Lucy Jones with the U.S. Geological Survey said that methodology doesn't fully explain the prediction, and the study doesn't adequately address this either.

The USGS conducts its own look at quake risk in California — the most recent version is called Uniform California Earthquake Rupture Forecast, Version 3.

Jones said that, according to those models, there is only an 85 percent chance of a magnitude 5 or 6 quake in the same region over a three-year period.

"It's nowhere near a 99.9 percent number," Jones said.

While the AGU journal the JPL paper appeared in usually conducts peer review of studies, Jones said it's custom that most quake prediction studies are also sent to the National Earthquake Prediction Evaluation Council or its California counterpart.

However, she said this paper was not submitted to those organization for review. She added that there is no scientific consensus on this issue.

"This is the opinion of a small group of scientists — it has not been reviewed for action as a prediction, and I wouldn't be changing any behavior on the basis of this study," Jones said.

Several earthquake researchers approached by KPCC said they were surprised by this study and its conclusions. However, JPL's Donnellan defended the research, saying that it's now up to the larger scientific community to evaluate the claims and see if different ones are called for.

"In science, individual methods are always controversial to somebody, but that's how we make forward progress," she said.

The study, titled "Potential for a large earthquake near Los Angeles inferred from the 2014 La Habra earthquake," was first published by AGU online on Oct. 1.

White House: Canadian Relationship Remains Strong After Trudeau Election

By Gregory Korte

[USA Today](#), October 21, 2015

WASHINGTON — The White House congratulated Canada's prime minister-designate Tuesday, signalling that a change in power north of the border wouldn't diminish the close relationship between the two countries.

President Obama will call Justin Trudeau Tuesday — and will likely call conservative Prime Minister Stephen Harper as well, White House Press Secretary Josh Earnest said, saying Obama was "deeply appreciative of Prime Minister Harper's acts to build a strong U.S.-Canada relationship."

The election has the potential to change the relationship on a number of key issues. Trudeau had accused incumbent prime minister, Conservative Stephen Harper, of reducing the entire U.S.-Canada relationship to a dispute over the Keystone XL pipeline and hurting relations by "haranguing" Obama over the issue. Obama has vetoed a bill to approve the 1,179-mile oil pipeline from Hardisty, Alta., to Steele City, Neb., although his State Department says it's still considering an application that would grant a permit.

Trudeau also supports the pipeline, but has done so within an environmental platform that also proposes a new North American carbon tax regime to reduce greenhouse gasses.

But while the Liberal Party victory could bring a closer alignment on environmental issues, it may also create new tensions on others. Trudeau has also said he wants to end Canada's involvement in operations in Iraq and Libya to counter the Islamic State, instead following a train-and-equip strategy that the United States has found ineffective.

"It would be shortsighted to reduce the relationship between our two countries to just one issue," White House Press Secretary Josh Earnest said Tuesday. "The fact is, there are a whole range of issues where the United States and Canada worked effectively together to advance the interests of both countries. Obviously, Canada made a substantial and important contribution to our counter-ISIL coalition."

Earnest also cited Canada's work toward an international climate agreement in Paris next month, and on the Trans-Pacific Partnership trade negotiations. Those issues are even more important than the differences over the Keystone pipeline, he said.

Obama Offers Congratulations To Trudeau, Appreciation To Harper

By Meagan Fitzpatrick

[CBC News \(CAN\)](#), October 20, 2015

U.S. President Barack Obama has congratulated Justin Trudeau on leading the Liberals to victory and offered his appreciation to outgoing Prime Minister Stephen Harper for his efforts to build a strong bilateral relationship, the White House said Tuesday.

The Canadian election results were the first topic of conversation at the daily White House briefing. Press Secretary Josh Earnest was asked whether he expects the Canada-U.S. relationship to get easier under Trudeau because Harper seemed "annoyed" over the long delay on a Keystone XL pipeline decision.

"Well, I think it would be short-sighted to reduce the relationship between our two countries to just one issue," Earnest responded. The proposed cross-border pipeline recommendation is still pending at the State Department and has yet to get a final decision from Obama.

Earnest said there are a number of issues that Canada and the U.S. work effectively on, including Canada's participation in the international coalition to fight ISIS terrorists in Iraq and Syria and the recently concluded Trans-Pacific Partnership trade deal. Earnest said Canada's negotiators were instrumental in helping close that deal and that both countries will benefit from it if it's implemented.

But pressed further on when a Keystone decision might come, Earnest said Secretary of State John Kerry spoke about it earlier Tuesday and indicated the Canadian election result would have no bearing on the timing of a Keystone decision or on whether the answer will be "yes" or "no." Canada can do more on climate change

Earnest said the White House does not have an expectation on when the State Department will complete its review and send its recommendation to Obama. The president does expect to make a decision, however, before he leaves office after the 2016 election, he said.

"Hopefully we'll get it done well before then, if for no other reason than we can stop talking about it," Earnest said.

Obama is under pressure from environmentalists to reject the TransCanada Corp.'s pipeline project that would connect Alberta's oil patch with refineries in the Gulf Coast. Trudeau, like Harper, is in favour of the pipeline's construction but also says he wants to co-operate with the U.S. on environmental issues.

Liberal Leader Justin Trudeau visited Washington, D.C., in the fall of 2013. He's pledged to make the U.S.-Canada relationship a more constructive one and blames outgoing Prime Minister Stephen Harper for weakened ties between the two countries. (Susan Walsh/Associated Press)

Harper's government has lobbied for years in Washington for approval of Keystone. The outgoing prime minister has called the approval a "no-brainer" and Harper once said he wouldn't take "no" for an answer.

Earnest noted on Tuesday that Canada has made some "important commitments" in advance of the United Nations global climate change conference in December in Paris but added: "We believe it's possible that there's more that Canada could do in this regard."

It's too early to judge whether Trudeau will follow through on environment policy promises made during the campaign, said Earnest, while also admitting he did not follow the campaign closely. Obama to press Trudeau on environment

Obama has been pressing world leaders to make serious commitments to reduce greenhouse gas emissions in Paris, and that will be no different with Trudeau, he said.

Trudeau has pledged to repair what he described as a frayed Canada-U.S. relationship under Harper but that could get off to a rocky start if he follows through on a promise to withdraw Canada's fighter jets from the U.S.-led fight against ISIS. The Liberals want to provide more humanitarian aid in Iraq and Syria and have Canada's military involved in training missions not bombing missions.

The White House said it appreciates Canada lending its skill and expertise to the mission so far and hopes it can continue to count on its northern neighbour to participate in the coalition.

The White House spokesman said in addition to phoning Trudeau, he expects Obama will make a phone call to Harper in the near future as well.

"Our bilateral relationship has enhanced the security and prosperity of the American people and we certainly are appreciative of Prime Minister Harper's efforts to strengthen that relationship and we look forward to building on that kind of progress when Mr. Trudeau takes over the Prime Minister's Office."

White House Congratulates Canada's Trudeau, Obama To Call Soon

[AFP](#), October 21, 2015

WASHINGTON (AFP) – The White House on Tuesday welcomed the election victory of Canada's Liberal leader Justin Trudeau and expressed hope his government would step up actions to fight climate change.

Spokesman Josh Earnest said President Barack Obama would speak to the prime minister-elect as soon as Tuesday, and indicated the White House hopes his government will help reach a major global climate deal in December.

"Canada has also made a substantial and important commitment in advance of the Paris climate talks," Earnest said, praising the government of outgoing Prime Minister Stephen Harper.

He added, however, "We believe that it's possible that there is more that Canada can do in this regard."

"The United States, and certainly President Obama congratulates prime minister designate Justin Trudeau on the Liberal Party's victory in yesterday's elections," Earnest said.

"I would expect the president will have the opportunity today to call Mr Trudeau to congratulate him on that election victory."

Earnest said the White House was “deeply appreciative” of his work “to build a strong US-Canada relationship.” Obama and Harper’s government had clashed over climate policy and the approval of the transborder Keystone pipeline. Earnest said “it would be shortsighted to reduce the relationship between our two countries to just one issue.”

5 Reasons The U.S. Should Care About Canada’s New Prime Minister

By Kim Hjelmgaard

[USA Today](#), October 21, 2015

Canada just elected its first new leader after nearly a decade of Conservative Party rule. Here are five ways Liberal Party leader and soon-to-be prime minister Justin Trudeau is likely to affect policies in Canada and the United States.

THE ECONOMY

Trudeau, 43, has pledged to increase deficit spending on major infrastructure projects to kickstart Canada’s sagging economy. He says Canada’s fortunes won’t improve unless it chooses economic stimulus over a balanced budget, which he has vowed to achieve by 2020. A stronger Canada helps the USA because they are huge trading partners.

TAXES

Trudeau has pledged to hike taxes for Canada’s top 1% of earners and cut taxes for the middle class, although he has been vague on how he defines middle class. According to Canada’s Globe and Mail newspaper, those who earn over \$200,000 will see their taxes go up by about 4% under his plan.

MARIJUANA

Trudeau says he wants to legalize the drug “right away,” a position that provoked ridicule from political opponents during the election campaign. However, he has been vague on the details of his legalization program, including how it would be taxed and possible transport across the U.S.-Canadian border.

KEYSTONE XL PIPELINE

Trudeau supports the proposed oil pipeline system that would run about 1,200 miles from Canada to Nebraska, but he is less of a cheerleader for the idea than outgoing leader Stephen Harper. He is worried about the environmental impact and has called for better safety standards. He opposes a separate project for energy products to be piped from Alberta to British Columbia.

U.S. RELATIONS

Trudeau promised to improve strained relations with President Obama, who has not embraced the Keystone pipeline project. Trudeau also said he wants to find constructive ways of working with Washington on other issues. That should be easier since the Liberal leader and Obama are closer in political philosophy than were Obama and Harper.

Under New Leader Trudeau, President Obama May Start Hailing ‘O Canada’

By Adam Kovac

[USA Today](#), October 21, 2015

MONTREAL — Canada’s surprising election of the Liberal Party’s Justin Trudeau as prime minister means both the United States and its northern neighbor can expect increased cooperation during President Obama’s last year in office.

“I think Justin Trudeau is certainly going to reach out to Obama,” said Donald Abelson, political science professor at Western University in London, Ontario. “They share a lot of similar interests in terms of protecting the environment and advancing certain progressive policies on the world stage.”

Abelson pointed to a speech Trudeau gave over the summer about forming an intra-governmental committee to oversee the relationship between the two countries. “I think he does understand the power discrepancy between the two countries,” he said.

Trudeau, 43, and outgoing Conservative Prime Minister Stephen Harper, 56, differ in their approach to foreign policy. Harper, who was seeking a rare fourth term before losing Monday’s parliamentary elections, was an outspoken supporter of the Israeli government, gave a lukewarm reaction to the Iranian nuclear agreement and took strong stances against Russian aggression in Ukraine.

Because of Canada’s small military, any changes by Trudeau will be more of a change in tone than actual involvement of Canadian forces in the Middle East or elsewhere, said Bruce Hicks, a visiting fellow at the Glendon School of Public and International Affairs of York University in Toronto.

“The Liberals will be less supportive of the (Prime Minister Benjamin) Netanyahu approach to Israeli politics,” Hicks said. “They will be pro-Israel, but they will be centrist pro-Israel. I think you will also see them less prone to wanting to be involved in military approaches to the Middle East when it comes to things like (the Islamic State). They’ll be more about wanting to spend money on aid and development.”

That change in philosophy will affect more than just Canada's relationship with the United States.

Canada is "back" on the world stage, Trudeau told a rally Tuesday after his landslide victory ended nearly a decade of Conservative Party rule.

"I want to say to this country's friends all around the world, many of you have worried that Canada has lost its compassionate and constructive voice in the world over the past 10 years," Trudeau said. "On behalf of 35 million Canadians, we're back."

Under Harper, Canada had a more adversarial relationship with the United Nations than with previous leaders, said John McArthur, a senior fellow in the Global Economy and Development program at the Brookings Institution in Washington.

"In general, I would predict the Liberal government will want to work a lot more with multilateral institutions, on the premise that that's the way for a mid-sized, advanced economy like Canada's to have it's greatest influence," he said. "The Trudeau government will probably want to invest more time and political capital in the United Nations. It was seen as a bad moment when Canada wasn't elected to the Security Council a couple of years ago."

Trudeau has expressed support for the XL Keystone pipeline, which would carry crude oil from western Canada to refineries in the American Gulf Coast, but he also vowed to focus more on environmental affairs than Harper did. The future of his energy policy is clouded by the revelation just days before the election that a senior campaign adviser had been advising a Canadian energy company on how to lobby the government.

"There's a view among some, and it's just a hypothesis, that the Obama administration might have had an easier time supporting Keystone if the Canadian government was seen as more progressive and proactive on reducing emissions," McArthur said. "If that is the case, it might be that if Canada shows more proactivity, that opens up a new possibility of conversations on the energy sector, which is so strategically center to the Canadian economy."

Trudeau's iconic father Pierre, who was Canada's prime minister from 1968 to 1979 and again from 1980 to 1984, famously had an antagonistic relationship with Republican Presidents Richard Nixon and Ronald Reagan. While the younger Trudeau does share policy goals with Obama, the relationship between both countries can change drastically depending on who is elected president in 2016.

"I think given Trudeau's ideological orientation, he's more inclined to have a warmer relationship with a Democratic president than a Republican one," Abelson said. Pierre Trudeau "thought with his mind, he acted intellectually. The son, I think, is going to act more with his heart. I think he's going to try and smooth over tensions between the two countries without sacrificing sovereignty — not always easy to do."

Kerry: Canadian Vote Won't Change Keystone Review

By Timothy Cama

[The Hill](#), October 20, 2015

A new government coming to power in Canada does not change how the Obama administration is handling the proposed Keystone XL pipeline, Secretary of State John Kerry said Tuesday.

Kerry made the declaration the morning after Justin Trudeau was tapped to become Canada's next prime minister, since the Liberal Party he leads won a majority of Parliament seats in the election.

Trudeau, like outgoing Prime Minister Stephen Harper, supports the Canada-to-Texas oil pipeline, but he is unlikely to put as much of the government's support and resources into lobbying the Obama administration for it.

Kerry told MSNBC host Andrea Mitchell that the new regime will have no impact on how the State Department reviews TransCanada Corp.'s application to build Keystone XL.

"The decision on Keystone is being based on the merits and countervailing balance of all the input that has come from a very exhaustive agency review," Kerry told Mitchell at a forum hosted by the State Department, after she asked about possible changes to the equation surrounding Keystone.

"I have said again and again, I want to get that done as fast as possible and that is very true."

Trudeau, son of former Prime Minister Pierre Trudeau, has criticized Harper for the degree to which his support for Keystone and for Canada's oil sands industry has strained relationships with other countries, including the United States.

"Unfortunately, Mr. Harper has narrowed the entire relationship with the United States to a single point around the Keystone XL pipeline, and he went to New York and criticized and harangued the president," Trudeau said during a recent debate.

Trudeau could also take some steps toward improving Canada's climate policies, after castigating Harper for making a mockery of Canada on the world stage for weakness on climate, the Canadian Broadcasting Corp. said.

White House: Canadian Election Unlikely To Affect Keystone Timing

Canada's New Prime Minister May Be A Liberal—But He Still Loves The Keystone Pipeline

By Suzanne Goldenberg

[Mother Jones](#), October 20, 2015

Well before his stunning victory in Canada's elections, Justin Trudeau, the Liberal party leader, telephoned David Suzuki, the country's best-known science broadcaster, environmentalist—and a national treasure—to ask for his endorsement.

The conversation did not go well. Suzuki admitted to journalists he called Trudeau a twerp, and the Liberal leader dismissed his critique of the party's climate policy as "sanctimonious crap."

Those hoping for a U-turn in Canada's climate change policy after Conservative Prime Minister Stephen Harper's crushing defeat are in for a reality check.

Trudeau has repudiated Harper's vision of Canada as an "energy superpower," promised to reverse devastating cuts to government science budgets, and fix the country's reputation as a carbon bully in international climate negotiations.

But it would be a mistake to see Trudeau or the Liberals as climate champions. In his victory speech on Monday, there was no mention of climate change, and he was criticized for being vague on the issue during campaigning.

Those hoping for a U-turn in Canada's climate change policy after Conservative Prime Minister Stephen Harper's crushing defeat are in for a reality check.

Trudeau committed to take part in the Paris climate conference at the end of the year, and to convene a meeting of provincial leaders within 90 days to come up with a plan to fight climate change.

His party's campaign platform called for the setting up of a \$2 billion fund to help projects that promote clean energy.

However, Trudeau supports the Keystone XL pipeline—Canada's bid to find new markets for its vast carbon reserves in the Alberta tar sands—a position that puts the Liberal leader at odds with campaigners and with Barack Obama.

Trudeau has close ties to Keystone. David Gagnier, his campaign co-chair, was forced to step down last week after it emerged he had written a memo to TransCanada, the company building the pipeline, offering lobbying advice.

Moments after his victory, Trudeau came under pressure to do more to fight climate change. Elizabeth May, the Green party leader, told the broadcaster CBC she had asked him to think about the topic during a short election night conversation.

"When can we sit down and talk about the climate conference?" May said she asked Trudeau. "We only have 40 days for Canada to get our act together. I'm very concerned that we have to rebuild the damage that Stephen Harper has done to our laws, to some of our policies, to our reputation in the world."

Indeed, Canada has a lot of catching up to do. But two key Liberal positions, on the Keystone XL and on emissions reductions targets, put Trudeau out of step with Obama, who has made climate change the signature issue of his second term in the White House.

Those contradictions could have been the result of tough political realities of the election. Trudeau started out a distant third to the conservatives. Suzuki told CBC he chided Trudeau for playing politics.

"I said, 'Justin, stop it,'" Suzuki told CBC. "You're just being political. I know that you want to make headway in Alberta so you're for the continued development of the tar sands, you're for the Keystone pipeline, but you're against the Northern Gateway [pipeline]. You're all over the damn map!"

In Suzuki's version of the conversation, Trudeau did not appreciate the critique or hearing that keeping warming to 2 degrees Celsius (3.6 degrees Fahrenheit), the internationally agreed goal of the climate talks, would mean that 80 percent of the crude in the tar sands would have to stay in the ground.

But now that Trudeau has won such a decisive majority, his position could change, said Katharine Hayhoe, the climate scientist and commentator, who is from Canada. "It is certainly true that in the past liberal governments have not lived up to their promises on climate, but today we are in a very different situation, in terms of seeing the impacts and in terms of other nations like China taking action," she said.

"It's a different political climate internationally for climate change now than what it was nine years ago, the last time there was a liberal government. I feel a lot more momentum, a lot more impetus, a lot more motivation for Liberals to take a stronger stand on this issue.

"I think that will give him a mandate to make more bolder choices, and I hope that this is one of the bolder choices he will make."

What The Rest Of The World Should Expect From Justin Trudeau.

By Joshua Keating

[Slate](#), October 20, 2015

Canada's election Monday night turned out not to be the nail-biter everyone had expected. Justin Trudeau's Liberal Party ultimately won handily with 40 percent of the popular vote, taking 184 of 338 seats in parliament to form a majority government. Canadians have now elected a very different leader from outgoing Prime Minister Stephen Harper in both substance and style, but what can the rest of the world expect from Canada's new PM?

Joshua Keating is a staff writer at Slate focusing on international affairs.

The main source of U.S.-Canada tension in the later Harper years has been the proposed Keystone XL pipeline, which Barack Obama vetoed in February. Trudeau has described his support for the pipeline as "steadfast," but it's clearly not the make-or-break issue for him that it was for Harper. If Republicans take back the White House in 2016, he'd probably be open to talking about it. But if the Democrats win, we may not hear much more about Keystone.

More significantly, Trudeau opposes the "Northern Gateway" project that has been building pipelines through British Columbia to load Alberta oil onto tankers bound for Asia. He's also vowed to end subsidies for the fossil fuel industry and invest in green energy. So, it will be a very different Canadian government that shows up at climate talks in Paris in December, one that will be much closer to the Obama administration's priorities.

Other changes might be more significant, though it could take a while to notice them. The Liberals opposed Canadian airstrikes against ISIS, which Harper's government expanded into Syria in March. But Canada has conducted only a handful of airstrikes against ISIS in Syria, and while they have flown more than 200 in Iraq, it's a small number compared with the thousands of missions flown by the United States, or for that matter Russia. Even if Trudeau ends Canada's contribution to the air war, he may end up increasing his country's involvement in Iraq if he follows through on a pledge to send more Canadian personnel to train Iraqi forces.

In the broader Middle East, Trudeau has promised, in the wake of the recent nuclear agreement, to restore diplomatic relations with Iran, which Harper suspended in 2012. Harper was also known as one of the most enthusiastically pro-Israel world leaders. While Trudeau isn't expected to be quite as buddy-buddy with Israel's Benjamin Netanyahu, overall policies shouldn't change that much.

Trudeau has also said he would withdraw the country's plans to buy Lockheed's troubled F-35 fighter jet. Instead, the government will plan to buy more affordable aircraft to replace Canada's aging fighter fleet and buy more icebreakers and combat ships amid growing tension with Russia in the Arctic.

The biggest shift may come on refugee policy. Trudeau has pledged to take in 25,000 asylum seekers by Jan. 1 and has said he'd consider airlifting Syria refugees directly from the Middle East. Harper's government had been criticized for the slow pace of refugee resettlement, particularly after the death of toddler Aylan Kurdi, whose family was trying to reach Canada, captivated the world's attention last month. As of August, Canada had only taken in a little more than 1,074 of the 10,000 Syrians it had promised to resettle over three years. Harper had also tried, unsuccessfully as it turned out, to make Muslim face veils a major issue in the campaign.

Trudeau seemed to be referring to the issue in his victory speech Monday night, saying, "We know in our bones that Canada was built by people from all corners of the world, who worship every faith, who belong to every culture, who speak every language." While it was undoubtedly the economy more than any other factor that sealed Harper's downfall, it's notable, given the recent populist backlash to the refugee crisis in Europe, that in the first major election where Syrian refugees were an issue, the side advocating a more open and generous approach prevailed.

Justin Trudeau Seeks To Set New Tone In Canada

Newly elected prime minister vows to restore country's reputation for international cooperation on climate change and other issues

For Canada, Most Noticeable Change Under Justin Trudeau Could Be Tone

By Ian Austen

[New York Times](#), October 21, 2015

OTTAWA — Justin Trudeau's Canada is likely to present a very different face to the world from the one it showed under Stephen Harper, the Conservative prime minister he and his Liberals decisively routed on Monday.

Mr. Trudeau has promised some major policy changes, among them legalizing marijuana, dropping out of the American-led bombing campaign against the Islamic State and deficit spending to pump up the economy and rebuild infrastructure.

But the most noticeable difference will probably be in tone. Mr. Trudeau has been promising since he took over his floundering party in 2013 that he would put an end to Mr. Harper's often belligerent style of politics and diplomacy.

"Sunny ways" are Mr. Trudeau's ways, he said in his victory speech early on Tuesday, borrowing the phrase from Wilfrid Laurier, a Liberal prime minister of about a century ago.

"A positive, optimistic, hopeful vision of public life isn't a naive dream — it can be a powerful force for change," Mr. Trudeau said, his voice faltering after 78 days of campaigning. And he said the sweeping victory his party won on Monday as it surged from third place in opinion polls to a clear majority in Parliament meant that "Canadians from all across this great country sent a clear message tonight: It's time for change in this country, my friends, real change."

Mr. Trudeau has spoken of scrapping Mr. Harper's emphasis on military solutions and Cold War talk abroad, and returning Canada to active participation in international bodies like the United Nations. Gone, he has said, will be the combative, lecturing approach Mr. Harper adopted toward the Obama administration over the Keystone XL oil pipeline project.

And gone, too, will be the Conservative habit of pushing policies at home that were popular with Mr. Harper's right wing but divisive to the larger electorate, like the sweeping antiterrorism laws that were passed after a gunman attacked Parliament last October. Mr. Trudeau has promised to amend those laws.

The Liberals won only 39.5 percent of the popular vote on Monday. But with three major parties and several minor ones jockeying for support, it was enough for a sweeping victory in Parliament, as the Conservatives demonstrated in 2011 when they won about the same share.

On Tuesday, during his first news conference since the vote result, Mr. Trudeau said he had told President Obama by telephone that he would honor a campaign pledge to remove Canada's military jets from the American-led military campaign against the Islamic State group.

But Mr. Trudeau declined to say when the aircraft would leave. The two men also discussed Mr. Trudeau's plans for improving Canada's record on greenhouse gas emissions, he said. The president, Mr. Trudeau added, teased him about his lack of gray hair and suggested that his new position might soon change that.

An Obama administration official, insisting on anonymity because of the delicacy of communications between the leaders, said the White House still hoped to find a way for Canada to play a role in the mission.

Mr. Trudeau's showing was the Liberals' best in 40 years and re-established the party as a national force, rather than one that relied heavily on one province, Ontario, for support. They drew votes away not only from the Conservatives, but also from the New Democrats, the other major opposition party of the center-left. The New Democrats, who led in the polls early in the campaign, wound up losing more than half their seats in Parliament, as well as any hope that the Liberals would be dependent on their backing to govern.

The Liberals swept the Atlantic provinces and more than doubled their seat count in Quebec, where voters had spurned the party in recent elections. They even won two seats and came close to taking a third in Calgary, Alberta, Mr. Harper's adopted hometown and the center of Canadian conservatism. The last time the Liberals won a seat there was in 1968, when the country was swept up in enthusiasm for Mr. Trudeau's father, Pierre Elliott Trudeau.

Justin Trudeau shares his father's good looks but not his demeanor. He does not flash the scalpel-sharp intelligence his father was known for, but neither does he display the sometimes acerbic nature that went with it. As a result, he has often been underestimated.

Before Mr. Trudeau took over the party leadership, Mr. Harper and the Conservatives won three straight national elections against weak Liberal opponents who proved vulnerable to the Conservatives' heavy reliance on attack advertisements.

In 2006, Paul Martin, then the prime minister, was saddled with the legacy of a fund-raising scandal left by his predecessor, Jean Chrétien. Next up was Stéphane Dion, a highly respected intellectual from Quebec who came across as somewhat pedantic and failed to counter Conservative ads claiming that a Liberal plan for a carbon tax would be economically disastrous.

In 2011, the party was led by Michael Ignatieff, who had spent most of his adult life as an intellectual and a journalist in the United States and Britain before returning home. The Conservatives successfully painted him as an opportunist.

Mr. Harper's party relentlessly attacked Mr. Trudeau during this campaign as well, portraying him as something of a dimwit who had "nice hair" but was "just not ready" to lead the country. But this time, the strategy flopped.

Though Mr. Trudeau said repeatedly that he did not want to trade on his family's name, growing up in the public gaze did mean that when he entered politics in 2007, he was already a celebrity with a reservoir of public good will to tap. The Conservative attack ads did not just fail to shake that good will; some analysts say they backfired by creating sympathy for Mr. Trudeau.

After his party's defeat on Monday, Mr. Harper resigned as Conservative party leader, but not in the orthodox manner. He made no mention of his intention during his concession speech, leaving his party to announce the news in a brief statement.

Mr. Harper's legacy includes reuniting the Conservative movement under a single party banner by merging his Canadian Alliance with the Progressive Conservatives. Under Mr. Harper, the party also developed an effective fund-raising machine.

Canadian law bans corporations and unions from making political donations, and imposes fairly low limits on personal donations. So the Conservatives used sophisticated software to develop and promote political issues that would draw large numbers of small donations from supporters, even if they found little support in the rest of the population.

The targeted approach was successful financially, but it may also explain why the Conservatives never significantly widened their support during a decade in power. The kinds of issues it led Mr. Harper to promote, like banning the wearing of face coverings by Muslim women at citizenship ceremonies, drew angry reactions that may have contributed to the government's defeat in the election.

The front-runner to succeed Mr. Harper as Conservative leader is Jason Kenney, the departing defense minister and one of the few party figures who had some free rein in Mr. Harper's highly centralized administration. Mr. Kenney acknowledged late Monday that issues he championed for the government, including the face-veil ban and the antiterrorism measures, might have created the opening that Mr. Trudeau seized to win.

"We need a conservatism that is sunnier and more optimistic than what we have sometimes conveyed," Mr. Kenney said. "We have to take collective responsibility for that."

Peter Baker contributed reporting from Washington.

Nicer Justin Trudeau Wins Over Canadians: Column

By David A. Andelman

[USA Today](#), October 21, 2015

What might have been the final straw for Canadian voters was the shocking photograph of the body of a Syrian child washed up in September on a Turkish beach. His family's asylum request had been turned down by Prime Minister Stephen Harper's Conservative Party government. Without hope, the family took to the seas in a flimsy boat that foundered in the Mediterranean before reaching the promised land of Europe — or Canada.

Of course, there were many other reasons why Canadian voters ended Harper's nearly 10-year rule Monday, all cautionary tales for American voters just embarking on the process of choosing a new president next year. Part of it is a reflexive turn-the-bums out attitude, which Republicans in the U.S. are counting heavily on. But most of the reasons Canadians opted to install the little-tested Justin Trudeau, 43, boiled down to one fundamental: The Liberal Party leader was simply nicer than his opponent. And most Canadians believe they are, too.

Harper was too tough on terrorism, on migrants, even on Muslim women who want to wear the veil. He did little to prop up a sagging economy or shelter his oil-rich nation from the impact of sagging oil prices. He put the Keystone pipeline among his top priorities and was a firm supporter of a host of U.S. military initiatives. Few were overwhelmingly popular in a Canada that hardly considers itself in terrorists' crosshairs, and wants to keep it that way.

So begins a political dynasty north of the border — Justin Trudeau following in the footsteps of his father, the politically canonized Pierre Trudeau, who served as prime minister twice for a total of more than 15 years in the 1960s, '70s and '80s.

Young Trudeau's win reflects something extraordinary that is finding resonance far beyond Canada's borders. First, there's the shift to the left. Canada has been a political counterweight in the past to American trends — after all, Trudeau's right-wing predecessor served throughout most of President Obama's administration, with considerable friction.

POLICING THE USA: A look at race, justice, media

But what's especially interesting is that Canada has now definitely gone back to the future. A study by two American researchers found that the Canadian Charter of Rights and Freedoms, ratified during the reign of Trudeau's father in 1982, is the most emulated model of government chosen by newly minted democracies. In part, it's the document's respect for human rights, but it's also just how nice Canadians are. While the U.S. Constitution and Bill of Rights might have set the standard in the past, Americans are no longer seen as people to be emulated, nor is our system of government, which has become in many respects all but dysfunctional.

While we Americans might not think about Canada a lot, we could probably learn quite a lot from them. The previous Conservative regime began going off the rails some time ago. Now it's up to Canada's Liberal Party to set it straight again.

A New Trudeau Era In Canada

[New York Times](#), October 21, 2015

The sweeping victory of Justin Trudeau in Canada's elections yesterday shows how ready Canadians were to emerge from a decade under the Conservative government of the secretive and combative Stephen Harper. Mr. Trudeau clearly benefited from voters' memories of his father, Pierre Elliott Trudeau, who came to power 47 years ago on a platform of liberal reforms and a wave of personal popularity that came to be dubbed "Trudeaumania." To those memories, Justin Trudeau, 43, added his own charisma and the promise that as prime minister he will return Canadians to the tradition of liberal and humanitarian values that his father championed.

In his 10 years in office, Mr. Harper pursued a conservative agenda of lowering taxes, cutting government programs and taking a tough line on security, including the passage of broad antiterrorism laws. His government also banned women from wearing face coverings at citizenship ceremonies.

Mr. Trudeau, by contrast, has pledged, among other things, to legalize marijuana, revise the antiterrorism laws, stop the purchase of F-35 fighter jets from the United States and end Canada's combat role in the American-led fight against the Islamic State. While both men backed the Keystone XL oil pipeline, Mr. Trudeau is open to addressing environmental concerns. To many voters, that was the major appeal of Mr. Trudeau — that he would return the Liberal Party, and Canada, to the country's core values, like a generous safety net, active participation in international organizations like the United Nations, a humanitarian foreign policy and an inclusive concept of nationhood. Mr. Harper's conservatism was at odds with that identity.

For the Liberals, the election was a stunning reversal of years of sagging fortunes. In the Harper years, the party had lacked a dynamic leader and was eclipsed on the left by the New Democratic Party, which relegated the Liberals to No. 3 in Parliament after the 2011 elections. This time the Liberals soared from 34 seats to 184 in the 338-seat Parliament, while the Conservatives shed 60 seats and the New Democrats lost 59. The difference was Mr. Trudeau.

As Americans know well, legacy can be a boon and a bane. For Mr. Trudeau, his heritage was clearly a blessing, especially as almost half a century had elapsed between his father's election and his own. But in all those years, Canadians never fully lost their infatuation with the Trudeau era.

As for experience, the son is not the father. Pierre Elliott Trudeau, who died in 2000, was a star lawyer, intellectual and minister of justice before becoming prime minister. Justin Trudeau, is not the intellectual dynamo his father was, and before he entered politics in 2007, he had been a snowboard instructor, high school teacher and nightclub bouncer (he remains a keen amateur boxer).

But after the Liberals' drubbing in 2011, the party found in Mr. Trudeau a fresh leader capable of inspiring much of the same excitement and loyalty as his father, especially among youthful voters. In politics, that counts for a lot, but it also creates a lot of expectations.

Canada Withdrawing Fighter Jets From Iraq, Syria, Trudeau Tells Obama

[AFP](#), October 21, 2015

Ottawa (AFP) – Canada's prime minister-elect Justin Trudeau said Tuesday he told US President Barack Obama that Canadian fighter jets would withdraw from fighting the Islamic State group in Iraq and Syria.

But he gave no timeline.

"About an hour ago I spoke with President Obama," Trudeau told a press conference.

While Canada remains "a strong member of the coalition against ISIL," Trudeau said he made clear to the US leader "the commitments I have made around ending the combat mission."

Canada last year deployed CF-18 fighter jets to the region until March 2016, as well as about 70 special forces troops to train Kurds in northern Iraq.

During the campaign, Trudeau pledged to bring home the fighter jets and end its combat mission. But he vowed to keep military trainers in place.

His new Liberal government will be "moving forward with our campaign commitments in a responsible fashion," Trudeau said.

“We want to ensure that the transition is done in an orderly fashion.”

Meet Canada’s New Prime Minister, Justin Trudeau

By Deneen L. Brown

[Washington Post](#), October 21, 2015

Justin Trudeau, the dashing eldest son of political legend Pierre Trudeau, has ushered in Canada’s first political dynasty with a stunning come-from-behind victory. But the new prime minister’s win may owe as much to voters’ fatigue with the outgoing government as to the legacy of his father.

The younger Trudeau defeated Prime Minister Stephen Harper in Monday’s elections, ending a nine-year reign that had shifted Canada politically to the right.

The victory comes just weeks after Trudeau’s Liberal Party was running third in the polls, behind Harper’s Conservatives and Thomas Mulcair’s center-left New Democratic Party.

Both Mulcair and Harper had taunted the athletic Trudeau, 43, in campaign ads that referred to him as “Justin” and made fun of his “nice hair.” Critics said he was too young and inexperienced to become prime minister.

But Trudeau ran a tireless 78-day campaign based on change and optimism at a time when many frustrated voters wanted “anyone but Harper.” Trudeau, a former schoolteacher, ran on a centrist platform, to the left of the Conservatives but to the right of the NDP. He also benefited from many Canadians’ fond memories of his father, a public intellectual who was prime minister from 1968 to 1979 and from 1980 to 1984.

“The reason he got the job of leadership is the same reason Hillary [Clinton] and Jeb Bush can run — name recognition,” said Nelson Wiseman, director of the Canadian Studies Program at the University of Toronto. “He is personable. He is a family man. He has three kids. That is appealing. But he doesn’t have much gravitas. He is an intellectual lightweight compared with his father.”

Canadians wanted Harper out. He was accused of being stiff, autocratic and out of touch with Canadian values on environmental issues, race and immigration.

Harper, 56, who was seeking a fourth term, had made a controversial push to prohibit use of the niqab, a face veil worn by some Muslim women, at Canadian citizenship ceremonies. Many Canadians were also upset at Harper’s reluctance to accept refugees from Syria. The government said at the start of this year that it would accept 10,000 Syrian refugees over three years. But only a fraction of that number have been admitted.

Former prime minister Jean Chrétien wrote in a column published in the *Globe and Mail* and other Canadian newspapers that Harper’s stance on the refugee crisis created an international impression of Canada as a “cold-hearted” nation. “What has happened to the country that was a model for peace and stability in a tumultuous world?” Chrétien wrote that he is frequently asked.

Trudeau had called for the government to accept 25,000 refugees.

The Conservatives also were hurt by recent political scandals, including one involving a senator on trial over fraud suspicions.

“Two-thirds of Canadian voters said the Conservatives lost the moral authority to govern,” Wiseman said. “The election revolved around one issue: Do you want to keep the government of Harper or not.”

Harper had called in August for the election, thinking a longer campaign and a bigger Conservative Party budget would wear down the Liberals and the NDP. Very few predicted a Liberal victory. But days before the election, polls showed a Liberal surge. The party wound up capturing 184 seats, enough to form a majority government.

Trudeau becomes Canada’s second-youngest prime minister. The youngest was Joe Clark, of the Progressive Party, who took office in 1979, a day before his 40th birthday.

During his victory speech, delivered in French and English, Trudeau told a cheering crowd in Montreal: “Lots of people will have lots of opinions about why we were successful.”

Against the backdrop of a Canadian flag, Trudeau said his campaign had simply used an old-fashioned political strategy.

“We met with and talked with as many Canadians as we could,” he said. “We won this election because we listened. We met with hundreds of people in the dead of winter in the Arctic and people in the middle of Brampton. You built this platform; you built this movement. . . .

“You told us it is getting harder and harder to make ends meet and to get ahead. You told us you were concerned about your retirement. . . . I am not the one who made history tonight. You are.”

Not once during the nearly 30-minute speech did he mention his father by name. Under Pierre Trudeau, Canada officially became a bilingual country. The elder Trudeau had pushed for multiculturalism, a constitutional bill of rights known as the

Charter of Rights and Freedoms, and the end of provisions that gave the British Parliament a say in Canada's laws and constitution.

Justin Trudeau's only reference to having grown up as the son of the legendary prime minister came when he thanked his own three little children, who he said were fast asleep by the time of the victory speech, after midnight Monday.

"There will be difficult moments as children of a prime minister," he said, "but Dad will be there for you."

Justin Trudeau, born in Ottawa on Dec. 25, 1971, grew up in the public eye, traveling the world with his father. He was the eldest of three sons born to Pierre Trudeau and the former Margaret Sinclair, who was three decades younger than her husband.

When Justin was 6, his parents divorced. Pierre Trudeau became a single father.

The elder Trudeau had charisma as prime minister, bringing what many voters believed to be glamour and excitement to Canadian politics. He dated celebrities, including Barbra Streisand; was photographed sliding down banisters; and pirouetted when Queen Elizabeth II's back was turned.

"Pierre Trudeau was a bit of an iconoclast, which endeared him to many people, but also got him into a lot of trouble," said Elise Chenier, a history professor at Simon Fraser University in British Columbia.

Justin Trudeau's critics said he could never compare to his father.

"Almost everybody looks like an intellectual lightweight compared to Pierre Trudeau," Chenier said.

Justin Trudeau graduated with a bachelor of arts in literature from McGill University in 1994, and later earned a degree in education at the University of British Columbia. He taught school from 1999 to 2002, giving classes in drama, French, English and social studies. He also worked as a nightclub bouncer and a snowboarding instructor.

Some say he was not interested in politics in his younger years.

But in 1998, his brother Michel died in an avalanche. And in 2000, his father died from prostate cancer.

Justin Trudeau's televised eulogy at his father's funeral propelled him before the public, and some Canadians began quietly speculating that perhaps one day he, too, would be a political leader.

During the eulogy, the younger Trudeau recalled a visit to his father's office in Parliament. Justin was 8. He and Trudeau went to the cafeteria where Justin recognized one of his father's political rivals. The boy made a joke about the man.

"My father looked at me sternly . . . and said, 'You never attack the person. You may be in total disagreement with the person, however, you shouldn't denigrate him.' He took me by the hand and led me to meet this man," Justin Trudeau recalled. "He was a very nice man. . . . It was at that moment I understood that having different opinions from those of another person should in no way stop you from holding them in the greatest respect possible as people."

Justin Trudeau told the crowd that his father taught his three sons to believe in themselves, to stand up for themselves and to have passion for life.

"We knew we were the luckiest kids in the world. And we had done nothing to actually deserve it. It was instead something we would have to spend the rest of our lives to work hard to live up to."

In 2008, Justin Trudeau defeated a Bloc Quebecois incumbent to win in the "riding," or electoral district, of Papineau, one of the poorest in Canada. In April 2013, he was elected leader of Canada's Liberal Party.

Days later, Harper released an attack ad saying that Trudeau was "way over his head."

On Monday night, Trudeau told the crowd that the Liberals had overcome those attacks by offering a positive vision.

"Most of all we defeated the idea that Canadians should be satisfied with less, that good enough is good enough, and that better just isn't possible. Well, my friends, this is Canada, and in Canada better is always possible."

Today's coverage from Post correspondents around the world

Canada's New Governing Party Promises To Legalize, Regulate Marijuana Sales

By Trevor Hughes

[USA Today](#), October 21, 2015

DENVER — Canada's leap to the left in Monday's elections could have the country singing a new anthem: "Oh, Cannabis."

The United States' largest trade partner overwhelmingly selected Justin Trudeau's Liberal Party to run Canada, a sweeping change that may lead to full marijuana legalization for our northern neighbor, which already allows medical pot use.

Trudeau promised that under his leadership Canada would create a system to tax, regulate and sell marijuana, along with stiff penalties for anyone giving pot to children or caught driving while stoned. The Liberal Party's cannabis legalization statement echoes the language used by many U.S. legalization advocates.

"Canada's current system of marijuana prohibition does not work. It does not prevent young people from using marijuana and too many Canadians end up with criminal records for possessing small amounts of the drug," the party's position statement says. "To ensure that we keep marijuana out of the hands of children, and the profits out of the hands of criminals, we will legalize, regulate, and restrict access to marijuana."

U.S.-based cannabis activists hailed Trudeau's election as a milestone, suggesting that a day may soon come when cross-border trade talks include not just the Keystone XL pipeline, maple syrup or prescription drugs, but also legal weed. Border states Alaska and Washington have already legalized recreational marijuana use, as have Colorado, Oregon and the District of Columbia.

"It's no longer a pipe dream to imagine a day when consumers and growers in Washington state and British Columbia, for example, could be ordering each other's wares on the Internet for cross-border shipment," said Tom Angell, chairman of the pro-legalization Marijuana Majority.

Trudeau earlier this month said he'd begin work to legalize marijuana in Canada "right away" if elected, but declined to specify a timeline for implementation. His campaign told CBC News that it was looking to Colorado as a potential model.

Colorado permits residents to buy and possess up to an ounce of marijuana at a time, and taxes each sale. Last month the state collected nearly \$12 million in marijuana taxes, with the money used to fund school construction and anti-abuse campaigns.

In 2003 and 2004, Canada's Liberal Party offered a proposal to decriminalize possession of small amounts of marijuana, but the plan died and a Conservative government took power in 2006. At the time, U.S. officials invoked the specter of prolonged border crossings if Canada changed its laws to permit broader marijuana use.

Since 2001, Canada has permitted medical marijuana use, as do 23 U.S. states and the District of Columbia.

Canada's potential move toward recreational legalization could add to a growing international discussion about drug possession and penalties, which has become a major cause for billionaire entrepreneur Richard Branson, who on Monday renewed his push for the United Nations to back decriminalization of drug use.

"Together with countless other tireless advocates, I've for years argued that we should treat drug use as a health issue, not as a crime," Branson wrote on his blog, responding to a draft U.N. proposal. "While the vast majority of recreational drug users never experience any problems, people who struggle with drug addiction deserve access to treatment, not a prison cell."

Liberal Win Gives Boost To Canada Marijuana Industry

[AFP](#), October 21, 2015

Ottawa (AFP) – Justin Trudeau's election win gave Canadian pot stocks a boost Tuesday with his promise to legalize recreational cannabis expected to help the nation's nascent medical marijuana industry.

Share prices for cannabis producers jumped an average of five to 10 percent in relatively high volume trading early in the day.

The companies already produce marijuana for medical use in Canada, and investors are betting they could quickly scale up to serve recreational pot users too, once Trudeau makes good on his promise.

Canopy Growth rose 11 percent to Can\$2.43, while Aphria Inc. rose 5.3 per cent to Can\$1 and Mettrum Health Corp. gained 6.0 percent to Can\$1.95.

"Trudeau's vow to legalize and regulate marijuana... has set in motion the single most important catalyst for the marijuana space," Dundee Capital Markets analyst Aaron Salz said in a Tuesday note to clients.

At least one company is also looking beyond Canada's borders hoping that G20 nations will adopt Canada's regulatory framework for pot, creating new markets for their wares.

Bruce Linton, who co-founded the firm Tweed, said he was betting on "significant growth" in the sector, as legitimate firms move into a space now dominated by black market growers and sellers, and offer buyers a large variety of pesticide-free strains.

Linton's company opened in a former chocolate factory an hour's drive from Ottawa last year under a new government scheme that banned home cultivation in favor of large commercial greenhouses.

It merged with Canopy and Bedrocan in the spring to form the largest commercial pot grower in Canada. The parent company changed its name to Canopy in September.

Tweed was one of only six firms initially licensed by Health Canada to grow and sell fresh medical marijuana and cannabis oil to eligible persons. The number of licenses issued has since grown to 26.

An estimated one million out of Canada's 35 million people regularly smoke marijuana, according to 2014 surveys.

Trudeau has admitted he smoked the drug at a dinner party with friends after being elected to parliament in 2008.

He said his late brother Michel was facing marijuana possession charges for a "tiny amount" of pot before his death in an avalanche in 1998. This influenced his decision to call for legalizing and regulating cannabis, Trudeau has said.

Justin Trudeau, Son Of A Canadian Leader, Follows His Own Path To Power

By Ian Austen

[New York Times](#), October 21, 2015

OTTAWA — When Justin Trudeau moves into the prime minister's official residence, it will be a homecoming. His parents lived there, in the gray stone house at 24 Sussex Drive in Ottawa, when he was born on Christmas Day in 1971.

In a country where political dynasties are rare, Mr. Trudeau will be the first Canadian to follow a parent into the country's highest political office, thanks to his Liberal Party's surprisingly sweeping victory in the election on Monday, ending nine years of Conservative government.

And there are many easy parallels to draw between him and his father, Pierre Elliott Trudeau, who led the country for 15 years beginning in 1968.

Start with the superficial: good looks, rugged athleticism, glamorous wife, rapturous fans. More substantially: unusual outspokenness, reputations as agents of change, a sharp upward trajectory in the Liberals' fortunes on each man's watch.

Without doubt, the good luck to be born with Pierre's surname was a big help.

But Justin Trudeau is no dynast who slipped effortlessly into a family political machine. He did not even enter politics until 18 years after his father gave it up, and seven years after his father's death. He built his own cadre of advisers, mostly from his own generation. And at key points in his career, he chose more difficult roads — partly, it appears, to show he had not been handed a life in politics on a platter.

"I do this not out of a sense of historical ambition or drive: 'My father did it, so I have to,' " Mr. Trudeau said during a lengthy interview in 2013, shortly before he became the Liberal Party leader. "No, I do this because I think I have something to offer. If it turns out that I don't, that's just fine, too. But I'm fairly confident that I have something to offer that this country needs more of right now, which is an antidote to the kind of cynicism which is dominating too much of politics around the world."

The novelty of a sitting prime minister with young children made Justin Trudeau and his two brothers celebrities from birth, but Pierre Trudeau and his wife, Margaret, who came from a prominent political family herself, tried to give the boys some semblances of normalcy. The children rode the regular bus to public school (albeit with an unmarked car full of bodyguards right behind), and they mixed in class with children from a poor area of Ottawa as well as their own affluent neighbors.

When he was 7 or 8, Mr. Trudeau recalled, he overheard his parents giving away the secret of Santa Claus, and the next morning, he told a group of his friends in the schoolyard.

"Most of the kids ran off crying," he said. "But one turned to me and said: 'I know. I've always known. My mom told me when I was old enough to understand, because she couldn't afford presents for me.' "

Mr. Trudeau said he had immediately thought of the "mountain of presents under the tree at 24 Sussex," many of them sent by ambassadors to Canada. "That was one of those moments when I realized, 'Man, I'm very, very lucky, and it has nothing to do with the quality of the person I am or what kind of material stuff we have,' " he said. "Because this kid, Mark, was one of my best friends."

The media spotlight that fell on his childhood also obsessively documented the breakdown of his parents' marriage, a product of Margaret Trudeau's struggles with mental illness. When his father quit public life, the family moved to Montreal, and the retired prime minister led the life of a single parent, though an affluent one.

Both father and son came to elective politics relatively late in life, but Pierre Trudeau had already been active on the public stage at several important moments in Quebec's history. Notably, he supported a 1949 strike by asbestos miners, a turning point in the "quiet revolution" against the province's entrenched elite of Catholic clerics and Anglophone businessmen.

Justin Trudeau studied French and English literature at McGill University in Montreal, but after that, as he acknowledged, his path was a slightly aimless one. He went with friends on a backpacking trip around the world. He thought about law school, then returned to McGill to study education, only to drop out and move to British Columbia, his mother's home province, where he taught snowboarding and worked as a nightclub bouncer — an unlikely job, perhaps, for someone with his slender build.

"I was the one they'd send in to defuse a situation and escort someone out, because I was diplomatic," Mr. Trudeau said. "I've never felt physically threatened by anyone. I don't have a fear gene, I guess — I don't know."

He returned to education and taught in both a public high school and a private prep school in Vancouver, an experience that he said confirmed his belief in the public system.

At the prep school, "there were parents who spent a lot of time intimidating the teachers, because they make so much more money than them, and the kids were catching on to that and not respecting the teachers," he said. "There's something, I think, unhealthy about that level of privilege."

Two tragedies returned him to the public gaze. His brother Michel was killed in an avalanche in 1998, prompting a public outpouring of sympathy for the family. Then, when his devastated father died two years later, Mr. Trudeau delivered a eulogy that was broadcast live.

Rather than a safe Liberal seat, Mr. Trudeau ran in 2007 for one in downtown Montreal that was known for favoring Quebec-separatist candidates. He won, and has widened his margin of victory in each election since then.

Mr. Trudeau showed a penchant for unscripted remarks that could be refreshing or embarrassing. When Prime Minister Stephen Harper announced that Canadian fighter jets would join the American-led campaign against the Islamic State militant group, Mr. Trudeau responded with a vulgar metaphor that many called juvenile. And he raised eyebrows in 2013 when he said, "There's a level of admiration I actually have for China: Their basic dictatorship is actually allowing them to turn their economy around on a dime."

Opponents have pounced on his miscues and tried to paint him as naïve and ill-prepared. But Bob Rae, the interim leader of the Liberals whom Mr. Trudeau succeeded, said the occasional verbal blunders did not reflect Mr. Trudeau's true nature. He "doesn't necessarily come to his conclusions immediately or grammatically," Mr. Rae said, but he is "a thoughtful, intelligent guy."

Mr. Rae said many people mistook Mr. Trudeau's consensual approach to politics for weakness or indiscipline. "You don't become the leader of a major party by just being a nice guy," he said.

Mr. Trudeau will become of a prime minister of many firsts, some of them trivial: the first who regularly boxes (at least one a week), the first to have acted in a television mini-series (playing a war hero in a World War I drama) and, as far as anyone knows, the first with tattoos (a globe from his 20s; a raven in a Haida Indian pattern added when he turned 40).

The circle of aides around him began as his friends. He met Gerald Butts, now his principal adviser, when they both studied at McGill. He grew up with Dominic LeBlanc, the son of one of Pierre Trudeau's cabinet ministers and now his closest ally in Parliament. Anna Gainey, the party president, is another old friend.

For all that his family connections have done for his political career, though, Mr. Trudeau said it had worked the other way, too.

"There have been people out there who love me because of my father; there are people out there who hate me because of my father," he said. "I've had to learn to not entirely disregard that, but understand that either side of those is not based in a reality that I can use as an anchor for who or what I am."

Why The Obamas Should Have A State Dinner For Canadian Prime Minister Justin Trudeau

By Emily Heil

[Washington Post](#), October 21, 2015

Is it too soon to start a campaign to urge the White House to host newly elected Canadian prime minister Justin Trudeau and his wife, Sophie Grégoire-Trudeau?

Not that we would, of course, but it seems that we neighbors to the south would like to get an up-close-and-personal look at Canada's young first couple. Make that reeal close. (Sample headline since Trudeau's election last night: Canada's hot new prime minister has the Internet sweating maple syrup.)

The Trudeaus have a lot in common with the Obamas, so it's not like the evening would be one of those stuffy, grit-your-teeth-till-it's-over affairs for POTUS and FLOTUS: At 54 and 51, they're not that much older than their Canadian counterparts: He's 43; she's 40. And they'd have lots to talk about, apart from liberal politics, like fitness! (Trudeau is an amateur boxer, and his wife is a yoga instructor, in addition to being a former TV journo).

The White House hasn't held a dinner for our friends just across the border since 1997. Compare that to France, which has had three since 1996, or the UK, which has had four since then. And previous presidents hosted Trudeau's dad, Pierre, who was his country's long-serving PM. President Jimmy Carter hosted him in 1977 and President Gerald Ford in 1974.

Picture it: Toronto-born Drake is the evening's entertainment. White House chef Cristeta Comerford whips up an artisanal version of poutine. There are subtle maple leaves in the centerpieces, and Ontario native Justin Bieber is chatting up SecState John Kerry about bilateral relations.

What's not to like, eh?

Cozying Up To Obama, Biden Says He Backed Bin Laden Raid :: WRAL.com

By Josh Lederman

[Associated Press](#), October 21, 2015

WASHINGTON — Still silent about his presidential ambitions, Vice President Joe Biden cast himself as President Barack Obama's kindred spirit Tuesday and backtracked on his previous claims to have advised Obama against the raid that killed Osama bin Laden.

Without mentioning Hillary Rodham Clinton by name, Biden sought to portray his own leadership as more critical to the Obama administration's successes than that of the Democratic front-runner and former secretary of state. At a forum honoring former Vice President Walter Mondale, Biden offered clear hints at how, if he runs for president, he would contest Clinton's claim to the president's legacy and appeal to Democratic voters whose loyalty to Obama remains firm.

"President Obama and I have ideologically had no disagreement," Biden said. "I mean none. Zero."

In an unusual reversal, Biden revised his claim to have warned Obama against the bin Laden raid in 2011 — a notion Obama himself corroborated in a 2012 presidential debate. As Obama campaigned for re-election, that factoid had the effect of making Obama appear more bullish and prescient than his advisers, but could be used as an argument against Biden's foreign policy bona fides if he challenges Clinton for the nomination.

Clinton has said she supported the raid from the start, using it as an example on the campaign trail to bolster her credibility as a valued and hardened adviser to Obama on matters of national security. But Biden implicitly contradicted Clinton's account, insisting that only the defense secretary and CIA chief were fully in favor of the raid.

According to Biden's account, Obama asked his advisers in the Situation Room whether to proceed with the risky raid on a compound in Abbottabad, Pakistan. Biden said he suggested holding off while the military flew another drone over the compound to gain certainty about bin Laden's whereabouts, but stopped short of saying "go" or "don't go" in front of other advisers to avoid undercutting Obama's ultimate decision.

Instead, Biden said, he waited until he and Obama had left the room and offered his opinion in private: "I told him my opinion. I thought he should go, but follow his own instincts," Biden said.

Adding another wrinkle to the historical account, Biden said he knew about the Abbottabad compound where bin Laden was hiding in August 2010 — long before the "major players" in Obama's Cabinet learned about it in January or February.

The vice president's new take on a years-old event put the White House in a difficult spot, the latest example of how a Biden candidacy would imbue the rest of Obama's presidency with heavy political overtones. White House spokesman Josh Earnest declined to say whether Biden's recollection was accurate.

"I'm going to leave the dissection and the oral history, if you will, of those days to those who were actually there," Earnest said.

The Democratic political world has been on edge for weeks awaiting a decision from Biden, who has blown past his own deadlines for deciding even as advisers insist he understands the importance of getting in or out soon. Rampant speculation took a chaotic turn Monday with a flood of assertions that Biden was running or would announce a run imminently.

With his 2016 deliberations extending deep into overtime, Biden offered no explicit clues about his decision. Yet he took a number of veiled shots at Clinton, who said in last week's Democratic debate that the enemy she was most proud to have made was "probably the Republicans."

"I don't think my chief enemy is the Republican Party," Biden said, adding that he still has many friends in the GOP.

In another observation that seemed directed at Clinton, Biden said he was the one Obama would dispatch to speak to key world leaders like Russian President Vladimir Putin or Turkish President Recep Tayyip Erdogan.

"We've had two great secretaries of state, but when I go, they know that I am speaking for the president," Biden said.

Joe Biden Draws Distinctions Between Himself And Hillary Clinton

By Margaret Talev

[Bloomberg Politics](#), October 20, 2015

If Vice President Joe Biden decides to challenge Hillary Clinton for the Democratic presidential nomination, the contours of his stump speech are in place.

At an event honoring former Vice President Walter Mondale on Tuesday, Biden portrayed himself as the central player in President Barack Obama's administration on everything from working with congressional Republicans to the killing of Osama bin Laden.

Biden sought to recast perceptions of his advice to Obama regarding the 2011 raid that killed bin Laden and suggested he was more intimately involved in decision-making than any other Cabinet official, including former secretary of state Clinton.

"I don't think my chief enemy is the Republican Party."

Vice President Joe Biden

His account on Tuesday differed somewhat from his previous public recollections of the deliberations. In an account given to Democratic lawmakers in 2012 Biden said that only then-CIA Director Leon Panetta was in favor of going forward with the raid. Biden told the lawmakers that he told Obama to seek more verification. "My suggestion is, don't go," he said at the time. "We have to do two more things to see if he's there."

On Tuesday, Biden said he made a case for a third option that was neither for nor against going forward and was meant to give Obama space to decide. He said he didn't want to undermine the president by staking out a position that might contradict Obama's final position. Biden said he suggested using a drone to make another attempt to verify the target. "I think we should make one more pass" to see if it really is bin Laden, Biden said on Tuesday that he told Obama.

"I didn't want to take a position to 'go' if that was not where he was going to go," he said. Biden said that minutes later when he and Obama were alone he told Obama that he would say to "go" but that ultimately Obama should "follow his own instincts."

"I never, on a difficult issue, never say what I think finally until I go up in the Oval with him alone," Biden said.

In describing his own stance, Biden also indirectly questioned Clinton's suggestion in a 2014 memoir that she had always favored the raid while Biden needed convincing. Biden said Tuesday that only two top Obama advisers took firm positions, with Panetta in favor of the raid and then-Defense Secretary Robert Gates advising against it.

White House press secretary Josh Earnest said he wasn't in the room when the decision was made and that he wouldn't comment on private conversations between Obama and Biden.

William Daley, who was White House chief of staff at the time and was at Tuesday's event, told the New York Times that Biden's account of the Situation Room discussion was correct.

For the second time this week, Biden also sought to portray himself as a pragmatist who's capable of working with Republicans, drawing a subtle contrast with party front-runner Clinton.

"I don't think my chief enemy is the Republican Party," Biden said during the moderated discussion, in which he and Mondale shared their experiences as vice president. By contrast, Clinton named "the Republicans" as one of her greatest enemies when asked at the Oct. 13 Democratic candidate debate.

Like Mondale, Biden spent years before becoming vice president as a member of the Senate, where the rules make it nearly impossible to move legislation without compromise. He has served as Obama's chief emissary to Congress, particularly in negotiations with the Republican leadership there.

During the moderated discussion with Mondale, Biden also said that "we've had two great secretaries of state," under President Obama, Clinton and John Kerry, but that when the vice president speaks with a foreign leader, they know that "I am speaking for the president."

Biden is expected to signal whether he intends to make a third try for the Democratic nomination by the end of the week, according to people close to him. He has stepped-up contacts with union officials and other prospective backers in recent days.

Clinton, Vermont Senator Bernie Sanders, and the other Democratic candidates are scheduled to speak at Saturday's Jefferson-Jackson dinner for the Iowa Democratic Party, which attracts thousands of Democratic activists in the first-caucus state. Biden's staff has neither signaled nor ruled out an appearance at the dinner in Des Moines.

Biden Revises Account Of His Advice On Bin Laden Raid

By Paul Singer

[USA Today](#), October 21, 2015

Vice President Biden has revised his account of his advice to President Obama on the raid that led to the death of Osama bin Laden in 2011.

While Biden reiterated that he suggested in front of Cabinet officials that Obama wait, on Tuesday Biden added another element to the story: Privately, he told Obama to move forward.

"As we walked out of the room and walked upstairs, I told him my opinion, that I thought he should go but follow his own instincts," Biden said during remarks at the "Walter Mondale: Living Legacy" forum.

The comment followed an account by Mondale of how he would only disagree with President Jimmy Carter in private during his tenure as vice president. Biden agreed and said that advice from Mondale came in "extremely handy" during the decision process leading to the May 2011 raid by U.S. Navy SEALs on bin Laden's compound.

Biden said he was part of a small group that knew as early as August 2010 that bin Laden may be hiding out in Abbottabad, Pakistan. When Obama asked Cabinet officials for their advice, only two were definitive. Then-CIA Director Leon Panetta said to go ahead with the raid, while then-Defense Secretary Bob Gates advised against it, Biden said.

"Others were 59-41," he said. "Some ended up saying 'go,' but it was such a close call."

Biden repeated his previous statement that he advised during that meeting against immediate action and added that he said, "I think we should make one more pass" with a drone to ensure bin Laden was there.

But this time, Biden said he actually didn't want to take a public position that ran afoul of the president's wishes.

"It would have been a mistake," Biden said. "Imagine if I had said in front of everyone, 'don't go, or go' and his decision was a different decision. It undercuts that relationship. I never on a difficult issue, never say what I think, finally, until I go up in the Oval with him alone."

White House press secretary Josh Earnest said he was not in the Situation Room at the time and couldn't shed any additional light on what advice Biden gave.

"There have already been books that have been written about this. I'm confident there will be more," Earnest said. "I will leave the dissection and the oral history of those days to those who were actually there."

After the forum, former White House chief of staff Bill Daley backed up Biden's account, telling reporters in the audience, "I was in the room and I saw him walk out with the president," according to a tweet from Paul Kane of The Washington Post.

"His explanation of that is absolutely on point," Daley said, according to another tweet from Kane.

In January 2012, Biden told Democratic members of Congress during a retreat that his advice was "don't go" and "We have to do two more things to see if he's there." He then ended the story there, citing the situation as an example of Obama's strength as a leader.

Later, Biden referenced his private conversation with Obama during a May 2012 interview on Meet the Press, saying "I knew he was going to go."

"He looked at me again, and I said 'Follow your instincts, Mr. President,'" Biden said.

Biden's account of the Cabinet meeting, in which Panetta was the only official to definitively green-light the raid, may conflict with the account by Democratic presidential candidate Hillary Clinton, who was then serving as secretary of State.

In her book *Hard Choices*, Clinton wrote that she respected Biden's and Gates' concerns about the risks of a raid. She said she laid out the risks for Obama, but she concluded the raid was worth it.

"I thought we should go for it," she wrote.

Biden, who is considering a presidential run, made other statements during the Tuesday forum that could be perceived as digs at Clinton, including his reference to his relationship with Republicans. During the first Democratic debate on Oct. 13, Clinton listed Republicans among the enemies she's most proud of making.

"Whenever there's a problem, I get sent to the Hill, which, by the way, is a useful use of my time because I really respect the members up there, and I still have a lot of Republican friends," said Biden, who represented Delaware in the Senate for 36 years before becoming vice president.

"I don't think my chief enemy is the Republican party," he said. "This is a matter of making things work."

Biden also said the administration has had two "great" secretaries of state.

"But when I go, they know I am speaking for the president," he said.

Biden Says He Didn't Oppose Raid That Killed Bin Laden

By Gardiner Harris And Jonathan Martin

[New York Times](#), October 21, 2015

WASHINGTON — If Vice President Joseph R. Biden Jr. decides to run for the presidency again, his best chance may well be to present himself as President Obama's third-term successor. On Tuesday, Mr. Biden took the first step, describing himself as Mr. Obama's most essential partner while taking subtle swipes at his would-be rival for the Democratic nomination, Hillary Rodham Clinton.

Along the way, Mr. Biden sought to recast his role in the raid to kill Osama bin Laden, arguably the most picked-over moment of Mr. Obama's presidency and one that might hurt Mr. Biden's presidential chances.

Mr. Biden had previously said that he had advised the president against launching the special forces raid on the Abbottabad compound where Bin Laden was suspected of hiding. At a Democratic congressional retreat in January 2012, Mr. Biden said that almost every other official in the Situation Room had hedged on a response when asked by the president whether he should order the raid.

"I said, 'We owe the man a direct answer. Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there,'" Mr. Biden said then.

It was a potential weakness that Mrs. Clinton has signaled she might exploit. At a debate last week in Las Vegas, Mrs. Clinton boasted she was one of the few advisers to support "the tough decision that President Obama had to make about Osama bin Laden."

But by January 2013, Mr. Biden had begun hedging on whether he had opposed the raid.

"I remember walking up to his office and saying: 'Look, follow your instincts. Follow your instincts,'" he said in a January 2013 interview.

When asked specifically whether he had advised against the raid, Mr. Biden said: "Let me put it this way: My advice was, follow your instincts, knowing what his instinct was."

On Tuesday, Mr. Biden's evolution continued. Before an audience at George Washington University, Mr. Biden said he never gave Mr. Obama definitive advice on controversial issues in front of other officials, mindful that he did not want the rest of the team to see a difference between his opinion and that of the president. With others around them, Mr. Biden said he suggested one more pass over the Abbottabad compound with an unmanned aerial vehicle, or drone.

After the meeting in the Situation Room, though, Mr. Biden said he privately gave the president his real view. "As we walked out of the room and went upstairs, I told him my opinion, that I said that I thought he should go but to follow his own instincts," Mr. Biden said Tuesday.

William M. Daley, who was Mr. Obama's chief of staff at the time and was present in the Situation Room when the Abbottabad raid was discussed, said shortly after Tuesday's forum that the meeting occurred as Mr. Biden described it.

The description of the meeting about the Abbottabad raid was one of several moments when Mr. Biden seemed to take swipes, at least indirectly, at Mrs. Clinton. He did not mention Mrs. Clinton as among those who had definitively supported the Abbottabad raid, although she and Mr. Daley said she had been. In a wide-ranging conversation with former Vice President Walter F. Mondale about his vice presidency, Mr. Biden mentioned that he had flown more than one million miles to speak to world leaders.

"We've had two great secretaries of state," he said, "but when I go, they know that I am speaking for the president. There is nothing missed between the lip and the cup. Whatever I say, the president is saying."

At another point in the discussion, Mr. Biden mentioned that he was the administration's primary interlocutor with Capitol Hill.

"And I still have a lot of Republican friends," Mr. Biden said, adding for the second time in two days, "I don't think my chief enemy there is the Republican Party. This is a matter of making things work." Later, at another event honoring the 87-year-old Mr. Mondale on Tuesday night, Mr. Biden went even further, calling it "naïve" to think that the country can be governed without bipartisan cooperation.

In last week's Democratic debate, Mrs. Clinton was asked which enemies she is most proud of making.

"Well, in addition to the N.R.A., the health insurance companies, the drug companies, the Iranians," she responded to laughter, "probably the Republicans."

Mr. Biden's subtle digs could presage the kind of negative primary campaign that has so far largely been confined to the Republican side. Even if he does not enter the race, the vice president's comments suggested that he is unhappy with Mrs. Clinton and unlikely to get behind his former Senate and administration colleague any time soon. Either possibility — testy rival or sideline critic — is not pretty for Democrats and particularly Obama loyalists.

Political analysts have pointed out that Mr. Biden's best and perhaps only chance to secure his party's nomination would be to persuade center-left Democrats, particularly blacks and Hispanics, that he and not Mrs. Clinton is Mr. Obama's true heir. Mr. Obama remains wildly popular among those groups. A Washington Post/ABC News poll this week put the president's approval rating at 78 percent among nonwhite voters.

Mr. Biden was not the only one seeming to eye Mr. Obama's voters on Tuesday. A few hours before the event here, Mrs. Clinton's campaign released a list of more than 50 black mayors supporting her campaign, more than half of them from South Carolina, an early nominating state where Mr. Biden is expected to compete aggressively should he run.

So far, Mr. Obama has done nothing to signal that he would bestow such a blessing on either his vice president or his former secretary of state. But Mr. Biden did his best to suggest that he and the president are all but joined at the hip.

He said the two of them spent four to seven hours every day together, that the president had given him veto authority over every cabinet pick, that he never disagreed with the president ideologically, only tactically, and that even their families were close.

Josh Earnest, the White House press secretary, said that while four to seven hours together "is not a daily occurrence" the claim was "generally accurate."

Biden's Evolving Position On The Osama Bin Laden Raid

By Greg Jaffe

[Washington Post](#), October 21, 2015

Vice President Biden seemed to change his account on Tuesday of the role he played in the White House debate surrounding the 2011 raid that killed Osama bin Laden. This time he recalled telling President Obama that he strongly supported sending in a team of Navy SEALs into Pakistan to kill or capture the al-Qaeda leader.

"As we walked out of the room, walked upstairs, I told him my opinion: I thought he should go, but follow his own instincts," Biden said Tuesday at a George Washington University forum.

With Biden mulling a run for the presidency, his latest account seems designed to buttress his qualifications to serve as commander-in-chief. But the vice president, who has a reputation as a voice of caution when it comes to committing American forces, seems to have contradicted his earlier memories of the final meeting before the bin Laden raid.

Biden's revised account puts him in the same camp as Hillary Rodham Clinton, Obama's former secretary of state and Biden's chief rival if he runs, who has long said that she supported sending in special operations forces to raid bin Laden's Abbottabad compound in Pakistan.

White House press secretary Josh Earnest declined to answer questions about whether Biden had changed his story. "I'm going to leave the dissection and the oral history, if you will, of those days to those who were actually there," Earnest said.

Former White House chief of staff Bill Daley backed up a key element of Biden's account. "I think the way he articulated it was absolutely the truth. I was in the room and I saw him walk out with the president," said Daley, who wasn't part of their private, post-meeting conversation.

In 2012 remarks at a Democratic congressional retreat, Biden suggested that he had been against launching the raid until there was better intelligence about bin Laden's whereabouts. "Every single person in that room hedged their bet except Leon Panetta," Biden said, according to 2012 ABC News report. "He got to me. He said, 'Joe, what do you think?' And I said, 'You know, I didn't know we had so many economists around the table.' I said, 'We owe the man a direct answer. Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there.'"

Biden gave a slightly fuzzier accounting to NBC News's "Meet the Press" a few months later. The vice president recalled Obama taking a "roll call" of his top national security advisers: "The only guy who had a full-throated 'go, Mr. President,' was Leon Panetta," Biden told NBC. He said held back his advice until he and the president were alone and then counseled: "Follow your instincts, Mr. President. Your instincts have been close to unerring; follow your instincts."

Biden's memory is directly at odds with at least one other account of the lead up to the historic raid. Then-Defense Secretary Robert M. Gates recalled the same meeting in his book, "Duty," and described Biden as being staunchly opposed to launching the commandos. "Biden was against the operation," Gates writes. "[Gen. James] Cartwright and I supported the drone option. Panetta was in favor of the raid. Everyone else acknowledged it was a close call but also supported the raid."

A few pages prior, Gates said that he and Biden were the "two primary skeptics" of the raid.

In the past Obama has suggested that Biden opposed the raid. During his third presidential debate, Obama referred to Romney's previously voiced skepticism about the raid. "Those decisions generally—generally are not poll-tested," Obama said. "And even some in my own party, including my current vice president, had the same critique as you did."

Joe Biden Draws Contrasts With Hillary Clinton, Touts His Experience

Vice president details central role he has played in the Obama administration

Joe Biden Offers A New Account Of His Role In The Bin Laden Raid

By Michael A. Memoli, Contact Reporter

[Los Angeles Times](#), October 21, 2015

Joe Biden used a Washington forum on the vice presidency Tuesday to highlight his close relationship with President Obama that would be at the heart of Biden's potential presidential campaign, even offering a fresh account of his counsel to Obama about targeting Osama bin Laden.

Through that anecdote and other remarks, Biden drew an implicit contrast with would-be rivals, primarily Hillary Rodham Clinton, in underscoring his singular closeness to Obama. But Biden's comments, while easily interpreted as politically infused given the ongoing speculation over whether he'll run, were in keeping with the spirit of the event – a tribute to how Walter Mondale, Jimmy Carter's vice president, modernized the office.

Still, by pointing to his own record, Biden seemed be countering assertions made by the declared candidates during the first Democratic debate a week ago.

Clinton had said during the debate that, as secretary of State, she was frequently in Situation Room meetings with Obama, "going over some very difficult issues." Among them was the decision to launch a special forces raid on a compound in Pakistan where Bin Laden was believed to be.

Clinton said last week that she was among Obama's "few advisors" advocating that he go through with the raid. Biden has previously said he urged the president to wait for more intelligence that might confirm Bin Laden's presence.

But on Tuesday, Biden offered a new account. The only Cabinet members who advised the president one way or another with absolute certainty were then-CIA Director Leon E. Panetta, who was in favor of a raid, and then-Defense Secretary Robert M. Gates, who was against one, Biden said.

"Leon Panetta said, 'Go.' And Bob Gates, who has already publicly said this, said, 'Don't go.'" Others were torn, Biden said.

In the Situation Room, with others present, Biden said he advocated the president take "one more pass," sending a drone to see whether Bin Laden was at the compound. But in private, he said, he offered Obama different counsel.

"As we walked out of the room and walked upstairs, I said – I told him my opinion, that I thought he should go, but follow his own instincts," Biden said. "I never, on a difficult issue, never say what I think finally until I go up in the Oval with him alone."

That account differed from what has previously been reported and, to an extent, from what Biden himself has said. But William Daley, Obama's chief of staff at the time of the raid, confirmed Biden's account.

"That's exactly what happened," Daley said in a brief interview at Tuesday's event. "I've not heard him articulate it in that complete form. But he was absolutely accurate."

The Bin Laden raid was not the only example Biden offered of his unmatched relationship with Obama. "Depending on the season," Biden noted, the two spend four to seven hours a day together. And when they were first elected, Obama offered Biden veto power over the choice of Cabinet members and agreed to Biden's condition that Biden be "the last person in the room" for every major decision.

They argued at times, to be sure, but in the way that friends do, he said, and ultimately always agreed on a final decision.

The vice president said that although Obama has had "two great secretaries of State," when Biden traveled abroad to meet with foreign leaders, "they know that I am speaking for the president."

For the second straight day, Biden also seemed to draw another contrast with Clinton, who in the debate listed Republicans as among the enemies she was proudest to have.

"I still have a lot of Republican friends," Biden said Tuesday as he discussed how often he'd been sent to Capitol Hill on administration priorities. "I don't think my chief enemy is the Republican Party. This is a matter of making things work."

Biden noted he had initially refused Obama's offer to join the ticket but was ultimately persuaded to sign on by his family.

"The best decision of my political career was to join the president," he said.

For now.

Biden Sets Himself Apart From Clinton In Speech

By Cameron Joseph

[New York Daily News](#), October 20, 2015

WASHINGTON — Joe Biden isn't yet in the White House race — but that isn't stopping him from drawing some implicit contrasts with Hillary Clinton, and contradicting her version of the raid that killed Osama Bin Laden.

Biden used his time on a panel with former Vice President Walter to rebuke Clinton's version of the Bin Laden raid, disputing claims he opposed it and suggesting she wasn't as adamantly in favor as she claims.

The vice president, who's expected to make a final decision on running for the White House in the coming days, never mentioned Clinton by name. But time and again he suggested how he'd contrast himself with the Democratic front-runner if he does run for President.

He said he knew about Bin Laden's compound months before most of the cabinet, and claimed Clinton wasn't 100% firm on going after the terrorist leader. That contradicts Clinton's version — and changes his own version of the story by adding that he'd intentionally avoided taking a stand while meeting with the cabinet before privately backing it so as to not create a possible split with Obama.

Biden said Defense Secretary Leon Panetta was the only person in the room who was unequivocal in supporting the raid, and claimed that he personally supported a "third option" of more surveillance in the meeting before privately telling Obama he thought he should go through with the raid.

"I didn't want to take a position to go if that was not where he was going to go. So as we walked out of the room and walked upstairs I said, I told him my opinion that I thought he should go, but to follow his own instincts," Biden said.

Biden's new details make him out to be a supporter of the high-stakes raid that killed Bin Laden — a big shift from the common narrative that he resisted it, one Clinton's allies have hinted could be a main attack line if Biden does jump into the race. Clinton regularly mentions her support of the raid on the campaign trail.

"I said, 'We owe the man a direct answer. Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there,'" Biden told House Democrats in January 2012.

Bill Daley, Obama's chief of staff at the time of the Bin Laden raid who was in the meeting, told the Daily News after the panel that Biden's new version of events was "totally accurate."

"Some have spun that he was against it. The way that he articulated it was the absolute truth," he said. "Walking up the stairs, he absolutely did that, he walked out with the president that day."

Biden took some other veiled shots at Clinton throughout the event, repeatedly emphasizing his close relationship with President Obama and arguing he's the man who can reach across the aisle to end D.C.'s partisan gridlock.

"I still have a lot of Republican friends," he said for the second time in as many days, alluding to Clinton's comments during last week's debate that Republicans were one of the enemies she's most proud of. "I don't think my chief enemy is the Republican Party. This is a matter of making things work."

He said he agreed to join Obama's presidential ticket because "I was simpatico with the president-elect" and because "we had a genuine relationship," before claiming Obama gave him a veto over any potential cabinet members, implying he had to approve Clinton as secretary of state. As He Ponders Run, Biden Touts Accomplishments At Forum

By Annie Linskey

[Boston Globe](#), October 20, 2015

WASHINGTON – Vice President Joe Biden stressed his close ties to President Obama, touted his bipartisan relationships on Capitol Hill, and bragged about his foreign policy chops during a forum at George Washington University Tuesday morning.

It sounded an awful lot like the outline of a stump speech.

Biden's deliberations about whether to jump into the 2016 presidential race have put Washington on edge. The clearest sign of that angst came on Monday night when The Washington Post accidentally published a story online declaring that Biden had entered the race. The piece was quickly taken down.

On Tuesday morning, Biden sat on stage with former Vice President Walter Mondale for a moderated conversation about the vice presidency.

Biden reminded the audience of his tendency to speak his mind — a trait that's hurt him in the past but is prized in the current electoral environment where authenticity is being rewarded over polish.

Clinton takes lead over Sanders in poll

Hillary Clinton regained much of the ground she lost during a summer of controversy, a new Washington Post-ABC News poll found.

E-mail rekindles speculation on Biden run

"No one doubts I mean what I say," Biden said. "Sometimes I say all that I mean."

Perhaps the most telling segment of the talk occurred when Biden revealed more about the back story of the 2011 decision to send special forces into Pakistan to kill Osama bin Laden, a risky move that is one of Obama's most significant foreign policy wins.

Biden has been on record recommending against the move, while Democratic front runner Hillary Clinton has said she supported sending in forces.

Biden, on Tuesday, said he was aware of Bin Laden's suspected hideout for a year prior to the raid and explained that he didn't want to unduly pressure the president by stating his views on the raid in front of other cabinet secretaries.

He said his private counsel to Obama was that the U.S. conduct one additional intelligence pass before giving the "go" order.

The vice president also cast doubt on Clinton's account that she fully supported the raid, saying that only two members of the cabinet offered Obama clear cut advice: Former Central Intelligence Director Leon Panetta, who recommended "yes;" and U.S. Defense Secretary Robert Gates, who was a "no" (he preferred bombing the compound).

The rest of the top officials — a group that included Clinton — all hedged, Biden said.

Biden also stressed some of his domestic policy wins. He talked about his role implementing the economic stimulus program, one of the early projects that Obama gave him.

"To this day, we are simpatico on all the major issues," Biden said of his relationship with Obama.

Biden drew another contrast with Clinton, saying "I don't think my chief enemy is the Republican Party."

During the Democratic debate last week, Clinton named "Republicans" as one group that she views as her enemy.

The one area that might raise a concern among some Democratic primary voters was his defense of former Vice President Dick Cheney, who is reviled by the party base.

"I actually like Dick Cheney for real," Biden said, adding that he was "very gracious" during the transition.

Biden Says He Backed Bin Laden Raid All Along

By Jake Sherman

[Politico](#), October 20, 2015

Vice President Joe Biden on Tuesday contradicted Hillary Clinton's and his own previous accounts of the debate over the raid that killed Osama bin Laden — but he and the White House chief of staff at the time say this one is the accurate one.

Biden's revised account puts him further out in favor of going into Abbottabad than any member of President Barack Obama's cabinet at the time other than Leon Panetta, then the director of the Central Intelligence Agency.

That would include Clinton, Biden's potential opponent in the Democratic primary, should he decide to run.

It also seems to conflict with what Obama himself said about the decision, during his third 2012 debate with Mitt Romney, while reflecting on the Republican nominee's suggestion that he should have sought permission for the raid from the Pakistani government.

"Even some in my own party, including my current vice president, had the same critique as you did," Obama said then.

Tuesday, White House press secretary Josh Earnest deflected questions about Biden's new account of the debate, saying that comments about what happened should be left to the people who were in the room, which he was not.

"The decision that mattered was the decision that was made by the president of the United States," Earnest said.

On Tuesday morning, speaking at a forum at George Washington University, Biden said that he remembered being in favor of the raid all along, but worried about saying so in front of the other people in the room if Obama ultimately decided against it, to avoid causing a problem for the president on such a major decision.

"It would have been a mistake. Imagine if I had said in front of everybody, 'Don't go,' or 'Go,' and his decision was a different decision," Biden said. "It undercuts that relationship. I never — on a difficult issue, never say what I think finally until I go up in the Oval [Office] with him alone."

Biden said that when he and Obama spoke privately after that meeting, he pressed the case to send in the Navy SEALs.

"As we walked out of the room, walked upstairs, I told him my opinion: I thought he should go, but follow his own instincts," Biden said.

Clinton, then the secretary of state, has discussed her position in the debate over the raid, saying that she was always for it, unlike others — Biden included — who had reservations. Biden has often been frustrated with that portrayal, even though Biden's previous statements appear to contradict his new account.

At a retreat for House Democrats in January 2012, Biden reportedly said he had told Obama not to do the raid during a meeting in the White House Situation Room.

"Every single person in that room hedged their bet except Leon Panetta," the New York Times reported Biden saying. "Leon said go. Everyone else said, 49, 51."

Asked by Obama what he thought, Biden relayed at the time, "We owe the man a direct answer. Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there."

In May 2012, Biden spoke about it differently in an appearance on "Meet the Press."

"I walked out of that meeting, as I usually do — I get to be the last guy to be with the president — we walked up toward the residence, toward his office," Biden said. "And I knew he was going to go. And what I always tell him when he — he looked at me again, and I said, follow your instincts, Mr. President. Your instincts have been close to unerring; follow your instincts."

Speaking on Tuesday morning at the forum co-hosted by the University of Minnesota celebrating the legacy of former Vice President Walter Mondale, Biden again recalled the moment as he discussed his central and unmatched role within the Obama White House.

To start, Biden said, he knew about the Abbottabad compound as early as August 2010, though "major players in the Cabinet didn't know about it until January or February."

The raid was on May 2, 2011.

Describing the scene in what he says was the Cabinet Room in the White House, Biden said there were only two people with firm opinions about what to do: Panetta and Gates, who has already said publicly that he was a no.

"Others," Biden said, were "49, 51."

Some ultimately said go, Biden said, but it was such a close call, he recalled saying to the Cabinet members that they "sounded like 17 Larry Summers" — economists saying, "on the one hand, on the other hand."

Biden's account Tuesday touched on an explanation for what he said at the meeting, which was seen as being against the raid.

"There was a third option that I didn't really think we should do. I said, 'Well, I think that we should make one more pass with another UAV to see if it is him,'" Biden said, referring to drone aircraft. "The reason I did that is I didn't want to take a position to go if that was not where he was going to go."

The vice president's office declined further comment, but Bill Daley, the White House chief of staff at the time, backed up Biden's new account in an interview after the vice president's remarks — though he acknowledged he was not privy to Biden's conversation with the president.

"The motivation's kind of fudgy, as is obvious — the Situation Room's not as private as you'd think it should be," Daley said, agreeing that this moment reflected Biden's practice of not disagreeing with Obama in front of others. "In the decision, that was pretty much his sort of fudging, and then he went out with the president as he said and walked up the stairs with him."

"That was about the most complete and accurate explanation I've heard from the vice president, which is reflected in what I remember," Daley said, adding that it's the previous version Biden has given that doesn't match his memory. "I don't remember him being that emphatic saying, 'Don't go, don't do this.'"

Panetta, in his book "Worthy Fights," gave a different account of both Clinton and Biden.

"Clinton acknowledged that more time might give us better intelligence, a sentiment others advanced as well, but she concluded that this was a rare opportunity and believed we should seize it," Panetta wrote. "Biden argued that we still did not have enough confidence that bin Laden was in the compound, and he came out firmly in favor of waiting for more information."

Mike Morell, then the deputy director of the CIA under Panetta, also recounted Biden's role in his own book, "The Great War of Our Time."

"The vice president was unconvinced about the intelligence and concerned about what a failed mission would do to our relations with Pakistan," Morell wrote.

Some other reported accounts say that Biden was concerned that if the raid had gone wrong, it might have cost Obama re-election.

Gates, whose book "Duty," is critical of Biden throughout to a degree that the vice president and other senior officials felt was unfair, wrote that "Biden's primary concern was the political consequences of failure."

Biden Contradicts Clinton's Account Of Bin Laden Raid Decision

By Jordan Fabian

[The Hill](#), October 20, 2015

Vice President Biden on Tuesday offered a different account of his advice to President Obama on the Osama bin Laden raid, an issue that could haunt him if he decides to challenge Hillary Clinton for the Democratic presidential nomination.

Biden said that only two advisers — then-CIA Director Leon Panetta and Defense Secretary Robert Gates — gave definitive answers on whether Obama should carry out the raid, contradicting Clinton's claim she fully backed the mission.

"Panetta said go, Bob Gates said don't go," Biden said during a panel discussion with former Vice President Walter Mondale at George Washington University.

The vice president disputed claims he opposed the mission. He said he privately supported the raid, but while in a room with other advisers, recommended that Obama wait to verify whether bin Laden was actually in the Abbottabad, Pakistan, compound before launching the strike.

Biden said he only advised Obama to go when the two were alone to avoid boxing the president in on a decision.

"I told him my opinion that I thought he should go but to follow his own instincts," Biden said. "I never, on a difficult issue, never say what I think finally until I go up in the Oval [Office] with him alone."

Biden's account, however, differs from the one he gave in 2012. At that time, he told House Democrats he warned against the operation, one of the most consequential decisions of Obama's presidency.

"Mr. President, my suggestion is, don't go," Biden told lawmakers, according to The New York Times. "We have to do two more things to see if he's there."

And the new account is different from Clinton's claim that she advised Obama to carry out the raid. During last week's Democratic debate, Clinton said she was "one of his few advisers" on the discussions surrounding the mission.

"He valued my judgment, and I spent a lot of time with him in the Situation Room, going over some very difficult issues," Clinton said of the president.

White House press secretary Josh Earnest on Tuesday dodged multiple questions about Biden's latest account of the raid, saying he would not comment on private conversations between the president and the vice president.

"I am going to leave the dissection and the oral history of those days to those who were actually there," Earnest said. "I don't have any new insight to share with you about the president's recollection of those events."

Earnest, who said he was following Biden's remarks on Twitter, said he was "not particularly" surprised by the vice president's new account but declined to elaborate further.

Biden used the hour-long appearance on Tuesday to draw sharp distinctions with Clinton while touting his close relationship with Obama.

He argued he would be best suited to work across the aisle with Republicans and carry on the legacy of Obama, who remains extremely popular with Democratic voters.

The vice president, who is expected to announce a 2016 decision in the coming days, did not mention Clinton by name, but he took a subtle jab at the former secretary of State, who said during the debate she sees Republicans as her "enemy."

"I still have a lot of Republican friends," Biden said. "I don't think my chief enemy is the Republican Party. This is a matter of making things work."

Biden said he's fond of former Vice President Dick Cheney, a deeply unpopular figure with Democrats, even though he disagrees with how he used his office.

"I actually like Dick Cheney, for real," Biden said. "I get on with him. I think he's a decent man."

Biden said he agreed to become Obama's vice president because of their close personal relationship and their nearly identical views on policy.

"It started off that I knew I was simpatico with the president-elect," Biden said. "We had a genuine relationship."

Biden said Obama granted him the ability to sign off on all Cabinet picks, implying that he agreed to allow Clinton to become secretary of State.

And he suggested he had the upper hand on Clinton and her successor, John Kerry, when speaking with foreign leaders.

"We've had two great secretaries of State, but when I go, they know that I am speaking for the president," Biden said.

Biden's Boasts Wreck Earnest's Day

It's not the first time the president's spokesman has had to field awkward questions about top aides with political ambitions.

By Sarah Wheaton

[Politico](#), October 20, 2015

For a politician who projects authenticity, Vice President Joe Biden seemed to stumble around the truth on Tuesday.

It wasn't just that he contradicted his initial accounts of the U.S. raid that killed Osama bin Laden, claiming for the first time that he did, indeed, recommend that President Barack Obama go forward with the operation. It was also that he claimed to have veto power over nominations and to speak for the president with more authority than other top officials do.

Since Biden hasn't decided whether to run for president, but is facing campaign-level scrutiny, it was up to Obama's press secretary, Josh Earnest, to handle fact-checking questions about some of Biden's other claims.

"I am not aware of the kinds of conversations that then-Sen. Obama had with then-Sen. Biden about him coming on board as the running mate. I don't have any information about that," Earnest said.

Does Biden, as he also claimed at an event to honor Walter Mondale on Tuesday, really have veto power over Obama's Cabinet nominations?

"You'll have to take it up with one of the two of them if they're willing to talk about it publicly."

There was also Biden's boast about speaking for the president on foreign trips.

"We've had two great secretaries of state, but when I go, they know that I am speaking for the president," Biden said.

It's true that Biden is often called on to speak to foreign leaders in the president's stead, both at home and abroad. But reporters pressed Earnest on whether Biden's voice was somehow more powerful than other top Cabinet officials.

"They're receiving him because the president has asked him to go," Earnest said. "I think the same thing could be said about the secretary of state or any other senior U.S. official that represents the U.S. government." Earnest did note that the significance of a vice presidential visit was Biden's "close, personal relationship" with Obama.

Earnest has had to field such questions before, and he's made clear he doesn't enjoy it. For instance, when Hillary Clinton was slow to formally start her campaign, Earnest was stuck defending her private email server from the podium.

While Biden has his own press operation, his staff are reluctant to speak on the record, and they also are not in a position to verify the details of a private conversation with the president.

CBS correspondent Major Garrett captured the challenge for both the press corps and the press secretary when it comes to Biden's claims.

"There's no other person that we can ask directly, other than the president and you, about what he did and didn't do," Garrett said.

Earnest noted that Obama has heaped praise on the vice president's contributions. But if Biden runs, both he and Clinton will be "responsible for making their own case."

Earnest added, "If there is an instance in which the president's interests are at stake, then it's my responsibility to make sure that his interests are properly and well represented."

Earnest also said it's a "luxury for me, not a burden" to be reviewing the record of someone who wants to continue the mission of the current administration. It was unclear whether he was making that case to the press corps, or to himself.

Biden Contradicts Earlier Account Of Bin Laden Raid

[TIME](#), October 20, 2015

Vice President Joe Biden offered a contradictory account of his long-running assertion that he opposed the raid that ultimately killed Osama bin Laden in 2011, saying Tuesday, as he is weighing a run for the Oval Office, that he encouraged President Obama to launch the operation at the time.

Speaking at the Walter Mondale: Living Legacy forum in Washington, Biden said he withheld his view on the dangerous operation in Pakistan until he saw Obama one-on-one, so as not to jeopardize the perception of their relationship.

"We walked out of the room and walked up stairs," Biden said. "I told him my opinion: I thought he should go, but to follow his own instincts."

Biden maintained that only two Cabinet officers weighed in firmly on the strike, Defense Secretary Robert Gates in opposition and CIA Director Leon Panetta in favor. "We sat in the Cabinet room, and at the end of the day, making the decision, he said I want everyone's opinion. And everyone went around the room, and there were only two people who were definitive, and were absolutely certain: Panetta said go, Bob Gates said don't go," he said.

But the narrative runs in the face of the one Biden himself offered in 2012, as well as that offered by Democratic front-runner Hillary Clinton, who was the Secretary of State at the time and has said she was supportive of the operation.

In a meeting with House Democrats in 2012, Biden recounted "Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there," the New York Times reported, in an account later verified by the White House.

By Obama's own account, Biden was skeptical of the raid. "Those decisions generally—generally are not poll-tested," Obama told CBS's Bob Schieffer in the third presidential debate in 2012. "And even some in my own party, including my current vice president, had the same critique as you did."

In her book, *Hard Choices*, Clinton wrote that she supported the operation at the time. "I came to the conclusion that the intelligence was convincing and the risks were outweighed by the benefits of success," she wrote. "We just had to make sure it worked." Earlier this year, Clinton told the South Carolina Democratic Party chair, "I was one who recommended to the president that he go ahead. And his advisers were split."

Read More: [Joe Biden's Weird Relationship with His Boss](#)

The divide over the bin Laden raid is one of the key foreign policy differences between Biden and Clinton, and Biden's attempt to rewrite the established narrative sent Washington speculation into his possible run into overdrive. As a candidate for president in 2008, Clinton was deeply critical of Obama's then-hypothetical support for launching a strike in Pakistan to kill or capture the man responsible for the 9/11 attack.

"Last summer, he basically threatened to bomb Pakistan, which I don't think was a particularly wise position to take," she said in a February 2008 debate.

White House Press Secretary Josh Earnest declined to clarify the discrepancy Tuesday. "The people in the room at the times are the ones that should be consulted," he said.

"Historians will probably tell you this is not the first time a significant political event has prompted different recollections to different people," he added.

Biden Contradicts Clinton, Himself On Bin Laden Raid Decision

By Chuck Ross

[Daily Caller](#), October 20, 2015

Vice President Joe Biden appeared to contradict Hillary Clinton's claim that she adamantly backed the decision to carry out the May 2, 2011 raid on Osama bin Laden's compound in Pakistan.

But Biden, who many believe is set to challenge Clinton for the Democratic presidential nomination, also appeared to contradict his own past admission that he opposed the mission.

Speaking at a panel discussion with former Vice President Walter Mondale at George Washington University on Tuesday, Biden detailed the discussion among Obama's cabinet and other top officials over whether to dispatch SEAL Team 6 to carry out the raid, in which bin Laden was killed.

Biden said that only two advisers — then-CIA director Leon Panetta and then-Sec. of Defense Robert Gates — had “definitive” positions.

“Panetta said go, Bob Gates...said don't go,” Biden said.

“Others were 59-41 [sic], some ended up saying ‘go,’ but it was such a close call,” he added.

That claim of nuanced deliberation contrasts with Clinton's assertions that she was unwavering in her support for the mission.

“I was one who recommended to the president that he go ahead,” Clinton said during an interview in July.

The former secretary of state has touted her support of the mission as evidence that she is capable of making tough decisions during trying times.

But Biden also contradicted himself on Tuesday.

“Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there,” Biden said during the fateful meeting, he told a group of Democrats in Jan. 2012.

But during Tuesday's event, Biden portrayed a more nuanced decision-making process.

“I think we should make one more pass with another UAV to see if it is him,” he says he told Obama during the cabinet meeting. He said that he “didn't want to take a position to go if that was not where [Obama] was going to go.”

Biden said that he had a private conversation with Obama after the meeting in which he said that he should approve the raid.

“I told him my opinion that I thought he should go but to follow his own instincts,” Biden said. “I never, on a difficult issue, never say what I think finally until I go up in the Oval [Office] with him alone.”

Joe Biden Really Sounds Like Someone Who Is Running For President

[Mic](#), October 20, 2015

Vice President Joe Biden has been agonizing over a run for the Democratic presidential nomination for months now, but with one debate already gone and the other candidates steadily building support and reinforcing campaign apparatuses, the time for a final decision is near.

On the other hand, maybe he has already decided.

Over the past 24 hours, at least two people who might know — Fox News chief White House correspondent Ed Henry and Rep. Brendan Boyle (D-Pa.) — have said they were told the vice president was preparing to join the race. Biden himself has been talking plenty, but has remained largely silent on his future plans.

So we're left to continue on reading the tea leaves. During a panel discussion with former Vice President Walter Mondale on Tuesday, Biden dropped several hints about what a potential candidacy might look like.

Though he did not hint about his choice or when he might announce it, Biden didn't simply “sound like a candidate” — he sounded like a candidate very clearly attempting to edge out a rival, Hillary Clinton. He nimbly poked at his former colleague with a handful of ostensibly offhand comments that just so happened to answer potential criticism while drawing himself closer to President Barack Obama, who remains popular with Democratic primary voters.

Here's what Biden said: Surprise! Biden was totally in favor of the bin Laden raid. Source: Mic/C-SPAN

This one is grabbing headlines. The question of whether to launch a special forces raid on Osama bin Laden's compound in Pakistan in 2011 was thought to have caused a sharp division in the Obama administration. The intelligence community was not 100% sure the target was in fact the terror leader's compound, and there were doubts about the wisdom of sending troops deep into Pakistan to find out if it was.

For the past four years, Biden has been cast as one of the doubters who cautioned against military action, and publicly recounted his skepticism. Clinton has happily touted herself as one of the mission's strongest backers, claiming in an interview in July that “I was one who recommended to the president that he go ahead.”

On Tuesday, however, Biden added a wrinkle to that narrative, changing his story to claim that he had told Obama in private that he should approve the raid while casting a skeptical eye in front of the rest of the national security team.

“I said I think we should make one more pass with another UAV (unarmed aerial vehicle or drone) to see if it is [Bin Laden],” Biden said, claiming that this was not his real opinion. “The reason I did that,” he continued, “is I didn't want to take a position to go if that was not where [Obama] was going to go.” Biden, in case you thought otherwise, was Obama's real voice abroad. Source: Mic/C-SPAN

Biden called Clinton a “great” secretary of state. But not, by pretty clear implication here, the real voice of the Obama administration overseas. Just in case that wasn’t clear... Source: Mic/C-SPAN

Clinton traveled to a record 112 countries, but Biden, as he noted, knew many of their diplomats before, when they ascended to leadership roles, back when many were just low-level ministers or parliamentarians dreaming of higher office. If you like Obama, Biden wants you to know this. Source: Mic/C-SPAN

Any differences, Biden said, came down to questions over tactics. That included when he got out ahead of the White House during the 2012 re-election campaign to declare his support for same-sex marriage. (Incidentally, that was about a year before Clinton did the same.) Again, to be clear, Biden is really happy he chose to work for Obama. Source: Mic/C-SPAN

If Biden does decide to go ahead and launch a bid, he should probably get started soon. Despite having polled well for a non-candidate, his numbers are beginning to stall in the latest round of post-debate surveys. Still, he would enter the contest with a solid base of support and, as made pretty clear on Tuesday morning, an impressively refined game plan for mitigating Clinton’s ready-made attacks.

Joe Biden Alters Bin Laden Account

[The Blaze](#), October 20, 2015

It’s been held up as one of the starkest differences between Hillary Clinton and Joe Biden: She decisively supported the raid to take out Osama bin Laden, and he opposed it.

But on Tuesday, Biden altered his account of what happened in the lead-up to the 2011 operation, telling an audience that he gave his direct support to President Barack Obama after a cabinet meeting, and notably omitting Clinton’s name from the list of people who were definitively in favor of it — amid sky-high speculation that he is poised to challenge her for the 2016 Democratic presidential nomination.

White House photo

“It was something that was a difficult call for the president. So, we sat in the cabinet room at the end of the day making the decision. He said, ‘I want everybody’s opinion.’ Everybody went around the room,” Biden said at George Washington University.

“There were only two people who were definitive and absolutely certain: Leon Panetta said go and Bob Gates said don’t go, and others were 51-49, some ended up saying go, but it was such a close call,” he continued. “I joked and I said, ‘You all sound like 17 Larry Summers,’ the economist, on one hand then on the other. They said, ‘Joe, what would you do?’ There was a third option I didn’t really think we should do. I said, I think we should make one more pass with a UAV to see if it is him.”

“The reason I did that is because I didn’t want to take a position to go if that was not where [Obama] was going to go. So as we walked out of the room and walked upstairs, I said, I told him my opinion that I thought he should go, but follow his own instincts,” Biden added. “But it would have been a mistake – imagine if I had said in front of everyone, don’t go or go, and his decision was different. It undercuts that relationship. I never say what I think finally until I go up into the Oval with him alone.”

Biden’s remarks Tuesday differ from what he said in January 2012

, when he recalled directly advising the president against the raid and did not mention a private conversation with Obama.

“Every single person in that room hedged their bet except Leon Panetta. Leon said go. Everyone else said, 49, 51,” Biden said in 2012. “He got to me. He said, ‘Joe, what do you think?’ And I said, ‘You know, I didn’t know we had so many economists around the table.’ I said, ‘We owe the man a direct answer. Mr. President, my suggestion is, don’t go. We have to do two more things to see if he’s there.’”

Clinton has repeatedly drawn a distinction between hers and Biden’s positions on the raid, including in her 2014 memoir, “Hard Choices: “I respected [Biden’s] concerns about the risk of a raid,” she wrote, “but I came to the conclusion that the intelligence was convincing and that the risks were outweighed by the benefits of success.”

After Biden’s remarks Tuesday, then-Obama chief of staff Bill Daley supported Biden’s account in a conversation with reporters:

White House press secretary Josh Earnest was careful not to weigh into the shifting account, asserting he wasn’t in the room several times during the daily press briefing.

“I was not in the room when these decisions were being made or when the president was consulting his advisers about this very difficult foreign policy call that he made,” Earnest said. “There have already been books written about this. I am confident there will be more, or at least more books in which we will be able to read about this momentous time in American history. So I’m going to leave the dissection and the oral history to those who were actually there. To the extent there is greater clarity you would like to seek, maybe you would ask those in the room.”

He later added, “I don’t have any new insight to share with you about the president’s recollection about those events.”

This post was updated to include comment from White House press secretary Josh Earnest.

Correction: TheBlaze initially stated that Biden expressed his support for the raid during the cabinet meeting; Biden said he told the president privately afterward.

Joe Biden Changes Story On Osama Bin Laden Raid

By Laura Koran

[CNN](#), October 21, 2015

Washington (CNN) Vice President Joe Biden offered an account Tuesday of the decision to launch the raid that killed Osama bin Laden that differed from some of his previous retellings – and from Hillary Clinton's.

His remarks come as he considers facing off against the former secretary of state in the 2016 presidential race, and they seem to signal that he sees his earlier stance on the raid as a potential liability.

At an event honoring former Vice President Walter Mondale, Biden said he had privately advised the President to pursue the raid on bin Laden's compound after initially advising a more cautious approach at a Cabinet meeting.

"We walked out of the room and walked upstairs," Biden said. "I told him my opinion: I thought he should go, but to follow his own instincts."

The new account is a significant departure from what he said at a Democratic retreat in January 2012.

"Mr. President, my suggestion is, 'Don't go,'" Biden said, according to an ABC News report from that time.

"We have to do two more things to see if he's there," Biden recalled, though the story did not include what those two things were.

The Cabinet meeting Biden referred to has been described by several people in the administration, including President Barack Obama himself.

The President asked his closest advisers for input on how he should respond to intelligence that bin Laden was holed up in a compound in Abbottabad, Pakistan – intelligence that was anything but certain.

The proposed raid by Navy SEALs was risky, particularly without notifying Pakistan of the plan.

"Those decisions are not always popular. Those decisions generally are not poll-tested," Obama told moderator Bob Schieffer in a 2012 presidential debate. "And even some in my own party, including my current vice president, had the same critique" about the risk of the operation as did some outsiders.

Clinton has also characterized Biden as having been openly skeptical in the meeting.

Tuesday's account is also a change from an account Biden gave on NBC's "Meet the Press" in May 2012, in which he described advising the President to follow his instincts but didn't explicitly advise him to "go" for it.

"We walked up toward the residence, toward his office," said Biden of his conversation with Obama, "and I knew he was going to go (for the raid). And what I always tell him when he – he looked at me again, and I said, 'Follow your instincts, Mr. President. Your instincts have been close to unerring; follow your instincts.'"

Biden also offered a reason for the difference between what he said in the Cabinet meeting and his new account of the private conversation with Obama in which he advocated following his instincts.

The vice president now says that he suggested the administration undertake additional drone surveillance on the compound while in that Cabinet meeting, but that he made that recommendation because he didn't want to undermine the President if he ended up choosing a more cautious approach.

"Imagine if I had said, in front of everyone, don't go or go and his decision was a different decision," said Biden. "It undercuts that relationship. So I never, on a difficult issue, never say what I think finally until I go up to the Oval with him alone."

Biden also said Tuesday that only two people in the meeting were definitive in their advice to the President, contradicting Clinton's account of how she supported the mission.

There were "only two people who were definitive and were absolutely certain," he said, referring to the men who were, respectively, the director of the CIA and the secretary of defense at the time. "Leon Panetta said, 'Go,' and Bob Gates – who has already publicly said this – said, 'Don't go.' And others were at 59/41."

In her 2014 book "Hard Choices," Clinton writes that she was an immediate supporter while Biden "remained skeptical."

"I respected Bob [Gates] and Joe [Biden]'s concerns about the risks of a raid, but I came to the conclusion that the intelligence was convincing and the risks were outweighed by the benefits of success," she wrote. "We just had to make sure it worked."

Biden also drew attention in his remarks Tuesday to the fact that he knew about the intelligence on bin Laden's location before Clinton did.

"The President and I, and only two others in the administration, knew about Abbottabad as early as August 2010, Biden said Tuesday. "We did not go for almost a year to get him. And major players in the Cabinet did not know about it till January or February (2011)."

In Clinton's account, she learned about the intelligence in March 2011.

Biden's Retelling Of OBL Raid Differs From Earlier Accounts

By John T. Bennett

[Roll Call](#), October 20, 2015

Vice President Joseph R. Biden Jr. offered an account Tuesday of his advice to President Barack Obama before the raid that killed Osama bin Laden that differed from his previous remarks.

Biden's recollection spilled over to the White House's daily briefing, and offered a clear example of how Biden's off-the-cuff style could stir up the 2016 race — and potentially undercut his potential candidacy.

"We walked out of the [Situation] Room and walked upstairs," Biden said at a forum at George Washington University. "I told him my opinion: I thought he should go, but to follow his own instincts."

Biden's Tuesday account did have a bit of nuance: He also said prior to that conversation, he told Obama he favored getting one more birds eye view of the Pakistan compound where U.S. officials believed the al-Qaida leader was holed up.

"Joe, what would you do?" he said others in the secure room asked in the days before the special forces raid. "And there was a third option that I didn't really think we should do, and I said, 'I think we should make one more pass with a UAV to see if it's, if it is him,'" Biden said, using military shorthand for an unmanned drone aircraft.

Biden told an audience packed into a GWU auditorium that he "didn't want to take a position to go if that was not where [Obama] was going to go."

That's why he later allegedly advised Obama to greenlight the risky mission.

The Tuesday comments do not completely align with ones he made in 2012 at a House Democratic retreat, as reported by The New York Times: "Every single person in that room hedged their bet except [then-Defense Secretary] Leon Panetta. Leon said go. Everyone else said, 49, 51."

"This account stands at odds with numerous previous accounts of the meeting and the vice president's position then and subsequently," William A. Galston, a senior fellow at the Brookings Institution wrote in a blog post. "It is likely that the vice president will be called upon to reconcile these apparently competing accounts."

Biden reportedly told House Democrats that he told his colleagues, "We owe the man a direct answer," then said, "Mr. President, my suggestion is don't go. We have to do two more things to see if he's there."

The last part of that 2012 remark aligns with Biden's comments on Tuesday morning. What's new is his account of the follow-up conversation — in private — with Obama.

On Monday, White House Press Secretary Josh Earnest sidestepped reporters' questions about Biden's revised account.

Earnest would not comment on the vice president's assertion that he advised Obama to launch the strike.

"For an accurate accounting of what happened, you're going to have to talk to the people who were in the room," Earnest said.

Other then-Cabinet members have said Biden advised Obama to hold off.

In his 2014 memoir "Duty," former Defense Secretary Robert Gates wrote this: "Joe Biden and I were the two primary skeptics."

Gates, who was critical of the vice president in his book, also wrote, "Biden's primary concern was the political consequences of failure."

"Biden was against the operation," Gates wrote in his characteristic bluntness about what he called the final meeting on April 28, 2011, to discuss the raid. Gates' account essentially paints Biden as the lone individual in the Situation Room who argued against an offensive strike of some kind.

Biden is mulling a bid for the 2016 Democratic presidential nomination. Should he jump in, he would clash with Hillary Rodham Clinton, who was secretary of State at the time of the bin Laden mission. She frequently says she advised Obama to carry out the raid that ultimately killed bin Laden.

Biden's new version clearly would become an immediate campaign-trail issue should the vice president opt for a third presidential bid.

Biden's New Account Of Bin Laden Raid Puts Him In The Right

By Olivier Knox

[Yahoo! Politics](#), October 20, 2015

Vice President Joe Biden said Tuesday for the first time that he had privately urged President Obama to order the raid that killed Osama bin Laden — a new account contradicting his prior public claim to have opposed the audacious May 2011 operation.

Biden, speaking at a George Washington University forum on the vice presidency, also seemed to undercut Hillary Clinton's contention in her memoirs that she had unequivocally backed the raid.

The vice president's remarks came amid fevered speculation that he could soon announce whether he will jump into the 2016 White House race. Having opposed the bin Laden raid could be a political liability if he seeks the top job.

On Tuesday, Biden described a tense White House meeting in which Obama asked his top advisers for their opinions on whether or not to order the operation, weighing uncertain intelligence and the risks associated with entering Pakistani airspace uninvited.

"Everybody went around the room, and there were only two people who were definitive," Biden said. Leon Panetta, the CIA director at the time, "said, 'Go,'" while then-Defense Secretary Bob Gates "said, 'Don't go.'" Clinton, in this account, would have been among those on the fence.

In this image released by the White House and digitally altered by the source to diffuse the paper in front of Secretary of State Hillary Rodham Clinton, President Barack Obama and Vice President Joe Biden, along with members of the national security team, receive an update on the mission against Osama bin Laden in the Situation Room of the White House, May 1, 2011, in Washington. (Photo: The White House, Pete Souza)

Biden said he raised a third option. "I said, 'Well,' I said, 'I think we should make one more pass'" with an unmanned aerial vehicle to be sure the al-Qaida leader was at the target site. But that wasn't his real preference, he told the forum. Moments after the meeting wrapped up, and he and Obama were alone, "I told him my opinion, that I thought he should go, but to follow his own instincts," the vice president said. "I never, on a difficult issue, never say what I think finally until I go up in the Oval with him alone."

That's not how Biden had previously recalled the advice he gave. In January 2012, at a Democratic retreat, he explicitly described how he opposed the raid in that same meeting.

"Every single person in that room hedged their bet except Leon Panetta. Leon said, 'Go,'" Biden said.

"[Obama] got to me. He said, 'Joe, what do you think?' And I said, 'You know, I didn't know we had so many economists around the table.' I said, 'We owe the man a direct answer. Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there,'" Biden said at the time.

The vice president's new account seems to put him at odds with Clinton's version of the internal debate over the raid. In her 2014 memoir, "Hard Choices," she wrote that Biden and Gates opposed the operation but she supported it.

"I respected Bob's and Joe's concerns about the risk of a raid," she wrote, "but I came to the conclusion that the intelligence was convincing and that the risks were outweighed by the benefits of success."

Clinton has also reportedly knocked Biden in private for opposing the raid.

Shortly after Biden's remarks at the 2012 Democratic retreat, White House spokesman Jay Carney — who had previously served in that capacity for the vice president — said Biden was "speaking accurately" when he described himself as opposing the operation.

In a May 2012 appearance on "Meet the Press," Biden described his private conversation with Obama differently.

"I said, 'Follow your instincts, Mr. President. Your instincts have been close to unerring. Follow your instincts.' I wanted him to take one more day to do one more test to see if he was there," Biden said in that interview.

And no less an authority than Obama himself has cast Biden as more of a critic of the raid than a supporter. In his third debate with Mitt Romney, the president noted his rival's public opposition to a unilateral raid to get bin Laden without Pakistan's acquiescence.

"Even some in my own party, including my current vice president, had the same critique as you did," Obama said.

Former Official: Biden Was Against Raid

By Amie Parnes

[The Hill](#), October 20, 2015

A former senior administration official involved in deliberations on the raid that killed Osama bin Laden said Tuesday that Vice President Biden did not back the operation.

The official, who took part in deliberations on whether to approve the operation in Pakistan, said Hillary Clinton, then secretary of State, and then-CIA Director Leon Panetta both backed the raid — but that Biden did not.

"I can tell you this, both then-CIA Director Leon Panetta and Secretary of State Hillary Clinton favored the raid and they did so in presentations made in the Situation Room," the former official told The Hill. "Secretary Clinton made her views known. Leon made his position known. And I don't recall the vice president sharing the same view.

"When the president conducted the final meeting on April 28th, he faced a divided set of advisers," the official added.

Biden, who is considering a run for the White House against Clinton in 2016, offered a different view earlier on Tuesday.

In an appearance honoring former Vice President Walter Mondale, Biden said he privately supported the raid and held back his advice for President Obama until the two were behind closed doors.

Biden also contradicted the Democratic presidential front-runner's claim that she fully supported the raid.

"I told him my opinion that I thought he should go but to follow his own instincts," Biden said during a panel discussion with former Mondale at The George Washington University. "I never, on a difficult issue, never say what I think finally until I go up in the Oval [Office] with him alone."

The former senior administration official conceded that no one knows what Biden may have told Obama behind closed doors. But the official said the vice president was clear about where he stood on the special forces raid to take action against bin Laden.

In his own book on his years in the Obama administration, Panetta also wrote of Biden being against the operation and Clinton supporting it.

"Biden argued that we still did not have enough confidence that bin Laden was in the compound, and he came out firmly in favor of waiting for more information," Panetta wrote in "Worthy Fights."

Panetta wrote that Clinton acknowledged more time might provide better intelligence, but concluded "this was a rare opportunity and believed we should seize it."

Biden's account on Tuesday also differs from the one he gave in 2012. At that time, he told House Democrats he warned against the operation, one of the most consequential decisions of Obama's presidency.

"Mr. President, my suggestion is, don't go," Biden told lawmakers, according to The New York Times.

Walter Mondale, Joe Biden Compare Notes On The Veep Job

By Don Davis

[St. Paul \(MN\) Pioneer Press](#), October 21, 2015

Vice President Joe Biden used Walter Mondale as an example when he became vice president, he told a crowd gathered Tuesday to honor Minnesota's senior statesman.

"The first person I called was Fritz," after then-presidential candidate Barack Obama asked him to be his running mate, Biden said, using Mondale's nickname.

Mondale and Biden talked for an hour to open a daylong celebration of the 87-year-old Mondale's career, focused on his four years as vice president under President Jimmy Carter. Mondale and Carter are widely praised for giving the vice presidency more importance after it was the subject of jokes and mockery during much of the country's history.

Biden gave no clues about whether he soon would begin a run for the presidency, although pundits watched carefully amid increased rumors in recent days that he would announce this week.

University of Minnesota Professor Larry Jacobs, master of ceremonies at the Washington event, tweeted that one line may have been a swipe at Democratic frontrunner Hillary Clinton: "I don't think my enemy is the Republican Party."

There was no sign of tension between the vice presidents, who Mondale said have been friends since Biden took office in the Senate. Mondale supports Clinton for president.

"Joe, I love you, and we are so glad you are with us today," Mondale told the current vice president.

He also praised what Biden has done with the job. "You have taken the vice presidency a big step forward, aided enormously by your extraordinary experience in the Senate."

The vice presidents sat in a George Washington University meeting room in front of guests who long ago snapped up all the tickets. The event was sponsored by the University of Minnesota Humphrey School of Public Affairs.

Top Minnesota Democratic politicians attended the day symposium and night dinner, including Gov. Mark Dayton and U.S. Sens. Amy Klobuchar and Al Franken.

Included on the dinner guest list was Carter, who Mondale said, "is going out of his way under adverse circumstances to be with us tonight." Carter announced this summer that he has cancer.

Mondale and Biden said keys to being a good vice president are to understand that the president is in charge, don't disagree with the chief executive in public and make sure that it is the right job for the person who accepts it.

"I did not want to be involved in the details of government," Mondale said. "I didn't want to do anything that anyone else was doing. I wanted to be a general advisor to the president."

But to be an advisor, he added, he had to know information before going in to advise Carter. "I could not go into the president and say, 'What's cookin'?"

Like Mondale, Biden did not want to be vice president. When Biden initially rejected Obama's request to be running mate, Obama asked Biden to return to his family and discuss the issue. Family members changed Biden's mind.

Mondale and Biden both were plucked from the Senate to be vice presidential candidates, and both originally thought they would be more important to the president there than as vice president.

Biden said he talked to Mondale various times before taking office.

He also talked to Dick Cheney, his immediate predecessor and vice president to Republican George W. Bush.

Talking about Cheney drew the only disagreement between Biden and Mondale.

"I actually like Dick Cheney, for real. ... I think he is a decent man," Biden said.

But Biden based his vice presidency on Mondale, not Cheney. To Biden, Cheney appeared to control a powerful office, with his own sizeable national security staff.

"Cheney had a very different view of the vice presidency," Biden said.

Mondale immediately disagreed.

"He said early on that he was going to take things to the dark side," Mondale said. "I believe he really did."

The Minnesotan added: "I have a harsh view of the man."

Also on Tuesday's agenda were discussions about how Mondale influenced policy dealing with schools, social services, national security, civil rights and foreign policy.

Biden Jokes About Faking Prostate Cancer To Get Out Of Obama Administration

By Ben Wolfgang

[Washington Times](#), October 21, 2015

Vice President Joseph R. Biden said Tuesday that he would "develop prostate cancer or something" if he had a fundamental disagreement with President Obama and was forced to resign from his post.

At an event honoring former Vice President Walter Mondale, Mr. Biden recounted the conditions he placed on joining Mr. Obama's ticket in 2008 and also made clear he would leave the administration if he encountered deep, substantive policy differences with the president.

"Two things: to be able to completely be level with you and argue with you if we disagree, privately," Mr. Biden said of his 2008 conversations with Mr. Obama, in which the two men discussed the vice president's role.

"And secondly, I want to be the last person in the room on every major decision, and I didn't mean that figuratively, I meant that literally — the last person in the room," he continued. "He's president. He gets to make the decision, and unless there's an overwhelming disagreement in principle, in which case I'd develop prostate cancer or something and leave, and he knew I meant that ... I get to be the last person in the room. And that's where I think I can serve best."

Mr. Biden reportedly will decide this week whether to seek the White House in 2016.

Biden Gaffes Create More Awkward Moments For White House Before Presidential Decision

By Ben Wolfgang

[Washington Times](#), October 21, 2015

He's not even in the presidential race, but Vice President Joseph R. Biden already has a mouth that is getting him into trouble and putting the White House in an uncomfortable spot.

Mr. Biden's list of gaffes got longer Tuesday when he made an awkward joke about faking prostate cancer in order to leave the administration, and, more seriously, offered the bizarre claim that he did, in fact, support the 2011 raid that killed al Qaeda leader Osama bin Laden. The vice president previously said he opposed the mission, and other top officials — including President Obama — suggested that Mr. Biden was skeptical of the raid.

Mr. Biden, who is expected to decide this week whether he will run for president, also claimed Tuesday that the president gave him veto power over any Cabinet nominee. The White House steered clear of that assertion and also refused to address the confusion around the bin Laden mission — a potential preview of the difficulties the administration will face if Mr. Biden launches a presidential bid.

Analysts say the White House is likely to be forced to play referee in any potential disputes between Mr. Biden and Democratic presidential front-runner Hillary Rodham Clinton, who served as Mr. Obama's secretary of state for four years. Mrs. Clinton, too, has said that Mr. Biden was opposed to the bin Laden mission.

"You could see this anytime a moment from the first term where Joe Biden and Hillary Clinton interacted and a moment like that has to be litigated, the White House could be dragged into these stories, and that's not what it wants," said Matthew Dallek, assistant professor of political management at George Washington University. "It certainly creates an unusual dynamic."

On the bin Laden raid, Tuesday's comments represent the first time Mr. Biden has said he fully backed the mission. He claimed that he offered his true position during a private conversation with the president and avoided taking a firm stance during meetings in the situation room.

"As we walked out of the room and we walked upstairs, I told him my opinion that I thought he should go but to follow his own instincts," Mr. Biden said during a speech honoring former Vice President Walter F. Mondale.

The White House would not weigh in on the conflicting reports. White House press secretary Josh Earnest said he couldn't confirm Mr. Biden's account and told reporters that they would need to ask Mr. Obama, the vice president, Mrs. Clinton or someone else who was in the room when the decision was made to raid bin Laden's compound in Pakistan.

"I was not in the room when these decisions were being made. I'm going to leave the dissection and the oral history, if you will, of those days to those who were actually there," Mr. Earnest said at Tuesday's White House press briefing. "I don't have any insights to share with you about the private conversations between the president and the vice president."

Aside from the important foreign policy question of whether he backed the bin Laden mission, Mr. Biden added to his history of amusing yet awkward statements.

That record includes telling a wheelchair-bound Missouri state senator to stand up at a campaign rally, calling Mr. Obama "the first mainstream African-American who is articulate and bright and clean" to run for the presidency, joking that in Delaware "you cannot go to a 7-Eleven or a Dunkin' Donuts unless you have a slight Indian accent," and caressing the shoulders of Stephanie Carter, wife of Defense Secretary Ashton Carter.

Prostate cancer jokes now can be added to the list after Mr. Biden recounted a conversation with the president in which he laid out his conditions for joining the administration.

"Two things: to be able to completely be level with you and argue with you if we disagree, privately," Mr. Biden said of his 2008 discussions with Mr. Obama. "And secondly, I want to be the last person in the room on every major decision, and I didn't mean that figuratively, I meant that literally — the last person in the room. He's president. He gets to make the decision, and unless there's an overwhelming disagreement in principle, in which case I'd develop prostate cancer or something and leave, and he knew I meant that I get to be the last person in the room. And that's where I think I can serve best."

No Grounds For Biden In New Hampshire

By Jennifer Epstein

[Bloomberg Politics](#), October 20, 2015

Vice President Joe Biden trails the two leading candidates for the Democratic presidential nomination by more than 25 points each in New Hampshire and would enter the race without an edge over them on overall favorability or specific personality traits.

Biden would draw the support of 10 percent of likely Democratic primary voters if the primary were held today, according to the Bloomberg Politics/Saint Anselm New Hampshire Poll released Tuesday. That puts him well behind Vermont Senator Bernie Sanders, who's led most recent polls in the state that neighbors his own, who gets the support of 41 percent of those surveyed, and former Secretary of State Hillary Clinton, who's at 36 percent. When Democrats first and second choices for the party's nominee are combined, Clinton edges Sanders: 64 percent of Democrats rank Clinton as either their No. 1 or No. 2 choice for the nomination. For Sanders, the number is 63 percent; for Biden, 29 percent.

Former Virginia Senator Jim Webb, who dropped out of the Democratic race on Tuesday, was the first choice of 1 percent of those surveyed and the second choice of 1 percent. Harvard Professor Lawrence Lessig was the first choice of 1 percent, while former Maryland Governor Martin O'Malley and former Rhode Island Governor Lincoln Chafee got no support as a first choice candidate but drew the backing of 6 percent and 1 percent, respectively, as a second choice candidate.

Bloomberg Politics/Saint Anselm last polled New Hampshire Democrats in June—before Sanders' surge—and Clinton led him 56 percent to 24 percent then. Biden was not named in that survey.

The anemic showing for the vice president comes as people close to him say he's nearing a decision on whether to get into the race, though there have been several false alarms in recent weeks. Advisers have said that Biden's choice won't be driven by polling and will instead be swayed by whether he believes that he and his family would be able to withstand the stress of the campaign after losing his older son Beau Biden earlier this year.

Thirty-six percent of Democratic primary voters surveyed say that Biden's drawn out decision-making process made them less supportive of him, while 62 percent say it doesn't matter to them.

Biden has signaled that his bid would ride on the successes and popularity of President Barack Obama, who got favorable ratings from 83 percent of the New Hampshire Democrats surveyed. Biden's 75 percent favorability rating put him behind both former President Bill Clinton (78 percent) and Hillary Clinton (77 percent). The differences are more pronounced among those voters who feel most strongly: Obama got "very favorable" ratings from 50 percent of New Hampshire Democrats. For Hillary Clinton, that number is 40 percent. For Biden, 29 percent. The highest favorability rankings went to Sanders, from neighboring Vermont: 86 percent rated him favorably and 55 percent "very favorable."

On questions of personality and ability to govern, the vice president generally trails Clinton and Sanders.

Clinton leads the field on leadership questions, with 49 percent of those surveyed saying she's most ready to be president. Biden, despite being a heartbeat away from the presidency for nearly seven years and having served in the Senate for nearly four decades, is seen as most ready by 21 percent of respondents, barely ahead of Sanders, who's at 20 percent. Clinton also has an advantage in being seen as knowing best how to get things done in Washington and in handling Russian President Vladimir Putin. And Democrats see her as their party's strongest potential standardbearer: 50 percent of respondents say that Clinton would be best capable of beating the Republican nominee in the general election. Sanders is next at 19 percent.

Sanders does better than Clinton and Biden on traits of authenticity and likability, which the vice president's allies have suggested would be his advantage. Sanders is seen as most authentic by 57 percent of those surveyed, while 19 percent call Biden the most authentic, barely ahead of Clinton at 16 percent. The Vermont senator also gets the highest marks among voters asked which candidate cares most about them – 51 percent say that of Sanders, while 23 percent say it of Clinton and 10 percent say it of Biden. Sanders also has an edge on being trusted to tell the truth, 53 percent to Biden's 17 percent and Clinton's 13 percent.

As Clinton's testimony before the House Select Committee on Benghazi approaches, Democratic primary voters are divided on whether the panel is inflicting damage and if that is swaying their support of her. Twenty-eight percent of those surveyed said it makes them less supportive of her while 67 percent said it doesn't bother them. Nearly identical numbers say the same about her not being forthcoming about the private email server she used while at the State Department.

New Hampshire Democrats are evenly divided at 47 percent each on whether Sanders' 2005 vote to give gun manufacturers immunity from lawsuits makes them less supportive or does not bother them. Sanders' description of himself as a "democratic socialist" is even less of a drawback, with only 16 percent of voters saying that makes them less supportive of him.

The poll was conducted by Purple Strategies from Oct. 15-18 and surveyed 400 likely Democratic primary voters by landline and cell phone. The margin of error is +/- 4.9 percentage points.

Poll: Biden A Distant Third In New Hampshire

By Eliza Collins

[Politico](#), October 20, 2015

Democratic primary voters in New Hampshire aren't too eager to choose Joe Biden, a new Bloomberg/Saint Anselm poll shows — even as the media frenzy over whether the vice president will enter the 2016 race reaches fever pitch in Washington.

Biden received the support of just 10 percent of those polled, putting him in a distant third place.

Vermont Sen. Bernie Sanders leads the poll with 41 percent while former Secretary of State Hillary Clinton comes in second with 36 percent.

But Sanders and Clinton are neck and neck if voters' first and second choices are combined: Clinton at 64 percent vs. Sanders' 63. Biden's combined score is just 29 percent.

In June's Bloomberg/Saint Anselm poll, Clinton led the field with 56 percent, with Sanders at 24 percent. Biden was not included.

Former Virginia Sen. Jim Webb — who dropped out of the race Tuesday — garnered 1 percent, tying him with Harvard law professor Lawrence Lessig. Former Maryland Gov. Martin O'Malley and former Rhode Island Gov. Lincoln Chafee did not register.

The prolonged uncertainty surrounding Biden's candidacy didn't bother most voters — 62 percent said it didn't matter. But 36 percent said that Biden's slow decision-making process made them less supportive of his candidacy.

The poll of 400 likely Democratic primary voters was conducted Oct. 15-18 by landline and cell phone, with a margin of error of plus or minus 4.9 percentage points.

Should Joe Biden Enter The Democratic Primary?

Freedom Caucus Wary Of Ryan's Demands

By Lauren French

[Politico](#), October 21, 2015

Paul Ryan wants a full embrace from the House Freedom Caucus before he runs for House speaker. Early signs from the conservatives are they might never get there.

After Ryan addressed Republicans late Tuesday, saying he would need conservative backing to run, lawmakers in the 40-member group of hard-line conservatives came away wary of the Ways and Means chief's demand for unconditional support. They were dismissive of his Ryan's request that they relinquish a procedural tactic they used to threaten to strip outgoing Speaker John Boehner of his title – one of the most potent weapons in the group's arsenal.

And it is clear the conservative lawmakers will insist on more specifics from Ryan before they would consider an endorsement. Sources within the caucus said he'll have to discuss policy and procedural changes the Freedom Caucus wants and offer up tangible promises to decentralize power from leadership to rank-and-file members if he wants their backing.

Without specific pledges, those sources said, Ryan will have a hard time clinching the backing of 80 percent of the group's members — its threshold for an endorsement.

"I got the sense that Paul Ryan was not willing to look at rule changes before October 29, and without that I don't see him getting 80 percent," one Freedom Caucus member said, referring to the expected date of the election for speaker.

The Freedom Caucus has until Friday to decide if it will back Ryan. Several of the Freedom Caucus' most influential members huddled in the office of Rep. Jim Jordan (Ohio), the group's chairman, late Tuesday night. And board members of the conservative organization will meet Wednesday to discuss Ryan's conditions.

The Wisconsin Republican told his colleagues on Tuesday that he would serve as speaker if — and only if — the three largest coalitions in the GOP House support his candidacy. An endorsement is nearly assured from the Republican Study Committee and the moderate Tuesday Group.

"I have left this decision in their hands," Ryan said at a press conference.

The Freedom Caucus has already endorsed Florida Republican Rep. Daniel Webster for speaker but that support is only for the internal vote of House Republicans. The conservative members could still back Ryan on the House floor. Webster told reporters Tuesday he is still committed to running for speaker.

Rep. Matt Salmon (R-Ariz.), a founding member of the Freedom Caucus, said Ryan made "some very reasonable observations about how anybody would need the support of the entire conference if they are going to be a successful speaker."

The caucus is not ready to support Ryan, Salmon added, though he didn't rule it out.

"All things are possible," Salmon said. "I think the issue of process reforms are going to have to be addressed one way or another before the Freedom Caucus wholesale jumps in bed with him."

But already Ryan has ruffled feathers within the group. Rep. Raúl Labrador (R-Idaho) said that getting rid of the "motion to vacate" procedure — which Boehner was confronted with over the summer, one of the factors in his decision to resign — is a "non-starter."

"I think we need to invite him in and have him expand on what he meant. You know he just gave a short speech," Labrador, a Freedom Caucus member, said.

Ryan's conditions essentially put the group in a no-win spot of endorsing a candidate for speaker many figures on the far right say is too moderate and accommodating — or blocking a highly respected figure in the GOP, the one candidate widely seen as capable of getting 218 votes on the House Floor.

One Freedom Caucus member who requested anonymity in order to speak freely was asked whether Ryan is setting up the group to be blamed if he ends up not running.

"You can certainly read it that way," the lawmaker said.

House Republicans Look To Ryan To Save Them From Themselves

By Erica Werner

[Associated Press](#), October 21, 2015

WASHINGTON (AP) – House Republicans, searching for a speaker to lead them out of crisis, waited to learn Tuesday whether Wisconsin Rep. Paul Ryan would shoulder the thankless task.

Ryan and his aides were saying little ahead of a closed-door late-evening meeting, the first such gathering following a weeklong recess many spent in a state of suspended animation, waiting to hear from Ryan.

But in a sign that he is exploring the possibility, Ryan was meeting with the House Freedom Caucus at their request, his spokesman said. This group of three dozen or so hardline conservatives pushed current Speaker John Boehner to announce his

resignation and scared off Boehner's No. 2, Majority Leader Kevin McCarthy, who abruptly withdrew from the speaker's race just before the recess.

Ryan, 45, the GOP's 2012 vice presidential nominee, has consistently said he does not want to be speaker and would prefer to stay on as chairman of the tax-writing Ways and Means Committee, which he's described as his dream job.

But he's been under heavy pressure to reconsider from party leaders who argue he is the only House Republican with the stature and broad popularity to unite a caucus divided against itself, at a moment of deep turmoil. Congress is hurtling toward an early November deadline to raise the federal borrowing limit or invite a first-ever default, and a deadline to pass spending legislation or risk a government shutdown will follow in early December.

House GOP leaders also planned to use Tuesday night's meeting to float a debt limit plan that would link any increase in borrowing authority with deep spending cuts and a vote on a constitutional amendment to require a balanced budget. Such legislation would be certain to draw a White House veto threat and die in the Senate. But it could satisfy demands from conservatives who are loudly protesting the Obama administration's calls for increasing the debt limit with no strings attached.

As for Ryan, "I think he has the potential to unite, if anybody can, unite the various elements of the Republican conference in the House," Sen. John Thune of South Dakota, the No. 3 Senate Republican and a former member of the House, said Tuesday. Thune called being speaker "probably the toughest job in the world right now."

Indeed some of the same conservative elements outside of Congress who made problems for Boehner and McCarthy are on the attack against Ryan, highlighting his support for government bailouts and comprehensive immigration legislation allowing legal status to people in the country illegally.

"We think Paul Ryan is another example of what's wrong with Washington, D.C.," said Jenny Beth Martin, national coordinator of the Tea Party Patriots. "He's a nice man, but it's time for someone who is going to be speaker of the House who will disrupt business as usual."

Ryan did pick up one endorsement Tuesday, but it was probably unwanted. Senate Democratic Leader Harry Reid of Nevada declared himself a fan of Ryan's and said he hoped he would become speaker.

"He appears to me to be one of the people over there that would be reasonable; look at some of the other people," Reid remarked to reporters. When someone noted that an endorsement from Reid, a villain to many Republicans, could hardly help Ryan, Reid shrugged and said: "I just speak the truth."

Paul Ryan Inches Closer To Speaker Bid Decision

[ABC News](#), October 21, 2015

With lawmakers back in Washington after a 10-day recess, all eyes are on Paul Ryan, R-Wisconsin, as he weighs a House speaker bid.

Sources close to Ryan said the Wisconsin Republican is now open to a run for speaker, but does not plan to make a final decision until he talks to more of his Republican colleagues. For weeks, Ryan and his spokesman have said he is not running for speaker.

Members could question Ryan about his plans at a conference meeting this evening. Ryan is not expected to make a final decision on a speaker run tonight, his spokesperson said.

The well-regarded chairman of the House Ways and Means Committee is seen as the consensus candidate to succeed John Boehner and the Republican best positioned to bring the fractured conference together.

Ryan has repeatedly refused to go after the top job in Congress, but began considering a run after House Majority Leader Kevin McCarthy said he would drop his bid to replace Boehner.

"He feels the pull of the country – people encouraging him and saying he'd be a great choice," said Rep. K. Michael

Ribble, R-Wisconsin, who shared a flight home with Ryan last week. "But he also feels the pull of his family, and his passions," he added.

Ryan, who spent the recess at home with his family, has young children at home in Janesville. As speaker, he'd be expected to fundraise for the party, though colleagues have offered to help him shoulder that burden. The promotion could also make it more difficult for him to pursue entitlement and tax reform.

Should he decide to jump in, Ryan would need the support of the 40-odd members of the House Freedom Caucus, who helped force Boehner's retirement and derail McCarthy's speaker bid.

The group has endorsed little-known Rep. Daniel Webster, R-Florida, in the speaker's race – to win Boehner's gavel in a vote on the House floor.

Members of the caucus, who have expressed interest in Ryan running for speaker, want the House and conference run differently.

“Paul has to convince people he's not John Boehner 2.0,”

- ~~South Rep. Mick Mulvaney~~

Freedom Caucus leader. They'd like to see greater representation in leadership – including subcommittee chairmanships and on the steering committee – and more bills on the House floor via committees, among other proposals.

Ryan met with leaders of the group late Tuesday afternoon.

If he decides against a run for speaker, more than a dozen Republicans are ready to launch bids in what would be a free-for-all race.

Congress has to raise the debt ceiling by Nov. 3 or risk a federal government default. Lawmakers also have to pass additional government funding by Dec. 11.

For now, those deadlines remain John Boehner's. The Ohio Republican, who had planned on leaving Congress on Oct. 30, has agreed to stay on until his replacement is selected.

Paul Ryan Open To House Speaker Run, Lawmakers Say

Wisconsin Republican sets conditions for run, says he wants three major caucuses to back him

G.O.P. To Meet With Paul Ryan On House Speaker Post

By Emmarie Huetteman

[New York Times](#), October 21, 2015

WASHINGTON — Representative Paul D. Ryan of Wisconsin agreed Tuesday to meet with some members of the House Freedom Caucus, the hard-line group that helped force the resignation of Speaker John A. Boehner, in advance of a larger meeting of Republicans, potentially ending the suspense about whether he will answer his party's pleas and run for speaker.

Less than two weeks after Representative Kevin McCarthy of California, the majority leader, withdrew his name from consideration, House Republicans returned from a weeklong recess to the reality that they had not found a willing candidate capable of uniting their ranks.

Compounding the pressure to settle on a new speaker is the fact that the country's borrowing authority is set to expire in about two weeks, and a short-term budget measure to avert a government shutdown will run out in less than two months.

While Mr. Boehner, who plans to resign at the end of the month, said he would stay until his successor was named, some members have indicated that they may move to force him out. Without a speaker, House operations would be at a virtual standstill, raising the possibility of an economically and politically perilous default on the nation's debt.

The question of whether Mr. Ryan will run has been the subject of intense speculation in Washington for the past week as lawmakers repaired to their districts. He has insisted that he has no interest in the post, but the surprise decision by Mr. McCarthy, Mr. Boehner's expected successor, put the focus back on Mr. Ryan, the party's 2012 vice-presidential nominee.

Representatives Jason Chaffetz of Utah and Daniel Webster of Florida are also running for the post. Mr. Webster has the endorsement of the most conservative members of the House, who have demanded that the next speaker adjust the chamber's rules to reduce the power of party leaders.

But conservative members like Representatives Raúl R. Labrador of Idaho and Justin Amash of Michigan have said they are willing to meet with Mr. Ryan, who has earned respect across his party as the chairman of the tax-writing Ways and Means Committee.

Ryan Nears Decision On Speaker's Race As Congress Returns

[Washington Post](#), October 20, 2015

Rep. Paul Ryan (R-Wis.) is more open than ever to becoming the next House speaker, following a contemplative week at home with his family. But before he makes a final decision, friends say, he will seek assurance from Republican hard-liners that he will have their full support should he win the gavel.

Those discussions will begin Tuesday evening at the Capitol when House Republicans gather for a closed meeting. It is unclear when Ryan, the 45-year-old chairman of the House Ways and Means Committee and 2012 vice-presidential nominee, will openly discuss his intentions.

At the top of Ryan's list, his associates said, is a desire to lead the House GOP as its spokesman and agenda-setter without the threat of revolt from the right, halting a dynamic that has dominated the tumultuous speakership of John A. Boehner (R-Ohio), who announced last month that he would leave Congress at the end of October. Another aim would be to delegate some of the job's travel and fundraising demands so that Ryan could spend enough time with his wife and school-aged children.

"My only caution is that he should go very slow and make sure that the whole conference is coming to him," said former House speaker Newt Gingrich (R). "Don't underestimate the degree of getting chewed up. We are not like the Democrats right now. They are relatively cohesive.

... We are a movement in enormous ferment, with enormous anger and enormous impatience."

Looming over Ryan's deliberations is a churning frustration among Republicans nationally about the party's ability to oppose President Obama and a presidential primary field led by anti-establishment outsiders who have made common cause with the House GOP's right flank.

Fix managing editor Aaron Blake runs down the top five contenders for House Speaker John Boehner's job now and says why they might—or might not – be the one to win. (Sarah Parnass/The Washington Post)

Those conservative House members have pushed for a suite of rules changes, ranging from an overhaul of the party's internal steering committee to a more open process for considering legislation. Ryan, they say, would not be exempt from those demands, which, if adopted, could give the new speaker less control.

Ryan's allies say his conditions for becoming speaker are likely to include an understanding that he would have a free hand to lead without a constant fear of intraparty reprisals.

"He is more confident that he can put forward conditions that will soothe his convictions and put his mind at ease," said William J. Bennett, a longtime mentor to Ryan who has spoken with him in recent days.

Peter Wehner, a former adviser to President George W. Bush, said Ryan wants House conservatives to make clear that they would not seek to "cripple him" from the start.

"He doesn't have a moral obligation to get Republicans out of the rubble they've created for themselves," Wehner said. "Asking for their goodwill is completely reasonable."

Wehner added that Ryan envisions his possible speakership as one that would be buoyed by his own political capital and shaped by an aggressive Republican policy agenda, rather than one consumed with catering to the whims of tea party backbenchers: "He's got a vision for the party that he can articulate. He knows policy, philosophy, and where the party should go intellectually."

But Rep. Mick Mulvaney (R-S.C.), a member of the hard-line House Freedom Caucus who has expressed measured support for Ryan as speaker, said Ryan could not expect to unify Republicans without making some procedural concessions.

Rep. Paul Ryan (R-Wis.) is being tapped to become the next speaker of the House, even though he doesn't seem to want the job. Who is this guy? (Gillian Brockell/The Washington Post)

"The displeasure with the way the House has been managed since 2011 is pervasive and crosses all sorts of philosophical boundaries within the party," Mulvaney said. "The appetite for a new way of doing business is real, and whoever wants to be the speaker is going to have to speak to that."

Leaving Washington before last week's recess, most lawmakers hailed Ryan as the only candidate who could unite a House Republican majority deeply divided over how to best wield its power. That has been complicated by a week of activist politicking — on talk radio, on conservative web sites, and in town hall meetings — that has sought to cast doubt on Ryan's conservative bona fides.

His purported apostasies include supporting the Troubled Asset Relief Program during the 2008 economic crisis, brokering a spending deal with Democrats in 2013 and — most crucially — being a leading Republican proponent of immigration reform packages that would give illegal immigrants a path to legal status.

"There are people who have sort of bought the narrative that the speaker's race is about trying to get someone who is more conservative, and for those folks Paul is not acceptable," Mulvaney said. "But there are other folks who believe, and this is what I've been telling them, that it's not about people, it's about process."

A new poll released Monday by NBC News and The Wall Street Journal showed strong support for Ryan among Republican primary voters, with 63 percent "comfortable and positive" about Ryan taking over the post. Twenty-eight percent said they would feel "skeptical and uncertain" if he became speaker.

Should Ryan decide not to heed the calls to run, it would set off a free-for-all that has already attracted roughly a dozen potential candidates who have expressed interest in running if Ryan does not.

They range from powerful committee chairmen such as Homeland Security's Michael McCaul and Agriculture's K. Michael Conaway, both of Texas, to Darrell Issa (Calif.), the high-profile former Oversight chairman to up-and-comers such as Marsha Blackburn (Tenn.), who has played a lead role in the GOP's recent fight against Planned Parenthood.

But many Republicans believe — or at least hope — that melee will be avoided as Ryan has shifted from being averse to inclined to succeed Boehner, due to a wave of encouragement from officials and influential conservatives, as well as a sense of duty to his embattled party.

Brendan Buck, Ryan's spokesman, said Monday that Ryan did not yet have anything to announce. "Congressman Ryan spent the weekend at home with his family. There is no update, and he looks forward to listening to and speaking with his colleagues this week," Buck said in a statement.

House Republicans will convene Tuesday in the Capitol basement for a conference meeting focused on the "October agenda." According to a GOP memo, dinner will be served and staffers will not be allowed in the room. They will meet again Wednesday morning.

Rep. Steve King (R-Iowa), a conservative who is backing longshot speaker candidate Rep. Daniel Webster (R-Fla.), sighed Monday when he heard about the previously unscheduled session, and said it signaled that the leadership was ready to get behind one of their own.

"This indicates they are at least close to presenting a successor to the conference, in an attempt to get momentum for that person," King said. "There is an effort out there to talk Ryan out of stepping up, but he may be ready to present himself."

Gingrich said that if Ryan does decide to seek the speaker's gavel, he will learn quickly — and encounter early problems.

"It'll take him about six weeks to go from being a policy guy to a process guy and he'll be very good at it. But it's a different world with a different set of rules. That's what he has to think through: Is that really a world he wants to be in the middle of? Is he willing to endure the scarring?"

Correction: An earlier version of this story said Rep. Steve King (R-Iowa) is a member of the Freedom Caucus, which he is not.

Rep. Ryan Lays Out Conditions For Seeking Speaker's Job

By Richard Cowan

Ryan Tells GOP He'll Run For Speaker — With Conditions

By Scott Wong

[The Hill](#), October 20, 2015

Rep. Paul Ryan (R-Wis.) told the House GOP conference that he will run for Speaker if every caucus endorses him, according to lawmakers in the room.

Ryan made the pledge during a presentation behind closed-doors in which he outlined how he could be convinced to run for the chamber's top job.

He also gave the House GOP until Friday to rally around him.

Ryan told his GOP colleagues: "I know this sounds conditional, because it is," according to a source in the room.

A spokesman for Ryan immediately after the meeting said Ryan will only run if his colleagues accept his as a "unity candidate" who is backed by centrists and conservatives in the House.

"Unless the speaker is a unifying figure across the conference, he or she will face the same challenges that have beset our current leadership," spokesman Brendan Buck said.

He said Ryan "encouraged the members to discuss and consider his requests, and he asked that they make clear whether they support them by this Friday."

"If the members agree with his requests and share his vision, and if he is a unity candidate—with the endorsement of all the conference's major caucuses—then he will serve as speaker. He will be all in," Buck said. "But if he is not a unifying figure for the conference, then he will not run and will be happy to continue serving as chairman of the Ways and Means Committee."

The spokesman insisted Ryan's comments did not announce a final decision on a run for the Speakership, but Ryan's views on what it would take for the next Speaker to be successful.

The Ways and Means Committee chairman has been under pressure to run for Speaker for more than a week after the surprise decision by House Majority Leader Kevin McCarthy (R-Calif.) to bow out of the race to succeed Speaker John Boehner (R-Ohio).

After Ryan spoke with his conference, there were some signs of members rallying around him.

House Oversight Committee Chairman Jason Chaffetz (R-Utah), who had launched a bid for the Speakership against McCarthy, said he would end his pursuit given Ryan's willingness to serve.

"I'm out, and all in for Paul Ryan," Chaffetz said.

Rep. Charlie Dent (R-Pa.), who chairs the centrist Tuesday Group, indicated he and other centrists could endorse Ryan following a discussion amongst themselves this week.

"I could very easily support Paul Ryan," Dent said.

But Rep. Matt Salmon (R-Ariz.), a founding member of the conservative House Freedom Caucus, said he wasn't sure if he could back Ryan.

Rep. Paul Ryan Will Run For House Speaker If GOP Factions Endorse Him

By Paul Singer

[USA Today](#), October 21, 2015

House Ways and Means Chairman Paul Ryan indicated Tuesday that he would "be all in" to run for speaker of the House – provided that he gets endorsement of all GOP factions.

The conditional decision still leaves some doubt as to whether Ryan, who is widely respected among House Republicans, will succeed Speaker John Boehner, R-Ohio, when he steps down at the end of the month.

"If the members agree with (Ryan's) requests and share his vision, and if he is a unity candidate — with the endorsement of all the conference's major caucuses — then he will serve as speaker. He will be all in," said Brendan Buck, the communications director for the House Ways and Means Committee, which Ryan chairs.

Buck said that Ryan expects to hear back by Friday from GOP members on whether they support his candidacy as a "unifying figure."

Ryan "believes that for the next speaker to be successful, we need to unify now. Unless the speaker is a unifying figure across the conference, he or she will face the same challenges that have beset our current leadership," Buck said.

Boehner is stepping down in part because a group of about 40 House conservatives threatened to call a no-confidence vote on his speakership. While Boehner said he was certain he would win the vote, he instead announced he would retire at the end of October, to spare his members having to cast that difficult vote.

House Majority Leader Kevin McCarthy, R-Calif., was heavily favored to succeed Boehner, but he withdrew Oct. 8 when it became clear that the conservative wing — represented by the House Freedom Caucus — would not support him.

The full House votes for the speaker, so the Republican nominee would need the votes of 218 members to be elected. There are 247 House Republicans, but 30 dissenters could have been enough to deny McCarthy the gavel.

The Freedom Caucus has said that before they will support anyone for speaker, they want reforms to House rules that will give them the opportunity to offer more amendments, get more conservative bills on the floor and restore the independence of committee chairmen — changes that would significantly weaken the authority of the new speaker.

Ryan, the 2012 Republican vice presidential nominee, had repeatedly said he didn't want the job when Boehner announced his resignation and when McCarthy decided not to seek the position.

More coverage of House leadership news:

Paul Ryan Says He Will Run For House Speaker If Party Unites Behind Him By Friday

By Lisa Mascaró

[Los Angeles Times](#), October 21, 2015

Rep. Paul Ryan (R-Wis.) told his anxious colleagues Tuesday night that he would agree to run for speaker of the House, but only if the party united behind him by Friday, according to lawmakers and Ryan's aides.

The statement could bring a possible resolution to the GOP leadership struggle that has threatened to further divide the party, but it remains unclear whether conservatives will support him.

House Republicans have been in a stalemate after Speaker John A. Boehner announced he would step down and a conservative faction led by the House Freedom Caucus blocked the rise of Majority Leader Kevin McCarthy of California.

Ryan, a former vice presidential nominee, is considered the Republican Party's best hope for uniting its divided House majority. But he had expressed reluctance at taking the difficult job without unanimous support.

House Republicans returned to Washington late Tuesday evening and almost immediately gathered behind closed doors in the Capitol basement to assess the situation after a recess week away.

At that meeting, Ryan said he would be "willing to serve" if the three main GOP caucuses unite around him. He also had other conditions, including that he not be required to travel as much as Boehner had so Ryan could spend time with his family

"Chairman Ryan encouraged the members to discuss and consider his requests, and he asked that they make clear whether they support them by this Friday," according to a statement by Brendan Buck, a Ryan spokesman. "If the members agree with his requests and share his vision, and if he is a unity candidate — with the endorsement of all the conference's major caucuses — then he will serve as speaker. He will be all in."

"We have white smoke," said Rep. Steve Womack (R-Ark.) as he left the closed meeting.

"He really laid out a vision... selling conservatism," said Rep. Marlin Stutzman (R-Ind.) a member of the House Freedom Caucus. Stutzman had previously backed another candidate for speaker but said he was impressed by Ryan's approach. "Paul Ryan was very clear it's going to be all or nothing."

For more than a week, Ryan had been in a political standoff with the House Freedom Caucus, a core block of conservatives who wanted changes to House rules in exchange for their support.

The caucus has enough votes to block Ryan from reaching the speaker's gavel. But he has refused to yield to its demands to loosen control over legislative proceedings.

The leadership drama has taken a toll on Americans' views of the GOP majority in Congress, according to new polling.

Six in 10 Americans see the leadership battle as a "sign of dysfunction" among House Republicans, and 29% see it as a "healthy debate," according to an ABC News/Washington Post poll. Among Republicans, more than 40% view it as a sign of dysfunction.

The leadership struggle has stymied the fall agenda and is complicating the next must-pass item: legislation to raise the federal debt limit to continue paying the nation's bills and avoid a credit default. The Treasury Department has set a Nov. 3 deadline.

Senate Majority Leader Mitch McConnell (R-Ky.) sought to shield his chamber from the disarray across the Capitol, suggesting that Senate Republicans remain focused on a "right-of-center agenda" even with the partisan divide posed by a Democratic president in the White House.

"You have to deal with the government you have," McConnell said. "We're here in the Senate to do serious things for the American people."

Ryan, the Wisconsin Republican, received a partial endorsement Tuesday from one unlikely source, Sen. Harry Reid (D-Nev.), the minority leader, but such a nod might hurt more than it helps.

"He appears to be one of the few people over there who would be reasonable," Reid said. "I mean look at some of the other people."

Reid added that he's no fan of Ryan's ideology or his proposals for cutting Medicare and other safety net programs, and shrugged when asked if his backing could doom Ryan's candidacy.

"I speak the truth," Reid said. "If it helps him, fine. If it doesn't, too bad."

Boehner, who had hoped to retire Oct. 30 from representing his Ohio district, has said he would remain in office until a new speaker is chosen.

Ryan Willing To Run For U.S. House Speaker As 'Unity' Candidate

By Terrence Dopp

[Bloomberg Politics](#), October 20, 2015

Representative Paul Ryan said he'd be willing to run for speaker of the U.S. House if Republicans unify behind him now, end leadership crises and let him continue spending time with his family.

"If you can agree to these requests and if I can truly be a unifying figure, then I will gladly serve," Ryan, 45, of Wisconsin said Tuesday he told fellow House Republicans in a closed-door meeting. "This is not a job I've ever wanted," he told reporters, but added that he "came to the conclusion that this is a very dire moment."

Ryan said he wants an answer from fellow Republicans by the end of the week. "It's in their hands," he said.

Representative Greg Walden, an Oregon Republican, said Ryan told fellow Republicans he wanted to change the process for dissatisfied lawmakers to remove the speaker. "The question is whether the conference is willing to unify behind him," said Walden.

"He said he's willing to take arrows in the chest," said Representative Peter King of New York, "but not in the back."

House Speaker John Boehner plans to announce a date Wednesday for Republicans' vote to nominate a speaker candidate, said Representative Tom Cole of Oklahoma.

Representative Charlie Dent of Pennsylvania said Ryan wants backing from three groups of House Republicans – the centrist Tuesday Group, the conservative Republican Study Committee and the more hard-line Freedom Caucus.

Ryan's stance, after a week of pondering fellow Republicans' pleas to run, leaves the House leadership unresolved just two weeks before the Nov. 3 deadline to raise the U.S. debt limit. The House Freedom Caucus drove Boehner to resign and his top

lieutenant to quit the race to succeed him. At least two members of that group said Tuesday they wouldn't commit to supporting Ryan.

House Republicans have been in chaos over the speaker's position – second in line to the presidency – as Congress nears the Nov. 3 deadline to raise the U.S. debt limit or risk default. Lawmakers also need to replenish the federal highway fund by Oct. 29. Then they must resolve disputes over federal spending by Dec. 11 or risk a government shutdown, something Boehner couldn't head off in 2013.

Ryan is viewed by many as a unifying force after negotiating a two-year budget deal with Democrats in 2013. Boehner implored him to run for speaker, as did Mitt Romney, who chose Ryan as his vice presidential nominee in 2012. Still, some members of the Freedom Caucus have said he is too willing to compromise.

A number of Republicans began pressuring Ryan to seek the job after Majority Leader Kevin McCarthy's stunning Oct. 8 withdrawal from the race to succeed Boehner. Ryan, 45, of Wisconsin is chairman of the House Ways and Means Committee and the party's 2012 vice presidential nominee.

Ryan had been deeply resistant to the idea of seeking the speaker's job, people who have spoken to him said, and his staff repeatedly said he didn't want the post. He said he didn't want to spend weekends away from his family for the extensive travel and fundraising that have been a major part of the House speaker's job.

The Boehner for Speaker political action committee raised \$35.38 million during the 2014 campaign in a grueling night-and-weekend pace that took him from Florida to Alaska. Almost all of the money was passed on to other House candidates. Boehner has already traveled to more than 100 events this year, according to his fundraising operation.

Tax Overhaul
Ryan also has longed to pursue a comprehensive tax-overhaul bill as Ways and Means chairman.

Known to be interested in running for president, Ryan has spurned past attempts to lure him to the speakership because it's viewed as a political dead end. James K. Polk is the only House speaker ever to ascend to the presidency, and that was 170 years ago.

According to House procedure, Republicans would choose their speaker nominee at a closed-door meeting. Then the full House would schedule a vote, with almost all Democrats expected to support Minority Leader Nancy Pelosi of California. The winner must be backed by a majority of those who vote; lawmakers who designate themselves as "present" wouldn't count.

Members of the Freedom Caucus – a group of almost 40 conservatives whose resistance to Boehner and McCarthy helped push them out – have said that Ryan would have to work for their votes.

A group of Freedom Caucus members met with Ryan Tuesday, and afterward caucus leader Justin Amash of Michigan said afterward the group still supports its candidate for speaker, Representative Daniel Webster of Florida.

Another caucus member, Mo Brooks of Alabama, said he wouldn't commit to support Ryan and wanted to hear from constituents. He said he was concerned about Ryan's stance on immigration.

Harry Reid
While House Democrats have said they would stay out of the Republican leadership battle, Senate Minority Leader Harry Reid, a Nevada Democrat, said he hoped Ryan would become speaker.

"He appears to me to be one of the people over there that would be reasonable," Reid told reporters. "Of all those people I hope he gets it."

Even as Ryan has pursued many Republican goals – including cutting business tax rates, repealing the estate tax and replacing Obamacare – he also has supported allowing 11 million undocumented immigrants to eventually become U.S. citizens, a stance strongly opposed by most House Republicans.

Freedom Caucus members chose Webster as their candidate for speaker on Oct. 7, and the following day McCarthy dropped out of the race saying he wasn't the right person to unite the Republican members.

Boehner of Ohio announced Sept. 25 that he would leave Congress by the end of October, following years of clashes with conservatives who most recently threatened to shut down the government in an effort to defund Planned Parenthood. After McCarthy dropped out of the race, Boehner said he would stay on until a new speaker is chosen.

Paul Ryan Says He Would Serve As House Speaker

By Craig Gilbert

[Milwaukee Journal Sentinel](#), October 21, 2015

Washington — Emerging from days of silence, Wisconsin Republican Paul Ryan said Tuesday he would serve as House speaker if his GOP colleagues unite behind him.

To colleagues pleading with him to run and spare the party an ongoing leadership crisis, Ryan offered a "conditional" yes, saying he would accept the job on his own terms.

At a news conference Tuesday night, Ryan said once more that he has never wanted to be speaker and would serve with reluctance.

He also said he felt an obligation to step up.

"This is not a job I've ever wanted or ever sought. I'm in the job I've always wanted here in the Congress," he said, referring to his chairmanship of the powerful Ways and Means committee. "I came to the conclusion that this is a very dire moment, not just for Congress, not just for the Republican Party, but for our country."

Ryan said he laid out to his colleagues the conditions under which he would serve. Among them, that the party take steps to avoid "constant leadership challenges and crises," that the conference "unify now and not after a divisive speaker's election" and that "I cannot and will not give up my family time."

Speaking to GOP colleagues behind closed doors earlier Tuesday evening, Ryan said he would need the backing of all the major factions within the Republican caucus, including the conservative Freedom Caucus that set the party's leadership crisis into motion.

With Ryan demanding a clear mandate from his party, the big question remaining is whether the 40-member Freedom Caucus agrees to support him without making demands of their own.

Ryan said he would make a final decision by Friday.

"What I told members is if you can agree to these requests and if I can truly be a unifying figure, than I will gladly serve. And if I'm not unifying, that will be fine as well. I will be happy to stay where I am at the Ways and Means committee," Ryan told reporters. "I have left this decision in their hands."

Wisconsin colleague Jim Sensenbrenner (R-Wis.) described Ryan's remarks to GOP colleagues Tuesday as a "plea for unity."

Said Sensenbrenner: "He called on everybody to give something from where they've been in the past."

At his news conference, Ryan combined an appeal to conservative principles with a call for less political feuding and finger pointing.

"Now more than ever we must work together. All of us are representatives of the people — all people. And yet the people we serve, they do not feel we are delivering on the job that they hired us to do. We have become the problem. ... I want us to become the solution," he said. "Nothing is ever solved by blaming people. We can blame the president, we can blame the media ... we can point figures across the aisle, we can blame each other and we can dismiss our critics and criticism as unfair. People don't care about blame. People don't care about effort. People care about results."

The Ways and Means chairmanship is a career-long ambition of Ryan's that he realized less than a year ago, and a platform for his policy dreams of overhauling the tax code and federal entitlements.

"It's why I've passed on Senate races and other things (like) leadership. I always believed the chairmanship of Ways and Means was the right place for me," Ryan told the Journal Sentinel in January when he announced his decision not to run for president in 2016. "Now that I have it, I'm very happy with where I am."

Besides his own reluctance, another major hurdle for Ryan's speakership is an organized minority of conservatives in the House — known as the Freedom Caucus. That group wants concessions from the next speaker over rules and procedures that would give it more say.

An analysis by the Pew Research Center of 36 members of the Freedom Caucus found they are not only more conservative but less experienced than House Republicans as a whole; more than 70% entered office since the 2010 elections.

Leaders of the Freedom Caucus have said they're open to a Ryan speakership but won't renounce a list of demands that may be unacceptable to Ryan.

House Republicans, meanwhile, face a series of potentially divisive battles this fall over raising the debt ceiling, funding the government and the future of the Export-Import Bank.

In a national poll of GOP primary voters released Monday by NBC News and The Wall Street Journal, 63% said they'd be "comfortable and positive" about a Ryan speakership, while 28% said they would be "skeptical and uncertain."

Ryan Will Serve As Speaker If GOP Unites Behind Him

By Jake Sherman , John Bresnahan And Lauren French

[Politico](#), October 20, 2015

Wisconsin Rep. Paul Ryan, who for years has resisted a move into House Republican leadership, said Tuesday night he would serve as House speaker if he is the party's "unity candidate."

And Ryan, the Ways and Means chairman, wants to know by Friday if the 247 members of the House Republican Conference support him. If not, he is "happy" to continue as chairman of the powerful tax-writing panel, his spokesman said.

During a meeting of House Republicans Tuesday evening, Speaker John Boehner (R-Ohio), who counted Ryan as a volunteer on his 1990 congressional campaign, ceded the floor to Ryan. The 16-year veteran of Congress explained that his openness to serving as House speaker comes with serious caveats.

Ryan explained during the closed-door gathering that he wants support from all the major Republican caucuses. The House Freedom Caucus, the Republican Study Committee and the moderate Tuesday Group will be especially important.

Ryan also wants Republicans to alter the procedure for “vacating the chair,” which is essentially a referendum to remove the speaker from office. Conservatives threatened to force such a vote against Boehner earlier this summer, and Ryan believes it’s destructive.

The Wisconsin Republican is calling on the next speaker to be more visionary. He agreed with House Freedom Caucus members and a large bloc of the GOP in supporting changes to rules and procedures to empower rank-and-file members. But he said those decisions must be made together. Ryan also told his colleagues that he needs to be at home in Janesville, Wisconsin, with his family, so fundraising cannot be all consuming.

“I don’t know of anyone better to do it,” said Rep. Jason Chaffetz of Utah, who dropped his long-shot bid for the speakership when Ryan announced. “I think he wants to get as unified a group as possible, so that’s obviously a big question. He wanted to talk to all the various caucuses and groups. ...and I’m excited. He would be wonderful, fantastic as a speaker. I think the smart path for us is to unify behind Paul Ryan.”

The move could put major pressure on the Freedom Caucus, which endorsed Rep. Daniel Webster (R-Fla.) before House Majority Leader Kevin McCarthy (R-Calif.) dropped his bid. Members of the Republican Study Committee and Tuesday Group have already showered praise on Ryan, but members of the Freedom Caucus aren’t quite ready yet to endorse him.

Ryan met with four of the group’s leaders today: Ohio Rep. Jim Jordan, South Carolina Rep. Mick Mulvaney, Idaho Rep. Raul Labrador and North Carolina Rep. Mark Meadows.

Rep. Matt Salmon (R-Ariz.), a Freedom Caucus member, said Ryan made “some very reasonable observations about how anybody would need the support of the entire conference if they are going to be a successful speaker.” Salmon said he wasn’t supporting him yet, but is “certainly open.”

“All things are possible,” Salmon said. “I think the issue of process reforms are going to have to be addressed one way or another before the Freedom Caucus wholesale jumps in bed with him.”

Boehner resigned late last month and is set to leave Congress on Oct. 30, though he’s agreed to stay on until a new speaker is chosen.

Ryan Willing To Serve As Speaker, But With Conditions

By Manu Raju, Deirdre Walsh, Ted Barrett And Tal Kopan

[CNN](#), October 21, 2015

Washington (CNN)Rep. Paul Ryan told House Republicans he is willing to serve as speaker and will make a decision within the week.

But he’ll run only if he’s supported by three groups inside the House Republican conference: the House Freedom Caucus, the Republican Study Committee and the moderate Tuesday Group, his spokesman, Brendan Buck, confirmed.

Ryan also had a few more demands: He wants changes to House rules made as a team; he wants to make it harder to overthrow a sitting speaker; and he wants a better work-life balance than Boehner had as a prolific fundraiser.

“If the members agree with his requests and share his vision, and if he is a unity candidate – with the endorsement of all the conference’s major caucuses – then he will serve as speaker. He will be all in,” Buck said.

Ryan spent the day engaging in a flurry of back-channel conversations with GOP lawmakers as an anxious Republican Party eagerly awaits his decision. He discussed the possibility of seeking the speakership on the phone with fellow lawmakers and met with members of the House Freedom Caucus and the Southern Caucus. Ryan addressed his deliberations with the full GOP conference during a closed-door dinner.

Ryan was expected to address reporters Tuesday night from the House Gallery. Earlier Tuesday, he played coy with reporters, telling them he has “nothing to add.”

“Anybody who wants to meet with me, I’m going to do that,” Ryan said.

It was all part of a strategic effort to show that he was not running for speaker – but was open to being drafted, his allies said.

Outgoing House Speaker John Boehner expressed confidence on Fox News’ “Special Report” that Ryan would announce his decision later Tuesday night and will set a new date for leadership elections in the next few days.

“I hope he does decide to run, and if he does, I think he’ll be elected,” Boehner said.

Asked about Boehner’s comments, Buck said the GOP’s 2012 vice presidential nominee was unlikely to make a decision Tuesday evening. If Ryan passes on the job, Republicans are growing nervous that there is no one else who could unite a fractured party.

"It worries me a lot," Sen. John McCain, R-Arizona, told CNN. "Because a leaderless House of Representatives is not something that is conducive to legislative successes – and it diminishes us even more in the esteem of the American people."

Returning to his office from the airport, Ryan was mum on what he would do.

"Good to see you," he told reporters waiting outside his office. But on both sides of the Capitol, the prospects of a Ryan speakership began to dominate the conversation – particularly as congressional leaders struggle to reach a fiscal deal by a critical November 3 deadline.

'Let the House work its will'

Conservatives in the House Freedom Caucus are signaling that Ryan will need to work to get its support, something the Wisconsin Republican has shown little interest in doing.

The caucus tweeted Tuesday night that "The next speaker must follow House rules and commit to an open process for debating and amending legislation. Let the House work its will."

"I have concerns with anybody who is not going to give us a reform agenda," said Rep. Raul Labrador, R-Idaho. "If anybody thinks we are just going to get behind somebody just because they have a national name, they are sadly mistaken."

Ryan met in his committee's offices with conservative members for about 45 minutes. Rep. Justin Amash, a leader of the conservative group, said it was an "informal" gathering and not an extensive discussion. And Rep. Mark Meadows of North Carolina said they discussed "party unity" and how the caucus could get behind him. Meadows said he'd "bet (Ryan) throws his hat in the ring."

But Kansas Rep. Tim Huelskamp said the caucus was still supporting Rep. Daniel Webster, who reiterated on Tuesday he would run for the speakership regardless of what Ryan decides.

"We can't have just another John Boehner 2.0," Huelskamp said.

Ryan did, however, pick up an unlikely supporter Tuesday in Senate Minority Leader Harry Reid, D-Nevada, who said a Ryan speakership would improve prospects over raising the debt ceiling.

"Well he appears to me to be one of the people over there that would be reasonable," Reid said. "I mean, look at some of the other people. I'm a Paul Ryan fan."

Asked about Reid's endorsement by reporters later, Ryan simply laughed.

Senate GOP leaders said that Ryan's deliberations had put their decisions on how to move forward on debt limit talks on hold – and that the House GOP needed to figure out its leadership dilemma within the next 24 hours in order to help come to some kind of consensus on debt talks.

"It will probably become more clear when the House determines who the leader is going to be over there," said Sen. John Thune, R-South Dakota, when asked about the next steps on the fiscal matters.

If Ryan passes on a bid, upwards of a dozen potential candidates could run for the speakership, something that could take weeks to sort out and presumably leave Boehner in the speaker's chair past his plans to resign on October 30.

To right their ship after a rocky few weeks following Boehner's resignation announcement, Republicans have scheduled three meetings in two days where they will talk about the way forward – including one to discuss imposing new party rules to give more power to junior lawmakers.

The Ryan Stakes

He can lead, but will enough Republicans follow?

Ryan To Meet With House Hard-Liners As He Weighs Run For Speaker

[Bloomberg Politics](#), October 20, 2015

Representative Paul Ryan is set to meet with a group of House conservatives Tuesday as he weighs a potential run to replace Speaker John Boehner under pressure from fellow Republicans.

The Wisconsin Republican will get together with the House Freedom Caucus, a group of almost 40 hard-liners whose opposition to Boehner drove him to announce that he would give up the speakership and leave Congress. Ryan, Boehner and all House Republicans will then meet behind closed doors later Tuesday evening to discuss plans for the coming weeks.

Ryan spokesman Brendan Buck said the lawmaker plans to meet with members of the Freedom Caucus at their request. Ryan is "always willing to talk with his colleagues," the spokesman said.

The turmoil over leadership has left the Republican majority without a fiscal strategy two weeks before a Nov. 3 deadline to raise the federal debt limit. Lawmakers also need to replenish the federal highway fund by Oct. 29. Then they must resolve

disputes over federal spending by Dec. 11 or risk a government shutdown, something Boehner couldn't head off in 2013. Ryan Reluctance

There was no immediate comment from Freedom Caucus leaders. The group also played a big role in the decision by Boehner's top lieutenant, Majority Leader Kevin McCarthy of California, to drop out of consideration for speaker. Freedom Caucus members chose Representative Daniel Webster of Florida as their candidate on Oct. 7. The following day, McCarthy dropped out of the race saying the conference needed to find a candidate who could unify the party.

Buck said in an e-mailed statement that he didn't expect Ryan to announce on Tuesday whether he will seek the speaker's job. Ryan, the chairman of the House Ways and Means Committee, initially said he didn't want to run for speaker but has been urged by many fellow Republicans to reconsider.

Buck said that if Ryan is asked to speak during the Republican conference meeting, "I imagine he'd share his thoughts."

Harry Reid Hopes Paul Ryan Becomes House Speaker

[Huffington Post](#), October 20, 2015

WASHINGTON – Senate Minority Leader Harry Reid (D-Nev.) says if he had his way, he'd pick Rep. Paul Ryan (R-Wis.) to be the next speaker of the House.

"I'm a Paul Ryan fan," Reid told reporters.

"He appears to be one of the people over there that could be reasonable. I mean, look at some of the other people," the minority leader continued. "I don't agree with him on much of what he does. I think what he's done with Medicare and Medicaid, what he wants to do with it, I disagree with. But generally speaking, I think we've been able to work with him."

House Republicans have been scrambling to find someone to be their next speaker after Majority Leader Kevin McCarthy (R-Calif.) abruptly quit the race earlier this month. A few Republicans have thrown their names into the mix, but they've been drowned out by a groundswell of support for Ryan, who is widely respected in his conference and seen as someone willing to work with Democrats. So far, he's said he's not interested, but given the pressure from GOP leadership and others desperate for someone who can unify the party, people are watching to see whether he changes his mind this week.

Current Speaker John Boehner (R-Ohio) is leaving Congress as soon as Republicans find his replacement.

Reid praised Ryan's past work with Sen. Patty Murray (D-Wash.) to hash out a budget deal in 2013. He said Ryan, who chairs the Ways and Means Committee, could also be key to ensuring that Congress raises the debt limit before Nov. 3, at which point the nation will default on its debt if lawmakers don't act.

Reid's endorsement wouldn't exactly help Ryan if he decides to run and needs support among GOP conservatives. Asked whether he realized his comments could work against Ryan, the Nevada Democrat shrugged.

"I speak the truth," he said.

"If it helps him, fine. If it doesn't, too bad."

What's In Store For Federal Pay And Benefits If Ryan Becomes Speaker? A Likely Hit.

By Joe Davidson

[Washington Post](#), October 21, 2015

As the "will he, won't he" game swirls around Rep. Paul Ryan's decision to be or not to be speaker of the House, one question looms for the federal worker — what does it mean for me?

The answer – a potential hit on your pocketbook.

Unlike so much of what passes for news in Washington, this isn't just speculation. Ryan, a Wisconsin Republican, left an unambiguous record during his four years as chairman of the House Budget Committee.

During that tenure, which ended in January, Ryan led the House in approving legislation that would effectively cut federal employees' pay by forcing them to contribute more toward pensions with no increase in benefits, kill a retirement program for certain government staffers and eliminate student loan reimbursements. In his budget plans for fiscal years 2012 and 2013, Ryan pushed for even longer federal pay freezes than the three-year basic pay freeze initiated by President Obama. Additionally, Ryan repeatedly sought to reduce the number of federal employees through attrition. Feds were saved when many of his proposals were not adopted by the Senate, then controlled by Democrats.

Ryan's votes have earned him failing grades on voting scorecards tabulated by federal employee organizations. In recent tallies, the American Federation of Government Employees scored him zero for failing to agree with the organization's legislative positions a single time. He did a little better with the National Treasury Employees Union, 10 percent, and the National Active and Retired Federal Employees Association (NARFE) with 15 percent.

"Ryan demonstrated a belief that government is the cause of all the woes in this country," said William R. Dougan, president of the National Federation of Federal Employees.

Ryan's fiscal year 2015 budget resolution, nicknamed "The Path to Prosperity" like his other plans, says, "Washington owes the American people a responsible, balanced budget." But prosperity is not what feds would get. To the contrary, Ryan's path would lead to much thinner wallets for these employees.

Federal pay still would be frozen if a provision in Ryan's FY 2012 budget had been enacted. It proposed freezing pay for five years, saying that would "boost private-sector employment by slowing the explosive growth of the public sector."

His FY 2015 plan proposed to "increase the share of federal retirement benefits funded by the employee. This policy has the effect of reducing the personnel costs for the employing agency." But it would have increased costs to the personnel by an estimated 5.5 percentage points of their salaries. Employees would pay more, but get no more. That would amount to an effective pay cut.

[House approves budget that would save money by taking from federal workers]

Rep. Chris Van Hollen (Md.), who sat next to Ryan as the top Democrat on the Budget Committee, at the time called this "a straight-out 5 percent pay cut."

While couched in the language of "reform," House Republicans under Ryan would have ended a supplemental benefit for workers in the Federal Employee Retirement System who retired before age 62, when their Social Security eligibility begins. Ryan favors placing new feds in a "defined-contribution" retirement system, which puts greater onus on employees than a "define benefit" system. These moves would save the government \$125 billion over 10 years, says his fiscal year 2015 plan. Left unsaid, that money would be a cost, not a savings, to federal workers.

Budget committee Democrats pushed back with an analysis that placed the cuts in a broader context. "After successive pay-freezes, pay reductions and benefit cuts amounting to almost \$140 billion, no one group has been asked to contribute more to deficit reduction than federal employees," the report said.

Looking for another way to save Uncle Sam money, Ryan also proposed ditching the student loan reimbursement federal agencies offer their staffers.

[More federal employees getting help from Uncle Sam to pay off college debt]

Almost 8,500 federal employees surely must be glad that proposal had not taken effect in calendar 2014 when they received \$58.7 million in student loan repayments. That's an average of \$6,905 per worker. Despite Ryan's wishes, the repayment program is growing. Compared to 2013, the number of employees getting this benefit increased by 15 percent in 2014 and the amount reimbursed rose by 11 percent, according to a recent Office of Personnel Management report.

"Several Federal agencies utilized student loan repayments to recruit and retain employees in Federal Science, Technology, Engineering, and Mathematics (STEM) positions..." Beth Cobert, the acting OPM director, wrote in the report. "Notably, the Department of Defense provided student loan repayments to over 550 engineers...Employees in STEM career fields are vital to the Federal Government's mission, and OPM is committed to continue working with agencies to help them attract and retain talented professionals using student loan repayments and other human resources management flexibilities."

There might have been fewer talented employees across the federal service if Ryan's plan to reduce the workforce through attrition and proposals to cut pay and benefits had become law. Ryan, working with a Senate now controlled by Republicans, would have an even greater pulpit to proselytize his Path to Prosperity as speaker.

Jessica Klement, NARFE's legislative director, is not certain what a Speaker Ryan would mean for the federal workforce. But "based on his voting record," she said, "I'm not optimistic."

EDITORIAL WRAP-UP

Paying for egg donations

By The Editorial Board

[New York Times](#), October 21, 2015

Should a woman who donates eggs to help people with fertility problems conceive a child be able to charge as much as she can get in a free-market transaction? Or are there ethical reasons to limit her reimbursement?

That is the issue raised in a federal lawsuit that accuses two professional societies and the fertility clinics associated with them of illegal price-fixing that limits donor compensation. A federal judge in northern California has ruled that the claim can move forward and certified it as a class action, which could go to trial next year.

Guidelines issued by the American Society for Reproductive Medicine and the Society for Assisted Reproductive Technology suggest that paying a woman more than \$10,000 for her eggs is "beyond what is appropriate" and even paying \$5,000 or more requires "justification."

A vast majority of the nation's fertility clinics follow these the guidelines. The stated rationale behind them is to avoid offering so much money that donors, especially those who are often young and poor, will rush to contribute their eggs without considering the risks.

This payment system is unfair. However well-intentioned, it favors the fertility clinics, which can keep more for themselves if they pay donors less, as well as the women who pay for fertility treatments. Meanwhile, it shortchanges the egg donors, whose wishes are ignored in the equation. And if there are indeed risks, they can be addressed and mitigated by the clinics and the doctors, who can strengthen their screening and counseling procedures and provide more information.

The money that donors get is meant to compensate them for physical and psychological tests; weeks of hormone injections to stimulate egg production; frequent tests and ultrasound examinations to track the developing eggs; repeated visits to the doctor, and minor surgery to remove the eggs when they are ready for retrieval.

First-time donors in California, New York and Chicago are paid \$4,000 to \$7,000, according to lawyers, donors and agencies. In medically expensive New York City, major hospitals and clinics pay \$8,000. The amount can rise significantly for repeat donors whose first set of eggs led to a birth. All bets are off at some high-end clinics that pay particularly attractive donors, such as actresses, models, or high-scoring Ivy League students, tens of thousands of dollars or, in rare cases, even in the six-figure range.

The very existence of these high-end payments suggests that the guidelines are something of a sham. The women who brought the suit say they were underpaid for their donations; they seek triple damages, to be determined later. The question of damages aside, there is merit to their argument that they have been denied a rightful say in the transaction.

A Middle-Class Oasis In New York Is Spared

By The Editorial Board

[New York Times](#), October 21, 2015

The extinction of middle-class New York, which has long been predicted but never quite arrived, has just been put off a little longer. Mayor Bill de Blasio's administration has struck an impressive deal to save Stuyvesant Town-Peter Cooper Village, the 80-acre complex that has long been a bastion of affordable housing on the East Side of Manhattan.

About half of it, anyway. The administration announced Tuesday that Stuyvesant Town, owned by CW Capital, was being sold to a Wall Street investment firm, the Blackstone Group, for \$5.3 billion, and that the buyer had agreed to keep 5,000 of the complex's 11,232 rental apartments affordable to middle-class families for 20 years.

Stuyvesant Town is a colossal property, a city-within-a-city that was built for World War II veterans, and it has been an oasis of stability and affordability for 65 years. But the oasis has been drying up. The complex, Manhattan's largest, has been losing 300 to 350 rent-regulated apartments every year, as tenants have died or moved away and management has raised rents for newcomers. Mr. de Blasio, who has staked his mayoralty on building or saving 200,000 units of affordable housing in a decade, could hardly achieve victory in that campaign while losing Stuyvesant Town.

The Blackstone deal represents Deputy Mayor Alicia Glen's effort to stop the affordability erosion. For a relatively modest price — the city is waiving \$77 million in mortgage recording taxes and giving Blackstone a \$144 million low-interest loan — all 5,000 apartments that have not yet been lost to ballooning market rates will remain in reach for middle-class families.

The praise for this deal rests on some assumptions. Mainly, a somewhat generous definition of "affordable." As Charles Bagli explained in *The Times*, a family of three making up to \$128,210 a year would pay \$3,205 a month for a two-bedroom apartment. For 500 of the apartments, rents would be lower: about \$1,553 for a two-bedroom for a family of three earning up to \$62,150 a year. This is not low-income housing, for sure. But these rents would allow a two-income couple — a teacher and a city worker, say — to afford an apartment in Manhattan bigger than a tanning bed.

Mr. de Blasio has always said that "affordable housing" should cover a wide range of incomes. He has been criticized by those who say he should focus most intently on helping the poor and working class. But it takes many strata to make a mountain, and New York's affordability crisis weighs heavily on pretty much everybody who is not in the top 1 percent.

Another, more pressing concern is the time frame — 20 years can be like the blink of an eye in the life of a family. Permanency is the greatest challenge and pitfall of affordable-housing schemes: tax breaks lapse; people move out and in; the rent always pushes upward. The Blackstone plan kicks the can down the road and around the corner a ways; it's hard to know how or whether it might go sour, but for now it looks like as good a deal as the administration could have struck, given the city's vexingly insatiable housing demand.

Stuyvesant Town was on the brink of becoming a high-end dormitory for young, upwardly mobile professionals on their way to bigger incomes and fancier digs. Now, for a couple of decades anyway, life will be more secure for about 13,000 people who are more interested in putting down and keeping roots in the city they call home.

Iran Steps Up Its Aggressions In The Region

[Washington Post](#), October 21, 2015

AS THEY concluded the nuclear deal with Iran in July, President Obama and Secretary of State John F. Kerry repeatedly suggested that it could open the way to cooperation with Tehran in resolving regional conflicts, beginning with the civil war in Syria. They also promised the United States would push back if Iran instead stepped up its aggression. Just three months later, Iran's most notorious general is overseeing a new offensive by thousands of Iranian, Iraqi and Lebanese fighters aimed at recapturing the Syrian city of Aleppo from rebel forces, including some backed by the United States. Mr. Obama shows no sign of responding.

The Iranian-led offensive, which is supported by Russian air power, appears to be the most aggressive intervention yet by Iran in the Syrian war. The Post reported that hundreds of troops from the elite Quds Force had been joined by thousands of Iraqi Shiite militiamen and forces from Lebanon's Hezbollah, all under the command of Maj. Gen. Qasem Soleimani, who previously directed attacks on U.S. forces in Iraq. Far from accepting appeals from Mr. Obama and Mr. Kerry to help broker a diplomatic settlement, Iran has joined with Russia to entrench the regime of Syrian President Bashar al-Assad and help it to recapture Aleppo and other parts of the country.

The attack is one of several provocative steps Tehran has taken as the nuclear deal has begun to come into effect. The same day the accord was debated by its parliament this month, the regime test-fired a nuclear-capable missile, violating a U.N. Security Council resolution. The White House acknowledged the infraction but pointed out that it was outside the bounds of the nuclear agreement.

Also that day, Iranian television reported that The Post's Jason Rezaian had been convicted on espionage charges after a closed trial. The administration condemned the verdict.

On Sunday, the United States and its European partners began taking steps to implement the nuclear accord. Much is now required of Iran: It must place 12,000 centrifuges into storage, ship 12 tons of enriched uranium out of the country and demolish the core of a plutonium reactor before it can receive the more than \$100 billion in assets frozen under sanctions. It could be that the missile test and unjust conviction of Mr. Rezaian are the regime's demonstration that its nuclear concessions will not change its hostile stance toward the West or its military ambitions. If so, it is a cruel tactic that uses Mr. Rezaian, a professional journalist and American citizen, as a human pawn.

But the Syrian offensive is certainly more than message-sending. If successful, it could eliminate the chance to construct a moderate, secular alternative to the Assad regime, and send hundreds of thousands more refugees across Syria's borders. It was just such aggression that Mr. Obama acknowledged might be a byproduct of the nuclear deal — and that he vowed to resist. If he remains passive as Maj. Gen. Soleimani's forces press forward, both Iranian and U.S. allies across the Middle East will conclude that there will be no U.S. check on an Iranian push for regional hegemony.

The CDC's Promising Plan To Curb America's Opioid Dependence

[Washington Post](#), October 21, 2015

HORRIFIC AS it is for the victims, drug addiction's impact reverberates beyond them, to include families, friends, whole communities. Thanks to a new Washington Post-University of Maryland poll, we can begin to quantify those wider consequences in our area. Nearly 3 in 10 Marylanders say they have a close friend or family member who was or is addicted to opiates such as prescription pain pills or heroin. The figures range from 4 in 10 in Baltimore to 1 in 6 in Montgomery County; but whether in the city or the suburbs, these numbers are far too high and fully warrant Gov. Larry Hogan's (R) promise to focus on the problem.

More treatment is necessary, as is prevention; yet preventing opioid addiction has been devilishly difficult due to the fact that people's first contact with the drugs often comes not through illicit channels but in a doctor's office, where they are prescribed opioids by a licensed physician who, in turn, had been told that medications such as OxyContin or Vicodin convey powerful relief with little or no addiction risk. In 2012, providers wrote 259 million prescriptions for opioids, enough for every American adult to have a bottle of pills. Opioid sales increased 300 percent since 1999. Almost 2 million people abused these drugs in 2013, and more than 16,000 died from overdoses.

Now the Centers for Disease Control and Prevention (the source of these data) has a plan that could make a major dent in the overprescription of opioids. The CDC is preparing opioid prescribing guidelines for primary-care physicians — the first of their kind from a federal agency. The guidelines are not finished, but early indications are that they will urge physicians to discuss risks with patients, pursue non-opioid alternatives as "preferred" options and limit initial prescriptions to a three-day supply at "the lowest effective dose." If finalized by the CDC and embraced by doctors, the guidelines promise to turn medical practice in an appropriately more cautious direction.

As is often the case with suggestions to curb pain prescriptions, the CDC's proposals are being met with opposition: some from people concerned about the impact on patients, some from a pharmaceutical industry concerned about the impact on profits. The American Cancer Society's lobbying arm has urged the CDC to suspend work on its guidelines, arguing in an Oct. 1 letter to the agency that cancer patients could be denied pain relief. Though understandable, these concerns are overstated; the CDC has said publicly its focus is not oncology but primary care, "outside end-of-life care."

It's true, as the cancer society letter notes, that the CDC guidelines are more than mere suggestions and will influence "state health departments, professional licensing bodies or insurers." That is precisely why they can be so beneficial; until now, government, medicine and the private sector have too often underestimated the risks, individual and societal, of widespread opioid prescription. The CDC has the prestige and authority to correct the balance. After incorporating valid comments from the cancer society and other interested parties, the CDC plans to publish in early 2016, and we see no reason to delay.

A Misguided Attack On D.C.'s Needy Students

By Editorial Board

[Washington Post](#), October 21, 2015

IS THE federally funded scholarship program for poor D.C. families being forced on an unwilling city? It is safe to say that thousands of D.C. parents whose children are on the waiting list for a scholarship do not think so. Nor, we would venture, do the 6,100 children, predominantly minorities, who have used the scholarships to attend private schools. For that matter, students in the city's public schools who have benefited from the infusion of federal dollars that has accompanied the voucher program probably would not embrace the argument either.

So whom do members of the D.C. Council think they are helping as they urge Congress to kill this program?

Fortunately, it does not appear that the council members will succeed in inflicting this wound on their city. Congress appears poised to reauthorize the D.C. Opportunity Scholarship Program, which provides needy students with up to \$12,572 to pay for tuition, fees and transportation to a school of their choice. The average family income for participating families is less than \$22,000. A bill extending the program for five years and championed by outgoing House Speaker John A. Boehner (R-Ohio) is set for a floor vote Wednesday, while a bipartisan group of senators has filed a companion bill that would continue the program through 2025.

Seeking to derail those efforts, a misguided majority of the D.C. Council, undoubtedly egged on by Del. Eleanor Holmes Norton (D-D.C.) and other voucher critics, wrote a letter to Congress objecting to what they portrayed as an intrusion into local affairs. These eight council members seemed unaware that the program was established in 2004 at the initiation of Anthony Williams (D), then D.C.'s mayor, and with the strong support of Kevin Chavous (D), then chair of the council's Education Committee. Likewise, they were unmoved by polling that has shown 74 percent of D.C. residents support the voucher program, which, despite the specious claims of critics, has improved outcomes for its students without taking a dime from regular public schools.

Indeed, the three-sector federal approach has brought more than \$600 million to D.C. schools, with traditional public schools receiving \$239 million, charter public schools \$195 million and the voucher program \$183 million. At stake for fiscal 2016 is an additional \$45 million. It is fantasy to think there would be additional monies absent vouchers.

