routine measures to fight wildfires over the next few of years. The article notes that the K-MAX helicopters have already been used by the US Marines in Afghanistan, to “resupply remote outposts at night” and replace “dangerous convoys on the ground.” The article notes that the growing uses for drones is also why the FAA is seeking to register all drones.

Additional coverage was provided by [Vertical Magazine \(CAN\)](#) (10/21).

JEB BUSH PROPOSES MOVING INTERIOR DEPARTMENT FROM D.C. To Western City. The [Las Vegas Sun](#) (10/20, Lucas, 199K) reports that “Republican presidential candidate Jeb Bush will unveil his proposals for Western land and resource management in a campaign stop in Reno on Wednesday morning, in a speech likely to resonate with conservative voters opposed to what they see as federal overreach in the Western states.” Bush is “expected to speak at 11 a.m. Wednesday at Rancho San Rafael Regional Park before appearing at a forum sponsored by the LIBRE Initiative at the College of Southern Nevada Cheyenne Campus in North Las Vegas at 6 p.m.” In the proposal, Bush will “call for moving the headquarters of the Department of Interior from Washington, D.C., to a city in the western United States like Denver, Salt Lake City or Reno and will say that as president he would direct federal agencies to give broad latitude to states to determine land-use issues.”

STUDY: ALASKAN WILDFIRES COULD EXACERBATE GLOBAL WARMING. The [Washington Post](#) (10/21, Mooney, 6.76M) reports that some greenhouse gas sources outside the scope of forthcoming UN climate talks are beyond governments’ control, such as raging peat fires in Indonesia this year, emitting “as much as Japan produces in a year from fossil fuels.” Elsewhere, a new study in Nature Climate Change reaffirms concerns about the emissions of northern fires in Alaska. The Post reports that “climate researchers are still trying to figure out how all of these factors will interrelate,” but fire is a “powerful determinant of how much carbon resides in land, rather than in the air, across our globe.”

INTERIOR'S VINE ACCOUNT HIGHLIGHTED. [Politico](#) (10/21, 942K) highlights the Interior Department has a great Vine account. Providing a link, Politico says "this is Internet gold."

Empowering Native American Communities:

BIA RULE ANNOUNCES RULE GIVING TRIBES MORE CONTROL OVER ELECTIONS. [Law360](#) (10/20, 21K) reports that the BIA "on Monday announced its final rule for Native American tribal elections conducted by the U.S. Department of the Interior, saying the new rule will encourage tribes to take control of their elections and help protect the voting rights of tribe members living in urban areas." Assistant Secretary of Indian Affairs Kevin K. Washburn said "in a statement Monday that the rule will allow tribes to opt out of having the interior secretary conduct their elections."

The [Native American Times](#) (10/20, 337) reports that Washburn said, "Though many federal responsibilities concern the lands we hold in trust for tribes and Indian people, more than 55 million acres nationwide, the United States has a moral obligation to preserve connections between Indian people and their tribes that it once sought to destroy. For the future of Native nations and the health of Indian Country, American Indians in urban areas must work harder to maintain connections with their tribes. One important aspect of that relationship is participation in the civic and political life of their tribal governments. For that reason, our Secretarial election amendments seek to prevent tribal members living in urban areas from being inadvertently disenfranchised in Secretarial elections."

HEARING FOCUSES ON NATIVE HAWAIIAN ELECTION. The [AP](#) (10/21, Kelleher) reports from Honolulu that a federal court hearing began on Tuesday "in a lawsuit by people who want to put a stop to an election process that is underway for Native Hawaiians." The lawsuit, filed in August, "says it's unconstitutional for the state to be involved in a race-based election." The state "argues in court documents that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it's not involved in next month's vote to elect delegates for a convention to determine self-governance for Native Hawaiians." Tuesday's hearing "is focused on the plaintiffs' motion for a preliminary injunction," and the plaintiffs "want the judge to limit voter registration activities or stop the election altogether."

Additional coverage was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Navajo Times \(AZ\)](#) (10/21, 66K), and [Yahoo! News](#) (10/21, Kelleher, 5.98M).

INTERIOR SIDES WITH ALASKA NATIVE GROUP IN INVESTIGATION OF MASSACHUSETTS COLLEGE TRIBAL COLLECTION. The [AP](#) (10/21, 2.28M) reports that "a Massachusetts college was found in violation of a federal law regulating the possession and sale of potentially sacred artifacts following a complaint from an organization of Alaska Natives." The Interior Department said "an investigation substantiated the complaint against Andover Newton Theological School filed in June by the Sealaska Heritage Institute." The institute's president, Rosita Worl, said "the school possesses at least two southeast Alaska artifacts, including a Tlingit halibut hook that is considered sacred."

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/21, D'oro, 344K), the [Boston \(MA\) Herald](#) (10/21, 548K), the [Daily Mail \(UK\)](#) (10/21, 5.59M), the [Miami \(FL\) Herald](#) (10/21, 651K), [Minneapolis \(MN\) Star Tribune](#) (10/21, D'oro, 1.19M), [ABC News](#) (10/21, 3.97M), and the [Alaska Dispatch News](#) (10/20, 219K).

US ATTORNEY SAYS BIA OFFICER WAS JUSTIFIED IN DEADLY SPIRIT LAKE SHOOTING. The [AP](#) (10/21) reports that US Attorney Chris Myers "says" that an investigation by his office came to the conclusion that BIA Officer Terry Morgan was justified in shooting and killing "31-year-old Joseph Charboneau during a standoff with officers on June 16." The [Grand Forks \(ND\) Herald](#) (10/21, 100K) reports that the US Attorney's Office "said" the shooting was justified because Charboneau posed a "real and immediate" threat to officers and another person at the scene after he refused to put down his gun, which was pointed at the officers. The Grand Forks Herald reports that, as a result of the investigation, Federal prosecutors "will not file charges against" Morgan.

Additional coverage was provided by the [Dickinson \(ND\) Press](#) (10/21, 1K), the [Forum of Fargo-Moorhead \(ND\)](#) (10/21, 14K), [KXJB-TV Fargo \(ND\)](#) Fargo, ND (10/21, 18K), [KFGO-AM Fargo \(ND\)](#) Fargo, ND (10/20, 3K), [KXMC-TV Minot \(ND\)](#) Minot, ND (10/21, 1K), and [KFYR-TV Bismarck \(ND\)](#)

BISMARCK, ND (10/21, 1K).

CRIME JUMPS AFTER TRIBES CUT FROM BIA FUNDING. The [Los Angeles Times](#) (10/20, Romney, 4.07M) reports on a "time of crisis for public safety on tribal lands." According to the article, "a federal law decades ago shifted the primary burden of criminal law enforcement on tribal lands in California and five other states to local authorities," but "many lack the resources to do the job and, in some cases, sufficient knowledge of tribal law and culture to win the trust of tribal members." After "tribes were cut off from steady funding for their own justice systems," crime has "flourished."

ADDITIONAL COVERAGE: YAKAMA NATION'S PETITION TO SELF-GOVERN APPROVED.

Additional coverage that the BIA on Monday granted the Yakama Nation's petition for "retrocession" was provided by the [Bellingham \(WA\) Herald](#) (10/21, 101K), the [Clark County \(WA\) Columbian](#) (10/20, 86K), the [Washington \(DC\) Times](#) (10/21, 344K), the [Spokane \(WA\) Spokesman-Review](#) (10/20, 183K), the [Native American Times](#) (10/21, 337), the [Law360](#) (10/21, 21K), [KNDU-TV Yakima \(WA\)](#) Yakima, WA (10/21, 3K), and [KUOW-FM Seattle \(WA\)](#) Seattle (10/21, 15K).

GILLETTE'S SERVICE IN OBAMA ADMINISTRATION PRAISED. In an editorial, the [Bismarck \(ND\) Tribune](#) (10/21, 37K) lauds Jodi Gillette's service in the Obama Administration. According to the paper, Gillette's "positions gave her a voice in a White House that has seemed genuinely concerned about Native American issues."

Office of Insular Affairs:

ASSISTANT SECRETARY KIA'AINA PROPOSES MARSHALLS FUND CHANGES. [Radio New Zealand](#) (10/21, 1K) reports that "a top US official has submitted a proposal to the Senate and House to allow the people of Bikini to use resettlement and relocation funds outside of the Marshall Islands." Assistant Secretary for Insular Areas Esther Kia'aina says "it is an appropriate course of action to take regarding the welfare and livelihood of the Bikinian people." The Bikinians were "displaced by US nuclear weapons testing 70 years ago but are now looking at relocating again because of deteriorating conditions on Kili and Ejit Islands." According to the article, "in addition to cramped living quarters and a lack of suitable sustainable resources, the islands have been experiencing more frequent storms and king tides resulting in salt water inundation and the destruction of crops."

[Radio New Zealand](#) (10/21, 1K) reports that "a representative from Bikini Atoll says a proposal to allow people to use resettlement and relocation funds outside of the Marshall Islands is not wanted." Bikini liaison officer Jack Niedenthal says "the US should take full responsibility for any resettlement including providing extra financing." Niedenthal said, "We still got a ways to go, we still have to do some more lobbying and some more talking to people in Washington to make them understand that what's being proposed by the assistant secretary is what we view as 'Plan B'. It's not ultimately what we want in terms of helping our people."

CHINA STRENGTHENS RELATIONSHIP WITH PACIFIC REGION. The [Marianas Variety](#) (10/21) reports that "China and the Pacific Islands Forum Secretariat further strengthened their relationship on Friday when the two met at a ceremony to hand over \$1.05 million to assist the Pacific region." Forum Secretariat Secretary General Meg Taylor and Chinese Ambassador to Fiji Zhang Ping "attended the ceremony and delivered speeches respectively." Zhang "reiterated his nation's ongoing interest in the region saying, 'China attaches great importance to the South Pacific region. The Chinese side stands ready to enhance mutual understanding and cooperation with Pacific Island Countries and contribute to the development and capacity building in the region.'"

COUNTRIES IN PACIFIC URGED TO BEGIN TALKS ON CLIMATE MIGRATION. [Radio New Zealand](#) (10/21, 1K) reports that "all countries in the Pacific are being urged to start discussions on how to help people forced to move from low lying atoll nations like Kiribati and Tuvalu." According to the article, "184 million people worldwide were displaced by disaster between 2008 and 2014 and at special meetings in Geneva last week 110 countries gave the nod to a Protection Agenda for dealing with future migration challenges." The article notes that "the experiences of small island countries which face rising seas due to climate change helped form the global action plan under the Swiss Norwegian Nansen Initiative."

JOURNALIST SPEAKS AT UNIVERSITY OF GUAM ON CLIMATE ISSUES, CORRUPTION IN PACIFIC ISLANDS. The [Marianas Variety](#) (10/21) reports that “author and journalist Giff Johnson spoke to students at the University of Guam on Monday evening about climate change and development in the Pacific islands.” Johnson’s “lecture, entitled ‘Idyllic No More: Pacific Island Climate, Corruption and Development Dilemmas,’ is based on his latest book — a compilation of essays detailing the looming climate threat to the region, its booming fishing industry, and the U.S. nuclear test legacy in the Marshall Islands.” Johnson called attention to “climate-driven migration from remote Pacific islands to Guam and mainland U.S.”

RISING SEA LEVELS THREATEN KIRIBATI. The [National Geographic](#) (10/21, 31.65M) provides a picture gallery of the threat of rising sea levels driven by climate change on Kiribati.

Tackling America’s Water Challenges:

WATER SCHEDULED TO BE RELEASED FROM NEW MELONES. The [Sonora \(CA\) Union Democrat](#) (10/21, 28K) reports that “more than 7 billion gallons of water is scheduled to be released from New Melones Reservoir beginning today to ensure flows in the Stanislaus River will keep temperatures cool enough for adult salmon migrating up the river to spawn this fall.” Oakdale Irrigation District and South San Joaquin Irrigation District said “it would benefit river conditions and fisheries, as well as the needs of agriculture and more than 200,000 residential customers downstream.” The article notes that “earlier this year, the irrigation districts sparred with the U.S. Bureau of Reclamation — which manages New Melones Reservoir — over spring pulse flows that they feared would leave as little as 147,000 acre-feet in the reservoir by the end of September.”

SAN JOAQUIN COUNTY BOARD OF SUPERVISORS VOTE TO OPPOSE DELTA TUNNELS PLAN. The [Lodi \(CA\) News-Sentinel](#) (10/21, 14K) reports that “at a meeting on Tuesday, the San Joaquin County Board of Supervisors voted to adopt a resolution in formal opposition of California WaterFix, also known as the twin tunnels plan.” Supervisor Kathy Miller said, “The WaterFix is just a thinly veiled version of the former (Bay Delta Conservation Plan) and continues to push the fatally flawed twin tunnels, which will simply sacrifice one region of California for the benefit of another.”

Securing America’s Energy Future:

Renewable Energy:

ENVIRONMENTALISTS, DOMINION BOTH SUPPORT OFFSHORE WIND DEVELOPMENT. On his [Bacon’s Rebellion \(VA\)](#) (10/21, Bacon) blog, James Bacon reports on an Environment Virginia-sponsored webinar held Tuesday morning in which representatives from Dominion, environmental groups, and the McAuliffe Administration all voiced support for the utility’s experimental offshore wind farm project. For environmentalists, Bacon writes, the project represents the beginning of an industry that would increase the use of green energy along the Atlantic and displace fossil fuels. For the Governor’s office, it represents increased green energy coupled with economic development that takes advantage of the Newport News area’s shipbuilding industry.

Onshore Energy Development:

CHESAPEAKE ENERGY FINED \$2.1 MILLION FOR UNDER-REPORTING NATURAL GAS. The [Greenwire](#) (10/20, Subscription Publication) reports that the Interior Department on Monday “announced a \$2.1 million civil penalty against Chesapeake Energy Corp. for misreporting the amount of gas it produced and sold from American Indian lands in Oklahoma.” Chesapeake “failed to comply with a 2011 order that found ‘systemic errors’ in the company’s monthly production reports for more than 100 Indian leases, according to Interior’s Office of Natural Resources Revenue.” The company “agreed to amend the monthly reports, but it continued to maintain inaccurate information on the agency’s data systems, ONRR said.” The firm was “assessed a penalty based on ‘knowing or willful maintenance’ of the inaccurate information, ONRR said.”

Additional coverage was provided by [Politico](#) (10/21, 942K), [Natural Gas Intelligence](#) (10/21, Subscription Publication), the [Native American Times](#) (10/21, 337), and [KOKC-AM Oklahoma City \(OK\)](#) Oklahoma City (10/20, 1K).

TEXAS ENERGY REGULATOR OPPOSES STREAM PROTECTION RULE. [Law360](#) (10/21, 21K) reports that “Texas’ top energy regulator on Tuesday said the agency will oppose a U.S. Department of the Interior proposed rule aimed at better protecting streams and other waterways from nearby mining activity, saying the regulation encroaches on ground better left to the state.” Texas Railroad Commission Chairman David Porter on Tuesday said “the state would sign on to the multistate Interstate Mining Compact Commission’s comments opposing the proposed waterway regulation.”

USGS REPORT STATES EARTHQUAKES COINCIDE WITH OKLAHOMA OIL BOOMS. [KOCO-TV](#) Oklahoma City (10/21, 93K) reports that “a study by the United States Geological Survey states that the earthquakes from the past 100 years seem to coincide with the oil boom in Oklahoma.”

OKLAHOMA REGULATORS SHUT DOWN THREE MORE DISPOSAL WELLS. The [EnergyWire](#) (10/21, Subscription Publication) reports that “Oklahoma oil and gas regulators dealing with a dramatic increase in earthquakes near the pipeline hub of Cushing have shut down three more disposal wells.” Also, “another well was shut down by the company that owns it after regulators said they were concerned it was drilled too deep.” In addition, “the operators of seven other wells were told in a letter written Friday and released yesterday that they must reduce the volume of drilling waste that they inject deep underground.”

OKLAHOMA LIMITS DISPOSAL WELLS AMID CUSHING QUAKES. [Reuters](#) (10/21, Hampton, Brandes) reports that Oklahoma’s oil and gas regulator on Monday said it could impose new limits on all saltwater disposal wells within a 10-mile radius of Cushing. Reuters reports that Oklahoma now experiences as many as two magnitude 3.0 quakes per day, up from two per year. Thirteen wells have been ordered shut and approvals for new wells have been halted, Reuters reports. Scientists told Reuters that shutting wells could ease tectonic disruption in Oklahoma.

STUDY: FRACKING CAN CAUSE METHANE LEAKS IN NEARBY ABANDONED OIL WELLS. [Reuters](#) (10/20, Valdmanis) reported that according to a study published Tuesday in the Water Resources Research journal, fracking can cause methane leaks in nearby abandoned oil wells. The methane leaks could be a large source of unrecorded greenhouse gas emissions, according to the study. The study said that energy companies could reduce the probability of such methane leaks by trying to identify abandoned wells before they begin fracking, although the task could be difficult due to large numbers of unmarked abandoned wells.

BLM CRITICIZED FOR FAILING TO PRODUCE PICTURES UNDER FOIA REQUEST. For the [Fairfield \(MT\) Sun Times](#) (10/21), Darryl L. Flowers criticizes the BLM for failing to provide pictures in connection with “the proposed Solenex, LLC natural gas well on public lands in the Lewis and Clark National Forest” that were requested under the Freedom of Information Act. The paper received “sixteen photos” and “two photos were missing.” He notes that “curiously, the two omitted photos were the only ones that included a person in the photos.”

Offshore Energy Development:

FEDS INVESTIGATE WORKER’S DEATH ON DRILLSHIP CONTRACTED BY CHEVRON. [Fuel Fix \(TX\)](#) (10/20, Dlouhy, 7K) reports that officials from the Bureau of Safety and Environmental Enforcement and the Coast Guard are investigating “the death of a worker on a drillsip in the Gulf of Mexico that was preparing to bore a well for Chevron.” Fuel Fix says that “the Pacific Santa Ana drillsip was just beginning operations for Chevron in about 4,800 feet of water at the site and had not yet penetrated the sea floor when an employee of that drilling contractor was fatally injured.” Fuel Fix adds that Chevron has a 36 percent working interest in the Keathley Canyon well-leasing block where the incident occurred, an area where “Chevron outlined ambitions to drill up to seven wells” earlier this year.

The [AP](#) (10/21) reports that Amy Roddy, spokeswoman for Pacific Drilling SA, the ship’s owner, “said the company is not releasing any details about the man to respect his family’s privacy. She also refused to disclose how the man died or details of the accident, citing an ongoing investigation.”

[NASDAQ](#) (10/20, Sider) reports that Chevron has contracted the ship since 2012. The [New Orleans Times-Picayune](#) (10/21, Larino, 718K) adds that “operations have been shut down and personnel

remain onboard, according to the driller's operator."

[Offshore Engineer](#) (10/20, Leon) reports that "the ship was to use its dual gradient drilling functions for Chevron's Anchor-1 prospect last year in Green Canyon block 807, but the well was junked due to mechanical failures. However, in January of this year, Chevron hit high quality oil pay in multiple Lower Tertiary Wilcox Sands at a second Anchor well also drilled by the Pacific Santa Ana."

The [Dow Jones Newswires](#) (10/21, Sider) reports that this is the first death related to offshore drilling operations in the Gulf of Mexico this year.

[Reuters](#) (10/21), [gCaptain](#) (10/21, 2K), [Upstream Online](#) (10/21, Schmidt, Brenner, 20K), and [Maritime Executive](#) (10/20, 21) also cover the story.

BRIARCLIFFE ACRES VOTES AGAINST OFFSHORE DRILLING. The [Myrtle Beach \(SC\) Online](#) (10/21, 36K) reports that "in a storm of debate over offshore drilling, Briarcliffe Acres surfaced as the latest coastal town to join a united front against seismic testing and drilling for oil and natural gas off of South Carolina's beaches." According to the article, "missing councilwoman Abby Stewart, who has been with family on the west coast, the town council unanimously passed a resolution Monday, joining 23 other S.C. coastal towns in a stance against offshore drilling."

SHELL VESSEL RESCUES FRENCHMAN, CAT FROM SAILBOAT STRANDED IN SEAS NEAR ALASKA. The [AP](#) (10/21, Thiessen) reports that a Frenchman and the cat tucked inside his clothing were rescued on Tuesday after he leapt from his sailboat to a waiting rescue ship sent by Shell. The man activated a location beacon in the high seas south of Alaska and told the Coast Guard his sailboat had lost its rudder and rigging in the high winds and 20-foot waves. The Coast Guard contacted Shell's oil drilling rig, the Polar Pioneer, which is on its way to Port Angeles, and the rig "sent a support ship, the Tor Viking, to rescue the sailor." The AP reports that "it wasn't immediately clear if the man would continue with the Shell ships to Washington state."

CUNNINGHAM: INTERIOR DEPARTMENT OFFICIAL SHUTS THE DOOR ON ARCTIC DRILLING. In an analysis of the Interior Department's recent decision on the future of Arctic drilling, [Oil Price](#) (10/21, 2K) reporter Nick Cunningham writes the Interior Department's decision to cancel lease sales through 2017 "leaves almost no possible pathway for an oil company to drill in the Arctic for years to come, perhaps killing off drilling for a decade or so at a minimum." Cunningham goes on to write that "it was likely that there wouldn't have been new drilling in any event, given Shell's decision and current market conditions, but Interior's decision officially shuts the door on the Arctic in the medium-term."

Casey: Interior's Actions On Arctic Drilling Trends "Toward A Permanent Clampdown." [CleanTechnica's](#) (10/20, 15K) Tina Casey writes that "in the absence of local regulations, the Feds are the only game in town and it seems that the Arctic's role in the US economy is too important to trust to compliance by oil companies." Casey adds that, even though the Interior's actions last week on Arctic drilling may be "only temporary, but the trend is toward a permanent clampdown."

4-Traders: Federal Government To Blame For Low Arctic Drilling Interest. In an op-ed piece on the Interior's Arctic drilling decision, [4-Traders](#) (10/21, 5K) writes the Federal government's "difficult" regulatory obstacles is to blame for the lack of interest among oil companies to explore for oil and natural gas in the Arctic. 4-Traders writes that the "demand for oil and natural gas isn't going away, so energy domestic exploration must continue in the Arctic and elsewhere. But as we've seen, by putting up unnecessary regulatory hurdles, regulators can cause job and economic growth opportunities to be missed."

America's Great Outdoors:

Bureau of Land Management:

BLM TO REVIEW HAGERMAN-HAILEY TRANSMISSION LINE. [Boise \(ID\) State Public Radio](#) (10/21) reports that the BLM will review the Hagerman to Hailey transmission line, paying "special attention to the greater sage grouse in the area." Stacey Baczkowski, a biologist with Idaho Power,

says “the company has been working with the BLM for the last few years to make sure the line is built with the bird in mind.” Baczkowski says “the power company plans to build the new transmission line as close to the current one as possible, and will follow BLM rules about construction during sage grouse mating times.”

UTAH WATER DISTRICT RAISES CONCERNS ABOUT BLM REVISION TO LAND-USE PLAN.

The [Deseret \(UT\) News](#) (10/21, 407K) reports that “federal policies that either aim to instill more oversight of water or deny access altogether have some Utah leaders frothing over what they say is a repeated pattern of overreach that threatens local economies and livelihoods.” Ron Thompson, general manager of the Washington County Water Conservancy District, said “possible revisions to a land-use plan by the Bureau of Land Management in Washington County have severe ramifications should one particular approach be adopted.” Thompson said “the BLM — under one option — is ignoring key considerations that went into the passage of the bill, including water supplies being left unhindered and right of way corridors left intact.”

ADDITIONAL COVERAGE: HELICOPTER CRASHES NEAR SEARCHLIGHT DURING CATTLE ROUNDUP. Additional coverage of the helicopter crash near Searchlight during a cattle roundup was provided by the [Las Vegas Review-Journal](#) (10/21, 378K).

Fish and Wildlife Service:

CONSERVATION LEADERS ATTEND NATIONAL CONSERVATION SUMMIT. [KYTV-TV](#)

Springfield, MO (10/21, 135K) reports that “more than 40 leaders from the leading conservation groups in America are meeting in Springfield this week for a National Conservation Summit hosted by The Johnny Morris Foundation.” According to the article, “participants include the U.S. Fish and Wildlife Service, National Geographic, Audubon Society, and Ducks Unlimited.” The article notes that “the purpose of the historic gathering is to collectively discuss opportunities to educate and engage the public in efforts to protect wildlife and natural habitats in preparation for the grand opening of America’s Wildlife Museum and Aquarium in 2016.”

The [Springfield \(MO\) News-Leader](#) (10/20, 49K) reports that “three exhibits of America’s Wildlife Museum & Aquarium, formerly Wonders of Wildlife, were open to media for a tour on Oct. 20, 2015 at the museum located next to the Bass Pro Shops flagship store in Springfield, Mo.” More than 40 conservation leaders attending a National Conservation Summit “hope the new Bass Pro Shops wildlife museum and aquarium will convey to visitors when it opens in mid 2016.” FWS Director Dan Ashe, “one of the summit attendees,” called the museum “one of the foremost conservation attractions in the world.” He said, “Through conservation efforts, we can be successful in sustaining these populations of animals that are threatened or endangered. People hear about the industrial-scale poaching of elephants that’s happening in Africa. That’s not hunting. With this museum, here’s an opportunity to tell the story of how we can protect wildlife habitat, and that when hunting is done well, with appropriate regulations, it sustains wildlife populations.”

Additional coverage was provided by [KOLR-TV](#) Springfield, MO (10/21, 6K), [KYTV-TV](#) Springfield, MO (10/21, 135K), and [KOLR-TV](#) Springfield, MO (10/21, 6K).

CNMI QUESTIONS INCLUSION OF SOME SPECIES ON ENDANGERED LIST. The [Radio New Zealand](#) (10/21, 1K) reports that “the Northern Marianas government says the decision to list 23 species in Guam and the CNMI as threatened or endangered was rushed.” The government says “it supports the US Fish and Wildlife Service’s listing of seven of the 17 CNMI species, but it questions the inclusion of some of the other species.” The Department of Land and Natural Resources says “a number of the species do not meet the definitions of threatened or endangered and don’t require federal protection.”

FWS LOOKS TO RESTORE HABITAT ON ROOT RIVER. The [Rochester \(MN\) Post-Bulletin](#) (10/21, 28K) reports that “federal wildlife officials are seeking public input on a plan to restore and enhance habitat on 825 acres of Minnesota land along the Root River in Houston County.” Managed by the FWS “as part of the Upper Mississippi River National Wildlife and Fish Refuge, the Root River Tract sits to the east of Hwy. 26 between La Crescent and Brownsville.” The article notes that “the site includes 664 acres of hunting and farmland purchased in 2009 with money from the Land and Water Conservation Fund.”

SHOOTING OF CALIFORNIA CONDOR IN ARIZONA UNDER INVESTIGATION. [Grand Canyon \(AZ\) News](#) (10/21) reports that FWS special agents and Arizona Game and Fish Department “law enforcement personnel are investigating the lethal shooting of an endangered California condor that occurred on the Kaibab Plateau in northern Arizona Oct. 8.”

MAN CLAIMS HE BLOCKED ARIZONA BIKE TRAIL TO PROTECT OWLS. The [AP](#) (10/21, 344K) reports that “the 81-year-old man who blocked a Flagstaff-area mountain bike race says he did it to protect an endangered owl species.” J.D. Protiva “appeared in federal court Monday on misdemeanor charges related to blocking the Elden Springs Trail before the August race.” Protiva says “the path goes through protected Mexican spotted owl habitat.”

ADDITIONAL COVERAGE: MONARCHS GET HELP AS CALIFORNIANS PLANT DROUGHT-TOLERANT MILKWEED. Additional coverage that monarch butterflies could benefit from the California drought was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Albuquerque \(NM\) Journal](#) (10/21, 259K), [KABC-TV Los Angeles \(CA\)](#) Los Angeles (10/21, 413K), and [WRC-TV Washington \(DC\)](#) Washington (10/21, 345K).

FWS INVESTING IN PROJECTS TO STRENGTHEN ATLANTIC COASTAL DEFENSES AGAINST FUTURE STORMS. In an op-ed for the [New Haven \(CT\) Register](#) (10/20, 172K), Wendi Weber is Northeast regional director for the FWS, writes that “federal money for Hurricane Sandy recovery has spurred an unprecedented effort to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms.” She notes that the FWS and other Interior Department “agencies are investing \$787 million in hundreds of projects to clean up and repair damaged refuges and parks; restore coastal marshes, wetlands and shoreline; connect and open waterways to improve flood control; and increase our scientific understanding of how these natural areas are changing.” According to Weber, “these investments support the goal of President Barack Obama’s Climate Action Plan to make communities more resilient to increasingly intense storms predicted with a changing climate.”

National Park Service:

MUSIC VIDEO CELEBRATES 100 YEARS OF NPS. The [New Bedford \(MA\) Standard-Times](#) (10/20, 53K) reports on “a locally made music video that celebrates 100 years of the National Park Service.” According to the article, “published on Oct. 15, the Centennial video has more than 18,500 views on the NPS facebook page and more than 530 on the Youth Ambassador Program’s YouTube page, the group that made it.” NPS Director Jon Jarvis, “who met the traveling crew in Washington, D.C., makes a cameo appearance in the video to say, ‘It’s great to celebrate a hundred years with YAP!’”

Kentucky Lieutenant Gov. Luallen Touts National Parks. The [Louisville \(KY\) Courier-Journal](#) (10/20, 414K) reports that Kentucky Lieutenant Governor Crit Luallen on Tuesday “touted the economic impact of Kentucky’s travel and tourism industry” in “an address to the Kentucky Travel Industry’s annual conference in Bowling Green.” Following her remarks, Luallen “recognized five national parks in Kentucky as part of the National Park Service Centennial in 2016.” She “presented proclamations to representatives of the parks.”

Couple Visiting 59 National Parks In 12 Months. The [Cleveland Plain Dealer](#) (10/21, 1.03M) reports that “Cole and Elizabeth Donelson, St. Louis natives, are two months into their grand adventure: 59 parks in 12 months – part celebration of the National Park Service’s 100th anniversary, part exercise in youthful spontaneity.” Their goal is to “see the best of the United States, and inspire others – particularly other millennials – to do the same.” The article notes that “their mission meshes well with a new campaign of the Park Service, which celebrates its centennial anniversary in 2016.”

WATCHDOG RELEASES REPORT ON NPS CONSTRUCTION FUNDS. The [Greenwire](#) (10/20, Subscription Publication) reports that “a federal watchdog yesterday released a disputed report alleging that the National Park Service is violating congressional intent by dipping into its construction account to cover security, air testing and other reimbursable expenses that should have been paid up front by other agencies.” The NPS construction account is “only for expenses that relate to ‘construction, improvements, repair or replacement of physical facilities,’” the Department of the Interior’s Office of Inspector General report said, “citing the language of the agency’s appropriation.”

However, “the OIG found that 17 out of a sample of 21 interagency agreements that used Park Service construction funds to cover reimbursable costs did not appear to include ‘a valid construction purpose.’” The article notes that “these included \$4.9 million that NPS spent from its construction account on security at the Department of the Army’s Memorial Day and Independence Day concerts at the Capitol in 2014 and \$37.5 million over seven years on air quality monitoring at national parks that will be paid back to NPS by U.S. EPA.”

HOUSE COMMITTEE PASSES GRAND CANYON BISON MANAGEMENT ACT. [Grand Canyon \(AZ\) News](#) (10/21) reports that the U.S. House Natural Resources Committee approved the Grand Canyon Bison Management Act “allowing the Arizona Game and Fish Department (AZGFD) to better manage and conserve the bison population within the park Oct. 8.” The legislation “requires the U.S. Department of Interior and the Arizona Game and Fish Commission to coordinate on a plan that allows sportsmen holding a valid state-issued hunting license to assist in management of the bison population within the park.”

THUNDERSTORMS CAUSE FLOODING, MUDSLIDES IN DEATH VALLEY NATIONAL PARK. The [Greenwire](#) (10/20, Subscription Publication) reports that “mudslides and flooding after severe thunderstorms in Death Valley National Park on Sunday trapped three park rangers and about 20 visitors – many out to see a clear night sky – in a volcanic crater overnight.” Park spokeswoman Abby Wines said “the stranded people spent the night in Ubehebe Crater, maintaining contact with park headquarters until they were able to reach safety yesterday morning.” The article notes that “no injuries were reported, but Wines said the unexpectedly severe storms knocked out power in the area, damaged and closed several roads, and filled a historic visitor’s center with several feet of mud and debris.”

NPS SET TO CONTINUE WITH TREE-CUTTING AT POTOMAC CAMPGROUND. The [Bethesda \(MD\) Magazine](#) (10/21) reports that “after complaints from two nearby residents and a call from County Council member Roger Berliner temporarily halted tree-cutting operations Friday at a Potomac campground, the National Park Service said it plans to resume the tree-cutting and will probably do so in the next few days.” John Noel, deputy superintendent for the C&O Canal National Historical Park, said that “he went to the Swain’s Lock Recreation Site to examine the 26 trees proposed to be removed and 32 others proposed to be pruned at the site’s campground.” Noel “agreed that the trees are rotting and in danger of falling on park users below.”

STUDENTS GO ON CANOE TRIP AROUND WOLF LAKE. The [Merrillville \(IN\) Post-Tribune](#) (10/20, 105K) reports that “all classes in Grades 6 through 9 at George Rogers Clark Junior-Senior High School in Hammond recently experienced a unique field trip right in their own back yard — a canoe trip around Wolf Lake located only a few blocks from the school.” The trip was “made available through a partnership with the National Park Service, Dunes Learning Center and Wilderness Inquiry.”

NEW COLONIAL PARK SUPERINTENDENT THANKS COMMUNITY FOR ADVOCACY. The [Newport News \(VA\) Daily Press](#) (10/20, Williams, Subscription Publication, 201K) reports that the Colonial National Historical Park’s new Superintendent, Kym Hall, thanked the community for its opposition to Dominion’s Skiffes Creek transmission project in her first appearance before the York County Board of Supervisors on September 1. “The view should be protected,” she said.

DEVILS TOWER TO HOST STAR VIEWING PARTIES. The [Casper \(WY\) Star-Tribune](#) (10/21, 115K) reports that the NPS “announced that Devils Tower will host a series of star viewing parties October through December.” The article notes that “the eight parties are free of charge, and will last approximately two hours.”

NPS URGED TO RECONSIDER RACIST NAME FOR A WASHINGTON LAKE. In an op-ed for the [High Country \(CO\) News](#) (10/21, 74K), Glenn Nelson writes that Washington state officially calls Howard Lake “by what is believed to be its oldest known name,” but the federal government “recognizes the lake by a name that causes the jaws of most people of color to drop: Coon Lake.” Nelson notes that “the federal government did not follow the usual course of supporting the state’s action, mostly because of opposition from the National Park Service, which manages the area that contains the lake.” The NPS, “acting on research from its North Cascades unit, originally defended its stance by claiming that there was ambiguity around the use of the term ‘coon.’” According to Nelson,

in the years leading up to its 2016 centennial, the Park Service has done a lot of talking and writing about the need for diversity and inclusiveness.” He concludes that “it’s past time for the Park Service to back away from its misguided opposition, encourage Secretary Jewell to come to its rescue, and allow another black life to matter.”

US Geological Survey:

USGS SEISMOLOGIST QUESTIONS PREDICTION OF 99.9 PERCENT CHANCE OF MAJOR LOS ANGELES EARTHQUAKE IN 3 YEARS. The [Southern California Public Radio](#) (10/20, 68K) reports that “a controversial new study from NASA’s Jet Propulsion Laboratory” claims “there is a 99.9 percent chance of an earthquake” in Los Angeles “between magnitude 5 and 6.3 in less than three years.” The study, published earlier this month by the American Geophysical Union’s Earth and Space Science journal, has “taken many in the seismic community by surprise.” Lucy Jones with the USGS said the “methodology doesn’t fully explain the prediction, and the study doesn’t adequately address this either.” Jones said that, according to the USGS’ “models, there is only an 85 percent chance of a magnitude 5 or 6 quake in the same region over a three-year period.”

Top National News:

MEDIA ANALYSES: TRUDEAU’S ELECTION LIKELY TO FOSTER IMPROVED US-CANADA TIES. On the day after Justin Trudeau became Canada’s Prime Minister-designate, media reporting universally characterized the election results as a likely boost for US-Canada relations. Coverage focuses on Trudeau’s promise of a less combative foreign policy style and the perception that he will be more willing to accept a US rejection of the Keystone pipeline. Reporting – including a combined 2 minutes and 50 seconds on the three broadcast networks – also indicates that despite Trudeau’s decision to withdraw his aircraft from the US-led coalition against ISIL, he is likely to be a more willing partner on climate change and other issues.

[ABC World News](#) (10/20, story 9, 0:20, Muir, 5.84M) reported President Obama on Tuesday congratulated Trudeau, who “swept into power with a message of optimism saying Canada beat fear with hope.” [USA Today](#) (10/21, Korte, 5.23M) reports Obama made the phone call “in an attempt to lock down continued cooperation with the northern neighbor on trade, terrorism, and climate change.” The White House, according to USA Today, “signaled that not much would change in the relationship” between the neighbors following the Liberal party’s victory. [CBC News](#) (10/20, Fitzpatrick, 225K) reported on its website that the White House indicated Obama and Trudeau “agreed on the importance of deepening the ‘already strong’ bilateral relationship” between the countries “and committed to strengthen joint efforts to promote trade and to combat terrorism and climate change.”

[AFP](#) (10/21) reports the White House and current Prime Minister Stephen Harper “clashed over climate policy” and the Keystone pipeline. While White House spokesman Josh Earnest on Tuesday said “it would be shortsighted to reduce the relationship between our two countries to just one issue,” Chuck Todd reported on [NBC Nightly News](#) (10/20, story 5, 2:05, Holt, 7.86M) that “we now have a Canadian government that is politically more in line with the American government.” According to Todd, “Relations have been good but they have not been so great of late. Will they now get better? That is why Americans should care.”

In an article entitled “5 Reasons The US Should Care About Canada’s New Prime Minister,” [USA Today](#) (10/21, Hjelmggaard, 5.23M) lists ways in which Trudeau “is likely to affect policies in Canada and the United States.” According to USA Today, Trudeau “promised to improve strained relations” with Obama and said “he wants to find constructive ways of working with Washington on other issues.” Another [USA Today](#) (10/21, Kovac, 5.23M) article reports that Trudeau and Harper “differ in their approach to foreign policy,” with the incoming leader being less vocally pro-Israel and more focused on environmental issues.

In an analysis piece, [Bloomberg News](#) (10/21, 2.66M) says “a prompt rejection” of the Keystone pipeline by Obama “would make the job easier” for Trudeau “as he seeks to reset the country’s relationship with the US, which he says was damaged” by Harper. According to Bloomberg, Trudeau “could use a quick US denial” of the pipeline “to focus discussions” with Obama “on issues such as trade and climate.” Bloomberg notes there has been “speculation” that Obama “would reject the

pipeline shortly after the Canadian election.” However, [The Hill](#) (10/20, Cama, 471K) reported, Secretary of State Kerry said Tuesday that Canada’s election results will not change the White House’s approach to the Keystone issue. Kerry said the decision “is being based on the merits and countervailing balance of all the input that has come from a very exhaustive agency review.” Kerry reiterated that he seeks a decision “as fast as possible.”

[Reuters](#) (10/21, Mason, Rampton) reports the White House indicated it would like the new Canadian government to take increased actions to address climate change. Earnest said that while Canada has “made a substantial and important commitment” ahead of the Paris climate talks, “We believe that it’s possible that there is more that Canada can do in this regard.”

However, writing for [Mother Jones](#) (10/20, 758K), Suzanne Goldenberg claimed “those hoping for a U-turn in Canada’s climate change policy...are in for a reality check.” According to Goldenberg, while Trudeau does not align directly with many of Harper’s views or policies, “it would be a mistake” to see the new Canadian leader or his party “as climate champions.” In [Slate](#) (10/20, 1.38M), Joshua Keating argued that at least with regard to the Keystone pipeline, Trudeau does present a change from Harper. Keating characterizes Trudeau as “a very different leader” from Harper and says he will make the Keystone pipeline less of a focal point of US-Canada relations. According to Keating, Trudeau “has described his support for the pipeline as ‘steadfast,’ but it’s clearly not the make-or-break issue for him that it was for Harper.”

The [Wall Street Journal](#) (10/21, Vieira, Subscription Publication, 5.95M) reports Trudeau said he will work to restore Canada’s reputation of defending minorities and become more involved in multilateral policy making. At a rally in Ottawa, Trudeau said, “To this country’s friends around the world, I want to say this: Many of you have worried Canada has lost its compassionate and constructive voice in the world over the past 10 years. I have simple message for you: We’re back.” The [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) similarly reports that Trudeau “is likely to present a very different face to the world” than Harper, “but the most noticeable difference will probably be in tone.” Trudeau has vowed to “put an end to Mr. Harper’s often belligerent style of politics and diplomacy.” Trudeau said Tuesday that “a positive, optimistic, hopeful vision of public life isn’t a naïve dream – it can be a powerful force for change.” The Times says Trudeau has previously indicated a desire to end Harper’s reliance on military solutions and tough rhetoric, and instead focus on working within international organizations, such as the United Nations.

The [CBS Evening News](#) (10/20, story 10, 0:25, Pelley, 5.08M) reported, “Canada took a left turn” as “Trudeau and the Liberal Party rode in on a landslide.” In a [USA Today](#) (10/21, 5.23M) op-ed, author David Andelman says “most of the reasons” Canadian voters chose Trudeau to lead the country “boiled down to one fundamental: The Liberal Party leader was simply nicer than his opponent. And most Canadians believe they are, too.” Similarly, the [Wall Street Journal](#) (10/21, Subscription Publication, 5.95M) editorializes that Canadians wanted a change from the Harper government, which had become isolated and sought to restrict debate. The [New York Times](#) (10/21, Subscription Publication, 11.82M) agrees, editorializing that Trudeau’s election “shows how ready Canadians were to emerge from a decade under the Conservative government of the secretive and combative Stephen Harper.”

[AFP](#) (10/21) reports Trudeau told Obama on Tuesday that Canadian fighter aircraft will withdraw from the US-led coalition against ISIL, but the new Canadian leader did not present a timeline for the move. In a front-page story, the [Washington Post](#) (10/21, A1, Brown, 6.76M) reports Trudeau said, “I committed that we would continue to engage in a responsible way that understands how Canada has a role to play in the fight against ISIL,” adding, that Obama “understands the commitments I’ve made around ending the combat mission.” According to the Post, a “senior Administration official,” said Obama and Trudeau discussed joint anti-terrorism efforts and, “We expect Canada will continue to be a valuable contributor to the 65-member global coalition” against ISIL.

Trudeau’s Win Could “Lead To Full Marijuana Legalization” In Canada. [USA Today](#) (10/21, Hughes, 5.23M) reports Trudeau’s win “may lead to full marijuana legalization” for Canada. According to USA Today, Trudeau promised during his campaign that “Canada would create a system to tax, regulate and sell marijuana, along with stiff penalties for anyone giving pot to children or caught driving while stoned.” USA Today says American “cannabis activists hailed Tuesday’s election as a milestone, suggesting that a day may soon come when cross-border trade talks include...legal weed.”

[AFP](#) (10/21) reports Trudeau's "promise to legalize recreational cannabis" will likely "help the nation's nascent medical marijuana industry." Investors, according to AFP, "are betting" they could build on companies' current production of marijuana for medical use and "quickly scale up to serve recreational pot users too, once Trudeau makes good on his promise."

NYTimes Analysis: Trudeau Is "No Dynast" Despite Father Being Former Prime Minister. In a 1,350-word profile piece, the [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) reports that despite there being "many easy parallels to draw between" Trudeau and his father, former Prime Minister Pierre Elliott Trudeau, Canada's incoming leader "is no dynast who slipped effortlessly into a family political machine." The Times notes that Trudeau "did not even enter politics until 18 years after his father gave it up, and seven year after his father's death." According to the Times, Trudeau "built his own cadre of advisers, mostly from his own generation" and sometimes "chose more difficult roads – partly, it appears, to show he had not been handed a life in politics on a platter."

In the [Washington Post](#) (10/21, 6.76M) "Reliable Source" blog, Emily Heil says Trudeau and his wife, Sophie Grégoire-Trudeau, "have a lot in common with the Obamas." According to Heil, "they'd have lots to talk about, apart from liberal politics, like fitness!"

IN APPARENT REVERSAL, BIDEN SAYS HE PRIVATELY URGED OBAMA TO AUTHORIZE UBL RAID. Vice President Biden did not reveal Tuesday whether or not he will enter the Democratic presidential race, but his remark that he privately advised President Obama to launch the 2011 raid that led to the death of Osama Bin Laden – which contradicted Biden's past public comments that he advised against the raid – is being interpreted as a possible line of attack against Hillary Clinton. All three broadcast networks reported on the statement, combining for nearly eight minutes of coverage, and ABC led with it. The tone of the coverage is mixed, with most reports calling it a reversal, and some concluding that Biden may be undercutting his own reputation for candor.

There was also Twitter discussion of Biden's remarks. Anthony De Rosa, a digital producer for The Daily Show who has nearly 89,000 followers, [tweeted](#), "Biden sounds like Brian Williams with his evolving recollection of the Bin Laden raid." Jonathan Martin of the New York Times [tweeted](#), "@vp today signals: he'll run & it'll get negative FAST or: he's not happy about being sidelined." His Times colleague Maggie Haberman [tweeted](#), "Biden's subtle digs at Clinton indicate that if he runs it'll be ugly." In addition, the hashtag [#BidenWatch](#) emerged on Twitter, with Fox Business Network's Trish Regan [tweeting](#), "Sure sounds like he's running...", Mashable's Juana Summers [tweeting](#) Biden's Wednesday official schedule, and Al Jazeera America's David Shuster [tweeting](#) that "Hallie Biden, widow of the late Beau Biden, says her family supports a Presidential campaign '100%'".

[ABC World News](#) (10/20, lead story, 2:50, Muir, 5.84M) reported that "as the pressure mounts for Joe Biden to decide whether he'll run...many [are] now asking, did he change his story?" ABC (Karl) added, "Biden has described Obama's decision as especially courageous because in that key meeting when it came time to decide, most of the President's advisers, including Biden himself, were not in favor of the raid." On Tuesday, he "offered an entirely different account of what happened on that fateful day." Biden was shown saying, "So as we walked out of the room and we walked upstairs, I told him my opinion that I thought he should go but to follow his own instincts. But it would have been a mistake, imagine if I had said in front of everyone, 'don't go, or go,' and his decisi

SEN. MURKOWSKI SEES TOUGH ROAD FOR INTERIOR NOMINEE. [Politico Pro](#) (10/20, Subscription Publication) reports that Senate Energy and Natural Resources Committee Lisa Murkowski said that Interior Department pick Kristen Sarri would “have a lot of explaining to do at a hearing on six nominees today.” While Murkowski was “pleased that President Barack Obama had renamed Mount McKinley this summer to Denali, the Alaska Republican said she was still frustrated with the Interior Department’s ‘heartless decision’ to deny a road in King Cove.” Murkowski also “criticized Interior for closing off oil production in Alaska and last week’s cancellation of offshore sales and lease extension.”

Meanwhile, the [Daily Caller](#) (10/21, Barton, 375K) reports that Murkowski is “torn between leaving the Department of the Interior’s independent watchdog post vacant, or confirming President Barack Obama’s nominee crippled by recurring allegations of ‘playing games with Congress.’” She said, “I strongly believe that Interior needs a permanent [inspector general], and I’m disappointed the administration has let the position go unfilled for six and a half years.” Murkowski continued, “But I am also committed to ensuring that the individual we confirm is fully independent ... The tenure that you have been involved with thus far in this position has been marked by controversy.”

Additional coverage was provided by [The Hill](#) (10/21, Henry, 471K), [KTOO-FM](#) Juneau, AK (10/20), and [Alaska Public Radio Network](#) (10/20, 2K).

HISTORIC \$186 MILLION SETTLEMENT WITH CHOCTAW, CHICKASAW NATIONS LAUDED. The [Indian Country Today Media Network](#) (10/20, 32K) reports that “tribes and the U.S. Department of the Interior heralded the outcome of a \$186 million settlement signed earlier this month between the federal government, the Choctaw and the Chickasaw nations to solve a longstanding land trust dispute as a new chapter in relations.” During the October 5 signing ceremony, Chickasaw Nation Governor Bill Anoatubby “gave a nod to the impetus provided” by Interior Secretary Sally Jewell. He said, “We respect the vital role Secretary Jewell has taken in helping make this historic settlement a reality. We are confident she will play an essential role in our efforts to continue strengthening the relationship between our governments, because we believe she has a unique appreciation for the mutual benefits of a positive government-to-government relationship.” Jewell said, “Today’s agreement is the latest addition to a record number of

longstanding settlements resolved under this Administration. This historic settlement is the start of a new chapter in our trust relationships with the Chickasaw and Choctaw Nations, and underscores our commitment to fulfilling those responsibilities to Native communities across the country.”

U.S. TREASURY CONFIRMS \$20B BALANCE FOR LWCF. [E&E Publishing](#) (10/21, 705) reports that “the Land and Water Conservation Fund that expired earlier this month for the first time in its 50-year history currently contains nearly \$20 billion, according to the U.S. Treasury, which maintains the program’s balance sheets.” But “whether that is ‘real’ money available to be spent on federal land acquisitions, private land easements and state recreation projects depends on whom you ask.” The article notes that “the \$19.8 billion can only be reduced until Congress reauthorizes the program.”

Additional coverage of the LWCF was provided by the [Durango \(CO\) Herald](#) (10/20, 31K).

PROPOSED DESIGNATIONS OF THREE NATIONAL MONUMENTS IN CALIFORNIA DESERT RAISES CONCERNS ABOUT “LAND GRAB.” [Fox News](#) (10/20, 8.91M) reports that “a group of off-roaders and others are attempting to fight a proposed designation of three national monuments in the California desert under the Antiquities Act.” The Obama Administration is “considering using the federal Antiquities Act to bypass the legislative process at the request of Sen. Dianne Feinstein, whose efforts to have the Mojave Trails and Castle Mountain, both in the Mojave Desert, and a section of the Sonoran Desert named federal sites were repeatedly blocked by Republicans.” According to the article, “a White House move could put the land under federal control, which critics say could cut funding for upkeep or even restrict access.”

UNMANNED HELICOPTER OFFERS NEW WAY TO FIGHT WILDFIRES. The [Voice of America](#) (10/21, Banse, 32K) reports that the K-MAX “unmanned, water-dropping” helicopter was tested by the US government. The helicopter can fly through limited visibility. Brad Koeckertiz, the unmanned aircraft program manager with the US Department of Interior, says that unmanned helicopters such as the K-MAX will be integrated into routine measures to fight wildfires over the next few of years. The article notes that the K-MAX helicopters have already been used by the US Marines in Afghanistan, to “resupply remote outposts at night” and replace “dangerous convoys on the ground.” The article notes that the growing uses for drones is also why the FAA is seeking to register all drones.

Additional coverage was provided by [Vertical Magazine \(CAN\)](#) (10/21).

JEB BUSH PROPOSES MOVING INTERIOR DEPARTMENT FROM D.C. To Western City. The [Las Vegas Sun](#) (10/20, Lucas, 199K) reports that “Republican presidential candidate Jeb Bush will unveil his proposals for Western land and resource management in a campaign stop in Reno on Wednesday morning, in a speech likely to resonate with conservative voters opposed to what they see as federal overreach in the Western states.” Bush is “expected to speak at 11 a.m. Wednesday at Rancho San Rafael Regional Park before appearing at a forum sponsored by the LIBRE Initiative at the College of Southern Nevada Cheyenne Campus in North Las Vegas at 6 p.m.” In the proposal, Bush will “call for moving the headquarters of the Department of Interior from Washington, D.C., to a city in the western United States like Denver, Salt Lake City or Reno and will say that as president he would direct federal agencies to give broad latitude to states to determine land-use issues.”

STUDY: ALASKAN WILDFIRES COULD EXACERBATE GLOBAL WARMING. The [Washington Post](#) (10/21, Mooney, 6.76M) reports that some greenhouse gas sources outside the scope of forthcoming UN climate talks are beyond governments’ control, such as raging peat fires in Indonesia this year, emitting “as much as Japan produces in a year from fossil fuels.” Elsewhere, a new study in Nature Climate Change reaffirms concerns about the emissions of northern fires in Alaska. The Post reports that “climate researchers are still trying to figure out how all of these factors will interrelate,” but fire is a “powerful determinant of how much carbon resides in land, rather than in the air, across our globe.”

INTERIOR’S VINE ACCOUNT HIGHLIGHTED. [Politico](#) (10/21, 942K) highlights the Interior Department has a great Vine account. Providing a link, Politico says “this is Internet gold.”

Empowering Native American Communities:

BIA RULE ANNOUNCES RULE GIVING TRIBES MORE CONTROL OVER ELECTIONS. [Law360](#) (10/20, 21K) reports that the BIA “on Monday announced its final rule for Native American tribal elections

conducted by the U.S. Department of the Interior, saying the new rule will encourage tribes to take control of their elections and help protect the voting rights of tribe members living in urban areas.” Assistant Secretary of Indian Affairs Kevin K. Washburn said “in a statement Monday that the rule will allow tribes to opt out of having the interior secretary conduct their elections.”

The [Native American Times](#) (10/20, 337) reports that Washburn said, “Though many federal responsibilities concern the lands we hold in trust for tribes and Indian people, more than 55 million acres nationwide, the United States has a moral obligation to preserve connections between Indian people and their tribes that it once sought to destroy. For the future of Native nations and the health of Indian Country, American Indians in urban areas must work harder to maintain connections with their tribes. One important aspect of that relationship is participation in the civic and political life of their tribal governments. For that reason, our Secretarial election amendments seek to prevent tribal members living in urban areas from being inadvertently disenfranchised in Secretarial elections.”

HEARING FOCUSES ON NATIVE HAWAIIAN ELECTION. The [AP](#) (10/21, Kelleher) reports from Honolulu that a federal court hearing began on Tuesday “in a lawsuit by people who want to put a stop to an election process that is underway for Native Hawaiians.” The lawsuit, filed in August, “says it’s unconstitutional for the state to be involved in a race-based election.” The state “argues in court documents that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it’s not involved in next month’s vote to elect delegates for a convention to determine self-governance for Native Hawaiians.” Tuesday’s hearing “is focused on the plaintiffs’ motion for a preliminary injunction,” and the plaintiffs “want the judge to limit voter registration activities or stop the election altogether.”

Additional coverage was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Navajo Times \(AZ\)](#) (10/21, 66K), and [Yahoo! News](#) (10/21, Kelleher, 5.98M).

INTERIOR SIDES WITH ALASKA NATIVE GROUP IN INVESTIGATION OF MASSACHUSETTS COLLEGE TRIBAL COLLECTION. The [AP](#) (10/21, 2.28M) reports that “a Massachusetts college was found in violation of a federal law regulating the possession and sale of potentially sacred artifacts following a complaint from an organization of Alaska Natives.” The Interior Department said “an investigation substantiated the complaint against Andover Newton Theological School filed in June by the Sealaska Heritage Institute.” The institute’s president, Rosita Worl, said “the school possesses at least two southeast Alaska artifacts, including a Tlingit halibut hook that is considered sacred.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/21, D’oro, 344K), the [Boston \(MA\) Herald](#) (10/21, 548K), the [Daily Mail \(UK\)](#) (10/21, 5.59M), the [Miami \(FL\) Herald](#) (10/21, 651K), [Minneapolis \(MN\) Star Tribune](#) (10/21, D’oro, 1.19M), [ABC News](#) (10/21, 3.97M), and the [Alaska Dispatch News](#) (10/20, 219K).

US ATTORNEY SAYS BIA OFFICER WAS JUSTIFIED IN DEADLY SPIRIT LAKE SHOOTING. The [AP](#) (10/21) reports that US Attorney Chris Myers “says” that an investigation by his office came to the conclusion that BIA Officer Terry Morgan was justified in shooting and killing “31-year-old Joseph Charboneau during a standoff with officers on June 16.” The [Grand Forks \(ND\) Herald](#) (10/21, 100K) reports that the US Attorney’s Office “said” the shooting was justified because Charboneau posed a “real and immediate” threat to officers and another person at the scene after he refused to put down his gun, which was pointed at the officers. The Grand Forks Herald reports that, as a result of the investigation, Federal prosecutors “will not file charges against” Morgan.

Additional coverage was provided by the [Dickinson \(ND\) Press](#) (10/21, 1K), the [Forum of Fargo-Moorhead \(ND\)](#) (10/21, 14K), [KXJB-TV Fargo \(ND\)](#) Fargo, ND (10/21, 18K), [KFGO-AM Fargo \(ND\)](#) Fargo, ND (10/20, 3K), [KXMC-TV Minot \(ND\)](#) Minot, ND (10/21, 1K), and [KFYR-TV Bismarck \(ND\)](#) Bismarck, ND (10/21, 1K).

CRIME JUMPS AFTER TRIBES CUT FROM BIA FUNDING. The [Los Angeles Times](#) (10/20, Romney, 4.07M) reports on a “time of crisis for public safety on tribal lands.” According to the article, “a federal law decades ago shifted the primary burden of criminal law enforcement on tribal lands in California and five other states to local authorities,” but “many lack the resources to do the job and, in some cases, sufficient knowledge of tribal law and culture to win the trust of tribal members.” After “tribes were cut off from steady funding for their own justice systems,” crime has “flourished.”

ADDITIONAL COVERAGE: YAKAMA NATION’S PETITION TO SELF-GOVERN APPROVED. Additional

coverage that the BIA on Monday granted the Yakama Nation's petition for retrocession was provided by the [Bellingham \(WA\) Herald](#) (10/21, 101K), the [Clark County \(WA\) Columbian](#) (10/20, 86K), the [Washington \(DC\) Times](#) (10/21, 344K), the [Spokane \(WA\) Spokesman-Review](#) (10/20, 183K), the [Native American Times](#) (10/21, 337), the [Law360](#) (10/21, 21K), [KNDU-TV Yakima \(WA\)](#) Yakima, WA (10/21, 3K), and [KUOW-FM Seattle \(WA\)](#) Seattle (10/21, 15K).

GILLETTE'S SERVICE IN OBAMA ADMINISTRATION PRAISED. In an editorial, the [Bismarck \(ND\) Tribune](#) (10/21, 37K) lauds Jodi Gillette's service in the Obama Administration. According to the paper, Gillette's "positions gave her a voice in a White House that has seemed genuinely concerned about Native American issues."

Office of Insular Affairs:

ASSISTANT SECRETARY KIA'AINA PROPOSES MARSHALLS FUND CHANGES. [Radio New Zealand](#) (10/21, 1K) reports that "a top US official has submitted a proposal to the Senate and House to allow the people of Bikini to use resettlement and relocation funds outside of the Marshall Islands." Assistant Secretary for Insular Areas Esther Kia'aina says "it is an appropriate course of action to take regarding the welfare and livelihood of the Bikinian people." The Bikinians were "displaced by US nuclear weapons testing 70 years ago but are now looking at relocating again because of deteriorating conditions on Kili and Ejit Islands." According to the article, "in addition to cramped living quarters and a lack of suitable sustainable resources, the islands have been experiencing more frequent storms and king tides resulting in salt water inundation and the destruction of crops."

[Radio New Zealand](#) (10/21, 1K) reports that "a representative from Bikini Atoll says a proposal to allow people to use resettlement and relocation funds outside of the Marshall Islands is not wanted." Bikini liaison officer Jack Niedenthal says "the US should take full responsibility for any resettlement including providing extra financing." Niedenthal said, "We still got a ways to go, we still have to do some more lobbying and some more talking to people in Washington to make them understand that what's being proposed by the assistant secretary is what we view as 'Plan B'. It's not ultimately what we want in terms of helping our people."

CHINA STRENGTHENS RELATIONSHIP WITH PACIFIC REGION. The [Marianas Variety](#) (10/21) reports that "China and the Pacific Islands Forum Secretariat further strengthened their relationship on Friday when the two met at a ceremony to hand over \$1.05 million to assist the Pacific region." Forum Secretariat Secretary General Meg Taylor and Chinese Ambassador to Fiji Zhang Ping "attended the ceremony and delivered speeches respectively." Zhang "reiterated his nation's ongoing interest in the region saying, 'China attaches great importance to the South Pacific region. The Chinese side stands ready to enhance mutual understanding and cooperation with Pacific Island Countries and contribute to the development and capacity building in the region.'"

COUNTRIES IN PACIFIC URGED TO BEGIN TALKS ON CLIMATE MIGRATION. [Radio New Zealand](#) (10/21, 1K) reports that "all countries in the Pacific are being urged to start discussions on how to help people forced to move from low lying atoll nations like Kiribati and Tuvalu." According to the article, "184 million people worldwide were displaced by disaster between 2008 and 2014 and at special meetings in Geneva last week 110 countries gave the nod to a Protection Agenda for dealing with future migration challenges." The article notes that "the experiences of small island countries which face rising seas due to climate change helped form the global action plan under the Swiss Norwegian Nansen Initiative."

JOURNALIST SPEAKS AT UNIVERSITY OF GUAM ON CLIMATE ISSUES, CORRUPTION IN PACIFIC ISLANDS. The [Marianas Variety](#) (10/21) reports that "author and journalist Giff Johnson spoke to students at the University of Guam on Monday evening about climate change and development in the Pacific islands." Johnson's "lecture, entitled 'Idyllic No More: Pacific Island Climate, Corruption and Development Dilemmas,' is based on his latest book — a compilation of essays detailing the looming climate threat to the region, its booming fishing industry, and the U.S. nuclear test legacy in the Marshall Islands." Johnson called attention to "climate-driven migration from remote Pacific islands to Guam and mainland U.S."

RISING SEA LEVELS THREATEN KIRIBATI. The [National Geographic](#) (10/21, 31.65M) provides a picture gallery of the threat of rising sea levels driven by climate change on Kiribati.

Lackling America's Water Challenges:

WATER SCHEDULED TO BE RELEASED FROM NEW MELONES. The [Sonora \(CA\) Union Democrat](#) (10/21, 28K) reports that “more than 7 billion gallons of water is scheduled to be released from New Melones Reservoir beginning today to ensure flows in the Stanislaus River will keep temperatures cool enough for adult salmon migrating up the river to spawn this fall.” Oakdale Irrigation District and South San Joaquin Irrigation District said “it would benefit river conditions and fisheries, as well as the needs of agriculture and more than 200,000 residential customers downstream.” The article notes that “earlier this year, the irrigation districts sparred with the U.S. Bureau of Reclamation — which manages New Melones Reservoir — over spring pulse flows that they feared would leave as little as 147,000 acre-feet in the reservoir by the end of September.”

SAN JOAQUIN COUNTY BOARD OF SUPERVISORS VOTE TO OPPOSE DELTA TUNNELS PLAN.

The [Lodi \(CA\) News-Sentinel](#) (10/21, 14K) reports that “at a meeting on Tuesday, the San Joaquin County Board of Supervisors voted to adopt a resolution in formal opposition of California WaterFix, also known as the twin tunnels plan.” Supervisor Kathy Miller said, “The WaterFix is just a thinly veiled version of the former (Bay Delta Conservation Plan) and continues to push the fatally flawed twin tunnels, which will simply sacrifice one region of California for the benefit of another.”

Securing America's Energy Future:

Renewable Energy:

ENVIRONMENTALISTS, DOMINION BOTH SUPPORT OFFSHORE WIND DEVELOPMENT. On his [Bacon's Rebellion \(VA\)](#) (10/21, Bacon) blog, James Bacon reports on an Environment Virginia-sponsored webinar held Tuesday morning in which representatives from Dominion, environmental groups, and the McAuliffe Administration all voiced support for the utility's experimental offshore wind farm project. For environmentalists, Bacon writes, the project represents the beginning of an industry that would increase the use of green energy along the Atlantic and displace fossil fuels. For the Governor's office, it represents increased green energy coupled with economic development that takes advantage of the Newport News area's shipbuilding industry.

Onshore Energy Development:

CHESAPEAKE ENERGY FINED \$2.1 MILLION FOR UNDER-REPORTING NATURAL GAS. The [Greenwire](#) (10/20, Subscription Publication) reports that the Interior Department on Monday “announced a \$2.1 million civil penalty against Chesapeake Energy Corp. for misreporting the amount of gas it produced and sold from American Indian lands in Oklahoma.” Chesapeake “failed to comply with a 2011 order that found ‘systemic errors’ in the company's monthly production reports for more than 100 Indian leases, according to Interior's Office of Natural Resources Revenue.” The company “agreed to amend the monthly reports, but it continued to maintain inaccurate information on the agency's data systems, ONRR said.” The firm was “assessed a penalty based on ‘knowing or willful maintenance’ of the inaccurate information, ONRR said.”

Additional coverage was provided by [Politico](#) (10/21, 942K), [Natural Gas Intelligence](#) (10/21, Subscription Publication), the [Native American Times](#) (10/21, 337), and [KOKC-AM Oklahoma City \(OK\)](#) Oklahoma City (10/20, 1K).

TEXAS ENERGY REGULATOR OPPOSES STREAM PROTECTION RULE. [Law360](#) (10/21, 21K) reports that “Texas' top energy regulator on Tuesday said the agency will oppose a U.S. Department of the Interior proposed rule aimed at better protecting streams and other waterways from nearby mining activity, saying the regulation encroaches on ground better left to the state.” Texas Railroad Commission Chairman David Porter on Tuesday said “the state would sign on to the multistate Interstate Mining Compact Commission's comments opposing the proposed waterway regulation.”

USGS REPORT STATES EARTHQUAKES COINCIDE WITH OKLAHOMA OIL BOOMS. [KOCO-TV](#) Oklahoma City (10/21, 93K) reports that “a study by the United States Geological Survey states that the earthquakes from the past 100 years seem to coincide with the oil boom in Oklahoma.”

