Attachments: [screen copies.docx](#)

I have copied the portion of the screen showing items to be coded, multiple times, attached.

In all cases, I was checking the box in the upper left to code the group before entering the coding.

After additional multiple codings after those which led to the screen shots in the attachment, all of which resulted in a full screen of "codable" items still showing, I did another search, which appears to indicate that all items were coded.

It took me from the time we finished our call to 10:15 to complete the groups 1-3 coding. Groups 4-5 had some of the same issues re what appeared on the screen, but it did move forward and with far more codings than should have required (didn't keep track) was able to code all of that dataset also.

I will go ahead and create new datasets. I will try coding the first one, in case having both of us on the screen for the first two causes the problem. but if this occurs again, will stop and let you know.

Initial screen

Search and Browse Dataset

Groups 1-3 Opp ([Dataset](#))

Showing 1 to 1,000 of 4,000 total Filters applied

After 1st coding of 1000 items

Search and Browse Dataset

Groups 1-3 Opp ([Dataset](#))

Showing 1 to 1,000 of 15,000 total Filters applied

After moving screen to next page (wanted to see if coding was registering)

Search and Browse Dataset

Groups 1-3 Opp ([Dataset](#))

Showing 1,001 to 2,000 of 3,000 total Filters applied

After coding 3 more times, should have covered 3,000

Search and Browse Dataset

Groups 1-3 Opp ([Dataset](#))

Showing 1 to 1,000 of 15,000 total Filters applied

After again going to next page of list

Search and Browse Dataset

Groups 1-3 Opp ([Dataset](#))

Showing 1,001 to 2,000 of 3,000 total Filters applied

After doing another 3 group codings, should have covered 3,000 items

Search and Browse Dataset

Groups 1-3 Opp ([Dataset](#))

Showing 1,001 to 2,000 of 2,000 total Filters applied

After going from 2nd page to first page of list, coding again

Search and Browse Dataset

Groups 1-3 Opp ([Dataset](#))

Showing 1 to 1,000 of 15,000 total Filters applied

After over 10 codings, moving from 2nd page to first page

Search and Browse Dataset

Groups 1-3 Opp ([Dataset](#))

Showing 1 to 1,000 of 1,000 total **Filters applied**

After coding again, which should have finished the set, got

Search and Browse Dataset

Groups 1-3 Opp ([Dataset](#))

Showing 1 to 1,000 of 15,000 total **Filters applied**

With a full page of green “codeable” items on the right.

I then did a new search and returned

No Results Found

[return to listing](#)

Which I presume means the items were finally coded.