School reform has brought improvement throughout the system. Yet, many parents still lack the choices and the access to high-quality education that city politicians take for granted for their own families. We credit D.C. Council Chairman Phil Mendelson (D) and council members Vincent B. Orange (D-At Large), Mary M. Cheh (D-Ward 3), Brandon T. Todd (D-Ward 4) and Kenyan R. McDuffie (D-Ward 5) for not seeking to deprive those parents of choice, and we hope their eight colleagues will rethink their position and put constituents' welfare over misguided ideology.

Murkowski Spells Out Uphill Climb For Interior Nominee

[Politico Pro](#), October 20, 2015

The Senate Energy and Natural Resources Committee chairwoman said that Interior Department pick Kristen Sarri would have a lot of explaining to do at a hearing on six nominees today. "We've seen decisions out of the Interior that are really destroying our hope to be independent as a state," Sen. Lisa Murkowski said at the nomination hearing, which included candidates for the USGS, and the departments of Energy and Interior. Sarri has been nominated to be the Interior assistant secretary for policy, management and budget. While she was pleased that President Barack Obama had renamed Mount McKinley this summer to Denali, the Alaska Republican said she was still frustrated with the Interior Department's "heartless decision" to deny a road in King Cove. She also criticized Interior for closing off oil production in Alaska and last week's cancellation of offshore sales and lease extension.

'Playing Games': Obama Backs 'Politicized ... Trivial' Nominee For Essential Spot He Left Empty For 6 Years

By Ethan Barton

[Daily Caller](#), October 21, 2015

A Senate committee chairwoman is torn between leaving the Department of the Interior's independent watchdog post vacant, or confirming President Barack Obama's nominee crippled by recurring allegations of "playing games with Congress."

"I strongly believe that Interior needs a permanent [inspector general], and I'm disappointed the administration has let the position go unfilled for six and a half years," said Sen. Lisa Murkowski. The Alaska Republican is chairwoman of the Committee on Energy and Natural Resources.

"But I am also committed to ensuring that the individual we confirm is fully independent ... The tenure that you have been involved with thus far in this position has been marked by controversy."

Obama nominated Mary Kendall for the Interior Department's Inspector General on June 4. She has been both the acting and deputy IG since 2009.

Public Employees for Environmental Responsibility – a non-profit activist group – said Kendall "politicized" investigations, "focused on trivial matters," "kept IG operations secret," and should not be confirmed as a permanent head, The Daily Caller News Foundation reported last week.

Wyoming Republican Sen. John Barrasso said an IG report critical of the Office of Surface Mining wasn't publicly released until Dec. 20, 2013 – 10 months after it was completed, and three days after Congress confirmed an Interior appointee to oversee that agency.

"It looks as though you're playing games with Congress," Barrasso said.

But Kendall said she didn't "recall the details. It sounds wrong. I would hope that there's a meaningful explanation."

Louisiana Republican Sen. Bill Cassidy

Public Employees for Environmental Responsibility – a non-profit activist group – said Kendall "politicized" investigations, "focused on trivial matters," "kept IG operations secret," and should not be confirmed as a permanent head, The Daily Caller News Foundation reported last week.

Wyoming Republican Sen. John Barrasso said an IG report critical of the Office of Surface Mining wasn't publicly released until Dec. 20, 2013 – 10 months after it was completed, and three days after Congress confirmed an Interior appointee to oversee that agency.

"It looks as though you're playing games with Congress," Barrasso said.

But Kendall said she didn't "recall the details. It sounds wrong. I would hope that there's a meaningful explanation."

Louisiana Republican Sen. [crscore]Bill Cassidy[Lisa"> also said the IG was doing favors for the Interior Department, rather than holding it accountable, in instances where it refused to hand reports over to Congress.

"I have been true to myself, my principles, my best judgment, and the law," Kendall said. "My personal style, to engage in civil discourse even when addressing difficult issues, has been criticized by some as being too accommodating of the Department of the Interior. Civility, in my experience, however, is not an accommodation, but rather, a strong and effective tool in communicating with and holding DOI accountable."

Murkowski said "while we expect that the IG always to approach her work with civility, she must never compromise her independence."

"If you are ... breaking bread ... It seems that you have set yourself up for a conflict of interest," said Cassidy.

"Having the benefit of 20/20 hindsight, I may have made some of those decisions differently," Kendall said.

Kendall also claimed multiple accomplishments, including "195 convictions, \$4.5 billion in criminal fines, penalties and restitution, over \$119 million in questioned costs and \$55 million in funds put to better use. On average over the past five years, the [IG] for DOI ranked fifth for Return-on-Investment among the 72 Federal OIGs."

House Committee on Natural Resources Republicans also reported Kendall's politicization in 2013.

"Acting Inspector General Kendall and Chief of Staff Stephen Hardgrove have blurred the line between being an independent watchdog and serving as an informal advisor and collaborator on Department policy initiatives," the report said.

"The president should not delay any further in acting to nominate someone who can serve as the independent watchdog the department deserves and who does not have the questionable history and judgment Ms. Kendall has brought to the position."

Top Republican Skeptical Of Obama Interior Nominees

By Devin Henry

[The Hill](#), October 21, 2015

A leading Republican on Tuesday raised concerns over two of President Obama's nominees for the Department of the Interior.

Sen. Lisa Murkowski (R-Alaska) said President Obama's pick to serve as an assistant secretary of the Interior, Kristen Joan Sarri, faces a high bar to winning her support, given what she considers the department's detrimental work in Alaska.

"If you're an Alaskan and you're reading the headlines, you have to wonder: What's going on within Interior? Why do they have it out for us?" Murkowski said during an Energy and Natural Resources Committee hearing on Tuesday.

"You're going to need to convince me that you are part of the solution and not part of the problem for Alaska at the Interior Department," she said to Sarri.

Murkowski, the chair of the committee, asked Sarri what role she played in last week's Interior Department decision to cancel oil drilling lease sales in the Arctic Ocean during the next two years, something she said was "an incredible blow and a hit to the state of Alaska."

Sarri said she wasn't involved in those decisions and that she wouldn't have a role in future leasing decisions in the position for which she is nominated.

"Alaska is incredibly important to energy development in this country and the safe and responsible development in the Arctic is part of that," she said.

Murkowski also hinted Mary Kendall, the Interior Department inspector general nominee, will face a tough confirmation fight in the Senate given concerns over her work as the acting inspector general (IG).

"I strongly believe that Interior needs a permanent IG, and I'm disappointed the administration has let the position go unfilled for six and a half years," she said.

"I'm also committed to ensuring that the individual that we confirm is fully independent, with good judgement in difficult situations and a firm grasp of the responsibilities of the Inspector General."

Kendall has had several dust-ups with House Republicans, who have accused her of not investigating political appointees and failing to file investigative reports on issues within the department.

She defended herself on Tuesday, noting that the Interior Department's Office of the Inspector General (OIG) is ranked among the top five federal OIGs in return-on-investment during her tenure. She said that she has met with committee members to go over House Republicans' concerns.

"Whether I have done so to your individual satisfaction, I do not know," she said. "What I do know is that throughout, I have been true to myself, my principles, my best judgment and the law."

The Energy and Natural Resources Committee heard from six Obama nominees on Tuesday. Other Republicans pushed Kendall, Sarri and others on their qualifications and their positions, but Democrats were widely receptive of the slate of nominees.

"We are very fortunate, I believe, to have six highly qualified and experienced nominees in front of us," said Sen. Maria Cantwell (D-Wash.), the ranking member of the committee.

Murkowski's Irate, Interior Nominee Heard All About It

[KTOO-FM Juneau \(AK\)](#), October 20, 2015

Sen. Lisa Murkowski has a pretty big gavel to pummel the Department of the Interior with as chairman of the Energy and Natural Resources Committee, which oversees the department. Nominees for high office at DOI and other departments have to clear her committee before Senate confirmation.

With three nominees from DOI and three from the Department of Energy before her, Murkowski wasn't shy Tuesday morning in tying the nominees to their bosses and declaring favorites. The senator says she likes Energy Secretary Ernest Moniz.

"He works with us. He listens to us. I think he deserves to have a team in place to support him," Murkowski said. "Unfortunately, I'm not able to say the same when it comes to the secretary of the Interior."

Murkowski homed in on Kristen Sarri, the nominee to be assistant secretary of the Interior for Policy, Management and Budget. Murkowski went through a list of her complaints about the department, such as: Not opening enough of the National Petroleum Reserve-Alaska to exploration, being slow with permits, the "heartless" denial of an emergency road for King Cove, and, most recently, the decisions on offshore Arctic leases. Murkowski says the department created a "deteriorating regulatory environment" that thwarts development and was a factor in Shell's decision to give up on Arctic drilling.

"So if you're an Alaskan and you're reading the headlines, you have to wonder, what's going on within Interior? Why do they have it out for us?" the senator said.

Sarri, who is already working in the policy office at Interior, says the department isn't against Arctic development.

"Let me just first start by saying, really quickly that Alaska is incredibly important obviously to energy production in this country and the safe and responsible development in the Arctic is an important part of the picture," Sarri said.

Murkowski told her that's not evident from the administration's actions.

"I was not involved in either of the decisions announced on Friday," Sarri said, referring to the cancellation of Arctic lease sales and the refusal to extend existing leases held by Shell and other companies.

Sarri says the offshore leasing decisions came from the Bureau of Ocean Energy Management and the Bureau of Safety and Environmental Enforcement, which are in Interior but lower down the organizational chart. Murkowski pressed on, and Sarri continued to say she wasn't responsible for the actions Murkowski objects to.

Dozens of nominations are pending in Congress. Senators sometimes hold them hostage by the fistful to extract concessions from a president. Murkowski didn't say whether she'd block anyone.

Even if she did put a hold on Interior nominations, Sarah Binder, a senior fellow in Governance Studies at the Brookings Institution, says it's unlikely to cause the Obama administration to reverse course. But, Binder says, by voicing her opposition, Murkowski does plant a flag on the issue.

"She's taking a position, right?" Binder says. "And senators get rewarded for being on the right side of issues, even if they can't get the outcome that they want."

A Murkowski spokesman says the senator will wait for more information before deciding how to vote on Sarri's confirmation.

A Murkowski spokesman says the senator will wait for more information before deciding how to vote on Sarri's confirmation.

'New Chapter In Trust': Historic \$186 Million Settlement Reaffirms Sovereignty, Tribes Say

[Indian Country Today Media Network](#), October 20, 2015

Tribes and the U.S. Department of the Interior heralded the outcome of a \$186 million settlement signed earlier this month between the federal government, the Choctaw and the Chickasaw nations to solve a longstanding land trust dispute as a new chapter in relations.

"This settlement represents a significant milestone in helping solidify and improve our relationship with the United States," said Chickasaw Nation Governor Bill Anoatubby in a statement during the October 5 signing ceremony that also gave a nod to the impetus provided by U.S. Secretary of the Interior Sally Jewell. "We respect the vital role Secretary Jewell has taken in helping make this historic settlement a reality. We are confident she will play an essential role in our efforts to continue strengthening the relationship between our governments, because we believe she has a unique appreciation for the mutual benefits of a positive government-to-government relationship."

Jewell indicated as much by greeting the crowd, many of them wearing traditional attire, with the Choctaw "Halito!" which "spoke to her empathy and support of American Indian issues and people," the Choctaw Nation said in a release describing the signing ceremony.

Anoatubby and Choctaw Chief Gary Batton were both on hand on Tuesday October 6 to sign a historic \$186 million settlement between the two tribes and the U.S. Department of the Interior. The agreement resolved a lawsuit that took issue with the way the federal government had managed the tribes' trust resources, according to a statement from the Chickasaw Nation. The Chickasaw Nation will receive \$46.5 million of the \$186 million settlement, with the balance going to the Choctaw. In their case the tribes alleged that the U.S. mismanaged 1.3 million acres of timberlands belonging to the Chickasaw and Choctaw Nations. The agreement ends all litigation and was inked at the Choctaw Event Center in a ceremony that capped a two-day visit Jewell to both nations on October 5 and 6.

RELATED: Choctaw and Chickasaw Receive \$186 Million in Historic Land-Trust-Management Settlement

"Today's agreement is the latest addition to a record number of longstanding settlements resolved under this Administration," Jewell said in a DOI statement after the signing. "This historic settlement is the start of a new chapter in our trust relationships with the Chickasaw and Choctaw Nations, and underscores our commitment to fulfilling those responsibilities to Native communities across the country."

Batton, too, spoke about the improvement in relations stemming from visits by Jewell and President Barack Obama.

"This visit marks the start of a revitalized relationship with the United States," said Batton in the tribes' statement. "Secretary Jewell's presence here, coming soon after President Obama's recent visit, also serves to reaffirm that the foundation of this relationship is government-to-government."

Batton emphasized the nature of the relationship as well.

"I am appreciative of having a sovereign-to-sovereign relationship between the Choctaw Nation and the U.S. Government," he said. "It is also historic that these three sovereigns have agreed to a settlement of the timber trust account case."

The case was first filed in 2005 but reached back more than 100 years to just before Oklahoma became a state. That's when the U.S. government took control of more than a million acres of Chickasaw and Choctaw tribal lands, the Choctaw Nation explained in its media release describing the events of the day.

"The U.S., as federal trustee, held those lands in trust for the benefit of the Nations," said the Choctaw in its statement. "In December 2005 the Nations filed suit in U.S. District Court seeking a long overdue accounting of the federal trustee's management of those resources and an equitable restoration of the value of that trust."

The \$186 million will be divided between the two tribes based on treaty agreements, with the Choctaw receiving 75 percent, or \$139.5 million, and the Chickasaw the other 25 percent, or \$46.5 million.

Both Batton and Anoatubby said the proceeds would be invested in education and other endeavors.

"We plan for the proceeds to be invested in our people—expanding education, creating jobs and promoting economic development and culture, as well as a portion to be invested in a sustainability fund for the future of our Citizens," Batton said.

Anoatubby had announced the settlement to members in his State of the Nation Address on October 3.

"Our portion of the funds will be carefully invested and the returns used for activities that improve the overall quality of life of all Chickasaws," said Anoatubby in the address.

He, too, added that the settlement was about more than money.

"Perhaps more important than the actual dollars, this settlement turns the page," said Anoatubby. "It represents the United States' acknowledgement of its mistreatment of the Chickasaw Nation and American Indians of Indian Territory during those early decades of the twentieth century. We continue to actively protect and defend our sovereignty, but we will continue to strive to improve our working relationship with the government and its agencies and agents."

U.S. Treasury Confirms \$20B Balance For LWCF, But Is It Real?

[E&E Publishing](#), October 21, 2015

The Land and Water Conservation Fund that expired earlier this month for the first time in its 50-year history currently contains nearly \$20 billion, according to the U.S. Treasury, which maintains the program's balance sheets.

Whether that is "real" money available to be spent on federal land acquisitions, private land easements and state recreation projects depends on whom you ask.

But the money – collected mostly from offshore oil and gas lease rentals and royalty receipts – does exist, according to the Treasury.

The \$19.8 billion balance also includes a relatively small amount of revenues from the sales of surplus federal property and the motor boat fuels tax, Treasury said.

There's been significant debate over how LWCF's expiration on Sept. 30 will affect the program's funding.

Advertisement

This much is undisputed: Money from offshore drilling is now going directly into the general Treasury rather than LWCF. That means the \$19.8 billion can only be reduced until Congress reauthorizes the program.

What is less clear is how the program's expiration will affect appropriators' willingness to fund it.

Despite LWCF's expiration, it is still being funded at approximately \$300 million a year under the continuing resolution. While it is authorized at \$900 million, the program has rarely been appropriated at that level.

Democrats, certain pro-LWCF Republicans and conservationists say reauthorization is urgent, warning that the program has been disconnected from its main funding source – oil and gas. The premise in enacting the fund in 1965 was to use revenue from the depletion of one natural resource to permanently protect other scenic and ecologically rich resources.

But those who favor reforming LWCF – arguing a greater portion of money should go to states or that some portion should be used to maintain existing federal lands – say there's no rush to reauthorize it.

They cite the \$20 billion. LWCF has collected roughly \$37 billion since 1965 but less than half has been appropriated, according to a Congressional Research Service report.

"When we wake up tomorrow, after allowing LWCF's authorization to expire, nothing will have substantively changed," Sen. Mike Lee (R-Utah) said in a floor speech in late September before blocking a motion to extend LWCF by unanimous consent.

House Natural Resources Chairman Rob Bishop (R-Utah), who has been the chief opponent of a clean LWCF extension in the House, has pledged to introduce a bill to reauthorize the fund this year, though with notable reforms.

The status quo, at least from appropriators' perspective, has not changed, said Chris Gallegos, a spokesman for Senate Appropriations Chairman Thad Cochran (R-Miss.).

"Land and Water Conservation Fund projects can move forward despite the ongoing effort to reauthorize the program," he said.

House Interior, Environment and Related Agencies Appropriations Subcommittee Chairman Ken Calvert (R-Calif.) has noted that there are other expired federal programs – he cited the FBI – that are unauthorized and yet continue to receive congressional funding.

Yet he also signaled it would be more difficult to fund LWCF in the absence of new revenues from offshore drilling. The \$20 billion in remaining LWCF funds, he said, are "as real as the money in the Social Security trust fund."

"There's been money paid into that account, on paper," he said. "But that money's been spent."

Yet appropriators "still possess the same power to appropriate funding under LWCF," said Interior Department spokeswoman Jessica Kershaw.

"The process has not changed for appropriation post-expiration," she said. But "without reauthorization, the highly successful program needlessly faces an uncertain future."

The longer it is expired, the more vulnerable it will be to spending cuts, said Alan Rowsome, director of government relations at the Wilderness Society.

And regardless of whether appropriators continue funding it, the fact remains that \$2.5 million per day in oil and gas revenues are now going to the general Treasury rather than LWCF, he noted.

"The reality is all this leads to a very urgent situation where LWCF does need permanent authorization and a permanent funding solution," he said. "Rather than discussing whether [the \$20 billion] exists or not, we should be talking about alleviating the problem."

Colorado Delegation Divided Over Public Lands Fund

[Durango \(CO\) Herald](#), October 20, 2015

The Land and Water Conservation Fund (LWCF), the country's most successful land-conservation program, was allowed to expire at the end of September after congressional leaders failed to reauthorize the program. Now, as politicians take stock of the program's influence across the country, many are pushing for permanent reauthorization of it.

The LWCF, established in 1964, was created to secure outdoor recreation lands for future generations. Over the course of its existence, the program has provided almost \$17 billion in funding for the expansion of parks and protected forests across the country and has protected more than 500 million acres of land across the country.

Sen. Michael Bennet, D-Colo., said it's important to renew the fund to ensure future generations continue to have access to public areas.

"Rural and urban communities throughout Colorado benefit from the Land and Water Conservation Fund, including the Animas River Trail," Bennet said. "It's a crucial tool we've used to conserve dozens of landscapes across Colorado. It's also critical to our outdoor recreation industry, which is a major driver of the state's economy. There is strong bipartisan support for the LWCF, and we're extremely disappointed that it has not yet been reauthorized."

Earlier this year, Bennet introduced legislation along with Sen. Kelly Ayotte, R-N.H., and Sen. Richard Burr, R-N.C., to permanently reauthorize the fund. That legislation fell one vote short of passage.

One of the benefits of the LWCF is that it is entirely funded by royalties from offshore drilling, defraying taxpayers' cost. But while the LWCF's reauthorization has enough support in the Senate, House Republicans are weary about putting forward a simple reauthorization bill.

Rep. Scott Tipton, R-Cortez, believes the fund is an effective tool for conservation efforts, but he feels that it's in need of some reforms "to ensure it is still achieving its original mission" after more than 50 years of existence.

"Managing nearly 640 million acres in the United States, the federal government is by far the largest landowner in most Western states," Tipton said. "Rather than increasing LWCF funding in order to obtain more federal property, land-management agencies should focus on managing the lands they already have. LWCF reauthorization provides an opportunity for reforms that support addressing the growing maintenance backlogs for national parks, roads, trails and facilities."

Instead, Tipton believes LWCF funding could also be used for land exchanges "involving strategic landholdings" with private owners.

House Natural Resources Committee Chairman Rob Bishop, R-Utah, has indicated that he will put forward a bill that changes the fund in the coming months, including efforts to redirect money to more state and local projects.

A recent U.S. Treasury report shows the fund contains a \$19.8 billion balance, although whether this money can be used to continue acquiring federal lands and support protection efforts is up for debate. Because of the fund's expiration, royalties from offshore drilling will now go directly into the Treasury's coffers.

According to Sen. Bennet's office, parks throughout Colorado have received LWCF funding, including Canyons of the Ancients National Monument, the Ophir Valley in the Uncompahgre National Forest, Dinosaur National Monument and the Colorado National Monument. Since the fund was established, Colorado has received almost \$239 million in funding to conserve lands across the state.

Data from the Outdoor Industry Association show that outdoor recreation in Colorado generates more than \$13.2 billion in consumer spending, supports 125,000 jobs across the state and provides close to \$1 billion in annual tax revenue.

U.S. Sen. Cory Gardner, R-Colo., also announced his support for the program's renewal. Along with Sen. Bennet and 52 other senators, Gardner previously signed on to a letter to Senate Majority Leader Mitch McConnell, R-Ky., pushing for the fund's permanent authorization.

"I remain a strong proponent of permanently reauthorizing the LWCF, and that is why I will continue to work toward a solution that paves the way for the common sense, permanent reauthorization of a program that has been a great friend to Colorado and is supported by sportsmen, hunters, recreationists and Americans around the country," Gardner said.

Edward Graham, a student at American University in Washington, D.C., and an intern with The Durango Herald.

Weekend Warriors Fear Washington Land Grab Could Take Off-roading Off The Board

[Fox News](#), October 20, 2015

A group of off-roaders and others are attempting to fight a proposed designation of three national monuments in the California desert under the Antiquities Act. (Corva.org)

California outdoors enthusiasts fear Washington is poised to put up roadblocks on some of the Golden State's most treasured trails by designating three desert destinations totaling more than 1 million acres national landmarks.

The Obama administration is considering using the federal Antiquities Act to bypass the legislative process at the request of Sen. Dianne Feinstein, whose efforts to have the Mojave Trails and Castle Mountain, both in the Mojave Desert, and a section of the Sonoran Desert named federal sites were repeatedly blocked by Republicans. A White House move could put the land under federal control, which critics say could cut funding for upkeep or even restrict access.

"Bypassing the legislative process using the Antiquities Act would be as disastrous as it is undemocratic, creating winners and losers with the stroke of a pen," said Rep. Paul Cook, R-Calif., who has sponsored a bill that bears some similarities to Feinstein's, but would ensure off-roading and mining could continue on the land. Cook's bill would also allow the state to create water projects for wildlife conservation.

"Any time you take away the consensus of the local community they are left with something they did not ask for."

– Amy Granat, California Off-Road Vehicle Association

The Mojave Trails lie in the desert of the same name in eastern California and are part of a 140-mile road that stretches from the Colorado River to Mojave River. The Sand to Snow Monument would cover 135,000 acres from the Sonoran Desert floor in Coachella Valley to the peak of Mount San Gorgonio, in the San Bernardino Mountain range. The Castle Mountains lie on the Border of Nevada and California near the famed Joshua Tree region and reach an elevation of 5,543 feet.

While the Obama administration has not said publicly if the Mojave Trails, Sand to Snow and Castle Mountain national monuments will be designated, Feinstein asked the president in August to take the action. The Antiquities Act was signed into law in 1906 by Theodore Roosevelt, and gives the president authority to create national monuments from public lands to protect

significant natural, cultural or scientific features. It has been used more than 100 times, including for such landmarks as the Grand Canyon, Mount St. Helen's and a stretch of the Underground Railroad in Maryland. Given that President Obama has invoked the Antiquities Act to name 19 sites national monuments since 2009 and as recently as July, Cook and other critics have reason to believe the White House could do so again, especially at the invitation of a powerful Democratic ally.

"We don't know what's going to happen," said Amy Granat, managing director of the California Off-Road Vehicle Association, which has been fighting the legislative proposals for two years. "More and more of the desert is being taken away from the people. If you look at the entirety of the desert, there has always been a no-win when the Antiquities Act has been put in place."

Cook supports the designation, but through legislation and on terms that allow current uses to continue. He said a White House decree based on the Antiquities Act "sets in motion a Washington-based management plan" that will ultimately leave the recreational area unfunded – and unkempt.

"... the roads and facilities will be left to degrade to a point where public use is unsafe or impossible," he said. "Anyone who's read the recent reporting on the newly-created San Gabriel National Monument's dire situation can attest to this. Use of the Antiquities Act will create more "orphan" monuments like San Gabriel, this time in the heart of the California desert."

One example of the Antiquities Act not helping to improve an area can be seen at the San Gabriel Mountains, range of mountains located across Los Angeles and San Bernardino counties and separates the City of Angels and the Mojave. It has been just over a year since the White House designated the mountainous region as a National monument but the area has still not received any federal funding. The 970-square-mile region badly needed the funding to combat growing blight in the area, but is still plagued by garbage and vandalism. And with no federal funding in sight, the National Park Service does not have the means for proper upkeep.

Feinstein is not without support in her home state. An Antiquities Act designation for the three landmarks could actually bolster recreational activities, according to the Campaign for the California Desert.

"The point that Rep. Cook and other opponents of the monument designation are missing is that when our shared public lands are protected, it's for the continued use and benefit of all Americans," the group said in a statement. "It is only when our public lands are sold off or leased by a developer does the public's access to our public lands become restricted."

Drones Power Up To Fight Wildfires In US West

[Voice of America](#), October 21, 2015

BOISE, IDAHO—Consumer drones look like children's toys compared with the unmanned, water-dropping helicopter that was demonstrated for U.S. government officials this month. The K-MAX chopper is the largest of several remotely piloted firefighting aircraft to get a tryout this year for firefighting duty.

The dual-rotor helicopter looks as if it's been squished from the sides. It demonstrated water drops and ferried supplies up and down a mountain. All of the missions were flown by remote control from a ground station set up next to the helipad. A pilot sat in the one-seat cockpit ready to take the controls — just in case.

WATCH: Drones Power Up to Fight Wildfires

Helicopter maker Kaman Aerospace produced the K-MAX. Vice President Bob Manaskie said it can fly through thick smoke or darkness, situations that force current firefighting aircraft to stay on the ground. It can lift up to 27-hundred kilos, the equivalent of its own weight.

"We can fight fires 24/7, unmanned or optionally manned. That's the advantage," he said. "You can get water on the fires 14 or 15 extra hours per day where a manned system can't."

Art Hinaman, assistant director for aviation at the U.S. Forest Service, said he saw "a lot of potential" at the initial pitch.

"It's fascinating that it can be done, that the technology is there," he said. "For us, the ability to do that without having to risk a pilot in low light level conditions, poor visibility and weather [in which] you just can't fly — and the guys on the ground need the help — that's pretty monumental."

Brad Koeckertiz, the unmanned aircraft program manager with the U.S. Department of Interior, figures it will take a few more years to integrate drones into all the other routines found in fighting wildfires, but said he was confident that optionally piloted aircraft would become a tool that firefighters regularly use.

Not just for fires

The U.S. Marine Corps operated two K-MAX helicopters in the unmanned configuration in Afghanistan to resupply remote outposts at night. K-MAX shuttles replaced dangerous convoys on the ground.

"We've tweaked it to where it is very safe," Manaskie said. "When we put it in Afghanistan initially, the Marines wouldn't put people underneath the aircraft as it was hovering because they were afraid, unmanned, it would fall down. By the end, there were tons of people under there hooking up stuff. They got very confident with it."

Two controllers on the ground put the K-MAX unmanned chopper through its paces. (Credit: Tom Banse)

The K-MAX helicopter is the third remotely piloted aircraft to get a federal tryout this fire season. The first two tests used smaller, winged aircraft to identify and map hot spots. Boeing subsidiary Insitu showed off a repurposed military reconnaissance drone called the ScanEagle over a forest fire in Olympic National Park. Then Textron Corp. demonstrated its Aerosonde Mark 4.7 surveillance drone over a different forest fire north of McCall, Idaho.

There is an element of good drone/bad drone to this. More than a dozen times this year, unauthorized hobby drones flew too close to active wildfires in the American West, which forced temporary halts to aerial firefighting operations.

That is one of the reasons behind the Federal Aviation Administration's plans to require many drone aircraft to be registered. FAA chief Michael Huerta said registration would increase pressure on drone operators to fly responsibly.

Unmanned K-MAX Completes Firefighting Demo

[Vertical Magazine \(CAN\)](#), October 21, 2015

More than 40 representatives from federal wildland fire agencies and media gathered at Lucky Peak Helibase just outside Boise, Idaho, on a smoky morning earlier this month to witness an unmanned Kaman K-MAX firefighting demonstration.

The aircraft, outfitted with redundant onboard equipment allowing it to operate both in line of sight and remotely via satellite, used a Bambi bucket to demonstrate spot drops and trailing drops, then demonstrated a cargo delivery and return from ridges and confined areas surrounding the base during the 2.5 hour demonstration. Throughout the event, both remote control and autonomous piloting were demonstrated, as well as electro-optic (EO) high definition, infrared and thermal imaging camera views to demonstrate the aircraft's ability to identify hot spots and the effectiveness of drops.

An onboard safety pilot had the ability to switch the aircraft to manual should an issue arise. Without a temporary flight restriction (TFR) or Certificate of Authorization (COA) from the Federal Aviation Administration (FAA), the aircraft couldn't fly completely unmanned for the demonstration.

"This technology will allow us to better support our firefighters on the ground, both with suppression and direct logistical support," said Mark Bathrick, director of aviation services for the Department of the Interior. "We see it as a great example of prior tax payer investment that will pay dividends."

Created through a partnership between Kaman and Lockheed Martin, the unmanned K-MAX operated in Afghanistan for the U.S. Marine Corps between 2011 and 2014. The aircraft, originally contracted for six months, stayed on to serve more than 2.5 years, delivering 4.5 million pounds of cargo and equipment to troops. Flying pre-subscribed GPS routes, the aircraft mainly operated in the dark with no external lighting along traditionally hazardous ground routes, taking no fire in its entire tour, said Lockheed Martin.

Upon completion of the mission, Lockheed Martin was approached by the Department of the Interior: Would this technology work to help fight fires?

Lockheed and Kaman provided an initial demonstration in November 2014 at the FAA's testing grounds in New York for firefighting agencies. Critical firefighting feedback led to several modifications and tactical changes, the results of which were demonstrated at the Lucky Peak Helibase.

"As a career firefighter, I've seen time and again the calls for aerial support when visibility is down or the wind is too high to safely operate," said Brad Koeckertiz, UAS program manager for the Office of Aviation Services at the Department of the Interior. "Putting this technology in place will increase safety for people on the ground and in the air."

The demonstration was slow and methodical, often with water dropping higher than it would in a real scenario due to safety, said Lockheed officials. Monitors on the ground showed views from the helicopter, including crystal clear views through the smoke and haze, as well as what the remote control operator was seeing on his screen.

The operator flew the helicopter using two Toughbook laptop computers and a PlayStation controller. "The choice of controller was actually strategic," said Christopher Zonio, flight test engineer at Lockheed Martin and the aircraft's original operator with more than 1,000 hours of flying K-MAX remotely. "When I trained Marines, most had instant familiarity because they played PlayStation. They'd say, 'I know this. Just tell me what the buttons do.' The learning curve was fast for most of them."

Zonio's computers and controller worked through two satellite uplinks and a remote control antenna for line of sight. Additionally, he sent directions to the helicopter, such as a GPS location that could be called in by a firefighter on the ground, and the aircraft then flies autonomously to the point.

"This aircraft can operate as manned when it is safe, and as unmanned when visibility drops or night falls, allowing the fire suppression and supply delivery to continue," said Art Hinaman, assistant director of aviation, fire and aviation management for

the U.S. Forest Service (USFS). "We'd not need special permission to fly it to a fire as long as a pilot is onboard, then once in the TFR, we can go unmanned, saving time and money."

The Department of Interior hopes to fast-track FAA approvals to allow the aircraft to operate in fire TFRs as soon as next summer. However, the issue of price and who would make the investment wasn't discussed directly in the presentation.

A new K-MAX off the line, in a manned-only configuration, is around US\$7 million, said Bob Manaskie, vice president and general manager of air vehicles and MRO for Kaman. However, a retrofit for an existing K-MAX is possible, with the aircraft needing to go back to the factory for tail boom strengthening, then on to Lockheed Martin for technology additions. The price, he said, depended on the sensors the operator ordered. Lockheed Martin quoted between \$11 to \$15 million for a new aircraft.

Both Hinaman of the USFS and Bathrick of the DoI said the agencies had no plans to purchase the aircraft; they'd be contracting with private companies much like they do today. However, both were unable to discuss what that would look like as terms and conditions of contracts for a yet-to-be FAA-approved aircraft were unavailable. It remains unclear what would motivate current firefighting aircraft contractors to make such an investment, or if they'd be able to receive adequate insurance coverage for the operation.

Firefighters assigned to the helibase and helitak were not allowed to talk to press at the demonstration to share their thoughts after seeing the aircraft in action. Hinaman said he recognized the importance of working with firefighters during the process. "It's important to get them involved in seeing this aircraft in action and hearing their input," he said.

When asked about the potential of working with skilled firefighting pilots to transition them to ground operators of the unmanned K-MAX in order to use their inherent knowledge of firefighting, Bathrick responded: "We don't see the need for skilled (firefighting) pilots as it is pure math with a UAV. It flies to a precise point along a prescribed route. It can operate more precisely than any pilot, and I can say that — I am a pilot," he said. "We are getting critical feedback from firefighters and pilots. We're here to support them."

The Department of Interior plans to work with Lockheed Martin to test the aircraft on a very controlled prescribed burn before moving on to testing it on a real forest fire, Bathrick said.

The Unmanned K-MAX has a 2.75-hour endurance with an option to add an auxiliary fuel tank to extend the range another 45 minutes. The aircraft weighs in at 5,145 pounds empty and can lift up to 6,000 lbs. on the hook for a maximum gross weight of 12,000 lbs., with external load, at sea level. At 5,000 feet, and 15 degrees C, lift performance decreases to 5,663 lbs.

The demonstration was funded by Lockheed Martin and hosted by the Boise National Forest.

Jeb Bush Calls For Moving Interior Department From D.C. To Western City

[Las Vegas Sun](#), October 20, 2015

Republican presidential candidate Jeb Bush will unveil his proposals for Western land and resource management in a campaign stop in Reno on Wednesday morning, in a speech likely to resonate with conservative voters opposed to what they see as federal overreach in the Western states.

Bush is expected to criticize the Obama administration for failing to work with states, local governments, Native tribes and private owners as "equal partners," arguing that overregulation has weakened the trust of local communities in the federal government.

Bush is expected to speak at 11 a.m. Wednesday at Rancho San Rafael Regional Park before appearing at a forum sponsored by the LIBRE Initiative at the College of Southern Nevada Cheyenne Campus in North Las Vegas at 6 p.m.

In the proposal, Bush will call for moving the headquarters of the Department of Interior from Washington, D.C., to a city in the western United States like Denver, Salt Lake City or Reno and will say that as president he would direct federal agencies to give broad latitude to states to determine land-use issues.

He's also expected to call for a revised framework on granting national monument status, convening a panel of Western leaders to propose changes. Republicans have criticized President Barack Obama, who, with the backing of Nevada Sen. Harry Reid, designated the Basin and Range National Monument over the objections of local stakeholders.

Bush will propose redirecting some funds from acquisition of new national park land to park maintenance. He will also reaffirm his opposition to the administration's Waters of the United States rule, which defines which waterways are subject to EPA regulation and will argue for federal deference to state plans for protecting species like the sage grouse.

Scientists Confirm That Alaskan Wildfires Could Make Global Warming Worse

By Chris Mooney

[Washington Post](#), October 21, 2015

In not much more than a month, leaders from around the world will assemble in Paris in order to — hopefully — find a way to cap the world's greenhouse gas emissions and bring them down to safe levels.

But there's a problem. There are some greenhouse gas sources that these leaders can't fully control — and in some cases, reasons to think that these sources may grow in the future. The point is being driven home this year by raging peat fires in Indonesia, which have already contributed over a billion tons of carbon dioxide equivalent emissions to the atmosphere — as much as Japan produces in a year from fossil fuels. And the blazes still appear to be on the rise, meaning that the net contribution this year could ultimately be considerably higher than that.

Indonesia isn't the only part of the world where fires — which in many areas are expected to be worsened by climate change — could provide a new net source of emissions to the atmosphere. Another region of major worry is the world's so-called "boreal" or northern forests, which store a gigantic amount of carbon in trees as well as soils and frozen permafrost layers beneath the surface. Permafrost in this region is in many ways analogous to peatlands in Indonesia — it's a repository of carbon that has accumulated over many thousands of years, but could now be released back to the atmosphere on a much shorter time scale.

Alaska's dramatic wildfire season this year — where over 5 million acres of largely black spruce forests burned — raised great concerns about how events like this could make global warming worse. The fear here is of a sort of triple whammy — forests release the carbon stored in trees back to the atmosphere when they burn; the forests contain a deep upper soil layer that also burns off, releasing more carbon; and finally, beneath all of that is the carbon rich permafrost, which becomes exposed after fires and can then thaw and start to emit.

And now, a new study in *Nature Climate Change* reaffirms these concerns about the emissions of northern fires. The study, led by Ryan Kelly of the University of Illinois at Urbana, looked at a particular Alaskan region that has seen intensive burning of late — the remote Yukon Flats. The researchers used an ecosystem model to examine changes in the amount of carbon stored in the Yukon Flats going all the way back to the year 850, and carrying forward through 2006 — a more than thousand year period. The data used in the model came from "paleo-climate" reconstructions of what burn conditions were like in this area over large periods of time, based on charcoal layers found in cores of sediments extracted from the region.

This approach allowed the researchers to confirm that the recent burning in this area is dramatic when compared with its past history — and thus, that recent fires have been releasing much of the carbon that has been stored up over hundreds of years. For the Yukon Flats, "this rapid increase in fire activity has led to pretty major losses of carbon from the ecosystem, on the order of 10 to 12 percent of total carbon stocks in a matter of 5 decades or so," said Kelly.

In addition, the researchers also determined that over time, change in fires patterns were by far the largest factor in how much carbon the ecosystem stored. In fact, the study noted, "long-term C dynamics of the past millennium were almost entirely dictated by patterns of fire-regime variability." In other words, in more fire-intense periods, the forests lost a great deal of carbon to the atmosphere, whereas in less fire friendly periods, they stored it instead.

This, in turn, leads to the inference that with more global warming, more forest burning could worsen a process that's already underway. "Our study reveals that increased burning of boreal forests will probably cause massive losses of stored C, with the potential to amplify climate warming," the researchers concluded.

"I would definitely guess, and we speculate this in the paper, that the direct role of warming and rising co2 will be more important in the future than they were over the 1,000 year time period we studied," said Kelly.

Granted, there is one limitation — the research only concerns the Yukon Flats, and this area has seen quite dramatic burning, at levels that are not consistent with all burning across the forests of the global north. So it's an outlier in some ways, but also suggestive of how things could be heading for northern forests.

To be sure, there is one possible mitigating factor — global warming could also even cause more plant growth in northern and Arctic regions, leading to an increase in how much carbon they're pulling out of the atmosphere. More northern trees, bushes, and even shrubs as tundras warm up could mean more carbon storage, even as fires may also rage at more powerful and extreme rates.

Climate researchers are still trying to figure out how all of these factors will interrelate. But the new research — along with developments in Indonesia — reaffirms that fire is a powerful determinant of how much carbon resides in land, rather than in the air, across our globe. Thus, even as we keep burning fossil fuels, fires may continually combust additional planetary carbon reserves — pushing the globe that much closer to busting its carbon budget.

Pingree To Prepare Food Waste Bill

[Politico](#), October 21, 2015

With help from Bill Tomson, Jenny Hopkinson and Helena Bottemiller Evich

PINGREE TO PREPARE FOOD WASTE BILL: Rep. Chellie Pingree (D-Maine) is preparing a bill aimed at reducing food waste as administration officials look to address the issue through voluntary efforts. A spokesman for Pingree tells MA the lawmaker plans to announce she is working on a bill during a speech to the New York Times Food for Tomorrow Conference

today in Pocantico Hills, N.Y. The bill will seek to put into place incentives, programs and other measures to curb food wasted at the farm level, by food makers, restaurants and by consumers. While the spokesman said details of the bill are still in the works, one of the things the congresswoman is looking to change are sell-by dates, to tell consumers that food is still safe even if it has passed its prime. Details on the conference can be found here: <http://bit.ly/1n8smWG>

Story Continued Below

The bill follows on the heels of an Obama administration announcement last month that the government is committing to reduce food waste by 50 percent during the next 15 years, the first time the United States has ever put into place a goal on the issue. While food and environmental groups lauded the efforts, several warned that the government may need to take further action to incentivize reductions if it wants to see real change. Brush up on the issue here: <http://politico.pro/1NdfBQR>

HAPPY TUESDAY, OCT. 20! Welcome to Morning Ag, where your host got the heads-up that the Interior Department has a great Vine account. Fishing bears and a dancing sage grouse? This is Internet gold: <http://bit.ly/1M1i086>. The USDA needs to up its game. You know the deal: News, tips? Send them to cpurdy@politico.com and [@chasepurdy](https://twitter.com/chasepurdy). Follow the whole team [@Morning_Ag](https://twitter.com/Morning_Ag).

USITC RULES TODAY ON MEXICO DUMPING CHARGES: The International Trade Commission will make its much anticipated final ruling at 11 a.m. today on charges that Mexico was dumping subsidized sugar into the U.S. at below market prices. If the ITC commissioners agree with the findings of a Commerce Department investigation that Mexico was indeed dumping, a negotiated suspension agreement that caps Mexican imports will stay in place. It's the result that farmers here are hoping for in order to keep Mexican shipments reined in and prevent price-lowering influxes of imported sugar.

But some U.S. sugar refineries and users are hoping for the opposite and would like to see all restrictions removed from Mexican supplies that help keep prices down and supplies plentiful.

"Refinery operations in cities such as Savannah, Detroit, Baltimore, New York and San Francisco will be forced to run at 65 percent of capacity, resulting in job losses and possible closures, while these cities' much needed jobs are shipped to Mexico by these agreements," said Imperial Sugar President Michael Gorrell in a presentation on the suspension agreement at a conference in June. Pros can see the full story here: <http://politico.pro/1RkQb8F>

FOOD COMPANIES JOIN WHITE HOUSE IN CLIMATE DEAL PUSH: There are some pretty weighty food companies amid the 81 companies that have agreed to a White House initiative to push for a strong climate deal out of the United Nations. Negotiations at the U.N. are set to take place late next month in Paris. Coca-Cola, General Mills, Hershey's, Kellogg's, Mars, Nestlé, PepsiCo, Cargill, Campos Brothers Farms and Unilever all signed the pledge, as did restaurant chains McDonald's, Starbucks and Wal-Mart. Monsanto is also part of the group, as is Syngenta. View the commitments here: <http://1.usa.gov/1W0BokL>

** A message from the Coalition for Safe Affordable Food: Virtually every leading health and safety organization on earth – from the World Health Organization to the American Medical Association – have affirmed the safety of agricultural biotechnology. Learn more: <http://bit.ly/1LprXGN> **

WHITE HOUSE OFFICIALS MEET ON ORGANIC AQUACULTURE: Administration officials have met with two groups following the USDA's organic aquaculture standards as they continue a review of a proposal to create standards for organic production and certification of farmed aquatic animals and their products. George Lockwood, who chaired the working group that made a recommendation on what the standard should look like, met with USDA and Office of Management and Budget officials Oct. 13. Another meeting, with the National Organic Coalition, the Center for Food Safety, and Food & Water Watch took place earlier this year, on Aug. 28. Those groups have raised concerns about the proposal, arguing it would be very difficult to produce fish in a truly organic way. Details of the meetings here: <http://1.usa.gov/1PCuMJA> and here: <http://1.usa.gov/1OOXKp5>

DEADLINE TO COMMENT ON 'MIDGET' DESIGNATION FOR RAISINS APPROACHES: Today is the last day to comment on the Agricultural Marketing Service's plan to change the name of a grade of raisin from "midget" to "small." The proposal came about after Little People of America filed a petition arguing "midget" should be eliminated from the agency's vocabulary. The agency says the change shouldn't have any impact on handlers' or growers' benefits or costs. Both "midget" and "small" have been used interchangeably by the industry, so the proposal would make the designation uniform.

One comment in support said: "I am going to keep it simple. If The Little People of America are offended by fruit and vegetables being called 'midget,' it should be removed from the Agricultural Marketing Service's vocabulary."

DeLAURO PRAISED DEPARTMENT OF LABOR OVER POULTRY PLANT PROGRAM: Rep. Rosa DeLauro (D-Conn.) has praised the U.S. Department of Labor after it announced the establishment of a Regional Emphasis Program to crack down on abusive labor practices in the poultry industry. The program is for states in which the poultry industry is heavily operating, including Arkansas, Louisiana, Oklahoma, Texas, and certain worksites in Georgia, Alabama, Mississippi, Florida and New Mexico.

According to an announcement by the Labor Department, poultry plants often have working environments that pose a high risk for injury and illness to workers. Because of that, the department has established a program that will start by providing outreach activities to plants that will include letters to employers, training sessions with stakeholders and public service announcements, among other things. Enforcement activities may also be used, and will include the inspection and review of production operations, according to the announcement. You can read it in full here: <http://bit.ly/1LHiT3m>

DAIRY GROUPS TO SENATORS: LACK OF ACTION NOT COOL: U.S. dairy groups sent a clear message to senators Monday: Listen to Canada and Mexico on country-of-origin labeling before they hurt us. A World Trade Organization arbitration panel is currently deliberating how much the two North American countries are allowed to raise tariffs against targeted U.S. sectors — including on dairy — to recoup damages for discriminatory COOL rules. The leaders of the International Dairy Foods Association, National Milk Producers Federation and U.S. Dairy Export Council in a letter urged the Senate to come up with a solution on COOL for meat that heads off that possibility.

The House has already passed legislation repealing COOL provisions for beef, pork and chicken. Senate Agriculture Committee Chairman Pat Roberts supports that approach, but Sen. John Hoeven and ranking member Debbie Stabenow, along with a majority of the committee, have put forward a bill that would replace current mandatory COOL requirements with voluntary ones. Although the dairy industry's letter does not explicitly endorse the repeal-only approach, Canada and Mexico have indicated they would not be satisfied with any other outcome. Click here to read the letter: <http://bit.ly/1W1gm5w>.

GOT (NATURAL AMERICAN REDUCED FAT CHEDDAR) CHEESE?: The Department of Agriculture is researching the commercial availability of Natural American Reduced Fat Cheddar Cheese in bulk form for domestic food distribution programs. So if you're a cheese producer and you've got the ability to supply the product, the USDA has some questions for you: <http://1.usa.gov/1xjVVm>

GROUPS PUSH FOR CALIFORNIA WARNING ON GLYPHOSATE: More than a dozen environmental and consumer groups are urging regulators in California to list the pesticide glyphosate as a carcinogen under the state's chemical laws, which would require labeling as such. In a letter sent Monday to the state's Office of Environmental Health Hazard Assessment, the groups, led by the Center for Food Safety, argue there is sufficient scientific evidence to justify the listing. OEHHA first proposed the move Sept. 4. The letter is here: <http://bit.ly/1hOoJUz>.

JBF ANNOUNCED ITS 2015 AWARD WINNERS: The 2015 James Beard Foundation Leadership Award honorees include: Sam Kass, former White House chef and senior policy adviser on nutrition; Don Bustos, co-director of the American Friends Service Committee; Eliot Coleman, an agricultural researcher, author and educator; Saru Jayaraman, director of the Food Labor Research Center at the University of California, Berkeley; and Bryant Terry, a chef and food justice activist.

Accepting his award at the awards dinner at the Hearst Tower on Tuesday night, Kass argued that the growing food movement needs to be more strategic and learn how to compromise as it pushes for policy and market change.

"We are in every single board room of every single food company," Kass said. "We are on the inside now ... we don't need to throw stones ... we have to be much more strategic."

** A message from the Coalition for Safe Affordable Food: With Vermont set to become the first state to implement its own GMO food labeling standard next July, it's time for Congress to pass reasonable, common-sense legislation that creates a uniform, national food labeling standard to protect consumer-choice and bring consistency to the marketplace. A failure to act this fall is tantamount to ceding control of food labeling policy in a nation of over 300 million to a state of only 600,000. Learn more: <http://bit.ly/1LprXGN> **

EMPOWERING NATIVE AMERICAN COMMUNITIES

BIA Rule Gives Tribes More Control Over Elections

[Law360](#), October 20, 2015

Law360, New York (October 19, 2015, 9:39 PM ET) – The Bureau of Indian Affairs on Monday announced its final rule for Native American tribal elections conducted by the U.S. Department of the Interior, saying the new rule will encourage tribes to take control of their elections and help protect the voting rights of tribe members living in urban areas.

Assistant Secretary of Indian Affairs Kevin K. Washburn said in a statement Monday that the rule will allow tribes to opt out of having the interior secretary conduct their elections, and will allow tribal elections to...

DOI Announces Final Rule On Secretarial Elections For Tribes

[Native American Times](#), October 20, 2015

WASHINGTON – Assistant Secretary – Indian Affairs Kevin K. Washburn today announced that the Department of the Interior has finalized updates to Bureau of Indian Affairs (BIA) regulations on Secretarial elections for tribal governments that will, among other things, protect the rights of tribal members living away from their communities to vote in these elections. A Secretarial election is a federal election conducted by the Secretary of the Interior for federally recognized tribes under a federal statute or tribal governing document (25 C.F.R. Part 81).

“Though many federal responsibilities concern the lands we hold in trust for tribes and Indian people, more than 55 million acres nationwide, the United States has a moral obligation to preserve connections between Indian people and their tribes that it once sought to destroy,” Washburn said. “For the future of Native nations and the health of Indian Country, American Indians in urban areas must work harder to maintain connections with their tribes. One important aspect of that relationship is participation in the civic and political life of their tribal governments. For that reason, our Secretarial election amendments seek to prevent tribal members living in urban areas from being inadvertently disenfranchised in Secretarial elections.”

Through the mid-20th century the BIA operated a program to relocate American Indians from their reservations to large urban centers in an attempt to assimilate them and terminate the federal relationship with the tribes. As a result of this program, and broader demographic trends in the United States, roughly three-quarters of American Indians now live in urban areas away from their home reservations.

The BIA conducts Secretarial elections for tribes required to have them if one of the following applies:

- A federal law requires a Secretarial election to take an action;
- The tribe’s governing document requires a Secretarial election to take an action;
- A federal corporate charter requires a Secretarial approval; or
- The tribe is adopting or amending a federal charter of incorporation, and certain circumstances apply.

Updates to the rule better account for the fact that many tribal members may live far from their reservations or tribal communities by providing that Secretarial elections generally be conducted by mail-out ballots.

The rule addresses the BIA’s Part 81 regulations, which govern how the Bureau conducts Secretarial elections, as well as 25 C.F.R. Part 82, which govern how tribal members can petition for a Secretarial election. The rule combines the provisions into one at 25 C.F.R. Part 81, and makes other updates to reflect changes in statutory law. The updates also incorporate deadlines, triggered by a tribe’s request for a Secretarial election, within which the BIA must call and hold an election.

The updated rule also clarifies how tribes may remove the requirement to hold a Secretarial election, and encourages tribes to do so in support of tribal self-determination and self-governance.

The rule has been in development for many years. The Department held three consultation sessions with tribal leaders on this proposed rule and provided an extended public comment period which ended on January 16, 2015.

The Assistant Secretary – Indian Affairs oversees the BIA, which is headed by a director who is responsible for managing day-to-day operations through four offices – Indian Services, Justice Services, Trust Services and Field Operations. These offices directly administer or fund tribally based infrastructure, law enforcement, social services, tribal governance, natural and energy resources, and trust management programs for the nation’s federally recognized American Indian and Alaska Native tribes and villages through 12 regional offices and 81 agencies.

The Office of Indian Services Division of Tribal Government Services administers the 25 CFR Part 81 regulations. For more information about the BIA Division of Tribal Government Services, visit online or view a copy of the final rule.

Federal Court Hearing Focuses On Native Hawaiian Election

By Jennifer Sinco Kelleher

[Associated Press](#), October 21, 2015

HONOLULU — A federal court hearing started Tuesday in a lawsuit by people who want to put a stop to an election process that is underway for Native Hawaiians.

The lawsuit, filed in August, says it's unconstitutional for the state to be involved in a race-based election. The state argues in court documents that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it's not involved in next month's vote to elect delegates for a convention to determine self-governance for Native Hawaiians.

Tuesday's hearing is focused on the plaintiffs' motion for a preliminary injunction. The plaintiffs want the judge to limit voter registration activities or stop the election altogether.

The plaintiffs include two non-Hawaiians who aren't eligible for the roll, two Native Hawaiians who say their names appear on the roll without their consent and two Native Hawaiians who don't agree with a declaration to "affirm the un-relinquished sovereignty of the Native Hawaiian people, and my intent to participate in the process of self-determination."

Native Hawaiians are the last remaining indigenous group in the U.S. that hasn't been allowed to establish its own government. Former U.S. Sen. Daniel Akaka spent about a dozen years trying to get a bill passed that would give Native Hawaiians the same rights already extended to many Native Americans and Alaska Natives.

In 2011, the state passed a law recognizing Hawaiians as the first people of Hawaii and laid the foundation for Native Hawaiians to establish their own government.

The governor appointed a commission to produce the roll.

The Native Hawaiian Roll Commission "does not conduct elections, nor set election ability criteria," attorneys for the defendants, including the state, wrote in response to the lawsuit. An independent organization, Nai Aupuni, determined election criteria, the defendants said.

The lawsuit points to nearly \$2.6 million from the Office of Hawaiian Affairs, a public agency tasked with improving the wellbeing of Native Hawaiians, as evidence of the state's involvement.

According to the defendants, the money was provided with the understanding that Nai Aupuni would have autonomy.

The election is to select delegates for a convention, not for an election of public officials, Nai Aupuni said in court documents.

The U.S. Department of the Interior, which recently outlined a proposal for a possible government-to-government relationship if Native Hawaiians want one, took the judge up on his invitation to weigh in on the lawsuit. The department urged the judge not to grant an injunction and pointed out that American Indian tribes hold elections that exclude non-natives.

U.S. District Judge J. Michael Seabright allowed the plaintiff attorneys to call witnesses: Native Hawaiian Roll Commission Executive Director Clyde Namuo, Office of Hawaiian Affairs CEO Kamanaopono Crabbe and Nai Aupuni President J. Kuhio Asam. It's not clear when Seabright will issue a ruling.

Nai Aupuni leaders say it's crucial that the election moves forward because it presents a unique opportunity that has evaded Native Hawaiians for more than 100 years.

"If this process is stalled in the courts, the (roll commission) list will become stale, (Nai Aupuni's) funding may not be available and if history is a useful compass — it may be decades before funding, a similarly substantial roll, state and federal sensitivity and self-determination zeal among Native Hawaiians converge to bring about another such opportunity," attorneys for Nai Aupuni wrote in court documents.

Why Do Hawaiians Want Race-based Elections?

[Christian Science Monitor](#), October 20, 2015

A group of Hawaiians are suing their state in federal court for preparing to hold elections that would serve only one race – the islands' native population.

The justification for the race-based election? Everyone else is doing it.

Every other indigenous group in the United States has already has its own government. This is why, for example, US state and federal police need special certification to operate on Native American reservation land, and the tribes can opt out of daylight savings or state casino prohibitions if they choose.

The former US Sen. Daniel Akaka (D) of Hawaii, who retired in 2013, worked for more than a decade to give native Hawaiians the same self-government rights that Native Americans in the contiguous 48 states and Alaska already have.

The first step toward this goal came in 2011, when the state formally recognized the native Hawaiians. The state then created a Native Hawaiian Roll Commission to start making a list of eligible native Hawaiians who could elect delegates to a convention that would form a government with help from Nai Aupuni, a non-government organization.

The US Department of the Interior made a tentative plan for a formal relationship with whatever government the native Hawaiians set up.

In August, however, six state residents filed a lawsuit to stop the election. Two are non-native Hawaiians who cannot vote in the election, and two are natives who do not want their names on the voting list.

The other two simply disagree with the statement required for voter registration to "affirm the un-relinquished sovereignty of the Native Hawaiian people, and my intent to participate in the process of self-determination."

The state of Hawaii says it has no official involvement in the election, so the racial basis of the election is not unconstitutional. The lawsuit, however, points to a \$2.6 million state contribution to the election process. The funding comes from the Office of Hawaiian Affairs, a state office that works to improve the lives of native Hawaiians.

The hearing Tuesday focuses on the desire of the plaintiffs – the anti-election Hawaiians of the case – for the judge to make a preliminary injunction and stop the election, or at least stop people from registering to vote.

Nai Aupuni said stopping the process now would be the worst thing. In its own submission to the court, Nai Aupuni said Hawaiians have been waiting and working for this for more than 100 years, and the chance may not come again for another century.

This report includes material from the Associated Press.

Lawsuit, Divisiveness Hamper Native Hawaiian Election Effort

[Navajo Times \(AZ\)](#), October 21, 2015

HONOLULU (AP) _ A group of Native Hawaiians are organizing an election to create a national government for the first time since American businessmen, backed by U.S. Marines, overthrew the Hawaiian kingdom more than 100 years ago.

They are trying to elect delegates for a convention next year to hash out a governing document that will go back to the Native Hawaiian community for ratification, but their plan is already facing resistance _ from Native Hawaiians themselves.

A federal judge on Tuesday will consider an injunction motion in a lawsuit that argues that it's unconstitutional to restrict voting to those with Native Hawaiian ancestry and that the state is improperly involved in the process.

Native Hawaiians are the last remaining indigenous group in the U.S. that hasn't been allowed to establish its own government.

Former U.S. Sen. Daniel Akaka spent about a dozen years trying to get a bill passed that would give Native Hawaiians the same rights already extended to many Native Americans and Alaska Natives.

When it became clear that wouldn't happen, the state passed a law recognizing Hawaiians as the first people of Hawaii and laid the foundation for Native Hawaiians to establish their own government.

The governor appointed a commission to produce a roll of qualified Native Hawaiians interested in participating in their government.

Some of the plaintiffs in the lawsuit argue that their names appear on the roll without their consent.

The process has been rushed and confusing, critics say. "It's a shotgun wedding of self-determination," said Native Hawaiian community advocate Trisha Kehaulani Watson-Sproat.

Molokai activist Walter Ritte planned to run as a delegate, deciding it's better to participate even though he disagrees with the process. But when he saw that the list of candidates includes politicians and those who support federal recognition instead of forming an independent nation, he changed his mind.

"I don't want people to say, 'Well you were part of it,'" he said. "I have no faith in the system so I'm taking my name out."

There are some 200 candidates for 40 positions representing Hawaiians across the state and those living outside of Hawaii.

Supporters of the election agree that the process hasn't been perfect.

"But it's an opportunity that rarely comes around," said Bill Meheula, an attorney who will argue in court Tuesday on behalf of Nai Aupuni, a nonprofit organization made up of five directors guiding the election, convention and ratification process.

Watson-Sproat is skeptical of the people behind Nai Aupuni: "Who picked these people?"

"We are individuals who decided we want to commit ourselves to the process," Meheula said. "Someone had to stand up and it couldn't be a state agency. We were individuals that were able to come together and get a grant."

The Office of Hawaiian Affairs, a public agency tasked with improving Native Hawaiians' wellbeing, provided a nearly \$2.6 million grant for the election, with the understanding that the office wouldn't have any control over Nai Aupuni.

Some liken the election to selecting the founding fathers and mothers of a modern Hawaiian nation.

"Founding parents, if you will," said Clyde Namuo, executive director of the Native Hawaiian Roll Commission and a delegate candidate, noting that the founding fathers of the U.S. organized the 13 colonies to escape British oppression.

Self-determination is a way for Native Hawaiians to address longstanding concerns in the community, he said: They fare poorly when it comes to income, education and health.

“The western way of life has not necessarily been good to us,” he said. “We will be able to control our destiny in a better way if we form our government.”

Until the 1893 overthrow, the U.S. recognized the Hawaiian nation's independence, extended full diplomatic recognition to the Hawaiian government and entered into several treaties with the Hawaiian monarch.

The U.S. annexed Hawaii five years later, and it became a state in 1959.

Native Hawaiians have long clamored for self-determination, but the options and opinions on what that looks like vary _ from federal recognition, to restoring the kingdom to dual citizenship.

Last month, the U.S. Department of the Interior outlined a proposal for a possible government-to-government relationship with Native Hawaiians _ if they want one.

The department has also weighed in on the lawsuit, urging the judge not to grant an injunction by pointing out that Native American tribes hold elections that exclude non-natives.

Ritte doesn't want Hawaiians to be another tribe.

“We don't have the same history as Indians,” he said. “The choice is to go down and be closer to the United States of America, who overthrew our queen, or avenge our queen and correct an injustice.” By The Associated Press, Copyright 2015

Judge To Rule Friday On Fate Of Native Hawaiian Election

By Jennifer Sinco Kelleher

[Yahoo! News](#), October 21, 2015

HONOLULU (AP) — A federal judge said he will rule on Friday whether an election process underway for Native Hawaiians can proceed.

U.S. District Judge J. Michael Seabright heard arguments on Tuesday in a lawsuit filed in August that says it's unconstitutional for the state to be involved in a race-based election. The state argues that while it played a part in compiling a roll of Native Hawaiians eligible to participate, it's not involved in next month's vote to elect delegates for a convention to come up with a self-governance document for Native Hawaiians to ratify.

The plaintiffs include two non-Hawaiians who aren't eligible for the roll, two Native Hawaiians who say their names appear on the roll without their consent and two Native Hawaiians who don't agree with a declaration to “affirm the un-relinquished sovereignty of the Native Hawaiian people, and my intent to participate in the process of self-determination.”

One of the plaintiffs' attorneys, Bob Popper from Washington, D.C.-based conservative group Judicial Watch, told Seabright the election will have a big impact on the state of Hawaii and some of his clients won't be allowed to participate.

Seabright countered that the elections aren't for any public office and are “more akin to a private election than to a public election.”

Native Hawaiians are the last remaining indigenous group in the U.S. that hasn't been allowed to establish its own government. Former U.S. Sen. Daniel Akaka spent about a dozen years trying to get a bill passed that would give Native Hawaiians the same rights already extended to many Native Americans and Alaska Natives.

In 2011, the state passed a law recognizing Hawaiians as the first people of Hawaii and laid the foundation for Native Hawaiians to establish their own government. The governor appointed a commission to produce the roll.

The Native Hawaiian Roll Commission “does not conduct elections, nor set election ability criteria,” attorneys for the defendants, including the state, wrote in response to the lawsuit. An independent organization, Nai Aupuni, determined election criteria, the defendants said.

The lawsuit points to nearly \$2.6 million from the Office of Hawaiian Affairs, a public agency tasked with improving the wellbeing of Native Hawaiians, as evidence of the state's involvement.

Nai Aupuni is a private, nonprofit corporation whose grant agreement specifies the Office of Hawaiian Affairs won't have any control, Nai Aupuni attorney Bill Meheula said. “What we've got here is indigenous people trying to pursue self-determination, which is their inherent right under federal law,” he said.

The U.S. Department of the Interior, which recently outlined a proposal for a possible government-to-government relationship if Native Hawaiians want one, took the judge up on his invitation to weigh in on the lawsuit. The department urged the judge not to grant an injunction and pointed out that American Indian tribes hold elections that exclude non-natives.

Nai Aupuni leaders say it's crucial that the election moves forward because it presents a unique opportunity that has evaded Native Hawaiians for more than 100 years.

"If this process is stalled in the courts, the (roll commission) list will become stale, (Nai Aupuni's) funding may not be available and if history is a useful compass — it may be decades before funding, a similarly substantial roll, state and federal sensitivity and self-determination zeal among Native Hawaiians converge to bring about another such opportunity," attorneys for Nai Aupuni wrote in court documents.

Seabright said he will give his ruling from the bench on Friday, with an explanation of his reasoning. He will issue a detailed written order later, but he doesn't know if it will be ready before the election begins.

Feds Side With Alaska Native Group In Artifacts Probe

[Houston Chronicle](#), October 21, 2015

ANCHORAGE, Alaska (AP) — A Massachusetts college was found in violation of a federal law regulating the possession and sale of potentially sacred artifacts following a complaint from an organization of Alaska Natives.

The U.S. Interior Department said an investigation substantiated the complaint against Andover Newton Theological School filed in June by the Sealaska Heritage Institute. The institute's president, Rosita Worl, said the school possesses at least two southeast Alaska artifacts, including a Tlingit halibut hook that is considered sacred.

The Juneau-based institute complained after learning the school planned to sell Native objects displayed at the Salem, Massachusetts-based Peabody Essex Museum. Sales plans have since been abandoned.

Institute officials tried to contact the school before the complaint was filed, Worl said.

"We've never had a return call," she said. "It's been disheartening."

The school's collection contains 1,100 objects, including 125 Native American works from 52 U.S. and Canadian tribes, she said.

According to the Sept. 29 notice of noncompliance, the school failed to complete a summary of its collection, in violation of the Native American Graves Protection and Repatriation Act. The agency said the school was subject to the law because it receives federal funding and has control over at least one protected cultural item, identified in the notice as the Tlingit halibut hook.

Melanie O'Brien, the program manager for the federal repatriation program, said the school appears to be working toward compliance, based on written correspondence. The college has 45 days to respond to the noncompliance notice or request a hearing to contest the finding since receiving it a week after it was issued, O'Brien said.

A representative of Andover Newton did not immediately respond to a request for comment Tuesday. Peabody Essex spokeswoman Whitney Van Dyke referred questions about the case to museum director Dan Monroe, who was traveling in China and could not immediately be reached. Van Dyke said the artifacts in question have been housed at the museum since the 1940s.

In a Sept. 8 letter to Munroe, Andover Newton President Martin Copenhaver said it no longer had plans to sell items from its Native artifacts collection because it was no longer clear which items are subject to the repatriation law.

"We will proceed to repatriate artifacts, however, if feasible and appropriate ways can be found to do so," Copenhaver wrote. "We have already engaged a consultant to help us in that process."

Worl said the Central Council of the Tlingit and Haida Indians of Alaska, the regional federally recognized tribe, plans to file a repatriation claim for the two southeast Alaska artifacts in the collection.

Worl, a former member of the national Native American Graves Protection and Repatriation Act review board, said there is no mechanism in the repatriation law that ensures entities subject to its provisions are following it. At the annual conference of the Alaska Federation of Natives last week, delegates adopted a resolution to create a group to look at the issue and propose changes at the national level, Worl said.

"The burden is put on the tribes" to seek investigations, she said of the current procedures.

The school's collection contains 1,100 objects, including 125 Native American works from 52 U.S. and Canadian tribes, she said.

According to the Sept. 29 notice of noncompliance, the school failed to complete a summary of its collection, in violation of the Native American Graves Protection and Repatriation Act. The agency said the school was subject to the law because it receives federal funding and has control over at least one protected cultural item, identified in the notice as the Tlingit halibut hook.

Melanie O'Brien, the program manager for the federal repatriation program, said the school appears to be working toward compliance, based on written correspondence. The college has 45 days to respond to the noncompliance notice or request a hearing to contest the finding since receiving it a week after it was issued, O'Brien said.

A representative of Andover Newton did not immediately respond to a request for comment Tuesday. Peabody Essex spokeswoman Whitney Van Dyke referred questions about the case to museum director Dan Monroe, who was traveling in China and could not immediately be reached. Van Dyke said the artifacts in question have been housed at the museum since the 1940s.

In a Sept. 8 letter to Munroe, Andover Newton President Martin Copenhaver said it no longer had plans to sell items from its Native artifacts collection because it was no longer clear which items are subject to the repatriation law.

"We will proceed to repatriate artifacts, however, if feasible and appropriate ways can be found to do so," Copenhaver wrote. "We have already engaged a consultant to help us in that process."

Worl said the Central Council of the Tlingit and Haida Indians of Alaska, the regional federally recognized tribe, plans to file a repatriation claim for the two southeast Alaska artifacts in the collection.

Worl, a former member of the national Native American Graves Protection and Repatriation Act review board, said there is no mechanism in the repatriation law that ensures entities subject to its provisions are following it. At the annual conference of the Alaska Federation of Natives last week, delegates adopted a resolution to create a group to look at the issue and propose changes at the national level, Worl said.

"The burden is put on the tribes" to seek investigations, she said of the current procedures.

The Department Of Interior Says East Coast School Must Comply With Terms Of The Native American Graves Protection And Repatriation Act

[Alaska Dispatch News](#), October 20, 2015

The U.S. Department of the Interior has issued a letter stating that Alaska Native items in the possession of Andover Newton Theological School of Massachusetts are subject to the Native American Graves Protection and Repatriation Act.

The Sealaska Heritage Institute of Juneau alleged in June that a halibut hook in the school's collection on loan to the Peabody Essex Museum of Massachusetts was a sacred object used in fishing rituals.

In the letter, Michael Bean, an assistant secretary for Fish and Wildlife and Parks, said that insofar as Andover Newton participated in federal student aid programs, it was governed by the law. He said the school hadn't completed a summary of Native American objects in its collection by April 2010, which "constitutes a failure to comply with the requirements" of the act.

Bean gave the school 45 days to respond to the notice.

The letter is dated Sept. 28, 2015. In a press release sent out Tuesday, Sealaska said it had only recently obtained a copy. Two weeks ago, officials with the NAGPRA office told Alaska Dispatch News that an investigation was underway but did not give a timeframe for when it might be completed.

At the Alaska Federation of Natives convention in Anchorage last week, a resolution was passed to form a group to study the issue of repatriation of items considered to be objects of "cultural patrimony" under the law. The group is to propose changes in how the law is implemented and enforced.

US Attorney Says BIA Officer Justified In Deadly Shooting

[Washington Times](#), October 21, 2015

FARGO, N.D. (AP) – U.S. Attorney Chris Myers says a federal officer was justified in shooting and killing a man on the Spirit Lake Indian Reservation last summer.

Bureau of Indian Affairs Officer Terry Morgan shot and killed 31-year-old Joseph Charboneau during a standoff with officers on June 16. Myers says an investigation by his office concluded Morgan was justified in using deadly force.

The FBI has said the incident began when officers went to a residence to arrest another person, and an altercation ensued with Charboneau. Myers says Charboneau had a loaded gun and also grabbed a blow torch, and that he refused to comply with officers' orders to drop the gun.

Myers says Charboneau threatened not only the officers but also another person in the home.

UPDATE: No Charges For Officer Who Shot, Killed Spirit Lake Man With Gun And Blowtorch In Hand, FBI Says

[Grand Forks \(ND\) Herald](#), October 21, 2015

FORT TOTTEN, N.D. – Federal prosecutors will not file charges against a Bureau of Indian Affairs officer who shot and killed a man in June on the Spirit Lake Reservation, finding the officer was "legally justified" in opening fire on the man.

Officer Terry Morgan shot and killed Joseph Charboneau of rural Fort Totten while carrying out a warrant June 16 at a Fort Totten residence. Officers stated Charboneau pointed a loaded firearm at them and did not follow officers' orders to drop the weapon during a seconds- to minutes-long standoff with officers, according to Assistant U.S. Attorney Keith Reisenauer.

The FBI investigated the incident and sent reports, taped and transcribed interviews, the autopsy report and photos related to the shooting to the U.S. Attorney's Office in North Dakota to decide whether charges should be brought against Morgan. There was no video evidence – Morgan was wearing a body camera the night of the shooting, but it was not functioning at the time, Reisenauer said.

See also: Family of alleged police shooting victim speaks out

The U.S. Attorney's Office said Tuesday it found Morgan acted within the limitations of the law in firing his service weapon at Charboneau because the 31-year-old posed a "real and immediate" threat to officers and another person at the scene.

Under federal and state laws, law enforcement officers are generally allowed to use deadly force to prevent what reasonably poses a threat of serious physical injury or death to the officer or others.

Officers are not required to run away as civilians generally are required to do before resorting to deadly force.

Four officers were searching 7141 Crow Hill Road in Fort Totten for a person for whom they had a warrant to arrest when they found Charboneau under a blanket in the living room with a .40-caliber Glock in his hand, Reisenauer said.

Charboneau pointed the gun at the officers during the altercation, which "happened very quickly," Reisenauer said.

Citing documents from the investigation, Reisenauer said officers asked Charboneau to drop the gun multiple times, but Charboneau did not comply. He also picked up a "propane blowtorch," which was on a nearby shelf, during the standoff and threatened to use it, though not necessarily on the officers, Reisenauer said.

The other person in the residence, for whom the officers had the arrest warrant, told detectives she heard officers telling Charboneau to drop a gun, Reisenauer said.

He said Charboneau did not make any verbal threats.

"He didn't say, 'I'm going to shoot you' or 'I'm going to kill you,'" Reisenauer said.

Reisenauer declined to say what was said between officers and Charboneau.

Charboneau did point the gun at officers, threatened to use the blowtorch and did not obey officers' orders, Reisenauer said.

After Charboneau did not drop the gun, Morgan shot Charboneau four times, once in the chest, twice in the left shoulder and once in his left abdomen, Reisenauer said, citing the autopsy report. Charboneau accidentally shot himself in the right knee in reaction to being fired upon, Reisenauer said.

Reisenauer could not say where the gun was pointed at the time of the shooting.

"Officer Morgan, confronted with an individual holding a firearm at close range, and refusing to comply with orders to drop the weapon, was reasonable in his use of deadly force because Mr. Charboneau posed an immediate and continuing threat to the officers and others," a news release from the U.S. Attorney's Office in North Dakota says.

Reisenauer did not know to whom the gun was registered.

Charboneau's autopsy report did not show any alcohol or drugs in his system, Reisenauer said.

Questions about Morgan's history as an officer were referred to a Washington, D.C.-based spokesperson, who did not return calls to the Herald by press time.

Spirit Lake Officer Justified In Shooting Death

[Dickinson \(ND\) Press](#), October 21, 2015

Officer Terry Morgan shot and killed Joseph Charboneau June 16 after officers searched 7141 Crow Hill Road in Fort Totten to serve a warrant for another person in the residence, according to a press release. Charboneau was found in the living room of the home under a blanket and was holding a loaded firearm.

Charboneau also grabbed a blow torch during a brief standoff with officers, and after refusing to "comply with several orders to drop the weapon," he was shot by Morgan.

"Charboneau posed a real and immediate threat to not only Officer Morgan, but also to a number of other officers at the scene as well as to another individual within the residence," according to the statement. It said Morgan "was reasonable in his use of deadly force because Mr. Charboneau posed an immediate and continuing threat to the officers and others."

Tuesday's announcement came from U.S. Attorney Christopher C. Myers and said the office of the U.S. Attorney for the District of North Dakota had reviewed "all of the investigative reports, interviews, the final autopsy report and photos relating to the shooting." The case was investigated by the FBI.

Shooting Of Man By Spirit Lake BIA Officer Ruled Justified

[Forum of Fargo-Moorhead \(ND\)](#), October 21, 2015

FARGO — The shooting death of a man by a Bureau of Indian Affairs officer in Fort Totten on the Spirit Lake reservation in June was justified, according to a ruling released Tuesday by U.S. Attorney Christopher Myers.

Myers said Officer Terry Morgan was justified in shooting Joseph Charboneau on June 16.

While officers were searching 7141 Crow Hill Road in Fort Totten to serve a warrant for another individual at the residence, Charboneau was found in the living room under a blanket and holding a loaded firearm, according to investigative reports.

Charboneau also grabbed a blow torch during a brief standoff with officers.

After refusing to comply with several orders to drop his weapon, Charboneau was shot by Morgan.

Myers ruled that Charboneau posed a real and immediate threat to the officers at the scene and another person in the residence. Myers said that given the circumstances, the use of deadly force by Morgan was justified.

Investigation Finds Deadly Shooting By BIA Officer Was Justified

[KXJB-TV Fargo \(ND\)](#), October 21, 2015

Investigation finds a Bureau of Indian Affairs (BIA) officer was legally justified when he shot and killed Joseph Charboneau in Fort Totten, North Dakota in June.

The United States Attorney's office for the District of North Dakota has reviewed all of the investigative reports, interviews, the final autopsy report and photos related to the officer-involved shooting. The office concluded that the officer's use of deadly force was appropriate in the situation.

The shooting happened on June 16, 2015. According to the investigative reports, while officers were searching a home to serve a warrant for someone else in the residence, Charboneau was found in the living room under a blanket and was holding a loaded firearm. According to officers, Charboneau also grabbed a blow torch during a brief standoff.

After refusing to comply with several orders to drop the weapon, Charboneau was shot by BIA Officer Terry Morgan. U.S. Attorney's Office investigation finds that Charboneau posed a real and immediate threat to not only Officer Morgan, but also to a number of other officers, and to another individual in the home.

Investigators say because Officer Morgan was confronted by someone holding a firearm, at close range, and refusing to drop the weapon, his use of deadly force was legally justified.

Spirit Lake Officer Legally Justified In Shooting Death

[KFYR-TV Bismarck \(ND\)](#), October 21, 2015

North Dakota's U.S. Attorney says the officer involved shooting in Fort Totten was legally justified.

In June Bureau of Indian Affairs officer Terry Morgan shot and killed 31-year-old Joseph Charboneau.

The investigation finds that while officers were looking for someone else on a search warrant, Charboneau was found under a blanket with a loaded gun. Charboneau also grabbed a blow torch during a brief standoff with officers.

Morgan shot Charboneau after he refused to drop his weapon.

The final investigation reports the use of deadly force was reasonable because Charboneau posed a threat to officers and another person in the home.

In Humboldt County, Tribe Pushes For Bigger Law Enforcement Role On Its Lands

By Lee Romney, Contact Reporter

[Los Angeles Times](#), October 20, 2015

In calls to tribal police and Humboldt County sheriff's dispatch last March, Judy Surber cried, begged and threatened.

Her 29-year-old son had been shot in the chest and head in a small trailer on the remote Hoopa Valley reservation where he, his girlfriend and their 7-month-old son had stopped to give a friend a ride.

Roger Surber lay bleeding next to a 73-year-old man with an even graver head wound. Surber's girlfriend ran, clutching the baby, to find a phone.

When Judy Surber got the news, she placed her first emergency calls.

The tribal force, down to just one active officer, had no one to send. As Surber and her family raced to the scene, she was stunned to see a California Highway Patrol officer and sheriff's deputy in their idled cars on the highway — on orders, they told her, to await more sheriff's backup before going in or letting other emergency personnel through.

In a county that exceeds 4,000 square miles, that backup took time to arrive.

For an hour and 40 minutes, Judy Surber estimates, her family was alone in the bloody trailer. A daughter-in-law who was once a medic worked to keep Roger alive. (He survived; the older man died.) A son repeatedly ran to the staging area to tell the deputy that the suspects were gone. Surber kept calling the dispatch centers, screaming that the scene was safe.

"The minutes felt like hours," the 53-year-old executive secretary for the tribal council said. "Without our tribal police, we're pretty much at the mercy of whoever is available — and sometimes that's nobody."

Surber's panic played out at a time of crisis for public safety on tribal lands.

A federal law decades ago shifted the primary burden of criminal law enforcement on tribal lands in California and five other states to local authorities. Many lack the resources to do the job and, in some cases, sufficient knowledge of tribal law and culture to win the trust of tribal members. Tribes were cut off from steady funding for their own justice systems. Crime has flourished.

Last month, Humboldt County Sheriff Mike Downey dissolved a 20-year-old agreement authorizing Hoopa Valley tribal police to help enforce state criminal law, saying the tribal force's reduced manpower made it "untenable."

The word "police" has been stripped from tribal vehicles, replaced with "security" after Downey warned that taking the cars off the 144-square-mile reservation otherwise could lead to charges of impersonating a peace officer.

Tribal leaders said the move offends their sovereignty and will curtail their ability to rebuild their own force.

"We're miles apart," tribal Chairman Ryan Jackson said of negotiations with Downey at a community meeting this month.

The situation arises from Public Law 280, a measure approved 62 years ago that is among a series of policies aimed at forcing Native Americans to assimilate. It compelled states where tribal lands were deemed "lawless" to take responsibility for enforcing state law. The federal government continued to fill that role in the other states.

The six states couldn't tax tribal lands held in trust to cover their costs. The tribes were cut off from Bureau of Indian Affairs funding that flows to tribal police and tribal courts in the rest of the country.

Tribes could still enforce their own civil and criminal laws on tribal members. But the constant scramble to "cobble together various pots of funding" to maintain those justice systems has made it tough, Jackson said, particularly for remote tribes without access to ample casino revenue.

The federal Tribal Law and Order Act of 2010 — and the independent Indian Law and Order Commission it empowered — laid out fixes to give tribes greater say in tailoring their own justice programs.

In its 2013 report to President Obama and Congress, the commission called the approach to criminal jurisdiction nationwide — but particularly under Public Law 280 — "an indefensible maze of complex, conflicting, and illogical commands, layered over decades via congressional policies and court decisions, and without the consent of tribal nations."

It recommended that tribes in so-called P.L. 280 states be allowed to opt out of state jurisdiction altogether — with or without state consent.

The Hoopa Valley tribe had worked out a solution held up as a model. But Downey told the crowded meeting in Hoopa that it was simply no longer working.

Thanks to a county ballot measure that reversed four years of "heavy duty budget decline," Downey this month assigned three full-time deputies to the region in hopes of "getting back to the business of law enforcement — high visibility and responding to calls for service."

The presence had already led to arrests, among them robbery suspects found with drugs and outstanding warrants at the Hoopa shopping center, he said Friday.

Downey has said he remains open to a renewed agreement with the tribe if at least four tribal officers pass his background checks and field training, share a dispatch and reporting system, and — most controversially — answer to his command staff.

But trust is lacking.

"I think the sheriff is acting in very poor faith ... and even crippling the safety of this community further," said Richard C. Blake, the tribe's chief judge. "Tribal police and tribal court issues are not going to go away, and instead of trying to jockey for authority, true agreements need to be reached."

Blake is concerned that deputies won't make arrests when domestic violence protective orders issued by his court are violated. Downey said his department will continue to honor those orders.

Jackson, the recently elected chairman, has moved to beef up the force. Last week, the tribal council approved a \$1.7-million law enforcement budget for 2016 — a nearly \$500,000 increase over this year — which is expected to boost salaries and pay for a chief, lieutenant, three sergeants and nine officers. Five officers are expected to graduate soon from a state-certified training academy.

The tribe is also pursuing other avenues to gain greater law enforcement authority on their lands, even if Downey declines to re-up the agreement.

The Bureau of Indian Affairs has agreed to train and deputize Hoopa Valley officers to enforce certain federal laws. And Hoopa Valley is among three California tribes that have applied under the 2010 law for the federal government to share responsibilities for such enforcement. That would pass more tribal cases off to federal prosecutors.

Feelings are mixed. Mary Jane Aubrey, who manages the tribe's Tsewenaldin Inn, said running a business here is "really hard" because of loitering, drug use, panhandling and theft. She wants improvements but said that as outsiders, sheriff's deputies "don't care about our people."

"Our tribal police are ours," she said. "They know who's on drugs, who's lying to them, which families are good, which families are bad."

At the recent community meeting, tribal members spoke of calling tribal dispatch, only to be told to call the sheriff, and then be told by sheriff's dispatch to call the tribal police. They recounted uninvestigated crimes, and stressed the need for quick response to family violence.

Pamela Risling, who directs the tribe's domestic violence and sexual assault program, voiced support for the training and discipline that Downey has called for. She said the tribe and the sheriff need to work together, considering he has the legal mandate to call the shots.

"We deserve the same service as people in Eureka," she said. "Whether or not we like it, we are a P.L. 280 state."

Surber is conflicted. The night she brought her son home from the hospital, someone fired shots at the house, she said, and it took a deputy more than two hours to arrive.

"As a tribal member, I don't like to see the county pull the agreement, because of our sovereignty," she said. "As a community member, I just want someone to respond."

Yakama Tribe To Get Authority For Some Court Cases

[Bellingham \(WA\) Herald](#), October 21, 2015

Some civil and criminal cases involving members of the Yakama Nation will be returned to the tribe's jurisdiction, after being handled for decades by the state.

The federal Bureau of Indian Affairs on Monday granted the tribe's petition for what is called "retrocession."

Retrocession removes state jurisdiction over tribal members in certain cases but does not give the tribe any new jurisdiction over nonmembers. It will affect cases such as car crashes, domestic violence calls and truancy complaints.

Major crimes by tribal members will continue to be handled by the FBI or other federal authorities.

"It is truly a great day for the Yakama People," Tribal Council Chairman JoDe Goudy said in a statement. "For decades, our nation has been denied basic rights of self-governance within our own lands."

The Yakima Herald-Republic reported (<http://bit.ly/1LITn2o>) officials for Yakima County were concerned that details still needed to be worked out.

County Prosecutor Joe Brusic said it's unclear how tribal and county law enforcement officers are going to make sure each case gets into the right jurisdiction.

"I want to do everything possible in my role as prosecutor to see that retrocession works, but I believe we've got a lot of work to do," Brusic said.

Brusic is most concerned about traffic crimes, such as DUIs.

Under retrocession, if a sheriff's deputy pulls over a tribal member suspected of driving under the influence, the deputy would have to call tribal police to make the arrest, Brusic said. But if the suspect decides the deputy can't arrest him, he could drive away, Brusic said.

The head of the BIA praised the county's support for retrocession and acknowledged the concerns in his Monday letter to the Yakama Nation. Assistant Secretary of Indian Affairs Kevin Washburn said the agency could facilitate meetings but is not requiring agreement before the retrocession takes full effect in April.

"It would constitute extreme hubris for a federal official more than 2,500 miles away in Washington, D.C., to attempt to resolve disputes between neighbors in the Yakima Valley," Washburn wrote.

Retrocession also will change which courts try some cases. For example, Yakima County Superior Court hears most vehicular homicide cases, even those involving only tribal members. Now it's unclear whether the tribal court or the federal court would handle those cases, Brusic said.

Retrocession was approved at the state level in January 2014 when Gov. Jay Inslee signed a proclamation that returned to the Yakama Nation authority over school attendance, domestic relations, mental illness, juvenile delinquency, adoption, public assistance, and motor vehicle operation for tribal members on tribal lands.

Yakama Tribe To Get Authority For Some Court Cases

[Clark County \(WA\) Columbian](#), October 20, 2015

YAKIMA — In a move long sought by the Yakama Nation, federal officials have approved returning authority to the tribe for certain civil and criminal cases involving tribal members that have been handled by the state for decades.

Monday's move was praised as a victory for tribal sovereignty by the Bureau of Indian Affairs, which granted the tribe's petition for retrocession.

The Yakima Herald-Republic reported that officials for Yakima County were concerned that the petition was approved before law enforcement protocols had been worked out for the reservation that both tribal members and nonmembers call home.

The decision removes state jurisdiction over tribal members only in certain cases and does not give the tribe any new jurisdiction over nonmembers. It will affect cases such as car crashes, domestic violence and truancy complaints.

Washburn Accepts State's Retrocession Of Authority Over Yakama Nation

[Native American Times](#), October 21, 2015

WASHINGTON – Assistant Secretary – Indian Affairs Kevin K. Washburn today announced that the Department of the Interior has accepted from the State of Washington the partial civil and criminal jurisdiction it held over the Confederated Tribes and Bands of the Yakama Nation. The state has held this authority over the Yakama Nation, a federally recognized tribe located in the southwestern portion of Washington, for more than half a century.

"While tribal self-governance has long been the Federal Government's guiding principle for Federal Indian policy, it has been slow in coming in the area of criminal justice," Washburn said in a letter conveying the decision to the Yakama Nation. "We believe that this step will advance tribal self-governance and tribal sovereignty for the Nation. More importantly, we believe that it will produce improved public safety for the Nation and its people."

The Yakama Nation resides on a reservation comprised of over 1.1 million acres, which was established in 1855 by a treaty signed by Washington Territory Governor Isaac Stevens and tribal representatives. The Yakama Reservation is located on the east side of the Cascade Mountains in Yakima and Klickitat counties.

In 2012, the Washington State legislature enacted legislation providing a path for the state and tribal nations to follow in addressing retrocession. In July 2012, the Yakama Nation filed a petition for retrocession with the governor that was followed by government-to-government consultations with the state. In 2013, the Nation entered into a memorandum of understanding with Yakima County regarding the procedures to serve state court arrest warrants on tribal members on trust land within the reservation.

After following the procedures set forth in the state's bill, which included a six-month extension by the state, the governor in January 2014 submitted her proclamation on retrocession to the Secretary of the Interior for approval. Since that time, the Bureau of Indian Affairs' Office of Justice Services (OJS) has been engaged with the Yakama Nation Tribal Police Department and Corrections to determine the capacity of the Nation's law enforcement services. In preparation for retrocession, the Nation committed additional resources to its law enforcement services, nearly doubling the size of its police department by funding 10 new officer positions.

In September 2014, OJS finalized an assessment of the police department which found that it would be prepared to handle increased responsibilities as a result of retrocession.

In addition, OJS began an assessment of the Yakama Nation Tribal Court in December 2014, which provided recommendations for improving tribal court operational activities and assisted in developing a strategic three- to five-year plan for it. In May 2015, OJS issued the assessment and strategic plan, which included findings and recommendations, resulting in one-time federal funding to improve the court that will help the Nation further the pursuit of justice and ensure that the rights of individuals are protected.

Washington is one of 16 states authorized by Congress under Public Law 280 (67 Stat. 588), enacted in 1953 during the period in federal Indian policy known as the Termination Era, to assume criminal jurisdiction over American Indians on federal

Indian reservations and to allow civil litigation that had come under tribal or federal court jurisdiction to be handled by state courts.

Among other purposes, Public Law 280 altered criminal jurisdiction on federal Indian lands by transferring it from the federal government to certain states. The law has been widely criticized by tribes and states as creating more harm than good, such as gaps in jurisdiction. Today's decision attempts to remedy some of the jurisdictional problems Public Law 280 created on the Yakama Reservation.

The states required by Public Law 280 to assume civil and criminal jurisdiction over federal Indian lands were Alaska (except the Metlakatla Indian Community of the Annette Island Reserve, which maintains criminal jurisdiction), California, Minnesota (except the Red Lake Reservation), Nebraska, Oregon (except the Warm Springs Reservation), and Wisconsin. In addition, the federal government gave up all special criminal jurisdiction in these states over Indian offenders and victims. The states that elected to assume full or partial jurisdiction include Arizona (1967), Florida (1961), Idaho (1963, subject to tribal consent), Iowa (1967), Montana (1963), Nevada (1955), North Dakota (1963, subject to tribal consent), South Dakota (1957-1961), Utah (1971) and Washington (1957-1963).

In 1968, a legislative shift occurred when Congress authorized certain of these states to retrocede their civil and criminal jurisdiction back to the United States via the Secretary of the Interior.

The Secretary is authorized to accept retroceded authority from a state after consultation with the U.S. Attorney General, and the federal government has done so for 31 tribes since 1968. The most recent retrocession prior to today's announcement occurred when the State of Nebraska retroceded its civil and criminal authority over the Santee Sioux Nation in 2006.

While there are misconceptions about what "retrocession" actually entails, it does not change the boundaries of a tribe's reservation nor expand or contract a tribe's formal legal authority or jurisdiction. The tribe's jurisdiction will simply no longer be concurrent with the state's – instead, tribal jurisdiction will be exclusive for certain purposes. Retrocession is accepted by the Secretary of the Interior in accordance with terms set forth in a proclamation by the governor of the state retroceding its jurisdiction.

As required by Executive Order, the Interior Department consulted on the retrocession request with the U.S. Department of Justice, which recommended a six-month waiting period between the date of acceptance and the actual transfer of jurisdiction in order to allow for an orderly transfer of authority from the State of Washington to the federal government and to ensure no jurisdictional gaps develop as a result. Accordingly, Interior's decision is that retrocession will be fully implemented as of 12:01 a.m. PST on April 19, 2016.

The Assistant Secretary – Indian Affairs oversees the BIA, which is headed by a director who is responsible for managing day-to-day operations through four offices – Indian Services, Justice Services, Trust Services, and Field Operations. These offices directly administer or fund tribally based infrastructure, economic development, law enforcement and justice, social services (including child welfare), tribal governance, and trust land and natural and energy resources management programs for the nation's federally recognized American Indian and Alaska Native tribes through 12 regional offices and 81 agencies.

The BIA Office of Justice Services' mission is to enhance public safety and protect property in Indian Country by funding or providing law enforcement, corrections and tribal court services to the nation's federally recognized tribes. It also coordinates emergency preparedness support on federal Indian lands by working cooperatively with other federal, state, local and tribal law enforcement agencies throughout Indian Country. It also operates the Indian Police Academy in Artesia, N.M., which provides training and professional development to BIA and tribal law enforcement personnel. Visit <http://www.indianaffairs.gov/WhoWeAre/BIA/OJS/index.htm> for more information about OJS and its work.

DOI Lets Wash. Give Up Jurisdiction On Yakama Reservation

[Law360](#), October 21, 2015

Law360, New York (October 20, 2015, 6:39 PM ET) – The U.S. Department of the Interior said Monday it has accepted from Washington an agreement ending the civil and criminal jurisdiction the state had held over certain offenses within the Yakama Nation, ending part of a highly criticized, decades-old policy that had given the state and the tribe concurrent jurisdiction over certain cases.

Under the agreement, the state will no longer be a principal authority on the Confederated Tribes and Bands of the Yakama Nation's reservation once the deal goes into effect in April 2016. The...

Yakama Tribe To Get Authority For Some Court Cases

[KNDU-TV Yakima \(WA\)](#), October 21, 2015

YAKIMA, WA.- It was a record summer for heat with temperatures in the hundreds, not to mention the state wide drought that took a toll on many crops and growers. However as we head into fall, apple orchards are closing up shop already, thanks to an early harvest. The apple harvest is now over about three weeks earlier than normal and while the apple commission says they saw the third largest crop this year in the state, coming in at 118 million boxes of apples, the sweltering heat ...

Yakama Nation Granted Jurisdiction Over Some Crimes On Reservation

[KUOW-FM Seattle](#), October 21, 2015

The Yakama Nation will have more control with its tribal police and courts over crimes committed on the nation's reservation. That's according to the federal Interior Department this week.

The Yakama Nation will have control over some crimes involving Native Americans, but other police agencies will still patrol portions of the reservation. Tribal leaders say it's a win to gain some control of their own land back.

But neighboring city and county agencies say they're worried about the logistics of sharing jurisdiction.

Yakima County prosecutor Joseph Brusich said his office and the tribal government haven't been communicating well for a couple years. He worries that under the new system for example, a native driver with a DUI could leave the scene of an accident if there wasn't a tribal officer there.

The federal government has given the tribes and overlapping agencies until April to work out the details.

The Yakama Nation did not respond to phone or email messages Tuesday.

Gillette Served Obama, Nation Well

[Bismarck \(ND\) Tribune](#), October 21, 2015

Jodi Gillette probably has been more involved in the Obama administration than any other North Dakotan.

Her association with Barack Obama began during his 2008 presidential campaign when she was in charge of statewide operations of the First American voting efforts. After Obama's election she joined the administration. First, Gillette served as an associate director of intergovernmental affairs at the White House in 2009-2010. In 2011, she joined the U.S. Department of the Interior as deputy assistant secretary for Indian Affairs and was appointed Special Assistant to the President for Native American Affairs in 2012.

Those positions gave her a voice in a White House that has seemed genuinely concerned about Native American issues. Last year the president and first lady visited Cannon Ball on the Standing Rock Indian Reservation. They visited privately with students, talked with leaders and attended a pow wow. They followed that visit with an invitation to some students to visit Washington, D.C. There also was a conference for students and others in Bismarck.

While Gillette couldn't be involved in issues related to the Standing Rock reservation since she's a member of the tribe, it wasn't a surprise when the reservation was selected for the presidential visit.

Gillette is proud of the administration's accomplishments. She was convinced during Obama's first campaign that he was sincere about his promises to help Native Americans. She points to several things that demonstrate Obama's support. The White House Tribal Nations Conference was started in 2009 with the goal of improving the dialogue between the administration and the reservations; the Violence Against Women Act was reauthorized in 2013 and included language allowing tribal jurisdiction in cases of women who are assaulted by non-tribal men on tribal lands; and two lawsuits were settled between the federal government and tribes with a combined value of more than \$3 billion expected to be sent to Native Americans.

The Tribal Nations Conference has won praise for providing a continuing conversation between the administration and tribal governments.

Gillette played an important role in this White House-tribal relationship and her voice has been heard.

Gillette recently left the administration and now splits her time between Bismarck and Washington. She's a member of the Washington-based law firm of Sonosky, Chambers, Sachse, Endreson and Perry LLP, serving as its policy adviser. The firm represents tribes for litigation, lobbying and economic development.

North Dakota should be proud of Gillette and her service in the administration. She's had a positive impact on national policy.

OFFICE OF INSULAR AFFAIRS

US Official Proposes Marshalls Fund Changes

[Radio New Zealand](#), October 21, 2015

A top US official has submitted a proposal to the Senate and House to allow the people of Bikini to use resettlement and relocation funds outside of the Marshall Islands.

Current law restricts resettlement funds for use within the Marshall Islands.

Assistant Secretary for Insular Areas Esther Kia'aina says it is an appropriate course of action to take regarding the welfare and livelihood of the Bikinian people.

The Bikinians were displaced by US nuclear weapons testing 70 years ago but are now looking at relocating again because of deteriorating conditions on Kili and Ejit Islands.

In addition to cramped living quarters and a lack of suitable sustainable resources, the islands have been experiencing more frequent storms and king tides resulting in salt water inundation and the destruction of crops.

Bikini Relocation Fund Changes Seen As 'Plan B' For Locals

[Radio New Zealand](#), October 21, 2015

A representative from Bikini Atoll says a proposal to allow people to use resettlement and relocation funds outside of the Marshall Islands is not wanted.

Currently, resettlement funds are restricted for use within the Marshalls but the Assistant Secretary for Insular Areas Esther Kia'aina says it is appropriate to open up the fund because of plight of the Bikinian people.

The Bikinians were displaced by United States nuclear testing 70 years ago but are now looking at relocating again because of increased flooding and deteriorating conditions on Kili and Ejit Islands.

Bikini liaison officer Jack Niedenthal says the US should take full responsibility for any resettlement including providing extra financing.

"We still got a ways to go, we still have to do some more lobbying and some more talking to people in Washington to make them understand that what's being proposed by the assistant secretary is what we view as 'Plan B'. It's not ultimately what we want in terms of helping our people."

Mr Niedenthal says current resettlement funding is already the Marshall Islands' right. Related

Chinese Support For The Pacific Region Continues

[Marianas Variety](#), October 21, 2015

SUVA, Fiji (Press Release) — China and the Pacific Islands Forum Secretariat further strengthened their relationship on Friday when the two met at a ceremony to hand over \$1.05 million to assist the Pacific region.

Forum Secretariat Secretary General Meg Taylor and Chinese Ambassador to Fiji Zhang Ping attended the ceremony and delivered speeches respectively.

Zhang reiterated his nation's ongoing interest in the region saying, "China attaches great importance to the South Pacific region. The Chinese side stands ready to enhance mutual understanding and cooperation with Pacific Island Countries and contribute to the development and capacity building in the region."

Accepting the contribution, Taylor said: "I warmly welcome this support that assists the Forum in advancing regional integration as well as helping member countries achieve sustainable development."

The handover ceremony provided opportunity to raise key Pacific region priorities identified through the Framework for Pacific Regionalism such as climate change and ICT.

"We seek your support for the Forum's position going into the COP21 negotiations in Paris, as articulated in the Pacific Islands Forum Leaders Declaration on Climate Change Action issued in Port Moresby last month," Taylor told Zhang.

She added, "China's commitment to support Pacific island countries to achieve greater ICT connectivity is to be commended and the special loans you have made available for ICT infrastructure connectivity, improving broadband networks, encouraging on-line education services, and ICT enterprises, are a generous initiative."

China became a Forum dialogue partner in 1990. Since then it has developed an important economic relationship with the region, particularly through its dedication to trade development.

"China has made an impressive commitment to advance trade and investment with the Pacific island countries. China's continuing support for the Pacific Trade and Invest Beijing is very much appreciated," said Taylor.

The financial support will be used to support activity by the China-PIF Development Cooperation Fund and the PT&I Beijing office and its activities.

Pacific-wide Talks Urged On Climate Migration

[Radio New Zealand](#), October 21, 2015

All countries in the Pacific are being urged to start discussions on how to help people forced to move from low lying atoll nations like Kiribati and Tuvalu.

184 million people worldwide were displaced by disaster between 2008 and 2014 and at special meetings in Geneva last week 110 countries gave the nod to a Protection Agenda for dealing with future migration challenges.

The experiences of small island countries which face rising seas due to climate change helped form the global action plan under the Swiss Norwegian Nansen Initiative

The Protection Agenda aims at collecting more information, improving humanitarian protection measures and better dealing with the risk of disaster back in home countries so people are not forced to move in the first place.

The Nansen Initiative's Walter Kaelin told Sally Round there's now a toolbox that can be adapted to each region's distinct challenges and needs.

WALTER KAELIN: It is a document that brings together a lot of good, effective practices states have used, states have developed in addressing situations where they were faced with people coming from countries affected by disaster when they had to decide whether or not to admit them. But we were also looking at how to prevent displacement, for instance through integrating issues of human mobility into disaster risk reduction, climate change adaptation. We're also looking at how one can help people to get out of harm's way before the disaster strikes for instance by looking at planned relocations as you have in your region. For instance Fiji is already in the process of relocating 45 villages away from eroding coastlines but then also looking at migration as a way of helping people to move out of areas that are particularly affected by the effects of climate change and disasters.

SALLY ROUND: Does it also provide a kind of legal framework or is it more about providing experiences and practices and examples for countries to learn from?

WK: This was not an exercise that aimed at setting new standards, at developing new law but rather trying to provide a toolbox to governments but also to regional organisations, so in the current situation, in future situations one could go back to the experiences made by other countries in other parts of the world and try to use that. Beyond that we feel there are huge differences from one region to the other. You in the Pacific region are not faced with a lot of cross-border displacement which does occur for instance in Africa, the Horn of Africa and western Africa or in Central America. Your case is much more about the future prospects of some of these island states, low lying island states becoming uninhabitable and with this toolbox we hope we are able to trigger discussion at regional, sub regional, but also domestic levels.

SR: Did you have any ideas, solutions from those consultations that you've been having for the last three years around the world about how Pacific island countries can get through these major issues that they're grappling with?

WK: If you're looking at the Pacific island countries and their people, and their populations, these are people that really do not want to move. Most of them want to stay in their countries. They're attached to the land, but due to environmental factors but also other factors linked to their development or lack of development make it increasingly difficult for people. What the communities told us is 'we really don't want to become refugees' and what they meant was they don't want to have to wait til disaster strikes. They rather would prefer to have the option of being able to emigrate, be it temporarily, be it permanently at the time when they decide to do that and if you're looking at the situation in the South Pacific then for some of the islands and their people it's quite easy because of special ties. For instance in New Zealand if you're talking about Niue or the Cook Islands people can easily emigrate to your country (New Zealand). Marshall Islanders, they can go to the United States but Kiribati and Tuvalu which are the most affected, they don't have those opportunities. I think their programmes like the Pacific access quota in New Zealand or seasonal worker programmes targeting vulnerable Pacific islands that do exist in Australia are good practices, good approaches. I think it's important it's not just New Zealand and Australia, it's also countries such as Fiji and others who even might be interested to receive people from countries like Tuvalu and Kiribati because of cultural ties, because they are interested to get a workforce or increase their populations. What I think is important in the South Pacific context is a dialogue between countries on how to facilitate migration because if this is not taking place then we might end up with irregular migration or we might end up with people hit by disaster ending up in humanitarian crisis situations so it's better to start a discussion now and one framework for such discussions that is quite adequate in my perspective would be the Pacific Islands Forum.

Marshalls Journalist Speaks On Climate Issues, Corruption In Pacific Islands

[Marianas Variety](#), October 21, 2015

HAGĀTŊA (The Guam Daily Post) — Author and journalist Giff Johnson spoke to students at the University of Guam on Monday evening about climate change and development in the Pacific islands.

His lecture, entitled "Idyllic No More: Pacific Island Climate, Corruption and Development Dilemmas," is based on his latest book — a compilation of essays detailing the looming climate threat to the region, its booming fishing industry, and the U.S. nuclear test legacy in the Marshal Islands.

In an interview with the Post, Johnson said people the world over should be concerned with climate change. The issue, he said, is how to handle rising sea levels and erratic weather patterns that seem to be escalating with changing temperatures. These factors have contributed to what Johnson calls climate-driven migration from remote Pacific islands to Guam and mainland U.S. Improving the lives of residents on these islands would help mitigate out migration.

The United States has a Compact of Free Association or COFA Freely Associated States that allows these residents to freely travel within the U.S. and its territories. The FAS are the Federated States of Micronesia, the Republic of the Marshall Islands and the Republic of Palau. Guam and the CNMI receive Compact Impact funds to mitigate some of the cost associated with taking in these residents but the funds have historically been much lower than actual costs.

Johnson believes that in order to improve the life of remote island residents and minimize migration, investment must be made not only to solar and wind power to combat climate change but to technology that will lessen the burden of living on more remote islands.

"For example this El Niño that we're in right now is predicted to cause a very long and serious drought," Johnson said. While Guam has various water resources available to it, remote islands are more or less completely dependent on rain water.

There have been investments made into solar or wind powered reverse osmosis machines that were placed in several remote islands in the Marshals. These machines produce drinking water out of sea water and remove the threat of a drought, Johnson said. "We need to get this kind of (technology) out to many of these remote islands."

To mitigate the cost of FAS citizens already on Guam, the CNMI and Hawaii, Johnson said something that would have significant impact is the reinstatement of Medicaid benefits for COFA migrants. "In 1996 the U.S. Congress cut off Medicaid access for people from the FAS...that lack of Medicaid coverage means (people seek health care later which) requires higher costs to hospitals in Guam and Hawaii," Johnson said.

Currently, initiatives by both the Guam and Hawaii delegations are pushing to reinstate Medicaid coverage for COFA migrants.

But the responsibility of improving life for FAS citizens doesn't rest solely with the U.S or other outside entities. Johnson said a fair amount of donor aid does reach the FAS but issue lie with mismanagement on the part of local governments. "Both the Marshals and FSM have tens of millions of dollars sitting there because of management issues with construction projects," Johnson said. Proper management of funds would create hundreds of jobs and provide incentive for residents to stay in their respective islands, he added.

A particular source of growth for the FAS could come from the fishing industry. Because FSM, the Marshals and Palau are part of the Parties to the Nauru Agreement, they are among 8 countries that control pricing on tuna fishing. In 2010, PNA brought in \$60 million. That amount has since jumped to about \$350 million. According to Johnson this presents an opportunity for institution like the University of Guam to provide education on managing and developing the fisheries business.

Corruption also plays a role in the mismanagement of funds. Johnson said that island governments in the past saw government employment as a means of spreading donor aid. Workers were hired with little focus on qualifications. But in recent years, donors have become more intent on results. This poses a challenge to government agencies that may have offices filled with workers, but not necessarily the best set of workers for the job. What results is a public that sees very little improvement despite outside support. "That's why I say the issue in the FAS has more to do with management and less about (needing) more money," Johnson said.

The problem is compounded in smaller islands by reluctance to voice open criticism of government or leaders. "In places like the Marshall Islands (reluctance is) pretty extreme given the cultural norms of not criticizing leaders," Johnson said. He said a significant difference between Guam and islands in the FAS was more public engagement stemming from an American style of dealing with government issues. "Unfortunately, (less engagement) ties in to people not reacting to these problems and not getting things changed," he added.

Rising Seas Are Already Damaging These Pacific Islands

[National Geographic](#), October 21, 2015

"Garlands of the gods" is how Kiribati poet Teweiariki Teaero describes the atolls of his homeland. And from the air, that is how they look, with a smoke ring of clouds above lush green slivers of land. How fragile they seem!

Built by the sea, they are increasingly being reclaimed by the sea. In February 2015, high spring tides coincided with storm-generated swells to flood homes and damage roads and seawalls in Kiribati's capital, Tarawa. (Read more about the threats to the island nation.)

When I arrived in April, repair work was still continuing, but I knew it was only a matter of time before the ocean challenged the islands' defenses once more. (Read our special issue on climate change.)

Despite the threat from the sea—which will only increase as climate change drives sea levels higher—the people possess depths of resilience and self-confidence. “I see adaptation as not just about seawalls but about revisiting our traditional knowledge systems,” Teaero told me. “We need the collaboration of our international partners, but an active collaboration as people who are empowered to tackle our own problems.”

A combination of science and traditional wisdom gives hope that, as Teaero writes in one of his poems, these islands will “rise over troubled seas.”

TACKLING AMERICA’S WATER CHALLENGES

New Melones Pulse Flows Begin Today

[Sonora \(CA\) Union Democrat](#), October 21, 2015

More than 7 billion gallons of water is scheduled to be released from New Melones Reservoir beginning today to ensure flows in the Stanislaus River will keep temperatures cool enough for adult salmon migrating up the river to spawn this fall.

Oakdale Irrigation District and South San Joaquin Irrigation District, which together hold senior water rights to the first 600,000 acre-feet stored in the 2.4 million acre-foot reservoir each year, announced the plan in a press release last week. The districts said it would benefit river conditions and fisheries, as well as the needs of agriculture and more than 200,000 residential customers downstream.

“This agreement shows that, with cooperation and some give and take, the needs of fish and ag can be met,” OID General Manager Steve Knell stated in the press release. “If the drought continues, we’ll need more of this type of cooperation — not less.”

New Melones contained 276,692 acre-feet of water as of Monday morning, according to the state Department of Water Resources, about 12 percent of its total capacity and 21 percent of its average historical capacity for this time of year.

The total “pulse flow” set to begin today — 23,000 acre-feet — is enough to fill about 23,000 football fields one-foot deep in water. It’s also about 6,000 acre-feet more than Tuolumne Utilities District, the county’s largest water purveyor, uses on average each year to serve roughly 44,000 residents.

Earlier this year, the irrigation districts sparred with the U.S. Bureau of Reclamation — which manages New Melones Reservoir — over spring pulse flows that they feared would leave as little as 147,000 acre-feet in the reservoir by the end of September.

However, “aggressive conservation efforts” by OID and SSJID as well as “better-than-expected spring and summer runoff” helped to create the surplus, the press release stated.

The districts agreed to use the unanticipated savings to help the Bureau of Reclamation send the required pulse flow down the river to attract adult salmon returning from the ocean to spawn.

According to the press release, “west side” water users will divert the released water farther downstream after it passes through the Stanislaus and lower San Joaquin rivers and have agreed to compensate the districts.

Federal policies requiring such pulse flows have drawn the ire of local residents and elected leaders, who have argued that releasing so much water during a drought doesn’t make sense.

Congressman Tom McClintock, R-Roseville, introduced legislation in the U.S. House of Representatives earlier this year called the Save Our Water Act that would suspend pulse flows in areas affected by drought.

Though no action has been taken since the bill was introduced in March, McClintock says he’s hopeful the House will vote on it sometime before the end of the year.

Supes Vote To Oppose Delta Tunnels Plan

[Lodi \(CA\) News-Sentinel](#), October 21, 2015

STOCKTON — At a meeting on Tuesday, the San Joaquin County Board of Supervisors voted to adopt a resolution in formal opposition of California WaterFix, also known as the twin tunnels plan.

“The WaterFix is just a thinly veiled version of the former (Bay Delta Conservation Plan) and continues to push the fatally flawed twin tunnels, which will simply sacrifice one region of California for the benefit of another,” said Supervisor Kathy Miller.

Supervisor Bob Elliott added that the plan will add no new water to the state’s supply, calling it a “multibillion-dollar smoke-and-mirrors scheme.”

Comments were offered by both board members and members of the public. The collected comments will be submitted on behalf of the County of San Joaquin along with the Central and South Delta water agencies.

RENEWABLE ENERGY

Environmental Update On Offshore Wind

By James A. Bacon

[Bacon's Rebellion \(VA\)](#), October 21, 2015

Alstom wind turbine like that contemplated for installation off Virginia Beach.

by James A. Bacon

Judging from comments made in a Environment Virginia-sponsored webinar held this morning, environmentalists, the McAuliffe administration and Dominion Virginia Power are operating on the same wave length when it comes to developing offshore wind power in Virginia. If environmental groups have big differences with Dominion on how to proceed, no sign of criticism surfaced in the webinar presentations.

The main focus of environmentalists, as it is for Dominion, is bringing down the cost of offshore wind power. The top priority nationally is building a big enough pipeline of wind power projects off the Atlantic Coast to persuade manufacturers, specialty vessels and others in Europe's established wind-power supply chain to create a presence on the U.S. East Coast. The existence of a supply chain, along with continued technological development, could make offshore wind power far more cost competitive in the U.S. than it is today.

Here in Virginia, the top priority is ensuring that Dominion builds two experimental turbines off Virginia Beach that will provide the data needed to optimize the development of hundreds of wind turbines in a subsequent project potentially large enough to power 700,000 homes. The big hurdle is persuading the State Corporation Commission that such a massive investment would constitute an acceptable trade-off between cost, reliability and environmental goals.

David Carr, general counsel for the Southern Environmental Law Center, provided an overview of Dominion's offshore wind initiatives. Dominion solicited bids to build a two experimental turbines off the Virginia coast. (The turbines would test an unproven hurricane-resilient design and a new turbine foundation.) The original plan was to seek SCC approval in 2015, said Carr, but the low bid of \$375 million to build the two turbines far exceeded the original estimate of \$230 million. Dominion has restructured the contract by breaking it into four components in the hope of stimulating more competitive bidding and reducing the risk premiums bidders build into their offers. The new goal is to file with the SCC by June 2016.

Hayes Framme, advisor for infrastructure and development with the Secretariat of Commerce and Trade, said the McAuliffe administration played a key role in moving the Dominion's experimental-turbines project forward by negotiating a complex lease with the Bureau of Ocean Energy Management and other federal agencies to lease the ocean bottom where the turbines would be located. "Without this lease," he said, "we would not be able to get these turbines in."

An offshore wind farm would advance two McAuliffe administration goals: increasing the state's commitment to renewable energy and also promoting economic development. A study completed this summer found that Virginia is "uniquely positioned" to house "at least a portion, if not most, of the supply chain" supporting an East Coast offshore wind industry, Framme said. Virginia ports are located in the Mid-Atlantic, providing convenient access to projects to the north and south, and it has a large existing ship-repair infrastructure.

"Having a commercial deployment off Virginia's coast sends a signal that we are serious," Framme said. "If we don't lay the foundation now, it will be more difficult for us to take advantage of that opportunity when it does come."

Virginia's projects are not sufficiently large by themselves to coax the offshore wind supply chain to bolster its U.S. presence. That will take commitments from multiple states. Fortunately, that commitment seems to be forthcoming, said Stephanie McClellan, director of a special initiative on offshore wind housed at the University of Delaware. The states of New York, Massachusetts, Rhode Island, Maine and Maryland all are actively exploring offshore wind opportunities. The state of New York has set a goal of 50% renewables by 2030, while New York City has established a goal of 100% renewables for electricity consumed by municipal operations.

To build a supporting infrastructure for offshore wind, said McClellan, eastern U.S. states need to provide market visibility and revenue certainty for a volume of projects over time, as well as more data on site-specific conditions such as wind speeds and wave size. The cost of wind power dropped "precipitously" in Europe as the industry gained scale; it will do so in the U.S. as well, she said.

Bacon's bottom line: I posed one question to the presenters: Given the intermittent nature of wind production, has anyone studied the impact of a massive wind farm on the reliability of offshore electricity production in Virginia? The short answer: No. However, presenters noted that European countries have integrated large off-shore wind projects into their power grids, and PJM Interconnection, the group that ensures grid reliability in the Mid-Atlantic and parts of the Midwest, including Virginia, has looked into the issue. There are currently no comments highlighted.

ONSHORE ENERGY DEVELOPMENT

Interior Dings Chesapeake \$2.1M For Shoddy Reporting

[Greenwire](#), October 20, 2015

The Interior Department yesterday announced a \$2.1 million civil penalty against Chesapeake Energy Corp. for misreporting the amount of gas it produced and sold from American Indian lands in Oklahoma. The Oklahoma City-based company failed to comply with a 2011 order that found “systemic errors” in the company’s monthly production reports for more than 100 Indian leases, according to Interior’s Office of Natural Resources Revenue. Chesapeake agreed to amend the monthly reports, but it continued to maintain inaccurate information on the agency’s data systems, ONRR said. The company was assessed a penalty based on “knowing or willful maintenance” of the inaccurate information, ONRR said.

Libs Win In Canada

[Politico](#), October 21, 2015

With help from Andrew Restuccia and Darius Dixon

CANADIANS ELECT GREENER GOVERNING PARTY: Canadians yesterday ushered into power the Liberal Party and its young leader, Justin Trudeau, in an election where energy and environmental issues played a larger role than they have on the campaign trail here. Trudeau’s government would be friendlier to climate policies meant to limit greenhouse gas emissions than its predecessor, as Pro’s Elana Schor reports. The Liberals “would unseat Prime Minister Stephen Harper’s Conservatives, whose nine-year reign has been marked by notable friction with the U.S. over Obama’s slowness to decide on” the Keystone XL pipeline. The CBC projected soon after the polls closed last night that Trudeau’s party won enough seats to form a majority government.

Story Continued Below

Does this mean the end of the Keystone Saga? HAHAHAHAHhahahahah, oh dear reader, you are a wit. Of course not. As Elana writes, “While Trudeau is also pro-Keystone, a fast rejection of the pipeline by Obama could give a new Liberals government time to pivot away from the controversial project to open a new chapter in continental relations.” But whatever the president decides — whether it’s this week, to let Trudeau start with a clean slate, or next year — the pipeline likely will find itself facing another lengthy battle in court.

And the ramifications for climate talks could be just as significant, per Elana: “the Canadian Liberals have vowed to be stronger on the environment than Harper has been,” but “they also promise to give individual provinces greater power to decide on their own carbon-cutting strategies.”

BIDEN, OBAMA AND KERRY TO CHAT TODAY: Whatever could the President, the Vice President, and the Cabinet official with the power to approve border-crossing infrastructure permits have to discuss in the Oval Office the day after the Canadian Elections? The Stanley Cup prospects of the Bruins, Blackhawks, and Flyers, perhaps? The literary merits of Margaret Atwood’s MaddAddam Trilogy? Perhaps ... perhaps a certain pipeline controversy? Maaaaybe? Nah. The White House wouldn’t say what the trio would discuss, only that the meeting is scheduled for 3 p.m. and reporters aren’t invited. Has to be the hockey, right? The Blackhawks are favored to win it all.

WELCOME TO TUESDAY! I’m your host Eric Wolff, and if Morning Energy was late to your inbox this morning, blame the creators of the Energy Policy Simulator (see below). TOP CLIMATE DIPLOMAT TO HAVE STARE DOWN WITH SENATE: Todd Stern, the State Department’s top global warming negotiator, will face Republican critics of the Obama administration’s push for a new international climate change agreement during a Foreign Relations subcommittee hearing today. Sen. John Barrasso, the top Republican on the subcommittee, is one of the most vocal opponents of Obama’s climate agenda. He and other GOP lawmakers are sure to ask Stern pointed questions about whether the deal will actually make strides in cutting emissions, whether China is serious about its climate pledges and how the United States can promise money to developing countries when Congress controls the purse strings. But Stern has been working on international climate issues for years, and he’s not likely to be easily rattled by the questions. Stern will also likely have back-up from climate advocates like Sens. Tom Udall, Barbara Boxer and Ed Markey, who all sit on the subcommittee. The hearing comes as international diplomats, including Stern’s deputies at State, are fighting over a draft negotiating text at a five-day session in Bonn, Germany, this week.

NOM NOM NOM NOM NOM: The Senate Energy and Natural Resources Committee is scheduled to hear from a crowded table of nominees this morning, including those for the USGS and the departments of Energy and Interior. There may not be too

many fireworks over the six candidates but some of the positions have had some longstanding issues. For one, Victoria Wassmer, an FAA official, was tapped last year to be CFO for the EPA but she never got floor time. This time around, she's been asked to be DOE undersecretary of energy for management and performance, a position Energy Secretary Ernest Moniz created as part of a leadership reorganization plan but that has never been filled. A name many people are familiar with on today's agenda is Mary Kendall, the longtime acting Interior inspector general who tangled a bit with House Republicans. She's been nominated to officially take the top IG position. Cherry Murray will also be at the witness table in her bid to be the Science Office director at DOE, a position that's been vacant since April 2013 and whose previous contender languished for more than a year. Also testifying today are Suzette Kimball for USGS director, Kristen Sarri for assistant secretary of Interior, and John Kotek for DOE's top nuclear energy official. The hearing starts at 10 a.m. in Dirksen 366.

SHALL WE PLAY A GAME? HOW ABOUT A NICE GAME OF CLIMATE CHANGE POLICY? Think of it like a low-fi SimCity, except instead of municipal policy, you get to tweak nationwide approaches to reduce greenhouse gas emissions. Ever wondered just how a \$30 carbon tax would do? How about \$52? What if you focus on making cars use less gasoline? Or investing more in solar and wind technology? You can see all of that in the immensely detailed Energy Policy Simulator, a tool being unveiled today at an event in D.C. by Energy Innovation, a climate change policy think tank based in San Francisco. The group dedicated \$1 million and a team of five programmers plus a rotating array of outside help to develop a digital tool that shows the impact of an astonishing variety of climate change policies. "I think people fall in love with specific policies, but they don't have objective ways to measure the results of policies," Hal Harvey, CEO of Energy Innovation, told ME. The tool provides immediate feedback on the effect of different policies at different scales. It's probably NSFW, if your intent is to do some work that day.

No "foot on the scale." The goal was to do an objective assessment of any number of different policies, Harvey said. To make sure they weren't skewing the model, they made it open source, so anyone can look at the programming and the model's math. Though the webtool is locked into U.S. data, anyone can download a desktop version and replace the U.S. data with other national data. The desktop version allows even more policy option. Considering that the web tool allows users to devote research money to reducing livestock flatulence, ME's mind boggles at what would be more detailed.

If you go to the unveiling: 10:30 a.m., Rayburn 2226

BUSINESS LEADERS 'AFFIRMED' BY WHITE HOUSE EVENT: ME spoke to some of the business leaders who pledged to reduce their carbon footprint as part of an event at the White House yesterday. It was "certainly a reaffirmation that we're on the right track," Hugh Welsh, president of DSM North America, told ME. While 81 companies pledged to take action, Welsh said he was irate at other executives who work to block climate change policies. "If they can't embrace some of the initiatives, at least get out of the way, and don't lobby against some of the changes we'd like to see." Ikea U.S. president Lars Petersson said the "very strong commitment from the US government" and private sector is an important starting point, but he said he was surprised the event didn't address a few issues, like waste management and squeezing carbon out of the supply chain.

GAS UTILITIES VOLUNTEERS TO BE SAFER: American Gas Association" is announcing an update to its "Commitment to Enhancing Safety" today, including new physical and cybersecurity efforts, implementation of leading practices related to pipe installation and an initiative to continue the development of a diverse and inclusive workforce capable of operating and maintaining the 21st century technology and infrastructure that delivers clean natural gas. It has also set up a peer review program in which natural gas utilities review each other's safety programs. The announcement follows the release of new inspection rules from the Pipeline and Hazardous Materials Safety Administration earlier this month.

GAS TERMINAL APPROVED: The Department of Energy authorized Emera CNG, LLC to export up to 8 million cubic feet per day of domestically produced compressed natural gas for 20 years from Emera's proposed terminal in Palm Beach, Fla.

THERE THEY GO AGAIN: CHESAPEAKE ENERGY FINED BY ONNR: The Office of Natural Resources Revenue hit Chesapeake Energy with a \$2.1 million civil penalty for underreporting its natural gas production and sales for leases on Indian land. It's not the first time Chesapeake has heard from the tiny agency. In 2013, ONNR fined the company \$765,000 for exactly the same sin. Of course, none of those are much compared to the \$10 million fine levied by EPA in 2013.

HYDRO WANTS SOME RESPECT, LAUNCHES CAMPAIGN: The National Hydropower Association is announcing an ad campaign today intended to persuade Congress to go ease permitting requirements. "As a nation, if we are serious about decreasing carbon emissions and expanding clean energy solutions, we simply can't allow hydropower to be hindered by process that can take up to ten years," Linda Church Ciocci, NHA Executive Director, said in a statement. The campaign, which runs into five figures, includes a website, a video, and paid context ads.

Chesapeake Fined \$2.1M For Repeatedly Underreporting NatGas Volumes In Oklahoma

[Natural Gas Intelligence](#), October 21, 2015

Chesapeake Energy Corp. has been fined more than \$2.1 million by the U.S. Department of Interior for repeatedly underreporting natural gas production volumes in Oklahoma.

Interior's Office of Natural Resources Revenue (ONRR) said Monday that Chesapeake had failed to comply with an October 2011 order that found "repeated, systemic errors" in monthly reporting of gas produced and sold from more than 100 leases on land owned by tribes and individual Native Americans. ONRR had ordered Chesapeake to restructure its monthly reporting system as part of a review to correct any unreported/misreported volumes.

"While the company assured ONRR it had corrected the reports, follow-up checks still found additional errors," said Interior's Paul A. Mussenden, deputy assistant secretary for natural resources revenue management. "Correct royalty reports, especially on American Indian leases, are essential for ONRR to ensure all royalties are paid, to provide reliable data used by ONRR's audit and compliance teams, and to provide accurate data to the American public."

Interior eventually obtained Chesapeake's compliance to amend monthly reports but it "continued to maintain inaccurate information on ONRR data systems for an extended period," officials said. The fine, which covers misreported amounts produced on the individual leases only, is for "knowing or willful maintenance of this inaccurate information."

After Interior issued its initial request in October 2011, Chesapeake informed ONRR in May 2012 that all of the corrections required had been submitted. However, follow-up testing found more underreported volumes. The company then said it corrected those additional errors, but further reviews found still more incorrect data.

Following the settlement announcement on Monday, a Chesapeake spokesman said the company looked forward "to further strengthening our relationship with the Department of the Interior."

Two years ago Chesapeake was fined \$765,000 for "knowing or willful submission of inaccurate information" of royalties on another Indian lease also in Oklahoma (see *Shale Daily*, April 3, 2013). In early 2014 the company also was ordered to pay \$428,400 for underreporting royalties on a tribal lease in Oklahoma dating back to 2005. In that case, ONRR said auditors found inaccurate reports and notified the company, but Chesapeake did not make the proper corrections.

Earlier this year Chesapeake agreed to pay \$119 million to settle a lawsuit with a private landowner in Oklahoma for allegedly underpaying gas royalties on nearly 12,000 wells over a 10-year period (see *Shale Daily*, Jan. 23). According to filings, Chesapeake Operating LLC agreed to pay for improperly deducting expenses for marketing, processing, compression and other midstream services for 11,800 gas wells. The lawsuit covered production from 2004 through 2014.

Company Fined \$2.1M For Under Reporting Gas From Indian Leases

[Native American Times](#), October 21, 2015

DENVER (AP) — Chesapeake Energy Corp. has been fined \$2.1 million for under reporting natural gas produced on Indian leases in Oklahoma.

The Department of Interior's Office of Natural Resources Revenue Office in Denver said Monday it issued the civil penalty against the Oklahoma City-based company for failing to comply with an October 2011 order requiring it to review the amounts reported for more than 100 leases. In a statement, the office said that Chesapeake said it complied with the order in 2012 but follow up testing found additional under reported volumes which were then corrected in 2013.

The 2011 order covered land owned by tribes and individual Native Americans. The fine covers misreported amounts produced on the individual leases only.

USGS Report States Earthquakes Coincide With Oklahoma Oil Booms

[KOCO-TV Oklahoma City](#), October 21, 2015

A study by the United States Geological Survey states that the earthquakes from the past 100 years seem to coincide with the oil boom in Oklahoma.

Okla. Regulators Shutter 3 More Wells Near Rumbling Pipeline Hub

[EnergyWire](#), October 21, 2015

Oklahoma oil and gas regulators dealing with a dramatic increase in earthquakes near the pipeline hub of Cushing have shut down three more disposal wells. Another well was shut down by the company that owns it after regulators said they were concerned it was drilled too deep. And the operators of seven other wells were told in a letter written Friday and released yesterday that they must reduce the volume of drilling waste that they inject deep underground. The Oklahoma Corporation Commission (OCC) says it has also told the operators of 13 other wells in the Cushing area that they may need to change operations in the future. The commission is directing wells within 3 miles of the recent earthquakes to shut in. Wells 3 to 6 miles from the shaking have to reduce volumes by 25 percent. Wells 6 to 10 miles away are on notice...The Department of Homeland Security has taken an interest in the earthquakes in the area because its facilities are considered critical national infrastructure, according to a paper by scientists from USGS and elsewhere published online last month.

FOIA FAIL: BLM Fails To Produce All Photos In Response To Sun Times' FOIA Request

[Fairfield \(MT\) Sun Times](#), October 21, 2015

It's an important law, one that allows citizens and their representative – the media – to seek the hidden details of the machinery of government. The rules and process are well defined under federal law, the Freedom of Information Act, or FOIA.

When the request is made of a federal agency, that agency has a limited amount of time to respond. The agency must produce the data requested or explain why, under the Freedom of Information Act, it does not have to produce the information.

If any part of the request is denied, the agency must specify what part of the FOIA request is being denied and must explain the reason for the denial.

A couple of years ago the Sun Times received, from an anonymous source, documents related to the proposed Solenex, LLC natural gas well on public lands in the Lewis and Clark National Forest. Some of the documents originated with the U.S. Forest Service; others from the Bureau of Land Management.

Also included were 18 photographs, in color, approximately 8 ½ x 11 inches in size and of medium quality.

Since we had in our possession 18 photographs related to the Solenex lease, we decided to contact the BLM and see if they had additional photos in the Solenex file. We also hoped that, in the process, this newspaper would be able to get final confirmation that the photos we already had were authentic (since then, we have confirmed through another source that the documents and photos are authentic).

We contacted the BLM office in Great Falls and were told that yes, they had photos in the Solenex case file. The Sun Times asked for the photos, but was advised that we should go through the FOIA process.

The Sun Times, after researching the Freedom of Information Act, filed the FOIA request with the FOIA Officer at the BLM Montana state office in Billings. Immediately we received confirmation that our request had been received. We were also advised that we would be receiving a confirmation letter with a case number shortly.

When the Sun Times had not received the photos or the promised confirmation letter, we asked what the holdup was. The answers we got were unsatisfactory, but since the clock was ticking on the BLM window to respond, we waited.

When the time was up for the BLM to produce the photos, we received a package from their office in Billings. In the package were a cover letter and 16 poor quality photocopies of photos.

Sixteen photos. Not eighteen. Two photos were missing.

In the cover letter, the BLM advised the Sun Times that the agency could not confirm the date or location of the photographs. Curiously, the two omitted photos were the only ones that included a person in the photos. The Sun Times believes that the person in the photographs, who is still employed by the BLM, was the petroleum engineer who worked on the Solenex Application for Drilling Permit, or APD.

The Sun Times was able to pinpoint the location of one of the two withheld photos, and we believe that the photos, at least some of them, paint a far different – pardon the pun – “picture” of the drillsite than what has been presented so far. To do this, the Sun Times has relied on information from a surveyor, publicly available satellite data and a recent flyover of the area, photographing the drillsite.

But the point is, why did the BLM hold back the photos?

This newspaper has always enjoyed a good relationship with the Bureau of Land Management. The agency has always been cordial and responsive to our requests for information. Of course, the Sun Times does not engage in “fishing expeditions” when we seek information. Our research and understanding as it relates to the Solenex case in particular and oil and gas exploration in general exceeds that of many media outlets. It has become a specialty of this newspaper.

For the Sun Times, though, we are faced with the question, “If you have no idea of the details of the information you seek in a FOIA request, how do you know the agency has complied fully?”

In our case the BLM, in their cover letter and in a follow-up email, said that all of the requested photos had been produced. When we sent an email with the two non-disclosed photos to the BLM FOIA officer asking why the two pictures were not included, we waited two weeks for an answer. The answer was that the person doing the FOIA search thought those two photos were excluded from the FOIA. The BLM apologized and explained that we should have requested better quality copies of the photos.

As the Sun Times considers its options in this matter, we hope that the BLM as well as the other agencies involved realize that this community newspaper does its homework. Our readers expect and deserve no less.

OFFSHORE ENERGY DEVELOPMENT

Feds Probing Death Of Worker On Gulf Drillship

By Jennifer A. Dlouhy

[Fuel Fix \(TX\)](#), October 20, 2015

WASHINGTON — Federal investigators are probing the death of a worker on a drillship in the Gulf of Mexico that was preparing to bore a well for Chevron.

The accident happened at about 10:15 a.m. Tuesday morning about 200 miles south of Lake Charles, La., in a deep-water leasing area known Keathley Canyon block 96. The Pacific Santa Ana drillship was just beginning operations for Chevron in

about 4,800 feet of water at the site and had not yet penetrated the sea floor when an employee of that drilling contractor was fatally injured.

There were no other injuries at the site, and operations on the drillship have been shut down.

Scant details were known about the accident Tuesday afternoon, as officials with the Bureau of Safety and Environmental Enforcement and the Coast Guard flew to the site and began investigating.

Chevron is the operator on the lease, with a 36 percent working interest. BP and ConocoPhillips have minority interests in the site, with 34 percent and 30 percent respectively.

Houston-based Pacific Drilling said in a statement it was "actively addressing the needs of (the worker's) family and the affected employees."

"Our prayers and thoughts are with the family of our colleague and our Pacific Drilling family closely associated with him," the company said.

Chevron said in a statement that its "thoughts and prayers are with the contractor's family, friends and colleagues."

The lease — located next to a number of discoveries in the Gulf and part of the Lower Tertiary trend — was a top target during a 2009 government auction, when BP made a winning \$28.1 million bid for the block, beating out Chevron USA, which had offered \$14 million, and ConocoPhillips, which bid \$7.3 million.

In an exploration plan filed with federal regulators earlier this year, Chevron outlined ambitions to drill up to seven wells at the site.

The Santa Ana is one of eight high-specification drillships in Pacific's fleet, built to Chevron's requirements and delivered to the company in 2012. According to Chevron, at the time it was the first drillship capable of performing dual-gradient drilling, which uses two different drilling fluids — each with different weights — to more closely match formation pressures. The technology facilitates drilling high-depth wells.

Feds: 1 Dead In Accident On Drillship In Gulf Of Mexico

[Associated Press](#), October 21, 2015

NEW ORLEANS (AP) – Two federal agencies are investigating an accident that killed a man on a ship drilling for oil in the Gulf of Mexico, according to the agency that oversees offshore drilling.

Nobody else was hurt in the 10:15 a.m. accident Tuesday on the drillship Pacific Santa Ana, said Amy Roddy, spokeswoman for the owner, Pacific Drilling SA of Houston.

She said the company is not releasing any details about the man to respect his family's privacy. She also refused to disclose how the man died or details of the accident, citing an ongoing investigation.

The ship is working for Chevron, and drilling has been shut down because of the investigation, she said.

The Bureau of Safety and Environmental Enforcement said in a statement Tuesday that the crew was starting to drill in 4,800 feet of water, about 200 miles south of Lake Charles, when the accident occurred. The statement did not reveal the nature of the accident, but said the bureau and U.S. Coast Guard were investigating. The statement said there were no reports of pollution.

According to Pacific Drilling's website, the Pacific Santa Ana can carry up to 200 people, can operate in up to 12,000 feet of water, and is equipped to drill as deep as 35,000 feet. It is among eight drillships owned by the company.

Worker Dies On Offshore Drilling Rig

By Alison Sider

[NASDAQ](#), October 20, 2015

A worker died on an offshore drilling rig in the Gulf of Mexico, federal regulators said Tuesday.

The worker was employed by Pacific Drilling SA, which owns the Pacific Santa Ana drillship. The company is investigating the cause of the incident, spokeswoman Amy Roddy said.

The vessel was doing work for Chevron Corp. about 200 miles south of Lake Charles, La., according to the Bureau of Safety and Environmental Enforcement, which said the death is the first this year related to offshore drilling operations in the gulf.

A spokeswoman for the agency said inspectors are on board the vessel, where operations have been shut down. Chevron said the incident didn't cause pollution or other injuries.

The Pacific Santa Ana has been contracted to Chevron since 2012. It is capable of drilling in waters up to 12,000 feet deep, but Tuesday's incident occurred in shallower water, at a depth of 4,800 feet.

1 Reported Dead On Gulf Of Mexico Drillship Working For Chevron

[New Orleans Times-Picayune](#), October 21, 2015

Federal investigators are responding to a report of a person dead on a drillship in the Gulf of Mexico about 200 miles south of Lake Charles, the Bureau of Safety and Environmental Enforcement said Tuesday afternoon (Oct. 20). No other injuries were reported and there was no sign of pollution, the agency said.

According to a BSEE statement, the Pacific Santa Ana drillship was starting drilling operations for Chevron when the death occurred. Operations have been shut down and personnel remain onboard, according to the drillship's operator.

The bureau and the U.S. Coast Guard will investigate the incident. Investigators traveled to the site Tuesday afternoon and have begun collecting evidence and taking statements.

No additional information was immediately available.

1 Dead In GoM Accident

By Audrey Leon

[Offshore Engineer](#), October 20, 2015

An accident onboard the drillship Pacific Santa Ana has left one worker dead. The news was confirmed by the US Bureau of Safety and Environmental Enforcement (BSEE), operator Chevron, and the drillship's owner, Pacific Drilling.

The Pacific Santa Ana drillship has been under a five-year contract with Chevron in the Gulf of Mexico since 2012.

Chevron confirmed that a contractor, an employee of Pacific Drilling, was fatally injured onboard the drillship around 10 am (CST) on 20 October. The drillship was some 200mi south of Lake Charles, Louisiana, operating in 4800ft of water, on the Chevron-operated Keathley Canyon Block 96.

Chevron said that drilling operations have since been shut down, and that no other injuries were reported. BSEE said that personnel remain on the drillship and that no pollution has been reported.

"Our prayers and thoughts are with the family of our colleague and our Pacific Drilling family closely associated with him," Pacific Drilling said in an emailed statement about the incident.

Inspectors from both BSEE and the US Coast Guard will travel to the Pacific Santa Ana, owned by Pacific Drilling, to begin collecting evidence and take statements.

Chevron holds 36% working interest in the block, with co-owners BP (34%), and ConocoPhillips (30%).

The Pacific Santa Ana began its contract with Chevron in 2012. The ship was purpose-built for dual gradient drilling operations and has three separate fluid systems, one for handling drilling mud, another for the seawater-like fluid in the marine riser, and another for the seawater powering the pump. The moon pool was redesigned for handling the 450,000lb MaxLift pump in addition to the usual subsea equipment.

The ship was to use its dual gradient drilling functions for Chevron's Anchor-1 prospect last year in Green Canyon block 807, but the well was junked due to mechanical failures. However, in January of this year, Chevron hit high quality oil pay in multiple Lower Tertiary Wilcox Sands at a second Anchor well also drilled by the Pacific Santa Ana.

Fatal Accident Reported On Pacific Santa Ana Drillship In Gulf Of Mexico

[gCaptain](#), October 21, 2015

The U.S. Bureau of Safety and Environmental Enforcement said Tuesday it was responding to a report of a death on the Pacific Santa Ana in the Gulf of Mexico off the coast of Louisiana.

Pacific Santa Ana was beginning drilling operations for Chevron approximately 200 miles south of Lake Charles, LA, in 4,800 feet of water when the incident occurred. According to the operator, the rig has been shut down, the BSEE said.

There were no other injuries reported and personnel remain on the drill ship, BSEE said. There was also no reported pollution.

The incident is being investigated by both the BSEE and U.S. Coast Guard. BSEE and U. S. Coast Guard inspectors traveled to the drillship Tuesday afternoon and have begun collecting evidence and taking statements.

The Pacific Santa Ana is on a five-year contract with Chevron ending in May 2017.

The fifth generation drillship was built in 2011 by Samsung Heavy Industries and is capable of operating in 12,000 feet water depth. When delivered to the Gulf of Mexico in 2012, the drillship was the first designed with the capacity to perform dual gradient drilling, a technology that uses two weights of drilling fluid to match the natural pressure when drilling ultra-deepwater reservoirs.

The Pacific Santa Ana is owned by Houston-based Pacific Drilling. It can accommodate up to 200 crew.

Briarcliffe Acres Votes Against Offshore Drilling

[Myrtle Beach \(SC\) Online](#), October 21, 2015

In a storm of debate over offshore drilling, Briarcliffe Acres surfaced as the latest coastal town to join a united front against seismic testing and drilling for oil and natural gas off of South Carolina's beaches.

Missing councilwoman Abby Stewart, who has been with family on the west coast, the town council unanimously passed a resolution Monday, joining 23 other S.C. coastal towns in a stance against offshore drilling.

We don't even know what's out there. We don't know if there's gas, if there's natural gas or if there's crude oil.

Congressman Tom Rice

"We understand what damage can ensue from any spill that could happen out there," said Councilman Huston Huffman. "We don't want to take the risk of a spill out there polluting the beaches."

For many the rallying cry against offshore drilling echoes the loss of tourism dollars that could cripple coastal economies. But for Briarcliffe Acres, a "bedroom community" of about 500, any damage would not just hit a tourist destination, it would hit home.

The resolution had been in the works for a couple of months, Huffman said, but other issues pushed the matter to Monday's agenda.

A news release from the Stop Oil Drilling in the Atlantic Leadership Team on Monday called the vote an "incredible show of unity, and a strong message" appealing to legislators to "stop Washington from forcing this on South Carolina."

Legislators say the region's resolutions may do little to stop offshore drilling if the project is ultimately approved.

The Interior Department's Bureau of Ocean Energy Management announced a draft proposed program in January that opened up two planning areas for testing along the coast from the Maryland-Virginia state line to the Georgia-Florida line.

The coast of Virginia was proposed for a potential offshore drilling site five years ago, but plans fizzled in the wake of the disastrous Deepwater Horizon oil spill in the Gulf of Mexico.

Buzz of where the potential rigs will actually go abound among opponents, with doom scenarios marring the coastlines from Georgetown to Wilmington, N.C. Advocates banded together – bridging the gap between party lines – to send a clear message to legislators that residents don't want the rigs off of the \$18 billion tourism-rich South Carolina coast.

Dr. Jim Watkins, a retired Presbyterian minister who lives in Pawley's Island, helped form the Stop Oil Drilling in the Atlantic alliance, which he describes as a "grassroots citizen's organization which works on 'just this one issue of drilling.'"

The group praised Briarcliffe Acres for joining other municipalities like Myrtle Beach, Atlantic Beach, North Myrtle Beach and Surfside Beach that have all passed similar resolutions in recent months.

Briarcliffe Acres' action brought all of Horry County's coastal towns on board against offshore drilling, said Jean Marie Neal, a SODA representative.

"The vote today means every coastal municipality in South Carolina has said no to offshore drilling off our beaches," Watkins said in the release.

Myrtle Beach City Council passed a resolution Aug. 11 saying it wanted to protect the beaches from potential oil spills, joining at least 18 other municipalities opposing offshore drilling at the time. The decision was greeted with applause from 100 spectators in the audience.

Opponents say offshore drilling would hurt marine life, pumping into the Atlantic the potential of spills and sound waves that would send sea creatures scurrying. And the risk to the state's high dollar tourism industry makes the idea demand a price too high to pay.

Advocates say the drilling can be done safely and tapping into an oil or natural gas reserve could help the country move away from its dependence on foreign oil, helping in turn with national security. The underwater goldmine would mean more jobs and tax dollars.

"The possible jobs and revenue gained from drilling is miniscule compared to the dollars tourists spend in Horry County and the rest of coastal South Carolina," Watkins said in the release. "Giving our coast to the oil and gas industry simply does not make economic sense." A closer look

The Bureau of Ocean Energy Management has the power to open the Atlantic up for oil leasing with or without any state input, said Congressman Tom Rice.

And the idea that South Carolina would profit from any offshore drilling is not a possibility in federal legislation – yet. Rice said his office is working on a bill that would change that.

The bureau is reviewing if and where oil and gas leases might be issued on the Atlantic Outer Continental Shelf, but the draft plans call for only one lease to be issued. Plans also include a 50-mile buffer from the coastline. The buffer would keep the operation out of immediate sight from a shoreline, but would also keep any potential revenue gain out of the state's coffers.

The state would only reap revenue if the operation falls within South Carolina's coastal territory, which is about three miles from the shoreline.

"There's a special law that allows the Gulf states to get a revenue share of 37.5 percent," Rice said, but no law exists for the mid- to south-Atlantic coastal states, which have never been opened to federal oil leases before.

Sen. Lisa Murkowski (R-Alaska) submitted a bill that provides for revenue sharing for the states, but the bill also does away with the buffer zone, Rice said.

The congressman added that they are working on a bill now that would keep the 50-mile buffer zone in play, while giving South Carolina a 37.5 percent revenue share.

"We don't even know what's out there. We don't know if there's gas, if there's natural gas or if there's crude oil," Rice said.

The last time the ocean floor was scanned for potential reserves, the probe was conducted with technology from the 1980s. Technology has changed since then. "There appears to be formations that would likely have some type of reserves," Rice said, but we "don't know what or how much."

Rice has said the issue of offshore drilling needs more review.

"My position has been let's do the seismic testing," he said. "Let's find out what's out there and then we can make rational decisions."

Rice said that he also wants to know what can be done to "safeguard our tourism revenue" and that a study could find the reserves aren't worth the trouble and expense of drilling.

500 Rough population of Briarcliffe Acres

Rice had planned to call a public forum last Wednesday with a professor from Coastal Carolina University, a professor from the University of South Carolina, a representative from the Coastal Conservation League, a public official from Mobile, Ala., and the director of BOEM to address the issue, talk about the process, the timelines of any project and when and where along that timeline the public will have input. The forum was postponed in the wake of the state's recent historic flooding. Rice said that his office is working on rescheduling the forum.

In the last six weeks, Rice said he has visited oil fields in two states and the offshore drilling rigs in Louisiana to get a closer look at the operations.

"They opened up oil fields off of Alaska like a month or two months ago," he said. "And the oil companies have pulled out saying it's not economically feasible."

The same could happen here, he said.

"It may be that this never becomes feasible to drill off the Atlantic," he said.

The potential section of Atlantic coastal exploration fell in an area where state governments have been known to support expanded energy development offshore.

Gov. Nikki Haley supports offshore drilling and is a member of the Outer Continental Shelf Governors Coalition. The coalition operates on a mission to, among other things, "influence a sensible path forward for the development of America's offshore energy resources."

Frenchman Makes Daring Leap From Sailboat To Ship Off Alaska

By Mark Thiessen

[Associated Press](#), October 21, 2015

ANCHORAGE, Alaska (AP) — A Frenchman with his cat tucked inside his clothing made a daring leap of faith Tuesday when he jumped to a waiting rescue ship from his sailboat, which was being battered by high seas south of Alaska.

The Coast Guard captured the dramatic video from a C-130 Hercules airplane monitoring the rescue. The man's identity hasn't been released, but Petty Officer Lauren Steenson in Kodiak said the sailboat was named La Chimere.

The man activated a location beacon Tuesday about 400 miles south of Cold Bay, Alaska. The C-130 was dispatched to assess the situation.

The airplane crew made radio contact with the mariner, who reported his 30-foot sailboat lost its rudder and rigging in heavy seas and 46-mph winds.

"With the 20-foot seas, his boat is getting pretty well thrown around," she said.

He had no control, and the boat was "pretty much dead in the water," adrift in high seas.

The Coast Guard made contact with the Polar Pioneer, which is an oil drilling vessel used by Royal Dutch Shell off Alaska's northwest coast this summer. The ship and support vessels were nearby as they make their way back to Port Angeles, Washington.

The Polar Pioneer sent a support ship, the Tor Viking, to rescue the sailor.

Video shot by the Coast Guard shows the Frenchman on the rigging pole near the bow of his sailboat, riding wave after wave until making a dramatic leap over the railing of the Tor Viking.

The video shows the man disappearing behind the railing head first with his legs last to disappear behind the Tor Viking's railing. After a few seconds, a crew member of the Tor Viking is seen walking toward the man, who then stands up.

Steenson said the pilot of the C-130 told her the sailor placed his cat inside either his sweater or coat before making the leap.

Once the man was safely aboard the Tor Viking, the Coast Guard marked the position of the sailboat for future reference.

It wasn't immediately clear if the man would continue with the Shell ships to Washington state.

The sailboat left Dutch Harbor, Alaska, on Oct. 13, headed to Vancouver. Steenson said reports didn't indicate if his final destination was Vancouver in Washington or British Columbia.

Obama Ends Arctic Drilling – Business Insider

[Business Insider](#), October 21, 2015

A ringed seal pup peeks out from its protective snow cave near Kotzebue, Alaska. The Obama administration officially shut the door on Arctic drilling, a move that could prevent any new drilling for years to come.

The U.S. Department of Interior announced on October 16 that it would cancel two lease sales for offshore acreage, which had been scheduled to take place in 2016 and 2017. Environmental groups have been doggedly criticizing the Obama administration for allowing Royal Dutch Shell to drill in the Arctic to begin with, citing the potential catastrophe if an oil spill occurred. They had called upon the President to deny any permits to Shell.

But it wasn't environmental protest that killed off Shell's drilling campaign. What really forced the Anglo-Dutch company to retreat was low oil prices and disappointing drilling results.

Similarly, the Obama administration is now shutting the door on future lease sales not because of concerns over the environment, but "In light of current market conditions and low industry interest," as Interior put it in a statement.

On its face, the move is a logical one. Few other companies were interested in drilling in the Chukchi or Beaufort Seas, despite several having purchased leases years ago. Statoil and ConocoPhillips, two other large oil companies interested in the Arctic, had previously put their Arctic ambitions on ice because of the difficulty and high costs associated with drilling in the region. With Shell announcing that it would suspend U.S. Arctic exploration for the "foreseeable future" there are now zero companies that are viably interested in drilling anytime soon.

Remarkably, however, the interest in new leases had dried up even before the downturn in oil prices. Interior said that it put a "Call for Information and Nominations" in September 2013, which is essentially a way for the government to solicit interest from

the industry on which areas to auction off based on their interest. While it would be understandable that few companies would express interest in the current market downturn, Interior issued the Call for Information in September 2013, a time when Brent crude was trading around \$110 per barrel.

Despite high oil prices, no companies submitted nominations for areas to be auctioned. As a result, Interior canceled the 2016 auction. The same was true for the 2017 auction. In the July 2014 Call – when oil prices were trading at around \$105 per barrel – there was only one submission from a company interested in the Arctic. In its October 16 announcement, Interior said that it was concerned there wouldn't be sufficient competition to move forward with the lease sale. Such an outcome could mean that the government would lose more money than it took in by selling off the assets, due to the lengthy work involved in conducting regulatory scrutiny, environmental assessment, and studying and issuing permits.

REUTERS/Larry Downing

U.S. President Barack Obama speaks about the FY2016 budget at the Department of Homeland Security in Washington, February 2, 2015.

Thus, the lease sales will be cancelled. As such, no new companies will acquire acreage in the Arctic for several years at least. But even if Interior hadn't cancelled the sales, it is far from clear that there would have even been a company that would be willing to risk scarce resources in bidding on risky Arctic oil.

Moreover, Interior also dismissed requests from Shell and Statoil to extend their current leases, which would have allowed them more time to return to the Arctic if they had wanted to do so at some point in the future. Their ten-year leases will expire in 2017 for the Beaufort Sea and 2020 for the Chukchi Sea. Justifying the dismissal, Interior said that the "companies did not demonstrate a reasonable schedule of work for exploration and development under the leases."

With no plans by either company to drill within that timeframe, it appears that they are heading for expiration. That leaves almost no possible pathway for an oil company to drill in the Arctic for years to come, perhaps killing off drilling for a decade or so at a minimum. Again, it was likely that there wouldn't have been new drilling in any event, given Shell's decision and current market conditions, but Interior's decision officially shuts the door on the Arctic in the medium-term.

Recognizing the significance of the move, Alaskan Senator and Arctic oil proponent, Lisa Murkowski (R), issued a blistering statement denouncing the Interior Department. "This is a stunning, short-sighted move that betrays the Interior Department's commitments to Alaska," she said.

She went on to argue for more lease sales. "Instead of seeking to shut down Alaska, Interior should remember that the North Slope was nearly abandoned after 14 dry holes were drilled. The opportunity to keep going led to not only the discovery of Prudhoe Bay, but also the production of more than 17 billion barrels of oil and a generation of opportunity for Alaska. I will certainly remember that fact as I continue to push legislation that will force Interior to hold regular lease sales in the offshore Arctic."

It is possible that under a new Republican administration in 2017, the Interior Department could relaunch the leasing process. However, that could take several years given the lengthy environmental assessments the agency needs to conduct before offering up acreage. Even then, there is a huge question mark that hangs over the process – there is very little interest on behalf of the industry, regardless of what the government may do. In this era of low prices, Arctic oil may simply be unprofitable.

Clues To Arctic Drilling Ban In California

[CleanTechnica](#), October 20, 2015

The Intertubes have been buzzing with news of the ban on Arctic drilling announced last week by President Obama. Though the news may have taken some political and industry observers by surprise, you can check out a recent development in California for hints at the direction in which federal agencies are steering the US oil and gas industry in the past couple of years. It sure looks like evolve is the word of the day for the energy policy formerly known as "all of the above."

The Arctic Drilling Ban

Just last summer, our friends over at Fuel Fix noted that Royal Dutch Shell had nailed down a couple of important federal permits for Arctic drilling. However, the company abandoned its Arctic drilling plans in September, just a few weeks before the announcement of the Arctic drilling ban.

We're giving props to Shell for its "you can't fire me, I quit" strategy. Slumping oil prices were cited as the reason for the pullout, but we're guessing that Shell also saw the writing on the White House wall.

Also not helping: just a couple of years ago the company was cited by the US Environmental Protection agency for "numerous" violations of the Clean Air Act related to its Arctic drilling operations, and high profile protests in Seattle over the docking of a Shell drilling rig monkeywrenched the company's efforts to highlight its commitment to climate action.

The slump in oil prices was also cited by the Interior Department last week when it announced the new Arctic drilling ban:

In light of current market conditions and low industry interest, the U.S. Department of the Interior today announced that it will cancel the two potential Arctic offshore lease sales scheduled under the current five-year offshore oil and gas leasing program for 2012-2017. The decision follows Shell's announcement of its exploration results at the Burger prospect in the Chukchi Sea and that the company will cease further exploration activity in offshore Alaska for the foreseeable future.

Interior also denied extensions to two companies with existing leases:

Today, the Bureau of Safety and Environmental Enforcement (BSEE) also denied requests from Shell and Statoil for lease suspensions, which would have allowed the companies to retain the leases beyond their primary terms of ten years. The leases will expire in 2017 (Beaufort) and 2020 (Chukchi). Among other things, the companies did not demonstrate a reasonable schedule of work for exploration and development under the leases, a regulatory requirement necessary for BSEE to grant a suspension.

In defending the Arctic drilling ban (basically, a withdrawal of the lease program for this cycle), Interior cited the low interest in Arctic oil leases. The agency was wary of a non-competitive process leading to the award of a lease at rock-bottom prices.

California Drops A Clue On Arctic Drilling Ban

Environmental organizations have long pointed out that federal fossil fuel leases have been giveaways, and it looks like the Arctic drilling ban is a step toward the end of free lunch days.

We're also thinking that the cost of effective federal oversight for fossil fuel operations was another motivator, particularly where sensitive environments are involved, and that's where California comes in.

In the midst of an ongoing drought last year, California regulators were called to task for permitting oil and gas drillers to dump wastewater into aquifers that could have been used for domestic and agricultural use, following an EPA investigation dating back to 2012.

That resulted in an EPA drilling wastewater enforcement plan last spring:

As the state implements the plan, EPA will continue our heightened oversight to ensure that the state's oil and gas UIC program meets federal requirements. This effort includes ensuring that wells which inject into non-exempt aquifers, including several hundred disposal wells (with approximately 70 disposal wells in the 11 aquifers historically treated as exempt), nearly two thousand enhanced oil recovery wells, and any cyclic steam wells requiring aquifer exemptions, are addressed as expeditiously as possible, with an immediate emphasis on the wells in aquifers with the highest water quality.

Boy howdy, right? Our friends over at Fuel Fix have been keeping tabs on the state's response and at the last count California had shut down 33 oilfield injection wells, mainly in Kern County, that were injecting wastewater into federally protected water supplies under improperly issued state permits. That's on top of another 23 wells shut down earlier this year.

It's also worth noting that when local communities have attempted to adopt stricter regulation of the fossil fuel industry due to environmental concerns, they are often overridden by state legislation.

In terms of federal energy policy, it's pretty obvious that the Obama Administration decided that California's key role in the national economy — in agriculture as well as other sectors — was not being stewarded properly by local officials.

That's where we see a parallel with the Arctic drilling situation. In the absence of local regulations, the feds are the only game in town and it seems that the Arctic's role in the US economy is too important to trust to compliance by oil companies.

Interior's actions last week on Arctic drilling are only temporary, but the trend is toward a permanent clampdown.

Federal Regulators Are A Big Barrier To Arctic Drilling

[4-Traders](#), October 21, 2015

In the wake of Shell choosing to stop exploring for oil and natural gas off Alaska's Arctic coast, the Interior Department cancelled lease auctions through 2017.

'In light of Shell's announcement, the amount of acreage already under lease and current market conditions, it does not make sense to prepare for lease sales in the Arctic in the next year and a half,' Interior Secretary Sally Jewell said.

What Secretary Jewell doesn't want to acknowledge is a big reason no one wants to drill in the Arctic right now is because the federal government has made it too difficult.

Here are some of the federal government's regulatory obstacles Shell had to navigate around to drill just one well:

Restrictions on Drilling Activities. Multiple layers of environmental laws and regulations limit the type and amount of activity that can take place in the Arctic. For example, Shell sought permits to drill two exploratory wells during the 2015 season. While the Administration gave conditional approval to Shell's exploration plan (which included the two wells) it was later determined that the plan violated a U.S. Fish and Wildlife Service regulation from 2013 regarding marine mammal disturbance. The regulation requires a 15 mile buffer zone around active drilling rigs due to assumed impacts of noise; an assumption not corroborated by science. Since Shell's wells are nine miles apart, the wells could not be drilled simultaneously – creating additional restrictions and adding delay to their operations.

Requirements for Additional Equipment. Regulations also require that an additional redundant rig be on site. This adds additional costs and resources, and also fails to take into account other containment strategies. Capping stacks, blowout preventers and relief domes could be better suited to address potential spill response in the shallow-waters of the Arctic.

Litigation. At seemingly every turn, energy exploration in the Arctic has faced an onslaught of lawsuits from activist groups. In one instance in 2008, there was a legal challenge to the original lease sale and the federal court ruled that there needed to be a revised EIS. The Department submitted a supplemental EIS and the 2008 lease sale was officially reaffirmed in March 2015.

Shell said clearly it faces a 'challenging and unpredictable federal regulatory environment in offshore Alaska.' It's no surprise no other companies want to jump into these chilly regulatory waters.

But the company also pointed out, 'The area is likely to ultimately be of strategic importance to Alaska and the US.' One estimate puts 34 billion barrels of oil off Alaska's Arctic coast.

Other nations aren't stopping Arctic exploration; neither should the U.S.

Demand for oil and natural gas isn't going away, so energy domestic exploration must continue in the Arctic and elsewhere. But as we've seen, by putting up unnecessary regulatory hurdles, regulators can cause job and economic growth opportunities to be missed.

BUREAU OF LAND MANAGEMENT

Updated Idaho Power Line Would Go Through Sage Grouse Habitat

[Boise \(ID\) State Public Radio](#), October 21, 2015

Idaho Power is one step closer to replacing an aging transmission line that runs from Hagerman to Hailey. Blaine County approved a permit for the project last week. Now, the Bureau of Land Management will review it – and will pay special attention to the greater sage grouse in the area.

Click play to hear the on-air version of this story.

It's been nearly a month since the Obama Administration decided not to list the greater sage grouse under the Endangered Species Act. Although the bird itself hasn't gained federal protection, the Interior Department signed on to new land-use plans to keep the bird's habitat safe. These protections restrict development in sage grouse areas across the 11-state range, and the Hailey-Hagerman transmission line is part of that.

Stacey Baczkowski is a biologist with Idaho Power. She says the company has been working with the BLM for the last few years to make sure the line is built with the bird in mind. Baczkowski says even though the federal agency has new land use restrictions, the rules aren't burdensome for Idaho Power.

"Knowing what the restrictions are, we're able to accommodate them and build them into our project," she says.

The biologist says the power company plans to build the new transmission line as close to the current one as possible, and will follow BLM rules about construction during sage grouse mating times. Baczkowski says the added restrictions will likely make the project more expensive.

Federal Policies Vex Utah Water Commission

[Deseret \(UT\) News](#), October 21, 2015

SALT LAKE CITY — Federal policies that either aim to instill more oversight of water or deny access altogether have some Utah leaders frothing over what they say is a repeated pattern of overreach that threatens local economies and livelihoods.

A prime tempest of controversy discussed Tuesday by the State Water Development Commission is the U.S. Environmental Protection Agency's Waters of the United States rule, which prompted multiple lawsuits by a dozen-plus states and the American Farm Bureau Federation.

Hailed by environmentalists and sportsmen groups as a rule that extends protections to key ephemeral waterways and the prairie potholes of water that form in the Midwest states, farmers and ranchers railed against the new regulation because they say it encroached on private property rights.

Utah joined with 17 other states asking federal courts to issue a stay and a constitutional review. Another lawsuit was launched by the American Farm Bureau Federation in Texas courts.

Randy Parker, executive director of the Utah Farm Bureau, briefed the commission on an Oct. 9 ruling in the 6th Circuit Court of Appeals that issued a nationwide stay of the rule, noting there was a likelihood the EPA exceeded its authority.

"We were very excited about the 6th Circuit decision," Parker said, adding that the hope is the cases out of varying federal courts are consolidated before the U.S. Supreme Court for a decision.

"We think we would prevail," he said afterward. "The U.S. Supreme Court is starting to tell the Obama administration it can't do whatever it wants."

Critics that include Utah and Colorado also put enough pressure on the U.S. Forest Service to withdraw — at least for now — consideration of a new groundwater rule that would require the issuance of any permit to consider nearby groundwater resources in the area.

Oponents said that such a rule potentially interfered with states' "sovereign" domain over groundwater resources within its borders, leading to the congressional legislation to ward off the directive.

"We have a tremendous amount of concern this is a federalizing of the sovereign water rights of Utah," Parker said.

Ron Thompson, general manager of the Washington County Water Conservancy District, said possible revisions to a land-use plan by the Bureau of Land Management in Washington County have severe ramifications should one particular approach be adopted.

The changes are part of management strategies for two new national conservation areas created with the Washington County Lands Bill of 2009.

But Thompson said the BLM — under one option — is ignoring key considerations that went into the passage of the bill, including water supplies being left unhindered and right of way corridors left intact.

"This (alternative by the BLM) would take two of our pristine aquifers that supply more than a quarter of our water to our residents and lock them up," he said.

The revisions could also potentially interfere with right of way corridors or development of the Lake Powell Pipeline, Thompson added.

"It's very troubling. For the first time in my 40-year career, people are talking about not just responding but preparing to litigate," he said. "I still believe that these agencies have a fundamental responsibility to consult with states and local communities and protect local economies and the traditions that have developed around this. And they seem to be ignoring this today."

Helicopter Crash Marks Troublesome Cattle Roundup Near Searchlight

[Las Vegas Review-Journal](#), October 21, 2015

The wild remnants of one of southern Clark County's last cattle herds are now being cleared from the mountains between Henderson and Searchlight, but the work so far has not gone smoothly.

A crew of cowboys from Utah is gathering stray and feral cows from the McCullough Mountains under a contract with the Nevada Department of Agriculture.

Flint Wright, animal industry administrator for the department, said the operation started Friday and has no scheduled completion date. As of Monday, just 17 cows had been collected.

"They're essentially wild cattle, and it's going to take some time," Wright said.

The roundup hit a major snag Sunday, when a helicopter being used to find and chase cows crashed just off state Route 164 west of Searchlight.

On Tuesday, the wrecked helicopter and its pilot could still be found at a motel in the town 60 miles south of Las Vegas.

Richard Dick of Hutchinson, Kan., said he was hovering about 12 feet off the ground, trying to move a pair of stubborn bulls, when a gust of wind pushed his helicopter into a Joshua tree. The 1962-vintage Bell model 47G ended up on its side in pieces, but he walked away with bumps and bruises.

The pilot said it was his first domestic accident in 17,000 hours of flying, though he crashed three times in Vietnam.

When he climbed out the wreckage Sunday, Dick said, the bulls were just staring at him.

The cattle now being rounded up have roamed the range untended since 2006, when rancher Cal Baird relinquished his federal grazing permit and sold his water rights to the county to preserve habitat for the desert tortoise and other federally protected species.

According to the Bureau of Land Management, Baird moved most of his livestock from the 111,000-acre federal grazing allotment to Arizona, but a few stragglers were left behind.

For the past several years, officials say, those survivors and their unbranded descendants have been damaging springs and menacing people in the mountains and desert between Interstate 15 and U.S. Highway 95 south of the Las Vegas Valley.

BLM spokeswoman Kirsten Cannon said the animals are aggressive and “present a danger to the public recreating in the area.”

Wright said: “We’ve had some complaints from people who were hunting deer and were run off by the cattle.”

Baird could not be reached for comment.

Under Nevada law, unbranded stray or feral livestock are considered state property. The BLM has been asking the state to remove the unclaimed cattle from the McCullough Range for several years.

In 2013, the state rounded up and sold off approximately 30 animals, but an unknown number remain. Last year, the BLM counted about 40 unbranded cows spread across two wilderness areas west of Searchlight. Wright guessed there could 100 to 200 feral cows still out there.

He figures it would cost the state as much as \$200,000 to try to collect that many animals. The Department of Agriculture has been “trying to get this deal cleaned up for a number of years,” but it never seems to have the money or the resources, he said.

The animals are now being rounded up by Sun J Livestock, a ranching operation from Vernal, Utah. Wright said the ranchers aren’t being paid directly, but they have plenty of incentive to do a thorough job.

“They get to keep the livestock,” he said. “They’ll get every cow they can.”

FISH AND WILDLIFE SERVICE

Springfield Hosts National Conservation Summit

[KYTV-TV Springfield \(MO\)](#), October 21, 2015

SPRINGFIELD, Mo. – More than 40 leaders from the leading conservation groups in America are meeting in Springfield this week for a National Conservation Summit hosted by The Johnny Morris Foundation.

Participants include the U.S. Fish and Wildlife Service, National Geographic, Audubon Society, and Ducks Unlimited. The purpose of the historic gathering is to collectively discuss opportunities to educate and engage the public in efforts to protect wildlife and natural habitats in preparation for the grand opening of America’s Wildlife Museum and Aquarium in 2016.

The remodeled educational attraction consists of an all-new 1.3 million-gallon aquarium showcasing 35,000 live fish, mammals, reptiles and birds in an immersive tour.

The attraction once known as the Wonders of Wildlife has been closed for remodeling since 2007.

New Glimpse Inside Bass Pro’s Wildlife Museum/aquarium

[Springfield \(MO\) News-Leader](#), October 20, 2015

Fees and taxes from hunters, anglers and people buying outdoor products have helped pay for wildlife conservation efforts across the country.

That’s a key message a group of more than 40 conservation leaders hope the new Bass Pro Shops wildlife museum and aquarium will convey to visitors when it opens in mid 2016.

On Tuesday, Bass Pro Shops revealed two more exhibits — a collection of taxidermied wild sheep and two arctic wildlife rooms featuring wolves, musk ox and a stuffed polar bear that at one time was the largest bear of any kind taken by a hunter. Bass Pro Shops previously offered a brief tour of a portion of the massive aquarium, featuring hundreds of saltwater fish in large tanks.

The Sheep Mountain exhibit shows more than 30 animals from around the world perched on rocks, with hand-painted mountain scenery in the background. All the exhibits are still being finished, with interpretive stations that will identify the animals and explain their role in the natural environment.

Dan Ashe, director of the U.S. Fish and Wildlife Service, called the museum "one of the foremost conservation attractions in the world."

"Through conservation efforts, we can be successful in sustaining these populations of animals that are threatened or endangered," said Ashe, one of the summit attendees. "People hear about the industrial-scale poaching of elephants that's happening in Africa. That's not hunting. With this museum, here's an opportunity to tell the story of how we can protect wildlife habitat, and that when hunting is done well, with appropriate regulations, it sustains wildlife populations."

Rob Keck, Bass Pro's director of conservation, said the museum will evolve even after it reopens, with new exhibits and animals rotating through the facility.

"It will continue to evolve and grow and bring people back because of the newness," Keck said. "We look at this place as the trail head of conservation where conservation groups will be able to tell their story."

Formerly known as Wonders of Wildlife, the facility has been closed since 2007 as Bass Pro Shops founder Johnny Morris conducted a massive expansion of the museum. Its reopening date has been pushed back several times as more exhibits were added and interior designs changed.

It is now slated to reopen in mid 2016, with more than 35,000 live fresh-and saltwater fish, reptiles, birds and mammals, in addition to taxidermy dioramas from North America, Africa, the Arctic and the Ozarks.

Conservation efforts have some major success stories, said Glenn Olson, policy director with the National Audubon Society and a summit attendee. He said bald eagles, peregrine falcons and brown pelicans have been removed from the endangered species list through public education efforts and science-based research.

Fred Matt, executive director of the Native American Fish and Wildlife Society, said it's a common theme among many Native American people to still fish and hunt for food. Conserving those resources is an important message to share.

"The forest is our medicine cabinet," he said. "In this world represented here (the conservation museum) we want to convey that those things are still healthy and being taught in our communities."

The 40 conservation leaders included several from local organizations like Ozarks Water Watch, Watershed Committee of the Ozarks and James River Basin Partnership.

Seeing the museum and aquarium just might inspire visitors to spend less time in front of a TV or electronic game and more time experiencing the outdoors.

"If we expect people to want to protect the environment, we've got to get them out in it — go fly fishing in a river, go paddle a canoe or get in a boat," said David Casaletto, executive director of Ozarks Water Watch.

Wildlife Experts Meet To Discuss The Best Way To Educate On Conservation

[KOLR-TV Springfield \(MO\)](#), October 21, 2015

SPRINGFIELD, Mo. – A National Conservation Summit in the middle of Springfield is being called one of the largest gatherings, of such experts, since last century.

"Some compared it to Teddy Roosevelt convening the Conservation Congress."

Fred Matt from the Native American Fish and Wildlife Society was a part of it.

"Our people, to this day, still, hunt, fish, you know, their backyard, their medicine cabinet is the forest," says Matt.

Rob Keck says their goal is to learn more about the right way to educate people about wildlife and fish conservation.

"We shared ideas on how to message what hunting and fishing, what hunters and anglers have done for conservation," says Keck.

Keck says folks from organizations like Matt's spoke about what is most important to get across to museum goers.

"We see geese flying overhead, you see a herd of deer, a flock of turkeys out along an open field. Many people don't realize that their success story didn't begin in a petting zoo."

Dan Ashe from the U.S. Fish and Wildlife Service says the education inside the museum can lead to changes outside in our communities.

"Hopefully, this will be a gateway to the outdoors. People will then go from here to a state park or a national park or a national refuge," says Ashe.

Keck says Bass Pro will use this summit to prepare for the grand opening next year.

"People enjoy seeing wildlife. Whether they hunt or fish or not and it doesn't happen by accident."

Even though it sits in the middle of Springfield, Matt hopes people will learn the challenges natural habitats and their wildlife residents face each year.

"From our history, we still utilize and respect the natural resource in the natural world."

National Conservation Leaders Give Input On America's Wildlife Museum And Aquarium

[KYTV-TV Springfield \(MO\)](#), October 21, 2015

SPRINGFIELD, Mo. – The big wildlife museum outside Bass Pro Shops' Outdoor World store is still not open to the public but conservation experts from across the country got a sneak peak at it on Tuesday. The visitors included people from local conservation groups and the head of the U.S. Fish and Wildlife Service. They were invited to give their input on America's Museum and Aquarium, which is still under construction.

Visitors will face a polar bear in an arctic setting and probably want to see if the ice and snow are real.

"When I walk in this room, even though it's somewhat warm in here, I almost feel the breeze and smell the sea," said Fred Matt, executive director of the Native American Fish and Wildlife Society.

It's just a small part of America's Wildlife Museum and Aquarium, and the creators want feedback on their works in progress. They hope to make the experience as educational and engaging as possible.

"It's about storytelling, telling the story of conservation in a way that's never been told before," said Rob Keck, Bass Pro's director of conservation and chairman of the museum's board of directors.

"Johnny Morris (owner of Bass Pro Shops) and the folks at Bass Pro have invited us here to help them form the messages that people who visit this facility are going to see and hear," said Dan Ashe, director of the U.S. Fish and Wildlife Service.

More than 40 conservation leaders are sharing their input and perspectives, all a little different, like Fred, representing Native Americans.

"Today, our people still hunt and fish to put food on the table. And they do it in a respectful and a very good manner I think others would enjoy hearing," said Matt.

They want to maximize the opportunity for visitors here in Missouri to gain a better understanding of conservation not only here, but all over the world.

"They're going to understand a little bit better about maybe how their individual actions affect something like a polar bear. So it's an opportunity to learn, an opportunity to feel that they're a part of the outdoors and then hopefully be a gateway to the outdoors," said Ashe.

The museum and aquarium will have 35,000 live fish and other animals, as well as the mounted mammal specimens. They anticipate opening sometime next year. When the name change from its former Wonders of Wildlife was announced last March, Keck said it could open by March, but hasn't said whether that's still possible.

Wonders of Wildlife first opened on Nov. 2, 2001, after two years of construction. It was a nonprofit museum then and cost about \$52 million, which included state funds, Springfield hotel-motel tax funds, Bass Pro Shops donations and tax credits.

The museum closed in 2007 for renovations that were originally set to cost \$14 million. Eight years later, the cost has jumped to about \$25 million, including at least \$12 million from Bass Pro Shops. When it opens, its size will cover more than 230,000 square feet of exhibits, compared to 126,000 square feet originally.

The museum is now a private venture and no longer takes hotel-motel tax payments. Four years ago, Morris donated \$4 million to the Community Foundation of the Ozarks; that's how much hotel-motel tax funds the museum received up to 2011.

American Wildlife Museum To Open At Bass Pro

[KOLR-TV Springfield \(MO\)](#), October 21, 2015

SPRINGFIELD, Mo.-- We are getting a sneak preview of a new museum opening up at Bass Pro.

The former Wonders of Wildlife Museum has been closed for several years and this is what visitors will soon see inside.

Some of the attractions will include a fishing heritage hall with a 300,000-gallon open ocean habitat – a new aquarium adventure and an international fishing hall of fame.

The sneak peek coincides with a national conservation summit being hosted by Bass Pro this week. It brought in more than 40 conservation leaders to offer input on the new museum.

Dan Ashe, the Director of US Fish and Wildlife service said, "so we have the chance as managers to help them shape that message. so when people come here not only are they going to see a great exhibit, but they will have the opportunity to learn something about how wildlife is being managed in the united states and throughout the world."

Bass Pro leaders say the new museum is scheduled to open in 2016.

CNMI Disagrees With Endangered List

[Radio New Zealand](#), October 21, 2015

The Northern Marianas government says the decision to list 23 species in Guam and the CNMI as threatened or endangered was rushed.

The government says it supports the US Fish and Wildlife Service's listing of seven of the 17 CNMI species, but it questions the inclusion of some of the other species.

The Department of Land and Natural Resources says a number of the species do not meet the definitions of threatened or endangered and don't require federal protection.

Among the plants and animals in the CNMI and Guam listed as endangered are the Mariana wandering butterfly, Langford's tree snail, and the Mariana sub-species of the Pacific sheath-tailed bat.

USFW Looks To Restore Habitat On Root River

[Rochester \(MN\) Post-Bulletin](#), October 21, 2015

Federal wildlife officials are seeking public input on a plan to restore and enhance habitat on 825 acres of Minnesota land along the Root River in Houston County.

Managed by the U.S. Fish and Wildlife Service as part of the Upper Mississippi River National Wildlife and Fish Refuge, the Root River Tract sits to the east of Hwy. 26 between La Crescent and Brownsville.

The site includes 664 acres of hunting and farmland purchased in 2009 with money from the Land and Water Conservation Fund.

Under the previous owner, National Decorative Products, the land was managed for private hunting of pheasant and waterfowl as well as some agricultural uses, said Tim Miller, La Crosse District manager for the refuge.

A network of dikes, ditches and drainage pipes are now failing or deteriorating, according to the Fish and Wildlife Service, which is proposing to remove some of the dikes and restore the natural topography and drainage patterns.

Fish and Wildlife estimates the habitat restoration will cost \$400,000 to \$500,000, which would be paid for with a grant from Minnesota's Outdoor Heritage Fund.

FWS also considered active and passive drainage systems as well as taking no action.

The tract would remain open to public use under each alternative, although an existing slow-no wake area would more than double in size to encompass 1,634 acres, including most of the Root River Tract.

Fish and Wildlife will host a public meeting on the project at 6 p.m. Wednesday at the Hokah Fire Station.

California Condor Shot In Arizona

[Grand Canyon \(AZ\) News](#), October 21, 2015

PHOENIX – U.S. Fish and Wildlife Service (FWS) special agents and Arizona Game and Fish Department (AZGFD) law enforcement personnel are investigating the lethal shooting of an endangered California condor that occurred on the Kaibab Plateau in northern Arizona Oct. 8.

The shooting was immediately self-reported to AZGFD, which did the preliminary investigation. The case has now been turned over to FWS law enforcement for further investigation.

California condors were listed as endangered in 1967. The species was reintroduced to northern Arizona in 1996. The population has now expanded into southern Utah and numbers approximately 70 birds.

The condor reintroduction in Arizona is a joint project of many partners, including the Arizona Game and Fish Department, The Peregrine Fund, U.S. Fish and Wildlife Service, Bureau of Land Management, National Park Service, Kaibab National Forest and Utah Division of Wildlife Resources.

Man, 81, Says He Blocked Arizona Bike Trail To Protect Owls

[Washington Times](#), October 21, 2015

FLAGSTAFF, Ariz. (AP) – The 81-year-old man who blocked a Flagstaff-area mountain bike race says he did it to protect an endangered owl species.

The Arizona Daily Sun reports (<http://bit.ly/1Ggko8v>) that J.D. Protiva appeared in federal court Monday on misdemeanor charges related to blocking the Elden Springs Trail before the August race.

Protiva says the path goes through protected Mexican spotted owl habitat. He is also charged with cutting trees and causing them to obstruct the trail.

A 2003 U.S. Fish and Wildlife Service Biological Opinion says at least a portion of the trail cuts across protected habitat, but the agency gave the OK for construction in the area.

Protiva cited similar concern for the owls' welfare when he pleaded guilty to stringing metal cables and moving forest debris across trails in 2007.

Why Monarch Butterflies Benefit From The California Drought (+video)

[Christian Science Monitor](#), October 20, 2015

It is one of the worst droughts on record, and the monarch butterflies are lapping it up. Milkweed, that is.

California homeowners are replacing water-greedy grass lawns with the perennial native to California's desert, a happy swap for one species in particular: the monarch, a butterfly that only lays eggs on milkweed.

In recent years, as milkweed has declined, likely due to pesticides use and rapid development, the monarch population has fallen with it. Two decades ago the iconic orange and black insect population was 1 billion strong; Today it hovers below 60 million.

In response to the quick decline, the US Fish and Wildlife Service put forth \$1.2 million to bring back the monarchs' habitat, following similar projects nationwide that send milkweed seeds by mail and track breeding grounds in a database. California gardeners are an unexpected but welcome addition to the grassroots effort, and ecologists are hopeful that Californians, who are problem-solving their way through the drought, might help a struggling species in the process.

Nurseries are stockpiling numerous varieties of native milkweed and drawing customers who are adapting to the drought conditions but may also want to bring butterflies to their yards.

At Tom Merriman's native plants nursery in Vista, Calif., business is up 50 percent this season. Until five years ago, Mr. Merriman didn't sell milkweed at all; this summer, he sold more than 14,000 plants and is shipping truckloads of seedlings all over California and other drought-stricken Western states like Arizona, New Mexico, and Utah.

"If you plant it, they will come," Merriman, who has a greenhouse filled with 8,000 milkweed of a dozen varieties, told the Associated Press. "We had chrysalises on shovels, we had them on wheelbarrows. They were up in the nursery on palm trees. They were everywhere, under tables. We were releasing 500 caterpillars a week on native milkweed."

But environmentalists are piping up to say this is not all good news for the monarch.

For one, gardeners may unintentionally opt for the tropical variety, sometimes called "exotic" milkweed, for its colorful pink and yellow flowers.

While the plants may have more curb appeal than the desert types, they bloom all year round which poses a threat to the monarch butterfly's infamous migration patterns.

Native milkweeds go dormant in the winter, and with no place to lay eggs this forces butterflies onward in their migration. The tropical varieties stay in bloom year-round, not giving female butterflies any reason to leave.

North American monarchs travel in the millions every winter from the eastern and central United States and Canada all the way to Mexico, while a smaller number travel through the western US to spend winter along California's Central Coast. The Western monarchs evolved alongside native milkweeds and eating plants from another region might make them more vulnerable, said Hei-ock Kim, of the California Native Plants Society in an interview with the AP.

"When you take plants and animals from where they originated, you're going to change chemistry, climate, biology," she said. "You're changing all their habits, and so things work best when they are where they're supposed to be."

The Minneapolis-based, SaveOurMonarchs, offers free milkweed seeds. In 2015, more than 1 million Milkweed Seed Packets were sent out, according Ward Johnson. He says: "Milkweed Seed Packets will be provided to anyone requesting them."

This report contains material from the Associated Press.

Monarchs Get Help From Unlikely Source: California's Drought

[Albuquerque \(NM\) Journal](#), October 21, 2015

VISTA, Calif. — In California's drought, the struggling monarch butterfly may have found a sprinkling of hope.

Suburban homeowners ripping out thirsty lawns are dotting their new drought-tolerant landscapes with milkweed native to California's deserts and chaparral — plants that have the potential to help save water and monarchs at the same time, because the female monarch will only lay her eggs on milkweed.

Overall numbers of the majestic black-and-orange butterflies have dropped from 1 billion to fewer than 60 million over the past two decades as milkweed nationwide has fallen prey to development and pesticides.

Earlier this year, the U.S. Fish and Wildlife Service announced \$1.2 million starter investment to restore habitat; other national projects aim to distribute milkweed seeds by mail and build databases of breeding habitats as alarm grows. Whether by choice or by chance, ecologists hope California gardeners looking to save water can provide a boost to the butterflies on the West Coast.

"This is a really important way to provide really important habitat for a really important butterfly," said Greg Rubin, president of California's Own Native Landscape Design, Inc.

Anya Shortridge sits behind a monarch butterfly, newly emerged from a chrysalis, on a fruit basket in her living room in San Diego in August. Shortridge is part of a growing number of gardeners in Southern California who have been delighted to find that planting just a few milkweeds can attract dozens of the majestic black-and-orange monarchs while cutting down on water. (Gregory Bull/The Associated Press)

Nurseries are increasingly stocking multiple varieties of native milkweed and catering to customers who want to be drought savvy but also want to attract butterflies.

Business was up 50 percent this season at Tom Merriman's native plants nursery in Vista, California. Five years ago, Merriman didn't sell milkweed at all; this summer, he sold more than 14,000 plants and is shipping truckloads of seedlings all over California and other bone-dry Western states like Arizona, New Mexico and Utah.

Dozens of monarchs flit through a butterfly atrium he built next to his greenhouses and sometimes sneak inside his greenhouses to lay eggs on plants awaiting sale.

"If you plant it, they will come," said Merriman, who has a greenhouse stuffed with 8,000 milkweed of a dozen types. "We had chrysalises on shovels, we had them on wheelbarrows. They were up in the nursery on palm trees. They were everywhere, under tables. We were releasing 500 caterpillars a week on native milkweed."

Anya Shortridge releases a newly emerged monarch butterfly onto milkweed in her garden in San Diego. (Gregory Bull/The Associated Press)

Anya Shortridge bought a few milkweed plants last year for her drought garden.

Now, she grows more than 100 milkweeds and carefully scans them for microscopic monarch eggs. When the eggs hatch, she feeds the tiny black-, gold- and white-striped caterpillars until they disappear into a shimmering, light green chrysalis where the mysterious transformation into a butterfly occurs.

This season, she and her husband have released more than 100 butterflies into the wild.

A sign in front of her house on a San Diego hilltop designates her garden as a "monarch waystation."

"We're finding eggs – monarch eggs – on the underside of our milkweed leaves all the time, so if I wanted to I could probably raise thousands," said Shortridge, who coos and cajoles the butterflies as if they were her children.

Some experts, however, are worried that California homeowners who plant milkweed might actually do harm by trying to do good.

That's because many gardeners unwittingly choose tropical — or so-called "exotic" — milkweed because of its colorful pink and yellow flowers.

The plants are more attractive than the desert varieties but could interfere with the monarch's famed migration.

Native milkweeds go dormant in the winter, leaving the butterflies no choice but to complete their migratory journey. But the tropical varieties bloom — and provide a place to lay eggs — all year, distracting the females and interrupting migration patterns.

Millions of North American monarchs travel from the eastern and central United States and Canada to Mexico each winter, while a smaller number travel through the western U.S. to winter along California's Central Coast. These Western monarchs co-evolved with native milkweeds and eating plants from another region might make them more vulnerable, said Hei-ock Kim, of the California Native Plants Society.

"When you take plants and animals from where they originated, you're going to change chemistry, climate, biology," she said. "You're changing all their habits, and so things work best when they are where they're supposed to be."

Monarch Butterflies May Be Saved By California Drought

[KABC-TV Los Angeles](#), October 21, 2015

VISTA, Calif. – In California's drought, the struggling monarch butterfly may have found a sprinkling of hope.

Suburban homeowners ripping out thirsty lawns are dotting their new drought-tolerant landscapes with milkweed native to California's deserts and chaparral – plants that have the potential to help save water and monarchs at the same time, because the female monarch will only lay her eggs on milkweed.

Three Years After Sandy, Building A Stronger Atlantic Coast In Connecticut

[New Haven \(CT\) Register](#), October 20, 2015

Three years ago this week, Hurricane Sandy devastated communities in New Jersey and along the Atlantic Coast with record storm surge, fierce winds and torrential rain. Earlier this month, Hurricane Joaquin reminded us of nature's power, inundating much of the Atlantic Seaboard with heavy rains and chest-deep floodwaters and setting historic records in the Carolinas.

In this age of uncertainty, we have come to expect the unexpected. The science tells us that climate change will cause hurricanes and tropical storms to become more intense — lasting longer, unleashing stronger winds and causing more damage to coastal ecosystems and communities. As we know too well, these storms threaten lives and result in millions of dollars in property damage. They also expose the vulnerability of beaches, sand dunes and coastal marshes that not only provide habitat for fish and wildlife but also protect local communities from flooding.

The question is, what can we do to help these coastal areas stand strong-er against the storm?

Federal money for Hurricane Sandy recovery has spurred an unprecedented effort to strengthen natural defenses along the Atlantic Coast to protect communities and wildlife against future storms. The U.S. Fish and Wildlife Service and other Department of the Interior agencies are investing \$787 million in hundreds of projects to clean up and repair damaged refuges

and parks; restore coastal marshes, wetlands and shoreline; connect and open waterways to improve flood control; and increase our scientific understanding of how these natural areas are changing.

These investments support the goal of President Barack Obama's Climate Action Plan to make communities more resilient to increasingly intense storms predicted with a changing climate. They also create jobs and provide opportunities for fishing, hiking, wildlife watching and other recreational opportunities.

In Connecticut, the Fish and Wildlife Service is investing more than \$4.6 million in eight projects to clear more than 70 miles of coastline debris; open more than 100 miles of waterways for fish passage; and restore more than 2,000 acres of aquatic habitat. This includes the recently completed \$794,000 White Rock dam-removal project with The Nature Conservancy to restore natural river flow in Stonington and Westerly, Rhode Island. The project will reduce flood risk to local communities, restore habitat for fish and wildlife and open up several dozen miles of fish passage in the Pawcatuck River for the first time in nearly 250 years.

More than a half-century ago, Rachel Carson, one of our greatest conservation heroes, characterized conservation as "dynamic, changing as conditions change, seeking always to become more effective." Looking toward the future and the uncertainties of a changing climate, communities, government and nonprofit organizations are working together like never before to better understand and adapt to changing conditions.

Clearly it will take time and careful planning before we see a return on many of these investments. But I am confident the long-term benefits of building a stronger coast will far outweigh initial costs when it comes to protecting communities, sustaining wildlife and lessening the financial impact of damages resulting from future intense storms. To that end, we are establishing systems to carefully monitor and evaluate our progress to ensure this work is effective and lasting. The nature we care about and the public we serve deserve no less.