OKLAHOMA REGULATORS SHUT DOWN THREE MORE DISPOSAL WELLS. The [Energywire](#) (10/21, Subscription Publication) reports that “Oklahoma oil and gas regulators dealing with a dramatic increase in earthquakes near the pipeline hub of Cushing have shut down three more disposal wells.” Also, “another well was shut down by the company that owns it after regulators said they were concerned it was drilled too deep.” In addition, “the operators of seven other wells were told in a letter written Friday and released yesterday that they must reduce the volume of drilling waste that they inject deep underground.”

OKLAHOMA LIMITS DISPOSAL WELLS AMID CUSHING QUAKES. [Reuters](#) (10/21, Hampton, Brandes) reports that Oklahoma’s oil and gas regulator on Monday said it could impose new limits on all saltwater disposal wells within a 10-mile radius of Cushing. Reuters reports that Oklahoma now experiences as many as two magnitude 3.0 quakes per day, up from two per year. Thirteen wells have been ordered shut and approvals for new wells have been halted, Reuters reports. Scientists told Reuters that shutting wells could ease tectonic disruption in Oklahoma.

STUDY: FRACKING CAN CAUSE METHANE LEAKS IN NEARBY ABANDONED OIL WELLS. [Reuters](#) (10/20, Valdmanis) reported that according to a study published Tuesday in the Water Resources Research journal, fracking can cause methane leaks in nearby abandoned oil wells. The methane leaks could be a large source of unrecorded greenhouse gas emissions, according to the study. The study said that energy companies could reduce the probability of such methane leaks by trying to identify abandoned wells before they begin fracking, although the task could be difficult due to large numbers of unmarked abandoned wells.

BLM CRITICIZED FOR FAILING TO PRODUCE PICTURES UNDER FOIA REQUEST. For the [Fairfield \(MT\) Sun Times](#) (10/21), Darryl L. Flowers criticizes the BLM for failing to provide pictures in connection with “the proposed Solenex, LLC natural gas well on public lands in the Lewis and Clark National Forest” that were requested under the Freedom of Information Act. The paper received “sixteen photos” and “two photos were missing.” He notes that “curiously, the two omitted photos were the only ones that included a person in the photos.”

Offshore Energy Development:

FEDS INVESTIGATE WORKER’S DEATH ON DRILLSHIP CONTRACTED BY CHEVRON. [Fuel Fix \(TX\)](#) (10/20, Dlouhy, 7K) reports that officials from the Bureau of Safety and Environmental Enforcement and the Coast Guard are investigating “the death of a worker on a drillship in the Gulf of Mexico that was preparing to bore a well for Chevron.” Fuel Fix says that “the Pacific Santa Ana drillship was just beginning operations for Chevron in about 4,800 feet of water at the site and had not yet penetrated the sea floor when an employee of that drilling contractor was fatally injured.” Fuel Fix adds that Chevron has a 36 percent working interest in the Keathley Canyon well-leasing block where the incident occurred, an area where “Chevron outlined ambitions to drill up to seven wells” earlier this year.

The [AP](#) (10/21) reports that Amy Roddy, spokeswoman for Pacific Drilling SA, the ship’s owner, “said the company is not releasing any details about the man to respect his family’s privacy. She also refused to disclose how the man died or details of the accident, citing an ongoing investigation.”

[NASDAQ](#) (10/20, Sider) reports that Chevron has contracted the ship since 2012. The [New Orleans Times-Picayune](#) (10/21, Larino, 718K) adds that “operations have been shut down and personnel remain onboard, according to the drillship’s operator.”

[Offshore Engineer](#) (10/20, Leon) reports that “the ship was to use its dual gradient drilling functions for Chevron’s Anchor-1 prospect last year in Green Canyon block 807, but the well was junked due to mechanical failures. However, in January of this year, Chevron hit high quality oil pay in multiple Lower Tertiary Wilcox Sands at a second Anchor well also drilled by the Pacific Santa Ana.”

The [Dow Jones Newswires](#) (10/21, Sider) reports that this is the first death related to offshore drilling operations in the Gulf of Mexico this year.

[Reuters](#) (10/21), [gCaptain](#) (10/21, 2K), [Upstream Online](#) (10/21, Schmidt, Brenner, 20K), and [Maritime Executive](#) (10/20, 21) also cover the story.

BRIARCLIFFE ACRES VOTES AGAINST OFFSHORE DRILLING. The [Myrtle Beach \(SC\) Online](#) (10/21,

36K) reports that “in a storm of debate over offshore drilling, Briarcliff Acres surfaced as the latest coastal town to join a united front against seismic testing and drilling for oil and natural gas off of South Carolina’s beaches.” According to the article, “missing councilwoman Abby Stewart, who has been with family on the west coast, the town council unanimously passed a resolution Monday, joining 23 other S.C. coastal towns in a stance against offshore drilling.”

SHELL VESSEL RESCUES FRENCHMAN, CAT FROM SAILBOAT STRANDED IN SEAS NEAR

ALASKA. The [AP](#) (10/21, Thiessen) reports that a Frenchman and the cat tucked inside his clothing were rescued on Tuesday after he leapt from his sailboat to a waiting rescue ship sent by Shell. The man activated a location beacon in the high seas south of Alaska and told the Coast Guard his sailboat had lost its rudder and rigging in the high winds and 20-foot waves. The Coast Guard contacted Shell’s oil drilling rig, the Polar Pioneer, which is on its way to Port Angeles, and the rig “sent a support ship, the Tor Viking, to rescue the sailor.” The AP reports that “it wasn’t immediately clear if the man would continue with the Shell ships to Washington state.”

CUNNINGHAM: INTERIOR DEPARTMENT OFFICIAL SHUTS THE DOOR ON ARCTIC DRILLING. In an analysis of the Interior Department’s recent decision on the future of Arctic drilling, [Oil Price](#) (10/21, 2K) reporter Nick Cunningham writes the Interior Department’s decision to cancel lease sales through 2017 “leaves almost no possible pathway for an oil company to drill in the Arctic for years to come, perhaps killing off drilling for a decade or so at a minimum.” Cunningham goes on to write that “it was likely that there wouldn’t have been new drilling in any event, given Shell’s decision and current market conditions, but Interior’s decision officially shuts the door on the Arctic in the medium-term.”

Casey: Interior’s Actions On Arctic Drilling Trends “Toward A Permanent Clampdown.”

[CleanTechnica’s](#) (10/20, 15K) Tina Casey writes that “in the absence of local regulations, the Feds are the only game in town and it seems that the Arctic’s role in the US economy is too important to trust to compliance by oil companies.” Casey adds that, even though the Interior’s actions last week on Arctic drilling may be “only temporary, but the trend is toward a permanent clampdown.”

4-Traders: Federal Government To Blame For Low Arctic Drilling Interest. In an op-ed piece on the Interior’s Arctic drilling decision, [4-Traders](#) (10/21, 5K) writes the Federal government’s “difficult” regulatory obstacles is to blame for the lack of interest among oil companies to explore for oil and natural gas in the Arctic. 4-Traders writes that the “demand for oil and natural gas isn’t going away, so energy domestic exploration must continue in the Arctic and elsewhere. But as we’ve seen, by putting up unnecessary regulatory hurdles, regulators can cause job and economic growth opportunities to be missed.”

America’s Great Outdoors:

Bureau of Land Management:

BLM TO REVIEW HAGERMAN-HAILEY TRANSMISSION LINE. [Boise \(ID\) State Public Radio](#) (10/21) reports that the BLM will review the Hagerman to Hailey transmission line, paying “special attention to the greater sage grouse in the area.” Stacey Baczkowski, a biologist with Idaho Power, says “the company has been working with the BLM for the last few years to make sure the line is built with the bird in mind.” Baczkowski says “the power company plans to build the new transmission line as close to the current one as possible, and will follow BLM rules about construction during sage grouse mating times.”

UTAH WATER DISTRICT RAISES CONCERNS ABOUT BLM REVISION TO LAND-USE PLAN. The [Deseret \(UT\) News](#) (10/21, 407K) reports that “federal policies that either aim to instill more oversight of water or deny access altogether have some Utah leaders frothing over what they say is a repeated pattern of overreach that threatens local economies and livelihoods.” Ron Thompson, general manager of the Washington County Water Conservancy District, said “possible revisions to a land-use plan by the Bureau of Land Management in Washington County have severe ramifications should one particular approach be adopted.” Thompson said “the BLM — under one option — is ignoring key considerations that went into the passage of the bill, including water supplies being left unhindered and right of way corridors left intact.”

ADDITIONAL COVERAGE: HELICOPTER CRASHES NEAR SEARCHLIGHT DURING CATTLE

ROUNDUP. Additional coverage of the helicopter crash near Searchlight during a cattle roundup was provided by the [Las Vegas Review-Journal](#) (10/21, 378K).

Fish and Wildlife Service:

CONSERVATION LEADERS ATTEND NATIONAL CONSERVATION SUMMIT. [KYTV-TV](#) Springfield, MO (10/21, 135K) reports that “more than 40 leaders from the leading conservation groups in America are meeting in Springfield this week for a National Conservation Summit hosted by The Johnny Morris Foundation.” According to the article, “participants include the U.S. Fish and Wildlife Service, National Geographic, Audubon Society, and Ducks Unlimited.” The article notes that “the purpose of the historic gathering is to collectively discuss opportunities to educate and engage the public in efforts to protect wildlife and natural habitats in preparation for the grand opening of America’s Wildlife Museum and Aquarium in 2016.”

The [Springfield \(MO\) News-Leader](#) (10/20, 49K) reports that “three exhibits of America’s Wildlife Museum & Aquarium, formerly Wonders of Wildlife, were open to media for a tour on Oct. 20, 2015 at the museum located next to the Bass Pro Shops flagship store in Springfield, Mo.” More than 40 conservation leaders attending a National Conservation Summit “hope the new Bass Pro Shops wildlife museum and aquarium will convey to visitors when it opens in mid 2016.” FWS Director Dan Ashe, “one of the summit attendees,” called the museum “one of the foremost conservation attractions in the world.” He said, “Through conservation efforts, we can be successful in sustaining these populations of animals that are threatened or endangered. People hear about the industrial-scale poaching of elephants that’s happening in Africa. That’s not hunting. With this museum, here’s an opportunity to tell the story of how we can protect wildlife habitat, and that when hunting is done well, with appropriate regulations, it sustains wildlife populations.”

Additional coverage was provided by [KOLR-TV](#) Springfield, MO (10/21, 6K), [KYTV-TV](#) Springfield, MO (10/21, 135K), and [KOLR-TV](#) Springfield, MO (10/21, 6K).

CNMI QUESTIONS INCLUSION OF SOME SPECIES ON ENDANGERED LIST. The [Radio New Zealand](#) (10/21, 1K) reports that “the Northern Marianas government says the decision to list 23 species in Guam and the CNMI as threatened or endangered was rushed.” The government says “it supports the US Fish and Wildlife Service’s listing of seven of the 17 CNMI species, but it questions the inclusion of some of the other species.” The Department of Land and Natural Resources says “a number of the species do not meet the definitions of threatened or endangered and don’t require federal protection.”

FWS LOOKS TO RESTORE HABITAT ON ROOT RIVER. The [Rochester \(MN\) Post-Bulletin](#) (10/21, 28K) reports that “federal wildlife officials are seeking public input on a plan to restore and enhance habitat on 825 acres of Minnesota land along the Root River in Houston County.” Managed by the FWS “as part of the Upper Mississippi River National Wildlife and Fish Refuge, the Root River Tract sits to the east of Hwy. 26 between La Crescent and Brownsville.” The article notes that “the site includes 664 acres of hunting and farmland purchased in 2009 with money from the Land and Water Conservation Fund.”

SHOOTING OF CALIFORNIA CONDOR IN ARIZONA UNDER INVESTIGATION. [Grand Canyon \(AZ\) News](#) (10/21) reports that FWS special agents and Arizona Game and Fish Department “law enforcement personnel are investigating the lethal shooting of an endangered California condor that occurred on the Kaibab Plateau in northern Arizona Oct. 8.”

MAN CLAIMS HE BLOCKED ARIZONA BIKE TRAIL TO PROTECT OWLS. The [AP](#) (10/21, 344K) reports that “the 81-year-old man who blocked a Flagstaff-area mountain bike race says he did it to protect an endangered owl species.” J.D. Protiva “appeared in federal court Monday on misdemeanor charges related to blocking the Elden Springs Trail before the August race.” Protiva says “the path goes through protected Mexican spotted owl habitat.”

ADDITIONAL COVERAGE: MONARCHS GET HELP AS CALIFORNIANS PLANT DROUGHT-TOLERANT MILKWEED. Additional coverage that monarch butterflies could benefit from the California drought was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Albuquerque \(NM\) Journal](#) (10/21, 259K), [KABC-TV Los Angeles \(CA\)](#) Los Angeles (10/21, 413K), and [WRC-TV Washington \(DC\)](#) Washington (10/21, 345K).

FWS INVESTING IN PROJECTS TO STRENGTHEN ATLANTIC COASTAL DEFENSES AGAINST FUTURE STORMS. In an op-ed for the [New Haven \(CT\) Register](#) (10/20, 172K), Wendi Weber is Northeast regional director for the FWS, writes that “federal money for Hurricane Sandy recovery has

spurred an unprecedented effort to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms.” She notes that the FWS and other Interior Department “agencies are investing \$787 million in hundreds of projects to clean up and repair damaged refuges and parks; restore coastal marshes, wetlands and shoreline; connect and open waterways to improve flood control; and increase our scientific understanding of how these natural areas are changing.” According to Weber, “these investments support the goal of President Barack Obama’s Climate Action Plan to make communities more resilient to increasingly intense storms predicted with a changing climate.”

National Park Service:

MUSIC VIDEO CELEBRATES 100 YEARS OF NPS. The [New Bedford \(MA\) Standard-Times](#) (10/20, 53K) reports on “a locally made music video that celebrates 100 years of the National Park Service.” According to the article, “published on Oct. 15, the Centennial video has more than 18,500 views on the NPS facebook page and more than 530 on the Youth Ambassador Program’s YouTube page, the group that made it.” NPS Director Jon Jarvis, “who met the traveling crew in Washington, D.C., makes a cameo appearance in the video to say, ‘It’s great to celebrate a hundred years with YAP!’”

Kentucky Lieutenant Gov. Luallen Touts National Parks. The [Louisville \(KY\) Courier-Journal](#) (10/20, 414K) reports that Kentucky Lieutenant Governor Crit Luallen on Tuesday “touted the economic impact of Kentucky’s travel and tourism industry” in “an address to the Kentucky Travel Industry’s annual conference in Bowling Green.” Following her remarks, Luallen “recognized five national parks in Kentucky as part of the National Park Service Centennial in 2016.” She “presented proclamations to representatives of the parks.”

Couple Visiting 59 National Parks In 12 Months. The [Cleveland Plain Dealer](#) (10/21, 1.03M) reports that “Cole and Elizabeth Donelson, St. Louis natives, are two months into their grand adventure: 59 parks in 12 months – part celebration of the National Park Service’s 100th anniversary, part exercise in youthful spontaneity.” Their goal is to “see the best of the United States, and inspire others – particularly other millennials – to do the same.” The article notes that “their mission meshes well with a new campaign of the Park Service, which celebrates its centennial anniversary in 2016.”

WATCHDOG RELEASES REPORT ON NPS CONSTRUCTION FUNDS. The [Greenwire](#) (10/20, Subscription Publication) reports that “a federal watchdog yesterday released a disputed report alleging that the National Park Service is violating congressional intent by dipping into its construction account to cover security, air testing and other reimbursable expenses that should have been paid up front by other agencies.” The NPS construction account is “only for expenses that relate to ‘construction, improvements, repair or replacement of physical facilities,’” the Department of the Interior’s Office of Inspector General report said, “citing the language of the agency’s appropriation.” However, “the OIG found that 17 out of a sample of 21 interagency agreements that used Park Service construction funds to cover reimbursable costs did not appear to include ‘a valid construction purpose.’” The article notes that “these included \$4.9 million that NPS spent from its construction account on security at the Department of the Army’s Memorial Day and Independence Day concerts at the Capitol in 2014 and \$37.5 million over seven years on air quality monitoring at national parks that will be paid back to NPS by U.S. EPA.”

HOUSE COMMITTEE PASSES GRAND CANYON BISON MANAGEMENT ACT. [Grand Canyon \(AZ\) News](#) (10/21) reports that the U.S. House Natural Resources Committee approved the Grand Canyon Bison Management Act “allowing the Arizona Game and Fish Department (AZGFD) to better manage and conserve the bison population within the park Oct. 8.” The legislation “requires the U.S. Department of Interior and the Arizona Game and Fish Commission to coordinate on a plan that allows sportsmen holding a valid state-issued hunting license to assist in management of the bison population within the park.”

THUNDERSTORMS CAUSE FLOODING, MUDSLIDES IN DEATH VALLEY NATIONAL PARK. The [Greenwire](#) (10/20, Subscription Publication) reports that “mudslides and flooding after severe thunderstorms in Death Valley National Park on Sunday trapped three park rangers and about 20 visitors – many out to see a clear night sky – in a volcanic crater overnight.” Park spokeswoman Abby Wines said “the stranded people spent the night in Ubehebe Crater, maintaining contact with park headquarters until they were able to reach safety yesterday morning.” The article notes that “no injuries were reported, but Wines said the unexpectedly severe storms knocked out power in the area, damaged and closed several roads, and filled a historic visitor’s center with several feet of mud and debris.”

NPS SET TO CONTINUE WITH TREE-CUTTING AT POTOMAC CAMPGROUND. The [Bethesda \(MD\)](#)

[Magazine](#) (10/21) reports that after complaints from two nearby residents and a call from County Council member Roger Berliner temporarily halted tree-cutting operations Friday at a Potomac campground, the National Park Service said it plans to resume the tree-cutting and will probably do so in the next few days." John Noel, deputy superintendent for the C&O Canal National Historical Park, said that "he went to the Swain's Lock Recreation Site to examine the 26 trees proposed to be removed and 32 others proposed to be pruned at the site's campground." Noel "agreed that the trees are rotting and in danger of falling on park users below."

STUDENTS GO ON CANOE TRIP AROUND WOLF LAKE. The [Merrillville \(IN\) Post-Tribune](#) (10/20, 105K) reports that "all classes in Grades 6 through 9 at George Rogers Clark Junior-Senior High School in Hammond recently experienced a unique field trip right in their own back yard — a canoe trip around Wolf Lake located only a few blocks from the school." The trip was "made available through a partnership with the National Park Service, Dunes Learning Center and Wilderness Inquiry."

NEW COLONIAL PARK SUPERINTENDENT THANKS COMMUNITY FOR ADVOCACY. The [Newport News \(VA\) Daily Press](#) (10/20, Williams, Subscription Publication, 201K) reports that the Colonial National Historical Park's new Superintendent, Kym Hall, thanked the community for its opposition to Dominion's Skiffes Creek transmission project in her first appearance before the York County Board of Supervisors on September 1. "The view should be protected," she said.

DEVILS TOWER TO HOST STAR VIEWING PARTIES. The [Casper \(WY\) Star-Tribune](#) (10/21, 115K) reports that the NPS "announced that Devils Tower will host a series of star viewing parties October through December." The article notes that "the eight parties are free of charge, and will last approximately two hours."

NPS URGED TO RECONSIDER RACIST NAME FOR A WASHINGTON LAKE. In an op-ed for the [High Country \(CO\) News](#) (10/21, 74K), Glenn Nelson writes that Washington state officially calls Howard Lake "by what is believed to be its oldest known name," but the federal government "recognizes the lake by a name that causes the jaws of most people of color to drop: Coon Lake." Nelson notes that "the federal government did not follow the usual course of supporting the state's action, mostly because of opposition from the National Park Service, which manages the area that contains the lake." The NPS, "acting on research from its North Cascades unit, originally defended its stance by claiming that there was ambiguity around the use of the term 'coon.'" According to Nelson, "in the years leading up to its 2016 centennial, the Park Service has done a lot of talking and writing about the need for diversity and inclusiveness." He concludes that "it's past time for the Park Service to back away from its misguided opposition, encourage Secretary Jewell to come to its rescue, and allow another black life to matter."

US Geological Survey:

USGS SEISMOLOGIST QUESTIONS PREDICTION OF 99.9 PERCENT CHANCE OF MAJOR LOS ANGELES EARTHQUAKE IN 3 YEARS. The [Southern California Public Radio](#) (10/20, 68K) reports that "a controversial new study from NASA's Jet Propulsion Laboratory" claims "there is a 99.9 percent chance of an earthquake" in Los Angeles "between magnitude 5 and 6.3 in less than three years." The study, published earlier this month by the American Geophysical Union's Earth and Space Science journal, has "taken many in the seismic community by surprise." Lucy Jones with the USGS said the "methodology doesn't fully explain the prediction, and the study doesn't adequately address this either." Jones said that, according to the USGS' "models, there is only an 85 percent chance of a magnitude 5 or 6 quake in the same region over a three-year period."

Top National News:

MEDIA ANALYSES: TRUDEAU'S ELECTION LIKELY TO FOSTER IMPROVED US-CANADA TIES. On the day after Justin Trudeau became Canada's Prime Minister-designate, media reporting universally characterized the election results as a likely boost for US-Canada relations. Coverage focuses on Trudeau's promise of a less combative foreign policy style and the perception that he will be more willing to accept a US rejection of the Keystone pipeline. Reporting – including a combined 2 minutes and 50 seconds on the three broadcast networks – also indicates that despite Trudeau's decision to withdraw his aircraft from the US-led coalition against ISIL, he is likely to be a more willing partner on climate change and other issues.

[ABC World News](#) (10/20, story 9, 0:20, Muir, 5.84M) reported President Obama on Tuesday congratulated Trudeau, who “swept into power with a message of optimism saying Canada beat fear with hope.” [USA Today](#) (10/21, Korte, 5.23M) reports Obama made the phone call “in an attempt to lock down continued cooperation with the northern neighbor on trade, terrorism, and climate change.” The White House, according to USA Today, “signaled that not much would change in the relationship” between the neighbors following the Liberal party’s victory. [CBC News](#) (10/20, Fitzpatrick, 225K) reported on its website that the White House indicated Obama and Trudeau “agreed on the importance of deepening the ‘already strong’ bilateral relationship” between the countries “and committed to strengthen joint efforts to promote trade and to combat terrorism and climate change.”

[AFP](#) (10/21) reports the White House and current Prime Minister Stephen Harper “clashed over climate policy” and the Keystone pipeline. While White House spokesman Josh Earnest on Tuesday said “it would be shortsighted to reduce the relationship between our two countries to just one issue,” Chuck Todd reported on [NBC Nightly News](#) (10/20, story 5, 2:05, Holt, 7.86M) that “we now have a Canadian government that is politically more in line with the American government.” According to Todd, “Relations have been good but they have not been so great of late. Will they now get better? That is why Americans should care.”

In an article entitled “5 Reasons The US Should Care About Canada’s New Prime Minister,” [USA Today](#) (10/21, Hjelmgard, 5.23M) lists ways in which Trudeau “is likely to affect policies in Canada and the United States.” According to USA Today, Trudeau “promised to improve strained relations” with Obama and said “he wants to find constructive ways of working with Washington on other issues.” Another [USA Today](#) (10/21, Kovac, 5.23M) article reports that Trudeau and Harper “differ in their approach to foreign policy,” with the incoming leader being less vocally pro-Israel and more focused on environmental issues.

In an analysis piece, [Bloomberg News](#) (10/21, 2.66M) says “a prompt rejection” of the Keystone pipeline by Obama “would make the job easier” for Trudeau “as he seeks to reset the country’s relationship with the US, which he says was damaged” by Harper. According to Bloomberg, Trudeau “could use a quick US denial” of the pipeline “to focus discussions” with Obama “on issues such as trade and climate.” Bloomberg notes there has been “speculation” that Obama “would reject the pipeline shortly after the Canadian election.” However, [The Hill](#) (10/20, Cama, 471K) reported, Secretary of State Kerry said Tuesday that Canada’s election results will not change the White House’s approach to the Keystone issue. Kerry said the decision “is being based on the merits and countervailing balance of all the input that has come from a very exhaustive agency review.” Kerry reiterated that he seeks a decision “as fast as possible.”

[Reuters](#) (10/21, Mason, Rampton) reports the White House indicated it would like the new Canadian government to take increased actions to address climate change. Earnest said that while Canada has “made a substantial and important commitment” ahead of the Paris climate talks, “We believe that it’s possible that there is more that Canada can do in this regard.”

However, writing for [Mother Jones](#) (10/20, 758K), Suzanne Goldenberg claimed “those hoping for a U-turn in Canada’s climate change policy...are in for a reality check.” According to Goldenberg, while Trudeau does not align directly with many of Harper’s views or policies, “it would be a mistake” to see the new Canadian leader or his party “as climate champions.” In [Slate](#) (10/20, 1.38M), Joshua Keating argued that at least with regard to the Keystone pipeline, Trudeau does present a change from Harper. Keating characterizes Trudeau as “a very different leader” from Harper and says he will make the Keystone pipeline less of a focal point of US-Canada relations. According to Keating, Trudeau “has described his support for the pipeline as ‘steadfast,’ but it’s clearly not the make-or-break issue for him that it was for Harper.”

The [Wall Street Journal](#) (10/21, Vieira, Subscription Publication, 5.95M) reports Trudeau said he will work to restore Canada’s reputation of defending minorities and become more involved in multilateral policy making. At a rally in Ottawa, Trudeau said, “To this country’s friends around the world, I want to say this: Many of you have worried Canada has lost its compassionate and constructive voice in the world over the past 10 years. I have simple message for you: We’re back.” The [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) similarly reports that Trudeau “is likely to present a very different face to the world” than Harper, “but the most noticeable difference will probably be in tone.” Trudeau has vowed to “put an end to Mr. Harper’s often belligerent style of politics and diplomacy.” Trudeau said Tuesday that “a positive, optimistic, hopeful vision of public life isn’t a naïve dream – it can be a powerful force for change.” The Times says Trudeau has previously indicated a desire to end Harper’s reliance on military solutions

and tough rhetoric, and instead focus on working within international organizations, such as the United Nations.

The [CBS Evening News](#) (10/20, story 10, 0:25, Pelley, 5.08M) reported, “Canada took a left turn” as “Trudeau and the Liberal Party rode in on a landslide.” In a [USA Today](#) (10/21, 5.23M) op-ed, author David Andelman says “most of the reasons” Canadian voters chose Trudeau to lead the country “boiled down to one fundamental: The Liberal Party leader was simply nicer than his opponent. And most Canadians believe they are, too.” Similarly, the [Wall Street Journal](#) (10/21, Subscription Publication, 5.95M) editorializes that Canadians wanted a change from the Harper government, which had become isolated and sought to restrict debate. The [New York Times](#) (10/21, Subscription Publication, 11.82M) agrees, editorializing that Trudeau’s election “shows how ready Canadians were to emerge from a decade under the Conservative government of the secretive and combative Stephen Harper.”

[AFP](#) (10/21) reports Trudeau told Obama on Tuesday that Canadian fighter aircraft will withdraw from the US-led coalition against ISIL, but the new Canadian leader did not present a timeline for the move. In a front-page story, the [Washington Post](#) (10/21, A1, Brown, 6.76M) reports Trudeau said, “I committed that we would continue to engage in a responsible way that understands how Canada has a role to play in the fight against ISIL,” adding, that Obama “understands the commitments I’ve made around ending the combat mission.” According to the Post, a “senior Administration official,” said Obama and Trudeau discussed joint anti-terrorism efforts and, “We expect Canada will continue to be a valuable contributor to the 65-member global coalition” against ISIL.

Trudeau’s Win Could “Lead To Full Marijuana Legalization” In Canada. [USA Today](#) (10/21, Hughes, 5.23M) reports Trudeau’s win “may lead to full marijuana legalization” for Canada. According to USA Today, Trudeau promised during his campaign that “Canada would create a system to tax, regulate and sell marijuana, along with stiff penalties for anyone giving pot to children or caught driving while stoned.” USA Today says American “cannabis activists hailed Tuesday’s election as a milestone, suggesting that a day may soon come when cross-border trade talks include...legal weed.”

[AFP](#) (10/21) reports Trudeau’s “promise to legalize recreational cannabis” will likely “help the nation’s nascent medical marijuana industry.” Investors, according to AFP, “are betting” they could build on companies’ current production of marijuana for medical use and “quickly scale up to serve recreational pot users too, once Trudeau makes good on his promise.”

NYTimes Analysis: Trudeau Is “No Dynast” Despite Father Being Former Prime Minister. In a 1,350-word profile piece, the [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) reports that despite there being “many easy parallels to draw between” Trudeau and his father, former Prime Minister Pierre Elliott Trudeau, Canada’s incoming leader “is no dynast who slipped effortlessly into a family political machine.” The Times notes that Trudeau “did not even enter politics until 18 years after his father gave it up, and seven year after his father’s death.” According to the Times, Trudeau “built his own cadre of advisers, mostly from his own generation” and sometimes “chose more difficult roads – partly, it appears, to show he had not been handed a life in politics on a platter.”

In the [Washington Post](#) (10/21, 6.76M) “Reliable Source” blog, Emily Heil says Trudeau and his wife, Sophie Grégoire-Trudeau, “have a lot in common with the Obamas.” According to Heil, “they’d have lots to talk about, apart from liberal politics, like fitness!”

IN APPARENT REVERSAL, BIDEN SAYS HE PRIVATELY URGED OBAMA TO AUTHORIZE UBL RAID. Vice President Biden did not reveal Tuesday whether or not he will enter the Democratic presidential race, but his remark that he privately advised President Obama to launch the 2011 raid that led to the death of Osama Bin Laden – which contradicted Biden’s past public comments that he advised against the raid – is being interpreted as a possible line of attack against Hillary Clinton. All three broadcast networks reported on the statement, combining for nearly eight minutes of coverage, and ABC led with it. The tone of the coverage is mixed, with most reports calling it a reversal, and some concluding that Biden may be undercutting his own reputation for candor.

There was also Twitter discussion of Biden’s remarks. Anthony De Rosa, a digital producer for The Daily Show who has nearly 89,000 followers, [tweeted](#), “Biden sounds like Brian Williams with his evolving recollection of the Bin Laden raid.” Jonathan Martin of the New York Times [tweeted](#), “@vp today signals: he’ll run & it’ll get negative FAST or: he’s not happy about being sidelined.” His Times colleague Maggie

Haberaman [tweeted](#), Biden's subtle digs at Clinton indicate that if he runs it'll be ugly. In addition, the hashtag [#BidenWatch](#) emerged on Twitter, with Fox Business Network's Trish Regan [tweeting](#), "Sure sounds like he's running..." Mashable's Juana Summers [tweeting](#) Biden's Wednesday official schedule, and Al Jazeera America's David Shuster [tweeting](#) that "Hallie Biden, widow of the late Beau Biden, says her family supports a Presidential campaign '100%'".

[ABC World News](#) (10/20, lead story, 2:50, Muir, 5.84M) reported that "as the pressure mounts for Joe Biden to decide whether he'll run...many [are] now asking, did he change his story?" ABC (Karl) added, "Biden has described Obama's decision as especially courageous because in that key meeting when it came time to decide, most of the President's advisers, including Biden himself, were not in favor of the raid." On Tuesday, he "offered an entirely different account of what happened on that fateful day." Biden was shown saying, "So as we walked out of the room and we walked upstairs, I told him my opinion that I thought he should go but to follow his own instincts. But it would have been a mistake, imagine if I had said in front of everyone, 'don't go, or go,' and his decision was a different decision." Karl: "But until today, Biden has said he told Obama and his team that night to hold off on the raid."

The [CBS Evening News](#) (10/20, story 6, 2:05, Pelley, 5.08M) reported that Biden "sounded more like a presidential candidate, talking up his foreign policy credentials, doing some rewriting of his own history and firing a shot over the bow of the Democratic frontrunner." CBS' Nancy Corden added that Biden "never mentioned" Clinton by name, "but it was all too clear the comparison he was making when he said this about his stature overseas." Biden: "I will get sent to go speak to Putin or go speak to whomever, and it's because the secretary of state, we've had two great secretaries of state, but when I go, they know that I am speaking for the President." Cordes added that Biden left Clinton "out of his story" about the Bin Laden raid.

[NBC Nightly News](#) (10/20, story 3, 2:35, Holt, 7.86M) also said of Biden, "If anything, he is beginning to sound more like a candidate, taking not-so-veiled swipes" at Clinton. NBC (Welker) added that Biden "said he and the President were in lock-step when it came to authorizing the raid against Bin Laden." The [AP](#) (10/21, Lederman) says Biden "backtracked on his previous claims to have advised Obama against the raid" in "an unusual reversal."

[Bloomberg Politics](#) (10/21, Talev, 247K) reports that in his remarks at an event honoring his vice presidential predecessor Walter Mondale, Biden "portrayed himself as the central player" in the Administration "on everything from working with congressional Republicans to the killing" of Bin Laden. [USA Today](#) (10/21, Singer, 5.23M) says Biden "revised his account of his advice" to Obama after Mondale said he "would only disagree with President Jimmy Carter in private during his tenure as vice president."

The [New York Times](#) (10/21, Harris, Martin, Subscription Publication, 11.82M) says with the remark, Biden "sought...to dispel" the notion that he had opposed the raid, which "might dog him on the campaign trail." Biden said he "never gave his own views on controversial issues until the rest of the cabinet had spoken, mindful that he did not want the rest of the team to see a difference between his opinion and that of the president." Biden said only then-Defense Secretary Robert Gates and then-CIA Director Leon Panetta "had expressed definitive views on the raid," and "pointedly did not mention" Clinton, who "has said that she was in favor of the raid."

The [Washington Post](#) (10/21, Jaffe, 6.76M) says Biden "seemed to change his account" with a revision that "seems designed to buttress his qualifications to serve as commander-in-chief." But Biden "seems to have contradicted his earlier memories of the final meeting before the bin Laden raid." The [Wall Street Journal](#) (10/21, Nelson, Nicholas, Subscription Publication, 5.95M) says Biden cast himself as Obama's chief adviser on many issues, and sought to downplay Clinton's advisory role as secretary of state. The [Los Angeles Times](#) (10/21, Memoli, 4.07M) says Biden used the event "to highlight his close relationship with President Obama that would be at the heart of Biden's potential presidential campaign."

The [New York Daily News](#) (10/21, Joseph, 3.75M) says Biden's "new details make him out to be a supporter of the high-stakes raid that killed Bin Laden – a big shift from the common narrative that he resisted it, one Clinton's allies have hinted could be a main attack line if Biden does jump into the race." The [Boston Globe](#) (10/21, Linskey, 1.1M) says Biden "has been on record recommending against the move."

[Politico](#) (10/20, Dove, 942K) says Biden "contradicted" his own previous accounts as well as "what Obama himself said about the decision during his third 2012 debate with Mitt Romney." The President said

at the time, "Even some in my own party, including my current vice president, had the same critique as you did." [The Hill](#) (10/20, Fabian, 471K) reports White House Press Secretary Josh Earnest "dodged multiple questions" about Biden's remarks, "saying he would not comment on private conversations between the president and the vice president."

[Politico](#) (10/20, Wheaton, 942K) writes that "for a politician who projects authenticity," Biden "seemed to stumble around the truth" Tuesday, not just on the Bin Laden raid but also in claiming "to have veto power over nominations and to speak for the president with more authority than other top officials do." [TIME](#) (10/20, 19.55M) says on its website that Biden's "narrative runs in the face of the one Biden himself offered in 2012." The [Daily Caller](#) (10/20, Ross, 375K) says Biden "contradicted himself" with the remarks. Gregory Krieg of [Mic](#) (10/20, 1.5M) writes that Biden "really sounds like someone who is running for president." [The Blaze](#) (10/20, 1.66M), the [CNN](#) (10/20, Koran, 5.17M) website,

SEN. MURKOWSKI SEES TOUGH ROAD FOR INTERIOR NOMINEE. [Politico Pro](#) (10/20, Subscription Publication) reports that Senate Energy and Natural Resources Committee Lisa Murkowski said that Interior Department pick Kristen Sarri would “have a lot of explaining to do at a hearing on six nominees today.” While Murkowski was “pleased that President Barack Obama had renamed Mount McKinley this summer to Denali, the Alaska Republican said she was still frustrated with the Interior Department’s ‘heartless decision’ to deny a road in King Cove.” Murkowski also “criticized Interior for closing off oil production in Alaska and last week’s cancellation of offshore sales and lease extension.”

Meanwhile, the [Daily Caller](#) (10/21, Barton, 375K) reports that Murkowski is “torn between leaving the Department of the Interior’s independent watchdog post vacant, or confirming President Barack Obama’s nominee crippled by recurring allegations of ‘playing games with Congress.’” She said, “I strongly believe that Interior needs a permanent [inspector general], and I’m disappointed the administration has let the position go unfilled for six and a half years.” Murkowski continued, “But I am also committed to ensuring that the individual we confirm is fully independent ... The tenure that you have been involved with thus far in this position has been marked by controversy.”

Additional coverage was provided by [The Hill](#) (10/21, Henry, 471K), [KTOO-FM](#) Juneau, AK (10/20), and [Alaska Public Radio Network](#) (10/20, 2K).

HISTORIC \$186 MILLION SETTLEMENT WITH CHOCTAW, CHICKASAW NATIONS LAUDED. The [Indian Country Today Media Network](#) (10/20, 32K) reports that “tribes and the U.S. Department of the Interior heralded the outcome of a \$186 million settlement signed earlier this month between the federal government, the Choctaw and the Chickasaw nations to solve a longstanding land trust dispute as a new chapter in relations.” During the October 5 signing ceremony, Chickasaw Nation Governor Bill Anoatubby “gave a nod to the impetus provided” by Interior Secretary Sally Jewell. He said, “We respect the vital role Secretary Jewell has taken in helping make this historic settlement a reality. We are confident she will play an essential role in our efforts to continue strengthening the relationship between our governments, because we believe she has a unique appreciation for the mutual benefits of a positive government-to-government relationship.” Jewell said, “Today’s agreement is the latest addition to a record number of longstanding settlements resolved under this Administration. This historic settlement is the start of a new chapter in our trust relationships with the Chickasaw and Choctaw Nations, and underscores our commitment to fulfilling those responsibilities to Native communities across the country.”

U.S. TREASURY CONFIRMS \$20B BALANCE FOR LWCF. [E&E Publishing](#) (10/21, 705) reports that “the Land and Water Conservation Fund that expired earlier this month for the first time in its 50-year history currently contains nearly \$20 billion, according to the U.S. Treasury, which maintains the program’s balance sheets.” But “whether that is ‘real’ money available to be spent on federal land acquisitions, private land easements and state recreation projects depends on whom you ask.” The article notes that “the \$19.8 billion can only be reduced until Congress reauthorizes the program.”

Additional coverage of the LWCF was provided by the [Durango \(CO\) Herald](#) (10/20, 31K).

PROPOSED DESIGNATIONS OF THREE NATIONAL MONUMENTS IN CALIFORNIA DESERT RAISES CONCERNS ABOUT “LAND GRAB.” [Fox News](#) (10/20, 8.91M) reports that “a group of off-roaders and others are attempting to fight a proposed designation of three national monuments in the California desert under the Antiquities Act.” The Obama Administration is “considering using the federal Antiquities Act to bypass the legislative process at the request of Sen. Dianne Feinstein, whose efforts to have the Mojave Trails and Castle Mountain, both in the Mojave Desert, and a section of the Sonoran Desert named federal sites were repeatedly blocked by Republicans.” According to the article, “a White House move could put the land under federal control, which critics say could cut funding for upkeep or even restrict access.”

UNMANNED HELICOPTER OFFERS NEW WAY TO FIGHT WILDFIRES. The [Voice of America](#) (10/21, Banse, 32K) reports that the K-MAX “unmanned, water-dropping” helicopter was tested by the US government. The helicopter can fly through limited visibility. Brad Koeckertiz, the unmanned aircraft program manager with the US Department of Interior, says that unmanned helicopters such as the K-MAX will be integrated into routine measures to fight wildfires over the next few of years. The article notes that the K-MAX helicopters have already been used by the US Marines in Afghanistan, to

resupply remote outposts at night and replace dangerous convoys on the ground. The article notes that the growing uses for drones is also why the FAA is seeking to register all drones.

Additional coverage was provided by [Vertical Magazine \(CAN\)](#) (10/21).

JEB BUSH PROPOSES MOVING INTERIOR DEPARTMENT FROM D.C. To Western City. The [Las Vegas Sun](#) (10/20, Lucas, 199K) reports that “Republican presidential candidate Jeb Bush will unveil his proposals for Western land and resource management in a campaign stop in Reno on Wednesday morning, in a speech likely to resonate with conservative voters opposed to what they see as federal overreach in the Western states.” Bush is “expected to speak at 11 a.m. Wednesday at Rancho San Rafael Regional Park before appearing at a forum sponsored by the LIBRE Initiative at the College of Southern Nevada Cheyenne Campus in North Las Vegas at 6 p.m.” In the proposal, Bush will “call for moving the headquarters of the Department of Interior from Washington, D.C., to a city in the western United States like Denver, Salt Lake City or Reno and will say that as president he would direct federal agencies to give broad latitude to states to determine land-use issues.”

STUDY: ALASKAN WILDFIRES COULD EXACERBATE GLOBAL WARMING. The [Washington Post](#) (10/21, Mooney, 6.76M) reports that some greenhouse gas sources outside the scope of forthcoming UN climate talks are beyond governments’ control, such as raging peat fires in Indonesia this year, emitting “as much as Japan produces in a year from fossil fuels.” Elsewhere, a new study in Nature Climate Change reaffirms concerns about the emissions of northern fires in Alaska. The Post reports that “climate researchers are still trying to figure out how all of these factors will interrelate,” but fire is a “powerful determinant of how much carbon resides in land, rather than in the air, across our globe.”

INTERIOR’S VINE ACCOUNT HIGHLIGHTED. [Politico](#) (10/21, 942K) highlights the Interior Department has a great Vine account. Providing a link, Politico says “this is Internet gold.”

Empowering Native American Communities:

BIA RULE ANNOUNCES RULE GIVING TRIBES MORE CONTROL OVER ELECTIONS. [Law360](#) (10/20, 21K) reports that the BIA “on Monday announced its final rule for Native American tribal elections conducted by the U.S. Department of the Interior, saying the new rule will encourage tribes to take control of their elections and help protect the voting rights of tribe members living in urban areas.” Assistant Secretary of Indian Affairs Kevin K. Washburn said “in a statement Monday that the rule will allow tribes to opt out of having the interior secretary conduct their elections.”

The [Native American Times](#) (10/20, 337) reports that Washburn said, “Though many federal responsibilities concern the lands we hold in trust for tribes and Indian people, more than 55 million acres nationwide, the United States has a moral obligation to preserve connections between Indian people and their tribes that it once sought to destroy. For the future of Native nations and the health of Indian Country, American Indians in urban areas must work harder to maintain connections with their tribes. One important aspect of that relationship is participation in the civic and political life of their tribal governments. For that reason, our Secretarial election amendments seek to prevent tribal members living in urban areas from being inadvertently disenfranchised in Secretarial elections.”

HEARING FOCUSES ON NATIVE HAWAIIAN ELECTION. The [AP](#) (10/21, Kelleher) reports from Honolulu that a federal court hearing began on Tuesday “in a lawsuit by people who want to put a stop to an election process that is underway for Native Hawaiians.” The lawsuit, filed in August, “says it’s unconstitutional for the state to be involved in a race-based election.” The state “argues in court documents that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it’s not involved in next month’s vote to elect delegates for a convention to determine self-governance for Native Hawaiians.” Tuesday’s hearing “is focused on the plaintiffs’ motion for a preliminary injunction,” and the plaintiffs “want the judge to limit voter registration activities or stop the election altogether.”

Additional coverage was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Navajo Times \(AZ\)](#) (10/21, 66K), and [Yahoo! News](#) (10/21, Kelleher, 5.98M).

INTERIOR SIDES WITH ALASKA NATIVE GROUP IN INVESTIGATION OF MASSACHUSETTS COLLEGE TRIBAL COLLECTION. The [AP](#) (10/21, 2.28M) reports that “a Massachusetts college was

round in violation of a federal law regulating the possession and sale of potentially sacred artifacts following a complaint from an organization of Alaska Natives.” The Interior Department said “an investigation substantiated the complaint against Andover Newton Theological School filed in June by the Sealaska Heritage Institute.” The institute’s president, Rosita Worl, said “the school possesses at least two southeast Alaska artifacts, including a Tlingit halibut hook that is considered sacred.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/21, D’oro, 344K), the [Boston \(MA\) Herald](#) (10/21, 548K), the [Daily Mail \(UK\)](#) (10/21, 5.59M), the [Miami \(FL\) Herald](#) (10/21, 651K), [Minneapolis \(MN\) Star Tribune](#) (10/21, D’oro, 1.19M), [ABC News](#) (10/21, 3.97M), and the [Alaska Dispatch News](#) (10/20, 219K).

US ATTORNEY SAYS BIA OFFICER WAS JUSTIFIED IN DEADLY SPIRIT LAKE SHOOTING. The [AP](#) (10/21) reports that US Attorney Chris Myers “says” that an investigation by his office came to the conclusion that BIA Officer Terry Morgan was justified in shooting and killing “31-year-old Joseph Charboneau during a standoff with officers on June 16.” The [Grand Forks \(ND\) Herald](#) (10/21, 100K) reports that the US Attorney’s Office “said” the shooting was justified because Charboneau posed a “real and immediate” threat to officers and another person at the scene after he refused to put down his gun, which was pointed at the officers. The Grand Forks Herald reports that, as a result of the investigation, Federal prosecutors “will not file charges against” Morgan.

Additional coverage was provided by the [Dickinson \(ND\) Press](#) (10/21, 1K), the [Forum of Fargo-Moorhead \(ND\)](#) (10/21, 14K), [KXJB-TV Fargo \(ND\)](#) Fargo, ND (10/21, 18K), [KFGO-AM Fargo \(ND\)](#) Fargo, ND (10/20, 3K), [KXMC-TV Minot \(ND\)](#) Minot, ND (10/21, 1K), and [KFYR-TV Bismarck \(ND\)](#) Bismarck, ND (10/21, 1K).

CRIME JUMPS AFTER TRIBES CUT FROM BIA FUNDING. The [Los Angeles Times](#) (10/20, Romney, 4.07M) reports on a “time of crisis for public safety on tribal lands.” According to the article, “a federal law decades ago shifted the primary burden of criminal law enforcement on tribal lands in California and five other states to local authorities,” but “many lack the resources to do the job and, in some cases, sufficient knowledge of tribal law and culture to win the trust of tribal members.” After “tribes were cut off from steady funding for their own justice systems,” crime has “flourished.”

ADDITIONAL COVERAGE: YAKAMA NATION’S PETITION TO SELF-GOVERN APPROVED.

Additional coverage that the BIA on Monday granted the Yakama Nation’s petition for “retrocession” was provided by the [Bellingham \(WA\) Herald](#) (10/21, 101K), the [Clark County \(WA\) Columbian](#) (10/20, 86K), the [Washington \(DC\) Times](#) (10/21, 344K), the [Spokane \(WA\) Spokesman-Review](#) (10/20, 183K), the [Native American Times](#) (10/21, 337), the [Law360](#) (10/21, 21K), [KNDU-TV Yakima \(WA\)](#) Yakima, WA (10/21, 3K), and [KUOW-FM Seattle \(WA\)](#) Seattle (10/21, 15K).

GILLETTE’S SERVICE IN OBAMA ADMINISTRATION PRAISED. In an editorial, the [Bismarck \(ND\) Tribune](#) (10/21, 37K) lauds Jodi Gillette’s service in the Obama Administration. According to the paper, Gillette’s “positions gave her a voice in a White House that has seemed genuinely concerned about Native American issues.”

Office of Insular Affairs:

ASSISTANT SECRETARY KIA’AINA PROPOSES MARSHALLS FUND CHANGES. [Radio New Zealand](#) (10/21, 1K) reports that “a top US official has submitted a proposal to the Senate and House to allow the people of Bikini to use resettlement and relocation funds outside of the Marshall Islands.” Assistant Secretary for Insular Areas Esther Kia’aina says “it is an appropriate course of action to take regarding the welfare and livelihood of the Bikinian people.” The Bikinians were “displaced by US nuclear weapons testing 70 years ago but are now looking at relocating again because of deteriorating conditions on Kili and Ejit Islands.” According to the article, “in addition to cramped living quarters and a lack of suitable sustainable resources, the islands have been experiencing more frequent storms and king tides resulting in salt water inundation and the destruction of crops.”

[Radio New Zealand](#) (10/21, 1K) reports that “a representative from Bikini Atoll says a proposal to allow people to use resettlement and relocation funds outside of the Marshall Islands is not wanted.” Bikini liaison officer Jack Niedenthal says “the US should take full responsibility for any resettlement including

providing extra financing. Niedenthal said, we still got a ways to go, we still have to do some more lobbying and some more talking to people in Washington to make them understand that what's being proposed by the assistant secretary is what we view as 'Plan B'. It's not ultimately what we want in terms of helping our people."

CHINA STRENGTHENS RELATIONSHIP WITH PACIFIC REGION. The [Marianas Variety](#) (10/21) reports that "China and the Pacific Islands Forum Secretariat further strengthened their relationship on Friday when the two met at a ceremony to hand over \$1.05 million to assist the Pacific region." Forum Secretariat Secretary General Meg Taylor and Chinese Ambassador to Fiji Zhang Ping "attended the ceremony and delivered speeches respectively." Zhang "reiterated his nation's ongoing interest in the region saying, 'China attaches great importance to the South Pacific region. The Chinese side stands ready to enhance mutual understanding and cooperation with Pacific Island Countries and contribute to the development and capacity building in the region.'"

COUNTRIES IN PACIFIC URGED TO BEGIN TALKS ON CLIMATE MIGRATION. [Radio New Zealand](#) (10/21, 1K) reports that "all countries in the Pacific are being urged to start discussions on how to help people forced to move from low lying atoll nations like Kiribati and Tuvalu." According to the article, "184 million people worldwide were displaced by disaster between 2008 and 2014 and at special meetings in Geneva last week 110 countries gave the nod to a Protection Agenda for dealing with future migration challenges." The article notes that "the experiences of small island countries which face rising seas due to climate change helped form the global action plan under the Swiss Norwegian Nansen Initiative."

JOURNALIST SPEAKS AT UNIVERSITY OF GUAM ON CLIMATE ISSUES, CORRUPTION IN PACIFIC ISLANDS. The [Marianas Variety](#) (10/21) reports that "author and journalist Giff Johnson spoke to students at the University of Guam on Monday evening about climate change and development in the Pacific islands." Johnson's "lecture, entitled 'Idyllic No More: Pacific Island Climate, Corruption and Development Dilemmas,' is based on his latest book — a compilation of essays detailing the looming climate threat to the region, its booming fishing industry, and the U.S. nuclear test legacy in the Marshall Islands." Johnson called attention to "climate-driven migration from remote pacific islands to Guam and mainland U.S."

RISING SEA LEVELS THREATEN KIRIBATI. The [National Geographic](#) (10/21, 31.65M) provides a picture gallery of the threat of rising sea levels driven by climate change on Kiribati.

Tackling America's Water Challenges:

WATER SCHEDULED TO BE RELEASED FROM NEW MELONES. The [Sonora \(CA\) Union Democrat](#) (10/21, 28K) reports that "more than 7 billion gallons of water is scheduled to be released from New Melones Reservoir beginning today to ensure flows in the Stanislaus River will keep temperatures cool enough for adult salmon migrating up the river to spawn this fall." Oakdale Irrigation District and South San Joaquin Irrigation District said "it would benefit river conditions and fisheries, as well as the needs of agriculture and more than 200,000 residential customers downstream." The article notes that "earlier this year, the irrigation districts sparred with the U.S. Bureau of Reclamation — which manages New Melones Reservoir — over spring pulse flows that they feared would leave as little as 147,000 acre-feet in the reservoir by the end of September."

SAN JOAQUIN COUNTY BOARD OF SUPERVISORS VOTE TO OPPOSE DELTA TUNNELS PLAN. The [Lodi \(CA\) News-Sentinel](#) (10/21, 14K) reports that "at a meeting on Tuesday, the San Joaquin County Board of Supervisors voted to adopt a resolution in formal opposition of California WaterFix, also known as the twin tunnels plan." Supervisor Kathy Miller said, "The WaterFix is just a thinly veiled version of the former (Bay Delta Conservation Plan) and continues to push the fatally flawed twin tunnels, which will simply sacrifice one region of California for the benefit of another."

Securing America's Energy Future:

Renewable Energy:

ENVIRONMENTALISTS, DOMINION BOTH SUPPORT OFFSHORE WIND DEVELOPMENT. On his [Bacon's Rebellion \(VA\)](#) (10/21, Bacon) blog, James Bacon reports on an Environment Virginia-

sponsored webinar held Tuesday morning in which representatives from Dominion, environmental groups, and the McAuliffe Administration all voiced support for the utility's experimental offshore wind farm project. For environmentalists, Bacon writes, the project represents the beginning of an industry that would increase the use of green energy along the Atlantic and displace fossil fuels. For the Governor's office, it represents increased green energy coupled with economic development that takes advantage of the Newport News area's shipbuilding industry.

Onshore Energy Development:

CHESAPEAKE ENERGY FINED \$2.1 MILLION FOR UNDER-REPORTING NATURAL GAS. The [Greenwire](#) (10/20, Subscription Publication) reports that the Interior Department on Monday "announced a \$2.1 million civil penalty against Chesapeake Energy Corp. for misreporting the amount of gas it produced and sold from American Indian lands in Oklahoma." Chesapeake "failed to comply with a 2011 order that found 'systemic errors' in the company's monthly production reports for more than 100 Indian leases, according to Interior's Office of Natural Resources Revenue." The company "agreed to amend the monthly reports, but it continued to maintain inaccurate information on the agency's data systems, ONRR said." The firm was "assessed a penalty based on 'knowing or willful maintenance' of the inaccurate information, ONRR said."

Additional coverage was provided by [Politico](#) (10/21, 942K), [Natural Gas Intelligence](#) (10/21, Subscription Publication), the [Native American Times](#) (10/21, 337), and [KOKC-AM Oklahoma City \(OK\)](#) Oklahoma City (10/20, 1K).

TEXAS ENERGY REGULATOR OPPOSES STREAM PROTECTION RULE. [Law360](#) (10/21, 21K) reports that "Texas' top energy regulator on Tuesday said the agency will oppose a U.S. Department of the Interior proposed rule aimed at better protecting streams and other waterways from nearby mining activity, saying the regulation encroaches on ground better left to the state." Texas Railroad Commission Chairman David Porter on Tuesday said "the state would sign on to the multistate Interstate Mining Compact Commission's comments opposing the proposed waterway regulation."

USGS REPORT STATES EARTHQUAKES COINCIDE WITH OKLAHOMA OIL BOOMS. [KOCO-TV](#) Oklahoma City (10/21, 93K) reports that "a study by the United States Geological Survey states that the earthquakes from the past 100 years seem to coincide with the oil boom in Oklahoma."

OKLAHOMA REGULATORS SHUT DOWN THREE MORE DISPOSAL WELLS. The [EnergyWire](#) (10/21, Subscription Publication) reports that "Oklahoma oil and gas regulators dealing with a dramatic increase in earthquakes near the pipeline hub of Cushing have shut down three more disposal wells." Also, "another well was shut down by the company that owns it after regulators said they were concerned it was drilled too deep." In addition, "the operators of seven other wells were told in a letter written Friday and released yesterday that they must reduce the volume of drilling waste that they inject deep underground."

OKLAHOMA LIMITS DISPOSAL WELLS AMID CUSHING QUAKES. [Reuters](#) (10/21, Hampton, Brandes) reports that Oklahoma's oil and gas regulator on Monday said it could impose new limits on all saltwater disposal wells within a 10-mile radius of Cushing. Reuters reports that Oklahoma now experiences as many as two magnitude 3.0 quakes per day, up from two per year. Thirteen wells have been ordered shut and approvals for new wells have been halted, Reuters reports. Scientists told Reuters that shutting wells could ease tectonic disruption in Oklahoma.

STUDY: FRACKING CAN CAUSE METHANE LEAKS IN NEARBY ABANDONED OIL WELLS. [Reuters](#) (10/20, Valdmanis) reported that according to a study published Tuesday in the Water Resources Research journal, fracking can cause methane leaks in nearby abandoned oil wells. The methane leaks could be a large source of unrecorded greenhouse gas emissions, according to the study. The study said that energy companies could reduce the probability of such methane leaks by trying to identify abandoned wells before they begin fracking, although the task could be difficult due to large numbers of unmarked abandoned wells.

BLM CRITICIZED FOR FAILING TO PRODUCE PICTURES UNDER FOIA REQUEST. For the [Fairfield \(MT\) Sun Times](#) (10/21), Darryl L. Flowers criticizes the BLM for failing to provide pictures in connection with "the proposed Solenex, LLC natural gas well on public lands in the Lewis and Clark National Forest"

that were requested under the Freedom of Information Act. The paper received sixteen photos and “two photos were missing.” He notes that “curiously, the two omitted photos were the only ones that included a person in the photos.”

Offshore Energy Development:

FEDS INVESTIGATE WORKER’S DEATH ON DRILLSHIP CONTRACTED BY CHEVRON. [Fuel Fix \(TX\)](#) (10/20, Dlouhy, 7K) reports that officials from the Bureau of Safety and Environmental Enforcement and the Coast Guard are investigating “the death of a worker on a drillship in the Gulf of Mexico that was preparing to bore a well for Chevron.” Fuel Fix says that “the Pacific Santa Ana drillship was just beginning operations for Chevron in about 4,800 feet of water at the site and had not yet penetrated the sea floor when an employee of that drilling contractor was fatally injured.” Fuel Fix adds that Chevron has a 36 percent working interest in the Keathley Canyon well-leasing block where the incident occurred, an area where “Chevron outlined ambitions to drill up to seven wells” earlier this year.

The [AP](#) (10/21) reports that Amy Roddy, spokeswoman for Pacific Drilling SA, the ship’s owner, “said the company is not releasing any details about the man to respect his family’s privacy. She also refused to disclose how the man died or details of the accident, citing an ongoing investigation.”

[NASDAQ](#) (10/20, Sider) reports that Chevron has contracted the ship since 2012. The [New Orleans Times-Picayune](#) (10/21, Larino, 718K) adds that “operations have been shut down and personnel remain onboard, according to the drillship’s operator.”

[Offshore Engineer](#) (10/20, Leon) reports that “the ship was to use its dual gradient drilling functions for Chevron’s Anchor-1 prospect last year in Green Canyon block 807, but the well was junked due to mechanical failures. However, in January of this year, Chevron hit high quality oil pay in multiple Lower Tertiary Wilcox Sands at a second Anchor well also drilled by the Pacific Santa Ana.”

The [Dow Jones Newswires](#) (10/21, Sider) reports that this is the first death related to offshore drilling operations in the Gulf of Mexico this year.

[Reuters](#) (10/21), [gCaptain](#) (10/21, 2K), [Upstream Online](#) (10/21, Schmidt, Brenner, 20K), and [Maritime Executive](#) (10/20, 21) also cover the story.

BRIARCLIFFE ACRES VOTES AGAINST OFFSHORE DRILLING. The [Myrtle Beach \(SC\) Online](#) (10/21, 36K) reports that “in a storm of debate over offshore drilling, Briarcliffe Acres surfaced as the latest coastal town to join a united front against seismic testing and drilling for oil and natural gas off of South Carolina’s beaches.” According to the article, “missing councilwoman Abby Stewart, who has been with family on the west coast, the town council unanimously passed a resolution Monday, joining 23 other S.C. coastal towns in a stance against offshore drilling.”

SHELL VESSEL RESCUES FRENCHMAN, CAT FROM SAILBOAT STRANDED IN SEAS NEAR ALASKA. The [AP](#) (10/21, Thiessen) reports that a Frenchman and the cat tucked inside his clothing were rescued on Tuesday after he leapt from his sailboat to a waiting rescue ship sent by Shell. The man activated a location beacon in the high seas south of Alaska and told the Coast Guard his sailboat had lost its rudder and rigging in the high winds and 20-foot waves. The Coast Guard contacted Shell’s oil drilling rig, the Polar Pioneer, which is on its way to Port Angeles, and the rig “sent a support ship, the Tor Viking, to rescue the sailor.” The AP reports that “it wasn’t immediately clear if the man would continue with the Shell ships to Washington state.”

CUNNINGHAM: INTERIOR DEPARTMENT OFFICIAL SHUTS THE DOOR ON ARCTIC DRILLING. In an analysis of the Interior Department’s recent decision on the future of Arctic drilling, [Oil Price](#) (10/21, 2K) reporter Nick Cunningham writes the Interior Department’s decision to cancel lease sales through 2017 “leaves almost no possible pathway for an oil company to drill in the Arctic for years to come, perhaps killing off drilling for a decade or so at a minimum.” Cunningham goes on to write that “it was likely that there wouldn’t have been new drilling in any event, given Shell’s decision and current market conditions, but Interior’s decision officially shuts the door on the Arctic in the medium-term.”

Casey: Interior’s Actions On Arctic Drilling Trends “Toward A Permanent Clampdown.” [CleanTechnica’s](#) (10/20, 15K) Tina Casey writes that “in the absence of local regulations, the Feds are

the only game in town and it seems that the Arctic's role in the US economy is too important to trust to compliance by oil companies." Casey adds that, even though the Interior's actions last week on Arctic drilling may be "only temporary, but the trend is toward a permanent clampdown."

4-Traders: Federal Government To Blame For Low Arctic Drilling Interest. In an op-ed piece on the Interior's Arctic drilling decision, [4-Traders](#) (10/21, 5K) writes the Federal government's "difficult" regulatory obstacles is to blame for the lack of interest among oil companies to explore for oil and natural gas in the Arctic. 4-Traders writes that the "demand for oil and natural gas isn't going away, so energy domestic exploration must continue in the Arctic and elsewhere. But as we've seen, by putting up unnecessary regulatory hurdles, regulators can cause job and economic growth opportunities to be missed."

America's Great Outdoors:

Bureau of Land Management:

BLM TO REVIEW HAGERMAN-HAILEY TRANSMISSION LINE. [Boise \(ID\) State Public Radio](#) (10/21) reports that the BLM will review the Hagerman to Hailey transmission line, paying "special attention to the greater sage grouse in the area." Stacey Baczkowski, a biologist with Idaho Power, says "the company has been working with the BLM for the last few years to make sure the line is built with the bird in mind." Baczkowski says "the power company plans to build the new transmission line as close to the current one as possible, and will follow BLM rules about construction during sage grouse mating times."

UTAH WATER DISTRICT RAISES CONCERNS ABOUT BLM REVISION TO LAND-USE PLAN. The [Deseret \(UT\) News](#) (10/21, 407K) reports that "federal policies that either aim to instill more oversight of water or deny access altogether have some Utah leaders frothing over what they say is a repeated pattern of overreach that threatens local economies and livelihoods." Ron Thompson, general manager of the Washington County Water Conservancy District, said "possible revisions to a land-use plan by the Bureau of Land Management in Washington County have severe ramifications should one particular approach be adopted." Thompson said "the BLM — under one option — is ignoring key considerations that went into the passage of the bill, including water supplies being left unhindered and right of way corridors left intact."

ADDITIONAL COVERAGE: HELICOPTER CRASHES NEAR SEARCHLIGHT DURING CATTLE ROUNDUP. Additional coverage of the helicopter crash near Searchlight during a cattle roundup was provided by the [Las Vegas Review-Journal](#) (10/21, 378K).

Fish and Wildlife Service:

CONSERVATION LEADERS ATTEND NATIONAL CONSERVATION SUMMIT. [KYTV-TV](#) Springfield, MO (10/21, 135K) reports that "more than 40 leaders from the leading conservation groups in America are meeting in Springfield this week for a National Conservation Summit hosted by The Johnny Morris Foundation." According to the article, "participants include the U.S. Fish and Wildlife Service, National Geographic, Audubon Society, and Ducks Unlimited." The article notes that "the purpose of the historic gathering is to collectively discuss opportunities to educate and engage the public in efforts to protect wildlife and natural habitats in preparation for the grand opening of America's Wildlife Museum and Aquarium in 2016."

The [Springfield \(MO\) News-Leader](#) (10/20, 49K) reports that "three exhibits of America's Wildlife Museum & Aquarium, formerly Wonders of Wildlife, were open to media for a tour on Oct. 20, 2015 at the museum located next to the Bass Pro Shops flagship store in Springfield, Mo." More than 40 conservation leaders attending a National Conservation Summit "hope the new Bass Pro Shops wildlife museum and aquarium will convey to visitors when it opens in mid 2016." FWS Director Dan Ashe, "one of the summit attendees," called the museum "one of the foremost conservation attractions in the world." He said, "Through conservation efforts, we can be successful in sustaining these populations of animals that are threatened or endangered. People hear about the industrial-scale poaching of elephants that's happening in Africa. That's not hunting. With this museum, here's an opportunity to tell the story of how we can protect wildlife habitat, and that when hunting is done well, with appropriate regulations, it sustains wildlife populations."

Additional coverage was provided by [KOLR-TV](#) Springfield, MO (10/21, 6K), [KYTV-TV](#) Springfield, MO (10/21, 135K), and [KOLR-TV](#) Springfield, MO (10/21, 6K).

CNMI QUESTIONS INCLUSION OF SOME SPECIES ON ENDANGERED LIST. The [Radio New Zealand](#) (10/21, 1K) reports that “the Northern Marianas government says the decision to list 23 species in Guam and the CNMI as threatened or endangered was rushed.” The government says “it supports the US Fish and Wildlife Service’s listing of seven of the 17 CNMI species, but it questions the inclusion of some of the other species.” The Department of Land and Natural Resources says “a number of the species do not meet the definitions of threatened or endangered and don’t require federal protection.”