You can track the status of our projects and investments by visiting the Fish and Wildlife Service's Hurricane Sandy website at www.fws.gov/hurricane/sandy.

Wendi Weber is Northeast regional director for the U.S. Fish and Wildlife Service.

NATIONAL PARK SERVICE

YAP! Music Video Celebrates 100 Years Of National Park Service

[New Bedford \(MA\) Standard-Times](#), October 20, 2015

NEW BEDFORD — "Love what you do, do what you love, it's a celebration, yeah!" So goes a locally made music video that celebrates 100 years of the National Park Service. Published on Oct. 15, the Centennial video has more than 18,500 views on the NPS facebook page and more than 530 on the Youth Ambassador Program's YouTube page, the group that made it. The video's New Bedford producer/director Ben Gilbarg hopes it will go viral and give the local artists featured in it a chance to shine nationally.

"It's great it's got to this point so quickly," he said. "I feel like it's a model for youth engagement with a national institution that will hopefully continue to grow."

Along with NPS ranger Frank Barrows, Gilbarg co-founded YAP! in 2010 as a partnership between the New Bedford Whaling National Historical Park and 3rd Eye Youth Empowerment Inc., a local youth group where teens discussed history and the national parks through hip-hop.

YAP! has made eight educational videos and a documentary. This one involved more than 300 people, including crews at each of the NPS sites and local artists like Tem Blessed, Cita Light and Jay Beats (Jair Santos).

The song was completed in May and the video effort began in June and ended earlier this month, Gilbarg said.

Participants said they are happy to see national acknowledgement of their efforts.

"It's really exciting," said Dakota Lopes, 22, who stars in the video and traveled with the crew to seven national parks in four states to film it — New York, Vermont, New Hampshire, and Massachusetts.

NPS Director Jon Jarvis, who met the traveling crew in Washington, D.C., makes a cameo appearance in the video to say, "It's great to celebrate a hundred years with YAP!"

The result is an upbeat, catchy tune with creative graphics and a History Machine bus modeled after the Mystery Machine from Scooby Doo.

The song was produced as a birthday wish for the National Park Service through G.O.A.L. Academy funding and was instantly thought to be a hit, said Gilbarg, who spearheaded the project. It was written by YAP! members Lopes and Skylyr Bento, 21, who are featured in the video.

It was a wonderful experience, Bento said. "It really has the potential to be something great for the National Park Service and I am glad I could be a part of it," he said.

YAP! is currently working on creating a supplemental behind-the-scenes video from their summer trip and “trying to get more people to see it,” said Gilbarg who is also working on a video project to get more young people to consider STEAM (Science, Technology, Engineering, Arts, and Mathematics) careers.

‘Kentucky Is On The Move’

[Louisville \(KY\) Courier-Journal](#), October 20, 2015

Kentucky’s burgeoning travel and tourism industry received a ringing endorsement Tuesday from Lt. Gov. Crit Luallen in an address to the Kentucky Travel Industry’s annual conference in Bowling Green.

She noted that the industry has increased in economic impact by more than \$2.2 billion over the past five years to an estimated \$13 billion.

She said the industry now supports 180,000 jobs statewide, making it the state’s third-largest job creator during the two-term administration of Gov. Steve Beshear.

“Kentucky is on the move, and tourism is a big part of this success,” Luallen said. “Working with our travel and tourism partners, we’ve showcased to the world Kentucky’s remarkable beauty and resources, from our magnificent mountains, unique cave system and recreation lakes, to our one-of-a-kind Kentucky Bourbon Trail destinations and world-famous thoroughbred industry.”

Luallen told the group that tourism is being widely recognized as an economic force. She noted the recent formation of the Shaping our Appalachian Region, or SOAR, initiative and the naming of a working group to try to capitalize on the region’s rich natural amenities and potential for economic development and job creation.

Luallen added that as our lives become increasingly technology-based, it’s essential that people have the opportunity for “an authentic experience.”

“Tourism gives us that,” she said. “That’s why your industry is so important, not just to the economic well-being of our state, but to the fundamental well-being of our people.”

Following her remarks, the Lieutenant Governor recognized five national parks in Kentucky as part of the National Park Service Centennial in 2016.

Luallen presented proclamations to representatives of the parks. The parks were Abraham Lincoln Birthplace; Big South Fork National River and Recreation Area; Cumberland Gap National Historic Park; Fort Donelson National Battlefield; and Mammoth Cave National Park.

59 National Parks In 12 Months: Couple Includes Northeast Ohio On Tour Of America’s Prettiest Public Spaces (photos)

[Cleveland Plain Dealer](#), October 21, 2015

PENINSULA, Ohio – It started as a simple thought, casually expressed.

“I’ve always wanted to go to all the national parks,” he said.

“That would be cool,” she said.

Eighteen months later, the idea has become reality. Cole and Elizabeth Donelson, St. Louis natives, are two months into their grand adventure: 59 parks in 12 months – part celebration of the National Park Service’s 100th anniversary, part exercise in youthful spontaneity.

The two, both 26 and married for two years, brought their parks tour to Northeast Ohio over the weekend, where they camped, biked, hiked and road the rails through 33,000 acres of Cuyahoga Valley National Park.

They arrived in Ohio after two months exploring some of the nation’s most spectacular parks and iconic public spaces: the Grand Canyon, Arches, Bryce and Zion.

Even after that spectacular build-up, Cuyahoga Valley impressed.

“This park really embraces the seasons,” said Elizabeth, taking a break from nature Monday morning at a Starbucks in Brecksville, where she was Skyping with a classroom back in her home state.

Despite cold, blustery weather over the weekend, park activities drew large crowds, including a guided Ghost Walk around Kendall Lake and a fossil-hunting expedition at Everett Covered Bridge.

“The engagement with the community has been something we haven’t seen anywhere else,” said Cole.

The couple spent four nights here, with a scheduled departure early Tuesday, headed east toward Acadia National Park in Maine.

Among their Northeast Ohio highlights: Ledges Trail, Bridal Veil Falls, the farmers' market and getting lost in a corn maze at Szalay's on Riverview Road.

One other unexpected bonus: a family from Middleburg Heights, whom the Donelsons met while hiking, invited the couple to dinner and to spend the night in a real bed, after weeks of sleeping on the ground in a tent.

"It was sleeting at that moment," said Elizabeth.

She and her husband graciously accepted.

The two quit their jobs this summer – she was working as a sixth-grade teacher, he at a health-care IT company. Though a few skeptics voiced concern, most of their friends and family were supportive of the idea.

"Gradually, the idea became something we were going to do, not something we wanted to do," said Cole. "We decided we would regret it if we didn't do it now."

In the months leading up to their departure, they saved their pennies, came up with a budget of about \$20,000 for the trip, mapped their route, moved out of their townhouse in Kansas City, divested and stored most of their possessions. Finally, they loaded their Ford Escape with camping equipment and outdoor gear.

Their goal: See the best of the United States, and inspire others – particularly other millennials – to do the same.

Their mission meshes well with a new campaign of the Park Service, which celebrates its centennial anniversary in 2016. The park service this year kicked off a long-term marketing effort, dubbed "Find Your Park," designed in part to attract more young visitors to the nation's premier public spaces.

Though the national parks this year are on pace to attract a record-setting number of visitors, officials have lamented that too few of those visitors are under the age of 40.

Indeed, Elizabeth and Cole said many of their fellow travelers, particularly out West, have been from the older, RV-toting generation.

"I think a lot of people our age just don't think of the parks as much," said Elizabeth, speculating that younger travelers are more tempted by backpacking adventures through Europe or hitting beaches in exotic places.

"We have ambitions to travel internationally as well," said Elizabeth.

But right now, their immediate ambitions are taking them to Maine, then Virginia, then North Carolina.

"Our parks cover deserts, mountains, swamps, beaches, hard-wood forests," said Cole. "We want to see all of it."

And they plan to.

In the first two months of their adventure, the couple hit 11 parks in the Southwest. Among the highlights: hiking rim to rim to rim in the Grand Canyon, marveling at the dark sky at Great Basin and learning how to fly fish at Black Canyon of the Gunnison.

They're sharing it all via social media and on their blog, Switchbackkids.com, where they've picked up a few sponsors for the trip, including L.L. Bean, which donated sleeping bags and other equipment.

(Speaking of blogging and communication: That's another thing they liked about Cuyahoga Valley – excellent cell phone reception, unlike in some of the more remote parks they've visited.)

After Acadia, they're headed to Shenandoah, Great Smoky Mountains and points south. They've planned well for the end of the year: Virgin Islands, Dry Tortugas, Everglades and Biscayne.

After a detour home to St. Louis for Christmas, they're headed to Hawaii and American Samoa.

Their only misstep so far: They planned a visit to Isle Royale in northern Michigan before coming to Ohio, unaware that the island park in Lake Superior largely shuts down at the end of September. So they've added it to next year's itinerary.

One other worry, for Elizabeth at least, is their first bear sighting.

The couple will end their tour next summer in the place that most intimidates them: Alaska, home to eight national parks, including several accessible only by boat or airplane.

By the time they reach Alaska, however, they'll be experienced park explorers, with more than 50 parks behind them.

Cole said the trip is about more than miles logged, trails hiked, scenic views photographed.

"It's about not being afraid to go out and follow a dream, as cliché as that sounds," he said. "Whatever it is, it's doable. You just need preparation, a little good luck and support."

And, just in case, a couple of cans of bear spray.

Watchdog Raises Questions About \$69M In NPS Construction Funds

[Greenwire](#), October 20, 2015

A federal watchdog yesterday released a disputed report alleging that the National Park Service is violating congressional intent by dipping into its construction account to cover security, air testing and other reimbursable expenses that should have been paid up front by other agencies. The NPS construction account is "only for expenses that relate to 'construction,

improvements, repair or replacement of physical facilities,” the Department of the Interior’s Office of Inspector General report said, citing the language of the agency’s appropriation. But the OIG found that 17 out of a sample of 21 interagency agreements that used Park Service construction funds to cover reimbursable costs did not appear to include “a valid construction purpose.” These included \$4.9 million that NPS spent from its construction account on security at the Department of the Army’s Memorial Day and Independence Day concerts at the Capitol in 2014 and \$37.5 million over seven years on air quality monitoring at national parks that will be paid back to NPS by U.S. EPA.

U.S. Rep. Gosar Leads U.S. House Committee Passage Of Bi-partisan Grand Canyon Bison Management Act

[Grand Canyon \(AZ\) News](#), October 21, 2015

PHOENIX – A solution to a rapidly growing bison herd on Grand Canyon’s North Rim was reached after a bill was approved that could allow hunters to obtain state hunting licenses to hunt the bison within park boundaries.

The U.S. House Natural Resources Committee approved the bill allowing the Arizona Game and Fish Department (AZGFD) to better manage and conserve the bison population within the park Oct. 8.

The Committee passed the Grand Canyon Bison Management Act, attaching it as an amendment to the larger Sportsman’s Heritage and Recreational Enhancement (SHARE) Act. The Grand

Canyon Bison Management Act requires the U.S. Department of Interior and the Arizona Game and Fish Commission to coordinate on a plan that allows sportsmen holding a valid state-issued hunting license to assist in management of the bison population within the park.

“Yesterday the House Natural Resources Committee threw their support behind protecting the Grand Canyon National Park, wildlife conservation and supporting our dedicated sportsmen and women,” said Kurt Davis, chairman of the Arizona Game and Fish Commission. “The Arizona Game and Fish Commission and Department thank U.S. Rep. Paul Gosar for leading this commonsense legislation in the U.S. House, with the support of our Arizona Congressional delegation. We also look forward to continuing to work closely with U.S. Sens. John McCain and Jeff Flake in the Senate.”

The bi-partisan bill is a step closer to being considered by the full U.S. House of Representatives. McCain and Flake have introduced identical legislation in the Senate.

“The bison population is exploding and this issue needs to be resolved now,” Gosar said. “The bi-partisan, bicameral effort passed with unanimous consent by the committee will protect Arizona’s greatest treasure, the Grand Canyon, from this species in a responsible manner. This legislative solution is a victory for sportsmen, conservationists and taxpayers who will provide a timely resolution to the bison problem plaguing the Grand Canyon National Park.”

The Grand Canyon Bison Management Act aims to address an over-abundance of bison whose movement in and near the canyon’s North Rim have impacted natural and cultural resources within the park.

Wildlife surveys estimate around 600 bison have migrated into the park, where hunting is prohibited. The park has since become a safe haven for the bison population, which has led to overgrazing and damage to the Grand Canyon’s natural resources.

The House bill was co-sponsored by U.S. Reps. Ann Kirkpatrick, Kyrsten Sinema, Matt Salmon, David Schweikert and Trent Franks.

Floods Trap Stargazers, Rangers In Death Valley

[Greenwire](#), October 20, 2015

Mudslides and flooding after severe thunderstorms in Death Valley National Park on Sunday trapped three park rangers and about 20 visitors – many out to see a clear night sky – in a volcanic crater overnight. Park spokeswoman Abby Wines said the stranded people spent the night in Ubehebe Crater, maintaining contact with park headquarters until they were able to reach safety yesterday morning. No injuries were reported, but Wines said the unexpectedly severe storms knocked out power in the area, damaged and closed several roads, and filled a historic visitor’s center with several feet of mud and debris.

National Park Service Set To Continue With Tree-Cutting At Potomac Campground

[Bethesda \(MD\) Magazine](#), October 21, 2015

Updated at 12:45 p.m. – After complaints from two nearby residents and a call from County Council member Roger Berliner temporarily halted tree-cutting operations Friday at a Potomac campground, the National Park Service said it plans to resume the tree-cutting and will probably do so in the next few days.

John Noel, deputy superintendent for the C&O Canal National Historical Park, told Bethesda Beat Monday that he went to the Swain's Lock Recreation Site to examine the 26 trees proposed to be removed and 32 others proposed to be pruned at the site's campground. He agreed that the trees are rotting and in danger of falling on park users below.

Rather than call in another arborist to judge the trees, Noel said the tree-cutting would resume after he is able to explain the situation to Barbara Brown and Sylvia Diss, the two Potomac residents who first raised concerns about removing trees at Swain's Lock.

Noel said two National Park Service arborists and three arborists with the tree-cutting contractor have already reviewed which trees are rotting and are in agreement. He said C&O Canal Park officials regularly review the health of trees in recreation areas throughout the park's 184.5 miles of land.

"Having a sixth person come out and look at it would be ridiculous," Noel said. "We don't think it's worth taxpayers' money to do that."

The complaints from Brown and Diss led to Berliner calling park Superintendent Kevin Brandt, who agreed to halt the work until another review could be done.

Brown, who more than 10 years ago led the charge against Washington Redskins owner Dan Snyder's clear-cutting of trees between his Potomac property and the C&O Canal Park, said Tuesday that the tree-cutting operation began last week.

"There aren't any hazardous trees down there. It's a beautiful campground," Brown said. "They are basically clear cutting it and there's no explanation except that they don't like the type of trees there."

Noel says there are hazardous trees around the campground.

"There are a lot of qualified people looking at this and the last thing we want to do is cut a tree down that's a healthy tree," Noel said. "But in our campgrounds, our visitors have a certain expectation of safety. People are laying in a tent. They are picnicking at a table. There are dead branches on these trees that have the potential to fall."

Most of the 58 trees to be removed or pruned are maple and boxelder trees, Noel said. He said the tree-cutting would leave plenty of healthy trees on the Swain's Lock campground and that "you're not going to notice any difference in the tree canopy."

"In many cases, the trees are rotten from the center of the tree and you can't tell as an unskilled arborist whether this tree that looks fairly decent isn't completely rotten in the center," Noel said. "We're constantly evaluating our trees, especially in these high-use areas."

Canoe Trip Around Wolf Lake An Eye-opener For Clark Students

[Merrillville \(IN\) Post-Tribune](#), October 20, 2015

All classes in Grades 6 through 9 at George Rogers Clark Junior-Senior High School in Hammond recently experienced a unique field trip right in their own back yard — a canoe trip around Wolf Lake located only a few blocks from the school.

The venture was made available through a partnership with the National Park Service, Dunes Learning Center and Wilderness Inquiry.

"Part of our outreach program at Dunes Learning Center is the Mighty Acorns program, which we deliver with Shirley Heinze Land Trust and the Field Museum," executive director Geof Benson said. "This year, we leveraged the Mighty Acorns connections and others to experience the Canoemobile as part of their fall field trip for watershed education."

After walking with her classmates the few blocks from school to the Wolf Lake Pavilion, Clark ninth-grader Jazlyn Robles of Hammond talked about her first experience with a canoe last year while on vacation with her family.

"That was very exciting and I'm looking forward to my second time," she said "It wasn't too hard."

Classmate Riley Bishop of Hammond wasn't apprehensive about her first try with the canoe paddles.

"I've never been canoeing, so this is a new experience for me," she said, as her group was instructed on the finer points of paddling. "I've been to concerts and fishing here at Wolf Lake, but not on a boat. It's very exciting to see things from a different view."

The Canoemobile is a traveling fleet of 24-foot canoes going across the nation to teach environmental literacy to urban youth. Students from 24 cities in Lake, Porter and LaPorte counties participated in the program, which also includes home schools and a Boy Scout group.

Clark teachers attended an introductory class at Dunes Learning Center before bringing the program to their classrooms.

"This (program) is really beneficial to the students," said Clark American literature teacher Aquinas Lewis, as her class took part in nature activities before heading to their canoe. "They can take what they've learned in class and bring it to life."

Before stepping into the 12-seat Voyager canoes, the students were given safety tips, instruction on how to handle a paddle, and other pertinent information.

Once everyone was settled in their seats, Wilderness Inquiry educators gave lessons to the students as they skimmed across the lake.

The water-based adventure makes a big impression on both students and educators, according to Benson, the Dunes Learning Center executive director.

"You can see how proud and excited they are as they get out of the boat," he said. "Students leave the experience more confident and ready to learn. That's why we do it."

In addition to the three-day student event, Dunes Learning Center also hosted a Community Day for the public at Wolf Lake. Canoe lessons and a trip around the lake were on the agenda.

Kassie White and her son Adam, 14, were among the dozens going out in the water.

"It was very interesting to learn exactly what's in this area," she said of the discussion on the canoe. "Seeing the natural habitat from this view was an eye-opener."

New Superintendent At Colonial National Historical Park Reaching Out To Community

[Newport News \(VA\) Daily Press](#), October 20, 2015

Kym Hall visited Jamestown Island on a family vacation 12 years ago, thinking she wanted her National Park Service career to bring her there.

In July she took over as superintendent of the Colonial National Historical Park.

"I saw the resources and saw the stories, and said this is phenomenal," Hall said, sitting in her glass-fronted office with the green park spilling out behind her. "This is the birth of our country and I want to work here someday — I want to be the superintendent here someday. This is great."

She didn't think it likely, but when her friend Dan Smith got ready to retire from the job last year, he encouraged her to apply. She still can't quite believe it has all come together, and is quickly working to build relationships with local officials and organizations.

"Since that time, I think they've done a lot of the work on the Yorktown end of things," Hall said. "They've redone the Riverwalk and I've gotten to see Main Street, and kind of think about what could happen there in terms of bringing that back to life in a more vibrant way.

"So to me it was just like there's all kinds of possibilities of things that we can do here."

Hall, 48 and the mother of three sons, is a 28-year veteran of the National Park Service who grew up on the West Coast. She comes to Colonial after short stints as acting superintendent for the Outer Banks Group parks in North Carolina and Glacier National Park in Montana.

Hall had worked as deputy superintendent at Glacier since 2011. She began her career at Olympic National Bank in Washington state before working on various regulations at the NPS headquarters in Washington, D.C., as well as serving as superintendent of the Southeast Arizona Group parks and acting superintendent of Glen Canyon National Recreation Area in Arizona.

The York County Board of Supervisors warmly welcomed her at its Sept. 1 meeting. Hall hit a few key points, then addressed several issues raised by board members in a 45-minute portion of the meeting.

Hall told the board members she wants to get businesses into vacant buildings in Yorktown Village, and asked for their patience while she looks at a parking plan for the Fourth of July and other big events. When asked, she also briefly addressed the controversial replica tobacco press that was installed in the village and a road safety issue on the Colonial Parkway near Queens Lake

"They are issues that need to be dealt with," Hall said, stressing that her approach is to always try to be a "good neighbor" and to work collaboratively with other groups to find solutions.

Those issues have been prioritized, and Hall said this past week that she is addressing attracting businesses and parking first. The tobacco press, for right now, is being left in place until more research on its historical authenticity can be done.

Officials from the NPS regional office will visit next week to start assessing buildings and working on details about putting out bids and making leases with potential businesses.

Parking for big events will stay the same right now, but Hall is seeking money from the park service to do an archaeological study on the Yorktown Battlefield and village areas. In the past, parking around the village and setting off fireworks have been points of contention for the Fourth of July because of possible damage to the historical grounds and the risk for lightning strikes.

"I don't know that there's a perfect answer," Hall said. "But I think we've got a plan of at least how we're going to try to get some answers on that issue."

The park service will celebrate its centennial in 2016 and special events will run throughout the year to try to draw people into the parks. In line with that, Colonial will step up its outreach to the community.

"We're going to try to have a more significant presence," she said. "Not just asking people to come to us, but trying to step outside the boundaries and come to them. Whether that's schools, tourism meetings, collaborate discussions on challenges within our counties and communities.

"We want to be seen as part of the community in a variety of ways."

Hall said that she appreciates those who have advocated for preserving views at Jamestown Island with regard to Dominion Virginia Power's proposal to install overhead power lines across the James River there.

"The view should be protected," she said.

Her biggest request for the general public is to drive more carefully on the parkway and battlefield roads, watching speed limits and being mindful of bicyclists and people stopping to enjoy the views. All, of course, while not littering.

"Obey speed limits, be cautious, use it as a time to slow down and really take in the beauty of where we live," Hall said. "We do get sort of numb to it. Every day I get on that parkway and think, man this is beautiful. Feel free to slow down and enjoy that."

Williams can be reached by phone at 757-247-4644.

Devils Tower To Host Star Viewing Parties October Through December

[Casper \(WY\) Star-Tribune](#), October 21, 2015

Have you ever seen Devils Tower illuminated by the night sky? Now's your chance.

The National Park Service announced that Devils Tower will host a series of star viewing parties October through December. The eight parties are free of charge, and will last approximately two hours.

Telescopes will be provided at the events, but those with telescopes are encouraged to bring theirs along.

The first star party will take place on Thursday, and will feature an Orionids meteor shower. The next event will take place on Oct. 27 and will feature a guided walk with a ranger on the evening of a super moon. A full list of the events can be found at www.nps.gov/deto.

Why Are The Feds Sticking With A Racist Name For A Washington Lake?

[High Country \(CO\) News](#), October 21, 2015

In central Washington, one of Jonathan Rosenblum's favorite fishing holes is a lake near the foot of 8,122-foot Mount McGregor, where the Pacific Crest Trail snakes past the North Cascades. A union organizer from Seattle, Rosenblum loves to hike to the lake with his young daughters and ply them with the history of the region. One of his favorite stories is about Wilson Howard, a black gold miner, who braved the elements and unknown landscape to file a late-1800s mining claim in the area and named the lake after himself.

Because of Rosenblum's 2007 petition, Washington state now officially calls the lake by what is believed to be its oldest known name, Howard Lake. The federal government, however, recognizes the lake by a name that causes the jaws of most people of color to drop: Coon Lake. Rosenblum's research shows that some white locals began calling the lake "Coon Lake" in the early 1900s, after Howard's departure; further sleuthing uncovered no raccoons in the area.

The federal government did not follow the usual course of supporting the state's action, mostly because of opposition from the National Park Service, which manages the area that contains the lake.

Rosenblum is quick to recognize the irony of the situation. Washington Gov. Jay Inslee, who is white, calls the place Howard Lake, after the black miner who named it. President Barack Obama, who of course is black, is supposed to call it by a term often used as a racial slur and tantamount to fighting words.

The Park Service, acting on research from its North Cascades unit, originally defended its stance by claiming that there was ambiguity around the use of the term "coon."

"At the time, no evidence was found that the name was intended as a pejorative term or racial slur; if we had found such evidence, we would have recommended changing the name immediately," said Craig Dalby, a spokesman for the Pacific West Region of the Park Service. "The National Park Service is re-examining its position because of ongoing community concerns and will provide feedback to the U.S. Board on Geographic Names in the near future."

In the years leading up to its 2016 centennial, the Park Service has done a lot of talking and writing about the need for diversity and inclusiveness. But it has done little to address the issue: Its own ranks remain 82 percent white, as does the

estimated percentage of park visitors, according to the agency's 2011 survey. The controversy over Howard Lake gives the agency the opportunity to correct a historic wrong and send a much-needed signal about diversity.

Seattle Democratic Sen. Pramila Jayapal has written a letter urging the state's congressional delegation, as well as Interior Secretary Sally Jewell, to press a federal name change to Howard Lake. Fifty of her fellow state legislators, including six Republicans, have signed it. Another local activist, Eddie Rye Jr., whose daughter Angela is the former executive director of the Congressional Black Caucus, says he has been enlisting caucus members to "help in getting rid of this racist name."

By following the Park Service's lead on "coon," the federal board on geographic names butted up against its own policies, which say that the board "will not adopt a name for federal usage that is determined by the board to be derogatory to a particular racial or ethnic group, gender, or religious group."

The National Park Service seems irrationally resistant to the idea of honoring Howard. It filed a competing request in 2007 for the lake and a nearby creek to be named after William McComb, a member of the first road-clearing crew in Stehekin Valley. The proposal was rejected. Rosenblum strongly believes that changing the name to McComb would not have been an acceptable compromise. Removing the homage to Howard, the African American miner, was a form of what Rosenblum calls "eracism."

Times change. The issue of Coon Lake's name gained new steam following the Obama administration's recent decision to change the name of North America's tallest mountain from Mount McKinley to Denali. The state of Alaska had been petitioning for such a change for 40 years, and the dispute was resolved by the stroke of Secretary Sally Jewell's pen. A similar secretarial order could avoid a repeat of what already has been years of filings hearings, and also prevent a dispute over a 15-acre lake that, in this country's current racial climate, could get ugly.

Such an order also might save the National Park Service from itself. A projected nonwhite U.S. majority that is hostile to our national parks spells doom for the already resource-strapped agency. It's past time for the Park Service to back away from its misguided opposition, encourage Secretary Jewell to come to its rescue, and allow another black life to matter.

US GEOLOGICAL SURVEY

Controversial Study Claims 99.9 Percent Chance Of Major Los Angeles Earthquake In 3 Years

[Southern California Public Radio](#), October 20, 2015

Angelenos live under constant threat of a major earthquake, but a controversial new study from NASA's Jet Propulsion Laboratory puts a number on that threat. The scientific paper claims there is a 99.9 percent chance of an earthquake between magnitude 5 and 6.3 in less than three years.

The study was published earlier this month by the American Geophysical Union's Earth and Space Science journal. The bold claim has taken many in the seismic community by surprise.

JPL geophysicist Andrea Donnellan said this study used GPS and airborne radar data to look at land deformation caused by last year's 5.1 La Habra earthquake. Her team determined that, based on the surface changes, there is still a fair amount of pent-up seismic energy in the region that needs to be released.

"It's almost like using the surface of the Earth as an instrument to understand what is going on deeper," she explained.

That energy could spawn shaking associated with a magnitude 5 or 6 temblor, she added, but that energy could crop up on any number of faults within a 100-kilometer range of last year's quake.

This sort of prediction is quite common. What isn't common is claiming a 99.9 percent chance of such a quake in a window of time as small as three years.

Donnellan said her team arrived at the conclusion by looking at the number of magnitude 5 earthquakes in the region over the last 81 years. There were 32 such events.

"So if you just look at that on average, it's about an earthquake every three years," Donnellan said.

Lucy Jones with the U.S. Geological Survey said that methodology doesn't fully explain the prediction, and the study doesn't adequately address this either.

The USGS conducts its own look at quake risk in California — the most recent version is called Uniform California Earthquake Rupture Forecast, Version 3.

Jones said that, according to those models, there is only an 85 percent chance of a magnitude 5 or 6 quake in the same region over a three-year period.

"It's nowhere near a 99.9 percent number," Jones said.

While the AGU journal the JPL paper appeared in usually conducts peer review of studies, Jones said it's custom that most quake prediction studies are also sent to the National Earthquake Prediction Evaluation Council or its California counterpart.

However, she said this paper was not submitted to those organization for review. She added that there is no scientific consensus on this issue.

"This is the opinion of a small group of scientists — it has not been reviewed for action as a prediction, and I wouldn't be changing any behavior on the basis of this study," Jones said.

Several earthquake researchers approached by KPCC said they were surprised by this study and its conclusions. However, JPL's Donnellan defended the research, saying that it's now up to the larger scientific community to evaluate the claims and see if different ones are called for.

"In science, individual methods are always controversial to somebody, but that's how we make forward progress," she said.

The study, titled "Potential for a large earthquake near Los Angeles inferred from the 2014 La Habra earthquake," was first published by AGU online on Oct. 1.

White House: Canadian Relationship Remains Strong After Trudeau Election

By Gregory Korte

[USA Today](#), October 21, 2015

WASHINGTON — The White House congratulated Canada's prime minister-designate Tuesday, signalling that a change in power north of the border wouldn't diminish the close relationship between the two countries.

President Obama will call Justin Trudeau Tuesday — and will likely call conservative Prime Minister Stephen Harper as well, White House Press Secretary Josh Earnest said, saying Obama was "deeply appreciative of Prime Minister Harper's acts to build a strong U.S.-Canada relationship."

The election has the potential to change the relationship on a number of key issues. Trudeau had accused incumbent prime minister, Conservative Stephen Harper, of reducing the entire U.S.-Canada relationship to a dispute over the Keystone XL pipeline and hurting relations by "haranguing" Obama over the issue. Obama has vetoed a bill to approve the 1,179-mile oil pipeline from Hardisty, Alta., to Steele City, Neb., although his State Department says it's still considering an application that would grant a permit.

Trudeau also supports the pipeline, but has done so within an environmental platform that also proposes a new North American carbon tax regime to reduce greenhouse gasses.

But while the Liberal Party victory could bring a closer alignment on environmental issues, it may also create new tensions on others. Trudeau has also said he wants to end Canada's involvement in operations in Iraq and Libya to counter the Islamic State, instead following a train-and-equip strategy that the United States has found ineffective.

"It would be shortsighted to reduce the relationship between our two countries to just one issue," White House Press Secretary Josh Earnest said Tuesday. "The fact is, there are a whole range of issues where the United States and Canada worked effectively together to advance the interests of both countries. Obviously, Canada made a substantial and important contribution to our counter-ISIL coalition."

Earnest also cited Canada's work toward an international climate agreement in Paris next month, and on the Trans-Pacific Partnership trade negotiations. Those issues are even more important than the differences over the Keystone pipeline, he said.

Obama Offers Congratulations To Trudeau, Appreciation To Harper

By Meagan Fitzpatrick

[CBC News \(CAN\)](#), October 20, 2015

U.S. President Barack Obama has congratulated Justin Trudeau on leading the Liberals to victory and offered his appreciation to outgoing Prime Minister Stephen Harper for his efforts to build a strong bilateral relationship, the White House said Tuesday.

The Canadian election results were the first topic of conversation at the daily White House briefing. Press Secretary Josh Earnest was asked whether he expects the Canada-U.S. relationship to get easier under Trudeau because Harper seemed "annoyed" over the long delay on a Keystone XL pipeline decision.

"Well, I think it would be short-sighted to reduce the relationship between our two countries to just one issue," Earnest responded. The proposed cross-border pipeline recommendation is still pending at the State Department and has yet to get a final decision from Obama.

Earnest said there are a number of issues that Canada and the U.S. work effectively on, including Canada's participation in the international coalition to fight ISIS terrorists in Iraq and Syria and the recently concluded Trans-Pacific Partnership trade deal. Earnest said Canada's negotiators were instrumental in helping close that deal and that both countries will benefit from it if it's implemented.

But pressed further on when a Keystone decision might come, Earnest said Secretary of State John Kerry spoke about it earlier Tuesday and indicated the Canadian election result would have no bearing on the timing of a Keystone decision or on whether the answer will be "yes" or "no." Canada can do more on climate change

Earnest said the White House does not have an expectation on when the State Department will complete its review and send its recommendation to Obama. The president does expect to make a decision, however, before he leaves office after the 2016 election, he said.

"Hopefully we'll get it done well before then, if for no other reason than we can stop talking about it," Earnest said.

Obama is under pressure from environmentalists to reject the TransCanada Corp.'s pipeline project that would connect Alberta's oil patch with refineries in the Gulf Coast. Trudeau, like Harper, is in favour of the pipeline's construction but also says he wants to co-operate with the U.S. on environmental issues.

Liberal Leader Justin Trudeau visited Washington, D.C., in the fall of 2013. He's pledged to make the U.S.-Canada relationship a more constructive one and blames outgoing Prime Minister Stephen Harper for weakened ties between the two countries. (Susan Walsh/Associated Press)

Harper's government has lobbied for years in Washington for approval of Keystone. The outgoing prime minister has called the approval a "no-brainer" and Harper once said he wouldn't take "no" for an answer.

Earnest noted on Tuesday that Canada has made some "important commitments" in advance of the United Nations global climate change conference in December in Paris but added: "We believe it's possible that there's more that Canada could do in this regard."

It's too early to judge whether Trudeau will follow through on environment policy promises made during the campaign, said Earnest, while also admitting he did not follow the campaign closely. Obama to press Trudeau on environment

Obama has been pressing world leaders to make serious commitments to reduce greenhouse gas emissions in Paris, and that will be no different with Trudeau, he said.

Trudeau has pledged to repair what he described as a frayed Canada-U.S. relationship under Harper but that could get off to a rocky start if he follows through on a promise to withdraw Canada's fighter jets from the U.S.-led fight against ISIS. The Liberals want to provide more humanitarian aid in Iraq and Syria and have Canada's military involved in training missions not bombing missions.

The White House said it appreciates Canada lending its skill and expertise to the mission so far and hopes it can continue to count on its northern neighbour to participate in the coalition.

The White House spokesman said in addition to phoning Trudeau, he expects Obama will make a phone call to Harper in the near future as well.

"Our bilateral relationship has enhanced the security and prosperity of the American people and we certainly are appreciative of Prime Minister Harper's efforts to strengthen that relationship and we look forward to building on that kind of progress when Mr. Trudeau takes over the Prime Minister's Office."

White House Congratulates Canada's Trudeau, Obama To Call Soon

[AFP](#), October 21, 2015

WASHINGTON (AFP) – The White House on Tuesday welcomed the election victory of Canada's Liberal leader Justin Trudeau and expressed hope his government would step up actions to fight climate change.

Spokesman Josh Earnest said President Barack Obama would speak to the prime minister-elect as soon as Tuesday, and indicated the White House hopes his government will help reach a major global climate deal in December.

"Canada has also made a substantial and important commitment in advance of the Paris climate talks," Earnest said, praising the government of outgoing Prime Minister Stephen Harper.

He added, however, "We believe that it's possible that there is more that Canada can do in this regard."

"The United States, and certainly President Obama congratulates prime minister designate Justin Trudeau on the Liberal Party's victory in yesterday's elections," Earnest said.

"I would expect the president will have the opportunity today to call Mr Trudeau to congratulate him on that election victory."

Earnest said the White House was “deeply appreciative” of his work “to build a strong US-Canada relationship.” Obama and Harper’s government had clashed over climate policy and the approval of the transborder Keystone pipeline. Earnest said “it would be shortsighted to reduce the relationship between our two countries to just one issue.”

5 Reasons The U.S. Should Care About Canada’s New Prime Minister

By Kim Hjelmgaard

[USA Today](#), October 21, 2015

Canada just elected its first new leader after nearly a decade of Conservative Party rule. Here are five ways Liberal Party leader and soon-to-be prime minister Justin Trudeau is likely to affect policies in Canada and the United States.

THE ECONOMY

Trudeau, 43, has pledged to increase deficit spending on major infrastructure projects to kickstart Canada’s sagging economy. He says Canada’s fortunes won’t improve unless it chooses economic stimulus over a balanced budget, which he has vowed to achieve by 2020. A stronger Canada helps the USA because they are huge trading partners.

TAXES

Trudeau has pledged to hike taxes for Canada’s top 1% of earners and cut taxes for the middle class, although he has been vague on how he defines middle class. According to Canada’s Globe and Mail newspaper, those who earn over \$200,000 will see their taxes go up by about 4% under his plan.

MARIJUANA

Trudeau says he wants to legalize the drug “right away,” a position that provoked ridicule from political opponents during the election campaign. However, he has been vague on the details of his legalization program, including how it would be taxed and possible transport across the U.S.-Canadian border.

KEYSTONE XL PIPELINE

Trudeau supports the proposed oil pipeline system that would run about 1,200 miles from Canada to Nebraska, but he is less of a cheerleader for the idea than outgoing leader Stephen Harper. He is worried about the environmental impact and has called for better safety standards. He opposes a separate project for energy products to be piped from Alberta to British Columbia.

U.S. RELATIONS

Trudeau promised to improve strained relations with President Obama, who has not embraced the Keystone pipeline project. Trudeau also said he wants to find constructive ways of working with Washington on other issues. That should be easier since the Liberal leader and Obama are closer in political philosophy than were Obama and Harper.

Under New Leader Trudeau, President Obama May Start Hailing ‘O Canada’

By Adam Kovac

[USA Today](#), October 21, 2015

MONTREAL — Canada’s surprising election of the Liberal Party’s Justin Trudeau as prime minister means both the United States and its northern neighbor can expect increased cooperation during President Obama’s last year in office.

“I think Justin Trudeau is certainly going to reach out to Obama,” said Donald Abelson, political science professor at Western University in London, Ontario. “They share a lot of similar interests in terms of protecting the environment and advancing certain progressive policies on the world stage.”

Abelson pointed to a speech Trudeau gave over the summer about forming an intra-governmental committee to oversee the relationship between the two countries. “I think he does understand the power discrepancy between the two countries,” he said.

Trudeau, 43, and outgoing Conservative Prime Minister Stephen Harper, 56, differ in their approach to foreign policy. Harper, who was seeking a rare fourth term before losing Monday’s parliamentary elections, was an outspoken supporter of the Israeli government, gave a lukewarm reaction to the Iranian nuclear agreement and took strong stances against Russian aggression in Ukraine.

Because of Canada’s small military, any changes by Trudeau will be more of a change in tone than actual involvement of Canadian forces in the Middle East or elsewhere, said Bruce Hicks, a visiting fellow at the Glendon School of Public and International Affairs of York University in Toronto.

“The Liberals will be less supportive of the (Prime Minister Benjamin) Netanyahu approach to Israeli politics,” Hicks said. “They will be pro-Israel, but they will be centrist pro-Israel. I think you will also see them less prone to wanting to be involved in military approaches to the Middle East when it comes to things like (the Islamic State). They’ll be more about wanting to spend money on aid and development.”

That change in philosophy will affect more than just Canada's relationship with the United States.

Canada is "back" on the world stage, Trudeau told a rally Tuesday after his landslide victory ended nearly a decade of Conservative Party rule.

"I want to say to this country's friends all around the world, many of you have worried that Canada has lost its compassionate and constructive voice in the world over the past 10 years," Trudeau said. "On behalf of 35 million Canadians, we're back."

Under Harper, Canada had a more adversarial relationship with the United Nations than with previous leaders, said John McArthur, a senior fellow in the Global Economy and Development program at the Brookings Institution in Washington.

"In general, I would predict the Liberal government will want to work a lot more with multilateral institutions, on the premise that that's the way for a mid-sized, advanced economy like Canada's to have it's greatest influence," he said. "The Trudeau government will probably want to invest more time and political capital in the United Nations. It was seen as a bad moment when Canada wasn't elected to the Security Council a couple of years ago."

Trudeau has expressed support for the XL Keystone pipeline, which would carry crude oil from western Canada to refineries in the American Gulf Coast, but he also vowed to focus more on environmental affairs than Harper did. The future of his energy policy is clouded by the revelation just days before the election that a senior campaign adviser had been advising a Canadian energy company on how to lobby the government.

"There's a view among some, and it's just a hypothesis, that the Obama administration might have had an easier time supporting Keystone if the Canadian government was seen as more progressive and proactive on reducing emissions," McArthur said. "If that is the case, it might be that if Canada shows more proactivity, that opens up a new possibility of conversations on the energy sector, which is so strategically center to the Canadian economy."

Trudeau's iconic father Pierre, who was Canada's prime minister from 1968 to 1979 and again from 1980 to 1984, famously had an antagonistic relationship with Republican Presidents Richard Nixon and Ronald Reagan. While the younger Trudeau does share policy goals with Obama, the relationship between both countries can change drastically depending on who is elected president in 2016.

"I think given Trudeau's ideological orientation, he's more inclined to have a warmer relationship with a Democratic president than a Republican one," Abelson said. Pierre Trudeau "thought with his mind, he acted intellectually. The son, I think, is going to act more with his heart. I think he's going to try and smooth over tensions between the two countries without sacrificing sovereignty — not always easy to do."

Kerry: Canadian Vote Won't Change Keystone Review

By Timothy Cama

[The Hill](#), October 20, 2015

A new government coming to power in Canada does not change how the Obama administration is handling the proposed Keystone XL pipeline, Secretary of State John Kerry said Tuesday.

Kerry made the declaration the morning after Justin Trudeau was tapped to become Canada's next prime minister, since the Liberal Party he leads won a majority of Parliament seats in the election.

Trudeau, like outgoing Prime Minister Stephen Harper, supports the Canada-to-Texas oil pipeline, but he is unlikely to put as much of the government's support and resources into lobbying the Obama administration for it.

Kerry told MSNBC host Andrea Mitchell that the new regime will have no impact on how the State Department reviews TransCanada Corp.'s application to build Keystone XL.

"The decision on Keystone is being based on the merits and countervailing balance of all the input that has come from a very exhaustive agency review," Kerry told Mitchell at a forum hosted by the State Department, after she asked about possible changes to the equation surrounding Keystone.

"I have said again and again, I want to get that done as fast as possible and that is very true."

Trudeau, son of former Prime Minister Pierre Trudeau, has criticized Harper for the degree to which his support for Keystone and for Canada's oil sands industry has strained relationships with other countries, including the United States.

"Unfortunately, Mr. Harper has narrowed the entire relationship with the United States to a single point around the Keystone XL pipeline, and he went to New York and criticized and harangued the president," Trudeau said during a recent debate.

Trudeau could also take some steps toward improving Canada's climate policies, after castigating Harper for making a mockery of Canada on the world stage for weakness on climate, the Canadian Broadcasting Corp. said.

White House: Canadian Election Unlikely To Affect Keystone Timing

Canada's New Prime Minister May Be A Liberal—But He Still Loves The Keystone Pipeline

By Suzanne Goldenberg

[Mother Jones](#), October 20, 2015

Well before his stunning victory in Canada's elections, Justin Trudeau, the Liberal party leader, telephoned David Suzuki, the country's best-known science broadcaster, environmentalist—and a national treasure—to ask for his endorsement.

The conversation did not go well. Suzuki admitted to journalists he called Trudeau a twerp, and the Liberal leader dismissed his critique of the party's climate policy as "sanctimonious crap."

Those hoping for a U-turn in Canada's climate change policy after Conservative Prime Minister Stephen Harper's crushing defeat are in for a reality check.

Trudeau has repudiated Harper's vision of Canada as an "energy superpower," promised to reverse devastating cuts to government science budgets, and fix the country's reputation as a carbon bully in international climate negotiations.

But it would be a mistake to see Trudeau or the Liberals as climate champions. In his victory speech on Monday, there was no mention of climate change, and he was criticized for being vague on the issue during campaigning.

Those hoping for a U-turn in Canada's climate change policy after Conservative Prime Minister Stephen Harper's crushing defeat are in for a reality check.

Trudeau committed to take part in the Paris climate conference at the end of the year, and to convene a meeting of provincial leaders within 90 days to come up with a plan to fight climate change.

His party's campaign platform called for the setting up of a \$2 billion fund to help projects that promote clean energy.

However, Trudeau supports the Keystone XL pipeline—Canada's bid to find new markets for its vast carbon reserves in the Alberta tar sands—a position that puts the Liberal leader at odds with campaigners and with Barack Obama.

Trudeau has close ties to Keystone. David Gagnier, his campaign co-chair, was forced to step down last week after it emerged he had written a memo to TransCanada, the company building the pipeline, offering lobbying advice.

Moments after his victory, Trudeau came under pressure to do more to fight climate change. Elizabeth May, the Green party leader, told the broadcaster CBC she had asked him to think about the topic during a short election night conversation.

"When can we sit down and talk about the climate conference?" May said she asked Trudeau. "We only have 40 days for Canada to get our act together. I'm very concerned that we have to rebuild the damage that Stephen Harper has done to our laws, to some of our policies, to our reputation in the world."

Indeed, Canada has a lot of catching up to do. But two key Liberal positions, on the Keystone XL and on emissions reductions targets, put Trudeau out of step with Obama, who has made climate change the signature issue of his second term in the White House.

Those contradictions could have been the result of tough political realities of the election. Trudeau started out a distant third to the conservatives. Suzuki told CBC he chided Trudeau for playing politics.

"I said, 'Justin, stop it,'" Suzuki told CBC. "You're just being political. I know that you want to make headway in Alberta so you're for the continued development of the tar sands, you're for the Keystone pipeline, but you're against the Northern Gateway [pipeline]. You're all over the damn map!"

In Suzuki's version of the conversation, Trudeau did not appreciate the critique or hearing that keeping warming to 2 degrees Celsius (3.6 degrees Fahrenheit), the internationally agreed goal of the climate talks, would mean that 80 percent of the crude in the tar sands would have to stay in the ground.

But now that Trudeau has won such a decisive majority, his position could change, said Katharine Hayhoe, the climate scientist and commentator, who is from Canada. "It is certainly true that in the past liberal governments have not lived up to their promises on climate, but today we are in a very different situation, in terms of seeing the impacts and in terms of other nations like China taking action," she said.

"It's a different political climate internationally for climate change now than what it was nine years ago, the last time there was a liberal government. I feel a lot more momentum, a lot more impetus, a lot more motivation for Liberals to take a stronger stand on this issue.

"I think that will give him a mandate to make more bolder choices, and I hope that this is one of the bolder choices he will make."

What The Rest Of The World Should Expect From Justin Trudeau.

By Joshua Keating

[Slate](#), October 20, 2015

Canada's election Monday night turned out not to be the nail-biter everyone had expected. Justin Trudeau's Liberal Party ultimately won handily with 40 percent of the popular vote, taking 184 of 338 seats in parliament to form a majority government. Canadians have now elected a very different leader from outgoing Prime Minister Stephen Harper in both substance and style, but what can the rest of the world expect from Canada's new PM?

Joshua Keating is a staff writer at Slate focusing on international affairs.

The main source of U.S.-Canada tension in the later Harper years has been the proposed Keystone XL pipeline, which Barack Obama vetoed in February. Trudeau has described his support for the pipeline as "steadfast," but it's clearly not the make-or-break issue for him that it was for Harper. If Republicans take back the White House in 2016, he'd probably be open to talking about it. But if the Democrats win, we may not hear much more about Keystone.

More significantly, Trudeau opposes the "Northern Gateway" project that has been building pipelines through British Columbia to load Alberta oil onto tankers bound for Asia. He's also vowed to end subsidies for the fossil fuel industry and invest in green energy. So, it will be a very different Canadian government that shows up at climate talks in Paris in December, one that will be much closer to the Obama administration's priorities.

Other changes might be more significant, though it could take a while to notice them. The Liberals opposed Canadian airstrikes against ISIS, which Harper's government expanded into Syria in March. But Canada has conducted only a handful of airstrikes against ISIS in Syria, and while they have flown more than 200 in Iraq, it's a small number compared with the thousands of missions flown by the United States, or for that matter Russia. Even if Trudeau ends Canada's contribution to the air war, he may end up increasing his country's involvement in Iraq if he follows through on a pledge to send more Canadian personnel to train Iraqi forces.

In the broader Middle East, Trudea has promised, in the wake of the recent nuclear agreement, to restore diplomatic relations with Iran, which Harper suspended in 2012. Harper was also known as one of the most enthusiastically pro-Israel world leaders. While Trudeau isn't expected to be quite as buddy-buddy with Israel's Benjamin Netanyahu, overall policies shouldn't change that much.

Trudeau has also said he would withdraw the country's plans to buy Lockheed's troubled F-35 fighter jet. Instead, the government will plan to buy more affordable aircraft to replace Canada's aging fighter fleet and buy more icebreakers and combat ships amid growing tension with Russia in the Arctic.

The biggest shift may come on refugee policy. Trudeau has pledged to take in 25,000 asylum seekers by Jan. 1 and has said he'd consider airlifting Syria refugees directly from the Middle East. Harper's government had been criticized for the slow pace of refugee resettlement, particularly after the death of toddler Aylan Kurdi, whose family was trying to reach Canada, captivated the world's attention last month. As of August, Canada had only taken in a little more than 1,074 of the 10,000 Syrians it had promised to resettle over three years. Harper had also tried, unsuccessfully as it turned out, to make Muslim face veils a major issue in the campaign.

Trudeau seemed to be referring to the issue in his victory speech Monday night, saying, "We know in our bones that Canada was built by people from all corners of the world, who worship every faith, who belong to every culture, who speak every language." While it was undoubtedly the economy more than any other factor that sealed Harper's downfall, it's notable, given the recent populist backlash to the refugee crisis in Europe, that in the first major election where Syrian refugees were an issue, the side advocating a more open and generous approach prevailed.

Justin Trudeau Seeks To Set New Tone In Canada

Newly elected prime minister vows to restore country's reputation for international cooperation on climate change and other issues

For Canada, Most Noticeable Change Under Justin Trudeau Could Be Tone

By Ian Austen

[New York Times](#), October 21, 2015

OTTAWA — Justin Trudeau's Canada is likely to present a very different face to the world from the one it showed under Stephen Harper, the Conservative prime minister he and his Liberals decisively routed on Monday.

Mr. Trudeau has promised some major policy changes, among them legalizing marijuana, dropping out of the American-led bombing campaign against the Islamic State and deficit spending to pump up the economy and rebuild infrastructure.

But the most noticeable difference will probably be in tone. Mr. Trudeau has been promising since he took over his floundering party in 2013 that he would put an end to Mr. Harper's often belligerent style of politics and diplomacy.

"Sunny ways" are Mr. Trudeau's ways, he said in his victory speech early on Tuesday, borrowing the phrase from Wilfrid Laurier, a Liberal prime minister of about a century ago.

"A positive, optimistic, hopeful vision of public life isn't a naive dream — it can be a powerful force for change," Mr. Trudeau said, his voice faltering after 78 days of campaigning. And he said the sweeping victory his party won on Monday as it surged from third place in opinion polls to a clear majority in Parliament meant that "Canadians from all across this great country sent a clear message tonight: It's time for change in this country, my friends, real change."

Mr. Trudeau has spoken of scrapping Mr. Harper's emphasis on military solutions and Cold War talk abroad, and returning Canada to active participation in international bodies like the United Nations. Gone, he has said, will be the combative, lecturing approach Mr. Harper adopted toward the Obama administration over the Keystone XL oil pipeline project.

And gone, too, will be the Conservative habit of pushing policies at home that were popular with Mr. Harper's right wing but divisive to the larger electorate, like the sweeping antiterrorism laws that were passed after a gunman attacked Parliament last October. Mr. Trudeau has promised to amend those laws.

The Liberals won only 39.5 percent of the popular vote on Monday. But with three major parties and several minor ones jockeying for support, it was enough for a sweeping victory in Parliament, as the Conservatives demonstrated in 2011 when they won about the same share.

On Tuesday, during his first news conference since the vote result, Mr. Trudeau said he had told President Obama by telephone that he would honor a campaign pledge to remove Canada's military jets from the American-led military campaign against the Islamic State group.

But Mr. Trudeau declined to say when the aircraft would leave. The two men also discussed Mr. Trudeau's plans for improving Canada's record on greenhouse gas emissions, he said. The president, Mr. Trudeau added, teased him about his lack of gray hair and suggested that his new position might soon change that.

An Obama administration official, insisting on anonymity because of the delicacy of communications between the leaders, said the White House still hoped to find a way for Canada to play a role in the mission.

Mr. Trudeau's showing was the Liberals' best in 40 years and re-established the party as a national force, rather than one that relied heavily on one province, Ontario, for support. They drew votes away not only from the Conservatives, but also from the New Democrats, the other major opposition party of the center-left. The New Democrats, who led in the polls early in the campaign, wound up losing more than half their seats in Parliament, as well as any hope that the Liberals would be dependent on their backing to govern.

The Liberals swept the Atlantic provinces and more than doubled their seat count in Quebec, where voters had spurned the party in recent elections. They even won two seats and came close to taking a third in Calgary, Alberta, Mr. Harper's adopted hometown and the center of Canadian conservatism. The last time the Liberals won a seat there was in 1968, when the country was swept up in enthusiasm for Mr. Trudeau's father, Pierre Elliott Trudeau.

Justin Trudeau shares his father's good looks but not his demeanor. He does not flash the scalpel-sharp intelligence his father was known for, but neither does he display the sometimes acerbic nature that went with it. As a result, he has often been underestimated.

Before Mr. Trudeau took over the party leadership, Mr. Harper and the Conservatives won three straight national elections against weak Liberal opponents who proved vulnerable to the Conservatives' heavy reliance on attack advertisements.

In 2006, Paul Martin, then the prime minister, was saddled with the legacy of a fund-raising scandal left by his predecessor, Jean Chrétien. Next up was Stéphane Dion, a highly respected intellectual from Quebec who came across as somewhat pedantic and failed to counter Conservative ads claiming that a Liberal plan for a carbon tax would be economically disastrous.

In 2011, the party was led by Michael Ignatieff, who had spent most of his adult life as an intellectual and a journalist in the United States and Britain before returning home. The Conservatives successfully painted him as an opportunist.

Mr. Harper's party relentlessly attacked Mr. Trudeau during this campaign as well, portraying him as something of a dimwit who had "nice hair" but was "just not ready" to lead the country. But this time, the strategy flopped.

Though Mr. Trudeau said repeatedly that he did not want to trade on his family's name, growing up in the public gaze did mean that when he entered politics in 2007, he was already a celebrity with a reservoir of public good will to tap. The Conservative attack ads did not just fail to shake that good will; some analysts say they backfired by creating sympathy for Mr. Trudeau.

After his party's defeat on Monday, Mr. Harper resigned as Conservative party leader, but not in the orthodox manner. He made no mention of his intention during his concession speech, leaving his party to announce the news in a brief statement.

Mr. Harper's legacy includes reuniting the Conservative movement under a single party banner by merging his Canadian Alliance with the Progressive Conservatives. Under Mr. Harper, the party also developed an effective fund-raising machine.

Canadian law bans corporations and unions from making political donations, and imposes fairly low limits on personal donations. So the Conservatives used sophisticated software to develop and promote political issues that would draw large numbers of small donations from supporters, even if they found little support in the rest of the population.

The targeted approach was successful financially, but it may also explain why the Conservatives never significantly widened their support during a decade in power. The kinds of issues it led Mr. Harper to promote, like banning the wearing of face coverings by Muslim women at citizenship ceremonies, drew angry reactions that may have contributed to the government's defeat in the election.

The front-runner to succeed Mr. Harper as Conservative leader is Jason Kenney, the departing defense minister and one of the few party figures who had some free rein in Mr. Harper's highly centralized administration. Mr. Kenney acknowledged late Monday that issues he championed for the government, including the face-veil ban and the antiterrorism measures, might have created the opening that Mr. Trudeau seized to win.

"We need a conservatism that is sunnier and more optimistic than what we have sometimes conveyed," Mr. Kenney said. "We have to take collective responsibility for that."

Peter Baker contributed reporting from Washington.

Nicer Justin Trudeau Wins Over Canadians: Column

By David A. Andelman

[USA Today](#), October 21, 2015

What might have been the final straw for Canadian voters was the shocking photograph of the body of a Syrian child washed up in September on a Turkish beach. His family's asylum request had been turned down by Prime Minister Stephen Harper's Conservative Party government. Without hope, the family took to the seas in a flimsy boat that foundered in the Mediterranean before reaching the promised land of Europe — or Canada.

Of course, there were many other reasons why Canadian voters ended Harper's nearly 10-year rule Monday, all cautionary tales for American voters just embarking on the process of choosing a new president next year. Part of it is a reflexive turn-the-bums out attitude, which Republicans in the U.S. are counting heavily on. But most of the reasons Canadians opted to install the little-tested Justin Trudeau, 43, boiled down to one fundamental: The Liberal Party leader was simply nicer than his opponent. And most Canadians believe they are, too.

Harper was too tough on terrorism, on migrants, even on Muslim women who want to wear the veil. He did little to prop up a sagging economy or shelter his oil-rich nation from the impact of sagging oil prices. He put the Keystone pipeline among his top priorities and was a firm supporter of a host of U.S. military initiatives. Few were overwhelmingly popular in a Canada that hardly considers itself in terrorists' crosshairs, and wants to keep it that way.

So begins a political dynasty north of the border — Justin Trudeau following in the footsteps of his father, the politically canonized Pierre Trudeau, who served as prime minister twice for a total of more than 15 years in the 1960s, '70s and '80s.

Young Trudeau's win reflects something extraordinary that is finding resonance far beyond Canada's borders. First, there's the shift to the left. Canada has been a political counterweight in the past to American trends — after all, Trudeau's right-wing predecessor served throughout most of President Obama's administration, with considerable friction.

POLICING THE USA: A look at race, justice, media

But what's especially interesting is that Canada has now definitely gone back to the future. A study by two American researchers found that the Canadian Charter of Rights and Freedoms, ratified during the reign of Trudeau's father in 1982, is the most emulated model of government chosen by newly minted democracies. In part, it's the document's respect for human rights, but it's also just how nice Canadians are. While the U.S. Constitution and Bill of Rights might have set the standard in the past, Americans are no longer seen as people to be emulated, nor is our system of government, which has become in many respects all but dysfunctional.

While we Americans might not think about Canada a lot, we could probably learn quite a lot from them. The previous Conservative regime began going off the rails some time ago. Now it's up to Canada's Liberal Party to set it straight again.

A New Trudeau Era In Canada

[New York Times](#), October 21, 2015

The sweeping victory of Justin Trudeau in Canada's elections yesterday shows how ready Canadians were to emerge from a decade under the Conservative government of the secretive and combative Stephen Harper. Mr. Trudeau clearly benefited from voters' memories of his father, Pierre Elliott Trudeau, who came to power 47 years ago on a platform of liberal reforms and a wave of personal popularity that came to be dubbed "Trudeaumania." To those memories, Justin Trudeau, 43, added his own charisma and the promise that as prime minister he will return Canadians to the tradition of liberal and humanitarian values that his father championed.

In his 10 years in office, Mr. Harper pursued a conservative agenda of lowering taxes, cutting government programs and taking a tough line on security, including the passage of broad antiterrorism laws. His government also banned women from wearing face coverings at citizenship ceremonies.

Mr. Trudeau, by contrast, has pledged, among other things, to legalize marijuana, revise the antiterrorism laws, stop the purchase of F-35 fighter jets from the United States and end Canada's combat role in the American-led fight against the Islamic State. While both men backed the Keystone XL oil pipeline, Mr. Trudeau is open to addressing environmental concerns. To many voters, that was the major appeal of Mr. Trudeau — that he would return the Liberal Party, and Canada, to the country's core values, like a generous safety net, active participation in international organizations like the United Nations, a humanitarian foreign policy and an inclusive concept of nationhood. Mr. Harper's conservatism was at odds with that identity.

For the Liberals, the election was a stunning reversal of years of sagging fortunes. In the Harper years, the party had lacked a dynamic leader and was eclipsed on the left by the New Democratic Party, which relegated the Liberals to No. 3 in Parliament after the 2011 elections. This time the Liberals soared from 34 seats to 184 in the 338-seat Parliament, while the Conservatives shed 60 seats and the New Democrats lost 59. The difference was Mr. Trudeau.

As Americans know well, legacy can be a boon and a bane. For Mr. Trudeau, his heritage was clearly a blessing, especially as almost half a century had elapsed between his father's election and his own. But in all those years, Canadians never fully lost their infatuation with the Trudeau era.

As for experience, the son is not the father. Pierre Elliott Trudeau, who died in 2000, was a star lawyer, intellectual and minister of justice before becoming prime minister. Justin Trudeau, is not the intellectual dynamo his father was, and before he entered politics in 2007, he had been a snowboard instructor, high school teacher and nightclub bouncer (he remains a keen amateur boxer).

But after the Liberals' drubbing in 2011, the party found in Mr. Trudeau a fresh leader capable of inspiring much of the same excitement and loyalty as his father, especially among youthful voters. In politics, that counts for a lot, but it also creates a lot of expectations.

Canada Withdrawing Fighter Jets From Iraq, Syria, Trudeau Tells Obama

[AFP](#), October 21, 2015

Ottawa (AFP) – Canada's prime minister-elect Justin Trudeau said Tuesday he told US President Barack Obama that Canadian fighter jets would withdraw from fighting the Islamic State group in Iraq and Syria.

But he gave no timeline.

"About an hour ago I spoke with President Obama," Trudeau told a press conference.

While Canada remains "a strong member of the coalition against ISIL," Trudeau said he made clear to the US leader "the commitments I have made around ending the combat mission."

Canada last year deployed CF-18 fighter jets to the region until March 2016, as well as about 70 special forces troops to train Kurds in northern Iraq.

During the campaign, Trudeau pledged to bring home the fighter jets and end its combat mission. But he vowed to keep military trainers in place.

His new Liberal government will be "moving forward with our campaign commitments in a responsible fashion," Trudeau said.

“We want to ensure that the transition is done in an orderly fashion.”

Meet Canada’s New Prime Minister, Justin Trudeau

By Deneen L. Brown

[Washington Post](#), October 21, 2015

Justin Trudeau, the dashing eldest son of political legend Pierre Trudeau, has ushered in Canada’s first political dynasty with a stunning come-from-behind victory. But the new prime minister’s win may owe as much to voters’ fatigue with the outgoing government as to the legacy of his father.

The younger Trudeau defeated Prime Minister Stephen Harper in Monday’s elections, ending a nine-year reign that had shifted Canada politically to the right.

The victory comes just weeks after Trudeau’s Liberal Party was running third in the polls, behind Harper’s Conservatives and Thomas Mulcair’s center-left New Democratic Party.

Both Mulcair and Harper had taunted the athletic Trudeau, 43, in campaign ads that referred to him as “Justin” and made fun of his “nice hair.” Critics said he was too young and inexperienced to become prime minister.

But Trudeau ran a tireless 78-day campaign based on change and optimism at a time when many frustrated voters wanted “anyone but Harper.” Trudeau, a former schoolteacher, ran on a centrist platform, to the left of the Conservatives but to the right of the NDP. He also benefited from many Canadians’ fond memories of his father, a public intellectual who was prime minister from 1968 to 1979 and from 1980 to 1984.

“The reason he got the job of leadership is the same reason Hillary [Clinton] and Jeb Bush can run — name recognition,” said Nelson Wiseman, director of the Canadian Studies Program at the University of Toronto. “He is personable. He is a family man. He has three kids. That is appealing. But he doesn’t have much gravitas. He is an intellectual lightweight compared with his father.”

Canadians wanted Harper out. He was accused of being stiff, autocratic and out of touch with Canadian values on environmental issues, race and immigration.

Harper, 56, who was seeking a fourth term, had made a controversial push to prohibit use of the niqab, a face veil worn by some Muslim women, at Canadian citizenship ceremonies. Many Canadians were also upset at Harper’s reluctance to accept refugees from Syria. The government said at the start of this year that it would accept 10,000 Syrian refugees over three years. But only a fraction of that number have been admitted.

Former prime minister Jean Chrétien wrote in a column published in the *Globe and Mail* and other Canadian newspapers that Harper’s stance on the refugee crisis created an international impression of Canada as a “cold-hearted” nation. “What has happened to the country that was a model for peace and stability in a tumultuous world?” Chrétien wrote that he is frequently asked.

Trudeau had called for the government to accept 25,000 refugees.

The Conservatives also were hurt by recent political scandals, including one involving a senator on trial over fraud suspicions.

“Two-thirds of Canadian voters said the Conservatives lost the moral authority to govern,” Wiseman said. “The election revolved around one issue: Do you want to keep the government of Harper or not.”

Harper had called in August for the election, thinking a longer campaign and a bigger Conservative Party budget would wear down the Liberals and the NDP. Very few predicted a Liberal victory. But days before the election, polls showed a Liberal surge. The party wound up capturing 184 seats, enough to form a majority government.

Trudeau becomes Canada’s second-youngest prime minister. The youngest was Joe Clark, of the Progressive Party, who took office in 1979, a day before his 40th birthday.

During his victory speech, delivered in French and English, Trudeau told a cheering crowd in Montreal: “Lots of people will have lots of opinions about why we were successful.”

Against the backdrop of a Canadian flag, Trudeau said his campaign had simply used an old-fashioned political strategy.

“We met with and talked with as many Canadians as we could,” he said. “We won this election because we listened. We met with hundreds of people in the dead of winter in the Arctic and people in the middle of Brampton. You built this platform; you built this movement. . . .

“You told us it is getting harder and harder to make ends meet and to get ahead. You told us you were concerned about your retirement. . . . I am not the one who made history tonight. You are.”

Not once during the nearly 30-minute speech did he mention his father by name. Under Pierre Trudeau, Canada officially became a bilingual country. The elder Trudeau had pushed for multiculturalism, a constitutional bill of rights known as the

Charter of Rights and Freedoms, and the end of provisions that gave the British Parliament a say in Canada's laws and constitution.

Justin Trudeau's only reference to having grown up as the son of the legendary prime minister came when he thanked his own three little children, who he said were fast asleep by the time of the victory speech, after midnight Monday.

"There will be difficult moments as children of a prime minister," he said, "but Dad will be there for you."

Justin Trudeau, born in Ottawa on Dec. 25, 1971, grew up in the public eye, traveling the world with his father. He was the eldest of three sons born to Pierre Trudeau and the former Margaret Sinclair, who was three decades younger than her husband.

When Justin was 6, his parents divorced. Pierre Trudeau became a single father.

The elder Trudeau had charisma as prime minister, bringing what many voters believed to be glamour and excitement to Canadian politics. He dated celebrities, including Barbra Streisand; was photographed sliding down banisters; and pirouetted when Queen Elizabeth II's back was turned.

"Pierre Trudeau was a bit of an iconoclast, which endeared him to many people, but also got him into a lot of trouble," said Elise Chenier, a history professor at Simon Fraser University in British Columbia.

Justin Trudeau's critics said he could never compare to his father.

"Almost everybody looks like an intellectual lightweight compared to Pierre Trudeau," Chenier said.

Justin Trudeau graduated with a bachelor of arts in literature from McGill University in 1994, and later earned a degree in education at the University of British Columbia. He taught school from 1999 to 2002, giving classes in drama, French, English and social studies. He also worked as a nightclub bouncer and a snowboarding instructor.

Some say he was not interested in politics in his younger years.

But in 1998, his brother Michel died in an avalanche. And in 2000, his father died from prostate cancer.

Justin Trudeau's televised eulogy at his father's funeral propelled him before the public, and some Canadians began quietly speculating that perhaps one day he, too, would be a political leader.

During the eulogy, the younger Trudeau recalled a visit to his father's office in Parliament. Justin was 8. He and Trudeau went to the cafeteria where Justin recognized one of his father's political rivals. The boy made a joke about the man.

"My father looked at me sternly . . . and said, 'You never attack the person. You may be in total disagreement with the person, however, you shouldn't denigrate him.' He took me by the hand and led me to meet this man," Justin Trudeau recalled. "He was a very nice man. . . . It was at that moment I understood that having different opinions from those of another person should in no way stop you from holding them in the greatest respect possible as people."

Justin Trudeau told the crowd that his father taught his three sons to believe in themselves, to stand up for themselves and to have passion for life.

"We knew we were the luckiest kids in the world. And we had done nothing to actually deserve it. It was instead something we would have to spend the rest of our lives to work hard to live up to."

In 2008, Justin Trudeau defeated a Bloc Quebecois incumbent to win in the "riding," or electoral district, of Papineau, one of the poorest in Canada. In April 2013, he was elected leader of Canada's Liberal Party.

Days later, Harper released an attack ad saying that Trudeau was "way over his head."

On Monday night, Trudeau told the crowd that the Liberals had overcome those attacks by offering a positive vision.

"Most of all we defeated the idea that Canadians should be satisfied with less, that good enough is good enough, and that better just isn't possible. Well, my friends, this is Canada, and in Canada better is always possible."

Canada's New Governing Party Promises To Legalize, Regulate Marijuana Sales

By Trevor Hughes

[USA Today](#), October 21, 2015

DENVER — Canada's leap to the left in Monday's elections could have the country singing a new anthem: "Oh, Cannabis."

The United States' largest trade partner overwhelmingly selected Justin Trudeau's Liberal Party to run Canada, a sweeping change that may lead to full marijuana legalization for our northern neighbor, which already allows medical pot use.

Trudeau promised that under his leadership Canada would create a system to tax, regulate and sell marijuana, along with stiff penalties for anyone giving pot to children or caught driving while stoned. The Liberal Party's cannabis legalization statement echoes the language used by many U.S. legalization advocates.

"Canada's current system of marijuana prohibition does not work. It does not prevent young people from using marijuana and too many Canadians end up with criminal records for possessing small amounts of the drug," the party's position statement says. "To ensure that we keep marijuana out of the hands of children, and the profits out of the hands of criminals, we will legalize, regulate, and restrict access to marijuana."

U.S.-based cannabis activists hailed Trudeau's election as a milestone, suggesting that a day may soon come when cross-border trade talks include not just the Keystone XL pipeline, maple syrup or prescription drugs, but also legal weed. Border states Alaska and Washington have already legalized recreational marijuana use, as have Colorado, Oregon and the District of Columbia.

"It's no longer a pipe dream to imagine a day when consumers and growers in Washington state and British Columbia, for example, could be ordering each other's wares on the Internet for cross-border shipment," said Tom Angell, chairman of the pro-legalization Marijuana Majority.

Trudeau earlier this month said he'd begin work to legalize marijuana in Canada "right away" if elected, but declined to specify a timeline for implementation. His campaign told CBC News that it was looking to Colorado as a potential model.

Colorado permits residents to buy and possess up to an ounce of marijuana at a time, and taxes each sale. Last month the state collected nearly \$12 million in marijuana taxes, with the money used to fund school construction and anti-abuse campaigns.

In 2003 and 2004, Canada's Liberal Party offered a proposal to decriminalize possession of small amounts of marijuana, but the plan died and a Conservative government took power in 2006. At the time, U.S. officials invoked the specter of prolonged border crossings if Canada changed its laws to permit broader marijuana use.

Since 2001, Canada has permitted medical marijuana use, as do 23 U.S. states and the District of Columbia.

Canada's potential move toward recreational legalization could add to a growing international discussion about drug possession and penalties, which has become a major cause for billionaire entrepreneur Richard Branson, who on Monday renewed his push for the United Nations to back decriminalization of drug use.

"Together with countless other tireless advocates, I've for years argued that we should treat drug use as a health issue, not as a crime," Branson wrote on his blog, responding to a draft U.N. proposal. "While the vast majority of recreational drug users never experience any problems, people who struggle with drug addiction deserve access to treatment, not a prison cell."

Liberal Win Gives Boost To Canada Marijuana Industry

[AFP](#), October 21, 2015

Ottawa (AFP) – Justin Trudeau's election win gave Canadian pot stocks a boost Tuesday with his promise to legalize recreational cannabis expected to help the nation's nascent medical marijuana industry.

Share prices for cannabis producers jumped an average of five to 10 percent in relatively high volume trading early in the day.

The companies already produce marijuana for medical use in Canada, and investors are betting they could quickly scale up to serve recreational pot users too, once Trudeau makes good on his promise.

Canopy Growth rose 11 percent to Can\$2.43, while Aphria Inc. rose 5.3 per cent to Can\$1 and Mettrum Health Corp. gained 6.0 percent to Can\$1.95.

"Trudeau's vow to legalize and regulate marijuana... has set in motion the single most important catalyst for the marijuana space," Dundee Capital Markets analyst Aaron Salz said in a Tuesday note to clients.

At least one company is also looking beyond Canada's borders hoping that G20 nations will adopt Canada's regulatory framework for pot, creating new markets for their wares.

Bruce Linton, who co-founded the firm Tweed, said he was betting on "significant growth" in the sector, as legitimate firms move into a space now dominated by black market growers and sellers, and offer buyers a large variety of pesticide-free strains.

Linton's company opened in a former chocolate factory an hour's drive from Ottawa last year under a new government scheme that banned home cultivation in favor of large commercial greenhouses.

It merged with Canopy and Bedrocan in the spring to form the largest commercial pot grower in Canada. The parent company changed its name to Canopy in September.

Tweed was one of only six firms initially licensed by Health Canada to grow and sell fresh medical marijuana and cannabis oil to eligible persons. The number of licenses issued has since grown to 26.

An estimated one million out of Canada's 35 million people regularly smoke marijuana, according to 2014 surveys.

Trudeau has admitted he smoked the drug at a dinner party with friends after being elected to parliament in 2008.

He said his late brother Michel was facing marijuana possession charges for a "tiny amount" of pot before his death in an avalanche in 1998. This influenced his decision to call for legalizing and regulating cannabis, Trudeau has said.

Justin Trudeau, Son Of A Canadian Leader, Follows His Own Path To Power

By Ian Austen

[New York Times](#), October 21, 2015

OTTAWA — When Justin Trudeau moves into the prime minister's official residence, it will be a homecoming. His parents lived there, in the gray stone house at 24 Sussex Drive in Ottawa, when he was born on Christmas Day in 1971.

In a country where political dynasties are rare, Mr. Trudeau will be the first Canadian to follow a parent into the country's highest political office, thanks to his Liberal Party's surprisingly sweeping victory in the election on Monday, ending nine years of Conservative government.

And there are many easy parallels to draw between him and his father, Pierre Elliott Trudeau, who led the country for 15 years beginning in 1968.

Start with the superficial: good looks, rugged athleticism, glamorous wife, rapturous fans. More substantially: unusual outspokenness, reputations as agents of change, a sharp upward trajectory in the Liberals' fortunes on each man's watch.

Without doubt, the good luck to be born with Pierre's surname was a big help.

But Justin Trudeau is no dynast who slipped effortlessly into a family political machine. He did not even enter politics until 18 years after his father gave it up, and seven years after his father's death. He built his own cadre of advisers, mostly from his own generation. And at key points in his career, he chose more difficult roads — partly, it appears, to show he had not been handed a life in politics on a platter.

"I do this not out of a sense of historical ambition or drive: 'My father did it, so I have to,' " Mr. Trudeau said during a lengthy interview in 2013, shortly before he became the Liberal Party leader. "No, I do this because I think I have something to offer. If it turns out that I don't, that's just fine, too. But I'm fairly confident that I have something to offer that this country needs more of right now, which is an antidote to the kind of cynicism which is dominating too much of politics around the world."

The novelty of a sitting prime minister with young children made Justin Trudeau and his two brothers celebrities from birth, but Pierre Trudeau and his wife, Margaret, who came from a prominent political family herself, tried to give the boys some semblances of normalcy. The children rode the regular bus to public school (albeit with an unmarked car full of bodyguards right behind), and they mixed in class with children from a poor area of Ottawa as well as their own affluent neighbors.

When he was 7 or 8, Mr. Trudeau recalled, he overheard his parents giving away the secret of Santa Claus, and the next morning, he told a group of his friends in the schoolyard.

"Most of the kids ran off crying," he said. "But one turned to me and said: 'I know. I've always known. My mom told me when I was old enough to understand, because she couldn't afford presents for me.' "

Mr. Trudeau said he had immediately thought of the "mountain of presents under the tree at 24 Sussex," many of them sent by ambassadors to Canada. "That was one of those moments when I realized, 'Man, I'm very, very lucky, and it has nothing to do with the quality of the person I am or what kind of material stuff we have,' " he said. "Because this kid, Mark, was one of my best friends."

The media spotlight that fell on his childhood also obsessively documented the breakdown of his parents' marriage, a product of Margaret Trudeau's struggles with mental illness. When his father quit public life, the family moved to Montreal, and the retired prime minister led the life of a single parent, though an affluent one.

Both father and son came to elective politics relatively late in life, but Pierre Trudeau had already been active on the public stage at several important moments in Quebec's history. Notably, he supported a 1949 strike by asbestos miners, a turning point in the "quiet revolution" against the province's entrenched elite of Catholic clerics and Anglophone businessmen.

Justin Trudeau studied French and English literature at McGill University in Montreal, but after that, as he acknowledged, his path was a slightly aimless one. He went with friends on a backpacking trip around the world. He thought about law school, then returned to McGill to study education, only to drop out and move to British Columbia, his mother's home province, where he taught snowboarding and worked as a nightclub bouncer — an unlikely job, perhaps, for someone with his slender build.

"I was the one they'd send in to defuse a situation and escort someone out, because I was diplomatic," Mr. Trudeau said. "I've never felt physically threatened by anyone. I don't have a fear gene, I guess — I don't know."

He returned to education and taught in both a public high school and a private prep school in Vancouver, an experience that he said confirmed his belief in the public system.

At the prep school, "there were parents who spent a lot of time intimidating the teachers, because they make so much more money than them, and the kids were catching on to that and not respecting the teachers," he said. "There's something, I think, unhealthy about that level of privilege."

Two tragedies returned him to the public gaze. His brother Michel was killed in an avalanche in 1998, prompting a public outpouring of sympathy for the family. Then, when his devastated father died two years later, Mr. Trudeau delivered a eulogy that was broadcast live.

Rather than a safe Liberal seat, Mr. Trudeau ran in 2007 for one in downtown Montreal that was known for favoring Quebec-separatist candidates. He won, and has widened his margin of victory in each election since then.

Mr. Trudeau showed a penchant for unscripted remarks that could be refreshing or embarrassing. When Prime Minister Stephen Harper announced that Canadian fighter jets would join the American-led campaign against the Islamic State militant group, Mr. Trudeau responded with a vulgar metaphor that many called juvenile. And he raised eyebrows in 2013 when he said, "There's a level of admiration I actually have for China: Their basic dictatorship is actually allowing them to turn their economy around on a dime."

Opponents have pounced on his miscues and tried to paint him as naïve and ill-prepared. But Bob Rae, the interim leader of the Liberals whom Mr. Trudeau succeeded, said the occasional verbal blunders did not reflect Mr. Trudeau's true nature. He "doesn't necessarily come to his conclusions immediately or grammatically," Mr. Rae said, but he is "a thoughtful, intelligent guy."

Mr. Rae said many people mistook Mr. Trudeau's consensual approach to politics for weakness or indiscipline. "You don't become the leader of a major party by just being a nice guy," he said.

Mr. Trudeau will become of a prime minister of many firsts, some of them trivial: the first who regularly boxes (at least one a week), the first to have acted in a television mini-series (playing a war hero in a World War I drama) and, as far as anyone knows, the first with tattoos (a globe from his 20s; a raven in a Haida Indian pattern added when he turned 40).

The circle of aides around him began as his friends. He met Gerald Butts, now his principal adviser, when they both studied at McGill. He grew up with Dominic LeBlanc, the son of one of Pierre Trudeau's cabinet ministers and now his closest ally in Parliament. Anna Gainey, the party president, is another old friend.

For all that his family connections have done for his political career, though, Mr. Trudeau said it had worked the other way, too.

"There have been people out there who love me because of my father; there are people out there who hate me because of my father," he said. "I've had to learn to not entirely disregard that, but understand that either side of those is not based in a reality that I can use as an anchor for who or what I am."

Why The Obamas Should Have A State Dinner For Canadian Prime Minister Justin Trudeau

By Emily Heil

[Washington Post](#), October 21, 2015

Is it too soon to start a campaign to urge the White House to host newly elected Canadian prime minister Justin Trudeau and his wife, Sophie Grégoire-Trudeau?

Not that we would, of course, but it seems that we neighbors to the south would like to get an up-close-and-personal look at Canada's young first couple. Make that reeal close. (Sample headline since Trudeau's election last night: Canada's hot new prime minister has the Internet sweating maple syrup.)

The Trudeaus have a lot in common with the Obamas, so it's not like the evening would be one of those stuffy, grit-your-teeth-till-it's-over affairs for POTUS and FLOTUS: At 54 and 51, they're not that much older than their Canadian counterparts: He's 43; she's 40. And they'd have lots to talk about, apart from liberal politics, like fitness! (Trudeau is an amateur boxer, and his wife is a yoga instructor, in addition to being a former TV journo).

The White House hasn't held a dinner for our friends just across the border since 1997. Compare that to France, which has had three since 1996, or the UK, which has had four since then. And previous presidents hosted Trudeau's dad, Pierre, who was his country's long-serving PM. President Jimmy Carter hosted him in 1977 and President Gerald Ford in 1974.

Picture it: Toronto-born Drake is the evening's entertainment. White House chef Cristeta Comerford whips up an artisanal version of poutine. There are subtle maple leaves in the centerpieces, and Ontario native Justin Bieber is chatting up SecState John Kerry about bilateral relations.

What's not to like, eh?

Cozying Up To Obama, Biden Says He Backed Bin Laden Raid :: WRAL.com

By Josh Lederman

[Associated Press](#), October 21, 2015

WASHINGTON — Still silent about his presidential ambitions, Vice President Joe Biden cast himself as President Barack Obama's kindred spirit Tuesday and backtracked on his previous claims to have advised Obama against the raid that killed Osama bin Laden.

Without mentioning Hillary Rodham Clinton by name, Biden sought to portray his own leadership as more critical to the Obama administration's successes than that of the Democratic front-runner and former secretary of state. At a forum honoring former Vice President Walter Mondale, Biden offered clear hints at how, if he runs for president, he would contest Clinton's claim to the president's legacy and appeal to Democratic voters whose loyalty to Obama remains firm.

"President Obama and I have ideologically had no disagreement," Biden said. "I mean none. Zero."

In an unusual reversal, Biden revised his claim to have warned Obama against the bin Laden raid in 2011 — a notion Obama himself corroborated in a 2012 presidential debate. As Obama campaigned for re-election, that factoid had the effect of making Obama appear more bullish and prescient than his advisers, but could be used as an argument against Biden's foreign policy bona fides if he challenges Clinton for the nomination.

Clinton has said she supported the raid from the start, using it as an example on the campaign trail to bolster her credibility as a valued and hardened adviser to Obama on matters of national security. But Biden implicitly contradicted Clinton's account, insisting that only the defense secretary and CIA chief were fully in favor of the raid.

According to Biden's account, Obama asked his advisers in the Situation Room whether to proceed with the risky raid on a compound in Abbottabad, Pakistan. Biden said he suggested holding off while the military flew another drone over the compound to gain certainty about bin Laden's whereabouts, but stopped short of saying "go" or "don't go" in front of other advisers to avoid undercutting Obama's ultimate decision.

Instead, Biden said, he waited until he and Obama had left the room and offered his opinion in private: "I told him my opinion. I thought he should go, but follow his own instincts," Biden said.

Adding another wrinkle to the historical account, Biden said he knew about the Abbottabad compound where bin Laden was hiding in August 2010 — long before the "major players" in Obama's Cabinet learned about it in January or February.

The vice president's new take on a years-old event put the White House in a difficult spot, the latest example of how a Biden candidacy would imbue the rest of Obama's presidency with heavy political overtones. White House spokesman Josh Earnest declined to say whether Biden's recollection was accurate.

"I'm going to leave the dissection and the oral history, if you will, of those days to those who were actually there," Earnest said.

The Democratic political world has been on edge for weeks awaiting a decision from Biden, who has blown past his own deadlines for deciding even as advisers insist he understands the importance of getting in or out soon. Rampant speculation took a chaotic turn Monday with a flood of assertions that Biden was running or would announce a run imminently.

With his 2016 deliberations extending deep into overtime, Biden offered no explicit clues about his decision. Yet he took a number of veiled shots at Clinton, who said in last week's Democratic debate that the enemy she was most proud to have made was "probably the Republicans."

"I don't think my chief enemy is the Republican Party," Biden said, adding that he still has many friends in the GOP.

In another observation that seemed directed at Clinton, Biden said he was the one Obama would dispatch to speak to key world leaders like Russian President Vladimir Putin or Turkish President Recep Tayyip Erdogan.

"We've had two great secretaries of state, but when I go, they know that I am speaking for the president," Biden said.

Joe Biden Draws Distinctions Between Himself And Hillary Clinton

By Margaret Talev

[Bloomberg Politics](#), October 20, 2015

If Vice President Joe Biden decides to challenge Hillary Clinton for the Democratic presidential nomination, the contours of his stump speech are in place.

At an event honoring former Vice President Walter Mondale on Tuesday, Biden portrayed himself as the central player in President Barack Obama's administration on everything from working with congressional Republicans to the killing of Osama bin Laden.

Biden sought to recast perceptions of his advice to Obama regarding the 2011 raid that killed bin Laden and suggested he was more intimately involved in decision-making than any other Cabinet official, including former secretary of state Clinton.

"I don't think my chief enemy is the Republican Party."

Vice President Joe Biden

His account on Tuesday differed somewhat from his previous public recollections of the deliberations. In an account given to Democratic lawmakers in 2012 Biden said that only then-CIA Director Leon Panetta was in favor of going forward with the raid. Biden told the lawmakers that he told Obama to seek more verification. "My suggestion is, don't go," he said at the time. "We have to do two more things to see if he's there."

On Tuesday, Biden said he made a case for a third option that was neither for nor against going forward and was meant to give Obama space to decide. He said he didn't want to undermine the president by staking out a position that might contradict Obama's final position. Biden said he suggested using a drone to make another attempt to verify the target. "I think we should make one more pass" to see if it really is bin Laden, Biden said on Tuesday that he told Obama.

"I didn't want to take a position to 'go' if that was not where he was going to go," he said. Biden said that minutes later when he and Obama were alone he told Obama that he would say to "go" but that ultimately Obama should "follow his own instincts."

"I never, on a difficult issue, never say what I think finally until I go up in the Oval with him alone," Biden said.

In describing his own stance, Biden also indirectly questioned Clinton's suggestion in a 2014 memoir that she had always favored the raid while Biden needed convincing. Biden said Tuesday that only two top Obama advisers took firm positions, with Panetta in favor of the raid and then-Defense Secretary Robert Gates advising against it.

White House press secretary Josh Earnest said he wasn't in the room when the decision was made and that he wouldn't comment on private conversations between Obama and Biden.

William Daley, who was White House chief of staff at the time and was at Tuesday's event, told the New York Times that Biden's account of the Situation Room discussion was correct.

For the second time this week, Biden also sought to portray himself as a pragmatist who's capable of working with Republicans, drawing a subtle contrast with party front-runner Clinton.

"I don't think my chief enemy is the Republican Party," Biden said during the moderated discussion, in which he and Mondale shared their experiences as vice president. By contrast, Clinton named "the Republicans" as one of her greatest enemies when asked at the Oct. 13 Democratic candidate debate.

Like Mondale, Biden spent years before becoming vice president as a member of the Senate, where the rules make it nearly impossible to move legislation without compromise. He has served as Obama's chief emissary to Congress, particularly in negotiations with the Republican leadership there.

During the moderated discussion with Mondale, Biden also said that "we've had two great secretaries of state," under President Obama, Clinton and John Kerry, but that when the vice president speaks with a foreign leader, they know that "I am speaking for the president."

Biden is expected to signal whether he intends to make a third try for the Democratic nomination by the end of the week, according to people close to him. He has stepped-up contacts with union officials and other prospective backers in recent days.

Clinton, Vermont Senator Bernie Sanders, and the other Democratic candidates are scheduled to speak at Saturday's Jefferson-Jackson dinner for the Iowa Democratic Party, which attracts thousands of Democratic activists in the first-caucus state. Biden's staff has neither signaled nor ruled out an appearance at the dinner in Des Moines.

Biden Revises Account Of His Advice On Bin Laden Raid

By Paul Singer

[USA Today](#), October 21, 2015

Vice President Biden has revised his account of his advice to President Obama on the raid that led to the death of Osama bin Laden in 2011.

While Biden reiterated that he suggested in front of Cabinet officials that Obama wait, on Tuesday Biden added another element to the story: Privately, he told Obama to move forward.

"As we walked out of the room and walked upstairs, I told him my opinion, that I thought he should go but follow his own instincts," Biden said during remarks at the "Walter Mondale: Living Legacy" forum.

The comment followed an account by Mondale of how he would only disagree with President Jimmy Carter in private during his tenure as vice president. Biden agreed and said that advice from Mondale came in "extremely handy" during the decision process leading to the May 2011 raid by U.S. Navy SEALs on bin Laden's compound.

Biden said he was part of a small group that knew as early as August 2010 that bin Laden may be hiding out in Abbottabad, Pakistan. When Obama asked Cabinet officials for their advice, only two were definitive. Then-CIA Director Leon Panetta said to go ahead with the raid, while then-Defense Secretary Bob Gates advised against it, Biden said.

"Others were 59-41," he said. "Some ended up saying 'go,' but it was such a close call."

Biden repeated his previous statement that he advised during that meeting against immediate action and added that he said, "I think we should make one more pass" with a drone to ensure bin Laden was there.

But this time, Biden said he actually didn't want to take a public position that ran afoul of the president's wishes.

"It would have been a mistake," Biden said. "Imagine if I had said in front of everyone, 'don't go, or go' and his decision was a different decision. It undercuts that relationship. I never on a difficult issue, never say what I think, finally, until I go up in the Oval with him alone."

White House press secretary Josh Earnest said he was not in the Situation Room at the time and couldn't shed any additional light on what advice Biden gave.

"There have already been books that have been written about this. I'm confident there will be more," Earnest said. "I will leave the dissection and the oral history of those days to those who were actually there."

After the forum, former White House chief of staff Bill Daley backed up Biden's account, telling reporters in the audience, "I was in the room and I saw him walk out with the president," according to a tweet from Paul Kane of The Washington Post.

"His explanation of that is absolutely on point," Daley said, according to another tweet from Kane.

In January 2012, Biden told Democratic members of Congress during a retreat that his advice was "don't go" and "We have to do two more things to see if he's there." He then ended the story there, citing the situation as an example of Obama's strength as a leader.

Later, Biden referenced his private conversation with Obama during a May 2012 interview on Meet the Press, saying "I knew he was going to go."

"He looked at me again, and I said 'Follow your instincts, Mr. President,'" Biden said.

Biden's account of the Cabinet meeting, in which Panetta was the only official to definitively green-light the raid, may conflict with the account by Democratic presidential candidate Hillary Clinton, who was then serving as secretary of State.

In her book *Hard Choices*, Clinton wrote that she respected Biden's and Gates' concerns about the risks of a raid. She said she laid out the risks for Obama, but she concluded the raid was worth it.

"I thought we should go for it," she wrote.

Biden, who is considering a presidential run, made other statements during the Tuesday forum that could be perceived as digs at Clinton, including his reference to his relationship with Republicans. During the first Democratic debate on Oct. 13, Clinton listed Republicans among the enemies she's most proud of making.

"Whenever there's a problem, I get sent to the Hill, which, by the way, is a useful use of my time because I really respect the members up there, and I still have a lot of Republican friends," said Biden, who represented Delaware in the Senate for 36 years before becoming vice president.

"I don't think my chief enemy is the Republican party," he said. "This is a matter of making things work."

Biden also said the administration has had two "great" secretaries of state.

"But when I go, they know I am speaking for the president," he said.

Biden Says He Didn't Oppose Raid That Killed Bin Laden

By Gardiner Harris And Jonathan Martin

[New York Times](#), October 21, 2015

WASHINGTON — If Vice President Joseph R. Biden Jr. decides to run for the presidency again, his best chance may well be to present himself as President Obama's third-term successor. On Tuesday, Mr. Biden took the first step, describing himself as Mr. Obama's most essential partner while taking subtle swipes at his would-be rival for the Democratic nomination, Hillary Rodham Clinton.

Along the way, Mr. Biden sought to recast his role in the raid to kill Osama bin Laden, arguably the most picked-over moment of Mr. Obama's presidency and one that might hurt Mr. Biden's presidential chances.

Mr. Biden had previously said that he had advised the president against launching the special forces raid on the Abbottabad compound where Bin Laden was suspected of hiding. At a Democratic congressional retreat in January 2012, Mr. Biden said that almost every other official in the Situation Room had hedged on a response when asked by the president whether he should order the raid.

"I said, 'We owe the man a direct answer. Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there,'" Mr. Biden said then.

It was a potential weakness that Mrs. Clinton has signaled she might exploit. At a debate last week in Las Vegas, Mrs. Clinton boasted she was one of the few advisers to support "the tough decision that President Obama had to make about Osama bin Laden."

But by January 2013, Mr. Biden had begun hedging on whether he had opposed the raid.

"I remember walking up to his office and saying: 'Look, follow your instincts. Follow your instincts,'" he said in a January 2013 interview.

When asked specifically whether he had advised against the raid, Mr. Biden said: "Let me put it this way: My advice was, follow your instincts, knowing what his instinct was."

On Tuesday, Mr. Biden's evolution continued. Before an audience at George Washington University, Mr. Biden said he never gave Mr. Obama definitive advice on controversial issues in front of other officials, mindful that he did not want the rest of the team to see a difference between his opinion and that of the president. With others around them, Mr. Biden said he suggested one more pass over the Abbottabad compound with an unmanned aerial vehicle, or drone.

After the meeting in the Situation Room, though, Mr. Biden said he privately gave the president his real view. "As we walked out of the room and went upstairs, I told him my opinion, that I said that I thought he should go but to follow his own instincts," Mr. Biden said Tuesday.

William M. Daley, who was Mr. Obama's chief of staff at the time and was present in the Situation Room when the Abbottabad raid was discussed, said shortly after Tuesday's forum that the meeting occurred as Mr. Biden described it.

The description of the meeting about the Abbottabad raid was one of several moments when Mr. Biden seemed to take swipes, at least indirectly, at Mrs. Clinton. He did not mention Mrs. Clinton as among those who had definitively supported the Abbottabad raid, although she and Mr. Daley said she had been. In a wide-ranging conversation with former Vice President Walter F. Mondale about his vice presidency, Mr. Biden mentioned that he had flown more than one million miles to speak to world leaders.

"We've had two great secretaries of state," he said, "but when I go, they know that I am speaking for the president. There is nothing missed between the lip and the cup. Whatever I say, the president is saying."

At another point in the discussion, Mr. Biden mentioned that he was the administration's primary interlocutor with Capitol Hill.

"And I still have a lot of Republican friends," Mr. Biden said, adding for the second time in two days, "I don't think my chief enemy there is the Republican Party. This is a matter of making things work." Later, at another event honoring the 87-year-old Mr. Mondale on Tuesday night, Mr. Biden went even further, calling it "naïve" to think that the country can be governed without bipartisan cooperation.

In last week's Democratic debate, Mrs. Clinton was asked which enemies she is most proud of making.

"Well, in addition to the N.R.A., the health insurance companies, the drug companies, the Iranians," she responded to laughter, "probably the Republicans."

Mr. Biden's subtle digs could presage the kind of negative primary campaign that has so far largely been confined to the Republican side. Even if he does not enter the race, the vice president's comments suggested that he is unhappy with Mrs. Clinton and unlikely to get behind his former Senate and administration colleague any time soon. Either possibility — testy rival or sideline critic — is not pretty for Democrats and particularly Obama loyalists.

Political analysts have pointed out that Mr. Biden's best and perhaps only chance to secure his party's nomination would be to persuade center-left Democrats, particularly blacks and Hispanics, that he and not Mrs. Clinton is Mr. Obama's true heir. Mr. Obama remains wildly popular among those groups. A Washington Post/ABC News poll this week put the president's approval rating at 78 percent among nonwhite voters.

Mr. Biden was not the only one seeming to eye Mr. Obama's voters on Tuesday. A few hours before the event here, Mrs. Clinton's campaign released a list of more than 50 black mayors supporting her campaign, more than half of them from South Carolina, an early nominating state where Mr. Biden is expected to compete aggressively should he run.

So far, Mr. Obama has done nothing to signal that he would bestow such a blessing on either his vice president or his former secretary of state. But Mr. Biden did his best to suggest that he and the president are all but joined at the hip.

He said the two of them spent four to seven hours every day together, that the president had given him veto authority over every cabinet pick, that he never disagreed with the president ideologically, only tactically, and that even their families were close.

Josh Earnest, the White House press secretary, said that while four to seven hours together "is not a daily occurrence" the claim was "generally accurate."

Biden's Evolving Position On The Osama Bin Laden Raid

By Greg Jaffe

[Washington Post](#), October 21, 2015

Vice President Biden seemed to change his account on Tuesday of the role he played in the White House debate surrounding the 2011 raid that killed Osama bin Laden. This time he recalled telling President Obama that he strongly supported sending in a team of Navy SEALs into Pakistan to kill or capture the al-Qaeda leader.

"As we walked out of the room, walked upstairs, I told him my opinion: I thought he should go, but follow his own instincts," Biden said Tuesday at a George Washington University forum.

With Biden mulling a run for the presidency, his latest account seems designed to buttress his qualifications to serve as commander-in-chief. But the vice president, who has a reputation as a voice of caution when it comes to committing American forces, seems to have contradicted his earlier memories of the final meeting before the bin Laden raid.

Biden's revised account puts him in the same camp as Hillary Rodham Clinton, Obama's former secretary of state and Biden's chief rival if he runs, who has long said that she supported sending in special operations forces to raid bin Laden's Abbottabad compound in Pakistan.

White House press secretary Josh Earnest declined to answer questions about whether Biden had changed his story. "I'm going to leave the dissection and the oral history, if you will, of those days to those who were actually there," Earnest said.

Former White House chief of staff Bill Daley backed up a key element of Biden's account. "I think the way he articulated it was absolutely the truth. I was in the room and I saw him walk out with the president," said Daley, who wasn't part of their private, post-meeting conversation.

In 2012 remarks at a Democratic congressional retreat, Biden suggested that he had been against launching the raid until there was better intelligence about bin Laden's whereabouts. "Every single person in that room hedged their bet except Leon Panetta," Biden said, according to 2012 ABC News report. "He got to me. He said, 'Joe, what do you think?' And I said, 'You know, I didn't know we had so many economists around the table.' I said, 'We owe the man a direct answer. Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there.'"

Biden gave a slightly fuzzier accounting to NBC News's "Meet the Press" a few months later. The vice president recalled Obama taking a "roll call" of his top national security advisers: "The only guy who had a full-throated 'go, Mr. President,' was Leon Panetta," Biden told NBC. He said held back his advice until he and the president were alone and then counseled: "Follow your instincts, Mr. President. Your instincts have been close to unerring; follow your instincts."

Biden's memory is directly at odds with at least one other account of the lead up to the historic raid. Then-Defense Secretary Robert M. Gates recalled the same meeting in his book, "Duty," and described Biden as being staunchly opposed to launching the commandos. "Biden was against the operation," Gates writes. "[Gen. James] Cartwright and I supported the drone option. Panetta was in favor of the raid. Everyone else acknowledged it was a close call but also supported the raid."

A few pages prior, Gates said that he and Biden were the "two primary skeptics" of the raid.

In the past Obama has suggested that Biden opposed the raid. During his third presidential debate, Obama referred to Romney's previously voiced skepticism about the raid. "Those decisions generally—generally are not poll-tested," Obama said. "And even some in my own party, including my current vice president, had the same critique as you did."

Joe Biden Draws Contrasts With Hillary Clinton, Touts His Experience

Vice president details central role he has played in the Obama administration

Joe Biden Offers A New Account Of His Role In The Bin Laden Raid

By Michael A. Memoli, Contact Reporter

[Los Angeles Times](#), October 21, 2015

Joe Biden used a Washington forum on the vice presidency Tuesday to highlight his close relationship with President Obama that would be at the heart of Biden's potential presidential campaign, even offering a fresh account of his counsel to Obama about targeting Osama bin Laden.

Through that anecdote and other remarks, Biden drew an implicit contrast with would-be rivals, primarily Hillary Rodham Clinton, in underscoring his singular closeness to Obama. But Biden's comments, while easily interpreted as politically infused given the ongoing speculation over whether he'll run, were in keeping with the spirit of the event – a tribute to how Walter Mondale, Jimmy Carter's vice president, modernized the office.

Still, by pointing to his own record, Biden seemed be countering assertions made by the declared candidates during the first Democratic debate a week ago.

Clinton had said during the debate that, as secretary of State, she was frequently in Situation Room meetings with Obama, "going over some very difficult issues." Among them was the decision to launch a special forces raid on a compound in Pakistan where Bin Laden was believed to be.

Clinton said last week that she was among Obama's "few advisors" advocating that he go through with the raid. Biden has previously said he urged the president to wait for more intelligence that might confirm Bin Laden's presence.

But on Tuesday, Biden offered a new account. The only Cabinet members who advised the president one way or another with absolute certainty were then-CIA Director Leon E. Panetta, who was in favor of a raid, and then-Defense Secretary Robert M. Gates, who was against one, Biden said.

"Leon Panetta said, 'Go.' And Bob Gates, who has already publicly said this, said, 'Don't go.'" Others were torn, Biden said.

In the Situation Room, with others present, Biden said he advocated the president take "one more pass," sending a drone to see whether Bin Laden was at the compound. But in private, he said, he offered Obama different counsel.

"As we walked out of the room and walked upstairs, I said – I told him my opinion, that I thought he should go, but follow his own instincts," Biden said. "I never, on a difficult issue, never say what I think finally until I go up in the Oval with him alone."

That account differed from what has previously been reported and, to an extent, from what Biden himself has said. But William Daley, Obama's chief of staff at the time of the raid, confirmed Biden's account.

"That's exactly what happened," Daley said in a brief interview at Tuesday's event. "I've not heard him articulate it in that complete form. But he was absolutely accurate."

The Bin Laden raid was not the only example Biden offered of his unmatched relationship with Obama. "Depending on the season," Biden noted, the two spend four to seven hours a day together. And when they were first elected, Obama offered Biden veto power over the choice of Cabinet members and agreed to Biden's condition that Biden be "the last person in the room" for every major decision.

They argued at times, to be sure, but in the way that friends do, he said, and ultimately always agreed on a final decision.

The vice president said that although Obama has had "two great secretaries of State," when Biden traveled abroad to meet with foreign leaders, "they know that I am speaking for the president."

For the second straight day, Biden also seemed to draw another contrast with Clinton, who in the debate listed Republicans as among the enemies she was proudest to have.

"I still have a lot of Republican friends," Biden said Tuesday as he discussed how often he'd been sent to Capitol Hill on administration priorities. "I don't think my chief enemy is the Republican Party. This is a matter of making things work."

Biden noted he had initially refused Obama's offer to join the ticket but was ultimately persuaded to sign on by his family.

"The best decision of my political career was to join the president," he said.

For now.

Biden Sets Himself Apart From Clinton In Speech

By Cameron Joseph

[New York Daily News](#), October 20, 2015

WASHINGTON — Joe Biden isn't yet in the White House race — but that isn't stopping him from drawing some implicit contrasts with Hillary Clinton, and contradicting her version of the raid that killed Osama Bin Laden.

Biden used his time on a panel with former Vice President Walter to rebuke Clinton's version of the Bin Laden raid, disputing claims he opposed it and suggesting she wasn't as adamantly in favor as she claims.

The vice president, who's expected to make a final decision on running for the White House in the coming days, never mentioned Clinton by name. But time and again he suggested how he'd contrast himself with the Democratic front-runner if he does run for President.

He said he knew about Bin Laden's compound months before most of the cabinet, and claimed Clinton wasn't 100% firm on going after the terrorist leader. That contradicts Clinton's version — and changes his own version of the story by adding that he'd intentionally avoided taking a stand while meeting with the cabinet before privately backing it so as to not create a possible split with Obama.

Biden said Defense Secretary Leon Panetta was the only person in the room who was unequivocal in supporting the raid, and claimed that he personally supported a "third option" of more surveillance in the meeting before privately telling Obama he thought he should go through with the raid.

"I didn't want to take a position to go if that was not where he was going to go. So as we walked out of the room and walked upstairs I said, I told him my opinion that I thought he should go, but to follow his own instincts," Biden said.

Biden's new details make him out to be a supporter of the high-stakes raid that killed Bin Laden — a big shift from the common narrative that he resisted it, one Clinton's allies have hinted could be a main attack line if Biden does jump into the race. Clinton regularly mentions her support of the raid on the campaign trail.

"I said, 'We owe the man a direct answer. Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there,'" Biden told House Democrats in January 2012.

Bill Daley, Obama's chief of staff at the time of the Bin Laden raid who was in the meeting, told the Daily News after the panel that Biden's new version of events was "totally accurate."

"Some have spun that he was against it. The way that he articulated it was the absolute truth," he said. "Walking up the stairs, he absolutely did that, he walked out with the president that day."

Biden took some other veiled shots at Clinton throughout the event, repeatedly emphasizing his close relationship with President Obama and arguing he's the man who can reach across the aisle to end D.C.'s partisan gridlock.

"I still have a lot of Republican friends," he said for the second time in as many days, alluding to Clinton's comments during last week's debate that Republicans were one of the enemies she's most proud of. "I don't think my chief enemy is the Republican Party. This is a matter of making things work."

He said he agreed to join Obama's presidential ticket because "I was simpatico with the president-elect" and because "we had a genuine relationship," before claiming Obama gave him a veto over any potential cabinet members, implying he had to approve Clinton as secretary of state. As He Ponders Run, Biden Touts Accomplishments At Forum

By Annie Linskey

[Boston Globe](#), October 20, 2015

WASHINGTON – Vice President Joe Biden stressed his close ties to President Obama, touted his bipartisan relationships on Capitol Hill, and bragged about his foreign policy chops during a forum at George Washington University Tuesday morning.

It sounded an awful lot like the outline of a stump speech.

Biden's deliberations about whether to jump into the 2016 presidential race have put Washington on edge. The clearest sign of that angst came on Monday night when The Washington Post accidentally published a story online declaring that Biden had entered the race. The piece was quickly taken down.

On Tuesday morning, Biden sat on stage with former Vice President Walter Mondale for a moderated conversation about the vice presidency.

Biden reminded the audience of his tendency to speak his mind — a trait that's hurt him in the past but is prized in the current electoral environment where authenticity is being rewarded over polish.

Clinton takes lead over Sanders in poll

Hillary Clinton regained much of the ground she lost during a summer of controversy, a new Washington Post-ABC News poll found.

E-mail rekindles speculation on Biden run

"No one doubts I mean what I say," Biden said. "Sometimes I say all that I mean."

Perhaps the most telling segment of the talk occurred when Biden revealed more about the back story of the 2011 decision to send special forces into Pakistan to kill Osama bin Laden, a risky move that is one of Obama's most significant foreign policy wins.

Biden has been on record recommending against the move, while Democratic front runner Hillary Clinton has said she supported sending in forces.

Biden, on Tuesday, said he was aware of Bin Laden's suspected hideout for a year prior to the raid and explained that he didn't want to unduly pressure the president by stating his views on the raid in front of other cabinet secretaries.

He said his private counsel to Obama was that the U.S. conduct one additional intelligence pass before giving the "go" order.

The vice president also cast doubt on Clinton's account that she fully supported the raid, saying that only two members of the cabinet offered Obama clear cut advice: Former Central Intelligence Director Leon Panetta, who recommended "yes;" and U.S. Defense Secretary Robert Gates, who was a "no" (he preferred bombing the compound).

The rest of the top officials — a group that included Clinton — all hedged, Biden said.

Biden also stressed some of his domestic policy wins. He talked about his role implementing the economic stimulus program, one of the early projects that Obama gave him.

"To this day, we are simpatico on all the major issues," Biden said of his relationship with Obama.

Biden drew another contrast with Clinton, saying "I don't think my chief enemy is the Republican Party."

During the Democratic debate last week, Clinton named "Republicans" as one group that she views as her enemy.

The one area that might raise a concern among some Democratic primary voters was his defense of former Vice President Dick Cheney, who is reviled by the party base.

"I actually like Dick Cheney for real," Biden said, adding that he was "very gracious" during the transition.

Biden Says He Backed Bin Laden Raid All Along

By Jake Sherman

[Politico](#), October 20, 2015

Vice President Joe Biden on Tuesday contradicted Hillary Clinton's and his own previous accounts of the debate over the raid that killed Osama bin Laden — but he and the White House chief of staff at the time say this one is the accurate one.

Biden's revised account puts him further out in favor of going into Abbottabad than any member of President Barack Obama's cabinet at the time other than Leon Panetta, then the director of the Central Intelligence Agency.

That would include Clinton, Biden's potential opponent in the Democratic primary, should he decide to run.

It also seems to conflict with what Obama himself said about the decision, during his third 2012 debate with Mitt Romney, while reflecting on the Republican nominee's suggestion that he should have sought permission for the raid from the Pakistani government.

"Even some in my own party, including my current vice president, had the same critique as you did," Obama said then.

Tuesday, White House press secretary Josh Earnest deflected questions about Biden's new account of the debate, saying that comments about what happened should be left to the people who were in the room, which he was not.

"The decision that mattered was the decision that was made by the president of the United States," Earnest said.

On Tuesday morning, speaking at a forum at George Washington University, Biden said that he remembered being in favor of the raid all along, but worried about saying so in front of the other people in the room if Obama ultimately decided against it, to avoid causing a problem for the president on such a major decision.

"It would have been a mistake. Imagine if I had said in front of everybody, 'Don't go,' or 'Go,' and his decision was a different decision," Biden said. "It undercuts that relationship. I never — on a difficult issue, never say what I think finally until I go up in the Oval [Office] with him alone."

Biden said that when he and Obama spoke privately after that meeting, he pressed the case to send in the Navy SEALs.

"As we walked out of the room, walked upstairs, I told him my opinion: I thought he should go, but follow his own instincts," Biden said.

Clinton, then the secretary of state, has discussed her position in the debate over the raid, saying that she was always for it, unlike others — Biden included — who had reservations. Biden has often been frustrated with that portrayal, even though Biden's previous statements appear to contradict his new account.

At a retreat for House Democrats in January 2012, Biden reportedly said he had told Obama not to do the raid during a meeting in the White House Situation Room.

"Every single person in that room hedged their bet except Leon Panetta," the New York Times reported Biden saying. "Leon said go. Everyone else said, 49, 51."

Asked by Obama what he thought, Biden relayed at the time, "We owe the man a direct answer. Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there."

In May 2012, Biden spoke about it differently in an appearance on "Meet the Press."

"I walked out of that meeting, as I usually do — I get to be the last guy to be with the president — we walked up toward the residence, toward his office," Biden said. "And I knew he was going to go. And what I always tell him when he — he looked at me again, and I said, follow your instincts, Mr. President. Your instincts have been close to unerring; follow your instincts."

Speaking on Tuesday morning at the forum co-hosted by the University of Minnesota celebrating the legacy of former Vice President Walter Mondale, Biden again recalled the moment as he discussed his central and unmatched role within the Obama White House.

To start, Biden said, he knew about the Abbottabad compound as early as August 2010, though "major players in the Cabinet didn't know about it until January or February."

The raid was on May 2, 2011.

Describing the scene in what he says was the Cabinet Room in the White House, Biden said there were only two people with firm opinions about what to do: Panetta and Gates, who has already said publicly that he was a no.

"Others," Biden said, were "49, 51."

Some ultimately said go, Biden said, but it was such a close call, he recalled saying to the Cabinet members that they "sounded like 17 Larry Summers" — economists saying, "on the one hand, on the other hand."

Biden's account Tuesday touched on an explanation for what he said at the meeting, which was seen as being against the raid.

"There was a third option that I didn't really think we should do. I said, 'Well, I think that we should make one more pass with another UAV to see if it is him,'" Biden said, referring to drone aircraft. "The reason I did that is I didn't want to take a position to go if that was not where he was going to go."

The vice president's office declined further comment, but Bill Daley, the White House chief of staff at the time, backed up Biden's new account in an interview after the vice president's remarks — though he acknowledged he was not privy to Biden's conversation with the president.

"The motivation's kind of fudgy, as is obvious — the Situation Room's not as private as you'd think it should be," Daley said, agreeing that this moment reflected Biden's practice of not disagreeing with Obama in front of others. "In the decision, that was pretty much his sort of fudging, and then he went out with the president as he said and walked up the stairs with him."

"That was about the most complete and accurate explanation I've heard from the vice president, which is reflected in what I remember," Daley said, adding that it's the previous version Biden has given that doesn't match his memory. "I don't remember him being that emphatic saying, 'Don't go, don't do this.'"

Panetta, in his book "Worthy Fights," gave a different account of both Clinton and Biden.

"Clinton acknowledged that more time might give us better intelligence, a sentiment others advanced as well, but she concluded that this was a rare opportunity and believed we should seize it," Panetta wrote. "Biden argued that we still did not have enough confidence that bin Laden was in the compound, and he came out firmly in favor of waiting for more information."

Mike Morell, then the deputy director of the CIA under Panetta, also recounted Biden's role in his own book, "The Great War of Our Time."

"The vice president was unconvinced about the intelligence and concerned about what a failed mission would do to our relations with Pakistan," Morell wrote.

Some other reported accounts say that Biden was concerned that if the raid had gone wrong, it might have cost Obama re-election.

Gates, whose book "Duty," is critical of Biden throughout to a degree that the vice president and other senior officials felt was unfair, wrote that "Biden's primary concern was the political consequences of failure."

Biden Contradicts Clinton's Account Of Bin Laden Raid Decision

By Jordan Fabian

[The Hill](#), October 20, 2015

Vice President Biden on Tuesday offered a different account of his advice to President Obama on the Osama bin Laden raid, an issue that could haunt him if he decides to challenge Hillary Clinton for the Democratic presidential nomination.

Biden said that only two advisers — then-CIA Director Leon Panetta and Defense Secretary Robert Gates — gave definitive answers on whether Obama should carry out the raid, contradicting Clinton's claim she fully backed the mission.

"Panetta said go, Bob Gates said don't go," Biden said during a panel discussion with former Vice President Walter Mondale at George Washington University.

The vice president disputed claims he opposed the mission. He said he privately supported the raid, but while in a room with other advisers, recommended that Obama wait to verify whether bin Laden was actually in the Abbottabad, Pakistan, compound before launching the strike.

Biden said he only advised Obama to go when the two were alone to avoid boxing the president in on a decision.

"I told him my opinion that I thought he should go but to follow his own instincts," Biden said. "I never, on a difficult issue, never say what I think finally until I go up in the Oval [Office] with him alone."

Biden's account, however, differs from the one he gave in 2012. At that time, he told House Democrats he warned against the operation, one of the most consequential decisions of Obama's presidency.

"Mr. President, my suggestion is, don't go," Biden told lawmakers, according to The New York Times. "We have to do two more things to see if he's there."

And the new account is different from Clinton's claim that she advised Obama to carry out the raid. During last week's Democratic debate, Clinton said she was "one of his few advisers" on the discussions surrounding the mission.

"He valued my judgment, and I spent a lot of time with him in the Situation Room, going over some very difficult issues," Clinton said of the president.

White House press secretary Josh Earnest on Tuesday dodged multiple questions about Biden's latest account of the raid, saying he would not comment on private conversations between the president and the vice president.

"I am going to leave the dissection and the oral history of those days to those who were actually there," Earnest said. "I don't have any new insight to share with you about the president's recollection of those events."

Earnest, who said he was following Biden's remarks on Twitter, said he was "not particularly" surprised by the vice president's new account but declined to elaborate further.

Biden used the hour-long appearance on Tuesday to draw sharp distinctions with Clinton while touting his close relationship with Obama.

He argued he would be best suited to work across the aisle with Republicans and carry on the legacy of Obama, who remains extremely popular with Democratic voters.

The vice president, who is expected to announce a 2016 decision in the coming days, did not mention Clinton by name, but he took a subtle jab at the former secretary of State, who said during the debate she sees Republicans as her "enemy."

"I still have a lot of Republican friends," Biden said. "I don't think my chief enemy is the Republican Party. This is a matter of making things work."

Biden said he's fond of former Vice President Dick Cheney, a deeply unpopular figure with Democrats, even though he disagrees with how he used his office.

"I actually like Dick Cheney, for real," Biden said. "I get on with him. I think he's a decent man."

Biden said he agreed to become Obama's vice president because of their close personal relationship and their nearly identical views on policy.

"It started off that I knew I was simpatico with the president-elect," Biden said. "We had a genuine relationship."

Biden said Obama granted him the ability to sign off on all Cabinet picks, implying that he agreed to allow Clinton to become secretary of State.

And he suggested he had the upper hand on Clinton and her successor, John Kerry, when speaking with foreign leaders.

"We've had two great secretaries of State, but when I go, they know that I am speaking for the president," Biden said.

— This story was updated at 1:38 p.m.

Biden's Boasts Wreck Earnest's Day

It's not the first time the president's spokesman has had to field awkward questions about top aides with political ambitions.

By Sarah Wheaton

[Politico](#), October 20, 2015

For a politician who projects authenticity, Vice President Joe Biden seemed to stumble around the truth on Tuesday.

It wasn't just that he contradicted his initial accounts of the U.S. raid that killed Osama bin Laden, claiming for the first time that he did, indeed, recommend that President Barack Obama go forward with the operation. It was also that he claimed to have veto power over nominations and to speak for the president with more authority than other top officials do.

Since Biden hasn't decided whether to run for president, but is facing campaign-level scrutiny, it was up to Obama's press secretary, Josh Earnest, to handle fact-checking questions about some of Biden's other claims.

"I am not aware of the kinds of conversations that then-Sen. Obama had with then-Sen. Biden about him coming on board as the running mate. I don't have any information about that," Earnest said.

Does Biden, as he also claimed at an event to honor Walter Mondale on Tuesday, really have veto power over Obama's Cabinet nominations?

"You'll have to take it up with one of the two of them if they're willing to talk about it publicly."

There was also Biden's boast about speaking for the president on foreign trips.

"We've had two great secretaries of state, but when I go, they know that I am speaking for the president," Biden said.

It's true that Biden is often called on to speak to foreign leaders in the president's stead, both at home and abroad. But reporters pressed Earnest on whether Biden's voice was somehow more powerful than other top Cabinet officials.

"They're receiving him because the president has asked him to go," Earnest said. "I think the same thing could be said about the secretary of state or any other senior U.S. official that represents the U.S. government." Earnest did note that the significance of a vice presidential visit was Biden's "close, personal relationship" with Obama.

Earnest has had to field such questions before, and he's made clear he doesn't enjoy it. For instance, when Hillary Clinton was slow to formally start her campaign, Earnest was stuck defending her private email server from the podium.

While Biden has his own press operation, his staff are reluctant to speak on the record, and they also are not in a position to verify the details of a private conversation with the president.

CBS correspondent Major Garrett captured the challenge for both the press corps and the press secretary when it comes to Biden's claims.

"There's no other person that we can ask directly, other than the president and you, about what he did and didn't do," Garrett said.

Earnest noted that Obama has heaped praise on the vice president's contributions. But if Biden runs, both he and Clinton will be "responsible for making their own case."

Earnest added, "If there is an instance in which the president's interests are at stake, then it's my responsibility to make sure that his interests are properly and well represented."

Earnest also said it's a "luxury for me, not a burden" to be reviewing the record of someone who wants to continue the mission of the current administration. It was unclear whether he was making that case to the press corps, or to himself.

Biden Contradicts Earlier Account Of Bin Laden Raid

[TIME](#), October 20, 2015

Vice President Joe Biden offered a contradictory account of his long-running assertion that he opposed the raid that ultimately killed Osama bin Laden in 2011, saying Tuesday, as he is weighing a run for the Oval Office, that he encouraged President Obama to launch the operation at the time.

Speaking at the Walter Mondale: Living Legacy forum in Washington, Biden said he withheld his view on the dangerous operation in Pakistan until he saw Obama one-on-one, so as not to jeopardize the perception of their relationship.

"We walked out of the room and walked up stairs," Biden said. "I told him my opinion: I thought he should go, but to follow his own instincts."

Biden maintained that only two Cabinet officers weighed in firmly on the strike, Defense Secretary Robert Gates in opposition and CIA Director Leon Panetta in favor. "We sat in the Cabinet room, and at the end of the day, making the decision, he said I want everyone's opinion. And everyone went around the room, and there were only two people who were definitive, and were absolutely certain: Panetta said go, Bob Gates said don't go," he said.

But the narrative runs in the face of the one Biden himself offered in 2012, as well as that offered by Democratic front-runner Hillary Clinton, who was the Secretary of State at the time and has said she was supportive of the operation.

In a meeting with House Democrats in 2012, Biden recounted "Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there," the New York Times reported, in an account later verified by the White House.

By Obama's own account, Biden was skeptical of the raid. "Those decisions generally—generally are not poll-tested," Obama told CBS's Bob Schieffer in the third presidential debate in 2012. "And even some in my own party, including my current vice president, had the same critique as you did."

In her book, *Hard Choices*, Clinton wrote that she supported the operation at the time. "I came to the conclusion that the intelligence was convincing and the risks were outweighed by the benefits of success," she wrote. "We just had to make sure it worked." Earlier this year, Clinton told the South Carolina Democratic Party chair, "I was one who recommended to the president that he go ahead. And his advisers were split."

Read More: [Joe Biden's Weird Relationship with His Boss](#)

The divide over the bin Laden raid is one of the key foreign policy differences between Biden and Clinton, and Biden's attempt to rewrite the established narrative sent Washington speculation into his possible run into overdrive. As a candidate for president in 2008, Clinton was deeply critical of Obama's then-hypothetical support for launching a strike in Pakistan to kill or capture the man responsible for the 9/11 attack.

"Last summer, he basically threatened to bomb Pakistan, which I don't think was a particularly wise position to take," she said in a February 2008 debate.

White House Press Secretary Josh Earnest declined to clarify the discrepancy Tuesday. "The people in the room at the times are the ones that should be consulted," he said.

"Historians will probably tell you this is not the first time a significant political event has prompted different recollections to different people," he added.

Biden Contradicts Clinton, Himself On Bin Laden Raid Decision

By Chuck Ross

[Daily Caller](#), October 20, 2015

Vice President Joe Biden appeared to contradict Hillary Clinton's claim that she adamantly backed the decision to carry out the May 2, 2011 raid on Osama bin Laden's compound in Pakistan.

But Biden, who many believe is set to challenge Clinton for the Democratic presidential nomination, also appeared to contradict his own past admission that he opposed the mission.

Speaking at a panel discussion with former Vice President Walter Mondale at George Washington University on Tuesday, Biden detailed the discussion among Obama's cabinet and other top officials over whether to dispatch SEAL Team 6 to carry out the raid, in which bin Laden was killed.

Biden said that only two advisers — then-CIA director Leon Panetta and then-Sec. of Defense Robert Gates — had “definitive” positions.

“Panetta said go, Bob Gates...said don't go,” Biden said.

“Others were 59-41 [sic], some ended up saying ‘go,’ but it was such a close call,” he added.

That claim of nuanced deliberation contrasts with Clinton's assertions that she was unwavering in her support for the mission.

“I was one who recommended to the president that he go ahead,” Clinton said during an interview in July.

The former secretary of state has touted her support of the mission as evidence that she is capable of making tough decisions during trying times.

But Biden also contradicted himself on Tuesday.

“Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there,” Biden said during the fateful meeting, he told a group of Democrats in Jan. 2012.

But during Tuesday's event, Biden portrayed a more nuanced decision-making process.

“I think we should make one more pass with another UAV to see if it is him,” he says he told Obama during the cabinet meeting. He said that he “didn't want to take a position to go if that was not where [Obama] was going to go.”

Biden said that he had a private conversation with Obama after the meeting in which he said that he should approve the raid.

“I told him my opinion that I thought he should go but to follow his own instincts,” Biden said. “I never, on a difficult issue, never say what I think finally until I go up in the Oval [Office] with him alone.”

Joe Biden Really Sounds Like Someone Who Is Running For President

[Mic](#), October 20, 2015

Vice President Joe Biden has been agonizing over a run for the Democratic presidential nomination for months now, but with one debate already gone and the other candidates steadily building support and reinforcing campaign apparatuses, the time for a final decision is near.

On the other hand, maybe he has already decided.

Over the past 24 hours, at least two people who might know — Fox News chief White House correspondent Ed Henry and Rep. Brendan Boyle (D-Pa.) — have said they were told the vice president was preparing to join the race. Biden himself has been talking plenty, but has remained largely silent on his future plans.

So we're left to continue on reading the tea leaves. During a panel discussion with former Vice President Walter Mondale on Tuesday, Biden dropped several hints about what a potential candidacy might look like.

Though he did not hint about his choice or when he might announce it, Biden didn't simply “sound like a candidate” — he sounded like a candidate very clearly attempting to edge out a rival, Hillary Clinton. He nimbly poked at his former colleague with a handful of ostensibly offhand comments that just so happened to answer potential criticism while drawing himself closer to President Barack Obama, who remains popular with Democratic primary voters.

Here's what Biden said: Surprise! Biden was totally in favor of the bin Laden raid. Source: Mic/C-SPAN

This one is grabbing headlines. The question of whether to launch a special forces raid on Osama bin Laden's compound in Pakistan in 2011 was thought to have caused a sharp division in the Obama administration. The intelligence community was not 100% sure the target was in fact the terror leader's compound, and there were doubts about the wisdom of sending troops deep into Pakistan to find out if it was.

For the past four years, Biden has been cast as one of the doubters who cautioned against military action, and publicly recounted his skepticism. Clinton has happily touted herself as one of the mission's strongest backers, claiming in an interview in July that “I was one who recommended to the president that he go ahead.”

On Tuesday, however, Biden added a wrinkle to that narrative, changing his story to claim that he had told Obama in private that he should approve the raid while casting a skeptical eye in front of the rest of the national security team.

“I said I think we should make one more pass with another UAV (unarmed aerial vehicle or drone) to see if it is [Bin Laden],” Biden said, claiming that this was not his real opinion. “The reason I did that,” he continued, “is I didn't want to take a position to go if that was not where [Obama] was going to go.” Biden, in case you thought otherwise, was Obama's real voice abroad. Source: Mic/C-SPAN

Biden called Clinton a “great” secretary of state. But not, by pretty clear implication here, the real voice of the Obama administration overseas. Just in case that wasn’t clear... Source: Mic/C-SPAN

Clinton traveled to a record 112 countries, but Biden, as he noted, knew many of their diplomats before, when they ascended to leadership roles, back when many were just low-level ministers or parliamentarians dreaming of higher office. If you like Obama, Biden wants you to know this. Source: Mic/C-SPAN

Any differences, Biden said, came down to questions over tactics. That included when he got out ahead of the White House during the 2012 re-election campaign to declare his support for same-sex marriage. (Incidentally, that was about a year before Clinton did the same.) Again, to be clear, Biden is really happy he chose to work for Obama. Source: Mic/C-SPAN

If Biden does decide to go ahead and launch a bid, he should probably get started soon. Despite having polled well for a non-candidate, his numbers are beginning to stall in the latest round of post-debate surveys. Still, he would enter the contest with a solid base of support and, as made pretty clear on Tuesday morning, an impressively refined game plan for mitigating Clinton’s ready-made attacks.

Joe Biden Alters Bin Laden Account

[The Blaze](#), October 20, 2015

It’s been held up as one of the starkest differences between Hillary Clinton and Joe Biden: She decisively supported the raid to take out Osama bin Laden, and he opposed it.

But on Tuesday, Biden altered his account of what happened in the lead-up to the 2011 operation, telling an audience that he gave his direct support to President Barack Obama after a cabinet meeting, and notably omitting Clinton’s name from the list of people who were definitively in favor of it — amid sky-high speculation that he is poised to challenge her for the 2016 Democratic presidential nomination.

White House photo

“It was something that was a difficult call for the president. So, we sat in the cabinet room at the end of the day making the decision. He said, ‘I want everybody’s opinion.’ Everybody went around the room,” Biden said at George Washington University.

“There were only two people who were definitive and absolutely certain: Leon Panetta said go and Bob Gates said don’t go, and others were 51-49, some ended up saying go, but it was such a close call,” he continued. “I joked and I said, ‘You all sound like 17 Larry Summers,’ the economist, on one hand then on the other. They said, ‘Joe, what would you do?’ There was a third option I didn’t really think we should do. I said, I think we should make one more pass with a UAV to see if it is him.”

“The reason I did that is because I didn’t want to take a position to go if that was not where [Obama] was going to go. So as we walked out of the room and walked upstairs, I said, I told him my opinion that I thought he should go, but follow his own instincts,” Biden added. “But it would have been a mistake – imagine if I had said in front of everyone, don’t go or go, and his decision was different. It undercuts that relationship. I never say what I think finally until I go up into the Oval with him alone.”

Biden’s remarks Tuesday differ from what he said in January 2012

, when he recalled directly advising the president against the raid and did not mention a private conversation with Obama.

“Every single person in that room hedged their bet except Leon Panetta. Leon said go. Everyone else said, 49, 51,” Biden said in 2012. “He got to me. He said, ‘Joe, what do you think?’ And I said, ‘You know, I didn’t know we had so many economists around the table.’ I said, ‘We owe the man a direct answer. Mr. President, my suggestion is, don’t go. We have to do two more things to see if he’s there.’”

Clinton has repeatedly drawn a distinction between hers and Biden’s positions on the raid, including in her 2014 memoir, “Hard Choices: “I respected [Biden’s] concerns about the risk of a raid,” she wrote, “but I came to the conclusion that the intelligence was convincing and that the risks were outweighed by the benefits of success.”

After Biden’s remarks Tuesday, then-Obama chief of staff Bill Daley supported Biden’s account in a conversation with reporters:

White House press secretary Josh Earnest was careful not to weigh into the shifting account, asserting he wasn’t in the room several times during the daily press briefing.

“I was not in the room when these decisions were being made or when the president was consulting his advisers about this very difficult foreign policy call that he made,” Earnest said. “There have already been books written about this. I am confident there will be more, or at least more books in which we will be able to read about this momentous time in American history. So I’m going to leave the dissection and the oral history to those who were actually there. To the extent there is greater clarity you would like to seek, maybe you would ask those in the room.”

He later added, “I don’t have any new insight to share with you about the president’s recollection about those events.”

This post was updated to include comment from White House press secretary Josh Earnest.

Correction: TheBlaze initially stated that Biden expressed his support for the raid during the cabinet meeting; Biden said he told the president privately afterward.

Joe Biden Changes Story On Osama Bin Laden Raid

By Laura Koran

[CNN](#), October 21, 2015

Washington (CNN) Vice President Joe Biden offered an account Tuesday of the decision to launch the raid that killed Osama bin Laden that differed from some of his previous retellings – and from Hillary Clinton's.

His remarks come as he considers facing off against the former secretary of state in the 2016 presidential race, and they seem to signal that he sees his earlier stance on the raid as a potential liability.

At an event honoring former Vice President Walter Mondale, Biden said he had privately advised the President to pursue the raid on bin Laden's compound after initially advising a more cautious approach at a Cabinet meeting.

"We walked out of the room and walked upstairs," Biden said. "I told him my opinion: I thought he should go, but to follow his own instincts."

The new account is a significant departure from what he said at a Democratic retreat in January 2012.

"Mr. President, my suggestion is, 'Don't go,'" Biden said, according to an ABC News report from that time.

"We have to do two more things to see if he's there," Biden recalled, though the story did not include what those two things were.

The Cabinet meeting Biden referred to has been described by several people in the administration, including President Barack Obama himself.

The President asked his closest advisers for input on how he should respond to intelligence that bin Laden was holed up in a compound in Abbottabad, Pakistan – intelligence that was anything but certain.

The proposed raid by Navy SEALs was risky, particularly without notifying Pakistan of the plan.

"Those decisions are not always popular. Those decisions generally are not poll-tested," Obama told moderator Bob Schieffer in a 2012 presidential debate. "And even some in my own party, including my current vice president, had the same critique" about the risk of the operation as did some outsiders.

Clinton has also characterized Biden as having been openly skeptical in the meeting.

Tuesday's account is also a change from an account Biden gave on NBC's "Meet the Press" in May 2012, in which he described advising the President to follow his instincts but didn't explicitly advise him to "go" for it.

"We walked up toward the residence, toward his office," said Biden of his conversation with Obama, "and I knew he was going to go (for the raid). And what I always tell him when he – he looked at me again, and I said, 'Follow your instincts, Mr. President. Your instincts have been close to unerring; follow your instincts.'"

Biden also offered a reason for the difference between what he said in the Cabinet meeting and his new account of the private conversation with Obama in which he advocated following his instincts.

The vice president now says that he suggested the administration undertake additional drone surveillance on the compound while in that Cabinet meeting, but that he made that recommendation because he didn't want to undermine the President if he ended up choosing a more cautious approach.

"Imagine if I had said, in front of everyone, don't go or go and his decision was a different decision," said Biden. "It undercuts that relationship. So I never, on a difficult issue, never say what I think finally until I go up to the Oval with him alone."

Biden also said Tuesday that only two people in the meeting were definitive in their advice to the President, contradicting Clinton's account of how she supported the mission.

There were "only two people who were definitive and were absolutely certain," he said, referring to the men who were, respectively, the director of the CIA and the secretary of defense at the time. "Leon Panetta said, 'Go,' and Bob Gates – who has already publicly said this – said, 'Don't go.' And others were at 59/41."

In her 2014 book "Hard Choices," Clinton writes that she was an immediate supporter while Biden "remained skeptical."

"I respected Bob [Gates] and Joe [Biden]'s concerns about the risks of a raid, but I came to the conclusion that the intelligence was convincing and the risks were outweighed by the benefits of success," she wrote. "We just had to make sure it worked."

Biden also drew attention in his remarks Tuesday to the fact that he knew about the intelligence on bin Laden's location before Clinton did.

"The President and I, and only two others in the administration, knew about Abbottabad as early as August 2010, Biden said Tuesday. "We did not go for almost a year to get him. And major players in the Cabinet did not know about it till January or February (2011)."

In Clinton's account, she learned about the intelligence in March 2011.

Biden's Retelling Of OBL Raid Differs From Earlier Accounts

By John T. Bennett

[Roll Call](#), October 20, 2015

Vice President Joseph R. Biden Jr. offered an account Tuesday of his advice to President Barack Obama before the raid that killed Osama bin Laden that differed from his previous remarks.

Biden's recollection spilled over to the White House's daily briefing, and offered a clear example of how Biden's off-the-cuff style could stir up the 2016 race — and potentially undercut his potential candidacy.

"We walked out of the [Situation] Room and walked upstairs," Biden said at a forum at George Washington University. "I told him my opinion: I thought he should go, but to follow his own instincts."

Biden's Tuesday account did have a bit of nuance: He also said prior to that conversation, he told Obama he favored getting one more birds eye view of the Pakistan compound where U.S. officials believed the al-Qaida leader was holed up.

"Joe, what would you do?" he said others in the secure room asked in the days before the special forces raid. "And there was a third option that I didn't really think we should do, and I said, 'I think we should make one more pass with a UAV to see if it's, if it is him,'" Biden said, using military shorthand for an unmanned drone aircraft.

Biden told an audience packed into a GWU auditorium that he "didn't want to take a position to go if that was not where [Obama] was going to go."

That's why he later allegedly advised Obama to greenlight the risky mission.

The Tuesday comments do not completely align with ones he made in 2012 at a House Democratic retreat, as reported by The New York Times: "Every single person in that room hedged their bet except [then-Defense Secretary] Leon Panetta. Leon said go. Everyone else said, 49, 51."

"This account stands at odds with numerous previous accounts of the meeting and the vice president's position then and subsequently," William A. Galston, a senior fellow at the Brookings Institution wrote in a blog post. "It is likely that the vice president will be called upon to reconcile these apparently competing accounts."

Biden reportedly told House Democrats that he told his colleagues, "We owe the man a direct answer," then said, "Mr. President, my suggestion is don't go. We have to do two more things to see if he's there."

The last part of that 2012 remark aligns with Biden's comments on Tuesday morning. What's new is his account of the follow-up conversation — in private — with Obama.

On Monday, White House Press Secretary Josh Earnest sidestepped reporters' questions about Biden's revised account.

Earnest would not comment on the vice president's assertion that he advised Obama to launch the strike.

"For an accurate accounting of what happened, you're going to have to talk to the people who were in the room," Earnest said.

Other then-Cabinet members have said Biden advised Obama to hold off.

In his 2014 memoir "Duty," former Defense Secretary Robert Gates wrote this: "Joe Biden and I were the two primary skeptics."

Gates, who was critical of the vice president in his book, also wrote, "Biden's primary concern was the political consequences of failure."

"Biden was against the operation," Gates wrote in his characteristic bluntness about what he called the final meeting on April 28, 2011, to discuss the raid. Gates' account essentially paints Biden as the lone individual in the Situation Room who argued against an offensive strike of some kind.

Biden is mulling a bid for the 2016 Democratic presidential nomination. Should he jump in, he would clash with Hillary Rodham Clinton, who was secretary of State at the time of the bin Laden mission. She frequently says she advised Obama to carry out the raid that ultimately killed bin Laden.

Biden's new version clearly would become an immediate campaign-trail issue should the vice president opt for a third presidential bid.

Biden's New Account Of Bin Laden Raid Puts Him In The Right

By Olivier Knox

[Yahoo! Politics](#), October 20, 2015

Vice President Joe Biden said Tuesday for the first time that he had privately urged President Obama to order the raid that killed Osama bin Laden — a new account contradicting his prior public claim to have opposed the audacious May 2011 operation.

Biden, speaking at a George Washington University forum on the vice presidency, also seemed to undercut Hillary Clinton's contention in her memoirs that she had unequivocally backed the raid.

The vice president's remarks came amid fevered speculation that he could soon announce whether he will jump into the 2016 White House race. Having opposed the bin Laden raid could be a political liability if he seeks the top job.

On Tuesday, Biden described a tense White House meeting in which Obama asked his top advisers for their opinions on whether or not to order the operation, weighing uncertain intelligence and the risks associated with entering Pakistani airspace uninvited.

"Everybody went around the room, and there were only two people who were definitive," Biden said. Leon Panetta, the CIA director at the time, "said, 'Go,'" while then-Defense Secretary Bob Gates "said, 'Don't go.'" Clinton, in this account, would have been among those on the fence.

In this image released by the White House and digitally altered by the source to diffuse the paper in front of Secretary of State Hillary Rodham Clinton, President Barack Obama and Vice President Joe Biden, along with members of the national security team, receive an update on the mission against Osama bin Laden in the Situation Room of the White House, May 1, 2011, in Washington. (Photo: The White House, Pete Souza)

Biden said he raised a third option. "I said, 'Well,' I said, 'I think we should make one more pass'" with an unmanned aerial vehicle to be sure the al-Qaida leader was at the target site. But that wasn't his real preference, he told the forum. Moments after the meeting wrapped up, and he and Obama were alone, "I told him my opinion, that I thought he should go, but to follow his own instincts," the vice president said. "I never, on a difficult issue, never say what I think finally until I go up in the Oval with him alone."

That's not how Biden had previously recalled the advice he gave. In January 2012, at a Democratic retreat, he explicitly described how he opposed the raid in that same meeting.

"Every single person in that room hedged their bet except Leon Panetta. Leon said, 'Go,'" Biden said.

"[Obama] got to me. He said, 'Joe, what do you think?' And I said, 'You know, I didn't know we had so many economists around the table.' I said, 'We owe the man a direct answer. Mr. President, my suggestion is, don't go. We have to do two more things to see if he's there,'" Biden said at the time.

The vice president's new account seems to put him at odds with Clinton's version of the internal debate over the raid. In her 2014 memoir, "Hard Choices," she wrote that Biden and Gates opposed the operation but she supported it.

"I respected Bob's and Joe's concerns about the risk of a raid," she wrote, "but I came to the conclusion that the intelligence was convincing and that the risks were outweighed by the benefits of success."

Clinton has also reportedly knocked Biden in private for opposing the raid.

Shortly after Biden's remarks at the 2012 Democratic retreat, White House spokesman Jay Carney — who had previously served in that capacity for the vice president — said Biden was "speaking accurately" when he described himself as opposing the operation.

In a May 2012 appearance on "Meet the Press," Biden described his private conversation with Obama differently.

"I said, 'Follow your instincts, Mr. President. Your instincts have been close to unerring. Follow your instincts.' I wanted him to take one more day to do one more test to see if he was there," Biden said in that interview.

And no less an authority than Obama himself has cast Biden as more of a critic of the raid than a supporter. In his third debate with Mitt Romney, the president noted his rival's public opposition to a unilateral raid to get bin Laden without Pakistan's acquiescence.

"Even some in my own party, including my current vice president, had the same critique as you did," Obama said.

Former Official: Biden Was Against Raid

By Amie Parnes

[The Hill](#), October 20, 2015

A former senior administration official involved in deliberations on the raid that killed Osama bin Laden said Tuesday that Vice President Biden did not back the operation.

The official, who took part in deliberations on whether to approve the operation in Pakistan, said Hillary Clinton, then secretary of State, and then-CIA Director Leon Panetta both backed the raid — but that Biden did not.

"I can tell you this, both then-CIA Director Leon Panetta and Secretary of State Hillary Clinton favored the raid and they did so in presentations made in the Situation Room," the former official told The Hill. "Secretary Clinton made her views known. Leon made his position known. And I don't recall the vice president sharing the same view.

"When the president conducted the final meeting on April 28th, he faced a divided set of advisers," the official added.

Biden, who is considering a run for the White House against Clinton in 2016, offered a different view earlier on Tuesday.

In an appearance honoring former Vice President Walter Mondale, Biden said he privately supported the raid and held back his advice for President Obama until the two were behind closed doors.

Biden also contradicted the Democratic presidential front-runner's claim that she fully supported the raid.

"I told him my opinion that I thought he should go but to follow his own instincts," Biden said during a panel discussion with former Mondale at The George Washington University. "I never, on a difficult issue, never say what I think finally until I go up in the Oval [Office] with him alone."

The former senior administration official conceded that no one knows what Biden may have told Obama behind closed doors. But the official said the vice president was clear about where he stood on the special forces raid to take action against bin Laden.

In his own book on his years in the Obama administration, Panetta also wrote of Biden being against the operation and Clinton supporting it.

"Biden argued that we still did not have enough confidence that bin Laden was in the compound, and he came out firmly in favor of waiting for more information," Panetta wrote in "Worthy Fights."

Panetta wrote that Clinton acknowledged more time might provide better intelligence, but concluded "this was a rare opportunity and believed we should seize it."

Biden's account on Tuesday also differs from the one he gave in 2012. At that time, he told House Democrats he warned against the operation, one of the most consequential decisions of Obama's presidency.

"Mr. President, my suggestion is, don't go," Biden told lawmakers, according to The New York Times.

Walter Mondale, Joe Biden Compare Notes On The Veep Job

By Don Davis

[St. Paul \(MN\) Pioneer Press](#), October 21, 2015

Vice President Joe Biden used Walter Mondale as an example when he became vice president, he told a crowd gathered Tuesday to honor Minnesota's senior statesman.

"The first person I called was Fritz," after then-presidential candidate Barack Obama asked him to be his running mate, Biden said, using Mondale's nickname.

Mondale and Biden talked for an hour to open a daylong celebration of the 87-year-old Mondale's career, focused on his four years as vice president under President Jimmy Carter. Mondale and Carter are widely praised for giving the vice presidency more importance after it was the subject of jokes and mockery during much of the country's history.

Biden gave no clues about whether he soon would begin a run for the presidency, although pundits watched carefully amid increased rumors in recent days that he would announce this week.

University of Minnesota Professor Larry Jacobs, master of ceremonies at the Washington event, tweeted that one line may have been a swipe at Democratic frontrunner Hillary Clinton: "I don't think my enemy is the Republican Party."

There was no sign of tension between the vice presidents, who Mondale said have been friends since Biden took office in the Senate. Mondale supports Clinton for president.

"Joe, I love you, and we are so glad you are with us today," Mondale told the current vice president.

He also praised what Biden has done with the job. "You have taken the vice presidency a big step forward, aided enormously by your extraordinary experience in the Senate."

The vice presidents sat in a George Washington University meeting room in front of guests who long ago snapped up all the tickets. The event was sponsored by the University of Minnesota Humphrey School of Public Affairs.

Top Minnesota Democratic politicians attended the day symposium and night dinner, including Gov. Mark Dayton and U.S. Sens. Amy Klobuchar and Al Franken.

Included on the dinner guest list was Carter, who Mondale said, "is going out of his way under adverse circumstances to be with us tonight." Carter announced this summer that he has cancer.

Mondale and Biden said keys to being a good vice president are to understand that the president is in charge, don't disagree with the chief executive in public and make sure that it is the right job for the person who accepts it.

"I did not want to be involved in the details of government," Mondale said. "I didn't want to do anything that anyone else was doing. I wanted to be a general advisor to the president."

But to be an advisor, he added, he had to know information before going in to advise Carter. "I could not go into the president and say, 'What's cookin'?"

Like Mondale, Biden did not want to be vice president. When Biden initially rejected Obama's request to be running mate, Obama asked Biden to return to his family and discuss the issue. Family members changed Biden's mind.

Mondale and Biden both were plucked from the Senate to be vice presidential candidates, and both originally thought they would be more important to the president there than as vice president.

Biden said he talked to Mondale various times before taking office.

He also talked to Dick Cheney, his immediate predecessor and vice president to Republican George W. Bush.

Talking about Cheney drew the only disagreement between Biden and Mondale.

"I actually like Dick Cheney, for real. ... I think he is a decent man," Biden said.

But Biden based his vice presidency on Mondale, not Cheney. To Biden, Cheney appeared to control a powerful office, with his own sizeable national security staff.

"Cheney had a very different view of the vice presidency," Biden said.

Mondale immediately disagreed.

"He said early on that he was going to take things to the dark side," Mondale said. "I believe he really did."

The Minnesotan added: "I have a harsh view of the man."

Also on Tuesday's agenda were discussions about how Mondale influenced policy dealing with schools, social services, national security, civil rights and foreign policy.

Biden Jokes About Faking Prostate Cancer To Get Out Of Obama Administration

By Ben Wolfgang

[Washington Times](#), October 21, 2015

Vice President Joseph R. Biden said Tuesday that he would "develop prostate cancer or something" if he had a fundamental disagreement with President Obama and was forced to resign from his post.

At an event honoring former Vice President Walter Mondale, Mr. Biden recounted the conditions he placed on joining Mr. Obama's ticket in 2008 and also made clear he would leave the administration if he encountered deep, substantive policy differences with the president.

"Two things: to be able to completely be level with you and argue with you if we disagree, privately," Mr. Biden said of his 2008 conversations with Mr. Obama, in which the two men discussed the vice president's role.

"And secondly, I want to be the last person in the room on every major decision, and I didn't mean that figuratively, I meant that literally — the last person in the room," he continued. "He's president. He gets to make the decision, and unless there's an overwhelming disagreement in principle, in which case I'd develop prostate cancer or something and leave, and he knew I meant that ... I get to be the last person in the room. And that's where I think I can serve best."

Mr. Biden reportedly will decide this week whether to seek the White House in 2016.

Biden Gaffes Create More Awkward Moments For White House Before Presidential Decision

By Ben Wolfgang

[Washington Times](#), October 21, 2015

He's not even in the presidential race, but Vice President Joseph R. Biden already has a mouth that is getting him into trouble and putting the White House in an uncomfortable spot.

Mr. Biden's list of gaffes got longer Tuesday when he made an awkward joke about faking prostate cancer in order to leave the administration, and, more seriously, offered the bizarre claim that he did, in fact, support the 2011 raid that killed al Qaeda leader Osama bin Laden. The vice president previously said he opposed the mission, and other top officials — including President Obama — suggested that Mr. Biden was skeptical of the raid.

Mr. Biden, who is expected to decide this week whether he will run for president, also claimed Tuesday that the president gave him veto power over any Cabinet nominee. The White House steered clear of that assertion and also refused to address the confusion around the bin Laden mission — a potential preview of the difficulties the administration will face if Mr. Biden launches a presidential bid.

Analysts say the White House is likely to be forced to play referee in any potential disputes between Mr. Biden and Democratic presidential front-runner Hillary Rodham Clinton, who served as Mr. Obama's secretary of state for four years. Mrs. Clinton, too, has said that Mr. Biden was opposed to the bin Laden mission.

"You could see this anytime a moment from the first term where Joe Biden and Hillary Clinton interacted and a moment like that has to be litigated, the White House could be dragged into these stories, and that's not what it wants," said Matthew Dallek, assistant professor of political management at George Washington University. "It certainly creates an unusual dynamic."

On the bin Laden raid, Tuesday's comments represent the first time Mr. Biden has said he fully backed the mission. He claimed that he offered his true position during a private conversation with the president and avoided taking a firm stance during meetings in the situation room.

"As we walked out of the room and we walked upstairs, I told him my opinion that I thought he should go but to follow his own instincts," Mr. Biden said during a speech honoring former Vice President Walter F. Mondale.

The White House would not weigh in on the conflicting reports. White House press secretary Josh Earnest said he couldn't confirm Mr. Biden's account and told reporters that they would need to ask Mr. Obama, the vice president, Mrs. Clinton or someone else who was in the room when the decision was made to raid bin Laden's compound in Pakistan.

"I was not in the room when these decisions were being made. I'm going to leave the dissection and the oral history, if you will, of those days to those who were actually there," Mr. Earnest said at Tuesday's White House press briefing. "I don't have any insights to share with you about the private conversations between the president and the vice president."

Aside from the important foreign policy question of whether he backed the bin Laden mission, Mr. Biden added to his history of amusing yet awkward statements.

That record includes telling a wheelchair-bound Missouri state senator to stand up at a campaign rally, calling Mr. Obama "the first mainstream African-American who is articulate and bright and clean" to run for the presidency, joking that in Delaware "you cannot go to a 7-Eleven or a Dunkin' Donuts unless you have a slight Indian accent," and caressing the shoulders of Stephanie Carter, wife of Defense Secretary Ashton Carter.

Prostate cancer jokes now can be added to the list after Mr. Biden recounted a conversation with the president in which he laid out his conditions for joining the administration.

"Two things: to be able to completely be level with you and argue with you if we disagree, privately," Mr. Biden said of his 2008 discussions with Mr. Obama. "And secondly, I want to be the last person in the room on every major decision, and I didn't mean that figuratively, I meant that literally — the last person in the room. He's president. He gets to make the decision, and unless there's an overwhelming disagreement in principle, in which case I'd develop prostate cancer or something and leave, and he knew I meant that I get to be the last person in the room. And that's where I think I can serve best."

No Grounds For Biden In New Hampshire

By Jennifer Epstein

[Bloomberg Politics](#), October 20, 2015

Vice President Joe Biden trails the two leading candidates for the Democratic presidential nomination by more than 25 points each in New Hampshire and would enter the race without an edge over them on overall favorability or specific personality traits.

Biden would draw the support of 10 percent of likely Democratic primary voters if the primary were held today, according to the Bloomberg Politics/Saint Anselm New Hampshire Poll released Tuesday. That puts him well behind Vermont Senator Bernie Sanders, who's led most recent polls in the state that neighbors his own, who gets the support of 41 percent of those surveyed, and former Secretary of State Hillary Clinton, who's at 36 percent. When Democrats first and second choices for the party's nominee are combined, Clinton edges Sanders: 64 percent of Democrats rank Clinton as either their No. 1 or No. 2 choice for the nomination. For Sanders, the number is 63 percent; for Biden, 29 percent.

Former Virginia Senator Jim Webb, who dropped out of the Democratic race on Tuesday, was the first choice of 1 percent of those surveyed and the second choice of 1 percent. Harvard Professor Lawrence Lessig was the first choice of 1 percent, while former Maryland Governor Martin O'Malley and former Rhode Island Governor Lincoln Chafee got no support as a first choice candidate but drew the backing of 6 percent and 1 percent, respectively, as a second choice candidate.

Bloomberg Politics/Saint Anselm last polled New Hampshire Democrats in June—before Sanders' surge—and Clinton led him 56 percent to 24 percent then. Biden was not named in that survey.

The anemic showing for the vice president comes as people close to him say he's nearing a decision on whether to get into the race, though there have been several false alarms in recent weeks. Advisers have said that Biden's choice won't be driven by polling and will instead be swayed by whether he believes that he and his family would be able to withstand the stress of the campaign after losing his older son Beau Biden earlier this year.

Thirty-six percent of Democratic primary voters surveyed say that Biden's drawn out decision-making process made them less supportive of him, while 62 percent say it doesn't matter to them.

Biden has signaled that his bid would ride on the successes and popularity of President Barack Obama, who got favorable ratings from 83 percent of the New Hampshire Democrats surveyed. Biden's 75 percent favorability rating put him behind both former President Bill Clinton (78 percent) and Hillary Clinton (77 percent). The differences are more pronounced among those voters who feel most strongly: Obama got "very favorable" ratings from 50 percent of New Hampshire Democrats. For Hillary Clinton, that number is 40 percent. For Biden, 29 percent. The highest favorability rankings went to Sanders, from neighboring Vermont: 86 percent rated him favorably and 55 percent "very favorable."

On questions of personality and ability to govern, the vice president generally trails Clinton and Sanders.

Clinton leads the field on leadership questions, with 49 percent of those surveyed saying she's most ready to be president. Biden, despite being a heartbeat away from the presidency for nearly seven years and having served in the Senate for nearly four decades, is seen as most ready by 21 percent of respondents, barely ahead of Sanders, who's at 20 percent. Clinton also has an advantage in being seen as knowing best how to get things done in Washington and in handling Russian President Vladimir Putin. And Democrats see her as their party's strongest potential standardbearer: 50 percent of respondents say that Clinton would be best capable of beating the Republican nominee in the general election. Sanders is next at 19 percent.

Sanders does better than Clinton and Biden on traits of authenticity and likability, which the vice president's allies have suggested would be his advantage. Sanders is seen as most authentic by 57 percent of those surveyed, while 19 percent call Biden the most authentic, barely ahead of Clinton at 16 percent. The Vermont senator also gets the highest marks among voters asked which candidate cares most about them – 51 percent say that of Sanders, while 23 percent say it of Clinton and 10 percent say it of Biden. Sanders also has an edge on being trusted to tell the truth, 53 percent to Biden's 17 percent and Clinton's 13 percent.

As Clinton's testimony before the House Select Committee on Benghazi approaches, Democratic primary voters are divided on whether the panel is inflicting damage and if that is swaying their support of her. Twenty-eight percent of those surveyed said it makes them less supportive of her while 67 percent said it doesn't bother them. Nearly identical numbers say the same about her not being forthcoming about the private email server she used while at the State Department.

New Hampshire Democrats are evenly divided at 47 percent each on whether Sanders' 2005 vote to give gun manufacturers immunity from lawsuits makes them less supportive or does not bother them. Sanders' description of himself as a "democratic socialist" is even less of a drawback, with only 16 percent of voters saying that makes them less supportive of him.

The poll was conducted by Purple Strategies from Oct. 15-18 and surveyed 400 likely Democratic primary voters by landline and cell phone. The margin of error is +/- 4.9 percentage points.

Poll: Biden A Distant Third In New Hampshire

By Eliza Collins

[Politico](#), October 20, 2015

Democratic primary voters in New Hampshire aren't too eager to choose Joe Biden, a new Bloomberg/Saint Anselm poll shows — even as the media frenzy over whether the vice president will enter the 2016 race reaches fever pitch in Washington.

Biden received the support of just 10 percent of those polled, putting him in a distant third place.

Vermont Sen. Bernie Sanders leads the poll with 41 percent while former Secretary of State Hillary Clinton comes in second with 36 percent.

But Sanders and Clinton are neck and neck if voters' first and second choices are combined: Clinton at 64 percent vs. Sanders' 63. Biden's combined score is just 29 percent.

In June's Bloomberg/Saint Anselm poll, Clinton led the field with 56 percent, with Sanders at 24 percent. Biden was not included.

Former Virginia Sen. Jim Webb — who dropped out of the race Tuesday — garnered 1 percent, tying him with Harvard law professor Lawrence Lessig. Former Maryland Gov. Martin O'Malley and former Rhode Island Gov. Lincoln Chafee did not register.

The prolonged uncertainty surrounding Biden's candidacy didn't bother most voters — 62 percent said it didn't matter. But 36 percent said that Biden's slow decision-making process made them less supportive of his candidacy.

The poll of 400 likely Democratic primary voters was conducted Oct. 15-18 by landline and cell phone, with a margin of error of plus or minus 4.9 percentage points.

Should Joe Biden Enter The Democratic Primary?

Freedom Caucus Wary Of Ryan's Demands

By Lauren French

[Politico](#), October 21, 2015

Paul Ryan wants a full embrace from the House Freedom Caucus before he runs for House speaker. Early signs from the conservatives are they might never get there.

After Ryan addressed Republicans late Tuesday, saying he would need conservative backing to run, lawmakers in the 40-member group of hard-line conservatives came away wary of the Ways and Means chief's demand for unconditional support. They were dismissive of his Ryan's request that they relinquish a procedural tactic they used to threaten to strip outgoing Speaker John Boehner of his title – one of the most potent weapons in the group's arsenal.

And it is clear the conservative lawmakers will insist on more specifics from Ryan before they would consider an endorsement. Sources within the caucus said he'll have to discuss policy and procedural changes the Freedom Caucus wants and offer up tangible promises to decentralize power from leadership to rank-and-file members if he wants their backing.

Without specific pledges, those sources said, Ryan will have a hard time clinching the backing of 80 percent of the group's members — its threshold for an endorsement.

"I got the sense that Paul Ryan was not willing to look at rule changes before October 29, and without that I don't see him getting 80 percent," one Freedom Caucus member said, referring to the expected date of the election for speaker.

The Freedom Caucus has until Friday to decide if it will back Ryan. Several of the Freedom Caucus' most influential members huddled in the office of Rep. Jim Jordan (Ohio), the group's chairman, late Tuesday night. And board members of the conservative organization will meet Wednesday to discuss Ryan's conditions.

The Wisconsin Republican told his colleagues on Tuesday that he would serve as speaker if — and only if — the three largest coalitions in the GOP House support his candidacy. An endorsement is nearly assured from the Republican Study Committee and the moderate Tuesday Group.

"I have left this decision in their hands," Ryan said at a press conference.

The Freedom Caucus has already endorsed Florida Republican Rep. Daniel Webster for speaker but that support is only for the internal vote of House Republicans. The conservative members could still back Ryan on the House floor. Webster told reporters Tuesday he is still committed to running for speaker.

Rep. Matt Salmon (R-Ariz.), a founding member of the Freedom Caucus, said Ryan made "some very reasonable observations about how anybody would need the support of the entire conference if they are going to be a successful speaker."

The caucus is not ready to support Ryan, Salmon added, though he didn't rule it out.

"All things are possible," Salmon said. "I think the issue of process reforms are going to have to be addressed one way or another before the Freedom Caucus wholesale jumps in bed with him."

But already Ryan has ruffled feathers within the group. Rep. Raúl Labrador (R-Idaho) said that getting rid of the "motion to vacate" procedure — which Boehner was confronted with over the summer, one of the factors in his decision to resign — is a "non-starter."

"I think we need to invite him in and have him expand on what he meant. You know he just gave a short speech," Labrador, a Freedom Caucus member, said.

Ryan's conditions essentially put the group in a no-win spot of endorsing a candidate for speaker many figures on the far right say is too moderate and accommodating — or blocking a highly respected figure in the GOP, the one candidate widely seen as capable of getting 218 votes on the House Floor.

One Freedom Caucus member who requested anonymity in order to speak freely was asked whether Ryan is setting up the group to be blamed if he ends up not running.

"You can certainly read it that way," the lawmaker said.

House Republicans Look To Ryan To Save Them From Themselves

By Erica Werner

[Associated Press](#), October 21, 2015

WASHINGTON (AP) – House Republicans, searching for a speaker to lead them out of crisis, waited to learn Tuesday whether Wisconsin Rep. Paul Ryan would shoulder the thankless task.

Ryan and his aides were saying little ahead of a closed-door late-evening meeting, the first such gathering following a weeklong recess many spent in a state of suspended animation, waiting to hear from Ryan.

But in a sign that he is exploring the possibility, Ryan was meeting with the House Freedom Caucus at their request, his spokesman said. This group of three dozen or so hardline conservatives pushed current Speaker John Boehner to announce his

resignation and scared off Boehner's No. 2, Majority Leader Kevin McCarthy, who abruptly withdrew from the speaker's race just before the recess.

Ryan, 45, the GOP's 2012 vice presidential nominee, has consistently said he does not want to be speaker and would prefer to stay on as chairman of the tax-writing Ways and Means Committee, which he's described as his dream job.

But he's been under heavy pressure to reconsider from party leaders who argue he is the only House Republican with the stature and broad popularity to unite a caucus divided against itself, at a moment of deep turmoil. Congress is hurtling toward an early November deadline to raise the federal borrowing limit or invite a first-ever default, and a deadline to pass spending legislation or risk a government shutdown will follow in early December.

House GOP leaders also planned to use Tuesday night's meeting to float a debt limit plan that would link any increase in borrowing authority with deep spending cuts and a vote on a constitutional amendment to require a balanced budget. Such legislation would be certain to draw a White House veto threat and die in the Senate. But it could satisfy demands from conservatives who are loudly protesting the Obama administration's calls for increasing the debt limit with no strings attached.

As for Ryan, "I think he has the potential to unite, if anybody can, unite the various elements of the Republican conference in the House," Sen. John Thune of South Dakota, the No. 3 Senate Republican and a former member of the House, said Tuesday. Thune called being speaker "probably the toughest job in the world right now."

Indeed some of the same conservative elements outside of Congress who made problems for Boehner and McCarthy are on the attack against Ryan, highlighting his support for government bailouts and comprehensive immigration legislation allowing legal status to people in the country illegally.

"We think Paul Ryan is another example of what's wrong with Washington, D.C.," said Jenny Beth Martin, national coordinator of the Tea Party Patriots. "He's a nice man, but it's time for someone who is going to be speaker of the House who will disrupt business as usual."

Ryan did pick up one endorsement Tuesday, but it was probably unwanted. Senate Democratic Leader Harry Reid of Nevada declared himself a fan of Ryan's and said he hoped he would become speaker.

"He appears to me to be one of the people over there that would be reasonable; look at some of the other people," Reid remarked to reporters. When someone noted that an endorsement from Reid, a villain to many Republicans, could hardly help Ryan, Reid shrugged and said: "I just speak the truth."

Paul Ryan Inches Closer To Speaker Bid Decision

[ABC News](#), October 21, 2015

With lawmakers back in Washington after a 10-day recess, all eyes are on Paul Ryan, R-Wisconsin, as he weighs a House speaker bid.

Sources close to Ryan said the Wisconsin Republican is now open to a run for speaker, but does not plan to make a final decision until he talks to more of his Republican colleagues. For weeks, Ryan and his spokesman have said he is not running for speaker.

Members could question Ryan about his plans at a conference meeting this evening. Ryan is not expected to make a final decision on a speaker run tonight, his spokesperson said.

The well-regarded chairman of the House Ways and Means Committee is seen as the consensus candidate to succeed John Boehner and the Republican best positioned to bring the fractured conference together.

Ryan has repeatedly refused to go after the top job in Congress, but began considering a run after House Majority Leader Kevin McCarthy said he would drop his bid to replace Boehner.

"He feels the pull of the country – people encouraging him and saying he'd be a great choice," said Rep. K. Michael

Ribble, R-Wisconsin, who shared a flight home with Ryan last week. "But he also feels the pull of his family, and his passions," he added.

Ryan, who spent the recess at home with his family, has young children at home in Janesville. As speaker, he'd be expected to fundraise for the party, though colleagues have offered to help him shoulder that burden. The promotion could also make it more difficult for him to pursue entitlement and tax reform.

Should he decide to jump in, Ryan would need the support of the 40-odd members of the House Freedom Caucus, who helped force Boehner's retirement and derail McCarthy's speaker bid.

The group has endorsed little-known Rep. Daniel Webster, R-Florida, in the speaker's race – to win Boehner's gavel in a vote on the House floor.

Members of the caucus, who have expressed interest in Ryan running for speaker, want the House and conference run differently.

“Paul has to convince people he's not John Boehner 2.0,”

- ~~South Rep. Mick Mulvaney~~

Freedom Caucus leader. They'd like to see greater representation in leadership – including subcommittee chairmanships and on the steering committee – and more bills on the House floor via committees, among other proposals.

Ryan met with leaders of the group late Tuesday afternoon.

If he decides against a run for speaker, more than a dozen Republicans are ready to launch bids in what would be a free-for-all race.

Congress has to raise the debt ceiling by Nov. 3 or risk a federal government default. Lawmakers also have to pass additional government funding by Dec. 11.

For now, those deadlines remain John Boehner's. The Ohio Republican, who had planned on leaving Congress on Oct. 30, has agreed to stay on until his replacement is selected.

Paul Ryan Open To House Speaker Run, Lawmakers Say

Wisconsin Republican sets conditions for run, says he wants three major caucuses to back him

G.O.P. To Meet With Paul Ryan On House Speaker Post

By Emmarie Huetteman

[New York Times](#), October 21, 2015

WASHINGTON — Representative Paul D. Ryan of Wisconsin agreed Tuesday to meet with some members of the House Freedom Caucus, the hard-line group that helped force the resignation of Speaker John A. Boehner, in advance of a larger meeting of Republicans, potentially ending the suspense about whether he will answer his party's pleas and run for speaker.

Less than two weeks after Representative Kevin McCarthy of California, the majority leader, withdrew his name from consideration, House Republicans returned from a weeklong recess to the reality that they had not found a willing candidate capable of uniting their ranks.

Compounding the pressure to settle on a new speaker is the fact that the country's borrowing authority is set to expire in about two weeks, and a short-term budget measure to avert a government shutdown will run out in less than two months.

While Mr. Boehner, who plans to resign at the end of the month, said he would stay until his successor was named, some members have indicated that they may move to force him out. Without a speaker, House operations would be at a virtual standstill, raising the possibility of an economically and politically perilous default on the nation's debt.

The question of whether Mr. Ryan will run has been the subject of intense speculation in Washington for the past week as lawmakers repaired to their districts. He has insisted that he has no interest in the post, but the surprise decision by Mr. McCarthy, Mr. Boehner's expected successor, put the focus back on Mr. Ryan, the party's 2012 vice-presidential nominee.

Representatives Jason Chaffetz of Utah and Daniel Webster of Florida are also running for the post. Mr. Webster has the endorsement of the most conservative members of the House, who have demanded that the next speaker adjust the chamber's rules to reduce the power of party leaders.

But conservative members like Representatives Raúl R. Labrador of Idaho and Justin Amash of Michigan have said they are willing to meet with Mr. Ryan, who has earned respect across his party as the chairman of the tax-writing Ways and Means Committee.

Ryan Nears Decision On Speaker's Race As Congress Returns

[Washington Post](#), October 20, 2015

Rep. Paul Ryan (R-Wis.) is more open than ever to becoming the next House speaker, following a contemplative week at home with his family. But before he makes a final decision, friends say, he will seek assurance from Republican hard-liners that he will have their full support should he win the gavel.

Those discussions will begin Tuesday evening at the Capitol when House Republicans gather for a closed meeting. It is unclear when Ryan, the 45-year-old chairman of the House Ways and Means Committee and 2012 vice-presidential nominee, will openly discuss his intentions.

At the top of Ryan's list, his associates said, is a desire to lead the House GOP as its spokesman and agenda-setter without the threat of revolt from the right, halting a dynamic that has dominated the tumultuous speakership of John A. Boehner (R-Ohio), who announced last month that he would leave Congress at the end of October. Another aim would be to delegate some of the job's travel and fundraising demands so that Ryan could spend enough time with his wife and school-aged children.

"My only caution is that he should go very slow and make sure that the whole conference is coming to him," said former House speaker Newt Gingrich (R). "Don't underestimate the degree of getting chewed up. We are not like the Democrats right now. They are relatively cohesive.

... We are a movement in enormous ferment, with enormous anger and enormous impatience."

Looming over Ryan's deliberations is a churning frustration among Republicans nationally about the party's ability to oppose President Obama and a presidential primary field led by anti-establishment outsiders who have made common cause with the House GOP's right flank.

Fix managing editor Aaron Blake runs down the top five contenders for House Speaker John Boehner's job now and says why they might—or might not – be the one to win. (Sarah Parnass/The Washington Post)

Those conservative House members have pushed for a suite of rules changes, ranging from an overhaul of the party's internal steering committee to a more open process for considering legislation. Ryan, they say, would not be exempt from those demands, which, if adopted, could give the new speaker less control.

Ryan's allies say his conditions for becoming speaker are likely to include an understanding that he would have a free hand to lead without a constant fear of intraparty reprisals.

"He is more confident that he can put forward conditions that will soothe his convictions and put his mind at ease," said William J. Bennett, a longtime mentor to Ryan who has spoken with him in recent days.

Peter Wehner, a former adviser to President George W. Bush, said Ryan wants House conservatives to make clear that they would not seek to "cripple him" from the start.

"He doesn't have a moral obligation to get Republicans out of the rubble they've created for themselves," Wehner said. "Asking for their goodwill is completely reasonable."

Wehner added that Ryan envisions his possible speakership as one that would be buoyed by his own political capital and shaped by an aggressive Republican policy agenda, rather than one consumed with catering to the whims of tea party backbenchers: "He's got a vision for the party that he can articulate. He knows policy, philosophy, and where the party should go intellectually."

But Rep. Mick Mulvaney (R-S.C.), a member of the hard-line House Freedom Caucus who has expressed measured support for Ryan as speaker, said Ryan could not expect to unify Republicans without making some procedural concessions.

Rep. Paul Ryan (R-Wis.) is being tapped to become the next speaker of the House, even though he doesn't seem to want the job. Who is this guy? (Gillian Brockell/The Washington Post)

"The displeasure with the way the House has been managed since 2011 is pervasive and crosses all sorts of philosophical boundaries within the party," Mulvaney said. "The appetite for a new way of doing business is real, and whoever wants to be the speaker is going to have to speak to that."

Leaving Washington before last week's recess, most lawmakers hailed Ryan as the only candidate who could unite a House Republican majority deeply divided over how to best wield its power. That has been complicated by a week of activist politicking — on talk radio, on conservative web sites, and in town hall meetings — that has sought to cast doubt on Ryan's conservative bona fides.

His purported apostasies include supporting the Troubled Asset Relief Program during the 2008 economic crisis, brokering a spending deal with Democrats in 2013 and — most crucially — being a leading Republican proponent of immigration reform packages that would give illegal immigrants a path to legal status.

"There are people who have sort of bought the narrative that the speaker's race is about trying to get someone who is more conservative, and for those folks Paul is not acceptable," Mulvaney said. "But there are other folks who believe, and this is what I've been telling them, that it's not about people, it's about process."

A new poll released Monday by NBC News and The Wall Street Journal showed strong support for Ryan among Republican primary voters, with 63 percent "comfortable and positive" about Ryan taking over the post. Twenty-eight percent said they would feel "skeptical and uncertain" if he became speaker.

Should Ryan decide not to heed the calls to run, it would set off a free-for-all that has already attracted roughly a dozen potential candidates who have expressed interest in running if Ryan does not.

They range from powerful committee chairmen such as Homeland Security's Michael McCaul and Agriculture's K. Michael Conaway, both of Texas, to Darrell Issa (Calif.), the high-profile former Oversight chairman to up-and-comers such as Marsha Blackburn (Tenn.), who has played a lead role in the GOP's recent fight against Planned Parenthood.

But many Republicans believe — or at least hope — that melee will be avoided as Ryan has shifted from being averse to inclined to succeed Boehner, due to a wave of encouragement from officials and influential conservatives, as well as a sense of duty to his embattled party.

Brendan Buck, Ryan's spokesman, said Monday that Ryan did not yet have anything to announce. "Congressman Ryan spent the weekend at home with his family. There is no update, and he looks forward to listening to and speaking with his colleagues this week," Buck said in a statement.

House Republicans will convene Tuesday in the Capitol basement for a conference meeting focused on the "October agenda." According to a GOP memo, dinner will be served and staffers will not be allowed in the room. They will meet again Wednesday morning.

Rep. Steve King (R-Iowa), a conservative who is backing longshot speaker candidate Rep. Daniel Webster (R-Fla.), sighed Monday when he heard about the previously unscheduled session, and said it signaled that the leadership was ready to get behind one of their own.

"This indicates they are at least close to presenting a successor to the conference, in an attempt to get momentum for that person," King said. "There is an effort out there to talk Ryan out of stepping up, but he may be ready to present himself."

Gingrich said that if Ryan does decide to seek the speaker's gavel, he will learn quickly — and encounter early problems.

"It'll take him about six weeks to go from being a policy guy to a process guy and he'll be very good at it. But it's a different world with a different set of rules. That's what he has to think through: Is that really a world he wants to be in the middle of? Is he willing to endure the scarring?"

Correction: An earlier version of this story said Rep. Steve King (R-Iowa) is a member of the Freedom Caucus, which he is not.

Rep. Ryan Lays Out Conditions For Seeking Speaker's Job

By Richard Cowan

Ryan Tells GOP He'll Run For Speaker — With Conditions

By Scott Wong

[The Hill](#), October 20, 2015

Rep. Paul Ryan (R-Wis.) told the House GOP conference that he will run for Speaker if every caucus endorses him, according to lawmakers in the room.

Ryan made the pledge during a presentation behind closed-doors in which he outlined how he could be convinced to run for the chamber's top job.

He also gave the House GOP until Friday to rally around him.

Ryan told his GOP colleagues: "I know this sounds conditional, because it is," according to a source in the room.

A spokesman for Ryan immediately after the meeting said Ryan will only run if his colleagues accept his as a "unity candidate" who is backed by centrists and conservatives in the House.

"Unless the speaker is a unifying figure across the conference, he or she will face the same challenges that have beset our current leadership," spokesman Brendan Buck said.

He said Ryan "encouraged the members to discuss and consider his requests, and he asked that they make clear whether they support them by this Friday."

"If the members agree with his requests and share his vision, and if he is a unity candidate—with the endorsement of all the conference's major caucuses—then he will serve as speaker. He will be all in," Buck said. "But if he is not a unifying figure for the conference, then he will not run and will be happy to continue serving as chairman of the Ways and Means Committee."

The spokesman insisted Ryan's comments did not announce a final decision on a run for the Speakership, but Ryan's views on what it would take for the next Speaker to be successful.

The Ways and Means Committee chairman has been under pressure to run for Speaker for more than a week after the surprise decision by House Majority Leader Kevin McCarthy (R-Calif.) to bow out of the race to succeed Speaker John Boehner (R-Ohio).

After Ryan spoke with his conference, there were some signs of members rallying around him.

House Oversight Committee Chairman Jason Chaffetz (R-Utah), who had launched a bid for the Speakership against McCarthy, said he would end his pursuit given Ryan's willingness to serve.

"I'm out, and all in for Paul Ryan," Chaffetz said.

Rep. Charlie Dent (R-Pa.), who chairs the centrist Tuesday Group, indicated he and other centrists could endorse Ryan following a discussion amongst themselves this week.

"I could very easily support Paul Ryan," Dent said.

But Rep. Matt Salmon (R-Ariz.), a founding member of the conservative House Freedom Caucus, said he wasn't sure if he could back Ryan.

Rep. Paul Ryan Will Run For House Speaker If GOP Factions Endorse Him

By Paul Singer

[USA Today](#), October 21, 2015

House Ways and Means Chairman Paul Ryan indicated Tuesday that he would "be all in" to run for speaker of the House – provided that he gets endorsement of all GOP factions.

The conditional decision still leaves some doubt as to whether Ryan, who is widely respected among House Republicans, will succeed Speaker John Boehner, R-Ohio, when he steps down at the end of the month.

"If the members agree with (Ryan's) requests and share his vision, and if he is a unity candidate — with the endorsement of all the conference's major caucuses — then he will serve as speaker. He will be all in," said Brendan Buck, the communications director for the House Ways and Means Committee, which Ryan chairs.

Buck said that Ryan expects to hear back by Friday from GOP members on whether they support his candidacy as a "unifying figure."

Ryan "believes that for the next speaker to be successful, we need to unify now. Unless the speaker is a unifying figure across the conference, he or she will face the same challenges that have beset our current leadership," Buck said.

Boehner is stepping down in part because a group of about 40 House conservatives threatened to call a no-confidence vote on his speakership. While Boehner said he was certain he would win the vote, he instead announced he would retire at the end of October, to spare his members having to cast that difficult vote.

House Majority Leader Kevin McCarthy, R-Calif., was heavily favored to succeed Boehner, but he withdrew Oct. 8 when it became clear that the conservative wing — represented by the House Freedom Caucus — would not support him.

The full House votes for the speaker, so the Republican nominee would need the votes of 218 members to be elected. There are 247 House Republicans, but 30 dissenters could have been enough to deny McCarthy the gavel.

The Freedom Caucus has said that before they will support anyone for speaker, they want reforms to House rules that will give them the opportunity to offer more amendments, get more conservative bills on the floor and restore the independence of committee chairmen — changes that would significantly weaken the authority of the new speaker.

Ryan, the 2012 Republican vice presidential nominee, had repeatedly said he didn't want the job when Boehner announced his resignation and when McCarthy decided not to seek the position.

More coverage of House leadership news:

Paul Ryan Says He Will Run For House Speaker If Party Unites Behind Him By Friday

By Lisa Mascaró

[Los Angeles Times](#), October 21, 2015

Rep. Paul Ryan (R-Wis.) told his anxious colleagues Tuesday night that he would agree to run for speaker of the House, but only if the party united behind him by Friday, according to lawmakers and Ryan's aides.

The statement could bring a possible resolution to the GOP leadership struggle that has threatened to further divide the party, but it remains unclear whether conservatives will support him.

House Republicans have been in a stalemate after Speaker John A. Boehner announced he would step down and a conservative faction led by the House Freedom Caucus blocked the rise of Majority Leader Kevin McCarthy of California.

Ryan, a former vice presidential nominee, is considered the Republican Party's best hope for uniting its divided House majority. But he had expressed reluctance at taking the difficult job without unanimous support.

House Republicans returned to Washington late Tuesday evening and almost immediately gathered behind closed doors in the Capitol basement to assess the situation after a recess week away.

At that meeting, Ryan said he would be "willing to serve" if the three main GOP caucuses unite around him. He also had other conditions, including that he not be required to travel as much as Boehner had so Ryan could spend time with his family

"Chairman Ryan encouraged the members to discuss and consider his requests, and he asked that they make clear whether they support them by this Friday," according to a statement by Brendan Buck, a Ryan spokesman. "If the members agree with his requests and share his vision, and if he is a unity candidate — with the endorsement of all the conference's major caucuses — then he will serve as speaker. He will be all in."

"We have white smoke," said Rep. Steve Womack (R-Ark.) as he left the closed meeting.

"He really laid out a vision... selling conservatism," said Rep. Marlin Stutzman (R-Ind.) a member of the House Freedom Caucus. Stutzman had previously backed another candidate for speaker but said he was impressed by Ryan's approach. "Paul Ryan was very clear it's going to be all or nothing."

For more than a week, Ryan had been in a political standoff with the House Freedom Caucus, a core block of conservatives who wanted changes to House rules in exchange for their support.

The caucus has enough votes to block Ryan from reaching the speaker's gavel. But he has refused to yield to its demands to loosen control over legislative proceedings.

The leadership drama has taken a toll on Americans' views of the GOP majority in Congress, according to new polling.

Six in 10 Americans see the leadership battle as a "sign of dysfunction" among House Republicans, and 29% see it as a "healthy debate," according to an ABC News/Washington Post poll. Among Republicans, more than 40% view it as a sign of dysfunction.

The leadership struggle has stymied the fall agenda and is complicating the next must-pass item: legislation to raise the federal debt limit to continue paying the nation's bills and avoid a credit default. The Treasury Department has set a Nov. 3 deadline.

Senate Majority Leader Mitch McConnell (R-Ky.) sought to shield his chamber from the disarray across the Capitol, suggesting that Senate Republicans remain focused on a "right-of-center agenda" even with the partisan divide posed by a Democratic president in the White House.

"You have to deal with the government you have," McConnell said. "We're here in the Senate to do serious things for the American people."

Ryan, the Wisconsin Republican, received a partial endorsement Tuesday from one unlikely source, Sen. Harry Reid (D-Nev.), the minority leader, but such a nod might hurt more than it helps.

"He appears to be one of the few people over there who would be reasonable," Reid said. "I mean look at some of the other people."

Reid added that he's no fan of Ryan's ideology or his proposals for cutting Medicare and other safety net programs, and shrugged when asked if his backing could doom Ryan's candidacy.

"I speak the truth," Reid said. "If it helps him, fine. If it doesn't, too bad."

Boehner, who had hoped to retire Oct. 30 from representing his Ohio district, has said he would remain in office until a new speaker is chosen.

Ryan Willing To Run For U.S. House Speaker As 'Unity' Candidate

By Terrence Dopp

[Bloomberg Politics](#), October 20, 2015

Representative Paul Ryan said he'd be willing to run for speaker of the U.S. House if Republicans unify behind him now, end leadership crises and let him continue spending time with his family.

"If you can agree to these requests and if I can truly be a unifying figure, then I will gladly serve," Ryan, 45, of Wisconsin said Tuesday he told fellow House Republicans in a closed-door meeting. "This is not a job I've ever wanted," he told reporters, but added that he "came to the conclusion that this is a very dire moment."

Ryan said he wants an answer from fellow Republicans by the end of the week. "It's in their hands," he said.

Representative Greg Walden, an Oregon Republican, said Ryan told fellow Republicans he wanted to change the process for dissatisfied lawmakers to remove the speaker. "The question is whether the conference is willing to unify behind him," said Walden.

"He said he's willing to take arrows in the chest," said Representative Peter King of New York, "but not in the back."

House Speaker John Boehner plans to announce a date Wednesday for Republicans' vote to nominate a speaker candidate, said Representative Tom Cole of Oklahoma.

Representative Charlie Dent of Pennsylvania said Ryan wants backing from three groups of House Republicans – the centrist Tuesday Group, the conservative Republican Study Committee and the more hard-line Freedom Caucus.

Ryan's stance, after a week of pondering fellow Republicans' pleas to run, leaves the House leadership unresolved just two weeks before the Nov. 3 deadline to raise the U.S. debt limit. The House Freedom Caucus drove Boehner to resign and his top

lieutenant to quit the race to succeed him. At least two members of that group said Tuesday they wouldn't commit to supporting Ryan.

House Republicans have been in chaos over the speaker's position – second in line to the presidency – as Congress nears the Nov. 3 deadline to raise the U.S. debt limit or risk default. Lawmakers also need to replenish the federal highway fund by Oct. 29. Then they must resolve disputes over federal spending by Dec. 11 or risk a government shutdown, something Boehner couldn't head off in 2013.

Ryan is viewed by many as a unifying force after negotiating a two-year budget deal with Democrats in 2013. Boehner implored him to run for speaker, as did Mitt Romney, who chose Ryan as his vice presidential nominee in 2012. Still, some members of the Freedom Caucus have said he is too willing to compromise.

A number of Republicans began pressuring Ryan to seek the job after Majority Leader Kevin McCarthy's stunning Oct. 8 withdrawal from the race to succeed Boehner. Ryan, 45, of Wisconsin is chairman of the House Ways and Means Committee and the party's 2012 vice presidential nominee.

Ryan had been deeply resistant to the idea of seeking the speaker's job, people who have spoken to him said, and his staff repeatedly said he didn't want the post. He said he didn't want to spend weekends away from his family for the extensive travel and fundraising that have been a major part of the House speaker's job.

The Boehner for Speaker political action committee raised \$35.38 million during the 2014 campaign in a grueling night-and-weekend pace that took him from Florida to Alaska. Almost all of the money was passed on to other House candidates. Boehner has already traveled to more than 100 events this year, according to his fundraising operation.

Tax Overhaul
Ryan also has longed to pursue a comprehensive tax-overhaul bill as Ways and Means chairman.

Known to be interested in running for president, Ryan has spurned past attempts to lure him to the speakership because it's viewed as a political dead end. James K. Polk is the only House speaker ever to ascend to the presidency, and that was 170 years ago.

According to House procedure, Republicans would choose their speaker nominee at a closed-door meeting. Then the full House would schedule a vote, with almost all Democrats expected to support Minority Leader Nancy Pelosi of California. The winner must be backed by a majority of those who vote; lawmakers who designate themselves as "present" wouldn't count.

Members of the Freedom Caucus – a group of almost 40 conservatives whose resistance to Boehner and McCarthy helped push them out – have said that Ryan would have to work for their votes.

A group of Freedom Caucus members met with Ryan Tuesday, and afterward caucus leader Justin Amash of Michigan said afterward the group still supports its candidate for speaker, Representative Daniel Webster of Florida.

Another caucus member, Mo Brooks of Alabama, said he wouldn't commit to support Ryan and wanted to hear from constituents. He said he was concerned about Ryan's stance on immigration.

Harry Reid
While House Democrats have said they would stay out of the Republican leadership battle, Senate Minority Leader Harry Reid, a Nevada Democrat, said he hoped Ryan would become speaker.

"He appears to me to be one of the people over there that would be reasonable," Reid told reporters. "Of all those people I hope he gets it."

Even as Ryan has pursued many Republican goals – including cutting business tax rates, repealing the estate tax and replacing Obamacare – he also has supported allowing 11 million undocumented immigrants to eventually become U.S. citizens, a stance strongly opposed by most House Republicans.

Freedom Caucus members chose Webster as their candidate for speaker on Oct. 7, and the following day McCarthy dropped out of the race saying he wasn't the right person to unite the Republican members.

Boehner of Ohio announced Sept. 25 that he would leave Congress by the end of October, following years of clashes with conservatives who most recently threatened to shut down the government in an effort to defund Planned Parenthood. After McCarthy dropped out of the race, Boehner said he would stay on until a new speaker is chosen.

Paul Ryan Says He Would Serve As House Speaker

By Craig Gilbert

[Milwaukee Journal Sentinel](#), October 21, 2015

Washington — Emerging from days of silence, Wisconsin Republican Paul Ryan said Tuesday he would serve as House speaker if his GOP colleagues unite behind him.

To colleagues pleading with him to run and spare the party an ongoing leadership crisis, Ryan offered a "conditional" yes, saying he would accept the job on his own terms.

At a news conference Tuesday night, Ryan said once more that he has never wanted to be speaker and would serve with reluctance.

He also said he felt an obligation to step up.

"This is not a job I've ever wanted or ever sought. I'm in the job I've always wanted here in the Congress," he said, referring to his chairmanship of the powerful Ways and Means committee. "I came to the conclusion that this is a very dire moment, not just for Congress, not just for the Republican Party, but for our country."

Ryan said he laid out to his colleagues the conditions under which he would serve. Among them, that the party take steps to avoid "constant leadership challenges and crises," that the conference "unify now and not after a divisive speaker's election" and that "I cannot and will not give up my family time."

Speaking to GOP colleagues behind closed doors earlier Tuesday evening, Ryan said he would need the backing of all the major factions within the Republican caucus, including the conservative Freedom Caucus that set the party's leadership crisis into motion.

With Ryan demanding a clear mandate from his party, the big question remaining is whether the 40-member Freedom Caucus agrees to support him without making demands of their own.

Ryan said he would make a final decision by Friday.

"What I told members is if you can agree to these requests and if I can truly be a unifying figure, than I will gladly serve. And if I'm not unifying, that will be fine as well. I will be happy to stay where I am at the Ways and Means committee," Ryan told reporters. "I have left this decision in their hands."

Wisconsin colleague Jim Sensenbrenner (R-Wis.) described Ryan's remarks to GOP colleagues Tuesday as a "plea for unity."

Said Sensenbrenner: "He called on everybody to give something from where they've been in the past."

At his news conference, Ryan combined an appeal to conservative principles with a call for less political feuding and finger pointing.

"Now more than ever we must work together. All of us are representatives of the people — all people. And yet the people we serve, they do not feel we are delivering on the job that they hired us to do. We have become the problem. ... I want us to become the solution," he said. "Nothing is ever solved by blaming people. We can blame the president, we can blame the media ... we can point figures across the aisle, we can blame each other and we can dismiss our critics and criticism as unfair. People don't care about blame. People don't care about effort. People care about results."

The Ways and Means chairmanship is a career-long ambition of Ryan's that he realized less than a year ago, and a platform for his policy dreams of overhauling the tax code and federal entitlements.

"It's why I've passed on Senate races and other things (like) leadership. I always believed the chairmanship of Ways and Means was the right place for me," Ryan told the Journal Sentinel in January when he announced his decision not to run for president in 2016. "Now that I have it, I'm very happy with where I am."

Besides his own reluctance, another major hurdle for Ryan's speakership is an organized minority of conservatives in the House — known as the Freedom Caucus. That group wants concessions from the next speaker over rules and procedures that would give it more say.

An analysis by the Pew Research Center of 36 members of the Freedom Caucus found they are not only more conservative but less experienced than House Republicans as a whole; more than 70% entered office since the 2010 elections.

Leaders of the Freedom Caucus have said they're open to a Ryan speakership but won't renounce a list of demands that may be unacceptable to Ryan.

House Republicans, meanwhile, face a series of potentially divisive battles this fall over raising the debt ceiling, funding the government and the future of the Export-Import Bank.

In a national poll of GOP primary voters released Monday by NBC News and The Wall Street Journal, 63% said they'd be "comfortable and positive" about a Ryan speakership, while 28% said they would be "skeptical and uncertain."

Ryan Will Serve As Speaker If GOP Unites Behind Him

By Jake Sherman , John Bresnahan And Lauren French

[Politico](#), October 20, 2015

Wisconsin Rep. Paul Ryan, who for years has resisted a move into House Republican leadership, said Tuesday night he would serve as House speaker if he is the party's "unity candidate."