FWS LOOKS TO RESTORE HABITAT ON ROOT RIVER. The [Rochester \(MN\) Post-Bulletin](#) (10/21, 28K) reports that “federal wildlife officials are seeking public input on a plan to restore and enhance habitat on 825 acres of Minnesota land along the Root River in Houston County.” Managed by the FWS “as part of the Upper Mississippi River National Wildlife and Fish Refuge, the Root River Tract sits to the east of Hwy. 26 between La Crescent and Brownsville.” The article notes that “the site includes 664 acres of hunting and farmland purchased in 2009 with money from the Land and Water Conservation Fund.”

SHOOTING OF CALIFORNIA CONDOR IN ARIZONA UNDER INVESTIGATION. [Grand Canyon \(AZ\) News](#) (10/21) reports that FWS special agents and Arizona Game and Fish Department “law enforcement personnel are investigating the lethal shooting of an endangered California condor that occurred on the Kaibab Plateau in northern Arizona Oct. 8.”

MAN CLAIMS HE BLOCKED ARIZONA BIKE TRAIL TO PROTECT OWLS. The [AP](#) (10/21, 344K) reports that “the 81-year-old man who blocked a Flagstaff-area mountain bike race says he did it to protect an endangered owl species.” J.D. Protiva “appeared in federal court Monday on misdemeanor charges related to blocking the Elden Springs Trail before the August race.” Protiva says “the path goes through protected Mexican spotted owl habitat.”

ADDITIONAL COVERAGE: MONARCHS GET HELP AS CALIFORNIANS PLANT DROUGHT-TOLERANT MILKWEED. Additional coverage that monarch butterflies could benefit from the California drought was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Albuquerque \(NM\) Journal](#) (10/21, 259K), [KABC-TV Los Angeles \(CA\)](#) Los Angeles (10/21, 413K), and [WRC-TV Washington \(DC\)](#) Washington (10/21, 345K).

FWS INVESTING IN PROJECTS TO STRENGTHEN ATLANTIC COASTAL DEFENSES AGAINST FUTURE STORMS. In an op-ed for the [New Haven \(CT\) Register](#) (10/20, 172K), Wendi Weber is Northeast regional director for the FWS, writes that “federal money for Hurricane Sandy recovery has spurred an unprecedented effort to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms.” She notes that the FWS and other Interior Department “agencies are investing \$787 million in hundreds of projects to clean up and repair damaged refuges and parks; restore coastal marshes, wetlands and shoreline; connect and open waterways to improve flood control; and increase our scientific understanding of how these natural areas are changing.” According to Weber, “these investments support the goal of President Barack Obama’s Climate Action Plan to make communities more resilient to increasingly intense storms predicted with a changing climate.”

National Park Service:

MUSIC VIDEO CELEBRATES 100 YEARS OF NPS. The [New Bedford \(MA\) Standard-Times](#) (10/20, 53K) reports on “a locally made music video that celebrates 100 years of the National Park Service.” According to the article, “published on Oct. 15, the Centennial video has more than 18,500 views on the NPS facebook page and more than 530 on the Youth Ambassador Program’s YouTube page, the group that made it.” NPS Director Jon Jarvis, “who met the traveling crew in Washington, D.C., makes a cameo appearance in the video to say, ‘It’s great to celebrate a hundred years with YAP!’”

Kentucky Lieutenant Gov. Luallen Touts National Parks. The [Louisville \(KY\) Courier-Journal](#) (10/20, 414K) reports that Kentucky Lieutenant Governor Crit Luallen on Tuesday “touted the economic impact of Kentucky’s travel and tourism industry” in “an address to the Kentucky Travel Industry’s annual conference in Bowling Green.” Following her remarks, Luallen “recognized five national parks in

Kentucky as part of the National Park Service Centennial in 2016. She presented proclamations to representatives of the parks.”

Couple Visiting 59 National Parks In 12 Months. The [Cleveland Plain Dealer](#) (10/21, 1.03M) reports that “Cole and Elizabeth Donelson, St. Louis natives, are two months into their grand adventure: 59 parks in 12 months – part celebration of the National Park Service’s 100th anniversary, part exercise in youthful spontaneity.” Their goal is to “see the best of the United States, and inspire others – particularly other millennials – to do the same.” The article notes that “their mission meshes well with a new campaign of the Park Service, which celebrates its centennial anniversary in 2016.”

WATCHDOG RELEASES REPORT ON NPS CONSTRUCTION FUNDS. The [Greenwire](#) (10/20, Subscription Publication) reports that “a federal watchdog yesterday released a disputed report alleging that the National Park Service is violating congressional intent by dipping into its construction account to cover security, air testing and other reimbursable expenses that should have been paid up front by other agencies.” The NPS construction account is “only for expenses that relate to ‘construction, improvements, repair or replacement of physical facilities,’” the Department of the Interior’s Office of Inspector General report said, “citing the language of the agency’s appropriation.” However, “the OIG found that 17 out of a sample of 21 interagency agreements that used Park Service construction funds to cover reimbursable costs did not appear to include ‘a valid construction purpose.’” The article notes that “these included \$4.9 million that NPS spent from its construction account on security at the Department of the Army’s Memorial Day and Independence Day concerts at the Capitol in 2014 and \$37.5 million over seven years on air quality monitoring at national parks that will be paid back to NPS by U.S. EPA.”

HOUSE COMMITTEE PASSES GRAND CANYON BISON MANAGEMENT ACT. [Grand Canyon \(AZ\) News](#) (10/21) reports that the U.S. House Natural Resources Committee approved the Grand Canyon Bison Management Act “allowing the Arizona Game and Fish Department (AZGFD) to better manage and conserve the bison population within the park Oct. 8.” The legislation “requires the U.S. Department of Interior and the Arizona Game and Fish Commission to coordinate on a plan that allows sportsmen holding a valid state-issued hunting license to assist in management of the bison population within the park.”

THUNDERSTORMS CAUSE FLOODING, MUDSLIDES IN DEATH VALLEY NATIONAL PARK. The [Greenwire](#) (10/20, Subscription Publication) reports that “mudslides and flooding after severe thunderstorms in Death Valley National Park on Sunday trapped three park rangers and about 20 visitors – many out to see a clear night sky – in a volcanic crater overnight.” Park spokeswoman Abby Wines said “the stranded people spent the night in Ubehebe Crater, maintaining contact with park headquarters until they were able to reach safety yesterday morning.” The article notes that “no injuries were reported, but Wines said the unexpectedly severe storms knocked out power in the area, damaged and closed several roads, and filled a historic visitor’s center with several feet of mud and debris.”

NPS SET TO CONTINUE WITH TREE-CUTTING AT POTOMAC CAMPGROUND. The [Bethesda \(MD\) Magazine](#) (10/21) reports that “after complaints from two nearby residents and a call from County Council member Roger Berliner temporarily halted tree-cutting operations Friday at a Potomac campground, the National Park Service said it plans to resume the tree-cutting and will probably do so in the next few days.” John Noel, deputy superintendent for the C&O Canal National Historical Park, said that “he went to the Swain’s Lock Recreation Site to examine the 26 trees proposed to be removed and 32 others proposed to be pruned at the site’s campground.” Noel “agreed that the trees are rotting and in danger of falling on park users below.”

STUDENTS GO ON CANOE TRIP AROUND WOLF LAKE. The [Merrillville \(IN\) Post-Tribune](#) (10/20, 105K) reports that “all classes in Grades 6 through 9 at George Rogers Clark Junior-Senior High School in Hammond recently experienced a unique field trip right in their own back yard — a canoe trip around Wolf Lake located only a few blocks from the school.” The trip was “made available through a partnership with the National Park Service, Dunes Learning Center and Wilderness Inquiry.”

NEW COLONIAL PARK SUPERINTENDENT THANKS COMMUNITY FOR ADVOCACY. The [Newport News \(VA\) Daily Press](#) (10/20, Williams, Subscription Publication, 201K) reports that the Colonial National Historical Park’s new Superintendent, Kym Hall, thanked the community for its opposition to Dominion’s Skiffes Creek transmission project in her first appearance before the York County Board of Supervisors on September 1. “The view should be protected,” she said.

DEVILS TOWER TO HOST STAR VIEWING PARTIES. The [Casper \(WY\) Star-Tribune](#) (10/21, 115K) reports that the NPS “announced that Devils Tower will host a series of star viewing parties October through December.” The article notes that “the eight parties are free of charge, and will last approximately two hours.”

NPS URGED TO RECONSIDER RACIST NAME FOR A WASHINGTON LAKE. In an op-ed for the [High Country \(CO\) News](#) (10/21, 74K), Glenn Nelson writes that Washington state officially calls Howard Lake “by what is believed to be its oldest known name,” but the federal government “recognizes the lake by a name that causes the jaws of most people of color to drop: Coon Lake.” Nelson notes that “the federal government did not follow the usual course of supporting the state’s action, mostly because of opposition from the National Park Service, which manages the area that contains the lake.” The NPS, “acting on research from its North Cascades unit, originally defended its stance by claiming that there was ambiguity around the use of the term ‘coon.’” According to Nelson, “in the years leading up to its 2016 centennial, the Park Service has done a lot of talking and writing about the need for diversity and inclusiveness.” He concludes that “it’s past time for the Park Service to back away from its misguided opposition, encourage Secretary Jewell to come to its rescue, and allow another black life to matter.”

US Geological Survey:

USGS SEISMOLOGIST QUESTIONS PREDICTION OF 99.9 PERCENT CHANCE OF MAJOR LOS ANGELES EARTHQUAKE IN 3 YEARS. The [Southern California Public Radio](#) (10/20, 68K) reports that “a controversial new study from NASA’s Jet Propulsion Laboratory” claims “there is a 99.9 percent chance of an earthquake” in Los Angeles “between magnitude 5 and 6.3 in less than three years.” The study, published earlier this month by the American Geophysical Union’s Earth and Space Science journal, has “taken many in the seismic community by surprise.” Lucy Jones with the USGS said the “methodology doesn’t fully explain the prediction, and the study doesn’t adequately address this either.” Jones said that, according to the USGS’ “models, there is only an 85 percent chance of a magnitude 5 or 6 quake in the same region over a three-year period.”

Top National News:

MEDIA ANALYSES: TRUDEAU’S ELECTION LIKELY TO FOSTER IMPROVED US-CANADA TIES.

On the day after Justin Trudeau became Canada’s Prime Minister-designate, media reporting universally characterized the election results as a likely boost for US-Canada relations. Coverage focuses on Trudeau’s promise of a less combative foreign policy style and the perception that he will be more willing to accept a US rejection of the Keystone pipeline. Reporting – including a combined 2 minutes and 50 seconds on the three broadcast networks – also indicates that despite Trudeau’s decision to withdraw his aircraft from the US-led coalition against ISIL, he is likely to be a more willing partner on climate change and other issues.

[ABC World News](#) (10/20, story 9, 0:20, Muir, 5.84M) reported President Obama on Tuesday congratulated Trudeau, who “swept into power with a message of optimism saying Canada beat fear with hope.” [USA Today](#) (10/21, Korte, 5.23M) reports Obama made the phone call “in an attempt to lock down continued cooperation with the northern neighbor on trade, terrorism, and climate change.” The White House, according to USA Today, “signaled that not much would change in the relationship” between the neighbors following the Liberal party’s victory. [CBC News](#) (10/20, Fitzpatrick, 225K) reported on its website that the White House indicated Obama and Trudeau “agreed on the importance of deepening the ‘already strong’ bilateral relationship” between the countries “and committed to strengthen joint efforts to promote trade and to combat terrorism and climate change.”

[AFP](#) (10/21) reports the White House and current Prime Minister Stephen Harper “clashed over climate policy” and the Keystone pipeline. While White House spokesman Josh Earnest on Tuesday said “it would be shortsighted to reduce the relationship between our two countries to just one issue,” Chuck Todd reported on [NBC Nightly News](#) (10/20, story 5, 2:05, Holt, 7.86M) that “we now have a Canadian government that is politically more in line with the American government.” According to Todd, “Relations have been good but they have not been so great of late. Will they now get better? That is why Americans should care.”

In an article entitled [5 Reasons The US Should Care About Canada's New Prime Minister](#), [USA Today](#) (10/21, Hjelmggaard, 5.23M) lists ways in which Trudeau "is likely to affect policies in Canada and the United States." According to USA Today, Trudeau "promised to improve strained relations" with Obama and said "he wants to find constructive ways of working with Washington on other issues." Another [USA Today](#) (10/21, Kovac, 5.23M) article reports that Trudeau and Harper "differ in their approach to foreign policy," with the incoming leader being less vocally pro-Israel and more focused on environmental issues.

In an analysis piece, [Bloomberg News](#) (10/21, 2.66M) says "a prompt rejection" of the Keystone pipeline by Obama "would make the job easier" for Trudeau "as he seeks to reset the country's relationship with the US, which he says was damaged" by Harper. According to Bloomberg, Trudeau "could use a quick US denial" of the pipeline "to focus discussions" with Obama "on issues such as trade and climate." Bloomberg notes there has been "speculation" that Obama "would reject the pipeline shortly after the Canadian election." However, [The Hill](#) (10/20, Cama, 471K) reported, Secretary of State Kerry said Tuesday that Canada's election results will not change the White House's approach to the Keystone issue. Kerry said the decision "is being based on the merits and countervailing balance of all the input that has come from a very exhaustive agency review." Kerry reiterated that he seeks a decision "as fast as possible."

[Reuters](#) (10/21, Mason, Rampton) reports the White House indicated it would like the new Canadian government to take increased actions to address climate change. Earnest said that while Canada has "made a substantial and important commitment" ahead of the Paris climate talks, "We believe that it's possible that there is more that Canada can do in this regard."

However, writing for [Mother Jones](#) (10/20, 758K), Suzanne Goldenberg claimed "those hoping for a U-turn in Canada's climate change policy...are in for a reality check." According to Goldenberg, while Trudeau does not align directly with many of Harper's views or policies, "it would be a mistake" to see the new Canadian leader or his party "as climate champions." In [Slate](#) (10/20, 1.38M), Joshua Keating argued that at least with regard to the Keystone pipeline, Trudeau does present a change from Harper. Keating characterizes Trudeau as "a very different leader" from Harper and says he will make the Keystone pipeline less of a focal point of US-Canada relations. According to Keating, Trudeau "has described his support for the pipeline as 'steadfast,' but it's clearly not the make-or-break issue for him that it was for Harper."

The [Wall Street Journal](#) (10/21, Vieira, Subscription Publication, 5.95M) reports Trudeau said he will work to restore Canada's reputation of defending minorities and become more involved in multilateral policy making. At a rally in Ottawa, Trudeau said, "To this country's friends around the world, I want to say this: Many of you have worried Canada has lost its compassionate and constructive voice in the world over the past 10 years. I have simple message for you: We're back." The [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) similarly reports that Trudeau "is likely to present a very different face to the world" than Harper, "but the most noticeable difference will probably be in tone." Trudeau has vowed to "put an end to Mr. Harper's often belligerent style of politics and diplomacy." Trudeau said Tuesday that "a positive, optimistic, hopeful vision of public life isn't a naïve dream – it can be a powerful force for change." The Times says Trudeau has previously indicated a desire to end Harper's reliance on military solutions and tough rhetoric, and instead focus on working within international organizations, such as the United Nations.

The [CBS Evening News](#) (10/20, story 10, 0:25, Pelley, 5.08M) reported, "Canada took a left turn" as "Trudeau and the Liberal Party rode in on a landslide." In a [USA Today](#) (10/21, 5.23M) op-ed, author David Andelman says "most of the reasons" Canadian voters chose Trudeau to lead the country "boiled down to one fundamental: The Liberal Party leader was simply nicer than his opponent. And most Canadians believe they are, too." Similarly, the [Wall Street Journal](#) (10/21, Subscription Publication, 5.95M) editorializes that Canadians wanted a change from the Harper government, which had become isolated and sought to restrict debate. The [New York Times](#) (10/21, Subscription Publication, 11.82M) agrees, editorializing that Trudeau's election "shows how ready Canadians were to emerge from a decade under the Conservative government of the secretive and combative Stephen Harper."

[AFP](#) (10/21) reports Trudeau told Obama on Tuesday that Canadian fighter aircraft will withdraw from the US-led coalition against ISIL, but the new Canadian leader did not present a timeline for the move. In a front-page story, the [Washington Post](#) (10/21, A1, Brown, 6.76M) reports Trudeau said, "I committed

that we would continue to engage in a responsible way that understands how Canada has a role to play in the fight against ISIL,” adding, that Obama “understands the commitments I’ve made around ending the combat mission.” According to the Post, a “senior Administration official,” said Obama and Trudeau discussed joint anti-terrorism efforts and, “We expect Canada will continue to be a valuable contributor to the 65-member global coalition” against ISIL.

Trudeau’s Win Could “Lead To Full Marijuana Legalization” In Canada. [USA Today](#) (10/21, Hughes, 5.23M) reports Trudeau’s win “may lead to full marijuana legalization” for Canada. According to USA Today, Trudeau promised during his campaign that “Canada would create a system to tax, regulate and sell marijuana, along with stiff penalties for anyone giving pot to children or caught driving while stoned.” USA Today says American “cannabis activists hailed Tuesday’s election as a milestone, suggesting that a day may soon come when cross-border trade talks include...legal weed.”

[AFP](#) (10/21) reports Trudeau’s “promise to legalize recreational cannabis” will likely “help the nation’s nascent medical marijuana industry.” Investors, according to AFP, “are betting” they could build on companies’ current production of marijuana for medical use and “quickly scale up to serve recreational pot users too, once Trudeau makes good on his promise.”

NYTimes Analysis: Trudeau Is “No Dynast” Despite Father Being Former Prime Minister. In a 1,350-world profile piece, the [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) reports that despite there being “many easy parallels to draw between” Trudeau and his father, former Prime Minister Pierre Elliott Trudeau, Canada’s incoming leader “is no dynast who slipped effortlessly into a family political machine.” The Times notes that Trudeau “did not even enter politics until 18 years after his father gave it up, and seven year after his father’s death.” According to the Times, Trudeau “built his own cadre of advisers, mostly from his own generation” and sometimes “chose more difficult roads – partly, it appears, to show he had not been handed a life in politics on a platter.”

In the [Washington Post](#) (10/21, 6.76M) “Reliable Source” blog, Emily Heil says Trudeau and his wife, Sophie Grégoire-Trudeau, “have a lot in common with the Obamas.” According to Heil, “they’d have lots to talk about, apart from liberal politics, like fitness!”

IN APPARENT REVERSAL, BIDEN SAYS HE PRIVATELY URGED OBAMA TO AUTHORIZE UBL RAID. Vice President Biden did not reveal Tuesday whether or not he will enter the Democratic presidential race, but his remark that he privately advised President Obama to launch the 2011 raid that led to the death of Osama Bin Laden – which contradicted Biden’s past public comments that he advised against the raid – is being interpreted as a possible line of attack against Hillary Clinton. All three broadcast networks reported on the statement, combining for nearly eight minutes of coverage, and ABC led with it. The tone of the coverage is mixed, with most reports calling it a reversal, and some concluding that Biden may be undercutting his own reputation for candor.

There was also Twitter discussion of Biden’s remarks. Anthony De Rosa, a digital producer for The Daily Show who has nearly 89,000 followers, [tweeted](#), “Biden sounds like Brian Williams with his evolving recollection of the Bin Laden raid.” Jonathan Martin of the New York Times [tweeted](#), “@vp today signals: he’ll run & it’ll get negative FAST or: he’s not happy about being sidelined.” His Times colleague Maggie Haberman [tweeted](#), “Biden’s subtle digs at Clinton indicate that if he runs it’ll be ugly.” In addition, the hashtag [#BidenWatch](#) emerged on Twitter, with Fox Business Network’s Trish Regan [tweeting](#), “Sure sounds like he’s running...”, Mashable’s Juana Summers [tweeting](#) Biden’s Wednesday official schedule, and Al Jazeera America’s David Shuster [tweeting](#) that “Hallie Biden, widow of the late Beau Biden, says her family supports a Presidential campaign ‘100%’”.

[ABC World News](#) (10/20, lead story, 2:50, Muir, 5.84M) reported that “as the pressure mounts for Joe Biden to decide whether he’ll run...many [are] now asking, did he change his story?” ABC (Karl) added, “Biden has described Obama’s decision as especially courageous because in that key meeting when it came time to decide, most of the President’s advisers, including Biden himself, were not in favor of the raid.” On Tuesday, he “offered an entirely different account of what happened on that fateful day.” Biden was shown saying, “So as we walked out of the room and we walked upstairs, I told him my opinion that I thought he should go but to follow his own instincts. But it would have been a mistake, imagine if I had said in front of everyone, ‘don’t go, or go,’ and his decision was a different decision.” Karl: “But until today, Biden has said he told Obama and his team that night to hold off on the raid.”

The [CBS Evening News](#) (10/20, story 6, 2:05, Peiley, 5.08M) reported that Biden sounded more like a presidential candidate, talking up his foreign policy credentials, doing some rewriting of his own history and firing a shot over the bow of the Democratic frontrunner." CBS' Nancy Cordes added that Biden "never mentioned" Clinton by name, "but it was all too clear the comparison he was making when he said this about his stature overseas." Biden: "I will get sent to go speak to Putin or go speak to whomever, and it's because the secretary of state, we've had two great secretaries of state, but when I go, they know that I am speaking for the President." Cordes added that Biden left Clinton "out of his story" about the Bin Laden raid.

[NBC Nightly News](#) (10/20, story 3, 2:35, Holt, 7.86M) also said of Biden, "If anything, he is beginning to sound more like a candidate, taking not-so-veiled swipes" at Clinton. NBC (Welker) added that Biden "said he and the President were in lock-step when it came to authorizing the raid against Bin Laden." The [AP](#) (10/21, Lederman) says Biden "backtracked on his previous claims to have advised Obama against the raid" in "an unusual reversal."

[Bloomberg Politics](#) (10/21, Talev, 247K) reports that in his remarks at an event honoring his vice presidential predecessor Walter Mondale, Biden "portrayed himself as the central player" in the Administration "on everything from working with congressional Republicans to the killing" of Bin Laden. [USA Today](#) (10/21, Singer, 5.23M) says Biden "revised his account of his advice" to Obama after Mondale said he "would only disagree with President Jimmy Carter in private during his tenure as vice president."

The [New York Times](#) (10/21, Harris, Martin, Subscription Publication, 11.82M) says with the remark, Biden "sought...to dispel" the notion that he had opposed the raid, which "might dog him on the campaign trail." Biden said he "never gave his own views on controversial issues until the rest of the cabinet had spoken, mindful that he did not want the rest of the team to see a difference between his opinion and that of the president." Biden said only then-Defense Secretary Robert Gates and then-CIA Director Leon Panetta "had expressed definitive views on the raid," and "pointedly did not mention" Clinton, who "has said that she was in favor of the raid."

The [Washington Post](#) (10/21, Jaffe, 6.76M) says Biden "seemed to change his account" with a revision that "seems designed to buttress his qualifications to serve as commander-in-chief." But Biden "seems to have contradicted his earlier memories of the final meeting before the bin Laden raid." The [Wall Street Journal](#) (10/21, Nelson, Nicholas, Subscription Publication, 5.95M) says Biden cast himself as Obama's chief adviser on many issues, and sought to downplay Clinton's advisory role as secretary of state. The [Los Angeles Times](#) (10/21, Memoli, 4.07M) says Biden used the event "to highlight his close relationship with President Obama that would be at the heart of Biden's potential presidential campaign."

The [New York Daily News](#) (10/21, Joseph, 3.75M) says Biden's "new details make him out to be a supporter of the high-stakes raid that killed Bin Laden – a big shift from the common narrative that he resisted it, one Clinton's allies have hinted could be a main attack line if Biden does jump into the race." The [Boston Globe](#)

SEN. MURKOWSKI SEES TOUGH ROAD FOR INTERIOR NOMINEE. [Politico Pro](#) (10/20, Subscription Publication) reports that Senate Energy and Natural Resources Committee Lisa Murkowski said that Interior Department pick Kristen Sarri would “have a lot of explaining to do at a hearing on six nominees today.” While Murkowski was “pleased that President Barack Obama had renamed Mount McKinley this summer to Denali, the Alaska Republican said she was still frustrated with the Interior Department’s ‘heartless decision’ to deny a road in King Cove.” Murkowski also “criticized Interior for closing off oil production in Alaska and last week’s cancellation of offshore sales and lease extension.”

Meanwhile, the [Daily Caller](#) (10/21, Barton, 375K) reports that Murkowski is “torn between leaving the Department of the Interior’s independent watchdog post vacant, or confirming President Barack Obama’s nominee crippled by recurring allegations of ‘playing games with Congress.’” She said, “I strongly believe that Interior needs a permanent [inspector general], and I’m disappointed the administration has let the position go unfilled for six and a half years.” Murkowski continued, “But I am also committed to ensuring that the individual we confirm is fully independent ... The tenure that you have been involved with thus far in this position has been marked by controversy.”

Additional coverage was provided by [The Hill](#) (10/21, Henry, 471K), [KTOO-FM](#) Juneau, AK (10/20), and

[Alaska Public Radio Network](#) (10/20, 2K).

HISTORIC \$186 MILLION SETTLEMENT WITH CHOCTAW, CHICKASAW NATIONS LAUDED. The [Indian Country Today Media Network](#) (10/20, 32K) reports that “tribes and the U.S. Department of the Interior heralded the outcome of a \$186 million settlement signed earlier this month between the federal government, the Choctaw and the Chickasaw nations to solve a longstanding land trust dispute as a new chapter in relations.” During the October 5 signing ceremony, Chickasaw Nation Governor Bill Anoatubby “gave a nod to the impetus provided” by Interior Secretary Sally Jewell. He said, “We respect the vital role Secretary Jewell has taken in helping make this historic settlement a reality. We are confident she will play an essential role in our efforts to continue strengthening the relationship between our governments, because we believe she has a unique appreciation for the mutual benefits of a positive government-to-government relationship.” Jewell said, “Today’s agreement is the latest addition to a record number of longstanding settlements resolved under this Administration. This historic settlement is the start of a new chapter in our trust relationships with the Chickasaw and Choctaw Nations, and underscores our commitment to fulfilling those responsibilities to Native communities across the country.”

U.S. TREASURY CONFIRMS \$20B BALANCE FOR LWCF. [E&E Publishing](#) (10/21, 705) reports that “the Land and Water Conservation Fund that expired earlier this month for the first time in its 50-year history currently contains nearly \$20 billion, according to the U.S. Treasury, which maintains the program’s balance sheets.” But “whether that is ‘real’ money available to be spent on federal land acquisitions, private land easements and state recreation projects depends on whom you ask.” The article notes that “the \$19.8 billion can only be reduced until Congress reauthorizes the program.”

Additional coverage of the LWCF was provided by the [Durango \(CO\) Herald](#) (10/20, 31K).

PROPOSED DESIGNATIONS OF THREE NATIONAL MONUMENTS IN CALIFORNIA DESERT RAISES CONCERNS ABOUT “LAND GRAB.” [Fox News](#) (10/20, 8.91M) reports that “a group of off-roaders and others are attempting to fight a proposed designation of three national monuments in the California desert under the Antiquities Act.” The Obama Administration is “considering using the federal Antiquities Act to bypass the legislative process at the request of Sen. Dianne Feinstein, whose efforts to have the Mojave Trails and Castle Mountain, both in the Mojave Desert, and a section of the Sonoran Desert named federal sites were repeatedly blocked by Republicans.” According to the article, “a White House move could put the land under federal control, which critics say could cut funding for upkeep or even restrict access.”

UNMANNED HELICOPTER OFFERS NEW WAY TO FIGHT WILDFIRES. The [Voice of America](#) (10/21, Banse, 32K) reports that the K-MAX “unmanned, water-dropping” helicopter was tested by the US government. The helicopter can fly through limited visibility. Brad Koeckertiz, the unmanned aircraft program manager with the US Department of Interior, says that unmanned helicopters such as the K-MAX will be integrated into routine measures to fight wildfires over the next few of years. The article notes that the K-MAX helicopters have already been used by the US Marines in Afghanistan, to “resupply remote outposts at night” and replace “dangerous convoys on the ground.” The article notes that the growing uses for drones is also why the FAA is seeking to register all drones.

Additional coverage was provided by [Vertical Magazine \(CAN\)](#) (10/21).

JEB BUSH PROPOSES MOVING INTERIOR DEPARTMENT FROM D.C. To Western City. The [Las Vegas Sun](#) (10/20, Lucas, 199K) reports that “Republican presidential candidate Jeb Bush will unveil his proposals for Western land and resource management in a campaign stop in Reno on Wednesday morning, in a speech likely to resonate with conservative voters opposed to what they see as federal overreach in the Western states.” Bush is “expected to speak at 11 a.m. Wednesday at Rancho San Rafael Regional Park before appearing at a forum sponsored by the LIBRE Initiative at the College of Southern Nevada Cheyenne Campus in North Las Vegas at 6 p.m.” In the proposal, Bush will “call for moving the headquarters of the Department of Interior from Washington, D.C., to a city in the western United States like Denver, Salt Lake City or Reno and will say that as president he would direct federal agencies to give broad latitude to states to determine land-use issues.”

STUDY: ALASKAN WILDFIRES COULD EXACERBATE GLOBAL WARMING. The [Washington Post](#) (10/21, Mooney, 6.76M) reports that some greenhouse gas sources outside the scope of forthcoming

UN climate talks are beyond governments' control, such as raging peat fires in Indonesia this year, emitting "as much as Japan produces in a year from fossil fuels." Elsewhere, a new study in Nature Climate Change reaffirms concerns about the emissions of northern fires in Alaska. The Post reports that "climate researchers are still trying to figure out how all of these factors will interrelate," but fire is a "powerful determinant of how much carbon resides in land, rather than in the air, across our globe."

INTERIOR'S VINE ACCOUNT HIGHLIGHTED. [Politico](#) (10/21, 942K) highlights the Interior Department has a great Vine account. Providing a link, Politico says "this is Internet gold."

Empowering Native American Communities:

BIA RULE ANNOUNCES RULE GIVING TRIBES MORE CONTROL OVER ELECTIONS. [Law360](#) (10/20, 21K) reports that the BIA "on Monday announced its final rule for Native American tribal elections conducted by the U.S. Department of the Interior, saying the new rule will encourage tribes to take control of their elections and help protect the voting rights of tribe members living in urban areas." Assistant Secretary of Indian Affairs Kevin K. Washburn said "in a statement Monday that the rule will allow tribes to opt out of having the interior secretary conduct their elections."

The [Native American Times](#) (10/20, 337) reports that Washburn said, "Though many federal responsibilities concern the lands we hold in trust for tribes and Indian people, more than 55 million acres nationwide, the United States has a moral obligation to preserve connections between Indian people and their tribes that it once sought to destroy. For the future of Native nations and the health of Indian Country, American Indians in urban areas must work harder to maintain connections with their tribes. One important aspect of that relationship is participation in the civic and political life of their tribal governments. For that reason, our Secretarial election amendments seek to prevent tribal members living in urban areas from being inadvertently disenfranchised in Secretarial elections."

HEARING FOCUSES ON NATIVE HAWAIIAN ELECTION. The [AP](#) (10/21, Kelleher) reports from Honolulu that a federal court hearing began on Tuesday "in a lawsuit by people who want to put a stop to an election process that is underway for Native Hawaiians." The lawsuit, filed in August, "says it's unconstitutional for the state to be involved in a race-based election." The state "argues in court documents that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it's not involved in next month's vote to elect delegates for a convention to determine self-governance for Native Hawaiians." Tuesday's hearing "is focused on the plaintiffs' motion for a preliminary injunction," and the plaintiffs "want the judge to limit voter registration activities or stop the election altogether."

Additional coverage was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Navajo Times \(AZ\)](#) (10/21, 66K), and [Yahoo! News](#) (10/21, Kelleher, 5.98M).

INTERIOR SIDES WITH ALASKA NATIVE GROUP IN INVESTIGATION OF MASSACHUSETTS COLLEGE TRIBAL COLLECTION. The [AP](#) (10/21, 2.28M) reports that "a Massachusetts college was found in violation of a federal law regulating the possession and sale of potentially sacred artifacts following a complaint from an organization of Alaska Natives." The Interior Department said "an investigation substantiated the complaint against Andover Newton Theological School filed in June by the Sealaska Heritage Institute." The institute's president, Rosita Worl, said "the school possesses at least two southeast Alaska artifacts, including a Tlingit halibut hook that is considered sacred."

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/21, D'oro, 344K), the [Boston \(MA\) Herald](#) (10/21, 548K), the [Daily Mail \(UK\)](#) (10/21, 5.59M), the [Miami \(FL\) Herald](#) (10/21, 651K), [Minneapolis \(MN\) Star Tribune](#) (10/21, D'oro, 1.19M), [ABC News](#) (10/21, 3.97M), and the [Alaska Dispatch News](#) (10/20, 219K).

US ATTORNEY SAYS BIA OFFICER WAS JUSTIFIED IN DEADLY SPIRIT LAKE SHOOTING. The [AP](#) (10/21) reports that US Attorney Chris Myers "says" that an investigation by his office came to the conclusion that BIA Officer Terry Morgan was justified in shooting and killing "31-year-old Joseph Charboneau during a standoff with officers on June 16." The [Grand Forks \(ND\) Herald](#) (10/21, 100K) reports that the US Attorney's Office "said" the shooting was justified because Charboneau posed a "real and immediate" threat to officers and another person at the scene after he refused to put down his gun, which was pointed at the officers. The Grand Forks Herald reports that, as a result of the investigation,

Federal prosecutors will not file charges against Morgan.

Additional coverage was provided by the [Dickinson \(ND\) Press](#) (10/21, 1K), the [Forum of Fargo-Moorhead \(ND\)](#) (10/21, 14K), [KXJB-TV Fargo \(ND\)](#) Fargo, ND (10/21, 18K), [KFGO-AM Fargo \(ND\)](#) Fargo, ND (10/20, 3K), [KXMC-TV Minot \(ND\)](#) Minot, ND (10/21, 1K), and [KFYR-TV Bismarck \(ND\)](#) Bismarck, ND (10/21, 1K).

CRIME JUMPS AFTER TRIBES CUT FROM BIA FUNDING. The [Los Angeles Times](#) (10/20, Romney, 4.07M) reports on a "time of crisis for public safety on tribal lands." According to the article, "a federal law decades ago shifted the primary burden of criminal law enforcement on tribal lands in California and five other states to local authorities," but "many lack the resources to do the job and, in some cases, sufficient knowledge of tribal law and culture to win the trust of tribal members." After "tribes were cut off from steady funding for their own justice systems," crime has "flourished."

ADDITIONAL COVERAGE: YAKAMA NATION'S PETITION TO SELF-GOVERN APPROVED.

Additional coverage that the BIA on Monday granted the Yakama Nation's petition for "retrocession" was provided by the [Bellingham \(WA\) Herald](#) (10/21, 101K), the [Clark County \(WA\) Columbian](#) (10/20, 86K), the [Washington \(DC\) Times](#) (10/21, 344K), the [Spokane \(WA\) Spokesman-Review](#) (10/20, 183K), the [Native American Times](#) (10/21, 337), the [Law360](#) (10/21, 21K), [KNDU-TV Yakima \(WA\)](#) Yakima, WA (10/21, 3K), and [KUOW-FM Seattle \(WA\)](#) Seattle (10/21, 15K).

GILLETTE'S SERVICE IN OBAMA ADMINISTRATION PRAISED. In an editorial, the [Bismarck \(ND\) Tribune](#) (10/21, 37K) lauds Jodi Gillette's service in the Obama Administration. According to the paper, Gillette's "positions gave her a voice in a White House that has seemed genuinely concerned about Native American issues."

Office of Insular Affairs:

ASSISTANT SECRETARY KIA'AINA PROPOSES MARSHALLS FUND CHANGES. [Radio New Zealand](#) (10/21, 1K) reports that "a top US official has submitted a proposal to the Senate and House to allow the people of Bikini to use resettlement and relocation funds outside of the Marshall Islands." Assistant Secretary for Insular Areas Esther Kia'aina says "it is an appropriate course of action to take regarding the welfare and livelihood of the Bikinian people." The Bikinians were "displaced by US nuclear weapons testing 70 years ago but are now looking at relocating again because of deteriorating conditions on Kili and Ejit Islands." According to the article, "in addition to cramped living quarters and a lack of suitable sustainable resources, the islands have been experiencing more frequent storms and king tides resulting in salt water inundation and the destruction of crops."

[Radio New Zealand](#) (10/21, 1K) reports that "a representative from Bikini Atoll says a proposal to allow people to use resettlement and relocation funds outside of the Marshall Islands is not wanted." Bikini liaison officer Jack Niedenthal says "the US should take full responsibility for any resettlement including providing extra financing." Niedenthal said, "We still got a ways to go, we still have to do some more lobbying and some more talking to people in Washington to make them understand that what's being proposed by the assistant secretary is what we view as 'Plan B'. It's not ultimately what we want in terms of helping our people."

CHINA STRENGTHENS RELATIONSHIP WITH PACIFIC REGION. The [Marianas Variety](#) (10/21) reports that "China and the Pacific Islands Forum Secretariat further strengthened their relationship on Friday when the two met at a ceremony to hand over \$1.05 million to assist the Pacific region." Forum Secretariat Secretary General Meg Taylor and Chinese Ambassador to Fiji Zhang Ping "attended the ceremony and delivered speeches respectively." Zhang "reiterated his nation's ongoing interest in the region saying, 'China attaches great importance to the South Pacific region. The Chinese side stands ready to enhance mutual understanding and cooperation with Pacific Island Countries and contribute to the development and capacity building in the region.'"

COUNTRIES IN PACIFIC URGED TO BEGIN TALKS ON CLIMATE MIGRATION. [Radio New Zealand](#) (10/21, 1K) reports that "all countries in the Pacific are being urged to start discussions on how to help people forced to move from low lying atoll nations like Kiribati and Tuvalu." According to the article, "184 million people worldwide were displaced by disaster between 2008 and 2014 and at special meetings in

Geneva last week 110 countries gave the nod to a Protection Agenda for dealing with future migration challenges.” The article notes that “the experiences of small island countries which face rising seas due to climate change helped form the global action plan under the Swiss Norwegian Nansen Initiative.”

JOURNALIST SPEAKS AT UNIVERSITY OF GUAM ON CLIMATE ISSUES, CORRUPTION IN PACIFIC ISLANDS. The [Marianas Variety](#) (10/21) reports that “author and journalist Giff Johnson spoke to students at the University of Guam on Monday evening about climate change and development in the Pacific islands.” Johnson’s “lecture, entitled ‘Idyllic No More: Pacific Island Climate, Corruption and Development Dilemmas,’ is based on his latest book — a compilation of essays detailing the looming climate threat to the region, its booming fishing industry, and the U.S. nuclear test legacy in the Marshal Islands.” Johnson called attention to “climate-driven migration from remote Pacific islands to Guam and mainland U.S.”

RISING SEA LEVELS THREATEN KIRIBATI. The [National Geographic](#) (10/21, 31.65M) provides a picture gallery of the threat of rising sea levels driven by climate change on Kiribati.

Tackling America’s Water Challenges:

WATER SCHEDULED TO BE RELEASED FROM NEW MELONES. The [Sonora \(CA\) Union Democrat](#) (10/21, 28K) reports that “more than 7 billion gallons of water is scheduled to be released from New Melones Reservoir beginning today to ensure flows in the Stanislaus River will keep temperatures cool enough for adult salmon migrating up the river to spawn this fall.” Oakdale Irrigation District and South San Joaquin Irrigation District said “it would benefit river conditions and fisheries, as well as the needs of agriculture and more than 200,000 residential customers downstream.” The article notes that “earlier this year, the irrigation districts sparred with the U.S. Bureau of Reclamation — which manages New Melones Reservoir — over spring pulse flows that they feared would leave as little as 147,000 acre-feet in the reservoir by the end of September.”

SAN JOAQUIN COUNTY BOARD OF SUPERVISORS VOTE TO OPPOSE DELTA TUNNELS PLAN. The [Lodi \(CA\) News-Sentinel](#) (10/21, 14K) reports that “at a meeting on Tuesday, the San Joaquin County Board of Supervisors voted to adopt a resolution in formal opposition of California WaterFix, also known as the twin tunnels plan.” Supervisor Kathy Miller said, “The WaterFix is just a thinly veiled version of the former (Bay Delta Conservation Plan) and continues to push the fatally flawed twin tunnels, which will simply sacrifice one region of California for the benefit of another.”

Securing America’s Energy Future:

Renewable Energy:

ENVIRONMENTALISTS, DOMINION BOTH SUPPORT OFFSHORE WIND DEVELOPMENT. On his [Bacon’s Rebellion \(VA\)](#) (10/21, Bacon) blog, James Bacon reports on an Environment Virginia-sponsored webinar held Tuesday morning in which representatives from Dominion, environmental groups, and the McAuliffe Administration all voiced support for the utility’s experimental offshore wind farm project. For environmentalists, Bacon writes, the project represents the beginning of an industry that would increase the use of green energy along the Atlantic and displace fossil fuels. For the Governor’s office, it represents increased green energy coupled with economic development that takes advantage of the Newport News area’s shipbuilding industry.

Onshore Energy Development:

CHESAPEAKE ENERGY FINED \$2.1 MILLION FOR UNDER-REPORTING NATURAL GAS. The [Greenwire](#) (10/20, Subscription Publication) reports that the Interior Department on Monday “announced a \$2.1 million civil penalty against Chesapeake Energy Corp. for misreporting the amount of gas it produced and sold from American Indian lands in Oklahoma.” Chesapeake “failed to comply with a 2011 order that found ‘systemic errors’ in the company’s monthly production reports for more than 100 Indian leases, according to Interior’s Office of Natural Resources Revenue.” The company “agreed to amend the monthly reports, but it continued to maintain inaccurate information on the agency’s data systems, ONRR said.” The firm was “assessed a penalty based on ‘knowing or willful maintenance’ of the inaccurate information, ONRR said.”

Additional coverage was provided by [Politico](#) (10/21, 942K), [Natural Gas Intelligence](#) (10/21, Subscription Publication), the [Native American Times](#) (10/21, 337), and [KOKC-AM Oklahoma City \(OK\)](#) Oklahoma City (10/20, 1K).

TEXAS ENERGY REGULATOR OPPOSES STREAM PROTECTION RULE. [Law360](#) (10/21, 21K) reports that “Texas’ top energy regulator on Tuesday said the agency will oppose a U.S. Department of the Interior proposed rule aimed at better protecting streams and other waterways from nearby mining activity, saying the regulation encroaches on ground better left to the state.” Texas Railroad Commission Chairman David Porter on Tuesday said “the state would sign on to the multistate Interstate Mining Compact Commission’s comments opposing the proposed waterway regulation.”

USGS REPORT STATES EARTHQUAKES COINCIDE WITH OKLAHOMA OIL BOOMS. [KOCO-TV](#) Oklahoma City (10/21, 93K) reports that “a study by the United States Geological Survey states that the earthquakes from the past 100 years seem to coincide with the oil boom in Oklahoma.”

OKLAHOMA REGULATORS SHUT DOWN THREE MORE DISPOSAL WELLS. The [EnergyWire](#) (10/21, Subscription Publication) reports that “Oklahoma oil and gas regulators dealing with a dramatic increase in earthquakes near the pipeline hub of Cushing have shut down three more disposal wells.” Also, “another well was shut down by the company that owns it after regulators said they were concerned it was drilled too deep.” In addition, “the operators of seven other wells were told in a letter written Friday and released yesterday that they must reduce the volume of drilling waste that they inject deep underground.”

OKLAHOMA LIMITS DISPOSAL WELLS AMID CUSHING QUAKES. [Reuters](#) (10/21, Hampton, Brandes) reports that Oklahoma’s oil and gas regulator on Monday said it could impose new limits on all saltwater disposal wells within a 10-mile radius of Cushing. Reuters reports that Oklahoma now experiences as many as two magnitude 3.0 quakes per day, up from two per year. Thirteen wells have been ordered shut and approvals for new wells have been halted, Reuters reports. Scientists told Reuters that shutting wells could ease tectonic disruption in Oklahoma.

STUDY: FRACKING CAN CAUSE METHANE LEAKS IN NEARBY ABANDONED OIL WELLS. [Reuters](#) (10/20, Valdmanis) reported that according to a study published Tuesday in the Water Resources Research journal, fracking can cause methane leaks in nearby abandoned oil wells. The methane leaks could be a large source of unrecorded greenhouse gas emissions, according to the study. The study said that energy companies could reduce the probability of such methane leaks by trying to identify abandoned wells before they begin fracking, although the task could be difficult due to large numbers of unmarked abandoned wells.

BLM CRITICIZED FOR FAILING TO PRODUCE PICTURES UNDER FOIA REQUEST. For the [Fairfield \(MT\) Sun Times](#) (10/21), Darryl L. Flowers criticizes the BLM for failing to provide pictures in connection with “the proposed Solenex, LLC natural gas well on public lands in the Lewis and Clark National Forest” that were requested under the Freedom of Information Act. The paper received “sixteen photos” and “two photos were missing.” He notes that “curiously, the two omitted photos were the only ones that included a person in the photos.”

Offshore Energy Development:

FEDS INVESTIGATE WORKER’S DEATH ON DRILLSHIP CONTRACTED BY CHEVRON. [Fuel Fix \(TX\)](#) (10/20, Dlouhy, 7K) reports that officials from the Bureau of Safety and Environmental Enforcement and the Coast Guard are investigating “the death of a worker on a drillship in the Gulf of Mexico that was preparing to bore a well for Chevron.” Fuel Fix says that “the Pacific Santa Ana drillship was just beginning operations for Chevron in about 4,800 feet of water at the site and had not yet penetrated the sea floor when an employee of that drilling contractor was fatally injured.” Fuel Fix adds that Chevron has a 36 percent working interest in the Keathley Canyon well-leasing block where the incident occurred, an area where “Chevron outlined ambitions to drill up to seven wells” earlier this year.

The [AP](#) (10/21) reports that Amy Roddy, spokeswoman for Pacific Drilling SA, the ship’s owner, “said the company is not releasing any details about the man to respect his family’s privacy. She also refused to disclose how the man died or details of the accident, citing an ongoing investigation.”

[NASDAQ](#) (10/20, Sider) reports that Chevron has contracted the ship since 2012. The [New Orleans Times-Picayune](#) (10/21, Larino, 718K) adds that “operations have been shut down and personnel remain onboard, according to the drillship’s operator.”

[Offshore Engineer](#) (10/20, Leon) reports that “the ship was to use its dual gradient drilling functions for Chevron’s Anchor-1 prospect last year in Green Canyon block 807, but the well was junked due to mechanical failures. However, in January of this year, Chevron hit high quality oil pay in multiple Lower Tertiary Wilcox Sands at a second Anchor well also drilled by the Pacific Santa Ana.”

The [Dow Jones Newswires](#) (10/21, Sider) reports that this is the first death related to offshore drilling operations in the Gulf of Mexico this year.

[Reuters](#) (10/21), [gCaptain](#) (10/21, 2K), [Upstream Online](#) (10/21, Schmidt, Brenner, 20K), and [Maritime Executive](#) (10/20, 21) also cover the story.

BRIARCLIFFE ACRES VOTES AGAINST OFFSHORE DRILLING. The [Myrtle Beach \(SC\) Online](#) (10/21, 36K) reports that “in a storm of debate over offshore drilling, Briarcliffe Acres surfaced as the latest coastal town to join a united front against seismic testing and drilling for oil and natural gas off of South Carolina’s beaches.” According to the article, “missing councilwoman Abby Stewart, who has been with family on the west coast, the town council unanimously passed a resolution Monday, joining 23 other S.C. coastal towns in a stance against offshore drilling.”

SHELL VESSEL RESCUES FRENCHMAN, CAT FROM SAILBOAT STRANDED IN SEAS NEAR ALASKA. The [AP](#) (10/21, Thiessen) reports that a Frenchman and the cat tucked inside his clothing were rescued on Tuesday after he leapt from his sailboat to a waiting rescue ship sent by Shell. The man activated a location beacon in the high seas south of Alaska and told the Coast Guard his sailboat had lost its rudder and rigging in the high winds and 20-foot waves. The Coast Guard contacted Shell’s oil drilling rig, the Polar Pioneer, which is on its way to Port Angeles, and the rig “sent a support ship, the Tor Viking, to rescue the sailor.” The AP reports that “it wasn’t immediately clear if the man would continue with the Shell ships to Washington state.”

CUNNINGHAM: INTERIOR DEPARTMENT OFFICIAL SHUTS THE DOOR ON ARCTIC DRILLING. In an analysis of the Interior Department’s recent decision on the future of Arctic drilling, [Oil Price](#) (10/21, 2K) reporter Nick Cunningham writes the Interior Department’s decision to cancel lease sales through 2017 “leaves almost no possible pathway for an oil company to drill in the Arctic for years to come, perhaps killing off drilling for a decade or so at a minimum.” Cunningham goes on to write that “it was likely that there wouldn’t have been new drilling in any event, given Shell’s decision and current market conditions, but Interior’s decision officially shuts the door on the Arctic in the medium-term.”

Casey: Interior’s Actions On Arctic Drilling Trends “Toward A Permanent Clampdown.” [CleanTechnica’s](#) (10/20, 15K) Tina Casey writes that “in the absence of local regulations, the Feds are the only game in town and it seems that the Arctic’s role in the US economy is too important to trust to compliance by oil companies.” Casey adds that, even though the Interior’s actions last week on Arctic drilling may be “only temporary, but the trend is toward a permanent clampdown.”

4-Traders: Federal Government To Blame For Low Arctic Drilling Interest. In an op-ed piece on the Interior’s Arctic drilling decision, [4-Traders](#) (10/21, 5K) writes the Federal government’s “difficult” regulatory obstacles is to blame for the lack of interest among oil companies to explore for oil and natural gas in the Arctic. 4-Traders writes that the “demand for oil and natural gas isn’t going away, so energy domestic exploration must continue in the Arctic and elsewhere. But as we’ve seen, by putting up unnecessary regulatory hurdles, regulators can cause job and economic growth opportunities to be missed.”

America’s Great Outdoors:

Bureau of Land Management:

BLM TO REVIEW HAGERMAN-HAILEY TRANSMISSION LINE. [Boise \(ID\) State Public Radio](#) (10/21)

reports that the BLM will review the Hagerman to Hailey transmission line, paying special attention to the greater sage grouse in the area.” Stacey Baczkowski, a biologist with Idaho Power, says “the company has been working with the BLM for the last few years to make sure the line is built with the bird in mind.” Baczkowski says “the power company plans to build the new transmission line as close to the current one as possible, and will follow BLM rules about construction during sage grouse mating times.”

UTAH WATER DISTRICT RAISES CONCERNS ABOUT BLM REVISION TO LAND-USE PLAN. The [Deseret \(UT\) News](#) (10/21, 407K) reports that “federal policies that either aim to instill more oversight of water or deny access altogether have some Utah leaders frothing over what they say is a repeated pattern of overreach that threatens local economies and livelihoods.” Ron Thompson, general manager of the Washington County Water Conservancy District, said “possible revisions to a land-use plan by the Bureau of Land Management in Washington County have severe ramifications should one particular approach be adopted.” Thompson said “the BLM — under one option — is ignoring key considerations that went into the passage of the bill, including water supplies being left unhindered and right of way corridors left intact.”

ADDITIONAL COVERAGE: HELICOPTER CRASHES NEAR SEARCHLIGHT DURING CATTLE ROUNDUP. Additional coverage of the helicopter crash near Searchlight during a cattle roundup was provided by the [Las Vegas Review-Journal](#) (10/21, 378K).

Fish and Wildlife Service:

CONSERVATION LEADERS ATTEND NATIONAL CONSERVATION SUMMIT. [KYTV-TV](#) Springfield, MO (10/21, 135K) reports that “more than 40 leaders from the leading conservation groups in America are meeting in Springfield this week for a National Conservation Summit hosted by The Johnny Morris Foundation.” According to the article, “participants include the U.S. Fish and Wildlife Service, National Geographic, Audubon Society, and Ducks Unlimited.” The article notes that “the purpose of the historic gathering is to collectively discuss opportunities to educate and engage the public in efforts to protect wildlife and natural habitats in preparation for the grand opening of America’s Wildlife Museum and Aquarium in 2016.”

The [Springfield \(MO\) News-Leader](#) (10/20, 49K) reports that “three exhibits of America’s Wildlife Museum & Aquarium, formerly Wonders of Wildlife, were open to media for a tour on Oct. 20, 2015 at the museum located next to the Bass Pro Shops flagship store in Springfield, Mo.” More than 40 conservation leaders attending a National Conservation Summit “hope the new Bass Pro Shops wildlife museum and aquarium will convey to visitors when it opens in mid 2016.” FWS Director Dan Ashe, “one of the summit attendees,” called the museum “one of the foremost conservation attractions in the world.” He said, “Through conservation efforts, we can be successful in sustaining these populations of animals that are threatened or endangered. People hear about the industrial-scale poaching of elephants that’s happening in Africa. That’s not hunting. With this museum, here’s an opportunity to tell the story of how we can protect wildlife habitat, and that when hunting is done well, with appropriate regulations, it sustains wildlife populations.”

Additional coverage was provided by [KOLR-TV](#) Springfield, MO (10/21, 6K), [KYTV-TV](#) Springfield, MO (10/21, 135K), and [KOLR-TV](#) Springfield, MO (10/21, 6K).

CNMI QUESTIONS INCLUSION OF SOME SPECIES ON ENDANGERED LIST. The [Radio New Zealand](#) (10/21, 1K) reports that “the Northern Marianas government says the decision to list 23 species in Guam and the CNMI as threatened or endangered was rushed.” The government says “it supports the US Fish and Wildlife Service’s listing of seven of the 17 CNMI species, but it questions the inclusion of some of the other species.” The Department of Land and Natural Resources says “a number of the species do not meet the definitions of threatened or endangered and don’t require federal protection.”

FWS LOOKS TO RESTORE HABITAT ON ROOT RIVER. The [Rochester \(MN\) Post-Bulletin](#) (10/21, 28K) reports that “federal wildlife officials are seeking public input on a plan to restore and enhance habitat on 825 acres of Minnesota land along the Root River in Houston County.” Managed by the FWS “as part of the Upper Mississippi River National Wildlife and Fish Refuge, the Root River Tract sits to the east of Hwy. 26 between La Crescent and Brownsville.” The article notes that “the site includes 664 acres of hunting and farmland purchased in 2009 with money from the Land and Water Conservation Fund.”

SHOOTING OF CALIFORNIA CONDOR IN ARIZONA UNDER INVESTIGATION. [Grand Canyon \(AZ\) News](#) (10/21) reports that FWS special agents and Arizona Game and Fish Department “law enforcement personnel are investigating the lethal shooting of an endangered California condor that occurred on the Kaibab Plateau in northern Arizona Oct. 8.”

MAN CLAIMS HE BLOCKED ARIZONA BIKE TRAIL TO PROTECT OWLS. The [AP](#) (10/21, 344K) reports that “the 81-year-old man who blocked a Flagstaff-area mountain bike race says he did it to protect an endangered owl species.” J.D. Protiva “appeared in federal court Monday on misdemeanor charges related to blocking the Elden Springs Trail before the August race.” Protiva says “the path goes through protected Mexican spotted owl habitat.”

ADDITIONAL COVERAGE: MONARCHS GET HELP AS CALIFORNIANS PLANT DROUGHT-TOLERANT MILKWEED. Additional coverage that monarch butterflies could benefit from the California drought was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Albuquerque \(NM\) Journal](#) (10/21, 259K), [KABC-TV Los Angeles \(CA\)](#) Los Angeles (10/21, 413K), and [WRC-TV Washington \(DC\)](#) Washington (10/21, 345K).

FWS INVESTING IN PROJECTS TO STRENGTHEN ATLANTIC COASTAL DEFENSES AGAINST FUTURE STORMS. In an op-ed for the [New Haven \(CT\) Register](#) (10/20, 172K), Wendi Weber is Northeast regional director for the FWS, writes that “federal money for Hurricane Sandy recovery has spurred an unprecedented effort to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms.” She notes that the FWS and other Interior Department “agencies are investing \$787 million in hundreds of projects to clean up and repair damaged refuges and parks; restore coastal marshes, wetlands and shoreline; connect and open waterways to improve flood control; and increase our scientific understanding of how these natural areas are changing.” According to Weber, “these investments support the goal of President Barack Obama’s Climate Action Plan to make communities more resilient to increasingly intense storms predicted with a changing climate.”

National Park Service:

MUSIC VIDEO CELEBRATES 100 YEARS OF NPS. The [New Bedford \(MA\) Standard-Times](#) (10/20, 53K) reports on “a locally made music video that celebrates 100 years of the National Park Service.” According to the article, “published on Oct. 15, the Centennial video has more than 18,500 views on the NPS facebook page and more than 530 on the Youth Ambassador Program’s YouTube page, the group that made it.” NPS Director Jon Jarvis, “who met the traveling crew in Washington, D.C., makes a cameo appearance in the video to say, ‘It’s great to celebrate a hundred years with YAP!’”

Kentucky Lieutenant Gov. Luallen Touts National Parks. The [Louisville \(KY\) Courier-Journal](#) (10/20, 414K) reports that Kentucky Lieutenant Governor Crit Luallen on Tuesday “touted the economic impact of Kentucky’s travel and tourism industry” in “an address to the Kentucky Travel Industry’s annual conference in Bowling Green.” Following her remarks, Luallen “recognized five national parks in Kentucky as part of the National Park Service Centennial in 2016.” She “presented proclamations to representatives of the parks.”

Couple Visiting 59 National Parks In 12 Months. The [Cleveland Plain Dealer](#) (10/21, 1.03M) reports that “Cole and Elizabeth Donelson, St. Louis natives, are two months into their grand adventure: 59 parks in 12 months – part celebration of the National Park Service’s 100th anniversary, part exercise in youthful spontaneity.” Their goal is to “see the best of the United States, and inspire others – particularly other millennials – to do the same.” The article notes that “their mission meshes well with a new campaign of the Park Service, which celebrates its centennial anniversary in 2016.”

WATCHDOG RELEASES REPORT ON NPS CONSTRUCTION FUNDS. The [Greenwire](#) (10/20, Subscription Publication) reports that “a federal watchdog yesterday released a disputed report alleging that the National Park Service is violating congressional intent by dipping into its construction account to cover security, air testing and other reimbursable expenses that should have been paid up front by other agencies.” The NPS construction account is “only for expenses that relate to ‘construction, improvements, repair or replacement of physical facilities,’” the Department of the Interior’s Office of Inspector General report said, “citing the language of the agency’s appropriation.” However, “the OIG found that 17 out of a sample of 21 interagency agreements that used Park Service construction funds to

cover reimbursable costs did not appear to include a valid construction purpose. The article notes that “these included \$4.9 million that NPS spent from its construction account on security at the Department of the Army’s Memorial Day and Independence Day concerts at the Capitol in 2014 and \$37.5 million over seven years on air quality monitoring at national parks that will be paid back to NPS by U.S. EPA.”

HOUSE COMMITTEE PASSES GRAND CANYON BISON MANAGEMENT ACT. [Grand Canyon \(AZ\) News](#) (10/21) reports that the U.S. House Natural Resources Committee approved the Grand Canyon Bison Management Act “allowing the Arizona Game and Fish Department (AZGFD) to better manage and conserve the bison population within the park Oct. 8.” The legislation “requires the U.S. Department of Interior and the Arizona Game and Fish Commission to coordinate on a plan that allows sportsmen holding a valid state-issued hunting license to assist in management of the bison population within the park.”

THUNDERSTORMS CAUSE FLOODING, MUDSLIDES IN DEATH VALLEY NATIONAL PARK. The [Greenwire](#) (10/20, Subscription Publication) reports that “mudslides and flooding after severe thunderstorms in Death Valley National Park on Sunday trapped three park rangers and about 20 visitors – many out to see a clear night sky – in a volcanic crater overnight.” Park spokeswoman Abby Wines said “the stranded people spent the night in Ubehebe Crater, maintaining contact with park headquarters until they were able to reach safety yesterday morning.” The article notes that “no injuries were reported, but Wines said the unexpectedly severe storms knocked out power in the area, damaged and closed several roads, and filled a historic visitor’s center with several feet of mud and debris.”

NPS SET TO CONTINUE WITH TREE-CUTTING AT POTOMAC CAMPGROUND. The [Bethesda \(MD\) Magazine](#) (10/21) reports that “after complaints from two nearby residents and a call from County Council member Roger Berliner temporarily halted tree-cutting operations Friday at a Potomac campground, the National Park Service said it plans to resume the tree-cutting and will probably do so in the next few days.” John Noel, deputy superintendent for the C&O Canal National Historical Park, said that “he went to the Swain’s Lock Recreation Site to examine the 26 trees proposed to be removed and 32 others proposed to be pruned at the site’s campground.” Noel “agreed that the trees are rotting and in danger of falling on park users below.”

STUDENTS GO ON CANOE TRIP AROUND WOLF LAKE. The [Merrillville \(IN\) Post-Tribune](#) (10/20, 105K) reports that “all classes in Grades 6 through 9 at George Rogers Clark Junior-Senior High School in Hammond recently experienced a unique field trip right in their own back yard — a canoe trip around Wolf Lake located only a few blocks from the school.” The trip was “made available through a partnership with the National Park Service, Dunes Learning Center and Wilderness Inquiry.”

NEW COLONIAL PARK SUPERINTENDENT THANKS COMMUNITY FOR ADVOCACY. The [Newport News \(VA\) Daily Press](#) (10/20, Williams, Subscription Publication, 201K) reports that the Colonial National Historical Park’s new Superintendent, Kym Hall, thanked the community for its opposition to Dominion’s Skiffes Creek transmission project in her first appearance before the York County Board of Supervisors on September 1. “The view should be protected,” she said.

DEVILS TOWER TO HOST STAR VIEWING PARTIES. The [Casper \(WY\) Star-Tribune](#) (10/21, 115K) reports that the NPS “announced that Devils Tower will host a series of star viewing parties October through December.” The article notes that “the eight parties are free of charge, and will last approximately two hours.”

NPS URGED TO RECONSIDER RACIST NAME FOR A WASHINGTON LAKE. In an op-ed for the [High Country \(CO\) News](#) (10/21, 74K), Glenn Nelson writes that Washington state officially calls Howard Lake “by what is believed to be its oldest known name,” but the federal government “recognizes the lake by a name that causes the jaws of most people of color to drop: Coon Lake.” Nelson notes that “the federal government did not follow the usual course of supporting the state’s action, mostly because of opposition from the National Park Service, which manages the area that contains the lake.” The NPS, “acting on research from its North Cascades unit, originally defended its stance by claiming that there was ambiguity around the use of the term ‘coon.’” According to Nelson, “in the years leading up to its 2016 centennial, the Park Service has done a lot of talking and writing about the need for diversity and inclusiveness.” He concludes that “it’s past time for the Park Service to back away from its misguided opposition, encourage Secretary Jewell to come to its rescue, and allow another black life to matter.”

USGS SEISMOLOGIST QUESTIONS PREDICTION OF 99.9 PERCENT CHANCE OF MAJOR LOS ANGELES EARTHQUAKE IN 3 YEARS. The [Southern California Public Radio](#) (10/20, 68K) reports that “a controversial new study from NASA’s Jet Propulsion Laboratory” claims “there is a 99.9 percent chance of an earthquake” in Los Angeles “between magnitude 5 and 6.3 in less than three years.” The study, published earlier this month by the American Geophysical Union’s Earth and Space Science journal, has “taken many in the seismic community by surprise.” Lucy Jones with the USGS said the “methodology doesn’t fully explain the prediction, and the study doesn’t adequately address this either.” Jones said that, according to the USGS’ “models, there is only an 85 percent chance of a magnitude 5 or 6 quake in the same region over a three-year period.”

Top National News:

MEDIA ANALYSES: TRUDEAU’S ELECTION LIKELY TO FOSTER IMPROVED US-CANADA TIES.

On the day after Justin Trudeau became Canada’s Prime Minister-designate, media reporting universally characterized the election results as a likely boost for US-Canada relations. Coverage focuses on Trudeau’s promise of a less combative foreign policy style and the perception that he will be more willing to accept a US rejection of the Keystone pipeline. Reporting – including a combined 2 minutes and 50 seconds on the three broadcast networks – also indicates that despite Trudeau’s decision to withdraw his aircraft from the US-led coalition against ISIL, he is likely to be a more willing partner on climate change and other issues.

[ABC World News](#) (10/20, story 9, 0:20, Muir, 5.84M) reported President Obama on Tuesday congratulated Trudeau, who “swept into power with a message of optimism saying Canada beat fear with hope.” [USA Today](#) (10/21, Korte, 5.23M) reports Obama made the phone call “in an attempt to lock down continued cooperation with the northern neighbor on trade, terrorism, and climate change.” The White House, according to USA Today, “signaled that not much would change in the relationship” between the neighbors following the Liberal party’s victory. [CBC News](#) (10/20, Fitzpatrick, 225K) reported on its website that the White House indicated Obama and Trudeau “agreed on the importance of deepening the ‘already strong’ bilateral relationship” between the countries “and committed to strengthen joint efforts to promote trade and to combat terrorism and climate change.”

[AFP](#) (10/21) reports the White House and current Prime Minister Stephen Harper “clashed over climate policy” and the Keystone pipeline. While White House spokesman Josh Earnest on Tuesday said “it would be shortsighted to reduce the relationship between our two countries to just one issue,” Chuck Todd reported on [NBC Nightly News](#) (10/20, story 5, 2:05, Holt, 7.86M) that “we now have a Canadian government that is politically more in line with the American government.” According to Todd, “Relations have been good but they have not been so great of late. Will they now get better? That is why Americans should care.”

In an article entitled “5 Reasons The US Should Care About Canada’s New Prime Minister,” [USA Today](#) (10/21, Hjelmgard, 5.23M) lists ways in which Trudeau “is likely to affect policies in Canada and the United States.” According to USA Today, Trudeau “promised to improve strained relations” with Obama and said “he wants to find constructive ways of working with Washington on other issues.” Another [USA Today](#) (10/21, Kovac, 5.23M) article reports that Trudeau and Harper “differ in their approach to foreign policy,” with the incoming leader being less vocally pro-Israel and more focused on environmental issues.