And Ryan, the Ways and Means chairman, wants to know by Friday if the 247 members of the House Republican Conference support him. If not, he is "happy" to continue as chairman of the powerful tax-writing panel, his spokesman said.

During a meeting of House Republicans Tuesday evening, Speaker John Boehner (R-Ohio), who counted Ryan as a volunteer on his 1990 congressional campaign, ceded the floor to Ryan. The 16-year veteran of Congress explained that his openness to serving as House speaker comes with serious caveats.

Ryan explained during the closed-door gathering that he wants support from all the major Republican caucuses. The House Freedom Caucus, the Republican Study Committee and the moderate Tuesday Group will be especially important.

Ryan also wants Republicans to alter the procedure for “vacating the chair,” which is essentially a referendum to remove the speaker from office. Conservatives threatened to force such a vote against Boehner earlier this summer, and Ryan believes it’s destructive.

The Wisconsin Republican is calling on the next speaker to be more visionary. He agreed with House Freedom Caucus members and a large bloc of the GOP in supporting changes to rules and procedures to empower rank-and-file members. But he said those decisions must be made together. Ryan also told his colleagues that he needs to be at home in Janesville, Wisconsin, with his family, so fundraising cannot be all consuming.

“I don’t know of anyone better to do it,” said Rep. Jason Chaffetz of Utah, who dropped his long-shot bid for the speakership when Ryan announced. “I think he wants to get as unified a group as possible, so that’s obviously a big question. He wanted to talk to all the various caucuses and groups. ...and I’m excited. He would be wonderful, fantastic as a speaker. I think the smart path for us is to unify behind Paul Ryan.”

The move could put major pressure on the Freedom Caucus, which endorsed Rep. Daniel Webster (R-Fla.) before House Majority Leader Kevin McCarthy (R-Calif.) dropped his bid. Members of the Republican Study Committee and Tuesday Group have already showered praise on Ryan, but members of the Freedom Caucus aren’t quite ready yet to endorse him.

Ryan met with four of the group’s leaders today: Ohio Rep. Jim Jordan, South Carolina Rep. Mick Mulvaney, Idaho Rep. Raul Labrador and North Carolina Rep. Mark Meadows.

Rep. Matt Salmon (R-Ariz.), a Freedom Caucus member, said Ryan made “some very reasonable observations about how anybody would need the support of the entire conference if they are going to be a successful speaker.” Salmon said he wasn’t supporting him yet, but is “certainly open.”

“All things are possible,” Salmon said. “I think the issue of process reforms are going to have to be addressed one way or another before the Freedom Caucus wholesale jumps in bed with him.”

Boehner resigned late last month and is set to leave Congress on Oct. 30, though he’s agreed to stay on until a new speaker is chosen.

Ryan Willing To Serve As Speaker, But With Conditions

By Manu Raju, Deirdre Walsh, Ted Barrett And Tal Kopan

[CNN](#), October 21, 2015

Washington (CNN)Rep. Paul Ryan told House Republicans he is willing to serve as speaker and will make a decision within the week.

But he’ll run only if he’s supported by three groups inside the House Republican conference: the House Freedom Caucus, the Republican Study Committee and the moderate Tuesday Group, his spokesman, Brendan Buck, confirmed.

Ryan also had a few more demands: He wants changes to House rules made as a team; he wants to make it harder to overthrow a sitting speaker; and he wants a better work-life balance than Boehner had as a prolific fundraiser.

“If the members agree with his requests and share his vision, and if he is a unity candidate – with the endorsement of all the conference’s major caucuses – then he will serve as speaker. He will be all in,” Buck said.

Ryan spent the day engaging in a flurry of back-channel conversations with GOP lawmakers as an anxious Republican Party eagerly awaits his decision. He discussed the possibility of seeking the speakership on the phone with fellow lawmakers and met with members of the House Freedom Caucus and the Southern Caucus. Ryan addressed his deliberations with the full GOP conference during a closed-door dinner.

Ryan was expected to address reporters Tuesday night from the House Gallery. Earlier Tuesday, he played coy with reporters, telling them he has “nothing to add.”

“Anybody who wants to meet with me, I’m going to do that,” Ryan said.

It was all part of a strategic effort to show that he was not running for speaker – but was open to being drafted, his allies said.

Outgoing House Speaker John Boehner expressed confidence on Fox News’ “Special Report” that Ryan would announce his decision later Tuesday night and will set a new date for leadership elections in the next few days.

“I hope he does decide to run, and if he does, I think he’ll be elected,” Boehner said.

Asked about Boehner’s comments, Buck said the GOP’s 2012 vice presidential nominee was unlikely to make a decision Tuesday evening. If Ryan passes on the job, Republicans are growing nervous that there is no one else who could unite a fractured party.

"It worries me a lot," Sen. John McCain, R-Arizona, told CNN. "Because a leaderless House of Representatives is not something that is conducive to legislative successes – and it diminishes us even more in the esteem of the American people."

Returning to his office from the airport, Ryan was mum on what he would do.

"Good to see you," he told reporters waiting outside his office. But on both sides of the Capitol, the prospects of a Ryan speakership began to dominate the conversation – particularly as congressional leaders struggle to reach a fiscal deal by a critical November 3 deadline.

'Let the House work its will'

Conservatives in the House Freedom Caucus are signaling that Ryan will need to work to get its support, something the Wisconsin Republican has shown little interest in doing.

The caucus tweeted Tuesday night that "The next speaker must follow House rules and commit to an open process for debating and amending legislation. Let the House work its will."

"I have concerns with anybody who is not going to give us a reform agenda," said Rep. Raul Labrador, R-Idaho. "If anybody thinks we are just going to get behind somebody just because they have a national name, they are sadly mistaken."

Ryan met in his committee's offices with conservative members for about 45 minutes. Rep. Justin Amash, a leader of the conservative group, said it was an "informal" gathering and not an extensive discussion. And Rep. Mark Meadows of North Carolina said they discussed "party unity" and how the caucus could get behind him. Meadows said he'd "bet (Ryan) throws his hat in the ring."

But Kansas Rep. Tim Huelskamp said the caucus was still supporting Rep. Daniel Webster, who reiterated on Tuesday he would run for the speakership regardless of what Ryan decides.

"We can't have just another John Boehner 2.0," Huelskamp said.

Ryan did, however, pick up an unlikely supporter Tuesday in Senate Minority Leader Harry Reid, D-Nevada, who said a Ryan speakership would improve prospects over raising the debt ceiling.

"Well he appears to me to be one of the people over there that would be reasonable," Reid said. "I mean, look at some of the other people. I'm a Paul Ryan fan."

Asked about Reid's endorsement by reporters later, Ryan simply laughed.

Senate GOP leaders said that Ryan's deliberations had put their decisions on how to move forward on debt limit talks on hold – and that the House GOP needed to figure out its leadership dilemma within the next 24 hours in order to help come to some kind of consensus on debt talks.

"It will probably become more clear when the House determines who the leader is going to be over there," said Sen. John Thune, R-South Dakota, when asked about the next steps on the fiscal matters.

If Ryan passes on a bid, upwards of a dozen potential candidates could run for the speakership, something that could take weeks to sort out and presumably leave Boehner in the speaker's chair past his plans to resign on October 30.

To right their ship after a rocky few weeks following Boehner's resignation announcement, Republicans have scheduled three meetings in two days where they will talk about the way forward – including one to discuss imposing new party rules to give more power to junior lawmakers.

The Ryan Stakes

He can lead, but will enough Republicans follow?

Ryan To Meet With House Hard-Liners As He Weighs Run For Speaker

[Bloomberg Politics](#), October 20, 2015

Representative Paul Ryan is set to meet with a group of House conservatives Tuesday as he weighs a potential run to replace Speaker John Boehner under pressure from fellow Republicans.

The Wisconsin Republican will get together with the House Freedom Caucus, a group of almost 40 hard-liners whose opposition to Boehner drove him to announce that he would give up the speakership and leave Congress. Ryan, Boehner and all House Republicans will then meet behind closed doors later Tuesday evening to discuss plans for the coming weeks.

Ryan spokesman Brendan Buck said the lawmaker plans to meet with members of the Freedom Caucus at their request. Ryan is "always willing to talk with his colleagues," the spokesman said.

The turmoil over leadership has left the Republican majority without a fiscal strategy two weeks before a Nov. 3 deadline to raise the federal debt limit. Lawmakers also need to replenish the federal highway fund by Oct. 29. Then they must resolve

disputes over federal spending by Dec. 11 or risk a government shutdown, something Boehner couldn't head off in 2013. Ryan Reluctance

There was no immediate comment from Freedom Caucus leaders. The group also played a big role in the decision by Boehner's top lieutenant, Majority Leader Kevin McCarthy of California, to drop out of consideration for speaker. Freedom Caucus members chose Representative Daniel Webster of Florida as their candidate on Oct. 7. The following day, McCarthy dropped out of the race saying the conference needed to find a candidate who could unify the party.

Buck said in an e-mailed statement that he didn't expect Ryan to announce on Tuesday whether he will seek the speaker's job. Ryan, the chairman of the House Ways and Means Committee, initially said he didn't want to run for speaker but has been urged by many fellow Republicans to reconsider.

Buck said that if Ryan is asked to speak during the Republican conference meeting, "I imagine he'd share his thoughts."

Harry Reid Hopes Paul Ryan Becomes House Speaker

[Huffington Post](#), October 20, 2015

WASHINGTON – Senate Minority Leader Harry Reid (D-Nev.) says if he had his way, he'd pick Rep. Paul Ryan (R-Wis.) to be the next speaker of the House.

"I'm a Paul Ryan fan," Reid told reporters.

"He appears to be one of the people over there that could be reasonable. I mean, look at some of the other people," the minority leader continued. "I don't agree with him on much of what he does. I think what he's done with Medicare and Medicaid, what he wants to do with it, I disagree with. But generally speaking, I think we've been able to work with him."

House Republicans have been scrambling to find someone to be their next speaker after Majority Leader Kevin McCarthy (R-Calif.) abruptly quit the race earlier this month. A few Republicans have thrown their names into the mix, but they've been drowned out by a groundswell of support for Ryan, who is widely respected in his conference and seen as someone willing to work with Democrats. So far, he's said he's not interested, but given the pressure from GOP leadership and others desperate for someone who can unify the party, people are watching to see whether he changes his mind this week.

Current Speaker John Boehner (R-Ohio) is leaving Congress as soon as Republicans find his replacement.

Reid praised Ryan's past work with Sen. Patty Murray (D-Wash.) to hash out a budget deal in 2013. He said Ryan, who chairs the Ways and Means Committee, could also be key to ensuring that Congress raises the debt limit before Nov. 3, at which point the nation will default on its debt if lawmakers don't act.

Reid's endorsement wouldn't exactly help Ryan if he decides to run and needs support among GOP conservatives. Asked whether he realized his comments could work against Ryan, the Nevada Democrat shrugged.

"I speak the truth," he said.

"If it helps him, fine. If it doesn't, too bad."

What's In Store For Federal Pay And Benefits If Ryan Becomes Speaker? A Likely Hit.

By Joe Davidson

[Washington Post](#), October 21, 2015

As the "will he, won't he" game swirls around Rep. Paul Ryan's decision to be or not to be speaker of the House, one question looms for the federal worker — what does it mean for me?

The answer – a potential hit on your pocketbook.

Unlike so much of what passes for news in Washington, this isn't just speculation. Ryan, a Wisconsin Republican, left an unambiguous record during his four years as chairman of the House Budget Committee.

During that tenure, which ended in January, Ryan led the House in approving legislation that would effectively cut federal employees' pay by forcing them to contribute more toward pensions with no increase in benefits, kill a retirement program for certain government staffers and eliminate student loan reimbursements. In his budget plans for fiscal years 2012 and 2013, Ryan pushed for even longer federal pay freezes than the three-year basic pay freeze initiated by President Obama. Additionally, Ryan repeatedly sought to reduce the number of federal employees through attrition. Feds were saved when many of his proposals were not adopted by the Senate, then controlled by Democrats.

Ryan's votes have earned him failing grades on voting scorecards tabulated by federal employee organizations. In recent tallies, the American Federation of Government Employees scored him zero for failing to agree with the organization's legislative positions a single time. He did a little better with the National Treasury Employees Union, 10 percent, and the National Active and Retired Federal Employees Association (NARFE) with 15 percent.

"Ryan demonstrated a belief that government is the cause of all the woes in this country," said William R. Dougan, president of the National Federation of Federal Employees.

Ryan's fiscal year 2015 budget resolution, nicknamed "The Path to Prosperity" like his other plans, says, "Washington owes the American people a responsible, balanced budget." But prosperity is not what feds would get. To the contrary, Ryan's path would lead to much thinner wallets for these employees.

Federal pay still would be frozen if a provision in Ryan's FY 2012 budget had been enacted. It proposed freezing pay for five years, saying that would "boost private-sector employment by slowing the explosive growth of the public sector."

His FY 2015 plan proposed to "increase the share of federal retirement benefits funded by the employee. This policy has the effect of reducing the personnel costs for the employing agency." But it would have increased costs to the personnel by an estimated 5.5 percentage points of their salaries. Employees would pay more, but get no more. That would amount to an effective pay cut.

[House approves budget that would save money by taking from federal workers]

Rep. Chris Van Hollen (Md.), who sat next to Ryan as the top Democrat on the Budget Committee, at the time called this "a straight-out 5 percent pay cut."

While couched in the language of "reform," House Republicans under Ryan would have ended a supplemental benefit for workers in the Federal Employee Retirement System who retired before age 62, when their Social Security eligibility begins. Ryan favors placing new feds in a "defined-contribution" retirement system, which puts greater onus on employees than a "define benefit" system. These moves would save the government \$125 billion over 10 years, says his fiscal year 2015 plan. Left unsaid, that money would be a cost, not a savings, to federal workers.

Budget committee Democrats pushed back with an analysis that placed the cuts in a broader context. "After successive pay-freezes, pay reductions and benefit cuts amounting to almost \$140 billion, no one group has been asked to contribute more to deficit reduction than federal employees," the report said.

Looking for another way to save Uncle Sam money, Ryan also proposed ditching the student loan reimbursement federal agencies offer their staffers.

[More federal employees getting help from Uncle Sam to pay off college debt]

Almost 8,500 federal employees surely must be glad that proposal had not taken effect in calendar 2014 when they received \$58.7 million in student loan repayments. That's an average of \$6,905 per worker. Despite Ryan's wishes, the repayment program is growing. Compared to 2013, the number of employees getting this benefit increased by 15 percent in 2014 and the amount reimbursed rose by 11 percent, according to a recent Office of Personnel Management report.

"Several Federal agencies utilized student loan repayments to recruit and retain employees in Federal Science, Technology, Engineering, and Mathematics (STEM) positions..." Beth Cobert, the acting OPM director, wrote in the report. "Notably, the Department of Defense provided student loan repayments to over 550 engineers...Employees in STEM career fields are vital to the Federal Government's mission, and OPM is committed to continue working with agencies to help them attract and retain talented professionals using student loan repayments and other human resources management flexibilities."

There might have been fewer talented employees across the federal service if Ryan's plan to reduce the workforce through attrition and proposals to cut pay and benefits had become law. Ryan, working with a Senate now controlled by Republicans, would have an even greater pulpit to proselytize his Path to Prosperity as speaker.

Jessica Klement, NARFE's legislative director, is not certain what a Speaker Ryan would mean for the federal workforce. But "based on his voting record," she said, "I'm not optimistic."

Paying for egg donations

By The Editorial Board

[New York Times](#), October 21, 2015

Should a woman who donates eggs to help people with fertility problems conceive a child be able to charge as much as she can get in a free-market transaction? Or are there ethical reasons to limit her reimbursement?

That is the issue raised in a federal lawsuit that accuses two professional societies and the fertility clinics associated with them of illegal price-fixing that limits donor compensation. A federal judge in northern California has ruled that the claim can move forward and certified it as a class action, which could go to trial next year.

Guidelines issued by the American Society for Reproductive Medicine and the Society for Assisted Reproductive Technology suggest that paying a woman more than \$10,000 for her eggs is "beyond what is appropriate" and even paying \$5,000 or more requires "justification."

A vast majority of the nation's fertility clinics follow these the guidelines. The stated rationale behind them is to avoid offering so much money that donors, especially those who are often young and poor, will rush to contribute their eggs without considering the risks.

This payment system is unfair. However well-intentioned, it favors the fertility clinics, which can keep more for themselves if they pay donors less, as well as the women who pay for fertility treatments. Meanwhile, it shortchanges the egg donors, whose wishes are ignored in the equation. And if there are indeed risks, they can be addressed and mitigated by the clinics and the doctors, who can strengthen their screening and counseling procedures and provide more information.

The money that donors get is meant to compensate them for physical and psychological tests; weeks of hormone injections to stimulate egg production; frequent tests and ultrasound examinations to track the developing eggs; repeated visits to the doctor, and minor surgery to remove the eggs when they are ready for retrieval.

First-time donors in California, New York and Chicago are paid \$4,000 to \$7,000, according to lawyers, donors and agencies. In medically expensive New York City, major hospitals and clinics pay \$8,000. The amount can rise significantly for repeat donors whose first set of eggs led to a birth. All bets are off at some high-end clinics that pay particularly attractive donors, such as actresses, models, or high-scoring Ivy League students, tens of thousands of dollars or, in rare cases, even in the six-figure range.

The very existence of these high-end payments suggests that the guidelines are something of a sham. The women who brought the suit say they were underpaid for their donations; they seek triple damages, to be determined later. The question of damages aside, there is merit to their argument that they have been denied a rightful say in the transaction.

A Middle-Class Oasis In New York Is Spared

By The Editorial Board

[New York Times](#), October 21, 2015

The extinction of middle-class New York, which has long been predicted but never quite arrived, has just been put off a little longer. Mayor Bill de Blasio's administration has struck an impressive deal to save Stuyvesant Town-Peter Cooper Village, the 80-acre complex that has long been a bastion of affordable housing on the East Side of Manhattan.

About half of it, anyway. The administration announced Tuesday that Stuyvesant Town, owned by CW Capital, was being sold to a Wall Street investment firm, the Blackstone Group, for \$5.3 billion, and that the buyer had agreed to keep 5,000 of the complex's 11,232 rental apartments affordable to middle-class families for 20 years.

Stuyvesant Town is a colossal property, a city-within-a-city that was built for World War II veterans, and it has been an oasis of stability and affordability for 65 years. But the oasis has been drying up. The complex, Manhattan's largest, has been losing 300 to 350 rent-regulated apartments every year, as tenants have died or moved away and management has raised rents for newcomers. Mr. de Blasio, who has staked his mayoralty on building or saving 200,000 units of affordable housing in a decade, could hardly achieve victory in that campaign while losing Stuyvesant Town.

The Blackstone deal represents Deputy Mayor Alicia Glen's effort to stop the affordability erosion. For a relatively modest price — the city is waiving \$77 million in mortgage recording taxes and giving Blackstone a \$144 million low-interest loan — all 5,000 apartments that have not yet been lost to ballooning market rates will remain in reach for middle-class families.

The praise for this deal rests on some assumptions. Mainly, a somewhat generous definition of "affordable." As Charles Bagli explained in *The Times*, a family of three making up to \$128,210 a year would pay \$3,205 a month for a two-bedroom apartment. For 500 of the apartments, rents would be lower: about \$1,553 for a two-bedroom for a family of three earning up to \$62,150 a year. This is not low-income housing, for sure. But these rents would allow a two-income couple — a teacher and a city worker, say — to afford an apartment in Manhattan bigger than a tanning bed.

Mr. de Blasio has always said that "affordable housing" should cover a wide range of incomes. He has been criticized by those who say he should focus most intently on helping the poor and working class. But it takes many strata to make a mountain, and New York's affordability crisis weighs heavily on pretty much everybody who is not in the top 1 percent.

Another, more pressing concern is the time frame — 20 years can be like the blink of an eye in the life of a family. Permanency is the greatest challenge and pitfall of affordable-housing schemes: tax breaks lapse; people move out and in; the rent always pushes upward. The Blackstone plan kicks the can down the road and around the corner a ways; it's hard to know how or whether it might go sour, but for now it looks like as good a deal as the administration could have struck, given the city's vexingly insatiable housing demand.

Stuyvesant Town was on the brink of becoming a high-end dormitory for young, upwardly mobile professionals on their way to bigger incomes and fancier digs. Now, for a couple of decades anyway, life will be more secure for about 13,000 people who are more interested in putting down and keeping roots in the city they call home.

Iran Steps Up Its Aggressions In The Region

[Washington Post](#), October 21, 2015

AS THEY concluded the nuclear deal with Iran in July, President Obama and Secretary of State John F. Kerry repeatedly suggested that it could open the way to cooperation with Tehran in resolving regional conflicts, beginning with the civil war in Syria. They also promised the United States would push back if Iran instead stepped up its aggression. Just three months later, Iran's most notorious general is overseeing a new offensive by thousands of Iranian, Iraqi and Lebanese fighters aimed at recapturing the Syrian city of Aleppo from rebel forces, including some backed by the United States. Mr. Obama shows no sign of responding.

The Iranian-led offensive, which is supported by Russian air power, appears to be the most aggressive intervention yet by Iran in the Syrian war. The Post reported that hundreds of troops from the elite Quds Force had been joined by thousands of Iraqi Shiite militiamen and forces from Lebanon's Hezbollah, all under the command of Maj. Gen. Qasem Soleimani, who previously directed attacks on U.S. forces in Iraq. Far from accepting appeals from Mr. Obama and Mr. Kerry to help broker a diplomatic settlement, Iran has joined with Russia to entrench the regime of Syrian President Bashar al-Assad and help it to recapture Aleppo and other parts of the country.

The attack is one of several provocative steps Tehran has taken as the nuclear deal has begun to come into effect. The same day the accord was debated by its parliament this month, the regime test-fired a nuclear-capable missile, violating a U.N. Security Council resolution. The White House acknowledged the infraction but pointed out that it was outside the bounds of the nuclear agreement.

Also that day, Iranian television reported that The Post's Jason Rezaian had been convicted on espionage charges after a closed trial. The administration condemned the verdict.

On Sunday, the United States and its European partners began taking steps to implement the nuclear accord. Much is now required of Iran: It must place 12,000 centrifuges into storage, ship 12 tons of enriched uranium out of the country and demolish the core of a plutonium reactor before it can receive the more than \$100 billion in assets frozen under sanctions. It could be that the missile test and unjust conviction of Mr. Rezaian are the regime's demonstration that its nuclear concessions will not change its hostile stance toward the West or its military ambitions. If so, it is a cruel tactic that uses Mr. Rezaian, a professional journalist and American citizen, as a human pawn.

But the Syrian offensive is certainly more than message-sending. If successful, it could eliminate the chance to construct a moderate, secular alternative to the Assad regime, and send hundreds of thousands more refugees across Syria's borders. It was just such aggression that Mr. Obama acknowledged might be a byproduct of the nuclear deal — and that he vowed to resist. If he remains passive as Maj. Gen. Soleimani's forces press forward, both Iranian and U.S. allies across the Middle East will conclude that there will be no U.S. check on an Iranian push for regional hegemony.

The CDC's Promising Plan To Curb America's Opioid Dependence

[Washington Post](#), October 21, 2015

HORRIFIC AS it is for the victims, drug addiction's impact reverberates beyond them, to include families, friends, whole communities. Thanks to a new Washington Post-University of Maryland poll, we can begin to quantify those wider consequences in our area. Nearly 3 in 10 Marylanders say they have a close friend or family member who was or is addicted to opiates such as prescription pain pills or heroin. The figures range from 4 in 10 in Baltimore to 1 in 6 in Montgomery County; but whether in the city or the suburbs, these numbers are far too high and fully warrant Gov. Larry Hogan's (R) promise to focus on the problem.

More treatment is necessary, as is prevention; yet preventing opioid addiction has been devilishly difficult due to the fact that people's first contact with the drugs often comes not through illicit channels but in a doctor's office, where they are prescribed opioids by a licensed physician who, in turn, had been told that medications such as OxyContin or Vicodin convey powerful relief with little or no addiction risk. In 2012, providers wrote 259 million prescriptions for opioids, enough for every American adult to have a bottle of pills. Opioid sales increased 300 percent since 1999. Almost 2 million people abused these drugs in 2013, and more than 16,000 died from overdoses.

Now the Centers for Disease Control and Prevention (the source of these data) has a plan that could make a major dent in the overprescription of opioids. The CDC is preparing opioid prescribing guidelines for primary-care physicians — the first of their kind from a federal agency. The guidelines are not finished, but early indications are that they will urge physicians to discuss risks with patients, pursue non-opioid alternatives as "preferred" options and limit initial prescriptions to a three-day supply at "the lowest effective dose." If finalized by the CDC and embraced by doctors, the guidelines promise to turn medical practice in an appropriately more cautious direction.

As is often the case with suggestions to curb pain prescriptions, the CDC's proposals are being met with opposition: some from people concerned about the impact on patients, some from a pharmaceutical industry concerned about the impact on profits. The American Cancer Society's lobbying arm has urged the CDC to suspend work on its guidelines, arguing in an Oct. 1 letter to the agency that cancer patients could be denied pain relief. Though understandable, these concerns are overstated; the CDC has said publicly its focus is not oncology but primary care, "outside end-of-life care."

It's true, as the cancer society letter notes, that the CDC guidelines are more than mere suggestions and will influence "state health departments, professional licensing bodies or insurers." That is precisely why they can be so beneficial; until now, government, medicine and the private sector have too often underestimated the risks, individual and societal, of widespread opioid prescription. The CDC has the prestige and authority to correct the balance. After incorporating valid comments from the cancer society and other interested parties, the CDC plans to publish in early 2016, and we see no reason to delay.

A Misguided Attack On D.C.'s Needy Students

By Editorial Board

[Washington Post](#), October 21, 2015

IS THE federally funded scholarship program for poor D.C. families being forced on an unwilling city? It is safe to say that thousands of D.C. parents whose children are on the waiting list for a scholarship do not think so. Nor, we would venture, do the 6,100 children, predominantly minorities, who have used the scholarships to attend private schools. For that matter, students in the city's public schools who have benefited from the infusion of federal dollars that has accompanied the voucher program probably would not embrace the argument either.

So whom do members of the D.C. Council think they are helping as they urge Congress to kill this program?

Fortunately, it does not appear that the council members will succeed in inflicting this wound on their city. Congress appears poised to reauthorize the D.C. Opportunity Scholarship Program, which provides needy students with up to \$12,572 to pay for tuition, fees and transportation to a school of their choice. The average family income for participating families is less than \$22,000. A bill extending the program for five years and championed by outgoing House Speaker John A. Boehner (R-Ohio) is set for a floor vote Wednesday, while a bipartisan group of senators has filed a companion bill that would continue the program through 2025.

Seeking to derail those efforts, a misguided majority of the D.C. Council, undoubtedly egged on by Del. Eleanor Holmes Norton (D-D.C.) and other voucher critics, wrote a letter to Congress objecting to what they portrayed as an intrusion into local affairs. These eight council members seemed unaware that the program was established in 2004 at the initiation of Anthony Williams (D), then D.C.'s mayor, and with the strong support of Kevin Chavous (D), then chair of the council's Education Committee. Likewise, they were unmoved by polling that has shown 74 percent of D.C. residents support the voucher program, which, despite the specious claims of critics, has improved outcomes for its students without taking a dime from regular public schools.

Indeed, the three-sector federal approach has brought more than \$600 million to D.C. schools, with traditional public schools receiving \$239 million, charter public schools \$195 million and the voucher program \$183 million. At stake for fiscal 2016 is an additional \$45 million. It is fantasy to think there would be additional monies absent vouchers.

School reform has brought improvement throughout the system. Yet, many parents still lack the choices and the access to high-quality education that city politicians take for granted for their own families. We credit D.C. Council Chairman Phil Mendelson (D) and council members Vincent B. Orange (D-At Large), Mary M. Cheh (D-Ward 3), Brandon T. Todd (D-Ward 4) and Kenyan R. McDuffie (D-Ward 5) for not seeking to deprive those parents of choice, and we hope their eight colleagues will rethink their position and put constituents' welfare over misguided ideology.

[DOI in the News:](#)

INTERIOR FREEZES OFFSHORE ARCTIC LEASING PROGRAM. The [E&E](#) (10/19) reports that the Interior Department “dealt a blow to prospects for long-term oil and gas development in the Arctic region Friday, canceling two offshore lease sales and denying two other lease extensions.” In September, Royal Dutch Shell PLC announced “it was scrapping its Chukchi Sea drilling program and ending exploration offshore in Alaska ‘for the foreseeable future.’” Interior Secretary Sally Jewell said in a statement Friday, “In light of Shell’s announcement, the amount of acreage already under lease and current market conditions, it does not make sense to prepare for lease sales in the Arctic in the next year and a half.”

The [E&E](#) (10/19) reports that “the Obama administration’s decision last week to impose new barriers on oil and gas exploration in the American Arctic is intensifying the heated dispute over federal management of Alaska’s energy-rich lands and waters.” Jewell “angered Alaska officials and oil industry groups when she scrapped the department’s plans to sell oil and gas leases in the Beaufort and Chukchi seas over the next two years.” But “environmental activists applauded the Interior Department’s actions and called on President Obama to ban future oil and gas drilling off Alaska’s northern shores.”

Environmentalists Turn Attention To Atlantic. [Politico](#) (10/19, Stokols, 942K) reports that environmentalists are now turning “their eyes to a new target: A plan to auction oil and gas leases in the Atlantic.” Alex Taurel, Deputy Legislative Director for the League of Conservation voters said, “We are thrilled that the conversation on offshore drilling has begun to shift, and we are hopeful that the administration will next take off the table any potential future lease sales in the Atlantic and the Arctic.”

SAN ANTONIO MISSIONS’ INCLUSION AS WORLD HERITAGE SITE CELEBRATED. The [E&E](#) (10/19) reports that “the San Antonio Missions National Historical Park’s entry to the list of World Heritage sites was celebrated here Saturday with the posting of an inscription marking its designation.” According to the article, “approved by the U.N. Educational, Scientific and Cultural Organization (UNESCO), the new World Heritage site includes five historic churches built by Spanish Catholics beginning in the 1600s and 1700s and the Alamo.” Interior Secretary Sally Jewell noted that “it took nearly a decade of effort by Interior to win the designation for the San Antonio Missions.”

Additional coverage was provided by the [San Antonio \(TX\) Business Journal](#) (10/20, Subscription Publication, 19K) and [WOAI-AM San Antonio \(TX\)](#) San Antonio (10/20, 8K).

SENATORS TO CONSIDER INTERIOR NOMINATIONS. The [E&E](#) (10/19) reports that the Senate Energy and Natural Resources Committee is “set to consider a slate of nominations for senior posts at the departments of Energy and the Interior.” On Tuesday, “senators on the panel will hold a hearing to consider a half-dozen nominees, including many who have held the positions they have been nominated for on an acting basis.” The article notes that “Mary Kendall – an Interior deputy inspector general who has essentially been the acting IG for the department since 2009 – is bound to attract some attention from lawmakers.” Her “nomination has already attracted opposition on Capitol Hill and elsewhere.” Sen. David Vitter has “asked the White House to pick someone new for the job, while Public Employees for Environmental Responsibility wrote to senators last week saying she is not qualified for the position.”

[Bloomberg BNA](#) (10/20, 3K) reports that the nominations of Suzette Kimball to be director of the U.S. Geological Survey and Kristen Sarri to be an assistant Interior secretary for policy, management and budget will also be considered.

Additional coverage was provided by [The Hill](#) (10/19, Cama, 471K).

SAN JUAN NAVAJO OPPOSE BEARS EARS PROPOSAL. The [Deseret \(UT\) News](#) (10/20, 407K) reports that “proponents of a new national monument in southeastern Utah say the proposal involves a unique management approach that will put Native American tribes on an equal playing field with the federal government when it comes to how the land is used.” However, “it’s a plan that does not have the support of tribal members in Utah, who want to keep locals involved with how land sacred to them is managed.” According to the article, “several members of the Navajo tribe who live in San Juan County...don’t believe a monument designation is in their best interest, or the best interest of the county.”

REP. SMITH RAISES CONCERNS WITH MISSOURI GOV. NIXON'S LAND TRANSFER PROPOSAL.

[SEMO Times \(MO\)](#) (10/20) reports that “calling it a ‘clear misuse of funds,’ U.S. Rep. Jason Smith has taken Missouri Gov. Jay Nixon to task over a state proposal to transfer private land to state control in Oregon County.” At issue is a “plan that would allow the state Department of Natural Resources to buy land in Oregon County.” Smith “sent a letter earlier Monday outlining his concerns to U.S. Secretary of the Interior Sally Jewell, U.S. Environmental Protection Agency Administrator Gina McCarthy, Director of the U.S. Fish and Wildlife Service Dan Ashe, U.S. Forest Service Chief Tom Tidwell, and Missouri Department of Natural Resources Director Sara Parker Pauley.”

RENEWAL OF LWCF URGED. In an editorial, the [Casper \(WY\) Star-Tribune](#) (10/20, 115K) calls for the renewal of the Land and Water Conservation Fund. The paper argues that “it’s a worthwhile cause” and notes that “the fund has handed out about \$17 billion in five decades to support the creation of more than 41,000 outdoor recreation projects across the nation, and that impact has been felt right here in Wyoming.” It concludes that “this is too important for our state and our nation. Wyoming’s delegation must make renewing the Land and Water Conservation Fund a priority.”

In an op-ed for the [Charlotte \(NC\) Observer](#) (10/20, 503K), Sen. Richard Burr calls on Congress to “bring the LWCF, and all the conservation projects currently in limbo, back to life.”

In an op-ed for the [Boulder \(CO\) Daily Camera](#) (10/20, 161K), Brad Nicol, a member and habitat watchman for Backcountry Hunters and Anglers, writes that “despite its popularity, bipartisan support and proven effectiveness, Congress has failed to uphold this pillar of America’s sporting heritage and did not include LWCF renewal in the recent budget negotiations.” Nicol warns that “the \$646 billion outdoor recreation industry — along with local economies that depend on the public being able to access and enjoy parks and national public lands — will feel the negative economic impact.” Also, “those sportsmen like myself that depend on quality public hunting and fishing grounds have lost one of the best funding sources for public access and conservation out there.”

BERMAN: FEDERAL MONUMENT DESIGNATIONS ARE AN ANTI-FOSSIL FUEL LAND GRAB. Richard Berman, president of Washington public affairs firm Berman and Co., writes for the [Washington Times](#) (10/19, 344K) that the Administration has “put more than 1,000 square miles off-limits from energy exploration” using an “arcane provision in the 1906 Antiquities Act [which] allows presidents to bypass Congress and unilaterally designate areas of land as national monuments.” Berman writes that Obama has used this authority 19 times and that the moves reflect a “keep it in the ground” position the Administration holds toward fossil fuels. Berman writes that environmentalists have been forming sportsmen, hunting, and angling groups which “give the appearance of moderate or conservative-leaning support for locking away uses of land that may benefit local communities.” Berman warns that as Obama’s term comes to a close, “it’s likely more land will be locked up.”

Empowering Native American Communities:

BIA RULE ANNOUNCES RULE GIVING TRIBES MORE CONTROL OVER ELECTIONS. [Law360](#) (10/20, 21K) reports that the BIA “on Monday announced its final rule for Native American tribal elections conducted by the U.S. Department of the Interior, saying the new rule will encourage tribes to take control of their elections and help protect the voting rights of tribe members living in urban areas.” Assistant Secretary of Indian Affairs Kevin K. Washburn said “in a statement Monday that the rule will allow tribes to opt out of having the interior secretary conduct their elections.”

The [Native American Times](#) (10/20, 337) reports that Washburn said, “Though many federal responsibilities concern the lands we hold in trust for tribes and Indian people, more than 55 million acres nationwide, the United States has a moral obligation to preserve connections between Indian people and their tribes that it once sought to destroy. For the future of Native nations and the health of Indian Country, American Indians in urban areas must work harder to maintain connections with their tribes. One important aspect of that relationship is participation in the civic and political life of their tribal governments. For that reason, our Secretarial election amendments seek to prevent tribal members living in urban areas from being inadvertently disenfranchised in Secretarial elections.”

COURT TO HEAR CHALLENGE TO NATIVE HAWAIIAN ELECTION EFFORT. The [AP](#) (10/20, 2.28M) reports that “a group of Native Hawaiians are organizing an election to create a national government for the

first time since American businessmen, backed by U.S. Marines, overthrew the Hawaiian kingdom more than 100 years ago.” They are seeking “to elect delegates for a convention next year to hash out a governing document that will go back to the Native Hawaiian community for ratification, but their plan is already facing resistance — from Native Hawaiians themselves.” A federal judge on Tuesday will “consider an injunction motion in a lawsuit that argues that it’s unconstitutional to restrict voting to those with Native Hawaiian ancestry and that the state is improperly involved in the process.”

Additional coverage was provided by the [New York \(NY\) Times](#) (10/20, Press, Subscription Publication, 11.82M), the [Washington \(DC\) Post](#) (10/20, Jennifer Sinco Kelleher |, Ap, 6.76M), the [Vallejo \(CA\) Times Herald](#) (10/19, 46K), and [ABC News](#) (10/20, 3.97M).

Also providing coverage are the [AP](#) (10/20, Kelleher), [ABC News](#) (10/20, 3.97M), the [New York \(NY\) Times](#) (10/20, Press, Subscription Publication, 11.82M), the [Minneapolis \(MN\) Star Tribune](#) (10/20, Kelleher, 1.19M), and the [Daily Mail \(UK\)](#) (10/20, 5.59M).

YAKAMA NATION’S PETITION TO SELF-GOVERN APPROVED. [KIMA-TV](#) Yakima, WA (10/20, 1K) reports that “federal officials have accepted a petition that will give Yakama Nation authorities exclusive jurisdiction for certain cases on tribal land, and will have the State of Washington withdraw from any authority.” The Interior Department said “in a news release Monday that ‘retrocession’ has been granted, and tribal police and courts will have full authority over civil and criminal cases involving members of the nation.” The article notes that “the federal government will retain their authority over the Nation, and Yakama Nation authority will remain the same,” and “the removal of state authority over tribal persons is the only change to come from this decision.”

Additional coverage was provided by [KVEW-TV](#) Kennewick, WA (10/19, 283).

JUDGE ASKED TO DROP SUIT CHALLENGING PLACEMENT OF NATIVE KIDS. The [Arizona Daily Star](#) (10/20, 257K) reports that “state and federal agencies are asking a judge to throw out legal claims by several Arizonans that a 37-year old federal law harms and illegally discriminates against Native American children.” In court filings Friday, attorneys for the BIA and the state Department of Child Safety “acknowledged the Indian Child Welfare Act does require state courts when placing Indian children for adoption to give preference to a member of the child’s extended family.” However, “they told U.S. District Court Judge Neil Wake that Congress had a valid reason for approving the law.”

Additional coverage was provided by the [Arizona Capitol Times](#) (10/19, 599) and the [Sun City \(AZ\) Daily Sun](#) (10/20, 17K).

MEMBERS OF BLACKFEET TRIBE SUE OVER RESOURCES. The [Daily Inter Lake \(MT\)](#) (10/20, 51K) reports that “five members of the Blackfeet Tribe filed a lawsuit in U.S. District Court recently, seeking compensation for what they allege is the federal government’s illegal use of tribally owned natural resources.” In the complaint, “the plaintiffs state they are also seeking affirmation of the tribe’s legal ownership of all natural resources, all water delivery infrastructure and all waterways originating on or passing through the reservation.” The suit “names the Bureau of Indian Affairs and the Department of the Interior among the defendants in the case.”

Office of Insular Affairs:

INTERIOR PROPOSES LEGISLATION TO IMPROVE AIR SERVICE IN AMERICAN SAMOA. The [Marianas Variety](#) (10/20) reports that Interior Assistant Secretary for Insular Areas Esther Kia’aina has “sent a letter to U.S. Senate and House congressional leadership proposing draft legislation to improve transportation within the U.S. territory of American Samoa.” The legislation would “provide reliable and sustainable air service between Tutuila and the Manu’a Islands.” Kia’aina said, “The lack of reliable transportation between these islands inhibits tourism, impedes access to education and health care services and generally limits opportunities for full economic potential within the territory. The transportation needs between Tutuila and Manu’a were evident to me on my trip to American Samoa last November. While we have provided almost \$9 million to procure a ferry for passenger/cargo transportation, air transportation continues to play a vital role in the daily activities of the people.”

Additional coverage was provided by the [Talane \(ASM\)](#) (10/20) and [Radio New Zealand](#) (10/20, 1K).

MICRONESIAN RESOURCE CENTER ONE-STOP SHOP FOR GUAM TO OPEN SOON. The [Pacific \(Guam\) Daily News](#) (10/19, 61K) reports that “a new one-stop center where regional migrants can receive help in adjusting to life in Guam is expected to open next month.” Big Brothers Big Sisters of Guam was “awarded a \$249,892 grant from the Department of Interior to open the Micronesian Resource Center One-Stop Shop for Guam.” The nonprofit’s Executive Director Vanessa Estella said “the shop, which will be located in Yona next to the St. Francis Catholic Church, should be open by early November.”

Tackling America’s Water Challenges:

THREE SISTERS CUTS RIBBON AT WATSON HYDROPOWER PROJECT. The [WaterWorld](#) (10/20, 96) reports that “on Friday, Oct. 16, the Three Sisters Irrigation District and Energy Trust of Oregon held a ribbon-cutting ceremony for the Watson Hydroelectric Facility, capping a decade of its investments in efficient irrigation.” Three Sisters Irrigation District “increased the efficiency of its water delivery systems with help and support from the U.S. Bureau of Reclamation, Deschutes River Conservancy, Energy Trust, and many other stakeholders.” According to the article, “by enclosing and installing more than 50 miles of pipe in more than 75 percent of its open canals, the District has been able to continue delivering irrigation water to farmers during historic drought conditions, even while improving stream flows for basin fish populations.”

Additional coverage was provided by the [Hydroworld](#) (10/20, 151).

Securing America’s Energy Future:

Renewable Energy:

STUDY FINDS MOST CALIFORNIA SOLAR PROJECTS SITED NEAR PROTECTED AREAS. The [E&E](#) (10/19) reports that “most commercial-scale solar energy projects in California are located within 6 miles of protected lands such as inventoried roadless areas or critical habitat for federally protected species, according to a study released today by scientists at California universities.” The study published in the Proceedings of the National Academy of Sciences “examined 161 projects that have been planned, are under construction or are operating.” It found that “their proximity to protected areas “may exacerbate habitat fragmentation” with direct and indirect ecological consequences.”

DEADLINE NEARS FOR NEW JERSEY WIND POWER AUCTION. The [Press of Atlantic City \(NJ\)](#) (10/20, 245K) reports that “Tuesday is the deadline for companies wanting to build windfarms seven miles off South Jersey’s coast to submit deposits of \$450,000 to secure a space for a Nov. 9 federal auction.” The article notes that “thirteen companies are considered qualified bidders for two leases of a combined 344,000 acres that can potentially be developed for wind power.” However, the BOEM “does not yet know how many of those companies actually want to take part.”

NORTH CAROLINA ENVIRONMENTAL CHIEF SUPPORTS WIND POWER. In an op-ed for the [Wilmington \(NC\) Star News](#) (10/19, 111K), Jenny Kelvington, senior policy adviser for the N.C. Department of Environmental Quality, writes that Donald van der Vaart, Secretary of the N.C. Department of Environmental Quality, or DEQ, supports offshore wind energy. She notes that “just last week in Wilmington, Secretary van der Vaart spoke to coastal residents and Bureau of Ocean Energy Management, or BOEM, officials about the potential North Carolina’s abundant offshore wind resources present.” According to Kelvington, van der Vaart “emphasized the importance of balancing energy development with environmental safeguards, and in the case of wind energy, protecting the tourism industry that is so vital to our beach communities.”

HYDROPOWER GROUP PUSHES FOR FASTER PERMITTING. [The Hill](#) (10/20, Henry, 471K) reports that the National Hydropower Association “is encouraging Congress to move forward with bills to speed up the permitting process for new projects.” The industry group launched a website and public education campaign Monday to plug the industry’s role in reducing carbon emissions and legislative measures “designed to ease hydropower permitting in the future.”

Onshore Energy Development:

HOUSE PANEL SEEKS RECORDS IN COURT CHALLENGE TO BLM’S FRACKING RULE. The [E&E](#) (10/19) reports that “a House panel Friday asked the Bureau of Land Management to turn over tens of thousands of documents that the agency provided to a federal district court in Wyoming in a case challenging

its hydraulic fracturing rule. The Oversight and Government Reform Committee asked the bureau for a copy of the administrative record – consisting of 40,000 documents and nearly 1 million images – which the agency filed in late August to the U.S. District Court for the District of Wyoming.” The court is “reviewing challenges to BLM’s rule brought by oil and gas trade groups and Western states.”

SENATORS TO PROBE BIA’S ROLE IN STALLED TRIBAL ENERGY PROJECTS. The [E&E](#) (10/19) reports that “energy development on Native American lands continues to languish, and the federal government is partly to blame, according to the Government Accountability Office.” The GAO report highlighting the BIA’s “complicity in the energy woes of Indian Country will be the subject of an oversight hearing Wednesday in the Senate Indian Affairs Committee.”

FORMER BLM DIRECTORS SUPPORT STRINGENT VENTING, FLARING RULE. The [E&E](#) (10/19) reports that the BLM “should require ‘significant cuts’ to the amount of natural gas being flared on public and tribal lands and should require companies to detect and fix gas leaks, according to two former agency directors who served during the Clinton and Obama administrations.” The former directors, Mike Dombeck and Bob Abbey, sent a letter “to Office of Management and Budget Director Shaun Donovan asking that ‘prompt and timely consideration’ be given to BLM’s draft rule to reduce venting and flaring.”

Additional coverage was provided by [The Hill](#) (10/20, Henry, 471K).

NPS TO PROPOSE UPDATE TO OIL, GAS REGULATIONS. The [E&E](#) (10/19) reports that the NPS “announced late last week that it is moving to increase oversight of oil and gas operations in national parks.” While the agency’s “oil and gas regulations don’t allow production in most of the national park system, operations currently occur in a dozen of the agency’s 408 parks where it doesn’t own the subsurface mineral rights.” The proposed regulation would “end an exemption in the current regulations that has allowed 60 percent of those operations to avoid NPS oversight and apply to all future oil and gas activities in the system, according to a Park Service press release.”

Additional coverage was provided by the [National Parks Traveler](#) (10/20, 989) and the [Akron \(OH\) Beacon Journal](#) (10/20, 313K).

CHESAPEAKE ENERGY FINED \$2.1 MILLION FOR UNDER-REPORTING NATURAL GAS. The [AP](#) (10/20, 787K) reports that the Department of Interior’s Office of Natural Resources Revenue Office in Denver issued a \$2.1 million civil penalty against Chesapeake Energy Corp. for failing to comply with an October 2011 order requiring it to review the amounts reported for more than 100 leases on lands owned by Native America tribes and individuals in Oklahoma. In a statement, the office “said that Chesapeake said it complied with the order in 2012 but follow up testing found additional under reported volumes which were then corrected in 2013.”

ABANDONED WELLS IN WYOMING LEAVE GOVERNMENT WITH CLEANUP BILL. On its website, [NPR](#) (10/19, 1.85M) reported on the clean up of wells in Wyoming after the methane industry collapsed, reporting that the cost of dealing with the abandoned wells falls in large part to the state and federal governments. There are nearly 4,000 such wells in Wyoming. Although companies do put up bonds to pay for clean up costs if they go bankrupt, “companies only have to pay \$75,000 for all of their wells on private land in Wyoming.” Mark Watson, the state’s oil and gas supervisor, “recently proposed rules that would double the required upfront amount to \$150,000.”

PENNSYLVANIA DEP EMPLOYEE RECEIVES AWARD. The [Somerset County \(PA\) Daily American](#) (10/20, 40K) reports that “Richard Beam, of the Pennsylvania Department of Environmental Protection, was honored by the federal Office of Surface Mining Reclamation and Enforcement with the 2015 Dave Bucknam Outstanding Instructor Award.” Beam received “the award for his performance as an instructor for the office’s National Technical Training Program.”

Offshore Energy Development:

CONTINUING COVERAGE: INTERIOR DEPARTMENT DECISIONS TO RESTRICT ARCTIC DRILLING.

The [Daily Caller](#) (10/19, Bastasch, 375K) reported that the Interior Department announced Friday that it would cancel two upcoming 2016 and 2017 Arctic lease sales due to “current market conditions and low industry interest.” The announcement comes “just weeks after Royal Dutch Shell abandoned its oil exploration efforts in the polar seas.” The Interior Department “also denied a request by Shell and Statoil...to extend the terms of their leases for another ten years,” saying that “the companies did not demonstrate a reasonable schedule of

work for exploration and development under the leases.

[KATU-TV](#) Portland, OR (10/19, 5:16 p.m. ET, 69K) also broadcast coverage of the story, reporting that “activists believe their protests earlier this year sent a strong message.”

Oil Industry Observers: Arctic Drilling Could Return If Economic Conditions Change. The [Washington Post](#) (10/20, Mooney, 6.76M) reported that to “those who aren’t oil industry insiders,” Shell’s decision to halt its drilling and the Interior Department’s Friday announcements “seem like the most sudden of turnabouts.” However, oil industry observers “suggest that the principal difficulty for Arctic offshore drilling right now is economic — this is a pricey endeavor at a time when oil prices are so low — and that companies may be back for another try at Arctic offshore drilling, in U.S. waters or elsewhere, if economic conditions change.”

In a piece carried by [Oil Price](#) (10/20, 2K), Nick Cunningham wrote that “it wasn’t environmental protest that killed off Shell’s drilling campaign” but rather “low oil prices and disappointing drilling results.” Likewise, the Obama administration “is now shutting the door on future lease sales not because of concerns over the environment, but ‘in light of current market conditions and low industry interest.’” However, “the interest in new leases had dried up even before the downturn in oil prices,” and “even if Interior hadn’t canceled the sales, it is far from clear that there would have even been a company that would be willing to risk scarce resources in bidding on risky Arctic oil.” Cunningham concludes that while it’s possible the leasing process could be relaunched, “a huge question mark that hangs over the process – there is very little interest on behalf of the industry, regardless of what the government may do. In this era of low prices, Arctic oil may simply be unprofitable.”

JONES ACT’S IMPACT ON OFFSHORE OIL PRODUCTION ANALYZED. [Platts](#) (10/20, 1K) reports that “the US’ Jones Act and its impact on offshore oil production in the Gulf of Mexico is causing federal agencies to go public with their concerns.” The article analyzes how the BSEE and Coast Guard are “publicly pushing Customs and Border Protection for some relief from the popular, century-old law.”

America’s Great Outdoors:

Bureau of Land Management:

TEXAS GOV. ABBOT BLASTS BLM’S RED RIVER “LAND GRAB”. The [E&E](#) (10/19) reports that Texas Gov. Greg Abbott sent a letter to BLM Director Neil Kornze last Friday “demanding for a third time that the agency ‘cease and desist’ its ‘unconscionable’ land grab of roughly 90,000 acres along the Red River.” Texas landowners claim “they have raised crops and cattle and paid taxes on the sliver of land along the Texas-Oklahoma border for centuries, but BLM argues it belongs to the federal government.” Abbott wrote, “As you well know, the BLM’s actions prevent landowners from borrowing against the land to finance business operations or selling the land to new owners looking to cultivate their own economic freedom. But the implications of your actions are not merely financial. In many cases, your actions threaten to take the very homes above these Texans’ heads.”

BLM TO HOST SAGE GROUSE MEETINGS IN UTAH. The [Deseret \(UT\) News](#) (10/19, 407K) reports that “four informational open houses detailing new federal plans designed to help the imperiled greater sage grouse are planned over the next couple of weeks in Utah.” In addition, the BLM announced “its proposal to close off 233,300 acres in the extreme northern corners of the state from any new hard rock mining activity with an eye to better protection of the species.” The article notes that “both developments are the result of a Sept. 22 decision by the U.S. Fish and Wildlife Service to not add the bird to the Endangered Species List, but instead move forward with implementation of new land-use plans across 10 Western states to help the chicken-sized bird survive.”

Additional coverage of the BLM plan was provided by the [Sublette \(WY\) Examiner](#) (10/20, 6K).

MORE INSURERS SUE BLM, CHRYSLER OVER 2013 CALIFORNIA FIRE. [Law360](#) (10/20, 21K) reports that “Allstate Insurance Co. and two other insurers piled on Monday to the list of insurer suits against FCA US, Chrysler Group LLC and the U.S. Bureau of Land Management over a 2013 brush fire in Southern California that destroyed more than 7,000 acres and 120 residential buildings.” According to the article, “in a complaint in California federal court, Allstate, Federal Insurance Co. and Safeco Insurance Co. claimed that the BLM in July denied an administrative tort claim over the fire.”

VIABLE SOLUTION TO WILDFIRES URGED. In an editorial, the [La Grande \(OR\) Observer](#) (10/20, 2K) raises concerns that “the fire dangers remains high in the forests that surround our great piece of Oregon.” It asks the BLM and the Forest Service “what, exactly, is being done to lessen the danger of these terrible wildfires? No what to do afterward, but what, exactly, can be or will be done to clean up overgrown forests that prove to be as lethal as lakes of gasoline every summer?” The paper concludes that “we can keep doing what we have done for years — and, in turn, cost taxpayers more money — or perhaps residents, environmentalists and federal and state officials can work together to find a viable solution.”

Fish and Wildlife Service:

FWS AWARDS \$2.5 MILLION IN FIGHT AGAINST DEADLY BAT DISEASE. The [Harrisburg \(PA\) Patriot-News](#) (10/20, 351K) reports that “in the international battle against the bat-destroying white-nose syndrome the U.S. Fish and Wildlife Service has awarded another \$2.5 million in grants for research, management and communications projects.” The agency “hopes the new investments will further the effort to stop the spread of the deadly fungal disease that has killed millions of North American bats since it was first documented in New York in 2007.” FWS Director Dan Ashe said, “Previous research funded by the U.S. Fish and Wildlife Service has led to major breakthroughs in our understanding of white-nose syndrome, providing a measure of hope that we can defeat this devastating disease.” He added, “Bats are a critical part of our ecology and provide essential pest control for our farmers, foresters and city residents, limiting the need to spray harmful pesticides. As the disease continues its spread into new areas, it is more critical than ever that we continue our strong support for solid science to inform wise decisions about our natural resources.”

FWS PROPOSES TO DOWNLIST COLUMBIAN WHITE-TAILED-DEER. The [Seattle Times](#) (10/20, 962K) reports that “after decades of protection under the Endangered Species Act, the Columbian white-tailed deer could be reclassified from ‘endangered’ to ‘threatened’ in northwest Oregon and southwest Washington.” The FWS “characterized the move as a success story, saying conservation efforts have helped bring the animal back from the brink.” According to FWS spokeswoman Elizabeth Materna, “the proposed downlisting of the deer won’t happen until next spring at the earliest.” The FWS is “in the midst of a 60-day public-comment period that ends Dec. 7, she said.”

Additional coverage was provided by the [Clark County \(WA\) Columbian](#) (10/19, 86K).

FWS EXPECTED TO ISSUE DECISION ON ALEXANDER ARCHIPELAGO WOLF BY END OF YEAR. The [Los Angeles Times](#) (10/19, Yardley, 4.07M) reports that “this spring, with the approval of the U.S. Forest Service, loggers began cutting thousands of acres of old-growth trees on Prince of Wales Island in one of the largest and most controversial timber sales in the Tongass in two decades.” State and federal officials say “the project is essential to the livelihoods of people on the island, where the last remaining large sawmill employs about 50 people.” But the Alexander Archipelago wolf population has “been in steady decline, and cutting down more trees is expected to pressure them further.” By the end of this year, the FWS is “expected to make a final decision on whether the wolf should be listed as an endangered species.” And “while that decision is pending, logging continues, as does hunting — of both wolves and the deer that are their food supply.”

WORKPLACE VIOLATIONS FOUND AT BRIMLEY HATCHERY... The [AP](#) (10/20, 344K) reports that “a federal agency is blowing the whistle on another, saying it found serious workplace violations at a fish hatchery in the Upper Peninsula.” The U.S. Labor Department on Monday said the FWS “failed to follow guidelines for workers in confined spaces at the Brimley hatchery, near Sault Ste. Marie.” Inspectors say “managers failed to evaluate tanks for confined space hazards, post warning signs and prevent unauthorized entry.” Todd Turner, “who oversees the hatchery, says many of the issues are ‘easy fixes’” and he says “employees don’t feel unsafe.”

MONARCHS GET HELP AS CALIFORNIANS PLANT DROUGHT-TOLERANT MILKWEED. The [AP](#) (10/20, Flaccus) reports that “in California’s drought, the struggling monarch butterfly may have found a sprinkling of hope.” According to the article, “suburban homeowners ripping out thirsty lawns are dotting their new drought-tolerant landscapes with milkweed native to California’s deserts and chaparral – plants that have the potential to help save water and monarchs at the same time, because the female monarch will only lay her eggs on milkweed.” The article notes that “earlier this year, the U.S. Fish and Wildlife Service announced \$1.2 million starter investment to restore habitat; other national projects aim to distribute milkweed seeds by mail and build databases of breeding habitats as alarm grows.”

ATTU ISLAND SCHEDULED FOR CLEANUP. The [Alaska Public Radio Network](#) (10/19, 2K) reports that “there are now more than 20 former defense sites located within the Alaska Maritime National Wildlife Refuge.” Attu Island is “the most remote — nearly 1,500 air miles from Anchorage — and one of the most deeply affected.” Now, Attu is “scheduled for what may be the first of many stages of cleanup — but it’s unlikely the military will ever be able to turn back the clock to a time before conflict.”

WASHINGTON STATE TO VOTE ON ANTI-POACHING INITIATIVE. The [Seattle Times](#) (10/20, 962K) reports on Washington state’s Initiative 1401, “a sweeping measure to fight poaching by outlawing sales of elephant ivory, leopard skins, shark fins and parts from dozens of other imperiled species.” Proponents say the measure would “provide another tool to fight illegal wildlife trafficking that imperils species.” However, opponents say “the law would not stop poaching but would penalize antique owners.”

FWS PLANS TO MOVE FORWARD WITH WOLF RELEASES IN NEW MEXICO. For the “UpFront” column of the [Albuquerque \(NM\) Journal](#) (10/20, 259K), Lauren Villagran writes that “in the debate over Mexican gray wolves,” both “wolf advocates and those who oppose reintroduction of the endangered lobo want the U.S. Fish and Wildlife Service to adopt a recovery plan that would serve as a road map for the wolf’s survival and eventual removal from the endangered species list.” She notes that “a coalition of environmental groups and the Arizona Game and Fish Department have both asked the courts to force the service to write a new plan.” New Mexico Game and Fish recently sent the FWSS “a 60-day notice of intent to sue Sept. 1,” and “last week, the New Mexico agency said it was ‘evaluating its options’ after the federal agency said it would go ahead with wolf releases in New Mexico even after the Game Commission denied the agency permits to do so – stating that it was doing so because of the lack of a recovery plan.”

National Park Service:

FOURTH GRADERS VISIT HOT SPRINGS NATIONAL PARK. The [Hot Springs \(AR\) Sentinel-Record](#) (10/19, 34K) reports that “the fourth-grade class from Fountain Lake Elementary School visited Hot Springs National Park on Oct. 8 as part of the ‘Every Kid in a Park’ program.” According to the article, “students toured all four floors of the Fordyce Bathhouse, which is also the Hot Springs National Park Visitor Center.” Also, “the students completed the Junior Ranger activity books and were sworn in as Junior Rangers by Hot Springs National Park Superintendent Josie Fernandez.”

Smart Toys Supports “Every Kid In A Park” Initiative. On its website, [Smart Toys](#) (10/20) says it supports the “Every Kid in a Park” initiative. It emphasizes “the importance of active and outdoor play for children.” It says that the “initiative encourages valuable opportunities to explore, learn, and play in the spectacular places that belong to us all and aims to inspire stewardship of these places for future generations.”

FEDERAL GOVERNMENT TO REQUIRE UAV REGISTRATION. The [Washington Post](#) (10/20, Whitlock, 6.76M) reports that “federal regulators said Monday that they plan to require recreational drone users to register their aircraft with the government for the first time in an attempt to restore order to U.S. skies, which have been invaded by rogue flying robots.” Officials said “they still need to sort out the basic details of the registration system but concluded that they had to take swift action to cope with a surge in sales of inexpensive, simple-to-fly drones that are increasingly interfering with regular air traffic.” Regulators “hope that forcing owners — many of whom are aviation novices — to register their drones with the government will at least make them think twice about their responsibility to fly safely and the possibility that they could be held accountable for an accident.”

FLASH FLOODS HIT DEATH VALLEY NATIONAL PARK. The [Los Angeles Times](#) (10/19, Rocha, 4.07M) reports that “severe thunderstorms over Death Valley National Park knocked down power lines late Sunday, sent mud barreling into a historic building and forced visitors and rangers to hunker down overnight in a volcanic crater.” According to park spokeswoman Abby Wines, “the flooding left about 20 visitors and three park rangers stranded in Ubehebe Crater, in the north end of the park, so they had to spend the night in the desert.” The article notes that “the group maintained contact with the park’s headquarters through the night until they safely exited Monday morning.”

VANDALISMS PLAGUES BLUE RIDGE PARKWAY. [WLOS-TV](#) Asheville, NC (10/20, 28K) reports that NPS officials say “some of the recent vandalism to the Blue Ridge Parkway may leave permanent damage.” Over the weekend, a vandal “spray painted the wooden marker at the Hendersonville Road entrance.” There was also “recent trouble with tagging on a Parkway bridge.”

NPS PROPOSES FEE INCREASE AT PERRY'S MEMORIAL. The [Cleveland Plain Dealer](#) (10/20, 1.03M) reports that the NPS is "proposing a fee increase that would more than double the cost to scale 352-foot-tall Perry's Victory and International Peace Memorial." The article notes that "entrance fees would increase to \$7 in 2016, up from \$3, in a recently announced park proposal." The park is "hosting two open houses this week to discuss the proposal."

PRESCRIBED BURNS PLANNED AT GREAT SMOKY MOUNTAINS NATIONAL PARK . The [Knoxville \(TN\) News Sentinel](#) (10/20, Staff, 235K) reports that "fire management officials for the Great Smoky Mountains National Park are planning prescribed burns in two areas of the park that could begin as early as Oct. 26." The NPS "on Monday announced intermittent burn operations — weather permitting — are planned in Cades Cove from Oct. 26 through mid-November. Multiple fields totaling about 300 acres have been identified for fire treatment."

Additional coverage was provided by [WATE-TV](#) Knoxville, TN (10/19, 59K).

WISCONSIN SHIPWRECK JOINS NATIONAL REGISTER OF HISTORIC PLACES. The [Great Lakes \(MI\) Echo](#) (10/20, 441) reports that "nearly 86 years after the steam screw ferry Milwaukee sank in Lake Michigan, the National Register of Historic Places has recognized the ship for its distinctive role in the Great lakes railcar ferry system."

ADDITIONAL COVERAGE OF PROJECT TO REVITALIZE ST. Louis Arch. Additional coverage of the project to revitalize the St. Louis Arch was provided by the [Chicago Tribune](#) (10/2, 2.46M).

Top National News:

OBAMA TOUTS CLIMATE PLEDGES FROM 81 US COMPANIES. The President's roundtable meeting with business leaders to discuss climate change, and the White House's announcement that 68 additional companies have signed on to the Administration's American Business Act on Climate Pledge, were ignored by the network news broadcasts Monday evening. Print and online coverage, however, are heavy, with reports casting the new corporate commitments – which bring the total to 81 – as a win for the President as he seeks to build support for an international climate change agreement. The [Washington Times](#) (10/20, Wolfgang, 344K) notes that in [remarks](#) following the meeting, the President said the growing number of business leaders who are "taking action on climate change" is proof "that it isn't just 'tree-huggers' who care about the issue."

[Foreign Policy](#) (10/19, Francis, 364K) said the President "scored a big win on his plan to combat climate change" as he tries "to win support from the private sector for his plan ahead of a UN climate conference in France that gets underway November 30." The President is "hoping backing from a broad array of companies will pressure delegates from almost 200 countries to come to some kind of an agreement to combat climate change."

In a story highlighting pledges from Minnesota-based companies Best Buy, General Mills, and Target, meanwhile, the [Minneapolis Star Tribune](#) (10/19, Spencer, 1.19M) reports that the President "praised commitments that have sometimes been a tough choice," and [The Guardian](#) (10/19, 3.3M) quotes the President as saying, "Considerations of climate change, energy efficiency, renewable energies are not only not contradictory to their bottom lines, but for these companies they are discovering that they can enhance their bottom lines."

[The Hill](#) (10/19, Cama, 471K) noted that by highlighting "corporate support for the talks, the White House hopes to contrast big businesses' opinions with those of congressional Republicans." [USA Today](#) (10/19, Korte, 5.23M) reports that the President met Monday with "the CEOs of Johnson & Johnson, Intel, Berkshire Hathaway Energy, Hershey's and Pacific Gas & Electric – and with some of the smaller companies that supply them, and with" 68 new commitments announced Monday "to support the Paris talks – and the countries that are involved in them – and to take specific steps to reduce their greenhouse gas emissions," a total of "81 companies have now signed on to the 'Act on Climate' pledge, a part of a White House effort to bring a strong negotiating hand to the international climate talks in Paris next month." USA Today adds that "just as important" as the commitments from the companies is the fact they are "putting a business-friendly face on his clean energy initiatives."

The [AP](#) (10/20) says the companies "promise to advocate for a strong climate deal ahead of final negotiations

in Paris next month, and agree to take steps to reduce their own carbon emissions. [Reuters](#) (10/20, Lambert) also reports briefly on the White House's announcement of the new commitments.

[AFP](#) (10/20) says the "81 companies that have committed to concrete mitigation measures" represent "a potent tool against skeptics." A [Newsweek](#) (10/19, 198K) analysis said that "the recent pledge by companies shows that some corporations – the supposed allies of climate change deniers – are ahead of Congress on accepting the reality of climate change."

[TIME](#) (10/19, Frizell, 19.55M) said the 81 companies that have agreed to the White House plan include Walmart, Alcoa, Coca-Cola, American Express, Dell, GE, General Mills, McDonald's, Nike and "other household names." The [North Jersey Media Group](#) (10/20, Jackson, 112K) highlights New Jersey-based Johnson & Johnson's pledge to "cut carbon emissions by 20 percent worldwide by 2020 and by 80 percent by 2050," noting that chief executive Alex Gorsky said the effort is "good business" because "consumers want products from environmentally sound companies, younger 'millennial' employees want to work for firms that make such issues a priority, and communities businesses with clean footprints."

The [Chicago Business Journal](#) (10/19, Lazare) focuses on McDonald's commitment, which the company said "will be manifest on several fronts, including deforestation." The company "also supports sustainable production of beef, and by 2020, the company's goal is for 100 percent of the palm oil used in restaurants worldwide to be verified as having come from a system that supports sustainable palm oil production." Moreover, by 2020, McDonald's "aims to source 100 percent of fiber-based packaging from recycled or certified sources" and to "have 100 percent of its coffee verified as supporting sustainable production." On its website, [KWMU-FM](#) St. Louis (10/20, Howard, 8K) also reported on Monsanto's pledge, noting that the company "is pursuing a 25 percent increase in water use efficiency at its seed testing facilities by 2020," and is "addressing deforestation with 'advanced seeds and precise management tools' to help farmers make more efficient use of nutrients."

On its website, [Voice of America](#) (10/19, Pande, 32K) quoted the President's senior climate adviser, Brian Deese, as saying, "These commitments show that international action on climate is not only good for our planet, it's good for the bottom line. ... It also shows that when United States leads on climate issues, not only do other countries step up and make more progress, but you see businesses as well as other key actors stepping up to rally the world to address this issue."

[Fortune](#) (10/19, 4.14M) said that the new commitments "show how corporate America is increasingly interested in reducing emissions and fighting climate change," but noted that companies that "have built businesses off of the fossil fuel industry, like oil and coal companies," are "notably absent." A [Newsweek](#) (10/19, 198K) analysis likewise noted that although "the list included utilities and some energy companies, major fossil fuel producers were absent."

Biden Touts His Climate Change Record During Roundtable. [The Hill](#) (10/19, Cama, 471K) reported that the Vice President used his remarks to the roundtable "to outline his accomplishments on fighting climate change, going back nearly three decades," and "detailed extensively his work both in the Senate and in the Obama administration on climate."

Inhofe Blasts EPA, White House For Skipping Hearing. [Fox News](#) (10/19, Shaw, 8.91M) reported on its website that Senate Environment and Public Works Committee chairman James Inhofe is "crying foul after the Environmental Protection Agency and a key White House office declined to take part in an upcoming hearing on the administration's role in international climate negotiations." While Tuesday's hearing "was initially pitched as a joint hearing between the Committee on Environment and Public Works (EPW) and the Senate Foreign Relations Committee (SFRC)," it is now "expected to be held only by the SFRC and to feature one witness – the Obama administration's special envoy for climate change, Todd Stern." According to GOP sources "Democrats in the SFRC objected to a joint hearing, while invitations to the EPA and White House Council on Environmental Quality (CEQ) were both declined." Inhofe, "voiced frustration at the response," saying in a statement, "The Obama administration and Senate Democrats have made it extremely difficult to provide necessary and appropriate Congressional oversight to the president's international climate negotiations."

Groves: Obama Will Not Submit Paris Agreement For Senate Approval. In a piece for the [Washington Times](#) (10/20, 344K), Steven Groves, the Lomas Senior Research Fellow in the Heritage Foundation's Margaret Thatcher Center for Freedom, writes that in Paris next month, the President plans to "commit the US to cut its carbon emissions by more than a fourth (26-28 percent below 2005 levels) by 2025," adding that

while the executive branch would usually submit such a significant agreement to the Senate as a treaty for its advice and consent under Article II of the Constitution,” the President “intends no such thing,” because he apparently “does not deem the Senate worthy of reviewing or questioning his environmental policies.” Groves questions “whether the Senate will take a stand, protect its prerogatives, and preserve its role in the treaty-making process.”

TRUMP, BUSH IN “UGLY WAR OF WORDS” OVER 9/11 ATTACKS. On [NBC Nightly News](#) (10/19, story 3, 2:30, Holt, 7.86M), Lester Holt reported on what he described as “the increasingly ugly war of words between Donald Trump and Jeb Bush over blame for 9/11.” NBC’s Katy Tur added that the pair are “squabbling over whether George W. Bush should be held accountable for 9/11,” with Trump “tweeting this morning, ‘Jeb is fighting to defend a catastrophic event. I’m fighting to make sure it doesn’t happen again.’” Trump was also shown saying on Monday during an appearance on Fox News, “If my immigration policies were in effect, I don’t know that [the 9/11 attacks] would have happened, because I have very, very strong immigration” policies. Tur added, “The spat spilling into the week after escalating on Sunday.”

On [ABC World News](#) (10/19, story 2, 2:15, Muir, 5.84M), David Muir reported on what he described as “a fiery back and forth” between the two candidates over “what Trump said about September 11 and President George W. Bush. Would it have happened if Trump was president?” ABC’s Tom Llamas added that Trump implied “a President Trump could have prevented 9/11. Believing his immigration policies would have stopped the terrorists from entering the US.” The segment draws from various interviews conducted with the two GOP hopefuls over the weekend. For example, Trump was shown saying, “I believe if I was running things, that I doubt those people would have been into the country.” Trump was also shown saying, “When you talk about George Bush, say what you will, the World Trade Center happened during his time.” And Jeb Bush was shown saying, “Does anybody actually blame my brother for the attacks on 9/11? If they do, they have totally marginalized our society.”

The [CBS Evening News](#) (10/19, story 4, 1:35, Pelley, 5.08M) similarly reported on the “war of tweets and sound bites” between Trump and Bush, drawing from various weekend interviews with the two candidates. For example, Trump was shown saying, “Jeb said we were safe with my brother. We were safe. Well, the World Trade Center just fell down. We lost 3,000 people. It was one of the greatest – probably the greatest catastrophe ever in this country.” And Jeb Bush was shown saying, “Across the spectrum of foreign policy, Mr. Trump talks about things as though he’s still on ‘The Apprentice.’ Next week, Mr. Trump is probably going to say FDR was around when Japan attacked Pearl Harbor.”

WSJournal, Thiessen Blast Trump Over 9/11 Remarks. In an editorial, the [Wall Street Journal](#) (10/20, Subscription Publication, 5.95M) criticizes Trump over his remarks, saying that faulting former President George W. Bush for the 9/11 attacks is like saying President Obama is responsible for the recession that came in the wake of the 2008 financial crisis. In his [Washington Post](#) (10/20, 6.76M) column, Marc Thiessen similarly blasts Trump over his remarks, saying that faulting “Bush for the Sept. 11, 2001, attacks is an absurd, left-wing talking point. The fact is, when Bush took office on Jan. 20, 2001, planning for 9/11 was well underway.” Thiessen adds of the former President, “Thanks to the actions he took, the institutions he built, the doctrines he established, the United States went 2,688 days on his watch without another attack on our soil. That is an achievement few thought possible when the rubble of the World Trade Center was still burning.”

Robinson Fault Terrorists, Not Leaders, For Attacks. In his [Washington Post](#) (10/20, 6.76M) column, Eugene Robinson says that with his comments, “Trump has created a problem not just for Jeb Bush but for the Republican establishment,” as the GOP “is desperately trying to blame Hillary Clinton for the Sept. 11, 2012, attack on the U.S. compound in Benghazi, Libya.” Robinson adds, “Bad things happen on every president’s watch — also, every secretary of state’s — and the proper place to lay blame is on the perpetrators.”

BIDEN PRESIDENTIAL SPECULATION CONTINUES. Speculation about a potential presidential run by Vice President Biden continues to get coverage despite a lack of any word from Biden on Monday. Two broadcast networks ran stories Monday evening, with ABC parsing Biden’s comments at a White House event Monday and NBC saying Biden could decide within two days. But other reports offer different timelines. Meanwhile, a freshman Democratic congressman said he has learned Biden will run.

[ABC World News](#) (10/19, story 3, 1:45, Muir, 5.84M) reported that Biden “appeared to take subtle jabs at the two Democratic frontrunners” Monday. ABC (Karl) added, “Biden had nothing to say today on 2016, although at a White House event he did say this.” Biden: “I don’t consider Republicans enemies or friends.” Karl: “Could that have been a swipe at Hillary? This is what she said when asked which enemy she is most proud of.”

Hillary Clinton. Well, in addition to the NRA, the health insurance companies, the drug companies, the Iranians, probably the Republicans.” Karl: “And was this a shot a Bernie Sanders?” Biden: “I’m not one of these guys, you know, let’s go after the rich and powerful and they’re the problem.” Karl also said that while a source said Biden “has not made a decision,” the Vice President “has been calling potential supporters.”

[NBC Nightly News](#) (10/19, story 4, 1:20, Holt, 7.86M) reported, “The speculation swirling around the Vice President has reached a fever pitch.” NBC (Welker) added, “Sources who are familiar with the Vice President’s thinking have told me he could decide within the next 48 hours. But another source emphasizes only Biden can really know when he is going to decide.”

[Politico](#) (10/19, Gass, 942K) reports under the headline “Biden Watch Kicks Into High Gear” that “rumors and reports...intensified on Monday, as official Washington – and the press corps – found itself grasping for answers as to when the veep will make up his mind, or at the very least make his decision known.” And [The Hill](#) (10/19, Byrnes, 471K) reports freshman Rep. Brendan Boyle (D-PA) [said via Twitter](#) that “he has been told by an unidentified source” that Biden is running. But [Bloomberg Politics](#) (10/19, Talev, 247K) says no announcement is expected “until the end of the week.” The [AP](#) (10/20, Lederman) summarizes the speculation: “He’s running! He’s about to decide! He’ll announce within two days! He’s maybe, possibly, surely, definitely going to figure it out really, really soon!”

The [Christian Science Monitor](#) (10/19, Feldmann, 455K) writes that Biden remains a distant third in national Democratic polls, which means he “either he’s doing well for someone who hasn’t announced or, obviously, campaigned. Or he’s doing not so well – third place, for the sitting vice president.” However, “in head-to-head matchups against Republican front-runners, Biden does the best of any Democratic candidate.”

Clyburn Says Biden Should Not Run, But Should Remain “Available.” Howard Fineman of the [Huffington Post](#) (10/19, 164K) writes that Rep. James Clyburn (D-SC) said in an interview that Biden should not enter the race, but “should instead say he is ‘available’ to head the 2016 ticket if circumstances warrant it – that is, if Hillary Clinton implodes.”

WPost Inadvertently Publishes Biden Announcement Story Online. [Politico](#) (10/19, 942K) reports in its “On Media” blog that the Washington Post inadvertently “published an item Monday evening to its website with the headline ‘Biden to launch a presidential campaign.’” The Post said it “wasn’t news published before it was ready – just a ‘shell’ story prepared so that the Post could push the button faster in case Biden did announce.”

Editorial Wrap-Up:

NEW YORK TIMES. “A New Attack On Health Care Reform.” Noting the recent failures of several health insurance co-ops, a [New York Times](#) (10/20, Subscription Publication, 11.82M) editorial criticizes Republicans and other ACA critics who it says “are cynically pointing to their problems as evidence that the whole reform effort is a waste of money that ought to be repealed.” The Times argues that the co-ops were created “as a weak, underfunded alternative to a much stronger” public option that consumers could choose as an alternative to private insurance, but the public plan was blocked by Republicans. Additionally, the co-ops have been hit hard by “severe reductions in the amount of money available...from federal loans and for risk adjustment payments,” the result of “Republican opposition to supporting the plans.”

“Justice Gone Wrong In New Orleans.” In an editorial, the [New York Times](#) (10/20, Subscription Publication, 11.82M) writes that in “dozens of cases over the years,” the New Orleans district attorney’s office has “failed to turn over material to defense lawyers that would have helped their clients,” but the Supreme Court “refused to find any pattern of misconduct when it was confronted in 2011 with one of the most egregious examples in memory: the case of John Thompson, who spent 14 years on death row before a private investigator discovered that several prosecutors...had lied for years about a crime-lab report that ultimately led to Mr. Thompson’s exoneration.” The Times says that “as long as the justices look the other way, unethical prosecutors around the country will have little incentive to change their ways.”

“Time To Retire The Term ‘Alien.’” A [New York Times](#) (10/20, Subscription Publication, 11.82M) editorial argues that the term “alien” is a “loaded, disparaging word, used by those who regard immigrants as less-than-human burdens rather than as assets” and urges the federal government to “scrub it from official documents where possible.”

WASHINGTON POST. Keeping Guns Out Of Children's Hands. The [Washington Post](#) (10/20, 6.76M) editorializes that “of all the sad statistics associated with US gun violence, none is more pitiful than the single digits that represent the ages of little children who unintentionally shoot themselves or others after getting hold of a gun.” A recent “searing analysis of news accounts” by the Post “found 43 cases of children 3 or younger shooting themselves or someone else this year,” and average of a shooting a week. The Post argues that states and localities “could require gun owners to lock their guns away or use trigger locks,” and notes that consumers “have become accustomed to passcodes or thumbprints to safeguard their phones; the same technology could be used to keep guns from being fired by anyone but their owners.” The Post blames the gun lobby for the fact that “these lifesaving efforts are not a routine matter of law or practice.”

“Western Nations Shouldn’t Pander To Turkey’s President.” A [Washington Post](#) (10/20, 6.76M) editorial criticizes what it calls the “predictable inclination of many Western governments, especially those in Europe seeking to stem the flow of refugees...by striking deals with Turkish President Recep Tayyip Erdogan.” The Post argues that “unless Turkey can overcome its growing domestic polarization, it won’t be able to tackle its multiple crises — or be a reliable partner for the West.”

“For Virginia’s State Senate.” In an editorial, the [Washington Post](#) (10/20, 6.76M) says that it is “difficult...to find Republicans to endorse in the handful of” northern Virginia state Senate races that “look plausibly competitive,” because of their “obstinacy” on Medicaid and “a variety of social issues.” Therefore, the Post endorses Democrat Jill McCabe over District 13 Republican incumbent Dick Black. For District 29, the Post endorses Democrat Jeremy McPike, who is “focused on the nuts and bolts of effective governance,” over Republican Harry Parish, who holds “rigid positions” against Medicaid expansion and “common-sense gun safety measures.” In addition, Democratic Sen. Jennifer Wexton, who is “off to an auspicious start” after winning a special election last year, is the Post’s endorsement for District 33.

WALL STREET JOURNAL. “Obama Takes The Military Hostage.” In an editorial, the [Wall Street Journal](#) (10/20, Subscription Publication, 5.95M) says that with his threat to veto the National Defense Authorization Act, the President is holding the US military hostage to his goal of forcing congressional Republicans to lift the caps on non-military domestic spending.

“Acting Up Against The Minimum Wage.” In an editorial, the [Wall Street Journal](#) (10/20, Subscription Publication, 5.95M) praises a group of Los Angeles actors who filed a lawsuit against the Actors’ Equity Association on Saturday to prohibit the union from requiring theaters with under 100 seats to pay at least \$9 an hour to union members. The lawsuit warns that raising wages could force many theaters to close. Actors’ Equity responded by saying the suit will inevitably hurt its ability to bargain for the rest of its members, but the Journal says the actors appear to understand economics better than the union.

“Trump’s 9/11 Truthing.” In an editorial, the [Wall Street Journal](#) (10/20, Subscription Publication, 5.95M) criticizes Donald Trump over his remarks, saying that faulting former President George W. Bush for the 9/11 attacks is like saying President Obama is responsible for the recession that came in the wake of the 2008 financial crisis.

LAST LAUGHS:

+ [Late Night Political Humor](#).

DOI in the News:

OBAMA ADMINISTRATION TAKES STEPS TO RESTRICT ARCTIC DRILLING. The Obama Administration on Friday took steps to restrict future offshore Arctic drilling, including canceling two upcoming 2016 and 2017 Arctic lease sales and denying requests from Royal Dutch Shell and Statoil to extend their current Arctic drilling leases. The [Washington \(DC\) Examiner](#) (10/16, 213K) reported that the Department of the Interior said, "In light of current market conditions and low industry interest, the U.S. Department of the Interior today announced that it will cancel the two potential Arctic offshore lease sales scheduled under the current five-year offshore oil and gas leasing program for 2012-17." The announcement comes following a decision by Shell to halt its exploratory oil drilling in the Alaskan Arctic.

[The Hill](#) (10/16, Cama, 471K) reported that Interior Secretary Sally Jewell said in a statement, "In light of Shell's announcement, the amount of acreage already under lease and current market conditions, it does not make sense to prepare for lease sales in the Arctic in the next year and a half." In the statement, Jewell "compliment[ed] her staff's work overseeing the safety and environmental standards of Shell's drilling in the Chukchi Sea." The [AP](#) (10/17, Joling) reported that Jewell "said the Chukchi Sea off Alaska's northwest coast and the Beaufort Sea off the state's north coast will not be included in the agency's current five-year lease sale plan."

The [Washington Post](#) (10/17, Mooney, 6.76M) reported that the lease cancellations represent the "second major setback to Arctic oil drilling plans that as recently as two months ago seemed to be moving forward smoothly." [Bloomberg News](#) (10/16, 2.66M) reported that "the cancellations highlight the changing environment for the oil industry after international prices fell more than 50 percent from their 2014 peak as supply overwhelms demand." Bloomberg added that "drilling in treacherous Arctic waters is also expensive, and Shell cited the high costs in shuttering its \$7 billion search for oil and gas in the region."

[Politico](#) (10/16, Schor, 942K) reported that the Interior's "move to cancel the sales marked an acknowledgment of the dismal economic reality facing aspiring Arctic drillers, who had shown little interest in the potential lease sales amid a global downturn in oil prices." However, the move "also gave greens the chance to take a fresh victory lap for their successful campaign to press Democratic presidential front-runner Hillary Clinton to publicly oppose all oil and gas development in the Arctic."

The [Los Angeles Times](#) (10/17, Yardley, 4.07M) reported that the department "still plans to hold lease sales in the Arctic in its next leasing window, 2017 to 2022, when a new administration will be in office."

Interior Department Denies Lease Extensions For Shell, Statoil. The [Wall Street Journal](#) (10/16, Harder, Subscription Publication, 5.95M) reported that the Interior Department on Friday also denied requests from Royal Dutch Shell and Statoil to retain drilling rights with upcoming expiration deadlines. The [Seattle \(WA\) Post-Intelligencer](#) (10/16, 560K) reported that the Bureau of Ocean Energy Management "cit[ed] 'current market conditions and low industry interest'" in refusing to renew the existing leases. The BOEM said that Shell and Statoil "did not demonstrate a reasonable schedule of work for exploration and development under the leases."

The [San Antonio \(TX\) Express-News](#) (10/16, 884K) reported that Shell and Statoil "had asked Interior regulators to issue 'suspensions' of their Arctic leases," as "without extensions, Beaufort Sea leases expire in 2017 and Chukchi Sea leases are invalid in 2020." Shell and Statoil could appeal, and "if they do, it could be a move to preserve the optional value of the leases, which effectively give the companies a chance to explore in U.S. Arctic waters for a few more years — and possibly wait for a new administration that could take a different view on the issue." Shell "reiterated Friday that more time is needed to explore the Arctic." Said Shell spokesman Curtis Smith, "When it comes to frontier exploration in Alaska, one size does not fit all. ... We continue to believe the 10-year primary lease term needs to be extended."

Decisions Both Criticized And Applauded. [McClatchy](#) (10/16, 28K) reported that Rep. Rob Bishop, R-Utah, chairman of the House Committee on Natural Resources, "criticized the president for blocking 'any hope

for future energy development in the Arctic, and blamed environmental regulations for Shell's failure. Said Bishop, "Obama has once again played directly into Russia's hands as he destroys our nation's energy potential." Environmental groups, however, "hailed Obama's decision to cancel the lease sales scheduled over the next two years." Said a Greenpeace spokesman, "For years, people around the world have been demanding President Obama protect the Alaskan Arctic from catastrophic oil drilling, and today he's taken a major step."

The [National Journal](#) (10/16, Subscription Publication, 144K) reported that the American Petroleum Institute "attacked the Obama administration for what the group calls a history of putting up bureaucratic hurdles." The twin decisions "could make it tougher for the industry to reignite Arctic development in the future," which the Journal said "is why a suite of environmental groups applauded Interior's action Friday."

The [Washington Examiner](#) (10/19, 213K) reports in a second article that environmentalists "say oil companies need to realize projects in the Arctic 'aren't making much sense any more.'" Green groups "cheered Interior's decision to stop new leases for offshore drilling in 2016 and 2017 and now they want the Arctic removed from the government's next five-year oil and gas leasing program." However, "experts say other companies will see the company's decision to leave the Arctic as a minor setback in a decades-long, potentially lucrative exploration." John Hofmeister, former president of Shell and founder of Citizens for Affordable Energy, "speculated that Shell's decision to stop drilling is a 'pause' and not a final decision."

Move Seen As Blow To Alaska's Economy. The [New York Times](#) (10/17, Krauss, Subscription Publication, 11.82M) reported that the announcement, while not surprising, is "symbolically important as the Administration steps back from its cautious support of drilling in the Arctic." Moreover, "taken together, the decisions are a sharp blow to the Alaskan economy, which has been declining because of the fall in oil prices and the state's slumping oil production."

[USA Today](#) (10/16, Korte, 5.23M) reported that Alaska senator Lisa Murkowski, who chairs the Senate Energy Committee, called the decision "absurd." The Interior Department "is throwing up regulatory roadblocks to prevent drilling, she said — and then using the lack of drilling to justify canceling the lease sales." Said Murkowski, "This is a stunning, short-sighted move that betrays the Interior Department's commitments to Alaska and the best interests of our nation's long-term energy security. ... Today's decision is the latest in a destructive pattern of hostility toward energy production in our state that began the first day this administration took office, and continued ever since."

[Alaska Dispatch News](#) (10/16, Martinson, 219K) reported that "in a hastily organized news conference at the Alaska Federation of Natives convention in Anchorage, Gov. Bill Walker and the three members of the state's all-Republican congressional delegation took turns criticizing the cancellation and the Obama administration." Rep. Don Young "told reporters that he wanted to respond to the cancellation by renting a rig and drilling horizontally into the off-limits Arctic National Wildlife Refuge from state land nearby." Young "decried the decision to reject lease extensions," writing in a statement, "Instead of throwing a lifeline to the state, they throw us a cinder block."

On its website, [Alaska Public Radio Network](#) (10/16, 2K) reported that Walker "says Shell officials told him they wanted the lease extensions, and now, he says, it's like that door has been slammed in Alaska's face." Walker "says it's time for bold action, though he said he doesn't yet know what that is."

The [AP](#) (10/19) reported that Alaska's junior US senator Dan Sullivan "says the Obama administration is being very hypocritical in its treatment of Alaskans and Alaska Natives by shutting down offshore drilling." Sullivan said the administration is taking away oil jobs that pose real and significant "opportunities that could benefit thousands if not tens of thousands of Alaskans." Sullivan "says taking these potential jobs off the table isn't going to help the social problems facing Alaskans, and will actually make them worse."

Additional Coverage. The story was also covered by [Reuters](#) (10/16), the [Financial Times](#) (10/16, Crooks, Subscription Publication, 1.37M), the [Alaska Journal of Commerce](#) (10/16, 14K), the [International Business Times \(UK\)](#) (10/19, 159K), [AFP](#) (10/17), [Agencia EFE \(ESP\)](#) (10/17), and on the websites of [NPR](#) (10/16, 1.85M) and the [BBC News](#) (10/19, 1.68M).

Rubio's Energy Policy Would Reverse President Obama's Rules. In contrast to President Obama's position on drilling, the [New York Times](#) (10/17, Peters, Davenport, Subscription Publication, 11.82M) reports that Sen. Marco Rubio's energy policy would call for "drilling and hydraulic fracturing," which would "roll back many of the most aggressive components of President Obama's environmental agenda." Rubio unveiled his energy plans at a Friday talk in Ohio, arguing that he would allow for immediate "construction of the Keystone XL oil pipeline" and would "permit more offshore oil and gas drilling," both of which the President has pulled back from. Moreover, the Times notes that Rubio would "effectively nullify an international climate change accord the administration is pursuing" and would reverse the EPA's recent ground ozone regulation changes.

[The Hill](#) (10/16, Cama, 471K) quoted Rubio's campaign as saying, "Nowhere is the disconnect between the potential of our people and the priorities of politicians as large as in energy." Khalid Pitts, Sierra Club political director noted that "Sen. Rubio's plan appears to have been written by executives in the fossil fuel industry."

OFFICIALS DEDICATE BASIN AND RANGE NATIONAL MONUMENT. The [AP](#) (10/17, 199K) reports that Interior Secretary Sally Jewell and BLM Director Neil Kornze were "scheduled to join Democratic U.S. Sen. Harry Reid, Congresswoman Dina Titus and local officials for an evening ceremony" Saturday "at the Springs Preserve in Las Vegas." President Barack Obama "in July designated some 1,100 square miles of rangeland and mountains in Nye and Lincoln counties as Basin and Range National Monument."

The [Las Vegas Sun](#) (10/17, 199K) reports that "about 100 people gathered Saturday in cozy quarters at the Las Vegas Springs Preserve to celebrate a vast expanse of newly protected Nevada land." Kornze "discussed BLM's evolving role in managing protected lands." He said, "Conservation is something that has come to us just in the past few decades."

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/19, 344K), the [Elko \(NV\) Daily Free Press](#) (10/19, 22K), [KTVN-TV Reno \(NV\)](#) Reno, NV (10/19, 3K), [KOLO-TV Reno \(NV\)](#) Reno, NV (10/19, 3K), and [KRNV-TV Reno \(NV\)](#) Reno, NV (10/19, 2K).

OFFICIALS ATTEND OFFICIAL CEREMONY FOR SAN ANTONIO MISSIONS. The [San Antonio Express-News](#) (10/19, 884K) reports that "a host of dignitaries gathered at Mission San Jose Saturday afternoon for the formal inscription the five San Antonio missions as a UNESCO World Heritage Site." Interior Secretary Sally

Jewell, Mayor Ivy Taylor, Bexar County Judge Nelson Wirth, Alamo Director Becky Dittman, Mexican Consul General Jose Antonio Larios, U.S. Rep Lloyd Doggett and San Antonio Archbishop Gustavo García-Siller were among those who addressed the crowd.” Jewell “unveiled the official plaque which was draped in a zarape with the help of Mardi Arce, superintendent of the San Antonio Missions National Historical Park.”

Additional coverage was provided by [KJAC-TV](#) Port Arthur, TX (10/19, 66K).

SECRETARY JEWELL TO SPEAK AT SACNAS CONFERENCE. The [Indian Country Today Media Network](#) (10/16, 32K) reports that “White House advisors, business leaders and top public officials are set to address more than 3,000 people who will gather from October 29–31” for this year’s Society for Advancement of Chicanos/Hispanics & Native Americans in Science (SACNAS) annual STEM conference “at the Gaylord National Resort & Convention center just outside Washington, D.C.” Interior Secretary Sally Jewell will be among the speakers. Also, the Interior Department will “sponsor a reception with speakers who will talk about the twin influences of science and tradition on their careers.”

EXPERTS SAY BROWN INCORRECT IN LINKING WILDFIRES AND CLIMATE CHANGE. The [Los Angeles Times](#) (10/19, A1, John, 4.07M) reports that “scientists who study climate change and fire behavior” say Gov. Jerry Brown is mistaken in linking global warming with California’s wildfires. University of Colorado climate change specialist Roger Pielke “said Brown is engaging in ‘noble-cause corruption.’”

Additional Coverage: Secretary Jewell Tours Areas Of San Diego County Damaged By Wildfires.

Additional coverage of Interior Secretary Sally Jewell’s visit to San Diego was provided by the [Los Angeles Times](#) (10/19, Stewart, 4.07M) and the [San Diego \(CA\) Union-Tribune](#) (10/18, 542K).

JUSTICE DEPARTMENT IG SAYS INDEPENDENCE OF IGS MUST BE RESTORED. Justice Department Inspector General Michael Horowitz, who chairs the Council of the Inspectors General on Integrity and Efficiency, writes in a [Washington Post](#) (10/19, 6.76M) op-ed that “unrestricted access to agency records ensures” that the functions of IGs “cannot be thwarted,” but since 2010, the FBI and other agencies have “challenged their IGs’ independent oversight authority.” Pending Senate legislation “would restore IG independence and empower IGs to conduct the kind of rigorous, independent and thorough oversight that taxpayers expect.”

ADDITIONAL COVERAGE: SECRETARY JEWELL HIGHLIGHTS RISK OF NATURAL DISASTERS DURING TRIP TO WASHINGTON. Additional coverage of Interior Secretary Sally Jewell’s visit to Washington state was provided by the [Everett \(WA\) Herald](#) (10/16, 140K).

ADDITIONAL COVERAGE: SECRETARY JEWELL LAUDS SOLAR PROGRAM ON SHINNECOCK RESERVATION. Additional coverage that Interior Secretary Sally Jewell was on Long Island last month “to highlight an American Indian solar installation program on the Shinnecock reservation” was provided by the [Newsday \(NY\)](#) (10/17, 1.3M).

ADDITIONAL COVERAGE OF PUSH FOR MONUMENT DESIGNATION FOR BEARS EARS. Additional coverage of the push to protect the Bears Ears region was provided by the [Huffington Post](#) (10/19, 164K).

Empowering Native American Communities:

COUPLES SUE OVER TRIBAL ADOPTION BUREAUCRACY. The [Wall Street Journal](#) (10/17, A3, Jones, Subscription Publication, 5.95M) reports that several couples are suing over the difficulties faced in adopting American Indian children due to bureaucratic hurdles and other legal obstacles imposed under the Indian Child Welfare Act of 1978.

TRIBAL OFFICIAL’S WHITE HOUSE WORK LAUDED. The [Bismarck \(ND\) Tribune](#) (10/19, 37K) reports that “months after her departure from the White House, state and federal leaders called the work of a North Dakota Native American official who helped guide policy with tribes nationwide a rare opportunity to improve tribal life.” Jodi Gillette “served in Washington, D.C., in multiple positions from 2009 until May of this year, helping coordinate between the Barack Obama administration and tribal leaders.” Gillette, “a member of the Standing Rock Sioux Tribe, has since joined Washington, D.C.-based law firm Sonosky, Chambers, Sachse, Endreson and Perry LLP as its policy adviser.”

WARMING ARCTIC COULD UNCOVER ALASKA NATIVE ARTIFACTS. The [AC](#) (10/17, 344K) reports that “a researcher at the University of Alaska Fairbanks is attempting to predict where higher Arctic temperatures will melt snow to uncover ancient Native Alaskan artifacts.” According to the article, “perennial, stationary snow patches on the Brooks Range that accumulated over thousands of years are expected to deteriorate as the Arctic warms at double the global average.” Snow hydrology graduate researcher Molly Tedesche is “trying to predict where these fragile items will be before they decay from exposure to the elements.”

ADDITIONAL COVERAGE OF HEARING ON PROPOSED TRIBAL CASINO FOR MUSKEGON COUNTY. Additional coverage of the hearing held last week on the proposed tribal casino for Muskegon County was provided by [MLive \(MI\)](#) (10/19, 739K) and the [Grand Haven \(MI\) Tribune](#) (10/19, 26K).

Tackling America’s Water Challenges:

GILA DIVERSION AGREEMENT SENT TO INTERIOR. The [Silver City \(NM\) Daily Press](#) (10/17) reports that “the Interstate Stream Commission approved the Central Arizona Project’s New Mexico Unit Agreement for a Gila River diversion at their meeting Friday, tucked away in the Ruidoso Downs racetrack Hall of Fame.” The vote “finalized the process here in New Mexico and sent the agreement on to the U.S. secretary of Interior for final federal approval next month.”

JUDGE ORDERS RELEASE OF INFORMATION IN FOIA CASE. The [Courthouse News](#) (10/16, 7K) reports that the BOR “improperly withheld information on water transfers in drought-ridden California by refusing to answer an environmental group’s Freedom of Information Act request, a federal judge ruled Thursday.” AquAlliance “successfully argued that the bureau improperly claimed an FOIA exemption by withholding names and addresses of certain well owners participating in water transfers in the Sacramento River watershed.” U.S. District Judge Ketanji Jackson “found there is no privacy issue at stake and that the bureau cannot keep the names of well owners secret.”

COMMENT DEADLINE ON DELTA TUNNEL PLAN NEARS. The [Vacaville \(CA\) Reporter](#) (10/17, 50K) reports that “there are only a few days left for the public to comment on the controversial tunnel plan for the Sacramento-San Joaquin River Delta.” The comment deadline is Oct. 30.

CONGRESS URGED TO IMPLEMENT COMPREHENSIVE WATER PLAN. In an op-ed for the [San Jose \(CA\) Mercury News](#) (10/19, 626K), John Laird, secretary for natural resources of the state of California, writes that “as Congress considers an appropriate response to the Western drought, our experience in California gives us a keen sense of how Congress can best help.” He advises Congress to “avoid pitting water users against one another and support instead a comprehensive approach to improve water management for everyone’s benefit.” Laird notes that “two years ago, the administration of Gov. Jerry Brown developed a Water Action Plan – an ‘all of the above’ comprehensive strategy that spells out what we need to do in the coming years to bring reliability, restoration and resilience to California’s water system.” Laird hopes “federal decision-makers will build on the positive steps the leaders and voters of California already have taken and choose to reinforce our broadly supported ‘all of the above’ approach.”

Securing America’s Energy Future:

Renewable Energy:

CRITICS OF EAGLE MOUNTAIN PUMPED STORAGE PROJECT COULD FILE APPEAL. The [Riverside \(CA\) Press Enterprise](#) (10/19, 303K) reports that “critics of a proposed Mojave Desert hydroelectric generating plant said Friday, Oct. 16, that they may appeal a decision by federal regulators who refused to reconsider licensing for the project.” The \$1.4 billion Eagle Mountain Pumped Storage Project near Desert Center would “draw water from an underground basin and store it in vacant pits at a shuttered iron-ore mine to use for generating electricity.” The NPS, “nearby residents and environmentalists have long questioned the project’s environmental analysis, which they say was inadequate.”

IVANPAH SOLAR PLANT’S BURNING OF NATURAL GAS CONTRIBUTES TO POLLUTION PROBLEM. The [Riverside \(CA\) Press Enterprise](#) (10/19, 303K) reports that “a solar power plant at the center of the Obama administration’s push to reduce America’s carbon footprint by using millions of taxpayer dollars to promote green energy has its own carbon pollution problem.” The Ivanpah plant in the Mojave Desert “uses natural gas as a supplementary fuel” and “data from the California Energy Commission show that the plant

burned enough natural gas in 2014 — its first year of operation — to emit more than 40,000 metric tons of carbon dioxide.” The article notes that “that’s nearly twice the pollution threshold for power plants or factories in California to be required to participate in the state’s cap-and-trade program to reduce carbon emissions.”

Onshore Energy Development:

NPS TO UPDATE OIL, GAS DRILLING RULES. The [Summit County \(CO\) Citizens Voice](#) (10/17, 506) reports that the NPS is proposing it update its drilling regulations. The proposal would “revise current rules that are 36 years old, predating the modern fracking area.” NPS Director Jonathan B. Jarvis said, “We have a fundamental responsibility to conserve park resources for the enjoyment of future generations and the changes we’ve proposed will clarify the process for oil and gas development in the small group of parks where current operations exist, and for parks who may manage operations in the future.”

NEW MEXICO RAISES CONCERNS OVER STREAM RULE. The [Farmington \(NM\) Daily Times](#) (10/17, 44K) reports that “as the U.S. Office of Surface Mining Reclamation and Enforcement is in the final stages of updating a more than three-decades-old rule aimed at protecting waterways from coal mine pollution, state officials have complained about the input process over the proposed rule changes.” According to the article, “Secretary F. David Martin — head of New Mexico’s Energy, Minerals and Natural Resources Department — voiced his complaints to OSMRE in a Feb. 20 letter, withdrawing the state of New Mexico as a cooperating agency from official participation in the rule update process.” Martin said that “over the course of the multiyear draft process that informs the rule changes, OSMRE did not provide agencies with a reasonable amount of time to provide input on the rule’s draft environmental impact statement.” He also “expressed concerns over the ‘quality, completeness and accuracy’ of the EIS, as well as additional opportunities to provide comments on the statement.”

BIA HOLDS OIL, GAS LEASE SALE. The [Enid \(OK\) News & Eagle](#) (10/19, 40K) reports that “an oil and gas leases sale by Bureau of Indian Affairs Concho involved more than 1,000 acres in Blaine County.” The article notes that “the sale totaled more than 400 tracts of land involving 31,000 mineral acres” and “total sales from the auction were \$50 million in oil and gas lease bonuses.”

PUBLIC COMMENT TO BEGIN SOON FOR TRAPPER COAL MINE. [Steamboat \(CO\) Pilot & Today](#) (10/16, 30K) reports that “the Office of Surface Mining Reclamation and Enforcement will begin the 30-day public comment period on Trapper Mine’s environmental assessment with a community outreach meeting on Oct. 29.” Representatives from OSMRE and Trapper Mining, Inc., will be “present to explain the National Environmental Policy Act and answer questions on the process.”

MURRAY ENERGY LEADING CHARGE AGAINST FEDERAL REGULATIONS. The [Pueblo \(CO\) Chieftain](#) (10/19, 87K) reports that Murray Energy, “the nation’s largest privately held underground mining company, is leading the charge in eight lawsuits against various federal agencies.” One of its lawsuits is “against the Department of Interior for not satisfying Murray’s request for records about the agency’s proposed Stream Protection Rule that Murray has called ‘the single greatest threat to the jobs and family livelihoods of our employees.’”

Offshore Energy Development:

BP SPILL WORSE THAN EXPECTED FOR GULF WILDLIFE. The [Houston Chronicle](#) (10/17, Baddour, 2.28M) reported that a new report recently released by the Justice Department highlights how the BP Deepwater spill was worse than understood on Gulf of Mexico wildlife. According to the 700 page report, “hundreds of billions of Gulf creatures perished.” The spill has also resulted in one of the largest settlements for an oil spill, with BP paying the U.S. government \$20 billion to cover repairs to the Gulf’s environment, including wildlife.

DOLPHIN DIE-OFF FOLLOWING BP OIL SPILL APPEARS TO BE LEVELING-OFF. The [Christian Science Monitor](#) (10/18, 455K) reports “scientists say the 5-year dolphin die-off” that resulted from “BP’s 2010 Deepwater Horizon oil spill in the Gulf might be coming to an end.” National Marine Fisheries Service research biologist Jenny Litz “said Friday that dolphin mortalities in the Gulf coast region have declined ‘since the peak years of 2010 to 2014.’” BP doesn’t “take responsibility for the die-off, citing frequent die-offs in the past and other, unrelated bacterial diseases in the Gulf.” But experts with the National Oceanic Atmospheric Administration disagree, saying “never have the dolphins experienced a die-off that has lasted as long, involved as many animals, or affected as many calves.”

The [AP](#) (10/19) also provides coverage of this story.

America's Great Outdoors:

Bureau of Land Management:

TEXAS GOV. ABBOTT ACCUSES BLM OF ILLEGAL LAND GRAB. The [Dallas Morning News](#) (10/16, 1.15M) reports that “in a strongly-worded letter released Friday, Texas Gov. Greg Abbott asked the Bureau of Land Management to end an ‘unconscionable land grab’ along the Texas-Oklahoma border.” In the letter, Abbott accuses the BLM “of attempting to take control of land ‘privately owned and managed for decades’ by Texans.” Abbot “complained that the Bureau of Land Management has lacked transparency throughout the process.”

Additional coverage was provided by the [Gilmer \(TX\) Mirror](#) (10/19, 12K), the [Wichita Falls \(TX\) Times Record News](#) (10/19, 65K), the [Longview \(TX\) News-Journal](#) (10/16, 64K), the [Texas Tribune](#) (10/16, 10K), and the [Examiner](#) (10/19, 1.34M).

WYOMING STOCK GROWERS CHALLENGES SAGE GROUSE PLANS. The [AP](#) (10/19, 2.28M) reports that “the Wyoming Stock Growers Association has filed a legal challenge to a series of federal sage grouse plans, saying they overstep the government’s authority.” The association “filed a petition for review Wednesday in federal court.” The BLM and U.S. Forest Service “amended nine land management plans in the state to include new grouse conservation measures.” The stock growers claim “the new rules hamper ranchers’ ability to effectively run their operations.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (10/16, Press, 6.76M), the [Washington \(DC\) Times](#) (10/16, 344K), and the [Daily Mail \(UK\)](#) (10/19, 5.59M).

HELICOPTER CRASHES NEAR SEARCHLIGHT DURING CATTLE ROUNDUP. The [AP](#) (10/19, 75K) reports that “authorities say a helicopter that was helping the Bureau of Land Management round up cattle crashed near Searchlight.” According to the article, the “pilot was located and declined medical treatment, saying he only had a sore back”

Additional coverage was provided by the [Washington \(DC\) Times](#) (10/19, 344K), [KVVU-TV Las Vegas \(NV\)](#) Las Vegas (10/19, 118K), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (10/19, 494K).

VOLUNTEERS BUILD TRAIL IN COLORADO WHERE DINOSAURS ROAMED. [KRDO-TV](#) Colorado Springs, CO (10/19, 45K) reports that “volunteers from all over Colorado are building a trail where dinosaur fossils were found.” Volunteers for Outdoor Colorado and the BLM “teamed up on the project at the Garden Park Fossil Area north of Canon City.”

Fish and Wildlife Service:

THREATENED SEA DUCK MAY BE REINTRODUCED IN SOUTHWEST ALASKA. The [AP](#) (10/19, 2.28M) reports that “a colorful, threatened sea duck whose numbers plummeted in Alaska may be reintroduced to the southwest corner of the state.” FWS officials are “taking public testimony on possible environmental effects of a plan to move breeding pairs of Steller’s eiders to the Yukon-Kuskokwim Delta, where the birds once thrived.” The agency’s “proposal calls for the release of Steller’s eiders raised in captivity at the Alaska SeaLife Center in Seward.”

Additional coverage was provided by the [US News & World Report](#) (10/16, 811K), the [Washington \(DC\) Post](#) (10/16, Dan Joling |, Ap, 6.76M), the [Washington \(DC\) Times](#) (10/16, Joling, 344K), and the [Business Insider](#) (10/19, 2.93M).

PRESCRIBED BURN ON ARAPAHO NATIONAL WILDLIFE REFUGE GETS OUT OF CONTROL AND DAMAGES STRUCTURES. The [AP](#) (10/19) reports that “a prescribed burn that jumped containment lines destroyed three structures and charred about 600 acres of grass.” According to the article, “no injuries were reported, but the fire burned a mobile home that was used for storage, a pump house and a barn.” The FWS says “crews started a prescribed burn on the Arapaho National Wildlife Refuge and it got out of control.”

Additional coverage was provided by the [Denver \(CO\) Post](#) (10/19, 787K) and [KMGH-TV Denver \(CO\)](#) Denver (10/19, 121K).

COOPERATION IS KEY TO WETLANDS PLANNING, PROTECTION AND RESTORATION ACT. The [AP](#) (10/15, 344K) reports that “for those involved with coastal Louisiana restoration and protection, a law that funnels federal money to local projects has been a model for cooperation between federal, state and local entities.” Funds “from the Coastal Wetlands Planning, Protection and Restoration Act, which has grown from about \$30 million to nearly \$80 million annually, helps pay for projects benefiting wetlands.” The article notes that “the task force that manages the program includes representatives from the state, U.S. Environmental Protection Agency, U.S. Fish and Wildlife Service, U.S. Department of Agriculture-Natural Resources Conservation Service, NOAA-National Marine Fisheries Service and the U.S. Army Corps of Engineers.”

PARTNERSHIP FORMED IN ASIAN CARP BATTLE. The [Ottawa \(IL\) Daily Times](#) (10/19, 50K) reports that “keeping Asian carp out of the Great Lakes is being taken on by a partnership of the U.S. Forest Service’s Midewin National Tallgrass Prairie and the U.S. Fish & Wildlife Service.” Recently, “Wade Spang, Midewin National Tallgrass Prairie supervisor, signed a formal agreement using Service First partnership authority.” The partnership enables the FWS “to locate staff and resources closer to the Chicago Area Waterways/Electric Dispersal Barrier, where the Asian carp battle is occurring.”

6,300 LAKE STURGEON RELEASED INTO MICHIGAN WATERS. The [AP](#) (10/16, 910K) reports that “state officials say more than 6,300 juvenile lake sturgeon were released into Michigan waterways this summer and fall in a continuing effort to restore the ancient species.” The Department of Natural Resources “teamed with Native American tribes and other partners on the projects, including Michigan State University and the U.S. Fish and Wildlife Service.”

VENOMOUS YELLOW-BELLIED SEA SNAKE HITS CALIFORNIA SHORE. The [Los Angeles Times](#) (10/16, Gordon, 4.07M) reports that “for the first time in 30 years or so, a poisonous sea snake has been spotted on a Southern California beach, drawn far north of its usual habitat by what naturalists think are the warming ocean waters because of El Niño.” According to officials at the Heal the Bay organization and the Natural History Museum of Los Angeles County, “a yellow-bellied sea snake, *Pelamis platurus*, was found Friday at the high tide line at Silverstrand Beach in Ventura County by a surfer.” The reptile “found Friday died shortly after being transported to the U.S. Fish and Wildlife Service’s office in Ventura.”

Additional coverage was provided by [USA Today](#) (10/17, Thadani, 5.23M), the [Los Angeles Times](#) (10/17, Sahagun, 4.07M), the [Atlanta \(GA\) Journal-Constitution](#) (10/19, 1.05M), the [Daily Mail \(UK\)](#) (10/17, Dailymail.com, 5.59M), [Yahoo! News](#) (10/19, 5.98M), [WDIV-TV Detroit \(MI\)](#) Detroit (10/19, 348K), and [KLTV-TV Tyler \(TX\)](#) Tyler, TX (10/19, 79K).

CAMERON PRAIRIE REFUGE CUTS STAFF, OFFICE HOURS. The [Washington Times](#) (10/16, 344K) reports that the FWS says “the Cameron Prairie National Wildlife Refuge’s office and visitor center is cutting back its hours because of staff cuts and other recent changes.”

FWS PUTS RARE MACAWS ON ENDANGERED SPECIES LIST. The [Summit County \(CO\) Citizens Voice](#) (10/19, 506) reports that “two rare bird species in Central and South America will get protection under the Endangered Species Act, the U.S. Fish and Wildlife Service announced last week.” Under the listing, “military and great green macaws can’t be imported into, or exported out of, the U.S.”

FWS SAYS PROTECTION FOR TWO MINNOW SPECIES WON’T AFFECT HAVASU. The [Havasu \(AZ\) News-Herald](#) (10/19, 27K) reports that “federal protections for two small fish found in the Colorado River system won’t affect Lake Havasu, a U.S. Fish and Wildlife official said last week.” The FWS is “petitioning for two species of minnow to be added to a list of threatened species.” According to the article, “the headwater chub and the roundtail chub would join the bonytail chub and the razorback sucker among the region’s protected species.”

SAGE GROUSE DECISION WELCOMED. In an op-ed for the [Casper \(WY\) Star-Tribune](#) (10/19, 115K), Holly Copeland, a scientist with The Nature Conservancy in Wyoming, writes that the recent decision to not list the greater sage grouse was correct, but come with “caveats and subtleties.” She lauds “the largest landscape-scale conservation effort in U.S. history, spurred by the threat of an endangered species listing for sage grouse,” and says that the decision should not be read “to mean the sagebrush system doesn’t need our help.”

rather, she warns, quite the opposite – truly, in the next few decades we could lose these lands to invasive cheatgrass, fire, and development.”

Additional coverage of the sage grouse decision was provided by the [Montana Kaimin](#) (10/19, 11K).

National Park Service:

NPS DIRECTOR JARVIS HONORED. The [Lexington \(VA\) News-Gazette](#) (10/19, 120) reports that NPS Director Jon Jarvis was secluded to be “honored with a public event in Glasgow” on Saturday.

[WDBJ-TV](#) Roanoke, VA (10/19, 159K) reports that “the homecoming celebrated his dedication to the environment and conservation.” Funds “raised will go towards the ‘Jon Jarvis Legacy Fund’ which supports environmental outreach programs.” Jarvis says “he wants to inspire others to respect our environment and reach for the stars.” He said, “I hope that they see opportunity. My family didn’t have any money. When I went to college, I worked three jobs. You can do it, I think that’s the key, you can do it, anybody can do it. If I can do it and come from Rockbridge County and be the director of the National Park Service, anybody can do it.”

NPS CELEBRATES 50TH ANNIVERSARY WITH LESSON PLAN. The [Mountain View Telegraph](#) (10/19) reports that the NPS ‘s “Teaching with Historic Places and HISTORY have partnered to celebrate the upcoming 50th anniversary of the National Historic Preservation Act (NHPA) with a lesson plan about the act signed into law on Oct. 15, 1966.” The NHPA “provides individuals and communities the tools to nominate significant places to the National Register of Historic Places; a national program that encourages and supports preservation of sites that are important to local, state, or national history.” According to the article, “in the lesson, designed for middle and high school curriculums, students will learn about historic preservation by identifying and investigating historic properties listed on the National Register of Historic Places in their own community.”

NPS STUDY ON RECONSTRUCTION SITES TO INCLUDE FLORENCE COUNTY LOCATIONS. The [Florence \(SC\) Morning News](#) (10/19, 86K) reports that “Jamestown, Mt. Zion United Methodist Church of Florence, Wilson High School and the Lake City Post Office are eligible to participate in a Reconstruction-themed study conducted by The National Park Service.” Michael Allen, community partnership specialist for the NPS in Charleston, said, “The National Park Service uses this as a tool to gain a deeper awareness and understanding, and sometimes clarity, for a specific basis of our American experience.”

PROJECT TO REVITALIZE ST. LOUIS ARCH. The [Wall Street Journal](#) (10/19, Barrett, Subscription Publication, 5.95M) reports that a coalition of public and private groups has raised some \$380 million to give the Gateway Arch in St. Louis a facelift. Next week, crews will complete an extension over Interstate 44 of a downtown park that will create a connection between the city and the monument. The article notes that the new parkland over the highway arrives in time for celebrations culminating with the 50th anniversary on Oct. 28.

TOURISM CAMPAIGN TO PROMOTE SOUTHERN WEST VIRGINIA’S THREE NATIONAL PARKS. The [AP](#) (10/19, 344K) reports that “a new marketing campaign will build on underappreciated national parks in southern West Virginia that already attract more than 1 million visitors annually to the region.” Visit Southern West Virginia said “the campaign will harness the power of the National Park Service to lure more visitors to the New River Gorge National River, Gauley River National Recreation Area and the Bluestone National Scenic River.” Christy Bailey of Visit Southern West Virginia said, “This campaign will increase visibility of our parks, celebrate their unique qualities and bring new visitors to the region to appreciate and experience them.”

Additional coverage was provided by the [Columbus \(IN\) Republic](#) (10/19, 75K) and [Skift](#) (10/18).

GROUNDBREAKING CEREMONY HELD FOR C&O CANAL PROJECT. The [AP](#) (10/16, 344K) reports that the NPS is “starting work on a project to raise a steel ‘lift bridge’ on the Chesapeake and Ohio Canal at Williamsport.” The article notes that “the ceremonial groundbreaking on Friday marks progress toward the agency’s goal of making the western Maryland town a showpiece near the mid-point of the nearly 185-mile historical park.”

ABOUT 70 WIND CAVE BISON TO BE TRANSFERRED TO PRESERVES. The [AP](#) (10/19, 344K) reports that “bison from Wind Cave National Park are scheduled to be transferred to preserves in South Dakota and other states to help form new or boost existing herds.” The NPS says “about 70 bison are part of this year’s

relocation effort. The article notes that the bison transferred out of state are going to Missouri, Iowa, Kansas and Illinois.”

CIVIL WAR SOLDIER’S REMAINS TO BE REBURIED IN SPRINGFIELD NATIONAL CEMETERY. The [AP](#) (10/16, Hollingsworth, 344K) reports that “the remains of a Civil War soldier will be reburied in a southwest Missouri cemetery four years after they were illegally removed from a national battlefield site.” According to the article, “the soldier’s bones, which will be interred Saturday at the Springfield National Cemetery, were collected in 2011 as Coy Matthew Hamilton was canoeing through the Wilson’s Creek National Battlefield Site near Springfield.” Prosecutors said “Hamilton, who was looking for artifacts after a storm, saw a bone sticking out of an embankment and started digging,” and “about 10 days later, he turned the bones into the National Park Service.”

HOLES IN MOUNT BALDY LIKELY CAUSED BY BURIED “GHOST FOREST”. The [AP](#) (10/17, 344K) reports that “trees slowly buried by windblown sand are likely the root cause of dangerous holes that have appeared in a towering sand dune on the Indiana Dunes National Lakeshore.” Geologist Erin Argyilan “believes pockets were formed around tree branches and trunks enveloped by Mount Baldy.” Argyilan says that “created a ‘ghost forest’ beneath the sand.”

GRAND CANYON TO SHUTDOWN WATER PIPELINE FOR REPAIRS. The [AP](#) (10/16, 344K) reports that “Grand Canyon visitors and residents are being urged to conserve water while a section of a pipeline serving the national park is replaced.” Crews were scheduled to “shut off the Transcanyon Pipeline at Phantom Ranch on Sunday.” The shutdown is expected to last a few days.

EVERGLADES NATIONAL PARK SEEKS VOLUNTEERS TO PRESERVE COLD WAR HISTORY. The [Miami Herald](#) (10/19, 651K) reports that “the U.S. Army Corps of Engineers built the Nike Hercules Missile Base HM-69 at Everglades National Park immediately following the Cuban Missile Crisis of October 1962.” Currently, “the site serves no official use, but is a relic of the height of the Cold War in South Florida.” Now, “to continue to preserve the oral history of the site, Everglades National Park is seeking volunteers to lead tours and collaborate with veterans.”

SUPREME COURT TO HEAR CASE ON NPS AUTHORITY. For “The Blog” of the [Huffington Post](#) (10/16, Flattau, 164K), Edward Flattau, and environmental newspaper columnist, hopes “that the U.S. Supreme Court resists undermining the natural integrity of our national parks and federally designated wilderness areas” in “a case, which if reversed, could conceivably wreak havoc on protected wilderness.” Flattau hopes that the Ninth Circuit Court’s ruling that the NPS “had the authority to bar a plaintiff hunter from using his hover craft to mow down moose on a state-owned section of the Nation River” is upheld. Flattau argues that “when preservation of the nation’s unique wilderness heritage is at stake, disruptive commercial activities in the midst of the protected area are out of bounds, even on state and/or privately owned inholdings.”

RESTORATION OF WATER FLOWS TO EVERGLADES NATIONAL PARK URGED. For “The Blog” of the [Huffington Post](#) (10/16, Farago, 164K), Alan Farago, an environmental activist, writes that “the flow of Everglades waters have been blocked by Tamiami Trail and large scale farming at the edge of the Everglades, creating flood protection conflicts with land owners, spurred by idiotic developments like the 8.5 Square Mile Area in western Miami-Dade County sticking like a sore thumb into the middle of Everglades wetlands.” He says that “to move water south, water managers have built a multi-hundred million work-around.” Farago says that is “great if you are a property owner in a place where government should never have allowed development in the first place, lousy if you are a nesting roseate spoonbill.”

PROPOSED NATIONAL PARK IN MAINE SUPPORTED. For “Stirring The Pot” at the [Bangor \(ME\) Daily News](#) (10/18, 223K), Mark W. Anderson writes “about the proposed Katahdin Woods and Waters national park and national recreation area.” He says that “two issues are important to deciding whether a new national park is a good idea. What would a new park add to Maine’s opportunities in our vast forest resources? Who should get to decide whether this is the right thing to do?” In the end, Anderson is “in favor of a National Park in Maine’s North Woods.”

Top National News:

OBAMA HAILS “IMPORTANT MILESTONE” AS IRAN NUCLEAR DEAL IS FORMALLY ADOPTED. Ninety days after the UN Security Council endorsed the Iran nuclear deal, the President on Sunday marked “adoption

day by signing an executive order directing the Administration to begin issuing waivers to Iran nuclear sanctions once Tehran meets its obligations under the agreement. While the network news broadcasts did not mention the development, print and online coverage is extensive, with reports casting it as a key milestone and a major win for the President. Reports also note that that Administration officials are stressing that full implementation could take months.

[Reuters](#) (10/19) quotes the President as saying, "Today marks an important milestone toward preventing Iran from obtaining a nuclear weapon and ensuring its nuclear program is exclusively peaceful going forward." [The Hill](#) (10/18, Laing, 471K) called implementation of the agreement "a big win for Obama, who staked much of his remaining political capital on getting the pact through a divided Congress," but [Roll Call](#) (10/18, Dennis, 113K) reported that House Foreign Affairs Committee Chairman Ed Royce said in a statement that the Administration "'is looking more naive by the day' given what has transpired in the 90 days since the UN Security Council endorsed the deal." Citing "a host of factors, including the Iran-Russia alliance backing Syria President Bashar Assad; Iran's testing of a long-range ballistic missile in violation of UN sanctions; the conviction of Washington Post reporter Jason Rezaian on espionage charges while other Americans are also held by Iran; and a lack of cooperation by Iran in disclosing its previous bomb work," Royce said, "If this is what the last 90 days look like, the next few years look like a disaster."

[USA Today](#) (10/19, Korte, 5.23M) cites "four administration officials" who said the order "is a mere formality, driven more by the calendar than by any action by Iran." State Department spokesman John Kirby said that "adoption day is a calendar-driven event and it's the day at which all the parties begin to take the steps they need to make sure they take to get to implementation day. ... And we're not at implementation day; that's a whole different purpose."

[AFP](#) (10/19, Clark) notes that "implementation day" will come when the IAEA "confirms Iran has dramatically scaled back its nuclear program," a "lengthy process" Iran said will "probably start this week." [Bloomberg News](#) (10/19, Tirone, 2.66M) says that according to "diplomats," sanctions "probably will be lifted within the first three months of 2016, after the International Atomic Energy Agency has confirmed the nation has curtailed its nuclear work." On its website, [Fox News](#) (10/18, 8.91M) noted that Iran's atomic energy chief, Ali Akbar Salehi, said on Iranian state TV that "Tehran was ready to begin taking steps to comply, and awaited an order from President Hassan Rouhani." Salehi said, "We are hopeful to begin in the current or next week."

[Al Arabiya](#) (10/18, 22K) notes on its website that Tehran has expressed hope that "'implementation day' will come quickly, in less than two months." The [Washington Post](#) (10/19, Morello, 6.76M) also says Iran "is impatient to jump-start its faltering economy before parliamentary elections in late February, and President Hassan Rouhani has said the complicated work needed to lift sanctions is expected to be completed in just six to eight weeks."

However, the [AP](#) (10/19, Freking) reports that "senior administration officials" said that "Iran's work will almost certainly take more than the two months Iran has projected." The officials, who "spoke in a conference call with reporters" under the condition that they remain anonymous, said that while they "understand it's in Iran's best interest to work quickly," they are "only concerned that the work is done correctly." The [New York Daily News](#) (10/19, Edelman, 3.75M) similarly notes that "US officials admitted it could take the rogue regime months to live up to its end of the accord."

On its website, [Voice of America](#) (10/18, Schwartz, 32K) reported that Secretary of State Kerry "said a finalized deal could have ramifications for years to come." Kerry said in a statement, "Iran will now begin taking all of the necessary steps outlined in the JCPOA to restrain its nuclear program and ensure that it is exclusively peaceful going forward." [Kuwait News Agency](#) (10/19) quotes Kerry's statement as saying, "Ambassador Tom Shannon and Ambassador Steve Mull will represent the US at the first meetings of the Joint commission created by the (Joint Comprehensive Plan of Action) JCPOA this week, which will focus on ensuring that all participants remain on track for Implementation Day, and we will continue to stay in close touch with Congress going forward."

[Voice of America](#) (10/18, Schwartz, 32K) also noted on its website that while the EU "also passed legislation Sunday allowing its members to start looking at ending sanctions," German Foreign Minister Frank-Walter Steinmeier "predicted the sanctions will remain until Iran proves it is living up to its side of the bargain," saying, "That definitely won't be the case before the end of January. Now the question is whether Iran shows that it can fulfill its commitments."

The [AP](#) (10/19) reports the IAEA said Sunday that Iran has agreed to allow greater monitoring of Tehran's commitment" to the deal. The agency said Iran will "provisionally apply" the agreement once the nuclear deal is implemented. [Al Jazeera America](#) (10/18, 109K) noted on its website that Iran told the IAEA in Vienna that it "would fulfill a commitment under the deal to implement the Additional Protocol to its Comprehensive Safeguards Agreement, allowing UN nuclear inspectors more intrusive access to Iranian facilities." The IAEA said in a statement that Iran "will take that step on 'implementation day,'" which "when the agency is due to have verified that Tehran has implemented restrictions on its nuclear activities and sanctions should be lifted." [AFP](#) (10/19) calls the agreement "a further step in the implementation" of the nuclear deal reached last summer.

The [Tehran Times](#) (10/19, 3K) reports that Ali Akbar Velayati, a top adviser to Supreme Leader Ayatollah Ali Khamenei, told Iranian state TV, "On implementation, all should be watchful that Westerners, particularly Americans, to keep their promises," adding that "Iran expects that the United States and other Western countries that negotiated the deal will show their 'good will' through lifting sanctions."

The [Wall Street Journal](#) (10/19, Schwartz, Solomon, Subscription Publication, 5.95M) says Administration officials sought to downplay the significance of an IAEA probe into whether Iran has tried to develop technology needed to build nuclear weapons in secret, saying the IAEA report would not impact efforts by the international community to lift sanctions. According to the Journal, a senior official said implementation day was not contingent on the IAEA report.

LA Times Feature: "Ordinary Iranians" Skeptical Things Will Get Better Under Deal. The [Los Angeles Times](#) (10/19, McDonnell, 4.07M) says that on the streets of Tehran, "there is little sense...that momentous change is imminent." This, as efforts by the Iranian government "to tamp down expectations and obscure details of the accord appear to have left many ordinary Iranians mystified – and worried as ever about diminished purchasing power and scarce job opportunities in the sanctions-battered economy." Many "ordinary Iranians," the Times adds, "are openly skeptical that things will get much better – or just not sure what all the fuss is about."

Iran Preparing For "Tsunami" Of Foreign Tourists. The [AP](#) (10/19, Dareini) reports that Iranian Vice President Masoud Soltanifar, who also serves as Cultural Heritage, Handicrafts and Tourism Organization chief, said Iran "is preparing for a 'tsunami' of foreign tourists" as the world begins implementing the deal. Soltanifar said Rouhani's "moderate policies and the easing of visa rules are opening the door for the return of foreign tourists to Iran," adding that "officials are trying to remove obstacles for tourists and issue visas on arrival at the airport in Tehran for nationals of 190 countries."

Professor: Obama's Legacy Could Hinge On How Agreement Plays Out. In an analysis for the [Christian Science Monitor](#) (10/18, 455K), Andrew J. Bacevich, a professor emeritus of history and international relations at Boston University, wrote that if the deal is successful, "it may mark a first step toward restoring some semblance of stability to the Greater Middle East, thereby allowing the US to lower its profile there," but if it fails, "the current disorder may in retrospect seem tame." The President, he adds, "may yet leave a foreign-policy legacy of real consequence," but whether "that legacy is positive or negative may take years to determine." The President's "reputation as a statesman is likely to hinge on how the Iran nuclear pact plays out."

Dissidents: Western "Appeasement" Is Emboldening Iranian Regime. The [Washington Times](#) (10/19, Taylor, 344K) cites two Iranian dissidents who say "the West's wider policy of appeasement toward Tehran is emboldening Iranian leaders." Farzad Madadzadeh and Parisa Kohandel say "the crackdown on political opposition has grown more intense just as Iran's leaders have sought to appear moderate on reaching the nuclear deal and getting the US and its allies to lift sanctions." According to Madadzadeh, the President and Western leaders "have been duped into believing Mr. Rouhani is moderate when reality shows the Iranian president is 'no different' from supreme religious leader Ayatollah Sayyid Ali Hosseini Khamenei and other mullahs who wield the real power in Iran."

RYAN ANNOUNCEMENT ON SPEAKER'S RACE EXPECTED SOON. [USA Today](#) (10/19, Kelly, Singer, 5.23M) reports that as Congress returns from its week-long break, it faces "a simmering pot of palace intrigue as House Republicans continue to struggle to identify the next speaker." USA Today notes several legislative issues "to keep both chambers busy this week" but says the "most pressing business" for the House "continues to be choosing a new speaker." House Ways and Means Chairman Paul Ryan, who is being encouraged to run, "is expected to announce" his decision soon, while some of the conservatives who

prompted Majority Leader McCarthy to drop out of the race are also rallying against Ryan. Meanwhile, there are a half dozen other House Republicans who have hinted they may run if Ryan does not.”

The [Wall Street Journal](#) (10/19, Hughes, Peterson, Subscription Publication, 5.95M) notes that the absence of a clear successor for Boehner is exacerbating tensions within the House GOP as various factions within the caucus maneuver for power, while the [AP](#)

Secretary Jewell Joins Nevadans to Celebrate Designation of Basin and Range National Monument

Designation preserves stunning landscapes, ancient rock art; protects existing ranching, military and recreation uses

SOUTHERN NEVADA – As part of President Obama’s commitment to protect the nation’s significant outdoor spaces for the benefit of future generations, U.S. Secretary of the Interior Sally Jewell and Director of the Bureau of Land Management Neil Kornze joined U.S. Senator Harry Reid and U.S. Rep. Dina Titus (NV-1) to celebrate the recent designation of Basin and Range National Monument in southeastern Nevada. The site, an unbroken expanse of 704,000 acres of rugged mountains and sweeping valleys, highlights the proud history of the West, from its earliest native peoples to more recent settlers and mining communities.

“This spectacular expanse of rugged public lands helps tell the story of Nevada, its people, its rich history and the stunning, open landscapes for which the state is known,” said Secretary Jewell. “By protecting this area, the President has ensured that one of the most treasured landscapes of the American West will be available for all future generations to discover and explore.”

“The Basin and Range National Monument is the perfect example of the West’s rugged, stark beauty. It is the same land where ancient people took shelter and carved their history into incredible rock panels that can still be seen today. It is still the land of desert bighorn sheep, mule deer, elk and pronghorn antelope. This area is truly a time capsule of our western history, from Native Americans and early explorers, to the mining and ranching that still exists today. And with President Obama’s designation of this area as a national monument, the land will remain that way,” Senator Reid said. “Thanks to President Obama, future generations will be able to enjoy the beauty of this Nevada landscape for many years to come. I cannot express how grateful I am to President Obama and Secretary Jewell for their incredible efforts in making this monument a reality. I look forward to continuing our work together and helping to preserve even more of our country’s beautiful landscapes.”

On July 10, President Obama designated the Basin and Range area as a national monument. This followed efforts by Sen. Reid and Rep. Dina Titus to pass legislation through Congress that would have protected the area. It is now one of the three newest national monuments, including Berryessa Snow Mountain in California and Waco Mammoth in Texas. The President’s designation protects outstanding recreational opportunities like hiking, hunting, horseback riding, mountain biking, fishing and rock climbing.

“Reflecting the best in public space and public art, the Basin and Range National Monument will preserve and protect the unique natural, cultural, and historical resources of central Nevada for generations to come,” Rep. Titus said.

NEVADA BUSINESSES, INCLUDING MGM RESORTS INTERNATIONAL, the state's largest employer; Wynn Resorts, Barrick Gold Corporation, and Rockwood Lithium North America, as well as the Las Vegas Metro Chamber of Commerce and the Las Vegas Convention and Visitors Authority, have also supported protection of the area. Additional support also came from a broad array of community groups, including private landowners, elected officials, art institutions, conservation and recreation organizations, and representatives from businesses in the state.

From the earliest human inhabitants 13,000 years ago to the miners and ranchers of the past century, the monument's cultural sites offer exemplary opportunities to further study and understand this unique landscape and its history.

The area's location, on the transition between the Mojave Desert and the sage brush steppe of the Great Basin region, makes it home to a wide diversity of plants and wildlife, including desert bighorn sheep, golden eagles, and a host of bat, lizard, and snake species.

The Basin and Range National Monument is located in Lincoln and Nye counties about two hours from downtown Las Vegas. It preserves current uses of the land, including traditional ranching practices and ongoing military training operations, while ensuring that the land remains unspoiled for future generations. It also contains a wealth of scientifically significant geological, ecological, cultural, and historical resources – including Native American rock art dating back 4,000 years – and is an important area for studies of paleoecology, seismology, archaeology, and paleoclimatology.

In addition, the landscape sculpture *City* by artist Michael Heizer is situated on private land within the monument. Comparable in size to the National Mall in Washington, D.C., the work explores contemporary and ancient American influences in the context of the stark and open landscape. Protection of the work and its surroundings has been supported by major American art institutions such as the Nevada Museum of Art, Los Angeles County Museum of Art, the Metropolitan Museum of Art, and the Museum of Contemporary Art.

Comprised of existing federal lands, the monument will continue to be managed by Interior's Bureau of Land Management (BLM). Basin and Range is the newest addition to the [National Conservation Lands](#), a special system of protected areas managed by the BLM that contains some of the West's most spectacular and unique landscapes, including Red Rock Canyon National Conservation Area outside Las Vegas.

“Important uses like ranching, hiking and riding will all continue to be welcome in the Basin and Range National Monument,” said BLM Director Neil Kornze. “We are committed to working with the people of Lincoln, Nye and White Pine counties to ensure that this protected area continues to serve the needs of those communities.”

The BLM will prepare a management plan for the monument in formal cooperation with the State of Nevada, local governments, and tribes. The plan will be developed in an open process with maximum public involvement.

Also participating in the event were Jenna Morion, a member of the board of the Las Vegas Springs Preserve; Erin Wright, director of artist initiatives, Los Angeles County Museum of Art; and Brian O'Donnell, executive director of the Conservation Lands Foundation.

For more information on the Basin and Range National Monument, including maps and unique visitor experiences, go to www.blm.gov/conservationlands.

DOI in the News:

SECRETARY JEWELL HIGHLIGHTS RISK OF NATURAL DISASTERS DURING TRIP TO

WASHINGTON. The [Seattle Times](#) (10/16, 962K) reports that Interior Secretary Sally Jewell “traveled to Washington Thursday to discuss heightened risk of natural disasters because of climate change.” According to the article, “in Oso, Snohomish County, slammed by a mudslide that claimed 43 lives last year, Jewell and U.S. Rep. Suzan DelBene, D-Medina, watched an earthquake- preparedness drill and walked the disaster site.” Then, “later in Seattle, Jewell met with a panel of scientists, environmental and tribal leaders on the topics of fire, floods, earthquakes, landslides, sea-level rise and more. Preparedness was the watchword.”

[KPLU-FM](#) Tacoma, WA (10/16, 14K) reports that Jewell saw the site of “the tragic mudslide in Oso that killed 43 people.” Jewell was “home in the Northwest highlighting the need for more disaster preparedness.” She “went to the landslide site before taking part in an earthquake drill with students from Darrington.”

[KIRO-TV](#) Seattle (10/16, 142K) reports that Jewell said, “We know a lot more now than we did when the slide occurred.” According to the article, “that’s thanks to work being done behind the scenes by the USGS, including LIDAR work – or light detection and ranging – a type of work being done to map the topography in and around Oso.”

Additional coverage was provided by the [Everett \(WA\) Herald](#) (10/16, 140K), [KCPQ-TV](#) Seattle (10/15, 161K) and [KING-TV](#) Seattle (10/15, 316K).

Great ShakeOut Earthquake Safety Drills Held Thursday. The [AP](#) (10/16) reports on FEMA’s Great ShakeOut earthquake safety drills that took place Thursday, where the “drop, cover, and hold” response was practiced by more than 22 million people nationwide, nearly half of whom were in California. Los Angeles Mayor Eric Garcetti warned, “Things that are falling will kill you.” Interior Secretary Sally Jewell participated Thursday in a ShakeOut drill in Oso, Washington. More than dropping and covering, “the Shakeout is designed to simulate more coordinated and widespread action,” the AP notes. The US Geological Survey (USGS) and others assisted FEMA in coordinating the drills.

The [Boston Globe](#) (10/16, Roberts, 1.1M) reports that the exercises “garnered nearly 500,000 participants from the Northeast,” despite the relatively low risk of seismic activity in the region, according to USGS hazard maps.

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (10/16, 2.28M), [ABC News](#) (10/16, 3.97M), the [Daily Mail \(UK\)](#) (10/16, 5.59M), the [Lufkin \(TX\) Daily News](#) (10/16, 1K), the [Seattle \(WA\) Times](#) (10/16, 962K), the [Quincy \(IL\) Herald-Whig](#) (10/16, 99K), the [Minneapolis \(MN\) Star Tribune](#) (10/16, Press, 1.19M), the [Visalia \(CA\) Times-Delta](#) (10/15, 27K), the [Oklahoman](#) (10/16, 408K), the [San Luis Obispo \(CA\) Tribune](#) (10/14, 114K), the [Monterey County \(CA\) Herald](#) (10/15, 86K), the [Contra Costa \(CA\) Times](#) (10/16, Staff, Reports, 253K), the [Clark County \(WA\) Columbian](#) (10/15, 86K), [Yahoo! News](#) (10/16, 5.98M), [KNTV-TV San Jose \(CA\)](#) San Jose, CA (10/16, 150K), and [WAPT-TV Jackson \(MS\)](#) Jackson, MS (10/16, 52K).

CALFIRE ASKS SECRETARY JEWELL TO HELP WITH AIR TANKERS. The [San Diego Union-Tribune](#) (10/15, 542K) reports that on Wednesday, Cal Fire San Diego and San Diego County Fire Chief Tony Mecham asked Interior Secretary Sally Jewell to help bring the U.S. Forest Service’s “most advanced air tankers” to Ramona Air Attack Base Mecham said “it’s not only a safety issue, but also warned that it will be a political liability if a wildfire damages homes while tankers are flying sorties out of far-away San Bernardino International Airport instead of nearby Ramona.” Jewell “made no promises, but indicated she understands the situation.”

TRIBES PUSH FOR BEARS EARS NATIONAL MONUMENT. The [AP](#) (10/16, 2.28M) reports that “tribal leaders in the Southwest outlined a proposal Thursday to designate a section of southeastern Utah as a national monument, seeking to become partners with the federal government in managing their ancestral homeland.” The proposed Bears Ears National Monument would “be bordered to the south by the Navajo Nation and to the west by Glen Canyon National Recreation Area and Canyonlands National Park.” According to the article, “American Indian and conservation groups say the area is under constant threat by looting of cultural objects, off-road vehicle use and destruction of gravesites — affronts to tribes’ ancestors, they say, and impediments to communities’ ability to heal.” The coalition of tribes “submitted a proposal to President Barack Obama’s administration asking that he use his power under the Antiquities Act to proclaim the area a national monument and honor the tribes’ inherent connection with the land.”

The [Deseret \(UT\) News](#) (10/16, 407K) reports that “representatives said they are asking for a monument designation because the Public Lands Initiative planning process — being pushed by Utah GOP Reps. Rob Bishop and Jason Chaffetz — has ignored their desires.” In a statement, members of Utah’s congressional delegation, said, “While many Native Americans who live in Utah oppose the coalition’s proposal, we welcome the input and recommendations nonetheless. Our offices have now received over 65 detailed proposals from various stakeholder groups regarding land management in eastern Utah. We remain committed to reviewing each proposal and producing a final (Public Lands Initiative) bill that is balanced and broadly supported.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (10/16, Felicia Fonseca |, Ap, 6.76M), the [Minneapolis \(MN\) Star Tribune](#) (10/16, Fonseca, 1.19M), the [Salt Lake \(UT\) Tribune](#) (10/16, 492K), [Yahoo! News](#) (10/16, Fonseca, 5.98M), and [KSTU-TV Salt Lake City \(UT\)](#) Salt Lake City (10/15, 180K), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (10/16, 494K).

LWCF DIVIDES REPUBLICANS. [Politico](#) (10/15, 942K) reports that “the Land and Water Conservation Fund’s authorization expired on Sept. 30, but there is an internecine battle among Republicans over its reauthorization.” The article states: “The showdown now threatens a number of other priorities. Two Republican senators facing tough re-election fights next year are holding up a bipartisan deal to overhaul the Toxic Substances Control Act in a bid for leverage to reauthorize the fund, but they are running into resistance from states-rights’ diehards who refuse to provide new authority without changing how the program operates to boost states’ sway over the money and reduce federal land purchases.”

GROUP CLAIMS INTERIOR WATCHDOG “POLITICIZED” INVESTIGATIONS. The [Daily Caller](#) (10/15, Barton, 375K) reports that “Department of Interior Acting Inspector General Mary Kendall has ‘politicized’ investigations, ‘focused on trivial matters,’ ‘kept IG operations secret,’ and should not be confirmed as a permanent head, an environmental nonprofit said Thursday.” Kendall “lacks vision, integrity and leadership skills to be an effective IG,” Public Employees for Environmental Responsibility wrote in a letter to Senate Energy and Natural Resources Committee Chairwoman Lisa Murkowski and Ranking Member Maria Cantwell. Kendall has “been both the Acting IG and Interior’s Deputy IG since 2009 when the top job came open” and “her nomination by President Obama as the permanent IG is now before the Senate Energy and Natural Resources Committee, which has scheduled an Oct. 20 confirmation hearing.”

FOLLOWING OPM DATA BREACH, FEDERAL GOVERNMENT TIGHTENS SECURITY MEASURES. [Federal Computer Week](#) (10/15, 263K) reports that “in the wake of the OPM data breach, the government tightened agencies’ ability to monitor the contractors that host their data.” The article notes that “the OPM breach, which involved a data center operated by the Interior Department, has also served as a wakeup call to users of shared-services providers and improved collaboration between data owners and system owners.”

SEN. COCHRAN PUSHES AGAINST NEW FEDERAL FLOOD RISK STANDARDS. The [Hattiesburg \(MS\) American](#) (10/15, 34K) reports that Sen. Thad Cochran, chairman of the Senate Appropriations Committee, has “again called on the Obama administration to provide additional details on their efforts to establish a new federal flood risk standard despite resistance from Congress.” The article notes that “that push from Cochran came soon after the 10th anniversary of Hurricane Katrina and the “wind versus water” debate – legal, moral and practical – that developed in the wake of that historic storm.” Cochran communicated to Interior Secretary Sally Jewel “his concern over establishing the new guidelines without adequate congressional and public input.”

COMPANY LOSES PROTEST OF \$170M IT BID. [Law360](#) (10/16, 21K) reports that “the U.S. Government Accountability Office has scrapped a Virginia company’s effort to upend a \$170 million information technology contract issued to its rival by the U.S. Department of the Interior on behalf of the U.S. Army, finding the company failed to prove a conflict of interest and other flaws in the award.” In an opinion released Thursday, “the GAO rejected a host of arguments from DV United LLC why it should nix the award.”

INTERIOR MUSEUM’S “DOI POP! ON AIR. ON SCREEN. IN PRINT.” EXHIBITING. The [Huffington Post](#) (10/16, Preservation, 164K) reports that the Interior Museum’s “DOI Pop! On Air. On Screen. In Print.” exhibit opened on June 29. According to the article, “the exhibit, spearheaded by museum curator Tracy Baetz, shows visitors the extensive role DOI lands have played in hundreds of famous movies, books, magazines, radio shows and music videos.” Also, “in addition to these exciting examples, ‘DOI Pop!’ also details the permitting process as well as environmental restrictions of certain locations.”

Empowering Native American Communities:

INTERIOR WEIGHS IN ON NATIVE HAWAIIAN ELECTION LAWSUIT. The [AP](#) (10/16, 75K) reports that the Interior Department says “a judge shouldn’t grant an injunction against an election process that’s underway for those with Native Hawaiian ancestry.” The department filed “a friend-of-the-court brief in a lawsuit challenging the election.” The article notes that “the judge in the case invited the department to weigh in after the department outlined a proposal to establish a possible government-to-government relationship if a Native Hawaiian government is formed and wants such a relationship.”

PUBLIC HEARING HELD ON PROPOSED MUSKEGON COUNTY TRIBAL CASINO. The [MLive \(MI\)](#) (10/16, 739K) reports that “more than 600 people packed the performing arts center at Fruitport Middle School Thursday night, Oct. 15 to give comments and listen during a hearing for a proposed tribal casino.” The Little River Band of Ottawa Indians has “proposed to take into trust 60 acres on the former Great Lakes Downs racetrack in Fruitport Township to build a \$180 million casino development.” The BIA is “gathering comments for part of the application process, the Environmental Impact Statement.”

Office of Insular Affairs:

MICRONESIANS RELOCATING IN GREATER NUMBERS. In a special report, the [Honolulu Civil Beat](#) (10/16, 41) looks into the exodus of Micronesians from “their home islands by the tens of thousands...to the U.S.” The report “follows that journey and examines the effect it’s having on the communities in which they are settling.”

Congress Urged To Fix Medicaid Flaw That Excludes Legal Immigrants. The [Honolulu Civil Beat](#) (10/15, 41) editorializes that that “the welfare reform bill that President Bill Clinton signed into law in 1996 is often heralded as an overwhelming success, but it’s about time Congress finally acted to correct one of its glaring and costly mistakes:” the elimination of “many federal benefits for legal immigrants.” According to the paper, “over the years, bills incrementally restored some benefits; but the exclusion of Medicaid — which provides health care to low-income individuals — still stands, affecting Hawaii and its 15,000 Micronesian immigrants profoundly.” It argues that “expanding Medicaid coverage to COFA immigrants” would be a start.

Tackling America’s Water Challenges:

EPA HAS SPENT \$14M SPENT ON RESPONSE TO GOLD KING SPILL SO FAR. The [Durango \(CO\) Herald](#) (10/15, 31K) reports that “the Environmental Protection Agency has so far spent more than \$14 million in its response to the Aug. 5 Gold King Mine blowout, according to an internal document.” Also, “an Oct. 6 weekly Situation Report ‘for internal use only’ says the agency costs are now adding up to more than \$100,000 per day.” The report “listed six federal agencies involved in the response, including the Coast Guard, U.S. Geological Survey, U.S. Army Corps of Engineers, Bureau of Reclamation, and U.S. Fish and Wildlife Service, in addition to the EPA.”

REPORT OUTLINES ISSUES WITH GILA RIVER DIVERSION PROJECT. [KRWG-FM](#) Las Cruces, NM (10/16, 1K) reports that “the state’s current plan to spend up to \$1 billion to divert water from the Gila River through a pipeline is ill conceived, particularly since the state has significant problems that would be more effectively addressed with such a significant level of funding,” according to a report released on October 15 by New Mexico Voices for Children. The report, “The Gila River Diversion: A drain on limited state resources that are better spent elsewhere,” outlines the issues “with the proposed Gila River Diversion project and the need for the proposed funds to be invested in programs that help kids and families.” The report was “released in advance of Friday’s Interstate Stream Commission meeting at which the diversion project will be discussed.”

AGREEMENT WILL CONTINUE MELONES FISH FLOWS THIS FALL. The [Calaveras \(CA\) Enterprise](#) (10/16, 18K) reports that “drought-ravaged New Melones Reservoir will continue releasing water to benefit fish this fall under an agreement announced this week by the South San Joaquin and Oakdale irrigation districts.” According to the article, “about 23,000 acre-feet of water will be released beginning Oct. 20 to keep river temperatures cool enough to allow fall run salmon to return for spawning.”

Securing America’s Energy Future:

EAGLE MOUNTAIN HYDROPOWER CLEARS ANOTHER HURDLE. The [Palm Springs \(CA\) Desert Sun](#) (10/15, 99K) reports that “federal officials rejected two appeals to a planned hydropower plant near Joshua Tree National Park on Thursday, bringing the much-maligned project one step closer to reality.” The article notes that “the 1,300-megawatt power plant would draw about nine billion gallons of groundwater from an aquifer beneath the Chuckwalla Valley, which critics say would harm threatened species, disrupt fragile ecosystems and damage a critical water supply.” But “the project’s proponents counter that it would help California build more clean energy by banking excess electricity generated by solar and wind farms when supply exceeds demand, and then releasing that electricity when demand exceeds supply.”

DELAYS TO TRANSWEST EXPRESS CRITICIZED. For the “Congress” blog of [The Hill](#) (10/16, Stephenson, 471K), Lonnie R. Stephenson, the international president of the International Brotherhood of Electrical Workers, writes that “while the White House calls for more investments in green energy sources, federal agencies are blocking one of the biggest wind-supporting projects in the nation.” He notes that “for nearly eight years the TransWest Express, a multistate power line that would bring thousands of megawatts of wind power to consumers on the West Coast, has been held up by numerous delays in the federal permitting process.” Stephenson argues that “America has the resources and we have the manpower to take the lead in wind and solar production” and “what we need is the will from Washington to clear the TransWest paperwork pathways so real project construction can begin as soon as possible.”

Onshore Energy Development:

MULTI-AGENCY POWER INITIATIVE AWARDS \$15 MILLION FOR COAL STATE ECONOMIC TRANSITION. [Reuters](#) (10/15, Volcovici) reports that the Administration on Thursday awarded nearly \$15 million in grants to projects across 12 coal-reliant states and territories to help them diversify their economies as the US coal industry wanes. The grants are part of the multi-agency Partnerships for Opportunity and Workforce and Economic Revitalization (POWER) initiative.

The [Washington Times](#) (10/16, Wolfgang, 344K) reports that “Thursday’s announcement notwithstanding, critics say the Administration’s climate agenda ultimately will do serious harm to coal-reliant regions and elsewhere across the country.”

[The Hill](#) (10/16, Cama, 471K) reports that Commerce Secretary Penny Pritzker told reporters Thursday that the POWER program, with the Economic Development Administration at the helm, “will work to turn challenges into economic opportunity and prosperity.” The Hill adds that White House adviser Jason Walsh “said the Obama administration wants any major action on POWER Plus to be bipartisan, something he noted takes significant time.”

PRAIRIE CHICKEN RULING PUTS VOLUNTARY CONSERVATION TO THE TEST. [E&E Publishing](#) (10/16, 705) reports that a decision by a federal district judge in West Texas last month “to strip Endangered Species Act protections from the lesser prairie chicken in five southern Great Plains states” raises questions about whether energy companies will “continue to protect habitat for a prairie grouse in the absence of government regulations.” According to the article, “if oil and gas, pipeline, wind, and transmission companies continue shelling out millions of dollars to offset harm to the chicken – though they are under no legal obligation to do so – it would prove, to many stakeholders, the merits of voluntary conservation plans that have been a key plank in the Obama administration’s wildlife policy.” However, “renegeing on commitments made while the chicken was listed or on the road to a listing would embolden environmentalists who say locally led, voluntary conservation plans only work when the regulatory hammer of ESA remains on the table.”

STUDY FINDS OIL AND GAS DEVELOPMENT DISPLACING BIRDS IN BAKKEN. The [Dickinson \(ND\) Press](#) (10/16, 1K) reports that “oil and gas development is displacing grassland birds from their habitat in North Dakota’s prolific Bakken shale region, including one candidate for listing as an endangered species, federal researchers say in a new report.” Scientists with the USGS and FWS “studied areas around gravel-surface oil well pads in 2012-2014.” They discovered that “some grassland birds avoided areas within 492 feet of gravel roads and multi-well pads and 876 feet of single-bore well pads, suggesting that the detrimental effects of oil extraction on bird habitat extend beyond the immediate well sites.”

Additional coverage was provided by the [Forum of Fargo-Moorhead \(ND\)](#) (10/16, 14K), the [Akron \(OH\) Beacon Journal](#) (10/16, 313K), and [WCCO-AM Minneapolis \(MN\)](#), Minneapolis (10/15, 70K).

CONCERNS RAISED OVER BLM'S PROPOSED DRILLING REGULATION. The [Arkansas News](#) (10/16, 520) reports that "Attorney General Leslie Rutledge said Thursday she has sent a letter to the U.S. Bureau of Land Management raising concerns about a proposed rule that would impose regulations on oil and gas drilling on public and tribal lands." Rutledge said "she opposes the rule in its current form, saying she believes it would expand the bureau's authority over non-federal lands in violation of the Mineral Leasing Act of 1920." Rutledge also said the BLM "failed to engage any state entities and that she believes the rule would lead to severe economic harm in Arkansas."

CRITICS SEE HYPOCRISY IN US SHIPMENT OF POWDER RIVER BASIN COAL ABROAD. The [Washington Post](#) (10/16, A1, Warrick, 6.76M) reports on its front page the Administration "is seeking to curb" US use of coal from Wyoming's Powder River Basin, "which scientists say must remain mostly in the ground to prevent a disastrous warming of the planet." But every year, "nearly half a billion tons of this US-owned fuel are hauled from the region's vast strip mines and millions of tons are shipped overseas." These shipments highlight "what critics describe as a hypocrisy underlying US climate policy: While boasting of pollution cuts at home, the United States is facilitating the sale of large quantities of government-owned coal abroad."

Offshore Energy Development:

OFFICIALS URGE COOPERATION BETWEEN GULF STATES IN SPENDING BP SPILL MONEY. The [New Orleans Times-Picayune](#) (10/16, Schleifstein, 718K) reports that as \$16.5 billion in BP oil spill money is directed toward "dozens of environmental restoration projects in Louisiana and elsewhere along the Gulf Coast," there are risks that the money will be lost, projects will be delayed, and that "the roll-out of multiple projects in all five Gulf Coast states at once will both drive up construction prices." Officials involved in Gulf coastal restoration efforts are calling for more cooperation between the Gulf states implementing new projects.

St. Petersburg City Council, Mayor Clash Over BP Settlement Money. The [Tampa Bay \(FL\) Times](#) (10/16, Frago, 857K) reports that St. Petersburg City Council members are objecting with Mayor Rick Kriseman over his spending plan for the city's \$6.5 million portion of the BP settlement.

POLAR PIONEER ON ITS WAY TO PORT ANGELES. The [Peninsula \(WA\) Daily News](#) (10/15, 41K) reported that the drilling rig the Polar Pioneer "left the Port of Dutch Harbor, Alaska, at noon Tuesday, spokeswoman Megan Baldino said Thursday in an email." The rig "was being pulled Thursday by two tugboats toward its new temporary home in Port Angeles Harbor, [Baldino] said." It is not yet known how long the rig will stay. The Polar Pioneer "anchored in Port Angeles Harbor for 26 days last spring, pouring an estimated \$1 million in hotel stays, retail sales and rig-related services into the city's economy, according to a report prepared for Shell and the Alaska State Chamber of Commerce." Port of Port Angeles Executive Director Ken O'Hollaren said Thursday, "We definitely look forward to it being back."

Additional coverage was provided by the [Alaska Public Radio Network](#) (10/15, 2K).

America's Great Outdoors:

Bureau of Land Management:

TEXAS RANCHERS CONCERNED ABOUT RED RIVER PROPERTY. The [Inquisitr](#) (10/16, 527K) reports that "a group of Texas ranchers are furious after representatives from the federal Bureau of Land Management made claims that their land doesn't actually belong to the ranchers, but rather it belonged to the federal government." According to the article, "the federal officials claim that despite each rancher having a deed for their property and having paid property taxes on the land each year, the land should never have been sold, as it is actually federal land." The article notes that "ranchers in Texas and Oklahoma fear that the federal government may confiscate land used to raise cattle due to re-defined federal land boundaries along the Red River."

Additional coverage was provided by [The Blaze](#) (10/15, 1.66M) and the [Personal Liberty Digest](#) (10/16, 13K).

WILD HORSE ACTIVISTS APPEAL TO HALT BLM FROM MOVING WEST DOUGLAS HERD. The [Denver Post](#) (10/16, Mcghee, 787K) reports that the nonprofit group Front Range Equine Rescue has filed an appeal to prevent the BLM from removing mustangs from the West Douglas Herd area in northwest Colorado. The

bureau plans to move the herd to the Florence-East Douglas herd management area. The appeal, announced Thursday, says the Wild Free-Roaming Horses and Burros Act of 1971, protects the horses from unwarranted elimination from the rangeland on which they live.

Also providing coverage is the [Grand Junction \(CO\) Daily Sentinel](#) (10/16, 73K).

BLM ASKED TO HELP RETRIEVE WILD MUSTANGS IN MONTANA. The [Montana Standard](#) (10/16, 36K) reports that “running across rugged terrain in the Beaverhead-Deerlodge National Forest in Southwest Montana, 14 wild mustangs are free and unfettered — but their freedom isn’t expected to last much longer.” According to the article, “the untamed horses escaped from a private ranch near Ennis last spring.” And “after at least three attempts to bring them in failed, rancher Greg Rice asked the Bureau of Land Management for help in retrieving the horses, said Cornelia Hudson, field manager for BLM.”

BLM DESIGNATES FINS AND THINGS JEEP ROUTE AS ONE-WAY. The [Deseret \(UT\) News](#) (10/16, 407K) reports that the BLM has “issued a decision designating the entire Fins and Things Jeep Route as one-way, as well as designating a portion of the route as available for daytime use only.” BLM officials said “they made the decision to improve public safety, reduce resource damage and enhance the visitor experience.”

BLM SEEKS PUBLIC INPUT ON BUENA VISTA TRAIL SYSTEMS. The [Chaffee County \(CO\) Times](#) (10/16, 9K) reports that “a public scoping period to add 31 miles worth of new trails and reroutes to the Buena Vista Trail Systems will run through Nov. 13.” The BLM Royal Gorge Field Office is “conducting the scoping period, which began Oct. 6.”

BLM SEEKS INPUT ON PROPOSED ROAD PROJECT IN CANYON RIMS RECREATION AREA. The [Deseret \(UT\) News](#) (10/16, 407K) reports that the BLM is “seeking public comments on a proposed road project in the Canyon Rims Special Recreation Management Area.”

Fish and Wildlife Service:

FWS DIRECTOR ASHE ATTENDS EIGHT ANNUAL PRIVATE LANDS PARTNERS DAY. The [Tri-State Livestock News \(SD\)](#) (10/16) reports that “the eighth Annual Private Lands Partners Day was held Sept. 22 – 24 in the Nebraska Sandhills.” FWS Director Dan Ashe, “along with several of their Regional Directors and Headquarters staff attended the event.”

CONCERNS RAISED AGAIN ABOUT BARRIERS ABILITY TO STOP ASIAN CARP. [USA Today](#) (10/15, Spangler, 5.23M) reports that the FWS “again confirmed Thursday that small fish may be pulled along by barges going past electrical barriers, reigniting concerns that young Asian carp could be transported into the Great Lakes despite the barriers intended to keep them from migrating north out of Chicago waterways.” The Army Corps of Engineers “maintains three electrical barriers along waterways south of Chicago intended to keep voracious Asian carp from reaching Lake Michigan.” The FWS “study bolsters earlier indications that smaller fish may be swept past the barriers as barges and other craft pass by.”

Also providing coverage re the [Detroit Free Press](#) (10/15, 910K) and the [Milwaukee Journal Sentinel](#) (10/16, Bergquist, 564K).

FWS DECLINES TO LIST SIERRA NEVADA RED FOX. The [Coos Bay \(OR\) World](#) (10/16, 32K) reports that the FWS has “declined to list the Sierra Nevada red fox under the Endangered Species Act due in part to research conducted in Oregon showing a significant extension of its range.” The article notes that “an ongoing study of the Sierra Nevada red fox has confirmed their presence in the Oregon Cascades, specifically in the Mt. Jefferson, Mt. Washington, and Three Sisters Wilderness areas.” More “samples from this ongoing study are being collected in the original study area and also throughout the Oregon Cascades including Mt. Hood National Forest and Crater Lake National Park.”

ADDITIONAL COVERAGE: FWS MOVES AHEAD WITH MEXICAN WOLF RELEASES. Additional coverage that the FWS says “it may release Mexican gray wolves in New Mexico in an effort to recover the fragile species, despite the state having refused the federal government a permit to do so” was provided by the [Albuquerque \(NM\) Journal](#) (10/16, 259K), the [Taos \(NM\) News](#) (10/16, 31K), the [Santa Fe New Mexican](#) (10/16, 67K), the [Albuquerque \(NM\) Journal](#) (10/16, 259K), the [Santa Fe \(NM\) Reporter](#) (10/16, 69K), the [Cortez \(CO\) Journal](#) (10/15, 4K), the [Santa Fe \(NM\) Reporter](#) (10/16, 69K), [KOB-TV Albuquerque \(NM\)](#) Albuquerque, NM (10/16, 92K), and [KRQE-TV Albuquerque \(NM\)](#) Albuquerque, NM (10/15, 36K).

National Park Service:

TRAILER RELEASED FOR “NATIONAL PARKS ADVENTURE”. [USA Today](#) (10/15, Alexander, 5.23M) presented “the trailer release for National Parks Adventure, the upcoming 3-D IMAX film celebrating our nation’s parks.” The movie “hits IMAX and large-screen theaters February 12, 2016, to celebrate the 100th anniversary of the National Park Service.”

“ARRL National Parks On The Air” Event To Mark NPS Centennial. The [American Radio Relay League](#) (10/16, 6K) says that “in 2016, the National Park Service (NPS) will celebrate its 100th anniversary, and radio amateurs will be able to help mark the occasion with the ARRL National Parks on the Air (NPOTA) event.”

SCIENTISTS SAY CLIMATE CHANGE PROMPTING RETHINKING OF NATIONAL PARKS’ MANAGEMENT. The [Christian Science Monitor](#) (10/15, Hinckley, 455K) reports that “a group of scientists are suggesting that a conservation method from the past be abandoned” after having conducted research of the “dieback” of yellow cedars in Alaska. The traditional conservation approach of “simply setting land aside to protect biodiversity...is no longer enough,” CSM explains, citing researcher Lauren Oakes. CSM reports that “the researchers suggest the first step may be place-based education for the local public and park managers” to promote adoption of new management strategies.

LOTTERY FOR NATIONAL CHRISTMAS TREE LIGHTING TICKETS OPENING FRIDAY. The [Washington Times](#) (10/16, Harper, 344K) reports that the NPS and the National Park Foundation are “staging their annual lottery for those seeking tickets to attend the 93rd National Christmas Tree Lighting, a wildly popular and media-friendly event within close proximity of White House.” The lottery “opens at 10 a.m. Friday and closes at 10 a.m. Monday.”

NPS LAUNCHES VIRTUAL TOUR OF OFF-LIMITS ELLIS ISLAND SITE. The [AP](#) (10/16, 2.28M) reports that “areas of Ellis Island not included on regular tours can now be visited in a virtual tour.” The NPS “launched the virtual tour of the south side of Ellis Island on Thursday.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (10/16, Press, 6.76M), the [Daily Mail \(UK\)](#) (10/16, 5.59M), and [Curbed](#) (10/15, 227K).

GOOGLE MAPS PROVIDES “STREET VIEW” OF YOSEMITE NATIONAL PARK. The [AP](#) (10/16, 170K) reports that “Yosemite National Park and Google Maps have teamed up to allow people to explore the park’s features and learn about its history and geology.” Google Maps on Thursday is “launching street view imagery of the Mariposa Grove of Giant Sequoias, Mirror Lake, Bridalveil Fall, and many other popular destinations.”

Additional coverage was provided by the [Merced \(CA\) Sun-Star](#) (10/16, 35K), the [San Francisco \(CA\) Chronicle](#) (10/16, Subscription Publication, 3.35M), and [ABC News](#) (10/15, 3.97M).

CIVIL WAR TRUST ACQUIRES SECTION OF SHEPHERDSTOWN BATTLEFIELD. The [AP](#) (10/16, Press, 6.76M) reports that “the Civil War Trust has acquired another section of a Civil War battlefield in Shepherdstown.” According to Shepherdstown Battlefield Preservation Association president Edward Dunleavy, “the 2.72-acre tract is contiguous to a core area of the battlefield.” The NPS has said “it wants to expand Antietam National Battlefield in Maryland to include about 500 acres of the Shepherdstown battlefield, which is about 5 miles from Antietam.”

NPS AWARDS CONTRACT FOR PENSACOLA BAY FERRY SERVICE. The [Pensacola \(FL\) News Journal](#) (10/15, 125K) reports that Gulf Islands National Seashore Superintendent Dan Brown announced Thursday that the NPS “awarded the contract for the design, construction and delivery of two 150 passenger catamaran ferry boats to All American Marine, which is based in Bellingham, Wash.” According to the article, “the double-decker boats will be used for the Pensacola Bay passenger ferry service, which is scheduled to open in March 2017.” The article notes that “Natural Resource Damage Assessment (NRDA) will fund the \$5-plus million project” and “money from the BP Deepwater Horizon oil spill and funds from the Federal Lands Transportation Program will cover the expense.”

FOREST FIRE EXPERTS EVALUATE RISK OF DOWNED TREES FROM SLEEPING BEAR DUNES STORM DAMAGE. The [MLive \(MI\)](#) (10/16, 739K) reports that “the slew of trees that toppled near Sleeping Bear Dunes National Lakeshore in an August windstorm pose no fire danger yet, but could in the future.” NPS

supervisors ordered the assessment Thursday, Oct. 15, following a recent visit by the professionals. The forest fire experts said “the trees are still too ‘green’ to pose any immediate risk, but they suggested homeowners should take precautions for when the trees dry.”

NPS REPRESENTATIVE TO ASSESS MANCHESTER PARK. The [Hartford \(CT\) Courant](#) (10/15, 606K) reports that “a National Park Service representative will visit Center Springs Park Monday to assess the park’s condition and advise the town on possible improvements.” According to Steve Gates, leader of the Friends of Center Springs Park, “based on his experience with other urban parks, park service representative John Monroe will talk about ‘some of the kinds of things other communities have done, what might work in the 55 acres here and point out positives and negatives.’” said Steve Gates, leader of the Friends of Center Springs Park. The service is free to the town, Gates said.

YELLOWSTONE FUNDRAISING, EDUCATION GROUPS TO MERGE INTO NEW NONPROFIT. The [Billings \(MT\) Gazette](#) (10/16, 179K) reports that “the board of directors of the Yellowstone Association and the Yellowstone Park Foundation announced Thursday that they intend to merge into a new nonprofit organization to benefit Yellowstone National Park.” The article notes that “the new organization expects to begin operating jointly by March 2016 and will be fully in effect by February 2017.”

BODY OF MISSING NURSE FOUND ALONG DELAWARE WATER GAP PARK TRAIL. The [Lehigh Valley \(PA\) Express Times](#) (10/16, 238K) reports that “the body of a Northampton County woman reported missing since Tuesday was found late Thursday afternoon off a trail in the Delaware Water Gap National Recreation Area, a park official said.” Joe Hinkes, National Park Service law enforcement and emergency services operations supervisor, said that “Vanessa Fehnel, 51, of Plainfield Township, had suffered a gunshot wound in what appears to have been a suicide.”

Top National News:

IN REVERSAL, OBAMA TO LEAVE 5,500 US TROOPS IN AFGHANISTAN INTO 2017. President Obama on Thursday announced that 5,500 American troops will remain in Afghanistan into 2017. While reporting – including almost a combined six minutes on the three broadcast networks – is generally sympathetic towards the decision and its merits, coverage universally characterizes the move as a reversal of the President’s previous commitment to bring most US troops home.

[NBC Nightly News](#) (10/15, lead story, 3:20, Holt, 7.86M) reported Obama “did an about-face on his previous pledge to bring home” most American troops from Afghanistan by the end of next year. The [Washington Post](#) (10/16, A1, Ryan, 6.76M) reports Obama said 5,500 US troops will remain in Afghanistan into 2017, “ending his ambitions to bring home most American forces” from the country before he leaves office. [McClatchy](#) (10/16, Kumar, Clark, 28K) reports the US “will maintain 9,800 troops in Afghanistan through most of 2016,” and the 5,500 troops after 2016 at a small number of bases, including Bagram, Jalalabad, and Kandahar.

On [ABC World News](#) (10/15, story 2, 1:55, Muir, 5.84M), Martha Raddatz said “Obama has been promising for years that America’s involvement in Afghanistan would end.” However, Raddatz said Obama “made the same promise in Iraq and did withdraw,” before ISIL “then swept through large swaths of the country and US forces are back.” [Reuters](#) (10/16, Rampton, Mason) reports Obama said he was not disappointed that he was forced to alter his plans, saying, “This isn’t the first time those adjustments have been made. This probably won’t be the last.” Obama added, “I suspect that we will continue to evaluate this going forward, as will the next president.”

The [CBS Evening News](#) (10/15, story 3, 2:15, Pelley, 5.08M) showed Obama explaining his decision by saying, “Afghan forces are still not as strong as they need to be, and meanwhile the Taliban has made gains, particularly in rural areas and can still launch deadly attacks in cities, including Kabul.” The [Los Angeles Times](#) (10/16, Parsons, 4.07M) quotes Obama as saying Afghans “are standing up for their country,” adding, “If they were to fail, they would endanger the security of us all.”

In his [New York Times](#) (10/16, Cohen, Subscription Publication, 11.82M) column, Roger Cohen argues that the President “has sold America short,” as the “foreign-policy pendulum that swings between expansiveness and retrenchment has swung too far.” Cohen argues that the President’s “shift from indispensable power to indispensable partner has backfired when partner after partner — the Afghan Army, the Iraqi Army — has proved ineffective.”

The [AP](#) (10/16, Baldor, Pace) reports that when Obama “leaves office in 15 months, he’ll hand his successor military conflicts in the two countries where he promised to end prolonged war: Afghanistan and Iraq.” The AP characterizes the decision as a “frustrating end to a quest that was central to his political rise.” In an analysis piece, the [New York Times](#) (10/16, Baker, Subscription Publication, 11.82M) says Obama “did not mention” Iraq on Thursday, but “tried to draw an implicit distinction by emphasizing that the new Afghan government of President Ashraf Ghani, unlike the Baghdad government in 2011, still supports” the US presence “and has taken legal steps to make it possible.”

The [Wall Street Journal](#) (10/16, A1, Lee, Subscription Publication, 5.95M) reports Obama was facing pressure domestically and abroad to reevaluate his plans. Meanwhile, the [Christian Science Monitor](#) (10/16, LaFranchi, 455K) says Obama “has essentially decided between two unpalatable options.” According to the Monitor, the President decided it was “better to be tagged with a policy reversal” than “go down in the history books as having lost the war that candidate Obama also said was the essential war – as opposed to the one in Iraq – that America was fighting in its national security interests.”

The [Washington Post](#) (10/16, 6.76M) editorializes that while ending US military operations in Afghanistan “has been one of President Obama’s prized political goals,” he “deserves credit for bowing to Afghanistan’s realities and reversing himself.” The Post says keeping 5,500 troops in the country “will give Afghanistan another chance to succeed — and perhaps spare the next president an early crisis.”

According to [Politico](#) (10/15, Gass, 942K), Obama said the US mission will not change. US forces will still be responsible for training the Afghan military and conducting counterterrorism activities to combat al Qaeda. Obama said, according to the [New York Times](#) (10/16, A1, Rosenberg, Shear, Subscription Publication, 11.82M), “While America’s combat mission in Afghanistan may be over, our commitment to Afghanistan and its people endures.” The President added, “I will not allow Afghanistan to be used as safe haven for terrorists to attack our nation again.”

The [Washington Times](#) (10/16, Boyer, 344K) reports House Majority Leader McCarthy said Obama is “right” to keep US forces in Afghanistan, but a larger presence is needed. McCarthy said, “The president should not continue his arbitrary troop drawdown from 9,800 troops to 5,500 in 2016 until conditions on the ground and US national security interests allow for further reduction.” According to McCarthy, it is not appropriate to schedule a drawdown after the Taliban “overran the northern city of Kunduz and is threatening more districts...than at any time since 2001.” The [Wall Street Journal](#) (10/16, Subscription Publication, 5.95M) shares McCarthy’s view, praising Obama in an editorial for showing a willingness to change his mind and listening to his military commanders. However, the Journal admonishes Obama for reducing the number of troops to 5,500 in 2017, saying that more will likely be needed to prevent the Taliban, al Qaeda, and ISIL from capturing significant territory.

In an editorial, the [New York Times](#) (10/16, Subscription Publication, 11.82M) takes a more negative view of the decision, saying “It would be foolish to expect the drawdown delay to turn the war around, nor should this decision become an open-ended commitment that costs American taxpayers billions of dollars and takes American lives each year.” The Times calls on the White House to “redouble efforts...to ensure that help is rendered as a part of a coherent, realistic strategy that ultimately cannot depend on American troops scrambling to hold the country together.”

[McClatchy](#) (10/16, Kumar, Clark, 28K) reports Obama “noted Thursday that the decision will mean that some troops will rotate back into the country.” McClatchy says that “in remarks aimed at US service members,” the President said, “I do not send you into harm’s way lightly. But as your commander in chief I believe this mission is vital to our national security interests.” [The Hill](#) (10/15, Fabian, 471K) reported Obama said, “Given what’s at stake in Afghanistan...I am firmly convinced that we should make this extra effort.” [Reuters](#) (10/16, Ax) reports military families reacted to Obama’s announcement with frustration and acceptance.

CLINTON WINS BACKING OF JULIÁN CASTRO, RALLIES LATINO SUPPORTERS. [McClatchy](#) (10/16, Recio, 28K) reports that HUD Secretary Castro on Thursday “endorsed” Hillary Clinton’s 2016 bid for president, saying during an appearance on MSNBC, “My support of Secretary Clinton is based on a long relationship that Joaquin and I have had with her as well as with former President Clinton.” McClatchy noted that Rep. Joaquin Castro, Julián Castro’s twin brother, “endorsed Clinton last year.” McClatchy added that there have been “suggestions that” Julián Castro is “on a ‘short-list’ of vice presidential possibilities.”

[Reuters](#) (10/16, Whitesides) reports that during a meeting of the Hispanic Chamber of Commerce yesterday in San Antonio, Clinton was asked if she might choose Julian Castro as her running mate. Clinton responded, "I am going to look really hard at him for anything, because that's how good he is." Reuters adds that Julián Castro, a former mayor of San Antonio, later appeared with Clinton at a "Latinos for Hillary" rally in that city.

The [Los Angeles Times](#) (10/16, Halper, 4.07M) reports that in securing Castro's endorsement, and with her appearances at the rally and before the Hispanic Chamber of Commerce, Clinton "demonstrated Thursday one of the biggest reasons she will be exceedingly difficult for any of her Democratic rivals to overtake: Latino voters." The Times adds that in San Antonio, Clinton "put on full display how deep and durable are her ties with one of the most important voting blocs in the nominating contest."

The [New York Times](#) (10/16, Chozick, Subscription Publication, 11.82M) reports that at yesterday's "Latinos for Hillary" rally, Clinton "reiterated her position to go beyond President Obama's efforts to overhaul the immigration system, saying such changes would 'boost wages, create jobs and save the taxpayers money.'" Clinton also reminded "the crowd of some of the Republican candidates' comments about Latinos," saying, "They are using offensive terms like 'anchor baby.' As if any baby is anything other than precious or perfect."

Clinton Dings Sanders On Gun Control. Meanwhile, [Politico](#) (10/15, Karni, 942K) reported that during yesterday's rally in San Antonio, Clinton took aim at her leading rival for the Democratic nomination, Sen. Bernie Sanders, "on the one issue where she can attack him from the left, gun control." Responding "forcefully to a debate comment he made that 'all the shouting in the world' will not keep guns out of the hands of killers," Clinton said at the rally, "No matter what anyone says, this isn't just an urban problem, no way. It's a problem in small towns, suburbs, out in the country, across America." Clinton went on to say, "I've been told by some, to quit talking about this, quit shouting about this," adding, "I will tell you right now I will not be silenced."

The [AP](#) (10/16, Weissert, Thomas) reports that gun control "is one of the rare cases in which Sanders is at odds with some liberals in the party." The AP adds that Sanders "voted for a 2005 measure to give gun manufacturers immunity from lawsuits. Clinton opposed that bill in the Senate and said in the debate that Sanders wasn't tough enough 'at all' on gun violence." Meanwhile, the [Washington Post](#) (10/16, Tumulty, 6.76M) reports that in the aftermath of last month's deadly shooting spree at an Oregon community college, Clinton "has elevated the gun issue in her presidential campaign," vowing to "go around Congress if necessary and take executive action to put tighter controls on sales at gun shows and expand background checks of those who buy firearms."

Small Donations Helping Sanders Stay Close To Clinton In Money Race. [Bloomberg Politics](#) (10/16, Epstein, 247K) reports that the Clinton campaign "raised \$29.9 million during the third quarter" and entered October "with nearly \$33 million cash on hand." However, Clinton's "campaign spent close to \$25.8 million over the course of the quarter." Sanders' campaign "raised \$26.2 million during the quarter," spent "only \$11.3 million," and ended September with over "\$27 million in cash on hand." Bloomberg Politics adds that during Q3, "Sanders' strength came in small-dollar donations, with an average of \$30 per contribution from a total of 650,000 donors."

The [Washington Post](#) (10/16, Wagner, 6.76M) reported that on Wednesday, Sanders appeared at a couple of fundraising events in the Los Angeles area. The Post adds, "At a low-dollar event held at the hipster Avalon nightclub in Hollywood, comedian Seth McFarlane offered a self-deprecating defense of democratic socialism, the guiding philosophy of Sanders. Later, Sanders "was whisked to a posh home in Beverly Hills where entertainment was provided poolside by America, the band best known for 1970s hits like 'Ventura Highway' and 'Sister Golden Hair.'"

Strassel: By Not Hitting Clinton On Controversies, Sanders Shows He's Not Trying To Win. In her [Wall Street Journal](#) (10/16, Subscription Publication, 5.95M) column, Kimberley Strassel argues that by not going after Clinton over her email controversy and potential conflicts of interest relating to the Clinton Foundation, Sanders has shown that he's not truly trying to win the Democratic presidential nomination. Consequently, Strassel says that those who've made small donations to the Sanders campaign should ask for their money back.

TRUMP THREATENS TO SKIP NEXT GOP DEBATE OVER RULES. [Politico](#) (10/15, Isenstadt, 942K) reported that Donald Trump on Thursday "threatened" to skip the next Republican "debate if his demands for the format are not met. At issue is whether CNBC, which is hosting the" event, "will allow candidates to give

opening and closing statements. According to Politico, during an RNC-converted conference call yesterday to discuss details of the debate, Trump campaign manager Corey Lewandowski “said that if the debate does not include opening or closing statements and is longer than two hours total, including commercial breaks, the” billionaire “would have to drop out of the” event. And later Thursday, Trump tweeted, “@CNBC is pushing the @GOP around by asking for extra time (and no criteria) in order to sell more commercials.”

On its website, the [New York Times](#) (10/16, Haberman, Subscription Publication, 11.82M) reported that during a Thursday interview, Lewandowski told the newspaper, “The criteria that was outlined by CNBC was never discussed with any of the candidates or the campaigns. So what CNBC did was send out a memo and said, ‘Here’s the criteria as you have approved them and that went out to all the campaigns.’ We said we never agreed to this criteria.”

Drawing from the New York Times report, [The Hill](#) (10/15, Richardson, 471K) said that Trump “expressed unhappiness with the three-hour length of the second GOP debate hosted by CNN, and wants to ensure that the next debate isn’t allowed to drag on.” Lewandowski is quoted as telling the Times, “For us it was imperative that the time be changed to 120 minutes.”

On its website, the [Washington Post](#) (10/16, Johnson, 6.76M) quoted CNBC spokesman Brian Steel as saying in a written statement, “Our practice in the past has been to forego opening statements to allow more time to address the critical issues that matter most to the American people. We started a dialogue yesterday with all of the campaigns involved and we will certainly take the candidates’ views on the format into consideration as we finalize the debate structure.”

Politico: Trump’s Q3 Financial Disclosure Form To Be Closely Scrutinized. [Politico](#) (10/15, O’Donnell, 942K) reported that “Trump’s unorthodox campaign is setting a new ethical bar for intersections between politician and high-flying businessman.” For example, Politico said that with third-quarter financial disclosure forms due to be filed by Oct. 15, political observers “are eager to see whether the document reflects free helicopter rides Trump gave kids at the Iowa State Fair. The largest campaign disbursement in Trump’s first disclosure — \$506,486 of the \$1.4 million the campaign spent before June 30 — went to Trump-owned Tag Air, Inc.”

BGlobe Analysis: Trump Campaign Propelled By “Saturation Media Coverage.” The [Boston Globe](#) (10/16, Viser, 1.1M) reports that Trump “has found his running mate: the media.” The Globe adds, “Saturation media coverage has given Trump an unrivaled platform to” tout his candidacy, which “helps explain how he continues to defy predictions of his imminent demise. He’s everywhere, all the time — with little expense from his campaign.”

Role Of Trump’s Daughter Examined. In a piece for [Politico Magazine](#) (10/15), writer Michael D’Antonio, author of “Never Enough: Donald Trump and the Pursuit of Success,” profiled Trump’s daughter, Ivanka Trump, writing, “On the campaign,” she’s her father’s “most influential adviser, his de facto first lady in waiting and his character foil: the cautious, measured power behind the striving, showy candidate.”

Editorial Wrap-Up:

NEW YORK TIMES. “A Grim Decision On Afghanistan.” In an editorial, the [New York Times](#) (10/16, Subscription Publication, 11.82M) takes a negative view of the President’s decision to keep 9,800 troops in Afghanistan next year, saying “It would be foolish to expect the drawdown delay to turn the war around, nor should this decision become an open-ended commitment that costs American taxpayers billions of dollars and takes American lives each year.” The Times calls on the White House to “redouble efforts...to ensure that help is rendered as a part of a coherent, realistic strategy that ultimately cannot depend on American troops scrambling to hold the country together.”

“The Cycle Of Violence In Israel.” A [New York Times](#) (10/16, Subscription Publication, 11.82M) editorial says the latest wave of violence in Jerusalem “is both new and terribly familiar,” and the “cost of violence is known to both sides; so is the template for peace: There’s no shortage of road maps on how to do it. And after all this time, it should be clear that a peace agreement is the only chance Israelis and Palestinians have to stop the cycles of stabbings, shootings, bombings and fear.”

“Mayor De Blasio’s First Town Hall Meeting.” A [New York Times](#) (10/16, Board, Subscription Publication,

WASHINGTON POST. “Obama Bows To Reality In Afghanistan.” The [Washington Post](#) (10/16, 6.76M) editorializes that while ending US military operations in Afghanistan “has been one of President Obama’s prized political goals,” he “deserves credit for bowing to Afghanistan’s realities and reversing himself.” The Post says keeping 5,500 troops in the country “will give Afghanistan another chance to succeed — and perhaps spare the next president an early crisis.”

“Holding Gun Dealers To Account.” The [Washington Post](#) (10/16, 6.76M) editorializes that there are “two ways to look at the verdict by a Milwaukee jury finding a gun store liable in the wounding of two police officers.” The “hopeful” view “is that it will come to be seen as a landmark case that will prompt more litigation against negligent gun dealers and gunmakers,” but more likely, the Post adds, “the case will remain an outlier.” The Post argues that since 2005, “when Congress bestowed unique protections on the gun industry, it has been nearly impossible to discipline even the most negligent actors in court.” The Post adds that “frivolous lawsuits should not be encouraged,” but argues that “the gun industry’s sweeping immunity, enjoyed by no other industry in the United States, has stood in the way of legitimate lawsuits, preventing victims from getting — or even having their day in court to argue for — deserved compensation.”

“Sharon Bulova For Chairman In Fairfax.” A [Washington Post](#) (10/16, 6.76M) editorial.

WALL STREET JOURNAL. “The Knives Of Jerusalem.” A [Wall Street Journal](#) (10/16, Subscription Publication, 5.95M) editorial says Palestinian President Mahmoud Abbas’ claim that Israelis “execute our children in cold blood,” citing Ahmed Mansara, who was wounded after stabbing an Israeli child, but is alive and being treated in a hospital, is a sign that Abbas is not a serious partner in peace, and calls on the Administration to speak out against such incitements. Instead, the Journal says, Secretary of State Kerry said he is “not going to point fingers [at the culprits] from afar.”

“Government Food Flight.” In an editorial, the [Wall Street Journal](#) (10/15, Subscription Publication, 5.95M) assails the White House’s effort to make the school lunch program more nutritious, citing a GAO audit as evidence that the exercise has been a waste of taxpayer money.

“Obama’s Afghan Reversal.” A [Wall Street Journal](#) (10/16, Subscription Publication, 5.95M) editorial praises President Obama for showing a willingness to change his mind and listening to his military commanders. However, the Journal admonishes Obama for reducing the number of troops in Afghanistan to 5,500 in 2017, saying that more will likely be needed to prevent the Taliban, al Qaeda, and ISIL from capturing significant territory.

Secretary Jewell Joins Nevada Community to Celebrate Designation of Basin and Range National Monument

*Designation preserves stunning landscapes, ancient rock art;
protects existing ranching, military and recreation uses*

LINCOLN COUNTY, Nev. – As part of President Obama’s commitment to protect the nation’s significant outdoor spaces for the benefit of future generations, U.S. Secretary of the Interior Sally Jewell and Neil Kornze, director the Bureau of Land Management, joined U.S. Senator Harry Reid and U.S. Rep. Dina Titus (NV-1) to celebrate the recent designation of Basin and Range National Monument in southeastern Nevada. The site, an unbroken expanse of 704,000 acres of rugged mountains and sweeping valleys, helps to tell the proud history of the West, from its earliest native peoples to more recent settlers and mining communities.

“This spectacular landscape of rugged public lands is a celebration of Nevada, its people, history and the vast open spaces with stunning views for which the state is known,” said Secretary Jewell. “Preserving this iconic American landscape supports our partnerships with local communities that worked for decades to protect this rich cultural and ecological treasure, while continuing to allow for traditional uses and opportunity for future scientific study.”

Sen Reid Quote

On July 10, President Obama designated Basin and Range a national monument, after Sen. Reid and Rep. Dina Titus introduced legislation to protect the landscape. It is now one of the three newest national monuments, including Berryessa Snow Mountain in California and Waco Mammoth in Texas. The President’s designation protects outstanding recreational opportunities like hiking, hunting, horseback riding, mountain biking, fishing and rock climbing.

Rep. Titus quote

Nevada businesses, including MGM Resorts International, the state’s largest employer;

wythin RESULTS, BARRICK GOLD CORPORATION, and ROCKWOOD LITHIUM NORTH AMERICA, as well as the Las Vegas Metro Chamber of Commerce and the Las Vegas Convention and Visitors Authority have also supported protection of the area. Additional support also came from a broad array of community groups, including private landowners, elected officials, art institutions, conservation and recreation organizations, and representatives from businesses in the state.

From the earliest human inhabitants 13,000 years ago, to the miners and ranchers of the past century, the monument's cultural sites offer exemplary opportunities to further study and understand this unique landscape and its history.

The area's location, on the transition between the Mojave Desert and the sage brush steppe of the Great Basin region, makes it home to a wide diversity of plants and wildlife, including desert bighorn sheep, golden eagles, and a host of bat, lizard, and snake species.