In an analysis piece, [Bloomberg News](#) (10/21, 2.66M) says “a prompt rejection” of the Keystone pipeline by Obama “would make the job easier” for Trudeau “as he seeks to reset the country’s relationship with the US, which he says was damaged” by Harper. According to Bloomberg, Trudeau “could use a quick US denial” of the pipeline “to focus discussions” with Obama “on issues such as trade and climate.” Bloomberg notes there has been “speculation” that Obama “would reject the pipeline shortly after the Canadian election.” However, [The Hill](#) (10/20, Cama, 471K) reported, Secretary of State Kerry said Tuesday that Canada’s election results will not change the White House’s approach to the Keystone issue. Kerry said the decision “is being based on the merits and countervailing balance of all the input that has come from a very exhaustive agency review.” Kerry reiterated that he seeks a decision “as fast as possible.”

[Reuters](#) (10/21, Mason, Rampton) reports the White House indicated it would like the new Canadian government to take increased actions to address climate change. Earnest said that while Canada has “made a substantial and important commitment” ahead of the Paris climate talks, “We believe that it’s possible that there is more that Canada can do in this regard.”

However, writing for [Mother Jones](#) (10/20, 758K), Suzanne Goldenberg claimed “those hoping for a U-turn in Canada’s climate change policy...are in for a reality check.” According to Goldenberg, while Trudeau does not align directly with many of Harper’s views or policies, “it would be a mistake” to see the new Canadian leader or his party “as climate champions.” In [Slate](#) (10/20, 1.38M), Joshua Keating argued that at least with regard to the Keystone pipeline, Trudeau does present a change from Harper. Keating characterizes Trudeau as “a very different leader” from Harper and says he will make the Keystone pipeline less of a focal point of US-Canada relations. According to Keating, Trudeau “has described his support for the pipeline as ‘steadfast,’ but it’s clearly not the make-or-break issue for him that it was for Harper.”

The [Wall Street Journal](#) (10/21, Vieira, Subscription Publication, 5.95M) reports Trudeau said he will work to restore Canada’s reputation of defending minorities and become more involved in multilateral policy making. At a rally in Ottawa, Trudeau said, “To this country’s friends around the world, I want to say this: Many of you have worried Canada has lost its compassionate and constructive voice in the world over the past 10 years. I have simple message for you: We’re back.” The [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) similarly reports that Trudeau “is likely to present a very different face to the world” than Harper, “but the most noticeable difference will probably be in tone.” Trudeau has vowed to “put an end to Mr. Harper’s often belligerent style of politics and diplomacy.” Trudeau said Tuesday that “a positive, optimistic, hopeful vision of public life isn’t a naïve dream – it can be a powerful force for change.” The Times says Trudeau has previously indicated a desire to end Harper’s reliance on military solutions and tough rhetoric, and instead focus on working within international organizations, such as the United Nations.

The [CBS Evening News](#) (10/20, story 10, 0:25, Pelley, 5.08M) reported, “Canada took a left turn” as “Trudeau and the Liberal Party rode in on a landslide.” In a [USA Today](#) (10/21, 5.23M) op-ed, author David Andelman says “most of the reasons” Canadian voters chose Trudeau to lead the country “boiled down to one fundamental: The Liberal Party leader was simply nicer than his opponent. And most Canadians believe they are, too.” Similarly, the [Wall Street Journal](#) (10/21, Subscription Publication, 5.95M) editorializes that Canadians wanted a change from the Harper government, which had become isolated and sought to restrict debate. The [New York Times](#) (10/21, Subscription Publication, 11.82M) agrees, editorializing that Trudeau’s election “shows how ready Canadians were to emerge from a decade under the Conservative government of the secretive and combative Stephen Harper.”

[AFP](#) (10/21) reports Trudeau told Obama on Tuesday that Canadian fighter aircraft will withdraw from the US-led coalition against ISIL, but the new Canadian leader did not present a timeline for the move. In a front-page story, the [Washington Post](#) (10/21, A1, Brown, 6.76M) reports Trudeau said, “I committed that we would continue to engage in a responsible way that understands how Canada has a role to play in the fight against ISIL,” adding, that Obama “understands the commitments I’ve made around ending the combat mission.” According to the Post, a “senior Administration official,” said Obama and Trudeau discussed joint anti-terrorism efforts and, “We expect Canada will continue to be a valuable contributor to the 65-member global coalition” against ISIL.

Trudeau’s Win Could “Lead To Full Marijuana Legalization” In Canada. [USA Today](#) (10/21, Hughes, 5.23M) reports Trudeau’s win “may lead to full marijuana legalization” for Canada. According to USA Today, Trudeau promised during his campaign that “Canada would create a system to tax, regulate and sell marijuana, along with stiff penalties for anyone giving pot to children or caught driving while stoned.” USA Today says American “cannabis activists hailed Tuesday’s election as a milestone, suggesting that a day may soon come when cross-border trade talks include...legal weed.”

[AFP](#) (10/21) reports Trudeau’s “promise to legalize recreational cannabis” will likely “help the nation’s nascent medical marijuana industry.” Investors, according to AFP, “are betting” they could build on companies’ current production of marijuana for medical use and “quickly scale up to serve recreational pot users too, once Trudeau makes good on his promise.”

NY Times Analysis: Trudeau is NO Dynast Despite Father Being Former Prime Minister. In a 1,350-world profile piece, the [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) reports that despite there being “many easy parallels to draw between” Trudeau and his father, former Prime Minister Pierre Elliott Trudeau, Canada’s incoming leader “is no dynast who slipped effortlessly into a family political machine.” The Times notes that Trudeau “did not even enter politics until 18 years after his father gave it up, and seven year after his father’s death.” According to the Times, Trudeau “built his own cadre of advisers, mostly from his own generation” and sometimes “chose more difficult roads – partly, it appears, to show he had not been handed a life in politics on a platter.”

In the [Washington Post](#) (10/21, 6.76M) “Reliable Source” blog, Emily Heil says Trudeau and his wife, Sophie Grégoire-Trudeau, “have a lot in common with the Obamas.” According to Heil, “they’d have lots to talk about, apart from liberal politics, like fitness!”

IN APPARENT REVERSAL, BIDEN SAYS HE PRIVATELY URGED OBAMA TO AUTHORIZE UBL RAID. Vice President Biden did not reveal Tuesday whether or not he will enter the Democratic presidential race, but his remark that he privately advised President Obama to launch the 2011 raid that led to the death of Osama Bin Laden – which contradicted Biden’s past public comments that he advised against the raid – is being interpreted as a possible line of attack against Hillary Clinton. All three broadcast networks reported on the statement, combining for nearly eight minutes of coverage, and ABC led with it. The tone of the coverage is mixed, with most reports calling it a reversal, and some concluding that Biden may be undercutting his own reputation for candor.

There was also Twitter discussion of Biden’s remarks. Anthony De Rosa, a digital producer for The Daily Show who has nearly 89,000 followers, [tweeted](#), “Biden sounds like Brian Williams with his evolving recollection of the Bin Laden raid.” Jonathan Martin of the New York Times [tweeted](#), “@vp today signals: he’ll run & it’ll get negative FAST or: he’s not happy about being sidelined.” His Times colleague Maggie Haberman [tweeted](#), “Biden’s subtle digs at Clinton indicate that if he runs it’ll be ugly.” In addition, the hashtag [#BidenWatch](#) emerged on Twitter, with Fox Business Network’s Trish Regan [tweeting](#), “Sure sounds like he’s running...”, Mashable’s Juana Summers [tweeting](#) Biden’s Wednesday official schedule, and Al Jazeera America’s David Shuster [tweeting](#) that “Hallie Biden, widow of the late Beau Biden, says her family supports a Presidential campaign ‘100%’”.

[ABC World News](#) (10/20, lead story, 2:50, Muir, 5.84M) reported that “as the pressure mounts for Joe Biden to decide whether he’ll run...many [are] now asking, did he change his story?” ABC (Karl) added, “Biden has described Obama’s decision as especially courageous because in that key meeting when it came time to decide, most of the President’s advisers, including Biden himself, were not in favor of the raid.” On Tuesday, he “offered an entirely different account of what happened on that fateful day.” Biden was shown saying, “So as we walked out of the room and we walked upstairs, I told him my opinion that I thought he should go but to follow his own instincts. But it would have been a mistake, imagine if I had said in front of everyone, ‘don’t go, or go,’ and his decision was a different decision.” Karl: “But until today, Biden has said he told Obama and his team that night to hold off on the raid.”

The [CBS Evening News](#) (10/20, story 6, 2:05, Pelley, 5.08M) reported that Biden “sounded more like a presidential candidate, talking up his foreign policy credentials, doing some rewriting of his own history and firing a shot over the bow of the Democratic frontrunner.” CBS’ Nancy Corden added that Biden “never mentioned” Clinton by name, “but it was all too clear the comparison he was making when he said this about his stature overseas.” Biden: “I will get sent to go speak to Putin or go speak to whomever, and it’s because the secretary of state, we’ve had two great secretaries of state, but when I go, they know that I am speaking for the President.” Cordes added that Biden left Clinton “out of his story” about the Bin Laden raid.

[NBC Nightly News](#) (10/20, story 3, 2:35, Holt, 7.86M) also said of Biden, “If anything, he is beginning to sound more like a candidate, taking not-so-veiled swipes” at Clinton. NBC (Welker) added that Biden “said he and the President were in lock-step when it came to authorizing the raid against Bin Laden.” The [AP](#) (10/21, Lederman) says Biden “backtracked on his previous claims to have advised Obama against the raid” in “an unusual reversal.”

[Bloomberg Politics](#) (10/21, Talev, 247K) reports that in his remarks at an event honoring his vice presidential predecessor Walter Mondale, Biden “portrayed himself as the central player” in the Administration “on everything from working with congressional Republicans to the killing” of Bin Laden.

[USA Today](#) (10/21, Singer, 5.25M) says Biden "revised his account of his advice to Obama after Mondale said he "would only disagree with President Jimmy Carter in private during his tenure as vice president."

The [New York Times](#) (10/21, Harris, Martin, Subscription Publication, 11.82M) says with the remark, Biden "sought...to dispel" the notion that he had opposed the raid, which "might dog him on the campaign trail." Biden said he "never gave his own views on controversial issues until the rest of the cabinet had spoken, mindful that he did not want the rest of the team to see a difference between his opinion and that of the president." Biden said only then-Defense Secretary Robert Gates and then-CIA Director Leon Panetta "had expressed definitive views on the raid," and "pointedly did not mention" Clinton, who "has said that she was in favor of the raid."

The [Washington Post](#) (10/21, Jaffe, 6.76M) says Biden "seemed to change his account" with a revision that "seems designed to buttress his qualifications to serve as commander-in-chief." But Biden "seems to have contradicted his earlier memories of the final meeting before the bin Laden raid." The [Wall Street J](#)

SEN. MURKOWSKI SEES TOUGH ROAD FOR INTERIOR NOMINEE. [Politico Pro](#) (10/20, Subscription Publication) reports that Senate Energy and Natural Resources Committee Lisa Murkowski said that Interior Department pick Kristen Sarri would “have a lot of explaining to do at a hearing on six nominees today.” While Murkowski was “pleased that President Barack Obama had renamed Mount McKinley this summer to Denali, the Alaska Republican said she was still frustrated with the Interior Department’s ‘heartless decision’ to deny a road in King Cove.” Murkowski also “criticized Interior for closing off oil production in Alaska and last week’s cancellation of offshore sales and lease extension.”

Meanwhile, the [Daily Caller](#) (10/21, Barton, 375K) reports that Murkowski is “torn between leaving the Department of the Interior’s independent watchdog post vacant, or confirming President Barack Obama’s nominee crippled by recurring allegations of ‘playing games with Congress.’” She said, “I strongly believe that Interior needs a permanent [inspector general], and I’m disappointed the administration has let the position go unfilled for six and a half years.” Murkowski continued, “But I am also committed to ensuring that the individual we confirm is fully independent ... The tenure that you have been involved with thus far in this position has been marked by controversy.”

Additional coverage was provided by [The Hill](#) (10/21, Henry, 471K), [KTOO-FM](#) Juneau, AK (10/20), and [Alaska Public Radio Network](#) (10/20, 2K).

HISTORIC \$186 MILLION SETTLEMENT WITH CHOCTAW, CHICKASAW NATIONS LAUDED.

The [Indian Country Today Media Network](#) (10/20, 32K) reports that “tribes and the U.S. Department of the Interior heralded the outcome of a \$186 million settlement signed earlier this month between the federal government, the Choctaw and the Chickasaw nations to solve a longstanding land trust dispute as a new chapter in relations.” During the October 5 signing ceremony, Chickasaw Nation Governor Bill Anoatubby “gave a nod to the impetus provided” by Interior Secretary Sally Jewell. He said, “We respect the vital role Secretary Jewell has taken in helping make this historic settlement a reality. We are confident she will play an essential role in our efforts to continue strengthening the relationship between our governments, because we believe she has a unique appreciation for the mutual benefits of a positive government-to-government relationship.” Jewell said, “Today’s agreement is the latest addition to a record number of longstanding settlements resolved under this Administration. This historic settlement is the start of a new chapter in our trust relationships with the Chickasaw and Choctaw Nations, and underscores our commitment to fulfilling those responsibilities to Native communities across the country.”

U.S. TREASURY CONFIRMS \$20B BALANCE FOR LWCF. [E&E Publishing](#) (10/21, 705) reports that “the Land and Water Conservation Fund that expired earlier this month for the first time in its 50-year history currently contains nearly \$20 billion, according to the U.S. Treasury, which maintains the

program's balance sheets. But whether that is real money available to be spent on federal land acquisitions, private land easements and state recreation projects depends on whom you ask." The article notes that "the \$19.8 billion can only be reduced until Congress reauthorizes the program."

Additional coverage of the LWCF was provided by the [Durango \(CO\) Herald](#) (10/20, 31K).

PROPOSED DESIGNATIONS OF THREE NATIONAL MONUMENTS IN CALIFORNIA DESERT RAISES CONCERNS ABOUT "LAND GRAB." [Fox News](#) (10/20, 8.91M) reports that "a group of off-roaders and others are attempting to fight a proposed designation of three national monuments in the California desert under the Antiquities Act." The Obama Administration is "considering using the federal Antiquities Act to bypass the legislative process at the request of Sen. Dianne Feinstein, whose efforts to have the Mojave Trails and Castle Mountain, both in the Mojave Desert, and a section of the Sonoran Desert named federal sites were repeatedly blocked by Republicans." According to the article, "a White House move could put the land under federal control, which critics say could cut funding for upkeep or even restrict access."

UNMANNED HELICOPTER OFFERS NEW WAY TO FIGHT WILDFIRES. The [Voice of America](#) (10/21, Banse, 32K) reports that the K-MAX "unmanned, water-dropping" helicopter was tested by the US government. The helicopter can fly through limited visibility. Brad Koeckertiz, the unmanned aircraft program manager with the US Department of Interior, says that unmanned helicopters such as the K-MAX will be integrated into routine measures to fight wildfires over the next few of years. The article notes that the K-MAX helicopters have already been used by the US Marines in Afghanistan, to "resupply remote outposts at night" and replace "dangerous convoys on the ground." The article notes that the growing uses for drones is also why the FAA is seeking to register all drones.

Additional coverage was provided by [Vertical Magazine \(CAN\)](#) (10/21).

JEB BUSH PROPOSES MOVING INTERIOR DEPARTMENT FROM D.C. To Western City. The [Las Vegas Sun](#) (10/20, Lucas, 199K) reports that "Republican presidential candidate Jeb Bush will unveil his proposals for Western land and resource management in a campaign stop in Reno on Wednesday morning, in a speech likely to resonate with conservative voters opposed to what they see as federal overreach in the Western states." Bush is "expected to speak at 11 a.m. Wednesday at Rancho San Rafael Regional Park before appearing at a forum sponsored by the LIBRE Initiative at the College of Southern Nevada Cheyenne Campus in North Las Vegas at 6 p.m." In the proposal, Bush will "call for moving the headquarters of the Department of Interior from Washington, D.C., to a city in the western United States like Denver, Salt Lake City or Reno and will say that as president he would direct federal agencies to give broad latitude to states to determine land-use issues."

STUDY: ALASKAN WILDFIRES COULD EXACERBATE GLOBAL WARMING. The [Washington Post](#) (10/21, Mooney, 6.76M) reports that some greenhouse gas sources outside the scope of forthcoming UN climate talks are beyond governments' control, such as raging peat fires in Indonesia this year, emitting "as much as Japan produces in a year from fossil fuels." Elsewhere, a new study in Nature Climate Change reaffirms concerns about the emissions of northern fires in Alaska. The Post reports that "climate researchers are still trying to figure out how all of these factors will interrelate," but fire is a "powerful determinant of how much carbon resides in land, rather than in the air, across our globe."

INTERIOR'S VINE ACCOUNT HIGHLIGHTED. [Politico](#) (10/21, 942K) highlights the Interior Department has a great Vine account. Providing a link, Politico says "this is Internet gold."

Empowering Native American Communities:

BIA RULE ANNOUNCES RULE GIVING TRIBES MORE CONTROL OVER ELECTIONS. [Law360](#) (10/20, 21K) reports that the BIA "on Monday announced its final rule for Native American tribal elections conducted by the U.S. Department of the Interior, saying the new rule will encourage tribes to take control of their elections and help protect the voting rights of tribe members living in urban areas." Assistant Secretary of Indian Affairs Kevin K. Washburn said "in a statement Monday that the rule will allow tribes to opt out of having the interior secretary conduct their elections."

The [Native American Times](#) (10/20, 337) reports that Washburn said, “Though many federal responsibilities concern the lands we hold in trust for tribes and Indian people, more than 55 million acres nationwide, the United States has a moral obligation to preserve connections between Indian people and their tribes that it once sought to destroy. For the future of Native nations and the health of Indian Country, American Indians in urban areas must work harder to maintain connections with their tribes. One important aspect of that relationship is participation in the civic and political life of their tribal governments. For that reason, our Secretarial election amendments seek to prevent tribal members living in urban areas from being inadvertently disenfranchised in Secretarial elections.”

HEARING FOCUSES ON NATIVE HAWAIIAN ELECTION. The [AP](#) (10/21, Kelleher) reports from Honolulu that a federal court hearing began on Tuesday “in a lawsuit by people who want to put a stop to an election process that is underway for Native Hawaiians.” The lawsuit, filed in August, “says it’s unconstitutional for the state to be involved in a race-based election.” The state “argues in court documents that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it’s not involved in next month’s vote to elect delegates for a convention to determine self-governance for Native Hawaiians.” Tuesday’s hearing “is focused on the plaintiffs’ motion for a preliminary injunction,” and the plaintiffs “want the judge to limit voter registration activities or stop the election altogether.”

Additional coverage was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Navajo Times \(AZ\)](#) (10/21, 66K), and [Yahoo! News](#) (10/21, Kelleher, 5.98M).

INTERIOR SIDES WITH ALASKA NATIVE GROUP IN INVESTIGATION OF MASSACHUSETTS COLLEGE TRIBAL COLLECTION. The [AP](#) (10/21, 2.28M) reports that “a Massachusetts college was found in violation of a federal law regulating the possession and sale of potentially sacred artifacts following a complaint from an organization of Alaska Natives.” The Interior Department said “an investigation substantiated the complaint against Andover Newton Theological School filed in June by the Sealaska Heritage Institute.” The institute’s president, Rosita Worl, said “the school possesses at least two southeast Alaska artifacts, including a Tlingit halibut hook that is considered sacred.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/21, D’oro, 344K), the [Boston \(MA\) Herald](#) (10/21, 548K), the [Daily Mail \(UK\)](#) (10/21, 5.59M), the [Miami \(FL\) Herald](#) (10/21, 651K), [Minneapolis \(MN\) Star Tribune](#) (10/21, D’oro, 1.19M), [ABC News](#) (10/21, 3.97M), and the [Alaska Dispatch News](#) (10/20, 219K).

US ATTORNEY SAYS BIA OFFICER WAS JUSTIFIED IN DEADLY SPIRIT LAKE SHOOTING. The [AP](#) (10/21) reports that US Attorney Chris Myers “says” that an investigation by his office came to the conclusion that BIA Officer Terry Morgan was justified in shooting and killing “31-year-old Joseph Charboneau during a standoff with officers on June 16.” The [Grand Forks \(ND\) Herald](#) (10/21, 100K) reports that the US Attorney’s Office “said” the shooting was justified because Charboneau posed a “real and immediate” threat to officers and another person at the scene after he refused to put down his gun, which was pointed at the officers. The Grand Forks Herald reports that, as a result of the investigation, Federal prosecutors “will not file charges against” Morgan.

Additional coverage was provided by the [Dickinson \(ND\) Press](#) (10/21, 1K), the [Forum of Fargo-Moorhead \(ND\)](#) (10/21, 14K), [KXJB-TV Fargo \(ND\)](#) Fargo, ND (10/21, 18K), [KFGO-AM Fargo \(ND\)](#) Fargo, ND (10/20, 3K), [KXMC-TV Minot \(ND\)](#) Minot, ND (10/21, 1K), and [KFYR-TV Bismarck \(ND\)](#) Bismarck, ND (10/21, 1K).

CRIME JUMPS AFTER TRIBES CUT FROM BIA FUNDING. The [Los Angeles Times](#) (10/20, Romney, 4.07M) reports on a “time of crisis for public safety on tribal lands.” According to the article, “a federal law decades ago shifted the primary burden of criminal law enforcement on tribal lands in California and five other states to local authorities,” but “many lack the resources to do the job and, in some cases, sufficient knowledge of tribal law and culture to win the trust of tribal members.” After “tribes were cut off from steady funding for their own justice systems,” crime has “flourished.”

ADDITIONAL COVERAGE: YAKAMA NATION’S PETITION TO SELF-GOVERN APPROVED. Additional coverage that the BIA on Monday granted the Yakama Nation’s petition for “retrocession” was provided by the [Bellingham \(WA\) Herald](#) (10/21, 101K), the [Clark County \(WA\) Columbian](#)

(10/20, 86K), the [Washington \(DC\) Times](#) (10/21, 344K), the [Spokane \(WA\) Spokesman-Review](#) (10/20, 183K), the [Native American Times](#) (10/21, 337), the [Law360](#) (10/21, 21K), [KNDU-TV Yakima \(WA\)](#) Yakima, WA (10/21, 3K), and [KUOW-FM Seattle \(WA\)](#) Seattle (10/21, 15K).

GILLETTE'S SERVICE IN OBAMA ADMINISTRATION PRAISED. In an editorial, the [Bismarck \(ND\) Tribune](#) (10/21, 37K) lauds Jodi Gillette's service in the Obama Administration. According to the paper, Gillette's "positions gave her a voice in a White House that has seemed genuinely concerned about Native American issues."

Office of Insular Affairs:

ASSISTANT SECRETARY KIA'AINA PROPOSES MARSHALLS FUND CHANGES. [Radio New Zealand](#) (10/21, 1K) reports that "a top US official has submitted a proposal to the Senate and House to allow the people of Bikini to use resettlement and relocation funds outside of the Marshall Islands." Assistant Secretary for Insular Areas Esther Kia'aina says "it is an appropriate course of action to take regarding the welfare and livelihood of the Bikinian people." The Bikinians were "displaced by US nuclear weapons testing 70 years ago but are now looking at relocating again because of deteriorating conditions on Kili and Ejit Islands." According to the article, "in addition to cramped living quarters and a lack of suitable sustainable resources, the islands have been experiencing more frequent storms and king tides resulting in salt water inundation and the destruction of crops."

[Radio New Zealand](#) (10/21, 1K) reports that "a representative from Bikini Atoll says a proposal to allow people to use resettlement and relocation funds outside of the Marshall Islands is not wanted." Bikini liaison officer Jack Niedenthal says "the US should take full responsibility for any resettlement including providing extra financing." Niedenthal said, "We still got a ways to go, we still have to do some more lobbying and some more talking to people in Washington to make them understand that what's being proposed by the assistant secretary is what we view as 'Plan B'. It's not ultimately what we want in terms of helping our people."

CHINA STRENGTHENS RELATIONSHIP WITH PACIFIC REGION. The [Marianas Variety](#) (10/21) reports that "China and the Pacific Islands Forum Secretariat further strengthened their relationship on Friday when the two met at a ceremony to hand over \$1.05 million to assist the Pacific region." Forum Secretariat Secretary General Meg Taylor and Chinese Ambassador to Fiji Zhang Ping "attended the ceremony and delivered speeches respectively." Zhang "reiterated his nation's ongoing interest in the region saying, 'China attaches great importance to the South Pacific region. The Chinese side stands ready to enhance mutual understanding and cooperation with Pacific Island Countries and contribute to the development and capacity building in the region.'"

COUNTRIES IN PACIFIC URGED TO BEGIN TALKS ON CLIMATE MIGRATION. [Radio New Zealand](#) (10/21, 1K) reports that "all countries in the Pacific are being urged to start discussions on how to help people forced to move from low lying atoll nations like Kiribati and Tuvalu." According to the article, "184 million people worldwide were displaced by disaster between 2008 and 2014 and at special meetings in Geneva last week 110 countries gave the nod to a Protection Agenda for dealing with future migration challenges." The article notes that "the experiences of small island countries which face rising seas due to climate change helped form the global action plan under the Swiss Norwegian Nansen Initiative."

JOURNALIST SPEAKS AT UNIVERSITY OF GUAM ON CLIMATE ISSUES, CORRUPTION IN PACIFIC ISLANDS. The [Marianas Variety](#) (10/21) reports that "author and journalist Giff Johnson spoke to students at the University of Guam on Monday evening about climate change and development in the Pacific islands." Johnson's "lecture, entitled 'Idyllic No More: Pacific Island Climate, Corruption and Development Dilemmas,' is based on his latest book — a compilation of essays detailing the looming climate threat to the region, its booming fishing industry, and the U.S. nuclear test legacy in the Marshall Islands." Johnson called attention to "climate-driven migration from remote Pacific islands to Guam and mainland U.S."

RISING SEA LEVELS THREATEN KIRIBATI. The [National Geographic](#) (10/21, 31.65M) provides a picture gallery of the threat of rising sea levels driven by climate change on Kiribati.

Lacking America's Water Challenges:

WATER SCHEDULED TO BE RELEASED FROM NEW MELONES. The [Sonora \(CA\) Union Democrat](#) (10/21, 28K) reports that “more than 7 billion gallons of water is scheduled to be released from New Melones Reservoir beginning today to ensure flows in the Stanislaus River will keep temperatures cool enough for adult salmon migrating up the river to spawn this fall.” Oakdale Irrigation District and South San Joaquin Irrigation District said “it would benefit river conditions and fisheries, as well as the needs of agriculture and more than 200,000 residential customers downstream.” The article notes that “earlier this year, the irrigation districts sparred with the U.S. Bureau of Reclamation — which manages New Melones Reservoir — over spring pulse flows that they feared would leave as little as 147,000 acre-feet in the reservoir by the end of September.”

SAN JOAQUIN COUNTY BOARD OF SUPERVISORS VOTE TO OPPOSE DELTA TUNNELS PLAN. The [Lodi \(CA\) News-Sentinel](#) (10/21, 14K) reports that “at a meeting on Tuesday, the San Joaquin County Board of Supervisors voted to adopt a resolution in formal opposition of California WaterFix, also known as the twin tunnels plan.” Supervisor Kathy Miller said, “The WaterFix is just a thinly veiled version of the former (Bay Delta Conservation Plan) and continues to push the fatally flawed twin tunnels, which will simply sacrifice one region of California for the benefit of another.”

Securing America's Energy Future:

Renewable Energy:

ENVIRONMENTALISTS, DOMINION BOTH SUPPORT OFFSHORE WIND DEVELOPMENT. On his [Bacon's Rebellion \(VA\)](#) (10/21, Bacon) blog, James Bacon reports on an Environment Virginia-sponsored webinar held Tuesday morning in which representatives from Dominion, environmental groups, and the McAuliffe Administration all voiced support for the utility's experimental offshore wind farm project. For environmentalists, Bacon writes, the project represents the beginning of an industry that would increase the use of green energy along the Atlantic and displace fossil fuels. For the Governor's office, it represents increased green energy coupled with economic development that takes advantage of the Newport News area's shipbuilding industry.

Onshore Energy Development:

CHESAPEAKE ENERGY FINED \$2.1 MILLION FOR UNDER-REPORTING NATURAL GAS. The [Greenwire](#) (10/20, Subscription Publication) reports that the Interior Department on Monday “announced a \$2.1 million civil penalty against Chesapeake Energy Corp. for misreporting the amount of gas it produced and sold from American Indian lands in Oklahoma.” Chesapeake “failed to comply with a 2011 order that found ‘systemic errors’ in the company's monthly production reports for more than 100 Indian leases, according to Interior's Office of Natural Resources Revenue.” The company “agreed to amend the monthly reports, but it continued to maintain inaccurate information on the agency's data systems, ONRR said.” The firm was “assessed a penalty based on ‘knowing or willful maintenance’ of the inaccurate information, ONRR said.”

Additional coverage was provided by [Politico](#) (10/21, 942K), [Natural Gas Intelligence](#) (10/21, Subscription Publication), the [Native American Times](#) (10/21, 337), and [KOKC-AM Oklahoma City \(OK\)](#) Oklahoma City (10/20, 1K).

TEXAS ENERGY REGULATOR OPPOSES STREAM PROTECTION RULE. [Law360](#) (10/21, 21K) reports that “Texas' top energy regulator on Tuesday said the agency will oppose a U.S. Department of the Interior proposed rule aimed at better protecting streams and other waterways from nearby mining activity, saying the regulation encroaches on ground better left to the state.” Texas Railroad Commission Chairman David Porter on Tuesday said “the state would sign on to the multistate Interstate Mining Compact Commission's comments opposing the proposed waterway regulation.”

USGS REPORT STATES EARTHQUAKES COINCIDE WITH OKLAHOMA OIL BOOMS. [KOCO-TV](#) Oklahoma City (10/21, 93K) reports that “a study by the United States Geological Survey states that the earthquakes from the past 100 years seem to coincide with the oil boom in Oklahoma.”

OKLAHOMA REGULATORS SHUT DOWN THREE MORE DISPOSAL WELLS. The [Energywire](#) (10/21, Subscription Publication) reports that “Oklahoma oil and gas regulators dealing with a dramatic increase in earthquakes near the pipeline hub of Cushing have shut down three more disposal wells.” Also, “another well was shut down by the company that owns it after regulators said they were concerned it was drilled too deep.” In addition, “the operators of seven other wells were told in a letter written Friday and released yesterday that they must reduce the volume of drilling waste that they inject deep underground.”

OKLAHOMA LIMITS DISPOSAL WELLS AMID CUSHING QUAKES. [Reuters](#) (10/21, Hampton, Brandes) reports that Oklahoma’s oil and gas regulator on Monday said it could impose new limits on all saltwater disposal wells within a 10-mile radius of Cushing. Reuters reports that Oklahoma now experiences as many as two magnitude 3.0 quakes per day, up from two per year. Thirteen wells have been ordered shut and approvals for new wells have been halted, Reuters reports. Scientists told Reuters that shutting wells could ease tectonic disruption in Oklahoma.

STUDY: FRACKING CAN CAUSE METHANE LEAKS IN NEARBY ABANDONED OIL WELLS. [Reuters](#) (10/20, Valdmanis) reported that according to a study published Tuesday in the Water Resources Research journal, fracking can cause methane leaks in nearby abandoned oil wells. The methane leaks could be a large source of unrecorded greenhouse gas emissions, according to the study. The study said that energy companies could reduce the probability of such methane leaks by trying to identify abandoned wells before they begin fracking, although the task could be difficult due to large numbers of unmarked abandoned wells.

BLM CRITICIZED FOR FAILING TO PRODUCE PICTURES UNDER FOIA REQUEST. For the [Fairfield \(MT\) Sun Times](#) (10/21), Darryl L. Flowers criticizes the BLM for failing to provide pictures in connection with “the proposed Solenex, LLC natural gas well on public lands in the Lewis and Clark National Forest” that were requested under the Freedom of Information Act. The paper received “sixteen photos” and “two photos were missing.” He notes that “curiously, the two omitted photos were the only ones that included a person in the photos.”

Offshore Energy Development:

FEDS INVESTIGATE WORKER’S DEATH ON DRILLSHIP CONTRACTED BY CHEVRON. [Fuel Fix \(TX\)](#) (10/20, Dlouhy, 7K) reports that officials from the Bureau of Safety and Environmental Enforcement and the Coast Guard are investigating “the death of a worker on a drillsip in the Gulf of Mexico that was preparing to bore a well for Chevron.” Fuel Fix says that “the Pacific Santa Ana drillsip was just beginning operations for Chevron in about 4,800 feet of water at the site and had not yet penetrated the sea floor when an employee of that drilling contractor was fatally injured.” Fuel Fix adds that Chevron has a 36 percent working interest in the Keathley Canyon well-leasing block where the incident occurred, an area where “Chevron outlined ambitions to drill up to seven wells” earlier this year.

The [AP](#) (10/21) reports that Amy Roddy, spokeswoman for Pacific Drilling SA, the ship’s owner, “said the company is not releasing any details about the man to respect his family’s privacy. She also refused to disclose how the man died or details of the accident, citing an ongoing investigation.”

[NASDAQ](#) (10/20, Sider) reports that Chevron has contracted the ship since 2012. The [New Orleans Times-Picayune](#) (10/21, Larino, 718K) adds that “operations have been shut down and personnel remain onboard, according to the drillsip’s operator.”

[Offshore Engineer](#) (10/20, Leon) reports that “the ship was to use its dual gradient drilling functions for Chevron’s Anchor-1 prospect last year in Green Canyon block 807, but the well was junked due to mechanical failures. However, in January of this year, Chevron hit high quality oil pay in multiple Lower Tertiary Wilcox Sands at a second Anchor well also drilled by the Pacific Santa Ana.”

The [Dow Jones Newswires](#) (10/21, Sider) reports that this is the first death related to offshore drilling operations in the Gulf of Mexico this year.

[Reuters](#) (10/21), [gCaptain](#) (10/21, 2K), [Upstream Online](#) (10/21, Schmidt, Brenner, 20K), and [Maritime Executive](#) (10/20, 21) also cover the story.

BRIARCLIFFE ACRES VOTES AGAINST OFFSHORE DRILLING. The [Myrtle Beach \(SC\) Online](#) (10/21, 36K) reports that “in a storm of debate over offshore drilling, Briarcliffe Acres surfaced as the latest coastal town to join a united front against seismic testing and drilling for oil and natural gas off of South Carolina’s beaches.” According to the article, “missing councilwoman Abby Stewart, who has been with family on the west coast, the town council unanimously passed a resolution Monday, joining 23 other S.C. coastal towns in a stance against offshore drilling.”

SHELL VESSEL RESCUES FRENCHMAN, CAT FROM SAILBOAT STRANDED IN SEAS NEAR ALASKA. The [AP](#) (10/21, Thiessen) reports that a Frenchman and the cat tucked inside his clothing were rescued on Tuesday after he leapt from his sailboat to a waiting rescue ship sent by Shell. The man activated a location beacon in the high seas south of Alaska and told the Coast Guard his sailboat had lost its rudder and rigging in the high winds and 20-foot waves. The Coast Guard contacted Shell’s oil drilling rig, the Polar Pioneer, which is on its way to Port Angeles, and the rig “sent a support ship, the Tor Viking, to rescue the sailor.” The AP reports that “it wasn’t immediately clear if the man would continue with the Shell ships to Washington state.”

CUNNINGHAM: INTERIOR DEPARTMENT OFFICIAL SHUTS THE DOOR ON ARCTIC DRILLING. In an analysis of the Interior Department’s recent decision on the future of Arctic drilling, [Oil Price](#) (10/21, 2K) reporter Nick Cunningham writes the Interior Department’s decision to cancel lease sales through 2017 “leaves almost no possible pathway for an oil company to drill in the Arctic for years to come, perhaps killing off drilling for a decade or so at a minimum.” Cunningham goes on to write that “it was likely that there wouldn’t have been new drilling in any event, given Shell’s decision and current market conditions, but Interior’s decision officially shuts the door on the Arctic in the medium-term.”

Casey: Interior’s Actions On Arctic Drilling Trends “Toward A Permanent Clampdown.” [CleanTechnica’s](#) (10/20, 15K) Tina Casey writes that “in the absence of local regulations, the Feds are the only game in town and it seems that the Arctic’s role in the US economy is too important to trust to compliance by oil companies.” Casey adds that, even though the Interior’s actions last week on Arctic drilling may be “only temporary, but the trend is toward a permanent clampdown.”

4-Traders: Federal Government To Blame For Low Arctic Drilling Interest. In an op-ed piece on the Interior’s Arctic drilling decision, [4-Traders](#) (10/21, 5K) writes the Federal government’s “difficult” regulatory obstacles is to blame for the lack of interest among oil companies to explore for oil and natural gas in the Arctic. 4-Traders writes that the “demand for oil and natural gas isn’t going away, so energy domestic exploration must continue in the Arctic and elsewhere. But as we’ve seen, by putting up unnecessary regulatory hurdles, regulators can cause job and economic growth opportunities to be missed.”

America’s Great Outdoors:

Bureau of Land Management:

BLM TO REVIEW HAGERMAN-HAILEY TRANSMISSION LINE. [Boise \(ID\) State Public Radio](#) (10/21) reports that the BLM will review the Hagerman to Hailey transmission line, paying “special attention to the greater sage grouse in the area.” Stacey Baczkowski, a biologist with Idaho Power, says “the company has been working with the BLM for the last few years to make sure the line is built with the bird in mind.” Baczkowski says “the power company plans to build the new transmission line as close to the current one as possible, and will follow BLM rules about construction during sage grouse mating times.”

UTAH WATER DISTRICT RAISES CONCERNS ABOUT BLM REVISION TO LAND-USE PLAN.

The [Deseret \(UT\) News](#) (10/21, 407K) reports that “federal policies that either aim to instill more oversight of water or deny access altogether have some Utah leaders frothing over what they say is a repeated pattern of overreach that threatens local economies and livelihoods.” Ron Thompson, general manager of the Washington County Water Conservancy District, said “possible revisions to a land-use plan by the Bureau of Land Management in Washington County have severe ramifications should one particular approach be adopted.” Thompson said “the BLM — under one option — is

ignoring key considerations that went into the passage of the bill, including water supplies being left unhindered and right of way corridors left intact.”

ADDITIONAL COVERAGE: HELICOPTER CRASHES NEAR SEARCHLIGHT DURING CATTLE ROUNDUP. Additional coverage of the helicopter crash near Searchlight during a cattle roundup was provided by the [Las Vegas Review-Journal](#) (10/21, 378K).

Fish and Wildlife Service:

CONSERVATION LEADERS ATTEND NATIONAL CONSERVATION SUMMIT. [KYTV-TV](#) Springfield, MO (10/21, 135K) reports that “more than 40 leaders from the leading conservation groups in America are meeting in Springfield this week for a National Conservation Summit hosted by The Johnny Morris Foundation.” According to the article, “participants include the U.S. Fish and Wildlife Service, National Geographic, Audubon Society, and Ducks Unlimited.” The article notes that “the purpose of the historic gathering is to collectively discuss opportunities to educate and engage the public in efforts to protect wildlife and natural habitats in preparation for the grand opening of America’s Wildlife Museum and Aquarium in 2016.”

The [Springfield \(MO\) News-Leader](#) (10/20, 49K) reports that “three exhibits of America’s Wildlife Museum & Aquarium, formerly Wonders of Wildlife, were open to media for a tour on Oct. 20, 2015 at the museum located next to the Bass Pro Shops flagship store in Springfield, Mo.” More than 40 conservation leaders attending a National Conservation Summit “hope the new Bass Pro Shops wildlife museum and aquarium will convey to visitors when it opens in mid 2016.” FWS Director Dan Ashe, “one of the summit attendees,” called the museum “one of the foremost conservation attractions in the world.” He said, “Through conservation efforts, we can be successful in sustaining these populations of animals that are threatened or endangered. People hear about the industrial-scale poaching of elephants that’s happening in Africa. That’s not hunting. With this museum, here’s an opportunity to tell the story of how we can protect wildlife habitat, and that when hunting is done well, with appropriate regulations, it sustains wildlife populations.”

Additional coverage was provided by [KOLR-TV](#) Springfield, MO (10/21, 6K), [KYTV-TV](#) Springfield, MO (10/21, 135K), and [KOLR-TV](#) Springfield, MO (10/21, 6K).

CNMI QUESTIONS INCLUSION OF SOME SPECIES ON ENDANGERED LIST. The [Radio New Zealand](#) (10/21, 1K) reports that “the Northern Marianas government says the decision to list 23 species in Guam and the CNMI as threatened or endangered was rushed.” The government says “it supports the US Fish and Wildlife Service’s listing of seven of the 17 CNMI species, but it questions the inclusion of some of the other species.” The Department of Land and Natural Resources says “a number of the species do not meet the definitions of threatened or endangered and don’t require federal protection.”

FWS LOOKS TO RESTORE HABITAT ON ROOT RIVER. The [Rochester \(MN\) Post-Bulletin](#) (10/21, 28K) reports that “federal wildlife officials are seeking public input on a plan to restore and enhance habitat on 825 acres of Minnesota land along the Root River in Houston County.” Managed by the FWS “as part of the Upper Mississippi River National Wildlife and Fish Refuge, the Root River Tract sits to the east of Hwy. 26 between La Crescent and Brownsville.” The article notes that “the site includes 664 acres of hunting and farmland purchased in 2009 with money from the Land and Water Conservation Fund.”

SHOOTING OF CALIFORNIA CONDOR IN ARIZONA UNDER INVESTIGATION. [Grand Canyon \(AZ\) News](#) (10/21) reports that FWS special agents and Arizona Game and Fish Department “law enforcement personnel are investigating the lethal shooting of an endangered California condor that occurred on the Kaibab Plateau in northern Arizona Oct. 8.”

MAN CLAIMS HE BLOCKED ARIZONA BIKE TRAIL TO PROTECT OWLS. The [AP](#) (10/21, 344K) reports that “the 81-year-old man who blocked a Flagstaff-area mountain bike race says he did it to protect an endangered owl species.” J.D. Protiva “appeared in federal court Monday on misdemeanor charges related to blocking the Elden Springs Trail before the August race.” Protiva says “the path goes through protected Mexican spotted owl habitat.”

ADDITIONAL COVERAGE: MONARCHS GET HELP AS CALIFORNIANS PLANT DROUGHT-TOLERANT MILKWEED. Additional coverage that monarch butterflies could benefit from the California drought was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Albuquerque \(NM\) Journal](#) (10/21, 259K), [KABC-TV Los Angeles \(CA\)](#) Los Angeles (10/21, 413K), and [WRC-TV Washington \(DC\)](#) Washington (10/21, 345K).

FWS INVESTING IN PROJECTS TO STRENGTHEN ATLANTIC COASTAL DEFENSES AGAINST FUTURE STORMS. In an op-ed for the [New Haven \(CT\) Register](#) (10/20, 172K), Wendi Weber is Northeast regional director for the FWS, writes that “federal money for Hurricane Sandy recovery has spurred an unprecedented effort to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms.” She notes that the FWS and other Interior Department “agencies are investing \$787 million in hundreds of projects to clean up and repair damaged refuges and parks; restore coastal marshes, wetlands and shoreline; connect and open waterways to improve flood control; and increase our scientific understanding of how these natural areas are changing.” According to Weber, “these investments support the goal of President Barack Obama’s Climate Action Plan to make communities more resilient to increasingly intense storms predicted with a changing climate.”

National Park Service:

MUSIC VIDEO CELEBRATES 100 YEARS OF NPS. The [New Bedford \(MA\) Standard-Times](#) (10/20, 53K) reports on “a locally made music video that celebrates 100 years of the National Park Service.” According to the article, “published on Oct. 15, the Centennial video has more than 18,500 views on the NPS facebook page and more than 530 on the Youth Ambassador Program’s YouTube page, the group that made it.” NPS Director Jon Jarvis, “who met the traveling crew in Washington, D.C., makes a cameo appearance in the video to say, ‘It’s great to celebrate a hundred years with YAP!’”

Kentucky Lieutenant Gov. Luallen Touts National Parks. The [Louisville \(KY\) Courier-Journal](#) (10/20, 414K) reports that Kentucky Lieutenant Governor Crit Luallen on Tuesday “touted the economic impact of Kentucky’s travel and tourism industry” in “an address to the Kentucky Travel Industry’s annual conference in Bowling Green.” Following her remarks, Luallen “recognized five national parks in Kentucky as part of the National Park Service Centennial in 2016.” She “presented proclamations to representatives of the parks.”

Couple Visiting 59 National Parks In 12 Months. The [Cleveland Plain Dealer](#) (10/21, 1.03M) reports that “Cole and Elizabeth Donelson, St. Louis natives, are two months into their grand adventure: 59 parks in 12 months – part celebration of the National Park Service’s 100th anniversary, part exercise in youthful spontaneity.” Their goal is to “see the best of the United States, and inspire others – particularly other millennials – to do the same.” The article notes that “their mission meshes well with a new campaign of the Park Service, which celebrates its centennial anniversary in 2016.”

WATCHDOG RELEASES REPORT ON NPS CONSTRUCTION FUNDS. The [Greenwire](#) (10/20, Subscription Publication) reports that “a federal watchdog yesterday released a disputed report alleging that the National Park Service is violating congressional intent by dipping into its construction account to cover security, air testing and other reimbursable expenses that should have been paid up front by other agencies.” The NPS construction account is “only for expenses that relate to ‘construction, improvements, repair or replacement of physical facilities,’” the Department of the Interior’s Office of Inspector General report said, “citing the language of the agency’s appropriation.” However, “the OIG found that 17 out of a sample of 21 interagency agreements that used Park Service construction funds to cover reimbursable costs did not appear to include ‘a valid construction purpose.’” The article notes that “these included \$4.9 million that NPS spent from its construction account on security at the Department of the Army’s Memorial Day and Independence Day concerts at the Capitol in 2014 and \$37.5 million over seven years on air quality monitoring at national parks that will be paid back to NPS by U.S. EPA.”

HOUSE COMMITTEE PASSES GRAND CANYON BISON MANAGEMENT ACT. [Grand Canyon \(AZ\) News](#) (10/21) reports that the U.S. House Natural Resources Committee approved the Grand Canyon Bison Management Act “allowing the Arizona Game and Fish Department (AZGFD) to better manage and conserve the bison population within the park Oct. 8.” The legislation “requires the U.S. Department of Interior and the Arizona Game and Fish Commission to coordinate on a plan that

allows sportsmen holding a valid state-issued hunting license to assist in management of the bison population within the park.”

THUNDERSTORMS CAUSE FLOODING, MUDSLIDES IN DEATH VALLEY NATIONAL PARK.

The [Greenwire](#) (10/20, Subscription Publication) reports that “mudslides and flooding after severe thunderstorms in Death Valley National Park on Sunday trapped three park rangers and about 20 visitors – many out to see a clear night sky – in a volcanic crater overnight.” Park spokeswoman Abby Wines said “the stranded people spent the night in Ubehebe Crater, maintaining contact with park headquarters until they were able to reach safety yesterday morning.” The article notes that “no injuries were reported, but Wines said the unexpectedly severe storms knocked out power in the area, damaged and closed several roads, and filled a historic visitor’s center with several feet of mud and debris.”

NPS SET TO CONTINUE WITH TREE-CUTTING AT POTOMAC CAMPGROUND. The [Bethesda \(MD\) Magazine](#) (10/21) reports that “after complaints from two nearby residents and a call from County Council member Roger Berliner temporarily halted tree-cutting operations Friday at a Potomac campground, the National Park Service said it plans to resume the tree-cutting and will probably do so in the next few days.” John Noel, deputy superintendent for the C&O Canal National Historical Park, said that “he went to the Swain’s Lock Recreation Site to examine the 26 trees proposed to be removed and 32 others proposed to be pruned at the site’s campground.” Noel “agreed that the trees are rotting and in danger of falling on park users below.”

STUDENTS GO ON CANOE TRIP AROUND WOLF LAKE. The [Merrillville \(IN\) Post-Tribune](#) (10/20, 105K) reports that “all classes in Grades 6 through 9 at George Rogers Clark Junior-Senior High School in Hammond recently experienced a unique field trip right in their own back yard — a canoe trip around Wolf Lake located only a few blocks from the school.” The trip was “made available through a partnership with the National Park Service, Dunes Learning Center and Wilderness Inquiry.”

NEW COLONIAL PARK SUPERINTENDENT THANKS COMMUNITY FOR ADVOCACY. The [Newport News \(VA\) Daily Press](#) (10/20, Williams, Subscription Publication, 201K) reports that the Colonial National Historical Park’s new Superintendent, Kym Hall, thanked the community for its opposition to Dominion’s Skiffes Creek transmission project in her first appearance before the York County Board of Supervisors on September 1. “The view should be protected,” she said.

DEVILS TOWER TO HOST STAR VIEWING PARTIES. The [Casper \(WY\) Star-Tribune](#) (10/21, 115K) reports that the NPS “announced that Devils Tower will host a series of star viewing parties October through December.” The article notes that “the eight parties are free of charge, and will last approximately two hours.”

NPS URGED TO RECONSIDER RACIST NAME FOR A WASHINGTON LAKE. In an op-ed for the [High Country \(CO\) News](#) (10/21, 74K), Glenn Nelson writes that Washington state officially calls Howard Lake “by what is believed to be its oldest known name,” but he federal government “recognizes the lake by a name that causes the jaws of most people of color to drop: Coon Lake.” Nelson notes that “the federal government did not follow the usual course of supporting the state’s action, mostly because of opposition from the National Park Service, which manages the area that contains the lake.” The NPS, “acting on research from its North Cascades unit, originally defended its stance by claiming that there was ambiguity around the use of the term ‘coon.’” According to Nelson, “in the years leading up to its 2016 centennial, the Park Service has done a lot of talking and writing about the need for diversity and inclusiveness.” He concludes that “it’s past time for the Park Service to back away from its misguided opposition, encourage Secretary Jewell to come to its rescue, and allow another black life to matter.”

US Geological Survey:

USGS SEISMOLOGIST QUESTIONS PREDICTION OF 99.9 PERCENT CHANCE OF MAJOR LOS ANGELES EARTHQUAKE IN 3 YEARS. The [Southern California Public Radio](#) (10/20, 68K) reports that “a controversial new study from NASA’s Jet Propulsion Laboratory” claims “there is a 99.9 percent chance of an earthquake” in Los Angeles “between magnitude 5 and 6.3 in less than three years.” The study, published earlier this month by the American Geophysical Union’s Earth and

Space Science journal, has taken many in the seismic community by surprise. Lucy Jones with the USGS said the “methodology doesn’t fully explain the prediction, and the study doesn’t adequately address this either.” Jones said that, according to the USGS’ “models, there is only an 85 percent chance of a magnitude 5 or 6 quake in the same region over a three-year period.”

Top National News:

MEDIA ANALYSES: TRUDEAU’S ELECTION LIKELY TO FOSTER IMPROVED US-CANADA

TIES. On the day after Justin Trudeau became Canada’s Prime Minister-designate, media reporting universally characterized the election results as a likely boost for US-Canada relations. Coverage focuses on Trudeau’s promise of a less combative foreign policy style and the perception that he will be more willing to accept a US rejection of the Keystone pipeline. Reporting – including a combined 2 minutes and 50 seconds on the three broadcast networks – also indicates that despite Trudeau’s decision to withdraw his aircraft from the US-led coalition against ISIL, he is likely to be a more willing partner on climate change and other issues.

[ABC World News](#) (10/20, story 9, 0:20, Muir, 5.84M) reported President Obama on Tuesday congratulated Trudeau, who “swept into power with a message of optimism saying Canada beat fear with hope.” [USA Today](#) (10/21, Korte, 5.23M) reports Obama made the phone call “in an attempt to lock down continued cooperation with the northern neighbor on trade, terrorism, and climate change.” The White House, according to USA Today, “signaled that not much would change in the relationship” between the neighbors following the Liberal party’s victory. [CBC News](#) (10/20, Fitzpatrick, 225K) reported on its website that the White House indicated Obama and Trudeau “agreed on the importance of deepening the ‘already strong’ bilateral relationship” between the countries “and committed to strengthen joint efforts to promote trade and to combat terrorism and climate change.”

[AFP](#) (10/21) reports the White House and current Prime Minister Stephen Harper “clashed over climate policy” and the Keystone pipeline. While White House spokesman Josh Earnest on Tuesday said “it would be shortsighted to reduce the relationship between our two countries to just one issue,” Chuck Todd reported on [NBC Nightly News](#) (10/20, story 5, 2:05, Holt, 7.86M) that “we now have a Canadian government that is politically more in line with the American government.” According to Todd, “Relations have been good but they have not been so great of late. Will they now get better? That is why Americans should care.”

In an article entitled “5 Reasons The US Should Care About Canada’s New Prime Minister,” [USA Today](#) (10/21, Hjelmggaard, 5.23M) lists ways in which Trudeau “is likely to affect policies in Canada and the United States.” According to USA Today, Trudeau “promised to improve strained relations” with Obama and said “he wants to find constructive ways of working with Washington on other issues.” Another [USA Today](#) (10/21, Kovac, 5.23M) article reports that Trudeau and Harper “differ in their approach to foreign policy,” with the incoming leader being less vocally pro-Israel and more focused on environmental issues.

In an analysis piece, [Bloomberg News](#) (10/21, 2.66M) says “a prompt rejection” of the Keystone pipeline by Obama “would make the job easier” for Trudeau “as he seeks to reset the country’s relationship with the US, which he says was damaged” by Harper. According to Bloomberg, Trudeau “could use a quick US denial” of the pipeline “to focus discussions” with Obama “on issues such as trade and climate.” Bloomberg notes there has been “speculation” that Obama “would reject the pipeline shortly after the Canadian election.” However, [The Hill](#) (10/20, Cama, 471K) reported, Secretary of State Kerry said Tuesday that Canada’s election results will not change the White House’s approach to the Keystone issue. Kerry said the decision “is being based on the merits and countervailing balance of all the input that has come from a very exhaustive agency review.” Kerry reiterated that he seeks a decision “as fast as possible.”

[Reuters](#) (10/21, Mason, Rampton) reports the White House indicated it would like the new Canadian government to take increased actions to address climate change. Earnest said that while Canada has “made a substantial and important commitment” ahead of the Paris climate talks, “We believe that it’s possible that there is more that Canada can do in this regard.”

However, writing for [Mother Jones](#) (10/20, 758K), Suzanne Goldenberg claimed “those hoping for a

U-turn in Canada's climate change policy...are in for a reality check. According to Goldenberg, while Trudeau does not align directly with many of Harper's views or policies, "it would be a mistake" to see the new Canadian leader or his party "as climate champions." In [Slate](#) (10/20, 1.38M), Joshua Keating argued that at least with regard to the Keystone pipeline, Trudeau does present a change from Harper. Keating characterizes Trudeau as "a very different leader" from Harper and says he will make the Keystone pipeline less of a focal point of US-Canada relations. According to Keating, Trudeau "has described his support for the pipeline as 'steadfast,' but it's clearly not the make-or-break issue for him that it was for Harper."

The [Wall Street Journal](#) (10/21, Vieira, Subscription Publication, 5.95M) reports Trudeau said he will work to restore Canada's reputation of defending minorities and become more involved in multilateral policy making. At a rally in Ottawa, Trudeau said, "To this country's friends around the world, I want to say this: Many of you have worried Canada has lost its compassionate and constructive voice in the world over the past 10 years. I have simple message for you: We're back." The [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) similarly reports that Trudeau "is likely to present a very different face to the world" than Harper, "but the most noticeable difference will probably be in tone." Trudeau has vowed to "put an end to Mr. Harper's often belligerent style of politics and diplomacy." Trudeau said Tuesday that "a positive, optimistic, hopeful vision of public life isn't a naïve dream – it can be a powerful force for change." The Times says Trudeau has previously indicated a desire to end Harper's reliance on military solutions and tough rhetoric, and instead focus on working within international organizations, such as the United Nations.

The [CBS Evening News](#) (10/20, story 10, 0:25, Pelley, 5.08M) reported, "Canada took a left turn" as "Trudeau and the Liberal Party rode in on a landslide." In a [USA Today](#) (10/21, 5.23M) op-ed, author David Andelman says "most of the reasons" Canadian voters chose Trudeau to lead the country "boiled down to one fundamental: The Liberal Party leader was simply nicer than his opponent. And most Canadians believe they are, too." Similarly, the [Wall Street Journal](#) (10/21, Subscription Publication, 5.95M) editorializes that Canadians wanted a change from the Harper government, which had become isolated and sought to restrict debate. The [New York Times](#) (10/21, Subscription Publication, 11.82M) agrees, editorializing that Trudeau's election "shows how ready Canadians were to emerge from a decade under the Conservative government of the secretive and combative Stephen Harper."

[AFP](#) (10/21) reports Trudeau told Obama on Tuesday that Canadian fighter aircraft will withdraw from the US-led coalition against ISIL, but the new Canadian leader did not present a timeline for the move. In a front-page story, the [Washington Post](#) (10/21, A1, Brown, 6.76M) reports Trudeau said, "I committed that we would continue to engage in a responsible way that understands how Canada has a role to play in the fight against ISIL," adding, that Obama "understands the commitments I've made around ending the combat mission." According to the Post, a "senior Administration official," said Obama and Trudeau discussed joint anti-terrorism efforts and, "We expect Canada will continue to be a valuable contributor to the 65-member global coalition" against ISIL.

Trudeau's Win Could "Lead To Full Marijuana Legalization" In Canada. [USA Today](#) (10/21, Hughes, 5.23M) reports Trudeau's win "may lead to full marijuana legalization" for Canada. According to USA Today, Trudeau promised during his campaign that "Canada would create a system to tax, regulate and sell marijuana, along with stiff penalties for anyone giving pot to children or caught driving while stoned." USA Today says American "cannabis activists hailed Tuesday's election as a milestone, suggesting that a day may soon come when cross-border trade talks include...legal weed."

[AFP](#) (10/21) reports Trudeau's "promise to legalize recreational cannabis" will likely "help the nation's nascent medical marijuana industry." Investors, according to AFP, "are betting" they could build on companies' current production of marijuana for medical use and "quickly scale up to serve recreational pot users too, once Trudeau makes good on his promise."

NYTimes Analysis: Trudeau Is "No Dynast" Despite Father Being Former Prime Minister. In a 1,350-world profile piece, the [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) reports that despite there being "many easy parallels to draw between" Trudeau and his father, former Prime Minister Pierre Elliott Trudeau, Canada's incoming leader "is no dynast who slipped effortlessly into a family political machine." The Times notes that Trudeau "did not even enter politics until 18 years after his father gave it up, and seven year after his father's death." According to the

times, Trudeau built his own cadre of advisers, mostly from his own generation – and sometimes “chose more difficult roads – partly, it appears, to show he had not been handed a life in politics on a platter.”

In the [Washington Post](#) (10/21, 6.76M) “Reliable Source” blog, Emily Heil says Trudeau and his wife, Sophie Grégoire-Trudeau, “have a lot in common with the Obamas.” According to Heil, “they’d have lots to talk about, apart from liberal politics, like fitness!”

IN APPARENT REVERSAL, BIDEN SAYS HE PRIVATELY URGED OBAMA TO AUTHORIZE UBL RAID. Vice President Biden did not reveal Tuesday whether or not he will enter the Democratic presidential race, but his remark that he privately advised President Obama to launch the 2011 raid that led to the death of Osama Bin Laden – which contradicted Biden’s past public comments that he advised against the raid – is being interpreted as a possible line of attack against Hillary Clinton. All three broadcast networks reported on the statement, combining for nearly eight minutes of coverage, and ABC led with it. The tone of the coverage is mixed, with most reports calling it a reversal, and some concluding that Biden may be undercutting his own reputation for candor.

There was also Twitter discussion of Biden’s remarks. Anthony De Rosa, a digital producer for The Daily Show who has nearly 89,000 followers, [tweeted](#), “Biden sounds like Brian Williams with his evolving recollection of the Bin Laden raid.” Jonathan Martin of the New York Times [tweeted](#), “@vp today signals: he’ll run & it’ll get negative FAST or: he’s not happy about being sidelined.” His Times colleague Maggie Haberman [tweeted](#), “Biden’s subtle digs at Clinton indicate that if he runs it’ll be ugly.” In addition, the hashtag [#BidenWatch](#) emerged on Twitter, with Fox Business Network’s Trish Regan [tweeting](#), “Sure sounds like he’s running...”, Mashable’s Juana Summers [tweeting](#) Biden’s Wednesday official schedule, and Al Jazeera America’s David Shuster [tweeting](#) that “Hallie Biden, widow of the late Beau Biden, says her family supports a Presidential campaign ‘100%’”.

[ABC World News](#) (10/20, lead story, 2:50, Muir, 5.84M) reported that “as the pressure mounts for Joe Biden to decide whether he’ll run...many [are] now asking, did he change his story?” ABC (Karl) added, “Biden has described Obama’s decision as especially courageous because in that key meeting when it came time to decide, most of the President’s advisers, including Biden himself, were not in favor of the raid.” On Tuesday, he “offered an entirely different account of what happened on that fateful day.” Biden was shown saying, “So as we walked out of the room and we walked upstairs, I told him my opinion that I thought he should go but to follow his own instincts. But it would have been a mistake, imagine if I had said in front of everyone, ‘don’t go, or go,’ and his decision was a different decision.” Karl: “But until today, Biden has said he told Obama and his team that night to hold off on the raid.”

The [CBS Evening News](#) (10/20, story 6, 2:05, Pelley, 5.08M) reported that Biden “sounded more like a presidential candidate, talking up his foreign policy credentials, doing some rewriting of his own history and firing a shot over the bow of the Democratic frontrunner.” CBS’ Nancy Corden added that Biden “never mentioned” Clinton by name, “but it was all too clear the comparison he was making when he said this about his stature overseas.” Biden: “I will get sent to go speak to Putin or go speak to whomever, and it’s because the secretary of state, we’ve had two great secretaries of state, but when I go, they know that I am speaking for the President.” Cordes added that Biden left Clinton “out of his story” about the Bin Laden raid.

[NBC Nightly News](#) (10/20, story 3, 2:35, Holt, 7.86M) also said of Biden, “If anything, he is beginning to sound more like a candidate, taking not-so-veiled swipes” at Clinton. NBC (Welker) added that Biden “said he and the President were in lock-step when it came to authorizing the raid against Bin La

SEN. MURKOWSKI SEES TOUGH ROAD FOR INTERIOR NOMINEE. [Politico Pro](#) (10/20, Subscription Publication) reports that Senate Energy and Natural Resources Committee Lisa Murkowski said that Interior Department pick Kristen Sarri would “have a lot of explaining to do at a hearing on six nominees today.” While Murkowski was “pleased that President Barack Obama had renamed Mount McKinley this summer to Denali, the Alaska Republican said she was still frustrated with the Interior Department’s ‘heartless decision’ to deny a road in King Cove.” Murkowski also “criticized Interior for closing off oil production in Alaska and last week’s cancellation of offshore sales and lease extension.”

Meanwhile, the [Daily Caller](#) (10/21, Barton, 375K) reports that Murkowski is “torn between leaving the Department of the Interior’s independent watchdog post vacant, or confirming President Barack Obama’s nominee crippled by recurring allegations of ‘playing games with Congress.’” She said, “I strongly believe that Interior needs a permanent [inspector general], and I’m disappointed the administration has let the position go unfilled for six and a half years.” Murkowski continued, “But I am also committed to ensuring that the individual we confirm is fully independent ... The tenure that you have been involved with thus far in this position has been marked by controversy.”

Additional coverage was provided by [The Hill](#) (10/21, Henry, 471K), [KTOO-FM](#) Juneau, AK (10/20), and [Alaska Public Radio Network](#) (10/20, 2K).

HISTORIC \$186 MILLION SETTLEMENT WITH CHOCTAW, CHICKASAW NATIONS LAUDED.

The [Indian Country Today Media Network](#) (10/20, 32K) reports that “tribes and the U.S. Department of the Interior heralded the outcome of a \$186 million settlement signed earlier this month between the federal government, the Choctaw and the Chickasaw nations to solve a longstanding land trust dispute as a new chapter in relations.” During the October 5 signing ceremony, Chickasaw Nation Governor Bill Anoatubby “gave a nod to the impetus provided” by Interior Secretary Sally Jewell. He said, “We respect the vital role Secretary Jewell has taken in helping make this historic settlement a reality. We are confident she will play an essential role in our efforts to continue strengthening the relationship between our governments, because we believe she has a unique appreciation for the mutual benefits of a positive government-to-government relationship.” Jewell said, “Today’s agreement is the latest addition to a record number of longstanding settlements resolved under this Administration. This historic settlement is the start of a new chapter in our trust relationships with the Chickasaw and Choctaw Nations, and underscores our commitment to fulfilling those responsibilities to Native communities across the country.”

U.S. TREASURY CONFIRMS \$20B BALANCE FOR LWCF. [E&E Publishing](#) (10/21, 705) reports that “the Land and Water Conservation Fund that expired earlier this month for the first time in its 50-year history currently contains nearly \$20 billion, according to the U.S. Treasury, which maintains the program’s balance sheets.” But “whether that is ‘real’ money available to be spent on federal land acquisitions, private land easements and state recreation projects depends on whom you ask.” The article notes that “the \$19.8 billion can only be reduced until Congress reauthorizes the program.”

Additional coverage of the LWCF was provided by the [Durango \(CO\) Herald](#) (10/20, 31K).

PROPOSED DESIGNATIONS OF THREE NATIONAL MONUMENTS IN CALIFORNIA DESERT RAISES CONCERNS ABOUT “LAND GRAB.” [Fox News](#) (10/20, 8.91M) reports that “a group of off-roaders and others are attempting to fight a proposed designation of three national monuments in the California desert under the Antiquities Act.”

The Obama Administration is “considering using the federal Antiquities Act to bypass the legislative process at the request of Sen. Dianne Feinstein, whose efforts to have the Mojave Trails and Castle Mountain, both in the Mojave Desert, and a section of the Sonoran Desert named federal sites were repeatedly blocked by Republicans.” According to the article, “a White House move could put the land under federal control, which critics

say could cut funding for upkeep or even restrict access.