The Basin and Range is located in Lincoln and Nye counties about two hours from downtown Las Vegas. The monument preserves current uses of the land, including traditional ranching practices and ongoing military training operations, while ensuring that the land remains unspoiled for future generations. It also contains a wealth of scientifically significant geological, ecological, cultural, and historical resources, including Native American rock art dating back 4,000 years, and is an important area for studies of paleoecology, seismology, archaeology, and paleoclimatology.

In addition, the landscape sculpture *City* by artist Michael Heizer is situated on private land within the monument. Comparable in size to the National Mall in Washington, D.C., the work explores contemporary and ancient American influences in the context of the stark and open landscape. Protection of the work and its surroundings has been supported by major American art institutions such as the Nevada Museum of Art, Los Angeles County Museum of Art, the Metropolitan Museum of Art, and the Museum of Contemporary Art.

Comprised of existing federal lands the monument will continue to be managed by Interior's Bureau of Land Management (BLM). It is the newest addition to the [National Conservation Lands](#), a system managed by the BLM that contains some of the West's most spectacular and unique landscapes, including Red Rock Canyon outside Las Vegas.

Neil Kornze Quote

The BLM will prepare a management plan for the monument in formal cooperation with the State of Nevada, local governments, and tribes. The plan will be developed in an open process with maximum public involvement.

Also participating in the event were Jenna Morton, a member of the board of the Las Vegas Springs Preserve; Erin Wright, director of artist initiatives, Los Angeles County Museum of Art; and Brian O'Donnell, executive director of the Conservation Lands Foundation.

For more information on Basin and Range National Monument, including maps and unique visitor experiences, go to BLM.gov.

Secretary Jewell Joins Nevada Community to Celebrate Designation of Basin and Range National Monument

*Designation preserves stunning landscapes, ancient rock art;
protects existing ranching, military and recreation uses*

LINCOLN COUNTY, Nev. – As part of President Obama’s commitment to protect the nation’s significant outdoor spaces for the benefit of future generations, U.S. Secretary of the Interior Sally Jewell and Neil Kornze, director the Bureau of Land Management, joined U.S. Senator Harry Reid and U.S. Rep. Dina Titus (NV-1) to celebrate the recent designation of Basin and Range National Monument in southeastern Nevada. The site, an unbroken expanse of 704,000 acres of rugged mountains and sweeping valleys, helps to tell the proud history of the West, from its earliest native peoples to more recent settlers and mining communities.

“This spectacular landscape of rugged public lands is a celebration of Nevada, its people, history and the vast open spaces with stunning views for which the state is known,” said Secretary Jewell. “Preserving this iconic American landscape supports our partnerships with local communities that worked for decades to protect this rich cultural and ecological treasure, while continuing to allow for traditional uses and opportunity for future scientific study.”

Sen Reid Quote

On July 10, President Obama designated Basin and Range a national monument, after Sen. Reid and Rep. Dina Titus introduced legislation to protect the landscape. It is now one of the three newest national monuments, including Berryessa Snow Mountain in California and Waco Mammoth in Texas. The President's designation protects outstanding recreational opportunities like hiking, hunting, horseback riding, mountain biking, fishing and rock climbing.

Rep. Titus quote

Nevada businesses, including MGM Resorts International, the state's largest employer; Wynn Resorts, Barrick Gold Corporation, and Rockwood Lithium North America, as well as the Las Vegas Metro Chamber of Commerce and the Las Vegas Convention and Visitors Authority have also supported protection of the area. Additional support also came from a broad array of community groups, including private landowners, elected officials, art institutions, conservation and recreation organizations, and representatives from businesses in the state.

Secretary Jewell to Join Nevada Celebration Commemorating Designation of Basin and Range National Monument

LINCOLN COUNTY, Nev. – On Saturday, October 17, U.S. Secretary of the Interior Sally and Bureau of Land Management Director Neil Kornze will join a Nevada celebration to

commemorate the recent designation of Basin and Range National Monument.

In July, President Obama [designated Basin and Range as one of three new national monuments](#), including Berryessa Snow Mountain in California and Waco Mammoth in Texas. The Basin and Range National Monument – located in one of the most remote and undeveloped areas of the state – exemplifies the rich cultural history, varied wildlife and vast open spaces with stunning views for which the state is known.

The monument tells the story of the area’s native peoples as well as the history of more recent settlers and mining communities. The designation also preserves current uses of the land, including traditional ranching practices and ongoing military training operations, while ensuring that the land remains unspoiled for future generations.

The Basin and Range National Monument, comprised of existing federal lands, is the newest addition to the National Conservation Lands, managed by the Department of the Interior’s Bureau of Land Management.

Who: **Sally Jewell**, U.S. Secretary of the Interior
Harry Reid, U.S. Senator, Nevada
Dina Titus, U.S. Congresswoman (NV-1)
Neil Kornze, Director, Bureau of Land Management
Jenna Morton, Board Member, Las Vegas Springs Preserve
Erin Wright, Director of Artist Initiatives, Los Angeles County Museum of Art
Brian O’Donnell, Executive Director, Conservation Lands Foundation
Bianca Donis, 6th Grader, After School All Stars

What: Basin and Range National Monument celebration

When: Saturday, October 17, 2015
4:45 p.m. CDT – Media check-in
5:00 p.m. CDT – Dedication ceremony

Where: Las Vegas Springs Preserve/TBD
333 S Valley View Blvd
Las Vegas, NV 89107

Media: Credentialed members of the media are encouraged to [RSVP here](#).

DOI in the News:

SECRETARY JEWELL TOURS AREAS OF SAN DIEGO COUNTY DAMAGED BY WILDFIRES. [KPBS-TV](#)

San Diego (10/14, 5K) reports that “federal officials on Wednesday toured the Cal Fire Incident Command Center in El Cajon in an effort to highlight the threat of wildfires.” Interior Secretary Sally Jewell joined Rep. Scott Peters, “who is calling on Congress to create a funding plan that would treat wildfires similar to natural disasters.” According to the article, “Peters’ plan, which the Obama administration supports, would provide greater certainty in addressing growing fire suppression needs while preserving funds meant for prevention and other non-suppression programs.”

The [San Diego Union-Tribune](#) (10/14, 542K) reports that Jewell said that “the problem is rooted in how the government pays to both prevent and fight wildfires.” She said that “a change to the complex federal budget could cut the risk of homes going up in flames when a backcountry fire spreads.”

Additional coverage was provided by [KGTV-TV](#) San Diego (10/15, 102K), [KNSD-TV](#) San Diego (10/15, 160K), and [KFMB-TV](#) San Diego (10/15, 53K).

Pilotless Helicopter For Firefighting Tested In Idaho. The [AP](#) (10/15, 2.28M) reports that “the future of wildland firefighting launched Wednesday morning in Idaho.” According to the article, “a Lockheed Martin helicopter capable of flying autonomously with no human control did so as it scooped up water, dropped it on targets and delivered supplies to a distant ridge in a demonstration in front of top federal decision makers 20 miles east of Boise.” Mark Bathrick, director of the Interior Department’s Office of Aviation Services, said, “Wildland fires are a huge problem, particularly here in the West. I’m a believer in the technology that could be put on other helicopters, that eventually could be put on fixed-wing aircraft — scoopers and air tankers.”

Additional coverage was provided by the [New York \(NY\) Times](#) (10/15, Press, Subscription Publication, 11.82M), the [San Francisco \(CA\) Chronicle](#) (10/15, Subscription Publication, 3.35M), the [Seattle \(WA\) Times](#) (10/15, 962K), the [Washington \(DC\) Post](#) (10/15, Keith Ridler |, Ap, 6.76M), the [Washington \(DC\) Times](#) (10/15, Ridler, 344K), the [Minneapolis \(MN\) Star Tribune](#) (10/15, Ridler, 1.19M), [ABC News](#) (10/15, 3.97M), the [Daily Mail \(UK\)](#) (10/15, 5.59M), [Yahoo! News](#) (10/15, Ridler, 5.98M), the [Spokane \(WA\) Spokesman-Review](#) (10/14, 183K), and the [Idaho Statesman](#) (10/14, 190K).

Ranchers, Environmentalists Dispute Grazing’s Impact On Soda Fire. The [Salem \(OR\) Capital Press](#) (10/14, 113K) reports that “Idaho ranchers claim that better grazing management would have reduced the size and severity of the Soda fire that scorched 279,000 acres of land in Owyhee County and part of Eastern Oregon in August.” But Idaho-based Western Watersheds Project “claims that livestock grazing contributed to the severity of the Soda fire and other wildfires that burned millions of acres of land across the West this year.” Jessica Gardetto, a spokeswoman for Idaho BLM, said “‘the jury is still out’ on grazing’s overall impact on

wildfire behavior but some studies have shown that grazing can diminish fire danger where certain fuels, such as invasive cheatgrass, dominate.”

SECRETARY JEWELL ATTENDS DEDICATION CEREMONY OF VALLES CALDERA NATIONAL PRESERVE. The [Outside](#) (10/15, 258K) reports Interior Secretary Sally Jewell attended the dedication ceremony of Valles Caldera National Preserve last weekend. Jewell said, “This is land that has the potential to educate Americans and people around the world about how to live in harmony with nature and how to learn from nature.” She also expressed frustration about the expiration of the Land and Water Conservation Fund. She said, “We want that reauthorized, and frankly, it needs to be funded at the level it was originally intended.”

SEN. FEINSTEIN PUSHES FOR MONUMENTS IN CALIFORNIA DESERT. The [Greenwire](#) (10/14, Subscription Publication) reports that Sen. Dianne Feinstein “told a sweaty and often hostile crowd of about 800 here yesterday that President Obama should designate three new national monuments spanning more than 1 million acres of Mojave Desert as national monuments if her legislative efforts run dry.” Feinstein has “fought for more than six years to establish the Sand to Snow, Mojave Trails and Castle Mountains monuments.” The article notes that “the designation would cover 1.1 million acres and be Obama’s largest under the 1906 Antiquities Act.”

Additional coverage was provided by the [Los Angeles Times](#) (10/14, Cart, 4.07M), the [Inland Empire \(CA\) Community Newspapers](#) (10/15), and [KABC-TV Los Angeles](#) (10/15, 413K).

BEARS EARS INTER-TRIBAL COALITION TO PUSH FOR CONSERVATION PROPOSAL IN DC. [E&E Publishing](#) (10/14, 705) reports that “officials from a handful of Southwest American Indian tribes will be in Washington, D.C., tomorrow to urge protections for 1.9 million acres of federal lands in southeast Utah that they consider sacred.” The Bears Ears Inter-Tribal Coalition, “which includes Navajo, Hopi, Ute Mountain Ute, Ute Tribe of the Uinta Ouray Reservation, Zuni Pueblo and Cochiti Pueblo, expects to meet with Obama administration officials and congressional offices about its ‘Bears Ears’ conservation proposal.” The coalition “wants 1.9 million acres surrounding Bears Ears protected as a national conservation area (NCA) with a full mineral withdrawal, or, if necessary, as a national monument designated by the president.”

Additional coverage was provided by the [Indian Country Today Media Network](#) (10/14, 32K).

FAMILY WANTS BUILDING PLANNED BY BOR NAMED AFTER FALLEN FIREFIGHTER. The [Star of Grand Coulee \(WA\)](#) (10/14, 41) reports that “the family of a woman killed while fighting a local wildfire 25 years ago is hoping a new fire station planned by the U.S. Bureau of Reclamation could be named after her.” According to the article, “Toni Godsil died Aug. 6, 1990, while fighting a wildland fire in Douglas County with the Grand Coulee Volunteer Fire Department when wind shifted and the flames caught up to her.” Since the recognition would require an act of Congress, “Townsend said family members and supporters are getting ready to send letters to the state’s congressional delegation to seek support, ‘trying to see if anyone can help us get this done.’” Interior Secretary Sally Jewell, “who visited local wildland fires in August, said then that she hadn’t heard of the family’s wishes but that her office would be willing to look into the matter.”

SAN ANTONIO MISSIONS TO CELEBRATE WORLD HERITAGE WEEKEND. The [San Antonio Express-News](#) (10/15, 884K) reports that “a full weekend of tours, exhibits and activities are planned around Saturday’s inscription of the five San Antonio missions as a UNESCO World Heritage Site.”

CALIFORNIA BANS SCHOOLS FROM USING “REDSKINS”. The [Digital Journal](#) (10/15, 28K) reports that “California became the first state to ban schools from using ‘Redskins’ as a team name or mascot as Gov. Jerry Brown signed the California Racial Mascots Act into law Sunday morning.” The article notes that “earlier this year, the Obama administration told executives of the Washington NFL franchise that they would have to change their name before the team would be allowed to move to a new stadium in Washington, DC.” Interior Secretary Sally Jewell said last September, “Personally, I think we would never consider naming a team the ‘Blackskins’ or the ‘Brownskins’ or the ‘Whiteskins.’ So, personally, I find it surprising that in this day and age, the name is not different.”

CRS: AGENCY SPENDING ON ADVERTISING FALLS INTO “BUREAUCRATIC BLACK HOLE.” In its “Federal Eye” blog, the [Washington Post](#) (10/15, Rein, 6.76M) reported on “a murky and little-scrutinized area of the federal budget: Advertising,” citing a CRS study which found that executive branch agencies “spent about \$4.4 billion on contracts for ‘advertising services’ from fiscal 2009 to fiscal 2013, \$892.5 million of that in the last year.” According to the study, “this kind of federal spending falls into a bureaucratic black hole,” and

agencies don't really have to be transparent about what they're doing and why. There is no government-wide definition of what constitutes advertising' and no central place where agencies are required to report advertising-related expenditures," which means "agencies can pretty much spend what they want."

STUDY: RESTORING NATURE COULD FIGHT CLIMATE CHANGE. [TIME](#) (10/15, Worland, 19.55M) reports that a growing body of research supports the need for climate change solutions rooted in nature: "ensuring biodiversity, revitalizing forests and supporting other natural environments." A new study published in the journal *Nature* offers strong evidence that "biodiversity strengthens ecosystems, increasing their resistance to extreme climate events and improving their capacity to stem climate change," *TIME* reports. "In addition to enacting regulations to alter human behavior, policymakers can work to restore nature as a method of addressing global warming," *TIME* explains.

Empowering Native American Communities:

INTERIOR PROPOSAL WOULD HELP FORMATION OF NATIVE HAWAIIAN COMMUNITY. The [University of Hawaii – Ka Leo O Voice](#) (10/15) reports that "if the Native Hawaiian community forms a unified government and want a government-to-government relationship with the United States, a U.S. Department of the Interior (USDOI) proposal would create the administrative criteria and procedure that would be enacted." According to the article, "two highlights of the proposal are that the Native Hawaiian government would decide whether to reorganize itself, and what form that government would take." The article notes that "the proposal does not change anything regarding Hawaiian homelands, offer compensation for past wrongs or offer a relationship with more than one Native Hawaiian government" and "it also does not offer the same services and programs that are available to Native American's governments."

SETTLEMENT DISCUSSED IN CASINO LAND DISPUTE. [Law360](#) (10/15, 21K) reports that "a D.C. federal judge agreed on Wednesday to give more time to an Oklahoma tribe and the federal government to try to resolve claims over a National Indian Gaming Commission decision reaffirming that the tribe was illegally conducting gaming on trust land in New Mexico." According to the article, "the Fort Sill Apache Tribe of Oklahoma, the NIGC, the U.S. Department of the Interior and department officials jointly sought the stay on Tuesday to allow them to exhaust discussions to potentially settle the tribe's suit."

ALASKA GOV. WALKER CREATES TRIBAL ADVISORY COUNCIL.. The [Alaska Dispatch News](#) (10/14, 219K) reports that "following up on a pledge to improve relations between the state government and Native tribes, Gov. Bill Walker on Wednesday issued an administrative order creating a tribal advisory council." Walker "signed the order at the end of his address to a one-day Anchorage conference on tribal issues held by the Alaska Federation of Natives and the National Congress of American Indians."

BIE APPOINTS NEW ASSOCIATE DEPUTY DIRECTOR. [Politico](#) (10/15, 942K) reports that "Tony Dearman has been appointed associate deputy director for bureau operated schools at the Bureau of Indian Education."

ADDITIONAL COVERAGE: ADDITIONAL \$10 MILLION TRANSFERRED TO COBELL EDUCATION SCHOLARSHIP FUND. Additional coverage that the Interior Department "announced that an additional \$10 million has been transferred to the Cobell Education Scholarship Fund" was provided by the [Char-Koosta News](#) (10/15, 12K).

Office of Insular Affairs:

MICRONESIANS RELOCATING IN GREATER NUMBERS. The [Honolulu Civil Beat](#) (10/15, 41) reports on "the exodus" of Micronesians. According to the article, "Micronesians are leaving their island homes in large numbers and coming to the U.S. in search of medical care, education, jobs and economic prosperity — things they can't find back at home."

Tackling America's Water Challenges:

FOLSOM LAKE FALLS TO LOWEST LEVEL IN 20-PLUS YEARS. The [Sacramento \(CA\) Bee](#) (10/15, 535K) reports that "even as Sacramento waits for the soaking El Niño forecast to hit this fall, Folsom Lake continues to lose water and will almost certainly fall Thursday to its lowest level in more than 20 years, government data show." The article notes that "on Wednesday afternoon, Folsom Lake had about 162,000 acre-feet of water –

just 17 percent of its capacity – and operators were still releasing about 600 acre feet a day, according to the California Department of Water Resources.” The BOR, “which operates the reservoir, initially warned that the lake could fall to 120,000 acre-feet by the end of September.”

Securing America’s Energy Future:

Renewable Energy:

FIRST OFFSHORE WIND FARM IS US STIRS EXCITEMENT. The [Melbourne \(AUS\) Herald Sun](#) (10/15, 74K) reports that “construction is underway off Rhode Island’s coast on the US’ first offshore wind farm, a milestone that federal and state officials say will help the fledgling industry surge ahead.” Interior Secretary Sally Jewell said that “lenders, regulators and stakeholders could now see a path forward.” She said, “It’s great to witness a pioneering moment in US history. I think it will help the country understand the potential that exists here.”

Onshore Energy Development:

OSMRE BEGINS TRAPPER MINE ENVIRONMENTAL REVIEW. The [Grand Junction \(CO\) Daily Sentinel](#) (10/15, 73K) reports that the Office of Surface Mining Reclamation and Enforcement is “beginning a new environmental review involving coal mining at the Trapper Mine near Craig in response to a judge’s ruling earlier this year.” The agency said “in a public notice issued Wednesday that it will prepare an environmental assessment to analyze impacts of a mining plan approval for current and future mining involving two federal coal leases at the surface mine.” The article notes that “as part of the agency’s review, it will hold a public meeting in Craig Oct. 29.”

NORTH DAKOTA OIL INDUSTRY CONCERNED ABOUT FEDERAL FLARING RULES. The [AP](#) (10/15, Macpherson) reports that North Dakota Petroleum Council Vice President Kari Cutting told a North Dakota committee on energy development that “jurisdictional overreach appears to be the norm in the federal agency rulemaking process.” The AP adds that Cutting, whose group represents more than 550 companies, “said the industry has increased efficiencies...but the industry will have a tougher time adapting to what she calls a ‘jurisdictional grab’ by the federal government.” North Dakota’s oil industry is most concerned about gas flaring regulations, the AP reports, adding that producers in the state flare 20 percent due to insufficient infrastructure, much more than the 1 percent national average and 3 percent global average.

TRIBE IN TALKS ABOUT SETTLEMENT OF FRACKING LAWSUIT. The [EnergyWire](#) (10/14, Subscription Publication) reports that “an American Indian tribe is in talks with the Obama administration to settle a legal battle over the Interior Department’s much-contested hydraulic fracturing rule.” According to the article, “the Department of Justice, Interior and the Southern Ute Indian Tribe last week asked a federal court to pause their case while the sides continue settlement talks.” The Southern Utes “filed their lawsuit in June, three months after the Bureau of Land Management finalized the rule, which regulates well construction, wastewater management and chemical disclosure for fracking on public and tribal lands.”

CORDERO ROJO MINE TO RECEIVE RECLAMATION AWARD. The [World Coal](#) (10/15) reports that “Cloud Peak Energy’s Cordero Rojo coal mine has been awarded the Office of Surface Mining Reclamation and Enforcement’s 2015 Excellence in Surface Coal Mining Reclamation Award for its restoration work on the Belle Fourche River.” According to the article, “the mine relocated a portion of the river and reclaimed the stream channel to return it to approximately the same conditions as existed before mining.” The award will be presented at the National Mining Association’s awards ceremony in Washington DC on 9 November.

CONCERNS GROWING ABOUT EARTHQUAKES IN OKLAHOMA NEAR A HUB OF US OIL. The [New York Times](#) (10/15, Wines, Subscription Publication, 11.82M) reports an earthquake in Oklahoma over “last weekend has raised fresh concern about the security of a vast crude oil storage complex, close to the quake’s center, that sits at the crossroads of the nation’s oil pipeline network.” The quake occurred near Cushing, “home to the so-called Cushing Hub, a sprawling tank farm that is among the largest oil storage facilities in the world.” Last month, scientists said that an intense earthquake near the site “could seriously damage storage tanks and pipelines.” The hub has been designated by the Federal government as “a critical national infrastructure.” The 4.5 magnitude quake “is among the largest of thousands of temblors that have rocked central and northern Oklahoma in the past five years, largely set off by the injection of oil and gas industry wastes deep into the earth.”

STUDIES TIE FRACKING CHEMICAL EXPOSURE TO PREMATURE BIRTHS, LONG-TERM REPRODUCTIVE HEALTH CONSEQUENCES. The [New York Times](#) (10/15, Bakalar, 11.82M) “Well” blog reported that “living near hydraulic fracturing, or fracking, operations” may be tied to “premature births,” according to research published Sept. 30 in the journal *Epidemiology*. The study of “10,496 singleton births by 9,384 mothers from 2009 to 2013 in Pennsylvania” revealed that “the 25 percent of mothers most exposed to fracking were 40 percent more likely to give birth preterm...than the quarter least exposed.”

Meanwhile, the [Huffington Post](#) (10/15, Peeples, 164K) reports that “prenatal exposure to a cocktail of chemicals commonly used in the various phases of oil and natural gas production, including fracking, could carry long-term reproductive health consequences,” a study published online Oct. 14 in the journal *Endocrinology* suggests.

Offshore Energy Development:

IGNORING ST. JOHNS BRIDGE PROTEST COULD HAVE COST OREGON THOUSANDS IN FINES. The [Oregonian](#) (10/15, Theriault, 756K) reported that if Oregon officials had held back during Greenpeace’s summer protest of Shell’s Arctic drilling, it “could have cost the state thousands of dollars in federal fines, according to internal documents reviewed by The Oregonian/OregonLive.” Oregon officials responded after 13 Greenpeace protestors dangled from the St. Johns Bridge and briefly blocked the passage of a ship belonging to Shell. The Oregon Department of Transportation “requires a permit from the U.S. Coast Guard to operate the St. Johns Bridge” and “must ensure that ships up to 174 feet tall can pass below.” The protestors and their flags put the DOT in violation of the permit, and had the state balked in its response to the protestors, it could have set up “a contentious back-and-forth of written warnings, legal reviews and fines that could have hit \$25,000 every time operators of a ship thought about traveling under the bridge but decided not to risk it.”

[Inside Climate News](#) (10/14, Bagley) reported that “activists across the U.S. will push for quick and aggressive climate action Wednesday by staging protests, collecting signatures, organizing panels and even floating 30 miles down the Missouri River.” Events are scheduled for nearly 200 locations and “will be known collectively as the People’s Climate Movement, a follow-up to last year’s People’s Climate March.” Events “aim to draw attention to the local impacts of global warming...and the hundreds of grassroots groups fighting for action.” The article briefly reported that “there was also a significant upturn this year in civil disobedience campaigns,” including Greenpeace’s July protest on Portland’s St. Johns Bridge.

Shell Drilling Rigs Leave Arctic. On its website, [KUCB-FM](#) Unalaska, AK (10/15, Ryan) reported that Shell Oil’s Polar Pioneer rig “left Alaska’s Dutch Harbor for Port Angeles, Washington, on Wednesday” while Shell’s “other Arctic rig, the Noble Discoverer, left Dutch Harbor for Everett, Washington, on Monday.” Other ships in Shell’s Arctic fleet “will leave Alaska over the next couple of weeks, and the company has not disclosed the fate of the 400 employees who have worked on the project in Anchorage.”

The [AP](#) (10/14, Joling, 2.28M) reported that two of Royal Dutch Shell’s drill vessels, the Noble Discoverer and the Polar Pioneer, “have safely departed Arctic waters for the Pacific Northwest.” Following a Coast Guard inspection, the Noble Discoverer departed Dutch Harbor in the Aleutian Islands on Monday “for the Port of Everett in Washington state, Shell spokesman Curtis Smith said.” The Polar Pioneer “reached Dutch Harbor on Monday afternoon” along with two tug boats, and will be towed to Port Angeles. The AP reported that “the next destinations for both vessels have not been determined, Smith said.”

The [Seattle Post-Intelligencer](#) (10/13, Connelly, 560K) reported that the Polar Pioneer “will not be returning to Seattle, where it was greeted last April by a seaborne protest of ‘kayactivists’ including local politicians.” Shell “has not requested any exclusion zone around the vessels, as it did last spring.” Shell “is promising a less dramatic return journey than in December of 2012,” when it “tried to tow the conical drilling vessel Kulluk across the Gulf of Alaska in the teeth of an early winter storm.” The Kulluk “broke loose from its tow lines and went aground New Year’s Eve on an island near Kodiak.”

The [Puget Sound \(WA\) Business Journal](#) (10/13, Zak, Subscription Publication, 59K) reported that Shell spokeswoman Megan Baldino said, “Decisions about the final destination are still being worked out.” The Journal added that “it’s likely that the rigs will remain in Port Angeles and Everett for a while until their next destinations are determined.”

[KOMO-TV](#) Seattle (10/14, 5:08 p.m. PDT, 92K) broadcast, “Two Shell oil rigs are returning to ports in our

state but they won't be docked in Seattle. The Puget Sound Business Journal reports that one of them will be moored in Everett and the other in Port Angeles. The Polar Pioneer triggered intense protests while it was docked in Seattle's Terminal 5 before the expedition. Last month, Shell announced it's abandoning plans to drill for oil in the Arctic but they do say some supply ships could still be docked in Seattle."

[KPLC-TV](#) Lake Charles, LA (10/14, 6:51 a.m. CDT, 33K), [KTUU-TV](#) Anchorage, AK (10/13, 6:10 p.m. AKDT, 31K), [KONG-TV](#) Seattle (10/13, 10:14 p.m. PDT, 53K), [KGW-TV](#) Portland, OR (10/13, 6:08 p.m. PDT, 39K) and [KOIN-TV](#) Portland, OR (10/13, 4:34 p.m. PDT, 27K) also broadcast coverage of the story.

Alaska Gov. Calls For Expanded Oil Drilling To Fund State's Climate Change Adaptions. [TIME](#) (10/14, Worland, 19.55M) reported that Alaska Governor Bill Walker "called for expanded oil drilling to help him address the challenge of climate change in his state." Walker "told the BBC that increased revenue from oil...would allow his state to fund measures to adapt to a changing environment" and "said he wants to drill as soon as possible in the Arctic National Wilderness Refuge." Said Walker, "We are in a significant fiscal challenge. ... We have villages that are washing away because of changes in the climate."

[Slate](#) (10/13, 1.38M) reported that "the situation has grown still worse in Alaska in recent weeks: In late September, Royal Dutch Shell suddenly announced it was abandoning plans to drill offshore of Alaska's northwest coast after it failed to locate oil in any meaningful quantities during its controversial exploration this summer. ... Without oil as a reliable income source, Alaska's politicians have begun a tough look inward to re-envision their state's future." Added Slate, "Apparently, that reality check hasn't yet reached the governor's office."

The [Daily Caller](#) (10/13, Follett, 375K) and the [CBC News \(CAN\)](#) (10/15, 225K) also covered the story.

Reasons Shell Halted Arctic Oil Drilling Examined. On its website, the [Alaska Public Radio Network](#) examined reasons for Shell halting its exploratory drilling for oil in the Alaskan Arctic. While Kara Moriarty of the Alaska Oil and Gas Association "blamed the slow pace of federal permitting and a thicket of regulations," the article also looked at the reasons listed in Shell's statement, including the results at the Burger J well, the "challenging and unpredictable" regulatory environment, and the cost of the project.

OFFICIALS TOUT CAMINADA RESTORATION TO CELEBRATE 25 YEARS OF COASTAL RESTORATION PROGRAM. The [New Orleans Times-Picayune](#) (10/14, 718K) reports that "thousands of pounds of sand from the Gulf of Mexico spewed from a pipe Wednesday (Oct. 14) onto the re-growing beach and dunes that makes up the Caminada Headlands, the southernmost edge of Jefferson and Lafourche parishes that protects both rich wetlands just to its north and the nationally important Port Fourchon, jumping off point for deepwater drilling." Observing "the rebuilding by a team of 80 employees of Weeks Marine, a dredging firm based in Covington, were representatives of five federal agencies and the state Coastal Protection and Restoration Authority who were on the Elmer's Island segment of the Caminada beachfront to celebrate the 25th anniversary of the Coastal Wetlands Planning, Protection and Restoration Act." The article notes that "the project under way Thursday is actually funded by a grant from the National Fish and Wildlife Foundation, with the money coming from the \$1 billion 2013 settlement of civil and criminal charges facing Transocean, the company that owned the Deepwater Horizon drillship that was at the center of the BP Macondo well blowout and oil spill in 2010."

LOUISIANA TO RECEIVE BP SETTLEMENT. The [AP](#) (10/15, Burdeau, 344K) reports that "the next governor will play a crucial role in Louisiana's coastal crisis – either by aggressively working to save the coast or missing a prime opportunity to stop the state from slipping further into the Gulf of Mexico." Louisiana is "poised to receive about \$8.7 billion in settlement money over damages caused by BP's catastrophic 2010 Gulf oil spill – money mandated by law for environmental restoration." The article notes that "all four major candidates – the three Republicans, U.S. Sen. David Vitter, Lt. Gov. Jay Dardenne, Public Service Commissioner Scott Angelle and Democratic state Rep. John Bel Edwards – say they unequivocally support ongoing coastal restoration plans," but each has "offered some new ideas."

MISSISSIPPI TO SPEND MILLIONS ON RESTORATION PROJECTS. The [Jackson \(MS\) Clarion Ledger](#) (10/14, 263K) reports that "Mississippi officials will turn to the public and other stakeholders to help decide how to spend \$582 million the state will get to restore areas damaged by the 2010 Gulf of Mexico oil spill." The funds will "begin flowing to Mississippi in 2017 under the Resources and Ecosystems Sustainability, Tourism Opportunities and Revived Economies Act, also known as the RESTORE Act." According to the article, "state officials haven't decided yet on final projects but plan to focus on improving water quality, protecting and

restoring marine resources and buying land to protect habitats.

GRETNA CITY COUNCIL APPROVES PLAN FOR BP SETTLEMENT MONEY. The [New Orleans Times-Picayune](#) (10/15, Samuels, 718K) reports that the Gretna City Council on Wednesday “approved a plan for the \$3.29 million in settlement money the city is receiving as a result of the 2010 BP oil spill.” Nearly a third of the money will go toward legal costs, \$500,000 will be entered into next year’s public works budget, and the remaining \$1.96 million will be set aside for future use.

ALASKA, FEDERAL OFFICIALS NOT TO PURSUE ADDITIONAL \$92 MILLION IN EXXON VALDEZ DAMAGES. The [AP](#) (10/15) reports that state and federal governments have decided not to pursue \$92 million in additional damages from ExxonMobil for the 1989 Exxon Valdez oil spill, “citing the recovery of ducks and sea otters in Alaska’s Prince William Sound.” Wildlife monitoring showed that wildlife populations have returned to pre-spill levels and officials concluded the legal requirements for pursuing a claim were no longer met.

[Reuters](#) (10/15) also reports.

America’s Great Outdoors:

Bureau of Land Management:

STOCK GROWERS ASSOCIATION SUES OVER LAND USE PLANS. [KTWO-AM](#) Casper, WY (10/15, 576) reports that “the Wyoming Stock Growers Association has sued federal agencies that allegedly ignored its comments for land use plans in areas with sage grouse habitat, its executive vice president said Wednesday.” Jim Magagna said, “Our view is the grazing regulations and requirements that we already have with the BLM (U.S. Bureau of Land Management) of meeting range land health standards are adequate and beneficial to the range land and therefore to sage grouse habitat. We’ve not been convinced that we need additional requirements on top of those.”

BLM REVIEWING ARMY PROPOSAL FOR LONG-TERM TRAINING. The [AP](#) (10/15, 344K) reports that “the Army plans to have Fort Carson helicopters practice high-altitude operations on public land west of Canon City this fall.” The BLM said Wednesday “the Army expects to use five landing zones in Fremont County from mid-October through December.” The BLM says “the operations are expected to have little or no ground impact on the landing sites or neighboring property owners.” The BLM is also “reviewing an Army proposal for longer-term training.”

BLM SEEKS MORE COMMENTS ON PROPOSED MANAGEMENT OF RED CLIFFS, BEAVER DAM WASH NATIONAL CONSERVATION AREAS. The [Deseret \(UT\) News](#) (10/15, 407K) reports that “what sort of land management approach should be embraced involving nearly 110,000 acres in Washington County is drawing sharp disagreement among county leaders and an environmental organization, prompting a prolonged public comment period on draft plans.” The BLM “released a draft environmental impact statement this summer on proposed management of the Red Cliffs and the Beaver Dam Wash national conservation areas, which were established through the Omnibus Public Land Management Act of 2009.” According to the article, “a 90-day public comment period on an array of alternatives to managing these sections of lands was proposed, in addition to informational open houses, but BLM officials say the level of interest is driving a second round of outreach.”

BLM UNVEILS LEMHI VALLEY TRAVEL PLAN. The [Idaho Mountain Express](#) (10/15, 1K) reports that the BLM will “hold a public meeting in Salmon next week about a travel management plan for nearly 500 square miles in the Lemhi Valley.” According to the article, “representatives at the open house will provide information and take comments on three alternatives included in an environmental assessment that would permit varying amounts of motorized recreation on roads and trails on BLM land southeast of Salmon.”

GROUP ACCUSES BLM OF EXPERIMENTING ON HORSES. The [Elko \(NV\) Daily Free Press](#) (10/15, 22K) reports that the American Wild Horse Preservation Campaign on Wednesday issued a statement claiming that the BLM is “ignoring scientific advice and environmental complaints in its decision to proceed with the use of an experimental fertility control vaccine on wild horses in the Antelope Herd Management Area in eastern Nevada.” Deniz Bolbol, AWHPC director of field operations, said, “We are disappointed that the White House office that is supposed to ensure agency compliance with environmental laws is allowing the BLM to

experiment on America's wild horses without any scientific oversight, review, or, for that matter, any scientific method for determining the impacts of the experiments on the horses themselves. Further, the use of GonaCon in this unscientific, unregimented proposal will place in jeopardy the individual horses' long-term well-being and their natural, social behaviors, which are attributes that make wild horses celebrated American icons, treasured by Americans and others around the world."

Fish and Wildlife Service:

FWS MOVES AHEAD WITH MEXICAN WOLF RELEASES. The [Santa Fe New Mexican](#) (10/15, 67K) reports that "in a direct snub to state officials, the U.S. Fish and Wildlife Service announced Wednesday that it will release about 10 Mexican gray wolves into the wilds of southwestern New Mexico, even though state game officials have refused to issue a permit for the action." The FWS "issued a statement Wednesday that said it will release the wolves as part of its recovery program for a species that is at risk of extinction."

SCIENTISTS ASK FOR PUBLIC HELP WITH SICK OTTERS IN ALASKA. The [AP](#) (10/15, 344K) reports that "scientists are turning to the public for help dealing with sick and dead otters in Alaska." FWS officials say "they have recently received about 200 reports of sick or dead sea otters in the Kachemak Bay region." The FWS is "working with Alaska Sea Life Center in Seward and running tests to find out what's hurting the animals."

ENVIRONMENTAL GROUP WANTS FOIA SUIT DISMISSED. The [Pueblo \(CO\) Chieftain](#) (10/15, 87K) reports that "an environmental organization with an office in Salida is asking a judge to dismiss a lawsuit it filed against a federal agency for allegedly violating the Freedom of Information Act." The Center for Biological Diversity sued the FWS "for allegedly failing to provide documents the center requested about the agency's decision not to list a fish as an endangered species." The center said last week the FWS "provided the requested documents in August, but also withheld and redacted several documents based on the legal concept of attorney-client privilege." But "despite some documents being withheld and redacted, the environmental organization stated in the court filing last week that the lawsuit should be dismissed."

CLEANUP OF DEAD FISH ON VIRGINIA EASTERN SHORE COMPLICATED BY ENDANGERED BEETLE. The [Washington Post](#) (10/15, Hedgpeth, 6.76M) reports that "clean-up of the tens of thousands of dead fish that washed up on Virginia's Eastern Shore is proving to be harder after authorities learned that an endangered tiger beetle also inhabits the beach area." According to the article, "the incident began Oct. 7 when a net owned by Omega Protein, a large commercial fishing operation out of Houston that specializes in harvesting menhaden, tore open," and "on Tuesday, officials with Omega Protein said they estimated that some 75,000 fish had washed ashore." The company said it has "received details from the U.S. Fish and Wildlife Service on how to deal with the cleanup of the dead fish and not harm the tiger beetles in the area."

FWS HOLDS OPEN HOUSE ON ACCESS TO RATTLESNAKE MOUNTAIN. The [Tri-City Herald \(WA\)](#) (10/15, 100K) reports that "about 50 people who attended an afternoon open house held in Richland by the U.S. Fish and Wildlife Service to hear ideas about access to Rattlesnake Mountain and surrounding land." An evening meeting also was held. Former Rep. Doc Hastings "got legislation passed shortly before he retired in December requiring the public be given access to the top of the mountain." The FWS is "starting planning with a list of restrictions from other laws and regulations."

MISSOURI RESIDENTS WANT LEAD MINE SETTLEMENT SPENT IN COMMUNITIES. The [AP](#) (10/15, 344K) reports that "some residents in southeast Missouri want money from a lead mining settlement spent in communities affected by contamination, not on a new state park." According to the article, "residents panned a plan to buy 2,500 acres for the Oregon County park during a special meeting Tuesday." The Missouri Department of Natural Resources and two federal agencies, the FWS and the U.S. Forest Service, "would decide how to spend the settlement after getting public input."

LOG CABIN DAY FESTIVAL KICKS OFF AT MUSCATATUCK NATIONAL WILDLIFE REFUGE. The [AP](#) (10/15, Rutherford, 344K) reports that "deep within the leafy recesses of Muscatatuck National Wildlife Refuge near Seymour sits an old log cabin and barn." Myers Cabin has "no running water, no electricity, but plenty of rustic charm." On Saturday, "crowds of people gathered at the cabin for the annual Log Cabin Day Festival." The article notes that "the event served as the kickoff for National Wildlife Refuge Week, which runs through Sunday."

"DING" DARLING DAYS KICKS OFF SUNDAY. The [Fort Myers \(FL\) News-Press](#) (10/14, 171K) reports that

the U.S. Ding Darling National Wildlife Refuge will hold a ruckus on Sunday of the week-long celebration of the man behind the name.” According to the article, “the refuge is named for Jay Norwood ‘Ding’ Darling, an editorial cartoonist who espoused environmental issues.”

CONGRESS URGED TO PROTECT ENDANGERED SPECIES. In an op-ed for the [Springfield \(MA\) Republican](#) (10/14, 336K), Michael Bean, Principal Deputy Assistant Secretary for Fish, Wildlife and Parks, U.S. Department of the Interior, writes that “last month, farmers, conservationists and landowners came together at a small field in Dover, New Hampshire to celebrate the recovery of the New England cottontail.” Bean says that “that type of conservation success story can and should be common.” However, he warns that “there are threats to unravel a key ingredient: the Endangered Species Act.” Bean hopes that “the Pope’s visit last month can remind us of the importance of protecting our fellow creatures.”

HABITAT EXCHANGES URGED TO PROTECT SPECIES. In an op-ed for the [Wall Street Journal](#) (10/15, Krupp, Subscription Publication, 5.95M), Fred Krupp, president of the Environmental Defense Fund, lauds the Interior Department’s recent decision not to list the greater sage grouse. Krupp argues that the Endangered Species Act is necessary, but it is also a last resort. He asserts that to protect wildlife populations and the economy, we must initiate care much sooner and the prescription must be collaborative. He suggests that habitat exchanges can be part of the prescription.

National Park Service:

REPORT URGES NPS TO ADD CHARGING STATIONS FOR ELECTRIC VEHICLES. The [Greenwire](#) (10/14, Subscription Publication) reports that the NPS “should double the small fraction of parks with electric vehicle charging stations, along with other steps to reduce car-related emissions, a think tank urged in a report released today.” The article notes that “at present, 21 of 470 national parks, or about 4 percent, have installed charging stations, the Center for American Progress said in the report, which recommends increasing that number to 42, with the inclusion of such iconic destinations as Yosemite National Park, Mount Rushmore National Memorial and Glacier National Park.” The report said that “besides installing more charging stations,” the NPS “should also reduce admission fees for visitors driving electric vehicles.”

REPORT DETAILS BRINKERHOFF LODGE ABUSE AT GRAND TETON. The [Jackson Hole \(WY\) News & Guide](#) (10/15, 1K) reports that “over a recent four-year period Grand Teton National Park would have collected nearly \$29,000 in additional revenue were guests to the Brinkerhoff Lodge properly billed, federal investigators say.” according to a U.S. Department of the Interior Office of Inspector General report released last month, “between 2011 and 2014 guests of the historic cabin near Jackson Lake Dam were billed just 15 percent of the time.” The report found that the NNPS “could put the government asset to better use, that there are safety problems requiring immediate attention and that — counter to their rules — Grand Teton officials were allowing high-ranking government officials to use the lodge as a low- or no-cost vacation getaway.”

PROPOSAL WOULD HELP MAKE EVERS HOME PART OF NPS. The [AP](#) (10/15, 89K) reports that “the home where Mississippi civil rights leader Medgar Evers was assassinated in 1963 gets thousands of visitors each year, operates as a college-owned museum and relies on state grants and private donations for maintenance funds.” Now, “the state’s U.S. senators are hoping the National Park Service can lend a hand.” Sens. Thad Cochran and Roger Wicker said “last week they’ve filed a bill that would authorize a study on the national significance of the Evers home, as a step toward making it part of the Park Service.”

VETERAN SUES AFTER BEING INJURED BY 16-POUND PINE CONE IN SAN FRANCISCO MARITIME NATIONAL HISTORICAL PARK. The [Greenwire](#) (10/14, Subscription Publication) reports that “a U.S. Navy veteran is suing the Department of the Interior and the National Park Service after a 16-pound pine cone fell on his head while he sat beneath a tree in San Francisco Maritime National Historical Park.” According to the article, “celebrating Fleet Week ashore in San Francisco in 2014, Sean Mace said he was reading and napping under a bunya pine (*Araucaria bidwillii*) when a cone larger than a pineapple struck his head.” The article says that “with no signs warning about the danger from falling pine cones, Mace is suing the park for nearly \$5 million.”

YOSEMITE NATIONAL PARK CELEBRATES 125 YEARS. The [Albuquerque \(NM\) Journal](#) (10/15, 259K) reports that “the 125th anniversary of Yosemite National Park has been marked by a ceremony in Yosemite Valley.” The NPS says “about 1,500 people attended the recent event, which included a Native American blessing and a portrayal of John Muir, the naturalist who worked to preserve Yosemite and other parts of the Sierra Nevada.”

NPS CLARIFIES RENAMING OF BUILDING HOUSING OF SELMA INTERPRETIVE CENTER. The [Selma \(AL\) Times Journal](#) (10/14, 22K) reports that “the building that houses the Selma Interpretive Center is being renamed, but the National Park Service wants to clarify that the name of the center itself is not changing.” The Selma City Council “passed a resolution Tuesday night to rename the building the James Perkins Jr. Voting Rights Interpretive Center.” Sandy Perkins, the superintendent for the Selma to Montgomery Historic Trail, “wants to make sure the public understands the interpretive center, which is run by the National Park Service, is not changing names.”

NPS APPROVES REHABILITATION AT YELLOWSTONE NATIONAL PARK. The [Cody \(WY\) Enterprise](#) (10/15, 20K) reports that “visitors to Yellowstone National Park will find many of the overlooks and trails along the rim of the Grand Canyon of the Yellowstone River under construction” after the NPS “issued a Finding of No Significant Impact.” The article notes that “the action addresses aging and deteriorating infrastructure, provide improved accessibility to visitors, improve pedestrian flow, address safety issues, and improve the visitor experience in the Park.”

RINGTAIL AT CARLSBAD CAVERNS NATIONAL PARK HAD RABIES. The [AP](#) (10/15, 259K) reports that “a ringtail whose unusual behavior prompted a temporary closure of one entrance to the cave at Carlsbad Caverns National Park had rabies.” According to park officials, “that determination was made by the New Mexico Department of Health and Science in Albuquerque.”

CONGAREE NATIONAL PARK REOPENS AFTER FLOODING. The [AP](#) (10/15, 344K) reports that “the Congaree National Park south of Columbia has reopened after the historic flooding earlier this month.” The park has “been closed since Oct. 4 because of the flooding.” Officials say “the flood waters are receding at the park.”

UTAH PARKS SEES RECORD NUMBERS OF VISITORS. The [AP](#) (10/15, 344K) reports that “southern Utah’s parks have been attracting a record number of visitors in 2015.” The article notes that “Bryce Canyon National Park broke its record number of visitors in a calendar year by hitting 1.5 million in September.” Also, “Zion National Park is expected to reach more than 3.2 million visitors this month, setting a new record.” Meanwhile, “other parks like Canyonlands, Cedar Breaks and Pipe Spring are also poised to set records.”

COMPLETION OF BIRDSALL MURAL NEARS. The [Seward \(AK\) City News](#) (10/15) reports that “except for one panel that is being completed in Dot Bardarson’s garage, the mural for the National Park Service building is finished and awaiting the clear coat process at Seward Body and Paint.” The mural, titled “Kenai Fjords, where Mountains, Ice, and Water Meet,” will “be mounted next Spring for the celebration of 100 years by the National Park Service.”

HISTORIC LUMBER SCHOONER C.A. Thayer Begins Final Stage Of Restoration. The [San Jose \(CA\) Mercury News](#) (10/14, 626K) reports that “Jeff Morris, historic ships manager with the National Park Service, and a crew of NPS workers are busy preparing the historic 1895 lumber schooner, the C.A. Thayer, for a trip across the bay to the Bay Ship & Yacht Co. in Alameda for the stepping of three new masts.” According to the article, “the historic schooner is entering the last stage of a long restoration that started with its first trip to Alameda in 2003.”

NATIONAL FOSSIL DAY CELEBRATED. [Popular Science](#) (10/15, 6.51M) reports on “the fifth annual National Fossil Day, a day trademarked by the National Park Service and celebrated in schools and parks across the country.” The NPS “hopes that if people are educated about fossils, they will be more likely to treat fossils they find with respect, whether they’re found in a backyard or a national park.” In honor of the day, the article highlights “some of our favorite discoveries from this year.”

BODY OF MAN RECOVERED IN LAKE POWELL. The [AP](#) (10/15, 344K) reports that “authorities say the body of a Wyoming man missing after he jumped from a 90-foot cliff into Lake Powell last week has been recovered.” The NPS and the Coconino County Sheriff’s Office say “the body of 29-year-old William ‘Billy’ Burke was spotted Wednesday at a depth of 153 feet by a remote operated vehicle.”

Additional coverage was provided by [Reuters](#) (10/14, Schwartz).

ADDITIONAL COVERAGE: NPS RENTING QUARTERS 17. Additional coverage that the NPS is “offering a once-in-a-lifetime opportunity to rent a three-bedroom, two-bathroom house near the Point Bonita Lighthouse

in the main headlines was provided by the [Santa Rosa \(CA\) Press Democrat](#) (10/15, 170K).

US Geological Survey:

FEMA PLANS GREAT SHAKEOUT EARTHQUAKE DRILLS FOR THURSDAY. [Reuters](#) (10/14, Gillam) reports that on Thursday FEMA is organizing Great ShakeOut earthquake drill events nationwide, bolstering emergency preparation at schools and elsewhere as earthquake activity in the US increases. Reuters highlights the event's slogan of "drop, cover and hold on." The article notes that Cushing, Oklahoma experienced a magnitude 4.5 earthquake on Saturday. The [San Diego \(CA\) Union-Tribune](#) (10/14, Robbins, 542K) predicts a "big turnout" for the San Diego County earthquake drill, where more than 943,000 people have signed up to participate, most of whom are "students and government employees."

The [San Francisco Chronicle](#) (10/15, Perlman, Subscription Publication, 3.35M) reports that on Wednesday the Calaveras Fault caused "a swarm of small earthquakes" near San Ramon. "By midafternoon, the total had reached 30," according to the US Geological Survey (USGS). The article outlines the history of earthquakes along the fault. The [Palm Springs \(CA\) Desert Sun](#) (10/14, 99K) reports that on Wednesday morning Coachella Valley experienced a magnitude 3.6 earthquake, which did not cause any reported damage. The article notes other recent earthquakes in the Coachella Valley. USGS Seismologist Dr. Lucy Jones is paraphrased as saying "a magnitude 4.0 temblor is considered 'normal' earthquake activity for Southern California."

ADDITIONAL COVERAGE: TWITTER PROJECT HELPS USGS TRACK EARTHQUAKES. Additional coverage that the USGS is "using Twitter to help detect earthquakes in real time as they are felt across the globe" was provided by the [Los Angeles Daily News](#) (10/14, 288K) and the [San Bernardino \(CA\) Sun](#) (10/14, 142K).

ADDITIONAL COVERAGE: CALIFORNIA'S SEQUOIAS SHOW SIGNS OF STRESS. Additional coverage that California's "giant sequoias, which can live thousands of years, are starting to show signs that they're not getting enough water" was provided by [PBS NewsHour](#) (10/15, 127K).

Top National News:

MEDIA ANALYSES: CLINTON'S STRONG DEBATE PERFORMANCE MAKES BIDEN RUN LESS LIKELY.

Continuing coverage of Tuesday evening's first Democratic presidential debate focuses on the consensus that Hillary Clinton won the face-off and regained momentum, and also on the man who was not there: Vice President Biden. Speculation in broadcast, print, and online media is that Biden is less likely to enter the race since Clinton is getting back on track. Immediately following the debate, [CNN](#) (10/14, 5.17M) said on its website that in the Pivotal Political Prediction Market, the odds of a Biden nomination fell from 15% to 11%. By early Thursday, the odds were down to five percent – with just a 35% chance that Biden will run, a huge fall from 78% before the debate.

On [ABC World News](#) (10/14, story 2, 1:50, Muir, 5.84M), Jonathan Karl reported, "At a meeting today, Vice President Biden struck a note of optimism about America." Biden: "We're just going to roll, man. I really mean it. America's ready." Karl: "But tonight, there's much less optimism about Biden's presidential prospects. Even some of Biden's strongest supporters are saying privately he may have simply waited too long." The [CBS Evening News](#) (10/14, story 4, 2:20, Pelley, 5.08M) reported Biden "said he is proud of last night's Democratic presidential debate, but if he was looking for a reason to jump into the race, he likely didn't find it. Hillary Clinton dominated." [ABC World News](#) (10/14, lead story, 3:25, Muir, 5.84M) said that Clinton's campaign chairman said Wednesday, "'At this point, Joe Biden needs to make up his mind.' Other top Democrats [are] thinking the same, as Clinton gets high marks for her center stage performance."

[NBC Nightly News](#) (10/14, lead story, 3:15, Holt, 7.86M) said in its lead story that "for months her campaign has been in response mode," but "at least for this moment," Clinton "is appearing to have retaken control of the conversation." Her debate performance may "give nervous supporters a reason to breathe easier and rivals a reason for pause." Chuck Todd then said on [NBC Nightly News](#) (10/14, story 2, 1:05, Holt, 7.86M), "There is no doubt that Team Biden was watching last night to see what kind of new openings that they could find. ... If the Biden campaign were about to get off the ground, we'd start hearing about it. We would see leaks about it. ... Almost radio silence from the West Wing there."

The [NY](#) (10/15) reports Biden says he's proud of the Democratic candidates who took part in the debate, but said little more. [Reuters](#) (10/15, Oliphant) says the dynamics of the Democratic race have changed after Clinton's strong debate performance, which is dampening calls for a late Biden entry. [USA Today](#) (10/15, Jackson, 5.23M) says "the specter of a Joe Biden candidacy still hovers over the Democratic presidential race, but it may be growing faint." John Hudak of the Brookings Institution said, "There is no path for Biden. There's no reason for it."

The [New York Times](#) (10/15, Martin, Subscription Publication, 11.82M) writes that Clinton's "sure-footed performance...did not just lift the spirits of her supporters and reassure nervous party officials about her candidacy, it also swiftly cooled talk about the need" for a Biden candidacy. Clinton offered "crisp answers to nearly every question, an aggressiveness her rivals did not seem ready for and a level of confidence that has often been obscured over months of questions about her use of a private email as secretary of state," and on Wednesday, "Democrats were describing the closing, if not the slamming shut, of a door" for Biden.

Dan Balz writes in the [Washington Post](#) (10/15, 6.76M) that "the path for Biden has always looked daunting," and though "after the debate, Clinton aides were not saying explicitly whether Biden has a path, but after weeks of neutral comments, the language turned." Clinton campaign chair John Podesta said Biden "will need to make a decision soon." [Politico](#) (10/14, Gass, 942K) reported Podesta "has a message" for Biden: "The time has come to decide on your White House bid."

The [Washington Post](#) (10/15, Rucker, 6.76M) says in another report that "the official line from the Clinton campaign was that they were thrilled with the candidate's performance and that Biden had to make his own decision," but the [Wall Street Journal](#) (10/15, Nelson, Meckler, Subscription Publication, 5.95M) says the Democratic establishment is growing impatient. The [Huffington Post](#) (10/14, Stein, 164K) said the Clinton campaign "has begun aggressively pushing" Biden "to make a decision one way or another."

The [Los Angeles Times](#) (10/15, Lauter, 4.07M) writes that Clinton "had three big tasks to accomplish in Tuesday night's debate: Reassure the Democratic establishment, draw contrasts with Sen. Bernie Sanders and deter Vice President Joe Biden. ... It was clear that she had succeeded with the first two. Whether she achieved the third goal should be known within days." [The Hill](#) (10/14, Fabian, 471K) reported, however, that Biden "gave no indication Wednesday that he has a set a deadline to make a decision."

The [Washington Post](#) (10/15, 6.76M) says Clinton was the only candidate in the debate who "performed like a potential president" with her "impressive performance. Yet the debate also surfaced one of Ms. Clinton's vulnerabilities: the possibility that Mr. Sanders and the leftward drift of the Democratic Party will drag her away from pragmatism – and from general-election voters."

The [New York Times](#) (10/15, Subscription Publication, 11.82M) says in an editorial that Clinton "reminded us why she's the front-runner, with her experience, command of the issues and strength in communicating ideas. She seemed both at ease and fearless." The Times also says the Democrats argued responsibly and with civility, while "the Republican candidates...haven't a prayer of knowing what to do if they ever enter the White House."

E.J. Dionne writes in his [Washington Post](#) (10/15, 6.76M) column, "At some point during Tuesday night's Democratic debate, many people in living rooms across the country undoubtedly turned to each other with the same basic thought about Hillary Clinton: Oh, so that's why she's the front-runner." Daniel Henninger writes in his [Wall Street Journal](#) (10/15, Subscription Publication, 5.95M) column that the debate essentially ended the Democratic race by marginalizing Sanders and removing the rationale for a Biden candidacy.

However, Evan Horowitz writes in the [Boston Globe](#) (10/15, 1.1M) that it is "too early to say" if Clinton really won the debate, since "the point isn't to win over expert judges, it's to gain support from non-experts – people who haven't been following the ins and outs of the campaign but who are planning to hit the voting booths come primary season."

AP Analysis: Clinton Displayed "Likely Strength" In General Election Campaign. The [AP](#) (10/15) says in an analysis that Clinton's "polished performance...did more than send a message to her primary rivals. It was a warning to the chaotic Republican field about her likely strength in a general election." She "solidified her shift toward more liberal positions on trade, gun control and immigration, but still stayed largely in step with the battleground state voters she'll need" in a fall campaign, and "also positioned herself as heir to the coalition of women, Hispanics and black voters that propelled Barack Obama to the White House."

But Anne Gearan of the [Washington Post](#) (10/15, 6.76M) writes that if Clinton is the nominee, “her Republican opponents will not let her off so easy” as her Democratic foes did Tuesday. Karl Rove similarly writes in his [Wall Street Journal](#) (10/15, Subscription Publication, 5.95M) column that Clinton’s debate victory was due to the weakness of her opponents. However, the [Washington Post](#) (10/15, Johnson, 6.76M) says for many Democrats, the debate “provided a renewed sense of optimism and confidence in their field’s leaders.”

Bill Clinton: “Hillary Knocked It Out Of The Park.” [The Hill](#) (10/14, Hensch, 471K) reported that in a fundraising email, former President Bill Clinton wrote, “Last night, Hillary knocked it out of the park. She didn’t just talk about big ideas – she laid out plans to get them done. That’s what Hillary does when she sees a problem to fix: She gets people together, takes on the tough fights and finds her way to the solution.”

Trump Says Clinton Won Debate. [The Hill](#) (10/14, Byrnes, 471K) reported Republican presidential candidate Donald Trump said Wednesday that he thought Clinton won the debate “and suggested other candidates lacked credibility.” [NBC Nightly News](#) (10/14, story 3, 3:05, Holt, 7.86M) showed clips of MSNBC’s Katy Tur interviewing Trump, who said, “Bernie [Sanders] made a mistake. He got a great couple of seconds. But he took a situation that’s a very serious situation, where Hillary is being investigated by the FBI, and he gave it away. He just gave it away. He can never bring it up again and it’s not like he’s winning, he’s losing.”

Rubio: Democratic Debate Was About “Free Stuff.” [The Hill](#) (10/14, Byrnes, 471K) reported GOP candidate Sen. Marco Rubio said on Fox News Wednesday morning that the Democratic debate “was all about giving away ‘free stuff.’” He said, “Free college education, free college education for people illegally in this country, free healthcare, free everything. Their answer to every problem in America is a government program and a tax increase.”

“Obama Campaign Alums” Among Critics Of Clinton’s Performance. [Politico](#) (10/14, Cheney, 942K) said some of the biggest Democratic criticism of Clinton came from “Obama campaign alums. ... David Axelrod, Obama’s top political strategist, noted that ‘Clinton made a few mistakes,’” and “even among those Obama allies who praised Clinton’s performance, there were overt shots at Clinton’s longer-term strategy.”

Sanders Raised More Than \$1.3 Million In Hours After Debate. The [AP](#) (10/15) reports Sanders “said his campaign raised more than \$1.3 million in the hours after the first Democratic debate of the 2016 race, and social media metrics showed he was the most-searched candidate on Google and most-discussed on Facebook and Twitter.” [Politico](#) (10/14, Strauss, 942K) reports the Sanders campaign said it received more than 37,600 individual contributions averaging \$31.54 each. And [The Hill](#) (10/14, Byrnes, 471K) says Sanders “slightly edged out Clinton for most Twitter mentions during the debate, with 41 percent of the tweets to Clinton’s 39 percent.”

Sanders gained about 24,000 new Twitter followers after the debate, while Clinton gained about 10,000. But while most of the tweets by [@HillaryClinton](#) Wednesday were clips of her debate performance, [@BernieSanders](#) had little about the debate except for a few retweeted articles like [one from Vox](#) reading, “DC insiders think Bernie Sanders lost the debate. Here’s why they might be wrong.”

However, the [New York Times](#) (10/15, Gabriel, Subscription Publication, 11.82M) reports under the headline “Debate Cools Momentum Of Bernie Sanders In Iowa” that Clinton’s “self-assurance, command of issues and ease in parrying” Sanders in the debate “drew praise from Iowa Democrats.” [USA Today](#) (10/15, Gaudiano, 5.23M) says Sanders faces a question over whether he can “expand his following beyond the Democratic Party’s liberal base.”

WPost Analysis: O’Malley Had No “Make-Or-Break Moment.” The [Washington Post](#) (10/15, Wagner, 6.76M) writes that while O’Malley came to the debate “facing what many had described as a make-or-break moment,” it “turned out to be neither.” While “the prevailing view among observers was that O’Malley had benefited from the broader exposure to a national audience,” it “seemed unlikely that anything that happened in Vegas would fundamentally change the dynamics” of the race.

Racial Justice, Gender Equality Addressed In Debate. The [Washington Post](#) (10/15, Williams, 6.76M) reports that “racial justice and gender equality...finally made it to the presidential debate stage” in the Democratic debate after being all but ignored in the first Republican face-offs.

Wasserman Schultz Defends Party’s Diversity. [The Hill](#) (10/14, Richardson, 471K) reported Democratic

National Committee Chair Rep. Debbie Wasserman Schultz defended the party's diversity in an interview with Fusion's Jorge Ramos, who said "he did not 'see a Latino or an African-American or an Asian' on the Democratic debate stage." Wasserman Schultz replied, "First of all, our president of the United States, who is a Democrat, is African-American. ... Our party nominated the first African-American, and then Americans elected him not once, but twice. ... There is overwhelmingly more diversity up and down the ballot when it comes to Democrats."

Debate Draws Record-High Viewership For Democratic Face-Off. [Politico](#) (10/14, Gold, 942K) reported the debate "drew 15.3 million viewers, making it the most watched Democratic primary debate in history," though it did not draw as many viewers as the first two Republican debates. The [New York Times](#) (10/15, Steel, Subscription Publication, 11.82M) says the previous record for a Democratic debate "was set by the 2008 debate in Philadelphia, which averaged 10.7 million viewers."

FED: CONSUMER SPENDING, HOUSING MARKET PROPELLED MODEST GROWTH. The Fed's latest Beige Book cites "steady consumer spending and an improving housing market" for "spurr[ing] modest US economic growth in the late summer," the [AP](#) (10/15) reports, noting that the report "echoes other recent data that suggests the economy, while still expanding, has run into headwinds from overseas and lost momentum."

Retail Sales Rose 0.1% In September. Another [AP](#) (10/15, Boak) story describes cautious retail spending by consumers in September, noting that the Commerce Department said Wednesday that retail sales "rose just 0.1 percent last month after being unchanged in August." While auto purchases rose 1.8 percent in September, and spending rose 0.7 percent at restaurants and 0.9 percent at clothiers, they were "tempered by sales declines for gasoline, building materials and online outlets."

[Reuters](#) (10/15, Mutikani) cites the reports as the latest indication that the economy is slowing and notes that they raise more doubts about whether an interest rate increase will be forthcoming from the Fed this year. A front-page story in the [Wall Street Journal](#) (10/15, A1, Hilsenrath, Sussman, Subscription Publication, 5.95M) says a rate increase in 2015 is becoming less likely given the new signs of weak economic activity.

Bernanke Defends Fed's "Aggressive Actions." The [Washington Post](#) (10/15, Mui, 6.76M) reports in its "Wonkblog" blog that in his new book, "Courage to Act," former Fed Chairman Ben Bernanke provides "a careful, detailed and exceptionally clear justification for the Fed's aggressive actions to avert another Great Depression and resuscitate the American economy." In an interview with the blog, Bernanke

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinintelligence.com.

DATE: THURSDAY, OCTOBER 15, 2015 7:00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + Secretary Jewell Tours Areas Of San Diego County Damaged By Wildfires.
- + Secretary Jewell Attends Dedication Ceremony Of Valles Caldera National Preserve.
- + Sen. Feinstein Pushes For Monuments In California Desert.
- + Bears Ears Inter-Tribal Coalition To Push For Conservation Proposal In DC.
- + Family Wants Building Planned By BOR Named After Fallen Firefighter.
- + San Antonio Missions To Celebrate World Heritage Weekend.
- + California Bans Schools From Using "Redskins".
- + CRS: Agency Spending On Advertising Falls Into "Bureaucratic Black Hole."
- + Study: Restoring Nature Could Fight Climate Change.

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + Interior Proposal Would Help Formation Of Native Hawaiian Community.
- + Settlement Discussed In Casino Land Dispute.
- + Alaska Gov. Walker Creates Tribal Advisory Council..
- + BIE Appoints New Associate Deputy Director.
- + Additional Coverage: Additional \$10 Million Transferred To Cobell Education Scholarship Fund.

OFFICE OF INSULAR AFFAIRS:

- + Micronesians Relocating In Greater Numbers.

TACKLING AMERICA'S WATER CHALLENGES:

- + Folsom Lake Falls To Lowest Level In 20-plus Years.

SECURING AMERICA'S ENERGY FUTURE:

Renewable Energy:

- + First Offshore Wind Farm IS US Stirs Excitement.

Onshore Energy Development:

- + OSMRE Begins Trapper Mine Environmental Review.
- + North Dakota Oil Industry Concerned About Federal Flaring Rules.
- + Tribe In Talks About Settlement Of Fracking Lawsuit.
- + Cordero Rojo Mine To Receive Reclamation Award.
- + Concerns Growing About Earthquakes In Oklahoma Near A Hub Of US Oil.
- + Studies Tie Fracking Chemical Exposure To Premature Births, Long-Term Reproductive Health Consequences.

Offshore Energy Development:

- + Ignoring St. Johns Bridge Protest Could Have Cost Oregon Thousands In Fines.
- + Officials Tout Caminada Restoration To Celebrate 25 Years Of Coastal Restoration Program.
- + Louisiana To Receive BP Settlement.
- + Mississippi To Spend Millions On Restoration Projects.
- + Gretna City Council Approves Plan For BP Settlement Money.
- + Alaska, Federal Officials Not To Pursue Additional \$92 Million In Exxon Valdez Damages.

AMERICA'S GREAT OUTDOORS:

Bureau of Land Management:

- + Stock Growers Association Sues Over Land Use Plans.
- + BLM Reviewing Army Proposal For Long-term Training.

+ BLM Seeks More Comments On Proposed Management Of Red Cliffs, Beaver Dam Wash National Conservation Areas.

+ BLM Unveils Lemhi Valley Travel Plan.

+ Group Accuses BLM Of Experimenting On Horses.

Fish and Wildlife Service:

+ FWS Moves Ahead With Mexican Wolf Releases.

+ Scientists Ask For Public Help With Sick Otters In Alaska.

+ Environmental Group Wants FOIA Suit Dismissed.

+ Cleanup Of Dead Fish On Virginia Eastern Shore Complicated By Endangered Beetle.

+ FWS Holds Open House On Access To Rattlesnake Mountain.

+ Missouri Residents Want Lead Mine Settlement Spent In Communities.

+ Log Cabin Day Festival Kicks Off At Muscatatuck National Wildlife Refuge.

+ "Ding" Darling Days Kicks Off Sunday.

+ Congress Urged To Protect Endangered Species.

+ Habitat Exchanges Urged To Protect Species.

National Park Service:

+ Report Urges NPS To Add Charging Stations For Electric Vehicles.

+ Report Details Brinkerhoff Lodge Abuse At Grand Teton.

+ Proposal Would Help Make Evers Home Part Of NPS.

+ Veteran Sues After Being Injured By 16-pound Pine Cone In San Francisco Maritime National Historical Park.

+ Yosemite National Park Celebrates 125 Years.

+ NPS Clarifies Renaming Of Building Housing Of Selma Interpretive Center.

+ NPS Approves Rehabilitation At Yellowstone National Park.

+ Ringtail At Carlsbad Caverns National Park Had Rabies.

+ Congaree National Park Reopens After Flooding.

+ Utah Parks Sees Record Numbers Of Visitors.

+ Completion Of Birdsall Mural Nears.

+ Historic Lumber Schooner C.A.

+ National Fossil Day Celebrated.

+ Body Of Man Recovered In Lake Powell.

BIG PICTURE:

+ Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

+ Today's Events In Washington.

LAST LAUGHS:

+ Late Night Political Humor.

[DOI in the news:](#)

SECRETARY JEWELL TOURS AREAS OF SAN DIEGO COUNTY DAMAGED BY WILDFIRES. [KPBS-TV](#)

San Diego (10/14, 5K) reports that “federal officials on Wednesday toured the Cal Fire Incident Command Center in El Cajon in an effort to highlight the threat of wildfires.” Interior Secretary Sally Jewell joined Rep. Scott Peters, “who is calling on Congress to create a funding plan that would treat wildfires similar to natural disasters.” According to the article, “Peters’ plan, which the Obama administration supports, would provide greater certainty in addressing growing fire suppression needs while preserving funds meant for prevention and other non-suppression programs.”

The [San Diego Union-Tribune](#) (10/14, 542K) reports that Jewell said that “the problem is rooted in how the government pays to both prevent and fight wildfires.” She said that “a change to the complex federal budget could cut the risk of homes going up in flames when a backcountry fire spreads.”

Additional coverage was provided by [KGTV-TV](#) San Diego (10/15, 102K), [KNSD-TV](#) San Diego (10/15, 160K), and [KFMB-TV](#) San Diego (10/15, 53K).

Pilotless Helicopter For Firefighting Tested In Idaho. The [AP](#) (10/15, 2.28M) reports that “the future of wildland firefighting launched Wednesday morning in Idaho.” According to the article, “a Lockheed Martin helicopter capable of flying autonomously with no human control did so as it scooped up water, dropped it on targets and delivered supplies to a distant ridge in a demonstration in front of top federal decision makers 20 miles east of Boise.” Mark Bathrick, director of the Interior Department’s Office of Aviation Services, said, “Wildland fires are a huge problem, particularly here in the West. I’m a believer in the technology that could be put on other helicopters, that eventually could be put on fixed-wing aircraft — scoopers and air tankers.”

Additional coverage was provided by the [New York \(NY\) Times](#) (10/15, Press, Subscription Publication, 11.82M), the [San Francisco \(CA\) Chronicle](#) (10/15, Subscription Publication, 3.35M), the [Seattle \(WA\) Times](#) (10/15, 962K), the [Washington \(DC\) Post](#) (10/15, Keith Ridler |, Ap, 6.76M), the [Washington \(DC\) Times](#) (10/15, Ridler, 344K), the [Minneapolis \(MN\) Star Tribune](#) (10/15, Ridler, 1.19M), [ABC News](#) (10/15, 3.97M), the [Daily Mail \(UK\)](#) (10/15, 5.59M), [Yahoo! News](#) (10/15, Ridler, 5.98M), the [Spokane \(WA\) Spokesman-Review](#) (10/14, 183K), and the [Idaho Statesman](#) (10/14, 190K).

Ranchers, Environmentalists Dispute Grazing’s Impact On Soda Fire. The [Salem \(OR\) Capital Press](#) (10/14, 113K) reports that “Idaho ranchers claim that better grazing management would have reduced the size and severity of the Soda fire that scorched 279,000 acres of land in Owyhee County and part of Eastern Oregon in August.” But Idaho-based Western Watersheds Project “claims that livestock grazing contributed to the severity of the Soda fire and other wildfires that burned millions of acres of land across the West this year.” Jessica Gardetto, a spokeswoman for Idaho BLM, said “‘the jury is still out’ on grazing’s overall impact on wildfire behavior but some studies have shown that grazing can diminish fire danger where certain fuels, such as invasive cheatgrass, dominate.”

SECRETARY JEWELL ATTENDS DEDICATION CEREMONY OF VALLES CALDERA NATIONAL

PRESERVE. The [Outside](#) (10/15, 258K) reports Interior Secretary Sally Jewell attended the dedication ceremony of Valles Caldera National Preserve last weekend. Jewell said, “This is land that has the potential to educate Americans and people around the world about how to live in harmony with nature and how to learn from nature.” She also expressed frustration about the expiration of the Land and Water Conservation Fund. She said, “We want that reauthorized, and frankly, it needs to be funded at the level it was originally intended.”

SEN. FEINSTEIN PUSHES FOR MONUMENTS IN CALIFORNIA DESERT. The [Greenwire](#) (10/14,

Subscription Publication) reports that Sen. Dianne Feinstein “told a sweaty and often hostile crowd of about 800 here yesterday that President Obama should designate three new national monuments spanning more than 1 million acres of Mojave Desert as national monuments if her legislative efforts run dry.” Feinstein has “fought for more than six years to establish the Sand to Snow, Mojave Trails and Castle Mountains monuments.” The article notes that “the designation would cover 1.1 million acres and be Obama’s largest under the 1906 Antiquities Act.”

Additional coverage was provided by the [Los Angeles Times](#) (10/14, Cart, 4.07M), the [Inland Empire \(CA\) Community Newspapers](#) (10/15), and [KABC-TV](#) Los Angeles (10/15, 413K).

BEARS EARS INTER-TRIBAL COALITION TO FIGHT FOR CONSERVATION PROPOSAL IN DC. [E&L Publishing](#) (10/14, 705) reports that “officials from a handful of Southwest American Indian tribes will be in Washington, D.C., tomorrow to urge protections for 1.9 million acres of federal lands in southeast Utah that they consider sacred.” The Bears Ears Inter-Tribal Coalition, “which includes Navajo, Hopi, Ute Mountain Ute, Ute Tribe of the Uinta Ouray Reservation, Zuni Pueblo and Cochiti Pueblo, expects to meet with Obama administration officials and congressional offices about its ‘Bears Ears’ conservation proposal.” The coalition “wants 1.9 million acres surrounding Bears Ears protected as a national conservation area (NCA) with a full mineral withdrawal, or, if necessary, as a national monument designated by the president.”

Additional coverage was provided by the [Indian Country Today Media Network](#) (10/14, 32K).

FAMILY WANTS BUILDING PLANNED BY BOR NAMED AFTER FALLEN FIREFIGHTER. The [Star of Grand Coulee \(WA\)](#) (10/14, 41) reports that “the family of a woman killed while fighting a local wildfire 25 years ago is hoping a new fire station planned by the U.S. Bureau of Reclamation could be named after her.” According to the article, “Toni Godsil died Aug. 6, 1990, while fighting a wildland fire in Douglas County with the Grand Coulee Volunteer Fire Department when wind shifted and the flames caught up to her.” Since the recognition would require an act of Congress, “Townsend said family members and supporters are getting ready to send letters to the state’s congressional delegation to seek support, ‘trying to see if anyone can help us get this done.’” Interior Secretary Sally Jewell, “who visited local wildland fires in August, said then that she hadn’t heard of the family’s wishes but that her office would be willing to look into the matter.”

SAN ANTONIO MISSIONS TO CELEBRATE WORLD HERITAGE WEEKEND. The [San Antonio Express-News](#) (10/15, 884K) reports that “a full weekend of tours, exhibits and activities are planned around Saturday’s inscription of the five San Antonio missions as a UNESCO World Heritage Site.”

CALIFORNIA BANS SCHOOLS FROM USING “REDSKINS”. The [Digital Journal](#) (10/15, 28K) reports that “California became the first state to ban schools from using ‘Redskins’ as a team name or mascot as Gov. Jerry Brown signed the California Racial Mascots Act into law Sunday morning.” The article notes that “earlier this year, the Obama administration told executives of the Washington NFL franchise that they would have to change their name before the team would be allowed to move to a new stadium in Washington, DC.” Interior Secretary Sally Jewell said last September, “Personally, I think we would never consider naming a team the ‘Blackskins’ or the ‘Brownskins’ or the ‘Whiteskins.’ So, personally, I find it surprising that in this day and age, the name is not different.”

CRS: AGENCY SPENDING ON ADVERTISING FALLS INTO “BUREAUCRATIC BLACK HOLE.” In its “Federal Eye” blog, the [Washington Post](#) (10/15, Rein, 6.76M) reported on “a murky and little-scrutinized area of the federal budget: Advertising,” citing a CRS study which found that executive branch agencies “spent about \$4.4 billion on contracts for ‘advertising services’ from fiscal 2009 to fiscal 2013, \$892.5 million of that in the last year.” According to the study, “this kind of federal spending falls into a bureaucratic black hole,” and agencies “don’t really have to be transparent about what they’re doing and why.” There is no “government-wide definition of what constitutes advertising” and no central place where agencies are required to report advertising-related expenditures,” which means “agencies can pretty much spend what they want.”

STUDY: RESTORING NATURE COULD FIGHT CLIMATE CHANGE. [TIME](#) (10/15, Worland, 19.55M) reports that a growing body of research supports the need for climate change solutions rooted in nature: “ensuring biodiversity, revitalizing forests and supporting other natural environments.” A new study published in the journal *Nature* offers strong evidence that “biodiversity strengthens ecosystems, increasing their resistance to extreme climate events and improving their capacity to stem climate change,” *TIME* reports. “In addition to enacting regulations to alter human behavior, policymakers can work to restore nature as a method of addressing global warming,” *TIME* explains.

Empowering Native American Communities:

INTERIOR PROPOSAL WOULD HELP FORMATION OF NATIVE HAWAIIAN COMMUNITY. The [University of Hawaii – Ka Leo O Voice](#) (10/15) reports that “if the Native Hawaiian community forms a unified government and want a government-to-government relationship with the United States, a U.S. Department of the Interior (USDOI) proposal would create the administrative criteria and procedure that would be enacted.” According to the article, “two highlights of the proposal are that the Native Hawaiian government would decide whether to reorganize itself, and what form that government would take.” The article notes that “the proposal does not

change anything regarding Hawaiian homelands, offer compensation for past wrongs or offer a relationship with more than one Native Hawaiian government” and “it also does not offer the same services and programs that are available to Native American’s governments.”

SETTLEMENT DISCUSSED IN CASINO LAND DISPUTE. [Law360](#) (10/15, 21K) reports that “a D.C. federal judge agreed on Wednesday to give more time to an Oklahoma tribe and the federal government to try to resolve claims over a National Indian Gaming Commission decision reaffirming that the tribe was illegally conducting gaming on trust land in New Mexico.” According to the article, “the Fort Sill Apache Tribe of Oklahoma, the NIGC, the U.S. Department of the Interior and department officials jointly sought the stay on Tuesday to allow them to exhaust discussions to potentially settle the tribe’s suit.”

ALASKA GOV. WALKER CREATES TRIBAL ADVISORY COUNCIL.. The [Alaska Dispatch News](#) (10/14, 219K) reports that “following up on a pledge to improve relations between the state government and Native tribes, Gov. Bill Walker on Wednesday issued an administrative order creating a tribal advisory council.” Walker “signed the order at the end of his address to a one-day Anchorage conference on tribal issues held by the Alaska Federation of Natives and the National Congress of American Indians.”

BIE APPOINTS NEW ASSOCIATE DEPUTY DIRECTOR. [Politico](#) (10/15, 942K) reports that “Tony Dearman has been appointed associate deputy director for bureau operated schools at the Bureau of Indian Education.”

ADDITIONAL COVERAGE: ADDITIONAL \$10 MILLION TRANSFERRED TO COBELL EDUCATION SCHOLARSHIP FUND. Additional coverage that the Interior Department “announced that an additional \$10 million has been transferred to the Cobell Education Scholarship Fund” was provided by the [Char-Koosta News](#) (10/15, 12K).

[Office of Insular Affairs:](#)

MICRONESIANS RELOCATING IN GREATER NUMBERS. The [Honolulu Civil Beat](#) (10/15, 41) reports on “the exodus” of Micronesians. According to the article, “Micronesians are leaving their island homes in large numbers and coming to the U.S. in search of medical care, education, jobs and economic prosperity — things they can’t find back at home.”

[Tackling America’s Water Challenges:](#)

FOLSOM LAKE FALLS TO LOWEST LEVEL IN 20-PLUS YEARS. The [Sacramento \(CA\) Bee](#) (10/15, 535K) reports that “even as Sacramento waits for the soaking El Niño forecast to hit this fall, Folsom Lake continues to lose water and will almost certainly fall Thursday to its lowest level in more than 20 years, government data show.” The article notes that “on Wednesday afternoon, Folsom Lake had about 162,000 acre-feet of water – just 17 percent of its capacity – and operators were still releasing about 800 acre-feet a day, according to the California Department of Water Resources.” The BOR, “which operates the reservoir, initially warned that the lake could fall to 120,000 acre-feet by the end of September.”

[Securing America’s Energy Future:](#)

[Renewable Energy:](#)

FIRST OFFSHORE WIND FARM IS US STIRS EXCITEMENT. The [Melbourne \(AUS\) Herald Sun](#) (10/15, 74K) reports that “construction is underway off Rhode Island’s coast on the US’ first offshore wind farm, a milestone that federal and state officials say will help the fledgling industry surge ahead.” Interior Secretary Sally Jewell said that “lenders, regulators and stakeholders could now see a path forward.” She said, “It’s great to witness a pioneering moment in US history. I think it will help the country understand the potential that exists here.”

[Onshore Energy Development:](#)

OSMRE BEGINS TRAPPER MINE ENVIRONMENTAL REVIEW. The [Grand Junction \(CO\) Daily Sentinel](#) (10/15, 73K) reports that the Office of Surface Mining Reclamation and Enforcement is “beginning a new environmental review involving coal mining at the Trapper Mine near Craig in response to a judge’s ruling

calendar this year. The agency said in a public notice issued Wednesday that it will prepare an environmental assessment to analyze impacts of a mining plan approval for current and future mining involving two federal coal leases at the surface mine." The mining notes that "as part of the agency's review, it will hold a public meeting in Craig Oct. 29."

NORTH DAKOTA OIL INDUSTRY CONCERNED ABOUT FEDERAL FLARING RULES. The [AP](#) (10/15, Macpherson) reports that North Dakota Petroleum Council Vice President Kari Cutting told a North Dakota committee on energy development that "jurisdictional overreach appears to be the norm in the federal agency rulemaking process." The AP adds that Cutting, whose group represents more than 550 companies, "said the industry has increased efficiencies...but the industry will have a tougher time adapting to what she calls a 'jurisdictional grab' by the federal government." North Dakota's oil industry is most concerned about gas flaring regulations, the AP reports, adding that producers in the state flare 20 percent due to insufficient infrastructure, much more than the 1 percent national average and 3 percent global average.

TRIBE IN TALKS ABOUT SETTLEMENT OF FRACKING LAWSUIT. The [EnergyWire](#) (10/14, Subscription Publication) reports that "an American Indian tribe is in talks with the Obama administration to settle a legal battle over the Interior Department's much-contested hydraulic fracturing rule." According to the article, "the Department of Justice, Interior and the Southern Ute Indian Tribe last week asked a federal court to pause their case while the sides continue settlement talks." The Southern Utes "filed their lawsuit in June, three months after the Bureau of Land Management finalized the rule, which regulates well construction, wastewater management and chemical disclosure for fracking on public and tribal lands."

CORDERO ROJO MINE TO RECEIVE RECLAMATION AWARD. The [World Coal](#) (10/15) reports that "Cloud Peak Energy's Cordero Rojo coal mine has been awarded the Office of Surface Mining Reclamation and Enforcement's 2015 Excellence in Surface Coal Mining Reclamation Award for its restoration work on the Belle Fourche River." According to the article, "the mine relocated a portion of the river and reclaimed the stream channel to return it to approximately the same conditions as existed before mining." The award will be presented at the National Mining Association's awards ceremony in Washington DC on 9 November.

CONCERNS GROWING ABOUT EARTHQUAKES IN OKLAHOMA NEAR A HUB OF US OIL. The [New York Times](#) (10/15, Wines, Subscription Publication, 11.82M) reports an earthquake in Oklahoma over "last weekend has raised fresh concern about the security of a vast crude oil storage complex, close to the quake's center, that sits at the crossroads of the nation's oil pipeline network." The quake occurred near Cushing, "home to the so-called Cushing Hub, a sprawling tank farm that is among the largest oil storage facilities in the world." Last month, scientists said that an intense earthquake near the site "could seriously damage storage tanks and pipelines." The hub has been designated by the Federal government as "a critical national infrastructure." The 4.5 magnitude quake "is among the largest of thousands of temblors that have rocked central and northern Oklahoma in the past five years, largely set off by the injection of oil and gas industry wastes deep into the earth."

STUDIES TIE FRACKING CHEMICAL EXPOSURE TO PREMATURE BIRTHS, LONG-TERM REPRODUCTIVE HEALTH CONSEQUENCES. The [New York Times](#) (10/15, Bakalar, 11.82M) "Well" blog reported that "living near hydraulic fracturing, or fracking, operations" may be tied to "premature births," according to research published Sept. 30 in the journal *Epidemiology*. The study of "10,496 singleton births by 9,384 mothers from 2009 to 2013 in Pennsylvania" revealed that "the 25 percent of mothers most exposed to fracking were 40 percent more likely to give birth preterm...than the quarter least exposed."

Meanwhile, the [Huffington Post](#) (10/15, Peeples, 164K) reports that "prenatal exposure to a cocktail of chemicals commonly used in the various phases of oil and natural gas production, including fracking, could carry long-term reproductive health consequences," a study published online Oct. 14 in the journal *Endocrinology* suggests.

Offshore Energy Development:

IGNORING ST. JOHNS BRIDGE PROTEST COULD HAVE COST OREGON THOUSANDS IN FINES. The [Oregonian](#) (10/15, Theriault, 756K) reported that if Oregon officials had held back during Greenpeace's summer protest of Shell's Arctic drilling, it "could have cost the state thousands of dollars in federal fines, according to internal documents reviewed by The Oregonian/OregonLive." Oregon officials responded after 13 Greenpeace protestors dangled from the St. Johns Bridge and briefly blocked the passage of a ship belonging to Shell. The Oregon Department of Transportation "requires a permit from the U.S. Coast Guard to operate

the St. Johns Bridge and must ensure that ships up to 174 feet tall can pass below. The protesters and their flags put the DOT in violation of the permit, and had the state balked in its response to the protestors, it could have set up “a contentious back-and-forth of written warnings, legal reviews and fines that could have hit \$25,000 every time operators of a ship thought about traveling under the bridge but decided not to risk it.”

[Inside Climate News](#) (10/14, Bagley) reported that “activists across the U.S. will push for quick and aggressive climate action Wednesday by staging protests, collecting signatures, organizing panels and even floating 30 miles down the Missouri River.” Events are scheduled for nearly 200 locations and “will be known collectively as the People’s Climate Movement, a follow-up to last year’s People’s Climate March.” Events “aim to draw attention to the local impacts of global warming...and the hundreds of grassroots groups fighting for action.” The article briefly reported that “there was also a significant upturn this year in civil disobedience campaigns,” including Greenpeace’s July protest on Portland’s St. Johns Bridge.

Shell Drilling Rigs Leave Arctic. On its website, [KUCB-FM](#) Unalaska, AK (10/15, Ryan) reported that Shell Oil’s Polar Pioneer rig “left Alaska’s Dutch Harbor for Port Angeles, Washington, on Wednesday” while Shell’s “other Arctic rig, the Noble Discoverer, left Dutch Harbor for Everett, Washington, on Monday.” Other ships in Shell’s Arctic fleet “will leave Alaska over the next couple of weeks, and the company has not disclosed the fate of the 400 employees who have worked on the project in Anchorage.”

The [AP](#) (10/14, Joling, 2.28M) reported that two of Royal Dutch Shell’s drill vessels, the Noble Discoverer and the Polar Pioneer, “have safely departed Arctic waters for the Pacific Northwest.” Following a Coast Guard inspection, the Noble Discoverer departed Dutch Harbor in the Aleutian Islands on Monday “for the Port of Everett in Washington state, Shell spokesman Curtis Smith said.” The Polar Pioneer “reached Dutch Harbor on Monday afternoon” along with two tug boats, and will be towed to Port Angeles. The AP reported that “the next destinations for both vessels have not been determined, Smith said.”

The [Seattle Post-Intelligencer](#) (10/13, Connelly, 560K) reported that the Polar Pioneer “will not be returning to Seattle, where it was greeted last April by a seaborne protest of ‘kayactivists’ including local politicians.” Shell “has not requested any exclusion zone around the vessels, as it did last spring.” Shell “is promising a less dramatic return journey than in December of 2012,” when it “tried to tow the conical drilling vessel Kulluk across the Gulf of Alaska in the teeth of an early winter storm.” The Kulluk “broke loose from its tow lines and went aground New Year’s Eve on an island near Kodiak.”

The [Puget Sound \(WA\) Business Journal](#) (10/13, Zak, Subscription Publication, 59K) reported that Shell spokeswoman Megan Baldino said, “Decisions about the final destination are still being worked out.” The Journal added that “it’s likely that the rigs will remain in Port Angeles and Everett for a while until their next destinations are determined.”

[KOMO-TV](#) Seattle (10/14, 5:08 p.m. PDT, 92K) broadcast, “Two Shell oil rigs are returning to ports in our state but they won’t be docked in Seattle. The Puget Sound Business Journal reports that one of them will be moored in Everett and the other in Port Angeles. The Polar Pioneer triggered intense protests while it was docked in Seattle’s Terminal 5 before the expedition. Last month, Shell announced it’s abandoning plans to drill for oil in the Arctic but they do say some supply ships could still be docked in Seattle.”

[KPLC-TV](#) Lake Charles, LA (10/14, 6:51 a.m. CDT, 33K), [KTUU-TV](#) Anchorage, AK (10/13, 6:10 p.m. AKDT, 31K), [KONG-TV](#) Seattle (10/13, 10:14 p.m. PDT, 53K), [KGW-TV](#) Portland, OR (10/13, 6:08 p.m. PDT, 39K) and [KOIN-TV](#) Portland, OR (10/13, 4:34 p.m. PDT, 27K) also broadcast coverage of the story.

Alaska Gov. Calls For Expanded Oil Drilling To Fund State’s Climate Change Adaptions. [TIME](#) (10/14, Worland, 19.55M) reported that Alaska Governor Bill Walker “called for expanded oil drilling to help him address the challenge of climate change in his state.” Walker “told the BBC that increased revenue from oil...would allow his state to fund measures to adapt to a changing environment” and “said he wants to drill as soon as possible in the Arctic National Wilderness Refuge.” Said Walker, “We are in a significant fiscal challenge. ... We have villages that are washing away because of changes in the climate.”

[Slate](#) (10/13, 1.38M) reported that “the situation has grown still worse in Alaska in recent weeks: In late September, Royal Dutch Shell suddenly announced it was abandoning plans to drill offshore of Alaska’s northwest coast after it failed to locate oil in any meaningful quantities during its controversial exploration this summer. ... Without oil as a reliable income source, Alaska’s politicians have begun a tough look inward to re-envision their state’s future.” Added Slate, “Apparently, that reality check hasn’t yet reached the governor’s

since.

The [Daily Caller](#) (10/13, Follett, 375K) and the [CBC News \(CAN\)](#) (10/15, 225K) also covered the story.

Reasons Shell Halted Arctic Oil Drilling Examined. On its website, the [Alaska Public Radio Network](#) examined reasons for Shell halting its exploratory drilling for oil in the Alaskan Arctic. While Kara Moriarty of the Alaska Oil and Gas Association “blamed the slow pace of federal permitting and a thicket of regulations,” the article also looked at the reasons listed in Shell’s statement, including the results at the Burger J well, the “challenging and unpredictable” regulatory environment, and the cost of the project.

OFFICIALS TOUT CAMINADA RESTORATION TO CELEBRATE 25 YEARS OF COASTAL RESTORATION PROGRAM. The [New Orleans Times-Picayune](#) (10/14, 718K) reports that “thousands of pounds of sand from the Gulf of Mexico spewed from a pipe Wednesday (Oct. 14) onto the re-growing beach and dunes that makes up the Caminada Headlands, the southernmost edge of Jefferson and Lafourche parishes that protects both rich wetlands just to its north and the nationally important Port Fourchon, jumping off point for deepwater drilling.” Observing “the rebuilding by a team of 80 employees of Weeks Marine, a dredging firm based in Covington, were representatives of five federal agencies and the state Coastal Protection and Restoration Authority who were on the Elmer’s Island segment of the Caminada beachfront to celebrate the 25th anniversary of the Coastal Wetlands Planning, Protection and Restoration Act.” The article notes that “the project under way Thursday is actually funded by a grant from the National Fish and Wildlife Foundation, with the money coming from the \$1 billion 2013 settlement of civil and criminal charges facing Transocean, the company that owned the Deepwater Horizon drillship that was at the center of the BP Macondo well blowout and oil spill in 2010.”

LOUISIANA TO RECEIVE BP SETTLEMENT. The [AP](#) (10/15, Burdeau, 344K) reports that “the next governor will play a crucial role in Louisiana’s coastal crisis – either by aggressively working to save the coast or missing a prime opportunity to stop the state from slipping further into the Gulf of Mexico.” Louisiana is “poised to receive about \$8.7 billion in settlement money over damages caused by BP’s catastrophic 2010 Gulf oil spill – money mandated by law for environmental restoration.” The article notes that “all four major candidates – the three Republicans, U.S. Sen. David Vitter, Lt. Gov. Jay Dardenne, Public Service Commissioner Scott Angelle and Democratic state Rep. John Bel Edwards – say they unequivocally support ongoing coastal restoration plans,” but each has “offered some new ideas.”

MISSISSIPPI TO SPEND MILLIONS ON RESTORATION PROJECTS. The [Jackson \(MS\) Clarion Ledger](#) (10/14, 263K) reports that “Mississippi officials will turn to the public and other stakeholders to help decide how to spend \$582 million the state will get to restore areas damaged by the 2010 Gulf of Mexico oil spill.” The funds will “begin flowing to Mississippi in 2017 under the Resources and Ecosystems Sustainability, Tourism Opportunities and Revived Economies Act, also known as the RESTORE Act.” According to the article, “state officials haven’t decided yet on final projects but plan to focus on improving water quality, protecting and restoring marine resources and buying land to protect habitats.”

GRETNA CITY COUNCIL APPROVES PLAN FOR BP SETTLEMENT MONEY. The [New Orleans Times-Picayune](#) (10/15, Samuels, 718K) reports that the Gretna City Council on Wednesday “approved a plan for the \$3.29 million in settlement money the city is receiving as a result of the 2010 BP oil spill.” Nearly a third of the money will go toward legal costs, \$500,000 will be entered into next year’s public works budget, and the remaining \$1.96 million will be set aside for future use.

ALASKA, FEDERAL OFFICIALS NOT TO PURSUE ADDITIONAL \$92 MILLION IN EXXON VALDEZ DAMAGES. The [AP](#) (10/15) reports that state and federal governments have decided not to pursue \$92 million in additional damages from ExxonMobil for the 1989 Exxon Valdez oil spill, “citing the recovery of ducks and sea otters in Alaska’s Prince William Sound.” Wildlife monitoring showed that wildlife populations have returned to pre-spill levels and officials concluded the legal requirements for pursuing a claim were no longer met.

[Reuters](#) (10/15) also reports.

America’s Great Outdoors:

Bureau of Land Management:

STOCK GROWERS ASSOCIATION SUES OVER LAND USE PLANS. [KTWO-AM](#) Casper, WY (10/15, 576) reports that “the Wyoming Stock Growers Association has sued federal agencies that allegedly ignored its comments for land use plans in areas with sage grouse habitat, its executive vice president said Wednesday.” Jim Magagna said, “Our view is the grazing regulations and requirements that we already have with the BLM (U.S. Bureau of Land Management) of meeting range land health standards are adequate and beneficial to the range land and therefore to sage grouse habitat. We’ve not been convinced that we need additional requirements on top of those.”

BLM REVIEWING ARMY PROPOSAL FOR LONG-TERM TRAINING. The [AP](#) (10/15, 344K) reports that “the Army plans to have Fort Carson helicopters practice high-altitude operations on public land west of Canon City this fall.” The BLM said Wednesday “the Army expects to use five landing zones in Fremont County from mid-October through December.” The BLM says “the operations are expected to have little or no ground impact on the landing sites or neighboring property owners.” The BLM is also “reviewing an Army proposal for longer-term training.”

BLM SEEKS MORE COMMENTS ON PROPOSED MANAGEMENT OF RED CLIFFS, BEAVER DAM WASH NATIONAL CONSERVATION AREAS. The [Deseret \(UT\) News](#) (10/15, 407K) reports that “what sort of land management approach should be embraced involving nearly 110,000 acres in Washington County is drawing sharp disagreement among county leaders and an environmental organization, prompting a prolonged public comment period on draft plans.” The BLM “released a draft environmental impact statement this summer on proposed management of the Red Cliffs and the Beaver Dam Wash national conservation areas, which were established through the Omnibus Public Land Management Act of 2009.” According to the article, “a 90-day public comment period on an array of alternatives to managing these sections of lands was proposed, in addition to informational open houses, but BLM officials say the level of interest is driving a second round of outreach.”

BLM UNVEILS LEMHI VALLEY TRAVEL PLAN. The [Idaho Mountain Express](#) (10/15, 1K) reports that the BLM will “hold a public meeting in Salmon next week about a travel management plan for nearly 500 square miles in the Lemhi Valley.” According to the article, “representatives at the open house will provide information and take comments on three alternatives included in an environmental assessment that would permit varying amounts of motorized recreation on roads and trails on BLM land southeast of Salmon.”

GROUP ACCUSES BLM OF EXPERIMENTING ON HORSES. The [Elko \(NV\) Daily Free Press](#) (10/15, 22K) reports that the American Wild Horse Preservation Campaign on Wednesday issued a statement claiming that the BLM is “ignoring scientific advice and environmental complaints in its decision to proceed with the use of an experimental fertility control vaccine on wild horses in the Antelope Herd Management Area in eastern Nevada.” Deniz Bolbol, AWHPC director of field operations, said, “We are disappointed that the White House office that is supposed to ensure agency compliance with environmental laws is allowing the BLM to experiment on America’s wild horses without any scientific oversight, review, or, for that matter, any scientific method for determining the impacts of the experiments on the horses themselves. Further, the use of GonaCon in this unscientific, unregimented proposal will place in jeopardy the individual horses’ long-term well-being and their natural, social behaviors, which are attributes that make wild horses celebrated American icons, treasured by Americans and others around the world.”

Fish and Wildlife Service:

FWS MOVES AHEAD WITH MEXICAN WOLF RELEASES. The [Santa Fe New Mexican](#) (10/15, 67K) reports that “in a direct snub to state officials, the U.S. Fish and Wildlife Service announced Wednesday that it will release about 10 Mexican gray wolves into the wilds of southwestern New Mexico, even though state game officials have refused to issue a permit for the action.” The FWS “issued a statement Wednesday that said it will release the wolves as part of its recovery program for a species that is at risk of extinction.”

SCIENTISTS ASK FOR PUBLIC HELP WITH SICK OTTERS IN ALASKA. The [AP](#) (10/15, 344K) reports that “scientists are turning to the public for help dealing with sick and dead otters in Alaska.” FWS officials say “they have recently received about 200 reports of sick or dead sea otters in the Kachemak Bay region.” The FWS is “working with Alaska Sea Life Center in Seward and running tests to find out what’s hurting the animals.”

ENVIRONMENTAL GROUP WANTS FOIA SUIT DISMISSED. The [Pueblo \(CO\) Chieftain](#) (10/15, 87K)

reports that an environmental organization with an office in Canada is asking a judge to dismiss a lawsuit it filed against a federal agency for allegedly violating the Freedom of Information Act.” The Center for Biological Diversity sued the FWS “for allegedly failing to provide documents the center requested about the agency’s decision not to list a fish as an endangered species.” The center said last week the FWS “provided the requested documents in August, but also withheld and redacted several documents based on the legal concept of attorney-client privilege.” But “despite some documents being withheld and redacted, the environmental organization stated in the court filing last week that the lawsuit should be dismissed.”

CLEANUP OF DEAD FISH ON VIRGINIA EASTERN SHORE COMPLICATED BY ENDANGERED BEETLE.

The [Washington Post](#) (10/15, Hedgpeth, 6.76M) reports that “clean-up of the tens of thousands of dead fish that washed up on Virginia’s Eastern Shore is proving to be harder after authorities learned that an endangered tiger beetle also inhabits the beach area.” According to the article, “the incident began Oct. 7 when a net owned by Omega Protein, a large commercial fishing operation out of Houston that specializes in harvesting menhaden, tore open,” and “on Tuesday, officials with Omega Protein said they estimated that some 75,000 fish had washed ashore.” The company said it has “received details from the U.S. Fish and Wildlife Service on how to deal with the cleanup of the dead fish and not harm the tiger beetles in the area.”

FWS HOLDS OPEN HOUSE ON ACCESS TO RATTLESNAKE MOUNTAIN. The [Tri-City Herald \(WA\)](#) (10/15, 100K) reports that “about 50 people who attended an afternoon open house held in Richland by the U.S. Fish and Wildlife Service to hear ideas about access to Rattlesnake Mountain and surrounding land.” An evening meeting also was held. Former Rep. Doc Hastings “got legislation passed shortly before he retired in December requiring the public be given access to the top of the mountain.” The FWS is “starting planning with a list of restrictions from other laws and regulations.”

MISSOURI RESIDENTS WANT LEAD MINE SETTLEMENT SPENT IN COMMUNITIES. The [AP](#) (10/15, 344K) reports that “some residents in southeast Missouri want money from a lead mining settlement spent in communities affected by contamination, not on a new state park.” According to the article, “residents planned a plan to buy 2,500 acres for the Oregon County park during a special meeting Tuesday.” The Missouri Department of Natural Resources and two federal agencies, the FWS and the U.S. Forest Service, “would decide how to spend the settlement after getting public input.”

LOG CABIN DAY FESTIVAL KICKS OFF AT MUSCATATUCK NATIONAL WILDLIFE REFUGE. The [AP](#) (10/15, Rutherford, 344K) reports that “deep within the leafy recesses of Muscatatuck National Wildlife Refuge near Seymour sits an old log cabin and barn.” Myers Cabin has “no running water, no electricity, but plenty of rustic charm.” On Saturday, “crowds of people gathered at the cabin for the annual Log Cabin Day Festival.” The article notes that “the event served as the kickoff for National Wildlife Refuge Week, which runs through Sunday.”

“DING” DARLING DAYS KICKS OFF SUNDAY. The [Fort Myers \(FL\) News-Press](#) (10/14, 171K) reports that the J.N. ‘Ding’ Darling National Wildlife Refuge will hold a kickoff on Sunday “of the week-long celebration of the man behind the name.” According to the article, “the refuge is named for Jay Norwood ‘Ding’ Darling, an editorial cartoonist who espoused environmental issues.”

CONGRESS URGED TO PROTECT ENDANGERED SPECIES. In an op-ed for the [Springfield \(MA\) Republican](#) (10/14, 336K), Michael Bean, Principal Deputy Assistant Secretary for Fish, Wildlife and Parks, U.S. Department of the Interior, writes that “last month, farmers, conservationists and landowners came together at a small field in Dover, New Hampshire to celebrate the recovery of the New England cottontail.” Bean says that “that type of conservation success story can and should be common.” However, he warns that “there are threats to unravel a key ingredient: the Endangered Species Act.” Bean hopes that “the Pope’s visit last month can remind us of the importance of protecting our fellow creatures.”

HABITAT EXCHANGES URGED TO PROTECT SPECIES. In an op-ed for the [Wall Street Journal](#) (10/15, Krupp, Subscription Publication, 5.95M), Fred Krupp, president of the Environmental Defense Fund, lauds the Interior Department’s recent decision not to list the greater sage grouse. Krupp argues that the Endangered Species Act is necessary, but it is also a last resort. He asserts that to protect wildlife populations and the economy, we must initiate care much sooner and the prescription must be collaborative. He suggests that habitat exchanges can be part of the prescription.

National Park Service:

REPORT URGES NPS TO ADD CHARGING STATIONS FOR ELECTRIC VEHICLES. The [Greenwire](#) (10/14, Subscription Publication) reports that the NPS “should double the small fraction of parks with electric vehicle charging stations, along with other steps to reduce car-related emissions, a think tank urged in a report released today.” The article notes that “at present, 21 of 470 national parks, or about 4 percent, have installed charging stations, the Center for American Progress said in the report, which recommends increasing that number to 42, with the inclusion of such iconic destinations as Yosemite National Park, Mount Rushmore National Memorial and Glacier National Park.” The report said that “besides installing more charging stations,” the NPS “should also reduce admission fees for visitors driving electric vehicles.”

REPORT DETAILS BRINKERHOFF LODGE ABUSE AT GRAND TETON. The [Jackson Hole \(WY\) News & Guide](#) (10/15, 1K) reports that “over a recent four-year period Grand Teton National Park would have collected nearly \$29,000 in additional revenue were guests to the Brinkerhoff Lodge properly billed, federal investigators say.” according to a U.S. Department of the Interior Office of Inspector General report released last month, “between 2011 and 2014 guests of the historic cabin near Jackson Lake Dam were billed just 15 percent of the time.” The report found that the NNPS “could put the government asset to better use, that there are safety problems requiring immediate attention and that — counter to their rules — Grand Teton officials were allowing high-ranking government officials to use the lodge as a low- or no-cost vacation getaway.”

PROPOSAL WOULD HELP MAKE EVERS HOME PART OF NPS. The [AP](#) (10/15, 89K) reports that “the home where Mississippi civil rights leader Medgar Evers was assassinated in 1963 gets thousands of visitors each year, operates as a college-owned museum and relies on state grants and private donations for maintenance funds.” Now, “the state’s U.S. senators are hoping the National Park Service can lend a hand.” Sens. Thad Cochran and Roger Wicker said “last week they’ve filed a bill that would authorize a study on the national significance of the Evers home, as a step toward making it part of the Park Service.”

VETERAN SUES AFTER BEING INJURED BY 16-POUND PINE CONE IN SAN FRANCISCO MARITIME NATIONAL HISTORICAL PARK. The [Greenwire](#) (10/14, Subscription Publication) reports that “a U.S. Navy veteran is suing the Department of the Interior and the National Park Service after a 16-pound pine cone fell on his head while he sat beneath a tree in San Francisco Maritime National Historical Park.” According to the article, “celebrating Fleet Week ashore in San Francisco in 2014, Sean Mace said he was reading and napping under a bunya pine (*Araucaria bidwillii*) when a cone larger than a pineapple struck his head.” The article says that “with no signs warning about the danger from falling pine cones, Mace is suing the park for nearly \$5 million.”

YOSEMITE NATIONAL PARK CELEBRATES 125 YEARS. The [Albuquerque \(NM\) Journal](#) (10/15, 259K) reports that “the 125th anniversary of Yosemite National Park has been marked by a ceremony in Yosemite Valley.” The NPS says “about 1,500 people attended the recent event, which included a Native American blessing and a portrayal of John Muir, the naturalist who worked to preserve Yosemite and other parts of the Sierra Nevada.”

NPS CLARIFIES RENAMING OF BUILDING HOUSING OF SELMA INTERPRETIVE CENTER. The [Selma \(AL\) Times Journal](#) (10/14, 22K) reports that “the building that houses the Selma Interpretive Center is being renamed, but the National Park Service wants to clarify that the name of the center itself is not changing.” The Selma City Council “passed a resolution Tuesday night to rename the building the James Perkins Jr. Voting Rights Interpretive Center.” Sandy Perkins, the superintendent for the Selma to Montgomery Historic Trail, “wants to make sure the public understands the interpretive center, which is run by the National Park Service, is not changing names.”

NPS APPROVES REHABILITATION AT YELLOWSTONE NATIONAL PARK. The [Cody \(WY\) Enterprise](#) (10/15, 20K) reports that “visitors to Yellowstone National Park will find many of the overlooks and trails along the rim of the Grand Canyon of the Yellowstone River under construction” after the NPS “issued a Finding of No Significant Impact.” The article notes that “the action addresses aging and deteriorating infrastructure, provide improved accessibility to visitors, improve pedestrian flow, address safety issues, and improve the visitor experience in the Park.”

RINGTAIL AT CARLSBAD CAVERNS NATIONAL PARK HAD RABIES. The [AP](#) (10/15, 259K) reports that “a ringtail whose unusual behavior prompted a temporary closure of one entrance to the cave at Carlsbad Caverns National Park had rabies.” According to park officials, “that determination was made by the New Mexico Department of Health and Science in Albuquerque.”

CONGREER NATIONAL PARK REOPENS AFTER FLOODING. The [AP](#) (10/15, 344K) reports that the Congaree National Park south of Columbia has reopened after the historic flooding earlier this month." The park has "been closed since Oct. 4 because of the flooding." Officials say "the flood waters are receding at the park."

UTAH PARKS SEES RECORD NUMBERS OF VISITORS. The [AP](#) (10/15, 344K) reports that "southern Utah's parks have been attracting a record number of visitors in 2015." The article notes that "Bryce Canyon National Park broke its record number of visitors in a calendar year by hitting 1.5 million in September." Also, "Zion National Park is expected to reach more than 3.2 million visitors this month, setting a new record." Meanwhile, "other parks like Canyonlands, Cedar Breaks and Pipe Spring are also poised to set records."

COMPLETION OF BIRDSALL MURAL NEARS. The [Seward \(AK\) City News](#) (10/15) reports that "except for one panel that is being completed in Dot Bardarson's garage, the mural for the National Park Service building is finished and awaiting the clear coat process at Seward Body and Paint." The mural, titled "Kenai Fjords, where Mountains, Ice, and Water Meet," will "be mounted next Spring for the celebration of 100 years by the National Park Service."

HISTORIC LUMBER SCHOONER C.A. Thayer Begins Final Stage Of Restoration. The [San Jose \(CA\) Mercury News](#) (10/14, 626K) reports that "Jeff Morris, historic ships manager with the National Park Service, and a crew of NPS workers are busy preparing the historic 1895 lumber schooner, the C.A. Thayer, for a trip across the bay to the Bay Ship & Yacht Co. in Alameda for the stepping of three new masts." According to the article, "the historic schooner is entering the last stage of a long restoration that started with its first trip to Alameda in 2003."

NATIONAL FOSSIL DAY CELEBRATED. [Popular Science](#) (10/15, 6.51M) reports on "the fifth annual National Fossil Day, a day trademarked by the National Park Service and celebrated in schools and parks across the country." The NPS "hopes that if people are educated about fossils, they will be more likely to treat fossils they find with respect, whether they're found in a backyard or a national park." In honor of the day, the article highlights "some of our favorite discoveries from this year."

BODY OF MAN RECOVERED IN LAKE POWELL. The [AP](#) (10/15, 344K) reports that "authorities say the body of a Wyoming man missing after he jumped from a 90-foot cliff into Lake Powell last week has been recovered." The NPS and the Coconino County Sheriff's Office say "the body of 29-year-old William 'Billy' Burke was spotted Wednesday at a depth of 153 feet by a remote operated vehicle."

Additional coverage was provided by [Reuters](#) (10/14, Schwartz).

ADDITIONAL COVERAGE: NPS RENTING QUARTERS 17. Additional coverage that the NPS is "offering a once-in-a-lifetime opportunity to rent a three-bedroom, two-bathroom house near the Point Bonita Lighthouse in the Marin Headlands" was provided by the [Santa Rosa \(CA\) Press Democrat](#) (10/15, 170K).

US Geological Survey:

FEMA PLANS GREAT SHAKEOUT EARTHQUAKE DRILLS FOR THURSDAY. [Reuters](#) (10/14, Gillam) reports that on Thursday FEMA is organizing Great ShakeOut earthquake drill events nationwide, bolstering emergency preparation at schools and elsewhere as earthquake activity in the US increases. Reuters highlights the event's slogan of "drop, cover and hold on." The article notes that Cushing, Oklahoma experienced a magnitude 4.5 earthquake on Saturday. The [San Diego \(CA\) Union-Tribune](#) (10/14, Robbins, 542K) predicts a "big turnout" for the San Diego County earthquake drill, where more than 943,000 people have signed up to participate, most of whom are "students and government employees."

The [San Francisco Chronicle](#) (10/15, Perlman, Subscription Publication, 3.35M) reports that on Wednesday the Calaveras Fault caused "a swarm of small earthquakes" near San Ramon. "By midafternoon, the total had reached 30," according to the US Geological Survey (USGS). The article outlines the history of earthquakes along the fault. The [Palm Springs \(CA\) Desert Sun](#) (10/14, 99K) reports that on Wednesday morning Coachella Valley experienced a magnitude 3.6 earthquake, which did not cause any reported damage. The article notes other recent earthquakes in the Coachella Valley. USGS Seismologist Dr. Lucy Jones is paraphrased as saying "a magnitude 4.0 temblor is considered 'normal' earthquake activity for Southern California."

ADDITIONAL COVERAGE: TWITTER PROBEY HELPS USGS TRACK EARTHQUAKES. Additional coverage that the USGS is “using Twitter to help detect earthquakes in real time as they are felt across the globe” was provided by the [Los Angeles Daily News](#) (10/14, 288K) and the [San Bernardino \(CA\) Sun](#) (10/14, 142K).

ADDITIONAL COVERAGE: CALIFORNIA’S SEQUOIAS SHOW SIGNS OF STRESS. Additional coverage that California’s “giant sequoias, which can live thousands of years, are starting to show signs that they’re not getting enough water” was provided by [PBS NewsHour](#) (10/15, 127K).

Top National News:

MEDIA ANALYSES: CLINTON’S STRONG DEBATE PERFORMANCE MAKES BIDEN RUN LESS LIKELY.

Continuing coverage of Tuesday evening’s first Democratic presidential debate focuses on the consensus that Hillary Clinton won the face-off and regained momentum, and also on the man who was not there: Vice President Biden. Speculation in broadcast, print, and online media is that Biden is less likely to enter the race since Clinton is getting back on track. Immediately following the debate, [CNN](#) (10/14, 5.17M) said on its website that in the Pivotal Political Prediction Market, the odds of a Biden nomination fell from 15% to 11%. By early Thursday, the odds were down to five percent – with just a 35% chance that Biden will run, a huge fall from 78% before the debate.

On [ABC World News](#) (10/14, story 2, 1:50, Muir, 5.84M), Jonathan Karl reported, “At a meeting today, Vice President Biden struck a note of optimism about America.” Biden: “We’re just going to roll, man. I really mean it. America’s ready.” Karl: “But tonight, there’s much less optimism about Biden’s presidential prospects. Even some of Biden’s strongest supporters are saying privately he may have simply waited too long.” The [CBS Evening News](#) (10/14, story 4, 2:20, Pelley, 5.08M) reported Biden “said he is proud of last night’s Democratic presidential debate, but if he was looking for a reason to jump into the race, he likely didn’t find it. Hillary Clinton dominated.” [ABC World News](#) (10/14, lead story, 3:25, Muir, 5.84M) said that Clinton’s campaign chairman said Wednesday, “‘At this point, Joe Biden needs to make up his mind.’ Other top Democrats [are] thinking the same, as Clinton gets high marks for her center stage performance.”

[NBC Nightly News](#) (10/14, lead story, 3:15, Holt, 7.86M) said in its lead story that “for months her campaign has been in response mode,” but “at least for this moment,” Clinton “is appearing to have retaken control of the conversation.” Her debate performance may “give nervous supporters a reason to breathe easier and rivals a reason for pause.” Chuck Todd then said on [NBC Nightly News](#) (10/14, story 2, 1:05, Holt, 7.86M), “There is no doubt that Team Biden was watching last night to see what kind of new openings that they could find. ... If the Biden campaign were about to get off the ground, we’d start hearing about it. We would see leaks about it. ... Almost radio silence from the West Wing there.”

The [AP](#) (10/15) reports Biden “says he’s proud of the Democratic candidates who took part” in the debate, but said little more. [Reuters](#) (10/15, Oliphant) says the dynamics of the Democratic race have changed after Clinton’s strong debate performance, which is dampening calls for a late Biden entry. [USA Today](#) (10/15, Jackson, 5.23M) says “the specter of a Joe Biden candidacy still hovers over the Democratic presidential race, but it may be growing faint.” John Hudak of the Brookings Institution said, “There is no path for Biden. There’s no reason for it.”

The [New York Times](#) (10/15, Martin, Subscription Publication, 11.82M) writes that Clinton’s “sure-footed performance...did not just lift the spirits of her supporters and reassure nervous party officials about her candidacy, it also swiftly cooled talk about the need” for a Biden candidacy. Clinton offered “crisp answers to nearly every question, an aggressiveness her rivals did not seem ready for and a level of confidence that has often been obscured over months of questions about her use of a private email as secretary of state,” and on Wednesday, “Democrats were describing the closing, if not the slamming shut, of a door” for Biden.

Dan Balz writes in the [Washington Post](#) (10/15, 6.76M) that “the path for Biden has always looked daunting,” and though “after the debate, Clinton aides were not saying explicitly whether Biden has a path, but after weeks of neutral comments, the language turned.” Clinton campaign chair John Podesta said Biden “will need to make a decision soon.” [Politico](#) (10/14, Gass, 942K) reported Podesta “has a message” for Biden: “The time has come to decide on your White House bid.”

The [Washington Post](#) (10/15, Rucker, 6.76M) says in another report that “the official line from the Clinton

campaign was that they were unimpressed with the candidate's performance and that Biden had to make his own decision," but the [Wall Street Journal](#) (10/15, Nelson, Meckler, Subscription Publication, 5.95M) says the Democratic establishment is growing impatient. The [Huffington Post](#) (10/14, Stein, 164K) said the Clinton campaign "has begun aggressively pushing" Biden "to make a decision one way or another."

The [Los Angeles Times](#) (10/15, Lauter, 4.07M) writes that Clinton "had three big tasks to accomplish in Tuesday night's debate: Reassure the Democratic establishment, draw contrasts with Sen. Bernie Sanders and deter Vice President Joe Biden. ... It was clear that she had succeeded with the first two. Whether she achieved the third goal should be known within days." [The Hill](#) (10/14, Fabian, 471K) reported, however, that Biden "gave no indication Wednesday that he has a set a deadline to make a decision."

The [Washington Post](#) (10/15, 6.76M) says Clinton was the only candidate in the debate who "performed like a potential president" with her "impressive performance. Yet the debate also surfaced one of Ms. Clinton's vulnerabilities: the possibility that Mr. Sanders and the leftward drift of the Democratic Party will drag her away from pragmatism – and from general-election voters."

The [New York Times](#) (10/15, Subscription Publication, 11.82M) says in an editorial that Clinton "reminded us why she's the front-runner, with her experience, command of the issues and strength in communicating ideas. She seemed both at ease and fearless." The Times also says the Democrats argued responsibly and with civility, while "the Republican candidates...haven't a prayer of knowing what to do if they ever enter the White House."

E.J. Dionne writes in his [Washington Post](#) (10/15, 6.76M) column, "At some point during Tuesday night's Democratic debate, many people in living rooms across the country undoubtedly turned to each other with the same basic thought about Hillary Clinton: Oh, so that's why she's the front-runner." Daniel Henninger writes in his [Wall Street Journal](#) (10/15, Subscription Publication, 5.95M) column that the debate essentially ended the Democratic race by marginalizing Sanders and removing the rationale for a Biden candidacy.

However, Evan Horowitz writes in the [Boston Globe](#) (10/15, 1.1M) that it is "too early to say" if Clinton really won the debate, since "the point isn't to win over expert judges, it's to gain support from non-experts – people who haven't been following the ins and outs of the campaign but who are planning to hit the voting booths come primary season."

AP Analysis: Clinton Displayed "Likely Strength" In General Election Campaign. The [AP](#) (10/15) says in an analysis that Clinton's "polished performance...did more than send a message to her primary rivals. It was a warning to the chaotic Republican field about her likely strength in a general election." She "solidified her shift toward more liberal positions on trade, gun control and immigration, but still stayed largely in step with the battleground state voters she'll need" in a fall campaign, and "also positioned herself as heir to the coalition of women, Hispanics and black voters that propelled Barack Obama to the White House."

But Anne Gearan of the [Washington Post](#) (10/15, 6.76M) writes that if Clinton is the nominee, "her Republican opponents will not let her off so easy" as her Democratic foes did Tuesday. Karl Rove similarly writes in his [Wall Street Journal](#) (10/15, Subscription Publication, 5.95M) column that Clinton's debate victory was due to the weakness of her opponents. However, the [Washington Post](#) (10/15, Johnson, 6.76M) says for many Democrats, the debate "provided a renewed sense of optimism and confidence in their field's leaders."

Bill Clinton: "Hillary Knocked It Out Of The Park." [The Hill](#) (10/14, Hensch, 471K) reported that in a fundraising email, former President Bill Clinton wrote, "Last night, Hillary knocked it out of the park. She didn't just talk about big ideas – she laid out plans to get them done. That's what Hillary does when she sees a problem to fix: She gets people together, takes on the tough fights and finds her way to the solution."

Trump Says Clinton Won Debate. [The Hill](#) (10/14, Byrnes, 471K) reported Republican presidential candidate Donald Trump said Wednesday that he thought Clinton won the debate "and suggested other candidates lacked credibility." [NBC Nightly News](#) (10/14, story 3, 3:05, Holt, 7.86M) showed clips of MSNBC's Katy Tur interviewing Trump, who said, "Bernie [Sanders] made a mistake. He got a great couple of seconds. But he took a situation that's a very serious situation, where Hillary is being investigated by the FBI, and he gave it away. He just gave it away. He can never bring it up again and it's not like he's winning, he's losing."

Rubio: Democratic Debate Was About "Free Stuff." [The Hill](#) (10/14, Byrnes, 471K) reported GOP candidate Sen. Marco Rubio said on Fox News Wednesday morning that the Democratic debate "was all

about giving away free stuff. He said, free college education, free college education for people illegally in this country, free healthcare, free everything. Their answer to every problem in America is a government program and a tax increase.”

“Obama Campaign Alums” Among Critics Of Clinton’s Performance. [Politico](#) (10/14, Cheney, 942K) said some of the biggest Democratic criticism of Clinton came from “Obama campaign alums. ... David Axelrod, Obama’s top political strategist, noted that ‘Clinton made a few mistakes,’” and “even among those Obama allies who praised Clinton’s performance, there were overt shots at Clinton’s longer-term strategy.”

Sanders Raised More Than \$1.3 Million In Hours After Debate. The [AP](#) (10/15) reports Sanders “said his campaign raised more than \$1.3 million in the hours after the first Democratic debate of the 2016 race, and social media metrics showed he was the most-searched candidate on Google and most-discussed on Facebook and Twitter.” [Politico](#) (10/14, Strauss, 942K) reports the Sanders campaign said it received more than 37,600 individual contributions averaging \$31.54 each. And [The Hill](#) (10/14, Byrnes, 471K) says Sanders “slightly edged out Clinton for most Twitter mentions during the debate, with 41 percent of the tweets to Clinton’s 39 percent.”

Sanders gained about 24,000 new Twitter followers after the debate, while Clinton gained about 10,000. But while most of the tweets by [@HillaryClinton](#) Wednesday were clips of her debate performance, [@BernieSanders](#) had little about the debate except for a few retweeted articles like [one from Vox](#) reading, “DC insiders think Bernie Sanders lost the debate. Here’s why they might be wrong.”

However, the [New York Times](#) (10/15, Gabriel, Subscription Publication, 11.82M) reports under the headline “Debate Cools Momentum Of Bernie Sanders In Iowa” that Clinton’s “self-assurance, command of issues and ease in parrying” Sanders in the debate “drew praise from Iowa Democrats.” [USA Today](#) (10/15, Gaudio, 5.23M) says Sanders faces a question over whether he can “expand his following beyond the Democratic Party’s liberal base.”

WPost Analysis: O’Malley Had No “Make-Or-Break Moment.” The [Washington Post](#) (10/15, Wagner, 6.76M) writes that while O’Malley came to the debate “facing what many had described as a make-or-break moment,” it “turned out to be neither.” While “the prevailing view among observers was that O’Malley had benefited from the broader exposure to a national audience,” it “seemed unlikely that anything that happened in Vegas would fundamentally change the dynamics” of the race.

Racial Justice, Gender Equality Addressed In Debate. The [Washington Post](#) (10/15, Williams, 6.76M) reports that “racial justice and gender equality...finally made it to the presidential debate stage” in the Democratic debate after being all but ignored in the first Republican face-offs.

Wasserman Schultz Defends Party’s Diversity. [The Hill](#) (10/14, Richardson, 471K) reported Democratic National Committee Chair Rep. Debbie Wasserman Schultz defended the party’s diversity in an interview with Fusion’s Jorge Ramos, who said “he did not ‘see a Latino or an African-American or an Asian’ on the Democratic debate stage.” Wasserman Schultz replied, “First of all, our president of the United States, who is a Democrat, is African-American. ... Our party nominated the first African-American, and then Americans elected him not once, but twice. ... There is overwhelmingly more diversity up and down the ballot when it comes to Democrats.”

Debate Draws Record-High Viewership For Democratic Face-Off. [Politico](#) (10/14, Gold, 942K) reported the debate “drew 15.3 million viewers, making it the most watched Democratic primary debate in history,” though it did not draw as many viewers as the first two Republican debates. The [New York Times](#) (10/15, Steel, Subscription Publication, 11.82M) says the previous record for a Democratic debate “was set by the 2008 debate in Philadelphia, which averaged 10.7 million viewers.”

FED: CONSUMER SPENDING, HOUSING MARKET PROPELLED MODEST GROWTH. The Fed’s latest Beige Book cites “steady consumer spending and an improving housing market” for “spurr[ing] modest US economic growth in the late summer,” the [AP](#) (10/15) reports, noting that the report “echoes other recent data that suggests the economy, while still expanding, has run into headwinds from overseas and lost momentum.”

Retail Sales Rose 0.1% In September. Another [AP](#) (10/15, Boak) story describes cautious retail spending by consumers in September, noting that the Commerce Department said Wednesday that retail sales “rose just 0.1 percent last month after being unchanged in August.” While auto purchases rose 1.8 percent in

September, and spending rose 0.7 percent at restaurants and 0.9 percent at grocers, they were tempered by sales declines for gasoline, building materials and online outlets.”

[Reuters](#) (10/15, Mutikani) cites the reports as the latest indication that the economy is slowing and notes that they raise more doubts about whether an interest rate increase will be forthcoming from the Fed this year. A front-page story in the [Wall Street Journal](#) (10/15, A1, Hilsenrath, Sussman, Subscription Publication, 5.95M) says a rate increase in 2015 is becoming less likely given the new signs of weak economic activity.

Bernanke Defends Fed's "Aggressive Actions." The [Washington Post](#) (10/15, Mui, 6.76M) reports in its "Wonkblog" blog that in his new book, "Courage to Act," former Fed Chairman Ben Bernanke

DOI in the News:

SECRETARY JEWELL TOURS AREAS OF SAN DIEGO COUNTY DAMAGED BY WILDFIRES. [KPBS-TV](#) San Diego (10/14, 5K) reports that "federal officials on Wednesday toured the Cal Fire Incident Command Center in El Cajon in an effort to highlight the threat of wildfires." Interior Secretary Sally Jewell joined Rep. Scott Peters, "who is calling on Congress to create a funding plan that would treat wildfires similar to natural disasters." According to the article, "Peters' plan, which the Obama administration supports, would provide greater certainty in addressing growing fire suppression needs while preserving funds meant for prevention and other non-suppression programs."

The [San Diego Union-Tribune](#) (10/14, 542K) reports that Jewell said that "the problem is rooted in how the government pays to both prevent and fight wildfires." She said that "a change to the complex federal budget could cut the risk of homes going up in flames when a backcountry fire spreads."

Additional coverage was provided by [KGTV-TV](#) San Diego (10/15, 102K), [KNSD-TV](#) San Diego (10/15, 160K), and [KFMB-TV](#) San Diego (10/15, 53K).

Pilotless Helicopter For Firefighting Tested In Idaho. The [AP](#) (10/15, 2.28M) reports that "the future of wildland firefighting launched Wednesday morning in Idaho." According to the article, "a Lockheed Martin

helicopter capable of flying autonomously with no human control and so as it scooped up water, dropped it on targets and delivered supplies to a distant ridge in a demonstration in front of top federal decision makers 20 miles east of Boise.” Mark Bathrick, director of the Interior Department’s Office of Aviation Services, said, “Wildland fires are a huge problem, particularly here in the West. I’m a believer in the technology that could be put on other helicopters, that eventually could be put on fixed-wing aircraft — scoopers and air tankers.”

Additional coverage was provided by the [New York \(NY\) Times](#) (10/15, Press, Subscription Publication, 11.82M), the [San Francisco \(CA\) Chronicle](#) (10/15, Subscription Publication, 3.35M), the [Seattle \(WA\) Times](#) (10/15, 962K), the [Washington \(DC\) Post](#) (10/15, Keith Ridler |, Ap, 6.76M), the [Washington \(DC\) Times](#) (10/15, Ridler, 344K), the [Minneapolis \(MN\) Star Tribune](#) (10/15, Ridler, 1.19M), [ABC News](#) (10/15, 3.97M), the [Daily Mail \(UK\)](#) (10/15, 5.59M), [Yahoo! News](#) (10/15, Ridler, 5.98M), the [Spokane \(WA\) Spokesman-Review](#) (10/14, 183K), and the [Idaho Statesman](#) (10/14, 190K).

Ranchers, Environmentalists Dispute Grazing’s Impact On Soda Fire. The [Salem \(OR\) Capital Press](#) (10/14, 113K) reports that “Idaho ranchers claim that better grazing management would have reduced the size and severity of the Soda fire that scorched 279,000 acres of land in Owyhee County and part of Eastern Oregon in August.” But Idaho-based Western Watersheds Project “claims that livestock grazing contributed to the severity of the Soda fire and other wildfires that burned millions of acres of land across the West this year.” Jessica Gardetto, a spokeswoman for Idaho BLM, said “‘the jury is still out’ on grazing’s overall impact on wildfire behavior but some studies have shown that grazing can diminish fire danger where certain fuels, such as invasive cheatgrass, dominate.”

SECRETARY JEWELL ATTENDS DEDICATION CEREMONY OF VALLES CALDERA NATIONAL PRESERVE. The [Outside](#) (10/15, 258K) reports Interior Secretary Sally Jewell attended the dedication ceremony of Valles Caldera National Preserve last weekend. Jewell said, “This is land that has the potential to educate Americans and people around the world about how to live in harmony with nature and how to learn from nature.” She also expressed frustration about the expiration of the Land and Water Conservation Fund. She said, “We want that reauthorized, and frankly, it needs to be funded at the level it was originally intended.”

SEN. FEINSTEIN PUSHES FOR MONUMENTS IN CALIFORNIA DESERT. The [Greenwire](#) (10/14, Subscription Publication) reports that Sen. Dianne Feinstein “told a sweaty and often hostile crowd of about 800 here yesterday that President Obama should designate three new national monuments spanning more than 1 million acres of Mojave Desert as national monuments if her legislative efforts run dry.” Feinstein has “fought for more than six years to establish the Sand to Snow, Mojave Trails and Castle Mountains monuments.” The article notes that “the designation would cover 1.1 million acres and be Obama’s largest under the 1906 Antiquities Act.”

Additional coverage was provided by the [Los Angeles Times](#) (10/14, Cart, 4.07M), the [Inland Empire \(CA\) Community Newspapers](#) (10/15), and [KABC-TV Los Angeles](#) (10/15, 413K).

BEARS EARS INTER-TRIBAL COALITION TO PUSH FOR CONSERVATION PROPOSAL IN DC. [E&E Publishing](#) (10/14, 705) reports that “officials from a handful of Southwest American Indian tribes will be in Washington, D.C., tomorrow to urge protections for 1.9 million acres of federal lands in southeast Utah that they consider sacred.” The Bears Ears Inter-Tribal Coalition, “which includes Navajo, Hopi, Ute Mountain Ute, Ute Tribe of the Uinta Ouray Reservation, Zuni Pueblo and Cochiti Pueblo, expects to meet with Obama administration officials and congressional offices about its ‘Bears Ears’ conservation proposal.” The coalition “wants 1.9 million acres surrounding Bears Ears protected as a national conservation area (NCA) with a full mineral withdrawal, or, if necessary, as a national monument designated by the president.”

Additional coverage was provided by the [Indian Country Today Media Network](#) (10/14, 32K).

FAMILY WANTS BUILDING PLANNED BY BOR NAMED AFTER FALLEN FIREFIGHTER. The [Star of Grand Coulee \(WA\)](#) (10/14, 41) reports that “the family of a woman killed while fighting a local wildfire 25 years ago is hoping a new fire station planned by the U.S. Bureau of Reclamation could be named after her.” According to the article, “Toni Godsil died Aug. 6, 1990, while fighting a wildland fire in Douglas County with the Grand Coulee Volunteer Fire Department when wind shifted and the flames caught up to her.” Since the recognition would require an act of Congress, “Townsend said family members and supporters are getting ready to send letters to the state’s congressional delegation to seek support, ‘trying

to see if anyone can help us get this done. Interior Secretary Sally Jewell, who visited local Indian tribes in August, said then that she hadn't heard of the family's wishes but that her office would be willing to look into the matter."

SAN ANTONIO MISSIONS TO CELEBRATE WORLD HERITAGE WEEKEND. The [San Antonio Express-News](#) (10/15, 884K) reports that "a full weekend of tours, exhibits and activities are planned around Saturday's inscription of the five San Antonio missions as a UNESCO World Heritage Site."

CALIFORNIA BANS SCHOOLS FROM USING "REDSKINS". The [Digital Journal](#) (10/15, 28K) reports that "California became the first state to ban schools from using 'Redskins' as a team name or mascot as Gov. Jerry Brown signed the California Racial Mascots Act into law Sunday morning." The article notes that "earlier this year, the Obama administration told executives of the Washington NFL franchise that they would have to change their name before the team would be allowed to move to a new stadium in Washington, DC." Interior Secretary Sally Jewell said last September, "Personally, I think we would never consider naming a team the 'Blackskins' or the 'Brownskins' or the 'Whiteskins.' So, personally, I find it surprising that in this day and age, the name is not different."

CRS: AGENCY SPENDING ON ADVERTISING FALLS INTO "BUREAUCRATIC BLACK HOLE." In its "Federal Eye" blog, the [Washington Post](#) (10/15, Rein, 6.76M) reported on "a murky and little-scrutinized area of the federal budget: Advertising," citing a CRS study which found that executive branch agencies "spent about \$4.4 billion on contracts for 'advertising services' from fiscal 2009 to fiscal 2013, \$892.5 million of that in the last year." According to the study, "this kind of federal spending falls into a bureaucratic black hole," and agencies "don't really have to be transparent about what they're doing and why." There is no "government-wide definition of what constitutes advertising" and no central place where agencies are required to report advertising-related expenditures," which means "agencies can pretty much spend what they want."

STUDY: RESTORING NATURE COULD FIGHT CLIMATE CHANGE. [TIME](#) (10/15, Worland, 19.55M) reports that a growing body of research supports the need for climate change solutions rooted in nature: "ensuring biodiversity, revitalizing forests and supporting other natural environments." A new study published in the journal *Nature* offers strong evidence that "biodiversity strengthens ecosystems, increasing their resistance to extreme climate events and improving their capacity to stem climate change," *TIME* reports. "In addition to enacting regulations to alter human behavior, policymakers can work to restore nature as a method of addressing global warming," *TIME* explains.

Empowering Native American Communities:

INTERIOR PROPOSAL WOULD HELP FORMATION OF NATIVE HAWAIIAN COMMUNITY. The [University of Hawaii – Ka Leo O Voice](#) (10/15) reports that "if the Native Hawaiian community forms a unified government and want a government-to-government relationship with the United States, a U.S. Department of the Interior (USDOI) proposal would create the administrative criteria and procedure that would be enacted." According to the article, "two highlights of the proposal are that the Native Hawaiian government would decide whether to reorganize itself, and what form that government would take." The article notes that "the proposal does not change anything regarding Hawaiian homelands, offer compensation for past wrongs or offer a relationship with more than one Native Hawaiian government" and "it also does not offer the same services and programs that are available to Native American's governments."

SETTLEMENT DISCUSSED IN CASINO LAND DISPUTE. [Law360](#) (10/15, 21K) reports that "a D.C. federal judge agreed on Wednesday to give more time to an Oklahoma tribe and the federal government to try to resolve claims over a National Indian Gaming Commission decision reaffirming that the tribe was illegally conducting gaming on trust land in New Mexico." According to the article, "the Fort Sill Apache Tribe of Oklahoma, the NIGC, the U.S. Department of the Interior and department officials jointly sought the stay on Tuesday to allow them to exhaust discussions to potentially settle the tribe's suit."

ALASKA GOV. WALKER CREATES TRIBAL ADVISORY COUNCIL.. The [Alaska Dispatch News](#) (10/14, 219K) reports that "following up on a pledge to improve relations between the state government and Native tribes, Gov. Bill Walker on Wednesday issued an administrative order creating a tribal advisory council." Walker "signed the order at the end of his address to a one-day Anchorage conference on tribal issues held

by the Alaska Federation of Natives and the National Congress of American Indians.

BIE APPOINTS NEW ASSOCIATE DEPUTY DIRECTOR. [Politico](#) (10/15, 942K) reports that “Tony Dearman has been appointed associate deputy director for bureau operated schools at the Bureau of Indian Education.”

ADDITIONAL COVERAGE: ADDITIONAL \$10 MILLION TRANSFERRED TO COBELL EDUCATION SCHOLARSHIP FUND. Additional coverage that the Interior Department “announced that an additional \$10 million has been transferred to the Cobell Education Scholarship Fund” was provided by the [Char-Koosta News](#) (10/15, 12K).

[Office of Insular Affairs:](#)

MICRONESIANS RELOCATING IN GREATER NUMBERS. The [Honolulu Civil Beat](#) (10/15, 41) reports on “the exodus” of Micronesians. According to the article, “Micronesians are leaving their island homes in large numbers and coming to the U.S. in search of medical care, education, jobs and economic prosperity — things they can’t find back at home.”

[Tackling America’s Water Challenges:](#)

FOLSOM LAKE FALLS TO LOWEST LEVEL IN 20-PLUS YEARS. The [Sacramento \(CA\) Bee](#) (10/15, 535K) reports that “even as Sacramento waits for the soaking El Niño forecast to hit this fall, Folsom Lake continues to lose water and will almost certainly fall Thursday to its lowest level in more than 20 years, government data show.” The article notes that “on Wednesday afternoon, Folsom Lake had about 162,000 acre-feet of water – just 17 percent of its capacity – and operators were still releasing about 800 acre-feet a day, according to the California Department of Water Resources.” The BOR, “which operates the reservoir, initially warned that the lake could fall to 120,000 acre-feet by the end of September.”

[Securing America’s Energy Future:](#)

[Renewable Energy:](#)

FIRST OFFSHORE WIND FARM IS US STIRS EXCITEMENT. The [Melbourne \(AUS\) Herald Sun](#) (10/15, 74K) reports that “construction is underway off Rhode Island’s coast on the US’ first offshore wind farm, a milestone that federal and state officials say will help the fledgling industry surge ahead.” Interior Secretary Sally Jewell said that “lenders, regulators and stakeholders could now see a path forward.” She said, “It’s great to witness a pioneering moment in US history. I think it will help the country understand the potential that exists here.”

[Onshore Energy Development:](#)

OSMRE BEGINS TRAPPER MINE ENVIRONMENTAL REVIEW. The [Grand Junction \(CO\) Daily Sentinel](#) (10/15, 73K) reports that the Office of Surface Mining Reclamation and Enforcement is “beginning a new environmental review involving coal mining at the Trapper Mine near Craig in response to a judge’s ruling earlier this year.” The agency said “in a public notice issued Wednesday that it will prepare an environmental assessment to analyze impacts of a mining plan approval for current and future mining involving two federal coal leases at the surface mine.” The article notes that “as part of the agency’s review, it will hold a public meeting in Craig Oct. 29.”

NORTH DAKOTA OIL INDUSTRY CONCERNED ABOUT FEDERAL FLARING RULES. The [AP](#) (10/15, Macpherson) reports that North Dakota Petroleum Council Vice President Kari Cutting told a North Dakota committee on energy development that “jurisdictional overreach appears to be the norm in the federal agency rulemaking process.” The AP adds that Cutting, whose group represents more than 550 companies, “said the industry has increased efficiencies...but the industry will have a tougher time adapting to what she calls a ‘jurisdictional grab’ by the federal government.” North Dakota’s oil industry is most concerned about gas flaring regulations, the AP reports, adding that producers in the state flare 20 percent due to insufficient infrastructure, much more than the 1 percent national average and 3 percent global average.

TRIBE IN TALKS ABOUT SETTLEMENT OF FRACKING LAWSUIT. The [EnergyWire](#) (10/14, Subscription Publication) reports that “an American Indian tribe is in talks with the Obama administration to settle a legal battle over the Interior Department’s much-contested hydraulic fracturing rule.” According to the article, “the Department of Justice, Interior and the Southern Ute Indian Tribe last week asked a federal court to pause their case while the sides continue settlement talks.” The Southern Utes “filed their lawsuit in June, three months after the Bureau of Land Management finalized the rule, which regulates well construction, wastewater management and chemical disclosure for fracking on public and tribal lands.”

CORDERO ROJO MINE TO RECEIVE RECLAMATION AWARD. The [World Coal](#) (10/15) reports that “Cloud Peak Energy’s Cordero Rojo coal mine has been awarded the Office of Surface Mining Reclamation and Enforcement’s 2015 Excellence in Surface Coal Mining Reclamation Award for its restoration work on the Belle Fourche River.” According to the article, “the mine relocated a portion of the river and reclaimed the stream channel to return it to approximately the same conditions as existed before mining.” The award will be presented at the National Mining Association’s awards ceremony in Washington DC on 9 November.

CONCERNS GROWING ABOUT EARTHQUAKES IN OKLAHOMA NEAR A HUB OF US OIL. The [New York Times](#) (10/15, Wines, Subscription Publication, 11.82M) reports an earthquake in Oklahoma over “last weekend has raised fresh concern about the security of a vast crude oil storage complex, close to the quake’s center, that sits at the crossroads of the nation’s oil pipeline network.” The quake occurred near Cushing, “home to the so-called Cushing Hub, a sprawling tank farm that is among the largest oil storage facilities in the world.” Last month, scientists said that an intense earthquake near the site “could seriously damage storage tanks and pipelines.” The hub has been designated by the Federal government as “a critical national infrastructure.” The 4.5 magnitude quake “is among the largest of thousands of temblors that have rocked central and northern Oklahoma in the past five years, largely set off by the injection of oil and gas industry wastes deep into the earth.”

STUDIES TIE FRACKING CHEMICAL EXPOSURE TO PREMATURE BIRTHS, LONG-TERM REPRODUCTIVE HEALTH CONSEQUENCES. The [New York Times](#) (10/15, Bakalar, 11.82M) “Well” blog reported that “living near hydraulic fracturing, or fracking, operations” may be tied to “premature births,” according to research published Sept. 30 in the journal *Epidemiology*. The study of “10,496 singleton births by 9,384 mothers from 2009 to 2013 in Pennsylvania” revealed that “the 25 percent of mothers most exposed to fracking were 40 percent more likely to give birth preterm...than the quarter least exposed.”

Meanwhile, the [Huffington Post](#) (10/15, Peeples, 164K) reports that “prenatal exposure to a cocktail of chemicals commonly used in the various phases of oil and natural gas production, including fracking, could carry long-term reproductive health consequences,” a study published online Oct. 14 in the journal *Endocrinology* suggests.

Offshore Energy Development:

IGNORING ST. JOHNS BRIDGE PROTEST COULD HAVE COST OREGON THOUSANDS IN FINES. The [Oregonian](#) (10/15, Theriault, 756K) reported that if Oregon officials had held back during Greenpeace’s summer protest of Shell’s Arctic drilling, it “could have cost the state thousands of dollars in federal fines, according to internal documents reviewed by The Oregonian/OregonLive.” Oregon officials responded after 13 Greenpeace protestors dangled from the St. Johns Bridge and briefly blocked the passage of a ship belonging to Shell. The Oregon Department of Transportation “requires a permit from the U.S. Coast Guard to operate the St. Johns Bridge” and “must ensure that ships up to 174 feet tall can pass below.” The protestors and their flags put the DOT in violation of the permit, and had the state balked in its response to the protestors, it could have set up “a contentious back-and-forth of written warnings, legal reviews and fines that could have hit \$25,000 every time operators of a ship thought about traveling under the bridge but decided not to risk it.”

[Inside Climate News](#) (10/14, Bagley) reported that “activists across the U.S. will push for quick and aggressive climate action Wednesday by staging protests, collecting signatures, organizing panels and even floating 30 miles down the Missouri River.” Events are scheduled for nearly 200 locations and “will be known collectively as the People’s Climate Movement, a follow-up to last year’s People’s Climate March.” Events “aim to draw attention to the local impacts of global warming...and the hundreds of grassroots groups fighting for action.” The article briefly reported that “there was also a significant upturn this year in civil disobedience campaigns,” including Greenpeace’s July protest on Portland’s St. Johns Bridge.

Shell Drilling Rigs Leave Arctic. On its website, [KUCB-FM](#) Unalaska, AK (10/15, Ryan) reported that Shell Oil's Polar Pioneer rig "left Alaska's Dutch Harbor for Port Angeles, Washington, on Wednesday" while Shell's "other Arctic rig, the Noble Discoverer, left Dutch Harbor for Everett, Washington, on Monday." Other ships in Shell's Arctic fleet "will leave Alaska over the next couple of weeks, and the company has not disclosed the fate of the 400 employees who have worked on the project in Anchorage."

The [AP](#) (10/14, Joling, 2.28M) reported that two of Royal Dutch Shell's drill vessels, the Noble Discoverer and the Polar Pioneer, "have safely departed Arctic waters for the Pacific Northwest." Following a Coast Guard inspection, the Noble Discoverer departed Dutch Harbor in the Aleutian Islands on Monday "for the Port of Everett in Washington state, Shell spokesman Curtis Smith said." The Polar Pioneer "reached Dutch Harbor on Monday afternoon" along with two tug boats, and will be towed to Port Angeles. The AP reported that "the next destinations for both vessels have not been determined, Smith said."

The [Seattle Post-Intelligencer](#) (10/13, Connelly, 560K) reported that the Polar Pioneer "will not be returning to Seattle, where it was greeted last April by a seaborne protest of 'kayactivists' including local politicians." Shell "has not requested any exclusion zone around the vessels, as it did last spring." Shell "is promising a less dramatic return journey than in December of 2012," when it "tried to tow the conical drilling vessel Kulluk across the Gulf of Alaska in the teeth of an early winter storm." The Kulluk "broke loose from its tow lines and went aground New Year's Eve on an island near Kodiak."

The [Puget Sound \(WA\) Business Journal](#) (10/13, Zak, Subscription Publication, 59K) reported that Shell spokeswoman Megan Baldino said, "Decisions about the final destination are still being worked out." The Journal added that "it's likely that the rigs will remain in Port Angeles and Everett for a while until their next destinations are determined."

[KOMO-TV](#) Seattle (10/14, 5:08 p.m. PDT, 92K) broadcast, "Two Shell oil rigs are returning to ports in our state but they won't be docked in Seattle. The Puget Sound Business Journal reports that one of them will be moored in Everett and the other in Port Angeles. The Polar Pioneer triggered intense protests while it was docked in Seattle's Terminal 5 before the expedition. Last month, Shell announced it's abandoning plans to drill for oil in the Arctic but they do say some supply ships could still be docked in Seattle."

[KPLC-TV](#) Lake Charles, LA (10/14, 6:51 a.m. CDT, 33K), [KTUU-TV](#) Anchorage, AK (10/13, 6:10 p.m. AKDT, 31K), [KONG-TV](#) Seattle (10/13, 10:14 p.m. PDT, 53K), [KGW-TV](#) Portland, OR (10/13, 6:08 p.m. PDT, 39K) and [KOIN-TV](#) Portland, OR (10/13, 4:34 p.m. PDT, 27K) also broadcast coverage of the story.

Alaska Gov. Calls For Expanded Oil Drilling To Fund State's Climate Change Adaptions. [TIME](#) (10/14, Worland, 19.55M) reported that Alaska Governor Bill Walker "called for expanded oil drilling to help him address the challenge of climate change in his state." Walker "told the BBC that increased revenue from oil...would allow his state to fund measures to adapt to a changing environment" and "said he wants to drill as soon as possible in the Arctic National Wilderness Refuge." Said Walker, "We are in a significant fiscal challenge. ... We have villages that are washing away because of changes in the climate."

[Slate](#) (10/13, 1.38M) reported that "the situation has grown still worse in Alaska in recent weeks: In late September, Royal Dutch Shell suddenly announced it was abandoning plans to drill offshore of Alaska's northwest coast after it failed to locate oil in any meaningful quantities during its controversial exploration this summer. ... Without oil as a reliable income source, Alaska's politicians have begun a tough look inward to re-envision their state's future." Added Slate, "Apparently, that reality check hasn't yet reached the governor's office."

The [Daily Caller](#) (10/13, Follett, 375K) and the [CBC News \(CAN\)](#) (10/15, 225K) also covered the story.

Reasons Shell Halted Arctic Oil Drilling Examined. On its website, the [Alaska Public Radio Network](#) examined reasons for Shell halting its exploratory drilling for oil in the Alaskan Arctic. While Kara Moriarty of the Alaska Oil and Gas Association "blamed the slow pace of federal permitting and a thicket of regulations," the article also looked at the reasons listed in Shell's statement, including the results at the Burger J well, the "challenging and unpredictable" regulatory environment, and the cost of the project.

OFFICIALS TOUT CAMINADA RESTORATION TO CELEBRATE 25 YEARS OF COASTAL RESTORATION PROGRAM. The [New Orleans Times-Picayune](#) (10/14, 718K) reports that "thousands of

pounds of sand from the Gulf of Mexico spewed from a pipe Wednesday (Oct. 14) onto the 10-growth beach and dunes that makes up the Caminada Headlands, the southernmost edge of Jefferson and Lafourche parishes that protects both rich wetlands just to its north and the nationally important Port Fourchon, jumping off point for deepwater drilling.” Observing “the rebuilding by a team of 80 employees of Weeks Marine, a dredging firm based in Covington, were representatives of five federal agencies and the state Coastal Protection and Restoration Authority who were on the Elmer’s Island segment of the Caminada beachfront to celebrate the 25th anniversary of the Coastal Wetlands Planning, Protection and Restoration Act.” The article notes that “the project under way Thursday is actually funded by a grant from the National Fish and Wildlife Foundation, with the money coming from the \$1 billion 2013 settlement of civil and criminal charges facing Transocean, the company that owned the Deepwater Horizon drillship that was at the center of the BP Macondo well blowout and oil spill in 2010.”

LOUISIANA TO RECEIVE BP SETTLEMENT. The [AP](#) (10/15, Burdeau, 344K) reports that “the next governor will play a crucial role in Louisiana’s coastal crisis – either by aggressively working to save the coast or missing a prime opportunity to stop the state from slipping further into the Gulf of Mexico.” Louisiana is “poised to receive about \$8.7 billion in settlement money over damages caused by BP’s catastrophic 2010 Gulf oil spill – money mandated by law for environmental restoration.” The article notes that “all four major candidates – the three Republicans, U.S. Sen. David Vitter, Lt. Gov. Jay Dardenne, Public Service Commissioner Scott Angelle and Democratic state Rep. John Bel Edwards – say they unequivocally support ongoing coastal restoration plans,” but each has “offered some new ideas.”

MISSISSIPPI TO SPEND MILLIONS ON RESTORATION PROJECTS. The [Jackson \(MS\) Clarion Ledger](#) (10/14, 263K) reports that “Mississippi officials will turn to the public and other stakeholders to help decide how to spend \$582 million the state will get to restore areas damaged by the 2010 Gulf of Mexico oil spill.” The funds will “begin flowing to Mississippi in 2017 under the Resources and Ecosystems Sustainability, Tourism Opportunities and Revived Economies Act, also known as the RESTORE Act.” According to the article, “state officials haven’t decided yet on final projects but plan to focus on improving water quality, protecting and restoring marine resources and buying land to protect habitats.”

GRETNA CITY COUNCIL APPROVES PLAN FOR BP SETTLEMENT MONEY. The [New Orleans Times-Picayune](#) (10/15, Samuels, 718K) reports that the Gretna City Council on Wednesday “approved a plan for the \$3.29 million in settlement money the city is receiving as a result of the 2010 BP oil spill.” Nearly a third of the money will go toward legal costs, \$500,000 will be entered into next year’s public works budget, and the remaining \$1.96 million will be set aside for future use.

ALASKA, FEDERAL OFFICIALS NOT TO PURSUE ADDITIONAL \$92 MILLION IN EXXON VALDEZ DAMAGES. The [AP](#) (10/15) reports that state and federal governments have decided not to pursue \$92 million in additional damages from ExxonMobil for the 1989 Exxon Valdez oil spill, “citing the recovery of ducks and sea otters in Alaska’s Prince William Sound.” Wildlife monitoring showed that wildlife populations have returned to pre-spill levels and officials concluded the legal requirements for pursuing a claim were no longer met.

[Reuters](#) (10/15) also reports.

America’s Great Outdoors:

Bureau of Land Management:

STOCK GROWERS ASSOCIATION SUES OVER LAND USE PLANS. [KTWO-AM](#) Casper, WY (10/15, 576) reports that “the Wyoming Stock Growers Association has sued federal agencies that allegedly ignored its comments for land use plans in areas with sage grouse habitat, its executive vice president said Wednesday.” Jim Magagna said, “Our view is the grazing regulations and requirements that we already have with the BLM (U.S. Bureau of Land Management) of meeting range land health standards are adequate and beneficial to the range land and therefore to sage grouse habitat. We’ve not been convinced that we need additional requirements on top of those.”

BLM REVIEWING ARMY PROPOSAL FOR LONG-TERM TRAINING. The [AP](#) (10/15, 344K) reports that “the Army plans to have Fort Carson helicopters practice high-altitude operations on public land west of Canon City this fall.” The BLM said Wednesday “the Army expects to use five landing zones in Fremont

County from mid-October through December. The BLM says the operations are expected to have little or no ground impact on the landing sites or neighboring property owners." The BLM is also "reviewing an Army proposal for longer-term training."

BLM SEEKS MORE COMMENTS ON PROPOSED MANAGEMENT OF RED CLIFFS, BEAVER DAM WASH NATIONAL CONSERVATION AREAS. The [Deseret \(UT\) News](#) (10/15, 407K) reports that "what sort of land management approach should be embraced involving nearly 110,000 acres in Washington County is drawing sharp disagreement among county leaders and an environmental organization, prompting a prolonged public comment period on draft plans." The BLM "released a draft environmental impact statement this summer on proposed management of the Red Cliffs and the Beaver Dam Wash national conservation areas, which were established through the Omnibus Public Land Management Act of 2009." According to the article, "a 90-day public comment period on an array of alternatives to managing these sections of lands was proposed, in addition to informational open houses, but BLM officials say the level of interest is driving a second round of outreach."

BLM UNVEILS LEMHI VALLEY TRAVEL PLAN. The [Idaho Mountain Express](#) (10/15, 1K) reports that the BLM will "hold a public meeting in Salmon next week about a travel management plan for nearly 500 square miles in the Lemhi Valley." According to the article, "representatives at the open house will provide information and take comments on three alternatives included in an environmental assessment that would permit varying amounts of motorized recreation on roads and trails on BLM land southeast of Salmon."

GROUP ACCUSES BLM OF EXPERIMENTING ON HORSES. The [Elko \(NV\) Daily Free Press](#) (10/15, 22K) reports that the American Wild Horse Preservation Campaign on Wednesday issued a statement claiming that the BLM is "ignoring scientific advice and environmental complaints in its decision to proceed with the use of an experimental fertility control vaccine on wild horses in the Antelope Herd Management Area in eastern Nevada." Deniz Bolbol, AWHPC director of field operations, said, "We are disappointed that the White House office that is supposed to ensure agency compliance with environmental laws is allowing the BLM to experiment on America's wild horses without any scientific oversight, review, or, for that matter, any scientific method for determining the impacts of the experiments on the horses themselves. Further, the use of GonaCon in this unscientific, unregimented proposal will place in jeopardy the individual horses' long-term well-being and their natural, social behaviors, which are attributes that make wild horses celebrated American icons, treasured by Americans and others around the world."

Fish and Wildlife Service:

FWS MOVES AHEAD WITH MEXICAN WOLF RELEASES. The [Santa Fe New Mexican](#) (10/15, 67K) reports that "in a direct snub to state officials, the U.S. Fish and Wildlife Service announced Wednesday that it will release about 10 Mexican gray wolves into the wilds of southwestern New Mexico, even though state game officials have refused to issue a permit for the action." The FWS "issued a statement Wednesday that said it will release the wolves as part of its recovery program for a species that is at risk of extinction."

SCIENTISTS ASK FOR PUBLIC HELP WITH SICK OTTERS IN ALASKA. The [AP](#) (10/15, 344K) reports that "scientists are turning to the public for help dealing with sick and dead otters in Alaska." FWS officials say "they have recently received about 200 reports of sick or dead sea otters in the Kachemak Bay region." The FWS is "working with Alaska Sea Life Center in Seward and running tests to find out what's hurting the animals."

ENVIRONMENTAL GROUP WANTS FOIA SUIT DISMISSED. The [Pueblo \(CO\) Chieftain](#) (10/15, 87K) reports that "an environmental organization with an office in Salida is asking a judge to dismiss a lawsuit it filed against a federal agency for allegedly violating the Freedom of Information Act." The Center for Biological Diversity sued the FWS "for allegedly failing to provide documents the center requested about the agency's decision not to list a fish as an endangered species." The center said last week the FWS "provided the requested documents in August, but also withheld and redacted several documents based on the legal concept of attorney-client privilege." But "despite some documents being withheld and redacted, the environmental organization stated in the court filing last week that the lawsuit should be dismissed."

CLEANUP OF DEAD FISH ON VIRGINIA EASTERN SHORE COMPLICATED BY ENDANGERED BEETLE. The [Washington Post](#) (10/15, Hedgpeth, 6.76M) reports that "clean-up of the tens of thousands of dead fish that washed up on Virginia's Eastern Shore is proving to be harder after authorities learned that

an endangered tiger beetle also inhabits the beach area. According to the article, the incident began Oct. 7 when a net owned by Omega Protein, a large commercial fishing operation out of Houston that specializes in harvesting menhaden, tore open,” and “on Tuesday, officials with Omega Protein said they estimated that some 75,000 fish had washed ashore.” The company said it has “received details from the U.S. Fish and Wildlife Service on how to deal with the cleanup of the dead fish and not harm the tiger beetles in the area.”

FWS HOLDS OPEN HOUSE ON ACCESS TO RATTLESNAKE MOUNTAIN. The [Tri-City Herald \(WA\)](#) (10/15, 100K) reports that “about 50 people who attended an afternoon open house held in Richland by the U.S. Fish and Wildlife Service to hear ideas about access to Rattlesnake Mountain and surrounding land.” An evening meeting also was held. Former Rep. Doc Hastings “got legislation passed shortly before he retired in December requiring the public be given access to the top of the mountain.” The FWS is “starting planning with a list of restrictions from other laws and regulations.”

MISSOURI RESIDENTS WANT LEAD MINE SETTLEMENT SPENT IN COMMUNITIES. The [AP](#) (10/15, 344K) reports that “some residents in southeast Missouri want money from a lead mining settlement spent in communities affected by contamination, not on a new state park.” According to the article, “residents panned a plan to buy 2,500 acres for the Oregon County park during a special meeting Tuesday.” The Missouri Department of Natural Resources and two federal agencies, the FWS and the U.S. Forest Service, “would decide how to spend the settlement after getting public input.”

LOG CABIN DAY FESTIVAL KICKS OFF AT MUSCATATUCK NATIONAL WILDLIFE REFUGE. The [AP](#) (10/15, Rutherford, 344K) reports that “deep within the leafy recesses of Muscatatuck National Wildlife Refuge near Seymour sits an old log cabin and barn.” Myers Cabin has “no running water, no electricity, but plenty of rustic charm.” On Saturday, “crowds of people gathered at the cabin for the annual Log Cabin Day Festival.” The article notes that “the event served as the kickoff for National Wildlife Refuge Week, which runs through Sunday.”

“DING” DARLING DAYS KICKS OFF SUNDAY. The [Fort Myers \(FL\) News-Press](#) (10/14, 171K) reports that the J.N. ‘Ding’ Darling National Wildlife Refuge will hold a kickoff on Sunday “of the week-long celebration of the man behind the name.” According to the article, “the refuge is named for Jay Norwood ‘Ding’ Darling, an editorial cartoonist who espoused environmental issues.”

CONGRESS URGED TO PROTECT ENDANGERED SPECIES. In an op-ed for the [Springfield \(MA\) Republican](#) (10/14, 336K), Michael Bean, Principal Deputy Assistant Secretary for Fish, Wildlife and Parks, U.S. Department of the Interior, writes that “last month, farmers, conservationists and landowners came together at a small field in Dover, New Hampshire to celebrate the recovery of the New England cottontail.” Bean says that “that type of conservation success story can and should be common.” However, he warns that “there are threats to unravel a key ingredient: the Endangered Species Act.” Bean hopes that “the Pope’s visit last month can remind us of the importance of protecting our fellow creatures.”

HABITAT EXCHANGES URGED TO PROTECT SPECIES. In an op-ed for the [Wall Street Journal](#) (10/15, Krupp, Subscription Publication, 5.95M), Fred Krupp, president of the Environmental Defense Fund, lauds the Interior Department’s recent decision not to list the greater sage grouse. Krupp argues that the Endangered Species Act is necessary, but it is also a last resort. He asserts that to protect wildlife populations and the economy, we must initiate care much sooner and the prescription must be collaborative. He suggests that habitat exchanges can be part of the prescription.

National Park Service:

REPORT URGES NPS TO ADD CHARGING STATIONS FOR ELECTRIC VEHICLES. The [Greenwire](#) (10/14, Subscription Publication) reports that the NPS “should double the small fraction of parks with electric vehicle charging stations, along with other steps to reduce car-related emissions, a think tank urged in a report released today.” The article notes that “at present, 21 of 470 national parks, or about 4 percent, have installed charging stations, the Center for American Progress said in the report, which recommends increasing that number to 42, with the inclusion of such iconic destinations as Yosemite National Park, Mount Rushmore National Memorial and Glacier National Park.” The report said that “besides installing more charging stations,” the NPS “should also reduce admission fees for visitors driving electric vehicles.”

REPORT DETAILS BRINKERHOFF LODGE ABUSE AT GRAND TETON. The [Jackson Hole \(WY\) News](#)

[a Guide](#) (10/15, 11K) reports that “over a recent four-year period Grand Teton National Park would have collected nearly \$29,000 in additional revenue were guests to the Brinkerhoff Lodge properly billed, federal investigators say.” according to a U.S. Department of the Interior Office of Inspector General report released last month, “between 2011 and 2014 guests of the historic cabin near Jackson Lake Dam were billed just 15 percent of the time.” The report found that the NNPS “could put the government asset to better use, that there are safety problems requiring immediate attention and that — counter to their rules — Grand Teton officials were allowing high-ranking government officials to use the lodge as a low- or no-cost vacation getaway.”

PROPOSAL WOULD HELP MAKE EVERS HOME PART OF NPS. The [AP](#) (10/15, 89K) reports that “the home where Mississippi civil rights leader Medgar Evers was assassinated in 1963 gets thousands of visitors each year, operates as a college-owned museum and relies on state grants and private donations for maintenance funds.” Now, “the state’s U.S. senators are hoping the National Park Service can lend a hand.” Sens. Thad Cochran and Roger Wicker said “last week they’ve filed a bill that would authorize a study on the national significance of the Evers home, as a step toward making it part of the Park Service.”

VETERAN SUES AFTER BEING INJURED BY 16-POUND PINE CONE IN SAN FRANCISCO MARITIME NATIONAL HISTORICAL PARK. The [Greenwire](#) (10/14, Subscription Publication) reports that “a U.S. Navy veteran is suing the Department of the Interior and the National Park Service after a 16-pound pine cone fell on his head while he sat beneath a tree in San Francisco Maritime National Historical Park.” According to the article, “celebrating Fleet Week ashore in San Francisco in 2014, Sean Mace said he was reading and napping under a bunya pine (*Araucaria bidwillii*) when a cone larger than a pineapple struck his head.” The article says that “with no signs warning about the danger from falling pine cones, Mace is suing the park for nearly \$5 million.”

YOSEMITE NATIONAL PARK CELEBRATES 125 YEARS. The [Albuquerque \(NM\) Journal](#) (10/15, 259K) reports that “the 125th anniversary of Yosemite National Park has been marked by a ceremony in Yosemite Valley.” The NPS says “about 1,500 people attended the recent event, which included a Native American blessing and a portrayal of John Muir, the naturalist who worked to preserve Yosemite and other parts of the Sierra Nevada.”

NPS CLARIFIES RENAMING OF BUILDING HOUSING OF SELMA INTERPRETIVE CENTER. The [Selma \(AL\) Times Journal](#) (10/14, 22K) reports that “the building that houses the Selma Interpretive Center is being renamed, but the National Park Service wants to clarify that the name of the center itself is not changing.” The Selma City Council “passed a resolution Tuesday night to rename the building the James Perkins Jr. Voting Rights Interpretive Center.” Sandy Perkins, the superintendent for the Selma to Montgomery Historic Trail, “wants to make sure the public understands the interpretive center, which is run by the National Park Service, is not changing names.”

NPS APPROVES REHABILITATION AT YELLOWSTONE NATIONAL PARK. The [Cody \(WY\) Enterprise](#) (10/15, 20K) reports that “visitors to Yellowstone National Park will find many of the overlooks and trails along the rim of the Grand Canyon of the Yellowstone River under construction” after the NPS “issued a Finding of No Significant Impact.” The article notes that “the action addresses aging and deteriorating infrastructure, provide improved accessibility to visitors, improve pedestrian flow, address safety issues, and improve the visitor experience in the Park.”

RINGTAIL AT CARLSBAD CAVERNS NATIONAL PARK HAD RABIES. The [AP](#) (10/15, 259K) reports that “a ringtail whose unusual behavior prompted a temporary closure of one entrance to the cave at Carlsbad Caverns National Park had rabies.” According to park officials, “that determination was made by the New Mexico Department of Health and Science in Albuquerque.”

CONGAREE NATIONAL PARK REOPENS AFTER FLOODING. The [AP](#) (10/15, 344K) reports that “the Congaree National Park south of Columbia has reopened after the historic flooding earlier this month.” The park has “been closed since Oct. 4 because of the flooding.” Officials say “the flood waters are receding at the park.”

UTAH PARKS SEES RECORD NUMBERS OF VISITORS. The [AP](#) (10/15, 344K) reports that “southern Utah’s parks have been attracting a record number of visitors in 2015.” The article notes that “Bryce Canyon National Park broke its record number of visitors in a calendar year by hitting 1.5 million in September.” Also, “Zion National Park is expected to reach more than 3.2 million visitors this month, setting

a new record. Meanwhile, other parks like Canyonlands, Cedar Breaks and Pipe Spring are also poised to set records.”

COMPLETION OF BIRDSALL MURAL NEARS. The [Seward \(AK\) City News](#) (10/15) reports that “except for one panel that is being completed in Dot Bardarson’s garage, the mural for the National Park Service building is finished and awaiting the clear coat process at Seward Body and Paint.” The mural, titled “Kenai Fjords, where Mountains, Ice, and Water Meet,” will “be mounted next Spring for the celebration of 100 years by the National Park Service.”

HISTORIC LUMBER SCHOONER C.A. Thayer Begins Final Stage Of Restoration. The [San Jose \(CA\) Mercury News](#) (10/14, 626K) reports that “Jeff Morris, historic ships manager with the National Park Service, and a crew of NPS workers are busy preparing the historic 1895 lumber schooner, the C.A. Thayer, for a trip across the bay to the Bay Ship & Yacht Co. in Alameda for the stepping of three new masts.” According to the article, “the historic schooner is entering the last stage of a long restoration that started with its first trip to Alameda in 2003.”

NATIONAL FOSSIL DAY CELEBRATED. [Popular Science](#) (10/15, 6.51M) reports on “the fifth annual National Fossil Day, a day trademarked by the National Park Service and celebrated in schools and parks across the country.” The NPS “hopes that if people are educated about fossils, they will be more likely to treat fossils they find with respect, whether they’re found in a backyard or a national park.” In honor of the day, the article highlights “some of our favorite discoveries from this year.”

BODY OF MAN RECOVERED IN LAKE POWELL. The [AP](#) (10/15, 344K) reports that “authorities say the body of a Wyoming man missing after he jumped from a 90-foot cliff into Lake Powell last week has been recovered.” The NPS and the Coconino County Sheriff’s Office say “the body of 29-year-old William ‘Billy’ Burke was spotted Wednesday at a depth of 153 feet by a remote operated vehicle.”

Additional coverage was provided by [Reuters](#) (10/14, Schwartz).

ADDITIONAL COVERAGE: NPS RENTING QUARTERS 17. Additional coverage that the NPS is “offering a once-in-a-lifetime opportunity to rent a three-bedroom, two-bathroom house near the Point Bonita Lighthouse in the Marin Headlands” was provided by the [Santa Rosa \(CA\) Press Democrat](#) (10/15, 170K).

US Geological Survey:

FEMA PLANS GREAT SHAKEOUT EARTHQUAKE DRILLS FOR THURSDAY. [Reuters](#) (10/14, Gillam) reports that on Thursday FEMA is organizing Great ShakeOut earthquake drill events nationwide, bolstering emergency preparation at schools and elsewhere as earthquake activity in the US increases. Reuters highlights the event’s slogan of “drop, cover and hold on.” The article notes that Cushing, Oklahoma experienced a magnitude 4.5 earthquake on Saturday. The [San Diego \(CA\) Union-Tribune](#) (10/14, Robbins, 542K) predicts a “big turnout” for the San Diego County earthquake drill, where more than 943,000 people have signed up to participate, most of whom are “students and government employees.”

The [San Francisco Chronicle](#) (10/15, Perlman, Subscription Publication, 3.35M) reports that on Wednesday the Calaveras Fault caused “a swarm of small earthquakes” near San Ramon. “By midafternoon, the total had reached 30,” according to the US Geological Survey (USGS). The article outlines the history of earthquakes along the fault. The [Palm Springs \(CA\) Desert Sun](#) (10/14, 99K) reports that on Wednesday morning Coachella Valley experienced a magnitude 3.6 earthquake, which did not cause any reported damage. The article notes other recent earthquakes in the Coachella Valley. USGS Seismologist Dr. Lucy Jones is paraphrased as saying “a magnitude 4.0 temblor is considered ‘normal’ earthquake activity for Southern California.”

ADDITIONAL COVERAGE: TWITTER PROJECT HELPS USGS TRACK EARTHQUAKES. Additional coverage that the USGS is “using Twitter to help detect earthquakes in real time as they are felt across the globe” was provided by the [Los Angeles Daily News](#) (10/14, 288K) and the [San Bernardino \(CA\) Sun](#) (10/14, 142K).

ADDITIONAL COVERAGE: CALIFORNIA’S SEQUOIAS SHOW SIGNS OF STRESS. Additional coverage that California’s “giant sequoias, which can live thousands of years, are starting to show signs that they’re not getting enough water” was provided by [PBS NewsHour](#) (10/15, 127K).

Top National News:

MEDIA ANALYSES: CLINTON'S STRONG DEBATE PERFORMANCE MAKES BIDEN RUN LESS LIKELY. Continuing coverage of Tuesday evening's first Democratic presidential debate focuses on the consensus that Hillary Clinton won the face-off and regained momentum, and also on the man who was not there: Vice President Biden. Speculation in broadcast, print, and online media is that Biden is less likely to enter the race since Clinton is getting back on track. Immediately following the debate, [CNN](#) (10/14, 5.17M) said on its website that in the Pivotal Political Prediction Market, the odds of a Biden nomination fell from 15% to 11%. By early Thursday, the odds were down to five percent – with just a 35% chance that Biden will run, a huge fall from 78% before the debate.

On [ABC World News](#) (10/14, story 2, 1:50, Muir, 5.84M), Jonathan Karl reported, "At a meeting today, Vice President Biden struck a note of optimism about America." Biden: "We're just going to roll, man. I really mean it. America's ready." Karl: "But tonight, there's much less optimism about Biden's presidential prospects. Even some of Biden's strongest supporters are saying privately he may have simply waited too long." The [CBS Evening News](#) (10/14, story 4, 2:20, Pelley, 5.08M) reported Biden "said he is proud of last night's Democratic presidential debate, but if he was looking for a reason to jump into the race, he likely didn't find it. Hillary Clinton dominated." [ABC World News](#) (10/14, lead story, 3:25, Muir, 5.84M) said that Clinton's campaign chairman said Wednesday, "At this point, Joe Biden needs to make up his mind.' Other top Democrats [are] thinking the same, as Clinton gets high marks for her center stage performance."

[NBC Nightly News](#) (10/14, lead story, 3:15, Holt, 7.86M) said in its lead story that "for months her campaign has been in response mode," but "at least for this moment," Clinton "is appearing to have retaken control of the conversation." Her debate performance may "give nervous supporters a reason to breathe easier and rivals a reason for pause." Chuck Todd then said on [NBC Nightly News](#) (10/14, story 2, 1:05, Holt, 7.86M), "There is no doubt that Team Biden was watching last night to see what kind of new openings that they could find. ... If the Biden campaign were about to get off the ground, we'd start hearing about it. We would see leaks about it. ... Almost radio silence from the West Wing there."

The [AP](#) (10/15) reports Biden "says he's proud of the Democratic candidates who took part" in the debate, but said little more. [Reuters](#) (10/15, Oliphant) says the dynamics of the Democratic race have changed after Clinton's strong debate performance, which is dampening calls for a late Biden entry. [USA Today](#) (10/15, Jackson, 5.23M) says "the specter of a Joe Biden candidacy still hovers over the Democratic presidential race, but it may be growing faint." John Hudak of the Brookings Institution said, "There is no path for Biden. There's no reason for it."

The [New York Times](#) (10/15, Martin, Subscription Publication, 11.82M) writes that Clinton's "sure-footed performance...did not just lift the spirits of her supporters and reassure nervous party officials about her candidacy, it also swiftly cooled talk about the need" for a Biden candidacy. Clinton offered "crisp answers to nearly every question, an aggressiveness her rivals did not seem ready for and a level of confidence that has often been obscured over months of questions about her use of a private email as secretary of state," and on Wednesday, "Democrats were describing the closing, if not the slamming shut, of a door" for Biden.

Dan Balz writes in the [Washington Post](#) (10/15, 6.76M) that "the path for Biden has always looked daunting," and though "after the debate, Clinton aides were not saying explicitly whether Biden has a path, but after weeks of neutral comments, the language turned." Clinton campaign chair John Podesta said Biden "will need to make a decision soon." [Politico](#) (10/14, Gass, 942K) reported Podesta "has a message" for Biden: "The time has come to decide on your White House bid."

The [Washington Post](#) (10/15, Rucker, 6.76M) says in another report that "the official line from the Clinton campaign was that they were thrilled with the candidate's performance and that Biden had to make his own decision," but the [Wall Street Journal](#) (10/15, Nelson, Meckler, Subscription Publication, 5.95M) says the Democratic establishment is growing impatient. The [Huffington Post](#) (10/14, Stein, 164K) said the Clinton campaign "has begun aggressively pushing" Biden "to make a decision one way or another."

The [Los Angeles Times](#) (10/15, Lauter, 4.07M) writes that Clinton "had three big tasks to accomplish in Tuesday night's debate: Reassure the Democratic establishment, draw contrasts with Sen. Bernie Sanders and deter Vice President Joe Biden. ... It was clear that she had succeeded with the first two. Whether she

achieved the third goal should be known within days. [The Hill](#) (10/14, Fabian, 471K) reported, however, that Biden “gave no indication Wednesday that he has a set a deadline to make a decision.”

The [Washington Post](#) (10/15, 6.76M) says Clinton was the only candidate in the debate who “performed like a potential president” with her “impressive performance. Yet the debate also surfaced one of Ms. Clinton’s vulnerabilities: the possibility that Mr. Sanders and the leftward drift of the Democratic Party will drag her away from pragmatism – and from general-election voters.”

The [New York Times](#) (10/15, Subscription Publication, 11.82M) says in an editorial that Clinton “reminded us why she’s the front-runner, with her experience, command of the issues and strength in communicating ideas. She seemed both at ease and fearless.” The Times also says the Democrats argued responsibly and with civility, while “the Republican candidates...haven’t a prayer of knowing what to do if they ever enter the White House.”

E.J. Dionne writes in his [Washington Post](#) (10/15, 6.76M) column, “At some point during Tuesday night’s Democratic debate, many people in living rooms across the country undoubtedly turned to each other with the same basic thought about Hillary Clinton: Oh, so that’s why she’s the front-runner.” Daniel Henninger writes in his [Wall Street Journal](#) (10/15, Subscription Publication, 5.95M) column that the debate essentially ended the Democratic race by marginalizing Sanders and removing the rationale for a Biden candidacy.

However, Evan Horowitz writes in the [Boston Globe](#) (10/15, 1.1M) that it is “too early to say” if Clinton really won the debate, since “the point isn’t to win over expert judges, it’s to gain support from non-experts – people who haven’t been following the ins and outs of the campaign but who are planning to hit the voting booths come primary season.”

AP Analysis: Clinton Displayed “Likely Strength” In General Election Campaign. The [AP](#) (10/15) says in an analysis that Clinton’s “polished performance...did more than send a message to her primary rivals. It was a warning to the chaotic Republican field about her likely strength in a general election.” She “solidified her shift toward more liberal positions on trade, gun control and immigration, but still stayed largely in step with the battleground state voters she’ll need” in a fall campaign, and “also positioned herself as heir to the coalition of women, Hispanics and black voters that propelled Barack Obama to the White House.”

But Anne Gearan of the [Washington Post](#) (10/15, 6.76M) writes that if Clinton is the nominee, “her Republican opponents will not let her off so easy” as her Democratic foes did Tuesday. Karl Rove similarly writes in his [Wall Street Journal](#) (10/15, Subscription Publication, 5.95M) column that Clinton’s debate victory was due to the weakness of her opponents. However, the [Washington Post](#) (10/15, Johnson, 6.76M) says for many Democrats, the debate “provided a renewed sense of optimism and confidence in their field’s leaders.”

Bill Clinton: “Hillary Knocked It Out Of The Park.” [The Hill](#) (10/14, Hensch, 471K) reported that in a fundraising email, former President Bill Clinton wrote, “Last night, Hillary knocked it out of the park. She didn’t just talk about big ideas – she laid out plans to get them done. That’s what Hillary does when she sees a problem to fix: She gets people together, takes on the tough fights and finds her way to the solution.”

Trump Says Clinton Won Debate. [The Hill](#) (10/14, Byrnes, 471K) reported Republican presidential candidate Donald Trump said Wednesday that he thought Clinton won the debate “and suggested other candidates lacked credibility.” [NBC Nightly News](#) (10/14, story 3, 3:05, Holt, 7.86M) showed clips of MSNBC’s Katy Tur interviewing Trump, who said, “Bernie [Sanders] made a mistake. He got a great couple of seconds. But he took a situation that’s a very serious situation, where Hillary is being investigated by the FBI, and he gave it away. He just gave it away. He can never bring it up again and it’s not like he’s winning, he’s losing.”

Rubio: Democratic Debate Was About “Free Stuff.” [The Hill](#) (10/14, Byrnes, 471K) reported GOP candidate Sen. Marco Rubio said on Fox News Wednesday morning that the Democratic debate “was all about giving away ‘free stuff.’” He said, “Free college education, free college education for people illegally in this country, free healthcare, free everything. Their answer to every problem in America is a government program and a tax increase.”

Obama Campaign Alumni Among Critics of Clinton's Performance. [Politico](#) (10/14, Cheney, 521K) said some of the biggest Democratic criticism of Clinton came from "Obama campaign alums. ... David Axelrod, Obama's top political strategist, noted that 'Clinton made a few mistakes,'" and "even among those Obama allies who praised Clinton's performance, there were overt shots at Clinton's longer-term strategy."

Sanders Raised More Than \$1.3 Million In Hours After Debate. The [AP](#) (10/15) reports Sanders "said his campaign raised more than \$1.3 million in the hours after the first Democratic debate of the 2016 race, and social media metrics showed he was the most-searched candidate on Google and most-discussed on Facebook and Twitter." [Politico](#) (10/14, Strauss, 942K) reports the Sanders campaign said it received more than 37,600 individual contributions averaging \$31.54 each. And [The Hill](#) (10/14, Byrnes, 471K) says Sanders "slightly edged out Clinton for most Twitter mentions during the debate, with 41 percent of the tweets to Clinton's 39 percent."

Sanders gained about 24,000 new Twitter followers after the debate, while Clinton gained about 10,000. But while most of the tweets by [@HillaryClinton](#) Wednesday were clips of her debate performance, [@BernieSanders](#) had little about the debate except for a few retweeted articles like [one from Vox](#) reading, "DC insiders think Bernie Sanders lost the debate. Here's why they might be wrong."

However, the [New York Times](#) (10/15, Gabriel, Subscription Publication, 11.82M) reports under the headline "Debate Cools Momentum Of Bernie Sanders In Iowa" that Clinton's "self-assurance, command of issues and ease in parrying" Sanders in the debate "drew praise from Iowa Democrats." [USA Today](#) (10/15, Gaudiano, 5.23M) says Sanders faces a question over whether he can "expand his following beyond the Democratic Party's liberal base."

WPost Analysis: O'Malley Had No "Make-Or-Break Moment." The [Washington Post](#) (10/15, Wagner, 6.76M) writes that while O'Malley came to the debate "facing what many had described as a make-or-break moment," it "turned out to be neither." While "the prevailing view among observers was that O'Malley had benefited from the broader exposure to a national audience," it "seemed unlikely that anything that happened in Vegas would fundamentally change the dynamics" of the race.

Racial Justice, Gender Equality Addressed In Debate. The [Washington Post](#) (10/15, Williams, 6.76M) reports that "racial justice and gender equality...finally made it to the presidential debate stage" in the Democratic debate after being all but ignored in the first Republican face-offs.

Wasserman Schultz Defends Party's Diversity. [The Hill](#) (10/14, Richardson, 471K) reported Democratic National Committee Chair Rep. Debbie Wasserman Schultz defended the party's diversity in an interview with Fusion's Jorge Ramos, who said "he did not 'see a Latino or an African-American or an Asian' on the Democratic debate stage." Wasserman Schultz replied, "First of all, our president of the United States, who is a Democrat, is African-American. ... Our party nominated the first African-American, and then Americans elected him not once, but twice. ... There is overwhelmingly more diversity up and down the ballot when it comes to Democrats."

Debate Draws Record-High Viewership For Democratic Face-Off. [Politico](#) (10/14, Gold, 942K) reported the debate "drew 15.3 million viewers, making it the most watched Democratic primary debate in history," thou

Cheers, jeers for 1.1M-acre Mojave plan at raucous meeting

Jeremy P. Jacobs, E&E reporter

Published: Wednesday, October 14, 2015

PALM SPRINGS, Calif. -- Sen. Dianne Feinstein told a sweaty and often hostile crowd of about 800 here yesterday that President Obama should designate three new national monuments spanning more than 1 million acres of Mojave Desert as national monuments if her legislative efforts run dry.

The California Democrat has fought for more than six years to establish the Sand to Snow, Mojave Trails and Castle Mountains monuments.

The designation would cover 1.1 million acres and be Obama's largest under the 1906 Antiquities Act.

At a public hearing at the Whitewater Preserve, Feinstein emphasized she prefers her legislation, which would protect more than 1.4 million acres and preserve existing off-highway vehicle use.

But "the present political climate is proving extremely difficult to move any public lands legislation through both houses of Congress," she said, leading her to ask the president to designate the lands should her bill fail.

The remarks drew both loud cheers and boos from the testy crowd sitting outside on a 97-degree day.

Feinstein sought to address the critics' concerns.

"Some people say you are taking this away from us," she said. "It's exactly the opposite. What we are

trying to do is protect this land for you.

The monument designations would carve out three swaths from just north of Palm Springs to the Nevada border, including wild lands, Joshua and juniper trees, and prehistoric lava flows that would be protected from new mining and other industrial activities like solar and wind farms.

Feinstein has introduced [S. 414](#) to protect the three areas. But frustrated with gridlock on Capitol Hill, she has also pressed Obama to use the Antiquities Act to designate the monuments by executive action.

The Obama administration dispatched Interior Department Deputy Secretary Michael Connor and Agriculture Department Undersecretary Robert Bonnie to the event -- a sign that the president is seriously considering Feinstein's request.

Before making designations in Nevada, California and New Mexico that each spanned hundreds of thousands of acres, Obama sent Connor or other senior officials to public hearings on the proposals.

Connor provided few hints about whether and when such a designation for the three new monuments in California could come.

In brief remarks, he said he visited some of the landscape in the morning and called it a "truly spectacular place."

"I see the beauty of the landscape and very much appreciate it," he said.

He added that the president will ultimately make a decision on whether to make the designations after Interior and USDA make recommendations.

"It is a process that we take very seriously," he said. "But, quite frankly, I would just note for the record that we do support Feinstein's legislative efforts."

But if the bill stalls, he said, "we have to think about other ways to protect a landscape of this magnitude and importance."

And he pointed out that the Antiquities Act has frequently been used by presidents to protect national treasures -- including the Grand Canyon, which was originally designated under the law.

'Second-rate monuments'

But designations by executive action have sparked significant criticism from Republicans on Capitol Hill, who say the president is abusing his authority and protecting areas that are not under threat.

Those concerns were given full voice yesterday on placards reading "No Antiquities Act!" and "The Public Deserves a Vote!" displayed on the road to the hearing.

California Republican Rep. Paul Cook's chief of staff, John Sobel, told the crowd that his boss believes designating the monuments by executive action would create "second-rate monuments because they lack the adequate support of locals and of Congress."

Cook has introduced [H.R. 3668](#), a companion to Feinstein's bill that would allow more mining opportunities and bar designations under the Antiquities Act. Environmental groups strongly oppose the bill because of the mining provisions.

Sobel said his office was not yet convinced that the public supports the new monuments, remarks that drew a chorus of boos. He added that Cook isn't sure that new economic activity from tourism would replace mining.

Cook, Sobel said, is "absolutely committed to a legislative solution. Please do not assume that we will fail in that effort."

Others said using executive action stymies what should be a transparent process.

Jim Bagley, 59, a Realtor and former mayor of the city Twentynine Palms, said in an interview that each monument should be considered separately and legislatively.

Executive designation, Bagley said, "excludes the public."

Bagley, who has followed Feinstein's efforts since the mid-1990s, said the administration seems to be saying, "We're going to dictate to you."

'Designation means destination'

There was also significant local support for the designations among those who have fought for years for the protections.

Eva Soltes, 67, who formerly sat on Joshua Tree's Chamber of Commerce, said "designation means destination" and that the monuments would spur visitors to the San Bernardino mountain range and desert.

Feinstein's legislation would protect desert habitat for tortoises, bighorn sheep and golden eagles. It would also establish conservation of parts of the Pacific Crest Trail and Route 66.

In often combative remarks, Feinstein attempted to take on what was at times a hostile crowd.

She has worked diligently to reach compromises with interested parties, she said, such as off-road vehicle organizations. Presidential designations do not guarantee access for motorized recreation as Cook's and Feinstein's legislation would.

Feinstein emphasized that off-highway vehicles will be able to continue to use the same trails under a designation.

And with regard to mining, she said access to existing mines would remain available.

"We have one thing in this business, and it's our word," she said. "And if we give it, we keep it. I gave you my word in 1994, and to this day I have kept it, and I intend to continue to do so."

[Sen. Feinstein asks Obama to designate](#)

monuments in the Mojave Desert

LA Times // Julie Cart // Oct. 13, 2015

Sen. Dianne Feinstein, champion of the California desert, is asking President Obama to take executive action to protect hundreds of thousands of acres in the Mojave Desert.

Since 2009, Feinstein has been unsuccessfully trying to convince her colleagues in Congress to designate the Mojave Trails, Sand to Snow and Castle Mountains areas as new national monuments. Now, the Democratic senator is calling on Obama to use the Antiquities Act to set aside desert tracts near Mojave National Preserve and Death Valley National Park.

In a public meeting scheduled for today in Palm Springs, Feinstein and other national, state and local officials will listen to public comment on setting aside the disparate pieces of public land for heightened protection.

All of the land proposed for monument designation is in federal hands and no transfers are required.

Obama has invoked the Antiquities Act sparingly. Most recently he designated the Berryessa-Snow Mountains National Monument in Northern California.

Monument designations can be controversial because they sometimes place restrictions on hunting, off-road recreation and other uses. But Feinstein's proposal would preserve existing recreational activities.

Obama has the option to designate the new monuments without consulting Congress, but Feinstein said she will continue trying to gain support for her legislation.

SECRETARY JEWELL SPEAKS AT OREGON BUSINESS ASSOCIATION'S ANNUAL STATESMAN DINNER. [My Central Oregon](#) (10/12) reports that Interior Secretary Sally Jewell was secluded to be the keynote speaker at the Oregon Business Association's Annual Statesman Dinner. According to the article, the focus of the event is "on Recreational tourism- the balance of bringing visitors to Oregon's scenic areas without jeopardizing fragile wildlife."

The [Portland \(OR\) Business Journal](#) (10/14, Subscription Publication, 6K) reports that Jewell called for the renewal of the Land and Water Conservation Fund during her speech.

Meanwhile, the [Portland \(OR\) Business Journal](#) (10/14, Subscription Publication, 6K) reports that Sen. Ron Wyden hosted a roundtable in Portland Tuesday with Jewell and Rep. Earl Blumenauer "to build support for a proposal to make it easier to use federal lands for recreation."

The [Oregonian](#) (10/14, 756K) reports that Wyden discussed "a draft plan for what could become Wyden's outdoor recreation bill." Jewell was "receptive to the ideas, but also issued a note of caution. She said, "Many of the federal agencies are underfunded." Jewell added, "When you adjust permitting that adds a burden on an underfunded agency over a period of time the agency can't do the job it's required to do."

SEN. FEINSTEIN PUSHES FOR MONUMENTS IN CALIFORNIA DESERT. The [Los Angeles Times](#) (10/12, 4.07M) reports that Sen. Dianne Feinstein, "champion of the California desert, is asking President Obama to take executive action to protect hundreds of thousands of acres in the Mojave Desert." Since 2009, "Feinstein has been unsuccessfully trying to convince her colleagues in Congress to designate the Mojave Trails, Sand to Snow and Castle Mountains areas as new national monuments." Now, she is "calling on Obama to use the Antiquities Act to set aside desert tracts near Mojave National Preserve and Death Valley National Park."

The [Riverside \(CA\) Press Enterprise](#) (10/14, 303K) reports that "hundreds of miners, off-roaders, environmentalists and others voiced passionate opinions Tuesday on U.S. Sen. Dianne Feinstein's effort to establish national monuments in the California desert." But "not all of them agreed, and the senator chided the audience at a public hearing for booing some of the speakers." Feinstein was also "booed when she mentioned the Antiquities Act."

The [Palm Springs \(CA\) Desert Sun](#) (10/13, 99K) reports that "representatives from the U.S. Interior and Agriculture departments also spoke. While they didn't say one way or another whether Obama will create the three proposed monuments via executive authority, they reiterated their support for Feinstein's bill, and said the administration is committed to protecting the desert." Mike Connor, deputy secretary of the Interior, said, "We know we have a gridlocked Congress at times. So we have to think about other ways to protect a landscape of this magnitude and this importance."

Additional coverage was provided by the [Victorville \(CA\) Daily Press](#) (10/13, Writer, 2K), the [Hi-Desert \(CA\) Star](#) (10/14, 23K), the [Banning-Beaumont \(CA\) Patch](#) (10/14, 634), the [San Bernardino \(CA\) Sun](#) (10/13, 142K), the [Palm Springs \(CA\) Desert Sun](#) (10/12, 99K), and the [Public News Service](#) (10/13, 306).

SCHOLARS CALL FOR MORE RESEARCH ON FUTURE OF COLORADO RIVER. The [AP](#) Raleigh, NC (10/14, 193K) reports that "a coalition of scholars across the West is urging the federal government to partner with the National Academy of Sciences to study the future of the Colorado River, including if climate change is leading to reduced stream flow." According to the article, "twenty-three scholars from Western universities sent

a letter Tuesday to Interior Secretary Sally Jewell detailing their request for more scientific research on a host of issues related to the Colorado River.” The article notes that “chief among the concerns is if there will be enough water in the river to support 36 million users in seven U.S. states and parts of Mexico over the next 50 years.” Interior spokeswoman Emily Beyer said that “the department takes Colorado River and all Western water issues seriously and will review the letter once it is received.”

Additional coverage was provided by the [Las Vegas Review-Journal](#) (10/14, 378K), the [Arizona Republic](#) (10/13, 1.12M), the [Albuquerque \(NM\) Journal](#) (10/14, 259K), the [Salem \(OR\) Capital Press](#) (10/13, 113K), the [Washington \(DC\) Times](#) (10/14, 344K), the [Las Vegas \(NV\) Sun](#) (10/13, 199K), the [Deseret \(UT\) News](#) (10/14, 407K), and [Yahoo! News](#) (10/14, 5.98M).

JEMEZ PUEBLO CONTINUING FIGHT OVER VALLES CALDERA PROPERTY. The [Santa Fe New Mexican](#) (10/14, 67K) reports that “a fog slowly lifted over the Valles Caldera National Preserve on Saturday morning as officials prepared for a dedication ceremony to mark the transition of 89,000 acres of land atop a dormant volcano to a national park.” However, “despite Saturday’s sunny celebration of the transition — attended by high-ranking U.S. government officials and tribal elders — the matter of who actually owns the land is still foggy.” The Jemez Pueblo, “fueled by a U.S. Court of Appeals decision over the summer, is engaged with the federal government in an ongoing legal dispute about its claim to the property.”

Additional coverage of the dedication ceremony of Valles Caldera National Preserve was provided by [Outside](#) (10/14, 258K).

Editorial: Valles Caldera Made Possible By LWCF. In an editorial, the [Santa Fe New Mexican](#) (10/14, 67K) says that the preservation of the Valles Caldera would not have happened would without the Land and Water Conservation Fund. It urges Congress to restore the fund.

BILL WOULD CREATE GREATER GRAND CANYON HERITAGE NATIONAL MONUMENT. The [Greenwire](#) (10/13, Subscription Publication) reports that House Natural Resources ranking member Raúl Grijalva said “he will introduce a bill to protect 1.7 million acres of federal lands surrounding Grand Canyon National Park from future mining and other threats, a measure that is unlikely to pass Congress but aims to provide President Obama a blueprint for protecting the lands under the Antiquities Act.” Grijalva unveiled the bill Monday “at a news conference in Flagstaff, Ariz., where he was joined by tribal leaders.” The Greater Grand Canyon Heritage National Monument would “consist of lands north and south of the national park, including much of the Kaibab National Forest and Kaibab plateau, a key watershed feeding the canyon that is home to mule deer, mountain lions and the endangered California condor.”

In an op-ed for the [New York Times](#) (10/14, Udall, Subscription Publication, 11.82M), Mark Udall, a member of the board of the Grand Canyon Trust, writes in support of the Greater Grand Canyon Heritage National Monument Act. Because “there’s almost no chance that the legislation will gain approval in today’s gridlocked Congress,” Udall urges President Obama to use the 1906 Antiquities Act to protect the land.

Additional coverage was provided by the [Washington \(DC\) Post](#) (10/14, Felicia Fonseca |, Ap, 6.76M), the [Casa Grande \(AZ\) Dispatch](#) (10/14, 24K), and [Public News Service](#) (10/13, 306).

MONTANA OFFICIALS SAY LWCF’S END COULD HURT WILDLIFE MANAGEMENT. The [AP](#) Missoula, MT (10/14, 1K) reports that “Montana wildlife officials say the loss of the Land and Water Conservation Fund threatens the federal grants the state uses to help manage endangered and threatened species.” The state has “received more than \$14.3 million in State Wildlife Grants from the U.S. Fish and Wildlife Service since 2000.” Adam Brooks of Montana Fish, Wildlife and Parks says the end of the LWCF “could harm the program that focuses on nongame species in need of management, such as small birds, reptiles and amphibians.”

In an editorial, the [Montana Standard](#) (10/14, 36K) calls “on Sens. Daines and Tester and Rep. Ryan Zinke to fight hard for Montanans and for the reauthorization of the LWCF.”

REP. WALDEN BACKS FOREST MANAGEMENT BILL. The [Salem \(OR\) Capital Press](#) (10/13, 113K) reports that Rep. Greg Walden “spoke of frustration with the U.S. Senate’s unwillingness to address forest policy, and fielded questions on the uncertainty surrounding the House speakership during a presentation at the Oregon Forest Industries Council’s annual meeting here Oct. 12.” According to the article, “outside the questions on the House speakership, Walden focused on forest policy during his luncheon presentation, specifically on the unwillingness of the Senate to revise federal forest management.” Walden said, “Three

years in a row, in the U.S. House, bipartisan legislation has been passed to try and give us active management of federal forests to improve their health, to protect their watersheds.”

SUPREME COURT WON'T HEAR UTAH APPEAL OVER ROAD ACCESS. The [AP](#) (10/14, 2.28M) reports that “the Supreme Court won't hear an appeal from Utah officials seeking rights of way over several roads that run through federal lands.” The high court “on Tuesday let stand a lower court ruling that said Utah and Kane County could only claim rights to six of 12 routes over which they sought control.”

ADDITIONAL COVERAGE OF DENALI NAME CHANGE. Additional coverage of the Denali name change was provided by the [Daily \(WA\)](#) (10/14, 522).

SETTLEMENT WITH CHOCTAWS AND CHICKASAWS WELCOMED. The [Tulsa \(OK\) World](#) (10/13, 364K) editorializes that “the U.S. Department of Interior and the Choctaw and Chickasaw nations announced a \$186 million settlement Tuesday, resolving decades of federal mismanagement of tribal assets.” At a Tuesday signing ceremony, Interior Secretary Sally Jewell said the “settlement is an opportunity for the federal government to wipe ‘a black mark of history’ from the record.” The editorial concludes that “while the settlement doesn't undo the wrong, it is important action and an opportunity for the tribes and the federal government to begin a new, healthier relationship.”

Empowering Native American Communities:

FEDERAL COURT UPHOLDS TRIBAL SOVEREIGN IMMUNITY DOCTRINE. The [Great Falls \(MT\) Tribune](#) (10/13, 75K) reports that “a federal judge has ruled in favor of the Fort Belknap Tribal Community Council, quashing a subpoena that would have forced council President Mark Azure to produce tribal documents or face a contempt of court charge.” U.S. District Court Judge Brian Morris “quashed the subpoena issued in July, which demanded tribal documents associated with a Bureau of Indian Affairs road building project at the center of a \$5 million civil lawsuit.”

TRIBE, WASHINGTON COUNTY CONTEST CASINO LAND APPROVAL. [Law360](#) (10/14, 21K) reports that “a Washington county and city and an Oregon tribe urged the D.C. Circuit on Friday to overturn a district court ruling upholding the U.S. Department of the Interior's ability to take land into trust for a rival tribe's casino project, arguing the agency lacked authority to make the trust acquisition and the land wasn't eligible for gaming.” According to the article, “Clark County and the city of Vancouver, along with the Confederated Tribes of the Grande Ronde Community of Oregon, are contesting the federal government's April 2013 acquisition of land.”

Office of Insular Affairs:

ASSISTANT SECRETARY KIA'AINA TO ENSURE CLIMATE CHANGE FUNDING FOR NMI IS AVAILABLE. The [Marianas Variety](#) (10/14) reports that Assistant Interior Secretary for Insular Affairs Esther Kia'aina “in her recent visit to the island said she will ensure that the CNMI gets funding for climate change and hazard mitigation.” Kia'aina said, “There will be funding available for it and I am exploring all current grant authorities to ensure that it is taken into account. There is no reason why the CNMI won't be eligible.” She added, “As far as I'm concerned, all of the infrastructure funding should ensure that it is able to stand the devastating impact [of climate change]. Everybody is aware of the weather conditions here and I'm appealing to everybody to take it very seriously.”

PACIFIC ISLAND NATIONS REPEAT CALLS FOR MIGRATION BODY AMID RISING SEA LEVELS. [The Guardian \(UK\)](#) (10/14, 3.3M) reports that in a joint statement after a summit in Kiribati the Pacific nations Fiji, Kiribati, Tuvalu, and Tokelau said they were “gravely concerned over the lack of effective international response to climate change” that posed “major existential challenges” to their populations and cultures. The Guardian reports that the island nations “repeated calls for an international body to be set up to coordinate population movement caused by climate change” which was dropped last week amid opposition from Australia.

Tackling America's Water Challenges:

SEN. DAINES BLASTS DEMOCRATS FOR BLOCKING WATER, INFRASTRUCTURE PROJECTS..

[Energy Wire](#), Bozeman, MT (10/14), reports that “late last week, Senator Steve Daines slammed Senate Democrats for blocking the 2016 Energy and Water Development Appropriations Bill, which funds critical infrastructure projects administered by the Army Corps of Engineers and Bureau of Reclamation – including Montana rural water projects.” Daines said, “Despite the vast majority of Democrats supporting this bill during an Appropriations Committee vote this summer, once again Democrats have chosen to block legislation that protects Montanans’ interests and strengthens our national security through increased energy and water security. This legislation works to enhance our energy efficiency while funding important projects that modernize our nation’s energy and water infrastructure. It’s disheartening that Senate Democrats continue to put partisan politics ahead of commonsense legislation that works for the American people.”

YUROK TRIBE DISCUSSES KLAMATH RIVER FLOWS WITH BOR. [KRCR-TV](#) Redding, CA (10/14, 43K) reports that the Yurok Tribe met with the BOR “Tuesday to discuss long term river flows for the Klamath River that will help protect the salmon the tribe depends on.” According to the article, “the two-hour meeting at the Yurok tribal headquarters involved a presentation from the Bureau which outlined what the agency had researched and addressed with the issue of rivers flows in the Klamath River basin.”

Securing America’s Energy Future:

Renewable Energy:

ADDITIONAL COVERAGE: WIND LEASE AUCTION OFF NEW JERSEY COAST TO BE HELD. Additional coverage that the Interior Department has “announced that 343,833 acres off the New Jersey shore will be included in a lease sale scheduled for Nov. 9” was provided by the [Colts Neck \(NJ\) News Transcript](#) (10/15, 3K) and the [Howell \(NJ\) Tri-Town News](#) (10/15).

Onshore Energy Development:

COURT REJECTS TIMELINE FOR DRILLING PROJECT NEAR GLACIER NATIONAL PARK. The [EnergyWire](#) (10/13, Subscription Publication) reports that “a federal judge rejected the Obama administration’s proposed timeline for a long-delayed drilling project near Glacier National Park.” The BLM and Forest Service “submitted their timeline to the U.S. District Court for the District of Columbia in August after the court ordered the agencies to end 30 years of waffling on whether to approve shale drilling.” However, Judge Richard Leon “rejected the agencies’ schedule.” According to the article, “in an order handed down late last week, Leon called it ‘unacceptable’ for BLM to expect Solenex LLC to potentially wait two more years for approval of a drilling project that was first permitted nearly 30 years ago.”

Additional coverage was provided by the [Fairfield \(MT\) Sun Times](#) (10/14).

INTERIOR RAISES ENVIRONMENTAL CONCERNS ABOUT OREGON LNG PROJECT. [Natural Gas Intelligence](#) (10/14, Subscription Publication) reports that the Interior Department has “submitted a 16-page summary of comments to FERC expressing ‘considerable concerns’ about potential environmental and other impacts from the proposed Oregon LNG project seeking to export gas from a spot at the mouth of the Columbia River.” The article notes that “concerns related to the Lewis and Clark National Historic Trail and national park overseen by the National Parks Service (NPS).” However, “sources tied to the backers of the project dismissed the DOI concerns.”

INTEREST IN BUYING COAL MINES FALTERS. The [Wall Street Journal](#) (10/14, Miller, Jarzemsky, Subscription Publication, 5.95M) discusses how the widespread lack of interest in buying coal mines is emblematic of the industry’s long term struggles.

Offshore Energy Development:

ALASKA GOV. WALKER SAYS DRILLING WOULD HELP PAY FOR CLIMATE CHANGE IMPACTS. The [ClimateWire](#) (10/13, Subscription Publication) reports that Alaska Gov. Bill Walker “told the BBC that drilling for oil in new reaches of the state would be necessary to pay for the damage caused by climate change.” According to Walker, “rising seas threaten to put a dozen villages in the state underwater, but relocating them is expensive, the governor said.” The article notes that “Alaska’s finances have been hit hard by the drop in oil prices over the past two years.”

[Slate](#) (10/13, 1.35M) reported that the situation has grown still worse in Alaska in recent weeks. In late September, Royal Dutch Shell suddenly announced it was abandoning plans to drill offshore of Alaska's northwest coast after it failed to locate oil in any meaningful quantities during its controversial exploration this summer. ... Without oil as a reliable income source, Alaska's politicians have begun a tough look inward to re-envision their state's future." Added Slate, "Apparently, that reality check hasn't yet reached the governor's office."

Additional coverage was provided by [TIME](#) (10/14, Worland, 19.55M).

NATIONAL ACADEMIES OF SCIENCES, ENGINEERING, AND MEDICINE SELECTS MEMBERS OF OCEAN ENERGY COMMITTEE. The [Maritime Professional](#) (10/13, 318) reports that the BOEM announced that the National Academies of Sciences, Engineering, and Medicine have "selected 14 experts to serve on the new standing committee on environmental science and assessment for offshore energy and mineral resources." BOEM Director Abigail Ross Hopper said, "BOEM is honored to have these extraordinary scientists provide their guidance to the bureau on scientific matters. We look forward to engaging with and learning from them as we continue to address complex offshore energy and marine mineral issues in an environmentally responsible manner."

BP TO REIMBURSE LOUISIANA \$58.2M FOR LEGAL FEES RELATED TO GULF OF MEXICO OIL SPILL. The [AP](#) (10/14, Press, 6.76M) reports that as part of BP's record \$20 billion settlement between the federal government and Gulf Coast states over the 2010 Gulf of Mexico oil spill, the oil company will reimburse the Louisiana Attorney General's Office \$58.2 million for "expenses, fees, and litigation costs."

SHELL DRILL VESSELS DEPART FROM ARCTIC WATERS. In continuing coverage, the [AP](#) (10/14, Joling, 2.28M) reported that two of Royal Dutch Shell's drill vessels, the Noble Discoverer and the Polar Pioneer, "have safely departed Arctic waters for the Pacific Northwest." Following a Coast Guard inspection, the Noble Discoverer departed Dutch Harbor in the Aleutian Islands on Monday "for the Port of Everett in Washington state, Shell spokesman Curtis Smith said." The Polar Pioneer "reached Dutch Harbor on Monday afternoon" along with two tug boats, and will be towed to Port Angeles. The AP reported that "the next destinations for both vessels have not been determined, Smith said."

The [Seattle Post-Intelligencer](#) (10/13, Connelly, 560K) reported that the Polar Pioneer "will not be returning to Seattle, where it was greeted last April by a seaborne protest of 'kayactivists' including local politicians." Shell "has not requested any exclusion zone around the vessels, as it did last spring." Shell "is promising a less dramatic return journey than in December of 2012," when it "tried to tow the conical drilling vessel Kulluk across the Gulf of Alaska in the teeth of an early winter storm." The Kulluk "broke loose from its tow lines and went aground New Year's Eve on an island near Kodiak."

America's Great Outdoors:

Bureau of Land Management:

BLM RELEASING REPORT ON CHALLENGES TO SAGE GROUSE PLANS. The [Greenwire](#) (10/12, Subscription Publication) reports that the BLM is "releasing documents detailing the agency's reasons for rejecting challenges by five Western governors to federal greater sage grouse plans designed to protect grouse habitat in the Great Basin and Rocky Mountain regions." The bureau's "27-page protest response report, set to be formally published in tomorrow's Federal Register, highlights point by point the problems the Republican governors of Idaho, Nevada, North Dakota, South Dakota and Utah have with the federal plans the Obama administration finalized last month." Also, "in the case of Utah, BLM's response likely points to the state continuing its challenge of BLM's grouse plans in federal court, according to a senior aide for Gov. Gary Herbert." BLM Director Neil Kornze "specifically rejects each of the issues raised by the governors as part of their formal review of the plans' consistency with state and federal laws and regulations." The article notes that "BLM state directors in each of the five states had already rejected the challenges in August, and the report detail's Kornze's reasoning for upholding those rejections."

The [Salt Lake \(UT\) Tribune](#) (10/13, 492K) reports that Utah officials say the BLM "disregarded a workable state conservation plan and ignored the most reliable science to justify 'draconian and unnecessary' restrictions on energy development, including coal mining." According to the article, "the federal sage grouse rules will make surface mining development impossible in areas designated as priority grouse habitat, the

state believed, and went as far as anything to protect state's sage grouse populations, etc.

The [Elko \(NV\) Daily Free Press](#) (10/14, 22K) reports that “exploration for minerals in most of Elko County may have been killed by the new land use rules concerning sage grouse, according to county officials and Division of Minerals Administrator Richard Perry.” According to Perry and the county, “the key factor in stopping the listing may be a detriment to rural economies.”

Investment Bank Seeks Deals In Wildlife Conservation. The [Washington Business Journal](#) (10/13, Subscription Publication, 112K) reports that “Ashley Allen, the CEO and founder of 18-month-old investment bank i2 Capital, has worked alongside her nine employees to structure a \$25 million deal for a conservation bank and investment vehicle to protect the habit of the brown-and-white, spikey-tailed Sage Grouse.” Under the deal, the BLM will “place a credit value on the maintenance of the Sage Grouse and the complicated water ecosystem within the preserve,” and “developers looking to offset their environmental impact — either out of conscience or because they are required to do so by law or agreement — buy those credits.” Then, “investors buy ‘shares’ of the conservancy financing vehicle and over time are paid returns from the credits purchased by companies.” The article notes that “some of the funds are used to maintain the Sage Grouse habitat and protect and restore waterways on the preserve instead of the state or federal government spending public funds.”

Sage Grouse Plans Criticized. In an op-ed for the [Missoulian \(MT\)](#) (10/14, 116K), George Wuerthner, an ecologist and former BLM biologist/botanist, writes that “the decision to preclude sage grouse from protection of the Endangered Species Act was a politically based decision designed to protect existing exploitative industries like oil and gas and livestock grazing, rather than save the bird from extinction.” Furthermore, he says that the BLM “regulatory plans rely on changes that ‘may’ be made in the allotment management plans when they are renewed.” But he notes that, “these plans are only renewed every 10 years,” and “due to a rider attached to the defense budget euphemistically titled ‘The Grazing Improvement Act,’ grazing permits can be reauthorized for another 10 years under the same terms and conditions without any additional environmental review.” Wuerthner concludes that “all this about grazing management plans being modified for the grouse is a bunch of happy talk because the BLM simply will not have the guts to do much more than minor changes – if they even get around to it.”

MASSIVE SODA FIRE REHABILITATION EFFORT UNDERWAY. The [AP](#) (10/14, 2.28M) reports that “a federal plan to rehabilitate 436 square miles of scorched rangeland in southwestern Idaho and eastern Oregon containing important sage grouse habitat and grazing land for ranchers calls for spending about \$67 million over 5 years.” The BLM “released the 71-page plan late last week that includes massive plantings of grasses, several types of flowering plants known as forbs, and shrubs, with more than \$26 million being spent on seeds and seed planting.” The effort follows the FWS’ “decision last month that sage grouse don’t need protection under the Endangered Species Act because of conservation efforts taking place in multiple states.”

Additional coverage was provided by the [Spokane \(WA\) Spokesman-Review](#) (10/13, 183K), [ABC News](#) (10/14, 3.97M), the [Minneapolis \(MN\) Star Tribune](#) (10/14, Ridler, 1.19M), the [Beatrice \(NE\) Daily Sun](#) (10/14, 14K), the [New York \(NY\) Times](#) (10/14, Press, Subscription Publication, 11.82M), the [Washington \(DC\) Post](#) (10/14, Keith Ridler |, Ap, 6.76M), and the [Miami \(FL\) Herald](#) (10/14, 651K).

COMPANY ORDERED TO STOP AERIAL PESTICIDE SPRAYING. The [Eugene \(OR\) Register-Guard](#) (10/14, 172K) reports that “the Oregon Department of Agriculture has received a temporary restraining order to stop a company from conducting aerial pesticide spraying on private timberlands.” The order “comes after the state last month suspended Applebee Aviation’s pesticide operator license over worker protection violations.” But “despite the suspension, Applebee Aviation performed aerial applications.” According to court documents, “owner Mike Applebee told regulators his company continued spraying without a license because he had a \$3 million dollar contract with the Bureau of Land Management and ‘felt pressure to get the job done.’”

Additional coverage was provided by [KATU-TV Portland \(OR\)](#) Portland, OR (10/14, 134K).

ADDITIONAL COVERAGE OF NEW BLM INTERACTIVE MOUNTAIN BIKE MAPS. Additional coverage of the new BLM interactive mountain bike maps was provided by the [St. George \(UT\) News](#) (10/13, 3K).

Fish and Wildlife Service:

FWS, LULAC SIGN HISTORIC PARTNERSHIP AGREEMENT. The [AmmoLand](#) (10/14, 6K) reports that the

FWS has signed an historic partnership agreement with the oldest and largest Latino advocacy organization in the United States, the League of United Latin American Citizens (LULAC).” According to the article, “the organizations will work together to engage Latino families in outdoor recreational sports on public lands and raise awareness and action on wildlife conservation issues that impact Latino health.” FWS Director Dan Ashe said, “Prudent planning for wildlife conservation efforts require us to prepare and adjust for the future. The American public is becoming increasingly urban and diverse – and disconnected from the outdoors – and it is incumbent on us to bridge the divide between communities and nature. The disconnection to nature and outdoor recreational activities has profound implications for the health and well-being of our citizens and the future of our nation. Our partnership with LULAC – an organization with a strong history of community leadership and civic engagement – will help us create meaningful connections between people and the great outdoors benefiting the environment and the American public.”

CONSERVATION EFFORT TO HELP MONARCH BUTTERFLY ANNOUNCED. The [Dallas Morning News](#) (10/14, 1.15M) reports that “in the midst of the monarch butterfly migration season across Texas, state and federal officials joined Laura Bush Tuesday morning to announce a conservation effort to help repopulate – and sustain- the species’ population.” FWS Director Dan Ashe said, “The fact that they are declining tells us something about how we are taking care of the planet. We can do better and this is something we can do. We can do it without regulation and we can do it by working together.”

FWS PLANS STATUS REVIEW FOR POLAR BEAR. The [Greenwire](#) (10/12, Subscription Publication) reports that the FWS “plans to conduct a status review of the polar bear, seven years after the species was listed as threatened under the Endangered Species Act.” The article notes that “such reviews are routine, though they are supposed to come every five years.” FWS officials will “look at new scientific and commercial information and decide whether polar bears should remain categorized as threatened, be reclassified as endangered or be removed from the ESA list altogether, which is an unlikely scenario.”

PETITION SEEKING EMERGENCY LISTING FOR PRINCE OF WALES ISLAND WOLVES DENIED. [KRBD-FM](#) Ketchikan, AK (10/13) reports that “a petition asking for emergency Endangered Species Act listing for Prince of Wales Island wolves was essentially denied by the U.S. Department of the Interior office in Anchorage.” According to the article, “six conservation groups asked in mid-September for the emergency listing, citing a state study that shows a steep drop in the number of Alexander Archipelago wolves on Prince of Wales and nearby islands.” But “in a letter effectively denying the emergency ESA request, Assistant Regional Director Mary Colligan writes that an emergency listing is not something that can be petitioned by outside groups, and is a process ‘left to the discretion of the Secretary of the Interior.’”

ZIMBABWE WON’T CHARGE KILLER OF CECIL THE LION. The [Greenwire](#) (10/12, Subscription Publication) reports that “Walter Palmer, the American dentist who killed famed lion Cecil in July, will not face charges in Zimbabwe.” Zimbabwe Environment Minister Oppah Muchinguri-Kashiri said Palmer, “whose slaying of the prized 13-year-old lion triggered an international online firestorm, obtained legal authority to conduct the hunt.” Muchinguri-Kashiri said, “We approached the police and then the prosecutor general, and it turned out that Palmer came to Zimbabwe because all the papers were in order.”

Additional coverage was provided by [Reuters](#) (10/12, Dzirutwe), the [Washington \(DC\) Times](#) (10/13, Blake, 344K), the [Boston \(MA\) Herald](#) (10/14, 548K), [US News & World Report](#) (10/12, 811K), the [Washington \(DC\) Post](#) (10/12, Farai Mutsaka |, Ap, 6.76M), the [Atlanta \(GA\) Journal-Constitution](#) (10/14, 1.05M), the [Knoxville \(TN\) News Sentinel](#) (10/14, Mutsaka, Press, 235K), [PBS NewsHour](#) (10/14, 127K), [NPR](#) (10/13, 1.85M), the [Daily Mail \(UK\)](#) (10/12, Ap, 5.59M), and the [Telegraph \(UK\)](#) (10/14, 986K).

CHEVRON MOLYCORP REACHES SETTLEMENT OVER QUESTA MINE RELEASE. The [Los Alamos \(NM\) Daily Post](#) (10/14) reports that “Natural Resource Trustees and Chevron Molycorp Inc. reached a \$4 million settlement to restore natural resources injured as a result of releases of hazardous substances from the Chevron Molycorp mine facility in Questa.” The Trustees will “use the money to implement restoration projects that benefit natural resources through the implementation of restoration projects that have yet to be specifically selected.” Dr. Benjamin Tuggle, Southwest Regional director for the FWS, said, “On behalf of the federal agencies, I would like to express my gratitude to all those who have collaborated to achieve this settlement agreement. Because of this agreement we will be able to address the injuries to our trust resources and identify restoration projects that will enhance important habitat for native fish and wildlife.”

FWS INVESTIGATING KACHEMAK SEA OTTER DEATHS. The [Alaska Public Radio Network](#) (10/13, 2K) reports that officials with the FWS say “the agency has received about 200 reports of sick or dead otters over

the past couple of months. The agency has teamed up with the Alaska Sea Life Center in Cordova and they're running tests to try to find out the cause."

CONSERVATIONISTS SEEK TO PUT IVORY BAN INITIATIVE ON OREGON BALLOT. The [Greenwire](#) (10/13, Subscription Publication) reports that "conservation groups are trying to gather 88,184 signatures in Oregon to put an initiative banning the buying and selling of ivory and endangered wildlife products on the November 2016 ballot." The Humane Society of the United States is "spearheading the Oregon campaign backed by numerous other groups, as well as Rep. Earl Blumenauer (D-Ore.), Portland Metro Council President Tom Hughes and former state Sen. Bruce Starr (R)." Scott Beckstead, Oregon director of the Humane Society of the United States, said "Microsoft co-founder Paul Allen has agreed to help in Oregon but declined to provide something close to the more than \$1.7 million he spent on a similar ballot measure in Washington state."

Additional coverage was provided by the [Voice of America](#) (10/14, 32K).

Consumer Education Important To Combating Illegal Wildlife Trafficking. The [Huffington Post](#) (10/14, Clark, 164K), Jamie Rappaport Clark, President & CEO, Defenders of Wildlife, writes that "if we're ever going to put a stop to the smuggling of illegal wildlife, we've got to make the United States an unappealing target for traffickers." Clark says that "we need to make sure our ports of entry have adequate capacity for the detection and deterrence of illegal shipments at our borders and treat wildlife trafficking as a serious crime." According to Clark, "educating consumers on what to look for to avoid illegal items is an important part of this process."

FLORIDA STAGING 2016 PYTHON CHALLENGE. The [Washington Post](#) (10/14, Fears, 6.76M) reports that "Florida is staging the 2016 Python Challenge, its second big hunt in three years for serpents that invaded the Everglades a few decades ago and are now vying with alligators for supremacy atop the food chain." According to the article, "when the last python challenge was held about three years ago, nearly 1,600 people showed up" but "only 68 snakes were caught." The article notes that "media commentators and other naysayers denounced the 2013 hunt as a failure because relatively few snakes were killed." However, "for the Florida Wildlife Conservation Commission, that was so much nonsense."

CLARKSBURG WATER BOARD WILL GO FOWARD WITH WEST FORK DAM REMOVAL. The [Clarksburg \(WV\) Exponent-Telegram](#) (10/14, 41K) reports that "as expected, the Clarksburg Water Board on Tuesday rejected a request from the Harrison County Commission to terminate an agreement authorizing the removal of three dams." According to the article, "the water board's 3-0 vote not to breach its agreement with the U.S. Fish and Wildlife Service sinks any chances that the county commission will take over the dams, virtually assuring the removal of the West Fork River structures."

Additional coverage was provided by [WBOY-TV Clarksburg \(WV\)](#) Clarksburg, WV (10/14, 30K) and [WDTV-TV Bridgeport \(WV\)](#) Bridgeport, WV (10/14, 13K).

ARIZONA TO ESTABLISH NEW BISON HERD IN CONSERVATION EFFORT. The [Arizona Capitol Times](#) (10/13, 599) reports that "Arizona officials are embarking on an effort to help conserve the American bison." The Game and Fish Department said state officials recently signed an agreement with Interior Department officials "to establish a bison herd with genetic lineage from the Wind Cave National Park in western South Dakota."

STUDY: CLIMATE CHANGE WILL REDUCE FISH SPECIES DIVERSITY. The [Christian Science Monitor](#) (10/13, Botkin-Kowacki, 455K) reports on the impact of climate change on the world's fish. Oceans will acidify and fish species diversity will decline, according to a study published Tuesday. Using data from 632 published experiments, "researchers looked at the impact of warming water and acidification on the underwater ecosystems," CSM reports.

STUDY: NATIVE HAWAIIAN BIRDS DECLINING DUE TO CLIMATE CHANGE. The [AP](#) (10/14, 344K) reports that studies by US Geologic Survey biologists show that two bird populations native to Hawaii have declined as the "effects of climate change are being observed sooner than expected." The biologists found that birds at high elevations were more vulnerable, the AP adds.

CONGRESS URGED TO PROTECT ENDANGERED SPECIES. In an op-ed for the [Springfield \(MA\) Republican](#) (10/14, 336K), Michael Bean, Principal Deputy Assistant Secretary for Fish, Wildlife and Parks, U.S. Department of the Interior, writes that "last month, farmers, conservationists and landowners came

together at a small field in Dover, New Hampshire to celebrate the recovery of the New England cottontail. Bean says that “that type of conservation success story can and should be common.” However, he warns that “there are threats to unravel a key ingredient: the Endangered Species Act.” Bean hopes that “the Pope’s visit last month can remind us of the importance of protecting our fellow creatures.”

FEDERAL GOVERNMENT URGED TO VIEW STATES AS PARTNERS WHEN PROTECTING ENDANGERED SPECIES. In an op-ed for the [Sioux Falls \(SD\) Argus Leader](#) (10/13, 163K), Gov. Dennis Daugaard writes that “state governments are routinely left out of the conversation when it comes to ESA decisions.” He says that “time and time again, we have been impacted by unfounded listings and a lack of implementation at the federal level.” Daugaard concludes that “rather than viewing states as unnecessary hurdles, I hope the federal government will come to see the states as partners in accomplishing this goal.”

CONSERVATION PLAN FOR BLACK-FOOTED FERRETS LAUDED. The [Arizona Republic](#) (10/13, 1.12M) editorializes that “last fall, 25 captive-bred endangered ferrets were released near Tin House Camp on Babbitt Ranches’ Espee Ranch.” The paper notes that “the effort was facilitated by a Safe Harbor Agreement with the U.S. Fish and Wildlife Service, which assures a private property owner that specific, limited management or land-use obligations for an endangered species will not be expanded or changed without consent.” The paper says that when recovery “does happen, Arizona’s natural heritage is enriched.”

CONSERVATION PLAN FOR MARBLED MURRELET TO BE PRESENTED. In an op-ed for the [Peninsula \(WA\) Daily News](#) (10/14, 41K), Eric Rickerson, the Washington state supervisor for the FWS, and Kyle Blum, the deputy supervisor for state uplands for the state Department of Natural Resources, write that “on Thursday, the state Department of Natural Resources and the U.S. Fish and Wildlife Service will present a range of options for the long-term conservation of the threatened marbled murrelet on lands managed by DNR.” They “believe a careful balance of forest stewardship and conservation can help protect marbled murrelet habitat in Washington.” The authors conclude that “while the bird’s ultimate destiny as a species is tied to the fate of forests and fish along North America’s entire Pacific coast, Washington is committed to helping the marbled murrelet thrive.”

National Park Service:

NPS PREPARING FOR CENTENNIAL. The [Richmond \(VA\) Times-Dispatch](#) (10/14, 326K) reports that “with its 100-year centennial celebration coming up in 2016, the Park Service has been working hard to cultivate more interest and provide additional opportunities for the community.” According to the article, “with the Park Service’s centennial approaching, it is trying to provide some incentives to younger people to visit its historic sites across the nation.” In 2016, the NPS “plans to provide a free pass to all fourth graders and their families so they visit any national park.”

The [Lowell \(MA\) Sun](#) (10/14, 111K) reports that “on Thursday, Oct. 15, the Youth Ambassador Program (YAP!) and the National Park Service will release the music video for the song ‘Centennial,’ celebrating the 100th anniversary of the National Park Service in 2016.” According to the article, “this summer, Video Producer/Director Ben Gilbarg set out to make a video for the song, hitting the road with YAP! in a van decorated as the ‘History Machine’ and visiting seven national park sites in four states including the Lowell National Historical Park.”

GREAT RIVERS GREENWAY APPROVES ARCH GROUNDS AGREEMENT. The [St. Louis Post-Dispatch](#) (10/14, 968K) reports that “the board of the Great Rivers Greenway public trails district on Tuesday approved an expanded agreement to pay for yearly upkeep on the renovated grounds of the Gateway Arch.” The decision “came after questions were raised about whether Great Rivers’ Executive Director Susan Trautman had improperly signed an agreement with the National Park Service, which owns the park, without prior board approval.” The board “reviewed the agreement on Tuesday and approved it.”

Additional coverage was provided by [KTVI-TV](#) St. Louis (10/13, 321K).

NEW YOSEMITE CONCESSIONAIRE INTRODUCING CHANGES. The [Greenwire](#) (10/12, Subscription Publication) reports that Yosemite National Park “debuted its new recreation plan last week after introducing Aramark Corp. as the new concessionaire in charge of park amenities.” According to the article, “visitors can expect changes starting March 1 to the ice rink, bike rentals, rafting and horseback rentals – amenities many environmentalists had been pressing to eliminate – when Aramark takes over at Ahwahnee, Glacier Point, Yosemite Lodge at the Falls, Wawona, Tuolumne Meadows Lodge, High Sierra Camps and Curry Village.”

The article notes that the popular outdoor ice rink will move to its original location east of Curry Village for its 86th year, and horseback riding will move from Yosemite Valley to less-visited Wawona near Highway 41 and the park's southern boundary."

NPS RENTING QUARTERS 17. The [Greenwire](#) (10/12, Subscription Publication) reports that the NPS is "now accepting offers to rent a refurbished home with an unobstructed view of the Golden Gate and San Francisco." Constructed "in 1963, Quarters 17 housed Coast Guard operators until the Point Bonita Lighthouse was automated and Golden Gate National Recreation Area rangers moved in." According to spokeswoman Alexandra Picavet said, "exposed on a cliffside, the building proved expensive to repair, so park officials have decided to rent it out as 'a unique way to get a return for the taxpayers.'"

NPS TO AID FEATHER RIVER PLANNING PROCESS. The [Oroville \(CA\) Mercury-Register](#) (10/13, 1K) reports that "the city of Oroville has won a National Park Service grant to help finish a master plan for the Feather River and surrounding area." The article notes that "there is no money involved, but the federal agency will provide in-kind technical assistance to aid the Supplemental Benefits Fund committee in completing the Oroville Feather River Consolidated Master Plan."

VETERAN SUES OVER CALIFORNIA PINE CONE INJURY. The [AP](#) (10/14) reports from San Francisco that a Navy veteran "is suing after what his lawyer describes as a 16-pound pine cone fell and crushed his skull in San Francisco." Sean Mace "is suing the U.S. government, the National Park Service, the Department of the Interior and San Francisco Maritime National Historical Park for \$5 million." Mace's attorney, Scott Johnson, "says the veteran was relaxing under a non-native pine tree at the maritime park when the cone fell, causing an irreversible brain injury."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (10/14, 2.28M), the [Los Angeles \(CA\) Times](#) (10/13, 4.07M), the [Hope \(AR\) Star](#) (10/13, 9K), the [Daily Mirror \(UK\)](#) (10/14, 742K), the [Minneapolis \(MN\) Star Tribune](#) (10/14, Press, 1.19M), [Fox News](#) (10/13, 8.91M), the [Seattle \(WA\) Times](#) (10/14, 962K), the [Denver \(CO\) Post](#) (10/14, 787K), the [Washington \(DC\) Post](#) (10/14, Press, 6.76M), the [Washington \(DC\) Times](#) (10/14, 344K), the [New York \(NY\) Daily News](#) (10/14, Chan, 3.75M), the [Daily Mail \(UK\)](#) (10/14, Mailonline, 5.59M), [The Guardian \(UK\)](#) (10/13, 3.3M), [Reuters](#) (10/13, Wallis), [Mashable](#) (10/13, 2.12M), [TIME](#) (10/14, 19.55M), [Money](#) (10/14, 7.29M), [Examiner](#) (10/14, 1.34M), [UPI](#) (10/13), [Yahoo! News](#) (10/14, Wallis, 5.98M), [KTLA-TV Los Angeles \(CA\)](#) Los Angeles (10/13, 283K), and [KPIX-TV San Francisco \(CA\)](#) San Francisco (10/13, 116K).

US Geological Survey:

U.S. BOARD ON GEOGRAPHIC NAMES KEEPS TRACK OF EVER CHANGING WORLD. The [Washington Post](#) (10/14, Badger, 6.76M) reports that the U.S. Board on Geographic Names "maintains a single repository of the definitive name and location of nearly every significant feature worth mapping in the United States." The article notes that "by the end of the last fiscal year, the BGN's domestic names database included more than 2.7 million names, spanning the country's towns and schools, airports and islands, streams and more." And "more than 12,000 were added that year alone, reflecting a national map that hasn't stopped evolving, even if we long ago believed we'd discovered everything."

SPRING COULD COME THREE WEEKS EARLIER ACROSS US. [TIME](#) (10/14, 19.55M) reports that "spring flowers may arrive as much as three weeks earlier over the next century as climate change drives an earlier end to winters in areas of the United States, researchers say in a new report." Researchers from the University of Wisconsin, USGS and FWS said that "warmer weather earlier in the year might have consequences for farmers as well as wildlife."

STUDY FINDS BERRY HARVESTS IN ALASKA BECOMING LESS PREDICTABLE. The [Kenai \(AK\) Peninsula Clarion](#) (10/12, 18K) reports that "a recent study published by the U.S. Geological Survey found that berry harvests across Alaska may be growing increasingly unpredictable." According to the article, "that doesn't mean that they are disappearing — rather, it means that residents may not be able to forecast which berries will grow each year." Jerry Hupp, "an Anchorage-based research wildlife biologist with the U.S. Department of the Interior and one of the study's authors, said of the 96 responses the researchers received, 67 percent said the berry harvests had declined or become more variable in the last decade."

Top National News:

MEDIA ANALYSES: CLINTON EASILY DEFEATED RIVALS IN LAST NIGHT'S DEBATE. Immediate coverage of the first Democratic presidential debate is solidly favorable toward frontrunner Hillary Clinton, with nearly all analyses agreeing that she had the strong showing she needed. Reports also say Sen. Bernie Sanders helped Clinton out a bit by downplaying the issue of her use of a private email server while secretary of state. Some of the behind-the-scenes focus was on whether Vice President Biden would see a weak Clinton performance as motivation to enter the race. As for candidates Lincoln Chafee, Martin O'Malley, and Jim Webb, what little coverage they receive essentially agrees that none managed to make inroads against the two leading candidates.

[Politico](#) (10/13, Goldmacher, 942K) reports under the headline "Clinton Crushes It" that Clinton "ripped into Sanders in the opening minutes of the debate, going straight after her surging rival for his position on guns," and "beamed wide" when Sanders said, "The American people are sick and tired of hearing about your damn emails." Mark Halperin writes for [Bloomberg Politics](#) (10/14, 247K) that Clinton was "polished" and "found a winning rhythm and confidence after a slightly slow beginning." She "remained at the center of attention and handled it deftly." [CNN](#) (10/14, Diaz, 5.17M) reported on its website that the odds of Clinton's nomination "were the only ones to rise" in Pivotal's Political Prediction Market following the debate, from 65% to 70%, while Sanders' odds remained little changed, but those of a Biden nomination fell from 15% to 11%.

The [Miami Herald](#) (10/14, Mazzei, 651K) reports under the headline "Hillary Clinton Shines In Democratic Debate" that she "reminded voters...why she is the frontrunner" for the nomination, delivering "a more polished and robust performance...than any of her four rivals." [McClatchy](#) (10/14, Lightman, 28K) says Clinton "still has far to go to close the deal," but she "showed important political savvy" in going after Sanders on guns. And [TIME](#) (10/14, Frizell, 19.55M) reported on its website that Clinton emerged from the debate "having given no ground" to her rivals with "a strong performance."

The [New York Times](#) (10/14, Healy, Subscription Publication, 11.82M) writes that "on Tuesday night, after months of political heartburn, things finally started cutting Hillary Rodham Clinton's way." Her debate performance "was so commanding that even her greatest vulnerability," the email issue, "ended up redounding to her benefit. ... All night, the debate played to Mrs. Clinton's advantage and to her opponents' limitations." By the close of the debate, Clinton "had seized every opening to try to accomplish her chief goal: re-establishing trust with Democrats."

Writing for [USA Today](#) (10/14, 5.23M), Susan Page says that Clinton "has done this before. And it showed." She "moved to regain her footing," and "aggressively turned back criticism over her vote to authorize the use of force in Iraq by noting it had been a chief attack by rival Barack Obama in the 2008 campaign – and that he then asked her to serve as his secretary of State." Paul Singer wrote in a [USA Today](#) (10/14, 5.23M) blog post that Clinton "scored a huge applause line" when Chafee "suggested her email problem indicates she does not have strong ethical standards. Asked by moderator Anderson Cooper whether she wanted to respond, Clinton simply said 'No.'"

Jake Tapper said on [CNN](#), "I think Hillary Clinton showed this evening that she is indeed the most experienced debater and that practice and preparation for debates does indeed matter. She was very polished, she had answers ready for all of the charges coming her way. She was also given a big assist by Bernie Sanders. ... But I think Sanders obviously showing his fans out there the issues that he has been fighting for decades."

John King said on [CNN](#) (10/13, 11:04 p.m. EDT, 5.17M) that Clinton's "team is ecstatic. They believe she showed the poise she needed to show and that she had a sense of humor at times but was not afraid to mix it up."

David Axelrod said on [CNN](#) (10/14, 11:10 p.m. EDT, 5.17M) that Clinton "did very, very well. I said before the debate that if presidential elections were decathlons, this was her event. I think she showed why. If I were her campaign, I would be thrilled with what she did here tonight."

Steve Kornacki of the Daily Beast said on [MSNBC](#) (10/13, 11:01 p.m. EDT, 545K), "It's a good night for Hillary Clinton. ... There was a question about Vladimir Putin and Russia that Bernie Sanders was stumbling around. This is not the Bernie Sanders people have come to know."

Jonathan Alter said on [MSNBC](#) (10/13, 11:03 p.m. EDT, 545K) that Biden "really has to have an opening and a groundswell for him to get into this thing. ... Hillary was scoring not just in the exchanges with Sanders, but

with the audience, which was women that she needs to hold and women who feel very strongly on the gun issue. She scored points with them tonight.”

The [AP](#) (10/14) reports that “while the five candidates onstage took issue with each other, they also repeatedly sounded traditional Democratic themes – such as fighting income inequality – that are sure to carry over to the general election campaign.” The [New York Times](#) (10/14, Barbaro, Chozick, Subscription Publication, 11.82M) says Clinton “aggressively questioned” Sanders’ “values, positions and voting history...in a series of sometimes biting exchanges.”

The [Washington Post](#) (10/14, Fahrenthold, 6.76M) reports that the early part of the debate “focused on the two front-runners: the standout moments all involved Clinton or Sanders, either as the speakers or the targets of attacks. O’Malley, trying desperately to stand out, had his most memorable moments criticizing Sanders for not doing enough to limit gun purchases.” At one point, Webb “complained of not being called on at all.” The [Wall Street Journal](#) (10/14, McCain, Nicholas, Meckler, Subscription Publication, 5.95M) says the debate was combative, but focused mainly on policy, not on personalities – in contrast with the first Republican debates.

The [Des Moines \(IA\) Register](#) (10/14, Jacobs, 5.23M) reports Clinton “refused to be a punching bag” in the debate, while Sanders “skipped the pleasantries of introducing himself at the debate’s outset and blasted right into a critique of a campaign finance system that’s ‘corrupt and is undermining American democracy.’” Chafee, O’Malley, and Webb “seemed to struggle to prove they’re not just part of a weak Democratic bench.”

The [Las Vegas Sun](#) (10/14, Lucas, Messerly, Roerink, 199K) reports that “next door to the Wynn Las Vegas, more than 200 Clinton supporters...cheered on their candidate,” and “the crowd applauded Clinton as she touted her record as secretary of state, pushed for equal pay for women and came down on gun control.” The [Las Vegas Review-Journal](#) (10/14, Hartley, 378K) says Clinton had the most to lose in the debate, while Sanders sought to cement his recent surge.

Larry Sabato writes in his [Crystal Ball](#) (10/14, 4K) column that Clinton “was a clear winner in Tuesday night’s debate and likely will be covered as one.” Her “deep experience in debates shone brightly,” and “she was better than at any joint forum in her previous campaign.” If Biden “was looking for a reason from Tuesday night to run, he’ll have to find it elsewhere.”

The [Huffington Post](#) (10/13, 164K) said Clinton “pulled the gender card” and “leaned heavily into what she called an ‘obvious’ difference between her and the majority of presidential candidates, but was careful to note that there was more to her candidacy than gender.” She said, “I can’t think of anything more of an outsider than electing the first woman president, but I’m not just running because I would be the first woman president. I’m running because I have a lifetime of experience in getting results and fighting for people, fighting for kids, for women, for families, fighting to even the odds, and I know what it takes to get things done.”

James Robbins writes in his [USA Today](#) (10/14, 5.23M) column that Clinton “is going to win the Democratic nomination because her major challengers are unwilling to attack her where she is most vulnerable – the character question.” He says her rivals “need to throw some sharp elbows to prove they are actually running for president, and not simply competing for lesser cabinet posts in the Hillary Clinton White House.”

In a more critical account, the [Washington Times](#) (10/14, Miller, 344K) says Clinton “was taken to task...on her flip-flopping record,” but even the Times says “she pushed back forcefully by saying she always remained true to her ‘values and principles.’” The [Los Angeles Times](#) (10/14, 4.07M), meanwhile, says Clinton “defended herself against charges that she has shifted various positions out of political expediency, saying that she, like most people, adapts to changing circumstances.”

SiriusXM host Ari Rabin-Havt writes in a [USA Today](#) (10/14, 5.23M) op-ed that the debate was a victory for the party as a whole, since the candidates “avoided answers that included insults, misogyny or phony bravado” and instead focused on “their distinct approaches to public policy.” He says the party should “immediately add more contests to the calendar.”

Two of the three broadcast networks led their Tuesday evening newscasts with previews of the debate that hyped the event but that dealt mainly with punditry and past candidate comments. [ABC World News](#) (10/13, lead story, 3:10, Muir, 5.84M) said a “high-stakes Democratic showdown” was on tap, while [NBC Nightly News](#) (10/13, lead story, 2:55, Holt, 7.86M) called it “politics without a net” where “a single slip or trip could make for a hard fall.” The [CBS Evening News](#) (10/13, story 2, 2:35, Pelley, 5.08M), which led with an unrelated story,

was more measured in its report, saying it's the Democrats' debate about, with Clinton facing her closest rival."

In a [New York Times](#) (10/14, Subscription Publication, 11.82M) cartoon that appears today but that was drawn before the debate, Patrick Chappatte shows the candidates crowded onto the stage, with a cameraman urging them to "move to your left" – which shoves Clinton off the stage. William Galston writes in his [Wall Street Journal](#) (10/14, Subscription Publication, 5.95M) column that half of the Democrats who are expected to vote in the party's nominating process are liberals, while the share of self-described moderates in the party has continued to decline.

Over 2.3 Million Tweets About Debate. There were [more than 2.3 million tweets](#) about the debate on Twitter, where praise for Clinton and Sanders was strong. Paul Begala [tweeted](#), "Somewhere @realDonaldTrump is sweating bullets in an expensive Chinese-made suit after watching @HillaryClinton crush it." Fox News [tweeted](#) a quote from conservative pundit Tammy Bruce "on why @HillaryClinton won #DemDebate: 'She was in a room with a bag of rocks so you have to win.'" However, Republican presidential candidate Mike Huckabee [tweeted](#), "I trust @BernieSanders with my tax dollars like I trust a North Korean chef with my labrador!" – which was retweeted more than 6,000 times. (Clinton has 4.47 million Twitter followers to Sanders' 704,000, O'Malley's 94,000, Chafee's 22,000, and Webb's 18,900.)

The debate was also [trending on Facebook](#), where Republican candidate Jeb Bush posted, "It's clear that Hillary Clinton and the rest of the Democrats on stage tonight are running for President Obama's third term – more taxes, more spending and more failed foreign policy." And Huckabee wrote, "SHARE if you agree that any Republican candidate for President would do a better job than any of these liberals on stage tonight!"

The [Washington Times](#) (10/14, Dinan, 344K) reports Republican candidate Trump [live-tweeted](#) the Democratic debate, which he said would be "boring" even before it started. [Politico](#) (10/13, Schreckinger, 942K) offers some of "his most memorable tweets of the night." Among them: "Notice that illegal immigrants will be given ObamaCare and free college tuition but nothing has been mentioned about our VETERANS"; "Sorry, there is no STAR on the stage tonight!"; "All are very scripted and rehearsed, two (at least) should not be on the stage"; and "Get rid of all of these commercials."

Sanders Led Online Searches For Candidates During Debate. The [Chicago Sun-Times](#) (10/14, Merda, 1.08M) reports that Sanders won on the Internet, where "Google data showed that for a majority of the debate, search interest in Sanders was crushing his opponents, with it more than double that of his Clinton and Donald Trump. ... Sanders also crushed it on Twitter, gaining the most followers than anyone else, more than twice that of Clinton." Google Politics [said on Twitter](#) that search interest in Sanders "spiked 193x from 4 hours ago and the start of" the debate.

Clinton Cites Obama On Foreign Policy. [Politico](#) (10/13, Crowley, 942K) reports that Clinton "twice invoked President Obama to defend her foreign policy record at Tuesday's Democratic debate, though he might not be entirely happy about how she did it." In addition to noting that though then-candidate Obama criticized her 2002 vote to authorize the Iraq war, he later made her secretary of state, she also "drew a contrast with the president's response to Vladimir Putin's military intervention in Syria."

Candidates Vow To Do More On Climate Change Than Obama Has. The [Washington Times](#) (10/14, Wolfgang, 344K) reports that all of the candidates except Webb "vowed Tuesday night to go further than President Obama in fighting climate change," and O'Malley and Sanders "said the administration's 'all-of-the-above' energy strategy is a mistake."

Biden Watched Debate From Home In Washington. The [Huffington Post](#) (10/13, 164K) reports Biden "ended speculation that he would make a surprise appearance" at the debate "by announcing that he would be hosting a high school reunion that evening" at the Naval Observatory, and would then watch the debate from there. [ABC World News](#) (10/13, story 2, 1:55, Muir, 5.84M) reported that "they saved a podium for him" anyway. ABC's Jonathan Karl added, "Tonight, Vice President Biden's supporters have a message: Don't count Joe out. He might still run." But "even some of Biden's supporters are privately growing irritated by his indecisiveness. As one told ABC News, the window is closing quickly."

[McClatchy](#) (10/13, Clark, 28K) reports that Draft Biden launched "a second ad encouraging him to run" Tuesday. But on [NBC Nightly News](#) (10/13, story 2, 1:15, Holt, 7.86M), Chuck Todd said, "He has to have a rationale for running. It is not whether or not Hillary Clinton is faltering or Bernie Sanders is pulling support

away. He had to have his own rationale.

Earnest Said Tuesday Obama May Flip Between Debate And Baseball Playoffs. [McClatchy](#) (10/14, Clark, 28K) reports White House Press Secretary Josh Earnest said Tuesday that President Obama planned to watch the debate “and America’s other pastime, baseball.” Earnest

Good afternoon all,

Attached please find the final release regarding Deputy Secretary Connor's visit to California for a public discussion on desert conservation for embargoed notifications. This will go out at 7 PM EDT.

Below are a few clips as well.

Thanks,
~Leah

[DESERT MONUMENTS: Hundreds show up at Feinstein hearing](#)

The Press Enterprise // October 13, 2015

Hundreds of people lined up before a Tuesday meeting called by U.S. Sen. Dianne Feinstein to allow the public to voice their opinions on her request that President Barak Obama establish three national monuments in the California desert. Members of labor unions, environmental groups and health foundations crowded under and around a white tent at the Whitewater Preserve north of Interstate 10 several hours before the event was to begin. They represented both sides of the issue. Xavier Morales, executive director of the Latino Coalition for a Healthy California came from Sacramento to speak in favor of the establishing protections for more than 1 million acres in the Mojave Desert. "For us, it's a health issue," Morales said. "Many of our communities are park

poor. A fourth of the state's population lives within a 30-minute drive of the proposed monuments, and a higher percentage of Latinos and minorities suffer from diabetes, he said. Add to that that under-resourced communities have about one-fourth of the parks that wealthier communities have.

[Feinstein to Discuss 'National Monuments' in Whitewater](#)

Patch.com // AUTUMN JOHNSON // October 13, 2015

Sen. Dianne Feinstein, D-Calif., is scheduled to appear at a public meeting in Whitewater Tuesday to discuss designating the desert areas of Mojave Trails, Sand to Snow and Castle Mountains as national monuments. The event, organized by Campaign for the California Desert, is scheduled for 1 p.m. at the Whitewater Preserve, 9160 Whitewater Canyon Road. Feinstein will be joined by U.S. Department of Interior Deputy Secretary Mike Connor, Undersecretary of Agriculture Robert Bonnie and other senior officials from the Obama administration. Members of the public will be also be allowed voice their opinions on the need to permanently protect the public desert lands. The national monument designation is designed to protect public lands with unique scientific, cultural, natural and historic features, while allowing compatible uses, like outdoor recreation and ranching. For more information, visit californiadesert.org.

[Sen. Feinstein in Whitewater today to propose 3 new national monuments](#)

The Sun // October 13, 2015

Sen. Dianne Feinstein will join federal officials this afternoon in Whitewater to talk about the community's vision for management of public lands in the Southern California desert and her proposal for three new national monuments. The senator will be joined by Michael Connor, U.S. deputy secretary of the Interior; Robert Bonnie, U.S. Department of Agriculture under secretary for Natural Resources and Environment; as well as other federal, state, local and tribal officials, according to a statement from senator's office. The meeting is open to the public and set for 2 p.m. at the Wildlands Conservancy's Whitewater Preserve, near Palm Springs. Feinstein sent a letter to President Barack Obama on Aug. 3 requesting he use his authority under the Antiquities Act to designate three new national monuments: Mojave Trails, Sand to Snow and Castle Mountains.

[Feinstein Holds Public Meeting on Three Proposed National Monuments in CA](#)

Public News Service // October 13, 2015

PALM SPRINGS, Calif. - Senator Dianne Feinstein is drumming up support for three proposed national monuments in the southern California desert by holding a public listening session this afternoon at the Whitewater Preserve near Palm Springs. She introduced a bill earlier this year, the California Desert Conservation and Recreation Act of 2015, that would, among other things, create the Sand to Snow and Mojave Trails National Monuments in areas that are home to the endangered desert bighorn sheep and the threatened desert tortoise. Stephanie Dashiell, a California representative with the nonprofit "Defenders of Wildlife," says Mojave Trails in particular is crucial to the survival of the desert tortoise, which has lost 90 percent of its population in some areas.

[Valley Voice: Residents demand new desert monuments](#)

Desert Sun // Lani Miller // October 12, 2015

Rep. Cook clearly misreads the mood in the Coachella Valley regarding the designation of desert lands for permanent protection, ie National Monuments. He underestimates our understanding of these issues and our involvement in them. Before he was elected, our county and city

governments, and supporters which include business owners, veterans, local fair traders, anglers, historians, Native Americans, conservationists, and outdoor enthusiasts, among others, had already been developing and refining the California Desert Protection Act of 2010 and 2011. In fact the process of researching and creating the campaign to gain National Monument status for the federal lands discussed, has been in process for at least a decade.

Interior, USDA Officials Join U.S. Senator Dianne Feinstein for Public Meeting on Conservation of Mojave Desert

*Officials hear from local and tribal communities on Feinstein's proposals to
conserve Southern California's Mojave Desert public lands*

WHITEWATER, Calif. – U.S. Deputy Secretary of the Interior Michael Connor and USDA Under Secretary Robert Bonnie today visited the Mojave Desert of California to join a public meeting and hear from the community about its vision for the management of public lands in the region.

Connor and Bonnie visited California at the invitation of Sen. Feinstein, [who has introduced legislation](#) to conserve portions of the Mojave Desert and enhance public recreational access. Sen. Feinstein has also asked President Obama to use his authority under the Antiquities Act to designate three new national monuments – Mojave Trails National Monument, Sand to Snow National Monument, and Castle Mountains National Monument.

“The Mojave Desert of Southern California is a resource beloved by millions of Americans for its stark beauty, rich cultural history and outdoor recreational opportunities,” said Deputy Secretary Connor. “For more than 20 years, Sen. Feinstein has led the charge to protect the most special places in the desert, and we support her efforts to preserve these areas for the benefit of future generations. Opportunities like this to hear directly from the local and tribal communities about their vision for conservation and land management are essential to our work as land managers.”

“In addition to its diverse tribal heritage, the San Geronio Mountain region serves as an important recreational hub for the 24 million people that are within a two-hour drive,” said Bonnie. “We appreciate hearing from such a broad range of voices today and we look forward to working with all interested parties as the dialogue continues.”

Today's visit builds on U.S. Senator Dianne Feinstein's decades-long effort to protect the most special places of the California desert and San Bernardino Mountain range and contributes to the Obama Administration's ongoing work to support locally-driven efforts to preserve and protect places that hold special meaning to communities across the country.

"In my view, the California desert is an American treasure that is highly worthy of preservation. I think the public meeting today only further proved that," Sen. Feinstein said. "Public input in desert conservation is absolutely vital. I've worked with the desert stakeholders for years, and I know how diverse their views are—which makes discussions like these even more important. I'm especially grateful that Deputy Secretary Connor and Under Secretary Bonnie attended and were able to hear local goals for the desert, and I thank the Obama administration for considering these monuments."

Senator Feinstein's proposal would protect more than one million acres in San Bernardino County as the Mojave Trails National Monument. The area, known for its spectacular vistas and intact stretch of historic Route 66, would connect the Mojave National Preserve to the north with Joshua Tree National Park to the south. The Sand to Snow National Monument would span up to 140,000 acres from the snowy mountain peaks of the San Bernardino National Forest to the desert sands of Joshua Tree National Park, including some of the most biologically and culturally rich areas in southern California. The Castle Mountains National Monument would add 20,000 acres of key desert grassland to be managed by the National Park Service as a part of the Mojave National Preserve while respecting existing mining operations in the area.

Today's public meeting included speakers from area tribes, local governments, off-highway vehicle users, and conservation organizations. The meeting also provided ample opportunity for public comment.

As part of their visit, Deputy Secretary Connor and Under Secretary Bonnie, alongside other state and local community members, toured portions of the proposed monument area within the Mojave Desert. The California desert provides significant recreation opportunities for local communities, for the nearby Los Angeles and San Diego metropolitan areas, and for visitors from around the world. The area contains opportunities for off-highway vehicle travel, hiking, camping, mountain biking, and rock climbing. These uses would be protected under Sen. Feinstein's proposal.

Interior, USDA Officials Join U.S. Senator Dianne Feinstein for Public Meeting on Conservation of Mojave Desert

*Officials hear from local and tribal communities on Feinstein's proposals to
conserve Southern California's Mojave Desert public lands*

WHITEWATER, Calif. – U.S. Deputy Secretary of the Interior Michael Connor and USDA Under Secretary Robert Bonnie today visited the Mojave Desert of California to join a public meeting and hear from the community about its vision for the management of public lands in the region.

Connor and Bonnie visited California at the invitation of Sen. Feinstein, [who has introduced legislation](#) to conserve portions of the Mojave Desert and enhance public recreational access. Sen. Feinstein has also asked President Obama to use his authority under the Antiquities Act to designate three new national monuments -- Mojave Trails National Monument, Sand to Snow National Monument, and Castle Mountains National Monument.

"The Mojave Desert of Southern California is a resource beloved by millions of Americans for its stark beauty, rich cultural history and outdoor recreational opportunities," said Deputy Secretary Connor. "For more than 20 years, Sen. Feinstein has led the charge to protect the most special places in the desert, and we support her efforts to preserve these areas for the benefit of future generations. Opportunities like this to hear directly from the local and tribal communities about their vision for conservation and land management is essential to our work as land managers."

"The Mojave Desert of Southern California is a resource beloved by millions of Americans for its stark beauty, rich cultural history and outdoor recreation opportunities," said Connor. "For more than 20 years, Sen. Feinstein has led the charge to protect the most special places in the desert, and we support her efforts to preserve these areas for the benefit of future generations. Opportunities like this to hear directly from the local and tribal communities about their vision for conservation and land management is essential to our work as land managers."

TBD PLACEHOLDER QUOTE: “We are supportive of Sen. Feinstein's effort to solicit public comment on her proposal,” said Under Secretary Bonnie. “There appears to be significant public support for this proposal and we look forward to working with all interested parties as this process continues.”

Today’s visit builds on U.S. Senator Dianne Feinstein’s [decades-long effort to protect the most special places of the California desert](#) and contributes to the Obama Administration’s ongoing work to support locally-driven efforts to preserve and protect places that hold special meaning to communities across the country.

Formatted: Font: Not Bold

Comment [JLK1]: We need to keep this linked to what I had linked to previously. Can we put the link back?

“In my view, the California desert is an American treasure that is highly worthy of preservation. I think the public meeting today only further proved that,” Sen. Feinstein said. “Public input in desert conservation is absolutely vital. I’ve worked with the desert stakeholders for years, and I know how diverse their views are—which makes discussions like these even more important. I’m especially grateful that Deputy Secretary Connor and Under Secretary Bonnie attended, and were able to hear local goals for the desert, and I thank the Obama administration for considering these monuments.”

Senator Feinstein’s proposal would protect more than 1 million acres in San Bernardino County as the Mojave Trails National Monument. The area, known for its spectacular vistas and intact stretch of historic Route 66, would connect the Mojave National Preserve to the north with Joshua Tree National Park to the south. The Sand to Snow National Monument would span 140,000 acres from the snowy mountain peaks of the San Bernardino National Forest to the desert sands of Joshua Tree National Park, including some of the most biologically and culturally rich areas in southern California. The Castle Mountains National Monument would add 20,000 acres of key desert grassland to be managed by the National Park Service as a part of the Mojave National Preserve while respecting existing mining operations in the area.

Today’s public meeting included speakers from area tribes, local governments, off-highway vehicle users, and conservation organizations. The meeting also provided ample opportunity for public comment.

As part of their visit, Deputy Secretary Connor and Under Secretary Bonnie, alongside other state and local community members toured portions of the proposed monument area within the Mojave Desert. The California desert provides significant recreation opportunities for local communities, for the nearby Los Angeles and San Diego metropolitan areas, and for visitors from around the world. The area contains opportunities for off-highway vehicle travel, hiking, camping, mountain biking, rock climbing, and hunting. These uses would be protected under the Sen. Feinstein’s proposal.

Sen. Feinstein asks Obama to designate monuments in the Mojave Desert

LA Times // Julie Cart // Oct. 13, 2015

Sen. Dianne Feinstein, champion of the California desert, is asking President Obama to take executive action to protect hundreds of thousands of acres in the Mojave Desert.

Since 2009, Feinstein has been unsuccessfully trying to convince her colleagues in Congress to designate the Mojave Trails, Sand to Snow and Castle Mountains areas as new national monuments. Now, the Democratic senator is calling on Obama to use the Antiquities Act to set aside desert tracts near Mojave National

Preserve and Death Valley National Park.

In a public meeting scheduled for today in Palm Springs, Feinstein and other national, state and local officials will listen to public comment on setting aside the disparate pieces of public land for heightened protection.

All of the land proposed for monument designation is in federal hands and no transfers are required.

Obama has invoked the Antiquities Act sparingly. Most recently he designated the Berryessa-Snow Mountains National Monument in Northern California.

Monument designations can be controversial because they sometimes place restrictions on hunting, off-road recreation and other uses. But Feinstein's proposal would preserve existing recreational activities.

Obama has the option to designate the new monuments without consulting Congress, but Feinstein said she will continue trying to gain support for her legislation.

DOI in the News:

SECRETARY JEWELL ANNOUNCES THAT SAGE GROUSE WON'T BE LISTED AS ENDANGERED SPECIES. The [Greenwire](#) (9/23, Subscription Publication) reports that the Interior Secretary Sally Jewell announced on Tuesday that the FWS will not list the greater sage grouse under the Endangered Species Act. The determination by FWS scientists that a listing is "not warranted" is due to an "epic conservation effort" among federal, state and private partners, according to Jewell. In a prepared statement ahead of the announcement, Jewell said, "This is truly a historic effort – one that represents extraordinary collaboration across the American West."

The [AP](#) (9/23, Press, Subscription Publication, 11.82M) reports that "flanked by the governors of Wyoming, Montana, Nevada and Colorado," Jewell said "at an event near Denver that a massive five-year effort to keep the bird off the endangered and threatened species list had paid off." According to the article, "that includes commitments of more than \$750 million from government and outside interest groups to buy up conservation easements and restore the bird's range."

[Politico Pro](#) (9/22) reports that Jewell said, "I'm optimistic that we have shown that epic collaboration across a landscape guided by sound science is truly the future of American conservation." The [Wall Street Journal](#) (9/23, Carlton, Subscription Publication, 5.95M) reports that Jewell said, "These collective efforts add up to a bright future for the sage grouse."

The [AP](#) (9/23, 2 28M) reports that "a northern Nevada rancher says a more trustful relationship between Western states and Washington helped avoid federal protections for the greater sage grouse that many argued would threaten industry." According to the article, at Tuesday's announcement of the decision, "Duane Coombs says he inherited his father's distrust of the U.S. government but that cooperation between private landowners and federal officials to protect the bird has changed his mind."

The [AP](#) (9/23, 3 97M) reports that "Tuesday's announcement signals that the Obama administration believes it has struck a balance to save the widespread, ground-dwelling birds from extinction without crippling the West's economy." The article notes that "it follows a costly conservation effort, and could help defuse a potential political liability for Democrats heading into the 2016 election."

Decision Draws Mixed Reactions. The [Greenwire](#) (9/22, Subscription Publication) reports that the decision was "hailed as a conservation triumph by many officials and environmentalists but drew immediate threats of lawsuits and a congressional probe."

The [New York Times](#) (9/23, Krauss, Subscription Publication, 11.82M) reports that "environmentalists were divided over whether the measures went far enough to protect the bird from eventual extinction or were simply a sellout to business interests."

[The Hill](#) (9/23, Cama, 471K) reports that "the decision received widespread praise from conservationists and others." David Yarnold, president of the National Audubon Society, said in a statement, "This is a new lease on life for the Greater Sage-Grouse and the entire sagebrush ecosystem." He added, "Unprecedented cooperation by private landowners, states, and the federal government has created a framework for conservation at a scale unique in the world."

However, the [Washington Post](#) (9/23, Fears, 6.76M) reports that WildEarth Guardians, "which had pushed for sage grouse to be listed as endangered, said it appeared industry and its supporters had won." Erik Molvar, a wildlife biologist with the organization, said, "The sage grouse faces huge problems from industrial development and livestock grazing across the West, and now the Interior Department seems to be squandering a major opportunity to put science before politics and solve these problems." Also, "a second group, Defenders of Wildlife, predicted that in the absence of an endangered listing, current plans would fall short."

Meanwhile, the [Washington Examiner](#) (9/23, 213K) reports that "industry groups like the National Rural Electric Cooperative Association, representing the hundreds of power utilities that serve rural America, say Tuesday's determination deserves praise because it endorses a plan put forward by Western governors, and will enable transmission line development to continue in the west."

On the other hand, [USA Today](#) (9/22, Bacon, Rice, 5 23M) reports that the Independent Petroleum Association of America criticized the decision. Dan Naatz, a vice president for the group, said "the sage grouse can be protected without 'unworkable management plans' that harm business." He said, "Despite the numerous private-public partnerships and voluntary conservation efforts to conserve the greater sage grouse and its habitat, America's energy producers – and in turn, the American taxpayers – will suffer from these more-restrictive land management plans."

States Vary In Reactions. [McClatchy](#) (9/23, Cockerham, 28K) reports that House Committee on Natural Resources Chairman Rob Bishop said "new conservation measures being imposed by the Obama administration to protect the bird will still restrict Western development." Bishop said, "Do not be fooled. The announcement not to list the sage grouse is a cynical ploy. With the stroke of a pen, the Obama administration's oppressive land management plan is the same as a listing." Bishop said "he plans to hold a congressional hearing Sept. 30 to look into the issue." Also providing coverage are the [Houston \(TX\) Chronicle](#) (9/23, 2.28M), the [Salt Lake \(UT\) Tribune](#) (9/23, 492K), the [Salt Lake \(UT\) Tribune](#) (9/23, 492K), and [Utah Policy](#) (9/23).

But the [AP](#) (9/23, 2 28M) reports that "a senior congressional Democrat says Republican criticism of the decision not to give federal protections to the greater sage grouse lacks credibility." Rep. Raul Grijalva says "House Republicans attack President Barack Obama when his administration lists a species as endangered and attack him when it decides against a listing, comparing the rhetoric to a game of 'Mad Libs.'"

Meanwhile, the [AP](#) (9/23, 344K) reports that "reaction to the government's decision to deny the greater sage grouse protection under the Endangered Species Act runs the gamut in Nevada, home to some of the best quality remaining habitat in the West and second only to Wyoming in terms of sheer numbers of the bird." Sen. Harry Reid says "the Obama administration should be applauded for the 'unparalleled collaboration' by the Interior Department and 11 western states to avert the listing." But Sen. Dean Heller says "the administration used the 'threat of a listing to get what it really wanted all along' – further restrictions on development through accompanying land use regulations." However, "moderate Republican Gov. Brian Sandoval, who traveled to Denver to join Secretary Sally Jewell for the announcement, says it's a 'huge win.'"

The [AP](#) (9/23, 2 28M) reports that "people in the state with the most sage grouse and energy development in their habitat mostly welcomed Tuesday's announcement by the Interior Department that the birds don't need protection under the federal Endangered Species Act." The article notes that "the decision means Wyoming's coal, oil, gas, uranium and livestock industries won't have to live with the possibility of strict limits to their business out in the sagebrush country." Gov. Matt Mead said, "It provides a path forward for development. It provides a path forward to ensure that habitat is preserved for the sage grouse."

The [AP](#) (9/23, 2 28M) reports that "Montana officials are relieved by the Interior Department's decision not to recommend endangered species protections for the greater sage grouse, but they are critical of the new conservation plans meant to protect the bird's habitat on federal lands." Gov. Steve Bullock has "criticized the BLM plans as being more restrictive than the state's own sage grouse conservation plan." Bullock spokesman Mike Wessler says "state officials will pressure the BLM to adjust its plans to make them more consistent with Montana's."

The [AP](#) (9/23, 2 28M) reports that Gov. C. L. "Butch" Otter says "the federal government replaced transparency with closed-door meetings while deciding to deny protections for the greater sage grouse under the Endangered Species Act." Otter says "the land management schemes drafted by the federal government remain a mystery for property owners and state and local wildlife officials." Otter "warned the issue was far from over."

Coverage by the AP was also picked up by the [San Francisco Chronicle](#) (9/23, Subscription Publication, 3.35M), [ABC](#) (9/23, 3.97M), [Minneapolis Star Tribune](#) (9/23, 1.19M), the [Atlanta \(GA\) Journal-Constitution](#) (9/23, 1.05M), the [Daily Mail \(UK\)](#) (9/23, 5.59M), the [Houston \(TX\) Chronicle](#) (9/23, 2.28M), the [New York \(NY\) Times](#) (9/23, Press, Subscription Publication, 11.82M), the [US News & World Report](#) (9/22, 811K), the [Washington \(DC\) Post](#) (9/23, Mead Gruver J, Ap, 6.76M), the [Washington \(DC\) Times](#) (9/23, Gruver, 344K), the [Quincy \(IL\) Herald-Whig](#) (9/23, 99K), the [Washington \(DC\) Post](#) (9/23, Press, 6.76M), the [Daily Mail \(UK\)](#) (9/23, 5.59M), the [Daily News \(WA\)](#) (9/23, 72K), the [Minneapolis \(MN\) Star Tribune](#) (9/23, Press, 1.19M), the [Dayton \(OH\) Daily News](#) (9/23, 117K), the [US News & World Report](#) (9/22, 811K), the [Houston \(TX\) Chronicle](#) (9/23, 2.28M), the [Washington \(DC\) Post](#) (9/23, Fears, 6.76M), the [Washington \(DC\) Times](#) (9/23, Brown, Gruver, 344K), and the [Somerset County \(PA\) Daily American](#) (9/23, 40K).

SEN. UDALL INTRODUCES LEGISLATION IN WAKE OF GOLD KING MIND SPILL. The [AP](#) (9/23, Press, 787K) reports that "the federal government would be required to identify the most dangerous abandoned mines in the West and make plans to clean them up under legislation introduced Tuesday in response to the spill of millions of gallons of toxic wastewater from a Colorado mine." Sen. Tom Udall "outlined the proposal during a conference call with reporters." Udall said "the main focus would be compensating communities affected by the spill, but another goal is to prevent future environmental disasters."

OBAMA DECLARES CALIFORNIA VALLEY FIRE A MAJOR DISASTER. The [Los Angeles Times](#) (9/23, Rocha, 4.07M) reports President Obama has declared a major disaster for the Valley Fire in California, freeing up "federal assistance for home repairs, replacements and other aid." Gov. Jerry Brown requested the declaration.

Additional Coverage Of Wildfires. Additional coverage of wildfires was provided by the [New York \(NY\) Times](#) (9/22, Schwartz, Subscription Publication, 11.82M), the [Ogden \(UT\) Standard-Examiner](#) (9/22, 105K), [KTVB-TV](#) Boise, ID (8/10, 191K) and [Homeland Security Today](#) (9/23).

ADDITIONAL COVERAGE OF BROWNS CANYON NATIONAL MONUMENT. The [Chaffee County \(CO\) Times](#) (9/23, 9K) reports that "Browns Canyon National Monument was designated by President Barack Obama in February, the capstone to a decades-long grassroots effort to secure permanent protection for the 22,000-acre parcel northwest of Salida." The article notes that "a dedication ceremony was held for Browns Canyon in June," and "speakers included Colorado Gov. John Hickenlooper, U.S. Secretary of the Interior Sally Jewell, and U.S. Senator Michael Bennet, among many other state, federal and local representatives."

CONGRESS URGED TO REAUTHORIZE LAND AND WATER CONSERVATION FUND. In an op-ed for the [Glenwood Springs \(CO\) Post Independent](#) (9/23, 32K), Dan and Kerri Schwartz, the owners and operators of Ripple Creek Lodge, urges Congress to support the Land and Water Conservation Fund. They say that "if you've ever hunted, fished, hiked or camped on our nation's public lands, chances are you've benefited directly from investments made by the LWCF." The authors also note that the "LWCF has delivered these benefits to Colorado and nationwide without depending on taxpayer dollars."

Additional pieces in support of the LWCF appear in the [Oregonian](#) (9/23, 756K), the [Montana Standard](#) (9/23, 36K), the [Conway \(NH\) Daily Sun](#) (9/23, 49K), the [Cincinnati Enquirer](#) (9/22, 561K), and the [Winston-Salem \(NC\) Journal](#) (9/23, 167K).

Also providing coverage of the LWCF is the [Northern Arizona Today](#) (9/23).

Empowering Native American Communities:

INTERIOR TO TAKE A DOZEN PARCELS INTO TRUST FOR MOHEGANS. The [New London \(CT\) Day](#) (9/22, 77K) reports that the Interior Department "intends to take 12 parcels of Mohegan Tribe-owned land into trust for the tribe, removing the parcels from the local tax rolls." According to the article, "in a notice published Friday, the Interior Department said the acting regional director for the Bureau of Indian Affairs' Eastern Region determined Sept. 14 that she would accept the parcels into trust 'pursuant to the Mohegan Nation Land Claims Settlement Act.'" The article note that "the decision will become final at the end of a 30-day appeal period."

COURT WEIGHS ARGUMENTS ON WHETHER TRIBAL OFFICIALS MUST COMPLY WITH SUBPOENAS. The [Great Falls \(MT\) Tribune](#) (9/22, 75K) reports that "a federal court judge in Great Falls is weighing opposing legal arguments on whether tribal officials must comply with subpoenas demanding access to tribal government documents, or whether Indian tribes are immune from court orders to produce evidence because they are sovereign nations." The "dispute came to a head based upon a lawsuit filed by Terry Matt, a Cut Bank attorney and enrolled member of the Assiniboine Tribe of Montana." Matt is suing the BIA "for more than \$5 million in compensation for alleged damages that occurred when the BIA built a new road across Matt's property."

ADDITIONAL COVERAGE BIA APPROVES MASHPEE WAMPANOAG LAND INTO TRUST APPLICATION. Additional coverage that the BIA "on Friday accepted the Mashpee Wampanoag tribe's application for reservation status" was provided by [Connecticut Public Radio](#) (9/23), the [Springfield \(MA\) Republican](#) (9/23, 336K), the [Boston \(MA\) Herald](#) (9/23, 548K), and the [Law 360](#) (9/23, 21K).

Tackling America's Water Challenges:

DEPUTY SECRETARY CONNOR DEFENDS WESTLANDS WATER DISTRICT AGREEMENT. The [Los Angeles Times](#) (9/23, Boxall, 4.07M) reports that five years ago, Mike Connor, then commissioner of the BOR, "outlined the terms of potential legislation to resolve a lingering battle over badly drained farmland in the Westlands Water District." However, "the agreement approved last week by the Obama administration and Westlands beats a long retreat from those requirements, prompting cries that a district legendary for its political sway and hardball tactics has once again come out on top." Now deputy Interior secretary, Connor "helped negotiate the settlement, which must still be approved by Congress." According to the article, "while disputing that the agreement gives away too much, Connor was forthright about the administration's desire to escape the legal liability and mounting financial costs of dealing with the contaminated drain water that flows from Westlands fields." He said, "We have a settlement that is a very significant financial benefit to the United States and the U.S. taxpayer."

In his column for the [Stockton \(CA\) Record](#) (9/22, Columnist, 106K), Michael Fitzgerald criticizes the contract for being "open-ended." According to Fitzgerald, "it's as if the U.S. Department of the Interior hasn't noticed that the Delta is dying or the changing climate of the West."

BOR URGED TO PRIORITIZE YELLOWSTONE INTAKE DIVERSION DAM. The [Sidney \(MT\) Herald](#) (9/23, 10K) reports that Sen. Steve Daines "led the Montana and North Dakota congressional delegations Monday in urging the Army Corps of Engineers and Bureau of Reclamation to prioritize concerns at the Yellowstone Intake Diversion Dam." In a letter to Assistant Secretary of the Army for Civil Works Jo-Ellen Darcy and BOR Commissioner Estevan Lopez, "the bipartisan delegations emphasized the economic benefit that the dam provides to both Montana and North Dakota." They wrote, "We urge ACE and BOR to address the concerns of the Court and conduct the necessary analyses in a timely manner to ensure this essential source of water for farmers, ranchers, and communities throughout much of northeastern Montana and northwestern North Dakota is not unduly disrupted."

Securing America's Energy Future:

Renewable Energy:

BOEM FINDS NO SIGNIFICANT ENVIRONMENTAL IMPACT IN WIND LEASING OFF NORTH CAROLINA COAST. The [AP](#) (9/23, 2 28M) reports that "a federal government review says there will be no significant environmental or socioeconomic impacts in leasing tracts off the North Carolina coast for wind energy development." The BOEM is "proposing three tracts off the coast for wind energy — one off Kitty Hawk on the Outer Banks and two in the Cape Fear area near Wilmington." The bureau's North Carolina Renewable Energy Task Force will "hold a meeting Oct. 7 in Wilmington to discuss holding an auction for leasing tracts to wind energy companies."

Additional coverage was provided by [WWAY-TV Wilmington \(NC\)](#) Wilmington, NC (9/22, 2K), [WRAL-TV Raleigh \(NC\)](#) Raleigh, NC (9/23, 193K), and [WITN-TV Greenville \(NC\)](#) Greenville, NC (9/23, 94K).

Onshore Energy Development:

FEDERAL ADVISORY COUNCIL RECOMMENDS CANCELLATION OF BADGER-TWO MEDICINE LEASES. The [Greenwire](#) (9/22, Subscription Publication) reports that "a federal advisory panel is urging the Obama administration to withdraw or cancel leases for natural gas drilling in Montana's Lewis and Clark National Forest, east of Glacier National Park." The Advisory Council on Historic Preservation "told the Departments of Interior and Agriculture that the Badger-Two Medicine area of northwest Montana — the source of the Blackfeet Tribe's origin story — is too sacred for drilling." The panel said that "gas exploration would lead to 'serious and irreparable degradation' in the 165,588-acre traditional cultural district, an area protected by the National Historic Preservation Act that includes parts of the Lewis and Clark forest, Flathead National Forest and Blackfeet Indian Reservation."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (9/23, 2 28M) and the [Fairfield \(MT\) Sun Times](#) (9/23).

ENVIRONMENTAL GROUPS THREATEN TO SUE OVER NORTHERN LONG-EARED BAT. [E&E Publishing](#) (9/22, 705) reports that several environmental groups have "threatened to sue the Obama administration over protections for the threatened northern long-eared bat." The groups — including the Center for Biological Diversity, Coal River Mountain Watch, the Ohio Valley Environmental Coalition and the Sierra Club — accused the FWS and the OSMRE "of failing to ensure that plans for two West Virginia strip mines protect the bat."

Also reporting on the story is the [Charleston \(WV\) Gazette-Mail](#) (9/22).

NORTH DAKOTA OIL PRODUCERS SPAR WITH REGULATORS OVER PROPOSED RULES. [Reuters](#) (9/22, Scheyder) reported that at Tuesday's North Dakota Petroleum Council annual meeting, North Dakota's oil producers sparred with federal regulators over a Bureau of Land Management proposal to more strictly regulate how crude is extracted from shale and an Environmental Protection Agency proposal over the use of small bodies of water in the US. These and other proposals have drawn criticism from industry members while environmentalists say they are crucial.

GEOLOGIST SLOWING SALTWATER INJECTIONS COINCIDES WITH DIMINISHED EARTHQUAKES IN KANSAS. The [Topeka \(KS\) Capital-Journal](#) (9/22, Carpenter, 109K) reported that a Kansas Corporation Commission decision "to limit injection of saltwater deep underground after drawn to the surface by oil producers coincided with diminished intensity of earthquakes in south-central Kansas, a state geologist said Tuesday." Rex Buchanan, interim director of the Kansas Geological Survey, "said during a forum at the Kansas Energy Conference in Topeka the decline in magnitude of earthquakes mirrored adoption of the KCC's rule in March." The KCC "is poised to renew for another six months the injection restraints applicable in Harper and Sumner counties that were inspired by the proliferation of earthquakes rattling the region's residents."

ADDITIONAL COVERAGE OF PUBLIC LISTENING SESSIONS ON FEDERAL COAL LEASING PROGRAM. Additional coverage of the public listening sessions held on the federal coal leasing program was provided by the [Steamboat \(CO\) Pilot & Today](#) (9/22, 30K).

Offshore Energy Development:

BOEM ISSUES PROPOSED GUIDELINES ON PAYING TO DISMANTLE OFFSHORE FACILITIES. [Fuel Fix \(TX\)](#) (9/22, Dlouhy, 7K) reports that under proposed guidelines issued by the BOEM Tuesday, "fewer companies will be able to self-insure to cover the eventual costs of decommissioning those offshore wells and platforms," although "firms will have more flexibility to assemble financial assurance packages, without relying solely on expensive surety bonds as a guarantee." The move "is designed to ensure that the companies have set aside enough money to dismantle offshore facilities once oil and gas stops flowing."

Additional coverage was provided by the [AP](#) (9/22, 2.28M).

CRITICS POINT TO RECORDS SHOWING LACK OF OFFSHORE ENVIRONMENTAL ENFORCEMENT. [WWL-TV](#) New Orleans (9/22, 105K) reports that "the federal agency that regulates offshore oil and gas drilling and production has used budget increases since the BP disaster to hire dozens of engineers and geologists, but has all but ignored an environmental enforcement division beset by understaffing and massive work backlogs." Michael Bromwich, "who created the Interior Department's Bureau of Safety and Environmental Enforcement to separate regulators from the influence of the oil and gas industry, set up an environmental enforcement division to make sure companies operate without damaging marine life and habitat." However, "in the three budget years since Bromwich left, government records show only two of 10 funded vacancies have been filled."

Also providing coverage is [USA Today](#) (9/23, Hammer, 5 23M).

America's Great Outdoors:

Bureau of Land Management:

BILL WOULD REMOVE SOME WILDLIFE STUDY AREA DESIGNATION IN NEW MEXICO. The [Carlsbad \(NM\) Current-Argus](#) (9/23, 18K) reports that "legislation that would get rid of some Wilderness Study Area designations in New Mexico has been introduced" by Rep. Steve Pearce. The legislation, "introduced Sept. 10, would return some Wilderness Study Area-designated areas in Luna and Hidalgo counties to the Bureau of Land Management so they can be used for other purposes." Pearce said, "Allowing the BLM to open up these lands for multiple uses will not only benefit communities economically, but also restore habitats and watersheds, increase revenues and create jobs."

Fish and Wildlife Service:

INVESTIGATION OPENED INTO DEATHS OF 25 WALRUS ON ALASKA BEACH. The [AP](#) (9/23, 2.28M) reports that "federal prosecutors have opened a criminal investigation into the deaths of 25 Pacific walrus found last week on an isolated northwest Alaska beach." The FWS "on Wednesday received a report and photos of the dead animals found near Cape Lisburne on the Chukchi Sea about 230 miles northeast of the Bering Strait." The article notes that "initial reports indicated the walrus — 12 pups and 13 adults — had been shot," but "the agency would not speculate on the causes of death and sent two officers from its law enforcement division to investigate."

Additional coverage was provided by the [Washington \(DC\) Post](#) (9/21, Dan Joling |, Ap, 6.76M), the [Christian Science Monitor](#) (9/22, 455K), [BBC News](#) (9/23, 1.68M), and [UPI](#) (9/22).

TIMELINES SET FOR CONSIDERING PROTECTION FOR SEVEN AQUATIC SPECIES. The [AP](#) (9/23, 2 28M) reports that "officials have agreed on timelines for determining whether seven aquatic species from nine states will be protected under the Endangered Species Act." The species "include six fish and a freshwater mussel." They are "the ashy darter, frecklebelly madtom, longhead darter, sickle darter, trispot darter, candy darter and yellow lance mussel."

Also reporting on the story is the [Alabama Live](#) (9/23, 825K). Additional coverage was provided by the [Washington \(DC\) Post](#) (9/23, Press, 6.76M), the [Washington \(DC\) Times](#) (9/23, 344K), and [WWAY-TV Wilmington \(NC\)](#) Wilmington, NC (9/22, 2K).

DECISION ON LISTING EELS ON ENDANGERED LIST EXPECTED NEXT WEEK. The [AP](#) (9/23, 2 28M) reports that "a decision from the federal government about whether to list American eels under the Endangered Species Act will likely come next week." A spokesman for the FWS says "the decision is due by the end of September and will probably arrive close to the end of the month."

FWS OPTS TO CRUSH IVORY, RATHER THAN BURN IT. [BBC News](#) (9/23, 1.68M) reports that a FWS "experiment suggested that burning ivory for a short time does not destroy it." Gavin Shire from the FWS, said that "the US chose to crush, rather than burn, one tonne of its ivory stockpile in public in June because ivory 'doesn't catch fire the way you might imagine but rather just chars on the outside.'"

GREEN SEA TURTLES HAVING RECORD YEAR. The [New York Times](#) (9/21, Gorman, Subscription Publication, 11.82M) reports that green sea turtles are rebounding. In the Archie Carr National Wildlife Refuge, "they are having a record year." The article notes that "researchers and students at the University of Central Florida's Marine Turtle Research Group counted 12,804 nests as of Thursday in the 13 miles of the refuge's beaches that they monitor."

SANTA ANA SUCKER CASE APPEALED TO SUPREME COURT. The [Riverside \(CA\) Press Enterprise](#) (9/23, 303K) reports that "a dozen Inland water providers that have long fought federal habitat protections for a small, algae-eating fish – the Santa Ana sucker – petitioned the United States Supreme Court on Tuesday to hear their case." The agencies claim the FWS "violated two federal environmental laws when it doubled the acreage of critical habitat – land considered crucial for recovery of a species – in 2010." They said that "the habitat designation jeopardizes numerous water capture and groundwater recharge projects planned for the Santa Ana River, from its upper reaches at the Seven Oaks Dam near Highland to Prado Dam near Corona."

Also reporting on the story are the [San Bernardino \(CA\) Sun](#) (9/22, 142K) and the [Courthouse News](#) (9/22, 7K).

EXPERTS CAUTION AGAINST DRAWING CONCLUSIONS ABOUT CLIMATE CHANGE FROM STARVING POLAR BEAR PICTURE. The [Washington Post](#) (9/22, Harvey, 6.76M) reports that "last month, wildlife photographer Kerstin Langenberger shocked the world when she revealed a horrifying photograph of a severely emaciated polar bear, shot on the Norwegian island of Svalbard." According to the article, "in a Facebook post, she expressed her concerns about the health of the Svalbard polar bears and the ways climate change might be affecting the Arctic. Her photo, visible here, quickly went viral — having been shared more than 50,000 times since then." The article notes that "when Langenberger's photo surfaced, the immediate conclusion for many people was that the starving bear was the victim of warming-induced ice-melt in the Arctic." However, "while this is possible, experts are cautioning the public not to make the image the new face of climate change just yet." Eric Regehr, a polar bear biologist with the FWS in Alaska, said, "It is not possible to attribute this animal's specific condition to climate change, without more information on the animal's history and physiology."

NMFS PROPOSES LISTING TWO TYPES OF GROUPEL. The [Greenwire](#) (9/22, Subscription Publication) reports that the National Marine Fisheries Service is "proposing to list two species of grouper under the Endangered Species Act, in its latest response to a petition from WildEarth Guardians to protect dozens of marine species." In a proposed rule, the federal agency "asserts that the gulf grouper should be listed as endangered and the island grouper as threatened."

National Park Service:

LANDMARK MUSIC FESTIVAL COULD BE BEGINNING OF END OF FREE MUSIC AT NATIONAL MALL. The [Washington Post](#) (9/23, Higham, 6.76M) reports that for the NPS, the Landmark Music Festival near the Martin Luther King Jr. Memorial on Saturday and Sunday could "be a windfall for the agency and for the Mall" as "more than 40 bands will perform on five stages to raise money for the Park Service, helping the agency to restore and maintain the hallowed, historic grounds, the site of some of the nation's most defining moments." However, "the concert comes at a cost" because the festival "marks the first time a section of the mall and its memorials will be cordoned off for a concert and closed to the nonpaying public." The article notes that "activists and historians who monitor the Mall say the decision to charge admission to the music festival sets a troubling precedent that could signal an end to the days of free music in the national park, ushering in an era of pricey, multi-day festivals."

Additional coverage was provided by the [Washington Post](#) (9/23, Ramanathan, 6.76M) and the [Huffington Post](#) (9/23, 164K).

NEW YORK LAWMAKERS PUSH FOR STONEWALL NATIONAL PARK. The [AP](#) (9/21, Verena Dobnik |, Ap, 6.76M) reports that "two New York legislators are leading a campaign to designate Stonewall Inn as the first national park honoring LGBT history." Sen. Kirsten Gillibrand and Rep. Jerrold Nadler "made their announcement Sunday in front of the Greenwich Village tavern that was the scene of a 1969 uprising at a key moment for the nascent gay rights movement." They were "joined by other elected officials and members of the National Parks Conservation Association and the Human Rights Campaign."

GREAT RIVERS GREENWAY EXECUTIVE DIRECTOR APPROVES SPENDING FOR ARCH GROUNDS OPERATING COSTS. The [St. Louis Post-Dispatch](#) (9/23, 968K) reports that the head of a taxpayer-funded trails district has "doubled her agency's commitment to pay yearly operating costs at the newly renovated Arch grounds, acting without board approval and in the face of adverse financial projections." The NPS, "which owns the park, has estimated that figure at \$2.6 million a year." Great Rivers Greenway Executive Director Susan Trautman "agreed to split the bill with CityArchRiver, the foundation formed to raise private donations for the project."

ADDITIONAL COVERAGE OF "EVERY KID IN A PARK" INITIATIVE. Additional coverage of the "Every Kid in a Park" initiative was provided by the [St. George \(UT\) Spectrum](#) (9/22, 46K), the [Cortez \(CO\) Journal](#) (9/21, 646), and the [Arizona Republic](#) (9/22, 1.12M).

POLITICAL LEADERS CRITICIZED FOR NOT SUPPORTING NPS. In an op-ed for the [Colorado Springs \(CO\) Independent](#) (9/23, 53K), author Jim Hightower writes that "while our presidents praise America's magnificent national park system, they're not maintaining them." He acknowledges that President Obama has "proposed a 2016 'Centennial Budget' for NPS, mitigating years of destructive underfunding and calling for \$1 billion to address the backlog." However, Hightower notes that "still leaves a \$10 billion shortfall, and the sour duo of Sen. Mitch McConnell and Speaker John Boehner will oppose even that little increase for the maintenance of these invaluable public assets." Hightower concludes: "Our so-called 'leaders' are literally stripping 'service' out of the National Park Service and assuring that our national treasures will fall into acute disrepair. It's a bipartisan disgrace."

NEW LEADER OF COLORADO NATIONAL MONUMENT URGED TO CONNECT WITH COMMUNITY. The [Grand Junction \(CO\) Daily Sentinel](#) (9/23, 73K) editorializes that "too often in the past we've seen NPS officials, both active and retired, staunchly 'protecting' the Colorado National Monument "instead of encouraging and welcoming users." The paper argues that "the goal should be making the monument part of the surrounding community instead of an island onto itself." It hopes that "Ken Mabery's appointment as permanent superintendent of the monument" will be "a change in leadership" that will provide "a natural opportunity to re-establish a community connection."

US Geological Survey:

NATIVE AMERICANS SEEK NAME CHANGE FOR WYOMING'S DEVILS TOWER. [Reuters](#) (9/22, Zuckerman) reports that spiritual leaders of the Sioux and more than a dozen Native American tribes want U.S. officials to rename Devils Tower. Chief Arvol Looking Horse, spiritual leader of the Great Sioux Nation and the head of the effort, said the name is offensive. In letters to President Barack Obama and the U.S. Board on Geographic Names, Looking Horse has asked that it be renamed Bear Lodge.

Top National News:

WHITE HOUSE OBAMA LOOKS FORWARD TO DISCUSSING "SHARED VALUES" WITH POPE. Pope Francis' arrival in the US and his agenda during his visit led all three network news broadcasts, which dedicated more than 22 minutes of coverage to the story and are the subject of extensive print and online reporting. While the coverage touches on a wide range of issues surrounding the Pope's visit, major themes include the issues he will highlight in his meeting with the President, as well as his address to Congress and the security preparations for the trip. The potential political impact of the Pope's visit was a subtext to much of the coverage.

On [NBC Nightly News](#) (9/22, story 2, 1:20, Holt, 7.86M), for example, Anne Thompson noted that the Pope "knows he has the world's attention and we expect him to use it to hit" some of his favorite issues, such as climate change, immigration, and "the plight of the poor." In a report outlining the Pope's itinerary while he is in the US, the [Washington Post](#) (9/23, Boorstein, 6.76M) says that while it is "already clear that Pope Francis will speak about immigration and religious liberty during a major address at Independence Hall in Philadelphia on Saturday," his "unpredictable approach to the papacy means that 'there's just no template' for his first US visit," according to Catholic University theologian Chad Pecknold.

On [CNN's Situation Room](#) (9/22), White House spokesman Josh Earnest said the President "is looking forward" to discussing "shared values" when they meet at the White House on Wednesday. Earnest added that the meeting is not about efforts to "advance a political agenda but rather sit down and talk about values they have in common and how the two men in the very different roles they have in the public can advance those shared values together." However, Kevin Corke reported on [Fox News Special Report](#) (9/22) that while there are many areas of agreement between the Pope and Obama, there is also significant disagreement on issues such as same-sex marriage, abortion, stem cell research, and contraception.

The [New York Times](#) (9/23, Baker, Ahmed, Yardley, Subscription Publication, 11.82M) says the White House "sought to highlight the alignment between the president and the pope, while de-emphasizing areas of discord," and quotes Earnest as saying, "Both President Obama and Pope Francis have over the course of their careers demonstrated a commitment to values related to social and economic justice." [McClatchy](#) (9/23, Kumar, 28K) reports that while Earnest "did not reveal the agenda for the meeting Wednesday," he said "he would not describe it as a 'social meeting,'" adding, "When the president sits down with Pope Francis tomorrow in the Oval Office, the president will not arrive at that meeting with a political agenda. This is an opportunity for two men who have so many values in common to talk about the efforts that they are taking in their respective and quite different roles to advance those shared values."

Under the headline "Pope Of The Poor Arrives In US Denying He's A Liberal," the [AP](#) (9/23, Winfield, Zoll) says the Pope arrived in the US "denying he is a leftist." During his flight to the US, he "defended himself against conservative criticism that his condemnation of trickle-down economics makes him a communist," saying, "I am certain that I have never

said anything beyond what is in the social doctrine of the church." The Pope added that "some may have misinterpreted his writings in a way that makes him sound 'a little bit more left-leaning,' but he said that's wrong."

Noting that, upon arrival, he "climbed into the back of a little Fiat," the [AP](#) (9/23, Winfield, Zoll) also says the Pope's "choice of car was in keeping with his simple habits and his stand against consumerism," and his "decision to roll down the windows reflected his penchant for trying to connect to ordinary people despite the tight security around him." [USA Today](#) (9/23, Woodyard, 5 23M) similarly notes that the Pope, "known for being humble and unassuming, chose a car that doesn't even break the \$20,000 barrier."

In the lead story for [NBC Nightly News](#) (9/22, lead story, 3:10, Holt, 7.86M), Holt said that while "the next six days offer a chance to see and touch a leader who is inspired with his humbleness and compassion and mercy," the Pope's "outspokenness on matters of world affairs ensures his visit is seen through political eyes." [USA Today](#) (9/23, Korte, 5.23M) says the Pope's visit "will have political, diplomatic and spiritual ramifications," noting that it comes "at the convergence of pivotal moments for the United States, the church, and the world." The [New York Times](#) (9/23, Baker, Ahmed, Yardley, Subscription Publication, 11.82M) describes the Pope as "determined to press the world's last superpower to do more to care for the planet and its most marginalized inhabitants," adding that there is "not a small degree of tension over his message."

On [CNN's Situation Room](#) (9/22), Wolf Blitzer characterized the Pope's Tuesday arrival in the US as "a visit by a world leader unlike one we've ever seen before," adding that it is "a first to have a president and Vice President greet the world leader" at Joint Base Andrews. The [New York Times](#) (9/23, Baker, Ahmed, Yardley, Subscription Publication, 11 82M) calls the President's "personal welcome" at Andrews "a sign of respect," noting that presidents "rarely greet foreign visitors at Andrews, instead waiting for them to make their way to the White House."

Lester Holt noted on [NBC Nightly News](#) (9/22, story 9, 1:55, Holt, 7 86M) that "when the Pope arrived in Washington...he was greeted...by new generations of the American Catholics. Children selected to be among the first faces he saw as he stepped off the airplane." [AFP](#) (9/23) also reports briefly on the Pope's arrival. Scott Pelley noted on the [CBS Evening News](#) (9/22, story 8, 2:20, Pelley, 5 08M) that "There are 80 million Catholics in America, and Francis has won most of them over." A CBS News/New York Times poll showed "63 percent have a favorable opinion of him."

In a front-page story, the [Wall Street Journal](#) (9/23, A1, Rocca, Subscription Publication, 5 95M) reports that conservative Catholics in the US have concerns about the Pope's views on a number of issues and fear he is obscuring some of the church's fundamental teachings.

Other stories this morning cover a variety of issues surrounding the Pope's visit. For example, [USA Today](#) (9/23, Scammell, 5.23M) chronicles the evolution of the "popemobile," noting that it has "gone through numerous iterations as the Vatican has tried to balance safety, accessibility, spontaneity and technological innovation."

The [Philadelphia Inquirer](#) (9/23, Loyd, 641K) notes that the US Conference of Bishops has chartered a Boeing 777 to transport the Pope in the US. According to the Inquirer, the FAA "has approved 'Shepherd One' as the plane's call sign," and while the "papal seal will be on the side of the aircraft," there were "no major modifications to the plane," according to American spokesman Ross Feinstein.

Another story in the [Philadelphia Inquirer](#) (9/23, McCabe, 641K) reports on a Philadelphia area couple who are "one of only a few couples from the Archdiocese of Philadelphia who were hand-selected to greet Francis during his historic trip Saturday morning," noting that each couple was selected "for their commitment to the Church and their dedication to the sacrament of marriage." [TIME](#) (9/23, Dias, 19 55M), meanwhile, reported on an Iraqi couple who were invited by the Pope "to participate in his Extraordinary Synod of the Bishops on the Family last year," noting that when they "attempted to travel to Philadelphia during the Pope's visit," they were "prevented due to visa restrictions given the ongoing violence in Iraq."

Earnest: "No Theological Test" Before Handing Out Tickets To Arrival Ceremony. On [CNN's Situation Room](#) (9/22), Earnest also discussed the guest list for the Pope's arrival ceremony, which includes a gay episcopal bishop, a transgender activist, and a nun who leads an organization that opposes the Vatican on several issues. Earnest said the attendees will include "thousands of people representing a variety of communities all across the country who are eager to welcome the Pope not just to the United States but the White House." Earnest said, "There's no theological test administered to people before they got tickets. Our goal here is to invite people just as inspired by the Pope and his message that the President himself is."

[Politico](#) (9/22, Toosi, 942K) said that while "Vatican representatives insist the pope is on a pastoral mission, his every word (most of which will be in his native Spanish) will likely be picked apart for political innuendo by both Democrats and Republicans," adding that "lawmakers and interest groups already have begun using the pontiff's visit to press their agendas, hosting rallies, sending out statements and making other public moves." On [Fox News' The O'Reilly Factor](#) (9/22, 767K), Bill O'Reilly said in his "Talking Points Memo" that "wisely, the Pope doesn't want to be used in a photo op. That might indicate passive endorsement of a point of view the President might hold." O'Reilly added, "It's obvious the Vatican is aware of President Obama's overall agenda and is not endorsing it. However, the Pope is a liberal guy."

Pope Originally Wanted To Enter US From Mexico. [USA Today](#) (9/23, Jervis, 5.23M) reports that in Cuba on Tuesday morning, the Pope celebrated a Mass "at Our Lady of Charity shrine, dedicated to Cuba's revered patron saint," and "visited Santiago's main cathedral and blessed the city," before he boarded a plane to the US. Francis "expressed admiration for Cubans who have kept the faith alive," and said, "Generation after generation, day after day, we are asked to renew our faith. We are asked to live the revolution of tenderness as Mary, our Mother of Charity, did." The [Philadelphia Inquirer](#) (9/23, O'Reilly, 641K) reports that during the flight, the Pope said his original plan was not "to enter the United States from Cuba," adding, "I had wanted to enter the United States through Mexico" but it "would have been too difficult to visit Our Lady of Guadalupe, Mexico's patron saint, 'and that would have been a slap in the face' to the Mexican people."

The [Miami Herald](#) (9/23, Mazzei, 651K) reports that Miami's archbishop Thomas Wenski left Cuba on Tuesday "after what he deemed a successful trip bringing Roman Catholic pilgrims to Havana and welcoming Pope Francis before the pontiff's arrival in the US." Wenski, who "praised Francis' 'emotional' visit," said, "The fact that he's coming to the United States from Cuba – that's a very important gesture. ... It's a bridge he's establishing, a bridge between Cuba and the United States, a bridge between Cubans in the United States and Cubans on the island."

The [Philadelphia Inquirer](#) (9/23, Matza, 641K) profiles an "undocumented Mexican immigrant" who will be among a group of "56 pilgrims" traveling by bus "from the 25 Hispanic parishes in the Archdiocese of Mobile to Philadelphia for Saturday's epic Papal Mass on the Franklin Parkway."

Pope Says He Won't Address Cuba Embargo In Speech To Congress. A number of reports speculate on what the Pope will say during his address to Congress on Thursday. Scott Pelley reported in the lead story for the [CBS Evening News](#) (9/22, lead story, 3:20, Pelley, 5.08M) that "the Pope keeps his plans under his hat." The [Los Angeles Times](#) (9/23, Parsons, 4 07M), however, notes that "Vatican officials have hinted that Francis may use his address to both houses of Congress on Thursday...or another stop in Washington to speak about the sanctity of life and his opposition to capital punishment, issues where he is at odds with Obama."

While the [Miami Herald](#) (9/23, Wyss, 651K) says that Cubans "said they hoped Francis, who has been key to the rapprochement, might convince American politicians to dismantle the five-decade economic embargo on the island," in the lead story for [ABC World News](#) (9/22, lead story, 2 35, Muir, 5.84M), Terry Moran said the Pope on the plane ride to the US said "he would not mention the US embargo on Cuba" while addressing Congress. [Reuters](#) (9/23) similarly notes the Pope said that although he hopes the US will lift the embargo, he will not raise the issue.

[Politico](#) (9/22, Kim, 942K) noted that the Buenos Aires-born Pope "has focused much of his papacy on liberalizing immigration policies and showing compassion for migrants," adding that religious leaders expect him "to promote that message during his speech to Congress on Thursday – a theme advocates hope will be a subtle rebuke to the GOP," whose presidential primary has been characterized by a hardline tone and position toward immigration." [Roll Call](#) (9/22, Bowman, 113K) reports that federal contract workers "are hoping the pope's emphasis on economic inequality will strike a chord with members of Congress" and push them "to raise their wages and allow for union representation."

[USA Today](#) (9/23, Singer, 5 23M) reports that "the adults in Congress would like everybody to be on their best behavior" during the Pope's address, noting that Sen. Roger Wicker said, "We actually hope that we can show a little more decorum for the pope than we sometimes do at State of the Union addresses. ... It is our hope...that we can avoid the dueling ovations, the jack-in-the box standing for this or for that." Senate Minority Leader Reid "agreed that he hopes this won't happen Thursday," saying, "If there's applause during the speech, we can all applaud, but not the up-and-down stuff. I think that's not a dignified way to conduct ourselves."

Rubio: Pope's Comments On Economy Demonstrate "Fundamental Misunderstanding." On [Fox News Special Report](#) (9/22), Sen. Marco Rubio was shown explaining areas of disagreement with the Pope. Rubio said, "On moral issues he speaks with incredible authority and has done so consistently on the value of life, the sanctity of life, the importance of marriage and on the family." However, Rubio added that "on economic issues the Pope is a person and a head of state. ... I see in the Pope's comments a fundamental misunderstanding about the difference between free enterprise and corporatism."

Large-Scale Security Effort Surrounds Pope's Visit. Brian Todd reported on the security situation for [CNN's Situation Room](#) (9/22), saying the "massive event" is "the biggest security event we've seen in the United States in a long, long time." In an earlier segment on [CNN's Situation Room](#) (9/22), Deborah Feyerick reported that while there is "no specific credible threat," when "you have somebody of the Pope's stature in town, there's an implied threat because it is such an attractive terror target for anyone who wanted to do something bad." Feyerick noted that the visit "has been designated" a "national security special event," meaning "extra resources have been thrown at this event."

Cecilia Vega reported on [ABC World News](#) (9/22, story 2, 2:30, Muir, 5.84M) about the crowds expected to follow the Pope on his visit, noting that they will "rang[e] from large to enormous. 15,000 people at the White House. 80,000 watching the Pope ride through New York's Central Park. Up to one million people for Sunday mass in Philadelphia." David Muir noted in a separate [ABC World News](#) (9/22, story 3, 1:00, Muir, 5.84M) segment that "security [is] being beefed up in the three cities the Pope will visit."

On [CNN's Situation Room](#) (9/22), Blitzer noted that the "unprecedented security surrounding" the visit "isn't just on the ground," but "also extends to US air space." Rene Marsh reported "there is a new airborne threat that's causing concern." Marsh said, "Drones and even a gyro copter have penetrated some of the most protected real estate in America." Security Analyst Don Aviv said, "This is the greatest threat because biological, chemical, even a small expl

		No Votes December 4
		No Votes December 11-14
State Work Period December 21-31		
TBD	Target Adjournment	December 18

Scheduled Floor Action

House

Wednesday, Sept. 23, Not in Session

Thursday, Sept. 24, 8:30 a.m.

The House meets at 8:30 a.m. for legislative business and will recess immediately. At approximately 9:45 a.m., the House and Senate will hold a joint session to receive Pope Francis of the Holy See. The chamber is expected to consider measures under suspension of the rules.

Agenda

S 1707 — A bill to designate the Federal building located at 617 Walnut Street in Helena, Arkansas, as the "Jacob Trieber Federal Building, United States Post Office, and United States Court House"

S 261 — A bill to designate the United States courthouse located at 200 NW 4th Street in Oklahoma City, Oklahoma, as the William J. Holloway, Jr. United States Courthouse.

HR 3116 — Quarterly Financial Report Reauthorization Act

S 994 — A bill to designate the facility of the United States Postal Service located at 1 Walter Hammond Place in Waldwick, New Jersey, as the "Staff Sergeant Joseph D'Augustine Post Office Building."

HR 1442 — A bill to designate the facility of the United States Postal Service located at 90 Cornell Street in Kingston, New York, as the "Staff Sergeant Robert H. Dietz Post Office Building"

HR 322 — A bill to designate the facility of the United States Postal Service located at 16105 Swingley Ridge Road in Chesterfield, Missouri, as the "Sgt. Zachary M. Fisher Post Office"

HR 323 — A bill to designate the facility of the United States Postal Service located at 55 Grasso Plaza in St. Louis, Missouri, as the "Sgt. Amanda N. Pinson Post Office".

HR 324 — A bill to designate the facility of the United States Postal Service located at 11662 Gravois Road in St. Louis, Missouri, as the "Lt. Daniel P. Riordan Post Office".

HR 558 — A bill to designate the facility of the United States Postal Service located at 55 South Pioneer Boulevard in Springboro, Ohio, as the "Richard 'Dick' Chenault Post Office Building".

HR 1884 — A bill to designate the facility of the United States Postal Service located at 206 West Commercial Street in East Rochester, New York, as the "Officer Daryl R. Pierson Memorial Post Office Building".

HR 3059 — A bill to designate the facility of the United States Postal Service located at 4500 SE 28th Street, Del City, Oklahoma, as the James Robert Kalsu Post Office Building.

Friday, Sept. 25, 9 a.m.

The House reconvenes at 9 a.m. for legislative business and is expected to consider a bill (HR 348) that would expedite the approval process of certain projects.

Agenda

HR 348 — Responsibly And Professionally Invigorating Development (RAPID) Act

Senate

Wednesday, Sept. 23, Not in Session

The Senate is not in session.

Thursday, Sept. 24

Pope Francis of the Holy See will deliver an address before a Joint Meeting of Congress at 10 a.m., after which the Senate is expected to be in session

Friday, Sept. 25

The Senate is expected to be in session

DOI in the News:

SECRETARY JEWELL HAILS \$940 MILLION LANDMARK SETTLEMENT WITH TRIBES. [E&E Publishing](#) (9/17, 705) reports that the Interior Department has "proposed a \$940 million settlement to make up for discrepancies between what the U.S. government promised to pay tribes to provide federal services on their own lands and what they actually were paid – a gap at the center of a more than two-decade-old class-action lawsuit." The lawyers "representing the 645 tribal plaintiffs agreed to the deal filed yesterday in U.S. District Court in Albuquerque, N.M." If a judge agrees, "and barring a legal appeal, payments could start rolling out in the next year." Interior Secretary Sally Jewell "hailed the agreement as another landmark victory for the Obama administration in Indian Country." The article notes that "with the proposed settlement, Interior is resolving claims from contracts between 1994 and 2013, but the problem dates back to the Indian Self-Determination and Education Assistance Act of 1975."

The [Washington Examiner](#) (9/17, 213K) reports that Jewell said, "This landmark settlement represents another important step in the Obama administration's efforts to turn the page on past challenges in our government-to-government relationship with tribes." She added that "tribal self-determination and self-governance will continue to be our 'North Star' as the federal government works to assist tribes in running their own reservations and lands."

The [AP](#) (9/17) reports that Kevin Washburn, the Interior Department's Assistant Secretary for Indian Affairs, said, "When the plaintiffs in this case forced the administration to confront an issue that had festered for decades, the administration embraced the principle that the plaintiffs won in court. We have fully funded these costs ever since."

Additional coverage was provided by [South Dakota Public Broadcasting](#) (9/18, 4K), [The Ada News](#) (9/17, 23K), [NBC](#) Las Vegas (9/17, 12K), [ABC Nebraska](#) Lincoln, NE (9/17, 2K), [Law 360](#) (9/17, 21K), the [Tulsa World](#) (9/18, 364K), [CJ Online](#) (9/16, 109K), [SW OK News](#) (9/17, 60K), [Lake Powell News](#) (9/17), the [Native American Times](#) (9/17, 337), [KRWG \(Local NPR\)](#) Las Cruces, NM (9/17, 1K), [Interior](#) (9/17, 22K), [Ramah Navajo Chapter](#) (9/17), [Oglala Sioux Tribe](#) (9/17), [Zuni Pueblo](#) (9/17), [Class Counsel](#) (9/17), and [Q+A](#) (9/17).

SECRETARY JEWELL DECLINES TO TESTIFY ON GOLD KING MINE SPILL. The [Daily Caller](#) (9/17, Bastasch, 375K) reports that Interior Secretary Sally Jewell is "refusing to testify before Congress about her department's ongoing investigation of the massive toxic mine spill caused by EPA workers last month." According to the article, "despite an invitation Republican lawmakers to get Jewell to come before the committee Thursday to testify on the Interior's investigation, the former CEO of REI has declined." Instead, the article notes, "Jewell's staffers sent an unsigned statement to House lawmakers."

Legislation Would Compensate Native Americans Affected By Spill. The [E&E Daily](#) (9/17, Subscription Publication) reports that "New Mexico Democratic Sens. Tom Udall and Martin Heinrich plan to introduce legislation to help compensate American Indians affected by last month's spill from a Colorado abandoned mine." During a hearing of the Senate Indian Affairs Committee, Udall said a new law is necessary "to separately guide the compensation process through a dedicated office at EPA." Navajo Nation President Russell Begaye said his tribe "was disrupted through the negligence" of EPA, and during the hearing, he called the spill an "injustice" and demanded compensation.

Additional Coverage. Additional coverage of the spill was provided by the [Daily Caller](#) (9/18, Bastasch, 375K), the [Salt Lake \(UT\) Tribune](#) (9/18, 492K), the [Durango \(CO\) Herald](#) (9/17, 28K), the [Washington \(DC\) Examiner](#) (9/18, 213K), the [Denver \(CO\) Post](#) (9/18, Paul, 787K), the [Farmington \(NM\) Daily Times](#) (9/18, 44K), the [Albuquerque \(NM\) Journal](#) (9/18, 259K), and [Yahoo! News](#) (9/18, Brown, 5.98M).

CRITICS BLAME FEDERAL LAND MANAGEMENT FOR WILDFIRES. [Fox News](#) (9/17, 8.91M) reports that "wildfires are continuing to plague drought-stricken California and federal funding to fight them has dried up like parched El Dorado County farmland, leading critics to say the real problem lies nearly 3,000 miles away, in Washington." Some experts "believe more private ownership of land would divert the responsibility and cost from taxpayers." Chris Edwards, director of tax policy studies at public policy think tank the CATO Institute, said, "The federal government has shown itself to be a poor steward of its massive land holdings. The issues with Western lands are far too complex and sensitive for far-away politicians and bureaucrats in Washington to be able to solve."

Meanwhile, the [AP](#) (9/18, Ridler) reports that "a high-tech drone is spending a week flying over a west-central Idaho wildfire to see if it's capable of supplying real-time information that incident commanders can use when directing ground-based firefighters and manned aircraft."

Additional coverage of wildfires was provided by the [Fresno \(CA\) Bee](#) (9/18, 265K), the [Powell \(WY\) Tribune](#) (9/18, 13K) and [Fierce Homeland Security](#) (9/18, Sarkar).

DEADLINE LOOMS FOR LWCF REAUTHORIZATION. The [Washington Post](#) (9/18, Warrick, 6.76M) reports that the Land and Water Conservation Fund is "set to go away in less than two weeks, and Congressional dithering is to blame," according to House Democrats. They claim that "the Congressional majority is making no move to reauthorize the fund, despite its history of broad support among both political parties for half a century." Several Democrats "took to the House floor on Wednesday night to call on leaders of the House Natural Resources Committee to allow a vote on reauthorizing the program."

Additional coverage of the LWCF was provided by the [Santa Fe \(NM\) Reporter](#) (9/18, 69K).

NPS Can Use LWCF Grants To Turn Inholdings Into Public Land. The [Atlantic](#) (9/17, 2.69M) reports that "many national parks are dotted with 'inholdings': private land contained within a larger public shell." However, "the government has some ability to turn inholdings into national parkland" because "if a seller is willing, the National Park Service can use grants from the federal Land and Water Conservation Fund to purchase available land." The article notes that "a new map from the Center for Western Priorities... reveals how much national parkland has been purchased with funds in the past half-century."

Additional coverage of the map was provided by the [Greenwire](#) (9/17, Subscription Publication) and the [Cherry Creek \(CO\) News](#) (9/17).

Congress Urged to Renew LWCF. For the "Congress" blog of [The Hill](#) (9/18, Arce, 471K), Maite Arce, president & CEO of the Hispanic Access Foundation, writes that "for elected officials looking at how to best engage, gain support from and represent the Latino community, LWCF provides a crucial opportunity to do so." According to Arce, "LWCF has been instrumental in creating, protecting and providing access to public lands not just for the Latino community, but also for everyone across the nation – and at no cost to taxpayers." Arce concludes, "It's time for Republicans and Democrats to fortify the bipartisan promise made to protect America's public lands, water resources and cultural heritage. It's time for Congress to reauthorize and dedicate full funding to LWCF."

APPROPRIATORS URGED TO MAINTAIN CONSERVATION FUNDING. [E&E Publishing](#) (9/17, 705) reports that "more than 100 organizations have signed onto a letter urging

House and Senate head appropriators to maintain mandatory conservation funding set aside in the 2014 farm bill." The groups are "protesting conservation-program cuts in the House and Senate fiscal 2016 agriculture appropriations bills, decisions that exacerbate the already-steep reductions to water quality, soil health and wildlife efforts in the 2014 farm bill." The letter said that in passing the last farm bill, Congress "consolidated or eliminated nearly a dozen conservation programs and reduced mandatory funding by \$4 billion, with sequestration scheduled to cut an additional \$2 billion." It stated, "The House and Senate Agriculture Committees did their part to reduce federal spending and did so voluntarily. The cuts contained in the new farm bill were real, serious, and deep."

SALT LAKE CITY MAYOR BECKER LAUNCHES INITIATIVE URGING KIDS TO CONNECT WITH NATURE. [KUER-FM](#) Salt Lake City (9/17, 4K) reports that "Salt Lake City Mayor Ralph Becker wants to get children outdoors and inspire a new generation of environmental stewards." Sixth graders of the Pacific Heritage Academy and Curious George joined Becker Thursday "to announce his new program, SLC Kids Explore." The article notes that "it's linked to a national initiative recently unveiled by U.S. Interior Secretary Sally Jewell."

The [Deseret \(UT\) News](#) (9/17, 407K) reports that "Becker launched the program to challenge local youths and their parents to spend at least 30 minutes a day outdoors for a 30-day period." The mayor said, "We must nurture a populace with a personal relationship to nature and a sense of responsibility for their and our environment. By creating this program, we are opening the door to helping Salt Lake City youth connect with nature in a direct and meaningful way."

Also providing coverage is [KUTV-TV](#) Salt Lake City (9/18, 58K).

WASHINGTON FOOTBALL TEAM STILL MIGHT RETURN TO RFK LAND DESPITE NEIGHBORS' OPPOSITION. [Hill Now \(DC\)](#) (9/17) reports that "the organization managing the RFK Stadium campus has not ruled out a proposal to bring the Redskins back to the property despite significant resistance last night from locals who live nearby." However, "in order for the Redskins to make their home on the RFK Stadium grounds again, the team would need approval from the National Park Service, which owns the land." Interior Secretary Sally Jewell said "earlier this year that the Obama administration isn't inclined to let the Redskins build a new stadium on the property unless the team has a new name."

Additional coverage was provided by the [Washington \(DC\) Post](#) (9/18, O'Connell, 6.76M).

BOMBAY HOOK NATIONAL WILDLIFE REFUGE HONORED ON NEW QUARTER. The [AP](#) (9/18, 2.28M) reports that the U.S. Mint is honoring the Bombay Hook National Wildlife Refuge with a new coin. Officials from the Mint and the FWS are set to launch the new "quarter at a ceremony Friday at the refuge visitor center Smyrna." The article notes that "members of Delaware's congressional delegation are scheduled to be on hand, along with Secretary of the Interior Sally Jewell, Fish and Wildlife Service Director Dan Ashe, and former Delaware Congressman Michael Castle."

REPORT BLASTS CONGRESS FOR DISRUPTING EXECUTIVE BRANCH. The [E&E Daily](#) (9/17, Subscription Publication) reports that "a new report blasts dysfunction and partisanship on Capitol Hill for disrupting the management and operation of federal agencies." The study by the Partnership for Public Service "comes as ongoing budget battles in Congress could again shut down the federal government, with funding set to run out at the end of this month." The article notes that "agency managers have to check their shutdown contingency plans to keep vital functions running if they have to close their doors and pick who on their staff will and will not be sent home on furlough." According to the partnership, "the never-ending funding crises in Congress that have resulted in significant cuts under sequestration, rancor over raising the debt ceiling and the 2013 government shutdown have not helped the executive branch."

LAWMAKERS TAKE FIELD TRIP THROUGH UTAH. The [AP](#) (9/18, 2.28M) reports that "state lawmakers floated the Colorado River and hiked into Arches National Park in eastern Utah on Thursday as part of a two-day field trip in which legislators heard from local officials in tourism and counties that depend on energy development." According to Rep. Jim Dunningan, "the trips help lawmakers understand how vital tourism is to the Moab area and the impact more visitors and federal regulations are having on the local economy."

The [Deseret \(UT\) News](#) (9/18, 407K) reports that "even as angst continues to dominate the discussions over a potential monument designation in Utah — for proponents and foes alike — one county is eagerly pursuing a new national park and monument as part of a congressional lands bill." Rep. Rob Bishop's "public lands initiative process for Emery County includes a new national park designation, a new national monument and permanent wilderness status for seven current wilderness study areas." According to the article, "on the final leg of a two-day trip through multiple rural Utah counties, more than 60 Utah legislators were briefed Thursday about Emery County's part in the congressional lands bill, and why it is so important."

INTERIOR CRITICIZED FOR MISMANAGING RESOURCES. In an op-ed for the [Waynesboro \(VA\) News Virginian](#) (9/17, 28K), Brian Carlton, the managing editor of the News Virginian, writes that "Tuesday's announcement by U.S. Interior Secretary Sally Jewell that the Bureau of Land Management needed more money wasn't surprising." But he says that "the announcement that the department doesn't have enough resources to inspect high-risk oil and natural gas wells" is "a problem." According to Carlton, "like many federal problems, it's not a question of needing more money. It's about not knowing how to spend what you've got."

PUBLIC LANDS AGENCIES THANKED. In an op-ed for the [Moab \(UT\) Sun News](#) (9/18), Jeanne von Zastrow writes that "it's always easy to complain and criticize the government," but she wants to give a "shout out" of "well done" to the Forest Service, BLM and "our national parks and give them a big thanks for their work on keeping our world-class public lands protected and accessible to multiple uses for the enjoyment of all." According to von Zastrow, "we need new, radical collaboration between government, foundations, universities and the public for innovative ideas and more 'out of the office and in the field' personnel/ volunteers to protect Utah's greatest treasures."

Empowering Native American Communities:

ASSISTANT SECRETARY WASHBURN DISCUSSES HOT ISSUES IN INTERVIEW. In an interview with the [Indian Country Today Media Network](#) (9/17, 32K), Kevin K. Washburn, Assistant Secretary — Indian Affairs, discussed "hot topics in Indian country like: reformed federal recognition rules, Cobell, Oak Flat, Land in Trust and more." Looking ahead to the future, Washburn said: "The President has committed us to preparing Indian country for the future, by expanding tribal self-governance, restoring tribal homelands, supporting Native youth and confronting climate change. We're focused on running through the finish line on everything from land into trust, to the right-of-way regulations, to the Indian Child Welfare Act regulations. We're going to move forward with other regulatory initiatives that will be dependent on future administrations to finish. Our hope is that the House Natural Resources Committee and the Senate Committee on Indian Affairs focus on legislative priorities, including, of course, a Carcieri fix, and other bills that restore tribal homelands and promote tribal self-governance. There's only so much that we can do administratively to support tribes. Congress needs to do its part. The HEARTH Act was a major accomplishment for the past Congress. Our hope is that the current Committees can build off that and work to make even greater progress for Indian country. We also are working through numerous initiatives with individual tribes. Deputy Assistant Secretary Ann Marie Bledsoe Downes is working hard to develop and staff the White House Council on Native American Affairs so that it becomes a permanent part of the federal landscape. The White House Council engages nearly all of the federal agencies in Indian country work and insures that the trust responsibility is shared across the federal government."

INTERIOR LOSES BID TO DISMISS TRIBAL TRUST ACCOUNTING LAWSUIT. [Law 360](#) (9/18, 21K) reports that "a Washington, D.C., federal court on Thursday denied the U.S. Department of the Interior's bid to dismiss a suit launched by 10 Native American tribes, finding that it has jurisdiction to hear a dispute alleging the agency neglected accounting rules for the tribes' trusts." U.S. District Judge Thomas F. Hogan "rejected arguments that the tribes' claims for relief are monetary damages in disguise and found that they are within the Administrative Procedure Act's sovereign immunity waiver."

ABOUT 100 WORKERS FURLOUGHED AT CHUKCHANSI GOLD. The [Fresno \(CA\) Bee](#) (9/18, 265K) reports that "about 100 workers at Chukchansi Gold Resort & Casino lost their jobs this week after federal regulators learned about a conflict between tribal gaming officials and the tribal council." The article notes that "also this week, two of the three tribal gaming commissioners and the commission's executive director submitted their resignations, saying the tribal council was trying to usurp their authority." The recent "developments heightened concerns by federal officials over whether the Picayune Rancheria of Chukchansi Indians should be allowed to reopen the casino, now closed for nearly one year."

ADDITIONAL COVERAGE QUINALT INDIAN NATION AMONG NEW TRIBES JOINING LAND BUY-BACK PROGRAM. Additional coverage that "the Quinalt Indian Nation will receive \$19 million from the federal government to buy back land" was provided by the [Daily World \(WA\)](#) (9/18, 1K).

Office of Insular Affairs:

UNIVERSITY OF GUAM OPENS RENOVATED FITNESS CENTER. The [Pacific \(GUM\) Daily News](#) (9/16, 61K) reports that "there was a ribbon-cutting ceremony Sept. 16 for the University of Guam Calvo Field House Triton Fitness Center." In his opening remarks, Keith Aughenbaugh, grants management specialist at the U.S. Department of the Interior Office of Insular Affairs, said, "I've seen it progress from not so good to wonderful." The article notes that "the renovations are just the first phase of a two-phase, \$3 million project funded by the U.S. Department of the Interior and the University of Guam capital improvement project fund to update the UOG Calvo Field House."

Additional coverage was provided by the [Pacific News Center](#) (9/17).

Tackling America's Water Challenges:

YUROK TRIBE WITHDRAWING FROM KLAMATH AGREEMENTS. The [Siskiyou \(CA\) Daily News](#) (9/17, 16K) reports that "the Yurok Tribe has issued a notice that it is withdrawing from the two Klamath River agreements signed by a number of parties five years ago in an effort to remove dams on the river and bring in targeted funding to the basin." The article notes that "the agreements – the Klamath Hydroelectric Settlement Agreement and the Klamath Basin Restoration Agreement – created a framework for the possible removal of four dams on the Klamath River and a series of restoration programs, respectively." A press release stated, "Unfortunately, Congress has failed to pass legislation authorizing the agreements, and over time the bargained for benefits of the agreements have become unachievable. The Tribe is left with no choice other than to withdraw from the Klamath Agreements."

Securing America's Energy Future:

Renewable Energy:

BOEM MOVES TO LEASE NORTH CAROLINA WATERS FOR WIND ENERGY. The [Greenwire](#) (9/17, Subscription Publication) reports that the Interior Department announced Thursday that "it completed its environmental review of plans to lease up to 308,000 acres of federal waters off North Carolina for commercial wind farm development." The BOEM "released a revised environmental assessment that concluded the leasing plan would have no significant impacts on the ocean or its users." The bureau will "next decide whether to issue one or more commercial leases within three wind energy areas including a 122,000-acre site about 28 miles off the coast of Kitty Hawk and two additional areas of 52,000 acres and 134,000 acres beginning about 12 miles off Cape Fear."

Additional coverage was provided by the [Raleigh \(NC\) News & Observer](#) (9/18, 354K), the [Carteret County \(NC\) News-Times](#) (9/18, 28K), the [Carteret County \(NC\) News-Times](#) (9/18, 28K), the [Coastal Review](#) (9/18), and [reNews](#) (9/18).

Onshore Energy Development:

CONSERVATION GROUP SAYS SAGE GROUSE PROTECTION, DRILLING CAN COEXIST. The [Greenwire](#) (9/17, Subscription Publication) reports that "priority greater sage grouse habitat in proposed federal grouse conservation plans rarely overlaps with areas deemed viable for oil and natural gas development and should have little to no impact on the industry, according to an analysis of the plans from a government watchdog group." The analysis by the Western Values Project was "immediately criticized as 'incomplete and misleading' by oil and gas industry leaders." Industry groups claim that "the sweeping federal directives amending dozens of Bureau of Land Management and Forest Service land-use plans to adopt grouse protections across millions of acres in 10 states would negatively affect fossil fuel development on public lands." Western Values Project, however, says "its latest analysis is meant to discredit those claims just days before BLM and the Forest Service are expected to finalize the plans."

Also reporting on the story is [The Hill](#) (9/17, Henry, 471K).

Colorado Seeks Approval Of Sage Grouse Protection Measure. The [AP](#) (9/18, 2 28M) reports that "Colorado asked the federal government Thursday to approve a habitat exchange that would let energy companies and others offset damage to the habitat of the greater sage grouse by financing improvements elsewhere." According to the article, "the proposal — a key part of the state's effort to protect the birds — was made by Gov. John Hickenlooper to the U.S. Fish and Wildlife Service and the Bureau of Land Management as a way to mitigate habitat damage from oil and gas drilling and other development." The article notes that "other states have proposed similar exchanges in hopes of keeping the sage grouse from being listed as threatened or endangered under the federal Endangered Species Act, which would trigger tougher conservation rules."

Additional coverage was provided by the [Washington \(DC\) Times](#) (9/18, Elliott, 344K), the [San Francisco \(CA\) Chronicle](#) (9/18, Subscription Publication, 3.35M), the [Denver \(CO\) Business Journal](#) (9/18, Subscription Publication, 41K), and [KCNC-TV Denver \(CO\)](#) Denver (9/17, 79K).

HEARING HELD ON STREAM PROTECTION RULE IN CHARLESTON. The [Charleston \(WV\) Gazette-Mail](#) (9/17) reports that "more than 100 people filled an auditorium at the Charleston Civic Center Thursday night to voice their opposition or support for the newly proposed Stream Protection Rule, created by the federal Office of Surface Mining." According to the article, "the comments during Thursday's meeting were less about specifics and more about people's interpretations of how the rule would effect their jobs, West Virginia's economy and the country's electricity supply." And "at times, the meeting was more about theatrics than substance."

[WVVA-TV](#) Bluefield, WV (9/17, 45K) reports that "85 people spoke against the federal proposed Stream Protection Rule." Harry Payne, Chief of Division of Regulatory Support, Office of Surface Mining Reclamation and Enforcement, said, "Certainly we are as concerned about job impact as the people that are impacted directly. One of the reasons we're here is to get comments. If there are any aspects of the rule that they think we can change or revise in a way that will reduce that impact, we welcome those, we want to hear those. While at the same time we are ensuring that the people who live here for generations to come have clean water to drink, fish and swim in."

The [Morgantown \(WV\) Dominion Post](#) (9/18, 52K) reports that "the Coal Forum held a special pro-coal rally at the Civic Center Thursday, Sept. 17, before a public hearing staged by the U.S. Office of Surface Mining regarding a new 6,000-plus Stream Protection Rule."

Additional coverage was provided by the [West Virginia MetroNews](#) (9/17, 6K), the [Bluefield \(WV\) Daily Telegraph](#) (9/18, 45K), the [Charleston \(WV\) Gazette-Mail](#) (9/17), the [Bluefield \(WV\) Daily Telegraph](#) (9/18, 45K), the [Huntington News Network](#) (9/18, 479), and [Williamson \(WV\) Daily News](#) (9/18, 1K).

BLM SEEKS INPUT ON MASTER LEASING PLAN. The [Moab \(UT\) Times-Independent](#) (9/18) reports that "in an effort to expand public comment on its draft Moab Master Leasing Plan (MLP), the Bureau of Land Management (BLM) is hosting an open house Sept. 23." BLM officials said "the 900,000-acre MLP will guide local public lands planning 15 years into the future and provides ground rules for BLM decisions regarding new leases for oil, gas and potash development." Megan Crandall, Utah BLM's external affairs chief, said, "[The MLP was launched] to address a leasing system that was close to the breaking point with nearly half of all proposed parcels receiving community protests and a substantial proportion resulting in litigation. The plans establish a framework for determining which areas are appropriate for responsible exploration and development of oil and gas resources while protecting the area's conservation resources. The reforms were designed to encourage stakeholder input early in the planning process, which reduces protests and litigation and provides developers with greater certainty."

KANSAS EARTHQUAKES FALL WITH INJECTION RESTRICTIONS BUT DATA INSUFFICIENT TO PINPOINT CAUSE. The [Topeka \(KS\) Capital-Journal](#) (9/18, Hart, 109K) reports that on comment from U.S. Geological Survey seismologist Justin Rubinstein, who spoke in Lawrence on Wednesday to representatives from the Kansas Geological Survey and the Kansas Corporation Commission. According to the article, "the number of earthquakes has fallen since the KCC issued an order in March restricting the amount of saltwater that could be injected in Sumner and Harper counties, Rubinstein said, but there isn't yet enough data to pinpoint the order as the cause."

Offshore Energy Development:

NBC ANALYSIS SHELL PLACING BIG BET ON ARCTIC OIL. [NBC Nightly News](#) (9/17, story 10, 3 20, Holt, 7.86M) broadcast the final part of its series on "the melting American Arctic," where Royal Dutch Shell "is placing a bet that no other oil company's making right now." NBC reports that so far, Shell has spent \$7 billion "looking for oil without a barrel to show for it." NBC added, "Some say up to 13 percent of the world's undiscovered oil is in the Arctic and with climate change and more and more melting ice, that oil is now more accessible than ever. But locals here are divided about drilling." NBC broadcast footage from Shell's Alaska operations and spoke with Shell Oil President Marvin Odum on Shell's emergency fleet and rapid response capabilities, as well as interviewing some residents opposed to the drilling.

[NBC News](#) (9/18, 3.73M) also covered the story on its website, reporting that Odum "Said Shell believes in man-made global warming, but that shouldn't put the Arctic off limit." NBC reports that "even as the U.S. shifts to alternative energy sources, it will still need to pump or import oil for decades, he said."

"If it's done in the U.S. waters then we can control how it's done," he said. "And we can be sure it's done the right way."

Royal Dutch Shell CEO: Arctic Production Likely To Occur Nearer To 2030. Drawing on Royal Dutch Shell CEO Ben van Beurden's interview with the BBC, which was published Thursday, the [Seattle Post-Intelligencer](#) (9/18, Connelly, 560K) reports that van Beurden "says oil development in Arctic waters is not a sure thing, and that a great deal rests with what the drilling rig Polar Pioneer finds during an exploration season fast approaching its end." The article notes that van Beurden said he does not see sanctioning a project before 2020, and expects production to occur nearer to 2030.

[Alaska Dispatch News](#) (9/18, 219K) reports that van Beurden "also used the BBC interview to defend Shell's Arctic efforts against environmental critics." Said van Beurden, "I think ultimately the world needs energy. ... Fossil fuels will have a role to play simply because there is not an alternative available in sufficient quantities within the timetable we are talking about."

[KGW-TV](#) Portland, OR (9/17, 6:37 p.m. PDT, 200K) also broadcast coverage of the story.

BOEM Tells Shell To Stick To Deadlines. The [EnergyWire](#) (9/17, Subscription Publication) reports that "Royal Dutch Shell PLC began this year's Arctic drilling season by formally asking federal regulators to give the company a little more time to probe into the oil zone at its Chukchi Sea leases." However, the BOEM told Shell "to stick to the deadlines spelled out in the company's exploration plan, approved by the government in May." The article notes that "under that plan, Shell must pull out of the hydrocarbon-laden rock at the drill site by Sept. 28 but can continue to drill top holes at the company's Burger prospect." Also, "all rigs and support vessels must clear out of the region by late October."

Group Files FOIA Request For Communications Related To Shell's Arctic Drilling Permit. [E&E Publishing](#) (9/17, 705) reports that the Institute for Energy Research's on Thursday "asked the federal government for records of any communications with environmentalists regarding the permitting of Royal Dutch Shell PLC to drill in the Arctic Ocean this summer." The group's Freedom of Information Act request "seeks to 'better understand the reasoning and potential influences' behind permitting decisions that hindered Shell's oil exploration, said ER President Thomas Pyle."

Actors Join "Funny Or Die" Production Team On Greenpeace Ship For Series On Arctic Threats. The [AP](#) (9/18, Joling) reports that actors have joined "a Greenpeace ship in the Greenland Sea with a team from the Funny or Die production company to make a comedy series focused on industrial threats to the Arctic." The actors are Alexander Skarsgard of "True Blood" and Jack McBrayer of "30 Rock," and they joined by Andy Bichlbaum of "The Yes Men" activists. The article also notes other actors opposing Arctic drilling, including Ted Danson and Sam Waterston of "Law and Order."

Shell Executives Make Case For Arctic Drilling To Seattle Business Leaders. The [Puget Sound \(WA\) Business Journal](#) (9/18, Wilhelm, Subscription Publication, 59K) reports that Shell Oil "will spend \$317 million with Seattle-area businesses and state entities over the next two years, according to" an analysis presented to business leaders at a breakfast event on Thursday. Findings were presented by "Shell executives and Alaska consultant McDowell Group," who made a case "for the value of Shell's activities in Seattle." Mark Guadagnini, Shell vice president of Arctic maritime and logistics, spoke at the event about Shell's drilling in the Arctic, and "said the Shell rig 'Polar Pioneer,' which attracted the most attention from protesters while it was in Seattle, is now drilling 'very successfully' in Alaska's Chukchi Sea."

Foss Maritime CEO: Environmental Values Are Not Comprised By Servicing Shell's Oil Rig. The [Puget Sound \(WA\) Business Journal](#) (9/18, Wilhelm, Subscription Publication, 59K) reports that Foss Maritime "continues to fight for the right to service a controversial Arctic oil rig" for Shell at the Port of Seattle's Terminal 5. In comments to a gathering of "100 maritime industrial leaders supportive of Shell Oil and its controversial drilling program north of the Arctic Circle" on Thursday in Seattle, Foss CEO Paul Stevens "said Foss' environmental values are not compromised by servicing the rig for Shell." Stevens "said he believes the operation can be done safely." The article adds that "while operating the West Seattle terminal where the rig is serviced when it's not in the Arctic, Foss this year will spend about \$70 million with 'hundreds of vendors' to support the oil rig, which it said was bringing family wage jobs to people who work with their hands."

BEACH COMMUNITIES OPPOSE OFFSHORE DRILLING. [WHQR-FM](#) Wilmington, NC (9/18) reports that "beach communities from New Jersey to Florida have passed resolutions against" offshore drilling and seismic testing. The article focuses on Kure Beach, where "seismic testing and the potential for offshore drilling has galvanized strong opposition."

The [Coastal Observer \(SC\)](#) (9/18) reports that "Pawleys Island Town Council voted this week to oppose oil drilling off the South Carolina coast," but "it didn't mention natural gas."

ADDITIONAL COVERAGE OF FIELD HEARING ON GULF OFFSHORE ACTIVITY. Additional coverage of the House Committee on Natural Resources' oversight hearing in New Orleans "on the current state of offshore oil and gas activity in the Gulf of Mexico" was provided by the [Maritime Executive](#) (9/18, 21).

America's Great Outdoors:

Bureau of Land Management:

BLM BEGINS ROUNDUP IN WEST DOUGLAS HERD AREA. The [AP](#) (9/18, 2.28M) reports that "almost two dozen horses are in Bureau of Land Management custody after the first day of a roundup in northwest Colorado's West Douglas Herd Area." U.S. District Judge Christopher Cooper held Wednesday that the BLM was "allowed to manage the herd, calling potential harm from the roundup 'minimal.'" BLM spokesman Christopher Joyner said that "all the horses looked healthy as they were baited and trapped."

Additional coverage of the round up of West Douglas wild horses was provided by the [Denver \(CO\) Post](#) (9/18, 787K), the [Washington \(DC\) Times](#) (9/18, 344K), the [Courthouse News](#) (9/17, 7K), [KUSA-TV Denver \(CO\)](#) Denver (9/17, 222K), and [KUSA-TV Denver \(CO\)](#) Denver (9/17, 222K).

Fish and Wildlife Service:

FWS CONSIDERING PROTECTIONS FOR NINE SPECIES. The [Sacramento \(CA\) Bee](#) (9/18, 535K) reports that "the tricolored blackbird, a species whose numbers have plunged in the Central Valley, has been included as one of nine species that the U.S. Fish and Wildlife Service will consider listing as endangered." The decision by the FWS "to consider listing the tricolored blackbird begins a lengthy process that starts Friday with a 90-day public comment period that ends Nov. 17." The FWS said Thursday "it is also considering listing the California spotted owl, Inyo Mountains salamander, Kern Plateau salamander, lesser slender salamander, limestone salamander, Panamint alligator lizard, Shasta salamander and the southern rubber boa."

Also providing coverage is the [San Jose \(CA\) Mercury News](#) (9/17, 626K).

FWS To Consider Protections For California Spotted Owl. The [AP](#) (9/18, 2.28M) reports that "wildlife officials say they'll consider granting California's spotted owl protection under the federal Endangered Species Act." The FWS said "this week that a petition wildlife advocates filed late last year deserves further investigation." According to the article, "organizations including the John Muir Project seek the owl's protection, saying that the logging of forest trees that have been burned in wildfires is driving the owls to extinction."

Additional coverage was provided by the [San Francisco \(CA\) Chronicle](#) (9/18, Subscription Publication, 3.35M) and [KDRV-TV Medford \(OR\)](#) Medford, OR (9/18, 671).

Two Salamanders In Oregon, Washington May Qualify For Protection. The [AP](#) (9/18) reports that the FWS says "two salamanders in Oregon and Washington may qualify for Endangered Species Act protection." The article notes that "the findings on Tuesday about the Cascade torrent salamander and Columbia torrent salamander mean the agency will initiate full status reviews for the species to see if they warrant protection." The move comes "in response to a petition by the Center for Biological Diversity."

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (9/18, 2.28M) and [KATU-TV Portland \(OR\)](#) Portland, OR (9/18, 134K).

Butterfly Found In Arkansas A Possibility For Endangered List. The [Arkansas Democrat Gazette](#) (9/18, 297K) reports that the FWS is "considering adding a butterfly found in Arkansas to the endangered-species list, the agency announced Thursday." The agency will "now gather scientific and commercial information on the status of the orange and black regal fritillary to decide whether it should be listed as threatened or endangered or remain unprotected."

FWS Rejects Petition To Delist Stephens' Kangaroo Rat. The [Riverside \(CA\) Press Enterprise](#) (9/18, 303K) reports that "federal wildlife officials on Thursday, Sept. 17, announced they have rejected a petition from the Riverside County Farm Bureau that demanded the Stephens' kangaroo rat no longer be listed as an endangered species." According to Jane Hendron, a spokeswoman for the FWS, "the bureau's petition lacked substantial information to warrant changing the protected status of the nocturnal rodent." Hendron said, "We still have identified threats to the species. They include fragmented and degraded habitat, and the introduction of non-native species."

NEW BILL WOULD REDUCE SPORT HUNTING. The [E&E Daily](#) (9/17, Subscription Publication) reports that "over two dozen House Democrats yesterday announced their support for a bill to restrict the import of stuffed or mounted 'trophies' of species that have been proposed for protection under the Endangered Species Act." The new bill is "a companion to the 'Conserving Ecosystems by Ceasing the Importation of Large Animal Trophies Act,' or 'CECIL Animal Trophies Act' for short, introduced in the Senate earlier last month by New Jersey Democrat Bob Menendez."

APPEALS COURT FINDS AGAINST ENVIRONMENTAL GROUP IN RARE NEVADA FISH CASE. The [AP](#) (9/18, 344K) reports that "a federal appeals court rejected an environmental advocacy group's claim that the federal government failed to properly protect an endangered fish found only in Nevada's Moapa Valley Wildlife Refuge." The 9th U.S. Circuit Court of Appeals held Thursday there was no evidence the FWS "improperly decided in 2006 that groundwater pumping in the Coyote Spring Valley wouldn't hurt the imperiled Moapa dace."

Additional coverage was provided by [KTVN-TV Reno \(NV\)](#) Reno, NV (9/18, 3K).

National Park Service:

NPS ROLLING OUT PILOT PROGRAM FOR ONLINE PASS SALES. [E&E Publishing](#) (9/17, 705) reports that the NPS "disclosed today that it is looking into making park

passes available online and in local businesses." NPS Deputy Director Peggy O'Dell told Sen. Angus King at an Energy and Natural Resources Committee hearing on public land fees "We hope to have a pilot program up and running in several parks – Acadia [National Park] among them – by January 2016 to test out" instant online pass sales. NPS spokesman Jeffrey Olson "confirmed the timing of the effort." However, he added, "We haven't yet determined the other pilot project parks. We're working with industry to see what solutions are out there that will meet our needs."

Additional coverage was provided by the [Portland \(ME\) Press Herald](#) (9/17, 148K).

WASHINGTON THINK TANK QUESTIONS NPS' BAN ON VAPING. [The Hill](#) (9/18, Wheeler, 471K) reports that the R Street Institute, a Washington, DC think tank, sought to "reverse" a decision by the NPS to ban vaping in all places where it bans tobacco smoking. Joel Nitzkin, a senior fellow for tobacco policy, wrote to NPS Director Jonathan Jarvis on Thursday highlighting research that shows that vapor exhaled by e-cigarette users contains only trace amounts of nicotine and the devices pose "no fire hazard." R Street spokeswoman Nicole Roeberg refused to confirm whether it has received funding from the e-cigarette industry.

Additional coverage of the ban was provided by [Yahoo! Travel](#) (9/18, 794K) and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (9/18, 494K).

NPS' NATIONAL MALL APP OFFERS SELF-GUIDED TOURS. The [Washington Post Magazine](#) (9/15) reports that the NPS' new National Mall app "offers a menu of self-guided tours, including a one-day version that hits 19 monuments and memorials." Also, "a four-hour tour is limited to the major presidential and war memorials and the Washington Monument." According to the article, "the gem of the app, though, is the Off the Beaten Path tour, which guides visitors to spots on the Mall even longtime residents might not have noticed, including the German-American Friendship Garden, dedicated in 1988 to commemorate the first German settlement in 1683."

Additional coverage of the National Mall was provided by the [Washington Post Magazine](#) (9/15).

YOUNG ADULTS SELECTED AS NPS CENTENNIAL VOLUNTEER AMBASSADORS. The [Sierra Star \(CA\)](#) (9/17, 12K) reports that "Claire Finn has been selected as Yosemite National Park's volunteer ambassador." Finn is "one of 70 energetic, young adults who are leading an effort to connect people to their national parks and public lands." NPS Director Jonathan B. Jarvis said, "The National Park Service's Centennial celebration will focus as much on our future as on our past. We are excited that young people, including our Centennial Volunteer Ambassadors, are stepping up as the next generation of conservation leaders. I know this opportunity will enable them to form lasting connections to national parks and the natural world. I also know that their contagious passion will inspire many others to do the same."

BOYS AND GIRLS CLUB TAKING KIDS CAMPING IN SHENANDOAH NATIONAL PARK THIS WEEKEND. [WCAV-TV](#) Charlottesville, VA (9/18, 3K) reports that "the Boys and Girls Club of Central Virginia-Southwood will be taking some kids camping in the Shenandoah National Park this upcoming weekend." The article notes that "it's the Big Camp Out, which is part of the Step Up to the Great Outdoors: From Neighborhood to National Park program the Shenandoah National Park Trust and the National Park Service launched earlier this year." According to the article, "the kids will learn how to pitch a tent and cook on a camp stove as well as hike and play in the woods."

SUPERINTENDENT OF NEW VALLES CALDERA PARK UNIT NAMED. The [Santa Fe New Mexican](#) (9/18, 67K) reports that the NPS has "named a native New Mexican and 10-year federal employee as superintendent of the Valles Caldera National Preserve in the Jemez Mountains near Los Alamos." Jorge Silva-Bañuelos, "who has been serving as executive director of the preserve while it is still operated by the presidentially appointed Valles Caldera Trust, will assume his new job Oct. 1." The NPS "takes over management of the preserve Sept. 30."

GLACIER NATIONAL PARK RAISES ENTRY, CAMPING FEES. The [Helena \(MT\) Independent Record](#) (9/18, 39K) reports that "Glacier National Park will raise its fees for entrance and front-country camping starting in November." The article notes that "the increases are expected to bring an additional \$500,000 annually to the park, which gets to keep 80 percent of the revenue it raises from entry passes and permits." According to park spokeswoman Denise Germann, "that money pays for visitor services and facilities, interpretative programs at campgrounds, trail repair and restoration, restroom improvements, wildlife habitat restoration, road maintenance and the park's shuttle bus system."

RABID DEER KILLED ALONG CHESAPEAKE & OHIO CANAL IN MARYLAND. The [Washington Post](#) (9/18, Martin, 6.76M) reports that "an eight-point rabid buck that charged at National Park Service ranger was killed along the Chesapeake & Ohio Canal in Maryland, an agency spokeswoman said." Jenny Anzelmo-Sarles, a spokeswoman for the NPS, said "a ranger — who was responding to a call about an animal in distress — shot the adult white-tailed deer near Sycamore Landing on Wednesday." According to Anzelmo-Sarles, "the deer looked sick and was having a hard time standing on its own." Anzelmo-Sarles said the "buck was turned over to the Maryland Department of Natural Resources, who performed a necropsy — a wildlife version of an autopsy — and discovered that it tested positive for rabies."

AMTRAK RUNNING "GREAT DOME" CAR FROM ALBANY TO MONTREAL THIS FALL. The [AP](#) (9/18, 2.28M) reports that "Amtrak is again running its 'Great Dome' car between Albany and Montreal during leaf-peeping season." Amtrak is "running the program in partnership with the state Department of Transportation and the National Park Service Trails and Rails program."

YOSEMITE VENDOR SAYS NPS BREACHED CONTRACT. [Law 360](#) (9/18, 21K) reports that "a hospitality company serving visitors to Yosemite National Park hit the federal government with a breach of contract suit Thursday, saying the National Park Service failed to meet its obligation to help the vendor sell assets to its successor when Aramark Corp. outbid the company in June for a new contract."

BODY OF HIKER KILLED BY FLOODING IN UTAH RECOVERED. In continuing coverage, the [CBS Evening News](#) (9/17, story 7, 0:10, Pelley, 5.08M) broadcast that the body of the "last of seven hikers killed when" floodwater "rushed through Zion National Park" in Utah earlier this week has been recovered. [NBC Nightly News](#) (9/17, story 8, 0:20, Holt, 7.86M) aired a similar report last night. The [AP](#) (9/18), [CNN](#) (9/18, Ellis, 5.17M), [NPR](#) (9/17, Wagner, 1.85M), [CBS News](#) (9/18, 7.05M), the [Washington \(DC\) Post](#) (9/18, Press), the [Salt Lake \(UT\) Tribune](#) (9/18, Mims, 492K), [Business Insider](#) (9/18, 2.93M), [WAMU-FM Washington \(DC\)](#) Washington (9/18, 30K), and [WTOL-TV Toledo \(OH\)](#) Toledo, OH (9/18, 56K) also cover this story.

BABYLON VILLAGE'S MUSEUM JOINS NATIONAL REGISTER OF HISTORIC PLACES. [Newsday \(NY\)](#) (9/18, 1.3M) reports that the former Babylon library has been listed on the National Register of Historic Places.

ADDITIONAL COVERAGE OF BAN ON SALES OF BOTTLED WATER AT NATIONAL PARKS. Additional coverage of the ban on sales of bottled water at national parks was provided by the [AlterNet](#) (9/18, 146K).

ADDITIONAL COVERAGE OF GREAT BASIN NATIONAL PARK'S ASTRONOMY FESTIVAL. Additional coverage of Great Basin National Park's Astronomy Festival was provided by [Vegas Seven \(NV\)](#) (9/17).

[Top National News:](#)

MEDIA ANALYSES HOUSE REPUBLICANS DIVIDED AS SHUTDOWN LOOMS. A push by conservatives in the House to defund Planned Parenthood, and the potential government shutdown that could ensue, was largely ignored by the network news broadcasts, with only Andrea Mitchell of [NBC Nightly News](#) (9/17, story 2, 2:10, Holt, 7.86M) mentioning it, in a report on Wednesday night's Republican presidential debate, that congressional Republicans "are threatening to shut down the government by the end of this month over Planned Parenthood funding." Print and online coverage, however, is substantial, describing a sharp GOP split between party leaders — including House Speaker Boehner, whose speakership is portrayed as being under threat due to the issue — and conservative members, unmoved by the argument that Republicans would be blamed for a shutdown. Democrats, meanwhile, are described as unified, with the President, House Minority Leader Pelosi, and Senate Minority Leader Reid firmly opposing any effort to cut off the group's funding.

Indicating that the fight over Planned Parenthood has "prevented Congress from making any further progress on talks to keep the government open," [USA Today](#) (9/18, Singer, 5.23M) reports that House Republicans "will force several votes on the House floor Friday to cut federal funding for Planned Parenthood and transfer that money to other women's health services." It notes, however, that there "does not appear to be any path to get the bills through the Senate." Boehner, who "acknowledged it may be hard to get the bills through the Senate," would not "rule out attempting to add Planned Parenthood language to a type of budget bill that is immune from Senate filibuster rules and only requires a majority vote to pass."

A [New York Times](#) (9/18, Herszenhorn, Subscription Publication, 11.82M) story says the House "voted to move forward with a bill that would end government financing for Planned Parenthood." While the move "intensifies" the abortion fight there are "signs that congressional leaders were counting on a fallback plan to keep the government functioning temporarily, roughly at last year's spending levels."

The [Huffington Post](#) (9/17, Bassett, 164K) reported that House GOP leaders "are hoping to appease the party's conservative base" with the votes, and the [AP](#) (9/18, Taylor, Fram) similarly notes that GOP leaders sought to provide "an outlet for GOP lawmakers' outrage" over secretly-recorded videos which abortion opponents say "show that Planned Parenthood illegally profits from selling tissue from aborted fetuses to medical researchers." The AP says that advancing "a short-term spending bill to keep the government open past an Oct. 1 deadline remains a major headache for House GOP leaders, chiefly" Boehner, adding that "hard-right lawmakers and tea partiers are threatening to try to topple"

him. In an analysis, the [New York Times](#) (9/18, Steinhauer, Subscription Publication, 11 82M) says "abortion politics" are "posing the greatest threat to [Boehner's] speakership since he ascended to that position four years ago." Boehner is being forced "to choose between the pragmatic approach embraced by" Senate Majority Leader McConnell "to keep the government open and take on the Planned Parenthood fight later — a choice that could lead to an embarrassing challenge to the speaker — or fling himself headfirst into yet another spending showdown in which conservatives have little chance of prevailing."

Fred Barnes said on [Fox News' Special Report with Bret Baier](#) (9/17, 1.53M) that Republicans "do not have the votes," adding that "Ted Cruz is right about this one thing. If every time Obama says he going to veto something, and you say, 'Oh well we can't bring that up,' Republicans really take themselves out of the game. You can't wait on everything on the hope that maybe, just maybe in 2016, a Republican president will be elected. You are just giving up too much power to Obama."

[Government Executive](#) (9/17, Newhauser, 3K) reported that after a meeting Wednesday, House Republicans were "no closer to a decision about how to fund the government at month's end while addressing activists' concerns about choking off federal funding for Planned Parenthood," adding that it is "unclear where GOP leaders will find consensus in their conference." [The Hill](#) (9/17, Shabad, Sullivan, 471K) said House Republican leaders are seeking to convince their caucus that risking a shutdown over Planned Parenthood funding "would be a bad move." During a closed-door conference meeting Thursday, GOP leaders presented "polling data from the House GOP's campaign arm showing Republicans would be blamed for a government shutdown."

Jeff Birnbaum said on [Fox News' Special Report with Bret Baier](#) (9/17, 1.53M), "I don't think the government is going to shut down over this. ... If the government is shut down, it would be terrible for the Republican party in particular. It will hurt the establishment candidates for president who are trying to come up against the outsiders that are at the top of the polls. It would be very damaging and the ugliness in between could also damage the establishment." Mort Kondracke said on [Fox News' Special Report with Bret Baier](#) (9/17, 1.53M), "I think it's crazy for Republicans to shut the government shutdown for something that deserves investigation but is not resolved."

[Roll Call](#) (9/18, Dennis, 113K) noted that as Republicans "are splintering into factions," Democratic leaders "put forward a united front Thursday" following a meeting with the President. Speaking to reporters outside the West Wing, Pelosi and Reid "laid out their demands," which include "a short-term continuing resolution to keep the government open without riders and with any additional funding equally divided between defense and non-defense programs 'dollar for dollar.'" Roll Call added that the President, Reid, and Pelosi "are committed to block any Republican attempts to defund Planned Parenthood." Under the headline "Congress Inching Ever Closer Toward Government Shutdown," the [Washington Post](#) (9/18, A1, Mufson, Snell, 6.76M) says in a front-page story that Reid and Pelosi "said they are willing to back a continuing resolution to keep the government open, but insisted that such a stopgap measure be a short-term one," and that "it not include any language about ideological issues, such as funding for Planned Parenthood."

[Reuters](#) (9/18, Lambert) quotes Reid as saying, "The three of us agree that we want a short-term CR (continuing resolution). We want to make sure that the riders are off that. We want to make sure we have equal money for defense and non-defense." [The Hill](#) (9/17, Fabian, 471K) said the Democratic leaders "sought to present a united front in the contentious budget battle, even as Reid and Pelosi extended an olive branch to their Republican counterparts, Senate Majority Leader Mitch McConnell (Ky.) and Speaker John Boehner (Ohio), to sit down and hammer out a comprehensive budget agreement."

Noting that more than 40 conservative House Republicans have said they will oppose any appropriations that include funding for Planned Parenthood, a [Bloomberg Politics](#) (9/18, Wasson, 247K) analysis says Boehner is left with "only one way to avoid a shutdown: ask his Democratic counterpart, House Minority Leader Nancy Pelosi, for help." [Politico](#) (9/17, French, 942K) said that Pelosi met with Boehner on Thursday evening "to discuss the looming government funding crisis." Boehner initiated the meeting "after Pelosi had been pressuring him for weeks to start negotiations on legislation that would keep the government open past Sept. 30."

Meanwhile, in her weekly press conference Thursday, Pelosi said Republicans were trying to block Planned Parenthood funding "because they don't respect women and don't believe in family planning," the [Washington Times](#) (9/18, Miller, 344K) reports. Pelosi argued that "Republicans have always been out to get Planned Parenthood," saying, "I can attest personally to the fact that for decades that I've been here they have been out to get Planned Parenthood because they don't believe in family planning."

The [Huffington Post](#) (9/17, Bassett, 164K) also reported that the White House said in a statement Thursday that the President "strongly opposes" and would veto a pair of House bills that would strip federal funds from Planned Parenthood and impose new restrictions on abortion," arguing that the measures "would have the same consequence of limiting women's health care choices." [The Hill](#) (9/17, Ferris, 471K) said the Administration argued that the "GOP's 'fascination' with defunding Planned Parenthood" has "brought the government to the brink of a shutdown." White House press secretary Josh Earnest placed the blame on Republicans "and their field of presidential candidates" for "concentrating attention on defunding the women's health provider at a time when they should be funding the government." The Hill called Earnest's comments "a preview of the White House's plan of attack if Republicans fail to reach a government funding deal by Sept. 30." [Reuters](#) (9/18, Rascoe) notes that Earnest called on Republicans to fund the budget on time to avoid a shutdown, adding that while he said Republicans should negotiate with Democrats, he did not rule out talks between the President and GOP leaders.

[Politico](#) (9/17, Everett, Haberkorn, 942K) noted that the Senate "is laying the groundwork for a potential end game if the House stumbles." Following a vote Tuesday "to ban abortions after 20 weeks of pregnancy," the Senate "would take up a government spending bill that cuts Planned Parenthood funding, knowing that it will fail." Then, "assuming that maneuver is blocked, at the 11th hour the Senate would proceed to a spending bill that includes funding for Planned Parenthood," which lawmakers and aides believe "would draw Democratic support and clear the Senate's 60-vote threshold."

Clinton Urges Republicans Not To Shut Down Government. In a statement Thursday, Hillary Clinton "warn[ed] congressional Republicans not to shut down the federal government," the [AP](#) (9/18, Thomas) reports. Clinton said Boehner "and his Republican colleagues 'have a job to do, and they should do it.'" [Politico](#) (9/17, DeBenedetti, 942K) said Clinton also "accused the GOP presidential contenders of using 'hateful rhetoric and lies' in Wednesday night's debate," saying in her statement, "It's bad enough to see hateful rhetoric and lies in a presidential debate. But just like the candidates on stage last night, Republicans in Congress want to defund Planned Parenthood. And they're willing to shut down the federal government to do it, no matter how bad it is for our country."

Clinton said on [CNN's Situation Room](#) (9/17, 554K), "What this is about is the fact that some of the Planned Parenthood facilities perform abortions which is legal under the laws of the United States. I understand that the Republican party and particularly the candidates we heard from last night wish that were not the case, wish that abortion were illegal and they could turn the clock back. So I think we ought to be very clear that Planned Parenthood has served to provide health care, necessary health care, for millions of women. And I think it deserves not only our support but the continuing funding from the federal government so that these women and girls who are seeking the kinds of services that are provided will be able to achieve that."

Planned Parenthood Calls Fiorina A "Liar." Planned Parenthood called Carly Fiorina "a liar" for her "characterization of videos released by anti-abortion activists" during Wednesday night's GOP debate, [Politico](#) (9/17, Gass, 942K) reported. Responding to Fiorina's claim that the videos show "a fully formed fetus on the table, its heart beating, its legs kicking while someone says, 'We have to keep it alive to harvest its brain,'" Planned Parenthood spokesman Eric Ferrero said in an email Thursday, "The images show nothing like what Carly Fiorina said they do, and they have nothing to do with Planned Parenthood. The video footage that she claims exists — and that she 'dared' people to watch — does not exist. ... We have a word for that: t's a lie. And it's not the first time Carly Fiorina has lied." On [NBC Nightly News](#) (9/17, story 2, 2:10, Holt, 7 86M), Andrea Mitchell called Fiorina's attack "fierce," but noted that "the women's health group said Fiorina was a liar, sending her a letter saying, 'Your claims are completely false.'" The [Washington Post](#) (9/18, 6.76M) notes in an editorial that Fiorina's "characterizations" of the videos "are false," adding that the images she described "don't exist."

Robert Costa of the Washington Post said on [MSNBC's Hardball with Chris Matthews](#) (9/17, 713K) that Fiorina "was making an overt appeal to anti-abortion conservative women. I think that was actually the most telling moment of the debate, rather than her exchanges with Trump. You see Fiorina seeing a lane on the far right. She sees herself as an outsider, could compete with Carson and Trump."

WPost: GOP Debate "Exacerbated" Shutdown Threat. The [Washington Post](#) (9/18, 6.76M) editorial is also critical of the entire GOP presidential field, saying that during the debate Wednesday, they "by and large exacerbated the threat of a shutdown with inflammatory pandering on the subject of Planned Parenthood." The Post argues that "most Americans don't want Planned Parenthood defunded and most certainly don't want the government closed over the issue."

Reich Urges Support For Planned Parenthood Funding. In a [Christian Science Monitor](#) (9/17, 455K) op-ed, former Labor Secretary Robert Reich says it is "up to all of us to fight back" against the "attack" on Planned Parenthood. Reich argues that public spending on family planning makes "economic sense," because when women "have control over their lives, they can contribute even more to the economy, better break the glass ceiling, equalize the pay gap, and much more."

Appeals Court Weighs-In On Abortion Videos. [Politico](#) (9/17, Gerstein, 942K) reported in its "Under The Radar" blog that after US District Court Judge William Orrick issued a temporary restraining order in July barring the Center for Medical Progress "from releasing videos of National Abortion Federation

Scheduled Floor Action

House

Friday, Sept. 18, 9 a.m.

The House reconvenes at 9 a.m. for legislative business. The chamber is expected to consider a bill (HR 3134) that would defund Planned Parenthood for one year and a bill that would address the care of infants if born alive during the performance of an abortion.

Agenda

HR 3134 — A bill to provide for a moratorium on Federal funding to Planned Parenthood Federation of America, Inc.

Senate

Recent Legislative Activity of Interest

Senate:

By Mr. **ENZI** (for himself and Mr. **BARRASSO**):

S. 2039. A bill to designate the mountain at the Devils Tower National Monument, Wyoming, as Devils Tower, and for other purposes; to the Committee on Energy and Natural Resources.

House:

By Mr. **UPTON**:

H.R. 8. A bill to modernize energy infrastructure, build a 21st century energy and manufacturing workforce, bolster America's energy security and diplomacy, and promote energy efficiency and government accountability, and for other purposes; to the Committee on Energy and Commerce, and in addition to the Committees on Science, Space, and Technology, Education and the Workforce, Oversight and Government Reform, and Foreign Affairs, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mr. **SENSENBRENNER** (for himself, Ms. **MOORE**, Mr. **KIND**, Mr. **RIBBLE**, Mr. **GROTHMAN**, Mr. **POCAN**, Mr. **NOLAN**, and Ms. **ESTY**):

H.R. 3511. A bill to clarify the status of the North Country, Ice Age, and New England National Scenic Trails as units of the National Park System, and for other purposes; to the Committee on Natural Resources.

By Mr. **JOLLY**:

H.R. 3521. A bill to authorize grants for data collection for use in stock assessments of red snapper and other reef fish species in the Gulf of Mexico, and for other purposes; to the Committee on Natural Resources.

By Mr. **GRIJALVA** (for himself, Mr. **SCHIFF**, Mr. **HONDA**, Ms. **BROWNLEY** of California, Mr. **VAN HOLLEN**, Mr. **CARTWRIGHT**, Ms. **TITUS**, Ms. **BORDALLO**, Mr. **BLUMENAUER**, Ms. **BROWN** of Florida, Mr. **CÁRDENAS**, Mr. **COHEN**, Mr. **CONYERS**, Mrs. **DAVIS** of California, Ms. **EDWARDS**, Mr. **FARR**, Ms. **NORTON**, Mr. **KEATING**, Mr. **TED LIEU** of California, Mr. **LOEBSACK**, Mr. **LOWENTHAL**, Mr. **LYNCH**, Mr. **MEEKS**, Mr. **QUIGLEY**, Mr. **RANGEL**, Ms. **ROYBAL-ALLARD**, Mr. **SHERMAN**, and Ms. **JUDY CHU** of California):

H.R. 3526. A bill to amend the Endangered Species Act of 1973 to extend the import- and export-related provision of that Act to species proposed for listing as threatened or endangered under that Act; to the Committee on Natural Resources, and in addition to the Committees on Foreign Affairs, and Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned.

By Mrs. **LUMMIS**:

H.R. 3527. A bill to designate the mountain at the Devils Tower National Monument, Wyoming, as Devils Tower, and for other purposes; to the Committee on Natural Resources.

Reports Filed: Reports were filed today as follows:

[H. Res. 420](#), providing for consideration of the bill ([H.R. 348](#)) to provide for improved coordination of agency actions in the preparation and adoption of environmental documents for permitting determinations, and for other purposes; providing for consideration of the bill ([H.R. 758](#)) to amend Rule 11 of the Federal Rules of Civil Procedure to improve attorney accountability, and for other purposes; and providing for consideration of motions to suspend the rules (H. Rept. 114-261)

Suspensions: The House agreed to suspend the rules and pass the following measures:

National Windstorm Impact Reduction Act Reauthorization of 2015: Concur in the Senate amendment to [H.R. 23](#), to reauthorize the National Windstorm Impact Reduction Program;

Gerardo Hernandez Airport Security Act of 2015: Concur in the Senate amendment to [H.R. 720](#), to improve intergovernmental planning for and communication during security incidents at domestic airports;

Allowing the Miami Tribe of Oklahoma to lease or transfer certain lands: [H.R. 487](#), to allow the Miami Tribe of Oklahoma to lease or transfer certain lands;

Medgar Evers House Study Act: [H.R. 959](#), amended, to authorize the Secretary of the Interior to conduct a special resource study of the Medgar Evers House, located in Jackson, Mississippi;

National Forest Small Tracts Act Amendments Act of 2015: [H.R. 1214](#), amended, to amend the Small Tracts Act to expand the authority of the Secretary of Agriculture to sell or exchange small parcels of National Forest System land to enhance the management of the National Forest System, and to resolve minor encroachments, by a $\frac{2}{3}$ yeas-and-nays vote of 403 yeas with none voting "nay", Roll No. 495;

John Muir National Historic Site Expansion Act: [H.R. 1289](#), amended, to authorize the Secretary of the Interior to acquire approximately 44 acres of land in Martinez, California;

Elkhorn Ranch and White River National Forest Conveyance Act of 2015: [H.R. 1554](#), to require a land conveyance involving the Elkhorn Ranch and the White River National Forest in the State of Colorado;

National Liberty Memorial Clarification Act of 2015: [H.R. 1949](#), amended, to provide for the consideration and submission of site and design proposals for the National Liberty Memorial approved for establishment in the District of Columbia, by a $\frac{2}{3}$ yeas-and-nays vote of 402 yeas with none voting "nay", Roll No. 496;

Western Oregon Tribal Fairness Act: [H.R. 2791](#), to require that certain Federal lands be held in trust by the United States for the benefit of certain Indian tribes in Oregon;

New Mexico Navajo Water Settlement Technical Corrections Act: [S. 501](#), to make technical corrections to the Navajo water rights settlement in the State of New Mexico;

Providing for the conveyance of certain property to the Yukon Kuskokwim Health Corporation located in Bethel, Alaska: [S. 230](#), to provide for the conveyance of certain property to the Yukon Kuskokwim Health Corporation located in Bethel, Alaska; and

Crags, Colorado Land Exchange Act of 2015: [H.R. 2223](#), to authorize, direct, expedite, and facilitate a land exchange in El Paso and Teller Counties, Colorado.

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinintelligence.com.

DATE MONDAY, SEPTEMBER 14, 2015 7 00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS

- + Secretary Jewell Celebrates River Day In Lowell.
- + Conservation Efforts Help New England Cottontail Rebound.
- + Fast-Moving California Wildfire Leads To State Of Emergency Declarations.
- + Mine Clean-up In Four States Suspended.
- + Hunting, Fishing Business Call On Congress To Reauthorize LWCF.
- + Protesters Oppose Telescope On Mauna Kea In Hawaii.
- + National Renewable Energy Laboratory Helps Interior Reduce Energy Usage.
- + Environmentalists Urge Obama Administration To Stop Issuing New Leases For Fossil Fuel Production.
- + Former Secretary Of State Shultz Promotes National Parks And Treasures.
- + Petition Calls For Designation Of National Monuments.
- + Additional Coverage: Flight 93 Memorial Museum.
- + Additional Coverage: Secretary Jewell's visit to Colville Reservation.
- + Additional Coverage Of Border Crossing Between Big Bend National Park To Boquillas.
- + Secretary Jewell Criticized For Blocking King Cove Road.

EMPOWERING NATIVE AMERICAN COMMUNITIES

- + Additional Coverage Of Washington Football Team's Name.

TACKLING AMERICA'S WATER CHALLENGES

- + Irrigation Settlement To Be Signed With Westlands Water District.
- + BOR Awards Contract To Improve Accessibility At Hungry Horse Dam.
- + Study Examines Impacts Of Colorado River Shortage.
- + Low Folsom Lake Levels Unveil Gold Rush-Era Town.

SECURING AMERICA'S ENERGY FUTURE

Renewable Energy:

- + BOEM Discusses Offshore Wind Energy Concerns With South Carolina Advisory Committee.
- + Two Louisiana Firms Play Key Roles In Rhode Island Offshore Wind Farm.
- + Developer Eyes Opportunities For WindFloats.
- + Migration Of Bighorn Sheep Threatened By New Solar Facility.

Onshore Energy Development:

- + Murray Criticizes Stream Protection Rule.
- + Trapper Mine Environmental Review Proposed.
- + Rep. Thompson Expresses Doubt About Power Plus Plan.
- + Illinois Coal Miners Anticipate Changes Under New Federal Regulations.
- + Lawsuit Filed Over Flat Canyon Tract Lease.
- + Possible Exploration Near South Park Worries Some Residents.
- + Trial Over Platinum Mining Operation Set To Begin.
- + Oil And Gas Study To Be Launched In Colorado Next Year.
- + Additional Coverage Of Public Listening Session On Federal Coal Program.

Offshore Energy Development:

- + Obama Administration To Auction Acres In Gulf Of Mexico For Drilling.
- + Analysis: Alaskans Divided Over Shell's Offshore Drilling Plans.
- + BSEE Points To Errors In Gulf Blowout.
- + House Committee To Meet About Oil, Gas Rules In New Orleans.
- + Opposition To Offshore Drilling Mounts.

AMERICA'S GREAT OUTDOORS

Bureau of Land Management:

- + BLM Won't Merge Arizona, New Mexico Offices.
- + Another Federal Judge Recused In ATV Protest Case.
- + Bill Would Create Wilderness Areas Near Rio Grande del Norte National Monument.
- + Lawsuit Filed To Halt Scheduled Wild Horse Roundup In Colorado.
- + Washington County Officials Outraged By Draft BLM Plan..
- + BLM Field Manager In Prineville On The Job.

Fish and Wildlife Service:

- + FWS Faces Decision On Sage Grouse.
- + FWS To Rule On Ten Species Within Year.
- + FWS Launching "Soft Opening" Of Rocky Flats National Wildlife Refuge.
- + Sacramento National Wildlife Refuge Mostly Dry.
- + South Bay Salt Pond Restoration Project Helps Endangered Species Rebound.

- + Young Hunters Participate On 20th Youth Waterfowl Day.
- + Additional Coverage Of Ruling On Lesser Prairie Chicken Status.
- + Additional Coverage Of Effort To Save Monarch Butterfly.

National Park Service:

- + NPS Seeks To Connect With Youth.
- + Sen Murphy Calls On NPS To Sell More American-made Goods At Stores.
- + Subaru Launches Video Series On NPS' Zero Landfill Goal.
- + 9/11 Memorial Officials Seek Cash From Congress On Anniversary Of Attacks.
- + Hartford Reaches Key Agreement On Coltsville National Park.
- + Test Run Held For Twin Cities Canoe- And Bike-sharing Program.
- + Educators Participate In NPS Teacher Ranger Teacher Program.
- + NPS Approves Plans For New Marine Reserve Within Biscayne National Park.
- + Some Landowners Allowed To Hunt On Grand Teton Park Inholdings.
- + Hangar At Fort Barry Gets Makeover.
- + CDC Studying Puzzling Rise In Rabbit Fever In Western US.
- + NPS To Close Anacostia Marina.
- + Great Smoky Mountains National Park Closes Whiteoak Sink Area To Protect Bat Population.
- + Yellowstone Attendance Exceeds Past Records.
- + Concessionaire Making Improvements At Shenandoah National Park.
- + Body Of Missing Student Found In Yosemite National Park.
- + Central Berwyn Bungalow Historic District Added To National Register Of Historic Places.
- + Additional Coverage Of "Every Kid In A Park" Initiative.
- + WPost: Lafayette Square Should Be Kept Open During Chinese President's Visit.
- + News Sentinel: Oak Ridge Workers Contributions To WWII Should Not Be Forgotten.

US Geological Survey:

- + USGS Scientists Conducting Drought Study In Six Western States.
- + Additional Coverage: Denali Shrinks 10 Feet.

TOP NATIONAL NEWS

- + Republicans Cite Security Concerns Over Administration Plan To Admit Syrian Refugees.
- + Clinton Leads Trump By Three In General Election Match-Up; Both Lead Primary Fields.
- + Trump Takes Aim At High CEO Salaries.

EDITORIAL WRAP-UP

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

BIG PICTURE

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE

- + Today's Events In Washington.

LAST LAUGHS

- + Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL CELEBRATES RIVER DAY IN LOWELL. The [Lowell \(MA\) Sun](#) (9/13, 111K) reports that "during her first visit to Lowell, U.S. Secretary of the Interior Sally Jewell celebrated the 9th Annual River Day on Saturday with a pristine boat ride along the city's 'urban canyon' – the Pawtucket Canal." According to the article, "the boat tour began at Minute Man National Historical Park in Concord and ended at Lowell's Lower Locks Gatehouse, where Jewell spoke to a crowd at nearby Middlesex Community College." Jewell "told the crowd that through partnerships the history our nation's rivers and their importance in the community and the country needs to be celebrated and flow forward." She warned that on Sept. 30, the LWCF "will expire unless Congress re-authorizes it for another 50 years." Also, "turning to a group of fourth-graders in the crowd, Jewell announced the kickoff on Sept. 1 of the Obama Administration's 'Every Kid in a Park' initiative."

The [Concord \(NH\) Monitor](#) (9/13, 66K) reports that "work could begin as early as this year on the first leg of the long-discussed Merrimack River Greenway Trail, thanks in part to \$100,000 from" the LWCF.

Additional coverage was provided by the [Lowell \(MA\) Sun](#) (9/13, 111K), the [Lowell \(MA\) Sun](#) (9/13, 111K), the [Fitchburg \(MA\) Sentinel and Enterprise](#) (9/13, 38K), the [MetroWest \(MA\) Daily News](#) (9/11, 79K) and the [MetroWest \(MA\) Daily News](#) (9/11, 79K).

CONSERVATION EFFORTS HELP NEW ENGLAND COTTONTAIL REBOUND. The [AP](#) (9/13, 3.97M) reports that "public and private conservation efforts have helped the New England cottontail rebound to the point where it can be taken off the list of species under consideration for protection, the federal government said Friday." The article notes that "during the past three years, federal officials worked with private landowners to restore more than 4,400 acres of habitat by removing trees and invasive species, planting native shrubs and creating brush piles," and "to date, state, federal and private entities have spent \$33 million for land management and acquisition, research, monitoring and outreach to protect the cottontail." According to the article, "the decision to delist the rabbit, the first time a species has come off the list in New England, means the agency has 'high certainty' that conservation programs would be successful and the species will recover without formal protections."

[The Hill](#) (9/13, Cama, 471K) reports that "Interior Secretary Sally Jewell, FWS Director Dan Ashe, Sen. Jeanne Shaheen (R-N.H.) and others gathered in New Hampshire Friday to announce the finding."

The [Greenwire](#) (9/11, Subscription Publication) reports that Jewell said, "Thanks to the dedication of many partners, we can now say that future generations of Americans will know the cottontail – and not just through a character in children's literature." She added, "This is a great Endangered Species Act success story of how proactive conservation across a landscape can benefit not only the cottontail, but other wildlife, and people who rely on healthy New England forests."

Additional coverage was provided by the [Valley News \(VT\)](#) (9/13, 11K), the [Portland \(ME\) Press Herald](#) (9/11, 148K), the [New Hampshire Union Leader](#) (9/13, 131K), the [New London \(CT\) Day](#) (9/11, 77K), the [Clay Center \(KS\) Dispatch](#) (9/13, 9K), the [Washington \(DC\) Times](#) (9/11, 344K), the [Pioneer News](#) (9/13), [New Hampshire Public Radio](#) (9/13, 2K), the [Daily Mail \(UK\)](#) (9/13, 5.59M), [Newsday \(NY\)](#) (9/13, 1.3M), [US News & World Report](#) (9/11, 811K), the [Washington \(DC\) Post](#) (9/11, Press, 6.76M), [WABI-TV Bangor \(ME\)](#) Bangor, ME (9/11, 5K), [WCVB-TV Boston \(MA\)](#) Boston (9/13, 246K), [WJAX-TV Jacksonville \(FL\)](#) Jacksonville, FL (9/13, 72K), [WTIC-TV Hartford \(CT\)](#) Hartford, CT (9/11, 100K), [KFVS-TV Cape Girardeau \(MO\)](#) Cape Girardeau, MO (9/13, 24K), [WFSB-TV New Haven \(CT\)](#) New Haven, CT (9/13, 269K), [WLNE-TV Providence \(RI\)](#) Providence, RI (9/13, 24K), the [Boston Globe](#) (9/11, Abel, 1.1M), the [Portland \(ME\) Press Herald](#) (9/11, 148K), the [Concord \(NH\) Monitor](#) (9/11, 66K), [Boston](#) (9/11, 658K), the [Foster's Daily Democrat \(NH\)](#) (9/11, Casey Conley Cconley@, fosters.com, 9K), [WSB-TV Atlanta](#) (9/13, 534K), the [Bristol \(VA\) Herald Courier](#) (9/13), the [San Francisco Chronicle](#) (9/13, Subscription Publication, 3.35M), [WFSB](#) New Haven, CT (9/13, 269K), [New York Times](#) (9/11, Press, Subscription Publication, 11.82M), [Worcester Telegram](#) (9/11, 175K), [WCAX](#) Burlington, VT (9/13, 105K), [Sun Herald](#) (9/11, 129K), and [FOX News](#) (9/11, 8 91M).

FAST-MOVING CALIFORNIA WILDFIRE LEADS TO STATE OF EMERGENCY DECLARATIONS. [NBC Nightly News](#) (9/13, lead story, 3:15, Quintanilla, 7.86M) opened Sunday evening by reporting that "the historic wildfire season in California has taken another turn for the worse. This one is called the Valley Fire north of Sacramento, and in just 24 hours it's grown to some 60 square miles."

The [CBS Evening News](#) (9/13, lead story, 3:25, Dahler, 5 08M) reported in its lead story that the "incredibly fast-moving wildfire in northern California is scorching land at a rate of speed fire officials have not seen in 30 years." [ABC World News](#) (9/13, lead story, 3 00, Llamas, 5.84M) also led with the story, with correspondent Aditi Roy saying the fire grew "200 times larger in just five hours overnight...forcing at least 17,000 people out of their homes."

The [Los Angeles Times](#) (9/14, Romney, 4 07M) reports Gov. Jerry Brown declared a state of emergency for Lake and Napa counties, and “authorities have issued mandatory evacuation orders” for several communities. The [New York Times](#) (9/14, Lovett, Southall, Subscription Publication, 11.82M) also reports.

Wildfires Rage Along West Coast. The [Washington Post](#) (9/13, Fears, 6.76M) discusses the large wildfires that are burning across California, Oregon, Washington, and Alaska, noting “Never have so many acres burned with so much time left in the wildfire season.”

In its lead story, [NBC Nightly News](#) (9/12, lead story, 2:50, Hill, 7.86M) focused on the Butte Fire, “a 100-square-mile inferno east of Sacramento” that “is growing at an alarming rate.” Gadi Schwartz also reported on “the massive Rough Fire, California’s largest at 128,000 acres burning now for nearly a month and a half. Both fires leaving behind more scorched earth every day in a fire season that is far from over.”

Carter Evans reported in the lead story for the [CBS Evening News](#) (9/12, lead story, 2:15, Axelrod, 5.08M) about the two fires, noting “Record heat and strong winds have made what was a small fire in Butte County explosive as it bears down on several mountain towns.” However, Evans said “much cooler weather next week could finally give firefighters a break.”

Additional coverage of wildfires was provided by the [Associated Press](#) (9/14, Wozniacka), the [Washington \(DC\) Post](#) (9/14, Press, 6.76M), the [Daily Mail \(UK\)](#) (9/12, Reporter, 5.59M), the [Washington \(DC\) Times](#) (9/12), the [Salem \(OR\) Capital Press](#) (9/13, O’Connell, 113K), and the [Walla Walla \(WA\) Union-Bulletin](#) (9/13, 38K).

USGS Says Sage Grouse Face Decline If Wildfires Can’t Be Stopped. The [AP](#) (9/13) reports that “if increasingly destructive wildfires in the Great Basin can’t be stopped, the sage grouse population will be cut in half over the next three decades,” according to a report released Thursday by the USGS. The article notes that “the study also identified potential ways to avert sage grouse declines by classifying areas for their resilience to disturbance and resistance to invasive species such as cheatgrass, and then applying suitable strategies.” It also notes that “public land managers have already been doing that, but the USGS report could fine tune those efforts.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (9/13, Ridler, 344K), the [Fort Collins \(CO\) Coloradoan](#) (9/13, 59K), the [Watertown \(SD\) Public Opinion](#) (9/13), the [Reno \(NV\) Gazette-Journal](#) (9/13, 179K), and the [Oregonian](#) (9/13, 756K).