UNMANNED HELICOPTER OFFERS NEW WAY TO FIGHT WILDFIRES. The [Voice of America](#) (10/21, Banse, 32K) reports that the K-MAX “unmanned, water-dropping” helicopter was tested by the US government. The helicopter can fly through limited visibility. Brad Koeckertiz, the unmanned aircraft program manager with the US Department of Interior, says that unmanned helicopters such as the K-MAX will be integrated into routine measures to fight wildfires over the next few of years. The article notes that the K-MAX helicopters have already been used by the US Marines in Afghanistan, to “resupply remote outposts at night” and replace “dangerous convoys on the ground.” The article notes that the growing uses for drones is also why the FAA is seeking to register all drones.

Additional coverage was provided by [Vertical Magazine \(CAN\)](#) (10/21).

JEB BUSH PROPOSES MOVING INTERIOR DEPARTMENT FROM D.C. To Western City. The [Las Vegas Sun](#) (10/20, Lucas, 199K) reports that “Republican presidential candidate Jeb Bush will unveil his proposals for Western land and resource management in a campaign stop in Reno on Wednesday morning, in a speech likely to resonate with conservative voters opposed to what they see as federal overreach in the Western states.” Bush is “expected to speak at 11 a.m. Wednesday at Rancho San Rafael Regional Park before appearing at a forum sponsored by the LIBRE Initiative at the College of Southern Nevada Cheyenne Campus in North Las Vegas at 6 p.m.” In the proposal, Bush will “call for moving the headquarters of the Department of Interior from Washington, D.C., to a city in the western United States like Denver, Salt Lake City or Reno and will say that as president he would direct federal agencies to give broad latitude to states to determine land-use issues.”

STUDY: ALASKAN WILDFIRES COULD EXACERBATE GLOBAL WARMING. The [Washington Post](#) (10/21, Mooney, 6.76M) reports that some greenhouse gas sources outside the scope of forthcoming UN climate talks are beyond governments’ control, such as raging peat fires in Indonesia this year, emitting “as much as Japan produces in a year from fossil fuels.” Elsewhere, a new study in Nature Climate Change reaffirms concerns about the emissions of northern fires in Alaska. The Post reports that “climate researchers are still trying to figure out how all of these factors will interrelate,” but fire is a “powerful determinant of how much carbon resides in land, rather than in the air, across our globe.”

INTERIOR’S VINE ACCOUNT HIGHLIGHTED. [Politico](#) (10/21, 942K) highlights the Interior Department has a great Vine account. Providing a link, Politico says “this is Internet gold.”

Empowering Native American Communities:

BIA RULE ANNOUNCES RULE GIVING TRIBES MORE CONTROL OVER ELECTIONS. [Law360](#) (10/20, 21K) reports that the BIA “on Monday announced its final rule for Native American tribal elections conducted by the U.S. Department of the Interior, saying the new rule will encourage tribes to take control of their elections and help protect the voting rights of tribe members living in urban areas.” Assistant Secretary of Indian Affairs Kevin K. Washburn said “in a statement Monday that the rule will allow tribes to opt out of having the interior secretary conduct their elections.”

The [Native American Times](#) (10/20, 337) reports that Washburn said, “Though many federal responsibilities concern the lands we hold in trust for tribes and Indian people, more than 55 million acres nationwide, the United States has a moral obligation to preserve connections between Indian people and their tribes that it once sought to destroy. For the future of Native nations and the health of Indian Country, American Indians in urban areas must work harder to maintain connections with their tribes. One important aspect of that relationship is participation in the civic and political life of their tribal governments. For that reason, our Secretarial election amendments seek to prevent tribal members living in urban areas from being inadvertently disenfranchised in Secretarial elections.”

HEARING FOCUSES ON NATIVE HAWAIIAN ELECTION. The [AP](#) (10/21, Kelleher) reports from Honolulu that a federal court hearing began on Tuesday “in a lawsuit by people who want to put a stop to an election process that is underway for Native Hawaiians.” The lawsuit, filed in August, “says it’s unconstitutional for the state to be involved in a race-based election.” The state “argues in court

documents that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it is not involved in next month's vote to elect delegates for a convention to determine self-governance for Native Hawaiians." Tuesday's hearing "is focused on the plaintiffs' motion for a preliminary injunction," and the plaintiffs "want the judge to limit voter registration activities or stop the election altogether."

Additional coverage was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Navajo Times \(AZ\)](#) (10/21, 66K), and [Yahoo! News](#) (10/21, Kelleher, 5.98M).

INTERIOR SIDES WITH ALASKA NATIVE GROUP IN INVESTIGATION OF MASSACHUSETTS COLLEGE TRIBAL COLLECTION. The [AP](#) (10/21, 2.28M) reports that "a Massachusetts college was found in violation of a federal law regulating the possession and sale of potentially sacred artifacts following a complaint from an organization of Alaska Natives." The Interior Department said "an investigation substantiated the complaint against Andover Newton Theological School filed in June by the Sealaska Heritage Institute." The institute's president, Rosita Worl, said "the school possesses at least two southeast Alaska artifacts, including a Tlingit halibut hook that is considered sacred."

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/21, D'oro, 344K), the [Boston \(MA\) Herald](#) (10/21, 548K), the [Daily Mail \(UK\)](#) (10/21, 5.59M), the [Miami \(FL\) Herald](#) (10/21, 651K), [Minneapolis \(MN\) Star Tribune](#) (10/21, D'oro, 1.19M), [ABC News](#) (10/21, 3.97M), and the [Alaska Dispatch News](#) (10/20, 219K).

US ATTORNEY SAYS BIA OFFICER WAS JUSTIFIED IN DEADLY SPIRIT LAKE SHOOTING. The [AP](#) (10/21) reports that US Attorney Chris Myers "says" that an investigation by his office came to the conclusion that BIA Officer Terry Morgan was justified in shooting and killing "31-year-old Joseph Charboneau during a standoff with officers on June 16." The [Grand Forks \(ND\) Herald](#) (10/21, 100K) reports that the US Attorney's Office "said" the shooting was justified because Charboneau posed a "real and immediate" threat to officers and another person at the scene after he refused to put down his gun, which was pointed at the officers. The Grand Forks Herald reports that, as a result of the investigation, Federal prosecutors "will not file charges against" Morgan.

Additional coverage was provided by the [Dickinson \(ND\) Press](#) (10/21, 1K), the [Forum of Fargo-Moorhead \(ND\)](#) (10/21, 14K), [KXJB-TV Fargo \(ND\)](#) Fargo, ND (10/21, 18K), [KFGO-AM Fargo \(ND\)](#) Fargo, ND (10/20, 3K), [KXMC-TV Minot \(ND\)](#) Minot, ND (10/21, 1K), and [KFYR-TV Bismarck \(ND\)](#) Bismarck, ND (10/21, 1K).

CRIME JUMPS AFTER TRIBES CUT FROM BIA FUNDING. The [Los Angeles Times](#) (10/20, Romney, 4.07M) reports on a "time of crisis for public safety on tribal lands." According to the article, "a federal law decades ago shifted the primary burden of criminal law enforcement on tribal lands in California and five other states to local authorities," but "many lack the resources to do the job and, in some cases, sufficient knowledge of tribal law and culture to win the trust of tribal members." After "tribes were cut off from steady funding for their own justice systems," crime has "flourished."

ADDITIONAL COVERAGE: YAKAMA NATION'S PETITION TO SELF-GOVERN APPROVED.

Additional coverage that the BIA on Monday granted the Yakama Nation's petition for "retrocession" was provided by the [Bellingham \(WA\) Herald](#) (10/21, 101K), the [Clark County \(WA\) Columbian](#) (10/20, 86K), the [Washington \(DC\) Times](#) (10/21, 344K), the [Spokane \(WA\) Spokesman-Review](#) (10/20, 183K), the [Native American Times](#) (10/21, 337), the [Law360](#) (10/21, 21K), [KNDU-TV Yakima \(WA\)](#) Yakima, WA (10/21, 3K), and [KUOW-FM Seattle \(WA\)](#) Seattle (10/21, 15K).

GILLETTE'S SERVICE IN OBAMA ADMINISTRATION PRAISED. In an editorial, the [Bismarck \(ND\) Tribune](#) (10/21, 37K) lauds Jodi Gillette's service in the Obama Administration. According to the paper, Gillette's "positions gave her a voice in a White House that has seemed genuinely concerned about Native American issues."

Office of Insular Affairs:

ASSISTANT SECRETARY KIA'AINA PROPOSES MARSHALLS FUND CHANGES. [Radio New Zealand](#) (10/21, 1K) reports that "a top US official has submitted a proposal to the Senate and House

to allow the people of Bikini to use resettlement and relocation funds outside of the Marshall Islands. Assistant Secretary for Insular Areas Esther Kia'aina says "it is an appropriate course of action to take regarding the welfare and livelihood of the Bikinian people." The Bikinians were "displaced by US nuclear weapons testing 70 years ago but are now looking at relocating again because of deteriorating conditions on Kili and Ejit Islands." According to the article, "in addition to cramped living quarters and a lack of suitable sustainable resources, the islands have been experiencing more frequent storms and king tides resulting in salt water inundation and the destruction of crops."

[Radio New Zealand](#) (10/21, 1K) reports that "a representative from Bikini Atoll says a proposal to allow people to use resettlement and relocation funds outside of the Marshall Islands is not wanted." Bikini liaison officer Jack Niedenthal says "the US should take full responsibility for any resettlement including providing extra financing." Niedenthal said, "We still got a ways to go, we still have to do some more lobbying and some more talking to people in Washington to make them understand that what's being proposed by the assistant secretary is what we view as 'Plan B'. It's not ultimately what we want in terms of helping our people."

CHINA STRENGTHENS RELATIONSHIP WITH PACIFIC REGION. The [Marianas Variety](#) (10/21) reports that "China and the Pacific Islands Forum Secretariat further strengthened their relationship on Friday when the two met at a ceremony to hand over \$1.05 million to assist the Pacific region." Forum Secretariat Secretary General Meg Taylor and Chinese Ambassador to Fiji Zhang Ping "attended the ceremony and delivered speeches respectively." Zhang "reiterated his nation's ongoing interest in the region saying, 'China attaches great importance to the South Pacific region. The Chinese side stands ready to enhance mutual understanding and cooperation with Pacific Island Countries and contribute to the development and capacity building in the region.'"

COUNTRIES IN PACIFIC URGED TO BEGIN TALKS ON CLIMATE MIGRATION. [Radio New Zealand](#) (10/21, 1K) reports that "all countries in the Pacific are being urged to start discussions on how to help people forced to move from low lying atoll nations like Kiribati and Tuvalu." According to the article, "184 million people worldwide were displaced by disaster between 2008 and 2014 and at special meetings in Geneva last week 110 countries gave the nod to a Protection Agenda for dealing with future migration challenges." The article notes that "the experiences of small island countries which face rising seas due to climate change helped form the global action plan under the Swiss Norwegian Nansen Initiative."

JOURNALIST SPEAKS AT UNIVERSITY OF GUAM ON CLIMATE ISSUES, CORRUPTION IN PACIFIC ISLANDS. The [Marianas Variety](#) (10/21) reports that "author and journalist Giff Johnson spoke to students at the University of Guam on Monday evening about climate change and development in the Pacific islands." Johnson's "lecture, entitled 'Idyllic No More: Pacific Island Climate, Corruption and Development Dilemmas,' is based on his latest book — a compilation of essays detailing the looming climate threat to the region, its booming fishing industry, and the U.S. nuclear test legacy in the Marshall Islands." Johnson called attention to "climate-driven migration from remote Pacific islands to Guam and mainland U.S."

RISING SEA LEVELS THREATEN KIRIBATI. The [National Geographic](#) (10/21, 31.65M) provides a picture gallery of the threat of rising sea levels driven by climate change on Kiribati.

Tackling America's Water Challenges:

WATER SCHEDULED TO BE RELEASED FROM NEW MELONES. The [Sonora \(CA\) Union Democrat](#) (10/21, 28K) reports that "more than 7 billion gallons of water is scheduled to be released from New Melones Reservoir beginning today to ensure flows in the Stanislaus River will keep temperatures cool enough for adult salmon migrating up the river to spawn this fall." Oakdale Irrigation District and South San Joaquin Irrigation District said "it would benefit river conditions and fisheries, as well as the needs of agriculture and more than 200,000 residential customers downstream." The article notes that "earlier this year, the irrigation districts sparred with the U.S. Bureau of Reclamation — which manages New Melones Reservoir — over spring pulse flows that they feared would leave as little as 147,000 acre-feet in the reservoir by the end of September."

SAN JOAQUIN COUNTY BOARD OF SUPERVISORS VOTE TO OPPOSE DELTA TUNNELS

PLAN. The [LOUI \(CA\) News-Sentinel](#) (10/21, 14K) reports that at a meeting on Tuesday, the San Joaquin County Board of Supervisors voted to adopt a resolution in formal opposition of California WaterFix, also known as the twin tunnels plan." Supervisor Kathy Miller said, "The WaterFix is just a thinly veiled version of the former (Bay Delta Conservation Plan) and continues to push the fatally flawed twin tunnels, which will simply sacrifice one region of California for the benefit of another."

Securing America's Energy Future:

Renewable Energy:

ENVIRONMENTALISTS, DOMINION BOTH SUPPORT OFFSHORE WIND DEVELOPMENT. On his [Bacon's Rebellion \(VA\)](#) (10/21, Bacon) blog, James Bacon reports on an Environment Virginia-sponsored webinar held Tuesday morning in which representatives from Dominion, environmental groups, and the McAuliffe Administration all voiced support for the utility's experimental offshore wind farm project. For environmentalists, Bacon writes, the project represents the beginning of an industry that would increase the use of green energy along the Atlantic and displace fossil fuels. For the Governor's office, it represents increased green energy coupled with economic development that takes advantage of the Newport News area's shipbuilding industry.

Onshore Energy Development:

CHESAPEAKE ENERGY FINED \$2.1 MILLION FOR UNDER-REPORTING NATURAL GAS. The [Greenwire](#) (10/20, Subscription Publication) reports that the Interior Department on Monday "announced a \$2.1 million civil penalty against Chesapeake Energy Corp. for misreporting the amount of gas it produced and sold from American Indian lands in Oklahoma." Chesapeake "failed to comply with a 2011 order that found 'systemic errors' in the company's monthly production reports for more than 100 Indian leases, according to Interior's Office of Natural Resources Revenue." The company "agreed to amend the monthly reports, but it continued to maintain inaccurate information on the agency's data systems, ONRR said." The firm was "assessed a penalty based on 'knowing or willful maintenance' of the inaccurate information, ONRR said."

Additional coverage was provided by [Politico](#) (10/21, 942K), [Natural Gas Intelligence](#) (10/21, Subscription Publication), the [Native American Times](#) (10/21, 337), and [KOKC-AM Oklahoma City \(OK\)](#) Oklahoma City (10/20, 1K).

TEXAS ENERGY REGULATOR OPPOSES STREAM PROTECTION RULE. [Law360](#) (10/21, 21K) reports that "Texas' top energy regulator on Tuesday said the agency will oppose a U.S. Department of the Interior proposed rule aimed at better protecting streams and other waterways from nearby mining activity, saying the regulation encroaches on ground better left to the state." Texas Railroad Commission Chairman David Porter on Tuesday said "the state would sign on to the multistate Interstate Mining Compact Commission's comments opposing the proposed waterway regulation."

USGS REPORT STATES EARTHQUAKES COINCIDE WITH OKLAHOMA OIL BOOMS. [KOCO-TV](#) Oklahoma City (10/21, 93K) reports that "a study by the United States Geological Survey states that the earthquakes from the past 100 years seem to coincide with the oil boom in Oklahoma."

OKLAHOMA REGULATORS SHUT DOWN THREE MORE DISPOSAL WELLS. The [EnergyWire](#) (10/21, Subscription Publication) reports that "Oklahoma oil and gas regulators dealing with a dramatic increase in earthquakes near the pipeline hub of Cushing have shut down three more disposal wells." Also, "another well was shut down by the company that owns it after regulators said they were concerned it was drilled too deep." In addition, "the operators of seven other wells were told in a letter written Friday and released yesterday that they must reduce the volume of drilling waste that they inject deep underground."

OKLAHOMA LIMITS DISPOSAL WELLS AMID CUSHING QUAKES. [Reuters](#) (10/21, Hampton, Brandes) reports that Oklahoma's oil and gas regulator on Monday said it could impose new limits on all saltwater disposal wells within a 10-mile radius of Cushing. Reuters reports that Oklahoma now experiences as many as two magnitude 3.0 quakes per day, up from two per year. Thirteen wells have been ordered shut and approvals for new wells have been halted, Reuters reports. Scientists

told Reuters that shutting wells could ease tectonic disruption in Oklahoma.

STUDY: FRACKING CAN CAUSE METHANE LEAKS IN NEARBY ABANDONED OIL WELLS.

[Reuters](#) (10/20, Valdmanis) reported that according to a study published Tuesday in the Water Resources Research journal, fracking can cause methane leaks in nearby abandoned oil wells. The methane leaks could be a large source of unrecorded greenhouse gas emissions, according to the study. The study said that energy companies could reduce the probability of such methane leaks by trying to identify abandoned wells before they begin fracking, although the task could be difficult due to large numbers of unmarked abandoned wells.

BLM CRITICIZED FOR FAILING TO PRODUCE PICTURES UNDER FOIA REQUEST. For the [Fairfield \(MT\) Sun Times](#) (10/21), Darryl L. Flowers criticizes the BLM for failing to provide pictures in connection with “the proposed Solenex, LLC natural gas well on public lands in the Lewis and Clark National Forest” that were requested under the Freedom of Information Act. The paper received “sixteen photos” and “two photos were missing.” He notes that “curiously, the two omitted photos were the only ones that included a person in the photos.”

Offshore Energy Development:

FEDS INVESTIGATE WORKER’S DEATH ON DRILLSHIP CONTRACTED BY CHEVRON. [Fuel Fix \(TX\)](#) (10/20, Dlouhy, 7K) reports that officials from the Bureau of Safety and Environmental Enforcement and the Coast Guard are investigating “the death of a worker on a drillship in the Gulf of Mexico that was preparing to bore a well for Chevron.” Fuel Fix says that “the Pacific Santa Ana drillship was just beginning operations for Chevron in about 4,800 feet of water at the site and had not yet penetrated the sea floor when an employee of that drilling contractor was fatally injured.” Fuel Fix adds that Chevron has a 36 percent working interest in the Keathley Canyon well-leasing block where the incident occurred, an area where “Chevron outlined ambitions to drill up to seven wells” earlier this year.

The [AP](#) (10/21) reports that Amy Roddy, spokeswoman for Pacific Drilling SA, the ship’s owner, “said the company is not releasing any details about the man to respect his family’s privacy. She also refused to disclose how the man died or details of the accident, citing an ongoing investigation.”

[NASDAQ](#) (10/20, Sider) reports that Chevron has contracted the ship since 2012. The [New Orleans Times-Picayune](#) (10/21, Larino, 718K) adds that “operations have been shut down and personnel remain onboard, according to the drillship’s operator.”

[Offshore Engineer](#) (10/20, Leon) reports that “the ship was to use its dual gradient drilling functions for Chevron’s Anchor-1 prospect last year in Green Canyon block 807, but the well was junked due to mechanical failures. However, in January of this year, Chevron hit high quality oil pay in multiple Lower Tertiary Wilcox Sands at a second Anchor well also drilled by the Pacific Santa Ana.”

The [Dow Jones Newswires](#) (10/21, Sider) reports that this is the first death related to offshore drilling operations in the Gulf of Mexico this year.

[Reuters](#) (10/21), [gCaptain](#) (10/21, 2K), [Upstream Online](#) (10/21, Schmidt, Brenner, 20K), and [Maritime Executive](#) (10/20, 21) also cover the story.

BRIARCLIFFE ACRES VOTES AGAINST OFFSHORE DRILLING. The [Myrtle Beach \(SC\) Online](#) (10/21, 36K) reports that “in a storm of debate over offshore drilling, Briarcliffe Acres surfaced as the latest coastal town to join a united front against seismic testing and drilling for oil and natural gas off of South Carolina’s beaches.” According to the article, “missing councilwoman Abby Stewart, who has been with family on the west coast, the town council unanimously passed a resolution Monday, joining 23 other S.C. coastal towns in a stance against offshore drilling.”

SHELL VESSEL RESCUES FRENCHMAN, CAT FROM SAILBOAT STRANDED IN SEAS NEAR ALASKA. The [AP](#) (10/21, Thiessen) reports that a Frenchman and the cat tucked inside his clothing were rescued on Tuesday after he leapt from his sailboat to a waiting rescue ship sent by Shell. The man activated a location beacon in the high seas south of Alaska and told the Coast Guard his sailboat had lost its rudder and rigging in the high winds and 20-foot waves. The Coast Guard

contacted Shell's oil drilling rig, the Polar Pioneer, which is on its way to Port Angeles, and the rig "sent a support ship, the Tor Viking, to rescue the sailor." The AP reports that "it wasn't immediately clear if the man would continue with the Shell ships to Washington state."

CUNNINGHAM: INTERIOR DEPARTMENT OFFICIAL SHUTS THE DOOR ON ARCTIC DRILLING.

In an analysis of the Interior Department's recent decision on the future of Arctic drilling, [Oil Price](#) (10/21, 2K) reporter Nick Cunningham writes the Interior Department's decision to cancel lease sales through 2017 "leaves almost no possible pathway for an oil company to drill in the Arctic for years to come, perhaps killing off drilling for a decade or so at a minimum." Cunningham goes on to write that "it was likely that there wouldn't have been new drilling in any event, given Shell's decision and current market conditions, but Interior's decision officially shuts the door on the Arctic in the medium-term."

Casey: Interior's Actions On Arctic Drilling Trends "Toward A Permanent Clampdown."

[CleanTechnica's](#) (10/20, 15K) Tina Casey writes that "in the absence of local regulations, the Feds are the only game in town and it seems that the Arctic's role in the US economy is too important to trust to compliance by oil companies." Casey adds that, even though the Interior's actions last week on Arctic drilling may be "only temporary, but the trend is toward a permanent clampdown."

4-Traders: Federal Government To Blame For Low Arctic Drilling Interest. In an op-ed piece on the Interior's Arctic drilling decision, [4-Traders](#) (10/21, 5K) writes the Federal government's "difficult" regulatory obstacles is to blame for the lack of interest among oil companies to explore for oil and natural gas in the Arctic. 4-Traders writes that the "demand for oil and natural gas isn't going away, so energy domestic exploration must continue in the Arctic and elsewhere. But as we've seen, by putting up unnecessary regulatory hurdles, regulators can cause job and economic growth opportunities to be missed."

America's Great Outdoors:

Bureau of Land Management:

BLM TO REVIEW HAGERMAN-HAILEY TRANSMISSION LINE. [Boise \(ID\) State Public Radio](#) (10/21) reports that the BLM will review the Hagerman to Hailey transmission line, paying "special attention to the greater sage grouse in the area." Stacey Baczkowski, a biologist with Idaho Power, says "the company has been working with the BLM for the last few years to make sure the line is built with the bird in mind." Baczkowski says "the power company plans to build the new transmission line as close to the current one as possible, and will follow BLM rules about construction during sage grouse mating times."

UTAH WATER DISTRICT RAISES CONCERNS ABOUT BLM REVISION TO LAND-USE PLAN.

The [Deseret \(UT\) News](#) (10/21, 407K) reports that "federal policies that either aim to instill more oversight of water or deny access altogether have some Utah leaders frothing over what they say is a repeated pattern of overreach that threatens local economies and livelihoods." Ron Thompson, general manager of the Washington County Water Conservancy District, said "possible revisions to a land-use plan by the Bureau of Land Management in Washington County have severe ramifications should one particular approach be adopted." Thompson said "the BLM — under one option — is ignoring key considerations that went into the passage of the bill, including water supplies being left unhindered and right of way corridors left intact."

ADDITIONAL COVERAGE: HELICOPTER CRASHES NEAR SEARCHLIGHT DURING CATTLE ROUNDUP. Additional coverage of the helicopter crash near Searchlight during a cattle roundup was provided by the [Las Vegas Review-Journal](#) (10/21, 378K).

Fish and Wildlife Service:

CONSERVATION LEADERS ATTEND NATIONAL CONSERVATION SUMMIT. [KYTV-TV](#)

Springfield, MO (10/21, 135K) reports that "more than 40 leaders from the leading conservation groups in America are meeting in Springfield this week for a National Conservation Summit hosted by The Johnny Morris Foundation." According to the article, "participants include the U.S. Fish and

wildlife Service, National Geographic, Audubon Society, and Ducks Unlimited. The article notes that “the purpose of the historic gathering is to collectively discuss opportunities to educate and engage the public in efforts to protect wildlife and natural habitats in preparation for the grand opening of America’s Wildlife Museum and Aquarium in 2016.”

The [Springfield \(MO\) News-Leader](#) (10/20, 49K) reports that “three exhibits of America’s Wildlife Museum & Aquarium, formerly Wonders of Wildlife, were open to media for a tour on Oct. 20, 2015 at the museum located next to the Bass Pro Shops flagship store in Springfield, Mo.” More than 40 conservation leaders attending a National Conservation Summit “hope the new Bass Pro Shops wildlife museum and aquarium will convey to visitors when it opens in mid 2016.” FWS Director Dan Ashe, “one of the summit attendees,” called the museum “one of the foremost conservation attractions in the world.” He said, “Through conservation efforts, we can be successful in sustaining these populations of animals that are threatened or endangered. People hear about the industrial-scale poaching of elephants that’s happening in Africa. That’s not hunting. With this museum, here’s an opportunity to tell the story of how we can protect wildlife habitat, and that when hunting is done well, with appropriate regulations, it sustains wildlife populations.”

Additional coverage was provided by [KOLR-TV](#) Springfield, MO (10/21, 6K), [KYTV-TV](#) Springfield, MO (10/21, 135K), and [KOLR-TV](#) Springfield, MO (10/21, 6K).

CNMI QUESTIONS INCLUSION OF SOME SPECIES ON ENDANGERED LIST. The [Radio New Zealand](#) (10/21, 1K) reports that “the Northern Marianas government says the decision to list 23 species in Guam and the CNMI as threatened or endangered was rushed.” The government says “it supports the US Fish and Wildlife Service’s listing of seven of the 17 CNMI species, but it questions the inclusion of some of the other species.” The Department of Land and Natural Resources says “a number of the species do not meet the definitions of threatened or endangered and don’t require federal protection.”

FWS LOOKS TO RESTORE HABITAT ON ROOT RIVER. The [Rochester \(MN\) Post-Bulletin](#) (10/21, 28K) reports that “federal wildlife officials are seeking public input on a plan to restore and enhance habitat on 825 acres of Minnesota land along the Root River in Houston County.” Managed by the FWS “as part of the Upper Mississippi River National Wildlife and Fish Refuge, the Root River Tract sits to the east of Hwy. 26 between La Crescent and Brownsville.” The article notes that “the site includes 664 acres of hunting and farmland purchased in 2009 with money from the Land and Water Conservation Fund.”

SHOOTING OF CALIFORNIA CONDOR IN ARIZONA UNDER INVESTIGATION. [Grand Canyon \(AZ\) News](#) (10/21) reports that FWS special agents and Arizona Game and Fish Department “law enforcement personnel are investigating the lethal shooting of an endangered California condor that occurred on the Kaibab Plateau in northern Arizona Oct. 8.”

MAN CLAIMS HE BLOCKED ARIZONA BIKE TRAIL TO PROTECT OWLS. The [AP](#) (10/21, 344K) reports that “the 81-year-old man who blocked a Flagstaff-area mountain bike race says he did it to protect an endangered owl species.” J.D. Protiva “appeared in federal court Monday on misdemeanor charges related to blocking the Elden Springs Trail before the August race.” Protiva says “the path goes through protected Mexican spotted owl habitat.”

ADDITIONAL COVERAGE: MONARCHS GET HELP AS CALIFORNIANS PLANT DROUGHT-TOLERANT MILKWEED. Additional coverage that monarch butterflies could benefit from the California drought was provided by the [Christian Science Monitor](#) (10/20, 455K), the [Albuquerque \(NM\) Journal](#) (10/21, 259K), [KABC-TV Los Angeles \(CA\)](#) Los Angeles (10/21, 413K), and [WRC-TV Washington \(DC\)](#) Washington (10/21, 345K).

FWS INVESTING IN PROJECTS TO STRENGTHEN ATLANTIC COASTAL DEFENSES AGAINST FUTURE STORMS. In an op-ed for the [New Haven \(CT\) Register](#) (10/20, 172K), Wendi Weber is Northeast regional director for the FWS, writes that “federal money for Hurricane Sandy recovery has spurred an unprecedented effort to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms.” She notes that the FWS and other Interior Department “agencies are investing \$787 million in hundreds of projects to clean up and repair damaged refuges and parks; restore coastal marshes, wetlands and shoreline; connect and open

waterways to improve flood control, and increase our scientific understanding of how these natural areas are changing.” According to Weber, “these investments support the goal of President Barack Obama’s Climate Action Plan to make communities more resilient to increasingly intense storms predicted with a changing climate.”

National Park Service:

MUSIC VIDEO CELEBRATES 100 YEARS OF NPS. The [New Bedford \(MA\) Standard-Times](#) (10/20, 53K) reports on “a locally made music video that celebrates 100 years of the National Park Service.” According to the article, “published on Oct. 15, the Centennial video has more than 18,500 views on the NPS facebook page and more than 530 on the Youth Ambassador Program’s YouTube page, the group that made it.” NPS Director Jon Jarvis, “who met the traveling crew in Washington, D.C., makes a cameo appearance in the video to say, ‘It’s great to celebrate a hundred years with YAP!’”

Kentucky Lieutenant Gov. Lualien Touts National Parks. The [Louisville \(KY\) Courier-Journal](#) (10/20, 414K) reports that Kentucky Lieutenant Governor Crit Luallen on Tuesday “touted the economic impact of Kentucky’s travel and tourism industry” in “an address to the Kentucky Travel Industry’s annual conference in Bowling Green.” Following her remarks, Luallen “recognized five national parks in Kentucky as part of the National Park Service Centennial in 2016.” She “presented proclamations to representatives of the parks.”

Couple Visiting 59 National Parks In 12 Months. The [Cleveland Plain Dealer](#) (10/21, 1.03M) reports that “Cole and Elizabeth Donelson, St. Louis natives, are two months into their grand adventure: 59 parks in 12 months – part celebration of the National Park Service’s 100th anniversary, part exercise in youthful spontaneity.” Their goal is to “see the best of the United States, and inspire others – particularly other millennials – to do the same.” The article notes that “their mission meshes well with a new campaign of the Park Service, which celebrates its centennial anniversary in 2016.”

WATCHDOG RELEASES REPORT ON NPS CONSTRUCTION FUNDS. The [Greenwire](#) (10/20, Subscription Publication) reports that “a federal watchdog yesterday released a disputed report alleging that the National Park Service is violating congressional intent by dipping into its construction account to cover security, air testing and other reimbursable expenses that should have been paid up front by other agencies.” The NPS construction account is “only for expenses that relate to ‘construction, improvements, repair or replacement of physical facilities,’” the Department of the Interior’s Office of Inspector General report said, “citing the language of the agency’s appropriation.” However, “the OIG found that 17 out of a sample of 21 interagency agreements that used Park Service construction funds to cover reimbursable costs did not appear to include ‘a valid construction purpose.’” The article notes that “these included \$4.9 million that NPS spent from its construction account on security at the Department of the Army’s Memorial Day and Independence Day concerts at the Capitol in 2014 and \$37.5 million over seven years on air quality monitoring at national parks that will be paid back to NPS by U.S. EPA.”

HOUSE COMMITTEE PASSES GRAND CANYON BISON MANAGEMENT ACT. [Grand Canyon \(AZ\) News](#) (10/21) reports that the U.S. House Natural Resources Committee approved the Grand Canyon Bison Management Act “allowing the Arizona Game and Fish Department (AZGFD) to better manage and conserve the bison population within the park Oct. 8.” The legislation “requires the U.S. Department of Interior and the Arizona Game and Fish Commission to coordinate on a plan that allows sportsmen holding a valid state-issued hunting license to assist in management of the bison population within the park.”

THUNDERSTORMS CAUSE FLOODING, MUDSLIDES IN DEATH VALLEY NATIONAL PARK. The [Greenwire](#) (10/20, Subscription Publication) reports that “mudslides and flooding after severe thunderstorms in Death Valley National Park on Sunday trapped three park rangers and about 20 visitors – many out to see a clear night sky – in a volcanic crater overnight.” Park spokeswoman Abby Wines said “the stranded people spent the night in Ubehebe Crater, maintaining contact with park headquarters until they were able to reach safety yesterday morning.” The article notes that “no injuries were reported, but Wines said the unexpectedly severe storms knocked out power in the area, damaged and closed several roads, and filled a historic visitor’s center with several feet of mud and debris.”

NPS SET TO CONTINUE WITH TREE-CUTTING AT POTOMAC CAMPGROUND. The [Bethesda \(MD\) Magazine](#) (10/21) reports that “after complaints from two nearby residents and a call from County Council member Roger Berliner temporarily halted tree-cutting operations Friday at a Potomac campground, the National Park Service said it plans to resume the tree-cutting and will probably do so in the next few days.” John Noel, deputy superintendent for the C&O Canal National Historical Park, said that “he went to the Swain’s Lock Recreation Site to examine the 26 trees proposed to be removed and 32 others proposed to be pruned at the site’s campground.” Noel “agreed that the trees are rotting and in danger of falling on park users below.”

STUDENTS GO ON CANOE TRIP AROUND WOLF LAKE. The [Merrillville \(IN\) Post-Tribune](#) (10/20, 105K) reports that “all classes in Grades 6 through 9 at George Rogers Clark Junior-Senior High School in Hammond recently experienced a unique field trip right in their own back yard — a canoe trip around Wolf Lake located only a few blocks from the school.” The trip was “made available through a partnership with the National Park Service, Dunes Learning Center and Wilderness Inquiry.”

NEW COLONIAL PARK SUPERINTENDENT THANKS COMMUNITY FOR ADVOCACY. The [Newport News \(VA\) Daily Press](#) (10/20, Williams, Subscription Publication, 201K) reports that the Colonial National Historical Park’s new Superintendent, Kym Hall, thanked the community for its opposition to Dominion’s Skiffes Creek transmission project in her first appearance before the York County Board of Supervisors on September 1. “The view should be protected,” she said.

DEVILS TOWER TO HOST STAR VIEWING PARTIES. The [Casper \(WY\) Star-Tribune](#) (10/21, 115K) reports that the NPS “announced that Devils Tower will host a series of star viewing parties October through December.” The article notes that “the eight parties are free of charge, and will last approximately two hours.”

NPS URGED TO RECONSIDER RACIST NAME FOR A WASHINGTON LAKE. In an op-ed for the [High Country \(CO\) News](#) (10/21, 74K), Glenn Nelson writes that Washington state officially calls Howard Lake “by what is believed to be its oldest known name,” but he federal government “recognizes the lake by a name that causes the jaws of most people of color to drop: Coon Lake.” Nelson notes that “the federal government did not follow the usual course of supporting the state’s action, mostly because of opposition from the National Park Service, which manages the area that contains the lake.” The NPS, “acting on research from its North Cascades unit, originally defended its stance by claiming that there was ambiguity around the use of the term ‘coon.’” According to Nelson, “in the years leading up to its 2016 centennial, the Park Service has done a lot of talking and writing about the need for diversity and inclusiveness.” He concludes that “it’s past time for the Park Service to back away from its misguided opposition, encourage Secretary Jewell to come to its rescue, and allow another black life to matter.”

US Geological Survey:

USGS SEISMOLOGIST QUESTIONS PREDICTION OF 99.9 PERCENT CHANCE OF MAJOR LOS ANGELES EARTHQUAKE IN 3 YEARS. The [Southern California Public Radio](#) (10/20, 68K) reports that “a controversial new study from NASA’s Jet Propulsion Laboratory” claims “there is a 99.9 percent chance of an earthquake” in Los Angeles “between magnitude 5 and 6.3 in less than three years.” The study, published earlier this month by the American Geophysical Union’s Earth and Space Science journal, has “taken many in the seismic community by surprise.” Lucy Jones with the USGS said the “methodology doesn’t fully explain the prediction, and the study doesn’t adequately address this either.” Jones said that, according to the USGS’ “models, there is only an 85 percent chance of a magnitude 5 or 6 quake in the same region over a three-year period.”

Top National News:

MEDIA ANALYSES: TRUDEAU’S ELECTION LIKELY TO FOSTER IMPROVED US-CANADA TIES. On the day after Justin Trudeau became Canada’s Prime Minister-designate, media reporting universally characterized the election results as a likely boost for US-Canada relations. Coverage focuses on Trudeau’s promise of a less combative foreign policy style and the perception that he will be more willing to accept a US rejection of the Keystone pipeline. Reporting – including a combined 2

minutes and 30 seconds on the three broadcast networks – also indicates that despite Trudeau's decision to withdraw his aircraft from the US-led coalition against ISIL, he is likely to be a more willing partner on climate change and other issues.

[ABC World News](#) (10/20, story 9, 0:20, Muir, 5.84M) reported President Obama on Tuesday congratulated Trudeau, who “swept into power with a message of optimism saying Canada beat fear with hope.” [USA Today](#) (10/21, Korte, 5.23M) reports Obama made the phone call “in an attempt to lock down continued cooperation with the northern neighbor on trade, terrorism, and climate change.” The White House, according to USA Today, “signaled that not much would change in the relationship” between the neighbors following the Liberal party's victory. [CBC News](#) (10/20, Fitzpatrick, 225K) reported on its website that the White House indicated Obama and Trudeau “agreed on the importance of deepening the ‘already strong’ bilateral relationship” between the countries “and committed to strengthen joint efforts to promote trade and to combat terrorism and climate change.”

[AFP](#) (10/21) reports the White House and current Prime Minister Stephen Harper “clashed over climate policy” and the Keystone pipeline. While White House spokesman Josh Earnest on Tuesday said “it would be shortsighted to reduce the relationship between our two countries to just one issue,” Chuck Todd reported on [NBC Nightly News](#) (10/20, story 5, 2:05, Holt, 7.86M) that “we now have a Canadian government that is politically more in line with the American government.” According to Todd, “Relations have been good but they have not been so great of late. Will they now get better? That is why Americans should care.”

In an article entitled “5 Reasons The US Should Care About Canada's New Prime Minister,” [USA Today](#) (10/21, Hjelmggaard, 5.23M) lists ways in which Trudeau “is likely to affect policies in Canada and the United States.” According to USA Today, Trudeau “promised to improve strained relations” with Obama and said “he wants to find constructive ways of working with Washington on other issues.” Another [USA Today](#) (10/21, Kovac, 5.23M) article reports that Trudeau and Harper “differ in their approach to foreign policy,” with the incoming leader being less vocally pro-Israel and more focused on environmental issues.

In an analysis piece, [Bloomberg News](#) (10/21, 2.66M) says “a prompt rejection” of the Keystone pipeline by Obama “would make the job easier” for Trudeau “as he seeks to reset the country's relationship with the US, which he says was damaged” by Harper. According to Bloomberg, Trudeau “could use a quick US denial” of the pipeline “to focus discussions” with Obama “on issues such as trade and climate.” Bloomberg notes there has been “speculation” that Obama “would reject the pipeline shortly after the Canadian election.” However, [The Hill](#) (10/20, Cama, 471K) reported, Secretary of State Kerry said Tuesday that Canada's election results will not change the White House's approach to the Keystone issue. Kerry said the decision “is being based on the merits and countervailing balance of all the input that has come from a very exhaustive agency review.” Kerry reiterated that he seeks a decision “as fast as possible.”

[Reuters](#) (10/21, Mason, Rampton) reports the White House indicated it would like the new Canadian government to take increased actions to address climate change. Earnest said that while Canada has “made a substantial and important commitment” ahead of the Paris climate talks, “We believe that it's possible that there is more that Canada can do in this regard.”

However, writing for [Mother Jones](#) (10/20, 758K), Suzanne Goldenberg claimed “those hoping for a U-turn in Canada's climate change policy...are in for a reality check.” According to Goldenberg, while Trudeau does not align directly with many of Harper's views or policies, “it would be a mistake” to see the new Canadian leader or his party “as climate champions.” In [Slate](#) (10/20, 1.38M), Joshua Keating argued that at least with regard to the Keystone pipeline, Trudeau does present a change from Harper. Keating characterizes Trudeau as “a very different leader” from Harper and says he will make the Keystone pipeline less of a focal point of US-Canada relations. According to Keating, Trudeau “has described his support for the pipeline as ‘steadfast,’ but it's clearly not the make-or-break issue for him that it was for Harper.”

The [Wall Street Journal](#) (10/21, Vieira, Subscription Publication, 5.95M) reports Trudeau said he will work to restore Canada's reputation of defending minorities and become more involved in multilateral policy making. At a rally in Ottawa, Trudeau said, “To this country's friends around the world, I want to say this: Many of you have worried Canada has lost its compassionate and constructive voice in the

world over the past 10 years. I have simple message for you. we're back. The [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) similarly reports that Trudeau "is likely to present a very different face to the world" than Harper, "but the most noticeable difference will probably be in tone." Trudeau has vowed to "put an end to Mr. Harper's often belligerent style of politics and diplomacy." Trudeau said Tuesday that "a positive, optimistic, hopeful vision of public life isn't a naïve dream – it can be a powerful force for change." The Times says Trudeau has previously indicated a desire to end Harper's reliance on military solutions and tough rhetoric, and instead focus on working within international organizations, such as the United Nations.

The [CBS Evening News](#) (10/20, story 10, 0:25, Pelley, 5.08M) reported, "Canada took a left turn" as "Trudeau and the Liberal Party rode in on a landslide." In a [USA Today](#) (10/21, 5.23M) op-ed, author David Andelman says "most of the reasons" Canadian voters chose Trudeau to lead the country "boiled down to one fundamental: The Liberal Party leader was simply nicer than his opponent. And most Canadians believe they are, too." Similarly, the [Wall Street Journal](#) (10/21, Subscription Publication, 5.95M) editorializes that Canadians wanted a change from the Harper government, which had become isolated and sought to restrict debate. The [New York Times](#) (10/21, Subscription Publication, 11.82M) agrees, editorializing that Trudeau's election "shows how ready Canadians were to emerge from a decade under the Conservative government of the secretive and combative Stephen Harper."

[AFP](#) (10/21) reports Trudeau told Obama on Tuesday that Canadian fighter aircraft will withdraw from the US-led coalition against ISIL, but the new Canadian leader did not present a timeline for the move. In a front-page story, the [Washington Post](#) (10/21, A1, Brown, 6.76M) reports Trudeau said, "I committed that we would continue to engage in a responsible way that understands how Canada has a role to play in the fight against ISIL," adding, that Obama "understands the commitments I've made around ending the combat mission." According to the Post, a "senior Administration official," said Obama and Trudeau discussed joint anti-terrorism efforts and, "We expect Canada will continue to be a valuable contributor to the 65-member global coalition" against ISIL.

Trudeau's Win Could "Lead To Full Marijuana Legalization" In Canada. [USA Today](#) (10/21, Hughes, 5.23M) reports Trudeau's win "may lead to full marijuana legalization" for Canada. According to USA Today, Trudeau promised during his campaign that "Canada would create a system to tax, regulate and sell marijuana, along with stiff penalties for anyone giving pot to children or caught driving while stoned." USA Today says American "cannabis activists hailed Tuesday's election as a milestone, suggesting that a day may soon come when cross-border trade talks include...legal weed."

[AFP](#) (10/21) reports Trudeau's "promise to legalize recreational cannabis" will likely "help the nation's nascent medical marijuana industry." Investors, according to AFP, "are betting" they could build on companies' current production of marijuana for medical use and "quickly scale up to serve recreational pot users too, once Trudeau makes good on his promise."

NYTimes Analysis: Trudeau Is "No Dynast" Despite Father Being Former Prime Minister. In a 1,350-world profile piece, the [New York Times](#) (10/21, Austen, Subscription Publication, 11.82M) reports that despite there being "many easy parallels to draw between" Trudeau and his father, former Prime Minister Pierre Elliott Trudeau, Canada's incoming leader "is no dynast who slipped effortlessly into a family political machine." The Times notes that Trudeau "did not even enter politics until 18 years after his father gave it up, and seven year after his father's death." According to the Times, Trudeau "built his own cadre of advisers, mostly from his own generation" and sometimes "chose more difficult roads – partly, it appears, to show he had not been handed a life in politics on a platter."

In the [Washington Post](#) (10/21, 6.76M) "Reliable Source" blog, Emily Heil says Trudeau and his wife, Sophie Grégoire-Trudeau, "have a lot in common with the Obamas." According to Heil, "they'd have lots to talk about, apart from liberal politics, like fitness!"

IN APPARENT REVERSAL, BIDEN SAYS HE PRIVATELY URGED OBAMA TO AUTHORIZE UBL RAID. Vice President Biden did not reveal Tuesday whether or not he will enter the Democratic presidential race, but his remark that he privately advised President Obama to launch the 2011 raid that led to the death of Osama Bin Laden – which contradicted Biden's past public comments that he advised against the raid – is being interpreted as a possible line of attack against Hillary Clinton. All

three broadcast networks reported on the statement, combining for nearly eight minutes of coverage, and ABC led with it. The tone of the coverage is mixed, with most reports calling it a reversal, and some concluding that Biden may be undercutting his own reputation for candor.

There was also Twitter discussion of Biden's remarks. Anthony De Rosa, a digital producer for The Daily Show who has nearly 89,000 followers, [tweeted](#), "Biden sounds like Brian Williams with his evolving recollection of the Bin Laden raid." Jonathan Martin of the New York Times [tweeted](#), "@vp today signals: he'll run & it'll get negative FAST or: he's not happy about being sidelined." His Times colleague Maggie Haberman [tweeted](#), "Biden's subtle digs at Clinton indicate that if he runs it'll be ugly." In addition, the hashtag [#BidenWatch](#) emerged on Twitter, with Fox Business Network's Trish Regan [tweeting](#), "Sure sounds like he's running...", Mashable's Juana Summers [tweeting](#) Biden's Wednesday official schedule, and Al Jazeera America's David Shuster [tweeting](#) that "Hallie Biden, widow of the late Beau Biden, says her family supports a Presidential campaign '100%'".

[ABC World News](#) (10/20, lead story, 2:50, Muir, 5.84M) reported that "as the pressure mounts for Joe Biden to decide whether he'll run...many [are] now asking, did he change his story?" ABC (Karl) added, "Biden has described Obama's decision as especially courageous because in that key meeting when it came time to decide, most of the President's advisers, including Biden himself, were not in favor of the raid." On Tuesday, he "offered an entirely different account of what happened on that fateful day." Biden was shown saying, "So as we walked out of the room and we walked upstairs, I told him my opinion that I thought he should go but to follow his own instincts. But it would have been a mistake, imagine if I had said in front of everyone, 'don't go, or go,' and his decision was a different decision." Karl: "But until today, Biden has said he told Obama and his team that night to hold off on the raid."

The [CBS Evening News](#) (10/20, story 6, 2:05, Pelley, 5.08M) reported that Biden "sounded more like a presidential candidate, talking up his foreign policy credentials, doing some rewriting of his own history and firing a shot over the bow of the Democratic frontrunner." CBS' Nancy Corden added that Biden "never mentioned" Clinton by name, "but it was all too clear the comparison he was making when he said this about his stature overseas." Biden: "I will get sent to go speak to Putin or go speak to whomever, and it's because the secretary of state, we've had two great secretaries of state, but when I go, they know that I am speaking for the President." Cordes added that Biden left Clinton "out of his story" about the Bin Laden raid.

Murkowski Spells Out Uphill Climb For Interior Nominee

[Politico Pro](#), October 20, 2015

The Senate Energy and Natural Resources Committee chairwoman said that Interior Department pick Kristen Sarri would have a lot of explaining to do at a hearing on six nominees today. "We've seen decisions out of the Interior that are really destroying our hope to be independent as a state," Sen. Lisa Murkowski said at the nomination hearing, which included candidates for the USGS, and the departments of Energy and Interior. Sarri has been nominated to be the Interior assistant secretary for policy, management and budget. While she was pleased that President Barack Obama had renamed Mount McKinley this summer to Denali, the Alaska Republican said she was still frustrated with the Interior Department's "heartless decision" to deny a road in King Cove. She also criticized Interior for closing off oil production in Alaska and last week's cancellation of offshore sales and lease extension.

'Playing Games': Obama Backs 'Politicized ... Trivial' Nominee For Essential Spot He Left Empty For 6 Years

By Ethan Barton

[Daily Caller](#), October 21, 2015

A Senate committee chairwoman is torn between leaving the Department of the Interior's independent watchdog post vacant, or confirming President Barack Obama's nominee crippled by recurring allegations of "playing games with Congress."

"I strongly believe that Interior needs a permanent [inspector general], and I'm disappointed the administration has let the position go unfilled for six and a half years," said Sen. Lisa Murkowski. The Alaska Republican is chairwoman of the Committee on Energy and Natural Resources.

"But I am also committed to ensuring that the individual we confirm is fully independent ... The tenure that you have been involved with thus far in this position has been marked by controversy."

Obama nominated Mary Kendall for the Interior Department's Inspector General on June 4. She has been both the acting and deputy IG since 2009.

Public Employees for Environmental Responsibility – a non-profit activist group – said Kendall "politicized" investigations, "focused on trivial matters," "kept IG operations secret," and should not be confirmed as a permanent head, The Daily Caller News Foundation reported last week.

Wyoming Republican Sen. John Barrasso said an IG report critical of the Office of Surface Mining wasn't publicly released until Dec. 20, 2013 – 10 months after it was completed, and three days after Congress confirmed an Interior appointee to oversee that agency.

"It looks as though you're playing games with Congress," Barrasso said.

But Kendall said she didn't "recall the details. It sounds wrong. I would hope that there's a meaningful explanation."

Louisiana Republican Sen. Bill Cassidy

Public Employees for Environmental Responsibility – a non-profit activist group – said Kendall "politicized" investigations, "focused on trivial matters," "kept IG operations secret," and should not be confirmed as a permanent head, The Daily Caller News Foundation reported last week.

Wyoming Republican Sen. John Barrasso said an IG report critical of the Office of Surface Mining wasn't publicly released until Dec. 20, 2013 – 10 months after it was completed, and three days after Congress confirmed an Interior appointee to oversee that agency.

"It looks as though you're playing games with Congress," Barrasso said.

But Kendall said she didn't "recall the details. It sounds wrong. I would hope that there's a meaningful explanation."

Louisiana Republican Sen. [crscore]Bill Cassidy[Lisa"> also said the IG was doing favors for the Interior Department, rather than holding it accountable, in instances where it refused to hand reports over to Congress.

"I have been true to myself, my principles, my best judgment, and the law," Kendall said. "My personal style, to engage in civil discourse even when addressing difficult issues, has been criticized by some as being too accommodating of the Department of the Interior. Civility, in my experience, however, is not an accommodation, but rather, a strong and effective tool in communicating with and holding DOI accountable."

Murkowski said "while we expect that the IG always to approach her work with civility, she must never compromise her independence."

"If you are ... breaking bread ... It seems that you have set yourself up for a conflict of interest," said Cassidy.

"Having the benefit of 20/20 hindsight, I may have made some of those decisions differently," Kendall said.

Kendall also claimed multiple accomplishments, including "195 convictions, \$4.5 billion in criminal fines, penalties and restitution, over \$119 million in questioned costs and \$55 million in funds put to better use. On average over the past five years, the [IG] for DOI ranked fifth for Return-on-Investment among the 72 Federal OIGs."

House Committee on Natural Resources Republicans also reported Kendall's politicization in 2013.

"Acting Inspector General Kendall and Chief of Staff Stephen Hardgrove have blurred the line between being an independent watchdog and serving as an informal advisor and collaborator on Department policy initiatives," the report said.

"The president should not delay any further in acting to nominate someone who can serve as the independent watchdog the department deserves and who does not have the questionable history and judgment Ms. Kendall has brought to the position."

Top Republican Skeptical Of Obama Interior Nominees

By Devin Henry

[The Hill](#), October 21, 2015

A leading Republican on Tuesday raised concerns over two of President Obama's nominees for the Department of the Interior.

Sen. Lisa Murkowski (R-Alaska) said President Obama's pick to serve as an assistant secretary of the Interior, Kristen Joan Sarri, faces a high bar to winning her support, given what she considers the department's detrimental work in Alaska.

"If you're an Alaskan and you're reading the headlines, you have to wonder: What's going on within Interior? Why do they have it out for us?" Murkowski said during an Energy and Natural Resources Committee hearing on Tuesday.

"You're going to need to convince me that you are part of the solution and not part of the problem for Alaska at the Interior Department," she said to Sarri.

Murkowski, the chair of the committee, asked Sarri what role she played in last week's Interior Department decision to cancel oil drilling lease sales in the Arctic Ocean during the next two years, something she said was "an incredible blow and a hit to the state of Alaska."

Sarri said she wasn't involved in those decisions and that she wouldn't have a role in future leasing decisions in the position for which she is nominated.

"Alaska is incredibly important to energy development in this country and the safe and responsible development in the Arctic is part of that," she said.

Murkowski also hinted Mary Kendall, the Interior Department inspector general nominee, will face a tough confirmation fight in the Senate given concerns over her work as the acting inspector general (IG).

"I strongly believe that Interior needs a permanent IG, and I'm disappointed the administration has let the position go unfilled for six and a half years," she said.

"I'm also committed to ensuring that the individual that we confirm is fully independent, with good judgement in difficult situations and a firm grasp of the responsibilities of the Inspector General."

Kendall has had several dust-ups with House Republicans, who have accused her of not investigating political appointees and failing to file investigative reports on issues within the department.

She defended herself on Tuesday, noting that the Interior Department's Office of the Inspector General (OIG) is ranked among the top five federal OIGs in return-on-investment during her tenure. She said that she has met with committee members to go over House Republicans' concerns.

"Whether I have done so to your individual satisfaction, I do not know," she said. "What I do know is that throughout, I have been true to myself, my principles, my best judgment and the law."

The Energy and Natural Resources Committee heard from six Obama nominees on Tuesday. Other Republicans pushed Kendall, Sarri and others on their qualifications and their positions, but Democrats were widely receptive of the slate of nominees.

"We are very fortunate, I believe, to have six highly qualified and experienced nominees in front of us," said Sen. Maria Cantwell (D-Wash.), the ranking member of the committee.

Murkowski's Irate, Interior Nominee Heard All About It

[KTOO-FM Juneau \(AK\)](#), October 20, 2015

Sen. Lisa Murkowski has a pretty big gavel to pummel the Department of the Interior with as chairman of the Energy and Natural Resources Committee, which oversees the department. Nominees for high office at DOI and other departments have to clear her committee before Senate confirmation.

With three nominees from DOI and three from the Department of Energy before her, Murkowski wasn't shy Tuesday morning in tying the nominees to their bosses and declaring favorites. The senator says she likes Energy Secretary Ernest Moniz.

"He works with us. He listens to us. I think he deserves to have a team in place to support him," Murkowski said. "Unfortunately, I'm not able to say the same when it comes to the secretary of the Interior."

Murkowski homed in on Kristen Sarri, the nominee to be assistant secretary of the Interior for Policy, Management and Budget. Murkowski went through a list of her complaints about the department, such as: Not opening enough of the National Petroleum Reserve-Alaska to exploration, being slow with permits, the "heartless" denial of an emergency road for King Cove, and, most recently, the decisions on offshore Arctic leases. Murkowski says the department created a "deteriorating regulatory environment" that thwarts development and was a factor in Shell's decision to give up on Arctic drilling.

"So if you're an Alaskan and you're reading the headlines, you have to wonder, what's going on within Interior? Why do they have it out for us?" the senator said.

Sarri, who is already working in the policy office at Interior, says the department isn't against Arctic development.

"Let me just first start by saying, really quickly that Alaska is incredibly important obviously to energy production in this country and the safe and responsible development in the Arctic is an important part of the picture," Sarri said.

Murkowski told her that's not evident from the administration's actions.

"I was not involved in either of the decisions announced on Friday," Sarri said, referring to the cancellation of Arctic lease sales and the refusal to extend existing leases held by Shell and other companies.

Sarri says the offshore leasing decisions came from the Bureau of Ocean Energy Management and the Bureau of Safety and Environmental Enforcement, which are in Interior but lower down the organizational chart. Murkowski pressed on, and Sarri continued to say she wasn't responsible for the actions Murkowski objects to.

Dozens of nominations are pending in Congress. Senators sometimes hold them hostage by the fistful to extract concessions from a president. Murkowski didn't say whether she'd block anyone.

Even if she did put a hold on Interior nominations, Sarah Binder, a senior fellow in Governance Studies at the Brookings Institution, says it's unlikely to cause the Obama administration to reverse course. But, Binder says, by voicing her opposition, Murkowski does plant a flag on the issue.

"She's taking a position, right?" Binder says. "And senators get rewarded for being on the right side of issues, even if they can't get the outcome that they want."

A Murkowski spokesman says the senator will wait for more information before deciding how to vote on Sarri's confirmation.

A Murkowski spokesman says the senator will wait for more information before deciding how to vote on Sarri's confirmation.

'New Chapter In Trust': Historic \$186 Million Settlement Reaffirms Sovereignty, Tribes Say

[Indian Country Today Media Network](#), October 20, 2015

Tribes and the U.S. Department of the Interior heralded the outcome of a \$186 million settlement signed earlier this month between the federal government, the Choctaw and the Chickasaw nations to solve a longstanding land trust dispute as a new chapter in relations.

"This settlement represents a significant milestone in helping solidify and improve our relationship with the United States," said Chickasaw Nation Governor Bill Anoatubby in a statement during the October 5 signing ceremony that also gave a nod to the impetus provided by U.S. Secretary of the Interior Sally Jewell. "We respect the vital role Secretary Jewell has taken in helping make this historic settlement a reality. We are confident she will play an essential role in our efforts to continue strengthening the relationship between our governments, because we believe she has a unique appreciation for the mutual benefits of a positive government-to-government relationship."

Jewell indicated as much by greeting the crowd, many of them wearing traditional attire, with the Choctaw "Halito!" which "spoke to her empathy and support of American Indian issues and people," the Choctaw Nation said in a release describing the signing ceremony.

Anoatubby and Choctaw Chief Gary Batton were both on hand on Tuesday October 6 to sign a historic \$186 million settlement between the two tribes and the U.S. Department of the Interior. The agreement resolved a lawsuit that took issue with the way the federal government had managed the tribes' trust resources, according to a statement from the Chickasaw Nation. The Chickasaw Nation will receive \$46.5 million of the \$186 million settlement, with the balance going to the Choctaw. In their case the tribes alleged that the U.S. mismanaged 1.3 million acres of timberlands belonging to the Chickasaw and Choctaw Nations. The agreement ends all litigation and was inked at the Choctaw Event Center in a ceremony that capped a two-day visit Jewell to both nations on October 5 and 6.

RELATED: Choctaw and Chickasaw Receive \$186 Million in Historic Land-Trust-Management Settlement

"Today's agreement is the latest addition to a record number of longstanding settlements resolved under this Administration," Jewell said in a DOI statement after the signing. "This historic settlement is the start of a new chapter in our trust relationships with the Chickasaw and Choctaw Nations, and underscores our commitment to fulfilling those responsibilities to Native communities across the country."

Batton, too, spoke about the improvement in relations stemming from visits by Jewell and President Barack Obama.

"This visit marks the start of a revitalized relationship with the United States," said Batton in the tribes' statement. "Secretary Jewell's presence here, coming soon after President Obama's recent visit, also serves to reaffirm that the foundation of this relationship is government-to-government."

Batton emphasized the nature of the relationship as well.

"I am appreciative of having a sovereign-to-sovereign relationship between the Choctaw Nation and the U.S. Government," he said. "It is also historic that these three sovereigns have agreed to a settlement of the timber trust account case."

The case was first filed in 2005 but reached back more than 100 years to just before Oklahoma became a state. That's when the U.S. government took control of more than a million acres of Chickasaw and Choctaw tribal lands, the Choctaw Nation explained in its media release describing the events of the day.

"The U.S., as federal trustee, held those lands in trust for the benefit of the Nations," said the Choctaw in its statement. "In December 2005 the Nations filed suit in U.S. District Court seeking a long overdue accounting of the federal trustee's management of those resources and an equitable restoration of the value of that trust."

The \$186 million will be divided between the two tribes based on treaty agreements, with the Choctaw receiving 75 percent, or \$139.5 million, and the Chickasaw the other 25 percent, or \$46.5 million.

Both Batton and Anoatubby said the proceeds would be invested in education and other endeavors.

"We plan for the proceeds to be invested in our people—expanding education, creating jobs and promoting economic development and culture, as well as a portion to be invested in a sustainability fund for the future of our Citizens," Batton said.

Anoatubby had announced the settlement to members in his State of the Nation Address on October 3.

"Our portion of the funds will be carefully invested and the returns used for activities that improve the overall quality of life of all Chickasaws," said Anoatubby in the address.

He, too, added that the settlement was about more than money.

"Perhaps more important than the actual dollars, this settlement turns the page," said Anoatubby. "It represents the United States' acknowledgement of its mistreatment of the Chickasaw Nation and American Indians of Indian Territory during those early decades of the twentieth century. We continue to actively protect and defend our sovereignty, but we will continue to strive to improve our working relationship with the government and its agencies and agents."

U.S. Treasury Confirms \$20B Balance For LWCF, But Is It Real?

[E&E Publishing](#), October 21, 2015

The Land and Water Conservation Fund that expired earlier this month for the first time in its 50-year history currently contains nearly \$20 billion, according to the U.S. Treasury, which maintains the program's balance sheets.

Whether that is "real" money available to be spent on federal land acquisitions, private land easements and state recreation projects depends on whom you ask.

But the money – collected mostly from offshore oil and gas lease rentals and royalty receipts – does exist, according to the Treasury.

The \$19.8 billion balance also includes a relatively small amount of revenues from the sales of surplus federal property and the motor boat fuels tax, Treasury said.

There's been significant debate over how LWCF's expiration on Sept. 30 will affect the program's funding.

Advertisement

This much is undisputed: Money from offshore drilling is now going directly into the general Treasury rather than LWCF. That means the \$19.8 billion can only be reduced until Congress reauthorizes the program.

What is less clear is how the program's expiration will affect appropriators' willingness to fund it.

Despite LWCF's expiration, it is still being funded at approximately \$300 million a year under the continuing resolution. While it is authorized at \$900 million, the program has rarely been appropriated at that level.

Democrats, certain pro-LWCF Republicans and conservationists say reauthorization is urgent, warning that the program has been disconnected from its main funding source – oil and gas. The premise in enacting the fund in 1965 was to use revenue from the depletion of one natural resource to permanently protect other scenic and ecologically rich resources.

But those who favor reforming LWCF – arguing a greater portion of money should go to states or that some portion should be used to maintain existing federal lands – say there's no rush to reauthorize it.

They cite the \$20 billion. LWCF has collected roughly \$37 billion since 1965 but less than half has been appropriated, according to a Congressional Research Service report.

"When we wake up tomorrow, after allowing LWCF's authorization to expire, nothing will have substantively changed," Sen. Mike Lee (R-Utah) said in a floor speech in late September before blocking a motion to extend LWCF by unanimous consent.

House Natural Resources Chairman Rob Bishop (R-Utah), who has been the chief opponent of a clean LWCF extension in the House, has pledged to introduce a bill to reauthorize the fund this year, though with notable reforms.

The status quo, at least from appropriators' perspective, has not changed, said Chris Gallegos, a spokesman for Senate Appropriations Chairman Thad Cochran (R-Miss.).

"Land and Water Conservation Fund projects can move forward despite the ongoing effort to reauthorize the program," he said.

House Interior, Environment and Related Agencies Appropriations Subcommittee Chairman Ken Calvert (R-Calif.) has noted that there are other expired federal programs – he cited the FBI – that are unauthorized and yet continue to receive congressional funding.

Yet he also signaled it would be more difficult to fund LWCF in the absence of new revenues from offshore drilling. The \$20 billion in remaining LWCF funds, he said, are "as real as the money in the Social Security trust fund."

"There's been money paid into that account, on paper," he said. "But that money's been spent."

Yet appropriators "still possess the same power to appropriate funding under LWCF," said Interior Department spokeswoman Jessica Kershaw.

"The process has not changed for appropriation post-expiration," she said. But "without reauthorization, the highly successful program needlessly faces an uncertain future."

The longer it is expired, the more vulnerable it will be to spending cuts, said Alan Rowsome, director of government relations at the Wilderness Society.

And regardless of whether appropriators continue funding it, the fact remains that \$2.5 million per day in oil and gas revenues are now going to the general Treasury rather than LWCF, he noted.

"The reality is all this leads to a very urgent situation where LWCF does need permanent authorization and a permanent funding solution," he said. "Rather than discussing whether [the \$20 billion] exists or not, we should be talking about alleviating the problem."

Colorado Delegation Divided Over Public Lands Fund

[Durango \(CO\) Herald](#), October 20, 2015

The Land and Water Conservation Fund (LWCF), the country's most successful land-conservation program, was allowed to expire at the end of September after congressional leaders failed to reauthorize the program. Now, as politicians take stock of the program's influence across the country, many are pushing for permanent reauthorization of it.

The LWCF, established in 1964, was created to secure outdoor recreation lands for future generations. Over the course of its existence, the program has provided almost \$17 billion in funding for the expansion of parks and protected forests across the country and has protected more than 500 million acres of land across the country.

Sen. Michael Bennet, D-Colo., said it's important to renew the fund to ensure future generations continue to have access to public areas.

"Rural and urban communities throughout Colorado benefit from the Land and Water Conservation Fund, including the Animas River Trail," Bennet said. "It's a crucial tool we've used to conserve dozens of landscapes across Colorado. It's also critical to our outdoor recreation industry, which is a major driver of the state's economy. There is strong bipartisan support for the LWCF, and we're extremely disappointed that it has not yet been reauthorized."