MINE CLEAN-UP IN FOUR STATES SUSPENDED. The investigation and clean-up of 10 mining complexes in California, Colorado, Montana, and Missouri has been suspended, the [AP](#) (9/13, Brown, Elliott) reports, “because of conditions similar to those that led to a massive wastewater blowout from an inactive Colorado gold mine.” Environmental Protection Agency Assistant Administrator Mathy Stanislaus stated, “We want to take extra caution before we initiate any work.”

GAO Report Criticizes Failure To Locate Abandoned Mines. According to a Government Accountability Report (GOA) released on Friday, the government has no way of locating how many abandoned mines there are on Federal land, the [Wall Street Journal](#) (9/12, Frosch, Berzon, Subscription Publication, 5 95M) reports. The report notes the possibility that thousands of unknown mines exist and pose an environmental and human health threat. Moreover, the report criticizes responsible government agencies for not failing to assess the pollution levels of those mines that have already been identified.

Additional coverage was provided by the [Greenwire](#) (9/11, Subscription Publication).

Analysis: Colorado Mine Incident Shows Difficulty In Cleaning Contaminated Sites. In an analysis piece, the [Wall Street Journal](#) (9/12, Frosch, Berzon, Subscription Publication, 5 95M) asserts that the Colorado mine spill from last month demonstrates the difficulty that the Environmental Protection Agency’s Superfund program has in cleaning up contaminated sites. The Journal notes distrust among impacted communities and cuts to the EPA’s budget.

HUNTING, FISHING BUSINESS CALL ON CONGRESS TO REAUTHORIZE LWCF. The [Fly Rod & Reel](#) (9/13, 146K) reports that 114 hunting and fishing businesses have “sent a letter to House and Senate leadership asking for the speedy reauthorization of the Land and Water Conservation Fund (LWCF), which is set to expire on September 30.” The letter presses “Congress to continue to allow the fund—which is supported by off-shore gas royalties, not taxpayer dollars—to provide quality places for Americans to hunt and fish, thereby helping to grow an outdoor recreation economy that currently provides millions of jobs and drives \$646 billion into local communities each year.”

For the “Congress” blog of [The Hill](#) (9/13, Roberts, 471K), Amy Roberts, executive director of Outdoor Industry Association, also urges Congress to support the LWCF.

In an op-ed for the [Pocono \(PA\) Record](#) (9/12, Cartwright, 46K), Rep. Matt Cartwright supports the LWCF.

Additional coverage of the LWCF was provided by the [E&E Daily](#) (9/11, Subscription Publication), the [Naples \(FL\) Daily News](#) (9/13, 143K), the [Pittsburgh \(PA\) Post-Gazette](#) (9/13, Hayes, 493K), the [Hampton Roads \(VA\) Virginian-Pilot](#) (9/13, 401K), the [Asbury Park \(NJ\) Press](#) (9/11, 378K), and [WHBL-AM Sheboygan \(WI\)](#) Sheboygan, WI (9/14, 1K).

PROTESTERS OPPOSE TELESCOPE ON MAUNA KEA IN HAWAII. [Al Jazeera America](#) (9/13, 109K) reports that in the last five months, Mauna Kea on the Big Island of Hawaii has “become a battleground.” According to the article, “after plans were announced to build the world’s most powerful telescope atop the mountain, hundreds of protesters calling themselves protectors blocked Thirty Meter Telescope (TMT) construction crews and equipment from accessing the summit, resulting in shutdowns and dozens of arrests.” The article notes that “the protests are not only are responding to the mismanagement of the mountain, which hosts more than a dozen other aging telescopes, they but are also are emblematic of a native people fed up with the under-prioritization of their interests, from the 1893 overthrow of the Hawaiian kingdom to the erosion of Hawaii’s culture and natural environment.”

NATIONAL RENEWABLE ENERGY LABORATORY HELPS INTERIOR REDUCE ENERGY USAGE. The [Glenwood Springs \(CO\) Post Independent](#) (9/13, 32K) reports that “with zero congressional wrangling, President Obama sent down an executive order in March — dubbed ‘Planning For Federal Sustainability In The Next Decade’ — that mandates that federal agencies get at least 30 percent of their electricity from renewable sources by the year 2025.” According to the article, “engineers at the National Renewable Energy Laboratory in Golden have the task of guiding building supervisors toward that goal.” The article notes that “one sprawling federal jurisdiction where NREL’s assistance has paid off is the Department of the Interior, parent to the National Park Service.” The Interior Department has “managed to reduce the amount of energy it uses by about 34 percent from ten years earlier, while increasing its use of renewable energy sources by 10.1 percent since 2008, NREL said in a separate release.”

ENVIRONMENTALISTS URGE OBAMA ADMINISTRATION TO STOP ISSUING NEW LEASES FOR FOSSIL FUEL PRODUCTION. The [Vice](#) (9/13, 1.29M) reports that “analysts from the Center for Biological Diversity, Friends of the Earth, and the environmental consulting firm EcoShift estimate there are enough fossil fuels under federally owned lands and the Outer Continental Shelf to release the equivalent of 450 billion tons of carbon dioxide into the atmosphere if they were all consumed.” They say that “without passing any new laws, the president could stop issuing new leases on federal land tomorrow.” But Kathleen Sgamma, vice president for government and public affairs at the Western Energy Alliance, said, “If the federal government wants to withdraw lands from leasing, there is a process to go through that requires congressional approval. It’s not one of these things that the president can unilaterally say, ‘We’re just not going to lease anymore.’”

Study: Burning All Fossil Fuels Will Melt Entire Antarctic Ice Sheet. In a 1,337-word article, the [New York Times](#) (9/12, Gillis, Subscription Publication, 11 82M) reports that in a study released on Friday, scientists indicate that rising temperatures resulting from the “Burning of all the world’s deposits of coal, oil and natural gas” would melt the Antarctic ice sheet in its entirety and raise sea levels “by more than 160 feet.” According to the Times, the paper notes that the ice sheets could be completely melted within 1000 years, raising sea levels at a rate 10 times faster than is currently happening. A researcher from the Potsdam Institute for Climate Impact Research located in Germany stated, “If we burn it all, we melt it all.”

Study Says Use Of All Earth’s Fossil Fuels Would Raise Sea Levels More Than 200 Feet. The [Huffington Post](#) (9/13, Visser, 164K) reports that a study published Friday in Science Advances “forecasts sea levels rising more than 200 feet should all fossil fuels be used by humanity. In such a scenario, the entire ice sheet covering Antarctica, as well as every bit of land ice on Earth, would melt.”

FORMER SECRETARY OF STATE SHULTZ PROMOTES NATIONAL PARKS AND TREASURES. The [San Francisco Chronicle](#) (9/13, Subscription Publication, 3 35M) reports on former Secretary of State George Shultz and his wife, Charlotte, who “have tasked themselves with protecting our national treasures.”

PETITION CALLS FOR DESIGNATION OF NATIONAL MONUMENTS. A petition on [Change](#) (9/13, 378K) calls for the protection of “more than 3 million acres of our public land through designating Boulder-White Clouds, Gold Butte, Mojave Trails, Birthplace of Rivers, and Owyhee Canyonlands as National Monuments.”

ADDITIONAL COVERAGE FLIGHT 93 MEMORIAL MUSEUM. Additional coverage of the opening of the new museum at the Flight 93 National Memorial was provided by the [Somerset County \(PA\) Daily American](#) (9/13, 40K), the [Somerset County \(PA\) Daily American](#) (9/11, 40K), the [Richland Source \(OH\)](#) (9/13), [AOL](#) (9/11, 6 06M), the [Petoskey \(MI\) News-Review](#) (9/13, 30K), [USA Today](#) (9/10, Hook, 5.23M), the [Los Angeles \(CA\) Times](#) (9/11, Pearce, 4.07M), [NPR](#) (9/10, 1.85M), [ABC News](#) (9/10, 3.97M), the [Washington \(DC\) Post](#) (9/11, Mandak), the [Philadelphia \(PA\) Inquirer](#) (9/13, 641K), the [San Antonio \(TX\) Express-News](#) (9/11, 884K), the [Hanover \(PA\) Evening Sun](#) (9/13, 59K), the [Philly \(PA\)](#) (9/12, Hamill, 493K), the [Telegraph \(L\)](#) (9/13, 62K), [The Guardian \(UK\)](#) (9/11, 3.3M), [Legal Insurrection](#) (9/13, 2K), and [KDKA-TV Pittsburgh \(PA\)](#) Pittsburgh (9/13, 94K).

ADDITIONAL COVERAGE SECRETARY JEWELL'S VISIT TO COLVILLE RESERVATION. Additional coverage of Interior Secretary Sally Jewell's visit to the Colville Reservation was provided by the [Tribal Tribune](#) (9/13).

ADDITIONAL COVERAGE OF BORDER CROSSING BETWEEN BIG BEND NATIONAL PARK TO BOQUILLAS. Additional coverage of the pedestrian border crossing from Big Bend National Park to Boquillas was provided by the [Fronteras](#) (9/13).

SECRETARY JEWELL CRITICIZED FOR BLOCKING KING COVE ROAD. In a piece for the [Alaska Dispatch News](#) (9/12, 219K), Paul Jenkins writes that although a court has agreed with Interior Secretary Sally Jewell's decision against a road through the Izembek National Wildlife Refuge, she "could not be more wrong." As a result of the decision, "King Cove remains the victim of a bureaucracy that could not care less about federal trust responsibilities to Alaska Natives, a bureaucracy that values migratory ducks and eel grass more than human life." He concludes that what "Jewell has done is legal," but "in human terms she could not be more wrong."

Empowering Native American Communities:

ADDITIONAL COVERAGE OF WASHINGTON FOOTBALL TEAM'S NAME. Additional coverage of the controversy over the name of the Washington-based NFL football team's name was provided by the [Atlantic](#) (9/13, 2.69M).

Tackling America's Water Challenges:

IRRIGATION SETTLEMENT TO BE SIGNED WITH WESTLANDS WATER DISTRICT. The [McClatchy](#) (9/11, 28K) reports that "a top Interior Department official next Tuesday will sign a San Joaquin Valley irrigation settlement with the Westlands Water District, signaling the end of a long-running legal battle, but marking the start of a hot new political fight." According to the article, "after years of wrangling, negotiators agreed to a deal that absolves the federal government of the responsibility to provide irrigation drainage to farms in the Westlands district." Under the agreement, "the 600,000-acre Westlands district will retire at least 100,000 acres of farmland."

Additional coverage was provided by the [Los Angeles \(CA\) Times](#) (9/13, Boxall, 4.07M).

BOR AWARDS CONTRACT TO IMPROVE ACCESSIBILITY AT HUNGRY HORSE DAM. The [Missoulian \(MT\)](#) (9/13, 116K) reports that the BOR has "awarded a \$1.2 million construction contract to Advanced Solutions Group LLC, a small business based in Kaysville, Utah, to improve visitors' accessibility at Hungry Horse Dam." The article notes that "the work includes replacing the visitor center overlook, adding a walkway from the overlook to the visitor center, improving the parking lot, adding two viewing windows in the parapet wall of the dam, and constructing a walking, viewing and picnic pad overlooking Hungry Horse Reservoir."

STUDY EXAMINES IMPACTS OF COLORADO RIVER SHORTAGE. The [Arizona Daily Star](#) (9/13, 257K) reports that "a shortage of Colorado River water would affect Arizona and the Southwest more than many people previously believed, a new study says." According to the article, "called 'The Bathtub Ring' after Lake Mead's whitish coating, the study examined potential side effects of a Colorado River supply shortfall." The study "warns that electricity costs for Hoover Dam power customers would rise sharply, that visitation to Lake Mead could tumble and that California, not just Arizona, would suffer from an early shortage."

Additional coverage of the Colorado River basin was provided by the [Grand Junction \(CO\) Daily Sentinel](#) (9/13, 73K) and the [Yuma \(AZ\) Sun](#) (9/13, 70K).

LOW FOLSOM LAKE LEVELS UNVEIL GOLD RUSH-ERA TOWN. The [Sacramento \(CA\) Bee](#) (9/13, 535K) reports that "as of Sept. 9, Folsom Lake held about 188 acre feet of water, down 50 percent from the same time in 2014." According to the article, "taxed by years of drought, the lake is currently filled to 19 percent of its total capacity, with officials from the federal Bureau of Reclamation foreseeing it may yet drop below the 1977 record-low of 150 acre feet." Low water levels have unveiled "remnants of a usually inundated Gold Rush-era town known as Mormon Island."

Securing America's Energy Future:

Renewable Energy:

BOEM DISCUSSES OFFSHORE WIND ENERGY CONCERNS WITH SOUTH CAROLINA ADVISORY COMMITTEE. The [AP](#) (9/13, 75K) reports that "developing wind energy off the South Carolina coast is not as simple as putting up a wind turbine and running a power line to shore." Regulators say "the impacts of the industry on everything from marine creatures to what the giant turbines would look like from shore must be considered." The BOEM has "identified almost 1,200 nautical square miles in four tracts off the coast that have the potential to be leased for wind energy," but "before that is done, there will be extensive studies." The article notes that "a number of concerns were discussed last week as officials from the bureau met with a South Carolina advisory committee working on offshore wind energy."

TWO LOUISIANA FIRMS PLAY KEY ROLES IN RHODE ISLAND OFFSHORE WIND FARM. The [AP](#) (9/14, Thompson) reports "two Louisiana firms with roots in the oil and gas industry" are "playing a leading part in what could be the nation's first offshore wind farm." Once it is in operation, "Deepwater Wind's Block Island project is in line to generate 30 megawatts of electricity" around "3 miles off Rhode Island's coast." The "massive steel foundations" for Deepwater Wind's "five turbines were designed by Keystone Engineering, of Mandeville, and built by Gulf Island Fabrication in Houma." The firms "were a natural fit for the project: Though destined for the East Coast, the foundations were modeled on offshore technology used by the oil industry in the Gulf of Mexico."

DEVELOPER EYES OPPORTUNITIES FOR WINDFLOATS. The [Recharge News](#) (9/13, 633) reports that "developer Principle Power sees the US as a growth market for its innovative semi-submersible, three-column pontoon design floating wind turbine foundation, with opportunities along both the east and west coasts and Hawaii," according to a company official.

MIGRATION OF BIGHORN SHEEP THREATENED BY NEW SOLAR FACILITY. In a [New York Times](#) (9/12, Lovejoy, Wilson, Subscription Publication, 11 82M) op-ed, professors Thomas E. Lovejoy and Edward O. Wilson note that the development of alternative renewable energy sources and the issue of environmental protection "are squaring off against each other in the Soda Mountains of California's Mojave Desert." Bechtel Corporation is hoping to build a solar facility on "1,900 acres of federal land along Interstate 15 near Baker, Calif., less than a mile from the Mojave National Preserve." The authors argue against the construction of the facility, which they contend would "disturb the migration of bighorn sheep in a region already fragmented by highways."

Onshore Energy Development:

MURRAY CRITICIZES STREAM PROTECTION RULE. [Bloomberg News](#) (9/11, Loh, 2.66M) reports that "Robert E. Murray, the coal miner who has sued the Obama administration over environmental regulations, said Thursday that his industry's facing its biggest regulatory threat yet" with the Stream Protection Rule. The rule would "kill an industry practice known as 'longwall mining.'" The article notes that "the technique, which involves multiple revolving blades cutting coal from a seam into slices, is key to operations run by closely held Murray Energy," and "it has emerged as one of the cheapest and most efficient ways for miners to weather the worst industry downturn in decades."

[Politico Pro](#) (9/11) reports that Murray "attempted to link Interior's stream rule with Katie McGinty, a Democrat running for a Pennsylvania Senate seat." Murray said that "McGinty and Joseph Pizarchik, now the head of Interior's Office of Surface Mining, did something similar to him a decade ago." According to the article, "in 2004, McGinty and Pizarchik were top officials in Pennsylvania's Department of Environmental Protection." Murray said "they prevented his company from moving further into a three-year-old mine that lay beneath a 'dry ditch that seldom had water in it,' forcing him to lay off 550 workers."

Additional coverage was provided by the [E&E Daily](#) (9/11, Subscription Publication), [The Hill](#) (9/12, Cama, 471K), the [Wheeling \(WV\) Intelligencer](#) (9/13, 55K), the [Pittsburgh \(PA\) Post-Gazette](#) (9/14, Hopey, 493K), the [Greene County \(PA\) Observer-Reporter](#) (9/11, 83K), and the [Martins Ferry \(OH\) Times Leader](#) (9/13, 36K).

TRAPPER MINE ENVIRONMENTAL REVIEW PROPOSED. The [AP](#) (9/13, 2 28M) reports that "another northwestern Colorado coal mine is set to get a new environmental review after environmentalists challenged its permit." According to the article, "a proposed deal between the Trapper mine, environmentalists and regulators filed in federal court Thursday calls for a review to be performed by April 30." The article notes that "the mine would be able to continue to operate on land where mining is already underway and provide monthly status updates starting next month."

The [Craig \(CO\) Daily Press](#) (9/12, 10K) editorializes that "Craig and Moffat County can weather this war on coal. America can't operate without coal mines." According to the paper, "the Office of Surface Mining Reclamation and Enforcement worked hard to protect Colowyo, and it now has until April to complete an environmental assessment for Trapper."

Additional coverage was provided by the [Denver \(CO\) Post](#) (9/13, Press, 787K), [Colorado Public Radio](#) (9/13), the [Missoulian \(MT\)](#) (9/13, 116K), the [Ravalli \(MT\) Republic](#) (9/13, 19K), the [Washington \(DC\) Times](#) (9/11, Slevin, 344K), the [Grand Junction \(CO\) Daily Sentinel](#) (9/13, 73K), the [Grand Junction \(CO\) Daily Sentinel](#) (9/13, 73K), the [Craig \(CO\)](#)

[Daily Press](#) (9/11, 10K), and [KCNC-TV Denver \(CO\)](#) Denver (9/11, 79K).

REP. THOMPSON EXPRESSES DOUBT ABOUT POWER PLUS PLAN. The [E&E Daily](#) (9/11, Subscription Publication) reports that “a key Republican lawmaker has expressed doubts about President Obama’s plan to help mining communities reeling from the coal industry downturn.” The article notes that “a key aspect of the White House’s Power Plus Plan, announced earlier this year, is speeding up the release of \$1 billion from the coal abandoned mine land (AML) reclamation fund over five years.” However, “despite strong lobbying from the White House and bipartisan support for helping coal field communities, the AML portion of Power Plus is getting bogged down in the program’s complicated politics.” Rep. Glenn Thompson said, “I don’t think that’s going to get ahead of [the program’s] reauthorization. I can see that being a potential part of reauthorization.”

ILLINOIS COAL MINERS ANTICIPATE CHANGES UNDER NEW FEDERAL REGULATIONS. The [St. Louis Post-Dispatch](#) (9/13, 968K) reports that last Thursday, hundreds of people attended a forum at the St. Charles Convention Center to weigh in on the US Department of Interior’s proposed water protection rule for the coal industry. According to some coal miners, the new rule “may actually deliver the ‘knockout punch’ to a coal industry hobbled by natural gas competition and the Environmental Protection Agency’s air regulations.” Agency officials, on the other hand, insist that the rule would have a “negligible” effect on mining jobs and production, and environmentalists “say the regulations are long overdue.” Under the proposed rules, the Illinois Basin is “expected to experience big changes,” while the Powder River Basin in Wyoming and Montana, “which supplies much of Ameren Missouri’s plants and has become the country’s largest coal-producing region, is expected to face smaller impacts.”

Additional coverage was provided by [WSIL-TV Carterville \(IL\)](#) Carterville, IL (9/13, 22K).

LAWSUIT FILED OVER FLAT CANYON TRACT LEASE. [E&E Publishing](#) (9/11, 705) reports that an environmental group sued the BLM and the Forest Service “for approving the Utah lease of 40 million tons of coal.” WildEarth Guardians is “accusing the agencies of leasing the 2,692-acre Flat Canyon tract in central Utah based on a 15-year-old environmental analysis.” The group, “which filed its complaint in Colorado U.S. District Court, said the Obama administration failed to adequately weigh mining’s climate impacts.”

POSSIBLE EXPLORATION NEAR SOUTH PARK WORRIES SOME RESIDENTS. The [Colorado Springs \(CO\) Gazette](#) (9/13, Handy, 148K) reports in depth on concerns among some in the Colorado Springs area about the possibility of energy exploration near South Park, as the Bureau of Land Management prepares a master leasing plan for risk evaluations. According to the Gazette, much of the concern stems from the possibility of an environmental disaster adversely affecting the area’s ecology, and subsequently “those who make their living off the wildlife and water” in the region.

TRIAL OVER PLATINUM MINING OPERATION SET TO BEGIN. [Alaska Dispatch News](#) (9/13, 219K) reports that “a first-in-Alaska federal environmental crimes trial over a mining operation is set to begin this month in Anchorage with a single defendant.” The article notes that “two other managers with XS Platinum Inc. already have pleaded guilty – one earlier this month – which opens the possibility they might testify at the trial of Canadian James Slade.” Slade is “trying to mount a ‘public authority defense,’ arguing that an official of the Bureau of Land Management allowed XS Platinum to continue its mining work even though it was generating water pollution.”

OIL AND GAS STUDY TO BE LAUNCHED IN COLORADO NEXT YEAR. The [Denver Post](#) (9/14, Whaley, 787K) reports an “unprecedented study of the hazards rooted in America’s largest oil patches will be launched” in 2016 by health officials with the Federal government “in Colorado who hope to cut the dangers faced by oil and gas workers.” Researchers “from the Denver office of the National Institute for Occupational Safety and Health — which is part of the Centers for Disease Control and Prevention — will distribute questionnaires to 500 oil field workers in North Dakota, Texas and another unnamed state.” Personnel with the institute “will fan out to so-called ‘man camps’; training centers; equipment and trucking yards; well sites; and community centers in oilfield towns.”

ADDITIONAL COVERAGE OF PUBLIC LISTENING SESSION ON FEDERAL COAL PROGRAM. Additional coverage of the public listening session held August 13 on federal coal lease program was provided by the [Wyoming Business Report](#) (9/13, 24K).

Offshore Energy Development:

OBAMA ADMINISTRATION TO AUCTION ACRES IN GULF OF MEXICO FOR DRILLING. [The Hill](#) (9/12, Henry, 471K) reported Obama Administration officials on Friday announced plans to “lease up to 40 million acres of the Gulf of Mexico for new offshore oil and gas drilling next year,” which could produce up to “965 million barrels of oil and more than 4 trillion cubic feet of natural gas.” Space in the Gulf of Mexico off of Louisiana, Mississippi and Alabama will be auctioned off next March.

[Politico Pro](#) (9/11) reports that BOEM Director Abigail Ross Harper called the sales “another important step in promoting responsible domestic energy production through the safe, environmentally sound development of the nation’s offshore energy resources, while ensuring a fair return to the American people.”

Additional coverage was provided by the [New Orleans \(LA\) Times-Picayune](#) (9/13, 718K), the [New Orleans \(LA\) CityBusiness](#) (9/11, 28K), [Marine Link](#) (9/13, 1K), the [Oil and Gas Investor](#) (9/13, Subscription Publication), the [Oil and Gas Journal](#) (9/13, 1K), and [Offshore Engineer](#) (9/13).

ANALYSIS ALASKANS DIVIDED OVER SHELL’S OFFSHORE DRILLING PLANS. Alaskans are divided over Shell Oil’s plans for offshore drilling, the [Washington Post](#) (9/12, Mufson, 6.76M) reports in a 2364 word article. Shell president Marvin Odum traveled to Alaska in early September to seek “political support from Alaska Natives in Barrow.” However, in the wake of President Obama’s visit, which focused on climate change, environmental groups “called him to block Shell’s Arctic drilling, which they said contradicts his message on slowing climate change.” Yet, Alaska Natives have argued that “they need some other source of economic welfare. And new oil development is the only option.”

Additional coverage of Arctic oil was provided by the [Everett \(WA\) Herald](#) (9/13, 140K).

Shell Said To Have Left Climate Change Lobby Group Over Arctic Drilling. In continuing coverage, [Greenwire](#) (9/11, Subscription Publication) reports that Royal Dutch Shell PLC has left the Prince of Wales’ Corporate Leaders Group, “an influential British lobbying group known for pushing the government to act on climate change.” Although the group “announced Shell’s departure without giving a reason,” the article reports that “people close to the group have said that the oil company’s policies, which include drilling in the Arctic, has been controversial among the group’s members.” A speaker identified as “one person” is quoted saying, “When the group started 10 years ago, Shell seemed as keen as anyone on reducing emissions and tackling climate change. ... But what with its activities in the [Canadian] tar sands and the Arctic, it’s become clear that is no longer the case.”

BSEE POINTS TO ERRORS IN GULF BLOWOUT. The [Greenwire](#) (9/11, Subscription Publication) reports that “a federal probe into a 2013 well blowout in the Gulf of Mexico found workers could have prevented the incident if they had reacted more quickly.” The federal investigation also placed blame on “Walter Oil & Gas Corp. and drilling contractor Hercules Offshore Inc. for miscalculating the ability of pumping fluids into the well to keep gas under control by overestimating the fluid’s density.” The report from the BSEE “also cited faulty emergency equipment at the rig.”

Additional coverage was provided by the [Houston Chronicle](#) (9/11, Dlouhy, 2 28M) and the [Penn Energy](#) (9/13, 128).

HOUSE COMMITTEE TO MEET ABOUT OIL, GAS RULES IN NEW ORLEANS. The [Houma \(LA\) Courier](#) (9/12, 55K) reports that “U.S. lawmakers from Louisiana are expected push against proposed safety rules for oil and gas drilling in the Gulf of Mexico during a House committee hearing Tuesday in New Orleans.” Sen. Bill Cassidy and Sen. David Vitter say “they plan to address the House Natural Resources Committee.” Cassidy said, “Opening the Gulf to more oil and gas development means more workers in Louisiana and across the country can have good paying energy jobs. Federal policies are holding this development back, keeping workers from these jobs.”

Additional coverage was provided by the [Thibodaux \(LA\) Daily Comet](#) (9/12, 42K).

OPPOSITION TO OFFSHORE DRILLING MOUNTS. The [Charleston \(SC\) Post and Courier](#) (9/11, 365K) reports that “the next wave of opposition to offshore testing for oil and gas deposits and drilling is emerging — grassroots groups looking to amass voter numbers to sway government officials.” The article notes that “Don’t Drill Lowcountry plans a launch-party meeting Tuesday with addresses by drilling opponents U.S. Rep. Mark Sanford and state Sen. Chip Campsen.” Meanwhile, “resident groups have begun coalescing in the Carolinas after at least 40 community governments in the two states have come out against the proposed drilling, along with hundreds of businesses and business groups.”

Additional coverage of offshore drilling was provided by the [Greater Wilmington \(NC\) Business Journal](#) (9/11).

America’s Great Outdoors:

Bureau of Land Management:

BLM WON’T MERGE ARIZONA, NEW MEXICO OFFICES. [E&E Publishing](#) (9/11, 705) reports that the BLM announced last week “it was abandoning the planned merger of its offices in New Mexico and Arizona after fielding bipartisan complaints from lawmakers and resistance from a Western oil and gas group.” Spokesman Jeff Krauss said, “The BLM listened carefully to feedback from partners and stakeholders expressing the importance of maintaining separate state offices. After considering this feedback, the BLM has decided not to move forward with a merger.”

Additional coverage was provided by the [Los Alamos \(NM\) Daily Post](#) (9/13), the [Washington \(DC\) Times](#) (9/11, 344K), and [KOB-TV Albuquerque \(NM\)](#) Albuquerque, NM (9/13, 92K).

ANOTHER FEDERAL JUDGE RECUSED IN ATV PROTEST CASE. The [AP](#) (9/13, 2.28M) reports that "another federal judge has been recused from the case of a county commissioner convicted of leading an ATV protest ride through a closed canyon." New U.S. District Court Judge Jill Parrish was "removed from the case Friday and replaced by Judge David Sam." According to the article, "Parrish had asked to be recused because she represented the Bureau of Land Management during her eight-year stint as a federal prosecutor."

In an op-ed for the [Salt Lake \(UT\) Tribune](#) (9/13, 492K), Patrick Shea, a Salt Lake City attorney and former director of the BLM, criticizes the legal maneuver to get Sam recused. Shea says that "after a four-day jury trial before an impartial jurist like Judge Shelby, to then use a motion to recuse to undermine the integrity of the system is an outrage, and should be seen as such."

BILL WOULD CREATE WILDERNESS AREAS NEAR RIO GRANDE DEL NORTE NATIONAL MONUMENT. The [Taos \(NM\) News](#) (9/13, 31K) reports on the Cerros del Norte Conservation Act, introduced by Sen. Martin Heinrich and co-sponsored by Sen. Tom Udall. The bill would "create the 8,000-acre Rio San Antonio Wilderness and the 13,420-acre Cerro del Yuta (Ute Mountain) Wilderness at the far northern ends of the Rio Grande del Norte National Monument." The legislation "managed to make it out of committee and is eligible to go to a full vote before the Senate."

LAWSUIT FILED TO HALT SCHEDULED WILD HORSE ROUNDUP IN COLORADO. The [Rio Blanco \(CO\) Herald Times](#) (9/13) reports that "late Friday, a lawsuit was filed in federal court by The Cloud Foundation (TCF), Wild Horse Freedom Federation (WHFF), The Colorado Wild Horse and Burro Coalition (CWHBC), Dr. Don Moore and Toni Moore of Fruita, Colo., and Barb Flores of Greeley, Colo., to block the Bureau of Land Management's proposed roundups of horses from northwestern Colorado's herds." The lawsuit "alleges that the BLM violated the National Environmental Protection Act (NEPA) and the Wild Free Roaming Horses and Burros Act (WFRHBA) by authorizing the removal of 167 wild horses from public lands in West Douglas Herd Area (WDHA) and Piceance East Douglas Herd Management Area (PEDHMA)."

WASHINGTON COUNTY OFFICIALS OUTRAGED BY DRAFT BLM PLAN.. The [St. George \(UT\) News](#) (9/11, 3K) reports that "Washington County officials are outraged by a recently released Bureau of Land Management draft resource management plan which they say betrays the language and direction of a 2009 bill and has the potential to negatively impact every resident in the county, changing the Southern Utah lifestyle forever." According to the article, "commissioners and local mayors feel betrayed by the BLM's failure to consult with local officials and by the restrictive proposals contained in the draft resource plans." They "expressed their outrage and disappointment at a special Washington County Commission meeting and press conference Thursday."

BLM FIELD MANAGER IN PRINEVILLE ON THE JOB. The [Bend \(OR\) Bulletin](#) (9/13, 94K) reports that Jeff Kitchens is the new Deschutes resource area field manager for the BLM in Prineville. Kitchens began "July 29, taking over for Molly Brown, who is now a BLM field manager in Arcata, California," according to Lisa Clark, spokeswoman for the agency in Prineville.

Fish and Wildlife Service:

FWS FACES DECISION ON SAGE GROUSE. [Boise \(ID\) State Public Radio](#) (9/13) reports that the FWS faces a deadline by the end of the month on the greater sage grouse. Until now, "there has been an enormous amount of work done to protect the bird – enough to suggest a threat is sometimes big enough to get the job done." The article looks at whether "the intent all along" was "to make the threat big enough so that an actual listing might be avoided."

Additional coverage of the sage grouse was provided by the [Washington \(DC\) Examiner](#) (9/14, 213K), [NBC News](#) (9/13, 3.73M), [KULR-TV](#) Billings, MT (9/14, 2K), and the [Elko \(NV\) Daily Free Press](#) (9/13, 22K).

FWS TO RULE ON TEN SPECIES WITHIN YEAR. The [AP](#) (9/13, 2.28M) reports that the FWS has "agreed to decide whether a rare aquatic insect that's found only in Glacier National Park should be protected under the Endangered Species Act within the year." According to the article, "in a settlement with the Center for Biological Diversity, the federal agency agreed to make a decision by Sept. 30, 2016." The article notes that "the western glacier stonefly is one of 10 species of birds, fish and invertebrates the agency has agreed to rule on."

FWS LAUNCHING "SOFT OPENING" OF ROCKY FLATS NATIONAL WILDLIFE REFUGE. The [Boulder \(CO\) Daily Camera](#) (9/13, 161K) reports that the FWS has "launched what some observers are terming a 'soft opening' of the Rocky Flats National Wildlife Refuge. The article notes that "refuge management and state health officials insist there is no risk to the public." Barbara Boyle, the FWS "refuge supervisor overseeing the management of refuges in Colorado, Kansas and Nebraska, said 'we don't at this time' have public health concerns for people visiting the refuge."

SACRAMENTO NATIONAL WILDLIFE REFUGE MOSTLY DRY. The [San Francisco Chronicle](#) (9/13, Subscription Publication, 3 35M) reports that "of the six wildlife refuges that make up the Sacramento National Wildlife Refuge Complex, four are 99 percent dry. They are Colusa, Sutter, Butte Sink and Llano Seco." And "of the two that have water, Sacramento has only 17 percent wetlands and Delevan has 22 percent."

SOUTH BAY SALT POND RESTORATION PROJECT HELPS ENDANGERED SPECIES REBOUND. The [San Jose \(CA\) Mercury News](#) (9/14, Krieger, 626K) reports that "two endangered species have returned to a nearly lifeless former salt pond in the southern San Francisco Bay, the first proof that the ambitious 30-year South Bay Salt Pond Restoration Project is helping nature heal." According to the article, "Clapper Rails and Salt Marsh Harvest Mice have been discovered in a rehabilitated pond on the edge of Fremont, buoying hopes that the creatures are returning a century after they vanished due to salt harvesting by agricultural giant Cargill."

YOUNG HUNTERS PARTICIPATE ON 20TH YOUTH WATERFOWL DAY. The [Minneapolis Star Tribune](#) (9/13, 1.19M) reports that "an estimated 5,000 youngsters age 15 and under...hunted waterfowl Saturday on the 20th annual Youth Waterfowl Day." The FWS "allows youths who went through the Young Waterfowlers Program to return during the regular waterfowl season to hunt Blue Lake on the refuge, where boats, life jackets and decoys are provided."

ADDITIONAL COVERAGE OF RULING ON LESSER PRAIRIE CHICKEN STATUS. Additional coverage of the "recent federal court ruling in Texas on the Endangered Species status of the lesser prairie chicken" that "removed federal protections for the bird" was provided by the [Pratt \(KS\) Tribune](#) (9/12, 6K) and the [La Junta \(CO\) Tribune-Democrat](#) (9/13, 341).

ADDITIONAL COVERAGE OF EFFORT TO SAVE MONARCH BUTTERFLY. Additional coverage of the effort to save the monarch butterfly was provided by the [Christian Science Monitor](#) (9/13, 455K), the [Asheville \(NC\) Mountain Xpress](#) (9/13, 46K), and the [Troy \(NY\) Daily News](#) (9/13).

National Park Service:

NPS SEEKS TO CONNECT WITH YOUTH. The [Skift](#) (9/12) reports that "despite ramping up digital marketing efforts to reach millennial travelers and better than expected visitation numbers this summer, the National Park Service (NPS) still struggles to attract younger travelers." According to the article, "to help connect with these younger visitors the NPS, and travel suppliers that serve the park, are focusing on offering more active adventure activities, targeting families and funding content marketing initiatives like documentary films to spur interest."

Meanwhile, the [Sevierville \(TN\) Mountain Press](#) (9/13, 27K) reports that Great Smoky Mountains National Park Superintendent Cassius Cash spoke about connecting with youth during a Leadership Sevier luncheon at River Plantation RV Park. Cash, "in his seventh month as the 16th superintendent of the park, was talking to the group on leadership when he mentioned how the future of the National Park Service depends on shaping the younger generation." He noted that "with the park service's 100th anniversary coming up next year, it's a crucial point in the system's history."

Wish List For NPS Centennial. The [National Parks Traveler](#) (9/13, 989) lists some "birthday wishes" for the NPS' 100th anniversary, such as the passing of the National Park Service Centennial Act.

SEN MURPHY CALLS ON NPS TO SELL MORE AMERICAN-MADE GOODS AT STORES. The [Hill](#) (9/13, Wheeler, 471K) reports that Sen. Chris Murphy is calling on the NPS "to sell more American-made merchandise in national park stores." In a letter to NPS Director Jonathan Jarvis on Friday, Murphy said "a Connecticut constituent recently brought it to his attention that stores were carrying foreign-made products." Murphy asked Jarvis "to increase the percentage of American-made merchandise that's being sold to at least 50 percent of all products at every store." He also asked Jarvis "to ensure no products otherwise available through domestic manufacturers are imported from foreign companies."

SUBARU LAUNCHES VIDEO SERIES ON NPS' ZERO LANDFILL GOAL. [JustMeans](#) (9/13, 1K) reports that "Subaru, recognized for having the first automotive assembly plant in America designated as zero landfill, presents 'Who We Are is What We Leave Behind,' a new video series documenting the National Parks zero landfill initiative."

According to the article, "in Episode 1: The Meeting of the Minds, Subaru assembles the team that will begin to form the plan to make the National Parks zero landfill." The article notes that "representatives from the National Park Service, National Parks Conservation Association, National Park Foundation, and concessioner representatives from each pilot park (Yosemite, Grand Teton and Denali) visited Subaru of Indiana Automotive, Inc. (SIA)."

9/11 MEMORIAL OFFICIALS SEEK CASH FROM CONGRESS ON ANNIVERSARY OF ATTACKS. The [New York Post](#) (9/13, 2.73M) reports that "while the names of September 11 victims were being solemnly read aloud at Ground Zero on Friday, 9/11 Memorial officials were in Washington, DC, angling for cash from Congress." According to the article, "the sparsely attended House hearing infuriated a group of 9/11 family members who say it was timed to gain 'maximum sympathy' — and disrespected their lost loved ones."

HARTFORD REACHES KEY AGREEMENT ON COLTSMVILLE NATIONAL PARK. The [Hartford \(CT\) Courant](#) (9/11, 606K) reports that Hartford has "reached an agreement on its role in the national park created at the historic Colt manufacturing complex, including its stewardship of Colt Park." The deal, "which still must be approved by the city council, outlines how the properties that the city owns within the national park boundaries would be maintained by the standards of the federal National Park Services." The article notes that "the city also would work with the park service on amenities for visitors and promote preservation of the structures with the national park."

TEST RUN HELD FOR TWIN CITIES CANOE- AND BIKE-SHARING PROGRAM. The [Minneapolis Star Tribune](#) (9/13, 1.19M) reports that "park planners agreed this week that they need to find a location that's safe and convenient" for "the launch of a first-of-its-kind National Park Service canoe- and bike-sharing service along the Mississippi River." The article notes that "two dozen state, local and national parks stakeholders tested the 12-mile bike and 9-mile river route this week on one stretch between the city of Ramsey and the Coon Rapids Dam." According to the article, "many said they found the canoe portion safe and navigable, but that more brainstorming is needed for the bike portion."

EDUCATORS PARTICIPATE IN NPS TEACHER RANGER TEACHER PROGRAM. The [Northern Virginia Daily](#) (9/14, 48K) reports that "Shenandoah schoolteacher Donna Shrum marked a first at Cedar Creek and Belle Grove National Park when she decided to participate in the National Park Service Teacher Ranger Teacher program there this summer." According to the article, "through the program, K-12 teachers around the country network with parks by working as a ranger for the summer, forming lesson plans and teaching projects based on their experiences there." And at the same time, "the teachers earn graduate credit hours through the University of Colorado, Denver."

NPS APPROVES PLANS FOR NEW MARINE RESERVE WITHIN BISCAYNE NATIONAL PARK. The [AP](#) (9/14, 75K) reports that the NPS has "approved plans to establish a new marine reserve within Biscayne National Park." According to the article, "the agency's regional director recently said that the need is clear for plans to restore the park's coral reefs and improve visitor experiences." However, "critics say the reserve will hurt fishing businesses reliant on the park's waters." But "park officials say the reserve will allow the reefs to recover, which will lure bigger fish and enhance the experiences of people snorkeling, diving or viewing the waters from glass-bottom boats."

Additional coverage was provided by the [Cape Coral \(FL\) Daily Breeze](#) (9/14, 6K) and [WBBH-TV Fort Myers \(FL\)](#) Fort Myers, FL (9/14, 155K).

SOME LANDOWNERS ALLOWED TO HUNT ON GRAND TETON NATIONAL PARK INHOLDINGS. The [AP](#) (9/13) reports that "it will be legal this fall for some landowners whose property is inside or borders Grand Teton National Park to hunt game such as black bears and mule deer." The article notes that "the regulatory shift dates to late last year, when the National Park Service gave the state management authority over wildlife on privately held land that's within or borders the park." The Wyoming Game and Fish Department Commission "decided that such land would be managed like any other land that the state has jurisdiction over."

HANGAR AT FORT BARRY GETS MAKEOVER. The [AP](#) (9/13, 2.28M) reports that "a military hangar once used to house gigantic, tethered balloons during the U.S. Army's brief experiments to determine how they might be used to supplement the nation's coastal defense system is getting a makeover." According to the article, "the hangar at Fort Barry near Sausalito will get a new coat of paint and a historically accurate shell." NPS project manager Rich Melbostad said "the upgrade will keep the hangar from falling down."

CDC STUDYING PUZZLING RISE IN RABBIT FEVER IN WESTERN US. [Reuters](#) (9/10, Zuckerman) reports that on Thursday state epidemiologist officials said the US Centers for Disease Control and Prevention (CDC) is studying the puzzling rise in cases of tularemia, or rabbit fever, a rare bacterial disease that has killed a Wyoming man and sickened many in Colorado, South Dakota and Nebraska this year. Reuters explains that tularemia rarely affects more than a few people each year, compared to this year's 74 confirmed cases in Colorado, Wyoming and South Dakota. The article notes that animals that tested positive for tularemia near Devils Tower National Monument in Wyoming led the NPS to post signs urging visitors to stay on marked trails and avoid contact with animals.

NPS TO CLOSE ANACOSTIA MARINA. The [Seven Valleys \(PA\) Bay Journal](#) (9/13, 146K) reports that "despite efforts to increase residents' access to the Anacostia River — and to continue making its waters clean enough that people want to access it — the National Park Service said this week it will close one of eight marinas on the river." The article notes that "nearly 60 boat owners currently use Buzzard Point Marina, located near the Anacostia's confluence with the Potomac River, and have been notified to move their boats before the marina closes at the end of the year."

GREAT SMOKY MOUNTAINS NATIONAL PARK CLOSES WHITEOAK SINK AREA TO PROTECT BAT POPULATION. The [Knoxville \(TN\) News Sentinel](#) (9/11, 235K) reports that "Great Smoky Mountains National Park officials announced Friday the closure of the Whiteoak Sink area through March 31 to protect the bat population."

YELLOWSTONE ATTENDANCE EXCEEDS PAST RECORDS. The [Cody \(WY\) Enterprise](#) (9/13, 20K) reports that "in the wake of record-breaking attendance this summer, the crush of people in cars pouring through the gates of Yellowstone National Park has been so large at times National Park Service officials have waved them through for free." The article notes that "month after month the 2015 attendance figures at the world's oldest national park, has exceeded past records, putting the annual attendance at 3,133,965 through August, a pace expected to exceed last year's record of 3.5 million people."

CONCESSIONAIRE MAKING IMPROVEMENTS AT SHENANDOAH NATIONAL PARK. The [Augusta \(VA\) Free Press](#) (9/13, 280) reports that "under the terms of their 10-year contract with the National Park Service, the Delaware North Company is making significant improvements in many aspects of the concession-operated facilities at Shenandoah National Park, according to Park Superintendent Jim Northup." He said, "We are delighted with the progress that Delaware North has made so far. All of this work will really enhance the visitor experience," he added.

Additional coverage was provided by the [AP](#) (9/14, Press, 6.76M).

BODY OF MISSING STUDENT FOUND IN YOSEMITE NATIONAL PARK. The [AP](#) (9/13, 2.28M) reports that "authorities say they have recovered the body of a missing University of Nevada, Reno student in Yosemite National Park." According to the article, "park rangers confirmed a body found earlier this week is that of 24-year-old graduate student Matthew Baldwin." Park spokeswoman Ashley Mayer says "Baldwin's car was discovered Sunday near the Tamarac Flat Campgrounds and his body was roughly 5 miles away near the El Capitan Gully."

CENTRAL BERWYN BUNGALOW HISTORIC DISTRICT ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [Daily Southtown \(IL\)](#) (9/11) reports that "the Central Berwyn Bungalow Historic District, roughly bounded by Cermak Road (north), 26th Street (south), Ridgeland Avenue (east) and Home Avenue (west), has been added to the National Register of Historic Places by the National Park Service effective September 11, 2015."

ADDITIONAL COVERAGE OF "EVERY KID IN A PARK" INITIATIVE. Additional coverage of the "Every Kid in a Park" initiative was provided by the [Las Cruces \(NM\) Bulletin](#) (9/13, 58K), the [Sidney \(NE\) Sun Telegraph](#) (9/10, 857), the [Everett \(WA\) Herald](#) (9/10, 140K), the [Contra Costa \(CA\) Times](#) (9/13, Times, 253K), the [Pike County \(PA\) Courier](#) (9/10, 21K), the [Deming \(NM\) Headlight](#) (9/13, 10K), and the [Seward \(AK\) Phoenix Log](#) (9/10, 5K).

WPOST LAFEYETTE SQUARE SHOULD BE KEPT OPEN DURING CHINESE PRESIDENT'S VISIT. In an editorial, the [Washington Post](#) (9/12, Board, 6.76M) supports keeping Square, "a prominent place for political protest in the nation's capital," open during Chinese President Xi Jinping's visit this month to the United States. It notes that

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinintelligence.com.

DATE FRIDAY, SEPTEMBER 4, 2015 7 00 AM EDT

Holiday Message. In observance of the federal Labor Day holiday, we will not publish on Monday, September 7, 2015. Service will resume on Tuesday, September 8, 2015. We wish our readers a safe and happy holiday.

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS

- + Republicans Question Whether Interior's Investigation Of EPA Mine Spill Will Be Independent.
- + President Obama Closes Out Alaska Trip.
- + LWCF Could Expire At End Of Month.
- + Website For "Every Kid In A Park" Designed To Be Kid-Friendly.
- + Forest Service Spends A Record \$243M Last Week On Wildfires.
- + Secretary Jewell To Attend River Day In Lowell.
- + Rep. Chaffetz Seeks Backing For Public Lands Initiative.
- + Interior Seeks New Deputy CIO.
- + Washington Football Team Called "An Embarrassment Of Unfathomable Proportions."
- + Arizona Urged To Develop Plan To Transfer Federal Lands.

EMPOWERING NATIVE AMERICAN COMMUNITIES

- + Assistant Secretary Washburn Announces \$1.7 Million Now Available For Tribal Education.
- + Rand Paul Says "Lack Of Assimilation" Has Been "Disaster" For Native Americans.

TACKLING AMERICA'S WATER CHALLENGES

- + Barge Aims To Keep Water From Folsom Lake Flowing.

SECURING AMERICA'S ENERGY FUTURE

Renewable Energy:

- + Wind Industry Hopes To Cut Bat Killings.
- + Lawsuit Seeks To Stop Transfer Of Kerr Dam To Tribes.

Onshore Energy Development:

- + OSMRE Back Keeping Colowyo Mine Open.
- + OSMRE Holds Public Hearing In Lexington To Discuss Proposed Stream Protection Rule.
- + New Fracking Rules Delayed Until Mid-October.
- + White House Reviewing FWS Oil, Gas Rule.
- + Public Meeting Attendees Criticize Drilling Lease On Native American Land.
- + Treaty Authority Seeks To Unite Minnesota Chippewa Bands Against Sandpiper.
- + BIA To Fund Monitoring Of Water Quality Of Stikine, Taku, Unuk Rivers.
- + OSMRE Recognizes Work On Simpson Northeast Coal Refuse Fire.

Offshore Energy Development:

- + BP Seeking Return Of Some Money Paid Out For Oil Spill Claims.
- + Environmental Group Settles Lawsuit Against Taylor Energy.
- + Times-Picayune: Feds Must Use Gas, Oil Royalties To Rebuild Gulf Coast.

AMERICA'S GREAT OUTDOORS

Bureau of Land Management:

- + Studies Say More Grazing Wouldn't Have Stopped Soda Fire.
- + Newly Renovated Santa Cruz Lake Reopens For Labor Day Weekend.
- + FBI Admits To Spying On Burning Man In 2010.
- + Coos Bay Forestry Pioneer Estella Morgan Remembered.

Fish and Wildlife Service:

- + Ten Animals That Depend On Western Sagebrush.
- + Prairie Chicken Ruling Casts Doubt On FWS Listing Policy.
- + FWS Stands By Decision Allowing Killing Of Endangered North Carolina Red Wolves.
- + FWS Releases Report Showing Groundwater Contamination From GE's Chemicals.
- + FWS Biologist Raises Concerns That Quarry Could Kill Kankakee Fish.
- + O'Sullivan's Island In Derby Receives Grant To Build Fishing Pier.
- + Arizona Seeks To Intervene In Lawsuit Over Mexican Wolf Regulations.

National Park Service:

- + Buzzard Point Marina To Close In December.
- + Two Electric Vehicle Charging Stations Installed On National Mall.

- + Today's Events In Washington.

LAST LAUGHS

- + Late Night Political Humor.

DOI in the News:

REPUBLICANS QUESTION WHETHER INTERIOR'S INVESTIGATION OF EPA MINE SPILL WILL BE INDEPENDENT. The [AP](#) (9/4, Press, 1.19M) reports that "some members of Congress say they're concerned that politics will influence the U.S. Interior Department's investigation of a toxic mine spill caused by another federal agency." In a letter sent Thursday to Interior Secretary Sally Jewell, "Republicans questioned whether the agency's review would be independent." The letter was signed by Reps. Jason Chaffetz and Rob Bishop of Utah and Cynthia Lummis of Wyoming.

Additional coverage was provided by the [Houston \(TX\) Chronicle](#) (9/4, 2.28M), the [New York \(NY\) Times](#) (9/4, Press, Subscription Publication, 11.82M), the [Washington \(DC\) Post](#) (9/4, Press, 6.76M), the [Washington \(DC\) Times](#) (9/4, 344K), [ABC News](#) (9/4, 3 97M), the [Daily Mail \(UK\)](#) (9/4, 5.59M), the [Deseret \(UT\) News](#) (9/4, 407K), and [Nonprofit Quarterly](#) (9/3).

EPA Chief Will Not Appear At Congressional Hearing On Colorado Spill. The [Washington Times](#) (9/4, Richardson, 344K) reports the House Science, Space and Technology Committee said Thursday it will hold the first congressional hearing into the Environmental Protection Agency's Animas River spill, but Administrator McCarthy will not testify. The Times notes that Chairman Lamar Smith "had called" on McCarthy to testify, "but her name was not on the list" of those appearing. Mathy Stanislaus, the assistant administrator of the Office of Solid Waste and Emergency Response, "will represent the agency."

WSJournal: Mine Leak, Clean Water Rule Highlight Problems With EPA. A [Wall Street Journal](#) (9/4, Subscription Publication, 5 95M) editorial highlights the Colorado mine leak and a Federal judge's criticism of the Clean Water Rule as evidence of problems in the way the EPA makes decisions. The Journal says that while the Administration wants broad powers to take action as it relates to the environment, the White House can not be trusted to possess that type of unchecked regulatory authority.

PRESIDENT OBAMA CLOSES OUT ALASKA TRIP. [Outside](#) (9/4, 258K) reports that "President Barack Obama closed out his three-day Alaska trip yesterday in Kotzebue, a town of 3,200 people that sits 33 miles north of the Arctic Circle." According to the article, "the overall response he's received from Alaskans has been positive—surprisingly so."

In an op-ed for the [Alaska Dispatch News](#) (9/3, 219K), Mark Trahan, the Charles R. Johnson endowed professor of journalism at the University of North Dakota, writes that "there is one story that's missing from the national accounts of the president's visit: the role of tribes in determining Alaska's future." He notes that "that story has multiple chapters that include the recognition of those tribes by the federal government, the push for Native hunting and fishing rights as well as the management of fish and game, law enforcement, and the most recent episode, a debate about land into trust." Additional coverage of the land-into-trust lawsuit was provided by the [Juneau \(AK\) Empire](#) (9/4, 15K).

Additional coverage of Alaska and Arctic issues was provided by the [Alaska Dispatch News](#) (9/3, 219K), the [Juneau \(AK\) Empire](#) (9/4, 15K), the [Arctic \(AK\) Sounder](#) (9/4, 6K), [Fierce Homeland Security](#) (9/4, Sarkar) and [Western Journalism](#) (9/4, 303K).

Moore: Humans Are Not Causing Glaciers To Recede. In a [Wall Street Journal](#) (9/4, Subscription Publication, 5.95M) op-ed, Patrick Moore, a co-founder and former leader of Greenpeace and a director of the CO2 Coalition, takes issue with the President's use of Alaska's receding glaciers to argue that humans are causing climate change, arguing that the glacier in Glacier Bay began receding around 1750, well before human greenhouse gas emissions could have been responsible.

Continuing Coverage Of Controversy Over Denali Name Change. The [Cleveland Plain Dealer](#) (9/4, 1.03M) editorializes that "given that Alaskans of all persuasions demonstrably want to name the mountain Denali, it is hard to consider the protest by Ohio's congressional Republicans, who are all...up for re-election in 2016, as anything more than a publicity stunt." It urges politicians to concentrate on "our other problems," instead of "the name of a mountain, thousands of miles from Ohio."

For the "Pundits" blog of [The Hill](#) (9/3, Anderson, Contributor, 471K), Tom Anderson, the managing partner at Optima Public Relations, writes that President McKinley "gave his life in and for public service" and his "most notable namesake was the tallest peak on the North American continent, the huge upthrust rising center of the great state of Alaska." But "sadly, this honor has now been wiped away with the flick of a pen by a former CEO-of-REI-named-secretary-of-the -Interior by a president who, until this week, had also had never formally been to Alaska." Anderson is troubled because "if it's so easy to pull recognition from under the feet of an assassinated president, what national landmark or treasure is safe?"

Additional coverage of the controversy was provided by the [Washington Examiner](#) (9/2, 213K), the [Waco \(TX\) Tribune-Herald](#) (9/4, 111K), the [Clovis \(NM\) News Journal](#) (9/3, 21K), the [Youngstown \(OH\) Vindicator](#) (9/4, 157K), and [My Dayton \(OH\) Daily News](#) (9/4).

Additional Coverage: USGS Announces New Height For Denali. Additional coverage that "the recently renamed mountain, Denali, is 10 feet shorter according to the US Geological Survey" was provided by [LiveScience](#) (9/4, 467K), [Outside](#) (9/4, 258K) and [Pulse Headlines](#) (9/4).

Additional Coverage: No Plans To Rename Mount Rainier. Additional coverage that federal officials have no plans to rename Mount Rainer to Mount Tacoma was provided by the [Seattle \(WA\) Times](#) (9/4, 962K), the [Alaska Dispatch News](#) (9/3, 219K), the [Bend \(OR\) Bulletin](#) (9/4, 94K), and [Columbus \(OH\) Dispatch](#) (9/2, 515K).

LWCF COULD EXPIRE AT END OF MONTH. [WPTA-TV](#) Fort Wayne, N (9/4, 11K) reports that the Land and Water Conservation Fund "could expire at the end of this month." The article notes that "a Senate Committee passed a bill to permanently reauthorize the LWCF, but the bill will still have to go through the full Senate and House for passage."

Additional coverage was provided by the [Earth Island Journal](#) (9/4, 213) and the [Spokane \(WA\) Spokesman-Review](#) (9/4, 183K).

Congress Urged To Reauthorize LWCF. In an op-ed for [USA Today](#) (9/3, 5.23M), Jamie Williams, president of The Wilderness Society, urges Congress to take action "to reauthorize the Land and Water Conservation Fund before Sept. 30." Williams writes that "if we lose the Land and Water Conservation Fund, we rob America's future generations

of the chance to be stronger, healthier and happier by enjoying natural spaces." Also, he adds that "we unduly expose our national heritage to unacceptable development, such as private resorts in national parks and the destruction of hallowed battlefields to make way for strip malls and roadways."

Protection Of Rocky Fork Tract Celebrated. The [Greeneville \(TN\) Sun](#) (9/4, 43K) reports that officials gathered Wednesday "to celebrate the protection of the final 100 acres of the more than 9,800-acre tract making up the Rocky Fork area, which is located within the Appalachian Trail Corridor along the Tennessee-North Carolina border." The article notes that "over the past seven years, more than \$30 million from the Land and Water Conservation Fund has been utilized by the Forest Service to acquire more than 7,700 acres of Rocky Fork property from the Conservation Fund." That land will now be preserved as part of the Cherokee National Forest.

Fort Ransom State Park To Build Visitor Center. The [Jamestown \(ND\) Sun](#) (9/4, 850) reports that Sens. Heidi Heitkamp and John Hoeven "announced Wednesday that the National Park Service has awarded \$388,794 to the North Dakota Parks and Recreation Department to construct a visitor information center at Fort Ransom State Park." The federal funds are made available through the LWCF.

WEBSITE FOR "EVERY KID IN A PARK" DESIGNED TO BE KID-FRIENDLY. [Federal Times](#) (9/3, 117K) reports that "colors, along with friendly icons and pictures, are what will make a new federal website for kids a success, according to its designers at 18F." The site is "everykidinapark.gov, the landing page for Every Kid in a Park, an Interior Department program to promote the National Park system." The article notes that "the website includes a comprehensive list of locations, information about the program and other resources, and a way to print paper passes allowing access." The site was "designed specifically to encourage 10-year-olds to use it, rather than deferring to adults."

Additional coverage of the "Every Kid in a Park" initiative was provided by the [Los Angeles Times](#) (9/2, 4.07M), the [Kansas City \(MO\) Star](#) (9/4, 566K), the [Concord \(NC\) Independent Tribune](#) (9/4, 49K), the [Seattle \(WA\) Post-Intelligencer](#) (9/4, 560K), the [Syracuse \(NE\) Journal-Democrat](#) (9/3, 5K), the [Daily Ardmoreite \(OK\)](#) (9/3, 29K), the [Orangeburg \(SC\) Times And Democrat](#) (9/4, 51K), the [Putnam Daily Voice](#) (9/4), [KSNV-TV](#) Las Vegas (9/4, 12K), [WGNS-FM](#) Murfreesboro, TN (9/4, 125), and [WSJV-TV](#) South Bend, IN (9/3, 1K).

FOREST SERVICE SPENDS A RECORD \$243M LAST WEEK ON WILDFIRES. The [AP](#) (9/4, 2.28M) reports that "the U.S. Forest Service spent a record \$243 million last week battling forest fires around the country, Agriculture Secretary Tom Vilsack said Thursday." The article notes that "the agency has spent all the money Congress provided for fighting wildfires in the 12-month budget period, forcing it to borrow money from forest restoration work designed to reduce the risk of fires." Vilsack said "further transfers are likely and the agency expects to continue spending about \$200 million per week on fire suppression during the coming weeks."

Additional coverage was provided by [US News & World Report](#) (9/3, 811K), the [Washington \(DC\) Post](#) (9/4, Press, 6.76M), [T ME](#) (9/4, 19.55M), the [Washington \(DC\) Times](#) (9/4, Ridler), and [National Geographic](#) (9/4, 31.65M).

SECRETARY JEWELL TO ATTEND RIVER DAY IN LOWELL. The [Boston Globe](#) (9/4, Malloy, 1.1M) reports that Interior Secretary Sally Jewell will attend River Day in Lowell next Saturday. According to the article, "held in partnership with the Lowell Parks & Conservation Trust, the event celebrates the role waterways play in local communities." Jewell and Rep. Niki Tsongas will "kick off the day with a canoe paddle on the Concord River and meet with local nonprofits that focus on the environment."

REP. CHAFFETZ SEEKS BACKING FOR PUBLIC LANDS INITIATIVE. The [Moab \(UT\) Sun News](#) (9/4) reports that Rep. Jason Chaffetz is "hoping to strike a deal between energy developers, conservationists and recreationists, while averting a presidential proclamation of a national monument in southeastern Utah." Chaffetz is "proposing revisions to the eastern Utah Public Lands Initiative that would include a 50,000-acre expansion of Arches National Park, as well as the designation of wilderness and a National Conservation Area in Labyrinth Canyon along the Green River." He is also "proposing to withdraw approximately 24,000 acres of proposed wilderness in the Book Cliffs – before Utah's congressional delegation introduces a bill in Congress some time this fall." The article notes that "Chaffetz is also insisting on a permanent exemption of the Antiquities Act, which he fears President Barack Obama will use to declare either a Greater Canyonlands, or a Bears Ears/ Cedar Mesa National Monument in San Juan County."

INTERIOR SEEKS NEW DEPUTY CIO. The [ExecutiveGov](#) (9/4, 548) reports that "Interior Department is looking for a new deputy chief information officer who will support the duties, responsibilities and authority of the CIO and the secretary for information management and technology." According to the article, "in a notice posted Monday on USAJobs.gov, the department said the deputy CIO role is a Senior Executive Service position and has a Top Secret/Sensitive Compartmented Information security clearance."

WASHINGTON FOOTBALL TEAM CALLED "AN EMBARRASSMENT OF UNFATHOMABLE PROPORTIONS." In a piece for [USA Today](#) (9/4, 5.23M), Mike Foss writes that "the Washington Redskins have been a loathsome franchise for quite some time now" and has "become synonymous with unfathomable stupidity across all aspects of its organization." Of note, Foss writes that "it's a team who has defiantly refused to change its nickname amid claims of racism from Native American groups." He notes that Interior Secretary Sally Jewell has said the NPS "won't allow the team a new lease at hallowed RFK Stadium because of the nickname." However, "owner Dan Snyder has said the team will 'NEVER' change its name."

ARIZONA URGED TO DEVELOP PLAN TO TRANSFER FEDERAL LANDS. In his column for the [Arizona Republic](#) (9/3, 1.12M), Robert Robb writes that "Arizona should follow the lead of other states and develop a carefully considered plan" for the transfer of federal land. He claims that "the federal government loses money on the public lands it manages. The states make money, and quite a bit of it." According to Robb, the federal government has "lost the ability to put lands intended to be managed for multiple purposes to any use other than conservation."

Empowering Native American Communities:

ASSISTANT SECRETARY WASHBURN ANNOUNCES \$1.7 MILLION NOW AVAILABLE FOR TRIBAL EDUCATION. The [Lakota Country \(SD\) Times](#) (9/3) reports that "on Monday, Secretary of Indian Affairs Kevin Washburn announced that \$1.7 million dollars has been made available to tribes through initiatives set in motion by the Bureau of Indian Education."

RAND PAUL SAYS "LACK OF ASSIMILATION" HAS BEEN "DISASTER" FOR NATIVE AMERICANS. The [Huffington Post](#) (9/3, 164K) reports that "GOP presidential candidate Rand Paul took to the airwaves Thursday to broadcast his theory that Native Americans 'don't do very well because of their lack of assimilation.'" In an exchange with conservative talk show host Laura Ingraham, Paul said, "I think assimilation is an amazing thing. A good example of how, even in our country, assimilation didn't happen – and it has been a disaster for the people – has been the Native American population on the reservations. If they were assimilated, within a decade they'd probably be doing as well as the rest of us. But instead, seclusion and isolating them – we took their land, and then we put them all on small quadrants of land." His comments were rebuked by Democrats and Native leaders.

Tackling America's Water Challenges:

BARGE AIMS TO KEEP WATER FROM FOLSOM LAKE FLOWING. [KQVR-TV](#) Sacramento, CA (9/3, 61K) reports that "work has begun on building a barge that would supply Folsom with drinking water if water levels get so low the current system doesn't function." According to the article, "if water goes below the intake valve currently used to get water to Folsom, the barge will be put to use pumping water from the lake over the dam and into a pipeline to the city of Folsom." The BOR has "been planning this temporary pump system for months and say water levels and storage can take them through October." However, "they wanted a system in place if it's needed."

Additional coverage was provided by [KSTE-AM Rancho Cordova \(CA\)](#) Rancho Cordova, CA (9/4, 6K) and [KTXL-TV Sacramento \(CA\)](#) Sacramento, CA (9/3, 122K).

Securing America's Energy Future:

Renewable Energy:

WIND INDUSTRY HOPES TO CUT BAT KILLINGS. [The Hill](#) (9/4, Cama, 471K) reports the wind industry is "slowing down their turbines this fall in an effort to dramatically reduce the number of bats the blades kill." The American Wind Energy Association is hoping that by "reducing the speed of turbines to between one and three revolutions per minute during bats' top migrating season," it will "eliminate 30 percent of the bat killings that would happen this year." The strategy, if successful, "could take a big bite out of one of the top criticisms of wind power: that its fast-moving blades kill wildlife such as birds and bats."

LAWSUIT SEEKS TO STOP TRANSFER OF KERR DAM TO TRIBES. The [AP](#) (9/3, 15K) reports that "residents in and around Flathead Lake are asking a judge to temporarily block federal officials from transferring a hydroelectric dam in northwestern Montana to the Confederated Salish and Kootenai Tribes." The plaintiffs — state Sen. Bob Keenan, a Bigfork business owner, Verdell Jackson, supervisor of the Flathead Conservation District and Pointer Scenic Cruises — filed a motion in U.S. District Court in the District of Columbia on Wednesday. The transfer is scheduled to take place on Saturday. According to the article, "it wasn't clear if a judge would hold a hearing in time to delay the transfer." The motion requests that the Federal Energy Regulatory Commission be "required to hold hearings to determine if the tribe and its public utility Energy Keepers Inc. have the financial and technical ability to safely operate the dam and if the transfer will be in the public interest."

Additional coverage was provided by the [Missoulian \(MT\)](#) (9/4, 116K), the [Great Falls \(MT\) Tribune](#) (9/3, 75K), the [Washington \(DC\) Times](#) (9/4, Hanson, 344K), the [Helena \(MT\) Independent Record](#) (9/4, 39K), and [WRAL-TV Raleigh \(NC\)](#), Raleigh, NC (9/4, 193K).

Onshore Energy Development:

OSMRE BACK KEEPING COLOWYO MINE OPEN. The [AP](#) (9/4, Slevin, 344K) reports that “federal regulators have recommended that a northwestern Colorado coal mine threatened with closure partly over its impact on global warming remain open.” The OSMRE “issued its decision Tuesday, five days before a court-imposed deadline that congressional, state and local lawmakers had urged the office to meet to keep the Colowyo mine operating near Craig.” The Interior Department “still must decide whether to accept the recommendation to ensure the mine’s future, but U.S. Sen. Michael Bennet said Thursday that the review ‘will help relieve significant anxiety in Moffat and Rio Blanco counties.’”

Additional coverage was provided by the [Denver \(CO\) Post](#) (9/4, Slevin), the [Macon \(GA\) Telegraph](#) (9/4, 161K), the [Oklahoman](#) (9/4, 408K), and [Yahoo! News](#) (9/4, Slevin, Press, 5.98M).

OSMRE HOLDS PUBLIC HEARING IN LEXINGTON TO DISCUSS PROPOSED STREAM PROTECTION RULE. [WYMT-TV](#) Hazard, KY (9/4) reports that OSMRE officials are “holding a public hearing in Lexington regarding a proposed rule that’s drawing criticism from the coal industry.” The agency “held a public hearing Tuesday in Denver and will hold four more hearings in cities across the country.” The article notes that “several prominent lawmakers, including Congressman Andy Barr and State Senator Brandon Smith of Hazard, are expected to speak.”

The [Lexington \(KY\) Herald-Leader](#) (9/3, 251K) reports that “industry officials and politicians told OSM at the meeting that the agency has not given people enough time to analyze or comment on the rule, but that it was clear the proposal would hamstring surface and underground mining and wipe out jobs.” On the other hand, “representatives of the Sierra Club, Kentuckians for the Commonwealth and others told OSM Thursday that the proposed rule is a step toward greater protection,” although “environmentalists said the rule needs to do even more.”

NEW FRACKING RULES DELAYED UNTIL MID-OCTOBER. The [Platts](#) (9/4, 1K) reports that “new federal fracking rules, originally set to take effect in June, will be delayed until at least mid-October after both sides in a federal case challenging the rules requested more time this week to submit arguments.” Lawyers wrote in joint motion Wednesday, “Given the voluminous nature of the record, the parties agree that additional time is necessary to complete a preliminary review of the record and identify additional citations pertinent to the pending motions for a preliminary injunction.” US District Court of Wyoming Judge Scott Skavdahl “approved the motion Thursday, setting up an expected decision in the case by mid-October.”

WHITE HOUSE REVIEWING FWS OIL, GAS RULE. The [Greenwire](#) (9/3, Subscription Publication) reports that “the White House’s Office of Management and Budget is reviewing a controversial proposal from the Fish and Wildlife Service to update the agency’s nearly-five-decade-old oil and gas regulations.” The article notes that “the draft revision aims to provide a higher and more consistent level of protection for National Wildlife Refuge System resources and recreational opportunities from the impacts of fossil fuel production and abandoned infrastructure.” OMB is “examining the proposal before its public release because the White House considers it to be a ‘significant’ regulation.”

PUBLIC MEETING ATTENDEES CRITICIZE DRILLING LEASE ON NATIVE AMERICAN LAND. The [AP](#) (9/3) reports on an advisory panel meeting in Helena, MT debating the reinstatement of an oil and gas drilling lease on land sacred to Native Americans. Meeting attendees spoke out against the reinstatement of the lease, which was granted to Solenex LLC in the 1980s and suspended in 1997. The panel will make its recommendation on Sept. 21.

TREATY AUTHORITY SEEKS TO UNITE MINNESOTA CHIPPEWA BANDS AGAINST SANDPIPER. The [Duluth \(MN\) News Tribune](#) (9/4, 137K) reports that “the 1855 Treaty Authority said Thursday it wants a resolution from each of the bands within the Minnesota Chippewa Tribe calling for more environmental study before all proposed crude oil pipelines being permitted by the state — including the Sandpiper line — can go forward.” Treaty Authority spokesperson Frank Bibeau said “after a meeting Wednesday with officials from the federal Bureau of Indian Affairs, the treaty rights advocacy group plans to ask each of the tribal councils for a resolution calling for an environmental impact statement on the pipelines under the argument they’re entitled to one based on their treaty rights.”

BIA TO FUND MONITORING OF WATER QUALITY OF STIKINE, TAKU, UNUK RIVERS. [KSTK](#) (9/3) reports that the BIA will “fund baseline water quality testing for three Southeast Alaska rivers that could be affected by British Columbia mine development.” The BIA is “partnering with the Central Council of the Tlingit and Haida Indian Tribes of Alaska to gather baseline water data from the Stikine, Taku and Unuk Rivers.”

OSMRE RECOGNIZES WORK ON SIMPSON NORTHEAST COAL REFUSE FIRE. The [Carbondale \(PA\) News](#) (9/3, 8K) reports that “the Department of Environmental Protection’s Bureau of Abandoned Mine Reclamation (DEP-BAMR) will receive the 2015 Excellence in Abandoned Mine Land Reclamation Appalachian Regional Award.” The award is given by the OSMRE “for its work on the Simpson Northeast Coal Refuse Fire in Fell Township, Lackawanna County in 2014.” It will “be presented at the National Association of Abandoned Mine Land Programs Annual Conference in Santa Fe, New Mexico on September 28.”

Offshore Energy Development:

BP SEEKING RETURN OF SOME MONEY PAID OUT FOR OIL SPILL CLAIMS. The [AP](#) (9/4, Mcgill) reports that attorneys representing BP “told a federal appeals court Thursday that the company should be able to get back some of the money it paid in economic damage claims to businesses and individuals under a settlement arising from the 2010 Gulf of Mexico oil spill.” After the settlement’s approval, BP “argued that the claims administrator had not been correctly matching business’ revenues and expenses, resulting in overpayments,” and while “a court eventually ordered a new calculation method,” it “refused to order restitution of payments already made.” BP “wants restitution of some of the money paid out prior to October 2013.”

[The Hill](#) (9/4, Cama, 471K) reports, that “in briefs before the New Orleans-based appeals court, BP said hundreds of millions of dollars are at stake in the case.” The article reports that “the three-judge panel is not expected to rule immediately on BP’s appeal.”

Report: Claims Related To BP Oil Spill Reach More Than \$5.6 Billion. The [New Orleans Times-Picayune](#) (9/4, 718K) reports that “claims payments to people and businesses harmed by the 2010 BP oil spill have reached more than \$5.6 billion, according to figures the settlement administrator released this week.” Business claims account for the “largest chunk of funds paid under the agreement.” The article reports that “claims submitted since the start of the program totaled 368,230,” and “of that total, 94,600 claims have been paid, the report says.” The article adds that “according to the report, the program has denied payment to more than 92,000 claims.”

ENVIRONMENTAL GROUP SETTLES LAWSUIT AGAINST TAYLOR ENERGY. The [AP](#) (9/3) reports on the settlement of a lawsuit between The Waterkeeper Alliance and Taylor Energy Company regarding oil leaking from the site of a downed Taylor Energy oil platform. Under the terms of the settlement, Taylor Energy agrees to a public meeting discussing the causes of the leakage and agrees to donate \$400,000 for environmental research.

TIMES-PICAYUNE FEDS MUST USE GAS, OIL ROYALTIES TO REBUILD GULF COAST. In an editorial, the [New Orleans Times-Picayune](#) (9/4, 718K) argues that revenue produced from Louisiana oil and gas royalties should be used to rebuild the Gulf coast, noting that “Louisiana and the other Gulf states are the ones that have paid the environmental and infrastructure costs of energy production” and yet “they have gotten essentially nothing to help offset those costs.” The editorial argues that Louisiana “always should have gotten a share of the royalties paid by oil and gas companies, as inland states do for drilling done within their borders” yet “for years the federal government has kept all that bounty.”

America’s Great Outdoors:

Bureau of Land Management:

STUDIES SAY MORE GRAZING WOULDN’T HAVE STOPPED SODA FIRE. The [Idaho Statesman](#) (9/4, 190K) reports that “ranchers repeatedly said that the Soda Fire would not have been so large had they been allowed to have their cattle graze more of the grasses that had grown thick with spring rains,” but “ranchers consistently overstate the potential to stop wildfires with more grazing, Bureau of Land Management leaders insist.” The article notes that “studies conducted by the University of Idaho and others support the BLM’s argument, most notably studies done after the 2007 Murphy Springs Fire that burned more than 600,000 acres.”

NEWLY RENOVATED SANTA CRUZ LAKE REOPENS FOR LABOR DAY WEEKEND. The [Santa Fe New Mexican](#) (9/4, 67K) reports that “Santa Cruz Lake, a popular recreation area closed almost a year for renovations, will reopen Saturday in time for the Labor Day weekend.” The article notes that “the lake, located about 30 miles north of Santa Fe near the village of Chimayo, was abuzz with construction activity Thursday as about 15 staffers under the guidance of Bureau of Land Management civil engineer Herb Chavez worked feverishly to meet the deadline.” The BLM will “reopen the lake on Sept. 5 for boating and fishing,” but “swimming is not allowed at the lake because of the strong underwater currents created by the dam.”

FBI ADMITS TO SPYING ON BURNING MAN IN 2010. The [RT](#) (9/4, 346K) reports that “federal agents spied on Burning Man festival in the Nevada desert in 2010, citing the need to collect intelligence and prevent terrorism, newly released documents reveal.” But “they found no threats apart from festival-goers using ‘illegal drugs.’” The BLM “issued almost 200 citations and arrested 8 people at the 2010 event, attended by more than 50,000 ‘Burners.’”

COOS BAY FORESTRY PIONEER ESTELLA MORGAN REMEMBERED. The [Oregonian](#) (9/4, 756K) reports that Estella Morgan “was killed Nov. 4, 2014, when a tree crushed her truck’s cab while she made her rounds in the Blue Ridge area southeast of Coos Bay.” She was “a dynamic woman who made a lasting mark in the Coos Bay area where she was born.” Morgan “rose to be a leader in the Bureau of Land Management,” and was “known for her exacting standards and reliability in evaluating federal timber as the Coos Bay District’s lead cruise appraiser.”

Fish and Wildlife Service:

TEN ANIMALS THAT DEPEND ON WESTERN SAGEBRUSH. The [Washington Post](#) (9/4, Fears, 6.76M) reports that “sage grouse are dominating the conversation on threats to animals in America’s western sagebrush,” but “other animals of concern also need a voice.” The article highlights “nine other species of animals that live — and die — alongside sage grouse in a declining habitat.”

Opinion: Sage Grouse Conservation Efforts Should Prevent Listing. In a piece for the [Mesquite \(NV\) Local News](#) (9/4, 16K), Thomas Mitchell writes that listing the greater sage grouse under the Endangered Species Act “could be devastating for mining, oil and natural gas exploration, agriculture, wind turbines, solar panels, power transmission lines and recreation.” Mitchell hopes that “a court-mandated deadline on whether to list greater sage grouse is due by Sept. 30.” He hopes that recent efforts to save the grouse “are provably already succeeding” and “will be heard in Washington.”

Additional coverage of the sage grouse was provided by [Boise \(D\) State Public Radio](#) (9/3) and the [Audubon Society](#) (9/4, 1.65M).

PRAIRIE CHICKEN RULING CASTS DOUBT ON FWS LISTING POLICY. The [Greenwire](#) (9/3, Subscription Publication) reports that “a judge’s decision Tuesday to strip federal protections from a prairie grouse that roams the southern Great Plains has thrown into question how the government considers voluntary conservation measures when issuing listing decisions under the Endangered Species Act.” The holding could influence how the FWS “considers voluntary conservation programs in other high-profile listing decisions, such as the greater sage grouse.” The ruling by Judge Robert Junell of the U.S. District Court for the Western District of Texas “overturned the agency’s decision in spring 2014 to list the lesser prairie chicken as threatened in Texas, New Mexico, Oklahoma, Kansas and Colorado, where the bird’s native grassland and prairie habitat had shrunk by 84 percent.”

Additional coverage was provided by the [Topeka \(KS\) Capital-Journal](#) (9/2, 109K), the [Salina \(KS\) Post](#) (9/3), the [Hays \(KS\) Post](#) (9/3), the [Oklahoman](#) (9/4, 408K), [Reuters](#) (9/3, Maclean), and [KAMR-TV Amarillo \(TX\)](#) Amarillo, TX (9/4, 428).

FWS STANDS BY DECISION ALLOWING KILLING OF ENDANGERED NORTH CAROLINA RED WOLVES. [Reuters](#) (9/3, Liston) reports that the FWS on Thursday stood by its decision to authorize recent killings of two highly endangered North Carolina red wolves on private property, despite plans by conservationists to sue. FWS spokesman Tom MacKenzie said, “We are confident we have the authority to take these management actions.”

FWS RELEASES REPORT SHOWING GROUNDWATER CONTAMINATION FROM GE’S CHEMICALS. [International Business Times](#) (9/4, 835K) reports that “environmental groups and Democratic legislators are pressuring New York Gov. Andrew Cuomo to say that General Electric must continue cleaning up the massive pollution the company dumped into the Hudson River over decades during the 20th century.” GE has “called its operations ‘one of the largest and most successful environmental cleanup projects ever undertaken in the United States.’” However, Margaret Byrne, an official at the FWS, “who is the agency’s assessment and restoration manager for the Hudson River, raised questions about GE’s plan to shut down its dredging operations this year.” The FWS “on Thursday released a report showing that groundwater in some upstate towns remains contaminated by GE’s chemicals.”

A [New York Times](#) (9/4, Subscription Publication, 11 82M) editorial calls on General Electric to complete its clean-up of the Hudson River. If it fails to do so, the Times says New York Gov. Andrew Cuomo should “do right by the river,” and “demand payback” or “the state could dredge the canal itself, and send G.E. the bill.”

FWS BIOLOGIST RAISES CONCERNS THAT QUARRY COULD KILL KANKAKEE FISH. The [AP](#) (9/4, 36K) reports that “area farmers are making a last ditch effort to stop the Singleton Stone Quarry even as bulldozers scrape off acres of topsoil to clear the way for deeper stone excavations.” Elizabeth S. McCloskey, a biologist for the FWS, “recently wrote the Indiana Department of Environmental Management asking them to deny quarry operators permission to pump millions of gallons of groundwater into the Singleton Ditch where it could cloud the man-made waterway and farther downstream in the Kankakee River with sediment, endangering fish and freshwater mussels.” James Wieser, an attorney for Singleton Stone and its parent company, Reith-Riley Construction Co., said Monday that “he is unaware of the U.S. Fish and Wildlife letter, but is confident the state is ready to give its final approval for all quarry operations.”

O’SULLIVAN’S ISLAND IN DERBY RECEIVES GRANT TO BUILD FISHING PIER. The [New Haven \(CT\) Register](#) (9/3, 172K) reports that “the city has secured a \$325,000 grant to build a fishing pier at O’Sullivan’s Island.” The grant was awarded by the FWS on behalf of the Connecticut Housatonic Natural Resource Trustee Council.

ARIZONA SEEKS TO INTERVENE IN LAWSUIT OVER MEXICAN WOLF REGULATIONS. The [Prescott \(AZ\) Daily Courier](#) (9/4, 42K) reports that “the state of Arizona and Office of the Arizona Attorney General Tuesday, Sept. 1, filed a motion to intervene in a lawsuit brought by several groups in July against the U.S. Fish and Wildlife Service.” According to the article, “the lawsuit challenges some aspects of the Service’s revised 10(j) rule that governs the management of Mexican wolves in Arizona and New Mexico.”

National Park Service:

BUZZARD POINT MARINA TO CLOSE IN DECEMBER. The [Washington Post](#) (9/4, Zauzmer, 6.76M) reports that “Buzzard Point Marina, where boat owners have docked for more than a half-century, will close in December, displacing about 60 boat owners, the National Park Service said Thursday.” Officials said “the marina is in need of improvements to remain safe and modern, but to do so would be prohibitively expensive.” Instead, “the marina will close, and later, the agency will study other opportunities to offer recreational facilities on the Anacostia River.” NPS Superintendent Gopaul Noojibail said, “Closing the marina is not a decision that was made lightly.”

TWO ELECTRIC VEHICLE CHARGING STATIONS INSTALLED ON NATIONAL MALL. The [Autoblog](#) (9/3, 632K) reports that “two EV charging stations have been installed at the National Mall in Washington, DC.” Installed by the NPS, “the stations – which cost \$2 per hour to use – are located across from the National Museum of American History and from the National Air and Space Museum.” NPS Acting Superintendent Karen Cucurullo said, “As the National Park Service prepares for its second century of service to the American people, we are committed to providing clean and green energy to promote a healthy environment.”

GRAND TETON NATIONAL PARK SUPERINTENDENT DAVID VELA SPEAKS TO “CITY KIDS.” The [AP](#) (9/4, 2.28M) reports on City Kids, “a nonprofit that provides underserved and at-risk Washington, D.C.-area youth with wilderness experiences.” The group is “made up of sixth- through 12th-graders, and they visit Jackson each year to accomplish a laundry list of tasks.” Grand Teton National Park Superintendent David Vela “spoke to the kids and shared a story they could all relate to.” Vela said, “What this program does is that it brings them out to a national park to experience things that may be new, but most importantly to give them confidence and peace of mind that they belong here, that national parks are part of their birthright and that they can have life-changing and memorable experiences. That’s what this program does.”

AMATEUR PALEONTOLOGIST FINDS RARE FOSSIL OF FISH AT PETRIFIED FOREST. The [AP](#) (9/4, 2.28M) reports that Stephanie Leco, an amateur paleontologist, “hit a paleontology jackpot this summer with the discovery of a jaw bone from a long-snouted fish at Petrified Forest known to exist more than 220 million years ago.” Leco was “part of the first dig for citizens held last month at the national park near Holbrook that routinely turns up fossils from the dawn of dinosaurs and has vast expanses of rainbow-colored desert.” According to the article, “the fossil about the size of a pinky fingernail was unearthed from the site of what was a lake or pond during the Late Triassic period when the fish were thought to be extinct in North America.”

MAN FOUND DEAD IN YOSEMITE NATIONAL PARK HAD BEEN HIKING ALONE. [Reuters](#) (9/3) reports that Yosemite National Park officials said on Thursday that a man whose body was found in the park this week had been hiking alone and was not discovered for more than three weeks because nobody reported him missing. The remains of James Michael Millett Jr., who was last seen alive on Aug. 11, were found earlier this week, according to park spokeswoman Jodi Bailey.

ADDITIONAL COVERAGE DIGNITARIES, VETERANS MARK THE END OF WORLD WAR II. Additional coverage that dignitaries and veterans “laid wreaths at the National World War II Memorial in Washington to mark the official end of the war” was provided by the [Arizona Republic](#) (9/3, 1.12M).

ADDITIONAL COVERAGE SCHOODIC CAMPGROUND OPENS AT ACADIA NATIONAL PARK. Additional coverage of the opening of Schoodic Woods Campground at Acadia National Park was provided by the [Mount Desert \(ME\) Islander](#) (9/4) and [WABI-TV Bangor \(ME\)](#) Bangor, ME (9/2, 5K).

ADDITIONAL COVERAGE ROCKY MOUNTAIN NATIONAL PARK CELEBRATING 100TH ANNIVERSARY. Additional coverage of Rocky Mountain National Park’s 100th anniversary celebration was provided by the [Fetes Park \(CO\) News](#) (9/4).

ADDITIONAL COVERAGE WILDLIFE OVERPASS PROPOSED ON 101 FREEWAY IN LOS ANGELES. Additional coverage of a proposed wildlife crossing over Highway 101 in Los Angeles was provided by the [Washington \(DC\) Times](#) (9/4, 344K), [CBS News](#) (9/4, 7.05M) and the [Ventura County \(CA\) Star](#) (9/4, 144K).

OP-ED NATIONAL PARKS NEED TO ATTRACT MORE DIVERSITY IN VISITORS. In an op-ed for the [Seattle Times](#) (9/4, 962K), Glenn Nelson, the founder of TrailPosse.com, writes that the numbers on the diversity of national park visitors "portend disaster for our public lands." He notes that "the Census Bureau projects a nonwhite majority in the U.S. within the next three decades," and says that "if that new majority doesn't develop any affinity for the outdoors, the Park Service, as well as the retail and nonprofit ecosystem surrounding it, could go the way of pay phones, records and film cameras — from indispensable to irrelevant." Nelson suggests that one place to begin is the makeup of NPS employees. He argues that "if the Park Service is the face of outdoors in our country, it can't be so unrelentingly white." He continues, "factor in the overwhelmingly Caucasian nature of conservation and environmental organizations, as well as the near-complete absence of minorities in media and advertisements, and it's no wonder that people of color view the outdoors as an exclusive, whites-only club."

Top National News:

IN TRIP TO FLORIDA, BIDEN ATTEMPTS TO SWAY JEWISH LEADERS ON IRAN DEAL. The Vice President's meeting with Rep. Debbie Wasserman Schultz and Jewish leaders in South Florida to defend the Iran nuclear agreement garners heavy print and online coverage, but was not mentioned on the network news broadcasts Thursday evening. Several reports this morning indicate that Biden appears to have been unsuccessful in swaying the Jewish leaders, who remain vehemently opposed to the deal. Another theme evident in some of the coverage is speculation over whether the Vice President will enter the 2016 presidential race, with several reports casting his comments as an effort to present his foreign policy credentials and portray himself as the President's natural successor.

The [Miami Herald](#) (9/4, Sherman, 651K) reports that in his "longest public defense of the Iran deal," the Vice President said he has been "very skeptical" about the ability to constrain the activities of Iran related to its nuclear ambitions," but "concluded that it is a good deal." Biden also said "he respects those who have decided to oppose the deal, but 'the only thing I don't have a lot of time for' is 'the idea that we can't do business with the bad guys.'" The [Palm Beach \(FL\) Post](#) (9/4, Bennett, 497K) notes that the Vice President said that making a deal "with the 'bad guys' in Iran is as necessary as the nuclear arms agreements the US made with the Soviet Union during the Cold War."

[Reuters](#) (9/4, Whitesides) reports that the Vice President expressed confidence that the deal would eliminate Iran's ability to develop a nuclear weapon, saying, "If we can take the nuclear bomb off the table, it's better to deal with those bad guys than if we are dealing with those bad guys and the nuclear bomb is on the table." [Bloomberg Politics](#) (9/3, Talev, 247K) says the Vice President said it is "simply not true" as some opponents suggest, that the deal gives the international community no ability to know what's going on in Iranian military facilities," and "invoked former President George H.W. Bush," saying, "As one person said: Read my lips. ... Not true. We can."

[USA Today](#) (9/4, Korte, 5.23M) reports that in his "meandering...off-the-cuff" remarks, the Vice President argued that "US credibility around the world is at stake," saying, "I've been doing foreign policy for 42 years. I cannot think of a single time since I've been involved where our ability to conduct foreign policy has been so strained because of the dysfunction in Washington and in Congress."

The [Wall Street Journal](#) (9/4, Lee, Subscription Publication, 5.95M) reports that Biden also discussed Iranian Supreme Leader Ayatollah Ali Khamenei, saying that because he wants to maintain Iran's legitimacy, he will not use the billions of dollars the country will receive under the deal to fund military activities, as deal opponents have said, but would invest the funds in Iran's economy.

The [South Florida Sun Sentinel](#) (9/4, 651K) says that while opponents of the deal gave the Vice President "high marks...for his detailed and impassioned defense of the agreement, he didn't seem to persuade many of the South Florida Jewish leaders who heard his pitch." The Sun Sentinel adds that Wasserman Schultz, who chairs the DNC, "said she still doesn't know how she'll vote." The [New York Times](#) (9/4, Harris, Subscription Publication, 11.82M) says that "the head of the president's party committee" can traditionally "be counted on to support and fight for every major White House priority." Wasserman Schultz "said she still needed to speak to nuclear experts and foreign diplomats as part of her research and promised to make a decision before Tuesday, when Congress comes back into session." The [Washington Post](#) (9/4, O'Keefe, 6.76M) similarly notes that the Vice President "did little to sway" the Jewish leaders "who strongly oppose the agreement."

The [New York Times](#) (9/4, Harris, Subscription Publication, 11.82M) also reports that the Vice President "offered few clues about his thinking" on the 2016 presidential race and did not address whether he will run. According to his aides, he "may not decide until early October or perhaps later." However, the [Washington Post](#) (9/4, O'Keefe, 6.76M) says that if the Vice President enters the race, "Thursday's event was an early reminder to would-be supporters of Biden's deep knowledge of foreign affairs and support for Israel."

[Politico](#) (9/3, Gass, 942K) noted that the Vice President "ticked through his foreign policy bona fides...amid speculation that he might launch a presidential bid of his own," saying, "I've traveled, as of today, 992,894 miles for the president. I've met with virtually every major leader in the world. I know these guys, I know them better than anybody in the administration because I've been hanging around so long." [The Hill](#) (9/3, Fabian, 471K), likewise, said that the Vice President "put his foreign policy chops on full display," noting that the event "doubled as a chance for Biden to show off his decades of foreign policy experience as he considers challenging Hillary Clinton for the Democratic presidential nomination." His comments, [The Hill](#) added, "offered a view of the foreign policy arguments he might make if he enters the 2016 presidential race."

The [AP](#) (9/4, Thomas), meanwhile, said Biden's "robust defense" of the deal in Florida is "the latest sign of his work to present himself as a natural heir to President Barack Obama" as he "considers a late entry into the Democratic presidential primaries." The [Atlanta Journal-Constitution](#) (9/4, 1.05M) reports that in a speech at an Atlanta synagogue later Thursday, the Vice President "delivered a forceful defense" of the deal and "sought to position himself as the candidate who would continue President Barack Obama's legacy were he to run for president."

Three More Senate Democrats Voice Support For Deal. Back in Washington, three more Senate Democrats, Cory Booker, Mark Warner, and Heidi Heitkamp, announced their support for the deal. [Politico](#) (9/3, Kim, 942K) reported they all "said the deal isn't flawless but beats the alternative," adding that Booker, "who's faced pressure from the Jewish community in New Jersey to oppose the deal," faced an almost immediate backlash. Rabbi Shmuley Boteach, "whose relationship with Booker dates nearly 25 years, criticized Booker's 'troubling and tragic choice' to back the deal and called his reasoning 'riddled with logical inconsistencies.'"

[Reuters](#) (9/4, Zengerle) notes that their support brings the total number of senators supporting the deal to 37, four short of the votes needed to filibuster a resolution of disapproval. The [AP](#) (9/4, Werner) says it "deflat[ed] opponents and boost[ed] White House hopes of blocking a disapproval resolution in the Senate and sparing President Barack Obama from resorting to a veto." [Roll Call](#) (9/3, Fleming, 113K) noted that the President "has a pretty good track record of blocking bills he opposes before they reach his desk."

In a [Huffington Post](#) (9/3, Stein, Conetta, 164K) report on its latest "Drinking & Talking" panel, Sen. Chris Murphy was quoted as saying of the Senate majority leader's opposition to the deal, "Whether the Senate likes it or not, it is the American president that sets American foreign policy." The [Christian Science Monitor](#) (9/2, Kiefer, 455K) story published Tuesday said that the deal "stands out for the thoroughness and deliberation that Democrats...have brought to this difficult vote," adding that many "consider it among the most important and agonizing votes of their careers."

Rasmussen Poll Finds Public Support For Deal Slipping. The [Washington Times](#) (9/4, Richardson, 344K) reports that a Rasmussen Reports survey released Thursday shows public support for the deal is slipping. According to the survey, "50 percent of voters surveyed want their congressional representatives to vote against the deal, while 32 percent want to see Congress approve" it. In a poll released two days after the deal was unveiled, Rasmussen "found that 39 percent favored the deal while 42 percent opposed it."

Duncan Requests "Full Record" Of Administration Negotiations With Iran. The [Washington Times](#) (9/4, Taylor, 344K) reports that in a move that "set[s] the stage for a new standoff between the White House and Congress," Rep. Jeff Duncan on Thursday called on the Administration "to provide a full record of its negotiations with Iran relating to the nuclear deal." In a letter to Secretary of State Kerry on Wednesday, Duncan "asked for the State Department to 'release to all documents and communications in your possession, custody, or control relating to the nuclear deal,'" and "called for a release of all communications between the US and its negotiating partners...arguing that such materials are needed 'in order to ensure that members of Congress are fully aware of the implications' of the accord." The Times notes that the request "zeroes in on charges that parts of the final deal have still not been shown to lawmakers as they prepare to vote."

Netanyahu Says He Will Continue Push Against Iran Deal. The [Wall Street Journal](#) (9/4, A1, Entous, Subscription Publication, 5.95M) reports in a front-page story that Israel's bid to derail the deal has angered the White House and embittered many Democrats. The Journal also notes that while Israel's effort to scuttle the deal in Congress appears to have fallen short, Netanyahu and his allies may seek other ways to accomplish that goal.

[McClatchy](#) (9/4, Greenberg, 28K) reports that Netanyahu "is giving no sign that he is about to change course or halt his public criticism of the accord." Netanyahu "suggested Thursday that he would take his message to the American people," saying, "An overwhelming majority of the American public sees eye to eye with us on the danger posed by Iran. ... It's important to instill in American public opinion in the coming decade, and maybe beyond, the fact that Iran is an enemy of the United States. It openly declares this. And Israel is an ally of the United States. This understanding has important implications for our security." In his [Washington Post](#) (9/4, Ignatius, 6.76M) column, David Ignatius says Netanyahu is facing a "stark dilemma" over whether to "try to rebuild bipartisan relations in Washington" after the President has secured the votes needed to implement the deal,

or "double-down once again, by encouraging Republican presidential candidates to repudiate the deal if elected."

The [Washington Post](#) (9/4, Booth, 6.76M) says that while Netanyahu "appears to have suffered the worst foreign policy defeat of his career," senior Israeli officials "are saying their prime minister has not failed — but won, in a way." Israeli officials "predict that when the dust settles, Israel will receive a windfall in new, advanced weaponry, including the most modern aircraft and missile technology, from members of Congress eager to show their pro-Israel bona fides and to demonstrate they remain steadfast enemies of Iran, even if some may have backed Obama on the nuclear pact."

Khamenei Says "No Deal" If Sanctions Are Not Lifted. The [AP](#) (9/4, Karimi) reports that Iran's Supreme Leader Ayatollah Khamenei said a "suspension" of the sanctions against Tehran is "unacceptable," adding that "there will be no deal" if world powers insist on suspending rather than lifting sanctions. In remarks which were read on Iranian state TV, Khamenei said, "If the sanctions are going to be suspended, then we will also fulfill our obligations on the ground at the level of suspension and not in a fundamental way." [Reuters](#) (9/4, Selyukh, Rascoe, Heavey) reports that White House press secretary Josh Earnest responded by saying that sanctions relief for Iran is linked to its compliance with the deal.

The [New York Times](#) (9/4, Erdbrink, Sengupta, Subscription Publication, 11.82M) reports that Khamenei, "ordered Parliament to vote on the agreement," noting that while Parliament "is expected to approve the agreement, the announcement nonetheless represented a setback for President Hassan Rouhani and his team of nuclear negotiators, who have long held that the deal should be ratified by the Supreme National Security Council, which Mr. Rouhani heads." [Reuters](#) (9/4, Hafezi) says Rouhani and his allies have opposed a parliamentary vote on the grounds that it could result in legal obligations that could hinder the implementation of the deal.

[USA Today](#) (9/4, McCoy, 5.23M) reports that the Speaker of Iran's Parliament, Ali Larijani, predicted Thursday that Parliament's debate about the deal "could be more heated than US congressional proceedings on the pact," telling a group of US reporters, "I think maybe the drama in my country may be bigger than that of yours. ... There is one thing that I am sure of, and that is there will be heated discussions and debates in the Iranian parliament, as well, because there are people who are opposed to the agreement, and they have different voices."

The [Washington Post](#) (9/4, Morello, 6.76M) reports that Larijani also suggested that "Americans imprisoned in Iran, including a Washington Post reporter, could be swapped for Iranians in US jails." During an interview with [NPR](#) while he was in New York, Larijani was asked "if the Iranian government might release the Americans, mentioning Jason Rezaian, the Post's Tehran correspondent." He said, "There are practical ways, of course. ... For example, there is a number of Iranians in prison here [in the US]. Definitely for matters of this sort, one can come up with solutions. I think your politicians know about those ways." Asked if he was referring to a prisoner swap, Larijani said, "That's one way. There are other ways that the judiciary systems of the two countries can come up with."

Obama Praises "Humans Of New York" Photo. [TIME](#) (9/4, White, 19.55M) reported that the President "left a heartfelt note" in response to a [photograph](#) "posted Thursday to the Humans of New York Facebook page, featur[ing] a young Iranian boy and his father, along with a story from the proud parent telling how he knew his son would be a humanitarian when the boy gave away a bag of fruit he was asked to hold." Using the White House Facebook account, the President wrote, "One of the most fulfilling things that can happen to you as a parent is to see the values you've worked to instill in your kids start to manifest themselves in their actions. ... And this one really resonated with me." In what [TIME](#) said was a "possible allusion to his impending nuclear deal with Iran," the President "promised to 'continue doing whatever I can to make this world a place where he and every young person like him can live up to their full potential.'" The [Times Of Israel](#) (9/4, Dolsten, 16K) notes that the President's comment "received over 57,000 likes as of the publication of this article."

[Vox](#) (9/3, Fisher, 1.1M) said that "Obama's repeated gestures of comity and warmth toward the Iranian people are, truly, unusual," and noted that his "expression of hope that he might one day meet this 10-year-old Iranian boy has subtext to it: That meeting, unless the boy immigrates to the US, would likely require a substantial change in the nature of US-Iran relations."

Cohen: For Republicans, Iran Deal Is Like Obamacare. In his [New York Times](#) (9/4, Subscription Publication, 11.82M) column, Roger Cohen calls the fact that "Republican maneuvering, backed by Prime Minister Benjamin Netanyahu of Israel, has not prevailed" is "a victory for reason in a season of rage." Noting that former undersecretary of state Nicholas Burns said the deal "will become the 'Obamacare of foreign policy,'" Cohen wrote, "Yes, it will" in that "something sensible (at least in the eyes of most people across the world) to which Republicans will never acquiesce and which they will try to use in every conceivable way to undermine a president they loathe."

KENTUCKY COUNTY CLERK JAILED FOR REFUSING TO ISSUE MARRIAGE LICENSES. The jailing of Rowan County, KY clerk Kim Davis for contempt of court for her refusal to grant marriage licenses led all three network newscasts last night, garnering nearly eight minutes of coverage, and continued to generate heavy print and online treatment this morning. [ABC World News](#) (9/3, lead story, 2:35, Muir, 5.84M) reported that Davis was "elected to her post, but after the Supreme Court ruling on same sex marriage" was "still refusing to issue licenses to gay couples," arguing "she's abiding by God's authority that allows her faith to refuse those couples." US District Judge David Bunning found her in contempt of his order to issue the licenses. [ABC](#) (Perez) added that Davis "can resign, but if she doesn't and refuses to comply," Judge Bunning "can keep her in custody as long as she stands her ground."

The [Louisville \(KY\) Courier-Journal](#) (9/4, Wynn, Kenning, 414K) reports that five of Davis' six deputies "say they will process the paperwork" for the licenses beginning today. The "holdout was Davis' son, Nathan Davis." The [Courier-Journal](#) notes that "the other deputy clerks had reservations, some based on religion, as Davis has maintained, others with questions about their legal authority to sign off on forms without the elected official's consent," and Davis' attorneys "also called into question whether any licenses issued in her absence would be legal."

The [CBS Evening News](#) (9/3, lead story, 2:45, Reynolds, 5.08M) reported that that Davis' supporters "engaged in a fire-and-brim stone rally" outside the Ashland, KY federal courthouse, but "in the quiet of his courtroom," Judge Bunning "made it clear that he would not be swayed." On the stand, Davis "wept as she talked about her faith and her inability to carry out the judge's order to issue marriage licenses for same-sex couples," but Judge Bunning said, "Her good-faith belief is not a viable defense." The judge held Davis in contempt "and ordered her to jail until she ended her defiance." [NBC Nightly News](#) (9/3, lead story, 2:35, Holt, 7.86M) noted that Judge Bunning "drew a clear line as to where religious freedom ends and the law of the land begins" in jailing Davis.

The [Washington Post](#) (9/4, Somashekhar, 6.76M) reports that Judge Bunning told Davis "she could remain a free woman" if "she gave permission to her deputies to sign the certificates in her stead," but after consulting with her attorneys, when the court reconvened after a short recess on Thursday, Davis "was not in her seat," and one of her attorneys "explained that Davis, an Apostolic Christian, 'does not grant her authority nor would allow any employee to issue those licenses.'" Davis therefore "consented herself to jail, sparking a fresh round of legal wrangling and political calculation in the face of the most audacious display of defiance on the issue of same-sex marriage" since the Supreme Court ruling. The [New York Times](#) (9/4, Blinder, Subscription Publication, 11.82M) reports that Judge Bunning, who was appointed by President George W. Bush, said, "The court cannot condone the willful disobedience of its lawfully issued order. If you give people the opportunity to choose which orders they follow, that's what potentially causes problems."

[Politico](#) (9/3, Collins, 942K) reports that the American Civil Liberties Union attorneys "who filed the motion on Monday did not ask for jail time; instead they requested Davis be fined because she 'continues to collect compensation from the Commonwealth for duties she fails to perform,' according to the motion."

The [New York Times](#) (9/4, Rogers, Subscription Publication, 11.82M) reports that "dozens of people gathered" outside the courthouse "in two cacophonous groups to debate what both sides felt was history in the making, but for different reasons." On one side were "those condemning" Davis' actions. Her critics "saw her jailing as vindication, and as an indication that the final barriers to same-sex marriage were continuing to fall." On the other side, "a vocal crowd" of Davis' supporters "argued that her case is further proof that religious freedom in America is in jeopardy." The [Wall Street Journal](#) (9/4, Campo-Flores, Subscription Publication, 5.95M) and [Reuters](#) (9/4, Bittenbender) also report on the court proceedings.

The [Washington Post](#) (9/4, 6.76M) editorializes that Davis "brought this on herself by refusing to resign from a government position with duties she openly admits she will not fulfill." Davis "has every right to oppose same-sex marriage as a private citizen," but "her religious convictions do not excuse her from having to apply the law as it stands in her official duties, a commitment she made when she took office." The [Wall Street Journal](#) (9/4, Subscription Publication, 5.95M), meanwhile, editorializes that Judge Bunning's ruling shows a double standard, arguing that former Attorney General Holder chose not to defend challenges to the Defense of Marriage Act, and former San Francisco Mayor Gavin Newsom issued marriage licenses to same-sex couples in defiance of California law. The [Journal](#) contends that both were praised for putting their consciences before the law, while Davis is being vilified for doing the same.

Paul, Cruz Blast Judge For Jailing Davis. [The Hill](#) (9/3, Byrnes, 471K) reports in its "Blog Briefing Room" blog that Davis "is getting full-throated support from several Republican presidential candidates." Sens. Rand Paul and Ted Cruz "blasted a judge's decision" to jail Davis. Paul told CNN, "I think it's absurd to put someone in jail for exercising their religious liberty." Cruz, "a vocal opponent of the Supreme Court's decision legalizing same-sex marriage this summer, also rebuked the judge. 'Today, judicial lawlessness crossed into judicial tyranny. Today, for the first time ever, the government arrested a Christian woman for living according to her faith. This is wrong. This is not America,'" Cruz said "in a lengthy statement posted to his campaign website next to a bright red button for supporters to donate to his White House bid."

EX-STATE IT OFFICIAL WILL NOT TESTIFY ABOUT CLINTON EMAIL SERVER DESPITE CAMPAIGN'S WISH THAT HE DO SO. Coverage of the controversy over Hillary Clinton's use of a private email server while secretary of state runs primarily on two related threads: the refusal of ex-State information technology official Bryan Pagliano, who helped set up the server, to testify before the House Select Committee on Benghazi.

DOI in the News:

AS OBAMA CONCLUDES VISIT TO ALASKA, ENVIRONMENTALISTS SLAM DRILLING DECISION. The final day of the President's visit to Alaska generated a brief report on the [CBS Evening News](#) (9/2, story 12, 0:25, Pelley, 5 08M), which noted an incident in which the President held up a salmon and "the fish...disgraced itself, on Mr. Obama's shoes," and a short report on [NBC Nightly News](#) (9/2, story 9, 0:25, Holt, 7.86M), which also noted the incident. Print and online coverage, which are also lighter, highlight the President's visit to the towns of Dillingham and Kotzebue, casting it as an effort to draw attention to the impact climate change is already having. While it was not as ubiquitous in the coverage as in previous days, criticism from environmentalists over the decision to allow Royal Dutch Shell to drill in the Arctic continues to appear alongside coverage of the President's trip.

Under the headline, "Obama Paints Dire View On Climate Change," the [Alaska Journal of Commerce](#) (9/3, Brehmer, 14K) says the President "seems to be setting the agenda for the final 16 months of his presidency, and climate change is his top priority." However, the Journal also notes that environmentalists, who are "typically in the president's corner had harsh words for him stemming from his administration's approval of Shell's drilling offshore drilling plan in the Chukchi Sea," and includes statements from several groups criticizing the decision. Dan Springer reported on [Fox News' Special Report](#) (9/2, 1.53M) that the Administration's "all-of-the-above energy strategy in Alaska is pleasing none of the above." While environmentalists "are outraged" that the President allowed drilling in the Arctic, the oil industry believes he "remains too restrictive" by blocking "huge potential reserves."

The [Los Angeles Daily News](#) (9/3, McNally, 288K) reprints a Global Post piece by Caitlin McNally, who noted that as she wrote, "Shell's rig, the Transocean Polar Pioneer, was approaching its destination 70 miles off the shores of Wainwright, Alaska." McNally wrote that during a visit to the Royal Dutch Shell offices in London, "it was made abundantly clear to me that the company accepts the fact of global warming and the consequences of climate change as a new normal," but "part of this focus on climate change reality includes an unapologetic reminder to the world that Shell is, after all, an oil and gas company."

[Reuters](#) (9/3, Rampton, Quinn) portrays the President's visits to Dillingham and Kotzebue as an effort by the White House to draw attention to the impact climate change is having on Americans. The [AP](#) (9/3, Lederman) reports that the President's "goal was to showcase the havoc he says human-influenced climate change is wreaking on Alaska's delicate landscape: entire rural villages sinking into the ground as permafrost thaws, protective sea ice melts and temperatures climb."

A later story from the [AP](#) (9/3, Lederman) reported that the President told residents of Kotzebue "that their plight should be the world's wake-up call on global warming." During his visit to the town, which was "designed to snap the country to attention by illustrating the ways warmer temperatures have already threatened entire communities and ways of life in Alaska," the President "I've been trying to make the rest of the country more aware of the changing climate, but you're already living it." The [New York Times](#) (9/3, Davis, Subscription Publication, 11.82M) says that in his "history-making stop," the President delivered an "alarm-sounding message about the warming of the planet — a phenomenon occurring twice as quickly in Alaska as in the rest of the United States." [USA Today](#) (9/3, Korte, 5 23M) also reports the President "sound[ed] the alarm on climate change," saying, "What's happening here should be America's wake-up call. It's the world's wake up call."

On its website, [Voice of America](#) (9/3, Williams, Gallo, 32K) reviewed the President's entire visit to Alaska, noting that the "highly choreographed trip across Alaska aims to build support for his environmental policies to combat climate change." In a story on the President's use of a "selfie stick" during the trip, [The Hill](#) (9/2, Henry, 471K) noted that the White House cast the trip "as an opportunity for him to personally show Americans the impact of climate change on the region."

In an in-depth piece, [Vox](#) (9/2, Plumer, 1.1M) discusses "why Shell is going to such extreme lengths for oil, why Obama gave it the green light, and how this drilling project acquired such outsized significance in the climate debate." The article discusses several points, including: (1) Shell wants to produce from US Arctic waters as no one else is currently doing; (2) Shell's efforts have so far "been bogged down by lawsuits and disasters;" (3) the Obama Administration "now thinks Shell is ready to drill;" (4) the difficulties of cleaning up an Arctic oil spill; (5) disagreement between Obama and environmentalists "on whether Shell's drilling matters for global warming;" (6) what to expect from the next president; and (7) that Arctic drilling's future "is highly uncertain — and a lot depends on Shell."

Additional coverage was provided by [CNN](#) (9/2, 5.17M), [The Hill](#) (9/3, Biette, 471K), the [Baltimore \(MD\) Sun](#) (9/3, 834K), the [New Republic](#) (9/2, 242K), [KSHB-TV Kansas City \(MO\)](#) Kansas City, MO (9/3, 100K), [WRC-TV Washington \(DC\)](#) Washington (9/3, 345K), and [WDIV-TV Detroit \(MI\)](#) Detroit (9/3, 292K).

White House Announces Initiatives To Promote Energy Efficiency In Alaska. [Alaska Dispatch News](#) (9/3, 219K) reports that ahead of the President's visit to Kotzebue, the White House "announced new efforts and funding to encourage energy efficiency in remote villages and the appointment of a federal coordinator for 'climate resilience' in Alaska." The announcement "includes more than \$20 million in new funding through grants and other routes." Among the initiatives announced by the White House, the [Washington Post](#) (9/3, Eilperin, 6.76M) notes, is \$4 million "to speed the development of renewable energy in remote Alaskan communities, part of a package of new programs aimed at reducing fossil fuel use and countering climate impacts in the region of the world that is warming the fastest." The Post notes that although the Administration announced the initiatives "under the umbrella of helping tribal and rural communities cope with climate change and other challenges," several tribal leaders "said they expected more from the federal government given the peril their communities now face."

Additional coverage was provided by the [Greenwire](#) (9/2, Subscription Publication), the [Alaska Dispatch News](#) (9/3, Martinson, 219K), and the [Seattle \(WA\) Post-Intelligencer](#) (9/2, 560K).

Obama Administration Unveils New Climate Resilience Tools. The [Native American Times](#) (9/2, 337) reports that "as part of the Obama Administration's Climate Data Initiative, U.S. Secretary of the Interior Sally Jewell announced a new set of online climate data resources to help Arctic communities with climate change planning, adaptation and management." The article notes that "the new data sets, introduced today as part of an online Climate Resilience Toolkit, comprised more than 250 Arctic-related datasets and more than 40 maps, tools, and other resources designed to support climate-resilience efforts in the Arctic." Jewell said, "Through the release of Arctic-themed climate data, the U.S. is demonstrating its leadership in sharing free and open climate-relevant information, while also encouraging public innovation and partnerships with private sector entities that are interested in leveraging this data. Also, by sharing climate data among nations, we are providing tools that may be useful in increasing resilience measures across national boundaries in the Arctic."

Additional coverage was provided by [Alaska Dispatch News](#) (9/3, 219K).

USGS Announces New Height For Denali. The [AP](#) (9/2, D'oro) reports that "Denali, the Alaska mountain formerly known Mount McKinley, is now officially 10 feet shorter, measuring 20,310 feet at its highest point, the U.S. Geological Survey announced Wednesday." The article notes that "the previous measurement of 20,320 feet stemmed from a 1953 survey that used the technology of the time, officials said." According to the article, "the new elevation is the result of data collected from the mountain by climbers in June using technology that didn't exist in the earlier survey, such as GPS instruments."

Additional coverage was provided by the [Greenwire](#) (9/2, Subscription Publication), [NBC News](#) (9/2, 3.73M), [The Hill](#) (9/2, Cama, 471K), the [Wall Street Journal](#) (9/2, Harder, 5.95M), [ABC](#) (9/2, 1.47M), [T ME](#) (9/2, 19.55M), [US News & World Report](#) (9/2, 811K), [The Guardian \(UK\)](#) (9/2, 3.3M), the [Los Angeles \(CA\) Times](#) (9/3, Pearce, 4.07M), the [Christian Science Monitor](#) (9/2, 455K), the [San Jose \(CA\) Mercury News](#) (9/2, 626K), [Alaska Dispatch News](#) (9/2, 219K), [GISuser](#) (9/2), and [Popular Science](#) (9/2, 6.51M).

Additional coverage of the Denali name change was provided by the [Orange County \(CA\) Register](#) (9/3, 594K) the [Spokane \(WA\) Spokesman-Review](#) (9/3, 183K), the [Kenai \(AK\) Peninsula Clarion](#) (9/2, 18K), the [Santa Fe New Mexican](#) (9/3, 67K), the [Grand Junction \(CO\) Daily Sentinel](#) (9/3, 73K), the [Fort Worth \(TX\) Star-Telegram](#) (9/3, 449K), the [Columbus \(OH\) Dispatch](#) (9/2, 515K), the [Cleveland \(OH\) Plain Dealer](#) (9/3, 1 03M), the [Seattle \(WA\) Post-Intelligencer](#) (9/2, 560K), the [Dallas \(TX\) Morning News](#) (9/3, 1.15M), [New Hampshire Public Radio](#) (9/2, 2K), [Western Journalism](#) (9/3, 303K), [Salon](#) (9/2, 1.08M), [Intercontinental Cry Magazine](#) (9/3), [Opposing Views](#) (9/3, 1.75M), and [Yahoo! News](#) (9/3, Palermo, 5.98M).

Actress Emma Thompson Protests Arctic Drilling. In continuing coverage, the [Daily Caller](#) (9/2, Bentley, 375K) reports on actress Emma Thompson's protest against Shell's plans to drill in the Arctic. The Caller says Thompson "recited a bizarre poem for news cameras Wednesday warning of an apocalyptic world of 'liquefied slaughter' and melting ice caps all thanks to greedy fossil fuel companies."

[Agencia EFE \(ESP\)](#) (9/3) also covered the story, reporting that Greenpeace installed a polar bear robot the size of a double-decker bus in front of Shell's London headquarters.

Agencies Responding To Greenpeace Portland Protest Paid Out Nearly \$90,000 In Overtime. The [Oregonian](#) (9/2, 756K) reports that "the nine agencies that responded to the Greenpeace protest on the St. Johns Bridge," in which "13 rappelled off the Portland bridge and dangled there for two days in an effort to block a Shell Oil Arctic icebreaker from leaving Portland," paid out a total of \$88,737.97 in overtime. Agencies racking up overtime include the Portland Police Bureau, Oregon State Police and the Multnomah County Sheriff's Office.

Arctic Development Push Sparks Debate Over Law Of The Sea Treaty. The [Washington Times](#) (9/3, Taylor, 344K) notes that amid the "international scramble over development, energy and climate change in the Arctic" there is "fresh debate over whether American influence in the region may be limited by the fact that the US is the only nation in the fight to have never ratified the Law of the Sea treaty." Noting that US officials often refer to the treaty "as a gold standard for resolving potential future disputes in the Arctic and elsewhere around the globe," the Times says "some international experts say there is a whiff of hypocrisy in such rhetoric because — while American diplomats signed the treaty in 1982 — Congress has never actually approved it."

Pentagon: Chinese Warships Spotted In Bering Sea During Obama's Alaska Visit. The [AP](#) (9/3, Baldor) reports that five Chinese warships have been spotted moving into the Bering Sea near Alaska, but US "officials said they don't view the ships as a threat" as the President visits Alaska. White House spokesman Josh Earnest said the Pentagon "positively identified a number of Chinese naval vessels in that region, but based on their analysis they have not detected any sort of threat or threatening activities." However, he acknowledged that the intent of the ships presence "is still unclear." [Reuters](#) (9/3, Rampton) also reports Earnest's remarks, and a senior Defense official confirmed to [Fox News' Special Report](#) (9/2, 1.53M) "that five Chinese navy ships have been spotted in the Bering Sea off the Alaskan coast," which "coincides" with the President's visit to the state.

A second [Reuters](#) (9/3, Stewart) report says the ships' positioning in the Bering Sea marked a first for the Chinese military, while the [New York Times](#) (9/3, Cooper, Subscription Publication, 11.82M) reports that a "Pentagon official noted that China has every right to patrol international waters," and Pentagon spokesman Capt. Jeff Davis said that the Defense Department respected "the freedom of all nations to operate military vessels in international waters." According to a front-page story in the [Wall Street Journal](#) (9/3, A1, Page, Lubold, Subscription Publication, 5.95M), the Pentagon has known for several days that the ships were in the area and were monitoring their movements.

Commentary Discusses Visit To Shell London Headquarters, Climate Change. The [Los Angeles Daily News](#) (9/3, McNally, 288K) reprints a Global Post piece by Caitlin McNally, who noted that as she wrote, "Shell's rig, the Transocean Polar Pioneer, was approaching its destination 70 miles off the shores of Wainwright, Alaska." McNally wrote that during a visit to the Royal Dutch Shell offices in London, "it was made abundantly clear to me that the company accepts the fact of global warming and the consequences of climate change as a new normal," but "part of this focus on climate change reality includes an unapologetic reminder to the world that Shell is, after all, an oil and gas company."

Former Unalaska Mayor Touts Benefits Of Shell's Arctic Drilling Program. In commentary for [Alaska Dispatch News](#) (9/2, 219K), Paul Fuhs, former mayor of Unalaska/Dutch Harbor, discusses the benefits Shell's Arctic drilling program will have for Alaska by creating jobs, bolstering the economy and increasing area safety because its Arctic fleet can respond to emergencies outside its own companies.

Arctic Institute Director: Oil Industry Should Be Invited To Discuss Climate Change. In commentary for [The Hill](#) (9/3, Herrmann, 471K), Victoria Herrmann, U.S. director of the Arctic Institute, argues that "offering the petroleum industry an invitation to discuss climate change mitigation and adaptation in a region that is melting because of their business model is counterintuitive and controversial. But it is essential." Herrmann says it's important to acknowledge "that de-carbonizing the global economy will not happen overnight" and that oil "will continue to play a major role in both international energy supplies and domestic economies in the short and medium-term."

AJOC Editor Discusses Denali Renaming, Compliments Obama On Allowing Drilling. Andrew Jensen, managing editor, writes in the [Alaska Journal of Commerce](#) (9/2, 14K) writes on the support of both Alaska residents and lawmakers for Obama's announcement that Mt. McKinley will officially be renamed Denali. Jensen concludes that "amid a global economic slowdown and a collapse in oil prices, Obama's record in Alaska isn't all bad," noting Shell's drilling in the Chukchi Sea and ConocoPhillips drilling in the National Petroleum Reserve-Alaska. Says Jensen, "Alaska is one of the few places on Earth where this level of investment and actual drilling is currently happening. Obama's administration hasn't necessarily made it easy, but it hasn't stopped it, either. That's an executive inaction worth appreciating."

Smith Blasts Obama's Climate Change Plan. The [Washington Times](#) (9/3, Richardson, 344K) reports that House Science, Space and Technology Committee chairman Rep. Lamar Smith blasted the President's climate change plan, saying in a statement, "The president is on thin ice to claim his costly plan will address climate change or benefit Americans." Noting the President's climate change predictions, Smith said, that "the only thing certain about long-term climate predictions is that they're certain to miss the mark," adding, "The president and his EPA have become traveling salesmen, touring the world to push their extreme climate change agenda. ... But the science doesn't support the president's exaggerated claims linking climate change to severe weather events."

SECRETARY JEWELL IN NEVADA HIGHLIGHTS "EVERY KID IN A PARK" CAMPAIGN. The [AP](#) (9/2, 179K) reports that Interior Secretary Sally Jewell "led a delegation of schoolchildren to a scenic national area outside Las Vegas on Wednesday to highlight a federal 'Every Kid in a Park' campaign." Jewell and the head of the White House Council on Environmental Quality, Christy Goldfuss, "joined fourth-grade students from West Preparatory Academy at the Red Rock Canyon National Conservation Area." According to the article, "organizers called it an inaugural event of an Obama administration campaign to let fourth-graders nationwide use [www.everykidinapark.gov](#) to obtain free family passes to more than 2,000 federally managed parks and conservation areas until next September."

Also providing coverage are the [New York \(NY\) Times](#) (9/3, Press, Subscription Publication, 11.82M), the [Washington \(DC\) Post](#) (9/3, Press, 6.76M), the [Washington \(DC\) Times](#) (9/3, 344K), the [Oklahoman](#) (9/3, 408K), the [San Francisco \(CA\) Chronicle](#) (9/3, Subscription Publication, 3.35M), the [Houston \(TX\) Chronicle](#) (9/3, 2.28M), the [Minneapolis \(MN\) Star Tribune](#) (9/3, Press, 1.19M), [ABC News](#) (9/3, News, 3.97M), [Yahoo! News](#) (9/3, 5.98M), [KTNV-TV Las Vegas \(NV\)](#) Las Vegas (9/3, 56K), [KOLO-TV Reno \(NV\)](#) Reno, NV (9/3, 3K), [KTNV-TV Las Vegas \(NV\)](#) Las Vegas (9/3, 56K), and [KSL-TV Salt Lake City](#) (9/2, 1.07M).

Additional coverage of the "Every Kid in a Park" initiative was provided by the [Oregonian](#) (9/2, 756K), the [Orlando \(FL\) Sentinel](#) (9/2, 769K), the [Cambridge \(OH\) Daily Jeffersonian](#) (9/2, 358), [Care2](#) (9/2, 222K), [Dispatch Times](#) (9/2), [HCP Live](#) (9/2, 1K), [KDLT-TV](#) Sioux Falls, SD (9/2, 1K), [KSHB-TV](#) Kansas City, MO (9/2, 100K), [WTVG-TV Toledo \(OH\)](#) Toledo, OH (9/3, 59K), [KGWN-TV Cheyenne \(WY\)](#) Cheyenne, WY (9/3, 519), [KHON-TV Honolulu \(HI\)](#) Honolulu (9/2, 72K), [HOLAciudad!](#) (9/2), the [Durango \(CO\) Herald](#) (9/1, 28K), [WCCU-TV](#) Champaign, IL (9/2, 119), [PRNewswire](#) (9/2), and the [Sierra Star \(CA\)](#) (9/2, 12K).

National Parks Seeing Surge Of Visitors This Summer. The [AP](#) (9/3) reports that "throng of tourists have been showing up in big numbers at...national parks" this summer, "driven by good weather, cheap gas and marketing campaigns ahead of next year's National Park Service centennial." The article notes that "with the busy Labor Day weekend still ahead, the Park Service already has recorded 5 million more visitors from this time last year." Officials at the parks say "they are making do with the resources they have, including encouraging visitors to use shuttles to cut down on the number of vehicles within parks and paying overtime to keep as many entrance gates open as possible." The article notes that "the increase in visitors is due partly to the Park Service's 'Find Your Park' campaign, which launched earlier this year to reintroduce people to the parks." And "another campaign promises to bring more tourists: Fourth-graders and their families are being encouraged to go to national parks with a free, yearlong pass for them, starting this week."

Additional coverage was picked up by the [Houston \(TX\) Chronicle](#) (9/3, 2.28M), the [Washington \(DC\) Post](#) (9/3, Felicia Fonseca |, Ap, 6.76M), and the [Washington \(DC\) Times](#) (9/3, Fonseca, 344K).

ANALYSIS WILDFIRE BILL IS HOUSE PANEL'S MOST BIPARTISAN. The [Greenwire](#) (9/2, Subscription Publication) reports that "a bill to overhaul how the nation budgets for wildfire is the most bipartisan piece of legislation before the House Natural Resources Committee and should promptly receive a vote, according to an analysis released today by a Western conservation group." The "Wildfire Disaster Funding Act" by Reps. Mike Simpson and Kurt Schrader is "sponsored by 125 lawmakers — 70 Democrats and 55 Republicans — broader support than for any of the 338 other bills that have been referred to the committee this Congress, the Center for Western Priorities said."

Additional Coverage: Drones Helping To Battle Northwest Wildfires. Additional coverage that "a Boeing-built drone has been helping out human-piloted aircraft fighting Washington state wildfires" was provided by the [Puget Sound \(WA\) Business Journal](#) (9/3, Subscription Publication, 59K).

Empowering Native American Communities:

CROW TRIBAL MEMBERS PLAN TO CLOSE SAGE CREEK ROAD. The [Billings \(MT\) Gazette](#) (9/3, 179K) reports that "members of the Crow Tribe plan to close Sage Creek Road across their property beginning Sept. 8, citing years of use and abuse of the route without upkeep in addition to damage to historical sites in the area east of Bridger." Terry Plain Bull said, "We've been complaining to the (Bureau of Indian Affairs) for years, since we closed the Gap, now we're closing the route to the ice caves."

WILL CALLS FOR CHANGES TO INDIAN CHILD WELFARE ACT. George Will writes in his [Washington Post](#) (9/3, 6.76M) column that the 1978 Indian Child Welfare Act “was passed to prevent a real abuse, the taking of Indian children from their homes without justifiable cause.” But by “protecting tribal sovereignty without stipulating the primary importance of protecting the best interests of the children, the rights of the tribes have essentially erased those of the children and the parents who wish to adopt them.” He says the law “should be overturned or revised.”

Tackling America’s Water Challenges:

GOLD KING MINE SPILL PROMPTS CHANGES IN WARNING SYSTEM. The [AP](#) (9/3, 2.28M) reports that “a massive wastewater spill from an old gold mine in Colorado has prompted state officials to expand the list of downstream users they will warn after such accidents.” Last month, “Colorado health officials notified only agencies inside the state after 3 million gallons of water tainted with heavy metals gushed out of the Gold King mine near Silverton and eventually reached the Animas, San Juan and Colorado rivers in New Mexico and Utah.” In the future, “the Colorado Department of Public Health and Environment will warn downstream states as well, department spokesman Mark Salley said.”

Additional coverage of the spill was provided by the [Albuquerque \(NM\) Journal](#) (9/2, Smith, 259K), the [Denver \(CO\) Post](#) (9/3, Paul, 787K), and [The Hill](#) (9/3, Mintz, 471K).

FIGHT BETWEEN TRIBES AND FARMERS OVER TRINITY RIVER WATER PROVIDES CASE STUDY ABOUT DROUGHT ISSUES. [McClatchy](#) (9/3, Doyle, 28K) provides an overview of “the conflict over the Trinity River in Northern California.” According to the article, “amid record drought, this long-running and singular battle has become a case study about the difficulties in balancing Western water use.”

BACKERS OF DELTA TUNNELS CRITICIZED. The [Central Valley \(CA\) Business Times](#) (9/3, 206) reports that “the California Department of Water Resources and the federal Bureau of Reclamation have made fundamental errors and perhaps may be lying in their push to get the State Water Resources Control Board to approve the Delta water tunnels, local water agencies say.” According to the article, “in a letter to the executive director of the Water Board, the Water Agencies of the North Delta and the Central Delta Water Agency list the problems with the DWR tunnels request.” However, “the water agencies are not stopping with calling the petition into question with the water board, four out of five members of which owe their jobs to the governor, the major proponent of the tunnels.” They are also “calling on the Sacramento County District Attorney to look into whether the Department of Water Resources and the Bureau of Reclamation lied.”

Securing America’s Energy Future:

Onshore Energy Development:

INTERIOR TAKING PUBLIC COMMENTS ON STREAM PROTECTION RULE. The [Louisville \(KY\) Courier-Journal](#) (9/2, 414K) reports that “Kentucky coal industry supporters and environmental advocates are expected to clash in Lexington on Thursday over proposed regulations that seek to protect streams from mining destruction.” The article notes that “the Sierra Club and other environmental groups are rallying supporters to attend, as is the Kentucky Coal Association, as a U.S. Interior Department agency takes public comment on a so-called stream protection rule.” According to the article, “environmental groups have said the Office of Surface Mining proposal doesn’t go far enough and will continue to allow the filling of mountain valleys in headwaters of streams with waste rock, harming aquatic life and causing pollution that flows downriver.” Meanwhile, “mining interests and their political supporters are saying the proposed regulations are another example of a ‘war on coal’ by the Obama administration.”

The [Greene County \(PA\) Observer-Reporter](#) (9/2, 83K) reports that “a public hearing will be held in Green Tree next week on proposed federal rules aimed at protecting streams from the impacts of coal mining, a contentious issue particularly in Washington and Greene counties where longwall mining is employed.”

Additional coverage was provided by the [4-Traders](#) (9/3, 5K) and [WFPL-FM Louisville \(KY\)](#) Louisville, KY (9/3, 6K).

OSMRE RELEASES COLOWYO ENVIRONMENTAL ASSESSMENT AHEAD OF DEADLINE. The [Grand Junction \(CO\) Daily Sentinel](#) (9/3, 73K) reports that “a federal agency has completed an environmental review involving the Colowyo Coal Mine a week ahead of a court-ordered deadline, likely ending the threat of a temporary shutdown in operations there.” The OSMRE “finds in an environmental assessment that the mine’s continued operations in an expansion area would result in no significant environmental impact, including when it comes to greenhouse gas emissions resulting from mining the coal and burning it in the nearby Craig Station power plant in Moffat County.”

[Steamboat \(CO\) Pilot & Today](#) (9/2, 30K) reports that “sometime this week, it will issue a mining plan recommendation to the Secretary of the Interior’s Office.”

Additional coverage was provided by [KDVR-TV Denver \(CO\)](#) Denver (9/2, 166K).

HEARING HELD ON BADGER-TWO MEDICINE GAS LEASE. The [Great Falls \(MT\) Tribune](#) (9/2, 75K) reports that “public comments given at a hearing held by the Advisory Council on Historic Preservation in Choteau on Wednesday urged overwhelmingly that a lease for an exploratory natural gas well in the Badger-Two Medicine be canceled.” According to the article, “the purpose of Wednesday’s meeting was to look at ways to mitigate the affect drilling could have on the Badger-Two Medicine.” The article notes that “many meeting attendees argued that no mitigation effort could prevent the area from being damaged.”

Also providing coverage is the [Helena \(MT\) Independent Record](#) (9/3, 39K).

PUBLIC CALLS FOR FEDERAL COAL LEASING REFORM AT HEARINGS. For “The Blog” of the [Huffington Post](#) (9/2, Hitt, 164K), Mary Anne Hitt, Director, Sierra Club’s Beyond Coal Campaign, writes that “in August, the Sierra Club and its partners united for a series of hearings on the federal coal program by the BLM’s parent agency, the Department of the Interior.” She notes that “four of the five sessions took place in the heart of coal country, so it’s no surprise that Big Coal brought senior executives out in number.” However, Hitt says that “Interior probably did not expect to hear from so many passionate community members who asked BLM to reform the federal coal leasing program.”

Offshore Energy Development:

ADDITIONAL COVERAGE RESEARCHERS RECOMMEND MONITORING OCEAN SEISMIC TESTING LIKE POLLUTION. Additional coverage that “scientists say new global regulations on ocean noise pollution are needed to protect marine life” was provided by the [Summit County \(CO\) Citizens Voice](#) (9/2, 506) and the [AZoCleantech](#) (9/3).

America’s Great Outdoors:

Bureau of Land Management:

JURASSIC NATIONAL MONUMENT PROPOSAL RECEIVES LOCAL SUPPORT. The [Greenwire](#) (9/2, Subscription Publication) reports that a local county board on Tuesday “unanimously backed a proposal from Utah Republican Reps. Jason Chaffetz and Rob Bishop to designate a quarry packed with dinosaur fossils as a national monument.” According to the article, “with the Emery County public lands council’s approval, the plan to turn the Cleveland-Lloyd dinosaur fossil quarry, already a national natural landmark, into Jurassic National Monument is not expected to face opposition locally.” Ethan Migliori, chairman of the Emery County Commission, said “ranchers’ fears about losing grazing access have been allayed, clearing the way for widespread support.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (9/3, Brady McCombs |, Ap, 6.76M), the [Houston \(TX\) Chronicle](#) (9/3, 2.28M), and the [San Francisco \(CA\) Chronicle](#) (9/3, Subscription Publication, 3.35M).

EFFORT TO SAVE SAGE GROUSE CONCENTRATES ON SAGEBRUSH. The [Washington Post](#) (9/3, Fears, 6.76M) reports that “the vast sagebrush that sprawls across 11 Western states” is “being overshadowed by attention focused on the greater sage grouse, a chicken-like bird that dances and shouts in mating rituals across the West.” However, “a new effort by the federal government, Western states, environmental groups and ranchers to revive the dwindling sage grouse population is, in reality, a determined push to save the ranging sagebrush.” According to the article, “this consortium of strange bedfellows is finally giving sagebrush its due, throwing movie money at it — hundreds of millions of dollars — in a bid to restore the ecology in large chunks of one of the largest ecosystems in the United States so that 350 species of animals living there can survive.” The article notes that “in less than two weeks, the Bureau of Land Management and Forest Service, which own more than half of the land covered by sagebrush, are expected to finalize a plan that will change how mining operations, cattle ranchers and developers have operated on the territory for decades.”

OHV Group Seeks Delay In Sage Grouse Listing. The [Greenwire](#) (9/2, Subscription Publication) reports that “an off-highway vehicle (OHV) group last week asked the Obama administration to push back its legally binding Sept. 30 deadline to decide whether to protect the greater sage grouse, warning it is prepared to join a ‘flurry of litigation’ against the government’s actions.” Paul Turcke, an attorney for the national OHV group BlueRibbon Coalition, “warned in a letter to administration officials that land-use restrictions proposed by the Bureau of Land Management and Forest Service to avoid an Endangered Species Act listing for the sage grouse are untested and need additional environmental review.”

Turcke wrote that “while the BLM and Forest Service plans are the cornerstone of federal efforts to avoid a listing, they include ‘unjustified and unacceptable conditions’ that could harm the interest of motorized recreation.”

MURDER TRIAL POSSIBLE FOR STEINLE SHOOTING SUSPECT. The [AP](#) (9/3) reports that “a San Francisco judge is deciding whether to schedule a murder trial for” Steinle murder suspect Juan Francisco Lopez-Sanchez, who “has pleaded not guilty to murder charges, though he admits to firing the shot that killed Kathryn Steinle, while she was on an evening stroll with her father.” The AP recounts San Francisco’s dealings with Lopez-Sanchez and details of the shooting.

BLM’S ST. GEORGE FIELD OFFICE HOLDS OPEN HOUSE ON DRAFT MANAGEMENT PLANS. The [St. George \(UT\) News](#) (9/2, 3K) reports that “conservationists, rock climbers, off-road enthusiasts and public officials were among the attendees at the Bureau of Land Management’s open house in St. George Tuesday.” The St. George Field Office of the BLM-Utah is “conducting public open houses this week to provide the public with information about recently released draft management plans for the Beaver Dam Wash and Red Cliffs national conservation areas.” The bureau “presented its draft resource management plans to the public at the meeting, answering questions about the resource management plans and also accepting public comments.”

LONG-TERM WILD HORSES PLACEMENT COSTS TAXPAYERS \$43 MILLION A YEAR. [KJCT-TV](#) Grand Junction, CO (9/3, 1K) reports that “the excesses number of horses are ruining range-land health and costing tax payers a lot of money.” According to the article, “since the Wild Free-Roaming Horses and Burros Act of 1971 the Bureau of Land Management has worked to manage and protect wild horses on the Western Slope, yet in recent years the horse numbers have grown so large that they are exhausting the land of resources necessary for them to survive.” The article notes that “according to the BLM the long term placement of the horses is costing tax payers more than \$43 million a year.”

BLM HOLDING WILD HORSE ADOPTION EVENT IN WISCONSIN. On [WUWM-FM](#) Milwaukee (9/3, 3K), Martha Malik, public affairs specialist for the BLM in Milwaukee, talked “about a wild horse adoption effort this weekend in Mequon.” Malik “explains that because wild horses have no predators and can double their size in four years, their population has increased,” and “this increase in population has led to the efforts of the federal Bureau of Land Management to find people in Wisconsin to adopt the horses.”

Fish and Wildlife Service:

JUDGE TOSSES FWS LISTING OF LESSER PRAIRIE CHICKEN. [Politico Pro](#) (9/2, Subscription Publication) reports that “a Texas federal judge has vacated the U.S. Fish and Wildlife Service’s listing of the lesser prairie chicken as threatened under the Endangered Species Act, saying the agency failed to conduct a rigorous enough analysis.” The service “did not follow its own rules when evaluating proposed and existing conservation measures throughout the five-state range of the bird when it finalized the listing under the ESA in 2014,” held Judge Robert Junell of the U.S. District Court for the Western District of Texas in his opinion in *Permian Basin Petroleum, et al., v. Department of the Interior*.

The [Greenwire](#) (9/2, Subscription Publication) reports that “Junell said FWS’s regulations require the agency to fully consider such conservation measures – including ones that have yet to be implemented – to see whether they will be sufficient to avoid a listing.”

Additional coverage was provided by [The Hill](#) (9/3, Henry, 471K), the [Houston \(TX\) Chronicle](#) (9/3, 2.28M), the [Washington \(DC\) Times](#) (9/3, 344K), the [Topeka \(KS\) Capital-Journal](#) (9/2, 109K), the [Midland \(TX\) Reporter-Telegram](#) (9/3, 45K), the [Fort Worth \(TX\) Star-Telegram](#) (9/3, 449K), the [Washington \(DC\) Post](#) (9/3, Press, 6.76M), the [Hutchinson \(KS\) News](#) (9/3, 2K), the [Garden City \(KS\) Telegram](#) (9/3, 24K), the [Kansas City \(MO\) Star](#) (9/3, 566K), the [San Antonio \(TX\) Express-News](#) (9/3, 884K), [Fox News](#) (9/2, 8.91M), [Agri-Pulse](#) (9/3), and [KFDA-TV Amarillo \(TX\)](#) Amarillo, TX (9/3, 88K).

GROUPS NOTIFY FWS OF LAWSUIT FOR COASTAL MARTEN PROTECTION. The [Eureka \(CA\) Times Standard](#) (9/2, 55K) reports that “continuing with efforts started half a decade ago to protect the small carnivore known as the coastal marten, two environmental groups notified the U.S. Fish and Wildlife Service of their intent to sue after the service denied a petition to federally protect the species earlier this year.” In 2010, the Environmental Protection Information Center joined the Center for Biological Diversity “in filing a petition to federally list the marten under the Endangered Species Act,” and “in April of this year the U.S. Fish and Wildlife Service determined the species was not eligible for protection under the act.” EPIC and the Center for Biological Diversity sent the notice of intent to sue to the FWS on Tuesday.

LAWSUIT FILED OVER THE STEPHENS’ KANGAROO RAT . The [Riverside \(CA\) Press Enterprise](#) (9/3, 303K) reports that the Riverside County Farm Bureau and others are contending in federal court that the FWS “failed to respond as required by law to a petition filed last year that claims” the Stephens’ kangaroo rat is no longer endangered. The lawsuit was “filed in federal court Wednesday, Sept. 2, opening another chapter in the ongoing litigation over the nocturnal Inland critter that dates back to at least 1995.” According to the article, “the petition argues that new scientific analysis by the Fresno-based Center for Environmental Science, Accuracy, and Reliability found that the animal is doing well and does not need to be listed as endangered, which requires more stringent habitat protections.”

FLORIDA FISH AND WILDLIFE CONSERVATION COMMISSION BACKS AWAY FROM FEDERAL PLAN TO CREATE NEW PANTHER POPULATIONS. The [Naples \(FL\) Daily News](#) (9/3, 143K) reports that “Florida’s lead wildlife agency backed away Wednesday from a key part of a federal plan that calls for establishing new Florida panther populations before the iconic wildcat can be taken off the endangered species list.” According to the article, “after hearing from more than 40 environmentalists, ranchers and hunters — including a fourth-grade girl clutching a toy stuffed panther — the Florida Fish and Wildlife Conservation Commission voted 4-1 to approve a new panther policy to focus instead on managing conflicts between humans and panthers south of the Caloosahatchee River in Southwest Florida.” Meanwhile, “Commissioner Ron Bergeron, who cast the lone dissenting vote Wednesday, said it was too soon to give up on establishing two new panther populations in Florida or other southeastern states as called for in the federal plan.”

Additional coverage was provided by the [Washington County \(FL\) Foster Folly News](#) (9/2).

“SUE AND SETTLE” TACTICS CRITICIZED. For the “Congress” blog of [The Hill](#) (9/3, Bradley, 471K), Robert L. Bradley Jr., CEO of the Institute for Energy Research, writes that “in a scathing report, the Senate Environment and Public Works Committee (EPW) has blown the whistle on the oft-used, controversial ‘sue-and-settle’ tactic used to design environmental regulations.” He claims that “the federal bureaucracy has aligned itself with interest groups, rather than working for the benefit of the citizens.” Bradley urges Congress to “stop the sue-and-settle ruse and challenge the cozy relationship between federal agencies and politically motivated environmental groups.”

National Park Service:

TWO HOUSE DEMOCRATS BACK BILL TO PROVIDE \$1 BILLION TO NPS. The [Greenwire](#) (9/2, Subscription Publication) reports that “a pair of House Democrats is backing legislation released by the Obama administration that would pump more than \$1 billion into the National Park Service to honor its 100th anniversary next year.” In a joint statement with Rep. Niki Tsongas, the top Democrat on the Natural Resources Subcommittee on Federal Lands, Rep. Raúl Grijalva, the ranking member on the Natural Resources Committee, said, “I intend to sponsor this bill in the House and work with my colleagues to see it move forward.” The article notes that “the bill is likely to be a tougher sell with Republicans, who are generally loath to increase spending without offsetting the expenditures elsewhere in the federal budget.” However, Emily Beyer, a spokeswoman for the Interior Department, said in an email that “a number of members in both the House and Senate have expressed interest in the legislation and are currently reviewing the details.”

Additional coverage of the proposal was provided by [National Parks Traveler](#) (9/3, 989) and [WTSP-TV St. Petersburg \(FL\)](#) St. Petersburg, FL (9/2, 89K).

DOLE JOINS VETERANS AT WWII MEMORIAL TO MARK ANNIVERSARY OF JAPANESE SURRENDER. The [CBS Evening News](#) (9/2, story 11, 0:25, Pelley, 5.08M) briefly reported that on Wednesday, “American veterans marked the 70th anniversary of Japan’s surrender at the World War II Memorial in Washington. Former Sen. Bob Dole, now 92, reflected on the sacrifices made by so many. He also joked that it would be a good time to announce his candidacy for president.”

YELLOWSTONE GRIZZLY CUBS ARRIVE AT NEW HOME AT TOLEDO ZOO. [CNN](#) (9/2, 5.17M) reports that “two orphaned grizzly cubs have found a new home at the Toledo Zoo.” The article notes that “the twin females were orphaned soon after their mother killed a hiker in Yellowstone National Park in August.” Zoo officials said that “the cubs, which appear to be in good health, will undergo the zoo’s standard 30-to-60-day quarantine process before any public viewing will be considered.”

Additional coverage was provided by [WDIV-TV Detroit \(MI\)](#) Detroit (9/3, 292K) and [WTVR-TV Richmond \(VA\)](#) Richmond, VA (9/2, 130K).

SCHOODIC CAMPGROUND OPENS AT ACADIA NATIONAL PARK. The [Ellsworth \(ME\) American](#) (9/2, 40K) reports that “the owners of the new Schoodic Woods Campground on the Schoodic Peninsula have transferred their interest in the property to the National Park Foundation.” According to the article, “the change in ownership occurred two weeks before the Sept. 2 ribbon-cutting at the 94-site campground.” Susan Newton, an executive with the National Park Foundation, said “on Wednesday that the foundation has taken ownership of the property until it can be transferred to the National Park Service.”

The [AP](#) (9/3, 2.28M) reports that “federal officials and conservationists are celebrating the opening of a new campground at Acadia National Park.” The more than 1,400-acre Schoodic Woods Campground is opening on Wednesday. Sen. Angus King, Acadia Superintendent Sheridan Steele and Schoodic Institute President Mark Berry will speak at a ceremony at the campground.

Additional coverage was provided by the [Bangor \(ME\) Daily News](#) (9/2, 223K)

NATIVE AMERICAN YOUTH HELP WITH PRESERVATION PROJECTS THROUGH HOPE INITIATIVE. The [AP](#) (9/3, Susan Montoya Bryan |, Ap, 6.76M) reports that Native American youth "spent most of the summer helping" with preservation projects "as part of the National Trust for Historic Preservation's HOPE initiative, or Hands-On Preservation Experience." The trust partnered with the National Park Service and the Rocky Mountain Youth Corps "to train more young people in preservation skills while helping historical sites on public land." The article notes that "from New Mexico and Arizona to Virginia and Vermont, crews worked on some 30 projects this summer."

ROCKY MOUNTAIN NATIONAL PARK TO CELEBRATE 100TH ANNIVERSARY. The [Loveland \(CO\) Reporter-Herald](#) (9/3, 51K) reports that Rocky Mountain National Park will "mark its 100th anniversary with a rededication ceremony at 11 a.m.-1 p.m. Friday in a meadow at the Glacier Basin Campground." The article notes that "the event will feature music, family activities and cake, and special guests including Colorado Gov. John Hickenlooper, Sen. Cory Gardner, National Park Service Director Jon Jarvis, Rocky Mountain National Park Superintendent Vaughn Baker and former Sen. Mark Udall, the honorary chairman of Rocky's Centennial."

CANYONLANDS NATIONAL PARK NAMED "INTERNATIONAL DARK SKY PARK". The [AP](#) (9/3, 2.28M) reports that Canyonlands National Park is "being recognized for its dark skies and lack of light pollution." Park officials announced that Canyonlands was "named as an 'International Dark Sky Park' by the Arizona-based International Dark-Sky Association." The NPS is "planning a special astronomy event at the park on Sept. 18 to commemorate the dark-sky designation and showcase views of star-filled skies."

TWO YOSEMITE VISITORS RECOVER AFTER BEING INFECTED WITH BUBONIC PLAGUE. The [Sacramento \(CA\) Bee](#) (9/3, 535K) reports that "in the past two months, two people became infected with the bubonic plague after visiting Yosemite National Park, a boy from Los Angeles and an adult from Georgia." According to the article, "in response, the state park closed two campgrounds and posted warning signs at all campsites." The article notes that "both people have been treated and recovered."

NPS RELEASES EVERGLADES NATIONAL PARK MANAGEMENT PLAN. [Trade Only](#) (9/3) reports that the NPS "released the final General Management Plan for Everglades National Park, which includes several changes that will affect recreational boating and fishing access and habitat conservation in the park." The article notes that "a coalition of eight groups representing recreational fishing and boating expressed its appreciation to park officials for addressing concerns that were raised during the process."

BIOLOGIST RECOMMENDS IMPORTING WOLVES TO MICHIGAN'S ISLE ROYALE "AS SOON AS POSSIBLE". The [MLive \(MI\)](#) (9/3, 739K) reports that as the NPS "mulls what, if anything, should be done to save the meager wolf population on Isle Royale, a leading environmental science researcher says the best way to tame the exploding moose population and protect island vegetation is to begin importing wolves." John Vucetich, a Michigan Tech University biologist who studies the wildlife of Isle Royale, said, "It's important that action be taken sooner rather than later." Meanwhile, Sens. Gary Peters and Debbie Stabenow are "trying to speed things up by urging the park service to complete a management plan to save the wolves by next July, a deadline that's unlikely to be met."

WILDLIFE OVERPASS PROPOSED ON 101 FREEWAY IN LOS ANGELES. The [Los Angeles Times](#) (9/3, Groves, 4.07M) reports that "mountain lions, bobcats and other wildlife would have less chance of becoming roadkill if the state adopts a plan to build a landscaped bridge over the 101 Freeway in Agoura Hills, supporters of the proposal said Wednesday." According to the article, "state agencies, elected officials and wildlife advocates urged the state to provide the much-needed link in an area where rampant development and highways have fragmented once-continuous habitat." The article notes that since NPS "biologists began researching mountain lions in the Santa Monica Mountains in 2002, motorists have struck and killed a dozen of the big cats in the study area, including a male puma hit on the 101 near Liberty Canyon two years ago."

KAYMOOR TRAIL IN NEW RIVER GORGE NATIONAL RIVER CLOSED FOR WEATHER-RELATED REPAIRS. The [AP](#) (9/3, 344K) reports that the NPS has "closed a portion of a hiking trail in southern West Virginia due to an unstable slope." Park officials say "parts of the Kaymoor Trail in the New River Gorge National River will remain closed indefinitely until repairs can be made."

ANDERSONVILLE NATIONAL HISTORIC SITE TO HOLD FUNERAL FOR 13,000. The [Atlanta Journal-Constitution](#) (9/3, 1.05M) reports that "the Andersonville National Historic Site, already a gutwrenchingly moving testament to the rigors of the Civil War, takes on a new role on Sept. 19th as the setting for a one-of-a-kind funeral." According to the article, the "Funeral for 13,000" is "an acknowledgment of the more than 12,900 United States soldiers who died at the southwest Georgia facility during its fourteen months of operation as a Confederate prison."

NPS TO DECIDE ON BELMONT BARBECUE PIT. The [Citizen of Laconia \(NH\)](#) (9/3) reports that the NPS is "being asked to amend a grant boundary to Belmont's Sargent Park and allow the town to reconstruct a barbecue pit at the new Tioga Pavilion." The article notes that "the new pit is part of Belmont's recent effort to construct the \$89,000 pavilion using partial grant money from the federal Land and Water Conservation Fund."

BODY OF MISSING HIKER IN YOSEMITE NATIONAL PARK FOUND. The [AP](#) (9/3, 2.28M) reports that "officials at Yosemite National Park have found the body of a man who was missing for more than three weeks." According to park spokesman Scott Gediman, "the body of 39-year-old James Michael Millet Jr. was found above Yosemite Valley on Tuesday." The article notes that "a cause of death was not released" and "an investigation is ongoing."

Additional coverage was provided by the [Los Angeles \(CA\) Times](#) (9/3, Rocha, 4.07M), the [Fresno \(CA\) Bee](#) (9/3, 265K), and [Reuters](#) (9/2).

US Geological Survey:

HIKER WHO DIED AT GRAND CANYON WAS USGS RESEARCHER. The [AP](#) (9/3, 344K) reports that "a hiker who fell to his death at the Grand Canyon was a U.S. Geological Survey researcher studying riparian vegetation." According to Grand Canyon National Park spokeswoman Emily Davis, "51-year-old Daniel Sarr fell into a gully Friday while hiking to the Colorado River to join a rafting trip." Sarr was a research ecologist at the USGS Grand Canyon Monitoring and Research Center in Flagstaff.

Additional coverage was provided by the [Arizona Republic](#) (9/2, 1.12M) and the [Arizona Daily Sun](#) (9/3, 34K).

DECLINING SNOWFALL HITTING NAVAJO PEOPLE. The [Arizona Republic](#) (9/2, 1.12M) reports that "a lifetime of declining snowfall on the Navajo Reservation is making an already unforgiving desert landscape increasingly uninhabitable." The article notes that "snow tracked at six northeastern Arizona weather stations has plummeted by more than two-thirds on average since the 1930s, according to research led by the U.S. Geological Survey." USGS geomorphologist Margaret Hiza Redsteer said, "It's just hitting the Navajo people first."

Top National News:

MEDIA ANALYSES SAVING IRAN DEAL IN US SENATE A MAJOR VICTORY FOR OBAMA. Sen. Barbara Mikulski's announcement that she will support the Iran nuclear deal, which gives the President the 34 votes he needs to prevent the Senate from overriding his veto of a resolution of disapproval, is being cast as a major victory for the President. Coverage is extensive, with reports on all three network news broadcasts and heavy print and online coverage. While many reports say Mikulski's decision will embolden Democrats in their effort to secure the 41 votes they need to filibuster the resolution and keep the President from having to use his veto, several also indicate that Republicans are considering other options to derail the deal.

[ABC World News](#) (9/2, story 6, 0:25, Muir, 5.84M) called Mikulski's announcement a "big victory" for the President, adding that the deal, which has been "under fire" from Republicans, "is safe," and [NBC Nightly News](#) (9/2, story 5, 1:20, Holt, 7.86M) said it was "a major win for the Obama Administration," adding that the deal "now appears unstoppable." Cable commentary was similar Wednesday evening. Jake Tapper said on [CNN's The Lead](#) (9/2, 320K) that the White House dodged a "major legislative bullet," while Brianna Keilar on [CNN Wolf](#) (9/2, 224K) called it "a major victory for President Obama," and Shannon Bream said on [Fox News Real Story](#) (9/2) that the White House "score[d] a big foreign policy victory." Rachel Maddow said on [MSNBC's Rachel Maddow Show](#) (9/2, 769K) that the President has "sealed what may be the biggest diplomatic achievement of his presidency," adding that this is "a huge political victory for the Obama Administration."

The [Los Angeles Times](#) (9/3, Richter, Mascaro, 4.07M) similarly says Mikulski's support "assured a political victory for Obama, and a surprising loss for the Republican majority in Congress, which uniformly opposes the deal." In addition, it "pushed Obama's allies in the Senate to go for broke and try to get seven of the final 10 wavering Democrats on their side," which could "block a GOP-backed resolution of disapproval with a filibuster." However, [Reuters](#) (9/3, Zengerle) reports that leadership aides from both sides of the aisle say it is too soon to tell whether deal supporters will be able to muster the 41 votes they need. Kristen Welker said on [MSNBC](#) (9/2, 545K) that Mikulski's support is "being greeted as a victory by President Obama." Welker added that while the White House is "optimistic" about securing the 41 votes needed to prevent a vote, "they say it's going to be tough."

[Politico](#) (9/2, Toosi, 942K) said the White House "is more determined than ever to keep the agreement from reaching a vote in the first place," and the [Washington Times](#) (9/3, Wolfgang, 344K) reports that while the White House "celebrated" word of Mikulski's support, press secretary Josh Earnest "said the White House will continue lobbying undecided members of Congress."

The [Baltimore Sun](#) (9/3, Fritze, 834K) says Mikulski "handed the White House a symbolic victory, at least," and both [Voice of America](#) (9/3, Saine, 32K) and [TIME](#) (9/3, Calabresi, 19.55M) called Mikulski's announcement "a major foreign-policy victory" for the President. TIME adds, however, that the support of 34 senators is "hardly a resounding victory for the administration's position" as it is "the bare minimum number of Senators Obama needs to ensure he can deliver on his end of the deal with Iran." The [Wall Street Journal](#) (9/3,

A1, Peterson, Lee, Subscription Publication, 5.95M) notes that while Mikulski's support represents a victory for the Administration, the downside is that the President will be carrying out a major piece of US foreign policy without majority support from Congress.

While the [New York Times](#) (9/3, A1, Weisman, Subscription Publication, 11.82M) says that "support for the deal has not been enthusiastic," it adds that there is "growing recognition, even among some accord opponents, that the other nations — Britain, China, France, Germany and Russia, and especially Iran — would be unwilling to renegotiate the agreement even if Congress formally rejected it." The [Huffington Post](#) (9/2, Stein, Terkel, 164K) said that while the President has "both notched one of the most significant nuclear non-proliferation agreements in history and cemented a foreign policy legacy of robust diplomatic engagement," the question of whether "that legacy turns out sterling or sour" will not be answered until "well beyond the end date of his presidency." An editorial in the [Wall Street Journal](#) (9/3, Subscription Publication, 5.95M) says that with Mikulski's support, which ensures that the deal will move forward, Democrats, including the Vice President and Hillary Clinton, have taken responsibility for ensuring that Iran complies.

The [AP](#) (9/3, Werner) says Mikulski's support "spells failure for opponents of the international agreement who sought to foil it by turning Congress against it." [USA Today](#) (9/3, Kelly, 5.23M) notes that while they acknowledged they will be unable to override the President's veto, Senate Republicans "pushed back hard against the deal." GOP presidential candidate Sen. Lindsey Graham said, "The Iranians have now secured enough votes in the Senate to ensure they have a pathway to a bomb, the missile to deliver it and the money to pay for it." Another presidential hopeful, Sen. Marco Rubio, "vowed to overturn the agreement if he is elected." Majority Leader McConnell, meanwhile, "accused the Obama administration of reducing 'this important national security matter to a partisan contest.'" [Bloomberg Politics](#) (9/3, Miller, 247K) reports.

The [New York Daily News](#) (9/3, Edelman, 3.75M) reports that Republicans said that "the next President will have a chance to undo the deal," adding that a spokesman for House Speaker Boehner "said the deal 'is far from being implemented.'" The [CBS Evening News](#) (9/2, story 2, 1:00, Cordes, 5.08M) cast Boehner's comment as a signal that "Republicans might try to find some other way to block it or at least to slow its implementation." The [New York Times](#) (9/3, Steinhauer, Subscription Publication, 11 82M) says Republicans "are considering legislative options to counter the deal, including the possible reimposition of sanctions the agreement is supposed to lift," adding that they have been "thinking through alternatives for months, knowing that Mr. Obama would probably be able to fend off efforts to override his veto."

In a separate story, [Politico](#) (9/2, Kim, 942K) noted that House Minority Leader Pelosi "has indicated that she's confident there will be enough Democratic support in her chamber to sustain a veto of a resolution disapproving the Iran deal, should Obama issue one." [The Hill](#) (9/2, Marcos, 471K) reported in its "Floor Action" blog that Pelosi "urged Democrats to announce their position as soon as possible," noting in a letter to House Democrats that she learned from Boehner "that the critical vote to disapprove of the Iran deal could take place in the House as soon as next week when Congress returns from the August recess." Pelosi "stressed that the looming vote.. means that House Democrats who haven't yet stated their position on the Iran deal should do so sooner rather than later."

The [Washington Post](#) (9/3, A1, Morello, 6.76M) notes that "the splits forming around the agreement in Congress appear to be reflected throughout the country," noting that while "a majority of Americans oppose the deal, a strong majority of Democrats support it and a strong majority of Republicans oppose it."

[Roll Call](#) (9/2, Lesniewski, 113K), meanwhile, reported that Mikulski said in a statement, "No deal is perfect, especially one negotiated with the Iranian regime. ... I have concluded that this Joint Comprehensive Plan of Action is the best option available to block Iran from having a nuclear bomb. For these reasons, I will vote in favor of this deal. However, Congress must also reaffirm our commitment to the safety and security of Israel."

Cardin Remains Undecided. The [Washington Post](#) (9/3, Weiner, 6.76M) reports that Mikulski's Maryland colleague, Sen. Ben Cardin, "continues to wrestle with whether to support the deal," as the White House continues its push to secure seven more votes in favor of it. Cardin is seen by supporters and opponents "as a key vote" because, as ranking Democrat on the Senate Foreign Relations Committee, his views on the deal carry "considerable weight," but as of Wednesday morning, he "remained undecided."

Kerry Defends Deal In Speech, On Television, In Letters To Lawmakers. In a speech at the National Constitution Center on Wednesday, Secretary of State Kerry defended the deal as a "'hugely positive step' for world stability," the [Philadelphia Inquirer](#) (9/3, Fitzgerald, Gammage, 641K) reports. Kerry said, "History may judge it a turning point, a moment when the builders of stability seize the initiative from the destroyers of hope." [Politico](#) (9/2, Gass, 942K) said that Kerry "made an appeal to 'common sense,'" and "declar[ed] that Congress' decision on the agreement when it returns next week 'will matter as much as any foreign policy decision in recent history.'"

[The Hill](#) (9/2, Byrnes, 471K) said Kerry "offered a fiery defense" of the deal, and [McClatchy](#) (9/3, Allam, 28K) describes Kerry's speech as "impassioned," adding that he "attempted to reach across the aisle to Republicans — not a single one in the Senate supports the deal — by invoking former Bush administration Treasury Secretary Hank Paulson and Reagan-era Federal Reserve Chairman Paul Volker, both of whom have warned that Iran sanctions would collapse without a deal." McClatchy says it was "a further projection of bipartisanship" that Kerry "was introduced by former Republican Sen. Richard Lugar of Indiana, whose support of the de

MEDIA ANALYSES ARCTIC DRILLING COULD HURT OBAMA'S CLIMATE CHANGE LEGACY. While somewhat lighter than yesterday, media coverage of the President's trip to Alaska was once again extensive, with stories on all three network news broadcasts and heavy print and online reporting. Though much of it highlighted the President's schedule in Alaska, included in the coverage is a significant undercurrent of criticism of Obama from environmentalists over his approval of drilling in the Arctic, with several analyses and commentators questioning whether the move will damage his effort to burnish his climate change legacy.

[Wired](#) (9/1, Lapowsky, 4.12M), for example, said that "in the last year of his presidency, Obama is working hard to make addressing climate change a crucial part of his legacy and to ensure the next President takes up the fight, as well," but a [Christian Science Monitor](#) (9/1, Fedde, 455K) analysis, noting that the President "approved expanded drilling by Royal Dutch Shell," said that his trip "is bringing attention" to his "complicated environmental record." According to the Monitor, his "energy and environmental record might mute his otherwise loud call for action in the face of irrevocable climate change." Similarly, [TIME](#) (9/1, Worland, 19.55M) noted that while the President "has billed his trip as an opportunity to highlight the threat of climate change...his policies embody the tension between the vital fossil fuels play in the US economy and the need to reduce carbon emissions." While he has "proposed aggressive US action on climate change," he has also "supported measures to open oil drilling in the Arctic, a move condemned by environmentalists."

The [Huffington Post](#) (9/1, Robinson, 164K) noted that MSNBC host Rachel Maddow on Monday questioned if the President's "recent climate change rhetoric is hard to reconcile with his administration's decision to allow off-shore drilling in the Arctic," saying, "I mean, it is hard to square the president talking about climate change in these very aggressive terms in Alaska...with the green light he just gave to drill the Arctic for oil up there." Maddow asked NBC News' senior White House correspondent Chris Jansing "if the administration hopes that the drilling will be overlooked when Obama's legacy on climate change is assessed," to which Jansing responded "by saying the administration is making a case that climate change is much larger than one issue, while environmental leaders continue to call out the president."

[National Geographic](#) (9/1, Welch, 31.65M) reported on its website that while the President "faces criticism on many fronts: that he's not doing more to outfox Russia in the race for control of the melting Arctic Ocean or that he's not doing enough to help convince Arctic nations to set aside more ocean for protection," and from environmentalists over his "recent move to allow Shell to drill for oil in the nearby Chukchi Sea," he is "playing to a larger audience," ahead of a "busy fall for the earth's climate," including "a conference in Paris in late November where many hope a stronger commitment will emerge to reduce global carbon-dioxide emissions."

Several opinion pieces this morning also consider the criticism leveled at the President by environmentalists. [USA Today](#) (9/2, 5.23M) takes issue with environmentalists who have called the President a "hypocrite" for "pushing for climate action, shortly after approving" Shell's plan, arguing that there is "nothing intrinsically wrong with fighting to mitigate climate change while also recognizing that oil remains an important energy source for the time being." However, in an accompanying [USA Today](#) (9/2, 5.23M) op-ed, Annie Leonard, executive director of Greenpeace USA, says the President's decision to allow Shell to drill in the Arctic "seriously undermines his climate legacy."

In a piece for the [Washington Post](#) (9/2, 6.76M), Post editorial writer Stephen Stromberg calls the attacks from environmentalists proof that "virtually nothing will be enough for some activists," noting that the President "has done more on climate change than any other [president] ever — and perhaps a lot more than the next one will." Stromberg adds that "meaningful climate action" will not be achieved by "haphazardly reject[ing] oil projects in the vain hope that people elsewhere will decline to produce oil, too," but by "reduc[ing] demand for fossil fuels, either by mandating reductions in their use, which Obama has done, or by slapping a fee on carbon dioxide emissions."

In an editorial, the [New York Times](#) (9/2, Subscription Publication, 11.82M) notes that while the President's trip highlighted the issue of climate change, it also drew attention to the "fundamental conflict between the need to reduce greenhouse gases and to expand economic development," an issue which was "thrust to the forefront...by the administration's approval" of Shell's plan to drill in the Arctic. The Times argues that while it is "important for the president to drive home the reality of what is happening to our planet," it is "also good that this voyage is drawing attention to the other challenges of the thawing Arctic, including the fact that the same greenhouse gases that are raising temperatures are also opening access to vast deposits of fossil fuels."

Obama Visits Glacier To Highlight Climate Change's Impact. The [CBS Evening News](#) (9/1, story 11, 0 20, Pelley, 5.08M) noted that the Exit Glacier "shrunk a quarter mile" from "where it stood in 1951," which the President cited as proof "that time is running out to reverse climate change." The [Washington Post](#) (9/2, Mufson, 6.76M) reports that the President said at the foot of the glacier that "this is as good of a signpost of what we're dealing with when it comes to climate change as just about anything," adding that near the 1951 marker, "What it indicates, because of the changing patterns of winter and less snow and longer, hotter summers, is how rapidly the glacier is receding. It sends a message."

The [Los Angeles Times](#) (9/2, Ganga, Memoli, 4.07M) says the President's hike is "part of his effort to show Americans that the threat of climate change is an urgent one requiring an equally urgent response," as he seeks to "build momentum...on behalf of a sweeping, binding agreement to reduce emissions to be reached at a major UN climate summit in Paris late this year." The [AP](#) (9/2, Lederman) similarly says the President hiked the melting glacier "to highlight the dangers of global warming," providing "a powerful visual designed to make an impact in ways his speeches and ominous warnings have not." The AP notes that the President "is counting on Alaska's exquisite but deteriorating landscape to add urgency to his message on climate change," adding that the "carefully choreographed trip aims to make an impression with audiences that don't follow the news through traditional means."

On its website, [NBC News](#) (9/1, Donnelly, 3.73M) said the President is also using the trip "to highlight what scientists say is a frightening connection in the vast forested lands of Alaska between raging, record-setting wildfires and climate change." In his speech to the GLACIER conference on Monday, the President said, "Alaska's fire season is now more than a month longer than it was in 1950. At one point this summer, more than 300 wildfires were burning at once."

The [Washington Post](#) (9/2, Mooney, 6.76M), meanwhile, cites the President's discussion of "the science of the gigaton" and use of the phrase "'negative feedback loop' to describe how wildfires can worsen the loss of permafrost," noting that his "using of these admittedly alien scientific terms — and then explaining them clearly" comes about because one of the problems with the issue of climate change "is that it is so big that humans have a very hard time comprehending it."

Obama Calls For Accelerating Acquisition Of Coast Guard Ice Breaker. [NBC Nightly News](#) (9/1, story 7, 0:35, Holt, 7.86M) reported that while the President "has pushed for more action on climate change," he also "wants to protect US interests in an area with vast economic potential from that melting sea ice," and on Tuesday, "he called for speeding up the purchase of a new icebreaker to clear more maritime routes." [Bloomberg Politics](#) (9/1, Sink, 247K) notes that the Administration has asked Congress to accelerate the acquisition of the ice breaker "from 2022 to 2020." A separate story in the [Christian Science Monitor](#) (9/1, Truong, 455K) said that the President "said that the lack of icebreakers in the American fleet risks control of shipping routes, oil fields, and fishing grounds, and protected habitat, not to mention the ability for the US to perform emergency search-and-rescue operations." A statement from the White House said, "The growth of human activity in the Arctic region will require highly engaged stewardship to maintain the open seas

necessary for global commerce and scientific research, allow for search and rescue activities, and provide for regional peace and stability.”

The [Daily Caller](#) (9/1, Bennett, 375K) noted that according to the President, the icebreakers are needed “because climate change is causing ice to decrease, making the region more navigable,” which will mean “a coming surge in shipping, tourism, fishing and other activities.” The [New York Times](#) (9/2, Davis, Subscription Publication, 11.82M) says the proposal is “part of an effort to close the gap between the United States and other nations, especially Russia, in a global competition to gain a foothold in the rapidly changing Arctic.” The Times notes that while the announcement “fell short of guaranteeing the new icebreakers; lawmakers must approve the funding, and it would take years for the vessels to become available.” Sens. Lisa Murkowski and Dan Sullivan “cheered the step, saying it was long overdue.” [Politico](#) (9/1, Wheaton, 942K) noted that the “subtext” of the President’s trip “is as much Cold War as global warming,” adding that the announcement of plans to accelerate the acquisition of the icebreaker “wasn’t so much about acts of nature as acts of Vladimir Putin.”

Obama To Pledge Aid To Alaskans Hurt By Climate Change. The [New York Times](#) (9/2, Davis, Subscription Publication, 11.82M) reports that during a visit today to the Arctic Circle, the President “will announce federal grant programs to help villages there cope with coastal erosion and high energy costs, and, in some extreme cases, relocate altogether, the White House said.” According to the Times, the “assistance package will include new grant programs from the Agriculture Department and the Environmental Protection Agency for water and waste projects in vulnerable Alaskan villages,” while the Energy Department “will announce initiatives to help remote Alaskan communities and native tribes develop clean-energy programs to reduce their reliance on fossil fuels.”

The [AP](#) (9/2, Lederman) reports senior Obama adviser Brian Deese “said the administration was looking for ways to be more nimble in helping communities relocate – not to make the decision for them.” Said Deese, “It should be easier and more effective for the federal government to come in and support that decision.”

Obama Meets With Alaska Native Leaders. On its website, [Alaska Public Radio Network](#) (9/1, Estus, 2K) reported on the President’s meeting Monday with “Alaska Native leaders from across the state,” including Alaska Native Tribal Health Consortium president Andy Teuber, who said, “He told us up front that he was there to listen, and he did. He listened to everybody around the table, including all the tribal or indigenous leaders. ... And he followed up with questions and took copious notes, and Secretary Jewell was in the room with us and several members of his administration staff members. And we look forward to following up with members of his administration on the points that were made and some of the challenges that were presented.”

Meanwhile, [Alaska Dispatch News](#) (9/1, Shalev, Rosen, 219K) noted that indigenous residents told international leaders attending the GLACIER conference that climate change “is an existential threat,” and, “in a change from what many Alaska Natives contend has been the pattern of the past, the international leaders were listening – including President Obama.” In his remarks to the conference, the President said, “The Arctic is the leading edge of climate change, the leading indicator of what the entire planet faces.” After “tick[ing] off documented effects in the state, like rapidly rising temperatures, thawing permafrost, vanishing sea ice, accelerated coastline erosion, expanding wildfires and changing wildlife patterns,” he added, “The impacts here are very real.” [NBC Nightly News](#) (9/1, story 8, 3 30, McFadden, 7.86M) visited the Alaskan villages of Shishmaref and Kotzebue, which are “changing fast as temperatures warm twice as rapidly here as the rest of the planet,” and, as a result, are under threat due to the melting ice. NBC noted that according to scientists, “if the oceans continue to rise it won’t just be an arctic problem but one for the rest of us too.”

Trump: Mt. McKinley Name Change An Insult To Ohio. [ABC World News](#) (9/1, story 5, 0 30, Muir, 5.84M) reported that Republican presidential candidate Donald Trump called the President’s decision to rename Mt. McKinley as Denali is “an insult to Ohio where McKinley was from,” and “if elected, he’ll change the name right back.”

In a piece that focuses primarily on the recent push to eliminate Confederate symbols, meanwhile, the [New York Times](#) (9/2, Steinhauer, Subscription Publication, 11.82M) casts the President’s decision to rename the peak as part of “a larger movement to excise uncomfortable history from the more than two centuries of American life.” The Times notes that lawmakers and Alaskans say that removing McKinley’s name “was not meant as a slight to the former president,” but “as a recognition of the enduring role of Native Americans in the state,” while opponents “chose to see Mr. Obama’s move as yet another example of an executive power grab, a Republican accusation for much of his second term.”

In an editorial, the [Juneau \(AK\) Empire](#) (9/2, 15K) says that “when it comes to North America’s highest peak, a wrong has finally been made right.” According to the paper, “Alaskans everywhere — from Ketchikan to Kaktovik — celebrated to the news when U.S. Department of the Interior Secretary Sally Jewell signed the name change from Mount McKinley to Denali.” It asserts that “President Obama and Jewell simply made right a wrong. They didn’t rename the mountain. They ‘restored’ its proper name.”

Additional coverage was provided by the [Chicago \(L\) Tribune](#) (9/1, 2.46M), the [Cleveland \(OH\) Plain Dealer](#) (9/2, 1 03M), the [Dayton \(OH\) Business Journal](#) (9/2, Subscription Publication), the [Alaska Native News](#) (9/2, 245), the [Arizona Republic](#) (9/1, 1.12M), [Salon](#) (9/1, 1.08M), the [Native American Times](#) (9/2, 337), and the [Daily Mail \(UK\)](#) (9/2, 5.59M).

Sen. Murkowski Fights For King Cove Access Road As Obama Visits Alaska. The [Washington Times](#) (9/2, Wolfgang, 344K) reports that “as President Obama treks across Alaska this week, leading Republicans in Washington say they will continue to fight the administration over its refusal to approve a potentially lifesaving road in a remote corner of the state.” Sen. Lisa Murkowski is “trying to force the issue by including in Interior Department appropriations legislation provisions to build the road.” According to the article, “her bill would facilitate a land swap between Alaska and the federal government, setting aside other parts of the state as protected wilderness and removing barriers to the construction of the King Cove road.”

Shell President Odum Discusses Arctic Drilling With The AP. The [AP](#) (9/2, Joling, 811K) reports that in a Tuesday interview with the AP, Marvin Odum, president of Shell Oil Co., “said...exploratory drilling off Alaska’s northwest coast is going well” despite last week’s weather causing a temporary suspension in operations. Odum also “said he expects further protests against the company’s plans for Arctic drilling” and “said he’s ‘110 percent ready’ to work with people who want to find ways to improve drilling.” Odum discussed the need for oil during the U.S.’ transition to more renewable energy, saying, “Oil will be required for a long time. ... Let’s take a really close look at developing our own resources, control how it’s done and get all the benefits that go along with it.” The AP reports that Odum “is confident exploration can be done safely, and the overriding factor dictating whether Shell completes an exploratory well this year will be safety.” Odum and the AP also note the scrutiny Arctic drilling has undergone.

Environmentalists Asks Court To Find Arctic Drilling Leases Violate NEPA. [Law 360](#) (9/2, 21K) reports that “environmentalists challenging energy companies’ ability to look for oil and gas off Alaska’s northern coast have asked an Alaska federal judge to find the U.S. government violated the National Environmental Policy Act by not considering new information when it reaffirmed leases in the Chukchi Sea.” According to the article, “in a Friday motion for summary judgment, the 12 groups, represented by Earthjustice and joined by three Alaskan communities, said that the U.S. Department of the Interior’s Bureau of Ocean Energy Management ignored new information.”

McCain: Putin Poses More Immediate Threat In Arctic. In a [Wall Street Journal](#) (9/2, Subscription Publication, 5.95M) op-ed, Sen. John McCain argues that while the President is highlighting the issue of climate change, a more immediate threat is posed by Russian President Vladimir Putin, whose imperial aims are extending into the Arctic. An editorial cartoon in the [New York Times](#) (9/2, Chappatte, Subscription Publication, 11.82M) depicts the President hiking in the Arctic along with a guide, who tells him the bear they spotted is “Russian and marking his territory.”

Roberts: Conservatives Reject Any US Responsibility For Climate Change. In a piece for [Vox](#) (9/1, 1.1M), David Roberts wrote that the President’s claim in his speech to the GLAC ER conference that the United States “recognizes our role in creating the problem” of climate change “illuminates why conservatives have resisted acknowledging climate change for so long.” Roberts noted that the “notion that America is (partially) to blame” for the problem is “repulsive to the nativist sentiment that currently has Donald Trump atop the polls,” adding that “nativist conservatives” oppose “any effort to assign the US blame or responsibility for ills in the world, which they see as unpatriotic.”

Continuing Coverage Of Obama’s Historic Trip To Alaska. [KUAC-FM](#) Fairbanks, AK (9/2) reports on President Obama’s “historic visit to Alaska.” Obama says “he’s coming to Alaska because what’s going on here demonstrates the urgent need to respond to climate change.”

OBAMA ADMINISTRATION ASKS CONGRESS TO MARK NPS CENTENNIAL. The [Greenwire](#) (9/1, Subscription Publication) reports that Interior Secretary Sally Jewell announced Tuesday that the Obama Administration will “propose a bill to provide additional funding and flexibility for the National Park Service ahead of its 100th anniversary.” Jewell said, “This proposal acknowledges the important place our national parks have in the hearts and minds of all Americans. This administration and this Congress have the unique opportunity to shape the second century of the National Park Service as they preserve the legacy of some of our nation’s greatest treasures for generations to come.” According to the article, the Interior Department said “the proposal would provide funding for ‘signature Centennial projects to make necessary improvements to park infrastructure.”

The Hill (9/1, Henry, 471K) reports that “Obama will ask Congress to fund infrastructure improvements at NPS facilities and establish an endowment fund for future upgrades and projects at the parks.” The legislation, “which Obama will formally announce and send to Congress after he visits a national park in Alaska on Tuesday, would look to increase funding for an NPS volunteer program and expand eligibility for a fund that hires young workers.” The measure would “also strengthen education programs at parks and allow the NPS to provide new services for visitors, such as lodging and dining, according to the Interior Department.”

Additional coverage was provided by [USA Today](#) (9/1, Korte, 5 23M).

Who to Have Officially Launches “Every Kid In A Park” Program. The [Crescent](#) (9/1, Subscription Publication) reports that “with children across America headed back to

school," the White House on Tuesday "officially launched its 'Every Kid in a Park' program." The article notes that "all fourth-graders and their families now have free access to all federally managed lands and waters through the end of the 2015-16 school year." Starting Tuesday, "those students can log onto the program's website to obtain and print a paper pass."

The [Las Vegas Review-Journal](#) (9/1, 378K) reports that Interior Secretary Sally Jewell will visit Red Rock Canyon National Conservation Area on Wednesday to officially launch the Every Kid in a Park program. During Wednesday's event, Jewell and Christy Goldfuss, managing director of the White House Council on Environmental Quality, will hike with a group of local fourth graders and hand out some of the first passes, which are good for the 2015-16 school year. Jewell said. "We want to make sure that every American has the opportunity to develop a lifelong connection to our nation's land, water and wildlife."

Additional coverage was provided by the [AP](#) (9/1, 493K), [Money](#) (9/1, 7.29M), [CBS News](#) (9/1, 8.2M), the [Gettysburg \(PA\) Times](#) (9/1, 26K), the [Philly \(PA\) Voice](#) (9/1), the [Mesquite \(NV\) Local News](#) (9/1, 16K), [KOB-TV](#) Albuquerque, NM (9/1, 92K), [KXRM-TV](#) Colorado Springs, CO (9/1, 2K), and [KWCH-TV](#) Wichita, KS (9/1, 109K).

Coverage was also picked up by: [The San Luis Obispo Tribune](#) (9/1, 114K), [Fairfield Citizen](#) (9/1, 55K), [ABC News](#) (9/1, 3.97M), [The Valley Dispatch](#) (9/1), [Houston Chronicle](#) (9/1, 2.28M), [Seattle Post-Intelligencer](#) (9/1, 560K), [Washington Post](#) (9/1, Traci Carl |, Ap, 6.76M), [Minneapolis Star-Tribune](#) (9/1, 1.19M), [SF Gate](#) (9/1, Subscription Publication, 3.35M), [Washington Times](#) (9/1, Carl, 344K), [The Wichita Eagle](#) (9/1, 280K), [CT Post](#) (9/1, 199K), [Sun Herald](#) (9/1, 129K), [WVLT](#) Knoxville, TN (9/1, 58K), [The Olympian](#) (9/1, 78K), [Lexington-Herald Leader](#) (9/1, 251K), [Bradenton Herald](#) (9/1, 144K), [Paradise Post](#) (9/1, 15K), [Long Beach Press Telegram](#) (9/1, 149K), [Albany Times Union](#) (9/1, 530K), [The New York Times](#) (9/1, Press, Subscription Publication, 11.82M), [Miami Herald](#) (9/1, 651K), and the [New Jersey Herald](#) (9/1, 54K).

Also providing coverage are the [Washington \(DC\) Post](#) (9/1, Traci Carl |, Ap, 6.76M), the [Houston \(TX\) Chronicle](#) (9/2, 2.28M), the [Craig \(CO\) Daily Press](#) (9/1, 10K), the [St. George \(UT\) News](#) (9/1, 3K), the [Santa Clarita Valley \(CA\) News](#) (9/1, 431), the [St. George \(UT\) Spectrum](#) (9/1, 46K), the [Maple Valley \(WA\) Voice of the Valley](#) (9/2), [7th Space Interactive](#) (9/2, 624), the [Examiner](#) (9/2, 1.34M), [KTVZ-TV Bend \(OR\)](#) Bend, OR (9/2, 32K), [KWCH-TV Wichita \(KS\)](#) Wichita, KS (9/1, 109K), and [KSBW-TV Monterey \(CA\)](#) Monterey, CA (9/2, 27K).

GROUPS URGE OBAMA ADMINISTRATION TO CREATE NATIONAL MONUMENT OFF NEW ENGLAND. The [Greenwire](#) (9/1, Subscription Publication) reports that "conservationists want President Obama to create a national monument off the shores of New England, asserting that the area must be protected before it's commercialized." According to the article, "a coalition of large environmental groups will kick off the campaign tomorrow at the New England Aquarium in Boston." The article notes that "the groups are also asking the White House to protect 530 square nautical miles on Cashes Ledge, an underwater mountain that's home to commercially important fish."

FEDERAL OFFICIALS SAY NO PLANS TO RENAME MOUNT RAINIER. [McClatchy](#) (9/1, Cockerham, 28K) reports "since President Barack Obama decided to rename Mount McKinley," advocates are also seeking "to rename Mount Rainier as Mount Tacoma or Tahoma." However, federal officials say "there are no plans to rename Mount Rainier and that Interior Secretary Sally Jewell's order changing Mount McKinley to its Koyukon Athabascan name of Denali was unique." Lou Yost, executive secretary of the U.S. Board on Geographic Names, said that "the board has already rejected an effort to rename Mount Rainier and 'the secretary and probably the president would defer to what the board has done.'"

CENTER HONORING UNITED FLIGHT 93 TO OPEN DAY BEFORE 9/11 ANNIVERSARY. [USA Today](#) (9/2, Eversley, 5.23M) reports that "almost 14 years to the day of the Sept. 11 terror attacks, the National Park Service is preparing to open a visitor center on the site where United Flight 93 went down outside Shanksville, Penn., killing 40 people and four hijackers." According to the article, "the site, which includes a 4,000-square-foot permanent exhibit and a Wall of Names of the passengers and crew, will be dedicated in a ceremony Sept. 10 that will include Interior Secretary Sally Jewell, Homeland Security Secretary Jeh Johnson and Pennsylvania Gov. Tom Wolf." Steve Clark, superintendent of the memorial, said, "The Flight 93 National Memorial Visitor Center will open on Sept. 10, on time and within budget, thanks to the dedicated effort of the memorial staff, our partners and our contractors. We look forward to welcoming visitors and providing them a fuller story about the heroic efforts of the passengers and crew of United Flight 93."

REPS. BISHOP, CHAFFETZ SAY EPA KNEW SPILL RISK AT COLORADO MINE FOR A YEAR. The [Deseret \(UT\) News](#) (9/2, 549K) reports that "two congressional committee leaders from Utah say the Environmental Protection Agency and a federal contractor knew more than year ago that work in an abandoned Colorado mine could cause a toxic spill." Rep. Rob Bishop, chairman of the House Resources Committee, and Rep. Jason Chaffetz, chairman of the House Oversight and Government Reform Committee, "sent letters late Monday to the EPA and Missouri-based Environmental Restoration demanding documents for their investigation of the incident." The two Republicans "wrote in the letters that the agency and the company knew in June 2014 that conditions at the site could cause a release of water containing heavy metals from inside the mine."

Also reporting on the story are the [Salt Lake \(UT\) Tribune](#) (9/2, 492K), [Law 360](#) (9/2, 21K), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (9/2, 1.07M).

Additional coverage was provided by the [Farmington \(NM\) Daily Times](#) (9/2, 44K) and the [Racine \(WI\) Journal Times](#) (9/2, 102K).

DRONE TESTED IN FIGHT AGAINST WILDFIRE. [KOMO-AM](#) reports that a drone built by Boeing subsidiary InSitu this past week provided real-time overhead video to officials battling the Paradise fire in Olympic National Park.

Additional coverage of wildfires was provided by the [Houston \(TX\) Chronicle](#) (9/1), the [Arizona Republic](#) (9/1, 1.12M), and the [Washington \(DC\) Post](#) (9/2, Nicholas K. Geranios |, Ap, 6.76M).

WHITE HOUSE TO ANNOUNCE SIGNIFICANT SENIOR EXECUTIVE REFORMS THIS FALL. [Government Executive](#) (9/2, 3K) reports that "the White House will unveil significant reforms of the Senior Executive Service later this fall, marking one of the Obama administration's final attempts at improving management in the federal workforce." The White House Advisory Group on Senior Executive Service Reform "recently concluded its preliminary work and issued its proposals to the Office of Management and Budget." According to the article, "OMB is currently fine-tuning the recommendations and will roll them out in the coming weeks."

SECRETARY JEWELL IMPRESSED BY YOUNG LEADERS ON CLIMATE CHANGE. In an op-ed for the [Juneau \(AK\) Empire](#) (9/1, Jewell, 15K), Interior Secretary Sally Jewell writes about her experience meeting "some extraordinary young Alaskans who are taking important steps to make a meaningful impact on the future of their communities" at the Conference on Global Leadership in the Arctic. According to Jewell, "their voices and solutions for how to sustain communities, cultures and the environment in a changing Arctic are the reasons why they were selected for the United States Arctic Youth Ambassadors program." She concludes, "when we can excite and encourage youth to serve their communities and serve as an inspiration to the next generation of leaders, as we know these five ambassadors will, then we've invested wisely in our future, and more importantly, in theirs."

CONGRESS URGED TO SUPPORT LWCF, ANTIQUITIES ACT. For "The Blog" of the [Huffington Post](#) (9/1, Calderon, 164K), Jose Calderon, President of the Hispanic Federation, writes that "while there are numerous contributing factors, the lack of access to parks and green spaces throughout Latino neighborhoods is a major obstacle to maintaining a healthy lifestyle." According to Calderon, "one way Congress can help Latinos solve these issues is by providing permanent support for the Land and Water Conservation Fund (LWCF), set to expire September 2015, and to support the Antiquities Act, both powerful tools that can help Americans preserve their vital public lands."

Also covering the LWCF was the [Fort Wayne \(N\) Journal-Gazette](#) (9/2, 172K).

Additional pieces calling for the renewal of the LWCF appeared in the [Bismarck \(ND\) Tribune](#) (9/2, 37K) and the [Grand Haven \(MI\) Tribune](#) (9/2, 26K).

Empowering Native American Communities:

NATIVE AMERICAN LANDOWNERS TARGET BIA OVER "ILLEGAL" EVICTION ATTEMPT. [Law 360](#) (9/2, 21K) reports that "two Native American landowners on Monday lashed out at the Bureau of Indian Affairs over its 'illegal attempt' to oust them from a troubled-plagued property in Puyallup, Washington, urging a federal judge to put a stop to an alleged conspiracy."

FLATHEAD JOINT BOARD OF CONTROL SEEKS LOCAL CONTROL OF FLATHEAD INDIAN IRRIGATION PROJECT. The [Ronan Valley \(MT\) Journal](#) (9/2, 22K) reports that "the Flathead Joint Board of Control will appeal a federal lawsuit to the 9th Circuit Court of Appeals in an effort to regain local control of the Flathead Indian Irrigation Project." The article notes that "the board's attorneys said Aug. 25 that they will also try to work out an agreement outside of the courtroom with the Department of the Interior to plan for future management of the project, which irrigates 127,000 acres in Lake, Sanders, and Missoula County."