Earlier this year, Bennet introduced legislation along with Sen. Kelly Ayotte, R-N.H., and Sen. Richard Burr, R-N.C., to permanently reauthorize the fund. That legislation fell one vote short of passage.

One of the benefits of the LWCF is that it is entirely funded by royalties from offshore drilling, defraying taxpayers' cost. But while the LWCF's reauthorization has enough support in the Senate, House Republicans are weary about putting forward a simple reauthorization bill.

Rep. Scott Tipton, R-Cortez, believes the fund is an effective tool for conservation efforts, but he feels that it's in need of some reforms "to ensure it is still achieving its original mission" after more than 50 years of existence.

"Managing nearly 640 million acres in the United States, the federal government is by far the largest landowner in most Western states," Tipton said. "Rather than increasing LWCF funding in order to obtain more federal property, land-management agencies should focus on managing the lands they already have. LWCF reauthorization provides an opportunity for reforms that support addressing the growing maintenance backlogs for national parks, roads, trails and facilities."

Instead, Tipton believes LWCF funding could also be used for land exchanges "involving strategic landholdings" with private owners.

House Natural Resources Committee Chairman Rob Bishop, R-Utah, has indicated that he will put forward a bill that changes the fund in the coming months, including efforts to redirect money to more state and local projects.

A recent U.S. Treasury report shows the fund contains a \$19.8 billion balance, although whether this money can be used to continue acquiring federal lands and support protection efforts is up for debate. Because of the fund's expiration, royalties from offshore drilling will now go directly into the Treasury's coffers.

According to Sen. Bennet's office, parks throughout Colorado have received LWCF funding, including Canyons of the Ancients National Monument, the Ophir Valley in the Uncompahgre National Forest, Dinosaur National Monument and the Colorado National Monument. Since the fund was established, Colorado has received almost \$239 million in funding to conserve lands across the state.

Data from the Outdoor Industry Association show that outdoor recreation in Colorado generates more than \$13.2 billion in consumer spending, supports 125,000 jobs across the state and provides close to \$1 billion in annual tax revenue.

U.S. Sen. Cory Gardner, R-Colo., also announced his support for the program's renewal. Along with Sen. Bennet and 52 other senators, Gardner previously signed on to a letter to Senate Majority Leader Mitch McConnell, R-Ky., pushing for the fund's permanent authorization.

"I remain a strong proponent of permanently reauthorizing the LWCF, and that is why I will continue to work toward a solution that paves the way for the common sense, permanent reauthorization of a program that has been a great friend to Colorado and is supported by sportsmen, hunters, recreationists and Americans around the country," Gardner said.

Edward Graham, a student at American University in Washington, D.C., and an intern with The Durango Herald.

Weekend Warriors Fear Washington Land Grab Could Take Off-roading Off The Board

[Fox News](#), October 20, 2015

A group of off-roaders and others are attempting to fight a proposed designation of three national monuments in the California desert under the Antiquities Act. (Corva.org)

California outdoors enthusiasts fear Washington is poised to put up roadblocks on some of the Golden State's most treasured trails by designating three desert destinations totaling more than 1 million acres national landmarks.

The Obama administration is considering using the federal Antiquities Act to bypass the legislative process at the request of Sen. Dianne Feinstein, whose efforts to have the Mojave Trails and Castle Mountain, both in the Mojave Desert, and a section of the Sonoran Desert named federal sites were repeatedly blocked by Republicans. A White House move could put the land under federal control, which critics say could cut funding for upkeep or even restrict access.

"Bypassing the legislative process using the Antiquities Act would be as disastrous as it is undemocratic, creating winners and losers with the stroke of a pen," said Rep. Paul Cook, R-Calif., who has sponsored a bill that bears some similarities to Feinstein's, but would ensure off-roading and mining could continue on the land. Cook's bill would also allow the state to create water projects for wildlife conservation.

"Any time you take away the consensus of the local community they are left with something they did not ask for."

– Amy Granat, California Off-Road Vehicle Association

The Mojave Trails lie in the desert of the same name in eastern California and are part of a 140-mile road that stretches from the Colorado River to Mojave River. The Sand to Snow Monument would cover 135,000 acres from the Sonoran Desert floor in Coachella Valley to the peak of Mount San Gorgonio, in the San Bernardino Mountain range. The Castle Mountains lie on the Border of Nevada and California near the famed Joshua Tree region and reach an elevation of 5,543 feet.

While the Obama administration has not said publicly if the Mojave Trails, Sand to Snow and Castle Mountain national monuments will be designated, Feinstein asked the president in August to take the action. The Antiquities Act was signed into law in 1906 by Theodore Roosevelt, and gives the president authority to create national monuments from public lands to protect

significant natural, cultural or scientific features. It has been used more than 100 times, including for such landmarks as the Grand Canyon, Mount St. Helen's and a stretch of the Underground Railroad in Maryland. Given that President Obama has invoked the Antiquities Act to name 19 sites national monuments since 2009 and as recently as July, Cook and other critics have reason to believe the White House could do so again, especially at the invitation of a powerful Democratic ally.

"We don't know what's going to happen," said Amy Granat, managing director of the California Off-Road Vehicle Association, which has been fighting the legislative proposals for two years. "More and more of the desert is being taken away from the people. If you look at the entirety of the desert, there has always been a no-win when the Antiquities Act has been put in place."

Cook supports the designation, but through legislation and on terms that allow current uses to continue. He said a White House decree based on the Antiquities Act "sets in motion a Washington-based management plan" that will ultimately leave the recreational area unfunded – and unkempt.

"... the roads and facilities will be left to degrade to a point where public use is unsafe or impossible," he said. "Anyone who's read the recent reporting on the newly-created San Gabriel National Monument's dire situation can attest to this. Use of the Antiquities Act will create more "orphan" monuments like San Gabriel, this time in the heart of the California desert."

One example of the Antiquities Act not helping to improve an area can be seen at the San Gabriel Mountains, range of mountains located across Los Angeles and San Bernardino counties and separates the City of Angels and the Mojave. It has been just over a year since the White House designated the mountainous region as a National monument but the area has still not received any federal funding. The 970-square-mile region badly needed the funding to combat growing blight in the area, but is still plagued by garbage and vandalism. And with no federal funding in sight, the National Park Service does not have the means for proper upkeep.

Feinstein is not without support in her home state. An Antiquities Act designation for the three landmarks could actually bolster recreational activities, according to the Campaign for the California Desert.

"The point that Rep. Cook and other opponents of the monument designation are missing is that when our shared public lands are protected, it's for the continued use and benefit of all Americans," the group said in a statement. "It is only when our public lands are sold off or leased by a developer does the public's access to our public lands become restricted."

Drones Power Up To Fight Wildfires In US West

[Voice of America](#), October 21, 2015

BOISE, IDAHO—Consumer drones look like children's toys compared with the unmanned, water-dropping helicopter that was demonstrated for U.S. government officials this month. The K-MAX chopper is the largest of several remotely piloted firefighting aircraft to get a tryout this year for firefighting duty.

The dual-rotor helicopter looks as if it's been squished from the sides. It demonstrated water drops and ferried supplies up and down a mountain. All of the missions were flown by remote control from a ground station set up next to the helipad. A pilot sat in the one-seat cockpit ready to take the controls — just in case.

WATCH: Drones Power Up to Fight Wildfires

Helicopter maker Kaman Aerospace produced the K-MAX. Vice President Bob Manaskie said it can fly through thick smoke or darkness, situations that force current firefighting aircraft to stay on the ground. It can lift up to 27-hundred kilos, the equivalent of its own weight.

"We can fight fires 24/7, unmanned or optionally manned. That's the advantage," he said. "You can get water on the fires 14 or 15 extra hours per day where a manned system can't."

Art Hinaman, assistant director for aviation at the U.S. Forest Service, said he saw "a lot of potential" at the initial pitch.

"It's fascinating that it can be done, that the technology is there," he said. "For us, the ability to do that without having to risk a pilot in low light level conditions, poor visibility and weather [in which] you just can't fly — and the guys on the ground need the help — that's pretty monumental."

Brad Koeckertiz, the unmanned aircraft program manager with the U.S. Department of Interior, figures it will take a few more years to integrate drones into all the other routines found in fighting wildfires, but said he was confident that optionally piloted aircraft would become a tool that firefighters regularly use.

Not just for fires

The U.S. Marine Corps operated two K-MAX helicopters in the unmanned configuration in Afghanistan to resupply remote outposts at night. K-MAX shuttles replaced dangerous convoys on the ground.

"We've tweaked it to where it is very safe," Manaskie said. "When we put it in Afghanistan initially, the Marines wouldn't put people underneath the aircraft as it was hovering because they were afraid, unmanned, it would fall down. By the end, there were tons of people under there hooking up stuff. They got very confident with it."

Two controllers on the ground put the K-MAX unmanned chopper through its paces. (Credit: Tom Banse)

The K-MAX helicopter is the third remotely piloted aircraft to get a federal tryout this fire season. The first two tests used smaller, winged aircraft to identify and map hot spots. Boeing subsidiary Insitu showed off a repurposed military reconnaissance drone called the ScanEagle over a forest fire in Olympic National Park. Then Textron Corp. demonstrated its Aerosonde Mark 4.7 surveillance drone over a different forest fire north of McCall, Idaho.

There is an element of good drone/bad drone to this. More than a dozen times this year, unauthorized hobby drones flew too close to active wildfires in the American West, which forced temporary halts to aerial firefighting operations.

That is one of the reasons behind the Federal Aviation Administration's plans to require many drone aircraft to be registered. FAA chief Michael Huerta said registration would increase pressure on drone operators to fly responsibly.

Unmanned K-MAX Completes Firefighting Demo

[Vertical Magazine \(CAN\)](#), October 21, 2015

More than 40 representatives from federal wildland fire agencies and media gathered at Lucky Peak Helibase just outside Boise, Idaho, on a smoky morning earlier this month to witness an unmanned Kaman K-MAX firefighting demonstration.

The aircraft, outfitted with redundant onboard equipment allowing it to operate both in line of sight and remotely via satellite, used a Bambi bucket to demonstrate spot drops and trailing drops, then demonstrated a cargo delivery and return from ridges and confined areas surrounding the base during the 2.5 hour demonstration. Throughout the event, both remote control and autonomous piloting were demonstrated, as well as electro-optic (EO) high definition, infrared and thermal imaging camera views to demonstrate the aircraft's ability to identify hot spots and the effectiveness of drops.

An onboard safety pilot had the ability to switch the aircraft to manual should an issue arise. Without a temporary flight restriction (TFR) or Certificate of Authorization (COA) from the Federal Aviation Administration (FAA), the aircraft couldn't fly completely unmanned for the demonstration.

"This technology will allow us to better support our firefighters on the ground, both with suppression and direct logistical support," said Mark Bathrick, director of aviation services for the Department of the Interior. "We see it as a great example of prior tax payer investment that will pay dividends."

Created through a partnership between Kaman and Lockheed Martin, the unmanned K-MAX operated in Afghanistan for the U.S. Marine Corps between 2011 and 2014. The aircraft, originally contracted for six months, stayed on to serve more than 2.5 years, delivering 4.5 million pounds of cargo and equipment to troops. Flying pre-subscribed GPS routes, the aircraft mainly operated in the dark with no external lighting along traditionally hazardous ground routes, taking no fire in its entire tour, said Lockheed Martin.

Upon completion of the mission, Lockheed Martin was approached by the Department of the Interior: Would this technology work to help fight fires?

Lockheed and Kaman provided an initial demonstration in November 2014 at the FAA's testing grounds in New York for firefighting agencies. Critical firefighting feedback led to several modifications and tactical changes, the results of which were demonstrated at the Lucky Peak Helibase.

"As a career firefighter, I've seen time and again the calls for aerial support when visibility is down or the wind is too high to safely operate," said Brad Koeckertiz, UAS program manager for the Office of Aviation Services at the Department of the Interior. "Putting this technology in place will increase safety for people on the ground and in the air."

The demonstration was slow and methodical, often with water dropping higher than it would in a real scenario due to safety, said Lockheed officials. Monitors on the ground showed views from the helicopter, including crystal clear views through the smoke and haze, as well as what the remote control operator was seeing on his screen.

The operator flew the helicopter using two Toughbook laptop computers and a PlayStation controller. "The choice of controller was actually strategic," said Christopher Zonio, flight test engineer at Lockheed Martin and the aircraft's original operator with more than 1,000 hours of flying K-MAX remotely. "When I trained Marines, most had instant familiarity because they played PlayStation. They'd say, 'I know this. Just tell me what the buttons do.' The learning curve was fast for most of them."

Zonio's computers and controller worked through two satellite uplinks and a remote control antenna for line of sight. Additionally, he sent directions to the helicopter, such as a GPS location that could be called in by a firefighter on the ground, and the aircraft then flies autonomously to the point.

"This aircraft can operate as manned when it is safe, and as unmanned when visibility drops or night falls, allowing the fire suppression and supply delivery to continue," said Art Hinaman, assistant director of aviation, fire and aviation management for

the U.S. Forest Service (USFS). "We'd not need special permission to fly it to a fire as long as a pilot is onboard, then once in the TFR, we can go unmanned, saving time and money."

The Department of Interior hopes to fast-track FAA approvals to allow the aircraft to operate in fire TFRs as soon as next summer. However, the issue of price and who would make the investment wasn't discussed directly in the presentation.

A new K-MAX off the line, in a manned-only configuration, is around US\$7 million, said Bob Manaskie, vice president and general manager of air vehicles and MRO for Kaman. However, a retrofit for an existing K-MAX is possible, with the aircraft needing to go back to the factory for tail boom strengthening, then on to Lockheed Martin for technology additions. The price, he said, depended on the sensors the operator ordered. Lockheed Martin quoted between \$11 to \$15 million for a new aircraft.

Both Hinaman of the USFS and Bathrick of the DoI said the agencies had no plans to purchase the aircraft; they'd be contracting with private companies much like they do today. However, both were unable to discuss what that would look like as terms and conditions of contracts for a yet-to-be FAA-approved aircraft were unavailable. It remains unclear what would motivate current firefighting aircraft contractors to make such an investment, or if they'd be able to receive adequate insurance coverage for the operation.

Firefighters assigned to the helibase and helitak were not allowed to talk to press at the demonstration to share their thoughts after seeing the aircraft in action. Hinaman said he recognized the importance of working with firefighters during the process. "It's important to get them involved in seeing this aircraft in action and hearing their input," he said.

When asked about the potential of working with skilled firefighting pilots to transition them to ground operators of the unmanned K-MAX in order to use their inherent knowledge of firefighting, Bathrick responded: "We don't see the need for skilled (firefighting) pilots as it is pure math with a UAV. It flies to a precise point along a prescribed route. It can operate more precisely than any pilot, and I can say that — I am a pilot," he said. "We are getting critical feedback from firefighters and pilots. We're here to support them."

The Department of Interior plans to work with Lockheed Martin to test the aircraft on a very controlled prescribed burn before moving on to testing it on a real forest fire, Bathrick said.

The Unmanned K-MAX has a 2.75-hour endurance with an option to add an auxiliary fuel tank to extend the range another 45 minutes. The aircraft weighs in at 5,145 pounds empty and can lift up to 6,000 lbs. on the hook for a maximum gross weight of 12,000 lbs., with external load, at sea level. At 5,000 feet, and 15 degrees C, lift performance decreases to 5,663 lbs.

The demonstration was funded by Lockheed Martin and hosted by the Boise National Forest.

Jeb Bush Calls For Moving Interior Department From D.C. To Western City

[Las Vegas Sun](#), October 20, 2015

Republican presidential candidate Jeb Bush will unveil his proposals for Western land and resource management in a campaign stop in Reno on Wednesday morning, in a speech likely to resonate with conservative voters opposed to what they see as federal overreach in the Western states.

Bush is expected to criticize the Obama administration for failing to work with states, local governments, Native tribes and private owners as "equal partners," arguing that overregulation has weakened the trust of local communities in the federal government.

Bush is expected to speak at 11 a.m. Wednesday at Rancho San Rafael Regional Park before appearing at a forum sponsored by the LIBRE Initiative at the College of Southern Nevada Cheyenne Campus in North Las Vegas at 6 p.m.

In the proposal, Bush will call for moving the headquarters of the Department of Interior from Washington, D.C., to a city in the western United States like Denver, Salt Lake City or Reno and will say that as president he would direct federal agencies to give broad latitude to states to determine land-use issues.

He's also expected to call for a revised framework on granting national monument status, convening a panel of Western leaders to propose changes. Republicans have criticized President Barack Obama, who, with the backing of Nevada Sen. Harry Reid, designated the Basin and Range National Monument over the objections of local stakeholders.

Bush will propose redirecting some funds from acquisition of new national park land to park maintenance. He will also reaffirm his opposition to the administration's Waters of the United States rule, which defines which waterways are subject to EPA regulation and will argue for federal deference to state plans for protecting species like the sage grouse.

Scientists Confirm That Alaskan Wildfires Could Make Global Warming Worse

By Chris Mooney

[Washington Post](#), October 21, 2015

In not much more than a month, leaders from around the world will assemble in Paris in order to — hopefully — find a way to cap the world's greenhouse gas emissions and bring them down to safe levels.

But there's a problem. There are some greenhouse gas sources that these leaders can't fully control — and in some cases, reasons to think that these sources may grow in the future. The point is being driven home this year by raging peat fires in Indonesia, which have already contributed over a billion tons of carbon dioxide equivalent emissions to the atmosphere — as much as Japan produces in a year from fossil fuels. And the blazes still appear to be on the rise, meaning that the net contribution this year could ultimately be considerably higher than that.

Indonesia isn't the only part of the world where fires — which in many areas are expected to be worsened by climate change — could provide a new net source of emissions to the atmosphere. Another region of major worry is the world's so-called "boreal" or northern forests, which store a gigantic amount of carbon in trees as well as soils and frozen permafrost layers beneath the surface. Permafrost in this region is in many ways analogous to peatlands in Indonesia — it's a repository of carbon that has accumulated over many thousands of years, but could now be released back to the atmosphere on a much shorter time scale.

Alaska's dramatic wildfire season this year — where over 5 million acres of largely black spruce forests burned — raised great concerns about how events like this could make global warming worse. The fear here is of a sort of triple whammy — forests release the carbon stored in trees back to the atmosphere when they burn; the forests contain a deep upper soil layer that also burns off, releasing more carbon; and finally, beneath all of that is the carbon rich permafrost, which becomes exposed after fires and can then thaw and start to emit.

And now, a new study in *Nature Climate Change* reaffirms these concerns about the emissions of northern fires. The study, led by Ryan Kelly of the University of Illinois at Urbana, looked at a particular Alaskan region that has seen intensive burning of late — the remote Yukon Flats. The researchers used an ecosystem model to examine changes in the amount of carbon stored in the Yukon Flats going all the way back to the year 850, and carrying forward through 2006 — a more than thousand year period. The data used in the model came from "paleo-climate" reconstructions of what burn conditions were like in this area over large periods of time, based on charcoal layers found in cores of sediments extracted from the region.

This approach allowed the researchers to confirm that the recent burning in this area is dramatic when compared with its past history — and thus, that recent fires have been releasing much of the carbon that has been stored up over hundreds of years. For the Yukon Flats, "this rapid increase in fire activity has led to pretty major losses of carbon from the ecosystem, on the order of 10 to 12 percent of total carbon stocks in a matter of 5 decades or so," said Kelly.

In addition, the researchers also determined that over time, change in fires patterns were by far the largest factor in how much carbon the ecosystem stored. In fact, the study noted, "long-term C dynamics of the past millennium were almost entirely dictated by patterns of fire-regime variability." In other words, in more fire-intense periods, the forests lost a great deal of carbon to the atmosphere, whereas in less fire friendly periods, they stored it instead.

This, in turn, leads to the inference that with more global warming, more forest burning could worsen a process that's already underway. "Our study reveals that increased burning of boreal forests will probably cause massive losses of stored C, with the potential to amplify climate warming," the researchers concluded.

"I would definitely guess, and we speculate this in the paper, that the direct role of warming and rising co2 will be more important in the future than they were over the 1,000 year time period we studied," said Kelly.

Granted, there is one limitation — the research only concerns the Yukon Flats, and this area has seen quite dramatic burning, at levels that are not consistent with all burning across the forests of the global north. So it's an outlier in some ways, but also suggestive of how things could be heading for northern forests.

To be sure, there is one possible mitigating factor — global warming could also even cause more plant growth in northern and Arctic regions, leading to an increase in how much carbon they're pulling out of the atmosphere. More northern trees, bushes, and even shrubs as tundras warm up could mean more carbon storage, even as fires may also rage at more powerful and extreme rates.

Climate researchers are still trying to figure out how all of these factors will interrelate. But the new research — along with developments in Indonesia — reaffirms that fire is a powerful determinant of how much carbon resides in land, rather than in the air, across our globe. Thus, even as we keep burning fossil fuels, fires may continually combust additional planetary carbon reserves — pushing the globe that much closer to busting its carbon budget.

Pingree To Prepare Food Waste Bill

[Politico](#), October 21, 2015

With help from Bill Tomson, Jenny Hopkinson and Helena Bottemiller Evich

PINGREE TO PREPARE FOOD WASTE BILL: Rep. Chellie Pingree (D-Maine) is preparing a bill aimed at reducing food waste as administration officials look to address the issue through voluntary efforts. A spokesman for Pingree tells MA the lawmaker plans to announce she is working on a bill during a speech to the New York Times Food for Tomorrow Conference

today in Pocantico Hills, N.Y. The bill will seek to put into place incentives, programs and other measures to curb food wasted at the farm level, by food makers, restaurants and by consumers. While the spokesman said details of the bill are still in the works, one of the things the congresswoman is looking to change are sell-by dates, to tell consumers that food is still safe even if it has passed its prime. Details on the conference can be found here: <http://bit.ly/1n8smWG>

Story Continued Below

The bill follows on the heels of an Obama administration announcement last month that the government is committing to reduce food waste by 50 percent during the next 15 years, the first time the United States has ever put into place a goal on the issue. While food and environmental groups lauded the efforts, several warned that the government may need to take further action to incentivize reductions if it wants to see real change. Brush up on the issue here: <http://politico.pro/1NdfBQR>

HAPPY TUESDAY, OCT. 20! Welcome to Morning Ag, where your host got the heads-up that the Interior Department has a great Vine account. Fishing bears and a dancing sage grouse? This is Internet gold: <http://bit.ly/1M1i086>. The USDA needs to up its game. You know the deal: News, tips? Send them to cpurdy@politico.com and [@chasepurdy](https://twitter.com/chasepurdy). Follow the whole team [@Morning_Ag](https://twitter.com/Morning_Ag).

USITC RULES TODAY ON MEXICO DUMPING CHARGES: The International Trade Commission will make its much anticipated final ruling at 11 a.m. today on charges that Mexico was dumping subsidized sugar into the U.S. at below market prices. If the ITC commissioners agree with the findings of a Commerce Department investigation that Mexico was indeed dumping, a negotiated suspension agreement that caps Mexican imports will stay in place. It's the result that farmers here are hoping for in order to keep Mexican shipments reined in and prevent price-lowering influxes of imported sugar.

But some U.S. sugar refineries and users are hoping for the opposite and would like to see all restrictions removed from Mexican supplies that help keep prices down and supplies plentiful.

"Refinery operations in cities such as Savannah, Detroit, Baltimore, New York and San Francisco will be forced to run at 65 percent of capacity, resulting in job losses and possible closures, while these cities' much needed jobs are shipped to Mexico by these agreements," said Imperial Sugar President Michael Gorrell in a presentation on the suspension agreement at a conference in June. Pros can see the full story here: <http://politico.pro/1RkQb8F>

FOOD COMPANIES JOIN WHITE HOUSE IN CLIMATE DEAL PUSH: There are some pretty weighty food companies amid the 81 companies that have agreed to a White House initiative to push for a strong climate deal out of the United Nations. Negotiations at the U.N. are set to take place late next month in Paris. Coca-Cola, General Mills, Hershey's, Kellogg's, Mars, Nestlé, PepsiCo, Cargill, Campos Brothers Farms and Unilever all signed the pledge, as did restaurant chains McDonald's, Starbucks and Wal-Mart. Monsanto is also part of the group, as is Syngenta. View the commitments here: <http://1.usa.gov/1W0BokL>

** A message from the Coalition for Safe Affordable Food: Virtually every leading health and safety organization on earth – from the World Health Organization to the American Medical Association – have affirmed the safety of agricultural biotechnology. Learn more: <http://bit.ly/1LprXGN> **

WHITE HOUSE OFFICIALS MEET ON ORGANIC AQUACULTURE: Administration officials have met with two groups following the USDA's organic aquaculture standards as they continue a review of a proposal to create standards for organic production and certification of farmed aquatic animals and their products. George Lockwood, who chaired the working group that made a recommendation on what the standard should look like, met with USDA and Office of Management and Budget officials Oct. 13. Another meeting, with the National Organic Coalition, the Center for Food Safety, and Food & Water Watch took place earlier this year, on Aug. 28. Those groups have raised concerns about the proposal, arguing it would be very difficult to produce fish in a truly organic way. Details of the meetings here: <http://1.usa.gov/1PCuMJA> and here: <http://1.usa.gov/1OOXKp5>

DEADLINE TO COMMENT ON 'MIDGET' DESIGNATION FOR RAISINS APPROACHES: Today is the last day to comment on the Agricultural Marketing Service's plan to change the name of a grade of raisin from "midget" to "small." The proposal came about after Little People of America filed a petition arguing "midget" should be eliminated from the agency's vocabulary. The agency says the change shouldn't have any impact on handlers' or growers' benefits or costs. Both "midget" and "small" have been used interchangeably by the industry, so the proposal would make the designation uniform.

One comment in support said: "I am going to keep it simple. If The Little People of America are offended by fruit and vegetables being called 'midget,' it should be removed from the Agricultural Marketing Service's vocabulary."

DeLAURO PRAISED DEPARTMENT OF LABOR OVER POULTRY PLANT PROGRAM: Rep. Rosa DeLauro (D-Conn.) has praised the U.S. Department of Labor after it announced the establishment of a Regional Emphasis Program to crack down on abusive labor practices in the poultry industry. The program is for states in which the poultry industry is heavily operating, including Arkansas, Louisiana, Oklahoma, Texas, and certain worksites in Georgia, Alabama, Mississippi, Florida and New Mexico.

According to an announcement by the Labor Department, poultry plants often have working environments that pose a high risk for injury and illness to workers. Because of that, the department has established a program that will start by providing outreach activities to plants that will include letters to employers, training sessions with stakeholders and public service announcements, among other things. Enforcement activities may also be used, and will include the inspection and review of production operations, according to the announcement. You can read it in full here: <http://bit.ly/1LHiT3m>

DAIRY GROUPS TO SENATORS: LACK OF ACTION NOT COOL: U.S. dairy groups sent a clear message to senators Monday: Listen to Canada and Mexico on country-of-origin labeling before they hurt us. A World Trade Organization arbitration panel is currently deliberating how much the two North American countries are allowed to raise tariffs against targeted U.S. sectors — including on dairy — to recoup damages for discriminatory COOL rules. The leaders of the International Dairy Foods Association, National Milk Producers Federation and U.S. Dairy Export Council in a letter urged the Senate to come up with a solution on COOL for meat that heads off that possibility.

The House has already passed legislation repealing COOL provisions for beef, pork and chicken. Senate Agriculture Committee Chairman Pat Roberts supports that approach, but Sen. John Hoeven and ranking member Debbie Stabenow, along with a majority of the committee, have put forward a bill that would replace current mandatory COOL requirements with voluntary ones. Although the dairy industry's letter does not explicitly endorse the repeal-only approach, Canada and Mexico have indicated they would not be satisfied with any other outcome. Click here to read the letter: <http://bit.ly/1W1gm5w>.

GOT (NATURAL AMERICAN REDUCED FAT CHEDDAR) CHEESE?: The Department of Agriculture is researching the commercial availability of Natural American Reduced Fat Cheddar Cheese in bulk form for domestic food distribution programs. So if you're a cheese producer and you've got the ability to supply the product, the USDA has some questions for you: <http://1.usa.gov/1xjVVm>

GROUPS PUSH FOR CALIFORNIA WARNING ON GLYPHOSATE: More than a dozen environmental and consumer groups are urging regulators in California to list the pesticide glyphosate as a carcinogen under the state's chemical laws, which would require labeling as such. In a letter sent Monday to the state's Office of Environmental Health Hazard Assessment, the groups, led by the Center for Food Safety, argue there is sufficient scientific evidence to justify the listing. OEHHA first proposed the move Sept. 4. The letter is here: <http://bit.ly/1hOoJUz>.

JBF ANNOUNCED ITS 2015 AWARD WINNERS: The 2015 James Beard Foundation Leadership Award honorees include: Sam Kass, former White House chef and senior policy adviser on nutrition; Don Bustos, co-director of the American Friends Service Committee; Eliot Coleman, an agricultural researcher, author and educator; Saru Jayaraman, director of the Food Labor Research Center at the University of California, Berkeley; and Bryant Terry, a chef and food justice activist.

Accepting his award at the awards dinner at the Hearst Tower on Tuesday night, Kass argued that the growing food movement needs to be more strategic and learn how to compromise as it pushes for policy and market change.

"We are in every single board room of every single food company," Kass said. "We are on the inside now ... we don't need to throw stones ... we have to be much more strategic."

** A message from the Coalition for Safe Affordable Food: With Vermont set to become the first state to implement its own GMO food labeling standard next July, it's time for Congress to pass reasonable, common-sense legislation that creates a uniform, national food labeling standard to protect consumer-choice and bring consistency to the marketplace. A failure to act this fall is tantamount to ceding control of food labeling policy in a nation of over 300 million to a state of only 600,000. Learn more: <http://bit.ly/1LprXGN> **

EMPOWERING NATIVE AMERICAN COMMUNITIES

BIA Rule Gives Tribes More Control Over Elections

[Law360](#), October 20, 2015

Law360, New York (October 19, 2015, 9:39 PM ET) – The Bureau of Indian Affairs on Monday announced its final rule for Native American tribal elections conducted by the U.S. Department of the Interior, saying the new rule will encourage tribes to take control of their elections and help protect the voting rights of tribe members living in urban areas.

Assistant Secretary of Indian Affairs Kevin K. Washburn said in a statement Monday that the rule will allow tribes to opt out of having the interior secretary conduct their elections, and will allow tribal elections to...

DOI Announces Final Rule On Secretarial Elections For Tribes

[Native American Times](#), October 20, 2015

WASHINGTON – Assistant Secretary – Indian Affairs Kevin K. Washburn today announced that the Department of the Interior has finalized updates to Bureau of Indian Affairs (BIA) regulations on Secretarial elections for tribal governments that will, among other things, protect the rights of tribal members living away from their communities to vote in these elections. A Secretarial election is a federal election conducted by the Secretary of the Interior for federally recognized tribes under a federal statute or tribal governing document (25 C.F.R. Part 81).

“Though many federal responsibilities concern the lands we hold in trust for tribes and Indian people, more than 55 million acres nationwide, the United States has a moral obligation to preserve connections between Indian people and their tribes that it once sought to destroy,” Washburn said. “For the future of Native nations and the health of Indian Country, American Indians in urban areas must work harder to maintain connections with their tribes. One important aspect of that relationship is participation in the civic and political life of their tribal governments. For that reason, our Secretarial election amendments seek to prevent tribal members living in urban areas from being inadvertently disenfranchised in Secretarial elections.”

Through the mid-20th century the BIA operated a program to relocate American Indians from their reservations to large urban centers in an attempt to assimilate them and terminate the federal relationship with the tribes. As a result of this program, and broader demographic trends in the United States, roughly three-quarters of American Indians now live in urban areas away from their home reservations.

The BIA conducts Secretarial elections for tribes required to have them if one of the following applies:

- A federal law requires a Secretarial election to take an action;
- The tribe’s governing document requires a Secretarial election to take an action;
- A federal corporate charter requires a Secretarial approval; or
- The tribe is adopting or amending a federal charter of incorporation, and certain circumstances apply.

Updates to the rule better account for the fact that many tribal members may live far from their reservations or tribal communities by providing that Secretarial elections generally be conducted by mail-out ballots.

The rule addresses the BIA’s Part 81 regulations, which govern how the Bureau conducts Secretarial elections, as well as 25 C.F.R. Part 82, which govern how tribal members can petition for a Secretarial election. The rule combines the provisions into one at 25 C.F.R. Part 81, and makes other updates to reflect changes in statutory law. The updates also incorporate deadlines, triggered by a tribe’s request for a Secretarial election, within which the BIA must call and hold an election.

The updated rule also clarifies how tribes may remove the requirement to hold a Secretarial election, and encourages tribes to do so in support of tribal self-determination and self-governance.

The rule has been in development for many years. The Department held three consultation sessions with tribal leaders on this proposed rule and provided an extended public comment period which ended on January 16, 2015.

The Assistant Secretary – Indian Affairs oversees the BIA, which is headed by a director who is responsible for managing day-to-day operations through four offices – Indian Services, Justice Services, Trust Services and Field Operations. These offices directly administer or fund tribally based infrastructure, law enforcement, social services, tribal governance, natural and energy resources, and trust management programs for the nation’s federally recognized American Indian and Alaska Native tribes and villages through 12 regional offices and 81 agencies.

The Office of Indian Services Division of Tribal Government Services administers the 25 CFR Part 81 regulations. For more information about the BIA Division of Tribal Government Services, visit online or view a copy of the final rule.

Federal Court Hearing Focuses On Native Hawaiian Election

By Jennifer Sinco Kelleher

[Associated Press](#), October 21, 2015

HONOLULU — A federal court hearing started Tuesday in a lawsuit by people who want to put a stop to an election process that is underway for Native Hawaiians.

The lawsuit, filed in August, says it's unconstitutional for the state to be involved in a race-based election. The state argues in court documents that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it's not involved in next month's vote to elect delegates for a convention to determine self-governance for Native Hawaiians.

Tuesday's hearing is focused on the plaintiffs' motion for a preliminary injunction. The plaintiffs want the judge to limit voter registration activities or stop the election altogether.

The plaintiffs include two non-Hawaiians who aren't eligible for the roll, two Native Hawaiians who say their names appear on the roll without their consent and two Native Hawaiians who don't agree with a declaration to "affirm the un-relinquished sovereignty of the Native Hawaiian people, and my intent to participate in the process of self-determination."

Native Hawaiians are the last remaining indigenous group in the U.S. that hasn't been allowed to establish its own government. Former U.S. Sen. Daniel Akaka spent about a dozen years trying to get a bill passed that would give Native Hawaiians the same rights already extended to many Native Americans and Alaska Natives.

In 2011, the state passed a law recognizing Hawaiians as the first people of Hawaii and laid the foundation for Native Hawaiians to establish their own government.

The governor appointed a commission to produce the roll.

The Native Hawaiian Roll Commission "does not conduct elections, nor set election ability criteria," attorneys for the defendants, including the state, wrote in response to the lawsuit. An independent organization, Nai Aupuni, determined election criteria, the defendants said.

The lawsuit points to nearly \$2.6 million from the Office of Hawaiian Affairs, a public agency tasked with improving the wellbeing of Native Hawaiians, as evidence of the state's involvement.

According to the defendants, the money was provided with the understanding that Nai Aupuni would have autonomy.

The election is to select delegates for a convention, not for an election of public officials, Nai Aupuni said in court documents.

The U.S. Department of the Interior, which recently outlined a proposal for a possible government-to-government relationship if Native Hawaiians want one, took the judge up on his invitation to weigh in on the lawsuit. The department urged the judge not to grant an injunction and pointed out that American Indian tribes hold elections that exclude non-natives.

U.S. District Judge J. Michael Seabright allowed the plaintiff attorneys to call witnesses: Native Hawaiian Roll Commission Executive Director Clyde Namuo, Office of Hawaiian Affairs CEO Kamanaopono Crabbe and Nai Aupuni President J. Kuhio Asam. It's not clear when Seabright will issue a ruling.

Nai Aupuni leaders say it's crucial that the election moves forward because it presents a unique opportunity that has evaded Native Hawaiians for more than 100 years.

"If this process is stalled in the courts, the (roll commission) list will become stale, (Nai Aupuni's) funding may not be available and if history is a useful compass — it may be decades before funding, a similarly substantial roll, state and federal sensitivity and self-determination zeal among Native Hawaiians converge to bring about another such opportunity," attorneys for Nai Aupuni wrote in court documents.

Why Do Hawaiians Want Race-based Elections?

[Christian Science Monitor](#), October 20, 2015

A group of Hawaiians are suing their state in federal court for preparing to hold elections that would serve only one race – the islands' native population.

The justification for the race-based election? Everyone else is doing it.

Every other indigenous group in the United States has already has its own government. This is why, for example, US state and federal police need special certification to operate on Native American reservation land, and the tribes can opt out of daylight savings or state casino prohibitions if they choose.

The former US Sen. Daniel Akaka (D) of Hawaii, who retired in 2013, worked for more than a decade to give native Hawaiians the same self-government rights that Native Americans in the contiguous 48 states and Alaska already have.

The first step toward this goal came in 2011, when the state formally recognized the native Hawaiians. The state then created a Native Hawaiian Roll Commission to start making a list of eligible native Hawaiians who could elect delegates to a convention that would form a government with help from Nai Aupuni, a non-government organization.

The US Department of the Interior made a tentative plan for a formal relationship with whatever government the native Hawaiians set up.

In August, however, six state residents filed a lawsuit to stop the election. Two are non-native Hawaiians who cannot vote in the election, and two are natives who do not want their names on the voting list.

The other two simply disagree with the statement required for voter registration to "affirm the un-relinquished sovereignty of the Native Hawaiian people, and my intent to participate in the process of self-determination."

The state of Hawaii says it has no official involvement in the election, so the racial basis of the election is not unconstitutional. The lawsuit, however, points to a \$2.6 million state contribution to the election process. The funding comes from the Office of Hawaiian Affairs, a state office that works to improve the lives of native Hawaiians.

The hearing Tuesday focuses on the desire of the plaintiffs – the anti-election Hawaiians of the case – for the judge to make a preliminary injunction and stop the election, or at least stop people from registering to vote.

Nai Aupuni said stopping the process now would be the worst thing. In its own submission to the court, Nai Aupuni said Hawaiians have been waiting and working for this for more than 100 years, and the chance may not come again for another century.

This report includes material from the Associated Press.

Lawsuit, Divisiveness Hamper Native Hawaiian Election Effort

[Navajo Times \(AZ\)](#), October 21, 2015

HONOLULU (AP) _ A group of Native Hawaiians are organizing an election to create a national government for the first time since American businessmen, backed by U.S. Marines, overthrew the Hawaiian kingdom more than 100 years ago.

They are trying to elect delegates for a convention next year to hash out a governing document that will go back to the Native Hawaiian community for ratification, but their plan is already facing resistance _ from Native Hawaiians themselves.

A federal judge on Tuesday will consider an injunction motion in a lawsuit that argues that it's unconstitutional to restrict voting to those with Native Hawaiian ancestry and that the state is improperly involved in the process.

Native Hawaiians are the last remaining indigenous group in the U.S. that hasn't been allowed to establish its own government.

Former U.S. Sen. Daniel Akaka spent about a dozen years trying to get a bill passed that would give Native Hawaiians the same rights already extended to many Native Americans and Alaska Natives.

When it became clear that wouldn't happen, the state passed a law recognizing Hawaiians as the first people of Hawaii and laid the foundation for Native Hawaiians to establish their own government.

The governor appointed a commission to produce a roll of qualified Native Hawaiians interested in participating in their government.

Some of the plaintiffs in the lawsuit argue that their names appear on the roll without their consent.

The process has been rushed and confusing, critics say. "It's a shotgun wedding of self-determination," said Native Hawaiian community advocate Trisha Kehaulani Watson-Sproat.

Molokai activist Walter Ritte planned to run as a delegate, deciding it's better to participate even though he disagrees with the process. But when he saw that the list of candidates includes politicians and those who support federal recognition instead of forming an independent nation, he changed his mind.

"I don't want people to say, 'Well you were part of it,'" he said. "I have no faith in the system so I'm taking my name out."

There are some 200 candidates for 40 positions representing Hawaiians across the state and those living outside of Hawaii.

Supporters of the election agree that the process hasn't been perfect.

"But it's an opportunity that rarely comes around," said Bill Meheula, an attorney who will argue in court Tuesday on behalf of Nai Aupuni, a nonprofit organization made up of five directors guiding the election, convention and ratification process.

Watson-Sproat is skeptical of the people behind Nai Aupuni: "Who picked these people?"

"We are individuals who decided we want to commit ourselves to the process," Meheula said. "Someone had to stand up and it couldn't be a state agency. We were individuals that were able to come together and get a grant."

The Office of Hawaiian Affairs, a public agency tasked with improving Native Hawaiians' wellbeing, provided a nearly \$2.6 million grant for the election, with the understanding that the office wouldn't have any control over Nai Aupuni.

Some liken the election to selecting the founding fathers and mothers of a modern Hawaiian nation.

"Founding parents, if you will," said Clyde Namuo, executive director of the Native Hawaiian Roll Commission and a delegate candidate, noting that the founding fathers of the U.S. organized the 13 colonies to escape British oppression.

Self-determination is a way for Native Hawaiians to address longstanding concerns in the community, he said: They fare poorly when it comes to income, education and health.

“The western way of life has not necessarily been good to us,” he said. “We will be able to control our destiny in a better way if we form our government.”

Until the 1893 overthrow, the U.S. recognized the Hawaiian nation's independence, extended full diplomatic recognition to the Hawaiian government and entered into several treaties with the Hawaiian monarch.

The U.S. annexed Hawaii five years later, and it became a state in 1959.

Native Hawaiians have long clamored for self-determination, but the options and opinions on what that looks like vary _ from federal recognition, to restoring the kingdom to dual citizenship.

Last month, the U.S. Department of the Interior outlined a proposal for a possible government-to-government relationship with Native Hawaiians _ if they want one.

The department has also weighed in on the lawsuit, urging the judge not to grant an injunction by pointing out that Native American tribes hold elections that exclude non-natives.

Ritte doesn't want Hawaiians to be another tribe.

“We don't have the same history as Indians,” he said. “The choice is to go down and be closer to the United States of America, who overthrew our queen, or avenge our queen and correct an injustice.” By The Associated Press, Copyright 2015

Judge To Rule Friday On Fate Of Native Hawaiian Election

By Jennifer Sinco Kelleher

[Yahoo! News](#), October 21, 2015

HONOLULU (AP) — A federal judge said he will rule on Friday whether an election process underway for Native Hawaiians can proceed.

U.S. District Judge J. Michael Seabright heard arguments on Tuesday in a lawsuit filed in August that says it's unconstitutional for the state to be involved in a race-based election. The state argues that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it's not involved in next month's vote to elect delegates for a convention to come up with a self-governance document for Native Hawaiians to ratify.

The plaintiffs include two non-Hawaiians who aren't eligible for the roll, two Native Hawaiians who say their names appear on the roll without their consent and two Native Hawaiians who don't agree with a declaration to “affirm the un-relinquished sovereignty of the Native Hawaiian people, and my intent to participate in the process of self-determination.”

One of the plaintiffs' attorneys, Bob Popper from Washington, D.C.-based conservative group Judicial Watch, told Seabright the election will have a big impact on the state of Hawaii and some of his clients won't be allowed to participate.

Seabright countered that the elections aren't for any public office and are “more akin to a private election than to a public election.”

Native Hawaiians are the last remaining indigenous group in the U.S. that hasn't been allowed to establish its own government. Former U.S. Sen. Daniel Akaka spent about a dozen years trying to get a bill passed that would give Native Hawaiians the same rights already extended to many Native Americans and Alaska Natives.

In 2011, the state passed a law recognizing Hawaiians as the first people of Hawaii and laid the foundation for Native Hawaiians to establish their own government. The governor appointed a commission to produce the roll.

The Native Hawaiian Roll Commission “does not conduct elections, nor set election ability criteria,” attorneys for the defendants, including the state, wrote in response to the lawsuit. An independent organization, Nai Aupuni, determined election criteria, the defendants said.

The lawsuit points to nearly \$2.6 million from the Office of Hawaiian Affairs, a public agency tasked with improving the wellbeing of Native Hawaiians, as evidence of the state's involvement.

Nai Aupuni is a private, nonprofit corporation whose grant agreement specifies the Office of Hawaiian Affairs won't have any control, Nai Aupuni attorney Bill Meheula said. “What we've got here is indigenous people trying to pursue self-determination, which is their inherent right under federal law,” he said.

The U.S. Department of the Interior, which recently outlined a proposal for a possible government-to-government relationship if Native Hawaiians want one, took the judge up on his invitation to weigh in on the lawsuit. The department urged the judge not to grant an injunction and pointed out that American Indian tribes hold elections that exclude non-natives.

Nai Aupuni leaders say it's crucial that the election moves forward because it presents a unique opportunity that has evaded Native Hawaiians for more than 100 years.

"If this process is stalled in the courts, the (roll commission) list will become stale, (Nai Aupuni's) funding may not be available and if history is a useful compass — it may be decades before funding, a similarly substantial roll, state and federal sensitivity and self-determination zeal among Native Hawaiians converge to bring about another such opportunity," attorneys for Nai Aupuni wrote in court documents.

Seabright said he will give his ruling from the bench on Friday, with an explanation of his reasoning. He will issue a detailed written order later, but he doesn't know if it will be ready before the election begins.

Feds Side With Alaska Native Group In Artifacts Probe

[Houston Chronicle](#), October 21, 2015

ANCHORAGE, Alaska (AP) — A Massachusetts college was found in violation of a federal law regulating the possession and sale of potentially sacred artifacts following a complaint from an organization of Alaska Natives.

The U.S. Interior Department said an investigation substantiated the complaint against Andover Newton Theological School filed in June by the Sealaska Heritage Institute. The institute's president, Rosita Worl, said the school possesses at least two southeast Alaska artifacts, including a Tlingit halibut hook that is considered sacred.

The Juneau-based institute complained after learning the school planned to sell Native objects displayed at the Salem, Massachusetts-based Peabody Essex Museum. Sales plans have since been abandoned.

Institute officials tried to contact the school before the complaint was filed, Worl said.

"We've never had a return call," she said. "It's been disheartening."

The school's collection contains 1,100 objects, including 125 Native American works from 52 U.S. and Canadian tribes, she said.

According to the Sept. 29 notice of noncompliance, the school failed to complete a summary of its collection, in violation of the Native American Graves Protection and Repatriation Act. The agency said the school was subject to the law because it receives federal funding and has control over at least one protected cultural item, identified in the notice as the Tlingit halibut hook.

Melanie O'Brien, the program manager for the federal repatriation program, said the school appears to be working toward compliance, based on written correspondence. The college has 45 days to respond to the noncompliance notice or request a hearing to contest the finding since receiving it a week after it was issued, O'Brien said.

A representative of Andover Newton did not immediately respond to a request for comment Tuesday. Peabody Essex spokeswoman Whitney Van Dyke referred questions about the case to museum director Dan Monroe, who was traveling in China and could not immediately be reached. Van Dyke said the artifacts in question have been housed at the museum since the 1940s.

In a Sept. 8 letter to Munroe, Andover Newton President Martin Copenhaver said it no longer had plans to sell items from its Native artifacts collection because it was no longer clear which items are subject to the repatriation law.

"We will proceed to repatriate artifacts, however, if feasible and appropriate ways can be found to do so," Copenhaver wrote. "We have already engaged a consultant to help us in that process."

Worl said the Central Council of the Tlingit and Haida Indians of Alaska, the regional federally recognized tribe, plans to file a repatriation claim for the two southeast Alaska artifacts in the collection.

Worl, a former member of the national Native American Graves Protection and Repatriation Act review board, said there is no mechanism in the repatriation law that ensures entities subject to its provisions are following it. At the annual conference of the Alaska Federation of Natives last week, delegates adopted a resolution to create a group to look at the issue and propose changes at the national level, Worl said.

"The burden is put on the tribes" to seek investigations, she said of the current procedures.

Peabody Essex spokeswoman Whitney Van Dyke referred questions about the case to museum director Dan Monroe, who was traveling in China and could not immediately be reached. Van Dyke said the artifacts in question have been housed at the museum since the 1940s.

In a Sept. 8 letter to Munroe, Andover Newton President Martin Copenhaver said it no longer had plans to sell items from its Native artifacts collection because it was no longer clear which items are subject to the repatriation law.

"We will proceed to repatriate artifacts, however, if feasible and appropriate ways can be found to do so," Copenhaver wrote. "We have already engaged a consultant to help us in that process."

Worl said the Central Council of the Tlingit and Haida Indians of Alaska, the regional federally recognized tribe, plans to file a repatriation claim for the two southeast Alaska artifacts in the collection.

Worl, a former member of the national Native American Graves Protection and Repatriation Act review board, said there is no mechanism in the repatriation law that ensures entities subject to its provisions are following it. At the annual conference of the Alaska Federation of Natives last week, delegates adopted a resolution to create a group to look at the issue and propose changes at the national level, Worl said.

"The burden is put on the tribes" to seek investigations, she said of the current procedures.

The Department Of Interior Says East Coast School Must Comply With Terms Of The Native American Graves Protection And Repatriation Act

[Alaska Dispatch News](#), October 20, 2015

The U.S. Department of the Interior has issued a letter stating that Alaska Native items in the possession of Andover Newton Theological School of Massachusetts are subject to the Native American Graves Protection and Repatriation Act.

The Sealaska Heritage Institute of Juneau alleged in June that a halibut hook in the school's collection on loan to the Peabody Essex Museum of Massachusetts was a sacred object used in fishing rituals.

In the letter, Michael Bean, an assistant secretary for Fish and Wildlife and Parks, said that insofar as Andover Newton participated in federal student aid programs, it was governed by the law. He said the school hadn't completed a summary of Native American objects in its collection by April 2010, which "constitutes a failure to comply with the requirements" of the act.

Bean gave the school 45 days to respond to the notice.

The letter is dated Sept. 28, 2015. In a press release sent out Tuesday, Sealaska said it had only recently obtained a copy. Two weeks ago, officials with the NAGPRA office told Alaska Dispatch News that an investigation was underway but did not give a timeframe for when it might be completed.

At the Alaska Federation of Natives convention in Anchorage last week, a resolution was passed to form a group to study the issue of repatriation of items considered to be objects of "cultural patrimony" under the law. The group is to propose changes in how the law is implemented and enforced.

US Attorney Says BIA Officer Justified In Deadly Shooting

[Washington Times](#), October 21, 2015

FARGO, N.D. (AP) – U.S. Attorney Chris Myers says a federal officer was justified in shooting and killing a man on the Spirit Lake Indian Reservation last summer.

Bureau of Indian Affairs Officer Terry Morgan shot and killed 31-year-old Joseph Charboneau during a standoff with officers on June 16. Myers says an investigation by his office concluded Morgan was justified in using deadly force.

The FBI has said the incident began when officers went to a residence to arrest another person, and an altercation ensued with Charboneau. Myers says Charboneau had a loaded gun and also grabbed a blow torch, and that he refused to comply with officers' orders to drop the gun.

Myers says Charboneau threatened not only the officers but also another person in the home.

UPDATE: No Charges For Officer Who Shot, Killed Spirit Lake Man With Gun And Blowtorch In Hand, FBI Says

[Grand Forks \(ND\) Herald](#), October 21, 2015

FORT TOTTEN, N.D. – Federal prosecutors will not file charges against a Bureau of Indian Affairs officer who shot and killed a man in June on the Spirit Lake Reservation, finding the officer was "legally justified" in opening fire on the man.

Officer Terry Morgan shot and killed Joseph Charboneau of rural Fort Totten while carrying out a warrant June 16 at a Fort Totten residence. Officers stated Charboneau pointed a loaded firearm at them and did not follow officers' orders to drop the weapon during a seconds- to minutes-long standoff with officers, according to Assistant U.S. Attorney Keith Reisenauer.

The FBI investigated the incident and sent reports, taped and transcribed interviews, the autopsy report and photos related to the shooting to the U.S. Attorney's Office in North Dakota to decide whether charges should be brought against Morgan. There was no video evidence – Morgan was wearing a body camera the night of the shooting, but it was not functioning at the time, Reisenauer said.

See also: Family of alleged police shooting victim speaks out

The U.S. Attorney's Office said Tuesday it found Morgan acted within the limitations of the law in firing his service weapon at Charboneau because the 31-year-old posed a "real and immediate" threat to officers and another person at the scene.

Under federal and state laws, law enforcement officers are generally allowed to use deadly force to prevent what reasonably poses a threat of serious physical injury or death to the officer or others.

Officers are not required to run away as civilians generally are required to do before resorting to deadly force.

Four officers were searching 7141 Crow Hill Road in Fort Totten for a person for whom they had a warrant to arrest when they found Charboneau under a blanket in the living room with a .40-caliber Glock in his hand, Reisenauer said.

Charboneau pointed the gun at the officers during the altercation, which "happened very quickly," Reisenauer said.

Citing documents from the investigation, Reisenauer said officers asked Charboneau to drop the gun multiple times, but Charboneau did not comply. He also picked up a "propane blowtorch," which was on a nearby shelf, during the standoff and threatened to use it, though not necessarily on the officers, Reisenauer said.

The other person in the residence, for whom the officers had the arrest warrant, told detectives she heard officers telling Charboneau to drop a gun, Reisenauer said.

He said Charboneau did not make any verbal threats.

"He didn't say, 'I'm going to shoot you' or 'I'm going to kill you,'" Reisenauer said.

Reisenauer declined to say what was said between officers and Charboneau.

Charboneau did point the gun at officers, threatened to use the blowtorch and did not obey officers' orders, Reisenauer said.

After Charboneau did not drop the gun, Morgan shot Charboneau four times, once in the chest, twice in the left shoulder and once in his left abdomen, Reisenauer said, citing the autopsy report. Charboneau accidentally shot himself in the right knee in reaction to being fired upon, Reisenauer said.

Reisenauer could not say where the gun was pointed at the time of the shooting.

"Officer Morgan, confronted with an individual holding a firearm at close range, and refusing to comply with orders to drop the weapon, was reasonable in his use of deadly force because Mr. Charboneau posed an immediate and continuing threat to the officers and others," a news release from the U.S. Attorney's Office in North Dakota says.

Reisenauer did not know to whom the gun was registered.

Charboneau's autopsy report did not show any alcohol or drugs in his system, Reisenauer said.

Questions about Morgan's history as an officer were referred to a Washington, D.C.-based spokesperson, who did not return calls to the Herald by press time.

Spirit Lake Officer Justified In Shooting Death

[Dickinson \(ND\) Press](#), October 21, 2015

Officer Terry Morgan shot and killed Joseph Charboneau June 16 after officers searched 7141 Crow Hill Road in Fort Totten to serve a warrant for another person in the residence, according to a press release. Charboneau was found in the living room of the home under a blanket and was holding a loaded firearm.

Charboneau also grabbed a blow torch during a brief standoff with officers, and after refusing to "comply with several orders to drop the weapon," he was shot by Morgan.

"Charboneau posed a real and immediate threat to not only Officer Morgan, but also to a number of other officers at the scene as well as to another individual within the residence," according to the statement. It said Morgan "was reasonable in his use of deadly force because Mr. Charboneau posed an immediate and continuing threat to the officers and others."

Tuesday's announcement came from U.S. Attorney Christopher C. Myers and said the office of the U.S. Attorney for the District of North Dakota had reviewed "all of the investigative reports, interviews, the final autopsy report and photos relating to the shooting." The case was investigated by the FBI.

Shooting Of Man By Spirit Lake BIA Officer Ruled Justified

[Forum of Fargo-Moorhead \(ND\)](#), October 21, 2015

FARGO — The shooting death of a man by a Bureau of Indian Affairs officer in Fort Totten on the Spirit Lake reservation in June was justified, according to a ruling released Tuesday by U.S. Attorney Christopher Myers.

Myers said Officer Terry Morgan was justified in shooting Joseph Charboneau on June 16.

While officers were searching 7141 Crow Hill Road in Fort Totten to serve a warrant for another individual at the residence, Charboneau was found in the living room under a blanket and holding a loaded firearm, according to investigative reports.

Charboneau also grabbed a blow torch during a brief standoff with officers.

After refusing to comply with several orders to drop his weapon, Charboneau was shot by Morgan.

Myers ruled that Charboneau posed a real and immediate threat to the officers at the scene and another person in the residence. Myers said that given the circumstances, the use of deadly force by Morgan was justified.

Investigation Finds Deadly Shooting By BIA Officer Was Justified

[KXJB-TV Fargo \(ND\)](#), October 21, 2015

Investigation finds a Bureau of Indian Affairs (BIA) officer was legally justified when he shot and killed Joseph Charboneau in Fort Totten, North Dakota in June.

The United States Attorney's office for the District of North Dakota has reviewed all of the investigative reports, interviews, the final autopsy report and photos related to the officer-involved shooting. The office concluded that the officer's use of deadly force was appropriate in the situation.

The shooting happened on June 16, 2015. According to the investigative reports, while officers were searching a home to serve a warrant for someone else in the residence, Charboneau was found in the living room under a blanket and was holding a loaded firearm. According to officers, Charboneau also grabbed a blow torch during a brief standoff.

After refusing to comply with several orders to drop the weapon, Charboneau was shot by BIA Officer Terry Morgan. U.S. Attorney's Office investigation finds that Charboneau posed a real and immediate threat to not only Officer Morgan, but also to a number of other officers, and to another individual in the home.

Investigators say because Officer Morgan was confronted by someone holding a firearm, at close range, and refusing to drop the weapon, his use of deadly force was legally justified.

Spirit Lake Officer Legally Justified In Shooting Death

[KFYR-TV Bismarck \(ND\)](#), October 21, 2015

North Dakota's U.S. Attorney says the officer involved shooting in Fort Totten was legally justified.

In June Bureau of Indian Affairs officer Terry Morgan shot and killed 31-year-old Joseph Charboneau.

The investigation finds that while officers were looking for someone else on a search warrant, Charboneau was found under a blanket with a loaded gun. Charboneau also grabbed a blow torch during a brief standoff with officers.

Morgan shot Charboneau after he refused to drop his weapon.

The final investigation reports the use of deadly force was reasonable because Charboneau posed a threat to officers and another person in the home.

In Humboldt County, Tribe Pushes For Bigger Law Enforcement Role On Its Lands

By Lee Romney, Contact Reporter

[Los Angeles Times](#), October 20, 2015

In calls to tribal police and Humboldt County sheriff's dispatch last March, Judy Surber cried, begged and threatened.

Her 29-year-old son had been shot in the chest and head in a small trailer on the remote Hoopa Valley reservation where he, his girlfriend and their 7-month-old son had stopped to give a friend a ride.

Roger Surber lay bleeding next to a 73-year-old man with an even graver head wound. Surber's girlfriend ran, clutching the baby, to find a phone.

When Judy Surber got the news, she placed her first emergency calls.

The tribal force, down to just one active officer, had no one to send. As Surber and her family raced to the scene, she was stunned to see a California Highway Patrol officer and sheriff's deputy in their idled cars on the highway — on orders, they told her, to await more sheriff's backup before going in or letting other emergency personnel through.

In a county that exceeds 4,000 square miles, that backup took time to arrive.

For an hour and 40 minutes, Judy Surber estimates, her family was alone in the bloody trailer. A daughter-in-law who was once a medic worked to keep Roger alive. (He survived; the older man died.) A son repeatedly ran to the staging area to tell the deputy that the suspects were gone. Surber kept calling the dispatch centers, screaming that the scene was safe.

"The minutes felt like hours," the 53-year-old executive secretary for the tribal council said. "Without our tribal police, we're pretty much at the mercy of whoever is available — and sometimes that's nobody."

Surber's panic played out at a time of crisis for public safety on tribal lands.

A federal law decades ago shifted the primary burden of criminal law enforcement on tribal lands in California and five other states to local authorities. Many lack the resources to do the job and, in some cases, sufficient knowledge of tribal law and culture to win the trust of tribal members. Tribes were cut off from steady funding for their own justice systems. Crime has flourished.

Last month, Humboldt County Sheriff Mike Downey dissolved a 20-year-old agreement authorizing Hoopa Valley tribal police to help enforce state criminal law, saying the tribal force's reduced manpower made it "untenable."

The word "police" has been stripped from tribal vehicles, replaced with "security" after Downey warned that taking the cars off the 144-square-mile reservation otherwise could lead to charges of impersonating a peace officer.

Tribal leaders said the move offends their sovereignty and will curtail their ability to rebuild their own force.

"We're miles apart," tribal Chairman Ryan Jackson said of negotiations with Downey at a community meeting this month.

The situation arises from Public Law 280, a measure approved 62 years ago that is among a series of policies aimed at forcing Native Americans to assimilate. It compelled states where tribal lands were deemed "lawless" to take responsibility for enforcing state law. The federal government continued to fill that role in the other states.

The six states couldn't tax tribal lands held in trust to cover their costs. The tribes were cut off from Bureau of Indian Affairs funding that flows to tribal police and tribal courts in the rest of the country.

Tribes could still enforce their own civil and criminal laws on tribal members. But the constant scramble to "cobble together various pots of funding" to maintain those justice systems has made it tough, Jackson said, particularly for remote tribes without access to ample casino revenue.

The federal Tribal Law and Order Act of 2010 — and the independent Indian Law and Order Commission it empowered — laid out fixes to give tribes greater say in tailoring their own justice programs.

In its 2013 report to President Obama and Congress, the commission called the approach to criminal jurisdiction nationwide — but particularly under Public Law 280 — "an indefensible maze of complex, conflicting, and illogical commands, layered over decades via congressional policies and court decisions, and without the consent of tribal nations."

It recommended that tribes in so-called P.L. 280 states be allowed to opt out of state jurisdiction altogether — with or without state consent.

The Hoopa Valley tribe had worked out a solution held up as a model. But Downey told the crowded meeting in Hoopa that it was simply no longer working.

Thanks to a county ballot measure that reversed four years of "heavy duty budget decline," Downey this month assigned three full-time deputies to the region in hopes of "getting back to the business of law enforcement — high visibility and responding to calls for service."

The presence had already led to arrests, among them robbery suspects found with drugs and outstanding warrants at the Hoopa shopping center, he said Friday.

Downey has said he remains open to a renewed agreement with the tribe if at least four tribal officers pass his background checks and field training, share a dispatch and reporting system, and — most controversially — answer to his command staff.

But trust is lacking.

"I think the sheriff is acting in very poor faith ... and even crippling the safety of this community further," said Richard C. Blake, the tribe's chief judge. "Tribal police and tribal court issues are not going to go away, and instead of trying to jockey for authority, true agreements need to be reached."

Blake is concerned that deputies won't make arrests when domestic violence protective orders issued by his court are violated. Downey said his department will continue to honor those orders.

Jackson, the recently elected chairman, has moved to beef up the force. Last week, the tribal council approved a \$1.7-million law enforcement budget for 2016 — a nearly \$500,000 increase over this year — which is expected to boost salaries and pay for a chief, lieutenant, three sergeants and nine officers. Five officers are expected to graduate soon from a state-certified training academy.

The tribe is also pursuing other avenues to gain greater law enforcement authority on their lands, even if Downey declines to re-up the agreement.

The Bureau of Indian Affairs has agreed to train and deputize Hoopa Valley officers to enforce certain federal laws. And Hoopa Valley is among three California tribes that have applied under the 2010 law for the federal government to share responsibilities for such enforcement. That would pass more tribal cases off to federal prosecutors.

Feelings are mixed. Mary Jane Aubrey, who manages the tribe's Tsewenaldin Inn, said running a business here is "really hard" because of loitering, drug use, panhandling and theft. She wants improvements but said that as outsiders, sheriff's deputies "don't care about our people."

"Our tribal police are ours," she said. "They know who's on drugs, who's lying to them, which families are good, which families are bad."

At the recent community meeting, tribal members spoke of calling tribal dispatch, only to be told to call the sheriff, and then be told by sheriff's dispatch to call the tribal police. They recounted uninvestigated crimes, and stressed the need for quick response to family violence.

Pamela Risling, who directs the tribe's domestic violence and sexual assault program, voiced support for the training and discipline that Downey has called for. She said the tribe and the sheriff need to work together, considering he has the legal mandate to call the shots.

"We deserve the same service as people in Eureka," she said. "Whether or not we like it, we are a P.L. 280 state."

Surber is conflicted. The night she brought her son home from the hospital, someone fired shots at the house, she said, and it took a deputy more than two hours to arrive.

"As a tribal member, I don't like to see the county pull the agreement, because of our sovereignty," she said. "As a community member, I just want someone to respond."

Yakama Tribe To Get Authority For Some Court Cases

[Bellingham \(WA\) Herald](#), October 21, 2015

Some civil and criminal cases involving members of the Yakama Nation will be returned to the tribe's jurisdiction, after being handled for decades by the state.

The federal Bureau of Indian Affairs on Monday granted the tribe's petition for what is called "retrocession."

Retrocession removes state jurisdiction over tribal members in certain cases but does not give the tribe any new jurisdiction over nonmembers. It will affect cases such as car crashes, domestic violence calls and truancy complaints.

Major crimes by tribal members will continue to be handled by the FBI or other federal authorities.

"It is truly a great day for the Yakama People," Tribal Council Chairman JoDe Goudy said in a statement. "For decades, our nation has been denied basic rights of self-governance within our own lands."

The Yakima Herald-Republic reported (<http://bit.ly/1LITn2o>) officials for Yakima County were concerned that details still needed to be worked out.

County Prosecutor Joe Brusic said it's unclear how tribal and county law enforcement officers are going to make sure each case gets into the right jurisdiction.

"I want to do everything possible in my role as prosecutor to see that retrocession works, but I believe we've got a lot of work to do," Brusic said.

Brusic is most concerned about traffic crimes, such as DUIs.

Under retrocession, if a sheriff's deputy pulls over a tribal member suspected of driving under the influence, the deputy would have to call tribal police to make the arrest, Brusic said. But if the suspect decides the deputy can't arrest him, he could drive away, Brusic said.

The head of the BIA praised the county's support for retrocession and acknowledged the concerns in his Monday letter to the Yakama Nation. Assistant Secretary of Indian Affairs Kevin Washburn said the agency could facilitate meetings but is not requiring agreement before the retrocession takes full effect in April.

"It would constitute extreme hubris for a federal official more than 2,500 miles away in Washington, D.C., to attempt to resolve disputes between neighbors in the Yakima Valley," Washburn wrote.

Retrocession also will change which courts try some cases. For example, Yakima County Superior Court hears most vehicular homicide cases, even those involving only tribal members. Now it's unclear whether the tribal court or the federal court would handle those cases, Brusic said.

Retrocession was approved at the state level in January 2014 when Gov. Jay Inslee signed a proclamation that returned to the Yakama Nation authority over school attendance, domestic relations, mental illness, juvenile delinquency, adoption, public assistance, and motor vehicle operation for tribal members on tribal lands.

Yakama Tribe To Get Authority For Some Court Cases

[Clark County \(WA\) Columbian](#), October 20, 2015

YAKIMA — In a move long sought by the Yakama Nation, federal officials have approved returning authority to the tribe for certain civil and criminal cases involving tribal members that have been handled by the state for decades.

Monday's move was praised as a victory for tribal sovereignty by the Bureau of Indian Affairs, which granted the tribe's petition for retrocession.

The Yakima Herald-Republic reported that officials for Yakima County were concerned that the petition was approved before law enforcement protocols had been worked out for the reservation that both tribal members and nonmembers call home.

The decision removes state jurisdiction over tribal members only in certain cases and does not give the tribe any new jurisdiction over nonmembers. It will affect cases such as car crashes, domestic violence and truancy complaints.

Washburn Accepts State's Retrocession Of Authority Over Yakama Nation

[Native American Times](#), October 21, 2015

WASHINGTON – Assistant Secretary – Indian Affairs Kevin K. Washburn today announced that the Department of the Interior has accepted from the State of Washington the partial civil and criminal jurisdiction it held over the Confederated Tribes and Bands of the Yakama Nation. The state has held this authority over the Yakama Nation, a federally recognized tribe located in the southwestern portion of Washington, for more than half a century.

"While tribal self-governance has long been the Federal Government's guiding principle for Federal Indian policy, it has been slow in coming in the area of criminal justice," Washburn said in a letter conveying the decision to the Yakama Nation. "We believe that this step will advance tribal self-governance and tribal sovereignty for the Nation. More importantly, we believe that it will produce improved public safety for the Nation and its people."

The Yakama Nation resides on a reservation comprised of over 1.1 million acres, which was established in 1855 by a treaty signed by Washington Territory Governor Isaac Stevens and tribal representatives. The Yakama Reservation is located on the east side of the Cascade Mountains in Yakima and Klickitat counties.

In 2012, the Washington State legislature enacted legislation providing a path for the state and tribal nations to follow in addressing retrocession. In July 2012, the Yakama Nation filed a petition for retrocession with the governor that was followed by government-to-government consultations with the state. In 2013, the Nation entered into a memorandum of understanding with Yakima County regarding the procedures to serve state court arrest warrants on tribal members on trust land within the reservation.

After following the procedures set forth in the state's bill, which included a six-month extension by the state, the governor in January 2014 submitted her proclamation on retrocession to the Secretary of the Interior for approval. Since that time, the Bureau of Indian Affairs' Office of Justice Services (OJS) has been engaged with the Yakama Nation Tribal Police Department and Corrections to determine the capacity of the Nation's law enforcement services. In preparation for retrocession, the Nation committed additional resources to its law enforcement services, nearly doubling the size of its police department by funding 10 new officer positions.

In September 2014, OJS finalized an assessment of the police department which found that it would be prepared to handle increased responsibilities as a result of retrocession.

In addition, OJS began an assessment of the Yakama Nation Tribal Court in December 2014, which provided recommendations for improving tribal court operational activities and assisted in developing a strategic three- to five-year plan for it. In May 2015, OJS issued the assessment and strategic plan, which included findings and recommendations, resulting in one-time federal funding to improve the court that will help the Nation further the pursuit of justice and ensure that the rights of individuals are protected.

Washington is one of 16 states authorized by Congress under Public Law 280 (67 Stat. 588), enacted in 1953 during the period in federal Indian policy known as the Termination Era, to assume criminal jurisdiction over American Indians on federal

Indian reservations and to allow civil litigation that had come under tribal or federal court jurisdiction to be handled by state courts.

Among other purposes, Public Law 280 altered criminal jurisdiction on federal Indian lands by transferring it from the federal government to certain states. The law has been widely criticized by tribes and states as creating more harm than good, such as gaps in jurisdiction. Today's decision attempts to remedy some of the jurisdictional problems Public Law 280 created on the Yakama Reservation.

The states required by Public Law 280 to assume civil and criminal jurisdiction over federal Indian lands were Alaska (except the Metlakatla Indian Community of the Annette Island Reserve, which maintains criminal jurisdiction), California, Minnesota (except the Red Lake Reservation), Nebraska, Oregon (except the Warm Springs Reservation), and Wisconsin. In addition, the federal government gave up all special criminal jurisdiction in these states over Indian offenders and victims. The states that elected to assume full or partial jurisdiction include Arizona (1967), Florida (1961), Idaho (1963, subject to tribal consent), Iowa (1967), Montana (1963), Nevada (1955), North Dakota (1963, subject to tribal consent), South Dakota (1957-1961), Utah (1971) and Washington (1957-1963).

In 1968, a legislative shift occurred when Congress authorized certain of these states to retrocede their civil and criminal jurisdiction back to the United States via the Secretary of the Interior.

The Secretary is authorized to accept retroceded authority from a state after consultation with the U.S. Attorney General, and the federal government has done so for 31 tribes since 1968. The most recent retrocession prior to today's announcement occurred when the State of Nebraska retroceded its civil and criminal authority over the Santee Sioux Nation in 2006.

While there are misconceptions about what "retrocession" actually entails, it does not change the boundaries of a tribe's reservation nor expand or contract a tribe's formal legal authority or jurisdiction. The tribe's jurisdiction will simply no longer be concurrent with the state's – instead, tribal jurisdiction will be exclusive for certain purposes. Retrocession is accepted by the Secretary of the Interior in accordance with terms set forth in a proclamation by the governor of the state retroceding its jurisdiction.

As required by Executive Order, the Interior Department consulted on the retrocession request with the U.S. Department of Justice, which recommended a six-month waiting period between the date of acceptance and the actual transfer of jurisdiction in order to allow for an orderly transfer of authority from the State of Washington to the federal government and to ensure no jurisdictional gaps develop as a result. Accordingly, Interior's decision is that retrocession will be fully implemented as of 12:01 a.m. PST on April 19, 2016.

The Assistant Secretary – Indian Affairs oversees the BIA, which is headed by a director who is responsible for managing day-to-day operations through four offices – Indian Services, Justice Services, Trust Services, and Field Operations. These offices directly administer or fund tribally based infrastructure, economic development, law enforcement and justice, social services (including child welfare), tribal governance, and trust land and natural and energy resources management programs for the nation's federally recognized American Indian and Alaska Native tribes through 12 regional offices and 81 agencies.

The BIA Office of Justice Services' mission is to enhance public safety and protect property in Indian Country by funding or providing law enforcement, corrections and tribal court services to the nation's federally recognized tribes. It also coordinates emergency preparedness support on federal Indian lands by working cooperatively with other federal, state, local and tribal law enforcement agencies throughout Indian Country. It also operates the Indian Police Academy in Artesia, N.M., which provides training and professional development to BIA and tribal law enforcement personnel. Visit <http://www.indianaffairs.gov/WhoWeAre/BIA/OJS/index.htm> for more information about OJS and its work.

DOI Lets Wash. Give Up Jurisdiction On Yakama Reservation

[Law360](#), October 21, 2015

Law360, New York (October 20, 2015, 6:39 PM ET) – The U.S. Department of the Interior said Monday it has accepted from Washington an agreement ending the civil and criminal jurisdiction the state had held over certain offenses within the Yakama Nation, ending part of a highly criticized, decades-old policy that had given the state and the tribe concurrent jurisdiction over certain cases.

Under the agreement, the state will no longer be a principal authority on the Confederated Tribes and Bands of the Yakama Nation's reservation once the deal goes into effect in April 2016. The...

Yakama Tribe To Get Authority For Some Court Cases

[KNDU-TV Yakima \(WA\)](#), October 21, 2015

YAKIMA, WA.- It was a record summer for heat with temperatures in the hundreds, not to mention the state wide drought that took a toll on many crops and growers. However as we head into fall, apple orchards are closing up shop already, thanks to an early harvest. The apple harvest is now over about three weeks earlier than normal and while the apple commission says they saw the third largest crop this year in the state, coming in at 118 million boxes of apples, the sweltering heat ...

Yakama Nation Granted Jurisdiction Over Some Crimes On Reservation

[KUOW-FM Seattle](#), October 21, 2015

The Yakama Nation will have more control with its tribal police and courts over crimes committed on the nation's reservation. That's according to the federal Interior Department this week.

The Yakama Nation will have control over some crimes involving Native Americans, but other police agencies will still patrol portions of the reservation. Tribal leaders say it's a win to gain some control of their own land back.

But neighboring city and county agencies say they're worried about the logistics of sharing jurisdiction.

Yakima County prosecutor Joseph Brusich said his office and the tribal government haven't been communicating well for a couple years. He worries that under the new system for example, a native driver with a DUI could leave the scene of an accident if there wasn't a tribal officer there.

The federal government has given the tribes and overlapping agencies until April to work out the details.

The Yakama Nation did not respond to phone or email messages Tuesday.

Gillette Served Obama, Nation Well

[Bismarck \(ND\) Tribune](#), October 21, 2015

Jodi Gillette probably has been more involved in the Obama administration than any other North Dakotan.

Her association with Barack Obama began during his 2008 presidential campaign when she was in charge of statewide operations of the First American voting efforts. After Obama's election she joined the administration. First, Gillette served as an associate director of intergovernmental affairs at the White House in 2009-2010. In 2011, she joined the U.S. Department of the Interior as deputy assistant secretary for Indian Affairs and was appointed Special Assistant to the President for Native American Affairs in 2012.

Those positions gave her a voice in a White House that has seemed genuinely concerned about Native American issues. Last year the president and first lady visited Cannon Ball on the Standing Rock Indian Reservation. They visited privately with students, talked with leaders and attended a pow wow. They followed that visit with an invitation to some students to visit Washington, D.C. There also was a conference for students and others in Bismarck.

While Gillette couldn't be involved in issues related to the Standing Rock reservation since she's a member of the tribe, it wasn't a surprise when the reservation was selected for the presidential visit.

Gillette is proud of the administration's accomplishments. She was convinced during Obama's first campaign that he was sincere about his promises to help Native Americans. She points to several things that demonstrate Obama's support. The White House Tribal Nations Conference was started in 2009 with the goal of improving the dialogue between the administration and the reservations; the Violence Against Women Act was reauthorized in 2013 and included language allowing tribal jurisdiction in cases of women who are assaulted by non-tribal men on tribal lands; and two lawsuits were settled between the federal government and tribes with a combined value of more than \$3 billion expected to be sent to Native Americans.

The Tribal Nations Conference has won praise for providing a continuing conversation between the administration and tribal governments.

Gillette played an important role in this White House-tribal relationship and her voice has been heard.

Gillette recently left the administration and now splits her time between Bismarck and Washington. She's a member of the Washington-based law firm of Sonosky, Chambers, Sachse, Endreson and Perry LLP, serving as its policy adviser. The firm represents tribes for litigation, lobbying and economic development.

North Dakota should be proud of Gillette and her service in the administration. She's had a positive impact on national policy.

OFFICE OF INSULAR AFFAIRS

US Official Proposes Marshalls Fund Changes

[Radio New Zealand](#), October 21, 2015

A top US official has submitted a proposal to the Senate and House to allow the people of Bikini to use resettlement and relocation funds outside of the Marshall Islands.

Current law restricts resettlement funds for use within the Marshall Islands.

Assistant Secretary for Insular Areas Esther Kia'aina says it is an appropriate course of action to take regarding the welfare and livelihood of the Bikinian people.

The Bikinians were displaced by US nuclear weapons testing 70 years ago but are now looking at relocating again because of deteriorating conditions on Kili and Ejit Islands.

In addition to cramped living quarters and a lack of suitable sustainable resources, the islands have been experiencing more frequent storms and king tides resulting in salt water inundation and the destruction of crops.

Bikini Relocation Fund Changes Seen As 'Plan B' For Locals

[Radio New Zealand](#), October 21, 2015

A representative from Bikini Atoll says a proposal to allow people to use resettlement and relocation funds outside of the Marshall Islands is not wanted.

Currently, resettlement funds are restricted for use within the Marshalls but the Assistant Secretary for Insular Areas Esther Kia'aina says it is appropriate to open up the fund because of plight of the Bikinian people.

The Bikinians were displaced by United States nuclear testing 70 years ago but are now looking at relocating again because of increased flooding and deteriorating conditions on Kili and Ejit Islands.

Bikini liaison officer Jack Niedenthal says the US should take full responsibility for any resettlement including providing extra financing.

"We still got a ways to go, we still have to do some more lobbying and some more talking to people in Washington to make them understand that what's being proposed by the assistant secretary is what we view as 'Plan B'. It's not ultimately what we want in terms of helping our people."

Mr Niedenthal says current resettlement funding is already the Marshall Islands' right. Related

Chinese Support For The Pacific Region Continues

[Marianas Variety](#), October 21, 2015

SUVA, Fiji (Press Release) — China and the Pacific Islands Forum Secretariat further strengthened their relationship on Friday when the two met at a ceremony to hand over \$1.05 million to assist the Pacific region.

Forum Secretariat Secretary General Meg Taylor and Chinese Ambassador to Fiji Zhang Ping attended the ceremony and delivered speeches respectively.

Zhang reiterated his nation's ongoing interest in the region saying, "China attaches great importance to the South Pacific region. The Chinese side stands ready to enhance mutual understanding and cooperation with Pacific Island Countries and contribute to the development and capacity building in the region."

Accepting the contribution, Taylor said: "I warmly welcome this support that assists the Forum in advancing regional integration as well as helping member countries achieve sustainable development."

The handover ceremony provided opportunity to raise key Pacific region priorities identified through the Framework for Pacific Regionalism such as climate change and ICT.

"We seek your support for the Forum's position going into the COP21 negotiations in Paris, as articulated in the Pacific Islands Forum Leaders Declaration on Climate Change Action issued in Port Moresby last month," Taylor told Zhang.

She added, "China's commitment to support Pacific island countries to achieve greater ICT connectivity is to be commended and the special loans you have made available for ICT infrastructure connectivity, improving broadband networks, encouraging on-line education services, and ICT enterprises, are a generous initiative."

China became a Forum dialogue partner in 1990. Since then it has developed an important economic relationship with the region, particularly through its dedication to trade development.

"China has made an impressive commitment to advance trade and investment with the Pacific island countries. China's continuing support for the Pacific Trade and Invest Beijing is very much appreciated," said Taylor.

The financial support will be used to support activity by the China-PIF Development Cooperation Fund and the PT&I Beijing office and its activities.

Pacific-wide Talks Urged On Climate Migration

[Radio New Zealand](#), October 21, 2015

All countries in the Pacific are being urged to start discussions on how to help people forced to move from low lying atoll nations like Kiribati and Tuvalu.

184 million people worldwide were displaced by disaster between 2008 and 2014 and at special meetings in Geneva last week 110 countries gave the nod to a Protection Agenda for dealing with future migration challenges.

The experiences of small island countries which face rising seas due to climate change helped form the global action plan under the Swiss Norwegian Nansen Initiative

The Protection Agenda aims at collecting more information, improving humanitarian protection measures and better dealing with the risk of disaster back in home countries so people are not forced to move in the first place.

The Nansen Initiative's Walter Kaelin told Sally Round there's now a toolbox that can be adapted to each region's distinct challenges and needs.

WALTER KAEELIN: It is a document that brings together a lot of good, effective practices states have used, states have developed in addressing situations where they were faced with people coming from countries affected by disaster when they had to decide whether or not to admit them. But we were also looking at how to prevent displacement, for instance through integrating issues of human mobility into disaster risk reduction, climate change adaptation. We're also looking at how one can help people to get out of harm's way before the disaster strikes for instance by looking at planned relocations as you have in your region. For instance Fiji is already in the process of relocating 45 villages away from eroding coastlines but then also looking at migration as a way of helping people to move out of areas that are particularly affected by the effects of climate change and disasters.

SALLY ROUND: Does it also provide a kind of legal framework or is it more about providing experiences and practices and examples for countries to learn from?

WK: This was not an exercise that aimed at setting new standards, at developing new law but rather trying to provide a toolbox to governments but also to regional organisations, so in the current situation, in future situations one could go back to the experiences made by other countries in other parts of the world and try to use that. Beyond that we feel there are huge differences from one region to the other. You in the Pacific region are not faced with a lot of cross-border displacement which does occur for instance in Africa, the Horn of Africa and western Africa or in Central America. Your case is much more about the future prospects of some of these island states, low lying island states becoming uninhabitable and with this toolbox we hope we are able to trigger discussion at regional, sub regional, but also domestic levels.

SR: Did you have any ideas, solutions from those consultations that you've been having for the last three years around the world about how Pacific island countries can get through these major issues that they're grappling with?

WK: If you're looking at the Pacific island countries and their people, and their populations, these are people that really do not want to move. Most of them want to stay in their countries. They're attached to the land, but due to environmental factors but also other factors linked to their development or lack of development make it increasingly difficult for people. What the communities told us is 'we really don't want to become refugees' and what they meant was they don't want to have to wait til disaster strikes. They rather would prefer to have the option of being able to emigrate, be it temporarily, be it permanently at the time when they decide to do that and if you're looking at the situation in the South Pacific then for some of the islands and their people it's quite easy because of special ties. For instance in New Zealand if you're talking about Niue or the Cook Islands people can easily emigrate to your country (New Zealand). Marshall Islanders, they can go to the United States but Kiribati and Tuvalu which are the most affected, they don't have those opportunities. I think their programmes like the Pacific access quota in New Zealand or seasonal worker programmes targeting vulnerable Pacific islands that do exist in Australia are good practices, good approaches. I think it's important it's not just New Zealand and Australia, it's also countries such as Fiji and others who even might be interested to receive people from countries like Tuvalu and Kiribati because of cultural ties, because they are interested to get a workforce or increase their populations. What I think is important in the South Pacific context is a dialogue between countries on how to facilitate migration because if this is not taking place then we might end up with irregular migration or we might end up with people hit by disaster ending up in humanitarian crisis situations so it's better to start a discussion now and one framework for such discussions that is quite adequate in my perspective would be the Pacific Islands Forum.

Marshalls Journalist Speaks On Climate Issues, Corruption In Pacific Islands

[Marianas Variety](#), October 21, 2015

HAGĀTŊA (The Guam Daily Post) — Author and journalist Giff Johnson spoke to students at the University of Guam on Monday evening about climate change and development in the Pacific islands.

His lecture, entitled "Idyllic No More: Pacific Island Climate, Corruption and Development Dilemmas," is based on his latest book — a compilation of essays detailing the looming climate threat to the region, its booming fishing industry, and the U.S. nuclear test legacy in the Marshal Islands.

In an interview with the Post, Johnson said people the world over should be concerned with climate change. The issue, he said, is how to handle rising sea levels and erratic weather patterns that seem to be escalating with changing temperatures. These factors have contributed to what Johnson calls climate-driven migration from remote Pacific islands to Guam and mainland U.S. Improving the lives of residents on these islands would help mitigate out migration.

The United States has a Compact of Free Association or COFA Freely Associated States that allows these residents to freely travel within the U.S. and its territories. The FAS are the Federated States of Micronesia, the Republic of the Marshall Islands and the Republic of Palau. Guam and the CNMI receive Compact Impact funds to mitigate some of the cost associated with taking in these residents but the funds have historically been much lower than actual costs.

Johnson believes that in order to improve the life of remote island residents and minimize migration, investment must be made not only to solar and wind power to combat climate change but to technology that will lessen the burden of living on more remote islands.

"For example this El Niño that we're in right now is predicted to cause a very long and serious drought," Johnson said. While Guam has various water resources available to it, remote islands are more or less completely dependent on rain water.

There have been investments made into solar or wind powered reverse osmosis machines that were placed in several remote islands in the Marshals. These machines produce drinking water out of sea water and remove the threat of a drought, Johnson said. "We need to get this kind of (technology) out to many of these remote islands."

To mitigate the cost of FAS citizens already on Guam, the CNMI and Hawaii, Johnson said something that would have significant impact is the reinstatement of Medicaid benefits for COFA migrants. "In 1996 the U.S. Congress cut off Medicaid access for people from the FAS...that lack of Medicaid coverage means (people seek health care later which) requires higher costs to hospitals in Guam and Hawaii," Johnson said.

Currently, initiatives by both the Guam and Hawaii delegations are pushing to reinstate Medicaid coverage for COFA migrants.

But the responsibility of improving life for FAS citizens doesn't rest solely with the U.S or other outside entities. Johnson said a fair amount of donor aid does reach the FAS but issue lie with mismanagement on the part of local governments. "Both the Marshals and FSM have tens of millions of dollars sitting there because of management issues with construction projects," Johnson said. Proper management of funds would create hundreds of jobs and provide incentive for residents to stay in their respective islands, he added.

A particular source of growth for the FAS could come from the fishing industry. Because FSM, the Marshals and Palau are part of the Parties to the Nauru Agreement, they are among 8 countries that control pricing on tuna fishing. In 2010, PNA brought in \$60 million. That amount has since jumped to about \$350 million. According to Johnson this presents an opportunity for institution like the University of Guam to provide education on managing and developing the fisheries business.

Corruption also plays a role in the mismanagement of funds. Johnson said that island governments in the past saw government employment as a means of spreading donor aid. Workers were hired with little focus on qualifications. But in recent years, donors have become more intent on results. This poses a challenge to government agencies that may have offices filled with workers, but not necessarily the best set of workers for the job. What results is a public that sees very little improvement despite outside support. "That's why I say the issue in the FAS has more to do with management and less about (needing) more money," Johnson said.

The problem is compounded in smaller islands by reluctance to voice open criticism of government or leaders. "In places like the Marshall Islands (reluctance is) pretty extreme given the cultural norms of not criticizing leaders," Johnson said. He said a significant difference between Guam and islands in the FAS was more public engagement stemming from an American style of dealing with government issues. "Unfortunately, (less engagement) ties in to people not reacting to these problems and not getting things changed," he added.

Rising Seas Are Already Damaging These Pacific Islands

[National Geographic](#), October 21, 2015

"Garlands of the gods" is how Kiribati poet Teweiariki Teaero describes the atolls of his homeland. And from the air, that is how they look, with a smoke ring of clouds above lush green slivers of land. How fragile they seem!

Built by the sea, they are increasingly being reclaimed by the sea. In February 2015, high spring tides coincided with storm-generated swells to flood homes and damage roads and seawalls in Kiribati's capital, Tarawa. (Read more about the threats to the island nation.)

When I arrived in April, repair work was still continuing, but I knew it was only a matter of time before the ocean challenged the islands' defenses once more. (Read our special issue on climate change.)

Despite the threat from the sea—which will only increase as climate change drives sea levels higher—the people possess depths of resilience and self-confidence. “I see adaptation as not just about seawalls but about revisiting our traditional knowledge systems,” Teaero told me. “We need the collaboration of our international partners, but an active collaboration as people who are empowered to tackle our own problems.”

A combination of science and traditional wisdom gives hope that, as Teaero writes in one of his poems, these islands will “rise over troubled seas.”

TACKLING AMERICA’S WATER CHALLENGES

New Melones Pulse Flows Begin Today

[Sonora \(CA\) Union Democrat](#), October 21, 2015

More than 7 billion gallons of water is scheduled to be released from New Melones Reservoir beginning today to ensure flows in the Stanislaus River will keep temperatures cool enough for adult salmon migrating up the river to spawn this fall.

Oakdale Irrigation District and South San Joaquin Irrigation District, which together hold senior water rights to the first 600,000 acre-feet stored in the 2.4 million acre-foot reservoir each year, announced the plan in a press release last week. The districts said it would benefit river conditions and fisheries, as well as the needs of agriculture and more than 200,000 residential customers downstream.

“This agreement shows that, with cooperation and some give and take, the needs of fish and ag can be met,” OID General Manager Steve Knell stated in the press release. “If the drought continues, we’ll need more of this type of cooperation — not less.”

New Melones contained 276,692 acre-feet of water as of Monday morning, according to the state Department of Water Resources, about 12 percent of its total capacity and 21 percent of its average historical capacity for this time of year.

The total “pulse flow” set to begin today — 23,000 acre-feet — is enough to fill about 23,000 football fields one-foot deep in water. It’s also about 6,000 acre-feet more than Tuolumne Utilities District, the county’s largest water purveyor, uses on average each year to serve roughly 44,000 residents.

Earlier this year, the irrigation districts sparred with the U.S. Bureau of Reclamation — which manages New Melones Reservoir — over spring pulse flows that they feared would leave as little as 147,000 acre-feet in the reservoir by the end of September.

However, “aggressive conservation efforts” by OID and SSJID as well as “better-than-expected spring and summer runoff” helped to create the surplus, the press release stated.

The districts agreed to use the unanticipated savings to help the Bureau of Reclamation send the required pulse flow down the river to attract adult salmon returning from the ocean to spawn.

According to the press release, “west side” water users will divert the released water farther downstream after it passes through the Stanislaus and lower San Joaquin rivers and have agreed to compensate the districts.

Federal policies requiring such pulse flows have drawn the ire of local residents and elected leaders, who have argued that releasing so much water during a drought doesn’t make sense.

Congressman Tom McClintock, R-Roseville, introduced legislation in the U.S. House of Representatives earlier this year called the Save Our Water Act that would suspend pulse flows in areas affected by drought.

Though no action has been taken since the bill was introduced in March, McClintock says he’s hopeful the House will vote on it sometime before the end of the year.

Supes Vote To Oppose Delta Tunnels Plan

[Lodi \(CA\) News-Sentinel](#), October 21, 2015

STOCKTON — At a meeting on Tuesday, the San Joaquin County Board of Supervisors voted to adopt a resolution in formal opposition of California WaterFix, also known as the twin tunnels plan.

“The WaterFix is just a thinly veiled version of the former (Bay Delta Conservation Plan) and continues to push the fatally flawed twin tunnels, which will simply sacrifice one region of California for the benefit of another,” said Supervisor Kathy Miller.

Supervisor Bob Elliott added that the plan will add no new water to the state’s supply, calling it a “multibillion-dollar smoke-and-mirrors scheme.”

Comments were offered by both board members and members of the public. The collected comments will be submitted on behalf of the County of San Joaquin along with the Central and South Delta water agencies.

RENEWABLE ENERGY

Environmental Update On Offshore Wind

By James A. Bacon

[Bacon's Rebellion \(VA\)](#), October 21, 2015

Alstom wind turbine like that contemplated for installation off Virginia Beach.

by James A. Bacon

Judging from comments made in a Environment Virginia-sponsored webinar held this morning, environmentalists, the McAuliffe administration and Dominion Virginia Power are operating on the same wave length when it comes to developing offshore wind power in Virginia. If environmental groups have big differences with Dominion on how to proceed, no sign of criticism surfaced in the webinar presentations.

The main focus of environmentalists, as it is for Dominion, is bringing down the cost of offshore wind power. The top priority nationally is building a big enough pipeline of wind power projects off the Atlantic Coast to persuade manufacturers, specialty vessels and others in Europe's established wind-power supply chain to create a presence on the U.S. East Coast. The existence of a supply chain, along with continued technological development, could make offshore wind power far more cost competitive in the U.S. than it is today.

Here in Virginia, the top priority is ensuring that Dominion builds two experimental turbines off Virginia Beach that will provide the data needed to optimize the development of hundreds of wind turbines in a subsequent project potentially large enough to power 700,000 homes. The big hurdle is persuading the State Corporation Commission that such a massive investment would constitute an acceptable trade-off between cost, reliability and environmental goals.

David Carr, general counsel for the Southern Environmental Law Center, provided an overview of Dominion's offshore wind initiatives. Dominion solicited bids to build a two experimental turbines off the Virginia coast. (The turbines would test an unproven hurricane-resilient design and a new turbine foundation.) The original plan was to seek SCC approval in 2015, said Carr, but the low bid of \$375 million to build the two turbines far exceeded the original estimate of \$230 million. Dominion has restructured the contract by breaking it into four components in the hope of stimulating more competitive bidding and reducing the risk premiums bidders build into their offers. The new goal is to file with the SCC by June 2016.

Hayes Framme, advisor for infrastructure and development with the Secretariat of Commerce and Trade, said the McAuliffe administration played a key role in moving the Dominion's experimental-turbines project forward by negotiating a complex lease with the Bureau of Ocean Energy Management and other federal agencies to lease the ocean bottom where the turbines would be located. "Without this lease," he said, "we would not be able to get these turbines in."

An offshore wind farm would advance two McAuliffe administration goals: increasing the state's commitment to renewable energy and also promoting economic development. A study completed this summer found that Virginia is "uniquely positioned" to house "at least a portion, if not most, of the supply chain" supporting an East Coast offshore wind industry, Framme said. Virginia ports are located in the Mid-Atlantic, providing convenient access to projects to the north and south, and it has a large existing ship-repair infrastructure.

"Having a commercial deployment off Virginia's coast sends a signal that we are serious," Framme said. "If we don't lay the foundation now, it will be more difficult for us to take advantage of that opportunity when it does come."

Virginia's projects are not sufficiently large by themselves to coax the offshore wind supply chain to bolster its U.S. presence. That will take commitments from multiple states. Fortunately, that commitment seems to be forthcoming, said Stephanie McClellan, director of a special initiative on offshore wind housed at the University of Delaware. The states of New York, Massachusetts, Rhode Island, Maine and Maryland all are actively exploring offshore wind opportunities. The state of New York has set a goal of 50% renewables by 2030, while New York City has established a goal of 100% renewables for electricity consumed by municipal operations.

To build a supporting infrastructure for offshore wind, said McClellan, eastern U.S. states need to provide market visibility and revenue certainty for a volume of projects over time, as well as more data on site-specific conditions such as wind speeds and wave size. The cost of wind power dropped "precipitously" in Europe as the industry gained scale; it will do so in the U.S. as well, she said.

Bacon's bottom line: I posed one question to the presenters: Given the intermittent nature of wind production, has anyone studied the impact of a massive wind farm on the reliability of offshore electricity production in Virginia? The short answer: No. However, presenters noted that European countries have integrated large off-shore wind projects into their power grids, and PJM Interconnection, the group that ensures grid reliability in the Mid-Atlantic and parts of the Midwest, including Virginia, has looked into the issue. There are currently no comments highlighted.

ONSHORE ENERGY DEVELOPMENT

Interior Dings Chesapeake \$2.1M For Shoddy Reporting

[Greenwire](#), October 20, 2015

The Interior Department yesterday announced a \$2.1 million civil penalty against Chesapeake Energy Corp. for misreporting the amount of gas it produced and sold from American Indian lands in Oklahoma. The Oklahoma City-based company failed to comply with a 2011 order that found “systemic errors” in the company’s monthly production reports for more than 100 Indian leases, according to Interior’s Office of Natural Resources Revenue. Chesapeake agreed to amend the monthly reports, but it continued to maintain inaccurate information on the agency’s data systems, ONRR said. The company was assessed a penalty based on “knowing or willful maintenance” of the inaccurate information, ONRR said.

Libs Win In Canada

[Politico](#), October 21, 2015

With help from Andrew Restuccia and Darius Dixon

CANADIANS ELECT GREENER GOVERNING PARTY: Canadians yesterday ushered into power the Liberal Party and its young leader, Justin Trudeau, in an election where energy and environmental issues played a larger role than they have on the campaign trail here. Trudeau’s government would be friendlier to climate policies meant to limit greenhouse gas emissions than its predecessor, as Pro’s Elana Schor reports. The Liberals “would unseat Prime Minister Stephen Harper’s Conservatives, whose nine-year reign has been marked by notable friction with the U.S. over Obama’s slowness to decide on” the Keystone XL pipeline. The CBC projected soon after the polls closed last night that Trudeau’s party won enough seats to form a majority government.

Story Continued Below

Does this mean the end of the Keystone Saga? HAHAHAHAHhahahahah, oh dear reader, you are a wit. Of course not. As Elana writes, “While Trudeau is also pro-Keystone, a fast rejection of the pipeline by Obama could give a new Liberals government time to pivot away from the controversial project to open a new chapter in continental relations.” But whatever the president decides — whether it’s this week, to let Trudeau start with a clean slate, or next year — the pipeline likely will find itself facing another lengthy battle in court.

And the ramifications for climate talks could be just as significant, per Elana: “the Canadian Liberals have vowed to be stronger on the environment than Harper has been,” but “they also promise to give individual provinces greater power to decide on their own carbon-cutting strategies.”

BIDEN, OBAMA AND KERRY TO CHAT TODAY: Whatever could the President, the Vice President, and the Cabinet official with the power to approve border-crossing infrastructure permits have to discuss in the Oval Office the day after the Canadian Elections? The Stanley Cup prospects of the Bruins, Blackhawks, and Flyers, perhaps? The literary merits of Margaret Atwood’s MaddAddam Trilogy? Perhaps ... perhaps a certain pipeline controversy? Maaaaybe? Nah. The White House wouldn’t say what the trio would discuss, only that the meeting is scheduled for 3 p.m. and reporters aren’t invited. Has to be the hockey, right? The Blackhawks are favored to win it all.

WELCOME TO TUESDAY! I’m your host Eric Wolff, and if Morning Energy was late to your inbox this morning, blame the creators of the Energy Policy Simulator (see below). It’s like the Legend of Zelda, but for energy policy nerds. I may be bleary-eyed and my fingers may be covered in Dorito dust, but you can still send your energy tips, quips, and comments to ewolff@politico.com, or follow us on Twitter @ericwolff, @Morning_Energy, and @POLITICOPro.

TOP CLIMATE DIPLOMAT TO HAVE STARE DOWN WITH SENATE: Todd Stern, the State Department’s top global warming negotiator, will face Republican critics of the Obama administration’s push for a new international climate change agreement during a Foreign Relations subcommittee hearing today. Sen. John Barrasso, the top Republican on the subcommittee, is one of the most vocal opponents of Obama’s climate agenda. He and other GOP lawmakers are sure to ask Stern pointed questions about whether the deal will actually make strides in cutting emissions, whether China is serious about its climate pledges and how the United States can promise money to developing countries when Congress controls the purse strings. But Stern has been working on international climate issues for years, and he’s not likely to be easily rattled by the questions. Stern will also likely have back-up from climate advocates like Sens. Tom Udall, Barbara Boxer and Ed Markey, who all sit on the subcommittee. The hearing comes as international diplomats, including Stern’s deputies at State, are fighting over a draft negotiating text at a five-day session in Bonn, Germany, this week.

NOM NOM NOM NOM NOM: The Senate Energy and Natural Resources Committee is scheduled to hear from a crowded table of nominees this morning, including those for the USGS and the departments of Energy and Interior. There may not be too

many fireworks over the six candidates but some of the positions have had some longstanding issues. For one, Victoria Wassmer, an FAA official, was tapped last year to be CFO for the EPA but she never got floor time. This time around, she's been asked to be DOE undersecretary of energy for management and performance, a position Energy Secretary Ernest Moniz created as part of a leadership reorganization plan but that has never been filled. A name many people are familiar with on today's agenda is Mary Kendall, the longtime acting Interior inspector general who tangled a bit with House Republicans. She's been nominated to officially take the top IG position. Cherry Murray will also be at the witness table in her bid to be the Science Office director at DOE, a position that's been vacant since April 2013 and whose previous contender languished for more than a year. Also testifying today are Suzette Kimball for USGS director, Kristen Sarri for assistant secretary of Interior, and John Kotek for DOE's top nuclear energy official. The hearing starts at 10 a.m. in Dirksen 366.

SHALL WE PLAY A GAME? HOW ABOUT A NICE GAME OF CLIMATE CHANGE POLICY? Think of it like a low-fi SimCity, except instead of municipal policy, you get to tweak nationwide approaches to reduce greenhouse gas emissions. Ever wondered just how a \$30 carbon tax would do? How about \$52? What if you focus on making cars use less gasoline? Or investing more in solar and wind technology? You can see all of that in the immensely detailed Energy Policy Simulator, a tool being unveiled today at an event in D.C. by Energy Innovation, a climate change policy think tank based in San Francisco. The group dedicated \$1 million and a team of five programmers plus a rotating array of outside help to develop a digital tool that shows the impact of an astonishing variety of climate change policies. "I think people fall in love with specific policies, but they don't have objective ways to measure the results of policies," Hal Harvey, CEO of Energy Innovation, told ME. The tool provides immediate feedback on the effect of different policies at different scales. It's probably NSFW, if your intent is to do some work that day.

No "foot on the scale." The goal was to do an objective assessment of any number of different policies, Harvey said. To make sure they weren't skewing the model, they made it open source, so anyone can look at the programming and the model's math. Though the webtool is locked into U.S. data, anyone can download a desktop version and replace the U.S. data with other national data. The desktop version allows even more policy option. Considering that the web tool allows users to devote research money to reducing livestock flatulence, ME's mind boggles at what would be more detailed.

If you go to the unveiling: 10:30 a.m., Rayburn 2226

BUSINESS LEADERS 'AFFIRMED' BY WHITE HOUSE EVENT: ME spoke to some of the business leaders who pledged to reduce their carbon footprint as part of an event at the White House yesterday. It was "certainly a reaffirmation that we're on the right track," Hugh Welsh, president of DSM North America, told ME. While 81 companies pledged to take action, Welsh said he was irate at other executives who work to block climate change policies. "If they can't embrace some of the initiatives, at least get out of the way, and don't lobby against some of the changes we'd like to see." Ikea U.S. president Lars Petersson said the "very strong commitment from the US government" and private sector is an important starting point, but he said he was surprised the event didn't address a few issues, like waste management and squeezing carbon out of the supply chain.

GAS UTILITIES VOLUNTEERS TO BE SAFER: American Gas Association" is announcing an update to its "Commitment to Enhancing Safety" today, including new physical and cybersecurity efforts, implementation of leading practices related to pipe installation and an initiative to continue the development of a diverse and inclusive workforce capable of operating and maintaining the 21st century technology and infrastructure that delivers clean natural gas. It has also set up a peer review program in which natural gas utilities review each other's safety programs. The announcement follows the release of new inspection rules from the Pipeline and Hazardous Materials Safety Administration earlier this month.

GAS TERMINAL APPROVED: The Department of Energy authorized Emera CNG, LLC to export up to 8 million cubic feet per day of domestically produced compressed natural gas for 20 years from Emera's proposed terminal in Palm Beach, Fla.

THERE THEY GO AGAIN: CHESAPEAKE ENERGY FINED BY ONNR: The Office of Natural Resources Revenue hit Chesapeake Energy with a \$2.1 million civil penalty for underreporting its natural gas production and sales for leases on Indian land. It's not the first time Chesapeake has heard from the tiny agency. In 2013, ONNR fined the company \$765,000 for exactly the same sin. Of course, none of those are much compared to the \$10 million fine levied by EPA in 2013.

HYDRO WANTS SOME RESPECT, LAUNCHES CAMPAIGN: The National Hydropower Association is announcing an ad campaign today intended to persuade Congress to go ease permitting requirements. "As a nation, if we are serious about decreasing carbon emissions and expanding clean energy solutions, we simply can't allow hydropower to be hindered by process that can take up to ten years," Linda Church Ciocci, NHA Executive Director, said in a statement. The campaign, which runs into five figures, includes a website, a video, and paid context ads.

Chesapeake Fined \$2.1M For Repeatedly Underreporting NatGas Volumes In Oklahoma

[Natural Gas Intelligence](#), October 21, 2015

Chesapeake Energy Corp. has been fined more than \$2.1 million by the U.S. Department of Interior for repeatedly underreporting natural gas production volumes in Oklahoma.

Interior's Office of Natural Resources Revenue (ONRR) said Monday that Chesapeake had failed to comply with an October 2011 order that found "repeated, systemic errors" in monthly reporting of gas produced and sold from more than 100 leases on land owned by tribes and individual Native Americans. ONRR had ordered Chesapeake to restructure its monthly reporting system as part of a review to correct any unreported/misreported volumes.

"While the company assured ONRR it had corrected the reports, follow-up checks still found additional errors," said Interior's Paul A. Mussenden, deputy assistant secretary for natural resources revenue management. "Correct royalty reports, especially on American Indian leases, are essential for ONRR to ensure all royalties are paid, to provide reliable data used by ONRR's audit and compliance teams, and to provide accurate data to the American public."

Interior eventually obtained Chesapeake's compliance to amend monthly reports but it "continued to maintain inaccurate information on ONRR data systems for an extended period," officials said. The fine, which covers misreported amounts produced on the individual leases only, is for "knowing or willful maintenance of this inaccurate information."

After Interior issued its initial request in October 2011, Chesapeake informed ONRR in May 2012 that all of the corrections required had been submitted. However, follow-up testing found more underreported volumes. The company then said it corrected those additional errors, but further reviews found still more incorrect data.

Following the settlement announcement on Monday, a Chesapeake spokesman said the company looked forward "to further strengthening our relationship with the Department of the Interior."

Two years ago Chesapeake was fined \$765,000 for "knowing or willful submission of inaccurate information" of royalties on another Indian lease also in Oklahoma (see *Shale Daily*, April 3, 2013). In early 2014 the company also was ordered to pay \$428,400 for underreporting royalties on a tribal lease in Oklahoma dating back to 2005. In that case, ONRR said auditors found inaccurate reports and notified the company, but Chesapeake did not make the proper corrections.

Earlier this year Chesapeake agreed to pay \$119 million to settle a lawsuit with a private landowner in Oklahoma for allegedly underpaying gas royalties on nearly 12,000 wells over a 10-year period (see *Shale Daily*, Jan. 23). According to filings, Chesapeake Operating LLC agreed to pay for improperly deducting expenses for marketing, processing, compression and other midstream services for 11,800 gas wells. The lawsuit covered production from 2004 through 2014.

Company Fined \$2.1M For Under Reporting Gas From Indian Leases

[Native American Times](#), October 21, 2015

DENVER (AP) — Chesapeake Energy Corp. has been fined \$2.1 million for under reporting natural gas produced on Indian leases in Oklahoma.

The Department of Interior's Office of Natural Resources Revenue Office in Denver said Monday it issued the civil penalty against the Oklahoma City-based company for failing to comply with an October 2011 order requiring it to review the amounts reported for more than 100 leases. In a statement, the office said that Chesapeake said it complied with the order in 2012 but follow up testing found additional under reported volumes which were then corrected in 2013.

The 2011 order covered land owned by tribes and individual Native Americans. The fine covers misreported amounts produced on the individual leases only.

USGS Report States Earthquakes Coincide With Oklahoma Oil Booms

[KOCO-TV Oklahoma City](#), October 21, 2015

A study by the United States Geological Survey states that the earthquakes from the past 100 years seem to coincide with the oil boom in Oklahoma.

Okla. Regulators Shutter 3 More Wells Near Rumbling Pipeline Hub

[EnergyWire](#), October 21, 2015

Oklahoma oil and gas regulators dealing with a dramatic increase in earthquakes near the pipeline hub of Cushing have shut down three more disposal wells. Another well was shut down by the company that owns it after regulators said they were concerned it was drilled too deep. And the operators of seven other wells were told in a letter written Friday and released yesterday that they must reduce the volume of drilling waste that they inject deep underground. The Oklahoma Corporation Commission (OCC) says it has also told the operators of 13 other wells in the Cushing area that they may need to change operations in the future. The commission is directing wells within 3 miles of the recent earthquakes to shut in. Wells 3 to 6 miles from the shaking have to reduce volumes by 25 percent. Wells 6 to 10 miles away are on notice...The Department of Homeland Security has taken an interest in the earthquakes in the area because its facilities are considered critical national infrastructure, according to a paper by scientists from USGS and elsewhere published online last month.

FOIA FAIL: BLM Fails To Produce All Photos In Response To Sun Times' FOIA Request

[Fairfield \(MT\) Sun Times](#), October 21, 2015

It's an important law, one that allows citizens and their representative – the media – to seek the hidden details of the machinery of government. The rules and process are well defined under federal law, the Freedom of Information Act, or FOIA.

When the request is made of a federal agency, that agency has a limited amount of time to respond. The agency must produce the data requested or explain why, under the Freedom of Information Act, it does not have to produce the information.

If any part of the request is denied, the agency must specify what part of the FOIA request is being denied and must explain the reason for the denial.

A couple of years ago the Sun Times received, from an anonymous source, documents related to the proposed Solenex, LLC natural gas well on public lands in the Lewis and Clark National Forest. Some of the documents originated with the U.S. Forest Service; others from the Bureau of Land Management.

Also included were 18 photographs, in color, approximately 8 ½ x 11 inches in size and of medium quality.

Since we had in our possession 18 photographs related to the Solenex lease, we decided to contact the BLM and see if they had additional photos in the Solenex file. We also hoped that, in the process, this newspaper would be able to get final confirmation that the photos we already had were authentic (since then, we have confirmed through another source that the documents and photos are authentic).

We contacted the BLM office in Great Falls and were told that yes, they had photos in the Solenex case file. The Sun Times asked for the photos, but was advised that we should go through the FOIA process.

The Sun Times, after researching the Freedom of Information Act, filed the FOIA request with the FOIA Officer at the BLM Montana state office in Billings. Immediately we received confirmation that our request had been received. We were also advised that we would be receiving a confirmation letter with a case number shortly.

When the Sun Times had not received the photos or the promised confirmation letter, we asked what the holdup was. The answers we got were unsatisfactory, but since the clock was ticking on the BLM window to respond, we waited.

When the time was up for the BLM to produce the photos, we received a package from their office in Billings. In the package were a cover letter and 16 poor quality photocopies of photos.

Sixteen photos. Not eighteen. Two photos were missing.

In the cover letter, the BLM advised the Sun Times that the agency could not confirm the date or location of the photographs. Curiously, the two omitted photos were the only ones that included a person in the photos. The Sun Times believes that the person in the photographs, who is still employed by the BLM, was the petroleum engineer who worked on the Solenex Application for Drilling Permit, or APD.

The Sun Times was able to pinpoint the location of one of the two withheld photos, and we believe that the photos, at least some of them, paint a far different – pardon the pun – “picture” of the drillsite than what has been presented so far. To do this, the Sun Times has relied on information from a surveyor, publicly available satellite data and a recent flyover of the area, photographing the drillsite.

But the point is, why did the BLM hold back the photos?

This newspaper has always enjoyed a good relationship with the Bureau of Land Management. The agency has always been cordial and responsive to our requests for information. Of course, the Sun Times does not engage in “fishing expeditions” when we seek information. Our research and understanding as it relates to the Solenex case in particular and oil and gas exploration in general exceeds that of many media outlets. It has become a specialty of this newspaper.

For the Sun Times, though, we are faced with the question, “If you have no idea of the details of the information you seek in a FOIA request, how do you know the agency has complied fully?”

In our case the BLM, in their cover letter and in a follow-up email, said that all of the requested photos had been produced. When we sent an email with the two non-disclosed photos to the BLM FOIA officer asking why the two pictures were not included, we waited two weeks for an answer. The answer was that the person doing the FOIA search thought those two photos were excluded from the FOIA. The BLM apologized and explained that we should have requested better quality copies of the photos.

As the Sun Times considers its options in this matter, we hope that the BLM as well as the other agencies involved realize that this community newspaper does its homework. Our readers expect and deserve no less.

OFFSHORE ENERGY DEVELOPMENT

Feds Probing Death Of Worker On Gulf Drillship

By Jennifer A. Dlouhy

[Fuel Fix \(TX\)](#), October 20, 2015

WASHINGTON — Federal investigators are probing the death of a worker on a drillship in the Gulf of Mexico that was preparing to bore a well for Chevron.

The accident happened at about 10:15 a.m. Tuesday morning about 200 miles south of Lake Charles, La., in a deep-water leasing area known Keathley Canyon block 96. The Pacific Santa Ana drillship was just beginning operations for Chevron in

about 4,800 feet of water at the site and had not yet penetrated the sea floor when an employee of that drilling contractor was fatally injured.

There were no other injuries at the site, and operations on the drillship have been shut down.

Scant details were known about the accident Tuesday afternoon, as officials with the Bureau of Safety and Environmental Enforcement and the Coast Guard flew to the site and began investigating.

Chevron is the operator on the lease, with a 36 percent working interest. BP and ConocoPhillips have minority interests in the site, with 34 percent and 30 percent respectively.

Houston-based Pacific Drilling said in a statement it was "actively addressing the needs of (the worker's) family and the affected employees."

"Our prayers and thoughts are with the family of our colleague and our Pacific Drilling family closely associated with him," the company said.

Chevron said in a statement that its "thoughts and prayers are with the contractor's family, friends and colleagues."

The lease — located next to a number of discoveries in the Gulf and part of the Lower Tertiary trend — was a top target during a 2009 government auction, when BP made a winning \$28.1 million bid for the block, beating out Chevron USA, which had offered \$14 million, and ConocoPhillips, which bid \$7.3 million.

In an exploration plan filed with federal regulators earlier this year, Chevron outlined ambitions to drill up to seven wells at the site.

The Santa Ana is one of eight high-specification drillships in Pacific's fleet, built to Chevron's requirements and delivered to the company in 2012. According to Chevron, at the time it was the first drillship capable of performing dual-gradient drilling, which uses two different drilling fluids — each with different weights — to more closely match formation pressures. The technology facilitates drilling high-depth wells.

Feds: 1 Dead In Accident On Drillship In Gulf Of Mexico

[Associated Press](#), October 21, 2015

NEW ORLEANS (AP) – Two federal agencies are investigating an accident that killed a man on a ship drilling for oil in the Gulf of Mexico, according to the agency that oversees offshore drilling.

Nobody else was hurt in the 10:15 a.m. accident Tuesday on the drillship Pacific Santa Ana, said Amy Roddy, spokeswoman for the owner, Pacific Drilling SA of Houston.

She said the company is not releasing any details about the man to respect his family's privacy. She also refused to disclose how the man died or details of the accident, citing an ongoing investigation.

The ship is working for Chevron, and drilling has been shut down because of the investigation, she said.

The Bureau of Safety and Environmental Enforcement said in a statement Tuesday that the crew was starting to drill in 4,800 feet of water, about 200 miles south of Lake Charles, when the accident occurred. The statement did not reveal the nature of the accident, but said the bureau and U.S. Coast Guard were investigating. The statement said there were no reports of pollution.

According to Pacific Drilling's website, the Pacific Santa Ana can carry up to 200 people, can operate in up to 12,000 feet of water, and is equipped to drill as deep as 35,000 feet. It is among eight drillships owned by the company.

Worker Dies On Offshore Drilling Rig

By Alison Sider

[NASDAQ](#), October 20, 2015

A worker died on an offshore drilling rig in the Gulf of Mexico, federal regulators said Tuesday.

The worker was employed by Pacific Drilling SA, which owns the Pacific Santa Ana drillship. The company is investigating the cause of the incident, spokeswoman Amy Roddy said.

The vessel was doing work for Chevron Corp. about 200 miles south of Lake Charles, La., according to the Bureau of Safety and Environmental Enforcement, which said the death is the first this year related to offshore drilling operations in the gulf.

A spokeswoman for the agency said inspectors are on board the vessel, where operations have been shut down. Chevron said the incident didn't cause pollution or other injuries.

The Pacific Santa Ana has been contracted to Chevron since 2012. It is capable of drilling in waters up to 12,000 feet deep, but Tuesday's incident occurred in shallower water, at a depth of 4,800 feet.

1 Reported Dead On Gulf Of Mexico Drillship Working For Chevron

[New Orleans Times-Picayune](#), October 21, 2015

Federal investigators are responding to a report of a person dead on a drillship in the Gulf of Mexico about 200 miles south of Lake Charles, the Bureau of Safety and Environmental Enforcement said Tuesday afternoon (Oct. 20). No other injuries were reported and there was no sign of pollution, the agency said.

According to a BSEE statement, the Pacific Santa Ana drillship was starting drilling operations for Chevron when the death occurred. Operations have been shut down and personnel remain onboard, according to the drillship's operator.

The bureau and the U.S. Coast Guard will investigate the incident. Investigators traveled to the site Tuesday afternoon and have begun collecting evidence and taking statements.

No additional information was immediately available.

1 Dead In GoM Accident

By Audrey Leon

[Offshore Engineer](#), October 20, 2015

An accident onboard the drillship Pacific Santa Ana has left one worker dead. The news was confirmed by the US Bureau of Safety and Environmental Enforcement (BSEE), operator Chevron, and the drillship's owner, Pacific Drilling.

The Pacific Santa Ana drillship has been under a five-year contract with Chevron in the Gulf of Mexico since 2012.

Chevron confirmed that a contractor, an employee of Pacific Drilling, was fatally injured onboard the drillship around 10 am (CST) on 20 October. The drillship was some 200mi south of Lake Charles, Louisiana, operating in 4800ft of water, on the Chevron-operated Keathley Canyon Block 96.

Chevron said that drilling operations have since been shut down, and that no other injuries were reported. BSEE said that personnel remain on the drillship and that no pollution has been reported.

"Our prayers and thoughts are with the family of our colleague and our Pacific Drilling family closely associated with him," Pacific Drilling said in an emailed statement about the incident.

Inspectors from both BSEE and the US Coast Guard will travel to the Pacific Santa Ana, owned by Pacific Drilling, to begin collecting evidence and take statements.

Chevron holds 36% working interest in the block, with co-owners BP (34%), and ConocoPhillips (30%).

The Pacific Santa Ana began its contract with Chevron in 2012. The ship was purpose-built for dual gradient drilling operations and has three separate fluid systems, one for handling drilling mud, another for the seawater-like fluid in the marine riser, and another for the seawater powering the pump. The moon pool was redesigned for handling the 450,000lb MaxLift pump in addition to the usual subsea equipment.

The ship was to use its dual gradient drilling functions for Chevron's Anchor-1 prospect last year in Green Canyon block 807, but the well was junked due to mechanical failures. However, in January of this year, Chevron hit high quality oil pay in multiple Lower Tertiary Wilcox Sands at a second Anchor well also drilled by the Pacific Santa Ana.

Fatal Accident Reported On Pacific Santa Ana Drillship In Gulf Of Mexico

[gCaptain](#), October 21, 2015

The U.S. Bureau of Safety and Environmental Enforcement said Tuesday it was responding to a report of a death on the Pacific Santa Ana in the Gulf of Mexico off the coast of Louisiana.

Pacific Santa Ana was beginning drilling operations for Chevron approximately 200 miles south of Lake Charles, LA, in 4,800 feet of water when the incident occurred. According to the operator, the rig has been shut down, the BSEE said.

There were no other injuries reported and personnel remain on the drill ship, BSEE said. There was also no reported pollution.

The incident is being investigated by both the BSEE and U.S. Coast Guard. BSEE and U. S. Coast Guard inspectors traveled to the drillship Tuesday afternoon and have begun collecting evidence and taking statements.

The Pacific Santa Ana is on a five-year contract with Chevron ending in May 2017.

The fifth generation drillship was built in 2011 by Samsung Heavy Industries and is capable of operating in 12,000 feet water depth. When delivered to the Gulf of Mexico in 2012, the drillship was the first designed with the capacity to perform dual gradient drilling, a technology that uses two weights of drilling fluid to match the natural pressure when drilling ultra-deepwater reservoirs.

The Pacific Santa Ana is owned by Houston-based Pacific Drilling. It can accommodate up to 200 crew.

Briarcliffe Acres Votes Against Offshore Drilling

[Myrtle Beach \(SC\) Online](#), October 21, 2015

In a storm of debate over offshore drilling, Briarcliffe Acres surfaced as the latest coastal town to join a united front against seismic testing and drilling for oil and natural gas off of South Carolina's beaches.

Missing councilwoman Abby Stewart, who has been with family on the west coast, the town council unanimously passed a resolution Monday, joining 23 other S.C. coastal towns in a stance against offshore drilling.

We don't even know what's out there. We don't know if there's gas, if there's natural gas or if there's crude oil.

Congressman Tom Rice

"We understand what damage can ensue from any spill that could happen out there," said Councilman Huston Huffman. "We don't want to take the risk of a spill out there polluting the beaches."

For many the rallying cry against offshore drilling echoes the loss of tourism dollars that could cripple coastal economies. But for Briarcliffe Acres, a "bedroom community" of about 500, any damage would not just hit a tourist destination, it would hit home.

The resolution had been in the works for a couple of months, Huffman said, but other issues pushed the matter to Monday's agenda.

A news release from the Stop Oil Drilling in the Atlantic Leadership Team on Monday called the vote an "incredible show of unity, and a strong message" appealing to legislators to "stop Washington from forcing this on South Carolina."

Legislators say the region's resolutions may do little to stop offshore drilling if the project is ultimately approved.

The Interior Department's Bureau of Ocean Energy Management announced a draft proposed program in January that opened up two planning areas for testing along the coast from the Maryland-Virginia state line to the Georgia-Florida line.

The coast of Virginia was proposed for a potential offshore drilling site five years ago, but plans fizzled in the wake of the disastrous Deepwater Horizon oil spill in the Gulf of Mexico.

Buzz of where the potential rigs will actually go abound among opponents, with doom scenarios marring the coastlines from Georgetown to Wilmington, N.C. Advocates banded together – bridging the gap between party lines – to send a clear message to legislators that residents don't want the rigs off of the \$18 billion tourism-rich South Carolina coast.

Dr. Jim Watkins, a retired Presbyterian minister who lives in Pawley's Island, helped form the Stop Oil Drilling in the Atlantic alliance, which he describes as a "grassroots citizen's organization which works on 'just this one issue of drilling.'"

The group praised Briarcliffe Acres for joining other municipalities like Myrtle Beach, Atlantic Beach, North Myrtle Beach and Surfside Beach that have all passed similar resolutions in recent months.

Briarcliffe Acres' action brought all of Horry County's coastal towns on board against offshore drilling, said Jean Marie Neal, a SODA representative.

"The vote today means every coastal municipality in South Carolina has said no to offshore drilling off our beaches," Watkins said in the release.

Myrtle Beach City Council passed a resolution Aug. 11 saying it wanted to protect the beaches from potential oil spills, joining at least 18 other municipalities opposing offshore drilling at the time. The decision was greeted with applause from 100 spectators in the audience.

Opponents say offshore drilling would hurt marine life, pumping into the Atlantic the potential of spills and sound waves that would send sea creatures scurrying. And the risk to the state's high dollar tourism industry makes the idea demand a price too high to pay.

Advocates say the drilling can be done safely and tapping into an oil or natural gas reserve could help the country move away from its dependence on foreign oil, helping in turn with national security. The underwater goldmine would mean more jobs and tax dollars.

"The possible jobs and revenue gained from drilling is miniscule compared to the dollars tourists spend in Horry County and the rest of coastal South Carolina," Watkins said in the release. "Giving our coast to the oil and gas industry simply does not make economic sense." A closer look

The Bureau of Ocean Energy Management has the power to open the Atlantic up for oil leasing with or without any state input, said Congressman Tom Rice.

And the idea that South Carolina would profit from any offshore drilling is not a possibility in federal legislation – yet. Rice said his office is working on a bill that would change that.

The bureau is reviewing if and where oil and gas leases might be issued on the Atlantic Outer Continental Shelf, but the draft plans call for only one lease to be issued. Plans also include a 50-mile buffer from the coastline. The buffer would keep the operation out of immediate sight from a shoreline, but would also keep any potential revenue gain out of the state's coffers.

The state would only reap revenue if the operation falls within South Carolina's coastal territory, which is about three miles from the shoreline.

"There's a special law that allows the Gulf states to get a revenue share of 37.5 percent," Rice said, but no law exists for the mid- to south-Atlantic coastal states, which have never been opened to federal oil leases before.

Sen. Lisa Murkowski (R-Alaska) submitted a bill that provides for revenue sharing for the states, but the bill also does away with the buffer zone, Rice said.

The congressman added that they are working on a bill now that would keep the 50-mile buffer zone in play, while giving South Carolina a 37.5 percent revenue share.

"We don't even know what's out there. We don't know if there's gas, if there's natural gas or if there's crude oil," Rice said.

The last time the ocean floor was scanned for potential reserves, the probe was conducted with technology from the 1980s. Technology has changed since then. "There appears to be formations that would likely have some type of reserves," Rice said, but we "don't know what or how much."

Rice has said the issue of offshore drilling needs more review.

"My position has been let's do the seismic testing," he said. "Let's find out what's out there and then we can make rational decisions."

Rice said that he also wants to know what can be done to "safeguard our tourism revenue" and that a study could find the reserves aren't worth the trouble and expense of drilling.

500 Rough population of Briarcliffe Acres

Rice had planned to call a public forum last Wednesday with a professor from Coastal Carolina University, a professor from the University of South Carolina, a representative from the Coastal Conservation League, a public official from Mobile, Ala., and the director of BOEM to address the issue, talk about the process, the timelines of any project and when and where along that timeline the public will have input. The forum was postponed in the wake of the state's recent historic flooding. Rice said that his office is working on rescheduling the forum.

In the last six weeks, Rice said he has visited oil fields in two states and the offshore drilling rigs in Louisiana to get a closer look at the operations.

"They opened up oil fields off of Alaska like a month or two months ago," he said. "And the oil companies have pulled out saying it's not economically feasible."

The same could happen here, he said.

"It may be that this never becomes feasible to drill off the Atlantic," he said.

The potential section of Atlantic coastal exploration fell in an area where state governments have been known to support expanded energy development offshore.

Gov. Nikki Haley supports offshore drilling and is a member of the Outer Continental Shelf Governors Coalition. The coalition operates on a mission to, among other things, "influence a sensible path forward for the development of America's offshore energy resources."

Frenchman Makes Daring Leap From Sailboat To Ship Off Alaska

By Mark Thiessen

[Associated Press](#), October 21, 2015

ANCHORAGE, Alaska (AP) — A Frenchman with his cat tucked inside his clothing made a daring leap of faith Tuesday when he jumped to a waiting rescue ship from his sailboat, which was being battered by high seas south of Alaska.

The Coast Guard captured the dramatic video from a C-130 Hercules airplane monitoring the rescue. The man's identity hasn't been released, but Petty Officer Lauren Steenson in Kodiak said the sailboat was named La Chimere.

The man activated a location beacon Tuesday about 400 miles south of Cold Bay, Alaska. The C-130 was dispatched to assess the situation.

The airplane crew made radio contact with the mariner, who reported his 30-foot sailboat lost its rudder and rigging in heavy seas and 46-mph winds.

"With the 20-foot seas, his boat is getting pretty well thrown around," she said.

He had no control, and the boat was "pretty much dead in the water," adrift in high seas.

The Coast Guard made contact with the Polar Pioneer, which is an oil drilling vessel used by Royal Dutch Shell off Alaska's northwest coast this summer. The ship and support vessels were nearby as they make their way back to Port Angeles, Washington.

The Polar Pioneer sent a support ship, the Tor Viking, to rescue the sailor.

Video shot by the Coast Guard shows the Frenchman on the rigging pole near the bow of his sailboat, riding wave after wave until making a dramatic leap over the railing of the Tor Viking.

The video shows the man disappearing behind the railing head first with his legs last to disappear behind the Tor Viking's railing. After a few seconds, a crew member of the Tor Viking is seen walking toward the man, who then stands up.

Steenson said the pilot of the C-130 told her the sailor placed his cat inside either his sweater or coat before making the leap.

Once the man was safely aboard the Tor Viking, the Coast Guard marked the position of the sailboat for future reference.

It wasn't immediately clear if the man would continue with the Shell ships to Washington state.

The sailboat left Dutch Harbor, Alaska, on Oct. 13, headed to Vancouver. Steenson said reports didn't indicate if his final destination was Vancouver in Washington or British Columbia.

Obama Ends Arctic Drilling – Business Insider

[Business Insider](#), October 21, 2015

A ringed seal pup peeks out from its protective snow cave near Kotzebue, Alaska. The Obama administration officially shut the door on Arctic drilling, a move that could prevent any new drilling for years to come.

The U.S. Department of Interior announced on October 16 that it would cancel two lease sales for offshore acreage, which had been scheduled to take place in 2016 and 2017. Environmental groups have been doggedly criticizing the Obama administration for allowing Royal Dutch Shell to drill in the Arctic to begin with, citing the potential catastrophe if an oil spill occurred. They had called upon the President to deny any permits to Shell.

But it wasn't environmental protest that killed off Shell's drilling campaign. What really forced the Anglo-Dutch company to retreat was low oil prices and disappointing drilling results.

Similarly, the Obama administration is now shutting the door on future lease sales not because of concerns over the environment, but "In light of current market conditions and low industry interest," as Interior put it in a statement.

On its face, the move is a logical one. Few other companies were interested in drilling in the Chukchi or Beaufort Seas, despite several having purchased leases years ago. Statoil and ConocoPhillips, two other large oil companies interested in the Arctic, had previously put their Arctic ambitions on ice because of the difficulty and high costs associated with drilling in the region. With Shell announcing that it would suspend U.S. Arctic exploration for the "foreseeable future" there are now zero companies that are viably interested in drilling anytime soon.

Remarkably, however, the interest in new leases had dried up even before the downturn in oil prices. Interior said that it put a "Call for Information and Nominations" in September 2013, which is essentially a way for the government to solicit interest from

the industry on which areas to auction off based on their interest. While it would be understandable that few companies would express interest in the current market downturn, Interior issued the Call for Information in September 2013, a time when Brent crude was trading around \$110 per barrel.

Despite high oil prices, no companies submitted nominations for areas to be auctioned. As a result, Interior canceled the 2016 auction. The same was true for the 2017 auction. In the July 2014 Call – when oil prices were trading at around \$105 per barrel – there was only one submission from a company interested in the Arctic. In its October 16 announcement, Interior said that it was concerned there wouldn't be sufficient competition to move forward with the lease sale. Such an outcome could mean that the government would lose more money than it took in by selling off the assets, due to the lengthy work involved in conducting regulatory scrutiny, environmental assessment, and studying and issuing permits.