JUDGE CLEARS MAN ACCUSED OF HARASSING AMERICAN INDIAN STUDENTS. The [AP](#) (9/2, 2.28M) reports that "a South Dakota man accused of using racial slurs and spilling beer on American Indian students during a hockey game was cleared of a disorderly conduct charge Tuesday, more than a month after a trial in the controversial case attracted more than 200 people." Trace O'Connell was "charged after authorities alleged he sprayed beer and used racially charged language near a large group of Native American students during a minor league hockey game in Rapid City." Magistrate Judge Eric Strawn "released a ruling Tuesday siding with O'Connell, finding that the 41-year-old man from Philip unintentionally spilled beer on the students while celebrating an 'important score' at a Rapid City Rush game." Strawn also said "the city didn't prove O'Connell said any racially charged words near the students."

ATTORNEY PREDICTS ALASKA WILL LOSE APPEAL OF TRIBAL LAND INTO TRUST. In an op-ed for [Alaska Dispatch News](#) (9/1, 219K), Donald Craig Mitchell, an Anchorage attorney, predicts that Alaska will lose its appeal of tribal land into federal trust. He notes that "last December, Kevin Washburn, the present assistant secretary of the Interior for Indian affairs, amended the regulations that govern the implementation of section 5 of the RA in the forty-eight coterminous states by removing the sentence that prohibited the secretary of the Interior from taking title to land in Alaska into trust (which raises the question of whether that action mooted the state's appeal)."

Office of Insular Affairs:

NEW CENTER HELPS NEWCOMERS FROM MICRONESIA. [KITV-TV](#) Honolulu (9/2, 44K) reports that "on Friday, 'We Are Oceania', or WAO, held its grand opening at Saint Elizabeth Episcopal Church." According to the article, "WAO is a new center to help members of the Micronesian community get settled in the islands." The center will "serve as a one-stop center that will help newcomers from Micronesia obtain legal documents, explain medical benefits and provide job training skills."

Tackling America's Water Challenges:

BOR DISCUSSES DIFFERENT SOLUTION FOR LAKE TSCHIDA CABIN OWNERS. [KQCD-TV](#) Dickinson, ND (9/2, 104) reports that "in 2009, the Bureau of Reclamation ordered that all permanent structures in the flood pool of Lake Tschida, 114 cabins in total, had to be removed by 2010" and "that deadline was extended to 2021." On Tuesday, Sen. John Hoeven "hosted Bureau Commissioner Estevan López at the lake to try to have the trailer owners work with the bureau to come up with a different solution."

Additional coverage was provided by [KFYR-TV Bismarck \(ND\)](#) Bismarck, ND (9/2, 1K) and [KXMC-TV Minot \(ND\)](#) Minot, ND (9/2, 1K).

QUAKE STRIKES NEAR GRAND COULEE DAM. [Reuters](#) (9/1) reports that a magnitude 4.2 earthquake hit near Grand Coulee Dam on Tuesday, prompting an immediate inspection of the facility but leaving no visible damage, a spokeswoman said. Lynne Brouger, a spokeswoman for the BOR, said that operation of the Columbia River dam was not disrupted by the tremor.

Securing America's Energy Future:

Renewable Energy:

BOEM TO HOLD NEW JERSEY OFFSHORE WIND LEASE SALES THIS FALL. The [Recharge News](#) (9/1, 633) reports that the BOEM "this fall will hold a competitive sale of two lease areas off the coast of New Jersey that if fully developed, may be able to support up to 3.4GW of commercial wind generation."

Onshore Energy Development:

OSMRE KICKS OFF STREAM RULE HEARINGS. The [Greenwire](#) (9/1, Subscription Publication) reports that the Interior Department's Office of Surface Mining Reclamation and Enforcement on Tuesday will "kick off a round of public hearings on its new stream protection rule." The proposal, "meant to protect waterways near coal mines, would add bonding, monitoring and reclamation requirements to the permitting process." The article notes that "groups including the National Mining Association and the Interstate Mining Compact Commission have expressed concern about the rule's size and scope, and have asked for an extension of the comment period."

The [Indianapolis Star](#) (9/1, 547K) reports that "opponents of a proposed update to federal rules protecting water sources from coal mining pollution vowed Tuesday to fight the regulations." Hal Quinn, head of the National Mining Association, said, "This seems to be less about new science and more about new politics." The National Mining Association "expects Congress to hold hearings on the issue this fall."

SETTLEMENT REACHED IN ARKANSAS MINERALS CASE. The [AP](#) (9/2, 2.28M) reports that "federal prosecutors in Arkansas say an energy company has agreed to pay the U.S. government \$950,000 to settle a mineral trespass case." According to the article, "prosecutors announced the settlement Tuesday with SWN Production, LLC, formerly known as SEECO, Inc., of Texas, which will pay the federal government within 45 days." The article notes that "the case came to light after a field office for the Bureau of Land Management found evidence in 2009 indicating a natural gas well operated by the company drilled into unleased, federally owned minerals in Conway and Van Buren counties."

Additional coverage was provided by the [Arkansas Times](#) (9/1, 59K).

ENERGY COMPANY ASKS DISTRICT JUDGE TO LIFT HOLD ON DRILLING LEASE NEAR GLACIER NATIONAL PARK. The [AP](#) (9/2) reports an attorney for Baton Rouge-based energy company Solenex LLC is asking US District Judge Richard Leon to "reject the government's timeline for lifting its hold on an energy lease" in Montana, arguing that the schedule will "add years to a three-decade delay the company already has endured." However, the Blackfeet tribes of US and Canada, which oppose drilling on what they call their spiritual homeland, say the original lease was illegally issued because the Montana tribe was not consulted. Solenex's request comes prior to a public hearing Wednesday in which a federal historic preservation panel will discuss "allowing drilling on the 6,200-acre lease site near Glacier National Park."

APPEALS COURT REVIVES GREEN GROUPS' CHALLENGE TO BLM LEASES IN MONTANA. The [AP](#) (9/2, 2.28M) reports that "a federal appeals court ruling has revived a bid by environmentalists to block drilling for oil and gas on public lands in Montana until the government looks more closely at climate change impacts." The article notes that "the case had been dismissed two years ago by a judge who said the environmentalists could not demonstrate drilling activities would cause them harm." However, "a three-judge panel from the 9th U.S. Circuit Court of Appeals disagreed in a Monday ruling that sends the case back to U.S. District Judge Sam Haddon."

TEXAS RAILROAD COMMISSION REPORT CLEARS ENERGY COMPANY OF CAUSING LOCAL EARTHQUAKES. The [AP](#) (9/1, Shinkman, 811K) reports the Texas Railroad Commissions has determined that seismological activity in North Texas "like wasn't caused by drilling operations by" Exxon Mobil subsidiary XTO Energy. The preliminary findings represent the TRC's first decision since it was authorized last year to explore if injection wells were responsible seismological activity. The commission ordered hearings after a university study suggested injection wells "were responsible for quakes that shook Reno, Texas in 2013 and 2014." Investigators included a XTO Energy well "likely didn't cause the quakes," but noted there was not evidence to determine the earthquakes were naturally occurring. The report was released one day prior to a new law took effect preventing Texas cities from banning fracking and "limiting local authority to restrict other oil and gas operations." Reno Mayor Lynda Stokes said she was not surprised by the findings and is unsure what legal recourse her city should take next.

The [San Antonio Express-News](#) (9/2, 884K) also reports on the commission's findings.

EDITORIAL SHUTDOWN OF COLOWYO COAL MINE SHOULD BE AVERTED. The [Denver Post](#) (9/2, Board, 787K) editorializes that it's unfortunate that Interior Secretary Sally Jewell has decided against appealing Judge R. Brooke Jackson's ruling on the Colowyo coal mine. But it notes that Jewell has also said federal officials were "doing everything we can" to avoid a mine shutdown. On Tuesday, OSMRE released a revised environmental assessment that the paper hopes will be enough to satisfy the judge.

OP-ED METHANE REGULATION IS NECESSARY TO FORCE ENERGY COMPANIES TO ACT IN THE PUBLIC'S BEST INTEREST. Richard Revesz, a professor New York University School of Law and director of the Institute for Policy Integrity, writes in [The Hill](#) (9/2, Revesz, Contributor, 471K) contributors blog that the EPA's new regulators to limit methane emissions has resulted in a "wave of criticism" from oil and gas groups. Revesz argues that that regulation is necessary "because energy companies don't face the right incentive to reduce the adverse social consequence of their activities." The decision to regulate methane means the EPA "compels companies to act in the best interests of the public to reduce emissions." The proposed rule is a "good start" toward the Obama administration's goal of reducing methane emissions in the oil and gas sector 40 to 45 percent from 2012 levels by 2025. However, "more will be needed to reach it," such as enacting new policies that govern methane capture on federal lands and other efforts "to target sources outside the scope of this rule."

Offshore Energy Development:

WATCHDOG SAYS INTERIOR OFFSHORE DRILLING OVERSIGHT DIVISION UNDERSTAFFED. [Fierce Government](#) (9/2, Mcdermott, 224) reports that "the Interior Department division that handles oversight of offshore drilling needs more full-time staff to review and respond to incidents, according to a recently released DOI Inspector General report." In June 2010, the Investigations and Review Unit, or IRU, of the BSEE was "established to respond to allegations of misconduct by either BSEE employees or private companies involved in off-shore energy projects." In 2011, the DOI IG "recommended that BSEE reorganize and add more full-time staff members." Now, "in its latest report, auditors reiterate IRU needs more dedicated employees to do its job effectively."

RESEARCHERS RECOMMEND MONITORING OCEAN SEISMIC TESTING LIKE POLLUTION. The [Raleigh \(NC\) News & Observer](#) (9/2, Jarvis, 354K) reports that in a paper published Tuesday in *Frontiers in Ecology and the Environment*, eight universities and environmental groups argue that "high-decibel seismic testing for oil and gas in ocean waters should be controlled and monitored like pollution." According to researchers, loud seismic test impulses can disrupt "marine life by masking the sounds they rely on to communicate, navigate, find food and avoid predators." Douglas Nowacek, a marine ecology and bioacoustics expert at Duke University, stressed the urgent need to administer

these controls, "especially with oil and gas exploration awaiting government approval as close as three miles offshore."

SHARING OF OFFSHORE OIL, GAS REVENUES URGED. In a piece for the [New Orleans Times-Picayune](#) (9/1, 718K), Jarvis DeBerry writes that "while the president has sounded the right note on climate change, his administration hasn't always taken the right position regarding efforts to restore Louisiana's coast." He notes that "in February, Interior Secretary Sally Jewell suggested the undoing of a law that's scheduled to give the state a percentage of the royalties the federal government gets for allowing drilling off the Louisiana coast." According to DeBerry, "it was alarming to hear an Obama cabinet official criticize that law."

America's Great Outdoors:

Bureau of Land Management:

STEINLE FAMILY CONTENDS FEDERAL, LOCAL AUTHORITIES CONTRIBUTED TO DEATH. The [AP](#) (9/2, Elias) reports that Kathryn Steinle's parents contend that "federal and local authorities contributed to the death of their daughter through negligence and bureaucratic bungling." The Steinle family and attorneys "filed three separate legal claims seeking unspecified damages from the BLM, San Francisco Sheriff's Department and U.S. Department of Homeland Security" and are cited saying they "would file lawsuits if the claims are denied." The AP says "similar lawsuits alleging that so-called sanctuary city policies contributed to killings by illegal immigrants have failed, including a high-profile case in San Francisco." ICE spokeswoman Virginia Kice is quoted saying, "the director of U.S. Immigration and Customs Enforcement met recently with members of the Steinle family to express the agency's profound sympathy for their loss."

The [Los Angeles Times](#) (9/2, Romney, 4.07M) quotes an attorney for the family saying they want "public officials who issued statements in the wake of Steinle's killing to 'not only stop the finger-pointing, stop the bickering, but we want to ensure that it does not happen again.'"

The [San Francisco Chronicle](#) (9/2, Subscription Publication, 3.35M) cites the family saying "they were ready to go to court to force the city and federal government to take steps to prevent a repeat of the tragedy."

The [San Jose \(CA\) Mercury News](#) (9/2, 626K) reports that Steinle's parents argued in an "emotional" news conference that "they want to hold accountable not just the illegal immigrant charged with her killing but also the public officials who failed to keep him off the streets."

On its website, [KPIX-TV](#) San Francisco (9/1, Castaneda, 116K) quotes father Jim Steinle: "if you think this can't happen to you, think again,...I'm walking down the pier, arm-in-arm with my daughter she stops, takes a selfie, she turns around, and is shot. As she fell said, 'Help me, dad.' That's my bedtime story every night. And if you want it to be your bedtime story every night, then do nothing. But if you feel this was wrong – and it is- be active and let the people in this city, and the state and the country know this this this can't stand."

[ABC News](#) (9/2, 3.97M) says that amid the family's claims, "a fierce debate in Washington over the practice of so-called 'sanctuary cities' is expected to consume Congress after members return from their summer recess." Two months after her murder, "Kate's Law" is "still stalled in the Senate Judiciary Committee."

In its coverage of this story, [Fox News Real Story with Gretchen Carlson](#) (9/2) calls it "interesting" that San Francisco has persisted with its "sanctuary city" policy while other communities in California and elsewhere have changed their policies after the murder.

The [Huffington Post](#) (9/2, 164K) cites an ICE spokeswoman's email saying ICE Director Sarah Saldana "recently met with Steinle's family 'to express the agency's profound sympathy for their loss,' but the department wouldn't comment directly about the lawsuit's allegations."

Also reporting this story were the [ABC News](#) (9/2, 3.97M) website, the [CNN](#) (9/1, 5.17M) website, [Reuters](#) (9/2, Berg), the [Washington Times](#) (9/2, Noble, 344K), the [KGO-TV](#) San Francisco (9/2, 4K) website, and the [Fox News](#) (9/2, 8 91M) website.

PROPOSAL TO CREATE "JURASSIC NATIONAL MONUMENT" GAINS LOCAL SUPPORT. The [AP](#) (9/2, 2 28M) reports that "a proposal from two congressmen to convert a central Utah dinosaur fossil quarry rich in Jurassic-period bones into a national monument gained a key endorsement Tuesday from county officials." The Emery County public lands council "voted unanimously to back a plan that would elevate the Cleveland-Lloyd dinosaur fossil quarry to what could be known as the 'Jurassic National Monument,' said Randy Johnson, Emery County's public lands adviser." The Emery County commission is "also expected to back the idea."

Additional coverage was provided by [US News & World Report](#) (9/1, 811K), the [Washington \(DC\) Post](#) (9/2, Brady McCombs |, Ap, 6.76M), the [Washington \(DC\) Times](#) (9/2, McCombs, 344K), and the [Daily Mail \(UK\)](#) (9/2, 5.59M).

BLM TO STUDY WILD HORSE, BURRO POPULATIONS. The [Deseret \(UT\) News](#) (9/2, 549K) reports that "a trio of Utah field offices within the Bureau of Land Management plan to study wild horse and burro populations, including the potential sterilization of male animals." According to the article, "representatives of the Price, Fillmore and Cedar City BLM offices are proposing to partner with the U.S. Geological Survey's Fort Collins Science Center to carry out several studies looking at the demography of burro and wild horse populations in certain herd management areas." The bureau said "the research is in response to a 2013 National Academies of Science report commissioned by the BLM that found the government needed to use science-based approaches to solve the population dilemma."

CEMEX COULD APPEAL CANCELLATION OF MINE. The [Santa Clarita Valley \(CA\) Signal](#) (9/2, 23K) reports that "with the Bureau of Land Management's announcement last week that contracts for the proposed mega-mine in Soledad Canyon have been canceled, effectively killing the proposal, the federal agency is preparing for the next step." BLM spokeswoman Martha Maciel said that "Cemex has 30 days to initiate an appeal" and "such action would go to the Interior Board of Land Appeals." Maciel said, "Cemex has been notified of their appeal rights. Our next steps are to give Cemex time to review and decide what, if any action, they wish to pursue related to the decision."

OP-ED PROPOSAL TO EXPAND ALTON COAL MINE THREATENS SAGE GROUSE. In an op-ed for the [Deseret \(UT\) News](#) (9/2, 549K), Erik Molvar, a wildlife biologist who directs the Sagebrush Sea Campaign for WildEarth Guardians, writes that "a new coal mine expansion in southern Utah threatens to undermine our efforts to combat climate change and worse, drive the imperiled sage grouse closer to extinction." According to Molvar, it is the BLM "that's driving this dirty energy disaster." He claims that "the proposal to expand the Alton coal mine into prime sage grouse habitats is demonstrating that federal and state officials are eager to abandon commitments to sage grouse conservation to approve a damaging industrial project, which makes the case that the highly touted state and federal plans won't save the sage grouse and that the Endangered Species Act protections are necessary."

Fish and Wildlife Service:

FWS FAULTED OVER ENDANGERED WOLF DEATHS. The [AP](#) (9/2, 2.28M) reports that "wildlife advocacy groups say federal officials violated the Endangered Species Act by allowing landowners to kill red wolves on their property." According to the article, "a letter to the government Tuesday by the Southern Environmental Law Center says two killings of endangered wolves have been allowed since 2014 after only cursory non-lethal efforts." The letter claim "the government has also failed to conduct a required review of the world's only wild population of the wolf in North Carolina." It also threatens to sue.

Additional coverage was provided by the [Washington \(DC\) Times](#) (9/2, 344K), the [Raleigh \(NC\) News & Observer](#) (9/2, 354K), the [Charlotte \(NC\) Observer](#) (9/2, 503K), and [WRAL-TV Raleigh \(NC\)](#) Raleigh, NC (9/2, 193K).

ENDANGERED GREEN SEA TURTLES BREAK NESTING RECORD. [USA Today](#) (9/1, Waymer, 5.23M) reports that this year, endangered green sea turtles "dug a record number of nests at the Archie Carr National Wildlife Refuge, with two months still left in their nesting season." According to the article, "this year, UCF researchers counted 12,026 green turtle nests at Archie Carr refuge, already crushing a record the turtles set at the refuge in 2013 — 11,839 nests." The article notes that "the nesting at Archie Carr is significant, because biologists consider that span of beach among the most important sea turtle nesting spots in North America and indicative of how turtle nesting is going as a whole."

Additional coverage was provided by [USA Today](#) (9/1, 5 23M).

SUPPORT URGED FOR CECIL ACT. For the "Pundits" blog of [The Hill](#) (9/2, Sainato, Contributor, 471K), Michael Sainato, a freelance writer, says that "the killing of Cecil the lion has inspired a remarkable amount of backlash against the hunter, Minnesota dentist Walter Palmer, who paid \$55,000 to hunt the lion." However, "the inexcusable murder of Cecil the lion is not an anomaly; it is a manifestation of a trophy-hunting culture that cultivates this violence towards wildlife." Sainato calls on Congress to support the Conserving Ecosystems by Ceasing the Importation of Large (CECIL) Animal Trophies Act, which would "discourage trophy hunting abroad by making it illegal to import parts of any species listed as threatened or endangered, but more steps through policy, advocacy and funding need to be made to ensure trophy hunting is eradicated and animals are protected."

OP-ED VOLUNTARY CONSERVATION PROGRAMS CAN GARNER BIPARTISAN SUPPORT. In an op-ed for [Roll Call](#) (9/2, 113K), Bruce Knight and Dave White, both

former chiefs for the Natural Resources Conservation Service, write that "in a season where Republicans and Democrats find themselves on opposing sides of almost every issue, there's something on which we both agree: the value and effectiveness of voluntary conservation programs to improve water quality, protect the soil, and preserve and increase habitat for wildlife." They argue that "voluntary conservation is a strategy that works for landowners, for wildlife and for taxpayers." The authors conclude that "it's a triple win that cuts across party lines and fence lines to improve biodiversity and preserve landowners' land use options. And it's an approach we need to continue to support on a bipartisan basis."

FLORIDA'S STANCE ON PANTHER QUESTIONED. In an op-ed for the [South Florida Sun Sentinel](#) (9/1, 651K), Rob Moher, president and CEO of the Conservancy of Southwest Florida, writes that the Fish and Wildlife Conservation Commission is "poised to consider approval of a new policy position statement on the Florida panther that questions the current federal plan for recovering this federally endangered species." Moher argues that "rather than following the science, the proposed state policy is being driven by speculative concerns that the federal plan is not going to be successful and by a few ranchers who occasionally lose livestock to panther predation." According to Moher, "since the Florida panther is a federally endangered species, it is the U.S. Fish and Wildlife Service's role and responsibility to lead in recovery decisions and efforts according to the national Endangered Species Act." He concludes that "the state should support its federal partner agency, offering input while following its lead — rather than moving its own independent position statement forward ahead of the Fish and Wildlife Service."

The piece also appears at the [Fort Myers \(FL\) News-Press](#) (9/1, 171K).

National Park Service:

NPS TO MARK 70TH ANNIVERSARY OF V-J DAY. The [Washington Times](#) (9/1, 344K) reports that "Wednesday is the 70th anniversary of V-J Day, commemorating the anniversary of the Allied forces' victory in the Pacific and the end of World War II." The NPS and the Friends of the National World War II Memorial will "pay tribute to those who won that victory at the aforementioned memorial."

NPS CLOSES LAKE POWELL BEACH DUE TO FUEL SPILL. The [Salt Lake \(UT\) Tribune](#) (9/2, 492K) reports that "just a few days in front of a holiday weekend, National Park Service officials have closed a popular Lake Powell beach Monday after a moored boat leaked a tankful of fuel into the water near Wahweap marina." According to Christiana Admiral, the park's chief of interpretation, "a park visitor reported a diesel smell late afternoon and officials soon discovered a neon sheen on the lake's surface covering an area of about a half mile by a half mile." Admiral said "the beach closure is temporary, but was not sure when it would be re-opened."

Additional coverage was provided by [KSTU-TV Salt Lake City \(UT\)](#) Salt Lake City (9/1, 180K).

NEW RULES FOR EVERGLADES NATIONAL PARK DUE OUT FRIDAY. The [Greenwire](#) (9/1, Subscription Publication) reports that "new rules for Everglades National Park due out Friday will phase out a way of life for the aging gladesmen who have spent their lives running the River of Grass in airboats." The article notes that "restrictions on airboat operations and no-motor zones in Florida Bay are part of the first rule changes in the park since 1978." According to the article, "the park is planning to offset the impact on four commercial airboat operations by buying land and striking concession deals with the current owners."

CANYONLANDS AWARDED GOLD-TIER INTERNATIONAL DARK SKY PARK STATUS. [KSL-TV](#) Salt Lake City (9/2, 1 07M) reports that "Canyonlands National Park recently received the rare award of having one of the darkest skies in America." The park was "awarded the Gold-Tier International Dark Sky Park status by the International Dark-Sky Association on Aug. 31." Canyonlands National Park Superintendent Kate Cannon said in a statement, "The Milky Way stretching across the park's incredibly dark night sky is a sight many visitors will never forget. With this gold-tier designation, the International Dark-Sky Association recognizes the importance of the natural darkness found here."

DELAWARE WATER GAP NATIONAL RECREATION AREA'S 50TH ANNIVERSARY CELEBRATED. The [Pocono \(PA\) Record](#) (9/1, 46K) reports that NPS "staff took time Tuesday to celebrate the Delaware Water Gap National Recreation Area's 50th anniversary." Park Superintendent John Donahue said, "ts natural setting makes it the perfect location for wildlife viewing, including black bear, deer, and a wide variety of birds." The article notes that "the park is holding public meetings this month on a future visitor use management plan and historic properties management plan, involving the public in the process."

AUTHORITIES ASK PUBLIC'S HELP IN FINDING MAN MISSING IN YOSEMITE. The [AP](#) (9/2, 2 28M) reports that "Yosemite National Park officials are asking for the public's help in locating a missing man." According to the article, "39-year-old James Michael Millet Jr. planned a day hike to Upper Yosemite Fall on Aug. 11, and has not returned to his vehicle."

HIKER WHO DIED IN GRAND CANYON PARK IDENTIFIED. The [AP](#) (9/2, 344K) reports that "authorities have identified a hiker who died last week in Grand Canyon National Park." According to park officials, "the hiker was 51-year-old Daniel Sarr of Flagstaff."

ADDITIONAL COVERAGE WORK ON PART OF LINCOLN MEMORIAL REFLECTING POOL TO BEGIN. Additional coverage that a project to repair the Lincoln Memorial Reflecting Pool was provided by [WCAV-TV Charlottesville \(VA\)](#) Charlottesville, VA (9/2, 3K), [WRC-TV Washington \(DC\)](#) Washington (9/2, 345K), and [WRC-TV Washington \(DC\)](#) Washington (9/2, 345K).

Top National News:

CLINTON WROTE AT LEAST SIX LATER-CLASSIFIED EMAILS USING PRIVATE SERVER. The [Washington Post](#) (9/2, Helderman, 6.76M) reports that then-Secretary of State Hillary Clinton "wrote and sent at least six e-mails using her private server that contained what government officials now say is classified information," according to the latest set of emails released by the State Department. While officials "deemed the e-mails classified after Clinton left office, they could complicate her efforts to move beyond the political fallout from the controversy."

The [CBS Evening News](#) (9/1, story 7, 2:20, Pelley, 5 08M) reported that Clinton "chafed from time to time at the classified computer system that could be difficult to access." While the State Department said that the new batch of emails contained information that was marked classified after the fact, intelligence officials "say regardless, that material should not have been sitting on Clinton's home server for years." [NBC Nightly News](#) (9/1, story 5, 2 30, Holt, 7.86M) said that one of the emails "reveals even the State Department help desk didn't recognize Clinton's private email address."

The [Washington Times](#) (9/2, Solomon, 344K) reports that "one of the most serious potential breaches of national security identified so far by the intelligence community" in the emails "involves the relaying of classified information concerning the movement of North Korean nuclear assets." One source speaking on condition of anonymity told the Times, "While everyone talks about the U.S. being aware of the high threat of hacking and foreign spying, there was a certain nonchalance at Mrs. Clinton's State Department in protecting sensitive data that alarms the intel community. We're supposed to be making it harder, not easier, for our enemies to intercept us."

DOJ Will Ask Judge To Consolidate FOIA Suits Over Clinton Emails. [Politico](#) (9/1, Gerstein, 942K) reports the Justice Department will ask US District Court for the District of Columbia Chief Judge Richard Roberts "to consolidate an unwieldy flurry of pending lawsuits which demand copies of emails sent or received by Hillary Clinton or her top aides." That would mean that "dozens of Freedom of Information Act lawsuits could be placed in front of a single judge – at least for a period of time – in order to avoid conflicting schedules for the release of records."

Blumenthal Advised Clinton On Foreign Policy, Domestic Politics In Emails. [Reuters](#) (9/2, Bell, Allen) reports that many of the latest Clinton emails to be released by the State Department show the large role longtime friend and adviser Sidney Blumenthal had in Clinton's deliberations. Blumenthal sent Clinton lengthy memos on both foreign policy and domestic politics. The [New York Times](#) (9/2, Baker, Subscription Publication, 11 82M) says "in addition to memos on Libya that have drawn attention, Mr. Blumenthal weighed in freely on events in Britain, Northern Ireland, Saudi Arabia, Israel, Iran, China, Greece, Mexico, Italy and even Kyrgyzstan," and "also served as an informer on domestic pol

OBAMA WARNS OF DIRE CONSEQUENCES IF WORLD FAILS TO ACT ON CLIMATE CHANGE. The [Greenwire](#) (8/31, Subscription Publication) reports that "President Obama kicks off a three-day tour of Alaska today, where he's plunging into some of the most hot-button environmental disputes facing his administration." Obama's "historic tour will include a glacier hike, a stop at a Bristol Bay fishing town and an international climate conference." According to the article, "along the way, he'll be confronted with questions about his administration's policies on drilling and mining, his climate change agenda, and the politics surrounding his decision to rename North America's tallest mountain."

Focusing on the tenor of the President's remarks to the GLACIER conference, the [AP](#) (9/1, Lederman) describes them as "a doomsday scenario" and the [New York Times](#) (9/1, Davis, Myers, Subscription Publication, 11.82M) as bordering "on the apocalyptic." A number of reports note that while the President is using the trip to help cement his legacy on climate change, he is facing criticism from environmentalists over the Administration's decision to allow drilling in the Arctic.

The [AP](#) (9/1, Lederman) reports that in the speech to the GLACIER conference in which he "sought to set the tone" for his Alaska visit, the President "called on other nations to take swift action as negotiations for a global climate treaty near a close." The [New York Times](#) (9/1, Davis, Myers, Subscription Publication, 11.82M) says he "issued a global call for urgent action to address climate change" and "warned that the effects of global warming that have hit the Arctic the hardest would soon engulf the world — submerging entire countries, annihilating cities and leaving fields barren — unless more was done to reduce emissions." The President, the Times notes, declared that "the United States was partly to blame for what he called the defining challenge of the century and would rally the world to counter it." [USA Today](#) (9/1, Korte, 5 23M), likewise, indicates the President "used near apocalyptic imagery to drive home his call to action," arguing that the "result of inaction will be catastrophic in economic and security terms."

[AFP](#) (9/1, Cartillier) says the President described the "urgent and growing" threat that was not being addressed quickly enough, "as he "sketched the problems already facing people living in one of America's last wilderness frontiers." He said the challenge "will define the contours of this century more dramatically than any other," and "with one eye on Republicans who reject humans' role in heating the planet," he argued, "Human activity is disrupting the climate, in many ways faster than we thought. ... The deniers are increasingly alone, on their own shrinking island."

On its website, [NBC News](#) (8/31, Abdullah, 3.73M) described the President's address as "forceful," noting that he said unless the world acts aggressively and quickly, "entire nations will find themselves under severe, severe problems: More drought. More floods. Rising sea levels. Greater migration. More refugees. More scarcity. More conflict." The [Washington Post](#) (9/1, Mufson, Eilperin, 6.76M) also reports that the President told the conference, "The point is that climate change is no longer some far off problem. ... It is happening here and is happening now."

A later version of the [Los Angeles Times](#) (9/1, Ganga, 4.07M) report, which was posted after the President's speech, noted that upon arriving in Anchorage, the President sat down "with a group of Alaska native leaders." The President told reporters, "They don't just represent a large portion of Alaska's population. These are communities that have been around for 10,000 years or so, so it's worth paying attention to them. They know a little bit from all that history." He added that by "the end of his tenure in the White House," he will "have visited more tribal communities than any other previous sitting president, and I feel pretty good about that, in case anybody's keeping track."

The [CBS Evening News](#) (8/31, story 5, 1 55, Plante, 5 08M) also reported that Alaska is providing "the backdrop for President Obama's call for action on climate change," and Secretary of State Kerry "set the tone today." Kerry was shown saying, "But what we discuss here today is important not just for the Arctic, it is important for the rest of this planet." [Alaska Dispatch News](#) (8/31, Rosen, 219K) reports that in remarks to the conference earlier Monday, Kerry "mentioned dramatic changes documented in Alaska," noting, "The bottom line is that climate change is not a distant threat for our children and their children. ... It is now. It is happening now. I think anybody running for any high office in any nation in the world should come to Alaska or any other place where it is happening and inform themselves about this."

Jim Acosta reported on [CNN's Situation Room](#) (8/31, 554K) that CNN spoke with Kerry about the Administration's agenda on climate change, focusing on how the agenda "has almost zero support among most Republicans in Congress." Kerry said the lack of support from Republicans is "one of the reasons we're in Alaska." Kerry explained that for those who don't believe climate change is happening, "All they have to do is come here and open their minds and their eyes and their ears. Listen, look and they will see the impact of what is happening."

In a story posted before the President arrived in Alaska, [Reuters](#) (9/1, Rampton) reported that the goal of the President's trip is to highlight the impact of increasing temperatures and rising oceans and persuade Americans to take action. An [AP](#) (9/1, Lederman) story, also posted before the President's arrival, noted that he "hopes to raise the sense of urgency to deal quickly to slow climate change in the US and overseas." A [Washington Post](#) (9/1, Mufson, Eilperin, 6.76M) analysis says that while the President is seeking to use Alaska "as the backdrop for his urgent message that climate change is not just a thing of the future but is already well underway in America's largest state," Alaska "is not a perfect setting for Obama's message," as it "reflects all too well the cacophony of disputes over mapping international sea borders, exploiting the Arctic's resources, and making greater use of northern shipping routes."

In a blog post on the [Huffington Post](#) (8/31, 164K), Jamie Rappaport Clark, President and CEO of Defenders of Wildlife, said the President has a "chance to take a significant leadership role during this international conference and address the myriad threats that face this unique landscape." Clark noted "issues threatening Alaska and arctic wildlife" she would like the President to address and called on Congress to support the Clean Power Plan.

[Roll Call](#) (8/31, Dennis, 113K) reported that during the three-day trip, the President "may rile the GOP" as he "highlights the effects of climate change and his go-it-alone plans to tackle it." An early version of a story from the [Los Angeles Times](#) (9/1, Ganga, 4.07M) notes that there are "those who argue that Obama hasn't done enough to allow for the extraction of this cash-strapped state's abundant natural resources, among them, oil, natural gas and minerals key to manufacturing."

The [CBS Evening News](#) (8/31, story 5, 1 55, Plante, 5 08M) noted that the visit "comes at an awkward time," just weeks after the Administration "issued new permits for offshore oil exploration." CBS added that according to the President, "as long as fossil fuel is needed, the US should be as self-sufficient as possible." Similarly, the [New Republic](#) (8/31, Leber, 242K) notes that the trip "draws attention to the greatest weakness in his environmental agenda," adding that while the President has "done more than any president to slow demand for fossil fuels, his green critics say he hasn't done enough to limit the supply of oil, gas, and coal." That "tension" was exposed by the White House decision to allow "Shell to explore the Arctic for oil," and by traveling to Alaska, "to highlight the impacts of climate change, Obama has awkwardly drawn attention to his conflicting actions."

The early [Los Angeles Times](#) (9/1, Ganga, 4.07M) story also says that while the President "hopes to make climate change the cornerstone of his final time in office," environmentalists "are wary of the man who just allowed Royal Dutch Shell to develop limited offshore oil drilling in the Chukchi Sea." The [Huffington Post](#) (8/31, Sheppard, 164K) said the President "is facing criticism and outright outrage from environmental advocates who say his focus on climate change while in the region contradicts his administration's decision to allow Shell to drill there."

In a post on [Slate's](#) (8/31, 1.38M) "The Slatest" blog, Eric Holthaus noted that while the White House says the trip will highlight the fact that climate change "is one of the biggest threats we face, it is being driven by human activity, and it is disrupting Americans' lives right now," the words "fall flat when compared with Obama's mixed record on climate."

Holthaus argued that “the scale of action that climate science demands is far beyond what Obama has put in place.”

Additional coverage was provided by the [New York \(NY\) Times](#) (9/1, Davis, Myers, Subscription Publication, 11.82M), the [New York \(NY\) Times](#) (9/1, Davis, Subscription Publication, 11.82M), the [Washington \(DC\) Post](#) (9/1, Mufson, Eilperin, 6.76M), the [Los Angeles \(CA\) Times](#) (9/1, Ganga, 4.07M), the [Los Angeles \(CA\) Times](#) (9/1, Ganga, 4.07M), the [Huffington Post](#) (8/31, Sheppard, 164K), the [Huffington Post](#) (8/31, 164K), [MSNBC](#) (8/31, Dokoupil, 545K), the [International Business Times](#) (9/1, Marcin, 835K), [Voice of America](#) (9/1, Dockins, 32K), [US News & World Report](#) (9/1, Lederman), [Bloomberg Politics](#) (9/1, Sink, 247K), the [Oil and Gas Journal](#) (9/1, Snow, 1K), the [Boston \(MA\) Herald](#) (9/1, Lederman, 548K), [TIME](#) (9/1, Lederman), the [Chicago \(IL\) Tribune](#) (8/31, Reports, 2.46M), the [Alaska Dispatch News](#) (8/31, Kelkar, 219K), the [Savannah \(GA\) Morning News](#) (9/1, Lederman, 146K), the [Providence \(RI\) Journal](#) (8/31, Times, 305K), [La Opinión \(CA\)](#) (8/31, 360K), [Yahoo! News](#) (9/1, Gertz, 5.98M), [Yahoo! Finance](#) (9/1, Cunningham, 5.57M), [KTUU-TV Anchorage \(AK\)](#) Anchorage, AK (9/1, 128K), and [KTVA-TV Anchorage \(AK\)](#) Anchorage, AK (9/1, Rivera, 1K).

Over Ohio Lawmakers' Objections, Obama Renames Mt. McKinley As Denali. Also garnering a great deal of media attention is the President's announcement that Alaska's Mt. McKinley has been officially renamed Denali, with most reports focusing on the angry reaction from lawmakers and officials from Ohio, President McKinley's home state. [NBC Nightly News](#) (8/31, story 4, 2:40, Jansing, 7 86M) reported that the President's move “sett[ed] a decades-long dispute between the Alaska congressional delegation and the politically powerful Ohio delegation.” The [CBS Evening News](#) (8/31, story 4, 0:30, Pelley, 5 08M) said the President took his action “to the delight of native Alaskans” and “to the disappointment of native Ohioans, including House Speaker John Boehner.” In a brief report, [ABC World News](#) (8/31, story 6, 0 25, Muir, 5.84M) noted that lawmakers from McKinley's home state of Ohio “are vowing to fight” the action.

The [New York Times](#) (9/1, Steinhauer, Subscription Publication, 11.82M) notes that in the wake of the President's announcement, “the political outrage — manufactured, deeply felt and otherwise convenient” is “flowing from the state of Ohio,” adding that it has created “rare unity between Republican and Democratic Buckeyes against Mr. Obama under the well-worn complaint about excessive executive power, and even rarer agreement from members of both parties in Alaska praising the president.” Similarly, [USA Today](#) (9/1, Madhani, 5.23M) says “the Ohio delegation is apoplectic about the perceived slight and has slammed the president for being guilty of one of Washington's greatest sins: Overreach,” and the [Wall Street Journal](#) (9/1, Williamson, Kesling, Subscription Publication, 5.95M) says Ohio's congressional delegation blasted the move, noting that Sen. Rob Portman tweeted, “I urge Admin 2 work w/ me 2 find alternative ways 2 preserve McKinley's legacy somewhere else in the natl park that once bore his name.” Meanwhile, Rep. Bob Gibbs said, “President Obama has decided to ignore an act of Congress in unilaterally renaming Mount McKinley in order to promote his job-killing war on energy.”

A separate story in [USA Today](#) (9/1, Korte, 5.23M) notes that Ohio Gov. John Kasich said the President “overstepped his bounds.” The [AP](#) (9/1) reports that Kasich, a Republican presidential candidate, said during a campaign stop in Michigan that Ohioans “feel the name is appropriate and there is no reason to change it.”

[Voice of America](#) (8/31, 32K) reported on its website that Boehner “said he was deeply disappointed by the decision to rename the mountain,” saying in a statement, “There is a reason President McKinley's name has served atop the highest peak in North America for more than 100 years, and that is because it is a testament to his great legacy.” However, Interior Secretary Jewell said in a statement that “although the mountain was named after the famous Ohioan, ‘President McKinley never visited, nor did he have any significant historical connection to, the mountain or to Alaska.’”

The [Homer \(AK\) News](#) (8/31, Brooks, 9K) reports that Jewell said, “The name change is official. The mountain is Denali. I've already signed the paperwork. You can cheer if you like; I hope that you do.” Jewell said “she signed the paperwork Aug. 28.”

Noting Boehner's claim that naming the peak after McKinley is “a testament to his great legacy,” the [Washington Post](#) (9/1, McGregor, 6.76M) examines “how monumental” that legacy is. Among “the rankings of American presidents by historians or political scientists,” McKinley “comes out above average, even underrated, but hardly top tier.” In an analysis, the [Christian Science Monitor](#) (8/31, Grier, 455K) said that “McKinley is a forgotten name” to most Americans, and noted that historians “have had a difficult time rating McKinley, in part because he's been overshadowed by the president who came after him: Theodore Roosevelt.”

In his [Washington Post](#) (9/1, Milbank, 6.76M) column, Dana Milbank argues that the President “is perfectly within his authority to make the change.” Milbank suggests the Ohioans criticizing the move “rename something of their own — say, Cincinnati or Columbus — after McKinley,” but adds that it is more likely that “the mountain will be added to other molehills of Obama overreach: Obamacare, the stimulus, Dodd Frank, the IRS, immigration, executive appointments and on and on,” about which the “common objection...is less about what was done than who did it.”

Additional coverage of the re-designation of Alaska's Mount McKinley as Denali was provided by the [Washington Post](#) (9/1, Kirkpatrick, 6.76M), [Newsweek](#) (9/1, 198K), [NBC News](#) (8/31, 3.73M), [USA Today](#) (9/1, Korte, 5.23M), the [Greenwire](#) (8/31, Subscription Publication), [Slate](#) (8/31, Gross, 1.38M), [BBC News](#) (9/1, 1.68M), the [UPI](#) (8/31), [Politico](#) (9/1, Evers, 942K), [The Hill](#) (8/31, Byrnes, 471K), [Quartz](#) (8/31, 429K), and the [Weather Channel](#) (9/1, 14.41M).

Additional coverage was provided by the [Juneau \(AK\) Empire](#) (8/31, Brooks, 15K), [KTUU-TV Anchorage \(AK\)](#) Anchorage, AK (8/31, 128K), [The Hill](#) (8/31, Cama, 471K), [Politico](#) (9/1, Evers, 942K), [Reuters](#) (9/1, Rampton), the [Toronto \(CAN\) Sun](#) (8/31, Lederman, 84K), [US News & World Report](#) (8/31, Thiessen, 811K), the [Washington \(DC\) Post](#) (9/1, Mooney, 6.76M), the [Washington \(DC\) Post](#) (9/1, Kirkpatrick, 6.76M), [Roll Call](#) (8/31, Lesniewski, 113K), [ABC News](#) (9/1, 3.97M), [Anniston \(AL\) Star](#) (9/1, 59K), [Yahoo! News](#) (9/1, Staff, 5 98M), [WBUR-FM Boston \(MA\)](#) Boston (8/31, 113K), [WAMU-FM Washington \(DC\)](#) Washington (9/1, Booker, 30K), [KTNA-FM Talkeetna \(AK\)](#) Talkeetna, AK (8/31, Manning), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (9/1, 1.07M).

Obama To Film Episode Of “Running Wild With Bear Grylls.” [Alaska Dispatch News](#) (8/31, Martinson, 219K) reported that NBC announced Monday that while he is in Alaska, the President “will film an episode of the survivalist show ‘Running Wild With Bear Grylls.’” According to an NBC press release, during the episode, which will tape on Tuesday, the President will “receive a crash course in survival techniques from Bear Grylls.” [USA Today](#) (9/1, Lawler, 5 23M) notes that the President and Grylls “will be trekking through the Alaskan wilderness in an effort to highlight the effects of climate change in that area.” [Bloomberg Politics](#) (9/1, Olorunnipa, 247K) casts the appearance as part of the “unorthodox media” that has become “something of a fascination for Obama,” and [AFP](#) (9/1) says it is “just the latest in a series of White House efforts to reach new audiences.” The [Daily Intelligencer \(NY\)](#) (8/31, Fuller, 460K), [TIME](#) (8/31, Berman, 19.55M), [E! Entertainment](#) (8/31, Harnick, 2 99M), the [New York Daily News](#) (8/31, Edelman, 3.75M), the [Huffington Post](#) (8/31, Lavender, 164K), [Reuters](#) (9/1, Serjeant), and the [Washington Times](#) (9/1, Chasmar, 344K) all run similar reports on the President's appearance on the program.

Documents Show Governors, Activists Helped Push Obama's Climate Agenda. The [Washington Times](#) (9/1, Dinan, Wolfgang, 344K) reports that “newly released emails and other records obtained through Freedom of Information Act requests” reveal that the Administration, “top climate change crusaders and governors from across the country have engaged in a highly coordinated effort to publicly sell the president's green agenda and put private pressure on opponents.” A “striking report from the Energy and Environment Legal Institute's Christopher Horner... sheds new light on the level of cooperation among top White House officials, billionaire and climate change activist Tom Steyer, Virginia Gov. Terry McAuliffe, Kentucky Gov. Steve Beshear and other backers of Mr. Obama's global warming regulations, including restrictions on carbon pollution from power plants.” The report “lays out in detail how environmental activists and public officials coordinated on how best to drum up support for Mr. Obama's climate agenda.”

Study: Rising Water Temperatures In Arctic Fuel Harsh Winters In US, Asia. [Bloomberg News](#) (8/31, Nussbaum, 2.66M) reports that a study published Monday in the journal *Nature Geoscience* says increasing temperatures “in the waters north of Russia and Alaska are changing atmospheric circulation patterns and may play a ‘central role’ in record-breaking winters that have hit East Asia and North America.” Researchers from South Korea and the UK found that “warmer weather in the Kara and Barents seas, north of Russia and Norway, is often followed about 15 days later by severe weather in East Asia,” and warmer temperatures “in the East Siberian and Chuckchi seas, above Russia and Alaska, often occur about five days before cold spells in the US and Canada.”

Anxiety In Alaska Over Obama Administration's Takes On Pipeline. [Bloomberg News](#) (8/31, Gale, 2 66M) reports that on the eve of President Obama's trip to Alaska, officials in Alaska, including the state governor, Bill Walker, have expressed concerns about the drilling limits and declining volumes in the Trans-Alaska Pipeline System. Some

However, while most analysts describe a complete shutdown of the pipeline unlikely, analysts have also noted that forecasts on the pipeline's future are complicated, as it will depend on multiple factors including taxes and the price of oil.

Native Communities Stand By Arctic Drilling In Face Of Climate Change. The [Greenwire](#) (8/31, Subscription Publication) reports that "the prospects of climate change making...severe storms more frequent haven't convinced local leaders to oppose oil drilling in the Arctic." However, "scientists say that as the Earth's climate continues to warm, Native communities on the Arctic Ocean and Bering Strait will experience more frequent devastating storms that could erode their shorelines and force the most vulnerable villages to move to higher ground."

Environmentalists Rally In Anchorage Against Arctic Drilling. The [AP](#) (9/1) reports that a "few hundred people" attended a two-hour rally in Anchorage Monday against oil drilling in the Arctic. Speakers at the rally "warned about the environmental risks involved in Royal Dutch Shell's recently approved Arctic drilling plans at a time when climate change is already wreaking environmental chaos" and "said now is the time pursue solutions, such as canceling Shell's Arctic drilling program."

The [Offshore Engineer](#) (9/1, Sustaita) reports that "Shell disconnected the Noble Discoverer semisubmersible from its anchors in the Chukchi Sea after weather temporary put a halt to its Arctic operations over the weekend." Shell spokesperson Natalie Mazey said, "We made the decision to disconnect the Noble Discoverer from its anchors and weather the storm in the Chukchi Sea using engine power. As safety is paramount to Shell, we will resume operations as soon as it is safe to do so."

Additional coverage of Shell's Arctic drilling plans was provided by the [Argus Media](#) (9/1).

Secretary Jewell Impressed By Young Leaders On Climate Change. In an op-ed for the [Juneau \(AK\) Empire](#) (9/1, Jewell, 15K), Interior Secretary Sally Jewell writes about her experience meeting "some extraordinary young Alaskans who are taking important steps to make a meaningful impact on the future of their communities" at the Conference on Global Leadership in the Arctic. According to Jewell, "their voices and solutions for how to sustain communities, cultures and the environment in a changing Arctic are the reasons why they were selected for the United States Arctic Youth Ambassadors program." She concludes, "when we can excite and encourage youth to serve their communities and serve as an inspiration to the next generation of leaders, as we know these five ambassadors will, then we've invested wisely in our future, and more importantly, in theirs."

Climate Change Blamed For Walrus Haulout. In a piece for the [Chicago Tribune](#) (8/31, Huppke, 2.46M), Rex W. Huppke writes that "the bleeding hearts at the U.S. Fish and Wildlife Service will tell you the sudden illegal immigration of walrus onto sovereign Alaskan soil is a phenomenon called a 'coastal haulout.'" He says that "government scientists, presumably in between drum circles and pot-smoking sessions, blame this potentially devastating ecological development on global warming."

Additional coverage of walrus was provided by [Business Insider](#) (9/1, Brodwin, 2.93M) and [Tech Insider](#) (9/1, Loria).

GROUP URGES OBAMA TO UNILATERALLY CREATE NATIONAL MARINE MONUMENTS. [Alaska Dispatch News](#) (8/31, 219K) reports that "a national conservation group is urging President Barack Obama to enhance his environmental legacy by creating marine national monuments in Alaska for the first time." Public Employees for Environmental Responsibility announced Monday that "more than 100,000 people had signed an online petition requesting that Obama use his executive powers to create marine monuments in Alaska to help protect iconic Alaska animals such as polar bears, bowhead whales and wild salmon."

Gov. LePage Tells Obama To Back Away From National Park Debate. The [Bangor \(ME\) Daily News](#) (8/31, 223K) reports that Gov. Paul LePage has "sent letters to President Barack Obama and Maine's congressional delegation to express opposition to as-yet unreleased proposals that would apply national monument protections to federal land in the Gulf of Maine and land eyed for a national park in the Millinocket area." According to LePage, "the federal government is considering new monument designations under the provisions of the Antiquities Act, which LePage suggests should be reformed." LePage "argued that national monument designations for the two areas would harm Maine's economy by putting some of its natural resources off limits."

Latinos Embrace Conservation. For the "Congress" blog of [The Hill](#) (9/1, Ruano, 471K), Cecilia Ruano, pastor of the Rosa de Saron Asamblea de Dios Church, writes that Latinos "rejoiced" at the passing of the Sawtooth National Recreation Area and Jerry Peak Wilderness Additions Act. Ruano writes that "for Latinos, which account for 12 percent of Idaho's population – the 16th largest Hispanic statewide population in the nation – we couldn't help but to celebrate the new law ensuring that families in Idaho will have access to healthy recreation, more economic opportunities, and clean water and air." She claims that "in contrast to the common myth that Latinos are primarily concerned with immigration policy issues, Latinos have embraced environmental stewardship."

LWCF SET TO EXPIRE. The [Lynchburg \(VA\) News & Advance](#) (8/30, 77K) reports that the Land and Water Conservation Fund is "set to expire Sept. 30, barring an extension from Congress." The article notes that "the LWCF has provided Virginia with approximately \$283 million in investment over the past 50 years, through national lands and state support programs, which include matching grants for planning, acquisition and/or development." However, "political gridlock in Washington, D.C., sets the LWCF reauthorization up for a late-hour extension or rejection growing more common in fiscal debates."

Opinion pieces in the [Wilkes-Barre \(PA\) Citizens' Voice](#) (9/1, 127K), the [Boulder \(CO\) Daily Camera](#) (9/1, 161K), and the [Pocono \(PA\) Record](#) (8/29, Ralph "Bud", Cook, 46K) call for fund's renewal.

Additional coverage was provided by [Indiana Public Media](#) (9/1, 3K), and [WBOI-FM](#) Fort Wayne, IN (9/1).

RAIN, RISING HUMIDITY ASSIST FIREFIGHTERS IN WEST. The [AP](#) (9/1, Nicholas K. Geranios |, Ap, 6.76M) reports that "rain and cooler temperatures Monday helped firefighters battling a series of big blazes in north-central Washington and other states in the West." The article notes that "in Washington, the North Star Complex of wildfires stood at 313 square miles and was about 22 percent contained." Meanwhile, "the Okanogan Complex of wildfires stood at about 30 percent containment on Monday."

FEDERAL AGENCIES URGED TO BOOST CYBERSECURITY MEASURES. [Federal Times](#) (8/31, 117K) reports that after the recent cybersecurity breaches, Federal CIO Tony Scott "launched a high-profile, 30-day 'Cybersecurity Sprint' as a way to apply intense, top-level focus to existing cybersecurity weaknesses across federal agencies and to shore them up as quickly as possible." The article notes that "the ultimate goal of Scott and the Office of Management and Budget is to get all agencies adopting two-factor authentication for at least 75 percent of their workforces." Notably, "the Interior Department went from 0 percent in 2013 to 36 percent in 2014 to 89 percent."

FEDERAL AGENCIES REACH OUT TO MILLENNIALS THROUGH SOCIAL MEDIA. [Federal Times](#) (8/31, 117K) reports that "earlier this month, a report from the Partnership for Public Service—a nonprofit, advocacy group for that works to improve the civil service—noted that the number of federal employees under 30 has dropped to 6.6 percent in 2015, a decade low." And "with OPM estimating that four out of every 10 federal employees will be eligible for retirement in the next five years, getting young blood into the workforce is becoming more of an imperative." The article notes that "alongside efforts to update and improve the user experience on job sites like usajobs.gov, streamlining the HR process and making talent acquisition more data-driven, agencies are looking to their social media pages in hopes of making the civil service more alluring to millennials."

BATTLE OVER PUBLIC LANDS CONTINUES. The [Las Vegas Sun](#) (8/31, 199K) reports that "since the West was settled, private landowners have chafed at the federal government telling them how the lands and the water that runs through it can be used." The article notes that "the tension has fueled frequent and sometimes violent showdowns that include the Sagebrush Rebellions of the 1970s and 1990s, and the recent standoff at the Bundy ranch." According to the article, "it's a never-ending battle that pits a host of competing claims against one another: conservation vs. economic development, humans vs. the animals that have lived on the land for centuries, the rights of private citizens vs. the public good."

ADDITIONAL COVERAGE DUWAMISH TRIBE CHAIR CONFRONTS SECRETARY JEWELL IN SEATTLE. Additional coverage of Duwamish Tribe chair Cecile Hansen's encounter with Interior Secretary Sally Jewell in Seattle was provided by the [West Seattle Blog](#) (9/1, 2K) and the [Seattle Stranger](#) (8/31, 290K).

ADDITIONAL COVERAGE DETROIT'S LAFAYETTE PARK DESIGNATED A NATIONAL HISTORIC LANDMARK. Additional coverage of the designation of Detroit's Lafayette Park as a National Historic Landmark was provided by [Newsweek](#) (9/1, 198K).

SEN. FEINSTEIN URGED TO FIND SUPPORT FOR DESERT PROTECTION ACT IN CONGRESS. In an editorial, the [Palm Springs \(CA\) Desert Sun](#) (8/31, 99K) opposes the effort by Sen. Dianne Feinstein to create new national monuments in the California desert under the 1906 Antiquities Act. Rather, the paper urges Feinstein to "keep working the halls of Capitol Hill to push this desert legislation." The paper argues that "congressional gridlock must not become an excuse for presidential action on every issue." It concludes that "this expansion of the Desert Protection Act can and should win the day in Congress on its own merits."

Empowering Native American Communities:

CENTER FOR NATIVE AMERICAN YOUTH RELEASES RESOURCES MAP. The [Indian Country Today Media Network](#) (8/31, 32K) reports that "last week, the Washington D.C. based Center for Native American Youth (CNAY) announced their release of a comprehensive map of resources as part of the Obama administration's Generation Indigenous or GEN-I initiative." The center's "map, which is available online, includes a list of nationwide programs, services and Native Youth contacts in support of the Obama Administration's GEN-I initiative to improve the lives of Native Youth in Indian Country."

ADDITIONAL COVERAGE BIA NEARS DECISION ON MASHPEE WAMPANOAG TRIBAL CASINO. Additional coverage of the Mashpee Wampanoag tribal casino was provided by the [Cape Cod \(MA\) Day](#) (8/31).

Tackling America's Water Challenges:

BOR AWARDS CONTRACT FOR ELECTRICAL WORK AT ANDERSON RANCH FIELD STATION. The [Twin Falls \(ID\) Times-News](#) (9/1, 75K) reports that the BOR "awarded a \$1.6 million construction contract Aug. 3 to Burke Electric LLC, a small business based in Bellevue, Wash., to replace critical electrical infrastructure used to operate the Anderson Ranch Field Station." BOR Commissioner Estevan Lopez said, "A number of people depend upon Anderson Ranch Dam for agricultural and residential irrigation, recreation and clean hydropower so it is important that the facility operates efficiently and safely. When it is complete, this work will significantly improve the long-term dependability of the facility."

LAKE MEAD GETS BOOST FROM PRESERVATION PROGRAM. The [Indian Country Today Media Network](#) (8/31, 32K) reports that "a drought now in its 16th year (one of the worst droughts in the past 1,200 years, according to the director of the Reclamation Bureau's Lower Colorado River region), the impacts of continuing climate change, and an increase in demand by a growing population base (already 40 million people) all contribute to the lowering of storage supplies in Lake Mead, which is formed by the river and the Hoover Dam." According to the article, "a project known as the Pilot System Conservation Agreement is underway to stem the continuing loss of water in Lake Mead—at 110 miles long, the largest reservoir on the river." Called the Leave It in the Lake program, "it's an \$11 million collaboration between the Bureau of Reclamation, the federal agency that manages the large dams, and big urban water suppliers like the Central Arizona Project (CAP)."

Meanwhile, [Arizona State University Cronkite News](#) (8/31) reports that "unusually high rainfall in the Colorado River basin this spring helped boost Lake Mead water levels, averting a possible water emergency that would have triggered cuts in water allocations next year." The BOR "earlier this month reported that there would not be an emergency declaration."

BOR SETS NEW DATE FOR BERRYESSA RESORT BIDS. The [Napa Valley \(CA\) Register](#) (9/1, 37K) reports that the BOR will "face a moment of truth on Sept. 15 over its planned rejuvenation of Lake Berryessa as a major regional draw for boaters and others who enjoy water recreation." The agency will "stop taking bids at 4 p.m. that day to operate five resorts along the eastern Napa County reservoir's 165-mile-long shoreline." The original deadline had been Aug. 31.

BOR TO REDUCE FLOWS OUT OF FOLSOM LAKE. The [Sacramento \(CA\) Bee](#) (9/1, 535K) reports that the BOR will "cut flows out of Folsom Lake in half by the end of the week as water levels at the reservoir near historic lows."

LAS CRUCES WATER TRIAL KICKS OFF. The [Las Cruces \(NM\) Sun-News](#) (9/1, 47K) reports that "a water trial that kicked off Monday afternoon in Las Cruces is expected to delve into more than a century of Doña Ana County's Rio Grande irrigation history before it winds down in two weeks." The article notes that "the trial, part of a massive water lawsuit ongoing for decades, will determine what's known as the 'priority date' for the federal government's involvement in river water irrigation in south-central New Mexico."

ADDITIONAL COVERAGE COURT MAINTAINS RIVER FLOWS FOR NORTHERN CALIFORNIA SALMON. Additional coverage that "a federal judge last week decided to maintain a key flow program aimed at boosting flows in the Trinity River" was provided by the [Summit County \(CO\) Citizens Voice](#) (8/31, 506).

Securing America's Energy Future:

Renewable Energy:

STUDY SUGGESTS HOW TO REDUCE IMPACT OF RENEWABLE ENERGY PROJECTS ON WILDLIFE. The [Washington Post](#) (9/1, Warrick, 6.76M) reports that, in a study published in PLOS ONE, researchers Brad Fedy and Jason Tack examined data on wind patterns and known golden eagle nesting sites in Wyoming and then "successfully identified 'sweet spots,' places far removed from nesting grounds but directly in the path of prevailing winds." Fedy, a professor of environmental studies at the University of Waterloo in Ontario, said their findings demonstrate "that it's possible to guide development of sustainable energy projects, while having the least impact on wildlife populations."

BOEM TO HOLD NEW JERSEY OFFSHORE WIND LEASE SALES THIS FALL. The [Recharge News](#) (9/1, 633) reports that the BOEM "this fall will hold a competitive sale of two lease areas off the coast of New Jersey that if fully developed, may be able to support up to 3.4GW of commercial wind generation."

Onshore Energy Development:

APPEALS COURT REVIVES GREEN GROUPS' CHALLENGE TO BLM LEASES IN MONTANA. The [Greenwire](#) (8/31, Subscription Publication) reports that a federal appeals court on Monday "breathed new life into a bid by environmental groups to force the Interior Department to consider the climate impacts of oil and gas leases in Montana." The San Francisco-based 9th U.S. Circuit Court of Appeals "threw out a lower court ruling that dismissed the claims from Montana Environmental Information Center, WildEarth Guardians and others." At question is the BLM's "environmental assessment of 100 oil and gas leases for about 50,000 acres in Montana." The environmental groups claim that "under the National Environmental Policy Act, that review should have included an analysis of the climate change effects of releases of methane – a potent greenhouse gas – at oil and gas wells and possible harm to other natural resources."

COURT RULES AGAINST ENVIRONMENTAL GROUPS' CHALLENGE TO COAL LEASING. The [Courthouse News](#) (8/31, 7K) reports that the Interior Department "need not reassess how leasing the rights to mine federally owned coal will affect the environment, a federal judge ruled." Western Organization of Resource Councils had "sought such relief in a 2014 lawsuit brought with Friends of the Earth." The groups argued that "new research on the causes of global warming should force reconsideration of the government's policy for giving companies the rights to mine coal." U.S. District Judge Reggie Walton held Thursday, however, "that new research is not enough to force the government to reconsider the impact of the mining rights it hands out, and that the government's program remains in line with the environmental impact statement prepared in 1979."

REPORT ANALYZES COSTS OF FOSSIL FUELS, HARDROCK MINING. The [Denver Westword](#) (9/1, 232K) reports that a new report by Center for Western Priorities and the Center for American Progress, Fair Share Scorecard, "looks specifically at the costs associated with drilling and mining on public lands and what kind of return American taxpayers are getting for the exploitation of public resources." According to the article, "the report finds that hardrock mining is the worst deal of all." Interior Secretary Sally Jewell has "pledged far-reaching reforms in the way the government handles energy leases and royalty collection (a massive headache and source of scandal for many previous Interior chiefs, including Ken Salazar)." However, "the scorecard suggests we still have a long way to go."

CLEAN POWER PLAN ISN'T DEATHBLOW FOR COAL. The [High Country \(CO\) News](#) (9/1, 74K) reports that "the Clean Power Plan sets carbon-reduction targets for 2030, for states and tribes with power plants," and "nationwide, the plan is expected to yield a 32 percent cut in emissions from 2005 levels." The article notes that "from an environmental perspective, this is momentous," but Wyoming, "which mines 40 percent of the nation's coal and claims 23,000 coal-related jobs, sees the plan as an existential threat." According to the article, "the plan isn't a certain deathblow for the West's oldest facilities," partly because "a number of those units are already slated for closure, either to comply with federal regulations to clear haze from national parks and wilderness areas, or to meet states' carbon goals."

ADDITIONAL COVERAGE OF BLM'S LISTENING SESSIONS ON COAL PROGRAM. Additional coverage of the BLM's public listening sessions on the federal coal program was provided by [WBUR-FM](#) Boston (8/31, 113K).

Offshore Energy Development:

BOEM HOLDING PUBLIC MEETING IN GULF STATES ON UPCOMING OIL LEASE SALE. [WDAM-TV](#) Hattiesburg, MS (9/1, 67K) reports that "the U.S. government is holding public meetings this week in Mississippi as well as Alabama and Louisiana as authorities are working on a supplemental environmental impact statement for an oil lease sale, which is tentatively planned for 2017."

Additional coverage was provided by [WTOK-TV Meridian \(MS\)](#) Meridian, MS (9/1, 900), [WBRC-TV Birmingham \(AL\)](#) Birmingham, AL (9/1, 90K), and [WDAM-TV Hattiesburg \(MS\)](#) Hattiesburg, MS (9/1, 67K).

FEDERAL AGENCIES BEGIN HISTORIC WWI SHIPWRECK SURVEY. The [Marine Link](#) (9/1, 1K) reports that "partnering U.S. agencies have commenced surveying the historic shipwreck of an American lightship shelled and sunk by a German U-boat during World War I nearly 100 years ago." According to the article, "teams from the National Oceanic and Atmospheric Administration's (NOAA) Monitor National Marine Sanctuary, in partnership with the U.S. Coast Guard (USCG) and the Bureau of Ocean Energy Management (BOEM), on Sunday, August 30, began a survey of the historic wreck of Diamond Shoal Lightship No. 71, the only American lightship to be sunk by enemy action during World War I." The article notes that "the archaeological survey expedition off the coast of Beaufort, N.C., will document the wreck site, which was added to the National Register of Historic Places this month."

America's Great Outdoors:

Bureau of Land Management:

STEINLE FAMILY TO FILE CLAIMS RELATED TO DEATH. The [San Jose \(CA\) Mercury News](#) (8/31, 626K) reports that Kate Steinle's father "plans to file a claim Tuesday against San Francisco Sheriff Ross Mirkarimi, the Bureau of Land Management and Immigration and Customs Enforcement to hold them accountable for" her death. The Steinle family "will hold a news conference on the steps of San Francisco City Hall at 11 a.m. Tuesday along with their attorneys to announce the filing."

[KGO-TV](#) San Francisco (9/1, 4K) reports on its website that the "embattled" Mirkarimi "has not changed his position with ICE one bit."

The [San Francisco Chronicle](#) (9/1, Subscription Publication, 3.35M) and the [Bay City \(CA\) News](#) (9/1), and the [KPIX-TV](#) San Francisco (8/31, 116K) website also report this story.

FEDERAL AGENCIES POLICING BURNING MAN. The [Daily Mail \(UK\)](#) (9/1, 5 59M) reports that "when it comes to Burning Man, US Forest Service rangers and Bureau of Land Management officials will be shouldering policing duties for the duration of the art festival, with some help from a couple dozen volunteers." On Sunday, "the first Burning Man law enforcement officials arrived at the main campsite situated in a five-mile stretch of the Nevada desert known as the 'playa.'"

ACTIVISTS SEEKS TO BLOCK BLM FROM ROUNDING UP WILD HORSES. [KATU-TV](#) Portland, OR (9/1, 134K) reports that "a group of activists hoping to stop the federal government from rounding up wild horses staged a 'sit-in' at Gov. Kate Brown's office Monday." The group called on Brown "to protect mustangs in the Kiger and Riddell horse management areas from being rounded up by the Bureau of Land Management near Burns."

BLM'S DRAFT AREA MANAGEMENT PLANS FOR RED CLIFFS NATIONAL CONSERVATION AREA CRITICIZED. The [St. George \(UT\) News](#) (8/31, 3K) reports that "a draft management plan issued by the Bureau of Land Management-Utah for the Red Cliffs National Conservation Area has county officials frustrated and at odds with conservationists over a proposed northern transportation corridor through desert tortoise habitat." According to the article, "the regional transportation authority for Washington County, Dixie Metropolitan Planning Organization, has proposed a northern corridor that would run through the Red Cliffs National Conservation Area from Interstate 15 at Washington Parkway to Red Hills Parkway east of its new intersection with state Route 18 (above Bluff Street)." County officials say "they have been planning for the northern corridor for decades, but the BLM's recently released draft management plan states a much higher impact on the Red Cliffs conservation area than MPO planners believe is accurate."

ADDITIONAL COVERAGE BLM SHUTS DOWN CEMEX MINE IN SANTA CLARITA. Additional coverage of the shut down of the Cemex mine in Santa Clarita was provided by the [Santa Clarita Valley \(CA\) News](#) (8/31, 431) and [KHTS-AM Santa Clarita \(CA\)](#) Santa Clarita, CA (9/1, 2K).

BLM'S LAND USE PLAN TO SAVE SAGE GROUSE CRITICIZED. In an op-ed for the [Missoulian \(MT\)](#) (9/1, 116K), Devon Coquillard, the communications and public outreach manager for the American Exploration & Mining Association, criticizes the Interior Department's "latest land use plan amendments for 11 western states" that were "drafted with the intent of saving an already flourishing sage grouse population." According to Coquillard, "to the surprise of the West and its governors, and in violation of federal law, the Bureau of Land Management land use plan amendments unilaterally rejected the efforts of the states." Coquillard claims that "DOI has delivered one of the largest federal land grabs in the history of the U.S., in the shortest order and with the least deference to the leadership and residents of Montana who depend and recreate on these lands."

Fish and Wildlife Service:

WESTERN STATES HOPE TO AVERT POSSIBLE SAGE GROUSE PROTECTIONS. [NPR](#) (9/1, 1.85M) reports that the FWS has "been tasked with determining whether or not the greater sage grouse needs protections under the Endangered Species Act by the end of the month, a deadline that's led to hand-wringing across the West." According to the article, "the shared hope is that by putting sufficient protections in place for the greater sage grouse, the U.S. Fish and Wildlife Service won't list the bird as endangered."

CONTINUING COVERAGE OF WILDLIFE TRAFFICKING. The [Minneapolis Star Tribune](#) (8/30, 1.19M) reports that "even though Walter Palmer's trophy of Cecil the lion reportedly stayed in Zimbabwe, the Minnesota dentist's hunting saga is focusing the world's attention on the global flow of wildlife." The article notes that "the more than 700 African lions killed for sport and shipped as hunting trophies to the United States last year are a drop in a vast pipeline of imperiled wildlife stamped and cleared for import every year, according to a Star Tribune analysis of U.S. Fish and Wildlife Service data."

FWS PROPOSES TO DELIST KENTUCKY WILDFLOWER. The [Lexington \(KY\) Herald-Leader](#) (8/31, 251K) reports that "Eastern Kentucky's white-haired goldenrod shows the possibility of recovery." The wildflower has "been listed as threatened for more than 25 years, but efforts to protect it have worked so well that the U.S. Fish and Wildlife Service proposed Monday that it be taken off the list of species in danger of extinction." According to Tom MacKenzie, a spokesman for FWS, "the flower would be the 31st species overall taken off the list of threatened and endangered species based on their recovery."

Additional coverage was provided by the [AP](#) (9/1, Subscription Publication, 3.35M) and the [AmmoLand](#) (9/1, 6K).

"POLLINATOR PLEDGE" KICKS OFF IN ST CROIX RIVER WATERSHED. To The [Minneapolis Star Tribune](#) (9/1, Giles, 1.19M) reports that "three federal agencies, two large Minnesota corporations, thousands of Rotarians, dozens of conservation groups and U.S. Rep. Betty McCollum announced their support Monday for a major initiative to save pollinators in the St. Croix River valley." The "Pollinator Pledge" seeks "to restore habitat for monarch butterflies, bees and other pollinators in the sprawling St. Croix watershed." However, the article notes, "the pledge announced Monday doesn't include opposition to pesticides, including a class known as neonicotinoids that many conservationists blame for the global decline of honeybees and other insects."

Additional coverage was provided by the [St. Paul \(MN\) Pioneer Press](#) (9/1, 447K).

JUDGE FURTHER DELAYS HEBGEN LAKE TIMBER SALE. The [AP](#) (9/1, Subscription Publication, 3 35M) reports that "a federal judge has decided to continue delaying the sale of timber on up to four square miles of National Forest Service land along Hebgen Lake, ruling against two federal agencies that asked for the injunction to be thrown out." Alliance for the Wild Rockies and Native Ecosystems Council filed a lawsuit "in 2013 to stop the logging plans, saying the sale poses a threat to grizzly bears and Canadian Lynx." The judge held Monday that the Forest Service and FWS "did not do enough to determine the projects impact on wildlife."

SETTLEMENT REACHED ON PROPOSED GRIZZLY BEAR PROTECTION. The [AP](#) (9/1, 2 28M) reports that "the state Land Board on Monday approved a proposed lawsuit settlement between Montana and three conservation groups that would protect grizzly bears while still allowing logging in two state forests west of Glacier National Park." The agreement would "create restrictions designed to minimize disturbances to grizzly bears in seven 'security zones' totaling 34 square miles within the Stillwater and Coal Creek state forests."

Additional coverage was provided by the [Flathead \(MT\) Beacon](#) (8/31, 15K) and the [Helena \(MT\) Independent Record](#) (9/1, 39K).

MAN PLEADS NOT GUILTY TO CUTTING TREES FROM RED ROCK LAKES NATIONAL WILDLIFE REFUGE. The [AP](#) (9/1, 2 28M) reports that "a man accused of illegally cutting down 52 Douglas fir trees from the Red Rock Lakes National Wildlife Refuge in southwest Montana has pleaded not guilty to theft of government property." The article notes that "the trees were valued at nearly \$18,000 and that 64-year-old Bob Young is accused of cutting them from July 2012 until at least 2014."

National Park Service:

WORK ON PART OF LINCOLN MEMORIAL REFLECTING POOL TO BEGIN. The [AP](#) (9/1, 2.28M) reports that the NPS says "a small part of the Lincoln Memorial Reflecting Pool will be drained for reconstruction of the basin." The project, "set to begin on Sept. 8, will affect about 30 feet of the pool." The work will "repair damage caused by work at the World War II Memorial in 2013."

Additional coverage was provided by [WRC-TV Washington \(DC\)](#) Washington (9/1, 345K).

EVERGLADES NATIONAL PARK RELEASES MANAGEMENT PLAN. The [National Parks Traveler](#) (9/1, 989) reports that "after 13 years of meetings, discussion, and debate, Everglades National Park officials have released a general management plan to guide the park for the next 20 or so years." But "whether the park will receive the funding necessary to fully implement the plan is another matter." According to the article, "if the plan gains final approval following a 30-day 'no-action' period, and Everglades can get the funding to fully implement this management plan, the first since one was crafted back in 1979."

SMOKIES APPEALING TO VISITORS NOT TO LEAVE MARK. The [AP](#) (9/1, 2.28M) reports that "officials at Great Smoky Mountains National Park are asking visitors to refrain from leaving their mark on the park." According to rangers, "graffiti detracts from the park's natural beauty and in some cases can permanently damage resources that can't be

replaced, such as log structures made from historic wood." The article notes that "park rangers and volunteers educate visitors about the results of defacing park resources through education programs, signs and a graffiti-removal program."

Additional coverage was provided by the [Knoxville \(TN\) News Sentinel](#) (9/1, 235K).

NPS TO RECONSTRUCT CENTER FIELD AT HUNT CAMP. The [Twin Falls \(ID\) Times-News](#) (9/1, 75K) reports that "the NPS plans to reconstruct center field at the internment camp known locally as the 'Hunt Camp.'" The agency "hopes to start building in the spring but first needs help from the public to learn what the field looked like."

WOMAN DIED IN NATIONAL PARK FROM HYPOTHERMIA, OVERDOSE. The [Knoxville \(TN\) News Sentinel](#) (9/1, 235K) reports that "a North Carolina woman known for her nature blogging on the Great Smoky Mountains National Park whose body was found in June in a creek died from hypothermia and an apparent 'intentional' overdose of Benadryl, authorities said Monday."

ADDITIONAL COVERAGE NPS PROPOSES CHANGES IN DELAWARE WATER GAP NATIONAL RECREATION AREA. Additional coverage of the "proposed changes for the Delaware Water Gap National Recreation Area" was provided by the [Allentown \(PA\) Morning Call](#) (8/28, 362K).

US Geological Survey:

USGS' OVERSIGHT OF RESEARCH ON NATIONAL FAUNA, FLORA RAISES CONTROVERSY. The [Greenwire](#) (8/31, Subscription Publication) reports that the "dead mammals, birds, amphibians and reptiles" at the Smithsonian Institution's National Museum of Natural History are curated by the USGS. The survey is "commonly associated with rocks and maps, but nearly two decades ago, the federal research agency took on the job of studying the nation's fauna and flora." According to the article, "that has created controversy among government workers who believe USGS isn't adequately preserving and protecting critical research."

Top National News:

STATE DEPARTMENT RELEASES LARGEST CLINTON EMAIL SET SO FAR, WITH 150 REDACTIONS. The State Department released [roughly 7 000 pages](#) of email messages from then-Secretary of State Hillary Clinton's private server late Monday. Before the release took place, [NBC Nightly News](#) (8/31, story 3, 0:20, Holt, 7 86M) briefly reported that State said "150 more emails" from the server had been found to contain information that was later classified. On [ABC World News](#) (8/31, story 7, 1:40, Muir, 5.84M), Jonathan Karl said that while none of the 150 emails were marked classified at the time they were sent, "it's more evidence that classified information may have been mishandled."

The [CBS Evening News](#) (8/31, story 8, 1 55, Pelley, 5.08M) reported that "the information now judged to be confidential will be censored retroactively." [Fox News' Special Report](#) (8/31, Baier, 1.53M) showed footage of a reporter asking State Department spokesman Mark Toner whether he can "say categorically that Secretary Clinton followed the rules and the law." Toner responded, "I'm just not going to answer that question."

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinintelligence.com.

DATE WEDNESDAY, AUGUST 26, 2015 7 00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS

- + Federal Government Seeks Input On Coal Leasing Program.
- + Bipartisan Comprehensive Wildfire Bill To Be Unveiled.
- + Deadline To Renew LWCF Looms.
- + Utah Public Lands Plan Proposed.
- + Groups Push For New Federal Mining Rules.
- + Obama Administration Officials Deal With Cheating Site Fallout.
- + Re-Elected AFGE President Has "Fights On His Hands."
- + Continuing Coverage Of Controversy Over Washington Football Team's Name.
- + Additional Coverage Of Secretary Jewell's Visit To Upper Mississippi River National Fish And Wildlife Refuge.
- + Additional Coverage: Interior Revamps Website.
- + Additional Coverage: Gov Sandoval Talks With President Obama About Greater Sage Grouse.

EMPOWERING NATIVE AMERICAN COMMUNITIES

- + BIA Director To Visit Osage Nation In September.
- + BIA Clears Washington Tribes' Land Lease Rules Under HEARTH Act.
- + Officials Celebrate Lease Extension At Four Corners Power Plant.
- + Florida, Seminole Tribe Head To Mediation Over Casino Agreement.
- + Alaska Files Challenge To Federal Land Trust For Alaska Native Tribes.
- + BIA's Decision On Mashpee Wampanoag Tribal Casino Imminent.
- + Spirit Lake Tribe Declares A State Of Emergency.

OFFICE OF INSULAR AFFAIRS

- + Funding Announced To Eliminate Brown Tree Snakes.

TACKLING AMERICA'S WATER CHALLENGES

- + Water Districts Challenge Klamath Diversions.
- + 9th Circuit Rules BOR Did Not Need Discharge Permit For Klamath Drain.
- + Salem Canal Breach Blamed On Gophers.

SECURING AMERICA'S ENERGY FUTURE

Renewable Energy:

- + Additional Coverage: Interior Clears Blythe Mesa Solar Project.

Onshore Energy Development:

- + Environmentalists Praise BLM Master Leasing Plan For Moab.
- + Coal Communities Contest For Abandoned Mine Lands Reclamation Funds.
- + Fossil Fuel Group Wants Beetle Delisting.
- + Earthquake Registering 3.5 Magnitude Hits Payne County.
- + Opposition To Colorado Coal Mine Criticized.

Offshore Energy Development:

- + IG Of Louisiana Parish Wants Full Transparency In Spending Of BP Settlement Money.
- + Former Admiral: Administration Must Seize Leadership Role In Arctic.
- + Offshore Drilling Criticized.

AMERICA'S GREAT OUTDOORS

Bureau of Land Management:

- + BLM Director Kornze To Discusses Soda Fire Rehabilitation In Boise.
- + Prosecutors Want Jail Time For Official Convicted In ATV Protest Ride.
- + Mining Group Claims BLM Restrictions Unneeded For Sage Grouse.
- + BLM Responds To Resource Management Plan Concerns.
- + Study Of Boise Foothills Trails Receives Funding.
- + BLM Rangers Step Up Monitoring Of Bastendorff Beach Illegal Camping.
- + BLM Crew Cleans Up Illegal Dumpsites.
- + Health Department Warns Grand County Residents Of Infectious Disease In Nearby Colorado.
- + Additional Coverage: Judge Says Use Of Motorized Vehicles For Juniper Removal In Wilderness Is Prohibited.

Fish and Wildlife Service:

- + FWS Opening More Areas To Fishing, Hunting.
- + FWS Seeks Public Input On Species Prior To Influential Gathering Of 181 Nations.
- + Barrier Island Added To Cape Romain National Wildlife Refuge.
- + Arizona Lawmakers Seek Mexican Wolf Delisting.
- + FWS Pulls Discovery Center Staffing, Support.
- + Three Species Of Endangered Mussels Bolstered In Big South Fork.

- + Tests Turn Up No Sign Of Asian Carp In Fox, Milwaukee Rivers.
- + Biologists Questions Gator Hunts.

National Park Service:

- + NPS Celebrates 99th Birthday.
- + New Head Of Visitor, Resource Protection Programs Announced.
- + Gov. McAuliffe Hands Over Fort Monroe Land To NPS.
- + Man Gets Two Years In Prison After Assault At National Park.
- + Two Bears Who Caused Trouble At Grand Teton Now Call Dakota Zoo Home.
- + NIPSCO Announces Preservation Projects In Northwest Indiana.

US Geological Survey:

- + USGS Study Finds Mercury In Grand Canyon.

TOP NATIONAL NEWS

- + Obama's "Crazies" Comment Draws Opponents' Fire.
- + Chinese Market Continues To Crash, Sending Global Stocks Lower.
- + CSMonitor Analysis: New Orleans Emerges As "America's 'Lazarus City'" 10 Years After Katrina.

EDITORIAL WRAP-UP

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

BIG PICTURE

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE

- + Today's Events In Washington.

LAST LAUGHS

- + Late Night Political Humor.

DOI in the News:

FEDERAL GOVERNMENT SEEKS INPUT ON COAL LEASING PROGRAM. In an op-ed for the [Farmington \(NM\) Daily Times](#) (8/26, 44K), Sally Jewell, the Secretary of the U.S. Department of the Interior, and Shaun Donovan, the Director of the U.S. Office of Management and Budget, writes that the federal government has "hosted five listening sessions around the country – including one this week in Farmington, with Bureau of Land Management Director Neil Kornze — to learn how we can improve the leasing and revenue collection processes to better ensure we are meeting our mandated responsibilities." They write that they want "to hear from everyone as we look at the full range of policy options to improve how best to manage the coal resources on public lands that belong to all Americans." Jewell and Donovan assert that "efforts are squarely focused on responsibly managing the nation's energy resources, protecting taxpayer interests and getting a fair return to our citizens when public assets are sold."

Additional coverage that the Interior Department is reviewing its coal lease program was provided by the [AP](#) (8/26, Brown).

BIPARTISAN COMPREHENSIVE WILDFIRE BILL TO BE UNVEILED. The [Greenwire](#) (8/25, Subscription Publication) reports that Sen. Maria Cantwell announced Tuesday "she plans to unveil portions of a bipartisan comprehensive wildfire bill during a committee field hearing Thursday on wildland fires that have scorched her home state this summer." Cantwell, the ranking member of the Senate Energy and Natural Resources Committee, will be joined at the hearing in Seattle by Sen. John Barrasso, who chairs the Subcommittee on Public Lands, Forests and Mining. According to the article, "Cantwell and other senators have been working on a comprehensive wildfire bill for more than a year, and the hearing comes as Washington and other states in the West are facing a catastrophic wildfire season that so far has burned more than 7 million acres."

Meanwhile, the [ClimateWire](#) (8/25, Subscription Publication) reports that "wildfires in Washington have grown so severe that the state called on its citizens to join local and foreign firefighters and military personnel in the fight against the blazes and was immediately swamped by eager – if inexperienced – volunteers." The article notes that "almost 7.5 million acres have burned in the country so far, according to the National Interagency Fire Center in Boise, Idaho, more than any other comparative season in the last decade." As of Tuesday, "around 72 large fires are burning on 1.6 million acres across the country, mostly in the Northern Rockies and the Pacific Northwest."

Additional coverage of wildfires was provided by [NPR](#) (8/26, 1.85M), the [Denver \(CO\) Post](#) (8/26, Press, 787K), the [Houston \(TX\) Chronicle](#) (8/26, 2.28M), the [Casper \(WY\) Star-Tribune](#) (8/26, 115K), the [Denver \(CO\) Post](#) (8/26, Nicholson, 787K), [The East Oregonian](#) (8/25, 24K), the [Idaho Press Tribune](#) (8/26, 6K), [Discovery Channel](#) (8/26, 767K), and [KIVI-TV Boise \(ID\)](#), Boise, D (8/26, 861).

DEADLINE TO RENEW LWCF LOOMS. [USA Today](#) (8/25, Theobald, 5.23M) reports that "conservation advocates are worried the looming expiration of a fund for buying park and forest land and funding local recreation projects may get lost in the shuffle when Congress returns after Labor Day with a full agenda." The Land and Water Conservation Fund, "which expires Sept. 30, has been the primary source of money for acquiring land by the National Park Service, the Forest Service, the Fish and Wildlife Service and the Bureau of Land Management."

The [Missoulian \(MT\)](#) (8/26, 116K) reports that on Monday, "some politicians and heavyweight conservationists gathered in McCormick Park to stress the urgency" of renewing the LWCF. A crowd of about 50 gathered at Missoula's "Rally in the Park" for the fund, and they heard from Sen. Jon Tester, Missoula mayor John Engen and Charles Robison, state director for Sen. Steve Daines. According to the article, "they talked of the value of public lands to families and communities, to the business climate, to hunters and fishermen, and even to agricultural industries."

Additional coverage of the LWCF was provided by the [Tri-City Herald \(WA\)](#) (8/26, 100K), the [Arizona Republic](#) (8/25, 1.12M), [New Hampshire Public Radio](#) (8/26, 2K), the [Fort Collins \(CO\) Coloradoan](#) (8/25, 59K), and [KTVX-TV](#) Salt Lake City (8/26, 15K).

UTAH PUBLIC LANDS PLAN PROPOSED. The [AP](#) (8/26, 2.28M) reports that "a public lands proposal set to be unveiled next month would promote Utah's reputation as a mecca for dinosaur fossils by elevating Dinosaur National Monument to a national park and by creating a new 'Jurassic National Monument' in central Utah." According to Rep. Jason Chaffetz, "the ambitious, sweeping plan that has been in the works for years would also add protections for about 4 million acres of land in eastern Utah in exchange for freeing up about 365,000 acres land for oil and gas development in the same part of the state." Chaffetz said "the numbers and designations are all preliminary and could change, something echoed by Tuesday by a spokesman for Rep. Rob Bishop, who has spearheaded the proposal."

Additional coverage was provided by the [Washington \(DC\) Times](#) (8/26, Price, 344K) and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (8/26, 1 07M).

GROUPS PUSH FOR NEW FEDERAL MINING RULES. [The Hill](#) (8/26, Henry, 471K) reports that "a coalition of environmental groups and Native American tribes is asking officials to overhaul federal mining standards ahead of new uranium mining near the Grand Canyon." The groups, "a collection that includes local tribes and conservation organizations like the Grand Canyon Trust, petitioned four agency heads on Tuesday asking for changes to rules governing mining on federal lands." The petition "comes months after a federal judge cleared an energy company to begin mining for uranium near the Grand Canyon in Arizona years after the company abandoned its original mining plans there." According to the article, "new standards are especially necessary, the groups argued, in light of this month's toxic waste spill triggered by a clean-up crew at an abandoned mine in Colorado."

Additional coverage was provided by the [Arizona State University Cronkite News](#) (8/25), the [Idaho Statesman](#) (8/25, 190K), the [Durango \(CO\) Herald](#) (8/25, 28K), the [Farmington \(NM\) Daily Times](#) (8/26, 44K), and the [Denver \(CO\) Post](#) (8/26, Coyle, 787K).

Smith Criticizes EPA For Missing Deadline On Turning Over Gold King Mine Spill Documents. The [Washington Times](#) (8/26, Richardson, 344K) reports House Science, Space, and Technology Chairman Lamar Smith rebuked the EPA Tuesday for failing to meet his deadline "to turn over most of the documents requested" by the committee related to the Gold King Mine spill in Colorado. EPA spokeswoman Melissa Harrison said the agency is trying to keep up with a large number of requests for documents related to the response and will get the requested documents to the committee as soon as possible.

OBAMA ADMINISTRATION OFFICIALS DEAL WITH CHEATING SITE FALLOUT. The [Greenwire](#) (8/25, Subscription Publication) reports that Obama Administration "officials are grappling with how to handle federal employees who have been using Ashley Madison, an online forum for cheating spouses with the motto: 'Life is short. Have an affair.'" According to the article, "employees at energy and environmental agencies including the Interior Department, the Federal Energy Regulatory Commission and the Tennessee Valley Authority are among those who used government email addresses when paying to access the site." The article notes that "leaked data and reports revealing that federal workers accessed the site with their work emails or while on the job have spurred government agencies to investigate and could trigger beefed-up scrutiny from Capitol Hill, where badly behaving workers have become popular targets."

RE-ELECTED AFGE PRESIDENT HAS "FIGHTS ON HIS HANDS." The [Washington Post](#) (8/26, Davidson, 6.76M) "Federal Eye" reports that American Federation of Government Employees President J. David Cox Sr. is starting his second term "with fights on his hands" against Republican efforts "to hit federal employee retirement, make workers pay more for health insurance, cut staffing and undermine union power." Cox was easily elected to another three-year term at the union's convention last week, winning 63% of the vote in a four-candidate field.

CONTINUING COVERAGE OF CONTROVERSY OVER WASHINGTON FOOTBALL TEAM'S NAME. The [Washington Post](#) (8/26, Steinberg, 6.76M) reports that during a panel discussion on ESPN's "Outside the Lines" on the name of the Washington football team, D.C. Council member Jack Evans (D-Ward 2) said that Washington politicians should stop being asked about it. The article notes that Interior Secretary Sally Jewell told Washington Mayor Muriel Bowser "in the spring that the National Park Service, which owns the RFK Stadium site, was unlikely to approve a new stadium for the Redskins unless the team changes its name." Later, team president Bruce Allen said "the team would not change its stance on the name even if it got in the way of a stadium deal."

ADDITIONAL COVERAGE OF SECRETARY JEWELL'S VISIT TO UPPER MISSISSIPPI RIVER NATIONAL FISH AND WILDLIFE REFUGE. In an editorial, the [Winona \(MN\) Daily News](#) (8/26, 28K) notes that "earlier this month, U.S. Secretary of the Interior Sally Jewell came to La Crosse to tour the Upper Mississippi River National Fish and Wildlife Refuge – an area that brings in four million visitors each year." Jewell said, "This is a great example of very accessible public land that can bring the outdoors and nature into people's everyday lives. It's accessible. It supports a desire that visitors to Wisconsin and community members here have to connect with nature."

ADDITIONAL COVERAGE INTERIOR REVAMPS WEBSITE. Additional coverage of the Interior Department's new website was provided by the [NextGov](#) (8/26, 2K).

ADDITIONAL COVERAGE GOV SANDOVAL TALKS WITH PRESIDENT OBAMA ABOUT GREATER SAGE GROUSE. Additional coverage that Nevada Gov. Brian Sandoval discussed the sage grouse with President Obama was provided by the [Denver \(CO\) Post](#) (8/25, 787K), the [Casper \(WY\) Star-Tribune](#) (8/26, 115K), the [Montana Kaimin](#) (8/26, 11K), and [KIVI-TV Boise \(ID\)](#) Boise, ID (8/26, 861).

Empowering Native American Communities:

BIA DIRECTOR TO VISIT OSAGE NATION IN SEPTEMBER. The [Tulsa \(OK\) World](#) (8/26, 364K) reports that "with the Osage Nation recently winning a court order to stop new oil and gas regulations from taking effect, at least temporarily, the director of the U.S. Bureau of Indian Affairs will visit the tribe next month, setting up what could potentially be a heated meeting." According to the article, "invited by the tribe's principal chief, Mike Black will visit Pawhuska on Sept. 9 to 'discuss issues related to the Osage mineral estate,' the tribe announced Tuesday." The tribe said that Black's remarks will avoid "any matters which are in litigation," but he will "address concerns over declining oil and gas production."

BIA CLEARS WASHINGTON TRIBES' LAND LEASE RULES UNDER HEARTH ACT. [Law 360](#) (8/26, 21K) reports that "two Washington tribes became the latest of almost two dozen Native American tribes Tuesday to win ratification of land leasing regulations by the Bureau of Indian Affairs under the HEARTH Act that allows them to bypass formal BIA approval of land-lease deals." According to the article, "the lease for the Makah Tribe, based in Neah Bay, was authorized for residential and business purposes and wind and solar development, and the lease for the Squaxin Island Tribe, based in Shelton, had its lease authorized for business purposes."

OFFICIALS CELEBRATE LEASE EXTENSION AT FOUR CORNERS POWER PLANT. The [Farmington \(NM\) Daily Times](#) (8/26, 44K) reports that "government and Arizona Public Service Co. officials gathered under a tent in a parking lot at the Four Corners Power Plant on Tuesday to celebrate the future of the facility." Four Corners officials "held the event to note an achievement that many described as an against-all-odds feat — final approval of a multi-year power project, including a lease extension approved by the Bureau of Indian Affairs, that gives the coal-fired plant the ability to operate until 2041." The article notes that "in addition to the lease extension, which was approved in February 2011 by the Navajo Nation Council, the plant was also approved by the BIA for 323 transmission line rights of way between the plant and the Navajo Nation."

FLORIDA, SEMINOLE TRIBE HEAD TO MEDIATION OVER CASINO AGREEMENT. The [Miami Herald](#) (8/26, 651K) reports that "the state and the Seminole Tribe are headed into mediation — shepherded by a lawyer whose past clients include Mick Jagger and Leona Helmsley — to resolve a possible standoff over the future of blackjack and other banked card games at most of the tribe's Florida casinos." The tribe "formally requested mediation last month after negotiations over the card games — part of a \$1 billion, five-year deal — stalled this spring." The Interior Department, "which oversees gambling on tribal lands, has to give final approval to any agreement reached between the state and the Seminoles."

Additional coverage was provided by the [Tampa Bay \(FL\) Times](#) (8/26, 857K) and [WFOR-TV Miami \(FL\)](#) Miami (8/25, 29K).

ALASKA FILES CHALLENGE TO FEDERAL LAND TRUST FOR ALASKA NATIVE TRIBES. The [Fairbanks \(AK\) News-Miner](#) (8/26, 42K) reports that Alaska will "move forward with a legal challenge to a landmark court decision that allows the federal government to take land into trust for Alaska Native tribes." The Alaska Department of Law "filed the appeal in the U.S. Court of Appeals on Monday in an attempt to overturn the decision in the *Akiachak v. U.S. Interior Department* lawsuit."

Additional coverage was provided by the [Alaska Dispatch News](#) (8/25, 219K), [Law 360](#) (8/26, 21K) and [KTOO-FM Juneau \(AK\)](#) Juneau, AK (8/25).

BIA'S DECISION ON MASHPEE WAMPANOAG TRIBAL CASINO IMMINENT. The [Cape Cod \(MA\) News](#) (8/26) reports that "a decision from federal officials that would pave the way for the Mashpee Wampanoag Tribe to build a casino resort in Taunton is now imminent." A letter from the BIA to Taunton City Council President Estele Borges "indicated that a land-into-trust decision would be announced within 30 days." The article notes that "the process to designate the land has been underway for several years and is one of the last hurdles the Wampanoag tribe faces before moving ahead with the casino."

SPIRIT LAKE TRIBE DECLARES A STATE OF EMERGENCY. The [Devils Lake \(ND\) Journal](#) (8/25, 11K) reports that "in response to a wide-spread, mounting problem on the reservation the leaders of the Spirit Lake Nation have taken a bold stand by declaring a 'state of emergency' on Friday, Aug. 21." According to Nancy Greene-Robertson, "who serves on the Spirit Lake Nation Tribal Council in the dual role of Secretary-Treasurer, this is one of many steps to come in the battle against illegal drug use, abuse and trafficking on the Spirit Lake Nation."

Office of Insular Affairs:

FUNDING ANNOUNCED TO ELIMINATE BROWN TREE SNAKES. The [Pacific \(GUM\) Daily News](#) (8/25, 61K) reports that "the federal government is providing more funding to help eradicate and control Guam's brown tree snake population." Interior Assistant Secretary for Insular Areas Esther Kia'aina "announced this month that a \$3.7 million grant will go toward control efforts in Guam, as well as prevention efforts in the Northern Mariana Islands and Hawaii." The U.S. Department of Agriculture National Wildlife Research Center in Guam will "receive \$237,842 for phase II of its automated aerial bait drop system, which dispenses dead mice loaded with the medication acetaminophen into Guam's jungles via helicopter."

Tackling America's Water Challenges:

WATER DISTRICTS CHALLENGE KLAMATH DIVERSIONS. The [Greenwire](#) (8/25, Subscription Publication) reports that "two California water districts are asking a federal judge to halt releases of extra water in the Klamath Basin." The lawsuit filed late Friday at the U.S. District Court for the Eastern District of California in Fresno by Westlands Water District and the San Luis & Delta-Mendota Water Authority is "seeking a preliminary injunction against the releases, which are meant to help salmon survive the drought." The water districts argue the BOR "has no authority to send water to the Klamath River to help salmon because they are not protected by the Endangered Species Act."

Additional coverage was provided by the [Red Bluff \(CA\) Daily News](#) (8/25, 578) and the [Western Farm Press](#) (8/26, 2K).

9TH CIRCUIT RULES BOR DID NOT NEED DISCHARGE PERMIT FOR KLAMATH DRAIN. [Bloomberg BNA](#) (8/26, 3K) reports that the BOR "did not violate the Clean Water Act by discharging pollutants from an irrigation project drain into a river because the waters transferred via the drain are not 'meaningfully distinct' from the river water, a federal appeals court ruled." According to the article, "writing for a unanimous panel of the U.S. Court of Appeals for the Ninth Circuit, Judge Richard R. Clifton held in an Aug. 21 opinion that the Clean Water Act does not require the bureau to obtain a discharge permit because the waters flowing into the Klamath River from the Klamath Straits drainage are not distinct."

SALEM CANAL BREACH BLAMED ON GOPHERS. The [Deseret \(UT\) News](#) (8/26, 549K) reports that “a canal was breached Tuesday because of a gopher problem, sending a rush of water downhill and causing a scare for Salem residents.” The BOR said “gophers made tunnels in the side of its 99-year-old canal, causing the breach.”

Additional coverage was provided by the [Salt Lake \(UT\) Tribune](#) (8/26, 492K), [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (8/26, 1.07M), and [KTVX-TV Salt Lake City \(UT\)](#) Salt Lake City (8/26, 15K).

Securing America’s Energy Future:

Renewable Energy:

ADDITIONAL COVERAGE INTERIOR CLEARS BLYTHE MESA SOLAR PROJECT. Additional coverage that the Interior Department “on Monday gave the green light to RRG Renewables for its 485-MW Blythe Mesa solar photovoltaic (PV) project in California” was provided by the [SeeNews](#) (8/26), the [Engineering News Record](#) (8/24, 2K), [ENews Park Forest](#) (8/26, 2K), [4-Traders](#) (8/26, 5K), [PV-Tech](#) (8/25, 529), [Energy Matters \(AUS\)](#) (8/26, 2K), and the [Recharge News](#) (8/25, 633).

Onshore Energy Development:

ENVIRONMENTALISTS PRAISE BLM MASTER LEASING PLAN FOR MOAB. The [Grand Junction \(CO\) Daily Sentinel](#) (8/26, 73K) reports that “a master leasing plan recently released by the Bureau of Land Management, for oil and gas and potash development in the area surrounding Arches and Canyonlands national parks, is gaining praise from recreational and environmental interests due to its stipulations on preserving scenic views.” Stephen Bloch, legal director for the Southern Utah Wilderness Alliance, said, “Once finalized, the (Moab plan) will give industry certainty where leasing and ultimately development could take place, and companies will understand the terms and conditions for those activities. Likewise, the public and local communities will know that many of southeastern Utah’s stunningly beautiful canyons and mesas won’t be marred by the sight and sound of drill rigs and pump jacks.” The article also notes that “recreation-oriented interests including the Outdoor Industry Association, Cortez-based Osprey Packs and Moab-based Western Spirit Cycling all have praised the draft Moab plan.”

COAL COMMUNITIES CONTEST FOR ABANDONED MINE LANDS RECLAMATION FUNDS. The [Washington Examiner](#) (8/26, 213K) reports that coal communities are “fighting each other along an East-West divide over a pot of money that could spur economic recovery in downtrodden Appalachian locales.” The article notes that “at issue is the Abandoned Mine Lands reclamation fund, a program created by Congress in 1977 that has drifted from its mission of fixing up old mine sites that pollute waterways and scar mountaintops.” According to the article, “the Appalachian states want Congress to change the payment formula so that they can get the money to clean up those sites, while Wyoming’s boosters say the state has been historically underfunded and needs the money now.” The article notes that “the interest in addressing the program comes as President Obama is preparing a big push on a proposal to change how the fund pays states.”

FOSSIL FUEL GROUP WANTS BEETLE DELISTING. The [Greenwire](#) (8/25, Subscription Publication) reports that “the Independent Petroleum Association of America wants the American burying beetle removed from the endangered species list, filing a petition yesterday asserting that federal officials erred in listing the species 26 years ago.” The article notes that “the orange-and-black beetle has long bothered the oil and gas industry, which sees its endangered status as an impediment to operations, particularly in Oklahoma.” The FWS “listed the beetle under the Endangered Species Act in 1989, citing its disappearance from 90 percent of the species’s historical range.” The FWS has “called the beetle an ‘indicator species,’ or one whose disappearance may indicate problems in the larger environment.” However, “in its petition to FWS, PAA argued that the government has never completed ‘scientifically defensible, range-wide studies’ on the beetles’ abundance.”

EARTHQUAKE REGISTERING 3.5 MAGNITUDE HITS PAYNE COUNTY. The [AP](#) (8/26) reports that according to the U.S. Geological Survey, a 3.5 magnitude earthquake “was recorded at about 8 a.m. Tuesday” in Payne County, Oklahoma at a depth of less than 2 miles. The Oklahoma Geological Survey “has said it is likely that many recent earthquakes in the state are being triggered by the injection of wastewater from oil and natural gas drilling operations.”

OPPOSITION TO COLORADO COAL MINE CRITICIZED. In an editorial, the [Pueblo \(CO\) Chieftain](#) (8/26, 87K) notes that Interior Secretary Sally Jewell has “given public assurances that her department’s Office of Surface Mining will comply with a judge’s order to complete an environmental review for a coal mine permit in Northwestern Colorado.” The paper also says that “it’s important to note this is not a battle between the coal mine and federal regulators.” Rather, the paper states, “this is a fight brought on unilaterally by New Mexico-based WildEarth Guardians, which has filed similar lawsuits against mines in New Mexico and Montana.” The editorial says it is “appalled by this self-styled environmental group’s cynical attempts to exploit federal regulatory law and the courts with the sole intent of shutting down coal production that is so integral to our nation’s power grid and quality of life.”

Offshore Energy Development:

IG OF LOUISIANA PARISH WANTS FULL TRANSPARENCY IN SPENDING OF BP SETTLEMENT MONEY. The [New Orleans Times-Picayune](#) (8/26, 718K) reports that Inspector General David McClintock for Louisiana’s Jefferson Parish wants the Parish Council and President John Young “to ensure transparency in spending \$53.1 million from the BP settlement” by making “a unique project number and account code for the money.”

FORMER ADMIRAL ADMINISTRATION MUST SEIZE LEADERSHIP ROLE IN ARCTIC. Retired Admiral Gary Roughead, former chief naval operations, writes in the [Wall Street Journal](#) (8/26, Subscription Publication, 5.95M) that the Obama Administration needs to seize a leadership position in the Arctic before control is ceded to increasingly aggressive claims on the region by Russia and China. Roughead says sitting on the sidelines over concerns like climate change will not prevent problems since the competing countries will fill the vacuum and set the rules. He urges President Obama to use the US’ two-year chairmanship of the Arctic Council to reclaim an appropriate stake in the region, set responsible standards, and facilitate US energy exploration instead of impeding it.

OFFSHORE DRILLING CRITICIZED. In an op-ed for the [Wilmington \(NC\) Star News](#) (8/25, 111K), Kevin O’Grady, a member of the Wilmington City Council, criticizes Donald van der Vaart, the Secretary of the North Carolina Department of Environment and Natural Resources, for his support of offshore drilling. According to O’Grady, “Van der Vaart, by trivializing the studied decision by the Wilmington City Council to join the majority of coastal communities in North Carolina that oppose both seismic testing and drilling for offshore oil, brushes aside the coastal communities based upon his personal confidence that all testing and drilling can be done safely.” O’Grady asserts, “We need a DENR secretary that is not confident oil drilling is safe – we need a defender of our coastal economic interests, natural resources, and lifestyle.”

America’s Great Outdoors:

Bureau of Land Management:

BLM DIRECTOR KORNZE TO DISCUSSES SODA FIRE REHABILITATION IN BOISE. The [Spokane \(WA\) Spokesman-Review](#) (8/25, 183K) reports that BLM Director Neil Kornze is “headed to Boise tomorrow to discuss rehabilitation after the Soda Fire;” he “announced that the huge range fire that burned 285,000 acres in southwestern Idaho is currently the BLM’s highest rehabilitation priority.” Meanwhile, BLM officials are “planning an emergency roundup of roughly 285 wild horses whose range burned in the fire; 29 died in the fire, and six more had to be killed due to injuries from the blaze.” The article notes that “the ‘emergency wild horse gather,’ which will start this week, is designed to reduce the wild horse numbers to match the remaining forage; the rest will be held at the BLM’s Boise Wild Horse Corrals through the winter until the range recovers.”

Additional coverage was provided by [KTVB-TV](#) Boise, ID (8/25, 191K).

PROSECUTORS WANT JAIL TIME FOR OFFICIAL CONVICTED IN ATV PROTEST RIDE. The [AP](#) (8/26) reports that “prosecutors want jail time for a county commissioner convicted of leading an ATV protest ride on an off-limits trail in a show of defiance against the federal government.” The U.S. Attorney’s Office has “requested jail terms for San Juan County Commissioner Phil Lyman and blogger Monte Wells, according to court documents filed Monday.” The article notes that “the documents don’t specify a requested length for the terms but point out that one year is the maximum for the misdemeanor convictions.”

Additional coverage was provided by the [Washington \(DC\) Times](#) (8/26, Mccombs, 344K), the [Salt Lake \(UT\) Tribune](#) (8/26, 492K), and [KSL-TV Salt Lake City \(UT\)](#) Salt Lake City (8/26, 1.07M).

MINING GROUP CLAIMS BLM RESTRICTIONS UNNEEDED FOR SAGE GROUSE. [F&E Publishing](#) (8/24, 705) reports that the BLM’s “proposed restrictions on miners and off-highway vehicles are unnecessary as sage grouse populations surge across the West, a mining group said today in a letter to Interior Secretary Sally Jewell.” The American Exploration & Mining Association said the bureau “should abandon proposed land-use plans to conserve grouse habitat on 50 million acres of the West and instead defer to state plans that are beginning to bear fruit.” The group has “denounced BLM’s land-use plans – unveiled in May and set to be finalized within weeks – for recommending that 9 million acres be withdrawn from future hardrock mining claims and placing restrictions on where and when OHVs can access the public estate.”

BLM RESPONDS TO RESOURCE MANAGEMENT PLAN CONCERNS. The [Coos Bay \(OR\) World](#) (8/26, 32K) reports that “agitated by the Bureau of Land Management Draft Resource Management Plan for Western Oregon, the Coos County Commissioners voiced their concerns with the comment period’s end just around the corner.” The article notes

that “the comments uttered by Coos County commissioner Bob Main echo similar comments and concerns voiced at the local outreach sessions in the lead-up to the release of the draft, prompting some to question if they were ignored.” In response, BLM project manager Mark Brown sought “to dispel those concerns.” Brown said, “The BLM listens to all comments received, which is why we produce a draft and put it out for public review. The frustration I can appreciate because the public doesn’t necessarily get instant feedback, which is a product of the draft process, but we integrate them however we can.”

STUDY OF BOISE FOOTHILLS TRAILS RECEIVES FUNDING. The [Idaho Statesman](#) (8/25, 190K) reports that “the city of Boise, the U.S. Bureau of Land Management and Wells Fargo Bank are sharing the cost of an \$85,000 study that will examine how many miles of trails the Boise Foothills should have and where they should be.” The article notes that “the BLM is contributing \$36,000. Wells Fargo’s share is \$25,000. Boise will cover the roughly \$24,000 balance.” The City Council approved that expenditure at their meeting Tuesday.

BLM RANGERS STEP UP MONITORING OF BASTENDORFF BEACH ILLEGAL CAMPING. [KCBY-TV](#) Coos Bay, OR (8/26, 671) reports that “it was reported earlier this month that illegal camping has become a problem at Bastendorff Beach, but it appears some progress has been made in dealing with the issue.” The article notes that “fewer vehicles are parked among the trees, though several tents and RVs remain.” According to the Coos Bay BLM, “rangers have stepped up enforcement and increased their presence at the beach.” BLM’s Megan Harper said, “They’ve made contact with over 75 people in the last week and a half, been able to issue citations to people who are staying longer than they should, and we’ve also begun towing vehicles that have been abandoned and/or people aren’t moving out in a timely manner.”

BLM CREW CLEANS UP ILLEGAL DUMPSITES. The [Las Cruces \(NM\) Sun-News](#) (8/26, 47K) reports that “discarded items” were “picked up by a cleaning crew of college students hired for the summer through the Bureau of Land Management (BLM) — one of the local member agencies of the Illegal Dumping Partnership.” Dominick Chavez, safety specialist for BLM, said, “The whole idea behind this was to clean up illegal dumpsites around the district.” The article notes that “every day, the crew of five summer interns picked up approximately 3,000 pounds — a ton and a half — of illegally discarded garbage that included household waste, animal carcasses (pets and livestock), shingles, tiles and other construction debris.”

HEALTH DEPARTMENT WARNS GRAND COUNTY RESIDENTS OF INFECTIOUS DISEASE IN NEARBY COLORADO. The [Deseret \(UT\) News](#) (8/26, 549K) reports that “residents in Grand County are being cautioned against an infectious animal and insect-borne disease that has affected several people in Colorado this year.” According to the article, “twenty-seven cases of Tularemia have been reported in Colorado this year through August 14, as opposed to 16 confirmed cases in the state in all of 2014.” The article notes that “two women and one child were infected in Mesa County in recent days, all while spending time along the Colorado River, the Utah Department of Health and the Bureau of Land Management in Utah said in a prepared statement Tuesday.”

ADDITIONAL COVERAGE JUDGE SAYS USE OF MOTORIZED VEHICLES FOR JUNIPER REMOVAL IN WILDERNESS IS PROHIBITED. Additional coverage that “a federal judge has ruled that it is illegal to use motorized vehicles to remove juniper in wilderness study areas near Oregon’s Steens Mountain” was provided by the [Washington \(DC\) Times](#) (8/26, 344K), the [Bend \(OR\) Bulletin](#) (8/26, 94K), and the [Eugene \(OR\) Register-Guard](#) (8/26, 172K).

Fish and Wildlife Service:

FWS OPENING MORE AREAS TO FISHING, HUNTING. [E&E Publishing](#) (8/25, 705) reports that the FWS is “opening more areas to fishing and hunting on 21 refuges, including one refuge where youth hunters will be able to shoot migratory birds for the first time.” The agency will “publish the final rule in tomorrow’s Federal Register, expanding fishing and hunting opportunities in refuges scattered throughout the country.” At the Tualatin River National Wildlife Refuge in Oregon, the service will “open migratory bird hunting to youth, while at four other refuges in North Dakota, visitors will be able to go sport fishing for the first time.”

Additional coverage was provided by [The Hill](#) (8/26, Devaney, 471K) and [AmmoLand](#) (8/26, 6K).

FWS SEEKS PUBLIC INPUT ON SPECIES PRIOR TO INFLUENTIAL GATHERING OF 181 NATIONS. The [AmmoLand](#) (8/26, 6K) reports that the FWS is seeking “input from members of the public on a number of wildlife species being considered for submission to the world’s largest and most influential meeting on international wildlife trade.” The article notes that “the 17th meeting of the Conference of the Parties (CoP17) to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) will be held in Johannesburg, South Africa, from Sept. 24 through Oct. 5, 2016.” FWS Director Dan Ashe said, “The CITES treaty provides a critical framework for global cooperation on wildlife trade and a powerful opportunity to combat wildlife trafficking. The Conference of the Parties offers a forum for the United States to demonstrate global leadership and collaboration in efforts to protect wild animals and plants from over-exploitation. We encourage the public to participate by submitting comments and information regarding species proposals under consideration. Together, we can ensure international trade does not threaten the survival of imperiled wild animals and plants.”

BARRIER ISLAND ADDED TO CAPE ROMAIN NATIONAL WILDLIFE REFUGE. The [Charleston \(SC\) Moultrie News](#) (8/25) reports that “the Nature Conservancy recently transferred a 19-acre hammock island near McClellanville to the ownership of the U.S. Fish and Wildlife Service.” The property will be added to the Cape Romain National Wildlife Refuge. The article notes that “previously, it was one of the last remaining in-holdings – or areas still under private ownership – within the Refuge boundary.” Refuge Manager Sarah Dawsey said, “Protecting the remaining lands already inside the Refuge boundary helps ensure that this area will remain pristine for birds, fish and other wildlife. We’re grateful to the previous landowners and The Nature Conservancy for making this purchase possible.”

ARIZONA LAWMAKERS SEEK MEXICAN WOLF DELISTING. The [Eastern Arizona Courier](#) (8/26, 18K) reports that “during last month’s meeting with U.S. Rep Martha McSally, R-Ariz., members of the Willcox-San Simon Natural Resource Conservation District expressed concerns over the reintroduction of the Mexican wolf.” McSally is a co-sponsor of a piece of legislation related to this issue, known as the “Mexican Wolf Transparency Act.” Introduced on June 25 this year by Rep. Paul Gosar, R-Ariz., the legislation is to ensure that “USFWS Mexican wolf nonessential experimental population 10(j) rule has no force or effect, and for other purposes.”

FWS PULLS DISCOVERY CENTER STAFFING, SUPPORT. The [Greenfield \(MA\) Recorder](#) (8/26, 666) reports that “the Great Falls Discovery Center is grappling with how to handle a potential loss of programming and support after the U.S. Fish and Wildlife Service withdrew its staffing from the center on short notice this month.” According to the article, “at the beginning of August, Fish and Wildlife notified the Friends of the Great Falls Discovery Center volunteer group that it would be vacating its sole staff position at the center within nine days due to lack of funding.” The FWS “had been a partner of the center since it opened about 20 years ago.”

THREE SPECIES OF ENDANGERED MUSSELS BOLSTERED IN BIG SOUTH FORK. The [AP](#) (8/26, 2.28M) reports that “the populations of three endangered species of freshwater mussels have been bolstered with more than 100 juvenile members of the species added to the Big South Fork of Cumberland River.” The article notes that “the project was a collaborative effort by state Fish and Wildlife, the U.S. Fish and Wildlife Service and the National Park Service.”

TESTS TURN UP NO SIGN OF ASIAN CARP IN FOX, MILWAUKEE RIVERS. The [Milwaukee Journal Sentinel](#) (8/26, 564K) reports that “test results of water from the Milwaukee River watershed and the Fox River in northeast Wisconsin have revealed no genetic signs of Asian carp, state officials announced Tuesday.” The Department of Natural Resources said that “160 water samples taken in May and June showed no evidence of the DNA of silver or bighead carp.” The article notes that “the testing was conducted by the Fish and Wildlife Service, with help from the DNR.”

BIOLOGISTS QUESTIONS GATOR HUNTS. The [Washington Post](#) (8/26, Fears, 6.76M) reports that some biologists are questioning whether the killing of huge gators during regulated hunts in Alabama, Texas and Florida are “a good thing.” The article notes that “big dominant males manage the habitat where they reside, keeping smaller, more aggressive males away.”

National Park Service:

NPS CELEBRATES 99TH BIRTHDAY. [WBUR-FM](#) Boston (8/25, 113K) reports that the NPS celebrated its 99th birthday on Tuesday “with a list of “99 Ways to Find Your Park” and by offering free admission to its 408 national parks.” The article revisits “Jeremy Hobson’s April conversation with U.S. Interior Secretary Sally Jewell about how the park service can continue to bring in visitors and embrace 21st century technology.”

[The Hill](#) (8/26, Cama, 471K) reports that “next year will mark the 100th anniversary of enactment of the National Park Service Organic Act, which created the agency to manage a number of existing federal parks.” The article notes that “earlier this year, President Obama asked Congress for an additional \$326 million for the Park Service’s discretionary budget, with much of it going to building new infrastructure, hiring more rangers, recruiting more volunteers and otherwise preparing parks for the 100th birthday.”

Additional coverage was provided by [Newsweek](#) (8/26, 198K), [TIME](#) (8/26, 19.55M), the [Huffington Post](#) (8/26, 164K), the [Vox](#) (8/26, 1.1M), the [Houston \(TX\) Chronicle](#) (8/26, 2.28M), the [Washington \(DC\) Times](#) (8/26, 344K), the [Los Angeles \(CA\) Times](#) (8/26, Mai-Duc, 4 07M), the [Hawley \(PA\) News Eagle](#) (8/24, 13K), [Arizona Public Media](#) (8/26, 2K), [EcoWatch](#) (8/25, 28K), [WBIR-TV Knoxville \(TN\)](#) Knoxville, TN (8/25, 149K), [WHSV-TV Harrisonburg \(VA\)](#) Harrisonburg, VA (8/26, 51K), [WJHL-TV Tri-Cities \(TN-VA\)](#) Tri-Cities (TN-VA) (8/25, 55K), [WFLX-TV West Palm Beach \(FL\)](#) West Palm Beach, FL (8/26, 1K), [KYTV-TV Springfield \(MO\)](#) Springfield, MO (8/26, 135K), [KQVR-TV Sacramento \(CA\)](#) Sacramento, CA (8/25, 61K), [KTIV-TV Sioux City \(IA\)](#) Sioux City, IA (8/25, 74K), [WCCO-TV Minneapolis \(MN\)](#) Minneapolis (8/25, 70K), and [WRC-TV Washington \(DC\)](#) Washington (8/26, 345K).

diverse audience, but are those efforts too little, too late?" NPS Director Jonathan Jarvis said in a statement, "The National Park Service's 99th birthday is an opportunity to reflect on and celebrate the role of national parks in the American story. And it's also a time to look ahead to our centennial year, and the next 100 years. These national treasures belong to all of us, and we want everyone — especially the next generation of park visitors, supporters and advocates — to discover and connect with their national parks."

2016 Philadelphia Flower Show To Celebrate 99th Anniversary Of NPS. The [Lancaster \(PA\) New Era](#) (8/26, 192K) reports that "the Pennsylvania Horticultural Society this afternoon announced the theme of the 2016 PHS Philadelphia Flower Show will celebrate the 99th anniversary of the National Park Service."

Additional coverage was provided by [Philadelphia Inquirer](#) (8/26, Melamed, 641K) and the [Philadelphia \(PA\) Business Journal](#) (8/25, Subscription Publication, 68K).

Laura Bush Shares Camping Photos For National Parks Centennial. [People](#) (8/26, 45.27M) reports that former First Lady Laura Bush, "and her friends gave PEOPLE an exclusive peek inside their visit to California's Yosemite National Park late last month, as part of the National Park Service's yearlong centennial celebration, which Bush co-chairs with First Lady Michelle Obama, and which kicks off on Tuesday, the service's 99th birthday." According to the article, "encouraging families everywhere to Find Your Park and explore natural wonders in their own states, Bush says her camping buddies are not all that she carries with her from her childhood on these outdoor adventures — she also brings her mother's love of nature."

Support Urged For National Parks. In an op-ed for [LiveScience](#) (8/26, 467K), Michael Sainato, a freelance writer who focuses on environmental and race issues, writes that as the NPS "approaches its centennial next year, it recently launched the Find Your Park campaign to remind young Americans of the natural connection they have always had but now are at risk of losing." Sainato argues that "humanity is rooted in nature," and "without protecting and preserving those roots, we lose the context for all that we value." He adds that "in an age where wilderness is vastly disappearing, it is imperative to the future of our planet that the National Parks are successful in engaging future generations, and in representing the diversity of our country, so the penchant for conservation that has saved our existing National Parks continues to be shared to expand and reaffirm the protection of nature."

Congress Urged To Renew LWCF. For "The Blog" of the [Huffington Post](#) (8/26, Alt, 164K), Margie Alt, Executive director, Environment America, writes that "the best birthday gift Congress could give is renewing and fully funding the Land and Water Conservation Fund before it's too late." She writes that "our parks deserve what we all want on our birthday: friends coming together, setting aside their disagreements, and having a good time." Alt continues, "Congressional friends of land protection need to do just that: put business as usual on hold, and renew and fully fund the Land and Water Conservation Fund."

Yelp Reviews Of National Parks Analyzed. For the [Mother Jones](#) (8/26, 758K), Tim Murphy writes that "Yelp is filled with one- and two-star reviews of America's most pristine and majestic natural wonders," which are "riveting."

NEW HEAD OF VISITOR, RESOURCE PROTECTION PROGRAMS ANNOUNCED. [E&E Publishing](#) (8/25, 705) reports that "a longtime National Park Service official will head the agency's visitor and resource protection programs, NPS Director Jonathan Jarvis announced today." Rick Obernesser has "worked for NPS for more than 30 years, most recently as superintendent of Wrangell-St. Elias National Park and Preserve in Alaska." According to the article, "as the new associate director for visitor and resource protection, he will oversee 850 employees and a \$200 million budget." Obernesser takes over for Cam Sholly, "who left the associate director position in December to become the Midwest region director at NPS." Jarvis said in a statement, "Rick is passionate about the National Park Service mission and does not shy away from tough questions or issues. His straightforward but low-key leadership style will work well within the National Park Service's leadership team."

GOV. MCAULIFFE HANDS OVER FORT MONROE LAND TO NPS. The [Newport News \(VA\) Daily Press](#) (8/25, Subscription Publication, 201K) reports that Gov. Terry McAuliffe on Tuesday "signed about 121 acres of state land over to the Park Service, completing a years-long effort to finally transfer the Fort Monroe National Monument to the federal agency." McAuliffe said that "he hopes the move will bolster the landmark's profile." He said, "We haven't done a very good job of making use of these assets."

MAN GETS TWO YEARS IN PRISON AFTER ASSAULT AT NATIONAL PARK. The [AP](#) (8/26, 2 28M) reports that "Rocky Mountain National Park officials said a 36-year-old Nebraska man has been sentenced to two years in federal prison for assaulting a man who was by himself in the park." Park spokeswoman Kyle Patterson said Tuesday that "the 64-year-old victim, who is not being identified, was assaulted last year in June at the Upper Beaver Meadows area of the park." According to park officials, "the attack was random."

Additional coverage was provided by the [Denver Post](#) (8/26, Mcghee, 787K).

TWO BEARS WHO CAUSED TROUBLE AT GRAND TETON NOW CALL DAKOTA ZOO HOME. The [AP](#) (8/25, 811K) reports that "a zoo in southeast South Dakota has taken in two black bears that caused some trouble at Grand Teton National Park in Wyoming." The Great Plains Zoo and Delbridge Museum of Natural History in Sioux Falls will "now be home to a 12-year-old female bear and her young cub." According to zoo officials, "the older bear has a long history of nuisance behavior at Grand Teton, where she had raided backpacks and campsites for food for several years."

Also providing coverage are [USA Today](#) (8/25, Falls, 5.23M), the [Washington \(DC\) Post](#) (8/26, Press, 6.76M), the [Houston \(TX\) Chronicle](#) (8/26, 2.28M), the [Daily Mail \(UK\)](#) (8/26, 5 59M).

NIPSCO ANNOUNCES PRESERVATION PROJECTS IN NORTHWEST INDIANA. The [Merrillville \(IN\) Post-Tribune](#) (8/26, 105K) reports that "the dune and swale of the Indiana Dunes was an apt setting on Tuesday afternoon as NIPSCO announced 10 projects chosen by area environmental organizations to protect the unique habitat and biodiversity of Northwest Indiana." NIPSCO "provided \$2 million to fund the acquisition and preservation of nearly 1,630 acres of land for public enjoyment and to improve regional plant and animal life." The article notes that "the funding grew out of NIPSCO's 2010 consent decree with the U.S. Environmental Protection Agency and the Indiana Department of Environmental Management."

Additional coverage was provided by the [La Porte County \(IN\) Life](#) (8/26).

US Geological Survey:

USGS STUDY FINDS MERCURY IN GRAND CANYON. The [AP](#) (8/26, 344K) reports that "researchers say mercury and other chemicals that were found in Lake Powell have moved downstream and are now being found in fish and aquatic plants in the Grand Canyon." According to the article, "no consumption advisories have been issued for fish in the study area that was researched by the U.S. Geological Survey." The article notes that "the study found mercury and selenium in algae, bugs and fish."

Also providing coverage was the [Arizona Daily Sun](#) (8/26, 34K), [EcoWatch](#) (8/25, 28K), [KNXV-TV Phoenix \(AZ\)](#) Phoenix (8/26, 103K), [KTAR-FM Glendale \(AZ\)](#) Glendale, AZ (8/24, 17K), and [KPHO-TV Phoenix \(AZ\)](#) Phoenix (8/26, 120K).

Top National News:

OBAMA'S "CRAZIES" COMMENT DRAWS OPPONENTS' FIRE. Administration efforts to build congressional support for the Iran nuclear deal were not covered by the network news broadcasts Tuesday evening, and discussion on cable news was largely limited to the President's comments at a Nevada fundraiser. The President told those in attendance that he and Senate Minority Leader Reid would have to "deal with the crazies" when they returned to Washington — remarks that received relatively heavy print and online coverage which cast them as part of an offensive against opponents of the Iran deal. The White House, however, later said that Obama was not referring to one particular issue, and several reports note that the President's first reference to the deal came well after the "crazies" comment. Also receiving heavy coverage this morning is Sen. Patty Murray's announcement that she will support the deal.

Under the headline "Barack Obama Calls Opponents Of Iran Deal 'The Crazies,'" [Politico](#) (8/25, Dove, 942K) likened the comment to former Secretary of State Dean Acheson, who referred to opponents of President Truman as "the primitives." However, in a blog post on the [Washington Post](#) (8/25, 6.76M) website, Erik Wemple takes issue with Politico's headline, noting that "the transcript shows a nine-paragraph gap between 'the crazies' and the first mention of Iran." Lawrence O'Donnell similarly noted on [MSNBC's The Last Word](#) (8/26, 638K) that "the President did not mention the Iran deal in those comments until ten minutes after his reference to the crazies."

The [Daily Caller](#) (8/25, Ross, 375K) said the President "went on the offensive.. against opponents of his Iran nuclear deal," adding that the comments "are just the latest in a series of aggressive rhetorical attacks on lawmakers who oppose the nuclear pact." [Bloomberg Politics](#) (8/26, Olorunnipa, 247K) reports that the President did not specify who "the crazies" are, but White House spokesman Eric Schultz told reporters, "He may have been a bit flip with his remarks, but we have seen Republicans do wildly irresponsible things." The [AP](#) (8/26) reports that Schultz "says Obama was not talking about Iran," and Jennifer Griffin noted on [Fox News' Special Report](#) (8/25, 1.53M) that "under intensive questioning about who exactly are the crazies, the White House today said the remark was not in reference to any specific issue and the transcript seems to bear that out."

[The Hill](#) (8/25, Fabian, 471K) notes that when he was asked "if the president regrets his choice of words, Schultz replied 'no,'" adding, "If you take a step back...and look at what some Republicans have floated in Washington, whether that's shutting down the government, whether that's funding the government at sequester levels when the economy needs

more support, he thinks those are reckless steps." A [New York Post](#) (8/25, 2.73M) editorial notes that "the 'crazies' on the other side include New York's own Sen. Chuck Schumer, who's set to succeed Reid as Senate Democratic leader come 2017," but adds that it is "possible Obama was thinking of the other big fight coming in Washington — the battle over next year's budget."

Nonetheless, the remark drew fire from the President's opponents, the [Washington Times](#) (8/26, Wolfgang, 344K) reports, noting that they "blasted the president for his rhetoric at the fundraiser." Rep. Diane Black said, "First, he likened opponents of his deal to Iranian hardliners chanting 'death to America' and now, in an even lazier line of attack, he's simply resorted to calling us 'crazies.' That incendiary rhetoric cheapens our political discourse and ignores the real concerns that Americans of all political persuasions have about the implications of this far-reaching deal." [Politico](#) (8/25, Wheaton, 942K), which also quoted Black, said Republicans "took renewed umbrage" at the remarks.

Noting that "more than 50 percent of Americans do not like this deal," Sen. Tim Scott said on [Fox News Your World with Neil Cavuto](#) (8/25, 1.04M), "I guess he was referring to the American public as crazy." Scott added, "It is crazy to believe that you can make a good deal with Iran. It is crazy to believe that self inspections, allowing Iran to self inspect, has any grain of commonsense. What is crazy is to listen to the leaders in Iran...say death to America and think you can make a good deal with them." KT McFarland said on [Fox News Real Story with Gretchen Carlson](#) (8/25), "As far as only crazies are against it, what do you call former Secretary of State Henry Kissinger, my old boss, former Secretary of State George Schultz, former Defense Secretary Bob Gates. There are a number of very senior, significant, respected diplomats who have said, 'Wait a minute, I've got real problems with this deal.'" In his [Wall Street Journal](#) (8/26, Subscription Publication, 5.95M) column, William A. Galston writes that while the President is winning the Democratic support he needs, public support for the agreement is slipping. Galston argues that the Administration should undertake an honest public education effort about the agreement that does not cast its critics as partisans or "crazies."

Zeke Miller said on [MSNBC's The Last Word](#) (8/26, 638K) that "the whole range" of presidential candidates will "make hay out of that comment. It was certainly not necessarily the right comment for the President to make right now as he is trying to marshal Democrats and Republicans on board."

Meanwhile, Murray on Tuesday became the 29th Senate Democrat to announce support for the deal, the [Spokane \(WA\) Spokesman-Review](#) (8/26, Hill, 183K) reported in its "Spin Control" blog. Murray said that while the deal is "not perfect," it is "necessary as 'the best chance we have at a strong diplomatic solution, (and) it puts us in a stronger position no matter what Iran chooses to do.'" The [Washington Post](#) (8/26, Kane, 6.76M) notes that Murray's statement "voiced some doubts of the plan's efficacy but gave a strong overall backing for the outline," while [Politico](#) (8/25, Kim, 942K) reported that she "warned that if lawmakers reject the agreement, it would only push Iran closer to developing nuclear weapons."

[The Hill](#) (8/25, Carney, 471K) reported in its "Floor Action" blog that Murray "dismissed the idea that Congress could reject the deal and get Iran to agree to a better one," saying, "I have heard directly from top ambassadors representing our P5+1 partners as well as members of the Administration that starting over is not an option. ... Additionally, Iran would be spending the time it took to renegotiate a new deal to continue expanding their nuclear program."

The [Huffington Post](#) (8/25, 164K) calls Murray's announcement "another indication that the nuclear accord will survive in the Senate," adding that Murray "was considered a genuinely undecided vote within the White House and among fellow Senate Democrats." [Bloomberg News](#) (8/26, Miller, 2.66M) says Murray's support, which "gives the deal the backing of three of the top four Senate Democrats," brings the President "within five votes of the total needed to keep Congress from blocking the agreement." [Reuters](#) (8/26, Cowan) also briefly reports on Murray's announcement.

Supporters Of Iran Agreement Eye Possible Filibuster Of Anti-Deal Legislation. The [AP](#) (8/26, Werner) notes that the "growing momentum" on the side of deal supporters has raised "the possibility they'll be able to block a disapproval resolution and protect President Barack Obama from having to use his veto pen." While "such an outcome.. remains a long shot," it would be "a major victory for Obama, who is staking his foreign policy legacy largely on the agreement." The [Washington Post](#) (8/26, Kane, 6.76M) says supporters are "openly talking about getting at least 41 Democrats to back the deal so that the opponents' legislation would be filibustered in the Senate and never even reach the Oval Office."

The [New York Times](#) (8/26, Hulse, Subscription Publication, 11.82M) examines the possibility that deal opponents could break a Democratic filibuster of a resolution stating Congress' disapproval of the deal, noting that while "all 54 Republican senators could be expected to support efforts to end a filibuster," opponents would be four votes short of the 60 they need, meaning they would need "to secure the support of at least four of about a dozen Democrats who have yet to disclose their position." [Roll Call](#) (8/25, Lesniewski, 113K) notes that Reid told reporters on Monday that "filibustering legislation disapproving of the Iran deal would be a 'longshot,' but he was upbeat about the prospects of sustaining a presidential veto."

In his [Boston Herald](#) (8/26, 548K) column, Jeff Robbins writes that "the president faces the prospect of having to ram his nuclear gamble.. past a Congress decisively opposed to it and an American people whose future will be endangered if he is wrong," adding that a filibuster would allow him to "avoid the spectacle of having to veto the will of the American people on a nuclear gamble favored by him and opposed by them."

Researchers: Rejection Of Diplomacy Is Rooted In GOP's History. In a [New York Times](#) (8/26, Subscription Publication, 11.82M) op-ed, Nicole Hemmer and Tom Switzer, research associates at the United States Studies Center at the University of Sydney, criticize the "fire-and-brimstone zeal" with which Republicans have attacked the agreement, adding that "the tendency to reject diplomatic deals is rooted on the right of the American political spectrum." They argue that the belief that "diplomacy compromised America's moral authority led these conservatives to oppose reflexively any negotiations with Communist countries," and "the modern-day inheritors of the hardline tradition...are simply reminding Americans of earlier episodes of right-wing rejectionism."

The [Washington Times](#) (8/26, Boyer, 344K) cites several examples of the Administration crossing "many of its own red lines" in pursuit of the deal and notes that critics "point to the administration's own words to outline how the deal falls short of what the US hoped to achieve."

Iranian Activists Use Social Media To Urge Americans To Support Deal. The [New York Times](#) (8/26, Gladstone, Subscription Publication, 11.82M) reports on a growing social media push by "Iranian human rights activists and artists, including a Nobel laureate and people who have spent time in prison for their views," to urge Americans to support the deal. The Times calls the messages, which have been "uploaded to YouTube and Facebook over the past few days," a "new element in the emotional arguments for and against the nuclear agreement that are underway in the United States ahead of a mid-September vote in Congress."

IAEA: Iran Has Provided "Substantive Volume" Of Information On Its Nuclear Program. [Reuters](#) (8/25, Nasralla) reports that IAEA Director General Yukiya Amano said Tuesday that his agency had received a "substantive volume" of information from Iran seeking to quiet concerns its nuclear program had military elements. Amano noted, "At this stage it is premature to say if there is any new information or not. ... We are now analyzing it. ... (It) could be even misleading to provide a partial assessment." The [AP](#) (8/26, Jahn) notes that the "probe of the suspected past weapons work" is "formally separate" from the nuclear agreement.

Amano Appeals For More Funds To Monitor Deal. Also Tuesday, the IAEA said "it will run out of money next month and asked member countries to increase funding the costs of its monitoring, which will rise to \$10 million a year," the [Washington Times](#) (8/26, Howell, 344K) reports. Amano "said the 800,000 euros (\$924,000) per month the agency receives will run out by the end of next month." It will need "at least another 160,000 euros (\$182,564) per month leading up to the implementation of the agreement, which could happen sometime in the first half of next year."

Author: Iran's "Troublemaking" Will Increase Because Of Agreement. In a [USA Today](#) (8/26, 5.23M) op-ed, author Anne R. Pierce argues that current US foreign policy "downplays American ideals and downgrades American power" in the hope that "can create a harmonious world if only we stop being arrogant and assertive, and find 'common interests' with enemies as well as friends," adding that this is seen by others as "weakness and naiveté," and efforts "to create peace, stability and unity end up having the opposite effect." Pierce adds that this "upside-down dynamic" is evident in the Iran nuclear agreement, noting that "the Iranian regime's power, influence, and capacity for troublemaking will increase" as a result.

Ross, Petraeus: Iran Must Know US Will Not Allow It To Develop Nuclear Weapons. In a [Washington Post](#) (8/26, Petraeus, 6.76M) op-ed, Dennis Ross, who served as special assistant to President Obama for the Middle East and South Asia from 2009 to 2011, and former CIA Director Gen. David H. Petraeus, argue that while the deal "has clear benefits and there is no obvious negotiated alternative," it lacks "deterrence," which is "the key to ensuring not just that the Iranians live up to the agreement but also to preventing them from developing nuclear weapons." Iran, they write, "must know that we will not permit it to become a nuclear weapons state ever." Iran and the world need to know that "if Iran dashes toward a weapon, especially after year 15, that it will trigger the use of force," and it is "critically important for the president to state this clearly, particularly given his perceived hesitancy to use force."

WSJournal: Administration Should Provide Details Of All Side Deals. Citing the IAEA's side agreement which will allow Iran to conduct its own inspection of the Parchin military site, the [Wall Street Journal](#) (8/26, Subscription Publication, 5.95M) calls on Congress to demand that the Administration abide by the Iran Nuclear Agreement Review Act and provide details of any "annexes, appendices, codicils, side agreements, implementing materials, documents, and guidance, technical or other understandings, and any related agreements."

CHINESE MARKET CONTINUES TO CRASH, SENDING GLOBAL STOCKS LOWER. While the media continued to focus on the ongoing financial chaos in the Chinese

Hey there,
Sorry for the delay on this. I don't know if you reached out to my colleague Stephenne last week when I was out of the office, but do you still want to talk?

DOI in the News:

INTERIOR APPROVES BLYTHE SOLAR PROJECT. [Politico Pro](#) (8/24) reports that the Interior Department on Monday "gave the nod to a 485-megawatt photovoltaic solar farm in California as part of a suite of clean energy executive actions President Barack Obama announced." The Blythe Mesa solar project is "to be built on 3,500 acres of private land formerly used for agriculture in Riverside County."

The [Palm Springs \(CA\) Desert Sun](#) (8/25, Roth, 99K) reports that among the "flurry of new initiatives" announced by the Administration on Monday was "the approval of a massive solar project in Riverside County." The "485-megawatt Blythe Mesa solar plant" will "power more than 145,000 homes." Federal approval was needed because the project's "transmission lines will cross federal land."

Obama The [AP](#) (8/25, 127K) reports that "the Wilderness Society's Chase Huntley called the project a good example 'of how we can meet our clean energy goals with limited impact to wildlands and wildlife habitat.'"

[Take Part](#) (8/24, 238K) reports "that the Blythe project is moving forward is also a sign that solar energy is becoming increasingly competitive with fossil fuels." The article notes that "earlier huge solar power plants had only been commercially viable thanks to a 30 percent federal tax credit." But "that incentive is set to fall to 10 percent at the end of 2016, meaning the Renewable Resources Group likely thinks it can make money without the government largesse."

Additional coverage was provided by the [Riverside \(CA\) Press Enterprise](#) (8/25, 303K), [YubaNet \(CA\)](#) (8/25, 1K), [reNews](#) (8/25), and [Recharge News](#) (8/25, 633).

GOV. SANDOVAL TALKS WITH PRESIDENT OBAMA ABOUT GREATER SAGE GROUSE. The [AP](#) Reno, NV (8/25, 2K) reports that "Gov. Brian Sandoval says he'll talk privately with President Barack Obama about keeping the greater sage grouse off the endangered species list in Nevada and 10 other Western states." Sandoval "plans to meet with Obama on Monday, after welcoming him to Las Vegas for a clean energy conference."

The [AP](#) (8/24, 199K) reports that after the meeting, Sandoval said in a statement, "Today we discussed several pressing issues facing the mountain west including conservation, economic development, and renewable energy. Most importantly, we discussed the critical need for efforts to protect populations of the greater sage-grouse to responsibly align with ongoing development efforts, which I firmly believe is achievable through a conservation plan based on cutting edge science, common sense best practices and collaborative decision-making." He added, "I am hopeful that our meeting today will serve as a stepping stone as we continue to navigate this important issue. Working together, I'm hopeful that we can preclude the need to list the greater sage-grouse just as we have done with the bi-state sage-grouse."

Additional coverage was provided by the [Denver \(CO\) Post](#) (8/25, 787K), the [Bellingham \(WA\) Herald](#) (8/25, 101K), the [Houston \(TX\) Chronicle](#) (8/25, 2.28M), the [Nevada Appeal](#) (8/25, 49K), and [KOLO-TV Reno \(NV\)](#) Reno, NV (8/25, 3K).

Mining Group Claims BLM Restrictions Unneeded For Sage Grouse. [E&E Publishing](#) (8/24, 705) reports that the BLM's "proposed restrictions on miners and off-highway vehicles are unnecessary as sage grouse populations surge across the West, a mining group said today in a letter to Interior Secretary Sally Jewell." The American Exploration & Mining Association said the bureau "should abandon proposed land-use plans to conserve grouse habitat on 50 million acres of the West and instead defer to state plans that are beginning to bear fruit." The group has "denounced BLM's land-use plans – unveiled in May and set to be finalized within weeks – for recommending that 9 million acres be withdrawn from future hardrock mining claims and placing restrictions on where and when OHVs can access the public estate."

Report Says New Drilling Could Impact Sage Grouse Recovery In Wyoming. The [Greenwire](#) (8/24, Subscription Publication) reports that "the Obama administration has postponed approving most oil and gas wells within Wyoming's prime sage grouse habitat, but the industry has over 27,000 wells in the project pipeline in the Cowboy State that could greatly fragment the bird's best breeding grounds and drive it closer to extinction, according to a report released last week by WildEarth Guardians." According to the article, "the case study by WildEarth looked at how many oil and gas wells, mines, wind farms, and transmission lines have been built within sage grouse core breeding areas in Wyoming over the past six years and how those have impacted grouse."

Study: Power Lines Restrict Sage Grouse Movement In Washington. [Science Daily](#) (8/25, 156K) reports that "transmission lines that funnel power from hydroelectric dams and wind turbines across Eastern Washington affect greater sage grouse habitat by isolating fragile populations and limiting movement, a new study finds." The report, "which looks at how features in the landscape limit the species' distribution and gene flow, is the first to show that power-line corridors are an obstacle for sage grouse as they move across the landscape to feed and reproduce."

SEN. FEINSTEIN SEEKS THREE NATIONAL MONUMENT DESIGNATIONS IN CALIFORNIA. The [Greenwire](#) (8/24, Subscription Publication) reports that Sen. Dianne Feinstein has "asked President Obama to declare three national monuments protecting more than 1 million acres of Southern California deserts, woodlands, mountains and historical sites." Her "Aug. 3 letter to Obama, reported Saturday by The Los Angeles Times, urges him to use the Antiquities Act to designate Mojave Trails, Sand to Snow and Castle Mountains national monuments." The article notes that "the designations, which would require no congressional approval, would protect habitat important to desert tortoises, bighorn sheep and golden eagles while preserving portions of historic Route 66, the Pacific Crest Trail and the headwaters of Southern California's longest river, the Santa Ana, according to conservation groups and business owners who praised Feinstein's call."

FATE OF UTAH'S PUBLIC LANDS UP IN THE AIR. The [Deseret \(UT\) News](#) (8/24, 549K) reports that "Utah's public lands face a variety of alternate futures backed by conflicting priorities." According to the article, "ahead lies a field of options that range from oil and gas development to wilderness designation, the highest level of land preservation afforded by U.S. law." The article notes that "it's a dilemma that has played out in neighboring states, which saw different outcomes that could become a reality for Utah."

Utah Reps. Jason Chaffetz and Rob Bishop want to turn "what is today the Cleveland-Lloyd Dinosaur Quarry in Emery County into a national monument," and to upgrade the Dinosaur National Monument into a national park. Chaffetz "brought the plans forward during a conversation with the editorial board of the Deseret News on Monday, building on what Bishop has discussed about his public lands proposal for seven counties in eastern Utah." Meanwhile, "Bishop and his legislative team are currently drafting the bill, which would also set aside lands for designated wilderness, conservation, oil and gas extraction, and consolidate areas under the School and Institutional Trust Lands Administration." However, "getting the bill through the White House could be a 'tough sell,' Chaffetz conceded." The article notes that "the proposal would prohibit the president from designating national monuments in the future in any of the seven counties involved in the initiative, similar to policies that prohibit Antiquities Act designations in Wyoming and Alaska."

INTERIOR LAUNCHES NEW WEBSITE. The [FedScoop](#) (8/25) reports that on Friday, the Interior Department “quietly launched an updated DOI.gov that uses a new Drupal-based platform.” According to the article, “Virginia-based technology company Phase2 worked with BM to build the platform last year,” and “then earlier this year, Phase2 and Fig Leaf Software teamed up to migrate Interior’s content to the new system.” Interior spokeswoman Emily Beyer said, “We’re excited to be launching a new and improved doi.gov. In the coming days we’ll have more to share about the updated look and feel, and the platform supporting it.”

CONTROVERSY SURROUNDS HAWAII STATEHOOD DAY. [Yahoo! \(UK\)](#) (8/25, 39K) reports that “controversy circles the 56th anniversary of Hawaii becoming the newest state of the USA on 21 August and there are calls for it to be removed as culturally insensitive to Native Hawaiians.” The article notes that “independent activists are using the public holiday to gather support for Hawaiian sovereignty.” According to the article, “over the summer, the US Department of the Interior held a series of hearings inviting Native Hawaiians to comment on the formation of a federally recognised nation.”

SENATORS RAISE CONCERNS ABOUT FEDERAL TAX FORM PROCESSING. [The Hill](#) (8/25, Becker, 471K) reports that “the Senate’s top two tax writers pressed four federal payroll centers on Monday over concerns that key tax forms aren’t being processed quickly enough, which could make life easier for identity thieves.” Senate Finance Chairman Orrin Hatch and the panel’s top Democrat, Sen. Ron Wyden, said “they had heard concerns from state agencies that the four shared-service centers weren’t giving them wage and withholding information quickly enough.” Hatch and Wyden sent a “letter to the Agriculture Department’s National Finance Center, the Pentagon’s Defense Finance and Accounting Service, the Interior Department’s National Business Center and the General Service Administration’s National Payroll Branch.”

CONTINUING COVERAGE OF WILDFIRES. Continuing coverage of wildfires was provided by the [Houston \(TX\) Chronicle](#) (8/25, 2.28M), the [San Francisco \(CA\) Chronicle](#) (8/25, Subscription Publication, 3.35M), the [Tacoma \(WA\) News Tribune](#) (8/25, 278K), the [Atlanta \(GA\) Journal-Constitution](#) (8/24, 1.05M), the [Los Angeles \(CA\) Times](#) (8/24, Raab, 4.07M), the [Christian Science Monitor](#) (8/24, 455K), the [Houston \(TX\) Chronicle](#) (8/25, Volz), the [Houston \(TX\) Chronicle](#) (8/25), the [Boston \(MA\) Herald](#) (8/25, 548K), the [Washington \(DC\) Times](#) (8/23, Press, 344K), the [US News & World Report](#) (8/24, 811K), the [Denver \(CO\) Post](#) (8/25, 787K), the [Bozeman \(MT\) Daily Chronicle](#) (8/25, 54K), the [St. George \(UT\) Spectrum](#) (8/24, 46K), the [San Francisco \(CA\) Chronicle](#) (8/25, Subscription Publication, 3.35M), [T ME](#) (8/25, Geranios, Melley), [The Guardian \(UK\)](#) (8/24, 3.3M), [My Mother Lode \(CA\)](#) (8/25, 1K), the [Boise \(D\) Weekly](#) (8/25, 103K), the [Juneau \(AK\) Empire](#) (8/25, 15K), the [Indian Country Today Media Network](#) (8/24, 32K), and [KUSA-TV Denver \(CO\)](#) Denver (8/24, 248K).

ADDITIONAL COVERAGE SECRETARY JEWELL PRAISES LAKE LINK TRAIL DURING DEDICATION CEREMONY. Additional coverage of the dedication ceremony of the Lake Link Trail was provided [Cleveland Scene Magazine](#) (8/24, 29K).

ADDITIONAL COVERAGE SHENANDOAH NATIONAL PARK ESTABLISHES SISTER PARK RELATIONSHIP WITH NATURE RESERVE IN CHINA. Additional coverage that “Shenandoah National Park and the Baihuashan National Nature Reserve in China are building on shared similarities in becoming sister parks” was provided by the [Culpeper \(VA\) Star Exponent](#) (8/24, 17K).

ADDITIONAL COVERAGE OF SECRETARY JEWELL’S VISIT TO UPPER MISSISSIPPI RIVER NATIONAL FISH AND WILDLIFE REFUGE. In an editorial, the [La Crosse \(WI\) Tribune](#) (8/24, 87K) notes that “ten days ago, U.S. Secretary of the Interior Sally Jewell came to La Crosse to tour the Upper Mississippi River National Fish and Wildlife Refuge — an area that brings in 4 million visitors each year.” Jewell said, “This is a great example of very accessible public land that can bring the outdoors and nature into people’s everyday lives. It’s accessible. It supports a desire that visitors to Wisconsin and community members here have to connect with nature.”

ADDITIONAL COVERAGE WACO MAMMOTH SITE BECOMES NATIONAL MONUMENT. Additional coverage that “the Waco Mammoth Site became a National Monument on July 10 after President Obama signs executive order” was provided by the [Baylor Lariat \(TX\)](#) (8/24).

CONGRESS URGED TO RENEW LWCF. In an op-ed for the [Spokane \(WA\) Spokesman-Review](#) (8/23, 183K), Suzy Dix, a member of the board of trustees for The Nature Conservancy for the state of Washington, and board member of the Dishman Hills Conservancy, urges Congress to act on the Land and Water Conservation Fund (LWCF). She notes that “over the years, the LWCF has made numerous investments in our communities, protecting Turnbull and Little Pend Oreille national wildlife refuges and improving public access to the Colville National Forest.” Dix highlights that “these lands are used and loved by hunters, anglers, hikers and wildlife watchers from across the state, and help support a strong outdoor economy here in Spokane County, where outdoor recreation on public lands supports 12,500 jobs and \$1.3 billion in consumer spending each year.”

Additional pieces calling for the renewal of the LWCF was carried in the [Pittsburgh Post-Gazette](#) (8/25, Board, 493K), the [Helena \(MT\) Independent Record](#) (8/25, 39K), the [Asbury Park \(NJ\) Press](#) (8/23, 378K), the [Bozeman \(MT\) Daily Chronicle](#) (8/25, 54K), the [Cleveland Plain Dealer](#) (8/25, 1.03M), the [York \(PA\) Daily Record](#) (8/25, 149K), and the [Tahoe \(CA\) Daily Tribune](#) (8/25, 27K).

Empowering Native American Communities:

PANEL AFFIRMS DECISIONS BY BIA BY SIDING WITH ELEM INDIAN COLONY OF POMO INDIANS. [Law 360](#) (8/25, 21K) reports that “the Interior Board of Indian Appeals affirmed three prior decisions from the Bureau of Indian Affairs rejecting petitions from a California tribal member to nullify a November 2012 tribal election, saying the individual was not barred from the election process and lacked standing to appeal on behalf of third parties.” IBIA judges Steven K. Linscheid and Thomas A. Blaser sided with the Elem Indian Colony of Pomo Indians on Wednesday.

PANEL SAYS BIA BUNGLED CALIFORNIA TRUST LAND DECISION. [Law 360](#) (8/25, 21K) reports that the Interior Board of Indian Appeals on Friday “vacated and remanded a Bureau of Indian Affairs decision to take land in San Diego County into trust for a California tribe, ruling the official who made the decision failed to consider its impact on non-Indian landowners’ property rights.” At issue is “an application from the Sycuan Band of the Kumeyaay Nation in August 2013 to take around 18 acres of land and related easements into trust.”

BIA INVESTIGATING SHOOTING AT LODGE GRASS. The [AP](#) (8/25) reports that “law enforcement officers in Lodge Grass arrested a man who had reportedly been driving around town firing a gun.” No one was injured. The BIA is investigating the shooting.

ALASKA TO CHALLENGE COURT’S RULING ALLOWING ALASKA NATIVE TRIBES TO PUT LAND INTO FEDERAL TRUST. The [Juneau \(AK\) Empire](#) (8/25, 15K) reports that “the state of Alaska will challenge a federal court ruling that would allow Alaska Native tribes to put land into federal trust, protecting it from state and local taxes.” The state filed its appellant brief with the U.S. Circuit Court of Appeals for the District of Columbia on Monday.

LAWSUIT CHALLENGES CONSTITUTIONALITY OF OKLAHOMA INDIAN CHILD WELFARE ACT. The [Tulsa \(OK\) World](#) (8/25, 364K) reports that “an Oklahoma couple has filed a federal lawsuit challenging the constitutionality of portions of the Oklahoma Indian Child Welfare Act.” According to the article, “the couple specifically objects to provisions of the Oklahoma act that permit tribes to intervene in private, voluntary adoption cases involving Indian children.”

Additional coverage was provided by the [Fort Smith \(AR\) Times Record](#) (8/25, 107K).

RESIDENT OPPOSES INDIAN COUNTRY LAND STATUS IN ALASKA. In a piece for the [Fairbanks \(AK\) News-Miner](#) (8/25, 42K), Mary Bishop lists a “few reasons to avoid Indian country land status in Alaska.” One of the reasons is the BIA “rubber-stamping tribal trust applications.” According to Bishop, the “BIA has a record of rubber-stamping applications for tribal trust land with little if any regard for neighboring complaints and concerns — or else sitting on them forever.”

Office of Insular Affairs:

OIA COMMITS TO \$5 MILLION FOR GUAM EDUCATION. In a piece for the [Pacific \(GUM\) Daily News](#) (8/24, 61K), Jon Fernandez, the superintendent of the Guam Department of Education, notes that “to assist with facility improvements, the US Department of Interior, Office of Insular Affairs, has committed \$5 million over five years to address critical health and safety needs, based on the Army Corps of Engineers Report completed in 2013.”

Tackling America’s Water Challenges:

SMITH WANTS MCCARTHY TO TESTIFY OVER GOLD KING MINE SPILL. The [Washington Times](#) (8/25, Richardson, 344K) reports House Science, Space, and Technology Chairman Lamar Smith says he has asked the head of Environmental Restoration LLC to testify before a September 9 hearing on the Gold King Mine spill. Alexander has also called on EPA Administrator McCarthy to testify. In a statement, he said, “Both parties should be prepared to be more forthcoming with Congress than EPA has been up to this point.”

Additional coverage of the spill was provided by [The Hill](#) (8/25, Cama, 471K), the [Washington \(DC\) Post](#) (8/25, Felicia Fonseca |, Ap, 6.76M), and the [Denver \(CO\) Post](#) (8/25, Paul, 787K).

BOR DIVERTS WATER TO KLAMATH WATER TO AVOID FISH KILLS. The [Greenwire](#) (8/24, Subscription Publication) reports that the BOR is “again diverting water to the Klamath River in an attempt to avoid massive fish kills.” The article notes that “three tribes rely on the Oregon river for subsistence fishing, and a fourth is hoping that aging hydroelectric dams could be removed so it can harvest salmon there.” The tribes have “requested a diversion to prevent an outbreak of a gill-rotting disease that spreads in low- and warm-water conditions.” On Friday, the BOR “began releasing water from the Lewiston Dam on the Trinity River, a tributary to the Klamath, in order to avoid a repeat fish kill.”

The [AP](#) (8/25, 2 28M) reports that “agricultural water providers in the Central Valley of California are asking a federal judge to stop releases of extra water intended to help salmon in the Klamath Basin survive the drought.” The legal action “seeking a preliminary injunction was filed late Friday in U.S. District Court in Fresno by Westlands Water District and the San Luis & Delta-Mendota Water Authority, which supply farmers.” The water districts argue the BOR has “no authority to send water that should go down the Sacramento to the Klamath River to help salmon that are not protected by the Endangered Species Act.”

Additional coverage was provided by the [Oregonian](#) (8/25, 756K), [KTVZ-TV Bend \(OR\)](#) Bend, OR (8/25, 32K), and [KFMB-TV San Diego \(CA\)](#) San Diego (8/25, 53K).

CALIFORNIA'S NATIVE FISH AN OVERLOOKED VICTIM OF DROUGHT. The [Los Angeles Times](#) (8/25, Boxall, 4 07M) reports that “the drought’s toll on California has been measured mostly in terms of idled cropland, dried up domestic wells and brown lawns,” but “less visible but more devastating has been damage to native fish that struggle for survival in the best of times.” The article notes that “four years of drought — and the accompanying relaxation of environmental standards by state regulators — have compounded the harm of dams and diversions that long ago thwarted fish migration and destroyed habitat.”

Additional coverage was provided by the [Washington \(DC\) Post](#) (8/25, Fears, 6.76M).

SAN DIEGO PURSUING DESALINATED WATER. In his column for the [Sacramento \(CA\) Bee](#) (8/25, 535K), Dan Walters writes that “San Diego’s vigorous pursuit not only of desalinated water but other supplies, as well as aggressive conservation, are aimed at making it less dependent on water from Southern California’s Metropolitan Water District, which in turn is highly dependent on water from Northern California via the California Aqueduct and its own aqueduct from the eastern slope of the Sierra.” But “as Southern California becomes less dependent on Northern California water, the rationale for the MWD’s essential support of Brown’s plan to build two water tunnels beneath the Sacramento-San Joaquin Delta becomes ever-weaker.” San Diego, “the MWD’s largest single subagency, is openly opposed to the tunnels, saying they are not needed to make the region water-independent and will cost too much for the very marginal benefit they will bring.” According to Walters, “thus, in a roundabout way, were Brown to help bring additional desalination supplies on line, he would be undercutting the tunnel project, which he clearly sees as completing the State Water Project his father began and adding to his own political legacy.”

Securing America’s Energy Future:

Onshore Energy Development:

INTERIOR REVIEWING COAL LEASE PROGRAM. The [Santa Fe New Mexican](#) (8/24, 67K) reports that “the Department of the Interior is leasing millions of acres of federal coal to private mining companies even as the Obama administration ramps up efforts to curb greenhouse gases from coal-burning power plants and natural gas pipelines under the president’s Climate Action Plan.” The article notes that “to environmentalists and some Navajo activists living near coal mines in New Mexico, the disconnect between leasing the coal while clamping down on the climate-changing pollution it causes couldn’t be more stark.” The Interior Department has “spent the last few months listening to public comments about how to revamp the federal coal leasing program.”

LONGER COMMENT PERIOD SOUGHT ON PROPOSED STREAM RULE. The [Southern Illinoisian](#) (8/25, 23K) reports that “some state representatives and a state coal association are calling for brakes on a government agency that is trying to update its rules governing the impact of mining on surface and ground waters, wildlife and the environment.” State Sen. Gary Forby, Sen. Sam McCann, and the president of the Illinois Coal Association “want the U.S. Department of the Interior to slow movement on its Draft Stream Protection Rule.” According to the article, “though the government entity has proposed taking comments on that change for another month — until Sept. 25, 2015 — opponents are asking that the comment period be extended for at least 180 days, or six months.”

APPALACHIAN COMMUNITIES EMBRACE POWER PLUS PLAN. The [Greenwire](#) (8/24, Subscription Publication) reports that “roughly a dozen communities across Appalachia have passed resolutions supporting President Obama’s plan to help areas reeling from the coal mining downturn.” The Power Plus Plan “includes grants through several agencies” and “it also expedites \$1 billion in spending from the abandoned coal mine cleanup fund and would shore up miner pensions.” The article notes that “communities that have called for Congress to approve the plan in recent weeks include Campbell County, Tenn.; Wise County, Va.; and Harlan County, Ky.”

BLM APPROVES TWO MASTER LEASING PLANS FOR DRILLING IN COLORADO. The [Greenwire](#) (8/24, Subscription Publication) reports that the BLM “continues to advance onshore oil and gas reforms, approving two new master leasing plans in northern Colorado that include drilling restrictions designed to protect sensitive wildlife across thousands of acres.” BLM Colorado State Director Ruth Welch “announced Friday that she finalized two records of decision approving the Dinosaur Trail and the Shale Ridges and Canyons master leasing plans (MLPs).” Welch said “the plans will balance natural resource protections with the development of federal lands and subsurface mineral estate.”

BLM SAYS LEASE REVIEW PROPOSAL NOT A PREFERENCE. The [Grand Junction \(CO\) Daily Sentinel](#) (8/25, 73K) reports that the BLM is “warning against reading too much into the fact that it is considering retention of 65 oil and gas leases on the White River National Forest as its proposed action in an upcoming draft environmental review.” Spokesman David Boyd said the bureau is “required to identify a proposed action when it lays out alternatives for consideration in its draft environmental impact statement, but that’s different from a preferred alternative.” He said, “Even though the wording suggests that that’s what we’re saying we want to do, that’s just the action that initiates” the EIS process. Boyd was “responding to concerns raised by Pitkin County officials last week.”

Offshore Energy Development:

CALIFORNIA PADDLERS RAISE AWARENESS FOR OFFSHORE ENVIRONMENTAL PROTECTION. The [Daily Beast](#) (8/24, Joiner, 978K) reports that “a flotilla of Californians” organized by the Surrfrider Foundation paddled about three miles to an offshore oil platform off of Santa Barbara, where they unfurled a 70-foot-long floating banner that read “#CrudeAwakening” to raise awareness for several bills that they claim would increase offshore environmental protection. Specifically, the group supports bills SB788, SB414, AB864 and SB295 that would “close a loophole that allows new drilling in a designated Marine Protected Area, establish a mandatory team of trained seamen to act as emergency responders to any spills, require companies to use the ‘best available technology’ on pipelines, and improve inspection requirements.”

OFFICIALS REOPEN SUMMERLAND BEACH. The [AP](#) (8/25) reports that Santa Barbara County officials have reopened Summerland beach, stating that immediate health concerns have diminished, although it is still unclear where the oil is coming from. The article notes that natural oil seepage from the ocean floor is common in the area, “and there are also old wells in the area.”

America’s Great Outdoors:

Bureau of Land Management:

BLM TOP DIRECTOR TO RUN BURNING MAN LAW ENFORCEMENT. The [Reno \(NV\) Gazette-Journal](#) (8/21, 179K) reports that the BLM has “opted for a change of leadership and has designated the highest ranking law enforcement director in the agency to oversee federal law enforcement operations at Burning Man this year.” According to BLM spokesman Jeff Krawse, “Washington, D.C.-based BLM Law Enforcement and Security Director Salvatore Lauro will be the senior BLM law enforcement official on scene throughout the event.” The article notes that “in recent years, Special Agent-in-charge Dan Love of Utah, whose jurisdiction also includes Nevada, has overseen law enforcement operations at Burning Man,” and “Burning Man officials and former BLM director Bob Abbey named Love, along with BLM Winnemucca District manager Gene Seidnitz, in a series of emails that stated Love and Seidnitz were behind a list of unprecedented demands from the BLM.”

BLM, TEXAS RANCHERS EMBROILED IN DISPUTE OVER RED RIVER PROPERTY. The [Greenwire](#) (8/24, Subscription Publication) reports on the dispute over Red River property between the BLM and Texas ranchers.

BLM CRAFTING PLAN TO MANAGE TARGET SHOOTING IN UTAH. The [Salt Lake \(UT\) Tribune](#) (8/25, 492K) reports that “after years of damage and conflicts with nearby property owners, the BLM has started crafting a plan to manage target shooting on 9,000 acres of federal land on the eastern slope of the Lake Mountains.” In a related move, the bureau “proposes giving 160 acres to Utah County to operate a public shooting range.” Bekee Hotze, the BLM’s Salt Lake field office manager, said, “We are not trying to exclude a user group. We are trying to enhance the multiple uses on the land. But it can’t be every use everywhere.”

BLM CLOSES CASE ON LAS VEGAS DEVELOPER’S PROPOSED LAND SWAP. The [AP](#) Tucson, AZ (8/25, 23K) reports that “a Las Vegas developer isn’t getting access to an aquifer in the Red Lake area after failing to respond to a Bureau of Land Management information request.” Kingman Farms owner Jim Rhodes “proposed a 21,000-acre land swap that drew concern over the access it would have given him to area water sources.” Colorado River District Manager Roxie Trost said the BLM “requested more information on the exchange more than two months ago, but the case was closed when Rhodes didn’t respond.”

JUDGE SAYS USE OF MOTORIZED VEHICLES FOR JUNIPER REMOVAL IN WILDERNESS IS PROHIBITED. The [Salem \(OR\) Capital Press](#) (8/24, 113K) reports that "a federal judge has ruled that it's unlawful to use motorized vehicles to remove juniper from nearly 80,000 acres in the vicinity of Oregon's Steens Mountain." The BLM is "cutting juniper from roughly 336,000 acres in the Steens Mountain Cooperative Management Area because the trees are crowding out native vegetation." U.S. District Judge Garr King held that "using motorized vehicles within 'wilderness study areas' is prohibited by a federal law that governs management of the Steens Mountain area."

ECOLOGIST ARGUES WILD HORSES SHOULD BE PROTECTED. In an op-ed for the [Reno \(NV\) Gazette-Journal](#) (8/24, 179K), Craig C. Downer, a wildlife ecologist, argues that "wild horses should qualify as endangered 'distinct population units' for protection under the Endangered Species Act." According to Downer, "they quickly revert to the wild and adapt harmoniously and in complementary manner to each unique ecosystem, yet they are being either eliminated from their legal lands or brought to sub-viable, mere token population levels by their unjust enemies, including betrayers in the very branches of our government charged with protecting them – the BLM and the U.S. Forest Service!" Downer concludes that "we must quickly rectify this miserable situation and learn to share the land and freedom with such magnificent and highly evolved beings, as the progressive Wild Free-Roaming Horses and Burros Act still intends."

Fish and Wildlife Service:

FWS SEEKS COMMENTS ON CRITICAL HABITAT DESIGNATION FOR MARBLED MURRELETS. The [Hill](#) (8/25, Wheeler, 471K) reports that the FWS is "asking the public to comment on the areas in Washington, Oregon and California it has designated as a critical habitat for marbled murrelet." According to the article, "the current designation includes 3.7 million acres, but the agency is asking for help determining whether all of that area meets the statutory definition of critical habitat."

NORTHERN ARAPAHO TRIBE WANTS FEDERAL GOVERNMENT TO DROP EAGLE APPEAL. The [AP](#) (8/25) reports that "the Northern Arapaho Tribe is calling on the federal government to drop a legal appeal that's blocking the tribe from killing bald eagles for religious purposes on the central Wyoming reservation it shares with another tribe." According to the article, "the federal government in June appealed this spring's decision by U.S. District Judge Alan B. Johnson of Cheyenne that the U.S. Fish and Wildlife Service violated the religious rights of the Northern Arapaho by denying the tribe permission to kill bald eagles for its annual Sun Dance." The agency's "appeal of Johnson's ruling is pending in the 10th Circuit Court of Appeals in Denver and the agency has just over a month left to file a brief laying out its arguments."

HONEYWELL AGREES TO \$300,000 PENALTY FOR RELEASING CHEMICALS INTO JAMES RIVER. [WVBT-TV](#) Richmond, VA (8/25, 94K) reports that "Honeywell has agreed to pay a \$300,000 penalty for releasing chemicals into the James River from its Hopewell manufacturing facility, according to officials with the Virginia Department of Environmental Quality." The firm "signed a consent order calling for the fine and additional repairs, which will cost more than \$13 million, to prevent future spills." The article notes that "in addition to the proposed enforcement action, DEQ and the U.S. Fish and Wildlife Service are coordinating to address natural resource damages caused by past spills."

POINT LAY PREPARES FOR POSSIBLE WALRUS HAULOUT. [Alaska Dispatch News](#) (8/22, 219K) reports that "in case thousands of walrus haul out again this year on the shores of Point Lay, the village is taking a proactive step to ensure that they are protected from the glare of international media attention." According to the article, "in a release this week from various wildlife agencies in conjunction with the Native Village of Point Lay, the town asked that media keep their distance."

KENTUCKY ENDS MOUNTAIN LION INVESTIGATION. The [Louisville \(KY\) Courier-Journal](#) (8/24, 414K) reports that "Kentucky wildlife officials are concluding that someone brought the mountain lion that was shot last year into the state, but they don't know who might have done it and have suspended their investigation." Also, "the official necropsy of the mountain lion found that there was 'no conclusive evidence the animal is of captive origin.'" The article notes that "the animal's DNA likely linked it to a wild population in South Dakota, testing by the U.S. Fish and Wildlife Service found."

Additional coverage was provided by [WKYT-TV Lexington \(KY\)](#) Lexington, KY (8/25, 116K) and [WTVQ-TV Lexington \(KY\)](#) Lexington, KY (8/25, 1K).

National Park Service:

NPS LOOKING AT SITES FROM RECONSTRUCTION ERA. The [New York Times](#) (8/25, Schuessler, Subscription Publication, 11 82M) reports that the NPS has "hired two historians to conduct its first comprehensive survey of 'nationally significant' sites connected with Reconstruction — the first step toward possible designation of a new site by Congress." The article notes that "the initiative was announced in May," and "since then, the massacre of nine African-Americans at a church in Charleston, S.C., in the midst of continuing debates over the Black Lives Matter campaign, has only underlined the enduring relevance of an era that saw both the dramatic expansion of rights for African-Americans and their violent rollback." The NPS is "looking at sites across the country," but "if there's a logical place to center an uplifting story of Reconstruction, many say, it's the area around Beaufort, a picturesque city of 13,000 that sits between several popular tourist destinations: Charleston and Hilton Head Island in South Carolina and Savannah, Ga."

NPS PROVIDES FUNDING FOR SANDY-DAMAGED STRUCTURES. [New Jersey Local News](#) (8/25, 837K) reports that "the City of Trenton has received \$17,475 in grant money for the replacement of 10 windows at the former Roebing Machine Shop that were damaged in Hurricane Sandy." The article notes that "the Machine Shop was among dozens of historic properties that were able to make storm repairs through a federally-supported \$8 million grant program." The NPS "provided the funding, while the state's historic preservation office along with the New Jersey Historic Trust — an agency connected with the state Department of Community Affairs — administered the grants."

INDIAN RIVER LIFE-SAVING STATION RECEIVES NPS GRANT. The [Lewes \(DE\) Cape Gazette](#) (8/25, 42K) reports that "the Indian River Life-Saving Station Museum, located in Delaware Seashore State Park, has been awarded a grant of just over \$25,000 through the Maritime Heritage Grants Program of the National Park Service."

WORK BEGINS ON JEWEL CAVE VISITOR CENTER EXPANSION PROJECT. The [AP](#) (8/25, 2.28M) reports that "work began Monday on a \$671,000 expansion project for the visitor center at Jewel Cave National Monument in western South Dakota." Acting Superintendent Donald Hart said, "This expansion will improve the visitor experience by making it easier for visitors to enter and exit the cave, as well as providing more space for those waiting for a cave tour." The NPS has said "the 15,000-square-foot expansion will mean more space for environmental education, including classrooms, theater space and educational display space."

YELLOWSTONE NATIONAL PARK SEEKS INPUT ON IMPROVEMENT PLAN. The [AP](#) (8/25, 2.28M) reports that Yellowstone National Park is "seeking public comment on a plan to rehabilitate many of the overlooks and trails along the rim of the Grand Canyon of the Yellowstone River." The NPS says "the project would rehabilitate a number of existing overlooks and trails situated along both the north and south rims of the canyon." The article notes that "areas to be rehabilitated include: the Brink of the Upper Falls overlooks and trails, the Brink of the Lower Falls overlook and trail, Inspiration Point overlook and trail, and portions of the North and South Rim Trails."

NPS CAUSE UNDETERMINED IN DOUBLE CLIMBING DEATH AT GRAND TETON NATIONAL PARK. The [AP](#) (8/25, 2.28M) reports that the NPS has "no word yet on what caused two women climbers to fall to their deaths at Grand Teton National Park over the weekend." The climbers, 27-year-old Tyler Strandberg and 28-year-old Catherine Nix, "died Saturday morning after falling about 200 feet while trying to climb 12,300-foot Teewinot Mountain, the sixth-tallest peak in the Teton Range." According to park spokesman Andrew White, "a third member of the climbing party, 26-year-old Rebecca Anderson of Jackson, was rescued unhurt from a small ledge by helicopter."

Additional coverage was provided by [NBC News](#) (8/25, 3.73M), [Reuters](#) (8/24, Zuckerman), [Fox News](#) (8/24, 8 91M), and [TIME](#) (8/25, 19.55M).

MAN DIES IN HANG-GLIDING ACCIDENT AT GOLDEN GATE NATIONAL RECREATION AREA. The [AP](#) (8/25, 2.28M) reports that "a 69-year-old man has died in a hang-gliding accident in San Francisco's Golden Gate National Recreation Area." The NPS said "in a statement that the accident occurred Sunday afternoon immediately after takeoff and may have involved a mechanical failure." According to the article, "park police and fire department paramedics found the man 30 feet down the side of a cliff below the hang-gliding launch pad at Fort Funston in the recreation area."

Additional coverage was provided by [WRC-TV](#) Washington (8/25, 345K).

SARATOGA BATTLEFIELD HAS NEW SUPERINTENDENT. The [Saratogian \(NY\)](#) (8/21, 22K) reports that Amy Bracewell is the new superintendent of Saratoga National Historical Park. She said, "I'm really impressed by the landscapes here. We're very lucky to have such supportive neighbors and towns that understand the value of preserving these views." Bracewell, "who took over in mid-July, replaces former long-time park superintendent Joseph Finan who has retired."

ADDITIONAL COVERAGE NPS CELEBRATING ANNIVERSARY. Additional coverage of that the NPS is celebrating its 99th birthday this Tuesday was provided by the [St. George \(UT\) News](#) (8/24, 3K), the [Houston \(TX\) Chronicle](#) (8/25, 2 28M), the [Knoxville \(TN\) Daily Sun](#) (8/25), the [Knoxville \(TN\) News Sentinel](#) (8/25, Staff, 235K), the [Daily Astorian \(OR\)](#) (8/24, 23K), and [WATE-TV Knoxville \(TN\)](#) Knoxville, TN (8/24, 59K).

ADDITIONAL COVERAGE OF EVERY KID IN A PARK INITIATIVE. Additional coverage of the Every Kid in a Park Initiative was provided by [KFQX-TV](#) Grand Junction, CO (8/25, Marshall, 1K).

SUPPORT URGED FOR NATIONAL PARK IN KATAHDIN REGION. In an op-ed for the [Bangor \(ME\) Daily News](#) (8/24, 223K), Lisa Pohlmann, executive director of the Natural Resources Council of Maine, and Ken Olson, chair of the Acadia National Park Maine-wide Centennial Working Group, argue in favor of creating a national park in the

conservation, recreation, economic and community status benefits it would produce." They urge Sens. Susan Collins and Angus King and U.S. Reps. Chellie Pingree and Bruce Poliquin to "make it happen."

Top National News:

OBAMA BLASTS "FOSSIL FUEL INTERESTS" IN SPEECH AT CLEAN ENERGY SUMMIT. Print and online coverage of the President's speech at the National Clean Energy Summit in Las Vegas focuses on two main areas: the announcement of new executive actions aimed at promoting more clean power projects across the country, and the President's criticism of "fossil fuel" interests that oppose his agenda. The [Washington Post](#) (8/25, Mooney, 6.76M) says the President's appearance at the summit "was the first stop in a climate and energy-focused tour that will also take the president to New Orleans and Arctic Alaska this month." In a story posted Monday evening, [USA Today](#) (8/24, Korte, 5.23M) reports that during the tour, the President "will deliver a three-pronged message: The United States needs to increase the use of alternative energy sources, make coastal communities more resilient and urge a global response to climate change."

The [Las Vegas Sun](#) (8/25, Roerink, Shine, 199K) reports that the President said "now 'is not the time to pull back' on federal investment in renewable energy projects," adding that "the nation as a whole was in the middle of a large-scale transition towards new forms of energy production." The Sun also notes that the President's appearance at the summit "underscores his close relationship with [Senate Minority Leader] Reid," adding that they "have been among the most outspoken on climate change and have worked on projects to cut the prices of solar panels and reduce carbon emissions."

[Politico](#) (8/24, Restuccia, Dove, 942K) says the President "wielded" his "yes we can" campaign slogan "to hail the green energy revolution" and "to bash the critics who he said were desperately clinging to the past as a renewable energy future approaches," noting that he "lit into fossil fuel interests, pointedly calling out the Koch brothers, Reid's longtime foes." [USA Today](#) (8/24, Korte, 5.23M) reports that the President "made a political and an economic case for solar energy," noting that "the explosive growth in solar power 'has some big fossil fuel interests pretty nervous.'"

[Voice of America](#) (8/24, 32K) noted on its website that the President's speech "was aimed at countering fossil fuel and utility interests that have been working to undercut clean energy policies with arguments that the matter should be left to the free market." The [Washington Times](#) (8/25, Boyer, Wolfgang, 344K) says the President accused "conservative opponents of his climate change agenda...of carrying out an un-American campaign to protect their fossil fuel interests at the expense of the country." He also "chided congressional Republicans for fighting higher spending on his clean energy agenda and instead 'chasing mindless austerity.'"

[National Journal](#) (8/24, Plautz, Subscription Publication, 144K) noted on its website that the President "highlighted the efforts that private companies and even some utilities...have made to invest in renewable energy or allow homeowners to go green," noting that those measures "stand in contrast...to the efforts of 'fossil fuel interests or conservative interests or the Koch Brothers' to roll back renewable energy incentives." On its website, [CBS News](#) (8/25, 8.2M) says the President "highlighted the unusual coalition of tea party activists and environmentalists that supports solar power," saying, "it is rare the tea party and I are on the same side of an issue...I agree with them here."

An [AP](#) (8/25, Ritter) story noted that Obama was using the summit "to announce new executive actions and other efforts aimed at making it easier for homeowners and businesses to invest in green energy improvements." [Reuters](#) (8/25, Edwards) says the President discussed new financial incentives to encourage the development and use of solar power including \$1 billion in loan guarantees for new research projects and savings for homeowners who use renewable energy. The [Blaze](#) (8/24, 1.66M) reported that the President's "package of executive actions includes \$1 billion in new taxpayer subsidies to the green energy industry and homeowners, while also promoting existing \$10 billion in loan programs." A [Christian Science Monitor](#) (8/24, Unger, 455K) analysis describes the new initiatives as "modest, especially when compared to the sector-wide Clean Power Plan finalized earlier this month."

The [New York Times](#) (8/25, Harris, Subscription Publication, 11.82M) provides more detail on the Administration measures "to encourage the use of solar power," which were announced "hours before President Obama was scheduled to fly to Nevada to speak at the National Clean Energy Summit there," and notes that for the President, the measures and the speech Monday "are part of an increasingly intense effort to highlight the dangers of climate change and implement policies to address them." The [Washington Post](#) (8/25, Mooney, 6.76M) says the announcement that the Administration will seek to expand the loan program was "heralded by the solar industry."

Additional coverage was provided by the [Washington \(DC\) Examiner](#) (8/25, 213K), the [Washington \(DC\) Times](#) (8/25, 344K), [Bloomberg News](#) (8/24, Doring, 2.66M), [Bloomberg News](#) (8/25, Doring, Olorunnipa, 2.66M), [Reuters](#) (8/25), and [Reuters](#) (8/25, Edwards).

Reid: Utilities Should Take A Lesson From "Moneyball." [Roll Call](#) (8/24, Lesniewski, 113K) reported in its "#WGDB" blog that as Reid kicked off the summit Monday, he likened "utility companies that undervalue renewable power to an ill-managed baseball team," saying, "Nevada and electric utilities should learn from 'Moneyball.' Just as Major League Baseball was stuck in the past, electric utilities continue to rely upon business models from past centuries. Companies you will hear today are developing new energy technologies and services of which Thomas Edison never dreamed." Reid compared the efforts of former Oakland Athletics general manager Billy Beane, "with electric utilities like Nevada Energy, saying 'utilities cannot remain attached to the past.'" Reid added, "The Athletics began using an analytical, evidence-based approach to assemble a baseball team. With the help of state-of-the-art computer software, the team analyzed the value of every player; identified how to fully utilize their talents; and maximized the team's return on investment." The [Las Vegas Review-Journal](#) (8/25, 378K) says Reid "helped unveil a new 80-acre 'community solar generation project' to be managed by Pahrump-based Valley Electric Association." The project "will create 200 jobs and an unspecified amount of new tax revenue, said Valley Electric CEO Tom Husted."

Switch Joins Obama's Climate Action Plan. The [Las Vegas Sun](#) (8/25, Roemik, 199K) notes that the Nevada data company Switch has become the first company in the state "to sign the White House's American Businesses Act on Climate Pledge," which seeks to build support for the President's Climate Action Plan.

AMID BIDEN SPECULATION, WHITE HOUSE WON'T RULE OUT ENDORSEMENT IN DEMOCRATIC RACE. All three broadcast networks reported in some detail on the increasing speculation that Vice President Biden will enter the presidential race, with each giving the story about two minutes of coverage. Reports focus on Biden's meetings with President Obama and Sen. Elizabeth Warren, Biden's prospects against Democratic front-runner Hillary Clinton, and on how Obama might deal with an unexpected nomination fight between two of the most prominent members of his Administration.

[ABC World News](#) (8/24, story 3, 2:05, Stephanopoulos, 5.84M) reported that "all eyes on" Biden after his "secret meeting" with Warren over the weekend and his lunch with the President today, saying that speculation on a Biden run is at a "fever pitch, which could put President Obama in an awkward spot: Does he endorse Hillary or Joe?" ABC's Jon Karl asked White House Press Secretary Josh Earnest about the speculation at his daily briefing, with Earnest responding, "The President has indicated that to add Joe Biden to the ticket as his running mate was the smartest decision that he had ever made in politics." Many of the other reports focus on Earnest's response to Karl. [Reuters](#) (8/25, Mason), meanwhile, reports that in his comments, Earnest also said, "I wouldn't rule out the possibility of...an endorsement in the Democratic primary." [Politico](#) (8/24, Gass, 942K) notes that Earnest said Obama "is not 'torn' over the issue...as running for president is an "intensely personal decision."

The [CBS Evening News](#) (8/24, story 6, 1:55, O'Donnell, 5.08M) reported that Obama "had lunch with his vice president" on Monday, and "it appears the menu included presidential politics." CBS (Goldman) added, "Sources tell CBS News that President Obama has given his vice president the green light to mull a White House run," though "a Biden candidacy could be awkward for the President with his former secretary of state, Hillary Clinton, the Democratic front-runner." [NBC Nightly News](#) (8/24, story 6, 2:05, Holt, 7.86M) said that "a big dilemma is emerging" for Obama "amid more signs that Vice President Biden is seriously considering challenging Hillary Clinton for the Democratic nomination." As for Biden's meeting with Warren, NBC's Peter Alexander said it "has electrified the political world, especially liberal Democrats not sold on Clinton, many of whom have flocked to Bernie Sanders." Sanders: "Joe would be a formidable opponent. I'm not sure who politically it would help."

The [AP](#) (8/25, Pace) says Biden "has been ramping up discussions" about whether he will run, which "would put Obama in an awkward spot." The [Wall Street Journal](#) (8/25, Subscription Publication, 5.95M) says that while there now seems to be a real chance that Biden will enter the race, he would have a hard time catching up with Clinton's fundraising. The [Washington Post](#) (8/25, Gold, 6.76M) reports Biden has invited "major Democratic fundraisers" to his US Naval Observatory residence after Labor Day. [The Hill](#) (8/24, Richardson, 471K) also reports on the planned meeting.

Jonathan Allen of [Vox](#) (8/24, 1.1M) writes that Biden "starts with a huge fundraising deficit and polling numbers that have been consistently between 10 percent and 15 percent for the last month. ... So, it's an uphill battle for Biden, even with the working-class voters on whom he's staked his appeal as a candidate. That doesn't mean he won't do it. He's run and lost twice before."

Dan Balz writes in the [Washington Post](#) (8/25, 6.76M) that "personal issues stand as the biggest unresolved obstacle" for Biden, who is "trying to gauge whether his family is emotionally prepared for a grueling campaign while still grieving over the recent death of his son Beau." Those close to the Biden family say he is "now leaning more toward running than he was earlier in the summer, though he is still weeks from a decision."

William McGurn of the [Wall Street Journal](#) (8/25, Subscription Publication, 5.95M) says a Biden entry could help to distance the White House from the ongoing questions about Clinton's email server. But the [Washington Times](#) (8/25, Boyer, 344K) reports Earnest did say it is "too early for Democrats to worry about" Clinton's "faltering" campaign. [Bloomberg Politics](#) (8/24, Chipman, 247K), and [The Hill](#) (8/24, Fabian, 471K), and the [NPR](#) (8/24, 1.85M) website run similar reports.

A [Wall Street Journal](#) (8/25, Subscription Publication, 5.95M) editorial says Earnest would not have commented that the President thinks his decision to choose Biden as a running mate was "the smartest decision he's ever made in politics" without the President's approval, which raises questions about the White House's feelings about Clinton's candidacy and what the President and Biden know about the controversy surrounding her private email server.

Podesta Says He Is Not Nervous About Possible Biden Run. [Politico](#) (8/24, Restuccia, 942K) reports Clinton campaign chair John Podesta said Monday "that he isn't losing sleep over the possibility that Joe Biden will jump into the race." Podesta told reporters, "Am I nervous? No. ... It's his decision to make about whether he's going to get in. But I'm convinced that we have a strong campaign – that she's the right candidate." [USA Today](#) (8/25, Gaudiano, 5.23M) says Biden and Clinton "have a long history together," and a Biden run would "test that friendship."

Warren Supporters "Lukewarm" On Biden. [Politico](#) (8/24, Debenedetti, 942K) writes that despite Biden's meeting with Warren, many of those who tried to draft the Massachusetts senator into the presidential race are "lukewarm on him." That is "a considerable problem because Biden, to be successful, would need to appeal to a large majority of progressives who are disenchanted with Clinton, while persuading them that he's a better vehicle for their beliefs than Sanders."

Biden Has "Packed September Schedule." [Bloomberg News](#) (8/24, Talev, 2.66M) says Biden "is gearing up for a packed September schedule in his day job that could showcase him as the politician best poised to carry on" Obama's policies, "or open him up to new lines of attack if he stumbles. These include mid-September votes in Congress on an Iran deal that Biden has been deeply involved in promoting; visits to Washington by Pope Francis and Chinese President Xi Jinping; a looming budget showdown; and administration efforts on climate change, renewing the Export-Import Bank's charter, criminal justice reform and closing the terrorism detention facility at Guantanamo Bay."

Biden Selects MPAA's Bedingfield As New Communications Director. The [AP](#) (8/24, Lederman) reports Biden "has chosen a top film industry official and former spokeswoman for John Edwards' 2008 presidential campaign to be his new communications director." Kate Bedingfield was most recently vice president of corporate communications for the Motion Picture Association of America. [Variety](#) (8/24, Johnson, 552K) says Bedingfield "joined the MPAA in 2011, before which she was associate communications director at the White House." The [Washington Times](#) (8/25, Boyer, 344K) and [Hollywood Reporter](#) (8/24, Vlessing, 736K) also report on the choice.

IN WILD DAY OF TRADING, US AND GLOBAL MARKETS DROP SHARPLY. The sharp drops that afflicted global financial markets on Monday are the top news item across the media spectrum including all three network newscasts, which devoted a combined 10 minutes to the story. The media consensus is that investors are extremely concerned over the slowdown of growth in the Chinese economy. Media accounts are using terms like "frenzy," "wild," and "chaos" to describe the situation.

The [AP](#) (8/25, McDonald) reports that the Dow dropped 588.47 points to 15,871.28, while the S&P 500 index fell 77.68 points to 1,893.21 and the Nasdaq Composite Index was down 179.79 points to 4,526.25. [USA Today](#) (8/25, Shell, 5.23M) reports that the "selling spree" has "now infected every corner of the US stock market." The Dow, "small-company Russell 2000, large-company S&P 500 and tech-dominated Nasdaq composite are all down more than 10% from their record peaks from earlier this year and in full-fledged corrections."

The [Washington Post](#) (8/25, Harwell, 6.76M) reports that the "worldwide selling frenzy" came as "investors worried over China's slowing economy extended a global-market meltdown." The "global whiplash underscored investors' shaken confidence in China's slowing economy and central bank." The [New York Times](#) (8/25, A1, Popper, Gough, Subscription Publication, 11.82M) reports that investors' "concerns over China's economic slowdown and a souring view of emerging economies have rattled financial markets around the world in recent days, and showed no signs of letting up."

[AFP](#) (8/25, Jackson, Zhang) reports that Chinese stocks "have tumbled since peaking in mid-June and authorities have launched broad interventions to try to restrain the drops, but Beijing's latest market intervention has failed to restore confidence." [Reuters](#) (8/25, Agrawal) similar says that a lack of new market-stabilization effort in China following last week's rout drove the declines.

In an analysis piece, the [New York Times](#) (8/25, Irwin, Subscription Publication, 11.82M) reports that the "immediate trigger to the outburst of global volatility was China." However, looking deeper, the "fact that the Chinese government has pulled out unprecedented steps to try to contain the stock market sell-off, to little avail, may suggest limitations on the power of even the mighty Chinese state."

More technically, the [Wall Street Journal](#) (8/25, Driebusch, Subscription Publication, 5.95M) reports that the day's early drop came as investors looked to protect themselves against earlier losses in overseas markets, along with a series of stop-loss orders, which are designed to protect investors by selling stocks if they fall to a certain level.

The [New York Times](#) (8/25, Schwartz, Abrams, Subscription Publication, 11.82M) reports that as the market tanked in early trading, financial advisers and others, including Apple CEO Tim Cook, worked to calm fearful investors. While it worked for a while, by the end of the day, "Apple and the rest of the market had yielded to the gravitational pull of investor fear."

The [Los Angeles Times](#) (8/25, Peltz, 4.07M) reports that Wall Street "endured a wild ride" on Monday. However, the piece reports that several financial professionals were not rattled by the drop. For example, Chris Hardt of Edward Jones said, "The market will pull back 10% about once a year on average. This is a normal thing," while Michael Kanigher, a USB managing director, suggests that the markets still appear strong.

The [Huffington Post](#) (8/24, Kaufman, 164K) reports that worldwide, markets "tumbled toward historic losses amid a toxic cocktail of financial volatility." For example, the pan-European Stoxx 600 index "fell nearly 6 percent on Monday morning," while London's FTSE 100 stock index "plunged more than 5 percentage points."