REUTERS/Larry Downing

U.S. President Barack Obama speaks about the FY2016 budget at the Department of Homeland Security in Washington, February 2, 2015.

Thus, the lease sales will be cancelled. As such, no new companies will acquire acreage in the Arctic for several years at least. But even if Interior hadn't cancelled the sales, it is far from clear that there would have even been a company that would be willing to risk scarce resources in bidding on risky Arctic oil.

Moreover, Interior also dismissed requests from Shell and Statoil to extend their current leases, which would have allowed them more time to return to the Arctic if they had wanted to do so at some point in the future. Their ten-year leases will expire in 2017 for the Beaufort Sea and 2020 for the Chukchi Sea. Justifying the dismissal, Interior said that the "companies did not demonstrate a reasonable schedule of work for exploration and development under the leases."

With no plans by either company to drill within that timeframe, it appears that they are heading for expiration. That leaves almost no possible pathway for an oil company to drill in the Arctic for years to come, perhaps killing off drilling for a decade or so at a minimum. Again, it was likely that there wouldn't have been new drilling in any event, given Shell's decision and current market conditions, but Interior's decision officially shuts the door on the Arctic in the medium-term.

Recognizing the significance of the move, Alaskan Senator and Arctic oil proponent, Lisa Murkowski (R), issued a blistering statement denouncing the Interior Department. "This is a stunning, short-sighted move that betrays the Interior Department's commitments to Alaska," she said.

She went on to argue for more lease sales. "Instead of seeking to shut down Alaska, Interior should remember that the North Slope was nearly abandoned after 14 dry holes were drilled. The opportunity to keep going led to not only the discovery of Prudhoe Bay, but also the production of more than 17 billion barrels of oil and a generation of opportunity for Alaska. I will certainly remember that fact as I continue to push legislation that will force Interior to hold regular lease sales in the offshore Arctic."

It is possible that under a new Republican administration in 2017, the Interior Department could relaunch the leasing process. However, that could take several years given the lengthy environmental assessments the agency needs to conduct before offering up acreage. Even then, there is a huge question mark that hangs over the process – there is very little interest on behalf of the industry, regardless of what the government may do. In this era of low prices, Arctic oil may simply be unprofitable.

Clues To Arctic Drilling Ban In California

[CleanTechnica](#), October 20, 2015

The Intertubes have been buzzing with news of the ban on Arctic drilling announced last week by President Obama. Though the news may have taken some political and industry observers by surprise, you can check out a recent development in California for hints at the direction in which federal agencies are steering the US oil and gas industry in the past couple of years. It sure looks like evolve is the word of the day for the energy policy formerly known as "all of the above."

The Arctic Drilling Ban

Just last summer, our friends over at Fuel Fix noted that Royal Dutch Shell had nailed down a couple of important federal permits for Arctic drilling. However, the company abandoned its Arctic drilling plans in September, just a few weeks before the announcement of the Arctic drilling ban.

We're giving props to Shell for its "you can't fire me, I quit" strategy. Slumping oil prices were cited as the reason for the pullout, but we're guessing that Shell also saw the writing on the White House wall.

Also not helping: just a couple of years ago the company was cited by the US Environmental Protection agency for "numerous" violations of the Clean Air Act related to its Arctic drilling operations, and high profile protests in Seattle over the docking of a Shell drilling rig monkeywrenched the company's efforts to highlight its commitment to climate action.

The slump in oil prices was also cited by the Interior Department last week when it announced the new Arctic drilling ban:

In light of current market conditions and low industry interest, the U.S. Department of the Interior today announced that it will cancel the two potential Arctic offshore lease sales scheduled under the current five-year offshore oil and gas leasing program for 2012-2017. The decision follows Shell's announcement of its exploration results at the Burger prospect in the Chukchi Sea and that the company will cease further exploration activity in offshore Alaska for the foreseeable future.

Interior also denied extensions to two companies with existing leases:

Today, the Bureau of Safety and Environmental Enforcement (BSEE) also denied requests from Shell and Statoil for lease suspensions, which would have allowed the companies to retain the leases beyond their primary terms of ten years. The leases will expire in 2017 (Beaufort) and 2020 (Chukchi). Among other things, the companies did not demonstrate a reasonable schedule of work for exploration and development under the leases, a regulatory requirement necessary for BSEE to grant a suspension.

In defending the Arctic drilling ban (basically, a withdrawal of the lease program for this cycle), Interior cited the low interest in Arctic oil leases. The agency was wary of a non-competitive process leading to the award of a lease at rock-bottom prices.
California Drops A Clue On Arctic Drilling Ban

Environmental organizations have long pointed out that federal fossil fuel leases have been giveaways, and it looks like the Arctic drilling ban is a step toward the end of free lunch days.

We're also thinking that the cost of effective federal oversight for fossil fuel operations was another motivator, particularly where sensitive environments are involved, and that's where California comes in.

In the midst of an ongoing drought last year, California regulators were called to task for permitting oil and gas drillers to dump wastewater into aquifers that could have been used for domestic and agricultural use, following an EPA investigation dating back to 2012.

That resulted in an EPA drilling wastewater enforcement plan last spring:

As the state implements the plan, EPA will continue our heightened oversight to ensure that the state's oil and gas UIC program meets federal requirements. This effort includes ensuring that wells which inject into non-exempt aquifers, including several hundred disposal wells (with approximately 70 disposal wells in the 11 aquifers historically treated as exempt), nearly two thousand enhanced oil recovery wells, and any cyclic steam wells requiring aquifer exemptions, are addressed as expeditiously as possible, with an immediate emphasis on the wells in aquifers with the highest water quality.

Boy howdy, right? Our friends over at Fuel Fix have been keeping tabs on the state's response and at the last count California had shut down 33 oilfield injection wells, mainly in Kern County, that were injecting wastewater into federally protected water supplies under improperly issued state permits. That's on top of another 23 wells shut down earlier this year.

It's also worth noting that when local communities have attempted to adopt stricter regulation of the fossil fuel industry due to environmental concerns, they are often overridden by state legislation.

In terms of federal energy policy, it's pretty obvious that the Obama Administration decided that California's key role in the national economy — in agriculture as well as other sectors — was not being stewarded properly by local officials.

That's where we see a parallel with the Arctic drilling situation. In the absence of local regulations, the feds are the only game in town and it seems that the Arctic's role in the US economy is too important to trust to compliance by oil companies.

Interior's actions last week on Arctic drilling are only temporary, but the trend is toward a permanent clampdown.

Federal Regulators Are A Big Barrier To Arctic Drilling

[4-Traders](#), October 21, 2015

In the wake of Shell choosing to stop exploring for oil and natural gas off Alaska's Arctic coast, the Interior Department cancelled lease auctions through 2017.

'In light of Shell's announcement, the amount of acreage already under lease and current market conditions, it does not make sense to prepare for lease sales in the Arctic in the next year and a half,' Interior Secretary Sally Jewell said.

What Secretary Jewell doesn't want to acknowledge is a big reason no one wants to drill in the Arctic right now is because the federal government has made it too difficult.

Here are some of the federal government's regulatory obstacles Shell had to navigate around to drill just one well:

Restrictions on Drilling Activities. Multiple layers of environmental laws and regulations limit the type and amount of activity that can take place in the Arctic. For example, Shell sought permits to drill two exploratory wells during the 2015 season. While the Administration gave conditional approval to Shell's exploration plan (which included the two wells) it was later determined that the plan violated a U.S. Fish and Wildlife Service regulation from 2013 regarding marine mammal disturbance. The regulation requires a 15 mile buffer zone around active drilling rigs due to assumed impacts of noise; an assumption not corroborated by science. Since Shell's wells are nine miles apart, the wells could not be drilled simultaneously – creating additional restrictions and adding delay to their operations.

Requirements for Additional Equipment. Regulations also require that an additional redundant rig be on site. This adds additional costs and resources, and also fails to take into account other containment strategies. Capping stacks, blowout preventers and relief domes could be better suited to address potential spill response in the shallow-waters of the Arctic.

Litigation. At seemingly every turn, energy exploration in the Arctic has faced an onslaught of lawsuits from activist groups. In one instance in 2008, there was a legal challenge to the original lease sale and the federal court ruled that there needed to be a revised EIS. The Department submitted a supplemental EIS and the 2008 lease sale was officially reaffirmed in March 2015.

Shell said clearly it faces a 'challenging and unpredictable federal regulatory environment in offshore Alaska.' It's no surprise no other companies want to jump into these chilly regulatory waters.

But the company also pointed out, 'The area is likely to ultimately be of strategic importance to Alaska and the US.' One estimate puts 34 billion barrels of oil off Alaska's Arctic coast.

Other nations aren't stopping Arctic exploration; neither should the U.S.

Demand for oil and natural gas isn't going away, so energy domestic exploration must continue in the Arctic and elsewhere. But as we've seen, by putting up unnecessary regulatory hurdles, regulators can cause job and economic growth opportunities to be missed.

BUREAU OF LAND MANAGEMENT

Updated Idaho Power Line Would Go Through Sage Grouse Habitat

[Boise \(ID\) State Public Radio](#), October 21, 2015

Idaho Power is one step closer to replacing an aging transmission line that runs from Hagerman to Hailey. Blaine County approved a permit for the project last week. Now, the Bureau of Land Management will review it – and will pay special attention to the greater sage grouse in the area.

Click play to hear the on-air version of this story.

It's been nearly a month since the Obama Administration decided not to list the greater sage grouse under the Endangered Species Act. Although the bird itself hasn't gained federal protection, the Interior Department signed on to new land-use plans to keep the bird's habitat safe. These protections restrict development in sage grouse areas across the 11-state range, and the Hailey-Hagerman transmission line is part of that.

Stacey Baczkowski is a biologist with Idaho Power. She says the company has been working with the BLM for the last few years to make sure the line is built with the bird in mind. Baczkowski says even though the federal agency has new land use restrictions, the rules aren't burdensome for Idaho Power.

"Knowing what the restrictions are, we're able to accommodate them and build them into our project," she says.

The biologist says the power company plans to build the new transmission line as close to the current one as possible, and will follow BLM rules about construction during sage grouse mating times. Baczkowski says the added restrictions will likely make the project more expensive.

Federal Policies Vex Utah Water Commission

[Deseret \(UT\) News](#), October 21, 2015

SALT LAKE CITY — Federal policies that either aim to instill more oversight of water or deny access altogether have some Utah leaders frothing over what they say is a repeated pattern of overreach that threatens local economies and livelihoods.

A prime tempest of controversy discussed Tuesday by the State Water Development Commission is the U.S. Environmental Protection Agency's Waters of the United States rule, which prompted multiple lawsuits by a dozen-plus states and the American Farm Bureau Federation.

Hailed by environmentalists and sportsmen groups as a rule that extends protections to key ephemeral waterways and the prairie potholes of water that form in the Midwest states, farmers and ranchers railed against the new regulation because they say it encroached on private property rights.

Utah joined with 17 other states asking federal courts to issue a stay and a constitutional review. Another lawsuit was launched by the American Farm Bureau Federation in Texas courts.

Randy Parker, executive director of the Utah Farm Bureau, briefed the commission on an Oct. 9 ruling in the 6th Circuit Court of Appeals that issued a nationwide stay of the rule, noting there was a likelihood the EPA exceeded its authority.

"We were very excited about the 6th Circuit decision," Parker said, adding that the hope is the cases out of varying federal courts are consolidated before the U.S. Supreme Court for a decision.

"We think we would prevail," he said afterward. "The U.S. Supreme Court is starting to tell the Obama administration it can't do whatever it wants."

Critics that include Utah and Colorado also put enough pressure on the U.S. Forest Service to withdraw — at least for now — consideration of a new groundwater rule that would require the issuance of any permit to consider nearby groundwater resources in the area.

Oponents said that such a rule potentially interfered with states' "sovereign" domain over groundwater resources within its borders, leading to the congressional legislation to ward off the directive.

"We have a tremendous amount of concern this is a federalizing of the sovereign water rights of Utah," Parker said.

Ron Thompson, general manager of the Washington County Water Conservancy District, said possible revisions to a land-use plan by the Bureau of Land Management in Washington County have severe ramifications should one particular approach be adopted.

The changes are part of management strategies for two new national conservation areas created with the Washington County Lands Bill of 2009.

But Thompson said the BLM — under one option — is ignoring key considerations that went into the passage of the bill, including water supplies being left unhindered and right of way corridors left intact.

"This (alternative by the BLM) would take two of our pristine aquifers that supply more than a quarter of our water to our residents and lock them up," he said.

The revisions could also potentially interfere with right of way corridors or development of the Lake Powell Pipeline, Thompson added.

"It's very troubling. For the first time in my 40-year career, people are talking about not just responding but preparing to litigate," he said. "I still believe that these agencies have a fundamental responsibility to consult with states and local communities and protect local economies and the traditions that have developed around this. And they seem to be ignoring this today."

Helicopter Crash Marks Troublesome Cattle Roundup Near Searchlight

[Las Vegas Review-Journal](#), October 21, 2015

The wild remnants of one of southern Clark County's last cattle herds are now being cleared from the mountains between Henderson and Searchlight, but the work so far has not gone smoothly.

A crew of cowboys from Utah is gathering stray and feral cows from the McCullough Mountains under a contract with the Nevada Department of Agriculture.

Flint Wright, animal industry administrator for the department, said the operation started Friday and has no scheduled completion date. As of Monday, just 17 cows had been collected.

"They're essentially wild cattle, and it's going to take some time," Wright said.

The roundup hit a major snag Sunday, when a helicopter being used to find and chase cows crashed just off state Route 164 west of Searchlight.

On Tuesday, the wrecked helicopter and its pilot could still be found at a motel in the town 60 miles south of Las Vegas.

Richard Dick of Hutchinson, Kan., said he was hovering about 12 feet off the ground, trying to move a pair of stubborn bulls, when a gust of wind pushed his helicopter into a Joshua tree. The 1962-vintage Bell model 47G ended up on its side in pieces, but he walked away with bumps and bruises.

The pilot said it was his first domestic accident in 17,000 hours of flying, though he crashed three times in Vietnam.

When he climbed out the wreckage Sunday, Dick said, the bulls were just staring at him.

The cattle now being rounded up have roamed the range untended since 2006, when rancher Cal Baird relinquished his federal grazing permit and sold his water rights to the county to preserve habitat for the desert tortoise and other federally protected species.

According to the Bureau of Land Management, Baird moved most of his livestock from the 111,000-acre federal grazing allotment to Arizona, but a few stragglers were left behind.

For the past several years, officials say, those survivors and their unbranded descendants have been damaging springs and menacing people in the mountains and desert between Interstate 15 and U.S. Highway 95 south of the Las Vegas Valley.

BLM spokeswoman Kirsten Cannon said the animals are aggressive and “present a danger to the public recreating in the area.”

Wright said: “We’ve had some complaints from people who were hunting deer and were run off by the cattle.”

Baird could not be reached for comment.

Under Nevada law, unbranded stray or feral livestock are considered state property. The BLM has been asking the state to remove the unclaimed cattle from the McCullough Range for several years.

In 2013, the state rounded up and sold off approximately 30 animals, but an unknown number remain. Last year, the BLM counted about 40 unbranded cows spread across two wilderness areas west of Searchlight. Wright guessed there could 100 to 200 feral cows still out there.

He figures it would cost the state as much as \$200,000 to try to collect that many animals. The Department of Agriculture has been “trying to get this deal cleaned up for a number of years,” but it never seems to have the money or the resources, he said.

The animals are now being rounded up by Sun J Livestock, a ranching operation from Vernal, Utah. Wright said the ranchers aren’t being paid directly, but they have plenty of incentive to do a thorough job.

“They get to keep the livestock,” he said. “They’ll get every cow they can.”

FISH AND WILDLIFE SERVICE

Springfield Hosts National Conservation Summit

[KYTV-TV Springfield \(MO\)](#), October 21, 2015

SPRINGFIELD, Mo. – More than 40 leaders from the leading conservation groups in America are meeting in Springfield this week for a National Conservation Summit hosted by The Johnny Morris Foundation.

Participants include the U.S. Fish and Wildlife Service, National Geographic, Audubon Society, and Ducks Unlimited. The purpose of the historic gathering is to collectively discuss opportunities to educate and engage the public in efforts to protect wildlife and natural habitats in preparation for the grand opening of America’s Wildlife Museum and Aquarium in 2016.

The remodeled educational attraction consists of an all-new 1.3 million-gallon aquarium showcasing 35,000 live fish, mammals, reptiles and birds in an immersive tour.

The attraction once known as the Wonders of Wildlife has been closed for remodeling since 2007.

New Glimpse Inside Bass Pro’s Wildlife Museum/aquarium

[Springfield \(MO\) News-Leader](#), October 20, 2015

Fees and taxes from hunters, anglers and people buying outdoor products have helped pay for wildlife conservation efforts across the country.

That’s a key message a group of more than 40 conservation leaders hope the new Bass Pro Shops wildlife museum and aquarium will convey to visitors when it opens in mid 2016.

On Tuesday, Bass Pro Shops revealed two more exhibits — a collection of taxidermied wild sheep and two arctic wildlife rooms featuring wolves, musk ox and a stuffed polar bear that at one time was the largest bear of any kind taken by a hunter. Bass Pro Shops previously offered a brief tour of a portion of the massive aquarium, featuring hundreds of saltwater fish in large tanks.

The Sheep Mountain exhibit shows more than 30 animals from around the world perched on rocks, with hand-painted mountain scenery in the background. All the exhibits are still being finished, with interpretive stations that will identify the animals and explain their role in the natural environment.

Dan Ashe, director of the U.S. Fish and Wildlife Service, called the museum "one of the foremost conservation attractions in the world."

"Through conservation efforts, we can be successful in sustaining these populations of animals that are threatened or endangered," said Ashe, one of the summit attendees. "People hear about the industrial-scale poaching of elephants that's happening in Africa. That's not hunting. With this museum, here's an opportunity to tell the story of how we can protect wildlife habitat, and that when hunting is done well, with appropriate regulations, it sustains wildlife populations."

Rob Keck, Bass Pro's director of conservation, said the museum will evolve even after it reopens, with new exhibits and animals rotating through the facility.

"It will continue to evolve and grow and bring people back because of the newness," Keck said. "We look at this place as the trail head of conservation where conservation groups will be able to tell their story."

Formerly known as Wonders of Wildlife, the facility has been closed since 2007 as Bass Pro Shops founder Johnny Morris conducted a massive expansion of the museum. Its reopening date has been pushed back several times as more exhibits were added and interior designs changed.

It is now slated to reopen in mid 2016, with more than 35,000 live fresh-and saltwater fish, reptiles, birds and mammals, in addition to taxidermy dioramas from North America, Africa, the Arctic and the Ozarks.

Conservation efforts have some major success stories, said Glenn Olson, policy director with the National Audubon Society and a summit attendee. He said bald eagles, peregrine falcons and brown pelicans have been removed from the endangered species list through public education efforts and science-based research.

Fred Matt, executive director of the Native American Fish and Wildlife Society, said it's a common theme among many Native American people to still fish and hunt for food. Conserving those resources is an important message to share.

"The forest is our medicine cabinet," he said. "In this world represented here (the conservation museum) we want to convey that those things are still healthy and being taught in our communities."

The 40 conservation leaders included several from local organizations like Ozarks Water Watch, Watershed Committee of the Ozarks and James River Basin Partnership.

Seeing the museum and aquarium just might inspire visitors to spend less time in front of a TV or electronic game and more time experiencing the outdoors.

"If we expect people to want to protect the environment, we've got to get them out in it — go fly fishing in a river, go paddle a canoe or get in a boat," said David Casaletto, executive director of Ozarks Water Watch.

Wildlife Experts Meet To Discuss The Best Way To Educate On Conservation

[KOLR-TV Springfield \(MO\)](#), October 21, 2015

SPRINGFIELD, Mo. – A National Conservation Summit in the middle of Springfield is being called one of the largest gatherings, of such experts, since last century.

"Some compared it to Teddy Roosevelt convening the Conservation Congress."

Fred Matt from the Native American Fish and Wildlife Society was a part of it.

"Our people, to this day, still, hunt, fish, you know, their backyard, their medicine cabinet is the forest," says Matt.

Rob Keck says their goal is to learn more about the right way to educate people about wildlife and fish conservation.

"We shared ideas on how to message what hunting and fishing, what hunters and anglers have done for conservation," says Keck.

Keck says folks from organizations like Matt's spoke about what is most important to get across to museum goers.

"We see geese flying overhead, you see a herd of deer, a flock of turkeys out along an open field. Many people don't realize that their success story didn't begin in a petting zoo."

Dan Ashe from the U.S. Fish and Wildlife Service says the education inside the museum can lead to changes outside in our communities.

"Hopefully, this will be a gateway to the outdoors. People will then go from here to a state park or a national park or a national refuge," says Ashe.

Keck says Bass Pro will use this summit to prepare for the grand opening next year.

"People enjoy seeing wildlife. Whether they hunt or fish or not and it doesn't happen by accident."

Even though it sits in the middle of Springfield, Matt hopes people will learn the challenges natural habitats and their wildlife residents face each year.

"From our history, we still utilize and respect the natural resource in the natural world."

National Conservation Leaders Give Input On America's Wildlife Museum And Aquarium

[KYTV-TV Springfield \(MO\)](#), October 21, 2015

SPRINGFIELD, Mo. – The big wildlife museum outside Bass Pro Shops' Outdoor World store is still not open to the public but conservation experts from across the country got a sneak peak at it on Tuesday. The visitors included people from local conservation groups and the head of the U.S. Fish and Wildlife Service. They were invited to give their input on America's Museum and Aquarium, which is still under construction.

Visitors will face a polar bear in an arctic setting and probably want to see if the ice and snow are real.

"When I walk in this room, even though it's somewhat warm in here, I almost feel the breeze and smell the sea," said Fred Matt, executive director of the Native American Fish and Wildlife Society.

It's just a small part of America's Wildlife Museum and Aquarium, and the creators want feedback on their works in progress. They hope to make the experience as educational and engaging as possible.

"It's about storytelling, telling the story of conservation in a way that's never been told before," said Rob Keck, Bass Pro's director of conservation and chairman of the museum's board of directors.

"Johnny Morris (owner of Bass Pro Shops) and the folks at Bass Pro have invited us here to help them form the messages that people who visit this facility are going to see and hear," said Dan Ashe, director of the U.S. Fish and Wildlife Service.

More than 40 conservation leaders are sharing their input and perspectives, all a little different, like Fred, representing Native Americans.

"Today, our people still hunt and fish to put food on the table. And they do it in a respectful and a very good manner I think others would enjoy hearing," said Matt.

They want to maximize the opportunity for visitors here in Missouri to gain a better understanding of conservation not only here, but all over the world.

"They're going to understand a little bit better about maybe how their individual actions affect something like a polar bear. So it's an opportunity to learn, an opportunity to feel that they're a part of the outdoors and then hopefully be a gateway to the outdoors," said Ashe.

The museum and aquarium will have 35,000 live fish and other animals, as well as the mounted mammal specimens. They anticipate opening sometime next year. When the name change from its former Wonders of Wildlife was announced last March, Keck said it could open by March, but hasn't said whether that's still possible.

Wonders of Wildlife first opened on Nov. 2, 2001, after two years of construction. It was a nonprofit museum then and cost about \$52 million, which included state funds, Springfield hotel-motel tax funds, Bass Pro Shops donations and tax credits.

The museum closed in 2007 for renovations that were originally set to cost \$14 million. Eight years later, the cost has jumped to about \$25 million, including at least \$12 million from Bass Pro Shops. When it opens, its size will cover more than 230,000 square feet of exhibits, compared to 126,000 square feet originally.

The museum is now a private venture and no longer takes hotel-motel tax payments. Four years ago, Morris donated \$4 million to the Community Foundation of the Ozarks; that's how much hotel-motel tax funds the museum received up to 2011.

American Wildlife Museum To Open At Bass Pro

[KOLR-TV Springfield \(MO\)](#), October 21, 2015

SPRINGFIELD, Mo.-- We are getting a sneak preview of a new museum opening up at Bass Pro.

The former Wonders of Wildlife Museum has been closed for several years and this is what visitors will soon see inside.

Some of the attractions will include a fishing heritage hall with a 300,000-gallon open ocean habitat – a new aquarium adventure and an international fishing hall of fame.

The sneak peek coincides with a national conservation summit being hosted by Bass Pro this week. It brought in more than 40 conservation leaders to offer input on the new museum.

Dan Ashe, the Director of US Fish and Wildlife service said, "so we have the chance as managers to help them shape that message. so when people come here not only are they going to see a great exhibit, but they will have the opportunity to learn something about how wildlife is being managed in the united states and throughout the world."

Bass Pro leaders say the new museum is scheduled to open in 2016.

CNMI Disagrees With Endangered List

[Radio New Zealand](#), October 21, 2015

The Northern Marianas government says the decision to list 23 species in Guam and the CNMI as threatened or endangered was rushed.

The government says it supports the US Fish and Wildlife Service's listing of seven of the 17 CNMI species, but it questions the inclusion of some of the other species.

The Department of Land and Natural Resources says a number of the species do not meet the definitions of threatened or endangered and don't require federal protection.

Among the plants and animals in the CNMI and Guam listed as endangered are the Mariana wandering butterfly, Langford's tree snail, and the Mariana sub-species of the Pacific sheath-tailed bat.

USFW Looks To Restore Habitat On Root River

[Rochester \(MN\) Post-Bulletin](#), October 21, 2015

Federal wildlife officials are seeking public input on a plan to restore and enhance habitat on 825 acres of Minnesota land along the Root River in Houston County.

Managed by the U.S. Fish and Wildlife Service as part of the Upper Mississippi River National Wildlife and Fish Refuge, the Root River Tract sits to the east of Hwy. 26 between La Crescent and Brownsville.

The site includes 664 acres of hunting and farmland purchased in 2009 with money from the Land and Water Conservation Fund.

Under the previous owner, National Decorative Products, the land was managed for private hunting of pheasant and waterfowl as well as some agricultural uses, said Tim Miller, La Crosse District manager for the refuge.

A network of dikes, ditches and drainage pipes are now failing or deteriorating, according to the Fish and Wildlife Service, which is proposing to remove some of the dikes and restore the natural topography and drainage patterns.

Fish and Wildlife estimates the habitat restoration will cost \$400,000 to \$500,000, which would be paid for with a grant from Minnesota's Outdoor Heritage Fund.

FWS also considered active and passive drainage systems as well as taking no action.

The tract would remain open to public use under each alternative, although an existing slow-no wake area would more than double in size to encompass 1,634 acres, including most of the Root River Tract.

Fish and Wildlife will host a public meeting on the project at 6 p.m. Wednesday at the Hokah Fire Station.

California Condor Shot In Arizona

[Grand Canyon \(AZ\) News](#), October 21, 2015

PHOENIX – U.S. Fish and Wildlife Service (FWS) special agents and Arizona Game and Fish Department (AZGFD) law enforcement personnel are investigating the lethal shooting of an endangered California condor that occurred on the Kaibab Plateau in northern Arizona Oct. 8.

The shooting was immediately self-reported to AZGFD, which did the preliminary investigation. The case has now been turned over to FWS law enforcement for further investigation.

California condors were listed as endangered in 1967. The species was reintroduced to northern Arizona in 1996. The population has now expanded into southern Utah and numbers approximately 70 birds.

The condor reintroduction in Arizona is a joint project of many partners, including the Arizona Game and Fish Department, The Peregrine Fund, U.S. Fish and Wildlife Service, Bureau of Land Management, National Park Service, Kaibab National Forest and Utah Division of Wildlife Resources.

Man, 81, Says He Blocked Arizona Bike Trail To Protect Owls

[Washington Times](#), October 21, 2015

FLAGSTAFF, Ariz. (AP) – The 81-year-old man who blocked a Flagstaff-area mountain bike race says he did it to protect an endangered owl species.

The Arizona Daily Sun reports (<http://bit.ly/1Ggko8v>) that J.D. Protiva appeared in federal court Monday on misdemeanor charges related to blocking the Elden Springs Trail before the August race.

Protiva says the path goes through protected Mexican spotted owl habitat. He is also charged with cutting trees and causing them to obstruct the trail.

A 2003 U.S. Fish and Wildlife Service Biological Opinion says at least a portion of the trail cuts across protected habitat, but the agency gave the OK for construction in the area.

Protiva cited similar concern for the owls' welfare when he pleaded guilty to stringing metal cables and moving forest debris across trails in 2007.

Why Monarch Butterflies Benefit From The California Drought (+video)

[Christian Science Monitor](#), October 20, 2015

It is one of the worst droughts on record, and the monarch butterflies are lapping it up. Milkweed, that is.

California homeowners are replacing water-greedy grass lawns with the perennial native to California's desert, a happy swap for one species in particular: the monarch, a butterfly that only lays eggs on milkweed.

In recent years, as milkweed has declined, likely due to pesticides use and rapid development, the monarch population has fallen with it. Two decades ago the iconic orange and black insect population was 1 billion strong; Today it hovers below 60 million.

In response to the quick decline, the US Fish and Wildlife Service put forth \$1.2 million to bring back the monarchs' habitat, following similar projects nationwide that send milkweed seeds by mail and track breeding grounds in a database. California gardeners are an unexpected but welcome addition to the grassroots effort, and ecologists are hopeful that Californians, who are problem-solving their way through the drought, might help a struggling species in the process.

Nurseries are stockpiling numerous varieties of native milkweed and drawing customers who are adapting to the drought conditions but may also want to bring butterflies to their yards.

At Tom Merriman's native plants nursery in Vista, Calif., business is up 50 percent this season. Until five years ago, Mr. Merriman didn't sell milkweed at all; this summer, he sold more than 14,000 plants and is shipping truckloads of seedlings all over California and other drought-stricken Western states like Arizona, New Mexico, and Utah.

"If you plant it, they will come," Merriman, who has a greenhouse filled with 8,000 milkweed of a dozen varieties, told the Associated Press. "We had chrysalises on shovels, we had them on wheelbarrows. They were up in the nursery on palm trees. They were everywhere, under tables. We were releasing 500 caterpillars a week on native milkweed."

But environmentalists are piping up to say this is not all good news for the monarch.

For one, gardeners may unintentionally opt for the tropical variety, sometimes called "exotic" milkweed, for its colorful pink and yellow flowers.

While the plants may have more curb appeal than the desert types, they bloom all year round which poses a threat to the monarch butterfly's infamous migration patterns.

Native milkweeds go dormant in the winter, and with no place to lay eggs this forces butterflies onward in their migration. The tropical varieties stay in bloom year-round, not giving female butterflies any reason to leave.

North American monarchs travel in the millions every winter from the eastern and central United States and Canada all the way to Mexico, while a smaller number travel through the western US to spend winter along California's Central Coast. The Western monarchs evolved alongside native milkweeds and eating plants from another region might make them more vulnerable, said Hei-ock Kim, of the California Native Plants Society in an interview with the AP.

"When you take plants and animals from where they originated, you're going to change chemistry, climate, biology," she said. "You're changing all their habits, and so things work best when they are where they're supposed to be."

The Minneapolis-based, SaveOurMonarchs, offers free milkweed seeds. In 2015, more than 1 million Milkweed Seed Packets were sent out, according Ward Johnson. He says: "Milkweed Seed Packets will be provided to anyone requesting them."

This report contains material from the Associated Press.

Monarchs Get Help From Unlikely Source: California's Drought

[Albuquerque \(NM\) Journal](#), October 21, 2015

VISTA, Calif. — In California's drought, the struggling monarch butterfly may have found a sprinkling of hope.

Suburban homeowners ripping out thirsty lawns are dotting their new drought-tolerant landscapes with milkweed native to California's deserts and chaparral — plants that have the potential to help save water and monarchs at the same time, because the female monarch will only lay her eggs on milkweed.

Overall numbers of the majestic black-and-orange butterflies have dropped from 1 billion to fewer than 60 million over the past two decades as milkweed nationwide has fallen prey to development and pesticides.

Earlier this year, the U.S. Fish and Wildlife Service announced \$1.2 million starter investment to restore habitat; other national projects aim to distribute milkweed seeds by mail and build databases of breeding habitats as alarm grows. Whether by choice or by chance, ecologists hope California gardeners looking to save water can provide a boost to the butterflies on the West Coast.

"This is a really important way to provide really important habitat for a really important butterfly," said Greg Rubin, president of California's Own Native Landscape Design, Inc.

Anya Shortridge sits behind a monarch butterfly, newly emerged from a chrysalis, on a fruit basket in her living room in San Diego in August. Shortridge is part of a growing number of gardeners in Southern California who have been delighted to find that planting just a few milkweeds can attract dozens of the majestic black-and-orange monarchs while cutting down on water. (Gregory Bull/The Associated Press)

Nurseries are increasingly stocking multiple varieties of native milkweed and catering to customers who want to be drought savvy but also want to attract butterflies.

Business was up 50 percent this season at Tom Merriman's native plants nursery in Vista, California. Five years ago, Merriman didn't sell milkweed at all; this summer, he sold more than 14,000 plants and is shipping truckloads of seedlings all over California and other bone-dry Western states like Arizona, New Mexico and Utah.

Dozens of monarchs flit through a butterfly atrium he built next to his greenhouses and sometimes sneak inside his greenhouses to lay eggs on plants awaiting sale.

"If you plant it, they will come," said Merriman, who has a greenhouse stuffed with 8,000 milkweed of a dozen types. "We had chrysalises on shovels, we had them on wheelbarrows. They were up in the nursery on palm trees. They were everywhere, under tables. We were releasing 500 caterpillars a week on native milkweed."

Anya Shortridge releases a newly emerged monarch butterfly onto milkweed in her garden in San Diego. (Gregory Bull/The Associated Press)

Anya Shortridge bought a few milkweed plants last year for her drought garden.

Now, she grows more than 100 milkweeds and carefully scans them for microscopic monarch eggs. When the eggs hatch, she feeds the tiny black-, gold- and white-striped caterpillars until they disappear into a shimmering, light green chrysalis where the mysterious transformation into a butterfly occurs.

This season, she and her husband have released more than 100 butterflies into the wild.

A sign in front of her house on a San Diego hilltop designates her garden as a "monarch waystation."

"We're finding eggs – monarch eggs – on the underside of our milkweed leaves all the time, so if I wanted to I could probably raise thousands," said Shortridge, who coos and cajoles the butterflies as if they were her children.

Some experts, however, are worried that California homeowners who plant milkweed might actually do harm by trying to do good.

That's because many gardeners unwittingly choose tropical — or so-called "exotic" — milkweed because of its colorful pink and yellow flowers.

The plants are more attractive than the desert varieties but could interfere with the monarch's famed migration.

Native milkweeds go dormant in the winter, leaving the butterflies no choice but to complete their migratory journey. But the tropical varieties bloom — and provide a place to lay eggs — all year, distracting the females and interrupting migration patterns.

Millions of North American monarchs travel from the eastern and central United States and Canada to Mexico each winter, while a smaller number travel through the western U.S. to winter along California's Central Coast. These Western monarchs co-evolved with native milkweeds and eating plants from another region might make them more vulnerable, said Hei-ock Kim, of the California Native Plants Society.

"When you take plants and animals from where they originated, you're going to change chemistry, climate, biology," she said. "You're changing all their habits, and so things work best when they are where they're supposed to be."

Monarch Butterflies May Be Saved By California Drought

[KABC-TV Los Angeles](#), October 21, 2015

VISTA, Calif. – In California's drought, the struggling monarch butterfly may have found a sprinkling of hope.

Suburban homeowners ripping out thirsty lawns are dotting their new drought-tolerant landscapes with milkweed native to California's deserts and chaparral – plants that have the potential to help save water and monarchs at the same time, because the female monarch will only lay her eggs on milkweed.

Three Years After Sandy, Building A Stronger Atlantic Coast In Connecticut

[New Haven \(CT\) Register](#), October 20, 2015

Three years ago this week, Hurricane Sandy devastated communities in New Jersey and along the Atlantic Coast with record storm surge, fierce winds and torrential rain. Earlier this month, Hurricane Joaquin reminded us of nature's power, inundating much of the Atlantic Seaboard with heavy rains and chest-deep floodwaters and setting historic records in the Carolinas.

In this age of uncertainty, we have come to expect the unexpected. The science tells us that climate change will cause hurricanes and tropical storms to become more intense — lasting longer, unleashing stronger winds and causing more damage to coastal ecosystems and communities. As we know too well, these storms threaten lives and result in millions of dollars in property damage. They also expose the vulnerability of beaches, sand dunes and coastal marshes that not only provide habitat for fish and wildlife but also protect local communities from flooding.

The question is, what can we do to help these coastal areas stand strong-er against the storm?

Federal money for Hurricane Sandy recovery has spurred an unprecedented effort to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms. The U.S. Fish and Wildlife Service and other Department of the Interior agencies are investing \$787 million in hundreds of projects to clean up and repair damaged refuges

and parks; restore coastal marshes, wetlands and shoreline; connect and open waterways to improve flood control; and increase our scientific understanding of how these natural areas are changing.

These investments support the goal of President Barack Obama's Climate Action Plan to make communities more resilient to increasingly intense storms predicted with a changing climate. They also create jobs and provide opportunities for fishing, hiking, wildlife watching and other recreational opportunities.

In Connecticut, the Fish and Wildlife Service is investing more than \$4.6 million in eight projects to clear more than 70 miles of coastline debris; open more than 100 miles of waterways for fish passage; and restore more than 2,000 acres of aquatic habitat. This includes the recently completed \$794,000 White Rock dam-removal project with The Nature Conservancy to restore natural river flow in Stonington and Westerly, Rhode Island. The project will reduce flood risk to local communities, restore habitat for fish and wildlife and open up several dozen miles of fish passage in the Pawcatuck River for the first time in nearly 250 years.

More than a half-century ago, Rachel Carson, one of our greatest conservation heroes, characterized conservation as "dynamic, changing as conditions change, seeking always to become more effective." Looking toward the future and the uncertainties of a changing climate, communities, government and nonprofit organizations are working together like never before to better understand and adapt to changing conditions.

Clearly it will take time and careful planning before we see a return on many of these investments. But I am confident the long-term benefits of building a stronger coast will far outweigh initial costs when it comes to protecting communities, sustaining wildlife and lessening the financial impact of damages resulting from future intense storms. To that end, we are establishing systems to carefully monitor and evaluate our progress to ensure this work is effective and lasting. The nature we care about and the public we serve deserve no less.

You can track the status of our projects and investments by visiting the Fish and Wildlife Service's Hurricane Sandy website at www.fws.gov/hurricane/sandy.

Wendi Weber is Northeast regional director for the U.S. Fish and Wildlife Service.

NATIONAL PARK SERVICE

YAP! Music Video Celebrates 100 Years Of National Park Service

[New Bedford \(MA\) Standard-Times](#), October 20, 2015

NEW BEDFORD — "Love what you do, do what you love, it's a celebration, yeah!" So goes a locally made music video that celebrates 100 years of the National Park Service. Published on Oct. 15, the Centennial video has more than 18,500 views on the NPS facebook page and more than 530 on the Youth Ambassador Program's YouTube page, the group that made it. The video's New Bedford producer/director Ben Gilbarg hopes it will go viral and give the local artists featured in it a chance to shine nationally.

"It's great it's got to this point so quickly," he said. "I feel like it's a model for youth engagement with a national institution that will hopefully continue to grow."

Along with NPS ranger Frank Barrows, Gilbarg co-founded YAP! in 2010 as a partnership between the New Bedford Whaling National Historical Park and 3rd Eye Youth Empowerment Inc., a local youth group where teens discussed history and the national parks through hip-hop.

YAP! has made eight educational videos and a documentary. This one involved more than 300 people, including crews at each of the NPS sites and local artists like Tem Blessed, Cita Light and Jay Beats (Jair Santos).

The song was completed in May and the video effort began in June and ended earlier this month, Gilbarg said.

Participants said they are happy to see national acknowledgement of their efforts.

"It's really exciting," said Dakota Lopes, 22, who stars in the video and traveled with the crew to seven national parks in four states to film it — New York, Vermont, New Hampshire, and Massachusetts.

NPS Director Jon Jarvis, who met the traveling crew in Washington, D.C., makes a cameo appearance in the video to say, "It's great to celebrate a hundred years with YAP!"

The result is an upbeat, catchy tune with creative graphics and a History Machine bus modeled after the Mystery Machine from Scooby Doo.

The song was produced as a birthday wish for the National Park Service through G.O.A.L. Academy funding and was instantly thought to be a hit, said Gilbarg, who spearheaded the project. It was written by YAP! members Lopes and Skylyr Bento, 21, who are featured in the video.

It was a wonderful experience, Bento said. "It really has the potential to be something great for the National Park Service and I am glad I could be a part of it," he said.

YAP! is currently working on creating a supplemental behind-the-scenes video from their summer trip and “trying to get more people to see it,” said Gilbarg who is also working on a video project to get more young people to consider STEAM (Science, Technology, Engineering, Arts, and Mathematics) careers.

‘Kentucky Is On The Move’

[Louisville \(KY\) Courier-Journal](#), October 20, 2015

Kentucky’s burgeoning travel and tourism industry received a ringing endorsement Tuesday from Lt. Gov. Crit Luallen in an address to the Kentucky Travel Industry’s annual conference in Bowling Green.

She noted that the industry has increased in economic impact by more than \$2.2 billion over the past five years to an estimated \$13 billion.

She said the industry now supports 180,000 jobs statewide, making it the state’s third-largest job creator during the two-term administration of Gov. Steve Beshear.

“Kentucky is on the move, and tourism is a big part of this success,” Luallen said. “Working with our travel and tourism partners, we’ve showcased to the world Kentucky’s remarkable beauty and resources, from our magnificent mountains, unique cave system and recreation lakes, to our one-of-a-kind Kentucky Bourbon Trail destinations and world-famous thoroughbred industry.”

Luallen told the group that tourism is being widely recognized as an economic force. She noted the recent formation of the Shaping our Appalachian Region, or SOAR, initiative and the naming of a working group to try to capitalize on the region’s rich natural amenities and potential for economic development and job creation.

Luallen added that as our lives become increasingly technology-based, it’s essential that people have the opportunity for “an authentic experience.”

“Tourism gives us that,” she said. “That’s why your industry is so important, not just to the economic well-being of our state, but to the fundamental well-being of our people.”

Following her remarks, the Lieutenant Governor recognized five national parks in Kentucky as part of the National Park Service Centennial in 2016.

Luallen presented proclamations to representatives of the parks. The parks were Abraham Lincoln Birthplace; Big South Fork National River and Recreation Area; Cumberland Gap National Historic Park; Fort Donelson National Battlefield; and Mammoth Cave National Park.

59 National Parks In 12 Months: Couple Includes Northeast Ohio On Tour Of America’s Prettiest Public Spaces (photos)

[Cleveland Plain Dealer](#), October 21, 2015

PENINSULA, Ohio – It started as a simple thought, casually expressed.

“I’ve always wanted to go to all the national parks,” he said.

“That would be cool,” she said.

Eighteen months later, the idea has become reality. Cole and Elizabeth Donelson, St. Louis natives, are two months into their grand adventure: 59 parks in 12 months – part celebration of the National Park Service’s 100th anniversary, part exercise in youthful spontaneity.

The two, both 26 and married for two years, brought their parks tour to Northeast Ohio over the weekend, where they camped, biked, hiked and road the rails through 33,000 acres of Cuyahoga Valley National Park.

They arrived in Ohio after two months exploring some of the nation’s most spectacular parks and iconic public spaces: the Grand Canyon, Arches, Bryce and Zion.

Even after that spectacular build-up, Cuyahoga Valley impressed.

“This park really embraces the seasons,” said Elizabeth, taking a break from nature Monday morning at a Starbucks in Brecksville, where she was Skyping with a classroom back in her home state.

Despite cold, blustery weather over the weekend, park activities drew large crowds, including a guided Ghost Walk around Kendall Lake and a fossil-hunting expedition at Everett Covered Bridge.

“The engagement with the community has been something we haven’t seen anywhere else,” said Cole.

The couple spent four nights here, with a scheduled departure early Tuesday, headed east toward Acadia National Park in Maine.

Among their Northeast Ohio highlights: Ledges Trail, Bridal Veil Falls, the farmers' market and getting lost in a corn maze at Szalay's on Riverview Road.

One other unexpected bonus: a family from Middleburg Heights, whom the Donelsons met while hiking, invited the couple to dinner and to spend the night in a real bed, after weeks of sleeping on the ground in a tent.

"It was sleeting at that moment," said Elizabeth.

She and her husband graciously accepted.

The two quit their jobs this summer – she was working as a sixth-grade teacher, he at a health-care IT company. Though a few skeptics voiced concern, most of their friends and family were supportive of the idea.

"Gradually, the idea became something we were going to do, not something we wanted to do," said Cole. "We decided we would regret it if we didn't do it now."

In the months leading up to their departure, they saved their pennies, came up with a budget of about \$20,000 for the trip, mapped their route, moved out of their townhouse in Kansas City, divested and stored most of their possessions. Finally, they loaded their Ford Escape with camping equipment and outdoor gear.

Their goal: See the best of the United States, and inspire others – particularly other millennials – to do the same.

Their mission meshes well with a new campaign of the Park Service, which celebrates its centennial anniversary in 2016. The park service this year kicked off a long-term marketing effort, dubbed "Find Your Park," designed in part to attract more young visitors to the nation's premier public spaces.

Though the national parks this year are on pace to attract a record-setting number of visitors, officials have lamented that too few of those visitors are under the age of 40.

Indeed, Elizabeth and Cole said many of their fellow travelers, particularly out West, have been from the older, RV-toting generation.

"I think a lot of people our age just don't think of the parks as much," said Elizabeth, speculating that younger travelers are more tempted by backpacking adventures through Europe or hitting beaches in exotic places.

"We have ambitions to travel internationally as well," said Elizabeth.

But right now, their immediate ambitions are taking them to Maine, then Virginia, then North Carolina.

"Our parks cover deserts, mountains, swamps, beaches, hard-wood forests," said Cole. "We want to see all of it."

And they plan to.

In the first two months of their adventure, the couple hit 11 parks in the Southwest. Among the highlights: hiking rim to rim to rim in the Grand Canyon, marveling at the dark sky at Great Basin and learning how to fly fish at Black Canyon of the Gunnison.

They're sharing it all via social media and on their blog, Switchbackkids.com, where they've picked up a few sponsors for the trip, including L.L. Bean, which donated sleeping bags and other equipment.

(Speaking of blogging and communication: That's another thing they liked about Cuyahoga Valley – excellent cell phone reception, unlike in some of the more remote parks they've visited.)

After Acadia, they're headed to Shenandoah, Great Smoky Mountains and points south. They've planned well for the end of the year: Virgin Islands, Dry Tortugas, Everglades and Biscayne.

After a detour home to St. Louis for Christmas, they're headed to Hawaii and American Samoa.

Their only misstep so far: They planned a visit to Isle Royale in northern Michigan before coming to Ohio, unaware that the island park in Lake Superior largely shuts down at the end of September. So they've added it to next year's itinerary.

One other worry, for Elizabeth at least, is their first bear sighting.

The couple will end their tour next summer in the place that most intimidates them: Alaska, home to eight national parks, including several accessible only by boat or airplane.

By the time they reach Alaska, however, they'll be experienced park explorers, with more than 50 parks behind them.

Cole said the trip is about more than miles logged, trails hiked, scenic views photographed.

"It's about not being afraid to go out and follow a dream, as cliché as that sounds," he said. "Whatever it is, it's doable. You just need preparation, a little good luck and support."

And, just in case, a couple of cans of bear spray.

Watchdog Raises Questions About \$69M In NPS Construction Funds

[Greenwire](#), October 20, 2015

A federal watchdog yesterday released a disputed report alleging that the National Park Service is violating congressional intent by dipping into its construction account to cover security, air testing and other reimbursable expenses that should have been paid up front by other agencies. The NPS construction account is "only for expenses that relate to 'construction,

improvements, repair or replacement of physical facilities,” the Department of the Interior’s Office of Inspector General report said, citing the language of the agency’s appropriation. But the OIG found that 17 out of a sample of 21 interagency agreements that used Park Service construction funds to cover reimbursable costs did not appear to include “a valid construction purpose.” These included \$4.9 million that NPS spent from its construction account on security at the Department of the Army’s Memorial Day and Independence Day concerts at the Capitol in 2014 and \$37.5 million over seven years on air quality monitoring at national parks that will be paid back to NPS by U.S. EPA.

U.S. Rep. Gosar Leads U.S. House Committee Passage Of Bi-partisan Grand Canyon Bison Management Act

[Grand Canyon \(AZ\) News](#), October 21, 2015

PHOENIX – A solution to a rapidly growing bison herd on Grand Canyon’s North Rim was reached after a bill was approved that could allow hunters to obtain state hunting licenses to hunt the bison within park boundaries.

The U.S. House Natural Resources Committee approved the bill allowing the Arizona Game and Fish Department (AZGFD) to better manage and conserve the bison population within the park Oct. 8.

The Committee passed the Grand Canyon Bison Management Act, attaching it as an amendment to the larger Sportsman’s Heritage and Recreational Enhancement (SHARE) Act. The Grand

Canyon Bison Management Act requires the U.S. Department of Interior and the Arizona Game and Fish Commission to coordinate on a plan that allows sportsmen holding a valid state-issued hunting license to assist in management of the bison population within the park.

“Yesterday the House Natural Resources Committee threw their support behind protecting the Grand Canyon National Park, wildlife conservation and supporting our dedicated sportsmen and women,” said Kurt Davis, chairman of the Arizona Game and Fish Commission. “The Arizona Game and Fish Commission and Department thank U.S. Rep. Paul Gosar for leading this commonsense legislation in the U.S. House, with the support of our Arizona Congressional delegation. We also look forward to continuing to work closely with U.S. Sens. John McCain and Jeff Flake in the Senate.”

The bi-partisan bill is a step closer to being considered by the full U.S. House of Representatives. McCain and Flake have introduced identical legislation in the Senate.

“The bison population is exploding and this issue needs to be resolved now,” Gosar said. “The bi-partisan, bicameral effort passed with unanimous consent by the committee will protect Arizona’s greatest treasure, the Grand Canyon, from this species in a responsible manner. This legislative solution is a victory for sportsmen, conservationists and taxpayers who will provide a timely resolution to the bison problem plaguing the Grand Canyon National Park.”

The Grand Canyon Bison Management Act aims to address an over-abundance of bison whose movement in and near the canyon’s North Rim have impacted natural and cultural resources within the park.

Wildlife surveys estimate around 600 bison have migrated into the park, where hunting is prohibited. The park has since become a safe haven for the bison population, which has led to overgrazing and damage to the Grand Canyon’s natural resources.

The House bill was co-sponsored by U.S. Reps. Ann Kirkpatrick, Kyrsten Sinema, Matt Salmon, David Schweikert and Trent Franks.

Floods Trap Stargazers, Rangers In Death Valley

[Greenwire](#), October 20, 2015

Mudslides and flooding after severe thunderstorms in Death Valley National Park on Sunday trapped three park rangers and about 20 visitors – many out to see a clear night sky – in a volcanic crater overnight. Park spokeswoman Abby Wines said the stranded people spent the night in Ubehebe Crater, maintaining contact with park headquarters until they were able to reach safety yesterday morning. No injuries were reported, but Wines said the unexpectedly severe storms knocked out power in the area, damaged and closed several roads, and filled a historic visitor’s center with several feet of mud and debris.

National Park Service Set To Continue With Tree-Cutting At Potomac Campground

[Bethesda \(MD\) Magazine](#), October 21, 2015

Updated at 12:45 p.m. – After complaints from two nearby residents and a call from County Council member Roger Berliner temporarily halted tree-cutting operations Friday at a Potomac campground, the National Park Service said it plans to resume the tree-cutting and will probably do so in the next few days.

John Noel, deputy superintendent for the C&O Canal National Historical Park, told Bethesda Beat Monday that he went to the Swain's Lock Recreation Site to examine the 26 trees proposed to be removed and 32 others proposed to be pruned at the site's campground. He agreed that the trees are rotting and in danger of falling on park users below.

Rather than call in another arborist to judge the trees, Noel said the tree-cutting would resume after he is able to explain the situation to Barbara Brown and Sylvia Diss, the two Potomac residents who first raised concerns about removing trees at Swain's Lock.

Noel said two National Park Service arborists and three arborists with the tree-cutting contractor have already reviewed which trees are rotting and are in agreement. He said C&O Canal Park officials regularly review the health of trees in recreation areas throughout the park's 184.5 miles of land.

"Having a sixth person come out and look at it would be ridiculous," Noel said. "We don't think it's worth taxpayers' money to do that."

The complaints from Brown and Diss led to Berliner calling park Superintendent Kevin Brandt, who agreed to halt the work until another review could be done.

Brown, who more than 10 years ago led the charge against Washington Redskins owner Dan Snyder's clear-cutting of trees between his Potomac property and the C&O Canal Park, said Tuesday that the tree-cutting operation began last week.

"There aren't any hazardous trees down there. It's a beautiful campground," Brown said. "They are basically clear cutting it and there's no explanation except that they don't like the type of trees there."

Noel says there are hazardous trees around the campground.

"There are a lot of qualified people looking at this and the last thing we want to do is cut a tree down that's a healthy tree," Noel said. "But in our campgrounds, our visitors have a certain expectation of safety. People are laying in a tent. They are picnicking at a table. There are dead branches on these trees that have the potential to fall."

Most of the 58 trees to be removed or pruned are maple and boxelder trees, Noel said. He said the tree-cutting would leave plenty of healthy trees on the Swain's Lock campground and that "you're not going to notice any difference in the tree canopy."

"In many cases, the trees are rotten from the center of the tree and you can't tell as an unskilled arborist whether this tree that looks fairly decent isn't completely rotten in the center," Noel said. "We're constantly evaluating our trees, especially in these high-use areas."

Canoe Trip Around Wolf Lake An Eye-opener For Clark Students

[Merrillville \(IN\) Post-Tribune](#), October 20, 2015

All classes in Grades 6 through 9 at George Rogers Clark Junior-Senior High School in Hammond recently experienced a unique field trip right in their own back yard — a canoe trip around Wolf Lake located only a few blocks from the school.

The venture was made available through a partnership with the National Park Service, Dunes Learning Center and Wilderness Inquiry.

"Part of our outreach program at Dunes Learning Center is the Mighty Acorns program, which we deliver with Shirley Heinze Land Trust and the Field Museum," executive director Geof Benson said. "This year, we leveraged the Mighty Acorns connections and others to experience the Canoemobile as part of their fall field trip for watershed education."

After walking with her classmates the few blocks from school to the Wolf Lake Pavilion, Clark ninth-grader Jazlyn Robles of Hammond talked about her first experience with a canoe last year while on vacation with her family.

"That was very exciting and I'm looking forward to my second time," she said "It wasn't too hard."

Classmate Riley Bishop of Hammond wasn't apprehensive about her first try with the canoe paddles.

"I've never been canoeing, so this is a new experience for me," she said, as her group was instructed on the finer points of paddling. "I've been to concerts and fishing here at Wolf Lake, but not on a boat. It's very exciting to see things from a different view."

The Canoemobile is a traveling fleet of 24-foot canoes going across the nation to teach environmental literacy to urban youth. Students from 24 cities in Lake, Porter and LaPorte counties participated in the program, which also includes home schools and a Boy Scout group.

Clark teachers attended an introductory class at Dunes Learning Center before bringing the program to their classrooms.

"This (program) is really beneficial to the students," said Clark American literature teacher Aquinas Lewis, as her class took part in nature activities before heading to their canoe. "They can take what they've learned in class and bring it to life."

Before stepping into the 12-seat Voyager canoes, the students were given safety tips, instruction on how to handle a paddle, and other pertinent information.

Once everyone was settled in their seats, Wilderness Inquiry educators gave lessons to the students as they skimmed across the lake.

The water-based adventure makes a big impression on both students and educators, according to Benson, the Dunes Learning Center executive director.

"You can see how proud and excited they are as they get out of the boat," he said. "Students leave the experience more confident and ready to learn. That's why we do it."

In addition to the three-day student event, Dunes Learning Center also hosted a Community Day for the public at Wolf Lake. Canoe lessons and a trip around the lake were on the agenda.

Kassie White and her son Adam, 14, were among the dozens going out in the water.

"It was very interesting to learn exactly what's in this area," she said of the discussion on the canoe. "Seeing the natural habitat from this view was an eye-opener."

New Superintendent At Colonial National Historical Park Reaching Out To Community

[Newport News \(VA\) Daily Press](#), October 20, 2015

Kym Hall visited Jamestown Island on a family vacation 12 years ago, thinking she wanted her National Park Service career to bring her there.

In July she took over as superintendent of the Colonial National Historical Park.

"I saw the resources and saw the stories, and said this is phenomenal," Hall said, sitting in her glass-fronted office with the green park spilling out behind her. "This is the birth of our country and I want to work here someday — I want to be the superintendent here someday. This is great."

She didn't think it likely, but when her friend Dan Smith got ready to retire from the job last year, he encouraged her to apply. She still can't quite believe it has all come together, and is quickly working to build relationships with local officials and organizations.

"Since that time, I think they've done a lot of the work on the Yorktown end of things," Hall said. "They've redone the Riverwalk and I've gotten to see Main Street, and kind of think about what could happen there in terms of bringing that back to life in a more vibrant way.

"So to me it was just like there's all kinds of possibilities of things that we can do here."

Hall, 48 and the mother of three sons, is a 28-year veteran of the National Park Service who grew up on the West Coast. She comes to Colonial after short stints as acting superintendent for the Outer Banks Group parks in North Carolina and Glacier National Park in Montana.

Hall had worked as deputy superintendent at Glacier since 2011. She began her career at Olympic National Bank in Washington state before working on various regulations at the NPS headquarters in Washington, D.C., as well as serving as superintendent of the Southeast Arizona Group parks and acting superintendent of Glen Canyon National Recreation Area in Arizona.

The York County Board of Supervisors warmly welcomed her at its Sept. 1 meeting. Hall hit a few key points, then addressed several issues raised by board members in a 45-minute portion of the meeting.

Hall told the board members she wants to get businesses into vacant buildings in Yorktown Village, and asked for their patience while she looks at a parking plan for the Fourth of July and other big events. When asked, she also briefly addressed the controversial replica tobacco press that was installed in the village and a road safety issue on the Colonial Parkway near Queens Lake

"They are issues that need to be dealt with," Hall said, stressing that her approach is to always try to be a "good neighbor" and to work collaboratively with other groups to find solutions.

Those issues have been prioritized, and Hall said this past week that she is addressing attracting businesses and parking first. The tobacco press, for right now, is being left in place until more research on its historical authenticity can be done.

Officials from the NPS regional office will visit next week to start assessing buildings and working on details about putting out bids and making leases with potential businesses.

Parking for big events will stay the same right now, but Hall is seeking money from the park service to do an archaeological study on the Yorktown Battlefield and village areas. In the past, parking around the village and setting off fireworks have been points of contention for the Fourth of July because of possible damage to the historical grounds and the risk for lightning strikes.

"I don't know that there's a perfect answer," Hall said. "But I think we've got a plan of at least how we're going to try to get some answers on that issue."

The park service will celebrate its centennial in 2016 and special events will run throughout the year to try to draw people into the parks. In line with that, Colonial will step up its outreach to the community.

"We're going to try to have a more significant presence," she said. "Not just asking people to come to us, but trying to step outside the boundaries and come to them. Whether that's schools, tourism meetings, collaborate discussions on challenges within our counties and communities.

"We want to be seen as part of the community in a variety of ways."

Hall said that she appreciates those who have advocated for preserving views at Jamestown Island with regard to Dominion Virginia Power's proposal to install overhead power lines across the James River there.

"The view should be protected," she said.

Her biggest request for the general public is to drive more carefully on the parkway and battlefield roads, watching speed limits and being mindful of bicyclists and people stopping to enjoy the views. All, of course, while not littering.

"Obey speed limits, be cautious, use it as a time to slow down and really take in the beauty of where we live," Hall said. "We do get sort of numb to it. Every day I get on that parkway and think, man this is beautiful. Feel free to slow down and enjoy that."

Williams can be reached by phone at 757-247-4644.

Devils Tower To Host Star Viewing Parties October Through December

[Casper \(WY\) Star-Tribune](#), October 21, 2015

Have you ever seen Devils Tower illuminated by the night sky? Now's your chance.

The National Park Service announced that Devils Tower will host a series of star viewing parties October through December. The eight parties are free of charge, and will last approximately two hours.

Telescopes will be provided at the events, but those with telescopes are encouraged to bring theirs along.

The first star party will take place on Thursday, and will feature an Orionids meteor shower. The next event will take place on Oct. 27 and will feature a guided walk with a ranger on the evening of a super moon. A full list of the events can be found at www.nps.gov/deto.

Why Are The Feds Sticking With A Racist Name For A Washington Lake?

[High Country \(CO\) News](#), October 21, 2015

In central Washington, one of Jonathan Rosenblum's favorite fishing holes is a lake near the foot of 8,122-foot Mount McGregor, where the Pacific Crest Trail snakes past the North Cascades. A union organizer from Seattle, Rosenblum loves to hike to the lake with his young daughters and ply them with the history of the region. One of his favorite stories is about Wilson Howard, a black gold miner, who braved the elements and unknown landscape to file a late-1800s mining claim in the area and named the lake after himself.

Because of Rosenblum's 2007 petition, Washington state now officially calls the lake by what is believed to be its oldest known name, Howard Lake. The federal government, however, recognizes the lake by a name that causes the jaws of most people of color to drop: Coon Lake. Rosenblum's research shows that some white locals began calling the lake "Coon Lake" in the early 1900s, after Howard's departure; further sleuthing uncovered no raccoons in the area.

The federal government did not follow the usual course of supporting the state's action, mostly because of opposition from the National Park Service, which manages the area that contains the lake.

Rosenblum is quick to recognize the irony of the situation. Washington Gov. Jay Inslee, who is white, calls the place Howard Lake, after the black miner who named it. President Barack Obama, who of course is black, is supposed to call it by a term often used as a racial slur and tantamount to fighting words.

The Park Service, acting on research from its North Cascades unit, originally defended its stance by claiming that there was ambiguity around the use of the term "coon."

"At the time, no evidence was found that the name was intended as a pejorative term or racial slur; if we had found such evidence, we would have recommended changing the name immediately," said Craig Dalby, a spokesman for the Pacific West Region of the Park Service. "The National Park Service is re-examining its position because of ongoing community concerns and will provide feedback to the U.S. Board on Geographic Names in the near future."

In the years leading up to its 2016 centennial, the Park Service has done a lot of talking and writing about the need for diversity and inclusiveness. But it has done little to address the issue: Its own ranks remain 82 percent white, as does the

estimated percentage of park visitors, according to the agency's 2011 survey. The controversy over Howard Lake gives the agency the opportunity to correct a historic wrong and send a much-needed signal about diversity.

Seattle Democratic Sen. Pramila Jayapal has written a letter urging the state's congressional delegation, as well as Interior Secretary Sally Jewell, to press a federal name change to Howard Lake. Fifty of her fellow state legislators, including six Republicans, have signed it. Another local activist, Eddie Rye Jr., whose daughter Angela is the former executive director of the Congressional Black Caucus, says he has been enlisting caucus members to "help in getting rid of this racist name."

By following the Park Service's lead on "coon," the federal board on geographic names butted up against its own policies, which say that the board "will not adopt a name for federal usage that is determined by the board to be derogatory to a particular racial or ethnic group, gender, or religious group."

The National Park Service seems irrationally resistant to the idea of honoring Howard. It filed a competing request in 2007 for the lake and a nearby creek to be named after William McComb, a member of the first road-clearing crew in Stehekin Valley. The proposal was rejected. Rosenblum strongly believes that changing the name to McComb would not have been an acceptable compromise. Removing the homage to Howard, the African American miner, was a form of what Rosenblum calls "eracism."

Times change. The issue of Coon Lake's name gained new steam following the Obama administration's recent decision to change the name of North America's tallest mountain from Mount McKinley to Denali. The state of Alaska had been petitioning for such a change for 40 years, and the dispute was resolved by the stroke of Secretary Sally Jewell's pen. A similar secretarial order could avoid a repeat of what already has been years of filings hearings, and also prevent a dispute over a 15-acre lake that, in this country's current racial climate, could get ugly.

Such an order also might save the National Park Service from itself. A projected nonwhite U.S. majority that is hostile to our national parks spells doom for the already resource-strapped agency. It's past time for the Park Service to back away from its misguided opposition, encourage Secretary Jewell to come to its rescue, and allow another black life to matter.

Controversial Study Claims 99.9 Percent Chance Of Major Los Angeles Earthquake In 3 Years

[Southern California Public Radio](#), October 20, 2015

Angelenos live under constant threat of a major earthquake, but a controversial new study from NASA's Jet Propulsion Laboratory puts a number on that threat. The scientific paper claims there is a 99.9 percent chance of an earthquake between magnitude 5 and 6.3 in less than three years.

The study was published earlier this month by the American Geophysical Union's Earth and Space Science journal. The bold claim has taken many in the seismic community by surprise.

JPL geophysicist Andrea Donnellan said this study used GPS and airborne radar data to look at land deformation caused by last year's 5.1 La Habra earthquake. Her team determined that, based on the surface changes, there is still a fair amount of pent-up seismic energy in the region that needs to be released.

"It's almost like using the surface of the Earth as an instrument to understand what is going on deeper," she explained.

That energy could spawn shaking associated with a magnitude 5 or 6 temblor, she added, but that energy could crop up on any number of faults within a 100-kilometer range of last year's quake.

This sort of prediction is quite common. What isn't common is claiming a 99.9 percent chance of such a quake in a window of time as small as three years.

Donnellan said her team arrived at the conclusion by looking at the number of magnitude 5 earthquakes in the region over the last 81 years. There were 32 such events.

"So if you just look at that on average, it's about an earthquake every three years," Donnellan said.
